Evermore give us this bread ( $\pi \alpha \nu \tau 0 \tau \varepsilon \delta o \varsigma ~ \eta \mu \nu \nu$ тov $\alpha \rho \tau 0 \nu \tau o v \tau o v)$. Second aorist active imperative second singular like $\delta o s$ in $\mathrm{Mt} \mathrm{6:11}$ (urgent petition). What kind of bread do they mean? The Jewish commentaries and Philo speak of the manna as typifying heavenly bread for the soul. Paul in 1Co 10:3 seems to refer to the manna as "spiritual food." Like the woman at the well ( 4:15) they long "always" to have "this bread," a perpetual supply. It is probably to this crowd as the water in $4: 15$ was to the woman.

John 6:35
I am the bread of life ( $\mathrm{E} \gamma \omega \varepsilon \varepsilon \mu$ o $\alpha \rho \tau о \varsigma \tau \eta \varsigma \zeta \omega \eta \varsigma)$. This sublime sentence was startling in the extreme to the crowd. Philo does compare the manna to the $\theta \varepsilon \boldsymbol{\varepsilon}$ о $\lambda$ 入oүos in an allegorical sense, but this language is far removed from Philo's vagueness. In the Synoptics (Mr 14:22; Mt 26:26; Lu 22:19 ) Jesus uses bread (a $\alpha \tau \circ \varsigma)$ as the symbol of his body in the Lord's Supper, but here Jesus offers himself in place of the loaves and fishes which they had come to seek $(24,26)$. He is the bread of life in two senses: it has life in itself, the living bread ( 51), and it gives life to others like the water of life, the tree of life. John often has Jesus saying "I am" ( $\varepsilon \gamma \omega \varepsilon \mid \mu)$. As also in $6: 41,48,51 ; 8: 12 ; 10: 7,9,11,14 ; 11: 25 ; 14: 6 ; 15: 1,5$.

He that cometh to me (o $\varepsilon \rho \chi \circ \mu \varepsilon v o \varsigma \pi \rho \circ \varsigma \varepsilon \mu \varepsilon$ ). The first act of the soul in approaching Jesus. See also verse 37.

Shall not hunger ( $o v \mu \eta \pi \varepsilon เ v a \sigma \eta$ ). Strong double negative $o v \mu \varepsilon$ with first aorist (ingressive) active subjunctive, "shall not become hungry."

He that believeth on me ( $о \pi \iota \sigma \tau \varepsilon \nu \omega v \varepsilon \varsigma \varsigma \mu \varepsilon$ ). The continuous relation of trust after coming like $\pi \iota \sigma \tau \varepsilon \cup \eta \tau \varepsilon$ (present tense) in verse 29. See both verbs used together also in 7:37f

Shall never thirst (ov $\mu \eta \delta \psi \psi \eta \sigma \varepsilon \pi \omega \pi \sigma \tau \varepsilon$ ). So the old MSS. the future active indicative instead of the aorist subjunctive as above, an even stronger form of negation with $\pi \omega \pi \sigma \tau \varepsilon$ ( $1: 18$ ) added.

John 6:36
That ye have seen me (от $\kappa \alpha \varepsilon \omega \rho \alpha \kappa \alpha \tau \varepsilon \mu \varepsilon$ ). It is not certain that $\mu \varepsilon$ is genuine. If not, Jesus may refer to verse 26. If genuine, some other saying is referred to that we do not have. Note ka (also or even).

And yet believe not ( $\kappa \alpha$ ov $\pi\llcorner\sigma \tau \varepsilon \cup \varepsilon \tau \varepsilon$ ). Use of $\kappa \alpha=$ and yet.
John 6:37
All that ( $\pi \alpha v$ o). Collective use of the neuter singular, classic idiom, seen also in 6:39; 17:2,24; 1Jo 5:4 . Perhaps the notion of unity like $\varepsilon v$ in 17:21 underlies this use of $\pi \alpha v$ o.

Giveth me ( $\delta \iota \omega \sigma \tau \nu \mu 0$ ). For the idea that the disciples are given to the Son see also 6:39,65; 10:29; 17:2,6,9,12,24; 18:9.

I will in no wise cast out ( $o v \mu \eta \varepsilon \kappa \beta \alpha \lambda \omega \varepsilon \xi \omega$ ). Strong double negation as in verse 35 with second aorist active subjunctive of $\beta \alpha \lambda \lambda \omega$. Definite promise of Jesus to welcome the one who comes.

John 6:38
I am come down ( $\kappa \alpha \tau \alpha \beta \varepsilon \beta \eta \kappa \alpha$ ). Perfect active indicative of $\kappa \alpha \tau \alpha \beta \alpha \downarrow \nu \omega$. See on 33 for frequent use of this phrase by Jesus. Here a $\pi$ o is correct rather than $\varepsilon \kappa$ with tov oupavou.

Not to do (ovx $\operatorname{vo} \alpha \pi \circ \omega$ ). "Not that I keep on doing" (final clause with $ו v \alpha$ and present active subjunctive of $\pi \mathbf{\pi} เ \varepsilon \omega$ ).

But the will ( $\alpha \lambda \lambda \alpha$ то $\theta \varepsilon \lambda \eta \mu \alpha$ ). Supply vv $\pi$ тot $\omega$ after $\alpha \lambda \lambda \alpha$, "but that I keep on doing." This is the fulness of joy for Jesus, to do his Father's will (4:34; 5:30).

John 6:39
That of all that which ( $\imath v \alpha \pi \alpha v o$ ). Literally, "That all which" (see verse 37 for $\pi \alpha v o$ ), but there is a sharp anacoluthon with $\pi \alpha v$ left as nominativus pendens.

I should lose nothing ( $\mu \eta \alpha \pi \sigma \lambda \varepsilon \sigma \omega \varepsilon \xi \alpha v \tau o v$ ). Construed with $v \alpha$, "that I shall not lose anything of it." А $\tau$ о $\lambda \varepsilon \sigma \omega$, from $\alpha \pi о \lambda \lambda \nu \mu$, can be either future active indicative or first aorist active subjunctive as is true also of $\alpha v a \sigma \tau \eta \sigma \omega$ (from $\alpha v \iota \sigma \tau \eta \mu$ ), "I shall raise up."

At the last day ( $\tau \eta \varepsilon \sigma \chi \alpha \tau \eta \varepsilon \mu \varepsilon \rho \alpha$ ). Locative case without $\varepsilon v$. Only in John, but four times here ( $39,40,44,54$ ) "with the majesty of a solemn refrain." In 7:37 it is the last day of the feast of tabernacles, but in 11:24; 12:48 of the day of judgment as here. Christ is the Agent of the general resurrection in 5:28 as in 1Co 15:22 while here only the resurrection of the righteous is mentioned.

John 6:40
Should have eternal life ( $\varepsilon \chi \eta \zeta \omega \eta \nu \alpha \omega \omega v o v)$. Present active subjunctive with $v \alpha$, "that he may keep on having eternal life" as in $3: 15,36$.

Beholdeth $(\theta \varepsilon \omega \rho \omega v)$. With the eye of faith as in 12:45.
And I will raise him up ( $\kappa \alpha \alpha v \alpha \sigma \tau \eta \sigma \omega$ ). Future active indicative (volitive future, promise) as in 54.

John 6:41
Murmured ( $\varepsilon \gamma \circ \gamma \gamma \cup \zeta o v)$. Imperfect active of the onomatopoetic verb $\gamma \circ \gamma \gamma \cup \zeta \omega$, late verb in LXX (murmuring against Moses), papyri (vernacular), like the cooing of doves or the buzzing of bees. These Galilean Jews are puzzled over what Jesus had said (verses 33,35 ) about his being the bread of God come down from heaven.

John 6:42
How doth he now say? ( $\Pi \omega \varsigma v v \nu \lambda \varepsilon \gamma \varepsilon \iota ;$ ). They knew Jesus as the son of Joseph and Mary. They cannot comprehend his claim to be from heaven. This lofty claim puzzles sceptics today.

John 6:43
Murmur not ( $\mu \eta \gamma 0 \gamma \gamma \nu \zeta \varepsilon \tau \varepsilon$ ). Prohibition with $\mu \eta$ and the present active imperative, "stop murmuring" (the very word of verse 41 ). There was a rising tide of protest.

John 6:44
Except the Father draw him ( $\varepsilon \alpha v \mu \eta \varepsilon \lambda \kappa v \sigma \eta \alpha v \tau o v)$. Negative condition of third class with $\varepsilon \alpha v \mu \eta$ and first aorist active subjunctive of $\varepsilon \lambda \kappa \nu \omega$, older form $\varepsilon \lambda \kappa \omega$, to drag like a net (Joh 21:6 ), or sword ( 18:10), or men (Ac 16:19), to draw by moral power ( $12: 32$ ), as in Jer 31:3. $\Sigma v \rho \omega$, the other word to drag (Ac 8:3; 14:19) is not used of Christ's drawing power. The same point is repeated in verse 65 . The approach of the soul to God is initiated by God, the other side of verse 37 . See Ro $8: 7$ for the same doctrine and use of ov $\delta \varepsilon \delta v v a \tau a$ like ouסzıc $\delta u v a \tau \alpha$ here.

John 6:45
Taught of God ( $\delta$ ı $\delta$ aктo $\theta \varepsilon o v$ ). A free quotation from Isa $54: 13$ with this phrase in the LXX. There is here the ablative case $\theta \varepsilon o v$ with the passive verbal adjective $\delta$ t $\delta \alpha \kappa \tau o$ (Robertson, Grammar, p. 516). In 1Th 4:9 we have the compound verbal $\theta \varepsilon o \delta \iota \delta \alpha \kappa \tau o$. The same use of $\delta$ ı $\delta$ aktos with the ablative occurs in 1Co 2:13.

And hath learned ( $\kappa \alpha \mu \alpha \theta \omega v$ ). Second aorist active participle of $\mu \alpha v \theta \alpha v \omega$. It is not enough to hear God's voice. He must heed it and learn it and do it. This is a voluntary response. This one inevitably comes to Christ.

John 6:46
This one has seen the Father ( $о \tau \tau \circ \varsigma \varepsilon \omega \rho \alpha \kappa \varepsilon \nu \tau 0 \nu \pi \alpha \tau \varepsilon \rho \alpha$ ). Perfect active indicative of o $\alpha \omega$. With the eyes no one has seen God ( $1: 18$ ) save the Son who is "from God" in origin ( $1: 1,14 ; 7: 29 ; 16: 27 ; 17: 8$ ). The only way for others to see God is to see Christ ( $14: 9$ ).

## John 6:47

He that believeth (o $\pi \iota \sigma \tau \varepsilon v \omega v$ ). This is the way to see God in Christ.
John 6:48
I am the bread of life $(\varepsilon \gamma \omega \varepsilon \iota \mu$ о $\alpha \rho \tau о \varsigma \tau \eta \varsigma \zeta \omega \eta \varsigma)$. Jesus repeats the astounding words of verse 35 after fuller explanation. The believer in Christ has eternal life because he gives himself to him.

John 6:49
And they died ( $\kappa \alpha a \pi \varepsilon \theta a v o v)$. Physical death. The manna did not prevent death. But this new manna will prevent spiritual death.

John 6:50
That a man may eat thereof, and not die ( $\imath \alpha \tau \tau \varsigma \varepsilon \xi$ av $\alpha 0 v \varphi \alpha \gamma \eta \kappa \alpha \mu \eta \alpha \pi \circ \theta \alpha \nu \eta$ ). Purpose clause with $\iota v a$ and the second aorist active subjunctive of $\varepsilon \sigma \theta \iota \omega$ and $\alpha \pi \circ \theta \nu \eta \sigma \kappa \omega$. The wonder and the glory of it all, but quite beyond the insight of this motley crowd.

John 6:51

The living bread (o aptos o $\zeta \omega v$ ). "The bread the living." Repetition of the claim in $35,41,48$, but with a slight change from $\zeta \omega \eta \varsigma$ to $\zeta \omega \nu$ (present active participle of $\zeta \alpha \omega$ ). It is alive and can give life. See 4:10 for living water. In Re 1:17 Jesus calls himself the Living One (o $\zeta \omega v$ ).

For ever ( $\varepsilon \iota \varsigma ~ \tau o v ~ a \iota \omega v \alpha)$. Eternally like aı $\omega v \iota \nu$ with $\zeta \omega \eta \nu$ in 47.
I shall give ( $\varepsilon \gamma \omega \delta \omega \sigma \omega$ ). Emphasis on $\varepsilon \gamma \omega$ (I). Superior so to Moses.
Is my flesh ( $\eta \sigma \alpha \rho \xi \mu 0 v \varepsilon \sigma \tau \iota v$ ). See on 1:14 for $\sigma \alpha \rho \xi$ the Incarnation. This new idea creates far more difficulty to the hearers who cannot grasp Christ's idea of self-sacrifice.

For the life of the world (v $v \varepsilon \rho \tau \eta \varsigma ~ \tau о v ~ к о \sigma \mu о v ~ \zeta \omega \eta \varsigma)$. Over, in behalf of, v $\tau \varepsilon \rho$ means, and in some connexions instead of as in 11:50. See 1:30 for the Baptist's picture of Christ as the Lamb of God that taketh away the sin of the world. See also 3:17; 4:42; 1Jo 3:16; Mt 20:28; Ga 3:13; 2Co 5:14f.; Ro 5:8 . Jesus has here presented to this Galilean multitude the central fact of his atoning death for the spiritual life of the world.

John 6:52
Strove ( $\varepsilon \mu \alpha \chi o v \tau 0$ ). Imperfect (inchoative) middle of $\mu \alpha \chi \circ \mu \alpha$, to fight in armed combat (Ac 7:26), then to wage a war of words as here and $2 \mathrm{Ti} 2: 24$. They were already murmuring (41), now they began bitter strife with one another over the last words of Jesus (43-51), some probably seeing a spiritual meaning in them. There was division of opinion about Jesus in Jerusalem also later (7:12,40; 9:16; 10:19).

How can? ( $\Pi \omega \varsigma \delta u v a \tau \alpha ;$;). The very idiom used by Nicodemus in 3:4,9 . Here scornful disbelief.

This man (ovtoc). Contemptuous use pictured in verse 42.
His flesh to eat ( $\tau \eta \nu \sigma \alpha \rho \kappa \alpha$ autov $\varphi \alpha \gamma \varepsilon เ v$ ). As if we were cannibals! Some MSS. do not have avtov, but the meaning is clear. The mystical appropriation of Christ by the believer (Ga 2:20; Eph 3:17) they could not comprehend, though some apparently were against this literal interpretation of "flesh" ( $\sigma \alpha \rho \xi$ ).

John 6:53
Except ye eat ( $\varepsilon \alpha v \mu \eta \varphi \alpha \gamma \eta \tau \varepsilon$ ). Negative condition of third class with second aorist active subjunctive of $\varepsilon \sigma \theta \iota \omega$. Jesus repeats the statement in verses 50,51 . Note change of $\mu \circ v$ (my) in verse 51 to tov viov tov $\alpha v \theta \rho \omega \pi$ rov with same idea.

And drink his blood ( $\kappa \alpha \pi ı \eta \varepsilon$ autov тo $\alpha \not \mu \alpha$ ). Same condition with second aorist active subjunctive of $\pi \imath v \omega$. This addition makes the demand of Jesus seem to these Jews more impossible than before if taken in a baldly literal sense. The only possible meaning is the spiritual appropriation of Jesus Christ by faith (verse 47), for "ye have not life in yourselves" (ouk £ $\chi \varepsilon \tau \varepsilon \zeta \omega \eta \vee \varepsilon \vee$ عautoıc). Life is found only in Christ.

John 6:54
He that eateth (o $\tau \rho \omega \gamma \omega v$ ). Present active participle for continual or habitual eating like $\pi เ \sigma \tau \varepsilon v \varepsilon \tau \varepsilon$ in verse 29 . The verb $\tau \rho \omega \gamma \omega$ is an old one for eating fruit or vegetables and
the feeding of animals. In the N.T. it occurs only in Joh 6:54,56,58; 13:18; Mt 24:38. Elsewhere in the Gospels always $\varepsilon \sigma \theta \iota \omega$ or $\varepsilon \varphi a \gamma o v$ (defective verb with $\varepsilon \sigma \theta \iota \omega$ ). No distinction is made here between $\varepsilon \varphi a \gamma \circ \nu(48,50,52,53,58)$ and $\tau \rho \omega \gamma \omega(54,56,57,58)$. Some men understand Jesus here to be speaking of the Lord's Supper by prophetic forecast or rather they think that John has put into the mouth of Jesus the sacramental conception of Christianity by making participation in the bread and wine the means of securing eternal life. To me that is a violent misinterpretation of the Gospel and an utter misrepresentation of Christ. It is a grossly literal interpretation of the mystical symbolism of the language of Jesus which these Jews also misunderstood. Christ uses bold imagery to picture spiritual appropriation of himself who is to give his life-blood for the life of the world (51). It would have been hopeless confusion for these Jews if Jesus had used the symbolism of the Lord's Supper. It would be real dishonesty for John to use this discourse as a propaganda for sacramentalism. The language of Jesus can only have a spiritual meaning as he unfolds himself as the true manna.

John 6:55
Meat indeed ( $\alpha \lambda \eta \forall \eta \varsigma \beta \rho \omega \sigma \iota \varsigma$ ). So the best MSS., "true food." See on 4:32 for $\beta \rho \omega \sigma \iota$ as equal to $\beta \rho \omega \mu \alpha$ (a thing eaten).

Drink indeed ( $\alpha \lambda \eta \forall \eta \varsigma$ лобıऽ). Correct text, "true drink." For $\pi$ обıৎ see Ro 14:17; Col 2:16 (only N.T. examples).

John 6:56
Abideth in me and I in him ( $\varepsilon v \varepsilon \mu \circ \mu \varepsilon v \varepsilon \kappa \alpha \gamma \omega \varepsilon v \alpha v \tau \omega$ ). Added to the phrase in 54 in the place of $\varepsilon \chi \varepsilon \zeta \omega \eta \nu$ aı $\omega v$ vov (has eternal life). The verb $\mu \varepsilon v \omega$ (to abide) expresses continual mystical fellowship between Christ and the believer as in 15:4-7; 1Jo 2:6,27,28; 3:6,24; 4:12,16 . There is, of course, no reference to the Lord's Supper (Eucharist), but simply to mystical fellowship with Christ.

John 6:57
The living Father (o $\zeta \omega \nu \pi \alpha \tau \eta \rho$ ). Nowhere else in the N.T., but see 5:26 and "the living God" (Mt 16:16; 2Co 6:16 ). The Father is the source of life and so "I live because of the Father" ( $\kappa \alpha \gamma \omega \zeta \omega \delta \iota \alpha$ тov $\pi \alpha \tau \varepsilon \rho \alpha)$.

He that eateth me (o $\tau \rho \omega \gamma \omega \nu \mu \varepsilon$ ). Still bolder putting of the mystical appropriation of Christ (51,53,54,56).

Because of me $\left(\delta \iota^{\prime} \varepsilon \mu \varepsilon\right)$. The same idea appears in 14:19: "Because I live ye shall live also." See 11:25. Jesus Christ is our ground of hope and guarantee of immortality. Life is in Christ. There is no real difficulty in this use of $\delta \iota \alpha$ with the accusative as with $\delta \iota \alpha \tau o v \pi \alpha \tau \varepsilon \rho \alpha$ just before. It occurs also in 15:3. As the Father is the fount of life to Christ, so Christ is the fount of life to us. See 1Jo 4:9 where $\delta \iota \alpha$ is used with the genitive ( $\delta \iota^{\prime} \alpha v \tau o v$ ) as the intermediate agent, not the ground or reason as here.

John 6:58

This is the bread (ovtoc eбтıv o apтoc). Summary and final explanation of the true manna (from verse 32 on) as being Jesus Christ himself.

John 6:59
In the synagogue ( $\varepsilon v \sigma v v a \gamma \omega \gamma \eta$ ). Definite like our in church, though article absent. Only use of the word in John except 18:20. "Among the ruins at Tell Hum, the probable site of Capernaum, have been found among the remains of a synagogue a block of stone perhaps the lintel, carved with a pot of manna, and with a pattern of vine leaves and clusters of grapes" (Vincent).

John 6:60
A hard saying ( $\sigma \kappa \lambda \eta \rho \circ \varsigma)$. "This saying is a hard one." Old adjective, rough, harsh, dried hard (from $\sigma \kappa \varepsilon \lambda \lambda \omega$, to dry), probably the last saying of Jesus that he was the bread of life come down from heaven and they were to eat him. It is to be hoped that none of the twelve joined the many disciples in this complaint.

Hear it (avtov aкoveıv). Or "hear him," hear with acceptation. For aкоv $\omega$ with the genitive see 10:3,16,27.

John 6:61
Knowing in himself ( $\varepsilon \delta \omega \varsigma \varsigma v \varepsilon \alpha \cup \tau \omega)$. Second perfect active participle of oı $\delta \alpha$. See 2:25 for this supernatural insight into men's minds.

Murmured ( $\gamma \circ \gamma \gamma \cup \zeta o v \sigma ı v)$. Present active indicative retained in indirect discourse. See 41 for $\gamma \boldsymbol{\gamma} \gamma \nu \zeta \omega$.

At this ( $\pi \varepsilon \rho$ tovtou). "Concerning this word."
Cause to stumble ( $\sigma \kappa \alpha v \delta \alpha \lambda \iota(\varepsilon)$. Common Synoptic verb from $\sigma \kappa \alpha v \delta \alpha \lambda o v$ for which see Mt 5:29. In John again only in 16:1.

John 6:62
What then if ye should behold ( $\varepsilon \alpha v$ ouv $\theta \varepsilon \omega \rho \eta \tau \varepsilon$ ). No "what" in the Greek. Condition of third class with $\varepsilon a v$ and present active subjunctive, "if ye then behold."

Ascending ( $\alpha v \alpha \beta \alpha ı v o v \tau \alpha$ ). Present active participle picturing the process.
Where he was before ( $о \pi о v \eta \nu$ to $\pi \rho о \tau \varepsilon \rho o v$ ). Neuter articular adjective as adverb (accusative of general reference, at the former time as in 9:8; Ga 3:13). Clear statement of Christ's pre-existence in his own words as in 3:13; 17:5 (cf. 1:1-18).

John 6:63
That quickeneth ( $\tau$ о $\zeta \omega о \pi о \iota o v v$ ). Articular present active participle of $\zeta \omega о \pi о \varepsilon \omega \omega$ for which see 5:21. For the contrast between $\pi \nu \varepsilon v \mu \alpha$ (spirit) and $\sigma \alpha \rho \xi$ (flesh) see already 3:6.

The words ( $\tau \alpha \rho \eta \mu \alpha \tau \alpha$ ). Those in this discourse (I have just spoken, $\lambda \varepsilon \lambda \alpha \lambda \eta \kappa \alpha$ ), for they are the words of God ( $3: 34 ; 8: 47 ; 17: 8$ ). No wonder they "are spirit and are life" ( $\pi \nu \varepsilon v \mu \alpha$ $\varepsilon \sigma \tau \iota v \kappa \alpha \zeta \omega \eta \varepsilon \sigma \tau \iota v)$. The breath of God and the life of God is in these words of Jesus. Never man spoke like Jesus ( 7:46). There is life in his words today.

John 6:64

That believe not (o ou $\pi \iota \sigma \tau \varepsilon v o v \sigma ı v)$. Failure to believe kills the life in the words of Jesus.
Knew from the beginning ( $\eta \mid \delta \varepsilon \varepsilon \xi \alpha \rho \chi \eta \varsigma$ ). In the N.T. we have $\varepsilon \xi \alpha \rho \chi \eta \varsigma$ only here and 16:4, but $\alpha \pi^{\prime} \alpha \rho \chi \eta \varsigma$ in apparently the same sense as here in 15:27; 1Jo 2:7,24; 3:11 and see Lu 1:2; 1Jo 1:1. From the first Jesus distinguished between real trust in him and mere lip service ( $2: 24 ; 8: 31$ ), two senses of $\pi \iota \sigma \tau \varepsilon \cup \omega$.

Were ( $\varepsilon เ \sigma เ v)$. Present active indicative retained in indirect discourse.
And who it was that should betray him ( $\kappa \alpha \tau \iota \varsigma \varepsilon \sigma \tau \iota v$ о $\pi \alpha \rho \alpha \delta \omega \sigma \omega v$ ). Same use of $\varepsilon \sigma \tau \iota v$ and note article and future active participle of $\pi \alpha \rho \alpha \delta i \delta \omega \mu$, to hand over, to betray. John does not say here that Jesus knew that Judas would betray him when he chose him as one of the twelve, least of all that he chose him for that purpose. What he does say is that Jesus was not taken by surprise and soon saw signs of treason in Judas. The same verb is used of John's arrest in Mt 4:12. Once Judas is termed traitor ( $\pi \rho 0 \delta o \tau \eta \varsigma)$ in Lu 6:16 . Judas had gifts and was given his opportunity. He did not have to betray Jesus.

John 6:65
Except it be given him of the Father ( $\varepsilon \alpha v \mu \eta \eta \delta \varepsilon \delta o \mu \varepsilon v o v \alpha v \tau \omega \varepsilon \kappa$ tov $\pi \alpha \tau \rho o \varsigma)$. Condition of third class with $\varepsilon \alpha \nu \mu \eta$ and periphrastic perfect passive subjunctive of $\delta \iota \delta \omega \mu$. Precisely the same point as in verse 44 where we have $\varepsilon \lambda \kappa \nu \sigma \eta$ instead of $\eta \delta \varepsilon \delta o \mu \varepsilon v o v$. The impulse to faith comes from God. Jesus does not expect all to believe and seems to imply that Judas did not truly believe.

John 6:66
Upon this ( $\varepsilon \kappa$ тovtov). Same idiom in 19:12. "Out of this saying or circumstance." Jesus drew the line of cleavage between the true and the false believers.

Went back ( $\alpha \pi \eta \lambda \theta$ ov $\varepsilon \iota \varsigma \tau \alpha$ о $\pi \iota \sigma \omega$ ). Aorist (ingressive) active indicative of $\alpha \pi \varepsilon \rho \chi \circ \mu \alpha$ with $\varepsilon ı \varsigma \tau \alpha$ oпı$\llcorner\omega$, "to the rear" (the behind things) as in 18:6.

Walked no more with him (оикєт $\mu \varepsilon \tau^{\prime}$ autov $\pi \varepsilon \rho เ \varepsilon \pi \alpha \tau o v v$ ). Imperfect active of $\pi \varepsilon \rho ı \pi \alpha \tau \varepsilon \omega$. The crisis had come. These half-hearted seekers after the loaves and fishes and political power turned abruptly from Jesus, walked out of the synagogue with a deal of bluster and were walking with Jesus no more. Jesus had completely disillusioned these hungry camp-followers who did not care for spiritual manna that consisted in intimate appropriation of the life of Jesus as God's Son.

John 6:67
Would ye also go away? ( $\mathrm{M} \eta \kappa \alpha \cup \mu \varepsilon ı \varsigma \quad \theta \varepsilon \lambda \varepsilon \tau \varepsilon$ v $\tau \alpha \gamma \varepsilon เ \nu ;$ ). Jesus puts it with the negative answer $(\mu \eta)$ expected. See $21: 5$ where Jesus also uses $\mu \eta$ in a question. Judas must have shown some sympathy with the disappointed and disappearing crowds. But he kept still. There was possibly restlessness on the part of the other apostles.

John 6:68
Lord, to whom shall we go? (Kv $1 \varepsilon, \pi \rho \circ \varsigma \tau ı v \alpha \alpha \pi \varepsilon \lambda \varepsilon v \sigma \circ \mu \varepsilon \theta \alpha$;). Peter is the spokesman as usual and his words mean that, if such a thought as desertion crossed their minds when
the crowd left, they dismissed it instantly. They had made their choice. They accepted these very words of Jesus that had caused the defection as "the words of eternal life."

John 6:69
We have believed ( $\eta \mu \varepsilon ı \varsigma ~ \pi \varepsilon \pi เ \sigma \tau \varepsilon \cup к а \mu \varepsilon v)$. Perfect active indicative of $\pi \iota \sigma \tau \varepsilon v \omega$, "We have come to believe and still believe" (verse 29).

And know ( $\kappa \alpha \varepsilon \gamma \nu \omega \kappa \alpha \mu \varepsilon \nu$ ). Same tense of $\gamma เ \nu \omega \sigma \kappa \omega$, "We have come to know and still know."
 believe that this is John's report of the same confession given by the Synoptics (Mr 8:27f.; Mt 16:13-20; Lu 9:18f. ), an utterly unjustifiable conclusion. The details are wholly different. Here in the synagogue in Capernaum, there on Mt. Hermon near Caesarea Philippi. What earthly difficulty is there in supposing that Peter could make a noble confession twice? That is to my mind a wooden conception of the apostles in their growing apprehension of Christ.

John 6:70
And one of you is a devil ( $\kappa \alpha \varepsilon \xi v \mu \omega v \varepsilon \iota \varsigma \delta \iota \alpha \beta о \lambda o \varsigma \varepsilon \sigma \tau \iota v$ ). Jesus does not say that Judas was a devil when he chose him, but that he is one now. In 13:2,27 John speaks of the devil entering Judas. How soon the plan to betray Jesus first entered the heart of Judas we do not know ( 12:4). One wonders if the words of Jesus here did not cut Judas to the quick.

John 6:71
Of Simon Iscariot ( $\Sigma \mu \omega \omega$ voc Iøк $\alpha \rho \omega \tau \sigma v$ ). So his father was named Iscariot also, a man of Kerioth (possibly in Judah, Jos 15:25, possibly in Moab, Jer 48:24 ), not in Galilee. Judas was the only one of the twelve not a Galilean. The rest of the verse is like 12:4.

One of the twelve ( $\varepsilon \varsigma \varsigma \kappa \tau \omega \nu \delta \omega \delta \varepsilon \kappa \alpha$ ). The eternal horror of the thing.

## John 7

John 7:1
After these things ( $\mu \varepsilon \tau \alpha \tau \alpha \cup \tau \alpha$ ). John's favourite general note of the order of events. Bernard conceives that the events in 7:1-14 follow 7:15-24 and both follow chapter 5, not chapter 6 , a wholly needless readjustment of the narrative to suit a preconceived theory. John simply supplements the narrative in the Synoptics at points deemed important. He now skips the period of withdrawal from Galilee of about six months (from passover to tabernacles).

Walked ( $\pi \varepsilon \rho ı \varepsilon \pi \alpha \tau \varepsilon$ ). Imperfect active, a literal picture of the itinerant ministry of Jesus. He has returned to Galilee from the region of Caesarea Philippi. He had been avoiding Galilee as well as Judea for six months.

For he would not walk in Judea (ov $\gamma \alpha \rho \eta \theta \varepsilon \lambda \varepsilon v \varepsilon v \tau \eta$ Iov $\alpha a 1 \alpha$ ). Imperfect active of $\theta \varepsilon \lambda \omega$ picturing the attitude of refusal to work in Judea after the events in chapter 5 (perhaps a year and a half before).
 been seeking to kill him as shown in 5:18 where the same words occur.

John 7:2
The feast of tabernacles ( $\eta \sigma \kappa \eta v o \pi \eta \gamma \nmid \alpha)$. Only New Testament example of this word ( $\sigma \kappa \eta \nu \eta$, tent, $\pi \eta \gamma v v \mu$, to fasten as in Heb 8:2 ). Technical name of this feast (De 16:13; Le 23:34,43 ). It began on the 15th of the month Tisri (end of September) and lasted seven days and finally eight days in post-exilic times ( $\mathrm{Ne} 8: 18$ ). It was one of the chief feasts of the Jews.

John 7:3
His brethren (o $\alpha \delta \varepsilon \lambda \varphi$ o autou). "His brothers" (half-brothers actually), who "were not
 Messianic assumptions of Jesus, a natural attitude as one can well see, though at first they were friendly ( $2: 12$ ).

Depart hence ( $\mu \varepsilon \tau \alpha \beta \eta \theta \varepsilon v \tau \varepsilon v \theta \varepsilon v$ ). Second aorist active imperative of $\mu \varepsilon \tau \alpha \beta \alpha \iota v \omega$, to pass to another place ( $5: 24 ; 13: 1$ ). It was impertinence on their part.

That thy disciples also may behold (ıv $\kappa \alpha$ о $\mu \alpha \theta \eta \tau \alpha$ боv $\theta \varepsilon \omega \rho \eta \sigma о v \sigma ı v$ ). Final clause with $\stackrel{v \alpha}{ }$ and the future active indicative of $\theta \varepsilon \omega \rho \varepsilon \omega$. Jesus had many disciples in Judea at the start (2:23; $4: 1$ ) and had left it because of the jealousy of the Pharisees over his success ( 4:3). The brothers may have heard of the great defection in the synagogue in Capernaum ( 6:66), but the advice is clearly ironical.

Which thou doest ( $\alpha$ roısı). To what works they refer by this language we do not know. But Jesus had been away from Galilee for some months and from Judea for a year and a half. Perhaps the brothers of Jesus may actually have been eager to rush Jesus into the hostile atmosphere of Jerusalem again.

John 7:4
In secret ( $\varepsilon v \kappa \rho v \pi \tau \omega$ ). See Mt 6:4,6 for this phrase.
Openly ( $\varepsilon v \pi \alpha \rho \rho \eta \sigma \iota \alpha$ ). "In public" ( $\pi \alpha \nu, \rho \eta \sigma \iota \varsigma$, telling it all). See on Mt 8:32 . Common in John ( $7: 13,26 ; 10: 24 ; 16: 25,29 ; 18: 20$; here again contrasted with $\varepsilon v \kappa \rho v \pi \tau \omega)$. It is wise advice in the abstract that a public teacher must allow inspection of his deeds, but the motive is evil. They might get Jesus into trouble. $\mathrm{I} \varphi$ Өov $\delta o \varepsilon \sigma \tau \theta \varepsilon \sigma \varepsilon \theta \iota \nu \gamma \varsigma(\varepsilon \tau \alpha v \tau \alpha \pi o \iota \varepsilon ı \varsigma)$. This condition of the first class assumes the reality of the deeds of Jesus, but the use of the condition at all throws doubt on it all as in Mt 4:3,6 .

Manifest thyself ( $\varphi \alpha \nu \varepsilon \rho \omega \sigma o v \sigma \varepsilon \alpha v \tau \sigma v$ ). First aorist active imperative of $\varphi \alpha v \varepsilon \rho o \omega$.
To the world $(\tau \omega \kappa \sigma \sigma \mu \omega)$. Not just to "thy disciples," but to the public at large as at the feast of tabernacles. See 8:26; 14:22 for this use of коб $\mu$ оऽ.

John 7:5
For even his brethren did not believe on him (ov $\varepsilon \varepsilon \gamma \alpha \rho$ o $\alpha \delta \varepsilon \lambda \varphi o$ av $\sigma 0 v \varepsilon \pi \iota \sigma \tau \varepsilon v o v$ $\varepsilon \iota \varsigma ~ a v \tau o v) . ~ L i t e r a l l y, ~ " F o r ~ n o t ~ e v e n ~ w e r e ~ h i s ~ b r o t h e r s ~ b e l i e v i n g ~ o n ~ h i m . " ~ I m p e r f e c t ~ t e n s e ~ o f ~$ $\pi \iota \sigma \tau \varepsilon v \omega$ with sad picture of the persistent refusal of the brothers of Jesus to believe in his Messianic assumptions, after the two rejections in Capernaum (Lu 4:16-31; Mr 6:1-6; Mt 13:54-58 ), and also after the blasphemous accusation of being in league with Beelzebub when the mother and brothers came to take Jesus home (Mr 3:31-35; Mt 12:46-50; Lu 8:19-21 ). The brothers here are sarcastic.

## John 7:6

My time is not yet come (о каıроৎ о $\varepsilon \mu \circ \varsigma ~ о v \pi \omega \pi \alpha \rho \varepsilon \sigma \tau \iota v$ ). Only use with verse 8 of
 hour" (Bernard). Here каı ооя is the fitting or proper occasion for Christ's manifesting himself publicly to the authorities as Messiah as in verse 8 . At the feast of tabernacles Jesus did make such public claims ( $7: 29,33 ; 8: 12,28,38,42,58$ ). Пa $\rho \varepsilon \sigma \tau \iota v$ is present active indicative of $\pi \alpha \rho \varepsilon \mu \mu$, old compound, to be by, to be present. The brothers of Jesus had the regular Jewish obligation to go up to the feast, but the precise day was a matter of indifference to them.

John 7:7
Cannot hate (ov $\delta v v a \tau \alpha \mu \iota \sigma \varepsilon \iota$ ). Because of "the law of moral correspondence" (Westcott), often in John for "inherent impossibility" (Vincent). The brothers of Jesus here belong to the unbelieving world (коб $\mu$ оऽ) which is unable to love Jesus $(15: 18,23,24)$ and which Jesus had already exposed ("testify," $\mu \alpha \rho \tau v \rho \omega, 5: 42,45$ ). This unbelieving "world" resented the exposure ( $3: 19$, cf. 18:37).

John 7:8
Go ye up to the feast ( $\nu \mu \varepsilon \iota \varsigma \alpha \nu \alpha \beta \eta \tau \varepsilon \varepsilon \iota \varsigma \tau \eta \nu \varepsilon o \rho \tau \eta \nu$ ). The emphatic word by position is $v \mu \varepsilon \iota \varsigma$ (ye) in contrast with $\varepsilon \gamma \omega$ (I). Second aorist active imperative of $\alpha \nu \alpha \beta \alpha \iota \omega \omega$, old and common verb for going up to the feast ( $2: 13$ ) or anywhere. Take your own advice ( $7: 3$ ).

I go not up yet $(\varepsilon \gamma \omega$ ovt $\omega$ avaßaıv $\omega$ ). So Westcott and Hort after B W L (Neutral) while ov (not) is read by Aleph D, African Latin, Vulgate, Coptic (Western). Some of the early Greek Fathers were puzzled over the reading ouk (I go not up) as contradictory to verse 10 wherein it is stated that Jesus did go up. Almost certainly ouk (not) is correct and is not really contradictory when one notes in verse 10 that the manner of Christ's going up is precisely the opposite of the advice of the brothers in verses 3,4 . "Not yet" (ov $\pi \omega$ ) is genuine before "fulfilled" ( $\pi \varepsilon \pi \lambda \eta \rho \omega \tau \alpha$, perfect passive indicative of $\pi \lambda \eta \rho \sigma \omega$ ). One may think, if he will, that Jesus changed his plans after these words, but that is unnecessary. He simply refused to fall in with his brothers' sneering proposal for a grand Messianic procession with the caravan on the way to the feast. He will do that on the journey to the last passover.

John 7:9
He abode still in Galilee ( $\varepsilon \mu \varepsilon \iota v \varepsilon \nu \varepsilon \nu \tau \eta \Gamma \alpha \lambda \iota \lambda \alpha ı \alpha)$. No "still" $(\varepsilon \tau)$ in the Greek text. The constative aorist active indicative $\varepsilon \mu \varepsilon \iota v \varepsilon v$ covers a period of some days.

John 7:10
Were gone up ( $\alpha v \varepsilon \beta \eta \sigma \alpha v$ ). Second aorist active indicative of $\alpha v \alpha \beta \alpha \iota v \omega$, not past perfect though the action is antecedent in fact to the following to $\tau \varepsilon \vee \varepsilon \beta \eta$. The Greek does not always draw the precise distinction between the merely punctiliar (aorist) antecedent action and the past perfect ( $2: 9 ; 4: 45$ ).

He also ( $\tau о \tau \varepsilon \alpha \cup \tau \circ \varsigma)$. As well as the brothers.
Not publicly (ov $\varphi a v \varepsilon \rho \omega \varsigma$ ). Against their advice in verse 4, using $\varphi a v \varepsilon \rho \omega \sigma o v$ (the very same word stem).

But as it were in secret ( $\alpha \lambda \lambda \alpha \omega \varsigma \varepsilon \nu \kappa \rho v \pi \tau \omega$ ). "Not with the usual caravan of pilgrims" (Bernard). Just the opposite of their advice in verse 4 with the same phrase $\varepsilon v \varphi a v \varepsilon \rho \omega$. Plainly Jesus purposely went contrary to the insincere counsel of his brothers as to the manner of his Messianic manifestation. This secrecy concerned solely the journey to Jerusalem, not his public teaching there after his arrival (7:26,28; 18:20).

John 7:11
The Jews (o Iovסaıo). The hostile leaders in Jerusalem, not the Galilean crowds (7:12) nor the populace in Jerusalem (7:25).

Sought ( $\varepsilon \zeta \eta \tau 0 v v)$. Imperfect active of $\zeta \eta \tau \varepsilon \omega$, "were seeking," picture of the attitude of the Jewish leaders toward Jesus who had not yet appeared in public at the feast. In fact he had avoided Jerusalem since the collision in chapter 5. The leaders clearly wished to attack him.
 1:8; 9:12 ). Jesus had been at two feasts during his ministry (passover in 2:12ff. ; possibly another passover in 5:1), but he had avoided the preceding passover $(6: 4 ; 7: 1)$. The leaders in Jerusalem had kept in touch with Christ's work in Galilee. They anticipate a crisis in Jerusalem.

## John 7:12

Much murmuring ( $\gamma \circ \gamma \gamma \cup \sigma \mu \circ \varsigma \pi о \lambda \cup \varsigma)$. This Ionic onomatopoetic word is from $\gamma \circ \gamma \gamma \cup \zeta \omega$ for which verb see 6:41,61; 7:32 , for secret displeasure (Ac 6:1) or querulous discontent (Php 2:14).

Among the multitudes ( $\varepsilon v$ toı ox $\lambda o \iota \varsigma$ ). "The multitudes" literally, plural here only in John. These different groups were visitors from Galilee and elsewhere and were divided in their opinion of Jesus as the Galileans had already become ( 6:66).

A good man ( $\alpha \gamma \alpha \theta$ oc). Pure in motive. See Mr 10:17f.; Ro 5:7 (absolute sense of God). Superior to $\delta$ ikaıoc. Jesus had champions in these scattered groups in the temple courts.

Not so, but he leadeth the multitude astray (ov, $\alpha \lambda \lambda \alpha \pi \lambda \alpha v a ~ \tau o v o \chi \lambda o v$ ). Sharp clash in the crowd. Present active indicative of $\pi \lambda \alpha v a \omega$, to go astray (Mt 18:12f. ), like our "planets," to lead others astray (Mt 24:4,5,11, etc.). In the end the rulers will call Jesus "that deceiver"
 seen (7:31f. ).

John 7:13
Howbeit ( $\mu \varepsilon v \tau 0$ ). See 4:27 for this compound particle ( $\mu \varepsilon v, \tau 0$ ), by way of exception, but yet.

Spake ( $\varepsilon \lambda \alpha \lambda \varepsilon$ ). Imperfect active of $\lambda \alpha \lambda \varepsilon \omega$, "was speaking," picturing the whispering or secret talk ( no man openly , ou $\varepsilon \varepsilon \iota \varsigma \pi \alpha \rho \rho \eta \sigma i \alpha)$. Best MSS. do not have $\varepsilon v$ here with $\pi \alpha \rho \rho \eta \sigma ı \alpha$ (locative or instrumental case of manner) as in 7:26; $10: 24 ; 11: 54$, but $\varepsilon v$ genuine in $7: 4 ; \mathrm{Col}$ 2:15. This adverbial use of $\pi \alpha \rho \rho \eta \sigma i \alpha$ is common enough ( $\mathrm{Mr} 8: 37$ ).

For fear of the Jews ( $\delta \iota \alpha \tau 0 v \varphi o ß \circ v \tau \omega v$ Iov $\delta a \omega \omega v$ ). Objective genitive. The crowds really feared the Jewish leaders and evidently did not wish to involve Jesus or themselves. See the same phrase and attitude on the part of the disciples in 19:38; 20:19.

John 7:14
But when it was now in the midst of the feast ( $\eta \delta \eta \delta \varepsilon \tau \eta \varsigma \varepsilon о \rho \tau \eta \varsigma \mu \varepsilon \sigma o v \sigma \eta \varsigma)$. Literally, "But feast being already midway." Genitive absolute, present active participle, of $\mu \varepsilon \sigma o \omega$, old verb from $\mu \varepsilon \sigma o \varsigma$, in LXX, here only in N.T. The feast of tabernacles was originally seven days, but a last day (verse 37; Le 23:36 ) was added, making eight in all.

And taught ( $\kappa \alpha \varepsilon \delta \iota \delta \alpha \sigma \kappa \varepsilon v$ ). Imperfect active of $\delta \iota \delta \alpha \sigma \kappa \omega$, probably inchoative, "began to teach." He went up ( $\alpha v \varepsilon \beta \eta$, effective aorist, arrived). The leaders had asked (verse 11) where Jesus was. There he was now before their very eyes.

John 7:15
Marvelled ( $\varepsilon Ө \alpha \cup \mu \alpha \zeta o v)$. Picturesque imperfect active of $\theta \alpha \nu \mu \alpha \zeta \omega$, "were wondering." After all the bluster of the rulers (verse 13) here was Jesus teaching without interruption.

Knoweth letters ( $\gamma \rho \alpha \mu \mu \alpha \tau \alpha$ oı $\delta \varepsilon v$ ). Second perfect active indicative used as present. $\Gamma \rho \alpha \mu \mu \alpha \tau \alpha$, old word from $\gamma \rho \alpha \varphi \omega$, to write, is originally the letters formed ( $\mathrm{Ga} 6: 11$ ), then a letter or epistle (Ac 28:21), then the sacred Scriptures (Joh 5:47; 2Ti 3:15), then learning
like Latin litterae and English letters (Ac 26:24; Joh 7:15 ). "The marvel was that Jesus showed Himself familiar with the literary methods of the time, which were supposed to be confined to the scholars of the popular teachers" (Westcott).

Having never learned ( $\mu \eta \mu \varepsilon \mu \alpha \theta \eta \kappa \omega \varsigma$ ). Perfect active participle of $\mu \alpha v \theta a v \omega$ with $\mu \eta$, the usual negative (subjective) with the participle. It is not the wisdom of Jesus that disconcerted the Jewish leaders, but his learning (Marcus Dods). And yet Jesus had not attended either of the rabbinical theological schools in Jerusalem (Hillel, Shammai). He was not a rabbi in the technical sense, only a carpenter, and yet he surpassed the professional rabbis in the use of their own methods of debate. It is sometimes true today that unschooled men in various walks of life forge ahead of men of lesser gifts with school training. See the like puzzle of the Sanhedrin concerning Peter and John (Ac 4:13). This is not an argument against education, but it takes more than education to make a real man. Probably this sneer at Jesus came from some of the teachers in the Jerusalem seminaries. "Christ was in the eyes of the Jews a merely self-taught enthusiast" (Westcott).

John 7:16
Mine $(\varepsilon \mu \eta)$. Possessive pronoun, "not mine in origin." Jesus denies that he is self-taught, though not a schoolman.

But his that sent me ( $\alpha \lambda \lambda \alpha$ тоט $\pi \varepsilon \mu \psi \alpha \nu \tau о \varsigma \mu \varepsilon$ ). Genitive case of the articular participle (first aorist active of $\pi \varepsilon \mu \pi \omega$ ). His teaching is not self-originated nor is it the product of the schools (see the Talmud in contrast with the New Testament). Jesus often in John uses this idiom of "the one who sent me" of the Father ( $4: 34 ; 5: 23,24,30,37 ; 6: 38-40,44 ; 7: 16,18,28$, etc.). The bold claim is here made by Jesus that his teaching is superior in character and source to that of the rabbis.

John 7:17
If any man willeth to do ( $\varepsilon \alpha v \tau \iota \varsigma \theta \varepsilon \lambda \eta \pi o เ \varepsilon เ v)$. Condition of third class with $\varepsilon \alpha v$ and present active subjunctive $\theta \varepsilon \lambda \eta$ not used as a mere auxiliary verb for the future "will do," but with full force of $\theta \varepsilon \lambda \omega$, to will, to wish. See the same use of $\theta \varepsilon \lambda \omega$ in 5:40 "and yet ye are not willing to come" ( $\kappa \alpha$ ov $\theta \varepsilon \lambda \varepsilon \tau \varepsilon \varepsilon \lambda \theta \varepsilon เ v$ ).

He shall know ( $\gamma \nu \omega \sigma \varepsilon \tau \alpha$ ). Future middle indicative of $\gamma \iota \nu \omega \sigma \kappa \omega$. Experimental knowledge from willingness to do God's will. See this same point by Jesus in 5:46; 18:37. There must be moral harmony between man's purpose and God's will. "If there be no sympathy there can be no understanding" (Westcott). Atheists of all types have no point of contact for approach to the knowledge of Christ. This fact does not prove the non-existence of God, but simply their own isolation. They are out of tune with the Infinite. For those who love God it is also true that obedience to God's will brings richer knowledge of God. Agnostic and atheistic critics are disqualified by Jesus as witnesses to his claims.

Of God ( $\varepsilon \kappa$ tov $\theta \varepsilon o v$ ). Out of God as source.
From myself ( $\alpha \pi^{\prime} \varepsilon \mu \alpha \nu \tau o v$ ). Instead of from God.

John 7:18
From himself ( $\alpha \varphi^{\prime} \varepsilon \alpha v \tau o v$ ). This kind of teacher is self-taught, pushes his own ideas, presses his own claims for position and glory, "blows his own horn" as we say. Jesus is the other type of teacher, seeks the glory of the one who sent him, whose herald and ambassador he is.

The same (outo؟). "This one."
Unrighteousness ( $\alpha \delta_{\iota \kappa ı} \alpha$ ). Old word from $\alpha \delta_{ı \kappa \kappa \varsigma}$ ( $\alpha$ privative and $\left.\delta_{ı \kappa \eta}\right)$. Here in contrast with "true" $(\alpha \lambda \eta \theta \eta \varsigma)$. See 2Th 2:10; 1Co 13:6 for the deceit of unrighteousness in contrast with truth as here.

John 7:19
And yet ( $\kappa \alpha$ ). Clear use of $\kappa \alpha$ in the adversative sense of "and yet" or "but." They marvelled at Christ's "ignorance" and boasted of their own knowledge of the law of Moses. And yet they violated that law by not practising it.

Why seek ye to kill me? (T $\mu \varepsilon \zeta \eta \tau \varepsilon \iota \varepsilon$ a $\quad$ ток $\tau \varepsilon เ \nu \alpha ı ;$ ). A sudden and startling question as an illustration of their failure to do the law of Moses. Jesus had previously known (5:39,45-47) that the Jews really rejected the teaching of Moses while professing to believe it. On that very occasion they had sought to kill him (5:18), the very language used here. Apparently he had not been to Jerusalem since then. He undoubtedly alludes to their conduct then and charges them with the same purpose now.

John 7:20
The multitude (o oх $\lambda$ oऽ). Outside of Jerusalem (the Galilean crowd as in verses 11f.) and so unfamiliar with the effort to kill Jesus recorded in 5:18. It is important in this chapter to distinguish clearly the several groups like the Jewish leaders ( $7: 13,15,25,26,30,32$, etc.), the multitude from Galilee and elsewhere (10-13,20,31,40,49), the common people of Jerusalem (25), the Roman soldiers (45f. ).
 pilgrims make the same charge against Jesus made long ago by the Pharisees in Jerusalem in explanation of the difference between John and Jesus (Mt 11:18; Lu 7:33 ). It is an easy way to make a fling like that. "He is a monomaniac labouring under a hallucination that people wish to kill him" (Dods).

John 7:21
One work ( $\varepsilon v \varepsilon \rho \gamma \circ v$ ). Direct allusion to the healing of the impotent man when in Jerusalem before (5:1ff. ). He had wrought others before ( $2: 23 ; 4: 45$ ), but this one on the Sabbath caused the rulers to try to kill Jesus (5:18). Some wondered then, others had murder in their hearts. This crowd here is ignorant.

John 7:22
For this cause ( $\delta, \alpha$ tov $\tau$ ). Some would take this phrase with the preceding verb $\theta \alpha v \mu \alpha \zeta \varepsilon \tau \varepsilon$ (ye marvel for this cause).

Hath given ( $\delta \varepsilon \delta \omega \kappa \varepsilon \nu$ ). Present active indicative of $\delta \iota \delta \omega \mu$ (permanent state).
Not that it is of Moses, but of the fathers (ov o $\frac{\tau}{} \varepsilon \kappa \tau 0 v M \omega v \sigma \varepsilon \omega \varsigma \varepsilon \sigma \tau \iota \nu \alpha \lambda \lambda^{\prime} \varepsilon \kappa \tau \omega \nu$ $\pi \alpha \tau \varepsilon \rho \omega v)$. A parenthesis to explain that circumcision is older in origin than Moses.

And on the sabbath ye circumcise ( $\kappa \alpha \varepsilon v \sigma \alpha \beta \beta \alpha \tau \omega \pi \varepsilon \rho ı \tau \varepsilon \mu \nu \varepsilon \tau \varepsilon$ ). Adversative use of $\kappa \alpha=$ and yet as in 19. That is to say, the Jews keep one law (circumcision) by violating another (on the Sabbath, the charge against him in chapter 5, healing on the Sabbath).

John 7:23
That the law of Moses may not be broken ( $\imath \alpha \alpha \mu \eta \lambda v \theta \eta$ o vo $\mu \circ \varsigma M \omega v \sigma \varepsilon \omega \varsigma$ ). Purpose clause with negative $\mu \eta$ and first aorist passive subjunctive of $\lambda \omega \omega$. They are punctilious about their Sabbath rules and about circumcision on the eighth day. When they clash, they drop the Sabbath rule and circumcise.

Are ye wroth with me? ( $\varepsilon \mu \circ \chi о \lambda a \tau \varepsilon ;$ ). Old word from $\chi \circ \lambda \eta$ (bile, gall), possibly from $\chi \lambda$ on or $\chi \lambda \omega \rho \circ \varsigma$ (yellowish green). Only here in N.T. So to be mad. With dative. Vivid picture of bitter spleen against Jesus for healing a man on the sabbath when they circumcise on the Sabbath.

A man every whit whole ( $o \lambda o v a v \theta \rho \omega \pi o v v \gamma \eta \eta$ ). Literally, "a whole (o $\alpha o v$ ) man (all the man) sound (v$v \iota \eta$, well)," not just one member of the body mended.

John 7:24
According to appearance ( $\kappa \alpha \tau^{\prime} \mathrm{o} \psi(\nu)$. And so, superficially. See 11:44. Also not "righteous" ( $\delta$ เкaı $\alpha v$ ) judgment.

John 7:25
 of the city in contrast to the multitude of pilgrims at the feast. They form a separate group. The word is made from I $\varepsilon \rho o \sigma o \lambda v \mu \alpha$ and occurs in Josephus and IV Maccabees. In N.T. only here and Mr 1:5. These Jerusalem people knew better than the pilgrims the designs of the rulers (Vincent).

Is not this? (ov $\begin{aligned} & \text { ov } о \varsigma ~ \\ & \sigma \tau \tau v ;) \text {. Expecting affirmative answer. Clearly they were not as }\end{aligned}$ familiar with the appearance of Jesus as the Galilean multitude (Dods).

They seek ( $\lceil\eta \tau 0 v \sigma \iota)$. The plural refers to the group of leaders already present (7:15) to whom the Jerusalem crowd probably pointed. They knew of their threats to kill Jesus ( 5:18).

John 7:26
They say nothing unto him (ov $\delta \varepsilon v a v \tau o \lambda \varepsilon \gamma o v \sigma \iota v$ ). But only make sneering comments about him (7:16) in spite of his speaking "openly" ( $\pi \alpha \rho \rho \eta \sigma \iota \alpha$, for which word see 7:13; 18:20 ) before all. It was sarcasm about the leaders, though an element of surprise on the part of "these shrewd townsmen" (Bernard) may have existed also.

Can it be that the rulers indeed know ( $\mu \eta \pi о \tau \varepsilon \alpha \lambda \eta \theta \omega \varsigma \varepsilon \gamma \nu \omega \sigma \iota \nu \alpha \rho \chi о \nu \tau \varepsilon \varsigma)$. Negative answer expected by $\mu \eta \pi о \tau \varepsilon$ and yet there is ridicule of the rulers in the form of the question.

See a like use of $\mu \eta \pi о \tau \varepsilon$ in Lu 3:15, though nowhere else in John. E $\gamma v \omega \sigma \alpha v$ (second aorist ingressive active indicative of $\gamma เ v \omega \sigma \kappa \omega$ ) may refer to the examination of Jesus by these rulers in 5:19ff. and means, "Did they come to know or find out" (and so hold now)?

That this is the Christ (oт очтоৎ हбтıv o Xpıбтo¢). The Messiah of Jewish hope.
John 7:27
Howbeit ( $\alpha \lambda \lambda \alpha$ ). Clearly adversative here.
This man ( $\tau 0 \cup \tau 0 v$ ). Possibly contemptuous use of outos as may be true in 25,26 .
Whence he is ( $\pi \mathrm{o} \theta \varepsilon v \varepsilon \sigma \tau \tau v$ ). The Galilean Jews knew the family of Jesus ( $6: 42$ ), but they knew Jesus only as from Nazareth, not as born in Bethlehem (verse 42).

When the Christ cometh (o X $\rho \iota \sigma \tau о \varsigma ~ о \tau \alpha v ~ \varepsilon \rho \chi \eta \tau \alpha) . ~ P r o l e p s i s ~ o f ~ o ~ X \rho ı \sigma \tau o s ~ a n d ~ i n d e f-~$ inite temporal clause with o $\tau \alpha v$ and the present middle subjunctive $\varepsilon \rho \chi \eta \tau \alpha$ rather than the more usual second aorist active $\varepsilon \lambda \theta \eta$ as in verse 31 , a trifle more picturesque. This is a piece of popular theology. "Three things come wholly unexpected--Messiah, a godsend, and a scorpion" (Sanhedrin 97a). The rulers knew the birthplace to be Bethlehem (7:42; Mt 2:5f. ), but some even expected the Messiah to drop suddenly from the skies as Satan proposed to Jesus to fall down from the pinnacle of the temple. The Jews generally expected a sudden emergence of the Messiah from concealment with an anointing by Elijah (Apoc. of Bar. XXIX. 3; 2Esdr. 7:28; 13:32; Justin Martyr, Tryph. 110).

John 7:28
And I am not come of myself ( $\kappa \alpha \alpha \pi$ ' $\varepsilon \mu \alpha v \tau o v$ ovк $\varepsilon \lambda \eta \lambda \cup \theta \alpha$ ). K $\alpha$ here="and yet." Jesus repeats the claim of verse 17 and also in $5: 30 ; 8: 28 ; 12: 49 ; 14: 10$.

Whom ye know not ( $\mathrm{o} v \mathrm{v} \mu \varepsilon \varsigma \varsigma$ оик oi $\delta \alpha \tau \varepsilon$ ). Jesus passes by a controversy over the piece of popular theology to point out their ignorance of God the Father who sent him. He tersely agrees that they know something of him. Jesus says of these Jews that they know not God as in $8: 19,55$.

John 7:29
I know him ( $\varepsilon \gamma \omega$ oı $\delta \alpha \alpha v \tau o v$ ). In contrast to the ignorance of these people. See the same words in 8:55 and the same claim in 17:25; Mt 11:27; Lu 10:22 (the Johannine aerolite). "These three words contain the unique claim of Jesus, which is pressed all through the chapters of controversy with the Jews" (Bernard). Jesus is the Interpreter of God to men (Joh 1:18).

And he sent me (какєıvo¢ $\mu \varepsilon \alpha \pi \varepsilon \sigma \tau \varepsilon ı \lambda \varepsilon v$ ). First aorist active indicative of $\alpha \pi о \sigma \tau \varepsilon \lambda \lambda \omega$, the very verb used of Jesus when he sent forth the twelve (Mt 10:5) and used by Jesus again of himself in Joh 17:3 . He is the Father's Apostle to men.

John 7:30
They sought therefore ( $\varepsilon\lceil\eta \tau 0 u v$ ouv). Imperfect active of $\lceil\eta \tau \varepsilon \omega$, inchoative or conative, they began to seek. Either makes sense. The subject is naturally some of the Jerusalemites (Westcott) rather than some of the leaders (Bernard).

To take him ( $\alpha v \tau 0 v \pi \iota \alpha \sigma \alpha$ ). First aorist active infinitive, Doric form from $\pi \iota \alpha \zeta \omega$, from the usual $\pi \iota \varepsilon \zeta \omega$, occasionally so in the papyri, but $\pi \iota a \zeta \omega$ always in N.T. except Lu 6:38 .

And ( $\kappa \alpha$ ). Here = "but."
Laid his hand $(\varepsilon \pi \varepsilon \beta \alpha \lambda \varepsilon \nu \tau \eta \nu \chi \varepsilon \iota \rho \alpha)$. Second aorist active indicative of $\varepsilon \pi \iota \beta \alpha \lambda \lambda \omega$, to cast upon. Old and common idiom for arresting one to make him a prisoner (Mt 26:50). See repetition in verse 44.

His hour ( $\eta \omega \rho \alpha$ avtov). In 13:1 we read that "the hour" had come, but that was "not yet" (ov $\pi \omega$ ). "John is at pains to point out at every point that the persecution and death of Jesus followed a predestined course" (Bernard), as in 2:4; 7:6,8; 8:10; 10:39; 13:1, etc.

Was not yet come (ov $\pi \omega \varepsilon \lambda \eta \lambda v \theta \varepsilon$ ). Past perfect active of $\varepsilon \rho \chi \circ \mu \alpha$, as John looks back on the story.

John 7:31
When the Christ shall come (o X $\rho \iota \sigma \tau \circ \varsigma$ o $\tau \alpha v \varepsilon \lambda \theta \eta$ ). Proleptic position of o X $\mathrm{X} \stackrel{\sigma \tau \tau}{ }$ again as in 27 , but $\varepsilon \lambda \theta \eta$ with o $\alpha \alpha v$ rather than $\varepsilon \rho \chi \eta \tau \alpha$, calling more attention to the consummation (whenever he does come).

Will he do? ( $\mu \eta \pi$ о $\eta \sigma \varepsilon ;$;). Future active indicative of $\pi o เ \varepsilon \omega$ with $\mu \eta$ (negative answer expected). Jesus had won a large portion of the pilgrims ( $\varepsilon \kappa \tau \operatorname{\tau ov}$ o $\lambda \lambda \frac{\lambda}{} \pi \sigma \lambda \lambda o$ ) either before this day or during this controversy. The use of $\varepsilon \pi \iota \sigma \tau \varepsilon v \sigma \alpha v$ (ingressive aorist active) looks as if many came to believe at this point. These pilgrims had watched closely the proceedings.

Than those which $(\omega v)$. One must supply the unexpressed antecedent $\tau o v \tau \omega v$ in the ablative case after $\pi \lambda \varepsilon \iota o v a$ (more). Then the neuter plural accusative relative $\alpha$ (referring to $\sigma \eta \mu \varepsilon \iota \alpha$ signs) is attracted to the ablative case of the pronominal antecedent $\tau 0 v \tau \omega \nu$ (now dropped out).

Hath done $(\varepsilon \pi o \not \eta \sigma \varepsilon v)$. First aorist active indicative of $\pi o t \varepsilon \omega$, a timeless constative aorist summing up all the miracles of Jesus so far.

John 7:32
The Pharisees (o Фapıбaıo). This group of the Jewish rulers (7:11,15,25f. ) was particularly hostile to Christ, though already the Sadducees had become critical (Mt 16:6) and they join here (o $\alpha \rho \chi \iota \varepsilon \rho \varepsilon \iota \varsigma$, the chief priests being Sadducees) in determining to silence Jesus by bringing him before the Sanhedrin. They had heard the whispered talk about Jesus before he arrived (7:12f. ) and still more now.
 indicative of $\alpha \kappa \sigma \omega \omega$ with the genitive case and the descriptive participle of the vivid onomatopoetic verb $\gamma 0 \gamma \gamma \cup \zeta \omega$ (verse 12) now grown louder like the hum of bees. It was the defence of Jesus by a portion of the crowd (7:31) that irritated the Pharisees. Here the Pharisees take the initiative and enlist the Sadducees in the Sanhedrin (for this combination see 7:45; 11:47,57; Mt 21:45; 27:62, the organized court) to send "officers" (v $\pi \eta \rho \varepsilon \tau \alpha \varsigma)$ "to take him" ( $\iota \alpha \alpha \pi \omega \sigma \omega \sigma \iota \nu \alpha v \tau o v$, final clause with $\imath v \alpha$ and first aorist active subjunctive of $\pi \iota \alpha \zeta \omega$ for
which verb see verse 30 ). For vппрята¢ (temple police here) see verse 45; 18:3,12,22; 19:6;

John 7:33
Yet a little while ( $\varepsilon \tau$ र $\quad$ оооо $\mu \kappa \kappa \rho \circ v$ ). Accusative of extent of time. It was only six months to the last passover of Christ's ministry and he knew that the end was near.

I go unto him that sent me (v $\tau \alpha \gamma \omega \pi \rho \circ \varsigma$ тov $\pi \varepsilon \mu \psi \alpha \nu \tau \alpha \mu \varepsilon)$. See the same words in 16:5. Hи $\alpha \alpha \gamma \omega$, old compound ( $v \pi \sigma, \alpha \gamma \omega$ ), has the notion of withdrawing (literally, go under). See 16:7-10 for three words for going common in John ( $п о \rho \varepsilon v o \mu \alpha, ~ g o ~ f o r ~ a ~ p u r p o s e, ~$ $\alpha \pi \varepsilon \rho \chi \circ \mu \alpha$, to go away, $v \pi \alpha \gamma \omega$, to withdraw personally). Hv $\pi \alpha \gamma \omega$ often in John of going to the Father or God (8:14,21; 13:3,33,36; 14:4,5,28; 15:16; 16:4,7,10,17 ). See 6:21. It was enigmatic language to the hearers.

John 7:34
And shall not find me ( $\kappa \alpha$ oux $\varepsilon v \rho \eta \sigma \varepsilon \tau \varepsilon \mu \varepsilon$ ). Future active indicative of $\varepsilon v \rho ı \sigma \kappa \omega$. Jesus had said: "Seek and ye shall find" (Mt 7:7), but this will be too late. Now they were seeking (verse 30) to kill Jesus, then they will seek deliverance, but too late.

Where I am (опоv $\varepsilon \mu \varepsilon \gamma \omega)$. No conflict with verse 33, but the essential eternal spiritual home of Christ "in absolute, eternal being and fellowship with the Father" (Vincent).

Ye cannot come ( $\nu \mu \varepsilon ı \varsigma ~ o v ~ \delta u v a \sigma \theta \varepsilon \varepsilon \lambda \theta \varepsilon เ v)$. This fellowship was beyond the comprehension of these hostile Jews. See the same idea in 7:36 by the Jews; 8:21 to the Jews and then to the disciples with the addition of "now" ( $\alpha \rho \tau, 13: 33, v v v$ in 13:36).

John 7:35
Among themselves ( $\pi \rho \circ \varsigma$ eautouc). These Jewish leaders of verse 32 talk among themselves about what Jesus said in a spirit of contempt (this man or fellow, ovtoc).

That (oт). Almost result like o $\tau$ in Mt 8:27.
Will he go? ( $\mu \eta \mu \varepsilon \lambda \lambda \varepsilon \pi<\rho \varepsilon v \varepsilon \sigma \theta \alpha l ;)$. Negative answer expected in an ironical question, "Is he about to go?"

Unto the Dispersion among the Greeks ( $\varepsilon ા \varsigma ~ \tau \eta v \delta ı \alpha \sigma \pi о \rho a v \tau \omega \nu H \varepsilon \lambda \lambda \eta \nu \omega v)$ ). Objective genitive $\tau \omega v$ H $\delta \lambda \lambda \eta \nu \omega \nu$ (of the Greeks) translated here "among," because it is the Dispersion of Jews among the Greeks. $\Delta \iota \alpha \sigma \pi$ o $\alpha$ is from $\delta \iota \alpha \sigma \pi \varepsilon \iota \rho \omega$, to scatter apart (Ac 8:1,4 ). It occurs in Plutarch and is common in the LXX, in the N.T. only here, Jas $1: 1 ; 1 \mathrm{Pe} 1: 1$. There were millions of these scattered Jews.

And teach the Greeks (ка $\delta \iota \delta \alpha \sigma \kappa \varepsilon เ v ~ \tau о и \varsigma ~ H \varepsilon \lambda \lambda \eta v a \varsigma) . ~ C o n f e s s i n g ~ h i s ~ f a i l u r e ~ t o ~ t e a c h ~$ the Jews in Palestine, "thus ignorantly anticipating the course Christianity took; what seemed unlikely and impossible to them became actual" (Dods).

John 7:36
What is this word? (Tıs عбтiv o $\lambda$ oүoc ov ovoб;). Puzzled and uneasy over this unintelligible saying. Even Peter is distressed over it later (13:37).

John 7:37

Now on the last day ( $\varepsilon v \delta \varepsilon \tau \eta \varepsilon \sigma \chi \alpha \tau \eta \eta \mu \varepsilon \rho \alpha$ ). The eighth day which was "an holy convocation," kept as a Sabbath (Le 33:36 ), apparently observed as a memorial of the entrance into Canaan, hence "the great day of the feast" ( $\tau \eta \mu \varepsilon \gamma \alpha \lambda \eta \tau \eta \varsigma \varepsilon о \rho \tau \eta \varsigma)$.

Stood and cried (ı $\sigma \tau\rceil \varepsilon \kappa \alpha \varepsilon \kappa \rho \alpha \sigma \varepsilon v$ ). Past perfect active of $\iota \sigma \tau \eta \mu$ used as imperfect and intransitive and first aorist active of $\kappa \rho \alpha \zeta \omega$. Picture Jesus standing (linear) and suddenly crying out (punctiliar).

If any man thirst ( $\varepsilon \alpha \nu \tau \iota \varsigma \delta \iota \psi \alpha$ ). Third class condition with $\varepsilon \alpha \nu$ and present active subjunctive of $\delta \iota \psi \alpha \omega$, "if any one is thirsty." On each of the seven preceding days water was drawn in a golden pitcher from the pool of Siloam and carried in procession to the temple and offered by the priests as the singers chanted Isa 12:3 : "With joy shall ye draw water out of the wells of salvation." "It is uncertain whether the libations were made upon the eighth day. If they were not made, the significant cessation of the striking rite on this one day of the feast would give a still more fitting occasion for the words" (Westcott).

John 7:38
He that believeth on me ( $\circ \pi \iota \sigma \tau \varepsilon v \omega \nu \varepsilon \iota \varsigma \varepsilon \mu \varepsilon$ ). Nominative absolute as is not uncommon.
The scripture ( $\eta \gamma \rho a \varphi \eta$ ). No precise passage can be quoted, though similar idea in several (Isa 55:1; 58:11; Zec 13:1; 14:8; Eze 47:1; Joe 3:18 ). Chrysostom confines it to Isa 28:16 by punctuation (only the nominative absolute as the Scripture).

Out of his belly shall flow rivers of living water ( $\pi о \tau \alpha \mu о \varepsilon \kappa \tau \eta \varsigma \kappa о \iota \lambda \iota \varsigma$ аитоv $\rho \varepsilon v \sigma 0 v \sigma \iota v \nu \delta \alpha \tau \circ \varsigma \zeta \omega v \tau \sigma \varsigma)$. Some ancient Western writers connect $\pi \iota v \varepsilon \tau \omega$ of verse 37 with o $\pi \iota \sigma \tau \varepsilon v \omega v$ in verse 38 . By this arrangement $\alpha v \tau o v$ (his) with коı $\lambda \iota \alpha \varsigma$ is made to refer to Christ, not to the believer. Burney argues that koı $\lambda \iota \alpha$ is a mistranslation of the Aramaic (fountain, not belly) and that the reference is to Eze 47:1 . C.C. Torrey refers to Zec 14:8 . But the Eastern writers refer avtov (his) to the believer who not only quenches in Christ his own thirst, but becomes a source of new streams for others (Joh 4:14). It is a difficult question and Westcott finally changed his view and held avtov to refer to Christ. Pevoovoıv is future active indicative of $\rho \varepsilon \omega$, old verb, to flow, here only in the N.T.

John 7:39
Which (ov). Genitive by attraction of the relative o (accusative singular object of $\lambda \alpha \mu \beta \alpha \nu \varepsilon \iota v)$ to the case of $\tau 0 v \pi \nu \varepsilon v \mu a \tau o \varsigma$ (the Spirit) the antecedent. But it is purely grammatical gender (neuter o because of $\pi v \varepsilon v \mu \alpha$ ) which we do not have in English. Even here one should say "whom," not which, of the Spirit of God.

Were to receive ( $\varepsilon \mu \varepsilon \lambda \lambda o v \lambda \alpha \mu \beta a v \varepsilon \tau v)$. Imperfect active of $\mu \varepsilon \lambda \lambda \omega$ with the present active infinitive $\lambda \alpha \mu \beta \alpha \nu \varepsilon \iota \nu$, to receive, one of the three constructions with $\mu \varepsilon \lambda \lambda \omega$ (present, aorist, or future infinitive). Literally, "whom they were about to receive," a clear reference to the great pentecost.

For the Spirit was not yet given (ov $\pi \omega \gamma \alpha \rho \eta \nu \pi \nu \varepsilon v \mu \alpha)$. No verb for "given" in the Greek. The reference is not to the existence of the Spirit, but to the dispensation of the

Spirit. This same use of $\varepsilon \varepsilon \mu$ like $\pi \alpha \rho \varepsilon \mu \mu$ (to be present) appears in Ac 19:2 of the Spirit's activity. John, writing at the close of the century, inserts this comment and interpretation of the language of Jesus as an allusion to the coming of the Holy Spirit at pentecost (the Promise of the Father).

Because Jesus was not yet glorified (o $\operatorname{I\eta }\rceil \sigma \circ \cup \varsigma \circ \cup \pi \omega \varepsilon \delta \circ \xi \alpha \sigma \theta \eta$ ). Reason for the previous statement, the pentecostal outpouring following the death of Jesus here called "glorified" $(\varepsilon \delta \circ \xi \alpha \sigma \theta \eta$, first aorist passive indicative of $\delta o \xi \alpha \zeta \omega)$, used later of the death of Jesus ( $12: 16$ ), even by Jesus himself (12:23; 13:31 ).

John 7:40
Some of the multitude ( $\varepsilon \kappa$ tov o o $\lambda \mathrm{\lambda ov}$ ). Tıveৎ (some) to be supplied, a common Greek idiom.

Of a truth ( $\alpha \lambda \eta \theta \omega \varsigma)$. "Truly." See 1:47.
The prophet ( $\boldsymbol{\pi} \boldsymbol{\pi} \circ \varphi \eta \tau \eta \varsigma$ ). The one promised to Moses (De 18:15) and long expected. See on John 1:21. Proof of the deep impression made by Jesus.

John 7:41
This is the Christ (ovtoc eбтiv o Xpıбтo¢). These went further and dared to call Jesus the Messiah and not merely the prophet who might not be the Messiah. They said it openly.

What $(\gamma \alpha \rho)$. These denied that Jesus was the Messiah and gave as their reason ( $\gamma \alpha \rho$, for) the fact that he came from Galilee. The use of $\mu \eta$ expects a negative answer.

John 7:42
The scripture ( $\eta \gamma \rho \alpha \varphi \eta$ ). The reference is to Mic 5:2, the very passage quoted by the chief priests and scribes in response to Herod's inquiry (Mt 2:6). This ignorance of the fact that Jesus was actually born in Bethlehem belongs to the Jews, not to John the author of the Gospel.

John 7:43
A division ( $\sigma \chi\llcorner\mu \mu)$. A clear split. See Mt 9:16 for the word from $\sigma \chi\llcorner\omega$, to rend. Used again in Joh 9:16; 10:19.

John 7:44
Would have taken him ( $\eta \theta \varepsilon \lambda$ ov $\pi \iota \alpha \sigma \alpha \alpha \cup \tau o v$ ). Imperfect active of $\theta \varepsilon \lambda \omega$ and first aorist active infinitive of $\pi \iota \alpha \zeta \omega$, "were wishing to seize him." See verse 30 for a like impulse and restraint, there $\varepsilon \pi \varepsilon \beta \alpha \lambda \varepsilon v \varepsilon \pi^{\prime}$ avtov, here $\varepsilon \beta \alpha \lambda \varepsilon v \varepsilon \pi^{\prime}$ avtov (simple verb, not compound).

John 7:45
Why did ye not bring him? ( $\Delta$ เ $\alpha \tau$ оик $\eta \gamma \alpha \gamma \varepsilon \tau \varepsilon \alpha \nu \tau \circ v$;). Second aorist active indicative of $\alpha \gamma \omega$. Indignant outburst of the Sanhedrin (both Sadducees and Pharisees) at the failure of the ( $\tau 0 \cup \varsigma$, note article here referring to verse 32) temple police to arrest Jesus. "Apparently they were sitting in expectation of immediately questioning him" (Dods). They were stunned at this outcome.

John 7:46

Never man so spake (ou $\delta \varepsilon \pi о \tau \varepsilon \varepsilon \lambda \alpha \lambda \eta \sigma \varepsilon v$ ov $\tau \omega \varsigma \alpha v \theta \rho \omega \pi \sigma \varsigma)$. Police officers are not usually carried away by public speech. They had fallen under the power of Jesus "as the Galilean peasants had been impressed" (Bernard) in verses 28 f . It was the words of Jesus that had so gripped these officers, not his works ( 15:24). It was most disconcerting to the Sanhedrin.

John 7:47
Are ye also led astray? ( $\mathrm{M} \eta \kappa \alpha \nu \mu \varepsilon \varsigma \varsigma \pi \pi \lambda \alpha \nu \eta \sigma \theta \varepsilon$;). The Pharisees took the lead in this scornful sneer at the officers. The use of $\mu \eta$ formally expects a negative answer as in 4:29, but the Pharisees really believed it. See also 6:67. The verb form is perfect passive indicative of $\pi \lambda \alpha v \alpha \omega$, for which see verse 12 with perhaps an allusion to that phase of opinion.

John 7:48
 autov;). Negative answer sharply expected. First aorist active indicative of $\pi \iota \sigma \tau \varepsilon v \omega$. "Did any one of the rulers believe on him?" "What right have subordinates to have a mind of their own?" (Dods). These police were employed by the temple authorities (rulers). "Power was slipping through their fingers" (Dods) and that was the secret of their hostility to Jesus.

Or of the Pharisees ( $\eta \varepsilon \kappa \tau \omega \nu \Phi \alpha \rho ı \sigma \alpha \omega \omega v$ ). A wider circle and the most orthodox of all.

## John 7:49

This multitude (o ox 10 oc ovtoc). The Pharisees had a scorn for the amhaaretz or "people of the earth" (cf. our "clod-hoppers") as is seen in rabbinic literature. It was some of the ox $\boldsymbol{\gamma}$ oc (multitude at the feast especially from Galilee) who had shown sympathy with Jesus (7:12,28f. ).

Which knoweth not the law ( $o \mu \eta \gamma \operatorname{vo\sigma } \kappa \omega v$ ). Present active articular participle of $\gamma \iota v \omega \sigma \kappa \omega$ with $\mu \eta$ usual negative of the participle in the Koine. "No brutish man is sin-fearing, nor is one of the people of the earth pious" (Aboth, II. 6). See the amazement of the Sanhedrin at Peter and John in Ac 4:13 as "unlettered and private men" ( $\alpha \gamma \rho \alpha \mu \mu \alpha \tau о ~ к \alpha ~ เ \delta เ \omega \tau \alpha)$. No wonder the common people (ox ooc ) heard Jesus gladly (Mr 12:37). The rabbis scouted and scorned them.

Are accursed ( $\varepsilon \pi \alpha \rho \alpha \tau 0 ~ \varepsilon ו \sigma เ v)$ ). Construction according to sense (plural verb and adjective with collective singular oх $\lambda$ оৎ). Et $\pi$ рато is old verbal adjective from $\varepsilon \pi \alpha \rho \alpha \circ \mu \alpha$, to call down curses upon, here only in the N.T.

John 7:50
Nicodemus (Nıкоঠпиоя). Not heard from since chapter 3 when he timidly came to Jesus by night. Now he boldly protests against the injustice of condemning Jesus unheard. He appears once more (and only in John) in 19:39 with Joseph of Arimathea as a secret disciple of Jesus. He is a Pharisee and a member of the Sanhedrin and his present act is courageous.

Saith ( $\lambda \varepsilon \gamma \varepsilon$ ). Dramatic present active indicative as in 2:3.

Before ( $\pi \rho \circ \tau \varepsilon \rho \circ v$ ). This is genuine, a reference to the visit in chapter 3, but vvктoৎ (by night) is not genuine here.

Being one of them ( $\varepsilon ા \varsigma \omega \nu \varepsilon \xi \alpha \cup \tau \omega v$ ). As a member of the Sanhedrin he takes up the challenge in verse 48 . He is both ruler and Pharisee.

John 7:51
Doth our law judge a man? ( $\mu \eta$ о vо $\mu о \varsigma ~ \eta \mu \omega \nu \kappa \rho ı v \varepsilon \tau o v ~ \alpha v \theta \rho \omega \pi \sigma v$;). Negative answer expected and "the man," not "a man." These exponents of the law (verse 49) were really violating the law of criminal procedure (Ex 23:1; De 1:16 ). Probably Nicodemus knew that his protest was useless, but he could at least show his colours and score the point of justice in Christ's behalf.

Except it first hear from himself ( $\varepsilon \alpha \nu \mu \eta$ акоvoŋ $\pi \rho \omega \tau \tau v \pi \alpha \rho^{\prime} \alpha v \tau o v$ ). Third-class negative condition with $\varepsilon \alpha v \mu \eta$ and first aorist active subjunctive of $\alpha \kappa \sigma v \omega$. That is common justice in all law, to hear a man's side of the case ("from him," $\pi \alpha \rho^{\prime}$ avtou).

And know what he doeth ( $\kappa \alpha \gamma \nu \omega \tau \pi о \varepsilon$ ). Continuation of the same condition with second aorist active subjunctive of $\gamma \iota \omega \omega \sigma \kappa \omega$ with indirect question and present active indicative ( $\tau$ กoıs). There was no legal answer to the point of Nicodemus.

John 7:52
Art thou also of Galilee? (Мף ка $\sigma v \varepsilon \kappa \tau \eta \varsigma \Gamma \alpha \lambda ı \lambda \alpha ı \alpha \varsigma \varepsilon ı)$. Formally negative answer expected by $\mu \eta$, but really they mean to imply that Nicodemus from local feeling or prejudice has lined himself up with this Galilean mob (ox $\lambda$ oc) of sympathizers with Jesus and is like Jesus himself a Galilean. "These aristocrats of Jerusalem had a scornful contempt for the rural Galileans" (Bernard).
 As a matter of fact Jonah, Hosea, Nahum, possibly also Elijah, Elisha, and Amos were from Galilee. It was simply the rage of the Sanhedrin against Jesus regardless of the facts. Westcott suggests that they may have reference to the future, but that is a mere excuse for them.

John 7:53
This verse and through 8:12 (the passage concerning the woman taken in adultery) is certainly not a genuine part of John's Gospel. The oldest and best MSS. (Aleph A B C L W) do not have it. It first appears in Codex Bezae. Some MSS. put it at the close of John's Gospel and some place it in Luke. It is probably a true story for it is like Jesus, but it does not belong to John's Gospel. The Canterbury Version on which we are commenting puts the passage in brackets. Westcott and Hort place it at the end of the Gospel. With this explanation we shall proceed.

They went ( $\varepsilon \pi о \rho \varepsilon \cup \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\pi$ о $\varepsilon \varepsilon v o \mu \alpha$ used as a deponent verb without passive idea. In this context the verb has to refer to the Sanhedrin with a rather pointless contrast to Jesus.

## John 8

John 8:1
But Jesus went (I $\eta \sigma o v \varsigma ~ \delta \varepsilon \varepsilon \pi о \rho \varepsilon v \theta \eta$ ). Same deponent use of $\pi о \rho \varepsilon v o \mu \alpha$ as in $7: 53$ and in contrast to the Sanhedrin's conduct, though it seems "pointless" (Dods). Apparently Jesus was lodging in the home of Mary, Martha, and Lazarus.

John 8:2
Early in the morning (op $\theta \rho o v)$. Genitive of time, o $\rho \theta \rho o c$ meaning daybreak, old word, not in John, though in Lu 24:1; Ac 5:21 . John uses $\pi \rho \omega$ (18:28; 20:1; 21:4).

He came again into the temple ( $\pi \alpha \lambda \iota \nu \pi \alpha \rho \varepsilon \gamma \varepsilon v \varepsilon \tau о ~ \varepsilon \iota \varsigma ~ \tau о ~ เ \varepsilon \rho о v) . ~ I f ~ t h e ~ p a r a g r a p h ~ i s ~$ genuine, the time is the next day after the eighth and last day of the feast. If not genuine, there is no way of telling the time of this apparently true incident.

And all the people came unto him ( $\kappa \alpha \pi \alpha \varsigma$ о $\lambda \alpha о \varsigma ~ \eta \rho \chi \varepsilon \tau о ~ \pi \rho о \varsigma ~ \alpha u \tau о v) . ~ I m p e r f e c t ~$ middle of $\varepsilon \rho \chi \circ \mu \alpha$ picturing the enthusiasm of the whole ( $\pi \alpha \varsigma$ ) crowd now as opposed to the divisions in chapter 7.

Taught ( $\varepsilon \delta \iota \delta \alpha \sigma \kappa \varepsilon v$ ). Imperfect active of $\delta \iota \delta \alpha \sigma \kappa \omega$. He took his seat ( $\kappa \alpha \theta \iota \sigma \alpha \varsigma$, ingressive active participle of $\left.\kappa \alpha \theta_{\iota} \zeta \omega\right)$ as was customary for Jesus and began to teach (inchoative imperfect). So the picture.

John 8:3
The scribes and the Pharisees (о $\gamma \rho \alpha \mu \mu \alpha \tau \varepsilon ı к к$ о Фарьбаьо). John does not mention "scribes," though this combination (note two articles) is common enough in the Synoptics (Lu 5:30; 6:7 , etc.).

Bring ( $\alpha \gamma 0 \cup \sigma เ v$ ). Vivid dramatic present active indicative of $\alpha \gamma \omega$. Dods calls this "in itself an unlawful thing to do" since they had a court for the trial of such a case. Their purpose is to entrap Jesus.

Taken in adultery ( $\varepsilon \pi \mu \circ \chi \chi \varepsilon \iota \alpha$ кат $\varepsilon ı \lambda \varepsilon \mu \mu \varepsilon v \eta \nu)$. Perfect passive participle of ката入 $\alpha \mu \beta \alpha \omega$, old compound to seize (Mr 9:18) , to catch, to overtake (Joh 12:35), to overcome (or overtake) in 1:5.

Having let her in the midst ( $\sigma \tau \eta \sigma \alpha v \tau \varepsilon \varsigma \alpha \nu \tau \eta \nu \varepsilon \nu \mu \varepsilon \sigma \omega$ ). First aorist active (transitive) participle of $\iota \sigma \tau \eta \mu$. Here all could see her and what Jesus did with such a case. They knew his proneness to forgive sinners.

John 8:4
Hath been taken ( $\kappa \alpha \tau \varepsilon 1 \lambda \eta \pi \tau \alpha$ ). Perfect passive indicative of $\kappa \alpha \tau \alpha \lambda \alpha \mu \beta \alpha v \omega$ (see verse $3)$, caught and still guilty.

In adultery ( $\mu \circ \not \subset \varepsilon v o \mu \varepsilon \nu \eta$ ). Present passive participle of $\mu \circ \chi \varepsilon v \omega$, "herself suffering adultery" (Mt 5:32 ). Used of married people. Not in John.

In the very act $\left(\varepsilon \pi^{\prime} \alpha v \tau о \varphi \omega \rho \omega\right)$. Old adjective ( $\alpha v \tau о \varphi \omega \rho o \sigma, \alpha \nu \tau \circ \varsigma$, self, and $\varphi \omega \rho$, thief) caught in the act of theft, then extended to any crime in which one is caught. Old idiom, but not elsewhere in the Greek Bible. One example in a Berlin papyrus.

John 8:5
Commanded ( $\varepsilon \nu \varepsilon \tau \varepsilon เ \lambda a \tau o)$. First aorist middle indicative of $\varepsilon \nu \tau \varepsilon \lambda \lambda \omega$, old verb to enjoin (Mt 4:6 ).

To stone such ( $\left.\tau \alpha \varsigma \tau 0 เ \alpha v \tau \alpha \varsigma \lambda_{\imath} \theta \alpha \zeta \varepsilon \imath \nu\right)$. Present active infinitive of $\lambda_{\imath} \theta \alpha \zeta \omega$ (from $\lambda_{\imath} \theta \circ \varsigma$ ), from Aristotle on. Stoning was specified for the case of a betrothed woman guilty of adultery (De 22:23f. ) and for a priest's daughter if guilty. In other cases just death was commanded (Le 20:10; De 22:22 ). The Talmud prescribes strangulation. This case may have strictly come within the regulation as a betrothed virgin.

What then sayest thou of her? ( $\sigma v$ ovv $\tau \lambda \varepsilon \gamma \varepsilon \iota \sigma ;$ ). "Thou then, what dost thou say?" This was the whole point, to catch Jesus, not to punish the woman.

John 8:6
Tempting him ( $\pi \varepsilon \iota \rho \alpha \zeta о \tau \tau \varepsilon \varsigma \alpha \tau \tau o v)$. Evil sense of this present active participle of $\pi \varepsilon \iota \rho \alpha \zeta \omega$, as so often (Mr 8:11; 10:2, etc.).

That they might have whereof to accuse him ( $\imath \alpha \varepsilon \chi \omega \sigma \imath v \alpha \tau \eta \gamma о \rho \varepsilon \imath v$ av $\tau \circ v$ ). Purpose clause with $\tau v \alpha$ and present active subjunctive of $\varepsilon \chi \omega$. This laying of traps for Jesus was a common practice of his enemies (Lu 11:16, etc.). Note present active infinitive of $\kappa \alpha \tau \eta \gamma \circ \rho \varepsilon \omega$ (see Mt 12:10 for the verb) to go on accusing (with genitive av $\quad$ (ov). It was now a habit with these rabbis.

Stooped down ( $\kappa \alpha \tau \omega \kappa v \psi \alpha \varsigma)$. First aorist active participle of $\kappa v \pi \tau \omega$, old verb to bow the head, to bend forward, in N.T. only here and verse 8 ; Mr 1:7. The use of $\kappa \alpha \tau \omega$ (down) gives a vivid touch to the picture.

With his finger ( $\tau \omega \delta \alpha \kappa \tau \nu \lambda \omega$ ). Instrumental case of $\delta \alpha \kappa \tau \cup \lambda$ os for which see Mt 23:4.
Wrote on the ground ( $\kappa \alpha \tau \varepsilon \gamma \rho \alpha \varphi \varepsilon \nu \varepsilon \iota \varsigma \tau \eta \nu \gamma \eta \nu$ ). Imperfect active of $\kappa \alpha \tau \alpha \gamma \rho \alpha \varphi \omega$, old compound, here only in N.T., to draw, to delineate, to write down, apparently inchoative, began to write on the sand as every one has done sometimes. The only mention of writing by Jesus and the use of катаүрацш leaves it uncertain whether he was writing words or drawing pictures or making signs. If we only knew what he wrote! Certainly Jesus knew how to write. And yet more books have been written about this one who wrote nothing that is preserved than any other person or subject in human history. There is a tradition that Jesus wrote down the names and sins of these accusers. That is not likely. They were written on their hearts. Jesus alone on this occasion showed embarrassment over this woman's sin.

## John 8:7

When they continued asking ( $\omega \varsigma \varepsilon \pi \varepsilon \mu \varepsilon v o v \varepsilon \rho \omega \tau \omega v \tau \varepsilon \varsigma$ ). Imperfect active indicative of $\varepsilon \pi \mu \varepsilon \nu \omega$ (waiting in addition or still, $\varepsilon \pi$, old verb) with supplementary active participle of $\varepsilon \rho \omega \tau \alpha \omega$, to question. See same construction in Ac 12:16 The verb $\varepsilon \pi \iota \mu \varepsilon \nu \omega$ does not occur
in John. They saw that Jesus seemed embarrassed, but did not know that it was as much because of "the brazen hardness of the prosecutors" as because of the shame of the deed.

He lifted himself up ( $\alpha v \varepsilon \kappa v \psi \varepsilon v$ ). First aorist active indicative of $\alpha v a \kappa \cup \pi \tau \omega$, the opposite of катакข $\tau \tau \omega$, to bend down (verse 8) or of кат $\kappa$ кил $\tau \omega$ (verse 6).

He that is without $\sin (o \alpha v \alpha \mu \alpha \rho \tau \eta \tau o \varsigma)$. Verbal adjective ( $\alpha v$ privative and $\alpha \mu \alpha \rho \tau \eta \tau o \varsigma$ from $\alpha \mu \alpha \rho \tau \alpha v \omega)$, old word, either one who has not sinned as here and De 29:19 or one who cannot sin, not in the N.T.

Among you ( $\nu \mu \omega v$ ). Objective genitive.
First cast ( $\pi \rho \omega \tau \tau \varsigma \beta \alpha \lambda \varepsilon \tau \omega$ ). The nominative $\pi \rho \omega \tau$ toc means first before others, be the first to cast, not cast before he does something else. See 20:4. The verb is second aorist imperative of $\beta \alpha \lambda \lambda \omega$, old verb to fling or cast. Jesus thus picks out the executioner in the case.

John 8:8
Again he stooped down ( $\pi \alpha \lambda ı \nu \kappa \alpha \tau \alpha \kappa \cup \psi \alpha \varsigma$ ). First aorist active participle of $\kappa \alpha \tau \alpha \kappa \cup \pi \tau \omega$, old and rare verb (in Epictetus II, 16.22) instead of $\kappa \alpha \tau \omega \kappa \nu \psi \alpha \varsigma$ in verse 6.

With his finger ( $\tau \omega \delta \alpha \kappa \tau \cup \lambda \omega$ ). Not genuine, only in $D$ and Western class.
Wrote on the ground ( $\varepsilon \gamma \rho \alpha \varphi \varepsilon v \varepsilon \iota \varsigma \tau \eta \nu \gamma \eta \nu$ ). Imperfect active of the simplex $\gamma \rho \alpha \varphi \omega$, not $\kappa \alpha \tau \alpha \gamma \rho \alpha \varphi \omega$. The second picture of Jesus writing on the ground.

John 8:9
Went out ( $\varepsilon \xi \eta \rho \chi$ оvтo). Inchoative imperfect. Graphic picture.
One by one ( $\left.\varepsilon ા \varsigma \kappa \alpha \theta^{\prime} \varepsilon ા \varsigma\right)$. Not a Johannine phrase, but in Mr 14:19 where also the second nominative is retained as if $\kappa \alpha \theta^{\prime}(\kappa \alpha \tau \alpha)$ is regarded as a mere adverb and not as a preposition.

Beginning from the eldest ( $\alpha \rho \xi \alpha \mu \varepsilon v o ~ \alpha \pi o ~ \tau \omega v \pi \rho \varepsilon \sigma \beta \nu \tau \varepsilon \rho \omega v$ ). "From the elder (comparative form, common in Koine as superlative) men," as was natural for they had more sins of this sort which they recalled. "They are summoned to judge themselves rather than the woman" (Dods).

Was left alone (кат $\varepsilon \lambda \varepsilon ı \varphi \theta \eta \mu \circ v \circ \varsigma)$. First aorist effective passive indicative of $\kappa \alpha \tau \alpha \lambda \varepsilon ı \pi \omega$, to leave behind, with predicate nominative $\mu$ ovoc. "Jesus was left behind alone."

And the woman, where she was, in the midst ( $\kappa \alpha \eta \gamma \cup v \eta \varepsilon v \mu \varepsilon \sigma \omega$ ovø $)$ ). The woman was left behind also "being in the midst" as they had placed her (verse 3 ) before they were conscience stricken and left.

John 8:10
Lifted up himself ( $\alpha v \alpha \kappa \nu \psi \alpha \varsigma$ ). First aorist active participle of $\alpha v \alpha \kappa \cup \pi \tau \omega$ as in verse 7.
Where are they? (Поv $\varepsilon \iota \sigma \imath v$;). Jesus had kept on writing on the ground as the accusers had slipped away one by one.

Did no man condemn thee? (ouסઘıऽ $\sigma \varepsilon \kappa \alpha \tau \varepsilon \kappa \rho \iota v \varepsilon v ;$ ). First aorist active indicative of катакрıv $\omega$, old and common verb to give judgment against (down on) one, but not in John. No one dared to cast a stone at the woman on Christ's terms.

John 8:11

No man, Lord (Ovס\&iб, Kvpı६). "No one, Sir." She makes no excuse for her sin. Does she recognize Jesus as "Lord"?

Neither do I condemn thee (Ovס $\varepsilon \gamma \omega \sigma \varepsilon \kappa \alpha \tau \alpha \kappa \rho \imath v \omega)$. Jesus does not condone her sin. See $8: 15$ for "I do not judge (condemn) any one." But he does give the poor woman another chance.

Henceforth sin no more ( $\alpha \pi о$ тov $v v \nu \mu \eta \kappa \varepsilon \tau ~ \alpha \mu \alpha \rho \tau \alpha v \varepsilon$ ). See also 5:14 where this same language is used to the impotent man. It literally means (prohibition with present active imperative): "Henceforth no longer go on sinning." One can only hope that the woman was really changed in heart and life. Jesus clearly felt that even a wicked woman can be saved.

John 8:12
Again therefore ( $\pi \alpha \lambda ı v o v v$ ). This language fits in better with 7:52 than with 8:11. Just suppose Jesus is in the temple on the following day.

Unto them (autoıc). The Pharisees and crowds in the temple after the feast was past.
I am the light of the world ( $\varepsilon \gamma \omega \varepsilon \mu$ то $\varphi \omega \varsigma$ тov коб $\mu \circ v$ ). Jesus had called his followers "the light of the world" (Mt 5:14 ), but that was light reflected from him. Already Jesus (the Logos) had been called the true light of men (1:9; 3:19). The Psalmist calls God his Light ( 27:1). So Isa 60:19 . At the feast of tabernacles in the Court of the Women where Jesus was on this day ( 8:20) there were brilliant candelabra and there was the memory of the pillar of cloud by day and of fire by night. But with all this background this supreme and exclusive claim of Jesus (repeated in 9:5) to being the light of the whole world (of Gentiles as well as of Jews) startled the Pharisees and challenged their opposition.

Shall have the light of life ( $\varepsilon \xi \varepsilon$ to $\varphi \omega \varsigma \tau \eta \varsigma \zeta \omega \eta \varsigma)$. The light which springs from and issues in life (Westcott). Cf. 6:33,51 about Jesus being the Bread of Life. In this sublime claim we come to a decisive place. It will not do to praise Jesus and deny his deity. Only as the Son of God can we justify and accept this language which otherwise is mere conceit and froth.

John 8:13
Of thyself ( $\pi \varepsilon \rho \sigma \varepsilon \alpha u \tau o v$ ). This technical objection was according to the rules of evidence among the rabbis. "No man can give witness for himself" (Mishnah, Ketub. 11. 9). Hence, they say, "not true" (ouk $\alpha \lambda \eta \theta \varepsilon \varsigma)$, not pertinent. "They were still in the region of pedantic rules and external tests." In Joh 5:31 Jesus acknowledged this technical need of further witness outside of his own claims (Joh 19-30 ) and proceeded to give it (Joh 32-47) in the testimony of the Baptist, of the Father, of his works, of the Scriptures, and of Moses in particular.

John 8:14
Even if ( $\kappa \alpha v$ ). That is $\kappa \alpha \varepsilon \alpha v$, a condition of the third class with the present active subjunctive $\mu \alpha \rho \tau \cup \rho \omega$. Jesus means that his own witness concerning himself is true ( $\alpha \lambda \eta \theta \varepsilon \varsigma$ ) even if it contravenes their technical rules of evidence. He can and does tell the truth all by himself concerning himself.

For I know whence I came and whither I go（o o兀 oı $\alpha \pi \circ \theta \varepsilon \nu \eta \lambda \theta o v \kappa \alpha \pi о v v \pi \alpha \gamma \omega)$ ．In this terse sentence with two indirect questions Jesus alludes to his pre－existence with the Father before his Incarnation as in 17：5 and to the return to the Father after the death and resurrection as in 13：3；14：2f．He again puts both ideas together in one crisp clause in 16：28 for the apostles who profess to understand him then．But here these Pharisees are blind to the words of Jesus．＂But ye know not whence I come nor whither I go＂（v $\pi \circ \theta \varepsilon v \varepsilon \rho \chi \circ \mu \alpha \eta \pi \sigma v v \pi \alpha \gamma \omega$ ）．He had spoken of his heavenly destiny（7：33）．Jesus alone knew his personal consciousness of his coming from，fellowship with，and return to the Father．Stier（Words of the Lord Jesus）argues that one might as well say to the sun，if claiming to be the sun，that it was night，because it bore witness of itself．The answer is the shining of the sun．

John 8：15
After the flesh（ $\kappa \alpha \tau \alpha \tau \eta \nu \sigma \alpha \rho \kappa \alpha)$ ．According to the standards of the flesh（2Co 5：16）． The Baptist had said：＂There stands one among you whom ye know not＂（Joh 1：26 ）．The Light of the World had come，but they loved darkness rather than light（ 3：19），because the god of this age had blinded their thoughts so that they could not see the illumination of the gospel of the glory of Christ who is the image of God（2Co 4：4）．

John 8：16
Yea and if I judge（ $\kappa \alpha \varepsilon \alpha \nu \kappa \rho \imath \nu \omega \delta \varepsilon \varepsilon \gamma \omega$ ）．＂And even if I pass judgment．＂Condition of third class again．

True（al邓thin『）．See 1：9 for $\alpha \lambda \eta \theta \iota v o \varsigma, ~ g e n u i n e, ~ s o u n d l y ~ b a s e d ~(c f . ~ \delta ı \alpha a ı \alpha ~ i n ~ 5: 30), ~ " s a t-~$ isfying our perfect conception＂（Westcott），not merely true（ $\alpha \lambda \eta \theta \varepsilon \varsigma$ ）in the particular facts （verse 14）．

For I am not alone（ $о \tau \mu \circ v o \varsigma$ ovk $\varepsilon \not \mu)$ ．Jesus now takes up the technical criticism in verse 13 after justifying his right to speak concerning himself．

But I and the Father that sent me（ $\alpha \lambda \lambda \varepsilon \gamma \omega \kappa \alpha$ o $\pi \varepsilon \mu \psi \alpha \varsigma \mu \varepsilon \pi \alpha \tau \eta \rho$ ）．See 16：32 for a like statement about the Father being with Christ．It is not certain that $\pi \alpha \tau \eta \rho$ is genuine here（omitted by Aleph D，but in B L W），but the Father is clearly meant as in 7：18，33 ．Jesus gives the Father as the second witness．

John 8：17
Yea and in your law（ $\kappa \alpha \varepsilon \nu \tau \omega \nu \circ \mu \omega \delta \varepsilon \tau \omega \nu \mu \varepsilon \tau \varepsilon \rho \omega$ ）．Same use of $\kappa \alpha l--\delta \varepsilon$ as in verse 16．They claimed possession of the law（ $7: 49$ ）and so Jesus takes this turn in answer to the charge of single witness in verse 13 ．He will use similar language（your law）in 10：34 in an argumentum ad hominem as here in controversy with the Jews．In 15：24 to the apostles Jesus even says＂in their law＂in speaking of the hostile Jews plotting his death．He does not mean in either case to separate himself wholly from the Jews and the law，though in Matthew 5 he does show the superiority of his teaching to that of the law．For the Mosaic regulation about two witnesses see $\operatorname{De} 17: 6 ; 19: 15$ ．This combined witness of two is not true just because
they agree, unless true in fact separately. But if they disagree, the testimony falls to the ground. In this case the Father confirms the witness of the Son as Jesus had already shown ( 5:37).

John 8:18
The Father (o $\pi \alpha \tau \eta \rho$ ). Clearly genuine here. So these are the two witnesses that Jesus presents to the Pharisees in defence of his claim to be the Light of the World (verse 12).

John 8:19
Where is thy Father? ( $\pi о v \varepsilon \sigma \tau เ v$ о $\pi \alpha \tau \eta \rho \sigma o v ;$ ). "The testimony of an unseen and unheard witness would not satisfy them" (Vincent). Bernard understands the Pharisees to see that Jesus claims God the Father as his second witness and so ask "where," not "who" he is. Augustine has it: Patrem Christi carnaliter acceperunt, Christ's human father, as if the Pharisees were "misled perhaps by the Lord's use of $\alpha v \theta \rho \omega \pi \sigma v$ (verse 17)" (Dods). Cyril even took it to be a coarse allusion to the birth of Jesus as a bastard according to the Talmud. Perhaps the Pharisees used the question with double entendre, even with all three ideas dancing in their hostile minds.

Ye would know my Father also ( $\kappa \alpha$ тоv $\pi \alpha \tau \varepsilon \rho \alpha \mu о v ~ \alpha v ~ \eta ı \delta \varepsilon \iota \tau \varepsilon$ ). Conclusion of secondclass condition determined as unfulfilled with $\alpha v$ and second perfect active of oi $\delta \alpha$ used as imperfect in both condition and conclusion. See this same point made to Philip in 14:9. In 14:7 Jesus will use $\gamma \iota \omega \omega \sigma \kappa \omega$ in the condition and oo $\delta \alpha$ in the conclusion. The ignorance of the Pharisees about Jesus proves it and is due to their ignorance of the Father. See this point more fully stated in 5:36-38 when Jesus had his previous controversy in Jerusalem. In 7:28 Jesus said that they knew his home in Nazareth, but he denied then that they knew the Father who sent him. Jesus will again on this occasion ( 8:55) deny their knowledge of the Father. Later he will deny their knowledge of the Father and of the Son (16:3). The Pharisees are silenced for the moment.

John 8:20
In the treasury ( $\varepsilon \nu \tau \omega \gamma \alpha \zeta о \varphi \cup \lambda \alpha \kappa \iota \omega$ ). See already $\mathrm{Mr} 12: 41 ; \mathrm{Lu} 21: 1$ for this word for the treasure-chambers of the temple. "It abutted on the Court of the Women, and against its walls were placed chests, trumpet-like in form, as receptacles for the offerings of the worshippers" (Bernard). The Persian word gaza (treasure) occurs only once in the N.T. (Ac 8:27) and the compound ( $\varphi$ ) $\alpha \kappa \eta$, guard) only here in John. Jesus hardly taught within a treasure-chamber. It probably means "at the treasury in the temple." This court was probably the most public part of the temple (Vincent).

And ( $\kappa \alpha$ )="and yet" as in $1: 10$, etc.
Because his hour was not yet come (o $o v \pi \omega \varepsilon \lambda \eta \lambda v \theta \varepsilon \eta \omega \rho \alpha \alpha v \tau o v$ ).
Reason (ot) given why no one seized ( $\varepsilon \pi \omega \alpha \sigma \varepsilon \nu$, cf. $7: 30$ ) him. $E \lambda \eta \lambda \nu \theta \varepsilon$ is past perfect active of $\varepsilon \rho \chi \circ \mu \alpha$, "had not yet come." This very use of $\omega \rho \alpha$ appears in $2: 4$ and the very clause in 7:30 which see.

John 8:21
Again ( $\pi \alpha \lambda ı v$ ). Probably $\pi \alpha \lambda ı \nu$ (again) in verse 12 refers to a day after the feast is over since the last day is mentioned in $7: 37$. So then here again we probably move on to another day still beyond that in verse 12 .

And ye shall seek me ( $\kappa \alpha \zeta \eta \tau \eta \sigma \varepsilon \tau \varepsilon \mu \varepsilon$ ). As in 7:34, "the search of despair" (Bernard), seeking for the Messiah when it is too late, the tragedy of Judaism today ( $1: 11$ ).

And ye shall die in your $\sin (\kappa \alpha \varepsilon \nu \tau \eta \alpha \mu \alpha \rho \tau \iota \alpha \nu \mu \omega \nu \alpha \pi \sigma \theta \alpha \nu \varepsilon \iota \sigma \theta \varepsilon)$. Future middle indicative of $\alpha \pi \sigma \theta \nu \eta \sigma \kappa \omega$ which is the emphatic word here (cf. Eze 3:18; 18:18; Pr 24:9). Note singular $\alpha \mu \alpha \rho \tau \iota \alpha(\sin )$ here, but plural $\alpha \mu \alpha \rho \tau \iota \alpha \iota \varsigma(\operatorname{sins})$ when the phrase is repeated in verse 24 (sin in its essence, sin in its acts).

Ye cannot come ( $v \mu \varepsilon \iota \varsigma$ ov $\delta v v a \sigma \theta \varepsilon \varepsilon \lambda \theta \varepsilon เ v)$. Precise language of 7:34 to the Jews and to the apostles in 13:33.

John 8:22
Will he kill himself? ( $\mu \eta \tau \alpha \pi о \kappa \tau \varepsilon v \varepsilon \varepsilon \alpha v \tau o v ;$ ). Negative answer formally expected, but there is a manifest sneer in the query. "The mockery in these words is alike subtle and bitter" (Vincent). It was a different group of Jews in 7:31 who cynically suggested that he was going to work among the Greeks in the Dispersion. Here they infer that Jesus refers to the next world. They suggest the depths of Gehenna for him as the abode of suicides (Josephus, War III. viii. 5). Of course the rabbis could not join Jesus there! Edersheim argues against this view.

John 8:23
Ye are from beneath ( $v \mu \varepsilon \iota \varsigma \kappa \kappa \tau \nu \kappa \alpha \tau \omega$ ). This language, peculiar to John, could take up the idea in Josephus that these rabbis came from Gehenna whence they will go as children of the devil ( 8:44), but the use of $\varepsilon \kappa$ тov коб $\mu \circ$ रov $\operatorname{\tau ov}$ (ov ("of this world" in origin) as parallel to what we have here seems to prove that the contrast between $\kappa \alpha \tau \omega$ and $\alpha v \omega$ here is between the earthly (sensual) and the heavenly as in Jas 3:15-17. See also Col 3:1. This is the only use of $\kappa \alpha \tau \omega$ in John (except 8:6). These proud rabbis had their origin in this world of darkness ( 1:9) with all its limitations.

I am from above ( $\varepsilon \gamma \omega \varepsilon \kappa \tau \omega \nu \alpha \nu \omega \varepsilon \iota \mu)$. The contrast is complete in origin and character, already stated in 3:31, and calculated to intensify their anger.

John 8:24
For except ye believe ( $\varepsilon \alpha \nu \gamma \alpha \rho \mu \eta \pi \iota \sigma \tau \varepsilon v \sigma \eta \tau \varepsilon$ ). Negative condition of third class with $\varepsilon \alpha \nu \mu \eta$ and ingressive aorist active subjunctive of $\pi \iota \sigma \tau \varepsilon \nu \omega$, "For unless ye come to believe."

That I am he (o $\tau \varepsilon \omega \varepsilon \varepsilon \mu$ ). Indirect discourse, but with no word in the predicate after the copula $\varepsilon \iota \mu$. Jesus can mean either "that I am from above" (verse 23), "that I am the one sent from the Father or the Messiah" (7:18,28), "that I am the Light of the World" ( $8: 12$ ), "that I am the Deliverer from the bondage of $\sin$ " $(8: 28,31 \mathrm{f} ., 36)$, "that I am" without supplying a predicate in the absolute sense as the Jews (De 32:39) used the language of Jehovah (cf.

Isa $43: 10$ where the very words occur $\operatorname{va} \alpha \pi \iota \sigma \tau \varepsilon v \sigma \eta \tau \varepsilon--o \tau \varepsilon \gamma \omega \varepsilon \mu \mu)$. The phrase $\varepsilon \gamma \omega \varepsilon \mu$ occurs three times here $(8: 24,28,58)$ and also in 13:19. Jesus seems to claim absolute divine being as in 8:58.

John 8:25
Who art thou? ( $\Sigma v \tau \iota \varsigma \varepsilon ;$ ). Proleptic use of $\sigma v$ before $\tau \iota \varsigma$, "Thou, who art thou?" Cf. $1: 19$. He had virtually claimed to be the Messiah and on a par with God as in $5: 15$. They wish to pin him down and to charge him with blasphemy.

Even that which I have also spoken unto you from the beginning ( $\tau \eta \nu \alpha \rho \chi \eta \nu$ от $\kappa \alpha$ $\lambda \alpha \lambda \omega v \mu \nu \nu)$. A difficult sentence. It is not clear whether it is an affirmation or a question. The Latin and Syriac versions treat it as affirmative. Westcott and Hort follow Meyer and take it as interrogative. The Greek fathers take it as an exclamation. It seems clear that the adverbial accusative $\tau \eta \nu \alpha \rho \chi \eta \nu$ cannot mean "from the beginning" like $\alpha \pi^{\prime} \alpha \rho \chi \eta \varsigma$ ( $15: 27$ ) or $\varepsilon \xi \alpha \rho \chi \eta \varsigma$ ( 16:4). The LXX has $\tau \eta \nu \alpha \rho \chi \eta \nu$ for "at the beginning" or "at the first" (Ge 43:20 ). There are examples in Greek, chiefly negative, where $\tau \eta \nu \alpha \rho \chi \eta \nu$ means "at all," "essentially," "primarily." Vincent and Bernard so take it here, "Primarily what I am telling you." Jesus avoids the term Messiah with its political connotations. He stands by his high claims already made.

John 8:26
I have many things to speak and to judge concerning you ( $\pi 0 \lambda \lambda \alpha \varepsilon \chi \omega \pi \varepsilon \rho v \mu \omega \nu \lambda \alpha \lambda \varepsilon \tau \nu$ $\kappa \alpha \kappa \rho \iota \varepsilon \varepsilon เ v$ ). Instead of further talk about his own claims (already plain enough) Jesus turns to speak and to judge concerning them and their attitude towards him (cf. verse 16). Whatever they think of Jesus the Father who sent him is true ( $\alpha \lambda \eta \theta \eta \varsigma)$. They cannot evade responsibility for the message heard. So Jesus goes on speaking it from the Father.

John 8:27
They perceived not (ovк $\varepsilon \gamma \nu \omega \sigma \alpha \nu$ ). Second aorist active indicative of $\gamma \iota v \omega \sigma \kappa \omega$. "Preoccupied as they were with thoughts of an earthly deliverer" (Westcott) and prejudiced against recognizing Jesus as the one sent from God.

That he spake to them of the Father (o $\tau \tau 0 v \pi \alpha \tau \varepsilon \rho \alpha \alpha v \tau o \iota \varsigma \lambda \varepsilon \gamma \varepsilon v$ ). Indirect assertion, but with the present indicative $(\lambda \varepsilon \gamma \varepsilon)$ changed to the imperfect $(\varepsilon \lambda \varepsilon \gamma \varepsilon v)$ as was sometimes done ( $2: 25$ ) after a secondary tense.

John 8:28
When ye have lifted up the Son of man (o o $\left.\alpha v v \psi \omega \sigma \eta \tau \varepsilon \tau \frac{\tau}{} v \operatorname{vov} \tau \operatorname{\tau } \alpha v \theta \rho \omega \pi o v\right)$. Indefinite temporal clause with $o \tau \alpha v(o \tau \varepsilon+\alpha v)$ and the first aorist active subjunctive of $v \psi o \omega$, to lift up (Koine verb from v $\quad$ оऽ, height), used several times in John of the Cross of Christ $(3: 14 ; 8: 28 ; 12: 32,34)$. It is unnecessary to render the aorist subjunctive as if a future perfect, simply "whenever ye lift up" (actually lift up, ingressive aorist). In Ac 2:33 the verb is used of the Ascension.

Shall ye know ( $\gamma \nu \omega \sigma \varepsilon \sigma \theta \varepsilon$ ). Future (ingressive aoristic) middle of $\gamma \iota \nu \omega \sigma \kappa \omega$. Cognoscetis ex re quod nunc ex verbo non creditis (Bengel). But the knowledge from the facts like the fall of Jerusalem will come too late and will not bring a change of heart. The Holy Spirit will convict them concerning judgment ( 16:8). For

I am $(\varepsilon \gamma \omega \varepsilon \mu)$ see on verse 24 .
As the Father taught me ( $K \alpha \theta \omega \varsigma \varepsilon \delta เ \delta \alpha \sigma \kappa \varepsilon v \mu \varepsilon$ о $\pi \alpha \tau \eta \rho$ ). This claim Jesus repeats (see verse 26) and clearly makes on his arrival at the feast (7:16f. ). This fact marks Jesus off from the rabbis.

John 8:29
Is with me ( $\mu \varepsilon \tau^{\prime} \varepsilon \mu \circ v \varepsilon \sigma \tau \iota v$ ). The Incarnation brought separation from the Father in one sense, but in essence there is complete harmony and fellowship as he had already said ( 8:16) and will expand in 17:21-26.

He hath not left me alone (ovк $\alpha \varphi \eta \kappa \varepsilon v \mu \varepsilon \mu \circ v o v$ ). First aorist active indicative of $\alpha \varphi ı \eta \mu$. "He did not leave me alone." However much the crowds and the disciples misunderstood or left Jesus, the Father always comforted and understood him (Mr 6:46; Mt 14:23; Joh 6:15 ).

That are pleasing to him ( $\tau \alpha \alpha \rho \varepsilon \sigma \tau \alpha \alpha \cup \tau \omega$ ). This old verbal adjective, from $\alpha \rho \varepsilon \sigma \kappa \omega$, to please, in N.T. only here, Ac 6:2; 12:3; 1Jo 3:32 . The joy of Jesus was in doing the will of the Father who sent him ( 4:34).

John 8:30
Many believed on him ( $\pi \circ \lambda \lambda о$ є $\pi \iota \sigma \tau \varepsilon \cup \sigma \alpha v \varepsilon เ \varsigma \alpha \cup \tau o v)$ ). Ingressive aorist active indicative, came to believe, nominally at any rate, as in 2:23. But the tension was keen and Jesus proceeded to test the faith of these new believers from among the Pharisees.

John 8:31
Which had believed him ( $\tau 0 \cup \varsigma \pi \varepsilon \pi \iota \sigma \tau \varepsilon \cup \kappa о \tau \alpha \varsigma \alpha \cup \tau \omega$ ). Articular perfect active participle of $\pi \iota \sigma \tau \varepsilon v \omega$ with dative $\alpha \cup \tau \omega$ (trusted him) rather than $\varepsilon \iota \varsigma$ avtov (on him) in verse 30. They believed him (cf. 6:30) as to his claims to being the Messiah with their own interpretation ( 6:15), but they did not commit themselves to him and may represent only one element of those in verse 30, but see 2:23 for $\pi เ \sigma \tau \varepsilon v \omega$ عıs there.

If ye abide in my word ( $\varepsilon \alpha \nu \nu \mu \varepsilon \iota \varsigma \mu \varepsilon เ \nu \eta \tau \varepsilon \varepsilon \nu \tau \omega \lambda o \gamma \omega \tau \omega \varepsilon \mu \omega$ ). Third-class condition with eav and first aorist (constative) active subjunctive.

Are ye truly my disciples ( $\alpha \lambda \eta \theta \omega \varsigma \mu \alpha \theta \eta \tau \alpha \mu \circ v \varepsilon \sigma \tau \varepsilon$ ). Your future loyalty to my teaching will prove the reality of your present profession. So the conclusion of this future condition is put in the present tense. As then, so now. We accept church members on profession of trust in Christ. Continuance in the word (teaching) proves the sincerity or insincerity of the profession. It is the acid test of life.

John 8:32

And ye shall know the truth ( $\kappa \alpha \gamma \nu \omega \sigma \varepsilon \sigma \theta \varepsilon \tau \eta \nu \alpha \lambda \eta \theta \varepsilon \iota \alpha \nu)$. Truth is one of the marks of Christ ( $1: 14$ ) and Jesus will claim to Thomas to be the personification of truth ( $14: 6$ ). But it will be for them knowledge to be learned by doing God's will (7:17). The word is from $\alpha \lambda \eta \forall \eta \varsigma$ ( a privative and $\lambda \eta \theta \omega$, to conceal, unsealed, open). See also verses 40,44,45.

And the truth shall make you free ( $\kappa \alpha \eta \alpha \lambda \eta \theta \varepsilon \iota \alpha \varepsilon \lambda \varepsilon v \theta \varepsilon \rho \omega \sigma \varepsilon v \mu \alpha \varsigma)$. Future active indicative of $\varepsilon \lambda \varepsilon v \theta \varepsilon \rho \circ \omega$, old verb from $\varepsilon \lambda \varepsilon v \theta \varepsilon \rho \circ \varsigma$ (from $\varepsilon \rho \chi \circ \mu \alpha$, to go where one wishes and so free). One of Paul's great words for freedom from the bondage of the law (Ro 6:18; Ga 5:1 ). The freedom of which Jesus here speaks is freedom from the slavery of sin as Paul in Ro 8:2. See Joh 8:36. This freedom is won alone by Christ ( $8: 36$ ) and we are sanctified in truth ( $17: 19$ ). In 1:17 truth is mentioned with grace as one of the marks of the gospel through Christ. Freedom (intellectual, moral, spiritual) is only attainable when we are set free from darkness, sin, ignorance, superstition and let the Light of the World shine on us and in us.

John 8:33
We be Abraham's seed ( $\Sigma \pi \varepsilon \rho \mu \alpha$ A $\beta \rho \alpha \alpha \mu \varepsilon \sigma \mu \varepsilon v)$. "We are Abraham's seed," the proudest boast of the Jews, of Sarah the freewoman and not of Hagar the bondwoman (Ga 4:22f. ). Yes, but the Jews came to rely solely on mere physical descent (Mt 3:9) and so God made Gentiles the spiritual children of Abraham by faith (Mt 3:7; Rom. 9:6f. ).

And have never yet been in bondage to any man ( $\kappa \alpha$ ov $\delta \varepsilon \nu \delta \varepsilon \delta o v \lambda \varepsilon v \kappa \alpha \mu \varepsilon \nu \pi \omega \pi \sigma \tau \varepsilon$ ). Perfect active indicative of $\delta o v \lambda \varepsilon v \omega$, to be slaves. This was a palpable untruth uttered in the heat of controversy. At that very moment the Jews wore the Roman yoke as they had worn that of Assyria, Babylon, Persia, Alexander, the Ptolemies, the Syrian (Seleucid) kings. They had liberty for a while under the Maccabees. "These poor believers soon come to the end of their faith" (Stier). But even so they had completely missed the point in the words of Jesus about freedom by truth.

## John 8:34

Every one that committeth sin is the bondservant of $\sin (\pi \alpha \varsigma$ o $\pi o t \omega \nu \tau \eta \nu \alpha \mu \alpha \rho \tau \iota \alpha \nu$ $\delta o v \lambda о \varsigma \varepsilon \sigma \tau \iota \nu[\tau \eta \varsigma \alpha \mu \alpha \rho \tau \iota \alpha \sigma])$. The Western class omits $\tau \eta \varsigma \alpha \mu \alpha \rho \tau \iota \alpha \varsigma(\sin )$, but that is the idea anyhow. Note the use of $\pi o t \omega v$ (present active participle, continuous habit or practice), not $\pi о \imath \eta \sigma \varsigma$ (aorist active participle for single act), precisely as in 1Jo 3:4-8. Note also 3:21 for o $\pi o t \omega \nu \tau \eta \nu \alpha \lambda \eta \theta \varepsilon \iota \alpha \nu$ (the one who practises the truth). Sin, like the worst narcotic, is habit forming. Hence the problem today for criminologists for paroled or pardoned criminals nearly always go back to crime, sink again into sin, the slaves of $\sin$. Xenophon has this notion of the slavery of $\sin$ (Memor. IV. 5. 3). So Paul clearly in Ro 6:17,20 "slaves of sin" ( $\delta o u \lambda o$ $\tau \eta \varsigma \alpha \mu \alpha \rho \tau \iota \alpha \varsigma)$.

John 8:35
The bondservant (o $\delta o v \lambda o \varsigma) . .$.
the son (o vios). There is a change in the metaphor by this contrast between the positions of the son and the slave in the house. The slave has no footing or tenure and may be cast
out at any moment while the son is the heir and has a permanent place. Cf. Ishmael and Isaac (Ge 21:10) and Paul's use of it in Ga 4:30. We do not know that there is any reference here to Hagar and Ishmael. See also Heb 3:5 (Nu 12:7) for a like contrast between Moses as servant $(\theta \varepsilon \rho \alpha \pi \omega v)$ in God's house and Christ as Son (vioc) over God's house.

John 8:36
If therefore the son shall make you free ( $\varepsilon \alpha v$ ovv o vos $v \mu \alpha \varsigma \varepsilon \lambda \varepsilon u \theta \varepsilon \rho \omega \sigma \eta$ ). Condition of third class with $\varepsilon \alpha v$ and first aorist (ingressive) active subjunctive. "If therefore the Son set you free," as he has the power to do.

Ye shall be free indeed ( $\mathrm{ov} \mathrm{\tau} \mathrm{\omega} \mathrm{\varsigma} \varepsilon \lambda \varepsilon v \theta \varepsilon \rho o \varepsilon \sigma \varepsilon \sigma \theta \varepsilon$ ). Old and common adverb from participle ovt $\omega v$, actually, really (cf. Lu 24:34 ). But this spiritual freedom was beyond the concept or wish of these Jews.

John 8:37
 $8: 20$ ). Some of these very professed believers were even now glowering with murderous vengeance.

Hath not free course in you ( $o v \chi \omega \rho \varepsilon \varepsilon v \nu \mu \nu v$ ). Intransitive use of $\chi \omega \rho \varepsilon \omega$, old verb from $\chi \omega \rho o \varsigma$ (space, place), to have space or room for. They would not abide in Christ's word (verse 31). They had no longer room for his word when once they understood the spiritual aspect of his message. Jerusalem was now just like Galilee once before ( 6:60-66).

John 8:38
With my Father ( $\pi \alpha \rho \alpha \tau \omega \pi \alpha \tau \rho$ ). Locative case of $\pi \alpha \tau \eta \rho$ and article used as possessive (common idiom), "by the side of my Father," picture of intimate fellowship like $\pi \rho o s$ tov $\theta \varepsilon o v$ (face to face with God) in 1:1.

From your father ( $\pi \alpha \rho \alpha$ tov $\pi \alpha \tau \rho o \varsigma$ ). Ablative case with $\pi \alpha \rho \alpha$ (from the side of) and same possessive use of tov in each instance, though "the" will really answer both times. But o $\pi \alpha \tau \eta \rho$ does not mean the same person. Christ's Father by contrast is not their father.

John 8:39
Our father is Abraham (o $\pi \alpha \tau \eta \rho \eta \mu \omega \nu \mathrm{A} \beta \rho \alpha \alpha \mu \varepsilon \sigma \tau \tau v$ ). They saw the implication and tried to counter it by repeating their claim in verse 33 which was true so far as physical descent went as Jesus had admitted (verse 37).

If ye were ( $\varepsilon \varepsilon \sigma \tau \varepsilon$ ). Strictly, "if ye are" as ye claim, a condition of the first class assumed to be true.

Ye would do ( $\varepsilon \pi о \iota \iota \tau \varepsilon \alpha v$ ). Read by C L N and a corrector of Aleph while W omits $\alpha v$. This makes a mixed condition (protasis of the first class, apodosis of the second. See Robertson, Grammar, p. 1022). But B reads поוєıt like the Sin. Syriac which has to be treated as imperative (so Westcott and Hort).

John 8:40

But now ( $v v \nu \delta \varepsilon$ ). Clear statement that they are not doing "the works of Abraham" in seeking to kill him. See this use of $v v \nu \delta \varepsilon$ after a condition of second class without $\alpha v$ in Joh 16:22,24 .

This did not Abraham ( $\tau о \cup \tau о ~ A \beta \rho \alpha \alpha \mu$ оик $\varepsilon \pi о џ \eta \sigma \varepsilon v$ ). Blunt and pointed of their unlikeness to Abraham.

A man that hath told you the truth ( $\alpha v \theta \rho \omega \pi \sigma \nu$ oऽ $\tau \varepsilon \nu \alpha \lambda \eta \theta \varepsilon ı \alpha \nu \nu \mu \nu \nu \varepsilon \lambda \alpha \lambda \eta \kappa \alpha$ ). A $\nu \theta \rho \omega \pi \sigma v$ (here=person, one) is accusative case in apposition with
me ( $\mu \varepsilon$ ) just before. The perfect active indicative $\lambda \varepsilon \lambda \alpha \lambda \eta \kappa \alpha$ from $\lambda \alpha \lambda \varepsilon \omega$ is in the first person singular because the relative oc has the person of $\mu \varepsilon$, an idiom not retained in the English
that hath (that have or who have) though it is retained in the English of 1Co 15:9 "that am" for os $\varepsilon \iota \mu$.

Which I heard from God ( $\eta \nu \eta \kappa о v \sigma \alpha \pi \alpha \rho \alpha$ тov $\theta \varepsilon \sigma v$ ). Here we have "I" in the English. "God" here is equal to "My Father" in verse 38. The only crime of Jesus is telling the truth directly from God.

John 8:41
Ye do the works of your father ( $v \mu \varepsilon \iota \varsigma \pi о \iota \varepsilon \tau \varepsilon \tau \alpha \varepsilon \rho \gamma \alpha \tau \circ v \pi \alpha \tau \rho \circ \varsigma v \mu \omega v$ ). Who is not Abraham and not God as Jesus plainly indicates.

We were not born of fornication ( $\eta \mu \varepsilon \iota \varsigma \varepsilon \kappa \pi о \rho v \varepsilon \iota \alpha \varsigma \varepsilon \gamma \varepsilon \nu \nu \eta \forall \eta \mu \varepsilon \nu$ ). First aorist passive indicative of $\gamma \varepsilon v v a \omega$. This they said as a proud boast. Jesus had admitted that they were physical (De 23:2 ) descendants of Abraham (37), but now denies that they are spiritual children of Abraham (like Paul in Ro 9:7 ). Пo 0 veıa is from $\pi$ о $\rho$ vos (harlot) and that from $\pi \varepsilon \rho \vee \eta \mu$, to sell, a woman who sells her body for sexual uses. It is vaguely possible that in this stern denial the Pharisees may have an indirect fling at Jesus as the bastard son of Mary (so Talmud).

We have one Father, even God ( $\varepsilon v \alpha \pi \alpha \tau \varepsilon \rho \alpha \varepsilon \chi \circ \mu \varepsilon \nu \tau o v \theta \varepsilon o v$ ). No "even" in the Greek, "One Father we have, God." This in direct reply to the implication of Jesus (verse 38) that God was not their spiritual Father.

John 8:42
Ye would love me ( $\eta \gamma \alpha \pi \alpha \tau \varepsilon \alpha \nu \varepsilon \mu \varepsilon$ ). Conclusion of second-class condition with distinct implication that their failure to love Jesus is proof that God is not their Father (protasis).

For I came forth from God ( $\varepsilon \gamma \omega \gamma \alpha \rho \varepsilon \kappa \operatorname{\tau ov} \theta \varepsilon o v \varepsilon \xi \eta \lambda \theta o v)$. Second aorist active indicative of $\varepsilon \xi \varepsilon \rho \chi о \mu \alpha$, definite historical event (the Incarnation). See 4:30 for $\varepsilon \xi \eta \lambda \theta o v \varepsilon \kappa$. In 13:3; 16:30 Jesus is said to have come from ( $\alpha \pi 0$ ) God. The distinction is not to be pressed. Note the definite consciousness of pre-existence with God as in 17:5.

And am come ( $\kappa \alpha\rceil \kappa \omega$ ). Present active indicative with perfect sense in the verb stem (state of completion) before rise of the tense and here retained. "I am here," Jesus means.

Of myself ( $\alpha \pi^{\prime} \varepsilon \mu \alpha v \tau o v$ ). His coming was not self-initiated nor independent of the Father. "But he ( $\varepsilon \kappa \varepsilon เ v o \varsigma, ~ e m p h a t i c ~ d e m o n s t r a t i v e ~ p r o n o u n) ~ s e n t ~ m e " ~ a n d ~ h e r e ~ I ~ a m . ~$

## John 8:43

My speech ( $\tau \eta v \lambda \alpha \lambda ı \alpha v \tau \eta v \varepsilon \mu \eta v$ ) and
my word ( $\tau 0 v \lambda o \gamma o v \tau o v \varepsilon \mu \circ v$ ). Perhaps $\lambda a \lambda ı \alpha$, old word from $\lambda \alpha \lambda o \varsigma$ (talk), means here more manner of speech than just story ( 4:42), while $\lambda$ o $\gamma \circ$ c refers rather to the subject matter. They will not listen (ov $\delta v v a \sigma \theta \varepsilon \alpha \kappa о v \varepsilon เ v)$ to the substance of Christ's teaching and hence they are impatient with the way that he talks. How often that is true.

## John 8:44

Ye are of your father the devil (v $v \varepsilon \iota \varsigma \kappa \tau о v \pi \alpha \tau \rho о \varsigma \tau о v \delta \iota \alpha \beta о \lambda о v)$. Certainly they can "understand" ( $\gamma \iota v \omega \sigma \kappa \varepsilon \tau \varepsilon$ in 43) this "talk" $(\lambda \alpha \lambda \iota \alpha v)$ though they will be greatly angered. But they had to hear it (akoveıv in 43). It was like a bombshell in spite of the preliminary preparation.

Your will to do ( $\theta \varepsilon \lambda \varepsilon \tau \varepsilon \pi o t \varepsilon เ v)$. Present active indicative of $\theta \varepsilon \lambda \omega$ and present active infinitive, "Ye wish to go on doing." This same idea Jesus presents in Mt 13:38 (the sons of the evil one, the devil) and 23:15 (twofold more a son of Gehenna than you). See also 1Jo 3:8 for "of the devil" ( $\varepsilon \kappa$ тov $\delta \iota \alpha \beta o \lambda o v)$ for the one who persists in sinning. In Re 12:9 the devil is one who leads all the world astray. The Gnostic view that Jesus means "the father of the devil" is grotesque. Jesus does not, of course, here deny that the Jews, like all men, are children of God the Creator, like Paul's offspring of God for all men in Ac 17:28. What he denies to these Pharisees is that they are spiritual children of God who do his will. They do the lusts and will of the devil. The Baptist had denied this same spiritual fatherhood to the merely physical descendants of Abraham (Mt 3:9). He even called them "broods of vipers" as Jesus did later (Mt 12:34).

A murderer ( $\alpha v \theta \rho \omega \pi о к \tau о \nu о \varsigma)$. Old and rare word (Euripides) from $\alpha v \theta \rho \omega \pi \sigma \varsigma$, man, and $\kappa \tau \varepsilon \iota \nu \omega$, to kill. In N.T. only here and 1Jo 3:15. The Jews were seeking to kill Jesus and so like their father the devil.

Stood not in the truth ( $\varepsilon \nu \tau \eta \alpha \lambda \eta \theta \varepsilon ı \alpha$ ouk $\varepsilon \sigma \tau \eta \kappa \varepsilon v$ ). Since ouk, not ov, is genuine, the form of the verb is $\varepsilon \sigma \tau \varepsilon \kappa \varepsilon \nu$ the imperfect of the late present stem $\sigma \tau \eta \kappa \omega$ ( $\mathrm{Mr} 11: 25$ ) from the perfect active $\varepsilon \sigma \tau \eta \kappa \alpha$ (intransitive) of $\iota \sigma \tau \eta \mu$, to place.

No truth in him (ovк $\varepsilon \sigma \tau \iota \nu \alpha \lambda \eta \theta \varepsilon \iota \alpha \varepsilon \nu \alpha v \tau \omega)$. Inside him or outside (environment). The devil and truth have no contact.

When he speaketh a lie ( $о \tau \alpha v \lambda \alpha \lambda \eta \tau o \psi \varepsilon v \delta o \varsigma$ ). Indefinite temporal clause with o $\tau \alpha v$ and the present active subjunctive of $\lambda \alpha \lambda \varepsilon \omega$. But note the article $\tau 0$ : "Whenever he speaks the lie," as he is sure to do because it is his nature. Hence "he speaks out of his own" ( $\varepsilon \kappa \tau \omega \nu$ $\iota \delta \omega \nu \lambda \alpha \lambda \varepsilon$ ) like a fountain bubbling up (cf. Mt 12:34).

For he is a liar (o $\psi \varepsilon \varepsilon v \sigma \tau \eta \varsigma ~ \varepsilon \sigma \tau \iota v$ ). Old word for the agent in a conscious falsehood ( $\psi \varepsilon \cup \delta$ oc). See 1Jo 1:10; Ro 3:4. Common word in John because of the emphasis on $\alpha \lambda \eta \theta \varepsilon ı \alpha$ (truth).

And the father thereof ( $\kappa \alpha$ о $\pi \alpha \tau \eta \rho$ avtov). Either the father of the lie or of the liar, both of which are true as already shown by Jesus.

Autou in the genitive can be either neuter or masculine. Westcott takes it thus, "because he is a liar and his father (the devil) is a liar," making "one," not the devil, the subject of "whenever he speaks," a very doubtful expression.

John 8:45
Because I speak the truth ( $\varepsilon \gamma \omega \delta \varepsilon$ o $\tau \eta \eta \sim \lambda \eta \theta \varepsilon \iota \alpha \nu \lambda \varepsilon \gamma \omega$ ). Proleptic emphatic position of $\varepsilon \gamma \omega$. "Truth is uncongenial to them" (Bernard). See 3:19 for their picture.

John 8:46
Which of you convicteth me of sin? (Tı̧ $\varepsilon \xi \nu \mu \omega v \varepsilon \lambda \varepsilon \gamma \chi \varepsilon \mu \varepsilon \pi \varepsilon \rho$ a $\mu \alpha \rho \iota \tau \alpha \sigma ;$ ). See on 3:20; 16:8 (the work of the Holy Spirit) for $\varepsilon \lambda \varepsilon \gamma \chi \omega$ for charge and proof. The use of $\alpha \mu \alpha \rho \tau \iota \alpha$ as in 1:29 means $\sin$ in general, not particular sins. The rhetorical question which receives no answer involves sinlessness (Heb 4:15) without specifically saying so. Bernard suggests that Jesus paused after this pungent question before going on.

Why do ye not believe me? ( $\Delta \downarrow \alpha \tau \nu \mu \varepsilon \varsigma$ ov $\pi \iota \sigma \tau \varepsilon \cup \varepsilon \tau \varepsilon \mu \circ \prime$ ). This question drives home the irrationality of their hostility to Jesus. It was based on prejudice and predilection.

John 8:47
He that is of God (o $\omega v \varepsilon \kappa$ тov $\theta \varepsilon o v$ ). See this use of $\varepsilon \kappa$ in 3:31f. "Their not listening proved that they were not of God" (Dods). They were of the earth and the devil, not of God.

John 8:48
Thou art a Samaritan and hast a demon ( $\Sigma \alpha \mu \alpha \rho \varepsilon ı \tau \eta \varsigma \varepsilon \sigma v \kappa \alpha \delta \alpha \mu \rho v i o v \varepsilon \chi \varepsilon ı \varsigma)$. On the spur of the moment in their rage and fury they can think of no meaner things to say. They know, of course, that Jesus was not a Samaritan, but he had acted like a Samaritan in challenging their peculiar spiritual privileges (4:9,39). The charge of having a demon was an old one by the Pharisees (Mt 12:24) and it is repeated later (Joh 10:20).

John 8:49
I have not a demon ( $\varepsilon \gamma \omega$ סaupoviov ouk $\varepsilon \chi \omega$ ). This Jesus says calmly, passing by the reference to the Samaritans as beneath notice.

My Father ( $\tau 0 v \pi \alpha \tau \varepsilon \rho \alpha \mu \circ v$ ). As in 2:16. He is not mad in claiming to honour God (cf. 7:18). They were insulting the Father in insulting him (cf. 5:23). On $\alpha \tau \mu \alpha \zeta \omega$ ( $\alpha$ privative and $\tau \mu \mu \omega$, to dishonour) see Lu 20:11 .

John 8:50
But I seek not mine own glory ( $\varepsilon \gamma \omega \delta \varepsilon$ ov $\zeta \eta \tau \omega \tau \eta v \delta o \xi \alpha v \mu o v)$. As they did not seek the glory of God (5:44; 8:4).

And judgeth ( $\kappa \alpha \kappa \rho \iota \omega v$ ). The Father judges between you and me, though the Son is the Judge of mankind ( $5: 22$ ). "It is only the $\delta o \xi a$ (glory) that comes from God that is worth having" (Bernard).

John 8:51
If a man keep my word ( $\varepsilon \alpha v \tau \iota \varsigma \tau o v \varepsilon \mu \circ v \lambda o \gamma o v \tau \eta \rho \eta \sigma \eta$ ). Condition of third class with $\varepsilon \alpha v$ and constative aorist active subjunctive of $\tau \eta \rho \varepsilon \omega$. Repeated in verse 52 . See verse 43 about hearing the word of Christ. Common phrase in John (8:51,52,55; 14:23,24; 15:20; 17:6; 1Jo 2:5 ). Probably the same idea as keeping the commands of Christ ( 14:21).

He shall never see death ( $\theta a v a \tau o v$ ov $\mu \eta \theta \varepsilon \omega \rho \eta \sigma \eta \varepsilon \iota \varsigma \tau<\nu \alpha \iota v \alpha$ ). Spiritual death, of course. Strong double negative ov $\mu \eta$ with first aorist active subjunctive of $\theta \varepsilon \omega \rho \varepsilon \omega$. The phrase "see death" is a Hebraism (Ps 89:48) and occurs with $\delta \varepsilon \varepsilon \imath$ (see) in Lu 2:26; Heb 11:5 . No essential difference meant between o $\rho a \omega$ and $\theta \varepsilon \omega \rho \varepsilon \omega$. See Joh 14:23 for the blessed fellowship the Father and the Son have with the one who keeps Christ's word.

John 8:52
Now we know ( $\nu v \nu \varepsilon \gamma \nu \omega \kappa \alpha \mu \varepsilon \nu$ ). Perfect active indicative of $\gamma \iota \nu \omega \sigma \kappa \omega$, state of completion, "Now since such talk we have come to certain knowledge that thou hast a demon" (verse 48).

Is dead ( $\alpha \pi \varepsilon \theta \alpha v \varepsilon v$ ). Second aorist active indicative of $\alpha \pi \sigma \theta v \eta \sigma \kappa \omega$. "Abraham died."
And thou sayest ( $\kappa \alpha \sigma v \lambda \varepsilon \gamma \varepsilon \iota \varsigma)$. Adversative use of $\kappa \alpha$, "and yet." Emphatic position of $\sigma v$ (thou). Same condition quoted as in verse 51.
 negative with subjunctive as in verse 51 , but $\gamma \varepsilon v \sigma \eta \tau \alpha$ (first aorist middle subjunctive of $\gamma \varepsilon v \omega$ with genitive case $\theta a v a \tau o v$ (death). Another Hebraism for dying like $\theta \varepsilon \omega \rho \eta \sigma \eta$ (see) in verse 51. Used in Heb 2:9 of the death of Jesus and in Synoptics (Mt 16:28; Mr 9:1; Lu 9:27). It occurs in the Talmud, but not in the O.T. The Pharisees thus did not misquote Jesus, though they misunderstood him.

John 8:53
Art thou greater than our father Abraham? ( $\mathrm{M} \eta \sigma v \mu \varepsilon \iota \zeta \omega \nu \varepsilon$ тov $\pi \alpha \tau \rho \circ \varsigma \eta \mu \omega \nu$ $A \beta \rho a \alpha \mu ;$ ). Negative answer expected by $\mu \eta$ with ablative case of comparison in $\pi \alpha \tau \rho \sigma \varsigma$ after $\mu \varepsilon \iota \zeta \omega \nu$. The question was designed to put Jesus in a difficult position, for Abraham and the prophets all "died." They do not see that Jesus uses death in a different sense.

Whom makest thou thyself? ( $\tau \imath \alpha \sigma \varepsilon \alpha v \tau o v \pi o \iota \varepsilon \iota \sigma$ ). $\Sigma \varepsilon \alpha v \tau o v$ is predicate accusative with $\pi$ тьєء. They suspect that Jesus is guilty of blasphemy as they charged in 5:18 in making himself equal with God. Later they will make it specifically $(10: 33 ; 19: 7)$. They set a trap for Jesus for this purpose.

John 8:54
If I glorify myself ( $\varepsilon \alpha \nu \varepsilon \gamma \omega \delta o \xi \alpha \sigma \omega \varepsilon \mu \alpha v \tau o v$ ). Third-class condition with $\varepsilon \alpha v$ and first aorist active subjunctive (or future active indicative) of $\delta o \xi \alpha \zeta \omega$.

It is my Father that glorifieth me ( $\varepsilon \sigma \tau \iota v$ o $\pi \alpha \tau \eta \rho \mu \circ v$ o $\delta о \xi \alpha \zeta \omega v \mu \varepsilon$ ). The position and accent of $\varepsilon \sigma \tau i v$ mean: "Actually my Father is the one," etc.

Of whom ye say ( $\mathrm{o} v \nu \mu \varepsilon ı \varsigma \varepsilon \gamma \varepsilon \tau \varepsilon$ ). The accusative of the person (ov) with $\lambda \varepsilon \gamma \varepsilon \tau \varepsilon$ is regular (cf. 10:36).

Your God $(\theta \varepsilon o \varsigma v \mu \omega v)$. So Aleph B D and apparently correct, though A C L W Delta Theta have $\eta \mu \omega \nu$ (our God). The o $\tau$ can be taken as recitative (direct quotation, $\eta \mu \omega v$, our) or declarative (indirect, that, and so $v \mu \omega v$ ). The Jews claimed God as their peculiar national God as they had said in 41 . So Jesus turns this confession and claim against them.

John 8:55
And ye have not known him (ка оик $\varepsilon \gamma v \omega \kappa \alpha \tau \varepsilon$ autov). Adversative use again of $\kappa \alpha="$ and yet." Perfect active indicative of $\gamma \iota \omega \omega \sigma \kappa \omega$, the verb for experiential knowledge. This was true of the кобноऽ ( $1: 10 ; 17: 25$ ) and of the hostile Jews ( $16: 3$ ). Jesus prays that the world may know ( 17:23) and the handful of disciples had come to know ( $17: 25$ ).

But I know him ( $\varepsilon \gamma \omega \delta \varepsilon$ oi $\delta \alpha \alpha \cup \tau o v$ ). Equipped by eternal fellowship to reveal the Father ( 1:1-18). This peculiar intimate knowledge Jesus had already claimed ( 7:29). Jesus used ot $\delta \alpha(8: 19 ; 15: 21)$ or $\gamma เ \nu \omega \sigma \kappa \omega(17: 23,25)$ for the knowledge of the Father. No undue distinction can be drawn here.

And if I should say ( $\kappa a v \varepsilon \varepsilon \pi \omega)$. Third-class condition (concession), "even if I say," with ка عav (каv) and second aorist active subjunctive. "Suppose I say."

I shall be like you a liar ( $\varepsilon \sigma \sigma \mu \alpha$ о $\mu о \circ \varsigma \varsigma \nu \nu \nu \psi \varepsilon v \sigma \tau \eta \varsigma)$. Apodosis of the condition. Ho $\quad$ oos (like) is followed by the associative-instrumental case $v \mu \imath v$. The word $\psi \varepsilon v \sigma \tau \eta \varsigma($ liar), in spite of the statement that they are the children of the devil, the father of lying ( 8:44), comes with a sudden jolt because it is a direct charge. This word liar is not considered polite today in public speech when hurled at definite individuals. There is a rather free use of the word in 1Jo 2:4,22; 4:20; 5:10. It is not hard to imagine the quick anger of these Pharisees.

## John 8:56

Rejoiced ( $\left.\eta \gamma \alpha \lambda \lambda_{1} \alpha \sigma \alpha \tau o\right)$. First aorist middle indicative of $\alpha \gamma \alpha \lambda \lambda_{1} \propto \circ \mu \alpha$, a word of Hellenistic coinage from $\alpha \gamma \alpha \lambda \lambda o \mu \alpha$, to rejoice.

To see (ıva $\llcorner\delta \eta$ ). Sub-final use of $t v \alpha$ and second aorist active subjunctive of opaw. This joy of Abraham is referred to in Heb 11:13 (saluting, $\alpha \sigma \pi \alpha \sigma \alpha \mu \varepsilon v o$, the promises from afar). There was a Jewish tradition that Abraham saw the whole history of his descendants in the vision of Ge 15:6f. , but that is not necessary here. He did look for and welcome the Messianic time, "my day" ( $\tau \eta v \eta \mu \varepsilon \rho a v \tau \eta \nu \varepsilon \mu \eta \nu)$. "He saw it, and was glad" ( $\varepsilon ו \delta \varepsilon v \kappa \alpha \varepsilon \chi \alpha \rho \eta$ ). Second aorist active indicative of opa $\omega$ and second aorist passive indicative of $\chi \alpha \iota \rho \omega$. Ye see it and are angry!

John 8:57

Thou art not yet fifty years old ( $\pi \varepsilon v \tau \eta \kappa o v \tau \alpha \varepsilon \tau$ оט $\pi \omega$ عхعıৎ). Literally, "Thou hast not yet fifty years." Not meaning that Jesus was near that age at all. It was the crisis of completed manhood ( $\mathrm{Nu} 4: 3$ ) and a round number. Jesus was about thirty to thirty-three.

And hast thou seen Abraham? (Ка A $\beta \rho \alpha \alpha \mu \varepsilon \omega \rho \alpha к \alpha \sigma$;). So A C D and B W Theta have $\varepsilon \omega \rho \alpha \kappa \varepsilon \varsigma$, both second person singular of the perfect active indicative of opa $\omega$. But Aleph, Sin-syr., Coptic versions (accepted by Bernard) have ка A $\beta \rho \alpha \alpha \mu \varepsilon \omega \rho \alpha \kappa \varepsilon ~ \sigma \varepsilon$ ? "Has Abraam seen thee?" Either makes sense here.

John 8:58
Before Abraham was ( $\pi \rho \imath v A \beta \rho \alpha \alpha \mu \gamma \varepsilon v \varepsilon \sigma \theta \alpha$ ). Usual idiom with $\pi \rho \imath v$ in positive sentence with infinitive (second aorist middle of $\gamma เ v o \mu \alpha$ ) and the accusative of general reference, "before coming as to Abraham," "before Abraham came into existence or was born."

I am ( $\varepsilon \gamma \omega \varepsilon \mu \mu)$. Undoubtedly here Jesus claims eternal existence with the absolute phrase used of God. The contrast between $\gamma \varepsilon v \varepsilon \sigma \theta a$ (entrance into existence of Abraham) and $\varepsilon \mu \mu$ (timeless being) is complete. See the same contrast between $\varepsilon v$ in 1:1 and $\varepsilon \gamma \varepsilon v \varepsilon \tau o$ in 1:14. See the contrast also in Ps 90:2 between God ( $\varepsilon$, art) and the mountains ( $\gamma \varepsilon v \eta \theta \eta v \alpha$ ). See the same use of $\varepsilon \mu$ in Joh 6:20; 9:9; 8:24,28; 18:6.

John 8:59
They took up stones therefore ( $\eta \rho \alpha v$ ovv $\left.\lambda_{\wedge} \theta o v \varsigma\right)$. First aorist active indicative of $\alpha \iota \rho \omega$, inferential use of ouv. The time for argument had past.

To cast at him ( $\imath v \alpha \beta \alpha \lambda \omega \sigma เ v \varepsilon \pi^{\prime} \alpha v \tau o v$ ). Final clause with $t v \alpha$ and the second aorist active subjunctive of $\beta \alpha \lambda \lambda \omega$. Vivid picture of a mob ready to kill Jesus, already beginning to do so.

Hid himself ( $\varepsilon \kappa \rho \cup \beta \eta)$. Second aorist passive indicative of $\kappa \rho \cup \pi \tau \omega$. He was hidden. No Docetic vanishing, but quietly and boldly Jesus went out of the temple. His hour had not yet come. Once again three months later the Pharisees will try to kill him, but he will pass out of their hands ( $10: 39$ ).

## John 9

John 9:1
As he passed by ( $\pi \alpha \rho \alpha \gamma \omega v$ ). Present active participle of $\pi \alpha \rho \alpha \gamma \omega$, old verb to go along, by, or past (Mt 20:30 ). Only example in this Gospel, but in 1Jo 2:8,17. The day was after the stirring scenes in chapter 8, but not at the feast of dedication as Westcott argues. That comes three months later ( $10: 22$ ).

From his birth ( $\varepsilon \kappa \quad \gamma \varepsilon \varepsilon \varepsilon \tau \eta \varsigma)$. Ablative case with $\varepsilon \kappa$ of old word from $\gamma \varepsilon v \omega, \gamma เ \nu \circ \mu \alpha$. Here alone in N.T., but the phrase $\tau \cup \varphi \lambda$ оs $\varepsilon \kappa ~ \gamma \varepsilon v \varepsilon \tau \eta \varsigma$ is common in Greek writers. Probably a well-known character with his stand as a beggar (verse 5).

John 9:2
Who did sin? ( $\tau \iota \varsigma ~ \eta \mu \alpha \rho \tau \varepsilon v ;$ ). Second aorist active indicative of $\alpha \mu \alpha \rho \tau \alpha v \omega$. See Ac 3:2; 14:8 for two examples of lameness from birth. Blindness is common in the Orient and Jesus healed many cases (cf. Mr 8:23; 10:46) and mentions this fact as one of the marks of the Messiah in the message to the Baptist (Mt 11:5). This is the only example of congenital blindness healed. It is not clear that the disciples expected Jesus to heal this case. They are puzzled by the Jewish notion that sickness was a penalty for sin. The Book of Job had shown that this was not always the case and Jesus shows it also (Lu 13:1-5). If this man was guilty, it was due to prenatal sin on his part, a curious notion surely. The other alternative charged it upon his parents. That is sometimes true (Ex 20:5 , etc.), but by no means always. The rabbinical casuists loved to split hairs on this problem. Ezekiel (Eze 18:20) says: "The soul that sinneth it shall die" (individual responsibility for sin committed). There is something in heredity, but not everything.

That he should be born blind (iva тטৎ $\wedge$ оc $\gamma \varepsilon v v \eta \theta \eta$ ). Probably consecutive (or sub-final) use of tva with first aorist passive subjunctive of $\gamma \varepsilon v v a \omega$.

John 9:3
But that the works of God should be made manifest in him ( $\alpha \lambda \lambda^{\prime} \tau v \alpha \varphi \alpha v \varepsilon \rho \omega \theta \eta \tau \alpha$ $\varepsilon \rho \gamma \alpha$ тov $\theta \varepsilon o v \varepsilon v \alpha v \tau \omega$ ). Jesus denies both alternatives, and puts God's purpose ( $\alpha \lambda \lambda^{\prime}$ 'va with first aorist subjunctive of $\varphi$ avepow) as the true solution. It is sometimes true that disease is the result of personal sin as in the man in 5:14 and parents can hand on the effects of sin to the third and fourth generations, but there are cases free from blame like this. There is comfort for many sufferers in the words of Jesus here.

John 9:4
We must work the works of him that sent me ( $\eta \mu \alpha \varsigma \delta \varepsilon \varepsilon \rho \gamma \alpha \zeta \varepsilon \sigma \theta a$ $\tau \alpha$ $\varepsilon \rho \gamma \alpha$ тоט $\pi \varepsilon \mu \psi \alpha v \tau \sigma \varsigma \mu \varepsilon)$. This is undoubtedly the correct text (supported by the Neutral and Western classes) and not $\varepsilon \mu \varepsilon$ (I) and $\mu \varepsilon$ (me) of the Syrian class nor $\eta \mu \alpha \varsigma$ (we) and $\eta \mu \alpha \varsigma$ (us) of the Alexandrian class. Jesus associates us with him in the task committed to him by the Father.

Bernard argues vigorously, but vainly, for $\varepsilon \mu \varepsilon$ me. We are not able to fathom the depth of the necessity ( $\delta \varepsilon$ ) here involved in each life as in this poor blind man and in each of us.

While it is day ( $\varepsilon \omega \varsigma \eta \mu \varepsilon \rho \alpha \varepsilon \sigma \tau \iota v$ ). This clause gives the note of urgency upon us all.
The night cometh ( $\varepsilon \rho \chi \varepsilon \tau \alpha \sim v \xi$ ). "Night is coming on," and rapidly. Night was coming for Jesus ( 7:33) and for each of us. Cf. 11:9; 12:35. Even electric lights do not turn night into day. Hz $\varsigma$ ¢ with the present indicative (21:22f. ) means "while," not until as in 13:38.

John 9:5
When I am in the world (o $\circ \alpha v \varepsilon \nu \tau \omega \kappa \sigma \sigma \mu \omega \omega$ ). Indefinite relative clause with o o $\alpha v$ and present active subjunctive $\omega$, "whenever I am in the world." The Latin Vulgate renders here otav by quamdiu so long as or while as if it were $\varepsilon \omega c$. But clearly Jesus here refers to the historic Incarnation ( $17: 11$ ) and to any previous visitations in the time of the patriarchs, prophets, etc. Jesus as God's Son is always the Light of the World (1:4,10; 8:12 ), but here the reference is limited to his manifestation "in the world."

I am the light of the world ( $\varphi \omega \varsigma \varepsilon \mu$ tov коб $\mu \circ v$ ). The absence of the definite article ( $\tau 0 \varphi \omega \varsigma$ in 8:12) is to be noted (Westcott). Literally, "I am light to the world, whenever I am in the world." "The display of the character varies with the occasion" (Westcott).

John 9:6
He spat on the ground ( $\varepsilon \pi \tau v \sigma \varepsilon v \chi \alpha \mu \alpha)$. First aorist active indicative of the old verb $\pi \tau v \omega$ for which see Mr 7:33. X $\alpha \mu \alpha$ is an old adverb either in the dative or locative (sense suits locative), in N.T. only here and Joh 18:6. Jesus was not asked to cure this man. The curative effects of saliva are held in many places. The Jews held saliva efficacious for eyetrouble, but it was forbidden on the Sabbath. "That Jesus supposed some virtue lay in the application of the clay is contradicted by the fact that in other cases of blindness He did not use it" (Dods). Cf. Mr 8:23. Why he here accommodated himself to current belief we do not know unless it was to encourage the man to believe.

He made clay ( $\varepsilon \pi \circ \circ \eta \sigma \varepsilon v \pi \eta \lambda o v$ ). Only use of $\pi \eta \lambda$ oc, old word for clay, in N.T. in this chapter and Ro 9:21. The kneading of the clay and spittle added another offence against the Sabbath rules of the rabbis.

Anointed his eyes with the clay ( $\varepsilon \pi \varepsilon \chi \rho \circ \sigma \varepsilon v$ avtov $\tau \circ v \pi \eta \lambda o v \varepsilon \pi \tau \tau \varsigma \varsigma \rho \theta \beta \lambda \mu \circ \cup \varsigma)$. First aorist active indicative of $\varepsilon \pi \iota \chi \rho \iota \omega$, old verb, to spread on, anoint, here only and verse 11 in N.T. "He spread the clay upon his eyes." B C read $\varepsilon \pi \varepsilon Ө \eta \kappa \varepsilon v$ (first aorist active indicative of $\varepsilon \pi \iota \tau \bullet \theta \eta \mu$, to put on).

John 9:7
Wash ( $v i \psi \alpha)$. First aorist middle imperative second person singular of $v i \pi \tau \omega$, later form of $v i \zeta \omega$, to wash, especially parts of the body. Certainly bathing the eyes is good for eye trouble, and yet we are not to infer that the cure was due to the use of the clay or to the washing.

In the pool of Siloam ( $\varepsilon \varsigma \varsigma \tau \eta v \kappa о \lambda \nu \mu \beta \eta \theta \rho \alpha \nu \tau o v \Sigma i \lambda \omega \alpha \mu$ ). The word $\kappa о \lambda \nu \mu \beta \eta \theta \rho \alpha$ (from ко $\lambda \nu \mu \beta \alpha \omega$, to swim) is a common word for swimming-pool, in N.T. only here and 5:2,7 . The name Siloam is Hebrew (Isa 8:6) and means "sent" ( $\alpha \pi \varepsilon \sigma \tau \alpha \lambda \mu \varepsilon v o \varsigma$, perfect passive participle of $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega)$. It was situated south of the temple area and was apparently connected by a subterranean tunnel with the Virgin's Well (5:2) according to Bernard. The water was conducted artificially to the pool of Siloam.

Washed ( $\varepsilon v ı \alpha a \tau o)$. First aorist direct middle (cf. $v \nu \psi \alpha)$, apparently bathing and not merely washing his eyes.

Came seeing ( $\eta \lambda \theta \varepsilon v \beta \lambda \varepsilon \pi \omega v$ ). Jesus had healed him. He was tested by the demand to bathe his eyes.

John 9:8
Neighbours ( $\gamma \varepsilon \iota \tau 0 v \varepsilon \varsigma$ ). From $\gamma \eta$ (land), of the same land, old word. See Lu 14:2.
Saw him ( $\theta \varepsilon \omega \rho \circ 0 v \tau \varepsilon \varsigma)$. Present active participle of $\theta \varepsilon \omega \rho \varepsilon \omega$, who used to observe him.
Aforetime ( $\tau 0 \pi \rho о \tau \varepsilon \rho \circ v$ ). Adverbial accusative, "the former time," formerly.
That he was a beggar (o $\tau \pi \rho \circ \sigma \alpha \iota \tau \eta \varsigma \eta v$ ). See 4:19; 12:19 for declarative ot after $\theta \varepsilon \omega \rho \varepsilon \omega$. But it is entirely possible that o $\tau$ here is "because" (Westcott). Прoбautๆร is a late word for beggar, in N.T. only here and Mr 10:46. It is from $\pi \rho \circ \sigma \alpha \iota \tau \varepsilon \omega$, to ask in addition (see $\pi \rho o \sigma a i t \omega v$ below), a thing that beggars know how to do.

Is not this he that sat and begged? ( $\mathrm{Ov} \mathrm{\chi}$ оитоц عбтıv о каӨпицвос ка $\pi \rho о \sigma \alpha ı \tau \omega v$;). Не had his regular place and was a familiar figure. But now his eyes are wide open.

John 9:9
Nay but he is like him (Ov $1, \alpha \lambda \lambda \alpha$ ouoos $\alpha \cup \tau \omega$ ع $\sigma \tau \iota v$ ). Vigorous denial (ovx) and mere similarity suggested. Associative instrumental case avto after ouoos. The crowd is divided.

He said ( $\varepsilon \kappa \varepsilon ı v o \varsigma ~ \varepsilon \lambda \varepsilon \gamma \varepsilon v$ ). Emphatic demonstrative (as in 11,12,25,36 ), "That one spake up." He knew.

John 9:10
How then were thine eyes opened? ( $\Pi \omega \varsigma$ ouv $\eta v \varepsilon \omega \mathrm{c} \chi$ Ө $\eta \sigma \alpha v$ бov o o $\varphi \theta \alpha \lambda \mu \circ ;$ ). Natural and logical (ovv) question. First aorist passive indicative (triple augment) of $\alpha v o r \gamma \omega$. These neighbours admit the fact and want the manner ("how") of the cure made clear.

John 9:11
The man that is called Jesus ( $o \alpha v \theta \rho \omega \pi \sigma \varsigma$ о $\lambda \varepsilon \gamma \circ \mu \varepsilon v o \varsigma$ I $\eta \sigma o v \varsigma)$ ). He does not yet know Jesus as the Messiah the Son of God (9:36).

I received sight ( $\alpha v \varepsilon \beta \lambda \varepsilon \psi \alpha$ ). First aorist active indicative of $\alpha v \alpha \beta \lambda \varepsilon \pi \omega$, old verb to see again, to recover sight, not strictly true of this man who had never seen. He got back sight that he had never had. Originally the verb means to look up (Mt 14:19).

John 9:12
Where is he? (Пои عбтıv єкعıvoб;). The very question of 7:11.

John 9:13
They bring him ( $\alpha \gamma 0 v \sigma ı v$ avtov). Vivid dramatic present active of $\alpha \gamma \omega$. These neighbours bring him.

To the Pharisees ( $\pi \rho \circ \varsigma$ tou¢ Фарıбаıouc). The accepted professional teachers who posed as knowing everything. The scribes were usually Pharisees.

Him that aforetime was blind ( $\tau о v \pi о \tau \varepsilon \tau \cup \varphi \lambda o v)$. Simply, "the once blind man."
John 9:14
Now it was the sabbath ( $\eta v \delta \varepsilon \sigma \alpha \beta \beta \alpha \tau o v)$. Literally, "Now it was a sabbath" (no article). To the Pharisees this fact was a far more important matter than whether or how the thing was done. See Volumes I and II for discussions of the minute Sabbath regulations of the rabbis.

John 9:15
Again ( $\pi \alpha \lambda \iota v$ ). Besides the questioning of the neighbours (verses 8,9).
Therefore (ouv). Since he has been brought to the Pharisees who must make a show of wisdom.

Also asked him ( $\eta \rho \omega \tau \omega \nu$ av $\quad \mathrm{\nu} \kappa \alpha$ ). Inchoative imperfect active of $\varepsilon \rho \omega \tau \alpha \omega$, "began also to question him."

How he received his sight ( $\pi \omega \varsigma \alpha v \varepsilon \beta \lambda \varepsilon \psi \varepsilon v$ ). No denial as yet of the fact, only interest in the "how."

He put ( $\varepsilon \pi \varepsilon \theta \eta \kappa \varepsilon v)$. Genuine here, but see verse 6.
And lo see ( $\kappa \alpha \beta \lambda \varepsilon \pi \omega$ ). That is the overwhelming fact.
John 9:16
Because he keepeth not the sabbath (oт тo $\sigma \alpha \beta \beta \alpha \tau o v$ ov $\tau \eta \rho \varepsilon$ ). This is reason (causal от) enough. He violates our rules about the Sabbath and therefore is a Sabbath-breaker as charged when here before ( $5: 10,16,18$ ). Hence he is not "from God" ( $\pi \alpha \rho \alpha$ $\theta$ عov). So some.

How can a man that is a sinner do such signs? ( $\Pi \omega \varsigma \delta v v a \tau \alpha \alpha v \theta \rho \omega \pi \sigma \varsigma \alpha \mu \alpha \rho \tau \omega \lambda$ о
 of the Sanhedrin, long ago ( 3:2). It was a conundrum for the Pharisees. No wonder there was "a division" ( $\sigma \chi \iota \mu \alpha$, schism, split, from $\sigma \chi\llcorner\zeta)$ as in 7:43; 10:19.

John 9:17
Unto the blind man again ( $\tau \omega \tau \nu \varphi \lambda \omega \pi \alpha \lambda \iota \nu$ ). The doctors disagree and they ask the patient whose story they had already heard (verse 15).

In that he opened thine eyes ( $о \tau \eta \nu \varepsilon \omega \xi \xi \varepsilon \nu \sigma o v \tau o v \varsigma ~ o \varphi \theta \alpha \lambda \mu o v \varsigma)$. Causal use of o $\tau$ and triple augment in the first aorist active indicative of $\alpha v o t \gamma \omega$. They offer the excuse that the man's experience particularly qualified him to explain the "how," overlooking the fact he had already told his story and also trying to conceal their own hopeless division of opinion.

He is a prophet ( $\pi \rho \circ \varphi \eta \tau \eta \varsigma \varepsilon \sigma \tau \iota v)$. The man will go that far anyhow.
John 9:18

The Jews (o Iovסaıo). Probably the incredulous and hostile section of the Pharisees in verse 16 (cf. 5:10).

Did not believe (ouk emıбтعvoav). The facts told by the man, "that he had been blind and had received his sight" (от $\eta \nu \tau \cup \varphi \lambda о \varsigma \kappa \alpha \alpha v \varepsilon \beta \lambda \varepsilon \psi \varepsilon v$ ), conflicted with their theological views of God and the Sabbath. So they refused belief "until they called the parents" ( $\varepsilon \omega \varsigma$ otov $\varepsilon \varphi \omega v \eta \sigma \alpha \nu$ тou¢ $\gamma \circ v \varepsilon \iota \varsigma)$. Usual construction of $\varepsilon \omega \varsigma$ otov ( $=$ until which time, like $\varepsilon \omega \varsigma$ alone) with aorist active indicative of $\varphi \omega v \varepsilon \omega$, old verb from $\varphi \omega v \eta$ (voice, sound). They called out loud for his parents to throw light on this grave problem to cover up their own stupidity.

John 9:19
Is this your son who ye say was born blind? how doth he now see? (Hovtoc eбтıv o
 with three questions in one in order to confuse the parents if possible and give the hostile Pharisees a handle.

John 9:20
We know that this is our son, and that he was born blind ( $\mathrm{O} \delta \alpha \mu \varepsilon v$ ot outoc eбтıv o
 cut the ground from under the disbelief of these Pharisees as to the fact of the cure (verse 18). So these Pharisees made a failure here.

John 9:21
But how he now seeth we know not ( $\pi \omega \varsigma \delta \varepsilon v v v \beta \lambda \varepsilon \pi \varepsilon$ ovk oь $\delta \alpha \mu \varepsilon v$ ). Concerning the third question they profess ignorance both as to the "how" ( $\pi \omega \varsigma$ ) and the "who" ( $\tau \iota)$ ).

Opened ( $\eta v o l \xi \varepsilon v$ ). First aorist active indicative with single augment of $\alpha v o l \gamma \omega$, same form as $\eta \nu \varepsilon \omega \iota \xi \varepsilon v$ (triple augment) in verse 17. They were not witnesses of the cure and had the story only from the son as the Pharisees had.

He is of age ( $\eta \lambda \iota \kappa ı a v \varepsilon \chi \varepsilon$ ). "He has maturity of age." He is an adult. A regular classical phrase in Plato, etc. The parents were wholly right and within their rights.

John 9:22
Because they feared the Jews (oт عழоßouvтo touc Iovסaıou¢). Imperfect middle, a continuing fear and not without reason. See already the whispers about Jesus because of fear of the Jews (7:13).

Had agreed already ( $\eta \delta \eta \sigma \cup v \varepsilon \tau \varepsilon \theta \varepsilon เ v \tau o$ ). Past perfect middle of $\sigma u v \tau 1 \theta \eta \mu$, to put together, to form a compact (7:32,47-49).

If any man should confess him to be Christ ( $\varepsilon a v \tau \iota \varsigma ~ \alpha u \tau o v ~ о \mu о \lambda о ү \eta \sigma \eta ~ X \rho ı \sigma \tau o v) . ~$ Condition of third class with $\varepsilon \alpha v$ and first aorist active subjunctive of opo入o $\gamma \varepsilon \omega$ and predicate accusative Xpıбтov. Jesus had made confession of himself before men the test of discipleship and denial the disproof (Mt 10:32; Lu 12:8). We know that many of the rulers nominally believed on Jesus ( 12:42) and yet "did not confess him because of the Pharisees" ( $\alpha \lambda \lambda \alpha \delta_{ı} \alpha$ tous Фapıбaıovs oux $\omega \mu$ о入oүouv), for the very reason given here, "that they might not be
put out of the synagogue" ( $\operatorname{v\alpha } \mu \eta \alpha \pi о \sigma v v \alpha \gamma \omega \gamma 0 \gamma \varepsilon \nu \omega \nu \tau \alpha)$. Small wonder then that here the parents cowered a bit.

That he should be put out of the synagogue ( $1 v \alpha \alpha \pi о \sigma v v a \gamma \omega \gamma \circ \varsigma \gamma \varepsilon v \eta \tau \alpha$ ). Sub-final
 $\sigma u v a \gamma \omega \gamma \eta)$ is found in N.T. only here and 12:42; 16:2 . A purely Jewish word naturally. There were three kinds of excommunication (for thirty days, for thirty more, indefinitely).

## John 9:23

Therefore ( $\delta \iota \alpha$ тоито). "For this reason." Reason enough for due caution.
John 9:24
A second time ( $\varepsilon \kappa \delta \varepsilon v \tau \varepsilon \rho \circ v)$. He had given the Pharisees the facts the first time ( 9:15). It was really the third time (see $\pi \alpha \lambda ı v$ in $9: 17$ ). Now it was like a joke unless the Pharisees meant to imply that his previous story was untrue.

Give glory to God ( $\delta o \varsigma \delta o \xi \alpha \nu \tau \omega \theta \varepsilon \omega$ ). Second aorist active imperative of $\delta \iota \delta \omega \mu$ (cf. $\sigma \chi \varepsilon \sigma, \varepsilon \varsigma)$. This phrase does not mean gratitude to God as in Lu 17:18. It is rather an adjuration to speak the truth (Jos 7:19; 1Sa 6:5) as if he had not done it before. Augustine says: "Quid est Da gloriam Deo? Nega quod accepisti." Is a sinner ( $\alpha \mu \alpha \rho \tau \omega \lambda$ 人 $\varepsilon$ عбтıv). They can no longer deny the fact of the cure since the testimony of the parents (9:19) and now wish the man to admit that he was lying in saying that Jesus healed him. He must accept their ecclesiastical authority as proving that Jesus had nothing to do with the cure since Jesus is a sinner. They wish to decide the fact by logic and authority like all persecutors through the ages. Recall the Pharisaic distinction between $\delta$ ıкаюо (righteous) and $\alpha \mu \alpha \rho \tau \omega \lambda$ ос (sinner).

John 9:25
One thing I know ( $\varepsilon v$ oi $\delta \alpha$ ). This man is keen and quick and refuses to fall into the trap set for him. He passes by their quibbling about Jesus being a "sinner" ( $\alpha \mu \alpha \rho \tau \omega \lambda$ oc) and clings to the one fact of his own experience.

Whereas I was blind, now I see ( $\tau \cup \varphi \lambda>\rho \omega \nu \alpha \rho \tau \beta \lambda \varepsilon \pi \omega$ ). Literally, "Being blind I now see." The present active participle $\omega v$ of $\varepsilon \mu$ by implication in contrast with $\alpha \rho \tau$ (just now, at this moment) points to previous and so past time. It must be borne in mind that the man did not at this stage know who Jesus was and so had not yet taken him as Saviour ( 9:36-38).

John 9:26
What did he do to thee? (T \& $\pi о \neq \sigma \varepsilon v \sigma o i ;$ ). Another cross-examination, now admitting that Jesus opened his eyes and wishing again ( $9: 15,17$ ) to know "how."

John 9:27
I told you even now ( $\varepsilon เ \pi o v \nu \mu \nu \nu \eta \delta \eta$ ). In verses $15,17,25$.
Would ye also become his disciples? ( $\mathrm{M} \eta \kappa \alpha$ v $\mu \varepsilon \varsigma ~ \theta \varepsilon \lambda \varepsilon \tau \varepsilon \alpha v \tau o v \mu \alpha \theta \eta \tau \alpha \gamma \varepsilon v \varepsilon \sigma \theta \alpha \iota$ ). Negative answer formally expected, but the keenest irony in this gibe. Clearly the healed man knew from the use of "also" ( $\kappa \alpha$ ) that Jesus had some "disciples" ( $\mu \alpha \theta \eta \tau \alpha$, predicate
nominative with the infinitive $\gamma \varepsilon v \varepsilon \sigma \theta \alpha$ ) and that the Pharisees knew that fact. "Do ye also (like the Galilean mob) wish, etc." See 7:45-52. It cut to the bone.

John 9:28
They reviled him ( $\varepsilon \lambda o t \delta o \rho \eta \sigma \alpha v \alpha v \tau o v$ ). First aorist active indicative of $\lambda o \iota \delta o \rho \varepsilon \omega$, old verb from $\lambda$ oıסopos (reviler, 1 Co 5:11 ), in N.T. only here, Ac 23:4; 1Co 4:12; 1Pe 2:23.

Thou art his disciple ( $\sigma \cup \mu \alpha \eta \tau \eta \varsigma \varepsilon \varepsilon \kappa \varepsilon เ v o v)$. Probably a fling in єкะıvov (of that fellow). He had called him a prophet ( $9: 17$ ) and became a joyful follower later ( 9:36-38).

But we are disciples of Moses ( $\eta \mu \varepsilon \varsigma \delta \varepsilon$ тov $M \omega v \sigma \varepsilon \omega \varsigma \varepsilon \sigma \mu \varepsilon \nu \mu \alpha \theta \eta \tau \alpha)$. This they said with proud scorn of the healed beggar. All orthodox rabbis so claimed.

John 9:29
We know that God hath spoken unto Moses ( $\eta \mu \varepsilon \iota \varsigma ~ o \iota \delta \alpha \mu \varepsilon v$ oт $M \omega v \sigma \varepsilon \lambda \varepsilon \lambda \alpha \lambda \eta \kappa \varepsilon v$ o $\theta \varepsilon o c)$. Perfect active indicative of $\lambda \alpha \lambda \varepsilon \omega$, so still on record. See Ex 33:11. For $\lambda \alpha \lambda \varepsilon \omega$ used of God speaking see Heb 1:1. They are proud to be disciples of Moses.

But as for this man, we do not know whence he is ( $\tau 0 \cup \tau 0 v ~ \delta \varepsilon ~ o u \kappa ~ o ו \delta \alpha \mu \varepsilon v ~ \pi o \theta \varepsilon v$ $\varepsilon \sigma \tau \iota v)$. "This fellow" they mean by "toutov" in emphatic position, we do not even know whence he is. Some of the people did ( 7:27), but in the higher sense none of the Jews knew ( 8:14). These Pharisees neither knew nor cared.

John 9:30
Why, herein is the marvel ( $\varepsilon v \tau \tau \nu \tau \omega \gamma \alpha \rho$ to $\theta \alpha v \mu \alpha \sigma \tau o v \varepsilon \sigma \tau \imath v$ ). This use of $\gamma \alpha \rho$ ( $\gamma \varepsilon+$ $\alpha \rho a$, accordingly indeed) to bring out an affirmation from the previous words is common enough. "Why in this very point is the wonder" ( $\theta a \cup \mu \alpha \sigma \tau o v$, old verbal adjective from $\theta a v \mu \alpha \zeta \omega$ as in Mt 21:42). The man is angry now and quick in his insight and reply. You confess your ignorance of whence he is, ye who know everything, "and yet (adversative use of $\kappa \alpha$ again) he opened my eyes" ( $\kappa \alpha \eta v o \iota \xi \varepsilon v \mu$ оv тovৎ $о \varphi \theta \alpha \lambda \mu о \nu \varsigma$ ). That stubborn fact stands.

John 9:31
God does not hear sinners (o $\theta \varepsilon о \varsigma ~ \alpha \mu \alpha \rho \tau \omega \lambda \omega \nu$ ouк $\alpha \kappa о v \varepsilon$ ). Note genitive case with akove. This was the argument of the Pharisees in 9:16. It is frequent in the O.T. (Job 27:9; Ps 66:18; Isa 1:15; $59: 2$, etc.). The conclusion is inevitable from this premise. Jesus is not а $\alpha \rho \tau \omega \lambda о$.

If any man be a worshipper of God ( $\varepsilon a v \tau \iota \varsigma \theta \varepsilon o \sigma \varepsilon \beta \eta \varsigma \eta$ ). Condition of third class with $\varepsilon \alpha v$ and present active subjunctive $\eta$. $\Theta \varepsilon \sigma \sigma \varepsilon \beta \eta \varsigma(\theta \varepsilon o \varsigma$, God, $\sigma \varepsilon \beta o \mu \alpha$, to worship) is an old compound adjective, here alone in the N.T.

And do his will (ка то $\theta \varepsilon \lambda \eta \mu \alpha$ $\alpha \cup \tau о \cup \pi о เ \varepsilon)$. Same condition with present active subjunctive of $\pi$ ot $\varepsilon \omega$, "keep on doing his will."

John 9:32

Since the world began ( $\varepsilon \kappa$ tov aı $\omega v \circ \varsigma)$. Literally, "from the age," "from of old." Elsewhere
 in the LXX.

Of a man born blind ( $\tau v \varphi \lambda o v ~ \gamma \varepsilon \gamma \varepsilon v \nu \eta \mu \varepsilon v o v$ ). Perfect passive participle of $\gamma \varepsilon v v \alpha \omega$. This is the chief point and the man will not let it be overlooked, almost rubs it in, in fact. It was congenital blindness.

John 9:33
If this man were not from God ( $\varepsilon \mu \eta \eta \nu$ ovtos $\pi \alpha \rho \alpha \theta \varepsilon o v)$. Negative condition of second class with imperfect indicative. Assuming that Jesus is not "from God" ( $\pi \alpha \rho \alpha$ Өrov)
 the second-class condition with imperfect indicative (double augment in $\eta \delta v v a \tau o)$ without $\alpha v$ as is usual in conditions of possibility, propriety, obligation (Robertson, Grammar, pp. $920,1014)$. The man has scored with terrific power in his use of Scripture and logic.

John 9:34
Thou wast altogether born in $\sin (\varepsilon v \alpha \mu \alpha \rho \tau \iota a \iota \varsigma v \varepsilon \varepsilon \gamma \varepsilon v v \eta \theta \eta \varsigma \rho \lambda o \varsigma)$. First aorist passive indicative of $\gamma \varepsilon v v a \omega$. "In sins thou wast begotten (or born) all of thee." Ho入os is predicate nominative and teaches total depravity in this case beyond controversy, the Pharisees being judges.

And dost thou teach us? ( $\kappa \alpha \sigma \delta \iota \delta a \sigma \kappa \varepsilon ı \varsigma ~ \eta \mu \alpha \sigma ;$ ). The audacity of it all. Note emphasis on $\sigma v$ (thou). It was insufferable. He had not only taught the rabbis, but had utterly routed them in argument.

And they cast him out ( $\kappa \alpha \varepsilon \xi \varepsilon \beta \alpha \lambda$ ov $\alpha \cup \tau о \nu \varepsilon \xi \omega$ ). Effective second aorist active indicative of $\varepsilon \kappa \beta \alpha \lambda \lambda \omega$ intensified by the addition of $\varepsilon \xi \omega$. Probably not yet expulsion from the synagogue ( 9:22) which required a formal meeting of the Sanhedrin, but certainly forcible driving of the gifted upstart from their presence. See 6:37 for another use of $\varepsilon \kappa \beta \alpha \lambda \lambda \omega \varepsilon \xi \omega$ besides 9:35.

John 9:35
Finding him ( $\varepsilon \cup \rho \omega v$ avtov). Second aorist active participle of $\varepsilon \cup \rho \iota \sigma \kappa \omega$, after search because of what he had heard ( $\eta$ коuбะv).

Dost thou believe on the Son of God? ( $\Sigma v \pi \iota \sigma \tau \varepsilon \varepsilon \iota \varsigma ~ \varepsilon ı \varsigma ~ \tau o v ~ v i o v ~ t o v ~ \theta e o v ;) . ~ S o ~ A ~ L ~$ Theta and most versions, but Aleph B D W Syr-sin read tov avӨpんtov (the Son of Man), almost certainly correct. In either case it is a distinct Messianic claim quite beyond the range of this man's limited knowledge, keen as he is.

John 9:36
And who is he, Lord, that I may believe on him? (Ка тıৎ عбтıv, кирı₹;). The initial ка (and) is common (Mr 10:26; $\mathrm{Lu} 10: 29 ; 18: 26$ ). Probably by kupı he means only "Sir." It usually comes at the beginning of the sentence, not at the end as here and verse 38 .

That I may believe on him (เva $\pi \iota \sigma \tau \varepsilon \cup \sigma \omega$ عıৎ $\alpha \cup \tau o v$ ). Ellipsis to be supplied before this final clause. He catches up the words of Jesus in the preceding verse, though he does not yet know who the Son of Man (or Son of God) is, but he trusts Jesus.

John 9:37
Thou hast both seen him ( $\kappa \alpha є \rho \alpha к \alpha \varsigma ~ \alpha v \tau о v) . ~ P e r f e c t ~ a c t i v e ~ i n d i c a t i v e ~(d o u b l e ~ r e d u-~$ plication) of opaw. Since his eyes were opened.

And he it is that speaketh with thee ( $\kappa \alpha$ о $\lambda \alpha \lambda \omega v \mu \varepsilon \tau \alpha \sigma \sigma v \varepsilon \kappa \varepsilon เ v \circ \varsigma \varepsilon \sigma \tau \tau)$ ). "And the one speaking with thee is that man." See 19:35 for єкєıvos used of the speaker. In 4:26 Jesus reveals himself in like manner to the Samaritan woman as Messiah while here as the Son of Man (or the Son of God).

John 9:38
 in 36). A short creed, but to the point.

And he worshipped him ( $\kappa \alpha \pi \rho о \sigma \varepsilon \kappa \cup v \eta \sigma \varepsilon \nu \alpha \cup \tau \omega$ ). Ingressive first aorist active indicative of $\pi \rho \circ \sigma \kappa \nu v \varepsilon \omega$, old verb to fall down in reverence, to worship. Sometimes of men (Mt 18:26 ). In John (see 4:20) this verb "is always used to express divine worship" (Bernard). It is tragic to hear men today deny that Jesus should be worshipped. He accepted worship from this new convert as he later did from Thomas who called him "God" (Joh 20:28 ). Peter (Ac 10:25f. ) refused worship from Cornelius as Paul and Barnabas did at Lystra (Ac 14:18 ), but Jesus made no protest here.

John 9:39
For judgement ( $\varepsilon \iota \varsigma \rho \mu \mu)$. The Father had sent the Son for this purpose ( $3: 17$ ). This world (кобноя) is not the home of Jesus. The крцца (judgement), a word nowhere else in John, is the result of the крıбıऽ (sifting) from $\kappa \rho \imath v \omega$, to separate. The Father has turned over this process of sifting (крıбı) to the Son (5:22). He is engaged in that very work by this miracle.

They which see not ( $\mathrm{o} \mu \eta \beta \lambda \varepsilon \pi$ оvt $\varepsilon \varsigma$ ). The spiritually blind as well as the physically blind (Lu 4:18; Isa 42:18). Purpose clause with $\iota v \alpha$ and present active subjunctive $\beta \lambda \varepsilon \pi \omega \sigma ı$ (may keep on seeing). This man now sees physically and spiritually.

And that they which see may become blind ( $\kappa \alpha$ о $\beta \lambda \varepsilon \pi о \nu \tau \varepsilon \varsigma \tau \cup \varphi \lambda о \gamma \varepsilon \nu \omega \nu \tau \alpha)$. Another part of God's purpose, seen in Mt 11:25; Lu 10:21, is the curse on those who blaspheme and reject the Son. Note ingressive aorist middle subjunctive of $\gamma$ ıvo $\mu \alpha$ and predicate nominative. Ho $\beta \lambda \varepsilon \pi о v \tau \varepsilon$, are those who profess to see like these Pharisees, but are really blind. Blind guides they were (Mt 23:16 ). Complacent satisfaction with their dim light.

John 9:40
Are we also blind? (М $\eta \kappa \alpha \eta \mu \varepsilon \iota \varsigma ~ \tau ט \varphi \lambda о ~ \varepsilon \sigma \mu \varepsilon v ;$ ). Negative answer expected ( $\mu \eta$ ) and yet these Pharisees who overheard the words of Jesus to the new convert vaguely suspected
that Jesus was referring to them by the last clause. Up in Galilee Jesus had called the Pharisees blind guides who stumble into the pit (Mt 15:14).

John 9:41
If ye were blind ( $\varepsilon \tau \cup \varphi \lambda o \eta \tau \varepsilon$ ). Condition of second class with imperfect indicative in the protasis. The old word $\tau \cup \varphi \lambda$ oc is from $\tau \cup \varphi \omega$, to raise a smoke, to blind by smoke (literally and metaphorically). Here, of course, it is moral blindness. If the Pharisees were born morally blind, they would, like idiots, be without responsibility.

Ye would not have sin (очк av غıхદтє $\alpha \mu \alpha \rho \tau i \alpha v$ ). Regular form for conclusion of secondclass condition, $\alpha v$ with imperfect.

But now ye say ( $v o v \delta \varepsilon \lambda \varepsilon \gamma \varepsilon \tau \varepsilon$ ). In contrast to the previous condition. See like contrast in 15:22,24. They arrogantly asserted superior knowledge.

We see ( $\beta \lambda \varepsilon \pi о \mu \varepsilon v$ ). The ignorant mob do not ( 7:49). It is sin against light and is hopeless (Mr 3:29; Mt 12:31f. ). "Ye are witnesses against yourselves" ( $\mu \alpha \rho \tau \cup \rho \varepsilon \iota \tau \varepsilon$ عautoヶ, Mt 23:31).

## John 10

John 10:1
Verily, Verily ( $A \mu \eta v, \alpha \mu \eta v$ ). Solemn prelude by repetition as in 1:51. The words do not ever introduce a fresh topic (cf. 8:34,51,58). So in 10:7. The Pharisees had previously assumed (Vincent) they alone were the authoritative guides of the people (9:24,29). So Jesus has a direct word for them. So Jesus begins this allegory in a characteristic way. John does not use the word $\pi \alpha \rho \alpha \beta \circ \lambda \eta$, but $\pi \alpha \rho o \not \mu \iota \alpha$ (verse 6), and it really is an allegory of the Good Shepherd and self-explanatory like that of the Prodigal Son in Lu 15. He first tells it in verses 1-5 and then explains and expands it in verses 7-18.

Into the fold of the sheep ( $\varepsilon \varsigma \tau \eta \nu \alpha \nu \lambda \eta \nu \tau \omega \nu \pi \rho \circ \beta \alpha \tau \omega \nu$ ). Originally $\alpha \nu \lambda \eta$ (from $\alpha \omega$, to blow) in Homer's time was just an uncovered space around the house enclosed by a wall, then a roofless enclosure in the country where flocks were herded as here and verse 16. It later came to mean the house itself or palace (Mt 26:3,58, etc.). In the papyri it means the court attached to the house.

Climbeth up ( $\alpha v \alpha \beta \alpha \iota \omega \omega v$ ). Present active participle of $\alpha v \alpha \beta \alpha \iota v \omega$, to go up. One who goes up, not by the door, has to climb up over the wall.

Some other way ( $\alpha \lambda \lambda \alpha \chi 0 \theta \varepsilon v$ ). Rare word for old $\alpha \lambda \lambda o \theta \varepsilon v$, but in 4 Macc. 1:7 and in a papyrus. Only here in N.T.

The same ( $\varepsilon \kappa \varepsilon เ v o \varsigma) . ~ " T h a t ~ o n e " ~ j u s t ~ d e s c r i b e d . ~$
Is a thief and a robber ( $\kappa \lambda \varepsilon \pi \tau \eta \varsigma \varepsilon \sigma \tau \iota \vee \kappa \alpha \lambda \eta \iota \sigma \tau \eta \varsigma)$. Both old and common words (from $\kappa \lambda \varepsilon \pi \tau \omega$, to steal, $\lambda \eta\llcorner\zeta \circ \mu \alpha$, to plunder). The distinction is preserved in the N.T. as here. Judas was a к $\lambda \varepsilon \pi \tau \eta \varsigma$ (Joh 12:6 ), Barabbas a robber ( 18:40) like the two robbers (Mt 27:38,44) crucified with Jesus erroneously termed thieves like "the thief on the cross" by most people. See Mr 11:17. Here the man jumping over the wall comes to steal and to do it by violence like a bandit. He is both thief and robber.

John 10:2
The shepherd of the sheep ( $\pi о \mu \eta v \varepsilon \sigma \tau \iota v \tau \omega v \pi \rho o \beta \alpha \tau \omega v$ ). No article with $\pi о \mu \eta \nu$, "a shepherd to the sheep." He comes in by the door with the sheep whom he leads. Old word is $\pi о \mu \eta \eta$, root meaning to protect. Jesus applies it to himself in verse 16 and implies it here. It is used of Christ in 1Pe 2:25; Heb 13:20. Paul applies it to ministers in Eph 4:11 . Jesus uses the verb $\pi ⿰ 丿 \mu \boldsymbol{\mu} \boldsymbol{\imath} \omega \omega$, to shepherd, to Peter (Joh 21:16) and Peter uses it to other preachers (1Pe 5:2) and Paul uses it for bishops (elders) in Ac 20:28. Our word pastor is simply Latin for shepherd. Christ is drawing a sharp contrast after the conduct of the Pharisees towards the blind man between himself and them.

John 10:3
To him ( $\tau 0 \cup \tau \omega)$. "To this one," the shepherd, in dative case.

The porter (o $\theta v \rho \omega \rho o \varsigma)$. Old word for doorkeeper ( $\theta \mathrm{v} \rho \alpha$, door, $\omega \rho \alpha$, care, carer for the door). Used for man (Mr 13:34; Joh 10:3 ) or woman (Joh 18:16ff. ), only N.T. examples. The porter has charge of the sheep in the fold at night and opens the door in the morning for the shepherd. It is not certain that Jesus meant this detail to have a special application. The Holy Spirit, of course, does open the door of our hearts for Jesus through various agencies.

Hear his voice ( $\tau \eta \varsigma \varphi \omega v \eta \varsigma \alpha \cup \tau 0 v$ aкоvя). Hear and heed (verse 27). Note genitive case $\varphi \omega v \eta \varsigma$ (accusative in 3:8).

By name ( $\kappa \alpha \tau^{\prime}$ огона). Several flocks might be herded in the same fold overnight. But the shepherd knows his own ( $\tau \alpha \downarrow \delta 1 \alpha$ ) sheep (verse 27) and calls their names. "It is still common for Eastern shepherds to give particular names to their sheep" (Bernard).

And leadeth them out ( $\kappa \alpha \varepsilon \xi \alpha \gamma \varepsilon \alpha \cup \tau \alpha$ ). Old and common verb, present active indicative. The sheep follow readily (verse 27) because they know their own shepherd's voice and his name for each of them and because he has led them out before. They love and trust their shepherd.

John 10:4
When he hath put forth all his own (o $\tau \alpha v \tau \alpha \stackrel{\delta}{1} \alpha \pi \alpha \nu \tau \alpha \varepsilon \kappa \beta \alpha \lambda \eta$ ). Indefinite temporal clause with otav and the second aorist (effective) active subjunctive of $\varepsilon \kappa \beta \alpha \lambda \lambda \omega$. No need of the futurum exactum idea, simply, "when he leads out all his own sheep." They are all out of the fold. He overlooks none. Ек $\beta \alpha \lambda \lambda \omega$ does mean "thrust out" if a reluctant sheep wishes to linger too long.

He goeth before them ( $\varepsilon \mu \pi \rho \circ \sigma \theta \varepsilon v \alpha v \tau \omega v \pi о \rho \varepsilon v \varepsilon \tau \alpha)$. Staff in hand he leads the way in front of the flock and they follow ( $\alpha \kappa$ ко $о \boldsymbol{\theta} \theta \varepsilon$ ) him. What a lesson for pastors who seek to drive the church like cattle and fail. The true pastor leads in love, in words, in deeds.

John 10:5
A stranger ( $\alpha \lambda \lambda o \tau \rho \omega \omega$ ). Literally, "One belonging to another" (from $\alpha \lambda \lambda o \varsigma$, opposed to เ $\delta$ toc). A shepherd of another flock, it may be, not necessarily the thief and robber of verse 1. Note associative instrumental case after ако入ou $Ө$ ๆбоибьv (future active indicative of $\alpha \kappa о \lambda о v \theta \varepsilon \omega$, verse 4). Note the strong double negative ov $\mu \eta$ here with the future indicative, though usually with the aorist subjunctive (Aleph L W have it here). They simply will not follow such a man or woman, these well-trained sheep will not.

But will flee from him ( $\left.\alpha \lambda \lambda \alpha \varphi \varepsilon \cup \xi \circ v \tau \alpha \alpha \pi^{\prime} \alpha v \tau o v\right)$. Future middle of $\varphi \varepsilon \cup \gamma \omega$ and ablative case with $\alpha \pi 0$. They will flee as if from a wolf or from the plague. Alas and alas, if only our modern pastors had the sheep (old and young) so trained that they would run away from and not run after the strange voices that call them to false philosophy, false psychology, false ethics, false religion, false life.

John 10:6

This parable ( $\tau \alpha \cup \tau \eta v \tau \eta v \pi \alpha \rho o \mu \mu \alpha v$ ). Old word for proverb from $\pi \alpha \rho \alpha$ (beside) and ounoc, way, a wayside saying or saying by the way. As a proverb in N.T. in 2Pe 2:22 (quotation from $\operatorname{Pr}$ 26:11), as a symbolic or figurative saying in Joh 16:25,29, as an allegory in Joh 10:6 . Nowhere else in the N.T. Curiously enough in the N.T. $\pi \alpha \rho \alpha \beta 0 \lambda \eta$ occurs only in the Synoptics outside of Heb 9:9; 11:19. Both are in the LXX. Параßo入ך is used as a proverb (Lu 4:23) just as $\pi \alpha \rho о \not \mu \mathrm{\alpha}$ is in $2 \mathrm{Pe} 2: 22$. Here clearly $\pi \alpha \rho о \mu \mathrm{\mu}$ means an allegory which is one form of the parable. So there you are. Jesus spoke this tapouta to the Pharisees, "but they understood not what things they were which he spake unto them" ( $\varepsilon \kappa \varepsilon$ เvo $\delta \varepsilon$ оик $\varepsilon \gamma v \omega \sigma \alpha v$ $\tau \iota v \alpha \eta \nu a \varepsilon \lambda \alpha \lambda \varepsilon \alpha \cup \tau o \iota \zeta)$. Second aorist active indicative of $\gamma \iota v \omega \sigma \kappa \omega$ and note $\eta \nu$ in indirect question as in 2:25 and both the interrogative $\tau$ iva and the relative $\alpha$. "Spake" (imperfect $\varepsilon \lambda \alpha \lambda \varepsilon)$ should be "Was speaking or had been speaking."

John 10:7
Therefore again (ouv $\pi \alpha \lambda \iota v$ ). Jesus repeats the allegory with more detail and with more directness of application. Repeating a story is not usually an exhilarating experience.

I am the door of the sheep $(\varepsilon \gamma \omega \varepsilon \mu \eta \theta v \rho \alpha \tau \omega v \pi \rho o \beta \alpha \tau \omega v)$. The door for the sheep by which they enter. "He is the legitimate door of access to the spiritual $\alpha \cup \lambda \eta$, the Fold of the House of Israel, the door by which a true shepherd must enter" (Bernard). He repeats it in verse 9 . This is a new idea, not in the previous story ( $1-5$ ). Moffatt follows the Sahidic in accepting o тонщ $\nu$ here instead of $\eta \theta v \rho a$, clearly whimsical. Jesus simply changes the metaphor to make it plainer. They were doubtless puzzled by the meaning of the door in verse 1 . Once more, this metaphor should help those who insist on the literal meaning of bread as the actual body of Christ in Mr 14:22. Jesus is not a physical "door," but he is the only way of entrance into the Kingdom of God ( 14:6).

John 10:8
Before me ( $\pi \rho \mathrm{\rho} \varepsilon \mu \mathrm{v})$ ). Aleph with the Latin, Syriac, and Sahidic versions omit these words (supported by A B D L W). But with or without $\pi \rho o$ ع $\mu \circ \mathrm{ov}$ Jesus refers to the false Messiahs and self-appointed leaders who made havoc of the flock. These are the thieves and robbers, not the prophets and sincere teachers of old. The reference is to verse 1 . There had been numerous such impostors already (Josephus, Ant. XVIII. i. 6; War II. viii. I) and Jesus will predict many more (Mt 24:23f. ). They keep on coming, these wolves in sheep's clothing (Mt 7:15 ) who grow rich by fooling the credulous sheep. In this case "the sheep did not hear them" (ouк $\eta \kappa о \cup \sigma \alpha v ~ \alpha \cup \tau \omega v \tau \alpha \pi \rho \circ \beta \alpha \tau \alpha$ ). First aorist active indicative with genitive. Fortunate sheep who knew the Shepherd's voice.

John 10:9
The door ( $\eta \theta \cup \rho \alpha$ ). Repeated from verse 7 .
By me if any man enter in ( $\delta \iota^{\prime} \varepsilon \mu \circ v \varepsilon a v \tau \iota \varsigma \varepsilon \iota \sigma \varepsilon \lambda \theta \eta$ ). Condition of third class with $\varepsilon \alpha v$ and second aorist active subjunctive of $\varepsilon ו \sigma \varepsilon \rho \chi \circ \mu \alpha$. Note proleptic and emphatic position of $\delta^{\prime}$ غ $\mu$ ov. One can call this narrow intolerance, if he will, but it is the narrowness of truth. If

Jesus is the Son of God sent to earth for our salvation, he is the only way. He had already said it in $5: 23$. He will say it again more sharply in 14:6. It is unpalatable to the religious dogmatists before him as it is to the liberal dogmatists today. Jesus offers the open door to "any one" ( $\tau \iota \varsigma)$ who is willing ( $\theta \varepsilon \lambda \varepsilon$ ) to do God's will ( $7: 17$ ).

He shall be saved ( $\sigma \omega \theta \eta \sigma \varepsilon \tau \alpha$ ). Future passive of $\sigma \omega \zeta \omega$, the great word for salvation, from $\sigma \omega \varsigma$, safe and sound. The sheep that comes into the fold through Jesus as the door will be safe from thieves and robbers for one thing. He will have entrance ( $\varepsilon \varepsilon \sigma \lambda \varepsilon v \sigma \varepsilon \tau \alpha)$ and outgo ( $\varepsilon \xi \varepsilon \lambda \varepsilon v \sigma \varepsilon \tau \alpha)$, he will be at home in the daily routine (cf. Ac 1:21) of the sheltered flock.

And shall find pasture ( $\kappa \alpha$ vо $\eta \eta \vee \varepsilon \cup \rho \eta \sigma \varepsilon$ ). Future (linear future) indicative of $\varepsilon \cup \rho ı \sigma \kappa \omega$, old word from $\nu \varepsilon \mu \omega$, to pasture. In N.T. only here and 2Ti 2:17 (in sense of growth). This same phrase occurs in 1Ch 4:40. The shepherd leads the sheep to pasture, but this phrase pictures the joy of the sheep in the pasture provided by the shepherd.

John 10:10
But that he may steal, and kill, and destroy ( $\varepsilon \mu \eta \stackrel{\iota}{ } \kappa \lambda \varepsilon \psi \eta \kappa \alpha \theta v \sigma \eta \kappa \alpha \alpha \pi о \lambda \varepsilon \sigma \eta$ ). Literally, "except that" ( $\varepsilon \mu \eta$ ) common without (Mt 12:4) and with verb (Ga 1:7), "if not" (literally), followed here by final ıva and three aorist active subjunctives as sometimes by otav (Mr 9:9) or ot (2Co 12:13). Note the order of the verbs. Stealing is the purpose of the thief, but he will kill and destroy if necessary just like the modern bandit or gangster.

I came that they may have life ( $\varepsilon \gamma \omega \eta \lambda \theta$ ov $\tau \alpha a \zeta \omega \eta \nu \varepsilon \chi \omega \sigma \iota \nu$ ). In sharp contrast ( $\varepsilon \gamma \omega$ ) as the good shepherd with the thieves and robbers of verse 1 came Jesus. Note present active subjunctive ( $\varepsilon \chi \omega \sigma v$ ), "that they (people) may keep on having life (eternal, he means)" as he shows in 10:28. He is "the life" ( 14:6).

And may have it abundantly ( $\kappa \alpha \pi \varepsilon \rho เ \sigma \sigma o v \varepsilon \chi \omega \sigma เ v$ ). Repetition of $\varepsilon \chi \omega \sigma \iota v$ (may keep on having) abundance ( $\pi \varepsilon \rho เ \sigma \sigma o v$, neuter singular of $\pi \varepsilon \rho เ \sigma \sigma o \varsigma)$. Xenophon (Anab. VII. vi. 31) uses $\pi \varepsilon \rho \iota \sigma \sigma o v \varepsilon \chi \varepsilon เ v$, "to have a surplus," true to the meaning of overflow from $\pi \varepsilon \rho$ (around) seen in Paul's picture of the overplus (vாєрє Abundance of life and all that sustains life, Jesus gives.

John 10:11
 shepherd the good one." Takes up the metaphor of verses 2f. . Vulgate pastor bonus. Philo calls his good shepherd $\alpha \gamma a \theta$ oc, but ka入os calls attention to the beauty in character and service like "good stewards" (1Pe 4:10), "a good minister of Christ Jesus" (1Ti 4:6 ). Often both adjectives appear together in the ancient Greek as once in the New Testament (Lu 8:15 ). "Beauty is as beauty does." That is ка入os.

Layeth down his life for his sheep ( $\tau \eta \nu \psi v \chi \eta \nu$ av $\tau \circ v \tau \theta \eta \sigma \tau v \nu \pi \varepsilon \rho \tau \omega \nu \pi \rho \circ \beta \alpha \tau \omega v$ ). For illustration see 1Sa 17:35 (David's experience) and Isa 31:4 . Dods quotes Xenophon (Mem. ii. 7, 14) who pictures even the sheep dog as saying to the sheep: "For I am the one
that saves you also so that you are neither stolen by men nor seized by wolves." Hippocrates has $\psi v \chi \eta \nu$ кат $\theta \varepsilon \tau \frac{1}{}$ (he laid down his life, i.e. died). In Jud 12:3 $\varepsilon \theta \eta \kappa \alpha \tau \eta \nu \psi v \chi \eta \nu$ means "I risked my life." The true physician does this for his patient as the shepherd for his sheep. The use of $v \pi \varepsilon \rho$ here (over, in behalf of, instead of), but in the papyri $v \pi \varepsilon \rho$ is the usual preposition for substitution rather than $\alpha v \tau$. This shepherd gives his life for the sin of the world (1:29; 1Jo 2:2).

John 10:12
He that is a hireling ( $\mathrm{o} \mu \sigma \sigma \omega \tau \sigma \varsigma)$. Old word from $\mu \sigma \sigma$ ow, to hire (Mt 20:1) from $\mu \mathrm{I} \theta$ oc (hire, wages, Lu 10:7 ), in N.T. only in this passage. Literally, "the hireling and not being a shepherd" (о $\mu \sigma \theta \omega \tau$ тоц ка оик $\omega v$ ло $\mu \eta \nu)$. Note ovk with the participle $\omega v$ to emphasize the certainty that he is not a shepherd in contrast with $\mu \eta \varepsilon \varepsilon \sigma \varepsilon \rho \chi \circ \mu \varepsilon v o \varsigma$ in verse 1 (conceived case). See same contrast in 1Pe 1:8 between ouk ıоขтє¢ and $\mu \eta$ ор $\omega v \tau \varepsilon \varsigma$. The hireling here is not necessarily the thief and robber of verses 1,8 . He may conceivably be a nominal shepherd (pastor) of the flock who serves only for the money, a sin against which Peter warned the shepherds of the flock "not for shameful gain" (1Pe 5:2 ).

Whose own (ov $\delta \delta 1 \alpha$ ). Every true shepherd considers the sheep in his care "his own" ( $\delta \delta \iota \alpha$ ) even if he does not actually "own" them. The mere "hireling" does not feel so.

Beholdeth ( $\theta \varepsilon \omega \rho \varepsilon$ ). Vivid dramatic present, active indicative of $\theta \varepsilon \omega \rho \varepsilon \omega$, a graphic picture.

The wolf coming ( $\tau \circ \nu \lambda \cup \kappa o v \varepsilon \rho \chi \circ \mu \varepsilon v o v$ ). Present middle predicate participle of $\varepsilon \rho \chi \circ \mu \alpha$.
Leaveth the sheep, and fleeth ( $\alpha \varphi ı \eta \sigma \iota \nu \tau \alpha \pi \rho \circ \beta \alpha \tau \alpha \kappa \alpha \varphi \varepsilon \cup \gamma \varepsilon$ ). Graphic present actives again of $\alpha \varphi \imath \eta \mu$ and $\varphi \varepsilon \cup \gamma \omega$. The cowardly hireling cares naught for the sheep, but only for his own skin. The wolf was the chief peril to sheep in Palestine. See Mt 10:6 where Jesus says: "Behold I send you forth as sheep in the midst of wolves."

And the wolf snatcheth them and scattereth them (ка о $\lambda \cup к о \varsigma ~ а \rho \pi а \zeta \varepsilon ~ к а ~ б к о р \pi \iota \zeta \varepsilon) . ~$ Vivid parenthesis in the midst of the picture of the conduct of the hireling. Bold verbs these. For the old verb $\alpha \rho \pi \alpha \zeta \omega$ see Joh 6:15; Mt 11:12, and for $\sigma \kappa о \rho \pi ı \zeta \omega$, late word (Plutarch) for the Attic $\sigma \kappa \varepsilon \delta \alpha v v v \mu$, see Mt 12:30. It occurs in the vision of Ezekiel (Eze 34:5) where because of the careless shepherds "the sheep became meat to all the beasts of the field, and were scattered." Jesus uses $\alpha \rho \pi \alpha \zeta \omega$ in 10:29 where no one is able "to snatch" one out of the Father's hand.

John 10:13
Because he is a hireling ( $о \tau \mu \sigma \theta \omega \tau o \varsigma \varepsilon \sigma \tau \tau v$ ). And only that, without the shepherd heart that loves the sheep. Reason given for the conduct of the hireling after the parenthesis about the wolf.

And careth not for the sheep ( $\kappa \alpha$ оv $\mu \varepsilon \lambda \varepsilon \alpha v \tau \omega \pi \varepsilon \rho \tau \omega v \pi \rho \circ \beta \alpha \tau \omega v$ ). Literally, "and it is no care to him about the sheep." This use of the impersonal $\mu \varepsilon \lambda \varepsilon$ (present active indicative) is quite common, as in Mt 22:16. But God does care (1Pe 5:7).

John 10:14
I am the good-shepherd ( $\varepsilon \gamma \omega \varepsilon \iota \mu$ о $\pi о \mu \eta \nu$ о ка $\lambda о \varsigma)$. Effective repetition.
And mine own know me ( $\kappa \alpha \gamma \imath \omega \sigma \kappa о v \sigma \iota \nu \mu \varepsilon \tau \alpha \varepsilon \mu \alpha$ ). Jesus as the Good Shepherd knows his sheep by name as he had already said (verse 3) and now repeats. Yes, and they know his voice (verse 4), they have experimental knowledge ( $\gamma \iota \nu \omega \sigma \kappa \omega$ ) of Jesus as their own Shepherd. Here (in this mutually reciprocal knowledge) lies the secret of their love and loyalty.

John 10:15
And I know the Father ( $\kappa \alpha \gamma \omega \gamma \iota \nu \omega \sigma \kappa \omega$ tov $\pi \alpha \tau \varepsilon \rho \alpha$ ). Hence he is qualified to reveal the Father ( $1: 18$ ). The comparison of the mutually reciprocal knowledge between the Father and the Son illustrates what he has just said, though it stands above all else (Mt 11:27; Lu 10:22; Joh 17:21-26 ). We cannot claim such perfect knowledge of the Good Shepherd as exists between the Father and the Son and yet the real sheep do know the Shepherd's voice and do love to follow his leadership here and now in spite of thieves, robbers, wolves, hirelings.

And I lay down my life for the sheep ( $\kappa \alpha \tau \eta \nu \psi v \chi \eta \nu \mu \circ v \tau ו \theta \eta \mu v \pi \varepsilon \rho \tau \omega \nu \pi \rho o \beta \alpha \tau \omega v$ ). This he had said in verse 11, but he repeats it now for clearness. This he does not just as an example for the sheep and for under-shepherds, but primarily to save the sheep from the wolves, the thieves and robbers.

John 10:16
Other sheep ( $\alpha \lambda \lambda \alpha \pi \rho o \beta \alpha \tau \alpha$ ). Sheep, not goats, but "not of this fold" ( $\varepsilon \kappa \tau \eta \varsigma \alpha v \lambda \eta \varsigma$ $\tau \alpha \cup \tau \eta \varsigma)$. See verse 1 for $\alpha v \lambda \eta$. Clearly "his flock is not confined to those enclosed in the Jewish fold, whether in Palestine or elsewhere" (Westcott). Christ's horizon takes in all men of all races and times (Joh 11:52; 12:32 ). The world mission of Christ for all nations is no new idea with him (Mt 8:11; Lu 13:28). God loved the world and gave his Son for the race (Jov 3:16),

Them also I must bring (какєıva $\delta \varepsilon \mu \varepsilon \alpha \gamma \alpha \gamma \varepsilon \iota v$ ). Second aorist active infinitive of $\alpha \gamma \omega$ with $\delta \varepsilon$ expressing the moral urgency of Christ's passion for God's people in all lands and ages. Missions in Christ's mind takes in the whole world. This is according to prophecy (Isa 42:6; 49:6; 56:8) for the Messiah is to be a Light also to the Gentiles. It was typified by the brazen serpent (Joh 3:14 ). Christ died for every man. The Pharisees doubtless listened in amazement and even the disciples with slow comprehension.

And they shall hear my voice ( $\kappa \alpha \tau \eta \varsigma \omega \nu \eta \varsigma \mu \circ v \alpha \kappa о v \sigma о \nu \tau \alpha$ ). Future middle indicative of $\alpha \kappa \sigma \omega \omega$ with the genitive $\varphi \omega \nu \eta \varsigma$. These words read like a transcript from the Acts and the Epistles of Paul (Ro 9-11 in particular). See especially Paul's words in Ac 28:28. Present-day Christianity is here foretold. Only do we really listen to the voice of the Shepherd as we should? Jesus means that the Gentiles will hearken if the Jews turn away from him.

And they shall become one flock, one shepherd ( $\kappa \alpha \gamma \varepsilon \nu \eta \sigma о \nu \tau \alpha \mu \alpha \pi о \mu \nu \eta, \varepsilon \varsigma \varsigma \pi о \mu \eta \nu)$. Future middle indicative of $\gamma เ v o \mu \alpha$, plural, not singular $\gamma \varepsilon v \eta \sigma \varepsilon \tau \alpha$ as some MSS. have it. All (Jews and Gentiles) will form one flock under one Shepherd. Note the distinction here by Jesus between $\pi о \mu \nu \eta$ (old word, contraction of $\pi о \iota \mu \varepsilon \eta \eta$ from $\pi о \mu \eta \nu$, shepherd), as in Mt 26:31, and $\alpha \cup \lambda \eta$ (fold) just before. There may be many folds of the one flock. Jerome in his Vulgate confused this distinction, but he is wrong. His use of ovile for both $\alpha u \lambda \eta$ and $\pi o \mu v o v$ has helped Roman Catholic assumptions. Christ's use of "flock" ( $\pi о \mu \nu \eta$ ) here is just another metaphor for kingdom ( $\beta \alpha \sigma \lambda \lambda \varepsilon \iota \alpha$ ) in Mt 8:11 where the children of the kingdom come from all climes and nations. See also the various metaphors in Eph 2 for this same idea. There is only the one Great Shepherd of the sheep (Heb 13:20), Jesus Christ our Lord.

John 10:17
For this reason ( $\delta$ ıa $\tau 0 v \tau 0$ ). Points to the following ot clause. The Father's love for the Son is drawn out (Joh 3:16) by the voluntary offering of the Son for the sin of the world (Ro 5:8 ). Hence the greater exaltation (Php 2:9). Jesus does for us what any good shepherd does ( $10: 11$ ) as he has already said ( $10: 15$ ). The value of the atoning death of Christ lies in the fact that he is the Son of God, the Son of Man, free of $\sin$, and that he makes the offering voluntarily (Heb 9:14).

That I may take it again ( $\llcorner\alpha \alpha \pi \alpha \iota \nu \lambda \alpha \beta \omega \alpha v \tau \eta v$ ). Purpose clause with $t v \alpha$ and second aorist active subjunctive of $\lambda \alpha \mu \beta \alpha v \omega$. He looked beyond his death on the Cross to the resurrection. "The purpose of the Passion was not merely to exhibit his unselfish love; it was in order that He might resume His life, now enriched with quickening power as never before" (Bernard). The Father raised Jesus from the dead (Ac 2:32). There is spontaneity in the surrender to death and in the taking life back again (Dods).

## John 10:18

No one taketh it away from me (ov (first aorist active indicative of $\alpha \iota \rho \omega$, to take away), probably correct (Westcott and Hort). "John is representing Jesus as speaking sub specie aeternitatis" (Bernard). He speaks of his death as already past and the resurrection as already accomplished. Cf. Joh 3:16.

Of myself ( $\left.\alpha \pi^{\prime} \varepsilon \mu \alpha v \tau o v\right)$. The voluntariness of the death of Jesus repeated and sharpened. D omits it, probably because of superficial and apparent conflict with 5:19. But there is no inconsistency as is shown by Joh 3:16; Ro 5:8. The Father "gave" the Son who was glad to be given and to give himself.

I have power to lay it down ( $\varepsilon \xi \circ 0 \sigma \iota \alpha v \varepsilon \chi \omega$ Ө $\varepsilon ı v \alpha \alpha v \tau \eta v$ ). E $\xi o u \sigma \iota \alpha$ is not an easy word to translate (right, authority, power, privilege). See 1:12. Restatement of the voluntariness of his death for the sheep.
 aorist active infinitive in both cases ( $\theta \varepsilon ı v \alpha$ from $\tau ו \theta \eta \mu$ and $\lambda \alpha \beta \varepsilon ı v$ from $\lambda \alpha \mu \beta \alpha v \omega$ ), single acts. Recall 2:19 where Jesus said: "And in three days I will raise it up." He did not mean that
he will raise himself from the dead independently of the Father as the active agent (Ro 8:11 ).

I received from my Father ( $\varepsilon \lambda \alpha \beta \circ v \pi \alpha \rho \alpha$ тov $\pi \alpha \tau \rho \circ \varsigma \mu \circ v)$. Second aorist active indicative of $\lambda \alpha \mu \beta \alpha v \omega$. He always follows the Father's command ( $\varepsilon v \tau o \lambda \eta$ ) in all things (12:49f.; 14:31). So now he is doing the Father's will about his death and resurrection.

John 10:19
There arose a division again ( $\sigma \chi\llcorner\rho \mu \alpha \pi \alpha \lambda \iota v \varepsilon \gamma \varepsilon v \varepsilon \tau o$ ). As in 7:43 in the crowd (also in 7:12,31 ), so now among the hostile Jews (Pharisees) some of whom had previously professed belief in him ( 8:31). The direct reference of $\pi \alpha \lambda \iota \nu$ (again) may be to $9: 16$ when the Pharisees were divided over the problem of the blind man. Division of opinion about Jesus is a common thing in John's Gospel (6:52,60,66; 7:12,25ff.; 8:22; 9:16f.; 10:19,24,41; 11:41ff.; 12:19,29,42; 16:18f. ).

John 10:20
He has a demon and is mad ( $\delta \alpha \not \mu \circ v i o v \varepsilon \chi \varepsilon \kappa \alpha \mu \alpha ı \varepsilon \varepsilon \tau \alpha)$. As some had already said (7:20; 8:48 with the addition of "Samaritan"). So long before in Mr 3:21. An easy way of discounting Jesus.

John 10:21
Of one possessed with a demon ( $\delta a \mu \rho \circ v \iota \zeta \circ \mu \varepsilon v o v)$. Genitive of present passive participle of $\delta a \mu \boldsymbol{\mu} \boldsymbol{v} \zeta \omega$. They had heard demoniacs talk, but not like this.

Can a demon open the eyes of the blind? ( $\mu \eta \delta \alpha \mu \rho v i o v \delta u v a \tau \alpha ~ \tau \cup \varphi \lambda о v ~ о \varphi \theta \alpha \lambda \mu \circ v \varsigma$ $\alpha v o ı \xi a t ;)$. Negative answer expected. Demons would more likely put out eyes, not open them. It was an unanswerable question.

John 10:22
And it was the feast of the dedication at Jerusalem ( $\varepsilon \gamma \varepsilon v \varepsilon \tau \circ \delta \varepsilon \tau \alpha \varepsilon \nu \kappa \alpha \iota v i \alpha \varepsilon \nu$ тoıs Iعробо $\langle\nu \mu$ оч). But Westcott and Hort read тot $\varepsilon$ (then) instead of $\delta \varepsilon$ (and) on the authority of B L W 33 and some versions. This is probably correct: "At that time came the feast of dedication in Jerusalem." Tot $\varepsilon$ does not mean that the preceding events followed immediately after the incidents in 10:1-21. Bernard brings chapter 9 up to this date (possibly also chapter 8 ) and rearranges chapter 10 in a purely arbitrary way. There is no real reason for this arrangement. Clearly there is a considerable lapse between the events in 10:22-39 and 10:1-21, possibly nearly three months (from just after tabernacles 7:37 to dedication 10:22). The Pharisees greet his return with the same desire to catch him. This feast of dedication, celebrated for eight days about the middle of our December, was instituted by Judas Maccabeus B.C. 164 in commemoration of the cleansing of the temple from the defilements of pagan worship by Antiochus Epiphanes (1Macc. 4:59). The word $\varepsilon v \kappa \alpha ı v a(\varepsilon v, ~ \kappa \alpha ı v o \varsigma, ~ n e w) ~ o c c u r s ~$ here only in the N.T. It was not one of the great feasts and could be observed elsewhere without coming to Jerusalem. Jesus had apparently spent the time between tabernacles and dedication in Judea (Lu 10:1-13:21).

Winter ( $\chi \varepsilon \mu \omega \nu$ ). Old word from $\chi \varepsilon \mu \mu \alpha$ ( $\chi \varepsilon \omega$, to pour, rain, or from $\chi \iota \omega v$, snow). See Mt 24:20 .

John 10:23
Was walking ( $\pi \varepsilon \rho เ \varepsilon \pi \alpha \tau \varepsilon)$. Imperfect active of $\pi \varepsilon \rho \iota \pi \alpha \tau \varepsilon \omega$, to walk around, picturesque imperfect.

In Solomon's porch ( $\varepsilon v \tau \eta \sigma \tau o \alpha$ tov $\Sigma o \lambda o \mu \omega v o c)$. A covered colonnade or portico in which people could walk in all weather. See Ac 3:11; $5: 12$ for this porch. This particular part of Solomon's temple was left uninjured by the Babylonians and survived apparently till the destruction of the temple by Titus A.D. 70 (Josephus, Ant. XX. 9,7). When John wrote, it was, of course, gone.

John 10:24
Came round about him ( $\varepsilon \kappa \cup \kappa \lambda \omega \sigma \alpha v ~ \alpha \cup \tau o v) . ~ A o r i s t ~ a c t i v e ~ i n d i c a t i v e ~ o f ~ к \cup к \lambda о \omega, ~ o l d ~$ verb from кик $\boldsymbol{\jmath}$ (cycle, circle). See Ac 14:20 for the circle of disciples around Paul when stoned. Evidently the hostile Jews cherished the memory of the stinging rebuke given them by Jesus when here last, particularly the allegory of the Good Shepherd ( 10:1-19), in which he drew so sharply their own picture.

How long dost thou hold us in suspense? ( $\varepsilon \omega \varsigma \pi \circ \tau \varepsilon \tau \eta \nu \psi v \chi \eta \nu \eta \mu \omega \nu$ aı $\rho \iota \sigma ;)$. Literally, "Until when dost thou lift up our soul?" But what do they mean by this metaphor? Atp $\omega$ is common enough to lift up the eyes (Joh 11:41), the voice (Lu 17:13) , and in Ps 25:1; 86:4 (Josephus, Ant. III. ii. 3) we have "to lift up the soul." We are left to the context to judge the precise meaning. Clearly the Jews mean to imply doubt and suspense. The next remark makes it clear.

If thou art the Christ ( $\varepsilon \sigma v \varepsilon$ o Xpıotoc). Condition of first class assumed to be true for the sake of argument.

Tell us plainly ( $\varepsilon ı \pi о \nu \eta \mu \nu \nu \pi \alpha \rho \rho \eta \sigma ı \alpha)$. Conclusion with $\varepsilon ו \pi o \nu$ rather than the usual $\varepsilon เ \pi \varepsilon$ as if first aorist active imperative like $\lambda v \sigma o v$. The point is in "plainly" ( $\pi \alpha \rho \rho \eta \sigma ı \alpha)$, adverb as in 7:13,26 which see. That is to say "I am the Christ" in so many words. See 11:14; 16:29 for the same use of $\pi \alpha \rho \rho \eta \sigma \iota \alpha$. The demand seemed fair enough on the surface. They had made it before when here at the feast of tabernacles ( 8:25). Jesus declined to use the word Xpıбтos (Messiah) then as now because of the political bearing of the word in their minds. The populace in Galilee had once tried to make him king in opposition to Pilate (Joh 6:14f. ). When Jesus does confess on oath before Caiaphas that he is the Christ the Son of God (Mr 14:61f.; Mt 26:63f. ), the Sanhedrin instantly vote him guilty of blasphemy and then bring him to Pilate with the charge of claiming to be king as a rival to Caesar. Jesus knew their minds too well to be caught now.

John 10:25

I told you, and you believe not ( $\varepsilon เ \pi \circ v \nu \mu \nu v \kappa \alpha$ ov $\pi \iota \sigma \tau \varepsilon v \varepsilon \tau \varepsilon$ ). It was useless to say more. In 7:14-10:18 Jesus had shown that he was the Son of the Father as he had previously claimed ( $5: 17-47$ ), but it was all to no purpose save to increase their rage towards him.

These bear witness of me ( $\tau \alpha \cup \tau \alpha \mu \alpha \rho \tau \cup \rho \varepsilon \pi \varepsilon \rho \varepsilon \mu \circ v$ ). His works confirm his words as he had shown before ( $5: 36$ ). They believe neither his words nor his works.

## John 10:26

Because ye are not of my sheep ( $о \tau \varepsilon \kappa \tau \omega v \pi \rho \circ \beta \alpha \tau \omega v \mu \circ v$ ). This had been the point in the allegory of the Good Shepherd. In fact, they were the children of the devil in spirit and conduct ( $8: 43$ ), pious ecclesiastics though they seemed, veritable wolves in sheep's clothing (Mt 7:15).

John 10:27
My sheep ( $\tau \alpha \pi \rho o \beta \alpha \tau \alpha \tau \alpha \varepsilon \mu \alpha$ ). In contrast with you they are not in doubt and suspense. They know my voice and follow me. Repetition of the idea in 10:4,14.

John 10:28
And I give unto them eternal life ( $\kappa \alpha \gamma \omega \delta \iota \delta \omega \mu$ avtoьऽ $\zeta \omega \eta \nu \alpha \iota \omega \nu \iota \nu$ ). This is the gift of Jesus now to his sheep as stated in 6:27,40 (cf. 1Jo 2:25; 5:11).

And they shall never perish ( $\kappa \alpha$ ov $\mu \eta \alpha \pi о \lambda \omega \nu \tau \alpha$ ). Emphatic double negative with second aorist middle (intransitive) subjunctive of $\alpha \pi \sigma \lambda \lambda \nu \mu$, to destroy. The sheep may feel secure (3:16; 6:39; 17:12; 18:9).
 $\mu \mathrm{ov})$. Jesus had promised this security in Galilee (6:37,39 ). No wolf, no thief, no bandit, no hireling, no demon, not even the devil can pluck the sheep out of my hand. Cf. Col 3:3 (Your life is hid together with Christ in God).

John 10:29
Which (oc). Who. If o (which) is correct, we have to take o $\pi \alpha \pi \eta \rho$ as nominative absolute or independent, "As for my Father."

Is greater than all ( $\pi \alpha v \tau \omega v \mu \varepsilon 亡 \zeta \omega v \varepsilon \sigma \tau \iota v)$. If we read oc. But Aleph B L W read o and A B Theta have $\mu \varepsilon \varepsilon_{\zeta}\left(\frac{v}{l}\right.$. The neuter seems to be correct (Westcott and Hort). But is it? If so, the meaning is: "As for my Father, that which he hath given me is greater than all." But the context calls for os $\ldots \mu \varepsilon \iota \zeta \omega v$ with o $\pi \alpha \tau \eta \rho$ as the subject of $\varepsilon \sigma \tau \iota v$. The greatness of the Father, not of the flock, is the ground of the safety of the flock. Hence the conclusion that "no one is able to snatch them out of the Father's hand."

John 10:30
One ( $\varepsilon v$ ). Neuter, not masculine ( $\varepsilon \iota \varsigma$ ). Not one person (cf. $\varepsilon \iota \varsigma$ in Ga 3:28), but one essence or nature. By the plural $\sigma \nu \mu v \varsigma$ (separate persons) Sabellius is refuted, by $v v \nu \mu$ Arius. So Bengel rightly argues, though Jesus is not referring, of course, to either Sabellius or Arius. The Pharisees had accused Jesus of making himself equal with God as his own special Father (Joh 5:18). Jesus then admitted and proved this claim ( 5:19-30). Now he states it
tersely in this great saying repeated later (17:11, 21 ). Note $\varepsilon v$ used in 1Co $3: 3$ of the oneness in work of the planter and the waterer and in 17:11,23 of the hoped for unity of Christ's disciples. This crisp statement is the climax of Christ's claims concerning the relation between the Father and himself (the Son). They stir the Pharisees to uncontrollable anger.

John 10:31
Took up stones again ( $\left.\varepsilon \beta \alpha \sigma \tau \alpha \sigma \alpha v \pi \alpha \lambda \iota \nu \quad \lambda_{1} \theta o v \varsigma\right)$. First aorist active indicative of $\beta a \sigma \tau \alpha \zeta \omega$, old verb to pick up, to carry (Joh 12:6) , to bear (Ga 6:5). The $\pi \alpha \lambda \iota v$ refers to Joh 8:59 where $\eta \rho \alpha v$ was used. They wanted to kill him also when he made himself equal to God in 5:18. Perhaps here $\varepsilon \beta \alpha \sigma \tau \alpha \sigma \alpha v$ means "they fetched stones from a distance."
 subjunctive of $\lambda_{\mathrm{l}} \theta_{\alpha} \zeta_{\omega}$, late verb (Aristotle, Polybius) from $\lambda_{1} \theta_{0}$ oc (stone, small, Mt 4:6, or large, Mt 28:2 ), in Joh 10:31-33; 11:8; Ac 5:26; 14:19; 2Co 11:25; Heb 11:37, but not in the Synoptics. It means to pelt with stones, to overwhelm with stones.

John 10:32
From the Father ( $\varepsilon к$ тov $\pi \alpha \tau \rho о \varsigma) . ~ P r o c e e d i n g ~ o u t ~ o f ~ t h e ~ F a t h e r ~ a s ~ i n ~ 6: 65 ; ~ 16: 28 ~(c f . ~$ 7:17; 8:42,47) rather than $\pi \alpha \rho \alpha$ as in 1:14; 6:46; 7:29; 17:7.

For which of those works ( $\delta \iota \alpha \pi o \circ v \alpha \nu \tau \omega v \varepsilon \rho \gamma \circ v$ ). Literally, "For what kind of work of them" (referring to the "many good works" $\pi о \lambda \lambda \alpha \varepsilon \rho \gamma \alpha \kappa \alpha \lambda \alpha$ ). Noble and beautiful deeds Jesus had done in Jerusalem like healing the impotent man (chapter 5) and the blind man (chapter 9). Пooov is a qualitative interrogative pronoun pointing to $\kappa \alpha \lambda \alpha$ (good).

Do ye stone me ( $\left.\lambda_{1} \theta \alpha \zeta \varepsilon \tau \varepsilon\right)$. Conative present active indicative, "are ye trying to stone me." They had the stones in their hands stretched back to fling at him, a threatening attitude.

John 10:33
For a good work we stone thee not ( $\pi \varepsilon \rho \kappa \alpha \lambda_{o v} \varepsilon \rho \gamma \circ v$ ov $\lambda_{\imath} \theta \alpha \zeta_{o \mu \varepsilon v) \text { ). "Concerning a }}$ good deed we are not stoning thee." Flat denial that the healing of the blind man on the Sabbath had led them to this attempt ( 8:59) in spite of the facts.

But for blasphemy ( $\alpha \lambda \lambda \alpha \pi \varepsilon \rho \beta \lambda \alpha \sigma \varphi \eta \mu \iota \varsigma)$. See Ac $26: 7$ where $\pi \varepsilon \rho$ with the genitive is also used with $\varepsilon \gamma \kappa \alpha \lambda o u \mu \alpha$ for the charge against Paul. This is the only example in John of the word $\beta \lambda \alpha \sigma \varphi \eta \mu \boldsymbol{\alpha}$ (cf. Mt 12:31).

And because that thou, being a man, makest thyself God (ка от $\sigma v \alpha v \theta \rho \omega \pi о \varsigma \omega v$ тoısıc $\sigma \varepsilon \alpha \cup \tau o v ~ \theta \varepsilon o v)$. In 5:18 they stated the charge more accurately: "He called God his own Father, making himself equal with God." That is, he made himself the Son of God. This he did beyond a doubt. But was it blasphemy? Only if he was not the Son of God. The penalty for blasphemy was death by stoning (Le 24:16; 1Ki 21:10,13 ).

John 10:34
Is it not written? (ovк عбтıv $\gamma \varepsilon \gamma \rho a \mu \mu \varepsilon v o v$;). Periphrastic perfect passive indicative of $\gamma \rho \alpha \varphi \omega$ (as in 2:17) in place of the usual $\gamma \varepsilon \gamma \rho \alpha \pi \tau \alpha$. "Does it not stand written?"

In your law ( $\varepsilon v \tau \omega v o \mu \omega \nu \mu \omega v$ ). From Ps 82:6. The term vouoc (law) applying here to the entire O.T. as in 12:34; 15:25; Ro 3:19; 1Co 14:21. Aleph D Syr-sin. omit $\nu \mu \omega v$, but needlessly. We have it already so from Jesus in 8:17. They posed as the special custodians of the O.T.

I said (o $\tau \varepsilon \omega \varepsilon \varepsilon \pi \alpha$ ). Recitative o o before a direct quotation like our quotation marks. Eita is a late second aorist form of indicative with - $\alpha$ instead of -ov.

Ye are gods ( $\theta$ हo $\varepsilon \sigma \tau \varepsilon$ ). Another direct quotation after $\varepsilon I \pi \alpha$ but without ot. The judges of Israel abused their office and God is represented in Ps 82:6 as calling them "gods" ( $\theta$ عo, elohim) because they were God's representatives. See the same use of elohim in Ex 21:6; 22:9,28 . Jesus meets the rabbis on their own ground in a thoroughly Jewish way.

John 10:35
If he called them gods ( $\varepsilon$ єкєıvou¢ $\varepsilon เ \pi \varepsilon v$ $\theta$ عouৎ). Condition of first class, assumed as true. The conclusion (verse 36) is $v \mu \varepsilon ı \varsigma ~ \lambda \varepsilon \gamma \varepsilon \tau \varepsilon$; ( Do ye say?). As Jews (and rabbis) they are shut out from charging Jesus with blasphemy because of this usage in the O.T. It is a complete ad hominem argument. To be sure, it is in Ps 82:6 a lower use of the term $\theta$ roc, but Jesus did not call himself "Son of Jahweh," but "voos $\theta$ عov" which can mean only "Son of Elohim." It must not be argued, as some modern men do, that Jesus thus disclaims his own deity. He does nothing of the kind. He is simply stopping the mouths of the rabbis from the charge of blasphemy and he does it effectually. The sentence is quite involved, but can be cleared up.
 points to $\varepsilon \kappa \varepsilon เ v o v \varsigma$, before. These judges had no other claim to the term $\theta \varepsilon o$ (elohim).

And the scripture cannot be broken ( $\kappa \alpha$ ov $\delta v v a \tau \alpha \lambda \nu \theta \eta v \alpha \eta \gamma \rho \alpha \varphi \eta$ ). A parenthesis that drives home the pertinency of the appeal, one that the Pharisees had to accept. $\Lambda v \theta \eta v a$ is first aorist passive infinitive of $\lambda v \omega$, to loosen, to break.

John 10:36
Of him whom the Father sanctified and sent into the world (ov о $\pi \alpha \tau \eta \rho \eta \gamma \iota \sigma \varepsilon \varepsilon$ ка
 be, object of $\lambda \varepsilon \gamma \varepsilon \tau \varepsilon$ ) unexpressed. Every word counts heavily here in contrast with the mere judges of Ps 82:6.

Thou blasphemest (oт $\beta \lambda \alpha \sigma \varphi \eta \mu \varepsilon \iota)$ ). Recitative o $\tau$ again before direct quotation.
Because I said (o $\tau \varepsilon \pi \sigma$ ). Causal use of ot and regular form $\varepsilon$ عוтov (cf. $\varepsilon ו \pi \alpha$ in verse 34).

I am the Son of God (vios tov $\theta$ عov $\varepsilon \not \mu)$. Direct quotation again after $\varepsilon \iota \pi o v$. This Jesus had implied long before as in 2:16 (my Father) and had said in 5:18-30 (the Father, the Son), in 9:35 in some MSS., and virtually in 10:30. They will make this charge against Jesus before Pilate ( 19:7). Jesus does not use the article here with vioc, perhaps (Westcott) fixing attention
on the character of Son rather than on the person as in Heb 1:2. There is no answer to this question with its arguments.

John 10:37
If I do not $(\varepsilon$ ov $\pi o \omega \omega)$. Condition of first class, assumed as true, with negative ov, not $\varepsilon \mu \eta=$ unless.

Believe me not ( $\mu \eta \pi \iota \sigma \tau \varepsilon \cup \varepsilon \tau \varepsilon \mu \circ$ ). Prohibition with $\mu \eta$ and the present active imperative. Either "cease believing me" or "do not have the habit of believing me." Jesus rests his case on his doing the works of "my Father" ( $\tau 0 v \pi \alpha \tau \rho o \varsigma ~ \mu o v$ ), repeating his claims to sonship and deity.

John 10:38
But if I do $(\varepsilon \delta \varepsilon \pi o \omega \omega)$. Condition again of the first class, assumed as true, but with the opposite results.

Though ye believe not me ( $\kappa \alpha v \varepsilon \mu \circ \mu \eta \pi \iota \sigma \tau \varepsilon \cup \eta \tau \varepsilon$ ). Condition now of third class, undetermined (but with prospect), "Even if you keep on (present active subjunctive of $\pi \iota \sigma \tau \varepsilon v o$ ) not believing me."

Believe the works ( $\tau о \iota \varsigma \rho \gamma \circ \iota \varsigma \pi \iota \sigma \tau \varepsilon \cup \varepsilon \tau \varepsilon$ ). These stand irrefutable. The claims, character, words, and works of Jesus challenge the world today as then.

That ye may know and understand (iva $\gamma \nu \omega \tau \varepsilon \kappa \alpha \gamma \iota \nu \omega \sigma \kappa \eta \tau \varepsilon$ ). Purpose clause with ${ }^{\imath} \omega \alpha$ and the same verb $\gamma \iota \omega \omega \sigma \kappa \omega$ repeated in different tenses (first $\gamma \nu \omega \tau \varepsilon$, the second ingressive aorist active subjunctive, that ye may come to know; then the present active subjunctive, "that ye may keep on knowing"). This is Christ's deepest wish about his enemies who stand with stones in their uplifted hands to fling at him.

That the Father is in me, and I in the Father (o $\varepsilon \varepsilon \varepsilon \mu \circ$ о $\pi \alpha \tau \eta \rho \kappa \alpha \gamma \omega \varepsilon \nu \tau \omega \pi \alpha \tau \rho$ ). Thus he repeats (verse 30) sharply his real claim to oneness with the Father as his Son, to actual deity. It was a hopeless wish.

John 10:39
They sought again to seize him ( $\varepsilon \zeta \eta \tau 0 \cup v \alpha \cup \tau 0 v \pi \alpha \lambda \iota v \pi \iota \alpha \zeta \alpha)$. Imperfect active, "They kept on seeking to seize (ingressive aorist active infinitive of $\pi \omega \alpha \zeta \omega$ for which see 7:30) as they had tried repeatedly ( $7: 1,30,44 ; 8: 20$ ), but in vain. They gave up the effort to stone him.

Out of their hand ( $\varepsilon \kappa \tau \eta \varsigma \chi \varepsilon \rho \rho \varsigma \varsigma \nu \tau \omega v$ ). Overawed, but still angry, the stones fell to the ground, and Jesus walked out.

John 10:40
Again ( $\pi \alpha \lambda \iota v$ ). Referring to 1:28 (Bethany beyond Jordan). П $\alpha \lambda \iota v$ does not mean that the other visit was a recent one.

At the first ( $\tau 0 \pi \rho \omega \tau o v)$. Adverbial accusative (extent of time). Same idiom in 12:16; 19:39. Here the identical language of $1: 28$ is used with the mere addition of to $\pi \rho \omega \tau$ (отоט $\eta v$ I $\omega$ avŋऽ $\beta \alpha \pi \tau \iota \zeta \omega \nu$, "where John was baptizing").

And there he abode ( $\kappa \alpha \varepsilon \mu \varepsilon v \varepsilon \nu \varepsilon \kappa \varepsilon$ ). Imperfect (continued) active of $\mu \varepsilon \nu \omega$, though some MSS. have the constative aorist active $\varepsilon \mu \varepsilon เ v \varepsilon v$. Probably from here Jesus carried on the first part of the later Perean Ministry (Lu 13:22-16:10) before the visit to Bethany at the raising of Lazarus (Joh 11:1-44 ).

John 10:41
Many came to him ( $\pi 0 \lambda \lambda 0 \eta \lambda \theta o \nu \pi \rho \circ \varsigma \alpha v \tau o \nu$ ). Jesus was busy here and in a more congenial atmosphere than Jerusalem. John wrought no signs the crowds recall, though Jesus did many here (Mt 19:2). The crowds still bear the impress of John's witness to Christ as "true" $(a \lambda \eta \theta \eta)$. Here was prepared soil for Christ.

John 10:42
Many believed on him there ( $\pi \circ \lambda \lambda o \varepsilon \pi \iota \sigma \tau \varepsilon v \sigma \alpha v \varepsilon ı \varsigma \alpha \cup \tau o v \varepsilon \kappa \varepsilon$ ). See 1:12; 2:11 for same idiom. Striking witness to the picture of the Messiah drawn by John. When Jesus came they recognized the original. See Joh 1:29-34. What about our sermons about Jesus if he were to walk down the aisle in visible form according to A.J. Gordon's dream?

## John 11

John 11:1
Was sick ( $\eta v \alpha \sigma \theta \varepsilon v \omega v$ ). Periphrastic imperfect active of $\alpha \sigma \theta \varepsilon v \varepsilon \omega$, old verb (from $\alpha \sigma \theta \varepsilon v \eta \varsigma, ~ a ~ p r i v a t i v e, ~ a n d ~ \sigma \theta \varepsilon v o c$, strength).
 shortened form of Eleazer, only other N.T. use, but in Josephus and rabbinical writings. No connexion between this Lazarus and the one in the parable.
 of Nazareth. This Bethany is about two miles ( 11:18) east of Jerusalem on the south-east slope of Olivet and is now called El Azariyeh, from the name Lazarus. Jesus is still apparently at the other Bethany beyond Jordan ( 10:40). It is doubtful if a distinction is meant here by $\alpha \pi \sigma$ and $\varepsilon \kappa$ between Bethany as the residence and some other village ( $\varepsilon \kappa \tau \eta \varsigma \kappa \omega \mu \eta \varsigma$ ) as the birthplace of Lazarus and the sisters.

Of Mary and Martha (Mapıaৎ ка Map $\theta \alpha \varsigma)$. Note Map $\theta \alpha \varsigma$, not Map $\theta \eta \varsigma$ for the genitive. Elsewhere (Joh 11:19; Lu 10:38) Martha comes first as the mistress and hostess. The two sisters are named for further identification of Lazarus. Martha was apparently the elder sister (11:5,19; Lu 10:38f. ). "The identification of Mary with Mary Magdalene is a mere conjecture supported by no direct evidence, and opposed to the general tenor of the Gospels" (Westcott). John 11:2
And it was that Mary which anointed the Lord with ointment, and wiped his feet

 Lazarus was sick" ( $\eta \varsigma$ o $\alpha \delta \varepsilon \lambda \varphi \circ \varsigma \Lambda \alpha \zeta \alpha \rho о \varsigma \eta \sigma \theta \varepsilon v \varepsilon$ ). There is an evident proleptic allusion to the incident described by John in 12:1-8 just after chapter 11. As John looks back from the end of the century it was all behind him, though the anointing ( $\eta \alpha \lambda \varepsilon ı \psi \alpha \sigma \alpha$, first aorist active articular participle of $\alpha \lambda \varepsilon เ \varphi \omega$, old verb for which see Mr 6:13) took place after the events in chapter 11. The aorist participle is timeless and merely pictures the punctiliar act. The same remark applies to $\varepsilon \kappa \mu \alpha \xi \alpha \sigma \alpha$, old verb $\varepsilon \kappa \mu \alpha \sigma \sigma \omega$, to wipe off or away (Isa 12:3; 13:5; Lu 7:38,44 ). Note the Aramaic form Mapıa as usual in John, but Mapıac in verse 1. When John wrote, it was as Jesus had foretold (Mt 26:13), for the fame of Mary of Bethany rested on the incident of the anointing of Jesus. The effort to link Mary of Bethany with Mary Magdalene and then both names with the sinful woman of $\operatorname{Lu} 7: 36-50$ is gratuitous and to my mind grotesque and cruel to the memory of both Mary of Bethany and Mary Magdalene. Bernard may be taken as a specimen: "The conclusion is inevitable that John (or his editor) regarded Mary of Bethany as the same person who is described by Luke as a $\mu \alpha \rho \tau \omega \lambda$ ся." This critical and artistic heresy has already been discussed in Vol. II on Luke's Gospel. Suffice it here to say that Luke introduces Mary Magdalene as an entirely new character in 8:2 and
that the details in Lu 7:36-50; Joh 12:1-8 have only superficial resemblances and serious disagreements. John is not here alluding to Luke's record, but preparing for his own in chapter 12 . What earthly difficulty is there in two different women under wholly different circumstances doing a similar act for utterly different purposes?

John 11:3
Sent saying ( $\alpha \pi \varepsilon \sigma \tau \varepsilon ı \lambda \nu \lambda \varepsilon \gamma \circ 0 \sigma \alpha$ ). First aorist active indicative of $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$ and present active participle. The message was delivered by the messenger.

Thou lovest ( $\varphi \backslash \lambda \varepsilon ı \varsigma) . \Phi \downarrow \lambda \varepsilon \omega$ means to love as a friend (see $\varphi \backslash \lambda o \varsigma$ in verse 11) and so warmly, while $\alpha \gamma \alpha \pi \alpha \omega$ (akin to $\alpha \gamma \alpha \mu \alpha$, to admire, and $\alpha \gamma \alpha \theta$ o $\varsigma$, good) means high regard. Here both terms occur of the love of Jesus for Lazarus ( $\eta \gamma \alpha \pi \alpha$ in verse 5). Both occur of the Father's love for the Son ( $\alpha \gamma \alpha \pi \alpha$ in 3:35, $\varphi\rangle \lambda \varepsilon$ in 5:20). Hence the distinction is not always observed.

John 11:4
Heard it (aкоибаৎ). The messenger delivered the message of the sisters. The reply of Jesus is for him and for the apostles.

Is not unto death (ouk عбтiv $\pi \rho \circ \varsigma \theta \alpha v a \tau o v)$. Death in the final issue, to remain dead.
 unto death" (final death).

But for the glory of God ( $\alpha \lambda \lambda$ ' $v \pi \varepsilon \rho \tau \eta \varsigma \delta o \xi \eta \varsigma ~ \tau o v ~ \theta \varepsilon o v)$ ). In behalf of God's glory, as the sequel shows. Cf. 9:3 about the man born blind. The death of Lazarus will illustrate God's glory. In some humble sense those who suffer the loss of loved ones are entitled to some comfort from this point made by Jesus about Lazarus. In a supreme way it is true of the death of Christ which he himself calls glorification of himself and God ( 13:31). In 7:39 John had already used $\delta_{0} \xi \alpha \zeta \omega$ of the death of Christ.

That the Son of God may be glorified thereby (ı $\mathfrak{v} \alpha \circ \xi \alpha \sigma \theta \eta$ o vios tov $\theta \varepsilon o v ~ \delta ı ' ~ \alpha v \tau \eta \varsigma) . ~$ Purpose clause with $\iota v \alpha$ and the first aorist passive subjunctive of $\delta o \xi a \zeta \omega$. Here Jesus calls himself "the Son of God." In 8:54 Jesus had said: "It is my Father that glorifieth me." The raising of Lazarus from the tomb will bring glory to the Son of God. See 17:1 for this idea in Christ's prayer. The raising of Lazarus will also bring to an issue his own death and all this involves the glorification of the Father ( $7: 39 ; 12: 16 ; 13: 31 ; 14: 13$ ). The death of Lazarus brings Jesus face to face with his own death.

John 11:5
Now Jesus loved ( $\eta \gamma \alpha \pi \alpha \delta \varepsilon$ ). Imperfect active of $\alpha \gamma \alpha \pi \alpha \omega$ picturing the continued love of Jesus for this noble family where he had his home so often (Lu 10:38-42; Joh 12:1-8). The sisters expected him to come at once and to heal Lazarus.

John 11:6
That he was sick ( $o \tau \alpha \sigma \theta \varepsilon v \varepsilon$ ). Present active indicative retained in indirect discourse after a secondary tense ( $\eta \kappa о \sigma \sigma \varepsilon v$ ).

Two days ( $\delta v o \eta \mu \varepsilon \rho a \varsigma$ ). Accusative of extent of time.
In the place where he was ( $\varepsilon v \omega \eta \nu \tau 0 \pi \omega$ ). Incorporation of the antecedent $\tau 0 \pi \omega$ into the relative clause, "in which place he was." It was long enough for Lazarus to die and seemed unlike Jesus to the sisters.

John 11:7
Then after this ( $\varepsilon \pi \varepsilon \iota \tau \alpha \mu \varepsilon \tau \alpha$ тоито). Eлєıта (only here in John) means thereafter (Lu 16:7) and it is made plainer by the addition of $\mu \varepsilon \tau \alpha$ тovтo (cf. 2:12; 11:11), meaning after the two days had elapsed.

Let us go into Judea again (A $\gamma \omega \mu \varepsilon v \varepsilon \iota \varsigma \tau \eta v$ Iov $\delta \alpha \iota \alpha v \pi \alpha \lambda \iota v$ ). Volitive (hortative) subjunctive of $\alpha \gamma \omega$ (intransitive use as in verses 11,16). They had but recently escaped the rage of the Jews in Jerusalem ( $10: 39$ ) to this haven in Bethany beyond Jordan ( 10:40).

John 11:8
Were but now seeking to stone thee ( $v o v \varepsilon\left\lceil\eta \tau o u v \sigma \varepsilon \lambda_{1} \theta a \sigma \alpha\right)$. Conative imperfect of $\zeta \eta \tau \varepsilon \omega$ with reference to the event narrated in 10:39 in these very words.

Goest thou thither again? ( $\pi \alpha \lambda \iota v$ v $\pi \alpha \gamma \varepsilon \iota \varsigma \varepsilon \kappa \varepsilon ı)$. Present active intransitive use of the compound $v \pi \alpha \gamma \omega$, to withdraw $(6: 21 ; 8: 21)$ from this safe retreat (Vincent). It seemed suicidal madness to go back now.

John 11:9
In the day ( $\tau \eta \varsigma \eta \mu \varepsilon \rho \alpha \varsigma)$. Genitive of time, within the day, the twelve-hour day in contrast with night. The words of Jesus here illustrate what he had said in 9:4. It is not blind fatalism that Jesus proclaims, but the opposite of cowardice. He has full confidence in the Father s purpose about his "hour" which has not yet come. Jesus has courage to face his enemies again to do the Father's will about Lazarus.

If a man walk in the day ( $\varepsilon \alpha \nu \tau \iota \varsigma \pi \varepsilon \rho \iota \pi \alpha \tau \eta \varepsilon \nu \tau \eta \eta \mu \varepsilon \rho \alpha$ ). Condition of the third class, a conceived case and it applies to Jesus who walks in the full glare of noonday. See 8:12 for the contrast between walking in the light and in the dark.

He stumbleth not (ov $\pi \rho о \sigma к о \pi \tau \varepsilon$ ). He does not cut (or bump) against this or that obstacle, for he can see. Ko $\pi \tau \omega$ is to cut and pros, against.

John 11:10
But if a man walk in the night ( $\varepsilon \alpha v \delta \varepsilon \tau \iota \varsigma \pi \varepsilon \rho \iota \pi \alpha \tau \eta \varepsilon \vee \tau \eta v \cup \kappa \tau)$. Third condition again. It is spiritual darkness that Jesus here pictures, but the result is the same. See the same figure in 12:35 (1Jo 2:11). The ancients had poor illumination at night as indeed we did before Edison gave us electric lights. Pedestrians actually used to have little lamps fastened on the feet to light the path.

In him ( $\varepsilon \vee \alpha \cup \tau \omega$ ). Spiritual darkness, the worst of all (cf. Mt 6:23; Joh 8:12 ). Man has the capacity for light, but is not the source of light. "By the application of this principle Christianity is distinguished from Neo-Platonism" (Westcott).

John 11:11

Is fallen asleep (кєкон $\mu \tau \alpha$ ). Perfect passive indicative of $\kappa о \mu \alpha \omega$, old verb to put to sleep. Common as a metaphor for death like our cemetery.

I go ( $\pi$ оогvo $\mu$ ). Futuristic use of the present tense as in 14:2.
That I may awake him out of sleep ( $\quad v \alpha \varepsilon \xi \cup \pi v i \sigma \omega \alpha \nu \tau o v$ ). Purpose clause with $ı v \alpha$ and the first aorist active subjunctive of $\varepsilon \xi \nu \pi v \zeta \zeta \omega$, a late compound ( $\varepsilon \xi, v \pi v \circ \varsigma$, sleep) for the older $\alpha \varphi \cup \pi \nu\llcorner\zeta \omega$, here only in the N.T. See Job 14:12 where also it occurs along with кон оона.

John 11:12
He will recover ( $\sigma \omega \theta \eta \sigma \varepsilon \tau \alpha$ ). Future passive indicative of $\sigma \omega \zeta \omega$ used in its original sense of being or getting well (safe and sound). Conclusion of the condition of the first class ( $\varepsilon$ кєкон $\uparrow \boldsymbol{\tau})$.

John 11:13
Had spoken ( $\varepsilon \iota \emptyset \kappa \varepsilon$ ). Past perfect of $\varepsilon ו \pi o v(\varepsilon \rho \omega)$. The disciples had misunderstood Christ's metaphor for death.

That he spake ( $0 \tau \lambda \varepsilon \gamma \varepsilon$ ). Present active indicative retained in indirect discourse after the secondary tense ( $\varepsilon \delta 0 \xi \alpha v$ ).

Of taking rest in sleep ( $\pi \varepsilon \rho \tau \eta \varsigma$ коњп $\sigma \varepsilon \omega \varsigma ~ \tau o v ~ v \pi о v) . ~ O n l y ~ u s e ~ o f ~ к о њ \mu \eta \sigma \varsigma ~(f r o m ~$ кон $\alpha \omega$ ) in the N.T., but it also was used of death (Sirach 46:19). Hu $\boldsymbol{\pi v o v}$ (in sleep) is objective genitive of $\mathbf{v \pi v o c}$ (sleep, Mt 1:24).

John 11:14
Plainly ( $\pi \alpha \rho \rho \eta \sigma \iota \alpha$ ). Adverb (see on 7:4), without metaphor as in 16:29.
Is dead ( $\alpha \pi \varepsilon \theta \alpha v \varepsilon v$ ). First aorist active indicative, "died."
John 11:15
For your sakes ( $\left.\delta \delta^{\prime} v \mu \alpha \varsigma\right)$. That they may witness his raising from the grave.
That I was not there (oт ovk $\eta \mu \eta \nu \varepsilon \kappa \varepsilon$ ). Imperfect middle $\eta \mu \eta \nu$ of the later Greek instead of the common active $\eta v$ in indirect discourse in place of the usual present retained as in verse 13.

To the intent ye may believe ( $เ v a \pi เ \sigma \tau \varepsilon \cup \sigma \eta \tau \varepsilon$ ). Purpose clause with $\stackrel{v \alpha}{ }$ and the ingressive aorist active subjunctive, "that ye may come to believe" (more than you do). See the same use of the ingressive aorist in $\varepsilon \pi \iota \sigma \tau \varepsilon \cup \sigma a v(2: 11)$ where the disciples gained in belief.

Nevertheless let us go to him ( $\alpha \lambda \lambda \alpha \alpha \gamma \omega \mu \varepsilon v \pi \rho \circ \varsigma \alpha \cup \tau o v)$. Volitive subjunctive, repeating the proposal of verse 7. He is dead, but no matter, yea all the more let us go on to him.

John 11:16
Didymus ( $\Delta \Delta \delta \nu \mu \circ \varsigma)$. The word means twin. Clearly Thomas had a twin brother or sister. Applied two other times to him ( $20: 24 ; 21: 2$ ). The Aramaic word for Thomas means Twin and Didymus is just the Greek equivalent of Thomas. He may even in Greek circles have been called Didymus.

His fellow disciples ( $\tau$ оця $\sigma u v \mu \alpha \theta \eta \tau \alpha ı \varsigma) . ~ D a t i v e ~ c a s e ~ a n d ~ a r t i c l e ~ u s e ~ l i k e ~ " h i s . " ~ O n l y ~ u s e ~$ of $\sigma \cup v \mu \alpha \theta \eta \tau \varepsilon \varsigma$ in the N.T., rare word (in Plato).

Us also ( $\kappa \alpha \eta \mu \varepsilon ı \varsigma)$. As well as Jesus, since he is bent on going.
That we may die with him ( $เ v \alpha \alpha \pi o \theta \alpha \nu \omega \mu \varepsilon \nu \mu \varepsilon \tau^{\prime} \alpha v \tau o v$ ). Purpose clause with $v \alpha a$ and the second aorist active subjunctive of $\alpha \pi o \theta v \eta \sigma \kappa \omega$. Die with Jesus, Thomas means. Lazarus is already dead and they will kill Jesus (verse 8). Pessimistic courage surely.

John 11:17
Found ( $\varepsilon v \rho \varepsilon v$ ). Second aorist active indicative of $\varepsilon \cup \rho \iota \sigma \kappa \omega$.
That he had been in the tomb four days already ( $\alpha \cup \tau o v \tau \varepsilon \sigma \sigma \alpha \rho \alpha \varsigma \eta \delta \eta \eta \mu \varepsilon \rho \alpha \varsigma \varepsilon \chi o v \tau \alpha$ ). Literally, "him (accusative object of $\varepsilon v \rho \varepsilon v$ ) having already four days in the tomb." See 5:5 for the same idiom ( $\varepsilon \tau \eta \varepsilon \chi \omega v$ ) for expression of time (having 38 years). In Jewish custom burial took place on the day of death (Ac 6:6,10).

John 11:18
About fifteen furlongs off ( $\omega \varsigma \alpha \pi 0 \sigma \tau \alpha \delta \iota \omega \nu \delta \varepsilon \kappa \alpha \pi \varepsilon \nu \tau \varepsilon$ ). The idiom of $\alpha \pi 0$ with the ablative for distance is like the Latin a millibus passum duobus (Caesar, Bell. Gall. ii. 7), but it ( $\pi \rho 0$ also, Joh 12:1 ) occurs already in the Doric and in the Koine often (Moulton, Proleg., p. 101; Robertson, Grammar, p. 110). See it again in 21:8; Re 14:20 .

John 11:19
Had come $(\varepsilon \lambda \eta \lambda v \theta \varepsilon ı \sigma \alpha v)$. Past perfect of $\varepsilon \rho \chi \circ \mu \alpha$. These Jews were probably not hostile to Jesus. There were seven days of solemn mourning (1Sa 31:13). The presence of so many indicates the prominence of the family.

To Martha and Mary ( $\pi \rho \circ \varsigma \tau \eta \nu \operatorname{Ma\rho } \theta \alpha \nu \kappa \alpha \operatorname{Ma\rho ı} \alpha \mu$ ). Correct text, not the Textus Receptus $\pi \rho \circ \varsigma \tau \alpha \varsigma \pi \varepsilon \rho$ MapӨav ка Mapıац (to the women about Martha and Mary).

To console them (ıva $\pi \alpha \rho \alpha \mu \nu \theta \eta \sigma \omega v \tau \alpha)$. Purpose clause with $\tau v \alpha$ and first aorist middle subjunctive of $\pi \alpha \rho \alpha \mu \nu \theta \varepsilon o \mu \alpha$, old verb ( $\pi \alpha \rho \alpha$, beside, $\mu v \theta$ o $\varsigma$, word), to put in a word beside, to offer consolation. Again in verse 31. See 1Th 2:11; 5:14. See Job 2:13 for these visits of consolation, often deplorable enough, though kindly meant.

John 11:20
That Jesus was coming ( $o \tau \operatorname{I\eta \sigma ov} \varepsilon \rho \rho \chi \varepsilon \tau \alpha$ ). Present middle indicative retained in indirect discourse after the secondary tense $\eta \kappa о v \sigma \varepsilon \nu$ (first aorist active).

Went and met him ( $v \pi \eta v \tau \eta \sigma \varepsilon v \alpha v \tau \omega$ ). First aorist (ingressive) active indicative of $v \pi \alpha v \tau \alpha \omega$, old compound verb, to go to meet (Mt 8:28) with the associative instrumental case $\alpha v \tau \omega$.

But Mary still sat in the house (Mapıa $\delta \varepsilon \varepsilon \nu \tau \omega$ oıк $\omega \varepsilon \kappa \alpha \theta \varepsilon \zeta \varepsilon \tau 0)$. Imperfect middle of $\kappa \alpha \theta \varepsilon \zeta$ о $\mu \alpha$, old verb to sit down, graphic picture of Mary, "while Mary was sitting in the house." Both Martha and Mary act true to form here as in Lu 10:38-42 .

John 11:21
Lord, if thou hadst been here, my brother had not died (Kvpıє, $\varepsilon \eta \varsigma \omega \delta \varepsilon$ оvк $\alpha v$ $\alpha \pi \varepsilon \theta a v \varepsilon v$ o $\alpha \delta \varepsilon \lambda \varphi \circ \varsigma \mu \circ v$ ). Condition of the second class with $\varepsilon$ and the imperfect $\eta \varsigma$ (no aorist of $\varepsilon \mu$, to be) in the condition and av with the second aorist active indicative of
$\alpha \pi 0 \theta v \eta \sigma \kappa \omega$. Mary (verse 32) uses these identical words to Jesus. Clearly they had said so to each other with wistful longing if not with a bit of reproach for his delay. But they used $\eta \varsigma$, not $\eta \lambda \theta \varepsilon \varsigma$ or $\varepsilon \gamma \varepsilon v o v$. But busy, practical Martha comes to the point.

John 11:22
And even now I know ( $\kappa \alpha$ vuv ot $\delta \alpha$ ). Rather just, "Even now I know." A $\lambda \lambda \alpha$ (but) of the Textus Receptus is not genuine.

Whatsoever thou shalt ask of God (o $\sigma \alpha \alpha v \alpha u \tau \eta \sigma \eta$ tov $\theta \varepsilon o v$ ). Indefinite relative (o $\sigma \alpha$, as many things as) with $\alpha v$ and the first aorist middle (indirect middle, thou thyself asking) subjunctive of $\alpha \iota \tau \varepsilon \omega$. Martha uses ait $\varepsilon \omega$ (usual word of prayer of men to God) rather than $\varepsilon \rho \omega \tau \alpha \omega$ (usual word of Jesus praying to the Father), but in 16:23 we have $\varepsilon \rho \omega \tau \alpha \omega$ used of prayer to Jesus and aıt $\varepsilon \omega$ of prayer to God. But the distinction is not to be pressed. "As many things as thou dost ask of God."

God will give ( $\delta \omega \sigma \varepsilon$ oo o $\theta \varepsilon$ oऽ). Repetition of o $\theta \varepsilon o \varsigma$ for emphasis. Martha still has courageous faith in the power of God through Jesus and Jesus in verse 41 says practically what she has said here.

John 11:23
Thy brother will rise again ( $\alpha v \alpha \sigma \tau \eta \sigma \varepsilon \tau \alpha$ o $\alpha \delta \varepsilon \lambda \varphi \circ \varsigma \sigma o v$ ). Future middle (intransitive) of $\alpha v ı \sigma \tau \eta \mu$. The words promise Martha what she has asked for, if Jesus means that.

John 11:24
In the resurrection at the last day ( $\varepsilon v \tau \eta \alpha v a \sigma \tau \alpha \sigma \varepsilon \varepsilon v \tau \eta \varepsilon \sigma \chi \alpha \tau \eta \eta \mu \varepsilon \rho \alpha)$. Did Jesus mean only that? She believed it, of course, and such comfort is often offered in case of death, but that idea did not console Martha and is not what she hinted at in verse 22 .

John 11:25
I am the resurrection and the life ( $\mathrm{E} \gamma \omega \varepsilon \mu \eta$ $\alpha v a \sigma \tau \alpha \sigma ı \varsigma \kappa \eta \zeta \omega \eta)$. This reply is startling enough. They are not mere doctrines about future events, but present realities in Jesus himself. "The Resurrection is one manifestation of the Life: it is involved in the Life" (Westcott). Note the article with both $\alpha v a \sigma \tau \alpha \sigma \iota \varsigma ~ a n d ~ \zeta \omega \eta$. Jesus had taught the future resurrection often ( $6: 39$ ), but here he means more, even that Lazarus is now alive.

Though he die (каv a $\pi$ о $\theta a v \eta$ ). "Even if he die," condition (concession) of third class with $\kappa \alpha \varepsilon \alpha v$ ( $\kappa \alpha v$ ) and the second aorist active subjunctive of $\alpha \pi o \theta v \eta \sigma \kappa \omega$ (physical death, he means).

Yet shall he live ( $\zeta \eta \sigma \varepsilon \tau \alpha$ ). Future middle of $\zeta \alpha \omega$ (spiritual life, of course).
John 11:26
 second aorist active subjunctive of $\alpha \pi \circ \theta v \eta \sigma \kappa \omega$ again (but spiritual death, this time), "shall not die for ever" (eternal death).

Believest thou this? ( $\pi\llcorner\sigma \tau \varepsilon \cup \varepsilon \varsigma \varsigma ~ \tau o v \tau o ;) ~ S u d d e n ~ t e s t ~ o f ~ M a r t h a ' s ~ i n s i g h t ~ a n d ~ f a i t h ~ w i t h ~$ all the subtle turns of thought involved.

## John 11:27

Yea, Lord (Naı, кирıє). Martha probably did not understand all that Jesus said and meant, but she did believe in the future resurrection, in eternal life for believers in Christ, in the power of Christ to raise even the dead here and now. She had heroic faith and makes now her own confession of faith in words that outrank those of Peter in Mt 16:16 because she makes hers with her brother dead now four days and with the hope that Jesus will raise him up now.

I have believed ( $\pi \varepsilon \pi \iota \sigma \tau \varepsilon \cup \kappa \alpha)$. Perfect active indicative of $\pi \iota \sigma \tau \varepsilon \cup \omega$. It is my settled and firm faith. Peter uses this same tense in 6:69.

That thou art the Son of God (o $\sigma v \varepsilon$ o X X $\sigma \tau \tau \varsigma$ o vioc $\tau 0 v \theta \varepsilon o v$ ). The Messiah or the Christ ( $1: 41$ ) was to be also "the Son of God" as the Baptist said he had found Jesus to be ( 1:34), as Peter confessed on Hermon for the apostles (Mt 16:16) , as Jesus claimed to be (Joh 11:41) and confessed on oath before Caiaphas that he was (Mt 26:63f. ), and as John stated that it was his purpose to prove in his Gospel ( $20: 31$ ). But no one said it under more trying circumstances than Martha.
 Greek. This was a popular way of putting the people's expectation (6:14; Mt 11:3). Jesus himself spoke of his coming into the world (9:39; 16:28; 8:37).

John 11:28
Called Mary ( $\varepsilon \varphi \omega \nu \eta \sigma \varepsilon \nu \operatorname{M\alpha \rho ı} \alpha \mu)$. First aorist active indicative of $\varphi \omega v \varepsilon \omega$. Out of the house and away from the crowd.

Secretly $(\lambda \alpha \theta \rho \alpha)$. Old adverb from $\lambda \alpha \theta \rho \circ \varsigma(\lambda \alpha v \theta \alpha v \omega)$. To tell her the glad news.

Is here ( $\pi \alpha \rho \varepsilon \sigma \tau \iota v$ ). "Is present."
Calleth thee ( $\varphi \omega \vee \varepsilon \sigma \varepsilon$ ). This rouses Mary.
John 11:29
And she ( $\kappa \alpha \varepsilon \kappa \varepsilon เ \nu \eta)$. Emphatic use of the demonstrative $\varepsilon \kappa \varepsilon เ \nu \circ \varsigma$ as often in John, "And that one."

Arose quickly $(\eta \gamma \varepsilon \rho \theta \eta)$. First aorist (ingressive) passive of $\varepsilon \gamma \varepsilon \iota \rho \omega$ and intransitive. Naturally so on the sudden impulse of joy.

And went unto him ( $\kappa \alpha \eta \rho \chi \varepsilon \tau о \pi \rho \circ \varsigma \alpha \cup \tau \circ v$ ). Imperfect middle, possibly inchoative, started towards him, certainly picturing her as she was going.

John 11:30
Now Jesus was not yet come into the town (ov $0 \omega \delta \varepsilon \varepsilon \lambda \eta \lambda \nu \theta \varepsilon$ o I $\eta \sigma o v \varsigma \varepsilon ء \varsigma \tau \eta \kappa \omega \mu \eta \nu$ ). Explanatory parenthesis with past perfect as in verse 19. Martha had her interview while he was still coming (verse 20) and left him (went off, $\alpha \pi \eta \lambda \theta \varepsilon v$, verse 28) to hurry to Mary with the news. Why Jesus tarried still where he had met Martha we do not know. Westcott says, "as though He would meet the sisters away from the crowd of mourners."

## John 11:31

Followed her ( $\eta \kappa о \lambda o v \theta \eta \sigma \alpha v \alpha \cup \tau \eta$ ). First aorist active indicative of $\alpha \kappa о \lambda о \cup \theta \varepsilon \omega$ with associative instrumental case ( $\alpha \cup \tau \eta$ ). This crowd of consolers ( $\pi \alpha \rho \alpha \mu \nu \theta o v \mu \varepsilon v o$ ) meant kindly enough, but did the one wrong thing for Mary wished to see Jesus alone. People with kind notions often so act. The secrecy of Martha (verse 28) was of no avail.

Supposing that she was going unto the tomb ( $\delta о \xi \alpha \nu \tau \varepsilon \varsigma ~ о \tau ~ v \pi а ү \varepsilon ~ \varepsilon ı \varsigma ~ \tau о ~ \mu \nu \eta \mu \varepsilon ь о v) . ~$ First aorist active participle of $\delta$ окє $\omega$, justifying their conduct by a wrong inference. Note retention of present tense $v \pi \alpha \gamma \varepsilon$ in indirect discourse after the secondary tense $\eta \kappa 0 \lambda o v \theta \eta \sigma \alpha v$.

To weep there ( $\mathfrak{v a} \kappa \lambda \alpha v \sigma \eta \varepsilon \kappa \varepsilon$ ). Purpose clause with $t v \alpha$ and the first aorist active subjunctive of $\kappa \lambda \alpha \omega \omega$, old verb to weep. Sometimes to wail or howl in oriental style of grief, but surely not that here. At any rate this supposed purpose of Mary was a real reason for this crowd
not to go with her.
John 11:32
Fell down at his feet ( $\varepsilon \pi \varepsilon \sigma \varepsilon \nu$ autov $\pi \rho \circ \varsigma$ touc $\pi$ по $\delta a \varsigma$ ). Second aorist active of $\pi \iota \pi \tau \omega$, to fall. Note unusual position of autov. This impulsive act like Mary. She said precisely what Martha had said to Jesus (verse 21). But she said no more, only wept (verse 33).

John 11:33
When Jesus therefore saw her weeping (I $\eta \sigma o u c ~ o u v \omega \varsigma \varepsilon \iota \delta \varepsilon v \alpha \nu \tau \eta \nu \kappa \lambda \alpha \circ v \sigma \alpha v$ ). Proleptic position of "Jesus," "Jesus therefore when he saw." She was weeping at the feet of Jesus, not at the tomb.
 genuine, that of the Jews was partly perfunctory and professional and probably actual "wailing" as the verb $\kappa \lambda \alpha \omega \omega$ can mean. K $\lambda a \omega \omega$ is joined with $\alpha \lambda \alpha \lambda \alpha \zeta \omega$ in Mr 5:38, with o $\lambda \mathrm{o} \lambda \nu \zeta \omega$ in Jas 5:1, with $\theta$ o $\rho \nu \beta \varepsilon \omega$ in $\mathrm{Mr} 5: 39$, with $\pi \varepsilon v \theta \varepsilon \omega$ in Mr 16:10. It was an incongruous combination.

He groaned in the spirit ( $\varepsilon \nu \varepsilon \beta \rho \mu \eta \sigma \alpha \tau o ~ \tau \omega \pi \nu \varepsilon \nu \mu \alpha \tau)$. First aorist middle indicative of $\varepsilon \mu \beta \rho \mu \mu \alpha \mu \alpha$, old verb (from $\varepsilon v$, and $\beta \rho \mu \eta$, strength) to snort with anger like a horse. It occurs in the LXX ( Da 11:30) for violent displeasure. The notion of indignation is present in the other examples of the word in the N.T. (Mr 1:43; 14:5; Mt 9:30). So it seems best to see that sense here and in verse 38 . The presence of these Jews, the grief of Mary, Christ's own concern, the problem of the raising of Lazarus--all greatly agitated the spirit of Jesus (locative case $\tau \omega \pi v \varepsilon v \mu \alpha \tau)$. He struggled for self-control.

Was troubled ( $\varepsilon \tau \alpha \rho \alpha \xi \varepsilon v \varepsilon \alpha \cup \tau o v)$. First aorist active indicative of $\tau \alpha \rho \alpha \sigma \sigma \omega$, old verb to disturb, to agitate, with the reflexive pronoun, "he agitated himself" (not passive voice, not middle). "His sympathy with the weeping sister and the wailing crowd caused this deep emotion" (Dods). Some indignation at the loud wailing would only add to the agitation of Jesus.

## John 11:34

Where have ye laid him? (Поv $\tau \varepsilon \theta \varepsilon เ \kappa \alpha \tau \varepsilon ~ \alpha \cup \tau о v ;)$. Perfect active indicative of $\tau \iota \theta \eta \mu$. A simple question for information. The only other like it in John is in $6: 6$ where it is expressly stated that Jesus knew what he was going to do. So it was here, only he politely asked for direction to the tomb of Lazarus. The people invite him to come and see, the very language used by Philip to Nathanael ( $1: 46$ ). It was a natural and polite reply as they would show Jesus the way, but they had no idea of his purpose.

John 11:35
Jesus wept ( $\varepsilon \delta \alpha \kappa \rho v \sigma \varepsilon v$ o I $\eta \sigma 0 \cup \varsigma)$. Ingressive first aorist active indicative of $\delta \alpha \kappa \rho v \omega$, old verb from $\delta \alpha \kappa \rho v$ or $\delta \alpha \kappa \rho v o v$, a tear (Ac 20:19), only here in N.T. It never means to wail, as $\kappa \lambda \alpha \iota \omega$ sometimes does. "Jesus burst into tears." K $\lambda \omega \iota \omega$ is used of Jesus in Lu 19:41. See Heb 5:7 "with strong crying and tears" ( $\mu \varepsilon \tau \alpha \kappa \rho \alpha v \gamma \eta \varsigma \kappa \alpha \delta \alpha \kappa \rho \nu \omega \nu$ ). Apparently this was as Jesus started towards (see verse 38) the tomb. In a sense it was a reaction from the severe strain in verse 33, but chiefly it was the sheer human sympathy of his heart with Martha and Mary touched with the feeling of our common weakness (Heb 4:15). Often all that we can do is to shed tears in grief too deep for words. Jesus understood and understands. This is the shortest verse in the Bible, but no verse carries more meaning in it.

John 11:36
Loved $(\varepsilon \varphi i \lambda \varepsilon)$. As in verse 3 which see. Imperfect active. Even the Jews saw that Jesus loved Lazarus.

## John 11:37

 say $\delta v v a \tau \alpha$ (can, present middle indicative). But clearly the opening of the blind man's eyes (chapter 9) had made a lasting impression on some of these Jews, for it was done three months ago.

Have caused that this man also should not die ( $\pi \circ \imath \sigma \alpha \iota v \alpha \kappa \alpha$ оvтоৎ $\mu \eta \alpha \pi \circ \theta \alpha v \eta$ ). First aorist active infinitive of $\pi o \iota \varepsilon \omega$ with $\tau \nu \alpha$, like the Latin facere ut (sub-final use, Robertson, Grammar, p. 985), with the second aorist active subjunctive $\alpha \pi o \theta \alpha \nu \eta$ and negative $\mu \eta$. These Jews share the view expressed by Martha (verse 21) and Mary (verse 32) that Jesus could have
prevented the death of Lazarus.
John 11:38
Again groaning in himself ( $\pi \alpha \lambda \iota \nu \varepsilon \mu \beta \rho \mu \omega \mu \varepsilon \nu \circ \varsigma \varepsilon v \varepsilon \alpha \nu \tau \omega$ ). Direct reference to the use of this same word (present middle participle here) in verse 33, only with $\varepsilon v \varepsilon \alpha v \tau \omega$ (in himself) rather than $\tau \omega \pi v \varepsilon v \mu \alpha \tau$ (in his spirit), practically the same idea. The speculation concerning his power stirred the depths of his nature again.

Cometh to the tomb ( $\varepsilon \rho \chi \varepsilon \tau \alpha \varepsilon \iota \varsigma \tau о \mu \nu \eta \mu \varepsilon เ \circ v$ ). Vivid historical present.
A cave ( $\sigma \pi \eta \lambda \alpha \iota v$ ). Old word (from $\sigma \pi \varepsilon \sigma \varsigma$, cavern). Cf. Mt 21:13.

Lay against it ( $\varepsilon \pi \varepsilon \kappa \varepsilon \iota \tau o \varepsilon \pi^{\prime} \alpha v \tau \omega$ ). Imperfect middle of $\varepsilon \pi \iota \kappa \varepsilon \mu \alpha$, old verb to lie upon as in 21:9 and figuratively ( 1 Co 9:16 ). Note repetition of $\varepsilon \pi$ with locative case. The use of a cave for burial was common (Ge 23:19). Either the body was let down through a horizontal opening (hardly so here) or put in a tomb cut in the face of the rock (if so, $\varepsilon \pi$ can mean "against"). The stones were used to keep away wild animals from the bodies.

John 11:39
Take ye away the stone ( $\alpha \rho \alpha \tau \varepsilon \tau \operatorname{\tau ov} \lambda_{1} \theta o v$ ). First aorist active imperative of $\alpha \rho \rho \omega$. They could do this much without the exercise of Christ's divine power. It was a startling command to them.

By this time he stinketh ( $\eta \delta \eta \mathrm{o} \zeta \varepsilon)$. Present active indicative of old verb, here only in N.T. (cf. Ex 8:14 ). It means to give out an odour, either good or bad.

For he hath been dead four days ( $\tau \varepsilon \tau \alpha \rho \tau \alpha \iota \rho ~ \gamma \alpha \rho \varepsilon \sigma \tau \iota v)$. The Greek simply says, "For he is a fourth-day man." It is an old ordinal numeral from тetapтoৎ (fourth). Herodotus (ii. 89) has $\tau \varepsilon \tau \alpha \rho \tau \alpha \iota \circ \varsigma \gamma \varepsilon v \varepsilon \sigma \theta a$ of one four days dead as here. The word is only here in the N.T. The same idiom occurs in Ac 28:13 with $\delta \varepsilon v \tau \varepsilon \rho \alpha \circ$ (second-day men). Lightfoot (Hor. Hebr.) quotes a Jewish tradition (Beresh. Rabba) to the effect that the soul hovers around the tomb for three days hoping to return to the body, but on the fourth day leaves it. But there is no suggestion here that Martha held that notion. Her protest is a natural one in spite of her strong faith in verses 22-27.

John 11:40
Said I not unto thee? (Оvк عıпоv бor;). Jesus pointedly reminds Martha of his promise to raise Lazarus (verses 25f. ).

That if thou believedst (o $\tau \varepsilon \alpha v \pi \iota \sigma \tau \varepsilon \cup \sigma \eta \vdash)$ ). Indirect discourse with $\varepsilon a v$ and the first aorist active subjunctive (condition of third class) retained after the secondary tense $\varepsilon$ عוтov.
 тоито; (Believest thou this?). He meant to test Martha as to her faith already hinted at (verse 22) on this very point. Jesus had also spoken of increase of faith on the part of the disciples (verse 15).

Thou shouldest see the glory of God ( $o \psi \eta \tau \eta \nu \delta o \xi \alpha \nu$ tov $\theta \varepsilon o v$ ). Future middle indicative of the old defective verb opa $\omega$ retained in the conclusion of this condition in indirect discourse. Jesus means the glory of God as shown in the resurrection of Lazarus as he had already said to the disciples (verse 4) and as he meant Martha to understand (verse 25) and may in fact have said to her (the report of the conversation is clearly abridged). Hence Bernard's difficulty in seeing how Martha could understand the words of Jesus about the resurrection of Lazarus here and now seems fanciful and far-fetched.

John 11:41

So they took away the stone ( $\eta \rho \alpha v$ ouv $\left.\tau 0 v \lambda_{1} \theta o v\right)$ ). First aorist active indicative of $\alpha \iota \rho \omega$, but without the explanatory gloss of the Textus Receptus "from the place where the dead was laid" (not genuine).

I thank thee that thou heardest me ( $\varepsilon u \chi \alpha \rho ı \tau \omega$ бо о $\eta$ коибаৎ $\mu \circ$ ). See 6:11 for $\varepsilon v \chi \propto \rho \iota \sigma \tau \varepsilon \omega$. Clearly Jesus had prayed to the Father concerning the raising of Lazarus. He has the answer before he acts. "No pomp of incantation, no wrestling in prayer even; but simple words of thanksgiving, as if already Lazarus was restored" (Dods). Jesus well knew the issues involved on this occasion. If he failed, his own claims to be the Son of God (the Messiah), would be hopelessly discredited with all. If he succeeded, the rulers would be so embittered as to compass his own death.

John 11:42
And I knew ( $\varepsilon \gamma \omega \delta \varepsilon \eta \downarrow \delta \varepsilon \iota v$ ). Past perfect of oı $\delta \alpha$ used as imperfect. This confident knowledge is no new experience with Jesus. It has "always" ( $\pi \alpha \vee \tau 0 \tau \varepsilon$ ) been so.

Which standeth around ( $\tau 0 v \pi \varepsilon \rho เ \varepsilon \sigma \tau \omega \tau \alpha$ ). Second perfect active (intransitive) articular participle of $\pi \varepsilon \rho u \sigma \tau \eta \mu$. It was a picturesque and perilous scene.

That they may believe (iva $\pi เ \sigma \tau \varepsilon v \sigma \omega \sigma เ v$ ). Purpose clause with iva and first ingressive aorist active subjunctive of $\pi \iota \sigma \tau \varepsilon \cup \omega$, "that they may come to believe."

That thou didst send me ( $о \tau \sigma v \mu \varepsilon \alpha \pi \varepsilon \sigma \tau \varepsilon \lambda \lambda \varsigma)$ ). First aorist active indicative of $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$ and note position of $\sigma v \mu \varepsilon$ side by side. This claim Jesus had long ago made ( $5: 36$ ) and had repeatedly urged (10:25,38). Here was a supreme opportunity and Jesus opens his heart about it.

John 11:43
He cried with a loud voice ( $\varphi \omega v \eta \mu \varepsilon \gamma \alpha \lambda \eta \varepsilon \kappa \rho \alpha \cup \gamma \alpha \sigma \varepsilon v$ ). First aorist active indicative of краиүа $\zeta \omega$, old and rare word from краuү (Mt 25:6). See Mt 12:19. Occurs again in Joh 18:40; 19:6,12. Only once in the LXX (Ezr 3:13) and with $\varphi \omega \nu \eta \mu \varepsilon \gamma a \lambda \eta$ (either locative or instrumental case makes sense) as here. For this "elevated (great) voice" see also Mt 24:31; Mr 15:34,37; Re 1:10; 21:3. The loud voice was not for the benefit of Lazarus, but for the sake of the crowd standing around that they might see that Lazarus came forth simultaneously with the command of Jesus.

Lazarus, come forth ( $\Lambda \alpha \zeta \alpha \rho \varepsilon, \delta \varepsilon v \rho o \varepsilon \xi \omega)$. "Hither out." No verb, only the two adverbs, $\delta \varepsilon u \rho o$ here alone in John. Lazarus heard and obeyed the summons.

John 11:44
He that was dead came forth ( $\varepsilon \xi \eta \lambda \theta \varepsilon v$ o $\tau \varepsilon \theta v \eta \kappa \omega \varsigma)$. Literally, "Came out the dead man," (effective aorist active indicative and perfect active articular participle of $\theta v \eta \sigma \kappa \omega)$. Just as he was and at once.
 of $\delta \varepsilon \omega$ with the accusative loosely retained according to the common Greek idiom (Robertson,

Grammar, p. 486), but literally "as to the feet and hands" (opposite order from the English). Probably the legs were bound separately.

With grave-clothes (кецрıaı̧). Or "with bands." Instrumental case of this late and rare word (in Plutarch, medical papyrus in the form кпрıa, and Pr 7:16 ). Only here in N.T.

His face ( $\eta$ о $\psi \iota \varsigma \alpha \cup \tau 0 v$ ). Old word, but $\pi \rho o \sigma \omega \pi \sigma v$ is usual in N.T. See Re 1:16 for another instance.

Was bound about ( $\pi \varepsilon \rho เ \varepsilon \delta \varepsilon \delta \varepsilon \tau o$ ). Past perfect passive of $\pi \varepsilon \rho เ \delta \varepsilon \omega$, old verb to bind around, only here in N.T.

With a napkin ( $\sigma o v \delta \alpha \rho \iota \omega$ ). Instrumental case of $\sigma o v \delta a \rho ı v$ (Latin word sudarium from sudor, sweat). In N.T. here, 20:7; Lu 19:20; Ac 19:12 . Our handkerchief.

Loose him ( $\lambda \nu \sigma \alpha \tau \varepsilon$ avtov). First aorist active imperative of $\lambda \nu \omega$. From the various bands.

Let him go ( $\alpha \varphi \varepsilon \tau \varepsilon \alpha \cup \tau о v \cup \pi \alpha \gamma \varepsilon เ v)$. Second aorist active imperative of $\alpha \varphi \iota \eta \mu$ and present active infinitive.

John 11:45
Beheld that which he did ( $\theta \varepsilon \alpha \sigma \alpha \mu \varepsilon v o$ o $\varepsilon \pi о ⿰ \eta \sigma \varepsilon v$ ). First aorist middle participle of $\theta \varepsilon \alpha o \mu \alpha$ and first aorist active indicative of $\pi$ поו $\omega$ in the relative (o) clause. They were eyewitnesses of all the details and did not depend on hearsay.

Believed on him ( $\varepsilon \pi \iota \sigma \tau \varepsilon \cup \sigma a v ~ \varepsilon ı \varsigma ~ a u \tau o v) . ~ S u c h ~ a ~ r e s u l t ~ h a d ~ h a p p e n e d ~ b e f o r e ~(7: 31), ~$ and all the more in the presence of this tremendous miracle which held many to Jesus (12:11,17).

John 11:46
Went away to the Pharisees ( $\alpha \pi \eta \lambda$ Өov $\pi \rho \circ \varsigma$ тouc Фарıбaıovৎ). Second aorist active indicative of $\alpha \pi \varepsilon \rho \chi \circ \mu \alpha$. This "some" ( $\tau \iota v \varepsilon \varsigma$ ) did who were deeply impressed and yet who did not have the courage to break away from the rabbis without consulting them. It was a crisis for the Sanhedrin.

John 11:47
Gathered a council ( $\sigma u v \eta \gamma \alpha \gamma \circ v \sigma u v \varepsilon \delta \rho ı v$ ). Second aorist active indicative of $\sigma v v \alpha \gamma \omega$ and $\sigma u v \varepsilon \delta \rho \circ v$, the regular word for the Sanhedrin (Mt 5:22, etc.), only here in John. Here a sitting or session of the Sanhedrin. Both chief priests (Sadducees) and Pharisees (mentioned no more in John after 7:57 save 12:19,42 ) combine in the call (cf. 7:32). From now on the chief priests (Sadducees) take the lead in the attacks on Jesus, though loyally supported by their opponents (the Pharisees).

And said (ка $\varepsilon \lambda \varepsilon \gamma \circ v$ ). Imperfect active of $\lambda \varepsilon \gamma \omega$, perhaps inchoative, "began to say."
What do we? (T $\pi о \iota o \nu \mu \varepsilon v ;$ ). Present active (linear) indicative of $\pi$ о $\varepsilon \omega$. Literally, "What are we doing?"

Doeth ( $\pi 01 \varepsilon$ ). Better, "is doing" (present, linear action). He is active and we are idle. There is no mention of the raising of Lazarus as a fact, but it is evidently inoluded in the "many signs."

John 11:48
If we let him thus alone ( $\varepsilon \alpha v \alpha \varphi \omega \mu \varepsilon v \alpha v \tau o v o v \tau \omega \varsigma)$. Condition of third class with $\varepsilon \alpha v$ and second aorist active subjunctive of $\alpha \pi ı \eta \mu$. "Suppose we leave him thus alone." Suppose also that he keeps on raising the dead right here next door to Jerusalem!

All will believe on him ( $\pi \alpha v \tau \varepsilon \varsigma \pi \iota \sigma \tau \varepsilon \cup \sigma 0 \cup \sigma \iota v \varepsilon เ \varsigma ~ \alpha \cup \tau \circ v)$. Future active of $\pi \iota \sigma \tau \varepsilon v \omega$. The inevitable conclusion, "all" ( $\pi \alpha \vee \tau \varepsilon \varsigma)$, not just "some" ( $\tau \iota v \varepsilon \varsigma)$. as now.

And the Romans will come ( $\kappa \alpha \varepsilon \lambda \varepsilon v \sigma о \nu \tau \alpha$ о $\mathrm{P} \omega \mu \alpha \circ$ ). Another inevitable result with the future middle of $\varepsilon \rho \chi o \mu \alpha$. Only if the people take Jesus as their political Messiah ( 6:15) as they had once started to do. This is a curious muddle for the rulers knew that Jesus did not claim to be a political Messiah and would not be a rival to Caesar. And yet they use this fear (their own belief about the Messiah) to stir themselves to frenzy as they will use it with Pilate later.

And take away both our place and our nation ( $\kappa \alpha \alpha \rho о v \sigma \iota v ~ \eta \mu \omega \nu \kappa \alpha$ то $\tau$ тотоv ка то $\varepsilon \theta v o \varsigma)$. Future active of alp $\omega$, another certain result of their inaction. Note the order here when "place" (job) is put before nation (patriotism), for all the world like modern politicians who make the fate of the country turn on their getting the jobs which they are seeking. In the course of time the Romans will come, not because of the leniency of the Sanhedrin toward Jesus, but because of the uprising against Rome led by the Zealots and they will destroy both temple and city and the Sanhedrin will lose their jobs and the nation will be scattered. Future historians will say that this fate came as punishment on the Jews for their conduct toward Jesus.

John 11:49
Caiaphas (Kaıача¢). Son-in-law of Annas and successor and high priest for 18 years (A.D. 18 to 36).

That year ( $\tau 0 \cup$ عviautov єкعıvou). Genitive of time; his high-priesthood included that year (A.D. 29 or 30). So he took the lead at this meeting.

Ye know nothing at all (ข $\nu \varepsilon \iota \varsigma ~ o u \kappa ~ o ו \delta a \tau \varepsilon ~ o v \delta \varepsilon v)$ ). In this he is correct, for no solution of their problem had been offered.

John 11:50
That it is expedient for you ( $о \tau \sigma \nu \mu \varphi \varepsilon \rho \varepsilon \nu \mu \nu v$ ). Indirect discourse with present active indicative of $\sigma \nu \mu \varphi \varepsilon \rho \omega$ used with the tva clause as subject. It means to bear together, to be profitable, with the dative case as here ( $v \mu \nu v$, for you). It is to your interest and that is what they cared most for.

That one man die (ıva $\varepsilon ı \varsigma ~ \alpha v \theta \rho \omega \pi \sigma \varsigma \alpha \pi \circ \theta \alpha v \eta)$. Sub-final use of $ı v a$ with second aorist active subjunctive of $\alpha \pi \circ \theta v \eta \sigma \kappa \omega$ as subject clause with $\sigma \nu \mu \varphi \varepsilon \rho \varepsilon$. See 16:7; 18:7 for the same construction.

For the people ( $\cup \pi \varepsilon \rho ~ \tau o v ~ \lambda \alpha o v) . ~ H u \pi \varepsilon \rho ~ s i m p l y ~ m e a n s ~ o v e r, ~ b u t ~ c a n ~ b e ~ i n ~ b e h a l f ~ o f ~ a s ~$ often, and in proper context the resultant idea is "instead of" as the succeeding clause shows and as is clearly so in Ga 3:13 of the death of Christ and naturally so in 2Co 5:14f.; Ro 5:6 . In the papyri $v \pi \varepsilon \rho$ is the usual preposition used of one who writes a letter for one unable to write.

And that the whole nation perish not ( $\kappa \alpha \mu \eta$ o $\alpha \circ v \tau 0 \varepsilon \theta v \circ \varsigma \alpha \pi о \lambda \eta \tau \alpha$ ). Continuation of the iva construction with $\mu \eta$ and the second aorist subjunctive of $\alpha \pi \sigma \lambda \lambda \nu \mu$. What Caiaphas has in mind is the giving of Jesus to death to keep the nation from perishing at the hands of the Romans. Politicians are often willing to make a sacrifice of the other fellow.

John 11:51
Not of himself ( $\alpha \varphi^{\prime}$ عavtov ouk). Not wholly of himself, John means. There was more in what Caiaphas said than he understood. His language is repeated in 18:14.

Prophesied ( $\varepsilon \pi \rho \circ \varphi \eta \tau \varepsilon \cup \sigma \varepsilon v)$. Aorist active indicative of $\pi \rho \circ \varphi \eta \tau \varepsilon \nu \omega$. But certainly unconscious prophecy on his part and purely accidental. Caiaphas meant only what was mean and selfish.

That Jesus should die (oт $\varepsilon \mu \varepsilon \lambda \lambda \varepsilon v$ I I $\sigma o v \varsigma ~ a \pi o \theta v \eta \sigma \kappa \varepsilon เ v)$. Imperfect active of $\mu \varepsilon \lambda \lambda \omega$ in indirect discourse instead of the usual present retained after a secondary tense ( $\varepsilon \pi \rho \circ \varphi \eta \tau \varepsilon \cup \sigma \varepsilon v$ ) as sometimes occurs (see 2:25).

## John 11:52

But that he might also gather together into one ( $\alpha \lambda \lambda$ ' $เ v \alpha \sigma v v \alpha \gamma \alpha \gamma \eta \varepsilon \iota \varsigma \varepsilon v$ ). Purpose clause with $t v \alpha$ and the second aorist active subjunctive of $\sigma v v a \gamma \omega$. Caiaphas was thinking only of the Jewish people ( $\lambda \alpha o v, \varepsilon \theta v o \varsigma$, verse 50 ). The explanation and interpretation of John here follow the lead of the words of Jesus about the other sheep and the one flock in 10:16.

That are scattered abroad ( $\tau \alpha \delta \iota \varepsilon \sigma \kappa о \rho \pi \iota \sigma \mu \varepsilon v \alpha$ ). Perfect passive articular participle of $\delta ı \alpha \sigma \kappa о \rho \pi \iota \zeta \omega$, late verb (Polybius, LXX) to scatter apart, to winnow grain from chaff, only here in John. The meaning here is not the Diaspora (Jews scattered over the world), but the potential children of God in all lands and all ages that the death of Christ will gather "into one" ( $\varepsilon \iota \varsigma \varepsilon v)$. A glorious idea, but far beyond Caiaphas.

John 11:53
So from that day ( $\left.\alpha \pi^{\prime} \varepsilon \kappa \varepsilon ı \nu \eta \varsigma ~ o u v ~ \tau \eta \varsigma ~ \eta \mu \varepsilon \rho \alpha \varsigma\right)$. The raising of Lazarus brought matters to a head so to speak. It was now apparently not more than a month before the end.

They took counsel ( $\varepsilon \beta 0 \cup \lambda \varepsilon v \sigma \alpha v \tau o)$. First aorist middle indicative of $\beta o u \lambda \varepsilon v \omega$, old verb to take counsel, in the middle voice for themselves, among themselves. The Sanhedrin took the advice of Caiaphas seriously and plotted the death of Jesus.

That they might put him to death (ıva $\alpha \pi о \kappa \tau \varepsilon เ v \omega \sigma เ v ~ \alpha v \tau o v) . ~ P u r p o s e ~ c l a u s e ~ w i t h ~ i v a ~$ and first aorist active subjunctive of $\alpha \pi о \kappa \tau \varepsilon เ v \omega$. It is an old purpose (5:18; 7:19; 8:44,59; 10:39; $11: 8$ ) now revived with fresh energy due to the raising of Lazarus.

John 11:54
Therefore walked no more openly (ouv ouкยт $\pi \alpha \rho \rho \eta \sigma \alpha \alpha \pi \varepsilon \rho ı \pi \pi \alpha \tau \varepsilon$ ). Imperfect active of $\pi \varepsilon \rho \iota \pi \alpha \tau \varepsilon \omega$, to walk around. Jesus saw clearly that to do so would bring on the end now instead of his "hour" which was to be at the passover a month ahead.

Into the country near to the wilderness ( $\varepsilon \varsigma \tau \eta \nu \chi \omega \rho a v \varepsilon \gamma \gamma \cup \varsigma \tau \eta \varsigma \varepsilon \rho \eta \mu \circ v$ ). It was now in Jerusalem as it had become once in Galilee ( 7:1) because of the plots of the hostile Jews. The hill country northeast of Jerusalem was thinly populated.
 than town or village ( $\kappa \omega \mu \eta$ ). The place is not certainly known, not mentioned elsewhere in the N.T. Josephus mentions (War, IV. ix. 9) a small fort near Bethel in the hill country and in 2Ch 13:19 Ephron is named in connexion with Bethel. Up here Jesus would at least be free for the moment from the machinations of the Sanhedrin while he faced the coming catastrophe at the passover. He is not far from the mount of temptation where the devil showed and offered him the kingdoms of the world for the bending of the knee before him. Is it mere fancy to imagine that the devil came to see Jesus again here at this juncture with a reminder of his previous offer and of the present plight of the Son of God with the religious leaders conspiring his death? At any rate Jesus has the fellowship of his disciples this time ( $\mu \varepsilon \tau \alpha \tau \omega \nu \mu \alpha \theta \eta \tau \omega v$ ). But what were they thinking?

John 11:55
Was near ( $\eta \vee \varepsilon \gamma \gamma \vee \varsigma)$. See 2:13 for the same phrase. This last passover was the time of destiny for Jesus.
 Purpose clause with $\imath v \alpha$ and the first aorist active subjunctive of $\alpha \gamma v \iota \zeta \omega$, old verb from $\alpha \gamma v o$, (pure), ceremonial purification here, of course. All this took time. These came "from the country" ( $\varepsilon \kappa \tau \eta \varsigma \chi \omega \rho a \varsigma)$, from all over Palestine, from all parts of the world, in fact. John shifts the scene to Jerusalem just before the passover with no record of the way that Jesus came to Jerusalem from Ephraim. The Synoptic Gospels tell this last journey up through Samaria into Galilee to join the great caravan that crossed over into Perea and came down on the eastern side of the Jordan opposite Jericho and then marched up the mountain road to Bethany and Bethphage just beside Jerusalem. This story is found in Lu 17:11-19:28; Mr 10:1-52; Mt 19:1-20:34 . John simply assumes the Synoptic narrative and gives the picture of things in and around Jerusalem just before the passover (11:56,57).

John 11:56

They sought therefore for Jesus ( $\varepsilon\lceil\eta \tau 0 u v$ ouv $\tau 0 v$ I $\eta \sigma o v v$ ). Imperfect active of $\zeta \eta \tau \varepsilon \omega$ and common ouv of which John is so fond. They were seeking Jesus six months before at the feast of tabernacles ( $7: 11$ ), but now they really mean to kill him.

As they stood in the temple ( $\varepsilon \nu \tau \omega \iota \varepsilon \rho \omega \varepsilon \sigma \tau \eta \kappa о \tau \varepsilon \varsigma)$. Perfect active participle (intransitive) of $\operatorname{t\sigma \tau } \eta \mu$, a graphic picture of the various groups of leaders in Jerusalem and from other lands, "the knots of people in the Temple precincts" (Bernard). They had done this at the tabernacles ( $7: 11-13$ ), but now there is new excitement due to the recent raising of Lazarus and to the public order for the arrest of Jesus.

That he will not come to the feast? (o ov $\circ \mu \eta \varepsilon \lambda \eta \eta \varepsilon \varsigma ~ \tau \eta \nu \varepsilon о \rho \tau \eta \nu ;$ ). The form of the question (indirect discourse after $\delta$ окєıזє) assumes strongly that Jesus will not (ov $\mu \eta$, double negative with second aorist active $\varepsilon \lambda \theta \eta$ from $\varepsilon \rho \chi \circ \mu \alpha$ ) dare to come this time for the reason given in verse 57.

John 11:57
The chief priests and the Pharisees (о а рхıгрєı ка о Фарıбаıо). The Sanhedrin.
Had given commandment ( $\delta \varepsilon \delta \omega \kappa \varepsilon \iota \sigma \alpha \nu \varepsilon v \tau 0 \lambda \alpha \varsigma)$. Past perfect active of $\delta \iota \delta \omega \mu$.
That he should shew it ( $\iota v \alpha \mu \eta v \sigma \eta$ ). Sub-final $\iota v a$ with first aorist active subjunctive of $\mu \eta v v \omega$, old verb to disclose, to report formally (Ac 23:30).

If any man knew ( $\varepsilon \alpha v \tau \iota \varsigma \gamma v \omega)$. Third-class condition with $\varepsilon \alpha v$ and second aorist active subjunctive of $\gamma เ v \omega \sigma \kappa \omega$.

Where he was ( $\pi$ ov $\varepsilon \sigma \tau \iota v$ ). Indirect question with interrogative adverb and present indicative $\varepsilon \sigma \tau \iota v$ retained like $\gamma \nu \omega$ and $\mu \eta \nu v \sigma \eta$ after the secondary tense $\delta \varepsilon \delta \omega \kappa \varepsilon \iota \sigma \alpha v$.

That they might take him ( $0 \pi \omega \varsigma \pi \iota \alpha \sigma \omega \sigma \iota \nu \alpha \nu \tau o v$ ). Purpose clause with $0 \pi \omega \varsigma$ instead of $\iota v \alpha$ and first aorist active subjunctive of $\pi \iota \omega \zeta \omega$ so often used before ( 7:44, etc.).

## John 12

John 12:1
Jesus therefore (I $\eta$ бovc ouv). Here ovv is not causal, but simply copulative and transitional, "and so" (Bernard), as often in John ( $1: 22$, etc.).

Six days before the passover ( $\pi \rho \circ \varepsilon \xi \eta \mu \varepsilon \rho \omega \nu \tau 0 v \pi \alpha \sigma \chi \alpha$ ). This idiom, transposition of $\pi \rho o$, is like the Latin use of ante, but it occurs in the old Doric, in the inscriptions and the papyri. See Am 1:1 for it also (cf. Moulton, Proleg., pp. 100ff.; Robertson, Grammar, pp. 621f.). If the crucifixion was on Friday, as seems certain from both John and the Synoptics, then six days before would be the Jewish Sabbath preceding or more probably the Friday afternoon before, since Jesus would most likely arrive before the Sabbath. Probably we are to put together in one scene for the atmosphere Joh 11:55-57; Joh 12:1, 9-11 .

Came to Bethany, where Lazarus was, whom Jesus raised from the dead ( $\eta \tau \lambda \varepsilon v \varepsilon ı$
 ceding. There is no reason for thinking this a gloss as Bernard does. It was a place of danger now after that great miracle and the consequent rage of the Sanhedrin ( 12:9-11). The crowd of eager spectators to see both Lazarus and Jesus would only intensify this rage.

John 12:2
So they made him a supper there ( $\varepsilon \pi \sigma \not \square \sigma \alpha v ~ o u v ~ a v \tau \omega ~ \delta \varepsilon ı \pi v o v ~ \varepsilon \kappa \varepsilon$ ). Here again ouv is not inferential, but merely transitional. This supper is given by Mark (Mr 14:3-9) and Matthew (Mt 26:6-13 ) just two days (Mr 14:1) before the passover, that is on our Tuesday evening (beginning of Jewish Wednesday), while John mentions ( 12:2-9) it immediately after the arrival of Jesus in Bethany ( 12:1). One must decide which date to follow. Mark and Matthew and Luke follow it with the visit of Judas to the Sanhedrin with an offer to betray Jesus as if exasperated by the rebuke by Jesus at the feast. Bernard considers that John "is here more probably accurate." It all turns on John's purpose in putting it here. This is the last mention of Jesus in Bethany and he may have mentioned it proleptically for that reason as seems to me quite reasonable. Westcott notes that in chapter 12 John closes his record of the public ministry of the Lord relative to the disciples at this feast ( 1-11), to the multitude in the triumphal entry ( 12-19), to the world outside in the visit of the Greeks (20-), and with two summary judgements (). There is no further reason to refer to the feast in the house of another Simon when a sinful woman anointed Jesus (Lu 7:36-50 ). It is no credit to Luke or to John with Mark and Matthew to have them all making a jumble like that. There were two anointings by two absolutely different women for wholly different purposes. See the discussion on Luke for further details.

And Martha served ( $\kappa \alpha \eta$ Map $\theta \alpha \delta ı \eta \kappa о v \varepsilon$ ). Imperfect active of $\delta ı \alpha \kappa о v \varepsilon \omega$, picturing Martha true to the account of her in Lu 10:40 ( $\pi о \lambda \lambda \eta \nu \delta$ ıккоviav, $\delta$ ıaкоveıv as here). But this fact does not show that Martha was the wife of this Simon at all. They were friends and
neighbours and Martha was following her bent. It is Mark (Mr 14:3) and Matthew (Mt 26:6 ) who mention the name of the host. It is not Simon the Pharisee (Lu 7:36 ), but Simon the leper (Mr 14:3; Mt 26:6) in whose house they meet. The name is common enough. The Simon in Luke was sharply critical of Jesus; this one is full of gratitude for what Jesus has done for him.

That sat at meat ( $\tau \omega \nu$ avaкє $\mu \varepsilon v \omega v$ ). "That lay back," reclined as they did, articular participle (ablative case after $\varepsilon \kappa$ ) of the common verb $\alpha v a \kappa \varepsilon \mu \alpha$. Perhaps Simon gave the feast partly in honour of Lazarus as well as of Jesus since all were now talking of both (Joh 12:9). It was a gracious occasion. The guests were Jesus, the twelve apostles, and Martha, Mary, and Lazarus.

John 12:3
A pound ( $\lambda_{ı \tau \rho \alpha v) . ~ L a t i n ~ l i b r a, ~ l a t e ~ K o i n e ~(P o l y b i u s, ~ P l u t a r c h) ~ w o r d ~ w i t h ~ w e i g h t ~ o f ~}^{12}$ ounces, in N.T. only here and 19:39. Mark (Mr 14:3) and Matthew (Mt 26:7) have alabaster cruse.

Of ointment of spikenard ( $\mu \nu \rho o v v a \rho \delta o v \pi \iota \sigma \tau \iota \kappa \eta \varsigma)$ ). "Of oil of nard." See already 11:2 for $\mu v \rho o v$ (also Mt 26:7). Nard is the head or spike of an East Indian plant, very fragrant. Occurs also in Mr 14:3. Пıбтıкŋऽ here and in Mr 14:3 probably means genuine ( $\pi \iota \sigma \tau \iota к о \varsigma$, from $\pi \iota \sigma \tau o \varsigma$, reliable). Only two instances in the N.T.

Very precious ( $\pi 0 \lambda \nu \tau \mu \mu \sigma v$ ). Old compound adjective ( $\pi \mathrm{o} \lambda \nu \varsigma$, much, $\tau \mu \eta$ ), in N.T. only here, Mt 13:46; 1Pe 1:7. Mark has пo入uteגous (very costly). Matthew (Mt 26:7) has here $\beta a \rho v \tau \iota \mu o v$ of weighty value (only N.T. instance).

Anointed ( $\eta \lambda \varepsilon \tau \psi \varepsilon \nu$ ). First aorist active indicative of $\alpha \lambda \varepsilon \iota \varphi \omega$, old word (Mr 16:1).
The feet (тov¢ тоба¢). Mark (Mr 14:3) and Matthew (Mt 26:7) have "his head." Why not both, though neither Gospel mentions both? The Latin MS. fuldensis and the Syriac Sinatic do give both head and feet here.

Wiped ( $\varepsilon \xi \varepsilon \mu \alpha \xi \varepsilon v)$. First aorist active indicative of $\varepsilon \kappa \mu \alpha \sigma \sigma \omega$, old verb to wipe off already in 11:2; Lu 7:38,44 .

With her hair ( $\tau \alpha ı \varsigma ~ \theta \rho ı \xi\llcorner v$ autņ). Instrumental plural. It is this item that is relied on largely by those who identify Mary of Bethany with the sinful woman in Luke 7 and with Mary Magdalene. It is no doubt true that it was usually considered immodest for a woman to wear her hair loose. But it is not impossible that Mary of Bethany in her carefully planned love-offering for Jesus on this occasion was only glad to throw such a punctilio to the winds. Such an act on this occasion does not brand her a woman of loose character.

Was filled with the odour of the ointment ( $\varepsilon \pi \lambda \eta \rho \omega \theta \eta \varepsilon \kappa \tau \eta \varsigma$ об $\mu \eta \varsigma$ tov $\mu v \rho \circ v$ ). Effective first aorist passive of $\pi \lambda \eta \rho o \omega$ and a natural result.

John 12:4
Judas Iscariot (Iovסac o Iбкарı $\omega \tau \eta \varsigma$ ). See o Iбкарı $\omega \tau \eta \varsigma$ in 14:22. See 6:71; 13:1 for like description of Judas save that in 6:71 the father's name is given in the genitive, $\Sigma \mu \omega \omega$ os and
 $\Sigma \mu \omega \omega v o c$. Clearly then both father and son were called "Iscariot" or man of Kerioth in the tribe of Judah (Jos 15:25 ). Judas is the only one of the twelve not a Galilean.

One of his disciples ( $\varepsilon ı \varsigma ~ \tau \omega \nu \mu \alpha \theta \eta \tau \omega \nu$ av $\tau \circ$ ). Likewise in 6:71, only there $\varepsilon \kappa$ is used after $\varepsilon \varsigma \varsigma$ as some MSS. have here. This is the shameful fact that clung to the name of Judas.

Which should betray him (o $\mu \varepsilon \lambda \lambda \omega v$ avtov $\pi \alpha \rho \alpha \delta i \delta o v \alpha$ ). John does not say in 6:71 ( $\varepsilon \mu \varepsilon \lambda \lambda \varepsilon v \pi \alpha \rho \alpha \delta \iota \delta o v \alpha \alpha \cup \tau o v)$ or here that Judas "was predestined to betray Jesus" as Bernard suggests. He had his own responsibility for his guilt as Jesus said (Mt 26:24). M $\varepsilon \lambda \lambda \omega$ here simply points to the act as future, not as necessary. Note the contrast between Mary and Judas. "Mary in her devotion unconsciously provides for the honour of the dead. Judas in his selfishness unconsciously brings about the death itself" (Westcott).

John 12:5
Sold ( $\varepsilon \pi \rho \alpha \theta \eta$ ). First aorist passive indicative of $\pi \iota \pi \rho \alpha \sigma \kappa \omega$, old verb to sell (Mt 13:46).
For three hundred pence ( $\tau \rho \iota \alpha \kappa \sigma \sigma \omega v \delta \eta \nu \alpha \rho \iota \omega v$ ). Genitive of price. Same item in Mr 14:5, while in Mt 26:9 it is simply "for much" ( $\pi \mathrm{o} \lambda \lambda \mathrm{\lambda ov}$ ). But all three have "given to the poor" ( $\varepsilon \delta 0 \theta \eta \pi \tau \omega \chi \circ$ ¢ ). First aorist passive indicative of $\delta \iota \delta \omega \mu$ with dative case $\pi \tau \omega \chi$ orc (note absence of the article, poor people), real beggars, mendicants (Mt 19:21; Lu 14:13 ). But only John singles out Judas as the one who made the protest against this waste of money while Mark says that "some" had indignation and Matthew has it that "the disciples" had indignation. Clearly Judas was the spokesman for the group who chimed in and agreed with his protest. The amount here spent by Mary (ten guineas) would equal a day labourer's wages for a year (Dods).

John 12:6
Not because he cared for the poor (ov o $\tau \pi \varepsilon \rho \tau \omega \nu \pi \tau \omega \chi \omega \nu \varepsilon \mu \varepsilon \lambda \varepsilon \nu \alpha \nu \tau \omega$ ). Literally, "not because it was a care to him concerning the poor" (impersonal imperfect of $\mu \varepsilon \lambda \varepsilon$, it was a care). John often makes explanatory comments of this kind as in 2:21f.; 7:22,39.

But because he was a thief ( $\alpha \lambda \lambda \varepsilon$ o $\tau \kappa \lambda \varepsilon \pi \tau \eta \varsigma \eta \nu$ ). Clearly the disciples did not know then that Judas was a petty thief. That knowledge came later after he took the bribe of thirty pieces of silver for betraying Jesus (Mt 26:15 ), for the disciples did not suspect Judas of treachery (13:28f. ), let alone small peculations. There is no reason for thinking that John is unfair to Judas. "Temptation commonly comes through that for which we are naturally fitted" (Westcott). In this case Judas himself was "the poor beggar" who wanted this money.

And having the bag took away what was put therein (ка то $\gamma \lambda \omega \sigma \sigma о к о \mu о \nu \varepsilon \chi \omega \nu \tau \alpha$ $\beta \alpha \lambda \lambda о \mu \varepsilon v \alpha \varepsilon \beta \alpha \sigma \tau \alpha \zeta \varepsilon v)$. This is the correct text. This compound for the earlier $\gamma \lambda \omega \sigma \sigma о к о \mu \varepsilon ו \sigma v$ (from $\gamma \lambda \omega \sigma \sigma \alpha$, tongue, and $\kappa о \mu \varepsilon \omega$, to tend) was originally a receptacle for the tongues or mouth-pieces of wind instruments. The shorter form is already in the Doric inscriptions and is common in the papyri for "money-box" as here. It occurs also in Josephus, Plutarch, etc. In N.T. only here and 13:29 in same sense about Judas. $\mathrm{B} \alpha \lambda \lambda \boldsymbol{\lambda} \boldsymbol{\mu} \mathrm{va}$ is present passive
participle (repeatedly put in) of $\beta \alpha \lambda \lambda \omega$, to cast or fling. The imperfect active (custom) of $\beta \alpha \sigma \tau \alpha \zeta \omega$, old verb to pick up (Joh 10:31), to carry (19:17), but here and 20:15 with the sense to bear away as in Polybius, Josephus, Diogenes Laertes, and often so in the papyri.

John 12:7
Suffer her to keep it against the day of my burying ( $\mathrm{A} \varphi \varepsilon \varsigma \alpha \cup \tau \eta \nu, \tau v \alpha \varepsilon \iota \varsigma \tau \eta \nu \eta \mu \varepsilon \rho \alpha \nu$
 first aorist active subjunctive of $\tau \eta \rho \varepsilon \omega$ ) rather than that of the Textus Receptus (just $\tau \varepsilon \tau \eta \rho \varepsilon \kappa \varepsilon \nu$, perfect active indicative) is correct. It is supported by Aleph B D L W Theta. The wa can be rendered as above after $\alpha \varphi \varepsilon \varsigma$ according to Koine idiom or more probably: "Let her alone: it was that," etc. (supplying "it was"). Either makes good sense. The word $\varepsilon \nu \tau \alpha \varphi \iota \propto \sigma \mu \circ \varsigma$ is a later and rare substantive from the late verb $\varepsilon \nu \tau \alpha \varphi \iota \omega \zeta \omega$, to prepare for burial (Mt 26:12; Joh 19:40), and means preparation for burial. In N.T. only here and Mr 14:8. "Preparation for my burial" is the idea here and in Mark. The idea of Jesus is that Mary had saved this money to use in preparing his body for burial. She is giving him the flowers before the funeral. We can hardly take it that Mary did not use all of the ointment for Mark (Mr 14:3) says that she broke it and yet he adds (Mr 14:8) what John has here. It is a paradox, but Jesus is fond of paradoxes. Mary has kept this precious gift by giving it now beforehand as a preparation for my burial. We really keep what we give to Christ. This is Mary's glory that she had some glimmering comprehension of Christ's death which none of the disciples possessed.

John 12:8
Ye have always ( $\pi \alpha v \tau 0 \tau \varepsilon \varepsilon \chi \varepsilon \tau \varepsilon)$. Jesus does not discredit gifts to the poor at all. But there is relativity in one's duties.

But me ye have not always ( $\varepsilon \mu \varepsilon \delta \varepsilon$ ov $\pi \alpha v \tau \circ \tau \varepsilon \varepsilon \chi \varepsilon \tau \varepsilon$ ). This is what Mary perceived with her delicate woman's intuition and what the apostles failed to understand though repeatedly and plainly told by Jesus. John does not mention the precious promise of praise for Mary preserved in Mr 14:9; Mt 26:13 , but he does show her keen sympathetic insight and Christ's genuine appreciation of her noble deed. It is curiously $\mu \alpha \lambda-\alpha-\pi \rho о \pi о \varsigma$ surely to put alongside this incident the other incident told long before by Luke (Lu 7:35ff.) of the sinful woman. Let Mary alone in her glorious act of love.

John 12:9
The common people ( o o $\lambda \lambda \mathrm{o} \varsigma \pi \mathrm{o} \lambda \cup \varsigma$ ). This is the right reading with the article o , literally, "the people much or in large numbers." One is reminded of the French idiom. Gildersleeve (Syntax, p. 284) gives a few rare examples of the idiom o $\alpha v \eta \rho \alpha \gamma \alpha \theta$ oc. Westcott
 in the N.T. rather than $\pi \mathrm{o} \lambda \mathrm{v}$ с ox $\mathrm{\lambda os}$ (Robertson, Grammar, p. 774). Mark (Mr 12:37 ) has
 misplacement of the article." John's use of ox $\lambda$ os is usually the common crowd as "riff-raff."

That he was (ot $\varepsilon \sigma \tau \iota v$ ). Present active indicative retained in indirect discourse after the secondary tense ( $\varepsilon \gamma \nu \omega$, second aorist active indicative of $\gamma \iota v \omega \sigma \kappa \omega$ ). These "Jews" are not all hostile to Jesus as in 5:10; 6:41, etc., but included some who were friendly (verse 11).

But that they might see Lazarus also ( $\alpha \lambda \lambda^{\prime}$ 'v $\alpha$ ка тov $\Lambda \alpha \zeta \alpha \rho o v ~ \iota \delta \omega \sigma ı v$ ). Purpose clause with iva and second aorist active subjunctive of opaw. Motive enough to gather a great crowd, to see one raised from the dead (cf. verse 1 for the same phrase, "whom he had raised from the dead"). Some of the very witnesses of the raising of Lazarus will bear witness later (verse 17). It was a tense situation.

John 12:10
The chief priests took counsel ( $\varepsilon$ ßои $\overline{\varepsilon v \sigma \alpha v \tau 0 ~ o ~} \alpha \rho \chi เ \varepsilon \rho \varepsilon ı \varsigma)$. First aorist middle indicative of $\beta$ ou $\varepsilon \varepsilon v \omega$, old verb, seen already in 11:53 which see. The whole Sanhedrin ( 7:32) had decided to put Jesus to death and had asked for information concerning him ( 11:57) that might lead to his arrest, but the Sadducees were specially active now to accomplish the death of Lazarus also (ıva with first aorist active subjunctive of $\alpha \pi о \kappa \tau \varepsilon เ v \omega$ as in 11:53). Perhaps they argued that, if they should kill both Jesus and Lazarus, then Lazarus would remain dead. The raising of Lazarus has brought matters to a crisis. Incidentally, it may be observed that here we may see the reason why the Synoptics do not tell the story of the raising of Lazarus, if he was still living (cf. the case of Malchus's name in Joh 18:10 ).

John 12:11
Because that (o $\tau$ ). Causal use of ot.
By reason of him ( $\delta \iota^{\prime}$ autov). "Because of him," regular idiom, accusative case with $\delta \iota \alpha$.
Went away ( $v \pi \eta \gamma \circ v$ ). Cf. 6:67 for this verb. Inchoative imperfect active of $v \pi \alpha \gamma \omega$, "began to withdraw" as happened at the time of the raising of Lazarus (11:45f. ) and the secession was still going on.

And believed on Jesus ( $\kappa \alpha \varepsilon \pi เ \sigma \tau \varepsilon v o v \varepsilon \varepsilon \varsigma ~ \tau o v ~ I \eta \sigma o u v) . ~ I m p e r f e c t ~ a c t i v e ~ o f ~ \pi ı \sigma \tau \varepsilon v \omega ~(n o t e ~$ aorist in 11:45). There was danger of a mass movement of the people to Jesus.

John 12:12
On the morrow ( $\tau \eta \varepsilon \pi \alpha u \rho \circ o v$ ). Locative case. Supply $\eta \mu \varepsilon \rho \alpha$ (day) after the adverb etaupiov ("on the tomorrow day"). That is on our Sunday, Palm Sunday.

A great multitude (o o $\chi \lambda$ ос $\pi$ о $\lambda \nu \varsigma$ ). Same idiom rendered "the common people" in verse 9 and should be so translated here.

That had come (o $\varepsilon \lambda \theta \omega v$ ). Second aorist active participle, masculine singular of $\varepsilon \rho \chi \circ \mu \alpha$ agreeing with ox $\lambda$ os, "that came."

When they heard ( $\alpha \kappa о \sigma \alpha v \tau \varepsilon \varsigma)$. First aorist active masculine plural participle of $\alpha \kappa о \omega \omega$, construction according to sense (plural, though ox $\lambda$ os singular).

Was coming ( $\varepsilon \rho \chi \varepsilon \tau \alpha)$. Present middle indicative of $\varepsilon \rho \chi \circ \mu \alpha$ retained in indirect discourse after a secondary tense. It is a vivid picture. What they heard was: "Jesus is coming into Jerusalem." He is defying the Sanhedrin with all their public advertisement for him.

## John 12:13

Took ( $\varepsilon \lambda \alpha \beta o v)$. Second aorist active indicative of $\lambda \alpha \mu \beta \alpha v \omega$.
The branches of the palm-trees ( $\tau \alpha \beta \alpha \iota \alpha \tau \omega \nu \varphi \circ \iota \nu \iota \kappa \omega \nu$ ). Фoıvı is an old word for palm-tree (Re 7:9 for the branches) and in Ac 27:12 the name of a city. Baoov is apparently a word of Egyptian origin, palm branches, here only in N.T., but in the papyri and I Macc. 13:51. Here we have "the palm branches of the palm-trees." The use in 1 Macc. 13:51 (cf. II Macc. 10:7) is in the account of Simon's triumphal entry into Jerusalem. Bernard notes that to carry palms was a mark of triumphant homage to a victor or a king (Re 7:9). Palm-trees grew on the Mount of Olives (Mr 11:8) on the road from Bethany to Jerusalem. The crowds (one in front and one behind, Mr 11:9; Mt 21:9; Joh 2:18) cut the branches as they came (Mt 21:8).

To meet him ( $\varepsilon ı \varsigma ~ v \pi \alpha v \tau \eta \sigma เ v \alpha \cup \tau \omega$ ). Literally,
for a meeting ( $\cup \pi \alpha \nu \tau \eta \sigma \varsigma$, late word from the verb v $\pi \alpha v \tau \alpha \omega$, Mt 8:28; Joh 11:20,30; 12:18, in the papyri, but only here in the N.T.) with him" ( $\alpha v \tau \omega$, associative instrumental case after $v \pi \alpha v \tau \eta \sigma \iota v$ as after the verb in verse 18). It was a scene of growing excitement.

And cried out ( $\kappa \alpha \varepsilon к \rho \alpha \cup \gamma \alpha \zeta$ оv). Imperfect active of краvүа $\zeta \omega$, old and rare verb (from краиүๆ) as in Mt 12:19; Joh 19:15 .

Hosannah (H $\omega \sigma \alpha v v \alpha$ ). Transliteration of the Hebrew word meaning "Save now." The LXX renders it by $\Sigma \omega \sigma 0 v \delta \eta$ (Save now).

Blessed is he that cometh in the name of the Lord ( $\varepsilon v \lambda o \gamma \eta \mu \varepsilon v o \varsigma$ o $\varepsilon \rho \chi \circ \mu \varepsilon v o \varsigma \varepsilon v$ ovoبaт кvpıov). Perfect passive participle of $\varepsilon v \lambda o \gamma \varepsilon \omega$. Quotation from Ps 118:25f. , written, some think, for the dedication of the second temple, or, as others think, for the feast of tabernacles after the return (Ezr 3:1f. ). It was sung in the processional recitation then as a welcome to the worshippers. Here the words are addressed to the Messiah as is made plain by the addition of the words, "even the king of Israel" ( $\kappa \alpha$ о $\beta$ абı $\lambda \varepsilon \cup \varsigma$ тov Iбрап $\lambda$ ) as Nathanael called him ( 1:49). Jesus is here hailed by the multitudes as the long-looked for Messiah of Jewish hope and he allows them so to greet him ( Lu 19:38-40) , a thing that he prevented a year before in Galilee (Joh 6:14f. ). It is probable that "in the name of the Lord" should be taken with "blessed" as in De 21:5; 2Sa 6:18; 1Ki 22:16; 2Ki 2:24. The Messiah was recognized by Martha as the Coming One (Joh 11:27) and is so described by the Baptist (Mt 11:3). Mark (Mr 11:10) adds "the kingdom that cometh" while Luke ( 19:38) has "the king that cometh." "It was this public acclamation of Jesus as King of Israel or King of the Jews which was the foundation of the charge made against him before Pilate ( 18:33)" (Bernard).

John 12:14
Found ( $\varepsilon v \rho \omega v$ ). Second aorist active participle of $\varepsilon v \rho \iota \sigma \kappa \omega$. Through the disciples, of course, as in Mr 11:2-6 (Mt 21:2-3,6; Lu 19:30f. ).

A young ass (ovapıov). Late diminutive of ovoc, in Epictetus and the papyri (even the double diminitive, ovapıסıov), only here in the N.T. See discussion of Mt 21:5 where ка has
been wrongly rendered "and" instead of "even." Rightly understood Matthew has Jesus riding only the colt like the rest.

John 12:15
Daughter of Zion ( $\theta v \gamma \alpha \tau \eta \rho \Sigma i \omega v)$. Nominative form (instead of $\theta v \gamma a \tau \varepsilon \rho$ ) but vocative case. The quotation is from Zec 9:9 shortened.

Thy King cometh (o $\beta a \sigma \iota \lambda \varepsilon \cup \varsigma \varepsilon \rho \chi \varepsilon \tau \alpha$ ). Prophetic futuristic present. The ass was the animal ridden in peace as the horse was in war (Jud 10:4; 12:14; 2Sa 17:23; 19:26). Zechariah pictures one coming in peace. So the people here regarded Jesus as the Prince of Peace in the triumphal entry.

Sitting on an ass's colt ( $\kappa \alpha \theta \eta \mu \varepsilon v o \varsigma \varepsilon \pi \pi \omega \lambda o v$ ovov). Matthew (Mt 21:6f.) does speak of both the ass and the colt having garments put on them, but he does not say that Jesus "sat upon" both animals at once, for $\varepsilon \pi \alpha v \omega$ avt $\omega v$ (upon them) probably refers to the garments, not to the colts. When John wrote (end of the century), Jerusalem had fallen. Jesus will lament over Jerusalem (Lu 19:41ff. ). So "Fear not" ( $\mu \eta$ 甲оßov).

John 12:16
Understood not (ouk $\varepsilon \gamma \nu \omega \sigma \alpha v$ ). Second aorist active indicative of $\gamma \mid \nu \omega \sigma \kappa \omega$. Another comment by John concerning the failure of the disciples to know what was happening (cf. 2:22; 7:39).

At the first ( $\tau \mathrm{m} \pi \rho \omega \tau 0 v$ ). Adverbial accusative, as in 10:40; 19:39 .
Was glorified ( $\varepsilon \delta_{0} \xi \alpha \sigma \theta \eta$ ). First aorist passive indicative of $\delta 0 \xi \alpha \zeta \omega$, to glorify, used of his death already in 7:39 and by Jesus himself of his death, resurrection, and ascension in 12:23; 13:31.

Then remembered they ( $\tau \circ \tau \varepsilon \varepsilon \mu \nu \eta \sigma \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\mu \mu \nu \eta \sigma \kappa \omega$. It was easier to understand then and they had the Holy Spirit to help them ( 16:13-15).

Were written of him ( $\eta \nu \varepsilon \pi^{\prime} \alpha \cup \tau \omega \gamma \varepsilon \gamma \rho \alpha \mu \mu \varepsilon v \alpha$ ). Periphrastic past perfect passive of $\gamma \rho \alpha \varphi \omega$ with neuter plural participle agreeing with $\tau \alpha \nu \tau \alpha$ (these things) and singular verb, though the plural $\eta \sigma \alpha \nu$ could have been used. Note the threefold repetition of tav $\alpha \alpha$ in this verse, "clumsy" Bernard calls it, but making for clarity. The use of $\varepsilon \pi^{\prime}$ avt $\omega$ for "of him" rather than $\pi \varepsilon \rho$ autou is unusual, but occurs in Re 10:11; 22:16.

They had done ( $\varepsilon \pi \sigma \sqcap \eta \sigma \alpha v)$. First aorist active indicative of $\pi o เ \varepsilon \omega$, simply, "they did."
John 12:17
Bare witness ( $\varepsilon \mu \alpha \rho \tau v \rho \varepsilon$ ). Imperfect active of $\mu \alpha \rho \tau v \rho \varepsilon \omega$. This crowning triumph of Jesus gave an added sense of importance to the crowds that were actually with Jesus when he called Lazarus out of the tomb and raised him from the dead. For this description of this portion of the crowd see 11:45f.; 12:1,9-11 .

John 12:18

The multitude (o ox $\lambda \mathrm{oc}$ ). The multitude of verse 13, not the crowd just mentioned that had been with Jesus at the raising of Lazarus. There were two crowds (one following Jesus, one meeting Jesus as here).

Went and met him ( $\cup \pi \eta \nu \tau \eta \sigma \varepsilon v \alpha \nu \tau \omega$ ). First aorist active indicative of $v \pi \alpha \nu \tau \alpha \omega$, old compound verb ( $\cup \pi 0, \alpha v \tau \alpha \omega$ ) to go to meet, with associative instrumental case $\alpha v \tau \omega$. Cf. Joh 4:51 .

That he had done this sign ( $\tau о \cup \tau о ~ \alpha \cup \tau о \nu ~ \pi \varepsilon \pi о п \eta к \varepsilon v \alpha ~ \tau о ~ \sigma \eta \mu \varepsilon \iota o v) . ~ P e r f e c t ~ a c t i v e ~ i n f i n-~$ itive in indirect discourse after $\eta \kappa о \cup \sigma \alpha \nu$ (first aorist active indicative of $\alpha \kappa о \nu \omega$, to hear) (instead of a o $\tau$ clause) with the accusative of general reference avtov (as to him) and another accusative ( $\sigma \eta \mu \varepsilon ו o v$, sign) the object of the infinitive. Clearly there was much talk about the raising of Lazarus as the final proof that Jesus in truth is the Messiah of Jewish hope.

John 12:19
The Pharisees therefore laid among themselves (o ouv Фарıбаıо $\varepsilon ı \pi \alpha \nu \pi \rho о \varsigma \varepsilon \alpha \cup \tau о \cup \varsigma) . ~$ Graphic picture of the predicament of the Pharisees standing off and watching the enthusiastic crowds sweep by. As people usually do, they blame each other for the defeat of their plots against Jesus and for his final victory, as it seemed.

Behold how ye prevail nothing ( $\theta \varepsilon \omega \rho \varepsilon \iota \tau \varepsilon$ от оuk $\omega \varphi \varepsilon \lambda \varepsilon \iota \tau \varepsilon$ ou $\delta \varepsilon v$ ). It was a pathetic confession of failure because the rest of the plotters had bungled the whole thing. "Ye help nothing at all" by your plots and plans.

Lo, the world is gone after him ( $\left(\delta \varepsilon\right.$ о коб $\mu \circ \varsigma$ о $\tau \sigma \omega$ av $\frac{10 v}{} \alpha \pi \eta \lambda \theta \varepsilon v$ ). Exclamatory use of $\iota \delta \varepsilon$ and timeless aorist active indicative of $\alpha \pi \varepsilon \rho \chi \circ \mu \alpha$. The "world" is a bunch of fools, they feel, but see for yourselves. And the Sanhedrin had advertised to "find" Jesus! They can find him now!

John 12:20
 Ac 6:1 ), but Greeks like those in Antioch (Ac 11:20, correct text $\pi \rho \circ \varsigma$ tovৎ $\mathrm{H} \varepsilon \lambda \lambda \eta \nu \alpha \varsigma)$ to whom Barnabas was sent. These were probably proselytes of the gate or God-fearers like those worshipping Greeks in Thessalonica whom Paul won to Christ (Ac 17:4).

To worship at the feast ( $v \alpha \pi \rho о \sigma \kappa \nu v \eta \sigma \omega \sigma v \varepsilon \varepsilon \tau \eta \varepsilon о \rho \tau \eta$ ). Purpose clause with $ı v \alpha$ and the first aorist active subjunctive of $\pi \rho о \sigma \kappa \nu v \varepsilon \omega$, old and common verb to kiss the hand in reverence, to bow the knee in reverence and worship. We do not know whence they came, whether from Decapolis, Galilee, or further away. They found the pilgrims and the city ringing with talk about Jesus. They may even have witnessed the triumphal entry.

John 12:21
To Philip which was of Bethsaida of Galilee ( $\left.\Phi \downarrow \lambda \iota \pi \pi \omega \tau \omega \alpha \pi 0 B \eta \theta \sigma \alpha \iota \delta \alpha \tau \eta \varsigma \Gamma \alpha \lambda_{\imath} \lambda \alpha \iota \alpha \varsigma\right)$. He had a Greek name and the Greeks may have seen Philip in Galilee where there were many Greeks, probably (Mr 6:45) the Western Bethsaida in Galilee, not Bethsaida Julias on the Eastern side (Lu 9:10).

Asked ( $\eta \rho \omega \tau \omega v$ ). Imperfect active, probably inchoative, "began to ask," in contrast with the aorist tense just before ( $\pi \rho \circ \sigma \eta \lambda \theta a v$, came to).

Sir (Kvpıs). Most respectfully and courteously.
We would see Jesus ( $\theta \varepsilon \lambda$ о $\quad \mu \varepsilon v$ tov I $\eta \sigma o u v ~ เ \delta \varepsilon ı v)$. "We desire to see Jesus." This is not abrupt like our "we wish" or "we want," but perfectly polite. However, they could easily "see" Jesus, had already done so, no doubt. They wish an interview with Jesus.

John 12:22
Andrew ( $\tau \omega \mathrm{A} v \delta \rho \varepsilon \alpha$ ). Another apostle with a Greek name and associated with Philip again (Joh 6:7f. ), the man who first brought his brother Simon to Jesus ( 1:41). Andrew was clearly a man of wisdom for a crisis. Note the vivid dramatic presents here,
cometh ( $\varepsilon \rho \chi \varepsilon \tau \alpha$ ),
telleth ( $\lambda \varepsilon \gamma \varepsilon$ ). What was the crisis? These Greeks wish an interview with Jesus. True Jesus had said something about "other sheep" than Jews ( 10:16), but he had not explained. Philip and Andrew wrestle with the problem that will puzzle Peter on the housetop in Joppa (Ac 10:9-18 ), that middle wall of partition between Jew and Gentile that was only broken down by the Cross of Christ (Eph 2:11-22) and that many Christians and Jews still set up between each other. Andrew has no solution for Philip and they bring the problem, but not the Greeks, to Jesus.

John 12:23
The hour is come ( $\varepsilon \lambda \eta \lambda \nu \theta \varepsilon v \eta \omega \rho \alpha$ ). The predestined hour, seen from the start ( 2:4), mentioned by John ( $7: 30 ; 8: 20$ ) as not yet come and later as known by Jesus as come ( $13: 1$ ), twice again used by Jesus as already come (in the prayer of Jesus, 17:1; Mr 14:41, just before the betrayal in the Garden). The request from the Greeks for this interview stirs the heart of Jesus to its depths.

That the Son of man should be glorified (ıva $\delta \circ \xi \alpha \sigma \theta \eta$ o vioc tov $\alpha v \theta \rho \omega \tau \pi v$ ). Purpose clause with tva (not in the sense of ote, when) and the first aorist passive subjunctive of $\delta о \xi \alpha \zeta \omega$, same sense as in 12:16, 13:31. The Cross must come before Greeks can really come to Jesus with understanding. But this request shows that interest in Jesus now extends beyond the Jewish circles.

John 12:24
Except ( $\varepsilon \alpha v \mu \eta$ ). Negative condition of third class (undetermined, supposable case) with second aorist active participle $\pi \varepsilon \sigma \omega \nu$ (from $\pi \iota \pi \tau \omega$, to fall) and the second aorist active subjunctive of $\alpha \pi 0 \theta v \eta \sigma \kappa \omega$, to die.

A grain of wheat (о коккоц tov бוтоv). Rather, "the grain of wheat."
By itself alone ( $\alpha \cup \tau 0 \varsigma \mu \circ v o \varsigma)$. Both predicate nominatives after $\mu \varepsilon v \varepsilon$. It is not necessary to think (nor likely) that Jesus has in mind the Eleusinian mysteries which became a symbol of the mystery of spring. Paul in 1Co 15:36 uses the same illustration of the resurrection that Jesus does here. Jesus shows here the paradox that life comes through death. Whether
the Greeks heard him or not we do not know. If so, they heard something not in Greek philosophy, the Christian ideal of sacrifice, "and this was foreign to the philosophy of Greece" (Bernard). Jesus had already spoken of himself as the bread of life ( 6:35-65).

But if it die ( $\varepsilon \alpha \sim \delta \varepsilon \alpha \pi \circ \theta a v \eta$ ). Parallel condition of the third class. Grains of wheat have been found in Egyptian tombs three or four thousand years old, but they are now dead. They bore no fruit.

John 12:25
Loseth it ( $\alpha \pi 0 \lambda \lambda \nu \varepsilon \alpha v \tau \eta v$ ). The second paradox. Present active indicative of $\alpha \pi \sigma \lambda \lambda v \omega$. This great saying was spoken at various times as in Mr 8:35 (Mt 16:25; Lu 9:24) and Mr 10:39 ( Lu 17:33 ). See those passages for discussion of $\psi v \times \eta$ (life or soul). For "he that hateth his life" (o $\mu \sigma \omega \omega \tau \eta \nu \psi v \chi \eta \nu$ avtov) see the sharp contrasts in Luke 14:26-35 where $\mu \sigma \sigma \varepsilon \omega$ is used of father, mother, wife, children, brothers, sisters, as well as one's own life. Clearly $\mu \tau \sigma \varepsilon \omega$ means "hate" when the issue is between Christ and the dearest things of life as happens when the choice is between martyrdom and apostasy. In that case one keeps his soul for eternal life by losing his life ( $\psi \cup \chi \eta$, each time) here. That is the way to "guard" ( $\varphi \cup \lambda \alpha \xi \varepsilon$ ) life by being true to Christ. This is the second paradox to show Christ's philosophy of life.

John 12:26
If any man serve me ( $\varepsilon \alpha v \varepsilon \mu \circ \tau \iota \varsigma \delta \iota \alpha \kappa о \vee \eta)$. Condition of third class again ( $\varepsilon \alpha \nu$ with present active subjunctive of $\delta \iota \alpha \kappa о v \varepsilon \omega$, keep on serving with dative $\varepsilon \mu \mathrm{o}$ ).

Let him follow me ( $\varepsilon \mu \circ$ ако $о \boldsymbol{\sigma} \theta \varepsilon \iota \tau \omega$ ). "Me (associative instrumental case) let him keep on following" (present active imperative of $\alpha \kappa о \lambda о v \theta \varepsilon \omega)$.

Where ... there ( $о \pi о \cup$... $\varepsilon \kappa \varepsilon$ ). In presence and spiritual companionship here and hereafter. Cf. 14:3; 17:24; Mt 28:20 .

Shall honour ( $\tau \mu \eta \sigma \varepsilon$ ). Future active of $\tau \mu \mu \alpha \omega$, but it may be the kind of honour that Jesus will get (verse 23).

John 12:27
My soul ( $\eta \psi v \chi \eta \mu \circ v$ ). The soul ( $\psi v \chi \eta$ ) here is synonymous with spirit ( $\pi v \varepsilon v \mu \alpha)$ in 13:21.

Is troubled ( $\tau \varepsilon \tau \alpha \rho \alpha \kappa \tau \alpha)$. Perfect passive indicative of $\tau \alpha \rho \alpha \sigma \sigma \omega$, used also in 11:33; 13:21 of Jesus. While John proves the deity of Jesus in his Gospel, he assumes throughout his real humanity as here (cf. 4:6). The language is an echo of that in Ps 6:4; 42:7. John does not give the agony in Gethsemane which the Synoptics have (Mr 14:35f.; Mt 26:39; Lu 22:42 ), but it is quite beside the mark to suggest, as Bernard does, that the account here is John's version of the Gethsemane experience. Why do some critics feel called upon to level down to a dead plane every variety of experience in Christ's life?

And what shall I say? ( $\kappa \alpha \tau \varepsilon ו \pi \omega ;$ ). Deliberative subjunctive which expresses vividly "a genuine, if momentary indecision" (Bernard). The request of the Greeks called up graphically to Jesus the nearness of the Cross.

Father, save me from this hour ( $\pi \alpha \tau \varepsilon \rho, \sigma \omega \sigma \sigma v \mu \varepsilon \varepsilon \kappa \tau \eta \varsigma \omega \rho \alpha \varsigma \tau \alpha \nu \tau \eta \varsigma)$. Jesus began his prayers with "Father" ( 11:41). Dods thinks that this should be a question also. Westcott draws a distinction between $\varepsilon \kappa$ (out of) and $\alpha \pi 0$ (from) to show that Jesus does not pray to draw back from the hour, but only to come safely out of it all and so interprets $\varepsilon \kappa$ in Heb 5:7, but that distinction will not stand, for in Joh 1:44 $\varepsilon \kappa$ and $\alpha \pi 0$ are used in the same sense and in the Synoptics (Mr 14:35f.; Mt 26:39; Lu 52:42 ) we have $\alpha \pi 0$. If it holds here, we lose the point there. Here as in Gethsemane the soul of Jesus instinctively and naturally shrinks from the Cross, but he instantly surrenders to the will of God in both experiences.

But for this cause came I unto this hour ( $\alpha \lambda \lambda \alpha \delta \iota \alpha$ тоט $\tau \circ \eta \lambda \theta$ ov $\varepsilon \iota \varsigma \tau \eta \nu \omega \rho \alpha \nu \tau \alpha v \tau \eta \nu$ ). It was only a moment of human weakness as in Gethsemane that quickly passed. Thus understood the language has its natural meaning.

John 12:28
Father, glorify thy name ( $\left.\pi \alpha \tau \varepsilon \rho, \delta_{0} \xi \alpha \sigma o v ~ \sigma o v ~ \tau o ~ o v o \mu \alpha\right)$. First aorist (note of urgency) active imperative of $\delta o \xi \alpha \zeta \omega$ and in the sense of his death already in verses 16,23 and again in 13:31; 17:5. This is the prayer of the $\pi v \varepsilon v \mu \alpha$ (or $\psi v \chi \eta$ ) as opposed to that of the $\sigma \alpha \rho \xi$ (flesh) in verse 27. The "name" (ovo $\mu \alpha)$ of God expresses the character of God (1:12; 5:43; 17:11 ). Cf. Mt 6:9 .

A voice out of heaven ( $\varphi \omega v \eta \varepsilon \kappa$ tov oupavou). This was the Father's answer to the prayer of Jesus for help. See already the Father's voice at the baptism of Jesus (Mr 1:11) and at the transfiguration (Mr 9:7). The rabbis called the audible voice of God bath-qol (the daughter of a voice).

I have both glorified it and will glorify it again ( $\kappa \alpha \varepsilon \delta о \xi \alpha \sigma \alpha \kappa \alpha \pi \alpha \lambda \iota \nu \delta о \xi \alpha \sigma \omega$ ). This definite assurance from the Father will nerve the soul of Jesus for the coming ordeal. Cf. 11:40 for $\varepsilon \delta 0 \xi \alpha \sigma \alpha$ and 13:31; 17:5 for $\delta 0 \xi \alpha \sigma \omega$.

John 12:29
That it had thundered ( $\beta \rho \circ v \tau \eta \nu \gamma \varepsilon \gamma o v \varepsilon v \alpha$ ). Perfect active infinitive of $\gamma ı \nu o \mu \alpha$ in indirect discourse after $\varepsilon \lambda \varepsilon \gamma \varepsilon \nu$ and the accusative of general reference ( $\beta \rho \circ \nu \tau \eta \nu$, thunder, as in Mr 3:17), "that thunder came to pass." So the crowd "standing by" ( $\varepsilon \sigma \tau \omega \varsigma$, second perfect active participle of $t \sigma \tau \eta \mu)$, but Jesus understood his Father's voice.

An angel hath spoken to him ( $A \gamma \gamma \varepsilon \lambda o \varsigma \alpha \cup \tau \omega \lambda \varepsilon \lambda \alpha \lambda \eta \kappa \varepsilon v$ ). Perfect active indicative of $\lambda \alpha \lambda \varepsilon \omega$. So, when Jesus spoke to Saul on the way to Damascus, those with Saul heard the voice, but did not understand (Ac 9:7; 22:9).

John 12:30
Not for my sake, but for your sakes (ov $\delta \iota^{\prime} \varepsilon \mu \varepsilon, \alpha \lambda \lambda \alpha \delta^{\prime}{ }^{\prime} v \mu \alpha \varsigma$ ). These words seem to contradict verses 28,29 . Bernard suggests an interpolation into the words of Jesus. But why not take it to be the figure of exaggerated contrast, "not merely for my sake, but also for yours"?

John 12:31

The judgement (крıбıऽ). No article, "A judgement." The next few days will test this world.

The prince of this world (o $\alpha \rho \chi \omega v$ tov коб $\mu \circ v$ tov $\tau 0 v$ ). This phrase here, descriptive of Satan as in possession of the evil world, occurs again in 14:30; 16:11. In the temptations Satan claims power over the world and offers to share it with Jesus (Mt 4:8-10; Lu 4:5-8). Jesus did not deny Satan's power then, but here proclaims final victory over him.

Shall be cast out ( $\varepsilon \kappa \beta \lambda \eta \theta \eta \sigma \varepsilon \tau \alpha \varepsilon \xi \omega)$. Future passive of $\varepsilon \kappa \beta \alpha \lambda \lambda \omega$. Note $\varepsilon \xi \omega$, clean out. The Book of Revelation also proclaims final victory over Satan.

John 12:32
And I, if I be lifted from the earth ( $\kappa \alpha \gamma \omega \alpha v v \psi \omega \theta \omega \varepsilon \kappa \tau \eta \varsigma \gamma \eta \varsigma)$. Note proleptic position of $\varepsilon \gamma \omega$ (I). Condition of third class (undetermined with prospect) with $\alpha v$ (= $=\alpha v$ here) with first aorist passive subjunctive of $v \psi o \omega$, the verb used in 3:14 of the brazen serpent and of the Cross of Christ as here and also in $8: 28$. Westcott again presses $\varepsilon \kappa$ instead of $\alpha \pi 0$ to make it refer to the ascension rather than to the Cross, a wrong interpretation surely.

Will draw all men unto myself ( $\pi \alpha \nu \tau \alpha \varsigma \varepsilon \lambda \kappa \nu \sigma \omega \pi \rho о \varsigma \varepsilon \mu \alpha \nu \tau о v$ ). Future active of $\varepsilon \lambda \kappa \nu \omega$, late form of $\varepsilon \lambda \kappa \omega$, to draw, to attract. Jesus had already used this verb of the Father's drawing power ( $6: 44$ ). The magnetism of the Cross is now known of all men, however little they understand the mystery of the Cross. By "all men" ( $\pi \alpha v \tau \alpha \varsigma)$ Jesus does not mean every individual man, for some, as Simeon said (Lu 2:34) are repelled by Christ, but this is the way that Greeks (verse 22) can and will come to Christ, by the way of the Cross, the only way to the Father ( 14:6).

John 12:33
Signifying ( $\sigma \eta \mu \alpha \iota v \omega v$ ). Present active participle of $\sigma \varepsilon \mu \alpha \iota v \omega$, old verb to give a sign ( $\sigma \eta \mu \varepsilon ו \circ v$ ) as in Ac 25:27, and the whole phrase repeated in 18:32 and nearly so in 21:19. The indirect question here and in 18:32 has the imperfect $\varepsilon \mu \varepsilon \lambda \lambda \varepsilon v$ with present infinitive rather than the usual present $\mu \varepsilon \lambda \lambda \varepsilon$ retained while in 21:19 the future indicative $\delta o \xi \alpha \sigma \varepsilon$ occurs according to rule. The point in $\pi \boldsymbol{\pi} \omega$ (qualitative relative in the instrumental case with Өavat $\omega$ ) is the Cross (lifted up) as the kind of death before Christ.

John 12:34
Out of the law ( $\varepsilon \kappa$ tov voноv). That is, "out of the Scriptures" (10:34; 15:25).
The Christ abideth forever (o Xpıбтоৎ $\mu \varepsilon v \varepsilon \varepsilon ء \varsigma ~ \tau o v ~ a \iota \omega v \alpha$ ). Timeless present active indicative of $\mu \varepsilon v \omega$, to abide, remain. Perhaps from Ps $89: 4 ; 110: 4$; Isa 9:7; Eze 37:25; Da 7:14

How sayest thou? ( $\pi \omega \varsigma \lambda \varepsilon \gamma \varepsilon \iota \varsigma \sigma\rangle$ ). In opposition to the law (Scripture).
The Son of man ( $\tau 0 v$ vıov $\tau 0 v ~ \alpha v \theta \rho \omega \pi \sigma v$ ). Accusative case of general reference with the infinitive $v \psi \omega \theta \eta v \alpha$ (first aorist passive of $\nu \psi o \omega$ and taken in the sense of death by the cross as Jesus used it in verse 32). Clearly the crowd understand Jesus to be "the Son of man" and take the phrase to be equivalent to "the Christ." This is the obvious way to understand
the two terms in their reply, and not, as Bernard suggests, that they saw no connexion between "the Christ" (the Messiah) and "the Son of man." The use of "this" (ovtos) in the question that follows is in contrast to verse 32. The Messiah (the Son of man) abides forever and is not to be crucified as you say he "must" ( $\delta \varepsilon$ ) be.

John 12:35
Yet a little while is the light among you ( $\varepsilon \tau \mu \kappa \rho \circ v \chi \rho \circ v o v \tau 0 ~ \varphi \omega \varsigma \varepsilon \nu \nu \mu \nu v \varepsilon \sigma \tau \tau v$ ). X $\rho$ ovov is the accusative of extent of time. Jesus does not argue the point of theology with the crowd who would not understand. He turns to the metaphor used before when he claimed to be the light of the world ( 8:12) and urges that they take advantage of their privilege "while ye have the light" ( $\omega \varsigma$ то $\varphi \omega \varsigma$ exะ $\tau \varepsilon$ ).

That darkness overtake you not (ıva $\mu \eta \sigma \kappa о \tau \iota \alpha \nu \mu \alpha \varsigma \kappa \alpha \tau \alpha \lambda \alpha \beta \eta$ ). Purpose (negative) with $t v \alpha \mu \eta$ and second aorist active subjunctive of $\kappa \alpha \tau \alpha \lambda \alpha \mu \beta \alpha v \omega$. See this verb in 1:5. In 1Th 5:4 this verb occurs with $\eta \mu \varepsilon \rho \alpha$ (day) overtaking one like a thief.

Knoweth not whither he goeth (ovк ot $\delta \varepsilon v \pi$ поv vпa $\gamma \varepsilon$ ). See 11:10 for this idea and the same language in 1Jo 2:11. The ancients did not have our electric street lights. The dark streets were a terror to travellers.

John 12:36
Believe in the light ( $\pi \iota \sigma \tau \varepsilon \cup \varepsilon \tau \varepsilon \varepsilon เ \varsigma ~ \tau o ~ \varphi \omega \varsigma) . ~ T h a t ~ i s, ~ " b e l i e v e ~ i n ~ m e ~ a s ~ t h e ~ M e s s i a h " ~(8: 12 ; ~$ 9:5).

That ye may become sons of light (ıva vio $\varphi \omega \tau \tau \varsigma \gamma \varepsilon v \eta \sigma \theta \varepsilon$ ). Purpose clause with $v \sim \alpha$ and second aorist subject of $\gamma \iota v o \mu \alpha$, to become. They were not "sons of light," a Hebrew idiom (cf. 17:12; Lu 16:8 with the contrast), an idiom used by Paul in 1Th 5:5; Eph 5:8 . It is equivalent to "enlightened men" (Bernard) and Jesus called his disciples the light of the world (Mt 5:14).

Hid himself from them ( $\varepsilon \kappa \rho \cup \beta \eta \alpha \pi^{\prime} \alpha v \tau \omega v$ ). Second aorist passive indicative of $\kappa \rho \cup \pi \tau \omega$, late form (in LXX) for old eкрvчๆ, "was hidden from them," as in 8:59. This part of verse 36 begins a new paragraph.

John 12:37
 $\varepsilon \mu \pi \rho o \sigma \theta \varepsilon v \alpha \nu \tau \omega v)$. Genitive absolute with perfect active participle in concessive sense of $\pi о \varepsilon \omega$.

Yet they believed not on him (ouk عтıбтвvov \&ic autov). No "yet" in the Greek. Negative imperfect active of $\pi 丿 \sigma \tau \varepsilon \cup \omega$, "they kept on not believing on him," stubborn refusal in face of the light (verse 35).

John 12:38
That might be fulfilled (ıva $\pi \lambda \eta \rho \omega \theta \eta$ ). It is usually assumed that $t v \alpha$ here with the first aorist passive subjunctive of $\pi \lambda \eta \rho o \omega$ has its full telic force. That is probable as God's design, but it is by no means certain since $\mathrm{v} \alpha$ a is used in the N.T. with the idea of result, just as $u t$
in Latin is either purpose or result, as in Joh 6:7; 9:2; 1Th 5:4; Ga 5:17; Ro 11:11 (Robertson, Grammar, p. 998). Paul in Ro 10:16 quotes Isa 53:1 as John does here but without ıva. See Ro 10:16 for discussion of the quotation. The next verse adds strength to the idea of design.

John 12:39
 seems to have a double reference (to what precedes and to what follows) as in $8: 47$. The negative imperfect (double augment, $\varepsilon \delta v v a v \tau o$ ) of $\delta v v a \mu \alpha$. John is not absolving these Jews from moral responsibility, but only showing that the words of Isaiah "had to be fulfilled, for they were the expression of Divine foreknowledge " (Bernard).

John 12:40
He hath blinded ( $\tau \varepsilon \tau \cup \varphi \lambda \omega \kappa \varepsilon \nu$ ). Perfect active indicative of $\tau \cup \varphi \lambda \sigma \omega$, old causative verb to make blind (from $\tau \cup \varphi \lambda o \varsigma$, blind), in N.T. only here, 2Co 4:4; 1Jo 2:11.

He hardened ( $\varepsilon \pi \omega \rho \omega \sigma \varepsilon \nu$ ). First aorist active indicative of $\pi \omega \rho o \omega$, a late causative verb (from $\pi \omega \rho \circ \varsigma$, hard skin), seen already in $\operatorname{Mr}$ 6:52, etc. This quotation is from Isa 6:10 and differs from the LXX.

Lest they should see ( $\imath v \alpha \mu \eta \iota \omega \sigma \iota v)$. Negative purpose clause with $\imath v \alpha \mu \eta$ instead of $\mu \eta \pi \sigma \tau \varepsilon$ (never used by John) of the LXX. Matthew (Mt 13:15) has $\mu \eta \pi \sigma \tau \varepsilon$ and quotes Jesus as using the passage as do Mark (Mr 4:12) and Luke (Lu 8:10). Paul quotes it again (Ac 28:26 ) to the Jews in Rome. In each instance the words of Isaiah are interpreted as forecasting the doom of the Jews for rejecting the Messiah. Matthew (Mt 13:15 ) has $\sigma v v \omega \sigma \iota v$ where John has voך $\sigma \omega \sigma \iota v$ (perceive), and both change from the subjunctive to the future ( $\kappa \alpha$ $\iota \alpha \sigma O \mu \alpha$ ), "And I should heal them." John has here $\sigma \tau \rho \alpha \varphi \omega \sigma \iota \nu$ (second aorist passive subjunctive of $\sigma \tau \rho \varepsilon \varphi \omega$ ) while Matthew reads $\varepsilon \pi \iota \sigma \tau \rho \varepsilon \psi \omega \sigma \iota \nu$ (first aorist active of $\varepsilon \pi \iota \sigma \tau \rho \varepsilon \varphi \omega$ ).

John 12:41
Because he saw his glory (o $\tau \varepsilon \delta \delta \varepsilon \tau \eta \nu \delta o \xi \alpha v \alpha v \tau o v$ ). Correct reading here $o \tau$ (because), not ote (when). Isaiah with spiritual vision saw the glory of the Messiah and spoke ( $\varepsilon \lambda \alpha \lambda \eta \sigma \varepsilon v$ ) of him, John says, whatever modern critics may think or say. So Jesus said that Abraham saw his day ( 8:56). Cf. Heb 11:13.

John 12:42
Nevertheless even ( $о \omega \omega \varsigma \mu \varepsilon \nu \tau \sigma \kappa \alpha$ ). For the old $о \mu \omega \varsigma$ see 1Co 14:7; Ga 3:15 (only other examples in N.T.), here only with $\mu \varepsilon \nu \tau о$, "but yet," and $\kappa \alpha$, "even." In spite of what has just been said "many ( $\pi \mathbf{\pi} \lambda \lambda 0$ ) even of the rulers" (recall the lonely shyness of Nicodemus in 3:1ff. ). These actually "believed on him" ( $\varepsilon \pi \iota \sigma \tau \varepsilon v \sigma \alpha v \varepsilon \iota \varsigma \alpha v \tau o v)$ in their convictions, a remarkable statement as to the effect that Christ had in Jerusalem as the Sanhedrin plotted his death. Cf. Nicodemus and Joseph of Arimathea.

But because of the Pharisees ( $\alpha \lambda \lambda \alpha \delta \iota \alpha$ тоия Фарıб $\alpha \iota \circ \varsigma)$. Like the whispered talk in 7:13 "because of the fear of the Jews." Once the Pharisees sneeringly asked the officers ( 7:48):
"Hath any one of the rulers believed on him?" And now "many of the rulers have believed on him."

They did not confess (ovX $\omega \mu 0 \lambda$ opouv). Negative imperfect in contrast to the punctiliar aorist $\varepsilon \pi \iota \sigma \tau \varepsilon \cup \sigma a v$. "They kept on not confessing." How like the cowardly excuses made today by those under conviction who refuse to step out for Christ.

Lest they should be put out of the synagogue ( $1 v \alpha \mu \eta \alpha \pi о \sigma v v \alpha \gamma \omega \gamma \sigma \gamma \varepsilon v \omega v \tau \alpha$ ). Cf. 9:22 where this very word occurs in a purpose clause like this. Only once more in the N.T. ( 16:2), a Jewish word not in profane authors. This ostracism from the synagogue was dreaded by the Jews and made cowards of these "believing elders."

More than ( $\mu \alpha \lambda \lambda o v \eta \pi \varepsilon \rho$ ). They preferred the glory and praise of men more than the glory and praise of God. How a $\quad \rho \circ \pi \rho$, these words are to some suave cowards today.

John 12:44
Cried and said ( $\varepsilon \kappa \rho \alpha \xi \varepsilon v \kappa \alpha \varepsilon \iota \pi \varepsilon v$ ). First aorist active indicative of $\kappa \rho \alpha \zeta \omega$, to cry aloud, and second aorist active of defective verb $\varepsilon \rho \omega$, to say. This is probably a summary of what Jesus had already said as in verse 36 John closes the public ministry of Jesus without the Synoptic account of the last day in the temple on our Tuesday (Mr 11:27-12:44; Mt 21:23-23:39; Lu 20:1-21:4).

Not on me, but on him (ov $\varepsilon \varsigma \varsigma \varepsilon \mu \varepsilon, \alpha \lambda \lambda \alpha \varepsilon \iota \varsigma \tau 0 v$ ). "Not on me only, but also on," another example of exaggerated contrast like that in verse 30 . The idea of Jesus here is a frequent one (believing on Jesus whom the Father has sent) as in 3:17f.; 5:23f.,30,43; 7:16; 8:42; 13:20; 14:1; Mt 10:40; Lu 9:48.

John 12:46
I am come a light ( $\mathrm{E} \gamma \omega \varphi \omega \varsigma \varepsilon \lambda \eta \lambda \nu \theta \alpha$ ). As in 3:19; 9:5; 8:12; 12:35. Final clause (negative) also here ( $v \sim \alpha \mu \eta \mu \varepsilon เ v \eta$, first aorist active subjunctive) as in 12:35. Light dispels darkness.

John 12:47
If any one ( $\varepsilon \alpha \nu \tau \iota \varsigma)$. Third-class condition with $\varepsilon \alpha v$ and first aorist active subjunctive ( $\alpha<0 \cup \sigma \eta$ ) of $\alpha \kappa о \nu \omega$ and same form ( $\varphi \cup \lambda \alpha \xi \eta$ ) of $\varphi \cup \lambda \alpha \sigma \sigma \omega$ with negative $\mu \eta$.

But to save the world ( $\alpha \lambda \lambda^{\prime} \imath v \alpha \sigma \omega \sigma \omega \tau$ тov коб $\mu \circ v$ ). Purpose clause again (cf. $\imath \alpha \alpha \rho \imath v \omega$, just before) with iva and first aorist active of sozo. Exaggerated contrast again, "not so much to judge, but also to save." See 3:17 for same contrast. And yet Jesus does judge the world inevitably (8:15f.; 9:39), but his primary purpose is to save the world ( $3: 16$ ). See close of the Sermon on the Mount for the same insistence on hearing and keeping (obeying) the words of Jesus (Mt 7:24,26) and also Lu 11:28.

John 12:48
Rejecteth ( $\alpha \theta \varepsilon \tau \omega v$ ). Present active participle of $\alpha \theta \varepsilon \tau \varepsilon \omega$, late Koine verb (from $\alpha \theta \varepsilon \tau o \varsigma$, a privative, and $\tau(\theta \eta \mu)$, to render null and void, only here in John, but see Mr 6:26; 7:9 .

One that judgeth him ( $\tau 0 v$ кpivovia avtov). Articular present active participle of $\kappa \rho \iota v \omega$. See same idea in 5:45; 9:50 .

The same ( $\varepsilon \kappa \varepsilon เ v o \varsigma) . ~ " T h a t " ~ v e r y ~ w o r d ~ o f ~ C h r i s t ~ w h i c h ~ o n e ~ r e j e c t s ~ w i l l ~ c o n f r o n t ~ h i m ~$ and accuse him to the Father "at the last day" ( $\varepsilon v \tau \eta \varepsilon \sigma \chi \alpha \tau \eta \eta \mu \varepsilon \rho \alpha$, this phrase peculiar to John). There is no escaping it. And yet Jesus himself will bear witness for or against the one whose conduct has already revealed his attitude towards the message of God (Mt 10:32; Lu 12:8f. ).

John 12:49
He hath given ( $\delta \varepsilon \delta \omega \kappa \varepsilon v$ ). Perfect active indicative. Christ has permanent commission.
What I should say and what I should speak ( $\tau \varepsilon \iota \epsilon \omega \kappa \alpha \tau \lambda \alpha \lambda \eta \sigma \omega$ ). Indirect question retaining the deliberative subjunctive (second aorist active $\varepsilon ו \pi \omega$, first aorist active $\lambda \alpha \lambda \eta \sigma \omega$ ). Meyer and Westcott take $\varepsilon ו \pi \omega$ to refer to the content and $\lambda \alpha \lambda \eta \sigma \omega$ more to the varying manner of delivery. Possibly so.

John 12:50
Life eternal ( $\zeta \omega \eta \alpha \iota \omega v / o \varsigma)$. See 3:15; Mt 25:46 for this great phrase. In 6:68 Peter says to Jesus, "Thou hast the words of eternal life." Jesus had just said ( 6:63) that his words were spirit and life. The secret lies in the source, "as the Father hath said to me" ( $\varepsilon\llcorner\rho \eta \kappa \varepsilon v)$.

## John 13

John 13:1
Now before the feast of the passover ( $\pi \rho o \delta \varepsilon \tau \eta \varsigma \varepsilon o \rho \tau \eta \varsigma ~ \tau o v ~ \pi \alpha \sigma \chi \alpha$ ). Just before, John means, not twenty-four hours before, that is our Thursday evening (beginning of 15th of Nisan, sunset to sunset Jewish day), since Jesus was crucified on Friday 15th of Nisan. Hence Jesus ate the regular passover meal at the usual time. The whole feast, including the feast of unleavened bread, lasted eight days. For a discussion of the objections to this interpretation of John in connexion with the Synoptic Gospels one may consult my Harmony of the Gospels, pp. 279-84, and David Smith's In the Days of His Flesh, Appendix VIII. The passover feast began on the 15th Nisan at sunset, the passover lamb being slain the afternoon of 14th Nisan. There seems no real doubt that this meal in Joh 13:1-30 is the real passover meal described by the Synoptics also (Mr 14:18-21; Mt 26:21-25; Lu 22:21-23 ), followed by the institution of the Lord's Supper. Thus understood verse 1 here serves as an introduction to the great esoteric teaching of Christ to the apostles (Joh 13:2-17:26), called by Barnas Sears The Heart of Christ. This phrase goes with the principal verb $\eta \gamma \alpha \pi \eta \sigma \varepsilon v$ (loved).

Knowing ( $\varepsilon \delta \omega \varsigma)$ ). Second perfect active participle, emphasizing the full consciousness of Christ. He was not stumbling into the dark as he faced "his hour" (autou $\eta \omega \rho \alpha$ ). See 18:4; 19:28 for other examples of the insight and foresight (Bernard) of Jesus concerning his death. See on 12:23 for use before by Jesus.

That he should depart ( $\imath v \alpha \mu \varepsilon \tau \alpha \beta \eta$ ). Sub-final use of $t v \alpha$ with second aorist active subjunctive of $\mu \varepsilon \tau \alpha \beta \alpha \iota v \omega$, old word, to go from one place to another, here ( $5: 24 ; 1$ Jo 3:14 ) to go from this world ( 8:23) back to the Father from whom he had come (14:12,28; 16:10,28; 17:5).

His own which were in the world ( $\tau$ ouc $\iota \delta$ ove $\tau$ tou¢ $\varepsilon v \tau \omega$ коб $\mu \omega$ ). His own disciples ( $17: 6,9,11$ ), those left in the world when he goes to the Father, not the Jews as in 1:11. See Ac 4:23; 1Ti 5:8 for the idiom. John pictures here the outgoing of Christ's very heart's love (chs. Joh 13-17 ) towards these men whom he had chosen and whom he loved "unto the end" ( (ءા̧ $\tau \varepsilon \lambda \circ \varsigma)$ as in Mt 10:22; Lu 18:15, but here as in 1Th 2:16 rather "to the uttermost." The culmination of the crisis ("his hour") naturally drew out the fulness of Christ's love for them as is shown in these great chapters (Joh 13-17).

## John 13:2

During supper ( $\delta \varepsilon ı \pi v o v \gamma ı v o \mu \varepsilon v o v$ ). Correct text, present middle participle of $\gamma ı v o \mu \alpha$ (not $\gamma \varepsilon v o \mu \varepsilon v o v$, second aorist middle participle, "being ended") genitive absolute. Verse 4 shows plainly that the meal was still going on.

The devil having already put ( $\tau$ оט $\delta i \alpha \beta 0 \lambda o v \eta \delta \eta \beta \varepsilon \beta \lambda \eta \kappa о \tau о \varsigma)$. Another genitive absolute without a connective (asyndeton), perfect active participle of $\beta a \lambda \lambda \omega$, to cast, to put. Luke (Lu 22:3 ) says that Satan entered Judas when he offered to betray Jesus. Hence John's
"already" $(\eta \delta \eta)$ is pertinent. John repeats his statement in verse 27. In Joh 6:70 Jesus a year ago had seen that Judas was a devil.

To betray him ( $\imath v \alpha \pi \alpha \rho \alpha \delta o \alpha v \tau o v$ ). Cf. Ac 5:3. Purpose clause with $v v a$ and second aorist active subjunctive of $\pi \alpha \rho \alpha \delta \iota \delta \omega \mu$ (form in -o as in Mr 14:10 rather than the usual - $\omega$ in $\operatorname{Lu}$ 22:4). Satan had an open door by now into the heart of Judas.

## John 13:3

Knowing ( $\varepsilon \delta \omega \varsigma$ ). Repeated from verse 1, accenting the full consciousness of Jesus.
Had given ( $\varepsilon \delta \omega \kappa \varepsilon v$ ). So Aleph B L W, aorist active instead of $\delta \varepsilon \delta \omega \kappa \varepsilon v$ (perfect active) of $\delta \iota \delta \omega \mu$. Cf. 3:31 for a similar statement with $\varepsilon v$ instead of $\varepsilon เ \varsigma$. See Mt 11:27 (Lu 10:22) and 28:18 for like claim by Jesus to complete power.

And that he came forth from God, and goeth unto God (ка от $\alpha \pi о$ $\theta \varepsilon o v \varepsilon \xi \eta \lambda \theta \varepsilon v$ ка $\pi \rho \circ \varsigma \operatorname{\tau ov} \theta \varepsilon \circ v \mathrm{v} \pi \alpha \gamma \varepsilon)$. See plain statement by Jesus on this point in $16: 28$. The use of $\pi \rho o \varsigma$ tov $\theta$ zov recalls the same words in $1: 1$. Jesus is fully conscious of his deity and Messianic dignity when he performs this humble act.

John 13:4
Riseth from supper ( $\varepsilon \gamma \varepsilon ו \rho \varepsilon \tau \alpha \varepsilon \kappa ~ \tau o v ~ \delta \varepsilon ı \pi v o v)$. Vivid dramatic present middle indicative of $\varepsilon \gamma \varepsilon \mid \rho \omega$. From the couch on which he was reclining.

Layeth aside ( $\tau \iota \theta \eta \sigma \iota v$ ). Same dramatic present active of $\tau \iota \theta \eta \mu$.
His garments ( $\tau \alpha \mu \alpha \tau \iota \alpha$ ). The outer robe $\tau \alpha \lambda \lambda_{1} \theta$ ( $\mu \alpha \tau \circ \sigma v$ ) and with only the tunic ( $\chi \tau \omega v$ ) on "as one that serveth" (Lu 22:27). Jesus had already rebuked the apostles for their strife for precedence at the beginning of the meal (Lu 22:24-30).

A towel ( $\lambda \varepsilon v \tau 1 \circ v$ ). Latin word linteum, linen cloth, only in this passage in the N.T.
Girded himself ( $\delta \iota \varepsilon \zeta \omega \sigma \varepsilon v \varepsilon \alpha v \tau o v)$. First aorist active indicative of $\delta \iota \alpha \zeta \omega v v v \omega(-\nu \mu)$, old and rare compound (in Plutarch, LXX, inscriptions, and papyri), to gird all around. In N.T. only in John (13:4,5; 21:7). Did Peter not recall this incident when in 1Pe 5:5 he exhorts all to "gird yourselves with humility" ( $\tau \eta \tau \alpha \pi \varepsilon є ข о \varphi \rho о \sigma \cup \nu \eta \nu \varepsilon \gamma \kappa о \mu \beta \omega \sigma \alpha \sigma \theta \varepsilon)$ ?

John 13:5
Poureth ( $\beta \alpha \lambda \lambda \varepsilon$ ). Vivid present again. Literally, "putteth" (as in verse $2, \beta \alpha \lambda \lambda \omega$ ).
Into the basin ( $\varepsilon \varsigma \varsigma \tau 0 v \nu ו \pi \tau \eta \rho \alpha)$. From verb $v i \pi \tau \omega$ (later form of $v \iota \zeta \omega$ in this same verse and below) to wash, found only here and in quotations of this passage. Note the article, "the basin" in the room.

Began to wash ( $\eta \rho \xi \alpha \tau 0 \nu \iota \pi \tau \varepsilon เ v$ ). Back to the aorist again as with $\delta \iota \varepsilon \zeta \omega \sigma \varepsilon v$ (verse 4). Nı $\iota \tau \omega$ was common for washing parts of the body like the hands or the feet.

To wipe ( $\varepsilon \kappa \mu \alpha \sigma \sigma \varepsilon เ v)$ ) "To wipe off" as in 12:3.
With the towel ( $\tau \omega \lambda \varepsilon v \tau \omega \omega$ ). Instrumental case and the article (pointing to $\lambda \varepsilon v \tau \iota \circ v$ in verse 4).

Wherewith ( $\omega$ ). Instrumental case of the relative $o$.

He was girded ( $\eta \vee \delta ı \varepsilon \zeta \omega \sigma \mu \varepsilon v o \varsigma)$. Periphrastic past perfect of $\delta ı \alpha \zeta \omega v v v \omega$ for which verb see verse 4.

John 13:6
So he cometh ( $\varepsilon \rho \chi \varepsilon \tau \alpha \circ \sim v)$ ). Transitional use of ouv and dramatic present again ( $\varepsilon \rho \chi \varepsilon \tau \alpha$ ).
 in position of $\sigma \nu \mu \circ v$ (away from $\pi$ o $\delta a \varsigma$ ), "Dost thou my feet wash?" "Peter, we may suppose, drew his feet up, as he spoke, in his impulsive humility" (Bernard).

John 13:7
I ... thou ( $\varepsilon \gamma \omega \ldots \sigma v$ ). Jesus repeats the pronouns used by Peter in similar contrast.
Not now (ouk $\alpha \rho \tau$ ). Just now $\alpha \rho \tau$ means ( $9: 19,25$ ). Used again by Jesus (verse 33) and Peter (verse 37).

But thou shalt understand hereafter ( $\gamma \nu \omega \sigma \eta \delta \varepsilon \mu \varepsilon \tau \alpha \tau \alpha \nu \tau \alpha$ ). Future middle of $\gamma \iota \nu \omega \sigma \kappa \omega$ (instead of the verb oı $\delta \alpha$ ) to know by experience. "Thou shalt learn after these things," even if slowly.

John 13:8
Thou shalt never wash my feet (ov $\mu \eta \nu \iota \psi \eta \iota \varsigma \mu о v$ tovৎ $\pi 0 \delta \alpha \varsigma ~ \varepsilon ı \varsigma ~ \tau o v ~ a ı \omega v \alpha) . ~ S t r o n g ~$ double negative ov $\mu \eta$ with first aorist active subjunctive of $v \iota \pi \tau \omega$ with $\varepsilon \iota \varsigma ~ \tau o v ~ a l \omega v \alpha$ (for ever) added and $\mu \mathrm{ov}$ (my) made emphatic by position. Peter's sudden humility should settle the issue, he felt.

If I wash thee not ( $\varepsilon \alpha v \mu \eta \nu \tau \psi \omega \sigma \varepsilon$ ). Third-class condition with $\varepsilon \alpha v \mu \eta$ (negative). Jesus picks up the challenge of Peter whose act amounted to irreverence and want of confidence. "The first condition of discipleship is self-surrender" (Westcott). So "Jesus, waiting with the basin" (Dods), concludes.

Thou hast no part with me (ovк $\varepsilon \chi \varepsilon ı \varsigma \mu \varepsilon \rho \circ \varsigma \mu \varepsilon \tau^{\prime} \varepsilon \mu \circ v$ ). Not simply here at the supper with its fellowship, but in the deeper sense of mystic fellowship as Peter was quick to see. Jesus does not make foot-washing essential to spiritual fellowship, but simply tests Peter's real pride and mock-humility by this symbol of fellowship.

John 13:9
Not my feet only, but also my hands and my head ( $\mu \eta$ tovৎ $\pi о \delta \alpha \varsigma \mu \circ v \mu$ оvov $\alpha \lambda \lambda \alpha$ $\kappa \alpha$ таৎ $\chi \varepsilon \iota \rho a \varsigma ~ \kappa \alpha \tau \eta v ~ к \varepsilon \varphi \alpha \lambda \eta \eta \nu)$. Nouns in the accusative case object of $v \iota \psi o v$ understood. Peter's characteristic impulsiveness that does not really understand the Master's act. "A moment ago he told his Master He was doing too much: now he tells Him He is doing too little" (Dods).

John 13:10
He that is bathed (o $\lambda \varepsilon \lambda o u \mu \varepsilon v o \varsigma)$. Perfect passive articular participle of $\lambda o v \omega$, to bathe the whole body (Ac 9:37).

Save to wash his feet ( $\varepsilon \mu \eta$ tovৎ $\pi 0 \delta \alpha \varsigma v ı \psi a \sigma \theta \alpha$ ). Aleph and some old Latin MSS. have only $v \iota \psi \sigma \theta a$, but the other words are genuine and are really involved by the use of $v \iota \psi a \sigma \theta a$
(first aorist middle infinitive of $v \imath \pi \tau \omega$, to wash parts of the body) instead of $\lambda o v \sigma \alpha \sigma \theta \alpha$, to bathe the whole body (just used before). The guest was supposed to bathe ( $\lambda o v \omega$ ) before coming to a feast and so only the feet had to be washed ( $v i \pi \tau \omega$ ) on removing the sandals.

Clean ( $\kappa \alpha \theta \rho о \varsigma)$. Because of the bath. For $\kappa \alpha \theta \alpha \rho о \varsigma$ meaning external cleanliness see Mt 23:26; 27:59; but in Joh 15:3 it is used for spiritual purity as here in "ye are clean" ( $\kappa \alpha \theta \rho \circ$ ).

Every whit (o入oc). All of the body because of the bath. For this same predicate use of o入os see 9:34.

But not all ( $\alpha \lambda \lambda^{\prime}$ ov $\left.\pi \alpha \nu \tau \varepsilon \varsigma\right)$. Strongly put exception ( $o v \chi$ ). Plain hint of the treachery of Judas who is reclining at the table after having made the bargain with the Sanhedrin (Mr 14:11). A year ago Jesus knew that Judas was a devil and said to the apostles: "One of you is a devil" $(6: 64,70)$. But it did not hurt them then nor did they suspect each other then or now. It is far-fetched to make Jesus here refer to the cleansing power of his blood or to baptism as some do.

John 13:11
For he knew him that should betray him ( $\eta \iota \delta \varepsilon \gamma \alpha \rho \tau 0 v \pi \alpha \rho \alpha \delta \iota \delta o v \tau \alpha \alpha \nu \tau o v$ ). Past perfect $\eta \iota \delta \varepsilon$ used as imperfect. Jesus had known for a year at least $(6: 64,70)$ and yet he treated Judas with his usual courtesy. The articular present participle of $\pi \alpha \rho \alpha \delta i \delta \omega \mu$, "the betraying one," for Judas was already engaged in the process. Did Judas wince at this thrust from Jesus?

John 13:12
Sat down again ( $\alpha v \varepsilon \pi \varepsilon \sigma \varepsilon v \pi \alpha \lambda \iota v$ ). Second aorist active indicative of $\alpha v a \pi \iota \pi \tau \omega$, old compound verb to fall back, to lie down, to recline. Пa $\lambda \iota \nu$ (again) can be taken either with $\alpha v \varepsilon \pi \varepsilon \sigma \varepsilon \nu$, as here, or with $\varepsilon \iota \pi \varepsilon \nu$ (he said again).

Know ye what I have done to you? ( $\gamma \iota \nu \omega \sigma \kappa \varepsilon \tau \varepsilon \tau \pi \varepsilon \pi о \imath\rceil \kappa \alpha \nu \mu \nu$;). "Do ye understand the meaning of my act?" Perfect active indicative of $\pi o t \varepsilon \omega$ with dative case $(v \mu v)$. It was a searching question, particularly to Simon Peter and Judas.

John 13:13
Ye (v $\mu \varepsilon \iota \varsigma)$. Emphatic.
Call me ( $\varphi \omega v \varepsilon \iota \tau \varepsilon \varepsilon$ ). "Address me." Ф $\omega v \varepsilon \omega$ regular for addressing one with his title ( 1:48).

Master (Ho $\delta \iota \delta \alpha \sigma \kappa \alpha \lambda o \varsigma)$. Nominative form (not in apposition with $\mu \varepsilon$ accusative after $\varphi \omega \vee \varepsilon เ \tau \varepsilon)$, but really vocative in address with the article (called titular nominative sometimes) like Ho Kvpıоя ка о $\theta \varepsilon о \varsigma ~ \mu о v ~ i n ~ 20: 28 . ~ " T e a c h e r . " ~ S e e ~ 11: 28 ~ f o r ~ M a r t h a ' s ~ t i t l e ~ f o r ~ J e s u s ~ t o ~$ Mary.

Lord (Ho Kvpıos). Another and separate title. In 1:38 we have $\Delta \mathrm{t} \delta \alpha \sigma \kappa \alpha \lambda \varepsilon$ (vocative form) for the Jewish $\operatorname{Pa} \beta \beta \varepsilon$ and in 9:36,38 Kvpı $\varepsilon$ for the Jewish Mari. It is significant that Jesus approves ( $\kappa \alpha \lambda \omega \varsigma$, well) the application of both titles to himself as he accepts from Thomas the terms кирıя and $\theta \varepsilon \circ \varsigma$.

For I am ( $\varepsilon \mu \gamma \alpha \rho$ ). Jesus distinctly claims here to be both Teacher and Lord in the full sense, at the very moment when he has rendered this menial, but symbolic, service to them. Here is a hint for those who talk lightly about "the peril of worshipping Jesus!"

John 13:14
If I then ( $\varepsilon$ ouv $\varepsilon \gamma \omega$ ). Argumentative sense of ouv (therefore). Condition of first class, assumed to be true, with first aorist active indicative of $v ı \pi \tau \omega$, "If I, being what I am, washed your feet" (as I did).

Ye also ought (ка vцદıৎ офءı入єtє). The obligation rests on you a fortiori. Present active indicative of the old verb o $\varphi \varepsilon \searrow \lambda \omega$, to owe a debt ( $\mathrm{Mt} \mathrm{18:30}$ ). The mutual obligation is to do this or any other needed service. The widows who washed the saints' feet in 1Ti 5:10 did it "as an incident-of their hospitable ministrations" (Bernard). Up to 1731 the Lord High Almoner in England washed the feet of poor saints (pedilavium) on Thursday before Easter, a custom that arose in the fourth century, and one still practised by the Pope of Rome.

John 13:15
An example (v $\tau о \delta \varepsilon ı \gamma \mu \alpha$ ). For the old $\pi \alpha \rho \alpha \delta \varepsilon ı \gamma \mu \alpha$ (not in N.T.), from $v \pi о \delta \varepsilon ו \kappa v \nu \mu$, to show under the eyes as an illustration or warning (Mt 3:7), common in the papyri for illustration, example, warning, here only in John, but in Jas 5:10; 2Pe 2:6; Heb 4:11; 8:5; 9:26 . Peter uses тטло ( $1 \mathrm{Pe} 5: 3$ ) with this incident in mind. In Jude 1:7 $\delta \varepsilon \iota \gamma \mu \alpha$ (without v $\boldsymbol{\pi}$ ) occurs in the sense of example.

That ye also should do (ıva ка $v \mu \varepsilon \iota \varsigma ~ \pi о ı \eta \tau \varepsilon$ ). Purpose clause with $v^{\prime} \alpha$ and the present active subjunctive of $\pi$ tot $\omega$ (keep on doing). Doing what? Does Jesus here institute a new church ordinance as some good people today hold? If so, it is curious that there is no record of it in the N.T. Jesus has given the disciples an object lesson in humility to rebuke their jealousy, pride, and strife exhibited at this very meal. The lesson of the "example" applies to all the relations of believers with each other. It is one that is continually needed.

John 13:16
Is not greater (ovk $\varepsilon \sigma \tau \iota v \mu \varepsilon \varsigma \zeta \omega v$ ). Comparative adjective of $\mu \varepsilon \gamma \alpha \varsigma$ (greater) followed by the ablative case кирıov (contrast between slave, lord) and $\tau \boldsymbol{\tau} \pi \varepsilon \mu \psi \alpha \nu \tau о \varsigma ~(a r t i c u l a r ~$ participle of $\pi \varepsilon \mu \pi \omega$, to send, with contrast with apostle, "one sent" ( $\alpha \pi о \sigma \tau о \lambda о \varsigma)$ from $\alpha \pi o \sigma \tau \varepsilon \lambda \lambda \omega)$. Jesus here enforces the dignity of service. In Lu 22:27 Jesus argues this point a bit. In Lu 6:40 the contrast is between the pupil and the teacher, though some pupils consider themselves superior to the teacher. In Mt 10:24 Jesus uses both forms of the saying (pupil and slave). He clearly repeated this $\lambda o \gamma$ ov often.

John 13:17
If ye know ( $\varepsilon$ ot $\delta a \tau \varepsilon$ ). Condition of first class assumed as true, $\varepsilon$ and present (ot $\delta \alpha \tau \varepsilon$ used as present) active indicative.

If ye do ( $\varepsilon a v \pi \circ \nmid \eta \tau \varepsilon$ ). Third-class condition, $\varepsilon \alpha v$ and present active subjunctive, assumed as possible, "if ye keep on doing." Both conditions with the one conclusion coming in between, "happy are ye." Just knowing does not bring happiness nor just occasional doing.

John 13:18
Not of you all (ov $\pi \varepsilon \rho \pi \alpha v \tau \omega v$ ). As in verse 11, he here refers to Judas whose treachery is no surprise to Jesus (6:64,70).

Whom I have chosen ( $\tau \iota v a \varsigma \varepsilon \xi \varepsilon \lambda \varepsilon \xi \alpha \mu \eta \nu)$ ). Indirect question, unless $\tau \iota v a c$ is here used as a relative like ovc. The first aorist middle indicative of $\varepsilon \kappa \lambda \varepsilon \gamma \omega$ is the same form used in 6:70. Jesus refers to the choice ( $\operatorname{Lu} 6: 13 \varepsilon \kappa \lambda \varepsilon \xi \alpha \mu \varepsilon v o \varsigma$, this very word again) of the twelve from among the large group of disciples. $\Theta a \tau \theta \varepsilon \sigma \chi \rho \iota \pi \tau v \rho \varepsilon \mu \gamma \tau \beta \varepsilon \varphi \cup \lambda \varphi ı \lambda \lambda \varepsilon \delta\left(\alpha \lambda \lambda^{\prime}{ }^{\prime} \nu \alpha \eta\right.$ $\gamma \rho \alpha \varphi \eta \pi \lambda \eta \rho \omega \theta \eta)$. See the same clause in 17:12. Purpose clause with $\operatorname{v} \alpha$ and first aorist passive subjunctive of $\pi \lambda \eta \rho o \omega$. This treachery of Judas was according to the eternal counsels of God (12:4), but none the less Judas is responsible for his guilt. For a like elliptical clause see 9:3; 15:25. The quotation is from the Hebrew of Ps 41:9.

He that eateth (o $\tau \rho \omega \gamma \omega v$ ). Present active participle of old verb to gnaw, to chew, to eat, in N.T. only in John (6:54,56,57,58; 13:18) and Mt 26:38 . LXX has here o $\varepsilon \sigma \theta \omega \omega v$.

Lifted up his heel against me ( $\varepsilon \pi \eta \rho \varepsilon v \varepsilon \pi^{\prime} \varepsilon \mu \varepsilon \tau \eta \nu \pi \tau \varepsilon \rho v a v$ autov). First aorist active indicative of $\varepsilon \pi \alpha \iota \rho \omega$. Пє $\rho v \alpha$, old word for heel, only here in N.T. The metaphor is that of kicking with the heel or tripping with the heel like a wrestler. It was a gross breach of hospitality to eat bread with any one and then turn against him so. The Arabs hold to it yet.

John 13:19
From henceforth ( $\alpha \pi^{\prime} \alpha \rho \tau$ ). "From now on," as in 14:7; Mt 23:39; Re 14:13.
Before it come to pass ( $\pi \rho \circ$ tov $\gamma \varepsilon v \varepsilon \sigma \theta \alpha$ ). Про with ablative of the articular second aorist middle infinitive $\gamma$ ıvou (before the coming to pass).

When it is come to pass (o $\tau \alpha v \gamma \varepsilon v \eta \tau \alpha$ ). Indefinite relative clause with o $\tau \alpha v$ and the second aorist middle subjunctive of $\gamma \iota v o \mu \alpha$, "whenever it does come to pass."

That ye may believe ( $\iota v \alpha \pi / \sigma \tau \varepsilon \nu \eta \tau \varepsilon$ ). Purpose clause with $ו v \alpha$ and present active subjunctive of $\pi \iota \sigma \tau \varepsilon \cup \omega$, "that ye may keep on believing." Cf. Isa 48:5 .

That I am he (o $\varepsilon \gamma \omega \varepsilon \mu)$. As Jesus has repeatedly claimed to be the Messiah (8:24,58 , etc.). Cf. also 14:29 ( $\pi \iota \sigma \tau \varepsilon \cup \sigma \eta \tau \varepsilon$ here); 16:4.

John 13:20
Whomsoever I send ( $\alpha \nu \tau \imath v \alpha \pi \varepsilon \mu \psi \omega$ ). More precisely, "If I send any one" (third-class condition, $\alpha v=\varepsilon \alpha v$ and $\tau \iota v \alpha$, indefinite pronoun accusative case, object of $\pi \varepsilon \mu \psi \omega$, first aorist active subjunctive of $\pi \varepsilon \mu \pi \omega$, to send). This use of $\varepsilon \tau \iota \varsigma$ or $\varepsilon \alpha v \tau \iota \varsigma$ (if any one) is very much like the indefinite relative ootıc and oc $\alpha v$ (or $\varepsilon \alpha v$ ), but the idiom is different. In Mr 8:34f. we have both $\varepsilon \tau \iota \varsigma \theta \varepsilon \lambda \varepsilon$ and oc $\varepsilon \alpha \nu$ while in Joh 14:13f. we find o $\alpha \alpha v$ and $\varepsilon \alpha \nu \tau$ (Robertson, Grammar, p. 956).

John 13:21

He was troubled in the spirit ( $\varepsilon \tau \alpha \rho \alpha \chi \theta \eta$ to $\pi v \varepsilon v \mu \alpha \tau$ ). First aorist passive indicative of $\tau \alpha \rho \alpha \sigma \sigma \omega$ and the locative case of $\pi \nu \varepsilon v \mu \alpha$. See already 11:33; 12:27 for this use of $\tau \alpha \rho \alpha \sigma \sigma \omega$ for the agitation of Christ's spirit. In 14:1,27 it is used of the disciples. Jesus was one with $\operatorname{God}(5: 19)$ and yet he had our real humanity ( $1: 14$ ).

Testified ( $\varepsilon \mu \alpha \rho \tau \nu \rho \eta \sigma \varepsilon v$ ). First aorist active indicative of $\mu \alpha \rho \tau v \rho \varepsilon \omega$, definite witness as in 4:44; 18:37.

One of you shall betray me ( $\varepsilon \varsigma \varsigma \xi \nu \mu \omega \nu \pi \alpha \rho \alpha \delta \omega \sigma \varepsilon \mu \varepsilon$ ). Future active of $\pi \alpha \rho \alpha \delta \iota \delta \omega \mu$, to betray, the word so often used of Judas. This very language occurs in Mr 14:18; Mt 26:21 and the idea in Lu 22:21. Jesus had said a year ago that "one of you is a devil" (Joh 6:70), but it made no such stir then. Now it was a bolt from the blue sky as Jesus swept his eyes around and looked at the disciples.

John 13:22
Looked one on another ( $\varepsilon \beta \lambda \varepsilon \pi \sigma \nu \varepsilon ء \varsigma \alpha \lambda \lambda \eta \lambda$ ovc). Inchoative imperfect of $\beta \lambda \varepsilon \pi \omega$, "began to glance at one another in bewilderment (doubting, алорои $\mu \varepsilon v o$, present passive participle of $\alpha \pi \sigma \rho \varepsilon \omega$, to be at a loss, to lose one's way, $\alpha$ privative and $\pi о \rho o \varsigma$, way). They recalled their strife about precedence and Judas betrayed nothing.

Concerning whom he spake ( $\pi \varepsilon \rho \tau \tau v o \varsigma \lambda \varepsilon \gamma \varepsilon$ ). Indirect question retaining present active indicative $\lambda \varepsilon \gamma \varepsilon$. See same note in Mr 14:19; Mt 26:22; Lu 22:23 .

John 13:23
Was at the table reclining in Jesus' bosom ( $\eta \nu$ аvaкє $\mu \varepsilon v \circ \varsigma \varepsilon \nu \tau \omega \kappa о \lambda \pi \omega$ tov I $\eta \sigma o v$ ). No word for "table" in the text. Periphrastic imperfect of avak\& $\mu \alpha$, to lie back, to recline. Ko $\lambda \pi$ тos usual word for bosom ( $1: 18$ ).

Whom Jesus loved (ov $\eta \gamma \alpha \pi \alpha$ I $\eta \sigma o v \varsigma$ ). Imperfect active of $\alpha \gamma \alpha \pi \alpha \omega$, John's description of himself of which he was proud ( $19: 26 ; 20: 2 ; 21: 7,20$ ), identified in 21:24 as the author of the book and necessarily one of the twelve because of the "explicit" (Bernard) language of Mark (Mr 14:17; Lu 22:14). John son of Zebedee and brother of James. At the table John was on the right of Jesus lying obliquely so that his head lay on the bosom of Jesus. The centre, the place of honour, Jesus occupied. The next place in rank was to the left of Jesus, held by Peter (Westcott) or by Judas (Bernard) which one doubts.

John 13:24
Beckoneth (veve). Old verb to nod, in N.T. only here and Ac 24:10. They were all looking in surprise at each other.

Tell us who it is of whom he speaketh ( $\varepsilon เ \pi \varepsilon \tau \iota \varsigma \varepsilon \sigma \tau \iota v \pi \varepsilon \rho$ ov $\lambda \varepsilon \gamma \varepsilon$ ). Second aorist active imperative with indirect question ( $\tau \iota \varsigma$ ) and relative clause ( $\pi \varepsilon \rho$ ov). Peter was cautious, but could not contain his curiosity. John in front of Jesus was in a favourable position to have a whispered word with him.

Breast ( $\sigma \pi \eta \theta$ oc). As in 21:20; Lu 18:13 in place of ко入 $\pi$ ov (verse 23). This is the moment represented in Leonardo da Vinci's "Last Supper," only he shows the figures like the monks for whom he painted it.

John 13:25
He (عкะıvoc). "That one" (John).
Leaning back ( $\alpha v a \pi \varepsilon \sigma \omega v$ ). Second aorist active participle of $\alpha v \alpha \pi \iota \pi \tau \omega$, to fall back.
As he was (out $\omega \varsigma$ ). "Thus." It was easily done.
John 13:26
He ( $\varepsilon \kappa \varepsilon เ v o \varsigma)$. Emphatic pronoun again.
For whom I shall dip the sop ( $\omega \varepsilon \gamma \omega \beta \alpha \psi \omega$ to $\psi \omega \mu \circ v$ ). Dative case of the relative ( $\omega$ ) and future active of $\beta \alpha \pi \tau \omega$, to dip ( $\operatorname{Lu} 16: 24$ ). $\Psi \omega \mu \nu \sigma v$ is a diminutive of $\psi \omega \mu \circ \varsigma$, a morsel, a common Koine word (in the papyri often), in N.T. only in this passage. It was and is in the orient a token of intimacy to allow a guest to dip his bread in the common dish (cf. Ru 2:14 ). So Mr 14:20 . Even Judas had asked: "Is it I?" (Mr 14:19; Mt 26:22 ).

Giveth it to Judas ( $\delta t \delta \omega \sigma \iota v$ Iov $\delta \alpha$ ). Unobserved by the others in spite of Christ's express language, because "it was so usual a courtesy" (Bernard), "the last appeal to Judas' better feeling" (Dods). Judas now knew that Jesus knew his plot.

John 13:27
Then entered Satan into him ( $\tau о \tau \varepsilon \varepsilon เ \sigma \eta \lambda \theta \varepsilon v$ عıৎ モкยıvov o $\Sigma a \tau \alpha v \alpha \varsigma)$. The only time the word Satan occurs in the Gospel. As he had done before (13:2; Lu 22:3) until Christ considered him a devil ( $6: 70$ ). This is the natural outcome of one who plays with the devil.
 $\pi о เ \varepsilon \omega$. "Do more quickly what thou art doing." Tax\&וov is comparative of $\tau \alpha \chi \varepsilon \omega \varsigma$ (Joh 11:31 ) and in N.T. only here, 20:4; Heb 13:19,23. See the eagerness of Jesus for the passion in Lu 12:50.

John 13:28
No one knew (ov $\delta \varepsilon ı \varsigma ~ \varepsilon \gamma \nu \omega$ ). Second aorist active indicative of $\gamma \iota \nu \omega \sigma \kappa \omega$. The disciples had not yet perceived the treacherous heart of Judas.

John 13:29
Some thought ( $\tau \imath v \varepsilon \varsigma \varepsilon \delta$ oкouv). Imperfect active of $\delta$ oк $\varepsilon \omega$. Mere inference in their ignorance.

The bag ( $\tau$ о $\gamma \lambda \omega \sigma \sigma о к о \mu о v$ ). See on 12:6 for this word.
What things we have need of ( $\omega \vee \chi \rho \varepsilon \iota \alpha \vee \varepsilon \chi \circ \mu \varepsilon v$ ). Antecedent ( $\tau \alpha v \tau \alpha$ ) of the relative (ov) not expressed.

For the feast ( $\varepsilon ા \varsigma \tau \eta \nu \varepsilon о \rho \tau \eta \nu)$. The feast of unleavened bread beginning after the passover meal and lasting eight days. If this was twenty-four hours ahead of the passover meal, there was no hurry for next day would be in ample time.

Or that he should give something to the poor ( $\eta$ тоぃ $\pi \tau \omega \chi \circ \iota \varsigma \downarrow \alpha \tau \delta \omega$ ). Another alternative in their speculation on the point. Note prolepsis of toı $\pi \tau \omega \chi$ оц (dative case) before $\iota \nu \alpha \omega$ (final clause with $\imath v \alpha$ and second aorist active subjunctive of $\delta \iota \delta \omega \mu$ ).

John 13:30
Having received the sop ( $\lambda \alpha \beta \omega v$ to $\psi \omega \mu \circ v$ ). Second aorist active participle of $\lambda \alpha \mu \beta \alpha v \omega$. Judas knew what Jesus meant, however ignorant the disciples. So he acted "straightway" ( $\varepsilon \cup \theta \cup \varsigma)$.

And it was night ( $\eta v \delta \varepsilon v v \xi$ ). Darkness falls suddenly in the orient. Out into the terror and the mystery of this dreadful night (symbol of his devilish work) Judas went.

John 13:31
Now ( $\mathrm{v} v \mathrm{v}$ ). Now at last, the crisis has come with a sense of deliverance from the presence of Judas and of surrender to the Father's will (Westcott).

Is glorified $(\varepsilon \delta o \xi \alpha \sigma \theta \eta)$. First aorist passive of $\delta o \xi \alpha \zeta \omega$, consummation of glory in death both for the Son and the Father. For this verb in this sense see already 7:39; 12:16 and later 17:3. Four times here in verses 31f.

John 13:32
In himself $(\varepsilon v a v \tau \omega)$. Reflexive pronoun. God is the source of the glory ( $17: 5$ ) and is the glory succeeding the Cross (the glory with the Father in heaven).

And straightway ( $\kappa \alpha \varepsilon \cup \theta \cup \varsigma)$. No postponement now. First and quickly the Cross, then the Ascension.

John 13:33
Little children ( $\tau \varepsilon \kappa v / \alpha$ ). Diminutive of $\tau \varepsilon \kappa v \alpha$ and affectionate address as Jesus turns to the effect of his going on these disciples. Only here in this Gospel, but common in I John (1Jo 2:1 , etc.), and nowhere else in N.T.

Yet a little while ( $\varepsilon \tau \mu \kappa \rho \circ v$ ). Accusative of extent of time. See also 7:33; 8:21 (to which Jesus here refers); 16:16-19.

So now I say unto you ( $\kappa \alpha \nu \mu \nu \nu \varepsilon \gamma \omega \alpha \rho \tau$ ). This juncture point ( $\alpha \rho \tau$ ) of time relatively to the past and the future $(9: 25 ; 16: 12,31)$.

John 13:34
New ( $\kappa \alpha ı v \eta v$ ). First, in contrast with the old ( $\alpha \rho \chi \alpha \circ \rho \varsigma, \pi \alpha \lambda \alpha \circ \rho$ ), the very adjective used in 1Jo 2:7) of the "commandment" ( $\varepsilon \nu \tau \circ \lambda \eta \nu$ ) at once called old ( $\pi \alpha \lambda \alpha u \alpha)$. They had had it a long time, but the practice of it was new. Jesus does not hesitate, like the Father, to give commandments (15:10,12).

That ye love one another (iva $\alpha \gamma \alpha \pi \alpha \tau \varepsilon \alpha \lambda \lambda \eta \lambda o v \varsigma)$. Non-final use of tva with present active subjunctive of $\alpha \gamma \alpha \pi \alpha \omega$, the object clause being in the accusative case in apposition with $\varepsilon v \tau o \lambda \eta \nu$. Note the present tense (linear action), "keep on loving."

Even as ( $\kappa \alpha \theta \omega \varsigma)$. The measure of our love for another is set by Christ's love for us.
John 13:35

By this ( $\varepsilon v \tau 0 \cup \tau \omega$ ). Locative case with $\varepsilon v$, "In this way," viz., "if ye have love" ( $\varepsilon a v a \gamma a \pi \eta v$ $\varepsilon \chi \eta \tau \varepsilon$ ), condition of third class (in apposition with $\varepsilon \nu \tau \tau v \tau \omega$ ) with $\varepsilon \alpha \nu$ and present active subjunctive of $\varepsilon \chi \omega$ ("keep on having love"). See 17:23 where Jesus prays for mutual love among the disciples "that the world may know" that the Father sent him. Jerome (ad Galat. vi. 10) says that in his extreme old age John repeated often this command of Jesus and justified it: "Because it is the Lord's commandment; and if it be fulfilled it is enough." See also 14:31. Tertullian (Apol. 39) urges it also as proof of being disciples. Hatred of one another per contra, is an argument that we are vot disciples (learners) of Jesus.

John 13:36
Whither goest thou? ( $\pi$ ои v v $\alpha \gamma \varepsilon เ \sigma ;)$. Peter is puzzled just as the Pharisees were twice (7:35; 8:21f.).

John 13:37
"Why can I not follow thee even now?" ( $\delta \iota \alpha \tau$ ov $\delta v v \alpha \mu \alpha$ бо $\alpha к о \lambda o u \theta \varepsilon ı v ~ \alpha \rho \tau i ;)$. The use of $\alpha \rho \tau$ (right now, this minute) instead of $v v v$ (at this time, verse 36) illustrates the impatience of Peter.

I will lay down my life for thee ( $\tau \varepsilon \nu \psi v \chi \eta \nu \mu \circ v v \pi \varepsilon \rho \sigma o v \theta \eta \sigma \omega$ ). Future active indicative of $\tau i \theta \eta \mu$. Peter, like the rest, had not yet grasped the idea of the death of Christ, but, like Thomas ( 11:16), he is not afraid of danger. He had heard Christ's words about the good shepherd ( 10:11) and knew that such loyalty was the mark of a good disciple.

John 13:38
Wilt thou lay down? ( $\theta \eta \sigma \varepsilon \iota \sigma ;$ ). Jesus picks up Peter's very words and challenges his boasted loyalty. See such repetition in 16:16f.,31; 21:17.

Shall not crow ( $\varphi \omega v \eta \sigma \eta$ ). Aorist active subjunctive of $\varphi \omega v \varepsilon \omega$, to use the voice, used of animals and men. Note strong double negative ov $\mu \eta$. Mark adds $\delta \iota \varsigma$ (twice). John's report is almost identical with that in Lu 22:34 . The other disciples joined in Peter's boast (Mr 14:31; Mt 26:35 ).

Till thou hast denied ( $\varepsilon \omega \varsigma$ ov $\alpha \rho \vee \eta \sigma \eta$ ). Future middle indicative or aorist middle subjunctive second person singular (form identical) with compound conjunction $\varepsilon \omega \varsigma$ ov (until which time), "till thou deny or deniest" (futurum exactum needless). Peter is silenced for the present. They all "sat astounded and perplexed" (Dods).

## John 14

John 14:1
Let not your heart be troubled ( $\mu \eta \tau \alpha \rho \alpha \sigma \sigma \varepsilon \sigma \theta \omega v \mu \omega \nu \eta \kappa \alpha \rho \delta i \alpha)$. Not here the physical organ of life ( $\operatorname{Lu} 21: 34$ ), but the seat of spiritual life ( $\pi \nu \varepsilon v \mu \alpha, \psi v \chi \eta$ ), the centre of feeling and faith (Ro 10:10), "the focus of the religious life" (Vincent) as in Mt 22:37 . See these words repeated in 14:27. Jesus knew what it was to have a "troubled" heart (11:33; 13:31) where $\tau \alpha \rho \alpha \sigma \sigma \omega$ is used of him. Plainly the hearts of the disciples were tossed like waves in the wind by the words of Jesus in 13:38.

Ye believe ... believe also ( $\pi เ \sigma \tau \varepsilon \cup \varepsilon \tau \varepsilon . . . ~ \kappa \alpha ~ \pi \iota \sigma \tau \varepsilon \cup \varepsilon \tau \varepsilon)$. So translated as present active indicative plural second person and present active imperative of $\pi \iota \sigma \tau \varepsilon v \omega$. The form is the same. Both may be indicative (ye believe ... and ye believe), both may be imperative (believe ... and believe or believe also), the first may be indicative (ye believe) and the second imperative (believe also), the first may be imperative (keep on believing) and the second indicative (and ye do believe, this less likely). Probably both are imperatives (Mr 11:22), "keep on believing in God and in me."

John 14:2
Mansions ( $\mu \circ v \alpha$ ). Old word from $\mu \varepsilon v \omega$, to abide, abiding places, in N.T. only here and verse 23. There are many resting-places in the Father's house (окка). Christ's picture of heaven here is the most precious one that we possess. It is our heavenly home with the Father and with Jesus.

If it were not so $(\varepsilon \delta \varepsilon \mu \eta)$. Ellipsis of the verb (Mr 2:21; Re 2:5,16; Joh 14:11). Here a suppressed condition of the second class (determined as unfulfilled) as the conclusion shows.

I would have told you ( $\varepsilon \iota \pi \circ \vee \alpha v \nu \mu \nu)$ ). Regular construction for this apodosis ( $\alpha v$ and aorist--second active--indicative).

For I go (от порвvoцa). Reason for the consolation given, futuristic present middle indicative, and explanation of his words in 13:33 that puzzled Peter so (13:36f. ).

To prepare a place for you ( $\varepsilon \tau о \mu \alpha \sigma \alpha ~ \tau о \pi о v ~ v \mu \nu v$ ). First aorist active infinitive of purpose of $\varepsilon \tau о \mu \alpha \zeta \omega$, to make ready, old verb from $\varepsilon \tau о \mu \circ \varsigma$. Here only in John, but in Mr 10:40 (Mt 20:23). It was customary to send one forward for such a purpose ( Nu 10:33 ). So Jesus had sent Peter and John to make ready (this very verb) for the passover meal (Mr 14:12; Mt 26:17 ). Jesus is thus our Forerunner ( $\pi \rho \circ \delta \rho о \mu \circ \varsigma$ ) in heaven (Heb 6:20).

John 14:3
If I go ( $\varepsilon \alpha \vee \pi \quad \pi \quad \rho \varepsilon v \theta \omega$ ). Third-class condition ( $\varepsilon \alpha v$ and first aorist passive subjunctive of лорвvo $\mu$ ).

And prepare ( $\kappa \alpha \varepsilon \tau о \mu \alpha \sigma \omega)$. Same condition and first aorist active subjunctive of the

I come again ( $\pi \alpha \lambda ı \vee \varepsilon \rho \chi \circ \mu \alpha)$. Futuristic present middle, definite promise of the second coming of Christ.

And will receive you unto myself ( $\kappa \alpha \pi \alpha \rho \alpha \lambda \eta \mu \psi о \mu \alpha \nu \mu \alpha \varsigma \pi \rho о \varsigma \varepsilon \mu \alpha \nu \tau о v)$. Future middle of $\pi \alpha \rho \alpha \lambda \alpha \mu \beta \alpha v \omega$. Literally, "And I shall take you along ( $\pi \alpha \rho \alpha-$ ) to my own home" (cf. 13:36). This blessed promise is fulfilled in death for all believers who die before the Second Coming. Jesus comes for us then also.

That where I am there ye may be also ( $\downarrow \alpha$ о $о о v \varepsilon \varepsilon \mu \varepsilon \gamma \omega \kappa \alpha v \mu \varepsilon \iota \varsigma \eta \tau \varepsilon$ ). Purpose clause with $t v a$ and present active subjunctive of $\varepsilon \mu$. This the purpose of the departure and the return of Christ. And this is heaven for the believer to be where Jesus is and with him forever.

John 14:4
Ye know the way (ot $\delta a \tau \varepsilon \tau \eta v$ o $\delta o v$ ). Definite allusion to the puzzle of Peter in 13:36f . The path to the Father's house is now plain.

John 14:5
Whither ( $\pi 0 v$ )-- how ( $\pi \omega \varsigma$ ). It is Thomas, not Peter (13:36f. ) who renews the doubt about the destination of Jesus including the path or way thither ( $\tau \eta \nu$ o $\delta o v$ ). Thomas is the spokesman for the materialistic conception then and now.

John 14:6
I am the way, and the truth, and the life ( $\mathrm{E} \gamma \omega \varepsilon \mu \eta$ о оос $\kappa \alpha \eta ~ \alpha \lambda \eta \theta \varepsilon ı \alpha \kappa \eta \zeta \omega \eta$ ). Either of these statements is profound enough to stagger any one, but here all three together overwhelm Thomas. Jesus had called himself "the life" to Martha ( 11:25) and "the door" to the Pharisees ( $10: 7$ ) and "the light of the world" ( 8:12). He spoke "the way of God in truth" (Mr 12:14). He is the way to God and the only way (verse 6), the personification of truth, the centre of life.

Except by me ( $\left.\varepsilon \mu \eta \delta \iota^{\prime} \varepsilon \mu o v\right)$. There is no use for the Christian to wince at these words of Jesus. If he is really the Incarnate Son of God ( $1: 1,14,18$, they are necessarily true.

John 14:7
If ye had known me ( $\varepsilon \varepsilon \gamma \nu \omega \kappa \varepsilon เ \tau \varepsilon \mu \varepsilon$ ). Past perfect indicative of $\gamma \iota \nu \omega \sigma \kappa \omega$, to know by personal experience, in condition of second class as is made plain by the conclusion ( $\alpha v$ $\eta \iota \delta \varepsilon \tau \varepsilon)$ where ot $\delta a$, not $\gamma เ \nu \omega \sigma \kappa \omega$ is used. Thomas and the rest had not really come to know Jesus, much as they loved him.

From henceforth ye know him ( $\alpha \pi^{\prime} \alpha \rho \tau \gamma \iota v \omega \sigma \kappa \varepsilon \tau \varepsilon \alpha u \tau o v$ ). Probably inchoative present active indicative, "ye are beginning to know the Father from now on."

And have seen him ( $\kappa \alpha \varepsilon \omega \rho \alpha \kappa \alpha \tau \varepsilon$ ). Perfect active indicative of opac. Because they had seen Jesus who is the Son of God, the Image of God, and like God ( $1: 18$ ). Hence God is like Jesus Christ. It is a bold and daring claim to deity. The only intelligible conception of God is precisely what Jesus here says. God is like Christ.

John 14:8

Show us ( $\delta \varepsilon \varepsilon \xi \mathcal{\xi} \boldsymbol{v} \eta \mu v)$ ). Philip now speaks up, possibly hoping for a theophany (Ex 33:18f. ), certainly not grasping the idea of Jesus just expressed.

John 14:9
So long time ( $\tau 0 \sigma 0 v \tau 0 v \chi \rho o v o v$ ). Accusative of extent of time.
And dost thou not know me? ( $\kappa \alpha$ оик $\varepsilon \gamma \nu \omega \kappa \alpha \varsigma \mu \varepsilon$;). Perfect active indicative of $\gamma \iota \nu \omega \sigma \kappa \omega$. Jesus patiently repeats his language to Philip with the crisp statement: "he that hath seen me hath seen the Father" (о $\varepsilon \omega \rho \alpha \kappa \omega \varsigma \varepsilon \mu \varepsilon \varepsilon \omega \rho \alpha \kappa \varepsilon v$ tov $\pi \alpha \tau \varepsilon \rho \alpha$ ). Perfect active participle and perfect active indicative of opa $\omega$, state of completion.

Thou ( $\sigma v$ ). Emphatic--After these years together.
John 14:10
Believest thou not? (ov $\pi / \sigma \tau \varepsilon \cup \varepsilon ו \sigma ;$ ). Jesus had a right to expect greater faith from these men than from the blind man ( $9: 35$ ) or Martha ( 11:27). His words in 14:1 are clearly needed. This oneness with the Father Jesus had already stated ( $10: 38$ ) as shown by his "words" ( $\rho \eta \mu \alpha \tau \alpha)$ and his "works" ( $\varepsilon \rho \gamma \alpha)$. Cf. 3:34; 5:19; 6:62 .

John 14:11
Believe me ( $\pi \iota \sigma \tau \varepsilon v \varepsilon \tau \varepsilon \mu 0$ ). Repeated appeal (present active imperative of $\pi \iota \sigma \tau \varepsilon \cup \omega$ ) as in 14:1 to his disciples and as he had done with the hostile Jews to be influenced by his "works" at any rate ( 10:38).

John 14:12

Greater works than these ( $\mu \varepsilon \iota \zeta$ ova $\tau 0 v \tau \omega v$ ). Comparative adjective neuter plural from $\mu \varepsilon \gamma \alpha \varsigma$ with ablative case $\tau 0 v \tau \omega \nu$. Not necessarily greater miracles and not greater spiritual works in quality, but greater in quantity. Cf. Peter at Pentecost and Paul's mission tours. "Because I go" (o $\varepsilon \gamma \omega \pi$ тo $\rho \varepsilon v o \rho v a$ ). Reason for this expansion made possible by the Holy Spirit as Paraclete ( 16:7).

John 14:13
Whatsoever ye shall ask (o $\alpha \alpha \nu \alpha \tau \eta \sigma \eta \tau \varepsilon$ ). Indefinite relative clause with o (neuter accusative singular of ootıc), $\alpha v$ and the aorist active subjunctive of $\alpha \iota \tau \varepsilon \omega$. This is an advance thought over verse 12 .

In my name ( $\varepsilon v \tau \omega$ ovouat $\mu \circ v$ ). First mention of his "name" as the open sesame to the Father's will. See also 14:26; 15:16; 16:23,24,26 .

That will I do ( $\tau о \boldsymbol{\tau} \boldsymbol{\pi} \boldsymbol{\pi о} \eta \sigma \omega$ ). The Father answers prayers ( $15: 16 ; 16: 23$ ), but so does the Son (here and verse 14). The purpose (iva clause with first aorist passive subjunctive of $\left.\delta_{0} \xi \alpha \zeta \omega\right)$ is "that the Father may be glorified in the Son." Plead Christ's name in prayer to the Father.

## John 14:14

If ye shall ask me anything in my name ( $\varepsilon \alpha \nu \tau \alpha \| \eta \sigma \eta \tau \varepsilon \mu \varepsilon \varepsilon v \tau \omega$ ovo $\mu \alpha \tau \mu \circ v$ ). Condition of third class with $\varepsilon \alpha v$ and first aorist active subjunctive of aıt $\varepsilon \omega$. The use of $\mu \varepsilon$ (me)
here is supported by Aleph B 33 Vulgate Syriac Peshitta. Just this phrase does not occur elsewhere in John and seems awkward, but see 16:23. If it is genuine, as seems likely, here is direct prayer to Jesus taught as we see it practiced by Stephen in Ac 7:59; and in Re 22:20

John 14:15
If ye love me ( $\varepsilon \alpha \vee \alpha \gamma \alpha \pi \alpha \tau \varepsilon \mu \varepsilon$ ). Third-class condition "if ye keep on loving (present active subjunctive, same contract form as indicative) me." Cf. verse 23.

Ye will keep ( $\tau \eta \rho \eta \sigma \varepsilon \tau \varepsilon$ ). Future active of $\tau \eta \rho \varepsilon \omega$, not aorist imperative $\tau \eta \rho \eta \sigma \alpha \tau \varepsilon$ (keep) as some MSS. have. For this phrase see also 8:51; 14:23,24; 14:20; 1Jo 2:5 . Continued love prevents disobedience.

John 14:16
And I will pray the Father ( $\kappa \alpha \gamma \omega \varepsilon \rho \omega \tau \eta \sigma \omega$ tov $\pi \alpha \tau \varepsilon \rho \alpha$ ). E $\rho \omega \tau \alpha \omega$ for prayer, not question (the old use), also in 16:23 (prayer to Jesus in same sense as alt $\tau \omega$ ), 26 (by Jesus as here); 17:9 (by Jesus), "make request of."
 besides Jesus who becomes our Paraclete, Helper, Advocate, with the Father (1Jo 2:1, Cf. Ro 8:26f. ). This old word (Demosthenes), from $\pi \alpha \rho \alpha \kappa \alpha \lambda \varepsilon \omega$, was used for legal assistant, pleader, advocate, one who pleads another's cause (Josephus, Philo, in illiterate papyrus), in N.T. only in John's writings, though the idea of it is in Ro 8:26-34. Cf. Deissmann, Light, etc., p. 336. So the Christian has Christ as his Paraclete with the Father, the Holy Spirit as the Father's Paraclete with us (Joh 14:16,26; 15:26; 16:7; 1Jo 2:1 ).

For ever ( $\varepsilon \iota \varsigma \tau \operatorname{\tau ov} \alpha \iota \omega v \alpha$ ). This the purpose ( $\llcorner v \alpha$ ) in view and thus Jesus is to be with his people here forever (Mt 28:20). See 4:14 for the idiom.

John 14:17
The Spirit of truth ( $\tau 0 \pi v \varepsilon \cup \mu \alpha \tau \eta \varsigma \alpha \lambda \eta \theta \varepsilon 1 \alpha \varsigma)$. Same phrase in 15:27; 16:13; 1Jo 4:6 , "a most exquisite title" (Bengel). The Holy Spirit is marked by it (genitive case), gives it, defends it (cf. 1:17), in contrast to the spirit of error (1Jo 4:6 ).

Whom (o). Grammatical neuter gender (o) agreeing with $\pi v \varepsilon v \mu \alpha$ (grammatical), but rightly rendered in English by "whom" and note masculine $\varepsilon \kappa \varepsilon เ v \circ \varsigma ~(v e r s e ~ 26) . ~ H e ~ i s ~ a ~ p e r s o n, ~$ not a mere influence.

Cannot receive (ov $\delta u v a \tau \alpha ~ \lambda \alpha \beta \varepsilon ı v)$. Left to itself the sinful world is helpless (1Co 2:14; Ro 8:7f. ), almost Paul's very language on this point. The world lacks spiritual insight (ov $\theta \varepsilon \omega \rho \varepsilon$ ) and spiritual knowledge (ov $\delta \varepsilon \gamma \imath \omega \omega \sigma \kappa \varepsilon$ ). It failed to recognize Jesus ( $1: 10$ ) and likewise the Holy Spirit.

Ye know him ( $\cup \mu \varepsilon \varsigma \varsigma ~ \gamma \iota v \omega \sigma \kappa \varepsilon \tau \varepsilon \alpha \cup \tau 0$ ). Emphatic position of $v \mu \varepsilon \iota \varsigma$ (ye) in contrast with the world ( 15:19), because they have seen Jesus the Revealer of the Father (verse 9).

Abides ( $\mu \varepsilon v \varepsilon$ ). Timeless present tense.

With you ( $\pi \alpha \rho^{\prime} v \mu \nu v$ ). "By your side," "at home with you," not merely "with you" ( $\mu \varepsilon \theta^{\prime}$ $\nu \mu \omega v$ ) "in the midst of you."

In you ( $\varepsilon v \nu \mu \nu v$ ). In your hearts. So note $\mu \varepsilon \tau \alpha$ ( 16), $\pi \alpha \rho \alpha, \varepsilon v$.
John 14:18
I will not leave (ovк $\alpha \varphi \eta \sigma \omega$ ). Future active of $\alpha \varphi ı \eta \mu$, to send away, to leave behind.
Desolate (op $\rho$ 人vouc). Old word (ор $\rho$ о, Latin orbus), bereft of parents, and of parents bereft of children. Common in papyri of orphan children. In 13:33 Jesus called the disciples т $\varepsilon \kappa v / \alpha$ (little children), and so naturally the word means "orphans" here, but the meaning may be "helpless" (without the other Paraclete, the Holy Spirit). The only other N.T. example is in Jas 1:27 where it means "fatherless."

I come ( $\varepsilon \rho \chi \circ \mu \alpha)$. Futuristic present as in verse 3.
John 14:19
But ye behold me (ข $\downarrow \varepsilon \iota \varsigma \delta \varepsilon \theta \varepsilon \omega \rho \varepsilon \iota \tau \varepsilon \mu \varepsilon$ ). Emphatic position of $v \mu \varepsilon \iota \varsigma ~(y e) ~ i n ~ c o n t r a s t ~$ to the blind, unseeing world. Cf. 13:33; 16:10,16 .

Because I live, ye shall live also (o $\varepsilon \gamma \omega \zeta \omega \kappa \alpha \nu \mu \varepsilon \varsigma \zeta \eta \sigma \varepsilon \tau \varepsilon$ ). This is our blessed guarantee of immortal, eternal life, the continued living of Jesus. He is the surety of a better covenant (Heb 7:22 ), the Risen Christ Jesus. He had said it before ( 6:57).

John 14:20
In that day ( $\varepsilon v \varepsilon \kappa \varepsilon ı \nu \eta \tau \eta \eta \mu \varepsilon \rho \alpha$ ). The New Dispensation of the Holy Spirit, beginning with Christ's Resurrection and the Coming of the Holy Spirit at pentecost.

Shall know ( $\gamma \nu \omega \sigma \varepsilon \sigma \theta \varepsilon$ ). Future middle of $\gamma เ \nu \omega \sigma \kappa \omega$. Chapters 1 to 3 of Acts bear eloquent witness to these words.

John 14:21
He it is that loveth me ( $\varepsilon \kappa \varepsilon เ v o \varsigma ~ \varepsilon \sigma \tau \iota v$ o $\alpha \gamma \alpha \pi \omega \nu \mu \varepsilon$ ). Emphatic demonstrative pronoun єкะเขоц: "that is the one who loves me."

And will manifest myself unto him ( $\kappa \alpha \varepsilon \mu \varphi \alpha v ı \sigma \omega$ avt $\omega$ ع $\mu \alpha \nu \tau \sigma v$ ). Future active of $\varepsilon \mu \varphi \alpha v \iota \zeta \omega$, old verb from $\varepsilon \mu \varphi \alpha \nu \eta \varsigma$ (Ac 10:40; Ro 10:20). The Unseen and Risen Christ will be a real and spiritual Presence to the obedient and loving believer.

John 14:22
Not Iscariot (oux o Iøкарı $\omega \tau \eta \varsigma$ ). Judas Iscariot had gone ( 13:30), but John is anxious to make it clear that this Judas (common name, two apostles also named James) was not the infamous traitor. He is also called Thaddaeus or Lebbaeus (Mr 3:17; Mt 10:3) and the brother (or son) of James (6:15; Ac 1:13). This is the fourth interruption of the talk of Jesus (by Peter, 13:36; by Thomas, 14:5; by Philip, 14:8; by Judas, 14:22).

And not to the world ( $\kappa \alpha$ ov $\chi \tau \omega \kappa \sigma \sigma \mu \omega$ ). Judas caught at the word $\varepsilon \mu \varphi \alpha \nu \iota \omega \omega$ in verse 21 as perhaps a Messianic theophany visible to all the world as at the judgment (5:27f. ). He seems to suspect a change of plan on the part of Jesus ( $\tau \gamma \varepsilon \gamma \circ v \varepsilon v$ o $\tau=$ how has it happened that).

John 14:23
If a man love me ( $\varepsilon \alpha \nu \tau \iota \varsigma \alpha \gamma \alpha \pi \alpha \mu \varepsilon)$. Condition of third class with $\varepsilon \alpha \nu$ and present active subjunctive, "if one keep on loving me." That is key to the spiritual manifestation $(\varepsilon \mu \varphi a v \iota \zeta)$.

We will come $(\varepsilon \lambda \varepsilon v \sigma o \mu \varepsilon \theta \alpha)$. Future middle of $\varepsilon \rho \chi o \mu \alpha$ and first person plural (the Father and I), not at the judgment, but here and now.

And make our abode with him ( $\kappa \alpha \mu \circ \nu \eta \nu \pi \alpha \rho^{\prime} \alpha v \tau \omega \pi о \imath \eta \sigma \mu \varepsilon \theta \alpha$ ). See verse 2 for the word $\mu \circ v \eta$ (dwelling, abiding place). If the Holy Spirit "abides" ( $\mu \varepsilon v \varepsilon$, verse 17) in you, that heart becomes a temple (vas) of the Holy Spirit (1Co 3:16f. ), and so a fit dwelling place for the Father and the Son, a glorious and uplifting reality.

John 14:24
He that loveth me not ( $o \mu \eta \alpha \gamma \alpha \pi \omega \nu \mu \varepsilon$ ). Present active articular participle of $\alpha \gamma \alpha \pi \alpha \omega$ with negative $\mu \eta$, "the one who keeps on not loving me."

Is not mine, but the Father's (ovк $\varepsilon \sigma \tau \iota \nu \varepsilon \mu о \sigma, \alpha \lambda \lambda \alpha \tau о v \pi \alpha \tau \rho \circ \varsigma)$. Predicative possessive pronoun $\varepsilon \mu \circ \varsigma$ and the predicate genitive of possession $\pi \alpha \tau \rho \circ \varsigma$.

John 14:25
Have I spoken $(\lambda \varepsilon \lambda \alpha \lambda \eta \kappa \alpha)$. Perfect active indicative of $\lambda \alpha \lambda \varepsilon \omega$, for permanent keeping ( $\tau \eta \rho \varepsilon \omega$ verse 23).

While yet abiding with you ( $\pi \alpha \rho^{\prime} v \mu \tau \nu \mu \varepsilon \nu \omega v$ ). Present active participle, no "yet" ( $\varepsilon \tau$ ) in the Greek, "while remaining beside ( $\pi \alpha \rho^{\prime}$ ) you" before departing for the coming of the other Paraclete.

John 14:26
Whom (o). Grammatical neuter, but "whom" is correct translation. The Father will send the Holy Spirit (14:16; Lu 24:49; Ac 2:33 ), but so will the Son (Joh 15:26; 16:7) as Jesus breathes the Holy Spirit upon the disciples (20:22). There is no contradiction in this relation of the Persons in the Trinity (the Procession of the Holy Spirit). Here the Holy Spirit (full title as in Mr 3:29; Mt 12:32; Lu 12:10 ) is identified with the Paraclete.

He ( $\varepsilon \kappa \varepsilon เ \nu \circ \varsigma)$. Emphatic demonstrative pronoun and masculine like $\pi \alpha \rho \alpha \kappa \lambda \eta \tau о \varsigma$.
Shall teach you all things (v $\mu \alpha \varsigma \delta \iota \alpha \xi \varepsilon \pi \alpha \nu \tau \alpha)$. The Holy Spirit knows "the deep things of God" (1Co 2:10) and he is our Teacher in the Dispensation of the Holy Spirit of both new truth (verse 25) and old.

Bring to your remembrance (v $\tau о \mu \nu \eta \sigma \varepsilon v \mu \alpha \varsigma)$. Future active indicative of $v \pi о \mu \mu \nu \eta \sigma \kappa \omega$, old verb to remind, to recall, here only in this Gospel (cf. 3Jo 1:10; 2Ti 2:14) and with two accusatives (person and thing). After pentecost the disciples will be able better to recall and to understand what Jesus had said (how dull they had been at times) and to be open to new revelations from God (cf. Peter at Joppa and Caesarea).

John 14:27

My peace ( $\varepsilon \varsigma \rho \eta \nu \eta v \tau \eta v \varepsilon \mu \eta \nu)$. This is Christ's bequest to the disciples before he goes, the shalom of the orient for greeting and parting, used by Jesus in his appearances after the resurrection (20:19,21,26 ) as in 2Jo 1:3; 3Jo 1:14 , but here and in 16:33 in the sense of spiritual peace such as only Christ can give and which his Incarnation offers to men (Lu 2:14).

Neither let it be fearful ( $\mu \varepsilon \delta \eta \delta \varepsilon \varepsilon \lambda ı a \tau \omega$ ). Added to the prohibition in verse 1, only N.T. example of $\delta \varepsilon \iota \lambda \iota \alpha \omega$ (rare word in Aristotle, in a papyrus of one condemned to death), common in LXX, like palpitating of the heart (from $\delta \varepsilon ı \lambda o \varsigma)$.

John 14:28
I go away, and I come (vлаү $\omega$ ка $\varepsilon \rho \chi о \mu \alpha$ ), both futuristic presents (7:33; 14:3,18).
If ye loved me ( $\varepsilon \eta \gamma \alpha \pi \alpha \tau \varepsilon \mu \varepsilon$ ). Second-class condition with the imperfect active of a $\gamma \alpha \pi \alpha \omega$ referring to present time, implying that the disciples are not loving Jesus as they should.

Ye would have rejoiced ( $\varepsilon \chi \alpha \rho \eta \tau \varepsilon \alpha \nu$ ). Second aorist passive indicative of $\chi \propto \mu \rho \omega$ with $\alpha \nu$, conclusion of second-class condition referring to past time, "Ye would already have rejoiced before this" at Christ's going to the Father (verse 12).

Greater than I ( $\mu \varepsilon \iota \zeta \omega \nu \mu \circ v$ ). Ablative case $\mu \circ v$ after the comparative $\mu \varepsilon 亡 \zeta \omega v$ (from positive $\mu \varepsilon \gamma \alpha \varsigma)$. The filial relation makes this necessary. Not a distinction in nature or essence (cf. 10:30), but in rank in the Trinity. No Arianism or Unitarianism here. The very explanation here is proof of the deity of the Son (Dods).

John 14:30
The prince of the world ( $o$ tov коб $\mu \circ v \alpha \rho \chi \omega v$ ). Satan as in 12:31 which see.
John 14:31
But that the world may know ( $\alpha \lambda \lambda^{\prime}$ เv $\alpha \gamma \nu \omega$ o коб $\mu \circ \varsigma$ ). Purpose clause with $v \alpha$ and the second aorist active subjunctive of $\gamma \iota \nu \omega \sigma \kappa \omega$. Elliptical construction (cf. 9:3; 13:18; 15:25 ). "But I surrendered myself to death," etc., before tva.

Arise, let us go hence ( $\varepsilon \gamma \varepsilon เ \rho \varepsilon \sigma \theta \varepsilon, a \gamma \omega \mu \varepsilon v \varepsilon v \tau \varepsilon \cup \theta \varepsilon v$ ). Imperative present middle of $\varepsilon \gamma \varepsilon!\rho \omega$ and the volitive (hortatory) subjunctive $\alpha \gamma \omega \mu \varepsilon v$ (the word used in 11:7,16) of going to meet death. Apparently the group arose and walked out into the night and the rest of the talk (chs. 15 and 16) and prayer (ch. 17) was in the shadows on the way to Gethsemane.

## John 15

John 15:1
The true vine ( $\eta \alpha \mu \pi \varepsilon \lambda$ oc $\eta \alpha \lambda \eta \theta \iota v \eta$ ). "The vine the genuine." Assuming that the Lord's Supper had just been instituted by Jesus the metaphor of the vine is naturally suggested by "the fruit of the vine" (Mr 14:25; Mt 26:29). A $\mu \pi \varepsilon \lambda$ os in the papyri (Moulton and Milligan's Vocabulary) is sometimes used in the sense of ampelon (vineyard), but not so here. Jesus uses various metaphors to illustrate himself and his work (the light, 8:12; the door, $10: 7$; the shepherd, 10:11; the vine, 15:1). The vine was common in Palestine. See Ps $80: 8 \mathrm{f}$. "On the Maccabean coinage Israel was represented by a vine" (Dods). Jesus is the genuine Messianic vine.

The husbandman (o $\gamma \varepsilon \omega \rho \gamma \circ \varsigma$ ) as in Mr 12:1; Jas 5:7; 2Ti 2:6 . cf. 1Co 3:9 , $\theta \varepsilon o v \gamma \varepsilon \omega \rho \gamma$ юov (God's field).

## John 15:2

Branch ( $\kappa \lambda \eta \mu \alpha$ ). Old word from $\kappa \lambda \alpha \omega$, to break, common in LXX for offshoots of the vine, in N.T. only here (verses 2-6), elsewhere in N.T. $\kappa \lambda \alpha \delta o s$ (Mr 4:32, etc.), also from $\kappa \lambda \alpha \omega$, both words meaning tender and easily broken parts.

In me ( $\varepsilon v \varepsilon \mu \mathrm{o}$ ). Two kinds of connexion with Christ as the vine (the merely cosmic which bears no fruit, the spiritual and vital which bears fruit). The fruitless (not bearing fruit, $\mu \eta \varphi \varepsilon \rho о \nu$ картоv) the vine-dresser "takes away" (aı $\rho \varepsilon$ ) or prunes away. Probably (Bernard) Jesus here refers to Judas.

Cleanseth ( $\kappa \alpha \theta \iota \rho \varepsilon$ ). Present active indicative of old verb $\kappa \alpha \theta a \iota \rho \omega$ (clean) as in verse 3 , only use in N.T., common in the inscriptions for ceremonial cleansing, though $\kappa \alpha \theta \alpha \rho \iota \zeta \omega$ is more frequent (Heb 10:2).

That it may bear more fruit (ıva карлоv $\pi \lambda \varepsilon ı \circ \vee \alpha \varphi \varepsilon \rho \eta$ ). Purpose clause with $\imath v \alpha$ and present active subjunctive of $\varphi \varepsilon \rho \omega$, "that it may keep on bearing more fruit" (more and more). A good test for modern Christians and church members.

John 15:3
Already ye are clean ( $\eta \delta \eta \nu \mu \varepsilon \iota \varsigma \kappa \alpha \theta \alpha \rho o \varepsilon \sigma \tau \varepsilon$ ). Potentially cleansed (Westcott) as in 13:10 which see and 17:19.

John 15:4
Abide in me ( $\mu \varepsilon เ v a \tau \varepsilon \varepsilon v \varepsilon \mu \circ$ ). Constative aorist active imperative of $\mu \varepsilon v \omega$. The only way to continue "clean" (pruned) and to bear fruit is to maintain vital spiritual connexion with Christ (the vine). Judas is gone and Satan will sift the rest of them like wheat (Lu 22:31f. ). Blind complacency is a peril to the preacher.

Of itself ( $\alpha \varphi^{\prime}$ عavtov). As source (from itself) and apart from the vine (cf. 17:17).

Except it abide ( $\varepsilon \alpha \nu \mu \eta \mu \varepsilon v \eta$ ). Condition of third class with $\varepsilon \alpha v$, negative $\mu \eta$, and present active (keep on abiding) subjunctive of $\mu \varepsilon v \omega$. Same condition and tense in the application, "except ye abide in me."

John 15:5
Ye the branches ( $v \mu \varepsilon \iota \varsigma \tau \alpha \kappa \lambda \eta \mu \alpha \tau \alpha)$. Jesus repeats and applies the metaphor of verse 1.

Apart from me ( $\chi \omega \rho ı \varsigma \varepsilon \mu \circ v$ ). See Eph 2:12 for $\chi \omega \rho ı \varsigma$ Xpıбтov. There is nothing for a broken off branch to do but wither and die. For the cosmic relation of Christ see Joh 1:3 ( $\chi \omega \rho ı \varsigma \alpha \cup \tau o v)$.

John 15:6
He is cast forth ( $\varepsilon \beta \lambda \eta \theta \eta \varepsilon \xi \omega$ ). Timeless or gnomic use of the first aorist passive indicative of $\beta \alpha \lambda \lambda \omega$ as the conclusion of a third-class condition (see also verses 4,7 for the same condition, only constative aorist subjunctive $\mu \varepsilon \iota v \eta \tau \varepsilon$ and $\mu \varepsilon เ v \eta$ in verse 7 ). The apostles are thus vividly warned against presumption. Jesus as the vine will fulfil his part of the relation as long as the branches keep in vital union with him.

As a branch ( $\omega \varsigma$ то $\kappa \lambda \eta \mu \alpha$ ).
And is withered ( $\varepsilon \xi \eta \rho \alpha v \theta \eta$ ). Another timeless first aorist passive indicative, this time of $\xi \eta \rho a ı v \omega$, same timeless use in Jas 1:11 of grass, old and common verb. They gather ( $\sigma v v a \gamma o v \sigma ı v$ ). Plural though subject not expressed, the servants of the vine-dresser gather up the broken off branches.

Are burned ( $\kappa \alpha \iota \tau \alpha$ ). Present passive singular of $\kappa \alpha 1 \omega$, to burn, because $\kappa \lambda \eta \mu \alpha \tau \alpha$ (branches) is neuter plural. See this vivid picture also in Mt 13:41f.,49f.

John 15:7
Ask whatsoever ye will (o $\varepsilon \alpha \nu \theta \varepsilon \lambda \eta \tau \varepsilon \alpha \iota \tau \eta \sigma \alpha \sigma \theta \varepsilon$ ). Indefinite relative with $\varepsilon \alpha \nu$ and present active subjunctive of $\theta \varepsilon \lambda \omega$, to wish, to will, and aorist middle imperative of aıt $\omega$, to ask. This astounding command and promise ( $\gamma \varepsilon v \eta \sigma \varepsilon \tau \alpha$, future middle of $\gamma ı v o \mu \alpha$, it will come to pass) is not without conditions and limitations. It involves such intimate union and harmony with Christ that nothing will be asked out of accord with the mind of Christ and so of the Father. Christ's name is mentioned in 15:16; cf. 14:13; 16:23.

John 15:8
Herein $(\varepsilon v \tau o v \tau \omega)$. That is in the vital union and the much fruit bearing. It points here backwards and forwards.

Is glorified $\left(\varepsilon \delta_{0} \xi \sigma \sigma \theta \eta\right)$. Another gnomic or timeless first aorist passive indicative.
Bear ( $\varphi \varepsilon \rho \varepsilon \tau \varepsilon$ ). Present active subjunctive, "keep on bearing" much fruit.
And so shall ye be ( $\kappa \alpha \gamma \varepsilon \nu \eta \sigma \varepsilon \sigma \theta \varepsilon$ ). Rather "become." Future middle indicative of $\gamma \iota v o \mu \alpha$, though B D L read $\gamma \varepsilon v \eta \sigma \theta \varepsilon$ (after iva like $\varphi \varepsilon \rho \eta \tau \varepsilon$ ). "Become" my disciples (learners) in the fullest sense of rich fruit-bearing according to the text in

John 15:9

Abide ( $\mu \varepsilon เ v a \tau \varepsilon$ ). Constative first aorist active imperative of $\mu \varepsilon \nu \omega$, summing up the whole.

In my love ( $\varepsilon v \tau \eta \alpha \gamma \alpha \pi \eta \tau \eta \varepsilon \mu \eta)$. Subjunctive possessive pronoun, "in the love that I have for you." Our love for Christ is the result of Christ's love for us and is grounded at bottom in the Father's love for the world ( 3:16). John has $\varepsilon \mu \circ \varsigma 37$ times and always in the words of Jesus (Bernard). But he uses $\mu \mathrm{ov}$ also (verse 10).

John 15:10
Ye will abide ( $\mu \varepsilon v \varepsilon \iota \tau \varepsilon$ ). Future tense of $\mu \varepsilon v \omega$, conclusion of the third-class condition ( $\varepsilon \alpha v$ and first aorist active subjunctive $\tau \eta \rho \eta \sigma \eta \tau \varepsilon$ ). The correlative of 14:15. Each involves the other (love and keeping the commandments of Jesus).

And abide ( $\kappa \alpha \mu \varepsilon v \omega$ ). The high example of Jesus (the Son) in relation to the Father is set before us as the goal.

John 15:11
 the present subjunctive $\eta$ (some MSS. have $\mu \varepsilon \varepsilon \eta \eta$, may remain), Christ's permanent absolute joy in the disciples.

And that your joy be fulfilled ( $\mathrm{K} \alpha \eta \chi \alpha \rho \alpha \nu \mu \omega \nu \pi \lambda \eta \rho \omega \theta \eta$ ). Same construction with first aorist (effective) passive subjunctive of $\pi \lambda \eta \rho o \omega$, consummation of the process preceding.

John 15:12
That ye love one another ( $\mathrm{v} \alpha \alpha \gamma \alpha \pi \alpha \tau \varepsilon \alpha \lambda \lambda \eta \lambda o v \varsigma$ ). Non-final use of $t v \alpha$, introducing a subject clause in apposition with $\varepsilon v \tau 0 \lambda \eta$ (commandment) and the present active subjunctive of $\alpha \gamma \alpha \pi \alpha \omega$, "that ye keep on loving one another." See 13:34.

John 15:13
Than this ( $\tau \alpha \cup \tau \eta \varsigma)$. Ablative case after the comparative adjective $\mu \varepsilon ו \zeta o v \alpha$ and feminine agreeing with $\tau \eta \varsigma \alpha \gamma \alpha \pi \eta \varsigma$ (love) understood.

That a man lay down his life ( $\imath v \alpha \tau \iota \varsigma ~ \tau \eta \nu \psi v \chi \eta v$ avtov $\theta \eta$ ). Object clause (non-final use of tva in apposition with the ablative pronoun $\tau \alpha v \tau \eta$ and the second aorist active subjunctive of $\tau 1 \theta \eta \mu$. For the phrase see $10: 11$ of the good shepherd. Cf. 1Jo 3:16; Ro 5:7f.

For his friends (vл $\varepsilon \rho \tau \omega v \varphi i \lambda \omega \nu \alpha \tau \tau 0)$ ). "In behalf of his friends" and so "in place of his friends." "Self-sacrifice is the high-water mark of love" (Dods). For this use of $v \pi \varepsilon \rho$ see Joh 11:50; Ga 3:13; 2Co 5:14f.; Ro 5:7f .

John 15:14
If ye do ( $\varepsilon \alpha v \pi 0 ı \eta \tau \varepsilon)$. Condition of third class with $\varepsilon a v$ and the present active subjunctive, "if ye keep on doing," not just spasmodic obedience. Just a different way of saying what is in verse 10 . Obedience to Christ's commands is a prerequisite to discipleship and fellowship (spiritual friendship with Christ). He repeats it in the Great Commission (Mt 28:20, $\varepsilon v \varepsilon \tau \varepsilon ו \lambda \alpha \mu \eta \nu$, I commanded) with the very word used here ( $\varepsilon v \tau \varepsilon \lambda \lambda o \mu \alpha$, I command).

John 15:15

No longer (ouk\&т). As he had done in 13:16. He was their Rabbi (1:38; 13:13) and Lord ( 13:13). Paul gloried in calling himself Christ's סou入oc (bond-slave).

Servants (סou入ouc). Bond-servants, slaves.
I have called you friends ( $\nu \mu \alpha \varsigma \varepsilon є \eta \kappa \alpha ~ \varphi \iota \lambda o u \varsigma)$. Perfect active indicative, permanent state of new dignity. They will prove worthy of it by continued obedience to Christ as Lord, by being good $\delta$ ou $\lambda \mathrm{o}$. Abraham was called the Friend of God (Jas 2:23). Are we friends of Christ?

John 15:16
But I chose you ( $\left.\alpha \lambda \lambda^{\prime} \varepsilon \gamma \omega \varepsilon \xi \varepsilon \lambda \varepsilon \xi \alpha \mu \eta \nu v \mu \alpha \varsigma\right)$. First aorist middle indicative of $\varepsilon \kappa \lambda \varepsilon \gamma \omega$. See this same verb and tense used for the choice of the disciples by Christ ( $6: 70 ; 13: 18 ; 15: 19$ ). Jesus recognizes his own responsibility in the choice after a night of prayer (Lu 6:13). So
 active indicative ( $\kappa$ aorist) of $\tau \iota \theta \eta \mu$. Note three present active subjunctives with $v \alpha \alpha$ (purpose clause) to emphasize continuance ( $v \pi \alpha \gamma \eta \tau \varepsilon$, keep on going, $\varphi \varepsilon \rho \eta \tau \varepsilon$, keep on bearing fruit, $\mu \varepsilon v \eta$, keep on abiding), not a mere spurt, but permanent growth and fruit-bearing.

He may give ( $\delta \omega$ ). Second aorist active subjunctive of $\delta \iota \delta \omega \mu$ with iva (purpose clause). Cf. 14:13 for the same purpose and promise, but with $\pi$ rom $\sigma \omega$ (I shall do). See also 16:23f.,26

John 15:17
That ye may love one another (iva $\alpha \gamma \alpha \pi \alpha \tau \varepsilon \alpha \lambda \lambda \eta \lambda o u \varsigma)$. Repetition of 13:34; 15:12. This very night the disciples had been guilty of jealousy and wrangling (Lu 22:24; Joh 13:5,15 ).

John 15:18
If the world hateth you ( $\varepsilon$ о коб $\mu \circ \varsigma \nu \mu \propto \varsigma \mu \sigma \varepsilon$ ). Condition of the first class. As it certainly does.

Ye know ( $\gamma \iota \nu \omega \sigma \kappa \varepsilon \tau \varepsilon$ ). Present active second person plural indicative of $\gamma \iota \nu \omega \sigma \kappa \omega$ or present active imperative (know), same form.

Hath hated ( $\mu \varepsilon \mu \tau \sigma \eta \kappa \varepsilon v$ ). Perfect active indicative, "has hated and still hates."
Before it hateth you ( $\pi \rho \omega \tau \sigma \nu \nu \mu \omega v$ ). Ablative case $\nu \mu \omega v$ after the superlative $\pi \rho \omega \tau \sigma v$ as with $\pi \rho \omega \tau$ тo $\mu 0$ in $1: 15$.

John 15:19
The world would love its own (o коб $\mu \circ \varsigma \alpha \nu$ to $\delta \delta \iota v \varepsilon \varphi \iota \lambda \varepsilon$ ). Conclusion of secondclass condition (determined as unfulfilled), regular idiom with $\alpha v$ and imperfect indicative in present time.

But because ye are not of the world (от $\delta \varepsilon \varepsilon \kappa$ тov коб $\mu$ оv оок $\varepsilon \sigma \tau \varepsilon$ ). Definite and specific reason for the world's hatred of real Christians whose very existence is a reproach to the sinful world. Cf. 7:7; 17:14; 1Jo 3:13. Does the world hate us? If not, why not? Has the world become more Christian or Christians more worldly?

John 15:20
Remember ( $\mu \nu \eta \mu$ ovevete). Present active imperative of $\mu \nu \eta \mu$ ovev $\omega$, old verb from $\mu \nu \eta \mu \omega \nu$, in John again in 16:4,21. See 13:16 for this word.

If they persecuted me ( $\varepsilon \varepsilon \mu \varepsilon \varepsilon \delta \omega \omega \xi \alpha v)$. Condition of first class. They certainly did persecute (first aorist active of $\delta \omega \omega \omega$, to chase like a wild beast like the Latin persequor, our "persecute") Jesus ( 5:16). They will persecute those like Jesus. Cf. 16:33; Mr 10:30; Lu 21:12; 1Co 4:12; 2Co 4:9; Ga 4:29; 2Ti 3:12 for proof that this prophecy came true. But the alternative is true and is stated by Jesus with a like condition of the first class, "if they kept my word" ( $\varepsilon$ tov $\lambda o \gamma o v ~ \mu o v ~ \varepsilon \tau \eta \rho \eta \sigma \alpha v)$. The world does praise the word of Jesus, but dreads to follow it.

John 15:21
Unto you ( $\varepsilon ı \varsigma \nu \mu \varsigma)$. Like the dative $v \mu \nu v$ (Textus Receptus) as in the papyri and modern Greek (Robertson, Grammar, p. 594).

For my name's sake ( $\delta 1 \alpha$ тo ovo $\mu \alpha \mu o v$ ). See verse 20 . See this same warning and language in Mt 10:22; Mr 13:13; Mt 24:9; Lu 21:17 ). There is little difference in meaning from عveкยv $\mu \circ \boldsymbol{\sim}$ (Mr 13:9; Lu 21:12). Loyalty to the name of Christ will bring persecution as they will soon know (Ac 5:41; Php 1:29; 1Pe 4:14 ). About the world's ignorance of God see Lu 23:34; Ac 3:17; Joh 16:3.

John 15:22
They had not had $\sin$ ( $\alpha \mu \alpha \rho \tau \iota \alpha v$ оик $\varepsilon \ell \chi \circ \sigma \alpha v$ ). Conclusion of condition of second class without $\alpha v$ because context makes it clear (vov $\delta \varepsilon$ ) without it (Robertson, Grammar, p. 1013). The imperfect active indicative with -o oav instead of -ov (also in verse 24 ) as common in the LXX, and occurs in the papyri and the inscriptions and the Boeotian dialect.

Excuse ( $\pi \rho \circ \varphi \alpha \sigma \imath v$ ). Old word ( 1 Th 2:5) either from $\pi \rho \circ \varphi \alpha \iota v \omega$, to show forth, or $\pi \rho о \varphi \eta \mu$, to speak forth. Mere pretence, in John only here and verse 24.

John 15:23
My Father also ( $\kappa \alpha \operatorname{\tau ov} \pi \alpha \tau \varepsilon \rho \alpha \mu \circ v$ ). Because Christ reveals God (14:9) and to dishonour Christ is to dishonour God ( $5: 23$ ). The coming of Christ has revealed the weight of sin on those who reject him.

John 15:24
They have both seen and hated ( $\kappa \alpha \varepsilon \omega$ ракабıv ка $\mu \varepsilon \mu \iota \sigma \eta \kappa \alpha \sigma \iota v$ ). Perfect active indicative of opa $\omega$ and $\mu$ I $\sigma \omega$, permanent attitude and responsibility. The "world" and the ecclesiastics (Sanhedrin) had united in this attitude of hostility to Christ and in reality to God.

John 15:25
But this cometh to pass ( $\alpha \lambda \lambda^{\prime}$ ). Ellipsis in the Greek (no verb), as in 9:3; 13:18.
In their law ( $\varepsilon v \tau \omega$ vo $\mu \omega$ av $\tau \omega v$ ). Cf. 8:17; 10:34 for this standpoint. "Law" (vo $\rho \circ \varsigma$ ) here is for the whole of Scripture as in 12:34. The allusion is to Ps 69:4 (or Ps 35:19). The hatred of the Jews toward Jesus the promised Messiah ( $1: 11$ ) is "part of the mysterious purpose of

God" (Bernard) as shown by $\tau v \alpha \pi \lambda \eta \rho \omega \theta \eta$ (first aorist passive subjunctive of $\pi \lambda \eta \rho o \omega$, to fulfil).

Without a cause ( $\delta \omega \rho \varepsilon \alpha v$ ). Adverbial accusative of $\delta \omega \rho \varepsilon \alpha$ from $\delta \iota \delta \omega \mu$, gratuitously, then unnecessarily or gratis (in two Koine tablets, Nageli) as here and Ga 2:21 .

John 15:26
When the Comforter is come (oтav $\varepsilon \lambda \theta \eta$ о $\pi \alpha \rho \alpha \kappa \lambda \eta \tau о \varsigma)$. Indefinite temporal clause with otav and the second aorist active subjunctive of $\varepsilon \rho \chi \circ \mu \alpha$, "whenever the Comforter comes."

Whom I will send unto you from the Father ( $o v \varepsilon \gamma \omega \pi \varepsilon \mu \psi \omega \nu \mu \nu \tau \alpha \rho \alpha$ tov $\pi \alpha \tau \rho o \varsigma)$. As in 16:7, but in 14:16,26 the Father sends at the request of or in the name of Jesus. Cf. Lu 24:49; Ac 2:33. This is the Procession of the Holy Spirit from the Father and from the Son.

Which (o). Grammatical neuter to agree with $\pi \nu \varepsilon v \mu a$, and should be rendered "who" like o in 14:26.

Proceedeth from the Father ( $\pi \alpha \rho \alpha$ тov $\pi \alpha \tau \rho о \varsigma \varepsilon к \pi о \rho \varepsilon \cup \varepsilon \tau \alpha)$ ) "From beside the Father" as in the preceding clause.

Shall bear witness of me ( $\mu \alpha \rho \tau v \rho \eta \sigma \varepsilon \pi \varepsilon \rho \varepsilon \mu \circ v$ ). Future active of $\mu \alpha \rho \tau v \rho \varepsilon \omega$. This is the mission of the Paraclete ( $16: 14$ ) as it should be ours.

John 15:27
And ye also bear witness ( $\kappa \alpha \nu \mu \varepsilon \iota \varsigma \delta \varepsilon \mu \alpha \rho \tau \nu \rho \varepsilon \iota \tau \varepsilon$ ). Present active indicative or imperative (do ye bear witness), same form of $\mu \alpha \rho \tau 0 \rho \varepsilon \omega$. "Ye also" as well as the Holy Spirit, ye also when filled with and taught by the Holy Spirit the things concerning Jesus. It is here that Christians fail most.

Have been ( $\varepsilon \sigma \tau \varepsilon)$. Progressive present of $\varepsilon \mu$, "are with me from the beginning of my ministry as in 14:9. They were chosen to be with Christ (Mr 3:14).

## John 16

John 16:1
That ye should not be made to stumble (ıva $\mu \eta \sigma \kappa \alpha v \delta \alpha \lambda \iota \sigma \theta \eta \tau \varepsilon$ ). Purpose clause with negative $\mu \eta$ and first aorist passive of $\sigma \kappa \alpha v \delta \alpha \lambda \iota \zeta \omega$, common verb in the Synoptics (Mt 13:21 ) "the $\sigma \kappa \alpha v \delta \alpha \lambda \alpha$ of faith, the stumblingblocks which trip up a disciple" (Bernard), in John only 6:61 and here (cf. 1Jo 2:10).

John 16:2
 will make you outcasts from the synagogues." Predicate accusative of the compound adjective $\alpha \pi о \sigma v v a \gamma \omega \gamma$ ос for which see 9:22; 12:42 .

Yea ( $\alpha \lambda \lambda^{\prime}$ ). Use of $\alpha \lambda \lambda \alpha$ as co-ordinating conjunction, not adversative.
That ( $\mathrm{t} \alpha$ ) not in the sense of "when" (ote), but as in 12:23 for God's purpose (Lu 2:34 , $0 \pi \omega \varsigma$ ).

Shall think ( $\delta$ о $\xi \eta$ ). First aorist active subjunctive of $\delta$ окع $\omega$. "So blind will he be" (Bernard).

That he offereth service unto God ( $\lambda \alpha \tau \rho \varepsilon ı \alpha v \pi \rho \circ \sigma \varphi \varepsilon \rho \varepsilon ⿺ \nu \tau \omega \theta \varepsilon \omega$ ). Infinitive (present active) indirect discourse after $\delta 0 \xi \eta$. For the phrase see Heb 6:1ff.; 8:3ff.; 9:7f. . The rabbis so felt when they crucified Jesus and when they persecuted the disciples (Ac 6:13; 7:57f. ). No persecution is more bitter than when done by religious enthusiasts and bigots like the Spanish Inquisition.

John 16:3
Because (oт). Definite reason for the religious hatred is ignorance of God and Christ as in 15:21.

John 16:4
Have I spoken ( $\lambda \varepsilon \lambda \alpha \lambda \eta \kappa \alpha$ ). Perfect active indicative as in 15:11; 16:1 . Solemn repetition.
When their hour is come (o $o \alpha v \varepsilon \lambda \lambda \eta \eta \omega \rho \alpha \alpha \nu \tau \omega v$ ). Indefinite temporal clause, o $o \alpha v$ with the second aorist active subjunctive of $\varepsilon \rho \chi \circ \mu \alpha$, "whenever their hour comes." The time appointed for these things.

Now that (oт). Simply "that" (declarative conjunction in indirect discourse. Forewarned is to be forearmed. Cf. 13:19.

From the beginning ( $\varepsilon \xi \alpha \rho \chi \eta \varsigma)$. As in 6:64 but practically like $\alpha \pi^{\prime} \alpha \rho \chi \eta \varsigma$ in 15:27. While Christ was with them, he was the object of attack ( 15:18).

John 16:5
And none of you asketh me ( $\kappa \alpha$ ov $\delta \varepsilon ı \varsigma \varepsilon \xi \nu \mu \omega \nu \varepsilon \rho \omega \tau \alpha \mu \varepsilon$ ). Adversative use of $\kappa \alpha=$ "and yet" as in $1: 10$. Now that they realize that Jesus is going, the thoughts of the disciples turn on themselves and they cease asking the query of Peter ( $13: 36$ ).

John 16:6

Sorrow hath filled ( $\eta \lambda \cup \pi \eta \eta \varepsilon \pi \lambda \lambda \rho \omega \kappa \varepsilon v$ ). This word is not used of Jesus in the Gospels, in John only in this chapter. Perfect active indicative of $\pi \lambda \eta \rho o \omega$. They do not see their way to go on without Jesus.

John 16:7
It is expedient for you ( $\sigma \nu \mu \varphi \varepsilon \rho \varepsilon \nu \mu \nu \nu$ ). Present active indicative of $\sigma \nu \mu \varphi \varepsilon \rho \omega$, old verb to bear together. See 11:50 where the phrase is used by Caiaphas "for us," here "for you" (v $\mu \mathrm{v}$ ethical dative).

That I go away ( $\imath v \alpha \varepsilon \gamma \omega \alpha \pi \varepsilon \lambda \theta \omega$ ). Subject clause the subject of $\sigma \nu \mu \varphi \varepsilon \rho \varepsilon$, $v \alpha$ and second aorist active subjunctive of $\alpha \pi \varepsilon \rho \chi \circ \mu \alpha$. The reason ( $\gamma \alpha \rho$ ) for this startling statement follows.

If I go not away ( $\varepsilon \alpha v \mu \eta \alpha \pi \varepsilon \lambda \theta \omega$ ). Third-class condition with $\varepsilon \alpha v$ and the negative $\mu \eta$ with $\alpha \pi \varepsilon \lambda \theta \omega$ as before.

Will not come (ov $\mu \eta \varepsilon \lambda \theta \eta$ ). Strong double negative with second aorist active subjunctive of $\varepsilon \rho \chi \circ \mu \alpha$. The Holy Spirit was, of course, already at work in the hearts of men, but not in the sense of witnessing as Paraclete which could only take place after Jesus had gone back to the Father.

But if I go ( $\varepsilon \alpha \nu \delta \varepsilon \pi о \rho \varepsilon \cup \theta \omega$ ). Third-class condition again ( $\varepsilon \alpha v$ and the first aorist passive subjunctive of $\pi о \rho \varepsilon v o \mu \alpha)$.

I will send $(\pi \varepsilon \mu \psi \omega)$. First person future as in 15.
John 16:8
And he ( $\kappa \alpha$ عкєıvoৎ). Emphatic demonstrative masculine pronoun.
When he is come ( $\varepsilon \lambda \theta \omega v$ ). Second aorist active participle of $\varepsilon \rho \chi \circ \mu \alpha$, "having come" or "coming."

Will convict the world ( $\varepsilon \lambda \varepsilon \gamma \xi \varepsilon$ tov коб $\mu \circ v$ ). Future active of $\varepsilon \lambda \varepsilon \gamma \chi \omega$, old word for confuting, convicting by proof already in 3:29; 8:46. Jesus had been doing this ( $7: 7$ ), but this is pre-eminently the work of the Holy Spirit and the most needed task today for our complacent age.

In respect of $\sin (\pi \varepsilon \rho \alpha \mu \alpha \rho \tau \iota \alpha \varsigma)$. Concerning the reality of sin as missing the mark and as wronging God and man, and not a mere slip or animal instinct or devoid of moral responsibility or evil. Some scientists and psychologists (Freudians and behaviourists) seem bent on destroying man's sense of sin. Hence crime waves even in youth.

And of righteousness ( $\kappa \alpha \pi \varepsilon \rho \delta \kappa \alpha เ о \sigma \cup v \eta \varsigma) . ~ T h e ~ o p p o s i t e ~ o f ~ " s i n " ~ a n d ~ t o ~ b e ~ y e a r n e d ~$ for after conviction. Cf. Ro 1:19-3:21 about the necessity of the God-kind of righteousness and the Sermon on the Mount for Christ's idea of righteousness.

And of judgment ( $\kappa \alpha \pi \varepsilon \rho \kappa \rho \iota \sigma \varepsilon \omega \varsigma$ ). As certain to come as condemnation because of $\sin$ and the lack of righteousness. These are not played out motives in human life, but basal. For this ministry we have the help of the Paraclete. The Paraclete is here spoken of "not as man's advocate with God (1Jo 2:1 ), but as Christ's advocate with the world" (Bernard).

John 16:9

Because they believe not on me (o $\circ$ ov $\pi \iota \sigma \tau \varepsilon v o v \sigma เ v \varepsilon \varsigma \varsigma \varepsilon \mu \varepsilon$ ). Without this conviction by the Paraclete such men actually have a pride of intellectual superiority in refusing to believe on Jesus.

John 16:10
And ye behold me no more ( $\kappa \alpha$ оикєт $\theta \varepsilon \omega \rho \varepsilon \iota \tau \varepsilon \mu \varepsilon$ ). With the bodily eyes and without the Holy Spirit they are unable to behold Jesus with the spiritual vision ( 14:19). Without Christ they lose the sense of righteousness as is seen in the "new morals" (immorality, loose views of marriage, etc.).

John 16:11
Because the prince of this world hath been judged (от о $\alpha \rho \chi \omega v$ tov коб $\mu$ оv tov tov $\kappa \varepsilon \kappa \rho \iota \tau \alpha)$. Cf. 12:31; 14:31 for the title. Perfect passive indicative of $\kappa \rho \iota v \omega$. He stands condemned. The sinful world is in his grip, but he will be cast out ( 12:31).

John 16:12
But ye cannot bear them now ( $\alpha \lambda \lambda^{\prime}$ ov $\delta v v \alpha \sigma \theta \varepsilon \beta \alpha \sigma \tau \alpha \zeta \varepsilon ı v \alpha \rho \tau$ ). The literal sense of $\beta \alpha \sigma \tau \alpha \zeta \omega$, to bear, occurs in 12:6. For the figurative as here see Ac 15:10. The untaught cannot get the full benefit of teaching (1Co 3:1; Heb 5:11-14). The progressive nature of revelation is a necessity.

John 16:13
Howbeit ( $\delta \varepsilon$ ). One of the most delicate and difficult particles to translate, varying from "and" to "but."

When he, the Spirit of truth, is come (oт $\alpha v \varepsilon \lambda \theta \eta$ єкะเvoo, тo $\pi \nu \varepsilon \nu \mu \alpha \tau \eta \varsigma \alpha \lambda \eta \theta \varepsilon ા \alpha \varsigma)$. Indefinite relative clause (otav and the second aorist active subjunctive of $\varepsilon \rho \chi \circ \mu \alpha$, no futurum exactum), "whenever he comes." Note eкะıvos (masculine demonstrative pronoun, though followed by neuter $\pi \nu \varepsilon v \mu a$ in apposition. See 15:26 for this phrase about the Holy Spirit. He shall guide you (o $\delta \eta \gamma \eta \sigma \varepsilon \nu \mu \alpha \varsigma$ ). Future active of old verb o $\delta \eta \gamma \varepsilon \omega$ (from o $\delta \eta \gamma \circ \varsigma$, from oठoৎ, way, $\eta \gamma \varepsilon \circ \mu \alpha$, to lead). See Ps $24: 5$ for "lead me into thy truth" (o $\delta \eta \gamma \eta \sigma o \nu \mu \varepsilon \varepsilon \varsigma \varsigma \tau \eta$ $\alpha \lambda \eta \theta \varepsilon \iota \alpha v \sigma o v)$. Christ is both the Way and the Truth (14:6) and the Holy Spirit is the Guide who shows the way to the Truth (verse 14). This he does gradually. We are still learning the truth in Christ.

From himself ( $\alpha \varphi^{\prime}$ عautov). In this he is like Christ ( $1: 26 ; 12: 49 ; 14: 10$ ).
He shall declare ( $\alpha v \alpha \gamma \gamma \varepsilon \lambda \varepsilon$ ). Future active of $\alpha v \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$, as in 4:25. See it also repeated in verse 14.

The things that are yet to come ( $\tau \alpha \varepsilon \rho \chi \circ \mu \varepsilon v \alpha$ ). Neuter plural articular participle of ep $\chi \circ \mu \alpha$, "the coming things." This phrase only here in the N.T. The things already begun concerning the work of the Kingdom (Lu 7:19ff.; 18:30) not a chart of future history. See Lu 7:20; Joh 6:14; 11:27 for o epхo $\mu \varepsilon v o \varsigma$ (the coming one) used of the Messiah.

John 16:14

He shall glorify me ( $\varepsilon \kappa \varepsilon เ v o \varsigma \varepsilon \mu \varepsilon \delta o \xi \alpha \sigma \varepsilon$ ). This is the glory of the Holy Spirit, to glorify Jesus Christ.

For he shall take of mine (o $\varepsilon \varepsilon \kappa \tau o v \varepsilon \mu \circ v \lambda \eta \mu \psi \varepsilon \tau \alpha$ ). Future middle of $\lambda \alpha \mu \beta \alpha \nu \omega$ and a definite promise of the Spirit's guidance in interpreting Christ. One need only refer to Peter's sermon at pentecost after the coming of the Holy Spirit, to Peter's Epistles, to Paul's Epistles, to Hebrews, to John's Epistles, to see how under the tutelage of the Holy Spirit the disciples grew into the fulness of the knowledge of God in the face of Christ (2Co 6:4 ).

John 16:15
 and will reveal to the disciples what they need to know further concerning him. They had failed so far to understand Christ's words about his death and resurrection. The Holy Spirit as Guide and Teacher will teach them what they can only receive and understand after the resurrection and ascension of Jesus.

John 16:16
A little while ( $\mu$ кк $\rho \circ v$ ). The brief period now till Christ's death as in 7:33; 13:33; 14:19

Again a little while ( $\pi \alpha \lambda \iota \nu \mu \kappa \rho \circ \nu)$. The period between the death and the resurrection of Jesus (from Friday afternoon till Sunday morning).

Ye shall see me $(o \psi \varepsilon \sigma \theta \varepsilon \mu \varepsilon)$. Future middle of o $\quad$ 拉 $\mu \alpha$, the verb used in 1:51; 16:22 as here of spiritual realities (Bernard), though $\theta \varepsilon \omega \rho \varepsilon \omega$ is so used in 20:14.

John 16:17
Some of the disciples ( $\varepsilon \kappa \tau \omega \nu \mu \alpha \theta \eta \tau \omega \nu \alpha v \tau o v$ ). Ellipsis of time (some) before $\varepsilon \kappa$ as in 7:40. Jesus seemed to contradict himself, for the disciples took both verbs in the same sense and were still puzzled over the going to the Father of 14:3. But they talk to one another, not to Jesus.

John 16:18
We know not what he saith (ovk oı $\delta \alpha \mu \varepsilon \nu \tau \lambda \alpha \lambda \varepsilon$ ). The questions to Jesus cease and the disciples frankly confess to each other their own ignorance.

John 16:19
Jesus perceived ( $\varepsilon \gamma \nu \omega$ In $\sigma o v \varsigma$ ). Second aorist active indicative of $\gamma \iota v \omega \sigma \kappa \omega$.
That they were desirous to ask him (o $\eta \theta \varepsilon \lambda o v a v \tau o v \varepsilon \rho \omega \tau \alpha \sim v$ ). Imperfect active tense of $\theta \varepsilon \lambda \omega$ in indirect discourse instead of the retention of the present $\theta \varepsilon \lambda o v \sigma \iota v$ (the usual idiom), just like our English. Their embarrassment was manifest after four inquiries already (Peter, Thomas, Philip, Judas). So Jesus takes the initiative.

John 16:20
Ye shall weep and lament ( $\kappa \lambda \alpha \nu \sigma \varepsilon \tau \varepsilon \kappa \alpha \theta \rho \eta \nu \eta \sigma \varepsilon \tau \varepsilon)$. Future active of $\kappa \lambda \alpha \iota \omega$ and $\theta \rho \eta \nu \varepsilon \omega$, both old words (for $\kappa \lambda \alpha \iota \omega$ see Joh 11:31, for $\theta \rho \eta \nu \varepsilon \omega$ see Mt 11:17 ), both words used of the loud lamentations so common in the east.

Shall rejoice ( $\chi \alpha \rho \eta \sigma \varepsilon \tau \alpha$ ). Second future passive of $\chi \propto \iota \rho \omega$ in violent contrast. Picture the women on the way to the Cross ( $\operatorname{Lu} 23: 27$, єколто⿱宀то ка $\varepsilon \theta \rho \eta$ ) imperfects) and Mary Magdalene by the tomb (Joh 20:11 , к $\lambda$ aıov $\alpha$ ).

Ye shall be sorrowful ( $\lambda \cup \pi \eta \theta \eta \sigma \varepsilon \sigma \theta \varepsilon$ ). First future passive of $\lambda \cup \pi \varepsilon \omega$, word for inward grief. See the change from sorrow to joy in 20:14-16 when "they disbelieved for joy" (Lu 24:41 ). So violent was the reaction on the sudden appearance of Jesus.

John 16:21
A woman ( $\eta \gamma \cup v \eta)$. "The woman," any woman.
When she is in travail (o $\tau \alpha v \tau \iota \kappa \tau \eta$ ). Indefinite temporal clause, "whenever she is about to bear (or give birth)," o $\tau \alpha v$ and present active subjunctive of $\tau \kappa \kappa \tau \omega$, common O.T. image for pain.

Her hour is come ( $\eta \lambda \theta \varepsilon v \eta \omega \rho \alpha \alpha v \tau \eta \varsigma)$. Second aorist active indicative, timeless aorist, "her hour" for giving birth which she knows is like a living death.

But when she is delivered of the child (o $о \alpha v \delta \varepsilon \gamma \varepsilon v v \eta \sigma \eta$ тo $\pi \alpha \iota \delta \iota v)$ ). Indefinite temporal clause with otav and first aorist active subjunctive of $\gamma \varepsilon v v a \omega$. "But whenever she bears the child."

The anguish ( $\tau \eta \varsigma \theta \lambda \iota \psi \varepsilon \omega \varsigma$ ). Genitive case after $\mu \nu \eta \mu \circ v \varepsilon v \varepsilon$ of $\theta \lambda ı \psi \iota \varsigma$, usual word for tribulation (Mt 13:21).

Is born $(\varepsilon \gamma \varepsilon v v \eta \theta \eta)$. First aorist (effective) passive indicative of $\gamma \varepsilon v v a \omega$.
John 16:22
And ye therefore now ( $\kappa \alpha \nu \mu \varepsilon \iota \varsigma) \quad \nu \nu v v v$ ). See 8:38 for like emphasis on
ye (v $\nu \varepsilon \iota \varsigma)$. The "sorrow" ( $\lambda \nu \pi \eta v$ ) is like that of the mother in childbirth (real, but fleeting, with permanent joy following). The metaphor points, of course, to the resurrection of Jesus which did change the grief of the disciples to gladness, once they are convinced that Jesus has risen from the dead.

But I will see you again ( $\pi \alpha \lambda \iota v \delta \varepsilon$ о $\%$ о $\mu \alpha \nu \mu \varsigma)$ ). Future middle of opa $\omega$, to see. In verses 16,19 Jesus had said "ye shall see me" (очєбӨع $\mu \varepsilon$ ), but here we have one more blessed promise, "I shall see you," showing "that we are the objects of God's regard" (Westcott).

Shall rejoice ( $\chi \alpha \rho \eta \sigma \varepsilon \tau \alpha$ ). Second future passive of $\chi \alpha \iota \rho \omega$.
Taketh away ( $\alpha \rho \varepsilon$ ). Present active indicative, futuristic present, but B D have $\alpha \rho \varepsilon$ the future active (shall take away). This joy is a permanent possession.

John 16:23
Ye shall ask me nothing ( $\varepsilon \mu \varepsilon$ оик $\varepsilon \rho \omega \tau \eta \sigma \varepsilon \tau \varepsilon$ ). Either in the sense of question (original meaning of $\varepsilon \rho \omega \tau \alpha \omega)$ as in verses 19,30 since he will be gone or in the sense of request or favours (like aıt $\varepsilon \omega$ in this verse) as in 14:16; Ac 3:2. In verse 26 both aıt $\varepsilon \omega$ and $\varepsilon \rho \omega \tau \alpha \omega$ occur in this sense. Either view makes sense here.

If ye shall ask ( $\alpha \nu \tau \alpha u \tau \eta \tau \tau \varepsilon$ ). Third-class condition, $\alpha \nu$ like $\varepsilon \alpha \nu$ with first aorist active subjunctive of aıt $\varepsilon \omega$. Note 14:26 for "in my name."

## John 16:24

Hitherto ( $\varepsilon \omega \varsigma \alpha \rho \tau)$. Up till now the disciples had not used Christ's name in prayer to the Father, but after the resurrection of Jesus they are to do so, a distinct plea for parity with the Father and for worship like the Father.

May be fulfilled ( $\eta \pi \varepsilon \pi \lambda \eta \rho \omega \mu \varepsilon v \eta$ ). Periphrastic perfect passive subjunctive of $\pi \lambda \eta \rho o \omega$ in a purpose clause with $\tau v a$. See 15:11 for some verb (first aorist passive subjunctive with $i v \alpha)$ and 1 Jo 1:4 for same form as here, emphasizing the abiding permanence of the joy.

John 16:25
In proverbs ( $\varepsilon v \pi \alpha \rho о \not \mu \alpha ı \varsigma)$. See on 10:6 for this word.
Shall tell ( $\alpha \pi \alpha \gamma \gamma \varepsilon \lambda \omega$ ). Future active of $\alpha \pi \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$, to report, correct text and not $\alpha v a \gamma \gamma \varepsilon \lambda \omega$ (verses 13,14, 15 ), as in 1Jo 1:2f.

Plainly ( $\pi \alpha \rho \rho \eta \sigma \omega$ ). See on 7:13 for this word.
John 16:26
I say not (ou $\lambda \varepsilon \gamma \omega$ ). "I speak not." Christ did pray for the disciples before his death (Joh 14:16; 17:9,15,24 ) and he prays also for sinners (Lu 23:34; 1Jo 2:1). Here it is the special love of God for disciples of Jesus (Joh 14:21,23; 17:23; 1Jo 4:19). Note aıt $\varepsilon \omega$ and $\varepsilon \rho \omega \tau \alpha \omega$ used in practically the same sense as in verse 23 .

John 16:27
Loveth ( $\varphi \backslash \lambda \varepsilon$ ). Present active indicative of $\varphi \backslash \lambda \varepsilon \omega$, the word for warm and friendly love, here used of God's love for the disciples, while in 3:16 a $\gamma \alpha \pi \alpha \omega$ occurs of God's love for the world.

Ye have loved me ( $\pi \varepsilon \varphi i \lambda \eta \kappa \alpha \tau \varepsilon)$. Perfect active indicative of $\varphi \backslash \lambda \varepsilon \omega$, "loved and still love me warmly."

And have believed ( $\pi \varepsilon \pi\llcorner\sigma \tau \varepsilon \cup \kappa \alpha \tau \varepsilon)$. Perfect active indicative again. Recall the exhortation in 14:1.

John 16:28
I came out from the Father ( $\varepsilon \xi \eta \lambda \theta$ ov $\varepsilon \kappa$ tov $\pi \alpha \tau \rho \circ \varsigma)$. Definite act (aorist), the Incarnation, with repetition of $\varepsilon \kappa$ (out of), while in verse 27 we have $\pi \alpha \rho \alpha$ tov $\pi \alpha \tau \rho \circ \varsigma \varepsilon \xi \eta \lambda \theta o v$ ) with no practical distinction between $\varepsilon \kappa$ and $\pi \alpha \rho \alpha$ in resultant idea.

Am come ( $\varepsilon \lambda \eta \lambda \nu \theta \alpha$ ). Perfect active indicative of $\varepsilon \rho \chi \circ \mu \alpha$, as in 18:37. The Incarnation is now a permanent fact, once only a blessed hope ( 11:27). His leaving the world and going to the Father does not set aside the fact of the Incarnation. Both $\alpha \varphi \imath \eta \mu$ (Ileave) and порعvo $\mu \alpha$ (I go) are futuristic present indicatives.

John 16:29
No proverb ( $\pi \alpha \rho о \not \mu \mu \alpha v$ ov $\delta \varepsilon \mu \iota \alpha v$ ). No wayside saying, no dark saying. See 10:6; 16:25

John 16:30

Now know we ( $v v v$ ot $\delta a \mu \varepsilon v$ ). They had failed to understand the plain words of Jesus about going to the Father heretofore ( $16: 5$ ), but Jesus read their very thoughts (16:19f. ) and this fact seemed to open their minds to grasp his idea.

Should ask ( $\varepsilon \rho \omega \tau \alpha$ ). Present active subjunctive with $v \alpha \alpha$ in original sense of asking a question.

By this ( $\varepsilon \nu \tau 0 v \tau \omega)$. In Christ's supernatural insight into their very hearts.
From God ( $\alpha \pi \circ$ $\theta \varepsilon o v$ ). Compare $\pi \alpha \rho \alpha$ тov $\pi \alpha \tau \rho \circ \varsigma$ (verse 27) and $\varepsilon \kappa$ тov $\pi \alpha \tau \rho \circ \varsigma$ (verse 28), $\alpha \pi \sigma, \varepsilon \kappa, \pi \alpha \rho \alpha$ all with the ablative of source or origin.

John 16:31
Do ye now believe? (apt пıбтєuعtє;). For $\alpha \rho \tau$ (just now) see 9:19; 13:33,37. Their belief in Christ was genuine as far as it went, but perils await them of which they are ignorant. They are too self-confident as their despair at Christ's death shows.

John 16:32
Cometh ( $\varepsilon \rho \chi \varepsilon \tau \alpha$ ). Futuristic present middle indicative of $\varepsilon \rho \chi \circ \mu \alpha$.
Yea, is come ( $\kappa \alpha \varepsilon \lambda \eta \lambda v \theta \varepsilon v$ ). Explanatory use of $\kappa \alpha$ and the perfect active indicative as in 12:23. The long-looked-for hour ( $\omega \rho \alpha$ ) is so close that it has virtually begun. The time for the arrest of Jesus is near. See also 17:1.

Ye shall be scattered ( $\sigma \kappa о \rho \pi \iota \sigma \emptyset \eta \tau \varepsilon$ ). First aorist passive subjunctive of $\sigma \kappa о \rho \pi \iota \zeta \omega$, used in 10:12 of sheep scampering from the wolf. Cf. Mt 12:30; Lu 11:33.

To his own ( $\varepsilon \iota \varsigma \tau \alpha \iota \delta \iota \alpha$ ). "To his own home" as in 1:11; 19:27. So Appian VI. 23.
Shall leave ( $\alpha \varphi \eta \tau \varepsilon$ ). Second aorist subjunctive of $\alpha \varphi \imath \eta \mu$ with $\imath v \alpha$.
And yet ( $\kappa \alpha$ ). Clear case of $\kappa \alpha$ in adversative sense, not just "and."
John 16:33
That in me ye may have peace ( $\imath v \alpha \varepsilon v \varepsilon \mu \circ \varepsilon \mid \rho \eta \nu \eta v \varepsilon \chi \eta \tau \varepsilon$ ). Present active subjunctive of $\varepsilon \chi \omega$, "that ye may keep on having peace in me," even when I am put to death, peace to be found nowhere save in me (14:27).

Be of good cheer ( $\theta a \rho \sigma \varepsilon \iota \tau \varepsilon$ ). Imperative active from $\theta a \rho \sigma o \varsigma$, courage (Ac 28:15). A word for courage in the face of danger, only here in John, but see Mt 9:2,22; Mr 10:49.

I have overcome the world ( $\varepsilon \gamma \omega$, vevıкךка $\operatorname{\tau ov}$ коб $\mu \circ v$ ). Perfect active indicative of $\nu$ vka $\omega$, to be victorious, to conquer. Always of spiritual victory in the N.T. See 1Jo 5:4f. This majestic proclamation of victory over death may be compared with $\tau \varepsilon \tau \varepsilon \lambda \varepsilon \sigma \tau \alpha$ ( It is finished ) in Joh 19:30 as Christ died and with Paul's v $\tau \varepsilon \rho v ı \kappa \omega \mu \varepsilon v$ (we are more than conquerors) in Ro 8:37.

## John 17

John 17:1
Lifting up ( $\varepsilon \pi \alpha \rho \alpha \varsigma)$. First aorist active participle of $\varepsilon \pi \alpha \iota \rho \omega$, old and common verb with o $\varphi \theta \alpha \lambda \mu$ ovs (eyes) as in 4:35; 6:5; 11:41 .

Father (Пate ). Vocative form as in verses 5,11; 11:41, Christ's usual way of beginning his prayers. It is inconceivable that this real Lord's Prayer is the free composition of a disciple put into the mouth of Jesus. It is rather "the tenacious memory of an old man recalling the greatest days of his life" (Bernard), aided by the Holy Spirit promised for this very purpose (Joh 14:26; 16:13f. ). Jesus had the habit of prayer (Mr 1:35; 6:46; Mt 11:25f.; Lu 3:21; 5:16; $6: 12 ; 9: 18,28 ; 11: 22,42 ; 23: 34,46$; Joh $11: 41 ; 12: 27$ ). He prayed here for himself ( $1-5$ ), for the disciples (6-19), for all believers (20-26). The prayer is similar in spirit to the Model Prayer for us in Mt 6:9-13. The hour for his glorification has come as he had already told the disciples (13:31f.; 12:23 ).

Glorify thy Son ( $\delta o \xi \alpha \sigma 0 v \sigma o v ~ \tau o v v o v)$. First aorist active imperative of $\delta o \xi \alpha \zeta \omega$, the only personal petition in this prayer. Jesus had already used this word $\delta_{0} \xi \alpha \zeta \omega$ for his death (13:31f. ). Here it carries us into the very depths of Christ's own consciousness. It is not merely for strength to meet the Cross, but for the power to glorify the Father by his death and resurrection and ascension, "that the Son may glorify thee" (ı $\alpha$ o vıs $\delta о \xi \alpha \sigma \eta \sigma \varepsilon$ ). Purpose clause with $t v a$ and the first aorist active subjunctive.

## John 17:2

Authority over all flesh ( $\varepsilon \xi$ оvoıav $\pi \alpha \sigma \eta \varsigma \sigma \alpha \rho \kappa о \varsigma) . \Sigma \alpha \rho \kappa о \varsigma$ is objective genitive. Stupendous claim impossible for a mere man to make. Made already in Mt 11:27; Lu 10:22 (Q, the Logia of Jesus, our earliest known document about Jesus) and repeated in Mt 28:18 after his resurrection.

That ( $\imath v \alpha$ ). Secondary purpose with $\imath v \alpha \delta \omega \sigma \varepsilon$ (future active indicative) carrying on the idea of $\imath v \alpha \delta o \xi \alpha \sigma \eta$. See 13:34; 17:21 for $\imath v \alpha, \kappa \alpha \theta \omega \sigma, ~ \imath v \alpha$.

Whatsoever ( $\pi \alpha \vee 0$ ). A peculiar classical Greek idiom, the collective use of the singular $\pi \alpha v o$ as in 6:37,39 and o in 17:24 and the nominative absolute (nom. pendens) with avtors (to them), the dative plural explaining the construction. See Robertson, Grammar, p. 653.

John 17:3
Should know ( $\gamma \iota v \omega \sigma \kappa \omega \sigma \iota v$ ). Present active subjunctive with $\iota v a$ (subject clause), "should keep on knowing."

Even Jesus Christ (Iף oovv X $\rho \stackrel{\tau \tau}{ }$ ). See 1:17 for the only other place in John's Gospel where the words occur together. Coming here in the Lord's own prayer about himself they create difficulty, unless, as Westcott suggests, X $\rho \iota \sigma \tau 0 v$ be regarded as a predicate accusative, "Jesus as the Christ" (Messiah). Otherwise the words would seem to be John's parenthetical interpretation of the idea of Jesus. Lucke thinks that the solemnity of this occasion explains

Jesus referring to himself in the third person. The knowledge of "the only true God" is through Jesus Christ ( 14:6-9).

John 17:4
I glorified thee on the earth ( $\varepsilon \gamma \omega \sigma \varepsilon \varepsilon \delta o \xi \alpha \sigma \alpha \varepsilon \pi \tau \eta \varsigma \gamma \eta \varsigma)$. Verse 3 is parenthetical and so verse 4 goes on after verse 2 . He had prayed for further glorification.

Having accomplished ( $\tau \varepsilon \lambda \varepsilon เ \omega \sigma \alpha \varsigma)$. First aorist active participle of $\tau \varepsilon \lambda \varepsilon \iota o \omega$, old verb from $\tau \varepsilon \lambda \varepsilon ו \circ \varsigma$ (perfect). Used in $4: 34$ by Jesus with to $\varepsilon \rho \gamma o v$ as here. That was Christ's "food" ( $\beta \rho \omega \mu \alpha)$ and joy. Now as he faces death he has no sense of failure as some modern critics say, but rather fulness of attainment as in 19:30 ( $\tau \varepsilon \tau \varepsilon \lambda \varepsilon \sigma \tau \alpha)$. Christ does not die as a disappointed man, but as the successful messenger, apostle ( $\alpha \pi \varepsilon \sigma \tau \varepsilon 1 \lambda \alpha \varsigma$, verse 3 ) of the Father to men.

Thou hast given ( $\delta \varepsilon \delta \omega \kappa \alpha \varsigma)$. Perfect active indicative of $\delta \iota \delta \omega \mu$, regarded as a permanent task.

John 17:5
With thine own self ( $\pi \alpha \rho \alpha \sigma \varepsilon \alpha \nu \tau \omega$ ). "By the side of thyself." Jesus prays for full restoration to the pre-incarnate glory and fellowship (cf. 1:1) enjoyed before the Incarnation (Joh 1:14 ). This is not just ideal pre-existence, but actual and conscious existence at the Father's side ( $\pi \alpha \rho \alpha \sigma 0$, with thee) "which I had" ( $\eta \varepsilon \chi \chi \circ v$, imperfect active of $\varepsilon \chi \omega$, I used to have, with attraction of case of $\eta \nu$ to $\eta$ because of $\delta o \xi \eta$ ), "before the world was" ( $\pi \rho o$ tov tov $\kappa 0 \sigma \mu \circ v \varepsilon เ v a$ ), "before the being as to the world" (cf. verse 24). It is small wonder that those who deny or reject the deity of Jesus Christ have trouble with the Johannine authorship of this book and with the genuineness of these words. But even Harnack admits that the words here and in verse 24 are "undoubtedly the reflection of the certainty with which Jesus himself spoke" (What Is Christianity, Engl. Tr., p. 132). But Paul, as clearly as John, believes in the actual pre-existence and deity of Jesus Christ (Php 2:5-11 ).

John 17:6
I manifested ( $\varepsilon \varphi \alpha v \varepsilon \rho \omega \sigma \alpha$ ). First aorist active indicative of $\varphi \alpha v \varepsilon \rho \circ \omega$ (from $\varphi \alpha v \varepsilon \rho \circ \varsigma$, manifest). Another word for claiming successful accomplishment of his task as in verse 4 with $\varepsilon \delta \circ \xi \alpha \sigma \alpha$ and in verse 26 with $\varepsilon \gamma v \omega \rho \circ \sigma \alpha$.

Whom (ovc). Accusative case after $\varepsilon \delta \omega \kappa \alpha \varsigma$, not attracted to case of antecedent ( $\alpha v \theta \rho \omega \pi$ тья). Jesus regards the apostles as the Father's gift to him. Recall the night of prayer before he chose them.

They have kept ( $\tau \varepsilon \tau \eta \rho \eta \kappa \alpha v$ ). Perfect active indicative, late Koine form for the third plural instead of the usual $\tau \varepsilon \tau \eta \rho \eta \kappa \alpha \sigma \iota v$. Jesus claims loyalty and fidelity in these men with the one exception of Judas (verse 12). He does not claim perfection for them, but they have at least held on to the message of the Father in spite of doubt and wavering (6:67-71; Mt 16:15-20 ).

John 17:7

Now they know ( $v v v \varepsilon \gamma v \omega \kappa \alpha v$ ). Perfect active indicative third plural like $\tau \varepsilon \tau \eta \rho \eta \kappa \alpha v$ above. They have come to know, not as fully as they felt ( $16: 30$ ), and yet in a real sense.

John 17:8
The words ( $\tau \alpha \rho \eta \mu \alpha \tau \alpha$ ). Plural, each word of God, as in $3: 34$, and of Christ (5:47; 6:63,68 ), while the singular ( $\tau \circ \boldsymbol{\lambda} \lambda o \gamma o v \sigma o v$ ) in verses 6,14 views God's message as a whole.

Knew ( $\varepsilon \gamma \nu \omega \sigma \alpha \nu$ ). Second aorist active indicative of $\gamma \iota \nu \omega \sigma \kappa \omega$ like $\varepsilon \lambda \alpha \beta o v$ in contrast with $\varepsilon \gamma v \omega \kappa \alpha v$ (perfect) in verse 7 . They definitely "received and recognized truly" ( $\alpha \lambda \eta \theta \omega \varsigma$ ). There was comfort to Christ in this fact.

They believed ( $\varepsilon \pi \iota \sigma \tau \varepsilon v \sigma \alpha v$ ). Another aorist parallel with $\varepsilon \lambda \alpha \beta o v$ and $\varepsilon \gamma v \omega \sigma \alpha v$. The disciples believed in Christ's mission from the Father (Joh 6:69; Mt 16:16). Note $\alpha \pi \varepsilon \sigma \tau \varepsilon ו \lambda a \varsigma$, here as in verse 3. Christ is God's

Apostle to man (Heb 3:1). This statement, like a solemn refrain ( $\Theta o v \delta \iota \delta \sigma \tau \sigma \varepsilon v \delta \mu \varepsilon$ ), occurs five times in this prayer (verses 8,18,21,23,25).

John 17:9
I pray ( $\varepsilon \gamma \omega \varepsilon \rho \omega \tau \omega$ ). Request, not question, as in 16:23.
Not for the world (ov $\pi \varepsilon \rho$ tov $\kappa \circ \sigma \mu \circ v$ ). Now at this point in the prayer Christ means. In verse 19 Jesus does pray for the world (for future believers) that it may believe (verse 21). God loves the whole world ( 3:16). Christ died for sinners (Ro 5:8) and prayed for sinners (Lu 23:34) and intercedes for sinners (1Jo 2:1f.; Ro 8:34; Heb 7:25 ).

For those whom ( $\pi \varepsilon \rho \omega v$ ). A condensed and common Greek idiom for $\pi \varepsilon \rho \tau 0 \cup \tau \omega v$ ouc with $\tau 0 u \tau \omega v$ (the demonstrative antecedent) omitted and the relative ouc attracted from the accusative ovc (object of $\delta \varepsilon \delta \omega \kappa \alpha \varsigma$ ) to the case (genitive) of the omitted antecedent.

John 17:10
Are ( $\varepsilon \sigma \tau \iota v$ ). Singular number in the Greek (is), not the plural $\varepsilon เ \sigma \iota v$ (are), emphasizing the unity of the whole as in 16:15. "This no creature can say in reference to God" (Luther).

I am glorified in them ( $\delta \varepsilon \delta o \xi \alpha \sigma \mu \alpha \varepsilon v$ avtoıऽ). "I stand glorified (perfect passive indicative of $\delta$ o $\xi \alpha \zeta \omega$ ) in the disciples" ( $\varepsilon v \alpha v \tau o เ \varsigma)$, in spite of all their shortcomings and failings. There is comfort for us in this.

John 17:11
And these (ка оито or avто, they). Note adversative use of $\kappa \alpha$ (= but these).
I come ( $\varepsilon \rho \varepsilon \circ \mu \alpha)$. Futuristic present, "I am coming." Cf. 13:3; 14:12; 17:13 . Christ will no longer be visibly present to the world, but he will be with the believers through the Holy Spirit (Mt 28:20).

Holy Father ( $\pi \alpha \tau \varepsilon \rho \alpha \nmid \varepsilon$ ). Only here in the N.T., but see 1Jo 2:20; Lu 1:49 for the holiness of God, a thoroughly Jewish conception. See Joh 6:69 where Peter calls Jesus o aүtoc tou $\theta \varepsilon o v$. For the word applied to saints see Ac 9:13. See verse 25 for $\pi \alpha \tau \eta \rho \delta$ ıкаıє (Righteous Father).

Keep them ( $\tau \eta \rho \eta \sigma o v a v \tau o u \varsigma)$. First aorist (constative) active imperative of $\tau \eta \rho \varepsilon \omega$, as now specially needing the Father's care with Jesus gone (urgency of the aorist tense in prayer).

Which $(\omega)$. Locative case of the neuter relative singular, attracted from the accusative $o$ to the case of the antecedent ovouat (name).

That they may be one ( $\imath \alpha \omega \sigma \tau v v$ ). Purpose clause with $v \alpha$ and the present active subjunctive of $\varepsilon \mu$ (that they may keep on being). Oneness of will and spirit ( $\varepsilon v$, neuter singular), not one person ( (ع๒, masculine singular) for which Christ does not pray. Each time Jesus uses $\varepsilon v$ (verses 11,21,22) and once, $\varepsilon \varsigma \varsigma v$, "into one" (verse 23). This is Christ's prayer for all believers, for unity, not for organic union of which we hear so much. The disciples had union, but lacked unity or oneness of spirit as was shown this very evening at the supper ( Lu 22:24; Joh 13:4-15 ). Jesus offers the unity in the Trinity (three persons, but one God) as the model for believers. The witness of the disciples will fail without harmony ( 17:21).

John 17:12
I kept ( $\varepsilon \tau \eta \rho o u v$ ). Imperfect active of $\tau \eta \rho \varepsilon \omega$, "I continued to keep."
I guarded ( $\varepsilon \varphi \cup \lambda \alpha \xi \alpha)$. First aorist (constative) active of $\varphi \cup \lambda \alpha \sigma \sigma \omega$. Christ was the sentinel ( $\varphi \cup \lambda \alpha \xi$, Ac 5:23 ) for them. Is he our sentinel now?

But the son of perdition ( $\varepsilon \mu \eta$ o vioc $\tau \eta \varsigma \alpha \pi \omega \lambda \varepsilon i \alpha \varsigma$ ). The very phrase for antichrist (2Th 2:3). Note play on $\alpha \pi \omega \lambda \varepsilon \tau 0$, perished (second aorist middle indicative of $\alpha \pi \sigma \lambda \lambda \nu \mu$ ). It means the son marked by final loss, not annihilation, but meeting one's destiny (Ac 2:25 ). A sad and terrible exception (Mr 14:21).

The scripture ( $\eta \gamma \rho \alpha \varphi \eta$ ). It is not clear whether this is John's own comment or the word of Jesus. Not in 18:9. The Scripture referred to is probably Ps $41: 9$ quoted in 13:18 with the same formula $v a \pi \lambda \eta \rho \omega \theta \eta$ which see there.

John 17:13
That they may have my joy fulfilled in themselves ( $1 v \alpha \varepsilon \chi \omega \sigma \tau \nu \tau \eta \nu \alpha \rho \alpha \nu \tau \eta \nu \varepsilon \mu \eta v$ $\pi \varepsilon \pi \lambda \eta \rho \omega \mu \varepsilon v \eta \nu \varepsilon v \varepsilon \alpha \cup \tau o เ c)$. Purpose clause with present active subjunctive of $\varepsilon \chi \omega$, "that they may keep on having Christ's joy in their faithfulness realized in themselves." Пع $\pi \lambda \eta \rho \omega \mu \varepsilon \nu \eta \nu$ is the perfect passive participle of $\pi \lambda \eta \rho o \omega$ in the predicate position. For the use of $\pi \lambda \eta \rho o \omega$ with $\chi \alpha \rho \alpha$ (joy) see 15:11; 16:24; Php 2:2 .

John 17:14
Not of the world (оик $\varepsilon \kappa$ тоv коб $\mu \circ v$ ). They are "in the world" ( $\varepsilon v \tau \omega$ коб $\mu \omega$, verse 13)
 be like the world nor get their spirit, standards, and message "out of the world," else they can do the world no good. These verses (14-19) picture the Master's ideal for believers and go far towards explaining the failure of Christians in winning the world to Christ. Too often the world fails to see the difference or the gain by the change.

John 17:15

Shouldest take ( $\alpha \rho \eta \stackrel{)}{ }$ ). First aorist active subjunctive of alp $\omega$ (liquid verb).
From the evil one ( $\varepsilon \kappa$ tov поvŋрои). Ablative case with $\varepsilon \kappa$, but can mean the evil man, Satan, or the evil deed. See same ambiguity in Mt 6:13. But in 1Jo 5:18 o тovnpos is masculine (the evil one). Cf. Re 3:10 .

John 17:16
Repetition of verse 14 for emphasis.
John 17:17
Sanctify ( $\alpha \gamma \iota \alpha \sigma o v$ ). First aorist active imperative of $\alpha \gamma ı \alpha \zeta \omega$. To consecrate or set apart persons or things to God. See Ex 28:41; 29:1,36; 40:13. See Paul's prayer for the Thessalonians (1Th 5:23 ). This is done in the sphere ( $\varepsilon v$ ) of truth (God's truth), God's Word (not human speculation, but God's message to us).

John 17:18
Sent I them ( $\alpha \pi \varepsilon \sigma \tau \varepsilon 1 \lambda \alpha$ autouc). The very verb ( $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$ ) used of the original commission of these men (Mr 3:14) and the special commission (Lu 9:2) and the renewal of the commission after the resurrection (Joh 20:21f. , both $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$ and $\pi \varepsilon \mu \pi \omega$ here).

John 17:19
I sanctify myself ( $\varepsilon \gamma \omega \alpha \gamma ı \omega \zeta \omega \varepsilon \mu \alpha \cup \tau o v)$. To his holy ministry to which the Father "sanctified" ( $\eta \gamma \iota a \sigma \varepsilon v$ ) him (Joh 10:36 ).

That they themselves also may be sanctified in truth (ıva $\omega \sigma \iota v$ ка $\alpha \nu \tau о ~ \eta \gamma ı \sigma \sigma \mu \varepsilon v o ~ \varepsilon v$ $\alpha \lambda \eta \theta \varepsilon \iota \alpha)$. Purpose clause with $\imath v \alpha$ and the periphrastic perfect passive subjunctive of $\alpha \gamma \iota \omega \zeta \omega$ (that they may remain sanctified). The act of Christ helps us, but by no means takes the place of personal consecration on the part of the believer. This high and holy prayer and act of Christ should shame any one who uses the livery of heaven to serve the devil in as does, alas, sometimes happen (2Co 11:13-15).

John 17:20
Through their word ( $\delta \iota \alpha$ $\tau 0 v \lambda o \gamma o v ~ a v \tau \omega v$ ). Through the agency of conversation and preaching, blessed privilege open to all believers thus to win men to Christ, but an agency sadly limited by the lives of those who speak in Christ's name.

John 17:21
That they also may be in us (ıva ка аvтo $\varepsilon v \eta \mu i v \omega \sigma \tau v$ ). Another purpose clause with iva and the present active subjunctive of $\varepsilon \mu$. The only possible way to have unity among believers is for all of them to find unity first with God in Christ.
 and the present active subjunctive of $\pi \iota \sigma \tau \varepsilon \nu \omega$, "may keep on believing." Beyond a doubt, strife, wrangling, division are a stumblingblock to the outside world.

John 17:22
And the glory ( $\kappa \alpha \gamma \omega \tau \eta v \delta o \xi \alpha v$ ). Literally, "And I the glory," with emphasis on "I." It is the glory of the Incarnate Word (Bernard), cf. 1:14; 2:11, not the glory of the Eternal

Word mentioned in 17:24. Bengel says: Quanta majestas Christianorum! Then verse 22 repeats the unity prayed for in verse 21.

John 17:23
That they may be perfected into one (ıva $\omega \sigma \iota v \tau \varepsilon \tau \varepsilon \lambda \varepsilon เ \omega \mu \varepsilon v o \varepsilon \varepsilon \varsigma \varepsilon v$ ). Purpose clause again with $v \mathcal{v}$ (nineteen times in this prayer, this the fifteenth) with the periphrastic perfect passive subjunctive of $\tau \varepsilon \lambda \varepsilon เ \circ \omega$ (verse 4), permanent state, with $\varepsilon ı \varsigma \varepsilon \nu$ (into one) as the goal and final result.

That the world may know ( $เ v \alpha \gamma เ v \omega \sigma \kappa \eta$ ). Present active subjunctive of $\gamma \iota v \omega \sigma \kappa \omega$ with ıva like the present tense of $\pi\llcorner\sigma \tau \varepsilon v \omega$ in verse 21 , "that the world may keep on knowing" with the same pregnant phrase "that thou me didst send" (oт $\sigma \nu \mu \varepsilon \alpha \pi \varepsilon \sigma \tau \varepsilon ו \lambda \alpha \varsigma)$ as in 8,25.
 Christ (Joh 3:16) and illustrated and proven by the way Christians love one another.

John 17:24
I will $(\theta \varepsilon \lambda \omega)$. Perfect identity of his will with that of the Father in "this moment of spiritual exaltation" (Bernard), though in Gethsemane Jesus distinguishes between his human will and that of the Father (Mr 14:36).

Where I am (oпоv $\varepsilon \mu \varepsilon \gamma \omega$ ). That is heaven, to be with Jesus (12:26; 13:36; 14:3; Ro 8:17; 2Ti 2:11f. ).

That they may behold (iva $\theta \varepsilon \omega \rho \omega \sigma \iota v$ ). Another purpose clause with iva and the present active subjunctive of $\theta \varepsilon \omega \rho \varepsilon \omega$, "that they may keep on beholding," the endless joy of seeing Jesus "as he is" (1Jo 3:2) in heaven.
 Eph 1:4; 1Pe 1:20 and six other times we have катаßодך кобноv (Mt 25:34; Lu 11:50; Heb 4:3; 9:26; Re 13:8; 17:8 ). Here we find the same pre-incarnate consciousness of Christ seen in 17:5.

John 17:25
O righteous Father (Патๆр $\delta$ เкаı६). Nominative form with $\pi \alpha \tau \eta \rho$ used as vocative (cf. Joh 20:28 ), but vocative form $\delta$ ıкaıя. Then the righteousness of God is appealed to like God's holiness in verse 11.

The world (ка о кобноя). The translations usually slur over the ка as untranslatable in English. Westcott suggests "while" as a sort of correlative. It is quite possible that here ка is almost concessive like "though" and $\delta \varepsilon=y$ et: "though the world did not know thee, yet I knew thee, and these knew thee." See Robertson, Grammar, p. 1182 for $\kappa \alpha l--\delta \varepsilon-$-ка and various other uses of ka in John's Gospel.

John 17:26
And will make it known ( $\kappa \alpha \gamma \nu \omega \rho \iota \sigma \omega$ ). Future active of $\gamma \nu \omega \rho \iota(\omega$, the perpetual mission of Christ through the Spirit ( $16: 12,25$; Mt 28:20) as he himself has done heretofore ( $17: 6$ ).

Wherewith ( $\varepsilon v$ ). Cognate accusative relative with $\eta \gamma \alpha \pi \eta \sigma \alpha \varsigma$ which has also the accusative of the person $\mu \varepsilon$ (me).

## John 18

John 18:1
With ( $\sigma v v$ ). See 12:2 for another example of $\sigma v v$ in John (common in Paul). The usual $\mu \varepsilon \tau \alpha$ reappears in verse 2.

Over ( $\pi \varepsilon \rho \alpha v$ ). "Beyond," preposition with the ablative as in 6:22,25 .
Brook ( $\chi \varepsilon \mu \alpha \rho \rho o v$ ). Old word, flowing ( $\rho \circ o \sigma, \rho \varepsilon \omega$ ) in winter ( $\chi \varepsilon \mu \alpha$ ), only here in N.T.
Kidron ( $\tau 0 \nu \mathrm{~K} \varepsilon \delta \rho \omega v$ ). Literally, "of the Cedars," "Brook of the Cedars." Only here in N.T. So 2Sa 15:23 . Textus Receptus like Josephus (Ant. VIII, 1, 5) has the singular tov $K \varepsilon \delta \rho \omega v$ (indeclinable). As a matter of fact it was always dry save after a heavy rain.

A garden (кплоц). Old word, in N.T. only here, verse 26; 19:41 (Joseph's); Lu 13:19. John, like Luke, does not give the name Gethsemane (only in Mr 14:32; Mt 26:36 ). The brook of the cedars had many unhallowed associations (1 Ki 2:37; 15:13; 2Ki 23:4ff.; 2Ch 29:16; Jer 31:40).

John 18:2
Resorted thither ( $\sigma u v \eta \chi \theta \eta \varepsilon \kappa \varepsilon$ ). First aorist passive indicative of $\sigma v v a \gamma \omega$, old verb to gather together. A bit awkward here till you add "with his disciples." Judas knew the place, and the habit of Jesus to come here at night for prayer ( $\mathrm{Lu} 22: 39$ ). Hence his offer to catch Jesus while the feast was going on, catch him at night and alone in his usual place of prayer (the very spirit of the devil).

John 18:3
The band of soldiers ( $\tau \eta v \sigma \pi \varepsilon \iota \rho a v$ ). No word for "of soldiers" in the Greek, but the Latin spira (roll or ball) was used for a military cohort (Polybius 11, 23, 1) as in Mt 27:27; Ac 10:1, etc., here for a small band secured from the Tower of Antonia. The Synoptics do not mention the soldiers, but only the "officers" as here (v $\eta \rho \varepsilon \tau \alpha \varsigma$ for which see Mt 26:58; Mr 14:54,65 ) or temple police from the Sanhedrin.

Cometh ( $\varepsilon \rho \chi \varepsilon \tau \alpha$ ). Dramatic historical present middle indicative.
With lanterns and torches ( $\mu \varepsilon \tau \alpha \varphi \alpha \nu \omega \nu \kappa \alpha \lambda \alpha \mu \pi \alpha \delta \omega v$ ). Both old words, $\varphi \alpha \nu \circ \varsigma$ only here in N.T., $\lambda \alpha \mu \pi \alpha \varsigma$, an oil lamp (Mt 25:1). It was full moon, but Judas took no chances for it may have been cloudy and there were dark places by the walls and under the olive trees. Meta is accompanied with
and weapons ( $\kappa \alpha$ o $\pi \lambda \omega v$ ). Mark (Mr 14:43) mentions "swords and staves." Probably the temple guard had weapons as well as the soldiers.

John 18:4
Knowing all the things that were coming upon him ( $\varepsilon \delta \delta \omega \varsigma \pi \alpha \nu \tau \alpha \tau \alpha \varepsilon \rho \chi \circ \mu \varepsilon v \alpha \varepsilon \pi^{\prime}$ $\alpha v \tau o v)$. Mentioned already in Joh 13:1. He was not taken by surprise. The surrender and death of Jesus were voluntary acts, though the guilt of Judas and the rest remains.

John 18:5

Was standing ( $\llcorner\tau \tau \kappa \varepsilon$ ). Second past perfect active of $\iota \sigma \tau \eta \mu$ used as imperfect, a vivid picture of Judas in the very act of betraying Jesus. John does not mention the kiss by Judas as a sign to the soldiers and police. Tatian suggests that it came before verse 4. Then Jesus stepped forth and affirmed that he was the one whom they were seeking.

John 18:6
Fell to the ground ( $\varepsilon \pi \varepsilon \sigma \alpha v \chi \alpha \mu \alpha)$. Second aorist active indicative of $\pi \iota \pi \tau \omega$ with first aorist ending ( $-\alpha v$ ). This recoil made them stumble. But why did they step back? Was it the former claim of Jesus ( $\mathbf{I ~ a m}, \varepsilon \gamma \omega \varepsilon \mu$ ) to be on an equality with God ( $8: 58 ; 13: 19$ ) or mere embarrassment and confusion or supernatural power exerted by Jesus? B adds I Iqoouৎ which must mean simply: "I am Jesus."

John 18:7
Again ( $\pi \alpha \lambda \iota v$ ). The repeated question receives the same answer. The soldiers and officers know who it is, but are still overawed.

John 18:8
Let these go their way ( $\alpha \varphi \varepsilon \tau \varepsilon$ toutous v $\pi \alpha \boldsymbol{\varepsilon} \downarrow$ ). Second aorist active imperative of $\alpha \varphi ı \eta \mu$. The verb vđaүءıv means to withdraw ( 11:44). Jesus shows solicitude for the eleven as he had warned them and prayed for them (Lu 22:31f. ). He is trying to help them.

John 18:9
That might be fulfilled (iva $\pi \lambda \eta \rho \omega \theta \eta$ ). The regular formula ( 17:12) for Scripture, here applied to the prophecy of Jesus (17:12) as in verse 32 . John treats the saying of Jesus as on a par with the O.T.

John 18:10
Having a sword ( $\varepsilon \chi \omega v \mu \alpha \chi \alpha \iota \rho \nu$ ). It was unlawful to carry a weapon on a feast-day, but Peter had become alarmed at Christ's words about his peril. They had two swords or knives in the possession of the eleven according to Luke ( 22:38). After the treacherous kiss of Judas (on the hand or the cheek?) the disciples asked: "Lord, shall we smite with the sword?" (Lu 22:49). Apparently before Jesus could answer Peter with his usual impulsiveness jerked out ( $\varepsilon \iota \lambda \kappa \nu \sigma \varepsilon v$, first aorist active indicative of $\varepsilon \lambda \kappa \nu \omega$ for which see $6: 44$ ) his sword and cut off the right ear of Malchus (Joh 18:10), a servant of the high priest. Peter missed the man's head as he swerved to his left. Luke also (Lu 22:50) mentions the detail of the right ear, but John alone mentions the man's name and Peter's. There was peril to Peter in his rash act as comes out later (Joh 18:26 ), but he was dead long before John wrote his Gospel as was Lazarus of whom John could also safely write (12:9-11). For $\omega \tau \alpha \rho \circ o v$, diminutive of ouc, see Mr 14:47 (only other N.T. example), another diminutive $\omega \tau$ tov in Mt 26:51 (Mr 14:47; Lu 22:51).

John 18:11
Into the sheath ( $\varepsilon \varsigma \varsigma \tau \eta \nu \theta \eta \kappa \eta \nu$ ). Old word from $\tau \iota \theta \eta \mu$, to put for box or sheath, only here in N.T. In Mt 26:52 Christ's warning is given.

The cup ( $\tau 0$ по $о \tau \rho \circ \circ$ ). Metaphor for Christ's death, used already in reply to request of James and John (Mr 10:39; Mt 20:22 ) and in the agony in Gethsemane before Judas came (Mr 14:36; Mt 26:39; Lu 22:42), which is not given by John. The case of to tornpov is the suspended nominative for note avto (it) referring to it.

Shall I not drink? (ov $\mu \eta \pi \omega \omega$;). Second aorist active subjunctive of $\pi \imath v \omega$ with the double negative $o v \mu \eta$ in a question expecting the affirmative answer. Abbott takes it as an exclamation and compares 6:37; $\mathrm{Mr} 14: 25$.

John 18:12
The chief captain (o $\chi \backslash \lambda 10 \rho \chi \circ \varsigma)$. They actually had the Roman commander of the cohort along (cf. Ac 21:31), not mentioned before.

Seized ( $\sigma v v \varepsilon \lambda \alpha \beta o v$ ). Second aorist active of $\sigma \nu \lambda \lambda \alpha \mu \beta \alpha v \omega$, old verb to grasp together, to arrest (technical word) in the Synoptics in this context (Mr 14:48; Mt 26:55), here alone in John.

Bound ( $\varepsilon \delta \eta \sigma \alpha v$ ). First aorist active indicative of $\delta \varepsilon \omega$, to bind. As a matter of course, with the hands behind his back, but with no warrant in law and with no charge against him.

To Annas first ( $\pi \rho \circ \varsigma$ Avvav $\pi \rho \omega \tau \sigma v$ ). Ex-high priest and father-in-law ( $\pi \varepsilon v \theta \varepsilon \rho o \varsigma$, old word, only here in N.T.) of Caiaphas the actual high priest. Then Jesus was subjected to a preliminary and superfluous inquiry by Annas (given only by John) while the Sanhedrin were gathering before Caiaphas. Bernard curiously thinks that the night trial actually took place here before Annas and only the early morning ratification was before Caiaphas. So he calmly says that "Matthew inserts the name Caiaphas at this point (the night trial) in which he seems to have been mistaken." But why "mistaken"?

That year ( $\tau 0 \cup$ عvıautou عкยוvou). Genitive of time.
John 18:14
He which gave command (o $\sigma \nu \mu \beta$ ou $\lambda \varepsilon v \sigma \alpha \varsigma$ ). First aorist active articular participle of $\sigma v \mu \beta o u \lambda \varepsilon v \omega$, old verb (Mt 26:4). The reference is to Joh 11:50 .

It was expedient ( $\sigma \nu \mu \varphi \varepsilon \rho \varepsilon$ ). Present active indicative retained in indirect assertion after secondary tense ( $\eta \nu$, was). Here we have the second aorist active infinitive $\alpha \pi \circ \theta \alpha v \varepsilon เ v$ as the subject of $\sigma \nu \mu \varphi \varepsilon \rho \varepsilon$, both good idioms in the Koine.

John 18:15
Followed ( $\eta \kappa \circ \lambda o v \theta \varepsilon$ ). Imperfect active of $\alpha \kappa 0 \lambda o u \theta \varepsilon \omega$, "was following," picturesque and vivid tense, with associative instrumental case $\tau \omega$ I $\eta \sigma o v$.

Another disciple ( $\alpha \lambda \lambda o \varsigma \mu \alpha \theta \eta \tau \eta \varsigma)$. Correct text without article o (genuine in verse 16). Peter's companion was the Beloved Disciple, the author of the book (Joh 21:24).

Was known unto the high priest ( $\eta v \gamma \nu \omega \sigma \tau o \varsigma \tau \omega$ a $\chi \chi เ \varepsilon \rho \varepsilon$ ). Verbal adjective from $\gamma \iota \nu \omega \sigma \kappa \omega$, to know (Ac 1:19) with dative case. How well known the word does not say, not necessarily a personal friend, well enough known for the portress to admit John. "The account
of what happened to Peter might well seem to be told from the point of view of the servants' hall" (Sanday, Criticism of the Fourth Gospel, p. 101).

Entered in with Jesus ( $\sigma v v \varepsilon เ \sigma \eta \lambda \theta \varepsilon \nu \tau \omega$ I $\eta \sigma o v$ ). Second aorist active indicative of the double compound $\sigma v v \varepsilon เ \sigma \varepsilon \rho \chi \circ \mu \alpha$, old verb, in N.T. here and 6:22. With associative instrumental case.

Into the court ( $\varepsilon ા \varsigma \tau \eta v \alpha v \lambda \eta \nu$ ). It is not clear that this word ever means the palace itself instead of the courtyard (uncovered enclosure) as always in the papyri (very common). Clearly courtyard in Mr 14:66 (Mt 26:69; Lu 22:55 ). Apparently Annas had rooms in the official residence of Caiaphas.

John 18:16
Was standing ( $\sigma \tau \eta \kappa \varepsilon)$. Same form in verse 5 which see. So also $\sigma \tau \eta \kappa \varepsilon \iota \sigma \alpha v$ in 18. Picture of Peter standing outside by the door.

Unto the high priest ( $\tau 0 v \alpha \rho \chi เ \varepsilon \rho \varepsilon \omega \varsigma$ ). Objective genitive here, but dative in verse 15.
Unto her that kept the door ( $\tau \eta \theta \nu \rho \omega \rho \omega$ ). Old word ( $\theta v \rho a$, door, $\omega \rho a$, care), masculine in 10:3, feminine here, door-keeper (male or female).

John 18:17
The maid ( $\eta \pi \alpha \iota \delta \iota \sigma \kappa \eta$ ). Feminine form of $\pi \alpha \iota \delta \iota \sigma \kappa \sigma$, diminutive of $\pi \alpha \iota \varsigma$. See Mt 26:69 . When "the maid the portress" (apposition).

Art thou also? ( $\mu \eta \kappa \alpha \sigma v \varepsilon \iota ;$ ). Expecting the negative answer, though she really believed he was.

This man's ( $\tau 0 v a v \theta \rho \omega \pi \sigma$ रov $\operatorname{cov}$ ). Contemptuous use of ov $0 \varsigma$ with a gesture toward Jesus. She made it easy for Peter to say no.

John 18:18
A fire of coals ( $\alpha v \theta \rho \alpha \kappa \iota \alpha v)$. Old word, in LXX, only here and 21:9 in N.T. A heap of burning coals ( $\alpha v \Theta \rho \alpha \xi$, coal). Cf. our "anthracite." It was cold ( $\psi v \chi \circ \varsigma \eta v$ ). "There was coldness." The soldiers had apparently returned to their barracks.

Were warming themselves ( $\varepsilon \theta \varepsilon \rho \mu \alpha \imath v o v \tau o)$. Direct middle imperfect indicative of $\theta \varepsilon \rho \mu \alpha ı v \omega$ (from $\theta \varepsilon \rho \mu \circ \varsigma)$. So as to $\theta \varepsilon \rho \mu \alpha \imath \nu o \mu \varepsilon v o \varsigma$ about Peter. "Peter, unabashed by his lie, joined himself to the group and stood in the light of the fire" (Dods).

John 18:19
Asked ( $\eta \rho \omega \tau \eta \sigma \varepsilon v$ ). First aorist active indicative of $\varepsilon \rho \omega \tau \alpha \omega$, to question, usual meaning. This was Annas making a preliminary examination of Jesus probably to see on what terms Jesus made disciples whether as a mere rabbi or as Messiah.

John 18:20
Openly ( $\pi \alpha \rho \rho \eta \sigma \iota \alpha)$. As already shown (7:4;8:26; 10:24,39; 16:25,29. See 7:4 for same contrast between $\varepsilon v \pi \alpha \rho \rho \eta \sigma \iota \alpha$ and $\varepsilon v \kappa \rho v \pi \tau \omega$.

I ever taught $(\varepsilon \gamma \omega \pi \alpha v \tau \sigma \tau \varepsilon \varepsilon \delta \iota \delta \alpha \xi \alpha)$. Constative aorist active indicative. For the temple teaching see Joh 2:19; 7:14,28; 8:20, 19:23; Mr 14:49 and Joh 6:59 for the synagogue teaching
(often in the Synoptics). Examples of private teaching are Nicodemus (Joh 3) and the woman of Samaria (Joh 4). Jesus ignores the sneer at his disciples, but challenges the inquiry about his teaching as needless.

John 18:21
Ask them that have heard me ( $\varepsilon \rho \omega \tau \eta \sigma о \nu$ тоиц $\alpha к \eta \kappa о о \tau \alpha \varsigma)$. First aorist (tense of urgent and instant action) active imperative of $\varepsilon \rho \omega \tau \alpha \omega$ and the articular perfect active participle accusative masculine plural of $\alpha \kappa о v \omega$, to hear. There were abundant witnesses to be had. Multitudes had heard Jesus in the great debate in the temple on Tuesday of this very week when the Sanhedrin were routed to the joy of the common people who heard Jesus gladly (Mr 12:37). They still know.

John 18:22
When he had said this (таuтa autov $\varepsilon ו \pi о \nu \tau о \varsigma) . ~ G e n i t i v e ~ a b s o l u t e ~ o f ~ s e c o n d ~ a o r i s t ~$ active participle of $\varepsilon$ हाँov, to say.

Standing by ( $\pi \alpha \rho \varepsilon \sigma \tau \eta \kappa \omega \varsigma)$. Perfect active (intransitive) participle of $\pi \alpha \rho เ \sigma \tau \eta \mu$ (transitive), to place beside. One of the temple police who felt his importance as protector of Annas.

Struck Jesus with his hand ( $\varepsilon \delta \omega \kappa \varepsilon v \rho \alpha \pi \iota \sigma \mu \alpha \tau \omega$ I $\eta \sigma o v$ ). Late word $\rho a \pi \iota \sigma \mu \alpha$ is from $\rho a \pi \iota \zeta \omega$, to smite with a rod or with the palm of the hand (Mt 26:67). It occurs only three times in the N.T. (Mr 14:65; Joh 18:22; 19:3 ), in each of which it is uncertain whether the blow is with a rod or with the palm of the hand (probably this, a most insulting act). The papyri throw no real light on it. "He gave Jesus a slap in the face." Cf. 2Co 11:20 .

So (outwऽ). As Jesus had done in verse 21, a dignified protest in fact by Jesus.
John 18:23
If I have spoken evil ( $\varepsilon \kappa \alpha \kappa \omega \varsigma \varepsilon \lambda \alpha \lambda \eta \sigma \alpha$ ). Condition of first class (assumed to be true), with $\varepsilon$ and aorist active indicative. Jesus had not spoken evilly towards Annas, though he did not here turn the other cheek, one may note. For the sake of argument, Jesus puts it as if he did speak evilly. Then prove it, that is all.

Bear witness of the evil ( $\mu \alpha \rho \tau \cup \rho \eta \sigma о v \pi \varepsilon \rho ~ \tau о v ~ к а к о v) . ~ F i r s t ~ a o r i s t ~ a c t i v e ~ i m p e r a t i v e ~ o f ~$ $\mu \alpha \rho \tau \cup \rho \varepsilon \omega$, to testify. This is the conclusion (apodosis). Jesus is clearly entitled to proof of such a charge if there is any.

But if well ( $\varepsilon \delta \varepsilon \kappa \alpha \lambda \omega \varsigma)$. Supply the same verb $\varepsilon \lambda \alpha \lambda \eta \sigma \alpha$. The same condition, but with a challenging question as the apodosis.

Smitest ( $\delta \varepsilon \rho \varepsilon \iota \varsigma)$. Old verb $\delta \varepsilon \rho \omega$, to flay, to skin, to beat, as in Mt 21:35; Lu 22:63; 2Co 11:20 (of an insulting blow in the face as here).

John 18:24
Therefore sent him ( $\alpha \pi \varepsilon \sigma \tau \varepsilon \lambda \lambda v$ ouv $\alpha v \tau o v$ ). First aorist active of $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$, not past perfect (had sent). The preliminary examination by Annas was over.

Bound ( $\delta \varepsilon \delta \varepsilon \mu \varepsilon v o v)$ ). Perfect passive participle of $\delta \varepsilon \omega$, to bind. Jesus was bound on his arrest (verse 12) and apparently unbound during the preliminary examination by Annas.

John 18:25
Was standing and warming himself ( $\eta \nu \varepsilon \sigma \tau \omega \varsigma \kappa \alpha \theta \varepsilon \rho \mu \alpha \iota \nu о \mu \varepsilon \nu \sigma \varsigma)$. Two periphrastic imperfects precisely as in verse 18 , vivid renewal of the picture drawn there. John alone gives the examination of Jesus by Annas (18:19-24) which he places between the first and the second denials by Peter. Each of the Four Gospels gives three denials, but it is not possible to make a clear parallel as probably several people joined in each time. This time there was an hour's interval ( $\mathrm{Lu} 22: 59$ ). The question and answer are almost identical with verse 17 and "put in a form which almost suggested that Peter should say 'No"' (Bernard), a favourite device of the devil in making temptation attractive.

John 18:26
Did not I see thee in the garden with him? (ovк $\varepsilon \gamma \omega \sigma \varepsilon \varepsilon \iota \delta o v \varepsilon v \tau \omega \kappa \eta \pi \omega \mu \varepsilon \tau^{\prime}$ av $\alpha o v ;$ ). This staggering and sudden thrust expects an affirmative answer by the use of ovk, not $\mu \eta$ as in verses 17,25 , but Peter's previous denials with the knowledge that he was observed by a kinsman of Malchus whom he had tried to kill (verse 10) drove him to the third flat denial that he knew Jesus, this time with cursing and swearing (Mr 14:71; Mt 26:73). Peter was in dire peril now of arrest himself for attempt to kill.

Straightway ( $\varepsilon v \theta \varepsilon \omega \varsigma)$. As in Mt 26:74 while Luke has $\pi \alpha \rho \alpha \chi \rho \eta \mu \alpha$ (Lu 22:60 ). Mark (Mr 14:68,72 ) speaks of two crowings as often happens when one cock crows. See Mt 26:34 for $\alpha \lambda \varepsilon \kappa \tau \omega \rho$ (cock). That was usually the close of the third watch of the night ( $\mathrm{Mr} 13: 35$ ), about 3 A.M. Luke (Lu 22:61) notes that Jesus turned and looked on Peter probably as he passed from the rooms of Annas to the trial before Caiaphas and the Sanhedrin (the ecclesiastical court). See Mrs. Browning's beautiful sonnets on "The Look".

John 18:28
They lead ( $\alpha \gamma 0 v \sigma \iota v$ ). Dramatic historical present of $\alpha \gamma \omega$, plural "they" for the Sanhedrists (Lu 23:1). John gives no details of the trial before the Sanhedrin (only the fact, Joh 18:24,28 ) when Caiaphas presided, either the informal meeting at night (Mr 14:53,55-65; Mt 26:57,59-68; Lu 22:54,63-65 ) or the formal ratification meeting after dawn ( $\mathrm{Mr} 15: 1 ; \mathrm{Mt}$ 27:1; Lu 22:66-71 ), but he gives much new material of the trial before Pilate ( $18: 28-38$ ).

Into the palace ( $\varepsilon \iota \varsigma \tau о \pi \rho a \iota \tau \omega \rho \iota \circ v$ ). For the history and meaning of this interesting Latin word, praetorium, see on Mt 27:27; Ac 23:35; Php 1:13. Here it is probably the magnificent palace in Jerusalem built by Herod the Great for himself and occupied by the Roman Procurator (governor) when in the city. There was also one in Caesarea (Ac 23:35 ). Herod's palace in Jerusalem was on the Hill of Zion in the western part of the upper city. There is something to be said for the Castle of Antonia, north of the temple area, as the location of Pilate's residence in Jerusalem.

Early $(\pi \rho \omega)$. Technically the fourth watch ( 3 A.M. to 6 A.M.). There were two violations of Jewish legal procedure (holding the trial for a capital case at night, passing condemnation on the same day of the trial). Besides, the Sanhedrin no longer had the power of death. A

Roman court could meet any time after sunrise. John (19:14) says it was "about the sixth hour" when Pilate condemned Jesus.

That they might not be defiled ( $v \alpha \mu \eta \mu \alpha v \theta \omega \sigma \tau v$ ). Purpose clause with $\tau v \alpha \mu \eta$ and first aorist passive subjunctive of $\mu \alpha \Delta v \omega$, to stain, to defile. For Jewish scruples about entering the house of a Gentile see Ac 10:28; 11:3.

But might eat the passover ( $\alpha \lambda \lambda \alpha \rho \alpha \gamma \omega \sigma \iota v$ тo $\pi \alpha \sigma \chi \alpha$ ). Second aorist active subjunctive of the defective verb $\varepsilon \sigma \theta l \omega$, to eat. This phrase may mean to eat the passover meal as in Mt 27:17 ( $\mathrm{Mr} 14: 12,14 ; \mathrm{Lu} 22: 11,15$ ), but it does not have to mean that. In 2Ch $30: 22$ we read: "And they did eat the festival seven days" when the paschal festival is meant, not the paschal lamb or the paschal supper. There are eight other examples of $\pi \alpha \sigma \chi \alpha$ in John's Gospel and in all of them the feast is meant, not the supper. If we follow John's use of the word, it is the feast here, not the meal of Joh 13:2 which was the regular passover meal. This interpretation keeps John in harmony with the Synoptics.

John 18:29
Went out ( $\varepsilon \xi \eta \lambda \theta \varepsilon v \varepsilon \xi \omega)$. Note both $\varepsilon \xi$ and $\varepsilon \xi \omega$ (went out outside), since the Sanhedrin would not come into Pilate's palace. Apparently on a gallery over the pavement in front of the palace (Joh 19:13).

Accusation (катпүорıav). Old word for formal charge, in N.T. only here, 1Ti 5:19; Tit 1:6.
 proper legal inquiry.

John 18:30
If this man were not an evil-doer ( $\varepsilon \mu \eta \eta \nu$ оитоৎ какоv $\pi о \iota \omega v$ ). Condition (negative) of second class (periphrastic imperfect indicative), assumed to be untrue, with the usual apodosis ( $\alpha v$ and aorist indicative, first aorist plural with $\kappa$ ). This is a pious pose of infallibility not in the Synoptics. They then proceeded to make the charges (Lu 23:2) as indeed John implies (18:31,33 ). Some MSS. here read какотоьо (malefactor) as in 1Pe 2:12,14, with which compare Luke's какоирүоৎ (23:32f. ; so also 2Ti 2:9), both meaning evil-doer. Here the periphrastic present participle $\pi о \iota \omega v$ with какоv emphasizes the idea that Jesus was a habitual evil-doer (Abbott). It was an insolent reply to Pilate (Bernard).

John 18:31
Yourselves ( $\nu \mu \varepsilon \iota \varsigma$ ). Emphatic. Pilate shrewdly turns the case over to the Sanhedrin in reply to their insolence, who have said nothing whatever about their previous trial and condemnation of Jesus. He drew out at once the admission that they wanted the death of Jesus, not a fair trial for him, but Pilate's approval of their purpose to kill him (Joh 7:1,25).

John 18:32
By what manner of death ( $\pi \circ \omega \theta \theta v \alpha \tau \omega$ ). Instrumental case of the qualitative interrogative $\pi$ toos in an indirect question, the very idiom used in Joh 12:32 concerning the Cross
and here treated as prophecy (Scripture) with $v a \sim \pi \lambda \rho \omega \omega \theta \eta$ like the saying of Jesus in verse 9 which see.

John 18:33
Again ( $\pi \alpha \lambda \iota v$ ). Back into the palace where Pilate was before.
Called $(\varepsilon \varphi \omega \nu \eta \sigma \varepsilon v)$. First aorist active indicative of $\varphi \omega v \varepsilon \omega$. Jesus was already inside the court (verse 28). Pilate now summoned him to his presence since he saw that he had to handle the case. The charge that Jesus claimed to be a king compelled him to do so (Lu 23:2 ).

Art thou the King of the Jews? ( $\sigma v \varepsilon$ o $\beta a \sigma \iota \lambda \varepsilon u \varsigma \tau \omega v$ Iov $\delta \alpha \omega \omega v$;). This was the vital problem and each of the Gospels has the question (Mr 15:2; Mt 27:1; Lu 23:3; Joh 18:33 ), though Luke alone (23:2) gives the specific accusation.

Thou ( $\sigma v$ ). Emphatic. Jesus did claim to be the spiritual king of Israel as Nathanael said (Joh 1:49) and as the ecstatic crowd hailed him on the Triumphal Entry (Joh 12:13 ), but the Sanhedrin wish Pilate to understand this in a civil sense as a rival of Caesar as some of the Jews wanted Jesus to be (Joh 6:15) and as the Pharisees expected the Messiah to be.

John 18:34
Of thyself ( $\alpha \pi 0$ ovautov). Whether a sincere inquiry on Pilate's part or a trap from the Sanhedrin.

John 18:35
Am I a Jew? ( $\mu \eta \tau \varepsilon \gamma \omega$ Iov $\delta a \iota o \varsigma \varepsilon \mu \mu ;$ ). Proud and fine scorn on Pilate's part at the idea that he had a personal interest in the question. Vehement negation implied. Cf. 4:29 for $\mu \eta \tau$ in a question. The gulf between Jew and Gentile yawns wide here.

Nation ( $\varepsilon \theta v o \varsigma$ as in 11:48-52, rather than $\lambda \alpha o \varsigma$, while both in 11:50). For $\pi \alpha \rho \varepsilon \delta \omega \kappa \alpha v$ see verse 30 .

What hast thou done? ( $\tau$ عлоוךбаб;). First aorist active indicative of $\pi о \varepsilon \varepsilon \omega$. Blunt and curt question. "What didst thou do?" "What is thy real crime?" John's picture of this private interview between Pilate and Jesus is told with graphic power.

John 18:36
My kingdom ( $\eta \beta \alpha \sigma i \lambda \varepsilon i \alpha ~ \eta \varepsilon \mu \eta$ ). Christ claims to be king to Pilate, but of a peculiar kingdom. For "world" (кобнои) see 17:13-18.

My servants (o v $\quad \eta \rho \varepsilon \tau \alpha$ o $\varepsilon \mu \mathrm{o}$ ). For the word see verse 3 where it means the temple police or guards (literally, under-rowers). In the LXX always (Pr 14:35; Isa 32:5; Da 3:46) officers of a king as here. Christ then had only a small band of despised followers who could not fight against Caesar. Was he alluding also to legions of angels on his side? (Mt 26:56 ).

Would fight ( $\eta \gamma \omega v L \zeta$ ovto $\alpha v$ ). Imperfect middle of $\alpha \gamma \omega v L \zeta o \mu \alpha$ common verb (only here in John, but see 1Co 9:25 ) from $\alpha \gamma \omega v$ (contest) with $\alpha v$, a conclusion of the secondclass condition (assumed as untrue). Christians should never forget the profound truth stated here by Jesus.

That I should not be delivered ( $\imath v \alpha \mu \eta \pi \alpha \rho \alpha \delta o \theta \omega$ ). Negative final clause with $\tau v \alpha \mu \eta$ and first aorist passive subjunctive of $\pi \alpha \rho a \delta \iota \delta \omega \mu$ (see verses 28,36 ). Jesus expects Pilate to surrender to the Jews.

But now ( $v v \vee \delta \varepsilon)$. In contrast to the condition already stated as in 8:40; 9:41; 15:22,24

John 18:37
Art thou a king then? (очкоиv $\beta a \sigma \lambda \lambda \varepsilon \cup \varsigma \varepsilon \sigma v ;$ ). Compound of ouk and ouv and is clearly ironical expecting an affirmative answer, only here in the N.T., and in LXX only in A text in 2Ki 5:23.

Thou sayest that ( $\sigma v \lambda \varepsilon \gamma \varepsilon ı \varsigma ~ o \tau$ ). In Mt 27:11; Mr 15:2; Lu 23:3, $\sigma v \lambda \varepsilon \gamma \varepsilon \iota \varsigma ~ c l e a r l y ~ m e a n s ~$ "yes," as $\sigma v \varepsilon \iota \pi a \varsigma$ (thou saidst) does in Mt 26:64 (= "I am," $\varepsilon \gamma \omega \varepsilon \mu \mu$, in Mr 41:62 ). Hence here ot had best be taken to mean "because": "Yes, because I am a king."

Have I been born $(\varepsilon \gamma \omega \gamma \varepsilon \gamma \varepsilon v \nu \eta \mu \alpha)$. Perfect passive indicative of $\gamma \varepsilon \nu v \alpha \omega$. The Incarnation was for this purpose. Note repetition of $\varepsilon \iota \varsigma \tau 0 v \tau o$ (for this purpose), explained by $\mathfrak{v a}$ $\mu \alpha \rho \tau v \rho \eta \sigma \omega \tau \eta \alpha \lambda \eta \theta \varepsilon \iota \alpha$ (that I may bear witness to the truth), $v \alpha \alpha$ with first aorist active subjunctive of $\mu \alpha \rho \tau \nu \rho \varepsilon \omega$. Paul (1Ti 6:13) alludes to this good confession when Christ bore witness ( $\mu \alpha \rho \tau \cup \rho \eta \sigma \alpha v \tau о \varsigma)$ before Pilate. Jesus bore such witness always (Joh 3:11,32; 7:7; $8: 14$; Re $1: 5$ ).

John 18:38
What is truth? ( $\tau \varepsilon \sigma \tau \iota v \alpha \lambda \eta \theta \varepsilon \iota \alpha ;$ ). This famous sneer of Pilate reveals his own ignorance of truth, as he stood before Incarnate Truth (Joh 14:6 ). Quid est veritas? The answer in Latin is Vir est qui adest as has been succinctly said by the use of the same letters. Pilate turned with indifference from his own great question and rendered his verdict: "I find no crime in him" ( $\varepsilon \gamma \omega$ ov $\delta \varepsilon \mu \not \omega v \varepsilon \cup \rho \iota \sigma \kappa \omega \varepsilon v$ avt $\omega$ aı兀ıav). For this use of aıtıa see Mt 27:37; Mr 15:26 . Pilate therefore should have set Jesus free at once.

John 18:39
A custom ( $\sigma v \vee \eta \theta \varepsilon \iota \alpha$ ). Old word for intimacy, intercourse, from $\sigma v \nu \eta \theta \eta \varsigma(\sigma \cup v, \eta \theta \circ \varsigma)$, in N.T. only here, 1 Co 8:7; 11:16. This custom, alluded to in Mr 15:6; Mt 27:15 , is termed necessity ( $\alpha v \alpha \gamma \kappa \eta$ ) in Lu 23:17 (late MSS., not in older MSS.). All the Gospels use the verb $\alpha \pi \sigma \lambda \nu \omega$ (release, set free). Then $\imath v \alpha \alpha \pi 0 \lambda v \sigma \omega$ is a subject clause ( $\imath \alpha \alpha$ and first aorist active subjunctive) in apposition with $\sigma v v \eta \theta \varepsilon ı \alpha$.

Will ye therefore that I release? ( $\beta o v \lambda \varepsilon \sigma \theta \varepsilon$ ouv $\alpha \pi \sigma \lambda \nu \sigma \omega ;$ ). Without the usual ıva before $\alpha \pi o \lambda \nu \sigma \omega$, asyndeton, as in Mr 10:36, to be explained either as parataxis or two questions (Robertson, Grammar, p. 430) or as mere omission of ıva (ibid., p. 994). There is contempt and irony in Pilate's use of the phrase "the king of the Jews."

John 18:40
Cried out ( $\varepsilon \kappa \rho \alpha v \gamma \alpha \sigma \alpha v)$. First aorist active of $\kappa \rho \alpha v \gamma \alpha \zeta \omega$, old and rare verb from $\kappa \rho \alpha v \gamma \eta$, outcry (Mt 25:6), as in Mt 12:19 .

Not this man ( $\mu \eta$ toviov). Contemptuous use of ov toc. The priests put the crowd up to this choice (Mr 15:11) and Pilate offered the alternative (Mt 27:17, one MS. actually gives Jesus as the name of Barabbas also). The name Bapaßßac in Aramaic simply means son of a father.

A robber ( $\lambda \eta \iota \sigma \tau \eta \varsigma)$. Old word from $\lambda \eta\llcorner\zeta \rho \mu$, to plunder, and so a brigand and possibly the leader of the band to which the two robbers belonged who were crucified with Jesus. Luke terms him an insurgent and murderer ( Lu 23:19,25). They chose Barabbas in preference to Jesus and apparently Jesus died on the very cross planned for Barabbas.

## John 19

John 19:1
Took and scourged ( $\varepsilon \lambda \alpha \beta \varepsilon v \kappa \alpha \varepsilon \mu \alpha \sigma \tau \iota \gamma \omega \sigma \varepsilon v$ ). First aorist active indicative of $\lambda \alpha \mu \beta \alpha \nu \omega$ and $\mu \alpha \sigma \tau \iota \gamma \sigma \omega$ (from $\mu \alpha \sigma \tau \iota \xi$, whip). For this redundant use of $\lambda \alpha \mu \beta \alpha \nu \omega$ see also verse 6 . It is the causative use of $\mu \alpha \sigma \tau \iota \gamma o \omega$, for Pilate did not actually scourge Jesus. He simply ordered it done, perhaps to see if the mob would be satisfied with this penalty on the alleged pretender to royalty (Lu 23:22 ) whom Pilate had pronounced innocent (Joh 18:38), an illegal act therefore. It was a preliminary to crucifixion, but Jesus was not yet condemned. The Sanhedrin had previously mocked Jesus (Mr 14:65; Mt 26:67f.; Lu 22:63ff. ) as the soldiers will do later (Mr 15:16-19; Mt 27:27-30 ). This later mock coronation (Mark and Matthew) was after the condemnation.

Plaited a crown of thorns ( $\pi \lambda \varepsilon \xi \alpha \nu \tau \varepsilon \varsigma \sigma \tau \varepsilon \varphi \alpha \nu \circ \nu \varepsilon \xi \alpha \kappa \alpha \nu \theta \omega \nu$ ). Old verb $\pi \lambda \varepsilon \kappa \omega$, to weave, in the N.T. only here, Mr 15:17; Mt 27:19. Not impossible for the mock coronation to be repeated.

Arrayed him ( $\pi \varepsilon \rho เ \varepsilon \beta \alpha \lambda o v \alpha v \tau o v)$. "Placed around him" (second aorist active indicative of $\pi \varepsilon \rho \iota \beta \alpha \lambda \omega)$.

In a purple garment ( $\mu \alpha \tau \iota \nu \pi о \rho \varphi v \rho о v \nu$ ). Old adjective $\pi о \rho \varphi \nu \rho \varepsilon \sigma$, from $\pi о \rho \varphi v \rho \alpha$, purple cloth (Mr 15:17,20) , dyed in purple, in the N.T. only here and Re 18:16. Jesus had been stripped of his outer garment $\iota \mu \tau \tau \circ v(\mathrm{Mt} \mathrm{27:28)}$ ) and the scarlet cloak of one of the soldiers may have been put on him (Mt 27:28).

John 19:3
They came ( $\eta \rho \chi о v \tau 0$ ). Imperfect middle of repeated action, "they kept coming and saying" ( $\varepsilon \lambda \varepsilon \gamma \circ v$ ) in derision and mock reverence with Aç ( $\chi \alpha \iota \rho \varepsilon$, Hail!) as if to Caesar. Note o $\beta a \sigma \lambda \lambda \varepsilon v \varsigma$ (the king) in address.

They struck him with their hands ( $\varepsilon \delta \iota \delta o \sigma \alpha v \alpha v \tau \omega \rho \alpha \pi \iota \sigma \mu \alpha \tau \alpha$ ). Imperfect of $\delta \iota \delta \omega \mu$, repetition, "they kept on giving him slaps with their hands." See on 18:22 for this use of $\rho \alpha \pi \iota \sigma \mu \alpha$.

John 19:4
I bring him out to you ( $\alpha \gamma \omega v \mu \nu \alpha v \tau o v \varepsilon \xi \omega$ ). Vividly pictures Pilate leading Jesus out of the palace before the mob in front.

That ye may know ( $\iota v \alpha \gamma \nu \omega \tau \varepsilon$ ). Final clause with $\tau v \alpha$ and the second aorist active subjunctive of $\gamma \iota \omega \sigma \kappa \omega$, "that ye may come to know," by this mockery the sincerity of Pilate's decision that Jesus is innocent (18:38). It is a travesty on justice and dignity, but Pilate is trying by a bit of humour to turn the mob from the grip of the Sanhedrin.

John 19:5

Wearing ( $\varphi \circ \rho \omega v$ ). Present active participle of $\varphi \circ \rho \varepsilon \omega$, an early frequentative of $\varphi \varepsilon \rho \omega$, denoting a continual wearing, though not true here (only temporary). Jesus bore the mockery with kingly dignity as part of the shame of the Cross (Heb 12:2).

Behold, the man (Iסov o $\alpha v \theta \rho \omega \pi \sigma \varsigma)$. Ecce Homo! by Pilate. This exclamatory introduction of Jesus in mock coronation robes to the mob was clearly intended to excite pity and to show how absurd the charge of the Sanhedrin was that such a pitiable figure should be guilty of treason. Pilate failed utterly in this effort and did not dream that he was calling attention to the greatest figure of history, the Man of the ages.

John 19:6
Crucify him, crucify him ( $\sigma \tau \alpha v \rho \omega \sigma o v, \sigma \tau \alpha v \rho \omega \sigma o v$ ). First aorist active imperative of $\sigma \tau \alpha v \rho o \omega$ for which verb see Mt 29:19, etc. Here the note of urgency (aorist imperative) with no word for "him," as they were led by the chief priests and the temple police till the whole mob takes it up (Mt 27:22).

For I find no crime in him ( $\varepsilon \gamma \omega \gamma \alpha \rho$ ov $\varepsilon \cup \rho เ \sigma \kappa \omega)$. This is the third time Pilate has rendered his opinion of Christ's innocence ( $18: 38 ; 19: 4$ ). And here he surrenders in a fret to the mob and gives as his reason ( $\gamma \alpha \rho$, for) for his surrender the innocence of Jesus (the strangest judicial decision ever rendered). Perhaps Pilate was only franker than some judges!

John 19:7
 the Sanhedrin give the real ground for their hostility to Jesus, one of long standing for probably three years (Joh 5:18) and the one on which the Sanhedrin voted the condemnation of Jesus (Mr 14:61-64; Mt 27:23-66 ), but even now they do not mention their own decision to Pilate, for they had no legal right to vote Christ's death before Pilate's consent which they now have secured.

John 19:8
He was the more afraid ( $\mu \lambda \lambda \lambda o v \varepsilon \varphi \rho \beta \eta \theta \eta$ ). First aorist passive indicative of $\varphi o \beta \varepsilon \circ \mu \alpha$. He was already afraid because of his wife's message (Mt 27:19). The claim of Jesus to deity excited Pilate's superstitious fears.

John 19:9
Whence art thou? ( $\pi 0 \theta \varepsilon v \varepsilon \sigma v ;$ ). Pilate knew that Jesus was from Galilee (Lu 23:6f. ). He is really alarmed. See a like question by the Jews in 8:25.

Gave him no answer ( $\alpha \pi о к \rho \iota \sigma \imath v ~ о и к \varepsilon \delta \omega \kappa \varepsilon v ~ \alpha \cup \tau \omega$ ). See same idiom in 1:22. Алокрıбıৎ (old word from $\alpha \pi о к \rho ı v o \mu \alpha$ ) occurs also in $\operatorname{Lu} 2: 47 ; 20: 26$. The silence of Jesus, like that before Caiaphas (Mr 14:61; Mt 26:63 ) and Herod (Lu 23:9), irritates the dignity of Pilate in spite of his fears.

John 19:10
Unto me ( $\varepsilon \mu \mathrm{o}$ ). Emphatic position for this dative. It amounted to contempt of court with all of Pilate's real "authority" ( $\varepsilon \xi_{o v \sigma \iota \alpha), ~ b e t t e r ~ h e r e ~ t h a n ~ " p o w e r . " ~}^{\text {" }}$

John 19:11
Thou wouldest have (ovk $\varepsilon \not \chi \varepsilon \varsigma$ ). Imperfect active indicative without $\alpha v$, but apodosis of second-class condition as in 15:22,24 .

Except it were given thee $(\varepsilon \mu \eta \eta \nu \delta \varepsilon \delta o \mu \varepsilon v o v)$. Periphrastic past perfect indicative of $\delta \iota \delta \omega \mu$ (a permanent possession).

From above ( $\alpha v \omega \theta \varepsilon v$ ). From God (cf. 3:3), the same doctrine of government stated by Paul in Ro 13:1f. Pilate did not get his "authority" from the Sanhedrin, but from Caesar. Jesus makes God the source of all real "authority."

Hath greater sin ( $\mu \varepsilon \iota \zeta$ оva $\alpha \mu \alpha \rho \tau \iota \alpha \nu \varepsilon \chi \varepsilon$ ). The same idiom in 9:41. Caiaphas has his authority from God also and has used Pilate for his own base end.

John 19:12
Sought ( $\varepsilon \zeta \eta \tau \varepsilon)$. Imperfect active, "kept on seeking," "made renewed efforts to release him." He was afraid to act boldly against the will of the Jews.

If thou release this man ( $\varepsilon \alpha v \tau 0 v \tau 0 v \alpha \pi о \lambda v \sigma \eta ı \varsigma)$. Condition of third class, a direct threat to Pilate. He knew all the time that the Sanhedrin might tell Caesar on him.
 an official title, here simply a daring threat to Pilate.

Speaketh against Caesar ( $\alpha \nu \tau \iota \lambda \varepsilon \gamma \varepsilon \tau \omega \kappa \alpha \iota \sigma \alpha \rho$ ). Caesar brooks no rival. Jesus had allowed himself to be acclaimed king of Israel in the Triumphal Entry (Joh 12:13; Mr 11:10; Lu 19:38 ). The Sanhedrin have caught Pilate in their toils.

John 19:13
Sat down on the judgement seat ( $\varepsilon \kappa \alpha \theta \iota \sigma \varepsilon v \varepsilon \pi \beta \eta \mu \alpha \tau \sigma)$. "Took his seat upon the $\beta \eta \mu \alpha$ " (the raised platform for the judge outside the palace as in Ac 7:5 ). The examination is over and Pilate is now ready for the final stage.

The Pavement ( $\Lambda \iota \theta$ oo $\tau \rho \omega \tau o v)$. Late compound from $\lambda_{\imath} \theta$ oৎ, stone, and the verbal adjective $\sigma \tau \rho \omega \tau$ с form $\sigma \tau \rho \omega v \nu v \mu$, to speak, a mosaic or tesselated pavement, spread with stones, in 2Ch 7:3 , Josephus, Epictetus, papyri. The Chaldean name $\Gamma \alpha \beta \beta \alpha \theta \alpha$, an elevation, was apparently given because of the shape.

John 19:14
The Preparation of the passover ( $\pi \alpha \rho \alpha \sigma \kappa \varepsilon \cup \eta \tau 0 v \pi \alpha \sigma \chi \alpha$ ). That is, Friday of passover week, the preparation day before the Sabbath of passover week (or feast). See also verses 31,42; Mr 15:42; Mt 27:62; Lu 23:54 for this same use of $\pi \alpha \rho \alpha \sigma \kappa \varepsilon \cup \eta$ for Friday. It is the name for Friday today in Greece.

About the sixth hour ( $\omega \varsigma \varepsilon \kappa \tau \eta$ ). Roman time, about 6 A.M. (a little after 6 no doubt) when Pilate rendered his final decision. Mark (Mr 15:25) notes that it was the third hour (Jewish time), which is 9 A.M. Roman time, when the crucifixion began. Why should John give Jewish time writing at the close of the first century when Jerusalem and the Jewish state passed away in A.D. 70? He is writing for Greek and Roman readers.

Behold your king (I $\delta \varepsilon$ o $\beta a \sigma \iota \lambda \varepsilon v \varsigma \nu \mu \omega v$ ). I $\delta \varepsilon$ is here an exclamation with no effect on the case of $\beta \alpha \sigma \lambda \lambda \varepsilon v$ ¢ just as in 1:29. The sarcasm of Pilate is aimed at the Jews, not at Jesus.

John 19:15
Away with him, away with him ( $\alpha \rho o v, \alpha \rho o v$ ). First aorist active imperative of aı $\rho \omega$. See alp $\boldsymbol{\text { in }} \mathrm{Lu}$ 23:18. This thing has gotten on the nerves of the crowd. Note the repetition. In a second-century papyrus letter (Moulton and Milligan's Vocabulary) a nervous mother cries "He upsets me; away with him" (appov avtov). Pilate weakly repeats his sarcasm: " Your king shall I crucify? (Tov $\beta \alpha \sigma i \lambda \varepsilon \alpha ~ v \mu \omega v \sigma \tau \alpha v \rho \omega \sigma \omega ;$ ).

But Caesar ( $\varepsilon \mu \eta \kappa \alpha \iota \sigma \alpha \rho \alpha$ ). The chief priests ( 0 a $\rho \chi เ \varepsilon \rho \varepsilon ı \varsigma)$ were Sadducees, who had no Messianic hope like that of the Pharisees. So to carry their point against Jesus they renounce the principle of the theocracy that God was their King (1Sa 12:12).

John 19:16
He delivered ( $\pi \alpha \rho \varepsilon \delta \omega \kappa \varepsilon v$ ). Kappa aorist active of $\pi \alpha \rho \alpha \delta เ \delta \omega \mu$, the very verb used of the Sanhedrin when they handed Jesus over to Pilate ( $18: 30,35$ ). Now Pilate hands Jesus back to the Sanhedrin with full consent for his death ( $\mathrm{Lu} 23: 25$ ).

To be crucified (ıva $\sigma \tau \alpha v \rho \omega \theta \eta$ ). Purpose clause with $ו v \alpha$ and the first aorist passive subjunctive of $\sigma \tau \alpha 0 \rho o \omega$. John does not give the dramatic episode in Mt 27:24f. when Pilate washed his hands and the Jews took Christ's blood on themselves and their children. But it is on Pilate also.

John 19:17
They took ( $\pi \alpha \rho \varepsilon \lambda \alpha \beta o v$ ). Second aorist active indicative of $\pi \alpha \rho \alpha \lambda \alpha \mu \beta \alpha v \omega$, they took Jesus from Pilate. Cf. 1:11; 14:3. This is after the shameful scourging between 6 A.M. and 9 A.M. when the soldiers insult Jesus ad libitum (Mr 15:16-19; Mt 27:27-30).

Bearing the cross for himself ( $\beta \alpha \sigma \tau \alpha \zeta \omega v \alpha \cup \tau \omega$ tov $\sigma \tau \alpha \cup \rho o v)$. Cf. Lu 14:27 for this very picture in the words of Jesus. The dative case of the reflexive pronoun avt $\omega$ "for himself" is in strict accord with Roman custom. "A criminal condemned to be crucified was required to carry his own cross" (Bernard). But apparently Jesus under the strain of the night before and the anguish of heart within him gave out so that Simon of Cyrene was impressed to carry it for Jesus (Mr 15:21f.; Mt 27:32f.; Lu 23:26 ). See Mr 15:22f.; Mt 27:33f.; Lu 23:33 for the meaning of "place of a skull" or Calvary and Golgotha in Hebrew (Aramaic). Luke has simply Kpavoov (Skull), a skull-looking place.

John 19:18
They crucified ( $\varepsilon \sigma \tau \alpha u \rho \omega \sigma \alpha v$ ). The soldiers just as in Ac 22:24f. ; the scourging of Paul was to be done by the soldiers.

And Jesus in the midst ( $\mu \varepsilon \sigma o v \delta \varepsilon$ tov I $\eta \sigma o v v$ ). Predicate adjective $\mu \varepsilon \sigma o v$. A robber ( $\lambda \eta$ ๆб $\dagger \varsigma$, not a thief, $\kappa \lambda \varepsilon \pi \tau \eta \varsigma$ ) was on each side of Jesus (Mr 15:27; Mt 27:38) like Barabbas (Joh 18:40) and probably members of his band, malefactors (какоирүо) Luke terms them (Lu 23:32).

## John 19:19

Pilate wrote a title also ( $\varepsilon \gamma \rho \alpha \psi \varepsilon v \kappa \alpha \tau \tau \tau \lambda \circ v$ o Пєı入атоৎ). Only John tells us that Pilate himself wrote it and John alone uses the technical Latin word titlon (several times in inscriptions), for the board with the name of the criminal and the crime in which he is condemned; Mark (Mr 15:26) and Luke (Lu 23:28) use $\varepsilon \pi \gamma \gamma \rho \alpha \varphi \eta$ (superscription). Matthew (Mt 27:37 ) has simply autiav (accusation). The inscription in John is the fullest of the four and has all in any of them save the words "this is" (ovtoc $\varepsilon \sigma \tau \iota v$ ) in Mt 27:37.

John 19:20
Read ( $\alpha v \varepsilon \gamma v \omega \sigma \alpha v$ ). Second aorist active indicative of $\alpha v \alpha \gamma \imath \omega \omega \sigma \kappa \omega$. It was meant to be read. Latin was the legal and official language; Aramaic (Hebrew) was for the benefit of the people of Jerusalem; Greek was for everybody who passed by who did not know Aramaic. Many of the Jews mocked as they read the accusation. This item alone in John.

John 19:21
But that he said ( $\alpha \lambda \lambda^{\prime}$ ' о $\varepsilon \varepsilon \varepsilon เ v o \varsigma \varepsilon เ \pi \varepsilon v$ ). The chief priests were uneasy for fear that the joke in the mock title was on them instead of on Jesus. They were right in their fear.

John 19:22
What I have written I have written ( $о \boldsymbol{\varepsilon} \gamma \rho \alpha \varphi \alpha \gamma \varepsilon \gamma \rho \alpha \varphi \alpha$ ). With emphasis on the permanence of the accusation on the board. Pilate has a sudden spirit of stubbornness in this detail to the surprise of the chief priests. Technically he was correct, for he had condemned Jesus on this charge made by the chief priests.

John 19:23
Four parts ( $\tau \varepsilon \sigma \sigma \varepsilon \rho \alpha \mu \varepsilon \rho \eta$ ). There were four soldiers, the usual quaternion ( $\tau \varepsilon \tau \rho \alpha \delta \iota o v$, Ac 12:9) besides the centurion (Mr 15:39; Mt 27:54; Lu 23:47). The clothes ( $\mu$ ) $\tau \tau \alpha$, outer clothes) of the criminal were removed before the crucifixion and belonged to the soldiers. Luke (Lu 23:34) mentions the division of the garments, but not the number four. The four pieces would be the head gear, the sandals, the girdle, the $\tau \alpha \lambda \lambda 1 \theta$ (outer garment with fringes).

The coat was without seam (o $\chi \iota \tau \omega \nu \alpha \rho \alpha \varphi o \varsigma)$. For $\chi \iota \tau \omega \nu$ (the inner garment) see Mt 5:40. Aрачоя is compound of $\alpha$ privative and $\rho \alpha \pi \tau \omega$, to sew together, and so seamless (unsewed together), only here in N.T. It occurs elsewhere in Josephus, Ant. III. 6, 4.

Woven (vৎavtoc). Verbal (old word) from vৎaıv (some MSS. in Lu 12:27), only here in N.T.

John 19:24
Let us not rend it ( $\mu \eta \sigma \chi\llcorner\sigma \omega \mu \varepsilon v \alpha \nu \tau o v)$. M $\eta$ with first aorist active volitive subjunctive of $\sigma \chi\llcorner\omega$, to split. It was too valuable to ruin.

Cast lots $(\lambda \alpha \chi \omega \mu \varepsilon v)$. Second aorist active volitive subjunctive of $\lambda \alpha \gamma \chi \alpha v \omega$. The usual meaning is to obtain by lot (Lu 1:9; Ac 1:17). Field (Ot. Norv. 72) holds that no example has been found where it means "cast lots" as here, but Thayer cites Isocrates, p. 144b and Diod. 4, 63. John here quotes with the usual formula Ps 22:18 (LXX verbatim) and finds a
fulfilment here. The enemies of the Lord's Anointed treated him as already dead (Westcott) and so cast lots ( $\varepsilon \lambda \alpha \beta \circ v \kappa \lambda \eta \rho \circ v$, the common phrase as in Mt 27:35).

John 19:25
 of $\iota \sigma \tau \eta \mu$, to place, used as imperfect (intransitive) with $\pi \alpha \rho \alpha$ (beside) and the locative case. Vivid contrast this to the rude gambling of the soldiers. This group of four (or three) women interests us more. Matt. (Mt 27:55f. ) spoke of women beholding from afar and names three (Mary Magdalene, Mary the mother of James the less and of Joses, and the mother of the sons of Zebedee). Mark also (Mr 15:40 ) names three (Mary Magdalene, Mary the mother of James the less and of Joses, and Salome). They have clearly drawn near the Cross by now. John alone mentions the mother of Jesus in the group. It is not clear whether the sister of the mother of Jesus is Salome the mother of the sons of Zebedee or the wife of Clopas. If so, two sisters have the name Mary and James and John are cousins of Jesus. The point cannot be settled with our present knowledge.

John 19:26
His mother ( $\tau \eta \nu \mu \eta \tau \varepsilon \rho \alpha$ ). Common Greek idiom, the article as possessive.
Standing by ( $\pi \alpha \rho \varepsilon \sigma \tau \omega \tau \alpha$ ). Perfect active (intransitive) participle of $\pi \alpha \rho \iota \sigma \tau \eta \mu$, vivid and picturesque scene. The dying Saviour thinks of the comfort of his mother.

Whom he loved (ov $\eta \gamma \alpha \pi \alpha$ ). Imperfect active. Surely John is justified in inserting this phrase here. If John were his cousin, that helps explain why Jesus turns the care of his mother over to him. But the brothers of Jesus are not present and disbelieved his claims. John is the only one of the apostles with courage enough to take his stand with the women by the Cross. There is no disrespect in the use of "Woman" (Гvva) here as there was not in 2:4. This trust is to John, though Salome, John's own mother, was standing there.

John 19:27
Unto his own home ( $\varepsilon ı \varsigma \tau \alpha \iota \delta ı \alpha)$. See this same idiom and sense in 1:11; 16:32; Ac 21:6 . John had a lodging in Jerusalem, whether a house or not, and the mother of Jesus lived with him there.

John 19:28
Are now finished ( $\eta \delta \eta \tau \varepsilon \tau \varepsilon \lambda \varepsilon \sigma \tau \alpha$ ). Perfect passive indicative of $\tau \varepsilon \lambda \varepsilon \omega$. See same form in verse 30 . As in 13:1, where Jesus is fully conscious (knowing, $\varepsilon \delta \omega \varsigma$ ) of the meaning of his atoning death.

Might be accomplished ( $\tau \varepsilon \lambda \varepsilon เ \omega \theta \eta$ ). First aorist passive subjunctive of $\tau \varepsilon \lambda \varepsilon \iota \omega \omega$ rather than the usual $\pi \lambda \eta \rho \omega \theta \eta$ (verse 24) with $v$. $\alpha$. John sees the thirst of Jesus in Ps 69:21f. Jesus, of course, did not make the outcry in any mechanical way. Thirst is one of the severest agonies of crucifixion. For the "perfecting" of the Messiah by physical suffering see Heb 2:10; 5:7f. .

John 19:29

Was set (عкєıтo). Imperfect middle. John, as eyewitness, had noticed it there.
Of vinegar (o $\xi_{\text {ouc). Not vinegar drugged with myrrh (Mr 15:23) and gall (Mt 27:34) }}^{\text {) }}$ which Jesus had refused just before the crucifixion.

Sponge ( $\sigma \pi \circ \gamma \gamma \circ v$ ). Old word, in N.T. only here, Mr 15:36; Mt 27:48, our "sponge."
They put ( $\pi \varepsilon \rho 1 \theta \varepsilon v \tau \varepsilon \varsigma)$. Second aorist active participle of $\pi \varepsilon \rho \iota \tau i \theta \eta \mu$, to place around.
Upon hyssop ( $v \sigma \sigma \omega \pi \omega$ ).
A reed ( $\kappa \alpha \lambda \alpha \omega)$ as Mark and Matthew have it. The reed of the hyssop bush was only three or four feet long.

John 19:30
Had received ( $\varepsilon \lambda \alpha \beta \varepsilon v$ ). Second aorist active indicative of $\lambda \alpha \mu \beta \alpha v \omega$. Jesus took the vinegar (a stimulant), though he had refused the drugged vinegar. It is finished ( $\tau \varepsilon \tau \varepsilon \lambda \varepsilon \sigma \tau \alpha$ ). Same for as in verse 28. A cry of victory in the hour of defeat like veviкŋка in 16:33. Jesus knew the relation of his death to redemption for us (Mr 10:45; Mt 20:28; 26:28).

Bowed his head ( $\kappa \lambda \iota v a \varsigma \tau \eta v \kappa \varepsilon \varphi \alpha \lambda \eta v$ ). First aorist active participle of $\kappa \lambda \iota v \omega$. This vivid detail only in John.

Gave up his spirit ( $\pi \alpha \rho \varepsilon \delta \omega \kappa \varepsilon v$ to $\pi v \varepsilon \nu \mu \alpha$ ). With the quotation of Ps 31:5 according to Lu 23:46, "Father, into thy hands I commend my spirit" (the last of the seven sayings of Jesus on the Cross that are preserved for us). Jesus died with the words of this Psalm upon his lips. The apostle John had come back to the Cross.

John 19:31
The Preparation ( $\pi \alpha \rho \alpha \sigma \kappa \varepsilon u \eta$ ). Friday. See verse 14.
Might not remain ( $\mu \eta \mu \varepsilon \imath \eta \eta$ ). Negative final clause with $\imath v \alpha \mu \eta$ and first aorist active (constative) subjunctive of $\mu \varepsilon v \omega$.

A high day ( $\mu \varepsilon \gamma \alpha \lambda \eta$ ). A "great" day, since "the sabbath day following synchronized with the first day of unleavened bread which was a 'great' day" (Bernard). A double reason therefore for wanting the bodies removed before sunset when the Sabbath began.

That their legs might be broken (ıv катєа $\omega \omega \sigma เ v a v \tau o v \tau \alpha \sigma \kappa \varepsilon \lambda \eta$ ). Purpose clause with $w \alpha$ and the second aorist passive subjunctive of $\kappa \alpha \tau \alpha \gamma v v \mu$ with the augment retained in the subjunctive, a "false augment" common in later Greek as in the future in Mt 12:20 with this verb (Robertson, Grammar, p. 365). This crurifragium was done with a heavy mallet and ended the sufferings of the victim.

Legs ( $\sigma \kappa \varepsilon \lambda \eta$ ). Old word, here only in N.T.
Might be taken away ( $\alpha \rho \theta \omega \sigma \iota v$ ). First aorist passive subjunctive of $\alpha \iota \rho \omega$ with $\imath v \alpha$ also. John 19:32
Which was crucified with him ( $\tau 0 v \sigma u v \sigma \tau \alpha \cup \rho \omega \theta \varepsilon v \tau o \varsigma ~ \alpha u \tau \omega$ ). First aorist passive articular participle of $\sigma v v \sigma \tau \alpha v \rho o \omega$ with associative instrumental case. Cf. Paul's Xpıбт $\omega$ $\sigma u v \varepsilon \sigma \tau \alpha \cup \rho \omega \mu \alpha(\mathrm{Ga} 2: 19)$.

John 19:33

[^1]They brake not (ov катєa $\xi a v$ ). The augment is proper here (see 32).
John 19:34
With a spear ( $\lambda_{0} \gamma \chi \eta$ ). Instrumental case of this old word, here only in the N.T.
Pierced his side ( $\alpha \cup \tau o v \tau \eta \nu \pi \lambda \varepsilon u \rho a v \varepsilon \nu v \xi \varepsilon v$ ). First aorist active indicative of $\nu v \sigma \sigma \omega$, old word to pierce, here only in N.T., and $\pi \lambda \varepsilon u \rho a v$ (side), another old word, occurs in N.T. only here and Joh 20:20,25,27 .

Blood and water ( $\alpha \mu \alpha \kappa \alpha \nu \delta \omega \rho$ ). Dr. W. Stroud (Physical Cause of the Death of Christ) argues that this fact proves that the spear pierced the left side of Jesus near the heart and that Jesus had died literally of a broken heart since blood was mixed with water.

John 19:35
He that hath seen (o $\varepsilon \omega \rho \alpha \kappa \omega \varsigma$ ). Perfect active articular participle of opa $\omega$. John the Apostle was there and saw this fact (still sees it, in fact). This personal witness disproves the theory of the Docetic Gnostics that Jesus did not have a real human body.

He knoweth ( $\varepsilon \kappa \varepsilon เ v o \varsigma ~ o ı \delta \varepsilon v)$ ). That is John does like 9:37. It is possible that $\varepsilon \kappa \varepsilon เ v o c ~ m a y ~$ be a solemn appeal to God as in 1:33 or Christ as in 1Jo 3:5. Bernard argues that the final editor is distinguishing the Beloved Disciple from himself and is endorsing him. But the example of Josephus (War. III. 7, 16) is against this use of eкعıvoc. John is rather referring to himself as still alive.

## John 19:36

Be broken ( $\sigma u \nu \tau \rho 1 \beta \eta \sigma \varepsilon \tau \alpha$ ). Second future passive of $\sigma u \nu \tau \rho \iota \beta \omega$, to crush together. A free quotation of Ex 12:46 about the paschal lamb.

John 19:37
They pierced ( $\varepsilon \xi \varepsilon \kappa \varepsilon v \tau \eta \sigma \alpha v)$. First aorist active of $\varepsilon \kappa \kappa \varepsilon v \tau \varepsilon \omega$, late verb, correct translation of the Hebrew of Zec 12:10, but not like the LXX, in N.T. only here and Re 1:7.

John 19:38
But secretly for fear of the Jews ( $\kappa \varepsilon к \rho \nu \mu \mu \varepsilon v o \varsigma \delta \varepsilon \delta ı \alpha \tau о v \varphi о \beta \circ v \tau \omega v$ Iov $\alpha a \iota \omega v$ ). Perfect passive participle of $\kappa \rho \cup \pi \tau \omega$. An example of the rulers described in 12:41-43 who through cowardice feared to own their faith in Jesus as the Messiah. But it must be put down to the credit of Joseph that he showed courage in this darkest hour when the majority had lost heart.

That he might take away ( $\iota v \alpha \alpha \rho \eta$ ). Final clause with $\tau v \alpha$ and the first aorist active subjunctive of aıp $\omega$. Else the body of Jesus might have gone to the potter's field. Pilate gladly consented.

John 19:39

Nicodemus also ( $\kappa \alpha$ Nıко $\delta \eta \mu о \varsigma)$. The Synoptics tell about Joseph of Arimathea, but only John adds the help that Nicodemus gave him in the burial of Jesus, these two timid disciples, Nicodemus now at last taking an open stand.

At the first ( $\tau \mathrm{o} \pi \rho \omega \tau \mathrm{ov}$ ). Adverbial accusative and reference to 3:1f. .
Mixture ( $\mu \gamma \mu \alpha)$. Late word from $\mu \gamma \nu v \mu$, to mix, only here in the N.T. Many old MSS. have here $\varepsilon \lambda \iota \gamma \mu \alpha$ (roll), from $\varepsilon \lambda_{\iota \sigma \sigma \omega}$ (Heb 1:12), another late word here only in N.T. It was common to use sweet-smelling spices in the burial (2Ch 16:14).

Pound ( $\lambda_{\text {t } \tau \rho a \varsigma)}$ ). Late word for twelve ounces, in N.T. only here and 12:3. Nicodemus was a rich man and probably covered the entire body with the spices.

John 19:40
In linen cloths (o 0 ovioıs). Late diminutive for the old o $\theta$ ov $\eta$, used for ships' sails, in N.T. here and Lu 24:12 . Case here either locative or instrumental.

With the spices ( $\mu \varepsilon \tau \alpha \tau \omega \nu \alpha \rho \omega \mu \alpha \tau \omega v$ ). Late word $\alpha \rho \omega \mu \alpha$ for spices, from fumes.
To bury ( $\varepsilon v \tau \alpha \varphi \iota \alpha \zeta \varepsilon ı v)$. Late verb, from $\varepsilon v \tau \alpha \varphi \iota \alpha(\varepsilon v, \tau \alpha \varphi \circ \varsigma)$ the burial preparations of all sorts (flowers, perfumes, etc.), in N.T. only here and Mt 26:12 .

John 19:41
A garden (кптоৎ). See 18:1,26.
New (kaıvov). Fresh, unused.
Was never yet laid (ov $\delta \varepsilon \pi \omega \eta \nu \tau \varepsilon \theta \varepsilon \varepsilon \mu \varepsilon v o \varsigma)$. Periphrastic past perfect passive of $\tau ı \theta \eta \mu$. It was Joseph's mausoleum, a rock tomb hewn out of the mountain side (Mr 15:56; Mt 27:60; Lu 23:53 ), a custom common with the rich then and now. For royal tombs in gardens see 2Ki 21:18,26; Ne 3:16.

John 19:42
Was nigh at hand ( $\varepsilon \gamma \gamma v \varsigma \eta \nu$ ). This tomb was outside of the city, near a road as the Cross was, and in a garden. The hill looked like a skull and was probably Gordon's Calvary seen from the Mount of Olives today.

## John 20

John 20:1
Now on the first day of the week ( $\tau \eta \delta \varepsilon \mu \alpha \tau \omega v \sigma \alpha \beta \beta \alpha \tau \omega v$ ). Locative case of time when. Both Mark (Mr 16:2) and Luke (Lu 24:1) have this very idiom of the cardinal $\tau \eta \mu \mathrm{L}$, instead of the usual ordinal $\tau \eta \pi \rho \omega \tau \eta$ (first), an idiom common in the papyri and in the modern Greek (Robertson, Grammar, p. 671). In all three instances also we have the genitive plural $\tau \omega v \sigma \alpha \beta \beta \alpha \tau \omega v$ for "the week" as in Ac 20:7. The singular $\sigma \alpha \beta \beta \alpha \tau o v$ also occurs for "the week" as in Lu 18:12; Mr 16:9.

Cometh Mary Magdalene (Mapıa $\eta$ Maү $\delta \alpha \lambda \eta \nu \eta \varepsilon \rho \chi \varepsilon \tau \alpha$ ). Vivid historical present. Mary Magdalene is not to be confounded with Mary of Bethany.

While it was yet dark ( $\sigma \kappa о \tau \iota \varsigma \varsigma \varepsilon \tau$ оиб $\wp \varsigma$ ). Genitive absolute. For $\sigma \kappa о \tau \iota \alpha$ see Joh 6:17; Mt 10:27. Mark (Mr 16:2) says the sun was risen on their actual arrival. She started from the house while still dark.

Taken away ( $\eta \rho \mu \varepsilon v o v$ ). Perfect passive participle of $\alpha \iota \rho \omega$, predicate accusative in apposition with tov $\lambda_{1} \theta \mathrm{o} v$.

John 20:2
Runneth ( $\tau \rho \varepsilon \chi \varepsilon$ ). Vivid dramatic present indicative of $\tau \rho \varepsilon \chi \omega$. John deals only with Mary Magdalene. She left the tomb at once before the rest and without seeing the angels as told in the Synoptics (Mr 16:2-8; Mt 28:5-8; Lu 24:1-8). Luke (Lu 24:9-12 ) does not distinguish between the separate report of Mary Magdalene and that of the other women.

To Simon Peter ( $\pi \rho \circ \varsigma \Sigma \mu \omega v \alpha \Pi \varepsilon \tau \rho o v$ ). Full name as usual in John and back with John and the other disciples. The association of Peter and the other disciple in Joh 18-21 is like that between Peter and John in Ac 1-5.

Loved ( $\varepsilon \varphi \backslash \lambda \varepsilon$ ). Imperfect of $\varphi \backslash \lambda \varepsilon \omega$ for which see 5:20; 11:3 and for distinction from аү $\alpha \pi \alpha \omega$ see 11:5; 13:23; 21:7,15,17.

They have taken away ( $\eta \rho \alpha v$ ). First aorist active indicative of $\alpha \rho \rho \omega$, indefinite plural.
We know not (ouk oı $\delta a \mu \varepsilon v$ ). Mary associates the other women with her in her ignorance. For $\varepsilon \theta \eta \kappa \alpha \nu$ (have laid) see 19:42. Mary fears a grave robbery. She has no idea of the resurrection of Jesus.

John 20:3
They went ( $\eta \rho \chi$ оvтo). Imperfect middle picturing the scene, "they were going." The two started instantly ( $\varepsilon \xi \eta \lambda \theta \varepsilon v$, aorist active indicative).

John 20:4
They both (o $\delta v o$ ). "The two" (Peter and the other disciple whom Jesus loved).
Ran together ( $\varepsilon \tau \rho \varepsilon \chi \circ v$ ouov). Imperfect active of $\tau \rho \varepsilon \chi \omega$. It was a race in eagerness to reach the tomb of Jesus.

Outran Peter ( $\pi \rho о \varepsilon \delta \rho \alpha \mu \varepsilon v \tau \alpha \chi \varepsilon ו \circ v ~ \tau o v ~ П \varepsilon \tau \rho о v) . ~ S e c o n d ~ a o r i s t ~ a c t i v e ~ i n d i c a t i v e ~ o f ~$ $\pi \rho о \tau \rho \varepsilon \chi \omega$, old verb, in N.T. only here and Lu 19:4, to run on before (ahead). "He ran ahead more swiftly (see Joh 13:27) than Peter" (ablative case after comparative adverb $\tau \alpha \chi \varepsilon \circ \circ$, Koine for older $\theta a \sigma \sigma o v)$.

First ( $\pi \rho \omega \tau \sigma \varsigma)$. Predicative nominative (not adverb $\pi \rho \circ \tau \sigma v$ ) and superlative used where only two involved. John won the race.

John 20:5
Stooping and looking in ( $л а р а к и \psi \alpha \varsigma) . ~ O r i g i n a l l y ~ t o ~ s t o o p ~ a n d ~ l o o k, ~ b u t ~ i n ~ t h e ~ L X X ~$ (Ge 26:8; Jud 5:28; 1 Ki 6:4 , etc.) and the papyri rather just to peep in and so Field (Ot. Norv.) urges here. See also verse 11; Lu 24:12 (the verse bracketed by Westcott and Hort). For o月ovia (linen cloth) see Joh 19:40 .

Lying ( $\kappa \varepsilon \mu \varepsilon \varepsilon \alpha)$ ). Present middle participle of $\kappa \varepsilon \mu \mu \alpha$, predicative accusative. John notices this fact at once. If the body had been removed, these clothes would have gone also. John's timid nature made him pause (yet, $\mu \varepsilon v \tau 0$, however).

John 20:6
Entered and beholdeth ( $\varepsilon เ \sigma \eta \lambda \theta \varepsilon v \kappa \alpha \theta \varepsilon \omega \rho \varepsilon$ ). Aorist active and present active indicative. Peter impulsively went on in and beholds ( $\theta \varepsilon \omega \rho \varepsilon$, vivid term again, but of careful notice, $\theta \varepsilon \omega \rho \varepsilon \omega$, not a mere glance $\beta \lambda \varepsilon \pi \omega$ such as John gave in verse 5).

John 20:7
The napkin ( $\tau 0$ oovסapıov). Already in 11:44 which see. This napkin for the head was in a separate place.

Rolled up ( $\varepsilon \nu \tau \varepsilon \tau \cup \lambda ı \gamma \mu \varepsilon v o v$ ). Perfect passive participle, predicate accusative like $\kappa \varepsilon \mu \varepsilon v o \nu$, from $\varepsilon v \tau \cup \lambda \iota \sigma \sigma \omega$, late verb, to wrap in, to roll up, already in Mt 27:59; Lu 23:53. It was arranged in an orderly fashion. There was no haste.

By itself ( $\chi \omega \rho \iota \varsigma)$. Old adverb, "apart," "separately."
John 20:8
Then therefore ( $\tau \circ \tau \varepsilon \mathrm{ovv}$ ). After Peter in time and influenced by the boldness of Peter.
And he saw and believed ( $\kappa \alpha \varepsilon \iota \delta \varepsilon v \kappa \alpha \varepsilon \pi \iota \sigma \tau \varepsilon v \sigma \varepsilon v$ ). Both aorist active indicative (second and first). Peter saw more after he entered than John did in his first glance, but John saw into the meaning of it all better than Peter. Peter had more sight, John more insight. John was the first to believe that Jesus was risen from the tomb even before he saw him. According to Lu 24:12 Peter went away "wondering" still. The Sinaitic Syriac and 69 and 124 wrongly read here "they believed." John was evidently proud to be able to record this great moment when he believed without seeing in contrast to Thomas (20:29). Peter and John did not see the angels.

John 20:9
For ( $\gamma \alpha \rho$ ). Explanatory use of $\gamma \alpha \rho$.

The Scripture ( $\tau \eta \nu \gamma \rho a \varphi \eta \nu$ ). Probably Ps 16:10. Jesus had repeatedly foretold his resurrection, but that was all forgotten in the great sorrow on their hearts. Only the chief priests and Pharisees recalled the words of Jesus (Mt 27:62ff. ).

Must $(\delta \varepsilon)$. For this use of $\delta \varepsilon$ concerning Christ's death and resurrection see $\mathrm{Mr} 8: 31$; Mt 26:54; Lu 9:22; 17:25; 22:37; 24:7,26,44; Joh 3:14; 12:34; Ac 1:16. Jesus had put emphasis on both the fact and the necessity of his resurrection which the disciples slowly perceived. John 20:10
Unto their own home ( $\pi \rho \circ \varsigma \alpha v \tau 0 \cup \varsigma)$. "To themselves." Luke (Lu 24:12) has $\pi \rho \circ \varsigma \alpha v \tau \circ v$ about Peter ("to his home"). This use of the reflective pronoun for home (literally, "to themselves"), like the French chez eux, occurs in Josephus (Ant. VII. 4, 6). John had taken the mother of Jesus to his home ( $19: 27$ ) and so he now hurried home to tell her the glorious news as he believed.

John 20:11
Was standing (เбтๆкє). Past perfect of $\iota \sigma \tau \eta \mu$ as imperfect as in 19:25.
At the tomb ( $\pi \rho \circ \varsigma \tau \omega \mu \nu \eta \mu \varepsilon \epsilon \omega$ ). Проৎ (in front of) with locative while $\pi \alpha \rho \alpha$ (by the side of) with locative in 19:25. Pathetic and common picture of a woman weeping by the tomb. See 11:31.

As she wept ( $\omega \varsigma \varepsilon \kappa \lambda \alpha \varepsilon v$ ). Imperfect, "as she was weeping."
She stooped and looked ( $\pi \alpha \rho \varepsilon \kappa \nu \psi \varepsilon v)$. Aorist active indicative of $\pi \alpha \rho \alpha \kappa v \pi \tau \omega$ for which see verse 5 . Mary "peeped into" the tomb, but did not enter.

John 20:12
Beholdeth ( $\theta \varepsilon \omega \rho \varepsilon$ ). Vivid historical present again as in verses 6,14. Peter and John had not seen the two angels. Westcott suggests an "economy" in such manifestations as the explanations. Better our own ignorance as to the reason why only the women saw them. Angels were commonly believed to be clad in white. See Mr 16:5 (a young man in a white robe), Mt 28:5 (the angel), Lu 24:4 (two men in dazzling apparel). For other angels in John's Gospel see 1:41; 12:29; 20:12.

Had lain (عкعıто). Imperfect in progressive sense, "had been lying," though not there now.

John 20:13
I do not know (ovk ot $\delta \alpha$ ). Singular here, not plural as in verse 2, because clearly Mary is alone here. But the problem is the same. She did not see Peter and John at the tomb.

John 20:14
She turned herself back $(\varepsilon \sigma \tau \rho \alpha \varphi \eta \varepsilon \iota \varsigma \tau \alpha о \pi \iota \sigma \omega)$. Second aorist passive indicative of $\sigma \tau \rho \varepsilon \varphi \omega$ in an intransitive and almost reflective sense. In the disappearance of the aorist middle before the aorist passive see Robertson, Grammar, p.817. See also $\sigma \tau \rho \alpha \varphi \varepsilon \iota \sigma \alpha$ (second

Standing ( $\varepsilon \sigma \tau \omega \tau \alpha$ ). Second perfect active (intransitive) of $\iota \sigma \tau \eta \mu$. Instinctively Mary felt the presence of some one behind her.

Was ( $\varepsilon \sigma \tau \iota v)$. Present active indicative retained in indirect discourse after $\eta \iota \delta \varepsilon$ (knew).
John 20:15
Sir (Kupıe). Clearly not "Lord" here, for she thought him to be "the gardener" (o $\kappa \eta \pi о \cup \rho о \varsigma)$, old word ( $\kappa \eta \pi о \sigma$, oupo¢), keeper of the garden, only here in the N.T.

If thou hast borne him hence ( $\varepsilon \sigma v \varepsilon \beta \alpha \sigma \tau \alpha \sigma o \varsigma \alpha v \tau o v)$. Condition of the first class. Note emphasis on $\sigma v$ (thou). A new idea struck Mary as mistaken as the other one. Jesus had repeated the question of the angels, but she did not recognize him.

And I ( $\kappa \alpha \gamma \omega$ ). Emphasis and crasis.
John 20:16
Mary (Марıац). Aramaic form in Aleph B W, though Mapıa in 19:25. Clearly the old familiar tone of Jesus was in the pronunciation of her name.

Rabboni (Paßßouve). Aramaic again for $\Delta \iota \delta \alpha \sigma \kappa \alpha \lambda \varepsilon$ (Teacher), "my Teacher." In N.T. only here and Mr 10:51 though practically the same as Paßß. See 11:28 for "the Teacher" (Rabbi). These two simple words tell the great fact that Christ is risen and Mary has seen him. One says little in really great moments.

John 20:17
Touch me not ( $\mu \eta \mu \circ v a \pi \tau o v$ ). Present middle imperative in prohibition with genitive case, meaning "cease clinging to me" rather than "Do not touch me." Jesus allowed the women to take hold of his feet ( $\varepsilon \kappa \rho \alpha \tau \eta \sigma \alpha v$ ) and worship ( $\pi \rho о \sigma \varepsilon \kappa v v \eta \sigma \alpha v$ ) as we read in Mt 28:9. The prohibition here reminds Mary that the previous personal fellowship by sight, sound, and touch no longer exists and that the final state of glory was not yet begun. Jesus checks Mary's impulsive eagerness.

For I am not yet ascended (ov $\omega \omega \gamma \alpha \rho \alpha v \alpha \beta \varepsilon \beta \eta \kappa \alpha$ ). Perfect active indicative. Jesus is here at all only because he has not yet gone home. He had said ( 16:7) that it was good for them that he should go to the Father when the Holy Spirit will come through whom they will have fellowship with the Father and Christ.

My God ( $\theta$ sou $\mu \mathrm{\mu ov}$ ). Jesus had said "My God" on the Cross (Mr 15:34). Note it also in Re 3:2 . So Paul in Ro 15:6, etc., has "the God and Father of our Lord Jesus Christ."

John 20:18
And telleth ( $\alpha \gamma \gamma \varepsilon \lambda \lambda o v \sigma \alpha$ ). Present active participle, "announcing."
 always carry in her heart that vision (picture) of the Risen Christ. She tells this fact before she delivers Christ's message to the brethren of Christ.

How that. No word in the Greek, but a conjunction like $\omega \varsigma$ is implied. Ho here is recitative. The disciples (brethren) did not believe Mary's story nor that of the other women
(Lu 24:11; Mr 16:11). Paul does not mention the vision to Mary or the women in 1Co 15:5-7 . But Mary Magdalene was the first one to see the Risen Lord.

John 20:19
When therefore it was evening on that day (ovбףৎ ouv oчıaৎ $\tau \eta \eta \mu \varepsilon \rho \alpha \varepsilon \kappa \varepsilon เ \nu \varepsilon$ ). Genitive absolute with $o \psi \iota \alpha$ ( $о \psi \iota \rho$, late), old word with $\omega \rho \alpha$ (hour) understood and here for the time from six to nine ( $6: 16$ ) and the locative case of time with $\eta \mu \varepsilon \rho \alpha$ (day). John often uses this note of time ( $1: 39 ; 5: 9 ; 11: 53 ; 14: 20 ; 16: 23,26$ ). The addition of $\tau \eta \mu \alpha \sigma \alpha \beta \beta \alpha \tau \omega \nu$ (see $20: 1$ for this use of $\mu \iota \alpha$ like $\pi \rho \omega \tau \eta$ ) proves that John is using Roman time, not Jewish, for here evening follows day instead of preceding it.

When the doors were shut ( $\tau \omega \nu \theta \nu \rho \omega \nu \kappa \varepsilon \kappa \lambda \varepsilon \varepsilon \sigma \mu \varepsilon \nu \omega v$ ). Genitive absolute again with perfect passive participle of $\kappa \lambda \varepsilon เ \omega$, shut to keep the Jews out. News of the empty tomb had already spread (Mt 28:11). See Joh 7:13 for the phrase "for fear of the Jews"; cf. 12:42.

Stood in the midst ( $\varepsilon \sigma \tau \eta \varepsilon เ \varsigma \tau o \mu \varepsilon \sigma o v)$. Second aorist (ingressive) active (intransitive) of $ו \sigma \tau \eta \mu$, "stepped into the midst."

Peace be unto you (Et $\rho \eta \eta \nu \mu \tau \nu$ ). The usual oriental salutation as in verses 21,26; Lu 24:36, here with probable reference to Joh 14:27 (Christ's legacy of peace).

John 20:20
Showed ( $\varepsilon \delta \varepsilon \iota \xi \varepsilon \nu)$. First aorist active indicative of $\delta \varepsilon ı \kappa \nu v \mu$. This body, not yet glorified, retained the marks of the nails and of the soldier's spear, ample proof of the bodily resurrection against the modern view that only Christ's "spirit" arose and against the Docetic notion that Jesus had no actual human body. Luke (Lu 24:39f. ) adds feet to hands and side.

Were glad ( $\varepsilon \chi \propto \rho \eta \sigma \alpha v$ ). Second aorist passive indicative of $\chi \alpha \iota \omega$. Jesus had said ( 16:22) that it would be so. Luke adds (Lu 24:41) that they "disbelieved for joy." It was too good to be true, though terror had first seized them when Jesus appeared (Lu 24:37) because of the suddenness of Christ's appearance and their highly wrought state.

John 20:21
Even so send I you ( $\kappa \alpha \gamma \omega \pi \varepsilon \mu \pi \omega v \mu \alpha \varsigma)$. Jesus has often spoken of the Father's sending him using both $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$ and $\pi \varepsilon \mu \pi \omega$. Here he employs both words in practically the same sense. Jesus still bears the Commission of the Father (perfect active indicative). For this balanced contention (as ... so) see 6:57; 10:15. This is the first of the three commissions given by the Risen Christ (another on the mountain in Galilee (Mt 28:16-20; 1Co 15:6), another on the Mount of Olives (Lu 24:44-51; Ac 1:3-11).

John 20:22
He breathed on them ( $\varepsilon \nu \varepsilon \varphi v \sigma \eta \sigma \varepsilon v)$. First aorist active indicative of $\varepsilon \mu \varphi v \sigma \alpha \omega$, late verb, here only in N.T. though eleven times in the LXX and in the papyri. It was a symbolic art with the same word used in the LXX when God breathed the breath of life upon Adam (Ge 2:7 ). It occurs also in Eze 37:9. See Christ's promise in Joh 16:23 . Jesus gives the disciples a foretaste of the great pentecost.

Receive ye the Holy Ghost ( $\lambda \alpha \beta \varepsilon \tau \varepsilon \pi \nu \varepsilon \nu \mu \alpha \alpha \gamma ı v$ ). Second aorist (ingressive) active imperative of $\lambda \alpha \mu \beta \alpha v \omega$. Note absence of article here ( $\pi v \varepsilon \nu \mu \alpha \alpha \gamma เ \circ v$ ) though to $\pi \nu \varepsilon \nu \mu \alpha$ тo a $\alpha$ ıov in 14:26. No real distinction is to be observed, for Holy Spirit is treated as a proper name with or without the article.

John 20:23
Whosesoever sins ye forgive ( $\alpha \nu \tau \imath v \omega \nu \alpha \varphi \eta \tau \varepsilon \tau \alpha \varsigma ~ \alpha \mu \alpha \rho \tau ı \alpha \varsigma)$. "If the sins of any ye forgive" ( $\alpha \varphi \eta \tau \varepsilon$, second aorist active subjunctive with $\alpha v$ in the sense of $\varepsilon \alpha \nu$ ), a condition of the third class. Precisely so with "retain" ( $\kappa \alpha \tau \eta \tau \varepsilon$, present active subjunctive of $\kappa \rho \alpha \tau \varepsilon \omega$ ).

They are forgiven ( $\alpha \varphi \varepsilon \omega \nu \tau \alpha$ ). Perfect passive indicative of $\alpha \varphi \not \supsetneq \mu$, Doric perfect for $\alpha \varphi \varepsilon ı \tau \alpha$.

Are retained ( $\kappa \varepsilon \kappa \rho \alpha \tau \eta \nu \tau \alpha$ ). Perfect passive indicative of $\kappa \rho \alpha \tau \varepsilon \omega$. The power to forgive sin belongs only to God, but Jesus claimed to have this power and right (Mr 2:5-7 ). What he commits to the disciples and to us is the power and privilege of giving assurance of the forgiveness of sins by God by correctly announcing the terms of forgiveness. There is no proof that he actually transferred to the apostles or their successors the power in and of themselves to forgive sins. In Mt 16:19; 18:18 we have a similar use of the rabbinical metaphor of binding and loosing by proclaiming and teaching. Jesus put into the hands of Peter and of all believers the keys of the Kingdom which we should use to open the door for those who wish to enter. This glorious promise applies to all believers who will tell the story of Christ's love for men.

John 20:24
Didymus ( $\Delta \mathrm{t} \delta u \mu \mathrm{o}$ ). The same expression applied to Thomas in 11:16; 21:2, but nowhere else in N.T. Old word for twin (double), "the pessimist of the apostolic band" (Bernard). The term twelve is still applied to the group, though Judas, the traitor, is dead.

John 20:25
We have seen the Lord ( $\varepsilon \omega \rho \alpha \kappa \alpha \mu \varepsilon v$ tov кирıоv). The very language in the plural that Mary Magdalene had used ( $20: 18$ ) when no one believed her.

Except I shall see ( $\varepsilon \alpha \nu \mu \eta \stackrel{\delta}{ }$ ). Negative condition of third class with $\varepsilon \alpha v$ and second aorist active subjunctive and so as to $\beta \alpha \lambda \omega$ (from $\beta a \lambda \lambda \omega$ ) "and put."

The print ( $\tau 0 v \tau \cup \pi \circ v$ ). The mark or stamp made by the nails, here the original idea. Various terms as in Ac 7:44; 1Ti 4:12 . Finally our "type" as in Ro 5:14. Clearly the disciples had told Thomas that they had seen the tutov of the nails in his hands and the spear in his side.

I will not believe ( $o v \mu \eta \pi \iota \sigma \tau \varepsilon \cup \sigma \omega$ ). Strong refusal with $o v \mu \eta$ (doubtful negative) and first aorist active subjunctive (or future indicative).

John 20:26
After eight days ( $\mu \varepsilon \theta^{\prime} \eta \mu \varepsilon \rho \alpha \varsigma$ ок $\tau \omega$ ). That is the next Sunday evening, on the eighth day in reality just like "after three days" and "on the third day."

Within $(\varepsilon \sigma \omega)$. Apparently in the same room as before.
Cometh ( $\varepsilon \rho \chi \varepsilon \tau \alpha)$. Vivid dramatic present. The other items precisely as in verse 19 save Thomas was with them.

John 20:27
Then saith he to Thomas ( $\varepsilon ו \tau \alpha \lambda \varepsilon \gamma \varepsilon \tau \omega \Theta o \mu \alpha)$. Jesus turns directly to Thomas as if he had come expressly for his sake. He reveals his knowledge of the doubt in the mind of Thomas and mentions the very tests that he had named (25).

Be not faithless ( $\mu \eta \gamma \iota v o v a \pi \iota \sigma \tau \circ \varsigma)$. Present middle imperative of $\gamma \iota v o \mu \alpha$ in prohibition, "stop becoming disbelieving." The doubt of Thomas in the face of the witness of the others was not a proof of his superior intelligence. Sceptics usually pose as persons of unusual mentality. The medium who won Sir Arthur Conan Doyle to spiritualism has confessed that it was all humbug, but he deceived the gullible novelist. But Thomas had carried his incredulity too far. Note play on $\alpha \pi \iota \sigma \tau \circ \varsigma$ (disbelieving) and $\pi \iota \sigma \tau \circ \varsigma$ (believing).

John 20:28
My Lord and my God (Но кирıо $\mu$ оv ка о $\theta \varepsilon о \varsigma ~ \mu о v)$. Not exclamation, but address, the vocative case though the form of the nominative, a very common thing in the Koine. Thomas was wholly convinced and did not hesitate to address the Risen Christ as Lord and God. And Jesus accepts the words and praises Thomas for so doing.

John 20:29
Thou hast believed ( $\pi \varepsilon \pi \iota \sigma \tau \varepsilon \cup \kappa \alpha \varsigma)$. Perfect active indicative. Probably interrogative, but "it was sight, not touch that convinced Thomas" (Bernard).

And yet ( $\kappa \alpha$ ). Clear use of $\kappa \alpha$ in the adversative sense. Thomas made a noble confession, but he missed the highest form of faith without the evidence of the senses. Peter ( $1 \mathrm{Pe} 1: 8$ ) uses language that seems like a reminiscence of the words of Jesus to Thomas which Peter heard.

John 20:30
Many other signs ( $\pi 0 \lambda \lambda \alpha \alpha \lambda \lambda \alpha \sigma \eta \mu \varepsilon \iota \alpha)$. Not only those described in the Synoptic Gospels or referred to in general statements, but many alluded to in John's Gospel (2:23; 4:45; 12:37).

Are not written (ovk $\varepsilon \sigma \tau \iota \nu \gamma \varepsilon \gamma \rho \alpha \mu \mu \varepsilon \nu \alpha$ ). Periphrastic perfect passive indicative of $\gamma \rho \alpha \varphi \omega$, do not stand written, are not described "in this book." John has made a selection of the vast number wrought by Jesus "in the presence of the disciples" ( $\varepsilon \nu \omega \pi \iota \rho \tau \omega \nu \mu \alpha \theta \eta \tau \omega \nu$ ), common idiom in Luke, not in Mark and Matthew, and by John elsewhere only in 1Jo 3:22 . John's book is written with a purpose which he states.

John 20:31
Are written $(\gamma \varepsilon \gamma \rho \alpha \pi \tau \alpha)$. Perfect passive indicative of $\gamma \rho \alpha \varphi \omega$, "have been written" by John.

That ye may believe ( $\llcorner v a \pi / \sigma \tau \varepsilon v \eta \tau \varepsilon$ ). Purpose with $\mathrm{v} \alpha$ and the present active subjunctive of $\pi \iota \sigma \tau \varepsilon v \omega$, "that you may keep on believing." The book has had precisely this effect of continuous and successive confirmation of faith in Jesus Christ through the ages.
 named Jesus is identical with the Messiah (the Anointed One) as opposed to the Cerinthian separation of the Jesus of history and the Christ (arov) of theology. And the Docetic notion of a phantom body for Jesus with no actual human body is also false. Jesus is the Son of God with all that this high term implies, the Logos of Joh 1:1-18 (the Prologue). "Very God of very God," Incarnate Revealer of God. But there is a further purpose.

And that believing ye may have life in his name ( $\kappa \alpha เ v \alpha \pi \iota \sigma \tau \varepsilon v o v \tau \varepsilon \varsigma \zeta \omega \eta \nu \varepsilon \chi \eta \tau \varepsilon \varepsilon \nu$ $\tau \omega$ оvoцat $\alpha \cup \tau o v)$. Note present participle $\pi \iota \sigma \tau \varepsilon v o v \tau \varepsilon \varsigma$ (continuing to believe) and the present active subjunctive $\varepsilon \chi \eta \tau \varepsilon$ (keep on having). "Life" ( $\zeta \omega \eta \nu$ ) is eternal life so often mentioned in this Gospel, life to be found only in the name (and power) of Jesus Christ the Son of God. This verse constitutes a fitting close for this wonderful book and John may at first have intended to stop here. But before he published the work he added the Epilogue (Chapter XXI) which is written in the same style and gives a beautiful picture of the Risen Christ with a side-light on John and Peter (restored to fellowship).

## John 21

John 21:1
Manifested himself ( $\varepsilon \varphi \alpha v \varepsilon \rho \circ \sigma \varepsilon v \varepsilon \alpha u \tau o v$ ). First aorist active indicative of $\varphi \alpha v \varepsilon \rho \circ \omega$ with the reflexive pronoun (cf. 7:4; 13:4). For the passive see 1:31; 21:14 . Jesus was only seen during the forty days now and then (Ac 1:3), ten instances being recorded. The word pavepow is often used of Christ on earth (Joh 1:31; 2:11; 1Pe 1:20; 1Jo 1:2), of his works (Joh 3:5), of the second coming (1Jo 2:28), of Christ in glory (Col 3:4; 1Jo 3:2 ).

At ( $\varepsilon \pi$ ). By or upon.
Of Tiberias ( $\tau \eta \varsigma T \iota \beta \varepsilon \rho \iota \alpha \delta$ ¢ $)$. As in 6:1 instead of the usual "Sea of Galilee." Tiberias, the capital city of Galilee, gave this epithet to the Sea of Galilee. This is not the appearance in Galilee prearranged by Jesus (Mr 16:7; Mt 28:7,16).

John 21:2
There were together ( $\eta \sigma \alpha v$ o $\eta \circ v$ ). These seven (Peter, Thomas, Nathanael, the sons of Zebedee, and two others). We know that the sons of Zebedee were James and John (Mt 4:21), mentioned by name nowhere in John's Gospel, apparently because John is the author. We do not know who the "two others of his disciples" were, possibly Andrew and Philip. It seems to me to be crass criticism in spite of Harnack and Bernard to identify the incident here with that in Lu 5:1-11. There are a few points of similarity, but the differences are too great for such identification even with a hypothetical common source.

John 21:3
I go a fishing (v $\operatorname{\tau } \alpha \gamma \omega \alpha \lambda_{\iota \varepsilon v \varepsilon ı v) . ~ T h e ~ p r e s e n t ~ a c t i v e ~ i n f i n i t i v e ~}^{\alpha} \lambda_{\iota \varepsilon v \varepsilon ı v ~ e x p r e s s e s ~ p u r p o s e ~}^{\text {en }}$ as often. It is a late verb from $\alpha \lambda^{\prime} \varepsilon \cup \varsigma$ (fisherman) and occurs in Jer 16:16, in Philo, Plutarch, and one papyrus. Peter's proposal was a natural one. He had been a fisherman by practice and they were probably waiting in Galilee for the appointed meeting with Christ on the mountain. Andrew and Peter, James and John were fishermen also. Peter's proposition met a ready response from all.

They took ( $\varepsilon \pi \iota \alpha \sigma \alpha v$ ). First aorist active indicative of $\pi \iota \alpha \zeta \omega$, Doric form for $\pi \iota \varepsilon \zeta \omega$, to catch.

John 21:4
When day was now breaking ( $\pi \rho \omega \iota \alpha \varsigma \eta \delta \eta \gamma \iota \nu \quad \mu \varepsilon v \eta \varsigma)$. Genitive absolute and note present middle participle (dawn coming on and still dark). In Mt 27:1 the aorist participle

Was ( $\varepsilon \sigma \tau \iota v)$. Present indicative retained in indirect assertion.
John 21:5
Children ( $\Pi \downarrow \iota \delta \iota \alpha)$. Diminutive of $\pi \alpha \iota \varsigma$ and used here alone by Jesus in addressing his disciples. It is a colloquial expression like "my boys." The aged Apostle John uses it in 1Jo 2:13,18 .

Have ye aught to eat? ( $\mu \eta \tau \pi \rho о \sigma \varphi a \gamma \circ \sim \varepsilon \chi \varepsilon \tau \varepsilon ;$ ). The negative answer is expected by this polite inquiry as in $4: 29$. The rare and late word $\pi \rho o \sigma \varphi \alpha \gamma \iota v$ from the root $\varphi a \gamma(\varepsilon \sigma \theta \iota \omega$, to eat) and $\pi \rho \circ \varsigma$ (in addition) was used for a relish with bread and then for fish as here. So in the papyri. Nowhere else in the N.T.

John 21:6
The right side ( $\varepsilon \iota \varsigma \tau \alpha \delta \varepsilon \xi \iota \alpha \mu \varepsilon \rho \eta$ ). Jesus knew where the fish were. For "net" ( $\delta \iota \kappa \tau v o v$ ) see Mt 4:20, here alone in John.

Were now not able to draw it (оงкє $\alpha \cup \tau \circ \varepsilon \lambda \kappa \cup \sigma \alpha \iota \sigma \chi \cup \circ \nu$ ). Imperfect active picturing the disciples tugging at the net.

John 21:7
It is the Lord (о кטрıৎ $\varepsilon \sigma \tau \iota v)$. John's quick insight appears again.
Girt his coat about him ( $\tau 0 \nu \varepsilon \pi \varepsilon \nu \delta v \tau \eta \nu \delta เ \varepsilon \zeta \omega \sigma \alpha \tau 0$ ). First aorist middle (indirect) indicative with which note $\delta \iota \zeta \zeta \omega \sigma \varepsilon v \varepsilon a v \tau o v$ in 13:4. Apparently Peter threw on the upper garment or linen blouse ( $\varepsilon \pi \varepsilon v \delta v \tau \eta \nu$ ) worn by fishers over his waistcloth and tucked it under his girdle.

John 21:8
In the little boat ( $\tau \omega \pi \lambda o \iota \alpha \rho \iota \omega$ ). Locative case of $\pi \lambda o \iota \alpha \rho \circ v$ (diminutive) for the larger boat ( $\pi \lambda$ otov, verses 3,6 ) could come no closer to shore. But the words seem interchangeable in $6: 17,19,21,22,24$.

About two hundred cubits off ( $\omega \varsigma \alpha \pi$ о $\pi \eta \chi \omega v \delta \iota \alpha \kappa о \sigma \iota \omega v$ ). For $\pi \eta \chi \nu \varsigma$, cubit, see Mt 6:27 and for $\omega \varsigma$ a $\pi$ o see 11:18.

Dragging ( $\sigma \cup \rho o v \tau \varepsilon \varsigma)$. Present active participle of $\sigma \cup \rho \omega$ for which see Ac 8:3.
John 21:9
Got out ( $\alpha \pi \varepsilon \beta \eta \sigma \alpha v$ ). As in Lu 5:2 .
They see ( $\beta \lambda \varepsilon \pi \sigma \cup \sigma \iota v$ ). Vivid historical present.
A fire of coals ( $\alpha v \theta \rho \alpha \kappa \iota \alpha v)$. See 18:18 for this word. Cf. our "anthracite."
There ( $\kappa \varepsilon \iota \mu \varepsilon \nu \eta \nu)$. Lying as placed, present middle participle of $\kappa \varepsilon \iota \mu \alpha$.
Fish (o $\psi \alpha \rho \iota o v$ ). As in 6:9,11, like $\pi \rho о \sigma \varphi \alpha \gamma \iota \sim v$ above.
Laid thereon ( $\varepsilon \pi \iota \kappa \varepsilon \iota \mu \varepsilon \nu o v)$. So broiling with bread ready (toast).
John 21:10
Which $(\omega v)$. Ablative case by attraction from $\alpha$ to agree with $o \psi \alpha \rho \iota \omega v$. They had caught the fish by Christ's direction.

John 21:11
Went up ( $\alpha v \varepsilon \beta \eta$ ). Into the little boat or dinghy.
Drew ( $\varepsilon \iota \lambda \kappa v \sigma \varepsilon v)$. Same verb as $\varepsilon \lambda \kappa v \sigma \alpha$ in verse 6 . Peter now did what they had failed to do.

Three $(\tau \rho \iota \omega v)$. The addition "three" to the "hundred and fifty" looks as if they were actually counted these "large" ( $\mu \varepsilon \gamma \alpha \lambda \omega v)$ fish. It was a great fish story that John recalls vividly.

Was not rent (ouk $\varepsilon \sigma \chi \iota \sigma \theta \eta$ ). First aorist passive indicative of $\sigma \chi\llcorner\zeta \omega$, to split (our word "schism").

John 21:12
Break your fast ( $\alpha \rho \iota \sigma \tau \eta \sigma \alpha \tau \varepsilon$ ). First aorist active imperative of $\alpha \rho \iota \sigma \tau \alpha \omega$ from $\alpha \rho \iota \sigma \tau o v$, first to breakfast, as here and then later to dine as in Lu 11:37. What a delightful breakfast of fresh broiled fish just caught (verse 10) with the hush of joyful surprise in the presence of the Risen Lord.

Durst ( $\varepsilon \tau \circ \lambda \mu \alpha)$ Imperfect active of $\tau 0 \lambda \mu \alpha \omega$. The restraint of silence continued.
John 21:13
Taketh the bread, and giveth them ( $\lambda \alpha \mu \beta \alpha v \varepsilon$ tov ap тov ка $\delta \iota \delta \omega \sigma ı v$ avtoı). Vivid presents again. Jesus acts as host at this early breakfast, his last meal with these seven faithful followers.

John 21:14
Now the third time ( $\tau 0 \eta \delta \eta \tau \rho \iota \tau \circ v$ ). "To the disciples" (apostles) John says, the two others being told by him ( $20: 19,26$ ) on the two Sunday evenings. There were four other appearances already (to Mary Magdalene, to the group of women, to the two on the way to Emmaus, to Peter).

John 21:15
Lovest thou me more than these? ( $\alpha \not \alpha \pi \alpha ı \varsigma ~ \mu \varepsilon \pi \lambda \varepsilon o v ~ \tau o v \tau \omega v ;$ ). Ablative case of comparison tout $\omega \nu$ (disciples) after $\pi \lambda \varepsilon o v$. Peter had even boasted that he would stand by Christ though all men forsook him (Mr 14:29). We do not know what passed between Jesus and Peter when Jesus first appeared to him (Lu 24:34). But here Christ probes the inmost recesses of Peter's heart to secure the humility necessary for service.

I love thee $(\varphi i \lambda \omega \sigma v)$. Peter makes no claim here to superior love and passes by the "more than these" and does not even use Christ's word $\alpha \gamma \alpha \pi \alpha \omega$ for high and devoted love, but the humbler word $\varphi \backslash \lambda \varepsilon \omega$ for love as a friend. He insists that Christ knows this in spite of his conduct.

Feed my lambs (Boбкє $\tau \alpha \alpha \rho v i \alpha \mu \circ v$ ). For the old word $\beta \circ \sigma \kappa \omega$ (to feed as a herdsman) see Mt 8:33. Present active imperative here. Apvia is a diminutive of $\alpha \rho v o \varsigma$ (lamb).

John 21:16
Lovest thou me? ( $\alpha \gamma \alpha \pi \alpha ı \varsigma \mu \varepsilon$;). This time Jesus drops the $\pi \lambda \varepsilon o v$ тovi $\omega v$ and challenges Peter's own statement. Peter repeats the same words in reply.

Tend my sheep ( $\pi о \mu \alpha ı v \varepsilon \tau \alpha \pi \rho \circ \beta \alpha \tau i \alpha$ ). Present active imperative of $\pi о \mu \alpha \iota v \omega$, old verb from $\pi о \mu \eta \nu$ (shepherd), "shepherd my lambs" ( $\pi \rho \circ \beta \alpha \tau \iota \alpha$, diminutive of $\pi \rho o \beta a \tau o v$, sheep).

John 21:17
Lovest thou me? ( $\varphi \backslash \lambda \varepsilon \iota \varsigma \mu \varepsilon ;$ ). This time Jesus picks up the word $\varphi \backslash \lambda \varepsilon \omega$ used by Peter and challenges that. These two words are often interchanged in the N.T., but here the dis-
tinction is preserved. Peter was cut to the heart $(\varepsilon \lambda \nu \pi \eta \eta \eta$, first aorist passive of $\lambda \cup \pi \varepsilon \omega$, to grieve) because Jesus challenges this very verb, and no doubt the third question vividly reminds him of the three denials in the early morning by the fire. He repeats his love for Jesus with the plea: "Thou knowest all things."

Feed my sheep ( $\beta$ обкє $\tau \alpha \pi \rho \circ \beta \alpha \tau \iota \alpha$ ). Many MSS. both here and in verse 16 read $\pi \rho o \beta \alpha \tau \alpha$ (sheep) instead of $\pi \rho o \beta a \tau \iota \alpha$ (little sheep or lambs).

John 21:18
Thou girdest thyself ( $\varepsilon \zeta \omega v v v \varepsilon \varsigma \sigma \varepsilon \alpha v \tau o v$ ). Imperfect active of customary action of $\zeta \omega v v v \omega$, old verb, in N.T. only here and Ac 12:8. So as to $\pi \varepsilon \rho ı \varepsilon \pi \alpha \tau \varepsilon \iota \varsigma ~(w a l k e d s t) ~ a n d ~ \eta \theta \varepsilon \lambda \varepsilon \varsigma$ (wouldest), two other imperfects of customary action.

When thou shalt be old (o $\tau \alpha v \gamma \eta \rho \alpha \sigma \eta ı$ ). Indefinite temporal clause with o o $\alpha v$ and the first aorist active subjunctive of $\gamma \eta \rho a \sigma \kappa \omega$, old verb to grow old, in N.T. only here and Heb 8:13 , "whenever thou growest old."

John 21:19
By what manner of death ( $\pi \circ \omega \theta \theta \alpha \alpha \tau \omega$ ). Undoubtedly John, who is writing long after Peter's death, seems to mean that Peter was to die (and did die) a martyr's death. "Whither thou wouldest not." There is a tradition that Peter met death by crucifixion and asked to be crucified head downwards, but that is not made plain here.

John 21:20
Turning about ( $\varepsilon \pi \iota \sigma \tau \rho \alpha \varphi \varepsilon \iota \varsigma)$. Second aorist passive participle of $\varepsilon \pi \iota \sigma \tau \rho \varepsilon \varphi \omega$, old verb, here a sudden turning round (ingressive aorist). For the simplex verb $\sigma \tau \rho \varepsilon \varphi \omega$ see 20:14,16

Following ( $\alpha \kappa 0 \lambda$ ouӨouvta). Following both Jesus and Peter, perhaps having heard the graphic dialogue above.

John 21:21
And what shall this man do? (ov $о$ os $\delta \varepsilon \tau i$ ). Literally, "But this one ... what?" The abrupt ellipsis is intelligible.

John 21:22
If I will $(\varepsilon \alpha v \theta \varepsilon \lambda \omega)$. Condition of the third class with $\varepsilon \alpha v$ and the present active subjunctive of $\theta \varepsilon \lambda \omega$.

Till I come ( $\varepsilon \omega \varsigma \varepsilon \rho \chi \circ \mu \alpha)$. Literally, "while I am coming" ( $\varepsilon \omega \varsigma$ and the present indicative, not $\varepsilon \omega \varsigma \varepsilon \lambda \theta \omega$ (second aorist active subjunctive).

What is that to thee? ( $\tau \pi \rho o \varsigma \sigma \varepsilon ;$ ). A sharp rebuke to Peter's keen curiosity.
Follow thou me ( $\sigma \nu \mu$ о ако入ov $\theta \varepsilon$ ). "Do thou me keep on following." That lesson Peter needed.

John 21:23
That that disciple should not die (от о $\mu \alpha \theta \eta \tau \eta \varsigma$ єкєьขо̧ оик $\alpha \pi о \theta v \eta \sigma \kappa \varepsilon$ ) (present active indicative), because Peter or others misunderstood what Jesus meant as John now
carefully explains. He was rebuking Peter's curiosity, not affirming that John would live on till the Master returned. John is anxious to set this matter right.

John 21:24
That is (ovtoc $\varepsilon \sigma \tau \iota v)$. The one just mentioned in verse 20, "the disciple whom Jesus loved."

And wrote these things ( $\kappa \alpha$ о $\gamma \rho \alpha \psi \alpha \varsigma \tau \alpha \nu \tau \alpha$ ). Here there is a definite statement that the Beloved Disciple wrote this book.

We know (oı $\delta \alpha \mu \varepsilon v)$. The plural here seems intentional as the identification and endorsement of a group of disciples who know the author and wish to vouch for his identity and for the truthfulness of his witness. Probably we see here a verse added by a group of elders in Ephesus where John had long laboured.

John 21:25
If they should be written every one ( $\varepsilon \alpha v \gamma \rho \alpha \varphi \eta \tau \alpha \kappa \alpha \theta^{\prime} \varepsilon v$ ). Condition of the third class with $\varepsilon a v$ and present passive subjunctive of $\gamma \rho \alpha \varphi \omega$, "If they should be written one by one" (in full detail).

I suppose ( $о \boldsymbol{\rho} \alpha$ ). Note change back to the first person singular by the author.
Would not contain (ov $\delta^{\prime}$ avtov tov коб $\mu$ ov $\chi \omega \rho \eta \sigma \varepsilon เ v$ ). Future active infinitive in indirect discourse after o $\mu \mathrm{\alpha}$. This is, of course, natural hyperbole, but graphically pictures for us the vastness of the work and words of Jesus from which the author has made a small selection (20:30f. ) and by which he has produced what is, all things considered, the greatest of all the books produced by man, the eternal gospel from the eagle who soars to the very heavens and gives us a glimpse of the glory of God in the face of Jesus Christ.

## THE ACTS OF THE APOSTLES BY WAY OF INTRODUCTION

But for the Acts we should know nothing of the early apostolic period save what is told in the Epistles. There are various apocryphal "Acts," but they are without historical worth. Hence the importance of this book.

LUKE THE AUTHOR
It ought to be possible to assume this as a fact since the work of Ramsay and Harnack on various phases of the problems concerning the Acts. Harnack, in particular, has covered the ground with his accustomed thoroughness and care in his two volumes (The Acts of the Apostles, English Translation by Rev. J. R. Wilkinson, 1909; The Date of the Acts and the Synoptic Gospels, English Translation by Rev. J. R. Wilkinson, 1911). Ramsay's view may be found in Chapter I of St. Paul the Traveller and the Roman Citizen, Chapter XII of Pauline and Other Studies. A good summary of the matter appears in Part V of The Synoptic Gospels and the Book of Acts by Dr. D. A. Hayes, in Robertson's Luke the Historian in the Light of Research, and in the introduction to the various commentaries by Knowling, Rackham, Furneaux, Rendall, Hackett, Meyer-Wendt, Zahn, Blass, Campbell-Morgan, Stokes. In Part I of The Acts of the Apostles, Vol. II of The Beginnings of Christianity, edited by FoakesJackson and Kirsopp Lake both sides are ably presented: The Case for the Tradition by C. W. Emmet, The Case against the Tradition by H. Windisch. The Internal Evidence of Acts is discussed by the Editors, Foakes-Jackson and Lake, with an adverse conclusion against Luke. Henry J. Cadbury surveys The Tradition (the external evidence) and draws a negative conclusion likewise on the ground that the early writers who ascribe Acts to Luke were not critical scholars. A similar position is taken by Cadbury in his more recent volume, The Making of Luke--Acts (1927). But all the same the traditional view that Luke is the author of the Acts holds the field with those who are not prejudiced against it. The view of Baur that Acts is a Tendenz writing for the purpose of healing the breach between Peter and Paul and showing that the two factions came together had great influence for a while. In fact both Ramsay and Harnack at first held it. Ramsay broke away first and he was followed by Harnack. Both were influenced to change their views by the accumulation of evidence to the effect that the author of both the Gospel and Acts is Luke the Physician and Friend of Paul. Part of this evidence has already been given in the Introduction to the Gospel according to Luke.

THE AUTHOR OF THE GOSPEL ALSO
The author of the Acts expressly states that he wrote "the first treatise ( $\tau 0 v \pi \rho \omega \tau 0 v$ $\lambda_{0} \gamma_{o}$ ) concerning all things, O Theophilus, that Jesus began both to do and to teach until which day he gave command through the Holy Spirit to the apostles whom he had chosen and was received up" (Ac 1:1f. ). There is no room for dispute that the reference is directly
to the Gospel according to Luke as we have it now. Like the Gospel the book is dedicated to Theophilus. And, what is even more important, the same style appears in both Gospel and Acts. This fact Harnack has shown with great pains and conclusiveness. There is the same interest in medical matters and even Cadbury, who denies by implication the Lukan authorship, admits identity of authorship for both books.

THE UNITY OF THE ACTS
There are some scholars who are willing to admit the Lukan authorship of the "we" sections when the author uses "we" and "us" as in chapter 16:10-40; 20:6-28:31 . It has been argued that Luke wrote a travel-document or diary for these sections, but that this material was used by the editor or redactor of the whole book. But, unfortunately for that view, the very same style appears in the Acts as a whole and in the Gospel also as Harnack has proven. The man who said "we" and "us" in the "we" sections wrote "I" in 1:1 and refers to the Gospel as his work. The effort to disprove the unity of the Acts has failed. It stands as the work of the same author as a whole and the same author who wrote the Gospel.

SOURCES OF THE ACTS
Beyond a doubt Luke employed a variety of sources for this great history as he did for the Gospel (Lu 1:1-4). In fact, Cadbury argues that this Prologue was meant to apply to the Acts also as Volume II whether he intended to write a third volume or not. Certainly we are entitled to say that Luke used the same historical method for Acts. Some of these sources are easy to see. Luke had his own personal experience for the "we" sections. Then he had the benefit of Paul's own notes or suggestions for all that portion where Paul figures from chapters 8 to 28, since Luke was apparently with Paul in Rome when he finished the Book. This would include Paul's sermons and addresses which Luke gives unless one wishes to say, as some do, that Luke followed the style of Thucydides and composed the kind of addresses that he thought Paul would make. I see no evidence of that for each address differs from the others and suits precisely the occasion when it was delivered. The ancients frequently employed shorthand and Paul may have preserved notes of his addresses. Prof. C. C. Torrey, of Yale University, argues in his Composition and Date of Acts (1916) that Luke used an Aramaic document for the first fifteen chapters of the Acts. There is an Aramaic element in certain portions of these chapters, but nothing like so pronounced as in Luke 1 and 2 after Lu 1:1-4. It cannot be said that Torrey has made out his case for such a single document. Luke may have had several such documents besides access to others familiar with the early days of the work in Jerusalem. There was Simon Peter whom Paul visited for two weeks in Jerusalem (Ga 1:18) besides other points of contact with him in Jerusalem and Antioch (Ac 15 and Ga 2 ). There was also Barnabas who was early Paul's friend (Ac 9:27) and who knew the beginnings as few did (Ac 4:36f. ). Besides many others it is to be observed that Paul with Luke made a special visit to Caesarea where he spent a week with the gifted Philip and his daughters with the gift of prophecy (Ac 21:8f. ). But with all the inevitable variety of
sources for the information needed to cover the wide field of the Book of Acts the same mind has manifestly worked through it and it is the same style all through that appears in the "we" sections where the writer is confessedly a companion of Paul. No other companion of Paul carries this claim for the authorship and no other was a physician and no author has the external evidence from early writers.

THE DATE
There are three views about the date of the Acts. Baur and his Tubingen School held the second century to be the date of this late pamphlet as they termed it after the fashion of the Clementine Homilies. But that view is now practically abandoned save by the few who still strangely oppose the Lukan authorship. Probably the majority of those who accept the Lukan authorship place it in the latter part of the first century for two reasons. One is that the Gospel according to Luke is dated by them after the destruction of Jerusalem because of the prophecy by Jesus of the encompassing of the city by armies. Predictive prophecy that would be and so it is considered a prophecy post eventum. The other reason is the alleged use of the Antiquities of Josephus by Luke. Josephus finished this work A.D. 93 so that, if Luke did use it, he must have written the Acts after that date. Usually this argument is made to show that Luke could not have written it at all, but some hold that he may have lived to an age that would allow it. But it cannot be assumed that Luke used Josephus because of his mention of Theudas and Judas the Galilean. They differ so widely (Ac 5:36f. and Josephus, Ant. XX. v, 1, 2) that Von Dobschutz (Dictionary of the Apostolic Church, art. Josephus) argues that the two accounts are entirely independent of each other. So Luke (Lu 13:1f. ) alludes to a Galilean revolt not mentioned by Josephus and Josephus records three revolts under Pilate not referred to by Luke. A comparison of the accounts of the death of Agrippa I in Ac 12:20-23 and Ant. XIX. viii, 2 redounds to the credit of Luke. The Josephus phase of the argument may be brushed to one side. The third view, held by Harnack and adopted here, is that Luke wrote the Acts while with Paul in Rome and finished the book before Paul's release, that is by A.D. 63. This is the obvious and natural way to take the language of Luke at the close of Acts. Events had gone no farther and so he ends the narrative right there. It is argued against this that Luke contemplated a third volume and for this reason closed with the arrival of Paul in Rome. But the use of $\pi \rho \omega \tau$ tov (first) in Ac 1:1 is a common Koine idiom and does not imply three volumes any more than first and second stories with us means that the house has three. Of course this date for the Acts puts the date of the Gospel further back either in Caesarea ( 57 to 59) or in Rome ( 60 to 62 ). And that means that Mark's Gospel is still earlier since Luke used it for his Gospel and the Logia (Q) earlier still. But all these dates are probable in the light of all the known facts.

## THE HISTORICAL VALUE

It was once a fad with a certain school of critics to decry Luke in the Acts as wholly untrustworthy, not above the legendary stage. But the spade has done well by Luke for inscrip-
tions and papyri have brought remarkable confirmation for scores of points where Luke once stood all alone and was discounted because he stood alone. These will be duly noted in the proper places as they occur. Ramsay has done most in this restoration of the rank of Luke as a credible historian, as shown in particular in his St. Paul the Traveller and the Roman Citizen and in The Bearing of Recent Discovery on the Trustworthiness of the New Testament. In every instance where discoveries have been made they have confirmed the testimony of Luke as concerning politarchs in Thessalonica, proconsul in Cyprus, etc. The result is that the balance of evidence is now in favour of Luke even when he still stands alone or seems to be opposed by Josephus. Luke, as it stands today, is a more credible historian than Josephus. Ramsay dares to call Luke, all things considered, the greatest of all historians, even above Thucydides. An interesting book on this phase of the subject is Chase's The Credibility of the Acts of the Apostles (1902).

THE PURPOSE OF THE ACTS
It is not easy to say in a word precisely the object of Luke in writing this book. It is not the Acts of all the apostles. Outside of Peter and John little is told of any of them after chapter 3. And all the acts of Peter and John are not given for Peter disappears from the narrative after chapter 15 , though he has been the central figure through chapter 11. Paul is not one of the twelve apostles, but Luke follows Paul's career mainly after chapter 8. Stephen and Barnabas come in also. Still (St. Paul on Trial, 1923) argues that Luke meant the book as an apology to be used in Paul's trial at Rome or at any rate to put Paul in the right light with the Jews in Rome. Hence the full account of Paul's series of defences in Jerusalem, Caesarea, Rome. There may be an element of truth in this idea, but it clearly does not cover the whole purpose of Luke. Others hold that Luke had a dramatic plan to get Paul to Rome as the climax of his campaign to win the Roman Empire to Christ. The book is not a history of all early Christianity. Peter and Paul dominate the atmosphere of the book with Paul as the great hero of Luke. But one can easily see that the work is done with consummate skill. The author is a man of culture, of Christian grace, of literary power. The book pulses with life today.

THE TEXT OF THE ACTS
A special problem arises concerning the text of Acts inasmuch as the Codex Bezae (D) with some other Western support presents a great many additions to the Neutral-Alexandrian text of Aleph A B C. Blass has even proposed the idea that Luke himself issued two editions of the book, an attractive hypothesis that is not generally accepted. J. M. Wilson has published The Acts of the Apostles from Codex Bezae. The whole subject is elaborately treated by J. H. Ropes in Vol. III, The Text of Acts in Part I of The Beginnings of Christianity. Besides thorough discussion of all the problems of text involved Ropes gives the text of the Vatican Codex (B) on the left page and that of Codex Bezae (D) on the right, making comparison easy. Blass's ideas appear in his Acta Apostolorum.

## Acts 1

Acts 1:1
The Title is simply Acts ( $\Pi \rho \alpha \xi \varepsilon \iota \varsigma)$ in Aleph, Origen, Tertullian, Didymus, Hilary, Eusebius, Epiphanius. The Acts of the Apostles (Праگદıৎ $\alpha \pi о \sigma \tau о \lambda \omega v)$ is the reading of B D (Aleph in subscription) Athanasius, Origen, Tertullian, Cyprian, Eusebius, Cyril of Jerusalem, Theodoret, Hilary. The Acts of the Holy Apostles (Праそ६ıऽ $\tau \omega \nu \alpha \gamma \iota \omega \nu \alpha \pi \sigma \sigma \tau \sigma \lambda \omega v$ ) is read by A2 E G H A K Chrysostom. It is possible that the book was given no title at all by Luke, for it is plain that usage varied greatly even in the same writers. The long title as found in the Textus Receptus (Authorized Version) is undoubtedly wrong with the adjective "Holy." The reading of B D, "The Acts of the Apostles," may be accepted as probably correct.

The former treatise ( $\tau 0 v \mu \varepsilon \nu \pi \rho \omega \tau \sigma v$ ). Literally, the first treatise. The use of the superlative is common enough and by no means implies, though it allows, a third volume. This use of $\pi \rho \omega \tau$ co where only two are compared is seen between the Baptist and Jesus (Joh 1:15 ), John and Peter (Joh 20:4 ). The idiom is common in the papyri (Robertson, Grammar, pp. 662, 669). The use of $\mu \varepsilon \nu \sigma o \lambda ı \tau \alpha \rho ı \cup \mu$ here, as Hackett notes, is common in Acts. It is by no means true that $\mu \varepsilon v$ requires a following $\delta \varepsilon$ by contrast. The word is merely a weakened form of $\mu \eta \nu=$ surely, indeed. The reference is to the "first treatise" and merely emphasizes that. The use of $\lambda$ o $\gamma$ oc (word) for treatise or historical narrative is common in ancient Greek as in Herodotus 6 and 9. Plato (Phaedo, p. 61 B) makes a contrast between $\mu v \theta \circ \varsigma$ and $\lambda о \gamma \circ \varsigma$.

I made ( $\varepsilon \pi о ו \eta \sigma \alpha \mu \eta v)$. Aorist middle indicative, the middle being the usual construction for mental acts with $\pi$ ot $\varepsilon \omega$.

O Theophilus ( $\mathrm{O} \Theta \varepsilon \sigma \varphi \lambda \lambda \varepsilon$ ). The interjection O here as is common, though not in Lu 1:3. But the adjective $\kappa \rho a \tau \iota \sigma \tau \varepsilon$ (most excellent) is wanting here. See remarks on Theophilus on Lu 1:3. Hackett thinks that he lived at Rome because of the way Acts ends. He was a man of rank. He may have defrayed the expense of publishing both Luke and Acts. Perhaps by this time Luke may have reached a less ceremonious acquaintance with Theophilus.

Which Jesus began ( $\omega \nu \eta \rho \xi \alpha \tau 0$ I $\eta \sigma o v \varsigma$ ). The relative is attracted from the accusative $\alpha$ to the genitive $\omega \nu$ because of the antecedent $\pi \alpha \nu \tau \omega \nu$ (all). The language of Luke here is not merely pleonastic as Winer held. Jesus "began" "both to do and to teach" (поєєıv тє ка $\delta t \delta \alpha \sigma \kappa \varepsilon เ v)$. Note present infinitives, linear action, still going on, and the use of $\tau \varepsilon--\kappa \alpha$ binds together the life and teachings of Jesus, as if to say that Jesus is still carrying on from heaven the work and teaching of the disciples which he started while on earth before his ascension. The record which Luke now records is really the Acts of Jesus as much as the Acts of the Apostles. Dr. A. T. Pierson called it "The Acts of the Holy Spirit," and that is true also. The Acts, according to Luke, is a continuation of the doings and teachings of Jesus. "The following writings appear intended to give us, and do, in fact, profess to give us, that which Jesus
continued to do and teach after the day in which he was taken up" (Bernard, Progress of Doctrine in the N.T.).

Acts 1:2
Until the day in which ( $\alpha \not \rho \eta \varsigma \eta \mu \varepsilon \rho \alpha \varsigma)$. Incorporation of the antecedent into the relative clause and the change of case $\eta$ (locative) to $\eta$ (genitive).

Was received up ( $\alpha v \varepsilon \lambda \eta \mu \pi \theta \eta$ ). First aorist passive indicative of $\alpha v \alpha \lambda \alpha \mu \beta \alpha v \omega$. Common verb to lift anything up (Ac 10:16) or person as Paul (Ac 20:13). Several times of the Ascension of Jesus to heaven (Mr 16:19; Ac 1:2,11,22; 1Ti 3:16) with or without "into heaven" (عıৎ tov oupavov). This same verb is used of Elijah's translation to heaven in the LXX (2Ki 2:11 ). The same idea, though not this word, is in Lu 24:51. See Lu 9:51 for $\alpha v a \lambda \eta \mu \psi ı$ of the Ascension.

Had given commandment ( $\varepsilon \nu \tau \varepsilon \lambda \lambda \alpha \varepsilon \varepsilon \mathcal{o})$. First aorist middle participle of $\varepsilon \nu \tau \varepsilon \lambda \lambda \omega$ (from $\varepsilon v$ and $\tau \varepsilon \lambda \lambda \omega$, to accomplish), usually in the middle, old verb, to enjoin. This special commandment refers directly to what we call the commission given the apostles before Christ ascended on high (Joh 20:21-23; Mt 28:16-20; Mr 16:15-18; 1Co 15:6; Lu 24:44-49 ). He had given commands to them when they were first chosen and when they were sent out on the tour of Galilee, but the immediate reference is as above.

Through the Holy Spirit ( $\delta \iota \alpha \pi v \varepsilon v \mu \alpha \tau o \varsigma ~ \alpha \gamma เ o v$ ). In his human life Jesus was under the guidance of the Holy Spirit. This applies to the choice of the apostles ( $\operatorname{Lu} 6: 13$ ) and to these special commands before the Ascension.

Whom he had chosen (ouc $\varepsilon \xi \varepsilon \lambda \varepsilon \xi \alpha \tau 0)$. Aorist middle indicative, not past perfect. The same verb ( $\varepsilon \kappa \lambda \varepsilon \xi \alpha \mu \varepsilon v o \varsigma)$ was used by Luke in describing the choice of the twelve by Jesus (Lu 6:13 ). But the aorist does not stand "for" our English pluperfect as Hackett says. That is explaining Greek by English. The Western text here adds: "And ordered to proclaim the gospel."

Acts 1:3
To whom also (oı $\kappa \alpha$ ). He chose them and then also manifested himself to these very same men that they might have personal witness to give.

Shewed himself alive ( $\pi \alpha \rho \varepsilon \sigma \tau \eta \sigma \varepsilon v \varepsilon \alpha u \tau \circ \nu \zeta \omega \nu \tau \alpha$ ). To the disciples the first Sunday evening (Mr 16:14; Lu 24:36-43; Joh 20:19-25 ), the second Sunday evening (Joh 20:26-29 ), at the Sea of Tiberias (Joh 21:1-23 ), on the mountain in Galilee (Mt 28:16-20; Mr 16:15-18; 1Co 15:6 ), to the disciples in Jerusalem and Olivet (Lu 24:44-53; Mr 16-19f.; Ac 1:1-11 ). Luke uses this verb $\pi \alpha \rho เ \sigma \tau \eta \mu 13$ times in the Acts both transitively and intransitively. It is rendered by various English words (present, furnish, provide, assist, commend). The early disciples including Paul never doubted the fact of the Resurrection, once they were convinced by personal experience. At first some doubted like Thomas (Mr 16:14; Lu 24:41; Joh 20:24f.; Mt 28:17). But after that they never wavered in their testimony to their own experience
with the Risen Christ, "whereof we are witnesses" Peter said (Ac 3:15). They doubted at first, that we may believe, but at last they risked life itself in defence of this firm faith.

After his passion ( $\mu \varepsilon \tau \alpha$ тo $\pi \alpha \theta \varepsilon ı v ~ a v \tau o v)$. Neat Greek idiom, $\mu \varepsilon \tau \alpha$ with the articular infinitive (second aorist active of $\pi \alpha \sigma \chi \omega$ ) and the accusative of general reference, "after the suffering as to him." For $\pi \alpha \theta \varepsilon ı v$ used absolutely of Christ's suffering see also Ac 17:3; 26:23
 here in the N.T., though an old and common word in ancient Greek and occurring in the Koine (papyri, etc.). The verb $\tau \varepsilon \kappa \mu \alpha \iota \rho \omega$, to prove by sure signs, is from $\tau \varepsilon \kappa \mu \alpha \rho$, a sign. Luke does not hesitate to apply the definite word "proofs" to the evidence for the Resurrection of Christ after full investigation on the part of this scientific historian. Aristotle makes a distinction between $\tau \varepsilon \kappa \mu \eta \rho \circ \frac{}{}$ (proof) and $\sigma \eta \mu \varepsilon เ \circ \nu$ (sign) as does Galen the medical writer.

Appearing (o $\pi \tau \alpha v o \mu \varepsilon v o \varsigma) . ~ P r e s e n t ~ m i d d l e ~ p a r t i c i p l e ~ f r o m ~ l a t e ~ v e r b ~ o \pi \tau \alpha v \omega$, late Koine verb from root o $\tau \tau \omega$ seen in o $\psi o \mu \alpha 1, \omega \varphi \theta \eta \nu$. In LXX, papyri of second century B.C. (Deissmann, Light from the Ancient East, p. 83). Only here in the N.T. For ontaбta for vision see Ac 26:19; Lu 1:22; 24:23.

By the space of forty days ( $\delta \iota^{\prime} \eta \mu \varepsilon \rho \omega \nu \tau \varepsilon \sigma \sigma \varepsilon \rho \alpha \kappa о \nu \tau \alpha$ ). At intervals ( $\delta \iota \alpha$, between) during the forty days, ten appearances being known to us. Jesus was not with them continually now in bodily presence. The period of forty days is given here alone. The Ascension was thus ten days before Pentecost when the Holy Spirit came. Moses was in the mount forty days (Ex 24:18) and Jesus fasted forty days (Mt 4:2 ). In the Gospel of Luke 24 this separation of forty days between the Resurrection and the Ascension is not drawn.

The things concerning the Kingdom of God ( $\tau \alpha \pi \varepsilon \rho \tau \eta \varsigma \beta \alpha \sigma \iota \lambda \varepsilon \propto \varsigma ~ \tau o v ~ \theta \varepsilon o v)$. This phrase appears 33 times in Luke's Gospel, 15 times in Mark, 4 times in Matthew who elsewhere has "the kingdom of heaven," once in John, and 6 times in Acts. No essential distinction is to be drawn between the two for the Jews often used "heaven" rather than "God" to avoid using the Tetragrammaton. But it is noticeable how the word kingdom drops out of Acts. Other words like gospel ( $\varepsilon v a \gamma \gamma \varepsilon \lambda \iota o v$ ) take the place of "kingdom." Jesus was fond of the word "kingdom" and Luke is fond of the idiom "the things concerning" ( $\tau \alpha \pi \varepsilon \rho$ ). Certainly with Jesus the term "kingdom" applies to the present and the future and covers so much that it is not strange that the disciples with their notions of a political Messianic kingdom (Ac 1:6 ) were slow to comprehend the spiritual nature of the reign of God.

Acts 1:4
Being assembled together with them ( $\sigma \cup v \alpha \lambda_{\iota} \zeta о \mu \varepsilon v o \varsigma$ ). Present passive participle from $\sigma 0 v a \lambda \iota \zeta \omega$, an old verb in Herodotus, Xenophon, etc., from sun, with, and $\alpha \lambda_{1} \zeta \omega$, from $\alpha \lambda \eta \varsigma$, crowded. The margin of both the Authorized and the Revised Versions has "eating with them" as if from $\sigma 0 \nu$ and $\alpha \lambda \varsigma$ (salt). Salt was the mark of hospitality. There is the verb $\alpha \lambda \iota \sigma \emptyset \eta \tau \varepsilon \varepsilon v$ avt $\omega$ used by Ignatius Ad Magnes. X, "Be ye salted in him." But it is more than
doubtful if that is the idea here though the Vulgate does have convescens illis "eating with them," as if that was the common habit of Jesus during the forty days (Wendt, Feine, etc.). Jesus did on occasion eat with the disciples (Lu 24:41-43; Mr 16:14).

To wait for the promise of the Father ( $\pi \varepsilon \rho \mu \mu \varepsilon v \varepsilon เ \nu \tau \eta \nu \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \iota \alpha \nu \tau 0 v \pi \alpha \tau \rho \circ \varsigma)$. Note present active infinitive, to keep on waiting for (around, $\pi \varepsilon \rho$ ). In the Great Commission on the mountain in Galilee this item was not given (Mt 28:16-20 ). It is the subjective genitive, the promise given by the Father (note this Johannine use of the word), that is the Holy Spirit ("the promise of the Holy Spirit," objective genitive).

Which ye heard from me ( $\eta \nu \eta$ коибат $\mu \circ v$ ). Change from indirect discourse (command), infinitives $\chi \omega \rho \iota \zeta \varepsilon \sigma \theta \alpha$ and $\pi \varepsilon \rho \mu \varepsilon \varepsilon \varepsilon \iota v$ after $\pi \alpha \rho \eta \gamma \gamma \varepsilon ı \lambda \varepsilon v$ to direct discourse without any $\varepsilon \varphi \eta$ (said he) as the English (Italics). Luke often does this (oratior ariata). Note also the ablative case of $\mu \mathrm{ov}$ (from me). Luke continues in verse 5 with the direct discourse giving the words of Jesus.

Acts 1:5

## Baptized with water ( $\varepsilon \beta \alpha \pi \tau \iota \sigma \varepsilon v v \delta \alpha \tau$ )

and with the Holy Ghost ( $\varepsilon v \pi \nu \varepsilon \cup \mu \alpha \tau \beta \alpha \pi \tau \iota \sigma \theta \eta \sigma \varepsilon \sigma \theta \varepsilon \alpha \gamma \omega)$. The margin has "in the Holy Ghost" (Spirit, it should be). The American Standard Version renders "in" both with "water" and "Holy Spirit" as do Goodspeed (American Translation) and Mrs. Montgomery (Centenary Translation). John's own words (Mt 3:11 ) to which Jesus apparently refers use $\varepsilon v$ (in) both with water and Spirit. There is a so-called instrumental use of $\varepsilon v$ where we in English have to say "with" (Re 13:10 $\varepsilon v \mu \alpha \chi \alpha \iota \rho \eta$, like $\mu \alpha \chi \alpha \iota \rho \eta, A c 12: 2$ ). That is to say $\varepsilon v$ with the locative presents the act as located in a certain instrument like a sword (Robertson, Grammar, pp. 589f.). But the instrumental case is more common without $\varepsilon v$ (the locative and instrumental cases having the same form). So it is often a matter of indifference which idiom is used as in Joh 21:8 we have $\tau \omega \pi \lambda$ oolapı $\omega$ (locative without $\varepsilon v$ ). They came
in (locative case without $\varepsilon v$ ) the boat. So in Joh 1:31 $\varepsilon v \nu \delta \alpha \tau \beta \alpha \pi \tau \iota \zeta \omega v$ baptizing in water. No distinction therefore can be insisted on here between the construction $v \delta a \tau$ and $\varepsilon v \pi v \varepsilon v \mu \alpha \tau$ (both being in the locative case, one without, one with $\varepsilon v$ ). Note unusual position of the verb $\beta a \pi \tau \iota \sigma \theta \eta \sigma \varepsilon \sigma \theta \varepsilon$ (future passive indicative) between $\pi v \varepsilon \nu \mu \alpha \tau$ and $\alpha \gamma \omega$. This baptism of the Holy Spirit was predicted by John (Mt 3:11) as the characteristic of the Messiah's work. Now the Messiah himself in his last message before his Ascension proclaims that in a few days the fulfilment of that prophecy will come to pass. The Codex Bezae adds here "which ye are about to receive" and "until the Pentecost" to verse 5.

Not many days hence ( $\mathrm{ov} \mu \varepsilon \tau \alpha \pi о \lambda \lambda \alpha \varsigma \tau \alpha \cup \tau \alpha \varsigma ~ \eta \mu \varepsilon \rho \alpha \varsigma$ ). A neat Greek idiom difficult to render smoothly into English: "Not after many days these." The litotes (not many=few) is common in Luke (Lu 7:6; 15:13; Ac 17:27; 19:11; 20:12; 21:39; 28:14; 28:2 ). The predicate use of tavtac (without article) is to be noted. "These" really means as a starting point, "from these" (Robertson, Grammar, p. 702). It was ten days hence. This idiom occurs several times
in Luke (Lu 24:21; Ac 24:21), as elsewhere (Joh 4:18; 2Pe 3:1). In Lu 2:12 the copula is easily supplied as it exists in Lu 1:36; 2:2 .

Acts 1:6
They therefore ( $o \mu \varepsilon v o v v$ ). Demonstrative use of o with $\mu \varepsilon v o u v$ without any corresponding $\delta \varepsilon$ just as in 1:1 $\mu \varepsilon v$ occurs alone. The combination $\mu \varepsilon v$ ouv is common in Acts ( 27 times). Cf. Lu 3:18. The ouv is resumptive and refers to the introductory verses ( 1:1-5), which served to connect the Acts with the preceding Gospel. The narrative now begins.

Asked ( $\eta \rho \omega \tau \omega v$ ). Imperfect active, repeatedly asked before Jesus answered.
Lord (кирєв). Here not in the sense of "sir" (Mt 21:30), but to Jesus as Lord and Master as often in Acts (19:5,10, etc.) and in prayer to Jesus ( 7:59).

Dost thou restore ( $\varepsilon \alpha \pi \sigma \kappa \alpha \theta$ เб $\alpha v \varepsilon \iota \varsigma)$. The use of $\varepsilon$ in an indirect question is common. We have already seen its use in direct questions (Mt 12:10; Lu 13:23 which see for discussion), possibly in imitation of the Hebrew (frequent in the LXX) or as a partial condition without conclusion. See also Ac 7:1; 19:2; 21:37; 22:25. The form of the verb $\alpha \pi о \kappa \alpha \theta$ tб $\alpha v \omega$ is late (also $\alpha \pi о \kappa \alpha \theta เ \sigma \tau \alpha \omega$ ) omega form for the old and common $\alpha \pi о к \alpha \theta เ \sigma \tau \eta \mu$, double compound, to restore to its former state. As a matter of fact the Messianic kingdom for which they are asking is a political kingdom that would throw off the hated Roman yoke. It is a futuristic present and they are uneasy that Jesus may yet fail to fulfil their hopes. Surely here is proof that the eleven apostles needed the promise of the Father before they began to spread the message of the Risen Christ. They still yearn for a political kingdom for Israel even after faith and hope have come back. They need the enlightenment of the Holy Spirit (Joh 14-16 ) and the power of the Holy Spirit (Ac 1:4f.).

## Acts 1:7

Times or seasons ( $\chi$ povouc $\eta$ каı $\rho$ ouc). "Periods" and "points" of time sometimes and probably so here, but such a distinction is not always maintained. See Ac 17:26 for kalpous in the same sense as $\chi$ povous for long periods of time. But here some distinction seems to be called for. It is curious how eager people have always been to fix definite dates about the second coming of Christ as the apostles were about the political Messianic kingdom which they were expecting.

Hath set ( $\varepsilon$ عcto). Second aorist middle indicative, emphasizing the sovereignty of the Father in keeping all such matters to himself, a gentle hint to people today about the limits of curiosity. Note also "his own" ( $\delta \delta 1 \alpha$ ) "authority" ( $\varepsilon \xi$ ovoı $\alpha$ ).

Acts 1:8
Power ( $\delta v v a \mu \mathrm{v})$ ). Not the "power" about which they were concerned (political organization and equipments for empire on the order of Rome). Their very question was ample proof of their need of this new "power" ( $\delta v v a \mu \nu v$ ), to enable them (from $\delta v v \alpha \mu \alpha$, to be able), to grapple with the spread of the gospel in the world.
 Genitive absolute and is simultaneous in time with the preceding verb "shall receive" $(\lambda \eta \mu \psi \varepsilon \sigma \theta \varepsilon)$. The Holy Spirit will give them the "power" as he comes upon them. This is the baptism of the Holy Spirit referred to in verse 5.

My witnesses ( $\mu$ оv $\mu \alpha \rho \tau v \rho \varepsilon \varsigma$ ). Correct text. "Royal words of magnificent and Divine assurance" (Furneaux). Our word martyrs is this word $\mu \alpha \rho \tau 0 \rho \varepsilon \varsigma$. In Lu 24:48 Jesus calls the disciples "witnesses to these things" ( $\mu \alpha \rho \tau \cup \rho \varepsilon \varsigma ~ \tau o v \tau \omega \nu$, objective genitive). In Ac 1:22 an apostle has to be a "witness to the Resurrection" of Christ and in 10:39 to the life and work of Jesus. Hence there could be no "apostles" in this sense after the first generation. But here the apostles are called "my witnesses." "His by a direct personal relationship" (Knowling). The expanding sphere of their witness when the Holy Spirit comes upon them is "unto the uttermost part of the earth" ( $\varepsilon \omega \varsigma \varepsilon \sigma \chi \alpha \tau 0 v \tau \eta \varsigma \gamma \eta \varsigma)$. Once they had been commanded to avoid Samaria (Mt 10:5), but now it is included in the world program as already outlined on the mountain in Galilee (Mt 28:19; Mr 16:15). Jesus is on Olivet as he points to Jerusalem, Judea, Samaria, the uttermost (last, $\varepsilon \sigma \chi \alpha \tau o v)$ part of the earth. The program still beckons us on to world conquest for Christ. "The Acts themselves form the best commentary on these words, and the words themselves might be given as the best summary of the Acts" (Page). The events follow this outline (Jerusalem till the end of chapter 7, with the martyrdom of Stephen, the scattering of the saints through Judea and Samaria in chapter 8, the conversion of Saul, chapter 9, the spread of the gospel to Romans in Caesarea by Peter (chapter 10), to Greeks in Antioch (chapter 11), finally Paul's world tours and arrest and arrival in Rome (chapters 11 to 28).

Acts 1:9
As they were looking ( $\beta \lambda \varepsilon \pi \sigma \nu \tau \omega v \alpha u \tau \omega v$ ). Genitive absolute. The present participle accents the fact that they were looking directly at Jesus.

He was taken up (ep $\boxtimes r t h \boxtimes)$ ). First aorist passive indicative of $\varepsilon \pi \alpha \iota \rho \omega$, old and common verb meaning to lift up. In $\operatorname{Lu}$ 24:51 we have "he was borne up" ( $\alpha v \varepsilon \varphi \varepsilon \rho \varepsilon \tau 0$ ) and in Ac 1:2, 1:11; 1Ti 3:6 "was received up" ( $\alpha v \varepsilon \lambda \eta \mu \pi \theta \eta$ ).

Received (v $\tau \varepsilon \lambda \alpha \beta \varepsilon v$ ). Second aorist active indicative of $v \pi о \lambda \alpha \mu \beta \alpha v \omega$, literally here "took under him." He seemed to be supported by the cloud. "In glory" Paul adds in 1Ti 3:16

Out of their sight ( $\alpha \pi \sigma \tau \omega \nu$ o $\varphi \theta \alpha \lambda \mu \omega v \alpha \nu \tau \omega v$ ). From their eyes ( $\alpha \pi \%$ with ablative case).

Acts 1:10
Were looking steadfastly ( $\alpha \tau \varepsilon v \zeta \zeta o v \tau \varepsilon \varsigma \eta \sigma \alpha v$ ). Periphrastic imperfect active of $\alpha \tau \varepsilon v L \zeta \omega$, a late intensive verb (intensive $\alpha$ and $\tau \varepsilon เ \nu \omega$, to stretch). Common in Acts and also in Lu 4:20; $22: 56$ as well as Ac 10:4, which see.
 saw him slipping away from their eyes as the cloud bore him away.

Stood by them ( $\pi \alpha \rho \varepsilon \iota \sigma \tau \eta \kappa \varepsilon \iota \sigma \alpha v$ avtoı). Past perfect active indicative of $\pi \alpha \rho ı \sigma \tau \eta \mu$ and intransitive (note in B instead of $\varepsilon$ for augment, mere itacism).

Acts 1:11
Who also (о ка). Common use of ка pleonastic to show that the two events were parallel. This is the simplest way from Homer on to narrate two parallel events.

Why? ( $\tau$ ). Jesus had told them of his coming Ascension (Joh 6:62; 20:17) so that they should have been prepared.

This Jesus (ovtoc o Inбov¢). Qui vobis fuit eritque semper Jesus, id est, Salvator (Corn. a Lapide). The personal name assures them that Jesus will always be in heaven a personal friend and divine Saviour (Knowling).

So in like manner ( $о \cup \tau \omega \varsigma$ ov $\tau \rho о \pi \sigma v$ ). Same idea twice. "So in which manner" (incorporation of antecedent and accusative of general reference). The fact of his second coming and the manner of it also described by this emphatic repetition.

Acts 1:12
Olivet (E $\lambda a \iota \omega v o \varsigma) . ~ G e n i t i v e ~ s i n g u l a r . ~ V u l g a t e ~ O l i v e t u m . ~ M a d e ~ l i k e ~ a ~ \mu ~ \pi ~ \varepsilon ~ \lambda \omega v . ~ H e r e ~ o n l y ~$ in the N.T., usually $\tau 0$ opos $\tau \omega v$ E $\lambda \alpha \omega \omega v$ (the Mount of Olives), though some MSS. have Olivet in Lu 19:29; 21:37. Josephus (Ant. VII. 9, 2) has it also and the papyri (Deissmann, Light from the Ancient East, p. 170).

A sabbath day's journey off ( $\Sigma \alpha \beta \beta a \tau o v \varepsilon \chi \omega v$ odov). Luke only says here that Olivet is a Sabbath day's journey from Jerusalem, not that Jesus was precisely that distance when he ascended. In the Gospel Luke ( $24: 50$ ) states that Jesus led them "over against" ( $\varepsilon \omega \varsigma \pi \rho \circ \varsigma$ ) Bethany (about two miles or fifteen furlongs). The top of Olivet is six furlongs or three-of a mile. The Greek idiom here is "having a journey of a Sabbath" after "which is nigh unto Jerusalem" (o عб兀ıv $\varepsilon \gamma \gamma \cup \varsigma$ I $\varepsilon \rho \circ 0 \sigma \alpha \lambda \eta \mu$ ), note the periphrastic construction. Why Luke mentions this item for Gentile readers in this form is not known, unless it was in his Jewish source. See Ex 16:29; Nu 35:5; Jos 3:4. But it does not contradict what he says in Lu 24:50, where he does not say that Jesus led them all the way to Bethany.

Acts 1:13
Into the upper chamber ( $\varepsilon ા \varsigma ~ \tau о ~ ט \pi \varepsilon \rho \omega เ o v) . ~ T h e ~ u p s t a i r s ~ o r ~ u p p e r ~ r o o m ~(v \pi \varepsilon \rho ~ i s ~ u p p e r ~$ or over, the adjective $v \pi \varepsilon \rho \omega$ oc), the room upstairs where the women staid in Homer, then a room up under the flat roof for retirement or prayer (Ac 9:37,39) , sometimes a large third story room suitable for gatherings (Ac 20:9). It is possible, even probable, that this is the "large upper room" ( $\alpha v \omega \gamma \varepsilon \sigma \nu \mu \varepsilon \gamma \alpha$ ) of $\mathrm{Mr} 14: 15$; Lu 22:12 . The Vulgate has coenaculum for both words. The word is used in the N.T. only in Acts. It was in a private house as in Lu 22:11 and not in the temple as Lu 24:53 might imply, "continually" ( $\delta$ ı $\alpha$ таvтоৎ) these words probably meaning on proper occasions.

They were abiding ( $\eta \sigma \alpha v$ ката $\mu \varepsilon v o v \tau \varepsilon \varsigma)$. Periphrastic imperfect active. Perfective use of ката, to abide permanently. It is possible that this is the house of Mary the mother of John Mark where the disciples later met for prayer (Ac 12:12). Here alone in the N.T., though old compound. Some MSS. here read rapauevovtec. This could mean constant residence, but most likely frequent resort for prayer during these days, some being on hand all the time as they came and went.

Simon the Zealot ( $\Sigma \mu \mu \circ$ o $\mathrm{Z} \mathrm{\eta} \lambda \omega \tau \eta \varsigma$ ). Called Simon the Cananaean (o Xavavaıoc) in Mt 10:4, Mr 3:18, but Zealot in Lu 6:16 as here giving the Greek equivalent of the Aramaic word because Luke has Gentiles in mind. The epithet (member of the party of Zealots) clung to him after he became an apostle and distinguishes him from Simon Peter. See Vol. I on the Gospel of Matthew for discussion of the four lists of the apostles.

Judas the son of James (Jovסac Iak $\omega \beta$ ov). Literally, Judas of James, whether son or brother (cf. Jude 1:1) we do not really know. "Of James" is added to distinguish him from Judas Iscariot (Joh 14:22 ). However we take it, he must be identified with the Thaddaeus (=Lebbaeus) of Mark and Matthew to make the list in the third group identical. No name appears in Acts for that of Judas Iscariot.

Acts 1:14
With one accord ( $\circ \mu \circ \theta v \mu \alpha \delta o v$ ). Old adverb in - $\delta o v$ from adjective o $\mu \circ \theta v \mu o \varsigma$ and that from ouоऽ, same, and $\theta v \mu$ о, mind or spirit, with the same mind or spirit. Common in ancient Greek and papyri. In the N.T. eleven times in Acts and nowhere else save Ro 15:6 . See Mt 18:19.

Continued ( $\eta \sigma \alpha v \pi \rho о \sigma \kappa \alpha \rho \tau \varepsilon \rho о \cup v \tau \varepsilon \varsigma)$. Periphrastic imperfect active of $\pi \rho о \sigma \kappa \alpha \rho \tau \varepsilon \rho \varepsilon \omega$, old verb from $\pi \rho \circ \varsigma$ (perfective use) and $\kappa \alpha \rho \tau \varepsilon \rho \varepsilon \omega$ from картє $о \varsigma$, strong, steadfast, like the English "carry on." Already in Mr 3:9 which see and several times in Acts and Paul's Epistles. They "stuck to" the praying ( $\tau \eta \pi \rho o \sigma \varepsilon u \chi \eta$, note article) for the promise of the Father till the answer came.

With the women ( $\sigma \cup v \gamma \cup v \alpha ı \xi ı v$ ). Associative instrumental case plural of $\gamma \cup v \eta$ after $\sigma \cup v$. As one would expect when praying was the chief work on hand. More women certainly included than in Lu 8:2; Mr 15:40f.; Mt 27:55f.; Lu 23:49; Mr 15:47; Mt 27:61; Lu 23:55f.; Mr 16:1; Mt 28:1; Lu 24:1f.; Joh 20:1, 11-18; Mt 28:9f. There were probably other women also whose testimony was no longer scouted as it had been at first. Codex Bezae adds here "and children."

And Mary the mother of Jesus ( $\kappa \alpha \operatorname{Ma\rho ı\alpha \mu } \tau \eta \mu \eta \tau \rho \tau o v \operatorname{In\sigma ov)}$ ). A delicate touch by Luke that shows Mary with her crown of glory at last. She had come out of the shadow of death with the song in her heart and with the realization of the angel's promise and the prophecy of Simeon. It was a blessed time for Mary.

With his brethren ( $\sigma 0 \vee \tau$ тоı $\alpha \delta \varepsilon \lambda \varphi$ оı $\alpha \cup \tau о v$ ). With his brothers, it should be translated. They had once disbelieved in him (Joh 7:5 ). Jesus had appeared to James (1Co 15:7) and
now it is a happy family of believers including the mother and brothers (half-brothers, literally) of Jesus. They continue in prayer for the power from on high.

Acts 1:15
Brethren ( $\alpha \delta \varepsilon \lambda \varphi \omega v$ ). Codex Bezae has "disciples."
Multitude of persons (ox $\lambda$ oc ovo $\alpha \alpha \tau \omega v$ ). Literally, multitude of names. This Hebraistic use of ovo $\alpha=$ person occurs in the $\operatorname{LXX}(\mathrm{Nu} 1: 2 ; 18: 20 ; 3: 40,43 ; 26: 53)$ and in Re 3:4; 11:13

Together ( $\varepsilon \pi$ то avтo). The word "gathered" is not in the Greek here, but it does occur in Mt 22:34 and that is undoubtedly the idea in Lu 17:35 as in Ac 2:1,44,47; 1Co 11:20; 14:23 . So also here. They were in the same place ( $\tau 0$ avтo).

About a hundred and twenty ( $\omega \varsigma$ єкатоv єıкоб). A crowd for "the upper room." No special significance in the number 120 , just the number there.

Acts 1:16
Brethren ( $\alpha v \delta \rho \varepsilon \varsigma \alpha \delta \varepsilon \lambda \varphi o$ ). Literally, men, brethren or brother men. More dignified and respectful than just "brethren." Demosthenes sometimes said Av $\delta \rho \varepsilon \varsigma A \theta \eta v a ı o$. Cf. our "gentlemen and fellow-citizens." Women are included in this address though $\alpha v \delta \rho \varepsilon \varsigma$ refers only to men.

It was needful $(\varepsilon \delta \varepsilon)$. Imperfect tense of the impersonal $\delta \varepsilon$ with the infinitive clause (first aorist passive) and the accusative of general reference as a loose subject. Peter here assumes that Jesus is the Messiah and finds scripture illustrative of the treachery of Judas. He applies it to Judas and quotes the two passages in verse 20 (Ps 69:25; 109:8). The Holy Spirit has not yet come upon them, but Peter feels moved to interpret the situation. He feels that his mind is opened by Jesus (Lu 24:45). It is a logical, not a moral, necessity that Peter points out. Peter here claims the Holy Spirit as speaking in the scriptures as he does in 2 Pe 1:21. His description of Judas as "guide" (oס $\eta \gamma \circ v$ ) to those who seized ( $\sigma u \lambda \lambda \alpha \beta o v \sigma เ v$ ) Jesus is that of the base traitor that he was. This very verb occurs in Lu 22:54 of the arrest of Jesus.

Acts 1:17
Was numbered ( $\kappa \alpha \tau \eta \rho i \theta \mu \varepsilon v o \varsigma ~ \eta v$ ). Periphrastic past perfect passive indicative of $\kappa \alpha \tau \alpha \rho 1 \theta \mu \varepsilon \omega$, old verb, but here only in the N.T. (perfective use of $\kappa \alpha \tau \alpha)$.

Received his portion ( $\varepsilon \lambda \alpha \chi \varepsilon v$ tov $\kappa \lambda \eta \rho \circ v$ ). Second aorist active indicative of $\lambda \alpha \gamma \chi \alpha v \omega$, old verb, to obtain by lot as in Lu 1:9; Joh 19:24, especially by divine appointment as here and 2Pe 2:1 . K $\lambda \eta$ pos also means lot, an object used in casting lots (Ac 1:26), or what is obtained by lot as here and 8:21, of eternal salvation (Ac 26:18; Col 1:12), of persons chosen by divine appointment ( $1 \mathrm{Pe} 5: 3$ ). From this latter usage the Latin cleros, clericus, our clergy, one chosen by divine lot. So Peter says that Judas "obtained by lot the lot of this ministry" ( $\delta$ ıaкоvıaৎ) which he had when he betrayed Jesus. The Master chose him and gave him his opportunity.

Acts 1:18

Now this man (Hovtos $\mu \varepsilon v o v v$ ). Note $\mu \varepsilon v$ ovv again without a corresponding $\delta \varepsilon$ as in $1: 6$. Verses 18,19 are a long parenthesis of Luke by way of explanation of the fate of Judas. In verse 20 Peter resumes and quotes the scripture to which he referred in verse 16.

Obtained ( $\varepsilon \kappa \tau \eta \sigma \alpha \tau o)$. First aorist middle indicative of $\kappa \tau \alpha \circ \mu \alpha$, to acquire, only in the middle, to get for oneself. With the covenant money for the betrayal, acquired it indirectly apparently according to Mt 26:14-16; 27:3-8 which see.

Falling headlong ( $\pi \rho \eta \nu \eta \varsigma \gamma \varepsilon v o \mu \varepsilon v o \varsigma)$. Attic form usually $\pi \rho a \nu \eta \varsigma$. The word means, not "headlong," but "flat on the face" as opposed to vitios on the back (Hackett). Hackett observes that the place suits admirably the idea that Judas hung himself (Mt 27:5) and, the rope breaking, fell flat on his face and
burst asunder in the midst ( $\varepsilon \lambda \alpha \kappa \eta \sigma \varepsilon v \mu \varepsilon \sigma \circ \varsigma)$. First aorist active indicative of $\lambda \alpha \sigma \kappa \omega$ old verb (here only in the N.T.), to clang, to crack, to crash, like a falling tree. Aristophanes uses it of crashing bones. M\&бoc is predicate nominative referring to Judas.

Gushed out $(\varepsilon \xi \varepsilon \chi \cup \theta \eta)$. First aorist passive indicative of $\varepsilon \kappa \chi \varepsilon \omega$, to pour out.
Acts 1:19
Language ( $\delta \iota \alpha \lambda \varepsilon \kappa \tau \omega)$. Not a dialect of the Greek, but a different language, the Aramaic. So also in $2: 6 ; 21: 40 . \Delta ı \alpha \lambda \varepsilon \kappa \tau o \varsigma$ is from $\delta ı \alpha \lambda \varepsilon \gamma \circ \mu \alpha$, to converse, to speak between two ( $\delta \iota \alpha$ ).

Akeldama (Накع $\lambda \delta \alpha \mu \chi$ ). This Aramaic word Peter explains as "the field of blood." Two traditions are preserved: one in Mt 27:7 which explains that the priests purchased this potter's field with the money which Judas flung down as the price of the blood of Jesus. The other in Acts describes it as the field of blood because Judas poured out his blood there. Hackett and Knowling argue that both views can be true. "The ill-omened name could be used with a double emphasis" (Hackett).

Acts 1:20
For it is written $(\gamma \varepsilon \gamma \rho \alpha \pi \tau \alpha \gamma \alpha \rho)$. Luke here returns to the address of Peter interrupted by verses 18,19 . Perfect passive indicative, the usual idiom in quoting scripture, stands written. Ps 69 is often quoted as Messianic in Matthew and John.

His habitation ( $\eta \varepsilon \pi \alpha \cup \lambda_{ı} \varsigma \cup \tau \tau v$ ). Only here in the N.T., a country house, cottage, cabin.

His office ( $\tau \eta \nu \varepsilon \pi \iota \sigma \kappa о \pi \eta \nu$ avtov). Our word bishopric (Authorized Version) is from this word, office of bishop ( $\varepsilon \pi \iota \sigma \chi о \pi о \varsigma)$. Only that is not the idea here, but over-seership ( $\varepsilon \pi \iota, \sigma \kappa о \pi \varepsilon \omega)$ or office as in $1 \mathrm{Pe} 2: 12$. It means to visit and to inspect, to look over. The ecclesiastical sense comes later (1Ti 3:1).

Acts 1:21
Must ( $\delta \varepsilon$ ). Present necessity corresponding to the old necessity ( $\varepsilon \delta \varepsilon$ ) about Judas (verse 16). This sentence in verses 21,22 begins with $\delta \varepsilon$.

That $(\omega)$. Locative case of the relative attracted to the case of the antecedent.
Went in and went out $(\varepsilon \iota \sigma \eta \lambda \theta \varepsilon \nu \kappa \alpha \varepsilon \xi \eta \lambda \theta \varepsilon \nu)$. Constative aorist active.

With us ( $\varepsilon \varphi^{\prime} \eta \mu \alpha \varsigma$ ).
Over us, the margin has it. But the full phrase would be $\varepsilon \varphi^{\prime} \eta \mu \alpha \varsigma \kappa \alpha \alpha \varphi ' \eta \mu \omega v$. He came to us and went from us (Knowling).

Acts 1:22
Beginning ( $\alpha \rho \xi \alpha \mu \varepsilon v o \varsigma)$. Aorist middle participle of $\alpha \rho \chi \omega$, agreeing (nominative) with o кupıos I $\eta$ oous (the Lord Jesus). The ministry of Jesus began with the ministry of John. Strictly speaking $\alpha \rho \xi \alpha \mu \varepsilon v o \varsigma$ should be the accusative and agree with $\mu \alpha \rho \tau v \rho \alpha$ (witness) in verse 22 , but the construction is a bit free. The ministry of Jesus began with the baptism of John and lasted until the Ascension.

A witness with us of his resurrection ( $\mu \alpha \rho \tau \nu \rho \alpha \tau \eta \varsigma \alpha v a \sigma \tau \alpha \sigma \varepsilon \omega \varsigma \alpha v \tau \circ v \sigma \cup v \eta \mu \nu \nu$ ). This Peter considers the essential thing in a successor to Judas. The one chosen should be a personal witness who can speak from his own experience of the ministry, resurrection, and ascension of the Lord Jesus. One can easily see that this qualification will soon put an end to those who bear such personal testimony.

Acts 1:23
They put forward two ( $\varepsilon \sigma \tau \eta \sigma \alpha v \delta v o$ ). First aorist active indicative (transitive) of $\iota \sigma \tau \eta \mu$ (not intransitive second aorist, though same form in the third person plural). Somebody nominated two names, Justus and Matthias.

Acts 1:24
Show us the one whom thou hast chosen ( $\alpha v \alpha \delta \varepsilon ı \xi$ ov ov $\varepsilon \xi \varepsilon \lambda \varepsilon \xi \omega$ ). First aorist active imperative of $\alpha v \alpha \delta \varepsilon ו \kappa v v \mu$, to show up, make plain. First aorist middle indicative second person singular of $\varepsilon \kappa \lambda \varepsilon \gamma \omega$, to pick out, choose, select. In this prayer they assume that God has made a choice. They only wish to know his will. They call God the
heart-searcher or
heart-knower (кар $\delta \circ \gamma v \omega \sigma \tau \alpha$, vocative singular), a late word, here and Ac 15:8 only in the N.T. Modern physicians have delicate apparatus for studying the human heart.

Acts 1:25
Apostleship (arooto入ŋऽ). Jesus had called the twelve apostles. An old word for sending away, then for a release, then the office and dignity of an apostle (Ac 1:25; Ro 1:5; 1Co 9:2; Gal 2:8).
 destiny of Judas worthy of Dante's Inferno. There is no doubt in Peter's mind of the destiny of Judas nor of his own guilt. He made ready his own berth and went to it.

Acts 1:26
He was numbered ( $\sigma \cup v \kappa \alpha \tau \varepsilon \psi \eta \varphi\llcorner\sigma \theta \eta$ ). To the Jews the lot did not suggest gambling, but "the O.T. method of learning the will of Jehovah" (Furneaux). The two nominations made a decision necessary and they appealed to God in this way. This double compound $\sigma \cup v \kappa \alpha \tau \alpha \psi \eta \varphi \iota \zeta \omega$ occurs here alone in the N.T. and elsewhere only in Plutarch (Them. 21)
in the middle voice for condemning with others. $\Sigma v \vee \psi \eta \varphi \varphi \zeta \omega$ occurs in the middle voice in Ac 19:19 for counting up money and also in Aristophanes. $\Psi \eta \varphi \downharpoonright \zeta \omega$ with $\delta \alpha \pi \alpha \nu \eta \nu$ occurs in Lu 14:28 for counting the cost and in Re 13:18 for "counting" the number of the beast. The ancients used pebbles ( $\psi \eta \varphi 0$ ) in voting, black for condemning, white ( $\operatorname{Re} 2: 17$ ) in acquitting. Here it is used in much the same sense as $\kappa \alpha \tau \alpha \rho i \theta \mu \varepsilon \omega$ in verse 17.

## Acts 2

Acts 2:1
Was now come ( $\varepsilon v \tau \omega \sigma v v \pi \lambda \eta \rho o v \sigma \theta \alpha)$. Luke's favourite idiom of $\varepsilon v$ with the articular present infinitive passive and the accusative of general reference, "in the being fulfilled completely (perfective use of $\sigma u v^{-}$) as to the day of Pentecost." Common verb, but only in Luke in N.T. In literal sense of filling a boat in Lu 8:23, about days in $\mathrm{Lu} 9: 51$ as here. Whether the disciples expected the coming of the Holy Spirit on this day we do not know. Blass holds that the present tense shows that the day had not yet come. It is a Hebrew idiom (Ex 7:25 ) and Luke may mean that the day of Pentecost was not yet over, was still going on, though Hackett takes it for the interval (fifty days) between Passover and Pentecost. Apparently this day of Pentecost fell on the Jewish Sabbath (our Saturday). It was the feast of first fruits.

All together in one place ( $\pi \alpha v \tau \varepsilon \varsigma ~ o \mu o v \varepsilon \pi \tau o \alpha v \tau o$ ). All together in the same place. Note o $\mu \mathrm{ov}$ here (correct text), not o $\quad$ o $\theta \mu \mu \delta \delta \nu$ as in 1:14, and so a bit of tautology.

Acts 2:2
Suddenly $(\alpha \varphi v \omega)$. Old adverb, but in the N.T. only in Acts $(2: 2 ; 16: 26 ; 28: 6)$. Kin to $\varepsilon \xi \alpha \iota \varphi \vee \eta \varsigma(A c ~ 22: 61)$ ).

A sound ( $\eta \chi \circ \varsigma$ ). Our $\varepsilon \chi \circ$. Old word, already in Lu 4:37 for rumour and Lu 21:25 for the roar of the sea. It was not wind, but a roar or reverberation "as of the rushing of a mighty wind" ( $\omega \sigma \pi \varepsilon \rho \varphi \varepsilon \rho о \mu \varepsilon \nu \eta \varsigma \pi \nu \circ \eta \varsigma \beta \iota \alpha ı \propto)$. This is not a strict translation nor is it the genitive absolute. It was "an echoing sound as of a mighty wind borne violently" (or rushing along like the whirr of a tornado). Пvoŋ (wind) is used here (in the N.T. only here and 17:25 though old word) probably because of the use of $\pi v \varepsilon v \mu \alpha$ in verse 4 of the Holy Spirit. In Joh 3:5-8 $\pi v \varepsilon v \mu \alpha$ occurs for both wind and Spirit.

Filled $(\varepsilon \pi \lambda \eta \rho \omega \sigma \varepsilon v)$. "As a bath is filled with water, that they might be baptized with the Holy Ghost, in fulfilment of Ac 1:5 " (Canon Cook).

They were sitting ( $\eta \sigma \alpha \nu \kappa \alpha \theta \eta \mu \varepsilon v o$ ). Periphrastic imperfect middle of $\kappa \alpha \theta \eta \mu \alpha$.
Acts 2:3
Parting asunder ( $\delta ı \alpha \mu \varepsilon \rho \iota \zeta о \mu \varepsilon v \alpha)$. Present middle (or passive) participle of $\delta ı \alpha \mu \varepsilon \rho \iota \zeta \omega$, old verb, to cleave asunder, to cut in pieces as a butcher does meat (aorist passive in Lu 11:17f. ). So middle here would mean, parting themselves asunder or distributing themselves. The passive voice would be "being distributed." The middle is probably correct and means that "the fire-like appearance presented itself at first, as it were, in a single body, and then suddenly parted in this direction and that; so that a portion of it rested on each of those present" (Hackett). The idea is not that each tongue was cloven, but each separate tongue looked like fire, not real fire, but looking like ( $\omega \sigma \varepsilon$, as if) fire. The audible sign is followed by a visible one (Knowling). "Fire had always been, with the Jews, the symbol of the Divine
presence (cf. Ex 3:2; De 5:4 ). No symbol could be more fitting to express the Spirit's purifying energy and refining energy" (Furneaux). The Baptist had predicted a baptizing by the Messiah in the Holy Spirit and in fire (Mt 3:11).

It sat ( $\varepsilon \kappa \alpha \theta \iota \sigma \varepsilon v)$. Singular verb here, though plural $\omega \pi \theta \eta \sigma \alpha v$ with tongues ( $\gamma \lambda \omega \sigma \sigma \alpha$ ). A tongue that looked like fire sat upon each one.

Acts 2:4
With other tongues ( $\varepsilon \tau \varepsilon \rho \alpha \iota \varsigma ~ \gamma \lambda \omega \sigma \sigma \alpha ı \varsigma)$. Other than their native tongues. Each one began to speak in a language that he had not acquired and yet it was a real language and understood by those from various lands familiar with them. It was not jargon, but intelligible language. Jesus had said that the gospel was to go to all the nations and here the various tongues of earth were spoken. One might conclude that this was the way in which the message was to be carried to the nations, but future developments disprove it. This is a third miracle (the sound, the tongues like fire, the untaught languages). There is no blinking the fact that Luke so pictures them. One need not be surprised if this occasion marks the fulfilment of the Promise of the Father. But one is not to confound these miraculous signs with the Holy Spirit. They are merely proof that he has come to carry on the work of his dispensation. The gift of tongues came also on the house of Cornelius at Caesarea (Ac 10:44-47; 11:15-17), the disciples of John at Ephesus (Ac 19:6 ), the disciples at Corinth (1Co 14:1-33 ). It is possible that the gift appeared also at Samaria (Ac 8:18). But it was not a general or a permanent gift. Paul explains in 1Co 14:22 that "tongues" were a sign to unbelievers and were not to be exercised unless one was present who understood them and could translate them. This restriction disposes at once of the modern so-called tongues which are nothing but jargon and hysteria. It so happened that here on this occasion at Pentecost there were Jews from all parts of the world, so that some one would understand one tongue and some another without an interpreter such as was needed at Corinth. The experience is identical in all four instances and they are not for edification or instruction, but for adoration and wonder and worship.

As the Spirit gave them utterance ( $\kappa \alpha \theta \omega \varsigma$ то $\pi v \varepsilon v \mu \alpha \varepsilon \delta \iota \delta o v ~ a \pi о \varphi \theta \varepsilon \gamma \gamma \varepsilon \sigma \theta \alpha \alpha 0 \tau о \iota)$ ). This is precisely what Paul claims in 1Co 12:10,28, but all the same without an interpreter the gift was not to be exercised (1Co 14:6-19). Paul had the gift of tongues, but refused to exercise it except as it would be understood. Note the imperfect tense here ( $\varepsilon \delta \iota \delta o v)$. Perhaps they did not all speak at once, but one after another. Ало $\varphi \theta \varepsilon \gamma \gamma \varepsilon \sigma \theta \alpha$ is a late verb (LXX of prophesying, papyri). Lucian uses it of the ring of a vessel when it strikes a reef. It is used of eager, elevated, impassioned utterance. In the N.T. only here, verse 14; 26:25 . A $\tau о \varphi \theta \varepsilon \gamma \mu$ is from this verb.

Acts 2:5
Were dwelling ( $\eta \sigma \alpha v$ катоккоиvтєऽ). Periphrastic imperfect active indicative. Usually катокк $\omega$ means residence in a place ( $4: 16 ; 7: 24 ; 9: 22,32$ ) as in verse 14 (Luke 13:4). Perhaps
some had come to Jerusalem to live while others were here only temporarily, for the same word occurs in verse 9 of those who dwell in Mesopotamia, etc.

Devout ( $\varepsilon v \lambda \alpha \beta \varepsilon ı \varsigma)$. Reverent ( $\varepsilon v$, well, $\lambda \alpha \mu \beta \alpha v \omega$, to take). See on Lu 2:25 like Simeon waiting for the consolation of Israel or hoping to die and be buried in the Holy City and also Ac 8:2 .

Acts 2:6
When this sound was heard ( $\gamma \varepsilon \nu \circ \mu \varepsilon \nu \eta \varsigma \tau \eta \varsigma \varphi \omega \nu \eta \varsigma \tau \alpha v \tau \eta \varsigma)$. Genitive absolute with aorist middle participle. Note $\varphi \omega \vee \eta$ this time, not $\eta \chi \circ$ as in verse $1 . \Phi \omega \nu \eta$ originally meant sound as of the wind (Joh 3:8) or an instrument (1Co 14:7,8,10), then voice of men. The meaning seems to be that the excited "other tongues" of verse 4 were so loud that the noise drew the crowd together. The house where the 120 were may have been (Hackett) on one of the avenues leading to the temple.

Were confounded ( $\sigma v v \varepsilon \chi v \theta \eta$ ). First aorist passive indicative of $\sigma v v \chi \varepsilon \omega$ or $\sigma v \nu \chi \nu \nu \omega$, to pour together precisely like the Latin confundo, to confound. The Vulgate has it mente confusa est. It is an old verb, but in the N.T. only in Acts five times (2:6; 9:22; 19:32; 21:27,31 ).

In his own language ( $\tau \eta \stackrel{\delta \iota \alpha}{ } \delta \iota \lambda \lambda \kappa \tau \omega$ ). Locative case. Each one could understand his own language when he heard that. Every one that came heard somebody speaking in his native tongue.

Acts 2:7
Were amazed ( $\varepsilon \xi \iota \sigma \tau \alpha v \tau o)$. Imperfect middle of $\varepsilon \xi \iota \sigma \tau \eta \mu$, to stand out of themselves, wide-open astonishment.

Marvelled ( $\varepsilon \theta \alpha \nu \mu \alpha \zeta o v)$. Imperfect active. The wonder grew and grew.
Galileans ( $\Gamma \alpha \lambda_{\iota} \lambda \iota \iota$ ). There were few followers of Jesus as yet from Jerusalem. The Galileans spoke a rude Aramaic (Mr 14:70) and probably crude Greek vernacular also. They were not strong on language and yet these are the very people who now show such remarkable linguistic powers. These people who have come together are all Jews and therefore know Aramaic and the vernacular Koine, but there were various local tongues "wherein we were born" ( $\varepsilon \nu \eta \varepsilon \gamma \varepsilon v \nu \eta \theta \eta \mu \varepsilon v)$. An example is the Lycaonian (Ac 14:11). These Galilean Christians are now heard speaking these various local tongues. The lists in verses 9-11 are not linguistic, but geographical and merely illustrate how widespread the Dispersion ( $\Delta \mathrm{l} \alpha \sigma \pi \sigma \rho \alpha$ ) of the Jews was as represented on this occasion. Jews were everywhere, these "Jews among the nations" (Ac 21:21 ). Page notes four main divisions here: (I) The Eastern or Babylonian, like the Parthians, Medes, Elamites, Mesopotamians. (2) The Syrian like Judea, Cappadocia, Pontus, Asia, Phrygia, Pamphylia. (3) The Egyptian like Egypt, Libya, Cyrene. (4) The Roman.

Jews and proselytes ( $\pi \rho \circ \sigma \eta \lambda v \tau o$ ). These last from $\pi \rho o \sigma \varepsilon \rho \chi \circ \mu \alpha$, to come to, to join, Gentile converts to Judaism (circumcision, baptism, sacrifice). This proselyte baptism was
immersion as is shown by I. Abrahams (Studies in Pharisaism and the Gospels, p. 38). Many remained uncircumcised and were called proselytes of the gate.

Acts 2:11
Cretes and Arabians. These two groups "seem to have been added to the list as an afterthought" (Knowling). Crete is an island to itself and Arabia was separate also though near Judea and full of Jews. The point is not that each one of these groups of Jews spoke a different language, but that wherever there was a local tongue they heard men speaking in it.

We do hear them speaking ( $\alpha \kappa о v o \mu \varepsilon \nu \lambda \alpha \lambda o v v \tau \omega \nu \alpha v \tau \omega v$ ). Genitive case $\alpha v \tau \omega \nu$ with $\alpha \kappa о v \omega$ the participle $\lambda \alpha \lambda o u v \tau \omega \nu$ agreeing with $\alpha \nu \tau \omega \nu$, a sort of participial idiom of indirect discourse (Robertson, Grammar, pp. 1040ff.).

The mighty works ( $\tau \alpha \mu \varepsilon \gamma \alpha \lambda \varepsilon \iota \alpha$ ). Old adjective for magnificent. In LXX, but only here (not genuine in Lu 1:49) in the N.T. Cf. 2Pe 1:16 for $\mu \varepsilon \gamma \alpha \lambda \varepsilon \iota \circ \tau \eta \varsigma ~(m a j e s t y) . ~$

Acts 2:12
Were perplexed ( $\delta \imath \eta \pi о \rho о v \nu \tau \sigma$ ). Imperfect middle of $\delta \iota \alpha \pi \sigma \rho \varepsilon \omega$ ( $\delta \iota \alpha$, a privative, $\pi о \rho \circ \varsigma$ ) to be wholly at a loss. Old verb, but in N.T. only in Luke and Acts. They continued amazed ( $\varepsilon \xi \iota \sigma \tau \alpha \nu \tau 0)$ and puzzled.

What meaneth this? (T $\theta \varepsilon \lambda \varepsilon$ touto $\varepsilon เ v \alpha)$. Literally, what does this wish to be?
Acts 2:13
Mocking ( $\delta ı \alpha \chi \lambda \varepsilon v \alpha \zeta о v \tau \varepsilon \varsigma)$. Old verb, but only here in the N.T., though the simple verb (without $\delta \iota \alpha$ ) in 17:32. X $\lambda \varepsilon v \eta$ means a joke.

With new wine ( $\gamma \lambda \varepsilon$ vкоия). Sweet wine, but intoxicating. Sweet wine kept a year was very intoxicating. Genitive case here after $\mu \varepsilon \mu \varepsilon \sigma \tau \omega \mu \varepsilon v o \varepsilon \iota \sigma \iota \nu$ (periphrastic perfect passive indicative), old verb $\mu \varepsilon \sigma \tau \sigma \omega$, only here in the N.T. Tanked up with new wine, state of fulness.

Acts 2:14
Standing up with the eleven ( $\sigma \tau \alpha \theta \varepsilon ı \varsigma \sigma \nu \tau о \iota \varsigma \varepsilon \nu \delta \varepsilon \kappa \alpha)$. Took his stand with the eleven including Matthias, who also rose up with them, and spoke as their spokesman, a formal and impressive beginning. The Codex Bezae has "ten apostles." Luke is fond of this pictorial use of $\sigma \tau \alpha \theta \varepsilon ı \varsigma$ (first aorist passive participle of $\sigma \tau \eta \mu$ ) as seen nowhere else in the N.T. (Lu 18:11,40; 19:8; Ac 5:20; 17:22; 27:21 ).

Lifted up his voice ( $\varepsilon \pi \eta \rho \varepsilon \nu \tau \eta v \varphi \omega \nu \eta \nu \alpha v \tau o v)$. This phrase only in Luke in the N.T. (Lu 11:29; Ac 2:14; 14:11; 22:22), but is common in the old writers. First aorist active indicative of $\varepsilon \pi \alpha \iota \rho \omega$. The large crowd and the confusion of tongues demanded loud speaking. "This most solemn, earnest, yet sober speech" (Bengel). Codex Bezae adds "first" after "voice." Peter did it to win and hold attention.

Give ear unto my words ( $\varepsilon \nu \omega \tau \iota \sigma \alpha \sigma \theta \varepsilon \tau \alpha \rho \eta \mu \alpha \tau \alpha \mu o v)$. Late verb in LXX and only here in the N.T. First aorist middle from $\varepsilon v \omega \tau \iota \zeta$ о $\alpha$ ( $\varepsilon \nu, o v \varsigma$, ear) to give ear to, receive into the ear. People's ears differ greatly, but in public speech they have to be reached through the
ear. That puts an obligation on the speaker and also on the auditors who should sit where they can hear with the ears which they have, an obligation often overlooked.

Acts 2:15
As ye suppose ( $\omega \varsigma \nu \mu \varepsilon ı \varsigma ~ v \pi о \lambda \alpha \mu \beta \alpha \nu \varepsilon \tau \varepsilon$ ). Note use of $v \mu \varepsilon \iota \varsigma$ (ye) for decided emphasis.
The third hour ( $\omega \rho \alpha \tau \rho \iota \tau \eta$ ). Three o'clock in the day Jewish time, nine Roman. Drunkenness belongs to the night (1Th 5:7 ). It was a quick, common sense reply, and complete answer to their suspicion.

Acts 2:16
This is that which hath been spoken by the prophet Joel ( $\tau \circ v \tau o \varepsilon \sigma \tau เ \nu \tau o ~ \varepsilon ı \rho \eta \mu \varepsilon v o v$ $\delta \iota \alpha$ тоv $\pi \rho о \varphi \eta \tau о v \mathrm{I} \omega \eta \lambda)$. Positive interpretation of the supernatural phenomena in the light of the Messianic prophecy of Joe 2:28-32 . Peter's mind is now opened by the Holy Spirit to understand the Messianic prophecy and the fulfilment right before their eyes. Peter now has spiritual insight and moral courage. The
power ( $\delta v \nu \alpha \mu \iota$ ) of the Holy Spirit has come upon him as he proceeds to give the first interpretation of the life and work of Jesus Christ since his Ascension. It is also the first formal apology for Christianity to a public audience. Peter rises to the height of his powers in this remarkable sermon. Jesus had foretold that he would be a Rock and now he is no longer shale, but a solid force for aggressive Christianity. He follows here in verses 17-21 closely the LXX text of Joel and then applies the passage to the present emergency (22-24).

Acts 2:17
In the last days ( $\varepsilon v \tau \alpha ı \varsigma \varepsilon \sigma \chi \alpha \tau \alpha \iota \varsigma ~ \eta \mu \varepsilon \rho \alpha ı \varsigma)$. Joel does not have precisely these words, but he defines "those days" as being "the day of the Lord" (cf. Isa 2:2; Mic 4:1 ).

I will pour forth ( $\varepsilon \kappa \chi \varepsilon \omega$ ). Future active indicative of $\varepsilon \kappa \chi \varepsilon \omega$. This future like $\varepsilon \delta o \mu \alpha$ and $\pi \iota \rho \alpha \alpha$ is without tense sign, probably like the present in the futuristic sense (Robertson, Grammar, p. 354). Westcott and Hort put a different accent on the future, but the old Greek had no accent. The old Greek had $\varepsilon \kappa \chi \varepsilon v \sigma \omega$. This verb means to pour out.

Of my Spirit ( $\alpha \pi \sigma$ тov $\pi v \varepsilon v \mu \alpha \tau \circ \varsigma$ ). This use of $\alpha \pi \sigma$ (of) is either because of the variety in the manifestations of the Spirit (1Co 12 ) or because the Spirit in his entirety remains with God (Holtzmann, Wendt). But the Hebrew has it: "I will pour out my Spirit" without the partitive idea in the LXX.

And your daughters ( $\kappa \alpha$ a $\theta v \gamma \alpha \tau \varepsilon \rho \varepsilon \varsigma \nu \mu \omega v$ ). Anna is called a prophetess in Lu 2:36 and the daughters of Philip prophesy (Ac 21:9) and verse 18 (handmaidens). See also 1Co 11:5 ( $\pi \rho о \varphi \eta \tau о v \sigma \alpha$ ).

Visions (o $\rho \alpha \sigma \varepsilon ı$ ). Late word for the more common o $\rho \alpha \mu \alpha$, both from o $\rho \alpha \omega$, to see. In Re 4:3 it means appearance, but in $\operatorname{Re} 9: 17$ as here an ecstatic revelation or vision.

Dream dreams ( $\varepsilon v v \pi v i o \iota \varsigma ~ \varepsilon v v \pi \nu \iota \alpha \sigma \theta \eta \sigma o v \tau \alpha)$. Shall dream with (instrumental case) dreams. First future passive of $\varepsilon v v \pi \nu \iota \alpha \zeta \omega$ from $\varepsilon v v \pi \nu \iota o \varsigma(\varepsilon v$ and $v \pi \nu o \varsigma$, in sleep), a common late word. Only here in the N.T. (this from Joel as all these verses 17-21 are) and Jude 1:8 .

Yea and ( $\kappa \alpha \boldsymbol{\gamma}$ ). Intensive particle $\gamma \varepsilon$ added to $\kappa \alpha$ (and), an emphatic addition (=Hebrew vegam).

Servants ( $\delta o u \lambda o u c)$,
handmaidens ( $\delta o u \lambda \alpha \varsigma)$. Slaves, actual slaves of men. The humblest classes will receive the Spirit of God (cf. 1Co 1:26-31). But the word "prophesy" here is not in the LXX (or the Hebrew).

Acts 2:19
Wonders ( $\tau \varepsilon \rho \alpha \tau \alpha)$. Apparently akin to the verb $\tau \eta \rho \varepsilon \omega$, to watch like a wonder in the sky,
miracle ( $\mu \rho \alpha \chi \nu \lambda \nu \mu$ ), marvel, portent. In the New Testament the word occurs only in the plural and only in connection with $\sigma \eta \mu \varepsilon \varepsilon \alpha$ (signs) as here and in verse 43. But
signs ( $\sigma \eta \mu \varepsilon 1 \alpha$ ) here is not in the LXX. See on Mt 11:20. In verse 22 all three words occur together: powers, wonders, signs ( $\delta v v a \mu \varepsilon \sigma \iota, \tau \varepsilon \rho a \sigma \iota, \sigma \eta \mu \varepsilon \iota \circ \iota)$.

As above $(\alpha v \omega)$. This word is not in the LXX nor is "beneath" ( $\kappa \alpha \tau \omega$ ), both probably being added to make clearer the contrast between heaven and earth.

Blood and fire and vapour of smoke ( $\alpha \mu \alpha \kappa \alpha \pi \nu \rho \kappa \alpha \alpha \tau \mu \delta \delta \alpha \kappa \alpha \pi v o v$ ). A chiasm as these words illustrate bloodshed and destruction by fire as signs here on earth.

Acts 2:20
Shall be turned ( $\mu \varepsilon \tau \alpha \sigma \tau \rho \alpha \varphi \eta \sigma \varepsilon \tau \alpha$ ). Second future passive of $\mu \varepsilon \tau \alpha \sigma \tau \rho \varepsilon \varphi \omega$, common verb, but only three times in the N.T. (Ac 2:20 from Joel; Jas 4:9; Ga 1:7). These are the "wonders" or portents of verse 19. It is worth noting that Peter interprets these "portents" as fulfilled on the Day of Pentecost, though no such change of the sun into darkness or of the moon into blood is recorded. Clearly Peter does not interpret the symbolism of Joel in literal terms. This method of Peter may be of some service in the Book of Revelation where so many apocalyptic symbols occur as well as in the great Eschatological Discourse of Jesus in Mt 24,25. In Mt 24:6,29 Jesus had spoken of wars on earth and wonders in heaven.

Before the day of the Lord come, that great and notable day ( $\pi \rho \nu v \varepsilon \lambda \theta \varepsilon v \nu \eta \mu \rho \alpha \nu$ кvpıov $\tau \eta \nu \mu \varepsilon \gamma \alpha \lambda \eta \nu \kappa \alpha \varepsilon \pi \iota \varphi \alpha v \eta)$. The use of $\pi \rho \iota \nu$ with the infinitive and the accusative of general reference is a regular Greek idiom. The use of the adjectives with the article is also good Greek, though the article is not here repeated as in 1:25. The Day of the Lord is a definite conception without the article.

Notable ( $\varepsilon \pi\llcorner\varphi a v \eta$ ) is the same root as epiphany ( $\varepsilon \pi \iota \varphi a v \varepsilon ı \alpha)$ used of the Second Coming of Christ (2Th 2:8; 1Ti 6:14; 2Ti 4:1; Tit 2:13). It translates here the Hebrew word for "terrible." In the Epistles the Day of the Lord is applied (Knowling) to the Coming of Christ for judgment (1Th 5:2; 1Co 1:8; 2Co 1:14; Php 1:10).

Acts 2:21

Shall call on ( $\varepsilon \pi \kappa \kappa \alpha \lambda \varepsilon \sigma \eta \tau \alpha$ ). First aorist middle subjunctive of $\varepsilon \pi \iota \kappa \alpha \lambda \varepsilon \omega$, common verb, to call to, middle voice for oneself in need. Indefinite relative clause with $\varepsilon \alpha \nu$ and so subjunctive, punctiliar idea, in any single case, and so aorist.

Acts 2:22
Hear these words (aкouбate tous doүous $\tau 0 \cup \tau 0 \cup \varsigma)$. Do it now (aorist tense). With unerring aim Peter has found the solution for the phenomena. He has found the key to God's work on this day in his words through Joel.
as ye yourselves know ( $\kappa \alpha \theta \omega \varsigma ~ \alpha v \tau o ~ o ı \delta \alpha \tau \varepsilon)$. Note $\alpha v \tau o$ for emphasis. Peter calls the audience to witness that his statements are true concerning "Jesus the Nazarene." He wrought his miracles by the power of God in the midst of these very people here present.

Acts 2:23
Him ( $\tau 0 v \tau 0 v$ ). "This one," resumptive and emphatic object of "did crucify and slay."
Being delivered up ( $\varepsilon \kappa \delta o \tau o v$ ). Verbal adjective from $\varepsilon \kappa \delta \iota \delta \omega \mu$, to give out or over. Old word, but here only in the N.T. Delivered up by Judas, Peter means.

By the determinate counsel and foreknowledge of God ( $\tau \eta \omega \rho \iota \sigma \mu \varepsilon \nu \eta \beta o v \lambda \eta \kappa \alpha$ $\pi \rho o \gamma \nu \omega \sigma \eta$ тov $\theta \varepsilon o v)$. Instrumental case. Note both purpose ( $\beta o v \lambda \eta$ ) and foreknowledge ( $\pi \rho о \gamma \nu \omega \sigma \iota \varsigma)$ of God and "determined" ( $\omega \rho \iota \sigma \mu \varepsilon \nu \eta$, perfect passive participle, state of completion). God had willed the death of Jesus (Joh 3:16) and the death of Judas (Ac 1:16), but that fact did not absolve Judas from his responsibility and guilt (Lu 22:22). He acted as a free moral agent.

By the hand ( $\delta \iota \alpha \chi \varepsilon \iota \rho \circ \varsigma)$. Luke is fond of these figures (hand, face, etc.) very much like the Hebrew though the vernacular of all languages uses them.

Lawless men ( $\alpha \nu o \mu \omega \nu$ ). Men without law, who recognize no law for their conduct, like men in high and low stations today who defy the laws of God and man. Old word, very common in the LXX.

Ye did crucify $(\pi \rho o \sigma \pi \eta \xi \alpha \nu \tau \varepsilon \varsigma)$. First aorist active participle of $\pi \rho o \sigma \pi \eta \gamma \nu \nu \mu$, rare compound word in Dio Cassius and here only in the N.T. One must supply $\tau \omega \sigma \tau \alpha v \rho \omega$ and so it means "fastened to the cross," a graphic picture like Paul's "nailed to the cross" ( $\pi \rho \circ \sigma \eta \lambda \omega \sigma \alpha \varsigma \tau \omega \sigma \tau \alpha v \rho \omega$ ) in Col 2:14 .

Did slay ( $\alpha v \varepsilon \downarrow \lambda \alpha \tau \varepsilon$ ). Second aorist active indicative with first aorist vowel $\alpha$ instead of o as is common in the Koine. This verb avaı $\rho \varepsilon \omega$, to take up, is often used for kill as in Ac 12:2 . Note Peter's boldness now under the power of the Holy Spirit. He charges the people to their faces with the death of Christ.

Acts 2:24
God raised up (o $\theta \varepsilon o \varsigma \alpha v \varepsilon \sigma \tau \eta \sigma \varepsilon v$ ). Est hoc summum orationis (Blass). Apparently this is the first public proclamation to others than believers of the fact of the Resurrection of Jesus. "At a time it was still possible to test the statement, to examine witnesses, to expose
fraud, the Apostle openly proclaimed the Resurrection as a fact, needing no evidence, but known to his hearers" (Furneaux).

The pangs of death ( $\tau \alpha \varsigma \omega \delta \iota v a \varsigma$ tov $\theta a v a \tau o v)$. Codex Bezae has "Hades" instead of death. The LXX has $\omega \delta i v a \varsigma ~ \theta a v a \tau o v ~ i n ~ P s ~ 18: 4, ~ b u t ~ t h e ~ H e b r e w ~ o r i g i n a l ~ m e a n s ~ " s n a r e s " ~ o r ~ \$ ~$ "traps" or "cords" of death where sheol and death are personified as hunters laying snares for prey. How Peter or Luke came to use the old Greek word $\omega \delta$ ivac (birth pangs) we do not know. Early Christian writers interpreted the Resurrection of Christ as a birth out of death. "Loosing" ( $\lambda$ voac) suits better the notion of "snares" held a prisoner by death, but birth pangs do bring deliverance to the mother also.

Because ( $\kappa \alpha Ө$ от). This old conjunction ( $\kappa \alpha \tau \alpha$, от) occurs in the N.T. only in Luke's writings.

That he should be holden (кратєוбӨ $\alpha \cup \tau \circ v$ ). Infinitive present passive with accusative of general reference and subject of $\eta \nu \alpha \delta u v a \tau o v$. The figure goes with "loosed" ( $\lambda \nu \sigma a \varsigma$ ) above.

Acts 2:25
Concerning him ( $\varepsilon \iota \varsigma \alpha \cup \tau o v)$ ). Peter interprets Ps 16:8-11 as written by David and with reference to the Messiah. There is but one speaker in this Psalm and both Peter here and Paul in Ac 13:36 make it the Messiah. David is giving his own experience which is typical of the Messiah (Knowling).

I beheld ( $\pi \rho \circ \circ \rho \omega \mu \eta \nu$ ). Imperfect middle without augment of $\pi \rho \circ o \rho \alpha \omega$, common verb, but only twice in the N.T., to see beforehand (Ac 21:29) or to see right before one as here. This idea of $\pi \rho o-$ is made plainer by "before my face" ( $\varepsilon v \omega \pi \iota o v \mu \circ v$ ).

On my right hand ( $\varepsilon \kappa \delta \varepsilon \xi \epsilon \omega \vee \mu \circ v$ ). The Lord Jehovah like a defender or advocate stands at David's right hand as in trials in court (Ps 109:31).

That ( $\mathrm{v} \alpha$ ) here is almost result.
Moved ( $\sigma \alpha \lambda \varepsilon v \theta \omega$ ). First aorist passive subjunctive of $\sigma \alpha \lambda \varepsilon v \omega$, to shake like an earthquake.

Acts 2:26
Was glad ( $\eta \cup \varphi \rho a v \theta \eta)$. First aorist (timeless here like the Hebrew perfect) passive indicative of $\varepsilon v \varphi \rho \alpha ı v \omega$ (cf. Lu 15:32). Timeless also is "rejoiced" ( $\eta \gamma \alpha \lambda \lambda ı \alpha \sigma \alpha \tau o$ ).

Shall dwell (катабкך $\omega \omega \sigma \varepsilon$ ). Shall tabernacle, pitch a tent, make one's abode (cf. Mt 13:32 ). See on Mt 8:20 about катабкп $\nu \omega \sigma \varepsilon ı$ (nests)

In hope ( $\varepsilon \pi^{\prime} \varepsilon \lambda \pi \downarrow \delta$ ). On hope, the hope of the resurrection.
Acts 2:27
In Hades ( $\varepsilon ı \varsigma ~ H a ı \delta \eta \nu)$. Hades is the unseen world, Hebrew Sheol, but here it is viewed as death itself "considered as a rapacious destroyer" (Hackett). It does not mean the place of punishment, though both heaven and the place of torment are in Hades (Lu 16:23). "Death and Hades are strictly parallel terms: he who is dead is in Hades" (Page). The use of
$\varepsilon ı \zeta$ here $=\varepsilon v$ is common enough. The Textus Receptus here reads $\varepsilon ı \zeta$ Haıסov (genitive case) like the Attic idiom with $\delta$ o $\mu$ ov (abode) understood. "Hades" in English is not translation, but transliteration. The phrase in the Apostles' Creed, "descended into hell" is from this passage in Acts (Hades, not Gehenna). The English word "hell" is Anglo-Saxon from $\varepsilon \lambda \alpha v$, to hide, and was used in the Authorized Version to translate both Hades as here and Gehenna as in Mt 5:22.

Thy Holy One ( $\tau 0 v$ oбıov $\sigma o v$ ). Peter applies these words to the Messiah.
Corruption ( $\delta \operatorname{lo\varphi } \theta \mathrm{o} \rho \alpha v$ ). The word can mean destruction or putrefaction from $\delta \iota \propto \varphi \theta \varepsilon \rho \omega \omega$, old word, but in N.T. only here and Ac 13:34-37. The Hebrew word in Ps 16 can mean also the pit or the deep.

Acts 2:28
The ways of life (oסouc $\zeta \omega \eta \varsigma)$. Though dead God will show him the ways back to life.
Acts 2:29
I may say ( $\varepsilon \xi \circ v \varepsilon \iota \pi \varepsilon เ v)$. Supply $\varepsilon \sigma \tau \iota v$ before $\varepsilon \xi \circ v$, periphrastic present indicative of $\varepsilon \xi \varepsilon \mu$, to allow, permit. The Authorized Version has "Let me speak," supplying $\varepsilon \sigma \tau o$ present imperative.

Freely ( $\mu \varepsilon \tau \alpha \pi \alpha \rho \rho \eta \sigma i \alpha \varsigma)$. Telling it all ( $\pi \alpha \nu, \rho \eta \sigma \iota \alpha$ from $\varepsilon ı \pi \sigma v$, to speak), with fulness, with boldness. Luke is fond of the phrase (as in 4:13). It is a new start for Simon Peter, full of boldness and courage.

The patriarch ( $\tau o v \pi \alpha \tau \rho \iota \alpha \rho \chi \circ v$ ). Transliteration of the word, from $\pi \alpha \tau \rho \iota \alpha$, family, and $\alpha \rho \chi \omega$, to rule, the founder of a family. Late word in LXX. Used of Abraham (Heb 7:4), of the twelve sons of Jacob as founders of the several tribes (Ac 7:8), and here of David as head of the family from whom the Messiah comes.

Was buried ( $\varepsilon \tau \alpha \varphi \eta$ ). Second aorist passive indicative of $\theta a \pi \tau \omega$. His tomb was on Mt. Zion where most of the kings were buried. The tomb was said to have fallen into ruins in the time of the Emperor Hadrian. Josephus (Ant. XVI. 7, 1) attributes most of the misfortunes of Herod's family to the fact that he tried to rifle the tomb of David.

Acts 2:31
Foreseeing ( $\pi \rho o t \delta \omega v$ ). Second aorist active participle. Did it as a prophet.
Of the Christ ( $\tau 0 v$ Xpıotov). Of the Messiah. See under verse 32. This is a definite statement by Peter that David knew that in Ps 16 he was describing the resurrection of the Messiah.

Acts 2:32
 called "the Nazarene" (verse 22) and foretold as the Messiah in Ps 16 and raised from the dead by God in proof that he is the Messiah (2:24,32), "this Jesus whom ye crucified" (verse 36). Other terms used of him in the Acts are the Messiah, verse 31, the one whom God "anointed" (Ac 10:38 ), as in Joh 1:41, Jesus Christ ( 9:34). In 2:36 God made this Jesus

Messiah, in 3:20 the Messiah Jesus, in 17:3 Jesus is the Messiah, in 18:5 the Messiah is Jesus, in 24:24 Christ Jesus.

Whereof (ov). Or "of whom." Either makes sense and both are true. Peter claims the whole 120 as personal witnesses to the fact of the Resurrection of Jesus from the dead and they are all present as Peter calls them to witness on the point. In Galilee over 500 had seen the Risen Christ at one time (1Co 15:6) most of whom were still living when Paul wrote. Thus the direct evidence for the resurrection of Jesus piles up in cumulative force.

## Acts 2:33

By the right hand of God ( $\tau \eta \delta \varepsilon \xi \iota \propto$ тov $\theta \varepsilon o v$ ). This translation makes it the instrumental case. The margin has it "at" instead of "by," that is the locative case. And it will make sense in the true dative case, "to the right hand of God." These three cases came to have the same form in Greek. Ro 8:24 furnishes another illustration of like ambiguity ( $\tau \eta \varepsilon \lambda \pi \iota \delta$ ), saved by hope, in hope, or for hope. Usually it is quite easy to tell the case when the form is identical.

Exalted ( $v \psi \omega \theta \varepsilon \iota \varsigma)$. First aorist passive participle of $v \psi o \omega$, to lift up. Here both the literal and tropical sense occurs. Cf. Joh 12:32 .

The promise of the Holy Spirit ( $\tau \eta v \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda ı \alpha \nu$ tov $\pi v \varepsilon \cup \mu a \tau \circ \varsigma$ tov $\alpha \gamma เ \circ v$ ). The promise mentioned in 1:4 and now come true, consisting in the Holy Spirit "from the Father" ( $\pi \alpha \rho \alpha$ tou $\pi \alpha \tau \rho \circ \varsigma)$, sent by the Father and by the Son (Joh 15:26; 16:7). See also Ga 3:14.

He hath poured forth ( $\varepsilon \xi \varepsilon \chi \varepsilon \varepsilon v$ ). Aorist active indicative of $\varepsilon \kappa \chi \varepsilon \omega$ the verb used by Joel and quoted by Peter already in verses 17,18 . Jesus has fulfilled his promise.
 sound like the rushing wind, the tongues like fire on each of them, the different languages spoken by the 120. "The proof was before their eyes in this new energy from heaven" (Furneaux), a culminating demonstration that Jesus was the Messiah.

Acts 2:34
Ascended not (ov-- $\alpha v \varepsilon \beta \eta$ ). It is more emphatic than that: For not David ascended into the heavens. Peter quotes Ps 110:1 as proof. No passage in the O.T. is so constantly quoted as Messianic as this. "St. Peter does not demand belief upon his own assertion, but he again appeals to the Scriptures, and to words which could not have received a fulfilment in the case of David" (Knowling).

Sit thou ( $\kappa \alpha \theta$ ои). Late Koine form for earlier $\kappa \alpha \theta \eta \sigma о$, present middle imperative second singular of $\kappa \alpha \theta \eta \mu \alpha$.

Acts 2:35
Till I make ( $\varepsilon \omega \varsigma \alpha \nu \theta \omega$ ). Second aorist active subjunctive of $\tau \iota \theta \eta \mu$ with $\alpha v$ after $\varepsilon \omega \varsigma$ for the future, a common Greek idiom. This dominion of Christ as Mediator will last till the plan of the kingdom is carried out (1Co 15:23-28). Complete subjugation will come, perhaps
referring to the custom of victorious kings placing their feet upon the necks of their enemies (Jos 10:24).

Therefore assuredly ( $\operatorname{A\sigma } \varphi \alpha \lambda \omega \varsigma o v v$ ). Assuredly therefore, without any slip or trip ( $\alpha \sigma \varphi \alpha \lambda \eta \zeta$ from $\alpha$ privative and $\sigma \varphi \alpha \lambda \lambda \omega$, to trip, to slip. Peter draws a powerfully pungent conclusion by the use of the adverb $\alpha \sigma \varphi \alpha \lambda \omega \varsigma$ and the inferential conjunction ouv. Peter's closing sentence drives home the point of his sermon: "This very Jesus whom ye crucified (note $\nu \mu \varepsilon \iota$, strongly emphatic
ye ), him God made both Lord and Messiah" (ка кирьоv ка Xрıбтоv), as David foretold in Ps 110 and as the events of this day have confirmed. The critics are disturbed over how Luke could have gotten the substance of this masterful address spoken on the spur of the moment with passion and power. They even say that Luke composed it for Peter and put the words in his mouth. If so, he made a good job of it. But Peter could have written out the notes of the address afterwards. Luke had plenty of chances to get hold of it from Peter or from others.

Acts 2:37
They were pricked in their heart ( $\kappa \alpha \tau \varepsilon v v \gamma \eta \sigma \alpha v \tau \eta v \kappa \alpha \rho \delta \iota \alpha v)$. Second aorist indicative of $\kappa \alpha \tau \alpha v v \sigma \sigma \omega$, a rare verb (LXX) to pierce, to sting sharply, to stun, to smite. Homer used it of horses dinting the earth with their hoofs. The substantive катаvv乡ıs occurs in Ro 11:8 . Here only in the N.T. It is followed here by the accusative of the part affected, the heart.

What shall we do? ( $\mathrm{T} \pi о \square \eta \sigma \omega \mu \varepsilon v)$. Deliberative subjunctive first aorist active. The sermon went home, they felt the sting of Peter's words, compunction ( $\chi о \mu \pi \nu v \gamma 0$ ). Codex Bezae adds: "Show us."

Acts 2:38
Repent ye ( $\mu \varepsilon \tau \alpha v o \eta \sigma \alpha \tau \varepsilon)$. First aorist (ingressive) active imperative. Change your mind and your life. Turn right about and do it now. You crucified this Jesus. Now crown him in your hearts as Lord and Christ. This first.

And be baptized every one of you ( $\kappa \alpha \beta \alpha \pi \tau \iota \sigma \theta \eta \tau \omega$ єкабтоц $v \mu \omega v$ ). Rather, "And let each one of you be baptized." Change of number from plural to singular and of person from second to third. This change marks a break in the thought here that the English translation does not preserve. The first thing to do is make a radical and complete change of heart and life. Then let each one be baptized after this change has taken place, and the act of baptism be performed "in the name of Jesus Christ" ( $\varepsilon v \tau \omega$ ovoua $\tau \eta \sigma o v$ X $\rho ı \sigma \tau o v$ ). In accordance
 between $\varepsilon \iota \varsigma$ тo ovoua and $\varepsilon v \tau \omega$ ovo $\mu \alpha \tau$ with $\beta a \pi \tau \iota \zeta \omega$ since $\varepsilon \iota \zeta$ and $\varepsilon v$ are really the same word in origin. In Ac 10:48 $\varepsilon \nu \tau \omega$ ovo $\mu \alpha \tau$ I $\eta \sigma o v$ Xpıбтov occurs, but $\varepsilon \iota \varsigma$ to ovo $\mu$ in 8:16;
 (Mt 10:41) as a prophet, in the name of a prophet. In the Acts the full name of the Trinity does not occur in baptism as in Mt 28:19, but this does not show that it was not used. The
name of Jesus Christ is the distinctive one in Christian baptism and really involves the Father and the Spirit. See on Mt 28:19 for discussion of this point. "Luke does not give the form of words used in baptism by the Apostles, but merely states the fact that they baptized those who acknowledged Jesus as Messiah or as Lord" (Page).

Unto the remission of your sins ( $\varepsilon \iota \varsigma \alpha \varphi \varepsilon \sigma \iota \nu \tau \omega \nu \alpha \mu \alpha \rho \tau \iota \omega \nu \nu \mu \omega \nu$ ). This phrase is the subject of endless controversy as men look at it from the standpoint of sacramental or of evangelical theology. In themselves the words can express aim or purpose for that use of $\varepsilon$, does exist as in 1Co 2:7 عıऽ $\delta o \xi \alpha \nu \eta \mu \omega \nu$ (for our glory). But then another usage exists which is just as good Greek as the use of eıc for aim or purpose. It is seen in Mt 10:41 in three examples $\varepsilon ı \varsigma ~ о \nu о \mu \alpha \pi \rho о \varphi \eta \tau о v, \delta ı \kappa \alpha \iota о v, \mu \alpha \forall \eta \tau о v$ where it cannot be purpose or aim, but rather the basis or ground, on the basis of the name of prophet, righteous man, disciple, because one is, etc. It is seen again in Mt 12:41 about the preaching of Jonah ( $\varepsilon \iota \varsigma ~ \tau о ~ к \eta \rho v \gamma \mu \alpha \mathrm{I} \omega v \alpha$ ). They repented because of (or at) the preaching of Jonah. The illustrations of both usages are numerous in the N.T. and the Koine generally (Robertson, Grammar, p. 592). One will decide the use here according as he believes that baptism is essential to the remission of sins or not. My view is decidedly against the idea that Peter, Paul, or any one in the New Testament taught baptism as essential to the remission of sins or the means of securing such remission. So I understand Peter to be urging baptism on each of them who had already turned (repented) and for it to be done in the name of Jesus Christ on the basis of the forgiveness of sins which they had already received.

The gift of the Holy Ghost ( $\tau \eta \nu \delta \omega \rho \varepsilon \alpha \nu \tau o v a \gamma \iota o \tau \pi \varepsilon v \mu \alpha \tau \sigma \varsigma)$. The gift consists (Ac 8:17) in the Holy Spirit (genitive of identification).

Acts 2:39
The promise ( $\eta \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda ı \alpha$ ). The promise made by Jesus ( $1: 4$ ) and foretold by Joel (verse 18).

To you ( $\nu \mu \tau \nu$ ). You Jews. To your descendants, sons and daughters of verse 17.
To all that are afar off ( $\pi \alpha \sigma \iota \nu ~ \tau о \iota \varsigma ~ \varepsilon ı \varsigma ~ \mu \alpha к \rho \alpha \nu$. The horizon widens and includes the Gentiles. Those "afar off" from the Jews were the heathen (Isa 49:1; 57:19; Eph 2:13,17 ). The rabbis so used it.

Shall call ( $\alpha v \pi \rho o \sigma \kappa \alpha \lambda \varepsilon \sigma \eta \tau \alpha$ ). First aorist middle subjunctive with $\alpha v$ in an indefinite relative clause, a perfectly regular construction. The Lord God calls men of every nation anywhere whether Jews or Gentiles. It may be doubted how clearly Peter grasped the significance of these words for he will have trouble over this very matter on the housetop in Joppa and in Caesarea, but he will see before long the full sweep of the great truth that he here proclaims under the impulse of the Holy Spirit. It was a great moment that Peter here reaches.

Acts 2:40
With many other words ( $\left.\varepsilon \tau \varepsilon \rho \circ \iota \_\lambda о \gamma o \iota \varsigma \pi \lambda \varepsilon \iota \sigma \sigma \iota\right)$. Instrumental case. Not necessarily "different" (عтعроぃ), but "further," showing that Luke does not pretend to give all that Peter
said. This idea is also brought out clearly by $\pi \lambda \varepsilon \iota \sigma \sigma \iota($ ("more," not "many"), more than these given by Luke.

He testified ( $\delta \varepsilon \varepsilon \mu \alpha \rho \tau \cup \rho a \tau о$ ). First aorist middle of $\delta ı \alpha \mu \alpha \rho \tau \nu \rho о \mu \alpha$, old verb, to make solemn attestation or call to witness (perfective use of $\delta(\alpha)$ ), while $\mu \alpha \rho \tau v \rho \varepsilon \omega$ is to bear witness. Page insists that here it should be translated "protested solemnly" to the Jews as it seems to mean in Lu 16:28; Ac 20:23; 1Ti 5:21; 2Ti 2:14; 4:1 .

And exhorted ( $\kappa \alpha \pi \alpha \rho \varepsilon \kappa \alpha \lambda \varepsilon$ ). Imperfect active, kept on exhorting.
Save yourselves ( $\sigma \omega \theta \eta \tau \varepsilon$ ). First aorist passive of $\sigma \omega \zeta \omega$. Literally, Be ye saved.
Crooked ( $\sigma \kappa о \lambda ı \alpha \varsigma)$. Old word, opposite of o $\rho \theta$ o $\varsigma$, straight. Pravus the opposite of rectus, a perversity for turning off from the truth. Cf. Lu 9:41; Php 2:15.

Acts 2:41
They then (Ho $\mu \varepsilon v \mathrm{ovv}$ ). A common phrase in Acts either without antithesis as in 1:6; 5:41; 8:4,25; 9:31; 11:19; 16:5; or with it as here, $8: 25 ; 13: 4 ; 14: 3 ; 17: 17 ; 23: 31 ; 25: 4$. Ouv connects with what precedes as the result of Peter's sermon while $\mu \varepsilon v$ points forward to what is to follow.

Were baptized ( $\varepsilon \beta \alpha \pi \tau \iota \sigma \theta \eta \sigma \alpha v)$. First aorist passive indicative, constative aorist. Note that only those who had already received the word and were converted were baptized.

There were added ( $\pi \rho \circ \sigma \varepsilon \tau \varepsilon \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\pi \rho \circ \sigma \tau \iota \theta \eta \mu$, old verb to add, to join to. Luke means that the 3,000 were added to the 120 already enlisted. It is not stated they were all baptized by Peter or the twelve or all on the same day, though that is the natural implication of the language. The numerous pools in Jerusalem afforded ample opportunity for such wholesale baptizing and Hackett notes that the habit of orientals would place no obstacle in the way of the use of the public reservoirs. Furneaux warns us that all the 3,000 may not have been genuine converts and that many of them were pilgrims at the passover who returned home.

Souls ( $\psi \cup \chi \alpha$ ). Persons as in verse 43.
Acts 2:42
They continued steadfastly ( $\eta \sigma \alpha v \pi \rho \circ \sigma \kappa \alpha \rho \tau \cup \rho o u v \tau \varepsilon \varsigma$ ). Periphrastic active imperfect of $\pi \rho \circ \sigma \kappa \alpha \rho \tau \cup \rho \varepsilon \omega$ as in Ac 1:14 (same participle in verse 46).

Fellowship ( $\kappa o \iota v \omega v i \alpha)$. Old word from koıv $\omega v$ оৎ (partner, sharer in common interest) and this from kotvos what is common to all. This partnership involves participation in, as the blood of Christ (Php 2:1) or co-operation in the work of the gospel (Php 1:5) or contribution for those in need (2Co $8: 4 ; 9: 13$ ). Hence there is wide diversity of opinion concerning the precise meaning of kotv $\omega v$ va in this verse. It may refer to the distribution of funds in verse 44 or to the oneness of spirit in the community of believers or to the Lord's Supper (as in 1Co 10:16) in the sense of communion or to the fellowship in the common meals or $\alpha \gamma \alpha \pi \alpha \varepsilon$ (love-feasts).

The breaking of bread ( $\tau \eta \kappa \lambda \alpha \sigma \varepsilon$ $\tau 0 v \alpha \rho \tau o v$ ). The word $\kappa \lambda \alpha \sigma \iota \varsigma$ is an old word, but used only by Luke in the N.T. (Lu 24:35; Ac 2:42), though the verb $\kappa \lambda \alpha \omega$ occurs in other parts of the N.T. as in verse 46. The problem here is whether Luke refers to the ordinary meal as in Lu 24:35 or to the Lord's Supper. The same verb $\kappa \lambda \alpha \omega$ is used of breaking bread at the ordinary meal ( $\mathrm{Lu} 24: 30$ ) or the Lord's Supper ( $\mathrm{Lu} 22: 19$ ). It is generally supposed that the early disciples attached so much significance to the breaking of bread at the ordinary meals, more than our saying grace, that they followed the meal with the Lord's Supper at first, a combination called $\alpha \gamma \alpha \pi \alpha$ or love-feasts. "There can be no doubt that the Eucharist at this period was preceded uniformly by a common repast, as was the case when the ordinance was instituted" (Hackett). This led to some abuses as in 1Co 11:20. Hence it is possible that what is referred to here is the Lord's Supper following the ordinary meal. "To simply explain $\tau \eta \kappa \lambda \alpha \sigma \varepsilon \tau o v a \rho \tau o v$ as='The Holy Communion' is to pervert the plain meaning of words, and to mar the picture of family life, which the text places before us as the ideal of the early believers" (Page). But in Ac 20:7 they seem to have come together especially for the observance of the Lord's Supper. Perhaps there is no way to settle the point conclusively here.

The prayers ( $\tau \alpha ı \varsigma \pi \rho о \sigma \varepsilon v \chi \alpha \iota)$. Services where they prayed as in $1: 14$, in the temple (Ac 3:1), in their homes (4:23).

Acts 2:43
Came ( $\varepsilon \nmid \boldsymbol{\nu} \varepsilon \tau \circ$ ). Imperfect middle, kept on coming.
Were done ( $\varepsilon \gamma \downarrow \boldsymbol{\varepsilon} \tau \tau)$. Same tense. Awe kept on coming on all and signs and wonders kept on coming through the apostles. The two things went on $\pi \alpha \rho \pi \alpha \sigma \sigma v$, the more wonders the more fear.

Acts 2:44
Were together ( $\eta \sigma \alpha v \varepsilon \pi \tau о \alpha v \tau 0$ ). Some MSS. $\eta \sigma \alpha v \kappa \alpha$ (were and). But they were together in the same place as in 2:1.

And had ( $\kappa \alpha \varepsilon \downarrow \chi \circ v$ ). Imperfect active, kept on having, a habit in the present emergency.
Common ( $\kappa \circ \imath \nu \alpha$ ). It was not actual communism, but they held all their property ready for use for the common good as it was needed (4:32). This situation appears nowhere else except in Jerusalem and was evidently due to special conditions there which did not survive permanently. Later Paul will take a special collection for the poor saints in Jerusalem.

Acts 2:45
Sold ( $\varepsilon \pi \iota \pi \rho a \sigma \kappa \sigma v)$. Imperfect active, a habit or custom from time to time. Old and common verb, $\pi ı \pi \rho a \sigma \kappa \omega$.

Parted ( $\delta \varepsilon \varepsilon \mu \varepsilon \rho \zeta \zeta \nu)$. Imperfect again of $\delta ı \alpha \mu \varepsilon \rho \iota \zeta \omega$, old verb for dividing or distributing between ( $\delta \iota \alpha$ ) people.

According as any man had need ( $\kappa \alpha \theta$ о $\tau \alpha \nu \tau \iota \varsigma ~ \chi \rho \varepsilon ı \alpha \nu \varepsilon ı \chi \varepsilon \nu)$. Regular Greek idiom for comparative clause with $\alpha \nu$ and imperfect indicative corresponding precisely with the three preceding imperfects (Robertson, Grammar, p. 967).

Acts 2:46
With one accord in the temple ( $\circ \mu \circ \theta v \mu \alpha \delta o v \varepsilon v \tau \omega \tau \rho \rho \omega$ ). See on $1: 14$ for $o \mu o \theta v \mu \alpha \delta o v$. They were still worshipping in the temple for no breach had yet come between Christians and Jews. Daily they were here and daily breaking bread at home ( $\kappa \alpha \tau^{\prime}$ oıкоv) which looks like the regular meal.

They did take their food ( $\mu \varepsilon \tau \varepsilon \lambda \alpha \mu \beta \alpha v o v \tau \rho \circ \varphi \eta \zeta$ ). Imperfect tense again and clearly referring to the regular meals at home. Does it refer also to the possible $\alpha \gamma \alpha \pi \alpha$ or to the Lord's Supper afterwards as they had common meals "from house to house" (кат' o七коv)? We know there were local churches in the homes where they had "worship rooms," the church in the house. At any rate it was "with singleness" ( $\alpha \varphi \varepsilon \lambda 0 \tau \eta \tau$ ) of heart. The word occurs only here in the N.T., though a late Koine word (papyri). It comes from $\alpha \varphi \varepsilon \lambda \eta \varsigma$, free from rock ( $\varphi \varepsilon \lambda \lambda \varepsilon \cup \varsigma$ is stony ground), smooth. The old form was $\alpha \varphi \varepsilon \lambda \varepsilon \iota \alpha$.

Acts 2:47
Having favor $(\varepsilon \chi o v \tau \varepsilon \varsigma ~ \chi \alpha \rho ı v)$. Cf. Lu 2:52 of the Boy Jesus.
Added ( $\pi \rho 0 \sigma \varepsilon \tau \iota \theta \varepsilon$ ). Imperfect active, kept on adding. If the Lord only always "added" those who join our churches. Note verse 41 where same verb is used of the 3,000.

To them ( $\varepsilon \pi \tau 0 \alpha v \tau 0$ ). Literally, "together." Why not leave it so? "To the church" ( $\tau \eta$ $\varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha)$ is not genuine. Codex Bezae has "in the church."

Those that were being saved ( $\tau 0 v \varsigma \sigma \omega \zeta$ о $\sigma \varepsilon v o v \varsigma$ ). Present passive participle. Probably for repetition like the imperfect $\pi \rho \circ \sigma \varepsilon \tau \iota \theta \varepsilon$. Better translate it "those saved from time to time." It was a continuous revival, day by day. $\Sigma \omega \zeta \omega$ like $\sigma \omega \tau \eta \rho \iota \alpha$ is used for "save" in three senses (beginning, process, conclusion), but here repetition is clearly the point of the present tense.

## Acts 3

Acts 3:1
Were going up ( $\alpha v \varepsilon \beta a \iota v o v$ ). Descriptive imperfect active. They were ascending the terraces to the temple courts.

The ninth ( $\tau \eta v \varepsilon v a \tau \eta v$ ). Our three o'clock in the afternoon, the time of the evening sacrifice. Peter and John like Paul later kept up the Jewish worship, but not as a means of sacramental redemption. There were three hours of prayer (third, sixth, ninth).

Acts 3:2
Was carried ( $\varepsilon \beta \alpha \sigma \tau \alpha \zeta \varepsilon \tau 0)$. Imperfect passive, picturing the process as in verse 1.
Laid daily ( $\varepsilon \tau \iota$ (1ovv $\kappa \alpha \theta^{\prime} \eta \mu \varepsilon \rho \alpha v$ ). Imperfect again describing their custom with this man.

Beautiful (H $\omega \rho \alpha \iota \alpha v$ ). This gate is not so called elsewhere. It may have been the Gate of Nicanor on the east side looking towards Kidron described by Josephus (Ant. XV. 11, 3; War V. 5, 3) as composed chiefly of Corinthian brass and very magnificent.

Acts 3:3
Asked ( $\eta \rho \omega \tau \alpha$ ). Began to ask, inchoative imperfect. It was his chance.
Acts 3:4
Fastening his eyes ( $\alpha \tau \varepsilon v ı \sigma \alpha \varsigma)$. First aorist (ingressive) active participle of $\alpha \tau \varepsilon v ı \zeta \omega$. For this verb see on $\operatorname{Lu} 4: 20$; Ac 1:10. Peter fixed his eyes on the beggar and invited him to look ( $\beta \lambda \varepsilon \psi o v$ ) on them.

Acts 3:5
Gave heed unto them ( $\varepsilon \pi \varepsilon \not \chi \varepsilon v \alpha v \tau o \iota \varsigma)$. Imperfect active of $\varepsilon \pi \varepsilon \chi \omega$, to hold to. For the idiom with tov vouv understood see $7: 14 ; 1 \mathrm{Ti} 4: 16$. He held his eyes right on Peter and John with great eagerness "expecting to receive something" ( $\pi \rho o \sigma \delta o \kappa \omega \nu \tau \lambda \alpha \beta \varepsilon \iota v$ ). He took Peter's invitation as a promise of a large gift.

## Acts 3:6

In the name ( $\varepsilon v \tau \omega$ ovo $\mu \alpha \tau$ ). The healing power is in that name (Page) and Peter says so. Cf. Lu 9:49; 10:17; Ac 4:7,10; 19:27; 16:18 .

Walk ( $\pi \varepsilon \rho \iota \pi \alpha \tau \varepsilon)$. Present imperative, inchoative idea, begin to walk and then go on walking. But the beggar does not budge. He knows that he cannot walk.

Acts 3:7
Took him by the right hand ( $\pi \iota \alpha \sigma \alpha \varsigma \alpha \nu \tau 0 \nu \tau \eta \varsigma \delta \varepsilon \xi \iota \alpha \varsigma \chi \varepsilon \rho \circ \varsigma)$. Doric form $\pi \iota \alpha \zeta \omega$ for $\pi \iota \zeta \zeta \omega$. Genitive of the part affected. Peter had to pull him up on his feet before he would try to walk.

Acts 3:8
Leaping up ( $\varepsilon \xi \alpha \lambda \lambda o \mu \varepsilon v o \varsigma)$. Present middle participle, leaping out repeatedly after Peter pulled him up. Only here in the N.T.

He stood ( $\varepsilon \sigma \tau \eta)$. Second aorist active.
Walked ( $\pi \varepsilon \rho \iota \varepsilon \pi \alpha \tau \varepsilon$ ). Went on walking, imperfect active. He came into the temple repeating these new exercises (walking, leaping, praising God).

Acts 3:10
They took knowledge of him ( $\varepsilon \pi \varepsilon \gamma \iota \nu \omega \sigma \kappa o v)$. Imperfect active, inchoative, began to perceive.

Were filled $(\varepsilon \pi \lambda \eta \sigma \theta \eta \sigma \alpha v)$. Effective first aorist passive.
At that which had happened $(\tau \omega \sigma v \mu \beta \varepsilon \beta \eta \kappa \sigma \tau)$. Perfect active participle of $\sigma v \mu \beta \alpha I v \omega$. Acts 3:11
The Codex Bezae adds "as Peter and John went out."
As he held (кратоиvтоऽ av $\frac{1}{}$ ). Genitive absolute of $\kappa \rho \alpha \tau \varepsilon \omega$, to hold fast, with accusative rather than genitive to get hold of (Ac 27:13). Old and common verb from кратоя (strength, force). Perhaps out of gratitude and partly from fear (Lu 8:38).

In the porch that is called Solomon's ( $\left.\varepsilon \pi \tau \eta \sigma \tau o \alpha \tau \eta \kappa \alpha \lambda o v \mu \varepsilon v \eta \Sigma_{0} \delta \lambda \mu \omega v \tau o \varsigma\right)$. The adjective Stoic ( $\sigma \tau$ о七коя) is from this word $\sigma \tau 0 \alpha$ (porch). It was on the east side of the court of the Gentiles (Josephus, Ant. XX. 9, 7) and was so called because it was built on a remnant of the foundations of the ancient temple. Jesus had once taught here (Joh 10:23).

Greatly wondering $(\varepsilon \kappa \theta \alpha \mu \beta$ o). Wondering out of $(\varepsilon \kappa)$ measure, already filled with wonder ( $\theta a \mu \beta$ ovৎ, verse 10). Late adjective. Construction according to sense (plural, though入aos singular) as in 5:16; 6:7; 11:1, etc.

Acts 3:12
Answered ( $\alpha \pi \varepsilon \kappa \rho \iota v a \tau o)$. First aorist middle indicative. The people looked their amazement and Peter answered that.

Ye men of Israel (Av $\mathcal{\rho} \rho \varepsilon \varsigma \operatorname{I\sigma } \rho \alpha \eta \lambda \varepsilon \iota \tau \alpha)$. Covenant name and so conciliatory, the stock of Israel (Php 3:5).

At this man $(\varepsilon \pi \tau o v \tau \omega)$. Probably so, though it could be "at this thing."
Fasten you your eyes ( $\alpha \tau \varepsilon v \iota \zeta \varepsilon \tau \varepsilon)$. The very verb used about Peter in verse 4.
On us $(\eta \mu \nu \nu)$. Dative case, emphatic proleptical position before $\tau \alpha \tau \varepsilon v \iota \zeta \varepsilon \tau \varepsilon$.
On us why do ye fasten your eyes? As though ( $\omega \varsigma$ ). H $\omega \varsigma$ with the participle gives the alleged reason, not always the true one.

Power ( $\delta v v a \mu \varepsilon$ ). Instrumental case, causa effectiva.
Godliness ( $\varepsilon v \sigma \varepsilon \beta \varepsilon \iota \alpha)$. Causa meritoria.
Had made ( $\pi \varepsilon \pi о \iota \kappa \kappa \sigma \iota v)$. Perfect active participle of $\pi \circ \iota \varepsilon \omega$.
To walk ( $\tau 0 v \pi \varepsilon \rho \iota \pi \alpha \tau \varepsilon \iota v$ ). Articular infinitive in the genitive case of result, purpose easily shading off into result (ecbatic infinitive) as here as is true also of $t v a$.

Acts 3:13
His servant Jesus ( $\tau 0 v \pi \alpha ı \delta \alpha$ I $\eta \sigma o v v$ ). This phrase occurs in Isa 42:1; 52:13 about the Messiah except the name "Jesus" which Peter adds, the first part of the quotation is from Ex

3:6; 5:30. The LXX translated the Hebrew ebhedh by $\pi \alpha \iota \varsigma$, the servant of Jehovah being a Messianic designation. But the phrase "servant of God" ( $\pi \alpha \iota \varsigma \varepsilon \varepsilon \sigma v$ ) is applied also to Israel
 is just child (boy or girl), and it was also used of a slave (Mt 8:6,8,13 ). But it is not here vios (son) that Peter uses, but $\pi \alpha \iota \varsigma$. Luke quotes Peter as using it again in this Messianic sense in Ac 3:26; 4:27,30.

Whom ye delivered up (ov $v \mu \varepsilon ı \varsigma \mu \varepsilon \nu \pi \alpha \rho \varepsilon \delta \omega \kappa \alpha \tau \varepsilon$ ). Note emphatic use of $v \mu \varepsilon ı \varsigma$ (ye). No $\delta \varepsilon$ to correspond to $\mu \varepsilon v$. First aorist active ( $\kappa$ aorist) plural indicative of $\pi \alpha \rho \alpha \delta t \delta \omega \mu$ (usual form $\pi \alpha \rho \varepsilon \delta o \tau \varepsilon$, second aorist).

When he ( $\varepsilon \kappa \varepsilon เ v o v)$. Emphatic pronoun, that one, in contrast with "ye" (v $\mu \varepsilon ı \varsigma)$, genitive absolute with крıvavtoc, here the nearest word (Pilate), the latter.

Acts 3:14
But ye (v $\mu \varepsilon ı \varsigma \delta \varepsilon)$. In contrast with Pilate ( $\varepsilon \kappa \varepsilon \iota v o v)$.
Murderer ( $\alpha v \delta \rho \alpha$ 甲ove $)$. A man a murderer. In contrast with "the Holy and Righteous One."

To be granted $(\chi \alpha \rho \iota \sigma \theta \eta \nu \alpha)$. As a favour ( $\chi \alpha \rho ı \varsigma)$. First aorist passive infinitive of $\chi \alpha \rho ı$ о $\alpha$; So also 25:11; 27:24 .

Acts 3:15
But the Prince of life ye killed ( $\tau 0 \nu \delta \varepsilon \alpha \rho \chi \eta \gamma \circ \nu \tau \eta \varsigma \zeta \omega \eta \zeta \alpha \pi \varepsilon \kappa \tau \varepsilon เ \nu \alpha \tau \varepsilon)$. "The magnificent antithesis" (Bengel) Peter here draws between their asking for a murderer and killing the Prince (or Author) of life. Peter pictures Jesus as the source of all life as is done in Joh 1:1-18; Col 1:14-20; Heb 1:2f. A $\rho \chi \eta \circ \varsigma$ ( $\alpha \rho \chi \eta$, beginning, $\alpha \gamma \omega$, to lead) is an adjective "furnishing the first cause or occasion" in Euripides, Plato. Thence substantive, the originator, the leader, the pioneer as of Jesus both Beginner and Finisher (Heb 12:2 ). See also Heb 2:10; Ac 5:31 where it is applied to Jesus as "Prince and Saviour." But God raised him from the dead in contrast to what they had done.

Whereof we are witnesses (ov $\eta \mu \varepsilon ı \varsigma \mu \alpha \rho \tau v \rho \varepsilon \varsigma \varepsilon \sigma \mu \varepsilon v$ ). Of which fact (the resurrection) or of whom as risen, ov having the same form in the genitive singular for masculine or neuter. Peter had boldly claimed that all the 120 have seen the Risen Christ. There is no denial of that claim.

Acts 3:16
By faith in his name ( $\tau \eta \pi \iota \sigma \tau \varepsilon \tau o v o v o \mu \alpha \tau o \varsigma \alpha v \tau o v$ ). Instrumental case of $\pi \iota \sigma \tau \varepsilon$ (Aleph and $B$ do not have $\varepsilon \pi$ ) and objective genitive of ovo $\mu \alpha \tau$.

His name ( $\tau 0$ ovo $\mu \alpha$ av $о v$ ). Repeats the word name to make the point clear. Cf. verse 6 where Peter uses "the name of Jesus Christ of Nazareth" when he healed the man.

Made strong ( $\varepsilon \sigma \tau \varepsilon \rho \varepsilon \omega \sigma \varepsilon v$ ). Same verb used in verse 7 (and 16:5). Nowhere else in the N.T. Old verb from $\sigma \tau \varepsilon \rho \varepsilon \circ$, , firm, solid.

Through him ( $\delta \iota^{\prime}$ avtov). Through Jesus, the object of faith and the source of it.

Perfect soundness (o $\boldsymbol{\lambda}_{\text {ок }} \lambda \eta \rho \iota \alpha v$ ). Perfect in all its parts, complete, whole (from o 0 oc, whole, $\kappa \lambda \eta \rho o \varsigma$, allotment). Late word (Plutarch) once in LXX (Isa 1:6) and here alone in the N.T., but adjective o o $о к \lambda \eta \rho o \varsigma$, old and common (Jas 1:4; 1Th 5:23 ).

Acts 3:17
And now ( $\kappa \alpha v v v$ ). Luke is fond of these particles of transition (7:34; 10:5; 20:25; 22:16 ) and also ка та vuv (4:29; 5:38; 22:32; 27:22), and even $\kappa \alpha$ vuv $\operatorname{\delta ov}$ (13:11; 20:22 ).

I wot (oi $\delta$ ). Old English for "I know."
In ignorance ( $\kappa \alpha \tau \alpha \alpha \gamma v o t \alpha v$ ). This use of $\kappa \alpha \tau \alpha$ occurs in the Koine. See also Phm 1:14 . One may see Lu 23:34 for the words of the Saviour on the Cross. "They had sinned, but their sin was not of so deep a dye that it could not have been still more heinous" (Hackett). If they had known what they were doing, they would not knowingly have crucified the Messiah (1Co 2:8).

Acts 3:18
Foreshewed ( $\pi \rho \circ \kappa \alpha \tau \eta \gamma \gamma \varepsilon \mid \lambda \varepsilon v$ ). First aorist active indicative of $\pi \rho \circ \kappa \alpha \tau \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$, late compound to announce fully beforehand. Only twice in the N.T. in the critical text (Ac 3:18; 7:52).

That his Christ should suffer ( $\pi \alpha \theta \varepsilon ı v$ tov X $\rho ı \sigma \tau o v \alpha v \tau o v$ ). Accusative of general reference with the aorist active infinitive ( $\pi \alpha \theta \varepsilon เ v$ of $\pi \alpha \sigma \chi \omega$ ) in indirect discourse (predictive purpose of God). Their crime, though real, was carrying out God's purpose (2:23; Joh 3:16 ). See the same idea in Ac 17:3; 26:23. This "immense paradox" (Page) was a stumbling block to these Jews as it is yet (1Co 1:23). Peter discusses the sufferings of Christ in 1Pe 4:13; 5:1

Acts 3:19
Repent therefore ( $\mu \varepsilon \tau \alpha v o \eta \sigma \alpha \tau \varepsilon \circ v v$ ). Peter repeats to this new crowd the command made in Ac 2:38 which see. God's purpose and patience call for instant change of attitude on their part. Their guilt does not shut them out if they will turn.

And turn again ( $\kappa \alpha \varepsilon \pi / \sigma \tau \rho \varepsilon \psi \alpha \tau \varepsilon$ ). Definitely turn to God in conduct as well as in mind.
That your sins may be blotted out ( $\pi \rho \circ \varsigma \tau$ то $\varepsilon \xi \alpha \lambda \iota \varphi \theta \eta \nu \alpha \nu \mu \omega \nu \tau \alpha \varsigma \alpha \mu \alpha \rho \tau \iota \alpha \varsigma$ ). Articular infinitive (first aorist passive of $\varepsilon \xi \alpha \lambda \varepsilon \iota \varphi \omega$, to wipe out, rub off, erase, smear out, old verb, but in the N.T. only here and Col 2:14) with the accusative of general reference and with $\pi \rho o \varsigma$ and the accusative to express purpose.

That so (o $\pi \omega \varsigma \alpha v$ ). Final particle with $\alpha v$ and the aorist active subjunctive $\varepsilon \lambda \theta \omega \sigma \sigma$ (come) and not "when" as the Authorized Version has it. Some editors put this clause in verse 20 (Westcott and Hort, for instance).

Seasons of refreshing (каı $\rho о \alpha v \alpha \psi \nu \xi \varepsilon \omega \varsigma)$. The word $\alpha v \alpha \psi v \xi ı \varsigma$ (from $\alpha v \alpha \psi \cup \chi \omega$, to cool again or refresh, $2 \mathrm{Ti} 1: 16$ ) is a late word (LXX) and occurs here alone in the N.T. Surely repentance will bring "seasons of refreshing from the presence of the Lord."

Acts 3:20

And that he may send the Christ who hath been appointed for you, even Jesus ( $\kappa \alpha$
 o $\pi \omega \varsigma \alpha \nu$ as in 15:17 and $\mathrm{Lu} 2: 35$. There is little real difference in idea between $o \pi \omega \varsigma \alpha \nu$ and $t v \alpha a v$. There is a conditional element in all purpose clauses. The reference is naturally to the second coming of Christ as verse 21 shows. Knowling admits "that there is a spiritual presence of the enthroned Jesus which believers enjoy as a foretaste of the visible and glorious Presence of the חapovoıa." Jesus did promise to be with the disciples all the days (Mt 28:20 ), and certainly repentance with accompanying seasons of refreshing help get the world ready for the coming of the King. The word $\pi \rho \circ \kappa \varepsilon \chi \varepsilon \iota \rho \iota \sigma \mu \varepsilon$ ov (perfect passive participle of $\pi \rho о \chi \varepsilon \iota \rho \iota \zeta \omega$, from $\pi \rho о \chi \varepsilon \iota \rho \circ \varsigma$, at hand, to take into one's hands, to choose) is the correct text here, not $\pi \rho о к \varepsilon \kappa \eta \rho v \gamma \mu \varepsilon v o v$. In the N.T. only here and Ac 22:14; 26:16 . It is not "Jesus Christ" here nor "Christ Jesus," but "the Messiah, Jesus," identifying Jesus with the Messiah. See the Second Epiphany of Jesus foretold also in 1Ti 6:15 and the First Epiphany described in 1 Pe 1:20.

Acts 3:21
Restoration ( $\alpha \pi \sigma \kappa \alpha \tau \alpha \sigma \tau \alpha \sigma \varepsilon \omega \varsigma$ ). Double compound ( $\alpha \pi \sigma, \kappa \alpha \tau \alpha$, $\sigma \tau \eta \mu$ ), here only in the N.T., though common in late writers. In papyri and inscriptions for repairs to temples and this phrase occurs in Jewish apocalyptic writings, something like the new heaven and the new earth of Re 21:1. Paul has a mystical allusion also to the agony of nature in Ro 8:20-22. The verb aлок $\alpha \operatorname{\iota } \sigma \tau \eta \mu$ is used by Jesus of the spiritual and moral restoration wrought by the Baptist as Elijah (Mt 17:11; Mr 9:12) and by the disciples to Jesus in Ac 1:6 . Josephus uses the word of the return from captivity and Philo of the restitution of inheritances in the year of jubilee. As a technical medical term it means complete restoration to health. See a like idea in $\pi \alpha \lambda \iota v \gamma \varepsilon v \varepsilon \sigma \iota \alpha$ (renewal, new birth) in Mt 19:28; Tit 3:5. This universalism of Peter will be clearer to him after Joppa and Caesarea.

Acts 3:22
Like unto me ( $\omega \varsigma \varepsilon \mu \varepsilon$ ). As me, literally; Moses (De 18:14-18) claims that God raised him up as a prophet and that another and greater one will come, the Messiah. The Jews understood Moses to be a type of Christ (Joh 1:21). God spoke to Moses face to face (Ex 33:11) and he was the greatest of the prophets (De 34:10).

Acts 3:23
That prophet ( $\tau 0 v \pi \rho о \varphi \eta \tau 0 v \varepsilon \kappa \varepsilon เ v o v$ ). Emphasizes the future prophet as on "him" (avtov) before "hearken." They had refused to "hearken" to Moses and now, alas, many had refused to "hearken" to Christ.

Shall be utterly destroyed ( $\varepsilon \xi_{0} \lambda \varepsilon \theta \rho \varepsilon v \theta \eta \sigma \varepsilon \tau \alpha$ ). First future passive of $\varepsilon \xi_{0} \lambda \varepsilon-(0) \theta \rho \varepsilon v \omega$, a late verb, to destroy utterly $(\varepsilon \xi)$, only here in the N.T., common in the LXX.

Acts 3:24

From Samuel ( $\alpha \pi \sigma \Sigma \alpha \mu о v \eta \lambda$ ). Schools of prophets arose in his time, few before him (1Sa 3:1).

Acts 3:25
Ye (Ницєє). Emphatic position.
The covenant which God made ( $\tau \eta \varsigma \delta ı \alpha \theta \eta \kappa \eta \varsigma \eta \varsigma$ o $\theta \cos \delta ı \varepsilon \theta \varepsilon \tau o)$. Literally, "the covenant which God covenanted." $\Delta \iota \alpha \theta \eta \kappa \eta$ and $\delta \iota \varepsilon \theta \varepsilon \tau o$ (second aorist middle indicative of $\delta \iota \alpha \theta \eta \mu$ ) are the same root. See on Mt 26:28. The covenant (agreement between two, $\delta \iota \alpha, \tau \iota \theta \eta \mu$ ) was with Abraham (Ge 12:1-3) and repeated at various times (Ge 18:18; 22:18; 26:4, etc.). In Heb 9:15-18 the word is used both for covenant and will. The genitive relative $\eta \varsigma$ attracted to case of the antecedent.

Acts 3:26
Unto you first (Hט川ı $\pi \rho \omega \tau \sigma \nu$ ). The Jews were first in privilege and it was through the Jews that the Messiah was to come for "all the families of the earth."

His servant ( $\tau 0 v \pi \alpha \iota \alpha \alpha \cup \tau 0 v$ ). As in verse 13, the Messiah as God's Servant.
To bless you ( $\varepsilon v \lambda o \gamma o v v \tau \alpha v \mu \alpha \varsigma)$. Present active participle to express purpose, blessing you (Robertson, Grammar, p. 991). In turning away ( $\varepsilon v \tau \omega \alpha \pi \sigma \sigma \tau \rho \varphi \varepsilon \varepsilon v$ ). Articular infinitive in the locative case, almost preserved in the English.

## Acts 4

Acts 4:1
The captain of the temple (о $\sigma \tau \rho \alpha \tau \eta \circ \varsigma \tau о v \iota \rho \circ v$ ). Twenty-four bands of Levites guarded the temple, one guard at a time. They watched the gates. The commander of each band was called captain ( $\sigma \tau \rho \alpha \tau \eta \gamma \circ \varsigma)$. Josephus names this captain of the temple police next to the high priest (War. VI. 5, 3).

The Sadducees (o $\Sigma a \delta \delta o v \kappa \alpha \circ$ ). Most of the priests were Sadducees now and all the chief priests since John Hyrcanus I deserted the Pharisees (Josephus, Ant. XVII. 10, 6; XVIII. 1,$4 ; \mathrm{XX} .9,1$. The Sadducees were slow to line up with the Pharisees against Jesus, but they now take the lead against Peter and John.

Came upon them ( $\varepsilon \pi \varepsilon \sigma \tau \eta \sigma \alpha \nu \alpha v \tau o \iota \varsigma)$. Second aorist active indicative (intransitive). Burst upon them suddenly or stood by them in a hostile attitude here (Lu 20:1; 24:4; Ac 6:12; 17:5; 22:20; 23:11 ).

Acts 4:2
Being sore troubled ( $\delta \iota a \pi o v o v \mu \varepsilon v o$ ). Present passive participle of old verb $\delta \iota a \pi o v \varepsilon \omega$ (perfective use of $\delta \iota \alpha$ ) to be worked up, indignant. In the N.T. only here and 16:8.

Because ( $\delta_{1 \alpha} \tau 0$ ). The articular infinitive with two accusatives, one the object (the people), the other ("they") of general reference.

In Jesus ( $\varepsilon v$ In $\sigma o v$ ). In the case of Jesus, an actual instance of resurrection which the Sadducees denied (Mt 22:23 ). This same use of $\varepsilon v$ appears in 1Co 4:6 (in us). The Sadducees were also aristocrats and political ecclesiastics who disliked popular disturbances. In particular, they resented the claim about Jesus whom they had helped crucify.

Acts 4:3
In ward ( $\varepsilon \iota \varsigma \tau \eta \rho \eta \sigma \iota)$. Probably in one of the chambers of the temple. In safe keeping (from $\tau \eta \rho \varepsilon \omega$, to guard). Old word, in the N.T. only here and Ac 5:18; 1Co 7:19. So in papyri.

Now eventide ( $\varepsilon \sigma \pi \varepsilon \rho \alpha \eta \delta \eta$ ). Hence no trial could take place before the next day, a regulation violated in the case of Jesus.

Acts 4:4
Men ( $\alpha v \delta \rho \omega v$ ). Strictly, men and not women, for $\alpha v \theta \rho \omega \pi$, and women. But in $\operatorname{Lu}$ 11:31 $\alpha v \delta \rho \varepsilon \varsigma$ seems to include both men and women and that is possible here, though by no means certain, for see Mt 14:21 where the women and children are expressly excepted.

Acts 4:5
Rulers and elders and scribes ( $\tau о \cup \varsigma ~ а \rho \chi о \nu \tau \alpha \varsigma ~ к \alpha ~ \tau о ט \varsigma ~ \pi \rho \varepsilon \sigma \beta v \tau \varepsilon \rho о и \varsigma ~ к \alpha ~ \tau о и \varsigma ~$ $\gamma \rho \alpha \mu \mu \alpha \tau \varepsilon ı)$ ). The three classes composing the Sanhedrin (rulers=chief priests who were Sadducees, the scribes usually Pharisees, the elders not in either class: 24 priests, 24 elders, 22 scribes).

Were gathered together ( $\sigma v v \alpha \chi \theta \eta v \alpha$ ). First aorist passive infinitive of $\sigma v v a \gamma \omega$ with accusative of general reference and the subject of $\varepsilon \gamma \varepsilon v \varepsilon \tau 0$.

Acts 4:6
Annas (Havvac). One of the rulers or chief priests, ex-high priest (A.D. 7-14) and father-in-law of

Caiaphas (Kaıцра¢) who was actual high priest at that time, though the title clung to Annas as here (both so called in Lu 3:2 ), Caiaphas so by Roman law, Annas so in the opinion of the Jews. They with John and Alexander are the leaders among the Sadducees in pressing the case against Peter and John.

Acts 4:7
In the midst $(\varepsilon \nu \tau \omega \mu \varepsilon \sigma \omega)$. The Sanhedrin sat in a semicircle.
They inquired ( $\varepsilon \pi v v \theta a v o v \tau o$ ). Imperfect middle, began to inquire.
Or in what name ( $\eta \varepsilon \vee \pi о \omega \omega$ ovo $\mu \alpha \tau$ ). As if by some magical formula such as exorcists practised (Ac 19:13) as if to catch them by (De 13:1).

Have ye done this ( $\varepsilon \pi о \iota \eta \sigma \alpha \tau \varepsilon$ tovto $\nu \mu \varepsilon \iota \varsigma)$. Note emphatic use of $v \mu \varepsilon \varsigma \varsigma(y e)$.
Acts $4: 8$
Filled with the Holy Spirit ( $\pi \lambda \eta \sigma \theta \varepsilon ı \varsigma \pi \nu \varepsilon \cup \mu \alpha \tau о \varsigma \alpha \gamma ı v)$. For this occasion and so above all fear as in verse 31 and as in 2:4.

Acts 4:9
Concerning a good deed done to an impotent man ( $\varepsilon \pi \varepsilon \cup \varepsilon \rho \gamma \varepsilon \sigma \iota \alpha \alpha v \theta \rho \omega \pi \sigma v \alpha \sigma \theta \varepsilon v o u \varsigma)$. Objective genitive. Note eveppecia (old word, in the N.T. only here and 1Ti 6:2), as a benefactor, not a malefactor. Skilful turn made by Peter.

Is made whole ( $\sigma \varepsilon \sigma \omega \sigma \tau \alpha$ ). Perfect passive indicative of $\sigma \omega \zeta \omega$, stands whole.
Acts 4:10
Be it known ( $\gamma \nu \omega \sigma \tau o v \varepsilon \sigma \tau \omega)$. Imperative present active third singular of $\varepsilon \mu$, to be, and the verbal adjective $\gamma \nu \omega \sigma \tau o v$.

Whom ye crucified ( $\mathrm{o} v \mathrm{v} \mu \varepsilon \varsigma \varepsilon \sigma \tau \alpha v \rho \omega \sigma \alpha \tau \varepsilon$ ). Too good a chance to miss, and so Peter boldly charges the Sanhedrin with responsibility for the death of Jesus. Note $v \mu \varepsilon \iota \varsigma$ (ye) again.

Whom God raised from the dead (ov o $\theta \varepsilon \circ \varsigma \eta \gamma \varepsilon \rho \varepsilon v \varepsilon \kappa ~ v \varepsilon \kappa \rho \omega v$ ). Note repetition of $o v$ (whom). This is God's answer to their act of crucifixion.

In him doth this man stand ( $\varepsilon v \tau о \nu \tau \omega$ ov $\tau \circ \varsigma \pi \alpha \rho \varepsilon \sigma \tau \eta \kappa \varepsilon v$ ). Rather (note play on ou $\tau \circ \varsigma)$ ), "In this one ( $\mathrm{ov}, \mathrm{ov}$ ) this one stands (present perfect active indicative, intransitive)." In Jesus this man stands before you whole (v$\gamma \boldsymbol{\eta})$ ). It was a centre shot.

Acts 4:11
Of you the builders ( $v \varphi^{\prime} v \mu \omega v \tau \omega v$ oוко $\delta o \mu \omega v$ ). The experts, the architects, had rejected Jesus for their building (Ps 118:22) as Jesus himself had pointed out (Mt 21:42; Lu 21:17). This very Rejected Stone God had made the head of the corner (either the highest corner
stone right under the roof or the corner stone under the building, Isa 28:16 ) as Jesus showed, as Peter here declares and repeats later ( 1 Pe 2:6f. ).

Acts 4:12
Salvation ( $\eta \sigma \omega \tau \eta \rho \not \alpha$ ). The Messianic salvation as in $5: 31 ; 17: 11$ and as Jesus meant in Joh 4:22. It is amazing to see Peter speaking thus to the Sanhedrin and proclaiming the necessity of salvation ( $\delta \varepsilon \sigma \omega \theta \eta \nu \alpha$ ) in the name of Jesus Christ and in no other. If this was true then, it is true today. There is no second ( $\varepsilon \tau \varepsilon \rho \circ \vee$ ) name to go beside that of Jesus in India, China, Japan, or America.

Acts 4:13
The boldness ( $\tau \eta v \pi \alpha \rho \rho \eta \sigma \iota \alpha v$ ). Telling it all ( $\pi \alpha v, \rho \eta \sigma \iota \alpha$ ). See also verses 29,31 . Actually Peter had turned the table on the Sanhedrin and had arraigned them before the bar of God.

Had perceived ( $\kappa \alpha \tau \alpha \lambda \alpha \beta о \mu \varepsilon v o$ ). Second aorist middle participle of $\kappa \alpha \tau \alpha \lambda \alpha \mu \beta \alpha v \omega$, common verb to grasp strongly ( $\kappa \alpha \tau \alpha$ ), literally or with the mind (especially middle voice), to comprehend. The rulers recalled Peter and John from having seen them often with Jesus, probably during the temple teaching, etc.

They were unlearned ( $\alpha \gamma \rho \alpha \mu \mu \alpha \tau о$ عוбıv). Present indicative retained in indirect discourse. Unlettered men without technical training in the professional rabbinical schools of Hillel or Shammai. Jesus himself was so regarded (Joh 7:15, "not having learned letters").

And ignorant ( $\kappa \alpha \iota \delta \omega \tau \alpha$ ). Old word, only here in the N.T. and 1Co 14:24; 2Co 11:6 . It does not mean "ignorant," but a layman, a man not in office (a private person), a common soldier and not an officer, a man not skilled in the schools, very much like $\alpha \gamma \rho \alpha \mu \mu \alpha \tau$, It is from t $\delta$ oc (one's own) and our "idiosyncracy" is one with an excess of such a trait, while "idiot" (this very word) is one who has nothing but his idiosyncracy. Peter and John were men of ability and of courage, but they did not belong to the set of the rabbis.

They marvelled ( $\varepsilon Ө a v \mu \Omega \zeta o v)$. Imperfect (inchoative) active, began to wonder and kept it up.

Took knowledge of them ( $\varepsilon \pi \varepsilon \gamma \iota v \omega \sigma \kappa \circ v$ av $\tau 0 \cup \varsigma)$. Imperfect (inchoative) active again, they began to recognize them as men that they had seen with Jesus.

Acts 4:14
They could say nothing against it (ov $\delta \varepsilon v \varepsilon\lfloor\chi o v a v \tau \varepsilon ı \pi \varepsilon เ v$ ). Imperfect again, they kept on having nothing to say against it. The lame man was standing there before their eyes in proof of what Peter had said.

Acts 4:15
They conferred among themselves ( $\sigma v v \varepsilon \beta \alpha \lambda \lambda o v \pi \rho \circ \varsigma \alpha \lambda \lambda \eta \lambda o u \varsigma$ ). Imperfect active again. With Peter and John and the lame man outside, they began to compare ( $\sigma v \nu, \beta \alpha \lambda \lambda \omega$ ) notes and take stock of their predicament.

Acts 4:16

What shall we do? (T $\pi о \Pi \eta \sigma \omega \mu \varepsilon v$ ). Deliberative aorist active subjunctive (ingressive and urgent aorist).

Notable miracle ( $\gamma v \omega \sigma \tau \sigma v \sigma \eta \mu \varepsilon ו o v$ ). Or sign. It was useless to deny it with the man there.

We cannot deny it (ov $\delta v v \alpha \mu \varepsilon \theta \alpha \alpha \rho v \varepsilon \sigma \theta \alpha$ ). That is, it will do no good.
Acts 4:17
That it spread no further ( $\llcorner v \alpha \mu \eta \varepsilon \pi \pi \lambda \varepsilon \iota o v \delta ı \alpha v \varepsilon \mu \eta \theta \eta$ ). First aorist passive subjunctive

Let us threaten them ( $\alpha \pi \varepsilon ı \lambda \eta \sigma \omega \mu \varepsilon \theta \alpha$ autoıs). Hortatory aorist middle subjunctive of $\alpha \pi \varepsilon \iota \lambda \varepsilon \omega$, old verb (note middle voice). In the N.T. only here and 1 Pe 2:23.

That they speak henceforth to no man in this name ( $\mu \eta \kappa \varepsilon \tau \lambda \alpha \lambda \varepsilon \iota v \varepsilon \pi \tau \omega$ оvo $\mu \alpha \tau$ $\tau 0 v \tau \omega \mu \eta \delta \varepsilon v \alpha v \theta \rho \omega \pi \omega v)$. Indirect command with the infinitive and double negative ( $\mu \eta \kappa \varepsilon \tau \iota$, $\mu \eta \delta \varepsilon v)$. They will not say "Jesus," but make a slur at "this name," contemptuous use of ovtoৎ, though they apparently do mention the name "Jesus" in verse 18.

Acts 4:18
Not to speak at all ( $\kappa \alpha \theta$ о $\lambda o v \mu \eta \varphi \theta \varepsilon \gamma \gamma \varepsilon \sigma \theta \alpha$ ). Same construction as above, infinitive in indirect command with negative $\mu \eta$ (and $\mu \eta \delta \varepsilon$ ).

Acts 4:20
For we cannot but speak (ov $\delta \nu v \alpha \mu \varepsilon \forall a ~ \gamma \alpha \rho ~ \eta \mu \varepsilon ı \sigma--\mu \eta ~ \lambda \alpha \lambda \varepsilon ı v$ ). Both negatives hold here, "For we (note emphatic $\eta \mu \varepsilon \varsigma \varsigma$ ) are not able not to speak" (what we saw and heard). This is defiance of the civil and ecclesiastical authorities that was justified, for the temple authorities stepped in between the conscience and God. Peter and John were willing to pay the price of this defiance with their lives. This is the courage of martyrs through all the ages.

Acts 4:21
When they had further threatened them ( $\pi \rho о \sigma \alpha \pi \varepsilon \lambda \lambda\rceil \sigma \alpha \mu \varepsilon v o)$. The "further" is in "pros" (in addition),

Finding nothing how they might punish them ( $\mu \eta \delta \varepsilon v \varepsilon v \rho \iota \sigma \kappa о v \tau \varepsilon \varsigma$ то $\pi \omega \varsigma \kappa о \lambda \alpha \sigma \omega v \tau \alpha$ autous). Note the article "to" before $\pi \omega \varsigma$ (how), "the how." Aorist middle deliberative subjunctive ко $\lambda \alpha \sigma \omega \nu \tau \alpha$ in indirect question after $\pi \omega \varsigma$ from ко $\lambda \omega \zeta$, to lop (ко $\lambda \varsigma \varsigma$, lopped), to curb, to prune, to correct, to punish. Old verb, in the N.T. only here and 2Pe 2:9 .

Glorified God ( $\varepsilon \delta 0 \xi \alpha \zeta \circ v$ tov $\theta \varepsilon \circ v$ ). Imperfect active, kept on glorifying God while the Sanhedrin were threatening Peter and John. It was to laugh at the helplessness of the Sanhedrin.

Acts 4:22
Was wrought ( $\gamma \varepsilon \gamma \circ v \varepsilon$ ). Second past perfect active without augment from $\gamma \boldsymbol{\nu} \circ \mu \alpha$.
Acts 4:23
To their own company ( $\pi \rho \circ \varsigma$ tous $\begin{aligned} & \delta \text { ıovc). Their own people as in Joh 1:11; 13:1; Ac }\end{aligned}$ 24:23; 1Ti 5:8; Tit 3:14, not merely the apostles (all the disciples). In spite of Peter's cour-
ageous defiance he and John told the brotherhood all that had been said by the Sanhedrin. They had real apprehension of the outcome.

Acts 4:24
With one accord (o $\mu \circ \theta v \mu \alpha \delta o v$ ). A concert of voices as already seen by the word in 1:14; 2:46 and later in 5:12; 7:57; 15:25 .

O Lord $(\Delta \varepsilon \sigma \pi о \tau \alpha)$. Our word despot. Old word for relation of master to slaves or household servants (1Ti 6:1; 2Ti 2:21; Tit 2:9; 1Pe 2:18). Simeon thus addressed God (Lu 2:29 ). So in 2Pe 2:1; Jude 1:4; Re 6:10. See "slaves" in verse 29.

Acts 4:25
By the mouth of our father David ( $\tau \circ v \pi \alpha \tau \rho о \varsigma ~ \eta \mu \omega v \delta ı \alpha \pi \nu \varepsilon v \mu \alpha \tau о \varsigma \alpha \gamma ь v \sigma \tau о \mu \alpha \tau о \varsigma$ $\Delta a v \varepsilon \iota \delta)$. From Ps 2:1f. here ascribed to David. Baumgarten suggests that the whole company sang the second Psalm and then Peter applied it to this emergency. The Greek MSS. do not have $\delta ı \alpha$ (by) here before $\sigma \tau о \mu \alpha \tau o \varsigma$, but only $\delta ı \alpha$ before $\pi v \varepsilon v \mu \alpha \tau o \varsigma \alpha \gamma ı v$ (the Holy Spirit). Hort calls this a "primitive error" perhaps due to an early scribe who omitted this second $\delta ı \alpha$ so close to the first $\delta ı \alpha$ (Robertson, Introduction to the Textual Criticism of the N.T., p. 238). A small list of such primitive errors is there given as suggested by Dr. Hort.

Why (ıva $\tau$ ). This Greek idiom calls for $\gamma \varepsilon \nu \eta \tau \alpha$ (second aorist middle subjunctive),
That what may happen .
The Gentiles $(\varepsilon \theta v \eta)$. So always in LXX, while $\lambda \alpha o$ (peoples) can include Jews.
Did rage $(\varepsilon \varphi \rho v \alpha \xi \alpha \nu)$. First aorist active indicative of $\varphi \rho v \alpha \sigma \sigma \omega$, late word, to neigh like a horse, to prance or stamp the ground, to put on lofty airs. Only here in the N.T. in this quotation from Ps 2:1.

Imagine $(\varepsilon \mu \varepsilon \lambda \varepsilon \tau \eta \sigma \alpha v)$. First aorist active indicative of $\mu \varepsilon \lambda \varepsilon \tau \alpha \omega$. Old verb from $\mu \varepsilon \lambda \varepsilon \tau \eta$ (care), to practise, to caution, as orators and rhetoricians. Only here in the N.T. in this quotation.

Acts 4:26
Set themselves in array ( $\pi \alpha \rho \varepsilon \sigma \tau \eta \sigma \alpha v$ ). Literally, stood by.

Acts 4:27
Both Herod and Pontios Pilate ( $Н \eta \rho \omega \iota \delta \eta \varsigma \tau \varepsilon \kappa \alpha$ Поv $\tau \iota \varsigma ~ \Pi \varepsilon \iota \lambda \alpha \tau о \varsigma) . ~ L u k e ~ a l o n e ~(L u ~$ 23:12 ) tells of the reconciliation between Herod and Pilate at the trial of Jesus. So Peter and the rest interpret this prophecy as directly fulfilled in their conduct towards Jesus Christ.

Whom thou didst anoint (ov $\varepsilon \chi \rho \iota \sigma a \varsigma)$. As in verse 26 (cf. Lu 4:18; Isa 61:1). Inaugurated as King Messiah.

Acts 4:28
Foreordained ( $\pi \rho o \omega \rho \iota \sigma \varepsilon v)$. First aorist active indicative of $\pi \rho o o \rho ı \zeta \omega$, "They rise above sight and seem to see the Hand which 'shapes men's ends, rough hew them how they will"' (Furneaux).

Acts 4:29
And now ( $\kappa \alpha \tau \alpha v v v$ ). "And as to (accusative of general reference) the now things (the present situation)." Only in the Acts in the N.T. (5:38; 17:30; 20:32; 27:22 ).

Grant ( $\delta o \varsigma)$. Second aorist active imperative of $\delta \iota \delta \omega \mu$, urgency of the aorist, Do it now.
To speak thy word with all boldness ( $\mu \varepsilon \tau \alpha \pi \alpha \rho \rho \eta \sigma \iota \alpha \varsigma \pi \alpha \sigma \eta \varsigma \lambda \alpha \lambda \varepsilon \iota \nu \tau \circ v \lambda o \gamma o v \sigma o v$ ). Literally, "with all boldness to go on speaking (present active infinitive) thy word." Peter and John had defied the Sanhedrin in verse 20, but all the same and all the more they pray for courage in deed to live up to their brave words. A wholesome lesson.

Acts 4:30
While thou stretchest forth thy hand ( $\varepsilon \nu \tau \omega \tau \eta \nu \chi \varepsilon \iota \rho \alpha \varepsilon \kappa \tau \varepsilon \iota \nu \varepsilon \iota \nu \sigma \varepsilon$ ). Luke's favourite idiom, "In the stretching out (articular present active infinitive) the hand as to thee" (accusative of general reference), the second allusion to God's "hand" in this prayer (verse 28).

To heal ( $\varepsilon \iota \varsigma \iota \alpha \sigma \iota v)$. For healing. See verse 22.
And that signs and wonders may be done ( $\kappa \alpha \sigma \eta \mu \varepsilon \iota \alpha \kappa \alpha \tau \varepsilon \rho \alpha \tau \alpha \gamma ı \varepsilon \varepsilon \sigma \theta \alpha$ ). Either to be taken as in the same construction as $\varepsilon \kappa \tau \varepsilon \iota v \varepsilon \iota \nu$ with $\varepsilon \nu \tau \omega$ as Revised Version has it here or to be treated as subordinate purpose to $\varepsilon v \tau \omega \varepsilon \kappa \tau \varepsilon \iota v \varepsilon \iota v$ (as Knowling, Page, Wendt, Hackett). The latter most likely true. They ask for a visible sign or proof that God has heard this prayer for courage to be faithful even unto death.

Acts 4:31
The place was shaken ( $\varepsilon \sigma \alpha \lambda \varepsilon v \theta \eta$ о толос). By an earthquake most likely as in 16:26, but none the less a token of God's presence and power (Ps 114:7; Isa 2:19,21; Heb 12:26f. ).

Were gathered together ( $\eta \sigma \alpha \nu \sigma \nu \nu \eta \gamma \mu \varepsilon v o$ ). Periphrastic past perfect passive of $\sigma v \nu \alpha \gamma \omega$.
They spake ( $\varepsilon \lambda \alpha \lambda o v v$ ). Imperfect active indicative, began to speak, after being filled ( $\varepsilon \pi \lambda \eta \sigma \theta \eta \sigma \alpha \nu$, aorist passive indicative) with the Holy Spirit. Luke uses the very words of the prayer in verse 29 to describe their conduct.

Acts 4:32
Of one heart and soul ( $\kappa \alpha \rho \delta \iota \alpha \kappa \alpha \psi v \chi \eta \mu \iota \alpha$ ). It is not possible to make sharp distinction between heart and soul here (see Mr 12:30), only that there was harmony in thought and affection. But the English translation is curiously unlike the Greek original. "There was one heart and soul (nominative case, not genitive as the English has it) in the multitude ( tov $\pi \lambda \eta \theta$ ovৎ, subjective genitive) of those who believed."

Not one of them (ou $\delta \varepsilon \varepsilon \iota \varsigma)$. More emphatic than ou $\delta \varepsilon \iota \varsigma$, "not even one."
Common (koוva). In the use of their property, not in the possession as Luke proceeds to explain. The word коıvos is kin to $\sigma v \nu$ (together with) $=\xi v \nu$ (Epic) and so $\xi v v o \sigma=\kappa о \iota \nu о \varsigma$. See this word already in 2:44. The idea of unclean (Ac 10:15) is a later development from the original notion of common to all.

Acts 4:33

Gave their witness ( $\alpha \pi \varepsilon \delta \iota \delta o v v \tau o \mu \alpha \rho \tau v \rho \iota v)$ ). Imperfect active of $\alpha \pi o \delta \iota \delta \omega \mu$, old verb to give back, to pay back a debt (Lu 7:42), but a late omega form instead of the usual $\alpha \pi \varepsilon \delta \delta o \sigma a v$. They kept on giving their witness with power after the answer to their prayer (verse 31).

Of the resurrection ( $\tau \eta \varsigma \alpha v a \sigma \tau \alpha \sigma \varepsilon \omega \varsigma$ ). It was on this issue that the Sadducees had arrested them ( 4:1-3).

Acts 4:34
That lacked ( $\varepsilon v \delta \varepsilon \eta \varsigma)$. Literally, in need, old adjective, here only in the N.T.
Were (v $v \eta \rho \chi \circ v$ ). Imperfect active of $v \pi \alpha \rho \chi \omega$, to exist.
Sold them and brought ( $\pi \omega \lambda$ ouv $\tau \varepsilon \varsigma \varepsilon \varphi \varepsilon \rho \circ v$ ). Present active participle and imperfect active indicative. Selling they brought from time to time, as there was occasion by reason of need. Hence the wants were kept supplied.

Laid them ( $\varepsilon \tau 1 \theta$ ouv). Imperfect active again, repetition, of $\tau 1 \theta \eta \mu$, late omega form for the usual $\varepsilon \tau i \theta \varepsilon \sigma \alpha \nu$.

Acts 4:35
Distribution was made ( $\delta_{\iota} \varepsilon \delta \delta \varepsilon \tau 0$ ). Imperfect passive of $\delta_{\iota} \alpha \delta \iota \delta \omega \mu$, late omega form for $\delta_{1 \varepsilon} \delta_{1} \delta$ oto (the stem vowel o displaced by $\varepsilon$ ). Impersonal use of the verb here.

According as any one had need ( $\kappa \alpha \theta$ o $\tau \nu \tau \tau \varsigma \chi \rho \varepsilon \iota \alpha v \varepsilon \tau \chi \varepsilon v$ ). Imperfect active of $\varepsilon \chi \omega$ with $\kappa \alpha \theta$ ot and $\alpha v$ with the notion of customary repetition in a comparative clause (Robertson, Grammar, p. 967).

Acts 4:36
Barnabas (Bapvaßac). His name was Joseph (correct text, and not Jesus) and he is mentioned as one illustration of those in verse 34 who selling brought the money. The apostles gave him the nickname Barnabas by which later he was known because of this noble deed. This fact argues that all did not actually sell, but were ready to do so if needed. Possibly Joseph had a larger estate than some others also. The meaning of the nickname is given by Luke as "son of consolation or exhortation" (vioc $\pi \alpha \rho \alpha \kappa \lambda \eta \sigma \varepsilon \omega \varsigma)$. Doubtless his gifts as a preacher lay along this same line. Rackham thinks that the apostles gave him this name when he was recognized as a prophet. In Ac 11:23 the very word $\pi \alpha \rho \varepsilon \kappa \alpha \lambda \varepsilon$ (exhorted) is used of Barnabas up at Antioch. He is the type of preacher described by Paul in 1Co 14:3. Encouragement is the chief idea in тарак $\lambda \boldsymbol{\eta} \boldsymbol{\mu}$ though exhortation, comfort, consolation are used to render it (Ac 9:31; 13:15; 15:31). See also 16:9; 20:12 . It is not necessary to think that the apostles coined the name Barnabas for Joseph which originally may have come from Bapveßouc (Deissmann, Bible Studies, pp. 308-10), son of Nebo, or even the Hebrew Bar Nebi (son of a prophet). But, whatever the origin, the popular use is given by Luke. He was even called apostle along with Paul (Ac 14:14) in the broad sense of that word.

Acts 4:37

Having a held (v $\tau \alpha \rho \chi \circ v \tau о \varsigma \alpha \cup \tau \omega \alpha \gamma \rho \circ v$ ). Genitive absolute with present active participle of $v \pi \alpha \rho \chi \omega$ and dative of possession.

Sold it and brought ( $\pi \omega \lambda \eta \sigma \alpha \varsigma \eta \nu \varepsilon \gamma \kappa \varepsilon v$ ). Aorist active participle of $\pi \omega \lambda \varepsilon \omega$ and second aorist active indicative of $\varphi \varepsilon \rho \omega$ because a single definite instance. So also with $\varepsilon \theta \eta \kappa \varepsilon v$ (laid), first aorist active.

## Acts 5

Acts 5:1
Sold ( $\varepsilon \pi \omega \lambda \eta \sigma \varepsilon v$ ). Aorist active indicative again, for a single case.
Acts 5:2
Kept back ( $\varepsilon \nu 0 \sigma \varphi\llcorner\sigma \alpha \tau o)$. First aorist middle indicative of $\nu \sigma \sigma \varphi \iota \zeta \omega$, old verb from $\nu 0 \sigma \varphi$, afar, apart, and so to set apart, to separate for oneself, but only here, verse 3 ; Tit 2:10 in the N.T.

His wife also being privy to it ( $\sigma \cup v \varepsilon \iota \delta \nu \eta \varsigma \kappa \alpha \tau \eta \varsigma \gamma \cup v \alpha \kappa \kappa \varsigma)$. Genitive absolute with second perfect participle of $\sigma v v o t \delta a$, to know together with one, "his wife also knowing it together with him."

Brought a certain part ( $\varepsilon v \varepsilon \gamma \kappa \alpha \varsigma \mu \varepsilon \rho \circ \varsigma \tau)$. Aorist active participle of $\varphi \varepsilon \rho \omega$, for a definite act. The praise of Joseph was too much for Ananias, but he was not willing to turn over all. He wanted praise for giving all and yet he took care of himself by keeping some. Thus he started the Ananias Club that gave a new meaning to his lovely name (God is gracious).

Acts 5:3
Filled $(\varepsilon \pi \lambda \eta \rho \omega \sigma \varepsilon v)$. The very verb used of the filling by the Holy Spirit (4:31). Satan the adversary is the father of lies (Joh 8:44). He had entered into Judas (Lu 22:3; Joh 13:27 ) and now he has filled the heart of Ananias with a lie.

To lie to the Holy Spirit ( $\psi \varepsilon v \sigma \alpha \sigma \theta \alpha \sigma \varepsilon \tau о \pi v \varepsilon v \mu \alpha$ тo $\alpha \gamma \iota \circ v$ ). Infinitive (aorist middle) of purpose with accusative of general reference ( $\sigma \varepsilon$ ) and the accusative of the person (object) as often in Greek writers, though here only in the N.T. with this verb. Usual dative of the person in verse 4 ( $\alpha v \theta \rho \omega \pi$ оı, men, $\tau \omega \theta \varepsilon \omega$, God). The Holy Spirit had been given them to guide them into truth (Joh 15:13).

## Acts 5:4

Whiles it remained ( $\mu \varepsilon \nu \circ v$ ). Present active participle of mend, unsold, Peter means.
After it was sold ( $\pi \rho \alpha \theta \varepsilon v$ ). First aorist passive of $\pi \iota \pi \rho \alpha \sigma \kappa \omega$, to sell.
How is that thou hast conceived (T o七 $\varepsilon$ Өov). Quid est quod. See Lu 2:49. See also Ac 5:9. Second aorist middle indicative second person singular of $\tau \iota \theta \eta \mu$. The devil filled his heart (verse 3), but all the same Ananias did it too and is wholly responsible.

Acts 5:5
Hearing $(\alpha \kappa о v \omega v)$. Present active participle of $\alpha \kappa о v \omega$, while hearing.
Fell down $(\pi \varepsilon \sigma \omega \nu)$. Second aorist active participle of $\pi \iota \pi \tau \omega$, fell all of a sudden while listening.

Gave up the ghost ( $\varepsilon \xi \varepsilon \psi v \xi \varepsilon v)$. First aorist active indicative of $\varepsilon \kappa \psi v \chi \omega$, late verb in LXX and Hippocrates, to breathe out, to expire. In the N.T. only here, verse $10 ; 12: 23$. It is needless to blame Peter for the death of Ananias. He had brought the end upon himself. It was the judgment of God. Physically the nervous shock could have caused the collapse.

## Acts 5:6

The young men (o $v \varepsilon \omega \tau \varepsilon \rho o$ ). Literally the younger men (contrast with o $\pi \rho \varepsilon \sigma \beta \nu \tau \varepsilon \rho \circ$, the elder men). Same as veavioko in verse 10 and so no order in the young church. Perhaps these young men were acting as ushers or actual pallbearers.

Wrapped him round ( $\sigma u v \varepsilon \sigma \tau \varepsilon \lambda \lambda \alpha$ ). First aorist active indicative of $\sigma v \sigma \tau \varepsilon \lambda \lambda \omega$, old verb, to draw together, or contract (1Co 7:29) , to roll together, to wrap with bandages, to enshroud as here. Nowhere else in the N.T. Frequent in medical writers. They may have used their own mantles. The time for burial was short in Jerusalem for sanitary reasons and to avoid ceremonial defilement.

Acts 5:7
And it was about the space of three hours after ( $\varepsilon \gamma \varepsilon v \varepsilon \tau \circ \delta \varepsilon \omega \varsigma \omega \rho \omega \nu \tau \rho \omega \omega \nu \delta \Delta \alpha \sigma \tau \eta \mu \alpha)$. Literally "Now there came an interval ( $\delta$ ıaб $\tau \eta \mu$, distance, space between) of about ( $\omega \varsigma$ ) three hours."

When ( $\kappa \alpha$ ). This use of $\kappa \alpha$ after $\varepsilon \gamma \varepsilon v \varepsilon \tau o$ is characteristic of Luke's style in the Gospel.
Not knowing ( $\mu \eta \varepsilon \varepsilon \delta v i \alpha)$. Feminine singular of second perfect active participle of ot $\delta \alpha$. $\mathrm{M} \eta$ usual negative of the participle in the Koine.

Acts 5:8
For so much ( $\tau 0 \sigma 0$ tov). Genitive of price. Perhaps Peter pointed to the pile of money at the feet of the apostles (verse 2). The use of $\varepsilon$ in direct questions appears in Luke (Lu 13:23; $22: 49$ ) as in the LXX like the Hebrew im and in Ac 1:6; 19:2, etc.

Acts 5:9
Ye have agreed together ( $\sigma v \nu \varepsilon \varphi \omega v \eta \theta \eta \nu \mu \nu \nu$ ). First aorist passive indicative of $\sigma \nu \mu \varphi \omega \nu \varepsilon \omega$ (to voice together, symphony), impersonal with dative; It was agreed together by you (or for you). "Your souls were allured together respecting this deceit" (Vincent).

To tempt the Spirit of the Lord ( $\pi \varepsilon \iota \rho \alpha \sigma \alpha$ то $\pi v \varepsilon v \mu \alpha$ кvрıо). Like "Thou shalt not tempt the Lord thy God." It was close to the unpardonable sin which was attributing the manifest work of the Holy Spirit to Beelzebub.

The feet (o $\pi \mathbf{\pi} \delta \varepsilon \varsigma)$. Graphic picture by Peter as he heard the steps of the young men at the door.

Acts 5:10
Immediately ( $\pi \alpha \rho \alpha \chi \rho \eta \mu \alpha)$. Hence her death was regarded as supernatural like that of Ananias.

By her husband ( $\pi \rho o \varsigma ~ \tau o v a v \delta \rho \alpha \alpha v \tau \eta \varsigma$ ). Face to face to her husband.
Acts 5:11
Upon the whole church ( $\varepsilon \varphi^{\prime}$ o $\lambda \eta \nu \tau \eta \nu \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha \nu$ ). Here $\varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$ for the first time in Acts of the believers in Jerusalem. Twice already in the Gospels, once of the whole body of believers or the Kingdom (Mt 16:18) , the other of the local body (Mt 18:17). In Ac 7:38 it is used of the whole congregation of Israel while in 19:32 it is used of a public assembly in

Ephesus. But already in Ac 8:3 it is applied to the church which Saul was persecuting in their homes when not assembled. So here the etymological meaning of "assembly" disappears for "the church" were now the scattered saints hiding in their separate homes. The whole body of believers in Jerusalem and all who heard of the fate of Ananias and Sapphira (beautiful, her name means) were in awe and dread. It was already a dangerous thing to be a follower of Christ unless one was willing to walk straight.

Acts 5:12
Were wrought ( $\varepsilon \gamma \iota v \varepsilon \tau o$ ). Imperfect middle, wrought from time to time.
With one accord ( $o \mu \circ \theta v \mu \alpha \delta o v$ ). As already in $1: 14 ; 2: 46 ; 4: 24$ and later 7:57; 8:6; 12:20; $15: 25 ; 18: 21 ; 19: 29$, old adverb and only in Acts in the N.T. Here "all" is added. In Solomon's Porch again as in 3:11 which see.

Acts 5:13
Durst $(\varepsilon \tau \sigma \lambda \mu \alpha)$. Imperfect active of $\tau 0 \lambda \mu \alpha \omega$, old verb, not to fear or shun through fear, boldly to take a stand. The fate of Ananias and Sapphira continued to hold many in check.

Join ( $\kappa о \lambda \lambda \alpha \sigma \theta \alpha$ ). Present middle infinitive of $\kappa о \lambda \lambda \alpha \omega$, old verb to cleave to like glue as in $\operatorname{Lu} 15: 15$ which see. Seven times in Acts $(9: 26 ; 10: 28 ; 17: 34)$. The outsiders (the rest) preferred, many of them, to remain outside for the present, especially the rulers.

Howbeit the people ( $\alpha \lambda \lambda^{\prime}-$-o $\left.\lambda \alpha o \varsigma\right)$. Probably individuals among the people, the populace as distinct from the rulers and hostile outsiders.

Acts 5:14
Were the more added ( $\mu \alpha \lambda \lambda o v \pi \rho o \sigma \varepsilon \tau \iota \varepsilon v \tau \tau$ ). Rather ( $\mu \alpha \lambda \lambda o v$ ) instead of decrease as one might expect. Imperfect passive indicative of $\pi \rho o \sigma \tau \iota \theta \eta \mu$ common $\mu$ verb, kept on being added.

Both of men and women ( $\alpha \nu \delta \rho \omega \nu \tau \varepsilon \kappa \alpha \gamma \nu v \alpha \_\kappa \omega \nu$ ). The distinction between $\alpha \nu \delta \rho \varepsilon \varsigma$ and $\gamma$ ขvaıкєऽ and to be considered in connection with $\alpha \nu \delta \rho \varepsilon \varsigma$ in $4: 4$ which see.

Acts 5:15
Insomuch that $(\omega \sigma \tau \varepsilon)$. With the present infinitive $\varepsilon \kappa \varphi \varepsilon \rho \varepsilon \iota v$ and $\tau \iota \theta \varepsilon v \alpha$, regular Greek idiom for result.

Into the streets ( $\varepsilon ı \varsigma \tau \propto \varsigma \pi \lambda \alpha \tau \varepsilon ı \alpha \varsigma)$. Supply oסovৎ (ways), into the broad ways.
On beds and couches ( $\varepsilon \pi \kappa \lambda \iota v \alpha \rho \iota \omega \nu \kappa \alpha \kappa \rho \alpha \beta \alpha \tau \tau \omega \nu$ ). Little beds ( $\kappa \lambda \iota \nu \alpha \rho \iota \alpha$ diminutive of $\kappa \lambda \iota \nu \eta$ ) and camp beds or pallets (see on Mr 2:4,9,11).

As Peter came by ( $\varepsilon \rho \chi \circ \mu \varepsilon v o v ~ \Pi \varepsilon \tau \rho o v)$. Genitive absolute with present middle participle.
At the least his shadow might overshadow ( $\kappa \alpha \nu \eta \sigma \kappa \iota \alpha \varepsilon \pi \iota \sigma \kappa \iota \alpha \sigma \varepsilon$ ). Future active indicative with $I v \alpha$ (common with $o \pi \omega \varsigma$ in ancient Greek) and $\kappa \alpha v$ (crasis for $\kappa \alpha \varepsilon \alpha v=e v e n$ if), even if only the shadow. The word for shadow ( $\sigma \kappa \iota \alpha$, like our "sky") is repeated in the verb and preserved in our "overshadow." There was, of course, no virtue or power in Peter's shadow. That was faith with superstition, of course, just as similar cases in the Gospels occur (Mt 9:20; Mr 6:56; Joh 9:5) and the use of Paul's handkerchief (Ac 19:12 ). God honours
even superstitious faith if it is real faith in him. Few people are wholly devoid of superstition.
Acts 5:16
Came together ( $\sigma u v \eta \rho \chi \varepsilon \tau \sigma$ ). Imperfect middle, kept on coming.
Round about ( $\pi \varepsilon \rho \iota \xi)$. Old adverb, strengthened form of $\pi \varepsilon \rho$, only here in the N.T.
Vexed (ox $\lambda o u \mu \varepsilon v o v \varsigma)$. Present passive participle of ox $\lambda \varepsilon \omega$, to excite a mob (ox $\bar{\circ} \varsigma$ ) against one, to trouble, annoy. Old word, only here in the N.T., though $\varepsilon v o \chi \lambda \varepsilon \omega$ in $\operatorname{Lu}$ 6:18

Were healed every one ( $\varepsilon \theta \varepsilon \rho \alpha \pi \varepsilon v o v \tau 0 ~ \alpha \pi \alpha v \tau \varepsilon \varsigma)$. Imperfect passive, were healed one at a time, repetition.

Acts 5:17
Which is the sect of the Sadducees ( $\eta$ ov $\alpha \alpha$ aı $\rho \varepsilon \sigma \iota \varsigma ~ \tau \omega v ~ \sum \alpha \delta \delta o u \kappa \alpha \iota \omega v$ ). Literally, "the existing sect of the Sadducees" or "the sect which is of the Sadducees," $\eta$ being the article, not the relative. Haıpعбıц means a choosing, from aı $\rho \varepsilon \boldsymbol{\mu} \alpha$, to take for oneself, to choose, then an opinion chosen or tenet (possibly 2Pe 2:1), then parties or factions (Gal 5:20; 1Co 11:19 ; possibly 2Pe 2:1 ). It is applied here to the Sadducees; to the Pharisees in Ac 15:5; 26:5; to the Christians in 24:5-14; 28:22 . Already Luke has stated that the Sadducees started the persecution of Peter and John (Ac 4:1f. ). Now it is extended to "the apostles" as a whole since Christianity has spread more rapidly in Jerusalem than before it began.

Acts 5:18
With jealousy ( $\zeta \eta \lambda o v$ ). Genitive case. Old word from zeo, to boil, our zeal. In itself it means only warmth, ardour, zeal, but for a bad cause or from a bad motive, jealousy, envy, rivalry results (Ac 13:45). Common in the epistles.

In public ward ( $\varepsilon v \tau \eta \rho \eta \sigma \varepsilon \delta \eta \mu \circ \sigma \iota \alpha$ ). As in $4: 3$ only with $\delta \eta \mu \circ \sigma ı \alpha$ (public) added, in the public prison, perhaps not the "common" prison, but any prison is bad enough. In verse 19 it is called "the prison" ( тๆऽ 甲u入акๆऽ), the guardhouse.

Acts 5:20
And stand ( $\kappa \alpha \sigma \tau \alpha \theta \varepsilon v \tau \varepsilon \varsigma)$. First aorist passive participle (intransitive, ingressive aorist), take a stand. Bold and pictorial command.

All the words of this life ( $\pi \alpha \nu \tau \alpha \tau \alpha \rho \eta \mu \alpha \tau \alpha \tau \eta \varsigma \zeta \omega \eta \varsigma \tau \alpha \nu \tau \eta \varsigma)$. Not just a Hebraism for "all these words of life." Probably "this life" which the Sadducees deny and of which the angel is now speaking, this eternal life. (Joh 6:63,68; 1Co 15:19).

Acts 5:21
About daybreak (v $\tau \boldsymbol{\pi}$ тоv o $\rho \theta \rho o v$ ). From o $\rho v v \mu$, to stir up, to arouse, so the dawn ( Lu 24:1; Joh 8:2 ). Old word, but in the N.T. only these three passages. "Under the dawn" or "about dawn." Sub lucem. The temple doors would be open for early worshippers and traffickers (Joh 2:14).

Taught ( $\varepsilon \delta \iota \delta \alpha \sigma \kappa o v)$. Imperfect active, began to teach.
The council ( $\tau 0 ~ \sigma \cup v \varepsilon \delta \rho ı v)$. The Sanhedrin.

The senate ( $\tau \eta \nu \gamma \varepsilon \rho \circ v \sigma \iota \alpha v$ ). From $\gamma \varepsilon \rho \omega \nu$, an old man, just as the Latin senatus is from senex, old. Like the $\gamma \varepsilon \rho o v \tau \varepsilon \varsigma$ in Homer and the Elder Statesmen in Japan. Apparently the senate of the people were also part of the Sanhedrin and the use of "and" ( $\kappa \alpha$ ) is explanatory and adds this item in particular. Page thinks that this group of elders were not members of the Sanhedrin at all.

To the prison house ( $\varepsilon \iota \varsigma \tau 0 \delta \varepsilon \sigma \mu \omega \tau \eta \rho \iota v$ ), another word for prison ( $\tau \eta \rho \eta \sigma \iota \varsigma \delta \eta \circ \sigma \iota \alpha$ in verse $18, \eta \varphi \cup \lambda \alpha \kappa \eta$ in verse 19). See also verses $22,23,25$. This from $\delta \varepsilon \sigma \mu \circ \varsigma$, bond, and $\tau \eta \rho \varepsilon \omega$, to keep, place where bound men are kept.

Acts 5:22
The officers (o v $\quad \eta \rho \varepsilon \tau \alpha$ ). Under-rowers, literally (Mt 5:25 ). The servants or officers who executed the orders of the Sanhedrin.

Shut ( $\kappa \varepsilon \kappa \lambda \varepsilon \iota \sigma \mu \varepsilon v o v)$. Perfect passive participle of $\kappa \lambda \varepsilon \iota \omega$. Shut tight.
Standing at the doors ( $\varepsilon \sigma \tau \omega \tau \alpha \varsigma \varepsilon \pi \tau \omega \nu \theta v \rho \omega v)$. Graphic picture of the sentinels at the prison doors.

Acts 5:24
They were much perplexed ( $\delta i \eta \pi \sigma \rho o v v$ ). Imperfect active of $\delta \iota \alpha \pi o \rho \varepsilon \omega$ old verb by Luke only in the N.T. See already on Ac 2:12. They continued puzzled.

Whereunto this would grow ( $\tau \alpha v \gamma \varepsilon v o u \tau o ~ \tau o v \tau o$ ). More exactly,
As to what this would become. Second aorist middle optative of $\gamma, v o \mu \alpha$ with $\alpha v$, the conclusion of a condition of the fourth class (undetermined with less likelihood of determination), the unexpressed condition being "if the thing should be allowed to go on." The indirect question simply retains the optative with $\alpha v$ (Robertson, Grammar, pp. 1021, 1044). If they had only known how this grain of mustard seed would grow into the greatest tree on earth and how dwarfed the tree of Judaism would be beside it!

Acts 5:26
Brought ( $\eta \gamma \varepsilon v$ ). Imperfect active of $\alpha \gamma \omega$, was bringing (leading), slowly no doubt, and solemnly.

But without violence (ov $\mu \varepsilon \tau \alpha \beta$ ı $\alpha \varsigma$ ). Literally, not with violence.
For they feared ( $\varepsilon \varphi \circ \beta$ оuvto $\gamma \alpha \rho$ ). Imperfect middle, still feared, kept on fearing.
Lest they be stoned ( $\mu \eta \lambda_{\imath} \theta a \sigma \theta \omega \sigma \iota v$ ). Negative purpose with $\mu \eta$ (like $\imath \alpha \mu \eta$ ), probably with "not with violence," though possible with "they feared." They handled the apostles gently for fear of being stoned themselves by the people. First aorist passive subjunctive of $\lambda_{\imath} \theta a \zeta \omega$ (from $\lambda_{\imath} \theta$ oヶ, stone), old verb to pelt with stones (Ac 14:19; Joh 10:31-33 ).

Acts 5:27
They set them $(\varepsilon \sigma \tau \eta \sigma \alpha v)$. First aorist active indicative (transitive) of $ו \sigma \tau \eta \mu$.
Acts 5:28
We straitly charged (Параүүع $\lambda_{ı} \alpha \pi \rho \eta \gamma \gamma \varepsilon \iota \lambda \alpha \mu \varepsilon \nu$ ). Like the Hebrew idiom (common in the LXX), though found in Greek, with charging (instrumental case) we charged (cf. same
idiom in $\operatorname{Lu} 22: 15$ ). Somewhat like the cognate accusative. The command referred to occurs in Ac 4:17,18 and the refusal of Peter and John in 4:20.

To bring upon us ( $\left.\varepsilon \pi \alpha \gamma \alpha \gamma \varepsilon เ v \varepsilon \varphi^{\prime} \eta \mu \alpha \varsigma\right)$. Note repetition of $\varepsilon \pi$. Second aorist active infinitive of $\varepsilon \pi \alpha \gamma \omega$, old verb, but in the N.T. only here and $2 \mathrm{Pe} 2: 1,5$. The Sanhedrin gladly took the blood of Christ on their heads and their children to Pilate (Mt 27:25). Paul tried
 and refusal to call the name of Jesus as in the Talmud later.

Acts 5:29
We must ( $\delta \varepsilon$ ). Moral necessity left them no choice. They stood precisely where Peter and John were when before the Sanhedrin before (Ac 4:20).

Obey ( $\pi \varepsilon \bullet \theta \alpha \rho \chi \varepsilon ı v$ ). Old verb from $\pi \varepsilon \forall \theta o \mu \alpha$ and $\alpha \rho \chi \eta$, to obey a ruler. Only by Luke and Paul in the N.T.

Acts 5:30
Ye slew ( $\delta เ \varepsilon \chi \varepsilon \iota \rho \iota \sigma \alpha \sigma \theta \varepsilon$ ). First aorist middle indicative of $\delta \iota \alpha \chi \varepsilon ı \rho!\zeta о \mu \alpha$, old verb from $\delta \iota \alpha$ and $\chi \varepsilon \rho($ hand), to take in hand, manage, to lay hands on, manhandle, kill. In the N.T. only here and Ac 26:21 .

Hanging him upon a tree ( $\kappa \rho \varepsilon \mu \alpha \sigma \alpha \nu \tau \varepsilon \varsigma \varepsilon \pi \xi \cup \lambda o v)$. First aorist active participle of $\kappa \rho \varepsilon \mu \alpha v v v \mu$ ( $\kappa \rho \varepsilon \mu \alpha v v v \omega$ seen already in Mt 18:6 and Lu 23:39). Peter refers to De 21:23 as Paul does in $\mathrm{Ga} 3: 13$, the curse pronounced on every one who "hangs upon a tree."

Acts 5:31
Exalt ( $v \psi \omega \sigma \varepsilon v)$ In contrast to their murder of Christ as in 2:23f. Peter repeats his charges with increased boldness.

With his right hand ( $\tau \eta \delta \varepsilon \xi \iota \alpha$ av $\tau 0 v$ ). So instrumental case, or at his right hand (locative case), or even "to his right hand" (dative case) as in 2:33.

Prince and Saviour ( $\alpha \rho \chi \eta \gamma \circ v$ ка $\sigma \omega \tau \eta \rho \alpha$ ). See on 3:15. Clearly "Prince" here.
To give ( $\tau 0 v \delta o u v \alpha$ ). Genitive of articular infinitive (second aorist active of $\delta \iota \delta \omega \mu$ ) of purpose.

Acts 5:32
We are witnesses ( $\eta \mu \varepsilon \iota \varsigma \varepsilon \sigma \mu \varepsilon v \mu \alpha \rho \tau v \rho \varepsilon \varsigma)$. As in 2:32.
Things ( $\rho \eta \mu \alpha \tau \omega v$ ). Literally, sayings, but like the Hebrew dabhar for "word" it is here used for "things."

And so is the Holy Ghost ( $\kappa \alpha$ то $\pi v \varepsilon v \mu \alpha$ тo $\alpha \gamma \iota \sim v$ ). The word for "is" ( $\varepsilon \sigma \tau \iota v$ ) is not in the Greek, but this is plainly the meaning. Peter claims the witness of the Holy Spirit to the raising of Jesus Christ, God's Son, by the Father.

Acts 5:33
Were cut to the heart ( $\delta \iota \varepsilon \pi \rho \iota \rho \tau \tau)$. Imperfect passive of $\delta ı \alpha \pi \rho \iota \omega$ old verb ( $\delta \iota \alpha, \pi \rho \iota \omega$ ), to saw in two ( $\delta$ ta $)$, to cut in two (to the heart). Here it is rage that cuts into their hearts,
not conviction of sin as in Ac 2:37. Only here and Ac 7:54 (after Stephen's speech) in the N.T. (cf. Simeon's prophecy in Lu 2:35 ).

Were minded ( $\varepsilon \beta$ ou ${ }^{\prime}$ ovto). Imperfect middle of $\beta$ ou $\lambda o \mu \alpha$. They were plotting and planning to kill ( $\alpha v \varepsilon \lambda \varepsilon \tau v$, as in Ac 2:23; Lu 23:33 which see) then and there. The point in 4:7 was whether the apostles deserved stoning for curing the cripple by demoniacal power, but here it was disobedience to the command of the Sanhedrin which was not a capital offence. "They were on the point of committing a grave judicial blunder" (Furneaux).

Acts 5:34
Gamaliel ( $\Gamma \alpha \mu \alpha \lambda ı \eta \lambda$ ). The grandson of Hillel, teacher of Paul (Ac 22:3), later president of the Sanhedrin, and the first of the seven rabbis termed "Rabban." It is held by some that he was one of the doctors who heard the Boy Jesus in the temple ( $\operatorname{Lu} 2: 47$ ) and that he was a secret disciple like Joseph of Arimathea and Nicodemus, but there is no evidence of either position. Besides, he appears here as a loyal Pharisee and "a doctor of the law"
 criticizing Jesus, which see. Paul uses it of Judaizing Christians (1Ti 1:7). Like other great rabbis he had a great saying: "Procure thyself a teacher, avoid being in doubt; and do not accustom thyself to give tithes by guess." He was a man of judicial temper and not prone to go off at a tangent, though his brilliant young pupil Saul went to the limit about Stephen without any restraint on the part of Gamaliel so far as the record goes. Gamaliel champions the cause of the apostles as a Pharisee to score a point against the Sadducees. He acts as a theological opportunist, not as a disciple of Christ. He felt that a temporizing policy was best. There are difficulties in this speech of Gamaliel and it is not clear how Luke obtained the data for the address. It is, of course, possible that Saul was present and made notes of it for Luke afterwards.

Had in honour of all the people ( $\tau \iota \mu \circ \varsigma \pi \alpha \nu \tau \tau \omega \lambda \alpha \omega$ ). Ethical dative. Tı $\mu \circ \varsigma$ from $\tau \iota \mu \eta$, old word meaning precious, dear.

The men ( $\tau$ ov¢ $\alpha v \theta \rho \omega \pi$ тоия). Correct text as in verse 35 , not "the apostles" as Textus Receptus.

Acts 5:35
Take heed ( $\pi \rho \circ \sigma \varepsilon \chi \varepsilon \tau \varepsilon \varepsilon \alpha \cup \tau o \iota s)$. Hold your mind (vouv, unexpressed) for or on yourselves (dative case), the usual idiom.

Acts 5:36
Theudas ( $\Theta \varepsilon v \delta \alpha \varsigma)$. Luke represents Gamaliel here about A.D. 35 as speaking of a man who led a revolt before that of Judas the Galilean in connection with the enrolment under Quirinius (Cyrenius) in A.D. 6. But Josephus (Ant. XX. 5, 1) tells of a Theudas who led a similar insurrection in the reign of Claudius about A.D. 44 or 45. Josephus (Ant. XVIII. 1, 6; XX. 5, 2; War ii. 8, 1 and 17, 8) also describes Judas the Galilean or Gaulonite and places him about A.D. 6. It is not certain that Josephus and Luke (Gamaliel) refer to the same

Theudas as the name is an abbreviation of Theodosus, a common name. "Josephus gives an account of four men named Simon who followed each other within forty years, and of three named Judas within ten years, who were all instigators of rebellion" (Hackett). If the same Theudas is meant, then either Josephus or Luke (Gamaliel) has the wrong historical order. In that case one will credit Luke or Josephus according to his estimate of the two as reliable historians.

To be somebody ( $\varepsilon \wedge v \alpha \tau \imath v \alpha$ ). Indirect assertion with the infinitive and the accusative of general reference ( $\varepsilon a v \tau o v)$ and tiva, predicate accusative. Tiva could be "anybody" or "somebody" according to context, clearly "somebody" of importance here.

Joined themselves ( $\pi \rho о \sigma \varepsilon \kappa \lambda ı \eta \eta$ ). Correct text and not $\pi \rho о \sigma \varepsilon \kappa о \lambda \lambda \eta \theta \eta$ (Textus Receptus). First aorist passive indicative of $\pi \rho \circ \sigma \kappa \lambda \iota \nu \omega$, old verb to lean towards, to incline towards. Here only in the N.T.

Was slain ( $\alpha v \eta\llcorner\rho \theta \eta$ ). First aorist passive of $\alpha v a \iota \rho \varepsilon \omega$ (cf. verse 33).
Obeyed ( $\varepsilon \pi \varepsilon ו \theta$ ovto). Imperfect middle, kept on obeying.
Were dispersed ( $\delta \iota \varepsilon \lambda \nu \theta \eta \sigma \alpha \nu$ ). First aorist passive indicative (effective aorist) of $\delta \iota \alpha \lambda \nu \omega$, old verb to dissolve, to go to pieces. Here only in the N.T.

Acts 5:37
Of the enrolment ( $\tau \eta \varsigma \alpha \pi о \gamma \rho \alpha \varphi \eta \varsigma$ ). Described by Josephus (Ant. XV. 1, 1). The same word used by Luke of the first enrolment started by Augustus B.C. 8 to 6 (Lu 2:2 ). See the discussion on Lu 2:2. This is the second enrolment in the fourteen year cycle carried on for centuries as shown by numerous dated papyri. Ramsay (The Bearing of Recent Discovery on the Trustworthiness of the N.T.) has produced proof from inscriptions that Quirinius was twice in Syria as Luke reports (Robertson, Luke the Historian in the Light of Research).

Drew away ( $\alpha \pi \varepsilon \sigma \tau \eta \sigma \varepsilon$ ). Causative sense of the first aorist active indicative of $\alpha \varphi / \sigma \tau \eta \mu$, made people ( $\lambda \alpha 0 v$, no need of "some of the") to revolt (apostatize) with him.

He also (какєıvoৎ, crasis for ка єкєıvo¢). That one, also.
Were scattered abroad ( $\delta \iota \varepsilon \kappa \kappa \rho \pi \_\sigma \theta \eta \sigma \alpha v$ ). First aorist (effective) passive indicative of $\delta \iota \alpha \sigma \kappa о \rho \pi \iota \zeta \omega$, old verb to disperse. Used of sheep (Mr 14:27), of property (Lu 15:13). Aorist here after imperfect ( $\varepsilon \pi \varepsilon$ Өоvто) as in verse 36.

Acts 5:38
Refrain from ( $\alpha \pi \sigma \sigma \tau \eta \tau \varepsilon \alpha \pi o$ ). Second aorist (ingressive) active imperative of $\alpha \varphi \iota \sigma \tau \eta \mu$ of verse 37. Do ye stand off from these men. "Hands off" was the policy of Gamaliel.

For if--be (o $\tau \varepsilon \alpha v--\eta$ ). Ho $\tau$ gives the reason for the advice. Gamaliel presents two alternatives in terms of two conditional clauses. The first one is stated as a condition of the third class, $\varepsilon \alpha \nu$ with the present subjunctive $\eta$, undetermined with prospect of determination. Assuming that it is from men, "it will be overthrown" (ката入vӨŋб\&та, first future passive of $\kappa \alpha \tau \alpha \lambda \nu \omega$, to loosen down like a falling house) as was true of the following of Theudas and Judas the Galilean.

## Acts 5:39

But if it is of God ( $\varepsilon \delta \varepsilon \varepsilon \kappa \theta \varepsilon o v \varepsilon \sigma \tau \iota v$ ). The second alternative is a condition of the first class, determined as fulfilled, $\varepsilon$ with the present indicative. By the use of this idiom Gamaliel does put the case more strongly in favor of the apostles than against them. This condition assumes that the thing is so without affirming it to be true. On the basis of this alternative Gamaliel warns the Sanhedrin that they cannot "overthrow" ( $\kappa \alpha \tau \alpha \lambda \nu \sigma \alpha$ ) these men for they in that case must "overthrow" God,
lest haply ye be found ( $\mu \eta \pi \sigma \tau \varepsilon--v \rho \varepsilon \theta \eta \tau \varepsilon$, negative purpose with first aorist passive subjunctive)
even to be fighting against God ( $\kappa \alpha \theta \varepsilon о \mu \alpha \chi о$, late adjective from $\theta \varepsilon \circ \varsigma$ and $\mu \alpha \chi \circ \mu \alpha$, in LXX and here only in the N.T.).

Acts 5:40
To him they agreed $(\varepsilon \pi \varepsilon \iota \sigma \theta \eta \sigma \alpha \nu \alpha v \tau \omega)$. First aorist passive indicative of $\pi \varepsilon \iota \theta \omega$, to persuade, the passive to be persuaded by, to listen to, to obey. Gamaliel's shrewd advice scored as against the Sadducaic contention (verse 17).

Not to speak $(\mu \eta \lambda \alpha \lambda \varepsilon \iota v)$. The Sanhedrin repeated the prohibition of $4: 18$ which the apostles had steadily refused to obey. The Sanhedrin stood by their guns, but refused to shoot. It was a "draw" with Gamaliel as tactical victor over the Sadducees. Clearly now the disciples were set free because only the Sadducees had become enraged while the Pharisees held aloof.

Acts 5:41
They therefore (o $\mu \varepsilon v o v v$ ). No answering $\delta \varepsilon$.
They were counted worthy to suffer dishonour for the Name ( $\kappa \alpha \tau \eta \xi \iota \omega \theta \eta \sigma \alpha \nu v \pi \varepsilon \rho$ $\tau 0 v$ ovo $\mu \alpha \tau о \varsigma ~ \alpha \tau \mu \alpha \sigma \theta \eta v \alpha)$. First aorist passive indicative of $\kappa \alpha \tau \alpha \xi \iota \omega$, old verb to count worthy. Three times in N.T. (Lu 20:35; Ac 5:41; 2Th 1:5 ). First aorist passive infinitive of $\alpha \tau \iota \mu \alpha \zeta \omega$, old verb to make one dishonoured ( $\alpha \tau \iota \mu \circ \varsigma)$. Forms here an oxymoron (o $\zeta v \varsigma$, sharp, $\mu о \rho о \varsigma$, foolish) pointedly foolish saying "which is witty or impressive through sheer contradiction or paradox as laborious idleness, sublime indifference" (Vincent). The apostles felt honoured by dishonour. Note the same use of "the Name" as in Jas 2:7; 3Jo 1:7. With the Jews this absolute use of "the Name" meant Jehovah. The Christians now apply it to Jesus.

Acts 5:42
Every day ( $\pi \alpha \sigma \alpha v \eta \mu \varepsilon \rho \alpha v$ ). Accusative of extent of time, all through every day.
In the temple and at home ( $\varepsilon \nu \tau \omega \iota \rho \omega \kappa \alpha \kappa \alpha \tau^{\prime}$ оєкоv). This was a distinct triumph to go back to the temple where they had been arrested (verse 25) and at home or from house to house, as it probably means (cf. 2:46). It was a great day for the disciples in Jerusalem.

They ceased not (ovк $\varepsilon \pi \alpha v o v \tau o$ ). Imperfect middle. They kept it up.
Jesus as the Christ ( $\tau 0 v$ X $\rho \iota \sigma \tau o v$ I $\eta \sigma o v v$ ). Jesus is the direct object of the participles $\delta_{ı} \delta a \sigma \kappa о v \tau \varepsilon \varsigma$ (teaching) and $\varepsilon v a \gamma \gamma \varepsilon \lambda ı \zeta о \mu \varepsilon v o$ (preaching or evangelizing) while "the Christ"
 apostolic preaching as these opening chapters of Acts show, that Jesus of Nazareth is the Messiah of promise. Gamaliel had opened the prison doors for them and they took full advantage of the opportunity that now was theirs.

## Acts 6

Acts 6:1
When the number of the disciples was multiplying ( $\pi \lambda \eta \theta v v o v \tau \omega \nu \tau \omega \nu \mu \alpha \theta \eta \tau \omega v$ ). Genitive absolute of $\pi \lambda \eta \theta u v \omega$, old verb from $\pi \lambda \eta \theta$ oc, fulness, to increase. The new freedom from the intercession of Gamaliel was bearing rich fruit.

A murmuring of the Grecian Jews ( $\gamma \circ \gamma \gamma \nu \sigma \mu \circ \varsigma \tau \omega v \mathrm{H} \varepsilon \lambda \lambda \eta \nu I \sigma \tau \omega v$ ). Late onomatopoetic word (LXX) from the late verb $\gamma \circ \gamma \gamma \cup \zeta \omega$, to mutter, to murmur. The substantive occurs also in Joh 7:12; Php 2:14; 1Pe 4:9. It is the secret grumblings that buzz away till they are heard. These "Grecian Jews" or Hellenists are members of the church in Jerusalem who are Jews from outside of Palestine like Barnabas from Cyprus. These Hellenists had points of contact with the Gentile world without having gone over to the habits of the Gentiles, the Jews of the Western Dispersion. They spoke Greek.

Against the Hebrews ( $\pi \rho \circ$ os tov $E ß \rho a \iota o v \varsigma)$. The Jewish Christians from Jerusalem and Palestine. The Aramaean Jews of the Eastern Dispersion are usually classed with the Hebrew (speaking Aramaic) as distinct from the Grecian Jews or Hellenists.

Were neglected ( $\pi \alpha \rho \varepsilon \theta \varepsilon \omega \rho 0 \cup v \tau 0)$. Imperfect passive of $\pi \alpha \rho \alpha \theta \varepsilon \omega \rho \varepsilon \omega$, old verb, to examine things placed beside ( $\pi \alpha \rho \alpha$ ) each other, to look beyond ( $\pi \alpha \rho \alpha$ also), to overlook, to neglect. Here only in the N.T. These widows may receive daily ( $\kappa \alpha \theta \eta \mu \varepsilon \rho \iota \nu \eta$, late adjective from $\kappa \alpha \theta^{\prime} \eta \mu \varepsilon \rho \alpha v$, only here in the N.T.) help from the common fund provided for all who need it (Ac 4:32-37). The temple funds for widows were probably not available for those who have now become Christians. Though they were all Christians here concerned, yet the same line of cleavage existed as among the other Jews (Hebrew or Aramaean Jews and Hellenists). It is not here said that the murmuring arose among the widows, but because of them. Women and money occasion the first serious disturbance in the church life. There was evident sensitiveness that called for wisdom.

Acts 6:2
The multitude ( $\tau 0 \pi \lambda \eta \theta$ oऽ). The whole church, not just the 120 .
Fit ( $\alpha \rho \varepsilon \sigma \tau \sigma v$ ). Pleasing, verbal adjective from $\alpha \rho \varepsilon \sigma \kappa \omega$, to please, old word, but in the N.T. only here and Ac 12:3; Joh 8:29; 1Jo 3:22 . Non placet.

Should forsake ( $\kappa \alpha \tau \alpha \lambda \varepsilon ı \psi \alpha \tau \tau \varsigma)$. Late first aorist active participle for usual second aorist ката入ıлоv $\alpha \alpha$ from ката入 $\varepsilon \iota \pi \omega$, to leave behind.
 ( $\delta ı \alpha$ and kovıऽ, dust), to raise a dust in a hurry, to serve, to minister either at table (Joh 12:20 ), or other service (Joh 12:25f. ), to serve as deacon (1Ti 3:10,13). "Tables" here hardly means money-tables as in Joh 2:15, but rather the tables used in the common daily distribution of the food (possibly including the love-feasts, Ac 2:43-47). This word is the same root as

frequently used in the N.T. of ministers (preachers) than of deacons, but it is quite possible, even probable, that the office of deacon as separate from bishop or elder grew out of this incident in Ac 6:1-7. Furneaux is clear that these "seven" are not to be identified with the later "deacons" but why he does not make clear.

Acts 6:3
Of good report ( $\mu \alpha \rho \tau \cup \rho о \cup \mu \varepsilon v o v \varsigma$ ). Present passive participle of $\mu \alpha \rho \tau \nu \rho \varepsilon \omega$, to bear witness to. Men with a good reputation as well as with spiritual gifts (the Holy Spirit and wisdom).

We may appoint ( $\kappa \alpha \tau \alpha \sigma \tau \eta \sigma о \mu \varepsilon v$ ). Future active indicative of $\kappa \alpha \theta \iota \sigma \tau \eta \mu$, we shall appoint. The action of the apostles follows the choice by the church, but it is promised as a certainty, not as a possibility. The Textus Receptus has a first aorist active subjunctive here (катабт $\quad \sigma \omega \mu \varepsilon v$ ).

Acts 6:4
But we ( $\varepsilon \mu \varepsilon ા \varsigma \delta \varepsilon$ ). In contrast to the work given the seven.
 in verse 1 , but here about preaching as the special ministry with which the apostles were concerned. For "continue steadfastly" ( $\pi \rho о \sigma к а \rho \tau \varepsilon \rho \eta \sigma о \mu \varepsilon v$ ) see on 2:42.

Acts 6:5
Pleased ( $\eta \rho \varepsilon \sigma \varepsilon v$ ). Aorist active indicative of $\alpha \rho \varepsilon \sigma \kappa \omega$ like Latin placuit when a vote was taken. The use of $\varepsilon v \omega \pi \iota \circ v$ before "the whole multitude" is like the LXX.

They chose ( $\varepsilon \xi \varepsilon \lambda \varepsilon \xi \alpha \nu \tau 0)$. First aorist middle indicative of $\varepsilon \kappa \lambda \varepsilon \gamma \omega$, to pick out for oneself. Each one of the seven has a Greek name and was undoubtedly a Hellenist, not an Aramaean Jew. Consummate wisdom is here displayed for the murmuring had come from the Hellenists, seven of whom were chosen to take proper care of the widows of Hellenists. This trouble was settled to stay settled so far as we know. Nothing is here told of any of the seven except Stephen who is "a man full of faith and the Holy Spirit" and Nicolas "a proselyte of Antioch" (who was not then born a Jew, but had come to the Jews from the Greek world).

Acts 6:6
They laid their hands on them ( $\varepsilon \pi \varepsilon Ө \eta \kappa \alpha \nu \alpha v \tau о \iota \varsigma \tau \alpha \varsigma \chi \varepsilon \rho \alpha \varsigma)$. First aorist active indicative of $\varepsilon \pi \iota \tau \theta \eta \mu$. Probably by the apostles who ratified the choice (verse 3). The laying on of hands "was a symbol of the impartation of the gifts and graces which they needed to qualify them for the office. It was of the nature of a prayer that God would bestow the necessary gifts, rather than a pledge that they were actually conferred" (Hackett).

Acts 6:7
Increased ( $\eta \cup \xi \alpha v \varepsilon v$ ). Imperfect active, kept on growing all the more because the apostles were now relieved from the daily ministration of the food.

Multiplied ( $\varepsilon \pi \lambda \eta \theta$ vveto). Imperfect passive. The two imperfects kept pace with each other.

Of the priests ( $\tau \omega v{ }_{\varepsilon} \varepsilon \rho \omega v$ ). Who were usually Sadducees. It was a sad day for Annas and Caiaphas and all the sect of the Sadducees ( $5: 17$ ).

Were obedient to (vлףкоvov). Imperfect active of vлакоv $\omega$, repetition, one after another.

The faith ( $\tau \eta \pi / \sigma \tau \varepsilon$ ). Here meaning the gospel, the faith system as in Ro 1:5; Ga 1:23; Jude 1:3 , etc. Here the word means more than individual trust in Christ.

Acts 6:8
Wrought ( $\varepsilon \pi 0 เ \varepsilon)$. Imperfect active, repeatedly wrought. Evidently a man like Stephen would not confine his "ministry" to "serving tables." He was called in verse 5 "full of faith and the Holy Spirit." Here he is termed "full of grace (so the best MSS., not faith) and power." The four words give a picture of remarkable attractiveness. The grace of God gave him the power and so "he kept on doing great wonders and signs among the people." He was a sudden whirlwind of power in the very realm of Peter and John and the rest.

Acts 6:9
The synagogue of the Libertines ( $\varepsilon \kappa \tau \eta \varsigma \sigma \nu v \alpha \gamma \omega \gamma \eta \varsigma \tau \eta \varsigma \lambda \varepsilon \gamma \circ \mu \varepsilon \nu \eta \varsigma \Lambda \perp \beta \varepsilon \rho \tau \iota v \omega v$ ). The Libertines (Latin libertinus, a freedman or the son of a freedman) were Jews, once slaves of Rome (perhaps descendants of the Jews taken to Rome as captives by Pompey), now set free and settled in Jerusalem and numerous enough to have a synagogue of their own. Schuerer calls a Talmudic myth the statement that there were 480 synagogues in Jerusalem. There were many, no doubt, but how many no one knows. These places of worship and study were in all the cities of the later times where there were Jews enough to maintain one. Apparently Luke here speaks of five such synagogues in Jerusalem (that of the Libertines, of the Cyrenians, of the Alexandrians, of Cilicia, and of Asia). There probably were enough Hellenists in Jerusalem to have five such synagogues. But the language of Luke is not clear on this point. He may make only two groups instead of five since he uses the article $\tau \omega v$ twice
 Aбıa¢). He also changes from the genitive plural to $\alpha \pi$ o before Cilicia and Asia. But, leaving the number of the synagogues unsettled whether five or two, it is certain that in each one where Stephen appeared as a Hellenist preaching Jesus as the Messiah he met opposition. Certain of them "arose" ( $\alpha v \varepsilon \sigma \tau \eta \sigma \alpha v$ ) "stood up" after they had stood all that they could from Stephen, "disputing with Stephen" ( $\sigma v \vee \zeta \eta \tau 0 \nu v \tau \varepsilon \varsigma \tau \omega \Sigma \tau \varepsilon \varphi \alpha v \omega)$. Present active participle of $\sigma 0 \vee \zeta \eta \tau \varepsilon \omega$, to question together as the two on the way to Emmaus did (Lu 24:15). Such interruptions were common with Jews. They give a skilled speaker great opportunity for reply if he is quick in repartee. Evidently Stephen was fully equipped for the emergency. One of their synagogues had men from Cilicia in it, making it practically certain that young Saul of Tarsus, the brilliant student of Gamaliel, was present and tried his wits with Stephen. His ignominious defeat may be one explanation of his zest in the stoning of Stephen (Ac 8:1).

Acts 6:10

They were not able to withstand (ovk $\sigma \chi \chi v o v \alpha v \tau ı \sigma \tau \eta v \alpha$ ). Imperfect active of $\sigma \chi \chi \omega$, to have strength, and ingressive second aorist active (intransitive) infinitive of $\alpha \nu \theta \iota \sigma \tau \eta \mu$. They continued unable (without strength enough) to take a stand against. Stephen knocked them down, Saul included, as fast as they got up. Stephen was like a battery charged and in action.

The wisdom and spirit ( $\tau \eta \sigma о \varphi ı \alpha \kappa \alpha \pi \nu \varepsilon \nu \mu \alpha$ ). Dative case. They stood up against Stephen's wisdom and the Holy Spirit "by whom he spoke" ( $\omega \varepsilon \lambda \alpha \lambda \varepsilon$ ). Instrumental case and the relative agrees with "Spirit." He kept on speaking so ( $\varepsilon \lambda \alpha \lambda \varepsilon$, imperfect active). It was a desperate situation.

Acts 6:11
Then they suborned men ( $\tau \circ \tau \varepsilon v \pi \varepsilon \beta \alpha \lambda o v \alpha v \delta \rho a \varsigma)$. Second aorist active indicative of $v \pi \circ \beta \alpha \lambda \lambda \omega$, old verb, but here only in the N.T., to put under like a carpet, to bring men under one's control by suggestion or by money. One recalls the plight of Caiaphas in the trial of Jesus when he sought false witnesses. Subornaverunt. They put these men forward in an underhand way for fraud.
 The punishment for blasphemy was stoning to death. See Mt 12:31 for discussion of the word $\beta \lambda \alpha \sigma \varphi \eta \mu \alpha, \beta \lambda \alpha \sigma \varphi \eta \mu \varepsilon \omega, \beta \lambda \alpha \sigma \varphi \eta \mu \circ \varsigma$, all in the N.T. from $\beta \lambda \alpha \pi \tau \omega$, to harm, and $\varphi \eta \mu \eta$, speech, harmful speech, or $\beta \lambda \alpha \xi$, stupid, and $\varphi \eta \mu \eta$. But the charge against Stephen was untrue. Please note that Moses is here placed before God and practically on a par with God in the matter of blasphemy. The purpose of this charge is to stir the prejudices of the people in the matter of Jewish rights and privileges. It is the Pharisees who are conducting this attack on Stephen while the Sadducees had led them against Peter and John. The position of Stephen is critical in the extreme for the Sadducees will not help him as Gamaliel did the apostles.

Acts 6:12
They stirred up the people ( $\sigma 0 v \varepsilon \kappa เ v \eta \sigma \alpha v$ tov $\lambda \alpha o v$ ). They shook the people together like an earthquake. First aorist active indicative of $\sigma v v \kappa ı v \varepsilon \omega$, to throw into commotion. Old verb, but here only in the N.T. The elders and the scribes (Pharisees) are reached, but no word about the Sadducees. This is the first record of the hostility of the masses against the disciples (Vincent).

Came upon him ( $\varepsilon \pi เ \sigma \tau \alpha v \tau \varepsilon \varsigma) . ~ S e c o n d ~ a o r i s t ~(i n g r e s s i v e) ~ a c t i v e ~ p a r t i c i p l e ~ o f ~ \varepsilon \varphi ı \sigma \tau \eta \mu . ~$ Rushed at him.

Seized ( $\sigma \cup v \eta \rho \pi \alpha \sigma \alpha v)$. Effective aorist active of $\sigma \cup v \alpha \rho \pi \alpha \zeta \omega$ as if they caught him after pursuit.

Acts 6:13
False witnesses ( $\mu \alpha \rho \tau \cup \rho \alpha \varsigma ~ \psi \varepsilon v \delta \varepsilon ı \varsigma)$. Just as Caiaphas did with Jesus.
Ceaseth not (ov $\pi \alpha \cup \varepsilon \tau \alpha)$. Wild charge just like a false witness that Stephen talks in the synagogues against the law and the holy temple.

## Acts 6:14

 evidently wrong. Curiously like the charge brought against Jesus before Caiaphas that he would destroy the temple and build it again in three days. Undoubtedly Stephen had said something about Christianity before as meant for others besides Jews. He had caught the spirit of Jesus about worship as shown to the woman at Sychar in Joh 4 that God is spirit and to be worshipped by men anywhere and everywhere without having to come to the temple in Jerusalem. It was inflammable material surely and it was easy to misrepresent and hard to clear up.

This Jesus of Nazareth (I $\eta$ бovc o Na̧ $\omega$ рaıoc outoc). With contempt.
Acts 6:15
As if the face of an angel ( $\omega \sigma \varepsilon \pi \rho \circ \sigma \omega \pi \pi \sigma$ a $\gamma \gamma \varepsilon \lambda o v)$. Even his enemies saw that, wicked as they were. See Ex 34:30 for the face of Moses when he came down from Sinai (2Co 3:7). Page quotes Tennyson: "God's glory smote him on the face." Where were Peter and John at this crisis? Apparently Stephen stands alone before the Sanhedrin as Jesus did. But he was not alone for he saw Jesus standing at the right hand of God (Ac 7:56). There was little that Peter and John could have done if they had been present. Gamaliel did not interpose this time for the Pharisees were behind the charges against Stephen, false though they were as Gamaliel could have found out.

## Acts 7

Acts 7:1
Are these things so? ( $\varepsilon \tau \alpha v \tau \alpha$ out $\omega \varsigma \varepsilon \chi \varepsilon$ ). On this use of $\varepsilon$ in a direct question see on 1:6. Literally "Do these things hold thus?" A formal question by the high priest like our "Do you plead guilty, or not guilty?" (Furneaux). The abrupt question of the high priest would serve to break the evident spell of the angelic look on Stephen's face. Two charges had been made against Stephen (1) speaking against the holy temple, (2) changing the customs which Moses had delivered. Stephen could not give a yes or no answer to these two charges. There was an element of truth in each of them and a large amount of error all mixed together. So he undertakes to explain his real position by the historical method, that is to say, by a rapid survey of God's dealing with the people of Israel and the Gentiles. It is the same method adopted by Paul in Pisidian Antioch (Ac 13:16ff. ) after he had become the successor of Stephen in his interpretation of the universal mission of Christianity. If one is disposed to say that Luke made up this speech to suit Stephen's predicament, he has to explain how the style is less Lukan than the narrative portions of Acts with knowledge of Jewish traditions that a Greek would not be likely to know. Precisely how Luke obtained the data for the speech we do not know, but Saul heard it and Philip, one of the seven, almost certainly. Both could have given Luke help about it. It is even possible that some one took notes of this important address. We are to remember also that the speech was interrupted at the end and may not include all that Stephen meant to say. But enough is given to give us a good idea of how Stephen met the first charge "by showing that the worship of God is not confined to Jerusalem or the Jewish temple" (Page). Then he answers the second charge by proving that God had many dealings with their fathers before Moses came and that Moses foretold the coming of the Messiah who is now known to be Jesus. It is at this point (verse 51) that Stephen becomes passionate and so powerful that the wolves in the Sanhedrin lose all selfcontrol. It is a great and masterful exposition of the worldwide mission of the gospel of Christ in full harmony with the Great Commission of Christ. The apostles had been so busy answering the Sadducees concerning the Resurrection of Christ and maintaining their freedom to teach and preach that they had not pushed the world-wide propaganda of the gospel as Jesus had commanded after they had received the Promise of the Father. But Stephen had proclaimed the same message of Christ and was now facing the same fate. Peter's mind had been enlightened by the Holy Spirit so that he could rightly interpret Joel and David in the light of Pentecost. "So Stephen read the history of the Old Testament with new eyes in the light of the life and death of Jesus" (Furneaux).

Acts 7:2
Brethren and fathers ( $\alpha \nu \delta \rho \varepsilon \varsigma ~ \alpha \delta \varepsilon \lambda \varphi о к \alpha \pi \alpha \tau \varepsilon \rho \varepsilon \varsigma)$. The spectators (brethren) and members of the Sanhedrin (fathers) as Paul in Ac 22:1 .

Hearken ( $\alpha \kappa 0 v \sigma \alpha \tau \varepsilon$ ). First aorist (ingressive) active imperative, Give me your attention now.

The God of glory (Ho $\theta \varepsilon$ оऽ $\tau \eta \varsigma \delta o \xi \eta \varsigma)$. The God characterized by glory (genitive case, genus or kind) as seen in the Shekinah, the visible radiance of God. Jesus is also called "the Glory"=the Shekinah in Jas 2:1 . Cf. Ex 25:22; 40:34; Le 9:6; Heb 9:5. By these words Stephen refutes the charge of blasphemy against God in Ac 6:11.

Appeared $(\omega \varphi \theta \eta)$. First aorist passive indicative of o $\rho \alpha \omega$. See on $\operatorname{Lu} 23: 43$. Before there was temple or tabernacle and away over in Mesopotamia (Ur of the Chaldees, Ge 11:31), even before ( $\pi \rho \iota \nu \eta$ with the infinitive) he dwelt in Haran (X $\alpha \rho \rho \alpha \nu$, or Carrae not far from Edessa, where Crassus met death after his defeat by the Parthians B.C. 53).

Acts 7:3
Which I shall shew thee ( $\eta \nu \alpha \nu \sigma o \delta \varepsilon \varepsilon \xi \omega$ ). Indefinite relative clause with $\alpha v$ and the aorist active subjunctive (same form in first person singular as the future active indicative). Abraham followed on as God led him.

Acts 7:4
When his father was dead ( $\mu \varepsilon \tau \alpha$ тo $\alpha \pi о \theta a v \varepsilon \iota v \alpha \cup \tau o v)$. Meт $\alpha$ with the accusative of the articular infinitive and the accusative of general reference ( $\alpha v \tau o v$ ), regular Greek idiom. In Ge 11:32 it is stated that Terah died at Haran at the age of 205. There are various explanations of the discrepancy, but no one that seems certain. It is possible (Hackett, Felten) that Abraham is mentioned first in Ge 11:26 because he became the most prominent and was really younger than Haran his brother who died before the first migration who was really sixty years older than Abraham. According to this view Terah was 130 years old at the birth of Abraham, leaving Abraham 75 at the death of Terah (205).

Wherein ye now dwell ( $\varepsilon \iota \varsigma \eta \nu v \mu \varepsilon ı \varsigma \nu v \nu$ катоוк $\downarrow \iota \tau)$. Note $\varepsilon \iota \varsigma$ in the sense of $\varepsilon \nu$ as often. Note also emphatic use of $v \mu \varepsilon ı \varsigma$ (ye) and now ( $\nu v \nu$ ).

Acts 7:5
Not so much as to set his foot on (ov $\delta \varepsilon \beta \eta \mu \alpha \pi o \delta o \varsigma)$. From De 2:5. Old word from $\beta \alpha ı v \omega$, to go, to step. "Stepping of a foot," only instance of this original meaning in the N.T. From this it comes to mean a platform reached by steps, official seat of a judge (Mt 27:19). The field purchased by Abraham (Ge 23:9-17) was not a gift from God.

Promised ( $\varepsilon \pi \eta \gamma \gamma \varepsilon ו \lambda \alpha \tau o$ ). First aorist middle indicative of $\varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$, common verb. See Ge 12:7; 17:8; 48:4 for this promise. So God appeared again to Abraham in a strange land.

In possession ( $\varepsilon \iota \varsigma \kappa \alpha \tau \alpha \sigma \chi \varepsilon \sigma \iota v$ ). Late word, in LXX, and in N.T. only here and verse 45. From $\kappa a \tau \chi \omega$, to hold back, then to hold fast (or down), to possess. It was fulfilled in the descendants of Abraham.

When as yet he had no child (оик оvтоৎ $\alpha \cup \tau \omega \tau \varepsilon \kappa v o v)$. Genitive absolute with negative ouk rather than $\mu \eta$ to emphasize actual absence of a child. He had only the promise of God about the land and the child.

Acts 7:6
On this wise (out $\omega \varsigma$ ). A free quotation from Ge 15:13.
Should sojourn ( $\varepsilon \sigma \tau \alpha \pi \alpha \rho о к о v)$. Shall be a sojourner, Пароькоऽ ( $\pi \alpha \rho \alpha$, beside, оккос, home), one dwelling near one's home, but not of it, so a stranger, foreigner, old word, often in LXX, temporary residence without full rights of citizenship (7:29; 13:17) , and descriptive of Christians (Eph 2:19; 1Pe 1:17; 2:11).

In a strange land ( $\varepsilon v \gamma \eta \alpha \lambda \lambda o \tau \rho ı \alpha)$. In a land not one's own, that belongs to another, alien as in Mt 17:25f. , which see.

Four hundred years ( $\varepsilon \tau \eta \tau \varepsilon \tau \rho \alpha \kappa о \sigma i \alpha)$. Accusative of duration of time. As in Ge 15:13 , but a round number as in Ex 12:40 the time is 430 years. But in Ga 3:17 Paul, following the LXX in Ex 12:40, takes the 430 years to cover the period in Canaan and the stay in Egypt, cutting the sojourn in Egypt to about half. Josephus gives it both ways. Hackett suggests two solutions, one that there were two ways of reckoning the period among the Jews with no way of settling it, the other that by the 430 years in Egypt the writers meant to include Canaan also as merely the preliminary to the period in Egypt.

Acts 7:7
Will I judge ( $\kappa \rho \iota v \omega \varepsilon \gamma \omega$ ). Future (accent on $\omega$ ) active indicative of $\kappa \rho \iota \omega \omega$ and $\varepsilon \gamma \omega$ (I) expressed is emphatic.

In this place ( $\varepsilon \nu \tau \omega \tau 0 \pi \omega \tau 0 v \tau \omega)$. Quoted from Ex 3:12 and referring to Sinai or Horeb, but Stephen applies it to the Promised Land.

Acts 7:8
The covenant of circumcision ( $\delta \iota \alpha \theta \eta \kappa \eta \nu \pi \varepsilon \rho \iota \tau \circ \mu \eta \varsigma)$. A covenant marked by (genitive) circumcision (no article) of which circumcision is the sign (Ro 4:11) as set forth in Ge 17:9-14. In the ancient Greek $\delta \iota \alpha \theta \eta \kappa \eta$ was usually will (Latin, testamentum) and $\sigma \cup v \theta \eta \kappa \eta$ was used for covenant ( $\sigma u v$, together, rather than $\delta ı a$, between). But the LXX and the N.T. use $\delta \iota \alpha \theta \eta \kappa \eta$ for covenant (will in Heb 9:15f. ) as Lightfoot on Ga 3:16 says: "The LXX translation and New Testament writers probably preferred $\delta \iota \alpha \theta \eta \kappa \eta$ as better expressing the
free grace of God than $\sigma v v \theta \eta \kappa \eta$."
And so ( $\kappa \alpha$ out $\omega \varsigma$ ). After the covenant was made and as a sign and seal of it.
Acts 7:9
Moved with jealousy ( $\zeta \eta \lambda \omega \sigma \alpha \nu \tau \varepsilon \varsigma)$. First aorist active participle of $\zeta \eta \lambda o \omega$, old verb from $\zeta \eta \lambda$ oৎ ( $\operatorname{Ac} 5: 17$ ), to burn or boil with zeal, and then with envy as here ( 17:5, etc.) and Ge 37:11.

Acts 7:10

Delivered him out ( $\varepsilon \xi \varepsilon ı \lambda \alpha \tau 0 \alpha \tau \tau 0 \nu \varepsilon \kappa$ ). First aorist middle indicative of $\varepsilon \xi \alpha\llcorner\rho \varepsilon \omega$, old verb to take out, snatch out. Note repetition of $\varepsilon \kappa$.

Pharaoh King of Egypt ( $\Phi \alpha \rho \alpha \omega \beta \alpha \sigma \lambda \lambda \varepsilon \omega \varsigma$ Aı $\gamma \cup \pi \tau \sigma v$ ). Pharaoh is not a name, but a title, the Egyptian per $\mathbb{Z}$ meaning great house.

Acts 7:11
Found no sustenance (ov $\eta$ טpıбкоv $\chi$ о $\rho \tau \alpha \sigma \mu \alpha \tau \alpha$ ). Imperfect active, kept on not finding.

Chortasmata is from
chortazo , originally to feed with grass ( $\chi$ ортоৎ) or herbs. Old word, but only here in the N.T. and includes food for both men and animals. In Ge 24:25,32 it is fodder for the cattle, a first necessity for owners of herds of cattle.

Acts 7:12
That there was corn (ov $\tau \alpha \sigma \iota \tau \alpha)$. Participle (present active of $\varepsilon \mu$ ) in indirect discourse, after aкоибац, "heard of corn being in Egypt." $\sum_{\imath \tau \iota}$ is diminutive of бıtoc and means grain (wheat, barley, not our maize or Indian corn), old word also for provisions, victuals, here only in the N.T.

The first time ( $\pi \rho \omega \tau \tau v$ ). While Jacob himself remained in Canaan before he went down to Egypt and died there (verse 15f. ).

Acts 7:13
At the second time $(\varepsilon v \tau \omega \delta \varepsilon u \tau \varepsilon \rho \omega)$. This expression only here in the N.T. This second visit is recorded in Ge 45:1f. .

Became manifest ( $\varphi a v \varepsilon \rho o v \varepsilon \gamma \varepsilon v \varepsilon \tau 0)$. In Ge 41:12 the fact that Joseph was a Hebrew had been incidentally mentioned to Pharaoh, but now it was made clear to him.

Acts 7:14
Three-score and fifteen souls ( $\varepsilon v \psi v \chi \alpha \iota \varsigma \varepsilon \beta \delta о \mu \eta \kappa о v \tau \alpha \pi \varepsilon v \tau \varepsilon$ ). Stephen follows the LXX which counts some grandchildren of Joseph and so makes it 75 whereas Ge 46:26 has 66 and then the next verse makes it 70 including Jacob and Joseph with his two sons. The use of $\varepsilon v$ means "consisting in."

Acts 7:16
They were carried over unto Shechem ( $\mu \varepsilon \tau \varepsilon \tau \varepsilon \theta \eta \sigma \alpha v \varepsilon \iota \varsigma \Sigma u \chi \varepsilon \mu$ ). First aorist passive of $\mu \varepsilon \tau \alpha \tau \iota \theta \eta \mu$, only here in the N.T. in this sense of changing places. Jacob was buried in the cave of Machpelah (Ge 50:13 ). The O.T. does not say where the sons of Jacob were buried save that Joseph was buried in Shechem (Jos 24:32). Possibly only "our fathers" without Jacob is the subject of "were carried."

Which Abraham bought ( $\omega \omega v \eta \sigma \alpha \tau o ~ A \beta \rho \alpha \alpha \mu$ ). Hackett is sure that our present text is wrong. Hort notes some sixty "primitive errors" in the critical text of the N.T. It is possible that this is also one. If "Jacob" is substituted for "Abraham," the matter is cleared up. "It is quite as likely, judging a priori, that the word producing the error escaped from some early
copyist as that so glaring an error was committed by Stephen" (Hackett). At any rate Abraham bought a burying-place, the cave of Machpelah, from Ephron the Hittite at Hebron (Ge 23:16 ), while Jacob bought a field from the sons of Hamor at Shechem (Ge 33:19; Jos 24:32 ). Abraham had built an altar at Shechem when he entered Canaan (Ge 12:6f. ). It is possible, of course, that Abraham also bought the ground on which the altar stood.

In Shechem ( $\varepsilon \nu \Sigma v \chi \varepsilon \mu)$. This is the reading of Aleph B C instead of the Textus Receptus тov $\Sigma v \chi \varepsilon \mu$ which makes it "Hamar the father of Sichem." "In Shechem" is the true reading.

Acts 7:17
Drew nigh ( $\eta \gamma \gamma \zeta \zeta \varepsilon \nu$ ). Imperfect active, was drawing nigh.
Acts 7:18
Another king ( $\beta a \sigma 1 \lambda \varepsilon v \varsigma \varepsilon \tau \varepsilon \rho \circ \varsigma)$. A different kind of king also, probably a king of the new dynasty after the shepherd kings had been expelled from Egypt.

Who knew not Joseph (oৎ ouk $\eta \iota \delta \varepsilon$ tov $\mathrm{I} \omega \sigma \eta \varphi$ ). Second past perfect of oi $\delta \alpha$ used like an imperfect. Joseph's history and services meant nothing to the new king. "The previous dynasty had been that of the Hyksos: the new king was Ahmes who drove out the Hyksos" (Knobel).

Acts 7:19
 compound (ката and $\sigma о \varphi \iota \zeta \omega$, old verb, to make wise, to become wise, then to play the sophist), perfective use of кata. In the LXX, but here only in the N.T. To use fraud, craft, deceit.

That they should cast out their babes ( $\tau \circ v \pi о \varepsilon \varepsilon เ v \tau \alpha \beta \rho \varepsilon \varphi \eta \eta \kappa \theta \varepsilon \tau \alpha$ ). Tov $\pi о \varepsilon \varepsilon เ v$ (genitive of the articular present infinitive) can be either design or result. The Revised Version here takes it as purpose while the Authorized as result. In either case Pharaoh required the Israelites to expose their children to death, a possible practice done voluntarily in heathen China and by heathen in so-called Christian lands. But the Israelites fought against such an iniquity. The word $\varepsilon \kappa \theta \varepsilon \tau \alpha$ (exposed, cast out) is a verbal adjective from $\varepsilon \kappa \tau \iota \theta \eta \mu$. It is an old word, but here only in the N.T. and not in the LXX.

To the end they might not live ( $\varepsilon ı \varsigma ~ \tau о ~ \mu \eta \zeta \omega о ү о v \varepsilon ı \sigma \theta \alpha$ ). Purpose with $\varepsilon \varsigma \varsigma$ and the articular infinitive (present middle). This compound verb is from $\zeta \omega 0 \gamma 0 v o \varsigma ~(f r o m ~ \zeta \omega 0 \varsigma$, alive, and $\gamma \varepsilon \nu \omega$, to bear) and is used by late writers and the LXX. It is three times in the N.T. (here, Lu 17:33; 1 Ti 6:13 ) in the sense to preserve alive.

## Acts 7:20

Exceeding fair ( $\alpha \sigma \tau \varepsilon 1 \circ \varsigma \tau \omega \theta \varepsilon \omega$ ). Ethical dative, fair to God (as God looked at him). A $\sigma \tau \varepsilon \circ \rho$ is from $\alpha \sigma \tau v$, city, and so means "of the city," with city manners and polish. Old word, only twice in the N.T. (here and Heb 11:23) and both times about Moses and taken from Ex 2:2.

He was nourished ( $\alpha v \varepsilon \tau \rho \alpha \varphi \eta$ ). Second aorist passive indicative of $\alpha v \alpha \tau \rho \varepsilon \varphi \omega$. He was brought up at home for three months in defiance of the new Pharaoh.

Acts 7:21
When he was cast out ( $\varepsilon \kappa \tau \varepsilon \theta \varepsilon v \tau \circ \varsigma \alpha \tau \tau o v)$. Genitive absolute with first aorist passive participle of $\varepsilon \kappa \tau \iota \theta \eta \mu$.

Took up ( $\alpha v \varepsilon ı \lambda \alpha \tau o$ ). Second aorist middle indicative (with first aorist vowel $\alpha$ instead of $\varepsilon$ as often in the Koine) of avaı $\varepsilon \omega$, common in the N.T. in the sense of take up and make away with, to kill as in verse 28 , but here only in the N.T. in the original sense of taking up from the ground and with the middle voice (for oneself). Quoted here from Ex 2:5. The word was used of old for picking up exposed children as here. Vincent quotes Aristophanes (Clouds, 531): "I exposed (the child), and some other women, having taken it, adopted (aveı入عтo) it." Vulgate has sustulit. "Adopted" is the idea here. "After the birth of a child the father took it up to his bosom, if he meant to rear it; otherwise it was doomed to perish" (Hackett).

Nourished him for her own son ( $\alpha v \varepsilon \theta \rho \varepsilon \psi a \tau o$ avtov $\varepsilon \alpha v \tau \eta \varepsilon$ ยı vıov). Literally, "she nursed him up for herself ( $\varepsilon \alpha v \tau \eta$ besides middle voice) as a son." This use of $\varepsilon ו \varsigma=$ as occurs in the old Greek, but is very common in the LXX as a translation of the Hebrew le. The tradition is that she designed Moses for the throne as the Pharaoh had no son (Josephus, Ant. ii. 9, 7).

Acts 7:22
Was instructed $(\varepsilon \pi \alpha \iota \delta \varepsilon v \theta \eta)$. First aorist passive indicative of $\pi \alpha \iota \delta \varepsilon v \omega$, to train a child ( $\pi \alpha ı \varsigma$ ), the usual idea in ancient Greek as here. The notion of chastisement (Heb 12:6) is also in the old Greek and especially in the LXX and the N.T. Here with instrumental case ( $\pi \alpha \sigma \eta \sigma о \varphi \iota \alpha$ ) or the locative. The accusative would usually be retained after this verb. The priestly caste in Egypt was noted for their knowledge of science, astronomy, medicine, and mathematics. This reputation was proverbial (1Ki 4:30). Modern discoveries have thrown much light on the ancient civilization of Egypt. Moses, like Paul, was a man of the schools.

Mighty in his words and works ( $\delta v v a \tau о \varsigma \varepsilon v \lambda о \gamma о \iota \kappa \kappa \alpha \rho \gamma о \iota \varsigma \alpha v \tau о v$ ). The same phrase used of Jesus in Lu 24:19. The adjective $\delta v v a \tau o \varsigma$ is employed of Apollos as an interpreter of the Scriptures (Ac 18:24). Moses did not have the rhetorical skill or eloquence of Aaron (Ex 4:10), but his words like his deeds carried weight and power.

## Acts 7:23

When he was well-nigh forty years old ( $\mathrm{H} \omega \varsigma \varepsilon \pi \lambda \eta \rho о v \tau o ~ \alpha v \tau \omega \tau \varepsilon \sigma \sigma \alpha \rho \alpha \kappa о \nu \tau \alpha \varepsilon \tau \eta \varsigma$ $\chi \rho o v o \varsigma)$. A rather awkward Greek idiom for the English: "When a forty year old time (same idiom in Ac 13:18 and only twice in the N.T.) was being fulfilled ( $\varepsilon \pi \lambda \eta \rho o v \tau o$, imperfect passive) for him (dative case)." The life of Moses is divided into three periods of forty years each (in Egypt 40 years, in Midian 40, governed Israel 40, 120 when he died, De 34:7 ).

It came into his heart ( $\alpha v \varepsilon \beta \eta \varepsilon \pi \tau \eta \nu \kappa \alpha \rho \delta \iota \alpha v \alpha v \tau o v)$. Second aorist active indicative of $\alpha v \alpha \beta \alpha \iota v \omega$, common verb. Came up as if from the lower deeps of his nature. This Hebrew image occurs in Jer 3:16; Isa 65:17; 1Co 2:9.

To visit ( $\varepsilon \pi \iota \sigma \kappa \varepsilon \psi \alpha \sigma \theta \alpha$ ). First aorist middle infinitive of $\varepsilon \pi \iota \sigma \kappa \varepsilon \pi \tau \circ \mu \alpha$, old verb to go to see for oneself, with his own eyes, to help if possible. Used of God visiting his people (Lu 7:16 ). Our "visit" is from Latin video, to see, visito, to go to see. During the Welsh mining troubles the Prince of Wales made a sympathetic visit to see for himself the actual condition of the coal miners. Moses desired to know first hand how his kinsmen were faring.

Acts 7:24
Suffer wrong ( $\alpha \delta \iota \kappa о \cup \mu \varepsilon v o v$ ). Present passive participle of $\alpha \delta \iota \kappa \eta$. By blows (Ex 2:11 ).

Avenged ( $\varepsilon \pi о \not \eta \sigma \varepsilon v \varepsilon \kappa \delta \iota \kappa \eta \sigma \iota v$ ). First aorist active indicative of $\pi \sigma \iota \varepsilon \omega$. This idiom occurs in Lu 18:7 with $\varepsilon \kappa \delta \iota \kappa \eta \sigma \iota v$ (this from $\varepsilon \kappa \delta \iota \kappa \varepsilon \omega$ and that from $\varepsilon \kappa \delta \iota \kappa о \varsigma$ without right or law $\delta ı \kappa \eta$ and then exacting law of right out of $\varepsilon \kappa$ one, exacting vengeance).

Him that was oppressed ( $\tau \omega \kappa \alpha \tau \alpha \pi \sigma \nu o v \mu \varepsilon \nu \omega)$. Present passive articular participle in the dative case of ката兀оveo, to tire down with toil, to treat roughly, common in late Greek, in the N.T. only here and $2 \mathrm{Pe} 2: 7$ (sore distressed). The man was on the point of being overcome.

Smiting $(\pi \alpha \tau \alpha \xi \alpha \varsigma)$. First aorist active participle of $\pi \alpha \tau \alpha \sigma \sigma \omega$, in the old Greek the beat of the heart, only in the LXX and N.T. to smite a deadly blow as here like $\pi \lambda \eta \sigma \sigma \omega$.

Acts 7:25
He supposed ( $\varepsilon v o \mu i \zeta \varepsilon v$ ). Imperfect active of $v o \mu \iota \zeta \omega$. He was supposing, Stephen explains, when he smote the Egyptian.

That his brethren understood ( $\sigma v \vee \varepsilon v \alpha$ тovৎ $\alpha \delta \varepsilon \lambda \varphi o v \varsigma)$. Present active infinitive of $\sigma v v i \eta \mu$, to send (put) together, to grasp, to comprehend, in indirect discourse with the accusative of general reference.

By his hand was giving them deliverance ( $\delta \iota \alpha \chi \varepsilon \iota \rho \circ \varsigma \alpha v \tau \circ v \delta \iota \delta \omega \sigma \iota v \sigma o \tau \eta \rho \iota \alpha v \alpha v \tau \circ \iota)$. Picturesque use of "hand" as in 2:23, present active indicative of $\delta \iota \omega \mu$ retained in indirect discourse after imperfect $\varepsilon v o \mu \iota \zeta \varepsilon v$. But they understood not (o $\delta \varepsilon$ ov $\sigma v \nu \eta \kappa \alpha v$ ). Page notes "the rhetorical power of these words" from Stephen. $\Sigma v \nu \eta \kappa \alpha \nu$ (first aorist indicative, $\kappa$ aorist) refers to $\sigma u v i \varepsilon v a$ just before.

Acts 7:26
The day following ( $\tau \eta \varepsilon \pi \iota o v \sigma \eta \eta \mu \varepsilon \rho \alpha$ ). Locative case, "on the following day" (from $\varepsilon \pi \varepsilon \mu$, to come upon, to approach, present active participle $\varepsilon \pi \iota \omega v-o v \sigma \alpha,-o v)$. Common phrase in old Greek both with $\eta \mu \varepsilon \rho \alpha$ (day) as here and without as 16:11. Only in Acts in the N.T.

Appeared $(\omega \varphi \theta \eta)$. First aorist passive indicative of o $\rho a \omega$ not with idea that only a vision but rather that it was sudden or unexpected.

As they strove ( $\mu \alpha \chi \circ \mu \varepsilon v o i \varsigma)$. Present middle participle of $\mu \alpha \chi \circ \mu \alpha$, actually fighting.
Would have set them at one again ( $\sigma \sim v \eta \lambda \lambda \alpha \sigma \sigma \varepsilon v$ autovৎ $\varepsilon \iota \varsigma \varepsilon \mid \rho \eta \nu \varepsilon v$ ). Better, he tried to reconcile them (or change them into peace). It is the conative imperfect active as in Mt 3:14 of $\sigma v v a \lambda \lambda \alpha \sigma \sigma \omega$, only here in the N.T. though common in the old Greek. Vulgate has reconciliabat. The usual word in the N.T. for reconcile is кат $\alpha \lambda \lambda \alpha \sigma \sigma \omega$.

Do ye wrong one to another ( $\alpha \delta$ бкєıt $\alpha \lambda \lambda \eta \lambda$ ouc). The same word used in verse 24 of the wrong done one of the Hebrews by the Egyptian, but here both are "brethren."

Acts 7:27
Thrust him away ( $\alpha \pi \omega \sigma \alpha \tau 0$ avtov). First aorist middle indicative (Koine for Attic $\alpha \pi \varepsilon \omega \sigma \alpha \tau 0)$ of $\alpha \pi \omega \theta \varepsilon \omega$, to push away from oneself in middle voice as here, common in old Greek. Again in verse 39; 13:46; Ro 11:1; 1Ti 1:19. It is always the man who is doing the wrong who is hard to reconcile.

Acts 7:28
Wouldest thou kill me? ( $\mu \eta \alpha v \varepsilon \lambda \varepsilon เ v \mu \varepsilon \sigma v \theta \varepsilon \lambda \varepsilon เ \varsigma)$. Expecting the answer no, but a thrust direct at Moses, Do you wish to kill me (note $\mu \varepsilon \sigma v$ right together,
me thou ). See Ex 2:14 quoted by Stephen.
Acts 7:29
Sojourner (ларонкос). Temporary dweller (cf. Abraham in verse 6) in Midian though for forty years.

Acts 7:30
Sentence begins with genitive absolute again.
In a flame of fire in a bush ( $\varepsilon v \varphi \lambda о \gamma \pi v \rho o s \beta \alpha \tau o v)$. Horeb in Ex 3:1; but Sinai and Horeb were "probably peaks of one mountain range" (Page), Horeb "the mountain of the dried-up ground," Sinai "the mountain of the thorns." Literally, "in the flame of fire of a bush" (two genitives, $\pi \cup \rho o \varsigma$ and $\beta a \tau o v$ dependent on $\varphi \lambda 0 \gamma$, flame). Descriptive genitives as in 9:15; 2Th 1:8. Batoc (bush) is the wild acacia (mimosa nilotica). In Ex 3:20 it is Jehovah who speaks. Hence "angel" here with Stephen is understood to be the Angel of the Presence, the Eternal Logos of the Father, the Angel of Jehovah.

Acts 7:31
The sight ( $\tau$ о о $\rho \mu \alpha$ ). Used of visions in the N.T. as in Mt 17:9.
As he drew near ( $\pi \rho о \sigma \varepsilon \rho \chi о \mu \varepsilon v o v ~ \alpha v \tau о v)$. Genitive absolute with present middle participle of $\pi \rho о \sigma \varepsilon \rho \chi о \mu \alpha$.

A voice of the Lord ( $\varphi \omega \vee \eta \kappa \nu \rho \circ \rho v$ ). Here the angel of Jehovah of verse 30 is termed Jehovah himself. Jesus makes powerful use of these words in his reply to the Sadducees in defence of the doctrine of the resurrection and the future life (Mr 12:26; Mt 22:32; Lu 20:37f. ) that God here describes himself as the God of the living.

Trembled ( $\varepsilon \vee \tau \rho о \mu о \varsigma ~ \gamma \varepsilon v о \mu \varepsilon v o \varsigma)$ ). Literally, becoming tremulous or terrified. The adjective $\varepsilon v \tau \rho о \mu \circ \varsigma$ ( $\varepsilon v, \tau \rho о \mu \circ \varsigma$ from $\tau \rho \varepsilon \mu \omega$, to tremble, to quake) occurs in Plutarch and the LXX. In the N.T. only here and Ac 16:29.

Durst not (ovк $\varepsilon \tau о \lambda \mu \alpha$ ). Imperfect active, was not daring, negative conative imperfect. Acts 7:33
Holy ground ( $\gamma \eta \alpha \gamma \nsim$ ). The priests were barefooted when they ministered in the temple. Moslems enter their mosques barefooted today. Cf. Jos 5:15 .

Sandal (vтобף $\mu \alpha$, bound under) is here "a distributive singular" (Hackett). Even the ground near the bush was "holy," a fine example for Stephen's argument.

Acts 7:34
I have surely seen ( $\llcorner\delta \omega v \varepsilon \delta \delta o v$ ). Imitation of the Hebrew infinitive absolute, (Ex 3:7) "Seeing I saw" (cf. Heb 6:14).

The affliction ( $\tau \eta \nu \kappa \alpha \kappa \omega \sigma v)$ ). From како $\omega$, to treat evilly (from какос, evil). Old word, here only in the N.T. and from Ex 3:7.

Groaning ( $\sigma \tau \varepsilon v \alpha \gamma \mu \circ v$ ). Old word from $\sigma \tau \varepsilon v \alpha \zeta \omega$, to sigh, to groan. In the N.T. only here and Ro 8:26. Root $\sigma \tau \varepsilon v$ in our word stentorian.

I am come down ( $\kappa \alpha \tau \varepsilon \beta \eta \nu)$. Second aorist active indicative of $\kappa \alpha \tau \alpha \beta \alpha ı v \omega$, I came down.
To deliver ( $\varepsilon \xi \varepsilon \lambda \varepsilon \sigma \theta \alpha)$. Second aorist middle infinitive of $\varepsilon \xi a \rho \varepsilon \varepsilon \omega$, to take out for myself.
I will send ( $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$ ). First aorist active subjunctive (hortatory of $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$, "Let me send").

Acts 7:35
This Moses (Toutov tov M $\omega v \sigma \eta \nu$ ). Rhetorical repetition follows this description of Moses (five times, anaphora, besides the use here, six cases of outo c here about Moses: verse 35 twice, $36,37,38,40$ ). Clearly Stephen means to draw a parallel between Moses and Jesus. They in Egypt
denied ( $\eta \rho \vee \eta \sigma \alpha v \tau 0$ ) Moses as now you the Jews denied ( $\eta \rho \vee \eta \sigma \alpha \sigma \theta \varepsilon$, 3:13) Jesus. Those in Egypt scouted Moses as "ruler and judge" (verses 27,35, a $\propto \chi$ о $\tau \alpha$ ка $\delta$ เкаб $\tau \eta$ ) and God "hath sent" ( $\alpha \pi \varepsilon \sigma \tau \alpha \lambda \kappa \varepsilon v$, perfect active indicative, state of completion) Moses "both a ruler and a deliverer" ( $\alpha \rho \chi$ оvта ка $\lambda \nu \tau \rho \omega \tau \eta \nu)$ as Jesus was to be (Lu 1:68; 2:38; Heb 9:12; Tit 2:14 ). "Ransomer" or "Redeemer" ( $\lambda \nu \tau \rho \omega \tau \eta \varsigma)$ is not found elsewhere, $\lambda \nu \tau \rho o v$ (ransom), $\lambda \nu \tau \rho \circ \omega$, to ransom, and $\lambda \cup \tau \rho \omega \sigma \iota$, , ransoming or redemption, are found often. In Ac 5:31 Christ is termed "Prince and Saviour."

With the hand ( $\sigma \vee \vee \chi \varepsilon \rho$ ). So the correct text. The Pharisees had accused Stephen of blaspheming "against Moses and God" ( 6:11). Stephen here answers that slander by showing how Moses led the people out of Egypt in co-operation ( $\sigma v v$ ) with the hand of the Angel of Jehovah.

Acts 7:37

Like unto me $(\omega \varsigma \varepsilon \mu \varepsilon)$. This same passage Peter quoted to the crowd in Solomon's Porch (Ac 3:22 ). Stephen undoubtedly means to argue that Moses was predicting the Messiah as a prophet like himself who is no other than Jesus so that these Pharisees are in reality opposing Moses. It was a neat turn.

## Acts 7:38

In the church in the wilderness $(\varepsilon \nu \tau \eta \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha \varepsilon \nu \tau \eta \varepsilon \rho \eta \mu \omega)$. Better rendered "congregation" here as in Heb 2:12 (Ps 22:22) , the people of Israel gathered at Mt. Sinai, the whole nation. Moses is here represented as receiving the law from an angel as in Heb 2:2; Ga 3:19 (De 33:2, LXX) and so was a mediator ( $\mu \varepsilon \sigma \iota \tau \eta$ ) or middle man between the angel and the people whereas Jesus is the Mediator of a better covenant (Heb 8:6). But Exodus does not speak of an angel.

Living oracles ( $\lambda \circ \gamma \iota \alpha \zeta \omega v \tau \alpha)$. A $\lambda o \gamma เ \circ v$ is a little word (diminutive of $\lambda o \gamma \circ \varsigma$ ). Common in the old Greek, LXX, Philo, in ecclesiastical writers for sayings of Christ, Papias (for instance) saying that Matthew wrote in Hebrew (Aramaic) "Logia of Jesus." Oxyrhynchus papyri fragments called "Logia of Jesus" are of much interest though only fragments. The Greeks used it of the "oracles" or brief sayings from Delphi. In the N.T. the word occurs only four times (Ac 7:38; Ro 3:2; Heb 5:12; 1Pe 4:11). Here the participle $\zeta \omega v \tau \alpha$, living, is the same used by Peter ( $1 \mathrm{Pe} 2: 4 \mathrm{f}$.$) , stone (\lambda \iota \theta \circ \varsigma)$ of Christ and Christians. The words from God to Moses are still "living" today. In 1Pe 4:11 the word is applied to one who speaks $\lambda o \gamma \iota \alpha \theta \varepsilon o v$ (oracles of God). In Ro 3:2 Paul refers to the substance of the law and of prophecy. In Heb 5:12 the writer means the substance of the Christian religious teaching.

## Acts 7:39

To whom ( $\omega$ ). That is Moses, this Moses.
Would not be (ovk $\eta \theta \varepsilon \lambda \eta \sigma \alpha v \gamma \varepsilon v \varepsilon \sigma \theta \alpha)$. Aorist active, negative aorist, were unwilling to become ( $\gamma \varepsilon v \varepsilon \sigma \theta \alpha$ ) obedient.

Thrust him from them ( $\alpha \pi \omega \sigma \alpha v \tau 0$ ). Indirect middle of the very verb used of the man (verse 27) who "thrust" Moses away from him.

Turned back ( $\varepsilon \sigma \tau \rho \alpha \varphi \eta \sigma \alpha v$ ). Second aorist passive indicative of $\sigma \tau \rho \varepsilon \varphi \omega$, to turn. They yearned after the fleshpots of Egypt and even the gods of Egypt. It is easy now to see why Stephen has patiently led his hearers through this story. He is getting ready for the homethrust.

Acts 7:40
Gods which shall go before us ( $\theta \varepsilon \sigma \nu \varsigma$ o $\pi \rho о \pi о \rho \varepsilon v \sigma o v \tau \alpha \eta \mu \omega \nu$ ). Ex 32:1. As guides and protectors, perhaps with some allusion to the pillar of fire and of cloud that had gone before them (Ex 13:21). The future indicative here with o (relative) expresses purpose.

Ye wot not (ovk oı $\delta \alpha \mu \varepsilon v$ ). We do not know. How quickly they had forgotten both God and Moses while Moses was absent in the mount with God.

Become of him ( $\varepsilon \gamma \varepsilon v \varepsilon \tau 0 ~ \alpha \cup \tau \omega)$. Happened to him. "This" (ovtoc) here is a contemptuous allusion to Moses by the people.

Acts 7:41
They made a calf ( $\varepsilon \mu о \sigma \chi о \pi о џ \eta \sigma \alpha v)$. First aorist active indicative of $\mu о \sigma \chi о \pi о \varepsilon \varepsilon \omega$, here only in the N.T. and unknown elsewhere. The LXX (Ex 32:3 ) has $\varepsilon \pi \sigma ⿰ \eta \sigma \varepsilon \mu \circ \sigma \chi \circ v$ from which phrase the word is evidently made. Aaron made the calf, but so did the people (Ex 32:35).

The idol ( $\tau \omega \varepsilon \varepsilon \delta \omega \lambda \omega$ ). Stephen calls it by the right name. The people said it was their way of worshipping Jehovah! So the Egyptians worshipped the bull Apis at Memphis as the symbol of Osiris (the sun). They had another sacred bull Mnevis at Leontopolis. Et $\delta \omega \lambda$ ov (from $\varepsilon \varepsilon \delta \circ \varsigma$, form or figure) is the image or likeness of anything. The heathen worship the god through the image or idol.

Rejoiced (evppatvovto). Imperfect, middle, kept on rejoicing (Ex 32:6,18) or making merry.

Acts 7:42
Gave them up ( $\pi \alpha \rho \varepsilon \delta \omega \kappa \varepsilon v$ ). First aorist active indicative of $\pi \alpha \rho \alpha \delta \iota \delta \omega \mu$. This same form occurs three times like clods on a coffin in a grave in Ro 1:24,26,28 where Paul speaks of God giving the heathen up to their lusts.

To serve the host of heaven ( $\lambda \alpha \tau \rho \varepsilon v \varepsilon ı v ~ \tau \eta ~ \sigma \tau \rho \alpha \tau ı \alpha ~ \tau o v ~ o u \rho \alpha v o v) . ~ T h e ~ v e r b ~ \lambda \alpha \tau \rho \varepsilon v \omega ~$ is used of the worship of God (Mt 4:10) as well as of idols as here (from $\lambda \alpha \tau \rho o v$, hire, $\lambda \alpha \tau \rho \iota$, hireling, then to serve). But the worship of the host of heaven (De 17:3; 2Ki 17:16; 21:3; 2Ch 33:3,5; Jer 8:2; 19:13 ) is Sabaism or worship of the host ( $\sigma \tau \rho \alpha \tau \iota \alpha$ ) of heaven (sun, moon, and stars) instead of the Lord of hosts. This star-worship greatly injured the Jews.

In the book of the prophets ( $\varepsilon \nu \beta 1 \beta \lambda \omega \tau \omega \nu \pi \rho \circ \varphi \eta \tau \omega v)$. That is the twelve minor prophets which the Jews counted as one book (cf. Ac 13:40). This quotation is from Am 5:25-27. The greater prophets were Isaiah, Jeremiah, Ezekiel.

Slain beasts ( $\sigma \varphi \alpha \not \downarrow \alpha$ ). Here only in the N.T. (from Am 5:25) $\sigma \varphi \alpha \gamma \eta$, slaughter, $\sigma \varphi \alpha \zeta \omega$, to slay.

## Acts 7:43

The tabernacle of Moloch ( $\tau \eta \nu \sigma \kappa \eta \nu \eta \nu$ qov Mo入ox). Or tent of Moloch which they took up after each halt instead of the tabernacle of Jehovah. Moloch was the god of the Amorites to whom children were offered as live sacrifices, an ox-headed image with arms outstretched in which children were placed and hollow underneath so that fire could burn underneath.

The star of the god Rephan ( $\tau 0 \alpha \sigma \tau \rho \circ v$ tov $\theta \varepsilon o v \operatorname{Po} \mu \varphi \alpha$ ). Spelled also Romphan and Remphan. Supposed to be Coptic for the star Saturn to which the Egyptians, Arabs, and Phoenicians gave worship. But some scholars take the Hebrew Kiyyoon to mean statues and
not a proper name at all, "statues of your gods" carried in procession, making "figures" (типоия) with both "tabernacle" and "star" which they carried in procession.

I will carry ( $\mu \varepsilon \tau о \kappa \kappa เ \omega)$. Attic future of $\mu \varepsilon \tau о \kappa \kappa เ \sigma \omega$ from $\mu \varepsilon \tau о к \kappa \iota \zeta \omega$.
Beyond Babylon ( $\varepsilon \pi \varepsilon \kappa \varepsilon เ v a \operatorname{Ba\beta v\lambda \omega vo\varsigma ).~The~Hebrew~and~the~LXX~have~"beyond~}$ Damascus." An adverbial preposition ( $\varepsilon \pi^{\prime} \varepsilon \kappa \varepsilon เ v \alpha$ with $\mu \varepsilon \rho \eta$ understood) used in the old Greek and the LXX with the ablative case and meaning "beyond." Here only in the N.T. in quotation from Am 5:27.

Acts 7:44
The tabernacle of the testimony ( $\eta \sigma \kappa \eta \nu \eta$ tov $\mu \alpha \rho \tau v \rho \imath o v$ ). Probably suggested by the mention of "the tabernacle of Moloch" (verse 43). See on Mt 17:4 for discussion of $\sigma \kappa \eta \nu \eta$ (from $\sigma \kappa \iota \alpha$, shadow, root $\sigma \kappa \alpha$, to cover). This first sanctuary was not the temple, but the tent in the wilderness. "Stephen passes on from the conduct of the Israelites to his other argument that God is not necessarily worshipped in a particular spot" (Page).

According to the figure (ката тоv титоv). According to the type or pattern. Тилос is from $\tau \cup \pi \tau \omega$, to strike, to smite, and is the print of the blow (Joh 20:25), then the figure formed by a blow or impression like our type, a model or example. Quoted from Ex 25:40 . Common word in the old Greek.

That he had seen (ov $\varepsilon \omega \rho \alpha \kappa \varepsilon$ ). Past perfect active of opa $\omega$, to see (double reduplication).
Acts 7:45
Which ( $\eta v$ ). Agreeing with $\sigma \kappa \eta \nu \eta \nu$, not with $\tau \cup \pi \sigma v$.
In their turn ( $\delta \iota \alpha \delta \varepsilon \xi \alpha \mu \varepsilon v o$ ). First aorist middle participle of $\delta \iota \alpha \delta \varepsilon \chi \circ \mu \alpha$, to receive through another, to receive in sucession or in turn. Late Greek, only here in N.T. Deissmann (Bible Studies, p. 115) argues from a second century B.C. papyrus that $\delta \iota \alpha \delta o \chi o \varsigma$ means rather deputy or court official than successor.

With Joshua ( $\mu \varepsilon \tau \alpha \mathrm{I} \eta \sigma \circ 0$ ). With Jesus, the Greek form of Joshua (contracted from Jehoshua, Mt 1:21 ), as in Heb 4:8.

When they entered on the possession of the nations ( $\varepsilon v \tau \eta \kappa \alpha \tau \alpha \sigma \chi \varepsilon \sigma \varepsilon \tau \omega v \varepsilon \theta v \omega v$ ). Literally "in (or at the time of) the possession of the nations." See on 7:5 for the only other N.T. instance of катабхहбıs.

Which ( $\omega v$ ). The nations, genitive by attraction to case of $\varepsilon \theta v \omega v$.
Thrust out ( $\varepsilon \xi \omega \sigma \varepsilon v$ ). First aorist active indicative of $\varepsilon \xi \omega \theta \varepsilon \omega$, to push out, common verb, here, only in N.T. save some MSS. in Ac 27:39 .

Acts 7:46
Asked ( $\eta$ ı $\tau \eta \sigma \alpha \tau 0$ ). Aorist middle (indirect) indicative, asked for himself (as a favour to himself). Cf. 2Sa 7:2f .

A habitation ( $\sigma \kappa \eta \nu \omega \mu \alpha$ ). Like Ps 132:5, but it was a house that David proposed to build (2Sa 7:2 ), not a tent ( $\sigma \kappa \eta \nu \eta$ ) which already existed. $\Sigma \kappa \eta v \omega \mu \alpha$ here means a more permanent abode (orкov, house, in verse 47), though from the same root as $\sigma \kappa \eta v \eta$.

Acts 7:48
Howbeit ( $\alpha \lambda \lambda$ '). By contrast with what Solomon did and David planned. Note emphatic position of "not" ( $\alpha \lambda \lambda^{\prime}$ ov $)$, "But not does the Most High dwell." The presence of the Most High is not confined in any building, even one so splendid as Solomon's Temple as Solomon himself foresaw and acknowledged in his prayer (1Ki 8:27; 2Ch 6:18).

In houses made with hands ( $\varepsilon \nu \chi \varepsilon \iota \rho о \pi о \iota \eta \tau о \iota \varsigma)$. No word here for "houses" or "temples" in correct text (vaots temples in Textus Receptus). Literally, "In things made with hands" ( $\chi \varepsilon \iota \rho$, hand, $\pi \circ \not \tau \tau \circ \varsigma$, verbal adjective of $\pi \circ \iota \varepsilon \omega$ ). It occurs in Mr 14:58 of the temple and of the sanctuary of Moab (Isa 16:12 ). It occurs also in Ac 7:24; Heb 9:11,24; Eph 2:11 . Common in the old Greek.

The prophet (o $\pi \rho \circ \varphi \eta \tau \eta \varsigma)$. Isa 66:1. Isaiah taught plainly that heaven is God's throne.
Acts 7:49
What manner of house (Поьov oוкоv). What sort of a house? This interrogative is sometimes scornful as in 4:7; Lu 6:32ff. (Page). So Stephen shows by Isaiah that Solomon was right that the temple was not meant to "confine" God's presence and that Jesus had rightly shown that God is a spirit and can be worshipped anywhere by any individual of any race or land. It is a tremendous argument for the universality and spirituality of Christianity free from the shackles of Jewish racial and national limitations, but its very strength only angered the Sanhedrin to desperation.

Acts 7:51
Stiffnecked ( $\sigma \kappa \lambda \eta \rho о \tau \rho a \chi \eta \lambda о$ ). From $\sigma \kappa \lambda \eta \rho о \varsigma$ (hard) and $\tau \rho \alpha \not \eta \lambda о \varsigma$, neck, both old words, but this compound only in the LXX and here alone in the N.T. Critics assume that Stephen was interrupted at this point because of the sharp tone of the speech. That may be true, but the natural climax is sufficient explanation.

Uncircumcised in heart ( $\alpha \pi \varepsilon \rho \iota \tau \mu \tau \tau$ ка $\delta \delta \alpha \iota \varsigma$ ). Late adjective common in LXX and here only in the N.T. Verbal of $\pi \varepsilon \rho \iota \tau \varepsilon \mu \nu \omega$, to cut around and a privative. Both of these epithets are applied to the Jews in the O.T. (Ex 32:9; 33:3,5; 34:9; Le 26:41; De 9:6; Jer 6:10 ). Kapסıaıs is locative plural like $\omega \sigma \iota v$ (ears), but some MSS. have genitive singular карঠıas, (objective genitive). No epithet could have been more galling to these Pharisees than to be turned "uncircumcised in heart" (Ro 2:29). They had only the physical circumcision which was useless.

Ye always (v $u \varepsilon เ \varsigma \alpha \varepsilon$ ). Emphatic position of humeis and "always" looks backward over the history of their forefathers which Stephen had reviewed.

Resist ( $\alpha v \tau \iota \pi \iota \tau \tau \varepsilon \tau \varepsilon$ ). Old word to fall against, to rush against. Only here in the N.T., but used in the O.T. which is here quoted ( $\mathrm{Nu} 27: 14$ ). Their fathers had made "external worship a substitute for spiritual obedience" (Furneaux). Stephen has shown how God had revealed himself gradually, the revelation sloping upward to Christ Jesus. "And as he saw his countrymen repeating the old mistake--clinging to the present and the material, while

God was calling them to higher spiritual levels--and still, as ever, resisting the Holy Spirit, treating the Messiah as the patriarchs had treated Joseph, and the Hebrews Moses--the pity of it overwhelmed him, and his mingled grief and indignation broke out in words of fire, such as burned of old on the lips of the prophets" (Furneaux). Stephen, the accused, is now the accuser, and the situation becomes intolerable to the Sanhedrin.

Acts 7:52
Which of the prophets ( $\tau \imath v \alpha \tau \omega v \pi \rho \circ \varphi \eta \tau \omega v$ ). Jesus (Lu 11:47; Mt 23:29-37) had charged them with this very thing. Cf. 2Ch 36:16.

Which shewed before ( $\pi \rho о к а \tau \alpha \gamma \gamma \varepsilon ı \lambda \alpha \nu \tau \alpha \varsigma)$. The very prophets who foretold the coming of the Messiah their fathers killed.

The coming ( $\tau \eta \varsigma \varepsilon \lambda \varepsilon v \sigma \varepsilon \omega \varsigma$ ). Not in ancient Greek or LXX and only here in the N.T. (in a few late writers).

Betrayers ( $\pi \rho \circ \delta o \tau \alpha$ ). Just like Judas Iscariot. He hurled this old biting word at them. In the N.T. only here and Lu 6:16; 2Ti 3:4. It cut like a knife. It is blunter than Peter in Ac 3:13.

Murderers ( $\varphi$ oveıऽ). The climax with this sharp word used of Barabbas ( 3:14).
Acts 7:53
Ye who (oıtivec). The very ones who, quippe qui, often in Acts when the persons are enlarged upon (8:15; 9:35; 10:41,47).

As it was ordained by angels ( $\varepsilon \iota \varsigma \delta \iota \alpha \tau \alpha \gamma \alpha \varsigma \alpha \gamma \gamma \varepsilon \lambda \omega v$ ). About angels see on 7:38. $\Delta \iota \alpha \tau \alpha \gamma \eta$ (from $\delta \iota \alpha \tau \alpha \sigma \sigma \omega$, to arrange, appoint) occurs in late Greek, LXX, inscriptions, papyri, Deissmann, Light from the Ancient East, pp. 89ff., and in N.T. only here and Ro 13:2 . At (or as) the appointment of angels (cf. Mt 10:41; 12:41 for this use of $\varepsilon \iota \varsigma)$ ).

And kept it not ( $\kappa \alpha$ ouк $\varepsilon \varphi \cup \lambda \alpha \xi \alpha \tau \varepsilon$ ). Like a whipcracker these words cut to the quick. They gloried in possessing the law and openly violated it (Ro 2:23).

Acts 7:54
When they heard ( $\alpha \kappa о v о \nu \tau \varepsilon \varsigma)$ ). Present active participle of $\alpha \kappa о v \omega$, while hearing.
 and form (imperfect passive of $\delta \Delta \pi \rho \omega \omega$ ) is used of the effect of Peter's speech on the Sadducees. Here Stephen had sent a saw through the hearts of the Pharisees that rasped them to the bone.

They gnashed on him with their teeth ( $\varepsilon \beta \rho \cup \chi o v$ tovc oסovtac $\varepsilon \pi^{\prime} \alpha v \tau o v$ ). Imperfect (inchoative) active of $\beta \rho v \chi \omega$ (Attic $\beta \rho v \kappa \omega$ ), to bite with loud noise, to grind or gnash the teeth. Literally, They began to gnash their teeth at ( $\varepsilon \pi^{\prime}$ ) him (just like a pack of hungry, snarling wolves). Stephen knew that it meant death for him.

Acts 7:55
And Jesus standing ( $\kappa \alpha \operatorname{I} \eta \sigma o v v \varepsilon \sigma \tau \omega \tau \alpha$ ). Full of the Holy Spirit, gazing steadfastly into heaven, he saw God's glory and Jesus "standing" as if he had risen to cheer the brave Stephen.

Elsewhere (save verse 56 also) he is pictured as sitting at the right hand of God (the Session of Christ) as in Mt 26:64; Mr 16:19; Ac 2:34; Eph 1:20; Col 3:1; Heb 1:3 .

Acts 7:56
Opened ( $\delta ı \eta v o \iota \gamma \mu \varepsilon v o v \varsigma)$. Perfect passive predicate participle of $\delta ı \alpha \nu o \imath \gamma v \nu \mu$ (cf. Mt 3:16; Lu 3:21).

The son of man ( $\tau 0 v v i o v \tau o v a v \theta \rho \omega \pi o v$ ). Elsewhere in the N.T. in Christ's own words. Here Stephen may refer to the words of Jesus as preserved in Mt 26:64 .

Acts 7:57
Stopped their ears ( $\sigma v v \varepsilon \sigma \chi o v \tau \alpha \omega \tau \alpha \alpha v \tau \omega v$ ). Second aorist active of $\sigma v v \varepsilon \chi \omega$, to hold together. They held their ears together with their hands and affected to believe Stephen guilty of blasphemy (cf. Mt 26:65).

Rushed upon him with one accord ( $\omega \rho \mu \eta \sigma \alpha \nu o \mu \circ \theta \nu \mu \alpha \delta o v \varepsilon \pi^{\prime} \alpha v \tau o v$ ). Ingressive aorist active indicative of o $\rho \mu \alpha \omega$, to rush impetuously as the hogs did down the cliff when the demons entered them (Lu 8:33 ). No vote was taken by the Sanhedrin. No scruple was raised about not having the right to put him to death (Joh 8:31 ). It may have taken place after Pilate's recall and before his successor came or Pilate, if there, just connived at such an incident that did not concern Rome. At any rate it was mob violence like modern lynching that took the law into the hands of the Sanhedrin without further formalities.

Out of the city ( $\varepsilon \kappa \tau \eta \varsigma \pi \sigma \lambda \varepsilon \omega \varsigma)$. To keep from defiling the place with blood. But they sought to kill Paul as soon as they got him out of the temple area (Ac 21:30f. ).

Stoned $\left(\varepsilon \lambda_{\imath} \theta o \beta o \lambda o v v\right)$. Imperfect active indicative of $\lambda_{\imath} \theta o \beta o \lambda \varepsilon \omega$, began to stone, from $\lambda_{\imath} \theta \circ \beta \circ \lambda_{\circ} \varsigma\left(\lambda_{\imath} \theta \circ \varsigma\right.$, stone, $\beta \alpha \lambda \lambda \omega$, to throw), late Greek verb, several times in the N.T. as Lu 13:34. Stoning was the Jewish punishment for blasphemy (Le 24:14-16).

The witnesses (o $\mu \alpha \rho \tau \nu \rho \varepsilon \varsigma)$. The false testifiers against Stephen suborned by the Pharisees (Ac 6:11,13 ). These witnesses had the privilege of casting the first stones (De 13:10; 17:7) against the first witness for Christ with death (martyr in our modern sense of the word).

At the feet of a young man named Saul ( $\pi \alpha \rho \alpha \tau о \cup \varsigma \pi о \delta \alpha \varsigma v \varepsilon \alpha \nu เ о v \kappa \alpha \lambda о v \mu \varepsilon v o v \sum \alpha v \lambda o v$ ). Beside ( $\pi \alpha \rho \alpha$ ) the feet. Our first introduction to the man who became the greatest of all followers of Jesus Christ. Evidently he was not one of the "witnesses" against Stephen, for he was throwing no stones at him. But evidently he was already a leader in the group of Pharisees. We know from later hints from Saul (Paul) himself that he had been a pupil of Gamaliel (Ac 22:3 ). Gamaliel, as the Pharisaic leader in the Sanhedrin, was probably on hand to hear the accusations against Stephen by the Pharisees. But, if so, he does not raise his voice against this mob violence. Saul does not seem to be aware that he is going contrary to the views of his master, though pupils often go further than their teachers.

Acts 7:59

They stoned ( $\varepsilon \lambda_{1} \theta_{\mathrm{o}} \beta \beta_{o} \lambda_{o v v) . ~ S a m e ~ v e r b ~ a n d ~ t e n s e ~ r e p e a t e d, ~ t h e y ~ k e p t ~ o n ~ s t o n i n g, ~ t h e y ~}^{\text {, }}$ kept it up as he was calling upon the Lord Jesus and making direct prayer to him as "Lord Jesus" (Kupıє I $\eta \sigma o u$ ).

Receive my spirit ( $\delta \varepsilon \xi \alpha$ тo $\pi \nu \varepsilon v \mu \alpha \mu \circ v$ ). Aorist middle imperative, urgency, receive it now. Many have followed Stephen into death with these words upon their dying lips. See, 9:14,21; 22:16.

Acts 7:60
Kneeled down ( $\theta \varepsilon \iota \varsigma \tau \alpha$ үova $\tau \alpha$ ). Second aorist active participle of $\tau \iota \theta \eta \mu$, placing the knees (on the ground). This idiom is not in the old Greek for kneeling, but Luke has it five times (Lu 22:41; Ac 7:60; 9:40; 22:36; 21:5) and Mark once ( $15: 19$ ). Jesus was standing at the right hand of God and Stephen knelt before him in worship and called on him in prayer.

Lay not this sin to their charge ( $\mu \eta \sigma \tau \eta \sigma \eta \iota \varsigma \alpha \cup \tau о \iota \varsigma \tau \alpha \nu \tau \eta \nu \tau \eta \nu \alpha \mu \alpha \rho \tau \iota \alpha \nu$ ). First aorist (ingressive) active subjunctive with $\mu \eta$, regular Greek idiom, Place not to them or against them (dative avtors) this sin. The very spirit of Jesus towards his enemies as he died upon the Cross (Lu 23:34).

He fell asleep ( $\varepsilon \kappa о \mu \eta \theta \eta$ ). First aorist passive indicative of коњ $\mu \omega$, to put to sleep. Old verb and the metaphor of sleep for death is common in all languages, but it is peculiarly appropriate here as Jesus used it of Lazarus. See also Ac 13:36; 1Co 15:18, etc. Our word
 picture word of rest and calmness which stands in dramatic contrast to the rage and violence of the scene."

## Acts 8

Acts 8:1
Was consenting ( $\eta v \sigma v \nu \varepsilon v \delta o \kappa \omega v$ ). Periphrastic imperfect of $\sigma v v \varepsilon v \delta o \kappa \varepsilon \omega$, a late double compound ( $\sigma \nu v, \varepsilon v, \delta о \kappa \varepsilon \omega$ ) that well describes Saul's pleasure in the death ( $\alpha v \alpha \iota \rho \sigma \iota \varsigma$, taking off, only here in the N.T., though old word) of Stephen. For the verb see on Lu 23:32. Paul himself will later confess that he felt so (Ac 22:20), coolly applauding the murder of Stephen, a heinous $\sin$ (Ro 1:32). It is a gruesome picture. Chapter 7 should have ended here.

On that day ( $\varepsilon \nu \varepsilon \kappa \varepsilon \iota \nu \eta \tau \eta \eta \mu \varepsilon \rho \alpha$ ). On that definite day, that same day as in 2:41.
A great persecution ( $\delta \omega \omega \gamma \mu \circ \varsigma \mu \varepsilon \gamma \alpha \varsigma)$. It was at first persecution from the Sadducees, but this attack on Stephen was from the Pharisees so that both parties are now united in a general persecution that deserves the adjective "great." See on Mt 13:21 for the old word $\delta \iota \omega \gamma \mu$ os from $\delta \iota \omega \kappa \omega$, to chase, hunt, pursue, persecute.

Were all scattered abroad ( $\pi \alpha v \tau \varepsilon \varsigma \delta เ \varepsilon \sigma \pi \alpha \rho \eta \sigma \alpha v$ ). Second aorist passive indicative of $\delta \iota \alpha \sigma \pi \varepsilon \iota \rho \omega$, to scatter like grain, to disperse, old word, in the N.T. only in Ac $8: 1,4 ; 11: 19$.

Except the apostles $(\pi \lambda \eta \nu \tau \omega \nu$ a $\pi \sigma \sigma \tau o \lambda \omega \nu$ ). Preposition $\pi \lambda \eta \nu$ (adverb from $\pi \lambda \varepsilon o \nu$, more) with the ablative often in Luke. It remains a bit of a puzzle why the Pharisees spared the apostles. Was it due to the advice of Gamaliel in Ac 5:34-40? Or was it the courage of the apostles? Or was it a combination of both with the popularity of the apostles in addition?

Acts 8:2
Devout ( $\varepsilon v \lambda \alpha \beta \varepsilon ı \varsigma)$. Only four times in the N.T. (Lu 2:25; Ac 2:5; 8:2; 22:12 ). Possibly some non-Christian Jews helped. The burial took place before the Christians were chiefly scattered.

Buried ( $\sigma v v \varepsilon \kappa о \mu \iota \sigma \alpha v$ ). Aorist active indicative of $\sigma v v \kappa о \mu \iota \zeta \omega$, old verb to bring together, to collect, to join with others in carrying, to bury (the whole funeral arrangements). Only here in the N.T.

Lamentation (колєтоv). Late word from колто $\mu \alpha$, to beat the breast, in LXX, Plutarch, etc., only here in the N.T.

Acts 8:3
Laid waste ( $\varepsilon \lambda \nu \mu a \imath v \varepsilon \tau o$ ). Imperfect middle of $\lambda \nu \mu a ı v o \mu \alpha$, old verb (from $\lambda \nu \mu \eta$, injury), to dishonour, defile, devastate, ruin. Only here in the N.T. Like the laying waste of a vineyard by a wild boar (Ps 79:13 ). Picturesque description of the havoc carried on by Saul now the leader in the persecution. He is victor over Stephen now who had probably worsted him in debate in the Cilician synagogue in Jerusalem.

Into every house (ката 兀оטৎ оєкоиৎ). But Luke terms it "the church" ( $\tau \eta \nu \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha v)$. Plainly not just an "assembly," but an organized body that was still "the church" when scattered in their own homes, "an unassembled assembly" according to the etymology. Words do not remain by the etymology, but travel on with usage.

Haling ( $\sigma v \rho \omega v$ ). Literally, dragging forcibly (=hauling). Present active participle of $\sigma v \rho \omega$, old verb.

Men and women ( $\alpha v \delta \rho a \varsigma \kappa \alpha \gamma \cup v a i k \alpha \varsigma)$. A new feature of the persecution that includes the women. They met it bravely as through all the ages since (cf. 9:2; 22:4). This fact will be a bitter memory for Paul always.

Committed ( $\pi \alpha \rho \varepsilon \delta \iota \delta o v)$. Imperfect active of $\pi \alpha \rho \alpha \delta \iota \delta \omega \mu$, old verb, kept on handing them over to prison.

Acts 8:4
They therefore ( $o \mu \varepsilon v o v v$ ). Demonstrative $o$ as often ( $1: 6$, etc.) though it will make sense as the article with the participle $\delta \iota \alpha \sigma \pi \alpha \rho \varepsilon v \tau \varepsilon \varsigma$. The general statement is made here by $\mu \varepsilon v$ and a particular instance ( $\delta \varepsilon$ ) follows in verse 5 . The inferential particle (ouv) points back to verse 3, the persecution by young Saul and the Pharisees. Jesus had commanded the disciples not to depart from Jerusalem till they received the Promise of the Father ( $1: 4$ ), but they had remained long after that and were not carrying the gospel to the other peoples ( $1: 8)$. Now they were pushed out by Saul and began as a result to carry out the Great Commission for world conquest, that is those "scattered abroad" ( $\delta \iota \alpha \sigma \pi \alpha \rho \varepsilon \nu \tau \varepsilon \varsigma$, second aorist passive participle of $\delta \iota a \sigma \pi \varepsilon \rho \omega)$. This verb means disperse, to sow in separate or scattered places ( $\delta(\alpha)$ and so to drive people hither and thither. Old and very common verb, especially in the LXX, but in the N.T. only in Ac 8:1,4; 11:19 .

Went about ( $\delta i \eta \lambda \theta \mathrm{ov}$ ). Constative second aorist active of $\delta \iota \varepsilon \rho \chi \circ \mu \alpha$, to go through (from place to place, $\delta \mathbf{1} \alpha$ ). Old and common verb, frequent for missionary journeys in the Acts (5:40; 8:40; 9:32; 11:19; 13:6).

Preaching the word ( $\varepsilon v a \gamma \gamma \varepsilon \lambda_{1} \zeta о \mu \varepsilon v o$ тov $\lambda o \gamma o v$ ). Evangelizing or gospelizing the word (the truth about Christ). In 11:19 Luke explains more fully the extent of the labours of these new preachers of the gospel. They were emergency preachers, not ordained clergymen, but men stirred to activity by the zeal of Saul against them. The blood of the martyrs (Stephen) was already becoming the seed of the church. "The violent dispersion of these earnest disciples resulted in a rapid diffusion of the gospel" (Alvah Hovey).

Acts 8:5
Philip (Фı入ı兀тоৎ). The deacon ( 6:5) and evangelist (21:8), not the apostle of the same name (Mr 3:18).

To the city of Samaria ( $\varepsilon \varsigma \varsigma \tau \eta \nu \pi 0 \lambda \iota \nu \tau \eta \varsigma \Sigma a \mu \alpha \rho ı \alpha \varsigma)$. Genitive of apposition. Samaria is the name of the city here. This is the first instance cited of the expansion noted in verse 4. Jesus had an early and fruitful ministry in Samaria (Joh 4 ), though the twelve were forbidden to go into a Samaritan city during the third tour of Galilee (Mt 10:5), a temporary prohibition withdrawn before Jesus ascended on high (Ac 1:8).

Proclaimed ( $\varepsilon \kappa \eta \rho v \sigma \sigma \varepsilon v$ ). Imperfect active, began to preach and kept on at it. Note $\varepsilon v a \gamma ү \varepsilon \lambda_{\iota} \zeta о \mu \varepsilon v o$ in verse 4 of missionaries of good news (Page) while $\varepsilon \kappa \eta \rho \cup \sigma \sigma \varepsilon v$ here presents
the preacher as a herald. He is also a teacher ( $\delta \iota \delta a \sigma \kappa a \lambda o \varsigma)$ like Jesus. Luke probably obtained valuable information from Philip and his daughters about these early days when in his home in Caesarea (Ac 21:8).

Acts 8:6
Gave heed ( $\pi \rho \circ \sigma \varepsilon i \chi o v$ ). Imperfect active as in verses 10,11 , there with dative of the person ( $\alpha \cup \tau \omega$ ), here with the dative of the thing ( $\tau$ оı $\lambda \varepsilon \gamma \circ \mu \varepsilon v o \iota s)$. There is an ellipse of vouv (mind). They kept on giving heed or holding the mind on the things said by Philip, spell-bound, in a word.

When they heard ( $\varepsilon v \tau \omega$ aкousiv avtov¢). Favourite Lukan idiom, $\varepsilon v$ and the locative case of the articlar infinitive with the accusative of general reference "in the hearing as to them."

Which he did ( $\alpha$ ع $\pi \sigma$ ) $)$. Imperfect active again, which he kept on doing from time to time. Philip wrought real miracles which upset the schemes of Simon Magus.

Acts 8:7
For many ( $\pi 0 \lambda \lambda o \gamma \alpha \rho$ ). So the correct text of the best MSS., but there is an anacoluthon as this nominative has no verb with it. It was "the unclean spirits" that "came out" ( $\varepsilon \xi \eta \rho \chi \circ v \tau 0$, imperfect middle). The margin of the Revised Version has it "came forth," as if they came out of a house, a rather strained translation. The loud outcry is like the demons cast out by Jesus (Mr 3:11; Lu 4:41).

Palsied ( $\pi \alpha \rho \alpha \lambda \varepsilon \lambda \nu \mu \varepsilon v o$, perfect passive participle). Luke's usual word, loosened at the side, with no power over the muscles. Furneaux notes that "the servant was reaping where the Master had sown. Samaria was the mission field white for the harvest (Joh 4:35 )." The Samaritans who had been bewitched by Simon are now carried away by Philip.

Acts 8:9
Simon ( $\Sigma \mu \omega v$ ). One of the common names (Josephus, Ant. XX. 7, 2) and a number of messianic pretenders had this name. A large number of traditions in the second and third centuries gathered round this man and Baur actually proposed that the Simon of the Clementine Homilies is really the apostle Paul though Paul triumphed over the powers of magic repeatedly (Ac 13:6-12; 19:11-19) , "a perfect absurdity" (Spitta, Apostelgeschichte, p. 149). One of the legends is that this Simon Magus of Acts is the father of heresy and went to Rome and was worshipped as a god (so Justin Martyr). But a stone found in the Tiber A.D. 1574 has an inscription to Semoni Sanco Deo Fidio Sacrum which is (Page) clearly to Hercules, Sancus being a Sabine name for Hercules. This Simon in Samaria is simply one of the many magicians of the time before the later gnosticism had gained a foothold. "In his person Christianity was for the first time confronted with superstition and religious imposture, of which the ancient world was at this period full" (Furneaux).

Which beforetime used sorcery ( $\pi \rho \circ v \pi \eta \rho \chi \varepsilon v \mu \alpha \gamma \varepsilon v \omega v$ ). An ancient idiom (periphrastic), the present active participle $\mu \alpha \gamma \varepsilon v \omega v$ with the imperfect active verb from $\pi \rho \sigma \cup \pi \alpha \rho \chi \omega$,
the idiom only here and Lu 23:12 in the N.T. Literally "Simon was existing previously practising magic." This old verb $\mu \alpha \gamma \varepsilon v \omega$ is from $\mu \alpha \gamma \sigma \varsigma$ (a $\mu \alpha \gamma \nu \varsigma$, seer, prophet, false prophet, sorcerer) and occurs here alone in the N.T.

Amazed (existanon). Present active participle of the verb $\varepsilon \xi \iota \sigma \tau \alpha v \omega$, later form of $\varepsilon \xi \iota \sigma \tau \eta \mu$, to throw out of position, displace, upset, astonish, chiefly in the Gospels in the N.T. Same construction as $\mu \alpha \gamma \varepsilon v \omega v$.

Some great one ( $\tau \iota v \alpha \mu \varepsilon \gamma \alpha v$ ). Predicate accusative of general reference (infinitive in indirect discourse). It is amazing how gullible people are in the presence of a manifest impostor like Simon. The Magi were the priestly order in the Median and Persian empires and were supposed to have been founded by Zoroaster. The word $\mu \alpha \gamma$ (magi) has a good sense in Mt 2:1, but here and in Ac 13:6 it has the bad sense like our "magic."

Acts 8:10
That power of God which is called Great ( $\eta \Delta v \vee \alpha \mu \iota \varsigma \tau o v \theta \varepsilon o v \eta \kappa \alpha \lambda o v \mu \varepsilon \nu \eta$ M $\eta \gamma \alpha \lambda \eta$ ). Apparently here already the oriental doctrine of emanations or aeons so rampant in the second century. This "power" was considered a spark of God himself and Jerome (in Mt 24 ) quotes Simon (Page) as saying: Ego sum sermo Dei, ... ego omnipotens, ego omnia Dei. Simon claimed to impersonate God.

Acts 8:11
Because that of long time he had amazed them with his sorceries ( $\delta \iota \alpha$ то 七к $\alpha \nu \omega \chi \rho \circ \nu \omega$ $\tau \alpha ı \varsigma ~ \mu \alpha ү \iota \alpha ı \varsigma ~ \varepsilon \xi \varepsilon \sigma \tau \alpha \kappa \varepsilon v \alpha \alpha \cup \tau о v \varsigma) . ~ C a u s a l ~ u s e ~ o f ~ \delta ı \alpha ~ w i t h ~ t h e ~ a c c u s a t i v e ~ a r t i c u l a r ~ i n f i n i t i v e ~$ (perfect active Koine form and transitive, $\varepsilon \xi \varepsilon \sigma \tau \alpha \kappa \varepsilon v \alpha)$. Same verb as in verse 9 participle $\varepsilon \xi \iota \sigma \tau \alpha \nu \omega \nu$ and in verse 13 imperfect passive $\varepsilon \xi \iota \sigma \tau \alpha \tau 0$ (cf. also 2:7 already). X $\rho o v \omega$ is associative instrumental and $\mu \alpha \gamma$ ııı instrumental case.

Acts 8:12
They were baptized ( $\varepsilon \beta \alpha \pi \tau \iota \zeta o v \tau o)$. Imperfect passive (repetition, from time to time), while
believed ( $\varepsilon \pi \iota \sigma \tau \varepsilon v \sigma \alpha v$ ) is constative aorist antecedent to the baptism. Note dative case of Philip with $\varepsilon \pi \iota \sigma \tau \varepsilon v \sigma \alpha v$. Note the gospel of Philip "concerning the kingdom of God, and the name of Jesus Christ."

Acts 8:13
And Simon also himself believed (Но $\delta \varepsilon \sum \mu \omega \nu \kappa \alpha \alpha v \tau о \varsigma \varepsilon \pi \iota \sigma \tau \varepsilon v \sigma \varepsilon v$ ). Note the same verb in the aorist tense $\varepsilon \pi \iota \sigma \tau \varepsilon v \sigma \varepsilon \nu$. What did he believe? Evidently that Jesus was this "power of God" not himself (Simon). He saw that the miracles wrought by Philip in the name of Christ were genuine while he knew that his own were frauds. He wanted this power that Philip had to add to his own pretensions. "He was probably half victim of self-delusion, half conscious impostor" (Furneaux). He was determined to get this new "power," but had no sense of personal need of Jesus as Saviour for his sins. So he submitted to baptism ( $\beta a \pi \tau \iota \sigma \theta \varepsilon ı \varsigma$, first aorist passive participle of $\beta a \pi \tau \iota \zeta \omega)$, clear proof that baptism does not convey salvation.

He continued with Philip ( $\eta \nu \pi \rho о \sigma \kappa \alpha \rho \tau \varepsilon \rho \omega \nu \tau \omega \Phi \wedge \lambda \iota \pi \pi \omega$ ). Periphrastic imperfect of the verb $\pi \rho \sigma \sigma \kappa \alpha \rho \tau \varepsilon \rho \varepsilon \omega$ (see on $2: 46$ ). He stuck to Philip (dative case) to find out the secret of his power.

Beholding $(\theta \varepsilon \omega \rho \omega v)$. Watching the signs and miracles (powers, $\delta v v \alpha \mu \varepsilon ı \varsigma$ that threw his "power" in the shade) as they were wrought ( $\gamma$ เvo $\mu \varepsilon v a c$, present middle participle of $\gamma เ v o \mu \alpha)$. The more he watched the more the wonder grew ( $\varepsilon \xi \iota \sigma \tau \alpha \tau o)$. He had "amazed" (verse 9) the people by his tricks and he was himself more "amazed" than they by Philip's deeds.

Acts 8:14
That Samaria had received (o $\delta \delta \delta \varepsilon \kappa \tau \alpha \eta \Sigma \alpha \mu \alpha \rho ı \alpha$ ). The district here, not the city as in verse 5. Perfect middle indicative of $\delta \varepsilon \chi \circ \mu \alpha$ retained in indirect discourse. It was a major event for the apostles for now the gospel was going into Samaria as Jesus had predicted ( $1: 8)$. Though the Samaritans were nominally Jews, they were not held so by the people. The sending of Peter and John was no reflection on Philip, but was an appropriate mission since "many Christian Jews would be scandalized by the admission of Samaritans" (Furneaux). If Peter and John sanctioned it, the situation would be improved. John had once wanted to call down fire from heaven on a Samaritan village (Lu 9:54).

## Acts 8:15

That they might receive ( $0 \pi \omega \varsigma \lambda \alpha \beta \omega \sigma \iota \nu$ ). Second aorist active subjunctive of $\lambda \alpha \mu \beta \alpha \nu \omega$, final clause with o $\pi \omega \varsigma$. Did they wish the Samaritan Pentecost to prove beyond a doubt that the Samaritans were really converted when they believed? They had been baptized on the assumption that the Holy Spirit had given them new hearts. The coming of the Holy Spirit with obvious signs (cf. 10:44-48) as in Jerusalem would make it plain.

Acts 8:16
He was fallen ( $\eta v \varepsilon \pi \iota \pi \varepsilon \pi \tau \omega \kappa \circ \varsigma$ ). Periphrastic past perfect active of $\varepsilon \pi \iota \pi \iota \pi \tau \omega$, old verb. The participle is neuter here because of the grammatical gender of $\pi \nu \varepsilon \nu \mu \alpha$, but the translation should be "he" (natural gender), not "it." We should not use "it" for the Holy Spirit.

Only they had been baptized ( $\mu$ оvov $\delta \varepsilon \beta \alpha \beta \alpha \pi \tau \iota \sigma \mu \varepsilon v o v \pi \eta \rho \chi о v$ ). Periphrastic past perfect passive of $\beta \alpha \pi \tau \iota \zeta \omega$ with $v \pi \alpha \rho \chi \omega$ (see verse $9 \pi \rho o v \pi \eta \rho \chi \circ v$ ), instead of $\eta \sigma \alpha \nu$.

Into the name ( $\varepsilon \iota \varsigma ~$ то оvo $\mu \alpha$ ). Better, in the name (see on $2: 38$ ).
Acts 8:17
Laid they their hands ( $\varepsilon \pi \varepsilon \tau \iota \theta \varepsilon \sigma \alpha \nu \tau \alpha \varsigma \chi \varepsilon \iota \rho \alpha \varsigma)$. Imperfect active, repetition. The laying on of hands did not occur at the great Pentecost $(2: 4,33)$ nor in $4: 31 ; 10: 44$ nor is it mentioned in 1Co 12; 14 . It is mentioned in Ac 6:7 about the deacons and in 13:3 when Barnabas and Saul left Antioch. And in Saul's case it was Ananias who laid his hands on him (9:17). Hence it cannot be concluded that the Holy Spirit was received only by the laying on of the hands of the apostles or by the hands of anyone. The so-called practice of "confirmation" appeals to this passage, but inconclusively.

They received ( $\varepsilon \lambda \alpha \mu \beta \alpha v o v)$ ). Imperfect active, repetition as before and $\pi \alpha \rho \pi \alpha \sigma \sigma v$ with the laying on of the hands.

Acts 8:18
When Simon saw ( $I \delta \omega v \delta \varepsilon$ o $\Sigma \mu \mu \nu v$ ). This participle (second aorist active of opa $\omega$ ) shows plainly that those who received the gift of the Holy Spirit spoke with tongues. Simon now saw power transferred to others. Hence he was determined to get this new power.

He offered them money ( $\pi \rho о \sigma \eta \nu \varepsilon \gamma \kappa \varepsilon v \chi \rho \eta \mu \alpha \tau \alpha$ ). Second aorist active indicative of $\pi \rho о \sigma \varphi \varepsilon \rho \omega$. He took Peter to be like himself, a mountebank performer who would sell his tricks for enough money. Trafficking in things sacred like ecclesiastical preferments in England is called "Simony" because of this offer of Simon.

Acts 8:19
Me also (кано). This is the whole point with this charlatan. He wants the power to pass on "this power." His notion of "The Holy Spirit" was on this low level. He regarded spiritual functions as a marketable commodity. Money "can buy diamonds, but not wisdom, or sympathy, or faith, or holiness" (Furneaux).

Acts 8:20
Perish with thee ( $\sigma u v \sigma 0 \varepsilon \nmid \varepsilon \varepsilon \varsigma \alpha \pi \omega \lambda \varepsilon \iota \alpha v$ ). Literally, Be with thee for destruction. Optative for a future wish. The use of $\varepsilon \iota \varsigma$ with the accusative in the predicate is especially common in the LXX. The wish reveals Peter's indignation at the base offer of Simon. Peter was no grafter to accept money for spiritual power. He spurned the temptation. The natural meaning of Peter's language is that Simon was on the road to destruction. It is a warning and almost a curse on him, though verse 22 shows that there was still room for repentance.

To obtain ( $\kappa \tau \alpha \sigma \theta \alpha)$. To acquire. Usual meaning of the present tense (infinitive middle) of $\kappa \tau \alpha o \mu \alpha$.

Acts 8:21
Lot ( $\kappa \lambda \eta \rho \circ \varsigma)$. Same idea as "part" ( $\mu \varepsilon \rho \iota \varsigma)$, only as a figure.
Matter ( $\lambda o \gamma o$ ). Literally, word or subject (as in Lu 1:4; Ac 15:6 ), the power of communicating the Holy Spirit. This use of $\lambda$ opoc is in the ancient Greek.

Straight ( $\varepsilon v \theta \varepsilon i \alpha)$. Quotation from Ps 78:37. Originally a mathematically straight line as in Ac 9:11, then moral rectitude as here.

Acts 8:22
Wickedness (какıая). Only here in Luke's writings, though old word and in LXX (cf. 1Pe 2:1,16 ).

If perhaps $(\varepsilon \alpha \rho \alpha)$. Si forte. This idiom, though with the future indicative and so a condition of the first class (determined as fulfilled), yet minimizes the chance of forgiveness as in Mr 11:13. Peter may have thought that his sin was close to the unpardonable sin (Mt 12:31 ), but he does not close the door of hope.

The thought ( $\eta \varepsilon \pi เ v o i \alpha)$. Old Greek word from $\varepsilon \pi เ v o \varepsilon \omega$, to think upon, and so purpose. Only here in the N.T.

Acts 8:23
That thou art ( $\sigma \varepsilon$ ov $\tau \alpha$ ). Participle in indirect discourse after o $\rho \omega$ (I see).
In the gall of bitterness ( $\varepsilon ı \varsigma\rceil \bigcirc \lambda \eta \nu \pi \iota \kappa \rho ı a \varsigma)$. Old word from $\chi \circ \lambda \alpha \varsigma$ either from $\chi \varepsilon \omega$, to pour, or $\chi \lambda$ on, yellowish green, bile or gall. In the N.T. only in Mt 27:34 and here. In LXX in sense of wormwood as well as bile. See De 29:18; 32:32; La 3:15; Job 16:14 . "Gall and bitterness" in De 29:18. Here the gall is described by the genitive đıкрıas as consisting in "bitterness." In Heb 12:15 "a root of bitterness," a bitter root. This word пıкрıa in the N.T. only here and Heb 12:15; Ro 3:14; Eph 4:31. The "bond of iniquity" ( $\sigma v \vee \delta \varepsilon \sigma \mu о v ~ \alpha \delta ı \kappa ı \alpha) ~ i s ~ f r o m ~$ Isa 58:6 . Paul uses this word of peace (Eph 4:3), of love ( $\mathrm{Col} 3: 14$ ), of the body (Col 2:19 ). Peter describes Simon's offer as poison and a chain.

Acts 8:24
Pray ye for me ( $\Delta \varepsilon \eta \theta \eta \tau \varepsilon v \mu \varepsilon \iota \varsigma \tau \varepsilon \rho \varepsilon \mu \circ v$ ). Emphasis on $v \mu \varepsilon \varsigma \varsigma$ (you). First aorist passive imperative. Simon is thoroughly frightened by Peter's words, but shows no sign of personal repentance or change of heart. He wants to escape the penalty for his sin and hopes that Peter can avert it. Peter had clearly diagnosed his case. He was an unconverted man in spite of his profession of faith and baptism. There is no evidence that he ever changed his life at all.

Which ( $\omega v$ ). Genitive by attraction of the accusative relative $\alpha$ to case of the unexpressed antecedent $\tau 0 \cup \tau \omega \nu$ (of those things), a common Greek idiom.

Acts 8:25
They therefore (o $\mu \varepsilon v o v v$ ). Demonstrative o with $\mu \varepsilon v$ (no following $\delta \varepsilon$ ) and the inferential ouv (therefore) as often in Acts ( 1:6, etc.).

Returned (viع $\sigma \tau \rho \varepsilon \varphi \circ \vee$ ). Imperfect active picturing the joyful journey of preaching ( $\varepsilon \cup \eta \gamma \gamma \varepsilon \lambda_{\curlywedge} \zeta_{\text {(ovto, imperfect middle) to the Samaritan villages. Peter and John now carried }}$ on the work of Philip to the Samaritans. This issue was closed.

Acts 8:26
Toward the South ( $\kappa \alpha \tau \alpha \mu \varepsilon \sigma \eta \mu \beta \rho \iota \alpha v$ ). Old word from $\mu \varepsilon \sigma o \varsigma$ and $\eta \mu \varepsilon \rho \alpha$, midday or noon as in Ac 22:16 , the only other example in the N.T. That may be the idea here also, though "towards the South" gets support from the use of кata $\lambda_{1} \beta \alpha$ in Ac 27:12 .

The same is desert (avtך $\varepsilon \sigma \tau \iota v \varepsilon \rho \eta \mu \circ \varsigma$ ). Probably a parenthetical remark by Luke to give an idea of the way. One of the ways actually goes through a desert. Gaza itself was a strong city that resisted Alexander the Great five months. It was destroyed by the Romans after war broke out with the Jews.

Acts 8:27
A eunuch of great authority ( $\varepsilon u v o u \chi o \varsigma ~ \delta u v a \sigma \tau \eta \varsigma)$. Eunuchs were often employed by

in Lu 1:52 and of God in 1Ti 6:15. Eunuchs were not allowed to be Jews in the full sense (De 23:1), but only proselytes of the gate. But Christianity is spreading to Samaritans and to eunuchs.

Candace (Kavסакпऽ). Not a personal name, but like Pharaoh and Ptolemy, the title of the queens of Ethiopia. This eunuch apparently brought the gospel to Ethiopia.

Treasure ( $\gamma \alpha \zeta \eta \varsigma)$. Persian word, common in late Greek and Latin for the royal treasure, here only in the N.T.

For to worship ( $\pi \rho о \sigma \kappa v \nu \eta \sigma \omega v$ ). Future active participle expressing purpose, a common idiom in the ancient Greek, but rare in the N.T. (Robertson, Grammar, p. 1128).

Acts 8:28
Was reading ( $\alpha v \varepsilon \gamma \iota v \omega \sigma \kappa \varepsilon v)$ ). Imperfect active descriptive, not periphrastic like the two preceding verbs (was returning and sitting). He was reading aloud as Philip "heard him reading" ( $\eta$ коибєv autov avaүเv $\omega \sigma \kappa о \nu \tau о \varsigma)$, a common practice among orientals. He had probably purchased this roll of Isaiah in Jerusalem and was reading the LXX Greek text. See imperfect again in verse 32 .

Acts 8:29
Join thyself (кодл $\eta \boldsymbol{\eta} \tau)$. See this vivid word (be glued to, first aorist passive imperative) already in 5:13; Lu 10:11; 15:15. Philip probably jumped on the running board on the side of the chariot.

Acts 8:30
Understandest thou what thou readest? (A $\alpha \gamma \varepsilon \gamma เ \nu \omega \sigma \kappa \varepsilon ı \varsigma ~ \alpha \alpha v \alpha ı \nu \omega \sigma \kappa \varepsilon ו \sigma ?)$ The interrogative particle $\alpha \rho \alpha$ and the intensive particle $\gamma \varepsilon$ indicate doubt on Philip's part. The play ( $\pi \alpha \rho \alpha v o \mu \alpha \sigma \iota \alpha)$ upon the words in the Greek is very neat:

Do you know what you know again (read)? The verb for read ( $\alpha v \alpha \gamma เ v \omega \sigma \kappa \circ$ ) means to know the letters again, recognize, read. The famous comment of Julian about the Christian writings is often quoted: A $\nu \varepsilon \gamma \nu \omega v, \varepsilon \gamma \nu \omega v, \kappa \alpha \tau \varepsilon \gamma v \omega \nu$ (I read, I understood, I condemned). The keen retort was: Av $\nu \gamma \nu \omega \sigma, \alpha \lambda \lambda$ 'оик $\varepsilon \gamma \nu \omega \sigma, \varepsilon \gamma \alpha \rho \varepsilon \gamma \nu \omega \sigma$, оик $\alpha \nu \kappa \alpha \tau \varepsilon \gamma \nu \omega \varsigma$ (You read, but did not understand; for if you had understood, you would not have condemned).

Acts 8:31
How can I, except some one shall guide me? ( $\Pi \omega \varsigma \gamma \alpha \rho \alpha v \delta \nu v a \mu \eta \nu \varepsilon \alpha \nu \mu \varepsilon \tau \iota \varsigma ~ o \delta \eta \gamma \eta \sigma \varepsilon$ $\mu \varepsilon$ ?). This is a mixed condition, the conclusion coming first belongs to the fourth class (undetermined with less likelihood of being determined) with $\alpha v$ and the optative, but the condition ( $\varepsilon a v$, instead of the usual $\varepsilon$, and the future indicative) is of the first class (determined or fulfilled. Robertson, Grammar, p. 1022), a common enough phenomenon in the Koine. The eunuch felt the need of some one to guide ( $0 \delta \eta \gamma \varepsilon \omega$ from o $\delta \eta \gamma \circ \varsigma$, guide, and that from oठoc, way, and $\varepsilon \gamma \varepsilon \circ \mu \alpha$, to lead).

Acts 8:32

The place ( $\varepsilon \pi \varepsilon \rho \stackrel{\chi}{ } \boldsymbol{\pi})$ ). See the verb $\pi \varepsilon \rho \iota \varepsilon \chi \varepsilon$ so used in 1 Pe 2:6. The word is used either of the section as in Codex A before the beginning of Mark or the contents of a passage. He was here reading one particular passage (Isa 53:7f. ). The quotation is from the LXX which has some variations from the Hebrew.

Acts 8:33
Was taken away ( $\eta \rho \theta \eta$ ). First aorist passive indicative of $\alpha \iota \rho \omega$, to take away. It is not clear what the meaning is here either in the Hebrew or the LXX. Knowling suggests that the idea is that justice was withheld, done away with, in his death, as it certainly was in the death of Christ.

Acts 8:34
Of whom ( $\pi \varepsilon \rho \tau \operatorname{\tau } v o \varsigma$ ). Concerning whom, a pertinent inquiry surely and one that troubles many critics today.

Acts 8:35
Beginning from this scripture ( $\alpha \rho \xi \alpha \mu \varepsilon v o \varsigma ~ \alpha \pi о ~ \tau \eta \varsigma ~ \gamma \rho \alpha \varphi \eta \varsigma \tau \alpha \nu \tau \eta \varsigma)$. As a text. Philip needed no better opening than this Messianic passage in Isaiah.

Preached unto him Jesus ( $\varepsilon \cup \eta \gamma \gamma \varepsilon \lambda_{\iota} \sigma \alpha \tau 0 ~ \alpha v \tau \omega$ tov I I $\sigma o v v$ ). Philip had no doubt about the Messianic meaning and he knew that Jesus was the Messiah. There are scholars who do not find Jesus in the Old Testament at all, but Jesus himself did (Lu 24:27) as Philip does here. Scientific study of the Old Testament (historical research) misses its mark if it fails to find Christ the Center of all history. The knowledge of the individual prophet is not always clear, but after events throw a backward light that illumines it all (1Pe 1:11f.; 2Pe 1:19-21).

Acts 8:36
What doth hinder me to be baptized? (T $\kappa \omega \lambda \nu \varepsilon \mu \varepsilon \beta a \pi \tau \iota \sigma \theta \eta v \alpha!?)$. Evidently Philip had said something about baptism following faith and conversion. Verse 37 is not a genuine part of Acts, a western addition. Later baptismal liturgies had it.

Acts 8:39
Out of the water ( $\varepsilon \kappa$ tov vסatoc). Not from the edge of the water, but up out of the water as in Mr 1:10.

Caught away ( $\eta \rho \pi \alpha \sigma \varepsilon v$ ). Suddenly and miraculously, for $\alpha \rho \pi \alpha \zeta \omega$, like the Latin rapio, means to carry off. Cf. 2Co 12:2; 1Th 4:17.

Went on his way (عтореveto). Kept on going, imperfect active.
Acts 8:40
He preached the gospel ( $\varepsilon v \eta \gamma \gamma \varepsilon \lambda_{1}$ (£ $\varepsilon$ (o). Imperfect middle describing the evangelistic tour of Philip "till he came to Caesarea" ( $\varepsilon \omega \varsigma$ тov $\varepsilon \lambda \theta \varepsilon เ v ~ \alpha \nu \tau o v$, genitive articular infinitive with the preposition $\varepsilon \omega \varsigma$ and the accusative of general reference) where he made his home and headquarters thereafter (Ac 21:28) and was known as the Evangelist.

## Acts 9

Acts 9:1
Yet $(\varepsilon \tau)$. As if some time elapsed between the death of Stephen as is naturally implied by the progressive persecution described in $8: 3$. The zeal of Saul the persecutor increased with success.

Breathing threatening and slaughter ( $\varepsilon v \pi \nu \varepsilon \omega \nu \alpha \pi \varepsilon ı \lambda \eta \varsigma \kappa \alpha \varphi o v o v)$. Present active participle of old and common verb. Not "breathing out," but "breathing in" (inhaling) as in Aeschylus and Plato or "breathing on" (from Homer on). The partitive genitive of $\alpha \pi \varepsilon \iota \lambda \eta \varsigma$ and yovov means that threatening and slaughter had come to be the very breath that Saul breathed, like a warhorse who sniffed the smell of battle. He breathed on the remaining disciples the murder that he had already breathed in from the death of the others. He exhaled what he inhaled. Jacob had said that "Benjamin shall ravin as a wolf" (Ge 49:27). This greatest son of Benjamin was fulfilling this prophecy (Furneaux). The taste of blood in the death of Stephen was pleasing to young Saul (8:1) and now he revelled in the slaughter of the saints both men and women. In 26:11 Luke quotes Paul as saying that he was "exceedingly mad against them."

Acts 9:2
Asked ( $\eta \iota \tau \eta \sigma \alpha \tau 0)$. First aorist middle indicative, the indirect middle, asked for himself (as a favour to himself). Felten notes that "Saul as a Pharisee makes request of a Sadducee" (the high priest) either Caiaphas if before A.D. 35, but if in 36 Jonathan, son of Caiaphas or if in 37 Theophilus, another son of Caiaphas.

Letters ( $\varepsilon \pi \iota \sigma \tau \circ \lambda a \varsigma)$. Julius Ceasar and Augustus had granted the high priest and Sanhedrin jurisdiction over Jews in foreign cities, but this central ecclesiastical authority was not always recognized in every local community outside of Judea. Paul says that he received his authority to go to Damascus from the priests (Acts 26:10) and "the estate of the elders" (22:5), that is the Sanhedrin.

To Damascus (عıऽ $\Delta \alpha \mu \alpha \sigma \kappa о v$ ). As if no disciples of importance (outside the apostles in Jerusalem) were left in Judea. Damascus at this time may have been under the rule of Aretas of Arabia (tributary to Rome) as it certainly was a couple of years later when Saul escaped in a basket (2Co 11:32). This old city is the most enduring in the history of the world (Knowling). It is some 150 miles Northeast from Jerusalem and watered by the river Abana from Anti-Lebanon. Here the Jews were strong in numbers (10,000 butchered by Nero later) and here some disciples had found refuge from Saul's persecution in Judea and still worshipped in the synagogues. Paul's language in Ac $26: 11$ seems to mean that Damascus is merely one of other "foreign cities" to which he carried the persecution.

If he found $(\varepsilon \alpha v \varepsilon v \rho \eta)$. Third class condition with aorist subjunctive retained after secondary tense (asked).

The Way ( $\tau \eta \varsigma$ o $\delta o u$ ). A common method in the Acts for describing Christianity as the Way of life, absolutely as also in $19: 9,23 ; 22: 4 ; 24: 14,22$ or the way of salvation (16:17) or the way of the Lord ( 18:25). It is a Jewish definition of life as in Isa 40:3 "the way of the Lord," Ps 1:6 "the way of the righteous," "the way of the wicked." Jesus called himself "the way" (Joh 14:6), the only way to the Father. The so-called Epistle of Barnabas presents the Two Ways. The North American Indians call Christianity the Jesus Road.

That he might bring them bound (o $\pi \omega \varsigma \delta \varepsilon \delta \varepsilon \mu \varepsilon v o v \varsigma ~ \alpha \gamma \alpha \gamma \eta)$. Final clause with o $\pi \omega \varsigma$ (less common than $i v \alpha$ ) and aorist (effective) subjunctive ( $\alpha \gamma \alpha \gamma \eta$, reduplicated aorist of $\alpha \gamma \omega$, common verb) and perfect passive participle ( $\delta \varepsilon \delta \varepsilon \mu \varepsilon v o v \varsigma)$ of $\delta \varepsilon \omega$, in a state of sheer helplessness like his other victims both men and women. Three times (8:3; 9:2; 22:4) this fact of persecuting women is mentioned as a special blot in Paul's cruelty (the third time by Paul himself) and one of the items in his being chief of sinners (1Ti 1:15).

Acts 9:3
As he journeyed ( $\varepsilon \nu \tau \omega \pi \sigma \rho \varepsilon v \varepsilon \sigma \theta \alpha$ ). Luke's common idiom for a temporal clause (in the journeying), $\varepsilon v$ with the locative articular middle infinitive.

Drew nigh ( $\varepsilon \nmid \downarrow \zeta(\varepsilon \imath v)$. Present active infinitive, was drawing nigh.
Shone round about him (avtov $\pi \varepsilon \rho \emptyset \eta \sigma \tau \rho a \psi \varepsilon v$ ). First aorist (ingressive) active indicative of $\pi \varepsilon \rho เ a \sigma \tau \rho a \pi \tau \omega$, late compound verb common in LXX and Byzantine writers, here and 22:6 alone in the N.T. "A light from heaven suddenly flashed around him." It was like a flash of lightning. Paul uses the same verb in 22:5, but in 26:13 he employs $\pi \varepsilon \rho i \lambda \alpha \mu \psi \alpha v$ (shining around). There are numerous variations in the historical narrative of Saul's conversion in 9:3-18 and Luke's report of Paul's two addresses, one on the steps of the Tower of Antonia facing the murderous mob ( 22:6-16), the other before Festus and Agrippa ( 26:12-20). A great deal of capital has been made of these variations to the discredit of Luke as a writer as if he should have made Paul's two speeches conform at every point with his own narrative. This objection has no weight except for those who hold that Luke composed Paul's speeches freely as some Greek writers used to do. But, if Luke had notes of Paul's speeches or help from Paul himself, he naturally preserved the form of the two addresses without trying to make them agree with each other in all details or with his own narrative in chapter 9. Luke evidently attached great importance to the story of Saul's conversion as the turning point not simply in the career of the man, but an epoch in the history of apostolic Christianity. In broad outline and in all essentials the three accounts agree and testify to the truthfulness of the account of the conversion of Saul. It is impossible to overestimate the worth to the student of Christianity of this event from every angle because we have in Paul's Epistles his own emphasis on the actual appearance of Jesus to him as the fact that changed his whole life ( $1 \mathrm{Co} 15: 8$; Ga 1:16f. ). The variations that appear in the three accounts do not mar the story, when rightly understood, as we shall see. Here, for instance, Luke simply mentions "a light from heaven," while in 22:6 Paul calls it "a great (ıкavov) light" "about noon" and in

26:13 "above the brightness of the sun," as it would have to be "at midday" with the sun shining.

Acts 9:4
He fell upon the earth $(\pi \varepsilon \sigma \omega v \varepsilon \pi \tau \eta \nu \gamma \eta v)$. Second aorist active participle. So in 22:7 Paul says: "I fell unto the ground" ( $\varepsilon \pi \varepsilon \sigma \alpha \varepsilon \iota \varsigma \tau 0 \varepsilon \delta \alpha \varphi \bigcirc \varsigma)$ using an old word rather than the common $\gamma \eta \nu$. In 26:14 Paul states that "we were all fallen to the earth" ( $\pi \alpha \nu \tau \omega \nu \kappa \alpha \tau \alpha \pi \varepsilon \sigma o \nu \tau \omega \nu$ $\eta \mu \omega \nu \varepsilon \iota \varsigma \tau \nu \gamma \eta \nu$, genitive absolute construction). But here in verse 7 "the men that journeyed with him stood speechless" (เбтๆкєเбav $\varepsilon v \varepsilon \circ$ ). But surely the points of time are different. In 26:14 Paul refers to the first appearance of the vision when all fell to the earth. Here in verse 7 Luke refers to what occurred after the vision when both Saul and the men had risen from the ground.

Saul, Saul ( $\Sigma \alpha o v \lambda, \Sigma \alpha o v \lambda$ ). The Hebrew form occurs also in 22:7; $26: 14$ where it is expressly stated that the voice was in the Hebrew (Aramaic) tongue as also in 9:17 (Ananias). Deissmann (Bible Studies, p. 316) terms this use of $\sum \alpha o v \lambda$ "the historian's sense of liturgical rhythm." For the repetition of names by Jesus note Lu 10:41 (Martha, Martha), Lu 22:31 (Simon, Simon).

Me ( $\mu \varepsilon$ ). In persecuting the disciples, Saul was persecuting Jesus, as the words of Jesus in verse 5 made plain. Christ had already spoken of the mystic union between himself and his followers (Mt 10:40; 25:40,45; Joh 15:1-5 ). The proverb (Pindar) that Jesus quotes to Saul about kicking against the goad is genuine in 26:14, but not here.

## Acts 9:5

Lord (кирьє). It is open to question if кирıє should not here be translated "Sir" as in 16:30 and in Mt 21:29,30; Joh 5:7; 12:21; 20:15 ; and should be so in Joh 9:36 . It is hardly likely that at this stage Saul recognized Jesus as Lord, though he does so greet him in 22:10 "What shall I do, Lord?" Saul may have recognized the vision as from God as Cornelius says "Lord" in 10:4. Saul surrendered instantly as Thomas did (Joh 20:28) and as little Samuel (1Sa 3:9 ). This surrender of the will to Christ was the conversion of Saul. He saw a real Person, the Risen Christ, to whom he surrendered his life. On this point he never wavered for a moment to the end.

Acts 9:6
The best MSS. do not have "trembling and astonished," and "What wilt thou have me to do, Lord?" The Textus Receptus put these words in here without the authority of a Greek codex. See 22:10 above for the genuine text.

It shall be told thee $(\lambda \alpha \lambda \eta \theta \eta \sigma \varepsilon \tau \alpha)$. Future passive indicative of $\lambda \alpha \lambda \varepsilon \omega$. It is hardly likely that Luke records all that Jesus said to Saul, but more was to come on his arrival in Damascus. Saul had received all that he could bear just now (Joh 16:12).

What (oт). Rare in Koine use of this indefinite neuter relative in an indirect question, the only example in the N.T. (Robertson, Grammar, p. 731). Human agents like Ananias can finish what Jesus by supernatural manifestation has here begun in Saul.

Acts 9:7
That journeyed with him (o ovvoסعvovte¢ $\alpha v \tau \omega$ ). Not in the older Greek, but in the Koine, with the associative instrumental.

Speechless ( $\varepsilon v \varepsilon o$ ). Mute. Only here in N.T., though old word.
Hearing the voice, but beholding no man ( $\alpha \kappa о v o v \tau \varepsilon \varsigma ~ \mu \varepsilon v \tau \eta \varsigma \varphi \omega v \eta \sigma, \mu \eta \delta \varepsilon v \alpha \delta \varepsilon$ $\theta \varepsilon \omega \rho 0 u v \tau \varepsilon \varsigma)$. Two present active participles in contrast ( $\mu \varepsilon v, \delta \varepsilon$ ). In 22:9 Paul says that the men "beheld the light" ( $\tau \boldsymbol{\mu} \mu \nu \varphi \omega \varsigma \varepsilon \theta \varepsilon \alpha \sigma \alpha v \tau 0)$, but evidently did not discern the person. Paul also says there, "but they heard not the voice of him that spake to me" ( $\tau \eta \nu \delta \varepsilon \varphi \omega \eta \nu$ оик $\eta \kappa о v \sigma \alpha \nu$ тои $\lambda \alpha \lambda$ оuvтос $\mu \circ$ ). Instead of this being a flat contradiction of what Luke says in $9: 7$ it is natural to take it as being likewise (as with the "light" and "no one") a distinction between the "sound" (original sense of $\varphi \omega v \eta$ as in Joh 3:8) and the separate words spoken. It so happens that $\alpha \kappa \sigma \omega \omega$ is used either with the accusative (the extent of the hearing) or the genitive (the specifying). It is possible that such a distinction here coincides with the two senses of $\varphi \omega v \eta$. They heard the sound ( 9:7), but did not understand the words (22:9). However, this distinction in case with $\alpha \kappa о v \omega$, though possible and even probable here, is by no means a necessary one for in Joh 3:8 where $\varphi \omega \nu \eta \nu$ undoubtedly means "sound" the accusative occurs as Luke uses $\eta$ кouбع $\varphi \omega \nu \eta \nu$ about Saul in Ac 9:4. Besides in 22:7 Paul uses $\eta \kappa о \cup \sigma \alpha \propto \omega \nu \eta \varsigma$ about himself, but $\eta \kappa о \nu \sigma \alpha \varphi \omega \nu \eta \nu$ about himself in 76:14, interchangeably.

Acts 9:8
He saw nothing (ov $\delta \varepsilon v \varepsilon \beta \lambda \varepsilon \pi \varepsilon v$ ). Imperfect active indicative, was seeing nothing. "The glory of that light" ( $22: 11$ ) when he saw Jesus had blinded his eyes now wide open ( $\alpha v \varepsilon \omega \iota \gamma \mu \varepsilon \nu \omega \nu$, perfect passive participle of $\alpha v o t \gamma \omega$ with double reduplication). The blindness was proof that something had happened to him and that it was no hallucination that he had seen the Risen Christ. Saul arose after the others were on their feet.

They led him by the hand ( $\chi \varepsilon \iota \rho a \gamma \omega \gamma о \cup \nu \tau \varepsilon \varsigma)$. From $\chi \varepsilon \iota \rho a \gamma \omega \gamma \circ \varsigma$ ( $\chi \varepsilon \rho$, hand and $\alpha \gamma \omega$, to lead). Only here in the N.T., but in LXX and late writers though not in the old Greek. It was a pathetic picture to see the masterful Saul, victorious persecutor and conqueror of the disciples, now helpless as a child.

Acts 9:9
Not seeing ( $\mu \eta \beta \lambda \varepsilon \pi \omega v$ ). The usual negative $\mu \eta$ of the participle. It was a crisis for Saul, this sudden blindness for three days ( $\eta \mu \varepsilon \rho \alpha \varsigma \tau \rho \varepsilon \varsigma$, accusative of extent of time). Later ( Ga 4:15) Paul has an affection of the eyes which may have been caused by this experience on the road to Damascus or at least his eyes may have been predisposed by it to weakness in the glare of the Syrian sun in the land where today so much eye trouble exists. He neither
ate nor drank anything, for his appetite had gone as often happens in a crisis of the soul. These must have been days of terrible stress and strain.

Acts 9:10
Ananias (Havaviac). Name common enough (cf. 5:1 for another Ananias) and means "Jehovah is gracious." Nomen et omen (Knowling). This Ananias had the respect of both Jews and Christians in Damascus (22:12).

In a vision $(\varepsilon v o \rho \alpha \mu \alpha \tau)$. Zeller and others scout the idea of the historicity of this vision as supernatural. Even Furneaux holds that "it is a characteristic of the Jewish Christian sources to point out the Providential ordering of events by the literary device of a vision," as "in the early chapters of Matthew's and Luke's Gospels." He is content with this "beautiful expression of the belief" with no interest in the actual facts. But that is plain illusion, not to say delusion, and makes both Paul and Luke deceived by the story of Ananias (9:10-18; $22: 12-16,26$ ). One MS. of the old Latin Version does omit the vision to Ananias and that is basis enough for those who deny the supernatural aspects of Christianity.

Acts 9:11
To the street $(\varepsilon \pi \tau \eta v \rho v \mu \eta v)$. See on Lu 14:21. A run way (from $\rho \varepsilon \omega$, to run) between the houses. So were the narrow lanes or alleys called streets and finally in later Greek the word is applied to streets even when broad.

Straight $(\varepsilon \cup \theta \varepsilon \iota \alpha v)$. Most of the city lanes were crooked like the streets of Boston (old cow-paths, people say), but this one still runs "in a direct line from the eastern to the western gate of the city" (Vincent). Since the ancients usually rebuilt on the same sites, it is probable that the line of the street of that name today is the same, though the actual level has been much raised. Hence the identification of the house of Ananias and the house of Judas are very precarious.

Acts 9:12
Coming in and laying ( $\varepsilon \iota \sigma \varepsilon \lambda \theta$ ov $\alpha \alpha \kappa \alpha \varepsilon \pi \iota \theta \varepsilon \nu \tau \alpha$ ). Second aorist (ingressive) active participles picturing the punctiliar act as a sort of indirect discourse after verbs of sensation (Robertson, Grammar, pp. 1040-2). Some ancient documents do not have "in a vision" here.

Receive his sight ( $\alpha v \alpha \beta \lambda \varepsilon \psi \varepsilon$ ). First aorist active subjunctive with o $\pi \omega \varsigma$ (purpose). See again as in 9:17.

Acts 9:13
How much evil (оба кака). How many evil things. Saul's reputation (26:10) as a persecutor had preceded him.

To thy saints ( $\tau$ oıs $\alpha$ үוoıৎ). Dative of disadvantage. "Used here for the first time as a name for the Christians" (Knowling), but it came to be the common and normal (Hackett) term for followers of Christ ( $9: 32,41 ; 26: 10 ; 1$ Co $1: 2$, etc.). This common word is from to $\alpha \gamma \circ \varsigma$, religious awe or reverence and is applied to God's name (Lu 1:49), God's temple (Mt 24:15 ), God's people as set apart for God (Lu 1:70; 2:23; Ro 1:7, etc.). Ananias in his ignor-
ance saw in Saul only the man with an evil reputation while Jesus saw in Saul the man transformed by grace to be a messenger of mercy.

Acts 9:14
Hath authority ( $\varepsilon \chi \varepsilon \varepsilon \xi$ ovoıav). Probably Ananias had received letters from the Christians left in Jerusalem warning him of the coming of Saul. The protest of Ananias to Jesus against any dealing with Saul is a fine illustration of our own narrow ignorance in our rebellious moods against the will of God.

Acts 9:15
A chosen vessel ( $\sigma \kappa \varepsilon \cup \circ \varsigma \varepsilon \kappa \lambda о \gamma \eta \varsigma)$. A vessel of choice or selection. The genitive of quality is common in the Hebrew, as in the vernacular Koine. Jesus chose Saul before Saul chose Jesus. He felt of himself that he was an earthen vessel (2Co 4:7) unworthy of so great a treasure. It was a great message that Ananias had to bear to Saul. He told it in his own way (9:17; 22:14f. ) and in 26:16f. Paul blends the message of Jesus to Ananias with that to him as one.

Before the Gentiles ( $\varepsilon v \omega \pi \iota \nu \tau \omega v \varepsilon \theta \nu \omega v$ ). This was the chief element in the call of Saul. He was to be an apostle to the Gentiles (Eph 3:6-12).

Acts 9:16
I will shew (v爪оঠعı $\xi \omega$ ). Beforehand as a warning as in Lu 3:7 and from time to time.
He must suffer ( $\delta \varepsilon \alpha v \tau o v \pi \alpha \theta \varepsilon ı v$ ). Constative aorist active infinitive ( $\pi \alpha \theta \varepsilon \iota v$, from $\pi \alpha \sigma \chi \omega)$ covering the whole career of Saul. Suffering is one element in the call that Saul receives. He will learn "how many things" (ooa) are included in this list by degrees and by experience. A glance at 2Co 10-12 will show one the fulfilment of this prophecy. But it was the "gift" of Christ to Paul to go on suffering ( $\pi \alpha \sigma \chi \varepsilon \iota \nu$, present infinitive, Php 1:39).

Acts 9:17
Laying his hands on him ( $\left.\varepsilon \pi \iota \theta \varepsilon ı \varsigma \varepsilon \pi^{\prime} \alpha v \tau 0 \nu \tau \alpha \varsigma \chi \varepsilon \iota \rho \alpha \varsigma\right)$. As in the vision Saul saw (verse 12).

Brother Saul ( $\Sigma \alpha o v \lambda \alpha \delta \varepsilon \lambda \varphi \varepsilon$ ). All suspicion has vanished and Ananias takes Saul to his heart as a brother in Christ. It was a gracious word to Saul now under suspicion on both sides.
 to Jesus.

Who appeared ( $\circ$ o $\varphi \theta \varepsilon \iota \varsigma$ ). First aorist passive participle of opac, was seen as in 26:16 and with the dative also ( $\sigma o$ ).

Thou camest ( $\eta \rho \chi \circ v$ ). Imperfect indicative middle, "thou wert coming."
Be filled with the Holy Spirit ( $\pi \lambda \eta \sigma \theta \varepsilon ı \varsigma \pi v \varepsilon v \mu \alpha \tau \circ \varsigma \alpha \nLeftarrow \circ v$ ). This enduement of special power he will need as an apostle (Hackett) and as promised by Jesus (1:8; Ga 2:7 ).

Acts 9:18

Fell off ( $\alpha \pi \varepsilon \pi \varepsilon \sigma \alpha \nu$ ). Second aorist active indicative (note--an ending like first aorist) of $\alpha \pi \sigma \pi \iota \pi \tau \omega$, old verb, but here alone in the N.T.

As if it were scales ( $\omega \varsigma \lambda \varepsilon \pi \iota \delta \varepsilon \varsigma$ ). Chiefly late word (LXX) from $\lambda \varepsilon \pi \omega$, to peel, and only here in the N.T. See Tobit 11:13, "The white film peeled from his eyes" ( $\varepsilon \lambda \varepsilon \pi \iota \sigma \theta \eta$ ). Luke does not say that actual "scales" fell from the eyes of Saul, but that it felt that way to him as his sight returned, "as if" $(\omega \varsigma)$. Medical writers use the word $\lambda \varepsilon \pi \iota \varsigma$ for pieces of the skin that fall off (Hobart, Medical Language of St. Luke, p. 39). Luke may have heard Paul tell of this vivid experience.

Was baptized $(\varepsilon \beta \alpha \pi \tau \iota \sigma \theta \eta)$. First aorist passive indicative. Apparently by Ananias ( $22: 16$ ) as a symbol of the new life in Christ already begun, possibly in the pool in the house of Judas as today water is plentiful in Damascus or in Abana or Pharpar (Furneaux), better than all the waters of Israel according to Naaman (2Ki 5:12).

Acts 9:19
Was strengthened $(\varepsilon \nu \iota \sigma \chi \cup \theta \eta)$. First aorist passive indicative of $\varepsilon \nu เ \sigma \chi \cup \omega$, to receive strength ( $ا \sigma \chi \cup \varsigma)$, comparatively late verb and here only in the N.T. save Lu 22:43 where it is doubtful. Poor verse division. This clause belongs in sense to verse 18.

Some days ( $\eta \mu \varepsilon \rho a \varsigma \tau \iota \downarrow \propto)$. An indefinite period, probably not long, the early period in Damascus before Saul left for Arabia (Ga 1:13-24 ).

Acts 9:20
He proclaimed Jesus ( $\varepsilon \kappa \eta \rho v \sigma \sigma \varepsilon v \tau o v$ I $\eta \sigma o v v$ ). Imperfect indicative, inchoative, began to preach. Jesus, not Christ, is the correct text here. He did this first preaching in the Jewish synagogues, a habit of his life when possible, and following the example of Jesus.

That he is the Son of God (o ov ovoc $\varepsilon \sigma \tau \iota v$ o vioc $\tau 0 v \theta \varepsilon o v$ ). This is Paul's platform as a Christian preacher, one that he always occupied to the very end. It was a complete reversal of his previous position. Jesus had turned him completely around. It is the conclusion that Saul now drew from the vision of the Risen Christ and the message through Ananias. By "the Son of God" Saul means the Messiah of promise and hope, the Messianic sense of the Baptist (Joh 1:34) and of Nathanael (Joh 1:49) for Saul is now proclaiming his faith in Jesus in the very synagogues where he had meant to arrest those who professed their faith in him. Peter laid emphasis on the Resurrection of Jesus as a glorious fact and proclaimed Jesus as Lord and Christ. Paul boldly calls Jesus the Son of God with full acknowledgment of his deity from the very start. Thomas had come to this place slowly (Joh 20:28). Saul begins with this truth and never leaves it. With this faith he can shake the world. There is no power in any other preaching.

Acts 9:21
Were amazed ( $\varepsilon \xi \iota \sigma \tau \alpha v \tau o$ ). Imperfect middle indicative of $\varepsilon \xi \iota \sigma \tau \eta \mu$. They continued to stand out of themselves in astonishment at this violent reversal in Saul the persecutor.

Made havock ( $\pi$ o $\rho \theta \eta \sigma \alpha \varsigma$ ). First aorist active participle of $\pi \rho \rho \theta \varepsilon \omega$, to lay waste, an old verb, but only here and Ga 1:13,23 by Paul, an interesting coincidence. It is the old proverb about Saul among the prophets (1Sa 10:12) revived with a new meaning (Furneaux).

Had come ( $\varepsilon \lambda \eta \lambda \cup \theta \varepsilon$ ). Past perfect indicative active.
Might bring ( $\alpha \gamma \alpha \gamma \eta$ ). Second aorist (effective) active subjunctive of $\alpha \gamma \omega$ with $\mathfrak{\imath} \alpha$ (purpose).

Bound ( $\delta \varepsilon \delta \varepsilon \mu \varepsilon v o v \varsigma)$. Perfect passive participle of $\delta \varepsilon \omega$. Interesting tenses.
Acts 9:22
Increased the more ( $\mu \alpha \lambda \lambda o v \varepsilon v \varepsilon \delta u v a \mu o v \tau o)$. Imperfect passive indicative of $\varepsilon v \delta v v a \mu o \omega$, to receive power (late verb), progressive increase in strength as opposition grew. Saul's recantation stirred controversy and Saul grew in power. See also Paul in Php 4:13; 1Ti 1:12; 2Ti 2:1; 4:17; Ro 4:20. Christ, the dynamo of spiritual energy, was now pouring power (Ac 1:8) into Paul who is already filled with the Holy Spirit (Ac 9:17).

Confounded ( $\sigma 0 v \varepsilon \chi \cup v \nu \varepsilon v$ ). Imperfect active indicative of $\sigma 0 v \chi \cup v v \omega$ (late form of $\sigma ט v \chi \varepsilon \omega$, to pour together, commingle, make confusion. The more Saul preached, the more the Jews were confused.

Proving ( $\sigma v \nu \beta \iota \beta \alpha \zeta \omega v$ ). Present active participle of $\sigma v \nu \beta \iota \beta \alpha \zeta \omega$, old verb to make go together, to coalesce, to knit together. It is the very word that Luke will use in 16:10 of the conclusion reached at Troas concerning the vision of Paul. Here Saul took the various items in the life of Jesus of Nazareth and found in them the proof that he was in reality "the Messiah" (o Xpıбтos). This method of argument Paul continued to use with the Jews (Ac 17:3 ). It was irresistible argument and spread consternation among the Jews. It was the most powerful piece of artillery in the Jewish camp that was suddenly turned round upon them. It is probable that at this juncture Saul went into Arabia for several years (Ga 1:12-24). Luke makes no mention of this important event, but he leaves ample room for it at this point.

Acts 9:23
When many days were fulfilled ( $\mathrm{H} \omega \varsigma \varepsilon \pi \lambda \eta \rho \circ \cup v \tau 0 \quad \eta \mu \varepsilon \rho \alpha$ เк $\alpha v \alpha$ ). Imperfect passive indicative of $\pi \lambda \eta \rho o \omega$, old and common verb, were in process of being fulfilled. How "many" (considerable, ıкаva, common word for a long period) Luke does not say nor does he say that Saul spent all of this period in Damascus, as we know from Ga 1:16-18 was not the case. Paul there states definitely that he went away from Damascus to Arabia and returned there before going back to Jerusalem and that the whole period was about "three years" which need not mean three full years, but at least portions of three. Most of the three years was probably spent in Arabia because of the two explosions in Damascus (before his departure and on his return) and because he was unknown in Jerusalem as a Christian on his arrival there. It cannot be argued from the frequent lacunae in the Acts that Luke tells all that was true or that he knew. He had his own methods and aims as every historian has. We are at perfect liberty to supplement the narrative in the Acts with items from Paul's Epistles. So
we must assume the return of Saul from Arabia at this juncture, between verses 22,23, when Saul resumed his preaching in the Jewish synagogues with renewed energy and grasp after the period of mature reflection and readjustment in Arabia.

Took counsel together ( $\sigma \cup v \varepsilon \beta$ ou $\varepsilon$ عvoavto). First aorist (effective) middle indicative of $\sigma u v \beta o u \lambda \varepsilon v \omega$, old and common verb for counselling ( $\beta o v \lambda \varepsilon v \omega$ ) together ( $\sigma v v$ ). Things had reached a climax. It was worse than before he left for Arabia. Paul was now seeing the fulfilment of the prophecy of Jesus about him (9:16).

To kill him ( $\alpha v \varepsilon \lambda \varepsilon เ v ~ a v \tau o v)$. Second aorist (effective) active infinitive of $\alpha v a \iota \rho \varepsilon \omega$, to take up, to make away with, to kill ( $\mathrm{Lu} 23: 32$; $\mathrm{Ac} 12: 1$, etc.). The infinitive expresses purpose here as is done in verse 24 by o $\pi \omega \varsigma$ and the aorist active subjunctive of the same verb ( $\alpha v \varepsilon \lambda \omega \sigma \tau v$ ). Saul now knew what Stephen had suffered at his hands as his own life was in peril in the Jewish quarter of Damascus. It was a picture of his old self. He may even have been scourged here (2Co 11:24).

Acts 9:24
Plot $(\varepsilon \pi / \beta o u \lambda \eta)$. Old word for a plan ( $\beta o u \lambda \eta$ ) against $(\varepsilon \pi)$ one. In the N.T. only in Acts (9:24; 20:3,19; 23:30).

They watched ( $\pi \alpha \rho \varepsilon \tau \eta \rho o u v \tau 0$ ). Imperfect middle indicative of $\pi \alpha \rho \alpha \tau \eta \rho \varepsilon \omega$, common verb in late Greek for watching beside ( $\pi \alpha \rho \alpha$ ) or insidiously or on the sly as in $\mathrm{Lu} 6: 7$, they kept on watching by day and night to kill him. In 2Co 11:32 Paul says that the Ethnarch of Aretas "kept guard" ( $\varepsilon \varphi \rho \circ 0 \rho \varepsilon$, imperfect active of $\varphi \rho \circ \cup \rho \varepsilon \omega$ ) to seize him. Probably the Jews obtained the consent of the Ethnarch and had him appoint some of them as guards or watchers at the gate of the city.

Acts 9:25
 $\delta \iota \alpha \theta u \rho ı \delta o c$ (through a window) which opened into the house on the inside of the wall as is true today in Damascus as Hackett saw there. See Jos 2:15f. (cf. 1Sa 19:12) for the way that Rahab let out the spies "by a cord through the window."

Lowering him ( $\alpha \cup \tau 0 v \chi \alpha \lambda \alpha \sigma \alpha \nu \tau \varepsilon \varsigma)$. First aorist active participle of $\chi \alpha \lambda \alpha \omega$, old and common verb in a nautical sense (Ac 27:17,30) as well as otherwise as here. Same verb used by Paul of this experience (2Co 11:33).

In a basket ( $\varepsilon v \sigma \varphi \cup \rho \iota \delta$ ). The word used when the four thousand were fed (Mr 8:8; Mt 15:37 ). A large basket plaited of reeds and distinguished in Mr 8:19f. (Mt 16:9f. ) from the smaller корıvoc. Paul uses $\sigma \alpha \rho \gamma \alpha v \eta$, a basket made of ropes. This escape by night by the help of the men whom he had come to destroy was a shameful memory to Paul (2Co 11:33 ). Wendt thinks that the coincidences in language here prove that Luke had read II Corinthians. That, of course, is quite possible.

Acts 9:26
He assayed ( $\varepsilon \pi \varepsilon \mid \rho \alpha \zeta \varepsilon v)$ ). Imperfect active of conative action.

To join himself ( $\kappa о \lambda \lambda \alpha \sigma \theta \alpha$ ). Present middle (direct) infinitive of conative action again. Same word кo入入aw in Lu 15:15; Ac 10:28. See on Mt 19:5 for discussion.

Were all afraid of him ( $\pi \alpha \nu \tau \varepsilon \varsigma \varepsilon \varphi \circ \beta o u v \tau 0 \alpha v \tau o v$ ). They were fearing him. Imperfect middle picturing the state of mind of the disciples who had vivid recollections of his conduct when last here. What memories Saul had on this return journey to Jerusalem after three years. He had left a conquering hero of Pharisaism. He returns distrusted by the disciples and regarded by the Pharisees as a renegade and a turncoat. He made no effort to get in touch with the Sanhedrin who had sent him to Damascus. He had escaped the plots of the Jews in Damascus only to find himself the object of suspicion by the disciples in Jerusalem who had no proof of his sincerity in his alleged conversion.

Not believing ( $\mu \eta \pi / \sigma \tau \varepsilon v o v \tau \varepsilon \varsigma)$. They had probably heard of his conversion, but they frankly disbelieved the reports and regarded him as a hypocrite or a spy in a new role to ruin them.

Was ( $\varepsilon \sigma \tau \iota v)$. The present tense is here retained in indirect discourse according to the common Greek idiom.

Acts 9:27
Took him ( $\varepsilon \pi \iota \lambda \alpha \beta o \mu \varepsilon v o \varsigma)$. Second aorist middle (indirect) participle of $\varepsilon \pi \iota \lambda \alpha \mu \beta \alpha v \omega$, common verb to lay hold of. Barnabas saw the situation and took Saul to himself and listened to his story and believed it. It is to the credit of Barnabas that he had the insight and the courage to stand by Saul at the crucial moment in his life when the evidence seemed to be against him. It is a pleasing hypothesis that this influential disciple from Cyprus had gone to the University of Tarsus where he met Saul. If so, he would know more of him than those who only knew his record as a persecutor of Christians. That fact Barnabas knew also, but he was convinced that Jesus had changed the heart of Saul and he used his great influence (Ac 4:36; 11:22) to win the favour of the apostles, Peter in particular (Ga 1:19) and James the half-brother of Jesus. The other apostles were probably out of the city as Paul says that he did not see them.

To the apostles ( $\pi \rho \circ \varsigma \tau$ тouc $\alpha \pi о \sigma \tau 0 \lambda o v \varsigma)$ ). Both Barnabas and James are termed apostles in the general sense, though not belonging to the twelve, as Paul did not, though himself later a real apostle. So Barnabas introduced Saul to Peter and vouched for his story, declared it fully ( $\delta ı \eta \gamma \eta \sigma \alpha \tau 0$, in detail) including Saul's vision of Jesus ( $\varepsilon \iota \delta \varepsilon v$ tov кирıov) as the vital thing and Christ's message to Saul ( $\varepsilon \lambda \alpha \lambda \eta \sigma \varepsilon v a v \tau \omega)$ and Saul's bold preaching ( $\eta \pi \alpha \rho \rho \eta \sigma \iota \sigma \sigma \alpha \tau$, first aorist middle indicative of $\pi \alpha \rho \rho \eta \sigma \iota \alpha \omega \omega$ from $\pi \alpha v--\rho \eta \sigma \iota \alpha$ telling it all as in Ac 2:29). Peter was convinced and Saul was his guest for two weeks (Ga 1:18) with delightful fellowship (เбто $\eta \sigma \alpha$ ). He had really come to Jerusalem mainly "to visit" (to see) Peter, but not to receive a commission from him. He had that from the Lord (Ga 1:1f. ). Both Peter and James could tell Saul of their special experiences with the Risen Christ. Furneaux thinks that Peter was himself staying at the home of Mary the mother of John

Mark (Ac 12:12) who was a cousin of Barnabas ( $\operatorname{Col} 4: 10$ ). This is quite possible. At any rate Saul is now taken into the inner circle of the disciples in Jerusalem.

Acts 9:28
Going in and going out ( $\varepsilon є \sigma \pi о \rho \varepsilon ч \mu \varepsilon v о \varsigma ~ к а ~ \varepsilon к \pi о \rho \varepsilon v о \mu \varepsilon ข о \varsigma) . ~ B a r n a b a s ~ a n d ~ P e t e r ~ a n d ~$ James opened all the doors for Saul and the fear of the disciples vanished.

## Acts 9:29

Preaching boldly ( $\pi \alpha \rho \rho \eta \sigma \tau \propto\lceil\mu \varepsilon v o \varsigma)$. For a while. Evidently Saul did not extend his preaching outside of Jerusalem ( $\mathrm{Ga} 1: 22$ ) and in the city preached mainly in the synagogues of the Hellenists ( $\pi \rho \circ \varsigma$ тouc $\mathrm{H} \varepsilon \lambda \lambda \varepsilon v ⿺ \sigma \tau \alpha \varsigma)$ as Stephen had done (Ac 8:9). As a Cilician Jew he knew how to speak to the Hellenists.

Disputed ( $\sigma \cup v \varepsilon \zeta \eta \tau \varepsilon$ ). Imperfect active of $\sigma \cup v\lceil\eta \tau \varepsilon \omega$, the very verb used in 6:9 of the disputes with Stephen in these very synagogues in one of which (Cilicia) Saul had probably joined issue with Stephen to his own discomfort. It was intolerable to these Hellenistic Jews now to hear Saul taking the place of Stephen and using the very arguments that Stephen had employed.

But they went about to kill him (Ho $\delta \varepsilon \varepsilon \pi \varepsilon \chi \varepsilon \rho \rho o v \nu ~ a v \varepsilon \lambda \varepsilon ı \nu ~ \alpha u \tau o v) . ~ D e m o n s t r a t i v e ~ o ~$ with $\delta \varepsilon$ and the conative imperfect of $\varepsilon \pi \iota \chi \varepsilon เ \rho \varepsilon \omega$, to put the hand to, to try, an old verb used in the N.T. only three times ( $\operatorname{Lu} 1: 1 ; \operatorname{Ac} 9: 29 ; 19: 3$ ). They offer to Saul the same conclusive answer that he gave to Stephen, death. Paul tells how the Lord Jesus appeared to him at this juncture in a vision in the temple (Ac 22:17-21) with the distinct command to leave Jerusalem and how Paul protested that he was willing to meet the fate of Stephen in whose death he had a shameful part. That is to Saul's credit, but the Lord did not want Saul to be put to death yet. His crown of martyrdom will come later.

Acts 9:30
Knew it ( $\varepsilon \pi เ \gamma v o v \tau \varepsilon \varsigma)$. Second aorist active participle of $\varepsilon \pi \iota \gamma \iota v \omega \sigma \kappa \omega$, to know fully. The disciples saw it clearly, so they
conducted ( $\kappa \alpha \tau \eta \gamma \alpha \gamma \circ v$, effective second aorist active indicative of $\kappa \alpha \tau \alpha \gamma \omega$ ).
Sent forth ( $\varepsilon \xi \alpha \pi \varepsilon \sigma \tau \varepsilon \backslash \lambda \alpha v$ ). Double compound ( $\varepsilon \xi$, out, $\alpha \pi 0$, away or off). Sent him out and off
to Tarsus ( $\varepsilon \iota \varsigma$ Tapoov). Silence is preserved by Luke. But it takes little imagination to picture the scene at home when this brilliant young rabbi, the pride of Gamaliel, returns home a preacher of the despised Jesus of Nazareth whose disciples he had so relentlessly persecuted. What will father, mother, sister think of him now?

Acts 9:31
So the church ( $\mathrm{H} \eta \mu \varepsilon v$ ouv єкк $\lambda \eta \sigma \iota \alpha$ ). The singular $\varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$ is undoubtedly the true reading here (all the great documents have it so). By this time there were churches scattered over Judea, Galilee, and Samaria (Ga 1:22), but Luke either regards the disciples in Palestine as still members of the one great church in Jerusalem (instance already the work of Philip
in Samaria and soon of Peter in Joppa and Caesarea) or he employs the term $\varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$ in a geographical or collective sense covering all of Palestine. The strictly local sense we have seen already in 8:1,3 (and Mt 18:17) and the general spiritual sense in Mt 16:18. But in Ac 8:3 it is plain that the term is applied to the organization of Jerusalem Christians even when scattered in their homes. The use of $\mu \varepsilon v$ ouv (so) is Luke's common way of gathering up the connection. The obvious meaning is that the persecution ceased because the persecutor had been converted. The wolf no longer ravined the sheep. It is true also that the effort of Caligula A.D. 39 to set up his image in the temple in Jerusalem for the Jews to worship greatly excited the Jews and gave them troubles of their own (Josephus, Ant. XVIII. 8, 2-9).

Had peace ( $\varepsilon ı \chi \varepsilon v \varepsilon ı \rho \eta \nu \eta v)$ ). Imperfect active. Kept on having peace, enjoying peace, because the persecution had ceased. Many of the disciples came back to Jerusalem and the apostles began to make preaching tours out from the city. This idiom ( $\varepsilon \chi \omega \varepsilon \iota \rho \eta \nu \eta \nu$ ) occurs again in Ro 5:1 ( $\varepsilon \iota \rho \eta \nu \eta v \varepsilon \chi \omega \mu \varepsilon v$, present active subjunctive) where it has been grievously misunderstood. There it is an exhortation to keep on enjoying the peace with God already made, not to make peace with God which would be $\varepsilon เ \rho \eta \nu \eta \nu \sigma \chi \omega \mu \varepsilon \nu$ (ingressive aorist subjunctive).

Edified (oккоסoبоинвvŋ). Present passive participle, linear action also. One result of the enjoyment of peace after the persecution was the continued edification (Latin word aedificatio for building up a house), a favourite figure with Paul (1Co 14; Eph 3 ) and scattered throughout the N.T., old Greek verb. In 1Pe 2:5 Peter speaks of "the spiritual house" throughout the five Roman provinces being "built up" (cf. Mt 16:18) .

In the comfort of the Holy Spirit ( $\tau \eta \pi \alpha \rho \alpha \kappa \lambda \eta \sigma \varepsilon \tau о v ~ a \gamma ю v \pi \nu \varepsilon \cup \mu \alpha \tau о \varsigma)$. Either locative ( in ) or instrumental case ( by ). The Holy Spirit had been promised by Jesus as "another Paraclete" and now this is shown to be true. The only instance in Acts of the use of тарак $\eta$ ๆ๘я with the Holy Spirit. The word, of course, means calling to one's side ( $\pi \alpha \rho \alpha к \alpha \lambda \varepsilon \omega$ ) either for advice or for consolation.

Was multiplied ( $\varepsilon \pi \lambda \eta \theta$ vveтo). Imperfect middle passive. The multiplication of the disciples kept pace with the peace, the edification, the walking in the fear of the Lord, the comfort of the Holy Spirit. The blood of the martyrs was already becoming the seed of the church. Stephen had not borne his witness in vain.

Acts 9:32
Lydda ( $\Lambda v \delta \delta \alpha$ ). In O.T. Lod (1Ch 8:12) and near Joppa. Later Diospolis.
Acts 9:33
Aenias (Aıveav). Old Greek name and so probably a Hellenistic Jew. He was apparently a disciple already (the saint, verse 32). Luke the physician notes that he had been bed ridden for eight years. See on 5:15 for "bed" (краßаттои) and 8:7; Lu 5:18 for "paralyzed" ( $\pi \alpha \rho \alpha \lambda \varepsilon \lambda \nu \mu \varepsilon v o \varsigma$, perfect passive participle of $\pi \alpha \rho \alpha \lambda \nu \omega$ with $\eta \nu$, periphrastic past perfect passive).

Acts 9:34
Healeth ( $1 \alpha \tau \alpha$ ). Aoristic present middle indicative, heals here and now.
Make thy bed ( $\sigma \tau \rho \omega \sigma \sigma \nu \sigma \varepsilon \alpha v \tau \omega$ ). First aorist (ingressive) active imperative of $\sigma \tau \rho \omega \nu \nu \nu \mu$ $(-v \omega)$. Old word with "bed" ( $\kappa \rho \alpha \beta a \tau \tau о v)$ understood as the object. Literally, spread thy bed for thyself (dative case), what others for eight years have done for thee.

Acts 9:35
Sharon ( $\Sigma \alpha \rho \omega v \alpha)$. The Plain of Sharon, not a town. Thirty miles long from Joppa to Caesarea.

Acts 9:36
At Joppa (Ev Io $\pi \pi \eta$ ). The modern Jaffa, the port of Jerusalem (2Ch 2:16).
Disciple ( $\mu \alpha \theta \eta \tau \rho \iota \alpha$ ). Feminine form of $\mu \alpha \theta \eta \tau \eta \varsigma$, a learner from $\mu \alpha \nu \theta \alpha v \omega$, to learn, a late word and only here in the N.T.

Tabitha $(T \alpha \beta \varepsilon \iota \theta \alpha)$. Aramaic form of the Hebrew Tsebi and, like the Greek word
Dorcas ( $\Delta$ оркаৎ), means Gazelle, "the creature with the beautiful look" (or eyes), from $\delta \varepsilon \rho \kappa о \mu \alpha$. The gazelle was a favourite type for beauty in the orient (Song of Solomon 2:9,17; 4:5; 7:3 ). She may have had both the Aramaic and the Greek name, Tabitha Dorcas like John Mark. There is nothing said about a husband and so she was probably unmarried. She is the second woman mentioned by name after Pentecost (Sapphira the other). She did her beautiful deeds by herself. She did not have a Dorcas society.

Did ( $\varepsilon \pi \sigma ו \varepsilon)$. Imperfect active, her habit.
Acts 9:37
In an upper chamber $(\varepsilon v v \pi \varepsilon \rho \omega t \omega)$. See on $1: 13$. Also in verse 39 . In that house. This service was rendered by the women, though Luke has $\lambda$ ovoavtec (masculine plural aorist active participle of $\lambda o v \omega$ ), a general way of saying "they washed." The interment was not hurried as in Jerusalem (Ananias and Sapphira) and the upper room is where the body was usually placed.

Acts 9:38
Delay not ( $\mu \eta$ окv $\boldsymbol{\eta} \sigma \eta \iota$ ). Ingressive aorist active subjunctive in prohibition. Direct discourse and not indirect as late MSS. have (aorist active infinitive, oк $\eta \eta \sigma \alpha$ ). Possibly the two messengers started before Dorcas was quite dead, though we do not know. Peter had recently healed Aeneas and the disciples may have had faith enough to believe that he could raise the dead by the power of Christ. W. M. Ramsay doubts if Dorcas was really dead, but why see legends in these supernatural events?

Acts 9:39
Stood by him ( $\pi \alpha \rho \varepsilon \sigma \tau \eta \sigma \alpha \nu \alpha v \tau \omega$ ). Second aorist active indicative, intransitive, of $\pi \alpha \rho ı \sigma \tau \eta \mu)$. Vivid picture of this group of widows as they stood around Peter, weeping ( $\kappa \lambda \alpha \iota v \sigma \alpha$ ) and showing ( $\varepsilon \pi \iota \delta \varepsilon \iota \kappa \nu v \mu \varepsilon v \alpha$, present middle as belonging to themselves, pointing with pride to) the very inner garments ( $\chi \iota \tau \omega \nu \alpha \varsigma)$ and outer garments ( $\mu \alpha \tau \iota \alpha$ ), like
the Latin tunica and toga, which she made from time to time ( $\varepsilon \pi о \varepsilon$, imperfect active, repeated action). It was a heart-breaking scene.

Acts 9:40
Put them all forth ( $\varepsilon \kappa \beta \alpha \lambda \omega \nu \varepsilon \xi \omega \pi \alpha v \tau \alpha \varsigma)$. Second aorist (effective) active participle of $\varepsilon \kappa \beta \alpha \lambda \lambda \omega$, a rather strong word, perhaps with some difficulty. Cf. Mr 5:40 which incident Peter may have recalled. The words are not genuine in Lu 8:54. Peter's praying alone reminds one of Elijah ( $1 \mathrm{Ki} 17: 20$ ) and the widow's son and Elisha for the Shunammite's son $(2 \mathrm{Ki}$ 4:33).

Tabitha, arise (Taßعı $\theta \alpha, \alpha v \alpha \sigma \tau \eta \theta)$. With sublime faith like T $\alpha \lambda \varepsilon ı \theta \alpha$ коv of Jesus in Mr 5:41.

She sat up ( $\alpha v \varepsilon \kappa \alpha \theta \iota \sigma \varepsilon v$ ). Effective aorist active indicative of $\alpha v \alpha \kappa \alpha \theta \iota \zeta \omega$. Often in medical writers, only here in the N.T. and Lu 7:15 where Westcott and Hort have in the margin the uncompounded form $\varepsilon \kappa \alpha \nLeftarrow \iota \varepsilon v$. Vivid picture.

Acts 9:41
Raised her up ( $\alpha v \varepsilon \sigma \tau \eta \sigma \varepsilon v \alpha u \tau \eta v$ ). First aorist active indicative, transitive, of $\alpha v / \sigma \tau \eta \mu$.
Presented ( $\pi \alpha \rho \varepsilon \sigma \tau \eta \sigma \varepsilon v$ ). First aorist active indicative, transitive of $\pi \alpha \rho \iota \sigma \tau \eta \mu$ (cf. intransitive second aorist in verse 39 above). It was a joyful time for Peter, the widows, all the saints, and for Dorcas.

Acts 9:43
 time, number, size. It might be "ten days, ten months, or ten years" (Page).

With one Simon a tanner ( $\pi \alpha \rho \alpha \tau \iota \nu \Sigma \mu \omega v \beta v \rho \sigma \varepsilon$ ). The use of $\pi \alpha \rho \alpha$ is usual for staying with one (by his side). "The more scrupulous Jews regarded such an occupation as unclean, and avoided those who pursued it. The conduct of Peter here shows that he did not carry his prejudices to that extent" (Hackett). One of the rabbis said: "It is impossible for the world to do without tanners; but woe to him who is a tanner." A Jewess could sue for divorce if she discovered that her husband was a tanner. And yet Peter will have scruples on the housetop in the tanner's house about eating food considered unclean. "The lodging with the tanner was a step on the road to eating with a Gentile" (Furneaux).

## Acts 10

Acts 10:1
Cornelius (Kopvŋ $\lambda_{\iota o \varsigma}$ ). The great Cornelian family of Rome may have had a freedman or descendant who is
centurion ( $\varepsilon \kappa \alpha \tau о v-\tau \alpha \rho \chi \eta \varsigma$, leader of a hundred, Latin centurio). See on Mt 8:5. These Roman centurions always appear in a favourable light in the N.T. (Mt 8:5; Lu 7:2; 23:47; Ac 10:1;22:25; $27: 3$ ). Furneaux notes the contrasts between Joppa, the oldest town in Palestine, and Caesarea, built by Herod; the Galilean fisherman lodging with a tanner and the Roman officer in the seat of governmental authority.

Of the band called the Italian ( $\varepsilon \kappa \sigma \pi \varepsilon \rho \rho \eta \varsigma \tau \eta \varsigma \kappa \alpha \lambda о \cup \mu \varepsilon v \eta \varsigma$ I $\tau \alpha \lambda \iota \kappa \eta \varsigma$ ). A legion had ten cohorts or "bands" and sixty centuries. The word $\sigma \pi \varepsilon \iota \rho \eta \varsigma$ (note genitive in - $\varepsilon \varsigma$ like the Ionic instead of -ac) is here equal to the Latin cohors. In the provinces were stationed cohorts of Italic citizens (volunteers) as an inscription at Carnuntum on the Danube (Ramsay) has shown (epitaph of an officer in the second Italic cohort). Once more Luke has been vindicated. The soldiers could, of course, be Roman citizens who lived in Caesarea. But the Italian cohorts were sent to any part of the empire as needed. The procurator at Caesarea would need a cohort whose loyalty he could trust, for the Jews were restless.

Acts 10:2
Devout ( $\varepsilon v \sigma \varepsilon \beta \eta \zeta$ ). Old word from $\varepsilon v$ (well) and $\sigma \varepsilon \beta o \mu \alpha$ (to worship, to reverence), but rare in the N.T. (Ac 10:2,7; 2Pe 2:1 ). It might refer to a worshipful pagan (Ac 17:23, $\sigma \varepsilon \beta \alpha \sigma \mu \alpha \tau \alpha$, objects of worship), but connected with "one that feared God" ( $\varphi \circ \beta о \nu \mu \varepsilon v o \varsigma$, tov $\theta$ sov) Luke describes "a God-fearing proselyte" as in 10:22,35. This is his usual term for the Gentile seekers after God ( $13: 16,26 ; 17: 4,17$, etc.), who had come into the worship of the synagogue without circumcision, and were not strictly proselytes, though some call such men "proselytes of the gate" (cf. Ac 13:43 ); but clearly Cornelius and his family were still regarded as outside the pale of Judaism ( $10: 28,34 ; 11: 1,8 ; 15: 7$ ). They had seats in the synagogue, but were not Jews.

Gave much alms ( $\pi \sigma t \omega v \varepsilon \lambda \varepsilon \varepsilon \mu \circ \sigma v v a \varsigma ~ \pi о \lambda \lambda \alpha \varsigma)$. Doing many alms (the very phrase in Mt 6:2 ), a characteristic mark of Jewish piety and from a Gentile to the Jewish people.

Prayed ( $\delta \varepsilon o \mu \varepsilon v o \varsigma)$. Begging of God. Almsgiving and prayer were two of the cardinal points with the Jews (Jesus adds fasting in his picture of the Pharisee in Mt 6:1-18).

Acts 10:3
Coming in ( $\varepsilon ા \sigma \varepsilon \lambda \theta \mathrm{ov} \tau \alpha)$. Ingressive second aorist active participle, not present. So punctiliar, "saw come," not "saw coming." So also "say" or "speak," not "saying." Luke repeats the account of this vision to Cornelius twice $(10: 30 ; 11: 13)$ and also the story of the vision to Peter (10:1-16,28; 11:5).

Acts 10:4

Lord ( $\kappa \cup \rho เ \varepsilon$ ). Cornelius recognizes the angel of God (verse 3) as God's messenger.
Are gone up ( $\alpha v \varepsilon \beta \eta \sigma \alpha v$ ). Timeless second aorist active indicative of $\alpha v \alpha \beta \alpha \iota v \omega$. Gone up like the smoke of incense in sacrifices.

For a memorial ( $\varepsilon \iota \varsigma \mu \nu \eta \mu \circ \sigma \nu \nu o v$ ). Old word from $\mu \nu \eta \mu \omega \nu$. The only other instance in the N.T. is by Jesus about the act of Mary of Bethany (Mt 26:13; Mr 14:9). His prayers and his alms proved his sincerity and won the ear of God.

Acts 10:5
Fetch ( $\mu \varepsilon \tau \alpha \pi \varepsilon \mu \psi \alpha$ ). First aorist middle (indirect, for one's self) imperative of $\mu \varepsilon \tau \alpha \pi \varepsilon \mu \pi \omega$, usual voice in ancient Greek with this verb in sense of sending another for one's own sake. Only in Acts in the N.T. See also 10:22.

Acts 10:6
 as a guest. So to entertain a guest as here or to surprise by strange acts (Ac 17:20; 1Pe 4:4).

Whose $(\omega)$. To whom, dative of possession.
By the seaside ( $\pi \alpha \rho \alpha \theta \alpha \lambda \alpha \sigma \sigma \alpha \nu$ ). Along by the sea. Note accusative case. Outside the city walls because a tanner and to secure water for his trade. Some tanneries are by the seashore at Jaffa today.

Acts 10:8
Rehearsed ( $\varepsilon \xi \eta \gamma \eta \sigma \alpha \mu \varepsilon \nu \circ \varsigma)$. See on $\operatorname{Lu} 24: 35$. All the details about the vision. The soldier was "devout" like Cornelius and would protect the two household servants (oוкદ $\omega \omega v$ ).

## Acts 10:9

On the morrow ( $\tau \eta \varepsilon \pi \alpha u \rho \circ o v$ ). Locative case of article with the compound adverb ( $\eta \mu \varepsilon \rho \alpha$ day being understood), the second day after leaving Caesarea, 28 miles from Joppa. The third day (the next morrow, verse 23) they start back home and the fourth day (on the morrow again, verse 24) they reach Caesarea.

As they $(\varepsilon \kappa \varepsilon \iota \nu \omega v)$. The party of three from Caesarea. Genitive absolute with present participle o $\delta \circ \iota \pi о \rho o v \nu \tau \omega \nu$ (journeying) and $\varepsilon \gamma \gamma \iota \zeta \circ \nu \tau \omega \nu$ (drew nigh).

The housetop ( $\tau 0 \delta \omega \mu \alpha$ ). Old word and in Gospels (Lu 3:19, etc.), but only here in Acts. From $\delta \varepsilon \mu \omega$, to build, and so any part of the building (hall, dining room, and then roof). The roof was nearly flat with walls around and so was a good place for meditation and prayer and naps.

Acts 10:10
Hungry ( $\pi \rho \circ \sigma \pi \varepsilon เ v \circ \varsigma)$ Only instance of the word known, a $a \pi \alpha \xi \lambda \varepsilon \gamma \circ \mu \varepsilon v o v$. Probably "very hungry" ( $\pi \rho \circ \varsigma=$ besides, in addition).

Desired ( $\eta \theta \varepsilon \lambda \varepsilon v$ ). Imperfect active. Was longing to eat. It was about twelve o'clock noon and Peter may even have smelt the savory dishes, "while they made ready" ( $\pi \alpha \rho \alpha \sigma \kappa \varepsilon v \alpha \zeta o v \tau \omega v$ ). "The natural and the supernatural border closely on one another, with no definable limits" (Furneaux).

He fell into a trance ( $\varepsilon \gamma \varepsilon v \varepsilon \tau \frac{\varepsilon \pi}{} \pi^{\prime}$ avtov $\left.\varepsilon \kappa \sigma \tau \alpha \sigma \iota\right)$ ). More exactly, "An ecstasy came upon him," in which trance he passed out of himself ( $\varepsilon \kappa \sigma \tau \alpha \sigma ı$, from $\varepsilon \xi \iota \sigma \tau \eta \mu$ ) and from which one came to himself ( $12: 11$ ). Cf. also 11:5; 22:17. It is thus different from a vision ( $о \rho a \mu \alpha$ ) as in verse 3.

Acts 10:11
Beholdeth $(\theta \varepsilon \omega \rho \varepsilon)$. Vivid historical present and change from past time.
Opened ( $\alpha v \varepsilon \omega \uparrow \gamma \mu \varepsilon v o v$, perfect passive participle with double reduplication, state of completion).

Descending ( $\kappa \alpha \tau \alpha \beta \alpha ı v o v)$ ). Present active participle describing the process.
Sheet (oӨov $\nu \nu$ ). Old word for linen cloth and only here in the N.T. Accusative case in apposition with $\sigma \kappa \varepsilon v o c$ (vessel).

Let down ( $\mathrm{Ka} \theta \ell \varepsilon \mu \varepsilon v o v$ ). Present passive participle of $\mathrm{Ka} \theta ı \eta \mu$. Old verb, but in the N.T. only here and $\mathrm{Lu} 5: 19$; Ac 9:25 . Linear action here picturing the process, "being let down."

By four corners ( $\tau \varepsilon \sigma \sigma \alpha \rho \sigma \iota v$ a $\varnothing \propto \wedge \varsigma)$. Instrumental case of $\alpha \rho \chi \eta$, beginning. We say "end" or extremity for this use of the word. The picture is the sheet held up by four cords to which the sheet is fastened. Isa 11:12 had said that Israel would be gathered from the four corners of the earth. Knowling follows Hobart in taking the four corners of the sheet to be a medical phrase for bandage (the end of a bandage).

Acts 10:12
Were (v $\tau \eta \rho \chi \varepsilon v$ ). Imperfect of $v \pi \alpha \rho \chi \omega$ in sense of $\eta v$, to exist, be. Fish are not mentioned, perhaps because the sheet had no water, though they were clean and unclean also (Le 11:9; De 14:9).

All manner of ( $\pi \alpha v \tau \alpha)$. Literally, all, but clearly all varieties, not all individuals. Both clean and unclean animals are in the sheet.

Acts 10:14
Not so, Lord (M $\eta \delta \alpha \mu \omega \sigma, \kappa v \rho เ \varepsilon$ ). The negative $\mu \eta \delta \alpha \mu \omega \varsigma$ calls for the optative $\varepsilon$ ו (may it not be) or the imperative $\varepsilon \sigma \tau \omega$ (let it be). It is not ov $\delta \alpha \mu \omega \varsigma$, a blunt refusal (I shall not do it). And yet it is more than a mild protest as Page and Furneaux argue. It is a polite refusal with a reason given. Peter recognizes the invitation to slay ( $\theta v \sigma o v$ ) the unclean animals as from the Lord ( $\kappa \cup \rho ı \varepsilon$ ) but declines it three times.

For I have never eaten anything (о оиסє ative, I never did anything like this and I shall not do it now. The use of $\pi \alpha \nu$ (everything) with oudetote (never) is like the Hebrew (lo--kol) though a like idiom appears in the vernacular Koine (Robertson, Grammar, p. 752).
 gether with) originally meant common to several (Latin communis) as in Ac 2:44; 4:32; Tit 1:4; Jude 1:3. The use seen here (also Mr 7:2,5; Ro 14:14; Heb 10:29; Re 21:27; Ac 10:28; 11:8), like Latin vulgaris is unknown in ancient Greek. Here the idea is made plain by the
addition of $\alpha \kappa \alpha \theta$ aptov (unclean), ceremonially unclean, of course. We have the same double use in our word "common." See on Mr 7:18f. where Mark adds the remarkable participle $\kappa \alpha \theta \alpha \rho \iota \zeta \omega \nu$ (making all meats clean), evidently from Peter who recalls this vision. Peter had been reared from childhood to make the distinction between clean and unclean food and this new proposal even from the Lord runs against all his previous training. He did not see that some of God's plans for the Jews could be temporary. This symbol of the sheet was to show Peter ultimately that Gentiles could be saved without becoming Jews. At this moment he is in spiritual and intellectual turmoil.

Acts 10:15
Make not thou common ( $\sigma \nu \mu \eta$ коьvou). Note emphatic position of $\sigma v$ (thou). Do thou
 active imperative kotvov means precisely this. Peter had just called "common" what God had invited him to slay and eat.

Acts 10:16
Thrice ( $\varepsilon \pi \iota \tau \rho \iota \varsigma)$. For three times. Peter remained unconvinced even by the prohibition of God. Here is a striking illustration of obstinacy on the part of one who acknowledges the voice of God to him when the command of the Lord crosses one's preferences and prejudices. There are abundant examples today of precisely this thing. In a real sense Peter was maintaining a pose of piety beyond the will of the Lord. Peter was defiling what God had cleansed.

Was received up ( $\alpha v \varepsilon \lambda \eta \mu \varphi \theta \eta$ ). First aorist passive indicative of $\alpha v \alpha \lambda \alpha \mu \beta \alpha v \omega$, to take up. The word used of the Ascension ( $1: 22$ ).

Acts 10:17
Was much perplexed in himself ( $\varepsilon v \varepsilon a v \tau \omega \delta i \eta \pi \circ \rho \varepsilon$ ). Imperfect active of $\delta \iota \alpha \pi \circ \rho \varepsilon \omega$, intensive compound ( $\delta \iota \alpha$, thoroughly, and $\alpha$ privative and $\pi$ о $\rho \circ \varsigma$, way), to be completely at a loss to know what road to take. Old verb, but in N.T. only in Luke and Acts. Page notes that Luke is singularly fond of verbs compounded with $\delta$ oa. See on Lu 9:7 and Ac 2:12 . When out of the ecstasy he was more puzzled than ever.

Might be ( $\alpha v \varepsilon ı \eta$ ). Optative with $\alpha v$ in indirect question simply retained from the direct (Robertson, Grammar, pp. 1021, 1044). See Ac 17:18, for the direct and Lu 1:62 for the indirect ( $\alpha \vee \theta \varepsilon \lambda o$ both times). It is the conclusion of a fourth class condition.

Having made inquiry ( $\delta \varepsilon \varepsilon \rho \omega \tau \eta \sigma \alpha v \tau \varepsilon \varsigma)$. First aorist active participle of $\delta ı \varepsilon \rho \omega \tau \alpha \omega$, another compound of $\delta$ ta, to ask one after another, to ask through, old verb, but only here in the N.T. It took diligent inquiry to find the obscure house of Simon the tanner.

Stood before the gate ( $\varepsilon \pi \varepsilon \sigma \tau \eta \sigma \alpha v \varepsilon \pi \tau \circ v \pi \nu \lambda \omega v \alpha)$. Second aorist active indicative of $\varepsilon \varphi \vdash \sigma \tau \eta \mu$, intransitive. Note repetition of $\varepsilon \pi$. The messengers stopped right at the folding gates of the passage ( $\pi v \lambda \omega v \alpha$ ) which led from the street to the inner court or house.

Acts 10:18
Called ( $\varphi \omega v \eta \sigma \alpha v \tau \varepsilon \varsigma)$. In a loud voice that those inside the house might hear.

Asked ( $\varepsilon \pi v v \theta \alpha v o v \tau o$ ). Imperfect middle of $\pi v v \theta a v o \mu \alpha$, old verb to make inquiry especially with an indirect question as here. Kept on inquiring. Westcott and Hort follow B C here and read $\varepsilon \pi v \theta o v \tau o$ (second aorist middle, effective aorist). Either makes sense, though the imperfect is more picturesque.

Were lodging ( $\xi \varepsilon v \iota \zeta \tau \tau \alpha$ ). Present middle indicative retained in indirect question. See on verse 6 for the verb.

Acts 10:19
Thought ( $\delta \varepsilon \varepsilon \theta \cup \mu \circ \nu \mu \varepsilon \nu o v)$. Genitive absolute of present middle participle of $\delta ı v \theta v \mu \varepsilon \sigma \mu \alpha$, a double compound ( $\delta ı \alpha$ and $\varepsilon v$ - with $\theta v \mu \circ \varsigma$ ) and another $\alpha \pi \alpha \xi \lambda \varepsilon \gamma о \mu \varepsilon v o v$ save in ecclesiastical writers, though $\varepsilon v \theta v \mu \varepsilon \circ \mu \alpha$ is common enough and Textus Receptus so reads here. Peter was revolving in his mind, through and through, in and out, to find the meaning of the strange vision.

Acts 10:20
But $(\alpha \lambda \lambda \alpha)$. So usually, though it is open to question whether $\alpha \lambda \lambda \alpha$ is adversative here and not rather, "Now then."

Get thee down ( $\kappa \alpha \tau \alpha \beta \eta \theta$ ). Second aorist active imperative, at once.
Go ( $\pi 0 \rho \varepsilon v o v)$. Present middle imperative, go on.
Nothing doubting ( $\mu \eta \delta \varepsilon v \delta \iota \alpha \rho \imath v o \mu \varepsilon v \circ \varsigma)$. Another compound of $\delta \iota \alpha$, old and common verb for a divided mind ( $\delta$ sa like $\delta v o$, two). Note usual negative of the present middle participle, the subjective $\mu \eta \delta \varepsilon v$. The notion of wavering (Jas 1:6) is common with this verb in the middle voice. In Ac 11:12 the aorist active ( $\mu \eta \delta \varepsilon \nu \delta \iota \alpha \kappa \iota \nu \alpha v \tau \alpha)$ is used perhaps with the idea of conduct towards others rather than his own internal doubt as here (Page).

For I (o $\tau \varepsilon \omega$ ). The Holy Spirit assumes responsibility for the messengers from Cornelius and thus connects their mission with the vision which was still troubling Peter. Peter had heard his name called by the man (verse 19).

Acts 10:21
Cause ( $\alpha \iota \tau \iota \alpha)$. Or reason. Common in this sense. See on Mt 19:3.
Acts 10:22
Righteous ( $\delta$ ıкаıоৎ). In the Jewish sense as in Lu 1:6; 2:25.
Well reported of ( $\mu \alpha \rho \tau v \rho o v \mu \varepsilon v o \varsigma)$. Present passive participle as in 6:3. Cf. the other centurion in Lu 7:4.

Nation ( $\varepsilon \theta v o v \varsigma)$. Not $\lambda \alpha o v$, for the speakers are Gentiles.
Was warned $(\varepsilon \chi \rho \eta \mu \alpha \tau \iota \sigma \eta \eta)$. First aorist passive of $\chi \rho \eta \mu \alpha \tau \iota \zeta \omega$, old word for doing business, then consulting an oracle, and here of being divinely (word God not expressed) warned as in Mt 2:12,22; Lu 2:26; Heb 11:7. Then to be called or receive a name from one's business as in Ac 11:26; Ro 7:3 .

Acts 10:23
Lodged them ( $\varepsilon \xi \varepsilon v / \sigma \varepsilon v)$. Active voice here rather than passive as in 10:6.

Accompanied him ( $\sigma v v \eta \lambda \theta \alpha v \alpha v \tau \omega$ ). Associative instrumental case after verb. The wisdom of having these half dozen Jewish Christians from Joppa with Peter in the house of Cornelius in Caesarea becomes manifest in Jerusalem (11:12).

Acts 10:24
Was waiting ( $\eta v \pi \rho \circ \sigma \delta o \kappa \omega v$ ). Periphrastic imperfect active, in eager expectation and hope, directing the mind ( $\delta$ ока $\omega$ ) towards ( $\pi \rho \circ \varsigma$ ) anything. Old and common verb.

Near ( $\alpha v \alpha \gamma \kappa \alpha \iota o u \varsigma)$. Only instance in the N.T. of this sense of $\alpha v \alpha \gamma \kappa \alpha \iota o$ from $\alpha v \alpha \gamma \kappa \eta$, necessity, what one cannot do without, necessary (1Co 12:22), duty (Ac 13:46 ), or blood relations as here. The ancient Greek writers combined these two words ( $\sigma \cup \gamma \gamma \varepsilon v \varepsilon \iota$, kinsmen, avaүкаıov¢, necessary friends) as here. It was a homogeneous group of Gentiles close to Cornelius and predisposed to hear Peter favourably.

Acts 10:25
That Peter entered ( $\tau 0 v \varepsilon เ \sigma \varepsilon \lambda \theta \varepsilon เ v \tau$ тov $\Pi \varepsilon \tau \rho \circ v$ ). This is a difficult construction, for the subject of $\varepsilon \gamma \varepsilon v \varepsilon \tau$ (it happened) has to be the articular genitive infinitive tov $\varepsilon \sigma \sigma \varepsilon \lambda \theta \varepsilon เ v$ with the accusative of general reference tov $\Pi \varepsilon \tau \rho \circ v$. Most commentators consider it inexplicable. It is probably an extension of the ordinary articular infinitive under the influence of the Hebrew infinitive construct without regard to the case, regarding it as a fixed case form and so using it as nominative. Precisely this construction of tov and the infinitive as the subject of a verb occurs in the LXX (2Ch 6:7, etc.). See Robertson, Grammar, pp. 1067f. for full discussion of this obvious Hebraism. Somewhat similar examples appear in Ac 20:3; 27:1 . But the Codex Bezae avoids this awkward idiom by the genitive absolute ( $\pi \rho \circ \sigma \varepsilon \gamma \gamma \zeta \zeta$ оvtos тov Пєт $\rho \circ \boldsymbol{\text { ) }}$ ) and some additional details (one of the servants ran forward and announced that he was come).

Worshipped him ( $\pi \rho \circ \sigma \varepsilon \kappa v v \eta \sigma \varepsilon v$ ). "Cornelius was not an idolator and would not have honoured Peter as a god" (Furneaux). The word probably means here reverence like old English usage (Wycliff) and not actual worship, though Peter took it that way (verse 26). Jesus accepted such worship (Mt 8:2; Lu 5:8 by Peter).

Acts 10:27
As he talked with him ( $\sigma v v o \mu \lambda \lambda \omega v \alpha v \tau \omega$ ). Present active participle of $\sigma v v o \mu \lambda \lambda \omega$, rare compound and here alone in the N.T., with associative instrumental case. The uncompounded verb is common enough though in the N.T. only in Lu 24:14 which see and Ac 20:11; 24:26.

Findeth ( $\varepsilon \cup \rho \iota \sigma \kappa \varepsilon)$. Vivid historical present indicative active.
Come together ( $\sigma v v \varepsilon \lambda \eta \lambda \cup \theta$ otac). Second perfect active participle of $\sigma v v \varepsilon \rho \chi \circ \mu \alpha$. It was an expectant group of Gentiles eager for Peter's interpretation of the vision of Cornelius.

Acts 10:28
How that it is an unlawful thing ( $\omega \varsigma \alpha \theta \varepsilon \mu \tau \tau 0 v \varepsilon \sigma \tau \tau v$ ). The conjunction $\omega \varsigma$ is sometimes

law custom) and $\alpha$ privative. In the N.T. only here and $1 \mathrm{Pe} 4: 3$ (Peter both times). But there is no O.T. regulation forbidding such social contact with Gentiles, though the rabbis had added it and had made it binding by custom. There is nothing more binding on the average person than social custom. On coming from the market an orthodox Jew was expected to immerse to avoid defilement (Edersheim, Jewish Social Life, pp. 26-28; Taylor's Sayings of the Jewish Fathers, pp. 15, 26, 137, second edition). See also Ac 11:3; Ga 2:12 . It is that middle wall of partition between Jew and Gentile (Eph 2:14 ) which Jesus broke down.

One of another nation ( $\alpha \lambda \lambda \circ \varphi \cup \lambda \omega$ ). Dative case of an old adjective, but only here in the N.T. ( $\alpha \lambda \lambda$ oc, another, $\varphi$ U $\lambda o v$, race). Both Juvenal (Sat. XIV. 104, 105) and Tacitus (History, V. 5) speak of the Jewish exclusiveness and separation from Gentiles.

And yet unto (кацо). Dative of the emphatic pronoun (note position of prominence) with $\kappa \alpha$ ( $\chi \rho \alpha \sigma \iota \varsigma) ~ m e a n i n g ~ h e r e ~ " a n d ~ y e t " ~ o r ~ a d v e r s a t i v e ~ " b u t " ~ a s ~ o f t e n ~ w i t h ~ к \alpha ~ w h i c h ~ i s ~ b y ~$ no means always merely the connective "and" (Robertson, Grammar, pp. 1182f.). Now Peter takes back both the adjectives used in his protest to the Lord (verse 14) "common and unclean." It is a long journey that Peter has made. He here refers to "no one" ( $\mu \eta \delta \varepsilon v \alpha$ ), not to "things," but that is great progress.

Acts 10:29
Without gainsaying ( $\alpha v \alpha v \tau \iota \rho \rho \eta \tau \omega \varsigma)$. A privative with compound adverb from $\alpha v \tau$ (back, in return, against) and verbal $\rho \eta \tau \circ \varsigma$ (from $\varepsilon \rho \rho \eta \theta \eta \nu$, to speak). Late and rare and here only in the N.T., but the adjective in 19:36. Without answering back. That is true after the Holy Spirit expressly told Peter to go with the messengers of Cornelius ( 10:19-23). Peter's objections were made to the Lord in the vision which he did not understand. But that vision prepared him for this great step which he had now taken. He had stepped over the line of Jewish custom.

With what intent ( $\tau \iota \nu \lambda o \gamma \omega$ ). More exactly, "for what reason" as in Plato, Gorgias 512 C.

Acts 10:30
Four days ago ( $\alpha \pi о ~ \tau \varepsilon \tau \alpha \rho \tau \eta \varsigma ~ \eta \mu \varepsilon \rho \alpha \varsigma)$. From the fourth day, reckoning backwards from this day.

I was keeping the ninth hour of prayer ( $\eta \mu \eta \nu \tau \eta \nu \varepsilon v a \tau \eta \nu \pi \rho \circ \sigma \varepsilon \cup \chi \circ \mu \varepsilon v o \varsigma)$. Periphrastic middle imperfect and accusative of extension of time (all the ninth hour).

Acts 10:31
Is heard ( $\varepsilon \iota \sigma \eta \kappa о v \sigma \theta \eta)$. Sort of timeless first aorist passive indicative as is "are had in remembrance" ( $\varepsilon \mu \nu \eta \sigma \theta \eta \sigma \alpha v$. See verse 4 "are gone up for a memorial").

Acts 10:32
In the house of Simon ( $\varepsilon v$ оккı $\Sigma \mu \mu \omega v o \varsigma)$. See 9:43 for $\pi \alpha \rho \alpha \Sigma \mu \omega \nu$ with same idea.
Acts 10:33

And thou hast well done that thou art come ( $\sigma v \tau \varepsilon \kappa \alpha \lambda \omega \varsigma \varepsilon \pi о ı \eta \sigma \alpha \varsigma \pi \alpha \rho \alpha \gamma \varepsilon \nu о \mu \varepsilon \nu \circ \varsigma)$. "And thou didst well in coming." A regular formula for expressing thanks as in Php 4:14; 3Jo 1:6; $2 \mathrm{Pe} 1: 19$. The participle completes the idea of $\kappa \alpha \lambda \omega \varsigma \pi o t \varepsilon \omega$ neatly. Cornelius commends Peter for his courage in breaking away from Jewish custom and takes no offence at the implied superiority of the Jews over the Gentiles. Cornelius and his circle of kinsmen and close friends are prepared soil for a new era in the history of Christianity. The Samaritans were now nominal Jews and the Ethiopian eunuch was a single case, but here Peter the chief apostle, not Philip the preaching deacon (evangelist), was involved. It was a crisis. Cornelius reveals an open mind for the message of God through Peter.

Commanded thee ( $\pi \rho \sigma \sigma \tau \varepsilon \tau \alpha \gamma \mu \varepsilon v \alpha \sigma o$ ). Perfect passive participle with the dative case ( $\sigma 0$ ). Cornelius is a military man and he employs a military term ( $\pi \rho \sigma \sigma \tau \alpha \sigma \sigma \omega$, old word to command). He is ready for orders from the Lord.

Acts 10:34
Opened his mouth ( $\alpha v o ו \xi a \varsigma ~ \tau о ~ \sigma \tau о \mu \alpha)$. Solemn formula for beginning his address (8:35; 18:14; Mt 5:2; 13:35 ). But also good elocution for the speaker.

I perceive ( $\kappa \alpha \tau \alpha \lambda \alpha \mu \beta \alpha \nu о \mu \alpha)$. Aoristic present middle of $\kappa \alpha \tau \alpha \lambda \alpha \mu \beta \alpha \nu \omega$, to take hold of, the middle noting mental action, to lay hold with the mind (Ac 4:13; 10:34; 25:25; Eph 3:18 ). It had been a difficult thing for Peter to grasp, but now "of a truth" ( $\left.\varepsilon \pi^{\prime} \alpha \lambda \eta \theta \varepsilon \varepsilon \alpha \varsigma\right)$ the light has cleared away the fogs. It was not until Peter had crossed the threshold of the house of Cornelius in the new environment and standpoint that he sees this new and great truth.

Respecter of persons ( $\pi \rho \sigma \sigma \omega \pi \sigma \lambda \eta \mu \pi \tau \eta \zeta)$. This compound occurs only here and in Chrysostom. It is composed of $\pi \rho \sigma \sigma \omega \pi \sigma v$ face or person ( $\pi \rho o \varsigma$ and $o \pi \varsigma$, before the eye or face) and $\lambda \alpha \mu \beta \alpha \nu \omega$. The abstract form $\pi \rho о \sigma \omega \pi$ о $\lambda \eta \mu \psi \iota \alpha$ occurs in Jas 2:1 (also Ro 2:11; Eph 6:9; Col 3:25 ) and the verb $\pi \rho \sigma \sigma \omega \pi \sigma \lambda \varepsilon \mu \pi \tau \varepsilon \omega$ in Jas 2:9. The separate phrase ( $\lambda \alpha \mu \beta \alpha \nu \varepsilon \iota v$ $\pi \rho o \sigma \omega \pi \sigma v$ ) occurs in $\operatorname{Lu} 20: 21$; Ga 2:6. The phrase was already in the LXX (De 10:17; 2Ch 19:7; Ps 82:6 ). Luke has simply combined the two words into one compound one. The idea is to pay regard to one's looks or circumstances rather than to his intrinsic character. The Jews had come to feel that they were the favourites of God and actually sons of the kingdom of heaven because they were descendants of Abraham. John the Baptist rebuked them for this fallacy.

Acts 10:35
Acceptable to him ( $\delta \varepsilon \kappa \tau о \varsigma \alpha v \tau \omega$ ). Verbal adjective from $\delta \varepsilon \chi \circ \mu \alpha$. Acceptabilis. That is to say, a Gentile would not have to become a Jew in order to become a Christian. Evidently Peter had not before perceived this fact. On the great Day of Pentecost when he spoke of the promise "to all those afar off" (2:39) Peter understood that they must first become Jews and then Christians. The new idea that now makes a revolution in Peter's outlook is precisely this that Christ can and will save Gentiles like this Cornelius group without their becoming Jews at all.

## Acts 10:36

The word which he sent ( $\tau 0 v \lambda o \gamma o v o v a \pi \varepsilon \sigma \tau \varepsilon i \lambda \varepsilon v$ ). Many ancient MSS. (so Westcott and Hort) read merely $\tau o v \lambda o \gamma o v a \pi \varepsilon \sigma \tau \varepsilon ı \lambda \varepsilon v$ (he sent the word). This reading avoids the anacoluthon and inverse attraction of $\lambda o \gamma o v$ to the case of the relative $o v$ (which).

Preaching good tidings of peace through Jesus Christ ( $\varepsilon v \alpha \gamma \gamma \varepsilon \lambda ı \zeta о \mu \varepsilon \nu \circ \varsigma \varepsilon \iota \rho \eta \eta \nu \delta \iota \alpha$ İбov Xpıбтov). Gospelizing peace through Jesus Christ. There is no other way to have real peace between individuals and God, between races and nations, than by Jesus Christ. Almost this very language occurs in Eph 2:17 where Paul states that Jesus on the cross "preached (gospelized) peace to you who are afar off and peace to you who are near." Peter here sees what Paul will see later with great clearness.

He is Lord of all (ov throws in as the reason for his new truth. Jesus Christ is Lord of all, both Jews and Gentiles.

Acts 10:37
Ye know ( $v \mu \varepsilon \iota \varsigma ~ o ı \delta \alpha \tau \varepsilon)$. Peter reminds his Gentile audience that the main facts concerning Jesus and the gospel were known to them. Note emphatic expression of $v \mu \varepsilon \iota \varsigma$ (you).

Beginning ( $\alpha \rho \xi \alpha \mu \varepsilon \nu o \varsigma)$. The Textus Receptus has $\alpha \rho \xi \alpha \mu \varepsilon v o v$ (accusative), but the nominative is given by Aleph A B C D E H and is certainly correct. But it makes a decided anacoluthon. The accusative would agree with $\rho \eta \mu \alpha$ used in the sense of message or story as told by the disciples. The nominative does not agree with anything in the sentence. The same phrase occurs in Lu 23:5. Here is this aorist middle participle almost used like an adverb. See a similar loose use of $\alpha \rho \xi \alpha \mu \varepsilon \nu o \varsigma$ in the same sense by Peter in Ac 1:22. The baptism of John is given as the terminus a quo. The story began with a skip to Galilee after the baptism just like the Gospel of Mark. This first message of Peter to the Gentiles ( $10: 37-44$ ) corresponds in broad outline with Mark's Gospel. Mark heard Peter preach many times and evidently planned his Gospel (the Roman Gospel) on this same model. There is in it nothing about the birth and childhood of Jesus nor about the intervening ministry supplied by John's Gospel for the period (a year) between the baptism and the Galilean Ministry. Peter here presents an objective statement of the life, death, and resurrection of Jesus with proof from the Scriptures that he is the Messiah. It is a skilful presentation.

Acts 10:38
Jesus of Nazareth (I $\eta \sigma o v v \tau o v a \pi o N \alpha \zeta \alpha \rho \varepsilon \theta$ ). Jesus the one from Nazareth, the article before the city identifying him clearly. The accusative case is here by $\pi \rho o \lambda \varepsilon \psi \iota \varsigma$, Jesus being expressed for emphasis before the verb "anointed" and the pronoun repeated pleonastically after it. "Jesus transfers the mind from the gospel-history to the personal subject of it" (Hackett).

God anointed him ( $\varepsilon \chi \rho \iota \sigma \varepsilon v, \alpha v \tau o v$, o $\theta \varepsilon \sigma \varsigma)$. First aorist active of the verb $\chi \rho \iota \omega$, to anoint, from which the verbal X $\rho \iota \sigma \tau$ ¢ is formed (Ac 2:36 ). The precise event referred to
by Peter could be the Incarnation (Lu 1:35f. ), the Baptism (Lu 3:22), the Ministry at Nazareth ( $\operatorname{Lu} 4: 14$ ). Why not to the life and work of Jesus as a whole?

Went about doing good ( $\delta ı \eta \lambda \varepsilon v \varepsilon v \varepsilon \rho \gamma \varepsilon \tau \omega v$ ). Beautiful description of Jesus. Summary (constative) aorist active of $\delta \varepsilon \rho \rho \varepsilon \mu \alpha$, to go through ( $\delta \iota \alpha$ ) or from place to place. The present active participle $\varepsilon v \varepsilon \rho \gamma \varepsilon \tau \omega v$ is from the old verb $\varepsilon v \varepsilon \rho \gamma \varepsilon \tau \varepsilon \omega$ ( $\varepsilon v$, well, $\varepsilon \rho \gamma \circ v$, work) and occurs only here in the N.T. The substantive $\varepsilon v \varepsilon \rho \gamma \varepsilon \tau \eta \varsigma$ (benefactor) was often applied to kings like Ptolemy Euergetes and that is the sense in Lu 22:25 the only N.T. example. But the term applies to Jesus far more than to Ptolemy or any earthly king (Cornelius a Lapide).

And healing ( $\kappa \alpha \iota \omega \mu \nu \circ \varsigma)$. And in particular healing. Luke does not exclude other diseases (cf. Lu 13:11,16 ), but he lays special emphasis on demoniacal possession (cf. Mr 1:23).

That were oppressed ( $\tau 0 \cup \varsigma \kappa \alpha \tau \alpha \delta v v \alpha \sigma \tau \varepsilon v \circ \mu \varepsilon v o v \varsigma)$. Present passive articular participle of $\kappa \alpha \tau \alpha \delta v v a \sigma \tau \varepsilon v \omega$. A late verb in LXX and papyri. In the N.T. only here and Jas 2:6 (best MSS.). One of the compounds of ката made transitive. The reality of the devil (the slanderer, $\delta \iota \alpha \beta \circ \lambda o \varsigma)$ is recognized by Peter.

For God was with him (o o $\theta \varepsilon o \varsigma ~ \eta \nu \mu \varepsilon \tau^{\prime}$ avtov). Surely this reason does not reveal "a low Christology" as some charge. Peter had used the same language in Ac 7:9 and earlier in Lu 1:28,66 as Nicodemus does in Joh 3:2 .

Acts 10:39
And we are witnesses ( $\kappa \alpha \eta \mu \varepsilon ı \varsigma \mu \alpha \rho \tau \nu \rho \varepsilon \varsigma)$. Compare "ye yourselves know" (verse 37). Peter thus appeals to what the audience know and to what the disciples know. He made the same claim about personal witnesses of the Resurrection of Jesus at Pentecost (2:32). Here Peter affirms full knowledge of the work of Jesus in Judea (for whole country including Galilee and Perea) and Jerusalem (given mainly in John's Gospel). In the Greek $\omega v$ (which) is attracted into the genitive case to agree with the antecedent $\pi \alpha \nu \tau \omega \nu$ (all), a common enough idiom.

Whom also they slew ( $о v \kappa \alpha \alpha v \varepsilon \iota \lambda \alpha v$ ). Second aorist active indicative of $\alpha v \alpha \iota \rho \varepsilon \omega$ with $\alpha$ as often in Acts (2:23; 5:30). But note $\kappa \alpha$ (also) in the old MSS., not in the Textus Receptus. They "also" slew him, went that far, "this crowning atrocity" (Vincent), кa could here be "even."

Hanging him on a tree ( $\kappa \rho \varepsilon \mu \alpha \sigma \alpha \nu \tau \varepsilon \varsigma \varepsilon \pi \xi \nu \lambda o v)$. This same expression used by Peter in 5:30 which see for discussion.

Acts 10:40
Gave him to be made manifest ( $\varepsilon \delta \omega \kappa \varepsilon v \alpha v \tau o v \varepsilon \mu \varphi \alpha v \eta \gamma \varepsilon v \varepsilon \sigma \theta \alpha)$. Peculiar phrase, here only in the N.T. and in Ro 10:20 (quoted from Isa 65:1). E $\mu \varphi \alpha \vee \eta$, predicate accusative after infinitive $\gamma \varepsilon v \varepsilon \sigma \theta \alpha$ agreeing with $\alpha v \tau o v$ object of $\varepsilon \delta \omega \kappa \varepsilon v$.

Acts 10:41

Chosen before ( $\pi \rho о к \varepsilon \chi \varepsilon!\rho о \tau о v \eta \mu \varepsilon v o r$ ). Perfect passive participle dative plural from $\pi \rho \circ \chi \varepsilon \iota \rho о \tau о v \varepsilon \omega$, to choose or designate by hand ( $\chi \varepsilon \iota \rho о \tau о \nu \varepsilon \omega, \chi \varepsilon \iota \rho$, hand, and $\tau \varepsilon เ v \omega$, to stretch, as in Ac 14:23; 2Co 8:19), beforehand ( $\pi \rho 0$ ), a double compound as old as Plato, but here alone in the N.T. Peter is evidently stating the thing as it happened and not trying to make a convincing story by saying that both friends and foes saw him after his resurrection. It is the "historian's candour" (Paley) in Luke here that adds to the credibility of the narrative. The sceptical Jews would not have believed and Jesus was kept from open contact with the world of $\sin$ after his Passion.
 $\alpha v \tau \omega$ ). The "who" (oıtıv६¢) is first person agreeing with "us" ( $\eta \mu \nu \nu$ ). Second aorist active indicative of the common verbs $\sigma \nu v \varepsilon \sigma \theta \omega \omega$ and $\sigma \nu \mu \pi \nu \nu \omega$. Av $\omega \omega$ is associative instrumental case. There are difficulties to us in understanding how Jesus could eat and drink after the resurrection as told here and in Lu 24:41-3, but at any rate Peter makes it clear that it was no hallucination or ghost, but Jesus himself whom they saw after he rose from the dead, "after the rising as to him" ( $\mu \varepsilon \tau \alpha$ тo $\alpha v a \sigma \tau \eta v \alpha \alpha 0 \tau \sigma \nu, \mu \varepsilon \tau \alpha$ with the accusative articular infinitive second aorist active and the accusative autov of general reference). Furneaux dares to think that the disciples misunderstood Jesus about eating after the resurrection. But that is to deny the testimony merely because we cannot explain the transition state of the body of Jesus.

Acts 10:42
He charged ( $\pi \alpha \rho \eta \gamma \gamma \varepsilon i \lambda \varepsilon v$ ). First aorist active indicative as in 1:4. There Jesus is the subject and so probably here, though Page insists that o $\theta \varepsilon o \varsigma$ (God) is here because of verse 40.

To testify ( $\delta ı \alpha \mu \alpha \rho \tau \cup \rho a \sigma \theta \alpha)$. First aorist middle infinitive. See on 2:40.
Ordained ( $\omega \rho \stackrel{\sigma \mu \varepsilon v o \varsigma) . ~ P e r f e c t ~ p a s s i v e ~ p a r t i c i p l e ~ o f ~ o \rho ı \zeta \omega, ~ o l d ~ v e r b, ~ t o ~ m a r k ~ o u t, ~ t o ~}{\text { on }}$ limit, to make a horizon.

Judge (kрıтŋऽ). The same point made by Peter in 1Pe 4:5. He does not use the word "Messiah" to these Gentiles though he did say "anointed" ( $\varepsilon \chi \rho \iota \sigma \varepsilon$ ) in verse 38. Peter's claim for Jesus is that he is the Judge of Jew and Gentile (living and dead).

Acts 10:43
Every one that believeth ( $\pi \alpha \nu \tau \alpha \operatorname{\tau ov} \pi / \sigma \tau \varepsilon v o v \tau \alpha$ ). This accusative active participle of general reference with the infinitive in indirect discourse is the usual idiom. Only $\lambda \alpha \beta \varepsilon \iota v$ (second aorist active infinitive of $\lambda \alpha \mu \beta \alpha v \omega$ ) is not indirect statement so much as indirect command or arrangement. The prophets bear witness to Jesus Christ to this effect. It is God's plan and no race distinctions are drawn. Peter had already said the same thing at Pentecost ( 2:38), but now he sees himself that Gentiles do not have to become Jews, but have only to believe in Jesus as Messiah and Judge as foretold by the prophets. It was glorious news to Cornelius and his group.

Through his name ( $\delta ı \alpha$ tov ovouatos avtov), not as a title or magic formula (Ac 18:13 ), but the power of Christ himself represented by his name.

Acts 10:44
While Peter yet spake ( $\varepsilon \tau \lambda \alpha \lambda o v v \tau \circ \varsigma ~ \tau o v ~ П \varepsilon \tau \rho o v)$. Genitive absolute of present participle, still going on.

The Holy Ghost fell ( $\varepsilon \pi \varepsilon \pi \varepsilon \sigma \varepsilon v \tau$ тo $\pi v \varepsilon v \mu \alpha$ тo $\alpha \gamma \iota \nu$ ). Second aorist active indicative of $\varepsilon \pi \iota \pi \iota \pi \tau \omega$, old verb to fall upon, to recline, to come upon. Used of the Holy Spirit in 8:16; 10:44; 11:15. It appears that Peter was interrupted in his sermon by this remarkable event. The Jews had received the Holy Spirit ( $2: 4$ ), the Samaritans ( $8: 17$ ), and now Gentiles. But on this occasion it was before baptism, as was apparently true in Paul's case (9:17f. ). In $8: 16$; 19:5 the hands of the apostles were also placed after baptism on those who received the Holy Spirit. Here it was unexpected by Peter and by Cornelius and was indubitable proof of the conversion of these Gentiles who had accepted Peter's message and had believed on Jesus Christ as Saviour.

Acts 10:45
They of the circumcision which believed (о єк $\pi \varepsilon \rho \iota \tau о \mu \eta \varsigma \pi \iota \sigma \tau)$ ). The believing ones of the circumcision, more exactly.

Were amazed ( $\varepsilon \xi \varepsilon \sigma \tau \eta \sigma \alpha v$ ). Second aorist active indicative, intransitive, of $\varepsilon \xi \iota \sigma \tau \eta \mu$. They stood out of themselves.

On the Gentiles also ( $\kappa \alpha \varepsilon \pi \tau \alpha \varepsilon \theta \nu \eta$ ). Or, even upon the Gentiles.
Was poured out ( $\varepsilon \kappa \kappa \varepsilon \chi \cup \tau \alpha)$. Present perfect passive retained in indirect discourse of $\varepsilon \kappa \chi \varepsilon \omega$ or $\varepsilon \kappa \chi \cup v \omega$, old verb, used metaphorically of the Holy Spirit also in 2:17 (from Joe 2:28f. ), Ac 2:33.

Acts 10:46
They heard ( $\eta$ кovov). Imperfect active, were hearing, kept on hearing.
Speak ( $\lambda \alpha \lambda o u v \tau \omega v$ ). Present active participle, speaking, for they kept it up.
With tongues ( $\gamma \lambda \omega \sigma \sigma \alpha \iota \varsigma)$. Instrumental case as in 2:4,11 which see. The fuller statement there makes it clear that here it was new and strange tongues also as in 19:6; 1Co 14:4-19. This sudden manifestation of the Holy Spirit's power on uncircumcised Gentiles was probably necessary to convince Peter and the six brethren of the circumcision that God had opened the door wide to Gentiles. It was proof that a Gentile Pentecost had come and Peter used it effectively in his defence in Jerusalem (Ac 11:15).

Acts 10:47
Can any man forbid the water? (Мף $М \tau \frac{v \delta \omega \rho}{} \delta v v \alpha \tau \alpha \kappa \omega \lambda v \sigma \alpha \tau \tau \sigma$ ?). The negative $\mu \eta \tau$ expects the answer No. The evidence was indisputable that these Gentiles were converted and so were entitled to be baptized. See the similar idiom in Lu 6:39. Note the article with "water." Here the baptism of the Holy Spirit had preceded the baptism of water (Ac 1:5; 11:16 ). "The greater had been bestowed; could the lesser be withheld?" (Knowling).

That these should not be baptized ( $\tau$ о $\mu \eta \beta a \pi \tau \iota \sigma \theta \eta v \alpha$ тоитои¢). Ablative case of the articular first aorist passive infinitive of $\beta \alpha \pi \tau \iota \zeta \omega$ with the redundant negative after the verb of hindering ( $\kappa \omega \lambda \cup \sigma \alpha$ ) and the accusative of general reference ( $\tau$ outouc). The redundant negative after the verb of hindering is not necessary though often used in ancient Greek and in the Koine (papyri). Without it see Mt 19:14; Ac 8:36 and with it see Lu 4:42; 24:16; Ac 14:18 . Cf. Robertson, Grammar, pp. 1061, 1094, 1171. The triple negatives here are a bit confusing to the modern mind ( $\mu \eta \tau$ in the question, $\kappa \omega \lambda \nu \sigma \alpha$, to hinder or to cut off, $\mu \eta$ with $\beta a \pi \tau \iota \sigma \theta \eta \alpha)$. Literally, Can any one cut off the water from the being baptized as to these? Meyer: "The water is in this animated language conceived as the element offering itself for the baptism."

As well as we ( $\omega \varsigma \kappa \alpha \eta \mu \varepsilon \varsigma)$ ). The argument was conclusive. God had spoken. Note the query of the eunuch to Philip (Ac 8:36 ).

Acts 10:48
Commanded ( $\pi \rho 0 \sigma \varepsilon \tau \alpha \xi \varepsilon v)$. First aorist active indicative. Peter himself abstained from baptizing on this occasion (cf. Paul in 1Co 1:14 ). Evidently it was done by the six Jewish brethren.

Them to be baptized (autovc $\beta \alpha \pi \tau \iota \sigma \theta \eta v \alpha$ ). Accusative of general reference with the first aorist passive infinitive.

In the name of Jesus Christ ( $\varepsilon v \tau \omega$ ovo $\mu \alpha \tau$ In $\sigma o v$ Xpıбтov). The essential name in Christian baptism as in 2:38; 19:5. But these passages give the authority for the act, not the formula that was employed (Alvah Hovey in Hackett's Commentary. See also chapter on the Baptismal Formula in my The Christ of the Logia). "Golden days" (aupe $\delta \iota \varepsilon \varsigma$, Bengel) were these for the whole group.

## Acts 11

Acts 11:1
In Judea (ката $\tau \eta v$ Iov $\delta \alpha \iota \nu \nu$ ). Throughout Judea (probably all Palestine), distributive use of kata. The news from Casearea spread like wildfire among the Jewish Christians. The case of the Samaritans was different, for they were half Jews, though disliked. But here were real Romans even if with Jewish affinities.

Had received ( $\varepsilon \delta \varepsilon \xi \alpha v \tau 0)$. First aorist middle indicative. The English idiom requires "had" received, the Greek has simply "received."

Acts 11:2
They that were of the circumcision (o عк $\pi \varepsilon \rho \iota \tau о \mu \eta \varsigma)$. Literally, those of circumcision (on the side of circumcision, of the circumcision party). The phrase in 10:46 is confined to the six brethren with Peter in Caesarea (11:12). That can hardly be the meaning here for it would mean that they were the ones who brought the charge against Peter though Hort takes this view. All the disciples in Jerusalem were Jews so that it can hardly mean the whole body. In Ga 2:12 the phrase has the narrower sense of the Judaizing or Pharisaic wing of the disciples (Ac 15:5) who made circumcision necessary for all Gentile converts. Probably here by anticipation Luke so describes the beginning of that great controversy. The objectors probably did not know of Peter's vision at Joppa, but only of the revolutionary conduct of Peter in Caesarea. These extremists who spoke probably had abundant sympathy in their protest. The apostles are mentioned in verse 1 , but are not referred to in verse 2 . Apparently they are in contrast with the circumcision party in the church.

Contended ( $\delta \iota \kappa \rho \imath \nu o v \tau o)$. Imperfect middle of the common verb $\delta \iota \alpha \kappa \rho \imath \nu \omega$, to
separate. Here to separate oneself apart ( $\delta \iota \alpha$ ), to take sides against, to make a cleavage ( $\delta \iota a$, two, in two) as in Jude 1:9. So Peter is at once put on the defensive as the contention went on. It is plain that Peter was not regarded as any kind of pope or overlord.

## Acts 11:3

Thou wentest in $(\varepsilon เ \sigma \eta \lambda \theta \varepsilon \varsigma)$. Direct form, but Westcott and Hort have it $\varepsilon \iota \sigma \eta \lambda \theta \varepsilon \nu$ (he
 is more vivid.

Men uncircumcised ( $\alpha v \delta \rho \alpha \varsigma ~ \alpha \kappa \rho о \beta v \sigma \tau \iota \alpha v \varepsilon \chi \circ v \tau \alpha \varsigma)$. "Men having uncircumcision." It is a contemptuous expression. They did not object to Peter's preaching to the Gentiles, but to his going into the house of Cornelius and eating with them, violating his supposed obligations as a Jew (Hackett). It was the same complaint in principle that the Pharisees had made against Jesus when he ate with publicans and sinners (Lu 15:12). The Jews had not merely the Mosaic regulations about clean and unclean food, but also the fact that at a Gentile table some of the meat may have been an idol sacrifice. And Peter himself had sim-
ilar scruples when the vision came to him at Joppa and when he entered the house of Cornelius in Caesarea 10:28). Peter had been led beyond the circumcision party.

Acts 11:4
Began ( $\alpha \rho \xi \alpha \mu \varepsilon \nu o \varsigma)$. Not pleonastic here, but graphically showing how Peter began at the beginning and gave the full story of God's dealings with him in Joppa and Caesarea.

Expounded ( $\varepsilon \xi \varepsilon \tau \iota \theta \varepsilon \tau o)$. Imperfect middle of $\varepsilon \kappa \tau \iota \theta \eta \mu$, to set forth, old verb, but in the N.T. only in Acts $(7: 21 ; 11: 4 ; 18: 26 ; 28: 23)$, a deliberate and detailed narrative "in order" ( $\kappa a \theta \varepsilon \xi \eta \varsigma)$. Old word for in succession. In the N.T. only in $\operatorname{Lu} 1: 2 ; 8: 1 ;$ Ac 3:24; 11:14; 18:23 . Luke evidently considered this defence of Peter important and he preserves the marks of authenticity. It came originally from Peter himself (verses 5,6,15,16 ). "The case of Cornelius was a test case of primary importance" (Page), "the first great difficulty of the early Church." Part of the story Luke gives three times (10:3-6,30-32; 11:13f. ). See the discussion chapter 10 for details given here.

## Acts 11:5

Let down ( $\kappa \alpha \theta ı \varepsilon \mu \varepsilon \nu \eta v$ ). Here agreeing with the "sheet" (o $\theta o v \eta v$, feminine), not with "vessel" (бкعvoৎ, neuter) as in 10:11.

Even unto me ( $\alpha \chi \rho \varepsilon \mu \circ v$ ). Vivid detail added here by Peter.
Acts 11:6
When I had fastened my eyes ( $\alpha \tau \varepsilon v / \sigma \alpha \varsigma$ ). This personal touch Peter adds from his own experience. See on $\operatorname{Lu} 4: 20$; Ac 3:4,12 for this striking verb $\alpha \tau \varepsilon v \iota \zeta \omega$, to stretch the eyes towards, first aorist active participle here.

I considered ( $\kappa \alpha \tau \alpha \vee \circ \varepsilon \omega)$. Imperfect active of $\kappa \alpha \tau \alpha v \varepsilon \sigma \omega$ to put the mind down on, to ponder, I was pondering.

And saw ( $\kappa \alpha \varepsilon \iota \delta o v$ ). Second aorist active indicative, saw in a flash.
Acts 11:7
A voice saying ( $\varphi \omega \vee \eta \varsigma \lambda \varepsilon \gamma о \cup \sigma \eta \varsigma)$. Genitive case after $\eta \kappa о \cup \sigma \alpha$ (cf. 9:7 and accusative 9:4 which see for discussion). Participle $\lambda \varepsilon \gamma 0 v \sigma \eta \varsigma$ (present active of $\lambda \varepsilon \gamma \omega$ ) agreeing with $\varphi \omega \vee \eta \varsigma$, a kind of indirect discourse use of the participle.

Acts 11:8
Came into my mouth ( $\varepsilon เ \sigma \eta \lambda \theta \varepsilon v \varepsilon \iota \varsigma ~ \tau о ~ \sigma \tau о \mu \alpha \mu о v)$. Instead of $\varepsilon \varphi a \gamma \circ \nu$ (I ate) in 10:14. Different phrase for the same idea.

Acts 11:10
Was drawn up ( $\alpha v \varepsilon \sigma \pi \alpha \sigma \theta \eta$ ). Instead of $\alpha v \varepsilon \lambda \eta \mu \pi \theta \eta$ (was taken up) in 10:16. First aorist passive indicative of $\alpha v \alpha \sigma \pi \alpha \omega$, old verb, but in N.T. only in Lu 14:5 and here.

Acts 11:12
Making no distinction ( $\mu \eta \delta \varepsilon v \delta \iota \alpha \kappa \rho \imath v \alpha \nu \tau \alpha$ ). So Westcott and Hort (first aorist active
 like 10:20. The difference in voice shows the distinction in meaning.

We entered into the man's house ( $\varepsilon เ \sigma \eta \lambda \theta$ о $\mu \varepsilon \varepsilon \varepsilon \iota \varsigma ~ \tau о \nu$ oוкоv tov $\alpha v \delta \rho \circ \varsigma)$ ). Peter confesses it, but shows that the other six went in also. He avoids mention of Cornelius's name and office.

Acts 11:13
Standing and saying ( $\sigma \tau \alpha \theta \varepsilon \nu \tau \alpha \kappa \alpha \varepsilon ו \pi \sigma v \tau \alpha)$. More precisely, "stand and say" (punctiliar act, first aorist passive and second aorist active participles).

Fetch Simon ( $\mu \varepsilon \tau \alpha \pi \varepsilon \mu \psi \alpha \Sigma \mu \omega v \alpha$ ). First aorist middle imperative. Third time mentioned ( $10: 5,22 ; 11: 13$ ). Perhaps Peter is anxious to make it plain that he did not go of his own initiative into the house of Cornelius. He went under God's direct orders.

Acts 11:14
Whereby thou shalt be saved, thou and all thy house ( $\varepsilon v$ оц $\sigma \omega \theta \eta \sigma \eta \sigma \cup$ ка $\pi \alpha \varsigma$ о окко $\sigma o v)$. Future passive indicative of $\sigma \omega \zeta \omega$, to save. Clearly Cornelius was unsaved in spite of his interest in Jewish worship. Clearly also the household of Cornelius would likewise be won to Christ by the words of Simon Peter. This is household conversion before the household baptism (10:48; 11:17).

Acts 11:15
As I began to speak ( $\varepsilon v \tau \omega \alpha \rho \xi \alpha \sigma \theta \alpha \mu \varepsilon \lambda \alpha \lambda \varepsilon ı v$ ). Ev with the locative of the articular aorist infinitive $\alpha \rho \xi \alpha \sigma \theta \alpha$ (punctiliar action simply) and the accusative of general reference. The second infinitive $\lambda \alpha \lambda \varepsilon เ v$ (to speak) is dependent on $\alpha \rho \xi \alpha \sigma \theta \alpha$, "In the beginning to speak as to me."

Even as on us at the beginning ( $\omega \sigma \pi \varepsilon \rho \kappa \alpha \varepsilon \varphi^{\prime} \eta \mu \alpha \varsigma \varepsilon \nu \alpha \rho \chi \eta$ ). Peter recalls vividly the events at Pentecost, the speaking with tongues and all. It is noteworthy that Peter does not here repeat his sermon. "He rests his defence, not on what he said, but on what God did" (Furneaux).

Acts 11:16
I remembered $(\varepsilon \mu \nu \eta \sigma \theta \eta v)$. First aorist passive indicative of the common verb $\mu \mu \nu \eta \sigma \kappa \omega$, to remind. Peter recalls the very words of Jesus as reported in Ac 1:5. Peter now understands this saying of Jesus as he had not done before. That is a common experience with us all as new experiences of grace open richer veins in God's truth (Joh 12:16). Peter clearly sees that the water baptism is merely the symbol or picture of the spiritual baptism in the heart.

Acts 11:17
The like gift ( $\tau \eta \nu \iota \sigma \eta \nu \delta \omega \rho \varepsilon \alpha v$ ). The equal gift, equal in quality, rank, or measure. Common word.

When we believed ( $\pi / \sigma \tau \varepsilon v \sigma \alpha \sigma \iota v)$. First aorist active participle of $\pi / \sigma \tau \varepsilon v \omega$ in the dative case. It agrees both with $\eta \mu \nu \nu$ (unto us) and with avtorc (unto them), "having believed on the Lord Jesus Christ." Both classes (Gentiles and Jews) trusted in Christ, and both received the Holy Spirit.

Who was I ( $\varepsilon \gamma \omega \tau \iota \varsigma \eta \mu \eta v)$. Note order, "I, who was I." " That I could withstand God " ( $\delta \cup v a \tau o \varsigma \kappa \omega \lambda \nu \sigma \alpha$ тov $\theta \varepsilon o v$ ). Literally, "able to withstand or hinder God." It is a rhetorical question, really two questions. Who was I ? Was I able to hinder God? Peter's statement of the facts made an unanswerable defence. And yet Peter ( $\mathrm{Ga} 2: 11$ ) will later in Antioch play the coward before emissaries from Jerusalem on this very point of eating with Gentile Christians.

Acts 11:18
Held their peace ( $\eta \sigma v \chi \alpha \sigma \alpha v$ ). Ingressive aorist active indicative of $\eta \sigma v \chi \alpha \zeta \omega$, old verb to be quiet, to keep quiet. The wrangling (verse 2) ceased. The critics even "glorified God" ( $\varepsilon \delta o \xi \alpha \sigma \alpha \nu$, ingressive aorist again).

Then to the Gentiles also (A $\rho \alpha \kappa \alpha$ тоぃ $\varepsilon \theta v \varepsilon \sigma \iota v$ ). Е $\rho \gamma$ о as in Lu 11:20,48 and like $\alpha \rho \alpha$ ovv in Ro 5:18. In ancient Greek inferential apa cannot come at the beginning of a clause as here. It was reluctant acquiescence in the undoubted fact that God had "granted repentance unto life" to these Gentiles in Caesarea, but the circumcision party undoubtedly looked on it as an exceptional case and not to be regarded as a precedent to follow with other Gentiles. Peter will see in this incident (Ac 15:8) the same principle for which Paul contends at the Jerusalem Conference. Furneaux suggests that this conduct of Peter in Caesarea, though grudgingly acquiesced in after his skilful defence, decreased his influence in Jerusalem where he had been leader and helped open the way for the leadership of James the Lord's brother.

Acts 11:19
They therefore that were scattered abroad ( $о \mu \varepsilon \nu$ ovv $\delta \iota \alpha \sigma \pi \alpha \rho \varepsilon \nu \tau \varepsilon \varsigma$ ). Precisely the same words used in 8:4 about those scattered by Saul (which see) and a direct reference to it is made by the next words, "upon the tribulation that arose about Stephen" (a $\alpha \boldsymbol{\tau} \boldsymbol{\tau} \eta$ $\theta \lambda \iota \psi \varepsilon \omega \varsigma \tau \eta \varsigma \gamma \varepsilon v o \mu \varepsilon \nu \eta \varsigma \varepsilon \pi \Sigma \tau \varepsilon \varphi \alpha \nu \omega)$. As a result of ( $\alpha \pi 0$ ), in the case of ( $\varepsilon \pi$ ) Stephen. From that event Luke followed Saul through his conversion and back to Jerusalem and to Tarsus. Then he showed the activity of Peter outside of Jerusalem as a result of the cessation of the persecution from the conversion of Saul with the Gentile Pentecost in Caesarea and the outcome in Jerusalem. Now Luke starts over again from the same persecution by Saul and runs a new line of events up to Antioch parallel to the other, probably partly following.

Except to Jews only ( $\varepsilon \mu \eta \mu$ ovov Iov $\alpha$ aıoı). Clearly these disciples did not know anything about the events in Caesarea and at first their flight preceded that time. But it was a wonderful episode, the eager and loyal preaching of the fleeing disciples. The culmination in Antioch was probably after the report of Peter about Caesarea. This Antioch by the Orontes was founded 300 B.C. by Seleucus Nicator and was one of five cities so named by the Seleucides. It became the metropolis of Syria though the Arabs held Damascus first. Antioch ranked next to Rome and Alexandria in size, wealth, power, and vice. There were many Jews in the cosmopolitan population of half a million. It was destined to supplant Jerusalem as the centre of Christian activity.

Acts 11:20
Spake ( $\varepsilon \lambda \alpha \lambda o u v$ ). Inchoative imperfect active, began to speak. For them it was an experiment.

Unto the Greeks also ( $\kappa \alpha \pi \rho о \varsigma ~ \tau о \nu \varsigma ~ Н \varepsilon \lambda \lambda \eta \nu \alpha \varsigma) . ~ T h i s ~ i s ~ u n d o u b t e d l y ~ t h e ~ c o r r e c t ~ r e a d i n g ~$ in spite of Hellenists (H $\varepsilon \lambda \lambda \eta \nu \iota \sigma \tau \alpha \varsigma)$ or Grecian Jews in B E H L P. H $\varepsilon \lambda \lambda \eta v a \varsigma$ is read by A and D and a corrector of Aleph. The presence of "also" or "even" ( $\kappa \alpha$ ) in Aleph A B makes no sense unless "Greeks" is correct. Hellenists or Grecian Jews as Christians were common enough as is seen in Ac $2 ; 6$. Saul also had preached to the Hellenists in Jerusalem (9:29). Hellenists were merely one kind of Jews in contrast with those who spoke Aramaic (Ac 6 ). It is true that the case of Cornelius was first in importance, but it is not clear that it was before the work in Antioch. Probably the report of the work among the Greeks in Antioch reached Jerusalem after Peter's defence in 11:1-18. That explains the calm tone about it and also why Barnabas and not Peter was sent to investigate. Peter and John (Ac 8 ) had condoned Philip's work in Samaria and Peter was the agent in the work among the Romans in Caesarea. His position was now well-known and his services discounted for this new crisis. These Greeks in Antioch were apparently in part pure heathen and not "God-fearers" like Cornelius. A man of wisdom was called for. These preachers were themselves Hellenists (verse 19) and open to the lessons from their environment without a vision such as Peter had at Joppa. "It was a departure of startling boldness" (Furneaux) by laymen outside of the circle of official leaders.

Acts 11:21
The hand of the Lord was with them ( $\eta v \chi \varepsilon \iota \rho \kappa v \rho \iota v \mu \varepsilon \tau^{\prime} \alpha v \tau \omega v$ ). This O.T. phrase (Ex 9:3; Isa 59:1) is used by Luke (Lu 1:66; Ac 4:28,30; 13:11). It was proof of God's approval of their course in preaching the Lord Jesus to Greeks.

Turned unto the Lord ( $\varepsilon \pi \varepsilon \sigma \tau \rho \varepsilon \psi \varepsilon v \varepsilon \pi \tau 0 \nu \kappa v \rho ı \nu)$. First aorist active indicative of $\varepsilon \pi \iota \sigma \tau \rho \varepsilon \varphi \omega$, common verb to turn. The usual expression for Gentiles turning to the true God (14:15; 15:3,19; 26:18,20; 1Th 1:9 ). Here "Lord" refers to "the Lord Jesus" as in verse 20, though "the hand of the Lord" is the hand of Jehovah, clearly showing that the early disciples put Jesus on a par with Jehovah. His deity was not a late development read back into the early history.

Acts 11:22
Came to the ears $(\eta \kappa о v \sigma \theta \eta \varepsilon \iota \varsigma \tau \alpha \omega \tau \alpha)$. First aorist passive indicative of $\alpha \kappa 0 v \omega$, was heard in the ears.

Of the church which was in Jerusalem ( $\tau \eta \varsigma \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha \varsigma \tau \eta \varsigma \varepsilon \nu$ I $\varepsilon \rho \circ \cup \sigma \alpha \lambda \eta \mu$ ). Not yet was the term "church" applied to the group of disciples in Antioch as it is in 11:26; 13:1.

They sent forth ( $\varepsilon \xi \alpha \pi \varepsilon \sigma \tau \varepsilon \iota \lambda \alpha v)$. First aorist active indicative of the double compound verb $\varepsilon \xi-\alpha \pi 0-\sigma \tau \varepsilon \lambda \lambda \omega$, to send out and away. The choice of Barnabas was eminently wise. He already had a position of leadership in Jerusalem because of his generosity (4:36f. ) and his
championship of Saul after his conversion (9:27). He was originally from Cyprus and probably had personal friends among some of the leaders in this new movement. He was to investigate the work of the travelling preachers (verse 19) all the way to Antioch ( $\varepsilon \omega \varsigma$ Avтıохвıळ؟).

Acts 11:23
The grace of God, was glad ( $\tau \eta \nu \chi \alpha \rho \nu \nu \tau \eta \nu$ tov $\theta \varepsilon o v \varepsilon \chi \alpha \rho \eta$ ). Note repetition of the article, "the grace that of God." The verb (second aorist passive indicative of $\chi \alpha \iota \rho \omega$ ) has the same root as $\chi$ apıc. See the same suavis paronomasia in Lu 1:28 . "Grace brings gladness" (Page). "A smaller man would have raised difficulties as to circumcision or baptism" (Furneaux).

He exhorted ( $\pi \alpha \rho \varepsilon \kappa \alpha \lambda \varepsilon$ ). Imperfect active, picturing the continuous encouragement from Barnabas.

With purpose of heart ( $\tau \eta \pi \rho \circ \theta \varepsilon \sigma \varepsilon \tau \eta \varsigma \kappa \alpha \rho \delta \iota \alpha \varsigma$ ). Placing before (from $\pi \rho o-\tau \iota \theta \eta \mu$ ), old word for set plan as in Ac 27:13; Ro 8:28. The glow of the first enthusiasm might pass as often happens after a revival. Barnabas had a special gift ( $4: 36$ ) for work like this.

Cleave unto the Lord ( $\pi \rho \circ \sigma \mu \varepsilon v \varepsilon เ v[\varepsilon \nu] \tau \omega \kappa \nu \rho I \omega$ ). Dative case (locative if $\varepsilon v$ is genuine) of кирıos (here Jesus again) after $\pi \rho о \sigma \varepsilon \mu \varepsilon v \varepsilon เ v ~ t o ~ k e e p ~ o n ~ r e m a i n i n g ~ l o y a l ~ t o ~(p r e s e n t ~ a c t i v e ~$ infinitive). Persistence was needed in such a pagan city.

Acts 11:24
For (ot). Because. This is the explanation of the conduct of Barnabas. The facts were opposed to the natural prejudices of a Jew like Barnabas, but he rose above such racial narrowness. He was a really good man ( $\alpha \gamma \alpha \theta$ os). See Ro 5:7 for distinction between $\alpha \gamma \alpha \theta$ os and $\delta \iota \kappa \alpha \iota \varsigma$, righteous, where $\alpha \gamma \alpha \theta$ oc ranks higher than $\delta \iota \kappa \alpha \iota \rho$. Besides, Barnabas was full of the Holy Spirit (like Peter) and of faith and so willing to follow the leading of God's Spirit and take some risks. This is a noble tribute paid by Luke. One wonders if Barnabas was still living when he wrote this. Certainly he was not prejudiced against Barnabas though he will follow the fortunes of Paul after the separation ( $15: 36 ; 41$ ).

Was added unto the Lord ( $\pi \rho \circ \sigma \varepsilon \tau \varepsilon \theta \eta \tau \omega \kappa \nu \rho \iota \omega$ ). First aorist passive indicative of $\pi \rho o \sigma \tau i \theta \eta \mu$, common verb to add to. These people were added to the Lord Jesus before they were added to the church. If that were always true, what a difference it would make in our churches.

Acts 11:25
To seek for Saul ( $\alpha v \alpha \zeta \eta \tau \eta \sigma \alpha$ $\Sigma \alpha u \lambda o v$ ). First aorist (effective) active infinitive of purpose. $A v a \zeta \eta \tau \varepsilon \omega$ is a common verb since Plato, but in the N.T. only here and Lu 2:44,45, to seek up and down ( $\alpha v \alpha$ ), back and forth, to hunt up, to make a thorough search till success comes. It is plain from Ga 1:21 that Saul had not been idle in Cilicia. Tarsus was not very far from Antioch. Barnabas probably knew that Saul was a vessel of choice (Ac 9:15 ) by Christ for the work among the Gentiles. He knew, of course, of Saul's work with the Hellenists in Jer-
usalem (9:29) and echoes of his work in Cilicia and Syria had probably come to him. So to Tarsus he goes when he saw the need for help. "He had none of the littleness which cannot bear the presence of a possible rival" (Furneaux). Barnabas knew his own limitations and knew where the man of destiny for this crisis was, the man who already had the seal of God upon him. The hour and the man met when Barnabas brought Saul to Antioch. The door was open and the man was ready, far more ready than when Jesus called him on the road to Damascus. The years in Cilicia and Syria were not wasted for they had not been idle. If we only knew the facts, it is probable that Saul also had been preaching to Hellenes as well as to Hellenists. Jesus had definitely called him to work among the Gentiles (9:15). In his own way he had come to the same place that Peter reached in Caesarea and that Barnabas now holds in Antioch. God always has a man prepared for a great emergency in the kingdom. The call of Barnabas was simply the repetition of the call of Christ. So Saul came.

Acts 11:26
Even for a whole year ( $\kappa \alpha$ eviavtov o入ov). Accusative of extent of time, probably the year A.D. 44, the year preceding the visit to Jerusalem (11:30), the year of the famine. The preceding years with Tarsus as headquarters covered A.D. 37 (39) to 44.

They were gathered together with the church ( $\sigma v \nu \alpha \chi \theta \eta \nu \alpha \varepsilon \nu \tau \eta \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$ ). First aorist passive infinitive of $\sigma v v a \gamma \omega$, old verb, probably here to meet together as in Mt 28:12 . In Ac 14:27 the verb is used of gathering together the church, but here $\varepsilon \nu \tau \eta \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$ excludes that idea. Barnabas met together "in the church" (note first use of the word for the disciples at Antioch). This peculiar phrase accents the leadership and co-operation of Barnabas and Saul in teaching ( $\delta เ \delta \alpha \xi \alpha$, first aorist active infinitive) much people. Both infinitives are in the nominative case, the subject of $\varepsilon \gamma \varepsilon v \varepsilon \tau 0$ (it came to pass).

And that the disciples were called Christians first in Antioch ( $\chi \rho \eta \mu \alpha \tau \iota \sigma \alpha \tau \varepsilon \pi \rho \omega \tau \omega \varsigma$
 subject of $\varepsilon \gamma \varepsilon v \varepsilon \tau \frac{1}{c}$ and is added as a separate item by the use of $\tau \varepsilon$ rather than $\kappa \alpha$. For the word itself in the sense of divine command see on Mt 2:12,22; Lu 2:26; Ac 10:22. Here and in Ro 7:3 it means to be called or named (assuming a name from one's business, $\chi \rho \eta \mu \alpha$, from $\chi \rho \alpha о \mu \alpha$, to use or to do business). Polybius uses it in this sense as here. Tovৎ $\mu \alpha \theta \eta \tau \alpha \varsigma$ (the disciples) is in the accusative of general reference with the infinitive. Xpıotıavous (Christians) is simply predicate accusative. This word is made after the pattern of Hعpoסıavvs (Mt 22:16, H $\varepsilon \rho \omega \iota \delta \iota \alpha \nu o$, followers of Herod), Xacoa $\rho \iota \alpha \nu v$, , a follower of Caesar (Deissmann, Light from the Ancient East, p. 377, gives papyri examples of the genitive Kaıo 1 рос meaning also "belonging to Caesar" like the common adjective Xaعбapıavvৎ). It is made thus like a Latin adjective, though it is a Greek word, and it refers to the Hebrew belief in a Messiah (Page). The name was evidently given to the followers of Christ by the Gentiles to distinguish them from the Jews since they were Greeks, not Grecian Jews. The Jews would not call them Christians because of their own use of X $\rho \iota \sigma \tau$,
or Nazarenes. The followers of Christ called themselves disciples (learners), believers, brethren, saints, those of the Way. The three uses of Christian in the N.T. are from the heathen standpoint (here), Ac 26:28 (a term of contempt in the mouth of Agrippa), and 1 Pe 4:16 (persecution from the Roman government). It is a clear distinction from both Jews and Gentiles and it is not strange that it came into use first here in Antioch when the large Greek church gave occasion for it. Later Ignatius was bishop in Antioch and was given to the lions in Rome, and John Chrysostom preached here his wonderful sermons.

Acts 11:27
Prophets ( $\pi \rho \circ \varphi \eta \tau \alpha$ ). Christian prophets these were (cf. 13:1) who came from Jerusalem (the headquarters, 8:15). Judas and Silas are called prophets (14:4; 15:32). They were not just fore-tellers, but forth-tellers. The prophet had inspiration and was superior to the speaker with tongues (1Co 14:3). John was a prophet (Lu 7:26). We need prophets in the ministry today.

Acts 11:28
Signified ( $\varepsilon \sigma \eta \mu a ı v \varepsilon v)$. Imperfect active in Westcott and Hort, but aorist active $\varepsilon \sigma \eta \mu a v \varepsilon v$ in the margin. The verb is an old one from $\sigma \eta \mu \alpha$ ( $\sigma \eta \mu \varepsilon \iota o v$ ) a sign (cf. the symbolic sign in 21:11). Here Agabus (also in 21:10) does predict a famine through the Holy Spirit.

Should be ( $\mu \varepsilon \lambda \lambda \varepsilon เ v \varepsilon \sigma \varepsilon \sigma \theta \alpha)$. M $\varepsilon \lambda \lambda \omega$ occurs either with the present infinitive ( 16:27), the aorist infinitive ( 12:6), or the future as here and 24:15; 27:10 .

Over all the world ( $\varepsilon \varphi^{\prime}$ o $\lambda \eta \nu \tau \eta v$ oкко $\mu \mu \varepsilon v \eta \nu$ ). Over all the inhabited earth ( $\gamma \eta \nu$, understood). Probably a common hyperbole for the Roman empire as in Lu 2:1 . Josephus (Ant. VIII. 13, 4) appears to restrict it to Palestine.

In the days of Claudius ( $\varepsilon \pi$ K $\lambda \alpha u \delta \iota v$ ). He was Roman Emperor A.D. 41-44. The Roman writers (Suetonius, Dio Cassius, Tacitus) all tell of dearths (assiduae sterilitates) during the brief reign of Claudius who was preceded by Caligula and followed by Nero.

Acts 11:29
Every man according to his ability ( $\kappa \alpha \theta \omega \varsigma \varepsilon \cup \pi о \rho \varepsilon є \tau о \tau \iota)$ ). Imperfect middle of $\varepsilon \cup \pi о \rho \varepsilon \omega$, to be well off (from عuпороৎ), old verb, but here alone in the N.T., "as any one was well off." The sentence is a bit tangled in the Greek from Luke's rush of ideas. Literally, "Of the disciples, as any one was able (or well off), they determined ( $\omega \rho / \sigma \alpha v$, marked off the horizon) each of them to send relief ( $\varepsilon \iota \varsigma \delta \iota \propto \kappa o v ı \alpha v$, for ministry) to the brethren who dwelt in Judaea." The worst of the famine came A.D. 45. The warning by Agabus stirred the brethren in Antioch to send the collection on ahead.

Acts 11:30
Sending ( $\alpha \pi \circ \sigma \tau \varepsilon \lambda \alpha \nu \tau \varepsilon \varsigma)$. First aorist active participle of $\alpha \pi \circ \sigma \tau \varepsilon \lambda \lambda \omega$, coincident action with $\varepsilon \pi о \neq \eta \sigma \alpha$ (did).

To the elders ( $\pi \rho \circ \varsigma$ тous $\pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho о и \varsigma)$. The first use of that term for the Christian preachers. In 20:17,28 "elders" and "bishops" are used interchangeably as in Tit 1:5,7 . The
term probably arose gradually and holds a position in the church similar to the same term in the synagogue. The apostles were apparently absent from Jerusalem at this time and they were no longer concerned with serving tables. In 21:18 Paul presented the later collection also to the elders. Since Peter and James (till his death) were in Jerusalem during the persecution in chapter 12 it is probable that the visit of Barnabas and Saul to Jerusalem came really after that persecution for Peter left Jerusalem (12:17). The elders here mentioned may include the preachers in Judea also outside of Jerusalem ( 26:20).

## Acts 12

Acts 12:1
About that time ( $\left.\kappa \alpha \tau^{\prime} \varepsilon \kappa \varepsilon \iota \nu o v ~ \tau o v ~ \kappa \alpha ı \rho о \nu\right) . ~ S a m e ~ p h r a s e ~ i n ~ R o ~ 9: 9 . ~ T h a t ~ i s, ~ t h e ~ e a r l y ~$ part of A.D. 44 since that is the date of Herod's death. As already suggested, Barnabas and Saul came down from Antioch to Jerusalem after the persecution by Herod at the end of 44 or the beginning of 45 .

Herod the king ( $\mathrm{H} \eta \rho \omega \iota \delta \eta \varsigma$ o $\beta \alpha \sigma \iota \lambda \varepsilon \cup \varsigma$ ). Accurate title at this particular time. Herod Agrippa I, grandson of Herod the Great, was King of Palestine A.D. 42 to 44; only for these three years was a Herod king over Palestine since the death of Herod the Great and never afterwards. Archelaus never actually became king though he had the popular title at first (Mt 2:22).

Put forth his hands ( $\varepsilon \pi \varepsilon \beta \alpha \lambda \varepsilon \nu \tau \alpha \varsigma \chi \varepsilon \iota \rho a \varsigma)$. Second aorist active indicative of $\varepsilon \pi \iota \beta a \lambda \lambda \omega$, old verb, to cast upon or against. The same idiom with $\tau \alpha \varsigma \chi \varepsilon \iota \rho a \varsigma$ (the hands, common Greek idiom with article rather than possessive pronoun) in 4:3; 5:18 .

To afflict ( $\kappa \alpha \kappa \omega \sigma \alpha$ ). First aorist active infinitive of $\kappa \alpha \kappa \sigma \omega$, old word to do harm or evil to (како؟), already in 7:6,19. Outside of Acts in the N.T. only 1Pe 5:13. Infinitive of purpose. Probably the first who were afflicted were scourged or imprisoned, not put to death. It had been eight years or more since the persecution over the death of Stephen ceased with the conversion of Saul. But the disciples were not popular in Jerusalem with either Sadducees or Pharisees. The overtures to the Gentiles in Caesarea and Antioch may have stirred up the Pharisees afresh (cf. 6:14). Herod Agrippa I was an Idumean through his grandfather Herod the Great and a grandson of Mariamne the Maccabean princess. He was a favourite of Caligula the Roman Emperor and was anxious to placate his Jewish subjects while retaining the favour of the Romans. So he built theatres and held games for the Romans and Greeks and slew the Christians to please the Jews. Josephus (Ant. XIX. 7, 3) calls him a pleasant vain man scrupulously observing Jewish rites. Here we have for the first time political power (after Pilate) used against the disciples.

Acts 12:2
James the brother of John (I $\alpha \kappa \omega \beta \circ \nu \tau \circ \nu \alpha \delta \varepsilon \lambda \varphi \circ \vee \mathrm{I} \omega \alpha \nu \circ v$ ). He had been called by Jesus a son of thunder along with his brother John. Jesus had predicted a bloody death for both of them (Mr 10:38ff.; Mt 20:23). James is the first of the apostles to die and John probably the last. He is not James the Lord's brother (Ga 1:19). We do not know why Luke tells so little about the death of James and so much about the death of Stephen nor do we know why Herod selected him as a victim. Eusebius (H.E. ii. 9) quotes Clement of Alexandria as saying that a Jew made accusations against James and was converted and beheaded at the same time with him.

Killed with the sword ( $\alpha v \varepsilon 1 \lambda \varepsilon v \mu \alpha \chi \alpha \rho \rho \eta$ ). The verb is a favourite one with Luke (Ac 2:33; 5:33,36; 7:28; 9:23-29; 10:39, etc.). Instrumental case and Ionic form of $\mu \alpha \chi \alpha$ । $\rho \alpha$. The Jews considered beheading a shameful death as in the case of the Baptist (Mt 14:10).

Acts 12:3
That it pleased the Jews (oт apeotov eбтıv toı Iovסaıoı). Indirect assertion with the present tense $\varepsilon \sigma \tau \iota v$ retained. Apعбтov is the verbal adjective from $\alpha \rho \varepsilon \sigma \kappa \omega$ followed by the dative as in Joh 8:29.

Proceeded to seize ( $\pi \rho \circ \sigma \varepsilon \theta \varepsilon \tau \frac{\sigma}{} \sigma \lambda \lambda \alpha \beta \varepsilon \tau v$ ). A patent Hebraism in Lu 20:11f. already, and nowhere else in the N.T. It occurs in the LXX (Ge 4:2; 8:12; 18:29, etc.). Second aorist middle indicative of $\pi \rho \circ \sigma \tau i \theta \eta \mu$ and the second aorist active infinitive of $\sigma \nu \lambda \lambda \alpha \mu \beta \alpha v \omega$. Literally, he added to seize, he seized Peter in addition to James.

The days of unleavened bread ( $\eta \mu \varepsilon \rho \alpha \tau \omega v \alpha \zeta \nu \mu \omega v$ ). By this parenthesis Luke locates the time of the year when Peter was arrested, the passover. It was a fine occasion for Agrippa to increase his favour among the crowds of Jews there by extra zeal against the Christians. It is possible that Luke obtained his information about this incident from John Mark for at his Mother's house the disciples gathered (12:12).

Acts 12:4
When he had taken him ( $\pi \downarrow \alpha \sigma \alpha \varsigma)$. See on 3:7 for same form.
He put him in prison ( $\varepsilon \theta \varepsilon \tau о ~ \varepsilon ı \varsigma ~ \varphi \cup \lambda \alpha \kappa \eta \nu$ ). Second aorist middle indicative of $\tau \imath \theta \eta \mu$, common verb. This is the third imprisonment of Peter (4:3; 5:18).

To four quaternions of soldiers ( $\tau \varepsilon \sigma \sigma \alpha \rho \sigma \iota \nu \tau \varepsilon \tau \rho \alpha \delta \iota \iota \varsigma \sigma \tau \rho \alpha \tau \iota \omega \tau \omega v$ ). Four soldiers in each quaternion ( $\tau \varepsilon \tau \rho a \delta \iota o v$ from $\tau \varepsilon \tau \rho a \varsigma$, four), two on the inside with the prisoner (chained to him) and two on the outside, in shifts of six hours each, sixteen soldiers in all, the usual Roman custom. Probably Agrippa had heard of Peter's previous escape ( $5: 19$ ) and so took no chances for connivance of the jailors.

After the passover ( $\mu \varepsilon \tau \alpha$ to $\pi \alpha \sigma \chi \alpha$ ). The passover feast of eight days. "The stricter Jews regarded it as a profanation to put a person to death during a religious festival" (Hackett). So Agrippa is more scrupulous than the Sanhedrin was about Jesus.

To bring him forth ( $\alpha v \alpha \gamma \alpha \gamma \varepsilon ו v ~ \alpha u \tau o v$ ). Second aorist active infinitive of $\alpha v \alpha \gamma \omega$, to lead up, old verb, used literally here. Peter was in the inner prison or lower ward and so would be led up to the judgment seat where Herod Agrippa would sit (cf. Joh 19:13).

To the people ( $\tau \omega \lambda \alpha \omega$ ). Ethical dative, in the presence of and for the pleasure of the Jewish people.

Acts 12:5
Therefore ( $\mu \varepsilon v \mathrm{ovv}$ ). Because of the preceding situation.
Was kept ( $\varepsilon \tau \eta \rho \varepsilon \iota \tau o)$. Imperfect passive, continuously guarded, waiting for the feast to be over.

But prayer was made earnestly ( $\pi \rho \circ \sigma \varepsilon v \chi \eta \delta \varepsilon \eta \nu \varepsilon \kappa \tau \varepsilon v \omega \varsigma \gamma เ v o \mu \varepsilon v \eta$ ). Probably $\delta \varepsilon$ here is not adversative (but), merely parallel (and) as Page argues. It was a crisis for the Jerusalem church. James had been slain and Peter was to be the next victim. Hence "earnestly" (late adverb from $\varepsilon \kappa \tau \varepsilon \nu \eta \varsigma$, strained, from $\varepsilon \kappa \tau \varepsilon เ \nu \omega$, to stretch. In the N.T. only here, Lu 22:44; 1 Pe 1:22) prayer was
going up ( $\gamma \iota v o \mu \varepsilon v \eta$, present middle participle, periphrastic imperfect with $\eta v$ ). It looked like a desperate case for Peter. Hence the disciples prayed the more earnestly.

Acts 12:6
Was about to bring him forth (Â $\eta \mu \varepsilon \lambda \lambda \varepsilon v \pi \rho о \sigma \alpha \gamma \alpha \gamma \varepsilon ı v$ or $\pi \rho \circ \alpha \gamma \alpha \gamma \varepsilon เ v$ ). The MSS. vary, but not $\alpha v \alpha \gamma \alpha \gamma \varepsilon \varepsilon^{2}$ of verse 4.

The same night ( $\tau \eta \nu \cup \kappa \tau \varepsilon \kappa \varepsilon เ v \eta)$. Locative case,
on that (very) night .
Was sleeping ( $\eta \nu \kappa о \mu \omega \mu \varepsilon v \circ \varsigma)$. Periphrastic middle imperfect.
Bound with two chains ( $\delta \varepsilon \delta \varepsilon \mu \varepsilon v o \varsigma ~ a \lambda v \sigma \varepsilon \sigma \iota v \delta v \sigma \tau v$ ). Perfect passive participle of $\delta \varepsilon \omega$, to bind, followed by instrumental case. One chain was fastened to each soldier (one on each side of Peter).

Kept ( $\varepsilon \tau \eta \rho o u v$ ). Imperfect active, were keeping. Two guards outside before the door and two inside, according to Roman rule. Did Peter recall the prophecy of Jesus that he should be put to death in his old age (Joh 21:18) ? Jesus had not said, as Furneaux does, that he would die by crucifixion.

Acts 12:7
Stood by him ( $\varepsilon \pi \varepsilon \sigma \tau \eta)$. Ingressive second aorist active indicative of $\varepsilon \varphi\llcorner\tau \tau \eta$, intransitive. This very form occurs in Lu 2:9 of the sudden appearance of the angel of the Lord to the shepherds. Page notes that this second aorist of $\varepsilon \varphi เ \sigma \tau \eta \mu$ occurs seven times in the Gospel of Luke, eight times in the Acts, and nowhere else in the N.T. Note also the same form $\alpha \pi \varepsilon \sigma \tau \eta$ (departed from, from $\alpha \varphi \iota \sigma \tau \eta \mu$, stood off from) of the disappearance of the angel in verse 10 .

In the cell ( $\varepsilon v \tau \omega$ oוк $\eta \mu \alpha \tau$ ). Literally, a dwelling place or habitation (from oкк $\omega \omega$, to dwell, oккос, house), but here not the prison as a whole as in Thucydides, but the room in the prison (cell) where Peter was chained to the two guards. Old word, but only here in the N.T.

He smote Peter on the side ( $\pi \alpha \tau \alpha \xi \alpha \varsigma \tau \eta v \pi \lambda \varepsilon v \rho \alpha \nu$ tov Пعт $\quad \circ$ ). More exactly, "smote the side of Peter." Strongly enough to wake Peter up who was sound asleep and yet not rouse the two guards. It was probably between 3 A.M. and 6 A.M., hours when changes in the guards were made.

Rise up ( $\alpha v a \sigma \tau \alpha$ ). Short form (Koine) of $\alpha v a \sigma \tau \eta \theta$, second aorist active imperative of avıбтๆu, intransitive. So also Ac 9:11 (Westcott and Hort text); Eph 5:14 .

Fell off ( $\varepsilon \xi \varepsilon \pi \varepsilon \sigma \alpha v)$. Second aorist active with $\alpha$ ending like first aorist of $\varepsilon \xi \pi \iota \pi \tau \omega$, old verb. This miracle was necessary if Peter was to escape without rousing the two guards.

Acts 12:8
Gird thyself ( $\zeta \omega \sigma \alpha$ ). Direct middle first aorist (ingressive) imperative (Robertson, Grammar, pp. 806f.) from $\zeta \omega v v v \mu(\zeta \omega v v v \omega)$. Old verb, but in the N.T. only here and Joh 21:18 (twice to Peter) where the active voice and the reflexive pronoun occur in the first example. The girdle was worn round the $\chi \iota \tau \omega \nu$ or undergarment.

Bind on (v $\tau \circ \delta \eta \sigma \alpha$ ). Indirect middle (by yourself or for yourself) first aorist imperative of vлоס $\varepsilon \omega$, to bind under, old verb, only three times in the N.T. (Mr 6:9; Ac 12:8; Eph 6:15 (middle)).

Sandals ( $\sigma \alpha v \delta \alpha \lambda ı \alpha)$. Persian word common from Herodotus on, a sole made of wood or leather covering the bottom of the foot and bound on with thongs. In the N.T. only here and Mr 6:9. In the LXX used indiscriminately with vтоסף $\mu$.

Cast about thee ( $\pi \varepsilon \rho \curlywedge \beta \alpha \lambda o v)$. Second aorist middle (indirect) imperative of $\pi \varepsilon \rho \iota \beta \alpha \lambda \lambda \omega$, old and common verb to throw around, especially clothing around the body as here. The ц $\mu \alpha \tau \iota o v$ (outer garment) was put over the $\chi \iota \tau \omega v$. It was not a hurried flight.

Follow me ( $\alpha \kappa \lambda о \cup \theta \varepsilon \mu$ o). Present (linear) active imperative, keep on following me (associative instrumental case).

Acts 12:9
Wist not (ouk $\eta \downarrow \delta \varepsilon$ ). Past perfect of ot $\delta \alpha$ used as imperfect, did not know.
Followed ( $\eta \kappa о \lambda o v \theta \varepsilon$ ). Imperfect active, kept on following as the angel had directed (verse 8). That it was true (o $\alpha \lambda \eta \theta \varepsilon \varsigma \varepsilon \sigma \tau \tau v$ ). Indirect assertion and so present tense retained. Note "true" ( $\alpha \lambda \eta \theta \varepsilon \varsigma)$ in the sense of reality or actuality.

Thought he saw a vision ( $\varepsilon \delta о к \varepsilon$ ораца $\beta \lambda \varepsilon \pi \varepsilon เ v$ ). Imperfect active, kept on thinking, puzzled as he was. $\mathrm{B} \lambda \varepsilon \pi \varepsilon เ v$ is the infinitive in indirect assertion without the pronoun (he) expressed which could be either nominative in apposition with the subject as in Ro 1:22 or accusative of general reference as in Ac 5:36; 8:9 (Robertson, Grammar, pp. 1036-40). Peter had had a vision in Joppa ( $10: 10$ ) which Luke describes as an "ecstasy," but here is objective fact, at least Luke thought so and makes that distinction. Peter will soon know whether he is still in the cell or not as we find out that a dream is only a dream when we wake up.

Acts 12:10
When they were past ( $\delta เ \varepsilon \lambda \theta$ ovtعऽ). Second aorist active participle of $\delta \iota \varepsilon \rho \chi \circ \mu \alpha$, transitive with $\delta \iota \alpha$ in composition.

The first and the second ward ( $\pi \rho \omega \tau \eta \nu \varphi \cup \lambda \alpha \kappa \eta \nu \kappa \alpha \delta \varepsilon v \tau \varepsilon \rho \alpha v$ ). It is not clear to what this language refers. Some take it to mean single soldiers, using $\varphi \cup \lambda \alpha \kappa \eta v$ in the sense of a guard (one before the door, one at the iron gate). But it seems hardly likely that the two soldiers with whom Peter had been stationed are meant. Probably the "first ward" means
the two soldiers of the quaternion stationed by the door and the second ward some other soldiers, not part of the sixteen, further on in the prison by the iron gate. However understood, the difficulties of escape are made plain.

Unto the iron gate that leadeth into the city ( $\varepsilon \pi \tau \eta \nu \pi \nu \lambda \eta \nu \tau \eta \nu \sigma \iota \delta \eta \rho \alpha \nu \tau \eta \nu \varphi \varepsilon \rho o u \sigma a v$ $\varepsilon \varsigma \varsigma \tau \eta \nu \pi 0 \lambda \iota \nu$ ). Note the triple use of the article (the gate the iron one the one leading into the city). For this resumptive use of the article see Robertson, Grammar, pp. 762, 764. This iron gate may have opened from a court out into the street and effectually barred escape.

Opened to them ( $\eta v o r \gamma \eta \alpha \cup \tau o r \varsigma)$. Second aorist passive indicative of $\alpha v o r \gamma \omega$, the usual later form though $\eta$ vorx $\theta \eta$ (first aorist passive) occurs also, was opened.

Of its own accord ( $\alpha \cup \tau о \mu \alpha \tau \eta$ ). Old compound adjective ( $\alpha v \tau o \varsigma$, self, obsolete $\mu \alpha \omega$, to desire eagerly, feminine form though masculine avto $\mu \alpha \tau \circ$ also used as feminine). In the N.T. only here and Mr 4:28. It was a strange experience for Peter. The Codex Bezae adds here "went down the seven steps" ( $\kappa \alpha \tau \varepsilon \beta \eta \sigma \alpha \nu \tau 0 \cup \varsigma \varepsilon \pi \tau \alpha \beta \alpha \theta \mu$ оч¢), an interesting detail that adds to the picture.

One street ( $\rho \nu \mu \eta \nu \mu \mu \nu$ ). The angel saw Peter through one of the narrow streets and then left him. We have no means of knowing precisely the location of the prison in the city. On "departed" ( $\alpha \pi \varepsilon \sigma \tau \eta$ ) see on verse 7.

Acts 12:11
Was come to himself ( $\varepsilon v \varepsilon \alpha v \tau \omega \gamma \varepsilon v o \mu \varepsilon v o \varsigma)$. Second aorist middle participle of $\gamma ı v o \mu \alpha$ with $\varepsilon v$ and the locative case, "becoming at himself." In Lu 15:17 we have $\varepsilon ા \varsigma ~ \varepsilon a v \tau o v ~ \varepsilon \lambda \theta \omega v$ (coming to himself, as if he had been on a trip away from himself).

Now I know of a truth ( $v \nu_{\nu}$ oi $\delta \alpha \alpha \lambda \eta \theta \omega \varsigma$ ). There was no further confusion of mind that it was an ecstasy as in 10:10. But he was in peril for the soldiers would soon learn of his escape, when the change of guards came at 6 A.M.

Delivered me ( $\varepsilon \xi \varepsilon \lambda \alpha \tau \circ \mu \varepsilon$ ). Second aorist middle indicative of $\varepsilon \xi \alpha \iota \rho \varepsilon \omega$. The Lord rescued me of himself by his angel.

Expectation ( $\pi \rho о \sigma \delta$ окıа¢). Old word from $\pi \rho о \sigma \delta о \kappa \alpha \omega$, to look for. In the N.T. only here and Lu 21:26. James had been put to death and the Jewish people were eagerly waiting for the execution of Peter like hungry wolves.

Acts 12:12
When he had considered ( $\sigma u v \imath \delta \omega v$ ). Second aorist active participle of $\sigma u v \varepsilon I \delta o v$ (for the defective verb $\sigma v v o \rho \alpha \omega$ ), to see together, to grasp as a whole, old verb, but in the N.T. only here and 14:6, save the perfect indicative $\sigma u v o r \delta a$ ( 1 Co $4: 4$ ) and participle (Ac 5:2 ). It is the word from which $\sigma u v \varepsilon ו \delta \eta \sigma \iota \varsigma ~(c o n s c i e n c e) ~ c o m e s ~(R o ~ 2: 15) . ~ P e t e r ' s ~ m i n d ~ w o r k e d ~$ rapidly and he decided what to do. He took in his situation clearly.

To the house of Mary ( $\varepsilon \pi \tau \eta \nu$ oוкıav $\tau \eta \varsigma$ Mapıa¢). Another Mary (the others were Mary the mother of Jesus, Mary of Bethany, Mary Magdalene, Mary wife of Cleopas, Mary the mother of James and Joses). She may have been a widow and was possessed of some
means since her house was large enough to hold the large group of disciples there. Barnabas, cousin of John Mark her son (Col 4:10) , was also a man of property or had been (Ac 4:36f. ). It is probable that the disciples had been in the habit of meeting in her house, a fact known to Peter and he was evidently fond of John Mark whom he afterwards calls "my son" ( 1 Pe 5:13 ) and whom he had met here. The upper room of Ac 1:13 may have been in Mary's house and Mark may have been the man bearing a pitcher of water ( Lu 22:10) and the young man who fled in the Garden of Gethsemane (Mr 14:51f. ). There was a gate and portress here as in the house of the highpriest (Joh 18:16). Peter knew where to go and even at this early hour hoped to find some of the disciples. Mary is one of the many mothers who have become famous by reason of their sons, though she was undoubtedly a woman of high character herself.

Were gathered together and were praying ( $\eta \sigma \alpha v \sigma v v \eta \theta \rho о ь \sigma \mu \varepsilon v o ~ к \alpha ~ \pi \rho о \sigma \varepsilon v \chi о \mu \varepsilon v o$ ). Note difference in the tenses, one periphrastic past perfect passive ( $\sigma u v \alpha \theta \rho o l \zeta \omega$ old verb, in the N.T. here only and 19:25 and the uncompounded $\theta \rho o \iota \zeta \omega$ in $\mathrm{Lu} 24: 33$ ) and the periphrastic imperfect. The praying apparently had been going on all night and a large number (many, tkavo) of the disciples were there. One recalls the time when they had gathered to pray ( $4: 31$ ) after Peter had told the disciples of the threats of the Sanhedrin (4:23). God had rescued Peter then. Would he let him be put to death now as James had been?

Acts 12:13
When he knocked at the door of the gate (кроибаvтоৎ autov $\tau \eta \nu \quad \theta \rho \alpha \nu \tau о v \pi \nu \lambda \omega v \circ \varsigma)$. Genitive absolute with aorist active participle of $\kappa \rho o v \omega$, common verb to knock or knock at. So from the outside ( $\operatorname{Lu} 13: 25$ ). Пu $\lambda \omega v$ here is the gateway or passageway from the door ( $\theta \cup \rho \alpha$ ) that leads to the house. In verse 14 it is still the passageway without the use of $\theta v \rho a$ (door, so for both door and passageway).

To answer (vтакоиба). To listen under before opening. First aorist active infinitive of vтакои $\omega$, common verb to obey, to hearken.

A maid ( $\pi \alpha \iota \delta \iota \sigma \kappa \eta$ ). Portress as in Joh 18:17. A diminutive of $\pi \alpha \iota \varsigma$, a female slave (so on an ostracon of second century A.D., Deissmann, Light from the Ancient East, p. 200).

Rhoda. A rose. Women can have such beautiful names like Dorcas (Gazelle), Euodia (Sweet Aroma), Syntyche (Good Luck). Mark or Peter could tell Luke her name.

Acts 12:14
When she knew ( $\varepsilon \pi \iota \gamma v o v \sigma \alpha)$. Second aorist (ingressive) active participle of $\varepsilon \pi \iota \gamma \iota \nu \omega \sigma \kappa \omega$, to know fully or in addition $(\varepsilon \pi)$, to recognize. She knew Peter and his voice from his frequent visits there.

For joy ( $\alpha \pi 0$ т $\eta \varsigma \chi \alpha \rho a \varsigma$ ). From her joy (ablative case), life-like picture of the maid who left Peter standing outside with the door to the passageway unopened. Note the aorist tenses for quick action (ouk $\eta v o \iota \xi \varepsilon v$ ), $\varepsilon เ \sigma \delta \rho \alpha \mu \circ v \sigma \alpha$ (from $\varepsilon \iota \sigma \tau \rho \varepsilon \chi \omega$, defective verb, only here in the N.T.), a $\pi \eta \gamma \gamma \varepsilon \iota \lambda \varepsilon v$.

Stood ( $\varepsilon \sigma \tau \alpha v \alpha)$. Second perfect active infinitive of $\iota \tau \tau \eta \mu$, intransitive, in indirect assertion with tov Пєт $\rho \circ v$ (Peter) accusative of general reference. The slave girl acted as if she were a member of the family (Furneaux), but she left Peter in peril.

Acts 12:15
Thou art mad ( $\mu \alpha ı \nu \eta$ ). Present middle indicative second person singular. Old verb, only in the middle voice. Festus used the same word to Paul ( $26: 24$ ). The maid was undoubtedly excited, but it was a curious rebuff from those who had been praying all night for Peter's release. In their defence it may be said that Stephen and James had been put to death and many others by Saul's persecution.

She confidently affirmed ( $\delta u \sigma \chi \cup \rho \iota \zeta \varepsilon \tau о$ ). Imperfect middle of $\delta u \sigma \chi \cup \rho \iota \zeta о \mu \alpha$, an old word of vigorous and confident assertion, originally to lean upon. Only here in the N.T. The girl stuck to her statement.

It is his angel (Ho $\alpha \gamma \gamma \varepsilon \lambda$ oc eбтıv autov). This was the second alternative of the disciples. It was a popular Jewish belief that each man had a guardian angel. Luke takes no position about it. No scripture teaches it.

Acts 12:16
Continued knocking ( $\varepsilon \pi \varepsilon \mu \varepsilon v \varepsilon v \kappa \rho o v \omega v$ ). Imperfect active and present participle. Now all heard the knocking.

When they had opened ( $\alpha v o \xi \xi \alpha v \tau \varepsilon \varsigma)$. First aorist active participle of $\alpha v o \gamma \omega$ or $-v v \mu$. The whole group rushed out to the courtyard this time to make sure.

They were amazed ( $\varepsilon \xi \varepsilon \sigma \tau \eta \sigma \alpha v)$. The frequent second aorist active (intransitive) indicative of $\varepsilon \xi \iota \sigma \tau \eta \mu$.

Acts 12:17
There were probably loud exclamations of astonishment and joy.
Beckoning with the hand ( $\kappa \alpha \tau \alpha \sigma \varepsilon เ \sigma \alpha \varsigma \tau \eta \chi \varepsilon เ \rho)$. First aorist active participle of $\kappa \alpha \tau \alpha \sigma \varepsilon ו \omega$, old verb to signal or shake down with the hand (instrumental case $\chi \varepsilon \rho \rho$ ). In the N.T. only in Ac 12:17; 13:16; 19:33; 21:40. The speaker indicates by a downward movement of the hand his desire for silence (to hold their peace, $\sigma \not \gamma \alpha \iota v$, present active infinitive, to keep silent). Peter was anxious for every precaution and he wanted their instant attention.

Declared ( $\delta ı \eta \gamma \eta \sigma \alpha \tau o$ ). First aorist middle of $\delta ı \eta \gamma \varepsilon o \mu \alpha$, old verb to carry through a narrative, give a full story. See also Ac 9:27 of Barnabas in his defence of Saul. Peter told them the wonderful story.
 (first aorist active imperative). Evidently "James and the brethren" were not at this meeting, probably meeting elsewhere. There was no place where all the thousands of disciples in Jerusalem could meet. This gathering in the house of Mary may have been of women only or a meeting of the Hellenists. It is plain that this James the Lord's brother, is now the leading presbyter or elder in Jerusalem though there were a number (11:30; 21:18). Paul even terms
him apostle (Gal 1:19), though certainly not one of the twelve. The twelve apostles probably were engaged elsewhere in mission work save James now dead (Ac 12:2) and Peter. The leadership of James is here recognized by Peter and is due, partly to the absence of the twelve, but mainly to his own force of character. He will preside over the Jerusalem Conference (Ac 15:13).

To another place ( $\varepsilon \varsigma \varsigma \varepsilon \varepsilon \rho \circ \vee \tau$ топоv). Probably Luke did not know the place and certainly it was prudent for Peter to conceal it from Herod Agrippa. Probably Peter left the city. He is back in Jerusalem at the Conference a few years later (Ac 15:7) and after the death of Herod Agrippa. Whether Peter went to Rome during these years we do not know. He was recognized later as the apostle to the circumcision (Gal 2:7; 1Pe 1:1) and apparently was in Rome with John Mark when he wrote the First Epistle (1Pe 5:13), unless it is the real Babylon. But, even if Peter went to Rome during this early period, there is no evidence that he founded the church there. If he had done so, in the light of 2Co 10:16 it would be strange that Paul had not mentioned it in writing to Rome, for he was anxious not to build on another man's foundation (Ro 15:20). Paul felt sure that he himself had a work to do in Rome. Unfortunately Luke has not followed the ministry of Peter after this period as he does Paul (appearing again only in chapter Ac 15 ). If Peter really left Jerusalem at this time instead of hiding in the city, he probably did some mission work as Paul says that he did (1Co 9:5).

Acts 12:18
As soon as it was day ( $\Gamma \varepsilon v \circ \mu \varepsilon v \eta \varsigma ~ \eta \mu \varepsilon \rho \alpha \varsigma)$. Genitive absolute, day having come.
No small stir ( $\tau \alpha \rho \alpha \chi о \varsigma$ оик о $\lambda \iota \gamma \circ \varsigma)$. Litotes (очк о入ı $\gamma \circ \varsigma$ ), occurs eight times in the Acts as in 15:2, and nowhere else in the N.T. Tapaxos (stir) is an old word from $\tau \alpha \rho \alpha \sigma \sigma \omega$, to agitate. In the N.T only here and 19:23. Probably all sixteen soldiers were agitated over this remarkable escape. They were responsible for the prisoner with their lives (cf. Ac 16:27; 27:42 ). Furneaux suggests that Manaen, the king's foster-brother and a Christian ( 13:1), was the "angel" who rescued Peter from the prison. That is not the way that Peter looked at it.

What was become of Peter ( $\tau \alpha \rho \alpha$ o Пعт $\rho \circ \varsigma \varepsilon \gamma \varepsilon v \varepsilon \tau о$ ). An indirect question with the aorist indicative retained. Apa adds a syllogism (therefore) to the problem as in Lu 1:66 . The use of the neuter $\tau(\operatorname{as}$ in Ac 13:25) is different from $\tau \iota$, though nominative like $\Pi \varepsilon \tau \rho \circ \varsigma$, literally, "what then Peter had become," "what had happened to Peter" (in one idiom). See the same idiom in Joh 21:21 (ovtos $\delta \varepsilon \tau$ ).

But this one what (verb $\gamma \varepsilon v \eta \sigma \varepsilon \tau \alpha$ not used).
Acts 12:19
He examined (avaкрıvac). First aorist active participle of $\alpha v \alpha \kappa \rho \iota v \omega$, old verb to sift up and down, to question thoroughly, in a forensic sense (Lu 23:14; Ac 4:9; 12:19; $28: 18$ ).

That they should be put to death ( $\alpha \pi \alpha \chi \theta \eta v \alpha$ ). First aorist passive infinitive (indirect command) of $\alpha \pi \alpha \gamma \omega$, old verb to lead away, especially to execution as in Mt 27:31. Here it
is used absolutely. This was the ordinary Roman routine and not a proof of special cruelty on the part of Herod Agrippa.

Tarried ( $\delta เ \varepsilon \tau \rho \_\beta \varepsilon v$ ). Imperfect active. Herod Agrippa made his home in Jerusalem, but he went to Caesarea to the public games in honour of Emperor Claudius.

Acts 12:20
Was highly displeased ( $\eta v \theta \nu \mu о \mu \alpha \chi \omega v$ ). Periphrastic imperfect active of $\theta \nu \mu о \mu \alpha \chi \varepsilon \omega$, late compound of $\theta v \mu \circ \varsigma$ (passionate heat) and $\mu \alpha \chi \circ \mu \alpha$, to fight. Only here in the N.T., to fight desperately, to have a hot quarrel. Whether it was open war with the Phoenicians or just violent hostility we do not know, save that Phoenicia belonged to Syria and Herod Agrippa had no authority there. The quarrel may have been over commercial matters.

They came with one accord ( $o \mu \circ \theta v \mu \alpha \delta o v \pi \alpha \rho \eta \sigma \alpha v$ ). The representatives of Tyre and Sidon. See on 1:14 for o $\mu \circ \theta v \mu \alpha \delta o v$. Tyre was a colony of Sidon and had become one of the chief commercial cities of the world by reason of the Phoenician ships.

The king's chamberlain ( $\tau \circ \vee \varepsilon \pi$ tov коוт $\omega$ vos $\tau$ тov $\beta \alpha \sigma i \lambda \varepsilon \circ \varsigma$ ). The one over the bedchamber (коוt $\omega v \circ \varsigma$, late word from koıtๆ, bed, here only in the N.T.).

Made their friend ( $\pi \varepsilon \mid \sigma \alpha v \tau \varepsilon \varsigma)$. First aorist active participle of $\pi \varepsilon \otimes \theta \omega$, to persuade. Having persuaded (probably with bribes as in Mt 28:14).

They asked for peace ( $\eta \iota \tau 0 \cup v \tau 0 \varepsilon เ \rho \eta \nu \eta \nu$ ). Imperfect middle of $\alpha \iota \tau \varepsilon \omega$, kept on asking for peace.

Because their country was fed ( $\delta \iota \alpha \tau 0 \tau \rho \varepsilon \varphi \varepsilon \sigma \theta \alpha \alpha v \tau \omega v \tau \eta v \chi \circ \rho \alpha v$ ). Causal sentence with $\delta \iota \alpha$ and the articular infinitive (present passive of $\tau \rho \varepsilon \varphi \omega$, to nourish or feed) and the accusative of general reference, "because of the being fed as to their country." Tyre and Sidon as large commercial cities on the coast received large supplies of grain and fruits from Palestine. Herod had cut off the supplies and that brought the two cities to action.

Acts 12:21
Upon a set day ( $\tau \alpha \kappa \tau \eta \eta \mu \varepsilon \rho \alpha$ ). Locative case and the verbal adjective of $\tau \alpha \sigma \sigma \omega$, to arrange, appoint, old word, here only in the N.T. Josephus (Ant. XVII. 6, 8; XIX. 8, 2) gives a full account of the occasion and the death of Herod Agrippa. It was the second day of the festival in honour of the Emperor Claudius, possibly his birthday rather than the Quinquennalia. The two accounts of Luke and Josephus supplement each other with no contradiction. Josephus does not mention the name of Blastus.

Arrayed himself in royal apparel ( $\varepsilon v \delta \nu \sigma \alpha \mu \varepsilon v o \varsigma ~ \varepsilon \sigma \theta \eta \tau \alpha \beta \alpha \sigma \iota \lambda_{ı \kappa \eta} v$ ). First aorist middle (indirect) participle of $\varepsilon v \delta u v \omega$ or $\varepsilon v \delta \nu \omega$, common verb to put on. Literally, having put royal apparel on himself (a robe of silver tissue, Josephus says). The rays of the sun shone on this brilliant apparel and the vast crowd in the open amphitheatre became excited as Herod began to speak.

Made an oration ( $\varepsilon \delta \eta \mu \eta \gamma \circ \rho \varepsilon$ ). Imperfect active of $\delta \eta \mu \eta \gamma \circ \rho \varepsilon \omega$, old verb from $\delta \eta \mu \eta \gamma \circ \rho \circ \varsigma$ (haranguer of the people), and that from $\delta \eta \mu \circ \varsigma$ (people) and $\alpha \gamma \circ \rho \varepsilon v \omega$, to harangue or address the people. Only here in the N.T. He kept it up.

Acts 12:22
Shouted ( $\varepsilon \pi \varepsilon \varphi \omega \nu \varepsilon$ ). Imperfect active, kept on shouting, calling out to him. Old verb, but only four times in the N.T. and all by Luke. The heathen crowd ( $\delta \eta \mu \circ \varsigma$ ) repeated their flattering adulation to gain Herod's favour.

The voice of a god $(\theta \varepsilon o v \varphi \omega v \eta)$. In the pagan sense of emperor worship, not as the Supreme Being. But it was pleasing to Herod Agrippa's vanity.

Acts 12:23
Smote him ( $\varepsilon \pi \alpha \tau \alpha \xi \varepsilon v \alpha u \tau o v$ ). Effective aorist active indicative of $\pi \alpha \tau \alpha \sigma \sigma \omega$, old verb, used already in verse 7 of gentle smiting of the angel of the Lord, here of a severe stroke of affliction. Like Nebuchadnezzar (Da 4:30) pride went before a fall. He was struck down in the very zenith of his glory.

Because ( $\alpha v \theta^{\prime} \omega v$ ). Av with the genitive of the relative pronoun, "in return for which things." He accepted the impious flattery (Hackett) instead of giving God the glory. He was a nominal Jew.

He was eaten of worms ( $\gamma \varepsilon v \circ \mu \varepsilon v o \varsigma \sigma \kappa \omega \lambda \eta \kappa \circ \beta \rho \omega \tau \sigma \varsigma)$. Ingressive aorist middle participle, "becoming worm-eaten." The compound verbal adjective ( $\sigma \kappa \omega \lambda \eta \xi$, worm, $\beta \rho \omega \tau$ т, , eaten, from $\beta \iota \beta \rho \omega \sigma \kappa \omega$ ) is a late word (II Macc. 9:9) of the death of Antiochus Epiphanes, used also of a tree (Theophrastus), here only in the N.T. The word $\sigma \kappa \omega \lambda \eta \xi$ was used of intestinal worms and Herodotus (IV. 205) describes Pheretima, Queen of Cyrene, as having swarms of worms which ate her flesh while still alive. Josephus (Ant. XIX. 8, 2) says that Herod Agrippa lingered for five days and says that the rotting of his flesh produced worms, an item in harmony with the narrative in Luke. Josephus gives further details, one a superstitious sight of an owl sitting on one of the ropes of the awning of the theatre while the people flattered him, an omen of his death to him. Luke puts it simply that God smote him.

Gave up the ghost ( $\varepsilon \xi \varepsilon \psi v \xi \varepsilon v)$. Effective aorist active of $\varepsilon \kappa \psi v \chi \omega$, to breathe out, late verb, medical term in Hippocrates, in the N.T. only in Ac 5:5,10; 12:23. Herod was carried out of the theatre a dying man and lingered only five days.

Acts 12:24
Grew and multiplied ( $\eta \cup \xi \alpha v \varepsilon \nu \kappa \alpha \varepsilon \pi \lambda \eta \theta \nu v \varepsilon \tau 0)$. Imperfect active and passive. Cf. 6:1. The reaction from the death of James and the imprisonment of Peter.

Acts 12:25
From Jerusalem ( $\varepsilon \xi$ I $\varepsilon \rho o v \sigma \alpha \lambda \eta \mu)$. Probably correct text, though D has $\alpha \pi \sigma$. Westcott and Hort follow Aleph B in reading $\varepsilon \iota \varsigma$ (to) Jerusalem, an impossible reading contradicted by 11:29f.; 13:1. The ministration ( $\delta$ takoviav) referred to is that in 11:29f. which may have taken place, in point of time, after the death of Herod.

Taking with them ( $\sigma v v \pi \alpha \rho \alpha \lambda \alpha \beta o v \tau \varepsilon \varsigma)$. Taking along ( $\pi \alpha \rho \alpha$ ) with ( $\sigma v v$ ) them, John Mark from Jerusalem ( $12: 12$ ) to Antioch ( $13: 1$ ). The aorist participle does not express subsequent action as Rackham here argues (Robertson, Grammar, pp. 861-863).

## Acts 13

Acts 13:1
In the church that was there ( $\kappa \alpha \tau \alpha \tau \eta \nu$ ov $\sigma \alpha \nu \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha \nu$ ). Possibly distributed throughout the church (note "in the church" 11:26). Now a strong organization there. Luke here begins the second part of Acts with Antioch as the centre of operations, no longer Jerusalem. Paul is now the central figure instead of Peter. Jerusalem had hesitated too long to carry out the command of Jesus to take the gospel to the whole world. That glory will now belong to Antioch.

Prophets and teachers ( $\pi \rho о \varphi \eta \tau \alpha \kappa \alpha \delta \iota \alpha \sigma \kappa \alpha \lambda о$ ). All prophets were teachers, but not all teachers were prophets who were for-speakers of God, sometimes fore-speakers like Agabus in 11:28. The double use of $\tau \varepsilon$ here makes three prophets (Barnabas, Symeon, Lucius) and two teachers (Manaen and Saul). Barnabas heads the list ( $11: 22$ ) and Saul comes last. Symeon Niger may be the Simon of Cyrene who carried the Saviour's cross. Lucius of Cyrene was probably one of the original evangelists (11:20). The name is one of the forms of Luke, but it is certainly not Luke the Physician. Manaen shows how the gospel was reaching some of the higher classes (home of Herod Antipas).

Foster-brother ( $\sigma \cup \vee \tau \rho о \varphi о \varsigma)$. Old word for nourished with or brought up with one collactaneus (Vulgate). These are clearly the outstanding men in the great Greek church in Antioch.

Acts 13:2
As they ministered to the Lord ( $\lambda \varepsilon \iota \tau \circ \cup \rho \gamma \circ v \nu \tau \omega \nu \alpha v \tau \omega \nu \tau o \kappa \nu \rho \iota \omega$ ). Genitive absolute of $\lambda \varepsilon \iota \tau o v \rho \gamma \varepsilon \omega$, old verb, used of the Attic orators who served the state at their own cost $\lambda \varepsilon \omega \varsigma$ or $\lambda \alpha o \varsigma$, people, and $\varepsilon \rho \gamma \circ v$, work or service). Common in the LXX of the priests who served in the tabernacle (Ex 28:31,39) like $\lambda \varepsilon \iota \tau o v \rho \gamma \iota a$ (Lu 1:23) which see. So in Heb 10:11. In Ro 15:27 of aiding others in poverty. Here of worship (prayer, exhortation, fasting). The word liturgy grows out of this use.

And fasted ( $\kappa \alpha \nu \eta \sigma \tau \varepsilon v o v \tau \omega v$ ). Genitive absolute also. Christian Jews were keeping up the Jewish fast (Lu 18:12). Note fasting also in the choice of elders for the Mission Churches (Ac 14:23 ). Fasting was not obligatory on the Christians, but they were facing a great emergency in giving the gospel to the Gentile world.

Separate me ( $\alpha \varphi$ о mark off boundaries or horizon, used by Paul of his call (Ro 1:1; Ga 1:15 ). The Greek has $\delta \eta$, a shortened form of $\eta \delta \eta$ and like Latin $j a m$ and German doch, now therefore. It ought to be preserved in the translation. Cf. Lu 2:15; Ac 15:36; 1Co 6:20. Mo is the ethical dative. As in verse 1 Barnabas is named before Saul. Both had been called to ministry long ago, but now this call is to the special campaign among the Gentiles. Both had been active and useful in such work.

Whereunto (o). Here $\varepsilon \iota \varsigma$ has to be repeated from $\varepsilon \iota \varsigma \tau o \varepsilon \rho \gamma o v$ just before, "for which" as Jesus sent the twelve and the seventy in pairs, so here. Paul nearly always had one or more companions.

Acts 13:3
When they had fasted ( $\nu \eta \sigma \tau \varepsilon v \sigma \alpha v \tau \varepsilon \varsigma)$. Either finishing the same fast in verse 2 or another one (Hackett), but clearly a voluntary fast.

Laid their hands upon them ( $\varepsilon \pi \iota \theta \varepsilon v \tau \varepsilon \varsigma \tau \alpha \varsigma \chi \varepsilon \iota \rho a \varsigma \alpha v \tau o \iota \varsigma)$. Second aorist active participle of $\varepsilon \pi \iota \tau \iota \theta \eta \mu$. Not ordination to the ministry, but a solemn consecration to the great missionary task to which the Holy Spirit had called them. Whether the whole church took part in this ceremony is not clear, though in 15:40 "the brethren" did commend Paul and Silas. Perhaps some of them here acted for the whole church, all of whom approved the enterprise. But Paul makes it plain in Php 4:15 that the church in Antioch did not make financial contribution to the campaign, but only goodwill. But that was more than the church at Jerusalem would have done as a whole since Peter had been arraigned there for his activities in Caesarea (Ac 11:1-18). Clearly Barnabas and Saul had to finance the tour themselves. It was Philippi that first gave money to Paul's campaigns. There were still heathen enough in Antioch, but the church approved the going of Barnabas and Saul, their very best.

Acts 13:4
So they ( $\alpha v \tau o \mu \varepsilon v o v v$ ). They themselves indeed therefore. No contrast is necessary, though there is a slight one in verses 5,6. Luke again refers to the Holy Spirit as the source of their authority for this campaign rather than the church at Antioch.

Sent forth ( $\varepsilon \kappa \pi \varepsilon \mu \varphi \theta \varepsilon v \tau \varepsilon \varsigma)$. Old verb from $\varepsilon \kappa \pi \varepsilon \mu \pi \omega$ and first aorist passive participle, but in the N.T. only here and Ac 17:10.

Sailed ( $\alpha \pi \varepsilon \pi \lambda \varepsilon v \sigma \alpha v)$. Effective aorist active indicative of $\alpha \pi 0 \pi \lambda \varepsilon \omega$, old verb to sail away, depart from. In the N.T. only here and $14: 26 ; 20: 15 ; 27: 1$. Barnabas was from Cyprus where there were many Jews.

Acts 13:5
Proclaimed ( $\kappa \alpha \tau \eta \gamma \gamma \varepsilon \lambda \lambda o v$ ). Imperfect active of $\kappa \alpha \tau \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$, inchoative, began to proclaim. This was Paul's rule of procedure, "to the Jew first" (Ro 1:16; Ac 13:46; 17:2; 18:4,19; 19:8).

They had also ( $\varepsilon \iota \chi \circ v \delta \varepsilon \kappa \alpha$ ). Imperfect active, descriptive.
 Probably here minister ( $\chi \alpha \zeta \zeta \alpha \nu$ ) or assistant in the synagogue as in Lu 4:20. Cf. Mt 5:25 . It is not clear what John Mark did, though he was evidently selected by Barnabas as his cousin. He may have helped in the baptizing. There were probably others also in the company (verse 13). The "also" may mean that Mark did some preaching. Barnabas was probably the leader in the work in these Jewish synagogues.

Acts 13:6

Unto Paphos ( $\alpha \chi \rho$ Пачоv). The new Paphos at the other end of the island, reached by a fine Roman road, some eight miles north of the old Paphos famous for the worship of Venus.

A certain sorcerer, a false prophet, a Jew ( $\alpha v \delta \rho \alpha \tau \iota \alpha \mu \alpha \gamma \circ v \psi \varepsilon v \delta о \pi \rho о \varphi \eta \tau \eta v$ Iov $\alpha \alpha \iota v$ ). Literally, "a certain man" ( $\alpha \nu \delta \rho \alpha \tau \iota \nu \alpha$ ) with various descriptive epithets. The word $\mu \alpha \gamma o v$ does not necessarily mean "sorcerer," but only a $\mu \alpha \boldsymbol{\gamma}^{\prime}$ (Mt $2: 1,7,10$ which see). The bad sense occurs in Ac 8:9,11 (Simon Magus) and is made plain here by "false prophet." In verse 8 here Barjesus (Son of Jesus) is called "Elymas the sorcerer (or Magian)," probably his professional title, as Luke interprets the Arabic or Aramaic word Elymas. These Jewish mountebanks were numerous and had great influence with the uneducated. In Ac 19:13 the seven sons of Sceva, Jewish exorcists, tried to imitate Paul. If one is surprised that a man like Sergius Paulus should fall under the influence of this fraud, he should recall what Juvenal says of the Emperor Tiberius "sitting on the rock of Capri with his flock of Chaldaeans around him."

Acts 13:7
With the proconsul Sergius Paulus ( $\sigma v v \tau \omega \alpha v \theta v \pi \alpha \tau \omega \sum \varepsilon \rho \gamma \omega \omega$ Пav $\lambda \omega$ ). Luke used to be sharply criticized for applying this term to Sergius Paulus on the ground that Cyprus was a province under the appointment of the emperor with the title of propraetor and not under the control of the senate with the title of proconsul. That was true B.C. 30, but five years later it was changed to proconsul by Augustus and put under the control of the Senate. Two inscriptions have been found with the date A.D. 51 and 52 with the names of proconsuls of Cyprus and one is in the Cesnola Collection, an inscription found at Soli with the name of Paulus as Proconsul, undoubtedly this very man, though no date occurs.

A man of understanding ( $\alpha \nu \delta \rho \sigma v v \varepsilon \tau \omega$ ). All the more amazing that he should be a victim of Barjesus. He had given up idolatry at any rate and was eager to hear Barnabas and Saul.

Acts 13:8
Withstood them ( $\alpha \nu \theta \iota \sigma \tau \alpha \tau o ~ \alpha v \tau o \iota \varsigma)$. Imperfect middle of $\alpha \nu \theta \iota \sigma \tau \eta \mu$, to stand against (face to face). Dative case (avtoıs). He persisted in his opposition and was unwilling to lose his great prize. There may have been a public discussion between Elymas and Saul.

To turn aside $(\delta \iota \alpha \sigma \tau \rho \varepsilon \psi \alpha)$. First aorist active infinitive of $\delta \iota \alpha \sigma \tau \rho \varepsilon \varphi \omega$, old verb to turn or twist in two, to distort, to pervert (cf. Mt 17:17; Lu 23:2 ).

Acts 13:9
But Saul, who is also called Paul ( $\Sigma \alpha \cup \lambda$ оऽ $\delta \varepsilon$, о к $\propto \propto \cup \lambda о \varsigma)$. By this remarkably brief phrase Luke presents this epoch in the life of Saul Paul. The "also" ( $\kappa \alpha$ ) does not mean that the name Paul was given now for the first time, rather than he had always had it. As a Jew and a Roman citizen, he undoubtedly had both names all the time (cf. John Mark, Symeon Niger, Barsabbas Justus). Jerome held that the name of Sergius Paulus was adopted by Saul
because of his conversion at this time, but this is a wholly unlikely explanation, "an element of vulgarity impossible to St. Paul " (Farrar). Augustine thought that the meaning of the Latin paulus (little) would incline Saul to adopt, "but as a proper name the word rather suggested the glories of the Aemilian family, and even to us recalls the name of another Paulus, who was 'lavish of his noble life'" (Page). Among the Jews the name Saul was naturally used up to this point, but from now on Luke employs Paul save when there is a reference to his previous life (Ac 22:7; 26:14). His real career is work among the Gentiles and Paul is the name used by them. There is a striking similarity in sound between the Hebrew Saul and the Roman Paul. Paul was proud of his tribe of Benjamin and so of King Saul (Php 3:5 ).

Filled with the Holy Spirit ( $\pi \lambda \eta \sigma \theta \varepsilon ı \varsigma \pi \nu \varepsilon \nu \mu \alpha \tau о \varsigma \alpha \gamma \vdash v)$. First aorist (ingressive) passive participle of $\pi \mu \mu \pi \lambda \eta \mu$ with the genitive case. A special influx of power to meet this emergency. Here was a cultured heathen, typical of the best in Roman life, who called forth all the powers of Paul plus the special help of the Holy Spirit to expose the wickedness of Elymas Barjesus. If one wonders why the Holy Spirit filled Paul for this emergency rather than Barnabas, when Barnabas was named first in 13:2, he can recall the sovereignty of the Holy Spirit in his choice of agents (1Co 12:4-11) and also the special call of Paul by Christ (Ac 9:15; 26:17f. ).

Fastened his eyes ( $\alpha \tau \varepsilon v$ เбa¢). As already in $\operatorname{Lu} 4: 20 ; 22: 56$; Ac 3:4,12; 6:15; $10: 4$.
Acts 13:10
Of all guile ( $\pi \alpha v \tau \sigma \varsigma \delta o \lambda o v)$. From $\delta \varepsilon \lambda \omega$, to catch with bait, old word, already seen in Mt 26:4; Mr 7:22; 14:1 . Paul denounces Elymas as a trickster.

All villainy ( $\pi \alpha \sigma \eta \varsigma \rho \alpha \iota \delta เ o v \rho \gamma ı \varsigma)$ ). Late compound from $\rho \alpha \iota \delta \iota o v \rho \gamma \circ \varsigma$ ( $\rho \alpha \iota \delta \iota \rho$, easy, facile, $\varepsilon \rho \gamma o v$, deed, one who does a thing adroitly and with ease). So levity in Xenophon and unscrupulousness in Polybius, Plutarch, and the papyri. Only here in the N.T., though the kindred word $\rho a \iota \delta \iota o v \rho \gamma \eta \mu \alpha$ occurs in Ac 18:14. With deadly accuracy Paul pictured this slick rascal.

Thou son of the devil (vi\& $\delta i \alpha \beta o \lambda o v)$. Damning phrase like that used by Jesus of the Pharisees in Joh 8:44, a slanderer like the $\delta$ ı $\alpha$ O $\lambda$ oc. This use of son (vioc) for characteristic occurs in Ac 3:25; 4:36, a common Hebrew idiom, and may be used purposely by Paul in contrast with the name Barjesus (son of Jesus) that Elymas bore ( 13:6).

Enemy of all righteousness $(\varepsilon \chi \theta \rho \varepsilon \pi \alpha \sigma \eta \varsigma \varsigma$ เкаıoбuvŋऽ). Personal enemy to all justice, sums up all the rest. Note triple use of "all" ( $\pi \alpha v \tau о \sigma, \pi \alpha \sigma \eta \sigma, \pi \alpha \sigma \eta \varsigma)$, total depravity in every sense.

Wilt thou not cease? (ov $\pi \alpha v \sigma \eta)$ ). An impatient rhetorical question, almost volitive in force (Robertson, Grammar, p. 874). Note ov, not $\mu \eta$,

To pervert ( $\delta \iota \alpha \sigma \tau \rho \varepsilon \varphi \omega v$ ). Present active participle describing the actual work of Elymas as a perverter or distorter (see verse 8 ). More exactly, Wilt thou not cease perverting?
 the straight ones as opposed to the crooked ways of men (Isa 40:4; 42:16; Lu 3:5). The task of John the Baptist as of all prophets and preachers is to make crooked paths straight and to get men to walk in them. This false prophet was making even the Lord's straight ways crooked. Elymas has many successors.

Acts 13:11
Upon thee ( $\varepsilon \pi \sigma \varepsilon$ ). The use of $\varepsilon \pi$ with the accusative is rich and varied, the precise shade of meaning depending on the content. The "hand of the Lord" might be kindly (Ac 11:21) or hostile (Heb 10:31), but when God's hand touches one's life (Job 19:21) it may be in judgment as here with Elymas. He has not humbled himself under the mighty hand of God (1Pe 5:6).

Not seeing ( $\mu \eta \beta \lambda \varepsilon \pi \omega v)$. Repeating with negative participle the negative idea in "blind" ( $\tau \cup \varphi \lambda$ ос). "It was a judicial infliction; blindness for blindness, darkness without for wilful darkness within" (Furneaux). He was an example of the blind leading the blind that was to cease and Sergius Paulus was to be led into the light. The blindness was to be "for a season" ( $\alpha \times \rho$ кaıpov, $\mathrm{Lu} 4: 13$ ), if it should please God to restore his sight. Paul apparently recalls his own blindness as he entered Damascus.

A mist ( $\alpha \chi \lambda \nu \varsigma$ ). Especially a dimness of the eyes, old poetic word and late prose, in LXX, only here in N.T. Galen uses it of the opacity of the eye caused by a wound.

He went about seeking some one to lead him by the hand ( $\pi \varepsilon \rho ı \alpha \gamma \omega \nu \varepsilon \zeta \eta \tau \varepsilon$ $\chi \varepsilon \iota \rho \alpha \omega \gamma \circ \cup \varsigma)$. A rather free rendering. Literally, "going about ( $\pi \varepsilon \rho \iota \alpha \gamma \omega v$, present active participle of $\pi \varepsilon \rho เ \alpha \gamma \omega)$ he was seeking ( $\varepsilon \zeta \eta \tau \varepsilon$, imperfect active of $\zeta \eta \tau \varepsilon \omega$ ) guides ( $\chi \varepsilon \rho \alpha \gamma \omega \gamma 0 \nu \varsigma$, from $\chi \varepsilon \rho \rho$, hand, and $\alpha \gamma \omega \gamma \circ \varsigma$, guide, from $\alpha \gamma \omega$, one who leads by the hand)." The very verb $\chi \varepsilon \downharpoonright a \gamma \omega \gamma \varepsilon \omega$, to lead by the hand, Luke uses of Paul in 9:8, as he entered Damascus.

Acts 13:12
Believed ( $\varepsilon \pi \iota \sigma \tau \varepsilon \cup \sigma \varepsilon v$ ). Ingressive aorist active indicative. Renan considers it impossible that a Roman proconsul could be converted by a miracle. But it was the teaching about the Lord ( $\tau 0 \cup$ кирıov, objective genitive) by which he was astonished ( $\varepsilon \kappa \pi \lambda \eta \sigma \sigma \circ \mu \varepsilon v o \varsigma$, present passive participle of $\varepsilon \kappa \pi \lambda \eta \sigma \sigma \omega$, see on Mt 7:28) or struck out as well as by the miracle. The blindness came "immediately" ( $\pi \alpha \rho \alpha \varepsilon \rho \eta \mu \alpha)$ upon the judgment pronounced by Paul. It is possible that Sergius Paulus was converted to Christ without openly identifying himself with the Christians as his baptism is not mentioned as in the case of Cornelius. But, even if he was baptized, he need not have been deposed from his proconsulship as Furneaux and Rackham argue because his office called for "official patronage of idolatrous worship." But that could have been merely perfunctory as it probably was already. He had been a disciple of the Jewish magician, Elymas Barjesus, without losing his position. Imperial persecution against Christianity had not yet begun. Furneaux even suggests that the conversion of a proconsul to Christianity at this stage would have called for mention by the Roman and

Greek historians. There is the name Sergia Paullina in a Christian cemetery in Rome which shows that one of his family was a Christian later. One will believe what he wills about Sergius Paulus, but I do not see that Luke leaves him in the category of Simon Magus who "believed" ( 8:13) for revenue only.

Acts 13:13
Paul and his company (o $\pi \varepsilon \rho$ Пav入ov). Neat Greek idiom as in Plato, Cratylus 440 C о $\pi \varepsilon \rho$ Н $\rho \propto \alpha \kappa \lambda \varepsilon \iota \tau o v$. On this idiom see Gildersleeve, Syntax, p. 264. It means a man and his followers, "those around Paul." Now Paul ranks first always in Acts save in 14:2; 15:12,25 for special reasons. Heretofore Saul (Paul) held a secondary position (9:27; 11:30; 13:1f. ). "In nothing is the greatness of Barnabas more manifest than in his recognition of the superiority of Paul and acceptance of a secondary position for himself' (Furneaux).

Set sail ( $\alpha v \alpha \chi \theta \varepsilon v \tau \varepsilon \varsigma)$. First aorist passive participle of $\alpha v \alpha \gamma \omega$. Thirteen times in the Acts and Lu 8:22 which see. They sailed up to sea and came down ( $\kappa \alpha \tau \alpha \gamma \omega$, $\kappa \alpha \tau \alpha \beta a ı v \omega$ ) to land. So it looks.

Departed from them ( $\alpha \pi \sigma \chi \omega \rho \eta \sigma \alpha \varsigma \alpha \pi^{\prime} \alpha v \tau \omega v$ ). First aorist active participle of $\alpha \pi 0 \chi \omega \rho \varepsilon \omega$, old verb to withdraw, go away from. In the N.T. only here and Mt 7:23; Lu 9:39 . He is called John there as in verse 5 and Mark in 15:39, though John Mark in 12:12,25 . This may be accidental or on purpose (Deissmann, Bible Studies, p. 317). Luke is silent on John's reasons for leaving Paul and Barnabas. He was the cousin of Barnabas and may not have relished the change in leadership. There may have been change in plans also now that Paul is in command. Barnabas had chosen Cyprus and Paul has led them to Perga in Pamphylia and means to go on into the highlands to Antioch in Pisidia. There were perils of many sorts around them and ahead (2Co 11:26), perils to which John Mark was unwilling to be exposed. Paul will specifically charge him at Antioch with desertion of his post (Ac 15:39 ). It is possible, as Ramsay suggests, that the mosquitoes at Perga gave John malaria. If so, they bit Paul and Barnabas also. He may not have liked Paul's aggressive attitude towards the heathen. At any rate he went home to Jerusalem instead of to Antioch, zu seiner Mutter (Holtzmann). It was a serious breach in the work, but Paul and Barnabas stuck to the work.

## Acts 13:14

Passing through ( $\delta \varepsilon \varepsilon$ ( $\mathrm{oovt} \mathrm{\varepsilon} \mathrm{\varsigma)}$ ). It is not clear why Paul and Barnabas left Perga so soon nor why they went to Antioch in Pisidia. Ramsay suggests malaria that spurred them on to the hills after the desertion of John Mark. They preached at Perga on the return ( 14:25) and apparently hurried away now. Farrar thinks that the hot weather had driven the population to the hills. At any rate it is not difficult to imagine the perils of this climb over the rough mountain way from Perga to Pisidian Antioch to which Paul apparently refers in 2Co 11:26

Sat down ( $\varepsilon \kappa \alpha$ เб $\alpha v$ ). Ingressive aorist active indicative, took their seats as visiting Jews, possibly in the seats of the rabbis (J. Lightfoot). Whether they expected to be called on or
not, they were given the opportunity as prominent visitors. The Pisidian Antioch was really in Phrygia, but towards Pisidia to distinguish it from Antioch on the Maeander (Ramsay, Church in the Roman Empire, p. 25). It was a colony like Philippi and so a free city. If Paul is referring to South Galatia and not North Galatia in Ga $4: 13$ when he says that his preaching in Galatia at first was due to illness, then it was probably here at Pisidian Antioch. What it was we have no means of knowing, though it was a temptation in his flesh to them so severe that they were willing to pluck out their eyes for him (Ga 4:14f. ). Opthalmia, malaria, epilepsy have all been suggested as this stake in the flesh (2Co 12:7). But Paul was able to preach with power whatever his actual physical condition was.

Acts 13:15
After the reading of the law and the prophets ( $\mu \varepsilon \tau \alpha \tau \eta \nu \alpha v \alpha \gamma \nu \omega \sigma \iota \nu \tau o v \nu o \mu \circ v \kappa \alpha \tau \omega \nu$ $\pi \rho о \varphi \eta \tau \omega v)$. The law was first read in the synagogues till B.C. 163 when Antiochus Epiphones prohibited it. Then the reading of the prophets was substituted for it. The Maccabees restored both. There was a reading from the law and one from the prophets in Hebrew which was interpreted into the Aramaic or the Greek Koine for the people. The reading was followed by the sermon as when Jesus was invited to read and to preach in Nazareth (Lu 4:16f. ). For the service in the synagogue see Schuerer, History of the Jewish People, Div. II, Vol. II, pp. 79ff. It was the duty of the rulers of the synagogue ( $\alpha \rho \chi \iota \sigma v \nu \alpha \gamma \omega \gamma 0$ ) to select the readers and the speakers for the service ( $\mathrm{Mr} 5: 22,35-38$; $\mathrm{Lu} 8: 49 ; 13: 14$; Ac 13:15; 18:8,17 ). Any rabbi or distinguished stranger could be called on to speak.

If ye have any word of exhortation for the people ( $\varepsilon \tau \iota \varsigma \varepsilon \sigma \tau \iota v \varepsilon \nu v \mu \nu \lambda о \gamma \circ \varsigma$ $\pi \alpha \rho \alpha \kappa \lambda \eta \sigma \varepsilon \omega \varsigma \pi \rho \circ \varsigma \tau \sigma \nu \lambda \alpha o v)$. Literally, if there is among you any word of exhortation for the people. It is a condition of the first class and assumed to be true, a polite invitation. On "exhortation" ( $\pi \alpha \rho \alpha \kappa \lambda \eta \sigma \iota \varsigma)$ see 9:31. It may be a technical phrase used in the synagogue (Heb 13:22; 1Ti 4:13 ).

Acts 13:16
 4:20) , but the Greek and Roman was to stand (Ac 17:22). It is possible as Lewin (Life of St. Paul, Vol. 1, p. 141) suggests that here Paul stepped upon the platform and then took his seat as he began to speak or he may have followed the Greek and Roman custom. Paul is the leader now and the more gifted speaker (Ac 14:12), so that he responds to the courteous invitation of the rulers.

Beckoning (катабєıбаৎ). First aorist active participle of $\kappa \alpha \tau \alpha \sigma \varepsilon \iota \omega$, old verb to shake down, a dramatic gesture for quiet and order like Peter in 12:17 and Paul on the steps of the tower of Antonia ( 21:40).

And ye that fear God ( $\kappa \alpha$ о $\varphi о \beta о \cup \mu \varepsilon v o \tau о v \theta \varepsilon о v$ ). Evidently large numbers of these Gentiles like Cornelius in Caesarea were present. They offered Paul a great opportunity for reaching the purely pagan Gentiles. This (verses 16-41) is the first full report of a sermon
of Paul's that Luke has preserved for us. He is now a practised preacher of the gospel that he began proclaiming at Damascus, that Jesus of Nazareth is the Messiah of promise and the Saviour of the whole world both Jew and Gentile if they will only believe on him and be saved. It is possible that Paul here based his sermon on the passages of the law and the prophets that had just been read. He uses two words from the LXX, one in verse 19 from De 1:31 عтрочочор $\sigma \varepsilon v$ (as a nursing-father bare he them), the reading of many old MSS. and the one preferred by the American Committee, the other in verse 17 from Isa 1:2 $v \psi \omega \sigma \varepsilon v$ (exalted). At any rate it is clear that Paul spoke in Greek so that all could understand his sermon. He may have written out notes of this sermon afterwards for Luke. The keynotes of Paul's theology as found in his Epistles appear in this sermon. It is interesting to observe the steady growth of Paul's Christology as he faced the great problems of his day. Here we see Paul's gospel for the Jews and the God-fearers (Gentiles friendly to the Jews).

Acts 13:17
Chose ( $\varepsilon \xi \varepsilon \lambda \varepsilon \xi \alpha \tau 0)$. First aorist middle (indirect), selected for himself. Israel was the chosen people.

Exalted ( $v \psi \omega \sigma \varepsilon v$ ). From $v \psi o \omega$, late verb from $v \psi o \varsigma$ so often used of Christ.
When they sojourned ( $\varepsilon v \tau \eta \pi \alpha \rho o \kappa \kappa ı \alpha$ ). In the sojourn. Late word from $\pi \alpha \rho о к \kappa \varsigma$ (sojourner, dweller, Ac 7:6 ) common in LXX. In N.T. only here and 1Pe 1:17.

With a high arm ( $\mu \varepsilon \tau \alpha \beta \rho \alpha \chi เ o v o \varsigma ~ v \psi \eta \lambda o v)$. Vivid picture from the LXX (Ex 6:1,6; De 5:15; Ps 136:12).

Acts 13:18
Suffered he their manners ( $\varepsilon \tau \rho о \pi о \varphi о \rho \eta \sigma \varepsilon v$ ). First aorist active indicative of $\tau \rho о \pi о \varphi о \rho \varepsilon \omega$, late word from тоотоऽ, manner, and $\varphi \varepsilon \rho \omega$, reading of Aleph B D and accepted by Westcott and Hort. But A C Sahidic Bohairic read $\varepsilon \tau \rho о \varphi о \varphi о \rho \eta \sigma \varepsilon v$ from $\tau \rho о \varphi о \varphi о \rho \varepsilon \omega$ ( $\tau \rho \circ \varphi \circ \varsigma$, a nurse, and $\varphi \varepsilon \rho \omega$,) late word (II Macc. 7:27), probably correct word here and De 1:31.

Acts 13:19
When he had destroyed ( $\kappa \alpha \theta \varepsilon \lambda \omega v$ ). Second aorist active participle of $\kappa \alpha \theta \alpha \iota \rho \varepsilon \omega$, to tear down, old verb.

He gave them for an inheritance ( $\kappa \alpha \tau \varepsilon \kappa \lambda \eta \rho o v o \mu \eta \sigma \varepsilon v$ ). First aorist active indicative of the double compound verb кат $\alpha-\kappa \lambda \eta \rho о-v o \mu \varepsilon \omega$, late verb in LXX (Nu 34:18; De 3:28; Jos 14:1) and only here in the N.T., to distribute by lot, to distribute as an inheritance. This is the correct reading and not $\kappa \alpha \tau \varepsilon \kappa \lambda \eta \rho \circ \delta о \tau \eta \sigma \varepsilon v$ from катак $\lambda \rho \circ \delta о \tau \varepsilon \omega$ of the Textus Receptus. These two verbs were confused in the MSS. of the LXX as well as here.

For about four hundred and fifty years ( $\omega \varsigma \varepsilon \tau \varepsilon \sigma \iota \nu \tau \varepsilon \tau \rho \alpha \kappa о \sigma ю ю \varsigma ~ \kappa \alpha ~ \pi \varepsilon \nu \tau \eta \kappa о \nu \tau \alpha$ ). Associative instrumental case with an expression of time as in 8:11; Lu 8:29 (Robertson, Grammar, p. 527). The oldest MSS. (Aleph A B C Vg Sah Boh) place these figures before "after these things" and so in verse 19. This is the true reading and is in agreement with the
notation in 1Ki 6:1. The difficulty found in the Textus Receptus (King James Version) thus disappears with the true text. The four hundred and fifty years runs therefore from the birth of Isaac to the actual conquest of Canaan and does not cover the period of the Judges. See on Ac 7:6.

Acts 13:20
And after these things ( $\kappa \alpha \mu \varepsilon \tau \alpha \tau \alpha \nu \tau \alpha$ ). That is, the time of the Judges then began. Cf. Jud 2:16.

Until Samuel the prophet ( $\varepsilon \omega \varsigma \Sigma \alpha \mu о \cup \eta \lambda \pi \rho о \varphi \eta \tau o v$ ). The terminus ad quem. He was the last of the judges and the first of the prophets who selected the first king (Saul) under God's guidance. Note the absence of the Greek article with $\pi \rho о \varphi \eta \tau 00$.

Acts 13:21
They asked ( $\eta \iota \tau \eta \sigma \alpha v \tau 0$ ). First aorist indirect middle indicative, they asked for themselves. They were tired of a theocracy. Cf. 1Sa 8:5; 10:1. Paul mentions with pride that Benjamin was the tribe of Saul (his name also), but he does not allude to Saul's $\sin$ (Furneaux).

For the space of forty years ( $\varepsilon \tau \eta \tau \varepsilon \sigma \sigma \varepsilon \rho \alpha \kappa \circ \nu \tau \alpha$ ). Accusative of extent of time. Not in the O.T., but in Josephus, Ant. VI. 14, 9.

Acts 13:22
When he had removed him ( $\mu \varepsilon \tau \alpha \sigma \tau \eta \sigma \alpha \varsigma \alpha v \tau o v$ ). First aorist active participle of $\mu \varepsilon \theta \iota \sigma \tau \eta \mu$, old verb to transfer, to transpose (note force of $\mu \varepsilon \tau \alpha$ ). This verb occurs in Lu 16:4 by the unjust steward about his removal from office. Cf. 1Sa 15:16.

To be ( $\varepsilon \iota \varsigma)$. As or for, Greek idiom like the Hebrew $l e$, common in the LXX.
A man after my heart ( $\alpha v \delta \rho \alpha \kappa \alpha \tau \alpha \tau \eta v \kappa \alpha \rho \delta ı \alpha v \mu \circ v$ ). The words quoted by Paul as a direct saying of God are a combination of Ps 89:20, 21; 1Sa 13:14 (the word of the Lord to Samuel about David). Knowling thinks that this free and rather loose quotation of the substance argues for the genuineness of the report of Paul's sermon. Hackett observes that the commendation of David is not absolute, but, as compared with the disobedient Saul, he was a man who did God's will in spite of the gross sin of which he repented (Ps 51 ). Note "wills" ( $\theta \varepsilon \lambda \eta \mu \alpha \tau \alpha)$, plural, of God.

Acts 13:23
Of this man's seed ( $\tau 0 \cup \tau о v ~ a \pi о ~ \tau о v ~ \sigma \pi \varepsilon \rho \mu \alpha \tau о \varsigma) . ~ E m p h a t i c ~ p o s i t i o n ~ o f ~ t o v \tau o u . ~ O f ~ t h i s ~$ one from the (his) seed.

According to promise ( $\kappa \alpha \tau^{\prime} \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda ı \alpha v$ ). This phrase in $\mathrm{Ga} 3: 29 ; 2 \mathrm{Ti} 1: 1$. See the promise in 2Sa 7:2; Ps 132:11; Isa 11:1,10; Jer 23:5f.; Zec 3:8 . In Zec 3:8 the verb $\alpha \gamma \omega$ is used of the sending of the Messiah as here.

A Saviour Jesus ( $\Sigma \omega \tau \eta \rho \alpha$ I $\eta \sigma o v v$ ). Jesus is in apposition with Saviour (accusative case) and comes at the end of the sentence in contrast with "this man" (David) at the beginning. Paul goes no further than David because he suggests to him Jesus, descendant in the flesh
from David. By "Israel" here Paul means the Jewish people, though he will later enlarge this promise to include the spiritual Israel both Gentile and Jew (Ro 9:6f. ).

Acts 13:24
When John had first preached ( $\pi \rho о к \eta \rho \nu \xi \alpha \nu \tau о \varsigma ~ I \omega \alpha v o v)$. Literally, John heralding beforehand, as a herald before the king ( $\operatorname{Lu}$ 3:3). Genitive absolute of first aorist active participle of $\pi \rho о к \eta \rho v \sigma \sigma \omega$, old verb to herald beforehand, here alone in the N.T., though Textus Receptus has it also in Ac 3:20 .

Before his coming ( $\pi \rho \circ \pi \rho \circ \sigma \omega \pi$ ои $\tau \eta \varsigma \varepsilon$ घ $\sigma o \delta o v \alpha u \tau o v$ ). Literally, before the face of his entering in (here act of entrance as 1Th 1:9, not the gate as in Heb 10:19). See Mal 3:1 quoted in Mt 11:10 ( Lu 7:27) for this Hebrew phrase and also Lu 1:76.

The baptism of repentance ( $\beta a \pi \tau \iota \sigma \mu \alpha \mu \varepsilon \tau \alpha v o l a \varsigma)$. Baptism marked by, characterized by (genitive case, case of kind or species) repentance (change of mind and life). The very phrase used of John's preaching in Mr 1:4; Lu 3:3. It is clear therefore that Paul understood John's ministry and message as did Peter (Ac 2:38; 10:37).

Acts 13:25
As John was fulfilling his course ( $\omega \varsigma \varepsilon \pi \lambda \eta \rho o v \mathrm{I} \omega a v \eta \varsigma \tau 0 v \delta \rho o \mu o v$ ). Imperfect active of $\pi \lambda \eta \rho o \omega$, describing his vivid ministry without defining the precise period when John asked the question. Paul uses this word $\delta \rho o \mu o \varsigma$ (course) of his own race (Ac 20:24; 2Ti 4:7 ).
 line),
what not
who , character, not identity. It is indirect discourse (the infinitive $\varepsilon$ sva and the accusative of general reference).

Huponoeo (ขло, voع $\omega$ ) is to think secretly, to suspect, to conjecture.
I am not he (ouk $\varepsilon \mu \varepsilon \gamma \omega$ ). These precise words are not given in the Gospels, but the idea is the same as the disclaimers by the Baptist in Joh 1:19-27 (cf. also Mt 3:11; Mr 1:7; Lu 3:16). Paul had a true grasp of the message of the Baptist. He uses the very form $\lambda v \sigma \alpha$ (first aorist active infinitive of $\lambda \nu \omega$ ) found in $\mathrm{Mr} 1: 7 ; \mathrm{Lu} 3: 16$ and the word for shoes ( $v \pi о \delta \eta \mu \alpha$, singular) in all three. His quotation is remarkably true to the words in the Synoptic Gospels. How did Paul get hold of the words of the Baptist so clearly?

Acts 13:26
To us ( $\eta \mu \nu v$ ). Both Jews and Gentiles, both classes in Paul's audience, dative of advantage.
Is sent forth ( $\varepsilon \xi \alpha \pi \varepsilon \sigma \tau \alpha \lambda \eta)$. Second aorist passive indicative of the double compound verb $\varepsilon \xi \alpha \pi о \sigma \tau \varepsilon \lambda \lambda \omega$, common verb to send out ( $\varepsilon \xi$ ) and forth ( $\alpha \pi 0$ ). It is a climacteric or culminative aorist tense. It has come to us in one day, this glorious promise.

The word of this salvation (o $\lambda о \gamma \circ \varsigma \tau \eta \varsigma \sigma \omega \tau \eta \rho ⿺ a \varsigma \tau \alpha \cup \tau \eta \varsigma$ ). The message of Jesus as Saviour (verse 23), long ago promised and now come to us as Saviour.

Acts 13:27
Because they knew him not ( $\tau 0 v \tau 0 v a \gamma v o \eta \sigma \alpha \nu \tau \varepsilon \varsigma)$. First aorist active participle (causal) of aүvocc, old verb, not to know. Peter gives "ignorance" ( $\alpha \gamma v o t \alpha$ ) as the excuse of the Jews in the death of Christ ( $3: 17$ ) and Paul does the same about his conduct before his conversion (1Ti 1:13). This ignorance mitigated the degree of their guilt, but it did not remove it, for it was willing ignorance and prejudice.

The voices of the prophets which are read ( $\tau \alpha \varsigma \varphi \omega v a \varsigma \tau \omega \nu \pi \rho \circ \varphi \eta \tau \omega \nu \tau \alpha \varsigma$ $\alpha v \alpha \gamma \iota v \omega \sigma \kappa о \mu \varepsilon v a \varsigma)$. Object also of $\alpha \gamma v о \eta \sigma \alpha \nu \tau \varepsilon \varsigma$, though it could be the object of $\varepsilon \pi \lambda \eta \rho \omega \sigma \alpha v$ (fulfilled) if $\kappa \alpha$ is taken as "also". The "voices" were heard as they were read aloud each Sabbath in the synagogue. In their ignorant condemnation they fulfilled the prophecies about the suffering Messiah.

Acts 13:28
Though they found no cause of death ( $\mu \eta \delta \varepsilon \mu ı \alpha v \alpha ı \tau \iota \alpha v \theta a v \alpha \tau o v \varepsilon v \rho o v \tau \varepsilon \varsigma)$. Second aorist active with usual negative of the participle. As a matter of fact the Sanhedrin did charge Jesus with blasphemy, but could not prove it (Mt 26:65; 27:24; Lu 23:22 ). At this time no Gospel had probably been written, but Paul knew that Jesus was innocent. He uses this same idiom about his own innocence (Ac 28:18).

That he should be slain ( $\alpha v \alpha \iota \rho \varepsilon \theta \eta v \alpha \alpha v \tau o v$ ). First aorist passive infinitive, the accusative case, the direct object of $\eta \iota \tau \eta \sigma \alpha \nu \tau 0$ (first aorist middle indicative, asked as a favour to themselves).

Acts 13:29
From the tree ( $\alpha \pi \sigma$ $\tau 0 v \xi_{v \lambda o v) . ~ N o t ~ h e r e ~ s t r i c t l y ~ a ~ t r e e, ~ b u t ~ w o o d ~ a s ~ a l r e a d y ~ i n ~ 5: 30 ; ~}^{\text {; }}$ 10:29 and later in Ga 3:13. Strictly speaking, it was Joseph of Arimathea and Nicodemus who took the body of Jesus down from the cross, though the Jews had asked Pilate to have the bones of Jesus broken that his body should not remain on the cross during the Sabbath (Joh 19:31 ). Paul does not distinguish the details here.

Laid $(\varepsilon \theta \eta \kappa \alpha \nu)$. First (kappa) aorist active indicative third plural of $\tau ו \theta \eta \mu$ in place of $\varepsilon \theta \varepsilon \sigma \alpha v$ the usual second aorist active plural form.

Tomb ( $\mu \nu \eta \mu \varepsilon \iota \sigma)$. Memorial, common in the Gospels.
Acts 13:30
But God raised him from the dead (o $\delta \varepsilon \theta \varepsilon o \varsigma \eta \gamma \varepsilon \iota \rho \varepsilon \nu \varepsilon \kappa \nu \varepsilon \kappa \rho \omega v$ ). This crucial fact Paul puts sharply as he always did.

Acts 13:31
Was seen for many days ( $\omega \varphi \theta \eta \varepsilon \pi \eta \mu \varepsilon \rho \alpha \varsigma \pi \lambda \varepsilon \iota o u \varsigma)$. The common verb (first aorist passive indicative of o $\rho a \omega$, to see) for the appearance of the Risen Christ, the one used by Paul of his own vision of Christ (1Co 15:8), which is not reported by Luke here. For more days (than a few), the language means, forty in all ( $1: 3$ ).

Of them that came up with him ( $\tau o \iota \varsigma \sigma v v a v \alpha \beta \alpha \sigma ı v \alpha \tau \tau \omega$ ). Dative (after $\omega \varphi \theta \eta$ ) articular participle (second aorist active of $\sigma u v \alpha v \alpha \beta \alpha ı v \omega$ ) with associative instrumental case ( $\alpha \cup \tau \omega$ ), the very men who knew him best and who could not be easily deceived about the reality of his resurrection. But this fact rules Paul out on this point, for he had not fellowshipped with Jesus from Galilee to Jerusalem.

Who are now his witnesses (oוтiveৎ vov $\varepsilon เ \sigma \iota v \mu \alpha \rho \tau \cup \rho \varepsilon \varsigma ~ \alpha \cup \tau о \nu)$. The very point that Peter used to clinch his argument with such powerful effect (2:32; $3: 15$ ).

Acts 13:32
We bring you good tidings of the promise ( $\eta \mu \varepsilon ı \varsigma \nu \mu \propto \varsigma v a \gamma \gamma \varepsilon \lambda_{\iota} \zeta_{\circ} \mu \varepsilon \theta \alpha \tau \eta \nu \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda_{\iota} \alpha v$ ). Two accusatives here (person and thing), old Greek did not use accusative of the person with this verb as in 16:10; Lu 3:18. Note "we you" together. Here the heart of Paul's message on this occasion.

Acts 13:33
Hath fulfilled ( $\varepsilon \kappa \pi \varepsilon \pi \lambda \eta \rho \omega \kappa \varepsilon v)$. Hath filled out ( $\varepsilon \kappa$ ).
Unto our children ( $\tau o \iota \varsigma ~ \tau \varepsilon \kappa v o \iota \varsigma ~ \eta \mu \omega v$ ). The MSS. vary greatly here about $\eta \mu \omega v$ (our), some have $\alpha v \tau \omega v$, some $\alpha v \tau \omega v \eta \mu \nu v$. Westcott and Hort consider these readings "a primitive error" for $\eta \mu \nu \nu$ (to us) taken with $\alpha v a \sigma \tau \eta \sigma \alpha \varsigma$ I I $\sigma o u v$ (having for us raised up Jesus). This raising up (from aviб亢ŋ $\mu$, set up) as in 3:22; 7:37 refers not to resurrection (verse 34), but to the sending of Jesus (two raisings up).

In the second psalm ( $\varepsilon v \tau \omega \psi \alpha \lambda \mu \omega \tau \omega \delta \varepsilon u \tau \varepsilon \rho \omega$ ). Ps 2:7.D has $\pi \rho \omega \tau \omega$ because the first psalm was often counted as merely introductory.

Acts 13:34
Now no more to return to corruption ( $\mu \eta \kappa \varepsilon \tau \mu \varepsilon \lambda \lambda o v \tau \alpha \sim \pi о \sigma \tau \rho \varepsilon \varphi \varepsilon เ v \varepsilon \iota \varsigma \delta \iota \alpha \varphi \theta$ opav). No longer about to return as Lazarus did. Jesus did not die again and so is the first fruits of the resurrection (1Co 15:23; Ro 6:9).

He hath spoken ( $\varepsilon \mid \rho \eta \kappa \varepsilon v$ ). Present perfect active indicative, common way of referring to the permanent utterances of God which are on record in the Scriptures.

The holy and sure blessings of David ( $\tau \alpha$ o $\sigma \alpha \Delta \alpha \cup \varepsilon \iota \delta \tau \alpha \pi \iota \sigma \tau \alpha$ ). See 2Sa 7:13 . Literally, "the holy things of David the trustworthy things." He explains "the holy things" at once.

Acts 13:35
Because ( $\delta \iota \tau \tau$ ). Compound conjunction ( $\delta \iota \alpha$, o $\tau)$ like our "because that." The reason for the previous statement about "the holy things."

Thou wilt not give thy holy one to see corruption (ov $\delta \omega \sigma \varepsilon ı \varsigma ~ \tau o v ~ o \sigma \iota o v ~ \sigma o v ~ ı \delta \varepsilon ı v ~$ $\delta \operatorname{co\varphi } \theta \mathrm{o} \alpha \mathrm{av})$. Quotation from Ps 16:10 to show that Jesus did not see corruption in his body, a flat contradiction for those who deny the bodily resurrection of Jesus.

Acts 13:36
His own generation ( $\llcorner\delta \iota \alpha \not \subset v \varepsilon \alpha)$. Either locative case, "in his own generation" or dative object of $v \pi \eta \rho \varepsilon \tau \eta \sigma \alpha \varsigma$ (served).

The counsel of God ( $\tau \eta$ रov $\theta \varepsilon o v \beta o v \lambda \eta$ ). So here, either the dative, the object of $v \pi \eta \rho \varepsilon \tau \eta \sigma a \varsigma$ if $\gamma \varepsilon v \varepsilon \alpha$ is locative, or the instrumental case "by the counsel of God" which again may be construed either with v $\quad \pi \eta \rho \varepsilon \tau \eta \sigma a \varsigma$ (having served) or after $\varepsilon \kappa о \iota \mu \forall \eta$ (fell on sleep). Either of the three ways is grammatical and makes good sense. Ko $\mu \alpha o \mu \alpha$ for death we have already had (Ac 7:60 ). So Jesus (Joh 11:11) and Paul (1Co 15:6,51).

Was laid ( $\pi \rho \circ \sigma \varepsilon \tau \varepsilon \theta \eta$ ). Was added unto (first aorist passive indicative of $\pi \rho o \sigma \tau \iota \theta \eta \mu$ ). See the verb in 2:47; 5:14. This figure for death probably arose from the custom of burying families together (Ge 15:15; Jud 2:10).

Acts 13:38
Through this man ( $\delta$ ia $\tau 0 v \tau 0 v$ ). This very man whom the Jews had crucified and whom God had raised from the dead. Remission of sins ( $\alpha \varphi \varepsilon \sigma \iota \varsigma \alpha \mu \alpha \rho \tau \iota \omega v$ ) is proclaimed ( $\kappa \alpha \tau \alpha \gamma \gamma \varepsilon \lambda \lambda \varepsilon \tau \alpha$ ) to you. This is the keynote of Paul's message as it had been that of Peter at Pentecost (2:38; 5:31; 10:43). Cf. 26:18. This glorious message Paul now presses home in his exhortation.

Acts 13:39
And by him every one that believeth is justified from all things, from which ye could not be justified by the law of Moses ( $\kappa \alpha \alpha \pi о \pi \alpha \nu \tau \omega \nu \omega \nu$ оטк $\eta \delta \nu \nu \eta \forall \eta \tau \varepsilon \varepsilon \nu \nu \circ \mu \omega \mathrm{M} \omega v \sigma \varepsilon \omega \varsigma$ $\delta \iota \kappa \alpha \iota \theta \eta \nu \alpha \varepsilon \nu \tau о \nu \tau \omega \pi \alpha \varsigma$ о $\pi \iota \sigma \tau \varepsilon v \omega v \delta \iota \kappa \alpha \iota \nu \tau \alpha)$. This is a characteristic Greek sentence with the principal clause at the end and Pauline to the core. A literal rendering as to the order would be: "And from all the things from (ato not repeated in the Greek, but understood, the ablative case being repeated) which ye were not able to be justified in this one every one who believes is justified." The climax is at the close and gives us the heart of Paul's teaching about Christ. "We have here the germ of all that is most characteristic in Paul's later teaching. It is the argument of the Epistle to Galatians and Romans in a sentence" (Furneaux). The failure of the Mosaic law to bring the kind of righteousness that God demands is stated. This is made possible in and by ( $\varepsilon v$ ) Christ alone. Paul's favourite words occur here, $\pi \iota \sigma \tau \varepsilon v \omega$, believe, with which $\pi \iota \sigma \tau \iota \varsigma$, faith, is allied, $\delta \iota \kappa \alpha \iota \omega$, to set right with God on the basis of faith. In Ro 6:7 Paul uses $\alpha \pi о$ also after $\delta \iota \kappa \propto \iota \omega$. These are key words ( $\pi \iota \sigma \tau \varepsilon \omega$ and $\delta \iota \kappa \iota \circ \omega$ ) in Paul's theology and call for prolonged and careful study if one is to grasp the Pauline teaching. $\Delta \iota \alpha \iota \omega \omega$ primarily means to make righteous, to declare righteous like $\alpha \xi \iota \omega$, to deem worthy ( $\alpha \xi \iota \varsigma)$. But in the end Paul holds that real righteousness will come (Ro 6-8) to those whom God treats as righteous (Ro 3-5 ) though both Gentile and Jew fall short without Christ (Ro 1-3 ). This is the doctrine of grace that will prove a stumbling block to the Jews with their ceremonial works and foolishness to the Greeks with their abstract philosophical ethics (1Co 1:23-25). It is a new and strange doctrine to the people of Antioch.

Acts 13:40

Beware therefore ( $\beta \lambda \varepsilon \pi \varepsilon \tau \varepsilon \mathrm{ovv}$ ). The warning is pertinent. Perhaps Paul noticed anger on the faces of some of the rabbis.

Lest there come upon you ( $\mu \eta \varepsilon \pi \varepsilon \lambda \theta \eta$ ). Second aorist active subjunctive with the negative final conjunction $\mu \eta$.

In the prophets ( $\varepsilon \nu \tau$ тoı $\pi \rho \circ \varphi \eta \tau \alpha \iota \varsigma)$. The quotation is from the LXX text of Hab 1:5. The plural here refers to the prophetic collection (Lu 24:44; Ac 24:14). "The Jews of Habakkuk's day had refused to believe in the impending invasion by the Chaldeans, and yet it had come" (Furneaux).

Acts 13:41
Ye despisers (o ката甲 $о \boldsymbol{\eta \eta \tau \alpha ) \text { . Not in the Hebrew, but in the LXX. It is pertinent for }}$ Paul's purpose.

Perish ( $\alpha \varphi \alpha v / \sigma \theta \eta \tau \varepsilon$ ). Or vanish away. First aorist passive imperative. Added by the LXX to the Hebrew.

If one declare it unto you ( $\varepsilon \alpha \vee \tau ו \varsigma \varepsilon \kappa \delta ı \eta \gamma \eta \tau \alpha \nu \mu \nu v)$. Condition of third class with present middle subjunctive, if one keep on outlining (double compound, $\varepsilon \kappa-\delta \iota-\eta \gamma \varepsilon \circ \mu \alpha$ ) it unto you. Paul has hurled a thunderbolt at the close.

Acts 13:42
And as they went out ( $\mathrm{E} \xi \circ \rho \tau \omega v \delta \varepsilon \alpha v \tau \omega v$ ). Genitive absolute with present active participle of $\varepsilon \xi \varepsilon \mu$, to go out, old verb, in the N.T. only in Ac 12:42; 17:15; 20:7; 27:43 . As they (Paul and Barnabas) were going out with all the excitement and hubbub created by the sermon.

They besought ( $\pi \alpha \rho \varepsilon \kappa \alpha \lambda o u v$ ). Imperfect active, inchoative, began to beseech. The Textus Receptus inserts wrongly $\tau \alpha \varepsilon \theta v \eta$ (the Gentiles) as if the Jews were opposed to Paul from the first as some doubtless were. But both Jews and Gentiles asked for the repetition of the sermon ( $\lambda \alpha \lambda \eta \theta \eta \nu \alpha$, first aorist passive infinitive object of $\pi \alpha \rho \varepsilon \kappa \alpha \lambda o u v$ with accusative of general reference).

The next Sabbath ( $\varepsilon ı \varsigma ~ \tau о ~ \mu \varepsilon \tau \alpha \xi v ~ \sigma \alpha \beta \beta \alpha \tau o v) . ~ L a t e ~ u s e ~(J o s e p h u s, ~ P l u t a r c h, ~ e t c) ~ o f$. $\mu \varepsilon \tau \alpha \xi v$ ( $\mu \varepsilon \tau \alpha$ and $\xi \nu v=\sigma \nu v$ ) in sense of after or next instead of between (sense of $\mu \varepsilon \tau \alpha$ prevailing). Note use of eıc for "on" or "by."

Acts 13:43
When the synagogue broke up ( $\lambda \nu \theta \varepsilon ı \sigma \eta \varsigma \tau \eta \varsigma \sigma \cup v a \gamma \omega \gamma \eta \varsigma)$. Genitive absolute of first aorist passive participle of $\lambda v \omega$. Apparently Paul and Barnabas had gone out before the synagogue was formally dismissed.

Of the devout proselytes ( $\tau \omega v \sigma \varepsilon \beta \circ \mu \varepsilon v \omega v \pi \rho o \sigma \eta \lambda \nu \tau \omega v$ ). Of the worshipping proselytes described in verses 16,25 as "those who fear God" (cf. 16:14) employed usually of the uncircumcised Gentiles who yet attended the synagogue worship, but the word $\pi \rho \circ \sigma \eta \lambda \nu \tau 0$ ( $\pi \rho \circ \sigma$, $\eta \lambda \nu \tau o \varsigma$ verbal from $\varepsilon \rho \chi \circ \mu \alpha$, a new-comer) means usually those who had become circumcised (proselytes of righteousness). Yet the rabbis used it also of proselytes of the gate who had
not yet become circumcised, probably the idea here. In the N.T. the word occurs only in Mt 23:15; Ac 2:10; 6:5; 13:43. Many (both Jews and proselytes) followed ( $\eta \kappa о \lambda o v \theta \eta \sigma \alpha \nu$, ingressive aorist active indicative of $\alpha \kappa 0 \lambda o v \theta \varepsilon \omega)$ Paul and Barnabas to hear more without waiting till the next Sabbath. So we are to picture Paul and Barnabas speaking ( $\pi \rho \sigma \sigma \lambda \alpha \lambda o u v \tau \varepsilon \varsigma$, late compound, in N.T. only here and 28:20) to eager groups.

Urged ( $\varepsilon \pi \varepsilon \iota \theta \circ v$ ). Imperfect active of $\pi \varepsilon \iota \theta \omega$, either descriptive (were persuading) or conative (were trying to persuade). Paul had great powers of persuasion (18:4; 19:8,26; 26:28; 28:23; 2Co 5:11; Ga 1:10). These Jews "were beginning to understand for the first time the true meaning of their national history" (Furneaux), "the grace of God" to them.

Acts 13:44
The next Sabbath ( $\tau \omega \varepsilon \rho \chi \circ \mu \varepsilon \nu \omega \sigma \alpha \beta \beta \alpha \tau \omega$ ). Locative case, on the coming ( $\varepsilon \rho \chi \circ \mu \varepsilon \nu \omega$, present middle participle of $\varepsilon \rho \chi \circ \mu \alpha)$ Sabbath. So the best MSS., though some have $\varepsilon \chi \circ \mu \varepsilon \nu \omega$ (present middle participle of $\varepsilon \chi \omega$ in sense of near, bordering, following as in Lu 13:33; Ac 29:15).

Almost ( $\sigma \chi \varepsilon \delta o v$ ). Old word, but in N.T. only here, Ac 19:26; Heb 9:22 .
Was gathered together ( $\sigma v \nu \eta \chi \theta \eta$ ). First aorist (effective) passive indicative of $\sigma v v \alpha \gamma \omega$, old and common verb. The "whole city" could hardly all gather in the synagogue. Perhaps Paul spoke in the synagogue and Barnabas to the overflow outside (see verse 46). It was an eager and earnest gathering "to hear (aкоvба, first aorist active infinitive of purpose) the word of God" and a great opportunity for Paul and Barnabas. The Codex Bezae has it "to hear Paul." It was the new preacher (Paul) that drew the big crowd. It was a crowd such as will later hang on the words of John Wesley and George Whitfield when they preach Jesus Christ.

Acts 13:45
The Jews (o Iovסaıo). Certainly not the proselytes of verse 43. Probably many of the Jews that were then favourably disposed to Paul's message had reacted against him under the influence of the rabbis during the week and evidently on this Sabbath very many Gentiles ("almost the whole city," "the multitudes" $\tau 0 \cup \varsigma$ oх $\lambda$ ovৎ) had gathered, to the disgust of the stricter Jews. Nothing is specifically stated here about the rabbis, but they were beyond doubt the instigators of, and the ringleaders in, the opposition as in Thessalonica ( 17:5). No such crowds (oरोous) came to the synagogue when they were the speakers.

With jealousy ( $\zeta \eta \lambda o v$ ). Genitive case of $\zeta \eta \lambda o \varsigma(f r o m ~ \zeta \varepsilon \omega$, to boil) after $\varepsilon \pi \lambda \eta \sigma \theta \eta \sigma \alpha \nu$ (effective first aorist passive indicative of $\pi \mu \mu \pi \lambda \eta \mu$ ). Envy and jealousy arise between people of the same calling (doctors towards doctors, lawyers towards lawyers, preachers towards preachers). So these rabbis boiled with jealousy when they saw the crowds gathered to hear Paul and Barnabas.

Contradicted ( $\alpha v \tau \varepsilon \lambda \varepsilon \gamma \circ v$ ). Imperfect active of $\alpha v \tau \iota \lambda \varepsilon \gamma \omega$, old verb to speak against, to say a word in opposition to ( $\alpha v \tau$, face to face). It was interruption of the service and open
opposition in the public meeting. Paul and Barnabas were guests by courtesy and, of course, could not proceed further, when denied that privilege.

Blasphemed ( $\beta \lambda \alpha \sigma \varphi \eta \mu \circ v \nu \tau \varepsilon \varsigma)$. Blaspheming. So the correct text without the addition
 injurious and harmful things. Doubtless these rabbis indulged in unkind personalities and made it plain that Paul and Barnabas were going beyond the limitations of pure Judaism in their contacts with Gentiles.

Acts 13:46
Spake out boldly ( $\pi \alpha \rho \rho \eta \sigma \iota \alpha \sigma \alpha \mu \varepsilon v o$ ). First aorist middle participle of $\pi \alpha \rho \rho \eta \sigma \iota \alpha \zeta_{\circ} \mu \alpha$, to use freedom in speaking, to assume boldness. Both Paul and Barnabas accepted the challenge of the rabbis. They would leave their synagogue, but not without a word of explanation.

It was necessary to you first ( $\mathrm{H} \nu \mu \nu \eta \nu \alpha v \alpha \gamma \kappa \alpha \circ v \pi \rho \omega \tau о v$ ). They had done their duty and had followed the command of Jesus ( 1:8). They use the very language of Peter in 3:26 (vuiv $\pi \rho \omega \tau \tau v)$ "to you first." This position Paul as the apostle to the Gentiles will always hold, the Jew first in privilege and penalty (Ro 1:16; 2:9,10).

Ye thrust it from you ( $\alpha \pi \omega \theta \varepsilon \sigma \sigma \theta \varepsilon \alpha \tau \tau 0$ ). Present middle (indirect, from yourselves) indicative of $\alpha \pi \omega \theta \varepsilon \omega$, to push from. Vigorous verb seen already in Ac 7:27,39 which see.
 the common verb $\kappa \rho \iota v \omega$, to judge or decide with the reflexive pronoun expressed. Literally, Do not judge yourselves worthy. By their action and their words they had taken a violent and definite stand.

Lo, we turn to the Gentiles (ı $\delta o v \sigma \tau \rho \varepsilon \varphi о \mu \varepsilon \theta \alpha \varepsilon \iota \varsigma \tau \alpha \varepsilon \theta v \eta)$. It is a crisis (ı $\delta o v$, lo): "Lo, we turn ourselves to the Gentiles." Probably also aoristic present, we now turn (Robertson, Grammar, pp. 864-70). $\Sigma \tau \rho \varepsilon \varphi \rho \mu \varepsilon \theta a$ is probably the direct middle (Robertson, Grammar, pp. 806-08) though the aorist passive eбт $\rho \alpha \varphi \eta \nu$ is so used also ( $7: 39$ ). It is a dramatic moment as Paul and Barnabas turn from the Jews to the Gentiles, a prophecy of the future history of Christianity. In Ro 9-11 Paul will discuss at length the rejection of Christ by the Jews and the calling of the Gentiles to be the real (the spiritual) Israel.

Acts 13:47
For so hath the Lord commanded us (ov $\omega \varsigma \varsigma \alpha \rho \varepsilon \nu \tau \varepsilon \tau \alpha \lambda \tau \alpha ~ \eta \mu \nu v$ o кขpıoc). Perfect middle indicative of $\varepsilon v \tau \varepsilon \lambda \lambda \omega$, poetic (Pindar) and late verb to enjoin ( $1: 2$ ). The command of the Lord Paul finds in Isa 49:6 quoted by Simeon also (Lu 2:32). The conviction of Paul's mind was now made clear by the fact of the rejection by the Jews. He could now see more clearly the words of the prophet about the Gentiles: The Messiah is declared by God in Isaiah to be "a light to the Gentiles" ( $\varepsilon \theta v \omega v$, objective genitive), "a light for revelation to the Gentiles" ( $\varphi \omega \varsigma \varepsilon$ घऽ $\alpha \pi о \kappa \alpha \lambda \nu \psi \iota v \varepsilon \theta v \omega v$, Lu 2:32 ). So Paul is carrying out the will of God in
turning to the Gentiles. He will still appeal to the Jews elsewhere as they allow him to do so, but not here.

That thou shouldest be ( $\tau 0 v \varepsilon เ v a \sigma \varepsilon$ ). Genitive articular infinitive of purpose with the accusative of general reference. This is all according to God's fixed purpose ( $\tau \varepsilon \theta \varepsilon \iota \kappa \alpha$, perfect active indicative of $\tau \iota \theta \eta \mu)$.

Unto the uttermost part of the earth ( $\varepsilon \omega \varsigma \varepsilon \sigma \chi \alpha \tau \circ v \tau \eta \varsigma \gamma \eta \varsigma)$. Unto the last portion (genitive neuter, not feminine) of the earth. It is a long time from Paul to now, not to say from Isaiah to now, and not yet has the gospel been carried to half of the people of earth. God's people are slow in carrying out God's plans for salvation.

Acts 13:48
As the Gentiles heard this they were glad (aкоvov $\alpha \alpha \tau \alpha \varepsilon \forall \eta \varepsilon \chi \alpha \iota \rho \nu \nu$ ). Present active participle of $\alpha \kappa о v \omega$ and imperfect active of $\chi \alpha \iota \omega$, linear action descriptive of the joy of the Gentiles.

Glorified the word of God ( $\varepsilon \delta \circ \xi \alpha \zeta o v \tau o v \lambda o \gamma o v \tau o v \theta \varepsilon o v)$. Imperfect active again. The joy of the Gentiles increased the fury of the Jews. "The synagogue became a scene of excitement which must have been something like the original speaking with tongues" (Rackham). The joy of the Gentiles was to see how they could receive the higher blessing of Judaism without circumcision and other repellent features of Jewish ceremonialism. It was the gospel of grace and liberty from legalism that Paul had proclaimed. Whether Ga 4:13 describes this incident or not (the South Galatian theory), it illustrates it when Gentiles received Paul as if he were Christ Jesus himself. It was triumph with the Gentiles, but defeat with the Jews.

As many as were ordained to eternal life (oбo $\eta \sigma \alpha \nu \tau \varepsilon \tau \alpha \gamma \mu \varepsilon \nu o \varepsilon \iota \varsigma \zeta \omega \eta \nu \alpha \iota \omega \nu \iota \nu)$ ). Periphrastic past perfect passive indicative of $\tau \alpha \sigma \sigma \omega$, a military term to place in orderly arrangement. The word "ordain" is not the best translation here. "Appointed," as Hackett shows, is better. The Jews here had voluntarily rejected the word of God. On the other side were those Gentiles who gladly accepted what the Jews had rejected, not all the Gentiles. Why these Gentiles here ranged themselves on God's side as opposed to the Jews Luke does not tell us. This verse does not solve the vexed problem of divine sovereignty and human free agency. There is no evidence that Luke had in mind an absolutum decretum of personal salvation. Paul had shown that God's plan extended to and included Gentiles. Certainly the Spirit of God does move upon the human heart to which some respond, as here, while others push him away.

Believed ( $\varepsilon \pi \iota \sigma \tau \varepsilon v \sigma \alpha v$ ). Summary or constative first aorist active indicative of $\pi \iota \sigma \tau \varepsilon v \omega$. The subject of this verb is the relative clause. By no manner of legerdemain can it be made to mean "those who believe were appointed." It was saving faith that was exercised only by those who were appointed unto eternal life, who were ranged on the side of eternal life, who
were thus revealed as the subjects of God's grace by the stand that they took on this day for the Lord. It was a great day for the kingdom of God.

Acts 13:49
Was spread abroad ( $\delta เ \varepsilon \varphi \varepsilon \rho \varepsilon \tau 0$ ). Imperfect passive of $\delta ı \alpha \varphi \varepsilon \rho \omega$, to carry in different directions $(\delta \Delta \alpha)$. By the recent converts as well as by Paul and Barnabas. This would seem to indicate a stay of some months with active work among the Gentiles that bore rich fruit.

Throughout all the region ( $\delta \delta^{\prime}$ o $\lambda \eta \varsigma \tau \eta \varsigma ~ \chi \omega \rho a \varsigma$ ). Antioch in Pisidia as a Roman colony would be the natural centre of a Roman Regio, an important element in Roman imperial administration. There were probably other Regiones in South Galatia (Ramsay, St. Paul the Traveller and Roman Citizen, pp. 102-12).

Acts 13:50
Urged on ( $\pi \alpha \rho \omega \tau \rho v v a v$ ). First aorist (effective) active of $\pi \alpha \rho-o \tau \rho v v \omega$, old verb, but here alone in the N.T., to incite, to stir up. The Jews were apparently not numerous in this city as they had only one synagogue, but they had influence with people of prominence, like
 female proselytes of high station, a late use of an old word used about Joseph of Arimathea (Mr 15:43). The rabbis went after these Gentile women who had embraced Judaism (cf. Ac 17:4 in Thessalonica) as Paul had made an appeal to them. The prominence of women in public life here at Antioch is quite in accord with what we know of conditions in the cities of Asia Minor. "Thus women were appointed under the empire as magistrates, as presidents of the games, and even the Jews elected a woman as Archisynagogos, at least in one instance at Smyrna" (Knowling). In Damascus Josephus (War II. 20, 21) says that a majority of the married women were proselytes. Strabo (VIII. 2) and Juvenal (VI. 542) speak of the addiction of women to the Jewish religion.

The chief men of the city ( $\tau 0 \cup \varsigma \pi \rho \omega \tau 0 \cup \varsigma \tau \eta \varsigma \pi 0 \lambda \varepsilon \omega \varsigma)$. Probably city officials (the Duumviri, the Praetors, the First Ten in the Greek Cities of the east) or other "foremost" men, not officials. The rabbis were shrewd enough to reach these men (not proselytes) through the women who were proselytes of distinction.

Stirred up a persecution ( $\varepsilon \pi \eta \gamma \varepsilon \rho \alpha \nu \delta i \omega \gamma \mu \circ v$ ). First aorist active indicative of $\varepsilon \pi \varepsilon \gamma \varepsilon \mid \rho \omega$, old verb, but in the N.T. only here and 14:2. Paul seems to allude to this persecution in 2 Ti 3:11 "persecutions, sufferings, what things befell me at Antioch, at Iconium, at Lystra, what persecutions I endured." Here Paul had perils from his own countrymen and perils from the Gentiles after the perils of rivers and perils of robbers on the way from Perga (2Co 11:26 ). He was thrice beaten with rods ( $\tau \rho ı \varsigma \varepsilon \rho \alpha \beta \delta \iota \sigma \theta \eta \nu, 2 \mathrm{Co} 11: 25$ ) by Roman lictors in some Roman colony. If that was here, then Paul and Barnabas were publicly scourged by the lictors before they left. Probably the Jews succeeded in making the Roman officials look on Paul and Barnabas as disturbers of the public peace. So "they cast them out of their borders" ( $\varepsilon \xi \varepsilon \beta \alpha \lambda$ ov avtovc $\alpha \pi о \tau \omega v$ opı $\omega v \alpha \nu \tau \omega v$ ). Second aorist active indicative of $\varepsilon \kappa \beta \alpha \lambda \lambda \omega$, forcible
expulsion plainly as public nuisances. Just a few days before they were the heroes of the city and now!

Acts 13:51
But they shook off the dust of their feet against them (Но $\delta \varepsilon \varepsilon \kappa \tau \iota v a \xi \alpha \mu \varepsilon v o$ тov кovıo $\tau о \nu \tau \omega v \pi \circ \delta \omega v \varepsilon \pi^{\prime}$ avtovৎ). First aorist middle (indirect) participle of $\varepsilon \kappa \tau \iota v a \sigma \sigma \omega$, to shake out or off. Homer uses it for knocking out teeth. In the papyri. The middle aorist participle occurs again in 18:6 and the active imperative with the dust of the feet in Mr 6:11 (Lu 10:11 has $\alpha \pi о \mu \alpha \sigma \sigma о \mu \varepsilon \theta \alpha)$ ) and Mt 10:14 (command of Jesus). It is a dramatic gesture that forbids further intercourse. "As a protest against the injustice which cast them out. The sandal was taken off and the dust shaken out as a symbolic token that the very soil of the country was defiling" (Furneaux).

Unto Iconium (عıৎ Ikovıov). About 45 miles southeast from Antioch in Pisidia, at the foot of the Taurus mountains. At various times it was reckoned also in Pisidia or Phrygia as well as Lycaonia, Phrygian in population and distinguished by Luke (Ac 14:6) from Lystra and Derbe, cities of Lycaonia. As compared with Antioch (a Roman colony) it was a native Phrygian town. When the province of Galatia was divided, Iconium became the capital of Lycaonia and eclipsed Antioch in Pisidia. Strictly speaking at this time Lystra and Derbe were cities of Lycaonia-Galatica while Iconium was in Phrygia-Galatica (all three in the Roman Province of Galatia). It was at the meeting place of several Roman roads and on the highway from east to west. It is still a large town Konieh with 30,000 population.

Acts 13:52
And the disciples (o $\tau \varepsilon$ or o $\delta \varepsilon \mu \alpha \theta A \hat{A} \eta \tau \alpha$ ). The Gentile Christians in Antioch in Pisidia. Persecution had precisely the opposite effect to the intention of the Jews for they "were filled with joy and the Holy Spirit" ( $\varepsilon \pi \lambda \eta \rho o u v \tau о \quad \chi \alpha \rho a \varsigma ~ \kappa \alpha ~ \pi \nu \varepsilon v \mu a \tau o \varsigma ~ \alpha \gamma ı v) . ~ I m p e r f e c t ~ p a s s i v e, ~$ they kept on being filled. It had been so before (Ac 4:31; 8:4; 9:31; 12:24). The blood of the martyrs is still the seed of the church.

## Acts 14

Acts 14:1
They entered together ( $\kappa \alpha \tau \alpha$ тo $\alpha v \tau о ~ \varepsilon ı \sigma \varepsilon \lambda \theta \varepsilon \iota v$ ). Like $\varepsilon \pi \tau 0 \alpha v \tau o$ in 3:1. The infinitive $\varepsilon เ \sigma \varepsilon \lambda \theta \varepsilon เ v$ is the subject of $\varepsilon \gamma \varepsilon v \varepsilon \tau \tau$.

So spake that $(\lambda \alpha \lambda \eta \sigma \alpha$ ov $\omega \varsigma \varsigma \omega \sigma \varepsilon)$. Infinitive again parallel to $\varepsilon \sigma \sigma \varepsilon \lambda \theta \varepsilon เ v$. With the result that, actual result here stated with $\omega \sigma \tau \varepsilon$ and the aorist infinitive $\pi \iota \sigma \tau \varepsilon v \sigma \alpha$ (Robertson, Grammar, pp. 999f.) rather than $\omega \sigma \tau \varepsilon$ and the indicative like Joh 3:16. It was a tremendous first meeting.

Acts 14:2
That were disobedient ( $0 \alpha \pi \varepsilon \ell \eta \sigma \alpha \nu \tau \varepsilon \varsigma)$. First aorist active articular participle, not the present $\alpha \pi \varepsilon \bullet \theta$ ouvtec as the Textus Receptus has it. But the meaning is probably the Jews that disbelieved, rather than that disobeyed. Strictly $a \pi \varepsilon เ \theta \varepsilon \omega$ does mean to disobey and $\alpha \pi \iota \sigma \tau \varepsilon \omega$ to disbelieve, but that distinction is not observed in Joh 3:36 nor in Ac 19:9; 28:24 . The word $\alpha \pi \varepsilon \iota \theta \varepsilon \omega$ means to be $\alpha \pi \varepsilon \iota \theta \eta \varsigma$, to be unwilling to be persuaded or to withhold belief and then also to withhold obedience. The two meanings run into one another. To disbelieve the word of God is to disobey God.

Made them evil affected ( $\varepsilon \kappa \alpha \kappa \omega \sigma \alpha \nu$ ). First aorist active indicative of $\kappa \alpha \kappa \sigma \omega$, old verb from какоц, to do evil to, to ill-treat, then in later Greek as here to embitter, to exasperate as in Ps 105:32 and in Josephus. In this sense only here in the N.T. Evidently Paul preached the same message as in Antioch for it won both Jews and Gentiles, and displeased the rabbis. Codex Bezae adds here that "the chiefs of the synagogue and the rulers" brought persecution upon Paul and Barnabas just as was argued about Antioch. Outside the synagogue the Jews would poison the minds of the Gentiles against Paul and Barnabas. "The story of Thecla suggests a means, and perhaps the apostles were brought before the magistrates on some charge of interference with family life. The magistrates however must have seen at once that there was no legal case against them; and by a sentence of acquittal or in some other way the Lord gave peace" (Rackham). As we have it, the story of Paul and Thecla undoubtedly has apocryphal features, though Thecla may very well be an historical character here at Iconium where the story is located. Certainly the picture of Paul herein drawn cannot be considered authentic though a true tradition may underlie it: "bald, bowlegged, strongly built, small in stature, with large eyes and meeting eyebrows and longish nose; full of grace; sometimes looking like a man, sometimes having the face of an angel."

Acts 14:3
Long time therefore ( $\kappa \alpha \sim \nu \nu \nu \mu \varepsilon v$ ovv $\chi \rho \circ v o v$ ). Accusative of duration of time (possibly six months) and note $\mu \varepsilon \nu$ ouv. There is an antithesis in $\varepsilon \sigma \chi \iota \sigma \theta \eta \delta \varepsilon$ (verse 4) and in verse 5 ( $\varepsilon \gamma \varepsilon v \varepsilon \tau \frac{\delta}{} \delta \varepsilon$ ). After the persecution and vindication there was a season of great opportunity which Paul and Barnabas used to the full, "speaking boldly" ( $\pi \alpha \rho \rho \eta \sigma \kappa \zeta_{о} \mu \varepsilon v o$ as in 13:46 at

Antioch in Pisidia, "in the Lord" ( $\varepsilon \pi \tau \omega \kappa v \rho \omega)$, upon the basis of the Lord Jesus as in 4:17f . And the Lord Jesus "bore witness to the word of his grace" as he always does, "granting signs and wonders to be done by their hands" ( $\delta \iota \delta$ о七т $\sigma \eta \mu \varepsilon ı \alpha ~ к а ~ \tau \varepsilon \rho а \tau \alpha ~ \gamma ı \nu \varepsilon \sigma \theta a ~ \delta ı \alpha ~ \tau \omega \nu ~$ $\chi \varepsilon \iota \rho \omega v \alpha \nu \tau \omega v$ ). Present participle ( $\delta \iota \delta o v \tau$ ) and present infinitive ( $\gamma \iota v \varepsilon \sigma \theta \alpha$ ) repetition of both signs and wonders (note both words) just as had happened with Peter and John and the other apostles (2:43; 4:29f.; 5:12 ; cf. Heb 2:4 ). The time of peace could not last forever with such a work of grace as this. A second explosion of persecution was bound to come and some of the MSS. actually have $\varepsilon \kappa \delta \varepsilon v \tau \varepsilon \rho o v$ (a second time).

Acts 14:4
 aorist passive indicative of $\sigma \chi\llcorner\zeta \omega$, old verb to split, to make a schism or factions as Sadducees and Pharisees ( 23:7). This division was within the Gentile populace. Part held (o $\mu \varepsilon v \eta \sigma \alpha v$ ), literally "some were with the Jews" ( $\sigma 0 \vee$ toı $\operatorname{Iov} \delta a ı o \iota)$ ), part with the apostles (o $\delta \varepsilon \sigma 0 \vee$ тoı a $\pi \mathbf{o \sigma \tau о \lambda о \iota \varsigma ) . ~ C o m m o n ~ d e m o n s t r a t i v e ~ o f ~ c o n t r a s t ~ ( o ~} \mu \varepsilon v$, o $\delta \varepsilon$, Robertson, Grammar, p. 694). The Jewish leaders made some impression on the Gentiles as at Antioch in Pisidia and later at Thessalonica (17:4f. ). This is the first time in the Acts that Paul and Barnabas are termed "apostles" (see also verse 14). Elsewhere in the Acts the word is restricted to the twelve. Certainly Luke does not here employ it in that technical sense. To have followed Jesus in his ministry and to have seen the Risen Christ was essential to the technical use (1:22f. ). Whether Barnabas had seen the Risen Christ we do not know, but certainly Paul had (1Co 9:1f.; 15:8). Paul claimed to be an apostle on a par with the twelve (Ga 1:1,16-18 ). The word originally means simply one sent (Joh 13:16) like messengers of the churches with the collection (2Co 8:23 ). The Jews used it of those sent from Jerusalem to collect the temple tribute. Paul applies the word to James the Lord's brother (Ga 1:19) , to Epaphroditus (Php 2:25) as the messenger of the church in Philippi, to Silvanus and Timothy (1Th 2:6; Ac 18:5 ), apparently to Apollos (1Co 4:9), and to Andronicus and Junias (Ro 16:6f. ). He even calls the Judaizers "false apostles" (2Co 11:13 ).

Acts 14:5
An onset (op $\mu \eta$ ). A rush or impulse as in Jas 3:4. Old word, but only twice in the N.T. (here and James). It probably denotes not an actual attack so much as the open start, the co-operation of both Jews and Gentiles (the disaffected portion), "with their rulers" (ovv тoıc $\alpha \rho \chi$ оuбIv $\alpha v \tau \omega v$ ), that is the rulers of the Jewish synagogue ( 13:27). The city officials would hardly join in a mob like this, though Hackett and Rackham think that the city magistrates were also involved as in Antioch in Pisidia ( 13:50).
 to insult insolently. See on Mt 22:6; Lu 18:32 .

To stone $\left(\lambda_{1} \theta_{\mathrm{o}} \beta_{\mathrm{o}} \lambda_{\eta} \sigma \alpha\right)$. First aorist active infinitive of $\lambda_{1} \theta_{\mathrm{o}} \beta \mathrm{o} \lambda_{\varepsilon \omega} \omega$, late verb from $\lambda_{1} \theta \circ \beta$ o $\lambda_{0 \varsigma}\left(\lambda_{1} \theta\right.$ oৎ, stone, $\beta \alpha \lambda \lambda \omega$, to throw) to pelt with stones, the verb used of the stoning
of Stephen ( 7:58). See on Mt 21:35. The plan to stone them shows that the Jews were in the lead and followed by the Gentile rabble. "Legal proceedings having failed the only resource left for the Jews was illegal violence" (Rackham).

Acts 14:6
They became aware of it ( $\sigma 0 v ı \delta o v \tau \varepsilon \varsigma)$ ). Second aorist (ingressive) active participle of ovvopaw ( $\sigma v v \varepsilon \iota \delta o v$ ), old word to see together, to become conscious of as already in 12:12. In the N.T. only by Luke and Paul.

Fled (катє甲иүоv). Second aorist (effective) active indicative of $\kappa \alpha \tau \alpha \varphi \varepsilon \cup \gamma \omega$, old verb, but in the N.T. only here and Heb 6:18. Paul and Barnabas had no idea of remaining to be stoned (lynched) by this mob. It is a wise preacher who always knows when to stand his ground and when to leave for the glory of God. Paul and Barnabas were following the directions of the Lord Jesus given to the twelve on their special tour of Galilee (Mt 10:23 ). Lystra and Derbe, cities of Lycaonia (still part of the Province of Galatia, though in another Regio), not far from the base of the Black Mountain. Professor Sterrett has apparently identified Lystra by an inscription about six hours ( 18 miles) south-southwest from Iconium near the village Khatyn Serai and Derbe probably near the village Losta or Zosta though its location is really not known. Lystra had been made a colony in B.C. 6 and Derbe was the frontier city of the Roman empire in the southeast. These are the only cities mentioned, but they were of importance and show that Paul kept to his plan of going to centres of influence. The new imperial road from Antioch and Iconium reached these cities.

The region round about ( $\tau \eta \nu \pi \varepsilon \rho \downarrow \chi \omega \rho \circ \nu$ ) was "a high table land, ill-watered, bleak, but suited for sheep pasture" (Page).

Acts 14:7
And there they preached the gospel ( $\kappa \alpha \kappa \varepsilon \varepsilon v \alpha \gamma \gamma \varepsilon \lambda_{l} \zeta_{\circ} \mu \varepsilon v o \eta \sigma \alpha v$ ). Periphrastic imperfect middle. We are to think of extensive evangelistic work perhaps with the assistance of disciples from Antioch and Iconium since Paul and Barnabas could not speak Lycaonian. Kaкe is crasis for ка єкє.

Acts 14:8
At Lystra ( $\varepsilon v$ ^voт $\rho o \iota \varsigma)$. Neuter plural as in 16:2; $2 \mathrm{Ti} 3: 11$ while feminine singular in 14:6,21; 16:1. There was apparently no synagogue in Lystra and so not many Jews. Paul and Barnabas had to do open-air preaching and probably had difficulty in being understood by the natives though both Greek and Latin inscriptions were discovered here by Professor Sterrett in 1885. The incident narrated here (verses 8-18) shows how they got a real hearing among these rude heathen.

There sat ( $\varepsilon \kappa \alpha \theta \eta \tau 0$ ). Imperfect middle of $\kappa \alpha \theta \eta \mu \alpha$. Was sitting. This case is very much like that in 3:1-11, healed by Peter. Possibly outside the gate (verse 13) or some public place.

Impotent in his feet ( $\alpha \delta v v a \tau \circ \varsigma \tau \circ \varsigma \pi \pi \sigma \sigma v$ ). Old verbal, but only here in the N.T. in this sense except figuratively in Ro 15:1. Elsewhere it means "impossible" (Mt 19:26 ). Locative case. Common in medical writers in the sense of "impotent." So Tobit 2:10; 5:9.

Had walked ( $\pi \varepsilon \rho \varepsilon \pi \pi \alpha \tau \eta \sigma \varepsilon v$ ). So best MSS., first aorist active indicative "walked," not $\pi \varepsilon \rho \iota \_\pi \varepsilon \pi \alpha \tau \eta \kappa \varepsilon$, "had walked" (past perfect active).

Acts 14:9
The same (ovtoৎ). Just "this one."
Heard ( $\eta \kappa 0 v \varepsilon v$ ). Imperfect active, was listening to Paul speaking ( $\lambda \alpha \lambda o v v \tau o \varsigma$ ). Either at the gate or in the market place ( $17: 17$ ) Paul was preaching to such as would listen or could understand his Greek (Koine). Ramsay (St. Paul the Traveller, pp. 114, 116) thinks that the cripple was a proselyte. At any rate he may have heard of the miracles wrought at Iconium (verse 3) and Paul may have spoken of the work of healing wrought by Jesus. This man was "no mendicant pretender," for his history was known from his birth.

Fastening his eyes upon him ( $\alpha \tau \varepsilon v \iota \sigma \alpha \varsigma ~ \alpha v \tau \omega$ ). Just as in 13:9 of Paul and 1:10 which see. Paul saw a new hope in the man's eyes and face.

He had faith ( $\varepsilon \chi \varepsilon \pi \iota \sigma \tau \iota v)$. Present active indicative retained in indirect discourse.
To be made whole ( $\tau \circ v \sigma \omega \theta \eta v \alpha$ ). Genitive of articular first aorist passive infinitive (purpose and result combined) of $\sigma \omega \zeta \omega$, to make sound and also to save. Here clearly to make whole or well as in Lu 7:50 (cf. Ac 3:16; 4:10).

Acts 14:10
Upright (o 0 Oos). Predicate adjective. In this sense Galen and Hippocrates frequently use o $\rho \theta$ os (erect, straight). Paul spoke in a loud ( $\mu \varepsilon \gamma \alpha \lambda \eta$ ) voice so that all could hear and know.

He leaped up and walked ( $\eta \lambda \alpha \tau о \kappa \alpha \pi \varepsilon \rho เ \varepsilon \pi \alpha \tau \varepsilon$ ). Rather, He leaped up with a single bound and began to walk. The second aorist middle indicative (with first aorist vowel $\alpha$ ) of $\alpha \lambda \lambda o \mu \alpha$ (late verb, in papyri) and inchoative imperfect active of $\pi \varepsilon \rho \iota \pi \alpha \tau \varepsilon \omega$, common verb to walk around. This graphic picture is concealed by the usual English rendering. It is possible that Luke obtained the vivid report of this incident from Timothy who may have witnessed it and who was probably converted during Paul's stay here ( $16: 3$ ). His father was a prominent Greek and his mother Eunice, possibly a widow, may have lived here with her mother Lois ( $2 \mathrm{Ti} 1: 5$ ).

Acts 14:11
Lifted up their voice $(\varepsilon \pi \eta \rho \alpha \nu \tau \eta \nu \varphi \omega \nu \eta \nu \alpha v \tau \omega \nu)$. First aorist active of $\varepsilon \pi \alpha \iota \rho \omega$. In their excitement they elevated their voices.

In the speech of Lycaonia ( $\Lambda v \kappa \alpha o v i \sigma \tau)$. Adverb from verb $\lambda v \kappa \alpha o v i \zeta \omega$, to use the language of Lycaonia found here alone, but formed regularly like E $\beta \rho \alpha \iota \sigma \tau$ (Joh 5:2 ), H $\lambda \lambda \lambda \eta v \iota \sigma \tau$ (Ac 21:37), P $\omega \mu \alpha \iota \sigma \tau$ (Joh 19:20). Paul was speaking in Greek, of course, but the excitement of the crowd over the miracle made them cry out in their native tongue which Paul and

Barnabas did not understand. Hence it was not till preparations for offering sacrifice to them had begun that Paul understood the new role in which he and Barnabas were held.

In the likeness of men ( $\circ \mu \circ \iota \omega \theta \varepsilon \nu \tau \varepsilon \varsigma ~ a v \theta \rho \omega \pi \sigma \iota)$. First aorist passive participle of o $\mu \circ \iota \omega$, to liken, with the associative instrumental case. In this primitive state the people hold to the old Graeco-Roman mythology. The story of Baucis and Philemon tells how Jupiter (Zeus) and Mercury (Hermes) visited in human form the neighbouring region of Phrygia (Ovid, Meta. VIII. 626). Jupiter (Zeus) had a temple in Lystra.

## Acts 14:12

They called ( $\varepsilon \kappa \alpha \lambda o v v$ ). Inchoative imperfect began to call.
Barnabas, Jupiter ( $\tau 0 v B \alpha \rho v \alpha \beta \alpha \nu \Delta t \alpha$ ). Because Barnabas was the older and the more imposing in appearance. Paul admits that he was not impressive in looks (2Co 10:10).

And Paul, Mercury ( $\tau 0 v \delta \varepsilon \Pi \alpha v \lambda o v ~ H \varepsilon \rho \mu \eta v$ ). Mercury (Hع $\rho \mu \eta$ ) was the messenger of the gods, and the spokesman of Zeus. Hع $\rho \mu\rceil$, was of beautiful appearance and eloquent in speech, the inventor of speech in legend. Our word hermeneutics or science of interpretation comes from this word (Heb 7:2; Joh 1:38).

Because he was the chief speaker ( $\varepsilon \pi \varepsilon เ \delta \eta$ avtoৎ $\eta \nu$ о $\eta \gamma \circ \cup \mu \varepsilon \nu \circ \varsigma \tau о v \lambda o \gamma o v)$. Paul was clearly "the leader of the talk." So it seemed a clear case to the natives. If preachers always knew what people really think of them! Whether Paul was alluding to his experience in Lystra or not in Ga $4: 14$, certainly they did receive him as an angel of God, as if "Mercury" in reality.

Acts 14:13
Whose temple was before the city ( $\tau \circ v$ ov $\tau \circ \varsigma \pi \rho \circ \tau \eta \varsigma \pi \omega \lambda \varepsilon \omega \varsigma$ ). The god (Zeus) is identified with his temple. He had a statue and temple there.

Oxen and garlands ( $\tau \alpha \cup \rho о \cup \varsigma \kappa \alpha \sigma \tau \varepsilon \mu \mu \alpha \tau \alpha$ ). Probably garlands to put on the oxen before they were slain. It was common to sacrifice bullocks to Jupiter and Mercury.

Would have done sacrifice ( $\eta \theta \varepsilon \lambda \varepsilon v \theta v \varepsilon \imath v$ ). Imperfect indicative, wanted to offer sacrifice. He was planning to do it, and his purpose now became plain to Paul and Barnabas.

Acts 14:14
Having heard ( $\alpha<0 v \sigma \alpha v \tau \varepsilon \varsigma)$. Such elaborate preparation "with the multitudes" ( $\sigma v v$ toıs ox $\lambda_{\text {ots) spread rumours and some who spoke Greek told Paul and Barnabas. It is possible }}$ that the priest of Jupiter may have sent a formal request that the visiting "gods" might come out to the statue by the temple gates to make it a grand occasion. They rent their garments ( $\delta \iota \alpha \rho \rho \eta \xi \alpha \nu \tau \varepsilon \varsigma)$. First aorist active participle from $\delta \iota \alpha \rho \rho \eta \gamma \nu \nu \mu$, old verb to rend in two. Like the high priest in Mt 26:65 as if an act of sacrilege was about to be committed. It was strange conduct for the supposed gods!

Sprang forth $(\varepsilon \xi \varepsilon \pi \eta \delta \eta \sigma \alpha v)$. First aorist (ingressive) active indicative of $\varepsilon \kappa \pi \eta \delta \alpha \omega$ (note $\varepsilon \kappa$ ), old verb, here only in the N.T. It was all a sign of grief and horror with loud outcries (краऍоขтєц).

Acts 14:15
Sirs ( $\alpha \vee \delta \rho \varepsilon \varsigma)$. Literally, Men. Abrupt, but courteous.
We also are men of like passions with you ( $\kappa \alpha \eta \mu \varepsilon ı \varsigma ~ о \mu о ь т ~ \pi \alpha \theta \varepsilon ı \varsigma ~ \varepsilon \sigma \mu \varepsilon v v \mu ı \nu ~ \alpha v \theta \rho \omega \pi о$ ). Old adjective from ouotos (like) and $\pi \alpha \sigma \chi \omega$, to experience. In the N.T. only here and Jas 5:17. It means "of like nature" more exactly and affected by like sensations, not "gods" at all. Their conduct was more serious than the obeisance of Cornelius to Peter (10:25f. ). H $\nu \mu v$ is associative instrumental case.

And bring you good tidings ( $\varepsilon v a \gamma \gamma \varepsilon \lambda \iota \zeta о \mu \varepsilon \nu o)$. No "and" in the Greek, just the present middle participle, "gospelizing you." They are not gods, but evangelists. Here we have Paul's message to a pagan audience without the Jewish environment and he makes the same line of argument seen in Ac 17:21-32; Ro 1:18-23. At Antioch in Pisidia we saw Paul's line of approach to Jews and proselytes (Ac 13:16-41).

That ye should turn from these vain things ( $\alpha \pi \sigma \tau 0 v \tau \omega \nu \tau \omega \nu \mu \alpha \tau \alpha \iota \omega \nu \varepsilon \pi \iota \sigma \tau \rho \varepsilon \varphi \varepsilon \iota \nu$ ). He boldly calls the worship of Jupiter and Mercury and all idols "vain" or empty things, pointing to the statues and the temple.

Unto the living God ( $\varepsilon \pi \theta \varepsilon o v \zeta \omega v \tau \alpha)$. They must go the whole way. Our God is a live God, not a dead statue. Paul is fond of this phrase (2Co 6:16; Ro 9:26 ).

Who made (oৎ $\varepsilon \pi \sigma \neq \sigma \varepsilon v)$. The one God is alive and is the Creator of the Universe just as Paul will argue in Athens (Ac 17:24 ). Paul here quotes Ps 146:6 and has Ge 1:1 in mind. See also 1Th 1:9 where a new allegiance is also claimed as here.

Acts 14:16
In the generations gone by ( $\varepsilon v \tau \alpha \iota \varsigma \pi \alpha \rho \omega \iota \chi \eta \mu \varepsilon v a ı \varsigma \gamma \varepsilon v \varepsilon \alpha \iota \varsigma)$. Perfect middle participle from $\pi \alpha \rho о г \chi \circ \mu \alpha$, to go by, old verb, here alone in the N.T.

Suffered ( $\varepsilon \iota \alpha \sigma \varepsilon v$ ). Constative aorist active indicative of $\varepsilon \alpha \omega$ (note syllabic augment). Paul here touches God in history as he did just before in creation. God's hand is on the history of all the nations (Gentile and Jew), only with the Gentiles he withdrew the restraints of his grace in large measure (Ac 17:30; Ro 1:24,26,28 ), judgment enough for their sins.

To walk in their ways ( $\pi \circ \rho \varepsilon v \varepsilon \sigma \theta \alpha \tau \alpha \iota \varsigma ~ o \delta o ı \varsigma ~ \alpha v \tau \omega v$ ). Present middle infinitive, to go on walking, with locative case without $\varepsilon \nu$. This philosophy of history does not mean that God was ignorant or unconcerned. He was biding his time in patience.

Acts 14:17
And yet (кaito). Old Greek compound particle ( $\kappa \alpha \tau 0$ ). In the N.T. twice only, once with finite verb as here, once with the participle (Heb 4:3).

Without witness ( $\alpha \mu \alpha \rho \tau v \rho o v$ ). Old adjective ( $\alpha$ privative and $\mu \alpha \rho \tau \nu \varsigma$, witness), only here in the N.T.

Left ( $\alpha \varphi \eta \kappa \varepsilon \nu$ ). First aorist active ( $\kappa$ aorist indicative of $\alpha \varphi \not \eta \mu$ ).
In that he did good $(\alpha \gamma \alpha \theta o v \rho \gamma \omega v)$. Present active causal participle of $\alpha \gamma \alpha \theta o v \rho \gamma \varepsilon \omega$, late and rare verb (also $\alpha \gamma \alpha \theta o \varepsilon \rho \gamma \varepsilon \omega 1 \mathrm{Ti} 6: 18$ ), reading of the oldest MSS. here for
$\alpha \gamma \alpha \theta$ отоו $\varepsilon \omega$, to do good. Note two other causal participles here parallel with $\alpha \gamma \alpha \theta o v \rho \gamma \omega v$, viz., $\delta \iota \delta o u c$ ("giving you") present active of $\delta \iota \delta \omega \mu \mathrm{t}, \varepsilon \mu \pi \iota \pi \lambda \omega \nu$ ("filling") present active of $\varepsilon \mu \pi \mu \mu \pi \lambda \omega$ (late form of $\varepsilon \mu \pi \mu \mu \pi \lambda \eta \mu$ ). This witness to God (his doing good, giving rains and fruitful seasons, filling your hearts with food and gladness) they could receive without the help of the Old Testament revelation (Ro 1:20). Zeus was regarded as the god of rain (Jupiter Pluvius) and Paul claims the rain and the fruitful (карточороиб, картоৎ, and $\varphi \varepsilon \rho \omega$, fruit bearing, old word, here alone in N.T.) seasons as coming from God. Lycaonia was often dry and it would be an appropriate item. "Mercury, as the God of merchandise, was also the dispenser of food" (Vincent). Paul does not talk about laws of nature as if they governed themselves, but he sees the living God "behind the drama of the physical world" (Furneaux). These simple country people could grasp his ideas as he claims everything for the one true God.

Gladness ( $\varepsilon v \varphi \rho \circ \sigma v \nu \eta \zeta)$. Old word from $\varepsilon v \varphi \rho \omega v(\varepsilon v$ and $\varphi \rho \eta \nu)$, good cheer. In the N.T. only Ac 2:28 and here. Cheerfulness should be our normal attitude when we consider God's goodness. Paul does not here mention Christ because he had the single definite purpose to dissuade them from worshipping Barnabas and himself.

Acts 14:18
Scarce ( $\mu \mathrm{o} \lambda \iota \varsigma$ ). Adverb in same sense as old $\mu \circ \gamma \iota$, from $\mu \circ \lambda о \varsigma$, toil.
Restrained (катєпаvбаబ). Effective first aorist active indicative of кататаv $\omega$, old verb in causative sense to make abstain from.

From doing sacrifice unto them ( $\tau 0 \cup \mu \eta$ Өveıv avtoıc). Ablative case of the articular
 Grammar, pp. 1094, 1171). It had been a harrowing and well-nigh a horrible ordeal, but finally Paul had won. If only nobody else had interposed!

Acts 14:19
 $\kappa \alpha$ Ikovıov Iov $\delta \alpha \circ$ ). Came to or upon them, $\varepsilon \pi \eta \lambda \theta \alpha v$, second aorist (ingressive) indicative of $\varepsilon \pi \varepsilon \rho \chi \circ \mu \alpha$. Whether news of the miracle had reached those cities we do not know. These may have been travelling grain merchants. At any rate there was an interval in which Paul and Barnabas won some disciples (verse 22). There would be a natural reaction, even revulsion, in the minds of many who had come so near to worshipping Paul and Barnabas. The pendulum swings easily from one extreme to the other. The hostile Jews from Antioch and Iconium may even have followed Paul and Barnabas along the fine Roman road on purpose to keep them on the run. They had driven them out of Antioch and out of Iconium and now appear at Lystra at an opportune moment for their work.

Having persuaded the multitudes ( $\pi \varepsilon เ \sigma \alpha v \tau \varepsilon \varsigma ~ \tau o v \varsigma ~ o x \lambda o v \varsigma) . ~ F i r s t ~ a o r i s t ~(e f f e c t i v e) ~$ active participle of $\pi \varepsilon ө \omega \omega$. They had complete success with many and struck at the psychological moment.

They stoned Paul（ $\lambda_{1} \theta \alpha \sigma \alpha v \tau \varepsilon \varsigma$ tov Пav $\lambda^{2} v$ ）．First aorist active participle of $\lambda_{1} \theta \alpha \zeta \omega$ ， late verb from $\lambda_{\mathrm{l}} \theta_{\text {os }}$ for throwing stones（used by Paul referring to this one incident when alone he was stoned，2Co 11：25 ）．The wounds inflicted may have left some of the scars （ $\sigma \tau \iota \gamma \mu \alpha \tau \alpha)$ mentioned in Ga 6：17．They stoned Paul as the chief speaker（Mercury）and passed by Barnabas（Jupiter）．It was a Jewish mode of punishment as against Stephen and these Jews knew that Paul was the man that they had to deal with．Hackett notes that the Jews with two exceptions incited the persecutions which Paul endured．The exceptions were in Philippi（ 16：16－40）and Ephesus（19：23－41）．

Dragged him out of the city（ $\varepsilon \sigma \cup \rho \circ v \varepsilon \xi \omega \tau \eta \varsigma \pi 0 \lambda \varepsilon \omega \varsigma)$ ．They hurled Stephen outside of the city before stoning him（7：58）．It was a hurried and irregular proceeding，but they were dragging（imperfect active of $\sigma v \rho \omega$ ，old verb）Paul out now．

Supposing that he were dead（vоцı $о \nu \tau \varepsilon \varsigma ~ a \cup \tau о v ~ \tau \varepsilon Ө v \eta \kappa \varepsilon v \alpha)$ ）．Present active participle with infinitive（second perfect active of $\theta \nu \eta \sigma \kappa \omega)$ in indirect discourse with accusative of general reference．The Jews are jubilant this time with memories of Paul＇s escape at Antioch and Iconium．The pagan mob feel that they have settled accounts for their narrow escape from worshipping two Jewish renegade preachers．It was a good day＇s work for them all． Luke does not say that Paul was actually dead．

Acts 14：20
Stood round about him（ $\kappa \cup \kappa \lambda \omega \sigma \alpha \nu \tau \omega \nu$ avtov）．Genitive absolute with first aorist
 encircle．The would－be murderers left and a group of disciples gathered round to see if Paul was dead or alive and，if dead，to bury him．In that group Timothy may very well have been along with Eunice and Barnabas．Timothy，a lad of about fifteen，would not soon forget that solemn scene（2Ti 3：11 ）．But Paul suddenly（apparently a miraculous recovery）rose up （ava⿱宀八弓¢）and entered the city to the surprise and joy of the disciples who were willing to brave persecution with Paul．
 wise to continue in Lystra so that they set out on the next day（ $\tau \eta \varepsilon \pi \alpha u \rho \circ \circ$ ，ten times in Acts），shaken and bruised as Paul was．Derbe was some forty miles distant，near the pass to the Cilician Gates．

Acts 14：21
When they had preached the gospel to that city（ $\varepsilon \cup \alpha \gamma \gamma \varepsilon \lambda ı \sigma \alpha \mu \varepsilon v o ~ \tau \eta \nu ~ \pi о \lambda ı \nu \varepsilon \kappa \varepsilon ı \eta \eta)$ ）． Having evangelized（first aorist middle participle）that city，a smaller city and apparently with no trouble from the Jews．

Had made many disciples（ $\mu \alpha \theta \eta \tau \varepsilon \cup \sigma \alpha \nu \tau \varepsilon \varsigma$ וкаvouc）．First aorist active participle of $\mu \alpha \theta \eta \tau \varepsilon v \omega$ from $\mu \alpha \theta \eta \tau \eta \varsigma$ ，a learner or disciple．Late verb in Plutarch，to be a disciple（Mt 27：57 like Joh 19：38）and then to disciple（old English，Spenser），to make a disciple as in

Mt 28:19 and here. Paul and Barnabas were literally here obeying the command of Jesus in discipling people in this heathen city.

They returned to Lystra and to Iconium, and to Antioch (v $\tau \varepsilon \sigma \tau \rho \varepsilon \psi a v \varepsilon ء \varsigma \tau \eta \nu \Lambda \nu \sigma \tau \rho \alpha \nu$
 quickest way to return to Antioch in Syria would have been by the Cilician Gates or by the pass over Mt. Taurus by which Paul and Silas will come to Derbe in the second tour (Ac 15:41-16:1 ), but difficult to travel in winter. But it was necessary to revisit the churches in Lystra, Iconium, Antioch in Pisidia and to see that they were able to withstand persecution. Paul was a Roman citizen though he had not made use of this privilege as yet for his own protection. Against mob violence it would count for little, but he did not hesitate. Paul had been stoned in Lystra, threatened in Iconium, expelled in Antioch. He shows his wisdom in conserving his work.

Acts 14:22
Confirming ( $\varepsilon \pi \iota \sigma \tau \eta \rho \iota \zeta$ ovtec). Late verb (in LXX), in N.T. only in Ac 14:22; 15:32,41, to make more firm, to give additional $(\varepsilon \pi)$ strength. Each time in Acts the word is used concerning these churches.

To continue in the faith ( $\varepsilon \mu \mu \varepsilon v \varepsilon เ \nu \tau \eta \pi / \sigma \tau \varepsilon$ ). To remain in with locative, old verb. It is possible that $\pi \iota \sigma \tau \iota c$ here has the notion of creed as Paul uses it later ( $\operatorname{Col} 1: 23$ with $\varepsilon \pi \iota \mu \varepsilon v \omega$; 1Ti 5:8). It seems to be here more than trust or belief. These recent converts from heathenism were ill-informed, were persecuted, had broken family and social ties, greatly needed encouragement if they were to hold out.

We must ( $\delta \varepsilon \eta \mu \alpha \varsigma)$. It does not follow from this use of "we" that Luke was present, since it is a general proposition applying to all Christians at all times (2Ti 3:12). Luke, of course, approved this principle. Knowling asks why Timothy may not have told Luke about Paul's work. It all sounds like quotation of Paul's very language. Note the change of construction here after $\pi \alpha \rho \alpha \kappa \alpha \lambda$ оuvт $\varsigma$ (infinitive of indirect command, $\varepsilon \mu \mu \varepsilon v \varepsilon เ v$, but oт $\delta \varepsilon$, indirect assertion). They needed the right understanding of persecution as we all do. Paul frankly warned these new converts in this heathen environment of the many tribulations through which they must enter the Kingdom of God (the culmination at last) as he did at Ephesus (Ac 20:20) and as Jesus had done (Joh 16:33). These saints were already converted.

Acts 14:23
And when they had appointed for them elders in every church ( $\chi \varepsilon \rho \rho \tau о v \eta \sigma \alpha v \tau \varepsilon \varsigma \delta \varepsilon$ аитоья кат' єкк $\lambda \eta \sigma \iota v \pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho о и \varsigma)$. They needed also some form of organization, though already churches. Note distributive use of ката with єкк入ךбıаv (2:46; 5:42; Tit 1:5 ).
 old verb that originally meant to vote by show of the hands, finally to appoint with the approval of an assembly that chooses as in 2Co 8:19, and then to appoint without regard to choice as in Josephus (Ant. XIII. 2, 2) of the appointment of Jonathan as high priest by Al-
exander. So in Ac 10:41 the compound $\pi \rho \circ \chi \varepsilon \rho \rho \frac{\tau}{}$. God. But the seven (deacons) were first selected by the Jerusalem church and then appointed ( $\kappa \alpha \tau \alpha \sigma \tau \eta \sigma о \mu \varepsilon v)$ by the apostles. That is probably the plan contemplated by Paul in his directions to Titus (Tit 1:5) about the choice of elders. It is most likely that this plan was the one pursued by Paul and Barnabas with these churches. They selected the elders in each instance and Paul and Barnabas "ordained" them as we say, though the word $\chi \varepsilon ו \rho о \tau о v \varepsilon \omega$ does not mean that. "Elders" were mentioned first in 11:30. Later Paul will give the requirements expected in these "elders" or "bishops" (Php 1:1 ) as in 1Ti 3:1-7; Tit 1:5-9. It is fairly certain that these elders were chosen to correspond in a general way with the elders in the Jewish synagogue after which the local church was largely copied as to organization and worship. Paul, like Jesus, constantly worshipped and spoke in the synagogues. Already it is plain, as at Antioch in Syria ( 11:26), that the Christians can no longer count on the use of the Jewish synagogue. They must have an organization of their own. The use of the plural here implies what was true at Philippi (Php 1:1) and Ephesus (Ac 20:17,28) that each church (one in each city) "had its college of elders" (Hackett) as in Jerusalem ( 21:18). Elder
 office. "Those who are called elders in speaking of Jewish communities are called bishops in speaking of Gentile communities" (Hackett). Hovey rightly holds against Hackett that teaching was a normal function of these elders, pastors or bishops as they were variously called (1Ti 3:2; Tit 1:9; 1Co 12:28,30; Eph 4:11).

Had prayed with fasting ( $\pi \rho \circ \sigma \varepsilon \cup \xi \alpha \mu \varepsilon v o \mu \varepsilon \tau \alpha \sim \eta \sigma \tau \varepsilon \epsilon \omega v$ ). It was a serious matter, this formal setting apart of these "elders" in the churches. So it was done in a public meeting with prayer and fasting as when Paul and Barnabas were sent forth from Antioch in Syria ( $13: 3$ ) on this mission tour.

They commended them to the Lord ( $\pi \alpha \rho \varepsilon \theta \varepsilon v \tau o$ autovc $\tau \omega \kappa \nu \rho i \omega$ ). Second aorist middle indicative of $\pi \alpha \rho \alpha \tau \iota \theta \eta \mu$. Old and solemn word, to entrust, to deposit as in a bank (1Ti 1:18; 2Ti 2:2 ). Cf. $\pi \alpha \rho \alpha \theta \eta \kappa \eta$ in 1Ti 6:20; 2Ti 1:12,14 . It was all that they could now do, to commit them to the Lord Jesus. Jesus used this word on the cross (Lu 22:32).

On whom they had believed ( $\varepsilon \varsigma ~$ о $\boldsymbol{\pi \varepsilon \pi เ \sigma \tau \varepsilon \cup к \varepsilon เ \sigma a v ) . ~ P a s t ~ p e r f e c t ~ i n d i c a t i v e ~ ( w i t h o u t ~}$ augment) of $\pi \iota \sigma \tau \varepsilon v \omega$. They had "trusted" in Jesus (2Ti 1:12) and Paul now "entrusts" them to him with confidence. It was a solemn and serious occasion in each instance as it always is to set apart men for the ministry. These men may not have been ideal men for this service, but they were the only ones available and they were chosen from the actual membership in each instance, men who knew local conditions and problems.

Acts 14:24
When they had spoken the word in Perga ( $\lambda \alpha \lambda \eta \sigma \alpha \nu \tau \varepsilon \varsigma \varepsilon \nu ~ П \varepsilon \rho \gamma \eta \tau$ тov $\lambda o \gamma o v$ ). Now they stopped and preached in Perga which they had apparently not done before (see 13:13f. ). After leaving Antioch they passed on through Pisidia, as if Antioch was not strictly in

Pisidia (see on 13:14) and into Pamphylia. They crossed from Perga to Attaleia, the port of Perga, sixteen miles down the Cestus, and capital of Pamphylia, to find a ship for Antioch in Syria. It is now called Adala and for long was the chief harbour of the south coast of Asia Minor. We do not know why they did not revisit Cyprus, perhaps because no permanent Gentile churches were founded there.

Acts 14:26
They sailed away to Antioch ( $\alpha \pi \varepsilon \pi \lambda \varepsilon v \sigma \alpha v \varepsilon เ \varsigma ~ A v \tau \iota \circ \varepsilon \varepsilon \alpha v)$. Effective aorist active indicative of $\alpha \pi \sigma \pi \lambda \varepsilon \omega$, to sail off. They had been gone some eighteen months.

They had been committed ( $\eta \sigma \alpha v \pi \alpha \rho \alpha \delta \varepsilon \delta o \mu \varepsilon v o$ ). Periphrastic past perfect passive of $\pi \alpha \rho \alpha \delta \iota \delta \omega \mu$, old and common verb. High and serious thoughts filled the hearts of these first returned missionaries as they neared home. The grace of God had been with them. They had fulfilled $(\varepsilon \pi \lambda \eta \rho \omega \sigma \alpha v)$ the work to which they had been set apart by the Holy Spirit with the prayers of the Antioch church. They now had a wondrous story to tell.

Acts 14:27
Gathered the church together ( $\sigma v \vee \alpha \gamma \alpha \gamma 0 \nu \tau \varepsilon \varsigma ~ \tau \eta v \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha v$ ). Second aorist active participle of $\sigma v v a \gamma \omega$. It "was the first missionary meeting in history" (Furneaux). It was not hard to get the church together when the news spread that Paul and Barnabas had returned. "The suitability of the Gospel to become the religion of the world had not before been put to the test" (Furneaux). Doubtless many "wise-acres" had predicted failure as they did for William Carey and for Adoniram Judson and Luther Rice.

Rehearsed ( $\alpha v \eta \gamma \gamma \varepsilon \lambda \lambda o v$ ). Imperfect active. It was a long story for they had many things to tell of God's dealings "with them" ( $\left.\mu \varepsilon \tau^{\prime} \alpha \nu \tau \omega v\right)$ for God had been "with them" all the while as Jesus had said he would be (Mt 28:20 , $\mu \varepsilon \theta^{\prime} \nu \mu \omega v$ ). Paul could recount some of the details given later in 2Co 11 .

And how ( $\kappa \alpha \circ \tau$ ). Or "and that" in particular, as the upshot of it all.
He had opened a door of faith unto the Gentiles ( $\eta v o \iota \xi \varepsilon v \tau o \iota \varepsilon \varepsilon \theta v \varepsilon \sigma \iota v \theta \cup \rho a v \pi \iota \sigma \tau \varepsilon \omega \varsigma$ ). Three times in Paul's Epistles (1Co 16:9; 2Co 2:12; Col 4:3 ) he employed the metaphor of "door," perhaps a reminiscence of the very language of Paul here. This work in Galatia gained a large place in Paul's heart (Ga 4:14f. ). The Gentiles now, it was plain, could enter the kingdom of God (verse 22) through the door of faith, not by law or by circumcision or by heathen philosophy or mythology.

Acts 14:28
 $\delta \iota \alpha \tau \rho 1 \beta \omega$, old verb to rub hard, to consume, with accusative of extent of time. It was a happy time of fellowship. The experiment entered upon by the church of Antioch was now a pronounced success. It was at the direct command of the Holy Spirit, but they had prayed for the absent missionaries and rejoiced at their signal success. There is no sign of jealousy on the part of Barnabas when Paul returns as the chief hero of the expedition. A new corner
has been turned in the history of Christianity. There is a new centre of Christian activity. What will Jerusalem think of the new developments at Antioch? Paul and Barnabas made no report to Jerusalem.

## Acts 15

Acts 15:1
And certain men came down from Judea ( $\kappa \alpha \tau \iota \varepsilon \varepsilon \varsigma ~ \kappa \alpha \tau \varepsilon \lambda \theta о \nu \tau \varepsilon \varsigma \alpha \tau о \tau \eta \varsigma$ Iovסaıaৎ). Evidently the party of the circumcision in the church in Jerusalem (11:2) had heard of the spread of the gospel among the Gentiles in Cyprus, Pamphylia, and South Galatia (Phrygia, Pisidia, Lycaonia). Possibly John Mark after his desertion at Perga (13:13) told of this as one of his reasons for coming home. At any rate echoes of the jubilation in Antioch in Syria would be certain to reach Jerusalem. The Judaizers in Jerusalem, who insisted that all the Gentile Christians must become Jews also, had acquiesced in the case of Cornelius and his group ( $11: 1-18$ ) after plain proof by Peter that it was the Lord's doing. But they had not agreed to a formal campaign to turn the exception into the rule and to make Christianity mainly Gentile with a few Jews instead of mainly Jewish with a few Gentiles. Since Paul and Barnabas did not come up to Jerusalem, the leaders among the Judaizers decided to go down to Antioch and attack Paul and Barnabas there. They had volunteered to go without church action in Jerusalem for their activity is disclaimed by the conference (Ac 15:24). In Ga 2:4 Paul with some heat describes these Judaizers as "false brethren, secretly introduced who sneaked in to spy out our liberty." It is reasonably certain that this visit to Jerusalem described in Ga 2:1-10 is the same one as the Jerusalem Conference in Acts 15:5-29 in spite of the effort of Ramsay to identify it with that in 11:29f. Paul in Galatians is not giving a list of his visits to Jerusalem. He is showing his independence of the twelve apostles and his equality with them. He did not see them in 11:29f. , but only "the elders." In Ac 15 Luke gives the outward narrative of events, in Ga 2:1-10 Paul shows us the private interview with the apostles when they agreed on their line of conduct toward the Judaizers. In Ga 2:2 by the use of "them" (avtoıs) Paul seems to refer to the first public meeting in Acts before the private interview that came in between verses 15:5-6. If we recall the difficulty that Peter had on the subject of preaching the gospel to the heathen (10:1-11:18), we can the better understand the attitude of the Judaizers. They were men of sincere convictions without a doubt, but they were obscurantists and unable and unwilling to receive new light from the Lord on a matter that involved their racial and social prejudices. They recalled that Jesus himself had been circumcised and that he had said to the Syro-woman that he had come only save to the lost sheep of the house of Israel (Mt 15:24ff. ). They argued that Christ had not repealed circumcision. So one of the great religious controversies of all time was begun, that between spiritual religion and ritualistic or ceremonial religion. It is with us yet with baptism taking the place of circumcision. These self-appointed champions of circumcision for Gentile Christians were deeply in earnest.

Taught the brethren ( $\varepsilon \delta \delta_{1} \delta \alpha \sigma \kappa v$ тоvৎ $\alpha \delta \varepsilon \lambda \varphi$ оטৎ). Inchoative imperfect active, began to teach and kept it up. Their attitude was one of supercilious superiority. They probably
resented the conduct of Barnabas, who, when sent by the Church in Jerusalem to investigate the conversion of the Greeks in Antioch (11:20-26), did not return and report till a strong church had been established there with the help of Saul and only then with a big collection to confuse the issue. Paul and Barnabas were on hand, but the Judaizers persisted in their efforts to force their views on the church in Antioch. It was a crisis.

Except ye be circumcised after the custom of Moses, ye cannot be saved ( $\varepsilon \alpha \nu \mu \varepsilon$ $\pi \varepsilon \rho ı \tau \mu \eta \theta \eta \tau \varepsilon \tau \omega \varepsilon \theta \varepsilon \mathrm{M} \omega \nu \sigma \varepsilon \omega \sigma$, ov $\delta v \nu \alpha \sigma \theta \varepsilon \sigma \omega \theta \eta \nu \alpha)$. There was the dictum of the Judaizers to the Gentiles. Paul and Barnabas had been circumcised. This is probably the precise language employed, for they spoke in Greek to these Greeks. It is a condition of the third class (undetermined, but with prospect of being determined, $\varepsilon \alpha v$ plus the first aorist passive subjunctive of $\pi \varepsilon \rho \iota \tau \varepsilon \mu \nu \omega)$. There was thus hope held out for them, but only on condition that they be circumcised. The issue was sharply drawn. The associative instrumental case ( $\tau \omega \varepsilon \theta \varepsilon$ ) is customary. "Saved" ( $\sigma \omega \theta \eta v \alpha$ ) here is the Messianic salvation. This doctrine denied the efficacy of the work of Christ.

Acts 15:2
When Paul and Barnabas had no small dissension and questioning with them
 absolute of second aorist middle participle of $\gamma \iota v o \mu \alpha$, genitive singular agreeing with first substantive $\sigma \tau \alpha \sigma \varepsilon \omega \varsigma$. Literally, "No little (litotes for much) strife and questioning coming to Paul and Barnabas (dative case) with them " ( $\pi \rho o \varsigma \alpha \nu \tau 0 v \varsigma$, face to face with them). Paul and Barnabas were not willing to see this Gentile church brow-beaten and treated as heretics by these self-appointed regulators of Christian orthodoxy from Jerusalem. The work had developed under the leadership of Paul and Barnabas and they accepted full responsibility for it and stoutly resisted these Judaizers to the point of sedition (riot, outbreak in Lu 23:25; Ac 19:40) as in 23:7. There is no evidence that the Judaizers had any supporters in the Antioch church so that they failed utterly to make any impression. Probably these Judaizers compelled Paul to think through afresh his whole gospel of grace and so they did Paul and the world a real service. If the Jews like Paul had to believe, it was plain that there was no virtue in circumcision (Ga 2:15-21 ). It is not true that the early Christians had no disagreements. They had selfish avarice with Ananias and Sapphira, murmuring over the gifts to the widows, simony in the case of Simon Magus, violent objection to work in Caesarea, and now open strife over a great doctrine (grace vs. legalism).

The brethren appointed $(\varepsilon \tau \alpha \xi \alpha \nu)$. "The brethren" can be supplied from verse 1 and means the church in Antioch. The church clearly saw that the way to remove this deadlock between the Judaizers and Paul and Barnabas was to consult the church in Jerusalem to which the Judaizers belonged. Paul and Barnabas had won in Antioch. If they can win in Jerusalem, that will settle the matter. The Judaizers will be answered in their own church for which they are presuming to speak. The verb $\varepsilon \tau \alpha \xi \alpha \nu$ ( $\tau \alpha \sigma \sigma \omega$, to arrange) suggests a
formal appointment by the church in regular assembly. Paul (Ga 2:2) says that he went up by revelation (кат' алока入טчıv), but surely that is not contradictory to the action of the church.

Certain others of them ( $\tau$ ivac $\alpha \lambda \lambda$ douc). Certainly Titus (Ga 2:1,3), a Greek and probably a brother of Luke who is not mentioned in Acts. Rackham thinks that Luke was in the number.
 both (cf. "the apostles and the brethren" in 11:1). "Elders" now ( $11: 30$ ) in full force. The apostles have evidently returned now to the city after the death of Herod Agrippa I stopped the persecution.

Acts 15:3
They therefore ( $\mathrm{o} \mu \varepsilon v \mathrm{ovv}$ ). Luke's favourite method of resumptive narrative as we have seen ( 11:19, etc.), demonstrative o with $\mu \varepsilon \nu$ (indeed) and ouv (therefore).

Being brought on their way by the church ( $\pi \rho о \pi \varepsilon \mu \varphi \theta \varepsilon v \tau \varepsilon \varsigma ~ v \pi о ~ \tau \eta \varsigma ~ \varepsilon \kappa \kappa \lambda \eta \sigma \omega \propto \varsigma) . ~ F i r s t ~$ aorist passive participle of $\pi \rho \circ \pi \varepsilon \mu \pi \omega$, old verb, to send forward under escort as a mark of honour as in 20:38; 21:5; 3Jo 1:6. They were given a grand send-off by the church in Antioch.

Passed through ( $\delta ı \eta \rho \chi$ оvтo). Imperfect middle describing the triumphal procession through both ( $\tau \varepsilon \kappa \alpha$ ) Phoenicia and Samaria.

The conversion ( $\tau \eta v \varepsilon \pi \iota \sigma \tau \rho \circ \varphi \eta \nu$ ). The turning.
They caused great joy ( $\varepsilon \pi \sigma o o v \nu \chi \alpha \rho \alpha v \mu \varepsilon \gamma \alpha \lambda \eta \nu$ ). Imperfect active. They were raising a constant paean of praise as they proceeded toward Jerusalem. Probably the Judaizers had gone on or kept still.

Acts 15:4
Were received ( $\pi \alpha \rho \varepsilon \delta \varepsilon \chi \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\pi \alpha \rho \alpha \delta \varepsilon \chi \circ \mu \alpha$, old verb, to receive, to welcome. Here it was a public reception for Paul and Barnabas provided by the whole church including the apostles and elders, at which an opportunity was given to hear the story of Paul and Barnabas about God's dealings with them among the Gentiles. This first public meeting is referred to by Paul in Ga 2:2 "I set before them (autoıs) the gospel, etc."

Acts 15:5
But there rose up ( $\varepsilon \xi \alpha v \varepsilon \sigma \tau \eta \sigma \alpha v \delta \varepsilon$ ). Second aorist active indicative (intransitive). Note both $\varepsilon \xi$ and $\alpha v$. These men rose up out of the crowd at a critical moment. They were believers in Christ ( $є \varepsilon \pi เ \sigma \tau \varepsilon \cup к о \tau \varepsilon \varsigma, ~ h a v i n g ~ b e l i e v e d), ~ b u t ~ w e r e ~ s t i l l ~ m e m b e r s ~ o f ~ " t h e ~ s e c t ~ o f ~ t h e ~ P h a r-~$ isees" ( $\tau \eta \varsigma$ aı $\rho \varepsilon \sigma \varepsilon \omega \varsigma \tau \omega v$ Фapıбaı $\omega v$ ). Evidently they still held to the Pharisaic narrowness shown in the attack on Peter (11:2f. ). Note the dogmatism of their "must" ( $\delta \varepsilon$ ) after the opposition of Paul and Barnabas to their "except" ( $\varepsilon \alpha \nu \mu \varepsilon$ ) at Antioch ( 15:1). They are unconvinced and expected to carry the elders with them. Codex Bezae says that they had appealed to the elders ( $15: 2,5$ ). At any rate they have made the issue in open meeting at the
height of the jubilation. It is plain from verse 6 that this meeting was adjourned, for another gathering came together then. It is here that the private conference of which Paul speaks in Ga 2:1-10 took place. It was Paul's chance to see the leaders in Jerusalem (Peter, James, and John) and he won them over to his view of Gentile liberty from the Mosaic law so that the next public conference (Ac 15:6-29) ratified heartily the views of Paul, Barnabas, Peter, James, and John. It was a diplomatic triumph of the first order and saved Christianity from the bondage of Jewish ceremonial sacramentalism. So far as we know this is the only time that Paul and John met face to face, the great spirits in Christian history after Jesus our Lord. It is a bit curious to see men saying today that Paul surrendered about Titus and had him circumcised for the sake of peace, the very opposite of what he says in Galatians, "to whom I yielded, no not for an hour." Titus as a Greek was a red flag to the Judaizers and to the compromisers, but Paul stood his ground.

Acts 15:6
Were gathered together ( $\sigma u v \eta \chi \theta \eta \sigma \alpha v$ ). First aorist (effective) passive indicative. The church is not named here as in verse 4, but we know from verses 12-22 that the whole church came together this time also along with the apostles and elders.

Of this matter ( $\pi \varepsilon \rho$ tov $\lambda$ oүou tovtov). Same idiom in 8:21; 19:38. They realized the importance of the issue.

Acts 15:7
When there had been much questioning ( $\pi 0 \lambda \lambda \eta \varsigma \zeta \eta \tau \eta \sigma \varepsilon \omega \varsigma \gamma \varepsilon v o \mu \varepsilon v \eta \varsigma$ ). Genitive absolute with second aorist middle participle of $\gamma เ v o \mu \alpha$. Evidently the Judaizers were given full opportunity to air all their grievances and objections. They were allowed plenty of time and there was no effort to shut off debate or to rush anything through the meeting.

Peter rose up ( $\alpha v \alpha \sigma \tau \alpha \varsigma ~ П \varepsilon \tau \rho о \varsigma) . ~ T h e ~ w o n d e r ~ w a s ~ t h a t ~ h e ~ h a d ~ w a i t e d ~ s o ~ l o n g . ~ P r o b a b l y ~$ Paul asked him to do so. He was the usual spokesman for the apostles and his activities in Jerusalem were well-known. In particular his experience at Caesarea (Ac 10 ) had caused trouble here in Jerusalem from this very same party of the circumcism (Ac 11:1-18). It was fitting that Peter should speak. This is the last time that Peter appears in the Acts.

A good while ago ( $\alpha \varphi^{\prime} \eta \mu \varepsilon \rho \omega v \alpha \rho \chi \alpha \omega \nu v$ ). From ancient days. The adjective $\alpha \rho \chi \alpha \iota \rho$, is from $\alpha \rho \chi \eta$, beginning, and its actual age is a matter of relativity. So Mnason (Ac 21:16) is termed "an ancient disciple." It was probably a dozen years since God "made choice" ( $\varepsilon \xi \varepsilon \lambda \varepsilon \xi \alpha \alpha \tau)$ ) to speak by Peter's mouth to Cornelius and the other Gentiles in Caesarea. His point is that what Paul and Barnabas have reported is nothing new. The Judaizers made objection then as they are doing now.

Acts 15:8
Which knoweth the heart ( $\kappa \alpha \rho \delta ı \rho \nu \omega \sigma \tau \eta \varsigma)$. Late word from кар $\delta \iota \alpha$ (heart) and $\gamma \nu \omega \sigma \tau \eta \varsigma$ (known, $\gamma \iota \nu \omega \sigma \kappa \omega$ ). In the N.T. only here and 1:24 which see.

Giving them the Holy Spirit ( $\delta o v \varsigma ~ \tau о ~ \pi \nu \varepsilon v \mu \alpha ~ \tau о ~ a \gamma ı o v) . ~ A n d ~ b e f o r e ~ t h e i r ~ b a p t i s m . ~$ This was the Lord's doing. They had accepted (11:18) this witness of God then and it was true now of these other Gentile converts.

Acts 15:9
He made no distinction between us and them (ov $\theta \varepsilon v \delta \iota \varepsilon \kappa \rho \iota v \varepsilon \nu \mu \varepsilon \tau \alpha \xi v \eta \mu \omega \nu \tau \varepsilon \kappa \alpha$ $\alpha v \tau \omega \nu$ ). He distinguished nothing (first aorist active ind.) between (both $\delta \iota \alpha$ and $\mu \varepsilon \tau \alpha \xi v$ ) both ( $\tau \varepsilon \kappa \alpha$ ) us and them. In the matter of faith and conversion God treated us Jews as heathen and the heathen as Jews.

Cleansing their hearts by faith ( $\tau \eta \pi \iota \sigma \tau \varepsilon \kappa \alpha \theta \alpha \rho \iota \sigma \alpha \varsigma \tau \alpha \varsigma \kappa \alpha \rho \delta \iota \alpha \varsigma \alpha v \tau \omega v$ ). Not by works nor by ceremonies. Peter here has a thoroughly Pauline and Johannine idea of salvation for all both Jew and Greek. Cf. 10:15.

Acts 15:10
Why tempt ye God? ( $\tau \pi \varepsilon \iota \rho \zeta \varepsilon \tau \varepsilon \tau 0 \nu \theta \varepsilon o v ;$ ). By implying that God had made a mistake this time, though right about Cornelius. It is a home-thrust. They were refusing to follow the guidance of God like the Israelites at Massah and Meribah (Ex 17:7; De 6:16; 1Co 10:9 ).

That ye should put ( $\varepsilon \pi \iota \theta \varepsilon \iota v \alpha)$. Second aorist active infinitive of $\varepsilon \pi \iota \tau \iota \theta \eta \mu$, epexegetic, explaining the tempting.

A yoke upon the neck ( $\zeta \gamma \gamma \sigma v \pi \tau \sigma \nu \tau \rho a \chi \eta \lambda o v$ ). Familiar image of oxen with yokes upon the necks. Paul's very image for the yoke of bondage of the Mosaic law in Ga 5:1. It had probably been used in the private interview. Cf. the words of Jesus about the Pharisees (Mt 23:4) and how easy and light his own yoke is (Mt 11:30).

Were able to bear (เ $\sigma \chi \nu \sigma \alpha \mu \varepsilon \nu \beta \alpha \sigma \tau \alpha \sigma \alpha$ ). Neither our fathers nor we had strength $(\iota \chi \cup \omega)$ to carry this yoke which the Judaizers wish to put on the necks of the Gentiles. Peter speaks as the spiritual emancipator. He had been slow to see the meaning of God's dealings with him at Joppa and Caesarea, but he has seen clearly by now. He takes his stand boldly with Paul and Barnabas for Gentile freedom.

Acts 15:11
That we shall be saved $(\sigma \omega \theta \eta v \alpha)$. First aorist passive infinitive in indirect discourse after $\pi \iota \sigma \tau \varepsilon v o \mu \varepsilon \nu$. More exactly, "We believe that we are saved through the grace of the Lord Jesus in like manner as they also." This thoroughly Pauline note shows that whatever hopes the Judaizers had about Peter were false. His doctrine of grace is as clear as a bell. He has lifted his voice against salvation by ceremony and ritualism. It was a great deliverance.

Acts 15:12
Kept silence $(\varepsilon \sigma \iota \gamma \eta \sigma \varepsilon v)$. Ingressive first aorist active of $\sigma \iota \gamma \alpha \omega$, old verb, to hold one's peace. All the multitude became silent after Peter's speech and because of it.

Hearkened ( $\eta \kappa \circ v o v$ ). Imperfect active of $\alpha \kappa \circ v \omega$, descriptive of the rapt attention, were listening.

Unto Barnabas and Paul (Bapvaßака Паv入оv). Note placing Barnabas before Paul as in verse 25 , possibly because in Jerusalem Barnabas was still better known than Paul.

Rehearsing ( $\varepsilon \xi \eta \gamma \circ \cup \mu \varepsilon \nu \omega v$ ). Present middle participle of $\varepsilon \xi \eta \gamma \varepsilon o \mu \alpha$, old verb, to go through or lead out a narrative of events as in Lu 24:35; Ac 10:8 which see. Three times (14:27; 15:4,12 ) Paul is described as telling the facts about their mission work, facts more eloquent than argument (Page). One of the crying needs in the churches is fuller knowledge of the facts of mission work and progress with enough detail to give life and interest. The signs and wonders which God had wrought among the Gentiles set the seal of approval on the work done through $(\delta \iota \alpha)$ Barnabas and Paul. This had been Peter's argument about Cornelius ( $11: 17$ ). This same verb ( $\varepsilon \xi \eta \gamma \eta \sigma \alpha \tau 0)$ is used by James in verse 14 referring to Peter's speech.

Acts 15:13
After they had held their peace ( $\mu \varepsilon \tau \alpha \tau 0 \sigma \iota \eta \sigma \alpha \alpha v \tau o v \varsigma)$. Literally, "after the becoming silent (ingressive aorist active of the articular infinitive) as to them (Barnabas and Paul, accusative of general reference)."

James answered ( $\alpha \pi \varepsilon \kappa \rho \iota \eta \mathrm{I} \alpha \kappa \omega \beta$ оऽ). First aorist passive (deponent) indicative. It was expected that James, as President of the Conference, would speak last. But he wisely waited to give every one an opportunity to speak. The challenge of the Judaizers called for an opinion from James. Furneaux thinks that he may have been elected one of the twelve to take the place of James the brother of John since Paul (Ga 1:19) calls him apostle. More likely he was asked to preside because of his great gifts and character as chief of the elders.

Acts 15:14
Hearken unto me (aкоvбатє $\mu \circ$ ). Usual appeal for attention. James was termed James the Just and was considered a representative of the Hebraic as opposed to the Hellenistic wing of the Jewish Christians (Ac 6:1). The Judaizers had doubtless counted on him as a champion of their view and did later wrongfully make use of his name against Peter at Antioch (Ga 2:12). There was instant attention when James began to speak.

Symeon $(\Sigma v \mu \varepsilon \omega v)$. The Aramaic form of Simon as in $2 \mathrm{Pe} 2: 1$. This little touch would show his affinities with the Jewish Christians (not the Judaizers). This Aramaic form is used also in $\operatorname{Lu} 2: 25,34$ of the old prophet in the temple. Possibly both forms (Symeon, Aramaic, and Simon, Greek) were current in Jerusalem.

How ( $\kappa \alpha \theta \omega \varsigma)$. Strictly, "according as," here like os in indirect discourse somewhat like the epexegetic or explanatory use in 3Jo 1:3.

First ( $\pi \rho \omega \tau \sigma v$ ). Told by Peter in verse 7. James notes, as Peter did, that this experience of Barnabas and Paul is not the beginning of work among the Gentiles.

Did visit ( $\varepsilon \pi \varepsilon \sigma \kappa \varepsilon \psi \alpha \tau o)$. First aorist middle indicative of $\varepsilon \pi \iota \sigma \kappa \varepsilon \pi \tau \circ \mu \alpha$, old verb to look upon, to look after, provide for. This same verb occurs in Jas 1:27 and is one of various points of similarity between this speech of James in Acts and the Epistle of James as shown
by Mayor in his Commentary on James. Somehow Luke may have obtained notes of these various addresses.

To take from the Gentiles a people for his name ( $\lambda \alpha \beta \varepsilon \tau v \xi \varepsilon \theta \nu \omega v \lambda \alpha o v \tau \omega$ ovo $\mu \alpha \tau$ $\alpha \cup \tau o v)$. Bengel calls this egregium paradoxon, a chosen people ( $\lambda \alpha o v$ ) out of the Gentiles $(\varepsilon \theta v \omega v)$. This is what is really involved in what took place at Caesarea at the hands of Peter and the campaign of Barnabas and Paul from Antioch. But such a claim of God's purpose called for proof from Scripture to convince Jews and this is precisely what James undertakes to give. This new Israel from among the Gentiles is one of Paul's great doctrines as set forth in Ga 3; Ro 9-11. Note the use of God's "name" here for "the Israel of God" (Ga 6:16 ).

Acts 15:15
To this agree ( $\tau 0 v \tau \omega \sigma \nu \mu \varphi \omega v o v \sigma \iota v$ ). Associative instrumental case ( $\tau 0 v \tau \omega$ ) after $\sigma \nu \mu \varphi \omega v o v \sigma \iota \nu$ (voice together with, symphony with, harmonize with), from $\sigma \nu \mu \varphi \omega v \varepsilon \omega$, old verb seen already in Mt 18:19; Lu 5:36; Ac 5:9 which see. James cites only Am 9:11,12 from the LXX as an example of "the words of the prophets" (o $\lambda о \gamma \sigma \tau \omega \nu \pi \rho \circ \varphi \eta \tau \omega \nu$ ) to which he refers on this point. The somewhat free quotation runs here through verses 16-18 of Ac 15 and is exceedingly pertinent. The Jewish rabbis often failed to understand the prophets as Jesus showed. The passage in Amos refers primarily to the restoration of the Davidic empire, but also the Messiah's Kingdom (the throne of David his father," Lu 1:32 ).

Acts 15:16
I will build again ( $\alpha \nu \circ \kappa \kappa \delta о \mu \eta \sigma \omega$ ). Here LXX has $\alpha v \alpha \sigma \tau \eta \sigma \omega$. Compound ( $\alpha v \alpha$, up or again) of o七кобо $\mu \varepsilon \omega$, the verb used by Jesus in Mt 16:18 of the general church or kingdom as here which see.

The tabernacle of David ( $\tau \eta \nu \sigma \kappa \eta \nu \eta \nu \Delta \alpha v \varepsilon \varepsilon \delta$ ), a poetical figure of the throne of David (2Sa 7:12 ) now "the fallen tent" ( $\tau \eta \nu \pi \varepsilon \pi \tau \omega \kappa v \iota \alpha \nu$ ), perfect active participle of $\pi \iota \pi \tau \omega$, state of completion.

The ruins thereof ( $\tau \alpha \kappa \alpha \tau \varepsilon \sigma \tau \rho \alpha \mu \mu \varepsilon v \alpha \alpha \nu \tau \eta \varsigma)$. Literally, "the ruined portions of it." Perfect passive participle of $\kappa \alpha \tau \alpha \sigma \tau \rho \varepsilon \varphi \omega$, to turn down. It is a desolate picture of the fallen, torn down tent of David.

I will let it up $(\alpha \vee o \rho \theta \omega \sigma \omega)$. Old verb from $\alpha v o \rho \theta o \omega(\alpha v \alpha$, o $\rho \theta o \varsigma)$, to set upright. See on Lu 3:13 of the old woman whose crooked back was set straight.

## Acts 15:17

That the residue of men may seek after the Lord (о $\tau \omega \varsigma \alpha \nu \varepsilon \kappa \zeta \eta \tau \eta \sigma \omega \sigma \iota \nu$ о ката入оьло $\tau \omega v \alpha v \theta \rho \omega \pi \omega v \tau 0 \nu \kappa v \rho \iota o v)$. The use of o $\pi \omega \varsigma$ with the subjunctive (effective aorist active) to express purpose is common enough and note $\alpha v$ for an additional tone of uncertainty. On the rarity of $\alpha \nu$ with o $\pi \omega \varsigma$ in the Koine see Robertson, Grammar, p. 986. Here the Gentiles are referred to. The Hebrew text is quite different, "that they may possess the remnant of Edom." Certainly the LXX suits best the point that James is making. But the closing words of this verse point definitely to the Gentiles both in the Hebrew and the LXX, "all the Gentiles"
( $\pi \alpha v \tau \alpha \tau \alpha \varepsilon \theta v \eta$ ). Another item of similarity between this speech and the Epistle of James is in the phrase "my name is called" ( $\varepsilon \pi\llcorner\kappa \varepsilon \kappa \lambda \eta \tau \alpha$ тo ovo $\mu \alpha \mu \circ v$ ) and Jas 2:7. The purpose of God, though future, is expressed by this perfect passive indicative $\varepsilon \pi \kappa \kappa \varepsilon \kappa \lambda \eta \tau \alpha$ from $\varepsilon \pi \iota-$ $\kappa \alpha \lambda \varepsilon \omega$, to call on. It is a Jewish way of speaking of those who worship God.

Acts 15:18
From the beginning of the world ( $\left.\alpha \pi^{\prime} \alpha \omega \omega v o \varsigma\right)$. Or, "from of old." James adds these words, perhaps with a reminiscence of Isa $45: 21$. His point is that this purpose of God, as set forth in Amos, is an old one. God has an Israel outside of and beyond the Jewish race, whom he will make his true "Israel" and so there is no occasion for surprise in the story of God's dealings with the Gentiles as told by Barnabas and Paul. God's eternal purpose of grace includes all who call upon his name in every land and people (Isa 2:1; Mic 4:1). This larger and richer purpose and plan of God was one of the mysteries which Paul will unfold in the future (Ro 16:25; Eph 3:9). James sees it clearly now. God is making it known ( $\pi$ ( $\omega \omega \nu$ тavta $\gamma \nu \omega \sigma \tau \alpha$ ), if they will only be willing to see and understand. It was a great deliverance that James had made and it exerted a profound influence on the assembly.

Acts 15:19
Wherefore ( $\delta ⿺ 0$ ). "Because of which," this plain purpose of God as shown by Amos and Isaiah.

My judgment is ( $\varepsilon \gamma \omega \kappa \rho \iota v \omega)$. Note expression of $\varepsilon \gamma \omega$.
I give my judgment . (E $\gamma \mathrm{o} \boldsymbol{\chi} \boldsymbol{\chi} v \sigma \varepsilon \circ$ ). James sums up the case as President of the Conference in a masterly fashion and with that consummate wisdom for which he is noted. It amounts to a resolution for the adoption by the assembly as happened (verse 33).

That we trouble not ( $\mu \eta \pi \alpha \rho \varepsilon v o \chi \lambda \varepsilon ı v$ ). Present active infinitive with $\mu \eta$ in an indirect command (Robertson, Grammar, p. 1046) of $\pi \alpha \rho \varepsilon v o \chi \lambda \varepsilon \omega$, a common late verb, occurring here alone in the N.T. This double compound ( $\pi \alpha \rho \alpha, \varepsilon v$ ) is from the old compound $\varepsilon v o \chi \lambda \varepsilon \omega$ ( $\varepsilon v$ and ox $\lambda$ o, , crowd, annoyance) seen in $\mathrm{Lu} 6: 18 ; \mathrm{Heb} 12: 15$, and means to cause trouble beside ( $\pi \alpha \rho \alpha$ ) one or in a matter. This is the general point of James which he explains further concerning "those who are turning from the Gentiles unto God," the very kind of people referred to in Amos.

Acts 15:20
But that we write unto them ( $\alpha \lambda \lambda \alpha \varepsilon \pi \prime \sigma \tau \varepsilon \lambda \alpha \alpha \cup \tau o เ \varsigma)$. By way of contrast ( $\alpha \lambda \lambda \alpha$ ). First aorist active infinitive of $\varepsilon \pi \iota \sigma \tau \varepsilon \lambda \lambda \omega$, old verb to send to one (message, letter, etc.). Our word $\varepsilon \pi \iota \sigma \tau \lambda \varepsilon(\varepsilon \pi \iota \sigma \tau 0 \lambda \eta$ as in verse 30 ) comes from this verb. In the N.T. only here, He 13:22, and possibly Ac 21:25.

That they abstain from ( $\tau 0 v \alpha \pi \varepsilon \chi \varepsilon \sigma \theta \alpha$ ). The genitive of the articular infinitive of purpose, present middle (direct) of $\alpha \pi \varepsilon \chi \omega$, old verb, to hold oneself back from. The best old MSS. do not have a $\alpha 0$, but the ablative is clear enough in what follows. James agrees with Peter in his support of Paul and Barnabas in their contention for Gentile freedom from the

Mosaic ceremonial law. The restrictions named by James affect the moral code that applies to all (idolatry, fornication, murder). Idolatry, fornication and murder were the outstanding sins of paganism then and now (Re 22:15). Harnack argues ably against the genuineness of the word $\pi v$ ıктov (strangled) which is absent from D Irenaeus, Tertullian, Cyprian. It is a nice point, though the best MSS. have it in accord with Le 17:10-16. The problem is whether the words were added because "blood" was understood as not "murder," but a reference to the Mosaic regulation or whether it was omitted to remove the ceremonial aspect and make it all moral and ethical. The Western text omits the word also in verse 29. But with the word retained here and in verse 29 the solution of James is not a compromise, though there is a wise concession to Jewish feeling.

Pollutions of idols ( $\alpha \lambda \iota \sigma \gamma \eta \mu \alpha \tau \omega v$ ). From $\alpha \lambda \iota \sigma \gamma \varepsilon \omega$ only in the LXX and this substantive nowhere else. The word refers to idolatrous practices (pollutions) and things sacrificed to idols ( $\varepsilon \delta \delta \omega \lambda u \theta \omega v$ ) in verse 29 , not to sacrificial meat sold in the market (1Co 10:27), a matter not referred to here. Cf. Le 17:1-9. All the four items in the position of James (accepting $\pi v$ וктои) are mentioned in Le 17,18 .

Acts 15:21
For Moses (M $M \omega \sigma \sigma \eta \zeta \gamma \alpha \rho$ ). A reason why these four necessary things (verse 28) are named. In every city are synagogues where rabbis proclaim (кпрvббоvта¢) these matters. Hence the Gentile Christians would be giving constant offence to neglect them. The only point where modern Christian sentiment would object would be about "things strangled" and "blood" in the sense of any blood left in the animals, though most Christians probably agree with the feeling of James in objecting to blood in the food. If "blood" is taken to be "murder," that difficulty vanishes. Moses will suffer no loss for these Gentile Christians are not adherents of Judaism.

Acts 15:22
Then it seemed good (To $\tau \varepsilon \varepsilon \delta \xi \xi v$ ). First aorist active indicative of $\delta$ ok $\varepsilon \omega$. A regular idiom at the beginning of decrees. This Eirenicon of James commended itself to the whole assembly. Apparently a vote was taken which was unanimous, the Judaizers probably not voting. The apostles and the elders ( $\tau$ оья $\alpha \pi о \sigma \tau о \lambda о \iota \varsigma ~ к а ~ т о ı \varsigma ~ \pi \rho \varepsilon \sigma \beta \nu \tau \varepsilon \rho о \iota, ~ a r t i c l e ~ w i t h ~ e a c h, ~$ dative case) probably all vocally expressed their position.

With the whole church ( $\sigma \cup v 0 \lambda \varepsilon \tau \eta \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha)$. Probably by acclamation. It was a great victory. But James was a practical leader and he did not stop with speeches and a vote.

To choose men out of their company ( $\varepsilon \kappa \lambda \varepsilon \zeta \alpha \mu \varepsilon v o u \varsigma \alpha v \delta \rho \alpha \varsigma \varepsilon \xi \alpha \cup \tau \omega v$ ). Accusative case, though dative just before (тoı a $\boldsymbol{\pi}$ обто入oı, etc.), of first aorist middle participle of $\varepsilon \kappa \lambda \varepsilon \gamma \omega$, to select. This loose case agreement appears also in $\gamma \rho \alpha \psi \alpha \nu \tau \varepsilon \varsigma$ in verse 23 and in MSS. in verse 25. It is a common thing in all Greek writers (Paul, for instance), especially in the papyri and in the Apocalypse of John.
 unless he is a brother of Joseph Barsabbas of 1:23, an early follower of Jesus. The other, Silas, is probably a shortened form of Silvanus ( $\Sigma$ idovavoc, 1 Pe 5:12 ), the companion of Paul in his second mission tour (Ac 15:32,41; 16:25 ).

Chief men ( $\eta \gamma o v \mu \varepsilon v o v \varsigma)$. Leaders, leading men (participle from $\eta \gamma \varepsilon \circ \mu \alpha$, to lead).
Acts 15:23
And they wrote ( $\gamma \rho \alpha \psi \alpha \nu \tau \varepsilon \varsigma)$. First aorist active participle of $\gamma \rho \alpha \varphi \omega$ and the nominative as if a principal verb $\varepsilon \pi \varepsilon \mu \psi \alpha v$ had been used instead of $\pi \varepsilon \mu \psi \alpha$, the first aorist active infinitive (anacoluthon). This committee of four (Judas, Silas, Barnabas, Paul) carried the letter which embodied the decision of the Conference. This letter is the writing out of the judgment of James and apparently written by him as the President.

The apostles and the elders, brethren (о $\alpha \pi о \sigma \tau о \lambda о ~ к \alpha ~ о ~ \pi \rho \varepsilon \sigma \beta \nu \tau \varepsilon \rho о ь, ~ \alpha \delta \varepsilon \lambda \varphi о) . ~ S o ~ t h e ~$ oldest and best MSS. without $\kappa \alpha$ (and) before "brethren." This punctuation is probably correct and not "elder brethren." The inquiry had been sent to the apostles and elders (verse 2) though the whole church joined in the welcome (verse 4) and in the decision (verse 22). The apostles and elders send the epistle, but call themselves "brothers to brothers," Fratres Fratibus Salutem. "The brothers" ( $\tau \boldsymbol{\iota} \boldsymbol{\alpha} \boldsymbol{\alpha} \varepsilon \lambda \varphi$ оья) addressed (dative case) are of the Gentiles $(\varepsilon \xi \varepsilon \theta v \omega v)$ and those in Antioch, Syria, and Cilicia, because they were immediately involved. But the decision of this Conference was meant for Gentile Christians everywhere ( 16:4).

Greeting (Xaıpsıv). The customary formula in the beginning of letters, the absolute infinitive (usually $\chi \alpha \iota \rho \varepsilon เ v$ ) with the nominative absolute also as in Jas 1:1; Ac 23:26 and innumerable papyri (Robertson, Grammar, pp. 1902f.).

Acts 15:24
Certain which went from us ( $\tau \tau v \varepsilon \varsigma \varepsilon \xi \hat{A} \eta \mu \hat{A} \omega v$, Aleph B omit $\varepsilon \xi \varepsilon \lambda \theta$ ov $\tau \varepsilon \varsigma)$ ). A direct blow at the Judaizers, put in delicate language (we heard Â$\eta \kappa о v \sigma \alpha \mu \varepsilon v$ ) as if only at Antioch ( $15: 1$ ), and not also in Jerusalem in open meeting ( $15: 5$ ).

Have troubled you with words ( $\varepsilon \tau \alpha \rho \alpha \xi \alpha \nu \nu \mu \alpha \varsigma \lambda о \gamma o \iota \varsigma)$. What a picture of turmoil in the church in Antioch, words, words, words. Aorist tense of the common verb tapa $\sigma \sigma \omega$, to

Subverting your souls ( $\alpha v \alpha \sigma \kappa \varepsilon v a \zeta о v \tau \varepsilon \varsigma \tau \alpha \varsigma \psi v \chi \alpha \varsigma \nu \mu \omega v$ ). Present active participle of avaбкะva $\zeta \omega$, old verb ( $\alpha v \alpha$ and $\sigma \kappa \varepsilon v o \varsigma$, baggage) to pack up baggage, to plunder, to ravage. Powerful picture of the havoc wrought by the Judaizers among the simple-minded Greek Christians in Antioch.

To whom we gave no commandment (oı̧ $o v \delta เ \varepsilon \sigma \tau \varepsilon ı \lambda \alpha \mu \varepsilon \theta \alpha$ ). First aorist middle indicative of $\delta \operatorname{ta\sigma } \tau \varepsilon \lambda \lambda \omega$, old verb to draw asunder, to distinguish, to set forth distinctly, to command. This is a flat disclaimer of the whole conduct of the Judaizers in Antioch and in Jerusalem, a complete repudiation of their effort to impose the Mosaic ceremonial law upon the Gentile Christians.

Acts 15:25
It seemed good unto us $(\varepsilon \delta o \xi \varepsilon v \eta \mu \nu v)$. See statement by Luke in verse 22, and now this definite decision is in the epistle itself. It is repeated in verse 28.

Having come to one accord ( $\gamma \varepsilon \nu \circ \mu \varepsilon v o \iota s, o \mu o \theta \nu \mu \alpha \delta o v$ ). On this adverb, common in Acts, see on $1: 14$. But $\gamma \varepsilon v o \mu \varepsilon v o ı s$ clearly means that the final unity was the result of the Conference (private and public talks). The Judaizers are here brushed to one side as the defeated disturbers that they really were who had lacked the courage to vote against the majority.

To choose out men and send them ( $\varepsilon \kappa \lambda \varepsilon \xi \alpha \mu \varepsilon v o \iota \varsigma ~ \alpha v \delta \rho \alpha \varsigma \pi \varepsilon \mu \psi \alpha$ A B L, though Aleph C D read $\varepsilon \kappa \lambda \varepsilon \xi \alpha \mu \varepsilon v o v s$ as in verse 22). Precisely the same idiom as in verse 22, "having chosen out to send."
 The verbal adjective $\alpha \gamma \alpha \pi \eta \tau$ oıs (common in the N.T.) definitely sets the seal of warm approval on Barnabas and Paul. Paul (Ga 2:9) confirms this by his statement concerning the right hand of fellowship given.

Acts 15:26
Have hazarded their lives ( $\pi \alpha \rho \alpha \delta \varepsilon \delta \omega \kappa \sigma \sigma \tau \alpha \varsigma \psi v \chi \alpha \varsigma \alpha v \tau \omega v$ ). Perfect active participle dative plural of $\pi \alpha \rho \alpha \delta \delta \omega \mu$, old word, to hand over to another, and with $\psi v \chi \alpha \varsigma$, to hand over to another their lives. The sufferings of Paul and Barnabas in Pisidia and Lycaonia were plainly well-known just as the story of Judson in Burmah is today. On the use of "name" here see on 3:6.

Acts 15:27
Who themselves also shall tell you the same things by word of mouth (ка $\alpha v \tau о ⿱ \varsigma 兀 \delta \alpha$ $\left.\lambda o \gamma o v a \pi \alpha \gamma \gamma \varepsilon \lambda \lambda \frac{v \tau \tau \alpha}{} \tau \alpha \alpha v \tau \alpha\right)$. Literally, "they themselves also by speech announcing the same things." The present participle, as here, sometimes is used like the future to express purpose as in 3:26 $\varepsilon \cup \lambda o \gamma o u v \tau \alpha$ after $\alpha \pi \varepsilon \sigma \tau \varepsilon \lambda \lambda \varepsilon v$ and so here $\alpha \pi \alpha \gamma \gamma \varepsilon \lambda \lambda o v \tau \alpha \varsigma$ after $\alpha \pi \varepsilon \sigma \tau \alpha \lambda \kappa \alpha \mu \varepsilon \nu$ (Robertson, Grammar, p. 1128). Judas and Silas are specifically endorsed (perfect active indicative of $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$ ) as bearers of the epistle who will also verbally confirm the contents of the letter.

Acts 15:28
To the Holy Spirit and to us ( $\tau \omega \pi v \varepsilon v \mu \alpha \tau \tau \omega \alpha \gamma \iota \omega \kappa \alpha \eta \mu \nu \nu)$. Dative case after $\varepsilon \delta o \xi \varepsilon v$ (third example, verses $22,25,28$ ). Definite claim that the church in this action had the guidance of the Holy Spirit. That fact was plain to the church from what had taken place in Caesarea and in this campaign of Paul and Barnabas (verse 8). Jesus had promised that the Holy Spirit would guide them into all truth (Joh 16:13 ). Even so the church deliberated carefully before deciding. What a blessing it would be if this were always true! But even so the Judaizers are only silenced for the present, not convinced and only waiting for a better day to start over again.

No greater burden ( $\mu \eta \delta \varepsilon v \pi \lambda \varepsilon o v \beta \alpha \rho o \varsigma)$. The restrictions named did constitute some burden (cf. Mt 20:12 ), for the old word $\beta$ apos means weight or heaviness. Morality itself is a restraint upon one's impulses as is all law a prohibition against license.

Acts 15:29
Than these necessary things ( $\pi \lambda \eta \nu \tau 0 v \tau \omega \nu \tau \omega \nu \varepsilon \pi \alpha v \alpha \gamma \kappa \varepsilon \varsigma)$. This old adverb (from $\varepsilon \pi$ and $\alpha v a \gamma \kappa \eta$ ) means on compulsion, of necessity. Here only in the N.T. For discussion of these items see on verses 20,21. In comparison with the freedom won this "burden" is light and not to be regarded as a compromise in spite of the arguments of Lightfoot and Ramsay. It was such a concession as any converted Gentile would be glad to make even if "things strangled" be included. This "necessity" was not a matter of salvation but only for fellowship between Jews and Gentiles. The Judaizers made the law of Moses essential to salvation ( 15:16).

It shall be well with you ( $\varepsilon v \pi \rho \alpha \xi \varepsilon \tau \varepsilon$ ). Ye shall fare well. A classical idiom used here effectively. The peace and concord in the fellowship of Jews and Gentiles will justify any slight concession on the part of the Gentiles. This letter is not laid down as a law, but it is the judgment of the Jerusalem Christians for the guidance of the Gentiles ( $16: 4$ ) and it had a fine effect at once ( $15: 30-35$ ). Trouble did come later from the Judaizers who were really hostile to the agreement in Jerusalem, but that opposition in no way discredits the worth of the work of this Conference. No sane agreement will silence perpetual and professional disturbers like these Judaizers who will seek to unsettle Paul's work in Antioch, in Corinth, in Galatia, in Jerusalem, in Rome.

Fare ye well (E $\rho \rho \omega \sigma \theta \varepsilon$ ). Valete. Perfect passive imperative of $\rho \omega v \nu v \mu$, to make strong. Common at the close of letters. Be made strong, keep well, fare well. Here alone in the N.T. though some MSS. have it in 23:30.

Acts 15:30
So they (o $\mu \varepsilon v$ ouv). As in verse 3 .
When they were dismissed ( $\alpha \pi 0 \lambda \nu \theta \varepsilon v \tau \varepsilon \varsigma)$. First aorist passive participle of $\alpha \pi \sigma \lambda \nu \omega$, common verb to loosen, to dismiss. Possibly (Hackett) religious services were held as in verse 33 (cf. 13:3) and perhaps an escort for part of the way as in verse 3.

The multitude ( $\tau \mathrm{o} \pi \lambda \eta \theta$ oc). Public meeting of the church as in verses 1-3. Deissmann (Bible Studies, p. 232) gives illustrations from the inscriptions of the use of $\pi \lambda \eta \theta$ oc for official, political, and religious gatherings. The committee formally "delivered" ( $\varepsilon \pi \varepsilon \delta \omega \kappa \alpha v$ ) the epistle to the church authorities.

Acts 15:31
When they had read it ( $\alpha v \alpha \gamma v o v \tau \varepsilon \varsigma)$. Second aorist active participle of $\alpha v \alpha \gamma \iota \nu \omega \sigma \kappa \omega$. Public reading, of course, to the church.

They rejoiced ( $\varepsilon \chi \propto \rho \eta \sigma \alpha \nu$ ). Second aorist (ingressive) passive indicative of $\chi \alpha!\rho \omega$. They burst into exultant joy showing clearly that they did not consider it a weak compromise, but a glorious victory of Gentile liberty.

For the consolation ( $\varepsilon \pi \tau \eta \pi \alpha \rho \alpha \kappa \lambda \eta \sigma \varepsilon$ ). The encouragement, the cheer in the letter. See $\pi \alpha \rho \varepsilon \kappa \alpha \lambda \varepsilon \sigma \alpha v$ in verse 32. Consolation and exhortation run into one another in this word.

Acts 15:32
Being themselves also prophets ( $\kappa \alpha \alpha \cup \tau о ~ \pi \rho о \varphi \eta \tau \alpha ~ о v \tau \varepsilon \varsigma)$. As well as Paul and Barnabas and like Agabus ( 11:27-30), for-speakers for Christ who justify the commendation in the letter (verse 27) "with many words" ( $\delta$ ı $\lambda$ 入oүov $\pi \mathbf{\pi} \lambda \lambda \mathrm{ov}$ ), "with much talk," and no doubt with kindly words concerning the part played at the Conference by Paul and Barnabas.

Confirmed ( $\varepsilon \pi \varepsilon \sigma \tau \eta \rho \iota \xi \alpha v)$. See on 14:22. It was a glorious time with no Judaizers to disturb their fellowship as in 1-3.

Acts 15:33
Some time ( $\chi$ роvov). Accusative after $\pi$ 位 $\eta \alpha \nu \tau \varepsilon \varsigma$, "having done time." How long we do not know.

Acts 15:34
But it seemed good unto Silas to abide there ( $\varepsilon \delta o \xi \varepsilon \delta \varepsilon \Sigma i \lambda \alpha \varepsilon \pi \pi \mu \varepsilon ı v \alpha \alpha \nu \tau o v)$. This verse is not in the Revised Version or in the text of Westcott and Hort, being absent from Aleph A B Vulgate, etc. It is clearly an addition to help explain the fact that Silas is back in Antioch in verse 40. But the "some days" of verse 36 afforded abundant time for him to return from Jerusalem. He and Judas went first to Jerusalem to make a report of their mission.

Acts 15:35
Tarried ( $\delta \iota \varepsilon \tau \rho \iota \beta o v$ ). Imperfect active of $\delta \iota \alpha \tau \rho \iota \beta \omega$, old verb to pass time, seen already in 12:19; 14:3,28.

With many others also ( $\mu \varepsilon \tau \alpha \kappa \alpha \varepsilon \tau \varepsilon \rho \omega v \pi \sigma \lambda \lambda \omega v$ ). A time of general revival and naturally so after the victory at Jerusalem. It is at this point that it is probable that the sad incident took place told by Paul in Ga 2:11-21. Peter came up to see how things were going in Antioch after Paul's victory in Jerusalem. At first Peter mingled freely with the Greek Christians without the compunctions shown at Caesarea and for which he had to answer in Jerusalem (Ac 11:1-18). Rumours of Peter's conduct reached Jerusalem and the Judaizers saw a chance to reopen the controversy on the line of social customs, a matter not passed on at the Jerusalem Conference. These Judaizers threaten Peter with a new trial and he surrenders and is followed by Barnabas and all the Jewish brethren in Antioch to the dismay of Paul who boldly rebuked Peter and Barnabas and won them back to his view. It was a crisis. Some would even date the Epistle to the Galatians at this time also, an unlikely hypothesis.

Acts 15:36

Let us return now and visit the brethren ( $\varepsilon \pi\llcorner\sigma \tau \rho \varepsilon \psi \alpha \nu \tau \varepsilon \varsigma \delta \varepsilon \varepsilon \pi\lrcorner \sigma \kappa \varepsilon \psi \omega \mu \varepsilon \theta \alpha$ touc $\alpha \delta \varepsilon \lambda \varphi o u \varsigma)$. Paul takes the initiative as the leader, all the more so if the rebuke to Peter and Barnabas in Ga 2:11-21 had already taken place. Paul is anxious, like a true missionary, to go back to the fields where he has planted the gospel. He uses the hortatory subjunctive ( $\varepsilon \pi \iota \sigma \kappa \varepsilon \psi \omega \mu \varepsilon \theta \alpha$ ) for the proposal (see on 15:14 for this verb). Note the repeated $\varepsilon \pi$ ( $\varepsilon \pi ⿺-$ $\sigma \tau \rho \varepsilon \psi \alpha \nu \tau \varepsilon \varsigma$ and $\varepsilon \pi \iota \sigma \kappa \varepsilon \psi \omega \mu \varepsilon \theta \alpha$ ). There is special point in the use of $\delta \eta$ (shortened form of $\eta \delta \eta$ ), now at this juncture of affairs (cf. 13:2).

How they fare ( $\pi \omega \varsigma$ exovoiv). Indirect question, "how they have it." The precariousness of the life of new converts in pagan lands is shown in all of Paul's Epistles (Furneaux). So he wanted to go city by city ( $\kappa \alpha \tau \alpha$ по $\lambda \iota v ~ \pi \alpha \sigma \alpha v) . ~$

Acts 15:37
Was minded to take with them ( $\varepsilon \beta \frac{u \lambda \varepsilon \tau \%}{} \sigma v v \pi \alpha \rho \alpha \lambda \alpha \beta \varepsilon เ v$ ). Imperfect middle
 and stuck to it (imperfect tense). $\Sigma v v \pi \alpha \rho \alpha \lambda \alpha \beta \varepsilon เ v$ is second aorist active infinitive of the double compound $\sigma v v \pi \alpha \rho \alpha \lambda \alpha \mu \beta \alpha v \omega$, old verb to take along together with, used already about John Mark in 12:25 and by Paul in Ga 2:1 about Titus. Nowhere else in the N.T. Barnabas used the ingressive aorist in his suggestion.

Acts 15:38
 toutov). The Greek is far more effective than this English rendering. It is the imperfect active of $\alpha \xi_{\iota} \omega$, old verb to think meet or right and the present active infinitive of the same verb ( $\sigma v \pi \alpha \alpha \rho \lambda \alpha \mu \beta \alpha v \omega$ ) with negative used with this infinitive. Literally, "But Paul kept on deeming it wise not to be taking along with them this one." Barnabas looked on it as a simple punctiliar proposal (aorist infinitive), but Paul felt a lively realization of the problem of having a quitter on his hands (present infinitive). Each was insistent in his position (two imperfects). Paul had a definite reason for his view describing John Mark as "him who withdrew from them from Pamphylia" ( $\tau$ оv $\left.\alpha \pi о \sigma \tau \alpha v \tau \alpha \alpha \pi^{\prime} \alpha \nu \tau \omega v \alpha \pi о ~ П \alpha \mu \varphi \nu \lambda ı \alpha \varsigma\right) . ~ S e c o n d ~$ aorist active articular participle of $\alpha \varphi \iota \sigma \tau \eta \mu$, intransitive use, "the one who stood off from, apostatized from" (our very word "apostasy"). And also as the one who "went not with them
 task that Paul and Barnabas did, but he flinched and flickered and quit. Paul declined to repeat the experiment with Mark.

Acts 15:39
A sharp contention ( $\pi \alpha \rho \circ \xi v \sigma \mu \circ \varsigma)$. Our very word paroxysm in English. Old word though only twice in the N.T. (here and Heb 10:24), from $\pi \alpha \rho \circ \xi v v \omega$, to sharpen ( $\pi \alpha \rho \alpha$, $\circ \xi v c)$ as of a blade and of the spirit (Ac 17:16; 1Co 13:5). This "son of consolation" loses his temper in a dispute over his cousin and Paul uses sharp words towards his benefactor and friend. It is often so that the little irritations of life give occasion to violent explosions. If the
incident in Ga 2:11-21 had already taken place, there was a sore place already that could be easily rubbed. And if Mark also joined with Peter and Barnabas on that occasion, Paul had fresh ground for irritation about him. But there is no way to settle differences about men and we can only agree to disagree as Paul and Barnabas did.

So that they parted asunder from one another ( $\omega \sigma \tau \varepsilon \alpha \pi \sigma \chi \omega \rho \circ \sigma \theta \eta v \alpha a \cup \tau o v, ~ a \pi$ ' $\alpha \lambda \lambda \eta \lambda \omega v)$. Actual result here stated by $\omega \sigma \tau \varepsilon$ and the first aorist passive infinitive of $\alpha \pi \sigma \chi \omega \rho!\zeta \omega$, old verb to sever, to separate, here only and Re 6:4 in the N.T. The accusative of general reference (autouc) is normal. For construction with $\omega \sigma \tau \varepsilon$ see Robertson, Grammar, pp. 999f.

And Barnabas took Mark with him and sailed away to Cyprus ( $\tau \circ v \tau \varepsilon$ B $\alpha \rho v \alpha \beta \alpha$
 $\omega \sigma \tau \varepsilon$ connected by $\tau \varepsilon$. The same participle is used here minus $\sigma \cup v, \pi \alpha \rho \alpha \lambda \alpha \beta o \nu \tau \alpha$ (second aorist active). Barnabas and Mark sailed out ( $\varepsilon \kappa \pi \lambda \varepsilon v \sigma \alpha$ from $\varepsilon \kappa \pi \lambda \varepsilon \omega$ ) from the harbour of Antioch. This is the last glimpse that Luke gives us of Barnabas, one of the noblest figures in the New Testament. Paul has a kindly reference to him in 1Co 9:6. No one can rightly blame Barnabas for giving his cousin John Mark a second chance nor Paul for fearing to risk him again. One's judgment may go with Paul, but one's heart goes with Barnabas. And Mark made good with Barnabas, with Peter (1Pe 5:13) and finally with Paul (Col 4:10; 2Ti 4:11). See my little book on John Mark (Making Good in the Ministry). Paul and Barnabas parted in anger and both in sorrow. Paul owed more to Barnabas than to any other man. Barnabas was leaving the greatest spirit of the time and of all times.

Acts 15:40
Chose ( $\varepsilon \pi \wedge \lambda \varepsilon \xi \alpha \mu \varepsilon v o \varsigma)$. First aorist middle (indirect) participle of $\varepsilon \pi \iota \lambda \varepsilon \gamma \omega$, choosing for himself, as the successor of Barnabas, not of Mark who had no place in Paul's plans at this time.

Commended ( $\pi \alpha \rho \alpha \delta o \theta \varepsilon \iota \varsigma)$. First aorist passive of $\pi \alpha \rho \alpha \delta \iota \delta \omega \mu$, the same verb employed about Paul and Barnabas ( $14: 26$ ) on their return from the first tour. It is clear now that the sympathy of the church at Antioch is with Paul rather than with Barnabas in the cleavage that has come. The church probably recalled how in the pinch Barnabas flickered and went to the side of Peter and that it was Paul who for the moment stood Paulus contra mundum for Gentile liberty in Christ against the threat of the Judaizers from Jerusalem. Silas had influence in the church in Jerusalem (verse 22) and was apparently a Roman citizen (16:37) also. He is the Silas or Silvanus of the epistles (1Th 1:1; 2Th 1:1; 2Co 1:19; 1Pe 5:12). It is remarkable that Peter mentions both Mark and Silas as with him (1Pe 5:12f.) at the same time.

Acts 15:41
Went through ( $\delta ı \eta \rho \chi \varepsilon \tau 0)$. Imperfect middle. So Paul went forth on his second mission tour with heart-aches and high hopes mingled together.

Syria and Cilicia ( $\tau \eta \nu \sum v \rho ı \alpha \nu \kappa \alpha \tau \eta \nu K ı \lambda \iota \kappa \iota \alpha v$ ). He took the opposite course from the first tour, leaving Cyprus to Barnabas and Mark. Probably Paul had established these churches while in Tarsus after leaving Jerusalem (Ac 9:30; Ga 1:21). Paul would go "by the Gulf of Issus through the Syrian Gates, a narrow road between steep rocks and the sea, and then inland, probably past Tarsus and over Mt. Taurus by the Cilician gates" (Page). This second tour will occupy Luke's story in Acts through 18:22.

## Acts 16

Acts 16:1
And he came also to Derbe and Lystra ( $\kappa \alpha \tau \eta \nu \tau \eta \sigma \varepsilon v \delta \varepsilon \kappa \alpha \varepsilon ı \varsigma \Delta \varepsilon \rho \beta \eta v \kappa \alpha \varepsilon \iota \varsigma \Lambda v \sigma \tau \rho \alpha v)$. First aorist active of katav $\tau \alpha \omega$, late verb to come down to, to arrive at. He struck Derbe first of the places in the first tour which was the last city reached then.

Timothy (T $\mu \mathrm{\mu} \boldsymbol{\theta} \boldsymbol{\varepsilon} \boldsymbol{\varepsilon} \varsigma)$. Apparently a native of Lystra ("there," $\varepsilon \kappa \varepsilon$ ), his Hebrew mother named Eunice and grandmother Lois (2Ti 1:5) and his Greek father's name not known. He may have been a proselyte, but not necessarily so as Timothy was taught the Scriptures by his mother and grandmother (2Ti 3:15), and, if a proselyte, he would have had Timothy circumcised. It is idle to ask if Paul came on purpose to get Timothy to take Mark's place. Probably Timothy was about eighteen years of age, a convert of Paul's former visit a few years before ( $1 \mathrm{Ti} 1: 2$ ) and still young twelve years later (1Ti 4:12). Paul loved him devotedly (1Ti 1:3; 5:23; 2Ti 3:15; Php 2:19f. ). It is a glorious discovery to find a real young preacher for Christ's work.

Acts 16:2
Was well reported of ( $\varepsilon \mu \alpha \rho \tau v \rho \varepsilon i \tau o$ ). Imperfect passive. It was a continuous witness that was borne the young disciple both in his home town of Lystra and in Derbe. Already he had so borne himself that his gifts and graces for the ministry were recognized. It is a wise precaution that the approval of the local church is necessary for the licensing and the ordaining of a preacher. If God has called a man for the work signs of it will be manifest to others.

Acts 16:3
Him would Paul have to go forth with him ( $\tau 0 \cup \tau o v ~ \eta \theta \varepsilon \lambda \eta \sigma \varepsilon v$ o Пau入os $\sigma u v$ aut $\omega$ $\varepsilon \xi \varepsilon \lambda \theta \varepsilon ı v)$. This one (note emphatic position) Paul wanted (first aorist active indicative of $\theta \varepsilon \lambda \omega$ with temporal augment as if from $\varepsilon \theta \varepsilon \lambda \omega$ the old form). Here was a gifted young man who was both Jew and Greek.

He took and circumcised him ( $\lambda \alpha \beta \omega v \pi \varepsilon \rho \iota \varepsilon \tau \varepsilon \mu \varepsilon v a v \tau o v$ ). Any one could perform this rite. Paul had stoutly resisted circumcision in the case of Titus, a pure Greek (Ga 2:3,5), because the whole principle of Gentile liberty was at stake. But Timothy was both Jew and Greek and would continually give offence to the Jews with no advantage to the cause of Gentile freedom. So here for the sake of expediency, "because of the Jews" ( $\delta$ ı $\alpha$ tovs Iovסaıov¢), Paul voluntarily removed this stumbling-block to the ministry of Timothy. Otherwise Timothy could not have been allowed to preach $\ln$ the synagogues. Idem non est semper idem. But Timothy's case was not the case of Titus. Here it was a question of efficient service, not an essential of salvation. Hovey notes that Timothy was circumcised because of Jewish unbelievers, not because of Jewish believers.

Was a Greek (H $\Sigma \lambda \lambda \eta \nu v \pi \eta \rho \rho \chi \varepsilon v)$. Imperfect active in indirect assertion where ordinarily the present $v \pi \alpha \rho \chi \varepsilon$ would be retained, possibly indicating that his father was no longer living.

Acts 16:4
They delivered them ( $\pi \alpha \rho \varepsilon \delta \iota \delta o \sigma \alpha v$ avtoıऽ). Imperfect active, kept on delivering to them in city after city. This is a proof of Paul's loyalty to the Jerusalem compact (Knowling). The circumcision of Timothy would indicate also that the points involved were under discussion and that Paul felt no inconsistency in what he did.

The decrees ( $\tau \alpha \delta о \gamma \mu \alpha \tau \alpha$ ). Old word from $\delta$ ок $\omega$, to give an opinion. It is used of public decrees of rulers (Lu 2:1; Ac 17:7), of the requirements of the Mosaic law (Col 2:14 ), and here of the regulations or conclusions of the Jerusalem Conference. Silas was with Paul and his presence gave added dignity to the passing out of the decrees, a charter of Gentile freedom, since he was one of the committee from Jerusalem to Antioch (15:22,27,32 ).

Which had been ordained ( $\tau \alpha \kappa \varepsilon \kappa \rho\lrcorner \mu \varepsilon v \alpha)$. Perfect passive articular participle of $\kappa \rho ı v \omega$, to judge, emphasizing the permanence of the conclusions reached by the apostles and elders in Jerusalem.

For to keep ( $\varphi \cup \lambda \alpha \sigma \sigma \varepsilon เ v)$. This present active infinitive likewise accents that it is a charter of liberty for continual living, not a temporary compromise.

Acts 16:5
Were strengthened ( $\varepsilon \sigma \tau \varepsilon \rho \varepsilon o u v \tau 0$ ). Imperfect passive of $\sigma \tau \varepsilon \rho \varepsilon \sigma \omega$, old verb to make firm and solid like the muscles (Ac 3:7,16 ), these three the only examples in the N.T.

Increased ( $\varepsilon \pi \varepsilon \rho \circ \sigma \sigma \varepsilon v o v)$. Imperfect active of the old and common verb $\pi \varepsilon \rho \iota \sigma \sigma \varepsilon v \omega$ from $\pi \varepsilon \rho \iota \sigma \sigma \circ \varsigma$ (overplus). The blessing of God was on the work of Paul, Silas, and Timothy in the form of a continuous revival.

Acts 16:6
The region of Phrygia and Galatia ( $\tau \eta \nu \Phi \rho v \gamma \iota \alpha v \kappa \alpha\lceil\alpha \lambda \alpha \tau \iota \kappa \eta \nu \chi \omega \rho \alpha \nu$ ). This is probably the correct text with one article and apparently describes one "Region" or District in The Province of Galatia which was also Phrygian (the old-ethnographic name with which compare the use of Lycaonia in 14:6). Strictly speaking Derbe and Lystra, though in the Province of Galatia, were not Phrygian, and so Luke would here be not resumptive of the record in verses 1-5; but a reference to the country around Iconium and Antioch in Pisidia in North Galatia is not included. This verse is hotly disputed at every point by the advocates of the North Galatian theory as represented by Chase and the South Galatian theory by Ramsay. Whatever is true in regard to the language of Luke here and in 18:23, it is still possible for Paul in Ga 1:2 to use the term Galatia of the whole province of that name which could, in fact, apply to either South or North Galatia or to both. He could, of course, use it also in the ethnographic sense of the real Gauls or Celts who dwelt in North Galatia. Certainly the first tour of Paul and Barnabas was in the Province of Galatia though touching only the Regions
of Pisidia, Phrygia, and Lycaonia, which province included besides the Gauls to the north. In this second tour Lycaonia has been already touched (Derbe and Lystra) and now Phrygia. The question arises why Luke here and in 18:23 adds the term "of Galatia" (Га入а兀ıкпv) though not in 13:14 (Pisidian Antioch) nor in 14:6 (cities of Lycaonia). Does Luke mean to use "of Galatia" in the same ethnographic sense as "of Phrygia" or does he here add the province (Galatia) to the name of the Region (Phrygia)? In itself either view is possible and it really matters very little except that the question is raised whether Paul went into the North Galatian Region on this occasion or later (18:23). He could have done so and the Epistle be addressed to the churches of South Galatia, North Galatia, or the province as a whole. But the Greek participle $\kappa \omega \lambda \nu \theta \varepsilon v \tau \varepsilon \varsigma$ ("having been forbidden") plays a part in the argument that cannot be overlooked whether Luke means to say that Paul went north or not. This aorist passive participle of $\kappa \omega \lambda \nu \omega$, to hinder, can only express simultaneous or antecedent action, not subsequent action as Ramsay argues. No example of the so-called subsequent use of the aorist participle has ever been found in Greek as all Greek grammarians agree (Robertson, Grammar, pp. 860-63, 1112-14). The only natural meaning of $\kappa \omega \lambda \nu \theta \varepsilon v \tau \varepsilon$, is that Paul with Silas and Timothy "passed through the region of Phrygia and Galatia" because they were hindered by the Holy Spirit from speaking the word in Asia (the Province of Asia of which Ephesus was the chief city and west of Derbe and Lystra). This construction implies that the country called "the region of Phrygia and Galatia" is not in the direct line west toward Ephesus. What follows in verse 7 throws further light on the point.

Acts 16:7
Over against Mysia ( $\kappa \alpha \tau \alpha \tau \eta \nu$ Mvбıav). This was an ill-defined region rather north and west of Phrygia. The Romans finally absorbed most of it in the Province of Asia.
 imperfect of $\pi \varepsilon เ \rho \alpha \zeta \omega$ and ingressive aorist passive infinitive of $\pi о \rho \varepsilon v o \mu \alpha$. Now Bithynia is northeast of Mysia and north of Galatia (province). Clearly Luke means to say that Paul had, when hindered by the Holy Spirit from going west into Asia, gone north so as to come in front of Bithynia. This journey would take him directly through Phrygia and the North Galatian country (the real Gauls or Celts). This is, to my mind, the strongest argument for the North Galatian view in these verses 6,7 . The grammar and the topography bring Paul right up to Bithynia (north of the old Galatia). It is verses 6,7 that make me pause before accepting the plausible arguments of Ramsay for the South Galatian theory. In itself the problem is nothing like so important or so determinative as he makes it. But shall we smash Luke's grammar to pieces to bolster up a theory of criticism?
 The same Spirit who in verse 6 had forbidden going into Asia now closed the door into Bithynia. This expression occurs nowhere else, but we have the spirit of Christ (Ro 8:9) and
the Spirit of Jesus Christ (Php 1:19). Eı $\alpha \sigma \varepsilon v$ is first aorist active indicative of $\varepsilon \alpha \omega$, old verb to allow.

## Acts 16:8

Passing by Mysia ( $\pi \alpha \rho \varepsilon \lambda \theta o v \tau \varepsilon \varsigma \tau \eta \nu$ Mvoıav). Literally, passing alongside or skirting Mysia, neglecting it without preaching there. Strictly they passed through part of it to reach Troas.

To Troas ( $\varepsilon \iota \varsigma ~ T \rho o \iota \alpha \delta \alpha$ ). This city, named Alexandria Troas after Alexander the Great, was the seaport of Mysia, though a Roman colony and not counted as part of either Asia or Bithynia. New Ilium, on the site of the old Troy, was four miles farther north. It was the place to take ship for Philippi. Twice again Paul will be here (2Co 2:12; Ac 20:6 ).

Acts 16:9
A vision (o $\rho \alpha \mu \alpha)$. Old word, eleven times in Acts, once in Mt 17:9. Twice Paul had been hindered by the Holy Spirit from going where he wanted to go. Most men would have gone back home with such rebuffs, but not so Paul. Now the call is positive and not negative, to go "far hence to the Gentiles" ( $22: 21$ ). He had little dreamed of such a call when he left Antioch. Paul's frequent visions always came at real crises in his life.

A man of Macedonia ( $\alpha \nu \eta \rho$ M $\alpha \kappa \varepsilon \delta \omega v$ ). Ramsay follows Renan in the view that this was Luke with whom Paul had conversed about conditions in Macedonia. Verse 10 makes it plain that Luke was now in the party, but when he joined them we do not know. Some hold that Luke lived at Antioch in Syria and came on with Paul and Silas, others that he joined them later in Galatia, others that he appeared now either as Paul's physician or new convert. Ramsay thinks that Philippi was his home at this time. But, whatever is true about Luke, the narrative must not be robbed of its supernatural aspect (10:10; 22:17).

Was standing $(\eta \nu \varepsilon \sigma \tau \omega \varsigma)$. Second perfect active participle of $\tau \sigma \tau \eta \mu$, intransitive, periphrastic imperfect. Vivid picture.

Help us $(\beta \circ \eta \theta \eta \sigma o v \eta \mu i v)$. Ingressive first aorist active imperative of $\beta \circ \eta \theta \varepsilon \omega(\beta \circ \eta, \theta \varepsilon \omega)$, to run at a cry, to help. The man uses the plural for all including himself. It was the cry of Europe for Christ.

Acts 16:10
We sought ( $\varepsilon \zeta \eta \tau \eta \sigma \alpha \mu \varepsilon v$ ). This sudden use of the plural, dropped in 17:1 when Paul leaves Philippi, and resumed in 20:5 when Paul rejoins Luke in Philippi, argues conclusively that Luke, the author, is in the party ("we" portions of Acts) and shows in a writer of such literary skill as Luke that he is not copying a document in a blundering sort of way. Paul told his vision to the party and they were all ready to respond to the call.

Concluding ( $\sigma v \vee \beta \curlywedge \beta \alpha \zeta o v \tau \varepsilon \varsigma)$. A very striking word, present active participle of $\sigma v v \beta ı \beta a \zeta \omega$, old verb to make go together, to coalesce or knit together, to make this and that agree and so to conclude. Already in 9:22 of Paul's preaching. This word here gives a good illustration of the proper use of the reason in connection with revelation, to decide whether
it is a revelation from God, to find out what it means for us, and to see that we obey the revelation when understood. God had called them to preach to the Macedonians. They had to go.

Acts 16:11
Setting sail ( $\alpha v \alpha \chi \theta \varepsilon v \tau \varepsilon \varsigma)$. Same word in 13:13 which see.
We made a straight course ( $\varepsilon v \theta v \delta \rho o \mu \eta \sigma \alpha \mu \varepsilon v)$. First aorist active indicative of compound verb $\varepsilon v \theta v \delta \rho о \mu \varepsilon \omega$ (in Philo) from adjective $\varepsilon v \theta v \delta \rho o \mu \circ \varsigma$ (in Strabo), running a straight course ( $\varepsilon v \theta v \sigma, \delta \rho o \mu \circ \varsigma)$. In the N.T. only here and 21:1. It is a nautical term for sailing before the wind. Luke has a true feeling for the sea.

To Samothrace ( $\varepsilon \varsigma \Sigma \Omega \mu$ ораıкŋv). A small island in the Aegean about halfway between Troas and Neapolis.

The day following ( $\tau \eta \varepsilon \pi \ldots \circ \sigma \sigma \eta$ ). Locative case of time with $\eta \mu \varepsilon \rho \alpha$ (day) to be supplied (7:26;20:15; $21: 18 ; 23: 11$ ). With adverse winds it took five days to make the run of 125 miles ( 20:6).

To Neapolis ( $\varepsilon \iota \varsigma \varepsilon a v$ Mo $\lambda ı v$ ). To New Town (Newton, Naples, Neapolis). The port of Philippi ten miles distant, Thracian, but reckoned as Macedonian after Vespasian.

Acts 16:12
To Philippi ( $\varepsilon \iota \varsigma ~ Ф ı \wedge л \pi \sigma \cup \varsigma)$. The plural like $A \theta \eta v a$ (Athens) is probably due to separate sections of the city united (Winer-Moulton, Grammar, p. 220). The city (ancient name Krenides or Wells) was renamed after himself by Philip, the father of Alexander the Great. It was situated about a mile east of the small stream Gangites which flows into the river Strymon some thirty miles away. In this valley the Battle of Philippi was fought B.C. 42 between the Second Triumvirate (Octavius, Antonius, Lepidus) and Brutus and Cassius. In memory of the victory Octavius made it a colony ( $\kappa 0 \lambda \omega \nu / \alpha$ ) with all the privileges of Roman citizenship, such as freedom from scourging, freedom from arrest save in extreme cases, and the right of appeal to the emperor. This Latin word occurs here alone in the N.T. Octavius planted here a colony of Roman veterans with farms attached, a military outpost and a miniature of Rome itself. The language was Latin. Here Paul is face to face with the Roman power and empire in a new sense. He was a new Alexander, come from Asia to conquer Europe for Christ, a new Caesar to build the Kingdom of Christ on the work of Alexander and Caesar. One need not think that Paul was conscious of all that was involved in destiny for the world. Philippi was on the Egnatian Way, one of the great Roman roads, that ran from here to Dyrrachium on the shores of the Adriatic, a road that linked the east with the west.

The first of the district ( $\pi \rho \omega \tau \eta \tau \eta \varsigma \mu \varepsilon \rho เ \delta o \varsigma)$. Philippi was not the first city of Macedonia nor does Luke say so. That honour belonged to Thessalonica and even Amphipolis was larger than Philippi. It is not clear whether by $\mu \varepsilon \rho ı \varsigma$ Luke means a formal division of the province, though the Koine has examples of this geographical sense (papyri). There is no
article with $\pi \rho \omega \tau \eta$ and Luke may not mean to stress unduly the position of Philippi in comparison with Amphipolis. But it was certainly a leading city of this district of Macedonia.

We were tarrying ( $\eta \mu \varepsilon v \delta \iota \alpha \tau \rho(\beta) \nu \tau \varepsilon \varsigma)$. Periphrastic imperfect active.
Acts 16:13
By a river side ( $\pi \alpha \rho \alpha \pi о \tau \alpha \mu \circ v$ ). The little river Gangites (or Gargites) was one mile west of the town. Philippi as a military outpost had few Jews. There was evidently no synagogue inside the city, but "without the gates" $(\varepsilon \xi \omega \tau \eta \varsigma \pi \nu \lambda \eta \varsigma)$ they had noticed an enclosure "where we supposed" (ov $\varepsilon v o \mu \iota \zeta \rho \mu \varepsilon v$, correct text, imperfect active), probably as they came into the city, "was a place of prayer" ( $\pi \rho \circ \sigma \chi \cup \chi \eta \nu \varepsilon ו v \alpha$ ). Infinitive with accusative of general reference in indirect discourse. Пробєuर $\eta$ is common in the LXX and the N.T. for the act of prayer as in Ac 2:42 then for a place of prayer either a synagogue (III Macc. 7:20) or more often an open air enclosure near the sea or a river where there was water for ceremonial ablutions. The word occurs also in heathen writers for a place of prayer (Schurer, Jewish People, Div. II, Vol. II, p. 69, Engl. Tr.). Deissmann (Bible Studies, p. 222) quotes an Egyptian inscription of the third century B.C. with this sense of the word and one from Panticapaeum on the Black Sea of the first century A.D. (Light from the Ancient East, p. 102). Juvenal (III. 296) has a sneering reference to the Jewish $\pi \rho \circ \sigma \varepsilon u \chi$. Josephus (Ant. XIV. 10, 23) quotes a decree of Halicarnassus which allowed the Jews "to make their prayers ( $\pi \rho \circ \sigma \varepsilon v \chi \alpha \varsigma)$ on the seashore according to the custom of their fathers." There was a synagogue in Thessalonica, but apparently none in Amphipolis and Apollonia (Ac 17:1). The rule of the rabbis required ten men to constitute a synagogue, but here were gathered only a group of women at the hour of prayer. In pioneer days in this country it was a common thing to preach under bush arbours in the open air. John Wesley and George Whitfield were great open air preachers. Paul did not have an inspiring beginning for his work in Europe, but he took hold where he could. The conjecture was correct. It was a place of prayer, but only a bunch of women had come together ( $\tau \alpha ı \varsigma ~ \sigma u v \varepsilon \lambda \theta$ ovoaıs $\gamma \cup v a ı \xi \imath v$ ), excuse enough for not preaching to some preachers, but not to Paul and his party. The "man of Macedonia" turned out to be a group of women (Furneaux). Macedonian inscriptions show greater freedom for women in Macedonia than elsewhere at this time and confirm Luke's story of the activities of women in Philippi, Thessalonica, Berea.

We sat down and spake (каӨเซаvтєऽ $\varepsilon \lambda \alpha \lambda o u \mu \varepsilon v$ ). Having taken our seats (aorist active participle of $\kappa \alpha \theta \iota \zeta \omega)$ we began to speak or preach (inchoative imperfect of $\lambda \alpha \lambda \varepsilon \omega$, often used for preaching). Sitting was the Jewish attitude for public speaking. It was not mere conversation, but more likely conversational preaching of an historical and expository character. Luke's use of the first person plural implies that each of the four (Paul, Silas, Timothy, Luke) preached in turn, with Paul as chief speaker.

Acts 16:14

Lydia ( $\Lambda v \delta \delta \alpha$ ). Her birthplace was Thyatira in Lydia. She may have been named after the land, though Lydia is a common female name (see Horace). Lydia was itself a Macedonian colony (Strabo, XIII. 4). Thyatira (note plural form like Philippi and one of the seven churches of Asia here Re 2:18) was famous for its purple dyes as old as Homer (Iliad, IV. 141) and had a guild of dyers (o $\beta \alpha \varphi \varepsilon \iota \varsigma)$ as inscriptions show.

A seller of purple ( $\pi о \rho \varphi \cup \rho о \pi \omega \lambda \iota \varsigma)$. A female seller of purple fabrics ( $\pi о \rho \varphi \cup \rho \alpha, \pi \omega \lambda \iota \varsigma)$. Late word, masculine form in an inscription. There was a great demand for this fabric as it was used on the official toga at Rome and in Roman colonies. We still use the term "royal purple." See on Lu 16:19. Evidently Lydia was a woman of some means to carry on such an important enterprise from her native city. She may have been a freed-woman, since racial names were often borne by slaves.

One that worshipped God ( $\sigma \varepsilon \beta \circ \mu \varepsilon v \eta$ tov $\theta \varepsilon o v$ ). A God-fearer or proselyte of the gate. There was a Jewish settlement in Thyatira which was especially interested in the dyeing industry. She probably became a proselyte there. Whether this was true of the other women we do not know. They may have been Jewesses or proselytes like Lydia, probably all of them employees of hers in her business. When Paul writes to the Philippians he does not mention Lydia who may have died meanwhile and who certainly was not Paul's wife. She was wealthy and probably a widow.

Heard us ( $\eta$ коvev). Imperfect active of $\alpha \kappa \circ \omega \omega$, was listening, really listening and she kept it up, listening to each of these new and strange preachers.

Opened ( $\delta ı \eta \nu o \iota \xi \varepsilon v$ ). First aorist active indicative of $\delta \iota a v o \imath \gamma \omega$, old word, double compound ( $\delta \iota \alpha, \alpha v \alpha, o \not \gamma \omega)$ to open up wide or completely like a folding door (both sides, $\delta \iota \alpha$, two). Only the Lord could do that. Jesus had opened (the same verb) the mind of the disciples to understand the Scriptures (Lu 24:45).

To give heed ( $\pi \rho \circ \sigma \varepsilon \chi \varepsilon เ v$ ). To hold the mind ( $\tau 0 v$ vouv understood), present active infinitive. She kept her mind centred on the things spoken by Paul whose words gripped her attention. She rightly perceived that Paul was the foremost one of the group. He had personal magnetism and power of intellect that the Spirit of God used to win the heart of this remarkable woman to Christ. It was worth coming to Philippi to win this fine personality to the Kingdom of God. She will be the chief spirit in this church that will give Paul more joy and co-operation than any of his churches. It is not stated that she was converted on the first Sabbath, though this may have been the case. "One solitary convert, a woman, and she already a seeker after God, and a native of that very Asia where they had been forbidden to preach" (Furneaux). But a new era had dawned for Europe and for women in the conversion of Lydia.

Acts 16:15

And when she was baptized ( $\omega \varsigma \delta \varepsilon \varepsilon \beta \alpha \pi \tau \iota \sigma \theta \eta$ ). First aorist passive indicative of $\beta a \pi \tau \iota \zeta \omega$. The river Gangites was handy for the ordinance and she had now been converted and was ready to make this public declaration of her faith in Jesus Christ.

And her household (ка о оккоц autпऽ). Who constituted her "household"? The term oкко $\varsigma$, originally means the building as below, "into my house" and then it includes the inmates of a house. There is nothing here to show whether Lydia's "household" went beyond "the women" employed by her who like her had heard the preaching of Paul and had believed. "Possibly Euodia and Syntyche and the other women, Php 4:2,3 , may have been included in the family of Lydia, who may have employed many slaves and freed women in her trade" (Knowling). "This statement cannot be claimed as any argument for infant baptism, since the Greek word may mean her servants or her work-people" (Furneaux). In the household baptisms (Cornelius, Lydia, the jailor, Crispus) one sees "infants" or not according to his predilections or preferences.

If ye have judged me ( $\varepsilon$ кєкрıкат $\varepsilon \mu \varepsilon$ ). Condition of the first class, assumed to be true ( $\varepsilon$ and the indicative, here perfect active of $\kappa \rho / v \omega$ ). She had confessed her faith and submitted to baptism as proof that she was "faithful to the Lord" ( $\pi \iota \sigma \tau \eta \nu \tau \omega \kappa \nu \rho เ \omega)$, believing on the Lord. "If she was fit for that, surely she was fit to be their hostess" (Furneaux). And Paul and his party had clearly no comfortable place to stay while in Philippi. The ancient hotels or inns were abominable. Evidently Paul demurred for there were four of them and he did not wish to sacrifice his independence or be a burden even to a woman of wealth.

And she constrained us ( $\kappa \alpha \pi \alpha \rho \varepsilon \beta ı \alpha \sigma \alpha \tau о ~ \eta \mu \alpha \varsigma) . ~ E f f e c t i v e ~ f i r s t ~ a o r i s t ~ m i d d l e ~ o f ~$ $\pi \alpha \rho \alpha \beta ı \alpha \zeta_{o \mu \alpha}$, late word, in the N.T. only here and Lu 24:29. Some moral force ( $\beta \mathrm{L} \alpha$ ) or hospitable persuasion was required (cf. 1Sa 28:23 ), but Lydia had her way as women usually do. So he accepted Lydia's hospitality in Philippi, though he worked for his own living in Thessalonica (2Th 3:8) and elsewhere (2Co 11:9). So far only women have been won to Christ in Philippi. The use of "us" shows that Luke was not a householder in Philippi.

Acts 16:16
A spirit of divination ( $\pi v \varepsilon v \mu \alpha \pi \nu \theta \omega v \alpha$ ). So the correct text with accusative (apparition, a spirit, a python), not the genitive ( $\pi v \theta \omega v o \varsigma)$. Hesychius defines it as $\delta a \iota \mu o v o v \mu \alpha v ı \sigma о$ (a spirit of divination). The etymology of the word is unknown. Bengel suggests $\pi v \theta \varepsilon \sigma \theta \alpha$ from $\pi v v \theta a v o \mu \alpha$, to inquire. Python was the name given to the serpent that kept guard at
 termed Pythia. Certainly Luke does not mean to credit Apollo with a real existence (1Co 8:4 ). But Plutarch (A.D. $50-100$ ) says that the term $\pi v \theta \omega v \varepsilon \varsigma$ was applied to ventriloquists $(\varepsilon \gamma \gamma a \sigma \tau \rho \mu \nu \theta o)$. In the LXX those with familiar spirits are called by this word ventriloquists (Le 19:31; 20:6,27 , including the witch of Endor 1Sa 28:7 ). It is possible that this slave girl had this gift of prophecy "by soothsaying" ( $\mu \alpha v \tau \varepsilon v o \mu \varepsilon v \eta$ ). Present middle participle of $\mu \alpha \nu \tau \varepsilon v o \mu \alpha$, old heathen word (in contrast with $\pi \rho \circ \varphi \eta \tau \varepsilon \cup \omega$ ) for acting the seer ( $\mu \alpha \nu \tau \iota \varsigma)$ and
this kin to $\mu$ aıvo $\mu$ a, to be mad, like the howling dervishes of later times. This is the so-called instrumental use of the circumstantial participles.

Brought ( $\pi \alpha \rho \varepsilon \downarrow \chi \varepsilon v)$. Imperfect active of $\pi \alpha \rho \varepsilon \chi \omega$, a steady source of income.
Much gain ( $\varepsilon \rho \gamma \alpha \sigma \iota \alpha v \pi o \lambda \lambda \eta \nu$ ). Work, business, from $\varepsilon \rho \gamma \alpha \zeta \rho \mu \alpha$, to work.
Her masters ( $\tau$ оцऽ кирเoı̧ $\alpha \cup \tau \eta \varsigma)$. Dative case. Joint owners of this poor slave girl who were exploiting her calamity, whatever it was, for selfish gain, just as men and women today exploit girls and women in the "white slave" trade. As a fortune-teller she was a valuable asset for all the credulous dupes of the community. Simon Magus in Samaria and Elymas Barjesus in Cyprus had won power and wealth as soothsayers.

Acts 16:17
 the Supreme Being. It looks like supernatural testimony like that borne by the demoniacs to Jesus as "son of the Most High God" (Lu 8:28 . Cf; also Mr 1:24; 3:11; Mt 8:29; Lu 4:41, etc.). She may have heard Paul preach about Jesus as the way of salvation.

The way of salvation (o $\delta o v \sigma \omega \tau \eta \rho ı \alpha \varsigma)$. A way of salvation, strictly speaking (no article). There were many "ways of salvation" offered to men then as now.

Acts 16:18
She did ( $\varepsilon \pi \sigma t \varepsilon$ ). Imperfect active, kept it up for many days. The strange conduct gave Paul and the rest an unpleasant prominence in the community.

Being sore troubled ( $\delta \iota \alpha \pi 0 \vee \eta \theta \varepsilon \iota \varsigma)$. First aorist passive of $\delta \iota \alpha \pi o v \varepsilon \omega$, old verb, to work laboriously, then in passive to be "worked up," displeased, worn out. In the N.T. only here and 4:2 which see (there of the Sadducees about Peter's preaching). Paul was grieved, annoyed, indignant. He wanted no testimony from a source like this any more than he did the homage of the people of Lystra ( 14:14).

That very hour ( $\alpha \cup \tau \eta \tau \eta \omega \rho \alpha$ ). Locative case of time and familiar Lukan idiom in his Gospel, "at the hour itself." The cure was instantaneous. Paul, like Jesus, distinguished between the demon and the individual.

Acts 16:19
Was gone $(\varepsilon \xi \eta \lambda \theta \varepsilon v)$. Was gone out of the slave girl, second aorist active indicative of $\varepsilon \xi \varepsilon \rho \chi \circ \mu \alpha$. "The two most important social revolutions worked by Christianity have been the elevation of woman and the abolition of slavery" (Furneaux). Both are illustrated here (Lydia and this slave girl). "The most sensitive part of 'civilized' man is the pocket" (Ramsay).

Laid hold on ( $\varepsilon \pi \lambda \lambda \alpha \beta o \mu \varepsilon v o$ ). Second aorist middle participle of $\varepsilon \pi \lambda \lambda \alpha \mu \beta \alpha v \omega$ as in 9:27; 17:19, but here with hostile intent.

Dragged ( $\varepsilon \iota \lambda \kappa v \sigma \alpha v)$. First aorist active indicative of $\varepsilon \lambda \kappa \nu \omega$, late form of the old verb $\varepsilon \lambda \kappa \omega$ (also in Jas 2:6 ) to draw as a sword, and then to drag one forcibly as here and 21:30. It is also used of spiritual drawing as by Jesus in Joh 12:32 . Here it is by violence.

Into the marketplace ( $\varepsilon \varsigma \varsigma \tau \eta \sim \gamma \circ \rho \alpha v$ ). Into the Roman forum near which would be the courts of law as in our courthouse square, as in 17:17. Marketing went on also ( Mr 7:4 ), when the crowds collect ( $\operatorname{Mr} 6: 56$ ), from $\alpha \gamma \varepsilon \iota \rho \omega$, to collect or gather.

Unto the rulers ( $\varepsilon \pi$ тovৎ $\alpha \rho \chi$ оvтаৎ). General Greek term for "the magistrates."
Acts 16:20
Unto the magistrates ( $\tau$ оıৎ $\sigma \tau \rho \alpha \tau \eta \gamma \circ \iota \varsigma)$. Greek term ( $\sigma \tau \rho \alpha \tau o \sigma, \alpha \gamma \omega$ ) for leader of an army or general. But in civic life a governor. The technical name for the magistrates in a Roman colony was duumviri or duumvirs, answering to consuls in Rome. $\Sigma \tau \rho a \tau \eta \gamma$ here is the Greek rendering of the Latin praetores (praetors), a term which they preferred out of pride to the term duumviri. Since they represented consuls, the praetors or duumvirs were accompanied by lictors bearing rods (verse 35 ).

These men (ovto o av $\theta \rho \omega \pi \sigma$ ). Contemptuous use.
Being Jews (Iovסaıo vтapðоvtec). The people of Philippi, unlike those in Antioch ( 11:26), did not recognize any distinction between Jews and Christians. These four men were Jews. This appeal to race prejudice would be especially pertinent then because of the recent decree of Claudius expelling Jews from Rome (18:2). It was about A.D. 49 or 50 that Paul is in Philippi. The hatred of the Jews by the Romans is known otherwise (Cicero, Pro Flacco, XXVIII; Juvenal, XIV. 96-106).

Do exceedingly trouble ( $\varepsilon \kappa \tau \alpha \rho \alpha \sigma \sigma \sigma v \sigma \iota v)$. Late compound (effective use of $\varepsilon \kappa$ in composition) and only here in the N.T.

Acts 16:21
Customs which it is not lawful for us to receive, or to observe, being Romans ( $\varepsilon \theta \eta$ $\alpha$ оик $\varepsilon \sigma \tau \iota \nu \eta \mu \nu \nu \pi \alpha \rho \alpha \delta \varepsilon \chi \varepsilon \sigma \theta \alpha$ ои $\delta \varepsilon$ тоוєı $\mathrm{P} \omega \mu \alpha \iota \circ \iota$ ovбıv). Note the sharp contrast between "being Jews" in verse 20 and "being Romans" here. This pose of patriotism is all sound and fury. It is love of money that moves these "masters" far more than zeal for Rome. As Roman citizens in a colony they make full use of all their rights of protest. Judaism was a religio licita in the Roman empire, only they were not allowed to make proselytes of the Romans themselves. No Roman magistrate would pass on abstract theological questions ( $18: 15$ ), but only if a breach of the peace was made ( $\varepsilon \kappa \tau \alpha \rho \alpha \sigma \sigma \sigma v \sigma \iota \nu ~ \eta \mu \omega \nu \tau \eta \nu \pi \sigma \lambda \iota \nu$ ) or the formation of secret sects and organizations. Evidently both of these last points are involved by the charges of "unlawful customs" by the masters who are silent about their real ground of grievance against Paul and Silas. E $\theta$ oc (kin to $\eta \theta$ oc, 1 Co $15: 33$ ) is from $\varepsilon \theta \omega$, to be accustomed or used to a thing. The Romans granted toleration to conquered nations to follow their religious customs provided they did not try to win the Romans. But the Jews had made great headway to favour (the God-fearers) with increasing hatred also. Emperor worship had in store grave peril for both Jews and Christians. The Romans will care more for this than for the old gods and goddesses. It will combine patriotism and piety.

Acts 16:22

Rose up together ( $\sigma v v \varepsilon \pi \varepsilon \sigma \tau \eta)$. Second aorist (ingressive) active of the double compound $\sigma 0 v \varepsilon \varphi / \sigma \tau \eta \mu$, intransitive, old verb, but only here in the N.T. (cf. катєпєбтๆ $\bar{\sigma} v$ in 18:12). There was no actual attack of the mob as Paul and Silas were in the hands of the officers, but a sudden and violent uprising of the people, the appeal to race and national prejudice having raised a ferment.

Rent their garments off them ( $\pi \varepsilon \rho \iota \rho \eta \xi \alpha \nu \tau \varepsilon \varsigma \alpha \nu \tau \omega \nu \tau \alpha \not \mu \alpha \tau \iota \alpha$ ). First aorist active participle of $\pi \varepsilon \rho \iota \rho \eta \gamma v v \mu$, old verb, to break off all around, to strip or rend all round. Here only in the N.T. The duumvirs probably gave orders for Paul and Silas to be stripped of their outer garments ( $\mu \alpha \tau \iota \alpha$ ), though not actually doing it with their own hands, least of all not stripping off their own garments in horror as Ramsay thinks. That would call for the middle voice. In II Macc. 4:38 the active voice is used as here of stripping off the garments of others. Paul in 1Th 2:2 refers to the shameful treatment received in Philippi, "insulted" (vßpıo日vvtac). As a Roman citizen this was unlawful, but the duumvirs looked on Paul and Silas as vagabond and seditious Jews and "acted with the highhandedness characteristic of the fussy provincial authorities" (Knowling).

Commanded ( $\varepsilon \kappa \varepsilon \lambda \varepsilon v o v)$ ). Imperfect active, repeatedly ordered. The usual formula of command was: "Go, lictors; strip off their garments; let them be scourged."

To beat them with rods ( $\rho \alpha \beta \delta \iota \zeta \varepsilon \iota)$ ). Present active infinitive of $\rho \alpha \beta \delta \iota \zeta \omega$, old verb, but in the N.T.=virgis caedere only here and 2Co 11:25 where Paul alludes to this incident and two others not given by Luke ( $\tau \rho \iota \varsigma \varepsilon \rho \alpha \beta \delta \iota \sigma \theta \eta v)$. He came near getting another in Jerusalem (Ac 22:25 ). Why did not Paul say here that he was a Roman citizen as he does later (verse 37) and in Jerusalem (22:26f. )? It might have done no good in this hubbub and no opportunity was allowed for defence of any kind.

Acts 16:23
When they had laid ( $\varepsilon \pi \iota \theta \varepsilon v \tau \varepsilon \varsigma)$. Second aorist (constative) active participle of $\varepsilon \pi \iota \tau \iota \theta \eta \mu$, to place upon.

Many stripes ( $\pi \mathrm{o} \lambda \lambda \alpha \varsigma \pi \lambda \eta \gamma \alpha \varsigma)$. The Jewish law was forty stripes save one (2Co 11:24 ). The Roman custom depended on the caprice of the judge and was a terrible ordeal. It was the custom to inflict the stripes on the naked body (back) as Livy 2.5 says: "Missique lictores ad sumendum supplicium, nudatos virgis caedunt." On $\pi \lambda \eta \gamma$ ¢ (from $\pi \lambda \eta \sigma \sigma \omega$, to strike a blow) see on Lu 10:30; 12:47f.

The jailor ( $\tau \omega \delta \varepsilon \sigma \mu \circ \varphi \cup \lambda \alpha \kappa$ ). Late word ( $\delta \varepsilon \sigma \mu \circ \sigma, \varphi \cup \lambda \alpha \xi$, keeper of bonds), in the N.T. only here (verses 23,27,36). The LXX has the word $\alpha \rho \chi เ \delta \varepsilon \sigma \mu \circ \varphi \cup \lambda \alpha \xi$ (Ge 39:21-23 ). Chrysostom calls this jailor Stephanus, he was of Achaia (1Co 16:15).

To keep safely ( $\alpha \sigma \varphi \alpha \lambda \omega \varsigma \tau \eta \rho \varepsilon เ v)$. Present active infinitive, to keep on keeping safely, perhaps "as dangerous political prisoners" (Rackham). He had some rank and was not a mere turnkey.

Acts 16:24

Into the inner prison ( $\varepsilon \varsigma \varsigma \tau \nu \varepsilon \sigma \omega \tau \varepsilon \rho \alpha \nu \varphi \cup \lambda \alpha \kappa \eta \nu$ ). The comparative form from the adverb $\varepsilon \sigma \omega$ (within), Ionic and old Attic for $\varepsilon เ \sigma \omega$. In the LXX, but in the N.T. only here and Heb 6:19. The Roman public prisons had a vestibule and outer prison and behind this the inner prison, a veritable dungeon with no light or air save what came through the door when open. One has only to picture modern cells in our jails, the dungeons in feudal castles, London prisons before the time of Howard, to appreciate the horrors of an inner prison cell in a Roman provincial town of the first century A.D.

Made their feet fast ( $\tau 0 \cup \varsigma ~ \pi о \delta \alpha \varsigma ~ \eta \sigma \varphi \alpha \lambda เ \sigma \alpha \tau о ~ \alpha u \tau \omega v)$ ). First aorist (effective) middle of $\alpha \sigma \varphi \alpha \lambda_{\iota} \zeta \omega$, from $\alpha \sigma \varphi \alpha \lambda \eta \zeta$ (safe), common verb in late Greek, in the N.T. only here and Mt 24:64f. . The inner prison was safe enough without this refinement of cruelty.

In the stocks ( $\varepsilon \iota \varsigma ~ \tau o ~ \xi \cup \lambda o v) . ~ \Xi u \lambda o v$, from $\xi v \omega$, to scrape or plane, is used for a piece of wood whether a cross or gibbet (Ac 5:30; 10:39; 13:29; $\mathrm{Ga} 3: 13 ; 1 \mathrm{Pe} 2: 24$ ) or a log or timber with five holes (four for the wrists and ankles and one for the neck) or two for the feet as here, $\xi \cup \lambda о \pi \varepsilon \delta \eta$, Latin vervus, to shackle the feet stretched apart (Job 33:11 ). This torment was practiced in Sparta, Athens, Rome, and Adonirom Judson suffered it in Burmah. $\Xi u$ uov is also used in the N.T. for stick or staff (Mt 26:47) and even a tree (Lu 23:31). Tertullian said of Christians in the stocks: Nihil crus sentit in vervo, quum animus in caelo est (Nothing the limb feels in the stocks when the mind is in heaven).

Acts 16:25
About midnight ( $\kappa \alpha \tau \alpha \delta \varepsilon \mu \varepsilon \sigma о v \cup \kappa \tau \iota \circ v)$. Middle of the night, old adjective seen already in $\mathrm{Mr} 13: 35$; Lu 11:5 which see.

Were praying and singing ( $\pi \rho \circ \sigma \varepsilon u \chi o \mu \varepsilon v o ~ v \mu v o v v$ ). Present middle participle and imperfect active indicative: Praying they were singing (simultaneously, blending together petition and praise). H $\nu \mu \nu \varepsilon \omega$ is an old verb from $v \mu \nu o \varsigma$ (cf. Isa 12:4; Da 3:23 ). Paul and Silas probably used portions of the Psalms (cf. Lu 1:39f.,67f.; 2:28f. ) with occasional original outbursts of praise.

Were listening to them ( $\varepsilon \pi \eta \kappa \rho \circ \omega v \tau \sigma \alpha \nu \tau \omega v$ ). Imperfect middle of $\varepsilon \pi \alpha \kappa \rho о \alpha о \mu \alpha$. Rare verb to listen with pleasure as to a recitation or music (Page). It was a new experience for the prisoners and wondrously attractive entertainment to them.

Acts 16:26
Earthquake ( $\sigma \varepsilon \iota \sigma \mu \varsigma)$. Old word from $\sigma \varepsilon \iota \omega$, to shake. Luke regarded it as an answer to prayer as in 4:31. He and Timothy were not in prison.

So that the foundations of the prison house were shaken ( $\omega \sigma \tau \varepsilon \sigma \alpha \lambda \varepsilon v \theta \eta v \alpha \tau \alpha$ $\theta \varepsilon \mu \varepsilon \lambda \iota \alpha$ tov $\delta \varepsilon \sigma \mu \omega \tau \eta \rho \circ v)$. Regular construction of the first aorist passive infinitive and the accusative of general reference with $\omega \sigma \tau \varepsilon$ for actual result just like the indicative. This old word for prison house already in Mt 11:2; Ac 5:21,23 which see. $\Theta \varepsilon \mu \varepsilon \lambda \iota \alpha$ is neuter plural of the adjective $\theta \varepsilon \mu \varepsilon \lambda_{\iota o}$, from $\theta \varepsilon \mu \alpha$ (thing laid down from $\tau \iota \theta \eta \mu$ ). So already in $\operatorname{Lu}$ 6:48; 14:29. If the prison
was excavated from rocks in the hillside, as was often the case, the earthquake would easily have slipped the bars of the doors loose and the chains would have fallen out of the walls.

Were opened ( $\eta v \varepsilon \omega \iota \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\alpha v o t \gamma \omega$ (or $-\nu v \mu$ ) with triple augment $(\eta, \varepsilon, \omega)$, while there is no augment in $\alpha \nu \varepsilon \theta \eta$ (first aorist passive indicative of $\alpha v ı \eta \mu$, were loosed), old verb, but in the N.T. only here and 27:40; Eph 6:9; Heb 13:5 .

Acts 16:27
Being roused out of sleep ( $\varepsilon \xi \cup \pi \nu \circ \varsigma \gamma \varepsilon v o \mu \varepsilon \nu \circ \varsigma)$. Becoming $\varepsilon \xi v \pi \nu \circ \varsigma$ (rare word, only here in N.T., in LXX and Josephus). An earthquake like that would wake up any one.

Open ( $\alpha v \varepsilon \omega 1 \gamma \mu \varepsilon v o \varsigma)$. Perfect passive participle with double reduplication in predicate position, standing open.

Drew his sword ( $\sigma \pi \alpha \sigma \alpha \mu \varepsilon \nu o \varsigma \tau \eta \nu \mu \alpha \chi \alpha \iota \rho \nu)$. First aorist middle participle of $\sigma \pi \alpha \omega$, to draw, as in Mr 14:47, drawing his own sword himself. Our word spasm from this old word.

Was about ( $\eta \mu \varepsilon \lambda \lambda \varepsilon v$ ). Imperfect active of $\mu \varepsilon \lambda \lambda \omega$ with both syllabic and temporal augment and followed here by present infinitive. He was on the point of committing suicide as Brutus had done near here. Stoicism had made suicide popular as the escape from trouble like the Japanese harikari.

Had escaped ( $\varepsilon \kappa \pi \varepsilon \varphi \varepsilon v \gamma \varepsilon v \alpha$ ). Second perfect active infinitive of $\varepsilon \kappa \varphi \varepsilon v \gamma \omega$, old verb with perfective force of $\varepsilon \kappa$, to flee out, to get clean away. This infinitive and accusative of general reference is due to indirect discourse after vo $\mu \iota \zeta \omega v$. Probably the prisoners were so panic stricken by the earthquake that they did not rally to the possibility of escape before the jailor awoke. He was responsible for the prisoners with his life (12:19; 27:42).

Acts 16:28
Do thyself no harm ( $\mu \eta \delta \varepsilon v \pi \rho \alpha \xi \eta ı \varsigma \sigma \varepsilon \alpha \nu \tau \omega \kappa \alpha \kappa \sigma v$ ). The usual construction ( $\mu \eta$ and the aorist subjunctive) for a prohibition not to
begin to do a thing. The older Greek would probably have used $\pi$ oı $\boldsymbol{\sigma} \boldsymbol{\eta} ı$ here. The later Greek does not always preserve the old distinction between $\pi \sigma เ \varepsilon \omega$, to do a thing, and $\pi \rho \alpha \sigma \sigma \omega$, to practice, though $\pi \rho \alpha \sigma \sigma \varepsilon \tau \varepsilon$ keeps it in Php 4:9 and $\pi o เ \varepsilon \omega$ is rightly used in Lu 3:10-14. As a matter of fact $\pi \rho \alpha \sigma \sigma \omega$ does not occur in Matthew or in Mark, only twice in John, six times in Luke's Gospel, thirteen in Acts, and elsewhere by Paul.

Sprang in $(\varepsilon เ \sigma \varepsilon \pi \eta \delta \eta \sigma \varepsilon v)$. First aorist active of $\varepsilon \iota \sigma \pi \eta \delta \alpha \omega$, old verb, but here only in the N.T. Cf. $\varepsilon \kappa \pi \eta \delta \alpha \omega$ in 14:14. The jailor was at the outer door and he wanted lights to see what was inside in the inner prison.

Acts 16:29
Trembling for fear ( $\varepsilon v \tau \rho о \mu \circ \varsigma \gamma \varepsilon v \circ \mu \varepsilon v \circ \varsigma)$. "Becoming terrified." The adjective $\varepsilon v \tau \rho \circ \mu \circ \varsigma$ (in terror) occurs in N.T. only here and 7:32; Heb 12:21 .

Fell down ( $\pi \rho o \sigma \varepsilon \pi \varepsilon \sigma \varepsilon v$ ). Second aorist active indicative of $\pi \rho \sigma \sigma \pi \iota \pi \tau \omega$, old verb. An act of worship as Cornelius before Peter (10:25), when $\pi \rho о \sigma \varepsilon \kappa v \nu \eta \sigma \varepsilon v$ is used.

## Acts 16:30

Brought them out ( $\pi \rho \sigma \gamma \alpha \gamma \omega \nu \alpha v \tau o v \varsigma \varepsilon \xi \omega$ ). Second aorist active participle of $\pi \rho \circ \alpha \gamma \omega$, to lead forward. He left the other prisoners inside, feeling that he had to deal with these men whom he had evidently heard preach or had heard of their message as servants of the Most High God as the slave girl called them. There may have been superstition behind his fear, but there was evident sincerity.

Acts 16:31
To be saved ( $\imath \propto \alpha \omega \theta \omega$ ). Final clause with $\iota v \alpha$ and first aorist passive subjunctive. What did he mean by "saved"? Certainly more than escape from peril about the prisoners or because of the earthquake, though these had their influences on him. Cf. way of salvation in verse 17.

Believe on the Lord Jesus (Пıбєєvoov $\varepsilon \pi$ тov ки $\llcorner\circ v$ I $\eta \sigma o v v$ ). This is what Peter told Cornelius ( $10: 43$ ). This is the heart of the matter for both the jailor and his house.

Acts 16:32
They spake the word of God ( $\varepsilon \lambda \alpha \lambda \eta \sigma \alpha v$ tov $\lambda o \gamma o v$ tov $\theta \varepsilon o v)$. So Paul and Silas gave fuller exposition of the way of life to the jailor "with all that were in his house." It was a remarkable service with keenest attention and interest, the jailor with his warden, slaves, and family.

Acts 16:33
Washed their stripes ( $\varepsilon \lambda o v \sigma \varepsilon \nu$ a $\pi 0 \tau \omega \nu \pi \lambda \eta \gamma \omega \nu$ ). Deissmann (Bible Studies, p. 227) cites an inscription of Pergamum with this very construction of a $\pi$ o and the ablative, to wash off, though it is an old verb. This first aorist active indicative of $\lambda o v \omega$, to bathe, succinctly shows what the jailor did to remove the stains left by the rods of the lictors (verse 22). Nı $\pi \tau \omega$ was used for washing parts of the body.

And was baptized, he and all his, immediately ( $\kappa \alpha \varepsilon \beta \alpha \pi \tau \iota \sigma \theta \eta \alpha \nu \tau о \varsigma \kappa \alpha$ о $\alpha \cup \tau о v$ $\alpha \pi \alpha v \tau \varepsilon \varsigma \pi \alpha \rho \alpha \chi \rho \eta \mu \alpha)$. The verb is in the singular agreeing with $\alpha v \tau \circ \varsigma$, but it is to be supplied with o avtov, and it was done at once.

Acts 16:34
He brought them up ( $\alpha v \alpha \gamma \alpha \gamma \omega v$ ). Second aorist active participle of $\alpha v \alpha \gamma \omega$. It looks as if his house was above the prison. The baptism apparently took place in the pool or tank in which he bathed Paul and Silas (De Wette) or the rectangular basin (impluvium) in the court for receiving the rain or even in a swimming pool or bath ( $\kappa \sigma \lambda \nu \mu \beta \eta \theta \rho \alpha)$ found within the walls of the prison (Kuinoel). Meyer: "Perhaps the water was in the court of the house; and the baptism was that of immersion, which formed an essential part of the symbolism of the act."

Set meat ( $\pi \alpha \rho \varepsilon \theta \eta \kappa \varepsilon \nu \tau \rho \alpha \pi \varepsilon \zeta \alpha v)$. Set a "table" before them with food on it. They had probably had no food for a day.

With all his house ( $\pi \alpha v o ו \kappa \varepsilon$ ). Adverb, once in Plato, though usually $\pi \alpha v o \ldots k ı$. In LXX, but here alone in the N.T. It is in an amphibolous position and can be taken either with "rejoiced" ( $\eta \gamma \alpha \lambda \lambda ı \alpha \sigma \alpha \tau 0)$ or "having believed" ( $\pi \varepsilon \pi \iota \sigma \tau \varepsilon \nu \kappa \omega \varsigma$, perfect active participle, permanent belief), coming between them. The whole household (family, warden, slaves) heard the word of God, believed in the Lord Jesus, made confession, were baptized, and rejoiced. Furneaux considers the haste in baptism here "precipitate" as in the baptism of the eunuch. But why delay?

Acts 16:35
The serjeants ( $\tau$ ous $\rho \alpha \beta \delta o u \chi o u \varsigma)$. Fasces-bearers, regular Greek word ( $\rho \alpha \beta \delta o \sigma, \varepsilon \chi \omega$ ) for Latin lictores though Cicero says that they should carry baculi, not fasces. Was this message because of the earthquake, the influence of Lydia, or a belated sense of justice on the part of the magistrates (praetors)? Perhaps a bit of all three may be true. The Codex Bezae expressly says that the magistrates "assembled together in the market place and recollecting the earthquake that had happened they were afraid."

Acts 16:36
Now therefore ( $v v \vee o v v$ ). Note both particles (time and inference). It was a simple matter to the jailor and he was full of glee over this happy outcome.

## Acts 16:37

Unto them ( $\pi \rho \circ \varsigma$ avtous). The lictors by the jailor. The reply of Paul is a marvel of brevity and energy, almost every word has a separate indictment showing the utter illegality of the whole proceeding.

They have beaten us ( $\delta \varepsilon \iota \rho \alpha \nu \tau \varepsilon \varsigma \eta \mu \alpha \varsigma$ ). First aorist active participle of $\delta \varepsilon \rho \omega$, old verb to flay, to skin, to smite. The Lex Valeria B.C. 509 and the Lex Poscia B.C. 248 made it a crime to inflict blows on a Roman citizen. Cicero says, "To fetter a Roman citizen was a crime, to scourge him a scandal, to slay him--parricide." Claudius had "deprived the city of Rhodes of its freedom for having crucified some citizen of Rome" (Rackham).

Publicly ( $\delta \eta \mu \circ \sigma \iota \alpha$ ). This added insult to injury. Common adverb (o $\delta \omega$ ) supplied with adjective, associative instrumental case, opposed to ı $\delta$ ı or кат' oเкои¢, Ac 20:20 )

Uncondemned (акатакрıтоис). This same verbal adjective from ката-крıv $\omega$ with $\alpha$ privative is used by Paul in 22:25 and nowhere else in the N.T. Rare in late Greek like акатаүvшбтоऽ, but in late Koine (papyri, inscriptions). The meaning is clearly "without being tried." Paul and Silas were not given a chance to make a defence. They were sentenced unheard ( $25: 16$ ). Even slaves in Roman law had a right to be heard.

Men that are Romans ( $\alpha v \theta \rho \omega \pi$ оия Pouaıov¢ vт $\alpha \rho \chi о v \tau \alpha \varsigma$ ). The praetors did not know, of course, that Paul and Silas were Roman citizens any more than Lysias knew it in Ac 22:27 . Paul's claim is not challenged in either instance. It was a capital offence to make a false claim to Roman citizenship.

Have cast us into prison ( $\varepsilon \beta \alpha \lambda \alpha \nu \varepsilon ı \varsigma \varphi \cup \lambda \alpha \kappa \eta \nu)$. Second aorist active indicative of $\beta \alpha \lambda \lambda \omega$, old verb, with first aorist ending as often in the Koine ( $-\alpha v$, not $-o v$ ). This was the climax, treating them as criminals.

And now privily ( $\kappa \alpha v v \nu \lambda \alpha \theta \rho \alpha$ ). Paul balances their recent conduct with the former.
Nay verily, but (ov $\gamma \alpha \rho, \alpha \lambda \lambda \alpha$ ). No indeed! It is the use of $\gamma \alpha \rho$ so common in answers $(\gamma \varepsilon+\alpha \rho \alpha)$ as in Mt 27:23. A $\lambda \lambda \alpha$ gives the sharp alternative.

Themselves (avto). As a public acknowledgment that they had wronged and mistreated Paul and Silas. Let them come themselves and lead us out ( $\varepsilon \xi \alpha \gamma \alpha \gamma \varepsilon \tau \omega \sigma \alpha \nu$, third person plural second aorist active imperative of $\varepsilon \xi a \gamma \omega)$. It was a bitter pill to the proud praetors.

Acts 16:39
They feared $(\varepsilon \varphi \rho \beta \eta \theta \eta \sigma \alpha v)$. This is the explanation. They became frightened for their own lives when they saw what they had done to Roman citizens.

They asked ( $\eta \rho \omega \tau \omega v$ ). Imperfect active of $\varepsilon \rho \omega \tau \alpha \omega$. They kept on begging them to leave for fear of further trouble. The colonists in Philippi would turn against the praetors if they learned the facts, proud as they were of being citizens. This verb in the Koine is often used as here to make a request and not just to ask a question.

Acts 16:40
Into the house of Lydia ( $\pi \rho \circ \varsigma \tau \eta \nu \Lambda \nu \delta \iota \alpha \nu$ ). No word in the Greek for "house," but it means the house of Lydia. Note "the brethren" here, not merely Luke and Timothy, but other brethren now converted besides those in the house of the jailor. The four missionaries were guests of Lydia (verse 15) and probably the church now met in her home.

They departed $(\varepsilon \xi \eta \lambda \theta \alpha v)$. Paul and Silas, but not Luke and Timothy. Note "they" here, not "we." Note also the - $\alpha v$ ending instead of -ov as above. The movements of Timothy are not perfectly clear till he reappears at Beroea (17:15). It seems unlikely that he came to Thessalonica with Paul and Silas since only Paul and Silas obtained security there (17:9) and were sent on to Beroea ( $17: 10$ ). Probably Timothy was sent to Thessalonica from Philippi with gifts of which Paul spoke later (Php 4:15f. ). Then he followed Paul and Silas to Beroea.

## Acts 17

Acts 17:1
When they had passed through ( $\delta$ ıo $\delta \varepsilon v \sigma a v \tau \varepsilon \varsigma)$. First aorist active participle of $\delta ı o \delta \varepsilon v \omega$, common verb in the Koine (Polybius, Plutarch, LXX, etc.), but in the N.T. only here and Lu 8:1. It means literally to make one's way (odoc) through ( $\delta(\alpha)$. They took the Egnatian Way, one of the great Roman roads from Byzantium to Dyrrachium (over 500 miles long) on the Adriatic Sea, opposite Brundisium and so an extension of the Appian Way.

Amphipolis ( $\tau \eta \nu \mathrm{A} \mu \varphi \iota \pi \circ \lambda \imath \nu$ ). So called because the Strymon flowed almost around $(\alpha \mu \varphi)$ it, the metropolis of Macedonia Prima, a free city, about 32 miles from Philippi, about three miles from the sea. Paul and Silas may have spent only a night here or longer.

Apollonia ( $\tau \eta v$ A $\pi 0 \lambda \lambda \omega v / \alpha v$ ). Not the famous Apollonia in Illyria, but 32 miles from Amphipolis on the Egnatian Way. So here again a night was spent if no more. Why Paul hurried through these two large cities, if he did, we do not know. There are many gaps in Luke's narrative that we have no way of filling up. There may have been no synagogues for one thing.

To Thessalonica ( $\varepsilon ı \varsigma ~ \Theta \varepsilon \sigma \sigma \alpha \lambda o v ı \kappa \eta v)$. There was a synagogue here in this great commercial city, still an important city called Saloniki, of 70,000 population. It was originally called Therma, at the head of the Thermaic Gulf. Cassander renamed it Thessalonica after his wife, the sister of Alexander the Great. It was the capital of the second of the four divisions of Macedonia and finally the capital of the whole province. It shared with Corinth and Ephesus the commerce of the Aegean. One synagogue shows that even in this commercial city the Jews were not very numerous. As a political centre it ranked with Antioch in Syria and Caesarea in Palestine. It was a strategic centre for the spread of the gospel as Paul later said for it sounded (echoed) forth from Thessalonica throughout Macedonia and Achaia (1Th 1:8).

Acts 17:2
As his custom was (ката то $\varepsilon \epsilon \omega \theta$ оৎ $\tau \omega$ Паט $\lambda \omega$ ). The same construction in Lu 4:16 about Jesus in Nazareth ( $\kappa \alpha \tau \alpha$ тo $\varepsilon \epsilon \omega \theta$ oৎ $\alpha \cup \tau \omega$ ) with the second perfect active participle neuter singular from $\varepsilon \theta \omega$. Paul's habit was to go to the Jewish synagogue to use the Jews and the God-fearers as a springboard for his work among the Gentiles.

For three Sabbaths ( $\varepsilon \pi \sigma \alpha \beta \beta \alpha \tau \alpha \tau \rho ı \alpha)$. Probably the reference is to the first three Sabbaths when Paul had a free hand in the synagogue as at first in Antioch in Pisidia. Luke does not say that Paul was in Thessalonica only three weeks. He may have spoken there also during the week, though the Sabbath was the great day. Paul makes it plain, as Furneaux shows, that he was in Thessalonica a much longer period than three weeks. The rest of the time he spoke, of course, outside of the synagogue. Paul implies an extended stay by his language in 1Th 1:8. The church consisted mainly of Gentile converts (2Th 3:4,7,8) and
seems to have been well organized (1Th 5:12). He received help while there several times from Philippi (Php 4:16) and even so worked night and day to support himself (1Th 2:9). His preaching was misunderstood there in spite of careful instruction concerning the second coming of Christ (1Th 4:13-5:5; 2Th 2:1-12 ).

Reasoned ( $\delta \iota \varepsilon \lambda \varepsilon \xi \alpha \tau 0$ ). First aorist middle indicative of $\delta \iota \alpha \lambda \varepsilon \gamma \circ \mu \alpha$, old verb in the active to select, distinguish, then to revolve in the mind, to converse (interchange of ideas), then to teach in the Socratic ("dialectic") method of question and answer (cf. $\delta \varepsilon \varepsilon \lambda \varepsilon \gamma \varepsilon \tau \%$ in verse 17), then simply to discourse, but always with the idea of intellectual stimulus. With these Jews and God-fearers Paul appealed to the Scriptures as text and basis ( $\alpha \pi 0$ ) of his ideas.

Acts 17:3
Opening and alleging ( $\delta \iota \alpha v o \imath \gamma \omega \nu \kappa \alpha \pi \alpha \rho \alpha \tau \iota \theta \varepsilon \mu \varepsilon \nu \circ \varsigma)$. Opening the Scriptures, Luke means, as made plain by the mission and message of Jesus, the same word ( $\delta \operatorname{lovot} \gamma \omega$ ) used by him of the interpretation of the Scriptures by Jesus (Lu 24:32) and of the opening of the mind of the disciples also by Jesus ( $\mathrm{Lu} 24: 45$ ) and of the opening of Lydia's heart by the Lord ( $16: 14$ ). One cannot refrain from saying that such exposition of the Scriptures as Jesus and Paul gave would lead to more opening of mind and heart. Paul was not only "expounding" the Scriptures, he was also "propounding" (the old meaning of "allege") his doctrine or setting forth alongside the Scriptures ( $\pi \alpha \rho \alpha-\tau \iota \varepsilon \mu \varepsilon v o \varsigma)$, quoting the Scripture to prove his contention which was made in much conflict (1Th 2:2), probably in the midst of heated discussion by the opposing rabbis who were anything but convinced by Paul's powerful arguments, for the Cross was a stumbling-block to the Jews (1Co 1:23).

That it behoved the Christ to suffer (o $\tau \tau 0 v \mathrm{X} \rho \iota \tau \sigma v \varepsilon \delta \varepsilon \pi \alpha \theta \varepsilon \imath v$ ). The second aorist active infinitive is the subject of $\varepsilon \delta \varepsilon$ with $\tau 0 \nu \mathrm{X} \rho \iota \sigma \tau 0 v$, the accusative of general reference. This is Paul's major premise in his argument from the Scriptures about the Messiah, the necessity of his sufferings according to the Scriptures, the very argument made by the Risen Jesus to the two on the way to Emmaus (Lu 24:25-27). The fifty-third chapter of Isaiah was a passage in point that the rabbis had overlooked. Peter made the same point in Ac 3:18 and Paul again in Ac 26:23. The minor premise is the resurrection of Jesus from the dead.

To rise again from the dead ( $\alpha v \alpha \sigma \tau \eta v \alpha \varepsilon \kappa \nu \varepsilon \kappa \rho \omega v)$. This second aorist active infinitive $\alpha v a \sigma \tau \eta v a$ is also the subject of $\varepsilon \delta \varepsilon$. The actual resurrection of Jesus was also a necessity as Paul says he preached to them (1Th 4:14) and argued always from Scripture (1Co 15:3-4 ) and from his own experience (Ac 9:22; 22:7; 26:8,14; 1Co 15:8).

This Jesus is the Christ (ov $о \varsigma \varepsilon \sigma \tau \iota v$ o X $\rho \iota \sigma \tau 0 \sigma$, o Iqбovৎ). More precisely, "This is the Messiah, viz., Jesus whom I am proclaiming unto you." This is the conclusion of Paul's line of argument and it is logical and overwhelming. It is his method everywhere as in Damascus, in Antioch in Pisidia, here, in Corinth. He spoke as an eye-witness.

Acts 17:4

Some of them ( $\tau \vee v \varepsilon \varsigma \varepsilon \xi \cup \tau \omega v$ ). That is of the Jews who were evidently largely afraid of the rabbis. Still "some" were persuaded ( $\varepsilon \pi \varepsilon ו \sigma \theta \eta \sigma \alpha v$, effective first aorist passive indicative) and "consorted with" ( $\pi \rho о \sigma \varepsilon \kappa \lambda \eta \rho \omega \theta \eta \sigma \alpha v)$. This latter verb is also first aorist passive indicative of $\pi \rho \circ \sigma \kappa \lambda \eta \rho \circ \omega$, a common verb in late Greek (Plutarch, Lucian), but only here in the N.T., from $\pi \rho \circ \varsigma$ and $\kappa \lambda \eta \rho \circ \varsigma$, to assign by lot. So then this small group of Jews were given Paul and Silas by God's grace.

And of the devout Greeks a great multitude ( $\tau \omega \nu \tau \varepsilon \sigma \varepsilon \beta \circ \mu \varepsilon \nu \omega \nu \mathrm{H} \varepsilon \lambda \lambda \eta \nu \omega \nu \pi \lambda \eta \theta$ os $\pi о \lambda v)$. These "God-fearers" among the Gentiles were less under the control of the jealous rabbis and so responded more readily to Paul's appeal. In 1Th 1:9 Paul expressly says that they had "turned to God from idols," proof that this church was mainly Gentile (cf. also 1Th 2:14).

And of the chief women not a few ( $\gamma \cup v a \iota \kappa \omega \nu \tau \varepsilon \tau \omega v \pi \rho \omega \tau \omega v$ ovk o $\lambda เ \gamma \alpha$ ). Literally, "And of women the first not a few." That is, a large number of women of the very first rank in the city, probably devout women also like the men just before and like those in 13:50 in Antioch in Pisidia who along with "the first men of the city" were stirred up against Paul. Here these women were openly friendly to Paul's message, whether proselytes or Gentiles or Jewish wives of Gentiles as Hort holds. It is noteworthy that here, as in Philippi, leading women take a bold stand for Christ. In Macedonia women had more freedom than elsewhere. It is not to be inferred that all those converted belonged to the higher classes, for the industrial element was clearly large (1Th 4:11). In 2Co 8:2 Paul speaks of the deep poverty of the Macedonian churches, but with Philippi mainly in mind. Ramsay thinks that Paul won many of the heathen not affiliated at all with the synagogue. Certain it is that we must allow a considerable interval of time between verses 4,5 to understand what Paul says in his Thessalonian Epistles.

Acts 17:5
Moved with jealousy ( $\zeta \eta \lambda \omega \sigma \alpha \nu \tau \varepsilon \varsigma)$. Both our English words,
zeal and
jealousy, are from the Greek $\zeta \eta \lambda$ oc. In 13:45 the Jews (rabbis) "were filled with jealousy" $(\varepsilon \pi \lambda \eta \sigma \theta \eta \sigma \alpha v \zeta \eta \lambda o v)$. That is another way of saying the same thing as here. The success of Paul was entirely too great in both places to please the rabbis. So here is jealousy of Jewish preachers towards Christian preachers. It is always between men or women of the same profession or group. In 1Th 2:3-10 Paul hints at some of the slanders spread against him by these rabbis (deceivers, using words of flattery as men-pleasers, after vain-glory, greed of gain, etc.).

Took unto them ( $\pi \rho \sigma \sigma \lambda \alpha \beta \sigma \mu \varepsilon v o$ ). Second aorist middle (indirect, to themselves) participle of $\pi \rho o \sigma \lambda \alpha \mu \beta \alpha v \omega$, old and common verb.
 or market-place was the natural resort for those with nothing to do (Mt 20:4) like the court-
house square today or various parks in our cities where bench-warmers flock. Plato (Protagoras 347 C ) calls these a $\begin{aligned} & \text { opaıo (common word, but in N.T. only here and 19:38) idlers }\end{aligned}$ or good-for-fellows. They are in every city and such "bums" are ready for any job. The church in Thessalonica caught some of these peripatetic idlers (2Th 3:10f. ) "doing nothing but doing about." So the Jewish preachers gather to themselves a choice collection of these market-loungers or loafers or wharf-rats. The Romans called them subrostrani (hangers round the rostrum or subbasilicari).

Gathering a crowd (ох入олоוךбаvтєৎ). Literally, making or getting ( $\pi о เ \varepsilon \omega$ ) a crowd (ox $\bar{\circ}$ ) , a word not found elsewhere. Probably right in the $\alpha \gamma o \rho \alpha$ itself where the rabbis could tell men their duties and pay them in advance. Instance Hyde Park in London with all the curious gatherings every day, Sunday afternoons in particular.

Set the city on an uproar ( $\varepsilon \theta o \rho \cup \beta o v v$ ). Imperfect active of $\theta$ opv $\beta \varepsilon \omega$, from $\theta$ o $\rho \cup \beta$ o (tumult), old verb, but in the N.T. only here and 20:10; Mt 9:23; Mr 4:39. They kept up the din, this combination of rabbis and rabble.
 active of $\varepsilon \varphi \cdot \sigma \tau \eta \mu$, taking a stand against, rushing at, because he was Paul's host. He may have been a Gentile (Jason the name of an ancient king of Thessaly), but the Jews often used it for Joshua or Jesus (II Macc. 1:7).

They sought ( $\varepsilon \zeta \eta \tau 0 u v$ ). Imperfect active. They burst into the house and searched up and down.

Them (avtouc). Paul and Silas. They were getting ready to have a lynching party.
Acts 17:6
When they found them not ( $\mu \eta \varepsilon \cup \rho o v \tau \varepsilon \varsigma)$. Usual negative $\mu \eta$ with the participle in the Koine, second aorist (effective) active participle, complete failure with all the noise and "bums."

They dragged ( $\varepsilon \sigma \cup \rho \circ v)$. Imperfect active, vivid picture, they were dragging (literally). See already 8:3; 16:19. If they could not find Paul, they could drag Jason his host and some other Christians whom we do not know.

Before the rulers of the city ( $\varepsilon \pi$ тоия $\pi$ то $\iota \tau \alpha \rho \chi \alpha \varsigma$ ). This word does not occur in Greek literature and used to be cited as an example of Luke's blunders. But now it is found in an inscription on an arch in the modern city preserved in the British Museum. It is also found in seventeen inscriptions (five from Thessalonica) where the word or the verb $\pi о \lambda \iota \tau \alpha \rho \chi \varepsilon \omega$ occurs. It is a fine illustration of the historical accuracy of Luke in matters of detail. This title for city officers in Thessalonica, a free city, is correct. They were burgomasters or "rulers of the city."

Crying ( $\beta \mathbf{o} \omega \vee \tau \varepsilon \varsigma$ ). Yelling as if the house was on fire like the mob in Jerusalem (21:28).
These that have turned the world upside down ( $о \tau \eta v$ oוкоч $\mu \varepsilon \nu \eta v a v a \sigma \tau \alpha \tau \omega \sigma \alpha v \tau \varepsilon \varsigma$ ). The use of oוкоט $\mu \varepsilon \nu \eta \nu$ (supply $\gamma \varepsilon v$ or $\chi \omega \rho a \nu$, the inhabited earth, present passive participle
of oוкع $\omega$ ) means the Roman Empire, since it is a political charge, a natural hyperbole in their excitement, but the phrase occurs for the Roman Empire in Lu 2:1 . It is possible that news had come to Thessalonica of the expulsion of the Jews from Rome by Claudius. There is truth in the accusation, for Christianity is revolutionary, but on this particular occasion the uproar (verse 5) was created by the rabbis and the hired loafers. The verb avaotatow (here first aorist active participle) does not occur in the ancient writers, but is in LXX and in Ac 17:6; 21:38; Ga 5:12. It occurs also in Harpocration (A.D. 4th cent.) and about 100 B.C. $\varepsilon \xi \alpha v a \sigma \tau \alpha \tau \sigma \omega$ is found in a fragment of papyrus (Tebtunis no. 2) and in a Paris Magical Papyrus 1. 2243f. But in an Egyptian letter of Aug. 4, 41 A.D. (Oxyrhynchus Pap. no. 119, 10) "the bad boy" uses it = "he upsets me" or " he drives me out of my senses" (avaбтato $\mu \varepsilon)$. See Deissmann, Light from the Ancient East, pp. 84f. It is not a "Biblical word" at all, but belongs to the current Koine. It is a vigorous and graphic term.

Acts 17:7
Whom Jason hath received (ovৎ v of $v \pi \frac{\delta}{} \varepsilon \chi \circ \mu \alpha$, to entertain, old verb, but in N.T. only in Lu 10:38; 19:6; Ac 17:7; Jas 2:25 . This is Jason's crime and he is the prisoner before the politarchs.

These all (ovto $\pi \alpha v \tau \varepsilon \varsigma)$. Jason, the "brethren" of verse 6, Paul and Silas, and all Christians everywhere.

Contrary ( $\alpha \pi \varepsilon \nu \alpha \nu \tau$ ). Late compound preposition ( $\alpha \pi 0, \varepsilon \nu, \alpha \nu \tau$ ) found in Polybius, LXX, here only in the N.T.

The decrees of Caesar ( $\tau \omega \nu \delta o \gamma \mu \alpha \tau \omega \nu$ Kaıб $\alpha \rho \circ \varsigma$ ). This was a charge of treason and was a sure way to get a conviction. Probably the Julian Leges Majestatis are in mind rather than the definite decree of Claudius about the Jews (Ac 18:2).

Saying that there is another king, one Jesus (Baбi入 $\varepsilon \alpha \varepsilon \tau \varepsilon \rho \circ \nu \lambda \varepsilon \gamma \circ v \tau \varepsilon \varsigma \varepsilon \iota v \alpha$ I $\eta \sigma o v \nu$ ). Note the very order of the words in the Greek indirect discourse with the accusative and infinitive after $\lambda \varepsilon \gamma 0 \nu \tau \varepsilon \varsigma$. Baбı $\lambda \varepsilon \alpha \varepsilon \tau \varepsilon \rho \circ \nu$ comes first, a different king, another emperor than Caesar. This was the very charge that the smart student of the Pharisees and Herodians had tried to catch Jesus on (Mr 12:14 ). The Sanhedrin made it anyhow against Jesus to Pilate (Lu 23:2) and Pilate had to notice it. "Although the emperors never ventured to assume the title rex at Rome, in the Eastern provinces they were regularly termed basileus" (Page). The Jews here, as before Pilate (Joh 19:15 ), renounce their dearest hope of a Messianic king. It is plain that Paul had preached about Jesus as the Messiah, King of the Kingdom of God over against the Roman Empire, a spiritual kingdom, to be sure, but the Jews here turn his language to his hurt as they did with Jesus. As a matter of fact Paul's preaching about the kingdom and the second coming of Christ was gravely misunderstood by the Christians at Thessalonica after his departure (1Th 4:13-5:4; 2Th 2 ). The Jews were quick to seize upon his language about Jesus Christ to his own injury. Clearly here in Thessalonica Paul had
faced the power of the Roman Empire in a new way and pictured over against it the grandeur of the reign of Christ.

Acts 17:8
They troubled the multitude and the rulers ( $\varepsilon \tau \alpha \rho \alpha \xi \alpha \nu \tau \circ v \circ \chi \lambda о \nu \kappa \alpha \tau о \nu \varsigma \pi о \lambda ı \tau \alpha \rho \chi \alpha \varsigma)$. First aorist active of $\tau \alpha \rho \alpha \sigma \sigma \omega$, old verb to agitate. The excitement of the multitude "agitated" the politarchs still more. To the people it meant a revolution, to the politarchs a charge of complicity in treason if they let it pass. They had no way to disprove the charge of treason and Paul and Silas were not present.

Acts 17:9
When they had taken security ( $\lambda \alpha \beta$ оv七єৎ то $\kappa \kappa \alpha \nu \circ$ ). A Greek idiom=Latin satis accipere, to receive the sufficient (bond), usually money for the fulfilment of the judgment. Probably the demand was made of Jason that he see to it that Paul and Silas leave the city not to return. In 1Th 2:17f. Paul may refer to this in mentioning his inability to visit these Thessalonians again. The idiom $\lambda \alpha \mu \beta \alpha v \varepsilon \iota v$ to ואavov now is found in two inscriptions of the second century A.D. (O. G. I. S. 484, 50 and 629, 101). In Vol. III Oxyrhynchus Papyri no. 294 A.D. 22 the corresponding phrase $\delta o v v a \varepsilon$ عוкаvov ("to give security") appears.

They let them go ( $\alpha \pi \varepsilon \lambda v \sigma a v a v \tau o v \varsigma)$. The charge was serious but the proof slim so that the politarchs were glad to be rid of the case.

Acts 17:10
Immediately by night ( $\varepsilon v \theta \varepsilon \omega \varsigma \delta \iota \alpha v \cup \kappa \tau \circ \varsigma)$. Paul's work had not been in vain in Thessalonica (1Th 1:7f.; 2:13,20 ). Paul loved the church here. Two of them, Aristarchus and Secundus, will accompany him to Jerusalem (Ac 20:4) and Aristarchus will go on with him to Rome (27:2). Plainly Paul and Silas had been in hiding in Thessalonica and in real danger. After his departure severe persecution came to the Christians in Thessalonica (1Th 2:14; 3:1-5; $2 \mathrm{Th} 1: 6$ ). It is possible that there was an escort of Gentile converts with Paul and Silas on this night journey to Beroea which was about fifty miles southwest from Thessalonica near Pella in another district of Macedonia (Emathia). There is a modern town there of some 6,000 people.

Went ( $\alpha \pi \eta \iota \sigma \alpha v$ ). Imperfect third plural active of $\alpha \pi \varepsilon \mu$, old verb to go away, here alone in the N.T. A literary, almost Atticistic, form instead of $\alpha \pi \eta \lambda \theta$ ov.

Into the synagogue of the Jews ( $\varepsilon \iota \varsigma \tau \eta \nu \sigma v v \alpha \gamma \omega \gamma \eta \nu \tau \omega \nu$ Iov $\alpha a \omega \nu)$. Paul's usual custom and he lost no time about it. Enough Jews here to have a synagogue.

Acts 17:11
More noble than those ( $\varepsilon v \gamma \varepsilon v \varepsilon \sigma \tau \varepsilon \rho o \tau \omega \nu$ ). Comparative form of $\varepsilon v \gamma \varepsilon \nu \eta \varsigma$, old and common adjective, but in N.T. only here and Lu 19:12; 1Co 1:26. Followed by ablative case $\tau \omega \nu$ as often after the comparative.

With all readiness of mind ( $\mu \varepsilon \tau \alpha \pi \alpha \sigma \eta \varsigma \pi \rho o \theta \nu \mu \iota \alpha)$. Old word from $\pi \rho o \theta \nu \mu \circ \varsigma(\pi \rho \circ$, $\theta \nu \mu \circ \varsigma)$ and means eagerness, rushing forward. In the N.T. only here and 2Co 8:11-19; 9:2
. In Thessalonica many of the Jews out of pride and prejudice refused to listen. Here the Jews joyfully welcomed the two Jewish visitors.

Examining the Scriptures daily ( $\left.\kappa \alpha \theta^{\prime} \eta \mu \varepsilon \rho \alpha v \alpha v a \kappa \rho ı v o v \tau \varepsilon \varsigma ~ \tau \alpha \varsigma ~ \gamma \rho а \varphi а \varsigma\right) . ~ P a u l ~ e x-~$ pounded the Scriptures daily as in Thessalonica, but the Beroeans, instead of resenting his new interpretation, examined ( $\alpha v \alpha \kappa \rho \iota v \omega$ means to sift up and down, make careful and exact research as in legal processes as in Ac 4:9; 12:19, etc.) the Scriptures for themselves. In Scotland people have the Bible open on the preacher as he expounds the passage, a fine habit worth imitating.

Whether these things were so ( $\varepsilon$ ع $\chi$ о $\tau \alpha \cup \tau \alpha$ out $\omega \varsigma$ ). Literally, "if these things had it thus." The present optative in the indirect question represents an original present indicative as in $\operatorname{Lu}$ 1:29 (Robertson, Grammar, pp. 1043f.). This use of $\varepsilon$ with the optative may be looked at as the condition of the fourth class (undetermined with less likelihood of determination) as in Ac 17:27; 20:16; 24:19; 27:12 (Robertson, Grammar, p. 1021). The Beroeans were eagerly interested in the new message of Paul and Silas but they wanted to see it for themselves. What a noble attitude. Paul's preaching made Bible students of them. The duty of private interpretation is thus made plain (Hovey).

Acts 17:12
Many therefore ( $П о \lambda \lambda o \mu \varepsilon v o v v$ ). As a result of this Bible study.
Also of the Greek women of honourable estate. The word H $\Sigma \lambda \lambda \eta \eta$ vis means Greek woman, but the word $\gamma \nu v \eta$ is added. In particular women of $\operatorname{rank}(\varepsilon v \sigma \chi \eta \mu \circ v \omega v$, from $\varepsilon v$ and $\varepsilon \chi \omega$, graceful figure and the honourable standing) as in 13:50 (Mr 15:43 ). Probably Luke means by implication that the "men" ( $\alpha v \delta \rho \omega v$ ) were also noble Greeks though he does not expressly say so. So then the Jews were more open to the message, the proselytes or Godfearers followed suit, with "not a few" (ouk o $\lambda_{1}$ ץo) real Greeks (both men and women) believing. It was quick and fine work.

Acts 17:13
Was proclaimed (катпүү६ $\lambda \eta$ ). Second aorist passive indicative of ката $\gamma \gamma \varepsilon \lambda \lambda \omega$, common late verb as in Ac 16:21.

Of Paul (vло Пau入ou). By Paul, of course.
Stirring up and troubling the multitudes ( $\sigma \alpha \lambda \varepsilon v o v \tau \varepsilon \varsigma \kappa \alpha \tau \alpha \rho \alpha \sigma \sigma o v \tau \varepsilon \varsigma \tau$ тои¢ $о \chi \lambda о \cup \varsigma$ ). Shaking the crowds like an earthquake ( $4: 31$ ) and disturbing like a tornado (17:8). Success at Thessalonica gave the rabbis confidence and courage. The attack was sharp and swift. The Jews from Antioch in Pisidia had likewise pursued Paul to Iconium and Lystra. How long Paul had been in Beroea Luke does not say. But a church was established here which gave a good account of itself later and sent a messenger (Ac 20:4) with their part of the collection to Jerusalem. This quiet and noble town was in a whirl of excitement over the attacks of the Jewish emissaries from Thessalonica who probably made the same charge of treason against Paul and Silas.

Acts 17:14
And then immediately ( $\varepsilon v \theta \varepsilon \omega \varsigma \delta \varepsilon \tau \sigma \tau \varepsilon$ ). They acted swiftly as in Thessalonica.
Sent forth ( $\varepsilon \xi \alpha \pi \varepsilon \sigma \tau \varepsilon \iota \lambda \alpha v$ ). Double compound ( $\varepsilon \xi, \alpha \pi o$, both out and away) common in late Greek. First aorist active indicative ( $\varepsilon \xi \alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$, liquid verb). Same form in 9:30.

As far as to the sea $(\varepsilon \omega \varsigma \varepsilon \pi \tau \eta \nu \theta \alpha \lambda \alpha \sigma \sigma \alpha v)$. It is not clear whether Paul went all the way to Athens by land or took ship at Dium or Pydna, some sixteen miles away, and sailed to Athens. Some even think that Paul gave the Jews the slip and went all the way by land when they expected him to go by sea. At any rate we know that Paul was grieved to cut short his work in Macedonia, probably not over six months in all, which had been so fruitful in Philippi, Thessalonica, and Beroea. Silas and Timothy (note his presence) remained behind in Beroea and they would keep the work going. Paul no doubt hoped to return soon. Silas and Timothy in Beroea would also serve to screen his flight for the Jews wanted his blood, not theirs. The work in Macedonia spread widely (1Th 1:7f. ).

Acts 17:15
But they that conducted Paul (о $\delta \varepsilon \kappa \alpha \theta \iota \sigma \tau \alpha v o v \tau \varepsilon \varsigma ~ \tau o v ~ \Pi a v \lambda o v)$. Articular present active participle of $\kappa \alpha \theta \iota \sigma \tau \alpha \nu \omega$ (late form in $\mathrm{A} \mathrm{B} \mathrm{of} \kappa \alpha \theta \iota \sigma \tau \eta \mu$ or $\kappa \alpha \theta \iota \sigma \tau \alpha \omega$ ), an old verb with varied uses to put down, to constitute, to conduct, etc. This use here is in the LXX (Jos 6:23 ) and old Greek also.

To Athens ( $\varepsilon \omega \varsigma A \theta \eta \nu \omega v$ ). To make sure of his safe arrival.
That they should come to him with all speed (ıva $\omega \varsigma \tau \alpha \chi \iota \tau \alpha \varepsilon \lambda \theta \omega \sigma \iota \nu \pi \rho \circ \varsigma \alpha \nu \tau o v$ ). Note the neat Greek idiom $\omega \varsigma \tau \alpha \chi เ \sigma \tau \alpha$ as quickly as possible (good Attic idiom). The indirect command and purpose ( $\imath \alpha-\varepsilon \lambda \theta \omega \sigma \iota v$, second aorist active subjunctive) is also neat Greek (Robertson, Grammar, p. 1046).

Departed ( $\varepsilon \xi \eta เ \varepsilon \sigma \alpha v$ ). Imperfect active of $\varepsilon \xi \varepsilon \varepsilon \mu$, old Greek word, but rare in N.T. All in Acts (13:42; 17:15; 20:7; 27:43)

Acts 17:16
Now while Paul waited for them in Athens (Ev $\delta \varepsilon \tau \alpha \iota \varsigma A \theta \eta v a \iota \varsigma \varepsilon \kappa \delta \varepsilon \chi о \mu \varepsilon v o v \alpha v \tau о \cup \varsigma$ tov חav ceive, but only with the sense of looking out for, expecting found here and elsewhere in N.T We know that Timothy did come to Paul in Athens (1Th 3:1,6 ) from Thessalonica and was sent back to them from Athens. If Silas also came to Athens, he was also sent away, possibly to Philippi, for that church was deeply interested in Paul. At any rate both Timothy and Silas came from Macedonia to Corinth with messages and relief for Paul (Ac 18:5;2Co 11:8f. ). Before they came and after they left, Paul felt lonely in Athens (1Th 3:1), the first time on this tour or the first that he has been completely without fellow workers. Athens had been captured by Sulla B.C. 86. After various changes Achaia, of which Corinth is the capital, is a separate province from Macedonia and A.D. 44 was restored by Claudius to the Senate with the Proconsul at Corinth. Paul is probably here about A.D. 50. Politically Athens is no
longer of importance when Paul comes though it is still the university seat of the world with all its rich environment and traditions. Rackham grows eloquent over Paul the Jew of Tarsus being in the city of Pericles and Demosthenes, Socrates and Plato and Aristotle, Sophocles and Euripides. In its Agora Socrates had taught, here was the Academy of Plato, the Lyceum of Aristotle, the Porch of Zeno, the Garden of Epicurus. Here men still talked about philosophy, poetry, politics, religion, anything and everything. It was the art centre of the world. The Parthenon, the most beautiful of temples, crowned the Acropolis. Was Paul insensible to all this cultural environment? It is hard to think so for he was a university man of Tarsus and he makes a number of allusions to Greek writers. Probably it had not been in Paul's original plan to evangelize Athens, difficult as all university seats are, but he cannot be idle though here apparently by chance because driven out of Macedonia.

Was provoked ( $\pi \alpha \rho \omega \xi v v \varepsilon \tau 0)$. Imperfect passive of $\pi \alpha \rho \circ \xi \nu v \omega$, old verb to sharpen, to stimulate, to irritate (from $\pi \alpha \rho \alpha, ~ o \xi v \varsigma)$, from $\pi \alpha \rho \circ \xi \nu \sigma \mu \circ \varsigma(A c 15: 39)$ ), common in old Greek, but in N.T. only here and 1Co 13:5. It was a continual challenge to Paul's spirit when he beheld ( $\theta \varepsilon \omega \rho o u v \tau o \varsigma$, genitive of present participle agreeing with autov (his), though late MSS. have locative $\theta \varepsilon \omega \rho o u v \tau$ agreeing with $\varepsilon v \alpha \nu \tau \omega)$.
 preserved in the English (either the city being full of idols or that the city was full of idols, sort of indirect discourse). Paul, like any stranger was looking at the sights as he walked around. This adjective $\kappa \alpha \tau \varepsilon \iota \delta \omega \lambda o v$ (perfective use of $\kappa \alpha \tau \alpha$ and $\varepsilon ו \delta \omega \lambda o v$ is found nowhere else, but it is formed after the analogy of ката $\mu \pi \varepsilon \lambda о \sigma, \kappa \alpha \tau \alpha \delta \varepsilon v \delta \rho \circ v$ ), full of idols. Xenophon (de Republ. Ath.) calls the city o $\lambda \eta \beta$ о $\mu \circ \sigma, ~ o \lambda \eta ~ \theta \nu \mu \alpha \theta \varepsilon o \iota s ~ \kappa \alpha ~ \alpha v \alpha \theta \eta \mu \alpha$ (all altar, all sacrifice and offering to the gods). These statues were beautiful, but Paul was not deceived by the mere art for art's sake. The idolatry and sensualism of it all glared at him (Ro 1:18-32). Renan ridicules Paul's ignorance in taking these statues for idols, but Paul knew paganism better than Renan. The superstition of this centre of Greek culture was depressing to Paul. One has only to recall how superstitious cults today flourish in the atmosphere of Boston and Los Angeles to understand conditions in Athens. Pausanias says that Athens had more images than all the rest of Greece put together. Pliny states that in the time of Nero Athens had over 30,000 public statues besides countless private ones in the homes. Petronius sneers that it was easier to find a god than a man in Athens. Every gateway or porch had its protecting god. They lined the street from the Piraeus and caught the eye at every place of prominence on wall or in the agora.

Acts 17:17
So he reasoned ( $\delta 1 \varepsilon \lambda \varepsilon \gamma \varepsilon \tau \frac{\mu \varepsilon v}{} \mathrm{ovv}$ ). Accordingly therefore, with his spirit stirred by the proof of idolatry. Imperfect middle of $\delta \iota \alpha \lambda \varepsilon \gamma \omega$, same verb used in verse 2 which see. First he reasoned in the synagogue at the services to the Jews and the God-fearers, then daily in the agora or marketplace (southwest of the Acropolis, between it and the Areopagus and
the Pnyx) to the chance-comers, "them that met him" ( $\pi \rho \circ \varsigma \tau о \nu \varsigma \pi \alpha \rho \alpha \tau v \gamma \chi \alpha v o v \tau \alpha \varsigma) . ~ S i m-$ ultaneously with the synagogue preaching at other hours Paul took his stand like Socrates before him and engaged in conversation with ( $\pi \rho \circ \varsigma)$ those who happened by. This old verb, $\pi \alpha \rho \alpha \tau v \gamma \chi \alpha \nu \omega$, occurs here alone in the N.T. and accurately pictures the life in the agora. The listeners to Paul in the agora would be more casual than those who stop for street preaching, a Salvation Army meeting, a harangue from a box in Hyde Park. It was a slim chance either in synagogue or in agora, but Paul could not remain still with all the reeking idolatry around him. The boundaries of the agora varied, but there was always the Поєкı $\lambda \eta$ $\Sigma \tau o \alpha$ (the Painted Porch), over against the Acropolis on the west. In this $\Sigma \tau o \alpha$ (Porch) Zeno and other philosophers and rhetoricians held forth from time to time. Paul may have stood near this spot.

## Acts 17:18

And certain also of the Epicurean and Stoic philosophers encountered him ( $\tau เ v \varepsilon \varsigma$ $\delta \varepsilon \kappa \alpha \tau \omega \nu$ Елıкоирı $\omega \nu \kappa \alpha \Sigma \tau \omega \iota \kappa \omega \nu \varphi \iota \lambda о \sigma о \varphi \omega \nu \sigma v \nu \varepsilon \beta \alpha \lambda \lambda о \nu \alpha \nu \tau \omega)$. Imperfect active of $\sigma v v \beta \alpha \lambda \lambda \omega$, old verb, in the N.T. only by Luke, to bring or put together in one's mind (Lu $2: 19$ ), to meet together (Ac 20:14), to bring together aid ( 18:27), to confer or converse or dispute as here and already $4: 15$ which see. These professional philosophers were always ready for an argument and so they frequented the agora for that purpose. Luke uses one article and so groups the two sects together in their attitude toward Paul, but they were very different in fact. Both sects were eager for argument and both had disdain for Paul, but they were the two rival practical philosophies of the day, succeeding the more abstruse theories of Plato and Aristotle. Socrates had turned men's thought inward ( $\Gamma \nu \omega \theta \Sigma \varepsilon \alpha v \tau o v$, Know Thyself) away from the mere study of physics. Plato followed with a profound development of the inner self (metaphysics). Aristotle with his cyclopaedic grasp sought to unify and relate both physics and metaphysics. Both Zeno and Epicurus (340-272 B.C.) took a more practical turn in all this intellectual turmoil and raised the issues of everyday life. Zeno (360-260 B.C.) taught in the $\Sigma$ roa (Porch) and so his teaching was called Stoicism. He advanced many noble ideas that found their chief illustration in the Roman philosophers (Seneca, Epictetus, Marcus Aurelius). He taught self-mastery and hardness with an austerity that ministered to pride or suicide in case of failure, a distinctly selfish and unloving view of life and with a pantheistic philosophy. Epicurus considered practical atheism the true view of the universe and denied a future life and claimed pleasure as the chief thing to be gotten out of life. He did not deny the existence of gods, but regarded them as unconcerned with the life of men. The Stoics called Epicurus an atheist. Lucretius and Horace give the Epicurean view of life in their great poems. This low view of life led to sensualism and does today, for both Stoicism and Epicureanism are widely influential with people now. "Eat and drink for tomorrow we die," they preached. Paul had doubtless become acquainted with both of these philosophies for they were widely prevalent over the world. Here he confronts them in their very home.

He is challenged by past-masters in the art of appealing to the senses, men as skilled in their dialectic as the Pharisaic rabbis with whom Paul had been trained and whose subtleties he had learned how to expose. But, so far as we know, this is a new experience for Paul to have a public dispute with these philosophical experts who had a natural contempt for all Jews and for rabbis in particular, though they found Paul a new type at any rate and so with some interest in him. "In Epicureanism, it was man's sensual nature which arrayed itself against the claims of the gospel; in Stoicism it was his self-righteousness and pride of intellect" (Hackett). Knowling calls the Stoic the Pharisee of philosophy and the Epicurean the Sadducee of philosophy. Socrates in this very agora used to try to interest the passers-by in some desire for better things. That was 450 years before Paul is challenged by these superficial sophistical Epicureans and Stoics. It is doubtful if Paul had ever met a more difficult situation.

What would this babbler say? (T $\alpha \nu \theta \varepsilon \lambda о$ о $\sigma \pi \varepsilon \rho \mu о \lambda о \gamma о \varsigma$ оvтоৎ $\lambda \varepsilon \gamma \varepsilon เ \nu$ ?). The word for "babbler" means "seed-picker" or picker up of seeds ( $\sigma \pi \varepsilon \rho \mu \alpha$, seed, $\lambda \varepsilon \gamma \omega$, to collect) like a bird in the agora hopping about after chance seeds. Plutarch applies the word to crows that pick up grain in the fields. Demosthenes called Aeschines a $\sigma \pi \varepsilon \rho \mu о \lambda о \gamma o \varsigma$. Eustathius uses it of a man hanging around in the markets picking up scraps of food that fell from the carts and so also of mere rhetoricians and plagiarists who picked up scraps of wisdom from others. Ramsay considers it here a piece of Athenian slang used to describe the picture of Paul seen by these philosophers who use it, for not all of them had it ("some," rivec). Note the use of $\alpha v$ and the present active optative $\theta \varepsilon \lambda o$, conclusion of a fourth-class condition in a rhetorical question (Robertson, Grammar, p. 1021). It means, What would this picker up of seeds wish to say, if he should get off an idea? It is a contemptuous tone of supreme ridicule and doubtless Paul heard this comment. Probably the Epicureans made this sneer that Paul was a charlatan or quack.

Other some (o $\delta \varepsilon$ ). But others, in contrast with the "some" just before. Perhaps the Stoics take this more serious view of Paul.

He seemeth to be a setter forth of strange gods ( $\zeta \nu \omega \nu \nu \delta a \mu \circ \nu t \omega \nu \delta о \kappa \varepsilon \kappa \alpha \tau \alpha \gamma \gamma \varepsilon \lambda \varepsilon \nu \varsigma$ $\varepsilon เ v \alpha$ ). This view is put cautiously by $\delta$ ок (seems). Kataүүع $\lambda \varepsilon \cup \varsigma$ does not occur in the old Greek, though in ecclesiastical writers, but Deissmann (Light from the Ancient East, p. 99) gives an example of the word "on a marble stele recording a decree of the Mitylenaens in honour of the Emperor Augustus," where it is the herald of the games. Here alone in the N.T. $\Delta a \mu$ oviov is used in the old Greek sense of deity or divinity whether good or bad, not in the N.T. sense of demons. Both this word and катаүү $\bar{\lambda} \varepsilon \cup \varsigma$ are used from the Athenian standpoint. Eevos is an old word for a guest-friend (Latin hospes) and then host (Ro 16:23 ), then for foreigner or stranger (Mt 25:31; Ac 17:21), new and so strange as here and Heb 13:9; $1 \mathrm{Pe} 4: 12$, and then aliens (Eph 2:12 ). This view of Paul is the first count against Socrates: Socrates does wrong, introducing new deities ( $\alpha \delta \iota \kappa \varepsilon \Sigma \omega \kappa \rho \alpha \tau \eta \sigma$, каıva $\delta \alpha \not \mu \circ v \iota \alpha$ $\varepsilon \iota \sigma \varphi \varepsilon \rho \omega v$, Xen. Mem. I). On this charge the Athenians voted the hemlock for their greatest
citizen. What will they do to Paul? This Athens was more sceptical and more tolerant than the old Athens. But Roman law did not allow the introduction of a new religion (religio illicita). Paul was walking on thin ice though he was the real master philosopher and these Epicureans and Stoics were quacks. Paul had the only true philosophy of the universe and life with Jesus Christ as the centre (Col 1:12-20 ), the greatest of all philosophers as Ramsay justly terms him. But these men are mocking him.

Because he preached Jesus and the resurrection (o $о \tau \circ \mathrm{I} \eta \sigma o v \nu ~ к \alpha \tau \eta \nu$ avaбтабı $\left.\varepsilon \cup \eta \gamma \gamma \varepsilon \lambda_{\iota} \zeta \alpha \tau о\right)$. Reason for the view just stated. Imperfect middle indicative of $\varepsilon v a \gamma \gamma \varepsilon \lambda_{\iota} \zeta \omega$, to "gospelize." Apparently these critics considered avaota⿱\zh7ৎ (Resurrection) another deity on a par with Jesus. The Athenians worshipped all sorts of abstract truths and virtues and they misunderstood Paul on this subject. They will leave him as soon as he mentions the resurrection (verse 32). It is objected that Luke would not use the word in this sense here for his readers would not under stand him. But Luke is describing the misapprehension of this group of philosophers and this interpretation fits in precisely.

Acts 17:19
And they took hold of him ( $\varepsilon \pi \iota \lambda \alpha \beta$ о $\mu v v_{0} \delta \varepsilon \alpha v \tau o v$ ). Second aorist middle participle of $\varepsilon \pi \lambda \lambda \mu \beta \alpha \nu \omega$, old verb, but in the N.T. only in the middle, here with the genitive avtov to lay hold of, but with no necessary sense of violence (Ac 9:27; 23:27; Mr 8:23 ), unless the idea is that Paul was to be tried before the Court of Areopagus for the crime of bringing in strange gods. But the day for that had passed in Athens. Even so it is not clear whether " unto the Areopagus ( $\varepsilon \pi \tau \tau \vee \mathrm{A} \varepsilon \varepsilon^{\prime} \circ \vee \Pi \alpha \gamma \circ v$ ") means the Hill of Mars (west of the Acropolis, north of the agora and reached by a flight of steps in the rock) or the court itself which met elsewhere as well as on the hills, usually in fact in the Stoa Basilica opening on the agora and near to the place where the dispute had gone on. Raphael's cartoon with Paul standing on Mars Hill has made us all familiar with the common view, but it is quite uncertain if it is true. There was not room on the summit for a large gathering. If Paul was brought before the Court of Areopagus (commonly called the Areopagus as here), it was not for trial as a criminal, but simply for examination concerning his new teaching in this university city whether it was strictly legal or not. Paul was really engaged in proselytism to turn the Athenians away from their old gods to Jesus Christ. But "the court of refined and polished Athenians was very different from the rough provincial magistrates of Philippi, and the philosophers who presented Paul to their cognizance very different from the mob of Thessalonians" (Rackham). It was all very polite.

May we know? ( $\Delta v v a \mu \varepsilon \theta \alpha \quad \gamma v \omega v \alpha$ ). Can we come to know (ingressive second aorist active infinitive).

This new teaching ( $\eta$ кaıv $\eta u \tau \eta \delta_{\iota} \delta \alpha \chi \eta$ ). On the position of $\alpha v \tau \eta$ see Robertson, Grammar, pp. 700f. The question was prompted by courtesy, sarcasm, or irony. Evidently no definite charge was laid against Paul.

Acts 17:20
For thou bringest certain strange things ( $\xi \varepsilon v ı \zeta о \nu \tau \alpha \gamma \alpha \rho \tau \iota v \alpha \varepsilon \iota \sigma \varphi \varepsilon \rho \varepsilon ı \varsigma)$. The very verb used by Xenophon (Mem. I) about Socrates. $\Xi \varepsilon v i \zeta o v \tau \alpha$ is present active neuter plural participle of $\xi \varepsilon v \iota \zeta \omega$ and from $\xi \varepsilon v o \varsigma ~(v e r s e ~ 18), ~ " t h i n g s ~ s u r p r i s i n g ~ o r ~ s h o c k i n g ~ u s . " ~ " ~$

We would know therefore ( $\beta o v \lambda o \mu \varepsilon \theta \alpha$ ouv $\gamma \nu \omega v \alpha$ ). Very polite still, we wish or desire, and repeating $\gamma \nu \omega v a$ (the essential point).

Acts 17:21
Spent their time ( $\eta \cup \kappa \alpha \iota \rho \circ v v$ ). Imperfect active of $\varepsilon \cup \kappa \alpha \iota \rho \varepsilon \omega$. A late word to have opportunity ( $\varepsilon v$, кaı $\rho \circ \varsigma)$ from Polybius on. In the N.T. only here and Mr 6:31. They had time for,.etc. This verse is an explanatory parenthesis by Luke.

Some new thing ( $\tau$ каıvo $\tau \varepsilon \rho \circ$ ). Literally "something newer" or "fresher" than the new, the very latest, the comparative of кaıvos. Demosthenes (Philipp. 1. 43) pictures the Athenians "in the agora inquiring if anything newer is said" ( $\pi v v \theta \alpha v o \mu \varepsilon v o$ ка $\tau \alpha \tau \eta \nu \alpha \gamma о \rho \alpha v$ $\varepsilon \tau \lambda \varepsilon \gamma \varepsilon \tau \alpha v \varepsilon \omega \tau \varepsilon \rho \circ v)$. The new soon became stale with these itching and frivolous Athenians.

Acts 17:22
Stood in the midst of the Areopagus ( $\sigma \tau \alpha \theta \varepsilon ı \varsigma \varepsilon v \mu \varepsilon \sigma \omega$ тov A $\rho \varepsilon \iota \frac{}{}$ Пaүov). First aorist passive of $\iota \sigma \tau \eta \mu$ used of Peter in 2:14. Majestic figure whether on Mars Hill or in the Stoa Basilica before the Areopagus Court. There would be a crowd of spectators and philosophers in either case and Paul seized the opportunity to preach Christ to this strange audience as he did in Caesarea before Herod Agrippa and the crowd of prominent people gathered by Festus for the entertainment. Paul does not speak as a man on trial, but as one trying to get a hearing for the gospel of Christ.

Somewhat superstitious ( $\omega \varsigma \delta \varepsilon \iota \sigma \iota \delta \alpha \iota \mu$ v superstitious," the American Standard "very religious." $\Delta \varepsilon \iota \sigma \iota \delta \alpha \mu \omega v$ is a neutral word (from $\delta \varepsilon \iota \delta \omega$, to fear, and $\delta \alpha \iota \mu \nu \nu$, deity). The Greeks used it either in the good sense of pious or religious or the bad sense of superstitious. Thayer suggests that Paul uses it "with kindly ambiguity." Page thinks that Luke uses the word to represent the religious feeling of the Athenians (religiosus) which bordered on superstition. The Vulgate has superstitiosiores. In 25:19 Festus uses the term $\delta \varepsilon \iota \sigma t \delta a \iota \mu$ via for "religion." It seems unlikely that Paul should give this audience a slap in the face at the very start. The way one takes this adjective here colours Paul's whole speech before the Council of Areopagus. The comparative here as in verse 21 means more religions than usual (Robertson, Grammar, pp. 664f.), the object of the comparison not being expressed. The Athenians had a tremendous reputation for their devotion to religion, "full of idols" (verse 16).

Acts 17:23
For $(\gamma \alpha \rho)$. Paul gives an illustration of their religiousness from his own experiences in their city.

The objects of your worship ( $\tau \alpha \sigma \varepsilon \beta \alpha \sigma \mu \alpha \tau \alpha \nu \mu \omega v$ ). Late word from $\sigma \varepsilon \beta \alpha \zeta \rho \mu \alpha$, to worship. In N T. only here and 2Th 2:4. The use of this word for temples, altars, statues, shows the conciliatory tone in the use of $\delta \varepsilon เ \sigma \iota \alpha \mu \mu$ оveбtepous in verse 22.

An altar ( $\beta \omega \mu \mathrm{ov}$ ). Old word, only here in the N.T. and the only mention of a heathen altar in the N.T

With this inscription ( $\varepsilon v \omega \varepsilon \pi \varepsilon \gamma \varepsilon \gamma \rho \alpha \pi \tau 0)$. On which had been written (stood written), past perfect passive indicative of $\varepsilon \pi \iota \gamma \rho \alpha \varphi \omega$, old and common verb for writing on inscriptions ( $\varepsilon \pi \iota ү \rho \alpha \varphi \eta$, Lu 23:38 ).

To an Unknown God (AГNOETO THEO). Dative case, dedicated to. Pausanias (I. 1, 4) says that in Athens there are "altars to gods unknown" ( $\beta \omega \mu \mathrm{o} \theta \varepsilon \omega v \alpha \gamma \nu \omega \sigma \tau \omega v$ ). Epimenides in a pestilence advised the sacrifice of a sheep to the befitting god whoever he might be. If an altar was dedicated to the wrong deity, the Athenians feared the anger of the other gods. The only use in the N.T. of $\alpha \gamma v \omega \sigma \tau o \varsigma$, old and common adjective (from $\alpha$ privative and $\gamma \nu \omega \sigma \tau o \varsigma$ verbal of $\gamma \iota \nu \omega \sigma \kappa \omega$, to know). Our word agnostic comes from it. Here it has an ambiguous meaning, but Paul uses it though to a stern Christian philosopher it may be the "confession at once of a bastard philosophy and of a bastard religion" (Hort, Hulsean Lectures, p. 64). Paul was quick to use this confession on the part of the Athenians of a higher power than yet known to them. So he gets his theme from this evidence of a deeper religious sense in them and makes a most clever use of it with consummate skill.

In ignorance ( $\alpha \gamma$ voouvtec). Present active participle of $\alpha \gamma v o \varepsilon \omega$, old verb from same root as $\alpha \gamma v \omega \sigma \tau o c$ to which Paul refers by using it.
 18) as they suspected of a God, both old and new, old in that they already worship him, new in that Paul knows who he is. By this master stroke he has brushed to one side any notion of violation of Roman law or suspicion of heresy and claims their endorsement of his new gospel, a shrewd and consummate turn. He has their attention now and proceeds to describe this God left out of their list as the one true and Supreme God. The later MSS. here read ov--toutov (whom--this one) rather than o--tovto (what--this), but the late text is plainly an effort to introduce too soon the personal nature of God which comes out clearly in verse 24.

Acts 17:24
 a god for that like the 30,000 gods of the Athenians, but the one God who made the Universe (кобнос on the old Greek sense of orderly arrangement of the whole universe).

And all things therein ( $\kappa \alpha \pi \alpha \nu \tau \alpha \tau \alpha \varepsilon v \alpha \nu \tau \omega$ ). All the details in the universe were created by this one God. Paul is using the words of Isa 42:5. The Epicureans held that matter was eternal. Paul sets them aside. This one God was not to be confounded with any of their numerous gods save with this "Unknown God."
 owner, absolute possessor of both heaven and earth (Isa $45: 7$ ), not of just parts.
 old adjective $\chi \varepsilon เ \rho о \pi о ı \eta \tau о \varsigma ~(\chi \varepsilon ь \rho, \pi о เ \varepsilon \omega)$ already in Stephen's speech ( 7:48). No doubt Paul pointed to the wonderful Parthenon, supposed to be the home of Athene as Stephen denied that God dwelt alone in the temple in Jerusalem.

Acts 17:25
 $\pi \rho o \sigma \delta \varepsilon o \mu \alpha$, to want besides, old verb, but here only in the N.T. This was strange doctrine for the people thought that the gods needed their offerings for full happiness. This self-sufficiency of God was taught by Philo and Lucretius, but Paul shows that the Epicurean missed it by putting God, if existing at all, outside the universe.

Seeing he himself giveth to all ( $\alpha \cup \tau о \varsigma ~ \delta \iota \delta o v \varsigma ~ \pi \alpha \sigma เ v$ ). This Supreme Personal God is the source of life, breath, and everything. Paul here rises above all Greek philosophers.

Acts 17:26
And he made of one ( $\varepsilon \pi \sigma \circ \eta \sigma \varepsilon \nu \tau \varepsilon \varepsilon \xi \varepsilon v o c)$. The word alpatoc (blood) is absent from Aleph A B and is a later explanatory addition. What Paul affirms is the unity of the human race with a common origin and with God as the Creator. This view runs counter to Greek exclusiveness which treated other races as barbarians and to Jewish pride which treated other nations as heathen or pagan (the Jews were $\lambda \alpha o \varsigma$, the Gentiles $\varepsilon \theta v \eta$ ). The cosmopolitanism of Paul here rises above Jew and Greek and claims the one God as the Creator of the one race of men. The Athenians themselves claimed to be avtox $\theta$ ovous (indigenous) and a special creation. Zeno and Seneca did teach a kind of cosmopolitanism (really pantheism) far different from the personal God of Paul. It was Rome, not Greece, that carried out the moral ideas of Zeno. Man is part of the universe (verse 24) and God created ( $\varepsilon \pi \sigma \circ \eta \sigma \varepsilon v$ ) man as he created ( $\pi$ oוך $\sigma a \varsigma$ ) the all.

For to dwell (катонкıı). Infinitive (present active) of purpose, so as to dwell.
Having determined (opıбaৎ). First aorist active participle of opı $\zeta \omega$, old verb to make a horizon as already in 19:42 which see. Paul here touches God's Providence. God has revealed himself in history as in creation. His hand appears in the history of all men as well as in that of the Chosen People of Israel.

Appointed seasons ( $\pi \rho \circ \sigma \tau \varepsilon \tau \alpha \gamma \mu \varepsilon v o v \varsigma ~ к \alpha ı \rho о и я) . ~ N o t ~ t h e ~ w e a t h e r ~ a s ~ i n ~ 14: 17, ~ b u t ~ " t h e ~$ times of the Gentiles" ( $\kappa \alpha \iota \rho o \varepsilon \theta v \omega v$ ) of which Jesus spoke (Lu 21:24). The perfect passive participle of $\pi \rho \circ \sigma \tau \alpha \sigma \sigma \omega$, old verb to enjoin, emphasizes God's control of human history without any denial of human free agency as was involved in the Stoic Fate (Hzı $\rho \mu \rho \mu \varepsilon v \eta$ ).

Bounds (opoӨzбtac). Limits? Same idea in Job 12:23. Nations rise and fall, but it is not blind chance or hard fate. Thus there is an interplay between God's will and man's activities, difficult as it is for us to see with our shortened vision.

Acts 17:27
That they should seek God ( $\mathrm{Z} \eta \tau \varepsilon \imath v$ tov $\theta \varepsilon o v$ ). Infinitive (present active) of purpose again. Seek him, not turn away from him as the nations had done (Ro 1:18-32).

If haply they might feel after him ( $\varepsilon \alpha \rho \alpha \gamma \varepsilon \psi \eta \lambda \alpha \varphi \eta \sigma \varepsilon \iota \alpha \nu \alpha v \tau o v)$. First aorist active (Aeolic form) optative of $\psi \eta \lambda \alpha \varphi \alpha \omega$, old verb from $\psi \alpha \omega$, to touch. So used by the Risen Jesus in his challenge to the disciples ( $\mathrm{Lu} 24: 39$ ), by the Apostle John of his personal contact with Jesus (1Jo 1:1), of the contact with Mount Sinai (Heb 12:18). Here it pictures the blind groping of the darkened heathen mind after God to "find him" ( $\varepsilon \cup \rho o t \varepsilon v$, second aorist active optative) whom they had lost. One knows what it is in a darkened room to feel along the walls for the door (De 28:29; Job 5:14; 12:25; Isa 59:10 ). Helen Keller, when told of God, said that she knew of him already, groping in the dark after him. The optative here with $\varepsilon$ is due to the condition of the fourth class (undetermined, but with vague hope of being determined) with aim also present (Robertson, Grammar, p. 1021). Note also $\alpha \rho \alpha \gamma \varepsilon$ the inferential particle $\alpha \rho \alpha$ with the delicate intensive particle $\gamma \varepsilon$.

Though he is not far from each one of us ( $\kappa \alpha \gamma \varepsilon$ оv $\mu \alpha \kappa \rho \alpha \nu \alpha \pi о \varepsilon v o \varsigma \varepsilon \kappa \alpha \sigma \tau о v \eta \mu \omega v$ $v \pi \alpha \rho \chi о \nu \tau \alpha$ ). More exactly with B L ( $\kappa \alpha \gamma \varepsilon$ instead of каıто or каıто $\gamma \varepsilon$ ), "and yet being not far from each one of us," a direct statement rather than a concessive one. The participle $v \pi \alpha \rho \chi 0 v \tau \alpha$ agrees with $\alpha v \tau o v$ and the negative ov rather than the usual $\mu \varepsilon$ with the participle makes an emphatic negative. Note also the intensive particle $\gamma \varepsilon$.

Acts 17:28
For in him ( $\varepsilon v \alpha v \tau \omega \gamma \alpha \rho$ ). Proof of God's nearness, not stoic pantheism, but real immanence in God as God dwells in us. The three verbs ( $\zeta \omega \mu \varepsilon v, \kappa ı \nu o v \mu \varepsilon \theta \alpha, \varepsilon \sigma \mu \varepsilon v)$ form an ascending scale and reach a climax in God (life, movement, existence). Kıvou $\mu \varepsilon \theta \alpha$ is either direct middle present indicative (we move ourselves) or passive (we are moved).

As certain even of your own poets ( $\omega \varsigma \kappa \alpha \tau \iota v \varepsilon \varsigma \tau \omega \nu \kappa \alpha \theta^{\prime} v \mu \alpha \varsigma \pi \circ \iota \eta \tau \omega \nu$ ). "As also some of the poets among you." Aratus of Soli in Cilicia (ab. B.C. 270) has these very words in his Ta Phainomena and Cleanthes, Stoic philosopher (300-220 B.C.) in his Hymn to Zeus has Eк $\sigma 0 v \gamma \alpha \rho \gamma \varepsilon \vee о \varsigma \varepsilon \sigma \mu \varepsilon v$. In 1Co 15:32 Paul quotes from Menander and in Tit 1:12 from Epimenides. J. Rendel Harris claims that he finds allusions in Paul's Epistles to Pindar, Aristophanes, and other Greek writers. There is no reason in the world why Paul should not have acquaintance with Greek literature, though one need not strain a point to prove it. Paul, of course, knew that the words were written of Zeus (Jupiter), not of Jehovah, but he applies the idea in them to his point just made that all men are the offspring of God.

## Acts 17:29

We ought not to think (ovк oчعı入o $\mu \varepsilon v \nu о \mu \zeta \varepsilon \iota v$ ). It is a logical conclusion (ouv, therefore) from the very language of Aratus and Cleanthes.

That the Godhead is like ( $\tau 0 \theta \varepsilon \iota \nu \varepsilon \varepsilon \tau \alpha$ ouotov). Infinitive with accusative of general reference in indirect discourse. To $\theta \varepsilon \iota \circ v$ is strictly "the divine" nature like $\theta \varepsilon \iota o \tau \eta \varsigma$ (Ro 1:20
) rather than like $\theta \varepsilon o \tau \eta \varsigma(\operatorname{Col} 2: 9)$. Paul may have used to $\theta \varepsilon \iota o v$ here to get back behind all their notions of various gods to the real nature of God. The Athenians may even have used the term themselves. After ouotoc (like) the associative instrumental case is used as with $\chi \rho v \sigma \omega \mathrm{l}, \alpha \rho \gamma \cup \rho \omega \iota, \lambda_{\imath} \theta \omega$.

Graven by art and device of man ( $\chi \alpha \rho \alpha \gamma \mu \alpha \tau \tau \varepsilon \chi \nu \eta \varsigma \kappa \alpha \varepsilon v \theta v \mu \eta \sigma \varepsilon \omega \varsigma \alpha v \theta \rho \omega \pi \sigma v$ ). Apposition with preceding and so $\chi \alpha \rho \alpha \gamma \mu \alpha \tau$ in associative instrumental case. Literally, graven work or sculpture from $\chi \alpha \rho a \sigma \sigma \omega$, to engrave, old word, but here alone in N.T. outside of Revelation (the mark of the beast). Graven work of art ( $\tau \varepsilon \chi \vee \eta \varsigma)$ or external craft, and of thought or device ( $\varepsilon v \theta v \mu \eta \sigma \varepsilon \omega \varsigma)$ or internal conception of man.

Acts 17:30
The times of ignorance ( $\tau 00 \varsigma \chi$ povous $\tau \eta \varsigma \alpha \gamma v o t a \varsigma$ ). The times before full knowledge of God came in Jesus Christ. Paul uses the very word for their ignorance ( $a \gamma v o o v v \tau \varepsilon \varsigma$ ) employed in verse 23.

Overlooked (v $\tau \varepsilon \rho เ \delta \omega v$ ). Second aorist active participle of v v $\rho \circ \rho \alpha \omega$ or $v \pi \varepsilon \rho \varepsilon \varepsilon \delta \omega$, old verb to see beyond, not to see, to overlook, not "to wink at" of the Authorized Version with the notion of condoning. Here only in the N.T. It occurs in the LXX in the sense of overlooking or neglecting (Ps 18:62; 55:1). But it has here only a negative force. God has all the time objected to the polytheism of the heathen, and now he has made it plain. In Wisdom 11:23 we have these words: "Thou overlookest the sins of men to the end they may repent."

But now ( $\tau \alpha v v v$ ). Accusative of general reference, "as to the now things or situation." All is changed now that Christ has come with the full knowledge of God. See also 27:22.

All everywhere ( $\pi \alpha v \tau \alpha \varsigma ~ \pi \alpha \nu \tau \alpha \chi \circ v)$. No exceptions anywhere.
Repent ( $\mu \varepsilon \tau \alpha v o \varepsilon ı v$ ). Present active infinitive of $\mu \varepsilon \tau \alpha v o \varepsilon \omega$ in indirect command, a permanent command of perpetual force. See on $\mu \varepsilon \tau \alpha v o \varepsilon \omega$ Ac 2:38 and the Synoptic Gospels. This word was the message of the Baptist, of Jesus, of Peter, of Paul, this radical change of attitude and life.

Acts 17:31
Inasmuch as ( $\kappa \alpha \theta$ от). According as ( $\kappa \alpha \tau \alpha$, от). Old causal conjunction, but in N.T. only used in Luke's writings (Lu 1:7; 19:9; Ac 2:45; 4:35; 17:31).

Hath appointed a day ( $\varepsilon \sigma \tau \eta \sigma \varepsilon \vee \eta \mu \varepsilon \rho \alpha v$ ) First aorist active indicative of $\iota \sigma \tau \eta \mu$, to place, set. God did set the day in his counsel and he will fulfil it in his own time.

Will judge ( $\mu \varepsilon \lambda \lambda \varepsilon \kappa \rho ı v \varepsilon เ v)$. Rather, is going to judge, $\mu \varepsilon \lambda \lambda \omega$ and the present active infinitive of $\kappa \rho \iota v \omega$. Paul here quotes Ps 9:8 where кр $\downarrow v \varepsilon$ occurs.

By the man whom he hath ordained ( $\varepsilon v \alpha v \delta \rho \omega \omega \rho \iota \sigma \varepsilon v$ ). Here he adds to the Psalm the place and function of Jesus Christ, a passage in harmony with Christ's own words in Mt $25 . \mathrm{H} \omega$ (whom) is attracted from the accusative, object of $\omega$ pıoॄv (first aorist active indicative of opl$\zeta \omega)$ to the case of the antecedent $\alpha v \delta \rho$. It has been said that Paul left the simple gospel in this address to the council of the Areopagus for philosophy. But did he? He skilfully
caught their attention by reference to an altar to an Unknown God whom he interprets to be the Creator of all things and all men who overrules the whole world and who now commands repentance of all and has revealed his will about a day of reckoning when Jesus Christ will be Judge. He has preached the unity of God, the one and only God, has proclaimed repentance, a judgment day, Jesus as the Judge as shown by his Resurrection, great fundamental doctrines, and doubtless had much more to say when they interrupted his address. There is no room here for such a charge against Paul. He rose to a great occasion and made a masterful exposition of God's place and power in human history.

Whereof he hath given assurance ( $\pi \iota \sigma \tau \imath v \pi \alpha \rho \alpha \sigma \chi \omega v)$. Second aorist active participle of $\pi \alpha \rho \varepsilon \chi \omega$, old verb to furnish, used regularly by Demosthenes for bringing forward evidence. Note this old use of $\pi \iota \sigma \tau \iota \varsigma$ as conviction or ground of confidence (Heb 11:1) like a note or title-deed, a conviction resting on solid basis of fact. All the other uses of fiotıc grow out of this one from $\pi \varepsilon \theta \omega$, to persuade.
 active participle of avıбт $\eta$, causal participle, but literally, "having raised him from the dead." This Paul knew to be a fact because he himself had seen the Risen Christ. Paul has here come to the heart of his message and could now throw light on their misapprehension about "Jesus and the Resurrection" (verse 18). Here Paul has given the proof of all his claims in the address that seemed new and strange to them.

Acts 17:32
The resurrection of the dead ( $\alpha v \alpha \sigma \tau \alpha \sigma \iota v ~ v \varepsilon \kappa \rho \omega v$ ). Rather, "a resurrection of dead men." No article with either word. The Greeks believed that the souls of men lived on, but they had no conception of resurrection of the body. They had listened with respect till Paul spoke of the actual resurrection of Jesus from the dead as a fact, when they did not care to hear more.

Some mocked (o $\mu \varepsilon v \varepsilon \chi \lambda \varepsilon v a \zeta o v$ ). Imperfect active of $\chi \lambda \varepsilon v a \zeta \omega$, a common verb (from $\chi \lambda \varepsilon \cup \eta$, jesting, mockery). Only here in the N.T. though late MSS. have it in 2:13 (best MSS. $\delta \operatorname{ta\chi } \lambda \varepsilon v a \zeta(\omega)$. Probably inchoative here, began to mock. In contempt at Paul's statement they declined to listen further to "this babbler" (verse 18) who had now lost what he had gained with this group of hearers (probably the light and flippant Epicureans).

But others (o $\delta \varepsilon$ ). A more polite group like those who had invited him to speak (verse 19). They were unconvinced, but had better manners and so were in favour of an adjournment. This was done, though it is not clear whether it was a serious postponement or a courteous refusal to hear Paul further (probably this). It was a virtual dismissal of the matter. " It is a sad story--the noblest of ancient cities and the noblest man of history--and he never cared to look on it again" (Furneaux).

Acts 17:33

Thus Paul went out from among them (ov $\omega \varsigma$ o Пav No further questions, no effort to arrest him, no further ridicule. He walked out never to return to Athens. Had he failed?

Acts 17:34
Clave unto him and believed ( $\kappa \circ \lambda \lambda \eta \theta \varepsilon v \tau \varepsilon \varsigma ~ \alpha \cup \tau \omega \varepsilon \pi \iota \sigma \tau \varepsilon \cup \sigma \alpha v$ ). First aorist passive of this strong word ко $\lambda \lambda \alpha \omega$, to glue to, common in Acts ( $5: 13 ; 8: 29 ; 9: 26 ; 10: 28$ ) No sermon is a failure which leads a group of men ( $\alpha v \delta \rho \varepsilon \varsigma$ ) to believe (ingressive aorist of $\pi \iota \sigma \tau \varepsilon v \omega$ ) in Jesus Christ. Many so-called great or grand sermons reap no such harvest.

Dionysius the Areopagite ( $\Delta$ ıovvoıos o Apعo $\pi \alpha \nmid \tau \eta \varsigma$ ). One of the judges of the Court of the Areopagus. That of itself was no small victory. He was one of this college of twelve judges who had helped to make Athens famous. Eusebius says that he became afterwards bishop of the Church at Athens and died a martyr.

A woman named Damaris ( $\gamma \cup v \eta$ ovo $\mu \alpha \tau \Delta \alpha \mu \alpha \rho ı \varsigma)$. A woman by name Damaris. Not the wife of Dionysius as some have thought, but an aristocratic woman, not necessarily an educated courtezan as Furneaux holds. And there were "others" ( $\varepsilon \tau \varepsilon \rho \circ$ ) with them, a group strong enough to keep the fire burning in Athens. It is common to say that Paul in 1Co 2:1-5 alludes to his failure with philosophy in Athens when he failed to preach Christ crucified and he determined never to make that mistake again. On the other hand Paul determined to stick to the Cross of Christ in spite of the fact that the intellectual pride and superficial culture of Athens had prevented the largest success. As he faced Corinth with its veneer of culture and imitation of philosophy and sudden wealth he would go on with the same gospel of the Cross, the only gospel that Paul knew or preached. And it was a great thing to give the world a sermon like that preached in Athens.

## Acts 18

Acts 18:1
To Corinth ( $\varepsilon \iota \varsigma$ KopıvӨov). Mummius had captured and destroyed Corinth B.C. 146. It was restored by Julius Caesar B.C. 46 as a boom town and made a colony. It was now the capital of the province of Achaia and the chief commercial city of Greece with a cosmopolitan population. It was only fifty miles from Athens. The summit of Acrocorinthus was 1,800 feet high and the ports of Cenchreae and Lechaeum and the Isthmus across which ships were hauled gave it command of the trade routes between Asia and Rome. The temple of Aphrodite on the Acrocorinthus had a thousand consecrated prostitutes and the very name to Corinthianize meant immorality. Not the Parthenon with Athene faced Paul in Corinth, but a worse situation. Naturally many Jews were in such a mart of trade. Philippi, Thessalonica, Beroea, Athens, all had brought anxiety to Paul. What could he expect in licentious Corinth?

Acts 18:2
Aquila (Aкv $\lambda \alpha v$ ). Luke calls him a Jew from Pontus, apparently not yet a disciple, though there were Jews from Pontus at the great Pentecost who were converted ( 2:9). Aquila who made the famous A.D. translation of the O.T. was also from Pontus. Paul "found" ( $\varepsilon \cup \rho \omega v$, second aorist active participle of $\varepsilon v \rho \iota \sigma \kappa \omega$ ) though we do not know how. Edersheim says that a Jewish guild always kept together whether in street or synagogue so that by this bond they probably met.

Lately come from Italy ( $\pi \rho о \sigma \varphi \alpha \tau \omega \varsigma \varepsilon \lambda \eta \lambda \nu \theta o \tau \alpha \alpha \pi \sigma \tau \eta \varsigma I \tau \alpha \lambda \iota \alpha \varsigma)$. Second perfect participle of $\varepsilon \rho \chi о \mu \alpha$. Koine adverb, here only in the N.T., from adjective $\pi \rho о \sigma \varphi \alpha \tau \circ \varsigma(\pi \rho \circ, \sigma \varphi \alpha \omega$ or $\sigma \varphi \alpha \zeta \omega$, to kill), lately slaughtered and so fresh or recent (Heb 10:20 ).

With his wife Priscilla ( $\kappa \alpha$ Прькı $\lambda \lambda \alpha \nu \gamma \cup v \alpha \iota \kappa \alpha \alpha \tau о v$ ). Diminutive of Прьбка (Rо 16:3; 1Co 16:19 ). Prisca is a name in the Acilian family and the Prisci was the name of another noble clan. Aquila may have been a freedman like many Jews in Rome. Her name comes before his in verses 18,26; Ro 16:3; $2 \mathrm{Ti} 4: 9$.

Because Claudius had commanded ( $\delta \iota \alpha$ тo $\delta ı \alpha \varepsilon \tau \alpha \chi \varepsilon v \alpha$ K $\lambda \alpha v \delta ı v$ ). Perfect active articular infinitive of $\delta \iota \alpha \tau \alpha \sigma \sigma \omega$, old verb to dispose, arrange, here with accusative of general reference. $\Delta$ ta here is causal sense, "because of the having ordered as to Claudius." This was about A.D. 49, done, Suetonius says (Claudius C. 25), because "the Jews were in a state of constant tumult at the instigation of one Chrestus" (probably among the Jews about Christ so pronounced). At any rate Jews were unpopular in Rome for Tiberius had deported 4,000 to Sardinia. There were 20,000 Jews in Rome. Probably mainly those implicated in the riots actually left.

Acts 18:3

Because he was of the same trade ( $\delta ı \alpha$ то о $о \tau \varepsilon \chi \vee \circ \vee \varepsilon เ v \alpha$ ). Same construction with $\delta_{1 \alpha}$ as above. Ho $\mu о \tau \varepsilon \chi \nu o v$ is an old word (o $о \sigma, \tau \varepsilon \chi \vee \eta$ ), though here alone in N.T. Rabbi Judah says: "He that teacheth not his son a trade, doth the same as if he taught him to be a thief." So it was easy for Paul to find a home with these "tentmakers by trade" (бкпขоוлоьо $\tau \eta \tau \varepsilon \chi \nu \eta)$. Late word from $\sigma \kappa \eta \nu \eta$ and $\pi o \iota \varepsilon \omega$, here only in the N.T. They made portable tents of leather or of cloth of goat's hair. So Paul lived in this home with this noble man and his wife, all the more congenial if already Christians which they soon became at any rate. They worked as partners in the common trade. Paul worked for his support elsewhere, already in Thessalonica (1Th 2:9; 2Th 3:8) and later at Ephesus with Aquila and Priscilla (Ac 18:18,26; 20:34; 1Co 16:19). They moved again to Rome (Ro $16: 3$ ) and were evidently a couple of considerable wealth and generosity. It was a blessing to Paul to find himself with these people. So he "abode" ( $\varepsilon \mu \varepsilon v \varepsilon v$, imperfect active) with them and "they wrought" ( $\cap \rho \gamma \zeta$ оvто, imperfect middle), happy and busy during week days.

Acts 18:4
He reasoned ( $\delta เ \varepsilon \lambda \varepsilon \gamma \varepsilon \tau о$ ). Imperfect middle, same form as in 17:17 about Paul's work in Athens, here only on the Sabbaths.

Persuaded $(\varepsilon \pi \varepsilon \iota \theta \varepsilon v)$. Imperfect active, conative, he tried to persuade both Jews and Greeks (God-fearers who alone would come).

Acts 18:5
Was constrained by the word ( $\sigma u v \varepsilon \iota \varepsilon \tau \circ \tau \omega \lambda o \gamma \omega$ ). This is undoubtedly the correct text and not $\tau \omega \pi \nu \varepsilon v \mu a \tau$ of the Textus Receptus, but $\sigma v \nu \varepsilon \iota \chi \varepsilon \tau \sigma$ is in my opinion the direct middle imperfect indicative, not the imperfect passive as the translations have it (Robertson, Grammar, p. 808). Paul held himself together or completely to the preaching instead of just on Sabbaths in the synagogue (verse 4). The coming of Silas and Timothy with the gifts from Macedonia (1Th 3:6; 2Co 11:9; Php 4:15 ) set Paul free from tent-making for a while so that he began to devote himself (inchoative imperfect) with fresh consecration to preaching. See the active in 2Co 5:14. He was now also assisted by Silas and Timothy (2Co 1:19).

Testifying to the Jews that Jesus was the Christ ( $\delta ı \alpha \mu \alpha \rho \tau \cup \rho о \mu \varepsilon \nu \circ \varsigma \tau<\varsigma$ Iov tov Xpıбтov I $\eta \sigma o v v$ ). Paul's witness everywhere (9:22; 17:3 ). This verb $\delta \iota \alpha \mu \alpha \rho \tau v \rho o \mu \varepsilon v o \varsigma$ occurs in 2:40 (which see) for Peter's earnest witness. Perhaps daily now in the synagogue he spoke to the Jews who came. Eiva is the infinitive in indirect discourse (assertion) with the accusative of general reference. By qov Xpıбтov Paul means "the Messiah." His witness is to show to the Jews that Jesus of Nazareth is the Messiah.

Acts 18:6
When they opposed themselves ( $\alpha v \tau \iota \tau \alpha \sigma \sigma o \mu \varepsilon \nu \omega \nu \alpha \nu \tau \omega \nu$ ). Genitive absolute with present middle (direct middle again) of $\alpha \nu \tau \iota \tau \alpha \sigma \sigma \omega$, old verb to range in battle array ( $\tau \alpha \sigma \sigma \omega$ ) face to face with or against ( $\alpha v \tau$ ). In the N.T. only here and Ro 13:2; Jas 4:6; 1Pe 5:5 . Paul's
fresh activity roused the rabbis as at Antioch in Pisidia and at Thessalonica in concerted opposition and railing（blasphemy）．

He shook out his raiment（ $\varepsilon \kappa \tau \iota \nu \alpha \xi \alpha \mu \varepsilon \nu \circ \varsigma \tau \alpha \iota \mu \alpha \tau \iota \alpha$ ）．First aorist middle of $\varepsilon \kappa \tau \iota \nu \alpha \sigma \sigma \omega$ ， old verb，in the N．T．only here as in 13：51（middle）and Mr 6：11；Mt 10：15 where active voice occurs of shaking out dust also．Vivid and dramatic picture here like that in $\mathrm{Ne} 5: 13$ ，＂un－ doubtedly a very exasperating gesture＂（Ramsay），but Paul was deeply stirred．

Your blood be upon your own heads（To $\alpha \mu \alpha \nu \mu \omega \nu \varepsilon \pi \tau \eta \nu \kappa \varepsilon \varphi \alpha \lambda \eta \nu \nu \mu \omega \nu$ ）．As in Eze 3：18f．，33：4，8f．；2Sa 1：16．Not as a curse，but＂a solemn disclaimer of responsibility＂by Paul （Page）as in Ac 20：26．The Jews used this very phrase in assuming responsibility for the blood of Jesus（Mt 27：25 ）．Cf．Mt 23：35 ．

I am clean（ $\kappa \alpha \theta \alpha \rho \circ \varsigma \varepsilon \gamma \omega$ ）．Pure from your blood．Repeats the claim made in previous sentence．Paul had done his duty．

From henceforth（ $\alpha \pi 0$ tov $v v v$ ）．Turning point reached in Corinth．He will devote himself to the Gentiles，though Jews will be converted there also．Elsewhere as in Ephesus （ 19：1－10）and in Rome（Ac 28：23－28 ）Paul will preach also to Jews．

## Acts 18：7

Titus Justus（Tı七ov Iovotov）．So Aleph E Vulgate，while B has Tı七ıav Iovo兀ov，while most MSS．have only Iovotov．Evidently a Roman citizen and not Titus，brother of Luke， of Ga 2：1．We had Barsabbas Justus（Ac 1：23）and Paul speaks of Jesus Justus（Co 4：11）． The Titii were a famous family of potters in Corinth．This Roman was a God－fearer whose house＂joined hard to the synagogue＂（ $\eta v \sigma v \nu о \mu о \rho о v \sigma \alpha \tau \eta \sigma \nu \nu \alpha \gamma \omega \eta)$ ．Periphrastic imperfect active of $\sigma v \nu o \mu \circ \rho \varepsilon \omega$ ，a late（Byzantine）word，here only in the N．T．，followed by the associ－ ative instrumental case，from $\sigma v v о \mu о \rho о \varsigma ~(~ \sigma v v, ~ о \mu о \rho о \varsigma ~ f r o m ~ o ~ о о \varsigma, ~ j o i n t, ~ a n d ~ о \rho о \varsigma, ~ b o u n d a r y) ~$ having joint boundaries，right next to．Whether Paul chose this location for his work because it was next to the synagogue，we do not know，but it caught the attendants at the synagogue worship．In Ephesus when Paul had to leave the synagogue he went to the school house of Tyrannus（19：9f．）．The lines are being drawn between the Christians and the Jews，drawn by the Jews themselves．

Acts 18：8
Crispus（Kрıбпоৎ）．Though a Jew and ruler of the synagogue（cf．13：15），he had a Latin name．Paul baptized him（1Co 1：14 ）himself，perhaps because of his prominence，apparently letting Silas and Timothy baptize most of the converts（1Co 1：14－17）．Probably he followed Paul to the house of Titus Justus．It looked like ruin for the synagogue．

With all his house（ $\sigma v \nu$ о $\lambda \omega \tau \omega$ oıк $\omega$ av $\tau \sigma v$ ）．Another household conversion，for Crispus＂believed（ $\varepsilon \pi \iota \sigma \tau \varepsilon v \sigma \varepsilon v)$ in the Lord with all his house．＂

Hearing believed and were baptized（aкоvоvтєৎ $\varepsilon \pi \iota \sigma \tau \varepsilon v о \nu \kappa \alpha \varepsilon \beta \alpha \pi \tau \iota \zeta о v \tau о)$ ．Present active participle and imperfect indicatives active and passive，expressing repetition for the ＂many＂others who kept coming to the Lord in Corinth．It was a continual revival after Silas
and Timothy came and a great church was gathered here during the nearly two years that Paul laboured in Corinth (possibly A.D. 51 and 52).

Acts 18:9
Be not afraid, but speak, and hold not thy peace ( $\mathrm{M} \eta \varphi \circ \beta o v, \alpha \lambda \lambda \alpha \lambda \alpha \lambda \varepsilon \kappa \alpha \mu \eta$ $\sigma \omega \omega \pi \eta \sigma \eta \iota()$. Literally, "stop being afraid ( $\mu \eta$ with present middle imperative of $\varphi o \beta \varepsilon \omega$ ), but go on speaking (present active imperative of $\lambda \alpha \lambda \varepsilon \omega$ ) and do not become silent ( $\mu \eta$ and first aorist active of $\sigma \omega \pi \alpha \omega$, ingressive aorist)." Evidently there were signs of a gathering storm before this vision and message from the Lord Jesus came to Paul one night. Paul knew only too well what Jewish hatred could do as he had learned it at Damascus, Jerusalem, Antioch in Pisidia, Iconium, Lystra, Derbe, Thessalonica, Beroea. He had clearly moments of doubt whether he had not better move on or become silent for a while in Corinth. Every pastor knows what it is to have such moods and moments. In 2Th 3:2 (written at this time) we catch Paul's dejection of spirits. He was like Elijah (1Ki 19:4) and Jeremiah (Jer 15:15ff. ).

Acts 18:10
Because I am with thee ( $\delta \iota \tau \varepsilon \gamma \omega \varepsilon \mu \mu \varepsilon \tau \alpha \sigma o v$ ). Jesus had given this promise to all believers (Mt 28:20) and here he renews it to Paul. This promise changes Paul's whole outlook. Jesus had spoken to Paul before, on the way to Damascus (9:4), in Jerusalem (22:17f. ), in Troas ( 16:9), in great crises of his life. He will hear him again (23:11; 27:23 ). Paul knows the voice of Jesus.

No man shall set on thee to harm thee (ou $\delta \varepsilon ı \varsigma ~ \varepsilon \pi ı \theta \eta \sigma \varepsilon \tau \alpha ~ \sigma о ~ \tau о ט ~ \kappa \alpha \kappa \omega \sigma \alpha ~ \sigma \varepsilon)$. Future direct middle indicative of $\varepsilon \pi \iota \tau 1 \theta \eta \mu$, old and common verb, here in direct middle to lay or throw oneself upon, to attack. Jesus kept that promise in Corinth for Paul. Tov как $\omega \sigma \alpha$ is genitive articular infinitive of purpose of како $\omega$, to do harm to. Paul would now face all the rabbis without fear.

I have much people ( $\lambda \alpha \circ \varsigma \varepsilon \sigma \tau \iota v \mu о \pi о \lambda \nu \varsigma)$. Dative of personal interest. "There is to me much people," not yet saved, but who will be if Paul holds on. There is the problem for every preacher and pastor, how to win the elect to Christ.

Acts 18:11
A year and six months ( $\varepsilon v i \alpha v \tau o v \kappa \alpha \mu \eta \nu \alpha \varsigma \varepsilon \xi)$. Accusative of extent of time. How much time before this incident he had been there we do not know. He was in Corinth probably a couple of years in all. His work extended beyond the city (2Co 11:10) and there was a church in Cenchreae (Ro 16:1).

Acts 18:12
When Gallio was proconsul of Achaia ( $\Gamma \alpha \lambda \lambda \iota \omega v o \varsigma \delta \varepsilon \alpha v \theta v \pi \alpha \tau о v$ оvтоৎ $\tau \eta \varsigma A \chi \alpha ı \alpha \varsigma)$. Genitive absolute of present participle ovtoc. Brother of Seneca the Stoic (Nero's tutor) and uncle of Lucan the author of the Фapбa入ıa. His original name was M. Annaeus Novatus till he was adopted by Gallio the rhetorician. The family was Spanish. Gallio was a man of culture and refinement and may have been chosen proconsul of Achaia for this reason.

Statius calls him "dulcis Gallio." Seneca says of him: Nemo enim mortalium uni tam dulcis quam hic omnibus (No one of mortals is so pleasant to one person as he is to all). Luke alone among writers says that he was proconsul, but Seneca speaks of his being in Achaia where he caught fever, a corroboration of Luke. But now a whitish grey limestone inscription from the Hagios Elias quarries near Delphi (a letter of Claudius to Delphi) has been found which
 Achaia after various shifts (first senatorial, then imperial) back and forth with Macedonia, in A.D. 44 Claudius gave back to the Senate with proconsul as the title of the governor. It is amazing how Luke is confirmed whenever a new discovery is made. The discovery of this inscription has thrown light also on the date of Paul's work in Corinth as it says that Gallio came in the 26th acclamation of Claudius as Emperor in A.D. 51, that would definitely fix the time of Paul in Corinth as A.D. 50 and 51 (or 51 and 52). Deissmann has a full and able discussion of the whole matter in Appendix I to his St. Paul.

Rose up (катєпєбт $\eta \sigma \alpha v$ ). Second aorist active of $\kappa \alpha \tau-\varepsilon \varphi-\iota \sigma \tau \eta \mu$, intransitive, to take a stand against, a double compound verb found nowhere else. They took a stand ( $\varepsilon \sigma \tau \eta \sigma \alpha v$ ) against (ката, down on, $\varepsilon \pi$, upon), they made a dash or rush at Paul as if they would stand it no longer.

Before the judgment seat ( $\varepsilon \pi \tau$ тo $\beta \eta \mu \alpha$ ). See on 12:21. The proconsul was sitting in the basilica in the forum or agora. The Jews had probably heard of his reputation for moderation and sought to make an impression as they had on the praetors of Philippi by their rush ( $\sigma \cup v \varepsilon \pi \varepsilon \sigma \tau \eta, 16: 22$ ). The new proconsul was a good chance also ( $25: 2$ ). So for the second time Paul faces a Roman proconsul (Sergius Paulus, 13:7) though under very different circumstances.

Acts 18:13
Contrary to the law ( $\pi \alpha \rho \alpha$ тov vouov). They did not accuse Paul of treason as in Thessalonica, perhaps Paul had been more careful in his language here. They bring the same charge here that the owners of the slave-girl brought in Philippi (16:21) Perhaps they fear to go too far with Gallio, for they are dealing with a Roman proconsul, not with the politarchs of Thessalonica. The Jewish religion was a religio licita and they were allowed to make proselytes, but not among Roman citizens. To prove that Paul was acting contrary to Roman law (for Jewish law had no standing with Gallio though the phrase has a double meaning) these Jews had to show that Paul was making converts in ways that violated the Roman regulations on that subject. The accusation as made did not show it nor did they produce any evidence to do it. The verb used $\alpha v a \pi \varepsilon \mid \theta \varepsilon$ means to stir up by persuasion (old verb here only in the N.T.), a thing that he had a right to do.

Acts 18:14

When Paul was about to open his mouth ( $\mu \varepsilon \lambda \lambda$ оv $\tau \circ \varsigma \tau 0 v$ Пav $\frac{1}{}$ ov avo七 $\gamma \varepsilon \iota v \tau о \sigma \tau \circ \mu \alpha$ ). Genitive absolute again. Before Paul could speak, Gallio cut in and ended the whole matter. According to their own statement Paul needed no defence.

Wrong ( $\alpha \delta_{ı \kappa \eta \mu \alpha) . ~ I n j u r i a . ~ O l d ~ w o r d, ~ a ~ w r o n g ~ d o n e ~ o n e . ~ I n ~ N . T . ~ o n l y ~ h e r e, ~ A c ~ 24: 20 ; ~}^{\text {; }}$ Re 18:5. Here it may mean a legal wrong to the state.

Wicked villainy ( $\rho \alpha \iota \delta \iota v \rho \gamma \eta \mu \alpha$ ). A crime, act of a criminal, from $\rho \alpha \iota \delta \iota v \rho \gamma \circ \varsigma$ ( $\rho \alpha ı \delta ı \rho$, easy, $\varepsilon \rho \gamma \circ \nu$, work), one who does a thing with ease, adroitly, a "slick citizen."

Reason would that I should bear with you ( $\kappa \alpha \tau \alpha \lambda о \gamma о \nu \alpha \nu \alpha \nu \varepsilon \sigma \chi \circ \mu \eta \nu \nu \mu \omega v$ ). Literally, "according to reason I should have put up with you (or held myself back from you)." This condition is the second class (determined as unfulfilled) and means that the Jews had no case against Paul in a Roman court. The verb in the conclusion ( $\alpha v \varepsilon \sigma \chi \circ \mu \eta v$ ) is second aorist middle indicative and means with the ablative $v \mu \omega v$ "I should have held myself back (direct middle) from you (ablative). The use of $\alpha v$ makes the form of the condition plain.

Acts 18:15
Questions ( $\eta \tau \eta \mu \alpha \tau \alpha)$. Plural, contemptuous, "a parcel of questions" (Knowling).
About words ( $\pi \varepsilon \rho \lambda o \gamma o v$ ). Word, singular, talk, not deed or fact ( $\varepsilon \rho \gamma o v, \varphi \alpha \chi \tau \nu \mu$ ).
And names ( $\kappa \alpha$ оvo $\mu \alpha \tau \omega v$ ). As to whether "Jesus" should also be called "Christ" or "Messiah." The Jews, Gallio knew, split hairs over words and names.

And your own law ( $\kappa \alpha$ vouov $\tau$ ov $\kappa \alpha \theta^{\prime} v \mu \alpha \varsigma$ ) Literally, "And law that according to you." Gallio had not been caught in the trap set for him. What they had said concerned Jewish law, not Roman law at all.

Look to it yourselves ( $0 \psi \varepsilon \sigma \theta \varepsilon \alpha v \tau 0$ ). The volitive future middle indicative of o $\alpha \alpha \omega$ often used (cf. Mt 27:4) where an imperative could be employed (Robertson, Grammar, p. 874). The use of avto (yourselves) turns it all over to them.

I am not minded (ov $\beta o v \lambda o \mu \alpha$ ). I am not willing, I do not wish. An absolute refusal to allow a religious question to be brought before a Roman civil court. This decision of Gallio does not establish Christianity in preference to Judaism. It simply means that the case was plainly that Christianity was a form of Judaism and as such was not opposed to Roman law. This decision opened the door for Paul's preaching all over the Roman Empire. Later Paul himself argues (Ro 9-11) that in fact Christianity is the true, the spiritual Judaism.

Acts 18:16
He drave them ( $\alpha \pi \eta \lambda \alpha \sigma \varepsilon v \alpha v \tau o v \varsigma)$. First aorist active indicative of $\alpha \pi \varepsilon \lambda \alpha \nu \nu \omega$, old word, but here alone in the N.T. The Jews were stunned by this sudden blow from the mild proconsul and wanted to linger to argue the case further, but they had to go.

Acts 18:17
They all laid hold on Sosthenes ( $\varepsilon \pi \iota \lambda \alpha \beta о \mu \varepsilon v o \pi \alpha \nu \tau \varepsilon \varsigma ~ \Sigma \omega \sigma \theta \varepsilon v \eta v$ ). See 16:19; 17:19 for the same form. Here is violent hostile reaction against their leader who had failed so miserably.

Beat him ( $\varepsilon \tau v \pi \tau o v$ ). Inchoative imperfect active, began to beat him, even if they could not beat Paul. Sosthenes succeeded Crispus (verse 8) when he went over to Paul. The beating did Sosthenes good for he too finally is a Christian (1Co 1:1), a co-worker with Paul whom he had sought to persecute.

And Gallio cared for none of these things ( $\kappa \alpha \sigma v \delta \varepsilon \nu \tau o v \tau \omega \nu \tau \omega \Gamma \alpha \lambda \lambda \iota \omega \nu \varepsilon \mu \varepsilon \lambda \varepsilon \nu$ ). Literally, "no one of these things was a care to Gallio." The usually impersonal verb ( $\mu \varepsilon \lambda \varepsilon \iota$, $\varepsilon \mu \varepsilon \lambda \varepsilon v$, imperfect active) here has the nominative as in $\mathrm{Lu} 10: 40$. These words have been often misunderstood as a description of Gallio's lack of interest in Christianity, a religious indifferentist. But that is quite beside the mark. Gallio looked the other way with a blind eye while Sosthenes got the beating which he richly deserved. That was a small detail for the police court, not for the proconsul's concern. Gallio shows up well in Luke's narrative as a clear headed judge who would not be led astray by Jewish subterfuges and with the courage to dismiss a mob.

Acts 18:18
Having tarried after this yet many days ( $\varepsilon \tau \pi \rho о \sigma \mu \varepsilon \iota v a \varsigma \eta \mu \varepsilon \rho \alpha \varsigma ~ \iota \kappa \alpha v a \varsigma)$. First aorist (constative) active participle of $\pi \rho \circ \sigma \mu \varepsilon \nu \omega$, old verb, to remain besides ( $\pi \rho \circ \varsigma$ as in $1 \mathrm{Ti} 1: 3$ ) and that idea is expressed also in $\varepsilon \tau$ (yet). The accusative is extent of time. On Luke's frequent use of tкavos see $8: 11$. It is not certain that this period of "considerable days" which followed the trial before Gallio is included in the year and six months of verse 11 or is in addition to it which is most likely. Vindicated as Paul was, there was no reason for haste in leaving, though he usually left after such a crisis was passed.

Took his leave ( $\alpha \pi о \tau \alpha \xi \alpha \mu \varepsilon v \circ \varsigma)$. First aorist middle (direct), old verb, to separate oneself, to bid farewell (Vulgate valefacio), as in verse 21; Mr 6:46.

Sailed thence ( $\varepsilon \xi \varepsilon \pi \lambda \varepsilon$ ). Imperfect active of $\varepsilon \kappa \pi \lambda \varepsilon \omega$, old and common verb, inchoative imperfect, started to sail. Only Priscilla and Aquila are mentioned as his companions though others may have been in the party.

Having shorn his head ( $\kappa \varepsilon \iota \rho \alpha \mu \varepsilon \nu \circ \varsigma \tau \eta \nu \kappa \varepsilon \varphi \alpha \lambda \eta \nu$ ). First aorist middle (causative) of $\kappa \varepsilon \iota \rho \omega$, old verb to shear (sheep) and the hair as also in 1Co 11:6. The participle is masculine and so cannot refer to Priscilla. Aquila comes next to the participle, but since mention of Priscilla and Aquila is parenthetical and the two other participles ( $\pi \rho \sigma \sigma \mu \varepsilon เ v a \sigma$, $\alpha \pi о \tau \alpha \xi \alpha \mu \varepsilon \vee \circ \varsigma)$ refer to Paul it seems clear that this one does also.

For he had a vow ( $\varepsilon \iota \chi \varepsilon \gamma \alpha \rho \varepsilon v \chi \eta \nu)$. Imperfect active showing the continuance of the vow up till this time in Cenchreae, the port of Corinth when it expired. It was not a Nazarite vow which could be absolved only in Jerusalem. It is possible that the hair was only polled or trimmed, cut shorter, not "shaved" ( $\xi v \rho a \omega$ as in $21: 24$ ) for there is a distinction as both verbs are contrasted in 1Co 11:6 ( $\kappa \varepsilon \iota \rho \sigma \theta \alpha \eta \xi v \rho \alpha \sigma \theta \alpha)$. It is not clear what sort of a vow Paul had taken nor why he took it. It may have been a thank offering for the outcome at

Corinth (Hackett). Paul as a Jew kept up his observance of the ceremonial law, but refused to impose it on the Gentiles.

Acts 18:19
Came ( $\kappa \alpha \tau \eta \nu \tau \eta \sigma \alpha v)$. Came down, as usual in speaking of coming to land ( 16:1).
To Ephesus ( $\varepsilon \varsigma \varsigma \mathrm{E} \varphi \varepsilon \sigma \circ v$ ). This great city on the Cayster, the capital of the Province of Asia, the home of the worship of Diana (Artemis) with a wonderful temple, Paul at last had reached, though forbidden to come on the way out on this tour (16:6). Here Paul will spend three years after his return from Jerusalem.

He left them there (какєıvov̧ катє $\lambda \iota \pi \varepsilon v$ autov). That is, Priscilla and Aquila he left (second aorist active indicative) here (avtov). But Luke mentions the departure by way of anticipation before he actually went away (verse 21).

But he himself (avtoc $\delta \varepsilon$ ). Paul again the leading person in the narrative. On this occasion he may have gone alone into the synagogue.

He reasoned ( $\delta \varepsilon \varepsilon \lambda \varepsilon \xi \alpha \tau 0)$. Luke's favourite word for Paul's synagogue discourses (17:2,17; 18:4 which see) as also 19:8,9 .

Acts 18:20
When they asked him ( $\varepsilon \rho \omega \tau \omega \nu \tau \omega v \alpha \nu \tau \omega v$ ). Genitive absolute of present participle of $\varepsilon \rho \omega \tau \alpha \omega$, old verb to ask a question, common in Koine to make a request as here.

He consented not (ouk $\varepsilon \pi \varepsilon v \varepsilon \cup \sigma \varepsilon v$ ). First aorist active indicative of $\varepsilon \pi \iota v \varepsilon v \omega$, old verb to express approval by a nod, only here in the N.T.

Acts 18:21
I shall return ( $\alpha \vee \alpha \kappa \alpha \mu \psi \omega)$. Future active indicative of $\alpha v \alpha \kappa \alpha \mu \pi \tau \omega$, old verb to bend back, turn back (Mt 2:2 ).

If God will ( $\operatorname{tov} \theta \varepsilon$ gov $\theta \varepsilon \lambda$ ovtoc). Genitive absolute of present active participle. This expression ( $\varepsilon \alpha v$ with subjunctive) occurs also in 1Co 4:19; 16:7; Jas 4:15. Such phrases were common among Jews, Greeks, and Romans, and are today. It is simply a recognition that we are in God's hands. The Textus Receptus has here a sentence not in the best MSS.: "I must by all means keep this feast that cometh in Jerusalem." This addition by D and other documents may have been due to a desire to give a reason for the language in verse 22 about "going up" to Jerusalem. Whether Paul said it or not, it was in the spring when he made this journey with a company of pilgrims probably going to the feast of Pentecost in Jerusalem. We know that later Paul did try to reach Jerusalem for Pentecost (20:16) and succeeded. As the ship was leaving, Paul had to go, but with the hope of returning soon to Ephesus as he did.

Acts 18:22
He went up and saluted the church ( $\alpha v \alpha \beta \alpha \varsigma \kappa \alpha ~ \alpha \sigma \pi \alpha \sigma \alpha \mu \varepsilon v o \varsigma ~ \tau \eta \nu \varepsilon к \kappa \lambda \eta \sigma \iota \alpha)$ ). The language could refer to the church in Caesarea where Paul had just landed, except for several things. The going up ( $\alpha v \alpha \beta \alpha \varsigma$, second aorist active participle of $\alpha v \alpha \beta \alpha \iota v \omega$ ) is the common
way of speaking of going to Jerusalem which was up from every direction save from Hebron. It was the capital of Palestine as people in England today speaking of going up to London. Besides "he went down to Antioch" ( $\kappa \alpha \tau \varepsilon \beta \eta \varepsilon \iota \varsigma A \nu \tau \iota \chi \varepsilon \iota \alpha \nu$, second aorist active indicative of $\kappa \alpha \tau \alpha \beta \alpha \iota \omega \omega$ ) which language suits better leaving Jerusalem than Caesarea. Moreover, there was no special reason for this trip to Caesarea, but to Jerusalem it was different. Here Paul saluted the church in the fourth of his five visits after his conversion (9:26; $11: 30 ; 15: 4 ; 18: 22$; 21:17 ). The apostles may or may not have been in the city, but Paul had friends in Jerusalem now. Apparently he did not tarry long, but returned to Antioch to make a report of his second mission tour as he had done at the close of the first when he and Barnabas came back ( $14: 26-28$ ). He had started on this tour with Silas and had picked up Timothy and Luke, but came back alone. He had a great story to tell.

Acts 18:23
Having spent some time ( $\pi о \_\sigma \alpha \varsigma ~ \chi \rho o v o v \tau ı v \alpha$ ). Literally, having done some time. How long we do not know, probably not long. There are those who place the visit of Peter here to which Paul alludes in Ga 2:11ff. and which we have located while Paul was here the last time (Ac 15:35 ).

He departed $(\varepsilon \xi \eta \lambda \theta \varepsilon v)$. Thus simply and alone Paul began the third mission tour without a Barnabas or a Silas.

Went through ( $\delta \varepsilon \rho \chi о \mu \varepsilon \nu \circ \varsigma)$. Present middle participle, going through.
The region of Galatia and Phrygia ( $\tau \varepsilon \nu \Gamma \alpha \lambda \alpha \tau \iota \kappa \nu \chi \omega \rho \alpha \nu \kappa \alpha \Phi \rho \psi \gamma \iota \alpha v$ ). See on Ac 16:6 for discussion of this phrase, here in reverse order, passing through the Galatic region and then Phrygia. Does Luke mean Lycaonia (Derbe and Lystra) and Phrygia (Iconium and Pisidian Antioch)? Or does he mean the route west through the old Galatia and the old Phrygia on west into Asia? The same conflict exists here over the South Galatian and the North Galatian theories. Phrygia is apparently distinguished from the Galatic region here. It is apparently A.D. 52 when Paul set out on this tour.

In order $(\kappa \alpha \theta \varepsilon \xi \eta \varsigma)$. In succession as in 11:4, though the names of the cities are not given.

Stablishing ( $\sigma \tau \eta \rho \iota \omega \nu$ ). As he did in the second tour ( 15:41, $\varepsilon \pi \iota \sigma \tau \eta \rho \iota \zeta \omega v$, compound of this same verb) which see.

Acts 18:24
Apollos $(A \pi o \lambda \lambda \omega \varsigma)$. Genitive $-\omega$ Attic second declension. Probably a contraction of A $\pi$ o $\lambda$ 入ovios as D has it here.

An Alexandrian (A $\lambda \varepsilon \xi \alpha \vee \delta \rho \varepsilon \cup \varsigma)$. Alexander the Great founded this city B.C. 332 and placed a colony of Jews there which flourished greatly, one-third of the population at this time. There was a great university and library there. The Jewish-Alexandrian philosophy developed here of which Philo was the chief exponent who was still living. Apollos was undoubtedly a man of the schools and a man of parts.

A learned man ( $\alpha \vee \eta \rho \lambda o \gamma \cos$ ). Or eloquent, as the word can mean either a man of words (like one "wordy," verbose) or a man of ideas, since $\lambda$ oүo $\varsigma$ was used either for reason or speech. Apollos was doubtless both learned (mighty in the Scriptures) and eloquent, though eloquence varies greatly in people's ideas.

Mighty in the Scriptures ( $\delta v v a \tau o \varsigma ~ \omega v ~ \varepsilon v ~ \tau a ı \varsigma ~ \gamma \rho a \varphi a ı \varsigma) . ~ B e i n g ~ p o w e r f u l ~(\delta u v a \tau o \varsigma ~$ verbal of $\delta v v a \mu \alpha$ and same root as $\delta v v a \mu ı$, dynamite, dynamo) in the Scriptures (in the knowledge and the use of the Scriptures), as should be true of every preacher. There is no excuse for ignorance of the Scriptures on the part of preachers, the professed interpreters of the word of God. The last lecture made to the New Testament English class in Southern Baptist Theological Seminary by John A. Broadus was on this passage with a plea for his students to be mighty in the Scriptures. In Alexandria Clement of Alexandria and Origen taught in the Christian theological school.

Acts 18:25
Had been instructed in the way of the Lord ( $\eta \nu \kappa \alpha \tau \eta \chi \eta \mu \varepsilon v o \varsigma ~ \tau \eta v$ oסov $\tau 0 v \kappa v \rho \circ \circ)$. Periphrastic past perfect passive of $\kappa \alpha \tau \eta \chi \varepsilon \omega$, rare in the old Greek and not in the LXX from кata and $\eta \chi \varepsilon \omega$ ( $\eta \chi \omega$, sound) as in Lu 1:4, to re-sound, to re-echo, to teach by repeated dinning into the ears as the Arabs do now, to teach orally by word of mouth (and ear). Here the accusative of the thing (the word) is retained in the passive like with $\delta \iota \delta \alpha \sigma \kappa \omega$, to teach (Robertson, Grammar, p. 485). Being fervent in spirit ( $\zeta \varepsilon \omega \nu \tau \omega \pi \nu \varepsilon \nu \mu \alpha \tau$ ). Boiling (from $\zeta \varepsilon \omega$, to boil, old and common verb, in N.T. only here and Ro 12:11 ) like boiling water or yeast. The Latin verb ferveo means to boil or ferment. Locative case after it.

Taught carefully ( $\varepsilon \delta \iota \delta \alpha \sigma \kappa \varepsilon v \alpha \kappa \rho \diamond \omega \varsigma$ ). Imperfect active, was teaching or inchoative, began teaching, accurately. He taught accurately what he knew, a fine gift for any preacher.

Only the baptism of John ( $\mu$ ovov to $\beta \alpha \pi \tau \iota \sigma \mu \alpha$ I $\omega \alpha v o v$ ). It was a
baptism of repentance (marked by repentance) as Paul said (13:24; 19:4), as Peter said ( $2: 38$ ) and as the Gospels tell (Mr 1:4 , etc.). That is to say, Apollos knew only what the Baptist knew when he died, but John had preached the coming of the Messiah, had baptized him, had identified him as the Son of God, had proclaimed the baptism of the Holy Spirit, but had not seen the Cross, the Resurrection of Jesus, nor the great Day of Pentecost.

Acts 18:26
They took him unto them ( $\pi \rho \circ \sigma \varepsilon \lambda \alpha \beta$ ovto). Second aorist middle (indirect) indicative of $\pi \rho \circ \sigma \lambda \alpha \mu \beta \alpha v \omega$, old verb, to their home and heart as companion (cf. the rabbis and the ruffians in 17:5). Probably for dinner after service.

Expounded ( $\varepsilon \xi \varepsilon \theta \varepsilon v \tau o)$. Second aorist (effective) middle indicative of $\varepsilon \kappa \tau \iota \theta \eta \mu$ seen already in 11:4, to set forth.

More carefully ( $\alpha \kappa \rho \iota \beta \varepsilon \sigma \tau \varepsilon \rho \circ v$ ). Comparative adverb of $\alpha \kappa \rho ı \omega c$. More accurately than he already knew. Instead of abusing the young and brilliant preacher for his ignorance they (particularly Priscilla) gave him the fuller story of the life and work of Jesus and of the
apostolic period to fill up the gaps in his knowledge. It is a needed and delicate task, this thing of teaching gifted young ministers. They do not learn it all in schools. More of it comes from contact with men and women rich in grace and in the knowledge of God's ways. He was not rebaptized, but only received fuller information.

Acts 18:27
Encouraged him ( $\pi \rho \circ \tau \rho \varepsilon \psi \alpha \mu \varepsilon v o$ ). First aorist middle participle of $\pi \rho \circ \tau \rho \varepsilon \pi \omega$, old verb, to urge forward, to push on, only here in the N.T. Since Apollos wanted ( $\beta$ ou入ougvov autou, genitive absolute) to go into Achaia, the brethren (including others besides Priscilla and Aquila) wrote ( $\varepsilon \gamma \rho \alpha \psi \alpha v$ ) a letter of introduction to the disciples in Corinth to receive him ( $\alpha \pi о \delta \varepsilon \xi \alpha \sigma \theta \alpha \alpha \cup \tau \circ v$ ), a nice letter of recommendation and a sincere one also. But Paul will refer to this very letter later (2Co 3:1) and observe that he himself needed no such letter of commendation. The Codex Bezae adds here that certain Corinthians who had come to Ephesus heard Apollos and begged him to cross over with them to Corinth. This may very well be the way that Apollos was led to go. Preachers often receive calls because visitors from other places hear them. Priscilla and Aquila were well known in Corinth and their approval would carry weight. But they did not urge Apollos to stay longer in Ephesus.

Helped them much ( $\sigma v v \varepsilon \beta \alpha \lambda \varepsilon \tau о \pi o \lambda v$ ). Second aorist middle indicative of $\sigma u v \beta \alpha \lambda \lambda \omega$ used in 17:18 for "dispute," old verb to throw together, in the N.T. always in the active save here in the middle (common in Greek writers) to put together, to help.

Through grace ( $\delta \iota \alpha \tau \eta \varsigma \chi \alpha \rho ı \tau \circ \varsigma)$. This makes sense if taken with "believed," as Hackett does (cf. 13:48; 16:14 ) or with "helped" (1Co 3:10; 15:10; 2Co 1:12). Both are true as the references show.

Acts 18:28
Powerfully ( $\varepsilon \cup \tau \circ \vee \omega \varsigma)$. Adverb from $\varepsilon v \tau o v o \varsigma ~(~ \varepsilon v, ~ w e l l, ~ \tau \varepsilon เ v \omega$, to stretch), well-strung, at full stretch.

Confuted ( $\delta ı \alpha \kappa \alpha \tau \eta \lambda \varepsilon \gamma \chi \varepsilon \tau о$ ). Imperfect middle of the double compound verb $\delta \iota \alpha-\kappa \alpha \tau-$ $\varepsilon \lambda \varepsilon \gamma \chi \circ \mu \alpha$, to confute with rivalry in a contest, here alone. The old Greek has $\delta \varepsilon \varepsilon \lambda \varepsilon \gamma \chi \omega$, to convict of falsehood, but not this double compound which means to argue down to a finish. It is the imperfect tense and does not mean that Apollos convinced these rabbis, but he had the last word.

Publicly ( $\delta \eta \mu$ ođi $)$. See 5:18; 16:37. In open meeting where all could see the victory of Apollos.

Shewing ( $\varepsilon \pi \iota \delta \varepsilon ı \kappa v \cup \varsigma)$. Present active participle of $\varepsilon \pi \iota \delta \varepsilon ı \kappa v \nu \mu$, old verb to set forth so that all see.

By the Scriptures ( $\delta \iota \tau \omega v \gamma \rho \alpha \varphi \omega v$ ). In which Apollos was so "mighty" (verse 24) and the rabbis so weak for they knew the oral law better than the written (Mr 7:8-12).

That Jesus was the Christ ( $\varepsilon เ v a$ tov Xpıotov I $\eta \sigma o v v$ ). Infinitive and the accusative in indirect assertion. Apollos proclaims the same message that Paul did everywhere ( 17:3).

He had not yet met Paul, but he had been instructed by Priscilla and Aquila. He is in Corinth building on the foundation laid so well by Paul (1Co 3:4-17). Luke has here made a brief digression from the story of Paul, but it helps us understand Paul better There are those who think that Apollos wrote Hebrews, a guess that may be correct.

## Acts 19

Acts 19:1
While Apollos was at Corinth ( $\varepsilon \nu \tau \omega \tau o v A \pi o \lambda \lambda \omega \varepsilon \iota v \alpha \varepsilon \nu \operatorname{Ko\rho } \nu \theta \omega$ ). Favourite idiom with Luke, $\varepsilon v$ with the locative of the articular infinitive and the accusative of general reference (Lu 1:8; 2:27 , etc.).

Having passed through the upper country ( $\delta \iota \lambda \lambda$ Өov $\alpha \alpha \tau \alpha \alpha \nu \omega \tau \varepsilon \rho \iota \kappa \alpha \mu \varepsilon \rho \eta$ ). Second aorist active participle of $\delta เ \varepsilon \rho \chi \circ \mu \alpha$, accusative case agreeing with חav $\lambda o v$, accusative of general reference with the infinitive $\varepsilon \lambda \theta \varepsilon เ \nu$, idiomatic construction with $\varepsilon \gamma \varepsilon v \varepsilon \tau \tau$. The word for "upper" ( $\alpha \nu \omega \tau \varepsilon \rho \iota \kappa \alpha$ ) is a late form for $\alpha v \omega \tau \varepsilon \rho \alpha$ (Lu 14:10) and occurs in Hippocrates and Galen. It refers to the highlands (cf. Xenophon's Anabasis) and means that Paul did not travel the usual Roman road west by Colossae and Laodicea in the Lycus Valley, cities that he did not visit (Col 2:1). Instead he took the more direct road through the Cayster Valley to Ephesus. Codex Bezae says here that Paul wanted to go back to Jerusalem, but that the Holy Spirit bade him to go into Asia where he had been forbidden to go in the second tour (16:6). Whether the upper "parts" ( $\mu \varepsilon \rho \eta)$ here points to North Galatia is still a point of dispute among scholars. So he came again to Ephesus as he had promised to do (18:21). The province of Asia included the western part of Asia Minor. The Romans took this country B.C. 130. Finally the name was extended to the whole continent. It was a jewel in the Roman empire along with Africa and was a senatorial province. It was full of great cities like Ephesus, Smyrna, Pergamum, Thyatira, Sardis, Philadelphia, Laodicea (the seven churches of Re $2 ; 3$ ), Colossae, Hierapolis, Apamea, to go no further. Hellenism had full sway here. Ephesus was the capital and chief city and was a richer and larger city than Corinth. It was located at the entrance to the valley of the Maeander to the east. Here was the power of Rome and the splendour of Greek culture and the full tide of oriental superstition and magic. The Temple of Artemis was one of the seven wonders of the world. While in Ephesus some hold that Paul at this time wrote the Epistle to the Galatians after his recent visit there, some that he did it before his recent visit to Jerusalem. But it is still possible that he wrote it from Corinth just before writing to Rome, a point to discuss later.

Certain disciples ( $\tau \iota v \propto \mu \alpha \theta \eta \tau \alpha \varsigma)$. Who were they? Apollos had already gone to Corinth. They show no connection with Priscilla and Aquila. Luke calls them "disciples" or "learners" ( $\mu \alpha \forall \eta \tau \alpha$ ) because they were evidently sincere though crude and ignorant. There is no reason at all for connecting these uninformed disciples of the Baptist with Apollos. They were floating followers of the Baptist who drifted into Ephesus and whom Paul found. Some of John's disciples clung to him till his death (Joh 3:22-25; Lu 7:19; Mt 14:12 ). Some of them left Palestine without the further knowledge of Jesus that came after his death and some did not even know that, as turned out to be the case with the group in Ephesus.

Acts 19:2

Did ye receive the Holy Spirit when ye believed? ( $\varepsilon \pi v \varepsilon v \mu \alpha \alpha \nmid \ldots v ~ \varepsilon \lambda \alpha \beta \varepsilon \tau \varepsilon$ $\pi \iota \sigma \tau \varepsilon v \sigma a \nu \tau \varepsilon \sigma$ ?). This use of $\Pi$ in a direct question occurs in $1: 6$, is not according to the old Greek idiom, but is common in the LXX and the N.T. as in Lu 13:23 which see (Robertson, Grammar, p. 916). Apparently Paul was suspicious of the looks or conduct of these professed disciples. The first aorist active participle $\pi 丿 \sigma \tau \varepsilon \cup \sigma a v \tau \varepsilon \varsigma$ is simultaneous with the second aorist active indicative $\varepsilon \lambda \alpha \beta \varepsilon \tau \varepsilon$ and refers to the same event.

Nay, we did not so much as hear whether the Holy Spirit was ( $A \lambda \lambda$ ' ov $\varepsilon \varepsilon \varepsilon \pi v \varepsilon \nu \mu a$ aүเov $\varepsilon \sigma \tau \iota v ~ \eta \kappa о v \sigma \alpha \mu \varepsilon v)$. The reply of these ignorant disciples is amazing. They probably refer to the time of their baptism and mean that, when baptized, they did not hear whether ( $\varepsilon$ in indirect question) the Holy Spirit was (عбтıv retained as in Joh 7:39). Plain proof that they knew John's message poorly.

Acts 19:3
Into what ( $\varepsilon ા \varsigma \tau)$. More properly,
Unto what or
on what basis (Robertson, Grammar, p. 592). Clearly, Paul felt they had received a poor baptism with no knowledge of the Holy Spirit.

John's baptism ( $\tau \mathrm{I}$ I $\omega \alpha v o v ~ \beta \alpha \pi \tau \iota \sigma \mu \alpha$ ). Last mention of John the Baptist in the N.T. They had been dipped in other words, but they had not grasped the significance of the ordinance.

Acts 19:4
With the baptism of repentance ( $\beta a \pi \tau \iota \sigma \mu \alpha \mu \varepsilon \tau \alpha v o o \alpha)$ ). Cognate accusative with $\varepsilon \beta a \pi \tau \iota \sigma \varepsilon v$ and the genitive $\mu \varepsilon \tau \alpha v o t a c$ describing the baptism as marked by (case of species or genus), not as conveying, repentance just as in Mr 1:4 and that was the work of the Holy Spirit. But John preached also the baptism of the Holy Spirit which the Messiah was to bring (Mr 1:7f.; Mt 3:11f.; Lu 3:16 ). If they did not know of the Holy Spirit, they had missed the point of John's baptism.

That they should believe on him that should come after him, that is on Jesus ( $\varepsilon ા \varsigma$
 prolepsis of $\varepsilon ı \varsigma ~ \tau о \nu ~ \varepsilon \rho \chi о \mu \varepsilon v o v ~ \mu \varepsilon \tau ' ~ a u \tau o v ~ b e f o r e ~ เ v a ~ \pi ı \sigma \tau \varepsilon \cup \sigma \omega \sigma เ \nu ~ w i t h ~ w h i c h ~ i t ~ i s ~ c o n s t r u e d . ~$ This is John's identical phrase, "the one coming after me" as seen in Mr 1:7; Mt 3:11; Lu 3:16; Joh 1:15. It is not clear that these "disciples" believed in a Messiah, least of all in Jesus. They were wholly unprepared for the baptism of John. Paul does not mean to say that John's baptism was inadequate, but he simply explains what John really taught and so what his baptism signified.

Acts 19:5
The name of the Lord Jesus ( $\tau 0$ ovoua $\tau 0 v$ кvpıov I $\eta \sigma o v$ ). Apollos was not rebaptized. The twelve apostles were not rebaptized. Jesus received no other baptism than that of John. The point here is simply that these twelve men were grossly ignorant of the meaning of

John's baptism as regards repentance, the Messiahship of Jesus, the Holy Spirit. Hence Paul had them baptized, not so much again, as really baptized this time, in the name or on the authority of the Lord Jesus as he had himself commanded (Mt 28:19) and as was the universal apostolic custom. Proper understanding of "Jesus" involved all the rest including the Trinity (Father, Son, and Holy Spirit). Luke does not give a formula, but simply explains that now these men had a proper object of faith (Jesus) and were now really baptized.

Acts 19:6
When Paul had laid his hands upon them ( $\varepsilon \pi \iota \theta \varepsilon v \tau \circ \varsigma \alpha v \tau o \iota \varsigma ~ \tau o v ~ П a v \lambda о v ~ \chi \varepsilon ı \rho a \varsigma) . ~$ Genitive absolute of second aorist active participle of $\varepsilon \pi \iota \tau \iota \theta \eta \mu$. This act of laying on of the hands was done in Samaria by Peter and John (8:16) and in Damascus in the case of Paul ( $9: 17$ ) and was followed as here by the descent of the Holy Spirit in supernatural power.

They spake with tongues ( $\varepsilon \lambda \alpha \lambda o v \nu \gamma \lambda \omega \sigma \sigma \alpha \iota \varsigma)$. Inchoative imperfect, began to speak with tongues as in Jerusalem at Pentecost and as in Caesarea before the baptism.

Prophesied ( $\varepsilon \pi \rho \circ \varphi \eta \tau \varepsilon v o v)$. Inchoative imperfect again, began to prophesy. The speaking with tongues and prophesying was external and indubitable proof that the Holy Spirit had come on these twelve uninformed disciples now fully won to the service of Jesus as Messiah. But this baptism in water did not "convey" the Holy Spirit nor forgiveness of sins. Paul was not a sacramentalist.

Acts 19:8
Spake boldly ( $\varepsilon \pi \alpha \rho \rho \eta \sigma \iota \zeta \varepsilon \tau \sigma)$. Imperfect middle, kept on at it for three months. Cf. same word in 18:26.

Persuading $(\pi \varepsilon \iota \theta \omega v)$. Present active conative participle of $\pi \varepsilon \iota \theta \omega$, trying to persuade ( 28:23). Paul's idea of the Kingdom of God was the church of God which he (Jesus, God's Son) had purchased with his own blood (Ac 20:28, calling Christ God). Nowhere else had Paul apparently been able to speak so long in the synagogue without interruption unless it was so at Corinth. These Jews were already interested (18:30).

Acts 19:9
But when some were hardened ( $\omega \varsigma \delta \varepsilon \tau \iota v \varepsilon \varsigma \varepsilon \sigma \kappa \lambda \eta \rho \cup v o v \tau o$ ). Imperfect passive of $\sigma \kappa \lambda \eta \rho v \nu \omega$, causative like hiphil in Hebrew, to make hard ( $\sigma \kappa \lambda \eta \rho \circ \varsigma$ ) or rough or harsh (Mt 25:24 ). In LXX and Hippocrates and Galen (in medical writings). In N.T. only here and Ro 9:18 and 4 times in Heb 3:8,13,15; 4:7,8 quoting and referring to Ps 95:8 about hardening the heart like a gristle. The inevitable reaction against Paul went on even in Ephesus though slowly.

Disobedient ( $\varepsilon \pi \varepsilon ו \theta o v v$ ). Imperfect again, showing the growing disbelief and disobedience ( $\alpha \pi \varepsilon ו \theta \eta \varsigma$ ), both ideas as in 14:2; 17:5, first refusal to believe and then refusal to obey. Both $\sigma \kappa \lambda \eta \rho v \nu \omega$ and $\alpha \pi \varepsilon \iota \theta \varepsilon \omega$ occur together, as here, in Ecclus. 30:12.

Speaking evil of the Way (каколоүоиขтєৎ $\tau \eta \nu$ о оо⿱) . Late verb from каколоүоৎ (speaker of evil) for the old $\kappa \alpha \kappa \omega \varsigma \lambda \varepsilon \gamma \omega$. Already in Mr 7:10; 9:39; Mt 15:4. Now these Jews
are aggressive opponents of Paul and seek to injure his influence with the crowd. Note "the Way" as in 9:2 for Christianity.

He departed from them ( $\alpha \pi о \sigma \tau \alpha \varsigma \alpha \pi^{\prime} \alpha v \tau \omega v$ ). Second aorist active participle of $\alpha \varphi \iota \sigma \tau \eta \mu$, made an "apostasy" (standing off, cleavage) as he did at Corinth ( $18: 7, \mu \varepsilon \tau \alpha \beta \alpha$, making a change).

Separated the disciples ( $\alpha \varphi \omega \rho \iota \sigma \varepsilon v$ tovৎ $\mu \alpha \forall \eta \tau \alpha \varsigma$ ). First aorist active indicative of $\alpha \varphi о \rho \iota \zeta \omega$, old verb to mark limits (horizon) as already in 13:2. Paul himself was a spiritual Pharisee "separated" to Christ (Ro 1:1). The Jews regarded this withdrawal as apostasy, like separating the sheep from the goats (Mt 25:32). Paul now made a separate church as he had done at Thessalonica and Corinth.

In the school of Tyrannus ( $\varepsilon v \tau \eta \sigma \chi \circ \lambda \eta$ Tupavvou). $\Sigma \chi \circ \lambda \eta$ (our school) is an old word from $\sigma \chi \varepsilon ו v(\varepsilon \chi \omega)$ to hold on, leisure and then in later Greek (Plutarch, etc.) a place where there is leisure as here. Only this example in the N.T. This is the Greek notion of "school," the Jewish being that of "yoke" as in Mt 11:29. The name Tyrannus (our tyrant) is a common one. It is an inscription in the Columbarium of the Empress Livia as that of a physician in the court. Furneaux suggests the possibility that a relative of this physician was lecturing on medicine in Ephesus and so as a friend of Luke, the physician, would be glad to help Paul about a place to preach. It was probably a public building or lecture hall with this name whether hired by Paul or loaned to him. The pagan sophists often spoke in such halls. The Codex Bezae adds "from the fifth hour to the tenth" as the time allotted Paul for his work in this hall, which is quite possible, from just before midday till the close of the afternoon (from before the noon meal till two hours before sunset) each day. Here Paul had great freedom and a great hearing. As the church grows there will be other places of meeting as the church in the house of Aquila and Priscilla (1Co 16:19).

Acts 19:10
For two years ( $\varepsilon \pi \varepsilon \tau \eta \delta v o$ ). Note $\varepsilon \pi$ with accusative for extent of time as in verse $8, \varepsilon \pi$ $\mu \eta \nu a \varsigma \tau \rho \varepsilon \iota \varsigma$ and often. But in 20:31 Paul said to the Ephesian elders at Miletus that he laboured with them for the space of "three years." That may be a general expression and there was probably a longer period after the "two years" in the school of Tyrannus besides the six months in the synagogue. Paul may have preached thereafter in the house of Aquila and Priscilla for some months, the "for a while" of verse 22.

So that all they which dwelt in Asia heard ( $\omega \sigma \tau \varepsilon$ па $\tau \tau \alpha \varsigma ~ \tau о и \varsigma ~ к а т о н к о и \nu \tau а \varsigma ~ \tau \eta \nu ~ A \sigma ı \alpha v ~$ $\alpha \kappa о v \sigma \alpha)$. Actual result with $\omega \sigma \tau \varepsilon$ and the infinitive with accusative of general reference as is common (also verse 11) in the Koine (Robertson, Grammar, pp. 999f.). Paul apparently remained in Ephesus, but the gospel spread all over the province even to the Lycus Valley including the rest of the seven churches of Re $1: 11 ; 2 ; 3$. Demetrius in verse 26 will confirm the tremendous influence of Paul's ministry in Ephesus on Asia. Forty years after this Pliny in his famous letter to Trajan from Bithynia will say of Christianity: "For the contagion of
this superstition has not only spread through cities, but also through villages and country places." It was during these years in Ephesus that Paul was greatly disturbed over the troubles in the Corinthian Church. He apparently wrote a letter to them now lost to us (1Co 5:9), received messages from the household of Chloe, a letter from the church, special messengers, sent Timothy, then Titus, may have made a hurried trip himself, wrote our First Corinthians, was planning to go after the return of Titus to Troas where he was to meet him after Pentecost, when all of a sudden the uproar raised by Demetrius hurried Paul away sooner than he had planned. Meanwhile Apollos had returned from Corinth to Ephesus and refused to go back (1Co 16:12 ). Paul doubtless had helpers like Epaphras and Philemon who carried the message over the province of Asia, Tychicus, and Trophimus of Asia who were with him on the last visit to Jerusalem (verses 22,29; 20:4). Paul's message reached Greeks, not merely Hellenists and God-fearers, but some of the Greeks in the upper circles of life in Ephesus.

Acts 19:11
 chance," "not the ordinary ones," litotes for "the extraordinary." All "miracles" or "powers" ( $\delta v v a \mu \varepsilon ı \varsigma) ~ a r e ~ s u p e r n a t u r a l ~ a n d ~ o u t ~ o f ~ t h e ~ o r d i n a r y, ~ b u t ~ h e r e ~ G o d ~ r e g u l a r l y ~ w r o u g h t ~(\varepsilon \pi о ь \varepsilon), ~$ imperfect active) wonders beyond those familiar to the disciples and completely different from the deeds of the Jewish exorcists. This phrase is peculiar to Luke in the N.T. (also 28:2), but it occurs in the classical Greek and in the Koine as in III Macc. 3:7 and in papyri and inscriptions (Deissmann, Bible Studies, p.255). In Samaria Philip wrought miracles to deliver the people from the influence of Simon Magus. Here in Ephesus exorcists and other magicians had built an enormous vogue of a false spiritualism and Paul faces unseen forces of evil. His tremendous success led some people to superstitious practices thinking that there was power in Paul's person.

Acts 19:12
Handkerchiefs ( $\sigma o v \delta \alpha \rho ı \alpha$ ). Latin word for $\sigma v \delta 0 \rho$ (sweat). Used in Lu 19:20; Joh 11:44; 20:7. In two papyri marriage-contracts this word occurs among the toilet articles in the dowry (Deissmann, Bible Studies, p. 223).

Aprons ( $\sigma \mu \mu \kappa \imath \theta ı \alpha)$. Latin word also, semicinctilum ( $\sigma \varepsilon \mu \mu, \chi ı \nu \gamma o$ ). Only here in the N.T. Linen aprons used by servants or artisans (Martial XIV. 153). Paul did manual work at Ephesus ( $20: 34$ ) and so wore these aprons.

Departed ( $\alpha \pi \alpha \lambda \lambda \alpha \lambda \sigma \varepsilon \theta \alpha$ ). Present passive infinitive with $\omega \sigma \tau \varepsilon$ for actual result as in verse 10. If one wonders how God could honour such superstitious faith, he should remember that there is no power in superstition or in magic, but in God. If God never honoured any faith save that entirely free from superstition, how about Christian people who are troubled over the number 13, over the moon, the rabbit's foot? The poor woman with an issue of blood touched the hem of Christ's garment and was healed (Lu 8:44-46) as others sought
to do (Mt 14:36). God condescends to meet us in our ignorance and weakness where he can reach us. Elisha had a notion that some of the power of Elijah resided in his mantle ( 2 Ki 2:13 ). Some even sought help from Peter's shadow (Ac 5:15).

Acts 19:13
Of the strolling Jews, exorcists ( $\tau \omega v \pi \varepsilon \rho เ \varepsilon \rho \chi \circ \mu \varepsilon \nu \omega \nu$ Iov $\delta \alpha \iota \omega \nu \varepsilon \xi \circ \rho \kappa \iota \sigma \tau \omega v$ ). These exorcists travelled around ( $\pi \varepsilon \rho$ ) from place to place like modern Gypsy fortune-tellers. The Jews were especially addicted to such practices with spells of sorcery connected with the name of Solomon (Josephus, Ant. VIII. 2.5). See also Tobit 8:1-3. Jesus alludes to those in Palestine (Mt 12:27; Lu 11:19). The exorcists were originally those who administered an oath (from $\varepsilon \xi$ оркı $\zeta \omega$, to exact an oath), then to use an oath as a spell or charm. Only instance here in the N.T. These men regarded Paul as one of their own number just as Simon Magus treated Simon Peter. Only here these exorcists paid Paul the compliment of imitation instead of offering money as Magus did.

To name over ( $о$ vo $\mu \alpha \zeta \varepsilon ı v \varepsilon \pi$ ). They heard what Paul said and treated his words as a magic charm or spell to drive the evil spirits out.

I adjure you by Jesus whom Paul preacheth (Норкıॅ $\omega$ v $\mu \alpha \varsigma ~ \tau o v ~ I n \sigma o u v ~ o v ~ П a v \lambda o \varsigma ~$ кп $\rho v \sigma \sigma \varepsilon$ ). Note two accusatives with the verb of swearing (cf. Mr 5:7) as a causative verb (Robertson, Grammar, p. 483). The papyri furnish numerous instances of opкıॅ $\omega$ in such constructions (Deissmann, Bible Studies, p. 281). Note also the article with Jesus, "the Jesus," as if to identify the magic word to the demons with the addition "whom Paul preaches." They thought that success turned on the correct use of the magical formula. The Ephesian mysteries included Christianity, so they supposed.

Acts 19:14
Seven sons of Sceva ( $\Sigma \kappa \varepsilon v \alpha \varepsilon \pi \tau \alpha$ vıo). Who this Sceva was we do not know. If a high priest, he was highly connected in Jerusalem (cf. 5:24). Some MSS. have ruler instead of priest. His name may be Latin in origin. $\Sigma \kappa \varepsilon v \alpha$ has Doric form of genitive. But that he had seven sons in this degraded business shows how Judaism had fared poorly in this superstitious city. Did they imagine there was special power in the number seven?

Acts 19:15
 ( $\gamma เ \nu \omega \sigma \kappa \omega$ )" and "the (whom you mentioned) Paul I am acquainted with ( $\tau o v ~ \Pi \alpha u \lambda o v$ $\varepsilon \pi \iota \sigma \tau \alpha \mu \alpha) . "$ Clear distinction between $\gamma \iota \nu \omega \sigma \kappa \omega$ and $\varepsilon \pi \iota \sigma \tau \alpha \mu \alpha$.

But who are ye? (v
Acts 19:16
Leaped on them ( $\varepsilon \varphi a \lambda$ о $\mu \varepsilon v o \varsigma \varepsilon \pi^{\prime}$ avtovc). Second aorist (ingressive) middle participle of $\varepsilon \varphi \alpha \lambda \lambda o \mu \alpha$, old verb to spring upon like a panther, here only in the N.T.

Mastered (катакטрıยvбаऽ). First aorist (effective) active participle of катакv $\rho \varepsilon v \omega$, late verb from ката and кирюю¢, to become lord or master of.

Both ( $\alpha \mu \varphi о \tau \varepsilon \rho \omega v$ ). Papyri examples exist where $\alpha \mu \varphi о \tau \varepsilon \rho o$ means "all" or more than "two" (Robertson, Grammar, p. 745). So here $\alpha \mu \varphi о \tau \varepsilon \rho o$ includes all seven. "Both" in old English was used for more than two.

So that ( $\omega \sigma \tau \varepsilon$ ). Another example (verses 10,11 ) of $\omega \sigma \tau \varepsilon$ with the infinitive for result.
Naked ( $\gamma \nu \mu \nu 0 \cup \varsigma$ ). Probably with torn garments,
Wounded ( $\tau \varepsilon \tau \rho \alpha \cup \mu \alpha \tau \iota \sigma \mu \varepsilon v o v \varsigma)$. Perfect passive participle of $\tau \rho \alpha \nu \mu \alpha \tau \iota \zeta \omega$, old verb to wound, from $\tau \rho \alpha \nu \mu \alpha$ (a wound). In the N.T. only here and Lu 20:12 .

Acts 19:17
Was magnified ( $\varepsilon \mu \varepsilon \gamma a \lambda \nu v \varepsilon \tau \sigma)$. Imperfect passive. To make great. It was a notable victory over the powers of evil in Ephesus.

Acts 19:18
Came ( $\eta \rho \chi$ оvтo). Imperfect middle, kept coming, one after another. Even some of the believers were secretly under the spell of these false spiritualists just as some Christians today cherish private contacts with so-called occult powers through mediums, seances, of which they are ashamed.

Confessing ( $\varepsilon \xi о \mu о \lambda о \gamma о \cup \mu \varepsilon v o$ ). It was time to make a clean breast of it all, to turn on the light, to unbosom their secret habits.

Declaring their deeds ( $\alpha v \alpha \gamma \gamma \varepsilon \lambda \lambda$ оvtєऽ $\tau \alpha \varsigma \pi \rho \alpha \xi \varepsilon ı \varsigma \alpha \tau \tau \omega v$ ). Judgment was beginning at the house of God. The dupes (professing believers, alas) of these jugglers or exorcists now had their eyes opened when they saw the utter defeat of the tricksters who had tried to use the name of Jesus without his power. The boomerang was tremendous. The black arts were now laid bare in their real character. Gentile converts had a struggle to shake off their corrupt environment.

Acts 19:19
Not a few of them that practised curious arts (ıкаvо $\tau \omega v \tau \alpha \pi \varepsilon \rho เ \varepsilon \rho \gamma \alpha \pi \rho \alpha \xi \alpha v \tau \omega v$ ). Considerable number of the performers or exorcists themselves who knew that they were humbugs were led to renounce their evil practices. The word $\pi \varepsilon \rho เ \varepsilon \rho \gamma \alpha$ (curious) is an old word ( $\pi \varepsilon \rho \iota, \varepsilon \rho \gamma \alpha$ ) originally a piddler about trifles, a busybody ( $1 \mathrm{Ti} 5: 13$ ), then impertinent and magical things as here. Only two examples in the N.T. It is a technical term for magic as the papyri and inscriptions show. Deissmann (Bible Studies, p. 323) thinks that these books here burned were just like the Magic Papyri now recovered from Egypt.

Burned them in the sight of all (катєкаюоv $\varepsilon v \omega \pi \iota \rho \tau \pi \alpha \tau \omega v$ ). Imperfect active of катакаı $\omega$. It probably took a good while to do it, burned them completely (up, we say; down, the Greeks say, perfective use of $\kappa \alpha \tau \alpha$ ). These Magical Papyri or slips of parchment with symbols or magical sentences written on them called $\mathrm{E} \varphi \varepsilon \sigma \iota \alpha ~ Г \rho \alpha \mu \mu \alpha \tau \alpha$ (Ephesian Letters). These Ephesian Letters were worn as amulets or charms.

They brought them together ( $\sigma v v \varepsilon v \varepsilon \gamma \kappa \alpha v \tau \varepsilon \varsigma)$. Second aorist active participle of $\sigma v \vee \varphi \varepsilon \rho \omega$. What a glorious conflagration it would be if in every city all the salacious, blas-
phemous, degrading books, pamphlets, magazines, and papers could be piled together and burned.

They counted ( $\sigma \nu v \varepsilon \psi \eta \eta \varphi \iota \alpha v$ ). First aorist active indicative of $\sigma \nu v \psi \eta \varphi \zeta \zeta \omega$, to reckon

Fifty thousand pieces of silver ( $\alpha \rho \gamma \cup \rho ı v \mu \nu \rho ı \alpha \delta \alpha \varsigma \pi \varepsilon \nu \tau \varepsilon$ ). Five ten thousand ( $\mu v \rho ı \alpha \delta \alpha \varsigma$ ) pieces of silver. Ephesus was largely Greek and probably the silver pieces were Greek drachmae or the Latin denarius, probably about ten thousand dollars or two thousand English pounds.

Acts 19:20
Mightily (ката кратос). According to strength. Only here in N.T., common military term in Thucydides. Such proof of a change counted.

Grew and prevailed ( $\eta \cup \xi \alpha v \varepsilon v \kappa \alpha ~ \iota \sigma \chi \cup \varepsilon v)$. Imperfect actives, kept growing and gaining strength. It was a day of triumph for Christ in Ephesus, this city of vast wealth and superstition. Ephesus for centuries will be one of the centres of Christian power. Timothy will come here and John the Apostle and Polycarp and Irenaeus.

Acts 19:21
Purposed in the spirit ( $\varepsilon \theta \varepsilon \tau \sigma \varepsilon \nu \tau \omega \pi \nu \varepsilon v \mu \alpha \tau)$. Second aorist middle indicative for mental action and "spirit" expressed also. A new stage in Paul's career begins here, a new division of the Acts.

Passed through ( $\delta \iota \varepsilon \lambda \theta \omega v$ ). Word ( $\delta เ \varepsilon \rho \chi \circ \mu \alpha)$ used ten times in Acts (cf. 19:1) of missionary journeys (Ramsay).

Macedonia and Achaia ( $\tau \eta \nu$ Maк $\delta \delta o v i \alpha \nu \kappa \alpha$ A $\alpha \ldots \alpha v$ ). This was the way that he actually went, but originally he had planned to go to Achaia (Corinth) and then to Macedonia, as he says in 2Co 1:15f. , but he had now changed that purpose, perhaps because of the bad news from Corinth. Already when he wrote I Corinthians he proposed to go first to Macedonia (1Co 16:5-7 ). He even hoped to spend the winter in Corinth "if the Lord permit" and to remain in Ephesus till Pentecost, neither of which things he did.

I must also see Rome ( $\delta \varepsilon \mu \varepsilon \kappa \alpha \mathrm{P} \omega \mu \eta \nu \tau \varepsilon \iota v$ ). This section of Acts begins with Rome in the horizon of Paul's plans and the book closes with Paul in Rome (Rackham). Here he feels the necessity of going as in Ro 1:15 he feels himself "debtor" to all including "those in Rome" (Ro 1:16 ). Paul had long desired to go to Rome (Rom 1:10), but had been frequently hindered (Ro 1:13 ), but he has definitely set his face to go to Rome and on to Spain (Ro 15:23-29 ). Paley calls sharp attention to this parallel between Ac 19:21 and Ro 1:10-15; 15:23-29. Rome had a fascination for Paul as the home of Aquila and Priscilla and numerous other friends (Ro 16 ), but chiefly as the capital of the Roman Empire and a necessary goal in Paul's ambition to win it to Jesus Christ. His great work in Asia had stirred afresh in him the desire to do his part for Rome. He wrote to Rome from Corinth not long after this and
in Jerusalem Jesus in vision will confirm the necessity $(\delta \varepsilon)$ that Paul see Rome (Acts 23:11 ).

Acts 19:22
 4:17) and had requested kindly treatment of this young minister in his difficult task of placating the divided church (1Co 16:10-11) that he might return to Paul as he evidently had before Paul leaves Ephesus. He then despatched Titus to Corinth to finish what Timothy had not quite succeeded in doing with instructions to meet him in Troas. Now Timothy and Erastus (cf. Ro 16:23; 2Ti 4:20) go on to Macedonia to prepare the way for Paul who will come on later.

He himself stayed in Asia for a while ( $\alpha v \tau \circ \varsigma \varepsilon \pi \varepsilon \sigma \chi \varepsilon v \chi \rho \circ v \circ v \varepsilon \iota \varsigma \tau \eta v$ A $\sigma \iota \alpha v$ ). Literally, He himself had additional time in Asia. Second aorist active indicative of $\varepsilon \pi \varepsilon \chi \omega$, old and common idiom, only here in the N.T. in this sense and the verb only in Luke and Paul. The reason for Paul's delay is given by him in 1Co 16:8f. , the great door wide open in Ephesus. Here again Luke and Paul supplement each other. Pentecost came towards the end of May and May was the month of the festival of Artemis (Diana) when great multitudes would come to Ephesus. But he did not remain till Pentecost as both Luke and Paul make plain.

Acts 19:23
No small stir ( $\tau \alpha \rho \alpha \chi \circ \varsigma$ оик o $\lambda \iota \gamma \circ \varsigma)$. Same phrase in 12:18 and nowhere else in the N.T. Litotes.

Concerning the Way ( $\pi \varepsilon \rho \tau \eta \varsigma$ oסov). See this phrase for Christianity in 9:2; 19:9; 24:22 which see, like the "Jesus Way" of the Indians. There had already been opposition and "stir" before this stage (cf. 19:11-20). The fight with wild beasts in 1Co 15:32 (whatever it was) was before that Epistle was written and so before this new uproar. Paul as a Roman citizen could not be thrown to wild beasts, but he so pictured the violent opponents of Christ in Ephesus.

Acts 19:24
Demetrius, a silversmith ( $\Delta \eta \mu \eta \tau \rho \circ \varsigma \alpha \rho \gamma \cup \rho о \kappa о \pi о \varsigma)$. The name is common enough and may or may not be the man mentioned in 3Jo 1:12 who was also from the neighbourhood of Ephesus. There is on an inscription at Ephesus near the close of the century a Demetrius called vєолоьоя A $\rho \tau \varepsilon \mu \iota \delta$ оц a temple warden of Artemis (Diana). Zoeckler suggests that Luke misunderstood this word $v \varepsilon о \pi о \iota \circ$ and translated it into $\alpha \rho \gamma \cup \rho о к о \pi о \varsigma$, a beater ( $\kappa о \pi \tau \omega$, to beat) of silver ( $\alpha \rho \gamma \cup \rho o \varsigma$, silver), "which made silver shrines of Artemis" ( $\pi o t \omega v$ vaous ( $\alpha \rho \gamma \cup \rho о \cup \varsigma)$ A $\rho \tau \varepsilon \mu เ \delta о \varsigma)$. It is true that no silver shrines of the temple have been found in Ephesus, but only numerous terra-cotta ones. Ramsay suggests that the silver ones would naturally be melted down. The date is too late anyhow to identify the Demetrius who was vєолоьо , with the Demetrius а $\rho \gamma$ иооколоৎ who made little silver temples of Artemis, though B does not have the word a $\alpha$ pupous. The poor votaries would buy the terra-cotta ones, the
rich the silver shrines (Ramsay, Paul the Traveller, p. 278). These small models of the temple with the statue of Artemis inside would be set up in the houses or even worn as amulets. It is a pity that the Revised Version renders Artemis here. Diana as the Ephesian Artemis is quite distinct from the Greek Artemis, the sister of Apollo, the Diana of the Romans. This temple, built in the 6th century B.C., was burnt by Herostratus Oct. 13 B.C. 356, the night when Alexander the Great was born. It was restored and was considered one of the seven wonders of the world. Artemis was worshipped as the goddess of fertility, like the Lydian Cybele, a figure with many breasts. The great festival in May would offer Demetrius a golden opportunity for the sale of the shrines.

Brought no little business ( $\pi \alpha \rho \varepsilon \not \chi \varepsilon \tau \frac{0}{}$ окк $\left.\frac{\lambda}{} \downarrow \gamma \eta \nu \varepsilon \rho \gamma \alpha \sigma \iota \alpha v\right)$. Imperfect middle, continued to bring (furnish, provide). The middle accents the part that Demetrius played as the leader of the guild of silversmiths, work for himself and for them.

Unto the craftsmen ( $\tau \alpha ı \varsigma \tau \varepsilon \chi \nu \iota \tau \alpha \iota \varsigma)$. The artisans from $\tau \varepsilon \chi \vee \eta$ (craft, art). Trade guilds were common in the ancient world. Demetrius had probably organized this guild and provided the capital for the enterprise.

Acts 19:25
Whom he gathered together (ouc $\sigma v v a \theta \rho o \iota \sigma a \varsigma$ ). First aorist active participle of $\sigma 0 v a \theta \rho o \iota \zeta \omega$, old verb to assemble together ( $\alpha \theta \rho o o \varsigma$, a crowd), in the N.T. only here and Ac 12:12.
 workmen concerning such things," apparently those who made the marble and terra-cotta shrines who would also be affected in the same way. It was a gathering of the associated trades, not for a strike, for employer and employees met together, but in protest against the preaching of Paul.

We have our wealth ( $\eta$ عито $1 \propto \downarrow \mu \nu \nu \varepsilon \sigma \tau i v$ ). The wealth is to us (dative of possession). This old word for wealth occurs here alone in the N.T. It is from $\varepsilon v$ and $\pi 0 \rho \circ \varsigma$, easy to pass through, easy to accomplish, to be well off, wealthy, welfare, weal, well-being, rich. Demetrius appeals to this knowledge and self-interest of the artisans as the basis for their zeal for Artemis, piety for revenue.

Acts 19:26
At Ephesus (E¢гбov). Genitive of place as also with Aбıac (Asia). Cf. Robertson, Grammar, pp. 494f.

This Paul (o Пau入oc ovtoc). Contemptuous use of ovtoc.
Hath turned away ( $\mu \varepsilon \tau \varepsilon \sigma \tau \eta \sigma \varepsilon v$ ). Changed, transposed. First aorist active indicative, did change. Tribute to Paul's powers as a preacher borne out by Luke's record in 19:10. There may be an element of exaggeration on the part of Demetrius to incite the workmen to action, for the worship of Artemis was their wealth. Paul had cut the nerve of their business.

There had long been a Jewish colony in Ephesus, but their protest against idolatry was as nothing compared with Paul's preaching (Furneaux).

Which are made with hands (o $\delta \omega \alpha \chi \varepsilon \rho \omega \nu \gamma \iota \nu \circ \mu \varepsilon v o$ ). Note the present tense, made from time to time. No doubt Paul had put the point sharply as in Athens (Ac 17:29). Isaiah (Isa 44:9-17 ) had pictured graphically the absurdity of worshipping stocks and stones, flatly forbidden by the Old Testament (Ex 20:4; Ps 135:15-18). The people identified their gods with the images of them and Demetrius reflects that point of view. He was jealous of the brand of gods turned out by his factory. The artisans would stand by him on this point. It was a reflection on their work.

Acts 19:27
This our trade ( $\tau 0 \cup \tau о$ то $\mu \varepsilon \rho \circ \varsigma$ ). Part, share, task, job, trade.
Come into disrepute ( $\varepsilon \varsigma \varsigma \alpha \pi \varepsilon \lambda \varepsilon \gamma \mu \circ \vee \varepsilon \lambda \theta \varepsilon เ v$ ). Not in the old writers, but in LXX and Koine. Literally, reputation, exposure, censure, rejection after examination, and so disrepute. Their business of making gods would lose caste as the liquor trade (still called the trade in England) has done in our day. They felt this keenly and so Demetrius names it first. They felt it in their pockets.

Of the great goddess Artemis ( $\tau \eta \varsigma \mu \varepsilon \gamma \alpha \lambda \eta \varsigma \theta \varepsilon \alpha \varsigma$ A $\rho \tau \varepsilon \mu \delta \delta \varsigma)$ ). She was generally known as the Great ( $\eta \mathrm{M} \varepsilon \gamma \alpha \lambda \eta$ ). An inscription found at Ephesus calls her "the greatest god" ( $\eta$ $\mu \varepsilon \gamma เ \sigma \tau \eta \theta \varepsilon \sigma \varsigma)$. The priests were eunuchs and there were virgin priestesses and a lower order of slaves known as temple-sweepers (vع $\omega \kappa 0 \rho o$, verse 35). They had wild orgiastic exercises that were disgraceful with their Corybantic processions and revelries.

Be made of no account ( $\varepsilon \varsigma \varsigma) o v \theta \varepsilon v \lambda o \gamma \iota \sigma \theta \eta \nu \alpha)$. Be reckoned as nothing, first aorist passive infinitive of $\lambda о \gamma \iota \zeta о \mu \alpha$ and $\varepsilon ા \varsigma$.

Should even be deposed of her magnificence ( $\mu \varepsilon \lambda \lambda \varepsilon เ \nu \tau \varepsilon$ ка каӨaıрєь $\theta a$ тŋऽ $\mu \varepsilon \gamma \alpha \lambda \varepsilon ו \circ \tau \eta \tau о \varsigma \alpha \cup \tau \eta \varsigma)$. Note the present infinitive after $\mu \varepsilon \lambda \lambda \varepsilon เ \nu$, ablative case (so best MSS.) after каӨaıp $\omega$, to take down, to depose, to deprive of. The word $\mu \varepsilon \gamma \alpha \lambda \varepsilon เ о \tau \eta \varsigma$ occurs also in Lu 9:43 (the majesty of God) and in 2Pe 1:16 of the transfiguration of Christ. It is already in the LXX and Deissmann (Light from the Ancient East, p. 363) thinks that the word runs parallel with terms used in the emperor-cult.

All Asia and the world $о \lambda \eta(\eta)$ Aбıа ка ( $\eta$ ) оккои $\mu \varepsilon v \eta$. See 11:28 for same use of oккоу $\mu \varepsilon v \eta$. An exaggeration, to be sure, but Pausanias says that no deity was more widely worshipped. Temples of Artemis have been found in Spain and Gaul. Multitudo errantium non efficit veritatem (Bengel). Even today heathenism has more followers than Christianity. To think that all this splendour was being set at naught by one man and a despised Jew at that!

Acts 19:28
They were filled with wrath ( $\gamma \varepsilon v \circ \mu \varepsilon v o \pi \lambda \varepsilon \rho \varepsilon เ \varsigma ~ \theta u \mu \circ v$ ). Having become full of wrath.

Cried out ( $\varepsilon \kappa \rho \alpha \zeta$ 人v). Inchoative imperfect, began to cry out and kept it up continuously. Reiteration was characteristic of the orgiastic exercises. The Codex Bezae adds after $\theta u \mu o v$
 the speech of Demetrius.
 omits $\eta$ (the) and makes it read: "Great Artemis of the Ephesians." This was the usual cry of the votaries in their orgies as the inscriptions show, an ejaculatory outcry or prayer instead of an argument as the other MSS. have it. That is vivid and natural (Ramsay, Church in the Roman Empire, pp. 135ff.). Yet on this occasion the artisans were making an argumentative protest and plea against Paul. An inscription at Dionysopolis has "Great is Apollo."

Acts 19:29
With the confusion ( $\tau \eta \varsigma \sigma v \gamma \chi \cup \sigma \varepsilon \omega \varsigma$ ). Genitive case after $\varepsilon \pi \lambda \eta \sigma \theta \eta$. An old word, but in the N.T. only here, from verb $\sigma v \gamma \chi \varepsilon \omega$, to pour together like a flood (only in Acts in the N.T.). Vivid description of the inevitable riot that followed "the appearance of such a body in the crowded agora of an excitable city" (Rackham) "vociferating the city's watch-word."

They rushed ( $\omega \rho \mu \eta \sigma \alpha v$ ). Ingressive aorist active indicative of o $\rho \mu \alpha \omega$, old verb for impetuous dashing, a case of mob psychology (mob mind), with one accord ( $\rho \mu \mathrm{o} \theta \mathrm{\theta} \mu \mathrm{\mu} \alpha \mathrm{ov}$ as in Ac 1:14, etc.).

Into the theatre ( $\varepsilon ı \varsigma ~ \tau o ~ \theta \varepsilon \alpha \tau \rho o v)$. A place for seeing $(\theta \varepsilon \alpha o \mu \alpha)$ spectacles, originally for dramatic representation (Thucydides, Herodotus), then for the spectators, then for the spectacle or show (1Co 4:9). The theatre (amphitheatre) at Ephesus can still be traced in the ruins (Wood, Ephesus) and shows that it was of enormous size capable of seating fiftysix thousand persons (some estimate it only 24,500 ). It was the place for large public gatherings of any sort out of doors like our football and baseball parks. In particular, gladiatorial shows were held in these theatres.

Having seized Gaius and Aristarchus men of Macedonia ( $\sigma v \alpha \rho \pi \alpha \sigma \alpha v \tau \varepsilon \varsigma ~ Г a ı o v ~ к \alpha ~$ Aрıбтархоv Маквסоvac). See 6:12 for this same verb. They wanted some victims for this "gladiatorial" show. These two men were "Paul's companions in travel" ( $\sigma$ (єкк $\delta \eta \mu$ оия Пau入ov), together (бuv) with Paul in being abroad, away from home or people ( $\varepsilon \kappa-\delta \eta \mu \circ v \varsigma$, late word, in the N.T. only here and 2Co 8:19 ). How the mob got hold of Gaius (Ac 20:4) and Aristarchus (20:4; 27:2; Col 4:10; Phm 1:24) we do not know whether by accidental recognition or by search after failure to get Paul. In Ro 16:4 Paul speaks of Priscilla and Aquila as those "who for my life laid down their own necks." Paul lived with them in Ephesus as in Corinth. It is possible that Demetrius led the mob to their house and that they refused to allow Paul to go or to be seized at the risk of their own lives. Paul himself may have been desperately ill at this time as we know was the case once during his stay in Ephesus when he felt the answer of death in himself (2Co 1:9) and when God rescued him. That may mean
that, ill as he was, Paul wanted to go and face the mob in the theatre, knowing that it meant certain death.

Acts 19:30
And when Paul was minded to enter in unto the people ( $\Pi \alpha v \lambda o v \delta \varepsilon \beta o v \lambda o \mu \varepsilon v o v$ $\varepsilon เ \sigma \varepsilon \lambda \theta \varepsilon \iota v \varepsilon \iota \varsigma ~ \tau o v \delta \eta \mu \circ v)$. Genitive absolute. Plainly Paul wanted to face the howling mob, whether it was the occasion pictured in 2Co 1:9 or not. "St. Paul was not the man to leave his comrades in the lurch" (Knowling).

Suffered him not (ouk $\varepsilon \iota \omega v \alpha v \tau o v$ ). Imperfect of $\varepsilon \alpha \omega$, common verb to allow, what Gildersleeve called the negative imperfect (Robertson, Grammar, p. 885), denoting resistance to pressure. The more Paul insisted on going the more the disciples refused to agree to it and they won.

Acts 19:31
Certain also of the chief officers of Asia ( $\tau \iota v \varepsilon \varsigma \delta \varepsilon \kappa \alpha \tau \omega \nu$ A $\sigma \iota \alpha \rho \chi \omega v$ ). These "Asiarchs" were ten officers elected by cities in the province who celebrated at their own cost public games and festivals (Page). Each province had such a group of men chosen, as we now know from inscriptions, to supervise the funds connected with the worship of the emperor, to preside at games and festivals even when the temple services were to gods like Artemis. Only rich men could act, but the position was eagerly sought.

Being his friends (ovtєৎ $\alpha v \tau \omega$ $\varphi \lambda \lambda 0$ ). Evidently the Asiarchs had a high opinion of Paul and were unwilling for him to expose his life to a wild mob during the festival of Artemis. They were at least tolerant toward Paul and his preaching. "It was an Asiarch who at Smyrna resisted the cry of the populace to throw Polycarp to the lions" (Furneaux).

Besought him ( $\pi \alpha \rho \varepsilon \kappa \alpha \lambda o v v \alpha v \tau о v$ ). Imperfect active, showing that the messengers sent had to insist over Paul's protest. " Not to adventure himself " ( $\mu \eta \delta \delta v v \alpha$ عav $\quad \delta v$ ). It was a hazard, a rash adventure "to give himself" (second aorist active infinitive of $\delta \iota \delta \omega \mu$ ). Just this sense of "adventure" with the idiom occurs only here in the N.T., though in Polybius V., 14, 9 . But the phrase itself Paul uses of Jesus who gave himself for our sins (Ga $1: 4 ; 1 \mathrm{Ti}$ 2:6; Tit 2:14 ). It is not the first time that friends had rescued Paul from peril (Ac 9:25,30; 17:10,14 ). The theatre was no place for Paul. It meant certain death.

Acts 19:32
Some therefore cried one thing and some another ( $\alpha \lambda \lambda \frac{\mu \varepsilon v}{} o v \nu \alpha \lambda \lambda o \tau \varepsilon \kappa \rho \alpha \zeta o v$ ). This classical use of $\alpha \lambda \lambda o \varsigma ~ \alpha \lambda \lambda o$ (Robertson, Grammar, p. 747) appears also in 2:12; 21:34 . Literally, "others cried another thing." The imperfect shows the repetition (kept on crying) and confusion which is also distinctly stated.

For the assembly was in confusion ( $\eta \nu \gamma \alpha \rho \eta \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha \sigma \nu v \kappa \varepsilon \chi \nu \mu \varepsilon \nu \eta$ ). The reason for the previous statement. Periphrastic past perfect passive of $\sigma v \gamma \chi \varepsilon \omega, \sigma v \gamma \chi v v \omega(-v \nu \nu \omega)$, to pour together, to commingle as in verse $29(\sigma v \gamma \chi \cup \sigma \varepsilon \omega \varsigma)$. It was not an "assembly" ( $\varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$, $\varepsilon \kappa, \kappa \alpha \lambda \varepsilon \omega$, to call out), but a wholly irregular, disorganized mob in a state (perfect tense) of
confusion. There was "a lawful assembly" (verse 39), but this mob was not one. Luke shows his contempt for this mob (Furneaux).

Had come together ( $\sigma v v \varepsilon \lambda \eta \lambda \nu \theta \varepsilon ı \sigma \alpha v$ ). Past perfect active of $\sigma v v \varepsilon \rho \chi \circ \mu \alpha$. It was an assembly only in one sense. For some reason Demetrius who was responsible for the mob preferred now to keep in the background, though he was known to be the ring-leader of the gathering (verse 38). It was just a mob that shouted because others did.

Acts 19:33
And they brought Alexander out of the crowd ( $\varepsilon \kappa \delta \varepsilon$ tov ox $\lambda 0 v \sigma v v \varepsilon \beta \beta \alpha \sigma \alpha v$ $\mathrm{A} \lambda \varepsilon \xi \alpha v \delta \rho o v)$. The correct text (Aleph A B) has this verb $\sigma v v \varepsilon \beta \wedge \beta \alpha \sigma \alpha v$ (from $\sigma v \nu \beta \downarrow \beta \alpha \zeta \omega$, to put together) instead of $\pi \rho о \varepsilon \beta \downarrow \beta \alpha \sigma \alpha v($ from $\pi \rho о \beta \curlywedge \beta \alpha \zeta \omega$, to put forward). It is a graphic word, causal of $\beta a \iota v \omega$, to go, and occurs in Ac 16:10; Col 2:19; Eph 4:16. Evidently some of the Jews grew afraid that the mob would turn on the Jews as well as on the Christians. Paul was a Jew and so was Aristarchus, one of the prisoners. The Jews were as strongly opposed to idolatry as were the Christians.

The Jews putting him forward ( $\pi \rho \circ \beta \alpha \lambda o v \tau \omega v \alpha \nu \tau \circ v \tau \omega v$ Iov $\delta \alpha \iota \omega v$ ). Genitive absolute of the second aorist active participle of $\pi \rho \circ \beta \alpha \lambda \lambda \omega$, old verb to push forward as leaves in the spring (Lu 21:30). In the N.T. only in these two passages. Alexandria had already disgraceful scenes of Jew-baiting and there was real peril now in Ephesus with this wild mob. So Alexander was pushed forward as the champion to defend the Jews to the excited mob. He may be the same Alexander the coppersmith who did Paul much evil (2Ti 4:14), against whom Paul will warn Timothy then in Ephesus. "The Jews were likely to deal in the copper and silver required for the shrines, so he may have had some trade connexion with the craftsmen which would give him influence" (Furneaux).

Beckoned with the hand (катабєוбаৎ $\tau \eta v \chi \varepsilon \mid \rho \alpha$ ). Old verb катабєו $\omega$, to shake down, here the hand, rapidly waving the hand up and down to get a hearing. In the N.T. elsewhere only in Ac 12:17; 13:16; 21:40 where "with the hand" ( $\tau \eta \chi \varepsilon \rho \rho$, instrumental case) is used instead of $\tau \eta \nu \chi \varepsilon \iota \rho \alpha$ (the accusative).

Would have made a defence unto the people ( $\eta \theta \varepsilon \lambda \varepsilon v a \pi \circ \lambda о \gamma \varepsilon \iota \sigma a \tau \omega \delta \eta \mu \omega$ ). Imperfect active, wanted to make a defence, tried to, started to, but apparently never got out a word. Ато入оүєוбӨa (present middle infinitive, direct middle, to defend oneself), regular word for formal apology, but in N.T. only by Luke and Paul (twice in Gospel, six times in Acts, and in Ro 2:15; 2Co 12:19 ).

Acts 19:34
When they perceived ( $\varepsilon \pi / \gamma v o v \tau \varepsilon \varsigma)$. Recognizing, coming to know fully and clearly ( $\varepsilon \pi \iota-$ ), second aorist (ingressive) active participle of $\varepsilon \pi \iota \gamma \iota v \omega \sigma \kappa \omega$. The masculine plural is left as nominative absolute or $\pi \varepsilon v \delta \varepsilon v \varsigma$ without a verb. The rioters saw at once that Alexander was ( $\varepsilon \sigma \tau \iota \nu$, present tense retained in indirect assertion) a Jew by his features.

An with one voice cried out ( $\varphi \omega \nu \eta \varepsilon \gamma \varepsilon \nu \varepsilon \tau \circ \mu \not \mu \varepsilon \kappa \pi \alpha \nu \tau \omega \nu \kappa \rho \alpha \zeta о \nu \tau \omega \nu$ ). Anacoluthon or construction according to sense. Literally, "one voice arose from all crying." K $\rho \alpha \zeta o \nu \tau \omega \nu$ agrees in case (ablative) with $\pi \alpha \nu \tau \omega v$, but Aleph A have к $\rho \alpha \zeta \nu \tau \varepsilon \varsigma$. This loose construction is not uncommon (Robertson, Grammar, pp. 436f.). Now at last the crowd became unanimous (one voice) at the sight of a hated Jew about to defend their attacks on the worship of Artemis. The unanimity lasted "about the space of two hours" (o $\sigma \varepsilon \varepsilon \pi \omega \rho a \varsigma \delta v o$ ), "as if for two hours." Their creed centred in this prolonged yell: "Great is Artemis of the Ephesians" with which the disturbance started (verse 28).

Acts 19:35
The town-clerk (o $\gamma \rho \alpha \mu \mu \alpha \tau \varepsilon \varsigma)$ ). Ephesus was a free city and elected its own officers and the recorder or secretary was the chief magistrate of the city, though the proconsul of the province of Asia resided there. This officer is not a mere secretary of another officer or like the copyists and students of the law among the Jews, but the most influential person in Ephesus who drafted decrees with the aid of the $\sigma \tau \rho \alpha \tau \eta \gamma \circ$, had charge of the city's money, was the power in control of the assembly, and communicated directly with the proconsul. Inscriptions at Ephesus give frequently this very title for their chief officer and the papyri have it also. The precise function varied in different cities. His name appeared on the coin at Ephesus issued in his year of office.

Had quieted the multitude ( $\kappa \alpha \tau \alpha \sigma \tau \varepsilon ı \lambda \alpha \varsigma ~ \tau o v ~ o \chi \lambda о v)$. First aorist active participle of $\kappa \alpha \tau \alpha \sigma \tau \varepsilon \lambda \lambda \omega$, to send down, arrange dress (Euripides), lower (Plutarch), restrain (papyrus example), only twice in the N.T. (here and verse 36, be quiet), but in LXX and Josephus. He evidently took the rostrum and his very presence as the city's chief officer had a quieting effect on the billowy turmoil and a semblance of order came. He waited, however, till the hubbub had nearly exhausted itself (two hours) and did not speak till there was a chance to be heard.

Saith ( $\varphi \eta \sigma \iota v$ ). Historical present for vividness.
How that. Merely participle ovoav and accusative $\pi 0 \lambda \iota v$ in indirect discourse, no conjunction at all (Robertson, Grammar, pp. 1040ff.), common idiom after $\gamma \iota \omega \omega \sigma \kappa \omega$, to know.

Temple-keeper ( $v \varepsilon \omega \kappa \circ \rho o v$ ). Old word from $v \varepsilon \omega \varsigma$ ( $v \alpha \sigma \sigma$ ), temple, and ко $\rho \varepsilon \omega$, to sweep. Warden, verger, cleaner of the temple, a sacristan. So in Xenophon and Plato. Inscriptions so describe Ephesus as $\nu \varepsilon \omega \kappa о \rho o v \tau \eta \varsigma A \rho \tau \varepsilon \mu \delta \delta$, as Luke has it here and also applied to the imperial cultus which finally had several such temples in Ephesus. Other cities claimed the same honour of being $v \varepsilon \omega \kappa о \rho о \varsigma$, but it was the peculiar boast of Ephesus because of the great temple of Artemis. A coin of A.D. 65 describes Ephesus as $v \varepsilon \omega \kappa о \rho \circ \varsigma$. There are papyri examples of the term applied to individuals, one to Priene as $\nu \varepsilon \omega \kappa о \rho о \varsigma$ of the temple in Ephesus (Moulton and Milligan, Vocabulary).

And of the image which fell down from Jupiter ( $\kappa \alpha \operatorname{\tau ov} \delta เ о \varepsilon \tau о \cup \varsigma) . ~ S u p p l y ~ a \gamma \alpha \lambda \mu \alpha$ (image), "the from heaven-fallen image." From Zeus ( $\Delta \iota \varsigma$ ) and $\pi \varepsilon \tau \omega$ ( $\pi \iota \pi \tau \omega, \pi \iota \pi \varepsilon \tau \omega$ ), to
fall. Zeus (Jupiter) was considered lord of the sky or heaven and that is the idea in $\delta$ to $\pi \varepsilon \tau \circ \cup \varsigma$ here. The legend about a statue fallen from heaven occurs concerning the statue of Artemis at Tauris, Minerva at Athens, etc. Thus the recorder soothed the vanity (Rackham) of the crowd by appeal to the world-wide fame of Ephesus as sacristan of Artemis and of her heaven-fallen image.

Acts 19:36
Cannot be gainsaid ( $\alpha v \alpha \nu \tau \iota \rho \eta \tau \omega \nu$ ovv ov $\tau \omega v$ ). Genitive absolute with ouv (therefore). Undeniable ( $\alpha v, \alpha v \tau \iota, \rho \eta \tau o \varsigma)$, verbal adjective. Occasionally in late Greek (Polybius, etc.), only here in N.T., but adverb $\alpha v a v \tau \iota \rho \eta \tau \omega \varsigma$ in $A c$ 10:29. These legends were accepted as true and appeased the mob.

Ye ought ( $\delta \varepsilon o v \varepsilon \sigma \tau \iota v$ ). It is necessary. Periphrastic present indicative instead of $\delta \varepsilon$ like 1Pe 1:6; 1Ti 5:13f.

Be quiet ( $\kappa \alpha \tau \varepsilon \sigma \tau \alpha \lambda \mu \varepsilon \nu 0 \cup \varsigma)$. Perfect passive participle of $\kappa \alpha \tau \alpha \sigma \tau \varepsilon \lambda \lambda \omega$ (see verse 35).
Rash ( $\pi \rho о \pi \varepsilon \tau \varepsilon \varsigma)$. Old adjective from $\pi \rho o$ and $\pi \varepsilon \tau \omega$, to fall forward, headlong, precipitate. In the N.T. only here and $2 \mathrm{Ti} 3: 4$, though common in the Koine. Better look before you leap.

Acts 19:37
Neither robbers of temples (oviع $1 \varepsilon \rho \circ \sigma \cup \lambda o v \varsigma)$. Common word in Greek writers from ı $\rho \circ v$, temple, and $\sigma v \lambda \alpha \omega$, to rob, be guilty of sacrilege. The word is found also on inscriptions in Ephesus. The Jews were sometimes guilty of this crime (Ro 2:22), since the heathen temples often had vast treasures like banks. The ancients felt as strongly about temple-robbing as westerners used to feel about a horse-thief.

Nor blasphemers of our goddess (ov $\beta \lambda \alpha \sigma \varphi \eta \mu о \nu \nu \tau \alpha \varsigma \tau \eta \nu \theta \varepsilon \sigma \nu \eta \mu \omega v$ ). Nor those who blasphemed our goddess. That is to say, these men (Gaius and Aristarchus) as Christians had so conducted themselves (Col 4:5) that no charge could be placed against them either in act (temple-robbery) or word (blasphemy). They had done a rash thing since these men are innocent. Paul had used tact in Ephesus as in Athens in avoiding illegalities.

Acts 19:38
Have a matter against any one ( $\varepsilon \chi \circ v \sigma \iota v \pi \rho \circ \varsigma \tau \iota \nu \alpha \lambda o \gamma o v)$. For this use of $\varepsilon \chi \omega \lambda o \gamma o v$ with $\pi \rho \circ \varsigma$ see Mt 5:32; Col 3:13. The town-clerk names Demetrius and the craftsmen ( $\tau \varepsilon \chi \vee \iota \tau \alpha$ ) as the parties responsible for the riot.

The courts are open ( $\alpha \gamma o \rho a ı o \alpha \gamma o v \tau \alpha$ ). Supply $\eta \mu \varepsilon \rho \alpha$ (days), court days are kept, or $\sigma v v o \delta o$, court-meetings are now going on, Vulgate conventus forenses aguntur. Old adjective from $a \gamma o \rho \alpha$ (forum) marketplace where trials were held. Cf. Ac 17:4. There were regular court days whether they were in session then or not.

And there are proconsuls ( $\kappa \alpha \alpha v \theta v \pi \alpha \tau о ~ \varepsilon \iota \sigma \iota)$ ). Asia was a senatorial province and so had proconsuls (general phrase) though only one at a time, "a rhetorical plural" (Lightfoot).

Page quotes from an inscription of the age of Trajan on an aqueduct at Ephesus in which some of Luke's very words occur (vє

Let them accuse one another ( $\varepsilon \gamma \kappa \alpha \lambda \varepsilon \iota \tau \omega \sigma \alpha \nu \alpha \lambda \lambda \eta \lambda o \iota \varsigma)$. Present active imperative of $\varepsilon \gamma \kappa \alpha \lambda \varepsilon \omega(\varepsilon v, \kappa \alpha \lambda \varepsilon \omega)$, old verb to call in one's case, to bring a charge against, with the dative. Luke uses the verb six times in Acts for judicial proceedings (19:38,40; 23:28,29; 26:2,7). The town-clerk makes a definite appeal to the mob for orderly legal procedure as opposed to mob violence in a matter where money and religious prejudice unite, a striking rebuke to so-called lynch-law proceedings in lands today where Christianity is supposed to prevail.

Acts 19:39
Anything about other matters ( $\tau \pi \varepsilon \rho \alpha \iota \tau \varepsilon \rho \omega$ ). Most MSS. here have $\tau \pi \varepsilon \rho \varepsilon \tau \varepsilon \rho \omega v$, but B b Vulgate read $\tau \pi \varepsilon \rho \alpha \iota \tau \varepsilon \rho \omega$ as in Plato's $\Phi a \varepsilon \delta o$. Several papyri examples of it also. It is comparative $\pi \varepsilon \rho \alpha \iota \tau \varepsilon \rho \circ \varsigma$ of $\pi \varepsilon \rho a$, beyond. Note also $\varepsilon \pi$ in $\varepsilon \pi \iota \zeta \eta \tau \varepsilon \iota \tau \varepsilon$. Charges of illegal conduct (Page) should be settled in the regular legal way. But, if you wish to go further and pass resolutions about the matter exciting you, "it shall be settled in the regular assembly" ( $\varepsilon v \tau \omega \varepsilon \nu v o \mu \omega \varepsilon \kappa \kappa \lambda \eta \sigma ı \alpha)$. "In the lawful assembly," not by a mob like this. Wood (Ephesus) quotes an inscription there with this very phrase "at every lawful assembly" ( $\kappa \alpha \tau \alpha \pi \alpha \sigma \alpha v$ $\varepsilon v v o \mu \circ v$ єкк $\lambda \eta \sigma \iota \alpha v)$. The Roman officials alone could give the sanction for calling such a lawful or regular assembly. The verb $\varepsilon \pi \iota \lambda v \omega$ is an old one, but in the N.T. only here and Mr 4:34 (which see) where Jesus privately opened or disclosed the parables to the disciples. The papyri give examples of the verb in financial transactions as well as of the metaphorical sense. The solution will come in the lawful assembly, not in a riot like this. See also 2Pe 1:20 where the substantive $\varepsilon \pi i \lambda v \sigma ı \varsigma ~ o c c u r s ~ f o r ~ d i s c l o s u r e ~ o r ~ r e v e l a t i o n ~(p r o p h e c y) . ~$

Acts 19:40
For indeed we are in danger to be accused concerning this day's riot ( $\kappa \alpha \gamma \alpha \rho$ $\kappa เ v \delta u v \varepsilon v o \mu \varepsilon v \varepsilon \gamma \kappa \alpha \lambda \varepsilon เ \sigma \theta \alpha \sigma \tau \alpha \sigma \varepsilon \omega \varsigma \pi \varepsilon \rho \tau \eta \varsigma \sigma \eta \mu \varepsilon \rho \circ v)$. The text is uncertain. The text of Westcott and Hort means "to be accused of insurrection concerning today's assembly." The peril was real. Kıv $\delta v v \varepsilon v o \mu \varepsilon v$, from $\kappa ı v \delta u v o c$, danger, peril. Old verb, but in the N.T. only here and Lu 8:23; 1Co 15:30 .

There being no cause for it ( $\mu \eta \delta \varepsilon v \circ \varsigma \alpha \iota \tau \circ 0 v$ v $\pi \alpha \rho \chi \circ v \tau \circ \varsigma)$. Genitive absolute with $\alpha \iota \tau \iota \rho$, common adjective (cf. aıtıa, cause) though in N.T. only here and Heb 5:9; Lu 23:4,14,22 .

And as touching it ( $\pi \varepsilon \rho \circ$ ov). "Concerning which." But what? No clear antecedent, only the general idea.

Give an account of this concourse ( $\alpha \pi о \delta o u v \alpha$ $\lambda о \gamma o v \pi \varepsilon \rho \tau \eta \varsigma \sigma v \sigma \tau \rho о \varphi \eta \varsigma \tau \alpha v \tau \eta \varsigma)$. Rationem reddere. They will have to explain matters to the proconsul. $\sum v \sigma \tau \rho \circ \varphi \eta$ (from $\sigma v v$, together, $\sigma \tau \rho \varepsilon \varphi \omega$, to turn) is a late word for a conspiracy (Ac 23:12) and a disorderly riot as here (Polybius). In Ac 28:12 $\sigma 0 \sigma \tau \rho \varepsilon \varphi \omega$ is used of gathering up a bundle of sticks and of men combining in Mt 17:22. Seneca says that there was nothing on which the Romans looked with such jealousy as a tumultuous meeting.

Acts 19:41
Dismissed the assembly ( $\alpha \pi \varepsilon \lambda \nu \sigma \varepsilon \nu \tau \eta \nu \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha \nu$ ). The town-clerk thus gave a semblance of law and order to the mob by formally dismissing them, this much to protect them against the charge to which they were liable. This vivid, graphic picture given by Luke has all the earmarks of historical accuracy. Paul does not describe the incidents in his letters, was not in the theatre in fact, but Luke evidently obtained the details from one who was there. Aristarchus, we know, was with Luke in Caesarea and in Rome and could have supplied all the data necessary. Certainly both Gaius and Aristarchus were lively witnesses of these events since their own lives were involved.

## Acts 20

Acts 20:1
After the uproar was ceased ( $\mu \varepsilon \tau \alpha$ тo $\pi \alpha \cup \sigma \alpha \sigma \theta \alpha$ тov $\theta_{0 \rho \nu} \beta \frac{1}{}$ ). Literally, after the ceasing (accusative of articular aorist middle infinitive of $\pi \alpha v \omega$, to make cease) as to the uproar (accusative of general reference). Noise and riot, already in Mt 26:5; 27:24; Mr 5:38; 14:2 ; and see in Ac 21:34; 24:18. Pictures the whole incident as bustle and confusion.

Took leave ( $\alpha \sigma \pi \alpha \mu \varepsilon v o \varsigma)$. First aorist middle participle of $\alpha \sigma \pi \alpha \zeta \rho \mu \alpha$, old verb from $\alpha$ intensive and $\sigma \pi \alpha \omega$, to draw, to draw to oneself in embrace either in greeting or farewell. Here it is in farewell as in 21:6. Salutation in 21:7,19.
 single act and then process. Luke here condenses what was probably a whole year of Paul's life and work as we gather from II Corinthians, one of Paul's "weighty and powerful" letters as his enemies called them (2Co 10:10). "This epistle more than any other is a revelation of S. Paul's own heart: it is his spiritual autobiography and apologia pro vita sua."

Acts 20:2
Those parts ( $\tau \alpha \mu \varepsilon \rho \eta$ єкءıva). We have no way of knowing why Luke did not tell of Paul's stay in Troas (2Co 2:12f.) nor of meeting Titus in Macedonia (2Co 2:13-7:16) nor of Paul's visit to Illyricum (Ro 15:19f. ) to give time for II Corinthians to do its work (2Co 13 ), one of the most stirring experiences in Paul's whole career when he opened his heart to the Corinthians and won final victory in the church by the help of Titus who also helped him round up the great collection in Achaia. He wrote II Corinthians during this period after Titus arrived from Corinth. The unity of II Corinthians is here assumed. Paul probably met Luke again in Macedonia, but all this is passed by except by the general phrase: "had given them much exhortation" ( $\pi \alpha \rho \alpha к а \lambda \varepsilon \sigma \alpha \varsigma ~ \alpha u \tau о и \varsigma ~ \lambda о \gamma \omega ~ \pi о \lambda \lambda \omega)$. Literally, "having exhorted them (the Macedonian brethren) with much talk" (instrumental case).

Into Greece ( $\varepsilon \varsigma \tau\rceil \nu H \varepsilon \lambda \lambda \alpha \delta \alpha)$. That is, Achaia ( $18: 12 ; 19: 21$ ), and particularly Corinth, whither he had at last come again after repeated attempts, pauses, and delays (2Co 13:1). Now at last the coast was clear and Paul apparently had an open door in Corinth during these three months, so completely had Titus at last done away with the opposition of the Judaizers there.

Acts 20:3
When he had spent three months there ( $\pi о п \sigma \alpha \varsigma \mu \eta v a \varsigma \tau \rho \varepsilon ı \varsigma)$. Literally, "having done three months," the same idiom in Ac 14:33; 18:23; Jas 5:13 . During this period Paul may have written Galatians as Lightfoot argued and certainly did Romans. We do not have to say that Luke was ignorant of Paul's work during this period, only that he did not choose to enlarge upon it.
 Iov $\alpha a \iota \omega v$ ). Genitive absolute, "a plot by the Jews having come against him." E $\pi \iota \beta$ ou $\eta \eta$ is an old word for a plot against one. In the N.T. only in Acts ( $9: 24 ; 20: 3,19 ; 23: 30$ ). Please note that this plot is by the Jews, not the Judaizers whom Paul discusses so vehemently in 2Co 10-13. They had given Paul much anguish of heart as is shown in I Cor. and in 2Co 1-7, but that trouble seems now past. It is Paul's old enemies in Corinth who had cherished all these years their defeat at the hands of Gallio (Ac 18:5-17) who now took advantage of Paul's plans for departure to compass his death if possible.

As he was about to set sail for Syria ( $\mu \varepsilon \lambda \lambda \frac{1}{} \tau \tau \alpha v \alpha \gamma \varepsilon \sigma \theta a \varepsilon ı \varsigma \tau \eta \nu \Sigma v \rho ı \alpha v$ ). The participle $\mu \varepsilon \lambda \lambda o v \tau$ agrees in case (dative) with $\alpha v \tau \omega$. For the sense of intending see also verse 13. Ava $\gamma \varepsilon \sigma \theta \alpha$ (present middle infinitive) is the common word for putting out to sea (going up, they said, from land) as in 13:13.

He determined ( $\left.\varepsilon \gamma \varepsilon v \varepsilon \tau \frac{\gamma}{} \gamma \nu \omega \mu \eta \varsigma\right)$. The best MSS. here read $\gamma \nu \omega \mu \eta \varsigma$ (predicate ablative of source like $\varepsilon \pi \iota \lambda \nu \sigma \varepsilon \omega \varsigma$, $2 \mathrm{Pe} 1: 20$, Robertson, Grammar, p. 514), not $\gamma v \omega \mu \eta$ (nominative). "He became of opinion." The Jews had heard of Paul's plan to sail for Syria and intended in the hurly-burly either to kill him at the docks in Cenchreae or to push him overboard from the crowded pilgrim ship bound for the passover. Fortunately Paul learned of their plot and so eluded them by going through Macedonia. The Codex Bezae adds here that "the Spirit bade him return into Macedonia."

Acts 20:4
Accompanied him ( $\sigma \cup v \varepsilon ı \pi \varepsilon \tau о ~ \alpha \cup \tau \omega$ ). Imperfect of $\sigma \cup v \varepsilon \pi о \mu \alpha$, old and common verb, but only here in the N.T. The singular is used agreeing with the first name mentioned $\Sigma \omega \pi \alpha \tau \rho \circ \varsigma$ and to be supplied with each of the others. Textus Receptus adds here "into Asia" ( $\alpha \chi \rho \tau \eta \varsigma$ Aøtac, as far as Asia), but the best documents (Aleph B Vulg. Sah Boh) do not have it. As a matter of fact, Trophimus went as far as Jerusalem (Ac 21:29) and Aristarchus as far as Rome (27:2; Col 4:10), The phrase could apply only to Sopatros. It is not clear though probable that Luke means to say that these seven brethren, delegates of the various churches (2Co 8:19-23 ) started from Corinth with Paul. Luke notes the fact that they accompanied Paul, but the party may really have been made up at Philippi where Luke himself joined Paul, the rest of the party having gone on to Troas (20:5f. ). These were from Roman provinces that shared in the collection (Galatia, Asia, Macedonia, Achaia). In this list three were from Macedonia, Sopater of Beroea, Aristarchus and Secundus of Thessalonica; two from Galatia, Gaius of Derbe and Timothy of Lystra; two from Asia, Tychicus and Trophimus. It is a bit curious that none are named from Achaia. Had Corinth failed after all (2Co 8; 9 ) to raise its share of the collection after such eager pledging? Rackham suggests that they may have turned their part over directly to Paul. Luke joined Paul in Philippi and could have handled the money from Achaia. It was an important event and Paul took the utmost pains to remove any opportunity for scandal in the handling of the funds.

## Acts 20:5

Were waiting for us in Troas ( $\varepsilon \mu \varepsilon \nu o v \eta \mu a \varsigma \varepsilon v$ T $\rho o \iota \alpha \delta$ ). Here again we have "us" for the first time since chapter 16 where Paul was with Luke in Philippi. Had Luke remained all this time in Philippi? We do not know, but he is with Paul now till Rome is reached. The seven brethren of verse 4 went on ahead from Philippi to Troas while Paul remained with Luke in Philippi.

Acts 20:6
After the days of unleavened bread ( $\mu \varepsilon \tau \alpha \tau \alpha \varsigma \eta \mu \varepsilon \rho \alpha \varsigma \tau \omega \nu \alpha \zeta \nu \mu \omega \nu$ ). Paul was a Jew, though a Christian, and observed the Jewish feasts, though he protested against Gentiles being forced to do it ( $\mathrm{Ga} 4: 10 ; \mathrm{Col} 2: 16$ ). Was Luke a proselyte because he notes the Jewish feasts as here and in Ac 27:9? He may have noted them merely because Paul observed them. But this passover was a year after that in Ephesus when Paul expected to remain there till Pentecost (1Co 16:8). He was hoping now to reach Jerusalem by Pentecost (Ac 20:16) as he did. We do not know the precise year, possibly A.D. 56 or 57.

In five days ( $\alpha \chi \rho \eta \mu \varepsilon \rho \omega \nu \pi \varepsilon v \tau \varepsilon$ ). Up to five days (cf. Lu 2:37 ). D has $\pi \varepsilon \mu \pi \tau \alpha \iota o$, "fifth day men," a correct gloss. Cf. $\delta \varepsilon v \tau \varepsilon \rho a ı$, second-day men (Ac 28:13 ). In Ac 16:11 they made the voyage in two days. Probably adverse winds held them back here.

Seven days ( $\varepsilon \pi \tau \alpha \eta \mu \varepsilon \rho \alpha \varsigma)$. To atone for the short stay in Troas before (2Co 2:12f. ) when Paul was so restless. Now he preaches a week to them.

Acts 20:7
Upon the first day of the week ( $\varepsilon v \delta \varepsilon \mu \iota \alpha \tau \omega \nu \sigma \alpha \beta \beta \alpha \tau \omega \nu$ ). The cardinal $\mu \mathrm{\mu}$ used here for the ordinal $\pi \rho \omega \tau \eta$ (Mr 16:9) like the Hebrew ehadh as in Mr 16:2; Mt 28:1; Lu 24:1; Joh 20:1 and in harmony with the Koine idiom (Robertson, Grammar, p. 671). Either the singular (Mr 16:9) $\sigma \alpha \beta \beta \alpha \tau$ ov or the plural $\sigma \alpha \beta \beta \alpha \tau o v$ as here was used for the week (sabbath to sabbath). For the first time here we have services mentioned on the first day of the week though in 1Co 16:2 it is implied by the collections stored on that day. In Re 1:10 the Lord's day seems to be the day of the week on which Jesus rose from the grave. Worship on the first day of the week instead of the seventh naturally arose in Gentile churches, though Joh 20:26 seems to mean that from the very start the disciples began to meet on the first (or eighth) day. But liberty was allowed as Paul makes plain in Ro 14:5f .

When we were gathered together ( $\sigma v \nu \eta \gamma \mu \varepsilon \nu \omega \nu \eta \mu \omega \nu$ ). Genitive absolute, perfect passive participle of $\sigma \cup v a \gamma \omega$, to gather together, a formal meeting of the disciples. See this verb used for gatherings of disciples in Ac 4:31; 11:26; 14:27; 15:6,30; 19:7,8; 1Co 5:4. In Heb 10:25 the substantive $\varepsilon \pi \iota \sigma v v a \gamma \omega \gamma \eta \nu$ is used for the regular gatherings which some were already neglecting. It is impossible for a church to flourish without regular meetings even if they have to meet in the catacombs as became necessary in Rome. In Russia today the Soviets are trying to break up conventicles of Baptists. They probably met on our Saturday evening, the beginning of the first day at sunset. So these Christians began the day (Sunday)
with worship. But, since this is a Gentile community, it is quite possible that Luke means our Sunday evening as the time when this meeting occurs, and the language in Joh 20:19 "it being evening on that day the first day of the week" naturally means the evening following the day, not the evening preceding the day.

To break bread ( $\kappa \lambda \alpha \sigma \alpha \alpha \rho \tau \sigma \nu$ ). First aorist active infinitive of purpose of $\kappa \lambda \alpha \omega$. The language naturally bears the same meaning as in 2:42, the Eucharist or the Lord's Supper which usually followed the $A \gamma a \pi \eta$. See 1Co 10:16. The time came, when the $A \gamma \alpha \pi \eta$ was no longer observed, perhaps because of the abuses noted in 1Co 11:20f. . Rackham argues that the absence of the article with bread here and its presence ( $\tau 0 v \alpha \rho \tau o v$ ) in verse 11 shows that the $A \gamma a \pi \eta$ is ] referred to in verse 7 and the Eucharist in verse 11, but not necessarily so because $\tau 0 v$ a $\quad$ тov may merely refer to $\alpha \rho \tau o v$ in verse 7 . At any rate it should be noted that Paul, who conducted this service, was not a member of the church in Troas, but only a visitor.

Discoursed ( $\delta \iota \varepsilon \lambda \varepsilon \gamma \varepsilon \tau o$ ). Imperfect middle because he kept on at length.
Intending $(\mu \varepsilon \lambda \lambda \omega)$. Being about to, on the point of.
On the morrow ( $\tau \eta \varepsilon \pi \alpha \nu \rho ı \sigma$ ). Locative case with $\eta \mu \varepsilon \rho \alpha$ understood after the adverb $\varepsilon \pi \alpha v \rho ı 0 v$. If Paul spoke on our Saturday evening, he made the journey on the first day of the week (our Sunday) after sunrise. If he spoke on our Sunday evening, then he left on our Monday morning.

Prolonged his speech (Пaрє of $\pi \alpha \rho a \tau \varepsilon เ \nu \omega$, old verb to stretch beside or lengthwise, to prolong. Vivid picture of Paul's long sermon which went on and on till midnight ( $\mu \varepsilon \chi \rho \mu \varepsilon \sigma o v v \kappa \tau \iota o v$ ). Paul's purpose to leave early next morning seemed to justify the long discourse. Preachers usually have some excuse for the long sermon which is not always clear to the exhausted audience.

Acts 20:8
Many lights ( $\lambda \alpha \mu \pi \alpha \delta \varepsilon \varsigma \iota \kappa \alpha v \alpha$ ). It was dark at night since the full moon (passover) was three weeks behind. These lamps were probably filled with oil and had wicks that flickered and smoked. They would not meet in the dark.

In the upper room $(\varepsilon v \tau \omega v \pi \varepsilon \rho \omega t \omega)$. As in 1:13 which see.
Acts 20:9
Sat (каӨєऍонєvoৎ). Sitting (present middle participle describing his posture).
In the window ( $\varepsilon \pi \tau \eta \varsigma \theta \cup \rho \iota \delta o \varsigma)$. Old word diminutive from $\theta \cup \rho a$, door, a little door. Latticed window (no glass) opened because of the heat from the lamps and the crowd. Our window was once spelt windore (Hudibras), perhaps from the wrong idea that it was derived from wind and door. Eutychus (a common slave name) was sitting on $(\varepsilon \pi)$ the window sill. Ahaziah "fell down through a lattice in his upper chamber" (2Ki 1:2). In the N.T. Oupıs only here and 2Co 11:33 ( $\delta$ ı $\alpha$ $\theta \cup \rho ı \delta o \varsigma$ ) through which Paul was let down through the wall in Damascus.

Borne down with deep sleep ( $\kappa \alpha \tau \alpha \varphi \varepsilon \rho о \mu \varepsilon \nu о \varsigma v \pi \nu \omega \beta \alpha \theta \varepsilon$ ). Present passive participle of $\kappa \alpha \tau \alpha \varphi \varepsilon \rho \omega$, to bear down, and followed by instrumental case ( $v \pi \nu \omega$ ). Describes the gradual process of going into deep sleep. Great medical writers use $\beta \alpha \theta v \varsigma$ with $v \pi v o \varsigma$ as we do today (deep sleep). D here has $\beta a \sigma \varepsilon$ (heavy) for $\beta \alpha \theta \varepsilon$ (deep).

As Paul discoursed yet longer ( $\delta \iota \alpha \lambda \varepsilon \gamma \circ \mu \varepsilon v o v ~ \tau o v ~ \Pi a v \lambda o v \varepsilon \pi \pi \lambda \varepsilon \iota o v$ ). Genitive absolute of present middle participle of $\delta ı \alpha \lambda \gamma \circ \mu \alpha$ (cf. verse 7). with $\varepsilon \pi \pi \lambda \varepsilon \iota o v$. Eutychus struggled bravely to keep awake, vainly hoping that Paul would finish. But he went on "for more."

Being born down by his sleep ( $\kappa \alpha \tau \varepsilon \varepsilon \chi Ө \varepsilon ı \varsigma ~ \alpha \pi о ~ \tau o v ~ v \pi v o v) . ~ F i r s t ~ a o r i s t ~(e f f e c t i v e) ~$ passive showing the final result of the process described by кат $\alpha \varphi \rho \circ \mu \varepsilon v \circ \varsigma$, finally overcome as a result of ( $\alpha \pi 0$ ) the (note article $\tau 0 v$ ) sleep (ablative case). These four participles ( $\kappa \alpha \theta \varepsilon \zeta о \mu \varepsilon \nu о \sigma, \kappa \alpha \tau \alpha \varphi \varepsilon \rho о \mu \varepsilon \nu о \sigma, \delta ı \alpha \lambda \varepsilon \gamma о \mu \varepsilon v o v, \kappa \alpha \tau \varepsilon v \varepsilon \chi \theta \varepsilon ı \varsigma)$ have no connectives, but are distinguished clearly by case and tense. The difference between the present кат $\alpha \varphi \varepsilon \rho о \mu \varepsilon \nu \circ$, and the aorist $\kappa \alpha \tau \varepsilon \nu \varepsilon \chi \theta \varepsilon ı$, of the same verb is marked.

Fell down ( $\varepsilon \pi \varepsilon \sigma \varepsilon \nu \kappa \alpha \tau \omega$ ). Effective aorist active indicative of $\pi \iota \pi \tau \omega$ with the adverb $\kappa \alpha \tau \omega$, though кaтa兀ıлt (compound verb) could have been used (Ac 26:14; 28:6 ). Hobart (Medical Language of St. Luke) thinks that Luke shows a physician's interest in the causes of the drowsiness of Eutychus (the heat, the crowd, the smell of the lamps, the late hour, the long discourse). Cf. Lu 22:45.

From the third story ( $\alpha \pi \sigma$ $\tau o v \tau \rho เ \sigma \tau \varepsilon \gamma \circ v$ ). From $\tau \rho \varepsilon \iota \varsigma$ (three) and $\sigma \tau \varepsilon \gamma \eta$ (roof), adjective $\tau \rho \iota \sigma \tau \varepsilon \gamma \circ \varsigma$ having three roofs.

Was taken up dead ( $\eta \rho \theta \eta \nu \varepsilon \kappa \rho \circ \varsigma)$. First aorist passive indicative of a $\rho \omega$. Luke does not say $\omega \varsigma$ (as) or $\omega \sigma \varepsilon$ (Mr 9:26 as if). The people considered him dead and Luke the physician seems to agree with that view.

Acts 20:10
Fell on him ( $\varepsilon \pi \varepsilon \pi \varepsilon \sigma \varepsilon \nu \alpha v \tau \omega)$. Second aorist active indicative of $\varepsilon \pi \iota \pi \iota \pi \tau \omega$ with dative case as Elijah did (1Ki 17:21) and Elisha (2Ki 4:34).

Embracing ( $\sigma v v \pi \varepsilon \rho \iota \lambda \alpha \beta \omega v$ ). Second aorist active participle of $\sigma v v \pi \varepsilon \rho \iota \lambda \alpha \mu \beta \alpha \nu \omega$, old verb to embrace completely (take hold together round), but only here in the N.T. In Ezr 5:3

Make ye no ado ( $\mu \eta \theta$ o $\rho v \beta \varepsilon \iota \sigma \theta \varepsilon$ ). Stop ( $\mu \eta$ and present middle imperative of $\theta$ o $\rho \cup \beta \varepsilon \omega$ ) making a noise ( $\because \mathrm{o} \rho \cup \beta$ оऽ) as the people did on the death of Jairus's daughter (Mt 9:23 $\theta$ o $\rho v \beta$ ov $\mu \varepsilon v o v$ and $\mathrm{Mr} 5: 38$ $\theta$ o $\rho v \beta$ ov) when Jesus asked $\mathrm{T} \theta$ о $\rho v \beta \varepsilon \iota \sigma \theta \varepsilon$ ? For his life is in $\operatorname{him}(\eta \gamma \alpha \rho \psi v \chi \eta \alpha v \tau o v \varepsilon v \alpha v \tau \omega \varepsilon \sigma \tau \iota v)$. This language is relied on by Ramsay, Wendt, Zoeckler to show that Eutychus had not really died, but had merely swooned. Paul's language would suit that view, but it suits equally well the idea that he had just been restored to life and so is indecisive. Furneaux urges also the fact that his friends did not bring him back to the meeting till morning (verse 12) as additional evidence that it was a case of swooning
rather than of death. But this again is not conclusive as they would naturally not take him back at once. One will believe here as the facts appeal to him.

Acts 20:11
When he was gone up ( $\alpha v \alpha \beta \alpha \varsigma)$. Second aorist active participle in sharp contrast to ката $\beta$ аऽ (went down) of verse 10.

Had broken bread ( $\kappa \lambda \alpha \sigma \alpha \varsigma \tau о v \alpha \rho \tau о v)$. Probably the Eucharist to observe which ordinance Paul had come and tarried (verse 7), though some scholars distinguish between what took place in verse 7 and verse 11, needlessly so as was stated on verse 7 .

And eaten ( $\kappa \alpha \gamma \varepsilon v \sigma \alpha \mu \varepsilon v \circ \varsigma)$. The word is used in 10:10 of eating an ordinary meal and so might apply to the $A \gamma a \pi \eta$, but it suits equally for the Eucharist. The accident had interrupted Paul's sermon so that it was observed now and then Paul resumed his discourse.

And had talked with them a long while ( $\varepsilon \varphi^{\prime} \iota \kappa \alpha \nu о \nu \tau \varepsilon$ о $\left.\iota \lambda \eta \sigma \alpha \varsigma\right)$. Luke, as we have seen, is fond of ıкаvoৎ for periods of time, for a considerable space of time, "even till break of day" ( $\alpha \not \rho \alpha v \gamma \eta \varsigma)$. Old word for brightness, radiance like German Auge, English eye, only here in the N.T. Occurs in the papyri and in modern Greek for dawn. This second discourse lasted from midnight till dawn and was probably more informal (as in 10:27) and conversational ( $o \mu \lambda \lambda \tau \sigma \varsigma$, though our word homiletics comes from o $\mu \mathrm{I} \lambda \varepsilon \omega$ ) than the discourse before midnight ( $\delta \iota \lambda \varepsilon \gamma \sigma \mu \alpha$, verses 7,9 ). He had much to say before he left.

So he departed (ov $\omega \varsigma \varepsilon \xi \eta \lambda \theta \varepsilon v$ ). Thus Luke sums up the result. Paul left (went forth) only after all the events narrated by the numerous preceding participles had taken place. Effective aorist active indicative $\varepsilon \xi \varepsilon \lambda \theta \varepsilon v$. Hov $\tau \omega \varsigma$ here equals $\tau v \mu \delta \varepsilon \mu \nu \mu$, now at length (Ac 27:7 ) as Page shows.

Acts 20:12
They brought the lad alive ( $\eta \gamma \alpha \gamma o v \tau o v \pi \alpha \iota \alpha \zeta \omega \nu \tau \alpha$ ). Second aorist active indicative of $\alpha \gamma \omega$. Evidently the special friends of the lad who now either brought him back to the room or (Rendall) took him home to his family. Knowling holds that $\zeta \omega v \tau \alpha$ (living) here is pointless unless he had been dead. He had been taken up dead and now they brought him living.

Not a little (ov $\mu \varepsilon \tau \rho t \omega \varsigma)$. Not moderately, that is a great deal. Luke is fond of this use of the figure litotes (use of the negative) instead of the strong positive ( $1: 5$, etc.). D (Codex Bezae) has here instead of $\eta \gamma \alpha \gamma o v$ these words: $\alpha \lambda \pi \alpha \zeta о \mu \varepsilon \nu \omega \nu \delta \varepsilon \alpha \nu \tau \omega \nu \eta \gamma \alpha \gamma \varepsilon \nu \tau \sigma \nu \nu \varepsilon \alpha \nu \iota \sigma \kappa 0 \nu$ $\zeta \omega v \tau \alpha$ (while they were saying farewell he brought the young man alive). This reading pictures the joyful scene over the lad's restoration as Paul was leaving.

Acts 20:13
To the ship ( $\varepsilon \pi \tau 0 \pi \lambda o \iota o v$ ). Note article. It is possible that Paul's party had chartered a coasting vessel from Philippi or Troas to take them to Patara in Lycia. Hence the boat stopped when and where Paul wished. That is possible, but not certain, for Paul could simply have accommodated himself to the plans of the ship's managers.

To take in Paul ( $\alpha v \alpha \lambda \alpha \mu \beta \alpha v \varepsilon เ v ~ \tau o v ~ \Pi \alpha v \lambda o v) . ~ S o ~ i n ~ v e r s e ~ 14 . ~ S a m e ~ u s e ~ i n ~ 2 T i ~ 4: 11: ~$ "Picking up Mark" (Mapкov ava入 $\alpha \beta \omega v$ ). Assos was a seaport south of Troas in Mysia in the province of Asia.

He had appointed ( $\delta \iota \alpha \tau \varepsilon \tau \alpha \gamma \mu \varepsilon \nu \circ \varsigma \eta \nu$ ). Past perfect periphrastic middle of $\delta \iota \alpha \tau \alpha \sigma \sigma \omega$, old verb to give orders (military in particular).

To go by land ( $\pi \varepsilon \zeta \varepsilon v \varepsilon \iota v$ ). Present active infinitive of $\pi \varepsilon \zeta \varepsilon v \omega$, old verb to go on foot, not on horse back or in a carriage or by ship. Here only in the N.T. It was about twenty miles over a paved Roman road, much shorter (less than half) than the sea voyage around Cape Lectum. It was a beautiful walk in the spring-time and no doubt Paul enjoyed it whatever his reason was for going thus to Assos while the rest went by sea. Certainly he was entitled to a little time alone, this one day, as Jesus sought the Father in the night watches (Mt 14:23).

Acts 20:14
Met us ( $\sigma v v \varepsilon \beta \alpha \lambda \lambda \varepsilon v \eta \mu v$ ). Imperfect active where the aorist ( $\sigma v v \varepsilon \beta \alpha \lambda \varepsilon v$, as C D have it) would seem more natural. It may mean that as soon as ( $\omega \varsigma$ ) Paul "came near or began to meet us" (inchoative imperfect), we picked him up. Luke alone in the N.T. uses $\sigma v v \beta \alpha \lambda \lambda \omega$ to bring or come together either in a friendly sense as here or as enemies (Lu 14:31).

To Mitylene ( $\varepsilon \iota \varsigma M ı \tau \cup \lambda \eta \nu \eta \nu)$. The capital of Lesbos about thirty miles from Assos, an easy day's sailing.

Acts 20:15
We came over against Chios ( $\kappa \alpha \tau \eta \nu \tau \eta \sigma \alpha \mu \varepsilon v \alpha v \tau \iota \kappa \rho \cup \varsigma$ Xıov). Luke uses this Koine verb several times $(16: 1 ; 18: 19)$, meaning to come right down in front of and the notion of $\alpha v \tau \alpha$ is made plainer by avtıкрvя, face to face with, common "improper" preposition only here in the N.T. They probably lay off the coast (anchoring) during the night instead of putting into the harbour. The Island of Chios is about eight miles from the mainland.

The next day ( $\tau \eta \varepsilon \tau \varepsilon \rho \alpha$ ). The third day in reality from Assos (the fourth from Troas), in contrast with $\tau \eta \varepsilon \pi \iota o v \sigma \eta$ just before for Chios.

We touched at Samos ( $\pi \alpha \rho \varepsilon \beta \alpha \lambda о \mu \varepsilon v \varepsilon \iota \varsigma \Sigma \alpha \mu o v)$. Second aorist active of $\pi \alpha \rho \alpha \beta \alpha \lambda \lambda \omega$, to throw alongside, to cross over, to put in by. So Thucydides III. 32. Only here in the N.T. though in Textus Receptus in Mr 4:30. The word parable ( $\pi \alpha \rho \alpha \beta o \lambda \eta$ ) is from this verb. The Textus Receptus adds here ка $\mu \varepsilon \iota v a v \tau \varepsilon \varsigma \varepsilon v$ T $\rho о \gamma \nu \lambda \lambda \iota \omega$ (and remaining at Trogyllium), but clearly not genuine. In passing from Chios to Samos they sailed past Ephesus to save time for Pentecost in Jerusalem (verse 16), if in control of the ship, or because the captain allowed Paul to have his way. The island of Samos is still further down the coast below Chios. It is not stated whether a stop was made here or not.

The day after ( $\tau \eta \varepsilon \chi \circ \mu \varepsilon \nu \eta$ ). The day holding itself next to the one before. Note Luke's three terms in this verse ( $\tau \eta \varepsilon \pi \iota o v \sigma \eta \iota, \tau \eta \varepsilon \tau \varepsilon \rho a \iota, \tau \eta \varepsilon \chi \circ \mu \varepsilon \nu \eta)$. This would be the fourth from Assos.

To Miletus ( $\varepsilon \iota \varsigma$ Mi $\lambda \eta \tau$ тov). About 28 miles south of Ephesus and now the site is several miles from the sea due to the silt from the Maeander. This city, once the chief city of the Ionian Greeks, was now quite eclipsed by Ephesus.

Acts 20:16
For Paul had determined (кєкрькє $\gamma \alpha \rho$ о Паи入ос). Past perfect active (correct text) of $\kappa \rho ı v \omega$ and not the aorist $\varepsilon \kappa \rho \iota v \varepsilon$. Either Paul controlled the ship or the captain was willing to oblige him.

To sail past Ephesus ( $\pi \alpha \rho \alpha \pi \lambda \varepsilon v \sigma \alpha ~ \tau \eta \nu \mathrm{E} \varphi \varepsilon \sigma \sigma v$ ). First aorist active infinitive of $\pi \alpha \rho a \pi \lambda \varepsilon \omega$, old verb to sail beside, only here in the N.T.

That he might not have ( $o \pi \omega \varsigma \mu \eta \gamma \varepsilon v \eta \tau \alpha \alpha \nu \tau \omega$ ). Final clause (negative) with aorist middle subjunctive of $\gamma \operatorname{lv}^{\prime} \boldsymbol{\mu} \alpha$ and dative "that it might not happen to him."

To spend time ( $\chi \rho о v o \tau \rho 1 \beta \eta \sigma \alpha)$. First aorist active of the late compound verb $\chi \rho o v o \tau \rho 1 \beta \varepsilon \omega$ ( $\chi \rho o v o c$, time, $\tau \rho 1 \beta \omega$, to spend), only here in the N.T. The verb $\tau \rho 1 \beta \omega$, to rub, to wear out by rubbing, lends itself to the idea of wasting time. It was only a year ago that Paul had left Ephesus in haste after the riot. It was not expedient to go back so soon if he meant to reach Jerusalem by Pentecost. Paul clearly felt (Ro 15 ) that the presentation of this collection at Pentecost to the Jewish Christians would have a wholesome influence as it had done once before (Ac 11:30).

He was hastening ( $\varepsilon \sigma \pi \varepsilon v \delta \varepsilon v$ ). Imperfect active of $\sigma \pi \varepsilon v \delta \omega$, old verb to hasten as in Lu 2:16; 19:56.

If it were possible for him ( $\varepsilon \delta v v a \tau o v \varepsilon \eta \eta \alpha v \tau \omega$ ). Condition of the fourth class (optative mode), if it should be possible for him. The form is a remote possibility. It was only some thirty days till Pentecost.

The day of Pentecost ( $\tau \eta \nu \eta \mu \varepsilon \rho \alpha \nu \tau \eta \varsigma \pi \varepsilon \nu \tau \eta \kappa o \sigma \tau \eta \varsigma$ ). Note the accusative case. Paul wanted to be there for the whole day. See Ac 2:1 for this very phrase.

Acts 20:17
Called to him ( $\mu \varepsilon \tau \varepsilon \kappa \alpha \lambda \varepsilon \sigma \alpha \tau o$ ). Aorist middle (indirect) indicative of $\mu \varepsilon \tau \alpha \kappa \alpha \lambda \varepsilon \omega$, old verb to call from one place to another ( $\mu \varepsilon \tau \alpha$ for "change"), middle to call to oneself, only in Acts in the N.T. (7:14; 10:32; 20:17; 24:25 ). Ephesus was some thirty miles, a stiff day's journey each way. They would be with Paul the third day of the stay in Miletus.

The elders of the church ( $\tau$ ouc $\pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho о u \varsigma \tau \eta \varsigma \varepsilon \kappa \kappa \lambda \eta \sigma \omega \varsigma)$ ). The very men whom Paul terms "bishops" (£тıбкотоис) in verse 28 just as in Tit 1:5,7 where both terms ( $\pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho о и \sigma$, тov $\varepsilon \pi \iota \sigma \kappa о \pi о v)$ describe the same office. The term "elder" applied to Christian ministers first appears in Ac 11:30 in Jerusalem and reappears in 15:4,6,22 in connection with the apostles and the church. The "elders" are not "apostles" but are "bishops" (cf. Php 1:1) and with "deacons" constitute the two classes of officers in the early churches. Ignatius shows that in the early second century the office of bishop over the elders had developed, but Lightfoot has shown that it was not so in the first century. Each church, as in

Jerusalem, Philippi, Ephesus, had a number of "elders" ("bishops") in the one great city church. Hackett thinks that other ministers from the neighbourhood also came. It was a noble group of preachers and Paul, the greatest preacher of the ages, makes a remarkable talk to preachers with all the earmarks of Pauline originality (Spitta, Apostelgeschichte, p. 252) as shown by the characteristic Pauline words, phrases, ideas current in all his Epistles including the Pastoral (testify, course, pure, take heed, presbyter, bishop, acquire, apparel). Luke heard this address as he may and probably did hear those in Jerusalem and Caesarea (Ac 21-26 ). Furneaux suggests that Luke probably took shorthand notes of the address since Galen says that his students took down his medical lectures in shorthand: "At any rate, of all the speeches in the Acts this contains most of Paul and least of Luke. ... It reveals Paul as nothing else does. The man who spoke it is no longer a man of eighteen centuries ago: he is of yesterday; of today. He speaks as we speak and feels as we feel; or rather as we fain would speak and feel." We have seen and listened to Paul speak to the Jews in Antioch in Pisidia as Luke pictures the scene, to the uneducated pagans at Lystra, to the cultured Greeks in Athens. We shall hear him plead for his life to the Jewish mob in Jerusalem, to the Roman governor Felix in Caesarea, to the Jewish "King" Herod Agrippa II in Caesarea, and at last to the Jews in Rome. But here Paul unbosoms himself to the ministers of the church in Ephesus where he had spent three years (longer than with any other church) and where he had such varied experiences of prowess and persecution. He opens his heart to these men as he does not to the average crowd even of believers. It is Paul's Apologia pro sua Vita. He will probably not see them again and so the outlook and attitude is similar to the farewell discourse of Jesus to the disciples in the upper room (Joh 13-17). He warns them about future perils as Jesus had done. Paul's words here will repay any preacher's study today. There is the same high conception of the ministry here that Paul had already elaborated in 2Co 2:12-6:10 (see my Glory of the Ministry). It is a fitting time and occasion for Paul to take stock of his ministry at the close of the third mission tour. What wonders had God wrought already.

Acts 20:18
Ye yourselves know ( $\nu \mu \varepsilon \iota \varsigma \varepsilon \pi \iota \sigma \tau \alpha \sigma \theta \varepsilon$ ). Pronoun expressed and emphatic. He appeals to their personal knowledge of his life in Ephesus.

From the first day that ( $\left.\alpha \pi 0 \pi \rho \omega \tau \eta \varsigma \eta \mu \varepsilon \rho \alpha \varsigma \alpha \varphi^{\prime} \eta \varsigma\right)$ ). "From first day from which." He had first "set foot" ( $\varepsilon \pi \varepsilon \beta \eta \nu$, second aorist active indicative of old verb $\varepsilon \pi \iota \beta \alpha \iota v \omega$, to step upon or step into) in Ephesus four years ago in the spring of 51 or 52, but had returned from Antioch that autumn. It is now spring of 54 or 55 so that his actual ministry in Ephesus was about two and a half years, roughly three years (verse 31).

After what manner I was with you ( $\pi \omega \varsigma \mu \varepsilon \theta^{\prime} \nu \mu \omega v \varepsilon \gamma \varepsilon v o \mu \eta v$ ). Literally, "How I came (from Asia and so was) with you." Cf. 1Th 1:5; 2Th 2:1-10 where Paul likewise dares to refer

of time. So far as we know, Paul stuck to Ephesus the whole period. He had devoted himself consecratedly to the task in Ephesus. Each pastor is bishop of his field and has a golden opportunity to work it for Christ. One of the saddest things about the present situation is the restlessness of preachers to go elsewhere instead of devoting themselves wholly to the task where they are. 19.

Serving the Lord ( $\delta o u \lambda \varepsilon v \omega \nu \tau \omega \kappa \nu \rho \omega$ ). It was Paul's glory to be the $\delta o u \lambda$ oc (bondslave) as in Ro 1:1; Php 1:1. Paul alone, save Jesus in Mt 6:24; Lu 16:13, uses $\delta$ ou入عv $\boldsymbol{\omega}$ six times for serving God (Page).

With all lowliness of mind ( $\mu \varepsilon \tau \alpha \pi \alpha \sigma \eta \varsigma \tau \alpha \pi \varepsilon ı v o \varphi \rho о \sigma v \nu \eta \varsigma)$. Lightfoot notes that heathen writers use this word for a grovelling, abject state of mind, but Paul follows Christ in using it for humility, humble-mindedness that should mark every Christian and in particular the preacher.

With tears ( $\delta \alpha \kappa \rho \nu \omega v)$. Construed with $\mu \varepsilon \tau \alpha$. Paul was a man of the deepest emotion along with his high intellectuality. He mentions his tears again in verse 31, tears of sorrow and of anxiety. He refers to his tears in writing the sharp letter to the church in Corinth (2Co 2:4) and in denouncing the sensual apostates in Php 3:18. Adolphe Monod has a wonderful sermon on the tears of Paul. Consider also the tears of Jesus.

Trials which befell me ( $\pi \varepsilon \rho \rho \alpha \sigma \mu \omega \nu \tau \omega \nu \sigma \nu \mu \beta \alpha \nu \tau \omega \nu \mu 0$ ). Construed also with $\mu \varepsilon \tau \alpha$. Second aorist active participle of $\sigma v \nu \beta \alpha \downarrow v \omega$, to walk with, to go with, to come together, to happen, to befall. Very common in this sense in the old Greek (cf. Ac 3:10).

By the plots of the Jews ( $\varepsilon v \tau \alpha \iota \varsigma \varepsilon \pi ß$ ßou入aı $\tau \omega v$ Iov $\alpha a \iota \omega v$ ). Like the plot ( $\varepsilon \pi ı \beta o v \lambda \eta$ ) against him in Corinth ( $20: 3$ ) as well as the earlier trial before Gallio and the attacks in Thessalonica. In Ac 19:9 Luke shows the hostile attitude of the Jews in Ephesus that drove Paul out of the synagogue to the school of Tyrannus. He does not describe in detail these "plots" which may easily be imagined from Paul's own letters and may be even referred to in 1Co 4:10; 15:30ff.; 16:9; 2Co 1:4-10; 7:5; 11:23. In fact, one has only to dwell on the allusions in 2Co 11 to picture what Paul's life was in Ephesus during these three years. Luke gives in Ac 19 the outbreak of Demetrius, but Paul had already fought with "wild-beasts" there.

Acts 20:20
How that I shrank not ( $\omega \varsigma$ ov $\delta \varepsilon v v \pi \varepsilon \sigma \tau \varepsilon ı \lambda \alpha \mu \varepsilon v$ ). Still indirect discourse (question) after $\varepsilon \pi \iota \sigma \tau \alpha \sigma \theta \varepsilon$ (ye know) with $\omega \varsigma$ like $\pi \omega \varsigma$ in verse 18 . First aorist middle of v $\pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$, old verb to draw under or back. It was so used of drawing back or down sails on a ship and, as Paul had so recently been on the sea, that may be the metaphor here. But it is not necessarily so as the direct middle here makes good sense and is frequent, to withdraw oneself, to cower, to shrink, to conceal, to dissemble as in Hab 2:4 (Heb 10:38). Demosthenes so used it to shrink from declaring out of fear for others. This open candour of Paul is supported by his Epistles (1Th 2:4,11; 2Co 4:2; Ga 1:10 ).

From declaring unto you ( $\tau 0 v \mu \eta \alpha v \alpha \gamma \gamma \varepsilon ı \lambda \alpha v \mu \nu v$ ). Ablative case of the articular first aorist active infinitive of $\alpha v \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$ with the redundant negative after verbs of hindering, etc. (Robertson, Grammar, p. 1094).

Anything that was profitable ( $\tau \omega \nu \sigma \nu \mu \varphi \varepsilon \rho \circ \nu \tau \omega \nu$ ). Partitive genitive after $o v \delta \varepsilon v$ of the articular present active participle of $\sigma \cup \mu \varphi \varepsilon \rho \omega$, to bear together, be profitable.

Publicly ( $\delta \eta \mu$ обıa, adverb)
and from house to house (ка кат' оккоия). By (according to) houses. It is worth noting that this greatest of preachers preached from house to house and did not make his visits merely social calls. He was doing kingdom business all the while as in the house of Aquila and Priscilla (1Co 16:19).

Acts 20:21
Testifying ( $\delta ı \alpha \mu \alpha \rho \tau \cup \rho о \mu \varepsilon \nu о \varsigma)$. As Peter did (Ac 2:40) where Luke uses this same word thoroughly Lucan and Pauline. So again in verses 23,24. Paul here as in Ro 1:16 includes both Jews and Greeks, to the Jew first.

Repentance toward God ( $\tau \eta \nu \varepsilon \iota \varsigma \theta \varepsilon \circ \nu \mu \varepsilon \tau \alpha \nu \circ \iota \alpha \nu$ )
and faith toward our Lord Jesus ( $\kappa \alpha \pi \iota \sigma \tau \iota v ~ \varepsilon ı \varsigma ~ \tau o v ~ \kappa v \rho ı о v ~ \eta \mu \omega v ~ I \eta \sigma o v v) . ~ T h e s e ~ t w o ~$ elements run through the Epistle to the Romans which Paul had recently written and sent from Corinth. These two elements appear in all Paul's preaching whether "to Jews or Gentiles, to philosophers at Athens or to peasants at Lystra, he preached repentance toward God and faith toward the Lord Jesus" (Knowling).

Acts 20:22
Bound in the spirit ( $\delta \varepsilon \delta \varepsilon \mu \varepsilon v o \varsigma ~ \tau \omega \pi \nu \varepsilon v \mu \alpha \tau)$. Perfect passive participle of $\delta \varepsilon \omega$, to bind, with the locative case. "Bound in my spirit" he means, as in 19:21, from a high sense of duty. The mention of "the Holy Spirit" specifically in verse 23 seems to be in contrast to his own spirit here. His own spirit was under the control of the Holy Spirit (Ro 8:16) and the sense does not differ greatly.

Not knowing ( $\mu \eta \varepsilon \iota \delta \omega \varsigma$ ). Second perfect active participle of ot $\delta \alpha$ with $\mu \eta$.
That shall befall me ( $\tau \alpha \sigma v v \alpha \nu \tau \eta \sigma o v \tau \alpha \varepsilon \mu o$ ). Articular future active participle of $\sigma v v a v \tau \alpha \omega$, to meet with (Ac 10:25 ), to befall (with associative instrumental case) and compare with $\sigma v \mu \beta \alpha \nu \tau \omega \nu$ (befell) in verse 19. One of the rare instances of the future participle in the N.T.

Acts 20:23
Save that $(\pi \lambda \eta \nu o \tau)$. The o $\tau$ clause is really in the ablative case after $\pi \lambda \eta \nu$, here a preposition as in Php 1:18, this idiom $\pi \lambda \eta \nu$ o $\tau$ occasionally in ancient Greek.

In every city ( $\kappa \alpha \tau \alpha \pi о \lambda \iota v$ ). Singular here though plural in кат' oıкоия (verse 20).
Bonds and afflictions ( $\delta \varepsilon \sigma \mu \alpha \kappa \alpha \theta \lambda \iota \psi \varepsilon \iota)$. Both together as in Php 1:17; 2Co 1:8 . Literal bonds and actual pressures.

Abide me ( $\mu \varepsilon \mu \varepsilon v o v \sigma \tau v$ ). With the accusative as in verse 5 ( $\varepsilon \mu \varepsilon v o v \eta \mu \alpha \varsigma)$ and nowhere else in the N.T.

Acts 20:24
But I hold not my life of any account ( $\alpha \lambda \lambda^{\prime}$ ov $\left.\delta \varepsilon v o \varsigma \lambda o \gamma o v \pi o o v \mu \alpha ~ \tau \eta \nu \psi v \chi \eta \nu\right)$. Neat Greek idiom, accusative $\psi v \chi \eta v$ and genitive $\lambda o \gamma o v$ and then Paul adds "dear unto myself" ( $\tau \mu \iota \alpha v \varepsilon \mu \alpha v \tau \omega$ ) in apposition with $\psi v \chi \eta \nu$ (really a combination of two constructions).

So that I may accomplish my course ( $\omega \varsigma \tau \varepsilon \lambda \varepsilon \epsilon \omega \sigma \omega \delta \rho o \mu \circ v \mu \circ v$ ). Rather, "In order that" (purpose, not result). Aleph and B read $\tau \varepsilon \lambda \varepsilon \omega \omega \sigma \omega$ here (first aorist active subjunctive) rather than $\tau \varepsilon \lambda \varepsilon \omega \omega \sigma \alpha$ (first aorist active infinitive). It is the lone instance in the N.T. of $\omega \varsigma$ as a final particle (Robertson, Grammar, p. 987). Paul in Ac 13:25 in his sermon at Antioch in Pisidia described John as fulfilling his course and in $2 \mathrm{Ti} 4: 7$ he will say: "I have finished my course" ( $\tau \circ v \delta \rho \circ \mu \circ v \tau \varepsilon \tau \varepsilon \lambda \varepsilon \kappa \alpha$ ). He will run the race to the end.

Which I received from the Lord Jesus ( $\eta v \varepsilon \lambda \alpha \beta \circ v \pi \alpha \rho \alpha$ tov кvpıov In $\sigma o v$ ). Of that fact he never had a doubt and it was a proud boast (Gal 1:1; Ro 11:13 ).
 gospel consisted in the grace of God. See this word "grace" ( $\chi \propto \rho ı \varsigma$ ) in Romans and his other Epistles.

Acts 20:25
And now, behold ( $\kappa \alpha \mathrm{vov}, \mathrm{i} \delta \mathrm{ov}$ ). Second time and solemn reminder as in verse 22.
I know ( $\varepsilon \gamma \omega$ oı $\delta \alpha$ ). Emphasis on $\varepsilon \gamma \omega$ which is expressed.
Ye all ( $\nu \mu \varepsilon ı \varsigma \pi \alpha v \tau \varepsilon \varsigma)$. In very emphatic position after the verb $o \psi \varepsilon \sigma \theta \varepsilon$ (shall see) and the object (my face). Twice Paul will write from Rome (Php 2:24; Phm 1:22) the hope of coming east again; but that is in the future, and here Paul is expressing his personal conviction and his fears. The Pastoral Epistles show Paul did come to Ephesus again (1Ti 1:3; 3:14; 4:13 ) and Troas (2Ti 4:13) and Miletus (2Ti 4:20). There need be no surprise that Paul's fears turned out otherwise. He had reason enough for them.

Among whom I went about ( $\varepsilon v$ oıs $\delta ı \eta \lambda \theta o v$ ). Apparently Paul here has in mind others beside the ministers. They represented the church in Ephesus and the whole region where Paul laboured.

Acts 20:26
I testify ( $\mu \alpha \rho \tau \cup \rho о \mu \alpha)$. Elsewhere in the N.T. only in Paul's Epistles (Ga 5:3; Eph 4:17; 1Th 2:12 ). It means "I call to witness" while $\mu \alpha \rho \tau v \rho \varepsilon \omega$ means "I bear witness."

This day ( $\varepsilon v \tau \eta \sigma \eta \mu \varepsilon \rho o v \eta \mu \varepsilon \rho \alpha$ ). The today day, the last day with you, our parting day.
I am pure from the blood of all men ( $\kappa \alpha \forall \alpha \rho о \varsigma \varepsilon \mu \alpha \pi о ~ \tau о v ~ \alpha \mu \alpha \tau о \varsigma ~ \pi \alpha \nu \tau \omega \nu)$ ). Paul was sensitive on this point as in Corinth (Ac 18:6 ). It is much for any preacher to claim and it ought to be true of all. The papyri also give this use of $\alpha \pi 0$ with the ablative rather than the mere ablative after каӨapoc.

Acts 20:27

Paul here repeats the very words and idioms used in verse 20, adding "the whole counsel of God" ( $\pi \alpha \sigma \alpha \nu \tau \eta \nu \beta$ ou $\lambda \eta \nu$ tov $\theta \varepsilon o v$ ). All the counsel of God that concerned Paul's work and nothing inconsistent with the purpose of God of redemption through Christ Jesus (Page).

Acts 20:28
Take heed unto yourselves ( $\pi \rho \circ \sigma \varepsilon \chi \varepsilon \tau \varepsilon \varepsilon \alpha u \tau o \iota \varsigma)$. The full phrase had $\tau 0 v$ vouv, hold your mind on yourselves (or other object in the dative), as often in old writers and in Job 7:17. But the ancients often used the idiom with vouv understood, but not expressed as here and Ac 5:35; Lu 12:1; 17:3; 21:34; 1Ti 1:4; 3:8; 4:13. Eлe $\chi \varepsilon$ is so used in 1Ti 4:16.

To all the flock $(\pi \alpha \nu \tau \tau \omega \pi о \mu \nu \omega \omega)$. Contracted form of $\pi о \mu \varepsilon v \circ o v=\pi о \mu \nu \eta(\mathrm{Joh} 10: 16$ ) already in Lu 12:32 and also in Ac 20:29; 1Pe 5:2,3. Common in old Greek.

Hath made ( $\varepsilon \theta \varepsilon \tau \tau)$. Did make, second aorist middle indicative of $\tau \imath \theta \eta \mu$, did appoint. Paul evidently believed that the Holy Spirit calls and appoints ministers.

Bishops ( $\varepsilon$ пıбкотоич). The same men termed elders in verse 17 which see.
To shepherd ( $\pi о \mu \alpha \iota v \varepsilon เ)$ ). Present active infinitive of purpose of $\pi о \mu \alpha \iota v \omega$, old verb to feed or tend the flock ( $\pi о \mu \nu \eta, \pi о \mu \nu \iota v \nu$ ), to act as shepherd ( $\pi о \mu \eta \nu$ ). These ministers are thus in Paul's speech called elders (verse 17), bishops (verse 28), and shepherds (verse 28). Jesus had used this very word to Peter (Joh 21:16, twice $\beta$ обкع, feed, 21:15,17) and Peter will use it in addressing fellow-elders ( $1 \mathrm{Pe} 5: 2$ ) with memories, no doubt of the words of Jesus to him. The "elders" were to watch over as "bishops" and "tend and feed as shepherds" the flock. Jesus is termed "the shepherd and bishop of your souls" in 1Pe 2:25 and "the great Shepherd of the sheep" in Heb 13:20. Jesus called himself "the good Shepherd" in Joh 10:11

The church of God ( $\tau \eta \nu \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha \nu$ tov $\theta \varepsilon o v$ ). The correct text, not "the church of the Lord" or "the church of the Lord and God" (Robertson, Introduction to Textual Criticism of the N.T., p. 189).

He purchased ( $\pi \varepsilon \rho เ \varepsilon \pi о п п \alpha \tau о) . ~ F i r s t ~ a o r i s t ~ m i d d l e ~ o f ~ \pi \varepsilon \rho ı \pi о є \varepsilon \omega, ~ o l d ~ v e r b ~ t o ~ r e s e r v e, ~$ to preserve (for or by oneself, in the middle). In the N.T. only in Luke 17:33; Ac 20:28; 1 Ti 3:13. The substantive $\pi \varepsilon \rho \iota \pi=ו \eta \sigma \iota v$ (preservation, possession) occurs in 1Pe 2:9 ("a peculiar people" $=$ a people for a possession) and in Eph 1:14 .
 blood. Whose blood? If tou $\theta$ sov (Aleph B Vulg.) is correct, as it is, then Jesus is here called "God" who shed his own blood for the flock. It will not do to say that Paul did not call Jesus God, for we have Ro 9:5; Col 2:9; Tit 2:13 where he does that very thing, besides Col 1:15-20; Php 2:5-11.

Acts 20:29
After my departing ( $\mu \varepsilon \tau \alpha \tau \eta v \alpha \varphi \iota \xi \iota \nu \mu \circ v$ ). Not his death, but his departure from them. From $\alpha \varphi \iota \kappa v \varepsilon о \mu \alpha$ and usually meant arrival, but departure in Herodotus IX. 17, 76 as here.

Grievous wolves ( $\lambda$ vко $\beta \alpha \rho \varepsilon ı \varsigma)$. Bapeıc is heavy, rapacious, harsh. Jesus had already so described false teachers who would raven the fold (Joh 10:12). Whether Paul had in mind the Judaizers who had given him so much trouble in Antioch, Jerusalem, Galatia, Corinth or the Gnostics the shadow of whose coming he already foresaw is not perfectly clear. But it will not be many years before Epaphras will come to Rome from Colossae with news of the new peril there (Epistle to the Colossians). In writing to Timothy (1Ti 1:20) Paul will warn him against some who have already made shipwreck of their faith. In Re 2:2 John will represent Jesus as describing false apostles in Ephesus.
 Sparing the flock was not the fashion of wolves. Jesus sent the seventy as lambs in the midst of wolves (Lu 10:3). In the Sermon on the Mount Jesus had pictured the false prophets who would come as ravening wolves in sheep's clothing (Mt 7:15 ).

Acts 20:30
From among your own selves $(\varepsilon \xi v \mu \omega v \alpha v \tau \omega v)$. In sheep's clothing just as Jesus had foretold. The outcome fully justified Paul's apprehensions as we see in Colossians, Ephesians, I and II Timothy, Revelation. False philosophy, immorality, asceticism will lead some astray (Col 2:8,18; Eph 4:14; 5:6 ). John will picture "antichrists" who went out from us because they were not of us (1Jo $2: 18 \mathrm{f}$. ). There is a false optimism that is complacently blind as well as a despondent pessimism that gives up the fight.

Perverse things $(\delta เ \varepsilon \sigma \tau \rho \alpha \mu \mu \varepsilon v \alpha)$. Perfect passive participle of $\delta \iota \alpha \sigma \tau \rho \varepsilon \varphi \omega$, old verb to turn aside, twist, distort as in Ac 13:8,10 .

To draw away ( $\tau 0 v \alpha \pi \sigma \sigma \pi \alpha \downarrow$ ). Articular genitive present active participle of purpose from $\alpha \pi о \sigma \pi \alpha \omega$, old verb used to draw the sword (Mt 26:51), to separate (Lu 22:41; Ac 21:1 ). The pity of it is that such leaders of dissension can always gain a certain following. Paul's long residence in Ephesus enabled him to judge clearly of conditions there.

Acts 20:31
Wherefore watch ye ( $\delta \iota o \gamma \rho \gamma о \rho \varepsilon \iota \tau \varepsilon$ ). Paul has concluded his defence of himself and his warning. Now he exhorts on the basis of it ( $\delta ⿺ 0$ ) because of which thing. The very command of Jesus concerning the perils before his return as in Mr 13:35 ( $\gamma \rho \eta \gamma \circ \rho \varepsilon \iota \tau \varepsilon$ ), the very form (late present imperative from the second perfect $\varepsilon \gamma \rho \eta \gamma \circ \rho \alpha$ of $\varepsilon \gamma \varepsilon \rho \omega \omega$, to arouse). Stay awake.

I ceased not to admonish (ovк $\varepsilon \pi \alpha v \sigma \alpha \mu \eta \nu v o v \theta \varepsilon \tau \omega \nu$ ). Participle describes Paul, I did not cease admonishing, night and day ( $v \cup \kappa \tau \alpha \kappa \alpha \eta \mu \varepsilon \rho \alpha \nu$, accusative of extent of time, for three years $\tau \rho \iota \varepsilon \tau \iota \alpha v$, accusative of extent of time also). Nov $\theta \varepsilon \tau \omega v$ is from $v o v \theta \varepsilon \tau \varepsilon \omega$, to put sense into one. So Paul kept it up with tears (verse 19) if so be he could save the Ephesians from the impending perils. Forewarned is to be forearmed. Paul did his duty by them.

Acts 20:32

And now ( $\kappa \alpha \tau \alpha v v v$ ). Same phrase as in verses 22,25 save that $\delta \delta o v$ (behold) is wanting and the article $\tau \alpha$ occurs before $v v \nu$, accusative of general reference. And as to the present things (or situation) as in 4:29.

I commend $(\pi \alpha \rho \alpha \tau \iota \theta \varepsilon \mu \alpha)$. Present middle indicative of $\pi \alpha \rho \alpha \tau \iota \eta \eta$, old verb to place beside, middle, to deposit with one, to interest as in $1 \mathrm{Ti} 1: 18 ; 2 \mathrm{Ti} 2: 2$. Paul can now only do this, but he does it hopefully. Cf. 1Pe 4:19 .

The word of his grace ( $\tau \omega \lambda o \gamma \omega \tau \eta \varsigma \chi \alpha \rho \iota \tau o \varsigma \alpha v \tau o v$ ). The instrumentality through preaching and the Holy Spirit employed by God. Cf. Col 4:6; Eph 4:29 .

Which is able to build up ( $\tau \omega \delta v v \alpha \mu \varepsilon \nu \omega$ oıко $\delta о \mu \eta \sigma \alpha$ ). God works through the word of his grace and so it is able to build up (edify); a favourite Pauline word (1Co 3:10-14; 3:9; 2Co 5:1; Eph 2:20-22; 2Ti 3:15; etc.), and Jas 1:21. The very words "build" and "inheritance among the sanctified" will occur in Eph $1: 11 ; 2: 30 ; 3: 18$ and which some may recall on reading. Cf. Col 1:12. Stephen in Ac 7:5 used the word "inheritance" ( $\kappa \lambda \eta \rho o v o \mu ı \alpha v$ ), nowhere else in Acts, but in Eph 1:14,18; 5:5. In Eph 1:18 the very expression occurs "his inheritance among the saints " ( $\tau \eta \nu \kappa \lambda \eta \rho \circ v \circ \mu \iota \alpha \nu \alpha v \tau \circ v \varepsilon \nu \tau 0 \iota \varsigma ~ \alpha \gamma \iota \circ \varsigma)$.

Acts 20:33
No man's silver or gold or apparel ( $\alpha \rho \gamma \cup \rho \iota o v \eta \chi \rho v \sigma \iota o v \eta \not \mu \alpha \tau \iota \sigma \mu \circ v$ ov $\eta \varepsilon v o \varsigma)$. Genitive case after $\varepsilon \pi \varepsilon \theta \cup \mu \eta \sigma \alpha$. One of the slanders against Paul was that he was raising this collection, ostensibly for the poor, really for himself (2Co 12:17f. ). He includes "apparel" because oriental wealth consisted largely in fine apparel (not old worn out clothes). See Ge $24: 53 ; 2 \mathrm{Ki}$ 5:5; Ps 45:13f.; Mt 6:19. Paul did not preach just for money.

Acts 20:34
Ye yourselves (avto). Intensive pronoun. Certainly they knew that the church in Ephesus had not supported Paul while there.

These hands ( $\alpha \chi \varepsilon \iota \rho \varepsilon \varsigma \alpha \cup \tau \alpha$ ). Paul was not above manual labour. He pointed to his hands with pride as proof that he toiled at his trade of tent-making as at Thessalonica and Corinth for his own needs ( $\chi \rho \varepsilon \iota \alpha ı$ ) and for those with him (probably Aquila and Priscilla) with whom he lived and probably Timothy because of his often infirmities (1Ti 5:23).

Ministered ( $v \pi \eta \rho \varepsilon \tau \eta \sigma \alpha v$ ). First aorist active of $v \pi \eta \rho \varepsilon \tau \varepsilon \omega$, to act as under rower, old verb, but in the N.T. only in Ac 13:36; 20:34; 24:23. While in Ephesus Paul wrote to Corinth: "We toil, working with our own hands" (1Co 4:12). "As he held them up, they saw a tongue of truth in every seam that marked them" (Furneaux).

Acts 20:35
I gave you an example (v $\tau \varepsilon \delta \varepsilon ı \xi \alpha)$. First aorist active indicative of $v \pi o \delta \varepsilon ו \kappa v v \mu$, old verb to show under one's eyes, to give object lesson, by deed as well as by word ( Lu 6:47 ). Нитобеı $\gamma \mu \alpha$ means example (Joh 13:15; Jas 5:10 ). So Paul appeals to his example in 1Co 11:1; Php 3:17. Mav $\alpha \alpha$ is accusative plural of general reference (in all things).

So labouring ye ought to help (ov $\omega \varsigma \kappa \kappa \pi \iota \omega \nu \tau \alpha \varsigma \delta \varepsilon \alpha \nu \tau \iota \lambda \alpha \mu \beta \alpha \nu \varepsilon \sigma \theta \alpha$ ). So, as I did. Necessity ( $\delta \varepsilon$ ). Toiling ( $\kappa о \pi \iota \omega \nu \tau \alpha \varsigma)$ not just for ourselves, but to help ( $\alpha \nu \tau \iota \lambda \alpha \mu \beta \alpha \nu \varepsilon \sigma \theta \alpha$ ), to take hold yourselves (middle voice) at the other end ( $\alpha \nu \tau)$. This verb common in the old Greek, but in the N.T. only in Lu 1:54; Ac 20:35; 1Ti 6:2. This noble plea to help the weak is the very spirit of Christ (1Th 5:14; 1Co 12:28; Ro 5:6; 14:1). In 1Th 5:14 $\alpha v \tau \varepsilon \chi \varepsilon \sigma \theta \varepsilon \tau \omega \nu$ $\alpha \sigma \theta \varepsilon v o u v \tau \omega \nu$ we have Paul's very idea again. Every Community Chest appeal today reechoes Paul's plea.

He himself said (avтoৎ $\varepsilon เ \pi \varepsilon v)$. Not in the Gospels, one of the sayings of Jesus in current use that Paul had received and treasured. Various other Agrapha of Jesus have been preserved in ancient writers and some in recently discovered papyri which may be genuine or not. We are grateful that Paul treasured this one. This Beatitude (on $\mu \alpha \kappa \alpha \rho \circ v$ see on Mt 5:3-11) is illustrated by the whole life of Jesus with the Cross as the culmination. Aristotle (Eth. IV. I) has a saying somewhat like this, but assigns the feeling of superiority as the reason (Page), an utterly different idea from that here. This quotation raises the question of how much Paul personally knew of the life and sayings of Jesus.

Acts 20:36
He kneeled down ( $\theta \varepsilon \iota \varsigma \tau \alpha \gamma 0 v a \tau \alpha \alpha v \tau o v)$. Second aorist active participle of $\tau \iota \eta \eta \mu$, to place. The very idiom used in 7:60 of Stephen. Not in ancient writers and only six times in the N.T. (Mr 15:19; Lu 22:41; Ac 7:60; 9:40; 20:36; $21: 5$ ). Certainly kneeling in prayer is a fitting attitude (cf. Jesus, Lu 22:41 ), though not the only proper one (Mt 6:5 ). Paul apparently prayed aloud ( $\pi \rho о \sigma \eta \cup \xi \alpha \tau)$ ).

Acts 20:37
They all wept sore (ıкаvоৎ клаvӨ $о \varsigma \varepsilon \gamma \varepsilon \nu \varepsilon \tau о \pi \alpha \nu \tau \omega \nu$ ). Literally, There came considerable weeping of all (on the part of all, genitive case).

Kissed him ( $\kappa \alpha \tau \varepsilon \varphi i \lambda o v v \alpha v \tau o v$ ). Imperfect active of $\kappa \alpha \tau \alpha \varphi i \lambda \varepsilon \omega$, old verb, intensive with $\kappa \alpha \tau \alpha$ and repetition shown also by the tense: They kept on kissing or kissed repeatedly, probably one after the other falling on his neck. Cf. also Mt 26:49.

Acts 20:38
Sorrowing (o $\delta v \nu \omega \mu \varepsilon v o$ ). Present middle participle of o $\delta v \nu \alpha \omega$, old verb to cause intense pain, to torment (Lu 16:24), middle to distress oneself (Lu 2:48; Ac 20:38). Nowhere else in N.T.

Which he had spoken $(\omega \varepsilon \iota \eta \kappa \varepsilon)$. Relative attracted to the case of the antecedent $\lambda o \gamma \omega$ (word). Past perfect indicative of $\varepsilon ו \pi \circ v$.

They brought him on his way ( $\pi \rho \circ \varepsilon \pi \varepsilon \mu \pi \sigma v \alpha v \tau o v$ ). Imperfect active of $\pi \rho o \pi \varepsilon \mu \pi \omega$, old verb to send forward, to accompany as in Ac 15:3; 20:38; 21:5; 1Co 16:6,11; 2Co 1:16; Tit 3:13; 3Jo 1:6. Graphic picture of Paul's departure from this group of ministers.

## Acts 21

Acts 21:1
Were parted from them ( $\alpha \pi \sigma \sigma \pi \alpha \sigma \theta \varepsilon v \tau \alpha \varsigma \alpha \pi^{\prime} \alpha v \tau \omega v$ ). First aorist passive participle of a $\pi$ oбta $\omega$ same verb as in 20:30; Lu 22:41 .

Had set sail ( $\alpha \nu \alpha \chi \theta \eta v \alpha$ ). First aorist passive of $\alpha \nu \alpha \gamma \omega$, the usual verb to put out (up) to sea as in verse $2(\alpha \nu \eta \chi \theta \eta \mu \varepsilon v)$.

We came with a straight course ( $\varepsilon v \theta v \delta \rho о \mu \eta \sigma \alpha v \tau \varepsilon \varsigma \eta \lambda \theta о \mu \varepsilon v$ ). The same verb (aorist active participle of $\varepsilon v \theta v \delta \rho o \mu \varepsilon \omega)$ used by Luke in 16:11 of the voyage from Troas to Samothrace and Neapolis, which see.

Unto Cos ( $\varepsilon \iota \varsigma \tau \eta \nu$ Ko). Standing today, about forty nautical miles south from Miletus, island famous as the birthplace of Hippocrates and Apelles with a great medical school. Great trading place with many Jews.

The next day ( $\tau \eta \varepsilon \xi \eta \varsigma$ ). Locative case with $\eta \mu \varepsilon \rho \alpha$ (day) understood. The adverb $\varepsilon \xi \eta \varsigma$ is from $\varepsilon \chi \omega$ (future $\varepsilon \xi \omega$ ) and means successively or in order. This is another one of Luke's ways of saying "on the next day" (cf. three others in 20:15).

Unto Rhodes ( $\varepsilon \iota \varsigma \tau \eta \nu$ Poסov). Called the island of roses. The sun shone most days and made roses luxuriant. The great colossus which represented the sun, one of the seven wonders of the world, was prostrate at this time. The island was at the entrance to the Aegean Sea and had a great university, especially for rhetoric and oratory. There was great commerce also.

Unto Patara ( $\varepsilon \iota \sqcap \Pi \tau \alpha \rho \alpha)$. A seaport on the Lycian coast on the left bank of the Xanthus. It once had an oracle of Apollo which rivalled that at Delphi. This was the course taken by hundreds of ships every season.

Acts 21:2
Having found a ship ( $\varepsilon \cup \rho o v \tau \varepsilon \varsigma \pi \lambda o \iota v$ ). Paul had used a small coasting vessel (probably hired) that anchored each night at Cos, Rhodes, Patara. He was still some four hundred miles from Jerusalem. But at Patara Paul caught a large vessel (a merchantman) that could sail across the open sea.

Crossing over unto Phoenicia ( $\delta \iota \alpha \pi \varepsilon \rho \omega v \varepsilon \iota \varsigma ~ Ф о \iota \nu \iota \kappa \eta \nu$ ). Neuter singular accusative (agreeing with $\pi \lambda o \iota o v$ ) present active participle of $\delta \iota \alpha \pi \varepsilon \rho \alpha \omega$, old verb to go between ( $\delta \iota \alpha$ ) and so across to Tyre.

We went aboard ( $\varepsilon \pi \iota \beta \alpha \nu \tau \varepsilon \varsigma)$. Second aorist active participle of $\varepsilon \pi \iota \beta \alpha \imath \nu \omega$.
Acts 21:3
When we had come in sight of Cyprus ( $\alpha v \alpha \varphi \alpha v \alpha v \tau \varepsilon \varsigma \tau \eta v K v \pi \rho o v$ ). First aorist active participle of $\alpha v \alpha \varphi a \iota v \omega$ (Doric form - $\varphi \alpha v \alpha \nu \tau \varepsilon \varsigma$ rather than the Attic $-\varphi \eta \nu \alpha \nu \tau \varepsilon \varsigma$ ), old verb to make appear, bring to light, to manifest. Having made Cyprus visible or rise up out of the sea. Nautical terms. In the N.T. only here and Lu 19:11 which see.

On the left hand $(\varepsilon v \omega v v \mu o v)$. Compound feminine adjective like masculine. They sailed south of Cyprus.

We sailed $(\varepsilon \pi \lambda \varepsilon \sigma \mu \varepsilon \nu)$. Imperfect active of common verb $\pi \lambda \varepsilon \omega$, kept on sailing till we came to Syria.

Landed at Tyre ( $\kappa \alpha \tau \eta \lambda \theta$ о $\mu \varepsilon v \varepsilon ı$ Tv $\rho \circ v$ ). Came down to Tyre. Then a free city of Syria in honour of its former greatness (cf. the long siege by Alexander the Great).

There ( $\varepsilon \kappa \varepsilon เ \sigma \varepsilon$ ). Thither, literally. Only one other instance in N.T., 22:5 which may be pertinent $=\varepsilon \kappa \varepsilon$ (there).

Was to unlade ( $\eta \nu \alpha \pi о \varphi о \rho \tau \iota \zeta о \mu \varepsilon \nu \circ \nu$ ). Periphrastic imperfect middle of $\alpha \pi \sigma \varphi о \rho \tau \iota \zeta \omega$,
 boat was unloading her cargo," a sort of "customary" or "progressive" imperfect (Robertson, Grammar, p. 884).

Burden ( $\gamma o \mu o v$ ). Cargo, old word, from $\gamma \varepsilon \mu \omega$, to be full. Only here and Re 18:11f. in N.T. Probably a grain or fruit ship. It took seven days here to unload and reload.

Acts 21:4
Having found ( $\alpha v \varepsilon v \rho o v \tau \varepsilon \varsigma)$. Second aorist active participle of $\alpha \nu \varepsilon \cup \rho \iota \sigma \kappa \omega$, to seek for, to find by searching $(\alpha v \alpha)$. There was a church here, but it was a large city and the number of members may not have been large. Probably some of those that fled from Jerusalem who came to Phoenicia (Ac 11:19) started the work here. Paul went also through Phoenicia on the way to the Jerusalem Conference (15:3). As at Troas and Miletus, so here Paul's indefatigible energy shows itself with characteristic zeal.

Through the Spirit ( $\delta \iota \alpha$ tov $\pi v \varepsilon v \mu \alpha \tau \sigma$ ). The Holy Spirit undoubtedly who had already told Paul that bonds and afflictions awaited him in Jerusalem (20:23).

That he should not set foot in Jerusalem ( $\mu \eta \varepsilon \pi \iota \beta \alpha \iota v \varepsilon \iota v \varepsilon \iota \varsigma I \varepsilon \rho \circ \sigma o \lambda \nu \mu \alpha$ ). Indirect command with $\mu \eta$ and the present active infinitive, not to keep on going to Jerusalem (Robertson, Grammar, p. 1046). In spite of this warning Paul felt it his duty as before (20:22) to go on. Evidently Paul interpreted the action of the Holy Spirit as information and warning although the disciples at Tyre gave it the form of a prohibition. Duty called louder than warning to Paul even if both were the calls of God.

Acts 21:5
That we had accomplished the days ( $\varepsilon \xi \alpha \rho \tau \iota \sigma \alpha \eta \mu \alpha \varsigma \tau \alpha \varsigma \eta \mu \varepsilon \rho \alpha \varsigma)$. First aorist active infinitive of $\varepsilon \xi \alpha \rho \tau \iota \zeta \omega$, to furnish perfectly, rare in ancient writers, but fairly frequent in the papyri. Only twice in the N.T., here and $2 \mathrm{Ti} 3: 17$. Finish the exact number of days (seven) of verse 4 . The accusative of general reference $\eta \mu a \varsigma$ is the usual construction and the infinitive clause is the subject of $\varepsilon \gamma \varepsilon v \varepsilon \tau \circ$. We departed and went on our journey ( $\varepsilon \xi \varepsilon \lambda \theta$ ov $\varepsilon \varepsilon \varsigma$ $\varepsilon \pi о \rho \varepsilon v o \mu \varepsilon \theta \alpha$ ). Sharp distinction between the first aorist active participle $\varepsilon \xi \varepsilon \lambda \theta$ ov $\tau \varepsilon \varsigma$ (from $\varepsilon \xi \varepsilon \rho \chi о \mu \alpha$, to go out) and the imperfect middle $\varepsilon \pi о \rho \varepsilon v o \mu \varepsilon \theta \alpha$ from $\pi о \rho \varepsilon v \omega$ (we were going on).

And they all, with wives and children, brought us on our way ( $\pi \rho о \pi \varepsilon \mu \pi \sigma \nu \tau \omega \nu \eta \mu \alpha \varsigma$ $\pi \alpha \nu \tau \omega \nu \sigma \nu \nu \gamma \cup \nu \alpha \xi \kappa \alpha \tau \varepsilon \kappa \nu о \iota \varsigma)$. No "and" in the Greek, simply genitive absolute, "They all with wives and children accompanying us," just as at Miletus (20:28), same verb $\pi \rho \circ \pi \varepsilon \mu \pi \omega$ which see. The first mention of children in connection with the apostolic churches (Vincent). Vivid picture here as at Miletus, evident touch of an eyewitness.

Till we were out of the city ( $\varepsilon \omega \varsigma \varepsilon \xi \omega \tau \eta \varsigma \pi \sigma \lambda \varepsilon \omega \varsigma)$. Note both adverbial prepositions $(\varepsilon \omega \varsigma \varepsilon \xi \omega)$ clear outside of the city.

Acts 21:6
Beach ( $\alpha \nmid \gamma \iota \lambda 0 v$ ). As in Mt 13:2 which see. This scene is in public as at Miletus, but they did not care.

Bade each other farewell ( $\alpha \pi \varepsilon \sigma \pi \alpha \sigma \alpha \mu \varepsilon \theta \alpha \alpha \lambda \lambda \eta \lambda o v \varsigma)$. First aorist middle of $\alpha \pi \alpha \sigma \pi \alpha \zeta$ o $\mu \alpha$. Rare compound, here alone in the N.T. Tender scene, but "no bonds of long comradeship, none of the clinging love" (Furneaux) seen at Miletus (Ac 20:37f. ).

Home again ( $\varepsilon เ \varsigma \tau \alpha \iota \delta \iota \alpha$ ). To their own places as of the Beloved Disciple in Joh 19:27 and of Jesus in Joh 1:11. This idiom in the papyri also.

Acts 21:7
Had finished ( $\delta \iota \alpha v v \sigma \alpha \nu \tau \varepsilon \varsigma)$. First aorist active participle of $\delta \iota \alpha \nu v \omega$, old verb to accomplish ( $\alpha v v \omega$ ) thoroughly ( $\delta \iota \alpha$ ), only here in the N.T.

From Tyre (a $\alpha$ Tv $\rho o v$ ). Page takes (Hackett also) with $\kappa \alpha \tau \eta \nu \tau \eta \sigma \alpha \mu \varepsilon \nu$ (we arrived) rather than with " $\tau 0 v \pi \lambda o v v$ " (the voyage) and with good reason: "And we, having (thereby) finished the voyage, arrived from Tyre at Ptolemais." Ptolemais is the modern Acre, called Accho in Jud 1:31. The harbour is the best on the coast of Palestine and is surrounded by mountains. It is about thirty miles south of Tyre. It was never taken by Israel and was considered a Philistine town and the Greeks counted it a Phoenician city. It was the key to the road down the coast between Syria and Egypt and had successively the rule of the Ptolemies, Syrians, Romans.

Saluted ( $\alpha \sigma \pi \alpha \sigma \alpha \mu \varepsilon v o$ ). Here greeting as in 21:19 rather than farewell as in 20:1. The stay was short, one day ( $\eta \mu \varepsilon \rho \alpha \nu \mu \iota \alpha \nu$, accusative), but "the brethren" Paul and his party found easily. Possibly the scattered brethren (Ac 11:19) founded the church here or Philip may have done it.

Acts 21:8
On the morrow ( $\tau \eta \varepsilon \pi \alpha v \rho \circ \circ$ ). Another and the more common way of expressing this idea of "next day" besides the three in 20:15 and the one in 21:1.

Unto Caesarea ( $\varepsilon \iota \varsigma$ Kaı $\alpha \rho \iota \alpha v$ ). Apparently by land as the voyage ( $\pi \lambda o v \nu$ ) ended at Ptolemais (verse 7). Caesarea is the political capital of Judea under the Romans where the procurators lived and a city of importance, built by Herod the Great and named in honour of Augustus. It had a magnificent harbour built Most of the inhabitants were Greeks. This is the third time that we have seen Paul in Caesarea, on his journey from Jerusalem to Tarsus
(Ac 9:30), on his return from Antioch at the close of the second mission tour ( 18:22) and now. The best MSS. omit o $\pi \varepsilon \rho$ П $\alpha \cup \lambda$ ov (we that were of Paul's company) a phrase like that in 13:13.
 Second in the list of the seven ( 6:5) after Stephen and that fact mentioned here. By this title he is distinguished from "Philip the apostle," one of the twelve. His evangelistic work followed the death of Stephen (Ac 8 ) in Samaria, Philistia, with his home in Caesarea. The word "evangelizing" ( $\varepsilon \cup \eta \gamma \gamma \varepsilon \lambda_{\imath} \zeta \varepsilon \tau 0$ ) was used of him in 8:40. The earliest of the three N.T. examples of the word "evangelist" (Ac 21:8; Eph 4:11; 2Ti 4:5 ). Apparently a word used to describe one who told the gospel story as Philip did and may have been used of him first of all as John was termed "the baptizer" (o $\beta \alpha \pi \tau \iota \zeta \omega v$, Mr 1:4 ), then "the Baptist" (o $\beta a \pi \tau \iota \sigma \tau \eta \varsigma, M t$ 3:1 ). It is found on an inscription in one of the Greek islands of uncertain date and was used in ecclesiastical writers of later times on the Four Gospels as we do. As used here the meaning is a travelling missionary who "gospelized" communities. This is probably Paul's idea in 2Ti 4:5. In Eph 4:11 the word seems to describe a special class of ministers just as we have them today. Men have different gifts and Philip had this of evangelizing as Paul was doing who is the chief evangelist. The ideal minister today combines the gifts of evangelist, herald, teacher, shepherd. "We abode with him " ( $\varepsilon \mu \varepsilon เ v \alpha \mu \varepsilon v \pi \alpha \rho ' \alpha \nu \tau \omega)$. Constative aorist active indicative. П $\alpha \boldsymbol{\alpha} \tau \omega($ by his side) is a neat idiom for "at his house." What a joyful time Paul had in conversation with Philip. He could learn from him much of value about the early days of the gospel in Jerusalem. And Luke could, and probably did, take notes from Philip and his daughters about the beginnings of Christian history. It is generally supposed that the "we" sections of Acts represent a travel document by Luke (notes made by him as he journeyed from Troas to Rome). Those who deny the Lukan authorship of the whole book usually admit this. So we may suppose that Luke is already gathering data for future use. If so, these were precious days for him.

Acts 21:9
Virgins which did prophesy ( $\pi \alpha \rho \theta \varepsilon v o \pi \rho \circ \varphi \eta \tau \varepsilon \cup \sigma \alpha$ ). Not necessarily an "order" of virgins, but Philip had the honour of having in his home four virgin daughters with the gift of prophecy which was not necessarily predicting events, though that was done as by Agabus here. It was more than ordinary preaching (cf. 19:6) and was put by Paul above the other gifts like tongues (1Co 14:1-33 ). The prophecy of Joel (2:28f. ) about their sons and daughters prophesying is quoted by Peter and applied to the events on the day of Pentecost (Ac 2:17 ). Paul in 1Co 11:5 gives directions about praying and prophesying by the women (apparently in public worship) with the head uncovered and sharply requires the head covering, though not forbidding the praying and prophesying. With this must be compared his demand for silence by the women in 1Co 14:34-40; $1 \mathrm{Ti} 2: 8$-15 which it is not easy to reconcile. One wonders if there was not something known to Paul about special conditions
in Corinth and Ephesus that he has not told. There was also Anna the prophetess in the temple (Lu 2:36 ) besides the inspired hymns of Elizabeth (Lu 1:42-45) and of Mary (Lu 1:46-55). At any rate there was no order of women prophets or official ministers. There were Old Testament prophetesses like Miriam, Deborah, Huldah. Today in our Sunday schools the women do most of the actual teaching. The whole problem is difficult and calls for restraint and reverence. One thing is certain and that is that Luke appreciated the services of women for Christ as is shown often in his writings (Lu 8:1-3, for instance) before this incident.

Acts 21:10
As we tarried ( $\varepsilon \pi \mu \mu \varepsilon v o v \tau \omega v \eta \mu \omega v$ ). Genitive absolute. Note $\varepsilon \pi$ (additional) with $\mu \varepsilon v \omega$ as in 12:16.

Many days ( $\eta \mu \varepsilon \rho \alpha \varsigma \pi \lambda \varepsilon \iota o v \varsigma$ ). More days (than we expected), accusative of time.
A certain prophet named Agabus ( $\pi \rho \circ \varphi \eta \tau \eta \varsigma$ оvouat $A \gamma \alpha \beta \circ \varsigma$ ). A prophet like the daughters of Philip, mentioned already in connection with the famine predicted by him (Ac 11:28), but apparently not a man of prominence like Barnabas, and so no allusion to that former prophecy.

Acts 21:11
Coming ( $\varepsilon \lambda \theta \hat{A} \omega v$, second aorist active participle of $\varepsilon \rho \chi \circ \mu \alpha$ ), taking ( $\alpha \rho \alpha \varsigma$, first aorist active participle of $\alpha \iota \rho \hat{A} \omega$, to take up),
binding ( $\delta \hat{A} \eta \sigma \alpha \varsigma$, first aorist active participle of $\delta \varepsilon \hat{A} \omega$, to bind). Vivid use of three successive participles describing the dramatic action of Agabus.

Paul's girdle ( $\tau \eta \nu \zeta \omega v \eta \nu \tau 0 v$ Пav $\lambda o v$ ). Old word from $\zeta \omega v \nu v \mu$, to gird. See on 12:8.
His own feet and hands ( $\varepsilon \alpha \cup \tau о \cup ~ \tau о и \varsigma ~ \pi о \delta а \varsigma ~ к а ~ \tau а \varsigma ~ \chi \varepsilon ı \rho а \varsigma) . ~ B a s i s ~ f o r ~ t h e ~ i n t e r p r e t a t i o n . ~$ Old Testament prophets often employed symbolic deeds (1Ki 22:11; Jas 2:2; Jer 13:1-7; Eze 4:1-6 ). Jesus interpreted the symbolism of Peter's girding himself (Joh 21:18).

So (ovt $\omega \varsigma$ ). As Agabus had bound himself. Agabus was just from Jerusalem and probably knew the feeling there against Paul. At any rate the Holy Spirit revealed it to him as he claims.

Shall deliver ( $\pi \alpha \rho \alpha \delta \omega \sigma o v \sigma v)$ ). Like the words of Jesus about himself (Mt 20:19). He was "delivered" into the hands of the Gentiles and it took five years to get out of those hands.

## Acts 21:12

Both we and they of that place ( $\eta \mu \varepsilon \iota \varsigma \tau \varepsilon \kappa \alpha$ о $\varepsilon \nu \tau о \pi \iota \circ$ ). Usual use of $\tau \varepsilon \kappa \alpha$ (both--and). Eviotio, old word, only here in N.T.

Not to go up ( $\tau 0 v \mu \eta$ $\alpha v \alpha \beta \alpha ı v \varepsilon เ v$ ). Probably ablative of the articular present active infinitive with redundant negative $\mu \varepsilon$ after $\pi \alpha \rho \varepsilon \kappa \alpha \lambda o v \mu \varepsilon v$ (imperfect active, conative). We tried to persuade him from going up. It can be explained as genitive, but not so likely: We tried to persuade him in respect to not going up. Vincent cites the case of Regulus who insisted on returning from Rome to Carthage to certain death and that of Luther on the way
to the Diet of Worms. Spalatin begged Luther not to go on. Luther said: "Though devils be as many in Worms as tiles upon the roofs, yet thither will I go." This dramatic warning of Agabus came on top of that in Tyre (21:4) and Paul's own confession in Miletus (20:23). It is small wonder that Luke and the other messengers together with Philip and his daughters (prophetesses versus prophet?) joined in a chorus of dissuasion to Paul.

Acts 21:13
What are you doing weeping? (T $\pi \circ \iota \varepsilon \iota \varepsilon \varepsilon \lambda \alpha \iota \nu \tau \varepsilon \sigma$ ?) Strong protest as in Mr 11:5.
Breaking my heart ( $\sigma v \nu \theta \rho v \pi \tau о \nu \tau \varepsilon \varsigma \mu \circ v \tau \eta \nu \kappa \alpha \rho \delta \iota \alpha \nu$ ). The verb $\sigma v v \theta \rho v \pi \tau \omega$, to crush together, is late Koine for $\alpha \pi \circ \theta \rho v \pi \tau \omega$, to break off, both vivid and expressive words. So to enervate and unman one, weakening Paul's determination to go on with his duty.

I am ready ( $\mathrm{E} \gamma \omega \varepsilon \tau \circ \iota \omega \varsigma \varepsilon \chi \omega$ ). I hold (myself) in readiness (adverb, $\varepsilon \tau \circ \iota \omega \varsigma$ ). Same idiom in 2Co 12:14.

Not only to be bound (ov $\mu \mathrm{ovov} \delta \varepsilon \theta \eta \nu \alpha$ ). First aorist passive infinitive of $\delta \varepsilon \omega$ and note ov $\mu$ ovov rather than $\mu \eta \mu o v o v$, the usual negative of the infinitive because of the sharp contrast (Robertson, Grammar, p. 1095). Paul's readiness to die, if need be, at Jerusalem is like that of Jesus on the way to Jerusalem the last time. Even before that Luke (9:51) said that "he set his face to go on to Jerusalem." Later the disciples will say to Jesus, "Master, the Jews were but now seeking to stone thee; and goest thou thither?" (Joh 11:8). The stature of Paul rises here to heroic proportions "for the name of the Lord Jesus" (v ve $\frac{\tau}{}$ тov ovo $\mu a \tau \circ$, tov кupıov İбov).

Acts 21:14
When he would not be persuaded ( $\mu \eta \pi \varepsilon \Delta \theta$ o $\mu \varepsilon v o v \alpha v \tau o v)$. Genitive absolute of the present passive participle of $\pi \varepsilon \iota \theta \omega$. Literally, "he not being persuaded." That was all. Paul's will ( $\kappa \alpha \rho \delta \iota \alpha)$ was not broken, not even bent.

We ceased ( $\eta \sigma v \chi \alpha \sigma \alpha \mu \varepsilon v$ ). Ingressive aorist active indicative of $\eta \sigma v \chi \propto \zeta \omega$, old verb to be quiet, silent.

The will of the Lord be done ( $\tau$ ко кv ative of $\gamma เ v o \mu a$. There is a quaint naivete in this confession by the friends of Paul. Since Paul would not let them have their way, they were willing for the Lord to have his way, acquiescence after failure to have theirs.

Acts 21:15
We took up our baggage ( $\varepsilon \pi \iota \sigma \kappa \varepsilon v \alpha \sigma \alpha \mu \varepsilon v o)$. First aorist middle participle of $\varepsilon \pi \iota \sigma \kappa \varepsilon v \alpha \zeta \omega$, old verb to furnish ( $\sigma \kappa \varepsilon v o \sigma, \varepsilon \pi$ ) with things necessary, to pack up, saddle horses here Ramsay holds. Here only in the N.T.

Went up ( $\alpha v \varepsilon \beta \alpha \downarrow v o \mu \varepsilon v$ ). Inchoative imperfect active of $\alpha v \alpha \beta \alpha \imath v \omega$, we started to go up.
Acts 21:16

Certain of the disciples $(\tau \omega \nu \mu \alpha \theta \eta \tau \omega v)$. The genitive here occurs with $\tau \iota v \varepsilon \varsigma$ understood as often in the Greek idiom, the partitive genitive used as nominative (Robertson, Grammar, p. 502).

Bringing ( $\alpha \nmid 0 \nu \tau \varepsilon \varsigma)$. Nominative plural participle agreeing with $\tau i v \varepsilon \varsigma$ understood, not with case of $\mu \alpha \theta \eta \tau \omega \nu$.

One Mnason of Cyprus, an early disciple, with whom we should lodge ( $\pi \alpha \rho \omega$ $\xi \varepsilon v \iota \sigma \theta \omega \mu \varepsilon \nu \mathrm{M} \nu \alpha \sigma \omega \nu \tau \iota \nu K \nu \pi \rho \iota \omega$ а $\rho \chi \alpha \iota \omega \mu \alpha \theta \eta \tau \eta)$. A thoroughly idiomatic Greek idiom, incorporation and attraction of the antecedent into the relative clause (Robertson, Grammar, p. 718). Mva $\sigma \omega v$ is really the object of $\alpha \gamma o v \tau \varepsilon \varsigma$ or the accusative with $\pi \alpha \rho \alpha$ or $\pi \rho \circ \varsigma$ understood and should be accusative, but it is placed in the clause after the relative and in the same locative case with the relative $\omega$ (due to $\pi \alpha \rho^{\prime}$, beside, with). Then the rest agrees in case with $\mathrm{M} v \alpha \sigma \omega v$. He was originally from Cyprus, but now in Caesarea. The Codex Bezae adds $\varepsilon \iota \varsigma \tau \iota v \alpha \kappa \omega \mu \eta \nu$ (to a certain village) and makes it mean that they were to lodge with Mnason at his home there about halfway to Jerusalem. This may be true. The use of the subjunctive $\xi \varepsilon v I \sigma \theta \omega \mu \varepsilon \nu$ (first aorist passive of $\xi \varepsilon \nu 亡 \zeta \omega$, to entertain strangers as in Ac 10:6,23,32 already) may be volitive of purpose with the relative (Robertson, Grammar, pp. 955, 989). The use of $\alpha \rho \chi \alpha \iota \omega$ for "early" may refer to the fact that he was one of the original disciples at Pentecost as Peter in 15:7 uses $\eta \mu \varepsilon \rho \omega v$ a $\rho \chi \alpha \iota \omega v$ (early days) to refer to his experience at Ceasarea in Ac 10. "As the number of the first disciples lessened, the next generation accorded a sort of honour to the survivors" (Furneaux).

Acts 21:17
When we were come ( $\gamma \varepsilon v o \mu \varepsilon \nu \omega \nu \eta \mu \omega \nu$ ). Genitive absolute again, "we having come."
Received ( $\alpha \pi \varepsilon \delta \varepsilon \xi \alpha v \tau 0$ ). A $\pi о \delta \varepsilon \chi \circ \mu \alpha$, to receive from. This old compound only in Luke in the N.T.

Gladly ( $\alpha \sigma \mu \varepsilon \nu \omega \varsigma)$. Old adverb $\eta \sigma \mu \varepsilon \nu \omega \varsigma$ from $\eta \delta o \mu \alpha$, to be pleased. Here only in the N.T. Perhaps this first glad welcome was from Paul's personal friends in Jerusalem.

Acts 21:18
The day following ( $\tau \eta \varepsilon \pi \iota o v \sigma \eta$ ). As in 20:15 which see.
Went in ( $\varepsilon \iota \sigma \eta \iota \varepsilon)$. Imperfect active of $\varepsilon \iota \sigma \varepsilon \not \mu$, old classic verb used only four times in the N.T. (Ac 3:3; 21:18,26; Heb 9:6 ), a mark of the literary style rather than the colloquial Koine use of $\varepsilon \iota \sigma \varepsilon \rho \chi о \mu \alpha$. Together with us to James ( $\sigma v \nu \eta \mu \nu \nu \pi \rho \circ \varsigma I \alpha \kappa \omega \beta o v$ ). So then Luke is present. The next use of "we" is in 27:1 when they leave Caesarea for Rome, but it is not likely that Luke was away from Paul in Jerusalem and Caesarea. The reports of what was done and said in both places is so full and minute that it seems reasonable that Luke got first hand information here whatever his motive was for so full an account of these legal proceedings to be discussed later. There are many details that read like an eye witness's story (21:30,35,40; 22:2,3; $23: 12$, etc.). It was probably the house of James ( $\pi \rho \circ \varsigma$ and $\pi \alpha \rho \alpha$ so used often).

And all the elders were present ( $\pi \alpha \nu \tau \varepsilon \varsigma \tau \varepsilon \pi \alpha \rho \varepsilon \gamma \varepsilon v o v \tau$ о o $\pi \rho \varepsilon \sigma \beta v \tau \varepsilon \rho o$ ). Clearly James is the leading elder and the others are his guests in a formal reception to Paul. It is noticeable that the apostles are not mentioned, though both elders and apostles are named at the Conference in chapter 15. It would seem that the apostles are away on preaching tours. The whole church was not called together probably because of the known prejudice against Paul created by the Judaizers.

Acts 21:19
He rehearsed ( $\varepsilon \xi \eta \gamma \varepsilon \iota \tau o$ ). Imperfect middle of $\varepsilon \xi \eta \gamma \varepsilon \circ \mu \alpha$, old verb to lead out, to draw out in narrative, to recount. So Paul is pictured as taking his time for he had a great story to tell of what had happened since they saw him last.

One by one ( $\left.\kappa \alpha \theta^{\prime} \varepsilon v \alpha \varepsilon \kappa \alpha \sigma \tau o v\right)$. According to each one (item) and the adverbial phrase used as an accusative after the verb $\varepsilon \xi \eta \gamma \varepsilon \iota \tau$ as Demosthenes does (1265), though it could be like каӨ' $\varepsilon v a \varepsilon \kappa \alpha \sigma \tau о \varsigma$ in Eph 5:33.

Which $(\omega v)$. Genitive attracted from $\alpha$ (accusative) into the case of the unexpressed antecedent $\tau 0 \cup \tau \omega v$.

God had wrought ( $\varepsilon \pi \circ ו \eta \sigma \varepsilon v$ o $\theta \varepsilon o \varsigma)$. Summary constative aorist active indicative that gathers up all that God did and he takes pains to give God the glory. It is possible that at this formal meeting Paul observed an absence of warmth and enthusiasm in contrast with the welcome accorded by his friends the day before (verse 17). Furneaux thinks that Paul was coldly received on this day in spite of the generous offering brought from the Gentile Christians. "It looks as though his misgiving as to its reception (Ro 15:31) was confirmed. Nor do we hear that the Christians of Jerusalem later put in so much as a word on his behalf with either the Jewish or the Roman authorities, or expressed any sympathy with him during his long imprisonment at Caesarea" (Furneaux). The most that can be said is that the Judaizers referred to by James do not appear actively against him. The collection and the plan proposed by James accomplished that much at any rate. It stopped the mouths of those lions.

## Acts 21:20

Glorified ( $\varepsilon \delta \circ \xi \alpha \zeta o v$ ). Inchoative imperfect, began to glorify God, though without special praise of Paul.

How many thousands ( $\pi \sigma \sigma \alpha \mu \nu \rho ı \alpha \varepsilon \varsigma)$. Old word for ten thousand (Ac 19:19) and then an indefinite number like our "myriads" (this very word) as Lu 12:1; Ac 21:20; Jude $1: 14$; $\operatorname{Re} 5: 11 ; 9: 16$. But it is a surprising statement even with allowable hyperbole, but one may recall Ac 4:4 (number of the men--not women--about five thousand); 5:14 (multitudes both of men and women); 6:7. There were undoubtedly a great many thousands of believers in Jerusalem and all Jewish Christians, some, alas, Judaizers (Ac 11:2; 15:1,5 ). This list may include the Christians from neighbouring towns in Palestine and even some from foreign countries here at the Feast of Pentecost, for it is probable that Paul arrived in time for it as
he had hoped. But we do not have to count the hostile Jews from Asia (verse 27) who were clearly not Christians at all.

All zealous for the law ( $\pi \alpha \nu \tau \varepsilon \varsigma \zeta \eta \lambda \omega \tau \alpha$ тov vouov). Zealots (substantive) rather than zealous (adjective) with objective genitive ( $\tau 00$ vouov). The word zealot is from $\zeta \eta \lambda o \omega$, to burn with zeal, to boil. The Greek used $\zeta \eta \lambda \omega \tau \eta \varsigma$ for an imitator or admirer. There was a party of Zealots (developed from the Pharisees), a group of what would be called "hot-heads," who brought on the war with Rome. One of this party, Simon Zelotes (Ac 1:13), was in the number of the twelve apostles. It is important to understand the issues in Jerusalem. It was settled at the Jerusalem Conference (Ac 15; Ga 2 ) that the Mosaic ceremonial law was not to be imposed upon Gentile Christians. Paul won freedom for them, but it was not said that it was wrong for Jewish Christians to go on observing it if they wished. We have seen Paul observing the passover in Philippi (Ac 20:6) and planning to reach Jerusalem for Pentecost ( 20:16). The Judaizers rankled under Paul's victory and power in spreading the gospel among the Gentiles and gave him great trouble in Galatia and Corinth. They were busy against him in Jerusalem also and it was to undo the harm done by them in Jerusalem that Paul gathered the great collection from the Gentile Christians and brought it with him and the delegates from the churches. Clearly then Paul had real ground for his apprehension of trouble in Jerusalem while still in Corinth (Ro 15:25) when he asked for the prayers of the Roman Christians (verses 30-32). The repeated warnings along the way were amply justified.

Acts 21:21
They have been informed concerning thee ( $\kappa \alpha \tau \eta \chi \eta \theta \eta \sigma \alpha v \pi \varepsilon \rho \sigma o v)$. First aorist passive indicative of $\kappa \alpha \tau \eta \chi \varepsilon \omega$. A word in the ancient Greek, but a few examples survive in the papyri. It means to sound (echo, from $\eta \chi \omega$, our word) down ( $\kappa \alpha \tau \alpha$ ), to resound, re-echo, to teach orally. Oriental students today (Arabs learning the Koran) often study aloud. In the N.T. only in Lu 1:4 which see; Ac 18:25; 21:21; 1Co 14:19; Ga 6:6; Ro 2:18 . This oral teaching about Paul was done diligently by the Judaizers who had raised trouble against Peter (Ac 11:2) and Paul (15:1,5 ). They had failed in their attacks on Paul's world campaigns. Now they try to undermine him at home. In Paul's long absence from Jerusalem, since 18:22, they have had a free hand, save what opposition James would give, and have had great success in prejudicing the Jerusalem Christians against Paul. So James, in the presence of the other elders and probably at their suggestion, feels called upon to tell Paul the actual situation.

That thou teachest all the Jews which are among the Gentiles to forsake Moses (o

 Jews among (ка兀а) the Gentiles (the Jews of the dispersion as in 2:9) apostasy from Moses." That is the point, the dreadful word $\alpha \pi o \sigma \tau \alpha \sigma ı \alpha v$ (our apostasy), a late form (I Macc. 2:15) for the earlier $\alpha \pi о \sigma \tau \alpha \sigma \iota \varsigma ~(c f . ~ 2 T h ~ 2: 3 ~ f o r ~ \alpha \pi о \sigma \tau \alpha \sigma ı \alpha) . ~ " I n ~ t h e ~ e y e s ~ o f ~ t h e ~ c h u r c h ~ a t ~ J e r u s a l e m ~$ this was a far more serious matter than the previous question at the Conference about the
status of Gentile converts" (Furneaux). Paul had brought that issue to the Jerusalem Conference because of the contention of the Judaizers. But here it is not the Judaizers, but the elders of the church with James as their spokesman on behalf of the church as a whole. They do not believe this false charge, but they wish Paul to set it straight. Paul had made his position clear in his Epistles (I Corinthians, Galatians, Romans) for all who cared to know.

Telling them not to circumcise their children ( $\lambda \varepsilon \gamma \omega \nu \mu \eta \pi \varepsilon \rho เ \tau \varepsilon \mu \nu \varepsilon เ \nu \alpha \cup \tau \circ \cup \varsigma \tau \alpha \tau \varepsilon \kappa v \alpha$ ). The participle $\lambda \varepsilon \gamma \omega v$ agrees with "thou" (Paul), the subject of $\delta \iota \delta a \sigma \kappa \varepsilon เ \varsigma$. This is not indirect assertion, but indirect command, hence the negative $\mu \eta$ instead of ov with the infinitive (Robertson, Grammar, p.1046). The point is not that Paul stated what the Jewish Christians in the dispersion do, but that he says that they (autov, accusative of general reference) are not to go on circumcising ( $\pi \varepsilon \rho \iota \tau \varepsilon \mu \nu \varepsilon \iota \nu$, present active infinitive) their children. Paul taught the very opposite (1Co 7:18) and had Timothy circumcised (Ac 16:3) because he was half Jew and half Greek. His own practice is stated in 1Co 9:19 ("to the Jews as a Jew").

Neither to walk after the customs ( $\mu \eta \delta \varepsilon$ тоוऽ $\varepsilon \theta \varepsilon \sigma \iota v \pi \varepsilon \rho \iota \pi \alpha \tau \varepsilon \iota v$ ). Locative case with infinitive $\pi \varepsilon \rho ı \pi \alpha \tau \varepsilon ı$. The charge was here enlarged to cover it all and to make Paul out an enemy of Jewish life and teachings. That same charge had been made against Stephen when young Saul (Paul) was the leader ( $6: 14$ ): "Will change the customs ( $\varepsilon \theta \eta$ the very word used here) which Moses delivered unto us." It actually seemed that some of the Jews cared more for Moses than for God (Ac 6:11). So much for the charge of the Judaizers.

Acts 21:22
What is it therefore? (T ouv عбтıv?). See this form of question by Paul (1Co 14:15,26 ). What is to be done about it? Clearly James and the elders do not believe these misrepresentations of Paul's teaching, but many do.

They will certainly hear ( $\pi \alpha \nu \tau \omega \varsigma \alpha \kappa \sigma \sigma \sigma o v \tau \alpha$ ). П $\alpha v \tau \omega \varsigma$ is old adverb, by all means, altogether, wholly, certainly as here and 28:4; $\mathrm{Lu} 4: 23$; 1Co 9:10. This future middle of $\alpha \kappa 0 v \omega$ is the usual form instead of aкоиб $\omega$. There was no way to conceal Paul's arrival nor was it wise to do so. B C and several cursives omit $\delta \varepsilon \pi \lambda \eta \theta$ oc $\sigma v v \varepsilon \lambda \theta \varepsilon ı v$ (The multitude must needs come together).

Acts 21:23
Do therefore this ( $\tau 0 v \tau 0$ ouv $\pi$ oin $\sigma 0 v$ ). The elders had thought out a plan of procedure by which Paul could set the whole matter straight.

We have ( $\varepsilon เ \sigma \iota \nu \eta \mu \nu)$ ) "There are to us" (dative of possession as in 18:10). Apparently members of the Jerusalem church.

Which have a vow on them ( $\varepsilon v \chi \eta \nu \varepsilon \chi o v \tau \varepsilon \varsigma \alpha \varphi^{\prime}-$ - or $\varepsilon \varphi^{\prime} \varepsilon \alpha \nu \tau \omega v$ ). Apparently a temporary Nazarite vow like that in Nu 6:1-21 and its completion was marked by several offerings in the temple, the shaving of the head ( Nu 6:13-15) . Either Paul or Aquila had such a vow on leaving Cenchreae (Ac 18:18). "It was considered a work of piety to relieve needy Jews from the expenses connected with this vow, as Paul does here" (Page). The reading $\alpha \varphi^{\prime}$ عavt $\omega v$
would mean that they had taken the vow voluntarily or of themselves (Lu 12:57; 2Co 3:5), while $\varepsilon \varphi^{\prime} \varepsilon \alpha u \tau \omega v$ means that the vow lies on them still.

Acts 21:24
These take ( $\tau 0 \cup \tau 0 v \varsigma ~ \pi \alpha \rho \alpha \lambda \alpha \beta \omega v$ ). Second aorist active participle of $\pi \alpha \rho \alpha \lambda \alpha \mu \beta \alpha v \omega$. Taking these alone.

Purify thyself with them ( $\alpha \gamma v ı \sigma \theta \eta \tau \quad \sigma \cup v$ avtoı). First aorist passive imperative of
 1Jo 3:3. It is possible to see the full passive force here, "Be purified." But a number of aorist passives in the Koine supplant the aorist middle forms and preserve the force of the middle (Robertson, Grammar, p. 819). That is possible here. Hence, "Purify thyself" is allowable. The word occurs in Nu 6:1 for taking the Nazarite vow. The point is that Paul takes the vow with them. Note $\alpha \gamma v i \sigma \mu o v$ in verse 26.

Be at charges for them ( $\delta \alpha \pi \alpha v \eta \sigma o v \varepsilon \pi^{\prime}$ avtotc). First aorist active imperative of old verb $\delta a \pi \alpha v \alpha \omega$, to incur expense, expend. Spend (money) upon ( $\varepsilon \pi^{\prime}$ ) them. Ramsay (St. Paul the Traveller, etc., p. 310) argues that Paul had use of considerable money at this period, perhaps from his father's estate. The charges for five men would be considerable. "A poor man would not have been treated with the respect paid him at Caesarea, on the voyage, and at Rome" (Furneaux).

That they may shave their heads ( $\imath v \alpha \xi v \rho \eta \sigma o v \tau \alpha ~ \tau \eta \nu \kappa \varepsilon \varphi \alpha \lambda \eta \nu$ ). Note $\tau \eta \nu \kappa \varepsilon \varphi \alpha \lambda \eta \nu$,
 middle to shave oneself or (causative) to get oneself shaved. This use of $\mathrm{v} \alpha$ with the future indicative is like the classic o $\pi \omega \varsigma$ with the future indicative and is common in the N.T. as in the Koine (Robertson, Grammar, p. 984).

And all shall know ( $\kappa \alpha \gamma \nu \omega \sigma o v \tau \alpha$ ). This future middle indicative of $\gamma \downarrow \nu \omega \sigma \kappa \omega$ (cf. aкоибоvта in verse 22) may be independent of tva or dependent on it like $\xi v \rho \eta \sigma o v \tau \alpha$, though some MSS. (H L P) have $\gamma \nu \omega \sigma \nu$ (second aorist subjunctive, clearly dependent on $i v \alpha)$.

Of which ( $\omega v$ ). Genitive plural of the relative $\alpha$ (accusative) object of the perfect passive verb кат $\rceil \eta \nu \tau \alpha$ (cf. verse $21 \kappa \alpha \tau \eta \chi \eta \theta \eta \sigma \alpha v$ ) attracted into the case of the omitted antecedent $\tau 0 \cup \tau \omega v$. The instruction still in effect.
 to go in a row (from $\sigma \tau 0 \chi \chi \circ$, row, rank, series), to walk in a line or by rule. In the N.T. only here and Ga 5:25; Ro 4:12; Php 3:16. The rule is the law and Paul was not a sidestepper. The idea of the verb is made plain by the participle $\varphi \cup \lambda \alpha \sigma \sigma \omega v \tau 0 v$ vo $\mu \circ v$ (keeping or observing the law).

Acts 21:25
We wrote $(\varepsilon \pi \varepsilon \sigma \tau \varepsilon 1 \lambda \alpha \mu \varepsilon v)$. First aorist active of $\varepsilon \pi\llcorner\sigma \tau \varepsilon \lambda \lambda \omega$, to send to and so to write like our epistle ( $\varepsilon \pi \iota \sigma \tau o \lambda \eta$ ). Old verb, but in the N.T. only here and Ac 15:20; Heb 13:22 . It
is the very word used by James in this "judgment" at the Conference (Ac 15:20, $\varepsilon \pi \downarrow \sigma \tau \varepsilon ı \lambda a)$. B D here read $\alpha \pi \varepsilon \sigma \tau \varepsilon i \lambda \alpha \mu \varepsilon$ from $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$, to send away, to give orders. Wendt and Schuerer object to this as a gloss. Rather is it an explanation by James that he does not refer to the Gentile Christians whose freedom from the Mosaic ceremonial law was guaranteed at the Jerusalem Conference. James himself presided at that Conference and offered the resolution that was unanimously adopted. James stands by that agreement and repeats the main items (four: anything sacrificed to idols, blood, anything strangled, fornication, for discussion see Ac 15 ) from which they are to keep themselves (direct middle $\varphi \cup \lambda \alpha \sigma \sigma \varepsilon \sigma \theta a$ of $\varphi \cup \lambda \alpha \sigma \sigma \omega$, indirect command after крıvavte¢ with accusative, avtov¢, of general reference). James has thus again cleared the air about the Gentiles who have believed ( $\pi \varepsilon \pi เ \sigma \tau \varepsilon \cup \kappa о \tau \omega v$, perfect active participle genitive plural of $\pi \iota \sigma \tau \varepsilon v \omega)$. He asks that Paul will stand by the right of Jewish Christians to keep on observing the Mosaic law. He has put the case squarely and fairly.

Acts 21:26
Took the men ( $\pi \alpha \rho \alpha \lambda \alpha \beta \omega v \tau 0 v \varsigma \alpha v \delta \rho \varsigma)$. The very phrase used in verse 24 to Paul.
The next day ( $\tau \eta \varepsilon \chi \circ \mu \varepsilon v \eta$ ). One of the phrases in 20:15 for the coming day. Locative case of time.

Purifying himself with them ( $\sigma \cup v$ avtoıs $\alpha \gamma v ı \sigma \theta \varepsilon \iota$, first aorist passive participle of $\alpha \gamma v 亡(\omega)$. The precise language again of the recommendation in verse 24 . Paul was conforming to the letter.
 which see. Went on into the temple, descriptive imperfect. Paul joined the four men in their vow of separation.

Declaring ( $\delta(\alpha \gamma \gamma \varepsilon \lambda \lambda \omega v)$. To the priests what day he would report the fulfilment of the vow. The priests would desire notice of the sacrifice. This verb only used by Luke in N.T. except Ro 11:17 (quotation from the LXX). It is not necessary to assume that the vows of each of the five expired on the same day (Rackham).

Until the offering was offered for every one of them ( $\varepsilon \omega \varsigma$ ov $\pi \rho \circ \sigma \eta \nu \varepsilon \chi \theta \eta \quad \cup \pi \varepsilon \rho \varepsilon v \circ \varsigma$ $\varepsilon \kappa \alpha \sigma \tau о v \alpha \cup \tau \omega \nu \eta \pi \rho о \sigma \varphi о \rho \alpha)$. This use of $\varepsilon \omega \varsigma$ ov (like $\varepsilon \omega \varsigma$, alone) with the first aorist passive indicative $\pi \rho \circ \sigma \eta v \varepsilon \chi \theta \eta$ of $\pi \rho \circ \sigma \varphi \varepsilon \rho \omega$, to offer, contemplates the final result (Robertson, Grammar, pp. 974f.) and is probably the statement of Luke added to Paul's announcement. He probably went into the temple one day for each of the brethren and one for himself. The question arises whether Paul acted wisely or unwisely in agreeing to the suggestion of James. What he did was in perfect harmony with his principle of accommodation in 1Co 9:20 when no principle was involved. It is charged that here on this occasion Paul was unduly influenced by considerations of expediency and was willing for the Jewish Christians to believe him more of a Jew than was true in order to placate the situation in Jerusalem. Furneaux calls it a compromise and a failure. I do not so see it. To say that is to obscure the whole complex
situation. What Paul did was not for the purpose of conciliating his opponents, the Judaizers, who had diligently spread falsehoods about him in Jerusalem as in Corinth. It was solely to break the power of these "false apostles" over the thousands in Jerusalem who have been deluded by Paul's accusers. So far as the evidence goes that thing was accomplished. In the trouble that comes in Jerusalem and Caesarea the Judaizers cut no figure at all. The Jewish Christians do not appear in Paul's behalf, but there was no opportunity for them to do so. The explosion that came on the last day of Paul's appearance in the temple was wholly disconnected from his offerings for the four brethren and himself. It must be remembered that Paul had many kinds of enemies. The attack on him by these Jews from Asia had no connexion whatever with the slanders of the Judaizers about Paul's alleged teachings that Jewish Christians in the dispersion should depart from the Mosaic law. That slander was put to rest forever by his following the advice of James and justifies the wisdom of that advice and Paul's conduct about it.

Acts 21:27
The seven days ( $\alpha \varepsilon \pi \tau \alpha \eta \mu \varepsilon \rho \alpha$ ). For which Paul had taken the vow, though there may be an allusion to the pentecostal week for which Paul had desired to be present ( $20: 16$ ). There is no necessary connexion with the vow in 18:15. In 24:17 Paul makes a general reference to his purpose in coming to Jerusalem to bring alms and offerings ( $\pi \rho о \sigma \varphi \rho \rho a \varsigma$, sacrifices). Paul spent seven days in Troas ( 20:6), Tyre ( 21:4), and had planned for seven here if not more. It was on the last of the seven days when Paul was completing his offerings about the vows on all five that the incident occurred that was to make him a prisoner for five years.

When they saw him in the temple ( $\theta \varepsilon \alpha \sigma \alpha \mu \varepsilon v o ~ \alpha u \tau o v ~ \varepsilon v \tau \omega ~ \varepsilon \varepsilon \rho \omega)$. First aorist middle participle of $\theta \varepsilon \alpha o \mu \alpha$ (from $\theta \varepsilon \alpha$, a view, cf. theatre) to behold. In the very act of honouring the temple these Jews from Asia raise a hue and cry that he is dishonouring it. Paul was not known by face now to many of the Jerusalem Jews, though once the leader of the persecution after the death of Stephen and the outstanding young Jew of the day. But the Jews in Ephesus knew him only too well, some of whom are here at the pentecostal feast. They had plotted against him in Ephesus to no purpose (Ac 19:23-41; 20:19), but now a new opportunity had come. It is possible that the cry was led by Alexander put forward by the Jews in Ephesus ( 19:33) who may be the same as Alexander the coppersmith who did Paul so much harm (2Ti 4:14 ). Paul was not in the inner sanctuary (o vaoc), but only in the outer courts ( $\tau \mathrm{o}$ เеро⿱) .

Stirred up all the multitude ( $\sigma v v \varepsilon \chi \varepsilon o v ~ \pi \alpha v \tau \alpha ~ \tau o v ~ o \chi \lambda o v)$. Imperfect (kept on) active of $\sigma u v \chi \varepsilon \omega$ or $\sigma v v \chi \nu v \omega(-v v v \omega)$, to pour together, to confuse as in Ac 2:6; 9:22; 19:31,32; 21:31 and here to stir up by the same sort of confusion created by Demetrius in Ephesus where the same word is used twice (19:31,32). The Jews from Ephesus had learned it from Demetrius the silversmith.

Laid hands on him ( $\left.\varepsilon \pi \varepsilon \beta \alpha \lambda \alpha v \varepsilon \pi^{\prime} \alpha v \tau \tau v \tau \alpha \varsigma \chi \varepsilon เ \rho a \varsigma\right)$. Second aorist (ingressive, with endings of the first aorist, $-\alpha v)$ active indicative of $\varepsilon \pi(\beta \alpha \lambda \lambda \omega$, old verb to lay upon, to attack (note repetition of $\varepsilon \pi$ ). They attacked and seized Paul before the charge was made.

Acts 21:28
Help ( $\beta \circ \eta \theta \varepsilon \iota \tau \varepsilon$ ). Present active imperative of $\beta$ o $\eta \varepsilon \omega$, to run $(\theta \varepsilon \omega)$ at a cry ( $\beta \circ \eta$ ), as if an outrage had been committed like murder or assault.

All men everywhere ( $\pi \alpha \nu \tau \alpha \pi \alpha \nu \tau \alpha \chi \eta$ ). Alliterative. Паvтах $\eta$ is a variation in MSS., often $\pi \alpha v \tau \alpha \chi o v$, and here only in the N.T. The charges against Paul remind one of those against Stephen (Ac 6:13) in which Paul had participated according to his confession ( 22:20). Like the charges against Stephen and Jesus before him truth and falsehood are mixed. Paul had said that being a Jew would not save a man. He had taught the law of Moses was not binding on Gentiles. He did hold, like Jesus and Stephen, that the temple was not the only place to worship God. But Paul gloried himself in being a Jew, considered the Mosaic law righteous for Jews, and was honouring the temple at this very moment.

And moreover also he brought Greeks also into the temple ( $\varepsilon \tau \tau \varepsilon \kappa \alpha \mathrm{H} \varepsilon \lambda \lambda \eta \nu \alpha \varsigma$

and ( $\tau \varepsilon$ )
still more ( $\varepsilon \tau$ )
also or
even ( $\kappa \alpha$ ). Worse than his teaching ( $\delta \delta \delta \alpha \sigma \kappa \omega v$ ) is his dreadful deed: he actually brought ( $\varepsilon \iota \sigma \eta \gamma \alpha \gamma \varepsilon v$, second aorist active indicative of $\varepsilon \iota \sigma \alpha \gamma \omega)$. This he had a right to do if they only went into the court of the Gentiles. But these Jews mean to imply that Paul had brought Greeks beyond this court into the court of Israel. An inscription was found by ClermontGanneau in Greek built into the walls of a mosque on the Via Dolorosa that was on the wall dividing the court of Israel from the court of the Gentiles. Death was the penalty to any Gentile who crossed over into the Court of Israel (The Athenaeum, July, 1871).
 active of kovo $\omega$, to make common (see on $10: 14$ ). Note vivid change of tense, the defilement lasts (state of completion). All this is the substance of the call of these shrewd conspirators from Ephesus, Jews (not Jewish Christians, not even Judaizers) who hated him for his work there and who probably "spoke evil of the Way before the multitude" there so that Paul had to separate the disciples from the synagogue and go to the School of Tyrannus (19:9f. ). These enemies of Paul had now raised the cry of "fire" and vanish from the scene completely (24:19). This charge was absolutely false as we shall see, made out of inferences of hate and suspicion.

Acts 21:29
For $(\gamma \alpha \rho)$. Luke adds the reason for the wild charges made against Paul.

They had before seen ( $\eta \sigma \alpha v \pi \rho о \varepsilon \omega \rho \alpha \kappa о \tau \varepsilon \varsigma)$. Periphrastic past perfect of $\pi \rho о о \rho \alpha \omega$, old verb to see before, whether time or place. Only twice in the N.T., here and Ac 2:25 quoted from Ps 15:8. Note the double reduplication in $-\varepsilon \omega$ - as in Attic (Robertson, Grammar, p. 364).
 $\alpha \cup \tau \omega$ ). The Jews from Asia (Ephesus) knew Trophimus by sight as well as Paul. One day they saw both of them together ( $\sigma v v$ ) in the city. That was a fact. They had just seized Paul in the temple (ispov). That was another fact.

They supposed ( $\varepsilon v o \mu i \zeta o v)$. Imperfect active of vo $\mu \zeta \zeta \omega$, common to think or suppose. Perfectly harmless word, but they did, as so many people do, put their supposed inference on the same basis with the facts. They did not see Trophimus with Paul now in the temple, nor had they ever seen him there. They simply argued that, if Paul was willing to be seen down street with a Greek Christian, he would not hesitate to bring him (therefore, did bring
 both Paul and Trophimus were entitled to death, especially Paul who had brought him in (if he had) and, besides, they now had Paul. This is the way of the mob-mind in all ages. Many an innocent man has been rushed to his death by the fury of a lynching party.

Acts 21:30
All the city was shaken ( $\varepsilon \kappa \iota v \eta \theta \eta \eta \pi \sigma \lambda \iota \rho \circ \lambda \eta$ ). First aorist passive of $\kappa เ v \varepsilon \omega$, common verb for violent motion and emotion. See also $24: 5$ where the word is used by Tertullus of Paul as the stirrer up of riots!

The people ran together ( $\varepsilon \gamma \varepsilon v \varepsilon \tau \circ ~ \sigma u v \delta \rho o \mu \eta ~ \tau o v ~ \lambda \alpha o v$ ). Rather, There came a running together ( $\sigma \nu v-\delta \rho o \mu \eta$ from $\sigma \nu v-\tau \rho \varepsilon \chi \omega$ ) of the people. The cry spread like wildfire over the city and there was a pell-mell scramble or rush to get to the place of the disturbance.

They laid hold on Paul ( $\varepsilon \pi i \lambda \alpha \beta$ ousvo tov Пau入ou). Second aorist middle participle of $\varepsilon \pi i \lambda \alpha \mu \beta \alpha v o \mu \alpha$ with the genitive (cf. $\varepsilon \pi \varepsilon \beta \alpha \lambda \alpha v$ in verse 27).

Dragged ( $\varepsilon \lambda \lambda \kappa \sigma$ ). Imperfect active of $\varepsilon \lambda \kappa \omega$ (and also $\varepsilon \lambda \kappa \nu \omega$ ), old verb to drag or draw. Imperfect tense vividly pictures the act as going on. They were saving the temple by dragging Paul outside. Curiously enough both $\varepsilon \pi \iota \lambda \alpha \beta \circ \mu \varepsilon v o$ and $\varepsilon ו \lambda \kappa \nu \sigma \alpha \nu$ occur in 16:19 about the arrest of Paul and Silas in Philippi.

Straightway the doors were shut ( $\varepsilon v \theta \varepsilon \omega \varsigma \varepsilon \kappa \lambda \varepsilon \iota \sigma \theta \eta \sigma \alpha v a \theta v \rho \alpha)$. With a bang and at once. First aorist (effective) passive of $\kappa \lambda \varepsilon \epsilon \omega$. The doors between the inner court and the court of the Gentiles. But this was only the beginning, the preparation for the real work of the mob. They did not wish to defile the holy place with blood. The doors were shut by the Levites.

Acts 21:31
As they were seeking to kill him ( $\zeta \eta \tau 0 \nu \nu \tau \omega v \alpha \nu \tau \omega v$ ). Genitive absolute of $\zeta \eta \tau \varepsilon \omega$, to seek, without $\alpha \nu \tau \omega v$ (they). This was their real purpose.

Tidings ( $\varphi a \sigma \iota \varsigma)$. From $\varphi \alpha \iota v \omega$, to show. Old word for the work of informers and then the exposure of secret crime. In LXX. Here only in the N.T.

Came up ( $\alpha v \varepsilon \beta \eta$ ). Naturally in the wild uproar. The Roman guard during festivals was kept stationed in the Tower of Antonia at the northwest corner of the temple overlooking the temple and connected by stairs (verse 35).

To the chief captain ( $\tau \omega \chi \backslash \lambda ı \alpha \rho \chi \omega$ ). Commander of a thousand men or cohort (Mr 15:16 ). His name was Claudius Lysias.

Of the band ( $\tau \eta \varsigma \sigma \pi \varepsilon \iota \rho \eta)$ ). Each legion had six tribunes and so each tribune (chiliarch) had a thousand if the cohort had its full quota. See on 10:1; 27:1. The word is the Latin spira (anything rolled up). Note the genitive $\sigma \pi \varepsilon เ \rho \eta \varsigma$ instead of $\sigma \pi \varepsilon \downharpoonright \rho \alpha \varsigma ~(A t t i c)$.

Was in confusion ( $\sigma \cup v \chi \cup v v \varepsilon \tau \alpha$ ). Present passive indicative of $\sigma v \nu \chi \cup v \nu \omega$ (see verse 27, ouvexeov). This is what the conspirators had desired.

Acts 21:32
Forthwith ( $\varepsilon \xi \alpha \cup \tau \eta \varsigma)$. Common in the Koine ( $\varepsilon \xi$ aut $\uparrow \varsigma$, supply $\omega \rho \alpha \varsigma$, hour).
He took ( $\pi \alpha \rho \alpha \lambda \alpha \beta \omega v$ ). See verses 24,26 .
Centurions (eкатоขтарұа؟). See on Lu 7:2 for discussion. Plural shows that Lysias the chiliarch took several hundred soldiers along (a centurion with each hundred).

Ran down ( $\kappa \alpha \tau \varepsilon \delta \rho \alpha \mu \varepsilon v$ ). Effective second aorist active indicative of $\kappa \alpha \tau \alpha \tau \rho \varepsilon \chi \omega$. From the tower of Antonia, vivid scene.

And they (o $\delta \varepsilon$ ). Demonstrative use of $o$. The Jewish mob who had begun the work of killing Paul (verse 31).

Left off beating Paul ( $\varepsilon \pi \alpha v \sigma \alpha v \tau 0 ~ \tau v \pi \tau о v \tau \varepsilon \varsigma ~ \tau o v ~ П a v \lambda о v) . ~ T h e ~ p a r t i c i p l e ~ w i t h ~ \pi \alpha v o \mu \alpha ~$ describes what they were already doing, the supplementary participle (Robertson, Grammar, p. 1121). They stopped before the job was over because of the sudden onset of the Roman soldiers. Some ten years before in a riot at the passover the Roman guard marched down and in the panic several hundred were trampled to death.

Acts 21:33
Came near ( $\varepsilon \gamma \gamma / \sigma \alpha \varsigma)$. First aorist active participle of $\varepsilon \gamma \gamma \zeta(\omega$, to draw near, Koine verb from $\varepsilon \gamma \gamma \cup \varsigma$, near, and common in the N.T.

Laid hold on him ( $\varepsilon \pi \varepsilon \lambda \alpha \beta \varepsilon \tau 0 \alpha \nu \tau 0 v)$. See same verb in verse 30.
To be bound ( $\delta \varepsilon \theta \eta \nu \alpha$ ). First aorist passive infinitive of $\delta \varepsilon \omega$ (see verse 11).
With two chains ( $\alpha \lambda \nu \sigma \varepsilon \sigma \delta \nu \sigma$ ). Instrumental case of $\alpha \lambda \nu \sigma \iota \varsigma$, old word from $\alpha$ privative and $\lambda \nu \omega$ (not loosing, i.e. chaining). With two chains as a violent and seditious person, probably leader of a band of assassins (verse 38). See on Mr 5:4 .

Inquired ( $\varepsilon \pi v v \theta a v \varepsilon \tau o)$. Imperfect middle of $\pi v v \theta a v o \mu a$, old and common verb used mainly by Luke in the N.T. Lysias repeated his inquiries.

Who he was ( $\tau \iota \varsigma \varepsilon ı \eta$ ). Present active optative of $\varepsilon \not \mu$ changed from $\varepsilon \sigma \tau \iota v$ (present indicative) in the indirect question, a change not obligatory after a past tense, but often done in the older Greek, rare in the N.T. (Robertson, Grammar, p. 1043f.).

And what he had done ( $\kappa \alpha \tau \varepsilon \sigma \tau \iota \nu \pi \varepsilon \pi о \imath \eta \kappa \omega \varsigma$ ). Periphrastic perfect active indicative of $\pi o \iota \varepsilon \omega$ here retained, not changed to the optative as is true of $\varepsilon ı \eta$ from $\varepsilon \sigma \tau \iota v$ in the same indirect question, illustrating well the freedom about it.

Acts 21:34
Some shouting one thing, some another ( $\alpha \lambda \lambda o \alpha \lambda \lambda o \tau \varepsilon \pi \varepsilon \varphi \omega v o v \nu$ ). Same idiom of $\alpha \lambda \lambda_{o} \alpha \lambda \lambda_{o}$ as in 19:32 which see. The imperfect of $\varepsilon \pi \iota \varphi \omega \nu \varepsilon \omega$, to call out to, suits well the idiom. This old verb occurs in the N.T. only in Luke and Acts (already in 12:22).

When he could not know ( $\mu \eta \delta \nu v a \mu \varepsilon v o v a v \tau o v \gamma \nu \omega \nu \alpha$ ). Genitive absolute of present middle participle of $\delta v v \alpha \mu \alpha$ with negative $\mu \eta$ and second aorist active infinitive of $\gamma \iota v \omega \sigma \kappa \omega$.

The certainty ( $\tau 0 \alpha \sigma \varphi \alpha \lambda \varepsilon \varsigma$ ). Neuter articular adjective from $\alpha$ privative and $\sigma \varphi \alpha \lambda \lambda \omega$, to make totter or fall. Old word, in the N.T. only in Ac 21:34; 22:30; 25:26; Php 3:1; Heb 6:19.

Into the castle ( $\varepsilon \iota \varsigma \tau \eta \nu \pi \alpha \rho \varepsilon \mu \beta$ o $\lambda \eta \nu$ ). Koine word from $\pi \alpha \rho \varepsilon \mu \beta \alpha \lambda \lambda \omega$, to cast in by the side of, to assign soldiers a place, to encamp (see on Lu 19:43). So $\pi \alpha \rho \varepsilon \mu \beta o \lambda \eta$ comes to mean an interpolation, then an army drawn up (Heb 11:34), but mainly an encampment (Heb 13:11,13 ), frequent in Polybius and LXX. So here barracks of the Roman soldiers in the tower of Antonia as in verse $37 ; 22: 24 ; 23: 10,16,32$.

Acts 21:35
Upon the stairs $(\varepsilon \pi \tau \operatorname{\tau os} \alpha v \alpha \beta \alpha \theta \mu o v \varsigma)$. From $\alpha v \alpha$, up, and $\beta \alpha \iota v \omega$, to go. Late word, in LXX and Koine writers. In the N.T. only here and verse 40.

So it was ( $\sigma v v \varepsilon \beta \eta$ ). Second aorist active of $\sigma \nu \mu \beta \alpha I v \omega$, to happen (see on 20:19) with infinitive clause as subject here as often in the old Greek.

He was borne ( $\beta a \sigma \tau \alpha \zeta \varepsilon \sigma \theta \alpha \alpha v \tau o v)$. Accusative of general reference with this subject infinitive, present passive of $\beta \alpha \sigma \tau \alpha \zeta \omega$, to take up with the hands, literally as here.

Violence ( $\beta \iota \alpha v$ ). See on Ac 5:26. Bı $\alpha \zeta \omega$, to use force, is from $\beta \iota \alpha$.
Acts 21:36
Followed after ( $\eta \kappa о \lambda о v \theta \varepsilon$ ). Imperfect active of $\alpha \kappa о \lambda v \theta \varepsilon \omega$, was following. Cheated of their purpose to lynch Paul, they were determined to have his blood.

Crying out ( $\kappa \rho \alpha \zeta о \nu \tau \varepsilon \varsigma)$. Construction according to sense, plural masculine participle agreeing with neuter singular substantive $\pi \lambda \eta \theta$ os (Robertson, Grammar, p. 401).

Away with him (Aıpe av $o v$ ). The very words used by the mob to Pilate when they chose Barabbas in preference to Jesus (Lu 23:18, Aıpe tovtov). He will hear it again from this same crowd (Ac 22:22). It is the present imperative ( $\alpha \iota \rho \varepsilon$ ) as in Lu 23:18, but some may have used the urgent aorist active imperative as also in the case of Jesus Joh 19:15, $\alpha \rho o v, a \rho o v$ with $\sigma \tau \alpha v \rho \omega \sigma o v$ added). Luke does not say that this mob demanded crucifixion
for Paul. He was learning what it was to share the sufferings of Christ as the sullen roar of the mob's yells rolled on and on in his ears.

Acts 21:37
May I say something unto thee? ( $\mathrm{E} \varepsilon \xi \varepsilon \sigma \tau \iota \nu \mu \mathrm{\varepsilon} \varepsilon \iota \varepsilon \varepsilon \iota \tau \pi \rho \circ \varsigma \sigma \varepsilon$ ?). On this use of $\varepsilon$ in a direct question see on 1:6. The calm self-control of Paul in the presence of this mob is amazing. His courteous request to Lysias was in Greek to the chiliarch's amazement.

Dost thou know Greek? (Hع $\lambda \lambda \eta \nu \iota \sigma \tau \quad \gamma \iota \nu \omega \sigma \kappa \varepsilon \iota \sigma$ ?). Old Greek adverb in - from $H \varepsilon \lambda \lambda \eta \nu \iota \zeta \omega$, meaning "in Greek." "Do you know it in Greek?" In the N.T. only here and Joh 19:20.

Art thou not then the Egyptian? (Ovк $\alpha \rho \alpha \sigma v \varepsilon$ о Aıүv $\tau \tau \iota \sigma$ ?). Expects the answer Yes and $\alpha \rho \alpha$ argues the matter (therefore). The well-known (o) Egyptian who had given the Romans so much trouble.

Stirred up to sedition ( $\alpha v \alpha \sigma \tau \alpha \tau \omega \sigma \alpha \varsigma$ ). First aorist active participle of $\alpha v \alpha \sigma \tau \alpha \tau o \omega$, a late verb from $\alpha v a \sigma \tau \alpha \tau o \varsigma$, outcast, and so to unsettle, to stir up, to excite, once known only in LXX and Ac 17:6 (which see); 21:38; Ga 5:12, but now found in several papyri examples with precisely this sense to upset.

Of the Assassins ( $\tau \omega \nu \sigma \iota \kappa \alpha \rho \omega \nu$ ). Latin word sicarius, one who carried a short sword $\sigma ı \chi \alpha$ under his cloak, a cutthroat. Josephus uses this very word for bands of robbers under this Egyptian (War II. 17,6 and 13,5; Ant. XX. 8,10). Josephus says that there were 30,000 who gathered on the Mount of Olives to see the walls of Jerusalem fall down and not merely 4,000 as Lysias does here. But Lysias may refer to the group that were armed thus (banditti) the core of the mob of 30,000 . Lysias at once saw by Paul's knowledge of Greek that he was not the famous Egyptian who led the Assassins and escaped himself when Felix attacked and slew the most of them.

Acts 21:39
I am $(\mathrm{E} \gamma \omega \mu \varepsilon \nu \varepsilon \iota \mu)$. In contrast with the wild guess of Lysias Paul uses $\mu \varepsilon \nu$ and $\delta \varepsilon$. He tells briefly who he is:
a Jew (Iovסaıoc) by race,
of Tarsus in Cilicia (Ta $\rho \sigma \varepsilon \cup \varsigma \tau\rceil \varsigma$ Kı $\lambda ı \kappa ı \alpha \varsigma)$ by country, belonging to Tarsus (this adjective Ta $\rho \sigma \varepsilon \cup \varsigma$ only here and Ac 9:11), and proud of it, one of the great cities of the empire with a great university.

A citizen of no mean city (ovк $\alpha \sigma \eta \mu \circ v \pi o \lambda \varepsilon \omega \varsigma \pi \sigma \lambda ı \tau\rceil \varsigma)$. Litotes again, "no mean" ( $\alpha \sigma \eta \mu \circ \varsigma$, old adjective, unmarked, a privative and $\sigma \eta \mu \alpha$, mark, insignificant, here only in the N.T.). This same litotes used by Euripides of Athens (Ion 8). But Paul calls himself a citizen ( $\pi 0 \lambda \iota \tau \eta \varsigma)$ of Tarsus. Note the "effective assonance" (Page) in $\pi \sigma \lambda \varepsilon \omega \varsigma \pi \sigma \lambda \iota \tau \eta \varsigma$. Paul now $(\delta \varepsilon)$ makes his request $(\delta \varepsilon o \mu \alpha)$ of Lysias.

Give me leave ( $\varepsilon \pi \iota \tau \rho \varepsilon \psi o v \mu 0$ ). First aorist active imperative of $\varepsilon \pi \iota \tau \rho \varepsilon \pi \omega$, old and common verb to turn to, to permit, to allow. It was a strange request and a daring one, to wish to speak to this mob howling for Paul's blood.

## Acts 21:40

When he had given him leave ( $\varepsilon \pi \iota \tau \rho \varepsilon \psi \alpha \nu \tau \circ \varsigma \alpha \cup \tau o v)$. Genitive absolute of aorist active participle of the same verb $\varepsilon \pi ı \tau \rho \varepsilon \pi \omega$.

Standing on the stairs ( $\varepsilon \sigma \tau \omega \varsigma \varepsilon \pi \tau \omega \nu \alpha v \alpha \beta \alpha \theta \mu \omega v$ ). Second perfect active participle of เซ $\tau \mu$, to place, but intransitive to stand. Dramatic scene. Paul had faced many audiences and crowds, but never one quite like this. Most men would have feared to speak, but not so Paul. He will speak about himself only as it gives him a chance to put Christ before this angry Jewish mob who look on Paul as a renegade Jew, a turncoat, a deserter, who went back on Gamaliel and all the traditions of his people, who not only turned from Judaism to Christianity, but who went after Gentiles and treated Gentiles as if they were on a par with Jews. Paul knows only too well what this mob thinks of him.

Beckoned with the hand ( $\kappa \alpha \tau \varepsilon \sigma \varepsilon เ \sigma \varepsilon \tau \eta \chi \varepsilon เ \rho$ ). He shook down to the multitude with the hand (instrumental case $\chi \varepsilon เ \rho$ ), while Alexander, Luke says ( 19:33), "shook down the hand" (accusative with the same verb, which see). In 26:1 Paul reached out the hand (єктєvvac $\tau \eta \nu \chi \varepsilon \rho \alpha)$.

When there was made a great silence ( $\pi \mathrm{o} \lambda \lambda \eta \varsigma \sigma \tau \eta \eta \varsigma \varepsilon \varepsilon v o \mu \varepsilon \nu \eta \varsigma)$. Genitive absolute again with second aorist middle participle of $\gamma / v o \mu \alpha$, "much silence having come." Paul waited till silence had come.

In the Hebrew language ( $\tau \eta \mathrm{E} \beta \rho \alpha\llcorner\delta \delta \iota \alpha \lambda \varepsilon \kappa \tau \omega$ ). The Aramaean which the people in Jerusalem knew better than the Greek. Paul could use either tongue at will. His enemies had said in Corinth that "his bodily presence was weak and his speech contemptible" (2Co 10:10 ). But surely even they would have to admit that Paul's stature and words reach heroic proportions on this occasion. Self-possessed with majestic poise Paul faces the outraged mob beneath the stairs.

## Acts 22

Acts 22:1
Brethren and fathers ( $\mathrm{A} \nu \delta \rho \varepsilon \varsigma \alpha \delta \varepsilon \lambda \varphi о к \alpha \pi \alpha \tau \varepsilon \rho \varepsilon \varsigma)$ Men, brethren, and fathers. The very language used by Stephen (7:2) when arraigned before the Sanhedrin with Paul then present. Now Paul faces a Jewish mob on the same charges brought against Stephen. These words are those of courtesy and dignity (amoris et honoris nomina, Page). These men were Paul's brother Jews and were (many of them) official representatives of the people (Sanhedrists, priests, rabbis). Paul's purpose is conciliatory, he employs "his ready tact" (Rackham).

The defence which I now make unto you ( $\mu \circ v \tau \eta \varsigma \pi \rho \circ \varsigma v \mu \alpha \varsigma v v \nu \alpha \pi о \lambda о \gamma \iota \varsigma)$. Literally, My defence to you at this time. Nvv is a sharpened form (by -) of $v v v$ (now), just now. The term $\alpha \pi о \lambda о \gamma \iota \alpha$ (apology) is not our use of the word for apologizing for an offence, but the original sense of defence for his conduct, his life. It is an old word from $\alpha \pi \sigma \lambda о \gamma \varepsilon o \mu \alpha$, to talk oneself off a charge, to make defence. It occurs also in Ac 25:16 and then also in 1Co 9:3; 2Co 7:11; Php 1:7,16; 2Ti 4:16; 1Pe 3:15. Paul uses it again in Ac 25:16 as here about his defence against the charges made by the Jews from Asia. He is suspected of being a renegade from the Mosaic law and charged with specific acts connected with the alleged profanation of the temple. So Paul speaks in Aramaic and recites the actual facts connected with his change from Judaism to Christianity. The facts make the strongest argument. He first recounts the well-known story of his zeal for Judaism in the persecution of the Christians and shows why the change came. Then he gives a summary of his work among the Gentiles and why he came to Jerusalem this time. He answers the charge of enmity to the people and the law and of desecration of the temple. It is a speech of great skill and force, delivered under remarkable conditions. The one in chapter Ac 26 covers some of the same ground, but for a slightly different purpose as we shall see. For a discussion of the three reports in Acts of Paul's conversion see chapter Ac 9 . Luke has not been careful to make every detail correspond, though there is essential agreement in all three.

Acts 22:2
He spake ( $\pi \rho o \sigma \varepsilon \varphi \omega v \varepsilon$ ). Imperfect active, was speaking. See aorist active $\pi \rho \sigma \sigma \varepsilon \varphi \omega v \eta \sigma \varepsilon v$ in 21:40.

They were the more quiet ( $\mu \alpha \lambda \lambda o v \pi \alpha \rho \varepsilon \sigma \chi o v \eta \sigma \nu \chi \iota \alpha \nu$ ). Literally, The more ( $\mu \alpha \lambda \lambda o v$ ) they furnished or supplied (second aorist active indicative of $\pi \alpha \rho \varepsilon \chi \omega$ ) quietness ( $\eta \sigma \cup \chi \iota \alpha \nu$, old word, in the N.T. only here and 2Th 3:12; 1Ti 2:11ff. ). Precisely this idiom occurs in Plutarch (Cor. 18) and the LXX (Job 34:29). Knowling notes the fondness of Luke for words of silence ( $\sigma \iota \gamma \eta, \sigma \iota \gamma \alpha \omega, \eta \sigma v \chi \alpha \zeta \omega)$ as in Lu 14:4; 15:26; Ac 11:18; 12:17; 15:12; 21:14,40. It is a vivid picture of the sudden hush that swept over the vast mob under the spell of the Aramaic. They would have understood Paul's Koine Greek, but they much preferred the Aramaic. It was a masterstroke.

Acts 22:3
I am a Jew ( $\mathrm{E} \gamma \omega \varepsilon \notin \alpha \nu \eta \rho \operatorname{Iov} \delta \alpha \iota \varsigma)$. Note use of $\mathrm{E} \gamma \omega$ for emphasis. Paul recounts his Jewish advantages or privileges with manifest pride as in Ac 26:4f.; 2Co 11:22; Ga 1:14; Php 3:4-7.

Born ( $\gamma \varepsilon \gamma \varepsilon \nu \nu \eta \mu \varepsilon \nu o \varsigma)$. Perfect passive participle of $\gamma \varepsilon \nu \nu \alpha \omega$. See above in 21:39 for the claim of Tarsus as his birth-place. He was a Hellenistic Jew, not an Aramaean Jew (cf. Ac 6:1).

Brought up ( $\alpha v \alpha \tau \varepsilon \theta \rho \alpha \mu \mu \varepsilon \nu o \varsigma)$. Perfect passive participle again of $\alpha v \alpha \tau \rho \varepsilon \varphi \omega$, to nurse up, to nourish up, common old verb, but in the N.T. only here, 7:20ff. , and MSS. in Lu 4:16 . The implication is that Paul was sent to Jerusalem while still young, "from my youth" ( 26:4), how young we do not know, possibly thirteen or fourteen years old. He apparently had not seen Jesus in the flesh (2Co 5:16).

At the feet of Gamaliel ( $\pi \rho \circ \varsigma \tau о \cup \varsigma \pi о \delta a \varsigma \Gamma \alpha \mu \alpha \lambda ı \eta \lambda$ ). The rabbis usually sat on a raised seat with the pupils in a circle around either on lower seats or on the ground. Paul was thus nourished in Pharisaic Judaism as interpreted by Gamaliel, one of the lights of Judaism. For remarks on Gamaliel see chapter 5:34f. . He was one of the seven Rabbis to whom the Jews gave the highest title P $\alpha \beta \beta \alpha v$ (our Rabbi). P $\alpha \beta \beta$ (my teacher) was next, the lowest being P $\alpha \beta$ (teacher). "As Aquinas among the schoolmen was called Doctor Angelicus, and Bonaventura Doctor Seraphicus, so Gamaliel was called the Beauty of the Law" (Conybeare and Howson).

Instructed ( $\pi \varepsilon \pi \alpha \iota \delta \varepsilon v \mu \varepsilon \nu \circ \varsigma)$. Perfect passive participle again (each participle beginning a clause), this time of $\pi \alpha \iota \delta \varepsilon v \omega$, old verb to train a child ( $\pi \alpha \iota \varsigma$ ) as in 7:22 which see. In this sense also in 1Ti 1:20; Tit 2:12. Then to chastise as in Lu 23:16,22 (which see); 2Ti 2:25; Heb 12:6f.

According to the strict manner ( $\kappa \alpha \tau \alpha ~ \alpha к \rho ı \beta \varepsilon ı \alpha v) . ~ O l d ~ w o r d, ~ o n l y ~ h e r e ~ i n ~ N . T . ~ M a t h-~$ ematical accuracy, minute exactness as seen in the adjective in 26:5. See also Ro 10:2; Gal 1:4; Php 3:4-7.

Of our fathers ( $\pi \alpha \tau \rho \omega \iota \circ$ ). Old adjective from $\pi \alpha \tau \varepsilon \rho$, only here and 24:14 in N.T. Means descending from father to son, especially property and other inherited privileges. Патрıкоऽ (patrician) refers more to personal attributes and affiliations.

Being zealous for God ( $\zeta \eta \lambda \omega \tau \eta \varsigma v \pi \alpha \rho \chi \omega \nu \tau 0 v \theta \varepsilon \sigma v)$. Not adjective, but substantive
zealot (same word used by James of the thousands of Jewish Christians in Jerusalem, 21:20 which see) with objective genitive $\tau o v \theta \varepsilon o v$ (for God). See also verse $14 ; 28: 17 ; 2 \mathrm{Ti} 1: 3$ where he makes a similar claim. So did Peter (Ac 3:13; 5:30) and Stephen (7:32). Paul definitely claims, whatever freedom he demanded for Gentile Christians, to be personally "a zealot for God" "even as ye all are this day" ( $\kappa \alpha \omega \varsigma \pi \alpha v \tau \varepsilon \varsigma \nu \mu \varepsilon \iota \varsigma \varepsilon \sigma \tau \varepsilon \sigma \eta \mu \varepsilon \rho о \nu)$. In his conciliation he went to the limit and puts himself by the side of the mob in their zeal for the law, mistaken as they were about him. He was generous surely to interpret their fanatical
frenzy as zeal for God. But Paul is sincere as he proceeds to show by appeal to his own conduct.

Acts 22:4
And I (os).
I who , literally.
This Way ( $\tau \alpha v \tau \eta v \tau \eta v$ o oov). The very term used for Christianity by Luke concerning Paul's persecution (9:2), which see. Here it "avoids any irritating name for the Christian body" (Furneaux) by using this Jewish terminology.

Unto the death ( $\alpha \chi \rho$ Өavatov). Unto death, actual death of many as 26:10 shows.
Both men and women ( $\alpha v \delta \rho \alpha \varsigma \tau \varepsilon \kappa \alpha ~ \gamma \cup v a i \kappa \alpha \varsigma)$. Paul felt ashamed of this fact and it was undoubtedly in his mind when he pictured his former state as "a blasphemer, and a persecutor, and injurious (1Ti 1:13), the first of sinners" (1Ti 1:15). But it showed the lengths to which Paul went in his zeal for Judaism.

Acts 22:5
Doth bear me witness ( $\mu \alpha \rho \tau v \rho \varepsilon \mu 0$ ). Present active indicative as if still living. Caiaphas was no longer high priest now, for Ananias is at this time ( $23: 2$ ), though he may be still alive.

All the estate of the elders ( $\pi \alpha \nu$ to $\pi \rho \varepsilon \sigma \beta \nu \tau \varepsilon \rho \circ o v$ ). All the eldership or the Sanhedrin ( $4: 5$ ) of which Paul was probably then a member ( $26: 10$ ). Possibly some of those present were members of the Sanhedrin then (some 20 odd years ago).

From whom ( $\pi \alpha \rho^{\prime} \omega v$ ). The high priest and the Sanhedrin.
Letters unto the brethren ( $\varepsilon \pi \iota \sigma \tau \alpha \lambda \alpha \varsigma \pi \rho \circ \varsigma \tau 0 \cup \varsigma \alpha \delta \varepsilon \lambda \varphi 0 \cup \varsigma$ ). Paul still can tactfully call the Jews his "brothers" as he did in Ro 9:3. There is no bitterness in his heart.

Journeyed ( $\varepsilon \pi о \rho \varepsilon v о \mu \eta \nu$ ). Imperfect middle indicative of $\pi о \rho \varepsilon v o \mu \alpha$, and a vivid reality to Paul still as he was going on towards Damascus.

To bring also ( $\alpha \xi \omega \nu \kappa \alpha$ ). Future active participle of $\alpha \gamma \omega$, to express purpose, one of the few N.T. examples of this classic idiom (Robertson, Grammar, p. 1118).

Them which were there ( $\tau 0 \cup \varsigma \varepsilon \kappa \varepsilon เ \sigma \varepsilon ~ o v \tau \alpha \varsigma) . ~ C o n s t r u c t i o ~ p r a e g n a n s . ~ T h e ~ u s u a l ~ w o r d ~$ would be $\varepsilon \kappa \varepsilon$ (there), not $\varepsilon \kappa \varepsilon เ \sigma \varepsilon$ (thither). Possibly the Christians who had fled to Damascus, and so were there (Robertson, Grammar, p. 548).

In bonds ( $\delta \varepsilon \delta \varepsilon \mu \varepsilon$ vouc). Perfect passive participle of $\delta \varepsilon \omega$, predicate position, "bound."
For to be punished ( $\mathrm{tv} \alpha \tau \downarrow \mu \omega \rho \eta \theta \omega \sigma เ v$ ). First aorist passive subjunctive of $\tau \mu \mu \omega \rho \varepsilon \omega$, old verb to avenge, to take vengeance on. In the N.T. only here, and 26:11. Pure final clause with iva. He carried his persecution outside of Palestine just as later he carried the gospel over the Roman empire.

Acts 22:6
And it came to pass ( $\varepsilon \gamma \varepsilon v \varepsilon \tau \frac{1}{} \delta \varepsilon$ ). Rather than the common $\kappa \alpha \varepsilon \gamma \varepsilon v \varepsilon \tau 0$ and with the infinitive ( $\pi \varepsilon \rho \iota a \sigma \tau \rho \alpha \psi \alpha$ ), one of the three constructions with ка ( $\delta \varepsilon$ ) $\varepsilon \gamma \varepsilon v \varepsilon \tau \sigma$ by Luke
(Robertson, Grammar, pp. 1042f.), followed by кa, by finite verb, by subject infinitive as here.

As I made my journey ( $\mu \mathrm{o} \pi о \rho \varepsilon v o \mu \varepsilon v \omega$ ). To me (dative after $\varepsilon \gamma \varepsilon v \varepsilon \tau \sigma$, happened to me ) journeying (participle agreeing with $\mu \mathrm{o}$ ). See this same idiom in verse 17. Luke uses $\varepsilon \gamma \varepsilon v \varepsilon$ to $\delta \varepsilon$ seventeen times in the gospel and twenty-one in the Acts.

Unto Damascus ( $\tau \eta \Delta \alpha \mu \alpha \sigma \kappa \omega$ ). Dative after $\varepsilon \gamma \gamma \zeta \zeta_{0} \tau \tau$ (drawing nigh to).
About noon ( $\pi \varepsilon \rho \mu \varepsilon \sigma \eta \mu \beta \rho \iota \alpha v$ ). Mid ( $\mu \varepsilon \sigma \sigma \varsigma)$ day ( $\eta \mu \varepsilon \rho \alpha$ ), old word, in the N.T. only here and 8:26 which see where it may mean "toward the south." An item not in ch. 9 .

Shone round about me ( $\pi \varepsilon \rho \iota \alpha \sigma \tau \rho \alpha \psi \alpha \pi \varepsilon \rho \varepsilon \mu \varepsilon$ ). First aorist active infinitive of $\pi \varepsilon \rho \iota a \sigma \tau \rho \alpha \pi \tau \omega$, to flash around, in LXX and late Greek, in the N.T. only here and 9:3 which see. Note repetition of $\pi \varepsilon \rho$.

A great light ( $\varphi \omega \varsigma$ ıкаvоv). Luke's favourite word ıкаvov (considerable). Accusative of general reference with the infinitive.

Acts 22:7
I fell ( $\varepsilon \pi \varepsilon \sigma \alpha)$. Second aorist active indicative with $-\alpha$ rather than $\varepsilon \pi \varepsilon \sigma o v$, the usual form of $\pi \wedge \pi \tau \omega$.

Unto the ground ( $\varepsilon \varsigma \varsigma ~ \tau o ~ \varepsilon \delta \alpha \varphi o \varsigma) . ~ O l d ~ w o r d, ~ h e r e ~ a l o n e ~ i n ~ N . T . ~ S o ~ t h e ~ v e r b ~ \varepsilon \delta \alpha \varphi ı \zeta \omega, ~$ is in Lu 19:44 alone in the N.T.

A voice saying ( $\varphi \omega \nu \eta \varsigma \lambda \varepsilon \gamma \circ \sigma \sigma \eta \varsigma)$. Genitive after $\eta \kappa \sigma \sim \sigma \alpha$, though in 26:14 the accusative is used after $\eta \kappa о \cup \sigma \alpha$, as in 22:14 after aкоиба, either being allowable. See on 9:7 for discussion of the difference in case. Saul's name repeated each time (9:4; 22:7; 26:14 ). Same question also in each report: "Why persecuted thou me?" (T $\mu \varepsilon \delta \iota \omega \kappa \varepsilon \iota \sigma$ ?). These piercing words stuck in Paul's mind.

Acts 22:8
Of Nazareth (o $\mathrm{N} \alpha \zeta \omega \rho \alpha \boldsymbol{\sigma}$ ). The Nazarene, not in 9:5; 26:15 and here because Jesus is mentioned now for the first time in the address. The form $\mathrm{Na} \zeta \omega \rho \alpha{ }^{\circ} \mathrm{o}$ as in Mt 2:23 (which see) is used also in 24:5 for the followers of Jesus instead of Naऍap $\boldsymbol{\nu}$ vos as in $\mathrm{Mr} 1: 24$, etc. (which see).

Acts 22:9
But they heard not the voice ( $\tau \eta v \delta \varepsilon \varphi \omega v \eta \nu$ оик $\eta \kappa о v \sigma \alpha v$ ). The accusative here may be used rather than the genitive as in verse 7 to indicate that those with Paul did not understand what they heard ( $9: 7$ ) just as they beheld the light ( $22: 9$ ), but did not see Jesus ( $9: 7$ ). The difference in cases allows this distinction, though it is not always observed as just noticed about 22:14; 26:14. The verb akov $\omega$ is used in the sense of understand (Mr 4:33; 1Co 14:2 ). It is one of the evidences of the genuineness of this report of Paul's speech that Luke did not try to smooth out apparent discrepancies in details between the words of Paul and his own record already in ch. 9. The Textus Receptus adds in this verse: "And they became afraid" (ка є $\mu \varphi$ оßо $\varepsilon \gamma \varepsilon v o v \tau о)$. Clearly not genuine.

Acts 22:10
Into Damascus ( $\varepsilon \iota \varsigma \Delta \alpha \mu \alpha \sigma \kappa \circ \nu)$. In 9:6 simply "into the city" ( $\varepsilon \iota \varsigma \tau \eta \nu \pi \circ \lambda \iota \nu$ ).
Of all things which ( $\pi \varepsilon \rho \pi \alpha \nu \tau \omega \nu \omega \nu$ ). H $\omega v$, relative plural attracted to genitive of antecedent from accusative $\alpha$, object of $\pi$ oı $\eta \alpha \alpha$ (do).

Are appointed for thee ( $\tau \varepsilon \tau \alpha \kappa \tau \alpha \sigma o$ ). Perfect passive indicative of $\tau \alpha \sigma \sigma \omega$, to appoint, to order, with dative $\sigma 0$. Compare with o $\sigma \varepsilon \delta \varepsilon$ of 9:6. The words were spoken to Paul, of course, in the Aramaic, Saoul, Saoul.

Acts 22:11
I could not see (ovk $\varepsilon v \varepsilon \beta \lambda \varepsilon \pi \sigma v$ ). Imperfect active of $\varepsilon \mu \beta \lambda \varepsilon \pi \omega$, I was not seeing, same fact stated in 9:8. Here the reason as "for the glory of that light" ( $\alpha \pi \sigma \tau \eta \varsigma \delta o \xi \eta \varsigma \tau 0 v \varphi \omega \tau$ єкєıvov).

Being led by the hand ( $\chi \varepsilon \iota \rho \alpha \gamma \omega \gamma \sigma \nu \mu \varepsilon \nu \circ \varsigma)$. Present passive participle of $\chi \varepsilon \iota \rho \alpha \gamma \omega \gamma \varepsilon \omega$, the same verb used in 9:8 ( $\chi \varepsilon \iota \rho a \gamma \omega \gamma 00 v \tau \varepsilon \varsigma)$ which see. Late verb, in the N.T. only in these two places. In LXX.

## Acts 22:12

A devout man according to the law ( $\varepsilon v \lambda \alpha \beta \eta \varsigma \kappa \alpha \tau \alpha$ $\tau \nu v$ vo $\mu \circ v$ ). See on 2:5; 8:2; $\mathrm{Lu} 2: 25$ for the adjective $\varepsilon v \lambda \alpha \beta \eta \varsigma$. Paul adds "according to the law" to show that he was introduced to Christianity by a devout Jew and no law-breaker (Lewin).

Acts 22:13
I looked up on him ( $\alpha \nu \alpha \beta \lambda \varepsilon \psi \alpha \varepsilon \iota \varsigma \alpha \cup \tau o v$ ). First aorist active indicative and same word as $\alpha \nu \alpha \beta \lambda \varepsilon \psi o v$ (Receive thy sight). Hence here the verb means as the margin of the Revised Version has it: "I received my sight and looked upon him." For "look up" see Joh 9:11.

Acts 22:14
Hath appointed thee ( $\pi \rho \circ \varepsilon \chi \varepsilon \iota \rho \iota \sigma \alpha \tau o$ ). First aorist middle indicative of $\pi \rho \circ \chi \varepsilon \iota \rho \iota \zeta \omega$, old verb to put forth into one's hands, to take into one's hands beforehand, to plan, propose, determine. In the N.T. only in Ac 3:20; 22:14; 26:16. Three infinitives after this verb of God's purpose about Paul:
to know ( $\gamma \nu \omega v \alpha$, second aorist active of $\gamma \iota v \omega \sigma \kappa \omega$ ) his will,
to see ( $1 \delta \varepsilon \iota \nu$, second aorist active of opa $\omega$ ) the Righteous One (cf. 3:14),
to hear ( $\alpha \kappa \sigma \sigma \sigma$, first aorist active of $\alpha \kappa \sigma v \omega$ ) a voice from his mouth.
Acts 22:15
A witness for him ( $\mu \alpha \rho \tau \nu \varsigma ~ \alpha v \tau \omega$ ). As in 1:8.
Of what $(\omega v)$. Attraction of the accusative relative $\alpha$ to the genitive case of the unexpressed antecedent $\tau 0 v \tau \omega \nu$.

Thou hast seen and heard ( $\varepsilon \omega \rho \alpha \kappa \alpha \varsigma$, present perfect active indicative ка $\eta \kappa о v \sigma \alpha \varsigma$, first aorist active indicative). This subtle change of tense is not preserved in the English. Blass properly cites the perfect $\varepsilon \omega$ рака in 1Co 9:1 as proof of Paul's enduring qualification for the apostleship.

Acts 22:16
By baptized ( $\beta a \pi \tau \iota \sigma \alpha$ ). First aorist middle (causative), not passive, Get thyself baptized (Robertson, Grammar, p. 808). Cf. 1Co 10:2 . Submit yourself to baptism. So as to a $\quad$ (o入ov $\sigma \alpha$, Get washed off as in 1Co 6:11. It is possible, as in 2:38, to take these words as teaching baptismal remission or salvation by means of baptism, but to do so is in my opinion a complete subversion of Paul's vivid and picturesque language. As in Ro 6:4-6 where baptism is the picture of death, burial and resurrection, so here baptism pictures the change that had already taken place when Paul surrendered to Jesus on the way (verse 10). Baptism here pictures the washing away of sins by the blood of Christ.

Acts 22:17
When I had returned ( $\mu$ о v $о \sigma \tau \rho \varepsilon \psi \alpha v \tau$ ),
while I prayed ( $\pi \rho \circ \sigma \varepsilon v \chi \circ \mu \varepsilon v o v \mu \circ v$ ),
I fell ( $\gamma \varepsilon v \varepsilon \sigma \theta a \mu \varepsilon$ ). Note dative $\mu$ o with $\varepsilon \gamma \varepsilon v \varepsilon \tau$ a as in verse 6, genitive $\mu 0 v$ (genitive absolute with $\pi \rho \circ \sigma \varepsilon v \chi \circ \mu \varepsilon v o v)$, accusative of general reference $\mu \varepsilon$ with $\gamma \varepsilon v \varepsilon \sigma \theta a$, and with no effort at uniformity, precisely as in 15:22,23 which see. The participle is especially liable to such examples of anacolutha (Robertson, Grammar, p. 439).

Acts 22:18
Saw him saying (ı $\delta \varepsilon \iota v ~ a v \tau o v \lambda \varepsilon \gamma o v \tau \alpha$ ). The first visit after his conversion when they tried to kill him in Jerusalem (9:29).

Because ( $\delta \iota \tau \tau, \delta \iota \alpha$ and $0 \tau$ ),
for that .
Acts 22:19
Imprisoned and beat ( $\eta \mu \eta \nu \varphi \nu \lambda \alpha \kappa \iota \zeta \omega \nu \kappa \alpha \delta \varepsilon \rho \omega \nu$ ). Periphrastic imperfect active of $\varphi \cup \lambda \alpha \kappa ı \zeta \omega$ (LXX and late Koine, here alone in the N.T.) and $\delta \varepsilon \rho \omega$ (old verb to skin, to beat as in Mt 21:35 which see).

In every synagogue ( $\kappa \alpha \tau \alpha \tau \alpha \varsigma ~ \sigma v v \alpha \gamma о \gamma \alpha \varsigma)$. Up and down ( $\kappa \alpha \tau \alpha$ ) in the synagogues.
Acts 22:20
Was shed ( $\varepsilon \xi \varepsilon \chi \cup v \nu \varepsilon \tau 0)$. Imperfect passive of $\varepsilon \kappa \chi \cup \nu \nu \omega$ (see on Mt 23:35), was being shed.

Witness ( $\mu \alpha \rho \tau v \rho о \varsigma)$. And "martyr" also as in Re 2:13; 17:6. Transition state for the word here.

I also was standing by ( $\kappa \alpha \alpha v \tau о \varsigma ~ \eta \mu \eta \nu \varepsilon \varphi \varepsilon \sigma \tau \omega \varsigma)$. Periphrastic second past perfect in form, but imperfect (linear) in sense since $\varepsilon \sigma \tau \omega \sigma=\iota \sigma \tau \alpha \mu \varepsilon \nu \circ \varsigma$ (intransitive).

Consenting ( $\sigma v v \varepsilon v \delta o \kappa \omega v$ ). The very word used by Luke in Ac 8:1 about Paul. Koine word for being pleased at the same time with (cf. Lu 11:48). Paul adds here the item of "guarding the clothes of those who were slaying ( $\alpha v \alpha \iota \rho o v \tau \tau \nu$ as in Lu 23:32; Ac 12:2 ) him" (Stephen). Paul recalls the very words of protest used by him to Jesus. He did not like the
idea of running away to save his own life right where he had helped slay Stephen. He is getting on dangerous ground.

Acts 22:21
I will send thee forth far hence unto the Gentiles ( $\mathrm{E} \gamma \omega \varepsilon \iota \varsigma \varepsilon \forall \eta \eta \mu \alpha \kappa \rho \alpha v \varepsilon \xi \alpha \pi о \sigma \tau \varepsilon \lambda \omega$ $\sigma \varepsilon$ ). Future active of the double ( $\varepsilon \xi$, out, $\alpha \pi o$, off or away) compound of $\varepsilon \xi \alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$, common word in the Koine (cf. Lu 24:49). This is a repetition by Jesus of the call given in Damascus through Ananias (9:15). Paul had up till now avoided the word Gentiles, but at last it had to come, "the fatal word" (Farrar).

Acts 22:22
They gave him audience ( $\eta$ коvov). Imperfect active, they kept on listening, at least with respectful attention.

Unto this word ( $a \chi \rho$ $\tau 0 v \tau 0 v$ zov $\lambda o \gamma o v$ ). But "this word" was like a spark in a powder magazine or a torch to an oil tank. The explosion of pent-up indignation broke out instantly worse than at first (21:30).
 the cry with the very words in 21:36, but with "from the earth" for vehemence.

For it is not fit (ov $\gamma \alpha \rho \kappa \alpha \theta \eta \kappa \varepsilon v$ ). Imperfect active of $\kappa \alpha \theta \eta \kappa \omega$, old verb to come down to, to become, to fit. In the N.T. only here and Ro 1:28. The imperfect is a neat Greek idiom for impatience about an obligation: It was not fitting, he ought to have been put to death long ago. The obligation is conceived as not lived up to like our "ought" (past of owe). See Robertson, Grammar, p. 886.

Acts 22:23
As they cried out ( $\kappa \rho \alpha v \gamma \alpha \zeta о \nu \tau \omega \nu \alpha \nu \tau \omega \nu$ ). Genitive absolute with present active participle of $\kappa \rho \alpha v \gamma \alpha \zeta \omega$, a rare word in the old Greek from $\kappa \rho \alpha v \gamma \eta$ (a cry). See on Mt 12:19. Two other genitive absolutes here, $\rho \iota \pi \tau o u v \tau \omega \nu$ (throwing off, present active participle, frequent active variation of $\rho \iota \pi \tau \omega$ ) and $\beta \alpha \lambda \lambda o v \tau \omega \nu$ (present active participle of $\beta \alpha \lambda \lambda \omega$, flinging). These present participles give a lively picture of the uncontrolled excitement of the mob in their spasm of wild rage.

Acts 22:24
That he be examined by scourging ( $\mu \alpha \sigma \tau \iota \xi \iota v \alpha \nu \varepsilon \tau \alpha \zeta \varepsilon \sigma \theta \alpha \alpha \nu \tau \sigma v$ ). The present passive
 in the old Greek (which used $\varepsilon \xi \varepsilon \tau \alpha \zeta \omega$ as in Mt 2:8), first in the LXX, in the N.T. only here and verse 29, but Milligan and Moulton's Vocabulary quotes an Oxyrhynchus papyrus of A.D. 127 which has a prefect using the word directing government clerks to "examine" (av\&тaکદıv) documents and glue them together into volumes ( $\tau 0 \mu 0$ ). The word was evidently in use for such purposes. It was a kind of "third degree" applied to Paul by the use of scourges ( $\mu \alpha \sigma \tau \iota \xi \imath v)$, instrumental plural of $\mu \alpha \sigma \tau \imath \xi$, old word for whip, as in Heb 11:36. But this way
of beginning an inquiry by torture (inquisition) was contrary to Roman law (Page): Non esse a tormentis incipiendum, Divus Augustus statuit.

That he might know ( $\iota v \alpha \varepsilon \pi \iota \gamma \nu \omega$ ). Final clause with $\iota v \alpha$ and second aorist active subjunctive of $\varepsilon \pi \iota \gamma \nu \omega \sigma \kappa \omega$ (full knowledge). Lysias was as much in the dark as ever, for Paul's speech had been in Aramaic and this second explosion was a mystery to him like the first.

They so shouted (ov $\sigma \circ \varsigma \pi \varepsilon \varphi \omega v o v v$ ). Imperfect active progressive imperfect had been so shouting.

Acts 22:25
When they had tied him up ( $о \varsigma \pi \rho о \varepsilon \tau \varepsilon เ v \alpha \nu \alpha v \tau o v$ ). First aorist active indicative of $\pi \rho о \tau \varepsilon เ \nu \omega$, old verb to stretch forward, only here in the N.T. Literally, "When they stretched him forward."

With the thongs ( $\tau \circ \iota \varsigma ~ \iota \alpha \sigma \iota v)$. If the instrumental case of $\tau \mu \alpha$, old word for strap or thong (for sandals as Mr 1:7, or for binding criminals as here), then Paul was bent forward and tied by the thongs to a post in front to expose his back the better to the scourges. But тoıৎ $\mu \alpha \sigma \iota v$ may be dative case and then it would mean "for the lashes." In either case it is a dreadful scene of terrorizing by the chiliarch.

Unto the centurion that stood by ( $\pi \rho \circ \varsigma \tau \sigma \nu \varepsilon \sigma \tau \omega \tau \alpha \varepsilon \kappa \alpha \tau \sigma \nu \tau \alpha \rho \chi \circ v$ ). He was simply carrying out the orders of the chiliarch (cf. Mt 27:54 ). Why had not Paul made protest before this?

Is it lawful? ( $\varepsilon \varepsilon \xi \varepsilon \sigma \tau \iota v$ ?). This use of $\varepsilon$ in indirect questions we have had before ( $1: 6$ ).
A Roman and uncondemned (Роцаıо ка акатакрıтоv). Just as in 16:37 which see. Blass says of Paul's question: Interrogatio subironica est confidentiae plena.

Acts 22:26
What art thou about to do? ( $\mathrm{T} \mu \varepsilon \lambda \lambda \varepsilon \iota \varsigma \pi o \iota \varepsilon \iota v ?$ ). On the point of doing, sharp warning.
Acts 22:27
Art thou a Roman? ( $\Sigma v$ Po $\mu \alpha \iota \varsigma \varepsilon \iota ?$ ).
Thou (emphatic position) a Roman? It was unbelievable.
Acts 22:28
With a great sum ( $\pi о \lambda \lambda о v \kappa \varepsilon \varphi \alpha \lambda \alpha \iota v)$. The use of $\kappa \varepsilon \varphi \alpha \lambda \alpha \iota o v$ (from $\kappa \varepsilon \varphi \alpha \lambda \eta$, head) for sums of money (principal as distinct from interest) is old and frequent in the papyri. Our word capital is from $\chi \propto \pi v \tau$ (head). The genitive is used here according to rule for price. "The sale of the Roman citizenship was resorted to by the emperors as a means of filling the exchequer, much as James I. made baronets" (Page). Dio Cassius (LX., 17) tells about Messalina the wife of Claudius selling Roman citizenship. Lysias was probably a Greek and so had to buy his citizenship.

But I am a Roman born (E $\gamma \omega \delta \varepsilon \kappa \alpha \gamma \varepsilon \gamma \varepsilon \nu \nu \eta \mu \alpha$ ). Perfect passive indicative of $\gamma \varepsilon \nu \nu \alpha \omega$. The word "Roman" not in the Greek. Literally, "But I have been even born one," (i.e. born a Roman citizen). There is calm and simple dignity in this reply and pardonable pride. Being
a citizen of Tarsus (21:39) did not make Paul a Roman citizen. Tarsus was an urbs libera, not a colonia like Philippi. Some one of his ancestors (father, grandfather) obtained it perhaps as a reward for distinguished service. Paul's family was of good social position. "He was educated by the greatest of the Rabbis; he was at an early age entrusted by the Jewish authorities with an important commission; his nephew could gain ready access to the Roman tribune; he was treated as a person of consequence by Felix, Festus, Agrippa, and Julius" (Furneaux).

Acts 22:29
Departed from him ( $\left.\alpha \pi \varepsilon \sigma \tau \eta \sigma \alpha v \alpha \pi^{\prime} \alpha v \tau o v\right)$. Second aorist active indicative (intransitive) of $\alpha \varphi เ \sigma \tau \eta \mu$, stood off from him at once.

Was afraid $(\varepsilon \varphi \rho \beta \eta \theta \eta)$. Ingressive aorist passive indicative of $\varphi o \beta \varepsilon o \mu \alpha$, became afraid. He had reason to be.

That he was a Roman ( $\circ \tau$ Po $\mu \alpha \iota \varsigma \varepsilon \sigma \tau \iota v$ ). Indirect assertion with tense of $\varepsilon \sigma \tau \iota v$ retained.
Because he had bound him ( $\circ \tau \alpha v \tau \circ \nu \eta \nu \delta \varepsilon \delta \varepsilon \kappa \omega \varsigma$ ). Causal o $\tau$ here after declarative $o \tau$ just before. Periphrastic past perfect active of $\delta \varepsilon \omega$, to bind.

Acts 22:30
To know the certainty ( $\gamma \nu \omega v \alpha$ то $\alpha \sigma \varphi \alpha \lambda \varepsilon \varsigma)$. Same idiom in 21:34 which see.
Wherefore he was accused ( $\tau о \tau \kappa \alpha \tau \varepsilon \gamma о \rho \varepsilon ı \tau \alpha$ ). Epexegetical after to $\alpha \sigma \varphi \alpha \lambda \varepsilon \varsigma$. Note article (accusative case) with the indirect question here as in Lu 22:1,23,24 (which see), a neat idiom in the Greek.

Commanded ( $\varepsilon \kappa \varepsilon \lambda \varepsilon v \sigma \varepsilon v)$. So the Sanhedrin had to meet, but in the Tower of Antonia, for he brought Paul down ( $\kappa \alpha \tau \alpha \gamma \gamma \omega \nu$, second aorist active participle of $\kappa \alpha \tau \alpha \gamma \omega$ ).

Set him $(\varepsilon \sigma \tau \eta \sigma \varepsilon v)$. First aorist active (transitive) indicative of $\iota \sigma \tau \eta \mu$, not the intransitive second aorist $\varepsilon \sigma \tau \eta$. Lysias is determined to find out the truth about Paul, more puzzled than ever by the important discovery that he has a Roman citizen on his hands in this strange prisoner.

## Acts 23

Acts 23:1
Looking steadfastly (atevıбaৎ). See on this word 1:10; 3:12; 6:15; 7:55; 13:9 . Paul may have had weak eyes, but probably the earnest gaze was to see if he recognized any faces that were in the body that tried Stephen and to which he apparently once belonged.

I have lived before God ( $\pi \varepsilon \pi \sigma \lambda \iota \tau \varepsilon \cup \mu \alpha \tau \omega \theta \varepsilon \omega$ ). Perfect middle indicative of $\pi \circ \lambda \iota \varepsilon \varepsilon \omega \omega$, old verb to manage affairs of city ( $\pi 0 \lambda \iota \varsigma$ ) or state, to be a citizen, behave as a citizen. In the N.T. only here and Php 1:27. The idea of citizenship was Greek and Roman, not Jewish. "He had lived as God's citizen, as a member of God's commonwealth" (Rackham). God ( $\theta \varepsilon \omega$ ) is the dative of personal interest. As God looked at it and in his relation to God.

In all good conscience unto this day ( $\pi \alpha \sigma \eta \sigma v v \varepsilon \iota \delta \eta \sigma \varepsilon \alpha \gamma \alpha \theta \eta \alpha \not \rho \rho \tau \alpha \nu \tau \eta \varsigma \tau \eta \varsigma \eta \mu \varepsilon \rho \alpha \varsigma)$. This claim seems to lack tact, but for brevity's sake Paul sums up a whole speech in it. He may have said much more than Luke here reports along the line of his speech the day before, but Paul did not make this claim without consideration. It appears to contradict his confession as the chief of sinners (1Ti 1:13-16). But that depends on one's interpretation of "good conscience." The word $\sigma u v \varepsilon \iota \delta \eta \sigma \iota \varsigma$ is literally "joint-knowledge" in Greek, Latin (conscientia) and English "conscience" from the Latin. It is a late word from $\sigma u v o t \delta a$, to know together, common in O.T., Apocrypha, Philo, Plutarch, New Testament, Stoics, ecclesiastical writers. In itself the word simply means consciousness of one's own thoughts (Heb 10:2), or of one's own self, then consciousness of the distinction between right and wrong (Ro 2:15) with approval or disapproval. But the conscience is not an infallible guide and acts according to the light that it has ( $1 \mathrm{Co} 8: 7,10 ; 1 \mathrm{Pe} 2: 19$ ). The conscience can be contaminated (Heb 10:22 , evil $\pi о \vee \eta \rho a \varsigma)$. All this and more must be borne in mind in trying to understand Paul's description of his motives as a persecutor. Alleviation of his guilt comes thereby, but not removal of guilt as he himself felt ( $1 \mathrm{Ti} 1: 13-16$ ). He means to say to the Sanhedrin that he persecuted Christians as a conscientious (though mistaken) Jew (Pharisee) just as he followed his conscience in turning from Judaism to Christianity. It is a pointed disclaimer against the charge that he is a renegade Jew, an opposer of the law, the people, the temple. Paul addresses the Sanhedrin as an equal and has no "apologies" (in our sense) to make for his career as a whole. The golden thread of consistency runs through, as a good citizen in God's commonwealth. He had the consolation of a good conscience ( $1 \mathrm{Pe} 3: 16$ ). The word does not occur in the Gospels and chiefly in Paul's Epistles, but we see it at work in Joh 8:9 (the interpolation 7:53-8:11).

Acts 23:2
Ananias (Havaviac). Not the one in Lu 3:2; Joh 18:13; Ac 4:7, but the son of Nebedaeus, nominated high priest by Herod, King of Chalcis, A.D. 48 and till A.D. 59. He was called to

Rome A.D. 52 to answer "a charge of rapine and cruelty made against him by the Samaritans, but honourably acquitted" (Page). Though high priest, he was a man of bad character.

Them that stood by him ( $\tau 0 \iota \varsigma \pi \alpha \rho \varepsilon \sigma \tau \omega \sigma \iota v \alpha v \tau \omega$ ). Dative case of second perfect participle of $\pi \alpha \rho \iota \sigma \tau \eta \mu$, to place, and intransitive. See the same form in verse 4 ( $\pi \alpha \rho \varepsilon \sigma \tau \omega \tau \varepsilon \varsigma)$.

To smite him on the mouth ( $\tau v \pi \tau \varepsilon \iota v$ av $\frac{1}{} v$ to $\sigma \tau o \mu \alpha$ ). See on 12:45; 18:17. Cf. the treatment of Jesus (Joh 18:22 ). Ananias was provoked by Paul's self-assertion while on trial before his judges. "The act was illegal and peculiarly offensive to a Jew at the hands of a Jew" (Knowling). More self-control might have served Paul better. Smiting the mouth or cheek is a peculiarly irritating offence and one not uncommon among the Jews and this fact gives point to the command of Jesus to turn the other check ( $\mathrm{Lu} 6: 29$ where $\tau v \pi \tau \omega$ is also used).

Acts 23:3
Thou whited wall ( $\tau о \iota \chi \varepsilon \kappa \varepsilon \kappa о \nu \iota \alpha \mu \varepsilon \nu \varepsilon$ ). Perfect passive participle of коvıaw (from коvıa, dust or lime). The same word used in Mt 23:27 for "whited sepulchres" ( $\tau \alpha \varphi о$ кєкоvıа $\mu \varepsilon \vee о$ ) which see. It is a picturesque way of calling Ananias a hypocrite, undoubtedly true, but not a particularly tactful thing for a prisoner to say to his judge, not to say Jewish high priest. Besides, Paul had hurled back at him the word $\tau v \pi \tau \varepsilon \iota v$ (smite) in his command, putting it first in the sentence ( $\tau v \pi \tau \varepsilon \iota \nu \sigma \varepsilon \mu \varepsilon \lambda \lambda \varepsilon$ o $\theta \varepsilon \sigma \varsigma)$ in strong emphasis. Clearly Paul felt that he, not Ananias, was living as a good citizen in God's commonwealth.

And sittest thou to judge me? (Ka $\sigma v \kappa \alpha \theta \eta \kappa \rho \iota \omega \nu \mu \varepsilon$ ?) Literally, "And thou (being what thou art) art sitting ( $\kappa \alpha \theta \eta$, second person singular middle of $\kappa \alpha \theta \eta \mu \alpha$, late form for $\kappa \alpha \theta \eta \sigma \alpha$, the uncontracted form) judging me." Cf. Lu 22:30 . Ka $\sigma v$ at the beginning of a question expresses indignation.

Contrary to the law ( $\pi \alpha \rho \alpha \nu o \mu \omega \nu$ ). Present active participle of $\pi \alpha \rho \alpha \nu o \mu \varepsilon \omega$, old verb to act contrary to the law, here alone in the N.T., "acting contrary to the law."

Acts 23:4
Of God ( $\operatorname{\tau ov} \theta \varepsilon o v$ ). As God's representative in spite of his bad character (De 17:8f. ). Here was a charge of irreverence, to say the least. The office called for respect.

Acts 23:5
I wist not (ovk $\eta \iota \delta \varepsilon \iota v$ ). Second past perfect of oı $\delta \alpha$ used as an imperfect. The Greek naturally means that Paul did not know that it was the high priest who gave the order to smite his mouth. If this view is taken, several things may be said by way of explanation. The high priest may not have had on his official dress as the meeting was called hurriedly by Lysias. Paul had been away so long that he may not have known Ananias on sight. And then Paul may have had poor eyesight or the high priest may not have been sitting in the official seat. Another way of explaining it is to say that Paul was so indignant, even angry, at the command that he spoke without considering who it was that gave the order. The Greek allows this idea also. At any rate Paul at once recognizes the justice of the point made against him. He had been guilty of irreverence against the office of high priest as the passage from Ex

22:18 (LXX) shows and confesses his fault, but the rebuke was deserved. Jesus did not threaten ( $1 \mathrm{Pe} 2: 23$ ) when smitten on the cheek (Joh 18:22 ), but he did protest against the act and did not turn the other cheek.

Acts 23:6
But when Paul perceived ( $\gamma$ vouc $\delta \varepsilon$ o Паu入oc). Perceiving (second aorist ingressive of $\gamma \iota v \omega \sigma \kappa \omega$ ). Paul quickly saw that his cause was ruined before the Sanhedrin by his unwitting attack on the high priest. It was impossible to get a fair hearing. Hence, Vincent says, "Paul, with great tact, seeks to bring the two parties of the council into collision with each other." So Alford argues with the motto "divide and conquer." Farrar condemns Paul and takes 24:21 as a confession of error here, but that is reading into Paul's word about the resurrection more than he says. Page considers Luke's report meagre and unsatisfactory. Rackham thinks that the trial was already started and that Paul repeated part of his speech of the day before when "the Sadducees received his words with ostentatious scepticism and ridicule: this provoked counter-expressions of sympathy and credulity among the Pharisees." But all this is inference. We do not have to adopt the Jesuitical principle that the end justifies the means in order to see shrewdness and hard sense in what Paul said and did. Paul knew, of course, that the Sanhedrin was nearly evenly divided between Pharisees and Sadducees, for he himself had been a Pharisee.

I am a Pharisee, a son of Pharisees ( $\mathrm{E} \gamma \omega$ Фарıбаıоя $\varepsilon \mu \operatorname{vıo}$ Фарıбаı $\omega v$ ). This was strictly true as we know from his Epistles (Php 3:5).

Touching the hope and resurrection of the dead I am called in question ( $\pi \varepsilon \rho \varepsilon \lambda \pi \iota \delta \circ \varsigma$ $\kappa \alpha ~ \alpha v a \sigma \tau \alpha \sigma \varepsilon \omega \varsigma ~ v \varepsilon \kappa \rho \omega v \kappa \rho เ v o \mu \alpha)$. This was true also and this is the point that Paul mentions in 24:21. His failure to mention again the fact that he was a Pharisee throws no discredit on Luke's report here. The chief point of difference between Pharisees and Sadducees was precisely this matter of the resurrection. And this was Paul's cardinal doctrine as a Christian minister. It was this fact that convinced him that Jesus was the Messiah and was "the very centre of his faith" (Page) and of his preaching. It was not a mere trick for Paul to proclaim this fact here and so divide the Sanhedrin. As a matter of fact, the Pharisees held aloof when the Sadducees persecuted Peter and the other apostles for preaching resurrection in the case of Jesus and even Gamaliel threw cold water on the effort to punish them for it (Ac 5:34-39 ). So then Paul was really recurring to the original cleavage on this point and was able to score a point against the Sadducees as Gamaliel, his great teacher, had done before him. Besides, "Paul and Pharisaism seem to us such opposite ideas that we often forget that to Paul Christianity was the natural development of Judaism" (Page). Paul shows this in Ga 3; Ro 9-11 .

Acts 23:7
When he had so said ( $\tau$ точо autou $\lambda \alpha \lambda$ дouvto¢). Genitive absolute of present participle (Westcott and Hort) rather than aorist (عıпоvтоৎ). While he was saying this.

A dissension ( $\sigma \tau \alpha \sigma \iota \varsigma)$. This old word for standing or station (Heb 9:8) from $1 \sigma \tau \eta \mu$, to place, we have seen already to mean insurrection (Ac 19:40 which see). Here it is strife as in 15:2.

Was divided $(\varepsilon \sigma \chi เ \sigma \theta \eta)$. See on 14:4.
Acts 23:8
There is no resurrection, neither angel, nor spirit ( $\mu \eta \varepsilon \iota \nu \alpha \alpha \nu \alpha \sigma \tau \alpha \sigma \iota \nu \mu \eta \tau \varepsilon \alpha \gamma \gamma \varepsilon \lambda o v$ $\mu \eta \tau \varepsilon \pi \nu \varepsilon v \mu \alpha)$. Infinitive with negative $\mu \eta$ in indirect assertion. These points constitute the chief doctrinal differences between the Pharisees and the Sadducees.

Both ( $\alpha \mu \varphi о \tau \varepsilon \rho \alpha$ ). Here used though three items of belief are mentioned as in 19:16 where the seven sons of Sceva are thus described. This idiom is common enough in papyri and Byzantine Greek (Robertson, Grammar, p. 745).

Acts 23:9
Strove ( $\delta เ \varepsilon \mu \alpha \chi$ оvтo). Imperfect middle of $\delta ı \alpha \mu \alpha \chi о \mu \alpha$, old Attic verb, to fight it out (between, back and forth, fiercely). Here only in the N.T. It was a lively scrap and Luke pictures it as going on. The Pharisees definitely take Paul's side.

And what if a spirit hath spoken to him or an angel? ( $\varepsilon \delta \varepsilon \pi v \varepsilon v \mu \alpha \varepsilon \lambda \alpha \lambda \eta \sigma \varepsilon v \alpha v \tau \omega \eta$ $a \gamma \gamma \varepsilon \lambda_{o \sigma}$ ?). This is aposiopesis, not uncommon in the N.T., as in Lu 13:9; Joh 6:62 (Robertson, Grammar, p. 1203). See one also in Ex 32:32 .

Acts 23:10
When there arose a great dissension ( $\pi \circ \lambda \lambda \eta \varsigma \tau \eta \varsigma \gamma \iota \nu \circ \mu \varepsilon \nu \eta \varsigma \sigma \tau \alpha \sigma \varepsilon \omega \varsigma)$. Present middle participle (genitive absolute). Literally, "dissension becoming much."

Lest Paul should be torn in pieces by them ( $\mu \eta \delta \iota \alpha \sigma \pi \alpha \sigma \theta \eta$ о Паv ${ }^{\circ} \varsigma$ ). First aorist passive subjunctive of $\delta \iota \alpha \sigma \pi \alpha \omega$, to draw in two, to tear in pieces, old verb, in the N.T. only here and Mr 5:4 of tearing chains in two. The subjunctive with $\mu \eta$ is the common construction after a verb of fearing (Robertson, Grammar, p. 995).

The soldiers ( $\tau о \sigma \tau \rho a \tau \varepsilon \cup \mu \alpha)$. The army, the band of soldiers and so in verse 27.
To go down ( $\kappa \alpha \tau \alpha \beta \alpha v)$. Second aorist active participle of $\kappa \alpha \tau \alpha \beta \alpha \iota \omega$, having gone down.

Take him by force $(\alpha \rho \pi \alpha \sigma \alpha)$. To seize. The soldiers were to seize and save Paul from the midst of ( $\varepsilon \kappa \mu \varepsilon \sigma o v$ ) the rabbis or preachers (in their rage to get at each other). Paul was more of a puzzle to Lysias now than ever.

Acts 23:11
The night following ( $\tau \eta \varepsilon \pi \iota \circ v \sigma \eta \nu v \kappa \tau$ ). Locative case, on the next (following) night.
The Lord (о кирьос). Jesus. Paul never needed Jesus more than now. On a previous occasion the whole church prayed for Peter's release ( $12: 5$ ), but Paul clearly had no such grip on the church as that, though he had been kindly welcomed (21:18). In every crisis Jesus appears to him (cf. Ac 18:9). It looked dark for Paul till Jesus spoke. Once before in Jerusalem Jesus spoke words of cheer (22:18). Then he was told to leave Jerusalem. Now
he is to have "cheer" or "courage" ( $\theta a \rho \sigma \varepsilon$ ). Jesus used this very word to others (Mt 9:2,22; Mr 10:49 ). It is a brave word.

Thou hast testified ( $\delta \varepsilon \varepsilon \mu \rho \tau \tau \nu \rho \omega)$. First aorist middle indicative second person singular of $\delta$ да $\alpha \rho т \cup \rho о \mu \alpha$, strong word (see on 22:18).

Must thou ( $\sigma \varepsilon \delta \varepsilon$ ). That is the needed word and on this Paul leans. His hopes ( 19:21) of going to Rome will not be in vain. He can bide Christ's time now. And Jesus has approved his witness in Jerusalem.

Acts 23:12
Banded together ( $\pi о \square \eta \sigma \alpha \nu \tau \varepsilon \varsigma \sigma \sigma \sigma \tau \rho \varphi \eta \nu$ ). See on 19:40 (riot), but here conspiracy, secret combination, binding together like twisted cords.

Bound themselves under a curse ( $\alpha v \varepsilon \theta \varepsilon \mu \alpha \tau \iota \sigma \alpha v \varepsilon \alpha v \tau o v \varsigma)$ ). First aorist active indicative of $\alpha v a \theta \varepsilon \mu \alpha \tau \imath \zeta \omega$, a late word, said by Cremer and Thayer to be wholly Biblical or ecclesiastical. But Deissmann (Light from the Ancient East, p. 95) quotes several examples of the verb in an Attic cursing tablet from Megara of the first or second century A.D. This proof shows that the word, as well as $\alpha v a \theta \varepsilon \mu \alpha$ (substantive) from which the verb is derived, was employed by pagans as well as by Jews. Deissmann suggests that Greek Jews like the seven sons of Sceva may have been the first to coin it. It occurs in the LXX as well as Mr 14:71 (which see and Luke 21:5); Ac 23:12,14,21. They placed themselves under an anathema or curse, devoted themselves to God (cf. Le 27:28f.; 1Co 16:22 ).

Drink ( $\pi \varepsilon \iota v=\pi \iota \varepsilon \iota v$ ). Second aorist active infinitive of $\pi \iota v \omega$. For this shortened form see Robertson, Grammar, p. 343.

Till they had killed ( $\varepsilon \omega \varsigma \bigcirc 0 \alpha \pi 0 \kappa \tau \varepsilon เ \nu \omega \sigma \iota v)$. First aorist active subjunctive of $\alpha \pi о \kappa \tau \varepsilon เ \nu \omega$, common verb. No reason to translate "had killed," simply "till they should kill," the aorist merely punctiliar action, the subjunctive retained instead of the optative for vividness as usual in the Koine (Robertson, Grammar, pp. 974-6). Same construction in verse 14. King Saul took an "anathema" that imperilled Jonathan (1Sa 14:24). Perhaps the forty felt that the rabbis could find some way to absolve the curse if they failed. See this verse repeated in verse 21.

Acts 23:13
More than forty ( $\pi \lambda \varepsilon$ हוоиц $\tau \varepsilon \sigma \sigma \varepsilon \rho \alpha \kappa о \nu \tau \alpha$ ). Without "than" $(\eta)$ as in verse $21 ; 24: 11$ and often in the ancient Greek.

Conspiracy ( $\sigma v v \omega \mu \circ \sigma \iota \alpha v$ ). Old word from $\sigma v v o \mu v v \mu$, to swear together. Only here in the N.T.

Acts 23:14
 $\pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho \circ \iota \varsigma)$. The Sanhedrin, just as Judas did (Lu 22:4).

With a great curse ( $\alpha v \alpha \theta \varepsilon \mu \alpha \tau)$. This use of the same word as the verb repeated in the instrumental case is in imitation of the Hebrew absolute infinitive and common in the LXX,
the very idiom and words of $\operatorname{De} 13: 15 ; 20: 17$, an example of translation Greek, though found in other languages (Robertson, Grammar, p. 531). See on Lu 21:5 for the distinction between $\alpha v a \theta \varepsilon \mu \alpha$ and $\alpha v a \theta \eta \mu \alpha$. Jesus had foretold: "Whoso killeth you will think that he doeth God service" (Joh 16:2 ).

Acts 23:15
Ye (v $v \varepsilon \iota \varsigma)$. Emphatic.
Signify ( $\varepsilon \mu \varphi \alpha \nu \iota \sigma \alpha \tau \varepsilon)$. First aorist active imperative of $\varepsilon \mu \varphi a \nu \iota \zeta \omega$. Make plain from $\varepsilon \mu \varphi a v \eta \varsigma$, chiefly in Acts. Repeated in verse 22. The authority is with the chiliarch not with the Sanhedrin, but he had appealed to the Sanhedrin for advice.

As though ye would judge of his case more exactly ( $\omega \varsigma \mu \varepsilon \lambda \lambda o v \tau \alpha \varsigma \delta ı \alpha \not \omega \omega \sigma \kappa \varepsilon \iota v$ $\alpha \kappa \rho ı \varepsilon \sigma \tau \varepsilon \rho о \nu \tau \alpha \pi \varepsilon \rho \alpha v \tau о v)$. H $\omega \varsigma$ with the participle gives the alleged reason as here. So also in verse 20. $\Delta \mathrm{t} \alpha \gamma \operatorname{vo\sigma \kappa \omega }$, old verb to distinguish accurately, only here in N.T. and 24:22.

Or ever come near ( $\pi \rho \circ$ $\tau 0 v \varepsilon \gamma \gamma \iota \sigma \alpha \alpha v \tau o v$ ). "Before the coming near as to him." Про and the genitive of the articular infinitive of $\varepsilon \gamma \gamma \iota \zeta \omega$ with accusative of general reference.

We are ready to slay him ( $\varepsilon \tau о \mu \circ \varepsilon \sigma \mu \varepsilon \nu \tau o v \alpha \nu \varepsilon \lambda \varepsilon \tau \nu \alpha \nu \tau \nu)$. Genitive of purpose of the articular infinitive after the adjective $\varepsilon \tau о \boldsymbol{\mu}$ (Robertson, Grammar, p. 1061). Ave入 $\varepsilon \iota v$, second aorist active of avaı $\rho \varepsilon \omega$.

Acts 23:16
Their lying in wait ( $\tau \eta v \varepsilon v \varepsilon \delta \rho \alpha v$ ). Old word from $\varepsilon v$ (in) and $\varepsilon \delta \rho \alpha$ (seat), ambush. In N.T. only here and 25:3. Accusative object of aкоvбая.

He came ( $\pi \alpha \rho \alpha \gamma \varepsilon v o \mu \varepsilon \nu \circ \varsigma)$. Second aorist middle participle of $\pi \alpha \rho \alpha \gamma \iota \nu o \mu \alpha$. It may mean, "having come upon them" and so discount their plot, a graphic touch. Vincent thinks that some Pharisee, since Paul was a Pharisee and so a member of the "guild," told his nephew of the plot. Perhaps, and perhaps not.

Told Paul ( $\alpha \pi \eta \gamma \gamma \varepsilon ı \lambda \varepsilon \nu \tau \omega \Pi \alpha v \lambda \omega$ ). This nephew is not known otherwise. He may be a student here from Tarsus as Paul once was. Anyhow he knows what to do when he catches on to the conspirators. He had enough address to get into the barracks where Paul was. He ran the risk of death if discovered.

Acts 23:17
Called unto him ( $\pi \rho \circ \sigma \kappa \alpha \lambda \varepsilon \sigma \alpha \mu \varepsilon \nu \circ \varsigma)$. First aorist participle indirect middle, calling to himself. Paul laid his plans as energetically as if Jesus had not promised that he would see Rome (23:11).

Bring ( $\alpha \pi \alpha \gamma \varepsilon$ ). "Take away."
Acts 23:18
Paul the prisoner (o $\delta \varepsilon \sigma \mu \circ \varsigma \Pi \alpha v \lambda о \varsigma)$. Bound ( $\delta \varepsilon \sigma \mu \circ \varsigma)$ to a soldier, but not with two chains ( $21: 33$ ), and with some freedom to see his friends as later (28:16), in military custody (custodia militaris). This was better than custodia publica (public custody), the common prison, but more confining.

Who hath something to say to thee ( $\varepsilon \chi \circ v \tau \alpha \tau \lambda \alpha \lambda \eta \sigma \alpha \sigma 0)$. Same idiom as in verse 17,19 , but $\lambda \alpha \lambda \eta \sigma \alpha$ here instead of $\alpha \pi \alpha \gamma \gamma \varepsilon ı \lambda \alpha$.

Acts 23:19
Took him by the hand ( $\varepsilon \pi \iota \lambda \alpha \beta о \mu \varepsilon v o \varsigma \tau \eta \varsigma \chi \varepsilon \iota \rho \circ \varsigma \alpha v \tau o v)$. Kindly touch in Lysias, ut fiduciam adolescentis confirmaret (Bengel). Note genitive with the second aorist middle (indirect, to himself) of $\varepsilon \pi \iota \lambda \alpha \mu \beta \alpha \nu \omega$ as in $\operatorname{Lu} 8: 54$ with $\kappa \rho \alpha \tau \eta \sigma \alpha \varsigma$ which see. How old the young man (veaviac) was we do not know, but it is the very word used of Paul in 7:58 when he helped in the killing of Stephen, a young man in the twenties probably. See also 20:9 of Eutychus. He is termed veavioкoऽ in verse 22.

Asked him privately ( $\kappa \alpha \tau^{\prime} \iota \delta \iota \alpha v \varepsilon \pi v v \theta a v \varepsilon \tau o$ ). Imperfect middle, began to ask (inchoative).

Acts 23:20
The Jews (o Iovסaıo). As if the whole nation was in the conspiracy and so in verse 12. The conspirators may have belonged to the Zealots, but clearly they represented the state of Jewish feeling toward Paul in Jerusalem.

Have agreed ( $\sigma v v \varepsilon \theta \varepsilon v \tau \sigma$ ). Second aorist middle indicative of $\sigma v \nu \tau \iota \theta \eta$, old verb to join together, to agree. Already this form in Lu 22:5 which see. See also Joh 9:22; Ac 24:9 .

To bring down (о $\pi \omega \varsigma \kappa \alpha \tau \alpha \gamma \alpha \not\lceil\imath \varsigma)$. Very words of the conspirators in verse 15 as if the young man overheard. Second aorist active subjunctive of $\kappa \alpha \tau \alpha \gamma \omega$ with $o \pi \omega \varsigma$ in final clause, still used, but nothing like so common as iva though again in verse 23 (Robertson, Grammar, p. 985).

As though thou wouldest inquire ( $\omega \varsigma \mu \varepsilon \lambda \lambda \omega v \pi \nu v \theta \alpha v \varepsilon \sigma \theta \alpha$ ). Just as in verse 15 except that here $\mu \varepsilon \lambda \lambda \omega \nu$ refers to Lysias instead of to the conspirators as in verse 15 . The singular is used by the youth out of deference to the authority of Lysias and so modifies a bit the scheming of the conspirators, not "absurd" as Page holds.

Acts 23:21
Do not therefore yield unto them ( $\Sigma v$ ovv $\mu \eta \pi \varepsilon \iota \sigma \theta \eta ı \varsigma \cup \tau o \iota \varsigma)$. First aorist passive subjunctive of $\pi \varepsilon \iota \theta \omega$, common verb, here to be persuaded by, to listen to, to obey, to yield to. With negative and rightly. Do not yield to them (dative) at all. On the aorist subjunctive with $\mu \eta$ in prohibitions against committing an act see Robertson, Grammar, pp. 851-4.

For there lie in wait ( $\varepsilon v \varepsilon \delta \rho \varepsilon v o v \sigma \iota v \gamma \alpha \rho$ ). Present active indicative of $\varepsilon v \varepsilon \delta \rho \varepsilon v \omega$, old verb from $\varepsilon v \varepsilon \delta \rho a$ (verse 16), in the N.T. only here and Lu 11:54 which see.

Till they have slain him ( $\varepsilon \omega \varsigma$ ov ave $\lambda \omega \sigma \iota \nu \alpha v \tau o v$ ). Same idiom as in verse 12 save that here we have ave $\lambda \omega \sigma \iota v$ (second aorist active subjunctive) instead of $\alpha \pi \sigma \kappa \tau \varepsilon เ \nu \omega \sigma \iota v$ (another word for kill), "till they slay him."

Looking for the promise from thee ( $\pi \rho о \sigma \delta \varepsilon \chi о \mu \varepsilon v o \tau \eta \nu \alpha \pi \sigma \sigma o v \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \iota \alpha v$ ). This item is all that is needed to put the scheme through, the young man shrewdly adds.

Acts 23:22

Tell no man ( $\mu \eta \delta \varepsilon \nu \varepsilon \kappa \lambda \alpha \lambda \eta \sigma \alpha$ ). Indirect command (oratio obliqua) after $\pi \alpha \rho \alpha \gamma \gamma \varepsilon ו \lambda \alpha \varsigma$ (charging) with first aorist active infinitive of $\varepsilon \kappa \lambda \alpha \lambda \varepsilon \omega$ (in ancient Greek, but here only in N.T.), but construction changed to direct in rest of the sentence (oratio recta) as in 1:4, "that thou hast signified these things to me" (oт $\tau \alpha \cup \tau \alpha$ $v \varepsilon \varphi \alpha v i \sigma \alpha \varsigma \pi \rho \circ \varsigma \varepsilon \mu \varepsilon$ ). Same verb here as in verse 15. This change is common in the N.T. (Robertson, Grammar, p. 1047).

Acts 23:23
Two ( $\tau$ ivac $\delta v o$ ). "Some two" as in Lu 7:19, indicating (Page) that they were not specially chosen.

Soldiers ( $\sigma \tau \rho \alpha \tau \iota \omega \tau \alpha \varsigma)$,
horsemen (ıл
spearmen ( $\delta \varepsilon \xi_{\iota o \lambda}$ aßouc). The three varieties of troops in a Roman army like the cohort of Lysias (Page). The $\sigma \tau \rho \alpha \tau \iota \omega \tau \alpha$ were the heavy-armed legionaries, the $\iota \pi \tau \varepsilon \varsigma$ belonged to every legion, the $\left.\delta \varepsilon \xi_{七}\right\rangle \alpha \beta$ o were light-armed supplementary troops who carried a lance in the right hand ( $\delta \varepsilon \xi$ เo¢, right, $\lambda \alpha \mu \beta \alpha v \omega$, to take). Vulgate, lancearios. At the third hour of the night ( $\alpha \pi о \tau \rho \iota \tau \eta \varsigma \omega \rho a \varsigma \tau \eta \varsigma v \cup \kappa \tau о \varsigma)$. About nine in the evening.

Acts 23:24
Provide beasts ( $\kappa \tau \varepsilon \nu \eta \pi \alpha \rho \alpha \sigma \tau \eta \sigma \alpha$ ). Change from direct to indirect discourse just the opposite of that in verse 22.

Beasts ( $\kappa \tau \eta \vee \eta)$. For riding as here or for baggage. See on Lu 10:34. Asses or horses, but not war-horses. Since Paul was chained to a soldier, another animal would be required for baggage. It was also seventy miles and a change of horses might be needed. The extreme precaution of Lysias is explained in some Latin MSS. as due to fear of a night attack with the result that he might be accused to Felix of bribery. Luke also probably accompanied Paul.

To bring safe (ıva $\delta ı \sigma \omega \sigma \omega \sigma ı v)$. Final clause with $\operatorname{vva}$ and the first aorist active subjunctive of $\delta \iota \alpha \sigma \omega \zeta \omega$, old verb, to save through ( $\delta \iota \alpha$ ) to a finish. Eight times in the N.T. (Mt 14:36; Lu 7:3; Ac 23:24; 27:43,44; 28:1,4; 1Pe 3:20 ).

Unto Felix the governor ( $\pi \rho \circ \varsigma \Phi \eta \lambda \iota \kappa \alpha$ тоv $\eta \gamma \varepsilon \mu \circ v \alpha$ ). Felix was a brother of Pallas, the notorious favourite of Claudius. Both had been slaves and were now freedmen. Felix was made procurator of Judea by Claudius A.D. 52. He held the position till Festus succeeded him after complaints by the Jews to Nero. He married Drusilla the daughter of Herod Agrippa I with the hope of winning the favour of the Jews. He was one of the most depraved men of his time. Tacitus says of him that "with all cruelty and lust he exercised the power of a king with the spirit of a slave." The term "governor" ( $\eta \gamma \varepsilon \mu \omega v$ ) means "leader" from $\eta \gamma \varepsilon \sigma \mu \alpha$, to lead, and was applied to leaders of all sorts (emperors, kings, procurators). In the N.T. it is used of Pilate (Mt 27:2 ), of Felix, (Ac 23:24,26,33; 24:1 ), of Festus ( 26:30).

Acts 23:25

And he wrote ( $\gamma \rho \alpha \psi \alpha \varsigma)$. First aorist active participle of $\gamma \rho \alpha \varphi \omega$, agreeing with the subject (Lysias) of $\varepsilon \iota \pi \varepsilon v$ (said) back in verse 23 (beginning).
 use of tutov (type or form) like exemplum in Latin (Page who quotes Cicero Ad Att. IX. 6. 3) may give merely the purport or substantial contents of the letter. But there is no reason for thinking that it is not a genuine copy since the letter may have been read in open court before Felix, and Luke was probably with Paul. The Roman law required that a subordinate officer like Lysias in reporting a case to his superior should send a written statement of the case and it was termed elogium. A copy of the letter may have been given Paul after his appeal to Caesar. It was probably written in Latin. The letter is a "dexterous mixture of truth and falsehood" (Furneaux) with the stamp of genuineness. It puts things in a favourable light for Lysias and makes no mention of his order to scourge Paul.

Acts 23:26
Most excellent (крatıo $\tau \omega$ ). See on Lu 1:3 to Theophilus though not in Ac 1:1 . It is usual in addressing men of rank as here, like our "Your Excellency" in 24:3 and Paul uses it to Festus in 26:25.

Greeting ( $\chi$ alpsıv). Absolute infinitive with independent or absolute nominative
 Grammar, p. 1092).

Acts 23:27
Was seized ( $\sigma u \lambda \lambda \eta \mu \varphi \theta \varepsilon \nu \tau \alpha$ ). First aorist passive participle of $\sigma u \lambda \lambda \alpha \mu \beta \alpha v \omega$.
Rescued him having learned that he was a Roman ( $\varepsilon \xi \varepsilon ı \lambda \alpha \mu \varepsilon \nu \mu \theta \omega \nu$ от Po $\mu \alpha \circ \varsigma \varepsilon \sigma \tau \iota v$ ). Wendt, Zoeckler, and Furneaux try to defend this record of two facts by Lysias in the wrong order from being an actual lie as Bengel rightly says. Lysias did rescue Paul and he did learn that he was a Roman, but in this order. He did not first learn that he was a Roman and then rescue him as his letter states. The use of the aorist participle ( $\mu \alpha \theta \omega v$ from $\mu \alpha v \theta \alpha v \omega$ ) after the principal verb $\varepsilon \xi \varepsilon ı \lambda \alpha \mu \varepsilon v$ (second aorist middle of $\varepsilon \xi \alpha \rho \varepsilon \omega$, to take out to oneself, to rescue) can be either simultaneous action or antecedent. There is in Greek no such idiom as the aorist participle of subsequent action (Robertson, Grammar, pp. 1112-14). Lysias simply reversed the order of the facts and omitted the order for scourging Paul to put himself in proper light with Felix his superior officer and actually poses as the protector of a fellow Roman citizen.

Acts 23:28
To know ( $\varepsilon \pi \tau \gamma \nu \omega v \alpha)$. To know fully, $\varepsilon \pi$, second aorist active infinitive.
They accused him ( $\varepsilon v \varepsilon \kappa \alpha \lambda o u v \alpha v \tau \omega$ ). Imperfect active indicative, were accusing him (dative), repeating their charges.

Acts 23:29

Concerning questions of their law ( $\pi \varepsilon \rho \zeta \eta \tau \eta \mu \alpha \tau \alpha$ тov vo $\mu \circ v \alpha v \tau \omega v$ ). The very distinction drawn by Gallio in Corinth (Ac 18:14f. ). On the word see on 15:2.

But to have nothing laid to his charge worthy of death or of bonds ( $\mu \eta \delta \varepsilon v \delta \varepsilon$ a $\xi_{\circ}$ v Өavatov $\eta \delta \varepsilon \sigma \mu \omega v \varepsilon \chi \circ v \tau \alpha \varepsilon v \kappa \lambda \eta \mu \alpha$ ). Literally, "having no accusation (or crime) worthy of death or of bonds." This phrase here only in the N.T. Eүк $\lambda \eta \mu \alpha$ is old word for accusation or crime from $\varepsilon \gamma \kappa \alpha \lambda \varepsilon \omega$ used in verse 28 and in the N.T. only here and 25:16. Lysias thus expresses the opinion that Paul ought to be set free and the lenient treatment that Paul received in Caesarea and Rome (first imprisonment) is probably due to this report of Lysias. Every Roman magistrate before whom Paul appears declares him innocent (Gallio, Lysias, Felix, Festus).

Acts 23:30
When it was shown to me that there would be a plot ( $\mu \eta v v \theta \varepsilon เ \sigma \eta \varsigma \mu о \varepsilon \pi \_\beta$ ou入ŋऽ $\varepsilon \sigma \varepsilon \sigma \theta \alpha$ ). Two constructions combined; genitive absolute ( $\mu \eta v v \theta \varepsilon \iota \sigma \eta \varsigma \varepsilon \pi \iota \beta o v \lambda \eta \varsigma$, first aorist passive participle of $\mu \eta \nu v \omega$ ) and future infinitive ( $\varepsilon \sigma \varepsilon \sigma \theta \alpha$ as if $\varepsilon \pi \iota \beta o v \lambda \eta \nu$ accusative of general reference used) in indirect assertion after $\mu \eta \nu v \omega$ (Robertson, Grammar, p. 877).

Charging his accusers also ( $\pi \alpha \rho \alpha \gamma \gamma \varepsilon i \lambda \alpha \varsigma \kappa \alpha$ тоוя катпүороьৎ). First aorist active participle of $\pi \alpha \rho \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$ with which compare $\mu \alpha \theta \omega v$ above (verse 27), not subsequent action. Dative case in кат $\eta \gamma$ ороıs.

Before thee ( $\varepsilon \pi \sigma \sigma v$ ). Common idiom for "in the presence of" when before a judge (like Latin $a p u d)$ as in $24: 20,21 ; 25: 26 ; 26: 2$. What happened to the forty conspirators we have no way of knowing. Neither they nor the Jews from Asia are heard of more during the long five years of Paul's imprisonment in Caesarea and Rome.

Acts 23:31
As it was commanded them (ката тo סıaтєтаү $\mu \varepsilon v o v$ avtoı). "According to that which was commanded them," perfect passive articular participle of $\delta \iota \alpha \tau \alpha \sigma \sigma \omega$.

By night ( $\delta$ ıa vuктoc). Through the night, travelling by night forty miles from Jerusalem to Antipatris which was founded by Herod the Great and was on the road from Jerusalem to Caesarea, a hard night's ride.

Acts 23:33
And they (ottiveऽ). Which very ones, the cavalry, the horsemen of verse 31.
Delivered ( $\alpha v \alpha \delta o v \tau \varepsilon \varsigma)$. Second aorist active participle of $\alpha v \alpha \delta \iota \delta \omega \mu$, old verb to give up, to hand over, here only in the N.T.

Presented Paul also ( $\pi \alpha \rho \varepsilon \sigma \tau \eta \sigma \alpha v$ ка $\tau 0 v$ Паv $\lambda \mathrm{ov}$ ). First aorist active (transitive, not second aorist intransitive) indicative of $\pi \alpha \rho \iota \sigma \tau \eta \mu$, common verb to present or place beside. What would Paul's friends in Caesarea (Philip and his daughters) think of the prophecy of Agabus now so quickly come true.

Acts 23:34

When he had read it ( $\alpha v \alpha \gamma v o v c)$. Second aorist active participle of $\alpha v \alpha \gamma เ v \omega \sigma \kappa \omega$, to know again, to read.

Of what province he was ( $\varepsilon \kappa \pi о \iota \alpha \varsigma \varepsilon \pi \alpha \rho \chi \varepsilon \iota \alpha \varsigma \varepsilon \sigma \tau \iota v$ ). Tense of $\varepsilon \sigma \tau \iota v$ (is) retained in indirect question. Пotas is strictly "of what kind of" province, whether senatorial or imperial. Cilicia, like Judea, was under the control of the propraetor of Syria (imperial province). Paul's arrest was in Jerusalem and so under the jurisdiction of Felix unless it was a matter of insurrection when he could appeal to the propraetor of Syria.

Acts 23:35
I will hear thy cause ( $\delta ı \alpha \kappa о v \sigma о \mu \alpha)$ ) "I will hear thee fully" ( $\delta ı \alpha$ ).
When--are come ( $\pi \alpha \rho \alpha \gamma \varepsilon v \omega v \tau \alpha$ ). Second aorist middle subjunctive of $\pi \alpha \rho \alpha \gamma ı v o \mu \alpha$ with temporal conjunction o $\tau \alpha v$, indefinite temporal clause of future time (Robertson, Grammar, p. 972), "whenever thine accusers come."

In Herod's palace ( $\varepsilon v \tau \omega \pi \rho \alpha \iota \tau \omega \rho \iota \omega$ ). The Latin word $\pi \rho \alpha \varepsilon \tau o \rho ı v \mu$. The word meant the camp of the general, then the palace of the governor as here and Mt 27:27 which see, and then the camp of praetorian soldiers or rather the praetorian guard as in Php 1:13.

## Acts 24

Acts 24:1
And with an Orator, one Tertullus ( $\kappa \alpha \rho \eta \tau о \rho о \varsigma ~ T \varepsilon \rho \tau \nu \lambda \lambda о v ~ \tau ı \nu о \varsigma) . ~ A ~ d e p u t a t i o n ~ o f ~$ elders along with the high priest Ananias, not the whole Sanhedrin, but no hint of the forty conspirators or of the Asian Jews. The Sanhedrin had become divided so that now it is probably Ananias (mortally offended) and the Sadducees who take the lead in the prosecution of Paul. It is not clear whether after five days is from Paul's departure from Jerusalem or his arrival in Caesarea. If he spent nine days in Jerusalem, then the five days would be counted from then (verse 11). The employment of a Roman lawyer (Latin orator) was necessary since the Jews were not familiar with Roman legal procedure and it was the custom in the provinces (Cicero pro Cael. 30). The speech was probably in Latin which Paul may have understood also. P $\eta \tau \omega \rho$ is a common old Greek word meaning a forensic orator or advocate but here only in the N.T. The Latin rhetor was a teacher of rhetoric, a very different thing. Tertullus is a diminutive of Tertius (Ro 16:22).

Informed ( $\varepsilon v \varepsilon \varphi a v \iota \sigma a v)$. Same verb as in 23:15,22, somewhat like our modern "indictment," certainly accusations "against Paul" (ката тov Пav入ov). They were down on Paul and the hired barrister was prosecuting attorney. For the legal form see Oxyrhynchus Papyri, Vol. II., p. 162, line 19.

Acts 24:2
When he (Paul) was called ( $\kappa \lambda \eta \theta \varepsilon v \tau \circ \varsigma \alpha v \tau o v)$. Genitive absolute (as so often in Acts) with first aorist passive participle of $\kappa \alpha \lambda \varepsilon \omega$. Seeing that by thee we enjoy much peace ( $\pi 0 \lambda \lambda \eta \varsigma$ $\varepsilon \iota \rho \nu \eta \varsigma \tau v \gamma \chi \propto v o v \tau \varepsilon \varsigma \delta \iota \alpha \sigma o v)$. Literally, obtaining much peace by thee. A regular piece of flattery, captatio benevolentiae, to ingratiate himself into the good graces of the governor. Felix had suppressed a riot, but Tacitus (Ann. XII. 54) declares that Felix secretly encouraged banditti and shared the plunder for which the Jews finally made complaint to Nero who recalled him. But it sounded well to praise Felix for keeping peace in his province, especially as Tertullus was going to accuse Paul of being a disturber of the peace.

And that by thy providence ( $\kappa \alpha \delta \iota \alpha \tau \eta \varsigma \pi \rho о v o l \alpha \varsigma)$. Forethought, old Greek word from $\pi \rho o v o o \varsigma$ ( $\pi \rho$ ovos $\omega$ in $1 \mathrm{Ti} 5: 8$; Ro 12:17; 2Co 8:21 ), in N.T. only here and Ro 13:14. "Providence" is Latin Providentia (foreseeing, provideo). Roman coins often have Providentia Caesaris. Post-Augustan Latin uses it of God (Deus).

Evils are corrected for this nation ( $\delta \iota \rho \theta \omega \mu \alpha \tau \omega \nu \gamma \iota \nu \mu \varepsilon \nu \omega \nu \tau \omega \varepsilon \theta \nu \varepsilon \tau o v \tau \omega)$. Genitive absolute again, $\gamma \iota \nu \circ \mu \varepsilon \nu \omega \nu$, present middle participle describing the process of reform going on for this nation (dative case of personal interest). $\Delta \iota \rho \theta \omega \mu \alpha$ (from $\delta \iota o \rho \theta o \omega$, to set right) occurs from Aristotle on of setting right broken limbs (Hippocrates) or reforms in law and life (Polybius, Plutarch). "Reform continually taking place for this nation." Felix the Reform Governor of Judea! It is like a campaign speech, but it doubtless pleased Felix.

Acts 24:3
In all ways and in all places ( $\pi \alpha \nu \tau \eta \tau \varepsilon \kappa \alpha \pi \alpha \nu \tau \alpha \chi \circ v$ ). Пav $\tau \eta$, old adverb of manner only here in N.T. חav $\tau \alpha \chi 0 v$ also old adverb of place, several times in N.T. But these adverbs most likely go with the preceding clause about "reforms" rather than as here translated with "we accept" ( $\alpha \tau о \delta \varepsilon \chi \circ \mu \varepsilon \theta \alpha$ ). But "with all gratitude" ( $\mu \varepsilon \tau \alpha \pi \alpha \sigma \eta \varsigma \varepsilon v \chi \alpha \rho \iota \sigma \tau \iota \alpha \varsigma)$ does naturally go with $\alpha \pi о \delta \varepsilon \chi о \mu \varepsilon \theta \alpha$.

## Acts 24:4

That I be not further tedious unto thee ( $\imath v \alpha \mu \eta \varepsilon \pi \pi \lambda \varepsilon \iota o v \sigma \varepsilon \varepsilon v \kappa о \pi \tau \omega$ ). Koine verb (Hippocrates, Polybius) to cut in on (or into), to cut off, to impede, to hinder. Our modern telephone and radio illustrate it well. In the N.T. (Ac 24:4; 1Th 2:18; Ga 5:7; Ro 15:22; 1Pe 3:7). "That I may not cut in on or interrupt thee further ( $\varepsilon \pi \pi \lambda \varepsilon \iota o v$ ) in thy reforms." Flattery still.

Of thy clemency ( $\tau \eta \sigma \eta \varepsilon \pi \iota \varepsilon เ \kappa \varepsilon ı \alpha$ ). Instrumental case of old word from $\varepsilon \pi เ \varepsilon ı \kappa \eta \zeta$ and this from $\varepsilon \pi$ and $\varepsilon$ ккоৎ (reasonable, likely, fair). "Sweet Reasonableness" (Matthew Arnold), gentleness, fairness. An $\varepsilon \pi เ \varepsilon ı \kappa \eta \varsigma$ man is "one who makes reasonable concessions" (Aristotle, Eth. V. 10), while סıкaıoc is "one who insists on his full rights" (Plato, Leg. 757 D) as translated by Page.

A few words ( $\sigma \nu v \tau o \mu \omega \varsigma$ ). Old adverb from $\sigma \nu v \tau \varepsilon \mu \nu \omega$, to cut together (short), abbreviate. Like $\delta \iota \alpha \beta \rho \alpha \chi \varepsilon \omega v$ in Heb 13:22. In N.T. only here and Mr 16 (shorter conclusion).

Acts 24:5
For we have found ( $\varepsilon \cup \rho o v \tau \varepsilon \varsigma \gamma \alpha \rho$ ). Second aorist active participle of $\varepsilon v \rho เ \sigma \kappa \omega$, but without a principal verb in the sentence. Probably we have here only a "summary of the charges against Paul" (Page).

A pestilent fellow ( $\lambda_{o l \mu}(\mathrm{v})$. An old word for pest, plague, pestilence, Paul the pest. In N.T. only here and Lu 21:11 ( $\lambda о \iota \mu о$ ка $\lambda \iota \mu$, pestilences and famines) which see. Latin pestis. Think of the greatest preacher of the ages being branded a pest by a contemporary hired lawyer.

A mover of insurrections (кıvovv $\alpha \alpha \sigma \tau \sigma \varepsilon ı$ ). This was an offence against Roman law if it could be proven. "Plotted against at Damascus, plotted against at Jerusalem, expelled from Pisidian Antioch, stoned at Lystra, scourged and imprisoned at Philippi, accused of treason at Thessalonica, haled before the proconsul at Corinth, cause of a serious riot at Ephesus, and now finally of a riot at Jerusalem" (Furneaux). Specious proof could have been produced, but was not. Tertullus went on to other charges with which a Roman court had no concern (instance Gallio in Corinth).

Throughout the world ( $\kappa \alpha \tau \alpha \tau \eta \nu$ о七коч $\mu \varepsilon \nu \eta \nu$ ). The Roman inhabited earth $(\gamma \eta \nu)$ as in 17:6.

A ringleader of the sect of the Nazarenes ( $\pi \rho \omega \tau \sigma \sigma \tau \alpha \tau \eta \nu \tau \eta \varsigma \tau \omega \nu \mathrm{Na} \zeta \omega \rho \alpha \iota \omega \nu \alpha \rho \varepsilon \sigma \varepsilon \omega \varsigma)$. $\Pi \rho \omega \tau о \sigma \tau \alpha \tau \eta \varsigma$ is an old word in common use from $\pi \rho \omega \tau \circ \varsigma$ and $\iota \sigma \tau \eta \mu$, a front-rank man, a
chief, a champion. Here only in the N.T. This charge is certainly true. About "sect" (aıpعбı¢)
 Lu 18:37; Joh 18:5,7; 19:19; Ac 2:22; 3:6; 4:10; 6:14; $22: 8 ; 26: 9$ ). The disciple is not above his Master. There was a sneer in the term as applied to Jesus and here to his followers.

Acts 24:6
Assayed to profane ( $\varepsilon \pi \varepsilon เ \rho a \sigma \varepsilon v \beta \varepsilon \beta \eta \lambda \omega \sigma \alpha$ ). A flat untruth, but the charge of the Asian Jews ( 21:28-30). Verbum optum ad calumnian (Bengel).

We seized ( $\varepsilon \kappa \rho \alpha \tau \eta \sigma \alpha \mu \varepsilon v)$ ) As if the Sanhedrin had arrested Paul, Tertullus identifying himself with his clients. But it was the mob ( $21: 28-31$ ) that attacked Paul and Lysias who rescued him (21:32ff. ).

Acts 24:7
This whole verse with some words at the end of verse 6 and the beginning of verse 8 in the Textus Receptus ("And would have judged according to our law. But the chief captain Lysias came upon us, and with great violence took him away out of our hands, commanding his accusers to come unto thee") is absent from Aleph A B H L P 61 (many other cursives) Sahidic Bohairic. It is beyond doubt a later addition to the incomplete report of the speech of Tertullus. As the Revised Version stands, verse 8 connects with verse 6 . The motive of the added words is clearly to prejudice Felix against Lysias and they contradict the record in Ac 21 . Furneaux holds them to be genuine and omitted because contradictory to Ac 21 . More likely they are a clumsy attempt to complete the speech of Tertullus.

Acts 24:8
From whom ( $\pi \alpha \rho^{\prime}$ ov). Referring to Paul, but in the Textus Receptus referring to Lysias.
By examining him thyself (avto̧ $\alpha$ vaкрıva¢). Not by torture, since Paul was a Roman citizen, but by hearing what Paul has to say in defence of himself. Avak $\rho v \omega$ is to examine thoroughly up and down as in Lu 23:14 .

Acts 24:9
Joined in the charge ( $\sigma \cup v \varepsilon \pi \varepsilon \theta \varepsilon v \tau o$ ). Second aorist middle indicative of $\sigma \cup v \varepsilon \pi \iota \tau 1 \theta \eta \mu$, old verb, double compound, to place upon ( $\varepsilon \pi$ ) together with ( $\sigma v \nu$ ), to make a joint attack, here only in the N.T.

Affirming ( $\varphi \alpha \sigma \kappa о v \tau \varepsilon \varsigma)$. Alleging, with the accusative in indirect assertion as in 25:19; Ro 1:22 (nominative with infinitive, Robertson, Grammar, p. 1038).

Were so (out $\omega \varsigma \varepsilon \chi \varepsilon เ v)$, "held thus," common idiom.
Acts 24:10
 absolute again with first aorist active participle of $v \varepsilon v \omega$, to give a nod, old word, in N.T. only here and Joh 13:24 . "The governor nodding to him."

Forasmuch as I know ( $\varepsilon \pi \iota \sigma \tau \alpha \mu \varepsilon v o \varsigma)$. Knowing, from $\varepsilon \pi \iota \sigma \tau \alpha \mu \alpha$.

That thou hast been of many years a judge ( $\varepsilon \kappa \pi о \lambda \lambda \omega v \varepsilon \tau \omega v$ ov $\tau \alpha \sigma \varepsilon \kappa \rho \iota \tau \eta v$ ). The
 as far as he can in the way of a compliment. For seven years Felix has been governor, ovta being a sort of progressive present participle with $\varepsilon \kappa \pi о \lambda \lambda \omega v \varepsilon \tau \omega \nu$ (Robertson, Grammar, p. 892).

Cheerfully ( $\varepsilon v \theta v \mu \omega \varsigma)$. Old adverb from $\varepsilon v \theta v \mu \circ \varsigma(\varepsilon v$ and $\theta v \mu \circ \varsigma$, good spirit), here only in N.T.

Make my defence ( $\alpha \pi о \lambda о \gamma о \cup \mu \alpha)$. Old and regular word for this idea as in Lu 21:14 which see.

Acts 24:11
Seeing that thou canst take knowledge ( $\delta v v \alpha \mu \varepsilon v o v ~ \sigma o v ~ \varepsilon \pi \imath \gamma v \omega v \alpha)$. Genitive absolute again. The same word and form ( $\varepsilon \pi \iota \gamma v \omega v \alpha)$ used by Tertullus, if in Greek, in verse 8 to Felix. Paul takes it up and repeats it.

Not more than twelve days (ov $\pi \lambda \varepsilon \iota \circ v \varsigma \eta \mu \varepsilon \rho \alpha \delta \omega \delta \varepsilon \kappa \alpha$ ). Here $\eta$ (than) is absent without change of case to the ablative as usually happens. But this idiom is found in the Koine (Robertson, Grammar, p. 666).

Since ( $\left.\alpha \varphi^{\prime} \eta \varsigma\right)$. Supply $\eta \mu \varepsilon \rho \alpha \varsigma$, "from which day."
To worship ( $\pi \rho о \sigma \kappa v v \eta \sigma \omega v$ ). One of the few examples of the future participle of purpose so common in the old Attic.

Acts 24:12
Disputing ( $\delta \iota \lambda \lambda \varepsilon \gamma \circ \mu \varepsilon v o v)$. Simply conversing, discussing, arguing, and then disputing, common verb in old Greek and in N.T. (especially in Acts).
 to make an onset or rush. Only twice in the N.T., 2Co 11:28 (the pressure or care of the churches) and here (making a rush of a crowd). The papyri give examples also for "onset." So Paul denies the two charges that were serious and the only one that concerned Roman law (insurrection).

Acts 24:13
Prove ( $\pi \alpha \rho \alpha \sigma \tau \eta \sigma \alpha$ ). First aorist active infinitive of $\pi \alpha \rho เ \sigma \tau \eta \mu$, to place beside. They have made "charges," mere assertions. They have not backed up these charges with proof, "nor can they," says Paul.

Now (vuv). As if they had changed their charges from the cries of the mob in Jerusalem which is true. Paul has no hired lawyer to plead for him, but he has made a masterly plea for his freedom.

Acts 24:14
I confess ( $о \mu \mathrm{o} \lambda \mathrm{o} \gamma \omega$ ). The only charge left was that of being a ringleader of the sect of the Nazarenes. This Paul frankly confesses is true. He uses the word in its full sense. He is "guilty" of that.

After the Way ( $\kappa \alpha \tau \alpha \tau \eta v$ oסov). This word Paul had already applied to Christianity ( 22:4). He prefers it to "sect" (aıpءбıv which means a choosing, then a division). Paul claims Christianity to be the real (whole, catholic) Judaism, not a "sect" of it. But he will show that Christianity is not a deviation from Judaism, but the fulfilment of it (Page) as he has already shown in Ga 3; Ro 9 .

So serve I the God of our fathers (ov $\tau \omega \varsigma \lambda \alpha \tau \rho \varepsilon v \omega \tau \omega \pi \alpha \tau \rho \omega \omega \omega \theta \varepsilon \omega$ ). Paul has not stretched the truth at all. He has confirmed the claim made before the Sanhedrin that he is a spiritual Pharisee in the truest sense ( $23: 6$ ). He reasserts his faith in all the law and the prophets, holding to the Messianic hope. A curious "heretic" surely!

Which these themselves also look for ( $\eta \nu$ ка $\alpha \cup \tau о ~ o v \tau о ~ \pi \rho о \sigma \delta \varepsilon \chi о v \tau \alpha)$. Probably with a gesture towards his accusers. He does not treat them all as Sadducees. See Tit 2:13 for similar use of the verb ( $\pi \rho о \sigma \delta \varepsilon \chi о \mu \varepsilon v o ~ \tau \eta \nu \mu \alpha \kappa \alpha \rho ı \alpha v \varepsilon \lambda \pi \iota \delta \alpha$, looking for the happy hope).

Acts 24:15
That there shall be a resurrection ( $\alpha v \alpha \sigma \tau \alpha \sigma เ \nu \mu \varepsilon \lambda \lambda \varepsilon ı \nu \varepsilon \sigma \varepsilon \sigma \theta \alpha$ ). Indirect assertion with infinitive and accusative of general reference ( $\alpha v \alpha \sigma \tau \alpha \sigma เ v$ ) after the word $\varepsilon \lambda \tau \iota \delta \alpha$ (hope). The future infinitive $\varepsilon \sigma \varepsilon \sigma \theta \alpha$ after $\mu \varepsilon \lambda \lambda \varepsilon เ v$ is also according to rule, $\mu \varepsilon \lambda \lambda \omega$ being followed by either present, aorist, or future infinitive (Robertson, Grammar, pp. 870, 877, 878).

Both of the just and the unjust ( $\delta ⿺ 𠃊 \alpha \omega \omega \tau \varepsilon \kappa \alpha \alpha \delta ı \kappa \omega v$ ). Apparently at the same time as in Joh 5:29 (cf. Ac 17:31f. ). Gardner thinks that Luke here misrepresents Paul who held to no resurrection save for those "in Christ," a mistaken interpretation of Paul in my opinion. The Talmud teaches the resurrection of Israelites only, but Paul was more than a Pharisee.

Acts 24:16
Herein ( $\varepsilon v \tau 0 v \tau \omega$ ). His whole confession of belief in verses 14,15 .
Do I also exercise myself ( $\kappa \alpha \alpha \cup \tau о \varsigma ~ \alpha \sigma \kappa \omega$ ). "Do I also myself take exercise," take pains, labour, strive. Old word in Homer to work as raw materials, to adorn by art, then to drill. Our word ascetic comes from this root, one who seeks to gain piety by rules and severe hardship. Paul claims to be equal to his accusers in efforts to please God.

Void of offence (алробколоv). This word belongs to the papyri and N.T. (only in Paul), not in the ancient writers. The papyri examples (Moulton Milligan, Vocabulary) use the word to mean "free from hurt or harm." It is a privative and $\pi \rho \circ \sigma \kappa о \pi \tau \omega$ (to cut or stumble against). Page likes "void of offence" since that can be either active "not stumbling" as in Php 1:10 or passive "not stumbled against" as in 1Co 10:32 (the first toward God and the second toward men), the only other N.T. examples. Hence the word here appears in both senses (the first towards God, the second towards men). Paul adds "alway" ( $\delta \iota \alpha \pi \alpha \tau \tau \varsigma$ ), a bold claim for a consistent aim in life. "Certainly his conscience acquitted him of having caused any offence to his countrymen" (Rackham). Furneaux thinks that it must have been wormwood and gall to Ananias to hear Paul repeat here the same words because of which he had ordered Paul to be smitten on the mouth (23:1f. ).

Acts 24:17
After many years ( $\delta \iota^{\prime} \varepsilon \tau \omega \nu \pi \lambda \varepsilon \iota o v \omega \nu$ ). "At an interval ( $\delta \iota \alpha$ ) of more ( $\pi \lambda \varepsilon \iota o v \omega \nu$ ) years" (than a few, one must add), not "after many years." If, as is likely Paul went up to Jerusalem in Ac 18:22, that was some five years ago and would justify " $\pi \lambda \varepsilon \iota \omega \nu \omega \nu$ " (several years ago or some years ago).
 of the future participle of purpose in the N.T. These "alms" (on $\varepsilon \lambda \varepsilon \eta \mu \circ \sigma v v a \varsigma$ see on $\mathrm{Mt} 6: 1,4$; Ac 10:2, common in Tobit and is in the papyri) were for the poor saints in Jerusalem (1Co 16:1-4; 2Co 8; 9; Ro 15:26) who were none the less Jews. "And offerings" ( $\kappa \alpha \pi \rho о \sigma \varphi о \rho а \varsigma)$. The very word used in 21:26 of the offerings or sacrifices made by Paul for the four brethren and himself. It does not follow that it was Paul's original purpose to make these "offerings" before he came to Jerusalem (cf. 18:18). He came up to worship (verse 11) and to be present at Pentecost (20:16).

Acts 24:18
Amidst which ( $\varepsilon v \alpha \wedge \lambda$ ). That is, "in which offerings" (in presenting which offerings, 21:27).

They found me (my accusers here present, $\varepsilon v \rho o v \mu \varepsilon$ ),
purified in the temple ( $\eta \gamma \nu \iota \sigma \mu \varepsilon \nu o \nu \varepsilon \nu \tau \omega \iota \varepsilon \rho \omega$ ). Perfect passive participle of $\alpha \gamma \nu \iota \omega$ (same verb in 21:24,26) state of completion of the Jewish sacrifices which had gone on for seven days ( $21: 27$ ), the very opposite of the charges made.

With no crowd (ov $\mu \varepsilon \tau \alpha$ o $\chi \lambda \mathrm{ov}$ ). "Not with a crowd" till the Asiatic Jews gathered one (21:27).

Nor yet with tumult (ov $\delta \varepsilon \mu \varepsilon \tau \alpha$ Oo $\rho \cup \beta$ ov). They made the tumult (27:30), not Paul. Till they made the stir, all was quiet.

Acts 24:19
But certain Jews from Asia ( $\tau \iota v \varepsilon \varsigma \delta \varepsilon \alpha \pi о \tau \eta \varsigma A \lambda \iota a \varsigma$ Iov $\delta \alpha \iota$ ). No verb appears in the Greek for these words. Perhaps he meant to say that "certain Jews from Asia charged me with doing these things." Instead of saying that, Paul stops to explain that they are not here, a thoroughly Pauline anacoluthon (2Co 7:5) as in 26:9. "The passage as it stands is instinct with life, and seems to exhibit the abruptness so characteristic of the Pauline Epistles" (Page).

Who ought to have been here before thee (ovc $\varepsilon \delta \varepsilon \varepsilon \pi \sigma o v \pi \alpha \rho \varepsilon เ v \alpha$ ). This use of $\varepsilon \pi$ with genitive of the person is common. The imperfect indicative with verbs of necessity and obligation to express failure to live up to it is common in Greek (Robertson, Grammar, pp. 919-21). "The accusers who were present had not witnessed the alleged offence: those who could have given evidence at first-hand were not present" (Furneaux). There was no case in a Roman court. These Asiatic Jews are never heard of after the riot, though they almost succeeded in killing Paul then.

If they had aught against me $(\varepsilon \tau \varepsilon \chi \circ เ \varepsilon \nu \pi \rho \circ \varsigma \varepsilon \mu \varepsilon)$. A condition of the fourth class or undetermined with less likelihood of being determined ( $\varepsilon$ with the optative, Robertson, Grammar, p. 1021). This is a "mixed condition" (op.cit., p. 1022) with a conclusion of the second class.

Acts 24:20
These men themselves (avto outo). Since the Asiatic Jews are not present and these men are.

Wrong doing ( $\alpha \delta \star \kappa \eta \mu \alpha)$. Or misdeed. Old word from $\alpha \delta ı \kappa \varepsilon \omega$, to do wrong. In the N.T. only here and Ac 18:14; Re 18:5. Paul uses " $\alpha \delta \iota \kappa \eta \mu \alpha$ " from the standpoint of his accusers. "To a less sensitive conscience his action before the Sanhedrin would have seemed venial enough" (Furneaux).

When I stood ( $\sigma \tau \alpha v \tau \circ \varsigma \mu \circ v$ ). Genitive absolute, second aorist active participle of $\iota \sigma \tau \eta \mu$ (intransitive), "when I took my stand."

Before the council ( $\varepsilon \pi \tau \tau v \sigma v v \varepsilon \delta \rho \circ 0)$ ). Same use of $\varepsilon \pi$ with genitive as in verse 19 .
Acts 24:21
Except it be ( $\varepsilon$ ). Literally, "than," but after interrogative $\tau=\tau \alpha \lambda \lambda o$ "what else than."
For this one voice ( $\pi \varepsilon \rho \mu \downarrow \varsigma \tau \alpha v \tau \eta \varsigma \varphi \omega \nu \eta \varsigma)$. The normal Greek idiom with the attributive use of outos calls for the article before $\mu \mu \varsigma$, though some inscriptions show it as here (Robertson, Grammar, p. 702).

That $(\eta \varsigma)$. Genitive of the relative attracted to the case of the antecedent phon ${ }^{\text {s. }}$.
I cried (єкєкра $\xi \alpha$ ). Reduplicated aorist as is usual with this verb in the LXX (Jud 3:15 ). Robertson, Grammar, p. 348.

Touching ( $\pi \varepsilon \rho$ ). Concerning (around, about).
I am called in question (кріvона). As in 23:6.
Before you ( $\varepsilon \varphi^{\prime} v \mu \omega v$ ). Same idiom as in verses 19,20.
Acts 24:22
Having more exact knowledge ( $\alpha \kappa \rho ı ß \varepsilon \sigma \tau \varepsilon \rho \circ v \varepsilon \iota \delta \omega \varsigma)$ ). "Knowing" (second perfect active participle of ot $\delta \alpha$ ) "more accurately" (comparative of adverb $\alpha \kappa \rho(\beta \omega \varsigma)$. More accurately than what? Than the Sanhedrin supposed he had "concerning the Way" ( $\tau \alpha \pi \varepsilon \rho \tau \eta \varsigma$ oסov, the things concerning the Way, common in Acts for Christianity). How Felix had gained this knowledge of Christianity is not stated. Philip the Evangelist lived here in Caesarea and there was a church also. Drusilla was a Jewess and may have told him something. Besides, it is wholly possible that Felix knew of the decision of Gallio in Corinth that Christianity was a religio licita as a form of Judaism. As a Roman official he knew perfectly well that the Sanhedrin with the help of Tertullus had failed utterly to make out a case against Paul. He could have released Paul and probably would have done so but for fear of offending the

Jews whose ruler he was and the hope that Paul (note "alms" in verse 17) might offer him bribes for his liberty.

Deferred them ( $\alpha v \varepsilon \beta \alpha \lambda \varepsilon \tau \sigma$ avtov¢). Second aorist middle indicative of $\alpha v \alpha \beta \alpha \lambda \lambda \omega$, old verb (only here in N.T.) to throw or toss up, to put back or off, in middle to put off from one, to delay, to adjourn. Felix adjourned the case without a decision under a plausible pretext, that he required the presence of Lysias in person, which was not the case. Lysias had already said that Paul was innocent and was never summoned to Caesarea, so far as we know. Since Paul was a Roman citizen, Lysias could have thrown some light on the riot, if he had any.

Shall come down (катаßๆ). Second aorist active subjunctive of кат $\alpha \beta a \iota v \omega$.
I will determine your matter ( $\delta \iota \alpha \gamma \nu \omega \sigma о \mu \alpha \tau \alpha \kappa \alpha \theta^{\prime} \nu \mu \alpha \varsigma$ ). Future middle of $\delta \iota \alpha \downarrow \nu \omega \sigma \kappa \omega$, old and common verb to know accurately or thoroughly ( $\delta \dot{\alpha}$ ). In the N.T. only here (legal sense) and 23:15. "The things according to you" (plural, the matters between Paul and the Sanhedrin).

Acts 24:23
And should have indulgence ( $\varepsilon \chi \varepsilon เ \nu \tau \varepsilon \alpha v \varepsilon \sigma เ v)$. From $\alpha v ı \eta \mu$, to let loose, release, relax. Old word, in the N.T. only here and 2Th 1:7; 2Co $2: 13 ; 7: 5 ; 8: 13$. It is the opposite of strict confinement, though under guard, "kept in charge" ( $\tau \eta \rho \varepsilon \iota \sigma \theta \alpha)$.

Forbid ( $\kappa \omega \lambda \nu \varepsilon เ v)$. To hinder "no one of his friends" ( $\mu \eta \delta \varepsilon v \alpha \tau \omega \nu \iota \delta \omega \nu \nu$ ). No one of Paul's "own" (cf. 4:23; Joh 1:11) or intimates. Of these we know the names of Luke, Aristarchus, Trophimus, Philip the Evangelist.

Acts 24:24
With Drusilla his wife ( $\sigma \cup v \Delta \rho \circ \cup \sigma \iota \lambda \lambda \eta \tau \eta \iota \delta \iota \alpha \gamma \cup v \alpha \iota \kappa$ ). Felix had induced her to leave her former husband Aziz, King of Emesa. She was one of three daughters of Herod Agrippa I (Drusilla, Mariamne, Bernice). Her father murdered James, her great-uncle Herod Antipas slew John the Baptist, her great-grandfather (Herod the Great) killed the babes of Bethlehem. Perhaps the mention of Drusilla as "his own wife" is to show that it was not a formal trial on this occasion. Page thinks that she was responsible for the interview because of her curiosity to hear Paul.

Sent for ( $\mu \varepsilon \tau \varepsilon \pi \varepsilon \mu \psi \alpha \tau 0$ ). First aorist middle of $\mu \varepsilon \tau \alpha \pi \varepsilon \mu \pi \omega$ as usual (Ac 10:5).
Acts 24:25
Was terrified ( $\varepsilon \mu \varphi \circ \beta \circ \varsigma \gamma \varepsilon v \circ \mu \varepsilon v o \varsigma)$. Ingressive aorist middle of $\gamma เ v o \mu \alpha$, "becoming terrified." $\mathrm{E} \mu \varphi \mathrm{o}$ oc ( $\varepsilon v$ and $\varphi$ оßоৎ) old word, in the N.T. only Lu 24:5; Ac 10:5; 24:25; Re 11:13. Paul turned the tables completely around and expounded "the faith in Christ Jesus"
 concerning "righteousness" ( $\delta$ เкаıобטvŋऽ) which they did not possess, "self-control" or temperance ( $\varepsilon \gamma \kappa \rho \alpha \tau \varepsilon ו \alpha \varsigma)$ which they did not exhibit, and "the judgment to come" ( $\tau 0$ крıатоц то⿱ $\mu \varepsilon \lambda$ догтоц) which was certain to overtake them. Felix was brought under
conviction, but apparently not Drusilla. Like another Herodias her resentment was to be feared (Knowling).

Go thy way for this time ( $\tau 0 \nu v \nu \varepsilon \chi \circ \vee \pi \circ \rho \varepsilon v o v$ ). The ancient Greek has this use of $\tau 0$ $v u v \varepsilon \chi \circ v$ (Tobit 7:11) in the accusative of time, "as for the present or holding the now."

When I have a convenient season ( $\kappa \alpha \iota \rho \circ \nu \mu \varepsilon \tau \alpha \lambda \alpha \beta \omega v$ ). Second aorist active participle of the old verb $\mu \varepsilon \tau \alpha \lambda \alpha \mu \beta \alpha \nu \omega$, to find a share in, to obtain. It was his "excuse" for dodging the personal turn that Paul had given.

Acts 24:26
He hoped withal ( $\alpha \mu \alpha \kappa \alpha \varepsilon \lambda \pi \iota \zeta \omega v$ ). "At the same time also hoping." Paul had mentioned the "alms" ( $24: 17$ ) and that excited the avarice of Felix for "money" ( $\chi \rho \eta \mu \alpha \tau \alpha$ ). Roman law demanded exile and confiscation for a magistrate who accepted bribes, but it was lax in the provinces. Felix had doubtless received them before. Josephus (Ant. XX. 8, 9) represents Felix as greedy for money.

The oftener ( $\pi \nu \kappa \nu о \tau \varepsilon \rho о v)$. Comparative adverb of $\pi \nu \kappa \nu \circ \varsigma$, old word, in N.T. only here and $\operatorname{Lu} 5: 33$ which see and $1 \mathrm{Ti} 5: 23$. Kin to $\pi v \gamma \mu \eta$ (Mr 7:3) which see from $\pi v \kappa \omega$, thick, dense, compact. Paul kept on not offering a bribe, but Felix continued to have hopes (present tense $\varepsilon \lambda \pi \iota \zeta \omega v$ ), kept on sending for him (present tense $\mu \varepsilon \tau \alpha \pi \varepsilon \mu \pi \sigma \mu \varepsilon \nu \circ \varsigma$ ), and kept on communing (imperfect active $\omega \mu \lambda \varepsilon$ from o $\mu \lambda \lambda \varepsilon \omega$, old word as in Ac 20:11; Lu 24:14, which see, only N.T. examples of this word). But he was doomed to disappointment. He was never terrified again.

Acts 24:27
But when two years were fulfilled ( $\delta \iota \varepsilon \tau \iota \varsigma \varsigma \varepsilon \pi \lambda \eta \rho \omega \theta \varepsilon \iota \sigma \eta \varsigma$ ). Genitive absolute first aorist passive of $\pi \lambda \eta \rho \circ \omega$, common verb to fill full. $\Delta \iota \tau \tau \iota a$, late word in LXX and Philo, common in the papyri, in N.T. only here and Ac 28:30. Compound of $\delta \iota \alpha$, two ( $\delta v o, \delta ı \varsigma$ ) and $\varepsilon \tau \circ \varsigma$, year. So Paul lingered on in prison in Caesarea, waiting for the second hearing under Felix which never came. Caesarea now became the compulsory headquarters of Paul for two years. With all his travels Paul spent several years each at Tarsus, Antioch, Corinth, Ephesus, though not as a prisoner unless that was true part of the time at Ephesus for which there is some evidence though not of a convincing kind. We do not know that Luke remained in Caesarea all this time. In all probability he came and went with frequent visits with Philip the Evangelist. It was probably during this period that Luke secured the material for his Gospel and wrote part or all of it before going to Rome. He had ample opportunity to examine the eyewitnesses who heard Jesus and the first attempts at writing including the Gospel of Mark (Lu 1:1-4).

Was succeeded by ( $\varepsilon \lambda \alpha \beta \varepsilon v \delta \iota \alpha \delta o \chi o v)$. Literally, "received as successor." $\Delta \mathrm{t} \alpha \delta o \chi o c$ is an old word from $\delta \iota \alpha \delta \varepsilon \chi \circ \mu \alpha$, to receive in succession ( $\delta \iota \alpha, \delta v o$, two) and occurs here alone in the N.T. Deissmann (Bible Studies, p. 115) gives papyri examples where o סıaסoxo means "higher officials at the court of the Ptolemies," probably "deputies," a usage growing out of
the "successors" of Alexander the Great (Moulton and Milligan's Vocabulary), though here the original notion of "successor" occurs (cf. Josephus, Ant. XX. 8, 9). Luke does not tell why Felix "received" a successor. The explanation is that during these two years the Jews and the Gentiles had an open fight in the market-place in Caesarea. Felix put the soldiers on the mob and many Jews were killed. The Jews made formal complaint to the Emperor with the result that Felix was recalled and Porcius Festus sent in his stead.

Porcius Festus (Поркьov Фŋбтоv). We know very little about this man. He is usually considered a worthier man than Felix, but Paul fared no better at his hands and he exhibits the same insincerity and eagerness to please the Jews. Josephus (Ant. XX. 8, 9) says that "Porcius Festus was sent as a successor to Felix." The precise year when this change occurred is not clear. Albinus succeeded Festus by A.D. 62, so that it is probable that Festus came A.D. 58 (or 59). Death cut short his career in a couple of years though he did more than Felix to rid the country of robbers and sicarii. Some scholars argue for an earlier date for the recall of Felix. Nero became Emperor Oct. 13, A.D. 54. Poppaea, his Jewish mistress and finally wife, may have had something to do with the recall of Felix at the request of the Jews.

Desiring to gain favour with the Jews ( $\theta \varepsilon \lambda \omega \nu \tau \varepsilon \chi \alpha \rho \iota \tau \alpha \kappa \alpha \tau \theta \varepsilon \sigma \theta \alpha$ тоцৎ Iov $\alpha a \iota \iota \varsigma)$. Reason for his conduct. Note second aorist (ingressive) middle infinitive кат $\alpha \theta \varepsilon \sigma \theta a$ from кататı $\theta \eta \mu$, old verb to place down, to make a deposit, to deposit a favour with, to do something to win favour. Only here and 25:9 in N.T., though in some MSS. in Mr 15:46 . It is a banking figure.

Left Paul in bonds (катє入ıлє тоv Паu入ov $\delta \varepsilon \delta \varepsilon \mu \varepsilon v o v)$ ). Effective aorist active indicative of $\kappa \alpha \tau \alpha \lambda \varepsilon ı \pi \omega$, to leave behind. Paul "in bonds" ( $\delta \varepsilon \delta \varepsilon \mu \varepsilon v o v$, perfect passive participle of $\delta \varepsilon \omega$, to bind) was the "deposit" ( $\kappa \alpha \tau \alpha \theta \varepsilon \sigma \theta \alpha)$ for their favour. Codex Bezae adds that Felix left Paul in custody "because of Drusilla" ( $\delta \iota \alpha \Delta \rho o v \sigma i \lambda \lambda \alpha v)$. She disliked Paul as much as Herodias did John the Baptist. So Pilate surrendered to the Jews about the death of Jesus when they threatened to report him to Caesar. Some critics would date the third group of Paul's Epistles (Philippians, Philemon, Colossians, Ephesians) to the imprisonment here in Caesarea, some even to one in Ephesus. But the arguments for either of these two views are more specious than convincing. Furneaux would even put $2 \mathrm{Ti} 4: 9-22$ here in spite of the flat contradiction with Ac 21:29 about Trophimus being in Jerusalem instead of Miletus (2Ti 4:20) , a "mistake" which he attributes to Luke! That sort of criticism can prove anything.

## Acts 25

Acts 25:1
Having come into the province ( $\varepsilon \pi \iota \beta \alpha \varsigma \tau \eta \varepsilon \pi \alpha \rho \chi \varepsilon \iota \alpha)$. Second aorist active participle of $\varepsilon \pi \iota \beta \alpha \iota v \omega$, to set foot upon. Literally, "Having set foot upon his province." E $\pi \alpha \rho \chi \varepsilon \iota \alpha$ is a late word for province, in N.T. only here and 23:34. Judea was not strictly a province, but a department (Page) of the province of Syria which was under a propraetor ( $\lambda \varepsilon \gamma \alpha \tau v \varsigma$ Xacoapıৎ) while Judea was under a procurator ( $\varepsilon \pi i \tau \rho о \pi о \varsigma)$.

After three days ( $\mu \varepsilon \tau \alpha \tau \rho \varepsilon \iota \varsigma \eta \mu \varepsilon \alpha \varsigma)$. So in Ac 28:17 in Rome. That is on the third day, with a day of rest in between. Precisely the language used of the resurrection of Jesus "after three days" = "on the third day." So by common usage then and now.

Acts 25:2
The principal men ( $0 \pi \rho \omega \tau 0$ ). The first men, the leading men of the city, besides the chief priests. In verse 15 we have "the chief priests and the elders." These chief men among the Jews would desire to pay their respects to the new Procurator on his first visit to Jerusalem. There was another high priest now, Ishmael in place of Ananias.

Informed him against Paul ( $\varepsilon v \varepsilon \varphi \alpha \nu \iota \sigma \alpha \nu \alpha v \tau \omega$ ката $\tau о v$ Пav $\lambda o v)$. "This renewal of the charge after two years, on the very first opportunity, is a measure, not only of their unsleeping hatred, but of the importance which they attached to Paul's influence" (Furneaux).

Besought ( $\pi \alpha \rho \varepsilon \kappa \alpha \lambda o v v$ ). Imperfect active, kept on beseeching as a special favour to the Jews.

Acts 25:3
Asking favour against him ( $\alpha \iota \tau о \cup \mu \varepsilon v o \chi \alpha \rho \iota \nu \kappa \alpha \tau^{\prime} \alpha v \tau o v$ ). A favour to themselves (middle voice), not to Paul, but "against" ( $\kappa \alpha \tau^{\prime}$, down, against) him.

That he would send for ( $o \pi \omega \varsigma \mu \varepsilon \tau \alpha \pi \varepsilon \mu \psi \eta \tau \alpha$ ). First aorist middle subjunctive of $\mu \varepsilon \tau \alpha \pi \varepsilon \mu \pi \omega$ (see 24:24,26) with final particle o $\pi \omega \varsigma$ like $\imath v \alpha$. Aorist tense for single case.

Laying wait ( $\varepsilon v \varepsilon \delta \rho a v \pi o t o v \nu \tau \varepsilon \varsigma)$. See on $23: 16$ for the word $\varepsilon v \varepsilon \delta \rho a$. Old idiom (Thucydides) for laying a plot or ambush as here. Only these two uses of $\varepsilon v \varepsilon \delta \rho \alpha$ in N.T. Two years before the Sanhedrin had agreed to the plot of the forty conspirators. Now they propose one on their own initiative.

On the way ( $\kappa \alpha \tau \alpha \tau \eta v$ oסov). Down along, up and down along the way. Plenty of opportunity would occur between Caesarea and Jerusalem for ambush and surprise attacks.

Acts 25:4
Howbeit ( $\mu \varepsilon v o v v$ ). No antithesis expressed, though Page considers $\delta \varepsilon$ in verse 6 to be one. They probably argued that it was easier for one man (Paul) to come to Jerusalem than for many to go down there. But Festus was clearly suspicious (verse 6) and was wholly within his rights to insist that they make their charges in Caesarea where he held court.

Was kept in charge ( $\tau \eta \rho \varepsilon \iota \sigma \theta \alpha$ ). Present passive infinitive of $\tau \eta \rho \varepsilon \omega$ in indirect assertion. Hot with finite verb is more common after алокрıvoua, but the infinitive with the accusative of general reference is proper as here (Robertson, Grammar, p. 1036).

Shortly ( $\varepsilon \nu \tau \alpha \chi \varepsilon$ ). In quickness, in speed. Old and common usage, seen already in Lu 18:8; Ac 12:7; 22:18. Festus is clearly within his rights again since his stay in Caesarea had been so brief. He did go down in "eight or ten days" (verse 6). Luke did not consider the matter important enough to be precise.

Acts 25:5
Them therefore which are of power among you (o ouv $\varepsilon v v \mu i v \delta u v a \tau o)$. "The mighty ones among you," "the men of power" (סuvato) and authority, "the first men," the Sanhedrin, in other words. Note change here by Luke from indirect discourse in verse 4, to direct in verse 5 ( $\varphi \eta \sigma \tau$, says he).

Go down with me ( $\sigma \cup v \kappa \alpha \tau \alpha \beta \alpha \nu \tau \varepsilon \varsigma)$ ). Double compound ( $\sigma \cup \nu, \kappa \alpha \tau \alpha$ ) second aorist active participle of $\sigma v v \kappa \alpha \tau \alpha \beta \alpha \iota v \omega$. It was a fair proposal.

If there is anything amiss in the man ( $\varepsilon \tau \varepsilon \sigma \tau \iota v \varepsilon \tau \tau \omega \alpha v \delta \rho \alpha \tau о \pi \sigma v)$. Condition of the first class, assuming that there is (to be courteous to them), but not committing himself on the merits of the case. Атопоv is an old word, specially common in Plato, meaning "out of place." In N.T. only here and Lu 23:41 which see; Ac 28:6; $2 \mathrm{Th} 3: 2$. Note present tense active voice of катп $\gamma о \rho \varepsilon \iota \tau \omega \sigma \alpha \nu$ (imperative) of катпүор $\omega$, repeat their accusations.

Acts 25:6
On the morrow ( $\tau \eta \varepsilon \pi \alpha u \rho \circ o v$ ). Locative case of the article with $\eta \mu \varepsilon \rho \alpha$ understood (erauplov, adverb, tomorrow). Festus lost no time for the chief men had come down with him.

Sat on the judgment seat ( $\kappa \alpha \theta ı \sigma \alpha \varsigma \varepsilon \pi$ тov $\beta \eta \mu \alpha \tau \circ \varsigma)$. A legal formality to give weight to the decision. Ingressive aorist active participle. For this use of $\beta \eta \mu \alpha$ for judgment seat see on Mt. 27:19; Joh 19:13; Acts 12:21; 18:12; 25:10,17 . Same phrase repeated in 25:17.

To be brought ( $\alpha \chi \theta \eta \nu \alpha$ ). First aorist passive infinitive of $\alpha \gamma \omega$ after $\varepsilon \kappa \varepsilon \lambda \varepsilon \cup \sigma \varepsilon \nu$ (commanded). Same words repeated in 25:17 by Festus.

Acts 25:7
When he was come ( $\pi \alpha \rho \alpha \gamma \varepsilon v o \mu \varepsilon v o v ~ \alpha u \tau o v) . ~ G e n i t i v e ~ a b s o l u t e ~ o f ~ c o m m o n ~ v e r b ~$ $\pi \alpha \rho a \gamma ı v o \mu \alpha$ (cf. 24:24).

Which had come down (о кат $\alpha \beta \varepsilon \beta \eta \kappa о \tau \varepsilon \varsigma)$. Perfect active participle of $\kappa \alpha \tau \alpha \beta \alpha \downarrow v \omega$. They had come down on purpose at the invitation of Festus (verse 5), and were now ready.

Stood round about him ( $\pi \varepsilon \rho เ \varepsilon \sigma \tau \eta \sigma \alpha v \alpha v \tau o v)$. Second aorist (ingressive) active (intransitive) of $\pi \varepsilon \rho \mu \sigma \tau \eta \mu$, old verb, "Took their stand around him," "periculum intentantes" (Bengel). Cf. Lu 23:10 about Christ. They have no lawyer this time, but they mass their forces so as to impress Festus.

Bringing against him (катачєроvтєৎ). Bearing down on. See on 20:9;26:10, only N.T. examples of this ancient verb.

Many and grievous charges ( $\pi о \lambda \lambda \alpha \kappa \alpha \beta \alpha \rho \varepsilon \alpha \alpha \iota \tau \iota \omega \mu \alpha \tau \alpha$ ). This word $\alpha \iota \tau \iota \omega \mu \alpha$ for old form aıtıa $\mu \alpha$ is found in one papyrus (Moulton and Milligan's Vocabulary) in sense of "blame." But the charges were no "heavier" than those made by Tertullus ( 24:5-8). Paul's reply proves this and they were also probably on court record (Furneaux). See this adjective $\beta \alpha \rho u \varsigma$ (heavy) used with $\lambda$ ико (wolves) in 20:29.

Which they could not prove ( $\alpha$ ovк $\tau \sigma \chi$ vov $\alpha \pi o \delta \varepsilon \iota \xi \alpha$ ). Imperfect active of $\sigma \chi \nu \omega$, to have strength or power as in 19:16,20. Repetition and reiteration and vehemence took the place of proof ( $\alpha \pi \sigma \delta \varepsilon \iota \xi \alpha$, first aorist active infinitive of $\alpha \pi \sigma \delta \varepsilon เ \kappa \nu v \mu$, to show forth, old verb, in N.T. only here, Ac 2:22 which see and 1Co 4:9).

Acts 25:8
 present middle participle of $\alpha \pi \sigma \lambda о \gamma \varepsilon о \mu \alpha$, old verb to make defence as in 19:33; 24:10; 26:1,2 . The recitative ot of the Greek before a direct quotation is not reproduced in English.

Have I sinned at all ( $\tau \eta \mu \alpha \rho \tau \sigma v$ ). Constative aorist active indicative of $\alpha \mu \alpha \rho \tau \alpha v \omega$, to miss, to sin. The $\tau$ is cognate accusative (or adverbial accusative). Either makes sense. Paul sums up the charges under the three items of law of the Jews, the temple, the Roman state (Caesar). This last was the one that would interest Festus and, if proved, would render Paul guilty of treason ( $\mu \alpha j \varepsilon \sigma \tau \alpha \varsigma)$. Nero was Emperor A.D. 54-68, the last of the emperors with any hereditary claim to the name "Caesar." Soon it became merely a title like Kaiser and Czar (modern derivatives). In Acts only "Caesar" and "Augustus" are employed for the Emperor, not "King" (Baбı入عuৎ) as from the time of Domitian. Paul's denial is complete and no proof had been presented. Luke was apparently present at the trial.

Acts 25:9
Desiring to gain favour with the Jews $(\theta \varepsilon \lambda \omega \nu \tau \circ \iota \varsigma$ Iov $\delta \alpha \iota \iota \varsigma ~ \chi \alpha \rho ı \nu \alpha \tau \alpha \theta \varepsilon \sigma \theta \alpha)$. Precisely the expression used of Felix by Luke in 24:27 which see. Festus, like Felix, falls a victim to fear of the Jews.

Before me ( $\varepsilon \pi^{\prime} \varepsilon \mu \mathrm{ov}$ ). Same use of $\varepsilon \pi$ with the genitive as in 23:30; 24:19,21. Festus, seeing that it was unjust to condemn Paul and yet disadvantageous to absolve him (Blass), now makes the very proposal to Paul that the rulers had made to him in Jerusalem (verse 3). He added the words " $\varepsilon \pi^{\prime} \varepsilon \mu \circ v$ " (before me) as if to insure Paul of justice. If Festus was unwilling to give Paul justice in Caesarea where his regular court held forth, what assurance was there that Festus would give it to him at Jerusalem in the atmosphere of intense hostility to Paul? Only two years ago the mob, the Sanhedrin, the forty conspirators had tried to take his life in Jerusalem. Festus had no more courage to do right than Felix, however plausible his language might sound. Festus also, while wanting Paul to think that he would in Jerusalem "be judged of these things before me," in reality probably intended to turn Paul over to the

Sanhedrin in order to please the Jews, probably with Festus present also to see that Paul received justice ( $\mu \varepsilon \pi \rho \varepsilon \sigma \varepsilon v \tau \varepsilon$ ). Festus possibly was surprised to find that the charges were chiefly against Jewish law, though one was against Caesar. It was not a mere change of venue that Paul sensed, but the utter unwillingness of Festus to do his duty by him and his willingness to connive at Jewish vengeance on Paul. Paul had faced the mob and the Sanhedrin in Jerusalem, two years of trickery at the hands of Felix in Caesarea, and now he is confronted by the bland chicanery of Festus. It is too much, the last straw.

Acts 25:10
I am standing before Caesar's judgment-seat ( $\mathrm{H} \varepsilon \sigma \tau \omega \varsigma \varepsilon \pi$ тоv $\beta \eta \mu \alpha \tau \circ \varsigma$ K $\alpha \iota \sigma \rho \circ \varsigma \varepsilon \mu \mu$ ). Periphrastic present perfect indicative ( $\varepsilon \sigma \tau \omega \varsigma \varepsilon \mu)$, second perfect participle $\varepsilon \sigma \tau \omega \varsigma$ of $\iota \sigma \tau \eta \mu$ (intransitive). Paul means to say that he is a Roman citizen before a Roman tribunal. Festus was the representative of Caesar and had no right to hand him over to a Jewish tribunal. Festus recognized this by saying to Paul "wilt thou" ( $\theta \varepsilon \lambda \varepsilon \varepsilon \varsigma)$.

Where I ought to be judged (ov $\mu \varepsilon \delta \varepsilon \kappa \rho \iota v \varepsilon \sigma \theta \alpha$ ). Rather, "Where I must be judged," for $\delta \varepsilon$ expresses necessity (it is necessary). Paul exposes the conduct of Festus with merciless precision.

As thou also very well knowest ( $\omega \varsigma \kappa \alpha \sigma v \kappa \alpha \lambda \lambda \iota \circ \vee \varepsilon \pi \iota \gamma \iota \omega \omega \sigma \kappa \varepsilon \iota)$ ). "As thou also dost understand (hast additional knowledge, $\varepsilon \pi \iota \gamma \iota v \omega \sigma \kappa \varepsilon เ \varsigma)$ better" (than thou art willing to admit). That this is Paul's meaning by the use of the comparative к $\alpha \lambda \lambda \iota \circ$ (positive $\kappa \alpha \lambda \omega \varsigma$ ) is made plain by the confession of Festus to Agrippa in verse 18. Paul says that Festus knows that he has done no wrong to the Jews at all (ouסsv $\eta \delta$ ккпка) and yet he is trying to turn him over to the wrath of the Jews in Jerusalem.

Acts 25:11
If I am a wrong-doer ( $\varepsilon \mu \varepsilon v$ ovv $\left.\alpha \delta_{i \kappa \omega}\right)$. Condition of the first class with $\varepsilon$ and the present active indicative of $\alpha \delta \iota \kappa \varepsilon \omega$ ( $\alpha$ privative and $\delta$ เкף): "If I am in the habit of doing injustice," assuming it to be true for the sake of argument.

And have committed anything worthy of death ( $\kappa \alpha \alpha \xi \circ v \theta \alpha v \alpha \tau о v \pi \varepsilon \pi \rho \alpha \chi \alpha)$ ). Same condition with the difference in tense ( $\pi \varepsilon \pi \rho \alpha \chi \alpha$, perfect active indicative) of a single case instead of a general habit. Assuming either or both Paul draws his conclusion.

I refuse not to die (ov $\pi \alpha \rho \alpha \iota \tau о ч \mu \alpha$ to $\alpha \pi о \theta \alpha v \varepsilon เ v)$. Old verb to ask alongside, to beg from, to deprecate, to refuse, to decline. See on Lu 14:18f. Josephus (Life, 29) has $\theta$ aveiv ov $\pi \alpha \rho \alpha ı \tau о \nu \mu \alpha$. Here the articular second aorist active infinitive is in the accusative case the object of $\pi \alpha \rho \alpha \iota \tau 0 \cup \mu \alpha$ : "I do not beg off dying from myself."

But if none of these things is ( $\varepsilon \delta \varepsilon$ ou $\delta \varepsilon v \varepsilon \sigma \tau \iota v$ ). $\Delta \varepsilon$ here is contrasted with $\mu \varepsilon v$ just before. No word for "true" in the Greek. Eбтıv ("is") in the Greek here means "exists." Same condition (first class, assumed as true).

Whereof these accuse me ( $\omega \nu$ оv $\frac{\kappa \alpha \tau \eta \gamma о \rho о v \sigma ı \nu ~}{\mu} \circ \boldsymbol{v}$ ). Genitive of relative ov by attraction from $a$ (accusative with $\kappa \alpha \tau \eta \gamma \rho \rho \sigma \sigma \iota v$ ) to case of the unexpressed antecedent $\tau o v \tau \omega v$ ("of these things"). Mov is genitive of person after ка兀пүороvбıv.

No man can give me up to them (ov $\delta \varepsilon ı \varsigma ~ \mu \varepsilon \delta v v \alpha \tau \alpha \alpha v \tau о \iota ~ \chi \alpha \rho ı \sigma \alpha \sigma \theta \alpha) . ~ " C a n " ~ l e g a l l y . ~$ Paul is a Roman citizen and not even Festus can make a free gift ( $\chi \alpha \rho \iota \sigma \alpha \sigma \theta \alpha$ ) of Paul to the Sanhedrin.

I appeal unto Caesar (Kaı $\sigma \alpha \rho \alpha \varepsilon \pi \iota \kappa \alpha \lambda о \cup \mu \alpha$ ). Technical phrase like Latin Caesarem appello. Originally the Roman law allowed an appeal from the magistrate to the people (provocatio ad populum), but the emperor represented the people and so the appeal to Caesar was the right of every Roman citizen. Paul had crossed the Rubicon on this point and so took his case out of the hands of dilatory provincial justice (really injustice). Roman citizens could make this appeal in capital offences. There would be expense connected with it, but better that with some hope than delay and certain death in Jerusalem. Festus was no better than Felix in his vacillation and desire to curry favour with the Jews at Paul's expense. No doubt Paul's long desire to see Rome (19:21; Ro 15:22-28) and the promise of Jesus that he would see Rome (Ac 23:11 ) played some part in Paul's decision. But he made it reluctantly for he says in Rome (Ac 28:19 ): "I was constrained to appeal." But acquittal at the hands of Festus with the hope of going to Rome as a free man had vanished.

Acts 25:12
When he had conferred with the council ( $\sigma v \nu \lambda \alpha \lambda \eta \sigma \alpha \varsigma \mu \varepsilon \tau \alpha$ тov $\sigma v \mu \beta o v \lambda ı v$ ). The word $\sigma v \mu \beta o v \lambda ı v$ in the N.T. usually means "counsel" as in Mt 12:14, but here alone as an assembly of counsellors or council. But the papyri (Milligan and Moulton's Vocabulary) furnish a number of instances of this sense of the word as "council." Here it apparently means the chief officers and personal retinue of the procurator, his assessors ( $\alpha \sigma \sigma \varepsilon \sigma \sigma o \rho \varepsilon \varsigma$ $\chi 0 v \sigma \iota \lambda \iota \alpha \iota)$. These local advisers were a necessity. Some discretion was allowed the governor about granting the appeal. If the prisoner were a well-known robber or pirate, it could be refused.

Thou hast appealed unto Caesar (Kaı $\sigma \alpha \rho \alpha \varepsilon \pi ı \kappa \varepsilon \kappa \lambda \eta \sigma \alpha$ ). The same technical word, but the perfect tense of the indicative.

Unto Caesar thou shalt go ( $\varepsilon \pi$ Kaı $\sigma \alpha \rho \alpha \pi о \rho \varepsilon v \sigma \eta)$. Perhaps the volitive future (Robertson, Grammar, p. 874). Bengel thinks that Festus sought to frighten Paul with these words. Knowling suggests that "they may have been uttered, if not with a sneer, yet with the implication 'thou little knowest what an appeal to Caesar means."' But embarrassment will come to Festus. He has refused to acquit this prisoner. Hence he must formulate charges against him to go before Caesar.

Acts 25:13
When certain days were passed ( $Н \eta \mu \varepsilon \rho \omega \nu \delta i \alpha \gamma \varepsilon \nu o \mu \varepsilon \nu o v)$. Genitive absolute of $\delta ı \alpha \not \imath^{\nu} \mu \alpha$, to come between, "days intervening."

Agrippa the King (A $\gamma \rho \iota \pi \pi \alpha \varsigma$ o $\beta \alpha \sigma \iota \lambda \varepsilon u \varsigma)$ ). Agrippa II son of Agrippa I of Ac 12:20-23 . On the death of Herod King of Chalcis A.D. 48, Claudius A.D. 50 gave this Herod Agrippa II the throne of Chalcis so that Luke is correct in calling him king, though he is not king of Judea. But he was also given by Claudius the government of the temple and the right of appointing the high priest. Later he was given also the tetrarchies of Philip and Lysanias. He was the last Jewish king in Palestine, though not king of Judea. He angered the Jews by building his palace so as to overlook the temple and by frequent changes in the high priesthood. He made his capital at Caesarea Philippi which he called Neronias in honour of Nero. Titus visited it after the fall of Jerusalem.

Bernice (Bepviкף). He was her brother and yet she lived with him in shameful intimacy in spite of her marriage to her uncle Herod King of Chalcis and to Polemon King of Cilicia whom she left. Schuerer calls her both a Jewish bigot and a wanton. She afterwards became the mistress of Titus.

Arrived at Caesarea ( $\kappa \alpha \tau \eta \nu \tau \eta \sigma \alpha \nu \varepsilon \varepsilon \varsigma К \alpha \iota \sigma \alpha \rho \iota \alpha \nu$ ). Came down (first aorist active of кат $\alpha \tau \tau \alpha$ ) to Caesarea from Jerusalem.

And saluted Festus ( $\alpha \sigma \pi \alpha \sigma \alpha \mu \varepsilon v o$ тov $Ф \eta \sigma \tau o v$ ). The Textus Receptus has $\alpha \sigma \pi \alpha \sigma \sigma \mu \varepsilon v o$ the future participle, but the correct text is the aorist middle participle $\alpha \sigma \pi \alpha \sigma \alpha \mu \varepsilon v o$ which cannot possibly mean subsequent action as given in the Canterbury Revision "and saluted." It can only mean contemporaneous (simultaneous) action "saluting" or antecedent action like the margin "having saluted." But antecedent action is not possible here, so that simultaneous action is the only alternative. It is to be noted that the salutation synchronized with the arrival in Caesarea (note kata, down, the effective aorist tense), not with the departure from Jerusalem, nor with the whole journey. Rightly understood the aorist participle here gives no trouble at all (Robertson, Grammar, pp. 861-3).

Acts 25:14
Tarried ( $\delta \iota \varepsilon \tau \rho \iota \beta o v$ ). Imperfect active of $\delta \iota \alpha \tau \rho \imath \omega$, common verb for spending time (Ac 12:19, etc.).

Many days ( $\pi \lambda \varepsilon \iota o v \varsigma ~ \eta \mu \varepsilon \rho \alpha \varsigma)$. More days (than a few). Accusative case for extent of time.
 avati $\theta \eta \mu$, old verb to set before, to place up, as if for consultation in conference. Only twice in N.T. here and Ga 2:2 . The motive of Festus is not given, though it was natural enough in view of the quandary of Festus about Paul (the things about Paul) and Agrippa's interest in and responsibility for Jewish worship in the temple in Jerusalem. It is quite possible that Festus had a bit of $\varepsilon v v v$ over the visit of these Jewish dignitaries as "more days" went by. Hence the tone of Festus about Paul in this proposal for the entertainment of Agrippa and Bernice is certainly one of superficial and supremely supercilious indifference.

Left a prisoner ( $\kappa \alpha \tau \alpha \lambda \varepsilon \lambda \iota \mu \mu \varepsilon \nu \circ \varsigma \delta \varepsilon \sigma \mu \iota \varsigma)$. Perfect passive participle of $\kappa \alpha \tau \alpha \lambda \varepsilon \iota \pi \omega$, to leave behind. Paul is one of Felix's left overs (left behind), a sort of "junk" left on his hands. This cowardly Roman procurator thus pictures the greatest of living men and the greatest preacher of all time to this profligate pair (brother and sister) of sinners. Undoubtedly today in certain circles Christ and his preachers are held up to like contempt.

Acts 25:15
Informed ( $\varepsilon v \varepsilon \varphi \alpha v \iota \sigma \alpha \nu$ ). Same word as in 23:15,22; 25:2 which see.
Asking for sentence against him ( $\alpha \iota \tau \circ \cup \mu \varepsilon v o ~ \kappa \alpha \tau ' \alpha v \tau о v ~ к \alpha \tau \alpha \delta ı \kappa \eta \nu$ ). Only N.T. example of this old word (penalty, fine, condemnation) from ката and $\delta_{ו \kappa \eta}$ (justice against).

Acts 25:16
It is not the custom of the Romans (o ovk $\varepsilon \sigma \tau \iota v \varepsilon \theta$ oৎ $\mathrm{P} \omega \mu \alpha \iota \circ \varsigma)$. If a direct quotation, ot is recitative as in Authorized Version. Canterbury Revision takes it as indirect discourse after $\alpha \pi \varepsilon \kappa \rho \iota \theta \eta \nu$ (I answered), itself in a relative clause ( $\pi \rho \circ \varsigma$ ovৎ) with the present tense ( $\varepsilon \sigma \tau \iota v$, is) preserved as is usual. There is a touch of disdain (Furneaux) in the tone of Festus. He may refer to a demand of the Jews before they asked that Paul be brought to Jerusalem (25:3). At any rate there is a tone of scorn towards the Jews.

Before that the accused have ( $\pi \rho \iota \nu \eta$ о кат $\eta \gamma о \rho о \cup \mu \varepsilon v \circ \varsigma \varepsilon \chi \circ$ ). This use of the optative in this temporal clause with $\pi \rho \iota \nu \eta$ instead of the subjunctive $\alpha v \varepsilon \chi \eta$ is in conformity with literary Greek and occurs only in Luke's writings in the N.T. (Robertson, Grammar, p. 970). This sequence of modes is a mark of the literary style occasionally seen in Luke. It is interesting here to note the succession of dependent clauses in verses 14-16.

The accusers face to face ( $\kappa \alpha \tau \alpha \pi \rho о \sigma \omega \pi о v \tau о \cup \varsigma \kappa \tau \eta \gamma о \rho о и \varsigma) . ~ S a m e ~ w o r d ~ к \alpha \tau \eta \gamma о \rho о \varsigma$ as in 23:30,35; 25:18. This all sounds fair enough.

And have had opportunity to make his defence concerning the matter laid against him ( $\tau о \pi о \nu \tau \varepsilon \alpha \pi о \lambda о ү \iota \alpha \varsigma \lambda \alpha \beta о \pi \varepsilon \rho \tau о v \varepsilon \gamma \kappa \lambda \eta \mu \alpha \tau о \varsigma)$. Literally, "And should receive ( $\lambda \alpha \beta$ о optative for same reason as $\varepsilon \chi 0$ above, second aorist active of $\lambda \alpha \mu \beta \alpha \nu \omega)$ opportunity for defence (objective genitive) concerning the charge" ( $\varepsilon \gamma \kappa \lambda \eta \mu \alpha \tau \circ \varsigma$ in N.T. only here and 23:19 which see).

Acts 25:17
When they were come together here ( $\sigma v v \varepsilon \lambda \theta o v \tau \omega \nu \varepsilon \nu \theta a \delta \varepsilon$ ). Genitive absolute of second aorist active participle of $\sigma v v \varepsilon \rho \chi \circ \mu \alpha$, but without $\alpha v \tau \omega \nu$ (they), merely understood.

Delay ( $\alpha v \alpha \beta \circ \lambda \eta v$ ). Old word from $\alpha v \alpha \beta \alpha \lambda \lambda \omega$, only here in N.T.
Acts 25:18
Brought ( $\varepsilon \varphi \varepsilon \rho \circ v$ ). Imperfect active of $\varphi \varepsilon \rho \omega$, referring to their repeated charges.
Of such evil things as I supposed ( $\omega v \varepsilon \gamma \omega v \pi \varepsilon v o o v v \pi o v \eta \rho \omega v$ ). Incorporation of the antecedent $\pi о \nu \eta \rho \omega \nu$ into the relative clause and change of the case of the relative from the accusative $\alpha$ object of $v \pi \varepsilon v o o v v$ to the genitive like $\pi о \nu \eta \rho \omega v$ (Robertson, Grammar, p. 719). Note the imperfect active $v \pi \varepsilon v o o v v$ of $v \pi \sigma$ о $\varepsilon \omega$ to emphasize Festus's state of mind about

Paul before the trial. This old verb only three times in the N.T. (here, Ac 13:25 which see; 27:27).

Acts 25:19
But had ( $\delta \varepsilon \varepsilon \chi \chi o v$ ). Descriptive imperfect active of $\varepsilon \chi \omega$ and $\delta \varepsilon$ of contrast (but).
Concerning their own religion ( $\pi \varepsilon \rho \tau \eta \varsigma \iota \delta ı \alpha \varsigma \delta \varepsilon \iota \sigma \iota \delta a \mu \mu$ vıa¢). See on 17:22 for discussion of this word. Festus would hardly mean "superstition," whatever he really thought, because Agrippa was a Jew.

And of one Jesus ( $\kappa \alpha \pi \varepsilon \rho \tau \tau v o \varsigma$ I $\eta \sigma o v$ ). This is the climax of supercilious scorn toward both Paul and "one Jesus."

Who was dead ( $\tau \varepsilon \forall v \eta \kappa о \tau о \varsigma)$. Perfect active participle of $\theta v \eta \sigma \kappa \omega$ agreeing with I $\eta \sigma o v$ (genitive). As being dead.

Whom Paul affirmed to be alive (ov $\varepsilon \varphi a \sigma \kappa \varepsilon v$ o Паu入ос $\zeta \eta \imath v$ ). Imperfect active of $\varphi a \sigma \kappa \omega$, old form of $\varphi \eta \mu$ to say, in the N.T. only here and Ac 24:9; Ro 1:22. Infinitive $\zeta \eta \iota \nu$ in indirect discourse with ov (whom) the accusative of general reference. With all his toploftical airs Festus has here correctly stated the central point of Paul's preaching about Jesus as no longer dead, but living.

Acts 25:20
Being perplexed ( $\alpha \pi о \rho о \cup \mu \varepsilon v o \varsigma)$. Present middle participle of the common verb алорє $\omega$ (a privative and $\pi$ оорос way), to be in doubt which way to turn, already in Mr 6:20 which see and Lu 24:4. The Textus Receptus has $\varepsilon$ ı $\varsigma$ after here, but critical text has only the accusative which this verb allows ( Mr 6:20 ) as in Thucydides and Plato.

How to inquire concerning these things ( $\tau \eta \nu \pi \varepsilon \rho \tau 0 \nu \tau \omega \nu \zeta \eta \tau \eta \sigma v \nu$ ). Literally, "as to the inquiry concerning these things." This is not the reason given by Luke in verse 9 (wanting to curry favour with the Jews), but doubtless this motive also actuated Festus as both could be true.

Whether he would go to Jerusalem ( $\varepsilon$ ßои入очто $\pi о \rho \varepsilon \cup \varepsilon \sigma \theta \alpha \varepsilon \varsigma \varsigma ~ I \varepsilon \rho о \sigma о \lambda \nu \mu \alpha$ ). Optative in indirect question after $\varepsilon \lambda \varepsilon \gamma \circ \mathrm{v}$ (asked or said) imperfect active, though the present indicative could have been retained with change of person: "Dost thou wish, etc.," ( $\varepsilon \beta$ ou $\eta$, etc.). See Robertson, Grammar, pp. 1031, 1044. This is the question put to Paul in verse 9 though $\theta \varepsilon \lambda \varepsilon เ \varsigma ~ i s ~ t h e r e ~ u s e d . ~$

Acts 25:21
 aorist middle participle of $\varepsilon \pi / \kappa \alpha \lambda \varepsilon o \mu \alpha$, the technical word for appeal (verses 11,12). The first aorist passive infinitive $\tau \eta \rho \eta \theta \eta v \alpha$ (to be kept) is the object of the participle.

For the decision of the emperor ( $\varepsilon \iota \varsigma \tau \eta v$ tov $\sum \varepsilon \beta \alpha \sigma \tau \circ v \delta \iota \alpha \gamma \nu \omega \sigma เ v$ ). $\Delta \iota \alpha \gamma \nu \omega \sigma \iota v$ (cf. $\delta \iota \alpha \gamma \nu \omega \sigma \circ \mu \alpha$ 24:22, I will determine) is the regular word for a legal examination ( $\chi$ о $\gamma \nu \iota \tau \iota$ ), thorough sifting $(\delta(\alpha)$, here only in N.T. Instead of "the Emperor" it should be "the Augustus," as $\sum \varepsilon \beta a \sigma \tau o \varsigma$ is simply the Greek translation of Augustus, the adjective (Revered, Reverent)
assumed by Octavius B.C. 27 as the $a \gamma v o \mu \varepsilon v$ that summed up all his various offices instead of Rex so offensive to the Romans having led to the death of Julius Caesar. The successors
 (cf. $\sigma \varepsilon \beta \alpha \sigma \mu \alpha$ in Acts 17:25). In the N.T. only here, verse 25; $27: 1$ (of the legion). It was more imposing than "Caesar" which was originally a family name (always official in the N.T.) and it fell in with the tendency toward emperor-worship which later played such a large part in Roman life and which Christians opposed so bitterly. China is having a revival of this idea in the insistence on bowing three times to the picture of Sun-Yat-Sen.

Till I should send him to Caesar ( $\varepsilon \omega \varsigma \alpha v \alpha v \alpha \pi \varepsilon \mu \psi \omega$ avtov $\pi \rho \circ \varsigma$ Kaı $\sigma \alpha \rho \alpha$ ). Here $\alpha v a \pi \varepsilon \mu \psi \omega$ can be either future indicative or first aorist subjunctive (identical in first person singular), aorist subjunctive the usual construction with $\varepsilon \omega \varsigma$ for future time (Robertson, Grammar, p. 876). Literally, "send up" ( $\alpha v \alpha$ ) to a superior (the emperor). Common in this sense in the papyri and Koine writers. Here "Caesar" is used as the title of Nero instead of "Augustus" as Kvpıo (Lord) occurs in verse 26.

Acts 25:22
I also could wish ( $\varepsilon \beta$ ou入о $\quad \eta \eta$ ка $\alpha v \tau о \varsigma)$. The imperfect for courtesy, rather than the blunt $\beta$ ou $\lambda$ o $\mu \alpha$, I wish, I want. Literally, "I myself also was wishing" (while you were talking), a compliment to the interesting story told by Festus. The use of $\alpha v$ with the imperfect would really mean that he does not wish (a conclusion of the second class condition, determined as unfulfilled). A $v$ with the optative would show only a languid desire. The imperfect is keen enough and yet polite enough to leave the decision with Festus if inconvenient for any reason (Robertson, Grammar, pp. 885-7). Agrippa may have heard much about Christianity.

Acts 25:23
When Agrippa was come and Bernice ( $\varepsilon \lambda \theta$ оvтоৎ тоv $\mathrm{A} \gamma \rho \iota \pi \pi \alpha$ ка $\tau \eta \varsigma$ В $\varepsilon \rho v ı \kappa \eta \varsigma$ ). Genitive absolute, the participle agreeing in number and gender (masculine singular, $\varepsilon \lambda \theta$ ovтоя) with Aүрıлла, Bepvıкпऽ being added as an afterthought.

With great pomp ( $\mu \varepsilon \tau \alpha \pi о \lambda \lambda \eta \varsigma \varphi \alpha v \tau \alpha \sigma i \alpha \varsigma)$. Фаv $\boldsymbol{\pi} \alpha \sigma \iota \alpha$ is a Koine word (Polybius, Diodorus, etc.) from the old verb $\varphi \alpha \nu \tau \alpha \zeta \omega$ (Heb 12:21) and it from $\varphi a \imath v \omega$, common verb to show, to make an appearance. This is the only N.T. example of $\varphi$ avtaбıa, though the kindred common word $\varphi \alpha v \tau \alpha \sigma \mu \alpha$ (appearance) occurs twice in the sense of apparition or spectre (Mt 14:26; Mr 6:49 ). Herodotus (VII. 10) used the verb $\varphi a v \tau \alpha \zeta \omega$ for a showy parade. Festus decided to gratify the wish of Agrippa by making the "hearing" of Paul the prisoner (verse 22) an occasion for paying a compliment to Agrippa (Rackham) by a public gathering of the notables in Caesarea. Festus just assumed that Paul would fall in with this plan for a grand entertainment though he did not have to do it.

Into the place of hearing (вıৎ то акроатпрьоv). From акроаона (to be a hearer) and, like the Latin auditorium, in Roman law means the place set aside for hearing, and deciding
cases. Here only in the N.T. Late word, several times in Plutarch and other Koine writers. The hearing was "semi-official" (Page) as is seen in verse 26.

With the chief captains ( $\sigma \cup \vee \tau \varepsilon \chi \lambda \lambda ı \rho \chi \circ เ \varsigma) . \mathrm{X} \lambda \lambda ı \rho \chi \varsigma$, each a leader of a thousand. There were five cohorts of soldiers stationed in Caesarea.

And the principal men of the city ( $\kappa \alpha \alpha v \delta \rho \alpha \sigma เ \nu ~ \tau о \iota \varsigma ~ к \alpha \tau ' ~ \varepsilon \xi_{0 \chi \eta \nu) . ~ T h e ~ u s e ~ o f ~}^{\kappa \alpha \tau} \tau^{\prime}$ $\varepsilon \xi \circ \chi \eta \nu$, like our French phrase par excellence, occurs here only in the N.T., and not in the ancient Greek, but it is found in inscriptions of the first century A.D. (Moulton and Milligan's Vocabulary). $\mathrm{E} \xi \mathrm{ox} \eta$ in medical writers is any protuberance or swelling. Cf. our phrase "outstanding men."

At the command of Festus (кع $\kappa \varepsilon v \sigma a v \tau о \varsigma ~ \tau o v ~ Ф \eta \sigma \tau о v) . ~ G e n i t i v e ~ a b s o l u t e ~ a g a i n, ~ " F e s t u s ~$ having commanded."

Acts 25:24
Which are here present with us (o $\sigma \cup v \pi \alpha \rho o v \tau \varepsilon \varsigma ~ \eta \mu v \nu$ ). Present articular participle of $\sigma ט v \pi \alpha \rho \varepsilon \iota \mu$ (only here in N.T.) with associative instrumental case $\eta \mu \nu v$.

Made suit to me ( $\varepsilon v \varepsilon \tau \cup \chi \circ v \mu \circ$ ). Second aorist active indicative of $\varepsilon v \tau v \gamma \chi \propto v \omega$, old verb to fall in with a person, to go to meet for consultation or supplication as here. Common in old Greek and Koine. Cf. Ro 8:27,34. See $\varepsilon v \tau \varepsilon v \xi ı \varsigma ~(p e t i t i o n) ~ 1 T i ~ 2: 1 ~ . ~ P a p y r i ~ g i v e ~ m a n y ~ e x-~$ amples of the technical sense of $\varepsilon v \tau \varepsilon \cup \xi \downharpoonright \varsigma$ as petition (Deissmann, Bible Studies, p. 121). Some MSS. have plural here evetuðov rather than the singular $\varepsilon v \varepsilon \tau \cup \chi \varepsilon v$.

Crying ( $\beta 0 \omega v \tau \varepsilon \varsigma$ ). Yelling and demanding with loud voices.
That he ought not to live any longer ( $\mu \eta \delta \varepsilon \iota v$ autov $\zeta \eta \iota v \mu \eta \kappa \varepsilon \tau$ ). Indirect command (demand) with the infinitive $\delta \varepsilon \iota v$ for $\delta \varepsilon$ (it is necessary). The double negative ( $\mu \eta--\mu \eta \kappa \varepsilon \tau$ ) with $\zeta \eta \iota v$ intensifies the demand.

Acts 25:25
But I found ( $\varepsilon \gamma \omega \delta \varepsilon \kappa \alpha \tau \varepsilon \lambda \alpha \beta o \mu \eta v$ ). Second aorist middle of $\kappa \alpha \tau \alpha \lambda \alpha \mu \beta \alpha v \omega$, to lay hold of, to grasp, to comprehend as in $4: 13 ; 10: 34$.

That he had committed nothing worthy of death ( $\mu \eta \delta \varepsilon v$ a $\xi_{ı}$ ov autov $\operatorname{\theta ava\tau ov}$ $\pi \varepsilon \pi \rho a \chi \varepsilon v \alpha)$. Perfect active infinitive of $\pi \rho \alpha \sigma \sigma \omega$ in indirect assertion with negative $\mu \eta$ and accusative avtov of general reference, the usual idiom. Verse 25 repeats the statement in verse 21 , perhaps for the benefit of the assembled dignitaries.

Acts 25:26
No certain thing ( $\alpha \sigma \varphi \alpha \lambda \varepsilon \varsigma \tau 1--o v$ ). Nothing definite or reliable ( $\alpha$ privative, $\sigma \varphi \alpha \lambda \lambda \omega$, to trip). All the charges of the Sanhedrin slipped away or were tripped up by Paul. Festus confesses that he had nothing left and thereby convicts himself of gross insincerity in his proposal to Paul in verse 9 about going up to Jerusalem. By his own statement he should have set Paul free. The various details here bear the marks of the eyewitness. Luke was surely present and witnessed this grand spectacle with Paul as chief performer.

Unto my lord ( $\tau \omega \kappa v \rho \omega \omega$ ). Augustus (Octavius) and Tiberius refused the title of kuptos (lord) as too much like rex (king) and like master and slave, but the servility of the subjects gave it to the other emperors who accepted it (Nero among them). Antoninus Pius put it on his coins. Deissmann (Light from the Ancient East, p. 105) gives an ostracon dated Aug. 4, A.D. 63 with the words "in the year nine of Nero the lord" (evatov Nepevos tov кирıov). Deissmann (op. cit., pp. 349ff.) runs a most interesting parallel "between the cult of Christ and the cult of Caesar in the application of the term кирьo¢, lord" in ostraca, papyri, inscriptions. Beyond a doubt Paul has all this fully in mind when he says in 1Co 12:3 that "no one is able to say Kupıo̧ I $\eta$ oovc except in the Holy Spirit" (cf. also Php 2:11). The Christians claimed this word for Christ and it became the test in the Roman persecutions as when Polycarp steadily refused to say " Lord Caesar" and insisted on saying "Lord Jesus" when it meant his certain death.

Before you ( $\varepsilon \varphi^{\prime} v \mu \omega v$ ). The whole company. In no sense a new trial, but an examination in the presence of these prominent men to secure data and to furnish entertainment and pleasure to Agrippa (verse 22).

Especially before thee ( $\mu \alpha \lambda_{\iota \sigma \tau \alpha} \varepsilon \pi \sigma o v$ ). Out of courtesy. It was the main reason as verse 22 shows. Agrippa was a Jew and Festus was glad of the chance to see what he thought of Paul's case.

After examination had ( $\tau \eta \varsigma$ avaкрıбє $\omega \varsigma \gamma \varepsilon v o \mu \varepsilon v \eta \varsigma)$. Genitive absolute, "the examination having taken place." Avaкрıбıc from avaкрıv (cf. 12:19; 24:8; 28:18) is a legal term for preliminary examination. Only here in the N.T. Inscriptions and papyri give it as examination of slaves or other property.

That I may have somewhat to write ( $\circ \pi \omega \varsigma \sigma \chi \omega \tau \gamma \rho \alpha \psi \omega$ ). Ingressive aorist subjunctive $\sigma \chi \omega$ (may get) with o $\pi \omega \varsigma$ (final particle like $\tau \nu \alpha$ ). T $\gamma \rho \alpha \psi \omega$ in indirect question after $\sigma \chi \omega$ is either future indicative or aorist subjunctive (Robertson, Grammar, p. 1045). Festus makes it plain that this is not a "trial," but an examination for his convenience to help him out of a predicament.

Acts 25:27
Unreasonable ( $\alpha \lambda 0 \gamma o v$ ). Old word from $\alpha$ privative and $\lambda o \gamma o \varsigma$ (reason, speech). "Without reason" as of animals (Jude 1:10; 2Pe 2:12), "contrary to reason" here. These the only N.T. instances and in harmony with ancient usage.

In sending ( $\pi \varepsilon \mu \pi \sigma \nu \tau \alpha$ ). Note accusative case with the infinitive $\sigma \eta \mu \alpha v \alpha$ though $\mu$ o (dative) just before. Cf. same variation in 15:22f.; 22:17 .

Signify ( $\sigma \eta \mu \alpha v \alpha$ ). First aorist active infinitive (not $\sigma \eta \mu \eta \nu \alpha$, the old form) of $\sigma \eta \mu \alpha \iota v \omega$, to give a sign ( $\sigma \eta \mu \varepsilon \iota \sigma$ ).

The charges ( $\tau \alpha \varsigma \alpha \iota \tau i \alpha \varsigma)$. This naive confession of Festus reveals how unjust has been his whole treatment of Paul. He had to send along with the appeal of Paul litterae dimissoriae ( $\alpha \pi \sigma \sigma \tau 0 \lambda$ ) which would give a statement of the case (Page).

## Acts 26

Acts 26:1
Thou art permitted ( $\varepsilon \pi \iota \tau \rho \varepsilon \pi \varepsilon \tau \alpha \sigma o$ ). Literally, It is permitted thee. As if Agrippa were master of ceremonies instead of Festus. Agrippa as a king and guest presides at the grand display while Festus has simply introduced Paul.

For thyself (v $\pi \varepsilon \rho \sigma \varepsilon \alpha v \tau o v$ ). Some MSS. have $\pi \varepsilon \rho$ (concerning). Paul is allowed to speak in his own behalf. No charges are made against him. In fact, Festus has admitted that he has no real proof of any charges.

Stretched forth his hand ( $\varepsilon \kappa \tau \varepsilon เ \nu \alpha \varsigma \tau \eta \nu \chi \varepsilon \iota \rho \alpha$ ). Dramatic oratorical gesture (not for silence as in $12: 17 ; 13: 16$ ) with the chain still upon it (verse 29) linking him to the guard. First aorist active participle of $\varepsilon \kappa \tau \varepsilon \iota \nu \omega$, to stretch out.

Made his defence ( $\alpha \pi \varepsilon \lambda о \gamma \varepsilon ı \tau o$ ). Inchoative imperfect of $\alpha \pi \sigma \lambda о \gamma \varepsilon о \mu \alpha$ (middle), "began to make his defence." This is the fullest of all Paul's defences. He has no word of censure of his enemies or of resentment, but seizes the opportunity to preach Christ to such a distinguished company which he does with "singular dignity" (Furneaux). He is now bearing the name of Christ "before kings" (Ac 9:15 ). In general Paul follows the line of argument of the speech on the stairs (chapter Ac 22 ).

Acts 26:2
I think myself happy ( $\eta \gamma \eta \mu \alpha \varepsilon \mu \alpha v \tau о \nu \mu \alpha \kappa \alpha \rho \iota \nu)$. See on Mt 5:3 for $\mu \alpha \kappa \alpha \rho \iota \varsigma$. Blass notes that Paul, like Tertullus, begins with captatio benevolentiae, but absque adulatione. He says only what he can truthfully speak. For $\eta \gamma \eta \mu \alpha$ see Php 3:7; 1Ti 6:1 (perfect middle indicative of $\eta \gamma \varepsilon o \mu \alpha$ ), I have considered.

That I am to make my defence ( $\mu \varepsilon \lambda \lambda \omega v \alpha \pi o \lambda o \gamma \varepsilon \iota \sigma \theta \alpha$ ). Literally, "being about to make my defence."

Whereof I am accused ( $\omega \nu \varepsilon \gamma \kappa \alpha \lambda o v \mu \alpha$ ). Genitive with $\varepsilon \gamma \kappa \alpha \lambda o v \mu \alpha$ as in 19:40 or by attraction from accusative of relative $(\alpha)$ to case of antecedent ( $\pi \alpha v \tau \omega v$ ).

Acts 26:3
Especially because thou art expert ( $\mu \alpha \lambda \iota \sigma \tau \alpha \gamma \nu \omega \sigma \tau \eta \nu$ ov $\alpha \alpha \sigma \varepsilon$ ). Or like the margin, "because thou art especially expert," according as $\mu \alpha \lambda \iota \sigma \tau \alpha$ is construed. $\Gamma \nu \omega \sigma \tau \eta v$ is from $\gamma \iota \omega \omega \sigma \kappa \omega$ and means a knower, expert, connoisseur. Plutarch uses it and Deissmann (Light, etc., p. 367) restores it in a papyrus. Agrippa had the care of the temple, the appointment of the high priest, and the care of the sacred vestments. But the accusative ov $\tau \alpha \sigma \varepsilon$ gives trouble here coming so soon after $\sigma o v$ (genitive with $\varepsilon \pi$ ). Some MSS. insert $\varepsilon \pi \iota \sigma \tau \alpha \mu \varepsilon \nu \circ \varsigma$ or $\varepsilon \iota \delta \omega \varsigma$ (knowing) but neither is genuine. Page takes it as "governed by the sense of thinking or considering." Knowling considers it an anacoluthon. Buttmann held it to be an accusative absolute after the old Greek idiom. Tvxov is such an instance though used as an adverb
(1Co 16:6 ). It is possible that one exists in Eph 1:18. See other examples discussed in Robertson's Grammar, pp. 490f.

Customs and questions ( $\varepsilon \theta \omega \nu \tau \varepsilon \kappa \alpha \zeta \eta \tau \eta \mu \alpha \tau \omega v$ ). Both consuetudinum in practicis and quaestionum in theoreticis (Bengel). Agrippa was qualified to give Paul an understanding and a sympathetic hearing. Paul understands perfectly the grand-stand play of the whole performance, but he refused to be silent and chose to use this opportunity, slim as it seemed, to get a fresh hearing for his own case and to present the claims of Christ to this influential man. His address is a masterpiece of noble apologetic.

Patiently ( $\mu \alpha \kappa \rho о \theta v \mu \omega \varsigma)$. Adverb from $\mu \alpha \kappa \rho о \theta v \mu \circ \varsigma$. Only here in the N.T., though $\mu \alpha \kappa \rho о \theta \nu \mu \iota \alpha$ occurs several times. Vulgate has longanimiter. Long spirit, endurance, opposite of impatience. So Paul takes his time.

Acts 26:4
My manner of life ( $\tau \eta \nu \mu \varepsilon v$ ouv $\beta \omega \omega \sigma \iota \nu \rho v)$. With $\mu \varepsilon \nu$ ovv Paul passes from the captatio benevolentiae (verses 1,2 ) "to the narratio or statement of his case" (Page). Bı $\omega \sigma \iota$ is from $\beta$ เo $\omega$ ( $1 \mathrm{Pe} 4: 2$ ) and that from $\beta \iota \varsigma$ (course of life). This is the only instance of $\beta \omega \omega \sigma$ yet found except the Prologue (10) of Ecclesiasticus and an inscription given in Ramsay's Cities and Bishoprics of Phrygia, Vol II, p. 650.

Know (ı $\sigma \alpha \sigma$ ). Literary form instead of the vernacular Koine oı $\delta \alpha \sigma \iota$. Paul's early life in Tarsus and Jerusalem was an open book to all Jews.

Acts 26:5
Having knowledge of me from the first ( $\pi \rho \sigma \nsim \nu \omega \sigma \kappa о \nu \tau \varepsilon \varsigma \mu \varepsilon \alpha \nu \omega \theta \varepsilon v)$. Literally, "knowing me beforehand" (both $\pi \rho \circ$ and $\alpha \nu \omega \theta \varepsilon v$ ), from the beginning of Paul's public education in Jerusalem (Knowling). Cf. 2Pe 3:17.

If they be willing to testify ( $\varepsilon \alpha \nu \theta \varepsilon \lambda \omega \sigma \iota \nu \mu \alpha \rho \tau v \rho \varepsilon \iota v$ ). Condition of third class ( $\varepsilon \alpha v$ and subjunctive). A neat turning of the tables on the distinguished audience about Paul's Jerusalem reputation before his conversion.

After the straitest sect ( $\tau \eta \nu \alpha \kappa \rho \iota \beta \sigma \sigma \alpha \tau \eta \nu \alpha \iota \rho \varepsilon \sigma \iota v)$. This is a true superlative (not elative) and one of the three (also $\alpha \boldsymbol{\jmath} \omega \tau \alpha \tau \circ \varsigma$, Jude 1:20, $\tau \iota \mu \iota \omega \tau \alpha \tau \circ \varsigma \operatorname{Re} 18: 12 ; 21: 11$ ) superlatives in - $\tau \alpha \tau$, , in the N.T. (Robertson, Grammar, pp. 279f., 670), though common enough in the LXX and the papyri. Haıpعбıv (choosing) is properly used here with Pharisees (Josephus, Life, 38).

Religion ( $Ө \rho \eta \sigma \kappa \varepsilon ı \propto \varsigma)$. From $\theta \rho \eta \sigma \kappa \varepsilon v \omega$ and this from $\theta \rho \eta \sigma \kappa о \varsigma ~(J a s ~ 1: 26), ~ o l d ~ w o r d ~ f o r ~$ religious worship or discipline, common in the papyri and inscriptions (Moulton and Milligan's Vocabulary) for reverent worship, not mere external ritual. In N.T. only here, Jas 1:26f.; Col 2:18 .

I lived a Pharisee ( $\varepsilon \zeta \eta \sigma \alpha$ Фарıбаıоৎ). Emphatic position. Paul knew the rules of the Pharisees and played the game to the full (Ga 1:14; Php 3:5f. ). The Talmud makes it plain
what the life of a Pharisee was. Paul had become one of the leaders and stars of hope for his sect.

Acts 26:6
And now ( $\kappa \alpha \vee v v$ ). Sharp comparison between his youth and the present.
To be judged for the hope ( $\left.\varepsilon \pi^{\prime} \varepsilon \lambda \pi \iota \delta t--\kappa \rho \imath v o \mu \varepsilon v o \varsigma\right)$. The hope of the resurrection and of the promised Messiah (13:32). Page calls verses 6-8 a parenthesis in the course of Paul's argument by which he shows that his life in Christ is a real development of the best in Pharisaism. He does resume his narrative in verse 9 , but verses 6-8 are the core of his defence already presented in Ga 3; Ro 9-11 where he proves that the children of faith are the real seed of Abraham.

Acts 26:7
Our twelve tribes ( $\tau 0 \delta \omega \delta \varepsilon \kappa \alpha \varphi \nu \lambda o v \eta \mu \omega v$ ). A word found only here in N.T. and in Christian and Jewish writings, though $\delta \omega \delta \varepsilon \kappa \alpha \mu \eta v o v$ (twelve month) is common in the papyri and $\delta \varepsilon \kappa \alpha \varphi \cup \lambda$ oc (ten tribes) in Herodotus. Paul's use of this word for the Jewish people, like Jas 1:1 (таıц $\delta \omega \delta \varepsilon к \alpha$ 甲u入aıц, the twelve tribes), shows that Paul had no knowledge of any "lost ten tribes." There is a certain national pride and sense of unity in spite of the dispersion (Page).

Earnestly ( $\varepsilon v \varepsilon \kappa \tau \varepsilon v \varepsilon ı \alpha$ ). A late word from $\varepsilon \kappa \tau \varepsilon เ \nu \omega$, to stretch out, only here in N.T., but in papyri and inscriptions. Page refers to Simeon and Anna (Lu 2:25-28) as instances of Jews looking for the coming of the Messiah. Note the accusative of vuкта ка $\eta \mu \varepsilon \rho \alpha v$ as in 20:31.

Hope to attain ( $\varepsilon \lambda \pi \iota \zeta \varepsilon \kappa \alpha \tau \alpha v \tau \eta \sigma \alpha)$. This Messianic hope had been the red thread running through Jewish history. Today, alas, it is a sadly worn thread for Jews who refuse to see the Messiah in Jesus.

I am accused by Jews ( $\varepsilon\rceil \kappa \alpha \lambda о \cup \mu \alpha$ v $\pi$ о Iov $\alpha a \iota \omega v$ ). The very word used in 23:28 ( $\varepsilon v \varepsilon \kappa \alpha \lambda o u v$ ) which see, and by Jews of all people in the world whose mainspring was this very "hope." It is a tremendously effective turn.

Acts 26:8
Incredible with you ( $\alpha \pi \iota \sigma \tau 0 v \pi \alpha \rho^{\prime} v \mu \nu v$ ). This old word $\alpha \pi \iota \sigma \tau o v$ ( $\alpha$ privative and $\pi \iota \sigma \tau \sigma \varsigma$ ) means either unfaithful (Lu 12:46 ), unbelieving (Joh 20:27), or unbelievable as here). Paul turns suddenly from Agrippa to the audience ( $\pi \alpha \rho^{\prime} v \mu \nu v$, plural), most of whom were probably Gentiles and scouted the doctrine of the resurrection as at Athens ( 17:32).

If God doth raise the dead ( $\varepsilon$ о $\theta \varepsilon о \varsigma \nu \varepsilon \kappa \rho о \cup \varsigma \varepsilon \gamma \varepsilon \rho \varepsilon$ ). Condition of the first class assuming that God does raise dead people. Only God can do it. This rhetorical question needs no answer, though the narrative resumed in verse 9 does it in a way.

Acts 26:9
I verily thought with myself $(\varepsilon \gamma \omega \mu \varepsilon \nu$ ouv $\varepsilon \delta o \xi \alpha \varepsilon \mu \alpha \nu \tau \omega)$. Personal construction instead of the impersonal, a touch of the literary style. Paul's "egoism" is deceived as so often happens.

I ought ( $\delta \varepsilon ı v$ ). Infinitive the usual construction with $\delta o \kappa \varepsilon \omega$. Necessity and a sense of duty drove Paul on even in this great $\sin$ (see on 23:1), a common failing with persecutors.

Contrary ( $\varepsilon v \alpha v \tau \iota \alpha)$. Old word (adjective), over against, opposite (Ac 27:4), then hostile to as here.

Acts 26:10
I both shut up many ( $\pi \mathrm{o} \lambda \lambda$ оия $\tau \varepsilon \kappa \alpha \tau \varepsilon \kappa \lambda \varepsilon เ \sigma \alpha$ ). Effective aorist active of $\kappa \alpha \tau \alpha \kappa \lambda \varepsilon \epsilon \omega$, old word to shut down like a trap door, in N.T. only here and Lu 3:20. Double use of $\tau \varepsilon$ (both--and).

Having received authority from the chief priests ( $\tau \eta v \pi \alpha \rho \alpha \tau \omega \nu \alpha \rho \chi เ \varepsilon \rho \varepsilon \omega \nu \varepsilon \xi \sigma 0 \sigma ı \alpha v$ $\lambda \alpha \beta \omega v)$. "The authority," he says. Paul was the official persecutor of the saints under the direction of the Sanhedrin. He mentions "chief priests" (Sadducees), though a Pharisee himself. Both parties were co-operating against the saints.

And when they were put to death ( $\alpha v a \iota \rho \circ \cup \mu \varepsilon v \omega v \tau \varepsilon \alpha \cup \tau \omega v$ ). Genitive absolute with present passive participle of avaıpec.

I gave my vote against them ( $\kappa \alpha \tau \eta \nu \varepsilon \gamma \kappa \alpha \psi \eta \varphi \circ v$ ). "I cast down my pebble" (a black one). The ancient Greeks used white pebbles for acquittal (Re 2:17), black ones for condemnation as here (the only two uses of the word in the N.T.). Paul's phrase (not found elsewhere) is more vivid than the usual $\kappa \alpha \tau \alpha \psi \eta \varphi \zeta \zeta \omega$ for voting. They literally cast the pebbles into the urn. Cf. $\sigma \nu \mu \psi \eta \varphi \iota \zeta \omega$ in Ac 19:19, $\sigma \cup \gamma \kappa \alpha \tau \alpha \psi \varepsilon \varphi \iota \zeta_{o}$ in Ac 1:26. If Paul's language is taken literally here, he was a member of the Sanhedrin and so married when he led the persecution. That is quite possible, though he was not married when he wrote 1Co 7:7f. , but a widower. It is possible to take the language figuratively for approval, but not so natural.

Acts 26:11
Punishing ( $\tau \tau \omega \omega \rho \omega v$ ). Old word $\tau \mu \mu \omega \rho \varepsilon \omega$ originally to render help, to succor ( $\tau \mu \omega \rho \circ \varsigma$, from $\tau \mu \mu \eta$ and oupoc), then to avenge (for honour). In N.T. only here and 22:5.

I strove to make them blaspheme ( $\eta v \alpha \gamma \kappa \alpha \zeta о \nu \beta \lambda \alpha \sigma \varphi \eta \mu \varepsilon เ v)$. Conative imperfect active of $\alpha v \alpha \gamma \kappa \alpha \zeta \omega$, old verb from $\alpha v \alpha \gamma \kappa \eta$ (necessity, compulsion). The tense, like the imperfect in Mt 3:14; Lu 1:59, leaves room to hope that Paul was not successful in this effort, for he had already said that he brought many "unto death" ( 22:4).

I persecuted ( $\varepsilon \delta \omega \kappa \kappa v$ ). Imperfect active again, repeated attempts. The old verb $\delta \omega \omega \kappa \omega$ was used to run after or chase game and then to chase enemies. The word "persecute" is the Latin persequor, to follow through or after. It is a vivid picture that Paul here paints of his success in hunting big game, a grand heresy hunt.

Even unto foreign cities ( $\kappa \alpha \varepsilon \iota \varsigma \varepsilon \xi \omega \pi$ то $\varepsilon \varepsilon \varsigma)$ ). We know of Damascus, and Paul evidently planned to go to other cities outside of Palestine and may even have done so before the fateful journey to Damascus.

Acts 26:12

Whereupon ( $\varepsilon v$ oıc). "In which things" (affairs of persecution), "on which errand." Cf. 24:18. Paul made them leave Palestine ( $11: 19$ ) and followed them beyond it ( $9: 2$ ).

With the authority and commission ( $\left.\mu \varepsilon \tau^{\prime} \varepsilon \xi о \cup \sigma \iota \alpha \varsigma ~ к \alpha \varepsilon \pi ı \tau \rho о \pi \eta \varsigma\right)$. Not merely "authority" ( $\varepsilon \xi o v \sigma \iota \alpha)$, but express appointment ( $\varepsilon \pi \iota \tau \rho \circ \pi \eta$, old word, but here only in N.T., derived from $\varepsilon \pi \iota \tau \rho о \pi о \varsigma$, steward, and that from $\varepsilon \pi \iota \tau \rho \varepsilon \pi \omega$, to turn over to, to commit).

Acts 26:13
At midday ( $\eta \mu \varepsilon \rho \alpha \varsigma \mu \varepsilon \sigma \eta \varsigma$ ). Genitive of time and idiomatic use of $\mu \varepsilon \sigma \circ \varsigma$, in the middle of the day, more vivid than $\mu \varepsilon \sigma \eta \mu \beta \rho \iota \alpha v(22: 6)$.

Above the brightness of the sun ( $v \pi \varepsilon \rho \tau \eta \nu \lambda \alpha \mu \pi \rho \circ \tau \eta \tau \alpha$ $\tau o v ~ \eta \lambda \iota o v$ ). Here alone not in Ac 9; 22 , though implied in 9:3; 22:6, "indicating the supernatural character of the light" (Knowling). Luke makes no effort to harmonize the exact phrases here with those in the other accounts and Paul here (verse 16) blends together what Jesus said to him directly and the message of Jesus through Ananias ( $9: 15$ ). The word $\lambda \alpha \mu \pi \rho o \tau \eta \varsigma$, old word, is here alone in the N.T.

Shining round about me ( $\pi \varepsilon \rho \iota \lambda \alpha \mu \psi \alpha \nu \mu \varepsilon$ ). First aorist active participle of $\pi \varepsilon \rho \iota \lambda \alpha \mu \pi \omega$, common Koine verb, in N.T. only here and Lu 2:9 .

Acts 26:14
When we were all fallen ( $\pi \alpha \nu \tau \omega \nu \kappa \alpha \tau \alpha \pi \varepsilon \sigma \sigma \nu \tau \omega v \eta \mu \omega v$ ). Genitive absolute with second aorist active participle of $\kappa \alpha \tau \alpha \pi \iota \tau \tau \omega$. In the Hebrew language ( $\tau \eta \mathrm{E} \beta \rho \alpha \iota \delta \delta \iota \Delta \lambda \varepsilon \kappa \tau \omega$ ). Natural addition here, for Paul is speaking in Greek, not Aramaic as in 22:2.

It is hard for thee to kick against the goad ( $\sigma \kappa \lambda \eta \rho \circ v$ бо $\pi \rho \circ \varsigma \kappa \varepsilon v \tau \rho \alpha \lambda \alpha \kappa \tau \iota \zeta \varepsilon เ v)$. Genuine here, but not in chapters 9,22. A common proverb as Aeschylus Ag. 1624: Проя $\kappa \varepsilon v \tau \rho \alpha \mu \eta \lambda \alpha \kappa \tau \iota \check{\text { ¢. "It is taken from an ox that being pricked with a goad kicks and receives }}$ a severer wound" (Page). Cf. the parables of Jesus (Mt 13:35). Blass observes that Paul's mention of this Greek and Latin proverb is an indication of his culture. Besides he mentions (not invents) it here rather than in chapter 22 because of the culture of this audience. Kevtpov means either sting as of bees (II Macc. 14:19) and so of death (1Co 15:55) or an iron goad in the ploughman's hand as here (the only two N.T. examples). Note plural here (goads) and $\lambda \alpha \kappa \kappa \iota \zeta \varepsilon เ v$ is present active infinitive so that the idea is "to keep on kicking against goads." This old verb means to kick with the heel (adverb $\lambda a \xi$, with the heel), but only here in the N.T. There is a papyrus example of kicking $(\lambda \alpha \kappa \tau \iota \zeta \omega)$ with the feet against the door.

Acts 26:16
Arise and stand ( $\alpha v a \sigma \tau \eta \theta \kappa \alpha \sigma \tau \eta \theta)$. "Emphatic assonance" (Page). Second aorist active imperative of compound verb ( $\alpha \nu \iota \sigma \tau \eta \mu$ ) and simplex ( $\iota \tau \eta \mu)$. "Stand up and take a stand."

Have I appeared unto thee ( $\omega \varphi \theta \eta \nu \sigma o$ ). First aorist passive indicative of opa $\omega$. See on Lu 22:43.

To appoint thee ( $\pi \rho о \chi \varepsilon \iota \rho \iota \sigma \alpha \sigma \alpha \sigma \varepsilon$ ). See 3:30; 22:14 for this verb.

Both of the things wherein thou hast seen me ( $\omega \nu \tau \varepsilon \varepsilon \iota \delta \varepsilon \varsigma \mu \varepsilon$ ). The reading $\mu \varepsilon$ (not in all MSS.) makes it the object of $\varepsilon \varepsilon \delta \varepsilon \varsigma$ (didst see) and $\omega \nu$ is genitive of $\alpha$ (accusative of general reference) attracted to the case of the unexpressed antecedent $\tau o v \tau \omega v$. Paul is thus a personal eyewitness of the Risen Christ (Lu 1:1; 1Co 4:1; 9:1).

And of the things wherein I will appear unto thee ( $\omega v \tau \varepsilon \sigma \varphi \theta \eta \sigma o \mu \alpha \sigma o$ ). Here again $\omega \nu$ is genitive of the accusative (general reference) relative $\alpha$ attracted to the case of the antecedent $\tau 0 v \tau \omega \nu$ or $\varepsilon \kappa \varepsilon \iota \nu \omega \nu$ as before. But $\sigma \varphi \eta \sigma \circ \mu \alpha$ is first future passive of opa $\omega$ and cannot be treated as active or middle. Page takes it to mean "the visions in which I shall be seen by you," the passive form bringing out the agency of God. See those in Ac 18:9; 23:11; 2 Co 12:2 . The passive voice, however, like $\alpha \pi \varepsilon \kappa \rho i \theta \eta \nu$ and $\varepsilon \varphi o \beta \eta \theta \eta \nu$, did become sometimes transitive in the Koine (Robertson, Grammar, p. 819).

Acts 26:17
Delivering thee $(\varepsilon \xi \alpha \iota \rho \circ \cup \mu \varepsilon v \circ \varsigma \sigma \varepsilon)$. Present middle participle of $\varepsilon \xi \alpha \iota \rho \varepsilon \omega$, old verb and usually so rendered, but the old Greek also uses it for "choose" as also in LXX (Isa 48:10 ). The papyri give examples of both meanings and either makes good sense here. God was continually rescuing Paul "out of the hands of Jews and Gentiles and Paul was a chosen vessel" ( 9:15). Modern scholars are also divided.

## Acts 26:18

To open ( $\alpha \sim o l \xi \alpha$ ). First aorist active infinitive of purpose.
That they may turn ( $\tau 0 v \varepsilon \pi \iota \sigma \tau \rho \varepsilon \psi \alpha$ ). Another infinitive of purpose first aorist active (genitive case and articular), epexegetic to $\alpha v o ı \xi \alpha$.

That they may receive ( $\operatorname{\tau ov} \lambda \alpha \beta \varepsilon เ v$ ). Another genitive articular infinitive of purpose subordinate (epexegetic) to $\tau 0 v \varepsilon \pi \iota \sigma \tau \rho \varepsilon \psi \alpha$.

Sanctified by faith in me ( $\eta \gamma \iota \alpha \sigma \mu \varepsilon v o \iota \varsigma \pi \iota \sigma \tau \varepsilon \tau \eta \varepsilon \iota \varsigma \varepsilon \mu \varepsilon$ ). Perfect passive participle of $\alpha \gamma \iota \varsigma \zeta \omega$, instrumental case of $\pi \iota \sigma \tau \varepsilon$, article before $\varepsilon \iota \varsigma \varepsilon \mu \varepsilon$ ("by faith, that in me"). These important words of Jesus to Paul give his justification to this cultured audience for his response to the command of Jesus. This was the turning point in Paul's career and it was a step forward and upward.

Acts 26:19
Wherefore ( $o \theta \varepsilon v$ ). This relatival adverb (cf. 14:26; 28:13) gathers up all that Paul has said.

I was not disobedient (ouk $\varepsilon \gamma \varepsilon \nu \circ \mu \eta \nu a \pi \varepsilon ו \theta \eta \varsigma$ ). Litotes again, "I did not become (second aorist middle indicative of $\gamma เ v o \mu \alpha)$ disobedient" ( $\alpha \pi \varepsilon \iota \forall \eta \varsigma$, old word already in Lu 1:17).

Unto the heavenly vision ( $\tau \eta \quad 0 \cup \rho \alpha \nu \iota \omega$ o $\tau \tau \alpha \sigma \iota \alpha$ ). A later form of $0 \psi \iota \varsigma$, from $0 \pi \tau \alpha \zeta \omega$, in LXX, and in N.T. (Lu 1:22; 24:23; Ac 26:19; 2Co 12:1). Only time that Paul uses it about seeing Christ on the Damascus road, but no reflection on the reality of the event.

Acts 26:20
But declared ( $\alpha \lambda \lambda \alpha \alpha \pi \eta \gamma \gamma \varepsilon \lambda \lambda o v$ ). Imperfect active of $\alpha \pi \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$, repeatedly.

Throughout all the country of Judea ( $\pi \alpha \sigma \alpha v \tau \varepsilon \tau \eta v \chi \omega \rho \alpha v \tau \eta \zeta$ Iov $\delta \alpha i \alpha \varsigma)$. The accus-
 strange and Page feels certain that $\varepsilon ו \zeta$ should be here even though absent in Aleph A B. But the accusative of extent of space will explain it (Robertson, Grammar, p. 469).

Doing works worthy of repentance ( $\alpha \xi \iota \alpha \tau \eta \varsigma \mu \varepsilon \tau \alpha v o \leftrightarrow \alpha \varsigma \varepsilon \rho \gamma \alpha \pi \rho \alpha \sigma \sigma \circ \nu \tau \alpha \varsigma)$. Accusative case of present active participle $\pi \rho \alpha \sigma \sigma 0 v \tau \alpha \varsigma$ because of the implied autou¢ with the present infinitive $\mu \varepsilon \tau \alpha v o \varepsilon ı v$ (repent) and $\varepsilon \pi \iota \sigma \tau \rho \varepsilon \varphi \varepsilon \iota v$ (turn), though the dative $\pi \rho \alpha \sigma \sigma \sigma v \sigma \iota v$ could have been used to agree with $\varepsilon \theta$ veøtv (Gentiles). Cf. Mt $3: 8$ for similar language used of the Baptist. Paul, the greatest of theologians, was an interesting practical preacher.

Acts 26:21
Assayed to kill me ( $\varepsilon \pi \varepsilon \iota \rho \omega v \tau 0 \quad \delta ı \alpha \chi \varepsilon \iota \rho \iota \sigma \sigma \theta \alpha$ ). Conative imperfect middle of $\pi \varepsilon \iota \rho \alpha \omega$, the old form of the later Koine $\pi \varepsilon \iota \rho \zeta \omega$ so common in the Koine, but in N.T. here only. Some MSS. have it in Ac 9:26; Heb 4:15. The old verb $\delta$ taxe $\rho \stackrel{\zeta}{\omega} \omega$, to take in hand, middle to lay hands on, to slay, occurs in N.T. only here and 5:30 which see.

Acts 26:22
Having therefore obtained (ouv $\tau \cup \chi \omega v$ ). Second aorist active participle of old verb $\tau \cup \gamma \chi \alpha v \omega$.
 to aid, and that from erıkoupos, ally, assister. Only here in N.T. God is Paul's ally. All of the plots of the Jews against Paul had failed so far.
 word (Page) of Paul's stability and fidelity (cf. Php 4:1; Eph 6:13).

Both to small and great ( $\mu \kappa \rho \omega \tau \varepsilon \kappa \alpha \mu \varepsilon \gamma \alpha \lambda \omega$ ). Dative singular (rather than instrumental, taking $\mu \alpha \rho \tau v \rho о \cup \mu \varepsilon v o \varsigma ~ m i d d l e, ~ n o t ~ p a s s i v e) ~ a n d ~ u s e ~ o f ~ \tau \varepsilon ~ к \alpha ~ l i n k s ~ t h e ~ t w o ~ a d j e c t i v e s ~ t o-~$ gether in an inclusive way. These two adjectives in the singular (representative singular rather than plural) can apply to age (young and old) or to rank (Re 11:18) as is specially suitable here with Festus and Agrippa present. In Ac 8:10 (Heb 8:11) the phrase explains ravtec (all).

Saying nothing but what (ov $\delta \varepsilon v \varepsilon \kappa \tau о \varsigma ~ \lambda \varepsilon \gamma \omega v \omega v$ ). "Saying nothing outside of those things which." The ablative relative $\omega v$ is attracted into the case of the unexpressed antecedent $\tau 0 \tau \tau \omega v$ and so ablative after $\varepsilon \kappa \tau о \varsigma$ (adverbial preposition common in LXX, the papyri. In N.T. here and 1Co 6:18; 15:27; 2Co 12:2f. ). Cf. Lu 16:29 about Moses and the prophets.

Acts 26:23
 subject to suffering." E can here mean "whether" as in Heb 7:15. This use of a verbal in -tos for capability or possibility occurs in the N.T. alone in $\pi \alpha \theta \eta \tau o \varsigma ~(R o b e r t s o n, ~ G r a m m a r, ~ p . ~$ 157). This word occurs in Plutarch in this sense. It is like the Latin patibilis and is from pascho. Here alone in N.T. Paul is speaking from the Jewish point of view. Most rabbis had
not rightly understood Isa 53 . When the Baptist called Jesus "the Lamb of God" (Joh 1:29 ) it was a startling idea. It is not then "must suffer" here, but "can suffer." The Cross of Christ was a stumbling-block to the rabbis.

How that he first by the resurrection of the dead ( $\varepsilon \pi \rho \omega \tau о \varsigma \varepsilon \xi \alpha v a \sigma \tau \alpha \sigma \varepsilon \omega \varsigma \nu \varepsilon \kappa \rho \omega v$ ). Same construction with $\varepsilon$ (whether). This point Paul had often discussed with the Jews: "whether he (the Messiah) by a resurrection of dead people." Others had been raised from the dead, but Christ is the first ( $\pi \rho \omega \tau$ тоऽ) who arose from the dead and no longer dies (Ro 6:19) and proclaims light ( $\varphi \omega \varsigma \mu \varepsilon \lambda \lambda \varepsilon \kappa \alpha \tau \alpha \gamma \gamma \varepsilon \lambda \lambda \varepsilon เ v)$. Paul is still speaking from the Jewish standpoint: "is about to (going to) proclaim light." See verse 18 for "light" and Lu 2:32 .

Both to the people and to the Gentiles ( $\tau \omega \tau \varepsilon \lambda \alpha \omega \kappa \alpha$ тoı $\varepsilon \theta v \varepsilon \sigma \tau v$ ). See verse 17. It was at the word Gentiles ( $\varepsilon \theta v \eta$ ) that the mob lost control of themselves in the speech from the stairs (22:21f. ). So it is here, only not because of that word, but because of the word "resurrection" (avactaoı¢).

Acts 26:24
As he thus made his defence ( $\tau \alpha \cup \tau \alpha$ autov $\alpha \pi о \lambda о \gamma о \cup \mu \varepsilon v o v)$. Genitive absolute again with present middle participle. Paul was still speaking when Festus interrupted him in great excitement.

With a loud voice ( $\mu \varepsilon \gamma \alpha \lambda \eta \tau \eta \varphi \omega v \eta)$. Associative instrumental case showing manner (Robertson, Grammar, p. 530) and the predicate use of the adjective, "with the voice loud" (elevated).

Thou art mad ( $\mu \alpha ı v \eta)$. Old verb for raving. See also Joh 10:20; Ac 12:15; 1Co 14:23. The enthusiasm of Paul was too much for Festus and then he had spoken of visions and resurrection from the dead (verse 8). "Thou art going mad" (linear present), Festus means.

Thy much learning doth turn thee to madness ( $\tau \alpha \pi о \lambda \lambda \alpha \sigma \varepsilon \quad \gamma \rho \alpha \mu \mu \alpha \tau \alpha \varepsilon ו \varsigma \mu \alpha v i \alpha v$ $\pi \varepsilon \rho \iota \tau \rho \varepsilon \pi \varepsilon)$. "Is turning thee round." Old verb $\pi \varepsilon \rho \iota \tau \rho \varepsilon \pi \omega$, but only here in N.T. Festus thought that Paul's "much learning" (="many letters," cf. Joh 7:15 of Jesus) of the Hebrew Scriptures to which he had referred was turning his head to madness (wheels in his head) and he was going mad right before them all. The old word $\mu \alpha v i \alpha$ (our mania, frenzy, cf. maniac) occurs here only in N.T. Note unusual position of $\sigma \varepsilon$ between $\pi о \lambda \lambda \alpha$ and $\gamma \rho \alpha \mu \mu \alpha \tau \alpha$ (Robertson, Grammar, pp. 418, 420)

Acts 26:25
But speak forth ( $\alpha \lambda \lambda \alpha \alpha \pi \sigma \varphi \theta \varepsilon \gamma \gamma \rho \mu \alpha$ ). Verb for dignified and elevated discourse, a word from the literary Koine, not the vernacular. In N.T. only here and 2:4,14 which see. It occurs three times in Vettius Valens in a "mantic" sense. Paul was not ruffled by the rude and excited interruption of Festus, but speaks with perfect courtesy in his reply "words of truth and soberness." The old word $\sigma \omega \varphi \rho o \sigma u v \eta$ (soundness of mind) from $\sigma \omega \varphi \rho \omega v$ (and that from $\sigma \omega \varsigma$ and $\varphi \rho \eta \nu$ ) is directly opposed to "madness" ( $\mu \alpha \nu \tau \alpha$ ) and in N.T. occurs only here and 1Ti 2:15.

## Acts 26:26

For the king knoweth of these things ( $\varepsilon \pi\llcorner\sigma \tau \alpha \tau \alpha ~ \gamma \alpha \rho \pi \varepsilon \rho ~ \tau о \nu \tau \omega v$ o $\beta a \sigma \iota \lambda \varepsilon u \varsigma)$. Eлıбтата (present middle probably Ionic form of $\varepsilon \varphi\llcorner\tau \tau \eta \mu$ ) is a literary word and suits well here (cf. 24:10).

Freely ( $\pi \alpha \rho \rho \eta \sigma \omega \zeta о \mu \varepsilon v o \varsigma)$. Present middle participle, speaking fully, making a clean breast of it. From $\pi \alpha \rho \rho \eta \sigma \iota \alpha(\pi \alpha v, \rho \eta \sigma ı \varsigma)$ (cf. 13:46).

Is hidden from him ( $\lambda \alpha v \theta \alpha v \varepsilon เ v ~ a v \tau o v)$. Escapes his notice. Infinitive in indirect discourse after $\pi \varepsilon 1 \theta$ o $\mu \alpha$ ( $I$ am persuaded).

Acts 26:27
I know that thou believest (oı $\delta \alpha$ o七 $\pi / \sigma \tau \varepsilon \cup \varepsilon ı)$ ). Paul had "cornered" Agrippa by this direct challenge. As the Jew in charge of the temple he was bound to confess his faith in the prophets. But Paul had interpreted the prophets about the Messiah in a way that fell in with his claim that Jesus was the Messiah risen from the dead. To say, "Yes" would place himself in Paul's hands. To say "No" would mean that he did not believe the prophets. Agrippa had listened with the keenest interest, but he slipped out of the coils with adroitness and a touch of humour.

Acts 26:28
With but little persuasion thou wouldest fain make me a Christian ( $\varepsilon \nu \quad o \lambda t \gamma \omega \mu \varepsilon$
 me to be a Christian." Ev o $\lambda \iota \gamma \omega$ does not mean "almost." That would require $o \lambda \iota \gamma o v, \pi \alpha \rho^{\prime}$ o $\lambda \iota \gamma \circ v$, or $\delta \varepsilon$ o $\lambda_{\imath} \neq 0$. It is not clear, however, precisely what $\varepsilon v$ o $\lambda \iota \gamma$ o does mean. It may refer to time (in little time) or a short cut, but that does not suit well $\varepsilon v \mu \varepsilon \gamma \alpha \lambda \omega$ in verse 29. Tyndale and Crammer rendered it "somewhat" (in small measure or degree). There are, alas, many "somewhat" Christians. Most likely the idea is "in (or with) small effort you are trying to persuade ( $\pi \varepsilon \mid \theta \varepsilon ı$, conative present active indicative) me in order to make me a Christian." This takes the infinitive $\pi$ oin $\sigma \alpha$ to be purpose (Page renders it by "so as") and thus avoids trying to make $\pi$ oוף $\sigma \alpha$ like $\gamma \varepsilon v \varepsilon \sigma \theta a$ (become). The aorist is punctiliar action for single act, not "perfect." The tone of Agrippa is ironical, but not unpleasant. He pushes it aside with a shrug of the shoulders. The use of "Christian" is natural here as in the other two instances (11:26; 1Pe 4:16).

Acts 26:29
I would to God ( $\varepsilon v \xi \alpha \mu \eta \nu \alpha \nu \tau \omega \theta \varepsilon \omega$ ). Conclusion of fourth-class condition (optative with $\alpha v$ ), undetermined with less likelihood, the so-called potential optative (Robertson, Grammar, p. 1021). Polite and courteous wish (first aorist middle optative of $\varepsilon v \chi o \mu \alpha)$.

Whether with little or with much ( $\kappa \alpha \varepsilon v \mu \kappa \rho \omega \kappa \alpha \varepsilon v \mu \varepsilon \gamma \alpha \lambda \omega$ ). Literally, "both in little and in great," or "both with little and with great pains" or "both in some measure and in great measure." Paul takes kindly the sarcasm of Agrippa.
 $\gamma \varepsilon v \varepsilon \sigma \theta \alpha$. Paul uses these two qualitative pronouns instead of repeating the word "Christian."

Except these bonds ( $\pi \alpha \rho \varepsilon \kappa \tau о \varsigma \tau \omega v \delta \varepsilon \sigma \mu \omega v \tau \tau \nu \tau \omega v$ ). Ablative case with $\pi \alpha \rho \varepsilon \kappa \tau о \varsigma$ (late preposition for the old $\pi \alpha \rho \varepsilon \kappa)$. Paul lifts his right manacled hand with exquisite grace and good feeling.

Acts 26:30
Rose up ( $\alpha v \varepsilon \sigma \tau \eta$ ). Second aorist active of $\alpha v / \sigma \tau \eta \mu$ (intransitive), agreeing only with "the king" (o $\beta \alpha \sigma i \lambda \varepsilon v \varsigma)$. The entertainment was over.

Acts 26:31
They spake one to another ( $\varepsilon \lambda \alpha \lambda o u v \pi \rho o \varsigma \alpha \lambda \lambda \eta \lambda o v \varsigma)$. Imperfect active, describing the eager conversation of the dignitaries about Paul's wonderful speech.

Nothing worthy of death or bonds (ov $\delta \varepsilon v$ Өavatov $\eta \delta \varepsilon \sigma \mu \omega v a \xi \circ o v$ ). This is the unanimous conclusion of all these dignitaries (Romans, Jews, Greeks) as it was of Festus before ( $25: 25$ ). But Paul had not won any of them to Christ. The conclusion leaves Festus in a predicament. Why had he not set Paul free before this?

Acts 26:32
This man might have been set at liberty ( $А \pi о \lambda \varepsilon \lambda \nu \sigma \theta a \varepsilon \delta \nu v a \tau о$ o $\alpha v \theta \rho \omega \pi о \varsigma$ оитоৎ). Conclusion of the second class condition (determined as unfulfilled) without $\alpha v$ as in 24:19 because of $\varepsilon \delta u v a \tau o$ (verb of possibility, Robertson, Grammar, p. 1014). Note perfect passive infinitive $\alpha \pi \sigma \lambda \varepsilon \lambda \nu \sigma \theta \alpha$ from $\alpha \pi \sigma \lambda \nu \omega$. He certainly "could have been set free." Why was it not done?

If he had not appealed unto Caesar ( $\varepsilon \mu \eta \varepsilon \pi \varepsilon \kappa \varepsilon \kappa \lambda \eta \tau$ К Kaıб $\alpha \rho \alpha$ ). Condition of the second class with the past perfect middle indicative (op. cit., p. 1015) of $\varepsilon \pi \iota \kappa \alpha \lambda \varepsilon \omega$ (cf. 25:11f. ). But Paul only appealed to Caesar after Festus had tried to shift him back to Jerusalem and had refused to set him free in Caesarea. Festus comes out with no honour in the case. Since Agrippa was a favourite at court perhaps Festus would be willing to write favourably to Caesar.

## Acts 27

Acts 27:1
That we should sail ( $\tau 0 v \alpha \pi о \pi \lambda \varepsilon เ \nu \eta \mu \alpha \varsigma)$. This genitive articular infinitive with $\varepsilon \kappa \rho \iota \theta \eta$ like the LXX construction translating the Hebrew infinitive construct is awkward in Greek. Several similar examples in Lu 17:1; Ac 10:25; 20:3 (Robertson, Grammar, p. 1068). Luke alone uses this old verb in N.T. He uses nine compounds of $\pi \lambda \varepsilon \omega$, to sail. Note the reappearance of "we" in the narrative. It is possible, of course, that Luke was not with Paul during the series of trials at Caesarea, or at least, not all the time. But it is natural for Luke to use "we" again because he and Aristarchus are travelling with Paul. In Caesarea Paul was the centre of the action all the time whether Luke was present or not. The great detail and minute accuracy of Luke's account of this voyage and shipwreck throw more light upon ancient seafaring than everything else put together. Smith's Voyage and Shipwreck of St. Paul is still a classic on the subject. Though so accurate in his use of sea terms, yet Luke writes like a landsman, not like a sailor. Besides, the character of Paul is here revealed in a remarkable fashion.

They delivered ( $\pi \alpha \rho \varepsilon \delta \delta \delta o v \nu$ ). Imperfect active $\omega \mu \varepsilon \gamma \alpha$ form rather than the old $-\mu$ form $\pi \alpha \rho \varepsilon \delta \iota \delta o \sigma \alpha v$ as in 4:33, from $\pi \alpha \rho \alpha \delta \iota \delta \omega \mu$. Perhaps the imperfect notes the continuance of the handing over.

Certain other prisoners ( $\tau \iota v \propto \varsigma \tau \varepsilon \rho \circ v \varsigma \delta \varepsilon \sigma \mu \omega \tau \alpha \varsigma)$. Bound ( $\delta \varepsilon \sigma \mu \omega \tau \alpha \varsigma$ ) like Paul, but not necessarily appellants to Caesar, perhaps some of them condemned criminals to amuse the Roman populace in the gladiatorial shows, most likely pagans though eזe have to mean different kind of prisoners from Paul.

Of the Augustan band ( $\sigma \pi \varepsilon \iota \rho\rceil \varsigma \Sigma \varepsilon \beta \alpha \sigma \tau \eta \varsigma)$. Note Ionic genitive $\sigma \pi \varepsilon \iota \rho \eta \varsigma$, not $\sigma \pi \varepsilon \iota \rho a \varsigma$. See on Mt 27:1; Ac 10:1 . Xоортıs Avүvoтає. We do not really know why this cohort is called "Augustan." It may be that it is part of the imperial commissariat (frumentarii) since Julius assumes chief authority in the grain ship (verse 11). These legionary centurions when in Rome were called peregrini (foreigners) because their work was chiefly in the provinces. This man Julius may have been one of them.

Acts 27:2
In a ship of Adramyttium ( $\pi \lambda o \iota \omega \mathrm{H} \alpha \delta \rho \alpha \mu \nu \nu \tau \eta \nu \omega)$. A boat belonging to Adramyttium, a city in Mysia in the province of Asia. Probably a small coasting vessel on its way home for the winter stopping at various places ( $\tau о \pi о \cup \varsigma)$. Julius would take his chances to catch another ship for Rome. The usual way to go to Rome was to go to Alexandria and so to Rome, but no large ship for Alexandria was at hand.

We put to sea ( $\alpha v \eta \chi^{\theta} \eta \mu \varepsilon \nu$ ). First aorist passive of $\alpha v \alpha \gamma \omega$, usual word in Luke.
Aristarchus, a Macedonian of Thessalonica, being with us (ov $\sigma \varsigma \varsigma \sigma \nu \eta \mu เ \nu$ A $\rho \iota \sigma \tau \alpha \rho \chi \circ v$ Макє $о$ оою $\Theta \varepsilon \sigma \sigma \alpha \lambda о v ı \kappa \varepsilon \omega \varsigma) . ~ G e n i t i v e ~ a b s o l u t e . ~ R a m s a y ~ s u g g e s t s ~ t h a t ~ L u k e ~ a n d ~ A r i s t a r c h u s ~$
accompanied Paul as his slaves since they would not be allowed to go as his friends. But Luke was Paul's physician and may have gained permission on that score.

## Acts 27:3

The next day ( $\tau \eta \varepsilon \tau \varepsilon \rho \alpha$ ). Locative case with $\eta \mu \varepsilon \rho \alpha$ understood.
We touched ( $\kappa \alpha \tau \eta \chi \theta \eta \mu \varepsilon v$ ). First aorist passive of $\kappa \alpha \tau \alpha \gamma \omega$, the usual term for "coming down" from the seas as avaү $\omega$ above (and verse 4) is for "going up" to sea. So it looks to sailors. Sidon was 67 miles from Caesarea, the rival of Tyre, with a splendid harbour. The ship stopped here for trade.

Treated Paul kindly ( $\varphi\rangle \lambda \alpha v \theta \rho \omega \pi \omega \varsigma \tau \omega \Pi \alpha \nu \lambda \omega \chi \rho \eta \sigma \alpha \mu \varepsilon v o \varsigma)$. "Using ( $\chi \rho \eta \sigma \alpha \mu \varepsilon v o \varsigma$, first aorist middle participle of $\chi \rho \alpha o \mu \alpha$, to use) Paul (instrumental case used with this verb) kindly" ( $\varphi \iota \lambda \alpha v \theta \rho \omega \pi \omega \varsigma$, "philanthropically," adverb from $\varphi \backslash \lambda-\alpha v \theta \rho \omega \pi \sigma$, love of mankind). He was kindly to Paul throughout the voyage (verse 43; 28:16), taking a personal interest in his welfare.

Refresh himself ( $\varepsilon \pi \mu \mu \varepsilon \lambda \varepsilon ા \alpha \varsigma \tau \cup \chi \varepsilon ı v)$. Second aorist active infinitive of $\tau \cup \gamma \chi \alpha v \omega$ (to obtain) with the genitive $\varepsilon \pi \mu \mu \varepsilon \lambda \varepsilon เ a \varsigma$, old word from $\varepsilon \pi \mu \mu \varepsilon \lambda \eta \varsigma$, careful, only here in the N.T. Whether it was mere hospitality we do not know. It may have been medical attention required because of Paul's long confinement. This is Paul's first visit to Sidon, but Christians were already in Phoenicia ( 11:19) and so Paul had "friends" here.

Acts 27:4
We sailed under the lee of Cyprus ( $v \pi \varepsilon \pi \lambda \varepsilon v \sigma \alpha \mu \varepsilon \nu \tau \eta \nu K \nu \pi \rho o v$ ). First aorist active indicative of $v \pi \frac{\pi}{\lambda} \varepsilon \omega$, to sail under. Cyprus was thus on the left between the ship and the wind from the northwest, under the protection of Cyprus.
 infinitive after $\delta \Delta \alpha$ and the accusative of general reference ( $\alpha v \varepsilon \mu \circ)_{\varsigma}$ ) with predicate accusative ( $\varepsilon v a v \tau \iota o v \varsigma$, facing them, in their very teeth if they went that way). The Etesian winds were blowing from the northwest so that they could not cut straight across from Sidon to Patara with Cyprus on the right. They must run behind Cyprus and hug the shore of Cilicia and Pamphylia.

Acts 27:5
When we had sailed across ( $\delta 1 \alpha \pi \lambda \varepsilon v \sigma \alpha v \tau \varepsilon \varsigma)$. First aorist active participle of $\delta \iota \alpha \pi \lambda \varepsilon \omega$ (another compound of $\pi \lambda \varepsilon \omega$ ).

The sea which is off Cilicia and Pamphylia (то $\pi \varepsilon \lambda \alpha \gamma о \varsigma ~ т о ~ к а \tau \alpha ~ \tau \eta \nu ~ К ı \lambda ı к ı \alpha \nu ~ к а ~$ Пацчט $\lambda_{\iota} \alpha v$ ). Пع $\lambda \alpha \gamma \circ \varsigma$ is properly the high sea as here. In Mt 18:6 (which see) Jesus uses it of "the depth of the sea." Only these examples in the N.T. The current runs westward along the coast of Cilicia and Pamphylia and the land would protect from the wind.
 down." This town was two and a half miles from the coast of Lycia. The port Andriace had
a fine harbour and did a large grain business. No disciples are mentioned here nor at Lasea, Melita, Syracuse, Rhegium.

Acts 27:6
Sailing for Italy ( $\pi \lambda \varepsilon \circ \vee \varepsilon ı \varsigma \tau \eta \nu I \tau \alpha \lambda ı \alpha v$ ). This was the opportunity for which Lysias had been looking. So he put ( $\varepsilon v \varepsilon \beta \iota \beta a \sigma \varepsilon v$, first aorist active of $\varepsilon \mu \beta \iota \beta \alpha \zeta \omega$, to cause to enter. Cf. $\varepsilon \pi \_\beta \alpha \nu \tau \varepsilon \varsigma$ in verse 2) prisoners and soldiers on board. This was a ship of Alexandria bound for Rome, a grain ship (38) out of its course because of the wind. Such grain ships usually carried passengers.

Acts 27:7
When we had sailed slowly ( $\beta \rho \alpha \delta v \pi \lambda o o v v \tau \varepsilon \varsigma$ ). Present active participle of $\beta \rho \alpha \delta v \pi \lambda o \varepsilon \omega$ ( $\beta \rho \alpha \delta v \varsigma$, slow, $\pi \lambda o v \varsigma$, voyage). Literally, "sailing slowly," not "having or had sailed slowly." Only here and in Artemidorus (sec. cent. A.D.). It may mean "tacking" before the wind. Polybius uses $\tau \alpha \chi \cup \pi \lambda o \varepsilon \omega$, to sail swiftly.
 days."

With difficulty ( $\mu \mathrm{o} \lambda \iota \varsigma$ ). Used in old Greek, like $\mu$ оүヶ¢ (Lu 9:39) from $\mu \circ \lambda$ оৎ, toil (see Ac 14:18).

Over against Cnidus ( $\kappa \alpha \tau \alpha \tau \eta \nu K v i \delta o v)$. "Down along Cnidus." A hundred and thirty miles from Myra, the southwest point of Asia Minor and the western coast. Here the protection of the land from the northwest wind ceased.

The wind not further suffering us ( $\mu \eta \pi \rho \circ \sigma \varepsilon \omega \nu \tau о \varsigma \eta \mu \alpha \varsigma \tau o v a v \varepsilon \mu \circ v$ ). Genitive absolute with present active participle of $\pi \rho \circ \sigma \varepsilon \alpha \omega$, one of the few words still "not found elsewhere" (Thayer). Regular negative $\mu \eta$ with participles. They could not go on west as they had been doing since leaving Myra.

We sailed under the lee of Crete ( $v \pi \varepsilon \pi \lambda \varepsilon v \sigma a \mu \varepsilon \nu \tau \eta \nu K \rho \eta \tau \eta \nu)$. See under verse 4. Instead of going to the right of Crete as the straight course would have been they sailed southwest with Crete to their right and got some protection against the wind there.

Over against Salmone ( $\kappa \alpha \tau \alpha \Sigma \alpha \lambda \mu \omega v \eta \nu$ ). Off Cape Salmone, a promontory on the east of the island.

Acts 27:8
Coasting along ( $\pi \alpha \rho \alpha \lambda \varepsilon \gamma \rho \mu \varepsilon v o$ ). Present middle participle of $\pi \alpha \rho \alpha \lambda \varepsilon \gamma \omega$, to lay beside, not from $\lambda \varepsilon \gamma \omega$, to collect or $\lambda \varepsilon \gamma \omega$, to say. Diodorus Siculus uses $\pi \alpha \rho \alpha \lambda \varepsilon \gamma o \mu \alpha$ in precisely this sense of coasting along, like Latin legere oram. In N.T. only here and verse 13.

Fair Havens (Ka入ovc $\Lambda \iota \mu \varepsilon v a \varsigma)$ ). This harbour is named Kalus Limeonas, a small bay two miles east of Cape Matala. It opens to the East and Southeast, but is not fit to winter in. This harbour would protect them for a time from the winds.

The city of Lasea ( $\pi 0 \lambda \_\varsigma \Lambda \alpha \sigma \varepsilon \alpha$ ). Neither Lasea nor Fair Havens is mentioned by any ancient writer, two of the hundred cities of Crete.

Acts 27:9
 with second aorist middle participle of $\delta \iota \alpha \nmid v o \mu \alpha$, to come in between ( $\delta \iota \alpha$ ). "Considerable time intervening," since they became weatherbound in this harbour, though some take it since they left Caesarea.

And the voyage was now dangerous ( $\kappa \alpha$ оvтоৎ $\eta \delta \eta \varepsilon \pi / \sigma \varphi \alpha \lambda о \nu \varsigma)$. Genitive absolute, "and the voyage being already ( $\eta \delta \eta=$ Latin $j a m$ ) dangerous" (old word from $\varepsilon \pi$ and $\sigma \varphi \alpha \lambda \lambda \omega$, to trip, to fall, and so prone to fall, here only in N.T.).

Because the Fast was now already gone by ( $\delta \iota \alpha$ то к $\alpha \tau \eta v \nu \eta \sigma \tau \varepsilon \varepsilon \alpha \vee \eta \delta \eta \pi \alpha \rho \varepsilon \lambda \eta \lambda v \theta \varepsilon v \alpha$ ). Accusative (after $\delta(\alpha)$ ) of the articular infinitive perfect active of $\pi \alpha \rho \varepsilon \rho \chi \circ \mu \alpha$, to pass by, with the accusative of general reference ( $v \eta \sigma \tau \varepsilon \iota \alpha v$, the great day of atonement of the Jews, Le 16:29ff. ) occurring about the end of September. The ancients considered navigation on the Mediterranean unsafe from early October till the middle of March. In A.D. 59 the Fast occurred on Oct. 5. There is nothing strange in Luke using this Jewish note of time as in 20:6 though a Gentile Christian. Paul did it also (1Co 16:8). It is no proof that Luke was a Jewish proselyte. We do not know precisely when the party left Caesarea (possibly in August), but in ample time to arrive in Rome before October if conditions had been more favourable. But the contrary winds had made the voyage very slow and difficult all the way (verse 7) besides the long delay here in this harbour of Fair Havens.

Paul admonished them ( $\pi \alpha \rho \eta \iota v \eta$ о Паv入oc). Imperfect active of $\pi \alpha \rho \alpha \iota v \varepsilon \omega$, old word to exhort from $\pi \alpha \rho \alpha$ and $\alpha \iota \varepsilon \varepsilon \omega$, to praise ( 3:8), only here and verse 22 in N.T. It is remarkable that a prisoner like Paul should venture to give advice at all and to keep on doing it (imperfect tense inchoative, began to admonish and kept on at it). Paul had clearly won the respect of the centurion and officers and also felt it to be his duty to give this unasked for warning.

I perceive $(\theta \varepsilon \omega \rho \omega)$. Old word from $\theta \varepsilon \omega \rho o \varsigma$, a spectator. See Lu 10:18. Paul does not here claim prophecy, but he had plenty of experience with three shipwrecks already (2Co 11:25 ) to justify his apprehension.

Will be ( $\mu \varepsilon \lambda \lambda \varepsilon$ Iv $\varepsilon \sigma \varepsilon \sigma \theta \alpha$ ). Infinitive in indirect assertion followed by future infinitive after $\mu \varepsilon \lambda \lambda \varepsilon ו \nu$ in spite of o 0 which would naturally call for present indicative $\mu \varepsilon \lambda \lambda \varepsilon$, an anacoluthon due to the long sentence (Robertson, Grammar, p. 478).

With injury ( $\mu \varepsilon \tau \alpha \cup \beta \rho \varepsilon \omega \varsigma)$. An old word from $v \pi \varepsilon \rho$ (above, upper, like our "uppishness") and so pride, insult, personal injury, the legal word for personal assault (Page). Josephus (Ant. III. 6, 4) uses it of the injury of the elements.

Loss ( (ఇŋuav). Old word, opposite of кєpסoc, gain or profit (Php 3:7f. ). Nowhere else in N.T.
 word, but in N.T. only here in literal sense, as metaphor in Mt 11:30; 23:4; Lu 11:46; Ga 6:5

But also of our lives ( $\alpha \lambda \lambda \alpha \kappa \alpha \tau \omega \nu \psi v \chi \omega v$ ). Common use of $\psi v \chi \eta$ for life, originally "breath of life" (Ac 20:10 ), and also "soul" ( 14:2). Fortunately no lives were lost, though all else was. But this outcome was due to the special mercy of God for the sake of Paul (verse 24), not to the wisdom of the officers in rejecting Paul's advice. Paul begins now to occupy the leading role in this marvellous voyage.

Acts 27:11
Gave more heed ( $\mu \alpha \lambda \lambda 0 \nu \varepsilon \pi \varepsilon \iota \theta \varepsilon \tau o$ ). Imperfect middle of $\pi \varepsilon \iota \theta \omega$, to yield to (with the dative case). The "Frumentarian" centurion ranked above the captain and owner. As a military officer the centurion was responsible for the soldiers, the prisoners, and the cargo of wheat. It was a government ship. Though the season was not advanced, the centurion probably feared to risk criticism in Rome for timidity when the wheat was so much needed in Rome (Knowling).

To the master ( $\tau \omega \kappa \nu \beta \varepsilon \rho \nu \eta \tau \eta$ ). Old word from $\kappa \nu \beta \varepsilon \rho v \alpha \omega$, to steer, and so steersman, pilot, sailing-master. Common in this sense in the papyri. In N.T. only here and Re 18:17.

And to the owner of the ship ( $\kappa \alpha \tau \omega v a v \kappa \lambda \eta \rho \omega$ ). Old word compounded of $v a v \varsigma$ and $\kappa \lambda \eta \rho \circ \varsigma$ and used for owner of the ship who acted as his own skipper or captain. The papyri examples (Moulton and Milligan's Vocabulary) all have the meaning "captain" rather than "owner."

Acts 27:12
Because the haven was not commodious to winter in (avevӨعтov $\tau 0 v \lambda \mu \varepsilon v o$, $v \pi \alpha \rho \chi о v \tau о \varsigma \pi \rho о \varsigma \pi \alpha \rho \alpha \chi \varepsilon \iota \mu \alpha \sigma \iota \alpha v)$. Genitive absolute again present tense of $v \pi \alpha \rho \chi \omega$ : "The harbour being unfit ( $\alpha v \varepsilon \cup \theta \varepsilon \tau o v$, this compound not yet found elsewhere, simplex in Lu 9:62; 14:35; Heb 6:7 ) for wintering" ( $\pi \alpha \rho а \chi \varepsilon \mu \alpha \sigma \iota \alpha, ~ o n l y ~ h e r e ~ i n ~ N . T ., ~ b u t ~ i n ~ P o l y b i u s ~ a n d ~$ Diodorus, in an inscription A.D. 48, from $\pi \alpha \rho \alpha \chi \varepsilon \iota \mu \alpha \zeta \omega)$.

The more part advised (o $\pi \lambda \varepsilon \iota o v \varepsilon \varsigma ~ \varepsilon \theta \varepsilon v \tau o \beta o v \lambda \eta \nu$ ). Second aorist middle indicative of $\tau \iota \theta \eta \mu$, ancient idiom with $\beta o v \lambda \eta \nu$, to take counsel, give counsel. Lysias held a council of the officers of the ship on the issue raised by Paul.

If by any means they could reach Phoenix and winter there ( $\varepsilon \pi \omega \varsigma \delta u v a \iota v \tau$
 here with $\varepsilon$ is a condition of the fourth class with the notion of purpose implied and indirect discourse (Robertson, Grammar, p. 1021). "We vote for going on the chance that we may be able" (Page). Phoenix is the town of palms (Joh 12:13 ), the modern Lutro, the only town in Crete on the southern coast with a harbour fit for wintering, though Wordsworth and Page argue for Phineka which suits Luke's description better. The verb $\pi \alpha \rho \alpha \chi \varepsilon \iota \mu \alpha \zeta \omega$, to winter, is from $\pi \alpha \rho \alpha$ and $\chi \varepsilon \mu \omega \nu$ (see also 28:11). Used in several Koine writers.

Looking northeast and southeast ( $\beta \lambda \varepsilon \pi о \nu \tau \alpha \kappa \alpha \tau \alpha \lambda_{1} \beta \alpha \kappa \alpha \kappa \alpha \tau \alpha \chi \omega \rho \circ \nu$ ). There are two ways of interpreting this language. $\Lambda \imath \pi \varsigma$ means the southwest wind and $\chi \omega \rho \circ \varsigma$ the northwest wind. But what is the effect of ката with these words? Does it mean "facing" the
wind? If so, we must read "looking southwest and northwest." But kata can mean down the line of the wind (the way the wind is blowing). If so, then it is proper to translate "looking northeast and southeast." This translation suits Lutro, the other suits Phoenike. Ramsay takes it to be Lutro, and suggests that sailors describe the harbour by the way it looks as they go into it (the subjectivity of the sailors) and that Luke so speaks and means Lutro which faces northeast and southeast. On the whole Lutro has the best of the argument.

Acts 27:13

 in N.T. "A south wind having blown gently," in marked contrast to the violent northwest wind that they had faced so long. They were so sure of the wisdom of their decision that they did not even draw up the small boat attached by a rope to the vessel's stern (verse 16). It was only some forty miles to Lutro.

Their purpose ( $\tau \eta \varsigma \pi \rho \circ \theta \varepsilon \sigma \varepsilon \omega \varsigma$, set before them, from $\pi \rho о \tau ө \eta \eta \mu$ ), genitive after кра $\tau \varepsilon \omega$ (кєкратŋкєva, perfect active infinitive in indirect discourse).

They weighed anchor ( $\alpha \rho \alpha v \tau \varepsilon \varsigma)$. First aorist active participle of $\alpha \rho \rho \omega$, old verb used in
 lifted the anchors." Page takes it simply as "moving."

Sailed along Crete ( $\pi \alpha \rho \varepsilon \lambda \varepsilon \gamma 0 v \tau$ о $\tau \eta \nu K \rho \eta \tau \eta v$ ). Imperfect middle. See verse 8, "were coasting along Crete."

Close in shore ( $\alpha \sigma \sigma o v$ ). Comparative adverb of $\alpha \gamma \kappa$, near, and so "nearer" to shore. Only here in N.T.

Acts 27:14
After no long time ( $\mu \varepsilon \tau^{\prime}$ ov $\pi \mathrm{o} \lambda \nu$ ). Litotes again.
Beat down from it ( $\varepsilon \beta \alpha \lambda \varepsilon v \kappa \alpha \tau^{\prime} \alpha u \tau \eta \varsigma$ ). Second aorist active indicative of $\beta \alpha \lambda \lambda \omega$, to throw. Here "dashed" (intransitive). Avtŋऽ is in the ablative, not genitive case, beat "down from it" (Crete), not "against it or on it." (Robertson, Grammar, p. 606). Avinc cannot refer to $\pi \lambda$ ooov (boat) which is neuter. So the ablative case with $\kappa \alpha \tau \alpha$ as in Mr 5:13, Homer also. The Cretan mountains are over 7,000 feet high.
 Evpaкv $\lambda \omega v$ ). $\operatorname{Tv} \varphi \omega v=Т \nu \varphi \omega \varsigma$ was used for the typhoon, a violent whirlwind ( $\tau v \rho \beta$ ) or squall. This word gives the character of the wind. The Evpaкu入 $\omega v$ (reading of Aleph A B against the Textus Receptus Evpoк $\lambda \nu \delta \omega v$ ) has not been found elsewhere. Blass calls it a hybrid word compounded of the Greek $\varepsilon v \rho o \varsigma$ (east wind) and the Latin $\alpha \theta v i \lambda o$ (northeast). It is made like $\varepsilon$ vopovotoc (southeast). The Vulgate has euroaquilo. It is thus the east north east wind. Page considers Euroclydon to be a corruption of Euraquilo. Here the name gives the direction of the wind.

Acts 27:15

When the ship was caught ( $\sigma v v \alpha \rho \pi \alpha \sigma \theta \varepsilon v \tau o s ~ t o v ~ \pi \lambda o \iota o v) . ~ G e n i t i v e ~ a b s o l u t e ~ a g a i n ~$ with first aorist passive of $\sigma u v \alpha \rho \pi \alpha \zeta \omega$, old word, in N.T. only Lu 8:29; Ac 6:12; 19:29, and here. Graphic picture as if the ship was seized by a great monster.

Face the wind ( $\alpha \nu \tau о \varphi \theta \alpha \lambda \mu \varepsilon \iota \nu \tau \omega \alpha \nu \varepsilon \mu \omega)$. Dative case with the vivid infinitive of $\alpha \nu \tau о \varphi \theta \alpha \lambda \mu \varepsilon \omega$ from $\alpha \nu \tau о \varphi \theta \alpha \lambda \mu \circ \varsigma$, looking in the eye, or eye to eye ( $\alpha \nu \tau$, facing and о $\sigma \theta \alpha \lambda \mu \circ \varsigma$, eye). Eyes were painted on the prows of vessels. The ship could not face the wind enough to get to Phoenix. Modern sailors talk of sailing into the eye of the wind. We were not able to look the wind in the eye. Koine verb used by Polybius. Some MSS. have it in Ac 6:11, but only here in N.T. In Wisdom of Sol. 12:14 it is used of a prince who cannot look God in the face. Clement of Rome 34 uses it of an idle workman not able to look his employer in the face (Milligan and Moulton's Vocabulary).

We gave way ( $\varepsilon \pi \iota \delta o v \tau \varepsilon \varsigma)$. Second aorist active participle of $\varepsilon \pi \iota \delta \iota \delta \omega \mu$, giving way to the wind.

Were driven ( $\varepsilon \varphi \varepsilon \rho \circ \mu \varepsilon \theta \alpha$ ). Imperfect passive of $\varphi \varepsilon \rho \omega$, "we were being borne along." We "scudded before the gale" (Page). "The suddenness of the hurricane gave no time to furl the great mainsail" (Furneaux).

Acts 27:16
Running under the lee of (v $\left.\frac{\pi}{} \delta \rho \alpha \mu о \nu \tau \varepsilon \varsigma\right)$. Second aorist active participle of $v \pi о \tau \rho \varepsilon \chi \omega$. Same use of $v \pi$ o as in $v \pi \varepsilon \pi \lambda \varepsilon v \sigma \alpha \mu \varepsilon v$ (verses 4,8 ) for "under the lee", under the protection of. N $\eta \sigma \circ \circ v$ is diminutive of $v \eta \sigma o \varsigma$, a small island. The MSS. vary between Cauda (B) and Clauda (Aleph).

To secure the boat ( $\pi \varepsilon \rho \iota \kappa \rho \alpha \tau \varepsilon \iota \varsigma \varepsilon v \varepsilon \sigma \theta \alpha \tau \eta \varsigma \sigma \kappa \alpha \varphi \eta \varsigma)$ ). "To become masters ( $\pi \varepsilon \rho \iota \kappa \rho \alpha \tau \varepsilon \iota \varsigma$ from $\pi \varepsilon \rho$ and кратоц, power over, found in Susannah and ecclesiastical writers, and here only in N.T.) of the boat ("dug out," like Indian boats, literally, from $\sigma \kappa \alpha \pi \tau \omega$, to dig, old word, here only in N.T. and verses 30,32 ). The smooth water behind the little island enabled them to do this.

When they had hoisted it up ( $\eta \vee$ apavtec). "Which (the little boat) having hoisted up (apavteऽ, verse 13)." Even so it was "with difficulty" ( $\mu$ о $\lambda \iota \varsigma$ ). Perhaps the little boat was waterlogged.

Used helps ( $\beta$ оך $\eta \varepsilon ⿺ \alpha \iota \varsigma ~ \varepsilon \chi \rho \omega v \tau 0$ ). Imperfect middle of $\chi \rho \alpha o \mu \alpha$ with instrumental case. The "helps" were ropes or chains, no doubt.

Under-girding the ship ( $ข \pi о \zeta \omega v v u v \tau \varepsilon \varsigma ~ \tau о ~ \pi \lambda o o o v)$. Present active participle of $v \pi \circ \zeta \omega v v \nu \mu$. Old verb, here only in N.T. Probably cables ( $v \pi \sigma \zeta \omega \mu \alpha \tau \alpha$ ) or ropes were used under the hull of the ship laterally or even longitudinally, tightly secured on deck. This "frapping" was more necessary for ancient vessels because of the heavy mast. The little island made it possible to do this also.

Lest we be cast upon the Syrtis ( $\mu \eta \varepsilon \iota \varsigma \tau \eta \nu \Sigma u \rho \tau \iota v \varepsilon \kappa \pi \varepsilon \sigma \omega \sigma \iota v$ ). Final clause after verb of fearing ( $\varphi \circ \beta \mathrm{ou} \mu \varepsilon v \mathrm{o}$ ) with $\mu \eta$ and the second aorist active subjunctive of $\varepsilon \kappa \pi \iota \pi \tau \omega$, old
verb to fall out or off, to be cast away. So here and verses 26,29, a classical use of the verb for a ship driven out of its course on to shoals or rocks (Page who cites Xenophon, Anab. VII. 5, 12). The Syrtis was the name for two quicksands between Carthage and Cyrenaica, this clearly being the Syrtis Major most dangerous because of the sandbanks ( $\sigma v \rho \tau \iota \varsigma$, from $\sigma v \rho \omega)$. The wind would drive the ship right into this peril if something were not done.

They lowered the gear ( $\chi \alpha \lambda \alpha \sigma \alpha \nu \tau \varepsilon \varsigma \tau о \sigma \kappa \varepsilon v o \varsigma)$. First aorist active participle of $\chi \alpha \lambda \alpha \omega$ (cf. Lu 5:4 for lowering the nets). $\Sigma \kappa \varepsilon v o \varsigma$ means vessel or gear. They slackened or reduced sail, especially the mainsail, but leaving enough to keep the ship's head as close to the wind as was practicable.

So were driven ( $o v \tau \omega \varsigma \varepsilon \varphi \varepsilon \rho \circ v \tau 0$ ). Imperfect passive indicative again as in verse 15 with the addition of ov $\omega \varsigma$ (thus). The ship was now fixed as near to the wind (E N E) as possible (seven points). That would enable the ship to go actually W by N and so avoid the quicksands. J. Smith has shown that, a day being lost around Cauda, the ship going 36 miles in 24 hours in 13 days would make 468 miles. The Island of Malta (Melita) is precisely in that direction ( W by N ) from Cauda and is 480 miles. Page sees a difficulty about this explanation of the steady drift of the ship in the word $\delta \operatorname{\delta } \alpha \varphi \varepsilon \rho \circ \mu \varepsilon v o v$ in verse 27 , but that was at the end of the drifting and the varied winds could have come then and not before. The whole narrative as explained carefully in Smith's Voyage and Shipwreck of St. Paul is a masterpiece of precise and accurate scholarship. A resume of his results appears in my Luke the Historian in the Light of Research.

Acts 27:18
As we laboured exceedingly with the storm ( $\sigma \varphi \circ \delta \rho \omega \varsigma \chi \varepsilon \iota \mu \alpha \zeta \rho \varepsilon \nu \omega \nu \eta \mu \omega \nu$ ). Genitive absolute with present passive participle of $\chi \varepsilon \iota \mu \alpha \zeta \omega$, old verb to afflict with a tempest ( $\chi \varepsilon \mu \alpha$, stormy weather), to toss upon the waves, here alone in N.T.

They began to throw overboard ( $\varepsilon \kappa \beta \alpha \lambda \eta \nu \varepsilon \pi о \iota о \nu \nu \tau 0)$. Literally, "They began to make (inchoative imperfect middle of $\pi$ oı $\varepsilon \omega$ ) a casting out" ( $\varepsilon \kappa \beta \circ \lambda \eta \nu$ from $\varepsilon \kappa \beta \alpha \lambda \lambda \omega$, to cast out, old word, only here in N.T.). Cf. Latin jacturam facere. This to lighten the ship by throwing overboard the cargo. The grain in the ship would shift and make it list and so added to the danger.

They cast out ( $\varepsilon \rho \iota \psi \alpha \nu)$. Third person plural aorist active of $\rho \iota \pi \tau \omega$, not $\varepsilon \rho \iota \psi \alpha \mu \varepsilon \nu$ as Textus Receptus.

With their own hands ( $\alpha \cup \tau о \chi \varepsilon \iota \rho \varepsilon \varsigma)$. Old word ( $\alpha \cup \tau \circ \sigma, \chi \varepsilon \rho)$ but here alone in N.T. Vivid and graphic touch by Luke who, of course, watched every movement day by day.

The tackling ( $\tau \eta \nu \sigma \kappa \varepsilon \cup \eta \nu$ ). The furniture of the ship that could be spared. It was becoming desperate.

Acts 27:20
When neither sun nor stars shone upon us ( $\mu \eta \tau \varepsilon \eta \lambda \iota o v \mu \eta \tau \varepsilon \alpha \sigma \tau \rho \omega \nu \varepsilon \pi \iota \varphi \alpha \iota v o v \tau \omega \nu)$. Genitive absolute again.

For many days ( $\varepsilon \pi \pi \lambda \varepsilon \iota o v a \varsigma ~ \eta \mu \varepsilon \rho a \varsigma)$. For more days than a few.
No small tempest ( $\chi \varepsilon \iota \mu$ огоऽ оик о $\lambda \iota \gamma \circ v$ ). Litotes again.
All hope that we should be saved was now taken away ( $\lambda \circ \iota \pi \sigma \nu \pi \varepsilon \rho ı \eta \rho \varepsilon \iota \tau о \varepsilon \lambda \pi \iota \varsigma \pi \alpha \sigma \alpha$ tov $\sigma \omega \zeta \varepsilon \sigma \theta a \eta \mu \alpha \varsigma)$. "For the rest (or future) there began to be taken from around us ( $\pi \varepsilon \rho ı \eta \iota \varepsilon \iota \tau$ inchoative imperfect and see use of the verb in 2Co 13:16 of the veil) all hope of the being saved so far as we were concerned." Despair was beginning to settle like a fog on all their hopes. Had Paul lost hope?

Acts 27:21
When they had been long without food ( $\pi \sigma \lambda \lambda \eta \varsigma \tau \varepsilon \alpha \sigma \iota \tau \iota \varsigma \nu \pi \alpha \rho \chi о v \sigma \eta \varsigma)$. Genitive absolute, the old word aбıtıa from $\alpha \sigma \iota \tau \circ \varsigma$ (verse 33) a privative and $\sigma \iota \tau \circ$, food, here alone in N.T. Literally, "There being much abstinence from food." They had plenty of grain on board, but no appetite to eat (sea-sickness) and no fires to cook it (Page). "Little heart being left for food" (Randall). Galen and other medical writers use aбıтıa and aoıtoc for want of appetite.

Stood forth ( $\sigma \tau \alpha \theta \varepsilon ı \varsigma)$. As in $1: 15 ; 2: 14 ; 17: 22$. Pictorial word (Page) that sets forth the vividness and solemnity of the scene (Knowling).

Ye should have hearkened unto me ( $\varepsilon \delta \varepsilon \mu \varepsilon \nu \pi \varepsilon \iota \theta \alpha \rho \chi \eta \sigma \alpha \nu \tau \alpha \varsigma \mu 0$ ). Literally, "It was necessary for you hearkening unto me not to set sail ( $\mu \eta \alpha \nu \alpha \gamma \varepsilon \sigma \theta \alpha$ )." It was not the "I told you so" of a small nature, "but a reference to the wisdom of his former counsel in order to induce acceptance of his present advice" (Furneaux). The first aorist active participle is in the accusative of general reference with the present infinitive $\alpha v \alpha \gamma \varepsilon \sigma \theta \alpha$.

And have gotten this injury and loss ( $\kappa \varepsilon \rho \delta \eta \sigma \alpha \tau \varepsilon \tau \eta \nu v \beta \rho \iota \nu \tau \alpha v \tau \eta \nu \kappa \alpha \tau \eta \nu \zeta \eta \mu \iota \alpha \nu)$. This Ionic form $\kappa \varepsilon \rho \delta \eta \sigma \alpha$ (from $\kappa \varepsilon \rho \delta \alpha \omega$ ) rather than $\kappa \varepsilon \rho \delta \eta \nu \alpha$ or $\kappa \varepsilon \rho \delta \alpha \nu \alpha$ is common in late Greek (Robertson, Grammar, p. 349). The Revised Version thus carries over the negative $\mu \eta$ to this first aorist active infinitive $\kappa \varepsilon \rho \delta \eta \sigma \alpha$ from $\kappa \varepsilon \rho \delta \alpha \omega$ (cf. on Mt 16:26 ). But Page follows Thayer in urging that this is not exact, that Paul means that by taking his advice they ought to have escaped this injury and loss. "A person is said in Greek 'to gain a loss' when, being in danger of incurring it, he by his conduct saves himself from doing so." This is probably Paul's idea here.

Acts 27:22
And now ( $\kappa \alpha \tau \alpha v v v$ ). Accusative plural neuter article of general reference in contrast with $\mu \varepsilon v$ in verse 21 . Paul shows modesty (Bengel) in the mild contrast.

No loss of life $(\alpha \pi \sigma \beta 0 \lambda \eta \psi v \chi \eta \varsigma o v \delta \varepsilon \mu i \alpha)$. Old word from $\alpha \pi \sigma \beta \alpha \lambda \lambda \omega$, to throw away, only twice in N.T. Ro 11:15 (rejection) and here. He had foretold such loss of life as likely (verse 10), but he now gives his reason for his changed view.

Acts 27:23
For there stood by me ( $\pi \alpha \rho \varepsilon \sigma \tau \eta \gamma \alpha \rho \mu o$ ). Second aorist active (intransitive) indicative of $\pi \alpha \rho ı \sigma \tau \eta \mu$ with the locative case (beside me). The very form used by Paul of his trial ( 2 Ti

4:17 ) when "the Lord stood by me" (о $\delta \varepsilon \kappa v \rho ı \varsigma ~ \mu о ~ \pi \alpha \rho \varepsilon \sigma \tau \eta) ~ w h e n ~ o t h e r s ~ d e s e r t e d ~ h i m . ~$ This angel of the God whom Paul serves (in distinction from the heathen gods) is the reason for Paul's present confidence.

Acts 27:24
Thou must stand before Caesar (Kaı $\sigma \alpha \rho \sigma \varepsilon \delta \varepsilon \pi \alpha \rho \alpha \sigma \tau \eta v \alpha$ ). Note the same $\delta \varepsilon$ (must) as in 23:11 when Jesus appeared to Paul in Jerusalem and the same verb $\pi \alpha \rho \alpha \sigma \tau \eta v \alpha$ (second aorist active infinitive) used in verse 23.

Hath granted thee ( $\kappa \varepsilon \chi \alpha \rho \iota \sigma \tau \alpha \sigma о)$. Perfect middle indicative of $\chi \alpha \rho \iota \zeta о \mu \alpha$ and that from $\chi \alpha \rho ı \varsigma$, a gift or grace. The lives of those that sailed with Paul God had spared as a gift ( $\chi \alpha \rho ı \varsigma)$ to Paul.

Acts 27:25
Wherefore be of good cheer ( $\delta \iota \varepsilon v \theta v \mu \varepsilon ı \tau \varepsilon$ ). God had spoken. That was enough. This old verb from $\varepsilon v \theta v \mu \circ \varsigma$ in the N.T. only here, verse 25 ; Jas 5:13. See the adjective 27:36.

For I believe God ( $\pi \iota \sigma \tau \varepsilon v \omega \gamma \alpha \rho \tau \omega \theta \varepsilon \omega$ ). This is Paul's reason for his own good cheer and for his exhortation to confidence in spite of circumstances so untoward. Paul had doubtless prayed for his own life and for the lives of all. He was sure that he was to bear his witness in Rome.

Acts 27:26
We must be cast ( $\delta \varepsilon \eta \mu \alpha \varsigma \varepsilon \kappa \pi \varepsilon \sigma \varepsilon \iota v$ ). It is necessary for us to fall out ( $\varepsilon \kappa \pi \varepsilon \sigma \varepsilon \iota v$, second aorist active infinitive of $\varepsilon \kappa \pi \iota \pi \tau \omega)$. It was not revealed to Paul what island it would be.

Acts 27:27
As we were driven to and fro ( $\delta \operatorname{l} \alpha \varphi \varepsilon \rho \circ \mu \varepsilon \nu \omega \nu \eta \mu \omega \nu$ ). Genitive absolute with present passive participle of $\delta \iota \alpha \varphi \varepsilon \omega$, old verb to bear different ways ( $\delta \iota \alpha=\delta v o$, two), this way and that. Continued to be tossed to and fro in the rough seas. It would seem so to those on board. It does not necessarily mean that the wind had changed. The fourteenth night is reckoned from the time they left Fair Havens.

In the sea of Adria ( $\varepsilon \nu \tau \omega \mathrm{H} \alpha \delta \rho \iota \alpha$ ). Not the Adriatic Sea as we now call the sea between Italy and the mainland of Illyricum, but all the lower Mediterranean between Italy and Greece. Luke's usage is like that of Strabo.

Surmised (vicvoovv). Imperfect active indicative of v suspect.

That they were drawing near to some country ( $\pi \rho \circ \sigma \alpha \gamma \varepsilon \iota v \tau \iota \alpha \alpha \alpha \cup \tau o \iota ~ \chi \omega \rho \alpha v$ ). Infinitive with accusative of general reference in indirect assertion. Пробaү $\omega$ is here used intransitively and Luke writes from the sailor's standpoint that a certain land was drawing near to them (avtoıs, dative). The sailors heard the sound of breakers and grew uneasy.

Acts 27:28
They sounded ( $\beta$ o $\left.\lambda_{ı} \sigma \alpha v \tau \varepsilon \varsigma\right)$. First aorist active participle of $\beta_{\circ} \lambda_{\iota} \zeta \omega$ rare verb only here and in Eustathius who says it was familiar in ancient Greek. Apparently from $\beta$ o $\lambda \iota \varsigma$, a missile
or dart, and so to throw down the lead into the sea, to heave the lead, to take soundings. The inscriptions give $\beta$ о $\lambda \mu$ о , for "leaden."

Twenty fathoms (op $\quad$ viaৎ $\varepsilon ו \kappa о \sigma$ ). This old word, from o $\rho \varepsilon \gamma \omega$, to stretch, means the distance from one outstretched middle finger tip to the other likewise out-stretched.

After a little space ( $\beta \rho a \chi v \delta \delta \alpha \sigma \tau \eta \sigma \alpha v \tau \varepsilon \varsigma)$. Literally, "standing apart a little" (second aorist active participle of $\delta u \sigma \tau \eta \mu$ ), that is, the ship going a short distance further on. A ship today approaching St. Paul's Bay by the rocky point of Koura would pass first twenty, then fifteen fathoms (Furneaux).

Acts 27:29
Lest haply we should be cast ashore on rocky ground ( $\mu \eta$ пои ката трахвıৎ тотоия $\varepsilon \kappa \pi \varepsilon \sigma \omega \mu \varepsilon v$ ). The usual construction after a verb of fearing ( $\mu \eta$ and the aorist subjunctive $\varepsilon \kappa \pi \varepsilon \sigma \omega \mu \varepsilon v$ ). Literally, "Lest somewhere ( $\pi \circ v$ ) we should fall out down against ( $\kappa \alpha \tau \alpha$ ) rocky places." The change in the soundings made it a very real fear. Tрaх\&ı¢ (rough) is old adjective, but in the N.T. only here and Lu 3:5 (from Isa 40:4).

Four anchors ( $\alpha \gamma \kappa \cup \rho \alpha \varsigma \tau \varepsilon \sigma \sigma \alpha \rho \alpha \varsigma)$. Old word from $\alpha \gamma \kappa \eta$. In N.T. only in this chapter, with $\rho \iota \pi \tau \omega$ here, with $\varepsilon \kappa \tau \varepsilon เ v \omega$ in verse 30 , with $\pi \varepsilon \rho \iota a \rho \varepsilon \omega \omega$ in verse 40; and Heb 6:19 (figuratively of hope).

From the stern ( $\varepsilon \kappa \pi \rho v \mu \nu \eta \varsigma)$. Old word, but in N.T. only in Mr 4:38; here and 41 in contrast with $\pi \rho \omega \iota \rho \alpha$ (prow). The usual practice was and is to anchor by the bows. "With a view to running the ship ashore anchoring from the stern would, it is said, be best" (Page). Nelson is quoted as saying that he had been reading Ac 27 the morning of the Battle of Copenhagen (April, 1801) where he anchored his ships from the stern.

Wished for the day ( $\eta$ טरovto). Imperfect middle, kept on praying for "day to come" ( $\eta \mu \varepsilon \rho \alpha \nu \gamma \varepsilon v \varepsilon \sigma \theta \alpha$ ) before the anchors broke under the strain of the storm or began to drag. If the ship had been anchored from the prow, it would have swung round and snapped the anchors or the stern would have faced the beach.

Acts 27:30
The sailors ( $\tau \omega v v a v \tau \omega v$ ). Old word from vavc (ship), in N.T. only here, verse 30; Re 18:17.

Were seeking ( $\eta \uparrow \tau 0 \cup v \tau \omega v$ ). Genitive absolute again with present active participle of $\zeta \eta \tau \varepsilon \omega$ to seek.

Had lowered ( $\chi \alpha \lambda \alpha \sigma \alpha \nu \tau \omega v$ ). Aorist active participle of $\chi \alpha \lambda \alpha \zeta \omega$.
Under colour ( $\pi \rho \circ \varphi a \sigma \varepsilon$ ). Possibly the same word as "prophecy" (from $\pi \rho o-\varphi \eta \mu$, to speak forth), but here pretence, pretext, although it may come from $\pi \rho \circ \varphi a \iota v \omega$, to show forth. The use here is an old one and appears also in $\mathrm{Mr} 12: 40$; Lu 20:47; 1Th 2:5; Php 1:18

As though ( $\omega \varsigma$ ). The alleged reason, a common Greek idiom with $\omega \varsigma$ and the participle (Robertson, Grammar, p. 966). Here with $\mu \varepsilon \lambda \lambda$ ov $\tau \omega v$.

From the foreship $(\varepsilon \kappa \pi \rho \omega \iota \rho\rceil)$. Old word for prow of the ship. In the N.T. only here and verse 41 . Note here $\varepsilon \kappa \tau \varepsilon \iota v \varepsilon \iota v$ (lay out, stretch out) rather than $\rho \iota \psi \alpha \nu \tau \varepsilon \varsigma$ (casting) in verse 29 , for they pretended to need the small boat to stretch out or lay out the anchors in front.

Acts 27:31
Except these abide in the ship (Eav $\mu \eta$ ov $\mu \circ \mu \varepsilon \iota \omega \sigma \iota v \varepsilon \nu \omega \pi \lambda o t \omega$ ). Condition of the third class (undetermined, but with hope, etc.). Paul has no hesitancy in saying this in spite of his strong language in verse 24 about God's promise. He has no notion of lying supinely down and leaving God to do it all. Without the sailors the ship could not be properly beached.

Acts 27:32
The ropes ( $\tau \alpha \sigma \chi \circ \circ v \iota \alpha$ ). Diminutive of $\sigma \chi \circ \iota \nu \circ \varsigma$, old word, but in N.T. only here and Joh 2:15. Paul is now saviour of the ship and the soldiers quickly cut loose the skiff and "let her fall off" ( $\varepsilon ı \alpha \sigma a \nu \alpha v \tau \eta \nu \varepsilon \kappa \pi \varepsilon \sigma \varepsilon \iota \nu)$ rather than be the means of the escape of the sailors who were needed. This dastardly scheme of the sailors would have brought frightful loss of life.

Acts 27:33
While the day was coming on ( $\alpha \chi \rho$ ov $\eta \mu \varepsilon \rho \alpha \eta \mu \varepsilon \lambda \lambda \varepsilon v \gamma \iota v \varepsilon \sigma \theta \alpha$ ). More likely here $\alpha \chi \rho$ ov (for $\alpha \not \rho \rho$ 元 day was about to come on ( $\gamma \iota v \varepsilon \sigma \theta a$, present middle infinitive, linear action)." That is Paul kept on exhorting or beseeching ( $\pi \alpha \rho \varepsilon \kappa \alpha \lambda \varepsilon$, imperfect active) them until dawn began to come on (cf. verse 39 when day came). In Heb 3:13 axp ov with the present indicative has to mean "so long as" or while, but that is not true here (Robertson, Grammar, p. 975). See on Ac 2:46 for the same phrase for partaking food ( $\mu \varepsilon \tau \alpha \lambda \alpha \mu \beta \alpha \nu \omega \tau \rho о \varphi \eta \varsigma$, genitive case) as also in 27:34. Paul wanted them to be ready for action when day really came. "Fourteenth day" repeated (verse 27), only here in the accusative of duration of time ( $\eta \mu \varepsilon \rho \alpha v$ ). It is not clear whether the "waiting" ( $\pi \rho \circ \sigma \delta о \kappa \omega \nu \tau \varepsilon \varsigma$, present active participle predicate nominative complementary participle after $\delta \iota \alpha \tau \varepsilon \lambda \varepsilon \iota \tau \varepsilon$, Robertson, Grammar, p. 1121) means fourteen days of continuous fasting or only fourteen successive nights of eager watching without food. Galen and Dionysius of Halicarnassus employ the very idiom used here by Luke ( $\alpha \sigma \iota \tau \circ \varsigma \delta ı \alpha \tau \lambda \varepsilon \omega$ ).

Having taken nothing ( $\mu \eta \theta \varepsilon \nu \pi \rho о \sigma \lambda \alpha \beta o \mu \varepsilon \nu o$ ). Second aorist middle participle of $\pi \rho o \sigma \lambda \alpha \mu \beta \alpha \nu \omega$ with the accusative $\mu \eta \theta \varepsilon v$ rather than the more usual $\mu \eta \delta \varepsilon \nu$. Probably Paul means that they had taken no regular meals, only bits of food now and then.

Acts 27:34
For this is for your safety ( $\tau 0 v \tau o \gamma \alpha \rho \pi \rho \circ \varsigma \tau \eta \varsigma v \mu \varepsilon \tau \varepsilon \rho \alpha \varsigma \sigma \omega \tau \eta \rho \iota \alpha \varsigma v \pi \alpha \rho \chi \varepsilon$ ). Note $\sigma \omega \tau \eta \rho \iota \alpha$ in sense of "safety," literal meaning, not spiritual salvation. This is the only instance in the N.T. of the use of $\pi \rho \circ \varsigma$ with the ablative meaning "from the side of" your safety, though a classic idiom (Robertson, Grammar, p. 623), an example of Luke's literary style.

Perish ( $\alpha \pi 0 \lambda \varepsilon \tau \tau \alpha$ ). Future middle (intransitive) of $\alpha \pi 0 \lambda \lambda \nu \mu(-v \omega)$, to destroy. So the oldest MSS. rather than $\pi \varepsilon \sigma \varepsilon \iota \tau \alpha$ from $\pi \iota \pi \tau \omega$, to fall. This proverbial expression occurs also in Lu 21:18 which see and in 1Sa 14:45; 2Sa 14:11; 1Ki 1:52 .

## Acts 27:35

Gave thanks to God ( $\varepsilon \cup \chi \propto \rho ı \sigma \tau \eta \sigma \varepsilon v \tau \omega \theta \varepsilon \omega$ ). First aorist active indicative of $\varepsilon v \chi \alpha \rho \iota \sigma \tau \varepsilon \omega$ from which our word "Eucharist" comes. It was saying grace like the head of a Hebrew family and the example of Paul would encourage the others to eat. Probably Paul, Luke, and Aristarchus had memories of the Lord's supper (Ac 2:42) while to others it was only an ordinary meal (Lu 24:30).

Acts 27:36
Then were they all of good cheer ( $\varepsilon \cup \theta v \mu \circ \delta \varepsilon \gamma \varepsilon v o \mu \varepsilon v o$ ). More exactly, "Then all becoming cheerful," because of Paul's words and conduct.

Took food ( $\pi \rho \circ \sigma \varepsilon \lambda \alpha \beta$ оvто т $\rho о \varphi \eta \varsigma$ ). Partitive genitive here (some food), not accusative as verse 33. Paul's courage was contagious.

Acts 27:37
Two hundred three-score and sixteen souls ( $\delta ı \alpha к о б \iota \alpha \varepsilon \beta \delta о \mu \eta \kappa о \nu \tau \alpha \varepsilon \xi)$. The Vatican Manuscript (B) has $\omega \varsigma$ in place of $\delta ı \alpha \kappa о \sigma \iota \alpha$ (two hundred) which Westcott and Hort put in the margin. But Alford is probably correct in suggesting that the scribe of B wrote $\omega \varsigma$ by repeating the omega in $\pi \lambda o \omega \omega$ with $\varsigma=200$ (Greek numeral). If the number 276 seems large, it is to be remembered that we do not know the size of the ship. Josephus (Life, 3) says that there were 600 on the ship that took him to Italy. The grain ships were of considerable size. The number included sailors, soldiers, and prisoners. A muster or roll call may have been made.

Acts 27:38
When they had eaten enough (корєб $\theta \varepsilon v \tau \varepsilon \varsigma \tau \rho о \varphi \eta \varsigma)$. First aorist passive of кор $\nu v \nu \mu$, old verb to satisfy, to satiate, with the genitive. Literally, "Having been satisfied with food." Here only in the N.T.

They lightened ( $\varepsilon \kappa о и \varphi \downharpoonright \zeta о v)$ ). Inchoative imperfect active, began to lighten. Old verb from коичос and originally to be light, but transitive to lighten, as here, from Hippocrates on.

Throwing out the wheat ( $\varepsilon \kappa \beta \alpha \lambda \lambda о \mu \varepsilon v o$ tov $\sigma \tau \tau \vee$ ). The cargo of wheat. The second $\varepsilon \kappa \beta \circ \lambda \eta$ (verse 18) or casting out and overboard which was only partially done at first.

Acts 27:39
They knew not (ovк $\varepsilon \pi \varepsilon \gamma เ v \omega \sigma \kappa \circ v$ ). Imperfect active of $\varepsilon \pi \iota \gamma \iota \nu \omega \sigma \kappa \omega$, to recognize. Probably conative, tried to recognize and could not (Conybeare and Howson). The island was well-known ( 28:1, $\varepsilon \pi \varepsilon \gamma v \omega \mu \varepsilon v$ ), but St. Paul's Bay where the wreck took place was some distance from the main harbour (Valetta) of Melita (Malta).

They perceived（ $\kappa \alpha \tau \varepsilon v o o u v$ ）．Imperfect active of $\kappa \alpha \tau \alpha v o \varepsilon \omega$ ，gradually perceived after some effort as in 11：16．This beach seemed their only hope．

They took counsel（ $\varepsilon$ ßou入عuovio）．Imperfect middle showing the process of deliberation and doubt．The bay＂having a beach＂（ $\varepsilon \chi \circ v \tau \alpha \alpha 兀 \downarrow \iota \lambda o v)$ is a phrase found in Xenophon＇s Anabasis VI．4， 4.

Whether they could drive（ $\varepsilon \delta \nu v a \iota v \tau 0 ~ \varepsilon \kappa \sigma \omega \sigma \alpha$ ）．This use of the optative with $\varepsilon$ in questions of this sort（implied indirect）is a neat Greek idiom（Robertson，Grammar，p． 1021）．B C Bohairic read $\varepsilon \kappa \sigma \omega \sigma \alpha$（first aorist active infinitive of $\varepsilon \kappa \sigma \omega \zeta \omega$ ），to save out（so Westcott and Hort），instead of $\varepsilon \xi \omega \sigma \alpha$（from $\varepsilon \xi \omega \theta \varepsilon \omega$ ，to push out，as Textus Receptus）．

Acts 27：40
Casting off（ $\pi \varepsilon \rho\llcorner\varepsilon \lambda 0 v \tau \varepsilon \varsigma)$ ．Second aorist active of $\pi \varepsilon \rho \iota a \iota \rho \varepsilon \omega$ ．Literally，＂Having taken away from around，＂that is all four anchors from around the stern．Cf．the other verbs with аүкирас in verse 29，30．

They left them in the sea（ $\varepsilon เ \omega v \varepsilon ા \varsigma \tau \eta \nu \theta a \lambda \alpha \sigma \sigma \alpha v$ ）．Imperfect active of $\varepsilon \alpha \omega$ ，either de－ scriptive or inchoative．They let the anchors go and the ropes fell down into the sea．

At the same time loosing the bands of the rudders（ $\alpha \mu \alpha \alpha v \varepsilon v \tau \varepsilon \varsigma \tau \alpha \varsigma ~ \zeta \varepsilon \cup \kappa \tau \eta \rho \iota \alpha \varsigma ~ \tau \omega v$ $\pi \eta \delta \alpha \lambda \iota \omega v)$ ．On the use of $\alpha \mu \alpha$ with the participle，old Greek idiom see Robertson，Grammar， p．1139．The second aorist active participle of avin $\mu$ ，to relax，loosen up．Old verb，in N．T． Ac 16：26；27：40；Eph 6：9；Heb 13：5．Thayer notes that そعuктпрıaৎ（bands）occurs nowhere else，but several papyri use it of yokes and waterwheels（Moulton and Milligan＇s Vocabulary）． The word for rudders（ $\pi \eta \delta \alpha \lambda_{\llcorner } \circ v$ ）is an old one（from $\pi \eta \delta o v$ ，the blade of an oar），but in the N．T．only here and Jas 3：4．Page notes that the ancient ships had a pair of paddle rudders like those of the early northmen，one on each quarter．The paddle rudders had been fastened while the ship was anchored．

Hoisting up the foresail to the wind（ $\varepsilon \pi \alpha \rho \alpha v \tau \varepsilon \varsigma ~ \tau о v ~ а \rho \tau \varepsilon \mu \omega v \alpha ~ \tau \eta ~ \pi v \varepsilon о и \sigma \eta) . ~ S u p p l y ~$ avpa（breeze）after $\pi v \varepsilon o v \sigma \eta$（blowing）．It is not clear what＂sail＂is meant by＂$\alpha \rho \tau \varepsilon \mu \omega v \alpha$ ．＂ No other example in Greek is known，though the scholiast to Juvenal XII． 68 explains $\varsigma \varepsilon \lambda o$ $\pi \rho o \rho \alpha \sigma v o$ by artemone solo．Hence＂foresail＂is probably correct．

They made for the beach（ $\kappa \alpha \tau \varepsilon \not \chi \circ \vee \varepsilon \iota \varsigma ~ \tau o v ~ a ı \gamma \iota \alpha \lambda о v$ ）．Imperfect active of $\kappa \alpha \tau \varepsilon \chi \omega$ ，to hold down，perhaps inchoative．＂They began to hold the ship steadily for the beach．＂

Acts 27：41
But lighting upon（ $\pi \varepsilon \rho \iota \pi \varepsilon \sigma o v \tau \varepsilon \varsigma \delta \varepsilon$ ）．Second aorist active participle of $\pi \varepsilon \rho \iota \pi \iota \pi \tau \omega$ ，old verb to fall into and so be encompassed by as in $\mathrm{Lu} 10: 30$ ；Jas 1：2．There is a current on one side of St．Paul＇s Bay between a little island（Salmonetta）and Malta which makes a sand bank between the two currents．Unexpectedly the ship stuck in this sandbar．

Where two seas met（ $\delta, \theta a \lambda \alpha \sigma \sigma o v$ ）．Used in Strabo and Dio Chrysostom for divided seas（ $\delta / \sigma, \theta \alpha \lambda \alpha \sigma \sigma \alpha)$ ．

They ran the vessel aground ( $\varepsilon \pi \varepsilon \kappa \varepsilon ı \lambda \alpha \nu \tau \eta v \nu \alpha v v$ ). First aorist active indicative of old verb $\varepsilon \pi\llcorner\kappa \varepsilon \lambda \lambda \omega$, to run a ship ashore. Only here in N.T. Here also we have the only N.T. use of vavc for ship (from vaw, ve $\omega$, to swim) so common in ancient Greek. Our word navy is from this word through the Latin.

Struck ( $\varepsilon \rho \varepsilon เ \sigma \alpha \sigma \alpha)$. First aorist active participle of $\varepsilon \rho \varepsilon \iota \delta \omega$, old verb to fix firmly. Only here in N.T.

Unmoveable ( $\alpha \sigma \alpha \lambda \varepsilon v \tau o \varsigma)$. From $\alpha$ privative and $\sigma \alpha \lambda \varepsilon v \omega$ to shake. Old word. In N.T. only here and Heb 12:28 .

Began to break up ( $\varepsilon \lambda v \varepsilon \tau 0$ ). Inchoative imperfect passive of the old verb $\lambda \nu \omega$, to loosen. The prow was stuck in the sand-bar, and the stern was breaking to pieces by the opposing waves lashing on both sides. It was a critical moment.

Acts 27:42
Counsel was to kill ( $\beta$ ou $\lambda \eta \varepsilon \gamma \varepsilon v \varepsilon \tau \frac{1 v a--\alpha \pi о \kappa \tau \varepsilon เ v \omega \sigma เ v) . ~ T h e ~ s o l d i e r s ~ d i d ~ n o t ~ r e l i s h ~ t h e ~}{\text { to }}$ idea of the escape of the prisoners. Hence there came this "counsel" ( $\beta$ ou $\lambda \eta$ ). Regular Greek idiom for purpose (iva and aorist active subjunctive of $\alpha \pi о \kappa \tau \varepsilon เ v \omega$, to kill). Soldiers were responsible for the lives of prisoners (Ac 12:19).

Swim out ( $\varepsilon к к о \lambda \nu \mu \beta \eta \sigma \alpha \varsigma) . ~ F i r s t ~ a o r i s t ~ a c t i v e ~ p a r t i c i p l e ~ o f ~ \varepsilon к к о \lambda \nu \mu \beta \alpha \omega$, old verb to swim out and so away.

Escape ( $\delta \iota \alpha \varphi \cup \gamma \eta$ ). Second aorist (effective) active subjunctive of $\delta \iota \alpha \varphi \varepsilon \cup \gamma \omega$, to make a clean ( $\delta \boldsymbol{\alpha} \boldsymbol{\alpha}$ ) escape.

Acts 27:43
To save Paul ( $\delta \iota \alpha \sigma \omega \sigma \alpha$ tov П $\alpha \nu \lambda o v$ ). Effective first aorist active infinitive of $\delta \Delta \alpha \sigma \omega \zeta \omega$. And no wonder for the centurion knew now how much they all owed to Paul.

Stayed them from their purpose ( $\varepsilon \kappa \omega \lambda \varepsilon v \sigma \varepsilon v$ avtous tov ßou入ף $\mu \alpha \tau \circ \varsigma$.) Ablative case of $\beta o u \lambda \eta \mu \alpha$ after $\varepsilon \kappa \omega \lambda \varepsilon v \sigma \varepsilon v$ (from $\kappa \omega \lambda \varepsilon \nu \omega$, to hinder, common verb).

And get first to land ( $\pi \rho \omega \tau 0 \cup \varsigma \varepsilon \varsigma \varsigma \tau \eta \nu \gamma \eta \nu \varepsilon \xi เ \varepsilon \nu \alpha$ ). This classic verb $\varepsilon \xi \varepsilon \mu$ occurs four times in Acts (13:42; 17:15; 20:7;27:32) and nowhere else in the N.T. It was a wise command.

Acts 27:44
Some on planks (ov̧ $\mu \varepsilon v \varepsilon \pi \sigma \alpha v ı \sigma ı v$ ). Common Greek idiom (ouc $\mu \varepsilon v$--ovc $\delta \varepsilon$ ) for
 breaking of the ship gave scraps of timber which some used.

They all escaped safe ( $\pi \alpha \nu \tau \alpha \varsigma \delta \iota \alpha \sigma \omega \theta \eta \nu \alpha$ ). First aorist passive infinitive of $\delta \iota \alpha \sigma \omega \zeta \omega$ (the very word used for the desire of the centurion about Paul) with accusative of general reference, the clause being subject of $\varepsilon$ रहveto. So Luke in this marvellous narrative, worthy of any historian in any age, shows how Paul's promise was fulfilled (verse 24). Paul the prisoner is the hero of the voyage and shipwreck, a wonderful example of God's providential care.

## Acts 28

Acts 28:1
Then we knew ( $\tau 0 \tau \varepsilon \varepsilon \pi \varepsilon \gamma \nu \omega \mu \varepsilon v$ ). Second aorist (ingressive) active indicative of $\varepsilon \pi \iota \gamma \iota \omega \omega \sigma \omega \omega$. Then we recognized. See 27:39.

Was called ( $\kappa \alpha \lambda \varepsilon \iota \tau \alpha)$. Present passive indicative retained in indirect discourse.
 of Westcott and Hort because of B. Page notes that the island was Malta as is shown from the name, the location, the presence of a ship from Alexandria bound for Rome wintering there (verse 11), and the mention of Syracuse as the next stop after leaving (verse 12).

Acts 28:2
The barbarians (o $\beta \alpha \rho \beta \alpha \rho o$ ). The Greeks called all men "barbarians" who did not speak Greek (Ro 1:14), not "barbarians" in our sense of rude and uncivilized, but simply "foreign folk." Diodorus Siculus (V. 12) says that it was a colony of the Phoenicians and so their language was Punic (Page). The word originally meant an uncouth repetition ( $\beta \alpha \rho \beta \alpha \rho$ ) not understood by others (1Co 14:11). In Col 3:11 Paul couples it with Scythian as certainly not Christian. These are (with verse 4 below) the only N.T. instances.

Showed us ( $\pi \alpha \rho \varepsilon \iota \chi \alpha v$ ). Imperfect active of $\pi \alpha \rho \varepsilon \chi \omega$ with - $\alpha v$ instead of $-o v$ as $\varepsilon \not \chi \alpha v$ in Mr 8:7 (Robertson, Grammar, p. 339). It was their habit on this occasion, Luke means, they kept on showing.

No common kindness (ov $\tau \eta \nu \tau v \chi \circ v \sigma \alpha \nu \varphi \iota \lambda \alpha v \theta \rho \omega \pi \iota \alpha \nu$ ). The old word $\varphi \iota \lambda \alpha v \theta \rho \omega \pi \iota \alpha$ ( $\varphi \lambda \lambda \varsigma \varsigma, \alpha \vee \theta \rho \omega \pi \sigma \varsigma)$, love of mankind, occurs in the N.T. only here and Tit 3:4 (adverb in 27:3). See on 19:11 for this use of ov $\tau \eta v \tau v \chi o v \sigma a \nu$, "not the kindness that happens every day." They were not "wreckers" to take advantage of the calamity.

They kindled a fire ( $\alpha \psi \alpha \nu \tau \varepsilon \varsigma \pi \nu \rho \alpha v$ ). The only N.T. example and verse 3 of the old word $\pi v \rho \alpha$ (from $\pi v \rho$, fire), a pile of burning fuel (sticks). First aorist active participle of $\alpha \pi \tau \omega$, to set fire to, to kindle. Cf. $\alpha v a \pi \tau \omega$ in Lu 12:49.

Received us all ( $\pi \rho о \sigma \varepsilon \lambda \alpha \beta o v \tau o ~ \pi \alpha v \tau \alpha \varsigma ~ \eta \mu \alpha \varsigma)$. Second aorist middle (indirect indicative of $\pi \rho o \sigma \lambda \alpha \mu \beta \alpha \nu \omega$. They took us all to themselves (cf. Ac 18:26) .

The present ( $\tau 0 \nu \varepsilon \varphi \varepsilon \sigma \tau \omega \tau \alpha$ ). Second perfect active participle (intransitive) of $\varepsilon \varphi \iota \sigma \tau \eta \mu$, "the rain that stood upon them" (the pouring rain). Only in Luke and Paul in N.T.

Acts 28:3
When Paul had gathered ( $\sigma v \sigma \tau \rho \varepsilon \psi \alpha v \tau о \varsigma \tau o v ~ \Pi \alpha v \lambda o v)$. Genitive absolute with first aorist active participle of $\sigma v \sigma \tau \rho \varepsilon \varphi \omega$, old verb to twist or turn together or roll into a bundle. In N.T. only here and Mt 17:22 .

A bundle of sticks ( $\varphi \rho \cup \gamma \alpha v \omega \nu \tau \pi \lambda \eta \theta \circ \varsigma)$. "Some multitude (or pile) of dry twigs" ( $\varphi \rho \cup \gamma \alpha \nu \omega v$ from $\varphi \rho v \gamma \omega$ or $\varphi \rho v \sigma \sigma \omega$, to dry. Only here in N.T.).

Laid $(\varepsilon \pi \wedge \theta \varepsilon v \tau o \varsigma)$. So genitive absolute again with second aorist active participle of $\varepsilon \pi \iota \tau \iota \eta \mu$, to place upon. Few things show Paul to better advantage than this incident.

By reason of the heat ( $\alpha \pi 0 \tau \eta \varsigma \theta \varepsilon \rho \mu \eta \varsigma$ ). Old word, only here in N.T. Ablative case with a $\pi$ (from the heat). The viper was in a state of torpor in the bundle of sticks. The heat wakened him.

A viper ( $\varepsilon \chi เ \delta v \alpha)$. The old word used by the Baptist of the Pharisees (Mt 3:7; Lu 3:7) and by Jesus also (Mt 12:34; 23:33 ). It is objected that there is little wood in the island today and no vipers, though Lewin as late as 1853 believes that he saw a viper near St. Paul's Bay. But the island now has 1,200 people to the square mile and snakes of any kind have a poor chance. The viper has also disappeared from Arran as the island became more frequented (Knowling). Ramsay thinks that the small constrictor (Coronella Austriaca) which still exists in the island may be the "viper," though it has no poison fangs, but clings and bites. The natives thought that it was a poisonous viper.

Fastened on his hand ( $\kappa \alpha \forall \eta \psi \varepsilon \tau \eta \varsigma \chi \varepsilon \iota \rho \circ \varsigma \alpha \nu \tau о v)$. First aorist active indicative of $\kappa \alpha \theta a \pi \tau \omega$, to fasten down on with the genitive case. Old verb, here only in N.T. Cf. Mr 16:18

## Acts 28:4

The beast ( $\tau$ o $\theta \eta \rho \circ o v$ ). Diminutive of $\theta \eta \rho$ and so little beast. See on Mr 1:13. Aristotle and the medical writers apply the word to venomous serpents, the viper in particular (Knowling), as Luke does here. Vincent calls attention to the curious history of our word "treacle" for molasses (Latin theriaca) from $\theta \eta \rho ⿺ \alpha \kappa \eta$, an antidote made from the flesh of vipers. Coverdale translates Jer 8:22 : "There is no more treacle in Gilead." Jeremy Taylor: "We kill the viper and make treacle of him."

Hanging from his hand ( $\kappa \rho \varepsilon \mu \alpha \mu \varepsilon v o v \varepsilon \kappa \tau \eta \varsigma \chi \varepsilon \iota \rho \circ \varsigma \alpha \cup \tau о v)$. Vivid picture of the snake dangling from Paul's hand. Present middle participle of $\kappa \rho \varepsilon \mu \alpha \mu \alpha$, late form for $\kappa \rho \varepsilon \mu \alpha \nu \nu \nu \mu$, to hang up, to suspend (cf. Ga 3:13).

No doubt ( $\pi \alpha v \tau \omega \varsigma)$. Literally, By all means, old adverb. Cf. 21:22; Lu 4:23; 1Co 9:22 . Only by Luke and Paul in the N.T. "They knew that he was a prisoner being taken to Rome on some grave charge, and inferred that the charge was murder" (Page).

Though he hath escaped ( $\delta \iota \alpha \sigma \omega \theta \varepsilon v \tau \alpha$ ). First aorist passive participle of $\delta \iota \alpha \sigma \omega \zeta \omega$ (same verb used in $24: 43,44 ; 28: 1$ ), so-called concessive use of the participle (Robertson, Grammar, p. 1129).

Yet Justice ( $\delta \iota \kappa \eta$ ). An abstraction personified like the Latin Justitia (Page). The natives speak of $\Delta \iota \kappa \eta$ as a goddess, but we know nothing of such actual worship in Malta, though the Greeks worshipped abstractions as in Athens.

Hath not suffered (ovk $\varepsilon เ \propto \sigma \varepsilon v$ ). Did not suffer. They look on Paul as a doomed man as good as dead. These people thought that calamity was proof of guilt, poor philosophy and worse theology.

Acts 28:5
Shook off ( $\alpha \pi о \tau \iota \nu \alpha \beta \varsigma)$. First aorist active participle of $\alpha \pi \sigma \tau \iota v \alpha \sigma \sigma \omega$, to shake off. Rare word (Euripides, Galen, LXX). In N.T. only here and Lu 9:5 .

Acts 28:6
But they expected (o $\delta \varepsilon \pi \rho \circ \sigma \varepsilon \delta o \kappa \omega v$ ). Imperfect active, were expecting, continued to expect.

That he would have swollen ( $\alpha v \tau o v \mu \varepsilon \lambda \lambda \varepsilon เ v \pi \mu \pi \rho \alpha \sigma \theta \alpha$ ). More exactly, "Expecting him to be about (or that he was about) to swell up." П $\mu \pi \rho \alpha \sigma \theta a$ is present middle infinitive from $\pi \mu \pi \rho \eta \mu$, to blow, to burn, to inflame, to cause to swell. $\Pi \rho \eta \theta \omega$, to swell, seems connected and both use the aorist $\varepsilon \pi \rho \eta \sigma \alpha$. Our word "inflammation" likewise means a burning and a swelling. This verb is a common medical term used as Luke has it. It occurs here only in N.T.

Or fallen down dead suddenly ( $\eta \kappa \alpha \tau \alpha \pi \iota \pi \tau \varepsilon \iota \nu \alpha \varphi v \omega \nu \varepsilon \kappa \rho \rho \nu)$. Rather, "or was about to fall down dead suddenly." The two common results of a bite by a viper or other poisonous snake, both medical terms used by Luke.

But when they were long in expectation ( $\varepsilon \pi \pi \sigma \lambda v \delta \varepsilon \alpha \nu \tau \omega v \pi \rho \circ \sigma \delta \sigma \kappa \omega v \tau \omega v$ ). Genitive absolute. "But while they were expecting for much time."
 place coming to him" (present middle participle). M $\eta \delta \varepsilon v$ the usual negative of the participle and the accusative case the object of $\theta \varepsilon \omega \rho o v \nu \tau \omega \nu$ (genitive absolute).

Changed their minds ( $\mu \varepsilon \tau \alpha \beta \alpha \lambda о \mu \varepsilon v o$ ). Aorist middle (direct) participle of $\mu \varepsilon \tau \alpha \beta \alpha \lambda \lambda \omega$, old verb to turn about or around, turning themselves about, changing their minds. Plato uses this very verb in middle voice for changing the mind.

That he was a god ( $\alpha \cup \tau \circ v \varepsilon ı v a \theta \varepsilon o v$ ). Accusative and infinitive in indirect discourse. At Lystra Paul was first received as a god (Mercury) and then they stoned him to kill him (Ac 14:11,19). So fickle is popular favour.

Acts 28:7
To the chief man of the island ( $\tau \omega \pi \rho \omega \tau \omega \tau \eta \varsigma \nu \eta \sigma o v$ ). An official title correct in Malta (Ramsay, St. Paul, p. 343). An inscription in Malta calls Prudens "Primate of the Maltese" ( $\pi \rho \omega \tau \sigma \varsigma M \varepsilon \lambda \iota \tau \iota \iota \nu)$. Here it is plainly a title and not the common use seen in 13:50; 25:2; 28:17

Publius (По $\pi \lambda \iota \omega)$. This Greek name ( $\pi \rho \alpha \varepsilon v o \mu \varepsilon v$ ) can be derived either from По $\pi \iota \lambda เ v \varsigma$ or $\Pi \nu \beta \lambda ı \varsigma \varsigma(c f . \pi \nu \beta \lambda \iota \chi \nu \varsigma$ for $\pi о \pi v \lambda ı \chi \nu \varsigma$ from $\pi о \pi v \lambda \nu \varsigma)$. Entertained us ( $\varepsilon \xi \varepsilon v ı \sigma \varepsilon v \eta \mu \alpha \varsigma)$. Paul and his companions (Luke and Aristarchus). Was Julius included? On $\xi \varepsilon v \zeta \omega$ see Ac 10:23

Courteously ( $\varphi \iota \lambda \sigma \varphi \rho o \nu \omega \varsigma$ ). This old adverb from $\varphi \iota \lambda \rho \varphi \rho \omega \nu$ ( $\varphi \iota \lambda o \sigma, \varphi \rho \varepsilon \nu$, friendly mind) occurs here alone in the N.T. In a kindly or friendly manner, all the more so because of the original suspicion of Paul as a criminal.

Acts 28:8
Lay (катакєıбӨa). Common verb for the sick (Mr 1:30; Joh 5:6).
Sick ( $\sigma v v \varepsilon \chi o \mu \varepsilon v o v$ ). "Held together." Common verb again for the sick as in Lu 4:38 .
Of fever ( $\pi \cup \rho \varepsilon \tau о \iota)$ ). Instrumental case, and plural "fevers," medical term for intermittent attacks of fever (Demosthenes, Lucian, medical writers).

Dysentery ( $\delta v \sigma \varepsilon v \tau \varepsilon \rho \iota \omega$ ). Instrumental case also. Late form of the older $\delta v \sigma \varepsilon v \tau \varepsilon \rho ı a$ and only here in N.T. Our very word dysentery. Another medical term of which Luke uses so many. Hippocrates often mentions these two diseases together.

Laying his hands on him healed him ( $\varepsilon \pi \iota \theta \varepsilon ı \varsigma \tau \alpha \varsigma \chi \varepsilon \iota \rho a \varsigma \alpha v \tau \omega$ ıaбa兀o $\alpha v \tau o v)$. Either like the laying on of hands in Jas 5:14, the gift of healing (1Co 12:9f. ), or the tender interest of Jesus when he took hold of the hand of Peter's mother-in-law (Mr 1:31). Ramsay argues that $t \alpha o \mu \alpha$ is employed here of the miraculous healing by Paul while $\theta \varepsilon \rho \alpha \pi \varepsilon v \omega$ is used of the cures by Luke the physician (verse 9). This is a general distinction and it is probably observed here, but in Lu 6:18 (which see) both verbs are employed of the healings by Jesus.

Came and were healed ( $\pi \rho о \sigma \eta \rho \chi о \nu \tau о ~ \kappa \alpha \varepsilon \theta \varepsilon \rho a \pi \varepsilon v o v \tau o$ ). Imperfect middle and imperfect passive. A regular stream of patients came during these months. Luke had his share in the honours, "us" ( $\eta \mu \alpha \varsigma)$, and no doubt his share in the cures.

With many honours ( $\pi о \lambda \lambda \alpha \iota \varsigma ~ \tau ı \mu \propto \varsigma) . ~ I n s t r u m e n t a l ~ c a s e . ~ T h e ~ w o r d ~ w a s ~ o f t e n ~ a p p l i e d ~$ to payment for professional services as we today speak of an honorarium.

They put on board ( $\varepsilon \pi \varepsilon \theta \varepsilon v \tau \circ$ ). Second aorist middle indicative of $\varepsilon \pi \iota \tau \iota \theta \eta \mu$, to put on. The idea of "on board" is merely suggested by avaүouعvoıs (when we sailed) "the things for our needs" ( $\tau \alpha \pi \rho o \varsigma \tau \alpha \varsigma \chi \rho \varepsilon \iota \alpha \varsigma)$.

Acts 28:11
Which had wintered ( $\pi \alpha \rho \alpha \kappa \varepsilon \chi \varepsilon \mu \alpha \kappa о \tau)$. Perfect active participle of $\pi \alpha \rho \alpha \chi \varepsilon \varepsilon \mu \alpha \zeta \omega$, to pass the winter. Old verb, in N.T. only 27:12; 28:11; 1Co 16:6; Tit 3:12. The locative case agreeing with $\pi \lambda o t \omega$. Navigation in the Mediterranean usually opened up in February (always by March), spring beginning on Feb. 9 (Page).

Whose sign was the Twin Brothers ( $\pi \alpha \rho \alpha \sigma \eta \mu \omega \Delta$ เобкои $о \iota \varsigma)$. The word $\pi \alpha \rho \alpha \sigma \eta \mu \omega$ can be either a substantive (as Revised Version has it) or an adjective "marked by the sign," examples of both uses common in ancient Greek. $\Delta$ tooкoupoıs is in apposition with $\pi \alpha \rho \alpha \sigma \eta \mu \omega$. The word means the twin sons (коироऽ or короя) of Zeus ( $\Delta$ เоऽ, genitive of Zevc) and Leda, viz., Castor and Pollux. The Attic used the dual, $\tau \omega \Delta$ ıобко $\omega$. Castor and Pollux were the tutelary deities of sailors whose figures were painted one on each side of the prow of the ship. This sign was the name of the ship. So they start in another grain ship of Alexandria bound for Rome.

Acts 28:12
Touching ( $\kappa \alpha \tau \alpha \not \theta \varepsilon \nu \tau \varepsilon \varsigma) . ~ F i r s t ~ a o r i s t ~ p a s s i v e ~ p a r t i c i p l e ~ o f ~ \kappa \alpha \tau \alpha \gamma \omega$, to go down to land, just the opposite of $\alpha \nu \eta \chi \theta \eta \mu \varepsilon v$ in verse 11 from $\alpha \nu \alpha \gamma \omega$, to go up to sea.

At Syracuse ( $\varepsilon \iota \varsigma \Sigma v \rho \alpha \kappa о и \sigma a \varsigma)$. The chief city of Sicily and eighty miles from Malta. Perhaps open weather and a southerly wind helped them across. Here it was that Alcibiades wrecked the power and glory of Athens. Why the ship spent three days we do not know.

Acts 28:13
We made a circuit ( $\pi \varepsilon \rho \mid \varepsilon \lambda \theta$ ov $\tau \varepsilon \varsigma)$. Second aorist active of $\pi \varepsilon \rho I \varepsilon \rho \chi \circ \mu \alpha$, to go around, old verb, already in 19:13. See also Heb 11:37; 1Ti 5:13 . But Westcott and Hort read $\pi \varepsilon \rho \iota \varepsilon \lambda$ ovtec after Aleph B (from $\pi \varepsilon \rho \iota \alpha \iota \rho \varepsilon \omega$ ) as in 27:40, though here it could only mean casting loose, for which no other authority exists. At any rate the ship had to tack to reach Rhegium and was not able to make a straight course ( $\varepsilon v \theta v \delta \rho \circ \mu \varepsilon \omega, 16: 11$ ).

Rhegium ( $\mathrm{P} \eta \gamma \nvdash v$ ) is from $\rho \eta \gamma v v \mu$, to break off, the place where the land breaks off, the southern entrance to the straits of Messina.

A south wind sprang up ( $\varepsilon \pi \tau \gamma \varepsilon v o \mu \varepsilon v o v ~ v o \tau o v)$. Genitive absolute again, and for all the world like that fatal south wind in 27:13, but with no bad results this time, though the weather was plainly treacherous at this early season.

On the second day ( $\delta \varepsilon v \tau \varepsilon \rho a ı$ ). This is the classical use of the predicate adjective, "We second day men" as in Lu 24:22; Joh 11:39; Php 3:5 instead of the adverb (Robertson, Grammar, p. 657).

To Puteoli ( $\varepsilon ı \varsigma ~ П о т ь о \lambda о и \varsigma) . ~ I t ~ w a s ~ 182 ~ m i l e s ~ f r o m ~ R h e g i u m ~ a n d ~ w o u l d ~ r e q u i r e ~ 26 ~ h o u r s ~$ (Page). It was eight miles northwest from Neapolis (Naples) and the chief port of Rome, the regular harbour for the Alexandrian ships from Rome. Portions of the great mole are said to be still visible.

Acts 28:14
Where we found brethren (ov $\varepsilon v \rho o v \tau \varepsilon \varsigma ~ \alpha \delta \varepsilon \lambda \varphi o v \varsigma)$ ). Possibly from Alexandria, but, as Blass observes, it is no more strange to find "brethren" in Christ in Puteoli when Paul arrives than in Rome. There was a large Jewish quarter.

Seven days ( $\eta \mu \varepsilon \rho \alpha \varsigma \varepsilon \pi \tau \alpha$ ). Accusative of extent of time. Paul and his party remained so long at the urgent request of the brethren. He was still a prisoner, but clearly Julius was only too glad to show another courtesy to Paul to whom they all owed their lives. It was 130 miles by land from Puteoli to Rome over one of the great Roman roads.

And so we came to Rome ( $\kappa \alpha$ ov $\omega \varsigma \varepsilon ء \varsigma \tau \eta \nu$ Po $\mu \eta \nu \eta \lambda \theta \alpha \mu \varepsilon \nu$ ). So at last. Luke is exultant as Page observes: Paulus Romae captivus: triumphus unicus. It is the climax of the book of Acts (19:21; $23: 11$ ), but not the close of Paul's career. Page rightly remarks that a new paragraph should begin with verse 15 , for brethren came from Rome and this part of the journey is touched with the flavour of that incident. The great event is that Paul reached Rome, but not as he had once hoped (Ro 15:22-29).

Acts 28:15
When they heard of us ( $\alpha \kappa о \cup \sigma \alpha \nu \tau \varepsilon \varsigma \tau \alpha \pi \varepsilon \rho \eta \mu \omega v$ ). How "they heard the things concerning us" we do not know. Good news had its way of travel even before the days of tele-
graph, telephone, daily papers. Possibly Julius had to send on special couriers with news of his arrival after the shipwreck. Possibly some of the brethren in Puteoli at once (beginning of the week) sent on news to the brethren in Rome. The church in Rome had long ago received Paul's letter from Corinth at the hands of Phoebe.

To meet us ( $\varepsilon ı \varsigma ~ \alpha \pi \alpha v \tau \eta \sigma \iota v \eta \mu \nu \nu$ ). Idiomatic phrase, "for meeting with us" (associative
 Mt 25:6; 1 Ti 4:17. Use after $\varepsilon ા \varsigma ~ r a t h e r ~ t h a n ~ i n f i n i t i v e ~ l i k e ~ a ~ t r a n s l a t i o n ~ H e b r a i s m ~(R o b e r t s o n, ~$ Grammar, p. 91).

As far as the Market of Appius ( $\alpha \chi \rho$ A $\pi \pi \iota \circ$ Фороv). The Forum of Appius, 90 miles from Puteoli, 40 from Rome, on the great Appian Way. The Censor Appius Claudius had constructed this part of the road, B.C. 312. Paul probably struck the Appian Way at Capua. Portions of this great stone highway are still in use. If one wishes to tread where Paul trod, he can do it here. Appii Forum had a bad reputation, the haunt of thieves, thugs, and swindlers. What would this motley crowd think of Paul chained to a soldier?

Three Taverns (T $\rho \omega \omega v$ T $\alpha \beta \varepsilon \rho v \omega v$ ). Genitive case after $\alpha \chi \rho$ like A $\pi \pi \iota o v$ Фo $\rho o v$. About 30 miles from Rome. Tres Tabernae.

Whom (ouc). Two groups of the disciples came (one Gentile, one Jewish, Rackham thinks), one to Appii Forum, the other to Three Taverns. It was a joyous time and Julius would not interfere.

Took courage ( $\varepsilon \lambda \alpha \beta \varepsilon \theta \alpha \rho \sigma o \varsigma)$. The old substantive $\theta \alpha \rho \sigma o \varsigma$ is here alone in the N.T. Jesus himself had exhorted Paul to be of good courage ( $\theta \alpha \rho \sigma \varepsilon$ Ac 23:11) as he had done the disciples (Joh 16:33 ). Paul had passed through enough to cause depression, whether he was depressed or not, but he deeply appreciated this kindly sympathy.

Acts 28:16
Paul was suffered to abide by himself ( $\varepsilon \pi \varepsilon \tau \rho \alpha \pi \eta \tau \omega$ Пav $\lambda \omega \mu \varepsilon v \varepsilon เ v ~ \kappa \alpha \theta^{\prime}$ عavтov). Second aorist passive of $\varepsilon \pi \iota \tau \rho \varepsilon \pi \circ$, to permit or allow. Literally, "It was permitted to Paul to abide by himself." Some late documents (Textus Receptus) here add: "The centurion delivered the prisoners to the captain of the guard" (or the $\sigma \tau \rho \alpha \tau о \pi \varepsilon \delta \alpha \rho \chi$ ). This officer used to be considered Burrus who was Prefect of the Praetorian Guard A.D. 51-62. But it is by no means certain that Julius turned the prisoners over to this officer. It seems more likely that Julius would report to the captain of the Peregrini. If so, we may be sure that Julius would give a good report of Paul to this officer who would be kindly disposed and would allow Paul comparative freedom (living by himself, in his lodging, verse 23, his own hired house verse 30 , though still chained to a soldier).

With the soldier that guarded him ( $\sigma u v \tau \omega \varphi \cup \lambda \alpha \sigma \sigma o v \tau \alpha u \tau o v \sigma \tau \rho \alpha \tau \omega \tau \eta$ ). Probably a new soldier every day or night, but always with this soldier chained to his right hand day and night. Now that Paul is in Rome what can he do for Christ while he awaits the outcome of his own appeal to Nero?

## Acts 28:17

Those that were the chief of the Jews ( $\tau 0 v \varsigma ~ o v \tau \alpha \varsigma \tau \omega \nu$ Iov $\alpha \alpha \omega \nu \pi \rho \omega \tau o v \varsigma$ ). This use of $\pi \rho \omega \tau \sigma$ for the leading men of a city or among the Jews we have already had in 13:50; 25:2; Lu 19:47. Literally, "Those that were first among the Jews." The position of the participle ov $\alpha a \varsigma$ between the article and the adjective $\pi \rho \omega \tau$ ovs is regular (Robertson, Grammar, p. 777).

When they were come together ( $\sigma v v \varepsilon \lambda \theta o v \tau \omega v \alpha v \tau \omega v$ ). Genitive absolute again. Paul could not go to the synagogue, as his custom was, being a bound prisoner. So he invited the Jewish leaders to come to his lodging and hear his explanation of his presence in Rome as a prisoner with an appeal to Caesar. He is anxious that they may understand that this appeal was forced upon him by Festus following Felix and lot because he has come to make an attack on the Jewish people. He was sure that false reports had come to Rome. These non-Christian Jews accepted Paul's invitation.

Nothing against (ov $\varepsilon \varepsilon v \varepsilon v a v \tau \iota o v$ ). Adjective here as in 26:9, not preposition as in 7:10; 8:32. From $\varepsilon v$ and $\alpha v \tau \iota \varsigma(\alpha \nu \tau)$, face to face. Concessive participle $\pi o \iota \eta \sigma \alpha \varsigma$ as in verse 4 $(\delta ı \alpha \sigma \omega \theta \varepsilon v \tau \alpha)$ which see.

Yet was I delivered prisoner from Jerusalem into the hands of the Romans ( $\delta \varepsilon \sigma \mu \circ$ ऽ $\varepsilon \xi$ Iєробо $\lambda \nu \mu \omega \nu \pi \alpha \rho \varepsilon \delta о \theta \eta \nu \varepsilon \iota \varsigma \tau \alpha \varsigma \chi \varepsilon \iota \rho \alpha \varsigma \tau \omega \nu$ Ро $\mu \alpha \iota \omega \nu$ ). This condensed statement does not explain how he "was delivered," for in fact the Jews were trying to kill him when Lysias rescued him from the mob (22:27-36). The Jews were responsible for his being in the hands of the Romans, though they had hoped to kill him first.

Acts 28:18
When they had examined me ( $\alpha v \alpha \kappa \rho \imath v \alpha \tau \varepsilon \varsigma \mu \varepsilon$ ). First aorist active participle of $\alpha v \alpha \kappa \rho \imath \omega \omega$, the same verb used already in $24: 8 ; 25: 6,26$ of the judicial examinations by Felix and Festus.

Desired ( $\varepsilon \beta$ ov $10 v \tau 0$ ). Imperfect middle of attempted action or picture of their real attitude. This is a correct statement as the words of both Felix and Festus show.

Because there was ( $\delta \iota \alpha$ тo--v $\tau \alpha \rho \chi \varepsilon \iota v$ ). Accusative case with $\delta ı \alpha$ (causal use) with the articular infinitive, "Because of the being no cause of death in me" ( $\varepsilon \nu \varepsilon \mu \mathrm{o}$, in my case, aıtıa, usual word for crime or charge of crime).

Acts 28:19
When the Jews spake against it ( $\alpha v \tau \iota \lambda \varepsilon \gamma 0 \nu \tau \omega \nu \tau \omega \nu$ Iov $\alpha a \iota \omega \nu$ ). Genitive absolute again, $\alpha \nu \tau \iota \lambda \varepsilon \gamma \circ v \tau \omega \nu(\alpha v \tau \iota \lambda \varepsilon \gamma \omega)$ common verb for speaking against as in 13:45. Clementer dicit (Bengel). "The word is a mild one to describe the bitter enmity of the Jews" (Knowling).

I was constrained ( $\eta v \alpha \gamma \kappa \alpha \sigma \theta \eta v$ ). "I was compelled," first aorist passive indicative of $\alpha v a \gamma \kappa \alpha \zeta \omega$, the very word used of Paul's efforts to get the Christians to blaspheme (26:11) which see. Paul was compelled to appeal to Caesar (see $25: 11,12$ for this phrase), unless Paul was willing to be the victim of Jewish hate when he had done no wrong.

Not that I had aught to accuse my nation of (ovX $\omega \varsigma$ रov $\varepsilon \theta v o v \varsigma ~ \mu o v ~ \varepsilon \chi \omega v \tau$ кatn $\gamma$ opeıv). This use of $\omega \varsigma$ with a participle ( $\varepsilon \chi \omega v$ ) is common in Greek for the alleged reason. The genitive case with the infinitive кatๆ $\gamma$ о $\rho \varepsilon v$ is regular. Paul says $\varepsilon \theta v o s$ instead of $\lambda$ oos as in 24:17; 26:4 .

Acts 28:20
Did I intreat ( $\pi \alpha \rho \varepsilon \kappa \alpha \lambda \varepsilon \sigma \alpha$ ). Did I invite you.
Because of the hope of Israel ( $\varepsilon เ v \varepsilon \kappa \varepsilon v \tau \eta \varsigma \varepsilon \lambda \pi \iota \delta$ os $\tau$ ou $I \sigma \rho \alpha \varepsilon \lambda$ ). Genitive with preposition $\varepsilon$ ءveкยv. The hope of the Messiah is his point as in 26:6.

I am bound with this chain ( $\tau \eta \nu \alpha \lambda \nu \sigma ı \nu \tau \alpha \nu \tau \eta \nu \pi \varepsilon \rho ı \kappa \varepsilon \mu \alpha$ ). This old verb means to lie around as in Lu 17:2; Heb 12:1. But it is also used as the passive of $\pi \varepsilon \rho \iota t \mid \theta \eta \mu$, to place around with the accusative of $\pi \varepsilon \rho \iota \tau \theta \eta \mu$ retained. It is a transitive passive. Paul does not lie around the chain, but the chain lies around him, a curious reversal of the imagery (Robertson, Grammar, p. 815).

Acts 28:21
Letters ( $\gamma \rho \alpha \mu \mu \alpha \tau \alpha$ ). Official documents from the Sanhedrin about the charges against Paul.

Any harm of thee ( $\tau \pi \varepsilon \rho \sigma o v \pi o v \eta \rho o v)$.
Evil ( $\pi \mathrm{ov} \eta \rho \circ \vee$ ). The three aorists ( $\varepsilon \delta \varepsilon \xi \alpha \mu \varepsilon \theta \alpha, \alpha \pi \eta \gamma \gamma \varepsilon 1 \lambda \varepsilon v, \varepsilon \lambda \alpha \lambda \eta \sigma \varepsilon v$ ) cover the past. These Jews do not mean to say that they had never heard of Paul. It is hardly likely that they had heard of his appeal to Caesar, "for how could the news have reached Rome before Paul?" (Page).

Acts 28:22
But we desire ( $\alpha \xi \nleftarrow \nu \mu \varepsilon v \delta \varepsilon$ ). Old verb $\alpha \xi \nleftarrow \omega$, to deem worthy, to think right or proper as in $15: 38$ which see. They think it only fair to hear Paul's side of his case.

Concerning this sect ( $\pi \varepsilon \rho \tau \eta \varsigma$ alpعбє $\omega \varsigma \tau \alpha \cup \tau \eta \varsigma)$. Paul had identified Christianity with Judaism (verse 20) in its Messianic hope. The language seems to imply that the number of Christians in Rome was comparatively small and mainly Gentile. If the edict of Claudius for the expulsion of the Jews from Rome (Ac 18:2) was due to disturbance over Christ (Xрףбтич), then even in Rome the Jews had special reason for hostility towards Christians.

Everywhere spoken against ( $\pi \alpha \nu \tau \alpha \chi \circ v \alpha v \tau 1 \lambda \varepsilon \gamma \varepsilon \tau \alpha$ ). Cf. verse 19. The line of cleavage between Jew and Christian was now sharply drawn everywhere.

Acts 28:23
Appointed ( $\tau \alpha \xi \alpha \mu \varepsilon v o$ ). First aorist middle participle of $\tau \alpha \sigma \sigma \omega$. Formal arrangement as in Mt 28:16 when Jesus appointed the mountain for his meeting in Galilee.

In great number ( $\pi \lambda \varepsilon ו \sigma v \varepsilon \varsigma)$. Comparative of $\pi 0 \lambda v \varsigma$, "more than a few."
Expounded ( $\varepsilon \xi \varepsilon \tau 1 \theta \varepsilon \tau \circ)$. Imperfect middle of $\varepsilon \kappa \tau 1 \theta \eta \mu$, to set forth, as in 11:4; 18:26. He did it with detail and care and spent all day at it, "from morning till evening" ( $\alpha \pi 0 \pi \rho \omega$ $\varepsilon \omega \varsigma \varepsilon \sigma \pi \varepsilon \rho a \varsigma)$. In N.T. only here, 4:3 and Lu 24:29, though common word.

Persuading them concerning Jesus ( $\pi \varepsilon \iota \omega v$ avtovৎ $\pi \varepsilon \rho \tau 0 v$ I $\eta \sigma o v$ ). Conative present active participle, trying to persuade. It was only about Jesus that he could make good his claim concerning the hope of Israel (verse 20). It was Paul's great opportunity. So he appealed both to Moses and to the prophets for proof as it was his custom to do.

Acts 28:24
Some believed (o $\mu \varepsilon v \varepsilon \pi \varepsilon ө$ (ov $\tau o$ ). Imperfect passive indicative of $\pi \varepsilon ı \theta \omega$. More exactly, "some began to be persuaded" (inchoative).

Some disbelieved (o $\delta \varepsilon \eta \pi \iota \sigma \tau o u v$ ). Imperfect active of $\alpha \pi \iota \sigma \tau \varepsilon \omega$, to disbelieve, continued to disbelieve. It is usually so.

Acts 28:25
When they agreed not ( $\alpha \sigma \nu \mu \varphi \omega v o$ ov $\tau \varepsilon \varsigma)$. Old adjective, only here in N.T., double compound ( $\alpha$ privative, $\sigma \nu \mu, \varphi \omega \nu \eta$ ), without symphony, out of harmony, dissonant, discordant. It was a triumph to gain adherents at all in such an audience.

They departed ( $\alpha \pi \varepsilon \lambda v o v \tau 0$ ). Imperfect middle (direct) indicative, "They loosed themselves from Paul." Graphic close.

After that Paul had spoken one word ( $\varepsilon ו \pi о \nu \tau o \varsigma ~ \tau o v ~ П \alpha u \lambda o v ~ \rho \eta \mu \alpha \varepsilon v)$. Genitive absolute. One last word (like a preacher) after the all day exposition.

Well ( $\kappa \alpha \lambda \omega \varsigma$ ). Cf. Mt 14:7; Mr 7:6,9 (irony). Here strong indignation in the very position of the word (Page).

To your fathers ( $\pi \rho \circ \varsigma \tau 0 \nu \varsigma \pi \alpha \tau \varepsilon \rho \alpha \varsigma ~ v \mu \omega v$ ). So Aleph A B instead of $\eta \mu \omega \nu$ (our) like Stephen in 7:52 whose words Paul had heard. By mentioning the Holy Spirit Paul shows (Knowling) that they are resisting God (7:52).

Acts 28:26
Say ( $\varepsilon \iota \pi \circ v$ ). Second aorist active imperative instead of the old form $\varepsilon \iota \pi \varepsilon$. The quotation is from Isa 6:9,10. This very passage is quoted by Jesus (Mt 13:14,15; Mr 4:12; Lu 8:10) in explanation of his use of parables and in Joh 12:40 the very point made by Paul here, "the disbelief of the Jews in Jesus" (Page). See on Matthew for discussion of the language used. Here the first time ("go to this people and say") does not occur in Matthew. It is a solemn dirge of the doom of the Jews for their rejection of the Messiah foreseen so long ago by Isaiah.

Acts 28:28
This salvation ( $\tau 0 \cup \tau 0 ~ \tau o ~ \sigma \omega \tau \eta \rho ı o v) . ~ A d j e c t i v e ~ f r o m ~ \sigma \omega \tau \eta \rho ~(S a v i o u r), ~ s a v i n g, ~ b r i n g i n g ~$ salvation. Common in the old Greek. The neuter as here often in LXX (as Ps 67:2 ) as substantive like $\sigma \omega \tau \eta \rho \iota \alpha$ (cf. Lu 3:6 ).

They will also hear (auto ка акоибоvта). Avto as opposed to the rejection by the Jews, "vivid and antithetical" (Page).

Acts 28:30

Two whole years ( $\delta \iota \varepsilon \tau \iota \alpha v o \lambda \eta v$ ). Only here in N.T. and 24:27 which see. During these busy years in Rome Paul wrote Philippians, Philemon, Colossians, Ephesians, Epistles that would immortalize any man, unless, forsooth, one or more of them was written from Ephesus or Caesarea, which has not yet been proven.

In his own hired dwelling ( $\varepsilon v \iota \delta \omega \omega \mu \sigma \theta \omega \mu a \tau$ ). Old word, here only in N.T., that which is hired for a price (from $\mu \sigma \sigma \theta o \omega$ and that from $\mu \circ \sigma \theta o \varsigma$, hire).

Received ( $\alpha \pi \varepsilon \delta \varepsilon \chi \varepsilon \tau 0$ ). Imperfect middle of $\alpha \pi о \delta \varepsilon \chi \circ \mu \alpha$, received from time to time as

Preaching ( $\kappa \varepsilon \rho v \sigma \sigma \omega v)$,
teaching ( $\delta \iota \delta \alpha \sigma \kappa \omega v$ ), the two things that concerned Paul most, doing both as if his right hand was not in chains, to the amazement of those in Rome and in Philippi (Php 1:12-14).

None forbidding him ( $\alpha \kappa \omega \lambda \nu \tau \omega \varsigma)$. Old adverb from $\alpha$ privative and the verbal adjective $\kappa \omega \lambda \nu \tau \sigma$ ( from $\kappa \omega \lambda \nu \omega$, to hinder), here only in the N.T. Page comments on "the rhythmic cadence of the concluding words." Page rejects the notion that the book is an unfinished work. It closes with the style of a concluded work. I agree with Harnack that Luke wrote the Acts during this period of two years in Rome and carried events no further because they had gone no further. Paul was still a prisoner in Rome when Luke completed the book. But he had carried Paul to "Rome, the capital of the world, Urbi et Orbi" (Page). The gospel of Christ has reached Rome. For the fate of Paul we must turn elsewhere. But Luke had the presence of Paul while he carried the Acts to its triumphant conclusion. Ramsay can give a good deal in proof of his claim that Luke is the greatest of all historians. Beyond a doubt his rank is high and the world can never repay its debt to this cultured physician who wrote the Gospel and the Acts.

## THE EPISTLES OF PAUL BY WAY OF INTRODUCTION

## IMPORTANCE OF PAUL'S WORK

It is impossible to put too much emphasis on the life and work of Paul as the great interpreter of Christ. He has been misunderstood in modern times as he was during his career. Some accuse him of perverting the pure gospel of Christ about the Kingdom of God into a theological and ecclesiastical system. He has been accused of rabbinizing the gospel by carrying over his Pharisaism, while others denounce him for Hellenizing the gospel with Greek philosophy and the Greek mystery-religions. But out of all the welter of attacks Paul's Epistles stand as the marvellous expression of his own conception of Christ and the application of the gospel to the life of the Christians in the Graeco-Roman world in which they lived by eternal principles that apply to us today. In order to understand Paul's Epistles one must know the Acts of the Apostles in which Luke has drawn with graphic power the sudden change of the foremost opponent of Christ into the chief expounder and proclaimer of the gospel of the Risen Christ. The Acts and the Epistles supplement each other in a marvellous way, though chiefly in an incidental fashion. It is by no means certain that Luke had access to any of Paul's Epistles before he wrote the Acts, though that was quite possible for the early Epistles. It does not greatly matter for Luke had access to Paul himself both in Caesarea and in Rome. The best life of Paul one can get comes by combining the Acts with the Epistles if he knows how to do it. Paul is Luke's hero, but he has not overdrawn the picture in the Acts as is made clear by the Epistles themselves which reveal his own grasp and growth. The literature on Paul is vast and constantly growing. He possesses a fascination for students of the New Testament and of Christianity. It is impossible here to allude even to the most important in so vast a field. Conybeare and Howson's Life and Epistles of St. Paul still has value. Sir W. M. Ramsay has a small library on Paul and his Epistles. Stalker's masterful little book on Paul still grips men as does the work of Sabatier. Deissmann's St. Paul continues to throw light on the great Apostle to the Gentiles. Those who wish my own view at greater length will find them in my various books on Paul (Epochs in the Life of Paul, Paul the Interpreter of Christ, etc.).

THE REASON FOR HIS EPISTLES
In a real sense Paul's Epistles are tracts for the times, not for the age in general, but to meet real emergencies. He wrote to a particular church or group of churches or persons to meet immediate needs brought to his attention by messengers or letters. Dr. Deissmann contends strongly for the idea of calling Paul's Epistles "letters" rather than "Epistles." He gives a studied literary character to "epistles" as more or less artificial and written for the public eye rather than for definite effect. Four of Paul's Epistles are personal (those to Philemon, Titus, and Timothy) beyond a doubt, but in these which can properly be termed
personal letters there are the principles of the gospel applied to personal, social, and ecclesiastical problems in such a pungent fashion that they possess permanent value. In the earliest group of Paul's Epistles, he reminds the Thessalonians of the official character of the Epistle which was meant for the church as a whole (1Th 5:27). He says also: "But if any one does not obey our word by the epistle, mark this one, not to associate with him, that he may be put to shame" (2Th 3:14). He calls attention to his signature as proof of the genuineness of every epistle (2Th 3:17). He gave directions for the public reading of his epistles (Col 4:16 ). He regarded them as the expression of God's will through the life of the churches and he put his whole heart into them. Two great controversies stirred Paul's life. That with the Judaizers called forth the great doctrinal group (I Corinthians, II Corinthians, Galatians, Romans). That with the Gnostics occasioned the Epistles to the Colossians and the Ephesians (Laodiceans) and this controversy ran on into the Pastoral Epistles. Each Epistle had its particular occasion which will be pointed out in due season. But even in the short ones like Philippians, Colossians and Ephesians Paul deals with the sublimest of all themes, the Person of Christ, with a masterfulness never equalled elsewhere. Even in I Corinthians, which deals so largely with church problems in Corinth, two great chapters rise to the heights of real eloquence (Chapter 1Co 13 on Love and Chapter 1Co 15 on the Resurrection). Romans, the greatest of his Epistles, has the fullest discussion of Paul's gospel of grace and Chapter 1Co 8 has a sweep of imagination and a grasp of faith unsurpassed. Hence, while denying to Paul the artificial rules of the rhetoricians attributed to him by Blass, I cannot agree that Paul's church Epistles are mere incidental letters. It is not a question whether Paul was writing for posterity or for the present emergency. He wrote for the present emergency in the most effective possible way. He brought the whole gospel message to bear upon the varied and pressing problems of the early Christians in the power of the Holy Spirit with the eloquence of a mind all ablaze with the truth and with a heart that yearned for their souls for Christ. They are not literary epistles, but they are more than personal letters. They are thunderbolts of passion and power that struck centre and that strike fire now for all who will take the trouble to come to them for the mind of Christ that is here.

## DATES OF HIS EPISTLES

Unfortunately there is not complete agreement among scholars as to the dates of some of Paul's Epistles. Baur denied the Pauline authorship of all the Epistles save I and II Corinthians, Galatians, Romans. Today some deny that Paul wrote the Pastoral Epistles, though admitting the others. Some admit Pauline fragments even in the Pastoral Epistles, but more about this when these Epistles are reached. There is more doubt about the date of Galatians than any of the others. Lightfoot put it just before Romans, while Ramsay now makes it the earliest of all. The Epistle itself has no notes of place or time. The Epistles to the Thessalonians were written from Corinth after Timothy had been sent from Athens by Paul to Thessalonica (1Th 3:1f. ) and had just returned to Paul (1Th 3:6 ) which we know was in Corinth (Ac
$18: 5$ ) shortly before Gallio came as Proconsul of Achaia (Ac 18:12). We can now feel certain from the new "acclamation" of Claudius in the inscription at Delphi recently explained by Deissmann in his St. Paul that the Thessalonian Epistles were written 50 to 51 A.D. We know also that he wrote I Corinthians while in Ephesus (1Co 16:8) and before pentecost, though the precise year is not given. But he spent three years at Ephesus in round numbers (Ac 19:8,10; 20:31) and he wrote just before he left, probably spring of A.D. 54 or $55 . \mathrm{He}$ wrote II Corinthians from Macedonia shortly after leaving Ephesus (2Co 2:12) ] apparently the same year. Romans was written from Corinth and sent by Phoebe of Cenchreae (Ro 16:1f. ) unless Ro 16 be considered a separate Epistle to Ephesus as some hold, a view that does not commend itself to me. Deissmann (New Testament in the Light of Modern Research, p.33) accepts a modern theory that Ephesus was the place of the writing of the first prison Epistles (Philippians, Philemon, Colossians, Ephesians) as well as I Corinthians and Galatians and dates them all between A.D. 52 and 55. But we shall find that these prison Epistles most naturally fall to Rome between A.D. 61 and 63. If the Pastoral Epistles are genuine, as I hold, they come between A.D. 65 and 68. Bartlet argues for a date before A.D. 64, accepting the view that Paul was put to death then. But it is still far more probable that Paul met his death in Rome in A.D. 68 shortly before Nero's death which was June 8, A.D. 68. It will thus be seen that the dates of several of the Epistles are fairly clear, while some remain quite uncertain. In a broad outlook they must all come between A.D. 50 and 68.

FOUR GROUPS OF PAULINE EPISTLES
I. First Thessalonians. | Second Thessalonians. | A.D. 50 to 51.

Chief topic Eschatology. To correct misconceptions in Thessalonica.
II. First Corinthians. | Second Corinthians | Galatians | A.D. 54 to 57. Romans. $\mid$

Chief topic Justification by Faith. Defence against the Judaizers.
III. Philippians. | Philemon. | Colossians. |A.D. 61 to 63. Ephesians (Laodiceans).

Chief topic Christology. Defence against the Gnostic perversions of the Person of Christ.
IV. First Timothy. | Titus. | A.D. 65 to 68. Second Timothy. |

Ecclesiastical Problems to the fore.

## DEVELOPMENT IN PAUL'S THEOLOGY

The study of Paul's Epistles in the order of their writing is the best possible way of seeing his own growth as a theologian and interpreter of Christ. Sabatier long ago laid emphasis on this point in his book The Apostle Paul as did Matheson in The Spiritual Development of Paul. It is a tragedy to have to read Paul's Epistles as printed in the usual Greek text of Westcott and Hort and the English translations, beginning with Romans and ending with Philemon. In the manuscripts that give Paul's Epistles Romans comes first as the largest and most important, but Titus and Philemon come after II Timothy (the last just before his death). We know something of Paul's early preaching how he laid emphasis on the Messiahship of Jesus proven by his resurrection, Paul himself having seen the Risen Christ (Ac 9:22
). This conviction and experience lay at the foundation of all his work and he never faltered concerning it (Ac 17:3). In the earliest sermon of which we have a full report Paul proclaims justification by faith in Christ with forgiveness of sins (Ac 13:38f. ), blessings not obtained by the law of Moses. In the unfolding life of Paul he grappled with great problems of Jewish rabbinism and Greek philosophy and mystery-religions and Paul himself grew in stature as he courageously and victoriously faced Judaizer and Gnostic. There are scholars who claim that Paul surrendered to the appeal of Gnostic sacramentarianism and so went back on his great doctrine of justification by faith, not by works. It will be shown at the proper time that this view misinterprets Paul's attitude. The events given by Luke in the Acts fit in with the self-revelation of Paul in his own Epistles as we read them. Each one of the four groups of Epistles has a slightly different style and vocabulary as is natural when one comes to think of it. The same thing is true of the plays of Shakespeare and the poems of Milton. Style is the man, Buffon says. Yes, but style is also a function of the subject. Particularly is this true of vocabulary which has to vary with the different topics treated. But style in the same man varies with different ages. Ripened old age mellows the exuberance of youth and the passionate vehemence of manhood. We shall see Paul himself in his Epistles, letting himself go in various ways and in different moods. But in all the changing phases of his life and work there is the same masterful man who glories in being the slave of Jesus Christ and the Apostle to the Gentiles. The passion of Paul is Christ and one can feel the throb of the heart of the chief of sinners who became the chief of saints in all his Epistles. There is the Pauline glow and glory in them all.

## SOME BOOKS ON THE PAULINE EPISTLES

Bate, As a Whole Guide to the Epistles of St. Paul (1927). Bonnet-Schroeder, Epitres de Paul (4 ed. 1912). Champlain, The Epistles of Paul (1906). Clemen, Einheitlichkeit d. paul. Briefe (1894). Conybeare and Howson, Life and Epistles of St. Paul. Drummond, The Epistles of Paul the Apostle (1899). Hayes, Paul and His Epistles (1915). Heinrici, Die Forschungen uber die paul. Briefe (1886). Lake, The Earlier Epistles of St. Paul (1915). Lewin, Life and Epistles of St. Paul. (1875). Neil, The Pauline Epistles (1906). Scott, The Pauline Epistles (1909). Shaw, The Pauline Epistles (1903). Vischer, Die Paulusbriefe (1910). Voelter, Die Composition der paul. Haupt Briefe (1890). Voelter, Paulus und seine Briefe (1905). Way, The Letters of Paul to Seven Churches and Three Friends (1906) Weinel, Die Echtheit der paul. Hauptbriefe (1920). Weiss, B., Present Status of the Inquiry Concerning the Genuineness of the Pauline Epistles (1901). Weiss, B., Die Paulinische Briefe (1902). Wood, Life, Letters, and Religion of St. Paul (1925).

THE EPISTLE TO THE ROMANS
SPRING OF A.D. 57

## BY WAY OF INTRODUCTION

## INTEGRITY OF THE EPISTLE

The genuineness of the Epistle is so generally admitted by scholars that it is unnecessary to prove it here, for Loman, Steck, and the Dutch scholars (Van Manen, etc.) who deny it as Pauline are no longer taken seriously. He wrote it from Corinth because he sent it to Rome by Phoebe of Cenchreae (Ro 16:2) if chapter 16 is acknowledged to be a part of the Epistle. Chapter 16 is held by some to be really a short epistle to Ephesus because of the long list of names in it, because of Paul's long stay in Ephesus, because he had not yet been to Rome, and because, in particular, Aquila and Priscilla are named (Ro 16:3-5) who had been with Paul in Ephesus. But they had come from Rome before going to Corinth and there is no reason for thinking that they did not return to Rome. It was quite possible for Paul to have many friends in Rome whom he had met elsewhere. People naturally drifted to Rome from all over the empire. The old MSS. (Aleph A B C D) give chapter 16 as an integral part of the Epistle. Marcion rejected it and chapter 15 also for reasons of his own. Renan's theory that Romans was a circular letter like Ephesians sent in different forms to different churches (Rome, Ephesus, Thessalonica, etc.) has appealed to some scholars as explaining the several doxologies in the Epistle, but they cause no real difficulty since Paul interjected them in his other epistles according to his moods (2Co 1:20, for instance). That theory raises more problems than it solves as, for example, Paul's remarks about going to Rome (Ro 1:9-16) which apply to Rome. Lightfoot suggests the possibility that Paul added Ro 16:25-27 some years after the original date so as to turn it into a circular letter. But the MSS. do not support that theory and that leaves Ro 15:22-33 in the Epistle quite unsuitable to a circular letter. Modern knowledge leaves the Epistle intact with occasional variations in the MSS. on particular points as is true of all the N.T.

THE TIME AND PLACE
The place is settled if we accept Ro 16:1. The time of the year is in the spring if we combine statements in the Acts and the Epistle. He says: "I am now going to Jerusalem ministering to the saints" (Ro 15:25). In Ac 20:3 we read that Paul spent three months in Corinth. In II Corinthians we have a full account of the collection for the poor saints in Jerusalem. The account of the journey from Corinth to Jerusalem is given in Ac 20:3-21:17 . It was in the spring between passover at Philippi (Ac 20:6) and pentecost in Jerusalem ( $20: 16 ; 21: 17$ ). The precise year is not quite so certain, but we may suggest A.D. 57 or 58 with reasonable confidence.

## THE PURPOSE

Paul tells this himself. He had long cherished a desire to come to Rome (Ac 19:21) and had often made his plans to do so (Ro 1:13 ) which were interrupted (Ro 15:22), but now he definitely plans to go from Jerusalem, after taking the contribution there (Ro 15:26 ), to Rome and then on to Spain (Ro 15:24,28). Meanwhile he sends this Epistle that the Romans may know what Paul's gospel really is (Ro $1: 15 ; 2: 16$ ). He is full of the issues raised by the

Judaizing controversy as set forth in the Epistles to Corinth and to Galatia. So in a calmer mood and more at length he presents his conception of the Righteousness demanded by God (Ro 1:17) of both Gentile (Ro 1:18-32) and Jew (Ro 2:1-3:20) and only to be obtained by faith in Christ who by his atoning death (justification) has made it possible (Ro 3:21-5:21 ). This new life of faith in Christ should lead to holiness of life (sanctification, chapters Ro 6-8 ). This is Paul's gospel and the remaining chapters deal with corollaries growing out of the doctrine of grace as applied to practical matters. It is a cause for gratitude that Paul did write out so full a statement of his message. He had a message for the whole world and was anxious to win the Roman Empire to Christ. It was important that he go to Rome for it was the centre of the world's life. Nowhere does Paul's Christian statesmanship show to better advantage than in this greatest of his Epistles. It is not a book of formal theology though Paul is the greatest of theologians. Here Paul is seen in the plenitude of his powers with all the wealth of his knowledge of Christ and his rich experience in mission work. The church in Rome is plainly composed of both Jews and Greeks, though who started the work there we have no way of knowing. Paul's ambition was to preach where no one else had been (Ro 15:20 ), but he has no hesitation in going on to Rome.

## COMMENTARIES

No one of Paul's Epistles has more helpful modern commentaries on it than this one, such as those by Barth (1919), Beet (9th ed., 1901), Cook (1930), Denney (1901), Feine (1903), Garvie (1901), Gifford (1881), Godet (Tr., 1883), Gore (Expos.), Grey (1910), GriffithThomas (1913), Hodge (1856), Hort (Intr., 1895), Jowett (3rd ed., 1894), Julicher (2 Aufl., 1907), Kuhl (1913), Lagrange (1916), Lard (1875), Liddon (Anal., 1893), Lietzmann (2 Aufl., 1919), Lightfoot (chapters 1-7, 1895), Luetgert (1913), Monk (1893), Plummer, Richter (1908), Sanday and Headlam (1895), Shedd (1893), Stifler (1897), Vaughan (1890), Weiss, B. (Meyer Komm., g Aufl., 1899), Westcott, F. B. (1913), Zahn (1910).

## Romans 1

Rom 1:1
To the Romans ( $\pi \rho \circ \varsigma \mathrm{P} \omega \mu \alpha \iota \circ \varsigma \varsigma)$. This is the title in Aleph A B C, our oldest Greek MSS. for the Epistle. We do not know whether Paul gave any title at all. Later MSS. add other words up to the Textus Receptus: The Epistle of Paul to the Romans. The Epistle is put first in the MSS. because it is the most important of Paul's Epistles.

Paul (Пav入oc). Roman name (Пau入vৎ). See on Ac 13:9 for the origin of this name by the side of Saul.

Servant ( $\delta o u \lambda$ oc). Bond-slave of Jesus Christ (or Christ Jesus as some MSS. give it and as is the rule in the later Epistles) for the first time in the Epistles in the opening sentence, though the phrase already in Ga 1:10. Recurs in Php 1:1 and $\delta \varepsilon \sigma \mu \circ \circ$ (bondsman) in Phm 1:1.

Called to be an apostle ( $\kappa \lambda \eta \tau \circ \varsigma \alpha \pi о \sigma \tau о \lambda o \varsigma)$. An apostle by vocation (Denney) as in 1Co 1:1. In Ga 1:1 $\kappa \lambda \eta$ خос is not used, but the rest of the verse has the same idea.

Separated ( $\alpha \varphi \omega \rho \iota \sigma \mu \varepsilon v o \varsigma)$. Perfect passive participle of $\alpha \varphi 0 \rho \iota \zeta \omega$ for which verb see on Ga 1:15. Paul is a spiritual Pharisee (etymologically), separated not to the oral tradition, but to God's gospel, a chosen vessel (Ac 9:15 ). By man also (Ac 13:2). Many of Paul's characteristic words like $\varepsilon v a \gamma \gamma \varepsilon \lambda^{\prime}$ ıo have been already discussed in the previous Epistles that will call for little comment from now on.

## Rom 1:2

He promised afore ( $\pi \rho о \varepsilon \pi \eta \gamma \gamma \varepsilon ı \lambda \alpha \tau o$ ). First aorist middle of $\pi \rho о \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$ for which verb see on 2Co 9:5.

By ( $\delta \mathbf{L} \alpha$ ). Through, by means of, intermediate agency like Mt 1:22 which see.
In the holy scriptures ( $\varepsilon v \gamma \rho \alpha \varphi \alpha ı \varsigma ~ \alpha \gamma \iota a \iota)$ ). No article, yet definite. Perhaps the earliest use of the phrase (Sanday and Headlam). Paul definitely finds God's gospel in the Holy Scriptures.

Rom 1:3
Concerning his Son ( $\pi \varepsilon \rho$ tov viov avtov). Just as Jesus found himself in the O.T. (Lu 24:27,46 ). The deity of Christ here stated.

According to the flesh ( $\kappa \alpha \tau \alpha \sigma \alpha \kappa \kappa \alpha)$. His real humanity alongside of his real deity. For the descent from David see Mt 1:1,6,20; Lu 1:27; Joh 7:42; Ac 13:23, etc.

Rom 1:4
Who was declared ( $\tau 0 v$ opıo $\theta \varepsilon v \tau o \varsigma) . ~ A r t i c u l a r ~ p a r t i c i p l e ~(f i r s t ~ a o r i s t ~ p a s s i v e) ~ o f ~ o \rho ı \zeta \omega ~$ for which verb see on $\mathrm{Lu} 22: 22$; Ac 2:23. He was the Son of God in his preincarnate state (2Co 8:9; Php 2:6 ) and still so after his Incarnation (verse 3, "of the seed of David"), but it was the Resurrection of the dead ( $\varepsilon \xi$ $\alpha v a \sigma \tau \alpha \sigma \varepsilon \omega \varsigma ~ v \varepsilon \kappa \rho \omega v$, the general resurrection implied by that of Christ) that definitely marked Jesus off as God's Son because of his claims about
himself as God's Son and his prophecy that he would rise on the third day. This event (cf. 1Co 15 ) gave God's seal "with power" ( $\varepsilon v \delta v v a \mu \varepsilon$ ), "in power," declared so in power (2Co 13:4). The Resurrection of Christ is the miracle of miracles. "The resurrection only declared him to be what he truly was" (Denney).

According to the spirit of holiness ( $\kappa \alpha \tau \alpha \pi \nu \varepsilon \cup \mu \alpha \alpha \gamma เ \omega \sigma \nu \nu \eta \varsigma)$. Not the Holy Spirit, but a description of Christ ethically as ката барка describes him physically (Denney). Ha $\gamma \omega \sigma \sigma v \eta$ is rare (1Th 3:13; 2Co 7:1 in N.T.), three times in LXX, each time as the attribute of God. "The $\pi v \varepsilon v \mu \alpha ~ \alpha \gamma เ \omega \sigma v v \eta \varsigma$, though not the Divine nature, is that in which the Divinity or Divine Personality Resided " (Sanday and Headlam).

Jesus Christ our Lord (I $\eta \sigma o v$ Xpıбтov tov кvрıov $\eta \mu \omega v$ ). These words gather up the total personality of Jesus (his deity and his humanity).

Rom 1:5
Unto obedience of faith ( $\varepsilon \iota \varsigma ~ v \pi \alpha \kappa о \eta \nu \pi \iota \sigma \tau \varepsilon \omega \varsigma$ ). Subjective genitive as in 16:26, the obedience which springs from faith (the act of assent or surrender).

Rom 1:6
Called to be Jesus Christ's ( $\kappa \lambda \eta \tau$ to I $\eta \sigma o v$ X $\rho ı \sigma \tau o v$ ). Predicate genitive after $\kappa \lambda \eta \tau$ о (verbal adjective from $\kappa \alpha \lambda \varepsilon \omega$, to call), though it is possible to consider it the ablative case, "called of (or from) Jesus Christ."

Rom 1:7
In Rome ( $\varepsilon v \mathrm{P} \omega \mu \eta$ ). One late uncial ( G of tenth century) and a cursive omit these words here and one or two other late MSS. omit $\varepsilon v \mathrm{P} \omega \mu \eta$ in verse 15 . This possibly proves the Epistle was circulated as a circular to a limited extent, but the evidence is late and slight and by no means shows that this was the case in the first century. It is not comparable with the absence of $\varepsilon v E \varphi \varepsilon \sigma \omega$ in Eph 1:1 from Aleph and B (the two oldest and best MSS.).

Beloved of God ( $\alpha$ ү $\alpha \pi \eta \tau$ тıs $\theta \varepsilon o v$ ). Ablative case of $\theta$ zov after the verbal adjective like $\delta \iota \delta a \kappa \tau o \theta$ हov (taught of God) in Joh 6:45 (Robertson, Grammar, p. 516).

From God our Father and the Lord Jesus Christ ( $\alpha \pi о$ $\theta$ вov $\pi \alpha \tau \rho \circ \varsigma ~ \eta \mu \omega v$ ка кирьо Inбov Xpıбтov). "St. Paul, if not formally enunciating a doctrine of the Divinity of Christ, held a view which cannot really be distinguished from it" (Sanday and Headlam). Paul's theology is clearly seen in the terms used in verses 1-7.

Rom 1:8
First ( $\pi \rho \omega \tau \tau \nu \mu \varepsilon v$ ). Adverb in the accusative case, but no $\varepsilon \pi \varepsilon \iota \tau \alpha \delta \varepsilon$ (in the next place) as in Heb 7:2 or $\varepsilon \pi \varepsilon \iota \tau \alpha$ as in Jas 3:17 follows. The rush of thoughts crowds out the balanced phraseology as in Ro 3:2; 1Co 11:18.

Through ( $\delta ı \alpha$ ). As the mediator or medium of thanksgiving as in 7:25.
For ( $\pi \varepsilon \rho$ ). Concerning, about.
That (oт). Or because. Either declarative or causal ot makes sense here.
Your faith ( $\eta \pi \iota \sigma \tau \iota \varsigma \nu \mu \nu v$ ). "Your Christianity" (Sanday and Headlam).

Is proclaimed ( $\kappa \alpha \tau \alpha \gamma \gamma \varepsilon \lambda \lambda \varepsilon \tau \alpha)$. Present passive indicative of $\kappa \alpha \tau \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$, to announce ( $\alpha \gamma \gamma \varepsilon \lambda \lambda \omega$ ) up and down (ката). See also $\alpha v a \gamma \gamma \varepsilon \lambda \lambda \omega$, to bring back news (Joh 5:15 ), $\alpha \pi \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$, to announce from one as the source (Mt 2:8), $\pi \rho о к \alpha \tau \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$, to announce far and wide beforehand (Ac 3:18).

Throughout all the world ( $\varepsilon v$ o $\lambda \omega \tau \omega \kappa \kappa \sigma \mu \omega)$. Natural hyperbole as in Col 1:6; Ac 17:6 . But widely known because the church was in the central city of the empire.

## Rom 1:9

I serve ( $\lambda \alpha \tau \rho \varepsilon v \omega$ ). Old verb from $\lambda \alpha \tau \rho o v$, hire, and $\lambda \alpha \tau \rho \iota \varsigma$, hireling, so to serve for hire, then to serve in general gods or men, whether sacred services (Heb 9:9; 10:2 ) or spiritual service as here. Cf. Ro 12:1; Php 3:3.

Unceasingly ( $\alpha \delta ı \alpha \lambda \varepsilon ı \pi \tau \omega \varsigma)$. Late adverb for which see 1Th 1:2f.; 2:13; 5:17, only other N.T. examples.

Always ( $\pi \alpha \vee \tau 0 \tau \varepsilon)$. One might think that Paul prayed for no others, but he uses both adverbs in 1Th 1:2. He seems to have had prayer lists. He never omitted the Romans.

Rom 1:10
If by any means now at length ( $\varepsilon \pi \omega \varsigma \eta \delta \eta \pi \sigma \tau \varepsilon$ ). A condition of the first class in the form of an indirect question (aim) or elliptical condition like Ac 27:12 (Robertson, Grammar, p. 1024). Note the four particles together to express Paul's feelings of emotion that now at length somehow it may really come true.

I may be prospered ( $\varepsilon v o \delta \omega \theta \eta \sigma \sigma \mu \alpha)$. First future passive indicative of $\varepsilon v o \delta o \omega$ for which verb see on 1Co 16:2.

By the will of God ( $\varepsilon v \tau \omega \theta \varepsilon \lambda \eta \mu \alpha \tau \tau \operatorname{cov} \theta \varepsilon o v$ ). Paul's way lay "in" God's will.
Rom 1:11
Impart ( $\mu \varepsilon \tau \alpha \delta \omega)$. Second aorist active subjunctive of $\mu \varepsilon \tau \alpha \delta \iota \delta \omega \mu$, to share with one. See on Lu 3:11; 1Th 2:8.

To the end ye may be established ( $\varepsilon \varsigma \varsigma \tau \sigma \sigma \tau \eta \rho \chi \chi \eta \eta \nu \alpha \nu \mu a \varsigma$ ). Final clause (common in Paul) with $\varepsilon \iota \varsigma$ to and the first aorist passive infinitive of $\sigma \tau \eta \rho \iota \zeta \omega$ for which verb see on Lu 22:32; 1Th 3:3,13.

Rom 1:12
That is ( $\tau 0 \cup \tau 0 ~ \delta \varepsilon \varepsilon \sigma \tau \iota v$ ). "An explanatory correction" (Denney). The $\delta \varepsilon$ should not be ignored. Instead of saying that he had a spiritual gift for them, he wishes to add that they also have one for him.

That I with you may be comforted ( $\sigma v v \pi \alpha \rho \alpha \kappa \lambda \eta \theta \eta v \alpha \varepsilon v \nu \mu \nu v$ ). "My being comforted in you ( $\varepsilon v \nu \mu v)$ ) together ( $\sigma v v-$ ) with you," a mutual blessing to each party (you and me).

Rom 1:13
Oftentimes I purposed ( $\pi о \lambda \lambda \alpha \kappa ı \varsigma ~ \pi \rho о \varepsilon \theta \varepsilon \mu \eta \nu)$. Second aorist middle of $\pi \rho о \tau ө \theta \eta \mu$, old verb to place, to propose to oneself, in N.T. only here, 3:25; Eph 1:9. See Ac 19:21 for this purpose.

And was hindered ( $\kappa \alpha \varepsilon \kappa \omega \lambda \nu \theta \eta v$ ). "But was hindered," adversative use of $\kappa \alpha$.
That I might have some fruit ( $\imath \alpha \alpha \tau v \alpha \kappa \alpha \rho \pi \sigma \nu \sigma \chi \omega$ ). Second aorist (ingressive), active of $\varepsilon \chi \omega$, to have, and here means "might get (ingressive aorist) some fruit."

Rom 1:14
On

Both to Greeks and to Barbarians (H $\mathcal{\lambda} \lambda \eta \eta \tau v \tau \varepsilon \kappa \alpha \beta \alpha \rho \beta \alpha \rho o \iota \varsigma)$. The whole human race from the Greek point of view, Jews coming under $\beta \alpha \rho \beta \alpha \rho o t s$. On this word see Ac 18:2,4; 1Co 4:11; Col 3:11 (only N.T. instances). The Greeks called all others barbarians and the Jews termed all others Gentiles. Did Paul consider the Romans as Greeks? They had absorbed the Greek language and culture.

Rom 1:15
So as much as in me is I am ready (ov $\quad \tau \omega \kappa \alpha \tau^{\prime} \varepsilon \mu \varepsilon \pi \rho o \theta v \mu o v$ ). Literally, "Thus the according to me affair is ready" ( $\pi \rho \circ \theta v \mu \circ \varsigma$, old adjective, $\pi \rho \sigma, \theta \nu \mu \circ \varsigma$ ). It is an awkward idiom like to $\varepsilon \xi v \mu \omega v$ in 12:18. The plural $\tau \alpha \kappa \alpha \tau^{\prime} \varepsilon \mu \varepsilon$ we find in Php 1:12; Col 4:7; Eph 6:21

Rom 1:16
It is the power of God ( $\delta v v a \mu \iota \varsigma \theta \varepsilon o v \varepsilon \sigma \tau \iota v$ ). This Paul knew by much experience. He had seen the dynamite of God at work.

To the Jew first, and also to the Greek (Iov $\alpha a \iota \omega \tau \varepsilon \pi \rho \omega \tau \circ v \kappa \alpha H \varepsilon \lambda \lambda \eta \nu$ ). Jesus had taught this (Joh 4:22; 10:16; Lu 24:47; Ac $1: 8$ ). The Jew is first in privilege and in penalty (Ro 2:9f. ). It is not certain that $\pi \rho \omega \tau o v$ is genuine, but it is in $2: 9 \mathrm{f}$.

## Rom 1:17

For therein ( $\gamma \alpha \rho \varepsilon \nu \alpha v \tau \omega$ ). In the gospel (verse 16) of which Paul is not ashamed.
A righteousness of God ( $\delta \iota \alpha \ldots \circ \sigma v \nu \eta \theta \varepsilon o v$ ). Subjective genitive, "a God kind of righteousness," one that each must have and can obtain in no other way save "from faith unto faith" ( $\varepsilon \kappa \pi \iota \sigma \tau \varepsilon \omega \varsigma \varepsilon \iota \varsigma \pi \iota \sigma \tau \iota v)$, faith the starting point and faith the goal (Lightfoot).

Is revealed ( $\alpha \pi \sigma \kappa \alpha \lambda v \pi \tau \varepsilon \tau \alpha$ ). It is a revelation from God, this God kind of righteousness, that man unaided could never have conceived or still less attained. In these words we have Paul's statement in his own way of the theme of the Epistle, the content of the gospel as Paul understands it. Every word is important: $\sigma \omega \tau \eta \rho \iota \alpha \nu$ (salvation), $\varepsilon v a \gamma \gamma \varepsilon \lambda \iota o v$ (gospel), $\alpha \pi о \kappa \alpha \lambda \nu \pi \tau \varepsilon \tau \alpha$ (is revealed), $\delta ı \kappa \alpha \iota \sigma u v \eta \theta \varepsilon o v$ (righteousness of God), $\pi \iota \sigma \tau \iota \varsigma$ (faith) and $\pi \iota \sigma \tau \varepsilon v o v \tau$ (believing). He grounds his position on Hab 2:4 (quoted also in Ga 3:11 ). By "righteousness" we shall see that Paul means both "justification" and "sanctification." It is important to get a clear idea of Paul's use of $\delta \iota \kappa \alpha \iota \sigma v v \eta$ here for it controls the thought throughout the Epistle. Jesus set up a higher standard of righteousness ( $\delta \iota \kappa \alpha \circ \sigma v v \eta$ ) in the Sermon on the Mount than the Scribes and Pharisees taught and practised (Mt 5:20) and proves it in various items. Here Paul claims that in the gospel, taught by Jesus and by himself
there is revealed a God kind of righteousness with two ideas in it（the righteousness that God has and that he bestows）．It is an old word for quality from $\delta ⿺ 𠃊 ⿴ 囗 十 一 ⿱ 䒑 䶹 欠, ~, ~ a ~ r i g h t e o u s ~ m a n, ~$ and that from $\delta \iota \kappa \eta$ ，right or justice（called a goddess in $\mathrm{Ac} 28: 4$ ），and that allied with $\delta \varepsilon ı \kappa v v \mu$ ， to show，to point out．Other allied words are $\delta$（каıо $\omega$ ，to declare or make $\delta$ ıкаıо（Ro 3：24，26 ），$\delta \iota \kappa \alpha \iota \omega \mu$ ，that which is deemed $\delta ı \kappa \alpha \iota \rho$（sentence or ordinance as in 1：32；2：26；8：4）， $\delta \iota \kappa \alpha \iota \omega$ бц，the act of declaring $\delta ı \kappa \alpha \iota \rho$（only twice in N．T．，4：25；5：18 ）．$\Delta$ ıкаıобטvך and $\delta \iota \kappa \alpha \iota \omega$ are easy to render into English，though we use justice in distinction from righteous－ ness and sanctification for the result that comes after justification（the setting one right with God）．Paul is consistent and usually clear in his use of these great words．

Rom 1：18
For the wrath of God is revealed（ $\alpha \pi о к \alpha \lambda \nu \pi \tau \varepsilon \tau \alpha \gamma \alpha \rho$ о $\rho \gamma \eta \theta \varepsilon о v$ ）．Note in Romans Paul＇s use of $\gamma \alpha \rho$ ，now argumentative，now explanatory，now both as here．There is a parallel and antecedent revelation（see verse 17）of God＇s wrath corresponding to the revelation of God＇s righteousness，this an unwritten revelation，but plainly made known．$O \rho \gamma \eta$ is from o $\rho \gamma \alpha \omega$ ，to teem，to swell．It is the temper of God towards sin，not rage，but the wrath of reason and law（Shedd）．The revelation of God＇s righteousness in the gospel was necessary because of the failure of men to attain it without it，for God＇s wrath justly rested upon all both Gentiles（ $1: 18-32$ ）and Jews（ 2：1－3：20）．

Ungodliness（ $\alpha \sigma \varepsilon \beta \varepsilon \iota \alpha v$ ）．Irreligion，want of reverence toward God，old word（cf．2Ti 2：16）．

Unrighteousness（ $\alpha \delta_{\iota \kappa \iota} \alpha v$ ）．Lack（ $\alpha$ privative and $\delta_{\iota \kappa \eta}$ ）of right conduct toward men， injustice（Ro 9：14；Lu 18：6 ）．This follows naturally from irreverence．The basis of ethical conduct rests on the nature of God and our attitude toward him，otherwise the law of the jungle（cf．Nietzsche，＂might makes right＂）．

Hold down the truth（ $\tau \eta \nu \alpha \lambda \eta \theta \varepsilon ı \alpha \nu$ кат $\chi \chi \circ \tau \omega v$ ）．Truth（ $\alpha \lambda \eta \theta \varepsilon \varepsilon \alpha, \alpha \lambda \eta \theta \eta \varsigma$ ，from $\alpha$ privative and $\lambda \eta \theta \omega$ or $\lambda \alpha v \theta \alpha v \omega$ ，to conceal）is out in the open，but wicked men，so to speak， put it in a box and sit on the lid and＂hold it down in unrighteousness．＂Their evil deeds conceal the open truth of God from men．Cf．2Th 2：6f．for this use of $\kappa \alpha \tau \varepsilon \chi \omega$ ，to hinder．

Rom 1：19
Because（ $\delta \iota \tau \tau$ ）．Gives the reason（ $\delta \iota \alpha$ ，o like our＂for that＂）for the revelation of God＇s wrath．

That which may be known of God（ $\tau 0 \gamma \nu \omega \sigma \tau \sigma v$ रov $\theta \varepsilon o v$ ）．Verbal adjective from $\gamma \iota \nu \omega \sigma \kappa \omega$ ，either＂the known＂as elsewhere in N．T．（Ac 1：19；15：18，etc．）or＂the knowable＂ as usual in ancient Greek，that is＂the knowledge＂（ $\eta \gamma \nu \omega \sigma \iota)$ of God．See Php 3：8．Cf．same use of the verbal $\chi \rho \eta \sigma \tau o v$ in Ro 2：4，а $\mu \varepsilon \tau \alpha \theta \varepsilon \tau o v$ in Heb 6：17．

Manifest in them（ $\varphi$ avepov $\varepsilon v$ autoı）．In their hearts and consciences．
God manifested（o $\theta \varepsilon o \varsigma \varepsilon \varphi a v \varepsilon \rho \omega \sigma \varepsilon v$ ）．First aorist active indicative of $\varphi \alpha v \varepsilon \rho o \omega$ ．Not mere tautology．See 2：14－16．

Rom 1:20
The invisible things of him ( $\tau \alpha \alpha 0 \rho \alpha \tau \alpha \alpha v \tau o v$ ). Another verbal adjective ( $\alpha$ privative and opa $\omega$, to see), old word, either unseen or invisible as here and elsewhere in N.T. (Col 1:15f. , etc.). The attributes of God's nature defined here as "his everlasting power and divinity"
 N.T. only here and Jude 1:6, common in Philo ( $\zeta \omega \eta$ aı $\delta \iota \varsigma$ ), elsewhere $\alpha \iota \omega v \iota o \varsigma . \Theta \varepsilon ı \tau \tau \eta$ is from $\theta \varepsilon$ os (from $\theta \varepsilon \circ \varsigma$ ) quality of $\theta \varepsilon o \varsigma$ and corresponds more to Latin divinitas from divus,

deity , both old words and nowhere else in the N.T. ©eornc is Divine Personality, $\theta \varepsilon เ o \tau \eta \varsigma$, Divine Nature and properties (Sanday and Headlam).

Since the creation of the world ( $\alpha \pi \sigma$ ктıбє $\omega \varsigma \kappa \kappa \sigma \mu \circ v$ ). He means by God and unto God as antecedent to and superior to the world (cf. Col 1:15f . about Christ).

Are clearly seen ( $\kappa \alpha \theta$ o $\rho \alpha \tau \alpha$ ). Present passive indicative of $\kappa \alpha \theta$ o $\alpha \omega$ (perfective use of ката-), old word, only here in N.T., with direct reference to aopata.

Being perceived ( $\operatorname{voov} \mu \varepsilon v \alpha$ ). Present passive participle of vos $\omega$, to use the vouc (intellect).

That they may be without excuse ( $\varepsilon \varsigma \varsigma ~ \tau o ~ \varepsilon ı v \alpha ~ a u \tau o v \varsigma ~ \alpha v a \pi o \lambda о ү \eta \tau o v \varsigma) . ~ M o r e ~ l i k e l y, ~$ "so that they are without excuse." The use of $\varepsilon$ sఢ to and the infinitive (with accusative of general reference) for result like $\omega \sigma \tau \varepsilon$ is reasonably clear in the N.T. (Moulton, Prolegomena, p. 219; Robertson, Grammar, p. 1003). Avaro入oү $\quad$ tovs is another verbal with av from aлодоүєона. Old word, in N.T. only here and Ro 2:1 ("inexcusable" here).

## Rom 1:21

Because that ( $\delta$ เot). As in verse 19.
Knowing God ( $\gamma \vee 0 \vee \tau \varepsilon \varsigma \tau \operatorname{\tau ov} \theta \varepsilon \sigma v$ ). Second aorist active participle of $\gamma \iota \nu \omega \sigma \kappa \omega$, to know by personal experience. Definite statement that originally men had some knowledge of God. No people, however degraded, have yet been found without some yearning after a god, a seeking to find the true God and get back to him as Paul said in Athens (Ac 17:27).

Glorified not as God ( $o v \chi \omega \varsigma \theta \varepsilon o v \varepsilon \delta o \xi \alpha \sigma \alpha v$ ). They knew more than they did. This is the reason for the condemnation of the heathen (2:12-16), the failure to do what they know.

Their senseless heart ( $\eta \alpha \sigma \nu v \varepsilon \tau \sigma \varsigma \alpha \nu \tau \omega v \kappa \alpha \rho \delta ı \alpha)$. Kap $\delta \iota \alpha$ is the most comprehensive term for all our faculties whether feeling (Ro 9:2), will (1Co 4:5), intellect (Ro 10:6 ). It may be the home of the Holy Spirit (Ro 5:5) or of evil desires (1:24). See Mr 7:21f. for list of vices that come "out of the heart." Aбvvetoc is a verbal adjective from $\sigma \cup v ı \eta \mu$, to put together, and $\alpha$ privative, unintelligent, not able to put together the manifest evidence about God (verse 20). So darkness settled down on their hearts ( $\varepsilon \sigma \kappa о \tau \iota \sigma \theta \eta$, first aorist ingressive passive of $\sigma \kappa о \tau \iota \zeta \omega$, to darken).

Rom 1:22

Professing themselves to be wise ( $\varphi \alpha \sigma \kappa о \nu \tau \varepsilon \varsigma \varepsilon เ v \alpha \sigma о \varphi 0$ ). $\Sigma о \varphi 0$ is predicate nominative with $\varepsilon$ )va in indirect discourse agreeing with $\varphi \alpha \sigma \kappa о v \tau \varepsilon \varsigma$ (old verb, from $\varphi \eta \mu$, to say, rare in N.T.) in case and number according to regular Greek idiom (Robertson, Grammar, p. 1038).

Became vain ( $\varepsilon \mu \alpha \tau \alpha \iota \omega \theta \eta \sigma \alpha v$ ). Ingressive first aorist passive indicative of $\mu \alpha \tau \alpha \circ \omega \omega$ from $\mu \alpha \tau \alpha \iota \rho$ (empty). Empty reasonings as often today.

Became fools ( $\varepsilon \mu \omega \rho \alpha v \theta \eta \sigma \alpha v$ ). Ingressive first aorist passive of $\mu \omega \rho \alpha \iota v \omega$, to be a fool, old word from $\mu \omega \rho \circ \varsigma$, a fool. An oxymoron or sharp saying, true and one that cuts to the bone.

For the likeness of an image ( $\varepsilon v$ оноє $\omega \mu \alpha \tau \varepsilon ו \kappa о v o \varsigma)$. Both words, "a likeness which consists in an image or copy" (Lightfoot). See Php 2:7 for "likeness of men" and Col 1:15 for "image of God." Paul shows indignant contempt for these grotesque efforts to present pictures of a deity that had been lost (Denney). Why is it that heathen images of gods in the form of men and beasts are so horrible to look upon?

Rom 1:24
Wherefore ( $\delta ı$ o). Paul's inexorable logic. See it also in verse 26 with the same verb and in verse 28 к人 like "and so."

God gave them up ( $\pi \alpha \rho \varepsilon \delta \omega \kappa \varepsilon \nu$ avtouc o $\theta \varepsilon о \varsigma$ ). First aorist active indicative of $\pi \alpha \rho \alpha \delta i \delta \omega \mu$, old and common verb to hand over (beside, $\pi \alpha \rho \alpha$ ) to one's power as in Mt 4:12 . These people had already wilfully deserted God who merely left them to their own selfdetermination and self-destruction, part of the price of man's moral freedom. Paul refers to this stage and state of man in Ac 17:30 by "overlooked" (vđepı $\delta \omega v$ ). The withdrawal of God's restraint sent men deeper down. Three times Paul uses $\pi \alpha \rho \varepsilon \delta \omega \kappa \varepsilon v$ here (verses 24,26,28 ), not three stages in the giving over, but a repetition of the same withdrawal. The words sound to us like clods on the coffin as God leaves men to work their own wicked will.

That their bodies should be dishonoured ( $\tau \circ v \alpha \tau \mu \alpha \zeta \varepsilon \sigma \theta \alpha \tau \alpha \sigma \omega \mu \alpha \tau \alpha \alpha \nu \tau \omega v$ ). Contemplated result expressed by tov (genitive article) and the passive infinitive $\alpha \tau \mu \mu \zeta \varepsilon \sigma \theta a$ (from $\alpha \tau \mu \mu \varsigma$, a privative and $\tau / \mu \circ \varsigma$, dishonoured) with the accusative of general reference. Christians had a new sense of dignity for the body (1Th 4:4; 1Co 6:13). Heathenism left its stamp on the bodies of men and women.

Rom 1:25
Exchanged ( $\mu \varepsilon \tau \eta \lambda \lambda \alpha \xi \alpha v$ ). First aorist active indicative of $\mu \varepsilon \tau \alpha \lambda \lambda \alpha \sigma \sigma \omega$, old word for exchanging trade, only here and verse 26 in N.T. What a bargain they made, "the truth of God for ( $\varepsilon v$ ) the $(\tau \omega)$ lie." "The price of mythology" (Bengel).

Worshipped ( $\varepsilon \sigma \varepsilon \beta \alpha \sigma \theta \eta \sigma \alpha v$ ). First aorist passive (used transitively) of $\sigma \varepsilon \beta \alpha \zeta \rho \mu \alpha$, old verb, used in late Greek like $\sigma \varepsilon \beta \mathrm{o} \mu \alpha$, to worship.

Rather than the Creator ( $\pi \alpha \rho \alpha$ тоv ктוбаvта). Placed side by side ( $\pi \alpha \rho \alpha$, the Creator and the creature, $\kappa \tau \iota \sigma \iota)$ they preferred the creature.

Who is blessed forever. Amen (oऽ $\varepsilon \sigma \tau \iota v \varepsilon \nu \lambda o \gamma \eta \tau о \sigma$. A $\mu \eta v$ ). One of Paul's doxologies which may come at any moment when he is greatly stirred, as in 9:5. Ev $\lambda$ oү $\eta \tau$ oc is verbal of $\varepsilon v \lambda o \gamma \varepsilon \omega$.

Rom 1:26
Unto vile passions ( $\varepsilon \iota \varsigma \pi \theta \eta \alpha \tau \iota \mu \iota \varsigma)$. Unto passions of dishonour. ПaӨoৎ, old word from $\pi \alpha \sigma \chi \omega$, to experience, originally meant any feeling whether good or bad, but in N.T. always in bad sense as here, 1Th 4:5; Col 3:5 (only N.T. examples).

That which is against nature ( $\tau \eta \nu \pi \alpha \rho \alpha \varphi v \sigma v$ ). The degradation of sex is what Paul here notes as one of the results of heathenism (the loss of God in the life of man). They passed by the Creator.

Rom 1:27
Turned ( $\varepsilon \xi \varepsilon \kappa \alpha v \theta \eta \sigma \alpha v$ ). First aorist passive indicative, causative aorist, of $\varepsilon \kappa \kappa \alpha \iota \omega$, old verb, to burn out, to set on fire, to inflame with anger or lust. Here only in N.T.

Lust (op $\mathcal{\xi} \varepsilon$ ). Only here in N.T.
Unseemliness ( $\alpha \sigma \chi \eta \mu \circ \sigma v \nu \eta v$ ). Old word from $\alpha \sigma \chi \eta \mu \circ v$ (deformed). In N.T. only here and $\operatorname{Re}$ 16:15 .

Recompense ( $\alpha \nu \tau \iota \mu \iota \sigma \theta \iota \alpha v)$. See on 2Co 6:13 for only other N.T. instance of this late Pauline word, there in good sense, here in bad.

Which was due ( $\eta v \varepsilon \delta \varepsilon$ ). Imperfect active for obligation still on them coming down from the past. This debt will be paid in full ( $\alpha \pi \sigma \lambda \alpha \mu \beta \alpha v o v \tau \varepsilon \varsigma$, pay back as in Lu 6:34, and due as in $\mathrm{Lu} 23: 41$ ). Nature will attend to that in their own bodies and souls.

Rom 1:28
And even as they refused ( $\kappa \alpha \kappa \forall \omega \varsigma ~ о и к ~ \varepsilon \delta о к \iota \mu \alpha \sigma \alpha v) . ~ " A n d ~ e v e n ~ a s ~ t h e y ~ r e j e c t e d " ~ a f t e r ~$ trial just as $\delta о \kappa \iota \mu \zeta \omega$ is used of testing coins. They tested God at first and turned aside from him.

Knowledge ( $\varepsilon \pi \tau \gamma \nu \omega \sigma \varepsilon$ ). Full knowledge ( $\varepsilon \pi$ additional, $\gamma \nu \omega \sigma \iota \varsigma)$. They had a dim memory that was a caricature.

Unto a reprobate mind ( $\varepsilon \iota \varsigma \alpha \delta \kappa \kappa \mu$ v vouv). Play on оик $\varepsilon \delta о \kappa \iota \mu \sigma \alpha \nu$. They rejected God and God rejected their mental attitude and gave them over (verses 24,26,28). See this adjective already in 1Co 9:27; 2Co 13:5-7. Like an old abandoned building, the home of bats and snakes, left "to do those things which are not fitting" ( $\pi о \iota \varepsilon \nu \tau \alpha \mu \eta \kappa \alpha \theta \eta \kappa о \nu \tau \alpha$ ), like the night clubs of modern cities, the dives and dens of the underworld, without God and in the darkness of unrestrained animal impulses. This was a technical term with Stoics (II Macc. 6:4).

Rom 1:29
Being called with ( $\pi \varepsilon \pi \lambda \eta \rho \omega \mu \varepsilon v o v \varsigma)$. Perfect passive participle of the common verb $\pi \lambda \eta \rho \circ \omega$, state of completion, "filled to the brim with" four vices in the associative instrumental case ( $\alpha \delta \iota \kappa \iota \alpha$, unrighteousness as in verse 18, $\pi о \vee \eta \rho ı \alpha$, active wickedness as in $\mathrm{Mr} 7: 22$,
$\pi \lambda \varepsilon о v \varepsilon \xi \iota a$, covetousness as in 1Th 2:5; Lu 12:15, какıа, maliciousness or inward viciousness of disposition as in 1Co 5:8 ). Note asyndeton, no connective in the lists in verses 29-31. Dramatic effect. The order of these words varies in the MSS. and $\pi о \rho v \varepsilon 1 \alpha$, fornication, is not genuine here (absent in Aleph A B C).

Full of ( $\mu \varepsilon \sigma \tau \sigma u \varsigma)$. Paul changes from participle to adjective. Old adjective, rare in the N.T., like $\mu \varepsilon \sigma \tau o \omega$, to fill full (only in Ac 2:13 in N.T.), stuffed full of (with genitive). Five substantives in the genitive ( $\varphi$ Oovov, envy, as in Ga 5:21, $\varphi$ ovov, murder, and so a paronomasia or combination with $\varphi$ Өovov, of like sounding words, $\varepsilon \rho \iota \delta$ o $\varsigma$, strife, as in 2Co 12:16 , како $\theta \iota \alpha \varsigma$, malignity, and here only in N.T. though old word from какоп $\theta \eta \varsigma$ and that from какоৎ and $\eta$ Өоৎ, a tendency to put a bad construction on things, depravity of heart and malicious disposition.

Rom 1:30
Paul changes the construction again to twelve substantives and adjectives that give vivid touches to this composite photograph of the God abandoned soul.

Whisperers ( $\psi i \theta v \rho ı \sigma \tau \alpha \varsigma$ ). Old word from $\psi i \theta v \rho \iota \zeta \omega$, to speak into the ear, to speak secretly, an onomatopoetic word like $\psi \theta$ טvpıб $\mu \circ \varsigma$ ( 2 Co 12:20 ) and only here in N.T.

Backbiters (ката入а入ouc). Found nowhere else except in Hermas, compound like $\kappa \alpha \tau \alpha \lambda \alpha \lambda \varepsilon \omega$, to talk back (Jas 4:11), and кат $\alpha \lambda \alpha \lambda$ ıa, talking back (2Co 12:20), talkers back whether secretly or openly.

Hateful to God ( $\theta \varepsilon o \sigma \tau v \gamma \varepsilon ı \varsigma)$. Old word from $\theta \varepsilon o \varsigma$ and $\sigma \tau v \gamma \varepsilon \omega$. All the ancient examples take it in the passive sense and so probably here. So $\sigma \tau \cup \gamma \eta \tau \cos$ (Tit 3:13 ). Vulgate has deo odibiles.

Insolent ( $v \beta \rho \iota \sigma \tau \alpha \varsigma)$. Old word for agent from $\nu \beta \rho \iota \zeta \omega$, to give insult to, here alone in N.T. save 1Ti 1:13.

Haughty ( $\cup \pi \varepsilon \rho \eta \varphi \alpha v o v \varsigma)$. From v $\tau \varepsilon \rho$ and $\varphi \alpha ı v o \mu \alpha$, to appear above others, arrogant in thought and conduct, "stuck up."

Boastful ( $\alpha \lambda \alpha \zeta$ ovac). From $\alpha \lambda \eta$, wandering. Empty pretenders, swaggerers, braggarts.
Inventors of evil things ( $\varepsilon \varphi \varepsilon \cup \rho \varepsilon \tau \alpha \varsigma \kappa \alpha \kappa \omega v$ ). Inventors of new forms of vice as Nero was. Tacitus (Ann. IV. ii) describes Sejanus as facinorum omnium repertor and Virgil (Aen. ii. 163) scelerum inventor.

Disobedient to parents ( $\gamma$ ovevoıv $\alpha \pi \varepsilon \mid \theta \varepsilon ı \varsigma)$. Cf. 1Ti 1:9; 2Ti 3:2. An ancient and a modern trait.

Rom 1:31
Without understanding (aбuvetouc). Same word in verse 21.
Covenant-breakers ( $\alpha \sigma \cup v \theta \varepsilon \tau 0 u \varsigma$ ). Another paronomasia or pun. A privative and verbal $\sigma u v \theta \varepsilon \tau o c$ from $\sigma \cup v \tau ı \theta \eta \mu$, to put together. Old word, common in LXX (Jer 3:7), men "false to their engagements" (Sanday and Headlam), who treat covenants as "a scrap of paper."

Without natural affection (a $\alpha \tau \sigma \rho \gamma \overline{)}$ ). Late word, a privative and $\sigma \tau \circ \rho \gamma \eta$, love of kindred. In N.T. only here and 2Ti 3:3.

Unmerciful ( $\alpha v \varepsilon \lambda \varepsilon \eta \mu \circ v \alpha \varsigma)$. From a privative and $\varepsilon \lambda \varepsilon \eta \mu \omega v$, merciful. Late word, only
 the effects of $\sin$ on the lives of men and women. The late Dr. R. H. Graves of Canton, China, said that a Chinaman who got hold of this chapter declared that Paul could not have written it, but only a modern missionary who had been to China. It is drawn to the life because Paul knew Pagan Graeco-Roman civilization.

Rom 1:32
The ordinance of God ( $\tau 0 \delta \iota \kappa \alpha \iota \omega \mu \alpha$ тov $\theta \varepsilon \circ v$ ). The heathen knows that God condemns such evil practices.

But also consent with them ( $\alpha \lambda \lambda \alpha \kappa \alpha \sigma v v \varepsilon v \delta o \kappa о v \sigma \iota$ ). Late verb for hearty approval as in Lu 11:48; Ac 8:1; 1Co 7:12. It is a tragedy of American city government that so many of the officials are proven to be hand in glove with the underworld of law-breakers.

## Romans 2

Rom 2:1
Wherefore ( $\delta$ ıo). See 1:24,26 for this relative conjunction, "because of which thing."
Without excuse ( $\alpha v \alpha \pi o \lambda o \gamma \eta \tau о \varsigma)$. See on 1:21.
Whosoever thou art that judgest ( $\pi \alpha \varsigma$ о к $\rho \iota \nu \omega v$ ). Literally, "every one that judgest," vocative case in apposition with $\alpha v \theta \rho \omega \pi \varepsilon$. Paul begins his discussion of the failure of the Jew to attain to the God-kind of righteousness ( $2: 1-3: 20$ ) with a general statement applicable to all as he did (1:18) in the discussion of the failure of the Gentiles (Lightfoot). The Gentile is readily condemned by the Jew when he sins and equally so is the Jew condemned by the Gentile in like case. K $\rho \iota \nu \omega$ does not of itself mean to condemn, but to pick out, separate, approve, determine, pronounce judgment, condemn (if proper).

Another ( $\tau 0 v \varepsilon \tau \varepsilon \rho \circ v$ ). Literally, "the other man." The notion of two in the word, one criticizing the other.

Thou condemnest thyself ( $\sigma \varepsilon \alpha v \tau о \nu \kappa \alpha \tau \alpha \kappa \rho \imath \varepsilon \iota \varsigma)$. Note ката here with $\kappa \rho \iota \nu \omega$, to make plain the adverse judgment.

For $(\gamma \alpha \rho)$. Explanatory reason for the preceding statement. The critic
practises ( $\pi \rho \alpha \sigma \sigma \varepsilon \iota$, not single acts $\pi \sigma \varepsilon \varepsilon \omega$, but the habit $\pi \rho \alpha \sigma \sigma \omega$ ) the same things that he condemns.

Rom 2:2
Judgment ( $\kappa \rho \mu \alpha)$. Decision rendered whether good or bad.
According to (ката with accusative). As the rule of measure. Cf. Joh 7:24.
Rom 2:3
And doest the same ( $\kappa \alpha \pi о \omega \omega \nu \alpha \cup \tau \alpha$ ). "And doest them occasionally."
That thou shalt escape ( $\sigma v \varepsilon \kappa \varphi \varepsilon v \xi \eta$ ). Emphasis on $\sigma v$, "thou conceited Jew expecting to escape God's крцна because thou art a Jew." Cf. Mt 3:8f. Paul justifies the bitter words of the Baptist to the Pharisees and Sadducees. The future middle of the old verb $\varepsilon \kappa \varphi \varepsilon v \gamma \omega$ (cf. 1Th 5:3 ). The Jew posed as immune to the ordinary laws of ethics because a Jew. Alas, some Christians affect the same immunity.

## Rom 2:4

Or despiseth thou? ( $\eta$ катар $\rho о v \varepsilon เ \sigma$ ?). Another alternative, that of scorn of God's kindness ( $\chi \rho \eta \sigma \tau о \tau \eta \tau о \varsigma, 2 C o 6: 6$ ) and forbearance ( $\alpha \nu о \chi \eta \varsigma$, old word, holding back from $\alpha v \varepsilon \chi \omega$, only here in N.T.) and longsuffering ( $\mu \alpha \kappa \rho о \theta \nu \mu \iota \alpha$, late word for which see 2Co 6:4,6 ). Kataب $\rho \circ \vee \varepsilon \omega$ is old verb to think down on (ката, $\varphi \rho \circ \vee \varepsilon \omega$ ) as in Mt 6:24; 1Co 11:22 . This upstart Jew actually thinks down on God. And then "the riches" ( $\tau 0 v \pi \lambda o v \tau o v$ ) of all that comes from God.

Leadeth thee to repentance ( $\varepsilon \iota \mu \varepsilon \tau \alpha \nu o \iota \alpha \nu \sigma \varepsilon \alpha \gamma \varepsilon$ ). The very kindness ( $\tau 0 \chi \rho \eta \sigma \tau o \nu$, the kindly quality) of God is trying to lead (conative present $\alpha \gamma \varepsilon$ ) thee to a right-about face,
a change of mind and attitude ( $\mu \varepsilon \tau \alpha v o \iota \alpha v$ ) instead of a complacent self-satisfaction and pride of race and privilege.

Rom 2:5
After thy hardness ( $\kappa \alpha \tau \alpha \tau \eta \nu \sigma \kappa \lambda \eta \rho \circ \tau \eta \tau \alpha \sigma o v$ ). "According to thy hardness (old word from $\sigma \kappa \lambda \eta \rho \circ \varsigma$, hard, stiff, only here in N.T.) will God's judgment be."

And impenitent heart ( $\kappa \alpha ~ \alpha \mu \varepsilon \tau \alpha v o \eta \tau о v ~ к \alpha \rho \delta ı \alpha v) . ~ S e e ~ \mu \varepsilon \tau \alpha v o t \alpha v ~ j u s t ~ b e f o r e . ~ " T h y ~$ unreconstructed heart," "with no change in the attitude of thy heart."

Treasurest up for thyself ( $\theta \eta \sigma \alpha \nu \rho \iota દ \varepsilon \varsigma ~ \sigma \varepsilon \alpha u \tau \omega)$. See for $Ө \eta \sigma \alpha v \rho ı \zeta \omega$ on Mt 6:19f.; Lu 12:21; 2Co 12:14. Dative case $\sigma \varepsilon \alpha u \tau \omega$ (for thyself) with a touch of irony (Vincent).

Wrath (opyףv). For such a Jew as already stated for the Gentile ( $1: 18$ ). There is a revelation ( $\alpha \pi о \kappa \alpha \lambda \nu \psi \varepsilon \omega \varsigma)$ of God's wrath for both in the day of wrath and righteous judgment ( $\delta$ ıкаюкррьєь¢, a late compound word, in LXX, two examples in the Oxyrhynchus papyri, only here in N.T.). See 2Th 1:5 for $\delta$ ıкаıаऽ крıбє $\omega$ c. Paul looks to the judgment day as certain (cf. 2Co 5:10-12), the day of the Lord (2Co 1:14).

Rom 2:6
Who will render ( $\mathrm{o} \varsigma \boldsymbol{\alpha} \pi \mathrm{o} \delta \omega \sigma \varepsilon$ ). Paul quotes Pr 24:12 as in 2Ti 4:14. See also Mt 16:27; Re 22:12. The rendering will be in accord with the facts.

Rom 2:7
To them that seek (тоıৎ $\mu \varepsilon v-\zeta \eta \tau$ тovoıv). Dative plural of the articular present active participle of $\zeta \eta \tau \varepsilon \omega$ with $\mu \varepsilon v$ on the one hand.

Eternal life ( $\zeta \omega \eta \nu \alpha \iota \omega v \iota v)$. Accusative case object of $\alpha \pi o \delta \omega \sigma \varepsilon$ above.
Rom 2:8
But unto them that are factious and obey not the truth but obey unrighteousness
 $\delta \varepsilon$ and the articular present participles in the dative again, only with $\varepsilon \xi \varepsilon \rho เ \theta \varepsilon ı \alpha$, , there is no participle ovoıv. But the construction changes and the substantives that follow are not the object of $\alpha \pi o \delta \omega \sigma \varepsilon$ like $\zeta \omega \eta \nu$ aıv $\omega v$ ov above, but are in the nominative as if with $\varepsilon \sigma o v \tau \alpha$ (shall be) understood (anger and wrath, both o $\rho \gamma \eta$ and $\theta \nu \mu \circ \varsigma$, tribulation and anguish, again a pair $\theta \lambda \iota \psi ı \varsigma ~ \kappa \alpha ~ \sigma \tau \varepsilon v o \chi \omega \rho ı \alpha$ on which see 2Co 5:4; 12:10 ).

Rom 2:9
Every soul of man ( $\pi \alpha \sigma \alpha v \psi v \chi \eta \nu \alpha v \theta \rho \omega \pi \sigma)$ ). See 13:1 for this use of $\psi v \chi \eta$ for the individual.

Of the Jew first and also of the Greek (Iov $\left.\begin{array}{l}\text { aıov } \tau \varepsilon \pi \rho \omega \tau о v ~ к \alpha ~ \\ H \\ \lambda\end{array} \lambda \eta \nu \circ \varsigma\right)$. See on 1:16. First not only in penalty as here, but in privilege also as in 2:11; 1:16 .

Rom 2:11
Respect of persons ( $\pi \rho \circ \sigma \omega \pi \boldsymbol{\sigma} \eta \mu \psi \iota \alpha$ ). Milligan (Vocabulary) considers this word (in N.T. only here, Col 3:25; Eph 6:9) and $\pi \rho \circ \sigma \omega \pi о \lambda \eta \mu \pi \tau \eta \varsigma(A c 10: 34)$ and $\pi \rho \circ \sigma \omega \pi \sigma \lambda \eta \mu \pi \tau \varepsilon \omega$ (Jas 2:9 ) the earliest definitely known Christian words, not in LXX or non-Christian writings.

See on Ac 10:34 for the formation in imitation of the Hebrew to take note of the face ( $\pi \rho о \sigma \omega \pi \sigma v, \lambda \alpha \mu \beta \alpha v \omega$ ), to judge by the face or appearance.

Rom 2:12
Have sinned ( $\eta \mu \alpha \rho \tau о v)$. Constative aorist active indicative, "sinned," a timeless aorist.
Without law ( $\alpha v o \mu \omega \varsigma)$. Old adverb "contrary to law," "unjustly," but here in ignorance of the Mosaic law (or of any law). Nowhere else in N.T.

Shall also perish without law ( $\alpha v \circ \mu \omega \varsigma \kappa \alpha \alpha \pi о \lambda o v \nu \tau \alpha$ ). Future middle indicative of $\alpha \pi \sigma \lambda \lambda \nu \mu$, to destroy. This is a very important statement. The heathen who sin are lost, because they do not keep the law which they have, not because they do not have the Mosaic law or Christianity.

Under law ( $\varepsilon v \nu \circ \mu \omega)$. In the sphere of the Mosaic law.
By the law ( $\delta$ ı $\alpha$ vouov). The Jew has to stand or fall by the Mosaic law.
Rom 2:13
Not the hearers--but the doers ( $о v \gamma \alpha \rho$ о $\alpha к \rho о \alpha \tau \alpha 1--\alpha \lambda \lambda^{\prime}$ о $\pi о џ \eta \tau \alpha$ ). The law was read in the synagogue, but there was no actual virtue in listening. The virtue is in doing. See a like contrast by James between "hearers" and "doers" of the gospel (Jas 1:22-25).

Before God ( $\pi \alpha \rho \alpha \tau \omega \theta \varepsilon \omega$ ). By God's side, as God looks at it.
Shall be justified ( $\delta \iota \kappa \alpha \omega \theta \eta \sigma o v \tau \alpha)$. Future passive indicative of $\delta \iota \kappa \alpha \iota \sigma$, to declare righteous, to set right. "Shall be declared righteous." Like Jas 1:22-25 .

Rom 2:14
That have no law ( $\tau \alpha \mu \eta$ vouov $\varepsilon \chi o v \tau \alpha$ ). Better, "that have not the law" (the Mosaic law).

By nature ( $\varphi$ טб₹). Instrumental case of $\varphi v \sigma \iota$, old word from $\varphi v \omega$, to beget. The Gentiles are without the Mosaic law, but not without some knowledge of God in conscience and
 reply to the Jewish critic.

Rom 2:15
In that they (oıtivec). "The very ones who," qualitative relative.
Written in their hearts ( $\gamma \rho \alpha \pi \tau о v \varepsilon v \tau \alpha \iota \varsigma ~ \kappa \alpha \rho \delta \iota \propto ı \varsigma \nu \tau \omega v$ ). Verbal adjective of $\gamma \rho \alpha \varphi \omega$, to write. When their conduct corresponds on any point with the Mosaic law they practise the unwritten law in their hearts.

Their conscience bearing witness therewith ( $\sigma \cup \gamma \mu \alpha \rho \tau \cup \rho \circ \cup \sigma \eta \varsigma \alpha \nu \tau \omega \nu \tau \eta \varsigma \sigma \cup v \varepsilon \delta \delta \eta \sigma \varepsilon \omega \varsigma)$. On conscience ( $\sigma u v \varepsilon \iota \delta \eta \sigma \iota \varsigma)$ see on 1Co 8:7; 10:25f.; 2Co 1:12. Genitive absolute here with present active participle $\sigma \cup v \mu \alpha \rho \tau \cup \rho о и \sigma \eta \varsigma$ as in 9:1. The word $\sigma u v \varepsilon \delta \eta \eta \sigma \iota$ means co-knowledge by the side of the original consciousness of the act. This second knowledge is personified as confronting the first (Sanday and Headlam). The Stoics used the word a great deal and Paul has it twenty times. It is not in the O.T., but first in this sense in Wisdom 17:10. All
men have this faculty of passing judgment on their actions. It can be over-(1Co 10:25) or "seared" by abuse (1Ti 4:12). It acts according to the light it has.

Their thoughts one with another accusing or also excusing them ( $\mu \varepsilon \tau \alpha \xi v \alpha \lambda \lambda \eta \lambda \omega \nu$ $\tau \omega v \lambda о \gamma \iota \sigma \mu \omega \nu \kappa \alpha \tau \eta \gamma \circ \rho о \nu v \tau \omega \nu \eta \kappa \alpha \alpha \pi о \lambda о \gamma о \nu \mu \varepsilon v \omega v$ ). Genitive absolute again showing the alternative action of the conscience, now accusing, now excusing. Paul does not say that a heathen's conscience always commends everything that he thinks, says, or does. In order for one to be set right with God by his own life he must always act in accord with his conscience and never have its disapproval. That, of course, is impossible else Christ died for naught (Ga 2:21). Jesus alone lived a sinless life. For one to be saved without Christ he must also live a sinless life.

Rom 2:16
According to my gospel (ката to $\varepsilon v \alpha \gamma \gamma \varepsilon \lambda ı v \mu о v$ ). What Paul preaches (1Co 15:1) and which is the true gospel

Rom 2:17
Bearest the name ( $\varepsilon \pi о v o \mu \alpha \zeta \eta)$. Present passive indicative in condition of first class of $\varepsilon \pi о v o \mu a \zeta \omega$, old word, to put a name upon ( $\varepsilon \pi$ ), only here in N.T. "Thou art surnamed Jew" (Lightfoot). Jew as opposed to Greek denoted nationality while Hebrew accented the idea of language.

Restest upon the law ( $\varepsilon \pi \alpha v \alpha \pi \alpha \nu \eta v o \mu \omega)$. Late and rare double compound, in LXX and once in the Didache. In N.T. only here and Lu 10:6 which see. It means to lean upon, to refresh oneself back upon anything, here with locative case ( $v o \mu \omega$ ). It is the picture of blind and mechanical reliance on the Mosaic law.

Gloriest in God (каuұаба $\varepsilon v \theta \varepsilon \omega$ ). Koine vernacular form for каuұа (каuұаєба।, каuұ $\alpha \sigma \alpha$ ) of каих $\alpha о \mu \alpha$ as in verse 23; 1Co 4:7 and катакаихаба in Ro 11:18. The Jew gloried in God as a national asset and private prerogative (2Co 10:15; Ga 6:13 ).

Approvest the things that are excellent ( $\delta о \kappa \mu \alpha \zeta \varepsilon \iota \varsigma \tau \alpha \delta \iota \propto \varphi \rho \circ \vee \tau \alpha)$. Originally, "Thou testest the things that differ," and then as a result comes the approval for the excellent things. As in Php 1:10 it is difficult to tell which stage of the process Paul has in mind.

Instructed out of the law ( $\kappa \alpha \tau \eta \chi о \nu \mu \varepsilon \nu \circ \varsigma \varepsilon \kappa$ тоv vouоv). Present passive participle of $\kappa \alpha \tau \eta \chi \varepsilon \omega$, a rare verb to instruct, though occurring in the papyri for legal instruction. See on $\operatorname{Lu}$ 1:4; 1Co 14:19. The Jew's "ethical discernment was the fruit of catechetical and synagogical instruction in the Old Testament" (Shedd).

Rom 2:19
A guide of the blind (o $\delta \eta \gamma \circ v \tau \nu \varphi \lambda \omega v$ ). Accusative $o \delta \eta \gamma \circ v$ in predicate with $\varepsilon \varepsilon^{\prime} v a$ to agree with $\sigma \varepsilon \alpha \cup \tau o v$, accusative of general reference with infinitive $\varepsilon เ v a$ in indirect discourse after $\pi \varepsilon \pi \sigma$ Ө $\theta$ ac. Late word (Polybius, Plutarch) from oठo , way, and $\eta \gamma \varepsilon о \mu \alpha$, to lead, one who leads the way. $\operatorname{Tv} \varphi \lambda \omega v$ is objective genitive plural. The Jews were meant by God to be guides for the Gentiles, for salvation is of the Jews (Joh 4:22).

A light ( $\varphi \omega \varsigma$ ). "A light for those in darkness" ( $\tau \omega \vee \varepsilon \vee \sigma \kappa o \tau \varepsilon$, objective genitive again). But this intention of God about the Jews had resulted in conceited arrogance on their part.

Rom 2:20
A corrector of the foolish ( $\pi \alpha \iota \delta \varepsilon v \tau \eta \nu \alpha \varphi \rho \circ \nu \omega v$ ). Old word (from $\pi \alpha \iota \delta \varepsilon v \omega$ ) for instructor, in Plato, and probably so here, though corrector or chastiser in Heb 12:9 (the only N.T. instances). See Lu 23:16 . Late inscriptions give it as instructor (Preisigke). A $\varphi \rho o v \omega v$ is a hard word for Gentiles, but it is the Jewish standpoint that Paul gives. Each termed the other "dogs."

Of babes ( $v \eta \pi \omega \omega v$ ). Novitiates or proselytes to Judaism just as in Ga 4:1. Paul used it of those not of legal age.

The form ( $\tau \eta v \mu \circ \rho \varphi \omega \sigma \tau v$ ). Rare word only in Theophrastus and Paul (here and 2Ti 3:5 ). Pallis regards it as a Stoical term for education. Lightfoot considers the $\mu о \rho \varphi \omega \sigma \iota \varsigma$ as "the rough-sketch, the pencilling of the $\mu \circ \rho \varphi \eta$," the outline or framework, and in $2 \mathrm{Ti} 3: 5$ "the outline without the substance." This is Paul's picture of the Jew as he sees himself drawn with consummate skill and subtle irony.

Rom 2:21
Thou therefore that teachest another (o ouv $\delta \delta \delta \alpha \sigma \kappa \omega v \varepsilon \tau \varepsilon \rho \circ v$ ). Paul suddenly breaks off (anacoluthon) the long sentence that began in verse 17 and starts over again with a phrase that gathers it all up in small compass (teachest) and drives it home (therefore) on the Jew (thyself).

Not to steal ( $\mu \eta \kappa \lambda \varepsilon \pi \tau \varepsilon เ \nu$ ). Infinitive with $\mu \eta$ in indirect command (indirect discourse) after кع $\rho \cup \sigma \sigma \omega v$.

Dost thou steal? ( $\kappa \lambda \varepsilon \pi \tau \varepsilon เ \sigma$ ?). The preaching ( $\kappa \varepsilon \rho v \sigma \sigma \omega v$ ) was fine, but the practice? A home-thrust.

Should not commit adultery ( $\mu \eta \mu \circ \chi \chi \varepsilon \cup \varepsilon เ v$ ). Infinitive in direct command again after $\lambda \varepsilon \gamma \omega v$. "The Talmud charges the crime of adultery upon the three most illustrious Rabbins" (Vincent).

Rom 2:22
That abhorrest (o $\beta \delta \varepsilon \lambda \nu \sigma \sigma \sigma \mu \varepsilon v o \varsigma)$ ). Old word to make foul, to stink, to have abhorrence for. In LXX, in N.T. only here and Re 21:8. The very word used by Jesus to express their horror of idols ( $\varepsilon \delta \delta \omega \lambda \alpha$, see on Ac 7:41; 1Co 12:2 ). See Mt 24:15 for "abomination."
 from เع $\rho \circ \vee$, temple, and $\sigma \cup \lambda \alpha \omega$, to rob. The town clerk (Ac 19:37) said that these Jews (Paul and his companions) were "not robbers of temples," proof that the charge was sometimes made against Jews, though expressly forbidden the Jews (Josephus, Ant. IV. 8, 10). Paul refers to the crime of robbing idol temples in spite of the defilement of contact with idolatry.

Rom 2:23

Through thy transgression of the law ( $\delta \alpha \alpha \tau \eta \varsigma \pi \alpha \rho \alpha \beta a \sigma \varepsilon \omega \varsigma ~ \tau o v ~ v o \mu о v$ ). Old word for stepping across a line. Trench calls attention to "the mournfully numerous group of words" for the varieties of $\sin$ like $\alpha \gamma v o \eta \mu \alpha$, ignorance, $\alpha v o \mu \alpha \alpha$, violation of law, $\alpha \mu \alpha \rho \tau \iota \alpha$, missing the mark, $\varepsilon \tau \tau \eta \mu \alpha$, falling short, $\pi \alpha \rho \alpha \beta a \sigma \iota \varsigma$, passing over the line, $\pi \alpha \rho \alpha \kappa о \eta$, disobedience to a voice, $\pi \alpha \rho \alpha v o \mu \alpha$, putting the law aside, $\pi \alpha \rho \alpha \pi \tau \omega \mu \alpha$, falling down, $\pi \lambda \eta \mu \mu \varepsilon \lambda \varepsilon \tau \alpha$, discord.

Rom 2:24
Because of you ( $\delta \iota^{\prime} v \mu \alpha \varsigma$ ). Free quotation from the LXX of Isa 52:5. The Jews were jealous for the Name of God and would not pronounce the Tetragrammaton and yet acted so that the Gentiles blasphemed that Name.

Rom 2:25
If thou be a doer of the law ( $\varepsilon \alpha v$ vouov $\pi \rho \alpha \sigma \sigma \varepsilon ı$ ). Condition of third class and the present (continued action) subjunctive of $\pi \rho \alpha \sigma \sigma \omega$, a verb meaning to do as a habit.

Is become uncircumcision ( $\alpha \kappa \rho о \beta v \sigma \tau \iota \alpha ~ \gamma \varepsilon \gamma \circ v \varepsilon v$ ). The Jew is then like the Gentile, with no privilege at all. Circumcision was simply the seal of the covenant relation of Israel with God.

Rom 2:26
Keep ( $\varphi \cup \lambda a \sigma \sigma \eta$ ). Present subjunctive with $\varepsilon a v$, condition of third class, mere supposition like that in verse 25, "keep on keeping" perfectly, Paul means.

For ( $\varepsilon \iota \varsigma)$. As often in N.T.
Rom 2:27
If it fulfill the law ( $\tau 0 \nu v o \mu \circ \nu \tau \varepsilon \lambda o v \sigma \alpha$ ). Present active participle (conditional use of the participle) of $\tau \varepsilon \lambda \varepsilon \omega$, to finish, continually fulfilling to the end (as would be necessary).

Judge thee ( $\kappa \rho \iota v \varepsilon เ--\sigma \varepsilon$ ). Unusual position of $\sigma \varepsilon$ (thee) so far from the verb крıve.
With the letter and circumcision ( $\delta \iota \alpha \gamma \rho \alpha \mu \mu \alpha \tau о \varsigma \kappa \alpha \pi \varepsilon \rho ı \tau о \mu \eta \varsigma) . \Delta \iota \alpha$ means here accompanied by, with the advantage of.

Rom 2:28
Which is one outwardly (o $\varepsilon v \tau \omega \varphi \alpha v \varepsilon \rho \omega$ ). Iov $\delta a \iota c$ (Jew) has to be repeated (ellipse) with the article, "the in the open Jew" (circumcision, phylacteries, tithes, etc.). Likewise repeat $\pi \varepsilon \rho \iota \tau о \mu \eta$ (circumcision).

Rom 2:29
Who is one inwardly (o $\varepsilon v \tau \omega \kappa \rho v \pi \tau \omega$ ). Repeat Iov $\delta a \ldots o c$ (Jew) here also, "the in the inward part Jew" (circumcision of the heart $\pi \varepsilon \rho ı \tau о \mu \eta ~ \kappa \alpha \rho \delta ı \alpha \varsigma ~ a n d ~ n o t ~ a ~ m e r e ~ s u r g i c a l ~ o p e r-~$ ation as in $\operatorname{Col} 2: 11$, in the spirit $\varepsilon v \pi v \varepsilon v \mu \alpha \tau$, with which compare 2Co 3:3,6 ). This inward or inside Jew who lives up to his covenant relation with God is the high standard that Paul puts before the merely professional Jew described above.

Whose praise (ov o $\varepsilon \pi \alpha \iota v o c)$. The antecedent of the relative ov is Iovסaıoc (Jew). Probably (Gifford) a reference to the etymology of Judah (praise) as seen in Ga 49:8 .

## Romans 3

Rom 3:1
What advantage then hath the Jew? ( $\tau$ ouv $\tau 0 \pi \varepsilon \rho \iota \sigma \sigma o v ~ \tau o v ~ I o v \delta a ı o v ?) . ~ L i t e r a l l y, ~$ "What then is the overplus of the Jew?" What does the Jew have over and above the Gentile? It is a pertinent question after the stinging indictment of the Jew in chapter 2.

The profit ( $\eta \omega \varphi \varepsilon \lambda ı \alpha$ ). The help. Old word, only here in N.T. See Mr 8:36 for $\omega \varphi \varepsilon \lambda \varepsilon$, the verb to profit.

Rom 3:2
Much every way ( $\pi о \lambda \cup$ ката $\pi \alpha \nu \tau \alpha$ ). По $\nu v$ points back to $\tau 0 \pi \varepsilon \rho เ \sigma \sigma о v$. So it means the overplus of the Jew is much from every angle.

First of all ( $\pi \rho \omega \tau \sigma \nu \mu \varepsilon v$ ). As in 1:8; 1Co 11:18 Paul does not add to his "first." He singles out one privilege of the many possessed by the Jew.

They were intrusted with ( $\varepsilon \pi \iota \sigma \tau \varepsilon \cup \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\pi \iota \sigma \tau \varepsilon v \omega$, to intrust, with accusative of the thing and dative of the person in the active. In the passive as here the accusative of the thing is retained as in 1Th 2:4.
 of $\varepsilon \pi \iota \sigma \tau \varepsilon \cup \theta \eta \sigma a v$. $\Lambda o \gamma ı \circ$ is probably a diminutive of $\lambda o \gamma o \varsigma$, word, though the adjective入opıo also occurs (Ac 18:24 ). The word was early used for "oracles" from Delphi and is common in the LXX for the oracles of the Lord. But from Philo on it was used of any sacred writing including narrative. It occurs four times in the N.T. (Ac 7:38 , which see; Ro 3:2; Heb 5:12; 1Pe 4:11). It is possible that here and in Ac 7:38 the idea may include all the Old Testament, though the commands and promises of God may be all.

Rom 3:3
For what if? ( $\tau \gamma \alpha \rho \varepsilon$ ? ?). But Westcott and Hort print it, T $\gamma \alpha \rho$ ? $\varepsilon$. See Php 1:18 for this exclamatory use of $\tau \gamma \alpha \rho$ (for how? How stands the case?).

Some were without faith ( $\eta \pi \iota \sigma \tau \eta \sigma \alpha \nu$ ). First aorist active indicative of $\alpha \pi \iota \sigma \tau \varepsilon \omega$, old verb, to disbelieve. This is the common N.T. meaning (Lu 24:11,41; Ac 28:24; Ro 4:20). Some of them "disbelieved," these "depositaries and guardians of revelation" (Denney). But the word also means to be unfaithful to one's trust and Lightfoot argues for that idea here and in 2 Ti 2:13. The Revised Version renders it "faithless" there. Either makes sense here and both ideas are true of some of the Jews, especially concerning the Messianic promises and Jesus.

The faithfulness of God ( $\tau \eta \nu \pi \iota \sigma \tau \iota \nu \tau 0 v \theta \varepsilon o v)$. Undoubtedly $\pi \iota \sigma \tau \iota c$ has this sense here and not "faith." God has been faithful (2Ti 2:13) whether the Jews (some of them) were simply disbelievers or untrue to their trust. Paul can use the words in two senses in verse 3, but there is no real objection to taking $\eta \pi \iota \sigma \tau \eta \sigma \alpha v, \alpha \pi \iota \sigma \tau \iota \alpha v$, $\pi \iota \sigma \tau \iota v$, all to refer to faithfulness rather than just faith.

Rom 3:4
Let God be found true ( $\gamma \iota \nu \varepsilon \sigma \theta \omega$ o $\theta \varepsilon \circ \varsigma \alpha \lambda \eta \theta \eta \varsigma)$. "Let God continue to be true" (present middle imperative).

But every man a liar ( $\pi \alpha \varsigma \delta \varepsilon \alpha v \theta \rho \omega \pi \sigma \varsigma \psi \varepsilon v \sigma \tau \eta \varsigma)$. The contrast in $\delta \varepsilon$ really means, "though every man be found a liar." Cf. Ps 116:12 .

As it is written ( $\kappa \alpha \theta \omega \varsigma \gamma \varepsilon \gamma \rho a \pi \tau \alpha$ ). Ps 51:6.
That thou mightest be justified ( $о \pi \omega \varsigma \alpha v \delta \iota \kappa \alpha \iota \omega \theta \eta \iota$ ). Но $\pi \omega \varsigma$ rather than the common $\iota v a$ for purpose and $\alpha v$ with the first aorist passive subjunctive of $\delta \iota \kappa \ldots \omega \omega$. Used of God this verb here has to mean "declared righteous," not "made righteous."

Mightest prevail (vıкŋ $\sigma \varepsilon \iota \varsigma)$. Future active indicative with o $\pi \omega \varsigma$ of $v \iota \kappa \alpha \omega$, to win a victory, though B L have vıкךбףıৎ (first aorist active subjunctive, the usual construction).

When thou comest into judgement ( $\varepsilon \nu \tau \omega \kappa \rho \imath \varepsilon \varepsilon \sigma \theta \alpha \sigma \varepsilon$ ). "In the being judged as to thee" (present passive infinitive or, if taken as middle, "in the entering upon trial as to thee"). Common construction in the LXX from the Hebrew infinitive construct.

Rom 3:5
What shall we say? ( $\tau \varepsilon \rho o v \mu \varepsilon v$ ?). Rhetorical question, common with Paul as he surveys the argument.

Commendeth ( $\sigma v \nu \iota \sigma \tau \eta \sigma \iota \nu$ ). This common verb $\sigma v \nu \iota \sigma \tau \eta \mu$, to send together, occurs in the N.T. in two senses, either to introduce, to commend (2Co 3:1; 4:2) or to prove, to establish (2Co 7:11; Ga 2:18; Ro 5:8 ). Either makes good sense here.

Who visiteth the wrath (o $\varepsilon \pi \iota \varphi \varepsilon \rho \omega \nu \tau \eta \nu$ о $\rho \gamma \eta \nu)$. "Who brings on the wrath," "the inflicter of the anger" (Vaughan).

I speak as a man ( $\kappa \alpha \tau \alpha \alpha \nu \theta \rho \omega \pi \sigma v)$. See $\mathrm{Ga} 3: 15$ for same phrase. As if to say, "pardon me for this line of argument." Tholuck says that the rabbis often used $\kappa \alpha \tau \alpha \alpha v \theta \rho \omega \pi \sigma v$ and $\tau \varepsilon \rho o u \mu \varepsilon v$. Paul had not forgotten his rabbinical training.

Rom 3:6
For then how ( $\varepsilon \pi \varepsilon \pi \omega \varsigma$ ). There is a suppressed condition between $\varepsilon \pi \varepsilon$ and $\pi \omega \varsigma$, an idiom occurring several times in the N.T. (1Co 15:29; Ro 11:6,22 ). "Since, if that were true, how."

Rom 3:7
Through my lie ( $\varepsilon v \tau \omega \varepsilon \mu \omega \psi \varepsilon v \sigma \mu \alpha \tau$ ). ] Old word from $\psi \varepsilon v \delta o \mu \alpha$, to lie, only here in N.T. Paul returns to the imaginary objection in verse 5. The MSS. differ sharply here between $\varepsilon \delta \varepsilon$ (but if) and $\varepsilon \gamma \alpha \rho$ (for if). Paul "uses the first person from motives of delicacy" (Sanday and Headlam) in this supposable case for argument's sake as in 1Co 4:6. So here he "transfers by a fiction" (Field) to himself the objection.

Rom 3:8
And why not ( $\kappa \alpha \mu \eta$ ). We have a tangled sentence which can be cleared up in two ways. One is (Lightfoot) to supply $\gamma \varepsilon \nu \eta \tau \alpha$ after $\mu \eta$ and repeat $\tau(\kappa \alpha \tau \mu \eta \gamma \varepsilon v \eta \tau \alpha$, deliberative
subjunctive in a question): And why should it not happen? The other way (Sanday and Headlam) is to take $\mu \eta$ with $\pi o m \sigma \omega \omega \mu \varepsilon v$ and make a long parenthesis of all in between. Even so it is confusing because ot also (recitative o $\boldsymbol{\tau}$ ) comes just before $\pi о \neq \sigma \omega \mu \varepsilon \nu$. The parenthesis is necessary anyhow, for there are two lines of thought, one the excuse brought forward by the unbeliever, the other the accusation that Paul affirms that very excuse that we may do evil that good may come. Note the double indirect assertion (the accusative and the infinitive $\eta \mu \alpha \varsigma \lambda \varepsilon \gamma \varepsilon เ v$ after $\varphi a \sigma \iota v$ and then the direct quotation with recitative ot after $\lambda \varepsilon \gamma \varepsilon เ v$, a direct quotation dependent on the infinitive in indirect quotation.

Let us do evil that good may come ( $\pi о п \sigma \omega \mu \varepsilon \nu \tau \alpha \kappa \alpha \kappa \alpha ~ v v \alpha \varepsilon \lambda \theta \eta \tau \alpha \alpha \gamma \alpha \theta \alpha$ ). The volitive aorist subjunctive ( $\pi \circ \imath \eta \sigma \omega \mu \varepsilon v$ ) and the clause of purpose ( $\mathrm{t} \alpha \boldsymbol{\alpha}$ and the aorist subjunctive $\varepsilon \lambda \theta \eta$ ). It sounds almost uncanny to find this maxim of the Jesuits attributed to Paul in the first century by Jews. It was undoubtedly the accusation of Antinomianism because Paul preached justification by faith and not by works.

## Rom 3:9

What then? ( $\tau$ ouv?). Paul's frequent query, to be taken with verses 1,2 .
Are we in worse case than they? ( $\pi \rho о \varepsilon \chi о \mu \varepsilon \theta a$ ?). The American Revisers render it: "Are we in better case than they?" There is still no fresh light on this difficult and common word though it occurs alone in the N.T. In the active it means to have before, to excel. But here it is either middle or passive. Thayer takes it to be middle and to mean to excel to one's advantage and argues that the context demands this. But no example of the middle in this sense has been found. If it is taken as passive, Lightfoot takes it to mean, "Are we excelled" and finds that sense in Plutarch. Vaughan takes it as passive but meaning, "Are we preferred?" This suits the context, but no other example has been found. So the point remains unsettled. The papyri throw no light on it.

No, in no wise (ov $\pi \alpha \nu \tau \omega \varsigma$ ). "Not at all." See 1Co 5:10 .
We before laid to the charge ( $\pi \rho \circ \eta \iota \tau \tau \alpha \sigma \alpha \mu \varepsilon \theta \alpha$ ). First aorist middle indicative of $\pi \rho о \alpha \iota \tau \iota \alpha \mu \alpha$, to make a prior accusation, a word not yet found anywhere else. Paul refers to 1:18-32 for the Greeks and 2:1-29 for the Jews. The infinitive esva with the accusative mavtas is in indirect discourse.

Under sin (vто $\alpha \mu \alpha \rho \tau \iota \alpha v)$. See Ga 3:22; Ro 7:14 .

## Rom 3:10

As it is written ( $\kappa \alpha \theta \omega \varsigma \gamma \varepsilon \gamma \rho \alpha \pi \tau \alpha$ от). Usual formula of quotation as in verse 4 with recitative ot added as in verse 8. Paul here uses a catena or chain of quotations to prove his point in verse 9 that Jews are in no better fix than the Greeks for all are under sin. Dr. J. Rendel Harris has shown that the Jews and early Christians had Testimonia (quotations from the Old Testament) strung together for certain purposes as proof-texts. Paul may have used one of them or he may have put these passages together himself. Verses 10-12 come from Ps 14:1-3; first half of 13 as far as $\varepsilon \delta o \lambda$ ıov $\alpha \boldsymbol{v}$ from Ps $4: 9$, the second half from Ps

140:3; verse 14 from Ps 10:7; 15-17 from an abridgment of Isa 59:7f. ; verse 18 from Ps 35:1 . Paul has given compounded quotations elsewhere (2Co 6:16; Ro 9:25f.,27f; 11:26f.,34f.; 12:19f. ). Curiously enough this compounded quotation was imported bodily into the text (LXX) of Ps 14 after verse 4 in Aleph B, etc.

There is none righteous, no, not one (ouk عбтıv $\delta ı \kappa \alpha \ldots \varsigma ~ o u \delta \varepsilon \varepsilon ı \varsigma) . ~ " T h e r e ~ i s ~ n o t ~ a ~$ righteous man, not even one." This sentence is like a motto for all the rest, a summary for what follows.

## Rom 3:11

That understandeth ( $\sigma \cup v i \omega v$ ). Present active participle of $\sigma v v i \omega$, late omega form of $-\mu$ verb $\sigma v v ı \eta \mu$, to send together, to grasp, to comprehend. Some MSS. have the article o before it as before $\varepsilon \kappa \zeta \eta \tau \omega \nu$ (seeking out).

Rom 3:12
They are together become unprofitable ( $\alpha \mu \alpha \eta \chi \rho \varepsilon \omega \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\alpha \chi \rho \varepsilon \sigma \omega$. Late word in Polybius and Cilician inscription of first century A.D. Some MSS. read $\eta \chi \rho \varepsilon \epsilon \omega \theta \eta \sigma \alpha v$ from $\alpha \chi \rho \varepsilon \iota \circ \varsigma$, useless ( $\alpha$ privative and $\chi \rho \varepsilon \iota \rho$, , useful) as in Lu 17:10; Mt 25:30, but Westcott and Hort print as above from the rarer spelling axpeoc. Only here in N.T. The Hebrew word means to go bad, become sour like milk (Lightfoot).

No, not so much as one (ouk $\varepsilon \sigma \tau i v \varepsilon \omega \varsigma \varepsilon \nu O \varsigma)$. "There is not up to one."
Rom 3:13
Throat ( $\lambda \alpha \rho \cup \gamma \xi$ ). Old word, larynx.
Open sepulchre ( $\tau \alpha \varphi \circ \varsigma \alpha v \varepsilon \omega \iota \gamma \mu \varepsilon v o \varsigma)$. Perfect passive participle of $\alpha v o \iota \gamma \omega$, "an opened grave." Their mouth (words) like the odour of a newly opened grave. "Some portions of Greek and Roman literature stink like a newly opened grave" (Shedd).

They have used deceit ( $\varepsilon \delta 0 \lambda_{\iota}$ ov $\sigma \alpha v$ ). Imperfect (not perfect or aorist as the English implies) active of $\delta 0 \lambda_{\iota} \omega \omega$, only in LXX and here in the N.T. from the common adjective $\delta o \lambda ı \rho$, deceitful (2Co 11:13). The regular form would be $\varepsilon \delta o \lambda \iota o v v$. The -oбav ending for third plural in imperfect and aorist was once thought to be purely Alexandrian because so common in the LXX, but it is common in the Boeotian and Aeolic dialects and occurs in عıxoбav in the N.T. (Joh 15:22,24 ). "They smoothed their tongues" in the Hebrew.

Poison (ıo̧). Old word both for rust (Jas 5:3) and poison (Jas 3:8).
Of asps ( $\alpha \sigma \pi \iota \delta \omega v$ ). Common word for round bowl, shield, then the Egyptian cobra (a deadly serpent). Often in LXX. Only here in the N.T. The poison of the asp lies in a bag under the lips ( $\chi \varepsilon i \lambda \eta$ ), often in LXX, only here in N.T. Genitive case after $\gamma \varepsilon \mu \varepsilon$ (is full).

Rom 3:15
To shed ( $\varepsilon \kappa \chi \varepsilon \alpha$ ). First aorist active infinitive of $\varepsilon \kappa \chi \varepsilon \omega$, to pour out, old verb with aorist active $\varepsilon \xi \varepsilon \chi \varepsilon \alpha$.

Rom 3:16

Destruction ( $\sigma v \nu \tau \rho \not \mu \mu \alpha$ ). Rare word from $\sigma v \nu \tau \rho ı \beta \omega$, to rub together, to crush. In Le 21:19 for fracture and so in papyri. Only here in N.T.

Misery ( $\tau \alpha \lambda \alpha \iota \pi \omega \rho \iota \alpha$ ). Common word from $\tau \alpha \lambda \alpha \iota \pi \omega \rho \circ \varsigma$ (Ro 7:24), only here in the N.T.

Rom 3:17
The way of peace (oסov $\varepsilon \iota \rho \eta \vee \eta \varsigma)$. Wherever they go they leave a trail of woe and destruction (Denney).

Rom 3:18
Before ( $\alpha \pi \varepsilon v \alpha v \tau$ ). Late double compound ( $\alpha \pi 0, \varepsilon v, \alpha \nu \tau$ ) adverbial preposition in LXX and Polybius, papyri and inscriptions. With genitive as here.

Rom 3:19
That every mouth may be stopped (ıva $\pi \alpha v \sigma \tau o \mu \alpha \varphi \rho \alpha \gamma \eta$ ). Purpose clause with $v \alpha \alpha$ and second aorist passive subjunctive of $\varphi \rho \alpha \sigma \sigma \omega$, old verb to fence in, to block up. See 2Co 11:10. Stopping mouths is a difficult business. See Tit 1:11 where Paul uses $\varepsilon \pi \iota \sigma \tau 0 \mu \iota \zeta \varepsilon \iota$ (to stop up the mouth) for the same idea. Paul seems here to be speaking directly to Jews ( $\tau 015$ $\varepsilon \nu \tau \omega v o \mu \omega)$, the hardest to convince. With the previous proof on that point he covers the whole ground for he made the case against the Gentiles in 1:18-32.

May be brought under the judgement of God (v $\tau о \delta ⿺ \kappa \kappa \varsigma \varepsilon \nu \eta \tau \alpha \tau \omega \theta \varepsilon \omega$ ). "That all the world (Jew as well as Gentile) may become ( $\gamma \varepsilon \vee \eta \tau \alpha$ ) answerable (vлоסıкоৎ, old forensic word, here only in N.T.) to God (dative case $\tau \omega \theta \varepsilon \omega$ )." Every one is "liable to God," in God's court.

Rom 3:20
Because ( $\delta \iota \tau$, again, $\delta \iota \alpha, o \tau$ ).
By the works of the law ( $\varepsilon \xi \varepsilon \rho \gamma \omega \nu v o \mu o v)$. "Out of works of law." Mosaic law and any law as the source of being set right with God. Paul quotes Ps $43: 2$ as he did in Ga 2:16 to prove his point.

The knowledge of $\sin (\varepsilon \pi \iota \gamma \nu \omega \sigma \iota \varsigma \alpha \mu \alpha \rho \tau \iota \alpha \varsigma)$. The effect of law universally is rebellion to it (1Co 15:56 ). Paul has shown this carefully in Ga 3:19-22 . Cf. Heb 10:3 . He has now proven the guilt of both Gentile and Jew.

Rom 3:21
But now apart from the law ( $v v v \delta \varepsilon \chi \omega \rho ı \varsigma v o \mu o v$ ). He now ( $v v v$ emphatic logical transition) proceeds carefully in verses 21-31 the
 $\pi \varepsilon \varphi \alpha v \varepsilon \rho \omega \tau \alpha$, perfect passive indicative of $\varphi \alpha v \varepsilon \rho \circ \omega$, to make manifest), the
necessity of which he has shown in 1:18-3:20. This God kind of righteousness is "apart from law" of any kind and all of grace ( $\chi \alpha \rho ı \tau)$ as he will show in verse 24. But it is not a new discovery on the part of Paul, but "witnessed by the law and the prophets" ( $\mu \alpha \rho \tau v \rho o v \mu \varepsilon v \eta$,
present passive participle, vпо $\tau 0 \cup$ vоноv ка $\tau \omega \nu \pi \rho о \varphi \eta \tau \omega \nu$ ), made plain continuously by God himself.

Rom 3:22
Even ( $\delta \varepsilon$ ). Not adversative here. It defines here.
 $(\delta ı \alpha)$ is faith and objective genitive, "in Jesus Christ," not subjective "of Jesus Christ," in spite of Haussleiter's contention for that idea. The objective nature of faith in Christ is shown in
 $\varepsilon \varsigma$ X Inoov (in faith that in Christ Jesus) in 1Ti 3:13, as well as here by the added words "unto all them that believe" ( $\varepsilon \varsigma \varsigma \pi \alpha \nu \tau \alpha \varsigma ~ \tau o v \varsigma ~ \pi \iota \sigma \tau \varepsilon v o v \tau \alpha \varsigma) ~ i n ~ J e s u s, ~ P a u l ~ m e a n s . ~$

Distinction ( $\delta 1 \alpha \sigma \tau 0 \lambda \eta$ ). See on 1Co 14:7 for the difference of sounds in musical instruments. Also in Ro 10:12. The Jew was first in privilege as in penalty (2:9f. ), but justification or setting right with God is offered to both on the same terms.

Rom 3:23
Sinned ( $\eta \rho \mu \alpha \rho \tau о v)$. Constative second aorist active indicative of $\alpha \mu \alpha \rho \tau \alpha v \omega$ as in 5:12. This tense gathers up the whole race into one statement (a timeless aorist).

And fall short ( $\kappa \alpha$ vбт $\varepsilon \rho \circ u v \tau \alpha$ ). Present middle indicative of $v \sigma \tau \varepsilon \rho \varepsilon \omega$, to be $v \sigma \tau \varepsilon \rho o s$ (comparative) too late, continued action, still fall short. It is followed by the ablative case as here, the case of separation.

Rom 3:24
Being justified ( $\delta \iota \alpha \propto \iota \cup \mu \varepsilon v o$ ). Present passive participle of $\delta \iota \kappa \alpha \circ \omega$, to set right, repeated action in each case, each being set right.

Freely ( $\delta \omega \rho \varepsilon \alpha v$ ). As in Ga 2:21.
By his grace ( $\tau \eta$ av $\tau 0 \cup \chi \alpha \rho \tau)$ ). Instrumental case of this wonderful word $\chi \alpha \rho ı \varsigma$ which so richly expresses Paul's idea of salvation as God's free gift.

Through the redemption ( $\delta \iota \alpha \tau \eta \varsigma \pi о \lambda \nu \tau \rho \omega \sigma \varepsilon \omega \varsigma$ ). A releasing by ransom ( $\alpha \pi 0$, $\lambda \nu \tau \rho \omega \sigma \iota \varsigma$ from $\lambda \cup \tau \rho \circ \omega$ and that from $\lambda \cup \tau \rho o v$, ransom). God did not set men right out of hand with nothing done about men's sins. We have the words of Jesus that he came to give his life a ransom ( $\lambda \nu \tau \rho o v$ ) for many ( $\mathrm{Mr} 10: 45$; Mt 20:28). $\Lambda \nu \tau \rho o v$ is common in the papyri as the purchase-money in freeing slaves (Deissmann, Light from the Ancient East, pp. 327f.).

That is in Christ Jesus ( $\tau \eta \varepsilon v \mathrm{X} \rho \iota \sigma \tau \omega$ I $\eta \sigma o v$ ). There can be no mistake about this redemption. It is like Joh 3:16.

Rom 3:25
Set forth ( $\pi \rho 0 \varepsilon \theta \varepsilon \tau o$ ). Second aorist middle indicative. See on 1:13 for this word. Also in Eph 1:9, but nowhere else in N.T. God set before himself (purposed) and did it publicly before ( $\pi \rho o$ ) the whole world.

A propitiation ( $\lambda \lambda \alpha \sigma \tau \eta \rho \circ v$ ). The only other N.T. example of this word is in Heb 9:5 where we have the "cherubim overshadowing the mercy seat" ( $\tau \mathrm{i} \lambda \lambda \alpha \sigma \tau \eta \rho \circ$ v). In Hebrews the adjective is used as a substantive or as "the propitiatory place " But that idea does not suit here. Deissmann (Bible Studies, pp. 124-35) has produced examples from inscriptions where it is used as an adjective and as meaning "a votive offering" or "propitiatory gift." Hence he concludes about Ro 3:25 : "The crucified Christ is the votive gift of the Divine Love for the salvation of men." God gave his Son as the means of propitiation (1Jo 2:2). Hı $\lambda \alpha \sigma \tau \eta \rho \iota o v$ is an adjective ( $\lambda \lambda \alpha \sigma \tau \eta \rho \iota \varsigma)$ from $ו \lambda \alpha \sigma \kappa о \mu \alpha$, to make propitiation (Heb 2:17) and is kin in meaning to $\lambda \lambda \alpha \sigma \mu \mathrm{o}$, propitiation (1Jo 2:2; 4:10). There is no longer room for doubting its meaning in Ro 3:25.

Through faith, by his blood ( $\delta \iota \alpha \pi / \sigma \tau \varepsilon \omega \varsigma \varepsilon \nu \tau \omega$ av $\tau 0 v \alpha \mu \alpha \tau)$. So probably, connecting $\varepsilon v$ тo $\alpha \mu \alpha \tau$ (in his blood) with $\pi \rho o \varepsilon \theta \varepsilon \tau o$.

To show his righteousness ( $\varepsilon ા \varsigma \varepsilon v \delta \varepsilon ı \xi \imath \tau \eta \varsigma ~ \delta ı \kappa \alpha \ldots \sigma u v \eta \varsigma ~ a u \tau o v) . ~ S e e ~ 2 C o ~ 8: 24 . ~ " F o r ~$ showing of his righteousness," the God-kind of righteousness. God could not let sin go as if a mere slip. God demanded the atonement and provided it.

Because of the passing over ( $\delta \iota \alpha \tau \eta \nu \pi \alpha \rho \varepsilon \sigma เ v)$. Late word from $\pi \alpha \rho ı \eta \mu$, to let go, to relax. In Dionysius Hal., Xenophon, papyri (Deissmann, Bible Studies, p. 266) for remission of punishment, especially for debt, as distinct from $\alpha \varphi \varepsilon \sigma \iota \varsigma ~(r e m i s s i o n) . ~$

Done aforetime ( $\pi \rho \circ \gamma \varepsilon \gamma \circ v o \tau \omega v$ ). Second perfect active genitive participle of $\pi \rho \sigma \gamma \iota v o \mu \alpha$. The sins before the coming of Christ (Ac 14:16; 17:30; Heb 9:15).

Forbearance ( $\alpha v o \chi \eta$ ). Holding back of God as in 2:4. In this sense Christ tasted death for every man (Heb 2:9).

Rom 3:26
For the shewing ( $\pi \rho \circ \varsigma \tau \eta \nu \varepsilon v \delta \varepsilon \varepsilon \xi เ v)$. Repeats point of $\varepsilon \llbracket \varsigma \varepsilon \delta \varepsilon ı \xi \mid v$ of 25 with $\pi \rho \circ \varsigma$ instead of $\varepsilon ા \varsigma$.

At this present season ( $\varepsilon v \tau \omega \nu v \nu \kappa \alpha \rho \omega)$. "In the now crisis," in contrast with "done aforetime."

That he might himself be ( $\varepsilon \iota \varsigma \tau 0 \varepsilon เ v \alpha \alpha \cup \tau o v)$. Purpose with $\varepsilon เ \varsigma$ to and the infinitive $\varepsilon ו v a$ and the accusative of general reference.

Just and the justifier of ( $\delta$ ккаюо ка $\delta \iota \kappa \alpha ı о \nu \tau \alpha$ ). "This is the key phrase which establishes the connexion between the $\delta \iota \kappa \alpha \iota \sigma \cup v \eta \eta \varepsilon \varepsilon o v$ and the $\delta \iota \kappa \alpha \iota \sigma \cup v \eta \eta \varepsilon \kappa \pi \iota \sigma \tau \varepsilon \omega \varsigma$ " (Sanday and Headlam). Nowhere has Paul put the problem of God more acutely or profoundly. To pronounce the unrighteous righteous is unjust by itself (Ro 4:5). God's mercy would not allow him to leave man to his fate. God's justice demanded some punishment for sin. The only possible way to save some was the propitiatory offering of Christ and the call for faith on man's part.

Rom 3:27

It is excluded ( $\varepsilon \xi \varepsilon \kappa \lambda \varepsilon \iota \sigma \theta \eta$ ). First aorist (effective) passive indicative. "It is completely shut out." Glorying is on man's part.

Nay; but by a law of faith (ou $\chi, \alpha \lambda \lambda \alpha \delta \iota \alpha$ vo $\mu \circ v \pi \iota \sigma \tau \varepsilon \omega \varsigma$ ). Strong negative, and note "law of faith," by the principle of faith in harmony with God's love and grace.

Rom 3:28
We reckon therefore ( $\lambda o \gamma \iota \zeta \circ \mu \varepsilon \theta \alpha \mathrm{ovv}$ ). Present middle indicative. Westcott and Hort read $\gamma \alpha \rho$ instead of ovv. "My fixed opinion" is. The accusative and infinitive construction
 verses 21f.

Rom 3:29
Of Gentiles also ( $\kappa \alpha \varepsilon \theta v \omega v$ ). Jews overlooked it then and some Christians do now.
Rom 3:30
If so be that God is one ( $\varepsilon เ \pi \varepsilon \rho \varepsilon \iota \varsigma ~ o ~ \theta \varepsilon o \varsigma)$. Correct text rather than $\varepsilon \pi \varepsilon ו \pi \varepsilon \rho$. It means "if on the whole." "By a species of rhetorical politeness it is used of that about which there is no doubt" (Thayer. Cf. 1Co 8:5; 15:15; Ro 8:9.

By faith ( $\varepsilon \kappa \pi \iota \sigma \tau \varepsilon \omega \varsigma)$. "Out of faith," springing out of.
Through faith ( $\delta \iota \alpha \tau \eta \varsigma \pi \iota \sigma \tau \varepsilon \omega \varsigma)$. "By means of the faith" (just mentioned). Ек denotes source, $\delta \iota \alpha$ intermediate agency or attendant circumstance.

Rom 3:31
Nay, we establish the law ( $\alpha \lambda \lambda \alpha$ vo $\mu \circ v$ เб $\alpha \alpha v o \mu \varepsilon v$ ). Present indicative active of late verb $\iota \sigma \tau \alpha v \omega$ from $\iota \sigma \tau \eta \mu$. This Paul hinted at in verse 21 . How he will show in chapter 4 how Abraham himself is an example of faith and in his life illustrates the very point just made. Besides, apart from Christ and the help of the Holy Spirit no one can keep God's law. The Mosaic law is only workable by faith in Christ.

## Romans 4

Rom 4:1
What then shall we say? ( $\tau$ ouv $\varepsilon \rho o v \mu \varepsilon v$ ?). Paul is fond of this rhetorical question (4:1; 6:1; 7:7; 8:31; 9:14,30 ).

Forefather ( $\pi \rho о \pi \alpha \tau о \rho \alpha)$. Old word, only here in N.T. Accusative case in apposition with $\mathrm{A} \beta \rho \alpha \alpha \mu$ (accusative of general reference with the infinitive).

Hath found ( $\varepsilon \cup \rho \eta \kappa \varepsilon v \alpha)$. Westcott and Hort put $\varepsilon \cup \rho \eta \kappa \varepsilon v \alpha$ in the margin because B omits it, a needless precaution. It is the perfect active infinitive of $\varepsilon v \rho \iota \sigma \kappa \omega$ in indirect discourse after $\varepsilon \rho о \cup \mu \varepsilon v$. The MSS. differ in the position of ката барка.

Rom 4:2
The Scripture ( $\eta \gamma \rho \alpha \varphi \eta$ ). Ge 15:6.
Was justified by works $(\varepsilon \xi \varepsilon \rho \gamma \omega \nu \varepsilon \delta \iota \kappa \alpha \iota \omega \theta \eta)$. Condition of first class, assumed as true for the sake of argument, though untrue in fact. The rabbis had a doctrine of the merits of Abraham who had a superfluity of credits to pass on to the Jews (Lu 3:8).

But not towards God ( $\alpha \lambda \lambda^{\prime}$ ov $\pi \rho \circ \varsigma \theta \varepsilon o v$ ). Abraham deserved all the respect from men that came to him, but his relation to God was a different matter. He had there no ground of boasting at all.

Rom 4:3
It was reckoned unto him for righteousness $(\varepsilon \lambda o \gamma \iota \sigma \theta \eta \varepsilon \varepsilon \varsigma \delta \iota \kappa \alpha \iota \sigma \sigma v \nu \eta v)$. First aorist passive indicative of $\lambda о \gamma \zeta \zeta$ о $\alpha$, old and common verb to set down accounts (literally or metaphorically). It was set down on the credit side of the ledger "for" ( $\varepsilon \iota \varsigma$ as often) righteousness. What was set down? His believing God ( $\varepsilon \pi \iota \sigma \tau \varepsilon v \sigma \varepsilon \nu \tau \omega \theta \varepsilon \omega)$.

Rom 4:4
But as of debt ( $\alpha \lambda \lambda \alpha \kappa \alpha \tau \alpha$ оч $\kappa \iota \eta \mu \alpha)$. An illustration of the workman $(\varepsilon \rho \gamma \alpha \zeta о \mu \varepsilon \nu \omega)$ who gets his wages due him, "not as of grace" (ov ката $\chi \alpha \rho \iota \nu$ ).

Rom 4:5
That justifieth the ungodly ( $\tau \circ v \delta \iota \alpha \iota \circ \cup v \tau \alpha \tau о v \alpha \sigma \varepsilon \beta \eta$ ). The impious, irreverent man. See $1: 25$. A forensic figure (Shedd). The man is taken as he is and pardoned. "The whole Pauline gospel could be summed up in this one word-- God who justifies the ungodly" (Denney).

Rom 4:6
Pronounceth blessing ( $\lambda \varepsilon \gamma \varepsilon \tau 0 \nu \mu \alpha \kappa \alpha \rho ı \sigma \mu \sigma \nu$ ). old word from $\mu \alpha \kappa \alpha \rho \iota \zeta \omega$, to pronounce blessed (Lu 1:48), felicitation, congratulation, in N.T. only here, verse 9; Ac 4:15.

Rom 4:7
Blessed ( $\mu \alpha \kappa \alpha \rho ı$ ). See on Mt 5:3.

Are forgiven ( $\alpha \varphi \varepsilon \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\alpha \varphi \downharpoonright \eta \mu$, without augment ( $\alpha \varphi \varepsilon 1 \theta \eta \sigma \alpha v$, regular form). Paul quotes Ps 32:1f. and as from David. Paul thus confirms his interpretation of Ge 15:6.

Iniquities ( $\alpha v \rho \mu(\alpha)$. Violations of law whereas $\alpha \mu \alpha \rho \tau \tau \alpha$ (sins) include all kinds.
Are covered ( $\varepsilon \pi \varepsilon \kappa \alpha \lambda \nu \varphi \theta \eta \sigma \alpha v$ ). First aorist passive of $\varepsilon \pi \_\kappa \alpha \lambda \nu \pi \tau \omega$, old verb, to cover over (upon, $\varepsilon \pi$ ) as a shroud. Only here in N.T.

Rom 4:8
To whom ( $\omega$ ). But the best MSS. read ou like the LXX and so Westcott and Hort, "whose sin."

Will not reckon (ov $\mu \eta$ $\lambda o \gamma เ \sigma \eta \tau \alpha$ ). Strong negation by double negative and aorist middle subjunctive.

Rom 4:9
Is this blessing then pronounced? (о $\mu \alpha \kappa \alpha \rho \iota \sigma \mu о \varsigma ~ o v v ~ о и \tau о \sigma ?) . ~ " I s ~ t h i s ~ f e l i c i t a t i o n ~$ then?" There is no verb in the Greek. Paul now proceeds to show that Abraham was said in Ge 15:6 to be set right with God by faith before he was circumcised.

Rom 4:10
When he was in circumcision ( $\varepsilon v \pi \varepsilon \rho \iota \tau о \mu \eta$ ovt). Dative masculine singular of the present active participle of $\varepsilon \mu$; "to him being in a state of circumcision or in a state of uncircumcision?" A pertinent point that the average Jew had not noticed.

Rom 4:11
The sign of circumcision ( $\sigma \eta \mu \varepsilon \iota \circ \sim \pi \varepsilon \rho \tau \tau \mu \eta \varsigma)$. It is the genitive of apposition, circumcision being the sign.

A seal of the righteousness of the faith ( $\sigma \varphi \rho \alpha \gamma \iota \delta \alpha \tau \eta \varsigma \delta \iota \kappa \alpha \iota \sigma u v \eta \varsigma \tau \eta \varsigma \pi \iota \sigma \tau \varepsilon \omega \varsigma$ ). $\Sigma \varphi \rho a \gamma ı$ is old word for the seal placed on books ( $\operatorname{Re} 5: 1$ ), for a signet-ring ( $\operatorname{Re} 7: 2$ ), the stamp made by the seal (2Ti 2:19), that by which anything is confirmed (1Co 9:2) as here. The circumcision did not convey the righteousness, but only gave outward confirmation. It came by faith and "the faith which he had while in uncircumcision" ( $\tau \eta \varsigma \varepsilon \nu \tau \eta \alpha \kappa \rho \circ \beta v \sigma \tau \iota \alpha$ ), "the in the state of uncircumcision faith." Whatever parallel exists between baptism and circumcision as here stated by Paul argues for faith before baptism and for baptism as the sign and seal of the faith already had before baptism.

That he might be ( $\varepsilon ı \varsigma \tau 0 \varepsilon เ v a \alpha u \tau o v)$. This idiom may be God's purpose (contemplated

Though they be in uncircumcision ( $\delta \iota^{\prime}$ ак $\left.\rho \circ \beta v \sigma \tau \iota \alpha\right)$ ). Simply, "of those who believe while in the condition of uncircumcision."

Rom 4:12
The father of circumcision ( $\pi \alpha \tau \varepsilon \rho \alpha \pi \varepsilon \rho \iota \tau о \mu \eta \varsigma)$. The accusative with $\varepsilon \iota \varsigma ~ \tau o ~ \varepsilon ı v \alpha$ to be repeated from verse 11. Lightfoot takes it to mean, not "a father of a circumcised progeny," but "a father belonging to circumcision," a less natural interpretation.

But who also walk ( $\alpha \lambda \lambda \alpha$ ка тоıৎ $\sigma \tau о \downarrow \chi$ оvбıv). The use of toıৎ here is hard to explain, for ou $\mu$ ovov and $\alpha \lambda \lambda \alpha$ к $\alpha$ both come after the preceding toıs. All the MSS. have it thus. A primitive error in a copyist is suggested by Hort who would omit the second tors. Lightfoot regards it less seriously and would repeat the second tors in the English: "To those who are, I do not say of circumcision only, but also to those who walk."
 to walk in file as in Ga 5:25; Php 3:16.

Rom 4:13
That he should be the heir of the world (то клпрогоноv autov $\varepsilon$ вva кобноv). The articular infinitive ( $\tau 0 \varepsilon เ v \alpha$ ) with the accusative of general reference in loose apposition with $\eta \varepsilon \pi \alpha \gamma \gamma^{\varepsilon} \lambda_{1} \alpha$ (the promise). But where is that promise? Not just Ge 12:7, but the whole chain of promises about his son, his descendants like the stars in heaven, the Messiah and the blessing to the world through him. In these verses (13-17) Paul employs (Sanday and Headlam) the keywords of his gospel (faith, promise, grace) and arrays them against the current Jewish theology (law, works, merit).

Rom 4:14
Be heirs ( $\kappa \lambda \eta \rho о v о \mu о$ ). No predicate in the Greek ( $\varepsilon เ \sigma ı v)$. See on Ga 4:1 . If legalists are heirs of the Messianic promise to Abraham (condition of first class, assumed as true for argument's sake), the faith is emptied of all meaning ( $\kappa \kappa \varepsilon v \omega \tau \alpha$, perfect passive indicative of $\kappa \varepsilon v \circ \omega$ ) and the promise to Abraham is made permanently idle ( $\kappa \alpha \tau \eta \rho \gamma \eta \tau \alpha)$.

Rom 4:15
Worketh wrath ( $o \rho \gamma \eta \nu \kappa \alpha \tau \varepsilon \rho \gamma \alpha \zeta \varepsilon \tau \alpha$ ). Because of disobedience to it.
Neither is there transgression (ov $\delta \pi \pi \alpha \rho \alpha \beta \alpha \sigma \iota)$ ). There is no responsibility for the violation of a non-existent law.

Rom 4:16
Of faith ( $\varepsilon \kappa \pi \iota \sigma \tau \varepsilon \omega \varsigma$ ). As the source.
According to grace ( $\kappa \alpha \tau \alpha \chi \alpha \rho \nu \nu$ ). As the pattern.
To the end that ( $\varepsilon เ \varsigma ~$ to $\varepsilon เ v \alpha$ ). Purpose again as in 11.
Sure ( $\beta \varepsilon \beta \alpha \iota \alpha v$ ). Stable, fast, firm. Old adjective from $\beta \alpha \iota v \omega$, to walk.
Not to that only which is of the law ( $o v \tau \omega \varepsilon \kappa$ тov vouov $\mu \circ v o v$ ). Another instance where $\mu$ ovov (see verse 12) seems in the wrong place. Normally the order would be, ov $\mu$ оvov $\tau \omega \varepsilon \kappa$ тov vo $\mu \circ v, \alpha \lambda \lambda \alpha$ ка кт $\lambda$.

Rom 4:17
A father of many nations ( $\pi \alpha \tau \varepsilon \rho \alpha \pi о \lambda \lambda \omega v \varepsilon \theta v \omega v$ ). Quotation from Ge 17:5. Only true in the sense of spiritual children as already explained, father of believers in God.

Before him whom he believed even God (катєvavт ov $\varepsilon \pi เ \sigma \tau \varepsilon \cup \sigma \varepsilon v$ Өzov). Incorporation of antecedent into the relative clause and attraction of the relative $\omega$ into ov. See Mr 11:2 for катєvavt, "right in front of."

Calleth the things that are not as though they were ( $\kappa \alpha \lambda о \cup \nu \tau \circ \varsigma \tau \alpha \mu \eta \quad \nu \tau \tau \omega \varsigma \quad \sigma \tau \alpha)$. "Summons the non-existing as existing." Abraham's body was old and decrepit. God rejuvenated him and Sarah (Heb 11:19).

Rom 4:18
In hope believed against hope ( $\pi \alpha \rho^{\prime} \varepsilon \lambda \pi \iota \delta \alpha \varepsilon \pi^{\prime} \varepsilon \lambda \pi \iota \delta \varepsilon \pi \iota \sigma \tau \varepsilon v \sigma \varepsilon v$ ). "Past hope in (upon) hope he trusted." Graphic picture.

To the end that he might become ( $\varepsilon \iota \varsigma ~ \tau о ~ \gamma \varepsilon v \varepsilon \sigma \theta \alpha \alpha \nu \tau o v$ ). Purpose clause again with $\varepsilon \iota \varsigma$ to and the infinitive as in verses 11-16.

Rom 4:19
Without being weakened in faith ( $\mu \eta \alpha \sigma \theta \varepsilon \nu \eta \sigma \alpha \varsigma \tau \eta \pi \iota \sigma \tau \varepsilon$ ). "Not becoming weak in faith." Ingressive first aorist active participle with negative $\mu \eta$.

Now as good as dead ( $\eta \delta \eta v \varepsilon v \varepsilon \kappa \rho \omega \mu \varepsilon v o v$ ). Perfect passive participle of $v \varepsilon \kappa \rho o \omega$, "now already dead." B omits $\eta \delta \eta$. He was, he knew, too old to become father of a child.

About ( $\pi 0 v$ ). The addition of $\pi \sigma v$ (somewhere, about) "qualifies the exactness of the preceding numeral" (Vaughan). The first promise of a son to Abraham and Sarah came (Ge 15:3f. ) before the birth of Ishmael ( 86 when Ishmael was born). The second promise came when Abraham was 99 years old (Ge 17:1), calling himself 100 (Ge 17:17).

Rom 4:20
He wavered not through unbelief (ov $\delta \iota \varepsilon \kappa \rho \theta \eta \tau \eta a \pi \iota \sigma \tau \iota \alpha)$. First aorist passive indicative of old and common verb $\delta \iota \alpha \kappa \iota \nu \omega$, to separate, to distinguish between, to decide between, to desert, to dispute, to be divided in one's own mind. This last sense occurs here as in Mt 21:22; Mr 11:23; Ro 14:23; Jas 1:6. "He was not divided in his mind by unbelief" (instrumental case).

Waxed strong through faith $(\varepsilon v \varepsilon \delta v v a \mu \omega \theta \eta \tau \eta \pi / \sigma \tau \varepsilon)$. First aorist passive again of $\varepsilon v \delta v v a \mu \circ \omega$, late word to empower, to put power in, in LXX and Paul and Ac 9:22 .

Rom 4:21
Being fully assured ( $\pi \lambda \eta \rho о \varphi о \rho \eta \theta \varepsilon ı \varsigma$ ). First aorist passive participle of $\pi \lambda \eta \rho о \varphi о \rho \varepsilon \omega$, from $\pi \lambda \eta \rho о \varphi о \rho о \varsigma$ and this from $\pi \lambda \eta \rho \eta \varsigma$ and $\varphi \varepsilon \rho \omega$, to bear or bring full (full measure), to settle fully. Late word, first in LXX but frequent in papyri in sense of finishing off or paying off. See on Lu 1:1; Ro 14:5.

What he had promised (o $\varepsilon \pi \eta \gamma \gamma \varepsilon \lambda \tau \alpha$ ). Perfect middle indicative of $\varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \lambda o \mu \alpha$, to promise, retained in indirect discourse according to usual Greek idiom.

He was able ( $\delta v v a \tau o \varsigma \varepsilon \sigma \tau \iota v$ ). Present active indicative retained in indirect discourse. The verbal adjective $\delta v v a \tau o \varsigma$ with $\varepsilon \sigma \tau \iota v$ is here used in sense of the verb $\delta v v a \tau \alpha$ (Lu 14:31; Ac 11:17).

Rom 4:23
That (o $\tau$ ). Either recitative or declarative o $\tau$. It makes sense either way.
Rom 4:24

Him that raised up Jesus ( $\tau 0 v \varepsilon \gamma \varepsilon \iota \rho a v \tau \alpha$ I $\eta \sigma o v v$ ). First aorist active articular participle of $\varepsilon \gamma \varepsilon \iota \rho \omega$, to raise up. The fact of the Resurrection of Jesus is central in Paul's gospel (1Co 15:4ff. ).

Rom 4:25
For our justification ( $\delta \iota \alpha \tau \eta \nu \delta \iota \kappa \alpha \iota \omega \sigma \iota \nu \eta \mu \omega \nu$ ). The first clause ( $\pi \alpha \rho \varepsilon \delta \delta \theta \eta \delta \iota \alpha \tau \alpha$ $\pi \alpha \rho \alpha \pi \tau \omega \mu \alpha \tau \alpha)$ is from Isa 53:12. The first $\delta ı \alpha$ with $\pi \alpha \rho \alpha \pi \tau \omega \mu \alpha \tau \alpha$ is probably retrospective, though it will make sense as prospective (to make atonement for our transgressions). The second $\delta \iota \alpha$ is quite clearly prospective with a view to our justification. Paul does not mean to separate the resurrection from the death of Christ in the work of atonement, but simply to show that the resurrection is at one with the death on the Cross in proof of Christ's claims.

## Romans 5

Rom 5:1
Being therefore justified by faith ( $\delta \iota \kappa \alpha \iota \omega \theta \varepsilon \nu \tau \varepsilon \varsigma$ ouv $\varepsilon \kappa \pi \iota \sigma \tau \varepsilon \omega \varsigma$ ). First aorist passive participle of $\delta ı \kappa \alpha \omega \omega$, to set right and expressing antecedent action to the verb $\varepsilon \chi \omega \mu \varepsilon v$. The ouv refers to the preceding conclusive argument (chapters 1 to 4 ) that this is done by faith.

Let us have peace with God ( $\varepsilon ı \eta \nu \eta \nu \varepsilon \chi \omega \mu \varepsilon \nu \pi \rho \circ \varsigma \operatorname{\tau ov} \theta \varepsilon o v)$. This is the correct text beyond a doubt, the present active subjunctive, not $\varepsilon \chi \circ \mu \varepsilon v$ (present active indicative) of the Textus Receptus which even the American Standard Bible accepts. It is curious how perverse many real scholars have been on this word and phrase here. Godet, for instance. Vincent says that "it is difficult if not impossible to explain it." One has only to observe the force of the tense to see Paul's meaning clearly. The mode is the volitive subjunctive and the present tense expresses linear action and so does not mean "make peace" as the ingressive aorist subjunctive $\varepsilon \rho \eta \eta \eta \nu \sigma \chi \omega \mu \varepsilon v$ would mean. A good example of $\sigma \chi \omega \mu \varepsilon v$ occurs in Mt 21:38 ( $\sigma \chi \omega \mu \varepsilon \nu \tau \eta v \kappa \lambda \eta \rho \circ v$ оцıav avtov) where it means: "Let us get hold of his inheritance." Here $\varepsilon \iota \eta \nu \eta \nu \varepsilon \chi \omega \mu \varepsilon \nu$ can only mean: "Let us enjoy peace with God" or "Let us retain peace with God." We have in Ac 9:31 عıXev $\varepsilon \iota \rho \eta \nu \eta v$ (imperfect and so linear), the church "enjoyed peace," not "made peace." The preceding justification ( $\delta \ldots \alpha \omega \omega \theta \varepsilon \nu \tau \varepsilon \varsigma)$ "made peace with God." Observe $\pi \rho \circ \varsigma$ (face to face) with $\operatorname{\tau ov} \theta \varepsilon o v$ and $\delta \iota \alpha$ (intermediate agent) with tov кvpıov.

Rom 5:2
We have had ( $\varepsilon \sigma \chi \eta \kappa \alpha \mu \varepsilon v$ ). Perfect active indicative of $\varepsilon \chi \omega$ (same verb as $\varepsilon \chi \omega \mu \varepsilon v$ ), still have it.

Our access ( $\tau \varepsilon v \pi \rho \circ \sigma \alpha \gamma \omega \gamma \eta v$ ). Old word from $\pi \rho \circ \sigma \alpha \gamma \omega$, to bring to, to introduce. Hence "introduction," "approach." Elsewhere in N.T. only Eph 2:18; 3:12 .

Wherein we stand ( $\varepsilon v \eta \varepsilon \sigma \tau \eta \kappa \alpha \mu \varepsilon v$ ). Perfect active (intransitive) indicative of $\iota \sigma \tau \eta \mu$. Grace is here present as a field into which we have been introduced and where we stand and we should enjoy all the privileges of this grace about us.

Let us rejoice ( $\kappa \alpha \cup \chi \omega \mu \varepsilon \theta \alpha$ ). "Let us exult." Present middle subjunctive (volitive) because $\varepsilon \chi \omega \mu \varepsilon v$ is accepted as correct. The exhortation is that we keep on enjoying peace with God and keep on exulting in hope of the glory of God.

Rom 5:3
But let us also rejoice in our tribulations ( $\alpha \lambda \lambda \alpha \kappa \alpha \kappa \alpha v \chi \omega \mu \varepsilon \theta \alpha \varepsilon v \tau \alpha \iota \varphi \theta \lambda \iota \varepsilon \varepsilon \sigma เ v)$. Present middle subjunctive of same verb as in verse $2 . \operatorname{K\alpha u\chi \omega \mu \alpha \text {ismorethan"rejoice,"}}$ rather "glory," "exult." These three volitive subjunctives ( $\varepsilon \chi \omega \mu \varepsilon v, ~ \kappa \alpha u \chi \omega \mu \varepsilon \theta a$, twice) hold up the high ideal for the Christian after, and because of, his being set right with God. It is one thing to submit to or endure tribulations without complaint, but it is another to find ground of glorying in the midst of them as Paul exhorts here.

Rom 5:4

Knowing ( $\varepsilon<\delta o \tau \varepsilon \varsigma)$. Second perfect participle of $\varepsilon ו \delta o v(o t \delta \alpha)$, giving the reason for the previous exhortation to glory in tribulations. He gives a linked chain, one linking to the other (tribulation $\theta \lambda \iota \psi \iota \varsigma$, patience $v \pi о \mu о v \eta$, experience $\delta$ окı $\mu$, hope $\varepsilon \lambda \pi \iota \varsigma)$ running into verse 5. On бокци , see 2Со 2:9.

## Rom 5:5

Hath been shed abroad ( $\varepsilon \kappa \kappa \varepsilon \chi \cup \tau \alpha)$. Perfect passive indicative of $\varepsilon \kappa \chi \varepsilon \omega$, to pour out. "Has been poured out" in our hearts.

Rom 5:6
For ( $\varepsilon \tau \gamma \alpha \rho$ ). So most documents, but B reads $\varepsilon \gamma \varepsilon$ which Westcott and Hort use in place of $\gamma \alpha \rho$.

While we were yet weak (ov $(\omega v \eta \mu \omega \nu \alpha \sigma \theta \varepsilon v \omega \nu \varepsilon \tau)$. Genitive absolute. The second $\varepsilon \tau$ (yet) here probably gave rise to the confusion of text over $\varepsilon \tau \gamma \alpha \rho$ above.

In due season (ката каıроv). Christ came into the world at the proper time, the fulness of the time (Ga 4:4; Eph 1:10; Tit 1:3).

I or the ungodly (v $v \varepsilon \rho \alpha \sigma \varepsilon \beta \omega v$ ). In behalf, instead of. See about $v \pi \varepsilon \rho$ on Ga 3:13 and also verse 7 here.

Rom 5:7
Scarcely ( $\mu \mathrm{o} \lambda ı \varsigma$ ). Common adverb from $\mu \mathrm{\lambda} \lambda \mathrm{o}$, toil. See on Ac 14:18. As between $\delta ı \kappa \alpha \iota \varsigma$, righteous, and $\alpha \gamma \alpha \theta$ os, good, Lightfoot notes "all the difference in the world" which he shows by quotations from Plato and Christian writers, a difference of sympathy mainly, the $\delta$ ıкаıо man being "absolutely without sympathy" while the $\alpha \gamma \alpha \theta$ oc man "is beneficent and kind."

Would even dare ( $\kappa \alpha \tau о \lambda \mu \alpha$ ). Present active indicative of $\tau 0 \lambda \mu \alpha \omega$, to have courage. "Even dares to." Even so in the case of the kindly sympathetic man courage is called for to make the supreme sacrifice.

Perhaps ( $\tau \alpha \chi \alpha$ ). Common adverb (perhaps instrumental case) from $\tau \alpha \chi u \varsigma$ (swift). Only here in N.T.

Rom 5:8
His own love ( $\tau \eta v$ عautov $\alpha \gamma \alpha \pi \eta v$ ). See Joh 3:16 as the best comment here.
While we were yet sinners ( $\varepsilon \tau \alpha \mu \alpha \rho \tau \omega \lambda \omega v \nu v \tau \omega v$ ). Genitive absolute again. Not because we were Jews or Greeks, rich or poor, righteous or good, but plain sinners. Cf. Lu 18:13, the plea of the publican, " $\mu$ о $\tau \omega \alpha \mu \alpha \tau \omega \lambda \omega$."

Rom 5:9
Much more then ( $\pi 0 \lambda \lambda \omega$ ovv $\mu \alpha \lambda \lambda o v$ ). Argument from the greater to the less. The great thing is the justification in Christ's blood. The final salvation ( $\sigma \omega \theta \eta \sigma o \mu \varepsilon \theta \alpha$, future passive indicative) is less of a mystery.

Rom 5:10

We were reconciled to God ( $\kappa \alpha \tau \eta \lambda \lambda \alpha \gamma \eta \mu \varepsilon \nu \tau \omega \theta \varepsilon \omega)$. Second aorist passive indicative of кат $\alpha \lambda \lambda \alpha \sigma \sigma \omega$ for which great Pauline word see on $2 \mathrm{Co} 5: 18 \mathrm{f}$. The condition is the first class. Paul does not conceive it as his or our task to reconcile God to us. God has attended to that himself (Ro 3:25f. ). We become reconciled to God by means of the death of God's Son. "Much more" again we shall be saved "by his life" ( $\varepsilon \nu \tau \eta \zeta \omega \eta$ avtov). "In his life," for he does live, "ever living to intercede for them" (Heb 7:25).

Rom 5:11
But also glorying in God ( $\alpha \lambda \lambda \alpha \kappa \alpha \kappa \alpha u \chi \omega \mu \varepsilon v o \varepsilon v \tau \omega \theta \varepsilon \omega$ ). Basis of all the exultation above (verses 1-5).

Through whom we have now received the reconciliation ( $\delta$ ov $v v \nu \tau \eta \nu \kappa \alpha \tau \alpha \lambda \lambda \alpha \gamma \eta \nu$ $\varepsilon \lambda \alpha \beta o \mu \varepsilon v)$. Second aorist active indicative of $\lambda \alpha \mu \beta \alpha v \omega$, looked at as a past realization, "now" $(v v v)$ in contrast with the future consummation and a sure pledge and guarantee of it.

Rom 5:12
Therefore ( $\delta$ ı $\alpha$ тovto). "For this reason." What reason? Probably the argument made in verses 1-11, assuming our justification and urging exultant joy in Christ because of the present reconciliation by Christ's death and the certainty of future final salvation by his life.

As through one man ( $\omega \sigma \pi \varepsilon \rho \delta \iota^{\prime} \varepsilon v o c \alpha v \theta \rho \omega \pi \sigma v$ ). Paul begins a comparison between the effects of Adam's sin and the effects of the redemptive work of Christ, but he does not give the second member of the comparison. Instead of that he discusses some problems about $\sin$ and death and starts over again in verse 15 . The general point is plain that the effects of Adam's sin are transmitted to his descendants, though he does not say how it was done whether by the natural or the federal headship of Adam. It is important to note that Paul does not say that the whole race receives the full benefit of Christ's atoning death, but only those who do. Christ is the head of all believers as Adam is the head of the race. In this sense Adam "is a figure of him that was to come."
 $\sin$ and represented as coming from the outside into the world of humanity. Paul does not discuss the origin of evil beyond this fact. There are some today who deny the fact of sin at all and who call it merely "an error of mortal mind" (a notion) while others regard it as merely an animal inheritance devoid of ethical quality.

And so death passed unto all men ( $\kappa \alpha$ оטт $\omega \varsigma \varepsilon \iota \varsigma \pi \alpha \nu \tau \alpha \varsigma ~ \alpha v \theta \rho \omega \pi о \cup \varsigma \delta ı \eta \lambda \theta \varepsilon v$ ). Note use of $\delta เ \varepsilon \rho \chi \circ \mu \alpha$ rather than $\varepsilon ו \sigma \varepsilon \rho \chi \circ \mu \alpha$, just before, second aorist active indicative in both instances. By "death" in Ge 2:17; 3:19 physical death is meant, but in verses 17,21 eternal death is Paul's idea and that lurks constantly behind physical death with Paul.

For that all sinned ( $\varepsilon \varphi^{\prime} \omega \pi \alpha \nu \tau \varepsilon \varsigma \eta \mu \alpha \rho \tau o v$ ). Constative (summary) aorist active indicative of $\alpha \mu \alpha \rho \tau \alpha \nu \omega$, gathering up in this one tense the history of the race (committed sin). The transmission from Adam became facts of experience. In the old Greek $\varepsilon \varphi^{\prime} \omega$ usually meant "on condition that," but "because" in N.T. (Robertson, Grammar, p. 963).

## Rom 5:13

Until the law ( $\alpha \chi \rho$ vouov). Until the Mosaic law. Sin was there before the Mosaic law, for the Jews were like Gentiles who had the law of reason and conscience ( $2: 12-16$ ), but the coming of the law increased their responsibility and their guilt ( $2: 9$ ).

Sin is not imputed ( $\alpha \mu \alpha \rho \tau \iota \alpha \delta \varepsilon$ ovк $\varepsilon \lambda \lambda$ оүعוт $)$. Present passive indicative of late verb $\varepsilon \lambda \lambda o \gamma \alpha \omega(-\varepsilon \omega)$ from $\varepsilon v$ and $\lambda o \gamma o \varsigma$, to put down in the ledger to one's account, examples in inscription and papyri.

When there is no law ( $\mu \eta$ ov $\tau о \varsigma$ vouov). Genitive absolute, no law of any kind, he means. There was law before the Mosaic law. But what about infants and idiots in case of death? Do they have responsibility? Surely not. The sinful nature which they inherit is met by Christ's atoning death and grace. No longer do men speak of "elect infants."

Rom 5:14
Even over them that had not sinned after the likeness of Adam's transgression ( $\kappa \alpha$ $\varepsilon \pi \tau$ тоия $\mu \eta \alpha \mu \alpha \rho \tau \eta \sigma \alpha \nu \tau \alpha \varsigma \varepsilon \pi \tau \omega$ о $\mu о เ \omega \mu \alpha \tau \tau \eta \varsigma \pi \alpha \rho \alpha \beta \alpha \sigma \varepsilon \omega \varsigma$ A $\delta \alpha \mu$ ). Adam violated an express command of God and Moses gave the law of God clearly. And yet sin and death followed all from Adam on till Moses, showing clearly that the sin of Adam brought terrible consequences upon the race. Death has come upon infants and idiots also as a result of sin, but one understands Paul to mean that they are not held responsible by the law of conscience.

A figure (титос). See on Ac 7:43; 1Th 1:7; 2Th 3:9; 1Co 10:6 for this word. Adam is a type of Christ in holding a relation to those affected by the headship in each case, but the parallel is not precise as Paul shows.

Rom 5:15
But not as the trespass ( $\alpha \lambda \lambda^{\prime}$ ov $\omega \omega$ ). It is more contrast than parallel: "the trespass" ( $\tau \mathrm{o} \pi \alpha \rho \alpha \pi \tau \omega \mu \alpha$, the slip, fall to one side) over against the free gift ( $\tau 0 \chi \alpha \rho \iota \sigma \mu \alpha$, of grace $\chi \propto \rho ı$ ).

Much more ( $\pi \mathrm{o} \lambda \lambda \omega \mu \mathrm{a} \lambda \lambda \mathrm{ov}$ ). Another a fortiori argument. Why so? As a God of love he delights
much more in showing mercy and pardon than in giving just punishment (Lightfoot). The gift surpasses the sin. It is not necessary to Paul's argument to make "the many" in each case correspond, one relates to Adam, the other to Christ.

Rom 5:16
Through one that sinned ( $\delta \iota^{\prime}$ हvoc a $\left.\mu \alpha \rho \tau \eta \sigma \alpha v \tau о \varsigma\right)$ ) "Through one having sinned." That is Adam. Another contrast, difference in source ( $\varepsilon \kappa$ ).

Of one ( $\varepsilon \xi \varepsilon v o \varsigma)$. Supply $\pi \alpha \rho \alpha \pi \tau \omega \mu \alpha \tau o \varsigma, ~ A d a m ' s ~ o n e ~ t r a n s g r e s s i o n . ~$
Of many trespasses ( $\varepsilon \kappa \pi \sigma \lambda \lambda \omega v \pi \alpha \rho \alpha \pi \tau \omega \mu \alpha \tau \omega v$ ). The gift by Christ grew out of manifold sins by Adam's progeny.

Justification ( $\delta \iota \kappa \alpha \iota \omega \mu)$. Act of righteousness, result, ordinance (1:32; 2:26; 8:4 ), righteous deed (5:18), verdict as here (acquittal).

## Rom 5:17

Much more ( $\pi \mathrm{o} \lambda \lambda \omega \mu \alpha \lambda \lambda \mathrm{ov}$ ). Argument a fortiori again. Condition of first class assumed to be true. Note balanced words in the contrast (transgression $\pi \alpha \rho \alpha \pi \tau \omega \mu \alpha \tau$, grace $\chi \alpha \rho ı \tau o 弓 ;$ death $\theta$ avato $\varsigma$, life $\zeta \omega \eta$; the one or

Adam tov $\varepsilon$ voc, the one
Jesus Christ ; reign $\beta a \sigma i \lambda \varepsilon v \omega$ in both).
Rom 5:18
So then ( $\alpha \rho \alpha o u v$ ). Conclusion of the argument. Cf. 7:3,25; 8:12, etc. Paul resumes the parallel between Adam and Christ begun in verse 12 and interrupted by explanation (13f. ) and contrast ( 15-17).

Through one trespass ( $\left.\delta \iota^{\prime} \varepsilon v o \varsigma ~ \pi \alpha \rho \alpha \pi \tau \omega \mu \alpha \tau o \varsigma\right)$. That of Adam.
Through one act of righteousness ( $\delta \iota^{\prime} \varepsilon v o \varsigma \delta ı \kappa \alpha ı \omega \mu \alpha \tau о$ ). That of Christ. The first "unto all men" ( $\varepsilon \varsigma \varsigma \pi \alpha v \tau a \varsigma ~ \alpha v \theta \rho \omega \pi$ оиৎ) as in verse 12 , the second as in verse 17 "they that receive, etc."

Rom 5:19
Here again we have "the one" ( $\operatorname{tov}$ عvoc) with both Adam and Christ, but "disobedience" (ларакопऽ, for which see 2Co 10:6) contrasted with "obedience" (טлакопऽ), the same verb $\kappa \alpha \theta เ \sigma \tau \eta \mu$, old verb, to set down, to render, to constitute ( $\kappa \alpha \tau \varepsilon \sigma \tau \alpha \theta \eta \sigma \alpha \nu$, first aorist passive indicative, катабтаӨๆбovта, future passive), and "the many" (о $\pi о \lambda \lambda o$ ) in both cases (but with different meaning as with "all men" above).

Rom 5:20
Came in beside ( $\pi \alpha \rho \varepsilon \iota \sigma \eta \lambda \theta \varepsilon v$ ). Second aorist active indicative of double compound $\pi \alpha \rho \varepsilon \iota \sigma \varepsilon \rho \chi о \mu \alpha$, late verb, in N.T. only here and Ga $2: 4$ which see. See also $\varepsilon ו \sigma \eta \lambda \theta \varepsilon v$ in verse 12. The Mosaic law came into this state of things, in between Adam and Christ.

That the trespass might abound (iva $\pi \lambda \varepsilon \sigma v a \sigma \eta ~ \tau o ~ \pi \alpha \rho \alpha \pi \tau \tau \omega \mu \alpha)$ ). It is usual to explain iva here as final, as God's ultimate purpose. So Denney who refers to Ga 3:19ff.; Ro 7:7f . But Chrysostom explains iva here as $\varepsilon \kappa \beta \alpha \sigma \iota \varsigma$ (result). This is a proper use of iva in the Koine as we have seen. If we take it so here, the meaning is "so that the trespass abounded" (aorist active subjunctive of $\pi \lambda \varepsilon o v a \sigma \omega$, late verb, see on $2 \mathrm{Th} 1: 3 ; 2 \mathrm{Co} 8: 15$ ). This was the actual effect of the Mosaic law for the Jews, the necessary result of all prohibitions.

Did abound more exceedingly ( $\cup \pi \varepsilon \rho \varepsilon \pi \varepsilon \rho \iota \sigma \sigma \varepsilon \cup \sigma \varepsilon v$ ). First aorist active indicative of vтєртєрıббєvш. Late verb, in N.T. only here and 2Co 7:4 which see. A strong word. If $\pi \lambda \varepsilon o v a \zeta \omega$ is comparative ( $\pi \lambda \varepsilon \sigma v$ ) $\pi \varepsilon \rho \circ \sigma \sigma \varepsilon v \omega$ is superlative (Lightfoot) and then $\nu \pi \varepsilon \rho \pi \varepsilon \rho\llcorner\sigma \sigma \varepsilon v \omega$ goes the superlative one better. See $v \pi \varepsilon \rho \pi \lambda \varepsilon o v a \zeta \omega$ in 1Ti 1:14. The flood of grace surpassed the flood of sin, great as that was (and is).

Rom 5:21
That--even so grace might reign (ıv $\alpha-$-оvтоৎ ка $\eta \chi \alpha \rho \iota \varsigma \beta \alpha \sigma ı \lambda \varepsilon v \sigma \eta)$. Final iva here, the purpose of God and the goal for us through Christ. Lightfoot notes the force of the
aorist indicative ( $\varepsilon \beta a \sigma \iota \lambda \varepsilon v \sigma \varepsilon v$, established its throne) and the aorist subjunctive ( $\beta a \sigma \iota \lambda \varepsilon v \sigma \eta$, might establish its throne), the ingressive aorist both times. "This full rhetorical close has almost the value of a doxology" (Denney).

## Romans 6

Rom 6:1
What shall we say then? ( $\tau$ ouv $\varepsilon \rho o v \mu \varepsilon \nu$ ?). "A debater's phrase" (Morison). Yes, and an echo of the rabbinical method of question and answer, but also an expression of exultant victory of grace versus sin. But Paul sees the possible perversion of this glorious grace.

Shall we continue in $\sin$ ? ( $\varepsilon \pi / \mu \varepsilon v \omega \mu \varepsilon \nu \tau \eta \quad \alpha \mu \alpha \rho \tau \iota \alpha$ ?). Present active deliberative subjunctive of $\varepsilon \pi \mu \mu \varepsilon \nu \omega$, old verb to tarry as in Ephesus (1Co 16:8) with locative case. The practice of $\sin$ as a habit (present tense) is here raised.

That grace may abound (ıva $\eta \chi \alpha \rho ı \varsigma \pi \tau \varepsilon o v a \sigma \eta)$. Final clause with ingressive aorist subjunctive, to set free the superfluity of grace alluded to like putting money in circulation. Horrible thought ( $\mu \eta \gamma \varepsilon v o \iota \tau o$ ) and yet Paul faced it. There are occasionally so-called pietists who actually think that God's pardon gives them liberty to sin without penalty (cf. the sale of indulgences that stirred Martin Luther).

Rom 6:2
Died to $\sin (\alpha \pi \varepsilon \theta \alpha v o \mu \varepsilon v \tau \eta ~ \alpha \mu \alpha \rho \tau ı \alpha)$. Second aorist active of $\alpha \pi \circ \theta v \eta \sigma \kappa \omega$ and the dative case. When we surrendered to Christ and took him as Lord and Saviour. Qualitative relative (otiveৎ, we the very ones who).

How ( $\pi \omega \varsigma$ ). Rhetorical question.
Rom 6:3
Were baptized into Christ ( $\varepsilon \beta \alpha \pi \tau \iota \sigma \theta \eta \mu \varepsilon v \varepsilon \iota \varsigma$ Xpıбтov). First aorist passive indicative of $\beta a \pi \tau \iota \zeta \omega$. Better, "were baptized unto Christ or in Christ." The translation "into" makes Paul say that the union with Christ was brought to pass by means of baptism, which is not his idea, for Paul was not a sacramentarian. Ets is at bottom the same word as $\varepsilon v$. Baptism is the public proclamation of one's inward spiritual relation to Christ attained before the baptism. See on Ga 3:27 where it is like putting on an outward garment or uniform.
 death," which relation Paul proceeds to explain by the symbolism of the ordinance.

Rom 6:4
We were buried therefore with him by means of baptism unto death ( $\sigma \cup v \varepsilon \tau \alpha \varphi \eta \mu \varepsilon v$
 $\sigma u v \theta a \pi \tau \omega$, old verb to bury together with, in N.T. only here and Col 2:12. With associative instrumental case ( $\alpha \cup \tau \omega$ ) and "by means of baptism unto death" as in verse 3 .

In newness of life ( $\varepsilon v$ кaıvorn $\zeta \omega \eta \varsigma$ ). The picture in baptism points two ways, backwards to Christ's death and burial and to our death to sin (verse 1), forwards to Christ's resurrection from the dead and to our new life pledged by the coming out of the watery grave to walk on the other side of the baptismal grave (F. B. Meyer). There is the further picture of our own resurrection from the grave. It is a tragedy that Paul's majestic picture here has
been so blurred by controversy that some refuse to see it. It should be said also that a symbol is not the reality, but the picture of the reality.

## Rom 6:5

For if we have become united with him by the likeness of his death ( $\varepsilon \gamma \alpha \rho \sigma \cup \mu \varphi \cup \tau о$
 true. $\Sigma \nu \mu \varphi \nu \tau o$ is old verbal adjective from $\sigma \nu \mu \varphi \nu \omega$, to grow together. Baptism as a picture of death and burial symbolizes our likeness to Christ in his death.

We shall be also united in the likeness of his resurrection ( $\alpha \lambda \lambda \alpha$ ка $\tau \eta \varsigma \alpha v a \sigma \tau \alpha \sigma \varepsilon \omega \varsigma$ $\varepsilon \sigma \circ \mu \varepsilon \theta \alpha)$. The conclusion to the previous condition introduced by $\alpha \lambda \lambda \alpha \kappa \alpha$ as often and $\tau$ о $\mu \circ \boldsymbol{\omega} \mu \mu \tau$ (in the likeness) must be understood before $\tau \eta \varsigma \alpha v a \sigma \tau \alpha \sigma \varepsilon \omega \varsigma$ (of his resurrection). Baptism is a picture of the past and of the present and a prophecy of the future, the matchless preacher of the new life in Christ.

Rom 6:6
Our old man (o $\pi \alpha \lambda \alpha ı \rho \varsigma \eta \mu \omega \nu \alpha v \theta \rho \omega \pi o \varsigma)$. Only in Paul (here, Col 3:9; Eph 4:22 ).
Was crucified with him ( $\sigma v v \varepsilon \sigma \tau \alpha v \rho \omega \theta \eta$ ). See on $\mathrm{Ga} 2: 19$ for this boldly picturesque word. This took place not at baptism, but only pictured there. It took place when "we died to $\sin$ " (verse 1).

The body of $\sin (\tau 0 \sigma \omega \mu \alpha \tau \eta \varsigma \alpha \mu \alpha \rho \tau \iota \alpha \varsigma)$. "The body of which sin has taken possession" (Sanday and Headlam), the body marked by sin.

That so we should no longer be in bondage to sin ( $\tau \circ 0 \mu \eta \kappa \varepsilon \tau \delta o u \lambda \varepsilon v \varepsilon \iota v \eta \mu \varsigma \tau \eta$ $\alpha \mu \alpha \rho \tau \iota \alpha)$. Purpose clause with $\tau o v$ and the present active infinitive of $\delta o v \lambda \varepsilon v \omega$, continue serving $\sin$ (as slaves). Adds "slavery" to living in sin (verse 2).

Rom 6:7
Is justified ( $\delta \varepsilon \delta \iota \kappa \alpha \iota \omega \tau \alpha$ ). Perfect passive indicative of $\delta \iota \kappa \alpha \iota \sigma \omega$, stands justified, set free from, adding this great word to death and life of verses 1,2 .

Rom 6:8
With Christ ( $\sigma \cup \vee \mathrm{X} \rho \iota \tau \tau \omega$ ). As pictured by baptism, the crucifixion with Christ of verse 6.

Rom 6:9
Dieth no more (ouкะт $\alpha \pi \circ \theta v \eta \sigma \kappa \varepsilon$ ). "Christ's particular death occurs but once" (Shedd). See Heb 10:10 . A complete refutation of the "sacrificial" character of the "mass."

Rom 6:10
The death that he died (o $\alpha \pi \varepsilon \theta a v \varepsilon v$ ). Neuter relative, cognative accusative with a $\pi$ 民 $\alpha v \varepsilon v$.

Once ( $\varepsilon \varphi \alpha \pi \alpha \xi$ ). Once and once only (Heb 9:26f. ), not $\pi о \tau \varepsilon$ (once upon a time).
The life that he liveth ( $o \zeta \eta$ ). Cognate accusative of the relative.
Rom 6:11

Reckon ye also yourselves ( $\kappa \alpha$ v $\mu \varepsilon \iota \varsigma ~ \lambda о ү \iota \zeta \varepsilon \sigma \theta \varepsilon$ ). Direct middle imperative of $\lambda о \gamma \iota \zeta о \mu \alpha$ and complete proof that Paul does not mean that baptism makes one dead to sin and alive to God. That is a spiritual operation "in Christ Jesus" and only pictured by baptism. This is a plea to live up to the ideal of the baptized life.

Rom 6:12
Reign ( $\beta a \sigma \iota \lambda \varepsilon v \varepsilon \tau \omega)$. Present active imperative, "let not sin continue to reign" as it did once ( $5: 12$ ).

Mortal ( $\theta v \eta \tau o$ ). Verbal adjective from $\theta v \eta \sigma \kappa \omega$, subject to death. The reign of $\sin$ is over with you. Self-indulgence is inconsistent with trust in the vicarious atonement.

That ye should obey ( $\varepsilon \iota \varsigma ~ \tau о ~ v \pi \alpha к о v \varepsilon ı v) . ~ W i t h ~ a ~ v i e w ~ t o ~ o b e y i n g . ~$
Rom 6:13
Neither present ( $\mu \eta \delta \varepsilon \pi \alpha \rho \iota \sigma \tau \alpha v \varepsilon \tau \varepsilon$ ). Present active imperative in prohibition of $\pi \alpha \rho \iota \sigma \tau \alpha \omega \omega$, late form of $\pi \alpha \rho \iota \sigma \tau \eta \mu$, to place beside. Stop presenting your members or do not have the habit of doing so, "do not go on putting your members to sin as weapons of unrighteousness."

Instruments (o $\pi \lambda \alpha$ ). Old word for tools of any kind for shop or war (Joh 18:3; 2Co 6:7; 10:4; Ro 13:12 ). Possibly here figure of two armies arrayed against each other ( Ga 5:16-24 ), and see o $\pi \lambda \alpha \delta$ ıкаıобuvŋऽ below. The two sets of o $\pi \lambda \alpha$ clash.

But present yourselves unto God ( $\alpha \lambda \lambda \alpha$ т $\alpha \rho \alpha \sigma \tau \eta \sigma \alpha \tau \varepsilon \varepsilon \alpha \cup \tau о \nu \varsigma \tau \omega \theta \varepsilon \omega$ ). First aorist active imperative of $\pi \alpha \rho \iota \sigma \tau \eta \mu$, same verb, but different tense, do it now and completely. Our "members" ( $\mu \varepsilon \lambda \eta$ ) should be at the call of God "as alive from the dead."

Rom 6:14
Shall not have dominion ( $о$ к кирıєибє). Future active indicative of кирıєv $\omega$, old verb from кupıos, "shall not lord it over you," even if not yet wholly dead. Cf. 2Co 1:24.

Rom 6:15
What then? ( $\tau$ ovv?). Another turn in the argument about the excess of grace.
Shall we sin? ( $\alpha \mu \alpha \rho \tau \varepsilon \sigma \omega \mu \varepsilon v$ ?). First aorist active deliberative subjunctive of $\alpha \mu \alpha \rho \tau \alpha v \omega$. "Shall we commit sin" (occasional acts of $\sin$ as opposed to the life of $\sin$ as raised by $\varepsilon \pi \iota \mu \varepsilon v \omega \mu \varepsilon \nu \tau \eta \quad \alpha \mu \alpha \tau \iota \alpha$ in verse 1 )?

Because (oт). The same reason as in verse 1 and taken up from the very words in verse 14. Surely, the objector says, we may take a night off now and then and sin a little bit "since we are under grace."

Rom 6:16
 the one whom ye obey, whatever one's profession may be, traitors, spies sometimes they are called. As Paul used the figure to illustrate death to $\sin$ and resurrection to new life in Christ and not in sin, so now he uses slavery against the idea of occasional lapses into sin. Loyalty to Christ will not permit occasional crossing over to the other side to Satan's line.

## Rom 6:17

Whereas ye were $(\eta \tau \varepsilon)$. Imperfect but no "whereas" in the Greek. Paul is not grateful that they were once slaves of sin, but only that, though they once were, they turned from that state.

To that form of doctrine whereunto ye were delivered ( $\varepsilon \varsigma \varsigma$ оv $\pi \alpha \rho \varepsilon \delta о \theta \eta \tau \varepsilon \tau \cup \pi о \nu$ $\delta เ \delta a \chi \eta \varsigma)$. Incorporation of the antecedent ( $\left.\tau v \pi \frac{\pi}{} \delta \boldsymbol{\delta} \delta a \chi \eta \varsigma\right)$ into the relative clause: "to which form of doctrine ye were delivered." See on 5:14 for tutov. It is hardly proper to take "form" here to refer to Paul's gospel ( $2: 16$ ), possibly an allusion to the symbolism of baptism which was the outward sign of the separation.

Rom 6:18
Ye became servants of righteousness ( $\varepsilon \delta o u \lambda \omega \theta \eta \tau \varepsilon \tau \eta \delta \iota \kappa \alpha \iota \sigma \cup v \eta)$. First aorist passive indicative of $\delta$ ou $\lambda o \omega$, to enslave. "Ye were made slaves to righteousness." You have simply changed masters, no longer slaves of $\sin$ (set free from that tyrant), but ye are slaves of righteousness. There is no middle ground, no "no man's land" in this war.

Rom 6:19
I speak after the manner of men $(\alpha \nu \theta \rho \omega \pi \tau v o v \lambda \varepsilon \gamma \omega)$. "I speak a human word." He begs pardon for using "slaving" in connection with righteousness. But it is a good word, especially for our times when self-assertiveness and personal liberty bulk so large in modern speech. See $3: 5 ; \mathrm{Ga} 3: 15$ where he uses ката $\alpha v \theta \rho \omega \pi$ ov.

Because of the infirmity of your flesh ( $\delta \iota \alpha \tau \eta v \alpha \sigma \theta \varepsilon v \varepsilon ı \alpha \nu \tau \eta \varsigma \sigma \alpha \rho \kappa о \varsigma \nu \mu \omega v$ ). Because of defective spiritual insight largely due to moral defects also.

Servants to uncleanness ( $\delta$ ou $\alpha \alpha \tau \eta \alpha \kappa \alpha \theta \rho \sigma \iota \alpha$ ). Neuter plural form of $\delta o u \lambda o s$ to agree with $\mu \varepsilon \lambda \eta$ (members). Patently true in sexual sins, in drunkenness, and all fleshly sins, absolutely slaves like narcotic fiends.

So now (ovt $\omega \varsigma v v v$ ). Now that you are born again in Christ. Paul uses twice again the same verb $\pi \alpha \rho ı \sigma \tau \eta \mu$, to present ( $\pi \alpha \rho \varepsilon \sigma \tau \eta \sigma \alpha \tau \varepsilon, \pi \alpha \rho \alpha \sigma \tau \eta \sigma \alpha \tau \varepsilon$ ).

Servants to righteousness ( $\delta$ ou $\lambda \alpha \tau \eta \delta_{⿺ 𠃊} \alpha \circ \sigma \cup v \eta$ ). Repeats the idea of verse 18.
Unto sanctification ( $\varepsilon \varsigma \varsigma ~ \alpha \gamma \iota \alpha \sigma \mu \circ v$ ). This the goal, the blessed consummation that demands and deserves the new slavery without occasional lapses or sprees (verse 15). This late word appears only in LXX, N.T., and ecclesiastical writers so far. See on 1Th 4:3; 1Co 1:30 . Paul includes sanctification in his conception of the God-kind ( $1: 17$ ) of righteousness (both justification, 1:18-5:21 and sanctification, chapters 6-8). It is a life process of consecration, not an instantaneous act. Paul shows that we ought to be sanctified ( 6:1-7:6) and illustrates the obligation by death ( 6:1-14), by slavery ( $6: 15-23$ ), and by marriage ( 7:1-6).

Rom 6:20
Free in regard of righteousness ( $\varepsilon \lambda \varepsilon v \theta \varepsilon \rho o \tau \eta \delta \iota \kappa \alpha \iota \sigma v v \eta)$. Ye wore no collar of righteousness, but freely did as ye pleased. They were "free." Note dative case, personal relation, of $\delta$ ıкaıoбuvๆ.

## Rom 6:21

What fruit then had ye at that time? ( $\tau \imath v \alpha$ ouv карлоv $\varepsilon เ \chi \varepsilon \tau \varepsilon ~ \tau о \tau \varepsilon ?$ ). Imperfect active, used to have. A pertinent question. Ashes in their hands now. They are ashamed now of the memory of them. The end of them is death.

Rom 6:22
Ye have your fruit unto sanctification ( $\varepsilon \chi \varepsilon \tau \varepsilon \tau о v \kappa \alpha \rho \pi о v \nu \mu \omega v \varepsilon ı \varsigma ~ \alpha \gamma \iota \alpha \sigma \mu \nu)$ ). Freedom from sin and slavery to God bring permanent fruit that leads to sanctification.

And the end eternal life ( $\tau 0 \delta \varepsilon \tau \varepsilon \lambda \circ \varsigma \zeta \omega \eta \nu \alpha \iota \omega v \circ v)$ ). Note accusative case $\zeta \omega \eta \nu \alpha \omega \omega v \circ \nu$, object of $\varepsilon \chi \varepsilon \tau \varepsilon$ (ye have), though $\theta$ avatoc in contrast above is nominative.

Rom 6:23
Wages (o $\% \omega v i \alpha)$. Late Greek for wages of soldier, here of sin. See on Lu 3:14; 1Co 9:7; 2Co 11:8. Sin pays its wages in full with no cut. But eternal life is God's gift ( $\chi \alpha \rho \iota \sigma \mu \alpha$ ), not wages. Both $\theta a v a t o c$ and $\zeta \omega \eta \nu$ are
eternal ( $\alpha \omega \nu \mathrm{ov}$ ).

## Romans 7

Rom 7:1
To men that know the law ( $\gamma \iota v \omega \sigma \kappa o v \sigma \iota v$ vo $\mu \circ v$ ). Dative plural of present active participle of $\gamma ı \nu \omega \sigma \kappa \omega$. The Romans, whether Jews or Gentiles, knew the principle of law.

A man ( $\tau 0 v \alpha v \theta \rho \omega \pi \sigma v$ ). "The person," generic term $\alpha v \theta \rho \omega \pi \sigma \varsigma$, not $\alpha v \eta \rho$.
Rom 7:2
The wife that hath a husband ( $\eta$ v $\tau \alpha v \delta \rho o \varsigma ~ \gamma \cup v \eta$ ). Late word, under (in subjection to) a husband. Here only in N.T.

Is bound ( $\delta \varepsilon \delta \varepsilon \tau \alpha)$. Perfect passive indicative, stands bound.
By law ( $v o \mu \omega$ ). Instrumental case.
To the husband while he liveth ( $\tau \omega \zeta \omega v \tau \alpha v \delta \rho$ ). "To the living husband," literally.
But if the husband die ( $\varepsilon \alpha v \delta \varepsilon \alpha \pi \circ \theta \alpha v \eta$ o $\alpha v \eta \rho$ ). Third class condition, a supposable case ( $\varepsilon \alpha v$ and the second aorist active subjunctive).

She is discharged ( $\kappa \alpha \tau \eta \rho \gamma \eta \tau \alpha$ ). Perfect passive indicative of $\kappa \alpha \tau \alpha \rho \gamma \varepsilon \omega$, to make void. She stands free from the law of the husband. Cf. 6:6.

Rom 7:3
While the husband liveth ( $\zeta \omega v \tau \circ \varsigma ~ \tau o v ~ a v \delta \rho o \varsigma)$ ) Genitive absolute of present active participle of $\zeta \alpha \omega$.

She shall be called ( $\chi \rho \eta \mu \alpha \tau \iota \sigma \varepsilon$ ). Future active indicative of $\chi \rho \eta \mu \alpha \tau \iota \zeta \omega$, old verb, to receive a name as in Ac 11:26, from $\chi \rho \eta \mu \alpha$, business, from $\chi \rho \alpha \circ \mu \alpha$, to use, then to give an oracle, etc.

An adulteress ( $\mu$ o( $\alpha$ $\lambda \iota \varsigma$ ). Late word, in Plutarch, LXX. See on Mt 12:39.
If she be joined ( $\varepsilon \alpha v \gamma \varepsilon v \eta \tau \alpha$ ). Third class condition, "if she come to."
So that she is no adulteress ( $\tau 0 v \mu \eta \varepsilon \varepsilon v \alpha \alpha \cup \tau \eta \nu \mu \circ \nsim \alpha \lambda \iota \delta \alpha$ ). It is a fact that $\tau 0 v$ and the infinitive is used for result as we saw in 1:24. Conceived result may explain the idiom here.

Rom 7:4
Ye also were made to the law ( $\kappa \alpha \cup \mu \varepsilon \varsigma \varsigma \varepsilon \theta \alpha \alpha \tau \tau \omega \eta \eta \varepsilon$ ). First aorist indicative passive of $\theta$ avarow, old verb, to put to death (Mt 10:21) or to make to die (extinct) as here and Ro 8:13. The analogy calls for the death of the law, but Paul refuses to say that. He changes the structure and makes them dead to the law as the husband ( $6: 3-6$ ). The relation of marriage is killed "through the body of Christ" as the "propitiation" ( 3:25) for us. Cf. Col 1:22 .

That we should be joined to another ( $\varepsilon \iota \varsigma ~ \tau о ~ \gamma \varepsilon v \varepsilon \sigma \theta \alpha \varepsilon \tau \varepsilon \rho \omega)$. Purpose clause with $\varepsilon \iota \varsigma$ тo and the infinitive. First mention of the saints as wedded to Christ as their Husband occurs in 1Co 6:13; Ga 4:26. See further Eph 5:22-33.

That we might bring forth fruit unto God (ıva карточор $\sigma \omega \mu \varepsilon v \tau \omega \theta \varepsilon \omega)$. He changes the metaphor to that of the tree used in 6:22.

Rom 7:5

In the flesh ( $\varepsilon \nu \tau \eta \sigma \alpha \rho \kappa$ ). Same sense as in 6:19 and 7:18,25. The "flesh" is not inherently sinful, but is subject to sin. It is what Paul means by being "under the law." He uses $\sigma \alpha \rho \xi$ in a good many senses.

Sinful passions ( $\tau \alpha \pi \alpha \theta \eta \mu \alpha \tau \alpha \tau \omega \nu \alpha \mu \alpha \rho \tau \iota \omega \nu)$. "Passions of sins" or marked by sins.
Wrought ( $\varepsilon v \varepsilon \rho \gamma \varepsilon ı \tau o)$. Imperfect middle of $\varepsilon v \varepsilon \rho \gamma \varepsilon \omega$, "were active."
To bring forth fruit unto death ( $\varepsilon ı \varsigma ~ \tau о ~ к а \rho \pi о \varphi о \rho \eta \sigma \alpha ~ \tau \omega ~ \theta \alpha v \alpha \tau \omega$ ). Purpose clause again. Vivid picture of the seeds of sin working for death.

Rom 7:6
But now ( $v u v \delta \varepsilon$ ). In the new condition.
Wherein we were holden ( $\varepsilon \nu \omega \kappa \alpha \tau \varepsilon \iota \chi \circ \mu \varepsilon \theta \alpha$ ). Imperfect passive of $\kappa \alpha \tau \varepsilon \chi \omega$, picture of our former state (same verb in 1:18).

In newness of spirit ( $\varepsilon v \kappa \alpha \iota v o \tau \eta \tau \pi v \varepsilon v \mu a \tau \circ \varsigma)$. The death to the letter of the law (the old husband) has set us free to the new life in Christ. So Paul has shown again the obligation on us to live for Christ.

Rom 7:7
Is the law sin? (o vo $\mu \circ \varsigma \alpha \mu \alpha \rho \tau \iota \alpha$ ?). A pertinent query in view of what he had said. Some people today oppose all inhibitions and prohibitions because they stimulate violations. That is half-baked thinking.

I had not known sin ( $\tau \eta \nu \alpha \mu \alpha \rho \tau \iota \alpha \nu$ ovk $\varepsilon \gamma \nu \omega \nu$ ). Second aorist indicative of $\gamma \iota \nu \omega \sigma \kappa \omega$, to know. It is a conclusion of a second class condition, determined as unfulfilled. Usually $\alpha v$ is used in the conclusion to make it plain that it is second class condition instead of first class, but occasionally it is not employed when it is plain enough without as here (Joh 16:22,24 ). See on $\mathrm{Ga} 4: 15$. So as to

I had not known coveting (lust), $\varepsilon \pi \iota \theta \cup \mu \iota a \nu$ ovк $\eta \iota \delta \varepsilon \iota v$. But all the same the law is not itself sin nor the cause of sin. Men with their sinful natures turn law into an occasion for sinful acts.

Rom 7:8
Finding occasion ( $\alpha \varphi о \rho \mu \eta \nu \lambda \alpha \beta o v \sigma \alpha$ ). See 2Co 5:12; 11:12; Ga 5:13 for $\alpha \varphi о \rho \mu \eta \nu$, a starting place from which to rush into acts of $\sin$, excuses for doing what they want to do. Just so drinking men use the prohibition laws as "occasions" for violating them.

Wrought in me ( $\kappa \alpha \tau \varepsilon \iota \rho \gamma \sigma \alpha \tau о \varepsilon \nu \varepsilon \mu о$ ). First aorist active middle indicative of the intensive verb катєрүаऍо $\alpha$, to work out (to the finish), effective aorist. The command not to lust made me lust more.

Dead ( $v \varepsilon \kappa \rho \alpha)$. Inactive, not non-existent. Sin in reality was there in a dormant state.
Rom 7:9
I was alive $(\varepsilon \zeta \omega v)$. Imperfect active. Apparently, "the lost paradise in the infancy of men" (Denney), before the conscience awoke and moral responsibility came, "a seeming life" (Shedd).

Sin revived ( $\eta \alpha \mu \alpha \rho \tau \iota \alpha \alpha v \varepsilon\lceil\eta \sigma \varepsilon v$ ). Sin came back to life, waked up, the blissful innocent stage was over, "the commandment having come" ( $\varepsilon \lambda \theta$ ou $\quad \eta \varsigma \tau \eta \varsigma \varepsilon \nu \tau 0 \lambda \eta \varsigma$, genitive absolute).

But I died ( $\varepsilon \gamma \omega \delta \varepsilon \alpha \pi \varepsilon \theta \alpha v o v$ ). My seeming life was over for I was conscious of sin, of violation of law. I was dead before, but I did not know. Now I found out that I was spiritually dead.

Rom 7:10
This I found unto death ( $\varepsilon \cup \rho \varepsilon \theta \eta \mu \circ--\alpha v \tau \eta ~ \varepsilon ı \varsigma ~ \theta a v a \tau o v)$. Literally, "the commandment the one for (meant for) life, this was found for me unto death." First aorist (effective) passive indicative of $\varepsilon v \rho \iota \sigma \kappa \omega$, to find, not active as the English has it. It turned out so for me (ethical dative).

Rom 7:11
Beguiled me ( $\varepsilon \xi \eta \pi \alpha \tau \eta \sigma \varepsilon \nu \mu \varepsilon$ ). First aorist active indicative of $\varepsilon \xi \alpha \pi \alpha \tau \alpha \omega$, old verb, completely ( $\varepsilon \xi$ ) made me lose my way ( $\alpha$ privative, $\pi \alpha \tau \varepsilon \omega$, to walk). See on 1Co 3:18; 2Co 11:3. Only in Paul in N.T.

Slew me ( $\alpha \pi \varepsilon \kappa \tau \varepsilon เ v \varepsilon v$ ). First aorist active indicative of $\alpha \pi о \kappa \tau \varepsilon เ \nu \omega$, old verb. "Killed me off," made a clean job of it. Sin here is personified as the tempter (Ge 3:13).

Rom 7:12
Holy, and righteous, and good ( $\alpha \gamma \iota \alpha \kappa \alpha \delta_{\iota \kappa \alpha \iota \alpha} \kappa \alpha \alpha \gamma \alpha \theta \eta$ ). This is the conclusion (wherefore, $\omega \sigma \tau \varepsilon$ ) to the query in verse 7 . The commandment is God's and so holy like Him, just in its requirements and designed for our good. The modern revolt against law needs these words.

Rom 7:13
Become death unto me? ( $\varepsilon \mu$ о $\varepsilon \gamma \varepsilon v \varepsilon \tau о ~ \theta a v \alpha \tau o \sigma ?)$. Ethical dative $\varepsilon \mu \circ$ again. New turn to the problem. Admitting the goodness of God's law, did it issue in death for me? Paul repels ( $\mu \eta \gamma^{\varepsilon v o \iota \tau o)}$ this suggestion. It was sin that (But sin, $\left.\alpha \lambda \lambda \alpha \eta \alpha \mu \alpha \rho \tau \alpha\right)$ ) "became death for me."

That it might be shown (iva $\varphi a v \eta$ ). Final clause, $\imath v a$ and second aorist passive subjunctive of $\varphi \alpha \iota v \omega$, to show. The sinfulness of $\sin$ is revealed in its violations of God's law.

By working death to me ( $\mu$ о кат $\rho \gamma \alpha \zeta о \mu \varepsilon v \eta$ Өavatov). Present middle participle, as an incidental result.

Might become exceedingly sinful ( $\left.\gamma \varepsilon v \eta \tau \alpha \kappa \alpha \theta^{\prime} v \pi \varepsilon \rho \beta \circ \lambda \eta v \alpha \mu \alpha \rho \tau \omega \lambda, \varsigma\right)$. Second aorist middle subjunctive of $\gamma \iota v o \mu \alpha$ with $\imath \boldsymbol{v}$ in final clause. On $\kappa \alpha \theta^{\prime} v \pi \varepsilon \rho \beta \circ \lambda \eta \nu$, see on 1Co 12:31 . Our hyperbole is the Greek $v \pi \varepsilon \rho \beta 0 \lambda \eta$. The excesses of sin reveal its real nature. Only then do some people get their eyes opened.

Rom 7:14
Spiritual ( $\pi v \varepsilon v \mu \alpha \tau / \kappa о \varsigma)$. Spirit-caused and spirit-given and like the Holy Spirit. See 1Co 10:3f.

But I am carnal ( $\varepsilon \gamma \omega \delta \varepsilon \sigma \alpha \rho \kappa เ v o \varsigma \varepsilon \mu)$ ). "Fleshen" as in 1 Co 3:1 which see, more emphatic even than баркккоऽ," a creature of flesh."

Sold under $\sin$ ( $\pi \varepsilon \pi \rho \alpha \mu \varepsilon v o \varsigma ~ v \pi о ~ \tau \eta \nu ~ a \mu \alpha \rho \tau \iota \alpha v)$. Perfect passive participle of $\pi \iota \pi \rho a \sigma \kappa \omega$, old verb, to sell. See on Mt 13:46; Ac 2:45, state of completion. Sin has closed the mortgage and owns its slave.

Rom 7:15
I know not (ov $\gamma เ \nu \omega \sigma \kappa \omega$ ). "I do not recognize" in its true nature. My spiritual perceptions are dulled, blinded by $\sin (2 \mathrm{Co} 4: 4$ ). The dual life pictured here by Paul finds an echo in us all, the struggle after the highest in us ("what I really wish," o $\theta \varepsilon \lambda \omega$, to practise it steadily, $\pi \rho \alpha \sigma \sigma \omega)$ and the slipping into doing ( $\pi \sigma \omega)$ "what I really hate" (o $\mu \iota \sigma \omega$ ) and yet sometimes do. There is a deal of controversy as to whether Paul is describing his struggle with sin before conversion or after it. The words "sold under sin" in verse 14 seem to turn the scale for the pre-conversion period. "It is the unregenerate man's experience, surviving at least in memory into regenerate days, and read with regenerate eyes" (Denney).

Rom 7:16
I consent unto the law ( $\sigma v v \varphi \eta \mu \tau \omega v o \mu \omega)$. Old verb, here only in N.T., with associative instrumental case. "I speak with." My wanting $(\theta \varepsilon \lambda \omega)$ to do the opposite of what I do proves my acceptance of God's law as good ( $\kappa \alpha \lambda o c)$.

Rom 7:17
So now ( $v o v \delta \varepsilon$ ). A logical contrast, "as the case really stands."
But sin that dwelleth in me ( $\alpha \lambda \lambda^{\prime} \eta$ $\varepsilon$ voıкоvб $\left.\varepsilon \varepsilon \varepsilon \varepsilon \mu о \alpha \mu \alpha \rho \tau \alpha\right)$. "But the dwelling in me sin." Not my true self, my higher personality, but my lower self due to my slavery to indwelling sin. Paul does not mean to say that his whole self has no moral responsibility by using this paradox. "To be saved from sin, a man must at the same time own it and disown it" (Denney).

Rom 7:18
In me ( $\varepsilon v \varepsilon \mu \mathrm{o}$ ). Paul explains this by "in my flesh" ( $\varepsilon \nu \tau \eta \sigma \alpha \rho \kappa \mu \circ v$ ), the unregenerate man "sold under sin" of verse 14.

No good thing (ovk--aүa日ov). "Not absolutely good." This is not a complete view of man even in his unregenerate state as Paul at once shows.

For to will is present with me ( $\tau 0 \gamma \alpha \rho \theta \varepsilon \lambda \varepsilon ı \nu \pi \alpha \rho \alpha к \varepsilon เ \tau \alpha \mu$ ). Present middle indicative of $\pi а \rho а к \varepsilon є \alpha$, old verb, to lie beside, at hand, with dative $\mu \mathrm{o}$. Only here in N.T.

The wishing is the better self,
the doing not the lower self.
Rom 7:19
But the evil which I would not ( $\alpha \lambda \lambda \alpha$ o ov $\theta \varepsilon \lambda \omega$ какоv). Incorporation of the antecedent into the relative clause, "what evil I do not wish." An extreme case of this practise of evil is seen in the drunkard or the dope-fiend.

Rom 7:20
It is no more I that do it (оикєє $\varepsilon \gamma \omega$ катєрүаఢона аuто). Just as in verse 17, "no longer do I do it" (the real E $\gamma$ o, my better self), and yet there is responsibility and guilt for the struggle goes on.

Rom 7:21
The law ( $\tau 0 v$ vouov). The principle already set forth ( $\alpha \rho \alpha$, accordingly) in verses 18,19 . This is the way it works, but there is no surcease for the stings of conscience.

Rom 7:22
For I delight in ( $\sigma u v \eta \delta o \mu \alpha \gamma \alpha \rho$ ). Old verb, here alone in N.T., with associative instrumental case, "I rejoice with the law of God," my real self "after the inward man" (ката тоv $\varepsilon \sigma \omega \alpha v \theta \rho \omega \pi \sigma v)$ of the conscience as opposed to "the outward man" (2Co 4:16; Eph 3:16).

Rom 7:23
A different law ( $\varepsilon \tau \varepsilon \rho \circ \vee v o \mu \circ v$ ). For the distinction between $\varepsilon \tau \varepsilon \rho \circ \varsigma$ and $\alpha \lambda \lambda o \varsigma$, see Ga 1:6f.

Warring against ( $\alpha v \tau \iota \sigma \tau \rho \alpha \tau \varepsilon v o \mu \varepsilon v o v$ ). Rare verb (Xenophon) to carry on a campaign against. Only here in N.T.

The law of my mind ( $\tau \omega v o \mu \omega$ tov vooc). The reflective intelligence Paul means by vooc, "the inward man" of verse 22. It is this higher self that agrees that the law of God is $\operatorname{good}(12,16,22)$.

Bringing me into captivity ( $\alpha \nmid \chi \mu \lambda \omega \tau \iota \zeta$ ov $\tau \alpha$ ). See on this late and vivid verb for capture and slavery Lu 21:24; 2Co 10:5. Surely it is a tragic picture drawn by Paul with this outcome, "sold under $\sin$ " (14), "captivity to the law of $\sin$ " (23). The ancient writers (Plato, Ovid, Seneca, Epictetus) describe the same dual struggle in man between his conscience and his deeds.

Rom 7:24
O wretched man that I am ( $\tau \alpha \lambda \alpha \iota \pi \omega \rho \circ \varsigma \varepsilon \gamma \omega \alpha v \theta \rho \omega \pi \sigma \varsigma)$. "Wretched man I." Old adjective from $\tau \lambda \alpha \omega$, to bear, and $\pi \omega \rho \circ \varsigma$, a callus. In N.T. only here and Re 3:17. "A heartrending cry from the depths of despair" (Sanday and Headlam).

Out of the body of this death ( $\varepsilon \kappa$ тоv $\sigma \omega \mu \alpha \tau$ к $\operatorname{\tau ov} \theta$ avatov tovtov). So the order of words demands. See verse 13 for "death" which finds a lodgment in the body (Lightfoot). If one feels that Paul has exaggerated his own condition, he has only to recall $1 \mathrm{Ti} 1: 15$ when he describes himself a chief of sinners. He dealt too honestly with himself for Pharisaic complacency to live long.

Rom 7:25
I thank God ( $\chi \alpha \rho ı \varsigma \tau \omega \theta \varepsilon \omega)$. "Thanks to God." Note of victory over death through Jesus Christ our Lord."

So then I myself ( $\alpha \rho \alpha$ ouv $\alpha \cup \tau o \varsigma ~ \varepsilon \gamma \omega$ ). His whole self in his unregenerate state gives a divided service as he has already shown above. In 6:1-7:6 Paul proved the obligation to be
sanctified. In 7:7-8:11 he discusses the possibility of sanctification, only for the renewed man by the help of the Holy Spirit.

## Romans 8

Rom 8:1
Therefore now ( $\alpha \rho \alpha v v v$ ). Two particles. Points back to the triumphant note in 7:25 after the preceding despair.

No condemnation (ovסعv катакрц $\mu$ ). As sinners we deserved condemnation in our unregenerate state in spite of the struggle. But God offers pardon "to those in Christ Jesus ( $\tau \circ \iota \varepsilon \varepsilon v$ X $\rho \iota \sigma \tau \omega$ I $\eta \sigma o v$ ). This is Paul's Gospel. The fire has burned on and around the Cross of Christ. There and there alone is safety. Those in Christ Jesus can lead the consecrated, the crucified, the baptized life.

Rom 8:2
The law of the Spirit of life (o vouos $\tau 0 v \pi v \varepsilon v \mu \alpha \tau \circ \varsigma \tau \eta \varsigma \zeta \omega \eta \varsigma)$. The principle or authority exercised by the Holy Spirit which bestows life and which rests "in Christ Jesus."

Made me free ( $\eta \lambda \varepsilon v \theta \varepsilon \rho \omega \sigma \varepsilon v \mu \varepsilon$ ). First aorist active indicative of the old verb $\varepsilon \lambda \varepsilon v \theta \varepsilon \rho o \omega$ for which see $\mathrm{Ga} 5: 1$. Aleph B have $\sigma \varepsilon$ (thee) instead of $\mu \varepsilon$. It matters little. We are pardoned, we are free from the old law of sin and death ( 7:7-24), we are able by the help of the Holy Spirit to live the new life in Christ.

Rom 8:3
 the law" as shown in 7:7-24, either nominative absolute or accusative of general reference. No syntactical connection with the rest of the sentence.

In that ( $\varepsilon v \omega$ ). "Wherein."
It was weak ( $\eta \sigma \theta \varepsilon v \varepsilon$ ). Imperfect active, continued weak as already shown.
In the likeness of sinful flesh ( $\varepsilon v$ о $о \iota \omega \mu \alpha \tau \sigma \alpha \rho \kappa о \varsigma ~ \alpha \mu \alpha \rho \tau \iota \alpha \varsigma)$. For "likeness" see Php 2:7, a real man, but more than man for God's "own Son." Two genitives "of flesh of sin" (marked by $\sin$ ), that is the flesh of man is, but not the flesh of Jesus.

And for $\sin (\kappa \alpha \pi \varepsilon \rho \alpha \mu \alpha \rho \tau ı \varsigma)$. Condensed phrase, God sent his Son also concerning $\sin$ (our sin).

Condemned sin in the flesh ( $\kappa \alpha \tau \varepsilon \kappa \rho \iota v \varepsilon \tau \eta \nu \alpha \mu \alpha \rho \tau \iota \alpha \nu \varepsilon \nu \tau \eta \sigma \alpha \rho \kappa$ ). First aorist active indicative of катакрıv $\omega$. He condemned the sin of men and the condemnation took place in the flesh of Jesus. If the article $\tau \eta \nu$ had been repeated before $\varepsilon v \tau \eta \sigma \alpha \rho \kappa$ Paul would have affirmed $\sin$ in the flesh of Jesus, but he carefully avoided that (Robertson, Grammar, p. 784).

## Rom 8:4

The ordinance of the law ( $\tau \boldsymbol{\delta} \delta ⿺ \alpha \iota \omega \mu \alpha$ tov vo $\mu \circ v$ ). "The requirement of the law."
Might be fulfilled ( $\mathrm{tv} \alpha \pi \lambda \varepsilon \rho \omega \theta$ ). Purpose of the death of Christ by $\mathrm{v} \alpha$ and first aorist passive subjunctive of $\pi \lambda \eta \rho o \omega$. Christ met it all in our stead ( 3:21-26).

Not after the flesh, but after the Spirit ( $\mu \eta \kappa \alpha \tau \alpha \sigma \alpha \rho \kappa \alpha \alpha \lambda \lambda \alpha \kappa \alpha \tau \alpha \pi \nu \varepsilon \nu \mu \alpha$ ). The two laws of life (ката $\sigma \alpha \rho \kappa \alpha$ in 7:7-24, ката $\pi \nu \varepsilon v \mu \alpha$ 8:1-11). Most likely the Holy Spirit or else the renewed spirit of man.

## Rom 8:5

Do mind ( $\varphi \rho \circ$ ovovatv). Present active indicative of $\varphi \rho \circ v \varepsilon \omega$, to think, to put the mind ( $\varphi \rho \eta \nu$ ) on. See Mt 16:23; Ro 12:16. For the contrast between $\sigma \alpha \rho \xi$ and $\pi \nu \varepsilon \nu \mu \alpha$, see Ga 5:16-24.

Rom 8:6
The mind ( $\tau 0 \varphi \rho \circ \vee \eta \mu \alpha$ ). The bent or will of the flesh is death as shown in 7:7-24.
Life $(\zeta \omega \eta)$. In contrast with "death."
Peace ( $\varepsilon \varphi \rho \nu \eta)$. As seen in 5:1-5.
Rom 8:7
Is not subject (ou $\cup \pi \sigma \tau \alpha \sigma \sigma \varepsilon \tau \alpha$ ). Present passive indicative of $\cup \pi \sigma \tau \alpha \sigma \sigma \omega$, late verb, military term for subjection to orders. Present tense here means continued insubordination.

Neither indeed can it be (ou $\delta \varepsilon \not \subset \rho \delta u v a \tau \alpha$ ). "For it is not even able to do otherwise." This helpless state of the unregenerate man Paul has shown above apart from Christ. Hope lies in Christ ( 7:25) and the Spirit of life ( 8:2).

## Rom 8:8

Cannot please God ( $\theta \varepsilon \omega$ ap\& $\alpha \alpha$ ov $\delta v v a v \tau \alpha$ ). Because of the handicap of the lower self in bondage to sin. This does not mean that the sinner has no responsibility and cannot be saved. He is responsible and can be saved by the change of heart through the Holy Spirit.

Rom 8:9
Not in the flesh (ouk $\varepsilon v \sigma \alpha \rho \kappa$ ). Not sold under $\sin (7: 14)$ any more.
But in the spirit ( $\alpha \lambda \lambda \alpha \varepsilon \nu \pi v \varepsilon v \mu \alpha \tau$ ). Probably, "in the Holy Spirit." It is not Pantheism or Buddhism that Paul here teaches, but the mystical union of the believer with Christ in the Holy Spirit.

If so be that ( $\varepsilon เ \pi \varepsilon \rho)$ ) "If as is the fact" (cf. 3:30).
The Spirit of Christ ( $\pi v \varepsilon v \mu \alpha$ X $\rho \iota \sigma \tau o v$ ). The same as "the Spirit of God" just before. See also Php 1:19; 1Pe 1:11. Incidental argument for the Deity of Christ and probably the meaning of 2Co 3:18 "the Spirit of the Lord." Condition of first class, assumed as true.

Rom 8:10
The body is dead ( $\tau \mathrm{o} \mu \varepsilon v \sigma \omega \mu \alpha \vee \varepsilon \kappa \rho \circ v$ ). Has the seeds of death in it and will die "because of $\sin$."

The spirit is life ( $\tau$ o $\delta \varepsilon \pi v \varepsilon v \mu \alpha \zeta \omega \eta$ ). The redeemed human spirit. He uses $\zeta \omega \eta$ (life) instead of $\zeta \omega \sigma \alpha$ (living), "God-begotten, God-sustained life" (Denney), if Christ is in you.

Rom 8:11
Shall quicken ( $\zeta \omega$ олоוך $\sigma \varepsilon$ ). Future active indicative of $\zeta \omega 0 \pi о เ \varepsilon \omega$, late verb from弓 $\omega$ отоьоऽ, making alive. See on 1Co 15:22.
 Spirit). Both ideas are true, though the genitive is slightly more probably correct.

Rom 8:12
We are debtors (o甲รı入єта $\varepsilon \sigma \mu \varepsilon v)$. See on Ga 5:3; Ro 1:14.
Not to the flesh (ov $\tau \eta \sigma \alpha \rho \kappa$ ). Negative ov goes with preceding verb and $\tau \eta \sigma \alpha \rho \kappa$, not with the infinitive $\operatorname{\tau ov} \zeta \eta เ v$.

Rom 8:13
Ye must die ( $\mu \varepsilon \lambda \lambda \varepsilon \tau \varepsilon \alpha \pi \circ \theta \nu \eta \sigma \kappa \varepsilon เ v$ ). Present indicative of $\mu \varepsilon \lambda \lambda \omega$, to be about to do and present active infinitive of $\alpha \pi \mathrm{o} \theta \nu \eta \sigma \kappa \omega$, to die. "Ye are on the point of dying." Eternal death.

By the spirit ( $\pi v \varepsilon v \mu a \tau$ ). Holy Spirit, instrumental case.
Ye shall live $(\zeta \eta \sigma \varepsilon \sigma \theta \varepsilon)$. Future active indicative of $\zeta \alpha \omega$. Eternal life.
Rom 8:14
Sons of God (vio $\theta$ sov). In the full sense of this term. In verse 16 we have $\tau \varepsilon \kappa v \alpha \theta$ $\theta$ ou (children of God). Hence no great distinction can be drawn between vios and $\tau \varepsilon \kappa v o v$. The truth is that vios is used in various ways in the New Testament. In the highest sense, not true of any one else, Jesus Christ is God's Son ( 8:3). But in the widest sense all men are "the offspring" ( $\gamma \varepsilon v o \varsigma$ ) of God as shown in Ac 17:28 by Paul. But in the special sense here only those are "sons of God" who are led by the Spirit of God, those born again (the second birth) both Jews and Gentiles, "the sons of Abraham" (vıo A $\beta \rho \alpha \alpha \mu, \mathrm{Ga} 3: 7$ ), the children of faith.

Rom 8:15
 Jews and Gentiles receive this "adoption" into the family of God with all its privileges. " Whereby we cry, Abba, Father " ( $\varepsilon v \eta \kappa \rho \alpha \zeta о \mu \varepsilon v ~ A \beta \beta \alpha$ о $\pi \alpha \tau \eta \rho)$. See Ga 4:6 for discussion of this double use of Father as the child's privilege.

Rom 8:16
The Spirit himself (avтo тo $\pi v \varepsilon v \mu \alpha$ ). The grammatical gender of $\pi v \varepsilon v \mu \alpha$ is neuter as here, but the Greek used also the natural gender as we do exclusively as in Joh 16:13 єкєıvos (masculine
