That the destroyer of the first-born should not touch them ( $1 v \alpha \mu \eta$ o o $\quad \lambda 0 \theta \rho \varepsilon v \omega \nu \tau \alpha$ $\pi \rho \omega \tau$ тотока $\theta \iota \gamma \eta \alpha \nu \tau \omega v)$. Negative final clause with $\tau v \alpha \mu \eta$ and the second aorist active subjunctive of $\theta(\gamma \gamma \alpha v \omega$, old verb to touch with genitive, in the N.T. only here, 12:20; Col 2:21. The articular participle o o 0 o $\theta \rho \varepsilon v \omega v$ is from Ex 11:23. For $\pi \rho \omega \tau$ тотока see Lu 2:7; Ex 12:29.

Heb 11:29
Which assaying to do ( $\eta \varsigma \pi เ \varepsilon \rho \alpha \nu \lambda \alpha \beta o v \tau \varepsilon \varsigma)$. Literally, "of which taking trial" (second aorist active participle of $\lambda \alpha \mu \beta \alpha \nu \omega$, to take). The idiom $\pi \varepsilon \iota \rho \alpha \nu \lambda \alpha \mu \beta a v \varepsilon เ v$ occurs in De 28:56 , in N.T. only here and verse 36, though a classical idiom (Demosthenes, etc.).

Were swallowed up (катєпо $\theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\kappa \alpha \tau \alpha \pi \iota \nu \omega$, to drink down, to swallow down (Mt 23:24).

Heb 11:30
Fell down ( $\varepsilon \pi \varepsilon \sigma \alpha \nu)$. "Fell," second aorist active indicative of $\pi \iota \pi \tau \omega$ with first aorist endings as often in the Koine.

After they had been compassed (кик $\lambda \omega \theta \varepsilon \nu \tau \alpha$ ). First aorist passive participle of кик $\lambda о \omega$, old verb to encircle (from кขк $\boldsymbol{o}^{\circ}$, circle) as in Ac 14:20. Antecedent action here.

Heb 11:31
Having received the spies with peace ( $\delta \varepsilon \xi \alpha \mu \varepsilon v \eta$ тоия катабкотоиৎ $\left.\mu \varepsilon \tau^{\prime} \varepsilon \iota \rho \eta \nu \eta \varsigma\right)$. First aorist middle participle of $\delta \varepsilon \chi \circ \mu \alpha$, to welcome ( $\mathrm{Lu} 10: 8,10$ ). Катабкотоৎ is an old compound (катабколє $\omega$, Ga 2:4), used of scout or spy, in LXX, here only in N.T.

Heb 11:32
And what shall I more say? ( $\mathrm{K} \alpha \tau \varepsilon \tau \lambda \varepsilon \gamma \omega$;). Deliberative present active subjunctive (same form as indicative, $\lambda \varepsilon \gamma \omega$ ). It is both a literary and an oratorical idiom here. He feels helpless to go on in the same style as he has done from Abel to Rahab ( 11:4-31).

Will fail me if I tell about ( $\varepsilon \pi \wedge \lambda \varepsilon ı \psi \varepsilon \mu \varepsilon \delta ı \eta \gamma o \cup \mu \varepsilon \nu o v \pi \varepsilon \rho$ ). Literally, "will leave me telling about." Present middle participle of $\delta ı \eta \gamma \varepsilon \circ \mu \alpha$, to lead through, carry a discussion through, and masculine (disposing of Priscilla as possible author) with $\mu \varepsilon$. Vivid and picturesque description of the author's embarrassment of riches as he contemplates the long list of the heroes of faith during the long years in Palestine. He mentions six names (Gideon, Barak, Samson, Jephtha, David, Samuel) and then summarizes the rest under "the prophets" ( $\tau \omega v$ $\pi \rho о \varphi \eta \tau \omega \nu$, the for-speakers for God) of whom Samuel was the leader.

Heb 11:33
Through faith ( $\delta \iota \alpha \pi \iota \sigma \tau \varepsilon \omega \varsigma)$. Change thus from the routine $\pi \iota \sigma \tau \varepsilon$ used so far.
Subdued kingdoms ( $\kappa \alpha \tau \eta \gamma \omega \nu \iota \sigma \alpha \nu \tau o \quad \beta a \sigma \iota \lambda \varepsilon \iota \varsigma)$. First aorist middle indicative of $\kappa \alpha \tau \alpha \gamma \omega \nu \iota \zeta о \mu \alpha$, Koine verb to struggle against, to overcome, here alone in the N.T. Used by Josephus of David's conquests. The author has here (verses 33,34 ), "nine terse clauses" (Moffatt) with no connective (asyndeton) with great rhetorical and oratorical force (sledgehammer style). For "wrought righteousness" ( $\eta \rho \gamma \sigma \sigma \alpha \tau$ то $\delta \iota \kappa \alpha \iota \sigma \nu \nu \eta \nu$, first aorist middle indicative of $\varepsilon \rho \gamma \alpha \zeta о \mu \alpha)$ see Ac 10:35.

Obtained promises ( $\varepsilon \pi \varepsilon \tau \cup \chi \circ v \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \iota \omega v$ ). Second aorist active indicative of $\varepsilon \pi \iota \tau \cup \gamma \chi \propto \nu \omega$, old verb (already in 6:15) with genitive. But they did not see the fulfilment of the Messianic promise (11:39f. ).

Stopped the mouths of lions $(\varepsilon \varphi \rho \alpha \xi \alpha \nu \sigma \tau o \mu \alpha \tau \alpha \lambda \varepsilon \sigma \nu \tau \omega v)$. First aorist active indicative of $\varphi \rho a \sigma \sigma \omega$, old verb to fence in, to block up. See Da 6:18-23.

Heb 11:34
Quenched the power of fire $(\varepsilon \sigma \beta \varepsilon \sigma \alpha \nu \delta \nu v \alpha \mu เ \nu \pi \nu \rho o \varsigma)$. First aorist active indicative of $\sigma \beta \varepsilon \nu v v \mu$ (Mt 12:20 ). See Da 3:19-28 .

Escaped the edge of the sword ( $\varepsilon \varphi v \gamma \circ v \sigma \tau \circ \mu \alpha \tau \alpha \mu \alpha \chi \alpha \iota \rho \eta \varsigma)$. Second aorist active indicative of $\varphi \varepsilon v \gamma \omega$, old verb to flee. "Mouths ( $\sigma \tau о \mu \alpha \tau \alpha$ ) of the sword" (Lu 21:24). See 1Sa 18:11; 1Ki 19:2.

Were made strong ( $\varepsilon \delta v \nu \alpha \mu \omega \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\delta v v \alpha \mu o \omega$, late verb from $\delta u v a \mu$ ц as in Col 1:11.

Waxed mighty in war ( $\varepsilon \gamma \varepsilon \nu \eta \forall \eta \sigma \alpha \nu \tau \sigma \chi \rho \circ \varepsilon \nu \pi о \lambda \varepsilon \mu \omega$ ). "Became strong in battle" (Ps 18:34ff. ).

Armies of aliens ( $\pi \alpha \rho \varepsilon \mu \beta o \lambda \alpha c \alpha \lambda \lambda o \tau \rho \iota \omega \nu)$. Late compound ( $\pi \alpha \rho \alpha, \varepsilon \nu, \beta \alpha \lambda \lambda \omega$ ) for encampment (Polybius, Plutarch), barracks (Ac 21:34,37 ), armies in battle line (Re 20:9 and here as in LXX and Polybius). Apparently a reference to the campaigns of Judas Maccabeus.

## Heb 11:35

By a resurrection ( $\varepsilon \xi$ ava $\alpha \tau \alpha \sigma \varepsilon \omega \varsigma)$. Cf. $1 \mathrm{Ki} 17: 17 \mathrm{ff}$.; 2Ki 4:8-37.
Were tortured ( $\varepsilon \tau v \mu \pi \alpha \nu \iota \sigma \theta \eta \sigma \alpha v)$. First aorist passive indicative of $\tau v \mu \pi \alpha \nu \iota \zeta \omega$, late verb from $\tau v \mu \pi \alpha v o v$ (kettledrum, drumstick), to beat the drum, to beat to death (cf. II Macc. 7 about Eleazar and the Mother and the seven sons), once in LXX (1Sa 21:13 ).

Not accepting their deliverance (ov $\pi \rho о \sigma \delta \varepsilon \xi \alpha \mu \varepsilon v o ~ \tau \eta v \alpha \pi о \lambda \nu \tau \rho \omega \sigma \nu v$ ). Offered at the price of disloyalty as in II Macc. 6:21-27.

That they might obtain a better resurrection (ıva кряıт $\tau 0 v o \varsigma ~ \alpha v a \sigma \tau \alpha \sigma \varepsilon \omega \varsigma ~ \tau v \chi \omega \sigma \tau v) . ~$ Purpose clause with $\imath v a$ and the second aorist active subjunctive of $\tau v \gamma \chi a v \omega$ to obtain with the genitive case. A "better resurrection" than the temporary ones alluded to in this verse by the women.

Heb 11:36
Of mockings and scourgings ( $\varepsilon \mu \pi \alpha \iota \gamma \mu \omega \nu \kappa \alpha \mu \alpha \sigma \tau \iota \gamma \omega v$ ). Е $\mu \pi \alpha \iota \gamma \mu \circ \varsigma$ is from $\varepsilon \mu \pi \alpha \iota \zeta \omega$ (Mt 20:19), late word, in LXX, here alone in N.T. Maбтı $\overline{\omega v}$ ( $\mu \alpha \sigma \tau \iota \xi$, a whip, a scourge) is old and common enough (Ac 22:24).

Heb 11:37
They were stoned ( $\varepsilon \lambda_{1} \theta \alpha \sigma \theta \eta \sigma \alpha v$ ). Like Zechariah son of Jehoiada (2Ch 24:20). "A characteristic Jewish punishment" (Vincent). First aorist passive indicative of $\lambda_{\lambda} \theta \alpha \zeta \omega$ (Joh 10:31).

They were sawn asunder ( $\varepsilon \pi \rho \iota \sigma \theta \eta \sigma \alpha v)$. First aorist passive indicative of $\pi \rho \iota \omega$ or $\pi \rho \iota \zeta \omega$, old verb ( $\pi \rho \circ \mathrm{ov}$, a saw). Cruel Jewish punishment (Am 1:3) said to have been inflicted on Isaiah.

They were tempted ( $\varepsilon \pi \varepsilon \rho \rho a \sigma \theta \eta \sigma \alpha v)$. First aorist passive indicative of $\pi \varepsilon \rho \rho \zeta \zeta \omega$. The MSS. vary greatly in the text here and the order of these two items. This mild word seems an anticlimax after $\varepsilon \pi \rho \iota \sigma \theta \eta \sigma \alpha v$. One of the seven brothers was fried (II Macc. 7:4) and so $\varepsilon \pi \rho \eta \sigma \theta \varepsilon \sigma \alpha \nu$ (were burned) from $\pi \mu \mu \pi \rho \alpha \omega$ (Ac 28:6 ) has been suggested.

With the sword ( $\varepsilon v \varphi o v \omega \mu \alpha \chi \alpha \iota \rho \eta)$ ) "In (by) slaughter of the sword" (Ionic form of the genitive $\mu$ ахаı $\varepsilon \varsigma \varsigma$ as in Ex 17:13; Nu 21:24 ). The fate of unpopular prophets (1Ki 10:10; Jer 26:23 ).

They went about ( $\pi \varepsilon \rho ı \eta \lambda \theta$ ov). Constative aorist active indicative of $\pi \varepsilon \rho เ \varepsilon \rho \chi \circ \mu \alpha$ (picturesque compound verb). Here the sufferings of the living.

In sheep skins ( $\varepsilon v \mu \eta \lambda \omega \tau \alpha \iota \varsigma)$. Late word from $\mu \eta \lambda$ ov (sheep), rough garment of prophets as Elijah (1Ki 19:13,19 ), here only in N.T. In Byzantine Greek a monk's garb.

In goatskins ( $\varepsilon v$ aıүвıos $\delta \varepsilon \rho \mu \alpha \sigma ı v$ ). $\Delta \varepsilon \rho \mu \alpha$, old word from $\delta \varepsilon \rho \omega$, to flay (Mt 21:35), here only in N.T. Aı $\gamma \varepsilon \iota o \varsigma$, old adjective (from $\alpha \iota \xi$, goat), here only in N.T.

Being destitute ( $v \sigma \tau \varepsilon \rho о \cup \mu \varepsilon v o$ ). Present passive participle of $v \sigma \tau \varepsilon \rho \varepsilon \omega$, old verb to be left behind, used by Paul of himself (2Co 11:9).

Afflicted $\left(\theta \lambda_{1} \beta o \mu \varepsilon v o\right)$. Present passive participle of $\theta \lambda_{1} \beta \omega$, common verb to oppress.
Evil entreated (какоихоицвvo). Present passive participle of какоихє $\omega$, late compound verb from obsolete какоихоৎ (какоৎ and $\varepsilon \chi \omega$ ), in LXX (1Ki 2:26), in N.T. only here and 13:3. See бuvкакоихєıбӨa in 11:25.

Heb 11:38

Of whom the world was not worthy ( $\omega v$ оvк $\eta \nu \alpha \xi ⿺ 𠃊 \varsigma$ о коб $\mu \circ \varsigma$ ) Graphic picture in a short parenthetical relative clause ( $\omega \nu$, genitive plural with $\alpha \xi \iota \varsigma$ ), a phrase to stir the blood of the readers.

Wandering ( $\pi \lambda \alpha \nu \omega \mu \varepsilon v o$ ). Present middle participle of $\pi \lambda \alpha \nu \alpha \omega$, like lost sheep, hunted by wolves.

Caves ( $\sigma \pi \eta \lambda$ aıoı $)$. Old word from $\sigma \pi \varepsilon \circ \varsigma$ (cavern) as in Mt 21:13.
Holes (o $\pi \alpha \iota \varsigma)$. Old word, perhaps from ons (root of o $\rho a \omega$, to see), opening, in N.T. only here and Jas 3:11. Cf. 1Ki 18:4; II Macc. 5:27; 10:6 (about Judas Maccabeus and others).

## Heb 11:39

These all (ov $\pi=\pi \alpha \nu \tau \varepsilon \varsigma)$. The whole list in verses 5-38. Cf. verse 13.
Through their faith $(\delta ı \alpha \pi \iota \sigma \tau \varepsilon \omega \varsigma)$. Here rather than $\pi \iota \sigma \tau \varepsilon$ as so often.
Received not the promise (ovк $\varepsilon \kappa о \mu \iota \sigma \alpha v \tau о \tau \eta \nu \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \iota \alpha \nu)$. First aorist middle of $\kappa о \mu \zeta \zeta \omega$. The Messianic promise they did not live to see ( $11: 13$ ), though they had individual special promises fulfilled as already shown (11:33).

Heb 11:40
God having provided ( $\tau 0 v \theta \varepsilon o v \pi \rho o \beta \lambda \varepsilon \psi \alpha \mu \varepsilon v o v$ ). Genitive absolute with first aorist middle participle of $\pi \rho \rho \beta \lambda \varepsilon \pi \omega$, late compound to foresee, here only in the N.T.

Some better thing ( $\kappa \varepsilon \iota \tau \tau \circ \nu \tau)$. "Something better," "the better promises" of 8:6.
That apart from us they should not be made perfect ( $v \alpha \mu \eta \chi \omega \rho \iota \varsigma \eta \mu \omega \nu \tau \varepsilon \lambda \varepsilon \iota \omega \theta \omega \sigma \iota$ ). Negative purpose clause with $\imath v \alpha \mu \eta$ and the first aorist passive subjunctive of $\tau \varepsilon \lambda \varepsilon \iota o \omega$. But this glorious and gracious purpose (foresight) of God is not due to any special merit in us. It is simply the fulness of the time in God's dispensation of grace of which we are the beneficiaries. But all the same and all the more (noblesse oblige), we should prove worthy of our heritage and of God's goodness to us and be loyal to Christ.

## Hebrews 12

Heb 12:1
Therefore ( $\tau o \iota \gamma \rho \circ \circ v$ ). Triple compound inferential participle ( $\tau 0 \mathrm{l}, \gamma \alpha \rho, \mathrm{ovv}$ ) like the German doch denn nun, a conclusion of emphasis, old particle, in N.T. only here and 1Th 4:8. There should be no chapter division here, since 12:1-3 really is the climax in the whole argument about the better promises ( $10: 19-12: 3$ ) with a passionate appeal for loyalty to Christ.

Us also (ка $\eta \mu \varepsilon \varsigma)$ ). We as well as "these all" of 11:39 and all the more because of the "something better" given us in the actual coming of Christ.

Compassed about ( $\varepsilon \chi \circ \vee \tau \varepsilon \varsigma \pi \varepsilon \rho ı \kappa \varepsilon \mu \varepsilon v \circ v$ ). Literally, "having ( $\varepsilon \chi \circ \vee \tau \varepsilon \varsigma$, present active participle of $\varepsilon \chi \omega$ ) lying around us" ( $\pi \varepsilon \rho \_\kappa \varepsilon \mu \varepsilon v o v$, present middle participle of $\pi \varepsilon \rho \kappa \kappa \varepsilon \mu \alpha$, old verb as in Lu 17:2 ).

Cloud of witnesses ( $v \varepsilon \varphi \circ \varsigma \mu \alpha \rho \tau \nu \rho \omega v$ ). Old word (Latin nubes), here only in the N.T., for vast mass of clouds. N $\varepsilon \varphi \varepsilon \lambda \eta$ is a single cloud. The metaphor refers to the great amphitheatre with the arena for the runners and the tiers upon tiers of seats rising up like a cloud. The $\mu \alpha \rho \tau \cup \rho \varepsilon \varsigma$ here are not mere spectators ( $\theta \varepsilon \alpha \tau \alpha$ ), but testifiers (witnesses) who testify from their own experience ( $11: 2,4,5,33,39$ ) to God's fulfilling his promises as shown in chapter Heb 11.

Laying aside ( $\alpha \pi o \theta \varepsilon \mu \varepsilon v o$ ). Second aorist-middle (indirect, from ourselves) participle of $\alpha \pi$ о $\tau 1 \theta \eta \mu$, old verb as in Col 3:8 (laying off old clothes). The runners ran in the stadium nearly naked.

Every weight ( $о \gamma \kappa о \nu \pi \alpha \nu \tau \alpha$ ). Old word (kin to $\varepsilon v \varepsilon \gamma \kappa \varepsilon ı \nu, \varphi \varepsilon \rho \omega$ ) like $\varphi о \rho \tau о \sigma, \beta \alpha \rho \circ \varsigma$. Here every encumbrance that handicaps like doubt, pride, sloth, anything. No trailing garment to hinder or trip one.

The sin which doth so easily beset us ( $\tau \eta v \varepsilon \cup \pi \varepsilon \rho เ \sigma \tau \alpha \tau 0 v \alpha \mu \alpha \rho \tau \iota \alpha v$ ). "The easily besetting sin." There are a dozen possible renderings of this double compound verbal from $\varepsilon v$, well, and $\pi \varepsilon \rho u \sigma \tau \eta \mu$, to place around or to stand around (intransitive). The Vulgate has circumstans nos peccatum (the sin standing around us). Probably this is the true idea here, "the easily encompassing (or surrounding) sin." In this case apostasy from Christ was that sin. In our cases it may be some other sin. The verbal adjective reminds one of the ring of wild beasts in the jungle that encircle the camp-fire at night each ready to pounce upon a careless victim.

Let us run ( $\tau \rho \varepsilon \chi \omega \mu \varepsilon v$ ). Present active volitive subjunctive of $\tau \rho \varepsilon \chi \omega$, "let us keep on running."

With patience ( $\delta \iota^{\prime} v \pi о \mu о v \eta \varsigma$ ). Not with impatience, doubt, or despair.
The race that is set before us ( $\tau 0 v \pi \rho о к \varepsilon \mu \varepsilon v o v \eta \mu i v \alpha \gamma \omega v \alpha$ ). Note the article and the present middle participle of $\pi \rho о \kappa \varepsilon \mu \alpha$, old compound (already in 6:18, and also in 12:2). Dative case ( $\eta \mu \mathrm{\nu} \nu)$ of personal interest.

Heb 12:2
Looking unto ( $\alpha \varphi \rho \rho \omega v \tau \varepsilon \varsigma \varepsilon \iota \varsigma$ ). Present active participle of $\alpha \varphi о \rho \alpha \omega$, old verb to look away, "looking away to Jesus." In N.T. only here and Php 2:23. Fix your eyes on Jesus, after a glance at "the cloud of witnesses," for he is the goal. Cf. Moses in 11:26 ( $\alpha \pi \varepsilon \beta \lambda \varepsilon \pi \varepsilon v$ ).

The author ( $\tau 0 \nu \alpha \rho \chi \eta \gamma \circ v$ ). See 2:10 for this word. "The pioneer of personal faith" (Moffatt).

Perfecter ( $\tau \varepsilon \lambda \varepsilon \iota \omega \tau \eta \nu$ ). A word apparently coined by the writer from $\tau \varepsilon \lambda \varepsilon \iota \circ \omega$ as it has been found nowhere else. Vulgate has consummator.

For the joy ( $\alpha v \tau \tau \eta \varsigma \chi \alpha \rho \alpha \varsigma)$. Answering to, in exchange for (verse 16), at the end of the race lay the joy "set before him" ( $\pi \rho о \kappa \varepsilon є \varepsilon \nu \eta \zeta \alpha v \tau \omega$ ), while here was the Cross ( $\sigma \tau \alpha v \rho \circ \nu$ ) at this end (the beginning of the race) which he endured (v $\tau \varepsilon \mu \varepsilon \iota v \varepsilon v$, aorist active indicative of $v \pi o \mu \varepsilon v \omega$ ),
despising shame ( $\alpha \iota \sigma \chi \cup \vee \eta \varsigma ~ к \alpha \tau \alpha \varphi \rho о \vee \eta \sigma \alpha \varsigma)$. The cross at his time brought only shame (most shameful of deaths, "yea, the death of the cross" Php 2:8). But Jesus despised that, in spite of the momentary shrinking from it, and did his Father's will by submitting to it.

Hath sat down ( $\kappa \varepsilon \kappa \alpha \theta \iota \kappa \varepsilon v)$. Perfect active indicative of $\kappa \alpha \theta \iota \zeta \omega$, and still is there ( 1:3).
Heb 12:3
Consider ( $\alpha v \alpha \lambda o \gamma \iota \sigma \alpha \sigma \theta \varepsilon$ ). First aorist middle imperative of $\alpha v \alpha \lambda о \gamma \iota \zeta \rho \mu \alpha$, old word to reckon up, to compare, to weigh, only here in the N.T. See катаvoך $\sigma \alpha \tau \varepsilon$ in $3: 1$. Understanding Jesus is the key to the whole problem, the cure for doubt and hesitation.

Endured (vло $\varepsilon \varepsilon \mu \varepsilon \vee \eta \kappa о \tau \alpha$ ). Perfect active participle of the same verb v $\tau \sigma \mu \varepsilon v \omega$ used in verse 2.

Gainsaying ( $\alpha v \tau \iota \lambda o \gamma \iota \alpha v$ ). Old word from $\alpha v \tau \iota \lambda o \gamma o \varsigma$ (from $\alpha \nu \tau \iota \lambda \varepsilon \gamma \omega$ ), already in 6:16; 7:7.

Of sinners (v $\frac{\tau 0}{} \tau \omega \nu \alpha \mu \alpha \rho \tau \omega \lambda \omega \nu$ ). "By sinners."
Against themselves ( $\varepsilon \iota \varsigma ~ \varepsilon \alpha \cup \tau 0 \cup \varsigma) . ~ A g a i n s t ~ t h e i r ~ b e t t e r ~ s e l v e s ~ i f ~ a ~ g e n u i n e ~ r e a d i n g . ~ B u t ~$ દıৎ モavtov (against himself), against Christ, is far more likely correct.

That ye wax not weary ( $\iota \nu \alpha \mu \eta \kappa \alpha \mu \eta \tau \varepsilon$ ). Negative final clause with $\iota \nu \alpha \mu \eta$ and the second aorist active subjunctive of $\kappa \alpha \mu \nu \omega$, old verb to be weary as here or sick as in Jas 5:15 .

Fainting in your souls ( $\tau \alpha \iota \varsigma \psi v \chi \alpha \iota \varsigma \nu \mu \omega \nu \varepsilon \kappa \lambda \nu о \mu \varepsilon v o$ ). Present passive participle of $\varepsilon \kappa \lambda \nu \omega$, old verb to loosen out, to set free, and in passive to be enfeebled, to be tired out (here in soul with locative case), as in verse 5 . The rest of the Epistle drives home the argument.

Heb 12:4
Resisted ( $\alpha \nu \tau \iota \kappa \alpha \tau \varepsilon \sigma \tau \eta \tau \varepsilon$ ). Second aorist active indicative (intransitive) of the double compound $\alpha v \tau \iota \kappa \alpha \theta เ \sigma \tau \eta \mu$, old verb to stand in opposition against in line of battle, intransitively to stand face to face ( $\alpha v \tau$ ) against ( $\kappa \alpha \tau \alpha$ ), here only in the N.T.
 other heroes of faith in chapter Heb 11.

Striving ( $\alpha v \tau \alpha \gamma \omega v \iota \zeta \rho \mu \varepsilon v o$ ). Present middle participle of $\alpha v \tau \alpha \gamma \omega v \iota \zeta \rho \mu \alpha$, old verb with the same figure in $\alpha v \tau$ เוкат $\varepsilon \sigma \tau \eta \tau \varepsilon$.

Against $\sin$ ( $\pi \rho o \varsigma ~ \alpha \mu \alpha \rho \tau \iota \alpha v$ ). Face to face with $\sin$ as in verse 1.
Heb 12:5
Ye have forgotten ( $\varepsilon \kappa \lambda \varepsilon \lambda \eta \sigma \theta \varepsilon$ ). Perfect middle indicative of $\varepsilon \kappa \lambda \alpha v \theta \alpha v \omega$, to cause to forget, old verb, here only in the N.T. with genitive case as usual.

Reasoneth with you ( $v \mu \nu \nu \delta \iota \alpha \lambda \varepsilon \gamma \varepsilon \tau \alpha)$. Present middle indicative of $\delta \Delta \alpha \lambda \varepsilon \gamma \circ \mu \alpha$, old verb to ponder different ( $\delta 1 \alpha-$ ) things, to converse, with dative. Cf. Ac 19:8f. The quotation is from Pr 3:11f.

Regard not lightly ( $\mu \eta \mathrm{o} \lambda \iota \gamma \omega \rho \varepsilon$ ). Prohibition with $\mu \eta$ and the present active imperative of o $\lambda \iota \gamma \omega \rho \varepsilon \omega$, old verb from o $\lambda \iota \gamma \omega \rho \circ \varsigma$ and this from o $\lambda \iota \gamma \circ \varsigma$ (little) and $\omega \rho \alpha$ (hour), old verb, here only in N.T.

Chastening ( $\pi \alpha \iota \delta \varepsilon ı \alpha \varsigma)$. Old word from $\pi \alpha \iota \delta \varepsilon v \omega$, to train a child ( $\pi \alpha \iota \varsigma$ ), instruction ( 2 Ti 3:16 ), which naturally includes correction and punishment as here. See also Eph 6:4 .

Nor faint ( $\mu \eta \delta \varepsilon \varepsilon \kappa \lambda \nu o v$ ). Prohibition with $\mu \eta$ and present passive imperative of $\varepsilon \kappa \lambda \nu \omega$ (see verse 3).

Heb 12:6
Scourgeth ( $\mu \alpha \sigma \tau i \gamma o$ ). Present active indicative of $\mu \alpha \sigma \tau \iota \gamma o \omega$, old verb from $\mu \alpha \sigma \tau \iota \xi$ (whip). This is a hard lesson for God's children to learn and to understand. See 5:7 about Jesus.

Heb 12:7
That ye endure ( $v \pi \sigma \mu \varepsilon v \varepsilon \tau \varepsilon$ ). Present active indicative or present active imperative and so just "endure for chastening."

Dealeth with you ( $\nu \mu \nu \tau \pi \rho \sigma \sigma \varphi \varepsilon \rho \varepsilon \tau \alpha)$. Present middle indicative of $\pi \rho \circ \sigma \varphi \varepsilon \rho \omega$, but this sense of bearing oneself towards one with the dative here only in the N.T., though often in the older Greek.

What ( $\tau ı \varsigma)$. Interrogative.
Whom (ov). Relative. Cf. Mt 7:9 .
Heb 12:8
If ye are without chastening ( $\varepsilon \chi \omega \rho \iota \varsigma \varepsilon \sigma \tau \varepsilon \pi \alpha \iota \delta \varepsilon ı \alpha)$ ). Condition of first class, determined as fulfilled. Note position of $\varepsilon \sigma \tau \varepsilon$ (are) between the preposition $\chi \omega \rho \iota \varsigma$ and $\pi \alpha \iota \delta \varepsilon \iota \alpha \varsigma$ (ablative case).

Have been made ( $\gamma \varepsilon \gamma o v a \sigma \iota v$ ). Perfect active indicative of $\gamma ı v o \mu \alpha$.
Partakers ( $\mu \varepsilon \tau о \chi 0$ ). Partners ( 3:14).
Then ( $\alpha \rho \alpha$ ). Accordingly, correspondingly.
Bastards (vo日o). Old word, here only in N.T. Illegitimate.
Heb 12:9
Furthermore ( $\varepsilon ו \tau \alpha)$. The next step in the argument (Mr 4:17).

We had ( $\varepsilon<\chi \circ \mu \varepsilon v$ ). Imperfect indicative of customary action, "we used to have."
To chasten us ( $\pi \alpha \iota \delta \varepsilon \nu \tau \alpha \varsigma$ ). Predicate accusative after $\varepsilon \chi \chi \circ \mu \varepsilon v$, "as chasteners." Old word from $\pi \alpha \iota \delta \varepsilon v \omega$, as agent ( $-\tau \eta \varsigma$ ). Only once in LXX (Ho 5:2) and twice in N.T. (here and Ro 2:20).

We gave them reverence ( $\varepsilon v \varepsilon \tau \rho \varepsilon \pi \sigma \mu \varepsilon \theta \alpha)$. Imperfect middle of old word $\varepsilon \nu \tau \rho \varepsilon \pi \omega$, to turn in or at. Here "we turned ourselves to" as in Mt 21:37, habitual attitude of reverence.

Shall we be in subjection ( $\cup \pi о \tau \alpha \gamma \eta \sigma \sigma \mu \varepsilon \theta \alpha$ ). Second future passive of $v \pi о \tau \alpha \sigma \sigma \omega$. There is no $\delta \varepsilon$ here to correspond to $\mu \varepsilon v$ in the first part of the verse.

Unto the father of spirits ( $\tau \omega \pi \alpha \tau \rho \tau \omega v \pi \nu \varepsilon \nu \mu \alpha \tau \omega v$ ). Rather, "Unto the Father of our spirits" (note article tov). As God is.

Heb 12:10
They (o $\mu \varepsilon v$ ). Demonstrative o in contrast ( $\mu \varepsilon v$ ).
Chastened ( $\varepsilon \pi \alpha \iota \delta \varepsilon v o v)$ ). Imperfect active, used to chasten.
As seemed good to them (ката тo $\delta$ oкоuv av good to them." $\Delta$ okouv is present active neuter singular articular participle of $\delta$ oкع $\omega$.

But he (o $\delta \varepsilon$ ). Demonstrative with $\delta \varepsilon$ vs. $\mu \varepsilon v$.
For our profit ( $\varepsilon \pi \tau \tau \sigma \nu \mu \varphi \varepsilon \rho \circ v$ ). Present active articular neuter singular participle of $\sigma \nu \mu \varphi \varepsilon \rho \omega$, to bear together as in 1Co 12:7.

That we may be partakers ( $\varepsilon ા \varsigma ~ \tau 0 ~ \mu \varepsilon \tau \alpha \lambda \alpha \beta \varepsilon \iota v)$. Articular second aorist active infinitive of $\mu \varepsilon \tau \alpha \lambda \alpha \mu \beta \alpha v \omega$ with $\varepsilon ו \varsigma$ for purpose, "for the partaking."
 word, in N.T. only here and 2Co 1:12 .

Heb 12:11
For the present ( $\pi \rho \circ \varsigma$ to $\pi \alpha \rho \circ v$ ). A classical phrase (Thucydides), $\pi \rho o \varsigma$ with the accusative neuter singular articular participle of $\pi \alpha \rho \varepsilon \mu$, to be beside.

Not joyous, but grievous (ov $\chi \alpha \rho \alpha \sigma, \alpha \lambda \lambda \alpha \lambda \nu \pi \eta \zeta)$. Predicate ablative (springing from) or predicate genitive (marked by). Either makes sense, but note predicate ablative in 2Co 4:7 (ка тоv $\theta$ воง ка $\mu \eta \varepsilon \xi \eta \mu \omega v$ ).

Peaceable fruit (карто⿱ $\varepsilon \iota \rho \eta \iota \kappa о v) . ~ O l d ~ a d j e c t i v e ~ f r o m ~ \varepsilon ı \rho \eta \nu \eta ~(р е а с е), ~ i n ~ N . T . ~ o n l y ~$ here and Jas $3: 17$. Peaceable after the chastening is over.

Exercised thereby ( $\left.\delta i^{\prime} \alpha 0 \tau \eta \varsigma \gamma \varepsilon \gamma \nu \mu v a \sigma \mu \varepsilon v o \iota \varsigma\right)$. Perfect passive participle (dative case) of $\gamma \cup \mu \nu \alpha \zeta \omega$, state of completion, picturing the discipline as a gymnasium like 5:14; 1Ti 4:17

## Heb 12:12

Wherefore ( $\delta$ ıo). Because of the chastening.
Lift up ( $\alpha v o \rho \theta \omega \sigma \alpha \tau \varepsilon$ ). First aorist active imperative of $\alpha v o \rho \theta o \omega$, old compound (from ava, opӨos) to make straight, in N.T. here and Lu 13:13; Ac 15:16.

Hang down ( $\pi \alpha \rho \varepsilon \iota \mu \varepsilon \alpha \varsigma)$. Perfect passive participle of $\pi \alpha \rho ı \eta \mu$, old verb to let pass, to relax, in N.T. only here and Lu 11:42.

Palsied ( $\pi \alpha \rho \alpha \lambda \varepsilon \lambda \nu \mu \varepsilon v \alpha$ ). Perfect passive participle of $\pi \alpha \rho \alpha \lambda \nu \omega$, old verb to loosen on the side, to dissolve, to paralyze (Lu 5:18,24).

Heb 12:13
Straight paths ( $\tau \rho о \chi \iota \alpha \varsigma о \rho \theta a \varsigma)$. Track of a wheel ( $\tau \rho о \chi \circ \varsigma$, Jas 3:6 from $\tau \rho \varepsilon \chi \omega$, to run), here only in N.T. "Straight (o $\rho \theta a \varsigma$ ) wheel tracks."

Be not turned out of the way ( $\imath \alpha \alpha \mu \eta \varepsilon \kappa \tau \rho \alpha \pi \eta$ ). Negative final clause with $\imath v \alpha \mu \eta$ and second aorist passive of $\varepsilon \kappa \tau \rho \varepsilon \pi \omega$, old verb to turn out, to twist, to put out of joint. So 1 Ti 1:6. Vivid picture of concern for the lame ( $\chi \omega \lambda$ ov, as in Mt 11:5). Graphic picture of concern for the weak, a good argument for prohibition also.

Heb 12:14
Follow after peace $(\varepsilon \iota \rho \eta \nu \eta \nu \delta \iota \omega \kappa \varepsilon \tau \varepsilon)$. Give peace a chase as if in a hunt.
With all men ( $\mu \varepsilon \tau \alpha \pi \alpha \nu \tau \omega v$ ). Like Paul's use of $\delta \iota \omega \kappa \omega$ with $\varepsilon \iota \rho \nu \eta \nu$ in Ro 14:19 and his to $\varepsilon \xi v \mu \omega \nu$ (so far as proceeds from you) in 12:18. This lesson the whole world needs including Christians.

Sanctification ( $\alpha \gamma \iota \alpha \sigma \mu \circ v$ ). Consecration as in 1Th 4:7; Ro 6:19, etc.
Without which (ov $\chi \omega \rho \stackrel{)}{ }$ ). Ablative case of the relative with $\chi \omega \rho \iota \varsigma$ (post positive here). About seeing God compare Mt 5:8 where we have ка $\theta \alpha \rho$.

Heb 12:15
Looking carefully ( $\varepsilon \pi \iota \sigma \kappa о \pi о \cup \nu \tau \varepsilon \varsigma)$. Present active participle of $\varepsilon \pi \iota \sigma \kappa о \pi \varepsilon \omega$, to have oversight, in N.T. only here and 1Pe 5:2 . Cf. $\varepsilon \pi \iota \sigma \chi$ олоৎ (bishop).

Lest there be any man $(\mu \eta \tau \iota \varsigma)$. Negative purpose clause with $\varepsilon$ (present active subjunctive) omitted.

Falleth short of ( $v \sigma \tau \varepsilon \rho \omega \nu \alpha \pi 0$ ). Present active participle of $v \sigma \tau \varepsilon \rho \varepsilon \omega$ (see 4:1) agreeing with $\tau \iota$. Followed here by a $\alpha 0$ and the ablative.

Root of bitterness . ( $\rho \iota \zeta \alpha \pi \iota \kappa \rho \iota \varsigma)$. Quoted from De 29:18. Vivid picture.
Springing up ( $\alpha \nu \omega \varphi v o v \sigma \alpha$ ). Present active participle of $\varphi v \omega$, to sprout. Pictured here as a quick process. Also from De 29:18.

Trouble ( $\varepsilon v o \chi \lambda \eta$ ). Present active subjunctive (in final clause with $\mu \eta \tau \iota \varsigma$ ) of $\varepsilon v o \chi \lambda \varepsilon \omega$, old verb to trouble with a crowd, to annoy. In N.T. only here and Lu 6:18 .

Be defiled ( $\mu \iota \alpha \vee \theta \omega \sigma v$ ). First aorist passive subjunctive (in final clause with $\mu \eta$ ) of $\mu \alpha \nu \omega$, old verb to dye, to stain, to defile as in Tit 1:15 (the conscience). The contagion of sin is terrible as any disease.

Heb 12:16
Profane ( $\beta \varepsilon \beta \eta \lambda$ os). Trodden under foot, unhallowed (1Ti 1:9).
For one mess of meat ( $\alpha \nu \tau \beta \rho \omega \sigma \varepsilon \omega \varsigma \mu \iota \varsigma)$. Idea of exchange, "for one act of eating" (1Co 8:4).

Sold (ar\& $\delta \varepsilon \tau 0)$. Second aorist middle indicative from $\mathrm{Ge} 25: 31,33$, and with irregular form for $\alpha \pi \varepsilon \delta$ oto (regular $\mu$ form).

His own birthright ( $\tau \alpha \pi \rho \omega \tau о \tau о к ⿺ \alpha$ عav $\alpha о v$ ). From Genesis also and in Philo, only here in N.T. From лрштотокос (first born, Heb 1:6 ).

Heb 12:17
Ye know (เఠte). Regular form for the second person of ot $\delta \alpha$ rather than the Koine oı $\delta a \tau \varepsilon$.

He was rejected ( $\alpha \pi \varepsilon \delta о к ц \mu \sigma \theta \eta$ ). First aorist passive indicative of $\alpha \pi о \delta о \kappa \mu \alpha \zeta \omega$, old verb to disapprove (Mt 21:42).

Place of repentance ( $\mu \varepsilon \tau \alpha v o l \alpha \varsigma ~ \tau о \pi о v)$. Metavola is change of mind and purpose, not sorrow though he had tears ( $\mu \varepsilon \tau \alpha \delta \alpha \kappa \rho v \omega v$ ) afterwards as told in Ge 27:38. He sought it ( $\alpha \cup \tau \eta \nu$, the blessing $\varepsilon \cup \lambda o \gamma \iota \alpha v$ ) with tears, but in vain. There was no change of mind in Isaac. The choice was irrevocable as Isaac shows (Ge 27:33). Esau is a tragic example of one who does a wilful sin which allows no second chance (Heb 6:6; 10:26). The author presses the case of Esau as a warning to the Christians who were tempted to give up Christ.

Heb 12:18
Ye are not come (ov $\pi \rho \circ \sigma \varepsilon \lambda \eta \lambda \nu \theta \alpha \tau \varepsilon$ ). Perfect active indicative of $\pi \rho \circ \sigma \varepsilon \rho \chi \circ \mu \alpha$. There is no word here in the Greek for "a mount" like ope in verses 20,22 (and Ex 19:12f.; De 4:11 ), but it is clearly understood since the dative participles agree with it unless they be taken as descriptive of $\pi v \rho$ ("a palpable and kindled fire " when $\pi v \rho$ would be the dative case after $\pi \rho о \sigma \varepsilon \lambda \eta \lambda \nu \theta \alpha \tau \varepsilon)$.

That might be touched ( $\psi \eta \lambda \alpha \varphi \omega \mu \varepsilon v \omega$ ). Present passive participle (dative case) of $\psi \eta \lambda \alpha \varphi \alpha \omega$, old verb to handle, to touch ( $\mathrm{Lu} 24: 39$ ).

That burned with fire ( $\kappa \varepsilon \kappa \alpha \nu \mu \varepsilon v \omega \pi v \rho$ ). Perfect passive participle of $\kappa \alpha \omega \omega$, old verb to burn, with instrumental case $\pi \nu \rho$ (fire), unless the other view (above) is correct.

Heb 12:19
Unto blackness ( $\gamma \vee \circ \varphi \omega$ ). Dative case of $\gamma v o \varphi \circ \varsigma$ (late form for earlier $\delta \nu \circ \varphi \circ \varsigma$ and kin to $v \varepsilon \varphi \circ \varsigma$, cloud), here only in N.T. Quoted here from Ex 10:22 .

Darkness ( $\zeta \circ \varphi \omega$ ). Old word, in Homer for the gloom of the world below. In the Symmachus Version of Ex 10:22, also in Jude 1:6; 2Pe 2:4,15 .

Tempest $(\theta v \varepsilon \lambda \lambda \eta)$. Old word from $\theta v \omega$ (to boil, to rage), a hurricane, here only in N.T. From Ex 10:22 .

The sound of a trumpet ( $\sigma \alpha \lambda \pi \gamma \gamma \gamma \circ \varsigma \eta \chi \omega)$. From Ex 19:16. E $\chi \circ \varsigma$ is an old word (our $\varepsilon \chi($ ) as in Lu 21:25; Ac 2:2 .

The voice of words ( $\varphi \omega v \eta \rho \eta \mu \alpha \tau \omega v$ ). From Ex 19:19; De 4:12 .
Which voice $(\eta \zeta)$. Relative referring to $\varphi \omega v \eta$ (voice) just before, genitive case with aкovб $\alpha \nu \tau \varepsilon \varsigma$ (heard, aorist active participle).

Intreated ( $\pi \alpha \rho \eta \iota \tau \eta \sigma \alpha \nu \tau 0$ ). First aorist middle (indirect) indicative of $\pi \alpha \rho \alpha \iota \tau \sigma \mu \alpha$, old verb, to ask from alongside ( Mr 15:6) , then to beg away from oneself, to depreciate as here, to decline (Ac 25:11), to excuse ( $\operatorname{Lu} 14: 18$ ), to avoid (1Ti 4:7).
 passive infinitive of $\pi \rho o \sigma \tau i \theta \eta \mu$, old word to add, here with accusative of general reference ( $\lambda$ opov), "that no word be added unto them." Some MSS. have here a redundant negative $\mu \eta$ with the infinitive because of the negative idea in $\pi \alpha \rho \eta \iota \tau \eta \sigma \alpha \nu \tau 0$ as in $\mathrm{Ga} 5: 7$.

Heb 12:20
For they could not endure (ovk $\varepsilon \varphi \varepsilon \rho \circ v \gamma \alpha \rho$ ). Imperfect active of $\varphi \varepsilon \rho \omega$, "for they were not enduring (bearing)."

That which was enjoined ( $\tau \mathrm{o} \delta \iota \alpha \sigma \tau \varepsilon \lambda \lambda o \mu \varepsilon v o v$ ). Present passive articular participle of $\delta ı a \sigma \tau \varepsilon \lambda \lambda \omega$, old verb to distinguish, to dispose, to order. The quotation is from Ex 19:12f. The people appealed to Moses (Ex 20:19) and the leaders did so also (De 5:23f. ), both in terror.

If even ( $\kappa \alpha v$ ). "Even if." Condition of third class with second aorist active subjunctive of $\theta\llcorner\gamma \gamma \alpha v \omega$ as in 11:28, followed by genitive opovৎ (mountain).

It shall be stoned ( $\left.\lambda_{1} \theta_{0} \beta \circ \lambda \eta \theta \eta \sigma \varepsilon \tau \alpha\right)$. From Ex 19:13. Late compound verb from $\lambda_{1} \theta_{\mathrm{o}} \beta_{0} \lambda_{\mathrm{o}}$ (from $\lambda_{\mathrm{l}} \theta_{\mathrm{oo}}, \beta \alpha \lambda \lambda \omega$ ) as in Mt 21:35.

Heb 12:21
Fearful ( $\varphi o \beta \varepsilon \rho o v$ ). As in 10:27,31, only in Heb. in N.T.
The appearance ( $\tau 0 ~ \varphi \alpha v \tau \alpha \zeta \rho \mu \varepsilon v o v)$. Present passive articular participle of $\varphi \alpha v \tau \alpha \zeta \omega$, old verb from $\varphi a \iota v \omega$, to make visible, here only in N.T. "The manifestation."

I exceedingly fear and quake ( $\varepsilon \kappa \varphi о \beta о \varsigma \varepsilon \mu \kappa \alpha \varepsilon \nu \tau \rho о \mu \circ \varsigma)$. "I am terrified ( $\varepsilon \kappa \varphi \circ \beta \circ \varsigma$, late compound like $\varepsilon \kappa \varphi \circ \beta \varepsilon \omega$, to frighten, $\mathrm{Mr} 9: 6$ ) and trembling" ( $\varepsilon v \tau \rho \circ \mu \circ \varsigma$, late compound like $\varepsilon \nu \tau \rho \varepsilon \mu \omega$, to tremble at, as in Ac 7:32; 16:29). Екчоßос is quoted from De 9:19.

Heb 12:22
But ( $\alpha \lambda \lambda \alpha$ ). Sharp contrast to verse 18 with same form $\pi \rho \circ \sigma \varepsilon \lambda \eta \lambda \nu \theta \alpha \tau \varepsilon$.
Unto Mount Zion ( $\Sigma(\omega \vee \rho \rho \varepsilon$ ). Dative case of opoc, as with the other substantives. In contrast to Mount Sinai (verses 18-21). Paul has contrasted Mount Sinai (present Jerusalem) with the Jerusalem above (heaven) in Ga 4:21-31 .

City ( $\pi \mathrm{o} \lambda \varepsilon$ ). As in 11:10,16. Heaven is termed thus a spiritual mountain and city.
The heavenly Jerusalem (I $\varepsilon \rho о \cup \sigma \alpha \lambda \varepsilon \mu \varepsilon \pi \sigma \cup \rho \alpha v i \omega$ ). See 11:10,16; Isa 60:14 .
Innumerable hosts of angels ( $\mu \nu \rho ı \alpha \sigma \iota v ~ a \gamma \gamma \varepsilon \lambda \omega v$ ). "Myriads of angels." Mupıa̧ is an old word (from $\mu v \rho$ oo, 1 Co 4:15) as in Lu 12:1 .

Heb 12:23
To the general assembly ( $\pi \alpha \nu \eta \gamma v \rho \varepsilon$ ). Old word (from $\pi \alpha \varsigma$ and $\alpha \gamma \nu \rho ı \sigma, ~ a \gamma \varepsilon \rho \rho \omega$ ). Here only in N.T. Пavnүupiऽ $\omega$ occurs in Isa 66:10 for keeping a festal holiday. Possibly to be connected with $\alpha \gamma \gamma \varepsilon \lambda \omega v$, though not certain.

Church of the firstborn ( $\varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha \pi \rho \omega \tau о \tau о \kappa \omega \nu)$. Probably an additional item besides the angelic host as the people of Israel are called firstborn (Ex 4:22). The word $\varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$ here has the general sense of all the redeemed, as in Mt 16:18; Col 1:18; Eph 5:24-32, and equivalent to the kingdom of God.

Who are enrolled in heaven ( $\alpha \pi \sigma \gamma \varepsilon \gamma \rho \alpha \mu \mu \varepsilon \nu \omega v \varepsilon v$ ov $\alpha, \nu \circ \iota$ ). Perfect passive participle of $\alpha \pi \sigma \gamma \rho \alpha \varphi \omega$, old verb to write off, to copy, to enroll as in Lu 2:1,3,5 (only N.T. examples). Enrolled as citizens of heaven even while on earth (Lu 10:20; Php 1:27; 3:20; 4:3; Re 13:8, etc.).

To God the Judge of all ( $\kappa \rho \iota \tau \eta \varepsilon \omega \pi \alpha v \tau \omega v$ ). All these chief substantives in the dative case. People should not forget that God is the Judge of all men.

Made perfect $(\tau \varepsilon \tau \varepsilon \lambda \varepsilon เ \omega \mu \varepsilon v \omega v)$. Perfect passive participle of $\tau \varepsilon \lambda \varepsilon \iota \sigma \omega$, perfected at last ( 11:40).

Heb 12:24
To Jesus (Iqбov). This great fact is not to be overlooked (Php 2:10f. ). He is there as Lord and Saviour and still "Jesus."

The mediator of a new covenant ( $\delta \iota \alpha \theta \kappa \eta \varsigma \nu \varepsilon \alpha \varsigma \mu \varepsilon \sigma \iota \tau \eta$ ). As already shown (7:22; $8: 6,8,9,10 ; 9: 15$ ) and now gloriously consummated.

To the blood of sprinkling ( $\alpha \mu \alpha \tau \rho \alpha v \tau \iota \sigma \mathrm{ov}$ ). As in 9:19-28.
Than Abel ( $\pi \alpha \rho \alpha$ тov $\mathrm{A} \beta \varepsilon \lambda$ ). Accusative as in 1:4.
Better ( $\kappa \rho \varepsilon \iota \tau \tau \circ$ ). Comparative of $\kappa \alpha \lambda$ ос. Abel's blood still speaks ( $11: 4$ ), but it is as nothing compared to that of Jesus.

Heb 12:25
See $(\beta \lambda \varepsilon \pi \varepsilon \tau \varepsilon)$. Earnest word as in 3:12. Driving home the whole argument of the Epistle by this powerful contrast between Mount Zion and Mount Sinai. The consequences are dreadful to apostates now, for Zion has greater terrors than Sinai, great as those were.

That ye refuse not ( $\mu \eta \pi \alpha \rho \alpha \iota \tau \eta \sigma \sigma \theta \varepsilon$ ). Negative purpose with $\mu \eta$ and the first aorist middle subjunctive of $\pi \alpha \rho \alpha \iota \tau \varepsilon \mu \alpha$, the same verb used in verse 19 about the conduct of the Israelites at Sinai and also below.

Him that speaketh ( $\tau 0 v \lambda \alpha \lambda o u v \tau \alpha$ ). Present active articular participle of $\lambda \alpha \lambda \varepsilon \omega$ as in verse 24 (Jesus speaking by his blood).

For if they did not escape ( $\varepsilon \gamma \alpha \rho \varepsilon \kappa \varepsilon \iota v o ~ о \cup к ~ \varepsilon \xi \varepsilon \varphi \cup \gamma о v)$. Condition of first class with $\varepsilon$ and second aorist active indicative of $\varepsilon \kappa \varphi \varepsilon v \gamma \omega$, to escape. Direct reference to Sinai with use of the same verb again ( $\pi \alpha \rho \alpha \iota \tau \eta \sigma \alpha \mu \varepsilon \sigma$, when they refused).

Him that warned ( $\tau 0 v \chi \rho \eta \mu \alpha \tau \iota \zeta о \nu \tau \alpha$ ). That is Moses. For $\chi \rho \eta \mu \alpha \tau \iota \zeta \omega$ see 8:5; 11:7.
Much more we ( $\pi 0 \lambda v \mu \alpha \lambda \lambda o v \eta \mu \varepsilon \iota \varsigma)$. Argument from the less to the greater, $\pi \mathrm{o} \lambda \nu$, adverbial accusative case. The verb has to be supplied from the condition, "We shall not escape." Our chance to escape is far less, "we who turn away ( $\alpha \pi \sigma \sigma \tau \rho \varepsilon \varphi \rho \mu \varepsilon v o$, middle participle,
turn ourselves away from) the one from heaven ( $\tau 0 v \alpha \pi^{\prime} \operatorname{ov} \rho \alpha v \omega v$ )," God speaking through his Son ( 1:2).

Heb 12:26
Then shook ( $\varepsilon \sigma \alpha \lambda \varepsilon v \sigma \varepsilon v \tau 0 \tau \varepsilon)$. Old verb as in Mt 11:7.
He hath promised ( $\varepsilon \pi \eta \gamma \gamma \varepsilon \lambda \tau \alpha$ ). Perfect middle indicative of $\varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$ and it still holds. He quotes Hag 2:6 .

Will I make to tremble ( $\sigma \varepsilon \iota \sigma \omega$ ). Old and strong verb (here future active) $\sigma \varepsilon \epsilon \omega$, to agitate, to cause to tremble as in Mt 21:10. The author applies this "yet once more" ( $\varepsilon \tau \alpha \pi \alpha \xi)$ and the reference to heaven ( $\boldsymbol{\tau} \boldsymbol{r}$ oupavov) to the second and final "shaking" at the Second Coming of Jesus Christ for judgement ( 9:28).

Heb 12:27
And this word ( $\tau$ o $\delta \varepsilon$ ). He uses the article to point out " $\varepsilon \tau \alpha \pi \alpha \xi$ " which he explains ( $\delta \eta \lambda 0$, signifies, present active indicative of $\delta \eta \lambda o \omega$ ).

The removing ( $\tau \eta \nu \mu \varepsilon \tau \alpha \theta \varepsilon \sigma เ v$ ). For this word see 7:12; 11:5. For the transitory nature of the world see 1Co 7:31; 1Jo 2:17. "There is a divine purpose in the cosmic catastrophe" (Moffatt).

Made ( $\pi \varepsilon \pi \sigma \circ \eta \mu \varepsilon v \omega v$ ). Perfect passive participle of $\pi$ oı $\varepsilon \omega$. Made by God, but made to pass away.

That those things which are not shaken may remain (iva $\mu \varepsilon ı v \eta \tau \alpha \mu \eta \sigma \alpha \lambda \varepsilon v o \mu \varepsilon v \alpha$ ). Final clause with $\mu \eta$ and the first aorist active subjunctive of $\mu \varepsilon v \omega$. The Kingdom of God is not shaken, fearful as some saints are about it.

Heb 12:28
Wherefore ( $\delta$ to). Ground for loyalty to Christ and for calm trust in God.
That cannot be shaken ( $\alpha \sigma \alpha \lambda \varepsilon \cup \tau o v$ ). Old compound with alpha privative and the verbal adjective from $\sigma \alpha \lambda \varepsilon v \omega$ just used. In N.T. only here and Ac 27:41 .

Let us have grace ( $\varepsilon \chi \omega \mu \varepsilon v \chi \alpha \rho \iota v$ ). Present active volitive subjunctive of $\varepsilon \chi \omega$, "Let us keep on having grace" as in 4:16, though it can mean "Let us keep on having gratitude" as in Lu 17:9.

Whereby ( $\delta \iota^{\prime} \eta \varsigma$ ). That is $\delta \iota \alpha$ रapıtoc.
We may offer service ( $\lambda \alpha \tau \rho \varepsilon v \omega \mu \varepsilon v$ ). This subjunctive in a relative clause can be volitive like $\varepsilon \chi \omega \mu \varepsilon v$ just before (cf. imperative $\sigma \tau \eta \tau \varepsilon$ in $1 \mathrm{Pe} 5: 12$ ) or it might be the futuristic subjunctive as in 8:3 (o $\pi \rho о \sigma \varepsilon v \varepsilon \gamma \kappa \eta)$ ).

Well pleasing ( $\varepsilon v a \rho \varepsilon \sigma \tau \omega \varsigma)$. Old compound adverb, here only in N.T.
With reverence and awe ( $\mu \varepsilon \tau \alpha \varepsilon \cup \lambda \alpha \beta \varepsilon ı \alpha \varsigma ~ \kappa \alpha ~ \delta \varepsilon о и \varsigma) . ~ F o r ~ \varepsilon u \lambda \alpha \beta \varepsilon ı \alpha ~ s e e ~ 5: 7 ; ~ 11: 7 ~ . ~ \Delta \varepsilon o \varsigma ~$ is apprehension of danger as in a forest. "When the voice and tread of a wild beast are distinctly heard close at hand the $\delta$ roc becomes $\varphi \circ \beta \circ \varsigma$ " (Vincent).

Heb 12:29

A consuming fire ( $\pi \cup \rho$ катаva入ıбкоv). From De 4:24. Present active participle of катаva入ıбк $\omega$, old compound verb, here only in the N.T. This verse is to be coupled with 10:31.

## Hebrews 13

Heb 13:1
Brotherly love ( $\varphi \backslash \lambda \alpha \delta \varepsilon \lambda \varphi ı \alpha)$. Late word from $\varphi \backslash \lambda \alpha \delta \varepsilon \lambda \varphi \circ \varsigma$ ( $1 \mathrm{Pe} 3: 8$ ). See 1Th 4:9. It is always in order in a church.

To show love unto strangers ( $\tau \eta \varsigma \varphi i \lambda o \xi \varepsilon v i a \varsigma)$. Old word for hospitality, from $\varphi \backslash \lambda o \xi \varepsilon v o \varsigma$ (1Ti 3:2), in N.T. only here and Ro 12:3. In genitive case with $\varepsilon \pi \iota \lambda \alpha v \theta \alpha v \varepsilon \sigma \theta \varepsilon$ (present middle imperative, cf. Heb 6:10 ).

Have entertained angels unawares ( $\varepsilon \lambda \alpha \theta$ ov $\xi \varepsilon v / \sigma \alpha \nu \tau \varepsilon \varsigma \alpha \gamma \gamma \varepsilon \lambda o u \varsigma)$. Second aorist active indicative of $\lambda \alpha v \theta \alpha v \omega$, old verb to escape notice and first aorist active participle of $\xi \varepsilon v \iota \zeta \omega$, old verb to entertain a guest ( $\xi \varepsilon v o \varsigma$, stranger), according to a classic idiom seen with $\lambda \alpha v \theta \alpha v \omega$, $\tau v \gamma \chi \alpha v \omega, \varphi \theta \alpha v \omega$, by which the chief idea is expressed by the participle (supplementary participle), here meaning, "some escaped notice when entertaining angels." The reference is to Ge 18; 19 (Abraham and Sarah did this very thing).

Heb 13:2
As bound with them ( $\omega \varsigma \sigma \cup v \delta \varepsilon \delta \varepsilon \mu \varepsilon v o$ ). Perfect passive participle of $\sigma u v \delta \varepsilon \omega$, old verb, here only in N.T. For sympathy with prisoners see 10:34.

As being yourselves also in the body ( $\omega \varsigma \kappa \alpha \alpha v \tau 0$ ovteऽ $\varepsilon v \sigma \omega \mu \alpha \tau$ ). And so subject to evil treatment. See 11:37 for какоихє $\boldsymbol{\omega}$ and 11:25 for $\sigma \cup v к а к о и \chi \varepsilon \omega . ~$

Heb 13:4
Let marriage be ( $\mathrm{o} \gamma \alpha \mu \circ \varsigma$ ). No verb in the Greek. The copula can be supplied either $\varepsilon \sigma \tau \iota \nu$ (is) or $\varepsilon \sigma \tau \omega$ (let be, imperative).

Had in honour ( $\tau \iota \iota \circ \varsigma$ ). Old adjective from $\tau \mu \eta$ (honour) as in Ac 5:34. Га $\mu \circ$ elsewhere in the N.T., means the wedding or wedding feast (Mt 22:29; Joh 2:1 ).

Undefiled (a $\mu \alpha v \tau o \varsigma)$. Old compound word (alpha privative and verbal of $\mu \alpha \alpha \nu \omega$, to defile), already in Heb 7:26. Mı $1 \nu \omega \tau \eta \nu$ кoı $\tau \eta$ is a common expression for adultery.

Fornicators (лорvoия). Unmarried and impure.
Adulterers ( $\mu$ or $\chi$ оия). Impure married persons. God will judge both classes whether men do or not.

Heb 13:5
Be ye free from the love of money ( $\alpha \varphi \iota \lambda \alpha \rho \gamma \cup \rho о \varsigma$ o т $\rho о \pi о \varsigma$ ). No copula, but supply
 ( $\alpha \varphi i \lambda \alpha \rho \gamma v \rho o \varsigma$, double compound), once found only in the N.T., here and 1Ti 3:3, but now several times--or the adverb $\alpha \varphi ı \lambda \alpha \rho \gamma \cup \rho \omega \varsigma$--in papyri and inscriptions (Deissmann, Light, etc., pp. 85f.). Alpha privative and $\varphi i \lambda o s$ and $\alpha \rho \gamma v \rho o s$. The N.T. is full of the peril of money on the character as modern life is also.

Content with such things as ye have ( $\alpha \rho \kappa о \cup \mu \varepsilon v o ~ \tau о \iota \varsigma ~ \pi \alpha \rho о v \sigma ı v) . ~ P r e s e n t ~ p a s s i v e ~ p a r-~$ ticiple of $\alpha \rho \kappa \varepsilon \omega$, to suffice, to be content as in Lu 3:14. Cf. аขтаркףऽ in Php 4:11 . Here in
the nominative plural with no substantive or pronoun (anacoluthon, as in 2Co 1:7) or the participle used as a principal verb as in Ro 12:16 . "Contented with the present things" (tors $\pi \alpha \rho o v \sigma \iota v$, associative instrumental case of $\tau \alpha \pi \alpha \rho \circ \nu \tau \alpha$, present active neuter plural participle of $\pi \alpha \rho \varepsilon \mu$, to be present or on hand).
 active indicative as in 1:13; 4:3f.; 10:9. The quotation is a free paraphrase of Ge 28:15; De 31:8; Jos 1:5; 1Ch 28:20. Philo (de Confus. Ling. 32) has it in this form, "a popular paraphrase" (Moffatt). Note the five negatives strengthening each other (ov $\mu \eta$ with the second aorist active subjunctive $\alpha v \omega$ from $\alpha v ı \eta \mu$, to relate, as in Ac 16:26; ov $\delta^{\prime}$ ov $\mu \eta$ with second aorist active subjunctive $\varepsilon \gamma \kappa \alpha \tau \alpha \lambda \iota \pi \omega$ from $\varepsilon \gamma \kappa \alpha \tau \alpha \lambda \varepsilon \iota \pi \omega$, to leave behind, as in Mt 27:46; 2Ti 4:10 ). A noble promise in times of depression.

Heb 13:6
So that we say ( $\omega \sigma \tau \varepsilon \eta \mu a \varsigma \lambda \varepsilon \gamma \varepsilon เ v)$. The usual construction (the infinitive) with $\omega \sigma \tau \varepsilon$ in the Koine even when the idea is result instead of purpose. The accusative $\eta \mu a \varsigma$ is that of general reference.

With good courage ( $\theta \alpha \rho \rho o u v \tau \alpha \varsigma)$. Present active participle of $\theta a \rho \rho \varepsilon \omega$ (Ionic and early Attic $\theta \alpha \rho \sigma \varepsilon \omega$, Mt 9:2 ) as in 2Co 5:6,8. The accusative agreeing with $\eta \mu \alpha \varsigma$, "being of good courage." The quotation is from Ps 118:6.

My helper ( $\varepsilon \mu \circ$ $\beta$ oŋ $\theta$ oc). "Helper to me" (ethical dative $\varepsilon \mu \circ$ ). Boŋ $\theta$ os is old adjective (cf. $\beta o \eta \theta \varepsilon \omega$, to help, 2:18), often in LXX as substantive, here only in N.T.

I will not fear ( $\mathrm{ov} \varphi о \beta \eta \theta \eta \sigma \circ \mu \alpha$ ). Volitive first future passive of $\varphi \circ \beta \varepsilon о \mu \alpha$.
Heb 13:7
Remember ( $\mu \nu \eta \mu$ ovevete). Present active imperative of $\mu \nu \eta \mu \circ v \varepsilon v \omega$, old verb to be mindful of (from $\mu \nu \eta \mu \omega v$, mindful) with genitive (Joh 15:20) or accusative (Mt 16:9). "Keep in mind." Cf. 11:22.

Them that had the rule over you ( $\tau \omega v \eta \gamma \circ \nu \mu \varepsilon v \omega v \nu \mu \omega v$ ). Present middle participle of $\eta \gamma \varepsilon o \mu \alpha$ with genitive of the person $(\nu \mu \omega v)$ as in verses 17,24 . The author reminds them of the founders of their church in addition to the long list of heroes in chapter Ac 11 . See a like exhortation to respect and follow their leaders in 1Th 5:12f. Few lessons are harder for the average Christian to learn, viz., good following.

The word of God ( $\tau 0 \nu \lambda o \gamma o v \tau o v \theta \varepsilon o v$ ). The preaching of these early disciples, apostles, and prophets (1Co 1:17).

And considering the issue of their life ( $\omega \nu \alpha v \alpha \theta \varepsilon \omega \rho \circ \cup \nu \tau \varepsilon \varsigma \tau \eta \nu \varepsilon \kappa \beta \alpha \sigma \nu \nu \tau \eta$ $\alpha v a \sigma \tau \rho о \varphi \eta \varsigma)$. No "and" in the Greek, but the relative $\omega v$ (whose) in the genitive case after $\alpha v \alpha \sigma \tau \rho о \varphi \eta \varsigma$, "considering the issue of whose life." Present active participle of $\alpha v \alpha \theta \varepsilon \omega \rho \varepsilon \omega$, late compound, to look up a subject, to investigate, to observe accurately, in N.T. only here and Ac 17:23. Ек $\beta \alpha \sigma \iota \varsigma$ is an old word from $\varepsilon \kappa \beta \alpha \iota v \omega$, to go out (Heb 11:15, here only in
N.T.), originally way out (1Co 10:13 ), but here (only other N.T. example) in sense of end or issue as in several papyri examples (Moulton and Milligan, Vocabulary).

Imitate their faith $(\mu \iota \mu \varepsilon \iota \sigma \theta \varepsilon \tau \eta \nu \pi \iota \sigma \tau \iota \nu)$. Present middle imperative of $\mu \mu \varepsilon o \mu a$, old verb (from $\mu \mu \mathrm{\mu}$, actor, mimic), in N.T. only here, 2Th 3:7,9; 3Jo 1:11. Keep on imitating the faith of the leaders.

Heb 13:8
Jesus Christ is the same yesterday and today, yea and forever (I $\eta_{\sigma o v \varsigma ~ X \rho ı \sigma \tau o \varsigma ~} \varepsilon \chi \theta \varepsilon \varsigma$ $\kappa \alpha \sigma \eta \mu \varepsilon \rho о \nu$ о $\alpha \cup \tau о \varsigma \kappa \alpha \varepsilon \iota \varsigma ~ \tau о \cup \varsigma ~ \alpha ı \omega v a \varsigma) . ~ T h e r e ~ i s ~ n o ~ c o p u l a ~ i n ~ t h e ~ G r e e k . ~ V i n c e n t ~ i n s i s t s ~$ that $\varepsilon \sigma \tau \iota v$ be supplied between I $\eta$ бovৎ and X $\rho \iota \sigma \tau \circ \varsigma$, "Jesus is Christ," but it more naturally comes after Xpıбтos as the Revised Version has it. The old adverb $\varepsilon \chi \theta \varepsilon \varsigma$ is rare in the N.T. (Joh 4:52; Ac 7:28; Heb 13:8). Here it refers to the days of Christ's flesh (2:3;5:7) and to the recent work of the leaders (13:7). "Today" ( $\sigma \eta \mu \varepsilon \rho \circ \nu, 3: 15$ ) is the crisis which confronts them. "Forever" ( $\varepsilon \iota \varsigma$ touc aı $\boldsymbol{\omega v a c ) ~ i s ~ e t e r n i t y ~ a s ~ w e l l ~ a s ~ t h e ~ G r e e k ~ c a n ~ s a y ~ i t . ~ J e s u s ~ C h r i s t ~ i s ~}$ eternally "the same" ( $1: 12$ ) and the revelation of God in him (1:1f. ) is final and never to be superseded or supplemented (Moffatt). Hence the peril of apostasy from the only hope of man.

Heb 13:9
Be not carried away ( $\mu \eta \pi \alpha \rho \alpha \varphi \varepsilon \rho \varepsilon \sigma \theta \varepsilon$ ). Prohibition with $\mu \eta$ and present passive imperative of $\pi \alpha \rho \alpha \varphi \varepsilon \rho \omega$, old verb to lead along (Jude 1:12), to carry past (Mr 14:36), to lead astray as here.
 coloured) see $2: 4$. ヨevoc for guest we have had in $11: 13$, but here as adjective meaning unheard of ( $1 \mathrm{Pe} 4: 12$ ) as in older Greek also. The new is not always wrong any more than the old is always right (Mt 13:52). But the air was already full of new and strange teachings that fascinated many by their very novelty. The warning here is always needed. Cf. Ga 1:6-9; 2 Ti 3:16.

That the heart be established by grace ( $\chi \alpha \rho ı \tau \beta \varepsilon \beta \alpha \iota v \sigma \theta \alpha \tau \eta \nu \kappa \alpha \rho \delta ı \alpha v$ ). Present passive infinitive of $\beta \varepsilon \beta \alpha \iota \omega \omega$ (from $\beta \alpha \iota \nu \omega$ ) to make stable with the instrumental case $\chi \alpha \rho \iota \tau$ (by grace) and the accusative of general reference ( $\tau \eta \nu \kappa \alpha \rho \delta \iota \alpha \nu$ ). How true it is that in the atmosphere of so many windy theories only the heart is stable that has an experience of God's grace in Christ.

That occupied themselves (о $\pi \varepsilon \rho \iota \pi \alpha \tau о \cup \nu \tau \varepsilon \varsigma) . " T h a t ~ w a l k e d "$ in the ritualistic Jewish rules about meats.

Were not profited (ouk $\omega \varphi \varepsilon \lambda \eta \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\omega \varphi \varepsilon \lambda \varepsilon \omega$, to help. Mere Jewish ceremonialism and ritualism failed to build up the spiritual life. It was sheer folly to give up Christ for Pharisaism or for Moses.

Heb 13:10

We have an altar ( $\varepsilon \chi \circ \mu \varepsilon v$ Өvбıaбт $\quad \rho \iota o v)$. We Christians have a spiritual altar ( $\theta$ voıaбтпрюov), not a literal one ( 7:13). This metaphor is carried out.

Whereof ( $\varepsilon \xi \mathrm{ov}$ ). Our spiritual altar.
The tabernacle ( $\tau \eta \sigma \kappa \eta \nu \eta$ ). Dative case with $\lambda \alpha \tau \rho \varepsilon v o v \tau \varepsilon \varsigma$ (serve), $\sigma \kappa \eta \nu \eta$ being used for "the whole ceremonial economy" (Vincent) of Judaism.

Heb 13:11
Of those beasts whose blood ( $\omega \nu \zeta \omega \omega \nu$ to $\alpha \mu \alpha \tau$ тov $\omega \omega \nu$ ). The antecedent ( $\zeta \omega \omega \nu$ ) of $\omega \nu$ is here incorporated and attracted into the case of the relative, "the blood of which beasts" and then tout $\omega v$ (genitive demonstrative) is added, "of these." Cf. Le 4:12f.,21; 16:27 for the Old Testament ritual in such cases. This is the only example in the LXX or N.T. where $\zeta \omega \omega v$ (animal) is used of a sacrificial victim. See also Ex 29:14; 32:26f. for burning without the camp.

Heb 13:12
Wherefore Jesus also ( $\delta \iota \mathrm{o}$ ка I $\eta$ бovৎ). The parallel is drawn between the O.T. ritual and the better sacrifice of Jesus already discussed ( $9: 13-10: 18$ ). The purpose of Jesus is shown (ıva $\alpha \nvdash\llcorner\sigma \eta$, $\iota \omega \alpha$ and the first aorist active subjunctive of $\alpha \gamma \iota \zeta \omega$, to sanctify), the means employed ( $\delta \iota \alpha$ тov $\iota \delta \iota v a \not \mu \alpha \tau \circ \varsigma$, by his own blood), the place of his suffering ( $\varepsilon \pi \alpha \theta \varepsilon v$, as in 5:8) is also given ( $\varepsilon \xi \omega \tau \eta \varsigma \pi \nu \lambda \eta \varsigma$, outside the gate, implied in Joh 19:17) which phrase corresponds to "outside the camp" of verse 11.

Heb 13:13
Let us therefore go forth to him ( $\tau \circ \imath v v \nu \varepsilon \xi \varepsilon \rho \chi \omega \mu \varepsilon \theta \alpha \pi \rho \circ \varsigma \alpha \cup \tau o v$ ). Inferential particle ( $\tau 01, v v v$ ), usually post-positive (Lu 20:25; 1Co 9:26 ) only N.T. examples. Present middle volitive subjunctive of $\varepsilon \xi \varepsilon \rho \chi \circ \mu \alpha$. "Let us keep on going out there to him." If a separation has to come between Judaism and Christianity, let us give up Judaism, and go out to Christ "outside the camp" and take our stand with him there on Golgotha, "bearing his reproach ( $\tau 0 v$ oveı $\delta \iota \sigma \mu \circ v$ avtov $\varphi \varepsilon \rho \circ v \tau \varepsilon \varsigma$ ) as Jesus himself endured the Cross despising the shame ( 12:2) and as Moses accepted "the reproach of the Messiah" ( 11:26) in his day. The only decent place for the follower of Christ is beside the Cross of Christ with the reproach and the power (Ro 8:1f. ) in it. This is the great passionate plea of the whole Epistle.

Heb 13:14
An abiding city ( $\mu \varepsilon v o v \sigma \alpha v \pi \sigma \lambda ı v$ ). Jerusalem has lost its charm for followers of Christ. Vincent rightly argues that the Epistle must have been written before the destruction of Jerusalem else a reference to that event could hardly have been avoided here. We are now where Abraham was once ( $11: 10$ ).

Heb 13:15
Through him ( $\delta \iota^{\prime}$ avtov). That is Jesus. He is our Priest and Sacrifice, the only efficient and sufficient one.

Let us offer up ( $\alpha v \alpha \varphi \varepsilon \rho \omega \mu \varepsilon v$ ). Present active volitive subjunctive of $\alpha v \alpha \varphi \varepsilon \rho \omega$, "let us keep on offering up." Jesus is living and let us go to him.

A sacrifice of praise ( $\theta$ voı $\alpha v$ aıv $\varepsilon \sigma \varepsilon \omega \varsigma$ ). This phrase occurs in Le 7:12; Ps 54:8. The word aıveबાc (from aıve $\omega$, to praise), common in LXX, is only here in N.T.

The fruit of lips (карлоv $\chi \varepsilon ו \lambda \varepsilon \omega v$ ). In apposition ( $\tau 0 v \tau$ ' $\varepsilon \sigma \tau \iota v$ ) and explanation of

Which made confession to his name ( $\circ \mu \circ \lambda o \gamma o v v \tau \omega \nu \tau \omega$ ovo $\mu \alpha \tau \alpha \nu \tau \sigma v$ ). This use of o $\mu \circ \lambda о \gamma \varepsilon \omega$ with the dative in the sense of praise like $\varepsilon \xi \circ \mu \circ \lambda$ oү $\varepsilon \omega$ is unique, though the papyri furnish examples in the sense of gratitude (Moulton and Milligan, Vocabulary).

Heb 13:16
 common in Epictetus, but here only in N.T., a doing good.

To communicate ( $\kappa 0 / v \omega v / \alpha \varsigma)$. Genitive case. See 2Co 9:13 for use for contribution, beneficence. Moffatt notes that the three great definitions of worship and religious service in the N.T. (here, Ro 12:1f.; Jas 1:27) are all inward and ethical.

Forget not ( $\mu \eta \varepsilon \pi \nu \lambda \alpha v \theta a v \varepsilon \sigma \theta \varepsilon$ ). Prohibition with $\mu \eta$ and the present middle imperative of $\varepsilon \pi \iota \lambda \alpha v \theta \alpha v \omega(6: 10 ; 13: 2)$. Here with the genitive case.

Is well pleased ( $\varepsilon \cup \alpha \rho \varepsilon \sigma \tau \varepsilon \iota \tau \alpha$ ). Present passive indicative of $\varepsilon v a \rho \varepsilon \sigma \tau \varepsilon \omega$ (Heb 11:5). With the associative instrumental case $\theta$ volaıs (sacrifices).

Heb 13:17
Obey ( $\pi \varepsilon(\theta \varepsilon \sigma \theta \varepsilon)$. Present middle imperative of $\pi \varepsilon ו \theta \omega$ with dative case.
Submit (vாєוא\&โદ). Present active imperative of $\cup \pi \varepsilon ו \kappa \omega$, old compound to yield under, to give up. Here only in N.T.

They watch ( $\alpha \gamma \rho \cup \pi v o v \sigma \tau v$ ). Present active indicative of $\alpha \gamma \rho \cup \pi v \varepsilon \omega$ old verb (from $\alpha \gamma \rho \varepsilon \omega$, to search, $v \pi v o \varsigma$, sleep), to seek after sleep, to be sleepless, be watchful (Mr 13:33 ).

As they that shall give account ( $\omega \varsigma \lambda$ доүоv $\alpha \pi о \delta \omega \sigma о v \tau \varepsilon \varsigma$ ). Regular Greek idiom with $\omega \varsigma$ and the future participle. For $\lambda o \gamma o v ~ a \pi o \delta i \delta \omega \mu$, to render account, see Mt 12:36. These leaders as good shepherds recognize keenly their responsibility for the welfare of the flock.

And not with grief ( $\kappa \alpha \mu \eta \sigma \tau \varepsilon v \alpha \zeta о \nu \tau \varepsilon \varsigma)$. "And not groaning" (cf. Ro 8:23).
Unprofitable ( $\alpha \lambda \cup \sigma \iota \tau \varepsilon \lambda \varepsilon \varsigma)$. Old double compound adjective (alpha privative and $\lambda \nu \sigma \iota \tau \varepsilon \lambda \eta \varsigma$ and this from $\lambda \nu \omega$, to pay, and $\tau \varepsilon \lambda o \varsigma$, tax, useful or profitable as Lu 17:2 ), not profitable, not advantageous, by litotes, hurtful, pernicious. Common rhetorical litotes, here only in N.T.

Heb 13:18
Honestly ( $\kappa \alpha \lambda \varsigma$ ). Nobly, honourably. Apparently the writer is conscious that unworthy motives have been attributed to him. Cf. Paul in 1Th 2:18; 2Co 1:11f.,17f .

Heb 13:19

That I may be restored to you the sooner ( $\tau \alpha \alpha \tau \alpha \chi \varepsilon \circ \nu \alpha \pi о \kappa \alpha \tau \alpha \sigma \tau \alpha \theta \omega v \mu \tau v$ ). Purpose clause with $\imath v \alpha$ and the first aorist passive subjunctive of $\alpha \pi \sigma \kappa \alpha \theta \iota \sigma \tau \eta \mu$, an old double compound as in Mt 12:13. What is meant by $\tau \alpha \chi \varepsilon$.ov (Joh 13:27; 20:4 ) we do not know, possibly sickness. See verse 23 also for $\tau \alpha \chi \varepsilon \iota \nu$.

Heb 13:20
The God of peace (o $\theta \varepsilon o \varsigma \tau \eta \varsigma \varepsilon \iota \rho \eta \nu \eta \varsigma)$. God is the author and giver of peace, a Pauline phrase (6 times) as in 1Th 5:23 .

Who brought again from the dead (o $\alpha v \alpha \gamma \alpha \gamma \omega v \varepsilon \kappa \nu \varepsilon \kappa \rho \omega v$ ). Second aorist active articular participle of $\alpha v a \gamma \omega$ (cf. Ro 10:7 ), the only direct mention of the resurrection of Jesus in the Epistle, though implied often ( $1: 3$, etc.).

That great shepherd of the sheep ( $\tau \sigma v \pi о \mu \varepsilon v \alpha \tau \omega \nu \pi \rho o \beta \alpha \tau \omega \nu \tau \sigma \nu \mu \varepsilon \gamma \alpha v$ ). This phrase occurs in Isa 63:11 except tov $\mu \varepsilon \gamma a v$ which the author adds as in $4: 14 ; 10: 21$. So here, "the shepherd of the sheep the great one."

With the blood of the eternal covenant ( $\varepsilon \nu \alpha \not \mu \alpha \tau \delta \iota \alpha \theta \eta \kappa \eta \varsigma \alpha \iota \omega \nu \iota \circ v$ ). This language is from Zec 9:11. The language reminds us of Christ's own words in Mr 14:24 (Mt 26:28; Lu 22:20; 1Co 11:25 ) about "my blood of the covenant."

Heb 13:21
Make you perfect ( $\kappa \alpha \tau \alpha \rho \tau \iota \sigma \alpha$ ). First aorist active optative of $\kappa \alpha \tau \alpha \rho \tau \iota \zeta \omega$, to equip, as in 10:5. A wish for the future. See 1Co 1:10; 2Co 13:11; $2 \mathrm{Ti} 3: 17$.

Working in us ( $\pi o t \omega v \varepsilon v \varepsilon \mu v)$ ). "Doing in us." Some MSS. read "in you."
Well-pleasing ( $\varepsilon v \alpha \rho \varepsilon \sigma \tau o v)$. Compound adjective ( $\varepsilon v, \alpha \rho \varepsilon \sigma \tau \sigma \varsigma)$. Usually with the dative (Ro 12:2 ), here with $\varepsilon v \omega \pi \iota o v$ avtov more like the Hebrew. This is one of the noblest doxologies in the N.T.

Heb 13:22
Bear with ( $\alpha v \varepsilon \chi \varepsilon \sigma \theta \varepsilon$ ). Present middle imperative (some MSS. have $\alpha v \varepsilon \chi \varepsilon \sigma \theta \alpha$, infinitive) of $\alpha v \varepsilon \chi \omega$ with the ablative, "hold yourselves back from" as in Col 3:13.

The word of exhortation ( $\tau \circ v \lambda o \gamma o v \tau \eta \varsigma \pi \alpha \rho \alpha \kappa \lambda \eta \sigma \varepsilon \omega \varsigma$ ). His description of the entire Epistle. It certainly is that, a powerful appeal in fact.

I have written $(\varepsilon \pi \varepsilon \sigma \tau \varepsilon \iota \lambda \alpha)$. First aorist active indicative (epistolary aorist) of $\varepsilon \pi เ \sigma \tau \varepsilon \lambda \lambda \omega$, old word to send a letter ( $\varepsilon \pi \iota \sigma \tau \circ \lambda \eta$ ) as in Ac 15:20 .

In few words ( $\delta \iota \alpha \beta \rho \alpha \chi \varepsilon \omega v$ ). Common Greek idiom, here only in N.T. (from $\beta \rho \alpha \chi \cup \varsigma$, brief, short). Cf. $\delta \iota^{\prime}$ o $\lambda \iota \gamma \omega \nu \varepsilon \gamma \rho a \psi \alpha$ in 1Pe 5:12 .

Heb 13:23
Hath been set at liberty ( $\alpha \pi \sigma \lambda \varepsilon \lambda \nu \mu \varepsilon v o v$ ). Perfect passive participle of $\alpha \pi o \lambda \nu \omega$, to set free, in indirect discourse after $\gamma \iota \omega \omega \sigma \kappa \varepsilon \tau \varepsilon$. Possibly from prison if he came to Rome at Paul's request ( $2 \mathrm{Ti} 4: 11,21$ ).

Shortly ( $\tau \alpha \chi \varepsilon \iota \sim$ ). Same comparative as in verse 19, "sooner" than I expect (?).
Heb 13:24

They of Italy (o $\left.\alpha \pi 0 \tau \eta \varsigma I \tau \alpha \lambda \_\varsigma\right)$. Either those with the author in Italy or those who have come from Italy to the author outside of Italy.

## GENERAL EPISTLES <br> BY WAY OF INTRODUCTION

## NOT A HAPPY TITLE

There are various explanations of the term catholic（ $\kappa \alpha \theta$ о $\lambda_{ı \kappa \alpha} \varepsilon \pi \iota \sigma \tau о \lambda \alpha$ ）as applied to this group of seven short letters by four writers（one by James，two by Peter，one by Jude， three by John）．The Latin for каӨо入ıкос is generalis，though the Vulgate terms these letters Catholicae．The meaning is not orthodox as opposed to heretical or canonical，though they are sometimes termed Eлıбто入aع $\chi \alpha v o v i \chi \alpha \varepsilon$ ．As a matter of fact five of the seven（all but First Peter and First John）Eusebius placed among the＂disputed＂（ $\alpha v \tau i \lambda \varepsilon \gamma \circ \mu \varepsilon v \alpha$ ）books of the New Testament．＂A canonical book is primarily one which has been measured and tested， and secondarily that which is itself a measure or standard＂（Alfred Plummer）．Canon is from \kanin<br>（cane）and is like a yardstick cut to the right measure and then used as a measure．Some see in the term ка $\theta$ o $\lambda_{ı}$ коя the idea that these Epistles are meant for both Jews and Gentiles，but the Epistle of James seems addressed to Jewish Christians．There were two other chief groups of New Testament writings in the old Greek manuscripts（the Gospels and Acts，then the Epistles of Paul）．This group of seven Epistles and the Apocalypse constitute the remainder of the New Testament．The usual interpretation of the term к $\alpha$ о $\lambda_{\iota}$ кос here is that these seven Epistles were not addressed to any particular church，but are general in their distribution．This is clearly true of I Peter，as is shown by the language in 1Pe 1：1，where seven Roman provinces are mentioned．The language of $2 \mathrm{Pe} 3: 1$ bears the same idea．Apparently the Epistle of Jude is general also as is I John．But II John is ad－ dressed to＂an elect lady＂（verse 2Jo 1：1 ）and III John to Gaius（verse 3Jo 1：1 ），both of them individuals，and therefore in no sense are these two brief letters general or catholic．The earliest instance of the word каӨo入ıкоя is in an inscription（B．C．6）with the meaning＂gen－ eral＂（\tài katholikài mou prothesei\ $\pi \rho \circ \theta \varepsilon \sigma \varepsilon$ ，my general purpose）．It was common after that．The earliest example of it in Christian literature is in Ignatius＇Epistle to the Church of Smyrna（VIII）where he has＂the catholic church＂（\hà katholikà ekklàsial），＂the general church，＂not a local body．Clement of Alexandria（Strom．IV．xv）applies this adjective to the letter sent to the Gentile Christians＂in Antioch and Syria and Cilicia＂from the Jerusalem Conference（Ac 15：23）．

ORDER AND DATES
The oldest Greek manuscripts give these General Epistles immediately after the Acts， and Westcott and Hort so print them in their Greek New Testament．But the English Versions follow the Textus Receptus and put them just before the Apocalypse．The order of the seven letters varies greatly in the different manuscripts，though usually James comes first and Jude last（as the last accepted and the least known of the four authors）．It is possible that the order of James，Peter，and John（omitting Jude）represented a sort of chronological precedence
in some minds. It is possible also that no importance is to be attached to this order. Certainly John wrote last and after the destruction of Jerusalem, while the others come before that great event if they are genuine, as I believe, though there are difficulties of a serious nature concerning II Peter. James may be very early. If so, these seven Epistles are scattered all the way from A.D. 45 to 90 . They have no connection with one another save in the case of the Epistles of Peter and Jude.

IMPORTANCE OF THE GENERAL EPISTLES
Without them we should be deprived of much concerning three outstanding personalities in early Christianity. We should know much less of "James, and Cephas, and John, they who were reputed to be pillars" (Ga 2:9). We should know less also of the Judaic (not Judaizing) form of Christianity seen in the Epistles of James and Jude in contrast with, though not opposed to, the Pauline type. In Peter's Epistles we see, indeed, a mediating position without compromise of principle, for Peter in the Jerusalem Conference loyally supported Paul and Barnabas even if he did flicker for a moment later in Antioch. In the Johannine Epistles we see the great Eagle soar as in his Gospel in calm serenity in spite of conflict with the Gnostics who struck at the very life of Christianity itself. "The only opposition which remains worthy of a Christian's consideration is that between light and darkness, truth and falsehood, love and hate, God and the world, Christ and Antichrist, life and death" (Plummer). So we can be grateful for the preservation of these little Epistles which reveal differences in the development of the great Christian leaders and the adaptation of the gospel message to changing world conditions then and now.

## Jas 1

Jas $1: 1$
James (I $\alpha \kappa \omega \beta$ оৎ). Grecised form (nominative absolute) of the Hebrew I $\alpha \kappa \omega \beta$ (so LXX). Common name among the Jews, and this man in Josephus (Ant. XX.9.1) and three others of this name in Josephus also.

Servant ( $\delta o v \lambda o \varsigma)$. Bond-servant or slave as Paul (Ro 1:1; Php 1:1; Tit 1:1).
Of the Lord Jesus Christ (кирıо Iqбov X $\rho ı \sigma \tau о v$ ). Here on a par with God ( $\theta \varepsilon \circ v$ ) and calls himself not $\alpha \delta \varepsilon \lambda \varphi \circ \varsigma$ (brother) of Jesus, but $\delta o v \lambda o \varsigma$. The three terms here as in $2: 1$ have their full significance: Jesus is the Messiah and Lord. James is not an Ebionite. He accepts the deity of Jesus his brother, difficult as it was for him to do so. The word кvpıos is frequent in the LXX for Elohim and Jahweh as the Romans applied it to the emperor in their emperor

To the twelve tribes ( $\tau \alpha \iota \varsigma \delta \omega \delta \varepsilon \kappa \alpha \varphi \cup \lambda \alpha ı)$. Dative case. The expression means "Israel in its fulness and completeness" (Hort), regarded as a unity (Ac 26:7) with no conception of any "lost" tribes.

Which are of the Dispersion ( $\tau \alpha \iota \varsigma \varepsilon \nu \tau \eta \delta ı \alpha \sigma \pi \sigma \rho \alpha$ ). "Those in the Dispersion" (repeated article). The term appears in De 28:25 (LXX) and comes from $\delta \iota \alpha \sigma \pi \varepsilon \iota \rho \omega$, to scatter (sow) abroad. In its literal sense we have it in Joh 7:34, but here and in 1Pe 1:1 Christian Jews are chiefly, if not wholly, in view. The Jews at this period were roughly divided into Palestinian Jews (chiefly agriculturists) and Jews of the Dispersion (dwellers in cities and mainly traders). In Palestine Aramaic was spoken as a rule, while in the Western Diaspora the language was Greek (Koine, LXX), though the Eastern Diaspora spoke Aramaic and Syriac. The Jews of the Diaspora were compelled to compare their religion with the various cults around them (comparative religion) and had a wider outlook on life. James writes thus in cultural Koine but in the Hebraic tone.

Greeting ( $\chi \alpha \iota \rho \varepsilon \iota v$ ). Absolute infinitive (present active of $\chi \alpha \iota \rho \omega$ ) as in Ac 15:23 (the Epistle to Antioch and the churches of Syria and Galatia). It is the usual idiom in the thousands of papyri letters known to us, but in no other New Testament letter. But note $\chi$ aıpıı $\lambda \varepsilon \gamma \varepsilon \tau \varepsilon$ in 2Jo 1:10,11.

Jas 1:2
Count it $(\eta \gamma \eta \sigma \alpha \sigma \theta \varepsilon)$. First aorist middle imperative of $\eta \gamma \varepsilon o \mu \alpha$, old verb to consider. Do it now and once for all.

All joy ( $\pi \alpha \sigma \alpha v \chi \alpha \rho \alpha v)$. "Whole joy," " unmixed joy," as in Php 2:29. Not just "some joy" along with much grief.

When (o $\tau \alpha v$ ). "Whenever," indefinite temporal conjunction.
Ye fall into ( $\pi \varepsilon \rho \iota \pi \varepsilon \sigma \eta \tau \varepsilon)$. Second aorist active subjunctive (with the indefinite o $\alpha \alpha v$ ) from $\pi \varepsilon \rho \iota \pi \iota \tau \tau \omega$, literally to fall around (into the midst of), to fall among as in Lu 10:30
$\lambda \eta เ \sigma \tau \alpha \iota \varsigma \pi \varepsilon \rho \iota \pi \varepsilon \sigma \varepsilon v$ (he fell among robbers). Only other N.T. example of this old compound is in Ac 27:41. Thucydides uses it of falling into affliction. It is the picture of being surrounded $(\pi \varepsilon \rho)$ by trials.
 English word temptation is Latin and originally meant trials whether good or bad, but the evil sense has monopolized the word in our modern English, though we still say "attempt." The word $\pi \varepsilon \rho \alpha \sigma \mu \circ \varsigma$ (from $\pi \varepsilon \iota \rho \alpha \zeta \omega$, late form for the old $\pi \varepsilon \iota \rho \alpha \omega$ as in Ac 26:21, both in good sense as in Joh 6:6, and in bad sense as in Mt 16:1) does not occur outside of the LXX and the N.T. except in Dioscorides (A.D. 100?) of experiments on diseases. "Trials" is clearly the meaning here, but the evil sense appears in verse 12 (clearly in $\pi \varepsilon เ \rho \alpha \zeta \omega$ in verse 13) and so in Heb 3:8. Trials rightly faced are harmless, but wrongly met become temptations to evil. The adjective токкıос (manifold) is as old as Homer and means variegated, many coloured as in Mt 4:24; 2Ti 3:6; Heb 2:4 . In 1Pe 1:6 we have this same phrase. It is a bold demand that James here makes.

Jas 1:3
Knowing ( $\gamma \iota \nu \omega \sigma \kappa 0 v \tau \varepsilon \varsigma)$. Present active participle of $\gamma \iota \nu \omega \sigma \kappa \omega$ (experimental knowledge, the only way of getting this view of "trials" as "all joy").

The proof (то סокццоv). Now known (Deissmann, Bible Studies, pp. 259ff.) from the papyri examples of $\delta$ окıноц as an adjective in the same sense (good gold, standard gold) as бокцос proved or tested (Jas 1:12). The use of to סокıноv (neuter article with neuter single adjective) here and in 1Pe 1:7, clearly means "the genuine element in your faith," not "crucible" nor "proving." Your faith like gold stands the test of fire and is approved as standard. James here, as in verse $6 ; 2: 1 ; 5: 15$, regards faith ( $\pi \iota \sigma \tau \iota \varsigma)$ like Paul "as the very foundation of religion" (Mayor).

Worketh (катєрүаऍєта). Present (durative) middle indicative of the compound verb with the perfective sense of kata as in Php 2:12, which see.

Patience (v $\tau о \mu о \nu \eta \nu)$. Old and common word for remaining under (v $\tau \circ \mu \varepsilon v \omega$ ), "staying power" (Ropes), as in Col 1:11.

Jas 1:4
Let have ( $\varepsilon \chi \varepsilon \tau \omega)$. Present active imperative of $\varepsilon \chi \omega$, let it keep on having.
Perfect ( $\tau \varepsilon \lambda \varepsilon เ o v)$. See Ro 5:3f. for a like chain of blessings. Carry on the work to the end or completion (from $\tau \varepsilon \lambda \circ \varsigma$, end) as in Joh 17:4 ( $\tau 0 \varepsilon \rho \gamma \circ \vee \tau \varepsilon \lambda \varepsilon \epsilon \omega \sigma \alpha$, having finished the work).

That ye may be ( $\mathrm{v} \alpha \eta \tau \varepsilon$ ). Purpose clause with $ı v \alpha$ and present active subjunctive of $\varepsilon \mu$. This is the goal of patience.

Perfect and entire ( $\tau \varepsilon \lambda \varepsilon ⿺ 𠃊 ~ к \alpha$ о околпро). Perfected at the end of the task ( $\tau \varepsilon \lambda о \varsigma)$ and complete in all parts (o $\boldsymbol{\lambda} \boldsymbol{\kappa} \lambda \eta \rho \circ$, o $\lambda o \varsigma$ whole and $\kappa \lambda \eta \rho \circ \varsigma$ lot or part). "Perfected all over."

These two adjectives often occur together in Philo, Plutarch, etc. See Ac 3:16 for o (perfect soundness).

Lacking in nothing ( $\varepsilon v \mu \eta \delta \varepsilon \nu \lambda \varepsilon ı \pi o \mu \varepsilon v o$ ). Present passive participle of $\lambda \varepsilon ו \pi \omega$ to leave. Negative statement of the preceding positive as often in James (cf. 1:6). There is now a digression (verses 5-8) from the discussion of $\pi \varepsilon ו \rho a \sigma \mu \circ \varsigma$, which is taken up again in verse 9 . The word $\lambda \varepsilon ו \pi о \mu \varepsilon v o$ (lacking) suggests the digression.

Jas 1:5
Lacketh wisdom ( $\lambda \varepsilon ı \pi \varepsilon \tau \alpha$ боبı๙ৎ). Condition of first class, assumed as true, $\varepsilon$ and present passive indicative of $\lambda \varepsilon \iota \pi \omega$ to be destitute of, with ablative case $\sigma 0 \varphi \iota a c$. "If any one falls short of wisdom." A banking figure, to have a shortage of wisdom (not just knowledge, $\gamma \nu \omega \sigma \varepsilon \omega \varsigma$, but wisdom $\sigma о \varphi$ ) $\alpha$, the practical use of knowledge).

Let him ask ( $\alpha$ It $\varepsilon \tau \omega)$ ). Present active imperative of aıtع $\omega$, "let him keep on asking."
Of God ( $\pi \alpha \rho \alpha$ тov $\theta$ rov). "From (from beside) God," ablative case with $\pi \alpha \rho \alpha$. Liberally ( $\alpha \pi \lambda \omega \varsigma$ ). This old adverb occurs here only in the N.T. (from $\alpha \pi \lambda o u \varsigma$, single-fold, Mt 6:22, and $\alpha \pi \lambda o \tau \eta \varsigma$, simplicity, generosity, is common-- 2Co 8:2; Ro 12:8). But the adverb is common in the papyri by way of emphasis as simply or at all (Moulton and Milligan's Vocabulary). Mayor argues for the sense of "unconditionally" (the logical moral sense) while Hort and Ropes agree and suggest "graciously." The other sense of "abundantly" or "liberally" suits the idea in $\alpha \pi \lambda$ orns in 2Co 8:2; Ro 12:8, but no example of the adverb in this sense has been found unless this is one here. See Isa $55: 1$ for the idea of God's gracious giving and the case of Solomon (1Ki 3:9-12; $\operatorname{Pr} 2: 3$ ).
 reproach, to cast in one's teeth, Mt 5:11) in the ablative case like $\delta$ ı $\delta$ ovtos agreeing with $\theta \varepsilon o v$ and with the usual negative of the participle ( $\mu \varepsilon$ ). This is the negative statement of $\delta \iota \delta o v \tau o \varsigma \alpha \pi \lambda \omega \varsigma$ (giving graciously). The evil habit of giving stinging words along with the money is illustrated in Sirach 41:22 and Plutarch (De adulat., p. 64A). ] Cf. Heb 4:16 .

And it shall be given him ( $\kappa \alpha \delta o \theta \eta \sigma \varepsilon \tau \alpha \alpha \cup \tau \omega$ ). First future passive of $\delta \iota \delta \omega \mu$, a blessed promise in accord with the words of Jesus (Mt 7:7,11; Lu 11:13 ), meaning here not only "wisdom," but all good gifts, including the Holy Spirit. There are frequent reminiscences of the words of Jesus in this Epistle.

Jas 1:6
In faith ( $\varepsilon v \pi / \sigma \tau \varepsilon)$. Faith here "is the fundamental religious attitude" (Ropes), belief in God's beneficent activity and personal reliance on him (Oesterley).

Nothing doubting ( $\mu \eta \delta \varepsilon v \delta \iota \alpha \kappa \rho ı v o \mu \varepsilon v o \varsigma)$. Negative way of saying $\varepsilon v \pi \iota \sigma \tau \varepsilon$ (in faith), present passive participle of $\delta \iota \alpha \rho ı v \omega$, old verb to separate ( $\kappa \rho \iota v \omega$ ) between ( $\delta \iota \alpha$ ), to discriminate as shown clearly in Ac 11:12, 15:9, but no example of the sense of divided against oneself has been found earlier than the N.T., though it appears in later Christian writings.

It is like the use of $\delta$ ta $\mu \varepsilon \rho ı \zeta o \mu \alpha$ in Lu 11:18 and occurs in Mt 21:21; Mr 11:23; Ac 10:20; Ro 2:4; 4:20; 14:23 . It is a vivid picture of internal doubt.

Is like ( $\varepsilon$ оוкعv). Second perfect active indicative with the linear force alone from $\varepsilon$ וк $\omega$ to be like. Old form, but in N.T. only here and verse 23 (a literary touch, not in LXX).

The surge of the sea ( $\kappa \lambda \nu \delta \omega v \theta \alpha \lambda \alpha \sigma \sigma \eta \varsigma)$. Old word (from $\kappa \lambda \nu \zeta \omega$ to wash against) for a dashing or surging wave in contrast with кица (successive waves), in N.T. only here and Lu 8:24. In associative instrumental case after عoוкعv. In Eph 4:14 we have $\kappa \lambda \nu \delta o v i \zeta \omega$ (from $\kappa \lambda \nu \delta \omega v)$, to toss by waves.

Driven by the wind $(\alpha v \varepsilon \mu \zeta \zeta \rho \varepsilon v \omega)$ ). Present passive participle (agreeing in case with $\kappa \lambda \nu \delta \omega v$ ) of $\alpha v \varepsilon \mu \zeta \zeta \omega$, earliest known example and probably coined by James (from $\alpha v \varepsilon \mu \circ \varsigma$ ), who is fond of verbs in $-1 \zeta \omega$ (Mayor). The old Greek used ave $\mu o \omega$. In Eph 4:14 Paul uses both $\kappa \lambda \nu \delta o v \iota \zeta \omega$ and $\pi \varepsilon \rho \varphi \varphi \varepsilon \rho \omega$ av $\mu \mu \omega$. It is a vivid picture of the sea whipped into whitecaps by the winds.

Tossed ( $\rho \iota \tau \iota \zeta \circ \mu \varepsilon v \omega)$. Present passive participle also in agreement with $\kappa \lambda \nu \delta \omega v$ from $\rho \iota \pi \iota \zeta \omega$, rare verb (Aristophanes, Plutarch, Philo) from pıлıৎ (a bellows or fire-fan), here only in N.T. It is a picture of "the restless swaying to and fro of the surface of the water, blown upon by shifting breezes" (Hort), the waverer with slight rufflement.

Jas 1:7
That man (o $\alpha v \theta \rho \omega \pi о \varsigma ~ \varepsilon к \varepsilon เ v o \varsigma) . ~ E m p h a t i c ~ u s e ~ o f ~ \varepsilon к \varepsilon ı v o \varsigma . ~$
Of the Lord ( $\pi \alpha \rho \alpha$ тои ки $\rho \circ \sim$ ). Ablative case with $\pi \alpha \rho \alpha$ like $\theta$ عov in verse 5.
Jas 1:8
Man ( $\alpha v \eta \rho$ ). Instead of $\alpha v \theta \rho \omega \pi \sigma$ (general term) in verse 7 , perhaps for variety (Ropes), but often in James (1:12,23; 2:2; 3:2 ), though in other Epistles usually in distinction from $\gamma u v \eta$ (woman).

Double-minded ( $\delta \iota \psi \cup \chi o \varsigma)$. First appearance of this compound known and in N.T. only here and $4: 8$. Apparently coined by James, but copied often in early Christian writings and so an argument for the early date of James' Epistle (Moulton and Milligan's Vocabulary). From $\delta ı \varsigma$ twice and $\psi v \chi \eta$ soul, double-souled, double-minded, Bunyan's "Mr. Facing-bothways." Cf. the rebuke to Peter ( $\varepsilon \delta$ Iбтабаৎ) in Mt 14:31 .

Unstable (акатабтатоৎ). Late double compound (alpha privative and катабтатоৎ verbal from каӨเซтๆ $)$, in LXX once (Is 54:11 ) and in Polybius, in N.T. only here and 3:8. It means unsteady, fickle, staggering, reeling like a drunken man. Surely to James such "doubt" is no mark of intellectuality.

Jas 1:9
But $(\delta \varepsilon)$. Return to the point of view in verse 2 .
Of low degree (o тaлєıvoc). "The lowly" brother, in outward condition (Lu 1:52), humble and poor as in Ps 9:39; Pr 30:14, not the spiritually humble as in Mt 11:29; Jas 4:6 . In the LXX тaлєıvos was used for either the poor in goods or the poor in spirit. Christianity
has glorified this word in both senses. Already the rich and the poor in the churches had their occasion for jealousies.

Glory in his high estate ( $\kappa \alpha \cup \chi \alpha \sigma \theta \omega \varepsilon v \tau \omega \nu \psi \varepsilon \alpha v \tau o v)$. Paradox, but true. In his low estate he is "in his height" (vభoৎ, old word, in N.T., also in Lu 1:78; Eph 3:1 ; etc.).

Jas 1:10
In that he is made low ( $\varepsilon v \tau \eta \tau \alpha \pi \varepsilon ı v \omega \sigma \varepsilon \alpha \cup \tau o v)$. "In his low estate." Play on $\tau \alpha \pi \varepsilon \iota v \omega \sigma \iota$ (from $\tau \alpha \pi \varepsilon เ v o \omega, \operatorname{Php} 3: 7$ ), like $\tau \alpha \pi \varepsilon เ v o c$ of verse 9 , old word in various senses, in N.T. only here, Lu 1:48; Ac 8:33; Php 3:21. The Cross of Christ lifts up the poor and brings down the high. It is the great leveller of men.

As the flower of the grass ( $\omega \varsigma \alpha \vee \theta$ oc $\chi$ ор $\tau \sigma v$ ). From the LXX (Isa 40:6 ). Xop $\tau$ с means pasture, then grass (Mr 6:39) or fodder. A $v \theta$ oc is old word, in N.T. only here, verse $11 ; 1 \mathrm{Pe}$ 1:24 (same quotation). This warning is here applied to "the rich brother," but it is true of all.

He shall pass away ( $\pi \alpha \rho \varepsilon \lambda \varepsilon v \sigma \varepsilon \tau \alpha$ ). Future middle indicative (effective aoristic future, shall pass completely away from earth).

Jas 1:11
Ariseth ( $\alpha v \varepsilon \tau \varepsilon 1 \lambda \varepsilon v$ ). Gnomic or timeless aorist active indicative of the old compound $\alpha v a \tau \varepsilon \lambda \lambda \omega$, used here of plants (cf. $\alpha v \alpha \theta \alpha \lambda \lambda \omega$ in Php 4:10), often of the sun (Mt 13:6).

With the scorching wind ( $\sigma \nu \nu \tau \omega \kappa \alpha \nu \sigma \omega v$ ). Associative instrumental case with $\sigma \cup v$. In the LXX this late word (from каvoos) is usually the sirocco, the dry east wind from the desert (Job 1:19). In Mt 20:12; Lu 12:55 it is the burning heat of the sun. Either makes sense here.

Withereth ( $\varepsilon \xi \eta \rho \alpha v \varepsilon v)$. Another gnomic aorist active indicative (Robertson, Grammar,
 flowers are often used to picture the transitoriness of human life.

Falleth ( $\varepsilon \xi \varepsilon \pi \varepsilon \sigma \varepsilon v)$. Another gnomic aorist (second aorist active indicative) of $\varepsilon \kappa \pi \iota \pi \tau \omega$ to fall out (off).

The grace ( $\eta$ घטл $\rho \varepsilon \pi \varepsilon ı \alpha$ ). Old word (from $\varepsilon v \pi \rho \varepsilon \pi \eta \varsigma$ well-looking, not in the N.T.), only here in N.T. Goodly appearance, beauty.

Of the fashion of it ( $\tau 0 v \pi \rho о \sigma \omega \pi$ ои avtov). "Of the face of it." The flower is pictured as having a "face," like a rose or lily.

Perisheth ( $\alpha \pi \omega \lambda \varepsilon \tau 0$ ). Another gnomic aorist (second aorist middle indicative of $\alpha \pi \sigma \lambda \lambda \nu \mu$, to destroy, but intransitive here, to perish). The beautiful rose is pitiful when withered.

Shall fade away ( $\mu \alpha \rho \alpha v \theta \eta \sigma \varepsilon \tau \alpha)$. Future passive indicative of $\mu \alpha \rho \alpha \iota v \omega$, old verb, to extinguish a flame, a light. Used of roses in Wisdom 2:8.
 (of Christ's journey toward Jerusalem). The rich man's travels will come to "journey's end."

Jas 1:12
Endureth ( $v \pi о \mu \varepsilon v \varepsilon$ ). Present active indicative of $v \pi о \mu \varepsilon v \omega$. Cf. verse 3.
Temptation ( $\pi \varepsilon \iota \rho \alpha \sigma \mu \circ v$ ). Real temptation here. See verse 2 for "trials."
When he hath been approved ( $\delta о к ц о \varsigma ~ \gamma \varepsilon v о \mu \varepsilon v o \varsigma) . ~ " H a v i n g ~ b e c o m e ~ a p p r o v e d, " ~ w i t h ~$ direct reference to тo $\delta$ окц $\mu$ ov in verse 3 . See also Ro 5:4 for бокциך (approval after test as of gold or silver). This beatitude ( $\mu \alpha к \alpha \rho ь \varsigma) ~ i s ~ f o r ~ t h e ~ o n e ~ w h o ~ h a s ~ c o m e ~ o u t ~ u n s c a t h e d . ~ S e e ~$ 1Ti 6:9.

The crown of life ( $\tau 0 v \sigma \tau \varepsilon \varphi \alpha v o v \tau \eta \varsigma \zeta \omega \eta \varsigma)$. The same phrase occurs in Re 2:10. It is the genitive of apposition, life itself being the crown as in 1Pe 5:4. This crown is "an honourable ornament" (Ropes), with possibly no reference to the victor's crown (garland of leaves) as with Paul in 1 Co 9:25; 2Ti 4:8, nor to the linen fillet ( $\delta \iota \alpha \delta \eta \mu \alpha$ ) of royalty (Ps 20:3 , where $\sigma \tau \varepsilon \varphi \alpha v o \varsigma$ is used like $\delta \iota \alpha \delta \eta \mu \alpha$, the kingly crown). $\sum \tau \varepsilon \varphi \alpha v o \varsigma$ has a variety of uses. Cf. the thorn chaplet on Jesus (Mt 27:29).

The Lord . Not in the oldest Greek MSS., but clearly implied as the subject of $\varepsilon \pi \eta \gamma \gamma \varepsilon 1 \lambda \alpha \tau$ ( he promised, first aorist middle indicative).

Jas 1:13
Let no one say ( $\mu \eta \delta \varepsilon ı \varsigma \lambda \varepsilon \gamma \varepsilon \tau \omega$ ). Present active imperative, prohibiting such a habit.
 sense of tempt, not test, as in Mt 4:1 . Verses 12-18 give a vivid picture of temptation.

I am tempted of God ( $\alpha \pi \sigma \theta \varepsilon \sigma v \pi \varepsilon \rho \alpha \zeta о \mu \alpha$ ). The use of $\alpha \pi \sigma$ shows origin ( $\alpha \pi \sigma$ with ablative case), not agency (vđo), as in Mr 1:13, of Satan. It is contemptible, but I have heard wicked and weak men blame God for their sins. Cf. Pr 19:3 ; Sirach 15:11f. Temptation does not spring "from God."

Cannot be tempted with evil ( $\alpha \pi \varepsilon \iota \rho \alpha \sigma \tau о \varsigma ~ \kappa \alpha \kappa \omega v$ ). Verbal compound adjective (alpha privative and $\pi \varepsilon \rho \alpha \zeta \omega)$, probably with the ablative case, as is common with alpha privative (Robertson, Grammar, p. 516), though Moulton (Prolegomena, p. 74) treats it as the genitive of definition. The ancient Greek has $\alpha \pi \varepsilon \iota \rho \alpha \tau о \varsigma($ from $\pi \varepsilon เ \rho a \omega)$ ), but this is the earliest example of $\alpha \pi \varepsilon เ \rho a \sigma \tau \circ \varsigma$ (from $\pi \varepsilon เ \rho \alpha \zeta \omega$ ) made on the same model. Only here in the N.T. Hort notes алєьратос как $\omega v$ as a proverb (Diodorus, Plutarch, Josephus) "free from evils." That is possible here, but the context calls for "untemptable" rather than "untempted."

And he himself tempteth no man ( $\pi \varepsilon \iota \rho \alpha \zeta \varepsilon \delta \varepsilon \alpha \cup \tau o \varsigma ~ o v \delta \varepsilon v \alpha)$. Because "untemptable." Jas 1:14
 is old word for craving (from $\varepsilon \pi \iota \theta v \mu \varepsilon \omega$, to have a desire for) either good (Php 1:23) or evil (Ro 7:7) as here. Like a fish drawn out from his retreat.

Enticed ( $\delta \varepsilon \lambda \varepsilon \alpha \zeta$ о $\mu \varepsilon v o \varsigma)$. Present passive participle of $\delta \varepsilon \lambda \varepsilon \alpha \zeta \omega$, old verb from $\delta \varepsilon \lambda \varepsilon \alpha \rho$ (bait), to catch fish by bait or to hunt with snares and Philo has $v \varphi^{\prime} \eta \delta o v \eta \varsigma \delta \varepsilon \lambda \varepsilon \alpha \zeta \varepsilon \tau \alpha$ (is enticed by pleasure). In N.T. only here and 2Pe 2:14,18 . Allured by definite bait.

Jas 1:15
Then ( $\varepsilon \iota \tau \alpha$ ). The next step.
The lust ( $\eta \varepsilon \pi \iota \theta \cup \mu \iota \alpha$ ). Note article, the lust (verse 14) which one has.
When it hath conceived ( $\sigma v \lambda \lambda \alpha \beta o v \sigma \alpha$ ). Second aorist active participle of $\sigma v \lambda \lambda \alpha \mu \beta \alpha v \omega$, old word to grasp together, in hostile sense (Ac 26:21), in friendly sense of help (Php 4:3), in technical sense of a woman taking a man's seed in conception (Lu 1:24), here also of lust (as a woman), "having conceived." The will yields to lust and conception takes place.

Beareth $\sin (\tau \iota \kappa \tau \varepsilon \alpha \mu \alpha \rho \tau \iota \alpha v)$. Present active indicative of $\tau \iota \kappa \tau \omega$ to bring forth as a mother or fruit from seed, old verb, often in N.T., here only in James. Sin is the union of the will with lust. See Ps 7:14 for this same metaphor.

The $\sin (\eta \alpha \mu \alpha \rho \tau \iota \alpha)$. The article refers to $\alpha \mu \alpha \rho \tau \iota \alpha$ just mentioned.
When it is full-grown ( $\alpha \pi \sigma \tau \varepsilon \lambda \varepsilon \sigma \theta \varepsilon เ \sigma \alpha$ ). First aorist passive participle of $\alpha \pi \sigma \tau \varepsilon \lambda \varepsilon \omega$, old compound verb with perfective use of $\alpha \pi 0$, in N.T. only here and Lu 13:32. It does not mean "full-grown" like $\tau \varepsilon \lambda \varepsilon \iota \circ \omega$, but rather completeness of parts or functions as opposed to rudimentary state (Hort) like the winged insect in contrast with the chrysalis or grub (Plato). The sin at birth is fully equipped for its career (Ro 6:6; Col 3:5).

Bringeth forth death ( $\alpha \pi о \kappa v \varepsilon \theta a v \alpha \tau о v$ ). Late compound ( $\kappa v \varepsilon \omega$ to be pregnant, perfective use of $\alpha \pi 0$ ) to give birth to, of animals and women, for normal birth (papyrus example) and abnormal birth (Hort). A medical word (Ropes) rather than a literary one like $\tau \iota \kappa \tau \omega$. The child of lust is $\sin$, of $\sin$ is death, powerful figure of abortion. The child is dead at birth. For death as the fruit of sin see Ro 6:21-23; 8:6. "The birth of death follows of necessity when one $\sin$ is fully formed" (Hort).

Jas 1:16
Be not deceived ( $\mu \eta \pi \lambda \alpha v \alpha \sigma \theta \varepsilon$ ). Prohibition with $\mu \eta$ and the present passive imperative of $\pi \lambda \alpha \nu \alpha \omega$, common verb to lead astray. This is the way of sin to deceive and to kill (Ro 7:7-14 ). The devil is a pastmaster at blinding men's eyes about $\sin$ (2Co 4:4; Ro 1:27; Eph 4:14; etc.).

Jas 1:17
Gift ( $\delta о \sigma ı \varsigma)$
--boon $(\delta \omega \rho \eta \mu \alpha)$. Both old substantives from the same original verb $(\delta \iota \omega \mu)$, to give. $\Delta \mathrm{o} \iota \varsigma$ is the act of giving (ending -бıৎ), but sometimes by metonymy for the thing given like $\kappa \tau \iota \sigma \iota \varsigma$ for $\kappa \tau \iota \sigma \mu \alpha(\operatorname{Col} 1: 15)$. But $\delta \omega \rho \eta \mu \alpha$ (from $\delta \omega \rho \varepsilon \omega$, from $\delta \omega \rho o v$ a gift) only means a gift, a benefaction (Ro 5:16). The contrast here argues for "giving" as the idea in סooıs. Curiously enough there is a perfect hexameter line here: $\pi \alpha \sigma \alpha \delta o / \sigma \iota \varsigma \alpha \gamma \alpha / \theta \eta \kappa \alpha / \pi \alpha \nu \delta \omega$ / $\rho \eta \mu \alpha \tau \varepsilon$ / $\lambda \varepsilon \iota o v$. Such accidental rhythm occurs occasionally in many writers. Ropes (like Ewald and Mayor) argues for a quotation from an unknown source because of the poetical word $\delta \omega \rho \eta \mu \alpha$, but that is not conclusive.

From above $(\alpha \nu \omega \theta \varepsilon v)$. That is, from heaven. Cf. Joh 3:31; 19:11 .

Coming down ( $\kappa \alpha \tau \alpha \beta \alpha ı v o v$ ). Present active neuter singular participle of $\kappa \alpha \tau \alpha \beta \alpha ı v \omega$ agreeing with $\delta \omega \rho \eta \mu \alpha$, expanding and explaining $\alpha v \omega \theta \varepsilon v$ (from above).

From the Father of lights ( $\alpha \pi \sigma \tau \tau v \pi \alpha \tau \rho \circ \varsigma \tau \omega \nu \varphi \omega \tau \omega v$ ). "Of the lights" (the heavenly bodies). For this use of $\pi \alpha \tau \eta \rho$ see Job 38:28 (Father of rain); 2Co 1:3; Eph 1:17. God is the Author of light and lights.

With whom ( $\pi \alpha \rho^{\prime} \omega$ ). For $\pi \alpha \rho \alpha$ (beside) with locative sense for standpoint of God see $\pi \alpha \rho \alpha \tau \omega \theta \varepsilon \omega$ (Mr 10:27; Ro 2:11; 9:14; Eph 6:9 .

Can be no (ouk $\varepsilon v$ ). This old idiom (also in Ga 3:28; Col 3:11) may be merely the original form of $\varepsilon v$ with recessive accent (Winer, Mayor) or a shortened form of $\varepsilon v \varepsilon \sigma \tau$. The use of $\varepsilon v \varepsilon v$ in 1Co 6:5 argues for this view, as does the use of $\varepsilon ו v \varepsilon$ ( $\varepsilon เ v \alpha$ ) in Modern Greek (Robertson, Grammar, p. 313).

Variation ( $\pi \alpha \rho \alpha \lambda \lambda \alpha \gamma \eta$ ). Old word from $\pi \alpha \rho \alpha \lambda \lambda \alpha \sigma \sigma \omega$, to make things alternate, here only in N.T. In Aristeas in sense of alternate stones in pavements. Dio Cassius has $\pi \alpha \rho \alpha \lambda \lambda \alpha \xi!\varsigma$ without reference to the modern astronomical parallax, though James here is comparing God (Father of the lights) to the sun (Mal 4:2 ), which does have periodic variations.

Shadow that is cast by turning ( $\tau \rho о \pi \eta \varsigma ~ а л о \sigma к ь \alpha \sigma \mu \alpha) . ~ Т \rho о \pi \eta ~ i s ~ a n ~ o l d ~ w o r d ~ f o r ~$ "turning" (from $\tau \rho \varepsilon \pi \omega$ to turn), here only in N.T. Aлобкıаб $\mu$ is a late and rare word ( $\alpha \pi о б к ı \alpha \sigma \mu о \varsigma ~ i n ~ P l u t a r c h) ~ f r o m ~ а л о б к ı \alpha \zeta \omega ~(\alpha \pi о, ~ \sigma \kappa ı \alpha) ~ a ~ s h a d e ~ c a s t ~ b y ~ o n e ~ o b j e c t ~ o n ~ a n o t h e r . ~$ It is not clear what the precise metaphor is, whether the shadow thrown on the dial (aлобкıaऍ $\omega$ in Plato) or the borrowed light of the moon lost to us as it goes behind the earth. In fact, the text is by no means certain, for Aleph B papyrus of fourth century actually read $\eta \tau \rho о \pi \eta \varsigma \alpha \pi о \sigma \kappa ı \alpha \sigma \mu \alpha \tau о \varsigma$ (the variation of the turning of the shadow). Ropes argues strongly for this reading, and rather convincingly. At any rate there is no such periodic variation in God like that we see in the heavenly bodies.

Jas 1:18
Of his own will ( $\beta$ ou $\lambda \eta \theta \varepsilon \leq \varsigma$ ). First aorist passive participle of $\beta$ ou $\lambda o \mu \alpha$. Repeating the metaphor of birth in verse 15, but in good sense. God as Father acted deliberately of set purpose.

He brought us forth ( $\alpha \pi \varepsilon \kappa \cup \eta \sigma \varepsilon v$ ). First aorist active indicative of алокขع $\omega$ (verse 15), only here of the father ( $4 \mathrm{Macc} .15: 17$ ), not of the mother. Regeneration, not birth of all men, though God is the Father in the sense of creation of all men (Ac 17:28f. ).

By the word of truth ( $\left.\lambda_{o \gamma \omega} \alpha \lambda \eta \theta \varepsilon \varepsilon \propto \varsigma\right)$. Instrumental case $\lambda o \gamma \omega$. The reference is thus to the gospel message of salvation even without the article (2Co 6:7) as here, and certainly with the article (Col 1:5; Eph 1:13; 2Ti 2:15 ). The message marked by truth (genitive case $\alpha \lambda \eta \theta \varepsilon \mid \alpha \varsigma)$.

That we should be ( $\varepsilon ા \varsigma ~ \tau о ~ \varepsilon ı v a ~ \eta \mu \alpha \varsigma) . ~ P u r p o s e ~ c l a u s e ~ \varepsilon ı \varsigma ~ \tau o ~ a n d ~ t h e ~ i n f i n i t i v e ~ \varepsilon ı v a ~ w i t h ~$ the accusative of general reference $\eta \mu a \varsigma$ (as to us).

A kind of first-fruits ( $\alpha \pi \alpha \rho \chi \eta \nu \tau \imath v \alpha$ ). "Some first-fruits" (old word from $\alpha \pi \alpha \rho \chi \circ \mu \alpha$ ), of Christians of that age. See Ro 16:5.

Jas 1:19
Ye know this (เธтє). Or "know this." Probably the perfect active indicative (literary form as in Eph 5:5; Heb 12:17, unless both are imperative, while in Jas 4:4 we have ot $\delta a \tau \varepsilon$, the usual vernacular Koine perfect indicative). The imperative uses only tote and only the context can decide which it is. Eoto (let be) is imperative.
 adjective see 1Th 4:9. For $\varepsilon$ ءऽ to after adjectives see Ro 16:19. The picture points to listening to the word of truth (verse 18) and is aimed against violent and disputatious speech (chapter 3:1-12). The Greek moralists often urge a quick and attentive ear.

Slow to speak ( $\beta \rho \alpha \delta \cup \varsigma \varepsilon$ عıc тo $\lambda \alpha \lambda \eta \sigma \alpha$ ). Same construction and same ingressive aorist active infinitive, slow to begin speaking, not slow while speaking.

Slow to anger ( $\beta \rho \alpha \delta \nu \varsigma \varepsilon ı \varsigma ~ o \rho \gamma \eta v$ ). He drops the infinitive here, but he probably means that slowness to speak up when angry will tend to curb the anger.

Jas 1:20
The wrath of man ( $o \rho \gamma \eta \alpha v \delta \rho o c$ ). Here $\alpha \nu \eta \rho$ (as opposed to $\gamma \cup v \eta$ woman), not $\alpha v \theta \rho \omega \pi \sigma$ of verse 19 (inclusive of both man and woman). If taken in this sense, it means that a man's anger (settled indignation in contrast with $\theta \nu \mu o \varsigma$, boiling rage or fury) does not necessarily work God's righteousness. There is such a thing as righteous indignation, but one is not necessarily promoting the cause of God by his own personal anger. See Ac 10:35 for "working righteousness," and Jas 2:9 for "working sin" ( $\varepsilon \rho \gamma \alpha \zeta_{o \mu \alpha}$ both times).

Jas 1:21
Wherefore ( $\delta ı$ o). Because of this principle. See Eph 4:25.
Putting away ( $\alpha \pi o \theta \varepsilon \mu \varepsilon v o$ ). Second aorist middle participle of $\alpha \pi o \tau i \theta \eta \mu$, to put off, metaphor of removing clothing as in Ro 13:12; Col 3:8; Eph 4:22,25; 1Pe 2:1 .

Filthiness ( $\rho \cup \pi \alpha \rho ı \alpha v$ ). Late word (Plutarch) from $\rho \cup \pi \alpha \rho \circ \varsigma$, dirty (Jas 2:2 ), here only in N.T. Surely a dirty garment.

Overflowing of wickedness ( $\pi \varepsilon \rho \iota \sigma \sigma \varepsilon \iota \alpha \nu ~ к а к \iota а \varsigma) . ~ П \varepsilon \rho เ \sigma \sigma \varepsilon \iota \alpha ~ i s ~ a ~ l a t e ~ w o r d ~(f r o m ~$ $\pi \varepsilon \rho เ \sigma \sigma o \varsigma$, abundant, exceeding), only four times in N.T., in 2Co 8:2 with $\chi \alpha \rho a \varsigma$ (of joy), in Ro 5:17 with $\chi \alpha \rho ı \tau о \varsigma ~(o f ~ g r a c e) . ~ К а к ı \alpha ~(f r o m ~ к а к о \varsigma, ~ e v i l) ~ c a n ~ b e ~ e i t h e r ~ g e n e r a l ~ l i k e ~ \rho и т а р ı \alpha ~$ (filthiness, naughtiness), or special like "malice." But any of either sense is a "superfluity."

With meekness ( $\varepsilon v \pi \rho \alpha v \tau \eta \tau)$. In docility. "The contrast is with op$\eta \eta$ rather than какıаऽ" (Ropes).

The implanted word ( $\tau o v \varepsilon \mu \varphi \nu \tau o v \lambda o \gamma o v$ ). This old verbal adjective (from $\varepsilon \mu \varphi \nu \omega$ to implant, to grow in), only here in N.T., meaning properly ingrown, inborn, not $\varepsilon \mu \varphi \cup \tau \varepsilon \cup \tau$ (engrafted). It is "the rooted word" (verse 18), sown in the heart as the soil or garden of God (Mt 13:3-23; 15:13; 1Co 3:6).

Able to save ( $\delta v v a \mu \varepsilon v o v ~ \sigma \omega \sigma \alpha$ ). Cf. 1Pe 1:9; Jas 2:14; 4:12; 5:20; Ro 1:16. Ultimate salvation (effective aorist active infinitive $\sigma \omega \sigma \alpha$ from $\sigma \omega \zeta \omega$ ).

Jas 1:22
But be ye ( $\gamma \iota v \varepsilon \sigma \theta \varepsilon \delta \varepsilon$ ). Rather, "But keep on becoming" (present middle imperative of $\gamma i v o \mu \alpha)$.
 4:11; Ro 2:13, but in Ac 17:28 our "poet" (long regarded as a "doer" or "maker").

Hearers ( $\alpha к \rho о \alpha \tau \alpha$ ). Old word for agent again from $\alpha к \rho о \alpha \mu \alpha$ (to be a hearer), in N.T. only here and Ro 2:13.

Deluding yourselves ( $\pi \alpha \rho a \lambda о ү \zeta \zeta о \mu \varepsilon v o$ عavtouc). Present middle (direct) participle of $\pi \alpha \rho \alpha \lambda о ү \zeta \zeta_{0} \mu \alpha$, to reckon aside ( $\pi \alpha \rho \alpha$ ) and so wrong, to cheat, to deceive. Redundant reflexive eavtous with the middle. In N.T. only here and Col 2:4. Such a man does not delude anyone but himself.

Jas 1:23
And not a doer ( $\kappa \alpha$ ov $\pi о ı \eta \tau \eta \varsigma)$. Condition of first class, assumed as true, and ov (rather than $\mu \eta$ ) contrasts $\pi о \neq \tau \eta \varsigma$ with акроатпऽ.

Unto a man beholding ( $\alpha v \delta \rho$ катаvoouvt). Associative instrumental case after عoוкع as in 1:6. Note $\alpha v \delta \rho$ as in 1:8 in contrast with $\gamma$ vvaik (woman), not $\alpha v \theta \rho \omega \pi \omega$ (general term for man). Present active participle of катаvoع $\omega$ to put the mind down on ( $\kappa \alpha \tau \alpha$, vov¢), to consider attentively, to take note of, as in verse 24 ( $\kappa \alpha \tau \varepsilon v o \eta \sigma \varepsilon v$ ).

His natural face ( $\tau 0 \pi \rho \circ \sigma \omega \pi \sigma \nu \tau\rceil \varsigma \gamma \varepsilon v \varepsilon \sigma \varepsilon \omega \varsigma \alpha \cup \tau \circ v)$. "The face of his birth" (origin,

In a mirror ( $\varepsilon v \varepsilon \sigma \circ \pi \tau \rho \omega$ ). Old word (from $\varepsilon ו \sigma, o \pi \tau \omega$ ) in N.T. only here and 1Co 13:12 . The mirrors of the ancients were not of glass, but of polished metal (of silver or usually of copper and tin). See католтрıцоца in 2Co 3:18 .

Jas 1:24
He beholdeth himself (катعvoךбยv عavtov). Usually explained as gnomic aorist like those in 1:11, but the ordinary force of the tenses is best here. "He glanced at himself ( $\kappa \alpha \tau \varepsilon v o \eta \sigma \varepsilon v$ aorist) and off he has gone ( $\alpha \pi \varepsilon \lambda \eta \lambda \nu \theta \varepsilon v$ perfect active) and straightway forgot ( $\varepsilon \pi \varepsilon \lambda \alpha \theta \varepsilon \tau \circ$, second aorist middle indicative of $\varepsilon \pi \iota \lambda \alpha v \theta a v o \mu \alpha)$ what sort of a man he was" (oлооо $\eta v$, back in the picture, imperfect tense). The tenses thus present a vivid and lifelike picture of the careless listener to preaching (Christ's wayside hearer).

Jas 1:25
He that looketh into (о таракича¢). First aorist active articular participle of $\pi \alpha \rho \alpha к и \pi \tau \omega$, old verb, to stoop and look into (Joh 20:5,11), to gaze carefully by the side of, to peer into or to peep into ( $1 \mathrm{Pe} 1: 12$ ). Here the notion of beside ( $\pi \alpha \rho \alpha$ ) or of stooping ( $\kappa v \pi \tau \omega$ ) is not strong. Sometimes, as Hort shows, the word means only a cursory glance, but the contrast with verse 24 seems to preclude that here.

The perfect law (vouov $\tau \varepsilon \lambda \varepsilon เ o v$ ). For $\tau \varepsilon \lambda \varepsilon เ \circ v$ see 1:17. See Ro 7:12 for Paul's idea of the law of God. James here refers to the word of truth ( 1:18), the gospel of grace (Ga 6:2; Ro 12:2).

The law of liberty ( $\tau 0 \vee \tau \eta \varsigma \varepsilon \lambda \varepsilon v \theta \varepsilon \rho ı a \varsigma)$. "That of liberty," explaining why it is "perfect" ( 2:12 also), rests on the work of Christ, whose truth sets us free (Joh 8:32; 2Co 3:16; Ro 8:2 ).

And so continueth ( $\kappa \alpha \pi \alpha \rho \alpha \mu \varepsilon ı v a \varsigma)$. First aorist active articular participle again of $\pi \alpha \rho \alpha \mu \varepsilon v \omega$, parallel with $\pi \alpha \rho \alpha к \nu \psi \alpha \varsigma . ~ П \alpha \rho \alpha \mu \varepsilon v \omega$ is to stay beside, and see Php 1:25 for contrast with the simplex $\mu \varepsilon v \omega$.

Being ( $\gamma \varepsilon v$ онєvoc). Rather, "having become" (second aorist middle participle of $\gamma ı v o \mu \alpha$ to become).

Not a hearer that forgetteth (ovк акроатпऽ $\varepsilon \pi \imath \lambda \eta \sigma \mu о \nu \eta \varsigma)$. "Not a hearer of forgetfulness" (descriptive genitive, marked by forgetfulness). Eлi $\lambda \eta \sigma \mu$ ovn is a late and rare word (from $\varepsilon \pi i \lambda \eta \sigma \mu \omega \nu$, forgetful, from $\varepsilon \pi i \lambda a v \theta o \mu \alpha$, to forget, as in verse 24), here only in N.T.

But a doer that worketh ( $\alpha \lambda \lambda \alpha$ попŋ $\tau \eta \varsigma \varepsilon \rho \gamma \circ v$ ). "But a doer of work," a doer marked by work (descriptive genitive $\varepsilon \rho \gamma \circ v$ ), not by mere listening or mere talk.

In his doing ( $\varepsilon v \tau \eta \pi о ⿰ \eta \sigma \varepsilon \alpha \cup \tau o v)$. Another beatitude with $\mu \alpha \kappa \alpha \rho \iota o \varsigma$ as in $1: 12$, like the Beatitudes in Mt 5:3-12. Пoıๆбıऽ is an old word (from $\pi$ oı $\varepsilon \omega$ for the act of doing), only here in N.T.

Jas 1:26
Thinketh himself to be religious ( $\delta$ ок $\Theta \rho \eta \sigma \kappa о \varsigma \varepsilon ı v \alpha$ ). Condition of first class ( $\varepsilon l-\delta о \kappa \varepsilon$ ). $\Theta \rho \eta \sigma \kappa \sigma \varsigma$ (of uncertain etymology, perhaps from $\theta \rho \varepsilon о \mu \alpha$, to mutter forms of prayer) is predicate nominative after $\varepsilon$ عाva, agreeing with the subject of $\delta$ oкع (either "he seems" or "he thinks"). This source of self-deception is in saying and doing. The word $\theta \rho \eta \sigma \kappa o s$ is found nowhere else except in lexicons. Hatch (Essays in Biblical Greek, pp. 55-57) shows that it refers to the external observances of public worship, such as church attendance, almsgiving, prayer, fasting (Mt 6:1-18). It is the Pharisaic element in Christian worship.

While he bridleth not his tongue ( $\mu \eta \chi^{\alpha} \lambda \iota v \alpha \gamma \omega \gamma \omega \nu \gamma \lambda \omega \sigma \sigma \alpha \nu$ عav $\tau \sigma v$ ). "Not bridling his own tongue." A reference to verse 19 and the metaphor is repeated in $3: 12$. This is the earliest known example of the compound $\chi \alpha \lambda \iota v \gamma \omega \gamma \varepsilon \omega$ ( $\chi \alpha \lambda \iota v o c$, bridle $\alpha \gamma 0$, to lead). It occurs also in Lucian. The picture is that of a man putting the bridle in his own mouth, not in that of another. See the similar metaphor of muzzling ( $\varphi / \mu \circ \omega$ ) one's mouth (Mt 22:12 $\varepsilon \varphi(\mu \omega \theta \eta)$.

Deceiveth ( $\alpha \pi \alpha \tau \omega v$ ). Present active participle from $\alpha \pi \alpha \tau \eta$ (deceit). He plays a trick on himself.

Religion ( $\theta \rho \eta \sigma \kappa \varepsilon 1 \alpha$ ). Later form of $\theta \rho \eta \sigma \kappa ı \eta$ (Herodotus) from $\theta \rho \eta \sigma \kappa о \varsigma$ above. It means religious worship in its external observances, religious exercise or discipline, but not to the exclusion of reverence. In the N.T. we have it also in Ac 26:5 of Judaism and in Col 2:18 of
worshipping angels. It is vain ( $\mu \alpha \tau \alpha \iota o \varsigma$, feminine form same as masculine) or empty. Comes to nothing.

Jas 1:27
 papyri and inscriptions of $\theta \rho \eta \sigma \kappa \varepsilon \iota \alpha$ for ritual and reverential worship in the Roman Empire (Moulton and Milligan's Vocabulary; Deissmann, St. Paul, p. 251). As Hort shows, this is not a definition of religion or religious worship, but only a pertinent illustration of the right spirit of religion which leads to such acts.

Before our God and Father ( $\pi \alpha \rho \alpha \tau \omega \theta \varepsilon \omega \kappa \alpha \pi \alpha \tau \rho$ ). By the side of ( $\pi \alpha \rho \alpha$ ) and so from God's standpoint (Mr 10:27). A $\mu$ ( $\alpha$ тoc (compound verbal adjective, alpha privative, $\mu \iota \alpha \nu \omega$ to defile), puts in negative form (cf. 1:4,6 ) the idea in $\kappa \alpha \theta \alpha \rho \alpha$ (pure, clean). This ( $\alpha v \tau \eta$ ). Feminine demonstrative pronoun in the predicate agreeing with $\theta \rho \eta \sigma \kappa \varepsilon \iota \alpha$.

To visit ( $\varepsilon \pi \iota \sigma \kappa \varepsilon \pi \tau \varepsilon \sigma \theta \alpha$ ). Epexegetic (explaining $\alpha \cup \tau \eta$ ) present middle infinitive of $\varepsilon \pi \iota \sigma \kappa \varepsilon \pi \tau о \mu \alpha$, common verb to go to see, to inspect, present tense for habit of going to see. See Mt 25:36,43 for visiting the sick.

The fatherless and widows (орчаvovৎ ка $\chi \eta \rho a \varsigma)$. "The natural objects of charity in the community" (Ropes). Oppavos is old word for bereft of father or mother or both. In N.T. only here and Joh 14:18 . Note order (orphans before widows).

Unspotted ( $\alpha \sigma \pi \lambda \lambda o v$ ). Old adjective (alpha privative and $\sigma \pi \iota \lambda o \varsigma$, spot), spotless. This the more important of the two illustrations and the hardest to execute.

To keep ( $\tau \eta \rho \varepsilon เ v$ ). Present active infinitive, "to keep on keeping oneself un-specked from the world" (a world, коб $\mu$ ¢, full of dirt and slime that bespatters the best of men).

## Jas 2

Jas 2:1
My brethren ( $\alpha \delta \varepsilon \lambda \varphi o \mu o v$ ). Transition to a new topic as in 1:19; 2:5,14; 3:1; 5:7.
Hold not ( $\mu \eta \varepsilon \chi \varepsilon \tau \varepsilon$ ). Present active imperative of $\varepsilon \chi \omega$ with negative $\mu \eta$, exhortation to stop holding or not to have the habit of holding in the fashion condemned.
 objective genitive, not subjective (faith of), but "faith in our Lord Jesus Christ," like $\varepsilon \chi \varepsilon \tau \varepsilon$ mıテтıv $\theta \varepsilon o u$ (Mr 11:22), "have faith in God." See the same objective genitive with $\pi \iota \sigma \tau \iota \varsigma$ in Ac 3:6; Ga 2:16; Ro 3:22; Re 14:12. Note also the same combination as in 1:1 "our Lord Jesus Christ" (there on a par with God).

The Lord of Glory ( $\tau \eta \varsigma \delta o \xi \eta \varsigma$ ). Simply "the Glory." No word for "Lord" (кvрıи) in the Greek text. T $\ddagger \varsigma \delta о \xi \eta \varsigma$ clearly in apposition with tov кupıov I $\eta \sigma o v$ Xpıбтov. James thus terms "our Lord Jesus Christ" the Shekinah Glory of God. See Heb 9:5 for "the cherubim of Glory." Other New Testament passages where Jesus is pictured as the Glory are Ro 9:4; 2Co 4:6; Eph 1:17; Heb 1:3. Cf. 2Co 8:9; Php 2:5-11 .

With respect of persons ( $\varepsilon v \pi \rho \circ \sigma \omega \pi \sigma \lambda \eta \mu \psi \iota \alpha \iota)$. A Christian word, like $\pi \rho \circ \sigma \omega \pi \sigma \lambda \eta \mu \pi \tau \eta \varsigma$ (Ac 10:34) and $\pi \rho \circ \sigma \omega \pi о \lambda \eta \mu \pi \tau \varepsilon \iota \tau \varepsilon$ (Jas 2:9), not in LXX or any previous Greek, but made from $\pi \rho \circ \sigma \omega \pi$ о $\nu \lambda \mu \mu \alpha v \varepsilon ı v(L u ~ 20: 21 ; ~ G a ~ 2: 6), ~ w h i c h ~ i s ~ a ~ H e b r e w ~ i d i o m ~$ for panim nasa, "to lift up the face on a person," to be favorable and so partial to him. See $\pi \rho \circ \sigma \omega \pi \sigma \lambda \eta \mu \psi \iota \alpha$ in this sense of partiality (respect of persons) in Ro 2:11; Col 3:25; Eph 6:9 (nowhere else in N.T.). Do not show partiality.

Jas 2:2
For ( $\gamma \alpha \rho$ ). An illustration of the prohibition.
If there come in ( $\varepsilon a v \varepsilon เ \sigma \varepsilon \lambda \theta \eta$ ). Condition of third class (supposable case) with $\varepsilon a v$ and second (ingressive) aorist active subjunctive of $\varepsilon ו \sigma \varepsilon \rho \chi \circ \mu \alpha$.

Into your synagogue ( $\varepsilon ા \varsigma \sigma v v \alpha \gamma \omega \gamma \eta \nu \nu \mu \omega v$ ). The common word for the gathering of Jews for worship ( $\operatorname{Lu}$ 12:11 ) and particularly for the building where they met ( $\operatorname{Lu} 4: 15,20,28$ , etc.). Here the first is the probable meaning as it clearly is in Heb 10:25 ( $\tau \eta \nu \varepsilon \pi \iota \sigma v v a \gamma \omega \gamma \eta \nu$ $\varepsilon \alpha v \tau \omega v$ ), where the longer compound occurs. It may seem a bit odd for a Christian church ( $\varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha)$ to be termed $\sigma \cup v \alpha \gamma \omega \gamma \eta$, but James is writing to Jewish Christians and this is another incidental argument for the early date. Epiphanius (Haer. XXX. 18) states that the Ebionites call their church $\sigma v v a \gamma \omega \gamma \eta$, not $\varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$. In the fourth century an inscription has $\sigma v v a \gamma \omega \gamma \eta$ for the meeting-house of certain Christians.

A man with a gold ring ( $\alpha v \eta \rho \chi \rho \cup \sigma о \delta \alpha \kappa \tau \nu \lambda ı \varsigma)$. "A gold-fingered man," "wearing a gold ring." The word occurs nowhere else, but Lucian has $\chi \rho v \sigma o \chi \varepsilon เ \rho$ (gold-handed) and Epictetus has $\chi$ рибous $\delta \alpha \kappa \tau \cup \lambda ı$ ıus (golden seal-rings). "Hannibal, after the battle of Cannae,
sent as a great trophy to Carthage, three bushels of gold-rings from the fingers of Roman knights slain in battle" (Vincent).

In fine clothing ( $\varepsilon v \varepsilon \sigma \theta \eta \tau \lambda \alpha \mu \pi \rho \alpha$ ). "In bright (brilliant) clothing" as in Lu 23:11; Ac 10:30; Re 18:41 . In contrast with "vile clothing" ( $\varepsilon v \rho v \pi \alpha \rho \alpha \varepsilon \sigma \theta \eta \tau$ ), "new glossy clothes and old shabby clothes" (Hort). Puпa $о$ оя (late word from $\rho 0 \pi \circ$, filth, $1 \mathrm{Pe} 3: 21$ ) means filthy, dirty. In N.T. only here and Re 22:11 (filthy).

Poor man ( $\pi \tau \omega \chi \circ \varsigma$ ). Beggarly mendicant (Mt 19:21), the opposite of $\pi \lambda$ ovoto (rich). Jas 2:3
And ye have regard to $(\varepsilon \pi \iota \beta \lambda \varepsilon \psi \eta \tau \varepsilon \delta \varepsilon \varepsilon \pi)$. First aorist active subjunctive (still with $\varepsilon \alpha v$ of verse 2) of $\varepsilon \pi \iota \beta \lambda \varepsilon \pi \omega$, followed by repeated preposition $\varepsilon \pi$, to gaze upon, old compound, in N.T. only here and Lu 1:48; 9:38 .

Weareth ( $\varphi$ opouvta). "Wearing," present active participle of the old frequentative verb $\varphi \rho \rho \varepsilon \omega$ (from $\varphi \varepsilon \rho \omega$ ), to bear constantly, to wear (Mt 11:8). Note repeated article $\tau \eta \nu$ (the) with $\varepsilon \sigma \theta \eta \tau \alpha$ pointing to verse 2 .

And say ( $\kappa \alpha \varepsilon ı \pi \eta \tau \varepsilon$ ). Continuing the third-class condition with $\varepsilon \alpha v$ and second aorist active subjunctive of $\varepsilon$ eımov.

Sit thou here in a good place ( $\sigma v \kappa \alpha \theta$ ov $\omega \delta \varepsilon \kappa \alpha \lambda \omega \varsigma$ ). Emphatic position of $\sigma v$, "Do thou sit here in a good place." Present middle imperative of $\kappa \alpha \theta \eta \mu \alpha$ to sit for the literary $\kappa \alpha \theta \eta \sigma o$. See Mt 23:6 for the first seats in the synagogue (places of honour).

And ye say to the poor man ( $\kappa \alpha \tau \omega \pi \tau \omega \chi \omega \varepsilon \iota \pi \eta \tau \varepsilon$ ). Third class condition with $\varepsilon \alpha v$ continued as before ( $\varepsilon \iota \pi \eta \tau \varepsilon$ ). Note article $\tau \omega$ pointing to verse 2.

Stand thou there ( $\sigma v \sigma \tau \eta \theta \varepsilon \kappa \varepsilon$ ). Second aorist (intransitive) active imperative of $\iota \sigma \tau \eta \mu$, to place. Ingressive aorist, Take a stand. $\Sigma v$ emphatic again. The MSS. vary in the position of $\varepsilon \kappa \varepsilon$ (there).
 against" or "down beside" see Ex 19:17 vло то ороц ("at the foot of the mountain") and vло $\sigma \varepsilon$ ("at thy feet") (De 33:3). Conquerors often placed their feet on the necks of the victims (Lu 20:43).

Jas 2:4
Are ye not divided in your own mind? (ov $\delta เ \varepsilon \kappa \rho 1 \theta \eta \tau \varepsilon \varepsilon v$ عavtoюб;). First aorist (gnomic) passive indicative of $\delta \iota \alpha \rho \rho \iota \omega \omega$, to separate, conclusion of the third-class condition (future) in a rhetorical question in the gnomic aorist (as if past) with ou expecting an affirmative answer. For this idiom (gnomic aorist) in a conclusion of the third-class condition see 1Co 7:28. "Were ye not divided in (among) yourselves?" Cf. 1:6; Mt 21:21 .

Judges with evil thoughts ( $\kappa \rho \iota \alpha \delta_{\iota} \alpha \lambda о \gamma \iota \sigma \mu \omega \nu \pi о \nu \eta \rho \omega v$ ). Descriptive genitive as in $1: 25$. $\Delta \iota \lambda$ о $\gamma \iota \sigma \mu \mathrm{o}$, is an old word for reasoning (Ro 1:21). Reasoning is not necessarily evil, but see Mt 15:19 ( лоvпро) and Mr 7:21 (како) for evil reasonings, and 1Ti 2:8 without an
adjective. See Jas $1: 8 ; 4: 8$ for $\delta \iota \psi \cup \chi o \varsigma$. They are guilty of partiality (a divided mind) as between the two strangers.

Jas 2:5
Did not God choose? (ou o $\theta \varepsilon o \varsigma \varepsilon \xi \varepsilon \lambda \varepsilon \xi \alpha \tau \circ$;). Affirmative answer expected. First aorist middle (indirect, God chose for himself) indicative of $\varepsilon \kappa \lambda \varepsilon \gamma \omega$, the very form used by Paul three times of God's choice in 1Co 1:27f.

As to the world $(\tau \omega \kappa 0 \sigma \mu \omega)$. The ethical dative of interest, as the world looks at it as in Ac 7:20; 1Co 1:18; 2Co 10:4; Jas 4:4. By the use of the article (the poor) James does not affirm that God chose all the poor, but only that he did choose poor people (Mt 10:23-26; 1Co 1:26-28).

Rich in faith ( $\pi \lambda$ ovoıov¢ $\varepsilon \nu \pi \iota \sigma \tau \varepsilon$ ). Rich because of their faith. As he has shown in 1:9f

Which he promised ( $\eta \varsigma \varepsilon \pi \varepsilon \gamma \gamma \varepsilon ı \lambda \alpha \tau 0$ ). Genitive of the accusative relative $\eta \nu$ attracted to the case of the antecedent $\beta a \sigma \iota \lambda \varepsilon \iota \alpha \varsigma$ (the Messianic kingdom), the same verb and idea already in 1:12 ( $\varepsilon \pi \eta \gamma \gamma \varepsilon ו \lambda \alpha \tau о)$. Cf. the beatitude of Jesus in Mt 5:3 for the poor in spirit.

Jas 2:6
But ye have dishonoured the poor man ( $v \mu \varepsilon \varsigma \delta \varepsilon \eta \tau \tau \mu \alpha \sigma \tau \varepsilon \tau \tau v \pi \tau \omega \chi \circ v$ ). First aorist active indicative of $\alpha \tau \mu \mu \zeta \omega$, old verb from $\alpha \tau \mu \rho \circ$, dishonoured (Mt 13:57). In the act of partiality pictured in 2:3.

Oppress you ( $\kappa \alpha \tau \alpha \delta u v a \sigma \tau \varepsilon v o v \sigma \iota v ~ \nu \mu \omega v$ ). Not very common compound (ката $\delta \cup v a \sigma \tau \varepsilon \cup \omega$, present active indicative, from ката and $\delta \cup v a \sigma \tau \eta \varsigma$, potentate, Lu 1:52 ), used of the devil in Ac 10:38 (only other N.T. example). Examples in papyri of harsh treatment by men in authority. Already poor Christians are feeling pressure from rich Jews as overlords.

Drag you ( $\varepsilon \lambda \kappa$ коvбıv v $\mu \alpha \varsigma$ ). Old and vigorous word for violent treatment, as of Paul in Ac 16:19; 21:30. Cf. such violence in Lu 12:58; Ac 8:3 .

Before the judgment-seats ( $\varepsilon ı \varsigma ~ к \rho ı \tau \eta \rho ı \alpha) . ~ " T o ~ c o u r t s ~ o f ~ j u s t i c e " ~ a s ~ i n ~ 1 C o ~ 6: 2,4 ~(o n l y ~$ other N.T. examples). Common in the papyri in this sense. From крıv to judge, крıtŋя (judge), place where judgment is given.

Jas 2:7
Blaspheme ( $\beta \lambda \alpha \sigma \varphi \eta \mu \sigma v \sigma v$ ). Present active indicative of common verb $\beta \lambda \alpha \sigma \varphi \eta \mu \varepsilon \omega$ (from $\beta \lambda \alpha \sigma \varphi \eta \mu \circ \varsigma$, speaking evil, $\beta \lambda \alpha \xi$ or $\beta \lambda \alpha \pi \tau \omega$ and $\varphi \eta \mu \eta$ ), as in Lu 22:65.

The honourable name ( $\tau о \kappa \alpha \lambda о v$ оvo $\mu$ ). "The beautiful name."
By the which ye were called ( $\tau 0 \varepsilon \pi \kappa \kappa \lambda \eta \theta \varepsilon v \varepsilon \varphi^{\prime} v \mu a \varsigma$ ). "The one called upon you" (first aorist passive articular participle of $\varepsilon \pi \kappa \kappa \alpha \lambda \varepsilon \omega$, to put a name upon, to give a surname to, as Ac 10:18 ). What name is that? Almost certainly the name of Christ as we see it in Ac 11:26; 26:28; $1 \mathrm{Pe} 4: 14,16$. It was blasphemy to speak against Christ as some Jews and Gentiles were doing (Ac 13:45; 18:6; 26:11; 1Co 12:3; 1Ti 1:13 ). Cf. Ac 15:17.

Jas 2:8
Howbeit ( $\mu \varepsilon v \tau 0$ ). Probably not adversative here, but simply confirmatory, "if now," "if indeed," "if really." Common in Xenophon in this sense. See the contrast ( $\delta \varepsilon$ ) in verse 9.

If ye fulfil ( $\varepsilon \tau \varepsilon \lambda \varepsilon \tau \tau \varepsilon$ ). Condition of first class, assumed as true with $\varepsilon$ and present active indicative of $\tau \varepsilon \lambda \varepsilon \omega$, old verb, to bring to completion, occurring in Ro 2:27 also with vouos, (law). Jesus used $\pi \lambda \eta \rho o \omega$ in Mt 4:17. James has $\tau \eta \rho \varepsilon \omega$ in 2:10.

The royal law (voноv $\beta \alpha \sigma \iota \lambda ı \kappa о v)$. Old adjective for royal, regal (from $\beta \alpha \sigma \iota \lambda \varepsilon v \varsigma$ king), as of an officer (Joh 4:46). But why applied to vouoc? The Romans had a phrase, lex regia, which came from the king when they had kings. The absence of the article is common with vouoc ( $4: 11$ ). It can mean a law fit to guide a king, or such as a king would choose, or even the king of laws. Jesus had said that on the law of love hang all the law and the prophets ( Mt 22:40), and he had given the Golden Rule as the substance of the Law and the prophets (Mt 7:12 ). This is probably the royal law which is violated by partiality (Jas 2:3 ). It is in accord with the Scripture quoted here (Le 19:18) and ratified by Jesus (Lu 10:28).

Jas 2:9
But if ye have respect of persons ( $\varepsilon \delta \varepsilon \pi \rho \circ \sigma \omega \pi \pi \lambda \eta \mu \pi \tau \varepsilon \iota \tau \varepsilon$ ). Condition of first class by contrast with that in verse 8 . For this verb (present active indicative), formed from $\pi \rho \circ \sigma \omega \pi \sigma v$ $\lambda \alpha \mu \beta \alpha v \omega$, here alone in the N.T., see in 2:1. A direct reference to the partiality there pictured.

Ye commit sin ( $\alpha \mu \alpha \rho \tau \iota \alpha v \varepsilon \rho \gamma \alpha \zeta \varepsilon \sigma \theta \varepsilon$ ). "Ye work a sin." A serious charge, apparently, for what was regarded as a trifling fault. See Mt 7:23, o $\varepsilon \rho \gamma \alpha \zeta о \mu \varepsilon v o ~ \tau \eta \nu ~ a v o \mu \mu \alpha v$ (ye that work iniquity), an apparent reminiscence of the words of Jesus there (from Ps 6:8).

Being convicted ( $\varepsilon \lambda \varepsilon \gamma \chi \circ \mu \varepsilon v o$ ). Present passive participle of $\varepsilon \lambda \varepsilon \gamma \chi \omega$, to convict by proof of guilt (Joh 3:20; 8:9,46; 1Co 14:24).

As transgressors ( $\omega \varsigma \pi \alpha \rho \alpha \beta \alpha \tau \alpha$ ). For this word from $\pi \alpha \rho \alpha \beta \alpha \iota v \omega$, to step across, to transgress, see Ga 2:18; Ro 2:25,27. See this very sin of partiality condemned in Le 19:15; De 1:17; 16:19. To the law and to the testimony.

Jas 2:10
Whosoever shall keep (oбтıc $\tau \eta \rho \eta \sigma \eta$ ). Indefinite relative clause with oбтıc and aorist active subjunctive of $\tau \eta \rho \varepsilon \omega$, old verb, to guard (from $\tau \eta \rho o \varsigma$ guarding), as in Mt 27:36, without $\alpha v$ (though often used, but only one example of modal $\varepsilon \alpha v=\alpha v$ in James, viz., 4:4). This modal $\alpha v$ ( $\varepsilon a v$ ) merely interprets the sentence as either more indefinite or more definite (Robertson, Grammar, p. 957f.).

And yet stumble in one point ( $\pi \tau \alpha \iota \sigma \eta \delta \varepsilon \varepsilon v \varepsilon v$ ). First aorist active subjunctive also of $\pi \tau \alpha \iota \omega$, old verb, to trip, as in 3:2; Ro 11:11 . "It is incipient falling" (Hort).

He is become ( $\gamma \varepsilon \gamma \circ v \varepsilon v$ ). Second perfect indicative of $\gamma ı v o \mu \alpha$, "he has become" by that one stumble.

Guilty of all ( $\pi \alpha v \tau \omega v \varepsilon v o \chi o \varsigma)$. Genitive of the crime with $\varepsilon v o \chi \circ \varsigma$, old adjective from $\varepsilon v \varepsilon \chi \omega$ (to hold on or in), held in, as in Mr 3:29. This is law. To be a lawbreaker one does
not have to violate all the laws, but he must keep all the law (odov tov vouov) to be a lawabiding citizen, even laws that one does not like. See Mt 5:18f. for this same principle. There is Talmudic parallel: "If a man do all, but omit one, he is guilty for all and each." This is a pertinent principle also for those who try to save themselves. But James is urging obedience to all God's laws.

Jas 2:11
He that said (o $\varepsilon \iota \pi \omega v$ )
--said also ( $\varepsilon ו \pi \varepsilon v \kappa \alpha)$. The unity of the law lies in the Lawgiver who spoke both prohib-
 here is that of B in Ex 20 (Lu 18:20; Ro 13:9), but not in Mt 5:21,27 (with ov and future indicative).

Now if thou dost not commit adultery, but killest ( $\varepsilon \delta \varepsilon$ ov $\mu \circ \not \subset \varepsilon \cup \varepsilon \mid \sigma, ~ \varphi о v \varepsilon \cup \varepsilon ા ¢ ~ \delta \varepsilon$ ). Condition of first class with ov (not $\mu \eta$ ) because of the contrast with $\delta \varepsilon$, whereas $\varepsilon \mu \eta$ would mean "unless," a different idea. So ov in 1:23.

A transgressor of the law ( $\pi \alpha \rho \alpha \beta \alpha \tau \eta \varsigma$ vouov) as in verse 9 . Murder springs out of anger (Mt 5:21-26 ). People free from fleshly sins have often "made their condemnation of fleshly sins an excuse for indulgence towards spiritual sins" (Hort).

Jas 2:12
So speak ye, and so do (out $\omega \varsigma \lambda \alpha \lambda \varepsilon ı \tau \varepsilon \kappa \alpha$ ou $\tau \omega \varsigma \pi о เ \varepsilon \tau \tau \varepsilon$ ). Present active imperatives as a habit. For the combination see 1:19-21 contrasted with 1:22-25, and 1:26 with 1:27.

By a law of liberty ( $\delta ı \alpha$ vouov $\varepsilon \lambda \varepsilon v \theta \varepsilon \rho ı a \varsigma)$. The law pictured in 1:25, but law, after all, not individual caprice of "personal liberty." See Ro 2:12 for this same use of $\delta \iota \alpha$ with кpıv $\omega$ in the sense of accompaniment as in Ro 2:27; 4:11; 14:20 . "Under the law of liberty."

Jas 2:13
Without mercy ( $\alpha v \varepsilon \lambda \varepsilon o \varsigma)$. Found here only save a doubtful papyrus example ( $\alpha v \varepsilon \lambda \varepsilon \omega \varsigma$ ) for the vernacular $\alpha v \lambda \varepsilon \omega \varsigma$ and the Attic $\alpha v \eta \lambda \varepsilon \eta \varsigma$. For this principle of requital see Mt 5:7; 6:14; 7:1f.; 18:33.

Glorieth against ( $\kappa \alpha \tau \alpha \kappa \alpha v \chi \alpha \tau \alpha)$. Present middle indicative of the old compound verb катакаих $\alpha о \mu \alpha$, to exult over (down), in N.T. only here, 3:14; Ro 11:18. Only mercy can triumph over justice with God and men. "Mercy is clothed with the divine glory and stands by the throne of God" (Chrysostom). See Ro 8:31-39; Mt 9:13; 12:7.

Jas 2:14
What doth it profit? ( $\tau$ o甲 $\varepsilon \lambda o \sigma ;$ ). Rhetorical question, almost of impatience. Old word from $о \varphi \varepsilon \lambda \lambda \omega$, to increase, in N.T. only here, verse 16; 1Co 15:32 . "T о $о \varepsilon \lambda$ os was a common expression in the vivacious style of a moral diatribe" (Ropes).

If a man say ( $\varepsilon \alpha \sim \lambda \varepsilon \gamma \eta \tau \iota \varsigma)$. Condition of third class with $\varepsilon \alpha v$ and the present active subjunctive of $\lambda \varepsilon \gamma \omega$, "if one keep on saying."

He hath faith ( $\pi$ Ioтıv $\varepsilon \chi \varepsilon เ v$ ). Infinitive in indirect assertion after $\lambda \varepsilon \gamma \eta$.

But have not works $(\varepsilon \rho \gamma \alpha \delta \varepsilon \mu \eta \varepsilon \chi \eta)$. Third-class condition continued, "but keeps on not having ( $\mu \eta$ and present active subjunctive $\varepsilon \chi \eta$ ) works." It is the spurious claim to faith that James here condemns.

Can that faith save him? ( $\mu \eta \delta \nu v a \tau \alpha \eta \pi \iota \sigma \tau \iota \varsigma \sigma \omega \sigma \alpha \alpha v \tau o v ;)$. Negative answer expected $(\mu \eta)$. Effective aorist active infinitive $\sigma \omega \sigma \alpha$ (from $\sigma \omega \zeta \omega$ ). The article $\eta$ here is almost demonstrative in force as it is in origin, referring to the claim of faith without works just made.

Jas 2:15
If a brother or sister be naked ( $\varepsilon \alpha v \alpha \delta \varepsilon \lambda \varphi \circ \varsigma \eta \alpha \delta \varepsilon \lambda \varphi \eta \gamma v \mu \nu 0 v \pi \alpha \rho \chi \omega \sigma \iota v$ ). Condition again of third class (supposable case) with $\varepsilon \alpha \nu$ and present active subjunctive of $v \pi \alpha \rho \chi \omega$, to exist, in the plural though $\eta$ (or) is used and not $\kappa \alpha$ (and). Hence $\gamma \cup \mu \nu o$ is masculine plural in the predicate nominative. It does not here mean absolutely naked, but without sufficient clothing as in Mt 25:36ff.; Joh 21:7; Ac 19:16.

In lack of daily food ( $\lambda \varepsilon \iota \pi о \mu \varepsilon v o \tau \eta \varsigma \varepsilon \varphi \eta \mu \varepsilon \rho о v \tau \rho о \varphi \eta \varsigma)$. Present passive participle of $\lambda \varepsilon \iota \pi \omega$ and ablative case $\tau \rho о \varphi \eta \varsigma$ like $\lambda \varepsilon \iota \pi \varepsilon \tau \alpha \sigma о \varphi \iota \alpha \varsigma$ ( 1:5). The old adjective $\varepsilon \varphi \eta \mu \varepsilon \rho \circ \varsigma$ (o $\varepsilon \pi$ $\eta \mu \varepsilon \rho a v \omega v$, that which is for a day) occurs here only in the N.T., though $\varepsilon \varphi \eta \mu \varepsilon \rho ı a$ (daily routine) is found in Lu 1:5,8. This phrase occurs in Diodorus, but not in LXX.

Jas 2:16
And one of you say unto them ( $\varepsilon \iota \pi \eta \delta \varepsilon \tau \iota \varsigma$ av $\quad$ тoıৎ $\varepsilon \xi \nu \mu \omega v$ ). Third-class condition again continued from verse 15 with second aorist active subjunctive $\varepsilon ו \pi \eta$.

Go in peace ( $v \pi \alpha \gamma \varepsilon \tau \varepsilon \varepsilon v \varepsilon \iota \rho \eta \nu \eta$ ). Present active imperative of $v \pi \alpha \gamma \omega$. Common Jewish farewell (Jud 18:6; 1Sa 1:17; 20:42; 2Sa 15:9). Used by Jesus (Mr 5:34; Lu 7:50 ).

Be ye warmed and filled ( $\theta \varepsilon \rho \mu \alpha ı v \varepsilon \sigma \theta \varepsilon \kappa \alpha \chi о \rho \tau \alpha \zeta \varepsilon \sigma \theta \varepsilon)$. Present imperative either middle (direct) or passive. We have $\theta \varepsilon \rho \mu \alpha ı v o \mu \alpha$ as a direct middle in Joh 18:18 (were warming themselves) and that makes good sense here: "Warm yourselves." Xорта弓 $\omega$ was originally used for pasturing cattle, but came to be used of men also as here. "Feed yourselves" (if middle, as is likely). Instead of warm clothes and satisfying food they get only empty words to look out for themselves.

And yet ye give not ( $\mu \eta \delta \omega \tau \varepsilon \delta \varepsilon$ ). Third-class condition with $\delta \varepsilon$ (and yet) and $\mu \eta$ and the second aorist active subjunctive of $\delta \iota \delta \omega \mu$, to give, cold deeds with warm words.

The things needful to the body ( $\tau \alpha \varepsilon \pi ı \tau \eta \delta \varepsilon \iota \alpha \tau 0 v \sigma \omega \mu \alpha \tau \circ$ ). "The necessities of the body" (the necessaries of life). Old adjective from adverb $\varepsilon \pi \iota \tau \eta \delta \varepsilon \varsigma$ (enough), only here in N.T.

What doth it profit? ( $\tau$ o $\varphi \varepsilon \lambda o \sigma ;$ ). As in verse 14 and here the conclusion (apodosis) of the long condition begun in verse 15 .

Jas 2:17
If it have not works $(\varepsilon \alpha v \mu \eta \varepsilon \chi \eta \varepsilon \rho \gamma \alpha)$. Another condition of the third class with $\varepsilon \alpha v$ and $\mu \eta$ and the present active subjunctive of $\varepsilon \chi \omega$, "if it keep on not having works."

In itself ( $\kappa \alpha \theta^{\prime} \varepsilon \alpha v \tau \eta v$ ). In and of itself (according to itself), inwardly and outwardly dead ( $\nu \varepsilon \kappa \rho \alpha)$. Same idiom in Ac 28:16; Ro 14:22. It is a dead faith.

Jas 2:18
Yea, a man will say ( $\left.\alpha \lambda \lambda^{\prime} \varepsilon \rho \varepsilon \tau \iota \varsigma\right)$. Future active of $\varepsilon \iota \pi o v$. But $\alpha \lambda \lambda^{\prime}$ here is almost certainly adversative (But some one will say), not confirmatory. James introduces an imaginary objector who speaks one sentence: "Thou hast faith and I have works" ( $\Sigma v \pi \iota \sigma \tau \iota v \varepsilon \chi \varepsilon ı \varsigma ~ \kappa \alpha \gamma \omega$ $\varepsilon \rho \gamma \alpha \varepsilon \chi \omega)$. Then James answers this objector. The objector can be regarded as asking a short question: "Hast thou faith?" In that case James replies: "I have works also."

Show me thy faith apart from thy works ( $\delta \varepsilon ı \xi \circ \nu \mu \circ \tau \eta \nu \pi \iota \sigma \tau \iota \nu \sigma o v \chi \omega \rho ı \varsigma \tau \omega \nu \varepsilon \rho \gamma \omega \nu$ ). This is the reply of James to the objector. First aorist active imperative of $\delta \varepsilon \iota \kappa \nu \cup \mu$, tense of urgency. The point lies in $\chi \omega \rho \iota \varsigma$, which means not "without," but "apart from," as in Heb 11:6 (with the ablative case), "the works that properly belong to it and should characterise it" (Hort). James challenges the objector to do this.

And I by my works will shew thee my faith ( $\kappa \alpha \gamma \omega \sigma o \delta \varepsilon \iota \xi \omega \varepsilon \kappa \tau \omega \nu \varepsilon \rho \gamma \omega \nu \mu \nu \nu \tau \eta \nu$ $\pi \iota \sigma \tau \iota v)$. It is not faith $o r$ works, but proof of real faith (live faith $v s$. dead faith). The mere profession of faith with no works or profession of faith shown to be alive by works. This is the alternative clearly stated. Note $\pi \iota \sigma \tau \iota v$ (faith) in both cases. James is not here discussing "works" (ceremonial works) as a means of salvation as Paul in Ga 3; Ro 4 , but works as proof of faith.

Jas 2:19
Thou believest that God is one ( $\sigma v \pi \iota \sigma \tau \varepsilon v \varepsilon \iota \varsigma$ o $\varepsilon \iota \varsigma ~ \theta \varepsilon o \varsigma \varepsilon \sigma \tau \iota v$ ). James goes on with his reply and takes up mere creed apart from works, belief that God exists (there is one God), a fundamental doctrine, but that is not belief or trust in God. It may be mere creed.

Thou doest well ( $\kappa \alpha \lambda \omega \varsigma \pi о \iota \varepsilon \iota)$ ). That is good as far as it goes, which is not far.
The demons also believe ( $\kappa \alpha \tau \alpha \delta \alpha \iota \mu \nu \imath \alpha \pi \iota \sigma \tau \varepsilon v o v \sigma ı)$ ). They go that far (the same verb $\pi \iota \sigma \tau \varepsilon v \omega)$. They never doubt the fact of God's existence.

And shudder ( $\kappa \alpha \varphi \rho \iota \sigma \sigma o v \sigma \iota v$ ). Present active indicative of $\varphi \rho \iota \sigma \sigma \omega$, old onomatopoetic verb to bristle up, to shudder, only here in N.T. Like Latin horreo (horror, standing of the hair on end with terror). The demons do more than believe a fact. They shudder at it.

Jas 2:20
But wilt thou know? ( $\theta \varepsilon \lambda \varepsilon เ \varsigma ~ \delta \varepsilon \gamma \nu \omega v \alpha ı ?)$. But dost thou wish to know?" Ingressive aorist active infinitive of $\gamma เ v o \sigma \kappa \omega$ (come to know). James here introduces a new argument like Ro 13:3.

O vain man ( $\omega \alpha \nu \theta \rho \omega \pi \varepsilon \kappa \varepsilon v \varepsilon)$. Goes on with the singular objector and demolishes him. For "empty" (deficient) Paul uses $\alpha \varphi \rho \omega \nu$ (fool) in 1 Co 15:36 and just $\alpha \nu \theta \rho \omega \pi \varepsilon$ in Ro 2:1; 9:20.

Barren ( $\alpha \rho \gamma \varepsilon$ ). See 2Pe 1:8 (not idle nor unfruitful) and Mt 12:36, but Hort urges "inactive" as the idea here, like money with no interest and land with no crops.

Jas 2:21
Justified by works ( $\varepsilon \xi \varepsilon \rho \gamma \omega \nu \varepsilon \delta \iota \kappa \alpha \iota \omega \theta \eta$ ). First aorist passive indicative of $\delta \iota \kappa \alpha \iota \omega$ (see Galatians and Romans for this verb, to declare righteous, to set right) in a question with ouk expecting an affirmative answer. This is the phrase that is often held to be flatly opposed to Paul's statement in Ro 4:1-5 , where Paul pointedly says that it was the faith of Abraham (Ro $4: 9$ ) that was reckoned to Abraham for righteousness, not his works. But Paul is talking about the faith of Abraham before his circumcision ( $4: 10$ ) as the basis of his being set right with God, which faith is symbolized in the circumcision. James makes plain his meaning also.

In that he offered up Isaac his son upon the altar ( $\alpha v \varepsilon v \varepsilon \gamma \kappa \alpha \varsigma$ Iбаак тov vıov autov $\varepsilon \pi$ тo $\theta v \sigma \iota a \sigma \tau \eta \rho \circ v)$. They use the same words, but they are talking of different acts. James points to the offering (aveveүкац second aorist--with first aorist ending--active participle of $\operatorname{ava\varphi } \rho \omega \omega$ ) of Isaac on the altar (Ge 22:16f. ) as proof of the faith that Abraham already had. Paul discusses Abraham's faith as the basis of his justification, that and not his circumcision. There is no contradiction at all between James and Paul. Neither is answering the other. Paul may or may not have seen the Epistle of James, who stood by him loyally in the Conference in Jerusalem (Ac 15; Ga 2 ).

Jas 2:22
Thou seest ( $\beta \lambda \varepsilon \pi \varepsilon ⿺ \varsigma)$. Obvious enough with any eyes to see. This may be a question, seest thou?

Wrought with ( $\sigma \cup v \eta \rho \gamma \varepsilon$ ). Imperfect active of $\sigma v v \varepsilon \rho \gamma \varepsilon \omega$, old verb for which see Ro 8:28 .Followed by associative-instrumental case $\varepsilon \rho \gamma o$ c. Faith cooperated with the deed of offering up Isaac.

Was made perfect ( $\varepsilon \tau \varepsilon \lambda \varepsilon \epsilon \omega \theta \eta$ ). First aorist passive indicative of $\tau \varepsilon \lambda \varepsilon ו \sigma \omega$, to carry to the end, to complete like love in 1Jo 4:18. See Jas 1:4 for $\tau \varepsilon \lambda \varepsilon \circ \circ \vee \varepsilon \rho \gamma \circ v$.

Jas 2:23
Was fulfilled ( $\varepsilon \pi \lambda \eta \rho \omega \theta \eta)$. First aorist passive indicative of $\pi \lambda \eta \rho o \omega$, the usual verb for fulfilling Scripture. So James quotes Ge 15:6 as proving his point in verse 21 that Abraham had works with his faith, the very same passage that Paul quotes in Ro $4: 3$ to show that Abraham's faith preceded his circumcision and was the basis of his justification. And both James and Paul are right, each to illustrate a different point.

And he was called the friend of $\operatorname{God}(\kappa \alpha \varphi \iota \lambda \rho \varsigma \theta \varepsilon \sigma v \varepsilon \kappa \lambda \eta \theta \eta$ ). First aorist passive indicative of $\kappa \alpha \lambda \eta$ о. Not a part of the Scripture quoted. Philo calls Abraham the friend of God and see Jubilees 19:9; 30:20. The Arabs today speak of Abraham as God's friend. It was evidently a common description before James used it, as in Isa 41:8; 2Ch 20:7.

Jas 2:24
Ye see (opate). Present indicative active of opac. Now he uses the plural again as in 2:14.

Is justified ( $\delta$ ıкaıvта). Present passive indicative of $\delta$ ıкaıo $\omega$, here not "is made righteous," but "is shown to be righteous." James is discussing the proof of faith, not the initial act of being set right with God (Paul's idea in Ro 4:1-10).

And not only by faith ( $\kappa \alpha$ оик $\varepsilon \kappa \pi \iota \sigma \tau \varepsilon \omega \varsigma \mu \circ v o v$ ). This phrase clears up the meaning of James. Faith (live faith) is what we must all have (2:18), only it must shew itself also in deeds as Abraham's did.

Jas 2:25
Rahab the harlot ( $\operatorname{Pa\alpha } \beta \eta \pi о \rho \vee \eta)$. Her vicious life she left behind, but the name clung to her always. For our purposes the argument of James may seem stronger without the example of Rahab (Jos 2:1-21; 6:17; 22-25; Mt 1:5; Heb 11:31 ). It is even said in Jewish Midrash that Rahab married Joshua and became an ancestor of Jeremiah and Ezekiel.

In that she received (v $\tau \mathrm{o} \delta \varepsilon \xi \alpha \mu \varepsilon v \eta)$. First aorist middle participle of $v \pi о \delta \varepsilon \chi \circ \mu \alpha$, to welcome.

The messengers ( $\tau 0 \cup \varsigma ~ a \gamma \gamma \varepsilon \lambda o u \varsigma)$. Original meaning of $\alpha \gamma \gamma \varepsilon \lambda o \varsigma$ (Mt 11:10). In Heb 11:31 we have катабкотоия (spies, scouts).

Sent out ( $\varepsilon \kappa \beta \alpha \lambda$ ov $\sigma \alpha$ ). Second aorist active participle of $\varepsilon \kappa \beta \alpha \lambda \lambda \omega$, to hurl out.
Another way ( $\varepsilon \tau \varepsilon \rho \alpha$ o o $\omega$ ). "By another way" (instrumental case), by a window instead of a door (Jos 2:15f. ).

Jas 2:26
Apart from the spirit ( $\chi \omega \rho \iota \varsigma \pi v \varepsilon v \mu \alpha \tau \sigma \varsigma)$. "Apart from breath" (the breath of life). It is not easy to tell when one is dead, but the absence of a sign of breath on a glass before the mouth and nose is proof of death. Startling picture of dead faith in our churches and church members with only a name to live ( $\operatorname{Re} 3: 2$ ).

## Jas 3

Jas 3:1
Be not many teachers ( $\mu \eta \pi о \lambda \lambda o \delta \iota \delta a \sigma \kappa \alpha \lambda o \gamma ı v \varepsilon \sigma \theta \varepsilon$ ). Prohibition with $\mu \eta$ and present middle imperative of $\gamma เ v o \mu \alpha$. "Stop becoming many teachers" (so many of you). There is thus a clear complaint that too many of the Jewish Christians were attempting to teach what they did not clearly comprehend. There was a call for wise teachers (verses 13f. ), not for foolish ones. This soon became an acute question, as one can see in I Cor. 12 to 14. They were not all teachers (1Co 12:28f.; 14:26). The teacher is here treated as the wise man ( 3:13-18) as he ought to be. The rabbi was the teacher (Mt 23:7f.; Joh 1:38; 3:10; 20:16 ). Teachers occupied an honourable position among the Christians (Eph 4:11; Ac 13:1). James counts himself a teacher (we shall receive, 3:1) and this discussion is linked on with 1:19-27. Teachers are necessary, but incompetent and unworthy ones do much harm.

Heavier judgment ( $\mu \varepsilon \iota \zeta$ оv к $\rho \mu \alpha$ ). "Greater sentence." See Mr 12:40; Lu 20:47 for $\pi \varepsilon \rho \rho เ \sigma о \tau \varepsilon \rho о v$ к $\rho \mu \alpha$ (the sentence from the judge, Ro 13:2). The reason is obvious. The pretence of knowledge adds to the teacher's responsibility and condemnation.

Jas 3:2
In many things ( $\pi \mathrm{o} \lambda \lambda \alpha$ ). Accusative neuter plural either cognate with $\pi \tau \alpha \iota \rho \mu \varepsilon v$ or accusative of general reference. On $\pi \tau \alpha \iota \rho \varepsilon \varepsilon v$ (stumble) see on $2: 10$. James includes himself in this list of stumblers.

If not ( $\varepsilon ו-o v$ ). Condition of first class with ov (not $\mu \eta$ ) negativing the verb $\pi \tau \alpha \iota \varepsilon$.
In word $(\varepsilon v \lambda o \gamma \omega)$. In speech. The teacher uses his tongue constantly and so is in particular peril on this score.

The same (оитоऽ). "This one" (not o autos the same).
A perfect man ( $\tau \varepsilon \lambda \varepsilon \iota o \varsigma \alpha \nu \eta \rho$ ). "A perfect husband" also, for $\alpha v \eta \rho$ is husband as well as man in distinction from woman $(\gamma \vee v \eta)$. The wife is at liberty to test her husband by this rule of the tongue.

To bridle the whole body also ( $\chi \alpha \lambda ı v \alpha \gamma \omega \gamma \eta \sigma \alpha \kappa \alpha$ о $\lambda о \nu$ to $\sigma \omega \mu \alpha$ ). See 1:26 for this rare verb applied to the tongue ( $\gamma \lambda \omega \sigma \sigma \alpha v$ ). Here the same metaphor is used and shown to apply to the whole body as horses are led by the mouth. The man follows his own mouth whether he controls the bridle therein ( $1: 26$ ) or someone else holds the reins. James apparently means that the man who bridles his tongue does not stumble in speech and is able also to control his whole body with all its passions. See Tit 1:11 about stopping people's mouths

Jas 3:3
If we put ( $\varepsilon \beta \alpha \lambda \lambda o \mu \varepsilon v$ ). Condition of the first class assumed as true.
The horses' bridles ( $\tau \omega \nu \iota \pi \pi \omega \nu$ tov $\chi \alpha \lambda เ v o v \varsigma)$ ). Hı $\pi \pi \omega \nu$ (genitive plural of $\iota \pi \pi \circ \varsigma$, horse, old word, in N.T. only here except in the Apocalypse), put first because the first of the sev-
eral illustrations of the power and the peril of the tongue. This is the only N.T. example of $\chi \alpha \lambda ı v o \varsigma$, old word for bridle (from $\chi \alpha \lambda \alpha \omega$ to slacken, let down), except Re 14:20 .

That they may obey us ( $\varepsilon \varsigma \varsigma ~ \tau o ~ \pi \varepsilon ו \theta \varepsilon \sigma \theta a \alpha$ avtovৎ $\eta \mu \nu v$ ). Present middle infinitive of $\pi \varepsilon ө \theta \omega$ with $\varepsilon ء \varsigma$ to as a purpose clause with the dative $\eta \mu \nu \nu$ after $\pi \varepsilon เ \theta \varepsilon \sigma \theta a$ and $\alpha \nu \tau 0 v \varsigma$ the accusative of general reference.

We turn about ( $\mu \varepsilon \tau \alpha \gamma \circ \mu \varepsilon v$ ). Present active indicative of $\mu \varepsilon \tau \alpha \gamma \omega$, late compound to change the direction ( $\mu \varepsilon \tau \alpha, \alpha \gamma \omega$ ), to guide, in N.T. only here and verse 4 . The body of the horse follows his mouth, guided by the bridle.

Jas 3:4
The ships also ( $\kappa \alpha \tau \alpha \pi \lambda o \iota \alpha$ ). Old word from $\pi \lambda \varepsilon \omega$, to sail (Mt 4:21). Another metaphor like "horses" (ıлпо). "There is more imagery drawn from mere natural phenomena in the one short Epistle of James than in all St. Paul's epistles put together" (Howson).

Though they are so great ( $\tau \eta \lambda_{1} \kappa \alpha v \tau \alpha$ ov $\tau \alpha$ ). Concessive participle of $\varepsilon \mu$. The quantitative pronoun $\tau \eta \lambda$ ıкoutos occurs in the N.T. only here, 2 Co 1:10; Heb 2:3; Re 16:18 . If James had only seen the modern mammoth ships. But the ship on which Paul went to Malta carried 276 persons (Ac 27:37).

And are driven ( $\kappa \alpha \varepsilon \lambda \alpha \cup v o \mu \varepsilon v \alpha)$. Present passive participle of $\varepsilon \lambda \alpha u v \omega$, old verb, in this sense (2Pe 2:17) for rowing (Mr 6:48; Joh 6:19).

Rough ( $\sigma \kappa \lambda \eta \rho \circ v$ ). Old adjective (from $\sigma \kappa \varepsilon \lambda \lambda \omega$, to dry up), harsh, stiff, hard (Mt 25:24 ).

Are yet turned ( $\mu \varepsilon \tau \alpha \gamma \varepsilon \tau \alpha$ ). Present passive indicative of the same verb, $\mu \varepsilon \tau \alpha \gamma \omega$, in verse 3. James is fond of repeating words (1:13f.; 2:14,16; 2:21,25).
 things see Lu 8:14; $2 \mathrm{Pe} 2: 7$. There is possibly personification in the use of $u$ to for agency in Jas 1:14; 2:9; Col 2:18. Пך $\delta \alpha \lambda$ ıov (from $\pi \eta \delta o v$, the blade of an oar) is an old word, in N.T. only here and Ac 27:40 . E $\lambda$ axıбтov is the elative superlative as in 1Co 4:3 (from the Epic $\varepsilon \lambda \alpha \chi \cup \varsigma$ for $\mu \kappa \rho о \varsigma)$.

The impulse ( $\eta$ о $\mu \boldsymbol{\eta})$ ). Old word for rapid, violent motion, here of the hand that worked the rudder, in N.T. only here and Ac 14:5 (rush or onset of the people).

Of the steersman ( $\tau 0 v$ عuӨvvovioc). Present active genitive articular participle of $\varepsilon v \theta v v \omega$, old verb, to make straight (from $\varepsilon u \theta v \varsigma$, straight, level, $\mathrm{Mr} 1: 3$ ), in N.T. only here and Joh 1:23. Used also of the shepherd, the charioteer, and today it would apply to the chauffeur. "The twin figure of the control of horse and of ship are frequently found together in later Greek writers" (Ropes). As in Plutarch and Philo.

Willeth ( $\beta$ ou $\lambda \varepsilon \tau \alpha$ ). Present middle indicative of $\beta$ ou $0 \mu \alpha$, common verb to will. Here intention of the steersman lies back of the impact of the hand on the rudder.

Jas 3:5

A little member ( $\mu \kappa \rho \circ v \mu \varepsilon \lambda о \varsigma)$. M $\varepsilon \lambda o \varsigma$ is old and common word for members of the human body (1Co 12:12, etc.; Ro 6:13, etc.).

Boasteth great things ( $\mu \varepsilon \gamma \alpha \lambda \alpha \alpha v \chi \varepsilon$ ). Present active indicative of $\alpha u \chi \varepsilon \omega$, old verb, here only in N.T. The best MSS. here separate $\mu \varepsilon \gamma \alpha \lambda \alpha$ from $\alpha u \chi \varepsilon \omega$, though $\mu \varepsilon \gamma \alpha \lambda \alpha u \chi \varepsilon \omega$ does occur in Aeschylus, Plato, etc. M $\gamma \gamma \alpha \lambda \alpha$ is in contrast with $\mu \kappa \kappa \rho o v$.

How much--how small ( $\eta \lambda_{\iota}$ коv-- $\eta \lambda_{\iota} \kappa \eta \nu$ ). The same relative form for two indirect questions together, "What-sized fire kindles what-sized forest?" For double interrogatives see Mr 15:24. The verb $\alpha v a \pi \tau \varepsilon$ is present active indicative of $\alpha v a \pi \tau \omega$, to set fire to, to kindle (Lu 12:49, only other N.T. example except some MSS. in Ac 28:2). Hu $\lambda \eta v$ is accusative case, object of $\alpha v a \pi \tau \varepsilon$, and occurs here only in N.T., though old word for forest, wood. Forest fires were common in ancient times as now, and were usually caused by small sparks carelessly thrown.

Jas 3:6
The tongue is a fire ( $\eta \gamma \lambda \omega \sigma \sigma \alpha \pi \nu \rho$ ). So necessarily since there is no article with $\pi v \rho$ (apparently same word as German feuer, Latin purus, English pure, fire). This metaphor of fire is applied to the tongue in $\operatorname{Pr} 16: 27$; 26:18-22 ; Sirach 28:22.

The world of iniquity (о коб $о \varsigma \tau \eta \varsigma \alpha \delta ı к ⿺ \propto \varsigma$ ). A difficult phrase, impossible to understand according to Ropes as it stands. If the comma is put after $\pi \cup \rho$ instead of after $\alpha \delta \iota \kappa ı \alpha \varsigma$, then the phrase may be the predicate with $\kappa \alpha \theta \iota \sigma \tau \alpha \tau \alpha$ (present passive indicative of $\kappa \alpha \theta \iota \sigma \tau \eta \mu$, "is constituted," or the present middle "presents itself"). Even so, коб $\boldsymbol{\kappa}$ с remains a difficulty, whether it means the "ornament" (1Pe 3:3) or "evil world" (Jas 1:27) or just "world" in the sense of widespread power for evil. The genitive $\alpha \delta \iota \kappa \iota \alpha$, is probably descriptive (or qualitative). Clearly James means to say that the tongue can play havoc in the members of the human body.

Which defileth the whole body ( $\eta \sigma \pi \iota \lambda o v \sigma \alpha$ o $\overline{0}$ ov to $\sigma \omega \mu \alpha$ ). Present active participle of $\sigma \pi i \lambda o \omega$ late Koine, verb, to stain from $\sigma \pi i \lambda o \varsigma$ (spot, also late word, in N.T. only in Eph 5:27; 2Pe 2:13 ), in N.T. only here and Jud 1:23. Cf. 1:27 aбтı入ov (unspotted).

Setteth on fire ( $\varphi \lambda$ oү $\zeta \zeta$ ov $\sigma \alpha$ ). Present active participle of $\varphi \lambda$ opı $\zeta \omega$, old verb, to set on fire, to ignite, from $\varphi \lambda 0 \xi$ (flame), in N.T. only in this verse. See $\alpha v a \pi \tau \varepsilon$ (verse 5).

The wheel of nature ( $\tau 0 v \tau \rho \circ \chi \circ v \gamma \varepsilon v \varepsilon \sigma \varepsilon \omega \varsigma)$. Old word for wheel (from $\tau \rho \varepsilon \chi \omega$, to run), only here in N.T. "One of the hardest passages in the Bible" (Hort). To what does $\tau \rho 0 \chi$ о refer? For $\gamma \varepsilon v \varepsilon \sigma \varepsilon \omega \varsigma$ see 1:23 apparently in the same sense. Vincent suggests "the wheel of birth" (cf. Mt 1:1,18). The ancient writers often use this same phrase (or кикخоৎ, cycle, in place of $\tau \rho \circ \chi \circ \varsigma)$, but either in a physiological or a philosophical sense. James may have caught the metaphor from the current use, but certainly he has no such Orphic or Pythagorean doctrine of the transmigration of souls, "the unending round of death and rebirth" (Ropes). The wheel of life may be considered either in motion or standing still, though setting on fire implies motion. There is no reference to the zodiac.
 $\varphi \lambda o \gamma \iota \zeta \omega$, giving the continual source of the fire in the tongue. For the metaphor of fire with үعєuva see Mt 5:22.

Jas 3:7
Kind ( $\varphi$ voıc). Old word from $\varphi \cup \omega$, order of nature (Ro 1:26), here of all animals and man, in $2 \mathrm{Pe} 1: 4$ of God and redeemed men.

Of beasts $(\theta \eta \rho \omega \omega v)$. Old word diminutive from $\theta \eta \rho$ and so "little beasts" originally, then wild animals in general (Mr 1:13), or quadrupeds as here. These four classes of animals come from Ge 9:2f.

Birds ( $\pi \varepsilon \tau \varepsilon \downarrow \nu \omega v$ ). Old word for flying animals (from $\pi \varepsilon \tau о \mu \alpha$, to word from $\varepsilon \rho \pi \omega$, to crawl (Latin serpo), hence serpents.

Things in the sea ( $\varepsilon v \alpha \lambda \iota \omega v$ ). Old adjective ( $\varepsilon v, \alpha \lambda \varsigma$, sea, salt) in the sea, here only in N.T. The four groups are put in two pairs here by the use of $\tau \varepsilon \kappa \alpha$ with the first two and the second two. See a different classification in Ac 10:12; 11:6.

Is tamed ( $\delta \alpha \mu \alpha \zeta \varepsilon \tau \alpha)$. Present passive indicative of $\delta \alpha \mu \alpha \zeta \omega$, old verb kin to Latin dominus and English tame, in N.T. only in this passage and Mr 5:4. The present tense gives the general picture of the continuous process through the ages of man's lordship over the animals as stated in Ge 1:28 .

Hath been tamed ( $\delta \varepsilon \delta \alpha \mu \alpha \sigma \tau \alpha$ ). Perfect passive indicative of the same verb, repeated to present the state of conquest in some cases (domestic animals, for instance).

By mankind ( $\tau \eta \varphi v \sigma \varepsilon \tau \eta \alpha v \theta \rho \omega \pi \tau v \eta$ ). Instrumental case with repeated article and repetition also of $\varphi$ voı, "by the nature the human." For $\alpha v \theta \rho \omega \pi$ 媵c see Ac 17:25.

Jas 3:8
No one (oudsıc). Especially his own tongue and by himself, but one has the help of the Holy Spirit.

A restless evil (акатабтатоv какоv). Correct reading, not акатаб $\chi \varepsilon \tau о v$, for which see $1: 8$. The tongue is evil when set on fire by hell, not evil necessarily.

Full of deadly poison ( $\mu \varepsilon \sigma \tau \eta$ tov $\theta a v a \tau \eta \varphi o \rho o v$ ). Feminine adjective agreeing with $\gamma \lambda \omega \sigma \sigma \alpha$, not with какоv (neuter). Iov (poison here, as in Ro 3:13, but rust in 5:3, only N.T. examples), old word. Genitive case after $\mu \varepsilon \sigma \tau \eta$ (full of). $\Theta a v a \tau \eta \varphi o \rho o v$, old compound adjective (from $\theta a v a \tau o \varsigma$, death, $\varphi \varepsilon \rho \omega$, to bear or bring), death-bringing. Here only in N.T. Like the restless death-bringing tongue of the asp before it strikes.

Jas 3:9
Therewith ( $\varepsilon v \alpha v \tau \eta$ ). This instrumental use of $\varepsilon v$ is not merely Hebraistic, but appears in late Koine writers (Moulton, Prol., pp. 11f., 61f.). See also Ro 15:6.

We bless ( $\varepsilon \cup \lambda о \gamma о \nu \mu \varepsilon v)$. Present active indicative of $\varepsilon \cup \lambda o \gamma \varepsilon \omega$, old verb from $\varepsilon \cup \lambda o \gamma \circ \varsigma$ (a good word, $\varepsilon v, \lambda o \gamma o \varsigma)$, as in Lu 1:64 of God. "This is the highest function of speech" (Hort).

The Lord and Father ( $\tau о \vee к \nu \rho ı v ~ к \alpha \pi \alpha \tau \varepsilon \rho \alpha) . ~ B o t h ~ t e r m s ~ a p p l i e d ~ t o ~ G o d . ~$
Curse we $(\kappa \alpha \tau \alpha \rho \omega \mu \varepsilon \theta \alpha)$. Present middle indicative of the old compound verb $\kappa \alpha \tau \alpha \rho \alpha о \mu \alpha$, to curse (from кат $\alpha \rho \alpha$ a curse), as in Lu 6:28 .

Which are made after the likeness of God ( $\tau о \nu \varsigma \kappa \alpha \theta^{\prime}$ о $\left.\mu о \iota \sigma \sigma \nu \theta \varepsilon о v \gamma \varepsilon \gamma о v о \tau \alpha \varsigma\right)$. Second perfect articular participle of $\gamma \iota \nu \circ \mu \alpha$ and $о \mu \circ \iota \omega \sigma \iota \varsigma$, old word from o $\mu \circ \iota \omega$ (to make like), making like, here only in N.T. (from Ge 1:26; 9:6 ), the usual word being o $\quad$ ot $\omega \mu \alpha$, resemblance (Php 2:7). It is this image of God which sets man above the beasts. Cf. 2Co 3:18.

Jas 3:10
Ought not (ov $\chi \rho \eta$ ). The only use of this old impersonal verb (from $\chi \rho \alpha \omega$ ) in the N.T. It is more like $\pi \rho \varepsilon \pi \varepsilon$ (it is appropriate) than $\delta \varepsilon$ (it is necessary). It is a moral incongruity for blessing and cursing to come out of the same mouth.

So to be (out $\omega \varsigma \nmid \nu \varepsilon \sigma \theta \alpha$ ). "So to keep on happening," not just "to be," present middle infinitive of $\gamma \iota v o \mu a$.

Jas 3:11
The fountain ( $\eta \pi \eta \gamma \eta$ ). Old word for spring (Joh 4:14).
Opening (oォпৎ). Old word for fissure in the earth, in N.T. only here and Heb 11:38 (caves).

Send forth ( $\beta \rho v \varepsilon$ ). Present active indicative of $\beta \rho v \omega$, old verb, to bubble up, to gush forth, here only in N.T. The use of $\mu \eta \tau$ shows that a negative answer is expected in this rhetorical question.

The sweet and the bitter ( $\tau о ~ \gamma \lambda \nu \kappa v ~ к \alpha ~ \tau о ~ \pi \kappa \kappa \rho о \nu) . ~ C o g n a t e ~ a c c u s a t i v e s ~ w i t h ~ \beta \rho v \varepsilon . ~$ Separate articles to distinguish sharply the two things. The neuter singular articular adjective is a common way of presenting a quality. Г $\lambda \cup \kappa v \varsigma$ is an old adjective (in N.T. only here and Re 10:9f. ), the opposite of $\pi \kappa \kappa \rho o v$ (from old root, to cut, to prick), in N.T. only here and verse 14 (sharp, harsh).

Jas 3:12
Can? ( $\mu \eta \delta v v a \tau \alpha ;$;). Negative answer expected. See the same metaphor in Mt 7:16f.
Fig-tree ( $\sigma \cup \kappa \eta)$. Old and common word (Mt 21:19f. ).
Figs ( $\sigma \cup \kappa \alpha)$. Ripe fruit of $\eta \sigma \cup \kappa \eta$.
Olives ( $\varepsilon \lambda \alpha \iota \alpha \varsigma)$. Elsewhere in the N.T. for olive-trees as Mt 21:1.
Vine ( $\alpha \mu \pi \varepsilon \lambda o \varsigma)$. Old word (Mt 26:29).
Salt water ( $\alpha \lambda$ ккоv). Old adjective from $\alpha \lambda \varsigma$ ( $\alpha \lambda \alpha \varsigma$ salt), here only in N.T.
Jas 3:13
Who (Tıs). Rhetorical interrogative like Lu 11:11. Common in Paul and characteristic of the diatribe. James here returns to the standpoint of verse 1 about many teachers. Speech and wisdom are both liable to abuse (1Co 1:5,17; 2:1-3:20).

Wise and understanding ( $\sigma о \varphi о \varsigma \kappa \alpha \varepsilon \pi \iota \sigma \tau \eta \mu \omega v$ ). $\Sigma о \varphi \rho \varsigma$ is used for the practical teacher (verse 1), $\varepsilon \pi \iota \sigma \tau \eta \mu \omega \nu$ (old word from $\varepsilon \pi \iota \sigma \tau \alpha \mu \alpha$, here only in N.T.) for an expert, a skilled and scientific person with a tone of superiority. In De 1:13,15; 4:6, the two terms are practically synonyms.

Let him shew ( $\delta \varepsilon ı \xi \alpha \tau \omega)$. First aorist active imperative of $\delta \varepsilon ı \kappa v v \mu$, old verb to show. As about faith in $2: 18$. Emphatic position of this verb.

By his good life ( $\varepsilon \kappa \tau \eta \varsigma \kappa \alpha \lambda \eta \varsigma \alpha v a \sigma \tau \rho \circ \varphi \eta \varsigma)$. For this literary Koine word from avaбтрєєона (walk, conduct) see Ga 1:13. Actions speak louder than words even in the case of the professional wise man. Cf. 1Pe 1:15.

In meekness of wisdom ( $\varepsilon v \pi \rho \alpha v \tau \eta \tau \sigma о \varphi เ \propto \varsigma)$. As in 1:21 of the listener, so here of the teacher. Cf. Mt 5:5; 11:29 and of King Messiah quoted in Mt 21:5 . Startling combination.

Jas 3:14
 sense (Ac 5:17). Pride of knowledge is evil (1Co 8:1) and leaves a bitter taste. See "root of bitterness" in Heb 12:14 (cf. Eph 4:31). This is a condition of the first class.

Faction ( $\varepsilon \rho 1 \theta ı \alpha \gamma$ ). Late word, from $\varepsilon \rho \upharpoonleft \theta_{o \varsigma}$ (hireling, from $\varepsilon \rho \iota \theta \varepsilon v \omega$ to spin wool), a pushing forward for personal ends, partisanship, as in Php 1:16.

In your heart ( $\varepsilon v \tau \eta \kappa \alpha \rho \delta \alpha \alpha \nu \mu \omega v$ ). The real fountain ( $\pi \eta \gamma \eta$, verse 11).
Glory not ( $\mu \eta \kappa \alpha \tau \alpha \kappa \alpha \cup \chi \alpha \sigma \theta \varepsilon$ ). Present middle imperative of катакаuх $\alpha о \mu \alpha$, for which see $2: 13$. Wisdom is essential for the teacher. Boasting arrogance disproves the possession of wisdom.

Lie not against the truth ( $\psi \varepsilon v \delta \varepsilon \sigma \theta \varepsilon \kappa \alpha \tau \alpha \tau \eta \varsigma \alpha \lambda \eta \theta \varepsilon i \alpha \varsigma)$. Present middle imperative of $\psi \varepsilon \cup \delta o \mu \alpha$, old verb, to play false, with $\mu \eta$ carried over. Lying against the truth is futile. By your conduct do not belie the truth which you teach; a solemn and needed lesson. Cf. Ro 1:18f., 2:18,20 .

Jas 3:15
This wisdom ( $\alpha v \tau \eta \eta \sigma 0 \varphi เ \alpha$ ). All talk and disproved by the life, counterfeit wisdom, not real wisdom (1:5; 3:17).

Coming down from above ( $\kappa \alpha \tau \varepsilon \rho \chi \circ \mu \varepsilon v \eta ~ \alpha v \omega \theta \varepsilon v)$. As in 1:5,17. All true wisdom comes from God.

Earthly ( $\varepsilon \pi \gamma \gamma \varepsilon\llcorner\varsigma)$ ). Old adjective, on earth ( $\varepsilon \pi \iota, \gamma \eta$ ), as in Joh 3:12, then with earthly limitations (Php 3:19), as here.

Sensual ( $\psi \cup \chi\llcorner\kappa \eta$ ). Old adjective, belonging to the $\psi \cup \chi \eta$, the sensuous or animal life (1Co 2:14 and here).

Devilish ( $\delta \alpha \mu \circ v \iota \omega \delta \eta \varsigma)$. Late adjective from $\delta \alpha \mu \circ$ vıov (demon) and so demoniacal or demon-like, here only in N.T.

Jas 3:16

Confusion ( $\alpha \kappa \alpha \tau \alpha \sigma \tau \alpha \sigma ı \alpha)$. Late word (from акатабтатоৎ), 1:8; 3:8), a state of disorder (1Co 14:33).

Vile ( $\varphi a \cup \lambda o v$ ). Kin to German faul, first slight, ordinary, then bad. The steps are cheap, paltry, evil. Opposed to $\alpha \gamma \alpha \theta \alpha$ (good) in Joh 5:39.

Jas 3:17
First pure ( $\pi \rho \omega \tau \sigma v \mu \varepsilon v \alpha \gamma v \eta$ ). First in rank and time. Ha $\gamma v o c$ is from the same root as $\alpha \gamma \operatorname{loc}$ (holy), old adjective, pure from fault, not half-good and half-bad, like that above.

Then peaceable ( $\varepsilon \pi \varepsilon \iota \tau \alpha \varepsilon \iota \rho \eta \nu \iota \kappa \eta$ ). Old adjective from $\varepsilon \iota \rho \eta \nu \eta$ (peace), loving peace here, bringing peace in Heb 12:11 (only N.T. examples). But clearly great as peace is, purity (righteousness) comes before peace and peace at any price is not worth the having. Hence Jesus spurned the devil's peace of surrender.

Gentle ( $\varepsilon \pi \iota \varepsilon \iota \kappa \eta \varsigma)$ ) Old adjective (from $\varepsilon$ єккоৎ, reasonable, fair), equitable (Php 4:5; 1 Pe 2:18 ). No English word renders it clearly.

Easy to be entreated ( $\varepsilon \cup \pi \varepsilon \mid \theta \eta \varsigma)$. Old adjective ( $\varepsilon v, \pi \varepsilon \mid \theta o \mu \alpha)$, compliant, approachable. Only here in N.T.

Mercy ( $\varepsilon \lambda \varepsilon o u \varsigma)$. Practical help (2:13,16).
Good fruits (карт $\omega v \alpha \gamma \alpha \theta \omega v$ ). Ка入о карто in Mt 7:17f. Good deeds the fruit of righteousness (Php 1:11).

Without variance ( $\alpha \delta ı \alpha к \rho ı о \varsigma) . ~ L a t e ~ v e r b a l ~ a d j e c t i v e ~(f r o m ~ a l p h a ~ p r i v a t i v e ~ a n d ~ \delta ı \alpha к \rho ı \omega \omega$,
 in N.T. This wisdom does not put a premium on doubt.

Without hypocrisy (avvлокрıтоৎ). Late and rare verbal adjective (alpha privative and vтокрıv $\omega$ ). Not hypocritical, sincere, unfeigned (Ro 12:9).

Jas 3:18
Is sown in peace ( $\varepsilon \nu \varepsilon \iota \rho \eta \nu \eta \sigma \pi \varepsilon \iota \rho \varepsilon \tau \alpha$ ). Present passive indicative of $\sigma \pi \varepsilon \downharpoonright \rho \omega$, to sow. The seed which bears the fruit is sown, but James catches up the metaphor of картоৎ (fruit) from verse 17 . Only in peace is the fruit of righteousness found.

For them that make peace ( $\tau \circ \iota \varsigma \pi o เ o v \sigma ו \nu \varepsilon เ \rho \eta \nu \eta \nu$ ). Dative case of the articular participle

 peace.

## Jas 4

Jas 4:1
Whence $(\pi o \theta \varepsilon v)$. This old interrogative adverb (here twice) asks for the origin of wars and fights. James is full of interrogatives, like all diatribes.

Wars ( $\pi 0 \lambda \varepsilon \mu \mathrm{o}$ )
--fightings ( $\mu \alpha \chi \alpha$ ).
War ( $\pi о \lambda \varepsilon \mu \circ \varsigma$, old word, Mt 24:6) pictures the chronic state or campaign, while $\mu \alpha \chi \eta$ (also old word, 2Co 7:5 ) presents the separate conflicts or battles in the war. So James covers the whole ground by using both words. The origin of a war or of any quarrel is sometimes hard to find, but James touches the sore spot here.

Of your pleasures ( $\varepsilon \kappa \tau \omega \nu \eta \delta o v \omega \nu v \mu \omega v$ ). Old word from $\eta \delta o \mu \alpha$. Ablative case here after $\varepsilon \kappa$, "out of your sinful, sensual lusts," the desire to get what one does not have and greatly desires.

That war $(\tau \omega v \sigma \tau \rho \alpha \tau \varepsilon v o \mu \varepsilon \nu \omega v)$. Present middle articular participle (ablative case agreeing with $\eta \delta o v \omega v$ ) of $\sigma \tau \rho \alpha \tau \varepsilon v \omega$, to carry on a campaign, here as in 1Pe 2:11 of the passions in the human body. James seems to be addressing nominal Christians, "among you" $(\varepsilon \nu \nu \mu \nu v)$. Modern church disturbances are old enough in practice.

Jas 4:2
Ye lust $(\varepsilon \pi \iota \theta \nu \mu \varepsilon \imath \tau \varepsilon)$. Present active indicative of $\varepsilon \pi \iota \theta \nu \mu \varepsilon \omega$, old word (from $\varepsilon \pi \iota, \theta \nu \mu \circ \varsigma$, yearning passion for), not necessarily evil as clearly not in Lu 22:15 of Christ, but usually so in the N.T., as here. Coveting what a man or nation does not have is the cause of war according to James.

Ye kill and covet ( $\varphi \circ \vee \varepsilon v \varepsilon \tau \varepsilon \kappa \alpha \zeta \eta \lambda o v \tau \varepsilon$ ). Present active indicatives of $\varphi o v \varepsilon v \omega$ (old verb from $\varphi o v \varepsilon v \varsigma, ~ m u r d e r e r) ~ a n d ~ \zeta \eta \lambda o \omega$, to desire hotly to possess ( $1 \mathrm{Co} 12: 31$ ). It is possible (perhaps probable) that a full stop should come after povevete (ye kill) as the result of lusting and not having. Then we have the second situation: "Ye covet and cannot obtain ( $\varepsilon \pi \iota \tau \cup \chi \varepsilon \iota v$, second aorist active infinitive of $\varepsilon \pi \iota \tau v \gamma \chi \alpha \nu \omega$ ), and (as a result) ye fight and war." This punctuation makes better sense than any other and is in harmony with verse 1 . Thus also the anticlimax in $\varphi$ ovevete and $\zeta \eta \lambda$ oute is avoided. Mayor makes the words a hendiadys, "ye murderously envy."

Ye have not, because ye ask not (ovк $\varepsilon \chi \varepsilon \tau \varepsilon \delta ı \alpha \tau о \mu \eta \alpha \iota \tau \varepsilon \iota \sigma \theta \alpha v \mu \alpha \varsigma)$. James refers again to ovk $\varepsilon \chi \varepsilon \tau \varepsilon$ (ye do not have) in verse 2. Such sinful lusting will not obtain. "Make the service of God your supreme end, and then your desires will be such as God can fulfil in answer to your prayer" (Ropes). Cf. Mt 6:31-33. The reason here is expressed by $\delta \iota \alpha$ and the accusative of the articular present middle infinitive of aıt $\varepsilon \omega$, used here of prayer to God as in Mt 7:7f . $\mathrm{H} \nu \mu \boldsymbol{\mu}$ (you) is the accusative of general reference. Note the middle voice here as in aıtعı $\sigma \theta \varepsilon$ in 3. Mayor argues that the middle here, in contrast with the active, carries more the spirit
of prayer, but Moulton (Prol., p. 160) regards the distinction between $\alpha \iota \tau \varepsilon \omega$ and $\alpha \iota \tau \varepsilon о \mu \alpha$ often "an extinct subtlety."

Jas 4:3
Because ye ask amiss ( $\delta\llcorner\tau \tau \alpha \kappa \omega \varsigma \alpha \iota \tau \varepsilon \iota \sigma \varepsilon \varepsilon$ ). Here the indirect middle does make sense, "ye ask for yourselves" and that is "evilly" or amiss ( $\kappa \alpha \kappa \omega \varsigma)$, as James explains.

That ye may spend it in your pleasures ( $\llcorner v \alpha \varepsilon \nu \tau \alpha \iota \varsigma \eta \delta o v a \iota \varsigma \nu \mu \omega v \delta \alpha \pi \alpha v \eta \sigma \eta \tau \varepsilon$ ). Purpose clause with iva and the first aorist subjunctive of $\delta \alpha \pi \alpha v \alpha \omega$, old verb from $\delta \alpha \pi \alpha v \eta$, $\operatorname{cost}(\mathrm{Lu}$ 14:28 only in N.T.), to squander ( Lu 15:14). God does not hear prayers like this.

Jas 4:4
Ye adulteresses ( $\mu \circ \chi \chi \lambda \lambda \iota \delta \varepsilon \varsigma)$. Motхo ка (ye adulterers) is spurious (Syrian text only). The feminine form here is a common late word from the masculine $\mu$ oroo. It is not clear whether the word is to be taken literally here as in Ro 7:3, or figuratively for all unfaithful followers of Christ (like an unfaithful bride), as in 2Co 11:1f.; Eph 5:24-28 (the Bride of Christ). Either view makes sense in this context, probably the literal view being more in harmony with the language of verses 2 f . In that case James may include more than Christians in his view, though Paul talks plainly to church members about unchastity (Eph 5:3-5).

Enmity with God ( $\varepsilon \chi \theta \rho \alpha$ тou $\theta \varepsilon o v)$. Objective genitive $\theta \varepsilon o u$ with $\varepsilon \chi \theta \rho \alpha$ (predicate and so without article), old word from $\varepsilon \chi \theta \rho \circ \varsigma$, enemy (Ro 5:10), with $\varepsilon \varsigma \varsigma ~ \theta \varepsilon o v$ (below and Ro 8:7).

Whosoever therefore would be (o $\varsigma \varepsilon \alpha \vee$ ouv $\beta \circ v \lambda \eta \theta \eta$ ). Indefinite relative clause with oc and modal $\varepsilon \alpha v$ and the first aorist passive (deponent) subjunctive of $\beta o u \lambda o \mu \alpha$, to will (purpose).

A friend of the world ( $\varphi$ i $\lambda$ oc $\tau 0 v$ коб $\mu \circ v$ ). Predicate nominative with infinitive $\varepsilon ı v a$ agreeing with oc. See 2:23 for $\varphi \iota \lambda$ oc $\theta \varepsilon o v$ (friend of God).

Maketh himself ( $\kappa \alpha \theta เ \tau \tau \alpha \tau \alpha)$. Present passive (not middle) indicative as in 3:6, "is constituted," "is rendered."

An enemy of God ( $\varepsilon \chi \theta \rho \circ \varsigma$, tov $\theta$ हov). Predicate nominative and anarthrous and objective genitive ( $\theta$ عou).

Jas 4:5
The Scripture ( $\eta \gamma \rho \alpha \varphi \eta$ ). Personification as in $\mathrm{Ga} 3: 8$; Jas 2:23. But no O.T. passage is precisely like this, though it is "a poetical rendering" (Ropes) of Ex 20:5. The general thought occurs also in Ge 6:3-5; Isa 63:8-16 , etc. Paul has the same idea also (Ga 5:17,21; Ro 8:6,8). It is possible that the reference is really to the quotation in verse 6 from $\operatorname{Pr}$ 3:34 and treating all before as a parenthesis. There is no way to decide positively.

In vain ( $\kappa \varepsilon v \omega \varsigma$ ). Old adverb (Aristotle) from $\kappa \varepsilon v \omega \varsigma$ ( $2: 20$ ), here alone in N.T. "Emptily," not meaning what it says.

Made to dwell (кат $\kappa$ เкıбยv). First aorist active of катоккц $\zeta$, old verb, to give a dwelling to, only here in N.T.

Long unto envying ( $\pi \rho \circ \varsigma \varphi \theta$ ovov $\varepsilon \pi \iota \pi \sigma \theta \varepsilon$ ). A difficult phrase. Some even take $\pi \rho \circ \varsigma$ $\varphi \theta$ ovov with $\lambda \varepsilon \gamma \varepsilon$ rather than with $\varepsilon \pi \iota \pi o \theta \varepsilon$, as it naturally does go, meaning "jealously." But even so, with God presented as a jealous lover, does $\tau 0 \pi v \varepsilon \nu \mu \alpha$ refer to the Holy Spirit as the subject of $\varepsilon \pi \iota \pi o \theta \varepsilon$ or to man's spirit as the object of $\varepsilon \pi \iota \pi o \theta \varepsilon$ ? Probably the former and $\varepsilon \pi \iota \pi o \theta \varepsilon$ then means to yearn after in the good sense as in Php 1:8 .

Jas 4:6
More grace ( $\mu \varepsilon \iota \zeta$ оva $\chi \alpha \rho ı$ ). "Greater grace." Greater than what? "Greater grace in view of the greater requirement" (Ropes), like Ro 5:20f . God does this.

Wherefore ( $\delta \iota 0$ ). To prove this point James quotes $\operatorname{Pr}$ 3:34.
God resisteth the proud (o $\theta \varepsilon \circ \varsigma ~ v \pi \varepsilon \rho \eta \varphi \alpha \nu o \iota \varsigma ~ \alpha \nu \tau ı \tau \alpha \sigma \sigma \varepsilon \tau \alpha)$. Present middle (direct) indicative of $\alpha \nu \tau \iota \tau \alpha \sigma \sigma \omega$, old military term, to range in battle against, with dative case (Ro
 ), "haughty persons."

But giveth grace to the humble ( $\tau \alpha \pi \varepsilon เ v o \iota \varsigma ~ \delta \varepsilon \delta \iota \omega \sigma \iota v \chi \alpha \rho \iota v)$. Anarthrous adjective again, "to humble or lowly persons," for which word see 1:9f . Cf. 2:5-7; 5:1-6 .

## Jas 4:7

Be subject therefore unto God (v $\tau \circ \tau \alpha \gamma \eta \tau \varepsilon$ ouv $\tau \omega \theta \varepsilon \omega$ ). Second aorist (ingressive) passive imperative of $v \pi \sigma \tau \alpha \sigma \sigma \omega$, old verb, to range under (military term also). Same form in 1 Pe 2:23; 5:5. With the dative case $\theta \varepsilon \omega$ (unto God). The aorist has the note of urgency in the imperative. Note the ten aorist imperatives in verses 7-10 (vлотаүך $\frac{1 \varepsilon}{}$, $\alpha v \tau ı \sigma \tau \eta \tau \varepsilon$, $\varepsilon \gamma \gamma เ \sigma \alpha \tau \varepsilon, \kappa \alpha \theta \alpha \rho \iota \sigma \alpha \tau \varepsilon, \alpha \gamma \nu \iota \sigma \alpha \tau \varepsilon, \tau \alpha \lambda \alpha \iota \pi \omega \rho \eta \sigma \alpha \tau \varepsilon, \pi \varepsilon v \theta \eta \sigma \alpha \tau \varepsilon, \kappa \lambda \alpha v \sigma \alpha \tau \varepsilon, \mu \varepsilon \tau \alpha \tau \rho \alpha \pi \eta \tau \omega$, $\tau \alpha \pi \varepsilon เ \nu \omega \theta \eta \tau \varepsilon)$.

But resist the devil ( $\alpha v \tau \iota \sigma \tau \eta \tau \varepsilon \delta \varepsilon \tau \omega \delta \iota \alpha \beta o \lambda \omega$ ). Second aorist (ingressive) active (intransitive) imperative of $\alpha \nu \theta \iota \sigma \tau \eta \mu$, "take a stand against." Dative case $\delta \iota \alpha \beta \circ \lambda \omega$. Result of such a stand is that the devil will flee ( $\varphi \varepsilon v \xi \varepsilon \tau \alpha$, future middle of $\varphi \varepsilon v \gamma \omega$ ). See 1 Pe 5:8f.; Eph 6:11f.; Lu 10:17 .

Jas 4:8
Draw nigh to God ( $\varepsilon \gamma \gamma \iota \sigma \alpha \tau \varepsilon \tau \omega \theta \varepsilon \omega$ ). First aorist active imperative of $\varepsilon \gamma \gamma!\zeta \omega$, late verb from $\varepsilon \gamma \gamma \cup \varsigma$ (near) as in Mt 3:2. With dative case again of personal relation. The priests in the sanctuary drew nigh to God (Ex 19:22 ), as we should now.

Cleanse your hands ( $\kappa \alpha \theta \alpha \rho ı \sigma \alpha \tau \varepsilon \chi \varepsilon \iota \rho \alpha \varsigma)$. First aorist active imperative of $\kappa \alpha \theta \alpha \rho \iota \zeta \omega$, to cleanse, from dirt in a ritual sense (Ex 30:19-21; Mr 7:3,19). Here it is figurative, as in Ho 1:16; Ps 24:4. If we always had clean (from sin) hands and hearts?

Ye sinners ( $\alpha \mu \alpha \rho \tau \omega \lambda 0$ ). A sharp term to strike the conscience, "a reproach meant to startle and sting" (Ropes).

Purify your hearts ( $\alpha \gamma \nu \iota \sigma \alpha \tau \varepsilon \kappa \alpha \rho \delta \iota \varsigma)$. First aorist active imperative of $\alpha \gamma \nu \iota \zeta \omega$, old verb from aүvoc (Jas 3:17) , ceremonially (Ac 21:24,26), but here morally as in 1Pe 1:22; 1Jo 3:3. Anarthrous use of карঠıas as of $\chi \varepsilon ı \rho a \varsigma$ (wash hands, purify hearts).

Ye double-minded ( $\delta 1 \psi \cup \chi o$ ). As in 1:8.
Jas 4:9
Be afflicted ( $\tau \alpha \lambda \alpha 1 \pi \omega \rho \eta \sigma \alpha \tau \varepsilon$ ). First aorist active imperative $\tau \alpha \lambda \alpha \iota \pi \omega \rho \varepsilon \omega$, old verb from $\tau \alpha \lambda \alpha \iota \pi \omega \rho \circ \varsigma$ (Ro 7:24 ), to endure toils, here only in N.T. Cf. $\tau \alpha \lambda \alpha \iota \pi \omega \rho \iota a \iota \varsigma ~$ in 5:1.

Mourn ( $\pi \varepsilon v \theta \eta \sigma \alpha \tau \varepsilon$ ). First aorist active imperative of $\pi \varepsilon v \theta \varepsilon \omega$, old verb from $\pi \varepsilon v \theta$ oc (mourning, 4:9), as in Mt 5:4f. Often in N.T. joined as here with $\kappa \lambda \alpha \omega \omega$, to weep (Mr 16:10; Lu 6:25 ). A call to the godly sorrow spoken of in 2Co 7:10 (Mayor), like an O.T. prophet.

Weep ( $\kappa \lambda \alpha v \sigma \alpha \tau \varepsilon)$. First aorist active imperative of $\kappa \lambda \alpha \omega \omega$.
Laughter ( $\gamma \varepsilon \lambda \omega \varsigma$ ). Old word from Homer down, only here in N.T. as $\gamma \varepsilon \lambda \alpha \omega$, to
laugh (opposite of $\kappa \lambda \alpha \omega \omega$ ), in N.T. only in Lu 6:21,25, but катаүع $\lambda \alpha \omega$ in Lu 8:53 (Mr 5:40; Mt 9:24).

Be turned ( $\mu \varepsilon \tau \alpha \tau \rho \alpha \pi \eta \tau \omega)$. Second aorist passive imperative of $\mu \varepsilon \tau \alpha \tau \rho \varepsilon \pi \omega$, old word, to turn about, to transmute, in Homer (not in Attic), here only in N.T.

Heaviness ( $\kappa \alpha \tau \eta \varphi \varepsilon \iota \alpha v$ ). Old word from кат $\boldsymbol{\kappa} \varphi \eta \varsigma$ (of a downcast look, from ката, $\varphi \alpha \eta$ eyes), hanging down of the eyes like the publican in Lu 18:13, here only in N.T.

Jas 4:10
Humble yourselves ( $\tau \alpha \pi \varepsilon เ \nu \omega \theta \eta \tau \varepsilon$ ). First aorist passive imperative of $\tau \alpha \pi \varepsilon \iota \nu o \omega$, old verb from $\tau \alpha \pi \varepsilon ו v o \varsigma(1: 9)$, as in Mt 18:4. The passive here has almost the middle or reflexive sense. The middle voice was already giving way to the passive. See $1 \mathrm{Pe} 5: 6$ for this same form with the same promise of exaltation.

He shall exalt you ( $v \psi \omega \sigma \varepsilon v \mu \alpha \varsigma)$. Future active indicative of $v \psi o \omega$, common verb from vүoc (height), used by Jesus in contrast with $\tau \alpha \pi \varepsilon เ v o \omega$ as here (Mt 23:12; Lu 14:11; 18:14).

Jas 4:11
Speak not one against another ( $\mu \eta \kappa \alpha \tau \alpha \lambda \alpha \lambda \varepsilon \iota \tau \varepsilon \alpha \lambda \lambda \eta \lambda \omega v$ ). Prohibition against such a habit or a command to quit doing it, with $\mu \eta$ and the present imperative of $\kappa \alpha \tau \alpha \lambda \alpha \lambda \varepsilon \omega$, old compound usually with the accusative in ancient Greek, in N.T. only with the genitive (here, $1 \mathrm{Pe} 2: 12 ; 3: 16$ ). Often harsh words about the absent. James returns to the subject of the tongue as he does again in 5:12 (twice before, 1:26; 3:1-12).

Judgeth ( $\kappa \rho \iota v \omega v$ ). In the sense of harsh judgment as in Mt 7:1; Lu 6:37 (explained by катабıка ( $\omega$ ).

Not a doer of the law, but a judge (ovк $\pi о ⿰ \eta \tau \eta \varsigma ~ v o \mu о v, ~ a \lambda \lambda \alpha \kappa \rho ı \tau \eta)$ ). This tone of superiority to law is here sharply condemned. James has in mind God's law, of course, but the point is the same for all laws under which we live. We cannot select the laws which we will obey unless some contravene God's law, and so our own conscience (Ac 4:20). Then we are willing to give our lives for our rebellion if need be.

Jas 4:12
One only ( $\varepsilon \varsigma \varsigma)$. No "only" in the Greek, but $\varepsilon \iota \varsigma$ here excludes all others but God.

The lawgiver (o vo $\kappa \circ \theta \varepsilon \tau \eta \varsigma$ ). Old compound (from $v o \mu o \sigma, \tau \iota \theta \eta \mu$ ), only here in N.T. In Ps 9:20 . Cf. vo 0 o $\varepsilon \varepsilon \tau \varepsilon \omega$ in Heb 7:11; 8:6.

To save ( $\sigma \omega \sigma \alpha$, first aorist active infinitive of $\sigma \omega \zeta \omega$ )
and to destroy ( $\kappa \alpha \alpha \pi о \lambda \varepsilon \sigma \alpha$, first aorist active infinitive of $\alpha \pi \sigma \lambda \lambda \nu \mu$ to destroy). Cf. the picture of God's power in Mt 10:28, a common idea in the O.T. (De 32:39; 1Sa 2:16; 2 Ki 5:7).

But who art thou? ( $\sigma v \delta \varepsilon \tau \iota \varsigma \varepsilon ;$ ). Proleptic and emphatic position of $\sigma v$ (thou) in this rhetorical question as in Ro 9:20; 14:4 .

Thy neighbour ( $\tau 0 v \pi \lambda \eta \sigma \iota v$ ). "The neighbour" as in Jas 2:8 .
Jas 4:13
Go to now ( $\alpha \gamma \varepsilon v v v$ ). Interjectional use of $\alpha \gamma \varepsilon$ (from $\alpha \gamma \omega$ ) as in 5:1 (only N.T. instances) with a plural verb (o $\lambda \varepsilon \gamma o v \tau \varepsilon \varsigma$, present active articular participle, ye that say) as is common in ancient Greek like $\delta \varepsilon \nu v \nu \eta \kappa о \cup \sigma \alpha \tau \varepsilon$ (Mt 26:65 ).

Today or tomorrow ( $\sigma \eta \mu \varepsilon \rho o v \eta \alpha v \rho เ v$ ). Correct text (Aleph B), not $\kappa \alpha$ (and).
Into this city ( $\varepsilon \iota \varsigma \tau \eta \nu \delta \varepsilon \tau \eta \nu \pi o \lambda \iota v$ ). Old demonstrative o $\delta \varepsilon$, rare in N.T. (Lu 10:39) save in neuter plural $\tau \alpha \delta \varepsilon$ (these things Ac 21:11). One would point out the city on the map (Mayor) as he made the proposal (we will go, по $\varepsilon \varepsilon v \sigma о \mu \varepsilon \theta \alpha$ ).

And spend a year there ( $\kappa \alpha \pi о \imath\rceil \sigma \mu \varepsilon \nu \varepsilon \kappa \varepsilon \varepsilon \nu \iota \alpha \nu \tau \nu \nu$ ). Another future (active of $\pi \sigma \iota \varepsilon \omega$ ). "We will do a year there."

And trade ( $\kappa \alpha \varepsilon \mu \pi о \rho \varepsilon v \sigma о \mu \varepsilon \theta \alpha$ ). Future middle of $\varepsilon \mu \pi о \rho \varepsilon v o \mu \alpha$ ( $\varepsilon v, \pi о \rho \varepsilon v o \mu \alpha$, to go in), old verb from $\varepsilon \mu \pi о \rho о \varsigma$ (a merchant or trader, a drummer, one going in and getting the trade, Mt 13:45 ), a vivid picture of the Jewish merchants of the time.

And get gain ( $\kappa \alpha \kappa \varepsilon \rho \delta \eta \sigma о \mu \varepsilon v$ ). Future (Ionic form) active of $\kappa \varepsilon \rho \delta \alpha \iota v \omega$, old verb from $\kappa \varepsilon \rho \delta$ оऽ (gain, Php 1:21), as in Mt 16:26.

Jas 4:14
Whereas ye know not (oı兀ıvєৎ ovк $\varepsilon \pi \iota \sigma \tau \alpha \sigma \theta \varepsilon$ ). The longer relative ootıc defines here more precisely (like Latin qui) o $\lambda \varepsilon \gamma \circ$ огєऽ (ye who say) of verse 13 in a causal sense, as in Ac 10:47, "who indeed do not know" (present middle indicative of $\varepsilon \pi \iota \sigma \tau \alpha \mu \alpha$ ).

What shall be on the morrow ( $\tau \eta \varsigma \alpha \nu \rho ı v$ ). Supply $\eta \mu \varepsilon \rho \alpha \varsigma$ (day) after $\alpha v \rho ı v$. This is the reading of B (Westcott) "on the morrow" (genitive of time), but Aleph K L cursives have то $\tau\rceil \varsigma \alpha v \rho ı o v(" t h e ~ m a t t e r ~ o f ~ t o m o r r o w "), ~ w h i l e ~ A ~ P ~ c u r s i v e s ~ h a v e ~ \tau \alpha ~ \tau \eta \zeta ~ \alpha u p ı o v ~(" t h e ~ t h i n g s ~$ of tomorrow"). The sense is practically the same, though to $\tau \eta \varsigma$ avpıov is likely correct.

What is your life? ( $\pi \sigma \iota \eta \zeta \omega \eta \nu \mu \omega v$ ). Thus Westcott and Hort punctuate it as an indirect question, not direct. Hota is a qualitative interrogative (of what character).

As vapour ( $\alpha \tau \mu \iota)$. This is the answer. Old word for mist (like $\alpha \tau \mu \circ \varsigma$, from which our "atmosphere"), in N.T. only here and Ac 2:19 with $\kappa \alpha \pi v o v$ (vapour of smoke (from Joe 2:30 ).

For a little time ( $\pi \rho \circ \varsigma о \lambda \iota \gamma \circ v)$. See same phrase in $1 \mathrm{Ti} 4: 8$, $\pi \rho \circ \varsigma \kappa \alpha \iota \rho о v$ in $\mathrm{Lu} 8: 13$, $\pi \rho o \varsigma \omega \rho a v$ in Joh 5:35.

That appeareth and then vanisheth away ( $\left.\varphi \alpha \vee \sim \mu \varepsilon v \eta \varepsilon \pi \varepsilon \iota \tau \alpha \kappa \alpha \alpha \varphi \alpha v ı \zeta_{о} \mu \varepsilon v \eta\right)$. Present middle participles agreeing with $\alpha \tau \mu \iota$, "appearing, then also disappearing," with play on the two verbs ( $\varphi$ aıvo $\mu a, \alpha \varphi a v ı \zeta \omega$ as in Mt 6:19, from $\alpha \varphi a v \eta \varsigma$ hidden Heb 4:13 ) with the same root $\varphi \alpha v(\varphi a \imath v \omega, \alpha-\varphi \alpha v-\eta \varsigma)$.

Jas 4:15
For that ye ought to say ( $\alpha v \tau \tau \operatorname{\tau ov} \lambda \varepsilon \gamma \varepsilon เ v v \mu a \varsigma$ ). "Instead of the saying as to you" (genitive of the articular infinitive with the preposition $\alpha \nu \tau$ and the accusative of general reference with $\lambda \varepsilon \gamma \varepsilon \iota \nu$ ), "instead of your saying."

If the Lord will ( $\varepsilon \alpha \nu$ о кирьюৎ $\theta \varepsilon \lambda \eta$ ). Condition of the third class with $\varepsilon \alpha v$ and the present active subjunctive (or first aorist active $\theta \varepsilon \lambda \varepsilon \sigma \eta$ in some MSS). The proper attitude of mind (Ac 18:21; 1Co 4:19; 16:7; Ro 1:19; Php 2:19,24; Heb 6:3 ), not to be uttered always in words like a charm. This Hellenistic formula was common among the ancient heathen, as today among modern Arabs like the Latin deo volente.

This or that ( $\tau 0 \cup \tau о ~ \eta \varepsilon \kappa \varepsilon เ v o)$. Applicable to every act.
Jas 4:16
In your vauntings ( $\varepsilon v$ тaıৎ $\alpha \lambda \alpha \zeta$ oviaıs $v \mu \omega \nu$ ). Old word for braggart talk (from $\alpha \lambda \alpha \zeta$ ovevo $\mu \alpha$, to act the $\alpha \lambda \alpha \zeta \omega v$ empty boaster Ro 1:30 ), common in Aristophanes, in N.T. only here and 1Jo 2:16.
 2:19 ), bad if for self as here.

Jas 4:17
To him that knoweth ( $\varepsilon \iota \delta o \tau$ ). Dative case of second perfect participle $\varepsilon \iota \delta \omega \varsigma$ (from ot $\delta \alpha$ ), and with the infinitive to know how, "to one knowing how."

To do good ( $\kappa \alpha \lambda 0 v \pi o \iota \varepsilon \imath$ ). "To do a good deed."
And doeth it not $(\kappa \alpha \mu \eta \pi o \iota o v \nu \tau)$. Dative again of the present active participle of $\pi o เ \varepsilon \omega$, "and to one not doing it." Cf. "not a doer" ( 1:23) and Mt 7:26.

Sin ( $\alpha \mu \alpha \rho \tau \iota \alpha$ ). Unused knowledge of one's duty is $\sin$, the sin of omission. Cf. Mt 23:23

## Jas 5

Jas 5:1
Come now, ye rich ( $\alpha \boldsymbol{\varepsilon} v \mathrm{vv}$ o $\pi \lambda$ оvбıo). Exclamatory interjection as in 4:13. Direct address to the rich as a class as in 1Ti 6:17. Apparently here James has in mind the rich as a class, whether believer, as in 1:10f., or unbeliever, as in 2:1f.,6. The plea here is not directly for reform, but a warning of certain judgment (5:1-6) and for Christians "a certain grim comfort in the hardships of poverty" (Ropes) in 5:7-11.
 imperative of $\kappa \lambda a \omega \omega$ as in 4:9), howling with grief' (present active participle of the old onomatopoetic verb o $\lambda \mathrm{o} \lambda \nu \zeta \omega$, here only in N.T., like Latin ululare, with which compare $\alpha \lambda \alpha \lambda \alpha \zeta \omega$ in Mt 5:38.

For your miseries ( $\varepsilon \pi \tau \alpha \iota \varsigma \tau \alpha \lambda \alpha \iota \pi \omega \rho ı \alpha \iota \varsigma \nu \mu \omega v$ ). Old word from $\tau \alpha \lambda \alpha \iota \pi \omega \rho \circ \varsigma$ (Ro 7:24 ) and like $\tau \alpha \lambda \alpha \iota \pi \omega \rho \varepsilon \omega$ in Jas 4:9 (from $\tau \lambda \alpha \omega$ to endure and $\pi \omega \rho \circ \varsigma$ a callus).

That are coming upon you ( $\tau \alpha \iota \varsigma \varepsilon \pi \varepsilon \rho \chi \circ \mu \varepsilon v \alpha \iota \varsigma)$. Present middle participle of the old compound $\varepsilon \pi \varepsilon \rho \chi \circ \mu \alpha$ to come upon, used here in futuristic prophetic sense.

Jas 5:2
Riches (o $\pi$ лоvtoc). Masculine singular, but occasionally neuter to $\pi \lambda$ outo $\varsigma$ in nominative and accusative (2Co 8:2 ). Apparently $\pi \lambda \varepsilon o \tau o c$ fulness (from $\pi \lambda \varepsilon o c$ full, $\pi \mu \mu \pi \lambda \eta \mu$ to fill). "Wealth."

Are corrupted ( $\sigma \varepsilon \sigma \eta \pi \varepsilon v$ ). Second perfect active indicative of $\sigma \eta \pi \omega$ (root $\sigma \alpha \pi$ as in $\sigma \alpha \pi \rho \circ \varsigma$, rotten), to corrupt, to destroy, here intransitive "has rotted." Only here in N.T. On the worthlessness of mere wealth see Mt 6:19,24 .

Were moth-eaten ( $\sigma \eta \tau \circ \beta \rho \omega \tau \alpha \gamma \varepsilon \gamma \circ v \varepsilon v)$ ). "Have become (second perfect indicative of $\gamma \iota v o \mu \alpha$, singular number, though $\mu \alpha \tau \iota \alpha$, neuter plural, treated collectively) moth-eaten" ( $\sigma \eta \tau 0 \beta \rho \omega \tau \tau$, late and rare compound from $\sigma \eta \varsigma$, moth, Mt 6:19f. and $\beta \rho \omega \tau$ тos, verbal adjective of $\beta \iota \beta \rho \omega \sigma \kappa \omega$ to eat Joh 6:13. This compound found only here, Job 13:28, Sibyll. Orac. Proem. 64). Rich robes as heirlooms, but moth-eaten. Vivid picture. Witness the 250 "lost millionaires" in the United States in 1931 as compared with 1929. Riches have wings.

Jas 5:3
Are rusted ( $\kappa \alpha \tau \omega \omega \tau \alpha$ ). Perfect passive indicative (singular for $\chi \rho v \sigma o \varsigma$ and $\alpha \rho \gamma \cup \rho o \varsigma$ are grouped as one) of $\kappa \alpha \tau \iota \omega$, late verb (from to $\varsigma$, rust) with perfective sense of $\kappa \alpha \tau \alpha$, to rust through (down to the bottom), found only here, Sir. 12:11, Epictetus (Diss. 4, 6, 14).

Rust (toc). Poison in Jas 3:8; Ro 3:13 (only N.T. examples of old word). Silver does corrode and gold will tarnish. Dioscorides (V.91) tells about gold being rusted by chemicals. Modern chemists can even transmute metals as the alchemists claimed.

For a testimony ( $\varepsilon ı \varsigma \mu \rho \rho \tau \cup \rho ı \rho)$ ). Common idiom as in Mt 8:4 (use of $\varepsilon \iota \varsigma$ with accusative in predicate).
 in the parallel passage ( $\mathrm{Lu} 9: 5$ ) we have $\varepsilon เ \varsigma \mu \alpha \rho \tau \cup \rho ı o v ~ \varepsilon \pi^{\prime}$ avtovc. "To you" will make sense, as in Mt 8:4; 10:18, but "against" is the idea here as in Lu 21:13.

Shall eat ( $\varphi \alpha \gamma \varepsilon \tau \alpha$ ). Future middle (late form from $\varepsilon \varphi \alpha \gamma \circ v$ ) of defective verb $\varepsilon \sigma \theta \iota \omega$, to eat.

Your flesh (таৎ баркац). The plural is used for the fleshy parts of the body like pieces of flesh (Re 17:16; 19:18,21). Rust eats like a canker, like cancer in the body.

As fire ( $\omega \varsigma \pi \cup \rho$ ). Editors differ here whether to connect this phrase with $\varphi \alpha \gamma \varepsilon \tau \alpha$, just before (as Mayor), for fire eats up more rapidly than rust, or with the following, as Westcott and Hort and Ropes, that is the eternal fire of Gehenna which awaits them (Mt 25:41; Mr 9:44 ). This interpretation makes a more vivid picture for $\varepsilon \theta \eta \sigma \alpha u \rho \iota \sigma a t \varepsilon$ (ye have laid up, first aorist active indicative of $\theta \eta \sigma \alpha v \rho!\zeta \omega$, Mt 6:19 and see $\operatorname{Pr} 16: 27$ ), but it is more natural to take it with $\varphi \alpha \gamma \varepsilon \tau \alpha$.

Jas 5:4
The hire ( $\mathrm{o} \mu \iota \sigma$ oc). Old word for wages ( $\mathrm{Mt} \mathrm{20:8)}$ ).
Labourers ( $\varepsilon \rho \gamma \alpha \tau \omega v$ ). Any one who works ( $\varepsilon \rho \gamma \alpha \zeta \rho \mu \alpha)$, especially agricultural workers (Mt 9:37).

Who mowed ( $\tau \omega v \alpha \mu \eta \sigma \alpha v \tau \omega v$ ). Genitive plural of the articular first aorist active participle of $\alpha \mu \alpha \omega$ (from $\alpha \mu \alpha$, together), old verb, to gather together, to reap, here only in N.T.

Fields ( $\chi \omega \rho \alpha \varsigma$ ). Estates or farms (Lu 12:16).
Which is of you kept back by fraud (o $\alpha \varphi v \sigma \tau \varepsilon \rho \eta \mu \varepsilon v o \varsigma ~ \alpha \varphi ' ~ v \mu \omega v$ ). Perfect passive articular participle of $\alpha \varphi \cup \sigma \tau \varepsilon \rho \varepsilon \omega$, late compound (simplex vбт $\varepsilon \rho \varepsilon \omega$ common as Mt 19:20), to be behindhand from, to fail of, to cause to withdraw, to defraud. Pitiful picture of earned wages kept back by rich Jews, old problem of capital and labour that is with us yet in acute form.

The cries ( $\alpha \beta$ o $\alpha$ ). Old word from which $\beta$ o $\alpha \omega$ comes (Mt 3:3 ), here only in N.T. The stolen money "cries out" ( $\kappa \rho \alpha \zeta \varepsilon)$, the workers cry out for vengeance.
 active of $\theta \varepsilon \rho \iota \zeta \omega$ (old verb from $\theta \varepsilon \rho o \varsigma$, summer, Mt 24:32 ), to reap, to harvest while summer allows (Mt 6:26).

Have entered ( $\varepsilon \sigma \sigma \varepsilon \lambda \eta \lambda u \theta \alpha v)$. Perfect active third person plural indicative of $\varepsilon ו \sigma \varepsilon \rho \chi \circ \mu \alpha$, old and common compound, to go or come into. This late form is by analogy of the aorist for the usual form in - $\alpha \sigma$.

Of the Lord of Sabaoth (Kupıov $\Sigma \alpha \beta \alpha \omega \theta$ ). "Of the Lord of Hosts," quotation from Isa 5:9 as in Ro 9:29, transliterating the Hebrew word for "Hosts," an expression for the omnipotence of God like Паvтократ $\omega \rho(\operatorname{Re} 4: 8$ ). God hears the cries of the oppressed workmen even if the employers are deaf.

Jas 5:5

Ye have lived delicately ( $\varepsilon \tau \rho \cup \varphi \eta \sigma \sigma \tau \varepsilon)$. First aorist (constative, summary) active indicative of $\tau \rho \cup \varphi \alpha \omega$, old verb from $\tau \rho \cup \varphi \eta$ (luxurious living as in $\operatorname{Lu} 7: 25$, from $\theta \rho \cup \pi \tau \omega$, to break down, to enervate), to lead a soft life, only here in N.T.

Taken your pleasure ( $\varepsilon \sigma \pi \alpha \tau \alpha \lambda \eta \sigma \alpha \tau \varepsilon$ ). First aorist (constative) active indicative of $\sigma \pi \alpha \tau \alpha \lambda \alpha \omega$, late and rare verb to live voluptuously or wantonly (from $\sigma \pi \alpha \tau \alpha \lambda \eta$, riotous living, wantonness, once as bracelet), in N.T. only here and 1Ti 5:6 .

Ye have nourished ( $\varepsilon \theta \rho \varepsilon \psi \alpha \tau \varepsilon$ ). First aorist (constative) active indicative of $\tau \rho \varepsilon \varphi \omega$, old verb, to feed, to fatten (Mt 6:26). They are fattening themselves like sheep or oxen all unconscious of "the day of slaughter" ( $\varepsilon v \eta \mu \varepsilon \rho \alpha \sigma \varphi a \gamma \eta \varsigma$, definite without the article) ahead of them. For this use of $\sigma \varphi \alpha \gamma \eta \varsigma$ see Ro 8:36 ( $\pi \rho о \beta \alpha \tau \alpha \sigma \varphi \alpha \gamma \eta \varsigma$, sheep for the slaughter, $\sigma \varphi \alpha \gamma \eta$ from $\sigma \varphi \alpha \zeta \omega$, to slay), consummate sarcasm on the folly of sinful rich people.

Jas 5:6
Ye have condemned ( $\kappa \alpha \tau \varepsilon \delta ı \kappa \alpha \sigma \alpha \tau \varepsilon)$. First aorist active indicative of $\kappa \alpha \tau \alpha \delta ı \kappa \alpha \zeta \omega$, old verb (from ката $\delta_{ı} \eta$, condemnation, Ac $25: 15$ ). The rich controlled the courts of justice.

Yehave killed the righteous one ( $\varepsilon \varphi \circ v \varepsilon v \sigma a \tau \varepsilon ~ \tau o v ~ \delta ı \kappa a ı v)$ ). First aorist active indicative of $\varphi o v \varepsilon \cup \omega$ ( $2: 11 ; 4: 2$ ). "The righteous one" ( $\tau \omega v \delta$ ıкаıov) is the generic use of the singular with article for the class. There is probably no direct reference to one individual, though it does picture well the death of Christ and also the coming death of James himself, who was called the Just (Eus. H.E. ii. 23). Stephen (Ac 7:52 ) directly accuses the Sanhedrin with being

He doth not resist you (ovk $\alpha v \tau \iota \tau \alpha \sigma \sigma \varepsilon \tau \alpha \cup \mu ı v$ ). It is possible to treat this as a question. Present middle indicative of $\alpha v \tau \iota \tau \alpha \sigma \sigma \omega$, for which see Jas 4:6. Without a question the unresisting end of the victim ( $\tau 0 v \delta$ ©кaıov) is pictured. With a question (ouk, expecting an affirmative answer) God or Lord is the subject, with the final judgment in view. There is no way to decide definitely.

Jas 5:7
Be patient therefore ( $\mu \alpha \kappa \rho \circ \theta \nu \mu \eta \sigma \alpha \tau \varepsilon$ ovv). A direct corollary (ouv, therefore) from the coming judgment on the wicked rich ( 5:1-6). First aorist (constative) active imperative of $\mu \alpha \kappa \rho о \theta \nu \mu \varepsilon \omega$, late compound (Plutarch, LXX) from $\mu \alpha \kappa \rho о \theta \nu \mu \circ \varsigma$ ( $\mu \alpha к \rho о \sigma, \theta \nu \mu \circ \varsigma$, of long spirit, not losing heart), as in Mt 18:26. The appeal is to the oppressed brethren. Catch your wind for a long race (long-tempered as opposed to short-tempered). See already the exhortation to patience (v $v \circ \mu \circ v \eta$ ) in 1:3f.,12 and repeated in 5:11. They will need both submission ( $\tau \pi о \mu \varepsilon v \omega$ 5:11) and steadfastness ( $\mu \alpha к \rho о Ө$ ицна 5:10).

Until the coming of the Lord ( $\varepsilon \omega \varsigma \tau \eta \varsigma \pi \alpha \rho o v \sigma i a \varsigma)$. The second coming of Christ he means, the regular phrase here and in verse 8 for that idea (Mt 24:3,37,39; 1Th 2:19, etc.).

The husbandman (o $\gamma \varepsilon \omega \rho \gamma \circ \varsigma)$. The worker in the ground ( $\gamma \eta, \varepsilon \rho \gamma \omega$ ) as in Mt 21:33f

Waiteth for ( $\varepsilon \kappa \delta \varepsilon \chi \varepsilon \tau \alpha)$. Present middle indicative of $\varepsilon \kappa \delta \varepsilon \chi \circ \mu \alpha$, old verb for eager expectation as in Ac 17:16.

Precious ( $\tau \mu \mathrm{\mu} \circ v$ ). Old adjective from $\tau \mu \mu \eta$ (honor, price), dear to the farmer because of his toil for it. See 1Pe 1:19.

Being patient over it ( $\mu \alpha \kappa \rho \circ \theta v \mu \omega v \varepsilon \pi^{\prime} \alpha v \tau \omega$ ). Present active participle of $\mu \alpha \kappa \rho \circ \theta \nu \mu \varepsilon \omega$ just used in the exhortation, picturing the farmer longing and hoping over his precious crop (cf. Lu 18:7 of God).

Until it receive ( $\varepsilon \omega \varsigma \lambda \alpha \beta \eta$ ). Temporal clause of the future with $\varepsilon \omega \varsigma$ and the second aorist active subjunctive of $\lambda \alpha \mu \beta \alpha v \omega$, vividly describing the farmer's hopes and patience.

The early and latter rain ( $\pi \rho \circ \not \mu \circ v \kappa \alpha ~ о \psi \mu \rho v$ ). The word for rain (vєтоv Ac 14:17) is absent from the best MSS. The adjective $\pi \rho \circ \mu \boldsymbol{\mu}$ ( from $\pi \rho \omega$, early) occurs here only in N.T., though old in the form $\pi \rho o \mu \mu \circ \varsigma$ and $\pi \rho \omega$ цऽ. See De 11:14; Jer 5:24, etc. for these terms for the early rain in October or November for the germination of the grain, and the latter rain ( $о \psi \mu \circ \nu$, from $\boldsymbol{o} \varepsilon \varepsilon$, late, here only in N.T.) in April and May for maturing the grain.

Jas 5:8
Ye also ( $\kappa \alpha \nu \mu \varepsilon \iota)$ ). As well as the farmers.
Stablish ( $\sigma \tau \eta \rho \iota \xi \alpha \tau \varepsilon$ ). First aorist active imperative of $\sigma \tau \eta \rho \iota \zeta \omega$, old verb, (from $\sigma \tau \eta \rho \iota \gamma \xi$, a support) to make stable, as in $\operatorname{Lu}$ 22:32; 1Th 3:13.

Is at hand ( $\eta \gamma \gamma / \kappa \varepsilon v$ ). Present perfect active indicative of $\varepsilon \gamma \gamma \zeta \zeta \omega$, common verb, to draw near (from $\varepsilon \gamma \gamma \cup \varsigma)$, in Jas $4: 8$, for drawing near. Same form used by John in his preaching (Mt 3:2 ). In 1Pe 4:7 the same word appears to have an eschatological sense as apparently here. How "near" or "nigh" did James mean? Clearly, it could only be a hope, for Jesus had distinctly said that no one knew when he would return.

Jas 5:9
Murmur not ( $\mu \eta \sigma \tau \varepsilon v \alpha 〔 \varepsilon \tau \varepsilon$ ). Prohibition with $\mu \eta$ and the present active imperative of $\sigma \tau \varepsilon v a \zeta \omega$, old verb, to groan. "Stop groaning against one another," as some were already doing in view of their troubles. In view of the hope of the Second Coming lift up your heads.

That ye be not judged ( $七 \nu \alpha \mu \eta \kappa \rho 1 \theta \eta \tau \varepsilon$ ). Negative purpose clause with $ו v \alpha \mu \eta$ and the first aorist passive subjunctive of $\kappa \rho \iota v \omega$. As already indicated (2:12f.; 4:12) and repeated in 5:12. Reminiscence of the words of Jesus in Mt 7:1f.

Standeth before the doors ( $\pi \rho \circ \tau \omega v \theta v \rho \omega v \varepsilon \sigma \tau \eta \kappa \varepsilon v$ ). Perfect active indicative of $\iota \sigma \tau \eta \mu$, "is standing now." Again like the language of Jesus in Mt 24:33 ( $\varepsilon \pi$ Өvpaıs) and Mr 13:29 . Jesus the Judge is pictured as ready to enter for the judgment.

Jas 5:10
For an example ( $v \pi о \delta \varepsilon \imath \gamma \mu \alpha$ ). Late word for the old $\pi \alpha \rho \alpha \delta \varepsilon ı \gamma \mu \alpha$, from $v \pi о \delta \varepsilon ו \kappa v \nu \mu$, to copy under, to teach ( $\mathrm{Lu} 6: 47$ ), here for copy to be imitated as in Joh 13:15, as a warning (Heb 4:11). Here predicate accusative with tovৎ $\pi \rho \circ \varphi \eta \tau$ т $\varsigma$ (the prophets) as the direct object of $\lambda \alpha \beta \varepsilon \tau \varepsilon$ (second aorist active imperative of $\lambda \alpha \mu \beta \alpha \nu \omega$ ).

Of suffering ( $\tau \eta \varsigma \kappa \alpha \kappa о \pi \alpha \theta \iota \alpha \varsigma)$. Old word from какол $\alpha \theta\rceil$ (suffering evil, како $\kappa \alpha \theta \varepsilon \omega$ in verse 13; $2 \mathrm{Ti} 2: 3,9$ ), here only in N.T.

Of patience ( $\mu \alpha \kappa \rho о \theta v \mu \iota \varsigma)$. Like $\mu \alpha \kappa \rho о \theta v \mu \varepsilon \omega$ in 5:7. See both $\mu \alpha \kappa \rho о \theta v \mu \iota \alpha$ and $v \pi о \mu о \nu \eta$ in 2Co 4:6; Col 1:11 (the one restraint from retaliating, the other not easily succumbing).

In the name of $(\varepsilon \nu \tau \omega$ ovo $\mu \alpha \tau)$. As in Jer 20:9. With the authority of the Lord (Deissmann, Bible Studies, p. 198).

Jas 5:11
We call blessed ( $\mu \alpha \kappa \alpha \rho \iota \zeta о \mu \varepsilon v$ ). Old word (present active indicative of $\mu \alpha \kappa \alpha \rho \iota \zeta \omega$ ), from $\mu$ ккарьоя (happy), in N.T. only here and Lu 1:48. "We felicitate." As in 1:3,12; Da 12:12.

Ye have heard ( $\eta \kappa о v \sigma \alpha \tau \varepsilon$ ). First aorist (constative) active indicative of $\alpha \kappa 0 v \omega$. As in Mt 5:21,27,33,38,43. Ropes suggests in the synagogues.

Of Job (I $\omega \beta$ ). Job did complain, but he refused to renounce God (Job 1:21; 2:10; 13:15; 16:19; 19:25f. ). He had become a stock illustration of loyal endurance.

Ye have seen ( $\varepsilon \delta \delta \tau \tau)$. Second aorist (constative) active indicative of opaw. In Job's case.

The end of the Lord ( $\tau о \tau \varepsilon \lambda о \varsigma \kappa \cup \rho ı v)$. The conclusion wrought by the Lord in Job's case (Job 42:12).

Full of pity ( $\pi 0 \lambda v \sigma \pi \lambda \alpha \gamma \chi \nu \circ \varsigma)$. Late and rare compound ( $\pi 0 \lambda v \sigma, \sigma \pi \lambda \alpha \gamma \chi \nu \circ v$ ), only here in N.T. It occurs also in Hermas (Sim. v. 7. 4; Mand. iv, 3). "Very kind."

Merciful (oıк $\tau \rho \mu \omega v$ ). Late and rare adjective (from oıк $\tau \varepsilon \iota \rho \omega$ to pity), in N.T. only here and Lu 6:36.

Jas 5:12
Above all things ( $\pi \rho o \pi \alpha v \tau \omega v$ ). No connection with what immediately precedes. Probably an allusion to the words of Jesus (Mt 5:34-37). It is not out of place here. See the same phrase in 1Pe 4:8. Robinson (Ephesians, p. 279) cites like examples from the papyri at the close of letters. Here it means "But especially" (Ropes).

Swear not $(\mu \eta \mathrm{o} \mu \nu v \varepsilon \tau \varepsilon)$. Prohibition of the habit (or to quit doing it if guilty) with $\mu \eta$ and the present active imperative of $o \mu \nu v \omega$. The various oaths (profanity) forbidden ( $\mu \eta \tau \varepsilon$, thrice) are in the accusative case after o $\mu \nu v \varepsilon \tau \varepsilon$, according to rule (ov $\rho \alpha \nu o \nu, \gamma \eta \nu, o \rho \kappa о \nu$ ). The Jews were wont to split hairs in their use of profanity, and by avoiding God's name imagine that they were not really guilty of this sin, just as professing Christians today use "pious oaths" which violate the prohibition of Jesus.

Let be $(\eta \tau \omega)$. Imperative active third singular of $\varepsilon \mu \mu$, late form (1Co 16:22) for $\varepsilon \sigma \tau \omega$. "Your yea be yea" (and no more). A different form from that in Mt 5:37.

That ye fall not under judgment ( $\iota \alpha \alpha \mu \eta v \pi \sigma \kappa \rho \iota \sigma \iota v \pi \varepsilon \sigma \eta \tau \varepsilon$ ). Negative purpose with $\iota \nu \alpha \mu \eta$ and the second aorist active subjunctive of $\pi \iota \pi \tau \omega$, to fall. See $\imath \nu \alpha \mu \eta \kappa \rho \iota \theta \eta \tau \varepsilon$ in verse 9. K $\rho \iota \sigma \iota \varsigma$ (from $\kappa \rho \iota v \omega$ ) is the act of judging rather than the judgment rendered ( $\kappa \rho \iota \mu \alpha$ Jas 3:1).

Jas 5:13
Is any suffering? (какота $\theta \varepsilon \tau \iota \sigma$ ). See verse 10 for како $\pi \alpha \theta \iota \alpha$. The verb in N.T. occurs only here and in 2Ti 2:3,9; 4:5. The lively interrogative is common in the diatribe and suits the style of James.

Among you ( $\varepsilon v v \mu \nu v$ ). As in 3:13.
Let him pray ( $\pi \rho о \sigma \varepsilon v \chi \varepsilon \sigma \theta \omega$ ). Present middle imperative, "let him keep on praying" (instead of cursing as in verse 12).

Is any cheerful ( $\varepsilon v \theta \nu \mu \varepsilon ;$ ). Present active indicative of $\varepsilon v \theta \nu \mu \varepsilon \omega$, old verb from $\varepsilon v \theta v \mu \circ \varsigma$ (Ac 27:36 ), in N.T. only here and Ac 27:22,25.

Let him sing praise $(\psi \alpha \lambda \lambda \varepsilon \tau \omega)$. Present active imperative of $\psi \alpha \lambda \lambda \omega$, originally to twang a chord as on a harp, to sing praise to God whether with instrument or without, in N.T. only here, 1Co 14:15; Ro 15:9; Eph 5:19 . "Let him keep on making melody."

Jas 5:14
Is any among you sick? ( $\alpha \sigma \theta \varepsilon v \varepsilon \tau \iota \varsigma v \nu \mu \nu v$;). Present active indicative of $\alpha \sigma \theta \varepsilon v \varepsilon \omega$, old verb, to be weak (without strength), often in N.T. (Mt 10:8).

Let him call for ( $\pi \rho \circ \sigma \kappa \alpha \lambda \varepsilon \sigma \alpha \sigma \theta \omega)$. First aorist (ingressive) middle imperative of $\pi \rho о \sigma \kappa \alpha \lambda \varepsilon \omega$. Note change of tense (aorist) and middle (indirect) voice. Care for the sick is urged in 1Th 5:14 ("help the sick"). Note the plural here, "elders of the church, as in Ac 20:17; 15:6,22; 21:18; Php 1:1 (bishops).

Let them pray over him ( $\left.\pi \rho \circ \sigma \varepsilon v \xi \alpha \sigma \theta \omega \sigma \alpha v \varepsilon \pi^{\prime} \alpha \cup \tau o v\right)$ ). First aorist middle imperative of $\pi \rho о \sigma \varepsilon \cup \chi \circ \mu \alpha$. Prayer for the sick is clearly enjoined.

Anointing him with oil ( $\alpha \lambda \varepsilon \iota \psi \alpha \nu \tau \varepsilon \varsigma \varepsilon \lambda \alpha \omega \omega$ ). First aorist active participle of $\alpha \lambda \varepsilon \iota \varphi \omega$, old verb, to anoint, and the instrumental case of $\varepsilon \lambda \alpha \iota v$ (oil). The aorist participle can be either simultaneous or antecedent with $\pi \rho \circ \sigma \varepsilon \cup \xi \alpha \sigma \theta \omega \sigma \alpha v$ (pray). See the same use of $\alpha \lambda \varepsilon \iota \varphi \omega$ $\varepsilon \lambda a t \omega$ in Mr 6:13. The use of olive oil was one of the best remedial agencies known to the ancients. They used it internally and externally. Some physicians prescribe it today. It is clear both in Mr 6:13 and here that medicinal value is attached to the use of the oil and emphasis is placed on the worth of prayer. There is nothing here of the pagan magic or of the later practice of "extreme unction" (after the eighth century). It is by no means certain that $\alpha \lambda \varepsilon \iota \varphi \omega$ here and in Mr 6:13 means "anoint" in a ceremonial fashion rather than "rub" as it commonly does in medical treatises. Trench (N.T. Synonyms) says: "A $\lambda \varepsilon \iota \varphi \varepsilon เ v$ is the mundane and profane, $\chi$ pıєıv the sacred and religious, word." At bottom in James we have God and medicine, God and the doctor, and that is precisely where we are today. The best physicians believe in God and want the help of prayer.

Jas 5:15
The prayer of faith ( $\eta \varepsilon \cup \chi \eta \tau \eta \varsigma \pi \iota \sigma \tau \varepsilon \omega \varsigma)$. Cf. 1:6 for prayer marked by faith.

Shall save ( $\sigma \omega \sigma \varepsilon$ ). Future active of $\sigma \omega \zeta \omega$, to make well. As in Mt 9:21f.; Mr 6:56. No reference here to salvation of the soul. The medicine does not heal the sick, but it helps nature (God) do it. The doctor cooperates with God in nature.

The sick ( $\tau 0 \nu \kappa \alpha \mu v o v \tau \alpha$ ). Present active articular participle of $\kappa \alpha \mu \nu \omega$, old verb, to grow weary (Heb 12:3), to be sick (here), only N.T. examples.

The Lord shall raise him up ( $\varepsilon \gamma \varepsilon \rho \varepsilon$ avtov o кирюo¢). Future active of $\varepsilon \gamma \varepsilon เ \rho \omega$. Precious promise, but not for a professional "faith-healer" who scoffs at medicine and makes merchandise out of prayer.

And if he have committed sins ( $\kappa \alpha v ~ а \mu \alpha \rho \tau \iota \alpha \varsigma ~ \eta \pi \varepsilon \pi о ו \eta \kappa \omega \varsigma) . ~ P e r i p h r a s t i c ~ p e r f e c t ~ a c t i v e ~$ subjunctive (unusual idiom) with ка $\varepsilon \alpha v$ (crasis каv) in condition of third class. Supposing that he has committed sins as many sick people have (Mr 2:5ff.; Joh 5:14; 9:2f.; 1Co 11:30).

It shall be forgiven him ( $\alpha \varphi \varepsilon \theta \eta \sigma \varepsilon \tau \alpha \alpha 0 \tau \omega$ ). Future passive of $\alpha \varphi ı \eta \mu$ (impersonal passive as in Mt 7:2,7; Ro 10:10 ). Not in any magical way, not because his sickness has been healed, not without change of heart and turning to God through Christ. Much is assumed here that is not expressed.

Jas 5:16
 Present middle (indirect) of $\varepsilon \xi \circ \mu \circ \lambda о \gamma \varepsilon \omega$. Confession of sin to God is already assumed. But public confession of certain sins to one another in the meetings is greatly helpful in many ways. This is not confessing to one man like a priest in place of the public confession. One may confess to the pastor without confessing to God or to the church, with little benefit to anybody.

Pray for one another ( $\pi \rho \circ \sigma \varepsilon v \chi \varepsilon \sigma \theta \varepsilon v \pi \varepsilon \rho \alpha \lambda \lambda \eta \lambda \omega v)$. Present middle imperative. Keep this up.

That ye may be healed ( $0 \pi \omega \varsigma \iota \theta \eta \tau \varepsilon$ ). Purpose clause with $o \pi \omega \varsigma$ and the first aorist passive subjunctive of $\iota \alpha o \mu \alpha$. Probably of bodily healing (verse 14), though $\iota \alpha o \mu \alpha$ is used also of healing of the soul (Mt 13:15; $1 \mathrm{Pe} 2: 24 ;$ Heb 12:13 ) as Mayor takes it here.

Availeth much ( $\pi 0 \lambda \nu \tau \sigma \chi \vee \varepsilon$ ). "Has much force." Present active indicative of $\sigma \sigma \chi \omega \omega$ (from เб $\chi \cup \varsigma$, strength).

In its working ( $\varepsilon v \varepsilon \rho \gamma \circ v \mu \varepsilon v \eta$ ). Probably the present middle participle of $\varepsilon v \varepsilon \rho \gamma \varepsilon \omega$ as Paul apparently uses it in Ga 5:6; 2Co 4:12; 2Th 2:7, meaning "when it works." The passive is possible, as is the usual idiom elsewhere. Mayor argues strongly for the passive here, "when it is exercised" (Ropes).

Jas 5:17
Of like passions with us (o $о$ оьo $\pi \alpha \theta \eta \varsigma \eta \mu \nu \nu$ ). Associative-instrumental case $\eta \mu \nu \nu$ as with oного. This old compound adjective (oноьоб, $\pi \alpha \sigma \chi \omega$ ), suffering the like with another, in N.T. only here and Ac 14:15.

He prayed fervently ( $\pi \rho о \sigma \varepsilon v \chi \eta ~ \pi \rho о \sigma \eta \cup \xi \alpha \tau о)$. First aorist middle indicative of $\pi \rho \circ \sigma \varepsilon v \chi \circ \mu \alpha$ and the instrumental case $\pi \rho \circ \sigma \varepsilon v \chi \eta$ (cognate substantive), after idiom for intensity in classical Greek, like $\varphi \varepsilon \cup \gamma \varepsilon เ v ~ \varphi \cup \gamma \eta$, to flee with all speed (figura etymologica), but particularly frequent in the LXX (Ge 2:17; 31:30) in imitation of the Hebrew infinitive absolute. So Lu 22:15; Joh 3:29; Ac 4:17 .

That it might not rain ( $\tau$ ov $\mu \eta \beta \rho \varepsilon \xi \alpha$ ). Genitive of the articular infinitive ( $\beta \rho \varepsilon \xi \alpha$, first aorist active of $\beta \rho \varepsilon \chi \omega$, old verb, to moisten, Lu 7:38, to rain, Mt 5:45) with negative $\mu \eta$ used either for direct purpose, for an object clause as here and Ac 3:12; 15:20, or even for result.

For three years and six months ( $\varepsilon v i \alpha u \tau o u \varsigma \tau \rho \varepsilon ı \varsigma \kappa \alpha \mu \eta \nu a \varsigma \varepsilon \xi)$. Accusative of extent of time.

Jas 5:18
Gave rain (vetov $\varepsilon \delta \omega \kappa \varepsilon v$ ). This idiom is in the LXX of God as here of heaven ( 1 Sa 12:17; $1 \mathrm{Ki} 18: 1$ ) and also in Ac 14:17 instead of $\varepsilon \beta \rho \varepsilon \xi \varepsilon v$ of verse 17. Huctov is old word for rain (from $v \omega$, to rain), genuine here, but not in verse 7 .

Brought forth ( $\varepsilon \beta \lambda \alpha \sigma \tau \eta \sigma \varepsilon v$ ). First aorist active of $\beta \lambda \alpha \sigma \tau \alpha v \omega$, old verb, to sprout (intransitive as Mr 4:27), here as occasionally in later Greek transitive with accusative карлоv.

Jas 5:19
If any one among you do err ( $\varepsilon \alpha \nu \tau \iota \varsigma \varepsilon \nu v \mu i v \pi \lambda \alpha v \eta \theta \eta$ ). Third-class condition (supposed case) with $\varepsilon \alpha v$ and the first aorist passive subjunctive of $\pi \lambda \alpha v a \omega$, old verb, to go astray, to wander (Mt 18:12 ), figuratively (Heb 5:2 ).

From the truth ( $\alpha \pi 0 \tau \eta \varsigma \alpha \lambda \eta \theta \varepsilon 1 \alpha \varsigma$ ). For truth see 1:18; 3:14; Joh 8:32; 1Jo 1:6; 3:18f. It was easy then, and is now, to be led astray from Christ, who is the Truth.

And one convert him ( $\kappa \alpha \varepsilon \pi \iota \sigma \tau \rho \varepsilon \psi \eta \tau \iota \varsigma \alpha v \tau o v)$. Continuation of the third-class condition with the first aorist active subjunctive of $\varepsilon \pi \iota \sigma \tau \rho \varepsilon \varphi \omega$, old verb, to turn (transitive here as in Lu 1:16f., but intransitive often as Ac 9:35).

Jas 5:20
Let him know ( $\gamma \iota \nu \omega \sigma \kappa \varepsilon \tau \omega$ ). Present active imperative third person singular of $\gamma \iota \nu \omega \sigma \kappa \omega$, but Westcott and Hort read $\gamma \iota \nu \omega \sigma \kappa \varepsilon \tau \varepsilon$ (know ye) after B. In either case it is the conclusion of the condition in verse 19 .

He which converteth (o $\varepsilon \pi\lrcorner \sigma \tau \rho \varepsilon \psi \alpha \varsigma)$. First aorist active articular participle of $\varepsilon \pi \iota \sigma \tau \rho \varepsilon \varphi \omega$ of verse 19 .

From the error ( $\varepsilon \kappa \pi \lambda \alpha \sim \eta \zeta$ ). "Out of the wandering" of verse 19 ( $\pi \lambda \alpha \sim \eta$, from which $\pi \lambda \alpha v a \omega$ is made). See 1Jo 4:6 for contrast between "truth" and "error."

A soul from death ( $\psi v \chi \eta v \varepsilon \kappa$ Өavatov). The soul of the sinner ( $\alpha \mu \alpha \rho \tau \omega \lambda o v$ ) won back to Christ, not the soul of the man winning him. A few MSS. have autov added (his soul), which leaves it ambiguous, but autov is not genuine. It is ultimate and final salvation here meant by the future ( $\sigma \omega \sigma \varepsilon$ ).

Shall cover a multitude of sins ( $\kappa \alpha \lambda \nu \psi \varepsilon \pi \lambda \eta \theta_{0} \varsigma \alpha \mu \alpha \rho \tau \tau \omega v$ ). Future active of $\kappa \alpha \lambda \nu \pi \tau \omega$, old verb, to hide, to veil. But whose sins (those of the converter or the converted)? The Roman Catholics (also Mayor and Ropes) take it of the sins of the converter, who thus saves himself by saving others. The language here will allow that, but not New Testament teaching in general. It is apparently a proverbial saying which Resch considers one of the unwritten sayings of Christ (Clem. Al. Paed. iii. 12). It occurs also in 1Pe 4:8, where it clearly means the sins of others covered by love as a veil thrown over them. The saying appears also in Pr 10:12 : "Hatred stirs up strife, but love hides all transgressions"--that is "love refuses to see faults" (Mayor admits). That is undoubtedly the meaning in 1Pe 4:8; Jas 5:20 .

## THE FIRST EPISTLE GENERAL

OF PETER
ABOUT A.D. 65

## BY WAY OF INTRODUCTION

THE AUTHOR
The Epistle is not anonymous, but claims to be written by "Peter, an apostle of Jesus Christ" ( $1 \mathrm{Pe} 1: 1$ ), that is Cephas (Simon Peter). If this is not true, then the book is pseudonymous by a late writer who assumed Peter's name, as in the so-called Gospel of Peter, Apocalypse of Peter, etc. "There is no book in the New Testament which has earlier, better, or stronger attestation, though Irenaeus is the first to quote it by name" (Bigg). Eusebius (H.E. iii. 25.2) places it among the acknowledged books, those accepted with no doubt at all. We here assume that Simon Peter wrote this Epistle or at any rate dictated it by an amanuensis, as Paul did in Romans (Ro 16:22). Bigg suggests Silvanus (Silas) as the amanuensis or interpreter ( $1 \mathrm{Pe} 5: 12$ ), the obvious meaning of the language ( $\delta$ ta, through). He may also have been the bearer of the Epistle. It happens that we know more of Peter's life than of any of the twelve apostles because of his prominence in the Gospels and in the first fifteen chapters of the Acts. In the Student's Chronological New Testament I have given a full list of the passages in the Gospels where Peter appears with any clearness and the material is rich and abundant. The account in Acts is briefer, though Peter is the outstanding man in the first five chapters during his career in Jerusalem. After the conversion of Saul he begins to work outside of Jerusalem and after escaping death at the hands of Herod Agrippa I (Ac 12:3ff. ) he left for a while, but is back in Jerusalem at the Conference called by Paul and Barnabas (Ac 15:6-14; Gal 2:1-10 ). After that we have no more about him in Acts, though he reappears in Antioch and is rebuked by Paul for cowardice because of the Judaizers (Ga 2:11-21). He travelled for the Gospel among the Jews of the Dispersion (Ga 2:9) with his wife (1Co 9:5), and went to Asia Minor (1Pe 1:1) and as far as Babylon or Rome (1Pe 5:13 ). Besides Silvanus he had John Mark with him also (1Pe 5:13), who was said by the early Christian writers to have been Peter's "interpreter" in his preaching, since Peter was not expert in the Greek (Ac 4:13) , and who also wrote his Gospel under the inspiration of Peter's preaching. We are not able to follow clearly the close of his life or to tell precisely the time of his death. He was apparently put to death in A.D. 67 or 68 , but some think that he was executed in Rome in A.D. 64.

THE DATE
This question is tied up with that of the genuineness of the Epistle, the time of Peter's death, the use of Paul's Epistles, the persecution referred to in the Epistle. Assuming the genuineness of the Epistle and the death of Peter about A.D. 67 or 68 and the persecution
to be not that under Domitian or Trajan, but under Nero, the date can be assumed to be about A.D. 65.

## THE USE OF PAUL'S EPISTLES

There are two extremes about the relation of Peter to Paul. One is that of violent antithesis, with Peter and Paul opposing one another by exaggerating and prolonging Paul's denunciation of Peter's cowardice in Antioch (Ga 2:11-21) and making Peter also the exponent of a Jewish type of Christianity (practically a Judaizing type). This view of Baur once had quite a following, but it has nearly disappeared. Under its influence Acts and Peter's Epistles were considered not genuine, but documents designed to patch up the disagreement between Peter and Paul. The other extreme is to deny any Pauline influence on Peter or of Peter on Paul. Paul was friendly to Peter (Ga 1:18), but was independent of his ecclesiastical authority ( $\mathrm{Ga} 2: 1-10$ ) and Peter championed Paul's cause in the Jerusalem Conference (Ac 15:7-13 ). Peter was certainly not a Judaizer (Ac 11:1-18), in spite of his temporary defection in Antioch. Undoubtedly Peter was won back to cordial relations with Paul if any confidence can be placed in $2 \mathrm{Pe} 3: 15 \mathrm{f}$. There is no reason for doubting that Peter was familiar with some of Paul's Epistles as there indicated. There is some indication of Peter's use of Romans and Ephesians in this Epistle. It is not always conclusive to find the same words and even ideas which are not formally quoted, because there was a Christian vocabulary and a body of doctrinal ideas in common though with personal variations in expression. Peter may have read James, but not the Pastoral Epistles. There are points of contact with Hebrews which Von Soden considers sufficiently accounted for by the fact that Peter and the author of Hebrews were contemporaries.

THE PERSECUTION PICTURED IN THE EPISTLE
Peter himself knew what persecution was at the hands of the Sanhedrin and of Herod Agrippa I (both church and state). If First Peter was written A.D. 65, there was time enough for the persecution of Nero in Rome in A.D. 64 to spread to Asia Minor. The province easily imitated the capital city. Paul's life in the Acts and his Epistles abundantly show how early persecution arose in Asia Minor. The Apocalypse, written during the reign of Domitian, shows that persecution from the state had been on hand long before and was an old burden. We know too little of the history of Christianity in Asia Minor from A.D. 60 to 70 to deny that the fiery trials and suffering as a Christian ( $1 \mathrm{Pe} 4: 16$ ) can be true of this period. So we locate the persecution at this time as an echo from Rome.

## THE PLACE OF WRITING

Peter states that he is in Babylon (1Pe 5:13 ), apparently with his wife (1Co 9:5 ). It is not certain whether he means actual Babylon, where Jews had been numerous, or mystical Babylon (Rome) as in the Apocalypse. We do not know when Rome began to be called Babylon. It may have started as a result of Nero's persecution of the Christians after the burning of Rome. The Christians were called "evil-doers" (1Pe 2:12) in the time of Nero
(Tacitus, Ann. XV. 44). So we can think of Rome as the place of writing and that Peter uses "Babylon" to hide his actual location from Nero. Whether Peter came to Rome while Paul was still there we do not know, though John Mark was there with Paul (Col 4:10). "At the time when it was written Babylon had not yet unmasked all its terrors, and the ordinary Christian was not in immediate danger of the tunica ardens, or the red-hot iron chair, or the wild beasts, or the stake" (Bigg).

THE READERS
Peter writes "to the elect who are sojourners of the Dispersion in Pontus, Galatia, Cappadocia, Asia, and Bithynia" ( $1 \mathrm{Pe} 1: 1$ ). These five Roman provinces are naturally given from the standpoint of Babylon. In Galatia and Asia Paul had labored, though not all over these provinces. At any rate, there is no reason to wonder that Peter should himself work in the same regions where Paul had been. In a general way Paul and Peter had agreed on separate spheres of activity, Paul to the Gentiles and Peter to the Jews (Ga 21:7ff. ), though the distinction was not absolute, for Paul usually began his work in the Jewish synagogue. Probably the readers are mainly Jewish Christians. but not to the exclusion of Gentiles. Peter has clearly Paul's idea that Christianity is the true Judaism of God's promise (1Pe 2:4-10)

THE PURPOSE
Evidently Peter's object is to cheer and strengthen the Christians in these five provinces who are undergoing fiery trials ( $1 \mathrm{Pe} 1: 7 \mathrm{f}$. ). There is every reason why Peter, as the leading apostle to the circumcision, should write to these believers in the provinces, especially since Paul's long imprisonment in Caesarea and Rome had removed him from his accustomed activities and travel.

## THE STYLE AND VOCABULARY

Like Peter's discourses in the Acts, the Epistle is mainly hortatory, with a minimum of argument and little of the closely knit reasoning seen in Romans. There is frequent use of the LXX and the Greek is decent Koine with little of the uncouth Aramaic of the Galilean (Mt 26:73 ), or of the vernacular Koine as seen in the papyri or in II Peter (Ac 4:13). This fact may be accounted for by the help of Silvanus as amanuensis. There are sixty-two words in the Greek of the Epistle not occurring elsewhere in the N.T. There is verbal iteration as in II Peter. "One idea haunts the whole Epistle; to the author, as to the patriarch Jacob, life is a pilgrimage; it is essentially an old man's view" (Bigg). But it is an old man who has lived long with Christ. Peter has learned the lesson of humility and patience from Jesus his Lord.

## 1 Peter 1

## 1Pet 1:1

Peter (Пятроऽ). Greek form for the Aramaic (Chaldaic) X $\eta \varphi \alpha \varsigma$, the nickname given Simon by Jesus when he first saw him (Joh 1:42) and reaffirmed in the Greek form on his great confession (Mt 16:18), with an allusion to $\pi \varepsilon \tau \rho \alpha$, another form for a rock, ledge, or cliff. In $2 \mathrm{Pe} 1: 1$ we have both $\Sigma \mu \omega \nu$ and $\Pi \varepsilon \tau \rho \circ \varsigma$. Paul in his Epistles always terms himself Paul, not Saul. So Peter uses this name, not Cephas or Simon, because he is writing to Christians scattered over Asia Minor. The nominative absolute occurs here as in Jas 1:1, but without $\chi$ alpsıv as there, the usual form of greeting in letters (Ac 23:26) so common in the papyri.

An apostle of Jesus Christ ( $\alpha \pi о \sigma \tau о \lambda$ оc I I $\sigma o v \mathrm{X} \rho \iota \sigma \tau 0 v$ ). This is his official title, but in 2 Pe 1:1 $\delta$ ou入os is added, which occurs alone in Jas 1:1. In II and III John we have only o $\pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho \circ \varsigma$ (the elder), as Peter terms himself $\sigma \cup v \pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho о \varsigma$ in $1 \mathrm{Pe} 5: 1$. Paul's usage varies greatly: only the names in I and II Thessalonians, the title a $\quad$ ooto fended in Galatians and Romans as also in I and II Corinthians and Colossians and Ephesians and II Timothy with "by the will of God" added, and in I Timothy with the addition of "according to the command of God." In Philippians Paul has only "סou入os (slave) Xpıбтои In $\sigma o v$, ," like James and Jude. In Romans and Titus Paul has both $\delta o u \lambda o \varsigma$ and $\alpha \pi о \sigma \tau о \lambda o \varsigma$, like II Peter, while in Philemon he uses only $\delta \varepsilon \sigma \mu \ldots \varsigma$ (prisoner) I $\eta \sigma o v$ X $\rho ı \sigma \tau o u$.

To the elect ( $\varepsilon \kappa \lambda \varepsilon \kappa \tau о \iota \varsigma)$. Without article (with the article in Mt 24:22,24,31) and dative case, "to elect persons" (viewed as a group). Bigg takes $\varepsilon \kappa \lambda \varepsilon \kappa \tau$ тos (old, but rare verbal adjective from $\varepsilon \kappa \lambda \varepsilon \gamma \omega$, to pick out, to select) as an adjective describing the next word, "to elect so-
 $\kappa \lambda \eta \tau \mathrm{o}$ (called) and $\varepsilon \kappa \lambda \varepsilon \kappa \tau \circ$ (chosen) in Mt 22:14.

Who are sojourners ( $\pi \alpha \rho \varepsilon \pi \iota \delta \eta \mu o \iota$ ). Late double compound adjective ( $\pi \alpha \rho \alpha$, $\varepsilon \pi \downarrow \delta \eta \mu \circ \cup v \tau \varepsilon \varsigma$, Ac 2:10, to sojourn by the side of natives), strangers sojourning for a while in a particular place. So in Polybius, papyri, in LXX only twice (Ge 23:4; 38 or 39 12), in N.T. only here, $2: 11$; Heb 11:13. The picture in the metaphor here is that heaven is our native country and we are only temporary sojourners here on earth.

Of the Dispersion ( $\delta$ ıббтораৎ). See Joh 7:35 for literal sense of the word for scattered (from $\delta \iota a \sigma \pi \varepsilon \iota \rho \omega$, to scatter abroad, Ac 8:1 ) Jews outside of Palestine, and Jas 1:1 for the sense here to Jewish Christians, including Gentile Christians (only N T. examples). Note absence of the article, though a definite conception (of the Dispersion). The Christian is a pilgrim on his way to the homeland. These five Roman provinces include what we call Asia Minor north and west of the Taurus mountain range (Hort). Hort suggests that the order here suggests that Silvanus (bearer of the Epistle) was to land in Pontus from the Euxine Sea, proceed through Galatia, Cappadocia, Asia, to Bithynia, where he would re-embark for

Rome. This, he holds, explains the separation of Pontus and Bithynia, though the same province. Only Galatia and Asia are mentioned elsewhere in the N.T. as having Christian converts, but the N.T. by no means gives a full account of the spread of the Gospel, as can be judged from Col 1:6,23.

1Pet 1:2
According to (ката). Probably to be connected with $\varepsilon \kappa \lambda \varepsilon \kappa \tau о \iota \varsigma ~ r a t h e r ~ t h a n ~ w i t h ~$ a $\pi$ обто入os in spite of a rather loose arrangement of words and the absence of articles in verses 1,2.

The foreknowledge ( $\pi \rho \sigma \gamma \nu \omega \sigma \tau v$ ). Late substantive (Plutarch, Lucian, papyri) from $\pi \rho о \gamma \iota \nu \omega \sigma \kappa \omega$ ( 1:20), to know beforehand, only twice in N.T. (here and Ac 2:23 in Peter's sermon). In this Epistle Peter often uses substantives rather than verbs (cf. Ro 8:29).

Of God the Father ( $\theta$ عov $\pi \alpha \tau \rho \circ \varsigma)$. Anarthous again and genitive case. See $\pi \alpha \tau \eta \rho$ applied to God also in 1:3,17 as often by Paul (Ro 1:7, etc.). Peter here presents the Trinity (God the Father, the Spirit, Jesus Christ).

In sanctification of the Spirit ( $\varepsilon v a \gamma \iota \sigma \sigma \mu \omega \pi v \varepsilon \nu \mu \alpha \tau \sigma \varsigma)$. Clearly the Holy Spirit, though anarthrous like $\theta$ عou $\pi \alpha \tau \rho \circ \varsigma . ~ L a t e ~ w o r d ~ f r o m ~ \alpha \gamma ı \alpha \zeta \omega$, to render holy ( $\alpha \gamma \ldots \varsigma$ ), to consecrate, as in 1Th 4:7. The subjective genitive here, sanctification wrought by the Spirit as in 2 Th 2:13 (where the Trinity mentioned as here).

Unto obedience ( $\varepsilon \varsigma \varsigma ~ v \pi \alpha к о \eta v) . ~ O b e d i e n c e ~(f r o m ~ v \pi а к о v \omega, ~ t o ~ h e a r ~ u n d e r, ~ t o ~ h e a r k e n) ~$ to the Lord Jesus as in 1:22 "to the truth," result of "the sanctification."

And sprinkling of the blood of Jesus Christ ( $\rho \alpha \tau_{\tau}$ substantive from $\rho a v \tau \iota \zeta \omega$, to sprinkle (Heb 9:13) , a word used in the LXX of the sacrifices ( Nu 19:9,13,20 , etc.), but not in any non-biblical source so far as known, in N.T. only here and Heb 12:24 (of the sprinkling of blood). Reference to the death of Christ on the Cross and to the ratification of the New Covenant by the blood of Christ as given in Heb 9:19f.; 12:24 with allusion to Ex 24:3-8. Paul does not mention this ritual use of the blood of Christ, but Jesus does (Mt 26:28; Mr 14:24). Hence it is not surprising to find the use of it by Peter and the author of Hebrews. Hort suggests that Peter may also have an ulterior reference to the blood of the martyrs as in Re 7:14f.; 12:11, but only as illustration of what Jesus did for us, not as having any value. The whole Epistle is a commentary upon $\pi \rho \circ \gamma v \omega \sigma \iota, \theta \varepsilon o v$,

Be multiplied ( $\pi \lambda \eta \theta \nu v \theta \varepsilon ı \eta$ ). First aorist passive optative (volitive) of $\pi \lambda \eta \theta \nu v \omega$, old verb (from $\pi \lambda \eta \theta v \varsigma$, fulness), in a wish. So in $2 \mathrm{Pe} 1: 2$; Jude 1:2, but nowhere else in N.T. salutations. Grace and peace ( $\chi \alpha \rho ı \varsigma ~ к \alpha ~ \varepsilon ı \rho \eta \nu \eta)$ occur together in 2Pe 1:2, in 2Jo 1:2 (with $\varepsilon \lambda \varepsilon \sigma \varsigma)$, and in all Paul's Epistles (with $\varepsilon \lambda \varepsilon o \varsigma$ added in I and II Timothy).

1Pet 1:3

Blessed be ( $\varepsilon \nu \lambda о ү \eta \tau \circ \varsigma)$. No copula in the Greek ( $\varepsilon \sigma \tau \omega$, let be, or $\varepsilon \sigma \tau \iota \nu$, is, or $\varepsilon ı \eta$, may be). The verbal adjective (from $\varepsilon v \lambda o \gamma \varepsilon \omega$ ) occurs in the N.T. only of God, as in the LXX (Lu 1:68). See also 2Co 1:3; Eph 1:3.

The God and Father of our Lord Jesus Christ (o $\theta \varepsilon \circ \varsigma \kappa \alpha \pi \alpha \tau \eta \rho$ тоv кирıо $\eta \mu \omega \nu$ I $\eta \sigma o v$ X $\rho \iota \sigma \tau 0 v$ ). This precise language in 2Co 1:3; Eph I:3 ; and part of it in 2Co 11:31; Ro 15:6 . See Joh 20:17 for similar language by Jesus.

Great ( $\pi 0 \lambda v$ ). Much.
Begat us again ( $\alpha v \alpha \gamma \varepsilon \nu \nu \eta \sigma \alpha \varsigma \eta \mu \alpha \varsigma$ ). First aorist active articular (o, who) participle of avaүعvva $\omega$, late, and rare word to beget again, in Aleph for Sirach (Prol. 20), in Philo, in Hermetic writings, in N.T. only here and verse 23. "It was probably borrowed by the New Paganism from Christianity" (Bigg). The Stoics used $\alpha \nu \alpha \gamma \varepsilon \nu \nu \eta \sigma \iota \varsigma$ for $\pi \alpha \lambda \iota \gamma \varepsilon v \varepsilon \sigma \iota \alpha$ (Tit 3:5 ). If $\alpha v \omega \theta \varepsilon v$ in Joh 3:3 be taken to mean "again," the same idea of regeneration is there, and if "from above" it is the new birth, anyhow.

Unto a living hope ( $\varepsilon \iota \varepsilon \lambda \pi \iota \delta \alpha \zeta \omega \sigma \alpha v$ ). Peter is fond of the word "living" (present active participle of $\zeta \alpha \omega)$ as in $1: 23 ; 2: 4,5,24 ; 4: 5,6$. The Pharisees cherished the hope of the resurrection (Ac 23:6), but the resurrection of Jesus gave it proof and permanence (1Co 15:14,17 ). It is no longer a dead hope like dead faith (Jas 2:17,26 ). This revival of hope was wrought "by the resurrection of Jesus Christ" ( $\delta ı \alpha \alpha \nu \alpha \sigma \tau \alpha \sigma \varepsilon \omega \varsigma)$. Hope rose up with Christ from the dead, though the disciples (Peter included) were slow at first to believe it.

1Pet 1:4
Unto an inheritance ( $\varepsilon \iota \varsigma \kappa \lambda \rho о \nu о \mu \iota \alpha v$ ). Old word (from $\kappa \lambda \eta \rho о \nu о \mu \circ \varsigma$, heir) for the property received by the heir ( Mt 21:38) , here a picture of the blessedness in store for us pilgrims (Ga 3:18) .

Incorruptible ( $\alpha \varphi \theta \alpha \rho \tau o v$ ). Old compound adjective (alpha privative and $\varphi \theta \varepsilon \iota \rho \omega$, to corrupt), imperishable. So many inheritances vanish away before they are obtained.

Undefiled ( $\alpha \mu \mathrm{L} \alpha \nu \tau \sigma v$ ). Old verbal adjective (note alliteration) from alpha privative and $\mu \iota \downarrow \nu \omega$, to defile, without defect or flaw in the title, in N.T. only here, Jas 1:27; Heb 13:4.

That fadeth not away ( $\alpha \mu \alpha \rho \alpha v \tau o v$ ). Alliterative and verbal adjective again from alpha privative and $\mu \alpha \rho a \iota \omega \omega$ (to dry up, to wither, as in Jas 1:11), late and rare word in several inscriptions on tombs, here only in N.T. These inscriptions will fade away, but not this inheritance in Christ. It will not be like a faded rose.

Reserved ( $\tau \varepsilon \tau \eta \rho \eta \mu \varepsilon v \eta v$ ). Perfect passive participle of $\tau \eta \rho \varepsilon \omega$, old verb, to take care of, to guard. No burglars or bandits can break through where this inheritance is kept (Mt 6:19f.; Joh 17:11f. ). Cf. Col 1:5, where laid away" ( $\alpha \pi о \kappa \varepsilon \iota \mu \varepsilon \nu \eta v$ ) occurs.

For you ( $\varepsilon เ \varsigma \nu \mu \varsigma)$. More graphic than the mere dative.
1Pet 1:5
By the power of God ( $\varepsilon v \delta v v a \mu \varepsilon \theta \varepsilon o v)$. No other $\delta v v a \mu ı$ (power) like this (Col 1:3).

Are guarded ( $\varphi \rho$ oupovacvouc). Present (continuous process) passive articular (тov¢) participle of $\varphi \rho \circ$ ov $\varepsilon \omega$, to garrison, old verb (from $\varphi \rho o u \rho o \varsigma ~ s e n t i n e l), ~ a ~ m i l i t a r y ~ t e r m ~(A c ~$ 9:24; 2Co 11:32 ), used of God's love (Php 4:7) as here. "The inheritance is kept; the heirs are guarded" (Bengel).

Through faith ( $\delta \iota \alpha \pi / \sigma \tau \varepsilon \omega \varsigma$ ). Intermediate agency ( $\delta \iota \alpha$ ), the immediate being ( $\varepsilon v$, in, by) God's power.

Unto a salvation ( $\varepsilon ı \varsigma \omega \tau \eta \rho ı \alpha v$ ). Deliverance is the goal ( $\varepsilon \iota \varsigma$ ) of the process and final salvation here, consummation as in 1Th 5:8, from $\sigma \omega \tau \eta \rho$ (Saviour, from $\sigma \omega \zeta \omega$, to save).

Ready ( $\varepsilon \tau o \not \mu \eta \nu)$. Prepared awaiting God's will (Ga 3:23; Ro 8:18).
To be revealed ( $\alpha \pi о \kappa \alpha \lambda \nu \varphi \theta \eta \nu \alpha)$. First aorist passive infinitive of $\alpha \pi о \kappa \alpha \lambda \nu \pi \tau \omega$, to unveil. Cf. Col 3:4 for $\varphi$ avepo $\omega$ (to manifest) in this sense.

In the last time ( $\varepsilon \nu \kappa \alpha \mu \rho \omega \varepsilon \sigma \chi \alpha \tau \omega)$. This precise phrase nowhere else, but similar ones in Joh 6:39; Ac 2:17; Jas 5:3; 2 Ti 3:1; 2Pe 3:3; He 1:2; Jude 1:18; 1Jo 2:18. Hort translates it here "in a season of extremity," but it is usually taken to refer to the Day of Judgment. That day no one knows, Jesus said.

1Pet 1:6
Wherein $(\varepsilon v \omega)$. This translation refers the relative $\omega$ to $\kappa \alpha \iota \rho \omega$, but it is possible to see a reference to Xpıбтov (verse 3) or to $\theta$ vov (verse 5) or even to the entire content of verses $3-5$. Either makes sense, though possibly kaıp $\omega$ is correct.

Ye greatly rejoice ( $\alpha \gamma \alpha \lambda \lambda_{1} \alpha \sigma \theta \varepsilon$ ). Present middle indicative (rather than imperative) of $\alpha \gamma \alpha \lambda \lambda \iota \propto о \mu \alpha$, late verb from $\alpha \gamma \alpha \lambda \lambda о \mu \alpha$, to rejoice, only in LXX, N.T., and ecclesiastical literature as in Mt 5:12 .
 Mr 6:31, though it can be used of space (to a small extent) as in Lu 5:3 .

If need be ( $\varepsilon \delta \varepsilon \sigma v$ ). Present active neuter singular participle of $\delta \varepsilon$ (it is necessary). Some MSS. have $\varepsilon \sigma \tau \iota v$ after $\delta \varepsilon o v$ (periphrastic construction). Condition of first class.

Though ye have been put to grief ( $\lambda \nu \pi \eta \theta \varepsilon \nu \tau \varepsilon \varsigma)$. First aorist passive participle (concessive circumstantial use) of $\lambda \cup \pi \varepsilon \omega$, to make sorrowful (from $\lambda \nu \pi \eta$, sorrow), old and common verb. See 2Co 6:10 .

In manifold temptations ( $\varepsilon v$ токкıдоья $\pi \varepsilon ь \rho а \sigma \mu о ь \varsigma) . ~ J u s t ~ t h e ~ p h r a s e ~ i n ~ J a s ~ 1: 2, ~ w h i c h ~$ see for discussion. "Trials" clearly right here as there. Seven N.T. writers use тогклоৎ (varied).

1Pet 1:7
The proof of your faith ( $\tau$ о $\delta о к ı \mu \circ v \nu \mu \omega \nu \tau \eta \varsigma \pi \mid \sigma \tau \varepsilon \omega \varsigma$ ). The identical phrase in Jas 1:3 and probably derived from there by Peter. See there for discussion of to סокцноv (the test or touchstone of faith).

Being more precious ( $л о \lambda \nu \tau \iota \mu о \tau \varepsilon \rho о v)$. No word for "being" (ov) in the Greek. The secondary uncials have $\pi о \lambda \nu \tau \tau \mu \omega \tau \varepsilon \rho \circ v$. The text is the comparative of $\pi \sigma \lambda \nu \tau \tau \mu \sigma \varsigma$, late adjective (Plutarch) from $\pi 0 \lambda v$ and $\tau \mu \mu \eta$ (of great price) as in Mt 13:46 .

Than gold ( $\chi \rho v \sigma \iota o v$ ). Ablative case after the comparative adjective.
That perisheth ( $\tau 0 v \alpha \pi o \lambda \lambda \nu \mu \varepsilon v o v$ ). Present middle articular participle of $\alpha \pi \sigma \lambda \lambda \nu \mu$ to destroy. Even gold perishes (wears away).

Though it is proved by fire ( $\delta \iota \alpha \pi \nu \rho о \varsigma \delta \varepsilon \delta о к \iota \mu \zeta о \mu \varepsilon v o v$ ). Present passive articular participle (in the ablative like $\chi \rho v \sigma \iota o v)$ of $\delta о к \iota \mu \zeta \omega$ (common verb for testing metals) with $\delta \varepsilon$, which gives a concessive sense to the participle. Faith stands the test of fire better than gold, but even gold is refined by fire.

That might be found ( $\imath v \alpha \varepsilon v \rho \varepsilon \theta \eta$ ). Purpose clause with $\tau v \alpha$ and the first aorist passive subjunctive of $\varepsilon \cup \rho \iota \sigma \kappa \omega$, common verb, to find. As in $2 \mathrm{Pe} 3: 14$, this is the result of the probation by God as the Refiner of hearts.

Unto praise and glory and honour ( $\left.\varepsilon \iota \varsigma \varepsilon \pi \alpha ı v o v \kappa \alpha \delta_{\circ} \xi \alpha \nu \kappa \alpha \tau \iota \mu \nu\right)$. Here probably both to God and man in the result. Cf. Mt 5:11f.; Ro 2:7,10; 1Ti 1:17.

At the revelation of Jesus Christ ( $\varepsilon v \alpha \pi о \kappa \alpha \lambda v \psi \varepsilon$ I $\eta \sigma o v$ X $\rho \iota \sigma \tau o v)$. So also in 1:13; 4:13; 2Th 1:7; 1Co 1:7; Lu 17:30 of the second coming of Christ as the Judge and Rewarder (Bigg).

1Pet 1:8
Whom (ov). Relative referring to Christ just before and accusative case, object of both ı $\delta o v \tau \varepsilon \varsigma$ and $\alpha \gamma \alpha \pi \alpha \tau \varepsilon$ (ye love).

Not having seen (ouk $\delta \delta \nu \tau \varepsilon \varsigma)$. Second aorist active participle of opa $\omega$, to see, with ouk rather than $\mu \eta$ because it negatives an actual experience in contrast with $\mu \eta$ o $\omega \omega \nu \tau \varepsilon \varsigma$ (though not seeing, hypothetical case). On whom ( $\varepsilon \iota \varsigma)$ for "believing on" ( $\pi \iota \sigma \tau \varepsilon v \omega \varepsilon \iota \varsigma)$. It is possible that Peter here has in mind the words of Jesus to Thomas as recorded in Joh 20:29 ("Happy are those not seeing and yet believing"). Peter was present and heard the words of Jesus to Thomas, and so he could use them before John wrote his Gospel.

Ye rejoice greatly ( $\alpha \gamma \alpha \lambda \lambda_{\iota} \alpha \tau \varepsilon$ ). Same form as in verse 6, only active here instead of middle.

With joy ( $\chi \alpha \rho \alpha$ ). Instrumental case (manner).
Unspeakable ( $\alpha v \varepsilon \kappa \lambda \alpha \lambda \eta \tau \omega$ ). Late and rare double compound verbal (alpha privative and $\varepsilon \kappa \lambda \alpha \lambda \varepsilon \omega$ ), here only in N.T., in Dioscorides and Heliodorus, "unutterable," like Paul's "indescribable" ( $\alpha v \varepsilon \kappa \delta ı \eta \gamma \eta \tau о \varsigma)$ gift (2Co 9:15 , here alone in N.T.).

Full of glory ( $\delta \varepsilon \delta o \xi \alpha \sigma \mu \varepsilon \nu \eta$ ). Perfect passive participle of $\delta o \xi \alpha \zeta \omega$, to glorify, "glorified joy," like the glorified face of Moses (Ex 34:29ff.; 2Co 3:10 .

1Pet 1:9
 to get what is promised (5:4; Heb 10:36).

The end of your faith ( $\tau 0 \tau \varepsilon \lambda \circ \varsigma \tau \eta \varsigma \pi \iota \sigma \tau \varepsilon \omega \varsigma$ ). The conclusion, the culmination of faith (2Co 3:13; Ro 2:21f.; 10:4 ). See Heb 12:2 of Jesus as "Pioneer and Perfecter of Faith."

Even the salvation of your souls ( $\sigma \omega \tau \eta \rho \iota \alpha v \psi v \chi \omega v$ ). No "even" in the text, just the accusative of apposition with $\tau \varepsilon \lambda o \varsigma$, viz., final salvation.

1Pet 1:10
Concerning which salvation ( $\pi \varepsilon \rho \eta \varsigma \sigma \omega \tau \eta \rho \iota \alpha \varsigma)$. Another relative clause (taking up $\sigma \omega \tau \eta \rho \iota \alpha$ from verse 9 and incorporating it) in this long sentence (verses 3-12, inclusive, all connected by relatives). Peter lingers over the word $\sigma \omega \tau \eta \rho ⿺ \alpha$ (salvation) with something new to say each time (Bigg). Here it is the general sense of the gospel of grace.

Sought ( $\varepsilon \xi \varepsilon \zeta \eta \tau \eta \sigma \alpha v)$. First aorist active indicative of $\varepsilon \kappa \zeta \eta \tau \varepsilon \omega$, to seek out (Ac 15:17) , late and rare compound, only in LXX and N.T. save once in Aristides.

Searched diligently ( $\varepsilon \xi \eta \rho \alpha v \nu \eta \sigma \alpha \nu$ ). First aorist active indicative of $\varepsilon \xi \varepsilon \rho \alpha \nu v \alpha \omega$, old and common compound ( $\varepsilon \xi \varepsilon \rho \varepsilon v v \alpha \omega$ ), to search out diligently, here only in N.T. Both of these words occur together in I Macc. 9:26.

Of the grace that should come unto you ( $\pi \varepsilon \rho \tau \eta \varsigma \varepsilon \iota \varsigma \nu \mu \varsigma \chi \alpha \rho ı \tau о \varsigma)$. "Concerning the for you grace" (meant for you).

1Pet 1:11
Searching ( $\varepsilon \rho \alpha v \nu \omega \nu \tau \varepsilon \varsigma)$. Present active participle of $\varepsilon \rho \alpha v \nu \alpha \omega$, late form for older $\varepsilon \rho \varepsilon \cup v a \omega$ (both in the papyri), uncompounded verb (Joh 7:52 ), the compound occurring in verse 10 above.
 (qualitative interrogative) kept here as in 1Co 15:35, Ro 3:27, though it is losing its distinctive sense from tıৎ (Ac 23:34). The prophets knew what they prophesied, but not at what time the Messianic prophecies would be fulfilled.

The Spirit of Christ which was in them ( $\tau \circ \varepsilon \nu \alpha v \tau o \iota \varsigma \pi v \varepsilon \nu \mu \alpha$ X $\rho เ \sigma \tau \circ v$ ). Peter definitely asserts here that the Spirit of Jesus Christ (the Messiah) was in the Old Testament prophets, the Holy Spirit called the Spirit of Christ and the Spirit of God (Ro 8:9), who spoke to the prophets as he would speak to the apostles (Joh 16:14).

Did point unto $(\varepsilon \delta \eta \lambda o v)$. Imperfect active of $\delta \eta \lambda o \omega$, to make plain, "did keep on pointing to," though they did not clearly perceive the time.

When it testified beforehand ( $\pi \rho \circ \mu \alpha \rho \tau \nu \rho o \mu \varepsilon v o v)$. Present middle participle of $\pi \rho о \mu \alpha \rho \tau \cup \rho о \mu \alpha$, a late compound unknown elsewhere save in a writer of the fourteenth century (Theodorus Mech.) and now in a papyrus of the eighth. It is neuter here because $\pi \nu \varepsilon v \mu \alpha$ is neuter, but this grammatical gender should not be retained as "it" in English, but should be rendered "he" (and so as to Ac 8:15 ). Here we have predictive prophecy concerning the Messiah, though some modern critics fail to find predictions of the Messiah in the Old Testament.

The sufferings of Christ ( $\tau \alpha \varepsilon \iota \varsigma$ X $\_\sigma \tau о v \pi \alpha \theta \eta \mu \alpha \tau \alpha$ ). "The sufferings for (destined for) Christ" like the use of $\varepsilon \iota \varsigma$ in verse 10 ( $\varepsilon \iota \varsigma \nu \mu a \varsigma$ for you).

The glories that should follow them ( $\tau \alpha \varsigma \mu \varepsilon \tau \alpha \tau \alpha \cup \tau \alpha \delta о \xi \alpha \varsigma)$. "The after these things (sufferings) glories." The plural of $\delta 0 \xi \alpha$ is rare, but occurs in Ex 15:11; Ho 9:11 . The glories of Christ followed the sufferings as in 4:13; 5:1,6 .

1Pet 1:12
To whom (oıs). Dative plural of the relative pronoun. To the prophets who were seeking to understand. Bigg observes that "the connexion between study and inspiration is a great mystery." Surely, but that is no argument for ignorance or obscurantism. We do the best that we can and only skirt the shore of knowledge, as Newton said.

It was revealed ( $\alpha \pi \varepsilon \kappa \alpha \lambda \nu \varphi \theta \eta$ ). First aorist passive indicative of $\alpha \pi о \kappa \alpha \lambda \nu \pi \tau \omega$, old verb, to reveal, to unveil. Here is revelation about the revelation already received, revelation after research.

Did they minister ( $\delta \iota \eta \kappa о v o v v$ ). Imperfect active of $\delta \iota \alpha \kappa о v \varepsilon \omega$, old verb, to minister, "were they ministering."

Have been announced ( $\alpha \nu \eta \gamma \gamma \varepsilon \lambda \eta$ ). Second aorist passive indicative of anaggello , to report, to bring back tidings (Joh 4:25).
Through them ( $\delta \iota \alpha \tau \omega v$ ). Intermediate agent ( $\delta \iota \alpha$ ), "the gospelizers" ( $\tau \omega v$ $\varepsilon v a \gamma \gamma \varepsilon \lambda_{\iota} \sigma \alpha \mu \varepsilon v \omega v$, articular first aorist middle participle of $\varepsilon v a \gamma \gamma \varepsilon \lambda_{l} \zeta \omega$, to preach the gospel).

By the Holy Ghost ( $\pi v \varepsilon \nu \mu \alpha \tau \alpha \gamma \omega)$. Instrumental case of the personal agent, "by the Holy Spirit" (without article).

Sent forth from heaven ( $\alpha \pi \sigma \sigma \tau \alpha \lambda \varepsilon v \tau)$. Second aorist passive participle of $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$ in instrumental case agreeing with $\pi \nu \varepsilon v \mu \alpha \tau \alpha \gamma \omega$ (the Spirit of Christ of verse 11.

Desire ( $\varepsilon \pi \imath \theta \nu \mu \circ v \sigma \iota v$ ). Eagerly desire (present active indicative of $\varepsilon \pi \downarrow \theta \nu \mu \varepsilon \omega$, to long for).

To look into ( $\pi \alpha \rho \alpha \kappa v \psi \alpha$ ). First aorist active infinitive of $\pi \alpha \rho \alpha \kappa и \pi \tau \omega$, old compound to peer into as in Lu 24:12; Joh 20:5,11; Jas 1:25, which see. For the interest of angels in the Incarnation see Lu 2:13f .

1Pet 1:13
Wherefore ( $\delta$ ıo). "Because of which thing," the glorious free grace opened for Gentiles and Jews in Christ (verses 3-12).

Girding up ( $\alpha v \alpha \zeta \omega \sigma \alpha \mu \varepsilon v o$ ). First aorist middle participle of $\alpha v \alpha \zeta \omega v v \nu \mu$, late and rare verb (Jud 18:16; Pr 29:35; 31:17), here only in N.T., vivid metaphor for habit of the Orientals, who quickly gathered up their loose robes with a girdle when in a hurry or starting on a journey.

The loins ( $\tau \alpha \varsigma$ oб $\varphi \cup \alpha \varsigma)$. Old word for the part of the body where the girdle ( $\zeta \omega v \eta$ ) was worn. Metaphor here as in Lu 12:35; Eph 6:14.

Mind ( $\delta$ ıovotaৎ). Old word for the faculty of understanding, of seeing through a thing ( $\delta \operatorname{la}, \operatorname{vos} \omega$ ) as in Mt 22:37 .

Be sober (v $\eta \varphi \circ \vee \tau \varepsilon \varsigma)$ ) "Being sober" (present active participle of $v \eta \varphi \omega$, old verb, but in N.T. always as metaphor ( 1 Th 5:6,8, etc., and so in 4:7).

Perfectly ( $\tau \varepsilon \lambda \varepsilon \omega \omega \varsigma$ ). Adverb, old word (here alone in N.T.), from adjective $\tau \varepsilon \lambda \varepsilon เ o \varsigma$ (perfect), connected with $\varepsilon \lambda \pi \iota \sigma \alpha \tau \varepsilon$ (set your hope, first aorist active imperative of $\varepsilon \lambda \pi \iota \zeta \omega$ ) in the Revised Version, but Bigg, Hort, and most modern commentators take it according to Peter's usual custom with the preceding verb, vŋүovteৎ ("being perfectly sober," not "hope perfectly").

That is to be brought ( $\tau \eta \nu \varphi \varepsilon \rho о \mu \varepsilon \nu \eta \nu$ ). Present passive articular participle of $\varphi \varepsilon \rho \omega$, picturing the process, "that is being brought." For "revelation" ( $\alpha \pi о \kappa \alpha \lambda \nu \psi \varepsilon$ ) see end of verse 7.

1Pet 1:14
As children of obedience ( $\omega \varsigma \tau \varepsilon \kappa v \alpha$ vтакопऽ). A common Hebraism (descriptive genitive frequent in LXX and N.T., like vıo $\tau \eta \varsigma \alpha \pi \varepsilon \theta \varepsilon ı \alpha \varsigma$, children of disobedience, in Eph 2:2 ) suggested by vтакопv in verse 2 , "children marked by obedience."

Not fashioning yourselves ( $\mu \eta \sigma v v \sigma \chi \eta \mu \alpha \tau \iota \zeta \rho \mu v o$ ). Usual negative $\mu \eta$ with the participle (present direct middle of $\sigma \cup v \sigma \chi \eta \mu \alpha \tau \iota \zeta \omega$, a rare (Aristotle, Plutarch) compound ( $\sigma 0 v$, $\sigma \chi \eta \mu \alpha \tau \iota \zeta \omega$, from $\sigma \chi \eta \mu \alpha$ from $\varepsilon \chi \omega$ ), in N.T. only here and Ro 12:2 (the outward pattern in contrast with the inward change $\mu \varepsilon \tau \alpha \mu о \rho \varphi о \omega)$. See Php 2:6f. for contrast between $\sigma \chi \eta \mu \alpha$ (pattern) and $\mu \circ \rho \varphi \eta$ (form).

According to your former lusts ( $\tau \alpha \iota \varsigma \pi \rho о \tau \varepsilon \rho \circ v \varepsilon \pi \imath \theta \nu \mu \iota \alpha \iota \varsigma)$. Associative instrumental case after $\sigma \cup v \sigma \chi \eta \mu \alpha \tau \iota \zeta о \mu \varepsilon v o$ and the bad sense of $\varepsilon \pi \iota \theta \nu \mu \boldsymbol{\alpha}$ as in 4:2; 2Pe 1:4; Jas 1:14f.

In the time of your ignorance ( $\varepsilon v \tau \eta \alpha \gamma v o l \alpha \nu \mu \omega v$ ). "In your ignorance," but in attributive position before "lusts." A $\gamma \operatorname{voo} \alpha$ (from $\alpha \gamma v o \varepsilon \omega$, to be ignorant) is old word, in N.T. only here, Ac 3:17; 17:30; Eph 4:18.

1Pet 1:15
But like as he which called you is holy ( $\alpha \lambda \lambda \alpha \kappa \alpha \tau \alpha$ тоv $\kappa \alpha \lambda \varepsilon \sigma \alpha v \tau \alpha \cup \mu \alpha \varsigma ~ \alpha \gamma ю v)$ ). This use of к $\alpha \tau \alpha$ is a regular Greek idiom (here in contrast with $\sigma u v \sigma \chi \eta \mu \alpha \tau \iota \zeta о \mu \varepsilon v o$ ). "But according to the holy one calling you or who called you" (first aorist articular participle of $\kappa \alpha \lambda \varepsilon \omega$, to call). God is our standard or pattern ( $\kappa \alpha \tau \alpha$ ), not our lusts.

Be ye yourselves also holy ( $\kappa \alpha \alpha \cup \tau o ~ \alpha \gamma เ о ~ \gamma \varepsilon v \eta \theta \eta \tau \varepsilon$ ). First aorist (ingressive) passive imperative of $\gamma เ v o \mu \alpha$, to become with allusion ( $\kappa \alpha$ also) to ката (God as our example), "Do ye also become holy." For $\alpha v a \sigma \tau \rho o \varphi \eta$ (manner of life) see verse 18; 2:12; 3:1-16; Jas 3:13; 2Pe 2:7. Peter uses $\alpha v a \sigma \tau \rho o \varphi \eta$ eight times. The original meaning (turning up and down, back and forth) suited the Latin word conversatio (converto), but not our modern "conversation" (talk, not walk).

1Pet 1:16
Because it is written ( $\delta$ เо $\tau \varepsilon \gamma \rho \alpha \pi \tau \alpha$ ). "Because ( $\delta$ เo $\tau$ stronger than o $\tau$ below) it stands written" (regular formula for O.T. quotation, perfect passive indicative of $\gamma \rho \alpha \varphi \omega$ ). The
quotation is from Le 11:44; 19:2; 20:7. Reenforced by Jesus in Mt 5:48. The future $\varepsilon \sigma \varepsilon \sigma \theta \varepsilon$ here is volitive like an imperative.

1Pet 1:17
If ye call ( $\varepsilon \varepsilon \pi \kappa \kappa \alpha \lambda \varepsilon เ \sigma \theta \varepsilon)$. Condition of first class and present middle indicative of $\varepsilon \pi \iota \kappa \alpha \lambda \varepsilon \omega$, to call a name on, to name (Ac 10:18).

As Father ( $\pi \alpha \tau \varepsilon \rho \alpha$ ). Predicate accusative in apposition with $\tau 0 \nu-$-крıvovta.
Without respect of persons ( $\alpha \pi \rho \circ \sigma \omega \pi \sigma \lambda \eta \mu \pi \tau \omega \varsigma$ ). Found nowhere else except in the later Ep. of Clem. of Rome and Ep. of Barn., from alpha privative and $\pi \rho о \sigma \omega \pi о \lambda \eta \mu \pi \tau \eta \varsigma$ (Ac 10:34. See Jas 2:9 for $\pi \rho \circ \sigma \omega \pi \sigma \lambda \eta \mu \pi \tau \varepsilon \omega$ and 1:1 for $\pi \rho \circ \sigma \omega \pi \sigma \lambda \eta \mu \psi \stackrel{\alpha}{ }$ ) from $\pi \rho \circ \sigma \omega \pi \sigma \nu$ $\lambda \alpha \mu \beta \alpha v \omega$ (in imitation of the Hebrew).

According to each man's work ( $\kappa \alpha \tau \alpha$ то єкабтоv врүоv). "According to the deed of each one" God judges (крıvoviа) just as Christ judges also (2Co 5:10).

Pass ( $\alpha v a \sigma \tau \rho \alpha \varphi \eta \tau \varepsilon$ ). Second aorist passive imperative of $\alpha v \alpha \sigma \tau \rho \varepsilon \varphi \omega$, metaphorical sense as in 2Co 1:12; 2Pe 2:18.

The time ( $\tau 0 v \chi \rho \circ \vee o v$ ). Accusative case of extent of time.
Of your sojourning ( $\tau \eta \varsigma \pi \alpha \rho о \kappa \kappa \varsigma \varsigma \nu \mu \omega v$ ). A late word, found in LXX (Ps 119:5) and in N.T. only here and Ac 13:17 and in ecclesiastical writers (one late Christian inscription). It comes from $\pi \alpha \rho о к \varepsilon \omega$, old verb, to dwell beside (in one's neighbourhood), and so of pil-
 on earth, then of a local region (our "parish"). Peter here recurs to 1:1 ("sojourners of the Dispersion").

In fear $(\varepsilon v \varphi \circ \beta \omega)$. Emphatic position at beginning of the clause with $\alpha v a \sigma \tau \rho \alpha \varphi \eta \tau \varepsilon$ at the end.

1Pet 1:18
Knowing (عı $\delta$ ote¢). Second perfect active participle of ot $\delta a$, causal participle. The appeal is to an elementary Christian belief (Hort), the holiness and justice of God with the added thought of the high cost of redemption (Bigg).

Ye were redeemed $(\varepsilon \lambda \nu \tau \rho \omega \theta \eta \tau \varepsilon)$. First aorist passive indicative of $\lambda \nu \tau \rho o \omega$, old verb from $\lambda \cup \tau \rho o v$ (ransom for life as of a slave, Mt 20:28), to set free by payment of ransom, abundant examples in the papyri, in N.T. only here, Lu 24:21; Tit 2:14. The ransom is the blood of Christ. Peter here amplifies the language in Isa 52:3f .

Not with corruptible things (ov $\varphi \theta$ aptors). Instrumental case neuter plural of the late verbal adjective from $\varphi \theta \varepsilon \iota \rho \omega$ to destroy or to corrupt, and so perishable, in N.T. here, verse 23; 1 Co 9:25; 15:53f.; Ro 1:23. Apүv $\omega \omega \eta$ $\chi \rho v \sigma \omega \omega$ (silver or gold) are in explanatory apposition with $\varphi \theta$ aptoıs and so in the same case. Slaves were set free by silver and gold.

From your vain manner of life ( $\varepsilon \kappa \tau \eta \varsigma \mu \alpha \tau \alpha \alpha \varsigma \varsigma \mu \omega \nu$ avaбт $\rho о \varphi \eta \varsigma)$. "Out of" ( $\varepsilon \kappa$ ), and so away from, the pre-Christian avaбт $\rho \circ \varphi \eta$ of verse 15 , which was "vain" ( $\mu \alpha \tau \alpha a \alpha$. Cf. Eph 4:17-24 ).

Handed down from your fathers ( $\pi \alpha \tau \rho о \pi \alpha \rho \alpha \delta о \tau о v)$. This adjective, though predicate in position, is really attributive in idea, like $\chi \varepsilon \iota \rho о \pi о \iota \tau$ ои in Eph 2:11 (Robertson, Grammar, p. 777), like the French idiom. This double compound verbal adjective ( $\pi \alpha \tau \varepsilon \rho, \pi \alpha \rho \alpha, \delta ı \delta \omega \mu$ ), though here alone in N.T., occurs in Diodorus, Dion. Halic, and in several inscriptions (Moulton and Milligan's Vocabulary; Deissmann, Bible Studies, pp. 266f.). The Jews made a wrong use of tradition (Mt 15:2ff. ), but the reference here seems mainly to Gentiles (1Pe 2:12 ).

1Pet 1:19
But with precious blood ( $\alpha \lambda \lambda \alpha \tau \iota \mu \omega \alpha \mu \alpha \tau$ ). Instrumental case of $\alpha \mu \alpha$ after $\varepsilon \lambda v \tau \rho \omega \theta \eta \tau \varepsilon$ (repeated from verse 18). Peter here applies the old adjective $\tau \iota \mu \circ \varsigma$ (from $\tau \iota \mu \eta$, of Christ in 1Pe 2:7) to Christ as in 1:7 $\pi \boldsymbol{\sigma} \boldsymbol{\lambda} v \tau \iota \mu о \tau \varepsilon \rho o v$ to testing of faith. The blood of anyone is "precious" (costly), far above gold or silver, but that of Jesus immeasurably more so.

As of a lamb ( $\omega \varsigma$ a $\mu \nu 0 v$ ). This word occurs in Le 12:8; Nu 15:11; De 14:4 of the lamb prescribed for the passover sacrifice (Ex 12:5). John the Baptist applies it to Jesus (Joh 1:29,36 ). It occurs also in Ac 8:32 quoted from Isa 53:7f. Undoubtedly both the Baptist and Peter have this passage in mind. Elsewhere in the N.T. a $\rho v$ oov is used of Christ (Re $5: 6,12$ ). Jesus is the Paschal Lamb. Peter sees clearly that it was by the blood of Christ that we are redeemed from sin.

Without blemish $(\alpha \mu \omega \mu \circ v)$. Without (alpha privative) spot $(\mu \omega \mu \circ \varsigma)$ as the paschal lamb had to be (Le 22:21). So Heb 9:14 .

Without spot (a $\sigma \pi \iota \lambda o v$ ). Without (alpha privative) stain ( $\sigma \pi \iota \lambda o \varsigma$ spot) as in Jas 1:27; 2Pe 3:14; 1Pe 6:14.

Even the blood of Christ (X $\rho \iota \sigma \tau \sigma v$ ). Genitive case with $\alpha \mu \alpha \tau$, but in unusual position for emphasis and clearness with the participles following.

1Pet 1:20
Who was foreknown indeed ( $\pi \rho \sigma \varepsilon \gamma \nu \omega \sigma \mu \varepsilon v o v \mu \varepsilon \nu$ ). Perfect passive participle (in genitive singular agreeing with X $\rho \iota \sigma \tau \circ v$ ) of $\pi \rho \circ \nLeftarrow \iota \omega \sigma \kappa \omega$, old verb, to know beforehand (Ro 8:29; $2 \mathrm{Pe} 3: 17$ ). See $\pi \rho o \gamma \nu \omega \sigma \iota v \theta \varepsilon o v$ in verse 2.

Before the foundation of the world ( $\pi \rho \circ \kappa \alpha \tau \alpha \beta \circ \lambda \eta \varsigma \kappa о \sigma \mu о v$ ). This precise curious phrase occurs in Joh 17:24 in the Saviour's mouth of his preincarnate state with the Father as here and in Eph 1:4. We have ало катаßо入ŋऽ коб $\mu$ оv in Mt 25:34 (коб $\mu$ оv omitted in Mt 13:35); Lu 11:50; Heb 4:3; 9:26; Re 13:8; 17:8 . Ka $\alpha \alpha \beta$ о $\lambda$ (from $\kappa \alpha \tau \alpha \beta \alpha \lambda \lambda \omega$ ) was originally laying the foundation of a house (Heb 6:1). The preincarnate Messiah appears in the counsels of God also in 1Co 2:7; Col 1:26f.; Eph 1:9f.; 3:9-11; Ro 16:25; 1Ti 1:9.

But was manifested ( $\varphi a v \varepsilon \rho \omega \theta \varepsilon v \tau o \varsigma \delta \varepsilon$ ). First aorist (ingressive) passive participle of $\varphi \propto \vee \varepsilon \rho \omega$, referring to the Incarnation in contrast with the preexistence of Christ (cf. Joh 1:31; 1Jo 3:5,8 ).

At the end of the times ( $\varepsilon \pi^{\prime} \varepsilon \sigma \chi \alpha \tau o v \tau \omega \nu \chi \rho o v \omega \nu$ ). Like $\varepsilon \pi^{\prime} \varepsilon \sigma \chi \alpha \tau o v \tau \omega \nu \eta \mu \varepsilon \rho \omega \nu$ (Heb 1:2 ). The plural $\chi \rho o v o$, doubtless referring to successive periods in human history until the fullness of the time came ( $\mathrm{Ga} 4: 4$ ).

For your sake ( $\delta \iota^{\prime} v \mu a \varsigma$ ). Proof of God's love, not of their desert or worth (Ac 17:30f.; Heb 11:39f. ).

1Pet 1:21
Who through him are believers in God ( $\tau 0 v \varsigma \delta \iota^{\prime}$ av $\left.\tau о v \pi \iota \sigma \tau o v \varsigma \varepsilon \iota \varsigma ~ \theta \varepsilon o v\right)$. Accusative case in apposition with $v \mu a \varsigma$ (you), "the through him (that is Christ as in 1:8; Ac 3:16 ) believers ( $\pi \iota \sigma \tau$ ous correct text of A B) in God."

Which raised ( $\tau 0 v \varepsilon \gamma \varepsilon \rho \rho \nu \tau \alpha$ ). Accusative singular articular (agreeing with $\theta \varepsilon o v$ ) first aorist active participle of $\varepsilon \gamma \varepsilon \iota \rho \omega$ (cf. $\delta \iota^{\prime} \alpha v a \sigma \tau \alpha \sigma \varepsilon \omega \varsigma$ I $\eta \sigma o v$ in verse 3).

Gave glory to him ( $\delta o \xi \alpha v \alpha v \tau \omega \delta o v \tau \alpha$ ). Second aorist active participle of $\delta t \delta \omega \mu$ agreeing also with $\theta \varepsilon o v$. See Peter's speech in Ac 3:13 about God glorifying ( $\varepsilon \delta o \xi \alpha \sigma \varepsilon v$ ) Jesus and also the same idea by Peter in Ac 2:33-36; 5:31.

So that your faith and hope might be in God ( $\omega \sigma \tau \varepsilon \tau \eta \nu \pi \iota \sigma \tau \iota \nu \nu \mu \omega \nu \kappa \alpha \varepsilon \lambda \pi \iota \delta \alpha \varepsilon \iota$, $\theta \varepsilon \sigma v)$. H $\omega \sigma \tau \varepsilon$ with the infinitive ( $\varepsilon \imath \nu \alpha$ ) and the accusative of general reference ( $\pi \iota \sigma \tau \iota v \kappa \alpha$ $\varepsilon \lambda \pi \iota \delta \alpha)$ is used in the N.T. as in the Koine for either purpose (Mt 10:1) or usually result (Mr 4:37). Hence here result (so that is) is more probable than design.

1Pet 1:22
Seeing ye have purified ( $\eta \gamma \nu \iota \kappa о \tau \varepsilon \varsigma)$. Perfect active participle of $\alpha \gamma \nu \iota \omega$, old verb from $\alpha \gamma \vee o \varsigma$ (pure), here with $\psi v \chi a \varsigma$ (souls), with кар cleansing also. See the ceremonial sense of the word as in LXX in Joh 11:55; Ac 21:24,26; 24:18 .

In your obedience $(\varepsilon v \tau \eta \cup \pi \alpha \kappa о \eta)$. With repetition of the idea in $1: 2,14$ (children of obedience).

To the truth ( $\tau \eta \varsigma \alpha \lambda \varepsilon \theta \varepsilon ı \alpha \varsigma)$. Objective genitive with which compare Joh 17:17,19 about sanctification in the truth and 2Th 2:12 about believing the truth. There is cleansing power in the truth of God in Christ.

Unfeigned (avvтокрıтоv). Late and rare double compound, here alone in Peter, but see Jas $3: 17$; 2Co $6: 6$, etc. No other kind of $\varphi \iota \lambda \alpha \delta \varepsilon \lambda \varphi \iota \alpha$ (brotherly love) is worth having (1Th 4:9; Heb 13:1; 2Pe 1:7).

From the heart fervently ( $\varepsilon \kappa \kappa \alpha \rho \delta ı \alpha \varsigma \varepsilon \kappa \tau \varepsilon \nu \omega \varsigma$ ). Late adverb (in inscriptions, Polybius, LXX). The adjective $\varepsilon \kappa \tau \varepsilon \nu \eta \varsigma$ is more common ( $1 \mathrm{Pe} 4: 8$ ).

1Pet 1:23
Having been begotten again ( $\alpha v \alpha \gamma \varepsilon \gamma \varepsilon \nu \nu \eta \mu \varepsilon v o$ ). Perfect passive participle of $\alpha \nu \alpha \gamma \varepsilon \nu \nu \alpha \omega$, which see in verse 2 .

Not of corruptible seed (ovк $\varepsilon \kappa \sigma \pi о \rho \alpha \varsigma \varphi \theta \alpha \rho \tau \eta \varsigma)$. Ablative with $\varepsilon \kappa$ as the source, for $\varphi Ө \alpha \rho \tau о \varsigma$ see verse 18 , and $\sigma \pi о \rho a \varsigma$ (from $\sigma \pi \varepsilon ı \rho \omega$ to sow), old word (sowing, seed) here only in N.T., though $\sigma \pi о \rho о \varsigma$ in $\operatorname{Mr} 4: 26$. , etc. For "incorruptible" ( $\alpha \varphi \theta \alpha \rho \tau о v$ ) see verse $4 ; 3: 4$.

Through the word of God ( $\delta, \alpha$ $\lambda$ oүov $\theta \varepsilon o v$ ). See Jas $1: 18$ for "by the word of truth," verse 25 here, and Peter's use of $\lambda$ o $\gamma$ os in Ac 10:36. It is the gospel message.

Which liveth and abideth ( $\zeta \omega v \tau \circ \varsigma \kappa \alpha \mu \varepsilon \nu \circ \nu \tau \circ \varsigma)$. These present active participles (from $\zeta \alpha \omega$ and $\mu \varepsilon \nu \omega$ ) can be taken with $\theta \varepsilon o v$ (God) or with $\lambda o \gamma o v$ (word). In verse $25 \mu \varepsilon v \varepsilon$ is used with $\rho \eta \mu \alpha$ (word). Still in Da 6:26 both $\mu \varepsilon \nu \omega \nu$ and $\zeta \omega \nu$ are used with $\theta \varepsilon \sigma \varsigma$. Either construction makes sense here.

1Pet 1:24
24,25 Quotation from Isa 40:6-8 (partly like the LXX, partly like the Hebrew).
For $(\delta \iota o \tau)$. As in verse 16 ( $\delta ı \alpha$ and $o \tau$ ), "for that." So in 2:6. See a free use of this imagery about the life of man as grass and a flower in Jas 1:11. The best MSS. here read avtךร (thereof) after $\delta \circ \xi \alpha$ (glory) rather than $\alpha v \theta \rho \omega \pi$ ov (of man).

Withereth $(\varepsilon \xi \eta \rho \alpha v \theta \eta)$. First aorist (gnomic, timeless) passive indicative of $\xi \eta \rho a \iota v \omega$ (see Jas 1:11).

Falleth ( $\varepsilon \xi \varepsilon \pi \varepsilon \sigma \varepsilon v$ ). Second aorist (gnomic, timeless) active indicative of $\varepsilon \kappa \pi \iota \pi \tau \omega$ (see Jas 1:11 ). In verse 25 note $\varepsilon ı \varsigma ~ v \mu a \varsigma ~(u n t o ~ y o u) ~ l i k e ~ \varepsilon ı \varsigma ~ v \mu a \varsigma ~ i n ~ 1: 4 ~(v \mu ı v ~ d a t i v e) . ~$

## 1 Peter 2

1Pet 2:1
Putting away therefore ( $\alpha \pi \sigma \theta \varepsilon \mu \varepsilon v o$ ovv). Second aorist middle participle of $\alpha \pi о \tau \iota \theta \eta \mu$, old and common verb, in metaphorical sense either to cleanse defilements (3:21; Jas 1:21) or to put off clothing (Ro 13:12; Col 3:5ff.; Eph 4:22 ). Either sense suits here. Therefore (ouv) because of the new birth ( $1: 23$ ) and the new life demanded.

Wickedness (какıаv). This old word, from какоৎ (evil), in the ancients meant vice of any kind and note $\pi \alpha \sigma \alpha v$ (all) here.

Guile ( $\delta 0 \lambda o v$ ). Old word (from $\delta \varepsilon \lambda \omega$, to catch with bait), deceit.
Hypocrisies (ขтокрıбєı). Singular (ขлокрıбıv) in the best MSS. See 1:22 (avขтокрıтоv) and Mr 7:6f. for Christ's denunciation of hypocrites which the disciples did not understand, including Peter (Mt 15:16ff. ).

Envies ( $\varphi$ Oovouc). Genuine here, not $\varphi$ ovouc (murders), as B has it. For the word see Mt 27:18 .

Evil speakings ( $\left.\kappa \alpha \tau \alpha \lambda \alpha \lambda_{\imath} \alpha \varsigma\right)$. Late word (from ката入 $\alpha \lambda \circ \varsigma$, defamer, Ro 1:30), in N.T. only here and 2Co 12:20 . "Backbitings." For verb see 2:12.

1Pet 2:2
As newborn babes ( $\omega \varsigma \alpha \rho \tau \iota \gamma \varepsilon v v \eta \tau \alpha \beta \rho \varepsilon \varphi \eta$ ). B $\rho \varepsilon \varphi \circ \varsigma$, old word, originally unborn child (Lu 1:41-44), then infant ( $\operatorname{Lu} 2: 12$ ), here figuratively, like $v \eta \pi \iota o$. Aptı $\gamma \varepsilon v \eta \eta \tau \alpha$ is a late and rare compound (Lucian, imperial inscription) from $\alpha \rho \tau$ and $\gamma \varepsilon v v \alpha \omega$, with evident allusion to $\alpha v a \gamma \varepsilon \gamma \varepsilon v v \eta \mu \varepsilon v o$ in 1:23, probably meaning that they were recent converts, possibly slight proof that the Epistle written before Romans by Paul (Kuhl).

Long for ( $\varepsilon \pi \iota \pi 0 \theta \eta \sigma \alpha \tau \varepsilon$ ). First aorist (constative) active imperative of $\varepsilon \pi \iota \pi 0 \theta \varepsilon \omega$, old verb for intense yearning (Php 2:26).

The spiritual milk which is without guile ( $\tau$ о $\lambda о ү$ ко $\alpha \alpha \delta o \lambda o v \gamma \alpha \lambda \alpha$ ). Г $\lceil\lambda \alpha$ is old word for milk as in 1Co 9:7 and as metaphor in 1Co 3:2 . Aסo $\lambda$ oc is an old compound (here alone in N.T.) adjective (alpha privative and $\delta$ o $\lambda$ oc deceit), unadulterated milk which, alas, is so hard to get. $\Lambda \frac{\gamma}{}$ ккоv is an old adjective in -ıкоৎ, from $\lambda о \gamma \circ \varsigma$ (reason, speech), in N.T. only here and Ro 12:1, used here with allusion to $\lambda o \gamma o v(1: 23)$ and $\rho \eta \mu \alpha$ ( $1: 25$ ), "the sincere milk of the word" ("the milk belonging to the word," either the milk which is the word or the milk contained in the word, that is Christ). So Bigg holds. But in Ro 12:1 Paul uses $\lambda o \gamma ı \kappa o v$ in the sense of "rational" or "spiritual," and that idea is possible here as Hort holds.
 spiritual or rational sheep of Christ).

That ye may grow thereby ( $1 v a \varepsilon v a v \tau \omega \alpha \nu \xi_{\eta} \eta \eta \tau \varepsilon$ ). Purpose clause with $\tau v a$ and the first aorist passive subjunctive of $\alpha v \xi \alpha v \omega$, old and common verb to grow. See this same metaphor in Col 2:19; Eph 4:15. Peter uses the word of God as the food for growth, especially
for babes in Christ, not emphasizing the distinction from solid food $(\beta \rho \omega \mu \alpha)$ made in 1Co 3:2; Heb 5:13. Salvation ( $\sigma \omega \tau \eta \rho \iota \alpha v$ ) here is final salvation.

1Pet 2:3
If ye have tasted ( $\varepsilon \varepsilon \gamma \varepsilon v \sigma \alpha \sigma \theta \varepsilon$ ). Condition of first class with $\varepsilon$ and first aorist middle indicative of $\gamma \varepsilon v \omega$ in figurative sense as in Heb 6:4f. "A taste excites the appetite" (Bengel).

Gracious ( $\chi \rho \eta \sigma \tau о \varsigma)$. Quotation from Ps 34:8. The Hebrew for the LXX $\chi \rho \eta \sigma \tau \sigma$, is simply tobh (good). Plato used the word for food also, and Peter carries out the metaphor in $\gamma \alpha \lambda \alpha$ (milk) as in Lu 5:39.

1Pet 2:4
Unto whom ( $\pi \rho \circ \varsigma o v$ ). The Lord, carrying on the imagery and language of the Psalm.
Coming ( $\pi \rho \circ \sigma \varepsilon \rho \chi \circ \mu \varepsilon v o$ ). Present middle participle masculine plural of $\pi \rho \circ \sigma \varepsilon \rho \chi \circ \mu \alpha$ ( $\pi \rho о \sigma \varepsilon \lambda \theta a \tau \varepsilon$ in the Psalm) agreeing with the subject of оюкобо $\mu \varepsilon \iota \sigma \theta \varepsilon$.

A living stone ( $\left.\lambda_{1} \theta \circ \vee \zeta \omega v \tau \alpha\right)$. Accusative case in apposition with ov (whom, the Lord Christ). There is apparent an intentional contradiction between "living" and "stone." Cf. "living hope" in 1:3 and "living word" in 1:23.
 participle of $\alpha \pi о \delta о \kappa \mu \alpha \zeta \omega$, old verb to repudiate after test ( $\mathrm{Lu} 9: 22$ ), in the accusative case agreeing with $\lambda_{l} \theta_{o} v$.

But with God ( $\pi \alpha \rho \alpha \delta \varepsilon \theta \varepsilon \omega)$. "By the side of God," as he looks at it, in contrast with the rejection "by men" (v $\tau 0 \alpha v \theta \rho \omega \pi \omega v$ ).

Elect ( $\varepsilon \kappa \lambda \varepsilon \kappa \tau \circ v$ ). From Isa 28:6 as in $\varepsilon v \tau \tau \mu o v$ (precious, for which see Lu 7:2) rather than $\delta$ окц $\mu$ ov (proved) expected after $\alpha \pi о \delta \varepsilon \delta$ окц $\mu \sigma \mu \varepsilon v o v$ as meaning far more in God's sight, "a pre-eminence of position with" (Hort).

1Pet 2:5
Ye also as living stones ( $\kappa \alpha \alpha \cup \tau о \omega \varsigma \lambda_{\bullet} \theta$ o $\left.\zeta \omega \nu \tau \varepsilon \varsigma\right)$. Peter applies the metaphor about Christ as the living stone to the readers, "ye yourselves also."

Are built up a spiritual house (оюко $о \mu \varepsilon \sigma \sigma \theta \varepsilon$ оוкоৎ $\pi v \varepsilon \cup \mu \alpha \tau \kappa ๐ \varsigma)$. Present passive indicative second person plural of oוкобо $\mu \varepsilon \omega$, the very verb used by Jesus to Peter in Mt 16:18 (oוко $\delta$ о $\mu \eta \sigma \omega$ ) of building his church on the rock. If the metaphor of a house of living stones seems "violent" (Vincent), it should be remembered that Jesus employed the figure of a house of believers. Peter just carried it a bit farther and Paul uses a temple for believers in one place (1Co 3:16) and for the kingdom of God in general (Eph 2:22) , as does the author of Hebrews (Heb 3:6). This "spiritual house" includes believers in the five Roman provinces of 1:1 and shows clearly how Peter understood the metaphor of Christ in Mt 16:18 to be not a local church, but the church general (the kingdom of Christ).

To be a holy priesthood ( $\varepsilon \varsigma \varsigma ~ เ \varepsilon \rho \alpha \tau \varepsilon \cup \mu \alpha ~ \alpha \gamma ı \circ v)$. Late word (from $\varepsilon \rho \rho \alpha \tau \varepsilon \omega \omega$, to serve as priest, Lu 1:8 alone in N.T.), in LXX (Ex 19:6 ), in N.T. only here and verse 9, either the office
of priest (Hort) or an order or body of priests. At any rate, Peter has the same idea of Rev 1:6 (ıряєı, priests) that all believers are priests (Heb 4:16) and can approach God directly.

To offer up ( $\alpha v \varepsilon v \varepsilon \gamma \kappa \alpha$ ). First aorist active infinitive (of purpose here) of $\alpha v \alpha \varphi \varepsilon \rho \omega$, the usual word for offering sacrifices (Heb 7:27 ). Only these are "spiritual" ( $\pi v \varepsilon v \mu a \tau \iota \kappa \alpha \varsigma)$ as pictured also in Heb 13:15f.

Acceptable ( $\varepsilon v \pi \rho о \sigma \delta \varepsilon \kappa \tau о \cup \varsigma)$. Late (Plutarch) double compound verbal adjective ( $\varepsilon v$, $\pi \rho о \sigma, \delta \varepsilon \chi \circ \mu \alpha)$ as in 2Co 6:2 .

1Pet 2:6
It is contained ( $\pi \varepsilon \rho \mid \varepsilon \chi \varepsilon)$. Present active (here intransitive, to contain, only N.T. example) of $\pi \varepsilon \rho เ \varepsilon \chi \omega$, old verb, to surround, transitive in $\mathrm{Lu} 5: 9$ to seize (only other N.T. example). The formula with $\pi \varepsilon \rho เ \varepsilon \chi \varepsilon$ is in Josephus (Ant. XI. 7). This Scripture ( $\varepsilon v \gamma \rho \alpha \varphi \eta$ ) is Isa 28:16 with some changes. Peter had in verse 4 already quoted $\varepsilon \kappa \lambda \varepsilon \kappa \tau o v$ and $\varepsilon \nu \tau \iota \mu \circ v$. Now note $\alpha<\rho о \gamma \omega v \iota \alpha \circ v$ (a chief corner stone), a word apparently invented by Isaiah (from акрос, highest, and $\gamma \omega v \iota \iota \circ \varsigma$, Attic word for corner stone). Paul in Eph 2:20 uses the same word, making Christ the chief corner stone (the only other N.T. example). In Isaiah the metaphor is rather a foundation stone. Peter and Paul make it "the primary foundation stone at the structure" (W. W. Lloyd).

On him ( $\left.\varepsilon \pi^{\prime} \alpha \cup \tau \omega\right)$. That is, "on it" (this corner stone, that is, Christ).
Shall not be put to shame ( $o v \mu \eta \kappa \alpha \tau \alpha \iota \sigma \chi v v \theta \eta$ ). Strong negatives $o v \mu \eta$ with first aorist passive subjunctive of $\kappa \alpha \tau \alpha \iota \sigma \cup \nu \omega$, old verb, to put to shame (Ro 5:5 ).

1Pet 2:7
The preciousness $(\eta \tau \iota \mu \eta)$. Or "the honour." Explanation of $\varepsilon v \tau \iota \mu o v$ and $o v \mu \eta$ $\kappa \alpha \tau \alpha \iota \sigma \chi \cup v \theta \eta$ and only true "for you which believe" ( $\tau \circ \iota \varsigma \pi \iota \sigma \tau \varepsilon v o v \sigma \iota v$ ethical dative of articular present active participle of $\pi \iota \sigma \tau \varepsilon v \omega$ to believe).

But for such as disbelieve ( $\alpha \pi \iota \sigma \tau 0 v \sigma \iota \nu \delta \varepsilon$ ). Dative present active participle again of $\alpha \pi \iota \sigma \tau \varepsilon \omega$, opposite of $\pi \iota \sigma \tau \varepsilon v \omega$ (Lu 24:11).

Was made the head of the corner ( $\varepsilon \gamma \varepsilon v \eta \forall \eta \varepsilon \iota \varsigma \kappa \varepsilon \varphi a \lambda \eta \nu \gamma \omega \nu \iota \alpha \varsigma)$. This verse is from Ps 118:22 with evident allusion to Isa 28:16 ( $\kappa \varepsilon \varphi \alpha \lambda \eta \nu \omega \nu \iota \alpha \sigma=\alpha \kappa \rho о \gamma \omega \nu \iota \alpha \iota \nu)$. See Mt 21:42; Mr 12:10; Lu 20:17, where Jesus himself quotes Ps 118:22 and applies the rejection of the stone by the builders (o oוкобo $\boldsymbol{\mu} \circ v \nu \tau \varepsilon$, the experts) to the Sanhedrin's conduct toward him. Peter quoted it also (and applied it as Jesus had done) in his speech at the Beautiful Gate (Ac 4:11). Here he quotes it again to the same purpose.

1Pet 2:8
And ( $\kappa \alpha$ ). Peter now quotes Isa 8:14 and gives a new turn to the previous quotation. To the disbelieving, Christ was indeed "a stone of stumbling ( $\left.\lambda_{\imath} \theta \circ \varsigma \pi \rho о \sigma \kappa о \mu \mu \alpha \sigma \varsigma\right)$ and rock of offence ( $\pi \varepsilon \tau \rho \alpha \sigma \kappa \alpha v \delta \alpha \lambda o v), "$ quoted also by Paul in Ro 9:32f. , which see for discussion. Пробко $\mu \alpha$ (from $\pi \rho о \sigma \kappa о \pi \tau \omega$, to cut against) is an obstacle against which one strikes by accident, while $\sigma \kappa \alpha v \delta \alpha \lambda o v$ is a trap set to trip one, but both make one fall. Too much
distinction need not be made between $\lambda_{1} \theta$ oc (a loose stone in the path) and $\pi \varepsilon \tau \rho \alpha$ (a ledge rising out of the ground).

For they (o). Causal use of the relative pronoun.
 Present active indicative of $\pi \rho \circ \sigma \kappa о \pi \tau \omega$ with dative case, $\lambda o \gamma \omega$, and present active participle of $\alpha \pi \varepsilon ו \theta \varepsilon \omega$ (cf. $\alpha \pi \iota \sigma \tau o v \sigma เ v$ in 2:7) as in 3:1. T $\omega \lambda$ o $\gamma \omega$ can be construed with $\alpha \pi \varepsilon ו \theta$ ouvtec (stumble, being disobedient to the word).

Whereunto also they were appointed ( $\varepsilon \iota \varsigma ๐ \kappa \alpha \varepsilon \tau \varepsilon \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\tau 1 \theta \eta \mu$. See this idiom in $1 \mathrm{Ti} 2: 7$. "Their disobedience is not ordained, the penalty of their disobedience is" (Bigg). They rebelled against God and paid the penalty.

1Pet 2:9
But ye (v $\nu \varepsilon ६ \delta \varepsilon$ ). In contrast with the disobedient ones.
An elect race ( $\gamma \varepsilon$ voc $\varepsilon \kappa \lambda \varepsilon \kappa \tau о v$ ). From Isa 43:20. The blood relation of the spiritual Israel (not the Jewish race) through the new birth (1:23).

A royal priesthood ( $\beta \alpha \sigma i \lambda \varepsilon เ \circ \nu$ เ $\varepsilon \alpha \tau \varepsilon \cup \mu \alpha$ ). From Ex 19:6 (cf. Re 1:6; 5:10). The official in Christian churches is $\pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho о \sigma=\varepsilon \pi \iota \sigma \chi$ олоৎ, not $\varepsilon \rho \varepsilon \cup \varsigma$. We are all ıєрєıৎ (priests). Cf. 2:5.

A holy nation ( $\varepsilon \theta v o \varsigma \alpha \gamma\llcorner\circ v$ ). Also from Ex 19:6, but here applied, not to the national Israel, but to the spiritual Israel of believers (both Jews and Gentiles).

A people for God's own possession ( $\lambda \alpha \circ \varsigma \varepsilon \varepsilon \varsigma \pi \varepsilon \rho \iota \pi о џ\rceil \sigma เ v$ ). The idea here occurs in Ex
 and in Mal 3:17 we find $\varepsilon \iota \varsigma ~ \pi \varepsilon \rho \iota \pi o ı \eta \sigma \iota ~(f o r ~ a ~ p o s s e s s i o n) . ~ П \varepsilon p ı o v \sigma ı o \varsigma ~ \lambda a o c ~ i s ~ a ~ p e o p l e ~ o v e r ~$ and above the others and $\pi \varepsilon \rho \iota \pi о \neq \sigma \iota \varsigma$ is a possession in a special sense (Eph 1:14). See Paul's use of $\pi \varepsilon \rho \iota \varepsilon \pi о \downarrow \sigma \alpha \tau o$ in Ac 20:28. The old rendering, "a peculiar people," had this idea of possession, for "peculiar" is from pecus (Latin for flock).

That ye may shew forth ( $0 \pi \omega \varsigma \varepsilon \xi \alpha \gamma \gamma \varepsilon \lambda \lambda \eta \tau \varepsilon$ ). Purpose clause with $o \pi \omega \varsigma$, rather than $\iota v a$, with the first aorist active subjunctive of $\varepsilon \xi \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$, old verb, to tell out, here alone in N.T.

The excellencies ( $\tau \alpha \varsigma \alpha \rho \varepsilon \tau \alpha \varsigma)$. From Isa 43:21. Old word for any preeminence (moral, intellectual, military), often for "virtue," but not in that sense in the O.T. or the N.T. The word has the sense of moral worth in $2 \mathrm{Pe} 1: 3,5$; Php 4:8; and the Apocrypha. In Isaiah (here quoted) it means praise and glory to God. So also Isa 42:12. See Ac 2:11 $\tau \alpha \mu \varepsilon \gamma \alpha \lambda \varepsilon ı \alpha$ tov $\theta$ عov (the mighty works of God).

Darkness (бкотоич). Heathenism.
His marvellous light ( $\tau 0 \theta \alpha \cup \mu \alpha \sigma \tau o v ~ a v \tau o v ~ \varphi \omega \varsigma)$. Christianity. For $\theta \alpha \nu \mu \alpha \sigma \tau o v(f r o m$ $\theta \alpha 0 \mu \alpha \zeta \omega)$ see Mt 21:42 . For the change from heathenism to Christianity see Col 1:12; Eph 5:8-14.

1Pet 2:10

Which in time past (o $\pi о \tau \varepsilon)$. "Who once upon a time."
No people (ou $\lambda \alpha o \varsigma)$. This phrase from Hos 2:23. Note use of ov (not ov $\delta \varepsilon ı$ ) with $\lambda \alpha o \varsigma$ like Hebrew negative.

Which had not obtained mercy (o ovk $\varepsilon \lambda \varepsilon \eta \mu \varepsilon v o$ ). Perfect passive articular participle of $\varepsilon \lambda \varepsilon \varepsilon \omega$ and the emphatic negative ov , with which compare Paul's use of Ho 1; 2 in Ro 9:25 , which may have been known to Peter or not.

But now have obtained mercy ( $v o v \delta \varepsilon \varepsilon \lambda \varepsilon \eta \theta \varepsilon v \tau \varepsilon \varsigma$ ). Change to first aorist passive participle from "the long antecedent state" to "the single event of conversion which ended it" (Hort).

1Pet 2:11
As sojourners and pilgrims ( $\omega \varsigma \pi \alpha \rho о н к о \cup \varsigma \kappa \alpha \pi \alpha \rho \varepsilon \pi \kappa \delta \eta \mu \circ \vee \varsigma)$. This combination from the LXX (Ge 33:4; Ps 39:13 ). See 1:1 for $\pi \alpha \rho \varepsilon \pi \iota \delta \eta \mu \circ \varsigma$ and 1:17 for $\pi \alpha \rho о$ ккı $\alpha$ and Eph 2:19 for $\pi \alpha \rho о$ окоऽ (only there and here in N.T., Christians whose fatherland is heaven).

To abstain from ( $\alpha \pi \varepsilon \chi \varepsilon \sigma \theta \alpha$ ). Present middle (direct) infinitive of $\alpha \pi \varepsilon \chi \omega$, old verb, to hold back from (1Th 4:3). In indirect command (to keep on abstaining from) after $\pi \alpha \rho \alpha \kappa \alpha \lambda \omega$ (I beseech). With the ablative case $\tau \omega v \sigma \alpha \rho \kappa \kappa \kappa \omega \nu \varepsilon \pi \iota \theta \nu \mu \omega \omega v$, the grosser sins of the flesh (for баркıкоц see 1Со 3:3) like the list in 4:3.

Which (aıtıvec). "Which very ones." Like Latin quippe qui.
War against the soul ( $\sigma \tau \rho \alpha \tau \varepsilon v o v \tau \alpha$ ката $\tau \eta \varsigma \psi \cup \chi \eta \varsigma)$. Present middle indicative of $\sigma \tau \rho \alpha \tau \varepsilon v \omega$, to carry on a campaign (Jas 4:1). See this struggle between the flesh and the spirit vividly pictured by Paul in Ga 5:16-24 .

1Pet 2:12
Seemly ( $\kappa \alpha \lambda \eta \nu$ ). Predicate adjective with $\alpha v a \sigma \tau \rho \circ \varphi \eta \nu$, for which see $1: 15,18$. The Gentiles are on the watch for slips in moral conduct by the Christians.

That (ıva). Final conjunction with $\delta_{0} \xi \alpha \sigma \omega \sigma \iota v$ (they may glorify, first aorist active subjunctive of $\delta$ o $\xi a \zeta \omega$, the purpose of the Christians about the Gentiles.

Wherein $(\varepsilon v \omega)$. "In what thing."
As evil-doers ( $\omega \varsigma$ какотоเ $\omega v$ ). As they did and do, old word (from какоv and поเ $\varepsilon \omega$, Joh 18:30 ), in N.T. only here and verse 14 in correct text. Heathen talk against us (ката入 $\alpha \lambda$ ovaıv) gleefully.

By your good works ( $\varepsilon \kappa \tau \omega v \kappa \alpha \lambda \omega v \varepsilon \rho \gamma \omega v$ ). "Out of (as a result of) your good (beautiful) deeds."

Which they behold ( $\varepsilon \pi о \pi \tau \varepsilon v o v \tau \varepsilon \varsigma)$. Present active participle of $\varepsilon \pi о \pi \tau \varepsilon v \omega$, old verb (from, $\varepsilon \pi \frac{\pi}{} \boldsymbol{\tau} \eta \varsigma$, overseer, spectator, $2 \mathrm{Pe} 1: 16$ ), to be an overseer, to view carefully, in N.T. only here and $3: 2$.

In the day of visitation ( $\varepsilon v \eta \mu \varepsilon \rho \alpha \varepsilon \pi \iota \sigma \kappa о \pi \eta \varsigma$ ). From Isa 10:33. Cf. its use in Lu 19:44 , which see for the word $\varepsilon \pi \iota \sigma \kappa о \pi \eta$ (from $\varepsilon \pi \iota \sigma \kappa о \pi \varepsilon \omega$, to inspect (Heb 12:15). Clear echo here of Mt 5:16 .

1Pet 2:13
Be subject to (v $\quad \tau \sigma \alpha \gamma \eta \tau \varepsilon)$. Second aorist passive imperative second person plural of $v \pi 0 \tau \alpha \sigma \sigma \omega$, to subject to, as in 3:22.

Every ordinance of man $(\pi \alpha \sigma \eta \alpha v \theta \rho \omega \pi \iota \nu \eta \kappa \tau \iota \sigma \varepsilon)$. Dative case of old and common word $\kappa \tau \iota \sigma \iota \varsigma ~(f r o m ~ \kappa \tau \iota \zeta \omega$, to create, to found), act of creation (Ro 1:20), a creature or creation (Ro 1:25), all creation (Col 1:15), an institution as here (in Pindar so). For $\alpha v \theta \rho \omega \pi \iota \sim o s$ (human) see Jas 3:7. Peter here approves no special kind of government, but he supports law and order as Paul does (Ro 13:1-8 ) unless it steps in between God and man (Ac 4:20).

For the Lord's sake ( $\delta ı \alpha \tau \nu \kappa \nu \rho \iota \nu$ ). For Jesus' sake. That is reason enough for the Christian not to be an anarchist (Mt 22:21). The heathen were keen to charge the Christians with any crime after Nero set the fashion. "It should not be forgotten that, in spite of the fine language of the philosophers, the really popular religions in Greece and Rome were forms of devil-worship, intimately blended with magic in all its grades" (Bigg).

As supreme ( $\omega \varsigma v \pi \varepsilon \rho \varepsilon \chi \circ v \tau$ ). Dative singular of present active participle of $v \pi \varepsilon \rho \varepsilon \chi \omega$, old verb (intransitive), to stand out above (to have it over), as in Ro 13:1 . It is not the divine right of kings, but the fact of the king as the outstanding ruler.

1Pet 2:14
Unto governors ( $\eta \gamma \varepsilon \mu \circ \sigma \iota \nu$ ). Dative again of $\eta \gamma \varepsilon \mu \omega \nu$, a leader (from $\eta \gamma \varepsilon \circ \mu \alpha$, to lead), old and common word (Mt 10:18).

As sent by him ( $\left.\omega \varsigma \delta \iota^{\prime} \alpha v \tau o v \pi \varepsilon \mu \pi \sigma \mu \varepsilon v o \iota \varsigma\right)$. Present passive participle of $\pi \varepsilon \mu \pi \omega . \Delta \iota^{\prime}$ $\alpha \cup \tau o v$ is "by God," as Jesus made plain to Pilate; even Pilate received his authority ultimately "from above" (Joh 18:11).

For vengeance on evil-doers ( $\varepsilon \iota \varsigma \varepsilon \kappa \delta \iota \kappa \eta \sigma \iota v$ каколоเ $\omega v$ ). Objective genitive with $\varepsilon \kappa \delta \iota \kappa \eta \sigma \iota v$, for which see Lu 18:7f.

For praise to them that do well ( $\varepsilon \pi \alpha \iota \nu \circ \nu \alpha \gamma \alpha \theta о \pi о t \omega v)$. Objective genitive again, $\alpha \gamma \alpha \theta$ отоьоя, a late word (Plutarch, Sirach) from $\alpha \gamma \alpha \theta$ ov and $\pi о เ \varepsilon \omega$ here only in N.T. Found in a magical papyrus.

1Pet 2:15
By well-doing ( $\alpha \gamma \alpha$ оолоเоиv $\tau \alpha \varsigma$ ). Present active participle of $\alpha \gamma \alpha \theta$ о $л о เ \varepsilon \omega$, only in LXX and N.T. (Mr 3:4). In accusative case agreeing with $v \mu a c$ understood, accusative of general reference with $\varphi \iota \mu \circ \iota \nu$, present active infinitive (epexegetic infinitive after to $\theta \varepsilon \lambda \eta \mu \alpha$ тov $\theta \varepsilon o v$, the will of God), late and rare verb (from $\varphi \not \mu \circ \varsigma$ muzzle), as in Mt 22:12 .

The ignorance of foolish men ( $\tau \eta \nu \tau \omega \nu \alpha \varphi \rho o v \omega \nu \alpha \nu \theta \rho \omega \pi \omega \nu \alpha \gamma \nu \omega \sigma \iota \alpha \nu$ ). A $\gamma \nu \omega \sigma \iota \alpha$ is late and rare word (in the papyri) from alpha privative and $\gamma \nu \omega \sigma \iota{ }^{\prime}$ (knowledge), in N.T. only here and 1Co 15:24 (disgraceful ignorance in both instances). Note alliteration.

1Pet 2:16

As free ( $\omega \varsigma \varepsilon \lambda \varepsilon v \theta \varepsilon \rho 0$ ). Note nominative again connected with $v \pi о \tau \alpha \gamma \eta \tau \varepsilon$ in verse 13, not with $\varphi \not \mu \circ \iota v$ in verse 14 (a parenthesis in fact). For this ethical sense of $\varepsilon \lambda \varepsilon v \theta \varepsilon \rho o \varsigma$ see Ga 4:26.

And not using your freedom ( $\kappa \alpha \mu \eta \varepsilon \chi \circ v \tau \varepsilon \varsigma \tau \eta \nu \varepsilon \lambda \varepsilon v \theta \varepsilon \rho \iota \alpha v$ ). "And not holding your liberty" (present active participle of $\varepsilon \chi \omega$, with usual negative $\mu \eta$ with participle.

For a cloke of wickedness ( $\omega \varsigma \varepsilon \pi \iota \kappa \alpha \lambda \nu \mu \mu \alpha \tau \eta \varsigma \kappa \alpha \kappa \iota \alpha \varsigma)$. Елıка $\alpha \nu \mu \mu \alpha$ (from $\varepsilon \pi \iota \kappa \alpha \lambda v \pi \tau \omega$ Ro 4:7) is a rare word (Aristotle, LXX) for veil, here only in N.T. and in figurative sense for pretext to do wickedness under, a thing, alas, that sometimes happens.

But as bondservants of God ( $\alpha \lambda \lambda^{\prime} \omega \varsigma \theta \varepsilon \sigma v \delta o v \lambda o$ ). Paul's proud title. There is no such thing as absolute freedom (personal freedom), for that is anarchy. Cf. Ro 6:22 "enslaved to God."

1Pet 2:17
Honour all men ( $\pi \alpha v \tau \alpha \varsigma \tau \mu \eta \sigma \alpha \tau \varepsilon$ ). Not with the same honour. Constative use of the aorist imperative.

Love the brotherhood ( $\tau \eta \nu \alpha \delta \varepsilon \lambda \varphi o \tau \eta \tau \alpha \alpha \gamma \alpha \pi \alpha \tau \varepsilon$ ). Present active imperative of $\alpha \gamma \alpha \pi \alpha \omega$, keep on doing it. Note the abstract $\alpha \delta \varepsilon \lambda \varphi \circ \tau \eta \varsigma$ (from $\alpha \delta \varepsilon \lambda \varphi \circ \varsigma$, brother) in the collective sense, rare save in ecclesiastical literature, though in I Macc. 12:10; IV Macc. 10:3, and in late papyri. It is a word for all Christians.

Fear God ( $\tau 0 \nu \theta \varepsilon o \nu \varphi o \beta \varepsilon \iota \sigma \theta \varepsilon$ ). In both senses of reverence and dread, and keep it up (present middle imperative).

Honour the king ( $\tau 0 \nu \beta \alpha \sigma \lambda \lambda \varepsilon \alpha \tau \mu \alpha \tau \varepsilon$ ). Keep that up also. A fine motto in this verse.
1Pet 2:18
Servants (o о七кєта). Note article with the class as with $\alpha v \delta \rho \varepsilon \varsigma ~(3: 7)$, though not with үणvaıкя ( $3: 1$ ). Oıкєтп¢, old word from оккоৎ (house), means one in the same house with another (Latin domesticus), particularly house servants (slaves) in distinction from the
 (slaves) in Col 3:22-25; Eph 6:5-7; 1Ti 6:1f.; Tit 2:9f . Oıкعтךऽ in N.T. occurs only here, Lu 16:13; Ac 10:7; Ro 14:4.

Be in subjection (v $v \sigma \tau \alpha \sigma \sigma о \mu \varepsilon v o)$. Present middle participle of $v \pi \sigma \tau \alpha \sigma \sigma \omega$, common late compound to subject oneself to one ( $\mathrm{Lu} 2: 51$ ). Either the participle is here used as an imperative (so in 3:1,7 ) as in Ro 12:16f. , or the imperative $\varepsilon \sigma \tau \varepsilon$ has to be supplied (Robertson, Grammar, p. 945).

To your masters ( $\tau 0 \iota \varsigma ~ \delta \varepsilon \sigma \pi о \tau \alpha ı \varsigma)$. Dative case of $\delta \varepsilon \sigma \pi о \tau \eta \varsigma$, old word for absolute owner in contrast with $\delta o v \lambda o s$. It is used also of God (Lu 2:29; Ac 4:24,29) and of Christ (2Pe 2:1; Jude 1:4). Kvpıoc has a wider meaning and not necessarily suggesting absolute power.
 with class. For $\varepsilon \pi \iota \varepsilon เ \kappa \eta \varsigma$ see on Jas 3:17. There were slave-owners (masters) like this as there
are housekeepers and employers of workmen today. This is no argument for slavery, but only a sidelight on a condition bad enough at its best.

To the froward (тоьৎ бко入ıоь). "To the crooked." Old word, also in Lu 3:5; Ac 2:40; Php 2:15. Unfortunately there were slave-holders as there are employers today, like this group. The test of obedience comes precisely toward this group.

1Pet 2:19
For this is acceptable ( $\tau 0 \cup \tau о \gamma \alpha \rho \chi \alpha \rho \iota)$ ). "For this thing (neuter singular $\tau 0 v \tau 0$, obedience to crooked masters) is grace" ( $\chi \alpha \rho \iota \varsigma$ is feminine, here "thanks" as in Ro 7:25 ). "Acceptable" calls for $\varepsilon v \pi \rho \circ \sigma \delta \varepsilon \kappa \tau o v(2: 5)$, which is not the text here.

If a man endureth griefs ( $\varepsilon$ vоц $\varepsilon \rho \varepsilon \tau \iota \varsigma \lambda \cup \pi \alpha \varsigma)$. Condition of first class with $\varepsilon$ and present active indicative of $v \pi \sigma \varphi \varepsilon \rho \omega$, old verb, to bear up under, in N.T. only here, 1 Co $10: 13 ; 2 \mathrm{Ti} 3: 11$. Note plural of $\lambda \nu \pi \eta$ (grief).

For conscience toward God ( $\delta \iota \alpha \sigma u v \varepsilon \iota \delta \eta \sigma \iota v \theta \varepsilon o v$ ). Suffering is not a blessing in and of itself, but, if one's duty to God is involved (Ac 4:20), then one can meet it with gladness of heart. $\Theta \varepsilon o v$ (God) is objective genitive. For $\sigma v v \varepsilon \iota \delta \eta \sigma \iota \varsigma$ (conscience) see on Ac 23:1; 1Co 8:7. It occurs again in 1 Pe 3:16 .

Suffering wrongfully ( $\pi \alpha \sigma \chi \omega \nu \alpha \delta \kappa \kappa \omega \varsigma)$. Present active participle of $\pi \alpha \sigma \chi \omega$ and the common adverb $\alpha \delta \iota \kappa \omega \varsigma$, unjustly, here alone in N.T. This is the whole point, made clear already by Jesus in Mt 5:10-12, where Jesus has also "falsely" ( $\psi \varepsilon v \delta o \mu \varepsilon v o)$. See also Lu 6:32-34 .

1Pet 2:20
For what glory ( $\pi o เ \sim \nu \gamma \rho \rho \kappa \lambda \varepsilon \varsigma)$. Qualitative interrogative (what kind of glory). "What price glory?" K $\mathrm{K} \varepsilon \circ \varsigma$ is old word from $\kappa \lambda \varepsilon \omega$ ( $\kappa \alpha \lambda \varepsilon \omega$, to call), report, praise, glory, here only in N.T.

If ye shall take it patiently $(\varepsilon v \pi o \mu \varepsilon v \varepsilon \iota \tau \varepsilon)$. First-class condition with $\varepsilon$ and future active indicative of $v \pi о \mu \varepsilon \nu \omega$, for which see Jas 1:12. Same condition also in next sentence ( $\alpha \lambda \lambda^{\prime}$ $\varepsilon$, etc.).

When ye $\sin (\alpha \mu \alpha \rho \tau \alpha \nu o v \tau \varepsilon \varsigma)$. Present active participle of $\alpha \mu \alpha \rho \tau \alpha \nu \omega$ (continued repetition).

And are buffeted for it ( $\kappa \alpha \kappa о \lambda \alpha \varphi ı \zeta о \mu \varepsilon \nu o$ ). Present passive participle of $\kappa о \lambda \alpha \varphi \iota \zeta \omega$, late word (from ко入ачоц fist), only in N.T. (cf. Mt 26:67) and ecclesiastical writers. Repeated action again. No posing as a martyr allowed here. Christians do sometimes deserve persecution, as Jesus implied (Mt 5:10-12 ).
 15.

And suffer for it ( $\kappa \alpha \pi \alpha \sigma \chi о \nu \tau \varepsilon \varsigma)$. Present active participle of $\pi \alpha \sigma \chi \omega$ (verse 19). No "for it" in the Greek here or in the previous sentence.

This is acceptable with God ( $\tau о v \tau о \chi \alpha \rho ı \varsigma \pi \alpha \rho \alpha \theta \varepsilon \omega$ ). "This thing (neuter) is thanks (verse 19) by the side of ( $\pi \alpha \rho \alpha$ ) God (as God looks at it)."

1Pet 2:21
For hereunto were ye called ( $\varepsilon เ \varsigma ~ \tau о v \tau о ~ \gamma \alpha \rho \varepsilon \kappa \lambda \eta \theta \eta \tau \varepsilon$ ). First aorist indicative of $\kappa \alpha \lambda \varepsilon \omega$, to call. They were called to suffer without flinching (Hort), if need be.

Because (o $)$. The fact that Christ suffered $(\varepsilon \pi \alpha \theta \varepsilon v)$ lifts their suffering to a new plane.
Leaving you an example ( $v \mu \imath v \tau \sigma \lambda \mu \pi \alpha \nu \omega \nu v \pi \sigma \gamma \rho \alpha \mu \mu \circ v$ ). Present active participle of the late Ionic verb $v \pi о \lambda \iota \mu \pi \nu \omega$ (in the papyri) for the common $v \pi \sigma \lambda \varepsilon \iota \pi \omega$, to leave behind (under), here only in N.T. Нилоү $\rho \alpha \mu \circ \varsigma$ is also a late and rare word (from $v \pi о \gamma \rho \alpha \varphi \omega$, to write under), a writing-copy for one to imitate, in II Macc. 2:28; Philo, Clement of Rome, here only in N.T. Clement of Alex. (Strom. V. 8. 49) uses it of the copy-head at the top of a child's exercise book for the child to imitate, including all the letters of the alphabet. The papyri give many examples of $v \pi о ү \rho \alpha \varphi \eta$ and $v \pi о \gamma \rho \alpha \varphi \omega$ in the sense of copying a letter.
 clause with $t v \alpha$ and first aorist active subjunctive of $\varepsilon \pi \alpha \kappa о \lambda o v \theta \varepsilon \omega$, old verb, to follow closely upon, with the associative-instrumental (1Ti 5:10,24) or the locative here. I $\chi$ voc is old word (from $\tau \kappa \omega$, to go), tracks, footprints, in N.T. only here, 2Co 12:18; Ro 4:12 . Peter does not mean that Christ suffered only as an example ( $1: 18$ ), but he did leave us his example for our copying (1Jo 2:6 ).

1Pet 2:22
Who did no sin (oৎ $\alpha \mu \alpha \rho \tau \iota \alpha v$ оик $\varepsilon \pi о ı \eta \sigma \varepsilon v$ ). Quotation from Isa 53:9. He has already expressed the sinlessness of Christ in 1:19. The next clause is a combination of Isa 53:9; Zep 3:13. For "guile" ( $\delta$ o $\lambda$ oc) see verse 1.

Was found $(\varepsilon \cup \rho \varepsilon \theta \eta)$. First aorist passive indicative of $\varepsilon v \rho \iota \sigma \kappa \omega$. Christ's guilelessness stood the test of scrutiny (Vincent), as Peter knew (Mt 26:60; Joh 18:38; 19:4,6 ).

1Pet 2:23
When he was reviled ( $\lambda o t \delta o \rho o v \mu \varepsilon \nu о \varsigma)$. Present passive participle of $\lambda o t \delta o \rho \varepsilon \omega$, old verb (from $\lambda$ ot $\delta$ o 0 о, , reviler, 1Co 5:11 ) as in Joh 9:28 .

Reviled not again (ovк $\alpha \nu \tau \varepsilon \lambda o t \delta o \rho \varepsilon$ ). Imperfect active (for repeated incidents) of $\alpha v \tau i \lambda o t \delta o \rho \varepsilon \omega$, late and rare compound (Plutarch, Lucian, one papyrus example with compound following the simplex verb as here, Moulton and Milligan's Vocabulary), here only in N.T. Idiomatic use of $\alpha v \tau$ (in turn, return, back).

Threatened not (ovk $\eta \pi \varepsilon \iota \lambda \varepsilon$ ). Imperfect again (repeated acts) of $\alpha \pi \varepsilon \iota \lambda \varepsilon \omega$, old compound (from $\alpha \pi \varepsilon ı \lambda \eta$, threat, Ac 9:1 ), in N.T. only here and Ac 4:17.

But committed himself ( $\pi \alpha \rho \varepsilon \delta \delta \delta o v \delta \varepsilon$ ). Imperfect active again (kept on committing himself) of $\pi \alpha \rho \alpha \delta i \delta \omega \mu$, to hand over, usually of one to a judge, but here not of another (as the Sanhedrin), but himself (supply $\varepsilon \alpha v \tau o v$ ), for Jesus uses this very idea in Lu 23:46 as he
dies. Jesus thus handed himself and his cause over to the Father who judges righteously ( $\tau \omega$ $\kappa \rho \iota v o v \tau \delta \iota \kappa \alpha \iota \omega \varsigma$, dative of present active articular participle of $\kappa \rho \iota v \omega)$.

1Pet 2:24
Who his own self (os $\alpha \cup \tau \circ \varsigma)$. Intensive pronoun with the relative referring to Christ (note relatives also in verses 22,23).

Bare our sins ( $\alpha \nu \eta \nu \varepsilon \gamma \kappa \varepsilon \nu \tau \alpha \varsigma ~ \alpha \mu \alpha \rho \tau \iota \alpha \varsigma ~ \eta \mu \omega v$ ). Second aorist active indicative of $\alpha \nu \alpha \varphi \varepsilon \rho \omega$, common verb of bringing sacrifice to the altar. Combination here of Isa 53:12; De 21:23. Jesus is the perfect sin offering (Heb 9:28). For Christ's body $(\sigma \omega \mu \alpha)$ as the offering see 1Co 11:24. "Here St. Peter puts the Cross in the place of the altar" (Bigg).

Upon the tree ( $\varepsilon \pi \tau 0 \xi v \lambda o v$ ). Not tree here as in Lu 23:31, originally just wood (1Co 3:12 ), then something made of wood, as a gibbet or cross. So used by Peter for the Cross in Ac 5:30; 10:39 ; and by Paul in Ga 3:13 (quoting De 21:23).

Having died unto sins ( $\tau \alpha \iota \varsigma ~ \alpha \mu \alpha \rho \tau \iota \alpha \iota \varsigma ~ \alpha \pi о \gamma \varepsilon \nu о \mu \varepsilon v o$ ). Second aorist middle participle of $\alpha \pi \sigma \gamma เ \nu \circ \mu \alpha$, old compound to get away from, with dative (as here) to die to anything, here only in N.T.

That we might live unto righteousness (ıva $\tau \eta \delta_{ı} \propto \iota \sigma v \vee \eta \zeta \eta \sigma \omega \mu \varepsilon v$ ). Purpose clause with $\imath v \alpha$ and the first aorist active subjunctive of $\zeta \alpha \omega$ with the dative (cf. Ro 6:20 ). Peter's idea here is like that of Paul in Ro 6:1-23, especially verses 2,10f. ).

By whose stripes ye were healed (ov $\tau \omega \mu \omega \lambda \omega \pi \stackrel{\iota}{ }{ }^{\prime} \eta \tau \varepsilon$ ). From Isa 53:5. First aorist passive indicative of $\iota \alpha o \mu \alpha$, common verb to heal (Jas 5:16) and the instrumental case of $\mu \omega \lambda \omega \pi \varsigma$, rare word (Aristotle, Plutarch) for bruise or bloody wound, here only in N.T. Cf. $1: 18$. Writing to slaves who may have received such stripes, Peter's word is effective.

1Pet 2:25
For ye were going astray like sheep ( $\eta \tau \varepsilon \gamma \alpha \rho \omega \varsigma \pi \rho o \beta a \tau \alpha \pi \lambda \alpha v \omega \mu \varepsilon v o$ ). Brought from Isa 53:6, but changed to periphrastic imperfect indicative with $\eta \tau \varepsilon$ and present middle participle of $\pi \lambda \alpha v \alpha \omega$, to wander away. Recall the words of Jesus in Lu 15:4-7.

But are now returned $(\alpha \lambda \lambda \alpha \varepsilon \pi \varepsilon \sigma \tau \rho \alpha \varphi \eta \tau \varepsilon)$. Second aorist passive indicative of $\varepsilon \pi \iota \sigma \tau \rho \varepsilon \varphi \omega$, old verb, to turn, to return (Mt 10:13).

Unto the Shepherd and Bishop of your souls ( $\varepsilon \pi \tau \sigma \nu \pi о \mu \varepsilon \nu \alpha \kappa \alpha \varepsilon \pi \iota \sigma \kappa о \pi о \nu \tau \omega \nu \psi \nu \chi \omega \nu$ $v \mu \omega v$ ). Jesus called himself the Good Shepherd (Joh 10:11, and see also Heb 13:20 ). Here alone is Christ called our "Bishop" (overseer). See both ideas combined in Eze 34:11 . Philo calls God Eлıбхолос. Jesus is also Aлобто入ос Heb 3:1) and he deserves all other titles of dignity that we can give him.

## 1 Peter 3

1Pet 3:1
In like manner $(\rho \mu \circ \omega \omega)$. Adverb closely connected with $v \pi \sigma \tau \alpha \sigma \sigma o \mu \varepsilon v o$, for which see 2:18.

Ye wives ( $\gamma$ vvaıкєৎ). Without article. About wives see also Col 3:18; Eph 5:22; Tit 2:4
 Titus, but not in Colossians. It strengthens the idea of possession in the article totc. Wives are not enjoined to be in subjection to the husbands of other women, as some think it fine to be (affinities!)

Even if any obey not the word ( $\kappa \alpha \varepsilon \tau \iota \nu \varepsilon \varsigma \alpha \pi \varepsilon \iota \theta$ ovoıv $\tau \omega \lambda o \gamma \omega$ ). Condition of first class and dative case of $\lambda о \gamma \circ \varsigma(1: 23,25 ; 2: 8)$, that is, remain heathen.

That they be gained ( $\imath \alpha \alpha \kappa \varepsilon \rho \delta \eta \theta \eta \sigma o v \tau \alpha$ ). Purpose clause with $\imath v \alpha$ and first future passive indicative of $\kappa \varepsilon \rho \delta \alpha \iota v \omega$, old verb, to gain (from $\kappa \varepsilon \rho \delta$, $\varsigma$, gain, interest) as in Mt 18:15 . See the future with $\operatorname{vo}$ a also in $\operatorname{Lu}$ 20:10; Re 3:9.

Without the word (avev $\lambda o \gamma o v$ ). Probably here "word from their wives" (Hart), the other sense of $\lambda$ oүoc ( talk, not technical "word of God").

By the behaviour of their wives ( $\delta \iota \alpha \tau \eta \varsigma \tau \omega \nu \gamma \cup \nu \alpha \_\kappa \nu \nu \alpha \alpha \sigma \tau \rho \circ \varphi \eta \varsigma$ ). Won by pious living, not by nagging. Many a wife has had this blessed victory of grace.

1Pet 3:2
Beholding ( $\varepsilon \pi \sigma \pi \tau \varepsilon v \sigma \alpha v \tau \varepsilon \varsigma)$. First aorist active participle of $\varepsilon \pi \sigma \pi \tau \varepsilon v \omega$, for which see $2: 12$. See 2:12 also for $\alpha \nu \alpha \sigma \tau \rho о \varphi \eta \nu$ manner of life).

Chaste ( $\alpha \gamma \nu \eta \nu$ ). Pure because "in fear" $(\varepsilon \nu \varphi \circ \beta \omega)$, no word in the Greek for "coupled," fear of God, though in Eph 5:33 fear (reverence for) of the husband is urged.

1Pet 3:3
Whose adorning ( $\omega \nu \kappa \kappa \sigma \mu \circ \varsigma$ ). Genitive plural of the relative referring to $\gamma 0 v a \kappa \kappa \omega \nu$ (wives). Kơ $\boldsymbol{\sigma}$, has here its old meaning of ornament (cf. our cosmetics), not the common one of world (Joh 17:5 ) considered as an orderly whole. Mundus in Latin is used in this double sense (ornament, world).

Let it be $(\varepsilon \sigma \tau \omega)$. Imperative third singular of $\varepsilon \mu \mu$. Not the outward adorning of plaiting the hair (ov о о $\varepsilon \xi \omega \theta \varepsilon v \varepsilon \mu \pi \lambda$ окпऽ $\tau \rho \iota \chi \omega v$ ). The use of ov here rather than $\mu \eta$ (usual negative with the imperative) because of the sharp contrast in verse $4\left(\alpha \lambda \lambda^{\prime}\right)$. The old adverb $\varepsilon \xi \omega \theta \varepsilon \nu$ (from without) is in the attributive position like an adjective. $\mathrm{E} \mu \pi \lambda$ ок $\eta$ is a late word (from $\varepsilon \mu \pi \lambda \varepsilon \kappa \omega$, to inweave, $2 \mathrm{Ti} 2: 4$; $2 \mathrm{Pe} 2: 20$ ) in Strabo, but often in the papyri for struggle as well as plaiting, here only in N.T.

Of wearing ( $\pi \varepsilon \rho ı \theta \varepsilon \sigma \varepsilon \omega \varsigma)$. Late and rare word (Galen, Arrian) from $\pi \varepsilon \rho \iota \tau \theta \eta \mu$ (Mt 27:28 ), to put around, a placing around. Ornaments of gold were worn round the hair as nets and round the finger, arm, or ankle.

Or of putting on ( $\varepsilon v \delta v \sigma \varepsilon \omega \varsigma)$. Old word from $\varepsilon v \delta v \omega$ (to put on), here only in N.T. Peter is not forbidding the wearing of clothes and ornaments by women, but the display of finery by contrast. Cf. 1Ti 2:9-13; Isa 3:16f. .

1Pet 3:4
But the hidden man of the heart ( $\alpha \lambda \lambda^{\prime}$ о к килтоц $\left.\tau \eta \varsigma \kappa \alpha \rho \delta ı \alpha \varsigma ~ \alpha v \theta \rho \omega \pi о \varsigma\right)$ ). Here $\alpha v \theta \rho \omega \pi \sigma \varsigma$ is in contrast with коб $\mu$ о just before. See Paul's use of $\alpha v \theta \rho \omega \pi$ тos for the outer and old, the inner and new man (2Co 4:16; Ro 7:22; Col 3:9; Eph 3:16; 4:22,24 ). See also the Jew $\varepsilon v$ крилt (Ro 2:29) and what Jesus said about God seeing "in secret" (Mt 6:4,6 ).

In the incorruptible apparel of a meek and quiet spirit ( $\varepsilon v \tau \omega \alpha \varphi \theta \alpha \rho \tau \omega \tau 0 v \eta \sigma v \chi เ \circ$ $\kappa \alpha \pi \rho \alpha \varepsilon \omega \varsigma \pi v \varepsilon \cup \mu \alpha \tau о \varsigma)$. No word in the Greek for "apparel" (коб $\mu \omega$ ). For $\alpha \varphi \theta \alpha \rho \tau$ ся see 1:4,23. For $\pi \rho \alpha u \varsigma$ see Mt 5:5; 11:29. Пvعv $\mu$ ( spirit) is here disposition or temper (Bigg), unlike any other use in the N.T. In 3:18,19; 4:6 it means the whole inner man as opposed to $\sigma \alpha \rho \xi$ or $\sigma \omega \mu \alpha$, very much as $\psi v \chi \eta$ is used as opposed to $\sigma \omega \mu \alpha$.

Which (o). Spirit just mentioned.
Of great price ( $\pi 0 \lambda \nu \tau \varepsilon \lambda \varepsilon \varsigma)$. Old word (from $\pi \circ \lambda \nu$ and $\tau \varepsilon \lambda o \varsigma, ~ c o s t), ~ i n ~ N . T . ~ o n l y ~ h e r e, ~$ Mr 14:3; 1 Ti 2:9.

1Pet 3:5
Adorned themselves ( $\varepsilon \kappa о \sigma \mu \circ u v$ عavtac). Imperfect active of customary action, "used to adorn themselves." Коб $\mu \varepsilon \omega$ is old verb from коб $\mu$ ос in the sense in verse 3. See Heb 11:11,35 for like tribute to holy women of the O.T. The participle vтотаббонвva repeats verse 1.

1Pet 3:6
As Sarah ( $\omega \varsigma \Sigma \alpha \rho \rho \alpha$ ).
Obeyed Abraham ( $v \pi \eta \kappa о \cup \varepsilon \nu \tau \omega$ A $\beta \rho \alpha \alpha \mu$ ). Imperfect active of $\cup \pi \alpha \kappa о \nu \omega$, "used to obey" (with dative).

Calling him lord (кирюov avtov ка入оиба). Present active participle of $\kappa \alpha \lambda \varepsilon \omega$. See Gen 18:12.

Whose children ye now are ( $\eta \varsigma \varepsilon \gamma \varepsilon v \eta \theta \eta \tau \varepsilon \tau \varepsilon \kappa v \alpha)$. First aorist passive indicative of $\gamma$ ıvoua, "whose children ye became."

If ye do well ( $\alpha \gamma \alpha$ Оотоьоvб $)$ ). Present active feminine plural participle of $\alpha \gamma \alpha$ Өотоь $\omega$ ( 2:15), "doing good."

And are not put in fear by any terror ( $\kappa \alpha \mu \eta \varphi о \beta о \nu \mu \varepsilon v \alpha \mu \eta \delta \varepsilon \mu \iota \alpha \nu \pi \tau о \eta \sigma เ v$ ). Free quotation from $\operatorname{Pr} 3: 25$, "and not fearing any terror" (cognate accusative of $\pi \tau o \eta \sigma \iota \varsigma$, after $\varphi о \beta o u \mu \varepsilon v a$, present middle participle, late and rare word from $\pi \tau \circ \varepsilon \omega$, to terrify, as in Lu 21:9, here only in N.T.). Perhaps Peter regards Sarah's falsehood as the yielding to a sudden
terror (Hart). Hannah could also be named along with Sarah. The women somehow do not organize "daughters of Sarah" societies.

1Pet 3:7
Ye husbands likewise (o $\alpha v \delta \rho \varepsilon \varsigma ~ о \mu о \omega \varsigma)$ ). Probably "likewise" here refers to honouring all men ( 2:17), not "likewise" of 3:1.

Dwell with (бטvoוкоиvтє¢). Present active participle of $\sigma \cup v o เ \kappa \varepsilon \omega$, old verb for domestic association, here only in N.T. Used as imperative here like the participle in 2:18; 3:1 .

According to knowledge (ката $\gamma v \omega \sigma \tau v$ ). "With an intelligent recognition of the nature of the marriage relation" (Vincent).

Giving honour unto the woman as unto the weaker vessel ( $\omega \varsigma \alpha \sigma \theta \varepsilon v \varepsilon \sigma \tau \varepsilon \rho \omega$ бкะve
 to portion out (or off), here only in N.T. $\Sigma \kappa \varepsilon v o c$ is an old and common word for vessel, furniture, utensil (Mt 12:29; 2Ti 2:20). Here both husband and wife are termed vessels or "parts of the furniture of God's house" (Bigg). See Paul's use of $\sigma \kappa \varepsilon v o c$ for ministers (2Co 4:7). Гטvaıкєเ here is an adjective (female, feminine) from $\gamma \cup v \eta$ (woman, wife). She is termed "the weaker" ( $\tau \omega$ aбӨعveбтєp $\omega$ ), not for intellectual or moral weakness, but purely for physical reasons, which the husband must recognize with due consideration for marital happiness.

Joint-heirs of the grace of life ( $\sigma v \vee к \lambda \eta \rho о v o \mu о \chi \alpha \rho ı \tau о \varsigma \zeta \omega \eta \varsigma)$. Late double compound found in an Ephesian inscription and the papyri, in N.T. only here, Ro 8:17; Eph 3:6; Heb 11:9. God's gift of life eternal belongs to woman as well as to man. In the eyes of God the wife may be superior to the husband, not merely equal.

To the end that your prayers be not hindered ( $\varepsilon \iota \varsigma ~ \tau о ~ \mu \eta ~ \varepsilon \gamma к о \pi \tau \varepsilon \sigma \theta \alpha ~ \tau \alpha \varsigma ~ \pi \rho о \sigma \varepsilon v \chi \propto \varsigma ~$ $\nu \mu \omega v$ ). Purpose clause with $\varepsilon \varsigma \varsigma$ to and the present passive infinitive (with negative $\mu \eta$ ) of $\varepsilon \gamma \kappa 0 \pi \tau \omega$, to cut in, to interrupt, late verb (Polybius), as in Ro 15:22, etc. Very vivid to us now with our telephones and radios when people cut in on us. Пробعuxac (prayers) is the accusative of general reference. Husbands surely have here cause to consider why their prayers are not answered.

1Pet 3:8
Finally ( $\tau 0 \tau \varepsilon \lambda o \varsigma)$. Adverbial accusative. Conclusion, not of the Epistle, but only of the addresses to various classes. No verb ( $\varepsilon \sigma \tau \varepsilon$ imperative, be) here.

Likeminded ( $о \mu о \varphi \rho о v \varepsilon \varsigma$ ). Old compound ( $о \mu \circ \sigma, \varphi \rho \eta \nu$ ), here only in N.T.
Compassionate ( $\sigma \nu \mu \pi \alpha \theta \varepsilon ı \varsigma)$. Old adjective ( $\sigma v v, \pi \alpha \sigma \chi \omega$ ), in N.T. only here and Ro 12:15. Our "sympathetic" in original sense.

Loving as brethren ( $\varphi \backslash \lambda \alpha \delta \varepsilon \lambda \varphi o$ ). Old compound ( $\varphi \backslash \lambda o \sigma, \alpha \delta \varepsilon \lambda \varphi \circ \varsigma)$, here only in N.T.
Tender-hearted ( $\varepsilon v \sigma \pi \lambda \alpha \gamma \chi v o$ ). Late and rare compound ( $\varepsilon v$ and $\sigma \pi \lambda \alpha \gamma \chi v o v$ ), in Hippocrates, Apocrypha, in N.T. only here and Eph 4:32 .

Humble minded ( $\tau \alpha \pi \varepsilon เ v \circ \varphi \rho o v \varepsilon \varsigma)$. Late compound ( $\tau \alpha \pi \varepsilon \imath v o \sigma, \varphi \rho \eta v$ ), in Plutarch, $\operatorname{Pr}$ 29:23, here only in N.T.

1Pet 3:9
Not rendering evil for evil ( $\mu \eta \alpha \pi о \delta \iota \delta \nu \tau \varepsilon \varsigma \kappa \alpha \kappa о \nu \alpha \nu \tau \kappa \alpha \kappa о v)$. M $\eta$ and the present active participle of $\alpha \pi \sigma \delta \delta \omega \mu$, to give back. The same phrase in Ro 12:17 and the same idea in 1Th 5:15. Peter may have obtained it from Paul or both from Pr 17:13; 20:22 , "an approximation to Christ's repeal of the $\lambda \varepsilon \xi \tau \alpha \lambda \iota v ı \varsigma$ (Mt 5:38ff. ) which Plato first opposed among the Greeks" (Hart). Common use of $\alpha v \tau$ for exchange.

Reviling for reviling ( $\lambda o \iota \delta o \rho ı \alpha v a v \tau$ $\lambda o t \delta o \rho ı a \varsigma)$. Allusion to 2:23 (Christ's own example).
But contrariwise blessing ( $\tau o v v a v \tau \iota \nu \delta \varepsilon \varepsilon \cup \lambda o \gamma o v \nu \tau \varepsilon \varsigma)$. Adverbial accusative and crasis ( $\tau 0 \varepsilon v a v \tau \iota \circ$ ) of the neuter article and the adjective $\varepsilon v \alpha v \tau \iota o \varsigma(\varepsilon v, \alpha v \tau \iota \circ \varsigma$, opposite, Mt 14:24), "on the contrary." For $\varepsilon v \lambda o \gamma o v v \tau \varepsilon \varsigma$ (present active participle of $\varepsilon v \lambda o \gamma \varepsilon \omega$ ) see Lu 6:28; Ro 12:14 (imperative $\varepsilon \cup \lambda o \gamma \varepsilon ı \tau \varepsilon$ ).

For hereunto were ye called (o $\varepsilon \iota \varsigma \tau о v \tau о \varepsilon \kappa \lambda \eta \forall \eta \tau \varepsilon$ ). See 2:21 for this verb and use of દıৎ tovto (pointing to the preceding argument).

That ye should inherit a blessing ( $\imath \alpha \varepsilon v \lambda o \gamma \iota \alpha v \kappa \lambda \eta \rho \circ v o \mu \eta \sigma \eta \tau \varepsilon$ ). Purpose clause with $\iota v \alpha$ and the first aorist active subjunctive of $\kappa \lambda \eta \rho \circ v o \mu \varepsilon \omega$, a plain reference to Esau, who wanted "to inherit the blessing" (Heb 12:17) after he had sold his birthright. Christians are the new Israel (both Gentiles and Jews) and are the spiritual descendants of Isaac (Ga 4:22ff. ).

1Pet 3:10
For ( $\gamma \alpha \rho$ ). Reason for the entire exhortation in verses 8,9 and introducing in verses 10-12 a quotation from Ps 34:13-17 with some slight changes.

Would love life $(\theta \varepsilon \lambda \omega v \zeta \omega \eta v$ a $\alpha \pi \alpha \Delta v)$. "Wishing to love life." This present life. The LXX expressions are obscure Hebraisms. The LXX has $\alpha \gamma \alpha \pi \omega \nu$ (participle present active of $\alpha \gamma \alpha \pi \alpha \omega$, not the infinitive $\alpha \gamma \alpha \pi \alpha \iota v$.

Let him refrain ( $\pi \alpha v \sigma \alpha \tau \omega)$. Third person singular first aorist active imperative of $\pi \alpha v \omega$ to make stop, whereas the LXX has $\pi \alpha v \sigma o v$ (second person singular).

His tongue ( $\tau \eta \nu \gamma \lambda \omega \sigma \sigma \alpha \nu$ ). See Jas 3:1-12.
That they speak no guile ( $\tau 0 v \mu \eta \lambda \alpha \lambda \eta \sigma \alpha \delta o \lambda o v$ ). Purpose clause with genitive article $\tau 0 v$ (negative $\mu \eta$ ) and the first aorist active infinitive of $\lambda \alpha \lambda \varepsilon \omega$. But it can also be explained as the ablative case with the redundant negative $\mu \eta$ after a verb of hindering ( $\pi \alpha \nu \sigma \alpha \tau \omega$ ) like $\operatorname{Lu}$ 4:42. See Robertson, Grammar, p. 1061. "Let him refrain his lips from speaking guile."

1Pet 3:11
Let him turn away $(\varepsilon \kappa \kappa \lambda \iota v \alpha \tau \omega)$. First aorist active imperative third person singular of $\varepsilon \kappa \kappa \lambda \iota \omega \omega$, where the LXX has $\varepsilon \kappa \kappa \lambda \iota v o v$ ( second person singular). Old verb, in N.T. only here, Ro $3: 12 ; 16: 17$. Peter adapted the passage all through to his own construction and use. So as to $\pi$ oı $\rceil \sigma \alpha \tau \omega$ (let him do) for $\pi o \imath \eta \sigma o v$ (do thou), $\eta \tau \eta \sigma \alpha \tau \omega$ (let him seek) for $\zeta \eta \tau \eta \sigma o v$
(do thou seek), $\delta \omega \omega \xi \alpha \tau \omega$ (let him pursue) for $\delta \omega \xi \xi$ (do thou pursue), all first aorist active imperatives (of $\pi о \iota \varepsilon \omega, \zeta \eta \tau \varepsilon \omega, \delta \omega \omega \kappa \omega$ ). See Heb 12:14 for "pursuing peace." If men only did! 1Pet 3:12
Upon ( $\varepsilon \pi$ ). In the case of righteous ( $\delta$ ıкаıovৎ, in the O.T. sense like $\delta \iota \kappa \alpha \iota v$ иот in 2 Pe 2:7) for their good, but in the case of men "that do evil" ( $\varepsilon \pi$ поьоиvтаৎ кака, "upon men doing evil things") "the face of the Lord" ( $\pi \rho \circ \sigma \omega \pi$ о $\boldsymbol{\kappa v \rho ı o v ) ~ i s ~ n o t ~ f o r ~ t h e i r ~ g o o d , ~} \varepsilon \pi$ here approaching "against" in idea.

1Pet 3:13
That will harm you (о как $\omega \sigma \omega v \nu \mu \alpha \varsigma$ ). Future active articular participle of $\kappa \alpha \kappa о \omega$, old verb (from какоৎ, bad) as in Ac 7:6,19. Any real hurt, either that wishes to harm you or that can harm. See the words in Isa 50:9.

If ye be ( $\varepsilon \alpha \vee \gamma \varepsilon v \eta \sigma \theta \varepsilon)$. Rather, "if ye become" (condition of third class with $\varepsilon \alpha v$ and second aorist middle subjunctive of $\gamma เ v o \mu \alpha)$.

Zealous of that which is good ( $\tau 0 v a \gamma \alpha \theta o v \zeta \eta \lambda \omega \tau \alpha$ ). "Zealots for the good" (objective genitive after $\zeta \eta \lambda \omega \tau \alpha$ (zealots, not zealous), old word from $\zeta \eta \lambda \circ \omega$ (1Co 12:12 ).

1Pet 3:14
But and if ye should suffer ( $\alpha \lambda \lambda^{\prime} \varepsilon \kappa \alpha \pi \alpha \sigma \chi \circ \iota \tau \varepsilon$ ). "But if ye should also (or even) suffer." Condition of the fourth class with $\varepsilon$ and the optative (undetermined with less likelihood), a rare condition in the vernacular Koine, since the optative was a dying mode. If matters, in spite of the prophetic note of victory in verse 13, should come to actual suffering "for
 the very word of Jesus there which see, a word meaning "happy," not $\varepsilon \cup \lambda о ү \eta \tau o)$ "are ye" (not in the Greek). If the conclusion were expressed regularly, it would be $\varepsilon \downarrow \tau \tau \alpha v$ (ye would be), not $\varepsilon \sigma \tau \varepsilon$ (ye are). It is interesting to note the third-class condition in verse 13 just before the fourth-class one in verse 14.

Fear not their fear ( $\tau 0 \nu \varphi \circ \beta o v \alpha v \tau \omega \nu \mu \eta \varphi \circ \beta \eta \theta \eta \tau \varepsilon$ ). Prohibition with $\mu \eta$ and the first aorist (ingressive) passive subjunctive of $\varphi о \beta \varepsilon \circ \mu \alpha$, to fear, and the cognate accusative $\varphi \circ \beta \circ v$ (fear, terror). "Do not fear their threats" (Bigg). Quotation from Isa 8:12f.

Neither be troubled ( $\mu \eta \delta \varepsilon \tau \alpha \rho \alpha \xi \theta \eta \tau \varepsilon$ ). Prohibition with $\mu \eta \delta \varepsilon$ and the first aorist (ingressive) subjunctive of $\tau \alpha \rho \alpha \sigma \sigma \omega$, to disturb (Mt 2:6; Joh 12:27). Part of the same quotation. Cf. 3:6.

1Pet 3:15
Sanctify ( $\alpha \gamma 1 \alpha \sigma \alpha \tau \varepsilon$ ). First aorist active imperative of $\alpha \gamma \iota \zeta \omega$. This instead of being afraid.
 predicate accusative (without article). This is the correct text, not tov $\theta$ cov of the Textus Receptus. An adaptation to Christ of Isa 8:13.

Being ready always ( $\varepsilon \tau о \mu \circ \alpha \varepsilon$ ). No participle in the Greek, old adjective (Tit 3:1).

To give answer ( $\pi \rho \circ \varsigma \alpha \pi 0 \lambda o \gamma ı \alpha v$ ). "For an apology," the old sense of $\alpha \pi \sigma \lambda o \gamma 1 \alpha$, an answer back, a defence (not excuse), as in Ac 22:1, from ало入оүєона to defend (not to apologize).

A reason concerning the hope that is in you ( $\lambda o \gamma o v \pi \varepsilon \rho \tau \eta \varsigma \varepsilon v \nu \mu \nu v \varepsilon \lambda \pi \iota \delta \circ \varsigma)$. Original sense of $\lambda o \gamma o v$ (accusative of the thing with autouvt with $\nu \mu \alpha \varsigma$, accusative of the person) "concerning the in you hope." Ready with a spoken defence of the inward hope. This attitude calls for an intelligent grasp of the hope and skill in presenting it. In Athens every citizen was expected to be able to join in the discussion of state affairs.

Yet with meekness and fear ( $\alpha \lambda \lambda \alpha \mu \varepsilon \tau \alpha \pi \rho \alpha v \tau \eta \tau о \varsigma ~ \kappa \alpha ~ \varphi о \beta о v)$. Of God (2:18; 3:2,4), not of man.

1Pet 3:16
Having a good conscience ( $\sigma u v \varepsilon \iota \delta \eta \sigma \iota v \varepsilon \chi \circ v \tau \varepsilon \varsigma ~ a \gamma \alpha \theta \eta v$ ). Present active participle of $\varepsilon \chi \omega$. See 2:18 for $\sigma u v \varepsilon \iota \delta \eta \sigma \iota v$ and 3:21 for $\sigma u v \varepsilon \iota \delta \eta \sigma \iota \varsigma ~ a \gamma \alpha \theta \eta$ again ("a quasi-personification," Hart).

That they may be put to shame (ıva кат $\alpha \iota \chi \nu v \theta \omega \sigma \iota v$ ). Purpose clause with $\imath v \alpha$ and the first aorist passive subjunctive of $\kappa \alpha \tau \alpha \iota \sigma \chi \nu v \omega$, old verb, to put to shame ( Lu 13:17; 1Pe 2:6).

Wherein ye are spoken against ( $\varepsilon v \omega \kappa \alpha \tau \alpha \lambda \alpha \lambda \varepsilon \iota \sigma \theta \varepsilon$ ). Present passive indicative of $\kappa \alpha \tau \alpha \lambda \alpha \lambda \varepsilon \omega$, for which see $2: 12$ with $\varepsilon v \omega$ also. Peter may be recalling (Hart) his own experience at Pentecost when the Jews first scoffed and others were cut to the heart (Ac 2:13,37 ).

Who revile (o $\varepsilon \pi \eta \rho \varepsilon \alpha \zeta o v \tau \varepsilon \varsigma)$. Articular present active participle of $\varepsilon \pi \eta \rho \varepsilon \alpha \zeta \omega$, old verb (from $\varepsilon \pi \eta \rho \varepsilon i \alpha$, spiteful abuse), to insult, in N.T. only here and Lu 6:28 .

In Christ ( $\varepsilon v \mathrm{X} \rho \iota \sigma \tau \omega$ ). Paul's common mystical phrase that Peter has three times (here, 5:10,14 ), not in John, though the idea is constantly in John. Peter here gives a new turn (cf. 2:12) to $\alpha v a \sigma \tau \rho o \varphi \eta$ (manner of life). "Constantly the apostle repeats his phrases with new significance and in a new light" (Bigg).

1Pet 3:17
Better (кряıттov). Comparative of крatuc as in 2Pe 2:21; Heb 1:4. Patient endurance not only silences calumny (verse 16), is Christlike (verse 18), but it has a value of its own (verse 17).

If the will of God should so will $(\varepsilon \theta \varepsilon \lambda o$ тo $\theta \varepsilon \lambda \eta \mu \alpha$ тov $\theta \varepsilon o v)$. Condition of the fourth class again ( $\varepsilon 1--\theta \varepsilon \lambda o$ ) with $\varepsilon$ and the optative. For a like pleonasm see Joh 7:17.
 plural agreeing with v $\mu a \varsigma$ understood (accusative of general reference with the infinitive $\pi \alpha \sigma \chi \varepsilon เ v$ (to suffer) of the participles from $\alpha \gamma \alpha$ оотоьє $\omega$ (see 2:15) and какотоь $\varepsilon \omega$ (Mr 3:4, and see $1 \mathrm{Pe} 2: 14$ for какотоьоऽ).

1Pet 3:18

Because Christ also died (o $\tau \alpha$ X $\rho \iota \sigma \tau о \varsigma ~ a \pi \varepsilon \theta \alpha v \varepsilon v$ ). So the best MSS.; later ones $\varepsilon \pi \alpha \theta \varepsilon v$ (suffered). The example of Christ should stir us to patient endurance.

For sins ( $\pi \varepsilon \rho \alpha \mu \rho \tau \tau \omega v$ ). "Concerning sins" (not his, but ours, 1:18). Пع (around, concerning) with a $\alpha \alpha \rho \tau \iota \alpha$ in the regular phrase for the sin offering (Le 5:7; 6:30), though $v \pi \varepsilon \rho$ a $\mu \alpha \rho \tau i a \varsigma$ does occur (Eze 43:25). So in the N.T. we find both $\pi \varepsilon \rho \alpha \mu \alpha \rho \tau i \omega v$ (Heb 5:3 ) and $v \pi \varepsilon \rho$ а $\mu \alpha \tau \iota \omega v(H e b ~ 5: 1) . ~$

Once ( $\alpha \pi \alpha \xi$ ). Once for all (Heb 9:28), not once upon a time ( $\pi 0 \tau \varepsilon$ ).
The righteous for the unrighteous ( $\delta \iota \kappa \alpha \iota \rho \varsigma ~ v \pi \varepsilon \rho \alpha \delta ı \kappa \omega v$ ). Literally, "just for unjust" (no articles). See 1Pe 2:19 for the sinlessness of Christ as the one perfect offering for $\sin$. This is what gives Christ's blood value. He has no sin himself. Some men today fail to perceive this point.

That he might bring us to God (iva $\eta \mu \alpha \varsigma \pi \rho о \sigma \alpha \gamma \alpha \gamma \eta \tau \omega \theta \varepsilon \omega$ ). Purpose clause with $\imath v a$, with second aorist active subjunctive of $\pi \rho \circ \sigma \alpha \gamma \omega$ and the dative case $\tau \omega \theta \varepsilon \omega$. The MSS. vary between $\eta \mu a \varsigma$ (us) and $v \mu \alpha \varsigma$ (you). The verb $\pi \rho o \sigma \alpha \gamma \omega$ means to lead or bring to (Mt 18:24 ), to approach God (cf. $\pi \rho o \sigma \alpha \gamma \omega \gamma \eta v$ in Eph 2:18 ), to present us to God on the basis of his atoning death for us, which has opened the way (Ro 3:25; Heb 10:19f.)

Being put to death in the flesh ( $\theta \alpha v a \tau \omega \theta \varepsilon \iota \varsigma \mu \varepsilon v \sigma \alpha \kappa)$. First aorist passive participle of $\theta$ avatow, old verb (from $\theta a v a \tau o s ~ d e a t h), ~ t o ~ p u t ~ t o ~ d e a t h . ~ \Sigma a \rho k ~ i s ~ l o c a t i v e ~ c a s e ~ o f ~ \sigma \alpha \rho \xi . ~$

But quickened in the spirit ( $\zeta \omega 0 \pi о \neq \eta \varepsilon \iota \varsigma \delta \pi \nu \varepsilon \nu \mu \alpha \tau)$. First aorist passive participle of $\zeta \omega о \pi о \iota \varepsilon \omega$ rare (Aristotle) verb (from $\zeta \omega о \pi о \iota \circ$ making alive), to make alive. The participles are not antecedent to $\alpha \pi \varepsilon \theta \alpha v \varepsilon v$, but simultaneous with it. There is no such construction as the participle of subsequent action. The spirit of Christ did not die when his flesh did, but "was endued with new and greater powers of life" (Thayer). See 1Co 15:22 for the use of the verb for the resurrection of the body. But the use of the word $\pi \nu \varepsilon \nu \mu \alpha \tau$ (locative case) in contrast with бapk starts Peter's mind off in a long comparison by way of illustration that runs from verses 19-22. The following verses have caused more controversy than anything in the Epistle.

1Pet 3:19
In which also ( $\varepsilon v \omega \kappa \alpha$ ). That is, in spirit (relative referring to $\pi v \varepsilon v \mu \alpha \tau$ ). But, a number of modern scholars have followed Griesbach's conjecture that the original text was either $N \omega \varepsilon \kappa \alpha$ (Noah also), or $E v \omega \chi \kappa \alpha$ (Enoch also), or $\varepsilon v \omega \kappa \alpha E v \omega \chi$ (in which Enoch also) which an early scribe misunderstood or omitted $\mathrm{E} v \omega \chi \kappa \alpha$ in copying (ouoюот $\varepsilon \lambda \varepsilon v \tau \sigma v$ ). It is allowed in Stier and Theile's Polyglott. It is advocated by J. Cramer in 1891, by J. Rendel Harris in The Expositor (1901), and Sidelights on N.T. Research (p. 208), by Nestle in 1902, by Moffatt's New Translation of the New Testament. Windisch rejects it as inconsistent with the context. There is no manuscript for the conjecture, though it would relieve the difficulty greatly. Luther admits that he does not know what Peter means. Bigg has no doubt that the event recorded took place between Christ's death and his resurrection and holds that Peter is al-
luding to Christ's Descensus ad Inferos in Ac 2:27 (with which he compares Mt 27:52f.; Lu 23:34; Eph 4:9). With this Windisch agrees. But Wohlenberg holds that Peter means that Christ in his preexistent state preached to those who rejected the preaching of Noah who are now in prison. Augustine held that Christ was in Noah when he preached. Bigg argues strongly that Christ during the time between his death and resurrection preached to those who once heard Noah (but are now in prison) and offered them another chance and not mere condemnation. If so, why did Jesus confine his preaching to this one group? So the theories run on about this passage. One can only say that it is a slim hope for those who neglect or reject Christ in this life to gamble with a possible second chance after death which rests on very precarious exegesis of a most difficult passage in Peter's Epistle. Accepting the text as we have, what can we make of it?

He went and preached ( $\pi \circ \rho \varepsilon v \theta \varepsilon \iota \varsigma \varepsilon к \eta \rho \cup \xi \varepsilon v$ ). First aorist passive (deponent) participle of $\pi о \rho \varepsilon v o \mu \alpha$ and first aorist active indicative of $\kappa \eta \rho v \sigma \sigma \omega$, the verb commonly used of the preaching of Jesus. Naturally the words mean personal action by Christ "in spirit" as illustration of his "quickening" (verse 18) whether done before his death or afterwards. It is interesting to observe that, just as the relative $\varepsilon v \omega$ here tells something suggested by the word $\pi v \varepsilon v \mu a \tau$ (in spirit) just before, so in verse 21 the relative o (which) tells another illustration of the words $\delta \imath^{\prime}$ v $\delta a \tau 0 \varsigma$ (by water) just before. Peter jumps from the flood in Noah's time to baptism in Peter's time, just as he jumped backwards from Christ's time to Noah's time. He easily goes off at a word. What does he mean here by the story that illustrates Christ's quickening in spirit?

Unto the spirits in prison ( $\tau \circ \iota \varsigma \nu \varphi \cup \lambda \alpha \kappa \eta \pi v \varepsilon \cup \mu \alpha \sigma v$ ). The language is plain enough except that it does not make it clear whether Jesus did the preaching to spirits in prison at the time or to people whose spirits are now in prison, the point of doubt already discussed. The metaphorical use of $\varepsilon v \varphi \cup \lambda \alpha \kappa \eta$ can be illustrated by 2Pe 2:4; Jude 1:6; Re $20: 7$ (the final abode of the lost). See Heb 12:23 for the use of $\pi \nu \varepsilon v \mu a \tau \alpha$ for disembodied spirits.

1Pet 3:20
Which aforetime were disobedient ( $\alpha \pi \varepsilon ו \theta \eta \sigma \alpha \sigma \iota \nu \pi o \tau \varepsilon$ ). First aorist active participle of $\alpha \pi \varepsilon \theta \varepsilon \omega$ (for which verb see 3:20) in the dative plural agreeing with $\pi v \varepsilon \nu \mu \alpha \sigma เ v$. These spirits now in prison once upon a time ( $\pi о \tau \varepsilon$ ) were disobedient (typical rebels, Hart calls them).

Waited ( $\alpha \pi \varepsilon \xi \varepsilon \delta \varepsilon \chi \varepsilon \tau 0$ ). Imperfect middle of the double compound $\alpha \pi \varepsilon \kappa \delta \varepsilon \chi \circ \mu \alpha$, late verb, probably first by Paul (1Co 1:7), though in the apocryphal Acta Pauli (iii) and other late writings cited by Nageli (p. 43). Perfective use of the two prepositions ( $\alpha \pi \mathrm{o}, \varepsilon \kappa$ ) to wait out to the end, as for Christ's Second Coming (Php 3:20). A hundred years apparently after the warning (Ge 5:32; 6:3; 7:6 ) Noah was preparing the ark and Noah as a preacher of righteousness ( $2 \mathrm{Pe} 2: 5$ ) forewarned the people, who disregarded it.

While the ark was a preparing (катабкєvаऍонєvŋऽ кı $\beta \omega \tau \sigma v$ ). Genitive absolute with present passive participle of катабкєva $\omega$, old compound (Mt 11:10), for кı $\beta \omega \tau$, $($ ark ) see on Mt 24:38 .

Wherein ( $\varepsilon \iota \varsigma \downarrow \nu)$. "Into which" (the ark).
That is ( $\tau 0 \cup \tau^{\prime} \varepsilon \sigma \tau \iota v$ ). Explanatory expression like our English idiom (Ro 10:6, etc.).
Souls $(\psi v \nsim \alpha)$. Persons of both sexes (living men) as in Ac 2:41; 27:37, etc.
Were saved ( $\delta \iota \varepsilon \sigma \omega \theta \eta \sigma \alpha \nu$ ). First aorist passive indicative of $\delta \iota \alpha \sigma \omega \zeta \omega$, old compound, to bring safe through as in Ac 27:44 .

Through water ( $\delta \mathrm{l}^{\prime}$ v $\delta \alpha \tau \sigma \varsigma$ ). "By means of water" as the intermediate agent, an apparent change in the use of $\delta \iota \alpha$ in composition just before (local use) to the instrumental use here. They came through the water in the ark and so were saved by the water in spite of the flood around them. Peter lays stress (Hart) on the water rather than on the ark (Heb 11:7) for the sake of the following illustration.

1Pet 3:21
Which also ( $\mathrm{o} \kappa \alpha$ ). Water just mentioned.
After a true likeness ( $\alpha v \tau \iota \tau \pi \tau \sigma$ ). Water in baptism now as an anti-type of Noah's deliverance by water. For $\beta a \pi \tau \iota \sigma \mu \alpha$ see on Mt 3:7. For $\alpha v \tau \iota \tau v \pi o v$ see on Heb 9:24 (only other N.T. example) where the word is used of the earthly tabernacle corresponding ( $\alpha v \tau \iota \tau v \pi \alpha$ ) to the heavenly, which is the pattern ( $\tau v \pi \frac{1}{}$ Heb $8: 5$ ) for the earthly. So here baptism is presented as corresponding to (prefigured by) the deliverance of Noah's family by water. It is only a vague parallel, but not over-fanciful.

Doth now save you ( $v \mu \alpha \varsigma \nu v \nu \sigma \omega \zeta \varepsilon)$. Simplex verb ( $\sigma \omega \zeta \omega$, not the compound $\delta \iota \alpha \sigma \omega \zeta \omega$ ). The saving by baptism which Peter here mentions is only symbolic (a metaphor or picture as in Ro 6:2-6 ), not actual as Peter hastens to explain.

Not the putting away of the filth of the flesh (ov $\sigma \alpha \rho \kappa о \varsigma ~ a \pi о \theta \varepsilon \sigma ı \varsigma ~ \rho v \pi о v) . ~ A \pi о \theta \varepsilon \sigma ı \varsigma ~$
 is old word (cf. $\rho v \pi \alpha \rho \circ \varsigma$, filthy, in Jas 2:2; Re 22:11 ), here only in N.T. (cf. Isa 3:3; 4:4 ). Baptism, Peter explains, does not wash away the filth of the flesh either in a literal sense, as a bath for the body, or in a metaphorical sense of the filth of the soul. No ceremonies really affect the conscience (Heb 9:13f. ). Peter here expressly denies baptismal remission of sin.

But the interrogation of a good conscience toward God ( $\alpha \lambda \lambda \alpha \sigma v v \varepsilon \varepsilon \delta \eta \sigma \varepsilon \omega \varsigma \alpha \gamma \alpha \theta \eta \varsigma$ $\varepsilon \pi \varepsilon \rho \omega \tau \eta \mu \alpha \varepsilon \iota \varsigma \theta \varepsilon \sigma \nu$ ). Old word from $\varepsilon \pi \varepsilon \rho \omega \tau \alpha \omega$ (to question as in $\mathrm{Mr} 9: 32$; Mt 16:1 ), here only in N.T. In ancient Greek it never means answer, but only inquiry. The inscriptions of the age of the Antonines use it of the Senate's approval after inquiry. That may be the sense here, that is, avowal of consecration to God after inquiry, having repented and turned to God and now making this public proclamation of that fact by means of baptism (the symbol of the previous inward change of heart). Thus taken, it matters little whether $\varepsilon \iota \varsigma \theta \varepsilon \circ v$ (toward God) be taken with $\varepsilon \pi \varepsilon \rho \omega \tau \eta \mu \alpha$ or $\sigma v v \varepsilon เ \delta \eta \sigma \varepsilon \omega \varsigma$.

Through the resurrection of Jesus Christ ( $\delta \iota^{\prime} \alpha v a \sigma \tau \alpha \sigma \varepsilon \omega \varsigma$ I $\eta \sigma o v$ X $\rho \iota \sigma \tau o u$ ). For baptism is a symbolic picture of the resurrection of Christ as well as of our own spiritual renewal (Ro 6:2-6 ). See 1:3 for regeneration made possible by the resurrection of Jesus.

1Pet 3:22
Having gone ( $\pi 0 \rho \varepsilon \cup \theta \varepsilon \varsigma \varsigma)$. First aorist (deponent) participle (not periphrastic) of торвиоиа.

Being made subject (v $\tau \circ \tau \alpha \gamma \varepsilon v \tau \omega v$ ). Second aorist passive participle of $v \pi \sigma \tau \alpha \sigma \sigma \omega$ (see 2:18; $3: 1$ ) in the genitive absolute construction.

Unto him (avte). Christ. See 1Co 15:28 .

## 1 Peter 4

1Pet 4:1
For as much then as Christ suffered in the flesh (Xpıбтоv ovv $\pi \alpha \theta о \nu \tau о \varsigma \sigma \alpha \rho \kappa$ ). Genitive absolute with second aorist active participle of $\pi \alpha \sigma \chi \omega$, to suffer, and the locative case of $\sigma \alpha \rho \xi$ (flesh). The ouv (then, therefore) draws and applies the main lesson of 3:18-22, the fact that Christ suffered for us.

Arm ye yourselves also ( $\kappa \alpha v \mu \varepsilon \iota \varsigma ~ о \pi \lambda \iota \sigma \alpha \sigma \theta \varepsilon$ ). Direct middle first aorist imperative of o $\pi \lambda \iota \zeta \omega$, old verb from o $\pi \lambda$ ov (weapon, Joh 18:3 ), in metaphorical sense, here only in N.T.

With the same mind ( $\tau \eta v \alpha v \tau \eta v \varepsilon v v o l \alpha v$ ). Accusative of the thing (content), $\varepsilon v v o t a v$, old word (from $\varepsilon v$, vovৎ), putting in mind, thinking, will, in N.T. only here and Heb 4:12 . "Here again Christus Patiens is our vлоүран ос" (Bigg).

For (o $\tau$ ). Reason for the exhortation.
Hath ceased from $\sin (\pi \varepsilon \pi \alpha v \tau \alpha \alpha \mu \alpha \rho \tau \iota \alpha \varsigma)$. Perfect middle indicative of $\pi \alpha v \omega$ to make cease and the ablative singular $\alpha \mu \alpha \rho \tau \iota \alpha \varsigma$, but B reads the dative plural $\alpha \mu \alpha \rho \tau \iota \alpha \iota \varsigma$ (cf. Ro 6:1f. ). Temptation has lost its appeal and power with such a man.

1Pet 4:2
That ye no longer should live ( $\varepsilon \iota \varsigma \tau о \mu \eta \kappa \varepsilon \tau \beta \iota \omega \sigma \alpha$ ). Purpose clause with $\varepsilon \iota \varsigma \tau 0$ (negative $\mu \eta$ ) and the first aorist (for the Attic second aorist $\beta \iota \omega v \alpha$ ) active infinitive of $\beta \iota \omega$, old verb, to spend a life (from $\beta$ ıoc, course of life, Lu 8:14 ), here only in N.T.

The rest of your time in the flesh ( $\tau 0 v \varepsilon \pi i \lambda o \iota \pi o v \varepsilon v \sigma \alpha \rho \kappa \chi \rho \circ v o v$ ). Accusative of time
 here only in N.T. But $\varepsilon \iota \varsigma ~$ to here can be result (so that) as in Ro 1:20; 4:18 .

1Pet 4:3
Past ( $\pi \alpha \rho \varepsilon \lambda \eta \lambda v \theta \omega \varsigma)$. Perfect active participle of the compound verb $\pi \alpha \rho \varepsilon \rho \chi \circ \mu \alpha$, old verb, to go by (beside) as in Mt 14:15 with $\omega \rho$ (hour).

May suffice ( $\alpha \rho \kappa \varepsilon \tau о \varsigma)$. No copula in the Greek, probably $\varepsilon \sigma \tau \iota v$ (is) rather than $\delta v v a \tau \alpha$ (can). Late and rare verbal adjective from $\alpha \rho \kappa \varepsilon \omega$, to suffice, in the papyri several times, in N.T. only here and Mt 6:34; 10:25 , apparently referring to Christ's words in Mt 6:34 (possibly an axiom or proverb).

To have wrought ( $\kappa \alpha \tau \varepsilon \iota \gamma \alpha \sigma \theta \alpha$ ). Perfect middle infinitive of $\kappa \alpha \tau \varepsilon \rho \gamma \alpha \zeta о \mu \alpha$, common compound (ката, $\varepsilon \rho \gamma \circ \nu$ work) as in 1Co 5:3 .

The desire ( $\tau 0 \beta o v \lambda \eta \mu \alpha$ ). Correct text, not $\theta \varepsilon \lambda \eta \mu \alpha$. Either means the thing desired, willed. Jews sometimes fell in with the ways of Gentiles (Ro 2:21-24; 3:9-18; Eph 2:1-3 ) as today some Christians copy the ways of the world.

And to have walked ( $\pi \varepsilon \pi о \rho \varepsilon v \mu \varepsilon v o v \varsigma)$. Perfect middle participle of $\pi о \rho \varepsilon v o \mu a$ in the accusative plural of general reference with the infinitive кат $\varepsilon \rho \gamma \alpha \sigma \theta \alpha$. Literally, "having walked or gone."

In lasciviousness ( $\varepsilon v \alpha \sigma \varepsilon \lambda \gamma \varepsilon ı \alpha ı \varsigma)$. All these sins are in the locative case with $\varepsilon v$. "In unbridled lustful excesses" ( $2 \mathrm{Pe} 2: 7$; 2Co 12:21 ).

Lusts ( $\varepsilon \pi \iota \theta \cup \mu \iota \alpha \iota)$. Cf. 2:11; 4:2 .
Winebibbings ( $о \iota \nu \circ \varphi \lambda \nu \gamma \iota a \varsigma)$. Old compound (oıvoৎ, wine, $\varphi \lambda \nu \omega$, to bubble up), for drunkenness, here only in N.T. (also in De 21:20).

Revellings (коноья). Old word (from кєєца, to lie down), rioting drinking parties, in N.T. here and Ga 5:21; Ro 13:13 .

Carousings ( $\pi 0 \tau \circ \iota \varsigma)$. Old word for drinking carousal (from $\pi \iota \omega \omega$, to drink), here only in the N.T. In the light of these words it seems strange to find modern Christians justifying their "personal liberty" to drink and carouse, to say nothing of the prohibition law. The Greeks actually carried lust and drunkenness into their religious observances (Aphrodite, for instance).

Abominable idolatries ( $\alpha \theta \varepsilon \mu \iota \tau о \iota \varsigma \varepsilon \iota \omega \lambda о \lambda \alpha \tau \rho \iota \alpha \iota)$. To the Christian all "idolatry," ( $\varepsilon \delta \delta \omega \lambda \circ v, \lambda \alpha \tau \rho \varepsilon \iota \alpha)$, worship of idols, is "abominable," not allowed (alpha privative and $\theta \varepsilon \mu \tau \tau о \varsigma, \theta \varepsilon \mu \iota \sigma \tau \circ \varsigma$ the old form, verbal of $\theta \varepsilon \mu \iota \zeta \omega$, to make lawful), but particularly those associated with drinking and licentiousness. The only other N.T. example of $\alpha \theta \varepsilon \mu \tau \tau o \varsigma$ is by Peter also (Ac 10:28) and about the Mosaic law. That may be the idea here, for Jews often fell into idolatrous practices (Deissmann, Bible Studies, p. 274).

1Pet 4:4
Wherein $(\varepsilon \nu \omega)$. "In which thing" (manner of life).
They think it strange ( $\xi \varepsilon \nu \zeta \zeta \sigma \tau \alpha$ ). Present passive indicative of $\xi \varepsilon \nu \iota \zeta \omega$, old verb (from $\xi \varepsilon \vee o \varsigma$, stranger), to entertain a guest (Ac 10:23 ), to astonish (Ac 17:20 ). See also 4:12. "They are surprised or astonished."

That ye run not with them ( $\mu \eta \sigma v \nu \tau \rho \varepsilon \chi o v \tau \omega \nu \nu \mu \omega \nu$ ). Genitive absolute (negative $\mu \eta$ ) with present active participle of $\sigma v v \tau \rho \varepsilon \chi \omega$, old compound, to run together like a crowd or a mob as here (just like our phrase, "running with certain folks").

Into the same excess of riot ( $\varepsilon \iota \varsigma \tau \eta \nu \alpha \nu \tau \eta \nu \tau \eta \varsigma \alpha \sigma \omega \tau \iota \alpha \varsigma \alpha \nu \alpha \chi \nu \sigma \iota v$ ). Avaұvoıv (from $\alpha v a \chi \varepsilon \omega$ to pour forth) is a late and rare word, our overflowing, here only in N.T. A $\sigma \omega \tau \iota a \varsigma$ is the character of an abandoned man ( $\alpha \sigma \omega \tau \circ \varsigma$, cf. $\alpha \sigma \omega \tau \omega \varsigma$ in $\mathrm{Lu} 15: 13$ ), old word for a dissolute life, in N.T. only here, Eph 5:18; Tit 1:6 .

Speaking evil of you ( $\beta \lambda \alpha \sigma \varphi \eta \mu \circ v \nu \tau \varepsilon \varsigma)$. Present active participle of $\beta \lambda \alpha \sigma \varphi \eta \mu \varepsilon \omega$ as in Lu 22:65 . "The Christians were compelled to stand aloof from all the social pleasures of the world, and the Gentiles bitterly resented their puritanism, regarding them as the enemies of all joy, and therefore of the human race" (Bigg).

1Pet 4:5
Who shall give account (o $\alpha \pi \sigma \delta \omega \sigma o v \sigma \iota \lambda \alpha \gamma o v$ ). Future active indicative of $\alpha \pi o \delta i \delta \omega \mu$. For this use with $\lambda$ ojov (account) see Mt 12:36; Lu 16:2; Ac 19:40; Heb 13:17. For the sudden use of the relative o see Ro $3: 8$.

To him that is ready to judge ( $\tau \omega \varepsilon \tau о \mu \omega \varsigma \kappa \rho ı \nu o v \tau$ ). Dative, "to the one readily judging," correct text, not $\varepsilon \tau о \mu \omega \varsigma \varepsilon \chi \circ \vee \tau \kappa \rho ı v a$, "to the one ready to judge," which "softens the rugged original" (Hart). That is Christ apparently (1:13; 2Co 5:10 ), but the Father in 1:17.

The quick and the dead ( $\zeta \nu \tau \alpha \varsigma ~ к а ~ \nu \varepsilon к \rho о и \varsigma) . ~ " L i v i n g ~ a n d ~ d e a d . " ~ T h o s e ~ l i v i n g ~ a t ~ t h e ~$ time and those already dead (1Th 4:15).

1Pet 4:6
Was the gospel preached ( $\varepsilon u \eta \gamma \gamma \varepsilon \lambda \iota \sigma \theta \eta)$ ). First aorist passive indicative of $\varepsilon u \alpha \gamma \gamma \varepsilon \lambda_{\iota} \zeta \omega$. Impersonal use.
 dead or to men once alive but dead now or when the judgment comes? There are those (Augustine, Luther, etc.) who take "dead" here in the spiritual sense (dead in trespasses and sins as in Col 2:13; Eph 2:1 ), but consider it "impossible" for Peter to use the same word in two senses so close together; but Jesus did it in the same sentence, as in the case of $\psi v \times \eta$ (life) in Mt 16:25. Bigg takes it to mean that all men who did not hear the gospel message in this life will hear it in the next before the final judgment.

That they might be judged ( $\iota v \alpha \kappa \rho i \theta \omega \sigma \iota v \mu \varepsilon v$ ). Purpose clause with $v v a$ and the first aorist passive subjunctive of $\kappa \rho \iota v \omega$, to judge, whereas $\zeta \omega \sigma \iota v \delta \varepsilon$ (by contrast) is the present active subjunctive of $\zeta \alpha \omega$, to live. There is contrast also between кат $\alpha \alpha \vartheta \rho \omega \pi$ оиऽ (according to men) and kata $\theta$ عov (according to God).

1Pet 4:7
But the end of all things is at hand ( $\pi \alpha v \tau \omega v \delta \varepsilon \tau o \tau \varepsilon \lambda o \varsigma ~ \eta \gamma \gamma \not \kappa \varepsilon v$ ). Perfect active indicative of $\varepsilon \gamma \gamma \zeta \zeta(\omega$, to draw near, common late verb (from $\varepsilon \gamma \gamma \cup \varsigma)$, same form used by the Baptist of the Messiah's arrival (Mt 3:2) and by James in 5:8 (of the second coming). How near Peter does not say, but he urges readiness (1:5f.; 4:6) as Jesus did (Mr 14:38) and Paul (1Th 5:6 ), though it is drawing nearer all the time (Ro 12:11), but not at once (2Th 2:2).

Be ye therefore of sound mind ( $\sigma \omega \varphi \rho \circ v \eta \sigma \alpha \tau \varepsilon o v v$ ). In view of the coming of Christ. First aorist (ingressive) active imperative of $\sigma \omega \varphi \rho \circ \boldsymbol{\rho} \varepsilon \omega$ ( $\sigma \omega \varsigma$, sound, $\varphi \rho \eta \nu$, mind) as in Mr 5:15.

Be sober unto prayer ( $\nu \eta \psi \alpha \tau \varepsilon \varepsilon \varsigma \varsigma \rho \circ \sigma \varepsilon u \chi \alpha \varsigma)$ ). First aorist (ingressive of $\nu \eta \varphi \omega$ (see 1:13) and plural $\pi \rho о \sigma \varepsilon u \chi \alpha \varsigma$, (prayers). Cf. Eph 6:18 .

1Pet 4:8
Above all things ( $\pi \rho o \pi \alpha v \tau \omega v$ ). See this phrase in Jas 5:12 .
Being fervent ( $\varepsilon \kappa \tau \varepsilon v \eta \varepsilon \chi \circ v \tau \varepsilon \varsigma)$. Present active participle of $\varepsilon \chi \circ v \tau \varepsilon \varsigma$ and predicate accusative of adjective $\varepsilon \kappa \tau \varepsilon \vee \eta \varsigma$ (from $\varepsilon \kappa \tau \varepsilon เ v \omega$, to stretch out), stretched out, here only in N.T., "holding intent you love among yourselves."

For love covereth a multitude of sins (o $\alpha \gamma \alpha \pi \eta \kappa \alpha \lambda \nu \pi \tau \varepsilon \pi \lambda \eta \theta$ oc $\alpha \mu \alpha \rho \tau i \omega v$ ). See Jas 5:20 for meaning, sins of the one loved, not of the one loving.

1 Pet 4:9

Using hospitality ( $\varphi \backslash \lambda \circ \xi \varepsilon v o$ ). "Friendly to strangers," old word (from $\varphi\rangle \lambda o \sigma, \xi \varepsilon v o \varsigma)$, in N.T. only here and 1Ti 3:2; Tit 1:8. No verb here in the Greek.

Without murmuring ( $\alpha v \varepsilon v ~ \gamma о \gamma \gamma v \sigma \mu \circ v$ ). Like $\chi \omega \rho ı \varsigma \gamma \gamma \gamma \gamma \cup \sigma \mu \omega v$ in Php 2:14. Complaint spoils hospitality. Jesus enjoined the entertainment of strangers (Mt 25:35). Inns were rare and very poor. Hospitality made mission work possible (3Jo 1:5 ).

1Pet 4:10
Gift ( $\chi \alpha \rho \iota \sigma \mu \alpha$ ). Late N.T. word (in late papyri) from $\chi \alpha \rho \iota \zeta o \mu \alpha$, to give graciously. It is used here by Peter as one of the gifts of the Holy Spirit (1Co 12:4,9,29-31; Ro 12:6 ).
 verb (Mt 20:28), though єкабтоц (each) is singular.

As good stewards ( $\omega \varsigma \kappa \alpha \lambda$ о oькоvоно). For "steward" (oькоvоноৎ, house-manager) see Lu 16:1; 1Co 4:1 (used by Paul of himself) and of any bishop (Tit 1:7), but here of any Christian. See ка入os used with $\delta \iota \alpha \kappa о$ os in 1 Ti 4:6.
 see on 1:6; Jas 1:2.

1Pet 4:11
If any man speaketh ( $\varepsilon \tau \iota \varsigma \lambda \alpha \lambda \varepsilon$ ). Condition of first class, assumed as a fact.
Speaking as it were oracles of God ( $\omega \varsigma \lambda o \gamma \iota \alpha \theta \varepsilon o v)$. No predicate in this conclusion of the condition. For $\lambda$ 人oүı $\theta$ zov see Ac 7:38 (Mosaic law); Ro 3:2 (the Old Testament); Heb 5:12 (the substance of Christian teaching), here of the utterances of God through Christian teachers. $\Lambda$ o $\gamma$ юov (old word) is a diminutive of $\lambda o \gamma o c$ (speech, word). It can be construed here as nominative or as accusative. The verb has to be supplied.

If any one ministereth ( $\varepsilon \tau \iota \varsigma \delta ı \alpha \kappa o v \varepsilon$ ). First-class condition again. See Ac 6:2-4 for the twofold division of service involved here.

Which God supplieth ( $\eta \varsigma \chi \circ \rho \eta \gamma \varepsilon$ o $\theta \varepsilon \circ \varsigma$ ). Ablative case ( $\eta \varsigma$ ) of the relative attracted from the accusative $\eta \nu$, object of $\chi \circ \rho \eta \gamma \varepsilon$ (present active indicative of $\chi \circ \rho \eta \gamma \varepsilon \omega$, old verb, to supply from $\chi о \rho \eta \gamma$ оৎ, chorus leader, in N.T. only here and 2Co 9:10 ). Peter has the compound $\varepsilon \pi i \chi o \rho \eta \gamma \varepsilon \omega$ in $2 \mathrm{Pe} 1: 5,11$. God is the supplier of strength.

That God may be glorified (ıva $\delta о \xi \alpha \zeta_{\eta \tau \alpha}$ o $\left.\theta \varepsilon o \varsigma\right)$. Purpose clause with $ו v \alpha$ and the present passive subjunctive of $\delta 0 \xi a \zeta \omega$. See Joh 15:8 .

Whose is ( $\omega$ عбтıv). "To whom (dative) is," that is to Jesus Christ the immediate antecedent, but in Ro 16:27; Jude 1:25 the doxology is to God through Christ. For other doxologies see 1Pe 5:11; 2Pe 3:18; Ga 1:5; Ro 9:5; 11:36; Php 4:20; Eph 3:21; 1Ti 1:17; 6:16; 2Ti 4:18; Heb 13:21; Re 1:6; 5:13; 7:12 . The others addressed to Christ are 2Pe 3:18; 2Ti 4:18; Re 1:6

1Pet 4:12
Think it not strange ( $\mu \eta \xi \varepsilon v \zeta \varepsilon \sigma \theta \varepsilon$ ). Prohibition with $\mu \eta$ and the present passive imperative of $\xi \varepsilon \nu \zeta \omega$, for which verb see 4:4. "Be not amazed."

Concerning the fiery trial among you ( $\tau \varepsilon \varepsilon v \nu \mu \nu \tau \pi \nu \rho \omega \sigma \varepsilon$ ). Instrumental case, "by the among you burning," metaphorical sense of old word (since Aristotle), from $\pi v \rho o \omega$, to burn ( $\pi \cup \rho$ fire). See 1:7 for the metaphor. See Re 18:9,18 only other N.T. examples. It occurs in Pr 27:21 for the smelting of gold and silver and so in Ps 56:10 (LXX 65:10): "Thou didst smelt us as silver is smelted" ( $\varepsilon \pi v \rho \omega \sigma \alpha \varsigma ~ \eta \mu \alpha \varsigma \omega \varsigma \pi v \rho о \cup \tau \alpha$ тo $\alpha \rho \gamma \cup \rho \iota \circ)$ ).

Which cometh upon you ( $v \mu i v \gamma i v o \mu \varepsilon v \eta$ ). Present middle participle of $\gamma เ v o \mu \alpha$ (already coming) with dative case $v \mu \nu$.

To prove you ( $\pi \rho \circ \varsigma \pi \varepsilon เ \rho a \sigma \mu \circ v$ ). "For testing."
As though a strange thing happened unto you ( $\omega \varsigma \xi \varepsilon v o v \nu \mu \nu \nu \sigma \nu \mu \beta \alpha \iota v o v \tau o c)$ ). Genitive absolute with $\omega \varsigma$, giving the alleged reason, and $\nu \mu v$, dative case with $\sigma \nu \mu \beta a \iota v o v \tau o \varsigma ~(p r e s e n t ~$ active participle of $\sigma \nu \mu \beta \alpha \iota v \omega$, to go together, to happen (Mr 10:32) , agreeing with $\xi \varepsilon v o v$ (strange, Heb 13:9).

1Pet 4:13
Inasmuch ( $\kappa \alpha 0$ o). "In so far forth as" ("according to which thing"), old conjunction, in N.T. only here and 2Co 8:12; Ro 8:26.

Ye are partakers of ( $\kappa \circ \imath v \omega v \varepsilon เ \tau \varepsilon$ ). Present active indicative of kotv $\omega v \varepsilon \omega$, old verb (from кoıv $\omega v$ oऽ, partner), to share in either with genitive (Heb 2:14) or dative as here ( $\pi \alpha \theta \eta \mu \alpha \sigma \tau v$ ).

That ye may rejoice with exceeding joy (ıv $\chi \alpha \rho \eta \tau \varepsilon \alpha \gamma \alpha \lambda \lambda \iota \omega \mu \varepsilon v o$ ). Purpose clause with $\mathrm{v} \alpha$ and second aorist passive subjunctive of $\chi \propto \iota \rho \omega$, with the present middle participle of $\alpha \gamma \alpha \lambda \lambda_{1} \alpha \omega$ to exult ( $1: 8$ ), "that ye may rejoice exulting." See 1:6-8 for this same idea associated with the second coming of Christ as here.

1Pet 4:14
If ye are reproached ( $\varepsilon$ oveı $\delta \iota \zeta \varepsilon \sigma \theta \varepsilon$ ). Condition of first class assumed as true with $\varepsilon$ and present passive indicative of ovel $\delta \iota \zeta \omega$, for which verb see Jas 1:5.

For the name of Christ ( $\varepsilon v$ огонат Xpıбтov). "In the matter of the name of Christ." For the idea see Mt 5:11f.; 19:29; Ac 5:41; 9:16; $21: 13$. This is the only N.T. example of just ovoна X Xıбтov, here used because of the use of Xpıotıavos in verse 16. For the beatitude $\mu \alpha к а р о$ see Mt 5:11f.

The Spirit of glory and the Spirit of God ( $\tau$ о $\tau \eta \varsigma \delta о \xi \eta \varsigma$ ка то $\tau о v ~ \theta \varepsilon o v \pi \nu \varepsilon \nu \mu \alpha$ ). Note repetition of the article ( $\tau 0$ ) though $\pi v \varepsilon v \mu \alpha$ only once. The reference is to the Holy Spirit, who is the Spirit of Glory and of God.

Resteth upon you ( $\varepsilon \varphi^{\prime} \eta \mu \alpha \varsigma \alpha v \alpha \pi \alpha v \varepsilon \tau \alpha$ ). Quotation from Isa 11:2 . Present middle indicative of $\alpha v \alpha \pi \alpha v \omega$, to give rest, refresh (Mt 11:28). "He rests upon the Christian as the Shechinah rested upon the tabernacle" (Bigg). Cf. 1:8; Mt 3:16 .

1Pet 4:15
Let no one of you suffer ( $\mu \eta \tau \iota \varsigma \nu \mu \omega v \pi \alpha \sigma \chi \varepsilon \tau \omega$ ). Prohibition with $\mu \eta$ and present active imperative (habit prohibited).

As ( $\omega \varsigma$ ). Charged as and being so. Two specific crimes (murderer, thief) and one general phrase (какотоьоৎ, evildoer, 1Pe 2:12,14 ), and one unusual term $\alpha \lambda \lambda о \tau \rho เ \varepsilon \pi \iota \sigma \chi о \pi о \varsigma ~(a ~$ meddler in other men's matters). Note $\eta \omega \varsigma$ (or as) = or "also only as" (Wohlenberg). The word was apparently coined by Peter (occurring elsewhere only in Dionys. Areop. and late eccles. writers) from $\alpha \lambda \lambda$ отрьo (belonging to another, 2Co 10:15) and $\varepsilon \pi \iota \sigma к о \pi о \varsigma$, overseer, inspector, $1 \mathrm{Pe} 2: 25$ ). The idea is apparently one who spies out the affairs of other men. Deissmann (Bible Studies, p. 224) gives a second-century papyrus with $\alpha \lambda \lambda o \tau \rho \omega \omega \nu \varepsilon \pi \iota \theta \nu \mu \eta \tau \eta$ a speculator alienorum. Epictetus has a like idea (iii. 22. 97). Biggs takes it to refer to "things forbidden." Clement of Alexandria tells of a disciple of the Apostle John who became a bandit chief. Ramsay (Church in the Roman Empire, pp. 293, 348) thinks the word refers to breaking up family relationships. Hart refers us to the gadders-about in 1Th 4:11; 2Th 3:11 and women as gossipers in 1Th 5:13. It is interesting to note also that $\varepsilon \pi l \sigma \kappa о \pi о \varsigma$ here is the word for "bishop" and so suggests also preachers meddling in the work of other preachers.

1Pet 4:16
But if as a Christian ( $\varepsilon \delta \varepsilon \omega \varsigma$ Xpıбтıavoc). Supply the verb $\pi \alpha \sigma \chi \varepsilon$ (condition of first class, "if one suffer as a Christian"). This word occurs only three times in the N.T. (Ac 11:26; 26:28; $1 \mathrm{Pe} 4: 16$ ). It is word of Latin formation coined to distinguish followers of Christ from Jews and Gentiles (Ac 11:26). Each instance bears that idea. It is not the usual term at first like $\mu \alpha \theta \eta \tau \alpha$ (disciples), saints ( $\alpha \gamma \ldots 0$ ), believers ( $\pi \iota \sigma \tau \varepsilon v o v \tau \varepsilon \varsigma$ ), etc. The Jews used $\mathrm{Na} \zeta \omega \rho \alpha \circ$ (Nazarenes) as a nickname for Christians (Ac 24:5). By A.D. 64 the name Christian was in common use in Rome (Tacitus, Ann. XV. 44). Owing to itacism it was sometimes spelled X $\varnothing \eta \sigma \tau \iota \alpha v o$ ( $\mathrm{t}, \varepsilon$ and $\eta$ pronounced alike).

Let him not be ashamed ( $\mu \eta$ aı $\sigma \chi \nu v \varepsilon \sigma \theta \omega$ ). Prohibition with $\mu \eta$ and present passive imperative of aıб $\chi \cup v \omega$. Peter had once been ashamed to suffer reproach or even a sneer for being a disciple of Christ (Mr 14:68). See the words of Jesus in Mr 8:38 and Paul's in 2Ti 1:12. Peter is not ashamed now. In this name ( $\varepsilon \nu \tau \omega$ ovouat $\tau 0 v \tau \omega$ ). Of Christian as in Mr 9:41, "because ye are Christ's."

1Pet 4:17
For the time is come (от о каı $\rho о \varsigma$ ). No predicate, probably $\varepsilon \sigma \tau \iota \nu$ (is) to be supplied. The phrase that follows comes from the vision of Ezekiel (chapter Eze 9 ). The construction is unusual with $\operatorname{\tau ov} \alpha \rho \xi \alpha \sigma \theta \alpha$ (genitive articular aorist middle infinitive of $\alpha \rho \chi \omega$ ), not exactly purpose or result, and almost in apposition (epexegetic), but note $\tau 0 v \varepsilon \lambda \theta \varepsilon \iota v$ used as subject in $\operatorname{Lu}$ 17:1. The persecution on hand (1:7) was a foretaste of more to come. By "house of God" he can mean the same as the "spiritual house" of 2:5 or a local church. Biggs even takes it to refer to the family.

And if it begin first at us ( $\varepsilon \delta \varepsilon \pi \rho \omega \tau \sigma v \alpha \varphi^{\prime} \eta \mu \omega v$ ). Condition of first class again, with the verb $\alpha \rho \chi \varepsilon \tau \alpha$ understood. "From us" ( $\alpha \varphi^{\prime} \eta \mu \omega v$ ) more exactly.

End ( $\tau \varepsilon \lambda o \varsigma)$. Final fate.

Of them that obey not the gospel of God ( $\tau \omega \nu \alpha \pi \varepsilon ı \theta o v \nu \tau \omega \nu \tau \omega \tau o v \theta \varepsilon o v \varepsilon v a \gamma \gamma \varepsilon \lambda เ \omega$ ). "Of those disobeying the gospel of God." See the same idea in Ro 2:8. See Mr 1:14 for believing in the gospel.

1Pet 4:18
And if the righteous is scarcely saved ( $\kappa \alpha \varepsilon$ о $\delta \iota \kappa \not \iota \varsigma \mu о \lambda ı \varsigma ~ \sigma \omega \zeta \varepsilon \tau \alpha$ ). First-class condition again with $\varepsilon$ and present passive indicative of $\sigma \omega \zeta \omega$. Quotation from $\operatorname{Pr} 11: 31$. See 3:12,14; Mt 5:20. But the Christian is not saved by his own righteousness (Php 3:9; Re 7:14 ). For $\mu \circ \lambda_{\imath} \varsigma$ see Ac 14:18 and for $\alpha \sigma \varepsilon \beta \eta \varsigma$ (ungodly, without reverence) see Ro 4:5; 2Pe 2:5.

Will appear ( $\varphi a v \varepsilon \iota \tau \alpha$ ). Future middle of $\varphi a \iota v \omega$, to show. For the question see Mr 10:24-26.

1Pet 4:19
Wherefore $(\omega \sigma \tau \varepsilon)$. Picking up the thread of consolation again (Bigg).
Commit their souls ( $\pi \alpha \rho \alpha \tau \iota \varepsilon \sigma \theta \omega \sigma \alpha v \tau \alpha \varsigma \psi v \chi \alpha \varsigma)$. Present (continuous) middle imperative third plural of $\pi \alpha \rho \alpha \tau \iota \theta \eta \mu$, old word, a banking figure, to deposit, as in $1 \mathrm{Ti} 1: 18 ; 2 \mathrm{Ti}$ 2:2, the word used by Jesus as he died (Lu 23:46).
 (1Pe 2:15,20).

## 1 Peter 5

1Pet 5:1
Who am a fellow-elder (o $\sigma \cup v \pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho o \varsigma)$. Earliest use of this compound in an inscription of B.C. 120 for fellow-elders (alderman) in a town, here only in N.T., in eccles. writers. For the word $\pi \rho \varepsilon \sigma \beta \nu \tau \varepsilon \rho o s$ in the technical sense of officers in a Christian church (like elder in the local synagogues of the Jews) see Ac 11:30; 20:17 . It is noteworthy that here Peter the Apostle ( $1: 1$ ) calls himself an elder along with ( $\sigma v v$ ) the other "elders."

A witness ( $\mu$ 人ртиऽ). This is what Jesus had said they must be (Ac 1:8) and what Peter claimed to be (Ac 3:15; 10:39). So Paul was to be a $\mu$ 人ртvc (Ac 22:15 ).

Who am also a partaker (о ка коьш $\omega$ voc). "The partner also," "the partaker also." See Lu 5:10; 2Co 1:7; 2Pe 1:4. See same idea in Ro 8:17. In Ga 3:23; Ro 8:18 we have almost this about the glory about to be revealed to us where $\mu \varepsilon \lambda \lambda \omega$ as here is used with the infinitive.

1Pet 5:2
Tend ( $\pi о \mu \alpha v \alpha \tau \varepsilon$ ). First aorist active imperative of $\pi о \mu \alpha ı \nu \omega$, old verb, from $\pi о \mu \eta \nu$ (shepherd) as in Lu 17:7. Jesus used this very word to Peter in the interview by the Sea of Galilee (Joh 21:16 ) and Peter doubtless has this fact in mind here. Paul used the word to the elders at Miletus (Ac 20:28). See 2:25 for the metaphor.
 ).

Exercising the oversight ( $\varepsilon \pi \iota \sigma \kappa о \pi о \cup \nu \tau \varepsilon \varsigma)$. Present active participle of $\varepsilon \pi \iota \sigma \kappa о \pi \varepsilon \omega$, old word (in Heb 12:15 alone in N.T.), omitted here by Aleph B.

Not by constraint ( $\mu \eta \alpha v \alpha \gamma \kappa \alpha \sigma \tau \omega \varsigma)$. Negative $\mu \eta$ because of the imperative. Old adverb from verbal adjective avaүкабтоৎ, here alone in N.T.

But willingly ( $\alpha \lambda \lambda \alpha$ عкоибוшऽ). By contrast. Old adverb, in N.T. only here and Heb 10:26.

Nor yet for filthy lucre ( $\mu \eta \delta \varepsilon$ aı $\sigma \rho \rho о к \varepsilon \rho \delta \omega \varsigma)$. A compound adverb not found elsewhere, but the old adjective aıб $\chi \rho \circ \kappa \varepsilon \rho \delta \eta \varsigma$ is in 1 Ti 3:8; Tit 1:7. See also Tit 1:11 "for the sake of filthy lucre" (aı $\sigma \rho \circ$ кє $\rho \delta$ ovc $\chi \alpha \rho \iota v$ ). Clearly the elders received stipends, else there could be no such temptation.

But of a ready mind ( $\alpha \lambda \lambda \alpha \alpha \rho \circ \theta \nu \mu \omega \varsigma$ ). Old adverb from $\pi \rho \circ \theta \nu \mu \circ \varsigma($ Mt 26:41 ), here only in N.T.

1Pet 5:3
Lording it over (катакирєєvovтєऽ). Present active participle of катакирıєvш, late compound (ката, кvрьоৎ) as in Mt 20:25.

The charge allotted to you ( $\tau \omega v \kappa \lambda \eta \rho \omega v$ ). "The charges," "the lots" or "the allotments." See it in Ac 1:17,25 in this sense. The old word meant a die (Mt 27:25) , a portion (Col 1:12;

1Pe 1:4 ), here the charges assigned (cf. Ac 17:4). From the adjective $\kappa \lambda \eta \rho$ ıкоя come our cleric, clerical, clerk. Wycliff translated it here "neither as having lordship in the clergie."

Making yourselves ensamples (тило $\gamma ı v \circ \mu \varepsilon v o$ ). Present active participle of $\gamma ı v \circ \mu \alpha$ and predicate nominative толо (types, models) for which phrase see 1Th 1:7. Continually becoming. See 2:21 for vтоүрацнос (writing-copy).

To the flock ( $\tau 0 v \pi о \mu \nu ı o v$ ). Objective genitive.
1Pet 5:4
When the chief Shepherd shall be manifested ( $\varphi \alpha v \varepsilon \rho \omega \theta \varepsilon v \tau о \varsigma ~ \tau о v ~ \alpha \rho \chi ı \pi о \mu \varepsilon v о \varsigma) . ~$ Genitive absolute with first aorist passive participle of $\varphi a v \varepsilon \rho \circ \omega$, to manifest, and genitive of $\alpha \rho \chi ı \pi о \iota \mu \eta \nu$, a compound ( $\alpha \rho \chi \iota, \pi о \not \mu \eta \nu$ ) after analogy of $\alpha \rho \chi \iota \varepsilon \rho \varepsilon \cup \varsigma$, here only in N.T., but in Testam. of Twelve Patrs. (Jud. 8) and on a piece of wood around an Egyptian mummy and also on a papyrus A.D. 338 (Deissmann, Light, etc., p. 100). See Heb 13:20 for о тон $\boldsymbol{\nu} \nu$ о $\mu \varepsilon$ үас (the Shepherd the great).

Ye shall receive ( $\kappa о \mu \varepsilon \iota \sigma \theta \varepsilon$ ). Future of коццک ( $1: 9$, which see).
The crown of glory that fadeth not away ( $\tau 0 v \alpha \mu \alpha \rho \alpha \nu \tau ı v o v \tau \eta \varsigma \delta o \xi \eta \varsigma \sigma \tau \varepsilon \varphi \alpha v o v$ ). For "crown" ( $\sigma \tau \varepsilon \varphi \alpha v o \varsigma)$ see Jas 1:12; 1Co 9:25; 2Ti 4:8; Re 2:10; 3:10; 4:4 . In the Gospels it is used only of the crown of thorns, but Jesus is crowned with glory and honor (Heb 2:9). In all these passages it is the crown of victory as it is here. See 1:4 for $\alpha \mu \alpha \rho \alpha v \tau o \varsigma$, unfading. A $\mu \alpha \rho \alpha v \tau i v o s$ is made from that word as the name of a flower $\alpha \mu \alpha \rho a v \theta$ (so called because it never withers and revives if moistened with water and so used as a symbol of immortality), "composed of amaranth" or "amarantine," "the amarantine (unfading) crown of glory."

1Pet 5:5
Be subject (ототаүףтع). Second aorist passive imperative of v voтабб .
Unto the elder ( $\pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho o \iota \varsigma)$. Dative case. Here the antithesis between younger and elder shows that the word refers to age, not to office as in 5:1. See a like change in meaning in 1Ti 5:1,17.

All ( $\pi \alpha \nu \tau \varepsilon \varsigma)$. All ages, sexes, classes.
Gird yourselves with humility ( $\tau \eta \nu \tau \alpha \pi \varepsilon \imath \nu о \varphi \rho о \sigma \cup v \eta \nu \varepsilon \gamma \kappa о \mu \beta \omega \sigma \alpha \sigma \theta \varepsilon$ ). First aorist middle imperative of $\varepsilon \gamma \kappa о \mu \beta о o \mu \alpha$, late and rare verb (in Apollodorus, fourth cent. B.C.), here only in N.T., from $\varepsilon v$ and конßоৎ (knot, like the knot of a girdle). Е $\gamma \kappa о \mu \beta \omega \mu \alpha$ was the white scarf or apron of slaves. It is quite probable that Peter here is thinking of what Jesus did (Joh 13:4ff. ) when he girded himself with a towel and taught the disciples, Peter in particular (Joh 13:9ff. ), the lesson of humility (Joh 13:15). Peter had at last learned the lesson (Joh 21:15-19).
 avтıт $\alpha \sigma \sigma \varepsilon \tau \alpha$ (present middle indicative of $\alpha v \tau \iota \tau \alpha \sigma \sigma \omega$ as in Jas 4:6 (quoted there as here from $\operatorname{Pr}$ 3:34).

1Pet 5:6

Humble yourselves therefore（ $\tau \alpha \pi \varepsilon เ v \omega \theta \eta \tau \varepsilon \circ v v$ ）．First aorist passive imperative of $\tau \alpha \pi \varepsilon เ v o \omega$ ，old verb，for which see Mt 18：4．Peter is here in the role of a preacher of humility． ＂Be humbled．＂

Under the mighty hand of God（v $\tau о \tau \eta \nu \kappa \rho a \tau \alpha \iota \alpha \nu \chi \varepsilon ı \rho \alpha$ тov $\theta \varepsilon o v$ ）．Common O．T． picture（Ex 3：19；20：33 ，etc．）．

That he may exalt you（ $\imath v a v \psi \omega \sigma \eta$ ）．Purpose clause with $t v a$ and first aorist active subjunctive of v$⿴ 囗 十$ ．$\omega$ ．Cf．Lu 14：11；Php 2：9．

In due time（ $\varepsilon v \kappa \alpha \rho \rho \omega$ ）．Same phrase in Mt 24：45．
1Pet 5：7
Casting（ $\varepsilon \pi \iota \rho \iota \psi \alpha v \tau \varepsilon \varsigma)$ ．First aorist active participle of $\varepsilon \pi \rho \rho \iota \tau \tau \omega$ ，old verb，to throw upon， in N．T．only here and Lu 19：35（casting their clothes on the colt），here from Ps 55：22 ．For $\mu \varepsilon \rho \mu \nu \alpha$ see Mt 6：25，31，34．

He careth（ $\alpha \nu \tau \omega \mu \varepsilon \lambda \varepsilon$ ）．Impersonal verb $\mu \varepsilon \lambda \varepsilon$（present active indicative）with dative avt $\omega$ ，＂it is a care to him．＂God does care（ Lu 21：18）．

1Pet 5：8
Be watchful（ $\gamma \rho \eta \gamma \quad \rho \eta \sigma \alpha \tau \varepsilon$ ）．First aorist active imperative of $\gamma \rho \eta \gamma \circ \rho \varepsilon \omega$ ，late present imperative from perfect $\varepsilon \gamma \rho \eta \gamma \circ \rho \alpha$（to be awake）from $\varepsilon \gamma \varepsilon \iota \omega$（to arouse），as in Mt 24：42 ． For v$\downarrow \psi \alpha \tau \varepsilon$ see 1：13；4：7．

Your adversary（o avtıסıкоৎ $\nu \mu \omega v$ ）．Old word for opponent in a lawsuit（Mt 5：25 ）．
The devil（ $\delta ı \alpha \beta$ o $o c$ ）．Slanderer．See on Mt 4：1 ．
As a roaring lion（ $\omega \varsigma \omega \rho v o \mu \varepsilon v o \varsigma \lambda \varepsilon \omega v$ ）．But Jesus is also pictured as the Lion of the tribe of Judah（Re 5：5）．But Satan
roars at the saints．Present middle participle $\omega \rho v o \mu \alpha$ ，old verb，here only in N．T．，to howl like a wolf，dog，or lion，of men to sing loud（Pindar）．See Ps 22：13．

Whom he may devour（ $\kappa \alpha \tau \alpha \pi \iota \varepsilon เ v)$ ．Second aorist active infinitive of $\kappa \alpha \tau \alpha \pi \iota v \omega$ ，to drink down．B does not have tiva，Aleph has tiva（somebody），＂to devour some one，＂while A has interrogative $\tau i v a$ ，＂whom he may devour＂（very rare idiom）．But the devil＇s purpose is the ruin of men．He is a＂peripatetic＂（ $\pi \varepsilon \rho ı \pi \alpha \tau \varepsilon$ ）like the peripatetic philosophers who walked as they talked．Satan wants all of us and sifts us all（Lu 22：31）．

1Pet 5：9
Whom withstand（ $\omega$ av $\tau \circ \sigma \tau \eta \tau \varepsilon$ ）．Imperative second aorist active（intransitive）of $\alpha v \theta \iota \sigma \tau \eta \mu$ ；same form in Jas $4: 7$ ，which see．Dative case of relative（ $\omega$ ）．For the imperative in a subordinate clause see verse 12；2Th 3：10； $2 \mathrm{Ti} 4: 15$ ；Heb 13：7．Cowardice never wins against the devil（2Ti 1：7），but only courage．

Steadfast in your faith（ $\sigma \tau \varepsilon \rho \varepsilon \circ \tau \eta \pi \iota \sigma \tau \varepsilon$ ）．Locative case $\pi \iota \sigma \tau \varepsilon$ ．$\Sigma \tau \varepsilon \rho \varepsilon \circ \varsigma$ is old adjective for solid like a foundation（2Ti 2：19）．

The same sufferings（ $\tau \alpha \alpha \nu \tau \alpha \tau \omega \nu \pi \alpha \theta \eta \mu \alpha \tau \omega v$ ）．An unusual construction with the genitive rather than the usual $\tau \alpha \alpha \cup \tau \alpha \pi \alpha \theta \eta \mu \alpha \tau \alpha$ ，perhaps as Hofmann suggests，＂the same
tax of sufferings" ("the same things in sufferings"). Probably this is correct and is like Xenophon's phrase in the Memorabilia (IV. 8. 8), $\tau \alpha$ тov $\gamma \eta \rho \omega \varsigma \varepsilon \pi \iota \tau \varepsilon \lambda \varepsilon \iota \sigma \theta \alpha$ (to pay the tax of old age).

Are accomplished ( $\varepsilon \pi \tau \tau \varepsilon \lambda \varepsilon \iota \sigma \theta \alpha)$. Present (and so process) middle (you are paying) or passive (is paid) infinitive of $\varepsilon \pi \iota \tau \varepsilon \lambda \varepsilon \omega$, old verb, to accomplish (2Co 7:1 ).

In your brethren who are in the world ( $\tau \eta \varepsilon v \tau \omega \kappa о \sigma \mu \omega v \mu \omega \nu \alpha \delta \varepsilon \lambda \varphi \circ \tau \eta \tau$ ). Associateinstrumental case $\alpha \delta \varepsilon \lambda \varphi o \tau \eta \tau$ (in N.T. only here and 2:17, which see) after $\tau \alpha \alpha \cup \tau \alpha$ (like 1Co 11:5) or dative after $\varepsilon \pi \iota \tau \varepsilon \lambda \varepsilon เ \sigma \theta \alpha$. Even so $\varepsilon ı \delta o \tau \varepsilon \varsigma ~(s e c o n d ~ p e r f e c t ~ a c t i v e ~ p a r t i c i p l e ~ o f ~ o ı ~ \delta \alpha) ~(~) ~$ with an infinitive usually means "knowing how to" (object infinitive) as in Lu 12:56; Php 3:18 rather than "knowing that" (indirect assertion) as taken above.

1Pet 5:10
 variegated grace of God).

In Christ ( $\varepsilon v$ X $\rho \iota \sigma \tau \omega$ ). A Pauline phrase (2Co 5:17-19 ), but Petrine also. For God's "calling" us (ка入єбаৎ) see 1Th 5:23f.; 1Co 1:8f.; Ro 8:29f.

After that ye have suffered a little while ( $\mathrm{o} \lambda \downarrow$ о $\pi \pi \alpha$ Ovtac). Second aorist active participle of $\pi \alpha \sigma \chi \omega$, antecedent to the principal verbs which are future active (катартı $\sigma$, to mend, $\operatorname{Mr} 1: 19 ; \mathrm{Ga} 6: 1, \sigma \tau \eta \rho \iota \xi$, for which see Lu 9:51; $22: 32$, $\sigma \theta \varepsilon v \omega \sigma \varepsilon$ from $\sigma \theta \varepsilon v o$ and so far a $\alpha \pi \alpha \xi \lambda \varepsilon \gamma o \mu \varepsilon v o v$ like $\varepsilon v ı \sigma \chi \nu \omega$ according to Hesychius). For o $\lambda \iota \gamma o v$ see 1:6.

1Pet 5:11
To him ( $\alpha \cup \tau \omega$ ). To God (dative case). Note крaтoc in the doxology as in 1Ti 6:16 and briefer than the doxology in 1Pe 4:11, to Christ.

1Pet 5:12
By Silvanus ( $\delta \iota \alpha \Sigma \backslash \lambda o v a v o v)$. Probably this postscript ( $12-14$ ) is in Peter's own handwriting, as Paul did (2Th 3:17f.; Ga 6:11-18 ). If so, Silvanus (Silas) was the amanuensis and the bearer of the Epistle.

As I account him ( $\omega \varsigma \lambda$ 人 $\gamma \iota \zeta$ о $\mu \alpha$ ). Peter uses Paul's phrase (1Co 4:1; Ro 8:18) in giving approval to Paul's former companion (Ac 15:40).

I have written $(\varepsilon \gamma \rho \alpha \psi \alpha)$. Epistolary aorist applying to this Epistle as in 1Co 5:11 (not 1Co 5:9 ); 1Co 9:15; Ga 6:11; Ro 15:15; Phm 1:19,21 .

Briefly ( $\delta \mathrm{I}^{\prime}$ o $\lambda \downarrow \gamma \omega v$ ). "By few words," as Peter looked at it, certainly not a long letter in fact. Cf. Heb 13:22 .

Testifying ( $\varepsilon \pi \tau \mu \alpha \rho \tau v \rho \omega v)$. Present active participle of $\varepsilon \pi \mu \mu \alpha \rho \tau v \rho \varepsilon \omega$, to bear witness to, old compound, here alone in N.T., though the double compound $\sigma v v \varepsilon \pi \mu \mu \rho \tau v \rho \varepsilon \omega$ in Heb 2:4.

That this is the true grace of God ( $\tau \alpha v \tau \eta v \varepsilon เ v a \alpha \lambda \eta \theta \eta \chi \alpha \rho ı \nu$ тov $\theta \varepsilon o v$ ). Infinitive $\varepsilon ı \nu \alpha$ in indirect assertion and accusative of general reference ( $\tau \alpha \nu \tau \eta \nu$ ) and predicate accusative
$\chi \alpha \rho ı v$. Peter includes the whole of the Epistle by God's grace ( $1: 10$ ) and obedience to the truth (Joh 1:17; Gal 2:5; Col 1:6 ).

Stand ye fast therein ( $\varepsilon \varsigma \eta \nu \sigma \tau \eta \tau \varepsilon$ ). "In which (grace) take your stand" (ingressive aorist active imperative of $\iota \sigma \tau \eta \mu)$.

1Pet 5:13
She that is in Babylon, elect together with you ( $\eta \varepsilon v B \alpha \beta v \lambda \omega v \sigma v v \varepsilon \kappa \lambda \varepsilon \kappa \tau \eta$ ). Either actual Babylon or, as most likely, mystical Babylon (Rome) as in the Apocalypse. If Peter is in Rome about A.D. 65, there is every reason why he should not make that fact plain to the world at large and least of all to Nero. It is also uncertain whether $\eta \sigma 0 v \varepsilon \kappa \lambda \varepsilon \kappa \tau \eta$ (found here alone), "the co-elect woman," means Peter's wife (1Co 9:5 ) or the church in "Babylon." The natural way to take it is for Peter's wife. Cf. $\varepsilon \kappa \lambda \varepsilon \kappa \tau \eta \eta \kappa \nu \rho \iota \alpha$ in 2Jo 1:1 (also verse 2Jo 1:13).

Mark my son (Маркоц o vioc $\mu$ оv). So this fact agrees with the numerous statements by the early Christian writers that Mark, after leaving Barnabas, became Peter's "interpreter" and under his influence wrote his Gospel. We know that Mark was with Paul in Rome some years before this time ( $\operatorname{Col} 4: 10$ ).

1Pet 5:14
With a kiss of love ( $\varepsilon v \varphi \mid \lambda \eta \mu \alpha \tau \alpha \gamma a \pi \eta \varsigma)$. As in 1Co 16:20. The abuse of this custom led to its confinement to men with men and women with women and to its final abandonment (Apost. Const. ii. 57, 12).

That are in Christ ( $\tau \circ \iota \varsigma \nu \mathrm{X} \rho \iota \sigma \tau \omega$ ). This is the greatest of all secret orders and ties, one that is open to all who take Christ as Lord and Saviour.

## THE SECOND EPISTLE OF PETER

ABOUT A.D. 66 OR 67

## BY WAY OF INTRODUCTION

MOST DOUBTFUL NEW TESTAMENT BOOK
Every book in the New Testament is challenged by some one, as indeed the historicity of Jesus Christ himself is and the very existence of God. But it is true that more modern scholars deny the genuineness of II Peter than that of any single book in the canon. This is done by men like F. H. Chase, J. B. Mayor, and R. D. Strachan, who are followers of Christ as Lord and Saviour. One has to admit that the case concerning II Peter has problems of peculiar difficulty that call for careful consideration and balanced judgment. One other word needs to be said, which is that an adverse decision against the authenticity of II Peter stands by itself and does not affect the genuineness of the other books. It is easy to take an extreme position for or against it without full knowledge of all the evidence.

SLOW IN GENERAL ACCEPTANCE
It was accepted in the canon by the council at Laodicea (372) and at Carthage (397). Jerome accepted it for the Vulgate, though it was absent from the Peshito Syriac Version. Eusebius placed it among the disputed books, while Origen was inclined to accept it. Clement of Alexandria accepted it and apparently wrote a commentary on it. It is probable that the so-called Apocalypse of Peter (early second century) used it and the Epistle of Jude either used it or II Peter used Jude. There are undoubted allusions also to phrases in II Peter in Aristides, Justin Martyr, Irenaeus, Ignatius, Clement of Rome. When one considers the brevity of the Epistle, the use of it is really as strong as one can expect. Athanasius and Augustine accepted it as genuine, as did Luther, while Calvin doubted and Erasmus rejected it. It may be said for it that it won its way under criticism and was not accepted blindly.

CLAIMS PETRINE AUTHORSHIP
Not only so, but in fuller form than 1Pe 1:1, for the writer terms himself"Simon (Symeon in some MSS.) Peter," a fact that has been used against the genuineness. If no claim had been made, that would have been considered decisive against him. Simon (Symeon was the Jewish form as used by James in Ac 15:14) is the real name (Joh 1:42) and Peter merely the Greek for Cephas, the nickname given by Christ. There is no reason why both could not properly be employed here. But the claim to Petrine authorship, if not genuine, leaves the Epistle pseudonymous. That was a custom among some Jewish writers and even Christian writers, as the spurious Petrine literature testifies (Gospel of Peter, Apocalypse of Peter, etc.), works of a heretical or curious nature. Whatever the motive for such a pious fraud, the fact remains that II Peter, if not genuine, has to take its place with this pseudonymous literature and can hardly be deemed worthy of a place in the New Testament. And yet there
is no heresy in this Epistle, no startling new ideas that would lead one to use the name of Simon Peter. It is the rather full of edifying and orthodox teaching.

## AND PERSONAL EXPERIENCES OF PETER

The writer makes use of his own contact with Jesus, especially at the Transfiguration of Christ (Mr 9:2-8; Mt 17:1-8; $\mathrm{Lu} 9: 28-36$ ). This fact has been used against the genuineness of the Epistle on the plea that the writer is too anxious, anyhow, to show that he is Symeon Peter (2Pe 1:1). But Bigg rightly replies that, if he had only given his name with no personal contacts with Jesus, the name would be called "a forged addition." It is possible also that the experience on the Mount of Transfiguration may have been suggested by Peter's use of $\varepsilon \xi \mathrm{o}$ oc for his own death ( $2 \mathrm{Pe} 1: 15$ ), the very word used by Luke (Lu 9:31) as the topic of discussion between Jesus and Moses and Elijah. There is also in 2Pe 1:13 the use of "tent" ( $\sigma \kappa \eta v o \mu \alpha)$ for the life in the body, like Peter's use of "tents" ( $\sigma \kappa \eta v a \varsigma$ ) to Jesus at that very time (Mr 9:5; Mt 17:4; Lu 9:33). In 2Pe 1:14 Peter also refers to the plain words of Jesus about his coming death (Joh 21:18f. ). In 2Pe 1:15 Peter speaks of his own plan for preserving the knowledge of Jesus when he is gone (possibly by Mark's Gospel). All this is in perfect keeping with Peter's own nature.

## AND YET THE EPISTLE DIFFERS IN STYLE FROM FIRST PETER

This is a fact, though one greatly exaggerated by some scholars. There are many points of similarity, for one thing, like the habit of repeating words ( $\varepsilon \pi \downarrow \chi \circ \rho \eta \gamma \varepsilon \omega$ in 2Pe 1:10,19, $\hat{\mathrm{I}}^{2} \hat{\mathrm{I}} \hat{\mathrm{I}}^{2} \hat{\mathrm{I}} \pm \hat{I}^{1} \hat{\mathrm{I}} \dot{\mathrm{c}}$ Ï $\boxtimes$ in $2 \mathrm{Pe} 1: 12,13,15, \pi \rho \circ \varphi \eta \tau \varepsilon 1 \alpha$ in $2 \mathrm{Pe} 1: 20 ; 3: 3$, etc.). These repetitions occur all through the Epistle as in I Peter. "This is a matter of very high importance" (Bigg). Again in both Epistles there is a certain dignity of style with a tendency to iambic rhythm. There is more quotation of the Old Testament in I Peter, but frequent allusion to words and phrases in II Peter. There are more allusions to words and facts in the Gospels in I Peter than in II Peter, though some do occur in II Peter. Besides those already given, note 2Pe 1:8 (Lu 13:7f. ), 2Pe 2:1 (Mt 10:33 ), 2Pe 2:20 (Mt 12:45; Lu 11:26), 2Pe 3:4 (Mt 24:1ff. ), and possibly 2Pe 1:3 to Christ's calling the apostles. Both appear to know and use the O.T. Apocrypha. Both are fond of the plural of abstract substantives. Both make sparing use of Greek particles. Both use the article similarly, idiomatically, and sometimes not using it. There are some 361 words in 1 Peter not in II Peter, 231 in II Peter not in I Peter. There are $686 \alpha \pi \alpha \xi \lambda \varepsilon \gamma \circ \mu \varepsilon v \alpha$ in N.T., 54 in II Peter instead of the average of 62, a large number when the brevity of the Epistle is considered. There are several ways of explaining these variations. One way is to say that they are written by different men, but difference of subject has to be borne in mind. All writers and artists have an early and a later manner. Another solution is that Peter employed different amanuenses. Silvanus was the one for I Peter (1Pe 5:12). Mark was Peter's usual interpreter, but we do not know who was the amanuensis for II Peter, if indeed one was used. We know from Ac 4:13 that Peter and John were considered unlettered men
( $\alpha \gamma \rho \alpha \mu \mu \alpha \tau о$ ка $เ \delta เ \omega \tau \alpha$ ). II Peter and the Apocalypse illustrate this statement. II Peter may have more of Peter's real style than I Peter.

## HE ACCEPTS PAUL'S EPISTLES AS SCRIPTURE

This fact (2Pe 3:15f. ) has been used as conclusive proof by Baur and his school that Peter could not have written the Epistle after the stern rebuke from Paul at Antioch (Ga 2:11f. ). But this argument ignores one element in Peter's impulsive nature and that is his coming back as he did with Jesus. Paul after that event in Antioch spoke kindly of Peter (1Co 9:5 ). Neither Peter nor Paul cherished a personal grudge where the Master's work was involved. It is also objected that Peter would not have put Paul's Epistles on the level with the O.T. and call them by implication "Scripture." But Paul claimed the help of the Holy Spirit in his writings and Peter knew the marks of the Holy Spirit's power. Besides, in calling Paul's Epistles Scripture he may not have meant to place them exactly on a par with the Old Testament.

## THE RESEMBLANCE TO THE EPISTLE OF JUDE

This is undoubted, particularly between Jude and the second chapter of II Peter. Kuhl argues that $2 \mathrm{Pe} 2: 1-3: 2$ is an interpolation, though the same style runs through out the Epistle. "The theory of interpolation is always a last and desperate expedient" (Bigg). In II Peter 2 we have the fallen angels, the flood, the cities of the plain with Lot, Balaam. In Jude we have Israel in the wilderness, the fallen angels, the cities of the plain (with no mention of Lot, Cain, Balaam, Korah). Jude mentions the dispute between Michael and Satan, quotes Enoch by name. There is rather more freshness in Jude than in II Peter, though II Peter is more intelligible. Evidently one had the other before him, besides other material. Which is the earlier? There is no way to decide this point clearly. Every point is looked at differently and argued differently by different writers. My own feeling is that Jude was before (just before) II Peter, though it is only a feeling and not a conviction.

## ANACHRONISMS

It used to be said that it was impossible for II Peter to have been written in the first century, because it had the atmosphere of the second. But one fact is strongly against that argument. In $2 \mathrm{Pe} 3: 8$ occurs the quotation of Ps $90: 4$ about the thousand years without any chiliastic turn at all, a thing sure to happen in the second century after chiliasm had come to have such a swing. Peter's use of it suits the first century, not the second. As a matter of fact, the false teachers described in II Peter suit the first century precisely if one recalls Paul's troubles with the Judaizers in Galatia and Corinth and with the Gnostics in Colossae and Ephesus. "Every feature in the description of the false teachers and mockers is to be found in the apostolic age" (Bigg).

## THE READERS

The author says that this is his second Epistle to them (2Pe 3:1), and that means that he is writing to the saints in the five Roman provinces in Asia Minor to whom the first

Epistle was sent ( 1 Pe 1:1). Spitta and Zahn deny this on the ground that the two Epistles do not discuss the same subjects, surely a flimsy objection. Zahn even holds that II Peter precedes I Peter and that the Epistle referred to in 2Pe 3:1 has been lost. He holds that II Peter was addressed to the church in Corinth. He considers the readers to be Jews while I Peter was addressed to Gentiles. But "there is nothing in II Peter to differentiate its first readers from those of I Peter" (Bigg).

THE PURPOSE
Certainly Peter is here concerned chiefly with the heresies of that general region in Asia Minor that so disturbed Paul (Colossians, Ephesians, Pastoral Epistles) and John (Gospel, Epistles, Apocalypse). Paul early foresaw at Miletus these wolves that would ravish the sheep (Ac 20:29f. ). In I Peter he is concerned chiefly with the fiery persecutions that are upon them, but here with the heretics that threaten to lead them astray.

## BALANCE OF PROBABILITY

There are difficulties in any decision about the authorship and character of II Peter. But, when all things are considered, I agree with Bigg that the Epistle is what it professes to be by Simon Peter. Else it is pseudonymous. The Epistle more closely resembles the other New Testament books than it does the large pseudepigraphic literature of the second and third centuries.

## THE DATE

If we accept the Petrine authorship, it must come before his death, which was probably A.D. 67 or 68. Hence the Epistle cannot be beyond this date. There are those who argue for A.D. 64 as the date of Peter's death, but on insufficient grounds in my opinion.

## BOOKS ON II PETER BESIDES THOSE ON I PETER

 ALSOAbbott, E. A., The Expositor (Jan. to March, 1822). Chase, F. H., Hastings D B (Second Peter). De Zwaan, 2 Peter en Judas (1909). Dietlein, W. O., Der 2 Brief Petri (1851). ## 2 Peter 1

2Pet 1:1
Simon Peter ( $\Sigma \mu \omega \nu$ Пєт $о \varsigma)$. Aleph A K L P have $\Sigma \psi \mu \varepsilon \omega v$ as in Ac 15:14, while B has $\Sigma \mu \omega \omega$. The two forms occur indifferently in I Macc. 2:3, 65 for the same man.

Servant and apostle ( $\delta$ оидос ка алобто入ос). Like Ro 1:1; Tit 1:1 .
To them that have obtained ( $\tau 0 ı \varsigma \lambda \alpha \chi o v \sigma \iota v$ ). Dative plural articular participle second aorist active of $\lambda \alpha \gamma \chi \alpha v \omega$, old verb, to obtain by lot (Lu 1:9), here with the accusative ( $\pi / \sigma \tau \iota v$ ) as in Ac 1:17.

Like precious ( $\quad \sigma 0 \tau \tau \mu \circ v$ ). Late compound adjective (เбoৎ, equal, $\tau \mu \eta$, honor, price), here only in N.T. But this adjective (Field) is used in two ways, according to the two ideas in $\tau \mu \mu \eta$ (value, honor), either like in value or like in honor. This second idea is the usual one with $\boldsymbol{\sigma o \tau} \mu \mu \circ$ (inscriptions and papyri, Josephus, Lucian), while $\pi о \lambda \nu \tau \mu \mu \circ$ has the notion of price like $\tau \mu \eta$ in 1:7,19; 2:4,6f. The faith which they have obtained is like in honor and privilege with that of Peter or any of the apostles.

With us $(\eta \mu \nu)$. Associative-instrumental case after too $\tau \mu \mathrm{\mu} v$. Equal to $\tau \eta \eta \omega \nu$ (the faith of us).

In the righteousness ( $\varepsilon v \delta$ ıкaıoбvvŋ). Definite because of the preposition $\varepsilon v$ and the following genitive even though anarthrous. The O.T. sense of $\delta$ ıкaıoouv $\eta$ applied to God (Ro 1:17) and here to Christ.

Of our God and Saviour Jesus Christ ( $\tau$ ov $\theta \varepsilon o v ~ \eta \mu \omega v$ ка $\sigma \omega \tau \eta \rho o \varsigma$ I $\eta \sigma o v$ X $\rho ı \sigma \tau o v$ ). So the one article ( $\tau 0 v$ ) with $\theta \varepsilon o v$ and $\sigma \omega \tau \eta \rho o s$ requires precisely as with tov кvpıov $\eta \mu \omega \nu$ ка $\sigma \omega \tau \eta \rho \circ \varsigma$ I $\eta \sigma o v$ Xpıбтоv (of our Lord and Saviour Jesus Christ), one person, not two, in 1:11 as in 2:20; 3:2,18. So in 1Pe 1:3 we have o $\theta \varepsilon$ коऽ ка $\pi \alpha \tau \eta \rho$ (the God and Father), one person, not two. The grammar is uniform and inevitable (Robertson, Grammar, p. 786), as even Schmiedel (Winer-Schmiedel, Grammatik, p. 158) admits: "Grammar demands that one person be meant." Moulton (Prol., p. 84) cites papyri examples of like usage of $\theta \varepsilon o c$ for the Roman emperors. See the same idiom in Tit 2:13. The use of $\theta \varepsilon o \varsigma$ by Peter as a predicate with Jesus Christ no more disproves the Petrine authorship of this Epistle than a like use in Joh 1:1 disproves the Johannine authorship of the Fourth Gospel and the same use in Tit 2:13 disproves the genuineness of Titus. Peter had heard Thomas call Jesus God (Joh 20:28 ) and he himself had called him the Son of God (Mt 16:16).

2Pet 1:2
Be multiplied ( $\pi \lambda \eta \theta v v \theta \varepsilon ı \eta$ ). First aorist passive optative of $\pi \lambda \eta \theta \nu v \omega$ in a wish for the future (volitive use) as in 1Pe 1:2; Jude 1:2 .

In the knowledge ( $\varepsilon v \varepsilon \pi \iota \gamma \nu \omega \sigma \varepsilon$ ). Full (additional, $\varepsilon \pi$ ) knowledge as in 1:8 (only $\gamma \nu \omega \sigma \iota$ in $1: 5,6 ; 3: 18$ ), but $\varepsilon \pi \imath \gamma v \omega \sigma \iota v$ again in $1: 3,8 ; 2: 20$. As in Colossians, so here full knowledge is urged against the claims of the Gnostic heretics to special $\gamma \nu \omega \sigma \iota \varsigma$.

Of God and of Jesus our Lord ( $\tau 0 v$ Өzov ка Iqбov $\tau 0 v$ кирıv $\eta \mu \omega v$ ). At first sight the idiom here seems to require one person as in 1:1, though there is a second article ( $\tau 0 v$ ) before кv $\rho \circ$, and Inбov is a proper name. But the text here is very uncertain. Bengel, Spitta, Zahn, Nestle accept the short reading of P and some Vulgate MSS. and some minuscles with only
 in II Peter $\gamma \nu \omega \sigma \iota \varsigma$ and $\varepsilon \pi \iota \gamma \nu \omega \sigma \iota \varsigma$ are used of Christ alone. The text of II Peter is not in a good state of preservation.

2Pet 1:3
Seeing that his divine power hath granted unto us ( $\omega \varsigma \eta \mu \iota \nu \tau \eta \varsigma \theta \varepsilon ı \alpha \varsigma \delta v v \alpha \mu \varepsilon \omega \varsigma \propto \cup \tau o v$ $\delta \varepsilon \delta \omega \rho \eta \mu \varepsilon \nu \eta \zeta)$. Genitive absolute with the causal particle $\omega \varsigma$ and the perfect middle participle of $\delta \omega \rho \varepsilon \omega$, old verb, to bestow ( $\delta \omega \rho \varepsilon \alpha$, gift), usually middle as here, in N.T. elsewhere only Mr 15:45. Avtov refers to Christ, who has "divine power" ( $\tau\rceil \varsigma \varepsilon \varepsilon ı \alpha \varsigma ~ \delta v \nu \alpha \mu \varepsilon \omega \varsigma)$, since he is $\theta \varepsilon \circ \varsigma(1: 1) . \Theta \varepsilon \iota o \varsigma(f r o m \theta \varepsilon o \varsigma)$ is an old adjective in N.T. here and verse 4 only, except Ac 17:29, where Paul uses to $\theta \varepsilon เ o v$ for deity, thus adapting his language to his audience as the papyri and inscriptions show. The use of $\theta \varepsilon เ o \varsigma$ with an imperial connotation is very common in the papyri and the inscriptions. Deissmann (Bible Studies, pp. 360-368) has shown the singular linguistic likeness between 2 Pe 1:3-11 and a remarkable inscription of the inhabitants of Stratonicea in Caria to Zeus Panhemerios and Hecate dated A.D. 22 (in full in C I H ii No. 2715 a b). One of the likenesses is the use of $\tau \eta \varsigma \theta \varepsilon \iota a \varsigma \delta \nu v a \mu \varepsilon \omega \varsigma$. Peter may have read this inscription (cf. Paul in Athens) or he may have used "the familiar forms and formulae of religious emotion" (Deissmann), "the official liturgical language of Asia Minor." Peter is fond of $\delta v v a \mu ı$ in this Epistle, and the $\delta v v a \mu \iota \varsigma$ of Christ "is the sword which St. Peter holds over the head of the False Teachers" (Bigg).

All things that pertain unto life and godliness ( $\pi \alpha \nu \tau \alpha \tau \alpha \pi \rho \circ \varsigma \zeta \omega \eta \nu \kappa \alpha \varepsilon v \sigma \varepsilon \beta \varepsilon \iota \alpha \nu$ ). "All the things for life and godliness." The new life in Christ who is the mystery of godliness (1Ti 3:16). Evoॄ $\beta \varepsilon ı \alpha$ with its cognates ( $\varepsilon v \sigma \varepsilon \beta \eta \sigma, \varepsilon v \sigma \varepsilon \beta \omega \sigma, \varepsilon v \sigma \varepsilon \beta \varepsilon \omega$ ) occurs only in this Epistle, Acts, and the Pastoral Epistles (from $\varepsilon v$, well, and $\sigma \varepsilon \beta o \mu a$, to worship).

Of him that called us ( $\tau 0 v \kappa \alpha \lambda \varepsilon \sigma \alpha v \tau \circ \varsigma)$. Genitive of the articular first aorist active participle of $\kappa \alpha \lambda \varepsilon \omega$. Christ called Peter and all other Christians.

By his own glory and virtue ( $\delta \iota \alpha \delta o \xi \eta \varsigma \kappa \alpha \alpha \rho \varepsilon \tau \eta \varsigma)$. So B K L, but Aleph A C P read $\iota \delta \iota \alpha \delta \xi \eta \kappa \alpha \alpha \rho \varepsilon \tau \eta$ (either instrumental case "by" or dative "to"). Peter is fond of $\delta \delta \iota \varsigma$ (own, $1 \mathrm{Pe} 3: 1,5 ; 2 \mathrm{Pe} 2: 16,22$, etc.). "Glory" here is the manifestation of the Divine Character in Christ. For $\alpha \rho \varepsilon \tau \eta$ see on $1 \mathrm{Pe} 2: 9$ and Php 4:8; 2Pe 1:5.

2Pet 1:4
Whereby ( $\delta \iota^{\prime} \omega v$ ). Probably the "glory and virtue" just mentioned, though it is possible to take it with $\pi \alpha v \tau \alpha \tau \alpha \pi \rho \circ \varsigma$, etc., or with $\eta \mu \nu v$ (unto us, meaning "through whom").

He hath granted ( $\delta \varepsilon \delta \omega \rho \eta \tau \alpha$ ). Perfect middle indicative of $\delta \omega \rho \varepsilon \omega$, for which see verse 3.

His precious and exceeding great promises ( $\tau \alpha \tau \mu \iota \alpha \kappa \alpha \mu \varepsilon \gamma \mid \sigma \tau \alpha \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \mu \alpha \tau \alpha$ ). Eлa $\gamma \gamma \varepsilon \lambda \mu \alpha$ is an old word (from $\varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$ ) in place of the common $\varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda ı \alpha$, in N.T. only here and $3: 13$. T $\mu \boldsymbol{\mu} \circ \varsigma$ (precious, from $\tau \mu \eta$, value), three times by Peter ( $1 \mathrm{Pe} 1: 7$ of faith; 1:19 of the blood of Christ; 2 Pe 1:4 of Christ's promises). M $\varepsilon \boldsymbol{\gamma}$ гтa is the elative superlative used along with a positive adjective ( $\tau \mu \mu \alpha)$.

That ye may become ( $\imath v \alpha \varepsilon v \eta \sigma \theta \varepsilon$ ). Purpose clause with tva and second aorist middle subjunctive of $\gamma$ ivo $\mu$.

Through these ( $\delta \iota \alpha$ tovt $\omega v$ ). The promises.
Partakers (коוv $\omega v$ о). Partners, sharers in, for which word see 1Pe 5:1 .
Of the divine nature ( $\theta \varepsilon ા \alpha \varsigma \varphi \cup \sigma \varepsilon \omega \varsigma)$. This phrase, like тo $\theta \varepsilon ו \circ v$ in Ac 17:29, "belongs rather to Hellenism than to the Bible" (Bigg). It is a Stoic phrase, but not with the Stoic meaning. Peter is referring to the new birth as 1Pe 1:23 ( $\alpha v \alpha \gamma \varepsilon \gamma \varepsilon v v \eta \mu \varepsilon v o$ ). The same phrase occurs in an inscription possibly under the influence of Mithraism (Moulton and Milligan's Vocabulary).

Having escaped ( $\alpha \pi \sigma \varphi \cup \gamma о \nu \tau \varepsilon \varsigma)$. Second aorist active participle of $\alpha \pi \circ \varphi \varepsilon \cup \gamma \omega$, old compound verb, in N.T. only here and 2:18-20, with the ablative here ( $\varphi \theta$ opac, old word from $\varphi \theta \varepsilon \iota \rho \omega$, moral decay as in 2:12) and the accusative there.

By lust ( $\varepsilon v \varepsilon \pi \downarrow \theta \nu \mu i \alpha)$. Caused by, consisting in, lust. "Man becomes either regenerate or degenerate" (Strachan).

2Pet 1:5
Yea, and for this very cause ( $\kappa \alpha \alpha \cup \tau о ~ \tau о ⿱ \tau 兀 о ~ \delta \varepsilon) . ~ A d v e r b i a l ~ a c c u s a t i v e ~(\alpha u \tau о ~ \tau о и \tau о) ~$ here, a classic idiom, with both $\kappa \alpha$ and $\delta \varepsilon$. Cf. ка тоито (Php 1:29), тоито $\mu \varepsilon v$--тоито $\delta \varepsilon$ (Heb 10:33). "The soul of religion is the practical part" (Bunyan). Because of the new birth and the promises we have a part to play.

Adding on your part ( $\pi \alpha \rho \varepsilon เ \sigma \varepsilon v \varepsilon \gamma \kappa \alpha \nu \tau \varepsilon \varsigma)$. First aorist active participle of $\pi \alpha \rho \varepsilon \varepsilon \sigma \varphi \varepsilon \rho \omega$, old double compound, to bring in ( $\varepsilon \| \sigma \varphi \varepsilon \rho \omega$ ), besides ( $\pi \alpha \rho \alpha$ ), here only in N.T.

All diligence ( $\sigma \pi \sigma v \delta \eta \nu \pi \alpha \sigma \alpha v$ ). Old word from $\sigma \pi \varepsilon v \delta \omega$ to hasten (Lu 19:5f. ). This phrase ( $\pi \alpha \sigma \alpha v \sigma \pi \sigma u \delta \eta v)$ occurs in Jude 1:3 with $\pi o t o u \mu \varepsilon v o s$ and on the inscription in Stratonicea (verse 3) with $\iota \sigma \varphi \rho \varepsilon \sigma \theta \alpha$ (certainly a curious coincidence, to say the least, though common in the Koine).

In your faith ( $\varepsilon v \tau \eta \pi \iota \sigma \tau \varepsilon \nu \mu \omega v$ ). Faith or $\pi \iota \sigma \tau \iota \varsigma$ (strong conviction as in Heb 11:1,3, the root of the Christian life Eph 2:8) is the foundation which goes through various steps up to love ( $\alpha \gamma \alpha \pi \eta$ ). See similar lists in Jas 1:30; 1Th 1:3; 2Th 1:3f.; Ga 5:22f.; Ro 5:3f.; 8:29f .Hermas (Vis. iii. 8. 1-7) has a list called "daughters" of one another. Note the use of $\varepsilon v$ (in, on) with each step.

Supply ( $\varepsilon \pi \chi \chi \circ \rho \eta \gamma \eta \sigma \alpha \tau \varepsilon$ ). First aorist active imperative of $\varepsilon \pi \chi \chi \circ \rho \eta \gamma \varepsilon \omega$, late and rare double compound verb ( $\varepsilon \pi$ and $\chi \circ \rho \eta \gamma \varepsilon \omega 1$ 1Pe 4:11 from $\chi \circ \rho \eta \gamma \circ \varsigma$, chorus-leader, $\chi \circ \rho \circ \varsigma$ and $\eta \gamma \varepsilon o \mu \alpha$, to lead), to fit out the chorus with additional (complete) supplies. Both compound
and simplex (more common) occur in the papyri. In 1:11 and already in 2Co 9:10; Ga 3:5; Col 2:19.

Virtue ( $\alpha \rho \varepsilon \tau \eta v$ ). Moral power, moral energy, vigor of soul (Bengel). See 3.
Knowledge ( $\gamma \nu \omega \sigma \iota v$ ). Insight, understanding (1Co 16:18; Joh 15:15 ).
2Pet 1:6
Temperance ( $\tau \eta \nu \varepsilon \gamma \kappa \rho \alpha \tau \varepsilon \iota \alpha v$ ). Self-control. Old word (from $\varepsilon \gamma \kappa \rho \alpha \tau \eta \varsigma, \varepsilon \nu$ and $\kappa \rho \alpha \tau \circ \varsigma$, one holding himself in as in Tit 1:8 ), in N.T. only here, Ac 24:25; Ga 5:23. The opposite of the $\pi \lambda \varepsilon \sigma v \varepsilon \xi ı \alpha$ of the heretics.

Patience ( $\tau \eta v v \pi \sigma \mu \circ v \eta \nu$ ). For which see Jas 1:3.
Godliness ( $\tau \eta v \varepsilon v \sigma \varepsilon \beta \varepsilon \iota \alpha v)$. For which see verse 3.
2Pet 1:7
Love of the brethren ( $\tau \eta \nu \varphi i \lambda \alpha \delta \varepsilon \lambda \varphi \iota \alpha v$ ). See 1Pe 1:22.
Love ( $\tau \eta v a \gamma a \pi \eta v$ ). By deliberate choice (Mt 5:44). Love for Christ as the crown of all (1Pe 1:8) and so for all men. Love is the climax as Paul has it (1Co 13:13).

2Pet 1:8
For if these things are yours and abound ( $\tau \alpha v \tau \alpha \gamma \alpha \rho \nu \mu \nu \nu \tau \alpha \rho \chi о \nu \tau \alpha \kappa \alpha \pi \lambda \varepsilon \sigma \nu \alpha \zeta о \tau \alpha)$. Present active circumstantial (conditional) participles neuter plural of $v \pi \alpha \rho \chi \omega$ and $\pi \lambda \varepsilon \sigma v \alpha \zeta \omega$ (see 1Th 3:12 ) with dative case $v \mu v$, "these things existing for you (or in you) and abounding."

They make you to be ( $\kappa \alpha \theta \iota \sigma \tau \eta \sigma \iota v$ ). "Render" (present active indicative of $\kappa \alpha \theta \iota \sigma \tau \eta \mu$, old verb, Jas 3:6 ), singular because $\tau \alpha v \tau \alpha$ neuter plural.

Not idle nor unfruitful (оик арүоия оиб $\alpha \kappa \alpha \rho \pi о и \varsigma) . ~ A c c u s a t i v e ~ p r e d i c a t i v e ~ p l u r a l ~$ with $v \mu a \varsigma$ understood, both adjectives with alpha privative, for $\alpha \rho \gamma \circ \varsigma$ see Jas 2:20 and for акартос Mt 13:22.

Knowledge ( $\varepsilon \pi \imath \gamma \nu \omega \sigma \iota v$ ). "Full (additional) knowledge" as in 1:2.
2Pet 1:9
He that lacketh these things ( $\omega \mu \eta \pi \alpha \rho \varepsilon \sigma \tau \iota \nu \tau \alpha \nu \tau \alpha$ ). "To whom (dative case of possession) these things are not ( $\mu \eta$ because a general or indefinite relative clause)."

Seeing only what is near $(\mu \nu \omega \pi \alpha \zeta \omega v)$. Present active participle of $\mu \nu \omega \pi \alpha \zeta \omega$, a rare verb from $\mu \nu \omega \pi \varsigma$ (in Aristotle for a near-sighted man) and that from $\mu \nu \varepsilon \omega$ tovৎ $\omega \pi \alpha \varsigma$ (to close the eyes in order to see, not to keep from seeing). The only other instance of $\mu v \omega \pi \alpha \zeta \omega$ is given by Suicer from Ps. Dion. Eccl. Hier. ii. 3 ( $\mu v \omega \pi \alpha \sigma o v \sigma \eta \kappa \alpha \alpha \pi \sigma \sigma \tau \rho \varepsilon \varphi о \mu \varepsilon v \eta$ ) used of a soul on which the light shines (blinking and turning away). Thus understood the word here limits $\tau \cup \varphi \lambda$ oc as a short-sighted man screwing up his eyes because of the light.

Having forgotten ( $\lambda \eta \theta \eta v \lambda \alpha \beta \omega v$ ). "Having received forgetfulness." Second aorist active participle of $\lambda \alpha \mu \beta \alpha \nu \omega$ and accusative $\lambda \eta \theta \eta \nu$, old word, from $\lambda \eta \theta$ o $\mu \alpha$, to forget, here only in N.T. See 2Ti 1:5 for a like phrase $v \pi о \mu \nu \eta \sigma \iota \nu \alpha \beta \omega v$ (having received remembrance).

The cleansing ( $\tau$ ко $\kappa \alpha \theta \alpha \rho \iota \sigma \mu \circ v$ ). See Heb 1:3 for this word for the expiatory sacrifice of Christ for our sins as in 1Pe 1:18; 2:24; 3:18. In 1Pe 3:21 Peter denied actual cleansing of sin by baptism (only symbolic). If there is a reference to baptism here, which is doubtful, it can only be in a symbolic sense.

Old ( $\pi \alpha \lambda \alpha)$. Of the language as in Heb 1:1 .
2Pet 1:10
Wherefore ( $\delta$ to). Because of the exhortation and argument in verses 5-9.
Give the more diligence ( $\mu \alpha \lambda \lambda$ ov $\sigma \pi \sigma v \delta a \sigma a \tau \varepsilon$ ). "Become diligent (first aorist ingressive active imperative of $\sigma \pi o v \delta \alpha \zeta \omega$ as in $2 \mathrm{Ti} 2: 15 ; 2 \mathrm{Pe} 1: 15$ ) the more" ( $\mu \alpha \lambda \lambda \mathrm{o} v$, not less).

To make ( $\pi о \iota \varepsilon \iota \theta \alpha)$. Present middle infinitive of $\pi о \iota \omega \omega$, to make for yourselves.
Calling and election ( $\kappa \lambda \eta \sigma \iota v \kappa \alpha \varepsilon \kappa \lambda о \gamma \eta \nu)$. Both words ( $\kappa \lambda \eta \sigma \tau \nu$, the invitation, $\varepsilon \kappa \lambda о \gamma \eta \nu$, actual acceptance). See for $\varepsilon \kappa \lambda о \gamma \eta 1$ Th 1:4; Ro 9:11 .

If ye do ( $\pi$ oוouvtє¢). Present active circumstantial (conditional) participle of noı $\omega$, "doing."

Ye shall never stumble ( $\circ \boldsymbol{v} \mu \eta \pi \tau \alpha ı \sigma \eta \tau \varepsilon \pi о \tau \varepsilon$ ). Strong double negative ( $o v \mu \eta \pi о \tau \varepsilon$ ) with first aorist active subjunctive of $\pi \tau \alpha \omega \omega$, old verb to stumble, to fall as in Jas 2:10; 3:2 .

2Pet 1:11
Thus (ovt $\omega \varsigma$ ). As shown in verse 10.
Shall be supplied ( $\varepsilon \pi \downarrow \chi \circ \rho \eta \gamma \eta \theta \eta \sigma \varepsilon \tau \alpha)$. Future passive of $\varepsilon \pi \not \chi \circ \rho \eta \gamma \varepsilon \omega$, for which see verse 5 . You supply the virtues above and God will supply the entrance ( $\eta \varepsilon \mid \sigma \circ \delta$ oc, old word already in 1Th 1:9, etc.).

Richly ( $\pi \lambda$ ovo $\omega \varsigma$ ). See Col 3:16 for this adverb.
Into the eternal kingdom ( $\varepsilon เ \varsigma \tau \eta \nu \alpha \iota \omega v \iota o \nu \beta \alpha \sigma i \lambda \varepsilon \iota \alpha v$ ). The believer's inheritance of 1 Pe 1:4 is here termed kingdom, but "eternal" ( $\alpha \omega \omega$ viov feminine same as masculine). Curiously again in the Stratonicea inscription we find $\tau \eta \varsigma \alpha \omega \omega v ı v \alpha \rho \chi \eta \varsigma$ (of the eternal rule) applied to "the lords of Rome." But this is the spiritual reign of God in men's hearts here on earth (1Pe 2:9) and in heaven.

Of our Lord and Saviour Jesus Christ ( $\tau \circ v \kappa \nu \rho ı v ~ \eta \mu \omega v ~ к \alpha ~ \sigma \omega \tau \eta \rho о \varsigma ~ I \eta \sigma o v ~ X \rho ı \sigma \tau о v) . ~$ For which idiom see on 1:1.

2Pet 1:12
Wherefore ( $\delta \iota 0$ ). Since they are possessed of faith that conduces to godliness which they are diligently practising now he insists on the truth and proposes to do his part by them about it.

I shall be ready always ( $\mu \varepsilon \lambda \lambda \eta \sigma \omega \alpha \varepsilon$ ). Future active of $\mu \varepsilon \lambda \lambda \omega$ (Mt 24:6 ), old verb, to be on the point of doing and used with the infinitive (present, aorist, or future). It is not here a periphrastic future, but rather the purpose of Peter to be ready in the future as in the past and now (Zahn).
 $\nu \pi о \mu \mu \nu \eta \sigma \kappa \omega$, old causative compound (v $\tau \circ, \mu \mu \nu \eta \sigma \kappa \omega$, like our suggest), either with two accusatives (Joh 14:26) or $\pi \varepsilon \rho$ with the thing as here), "to keep on reminding you of those things" ( $\pi \varepsilon \rho$ тout $\omega v$ ).

Though ye know them ( $\kappa \alpha \| \varepsilon \varepsilon \rho \varepsilon$ єठота¢). Second perfect active concessive participle of ot $\delta \alpha$, agreeing (acc. plural), with v $\mu$ 人. Cf. Heb 5:8 .

Are established ( $\varepsilon \sigma \tau \eta \rho \iota \gamma \mu \varepsilon v o v \varsigma)$. Perfect passive concessive participle of $\sigma \tau \eta \rho \iota \zeta \omega(1 \mathrm{Pe}$ 5:10 ). The very verb ( $\sigma \tau \eta \rho \iota \sigma o v)$ used by Jesus to Peter (Lu 22:32).

In the truth which is with you ( $\varepsilon v \tau \eta \pi \alpha \rho o v \sigma \eta ~ \alpha \lambda \eta \theta \varepsilon ı \alpha$ ). "In the present truth" (the truth present to you), $\pi \alpha \rho o v \sigma \eta$ present active participle of $\pi \alpha \rho \varepsilon \mu$, to be beside one. See Col 1:6 for this use of $\pi \alpha \rho \omega v$. Firmly established in the truth, but all the same Peter is eager to make them stronger.

2Pet 1:13
I think it right ( $\delta \iota \kappa \alpha \circ v \eta \gamma \circ \cup \mu \alpha)$. Peter considers this to be his solemn duty, "right" ( (ıкaıov). Cf. Php 3:1; Eph 6:1 .

So long as ( $\varepsilon \varphi^{\prime}$ oбov). For this phrase see Mt 9:15; Ro 11:13.
Tabernacle ( $\sigma \kappa \eta \nu \omega \mu \alpha \tau$ ). Old word, in literal sense in De 33:18 for the usual $\sigma \kappa \eta \nu \eta$ (Peter's word at the Transfiguration, Mr 9:5), earliest use (in N.T. only here, verse 14; Ac 7:46 of the tabernacle of the covenant) in this metaphorical sense of life as a pilgrimage ( 1 Pe $1: 1 ; 2: 11$ ), though Paul has $\sigma \kappa \eta v o \varsigma$, so in 2Co 5:1,4. Peter feels the nearness of death and the urgency upon him.

To stir you up ( $\delta \iota \varepsilon \gamma \varepsilon \iota \varepsilon เ v \nu \mu \alpha \varsigma$ ). Present active infinitive of $\delta \varepsilon \varepsilon \gamma \varepsilon \iota \omega \omega$, late (Arist., Hippocr., Herodian, papyri), perfective ( $\delta \iota \alpha=$ thoroughly) compound, to wake out of sleep ( Mr 4:39 ), "to keep on rousing you up."

By putting you in remembrance ( $\varepsilon v v \pi o \mu v \eta \sigma \varepsilon$ ). Old word, from $v \pi о \mu \mu \nu \eta \sigma \kappa \omega$ (verse 12), in N.T. only here, 3:1; 2Ti 1:5 . "By way of reminding you."

2Pet 1:14
The putting off of my tabernacle ( $\eta$ а $\pi \circ \theta \varepsilon \sigma ı \varsigma ~ \tau о v ~ \sigma \kappa \eta \nu v \omega \mu \alpha \tau о \varsigma ~ \mu о v)$. For $\alpha \pi \sigma \theta \varepsilon \sigma ı \varsigma$ see on 1Pe 3:21 and for $\sigma \kappa \eta v \omega \mu \alpha$ verse 13. For the metaphor see 2Co 5:3f.

Cometh swiftly ( $\tau \alpha \chi \iota v \eta \varepsilon \sigma \tau \iota v$ ). Late adjective (Theocritus, LXX, inscription), in N.T. only here and 2:1. It is not clear whether $\tau \alpha \chi$ Ivoc means soon or speedy as in Isa 59:7 and like taxuc in Jas 1:19, or sudden, like taरuc in Plato (Republ. 553 D). Either sense agrees with the urgent tone of Peter here, whether he felt his death to be near or violent or both.

Signified unto me ( $\varepsilon \delta \eta \lambda \omega \sigma \varepsilon v \mu 0$ ). First aorist active indicative of $\delta \eta \lambda o \omega$, old verb (from $\delta \varepsilon \lambda \mathrm{oc})$, as in 1Pe 1:11. Peter refers to the incident told in Joh 21:18f. , which he knew by personal experience before John wrote it down.

2Pet 1:15

Peter may also have had an intimation by vision of his approaching death (cf. the legend Domine quo vadis) as Paul often did (Ac 16:9; 18:9; 21:11; 23:11; 27:23 ).

At every time ( $\varepsilon \kappa \alpha \sigma \tau о \tau \varepsilon)$. As need arises, old adverb, here alone in N.T.
After my decease ( $\mu \varepsilon \tau \alpha \tau \eta \nu \varepsilon \mu \eta \nu \varepsilon \xi$ o $\delta o v$ ). For $\varepsilon \xi$ oסoc meaning death see Lu 9:31, and for departure from Egypt (way out, $\varepsilon \xi$, oठoc) see Heb 11:22, the only other N.T. examples. Here again Peter was present on the Transfiguration mount when the talk was about the "exodus" of Jesus from earth.

That ye may be able ( $\varepsilon \chi \varepsilon เ v \nu \mu a \varsigma)$. Literally, "that ye may have it," the same idiom with $\varepsilon \chi \omega$ and the infinitive in Mr 14:8; Mt 18:25. It is the object-infinitive after $\sigma \pi \sigma v \delta \alpha \sigma \omega$ (I will give diligence, for which see verse 10).

To call these things to remembrance ( $\tau \eta \nu \tau 0 v \tau \omega \nu \mu \nu \eta \mu \eta \nu \pi \sigma \varepsilon \varepsilon \sigma \theta \alpha$ ). Present middle infinitive of $\pi o \varepsilon \varepsilon \omega$ (as in verse 10). $M \nu \eta \mu \eta$ is an old word (from $\mu \nu \alpha o \mu \alpha$ ), here alone in N.T. This idiom, like the Latin mentionem facere, is common in the old writers (papyri also both for "mention" and "remembrance"), here only in N.T., but in Ro 1:20 we have $\mu v \varepsilon \iota a v \pi o \iota o v \mu \alpha$ (I make mention). Either sense suits here. It is possible, as Irenaeus (iii. I. I) thought, that Peter had in mind Mark's Gospel, which would help them after Peter was gone. Mark's Gospel was probably already written at Peter's suggestion, but Peter may have that fact in mind here.

2Pet 1:16
We did not follow (ouк $\varepsilon \xi \alpha \kappa о \lambda o v \theta \eta \sigma \alpha v \tau \varepsilon \varsigma)$. First aorist active participle of $\varepsilon \xi \alpha \kappa о \lambda o v \theta \varepsilon \omega$, late compound verb, to follow out (Polybius, Plutarch, LXX, papyri, inscriptions as of death following for any Gentile in the temple violating the barrier), with emphatic negative ouk, "not having followed." See also 2:2 for this verb.

Cunningly devised fables ( $\sigma \varepsilon \sigma \circ \varphi \iota \sigma \mu \varepsilon v \circ \iota \varsigma \mu \cup$ оıऽ). Associative instrumental case of $\mu \nu \theta$ os (old term for word, narrative, story, fiction, fable, falsehood). In N.T. only here and the Pastoral Epistles (1Ti $1: 4$, etc.). Perfect passive participle of $\sigma 0 \varphi i \zeta \omega$, old word (from
 to invent cleverly (here) and so also in the old writers and in the papyri. Some of the false teachers apparently taught that the Gospel miracles were only allegories and not facts (Bigg). Cf. 2:3 for "feigned words."

When we made known unto you ( $\varepsilon \gamma \nu \omega \rho \iota \sigma \alpha \mu \varepsilon \nu \nu \mu \nu \nu$ ). First aorist active indicative of $\gamma \nu \omega \rho \iota \zeta \omega$, to make known unto you. Possibly by Peter himself.

The power and coming ( $\tau \eta \nu \delta \nu v \alpha \mu \nu \kappa \alpha \pi \alpha \rho o v \sigma \iota \alpha v$ ). These words can refer (Chase) to the Incarnation, just as is true of $\varepsilon \pi \iota \varphi a v \varepsilon \iota \alpha$ in $2 \mathrm{Ti} 1: 10$ (second coming in $1 \mathrm{Ti} 6: 14$ ), and is true of $\pi \alpha \rho o v \sigma \iota \alpha$ (2Co 7:6 of Titus). But elsewhere in the N.T. $\pi \alpha \rho o v \sigma ı \alpha$ (technical term in the papyri for the coming of a king or other high dignitary), when used of Christ, refers to his second coming ( $2 \mathrm{Pe} 3: 4,12$ ).

But we were eye-witnesses ( $\left.\alpha \lambda \lambda^{\prime} \varepsilon \pi \sigma \pi \tau \alpha \gamma \varepsilon \nu \eta \theta \varepsilon \nu \tau \varepsilon \varsigma\right)$. First aorist passive participle of $\gamma \iota v o \mu \alpha$, "but having become eye-witnesses." Елопта, old word (from $\varepsilon \pi о \pi \tau \omega$ like $\varepsilon \pi о \pi \tau \varepsilon v \omega$ in 1Pe 2:12; 3:2 ), used of those who attained the third or highest degree of initiates in the Eleusinian mysteries (common in the inscriptions). Cf. auto $\tau \tau \eta \varsigma$ in Lu 1:2 .

Of his majesty ( $\tau \eta \varsigma \varepsilon \kappa \varepsilon เ v o v ~ \mu \varepsilon \gamma \alpha \lambda \varepsilon เ о \tau \eta \tau \circ \varsigma)$. Late and rare word (LXX and papyri)
 clearly felt that he and James and John were lifted to the highest stage of initiation at the Transfiguration of Christ. Emphatic ekeıvov as in 2Ti 2:26 .

2Pet 1:17
For he received ( $\lambda \alpha \beta \omega \nu \gamma \alpha \rho$ ). Second aorist active participle nominative singular of $\lambda \alpha \mu \beta \alpha v \omega$, "he having received," but there is no finite verb, anacoluthon, changing in verse 19 (after parenthesis in 18) to $\varepsilon \chi \circ \mu \varepsilon v \beta \varepsilon \beta a \iota \tau \varepsilon \rho \circ v$ rather than $\varepsilon \beta \varepsilon \beta a \iota \omega \sigma \varepsilon v$.

When there came such a voice to him ( $\varphi \omega v \eta \varsigma \varepsilon v \varepsilon \chi \theta \varepsilon เ \sigma \eta \varsigma ~ \alpha \nu \tau \omega$ too $\alpha \sigma \delta \varepsilon$ ). Genitive absolute with first aorist passive participle feminine singular of $\varphi \varepsilon \rho \omega$ (cf. 1Pe 1:13) , repeated $\varepsilon v \varepsilon \chi \theta \varepsilon \iota \sigma \alpha v$ in verse 18. $\Phi \omega v \eta$ (voice) is used also of Pentecost (Ac 2:6 ). Tooo $\delta \varepsilon \varepsilon$ (classical demonstrative) occurs here alone in the N.T.

From the excellent glory (v $\frac{10}{} \tau \eta \varsigma \mu \varepsilon \gamma a \lambda о \pi \rho \varepsilon \pi о и \varsigma \delta о \xi \eta \varsigma$ ). "By the majestic glory." $\mathrm{M} \varepsilon \gamma \alpha \lambda$ o $\pi \rho \varepsilon \pi \eta \varsigma$, old compound ( $\mu \varepsilon \gamma \alpha \varsigma$, great, $\pi \rho \varepsilon \pi \varepsilon$, it is becoming), here only in N.T., several times in O.T., Apocr. (II Macc. 8:15), adverb in the inscriptions. Probably a reference to $v \varepsilon \varphi \varepsilon \lambda \eta \varphi \omega \tau \varepsilon \iota \nu \eta$ (bright cloud, shekinah) in Mt 17:5. The words given here from the "voice" agree exactly with Mt 17:5 except the order and the use of $\varepsilon \iota \varsigma \rho$ rather than $\varepsilon v \omega$. Mark (Mr 9:7) and Luke (Lu 9:35) have akouste. But Peter did not need any Gospel for his report here.

2Pet 1:18
This voice ( $\tau \alpha \nu \tau \eta \nu \tau \eta v \varphi \omega v \eta \nu$ ). The one referred to in verse 17.
We heard ( $\eta \kappa о v \sigma \alpha \mu \varepsilon v$ ). First aorist active indicative of $\alpha \kappa \sigma v \omega$, a definite experience of Peter.

Brought ( $\varepsilon v \varepsilon \chi \theta \varepsilon เ \sigma \alpha v)$. "Borne" as in verse 17.
When we were with him ( $\sigma \cup v$ avt $\omega$ ovte¢). Present active participle of $\varepsilon \mu$, "being with him."

In the holy mount ( $\varepsilon v \tau \omega \alpha \gamma \epsilon \omega \mathrm{op} \mathrm{\varepsilon}$ ). Made holy by the majestic glory. See Eze 28:14 for "holy mount of God," there Sinai, this one probably one of the lower slopes of Hermon. Peter's account is independent of the Synoptic narrative, but agrees with it in all essentials.

2Pet 1:19
The word of prophecy ( $\tau 0 v \pi \rho \circ \varphi \eta \tau \iota \kappa \circ \nu \lambda o \gamma o v$ ). "The prophetic word." Cf. 1Pe 1:10, a reference to all the Messianic prophecies.

Made more sure ( $\beta \varepsilon \beta \alpha \ldots \tau \varepsilon \rho o v$ ). Predicate accusative of the comparative adjective $\beta \varepsilon \beta a \operatorname{os}(2 \mathrm{Pe} 1: 10)$. The Transfiguration scene confirmed the Messianic prophecies and
made clear the deity of Jesus Christ as God's Beloved Son. Some with less likelihood take Peter to mean that the word of prophecy is a surer confirmation of Christ's deity than the Transfiguration.

Whereunto $(\omega)$. Dative of the relative referring to "the prophetic word made more sure."

That ye take heed ( $\pi \rho \circ \sigma \varepsilon \chi \circ v \tau \varepsilon \varsigma)$. Present active participle with vovv (mind) understood, "holding your mind upon" with the dative ( $\omega$ ).

As unto a lamp $(\omega \varsigma \lambda \nu \chi \nu \omega)$. Dative also after $\pi \rho \circ \sigma \varepsilon \chi \circ v \tau \varepsilon \varsigma$ of $\lambda \nu \chi \nu \circ \varsigma$, old word (Mt 5:15).

Shining ( $\varphi a \downarrow v o v \tau)$. Dative also present active participle of $\varphi a \iota v \omega$, to shine (Joh 1:5 ). So of the Baptist (Joh 5:35).

In a dark place ( $\varepsilon v \alpha v \chi \mu \eta \rho \omega \tau \sigma \pi \omega$ ). Old adjective, parched, squalid, dirty, dark, murky, here only in N.T., though in Aristotle and on tombstone for a boy.

Until the day dawn ( $\varepsilon \omega \varsigma$ ov $\eta \mu \varepsilon \rho \alpha \delta ı \alpha v \gamma \alpha \sigma \eta)$. First aorist active subjunctive of $\delta \iota \alpha v \gamma \alpha \zeta \omega$ with temporal conjunction $\varepsilon \omega \varsigma$ ov, usual construction for future time. Late compound verb $\delta \iota \alpha \gamma \beta \zeta \omega$ (Polybius, Plutarch, papyri) from $\delta \iota \alpha$ and $\alpha v \gamma \eta$, to shine through, here only in N.T.

The day-star ( $\varphi \omega \sigma \varphi \circ \rho \circ \varsigma)$. Old compound adjective ( $\varphi \omega \varsigma$, light, $\varphi \varepsilon \rho \omega$, to bring), lightbringing, light-bearer (Lucifer) applied to Venus as the morning star. Our word $\varphi о \sigma \varphi о \rho \cup \varsigma$ is this word. In the LXX $\varepsilon \omega \sigma \varphi$ о $о \varsigma$ occurs. Cf. Mal 4:2; Lu 1:76-79; Re 22:16 for "dawn" applied to the Messiah.

Arise ( $\alpha v \alpha \tau \varepsilon ı \lambda \eta$ ). First aorist active subjunctive of $\alpha v a \tau \varepsilon \lambda \lambda \omega$ (Jas 1:11; Mt 5:45 ).
2Pet 1:20
Knowing this first ( $\tau 0 \cup \tau 0 \pi \rho \omega \tau \circ \nu \gamma \iota \nu \omega \sigma \kappa \circ \nu \tau \varepsilon \varsigma)$. Agreeing with $\pi \circ \iota \varepsilon \iota \tau \varepsilon$ like $\pi \rho \circ \sigma \varepsilon \chi \circ \nu \tau \varepsilon \varsigma$ in verse 19.

No prophecy of Scripture ( $\pi \alpha \sigma \alpha \pi \rho о \varphi \eta \tau \varepsilon \iota \alpha$ ov). Like the Hebrew lo-kol, but also in the papyri as in 1Jo 2:21 (Robertson, Grammar, p. 753).

Is ( $\gamma \iota v \varepsilon \tau \alpha$ ). Rather "comes," "springs" (Alford), not "is" ( $\varepsilon \sigma \tau \iota \nu)$.
Of private interpretation ( $\stackrel{\delta}{\mathrm{I}} \mathrm{a}_{\varsigma} \varepsilon \pi \downarrow \lambda v \sigma \varepsilon \omega \varsigma$ ). Ablative case of origin or source in the predicate as with $\gamma \nu \omega \mu \eta$, in Ac 20:3 and with $\tau$ ov $\theta \varepsilon o v$ and $\varepsilon \xi \eta \mu \omega \nu$ in 2Co 4:7 . "No prophecy of Scripture comes out of private disclosure," not "of private interpretation." The usual meaning of $\varepsilon \pi \iota \lambda \nu \sigma \iota \varsigma$ is explanation, but the word does not occur elsewhere in the N.T. It occurs in the papyri in the sense of solution and even of discharge of a debt. Spitta urges "dissolved" as the idea here. The verb $\varepsilon \pi \lambda \lambda \nu \omega$, to unloose, to untie, to release, occurs twice in the N.T., once (Mr 4:34) where it can mean "disclose" about parables, the other (Ac 19:39 ) where it means to decide. It is the prophet's grasp of the prophecy, not that of the readers that is here presented, as the next verse shows.

2Pet 1:21

For $(\gamma \alpha \rho)$. The reason for the previous statement that no prophet starts a prophecy himself. He is not a self-starter.

Came ( $\eta \nu \varepsilon \chi \theta \eta$ ). First aorist passive indicative of $\varphi \varepsilon \rho \omega$ (verses 17f. ).
By the will of man ( $\theta \varepsilon \lambda \eta \mu \alpha \tau \alpha v \theta \rho \omega \pi \sigma$ ). Instrumental case of $\theta \varepsilon \lambda \eta \mu \alpha$. Prophecy is of divine origin, not of one's private origination ( $\llcorner\delta \iota a \varsigma \varepsilon \pi \iota \lambda \nu \sigma \varepsilon \omega \varsigma)$.
 of $\varphi \varepsilon \rho \omega$, moved from time to time. There they "spoke from God." Peter is not here warning against personal interpretation of prophecy as the Roman Catholics say, but against the folly of upstart prophets with no impulse from God.

## 2 Peter 2

2Pet 2:1
But there arose ( $\varepsilon \gamma \varepsilon v o v \tau o \delta \varepsilon$ ). Second aorist middle indicative of $\gamma ı v o \mu \alpha$ (cf. $\gamma ı v \varepsilon \tau \alpha$ in 1:20).

False prophets also ( $\kappa \alpha \psi \varepsilon v \delta о \pi \rho о \varphi \eta \tau \alpha$ ). In contrast with the true prophets just pictured in 1:20f. Late compound in LXX and Philo, common in N.T. (Mt 7:15 ). Allusion to the O.T. times like Balaam and others (Jer 6:13; 28:9; Eze 13:9 ).

False teachers ( $\psi \varepsilon \cup \delta o \delta \iota \delta \alpha \sigma \kappa \alpha \lambda o$ ). Late and rare compound ( $\psi \varepsilon v \delta \eta \sigma, \delta \iota \delta a \sigma \kappa \alpha \lambda o \varsigma$ ) here alone in N.T. Peter pictures them as in the future here ( $\varepsilon \sigma \circ v \tau \alpha$, shall be) and again as already present ( $\varepsilon เ \sigma \iota v$, are, verse 17), or in the past ( $\varepsilon \pi \lambda a v \eta \theta \eta \sigma \alpha v$, they went astray, verse 15 ).

Shall privily bring in ( $\pi \alpha \rho \varepsilon \iota \sigma \alpha \xi_{0} \sigma \tau v$ ). Future active of $\pi \alpha \rho \varepsilon \iota \sigma \alpha \gamma \omega$, late double compound $\pi \alpha \rho \varepsilon \iota \sigma \alpha \gamma \omega$, to bring in $(\varepsilon \iota \sigma \alpha \gamma \omega)$, by the side ( $\pi \alpha \rho \alpha)$, as if secretly, here alone in N.T., but see $\pi \alpha \rho \varepsilon$ וбактоus in $\mathrm{Ga} 2: 4$ (verbal adjective of this same verb).

Destructive heresies (aıpєбદı¢ $\alpha \pi \omega \lambda \varepsilon ı \alpha \varsigma)$. Descriptive genitive, "heresies of destruction" (marked by destruction) as in Lu 16:8. Haıpعбıऽ (from aıpع $\omega$ ) is simply a choosing, a school, a sect like that of the Sadducees (Ac 5:17), of the Pharisees (Ac 15:5), and of Christians as Paul admitted (Ac 24:5). These "tenets" (Ga 5:20) led to destruction.

Denying ( $\alpha \rho v o v \mu \varepsilon v o$ ). Present middle participle of $\alpha \rho v \varepsilon o \mu \alpha$. This the Gnostics did, the very thing that Peter did, alas (Mt 26:70 ) even after Christ's words (Mt 10:33).

Even the Master ( $\kappa \alpha \operatorname{\tau ov} \delta \varepsilon \sigma \pi о \tau \eta v)$. Old word for absolute master, here of Christ as in Jude 1:4, and also of God (Ac 4:24). Without the evil sense in our "despot."
 $\alpha \nless о \rho \alpha \zeta \omega$, same idea with $\lambda \nu \tau \rho o \omega$ in $1 \mathrm{Pe} 1: 18 \mathrm{f}$. These were professing Christians, at any rate, these heretics.

Swift destruction ( $\tau \alpha \chi \iota \eta \eta \alpha \pi \omega \lambda \lambda \varepsilon \iota \alpha \nu$ ). See 1:14 for $\tau \alpha \chi \iota \nu \eta \nu$ and note repetition of $\alpha \pi \omega \lambda \varepsilon \iota a v$. This is always the tragedy of such false prophets, the fate that they bring on ( $є \pi \alpha ү о v \tau \varepsilon \varsigma) ~ t h e m s e l v e s . ~$

2Pet 2:2
Lascivious doings ( $\alpha \sigma \varepsilon \lambda \gamma \varepsilon ı \alpha ı \varsigma)$. Associative instrumental ease after $\varepsilon \xi \alpha \kappa о \lambda$ ov $\theta \eta \sigma$ боvбเv (future active, for which verb see 1:16). See 1Pe 4:3 for this word.

By reason of whom ( $\delta \mathrm{t}^{\prime}$ ouc). "Because of whom" (accusative case of relative, referring to $\pi о \lambda \lambda_{0}$, many). Avt $\omega \nu$ (their) refers to $\psi \varepsilon v \delta o \delta i \delta a \sigma \kappa \alpha \lambda o$ (false teachers) while $\pi о \lambda \lambda o$ to their deluded followers. See Ro 2:23f. for a picture of such conduct by Jews (quotation from Isa 52:5, with $\beta \lambda \alpha \sigma \varphi \eta \mu \varepsilon \omega$ used as here with $\delta \iota^{\prime} ~ v \mu \alpha \varsigma$, because of you).

The way of truth ( $\eta$ o oos $\tau \eta \varsigma \alpha \lambda \eta \theta \varepsilon ı \alpha)$ ). Ho $\delta$ o (way) occurs often in N.T. for Christianity (Ac 9:2; 16:17; 18:25; 22:4; 24:14). This phrase is in Ge 24:48 as "the right road," and that is what Peter means here. So Ps 119:30 . See again 2:15,21 .

2Pet 2:3
In covetousness ( $\left.\varepsilon v \pi \lambda \varepsilon o v \varepsilon \xi_{\imath} \alpha\right)$. As did Balaam (verse 15). These licentious Gnostics made money out of their dupes. A merely intellectual Gnosticism had its fruit in immorality and fraud.

With feigned words ( $\pi \lambda \alpha \sigma \tau о \varsigma \lambda о \gamma о \varsigma)$. Instrumental case. $\Pi \lambda \alpha \sigma \tau \circ \varsigma$ is verbal adjective (from $\pi \lambda \alpha \sigma \sigma \omega$, to mould as from clay, for which see Ro 9:20 ), here only in N.T. "With forged words." See sample in 3:4.

Shall make merchandise of you ( $v \mu \alpha \varsigma \varepsilon \mu \pi о \rho \varepsilon v \sigma o v \tau \alpha$ ). Future middle of $\varepsilon \mu \pi о \rho \varepsilon v o \mu \alpha$ (from $\varepsilon \mu \pi о \rho о \varsigma$, a travelling merchant), old word, to go in for trade, in N.T. only here and Jas 4:13, which see. Cf. our emporium (Joh 2:16, market house).

Whose sentence (oıs то к $\rho \mu \alpha$ ). "For whom (dative case) the sentence" (verdict, not process крıбıৎ).

Now from of old $(\varepsilon \kappa \pi \alpha \lambda \alpha)$. Late and common compound adverb, in N.T. only here and 3:5.

Lingereth not (ovк $\alpha \rho \gamma \varepsilon$ ). "Is not idle," old verb, $\alpha \rho \gamma \varepsilon \omega$ (from $\alpha \rho \gamma$ oc not working, alpha privative and $\varepsilon \rho \gamma \circ v$ ), here only in N.T.

Slumbereth not (ov $v v \sigma \tau \alpha \zeta \varepsilon$ ). Old and common verb (from $v v \omega$ to nod), in N.T. only here and Mt 25:5. Note $\alpha \pi \omega \lambda \varepsilon \iota \alpha$ (destruction) three times in verses 1-3.

2Pet 2:4
For if God spared not ( $\varepsilon \gamma \alpha \rho$ о $\theta \varepsilon o \varsigma$ ovк $\varepsilon \varphi \varepsilon \iota \sigma \alpha \tau o$ ). First instance ( $\gamma \alpha \rho$ ) of certain doom, that of the fallen angels. Condition of the first class precisely like that in Ro 11:21 save that here the normal apodosis ( $v \mu \omega \nu$ ov $\varphi \varepsilon \iota \sigma \varepsilon \tau \alpha)$ is not expressed as there, but is simply implied in verse 9 by oı $\delta \varepsilon \nu$ кирıоৎ $\rho \cup \varepsilon \sigma \theta a$ (the Lord knows how to deliver) after the parenthesis in verse 8.

Angels when they sinned ( $\alpha \gamma \gamma \varepsilon \lambda \omega \nu \alpha \mu \alpha \rho \tau \eta \sigma \alpha \nu \tau \omega \nu$ ). Genitive case after $\varepsilon \varphi \varepsilon \iota \sigma \alpha \tau o$ (first aorist middle indicative of $\varphi \varepsilon \iota \delta o \mu \alpha$ ) and anarthrous (so more emphatic, even angels), first aorist active participle of $\alpha \mu \alpha \rho \tau \alpha \nu \omega$, "having sinned."

Cast them down to hell ( $\tau \alpha \rho \tau \alpha \rho \omega \sigma \alpha \varsigma)$. First aorist active participle of $\tau \alpha \rho \tau \alpha \rho o \omega$, late word (from $\tau \alpha \rho \tau \alpha \rho \circ \varsigma$, old word in Homer, Pindar, LXX Job 40:15; 41:23 , Philo, inscriptions, the dark and doleful abode of the wicked dead like the Gehenna of the Jews), found here
 ment of the fallen angels, while Gehenna is for apostate Jews.

Committed ( $\pi \alpha \rho \varepsilon \delta \omega \kappa \varepsilon v$ ). First aorist active indicative of $\pi \alpha \rho \alpha \delta \delta \omega \mu$, the very form solemnly used by Paul in Ro $1: 21,26,28$.

To pits of darkness ( $\sigma \varepsilon \iota \rho \circ \varsigma \zeta о \varphi о v$ ). Zочоৎ (kin to $\gamma \nu о \varphi о \sigma, \nu \varepsilon \varphi \circ \varsigma)$ is an old word, blackness, gloom of the nether world in Homer, in N.T. only here, verse 17; Jude 1:13; Heb 12:18. The MSS. vary between $\sigma \varepsilon \iota \rho a ı \varsigma ~(\sigma \varepsilon ı \rho a, ~ c h a i n ~ o r ~ r o p e) ~ a n d ~ \sigma \varepsilon ı \rho o ı \varsigma ~(~ \sigma \varepsilon ı \rho o \varsigma, ~ o l d ~ w o r d ~$ for pit, underground granary). $\Sigma \varepsilon \iota \rho o \iota s$ is right (Aleph A B C), dative case of destination.

To be reserved unto judgment ( $\varepsilon \varsigma \varsigma ~ \kappa \rho \iota \sigma ı \nu ~ \tau \eta \rho o u \mu \varepsilon v o v \varsigma) . ~ P r e s e n t ~(l i n e a r ~ a c t i o n) ~ p a s s i v e ~$
 as in verse 9 . Note крıбıৎ (act of judgment).

2Pet 2:5
The ancient world ( $\alpha \rho \chi \propto \circ \cup$ коб $\mu \circ v$ ). Genitive case after $\varepsilon \varphi \varepsilon \iota \sigma \alpha \tau 0$ (with $\varepsilon$ understood) repeated (the second example, the deluge). This example not in Jude. Absence of the article is common in the prophetic style like II Peter. For ap犭aros see Lu 9:8 .

Preserved ( $\varepsilon \varphi \cup \lambda \alpha \xi \varepsilon v$ ). Still part of the long protasis with $\varepsilon$, first aorist active indicative of $\varphi \cup \lambda \alpha \sigma \sigma \omega$.

With seven others (o $\gamma \delta o o v$ ). "Eighth," predicate accusative adjective (ordinal), classic idiom usually with autov. See 1Pe 3:20 for this same item. Some take o $\gamma \delta$ oov with кприка (eighth preacher), hardly correct.

A preacher of righteousness ( $\delta$ ıкаıобטvךऽ кприка). "Herald" as in 1Ti 2:7; 2Ti 1:11 alone in N.T., but $\kappa \eta \rho v \sigma \sigma \omega$ is common. It is implied in 1Pe 3:20 that Noah preached to the men of his time during the long years.

When he brought ( $\varepsilon \pi \alpha \xi \alpha \varsigma$ ). First aorist active participle (instead of the common second aorist active $\varepsilon \pi \alpha \gamma \alpha \gamma \omega v$ ) of $\varepsilon เ \sigma \alpha \gamma \omega$, old compound verb to bring upon, in N.T. only here and Ac 5:28 (by Peter here also).

A flood (катак $\lambda \nu \sigma \mu о \nu)$ ). Old word (from катак $\lambda \cup \zeta \omega$, to inundate), only of Noah's flood in N.T. (Mt 24:38ff.; Lu 17:27; 2Pe 2:5 ).

Upon the world of the ungodly (коб $\mu о \sigma \varepsilon \beta \omega v$ ). Anarthrous and dative case коб $\mu \omega$. The whole world were "ungodly" ( $\alpha \sigma \varepsilon \beta \varepsilon ı \varsigma ~ a s ~ i n ~ 1 P e ~ 4: 18) ~ s a v e ~ N o a h ' s ~ f a m i l y ~ o f ~ e i g h t . ~$

2Pet 2:6
Turning into ashes ( $\tau \varepsilon \varphi \rho \omega \sigma \alpha \varsigma)$. First aorist participle of $\tau \varepsilon \varphi \rho \circ \omega$, late word from $\tau \varepsilon \varphi \rho \alpha$, ashes (in Dio Cassius of an eruption of Vesuvius, Philo), here alone in N.T.

The cities of Sodom and Gomorrah ( $\pi о \lambda \varepsilon ı \varsigma \Sigma о \delta о \mu \omega v$ ка Гоноррац). Genitive of ap-
 of the cities around these two. The third example, the cities of the plain. See Ge 19:24f.

Condemned them (катєкрıvعv). First aorist active indicative of катакрıv , still part of the protasis with $\varepsilon$.

With an overthrow ( $\kappa \alpha \tau \alpha \sigma \tau \rho \circ \varphi \eta$ ). Instrumental case or even dative like $\theta \alpha v \alpha \tau \omega$ with катакрıv $\omega$ in Mt 20:18. But Westcott and Hort reject the word here because not in B C Coptic.

Having made them ( $\tau \varepsilon \theta \varepsilon ı \kappa \omega \varsigma$ ). Perfect active participle of $\tau \iota \theta \eta \mu$.
An example (v $\tau \boldsymbol{\sigma} \delta \varepsilon \tau \gamma \mu \alpha$ ). For which see Jas 5:10; Joh 13:15. Cf. 1Pe 2:21 .
Unto those that should live ungodly ( $\mu \varepsilon \lambda \lambda$ ov $\omega \omega \nu \alpha \sigma \varepsilon \beta \varepsilon \sigma \tau v$ ). Rather, "unto ungodly men of things about to be" (see Heb 11:20 for this use of $\mu \varepsilon \lambda \lambda o v \tau \omega v$ ). But Aleph A C K L
read $\alpha \sigma \varepsilon \beta \varepsilon \iota v$ (present active infinitive) with $\mu \varepsilon \lambda \lambda o v \tau \omega \nu=\alpha \sigma \varepsilon \beta \eta \sigma o v \tau \omega \nu$ (future active participle of $\alpha \sigma \varepsilon \beta \varepsilon \omega$ ), from which we have our translation.

2Pet 2:7
And delivered ( $\kappa \alpha \varepsilon \rho v \sigma \alpha \tau о$ ). First aorist middle of $\rho v \circ \mu \alpha$ as in Mt 6:13 , still part of the protasis with $\varepsilon$.

Righteous Lot ( $\delta$ ıкаıov $\Lambda \frac{1}{} \tau$ ). This adjective $\delta$ ıкаııৎ occurs three times in verses 7,8. See Wisdom 10:6.

Sore distressed ( $\kappa \alpha \tau \alpha \pi \sigma \nu o v \mu \varepsilon \nu \sigma \nu)$. Present passive participle of $\kappa \alpha \tau \alpha \pi \sigma \nu \varepsilon \omega$, late and common verb, to work down, to exhaust with labor, to distress, in N.T. only here and Ac 7:24.

By the lascivious life of the wicked (vло $\tau \eta \varsigma \tau \omega \nu \alpha \theta \varepsilon \sigma \mu \omega \nu \varepsilon \nu \alpha \sigma \varepsilon \lambda \gamma \varepsilon \iota \alpha \alpha \nu \alpha \sigma \tau \rho о \varphi \eta \varsigma)$. "By the life in lasciviousness of the lawless." A $\theta \varepsilon \sigma \mu \circ \varsigma ~(a l p h a ~ p r i v a t i v e ~ a n d ~ \theta \varepsilon \sigma \mu \circ \varsigma), ~ l a t e ~ a n d ~$ common adjective (cf. $\alpha \theta \varepsilon \mu$ ı $\tau$ ऽ $1 \mathrm{Pe} 4: 3$ ) for rebels against law (of nature and conscience here). Avaбт $\rho \circ \varphi \eta$ is frequent in I Peter.

2Pet 2:8
For $(\gamma \alpha \rho)$. Parenthetical explanation in verse 8 of the remark about Lot.
Dwelling ( $\varepsilon v \kappa \alpha \tau о \iota \kappa \omega v$ ). Present active participle of $\varepsilon v \kappa \alpha \tau о \iota \varepsilon \varepsilon \omega$, old but rare double compound, here only in N.T.

In seeing and hearing ( $\beta \lambda \varepsilon \mu \mu \alpha \tau \kappa \alpha \alpha \kappa о)$ ). "By sight (instrumental case of $\beta \lambda \varepsilon \mu \mu \alpha$, old word, from $\beta \lambda \varepsilon \pi \omega$ to see, here only in N.T.) and hearing" (instrumental case of $\alpha \kappa 0 \eta$ from $\alpha \kappa o v \omega$, to hear, common as Mt 13:14 ).

From day to day ( $\eta \mu \varepsilon \rho \alpha v \varepsilon \xi \eta \mu \varepsilon \rho a \varsigma)$. "Day in day out." Accusative of time and ablative with $\varepsilon \xi$. Same idiom in Ps 96:2 for the more common $\varepsilon \xi \eta \mu \varepsilon \rho a \varsigma \varepsilon \iota \varsigma \eta \mu \varepsilon \rho a \nu$.

Vexed ( $\varepsilon \beta \alpha \sigma \alpha \nu \iota \zeta v$ ). Imperfect active (kept on vexing) of $\beta \alpha \sigma \alpha v \iota \zeta \omega$, old word, to test metals, to torment (Mt 8:29).

With their lawless deeds ( $\alpha \vee о \mu \circ \iota \varsigma \rho \gamma \circ \iota)$. Instrumental case of cause, "because of their lawless (contrary to law) deeds." For avouos see 2Th 2:8 .

2Pet 2:9
The Lord knoweth how (oı $\delta \varepsilon \nu \kappa \cup \rho เ \varsigma \varsigma)$. The actual apodosis of the long protasis begun in verse 4 . God can deliver his servants as shown by Noah and Lot and he will deliver you. The idiomatic use of ot $\delta \alpha$ and the infinitive ( $\rho v \varepsilon \sigma \theta \alpha$ present middle and see verse 7) for knowing how as in Mt 7:11; Jas 4:17.

The godly ( $\varepsilon v \sigma \varepsilon \beta \varepsilon \iota \varsigma)$. Old anarthrous adjective (from $\varepsilon v$ and $\sigma \varepsilon \beta o \mu a$, to worship), in N.T. only here and Ac 10:2,7 (by Peter). For
temptation ( $\pi \varepsilon \iota \rho a \sigma \mu \circ v$ ) see Jas 1:2,12; 1Pe 1:6 .
To keep ( $\tau \eta \rho \varepsilon \iota v$ ). Present active infinitive of $\tau \eta \rho \varepsilon \omega$ after ol $\delta \varepsilon \nu$.
Unrighteous (aסıкоиৎ). As in 1Pe 3:18.

Under punishment (ко入аऍонєvovৎ). Present passive participle of ко $\lambda \alpha \zeta \omega$, old verb (from колоৎ, lopped off), in N.T. only here and Ac 4:21. Present tense emphasises continuity of the punishment. See ко $\lambda \alpha \sigma \iota v$ aı $\omega v$ ıov in Mt 25:46 .

2Pet 2:10
Chiefly ( $\mu \alpha \lambda_{ı} \sigma \tau \alpha$ ). Especially. He turns now to the libertine heretics (verses 2,7 ).
After the flesh (о $\pi \iota \sigma \omega \sigma \alpha \rho \kappa о$ ). Hebraistic use of o $\pi \iota \sigma \omega$ as with $\alpha \mu \alpha \rho \tau \iota \omega v$ (sins) in Isa 65:2. Cf. Mt 4:19; 1Ti 5:15.

Of defilement ( $\mu \iota \sigma \mu \circ v$ ). Old word (from $\mu \iota \alpha \nu \omega$ Tit 1:15 ), here only in N.T.
Despise dominion (кирьтпптоৎ катачроvоиvтаৎ). Кирьотпऽ is late word for lordship (perhaps God or Christ) (from Kı 1 ıऽ), in Col 1:16; Eph 1:21; Jude 1:8. Genitive case after кат $\varphi \rho \rho 0 v \tau \alpha \varsigma$ (thinking down on, Mt 6:24 ).

Daring ( $\tau 0 \lambda \mu \eta \tau \alpha$ ). Old substantive (from $\tau 0 \lambda \mu \alpha \omega$, to dare), daring men, here only in N.T.

Self-willed ( $\alpha \cup \theta \alpha \delta \varepsilon ı \varsigma$ ). Old adjective (from $\alpha v \tau \circ \varsigma$ and $\eta \delta o \mu \alpha$ ), self-pleasing, arrogant, in N.T. only here and Tit 1:7.

They tremble not to rail at dignities ( $\delta o \xi \alpha \varsigma$ ov $\tau \rho \varepsilon \mu о v \sigma \iota \nu \beta \lambda \alpha \sigma \varphi \eta \mu о u v \tau \varepsilon \varsigma)$. "They tremble not blaspheming dignities." T $\rho \varepsilon \mu \omega$ is old verb (Mr 5:33 ), used only in present as here and imperfect. Here with the complementary participle $\beta \lambda \alpha \sigma \varphi \eta \mu \circ v \nu \tau \varepsilon \varsigma$ rather than the infinitive $\beta \lambda \alpha \sigma \varphi \eta \mu \varepsilon \iota v$. See Jude 1:8. Perhaps these dignities ( $\delta o \xi \alpha \varsigma$ ) are angels ( $\varepsilon \varsigma \iota \lambda$ ).

2Pet 2:11
Whereas (отоv). Loose use of oлоv (in Xenophon) = "wherein."
Though greater ( $\mu \varepsilon \iota \zeta$ oveৎ ovtєৎ). Than the evil $\delta o \xi \alpha$. Concessive participle and comparative adjective.

In might and strength ( $\iota \chi \cup \kappa \alpha \delta v v \alpha \mu \varepsilon$ ). Locative case. Both indwelling strength ( $\sigma \chi \cup \varsigma$, Mr 12:30) and ability ( $\delta v v a \mu ı, ~ M t ~ 25: 15 ~) . ~ . ~$

Railing judgment ( $\beta \lambda \alpha \sigma \varphi \varepsilon \mu \circ \vee$ крıбı). "Blasphemous accusation."
Against them ( $\kappa \alpha \tau^{\prime} \alpha v \tau \omega v$ ). The evil angels ( $\delta o \xi \alpha$ ).
Before the Lord ( $\pi \alpha \rho \alpha \kappa v \rho เ \omega)$. In God's presence. See Jude 1:9 and possibly Enoch 9.
2Pet 2:12
But these (ovto $\delta \varepsilon$ ). The false teachers of verse 1.
As creatures $(\zeta \omega \alpha)$. Living creatures, old word, from $\zeta \omega 0 \varsigma$ (alive), Jude 1:10; Re 4:6-9

Without reason ( $\alpha \lambda o \gamma \alpha$ ). Old adjective, in N.T. only here, Jude 1:10; Ac 25:27 . Brute beasts like $\theta \eta \rho \iota \alpha$ (wild animals).

Born ( $\gamma \varepsilon \gamma \varepsilon \nu \nu \eta \mu \varepsilon v \alpha$ ). Perfect passive participle of $\gamma \varepsilon \nu v \alpha \omega$.
Mere animals ( $\varphi \cup \sigma \iota \kappa \alpha$ ). Old adjective in -七коৎ (from $\varphi \cup \sigma \iota \varsigma$, nature), natural animals, here only in N.T.

To be taken ( $\varepsilon ા \varsigma ~ a \lambda \omega \sigma \iota v$ ). "For capture" (old substantive, from $\alpha \lambda o \omega$, here only in N.T.).

And destroyed ( $\kappa \alpha \varphi$ оорау). "And for destruction" just like a beast of prey caught. See 1:4.

In matters whereof they are ignorant ( $\varepsilon v$ oıs $\alpha \gamma v o o v \sigma ı v)$. "In which things they are ignorant." Here $\varepsilon v$ oıs $=\varepsilon v$ тоитоוя $\alpha$ (in those things which), a common Greek idiom. For $\alpha \gamma v o \varepsilon \omega$ (present active indicative) see 1Th 4:13; 1Ti 1:7 for a like picture of loud ignoramuses posing as professional experts.

Shall in their destroying surely be destroyed ( $\varepsilon v \tau \eta \varphi \theta$ op $\alpha \alpha \cup \tau \omega v \varphi \theta \alpha \rho \eta \sigma o v \tau \alpha)$. Second future passive of $\varphi \theta \varepsilon \iota \rho \omega$. Rhetorical Hebraism in the use of $\varepsilon v \varphi \theta$ o $\rho \alpha$ ( (ame root as $\varphi \theta \varepsilon \iota \rho \omega$ ), word four times in II Peter. See Jude 1:10 .

2Pet 2:13
Suffering wrong ( $\alpha \delta \iota \kappa о \nu \mu \varepsilon v o$ ). Present middle or passive participle of $\alpha \delta \iota \kappa \varepsilon \omega$ to do
 shall receive.

As the hire of wrong-doing ( $\left.\mu \sigma \theta \circ v \alpha \delta_{ı \kappa ı}\right)$ ). The Elephantine papyrus has the passive of $\alpha \delta$ ıкع $\omega$ in the sense of being defrauded, and that may be the idea here. Peter plays on words again here as often in II Peter. The picture proceeds now with participles like $\eta \gamma o u \mu \varepsilon v o$ (counting).

Pleasure ( $\eta \delta o v \eta v$ ). See Jas 4:1,3.
To revel in the daytime ( $\tau \eta v \varepsilon v \eta \mu \varepsilon \rho \alpha \tau \rho \nu \varphi \eta \nu$ ). "The in the daytime revel" (old word $\tau \rho \cup \varphi \eta$ from $\theta \rho v \pi \tau \omega$, to enervate, in N.T. only here and Lu 7:25 ).

Spots ( $\sigma \pi 1 \lambda 0$ ). Old word for disfiguring spot, in N.T. only here and Eph 5:27.
Blemishes ( $\mu \omega \mu \mathrm{o}$ ). Old word for blot (kin to $\mu \nu \omega$ ), only here in N.T. See 1Pe 1:19 for $\alpha \mu \omega \mu$ с ка абтı入ос.

Revelling ( $\varepsilon \vee \tau \rho \cup \varphi \omega \nu \tau \varepsilon \varsigma)$. Present active participle of $\varepsilon v \tau \rho \cup \varphi \alpha \omega$, old compound for living in luxury, only here in N.T.
 their deceivings). If $\alpha \gamma a \pi \alpha \iota \varsigma$ is genuine as it is in Jude $1: 12$, they are the only N.T. examples of this use of $\alpha \gamma \alpha \pi \eta$.

While they feast with you ( $\sigma v v \varepsilon \cup \omega \chi \circ v \mu \varepsilon v o$ ). Present passive participle of late and rare verb $\sigma v v \varepsilon v \omega \chi \varepsilon \omega$ ( $\sigma v \nu$, together, and $\varepsilon v \omega \chi \varepsilon \omega$, to feed abundantly) to entertain with. Clement of Alex. (Paed. ii. I. 6) applies $\varepsilon v \omega \chi ı$ to the $\alpha \gamma \alpha \pi \eta$.

2Pet 2:14
Of adultery ( $\mu$ ог $\chi \boldsymbol{\alpha} \iota \delta o \varsigma)$. Rather, "of an adulteress," like Jas 4:4. Vivid picture of a man who cannot see a woman without lascivious thoughts toward her (Mayor). Cf. Mt 5:28 .
 privative and verbal of $\kappa \alpha \tau \alpha \pi \alpha v \omega$, to cease). "Unable to stop." This a late verbal, only here in N.T. It is probable that aкататабтоv¢ is merely a misspelling of акаталаvбтovৎ.

From $\sin$ ( $\alpha \mu \alpha \rho \tau \iota \alpha \varsigma)$. Ablative case as in 1Pe 4:1 ( $\alpha \mu \alpha \rho \tau \iota \alpha \varsigma)$. Insatiable lust.

Enticing ( $\delta \varepsilon \lambda \varepsilon \alpha \zeta$ ovt $\tau \varsigma)$. Present active participle of $\delta \varepsilon \lambda \varepsilon \alpha \zeta \omega$, to catch by bait as in verse 18; Jas 1:14.

Unsteadfast (aбтпрıктои¢). Late verbal adjective (alpha privative and $\sigma \tau \eta \rho!\zeta \omega$ ), in Longinus and Vettius Valens, here alone in N.T.

Exercised ( $\gamma \varepsilon \gamma \nu \mu v a \sigma \mu \varepsilon v \eta \nu)$. Perfect passive predicate participle with $\varepsilon \chi \circ \nu \tau \varepsilon \varsigma$, from $\gamma \cup \mu \nu \alpha \zeta \omega$ precisely as in Heb 5:14. Rhetorical metaphor from the gymnasium.

In covetousness ( $\pi \lambda \varepsilon 0 v \varepsilon \xi ı a \varsigma)$. Genitive case after the participle.
Children of cursing (катарає $\tau \varepsilon \kappa v \alpha$ ). Hebraism like $\tau \varepsilon \kappa v \alpha$ vлакоךऽ in $1 \mathrm{Pe} 1: 14$ = асcursed (катарато).

2Pet 2:15
Forsaking (кат $\alpha \lambda \varepsilon ı \pi о \nu \tau \varepsilon \varsigma)$. Present active participle of $\kappa \alpha \tau \alpha \lambda \varepsilon ı \pi \omega$ (continually leaving) or ката入ıлоvtec (second aorist active), having left.

The right way ( $\varepsilon v \theta \varepsilon เ \alpha v ~ o \delta o v$ ). "The straight way" of 1Sa 12:23 (cf. Mt 7:13f. for this use of oठoc), "the way of truth" (2:2).

They went astray ( $\varepsilon \pi \lambda \alpha v \eta \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\pi \lambda \alpha v \alpha \omega$, like Mr 12:24.

The way of Balaam ( $\tau \eta$ o $\delta \omega$ tov $B \alpha \lambda \alpha \alpha \mu$ ). Associative instrumental case after $\varepsilon \xi \alpha \kappa о \lambda о u \theta \eta \sigma \alpha v \tau \varepsilon \varsigma$, for which verb see 1:16; 2:2. These false teachers, as shown in verse 13, followed the way of Balaam, "who loved the hire of wrong-doing" (os $\mu \iota \sigma \theta$ ov $\alpha \delta \iota \kappa \iota \alpha$, $\eta \gamma \alpha \pi \eta \sigma \varepsilon v)$.

2Pet 2:16
But he was rebuked ( $\varepsilon \lambda \varepsilon \gamma \xi ા v \delta \varepsilon \varepsilon \sigma \chi \varepsilon v$ ). "But he had rebuke." Second aorist active indicative of $\varepsilon \chi \omega$ and accusative of $\varepsilon \lambda \varepsilon \gamma \xi$ ૬c (late word from $\varepsilon \lambda \varepsilon \gamma \chi \omega$, a periphrasis for $\varepsilon \lambda \varepsilon \gamma \chi \omega$, here only in N.T.

For his own transgression (ı $\delta ı \alpha \varsigma ~ \pi \alpha \rho \alpha v o \mu \mu \alpha)$ ). Objective genitive of $\pi \alpha \rho \alpha v o \mu \mu \alpha$, old word (from $\pi \alpha \rho \alpha v o \mu o \varsigma ~ l a w b r e a k e r), ~ h e r e ~ o n l y ~ i n ~ N . T . ~$

A dumb ass ( $v \pi о \zeta \cup \gamma \vdash \nu \alpha \varphi \omega v o v)$. Dumb is without voice, old word for idols and beasts. The adjective vто弓иүוoc (ито לuүov ov) "being under a yoke," is applied to the ass as the common beast of burden (papyri, Deissmann, Bible Studies, p. 160), in N.T. only here and Mt 21:5.

Spake $(\varphi \theta \varepsilon \gamma \xi \alpha \mu \varepsilon v o v)$. First aorist middle participle of $\varphi \theta \varepsilon \gamma \gamma \circ \mu \alpha$, old verb, to utter a sound, in N.T. only here, verse 18, Ac 4:18 .

Stayed ( $\varepsilon \kappa \omega \lambda \nu \sigma \varepsilon \nu)$. First aorist active indicative of $\kappa \omega \lambda \nu \omega$, to hinder.
Madness ( $\pi \alpha \rho \alpha \varphi \rho o v i \alpha v)$. Only known example of this word instead of the usual $\pi \alpha \rho \alpha \varphi \rho о \sigma \cup v \eta$ or $\pi \alpha \rho \alpha \varphi \rho о v \eta \sigma \iota$. It is being beside one's wits.

2Pet 2:17
Without water ( $\alpha v v \delta \rho o$ ). As in Mt 12:43; Lu 11:24. Old word for common and disappointing experience of travellers in the orient.

Mists $(o \mu ı \chi \lambda \alpha)$. Old word for fog, here alone in N.T.
 , only other N.T. examples). See Jas 3:4 for another example of $\varepsilon \lambda \alpha v \nu \omega$ for driving power of wind and waves.

For whom (oıs). Dative case of personal interest.
The blackness (о ऍочо¢). See verse 4 for this word.
Hath been reserved ( $\tau \varepsilon \tau \eta \rho \eta \tau \alpha$ ). Perfect passive participle of $\tau \eta \rho \varepsilon \omega$, for which see verses 4,9.

2Pet 2:18
Great swelling words (v $\varepsilon \varepsilon \rho о \gamma \kappa \alpha$ ). Old compound adjective (v $\tau \varepsilon \rho$ and $о ү \kappa \circ \varsigma$, a swelling, swelling above and beyond), in N.T. only here and Jude 1:16 .

Of vanity ( $\mu \alpha \tau \alpha \iota \tau \tau \tau \sigma \varsigma)$. Late and rare word (from $\mu \alpha \tau \alpha \circ \varsigma$, empty, vain), often in LXX, in N.T. here, Ro 8:20; Eph 4:17 .

By lasciviousness ( $\alpha \sigma \varepsilon \lambda \gamma \varepsilon \iota \alpha \iota \varsigma)$. Instrumental plural, "by lascivious acts." Note asyndeton as in 1:9,17.

Those who are just escaping ( $\tau 0 \cup \varsigma о \lambda \iota \gamma \omega \varsigma \alpha \pi о \varphi \varepsilon v \gamma \circ \nu \tau \alpha \varsigma)$. So A B read o $\lambda \iota \gamma \omega \varsigma$ (slightly, a little), while Aleph C K L P read ov $\tau \omega \varsigma$ (actually). O $\lambda \iota \gamma \omega \varsigma$ late and rare, only here in N.T. So again the Textus Receptus has $\alpha \pi \circ \varphi v \gamma 0 v \tau \alpha \varsigma$ (second aorist active participle, clean escaped) while the correct text is the present active a $\quad \varphi \boldsymbol{\varphi} v \gamma о v \tau \alpha \varsigma$.

From them that live in error ( $\tau 0 v \varsigma \varepsilon v \pi \lambda \alpha \nu \eta \alpha v \alpha \sigma \tau \rho \varepsilon \varphi о \mu \varepsilon v o v \varsigma)$. Accusative case after $\alpha \pi о \varphi \varepsilon v \gamma 0 v \tau \alpha \varsigma$ (escaping from) according to regular idiom. Peter often uses $\alpha v \alpha \sigma \tau \rho \varepsilon \varphi \omega$ and $\alpha \nu \alpha \sigma \tau \rho \circ \varphi \eta$.

2Pet 2:19
Liberty ( $\varepsilon \lambda \varepsilon \cup \theta \varepsilon \rho \iota \alpha \nu)$. Promising "personal liberty," that is license, after the fashion of advocates of liquor today, not the freedom of truth in Christ (Joh 8:32; Ga 5:1,13 ).

Themselves bondservants ( $\alpha \cup \tau 0$ סov $\overline{\text { o }}$ ). "Themselves slaves" of corruption and sin as Paul has it in Ro 6:20 .

Of whom $(\omega)$. Instrumental case, but it may mean "of what."
Is overcome $(\eta \tau \tau \eta \tau \alpha)$. Perfect passive indicative of $\eta \tau \tau \alpha \omega$ (from $\eta \tau \tau \omega \nu$, less) old verb, in N.T. only here, verse 20; 2Co 12:13 .

Of the same ( $\tau 0 v \tau \omega$ ). "By this one (or thing)."
Is brought into bondage ( $\delta \varepsilon \delta o v \lambda \omega \tau \alpha$ ). Perfect passive indicative of $\delta o v \lambda o \omega$. Like Paul again (Ro 6:16,18; 8:21).

2Pet 2:20
After they have escaped ( $\alpha \pi \sigma \varphi v \gamma 0 v \tau \varepsilon \varsigma)$. Second aorist active participle here (see verse 18).

The defilements ( $\tau \alpha \mu \iota \alpha \mu \alpha \tau \alpha$ ). Old word miasma, from $\mu \iota \alpha \iota v \omega$, here only in N.T. Our "miasma." The body is sacred to God. Cf. $\mu \mathrm{L} \alpha \sigma \mu \mathrm{v}$ in verse 10.

They are again entangled ( $\pi \alpha \lambda \iota \nu \varepsilon \mu \pi \lambda \alpha \kappa \varepsilon \nu \tau \varepsilon \varsigma)$. Second aorist passive participle of $\varepsilon \mu \pi \lambda \varepsilon \kappa \omega$, old verb, to inweave (noosed, fettered), in N.T. only here and 2Ti 2:4 .

Overcome $(\eta \tau \tau \omega \nu \tau \alpha)$. Present passive indicative of $\eta \tau \tau \alpha o \omega$, for which see verse 19 , "are repeatedly worsted." Predicate in the condition of first class with $\varepsilon$. It is not clear whether the subject here is "the deluded victims" (Bigg) or the false teachers themselves (Mayor). See Heb 10:26 for a parallel.

Therein ( $\tau$ оитоぃ). So locative case (in these "defilements"), but it can be instrumental case ("by these," Strachan).

With them (avtoıৎ). Dative of disadvantage, "for them."
Than the first $(\tau \omega \nu \pi \rho \omega \tau \omega v)$. Ablative case after the comparative $\chi \varepsilon \iota \rho o v a$. See this moral drawn by Jesus (Mt 12:45; Lu 11:26).

2Pet 2:21
It were better ( $\kappa \rho \varepsilon \iota \tau \tau \sigma v \eta v$ ). Apodosis of a condition of second class without $\alpha v$, as is usual with clauses of possibility, propriety, obligation (Mt 26:24; 1Co 5:10; Ro 7:7; Heb 9:26 ).

Not to have known ( $\mu \eta \varepsilon \pi \varepsilon \gamma \nu \omega \kappa \varepsilon \nu \alpha$ ). Perfect active infinitive of $\varepsilon \pi \iota \gamma \iota \nu \omega \sigma \kappa \omega$ (cf. $\varepsilon \pi \iota \gamma \nu \omega \sigma \varepsilon$, verse 20) to know fully.

The way of righteousness ( $\tau \eta \nu$ o $\delta o \nu \tau \eta \varsigma \delta \iota \kappa \alpha \iota \sigma \cup \nu \eta \varsigma)$. For the phrase see Mt 21:33, also the way of truth ( $2: 2$ ), the straight way ( $2: 15$ ).

After knowing it ( $\varepsilon \pi \iota \gamma \nu 0 v \sigma \iota \nu)$. Second aorist active participle of $\varepsilon \pi \iota \gamma \iota \omega \sigma \kappa \omega$ (just used) in the dative plural agreeing with avtoıs (for them).

To turn back ( $v \pi \sigma \sigma \tau \rho \varepsilon \psi \alpha$ ). First aorist active infinitive of $v \pi \sigma \sigma \tau \rho \varepsilon \varphi \omega$, old and common verb, to turn back, to return.

From ( $\varepsilon \kappa$ ). Out of. So in Ac 12:25 with v $\pi \sigma \sigma \tau \rho \varepsilon \varphi \omega$. With ablative case. See Ro 7:12 for $a \gamma \iota \alpha$ applied to $\eta \varepsilon v \tau o \lambda \eta$ (cf. 1Ti 6:14 ). II Peter strikes a high ethical note (1:5ff. ).

Delivered ( $\pi \alpha \rho \alpha \delta o \theta \varepsilon \iota \sigma \eta \zeta)$. First aorist passive participle feminine ablative singular of $\pi \alpha \rho \alpha \delta{ }_{\imath} \delta \omega \mu$.

2Pet 2:22
It has happened $(\sigma u \mu \beta \varepsilon \beta \eta \kappa \varepsilon v)$. Perfect active indicative of $\sigma v \mu \beta a \iota v \omega$, for which see 1Pe 4:12.

According to the true proverb ( $\tau о \tau \eta \varsigma \alpha \lambda \eta \forall$ ovৎ $\pi \alpha \rho o \iota \mu \iota \varsigma)$ ) "The word ( $\tau 0$ used absolutely, the matter of, as in Mt 21:21; Jas 4:14) of the true proverb" ( $\pi \alpha \rho \circ \iota \mu \alpha$ a wayside saying, for which see Joh $10: 6 ; 16: 25,29$ ). The first proverb here given comes from $\operatorname{Pr} 26: 11$. $\mathrm{E} \xi \varepsilon \rho \alpha \mu \alpha$ is a late and rare word (here only in N.T., in Diosc. and Eustath.) from $\varepsilon \xi \varepsilon \rho \alpha \omega$, to vomit.

The sow that had washed (vc $\lambda \frac{1}{} \sigma \alpha \mu \varepsilon \nu \eta$ ). Hus, old word for hog, here only in N.T. Participle first aorist direct middle of $\lambda \mathrm{ov} \omega$ shows that it is feminine (anarthrous). This second proverb does not occur in the O.T., probably from a Gentile source because about
the habit of hogs. Epictetus and other writers moralize on the habit of hogs, having once bathed in a filthy mud-hole, to delight in it.

To wallowing ( $\varepsilon \varsigma \varsigma \kappa \nu \lambda \iota \sigma \mu \circ v$ ). "To rolling." Late and rare word (from $\kappa \nu \lambda \iota \omega$, Mr 9:20 ), here only in N.T.

In the mire ( $\beta \mathrm{op} \beta \mathrm{o} \mathrm{\rho ov}$ ). Objective genitive, old word for dung, mire, here only in N.T. J. Rendel Harris (Story of Ahikar, p. LXVII) tells of a story about a hog that went to the bath with people of quality, but on coming out saw a stinking drain and went and rolled himself in it.

## 2 Peter 3

2Pet 3:1
Beloved ( $\alpha \boldsymbol{\gamma} \alpha \pi \eta \tau 0$ ). With this vocative verbal (four times in this chapter), Peter "turns away from the Libertines and their victims" (Mayor).

This is now the second epistle that I write unto you ( $\tau \alpha \cup \tau \eta \vee \eta \delta \eta \eta \delta \varepsilon \tau \tau \varepsilon \rho \alpha \nu \nu \mu \nu \vee \gamma \rho \alpha \varphi \omega$ $\varepsilon \pi \iota \sigma \tau o \lambda \eta v)$. Literally, "This already a second epistle I am writing to you." For $\eta \delta \eta$ see Joh $21: 24$. It is the predicate use of $\delta \varepsilon v \tau \varepsilon \rho \alpha \nu \varepsilon \pi \not \approx \tau \tau 0 \lambda \eta \nu$ in apposition with $\tau \alpha u \tau \eta \nu$, not "this second epistle." Reference apparently to I Peter.

And in both of them ( $\varepsilon v$ aıc). "In which epistles."
I stir up $(\delta \iota \varepsilon \gamma \varepsilon \iota \rho \omega)$. Present active indicative, perhaps conative, "I try to stir up." See 1:13.

Mind ( $\delta$ tavoı $\alpha v$ ). Understanding (Plato) as in 1Pe 1:13 .
Sincere ( $\varepsilon \lambda \lambda เ \kappa \rho \iota v \eta$ ). Old adjective of doubtful etymology (supposed to be $\varepsilon i \lambda \eta$, sunlight, and $\kappa \rho \imath v \omega$, to judge by it). Plato used it of ethical purity ( $\psi v \chi \eta \varepsilon \wedge \lambda ı \rho \rho \imath \eta \varsigma)$ as here and Php 1:10, the only N.T. examples.

By putting you in remembrance ( $\varepsilon v v \pi \sigma \mu \nu \eta \sigma \varepsilon$ ). As in 1:13.
2Pet 3:2
That ye should remember ( $\mu \nu \eta \sigma \theta \eta v \alpha$ ). First aorist passive (deponent) infinitive of $\mu \mu \nu \eta \sigma \kappa \omega$, to remind. Purpose (indirect command) is here expressed by this infinitive. Imperative in Jude 1:17.

Spoken before ( $\pi \rho \circ \varepsilon \iota \rho \eta \mu \varepsilon \omega \omega v$ ). Perfect passive participle of $\pi \rho \circ \varepsilon ı \pi o v$ (defective verb). Genitive case $\rho \eta \mu \alpha \tau \omega \nu$ after $\mu \nu \eta \sigma \theta \eta \nu \alpha$.

And the commandment ( $\kappa \alpha \tau \eta \varsigma \varepsilon \nu \tau o \lambda \eta \varsigma$ ). Ablative case with $v \pi o$ (agency).
Of the Lord and Saviour through your apostles ( $\tau \omega v \alpha \pi о \sigma \tau о \lambda \omega \nu \nu \mu \omega \nu \tau o v$ кvpıov $\kappa \alpha \sigma \omega \tau \eta \rho \circ \varsigma)$. H $\nu \mu \omega \nu$ (your) is correct, not $\eta \mu \omega \nu$ (our). But the several genitives complicate the sense. If $\delta \iota \alpha$ (through) occurred before $\tau \omega \nu \alpha \pi \circ \sigma \tau o \lambda \omega \nu$, it would be clear. It is held by some that Peter would not thus speak of the twelve apostles, including himself, and that the forger here allows the mask to slip, but Bigg rightly regards this a needless inference. The meaning is that they should remember the teaching of their apostles and not follow the Gnostic libertines.

2Pet 3:3
Knowing this first ( $\tau 0 \cup \tau 0 \pi \rho \omega \tau \circ v \gamma เ \nu \omega \sigma \kappa \circ \nu \tau \varepsilon \varsigma)$. Present active participle of $\gamma \iota \nu \omega \sigma \kappa \omega$. See 1:20 for this identical phrase. Nominative absolute here where accusative $\gamma \iota \omega \omega \sigma \kappa 0 \nu \tau \alpha \varsigma$ would be regular. Peter now takes up the $\pi \alpha \rho о v \sigma \iota \alpha$ ( $1: 16$ ) after having discussed the $\delta \nu v a \mu$, of Christ.

In the last days ( $\varepsilon \pi^{\prime} \varepsilon \sigma \chi \alpha \tau \omega \nu \tau \omega v \eta \mu \varepsilon \rho \omega v$ ). "Upon the last of the days." Jude 1:18 has it $\varepsilon \pi^{\prime} \varepsilon \sigma \chi \alpha \tau 00 \chi \rho \circ v o v$ (upon the last time). In 1Pe 1:5 it is $\varepsilon v \kappa \alpha \iota \rho \omega \varepsilon \sigma \chi \alpha \tau \omega$ (in the last time),
while 1Pe 1:20 has $\varepsilon \pi^{\prime} \varepsilon \sigma \chi \alpha \tau o v \tau \omega v \chi \rho o v \omega v$ (upon the last of the times). John has usually $\tau \eta \varepsilon \sigma \chi \alpha \tau \eta \eta \mu \varepsilon \rho \alpha$ (on the last day, 6:39f. ). Here $\varepsilon \sigma \chi \alpha \tau \omega v$ is a predicate adjective like $\sigma \nu \mu \mu \nu \varsigma$ $\mu \mathrm{ov}$ ( (the top of the mountain).

Mockers with mockery ( $\varepsilon \mu \pi \alpha \iota \gamma \mu \circ \nu \eta \varepsilon \mu \pi \alpha \iota \kappa \tau \alpha)$. Note Peter's play on words again, both from $\varepsilon \mu \pi \alpha \iota \zeta \omega$ (Mt 2:16) , to trifle with, and neither found elsewhere save $\varepsilon \mu \pi \alpha \_\kappa \tau \eta \varsigma$ in Jude 1:18; Isa 3:4 (playing like children).

2Pet 3:4
Where is the promise of his coming? ( $\pi 0 v \varepsilon \sigma \tau \iota v \eta \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda ı \alpha \tau \eta \varsigma \pi \alpha \rho о v \sigma \iota \alpha \varsigma \alpha \cup \tau o v ;)$. This is the only sample of the questions raised by these mockers. Peter had mentioned this subject of the $\pi \alpha \rho o v \sigma ı \alpha$ in $1: 16$. Now he faces it squarely. Peter, like Paul (1Th 5:1f.; 2Th 2:1f. ), preached about the second coming (1:16; Ac 3:20f. ), as Jesus himself did repeatedly (Mt 24:34) and as the angels promised at the Ascension (Ac 1:11). Both Jesus and Paul ( $2 \mathrm{Th} 2: 1 \mathrm{f}$.) were misunderstood on the subject of the time and the parables of Jesus urged readiness and forbade setting dates for his coming, though his language in Mt 24:34 probably led some to believe that he would certainly come while they were alive.

From the day that ( $\alpha \varphi^{\prime} \eta \varsigma$ ). "From which day." See Lu 7:45.
Fell asleep ( $\varepsilon \kappa о \mu \eta \theta \eta \sigma \alpha v$ ). First aorist passive indicative of ко $\mu \alpha \omega$, old verb, to put sleep, classic euphemism for death (Joh 11:11) like our cemetery (sleeping-place).

Continue ( $\delta \iota \alpha \mu \varepsilon v \varepsilon$ ). Present active indicative of $\delta \iota \alpha \mu \varepsilon \nu \omega$, to remain through (Lu 1:22 ). In statu quo.

As they were (ov $\omega \varsigma$ ). "Thus."
From the beginning of creation ( $\alpha \pi^{\prime} \alpha \rho \chi \eta \varsigma \kappa \tau \iota \sigma \varepsilon \omega \varsigma$ ). Precisely so in $\mathrm{Mr} 10: 6$, which see.

2Pet 3:5
For this they wilfully forget ( $\lambda \alpha v \theta \alpha v \varepsilon \gamma \alpha \rho \alpha v \tau 0 \cup \varsigma ~ \tau o v \tau o ~ \theta \varepsilon \lambda o v \tau \alpha \varsigma)$. Literally, "for this escapes them being willing." See this use of $\lambda \alpha v \theta a v \omega$ (old verb, to escape notice of, to be hidden from) in Ac 26:26. The present active participle $\theta \varepsilon \lambda o v \tau \alpha \varsigma$ (from $\theta \varepsilon \lambda \omega$, to wish) has almost an adverbial sense here.

Compacted ( $\sigma \nu \vee \varepsilon \sigma \tau \omega \sigma \alpha$ ). See Paul's $\sigma u v \varepsilon \sigma \tau \eta \kappa \varepsilon \nu(\operatorname{Col} 1: 17)$ "consist." Second perfect active (intransitive) participle of $\sigma v \nu \iota \sigma \tau \eta \mu$, feminine singular agreeing with $\gamma \eta$ (nearest to it) rather than with oupavo (subject of $\eta \sigma \alpha v$ imperfect plural). There is no need to make Peter mean the Jewish mystical "seven heavens" because of the plural which was used interchangeably with the singular (Mt 5:9f. ).

Out of water and amidst water $\left(\varepsilon \xi v \delta \alpha \tau \circ \varsigma \kappa \alpha \delta i^{\prime} v \delta \alpha \tau о \varsigma\right)$. Out of the primeval watery chaos (Ge 1:2), but it is not plain what is meant by $\delta \mathrm{t}^{\prime} v \delta a \tau o \varsigma$, which naturally means "by means of water," though $\delta$ ıa with the genitive is used for a condition or state (Heb 12:1). The reference may be to Ge 1:9, the gathering together of the waters.

By the word of God ( $\tau \omega \operatorname{\tau ov} \theta \varepsilon o v \lambda o \gamma \omega$ ). Instrumental case $\lambda o \gamma \omega$, "by the fiat of God" (Ge 1:3; Heb 11:3 $\eta \eta \mu \boldsymbol{\mu} \theta \varepsilon o v)$.

2Pet 3:6
By which means ( $\delta i^{\prime} \omega v$ ). The two waters above or the water and the word of God. Mayor against the MSS. reads $\delta i^{\prime}$ ov (singular) and refers it to $\lambda o \gamma \omega$ alone.

Being overshadowed (катак $\nu \cup \sigma \theta \varepsilon \iota \varsigma)$. First aorist passive participle of катак $\nu \zeta \omega$, old compound, here only in N.T., but see катак $\lambda \nu \sigma \mu$, in 2:5.

With water ( $v \delta \alpha \tau$ ). Instrumental case of $v \delta \omega \rho$.
Perished ( $\alpha \pi \omega \lambda \varepsilon \tau \sigma$ ). Second aorist middle indicative of $\alpha \pi \sigma \lambda \lambda \nu \mu$.
2Pet 3:7
That now are ( $v v v$ ). "The now heavens" over against "the then world" (o тотє коб $\mu$ оя verse 6).

By the same word ( $\tau \omega \alpha \cup \tau \omega \lambda o \gamma \omega$ ). Instrumental case again referring to $\lambda o \gamma \omega$ in verse 6.

Have been stored up ( $\tau \varepsilon \theta \eta \sigma \alpha v \rho \iota \sigma \mu \varepsilon v o \varepsilon ו \sigma \iota v$ ). Perfect passive indicative of $\theta \eta \sigma \alpha \cup \rho \iota \zeta \omega$, for which verb see Mt 6:19; Lu 12:21.

For fire ( $\pi v \rho$ ). Dative case of $\pi \nu \rho$, not with fire (instrumental case). The destruction of the world by fire is here pictured as in Joe 2:30f.; Ps 50:3 .

Being reserved ( $\tau \eta \rho o v \mu \varepsilon v o$ ). Present passive participle of $\tau \eta \rho \varepsilon \omega$, for which see 2:4.
Against ( $\varepsilon \varsigma \varsigma)$. Unto. As in 2:4,9 and see 1 Pe 1:4 for the inheritance reserved for the saints of God.

2Pet 3:8
Forget not this one thing ( $\varepsilon v \tau$ тоvто $\mu \eta \lambda \alpha v \theta a v \varepsilon \tau \omega v \mu \alpha \varsigma)$. Rather, "let not this one thing escape you." For $\lambda \alpha v \theta a v \varepsilon \tau \omega$ (present active imperative of $\lambda \alpha v \theta \alpha v \omega$ ) see verse 5 . The "one thing" ( $\varepsilon v$ ) is explained by the o $\boldsymbol{\tau}$ (that) clause following. Peter applies the language of Ps 90:4 about the eternity of God and shortness of human life to "the impatience of human expectations" (Bigg) about the second coming of Christ. "The day of judgment is at hand (1Pe 4:7). It may come tomorrow; but what is tomorrow? What does God mean by a day? It may be a thousand years" (Bigg). Precisely the same argument applies to those who argue for a literal interpretation of the thousand years in Re 20:4-6. It may be a day or a day may be a thousand years. God's clock ( $\pi \alpha \rho \alpha$ кv $\omega \omega$, beside the Lord) does not run by our timepieces. The scoffers scoff ignorantly.

2Pet 3:9
Is not slack concerning his promise (ov $\beta \rho \alpha \delta u v \varepsilon \tau \eta \varsigma \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda 1 \alpha \varsigma)$. Ablative case $\varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \iota a \varsigma$ after $\beta \rho \alpha \delta u v \varepsilon$ (present active indicative of $\beta \rho \alpha \delta u v \omega$, from $\beta \rho \alpha \delta u \varsigma$, slow), old verb, to be slow in, to fall short of (like $\lambda \varepsilon \iota \pi \varepsilon \tau \alpha$ боبıんऽ in Jas 1:5), here and 1Ti 3:15 only in N.T.

Slackness ( $\beta \rho \alpha \delta v \tau \eta \tau \alpha$ ). Old substantive from $\beta \rho \alpha \delta v \varsigma$ (Jas 1:19), here only in N.T. God is not impotent nor unwilling to execute his promise.

To youward ( $\varepsilon \iota \varsigma \nu \mu \propto \varsigma)$. Проц rather than $\varepsilon \iota \varsigma$ after $\mu \alpha \kappa \rho о \theta v \mu \varepsilon$ in 1Th 5:14 and $\varepsilon \pi$ in Jas 5:7, etc.

Not wishing ( $\mu \eta \beta o v \lambda o \mu \varepsilon \nu o c)$. Present middle participle of $\beta o v \lambda o \mu \alpha$. Some will perish (verse 7), but that is not God's desire. Any ( $\tau \imath \alpha \varsigma) . ~ R a t h e r ~ t h a n ~ " s o m e " ~(\tau ı v \varepsilon \varsigma) ~ a b o v e . ~ A c c u s-~$ ative with the infinitive $\alpha \pi \sigma \lambda \varepsilon \sigma \theta \alpha$ (second aorist middle of $\alpha \pi \sigma \lambda \lambda \nu \mu$. God wishes "all" ( $\pi \alpha \vee \tau \alpha \varsigma$ ) to come ( $\chi \omega \rho \eta \sigma \alpha$ first aorist active infinitive of $\chi \omega \rho \varepsilon \omega$, old verb, to make room). See Ac 17:30; Ro 11:32; 1Ti 2:4; Heb 2:9 for God's provision of grace for all who will repent.

2Pet 3:10
The day of the Lord ( $\eta \mu \varepsilon \rho \alpha$ кv $\rho \stackrel{\text { L }}{ }$ ). So Peter in Ac 2:20 (from Joe 3:4) and Paul in 1Th 5:2,4; 2Th 2:2; 1Co 5:5; and day of Christ in Php 2:16 and day of God in 2:12 and day of judgment already in $2: 9 ; 3: 7$. This great day will certainly come $(\eta \xi \varepsilon)$. Future active of $\eta \kappa \omega$, old verb, to arrive, but in God's own time.

As a thief ( $\omega \varsigma \kappa \lambda \varepsilon \pi \tau \eta \varsigma)$. That is suddenly, without notice. This very metaphor Jesus had used (Lu 12:39; Mt 24:43) and Paul after him (1Th 5:2) and John will quote it also (Re 3:3; 16:15).

In the which $(\varepsilon \vee \eta)$. The day when the Lord comes.
Shall pass away ( $\pi \alpha \rho \varepsilon \lambda \varepsilon v \sigma o v \tau \alpha$ ). Future middle of $\pi \alpha \rho \varepsilon \rho \chi \circ \mu \alpha$, old verb, to pass by.
With a great noise ( $\rho \circ \iota \zeta \eta \delta o v$ ). Late and rare adverb (from $\rho o \iota \zeta \varepsilon \omega, \rho o \iota \zeta \circ \varsigma)$-- Lycophron, Nicander, here only in N.T., onomatopoetic, whizzing sound of rapid motion through the air like the flight of a bird, thunder, fierce flame.

The elements ( $\tau \alpha \sigma \tau \circ \tau \chi \varepsilon \iota \alpha$ ). Old word (from $\sigma \tau \circ \chi \chi \circ \varsigma$ a row), in Plato in this sense, in other senses also in N.T. as the alphabet, ceremonial regulations (Heb 5:12; Ga 4:3; 5:1; Col 2:8).

Shall be dissolved $(\lambda \nu \theta \eta \sigma \varepsilon \tau \alpha)$. Future passive of $\lambda v \omega$, to loosen, singular because

With fervent heat ( $\kappa \alpha v \sigma o v \mu \varepsilon v \alpha$ ). Present passive participle of $\kappa \alpha v \sigma o \omega$, late verb (from каvбоऽ, usually medical term for fever) and nearly always employed for fever temperature. Mayor suggests a conflagration from internal heat. Bigg thinks it merely a vernacular (Doric) future for $\kappa \alpha v \sigma о \mu \varepsilon v \alpha$ (from $\kappa \alpha \omega \omega$, to burn).

Shall be burned up ( $\kappa \alpha \tau \alpha \kappa \alpha \eta \sigma \varepsilon \tau \alpha)$. Repeated in verse 12. Second future passive of the compound verb катакаเ $\omega$, to burn down (up), according to A L. But Aleph B K P read $\varepsilon \cup \rho \varepsilon \theta \eta \sigma \varepsilon \tau \alpha$ (future passive of $\varepsilon \cup \rho \iota \sigma \kappa \omega$, to find) "shall be found." There are various other readings here. The text seems corrupt.

2Pet 3:11

To be dissolved ( $\lambda v o \mu \varepsilon v \omega v$ ). Present passive participle (genitive absolute with $\tau 0 v \tau \omega \nu$ $\pi \alpha \nu \tau \omega v$, these things all) of $\lambda \nu \omega$, either the futuristic present or the process of dissolution presented.
 older $\pi \mathbf{\pi} \delta \alpha \pi$ о as in Mt 8:27, accusative case with $\delta \varepsilon v \pi \alpha \rho \chi \varepsilon ı v$ agreeing with v $\mu a \varsigma$ (you). See $1: 8$ for $v \pi \alpha \rho \chi \omega$.

In all holy living and godliness ( $\varepsilon v$ aүıaı $\alpha v a \sigma \tau \rho о \varphi \alpha ı \varsigma \kappa \alpha \varepsilon v \sigma \varepsilon \beta \varepsilon ı \alpha \iota \varsigma)$. "In holy behaviours and pieties" (Alford). Plural of neither word elsewhere in N.T., but a practical plural in $\pi \alpha \sigma \alpha$ avaбт $\rho \circ \varphi \eta$ in 1Pe 1:15.

2Pet 3:12
Looking for ( $\pi \rho \circ \sigma \delta o \kappa \omega v \tau \alpha \varsigma)$. Present active participle of $\pi \rho \circ \sigma \delta$ ока $\omega$ (Mt 11:3) agreeing in case (accusative plural) with $v \mu \alpha \varsigma$.

Earnestly desiring ( $\sigma \pi \varepsilon v \delta o v \tau \alpha \varsigma)$. Present active participle, accusative also, of $\sigma \pi \varepsilon v \delta \omega$, old verb, to hasten (like our speed) as in Lu 2:16, but it is sometimes transitive as here either (preferably so) to "hasten on the parousia" by holy living (cf. 1Pe 2:12), with which idea compare Mt 6:10; Ac 3:19f. , or to desire earnestly (Isa 16:5).

Being on fire ( $\pi v \rho \circ v \mu \varepsilon v o$ ). Present passive participle of $\pi v \rho o \omega$, old verb (from pur), same idea as in verse 10.

Shall melt ( $\tau \eta \kappa \varepsilon \tau \alpha$ ). Futuristic present passive indicative of $\tau \eta \kappa \omega$, old verb, to make liquid, here only in N.T. Hort suggests $\tau \eta \xi \varepsilon \tau \alpha$ (future middle), though Isa 34:4 has $\tau \alpha \kappa \eta \sigma о \nu \tau \alpha$ (second future passive). The repetitions here make "an effective refrain" (Mayor).

2Pet 3:13
Promise ( $\varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \mu \alpha$ ). As in 1:4. The reference is to Isa 65:17f.; 66:22 . See also Re 21:1 . For kaivos (new) see on Mt 26:29. For the expectant attitude in $\pi \rho \circ \sigma \delta o \kappa \omega \mu \varepsilon \nu$ (we look for) repeated from verse 12 and again in verse 14 , see $\alpha \pi \varepsilon \kappa \delta \varepsilon \chi \circ \mu \varepsilon \theta \alpha$ (we eagerly look for) in Php 3:20.

Wherein ( $\varepsilon v$ oıs). The new heavens and earth.
Dwelleth (катоюке). Has its home (оккос). Certainly "righteousness" ( $\delta$ ıкаобииף) is not at home in this present world either in individuals, families, or nations.

2Pet 3:14
Wherefore ( $\delta \iota 0$ ). As in 1:10,12.
Give diligence ( $\sigma \pi \frac{0}{} \alpha \alpha \sigma \alpha \tau \varepsilon$ ). As in 1:10.
That ye may be found ( $\varepsilon v \rho \varepsilon \theta \eta v \alpha$ ). First aorist passive infinitive (cf. $\varepsilon v \rho \varepsilon \theta \eta \sigma \varepsilon \tau \alpha$ in verse 10). For this use of $\varepsilon v \rho \iota \sigma \kappa \omega$ about the end see 2Co 5:3; Php 3:9; $1 \mathrm{Pe} 1: 7$.

Without spot and blameless ( $\alpha \sigma \pi \iota \lambda о$ ка $\alpha \mu \omega \mu \eta \tau о$ ). Predicate nominative after $\varepsilon \cup \rho \varepsilon \theta \eta v \alpha$. See 2:13 for position words $\sigma \pi \iota \lambda$ о ка $\mu \omega \mu$ o and 1Pe 1:19 for $\alpha \mu \omega \mu$ ос (so Jude 1:24) ка $\alpha \sigma \pi i \lambda o \varsigma($ so Jas 1:27). A $\mu \omega \mu \eta \tau 0 \varsigma$ (old verbal of $\mu \omega \mu \alpha \circ \mu \alpha$ ) only here in N.T. save some MSS. in Php 2:15.

2Pet 3:15
In his sight ( $\alpha \cup \tau \omega$ ). Ethical dative. Referring to Christ.
Is salvation $(\sigma \omega \tau \eta \rho \iota \alpha \nu)$. Predicate accusative after $\eta \gamma \varepsilon \iota \sigma \theta \varepsilon$ in apposition with $\mu \alpha \kappa \rho о \theta \nu \mu \alpha \nu$ (long-suffering), an opportunity for repentance (cf. 1Pe 3:20 ). The Lord here is Christ.

Our beloved brother Paul (о $\alpha \gamma \alpha \pi \eta \tau о \varsigma ~ \alpha \delta \varepsilon \lambda \varphi о \varsigma ~ П \alpha v \lambda о \varsigma) . ~ P a u l ~ a p p l i e s ~ t h e ~ v e r b a l ~$ aүanŋтos (beloved) to Epaphras (Col 1:7), Onesimus (Col 4:9; Phm 1:16), to Tychicus (Col 4:7; Eph 6:21 ), and to four brethren in Ro 16 (Epainetus Ro 16:5, Ampliatus Ro 16:8 , Stachys Ro 16:9, Persis Ro 16:12 ). It is not surprising for Peter to use it of Paul in view of Gal 2:9f. , in spite of Ga 2:11-14.

Given to him ( $\delta o \theta \varepsilon \iota \sigma \alpha \nu \alpha v \tau \omega)$. First aorist passive participle of $\delta \iota \delta \omega \mu$ with dative case. Peter claimed wisdom for himself, but recognises that Paul had the gift also. His language here may have caution in it as well as commendation. "St. Peter speaks of him with affection and respect, yet maintains the right to criticise" (Bigg).

2Pet 3:16
As also in all his epistles ( $\omega \varsigma \kappa \alpha \varepsilon v \pi \alpha \sigma \alpha \iota \varsigma ~ \varepsilon \pi \iota \sigma \tau о \lambda \alpha \iota)$. We do not know to how many Peter here refers. There is no difficulty in supposing that Peter "received every one of St. Paul's Epistles within a month or two of its publication" (Bigg). And yet Peter does not here assert the formation of a canon of Paul's Epistles.

Speaking in them of these things ( $\lambda \alpha \lambda \omega \nu \varepsilon v \alpha v \tau \alpha \iota \pi \varepsilon \rho \tau 0 v \tau \omega v$ ). Present active participle of $\lambda \alpha \lambda \varepsilon \omega$. That is to say, Paul also wrote about the second coming of Christ, as is obviously true.

Hard to be understood ( $\delta v \sigma v o \eta \tau \alpha$ ). Late verbal from $\delta u \varsigma$ and $v o \varepsilon \omega$ (in Aristotle, Lucian, Diog. Laert.), here only in N.T. We know that the Thessalonians persisted in misrepresenting Paul on this very subject of the second coming as Hymenaeus and Philetus did about the resurrection (2Ti 2:17) and Spitta holds that Paul's teaching about grace was twisted to mean moral laxity like Ga 3:10; Ro 3:20,28; 5:20 (with which cf. 6:1 as a case in point), etc. Peter does not say that he himself did not understand Paul on the subject of faith and freedom.

Unlearned ( $\alpha \mu \alpha \theta \varepsilon ı \varsigma)$. Old word (alpha privative and $\mu \alpha v \theta \alpha v \omega$ to learn), ignorant, here only in N.T.

Unsteadfast ( $\alpha \sigma \tau \eta \rho ı \kappa \tau о$ ). See on 2:14.
Wrest ( $\sigma \tau \rho \varepsilon \beta \lambda o v \sigma \iota \nu$ ). Present active indicative of $\sigma \tau \rho \varepsilon \beta \lambda o \omega$, old verb (from $\sigma \tau \rho \varepsilon \beta \lambda$ os twisted, $\sigma \tau \rho \varepsilon \varphi \omega$, to turn), here only in N.T.

The other scriptures ( $\tau \alpha \varsigma \lambda о \iota \pi \alpha \varsigma \gamma \rho \propto \rho \varsigma)$. There is no doubt that the apostles claimed to speak by the help of the Holy Spirit (1Th 5:27; Col 4:16) just as the prophets of old did (2Pe 1:20f. ). Note $\lambda$ oıt $\alpha \varsigma$ (rest) here rather than $\alpha \lambda \lambda \alpha \varsigma$ (other). Peter thus puts Paul's Epistles on the same plane with the O.T., which was also misused (Mt 5:21-44; 15:3-6; 19:3-10 ).

2Pet 3:17
Knowing these things beforehand ( $\pi \rho \sigma \neq \imath \omega \sigma \kappa o v \tau \varepsilon \varsigma)$. Present active participle of $\pi \rho о \gamma \iota \omega \sigma \kappa \omega$ as in 1Pe 1:20. Cf. $\pi \rho \omega \tau \sigma \nu \quad \gamma \omega \sigma \kappa \omega(1: 20 ; 3: 1)$. Hence they are without excuse for misunderstanding Peter or Paul on this subject.

Beware ( $\varphi \cup \lambda \alpha \sigma \sigma \varepsilon \sigma \theta \varepsilon)$. Present middle imperative of $\varphi v \lambda \alpha \sigma \sigma \omega$, common verb, to guard.
Lest ( $七 \propto \alpha \eta)$. Negative purpose, "that not."
Being carried away ( $\sigma v v a \pi \alpha \chi \theta \varepsilon v \tau \varepsilon \varsigma$ ). First aorist passive participle of $\sigma v v a \pi \alpha \gamma \omega$, old verb double compound, to carry away together with, in N.T. only here and Ga 2:13.

With the error ( $\tau \eta \pi \lambda a v \eta$ ). Instrumental case, "by the error" (the wandering).
Of the wicked ( $\tau \omega \nu \alpha \theta \varepsilon \sigma \mu \omega \nu$ ). See on 2:7.
Ye fall from ( $\varepsilon \kappa \pi \varepsilon \sigma \eta \tau \varepsilon$ ). Second aorist active subjunctive with $\imath v \alpha \mu \eta$ of $\varepsilon \kappa \pi \iota \pi \tau \omega$, old verb, to fall out of, with the ablative here ( $\sigma \tau \eta \rho \iota \gamma \mu \circ v$, steadfastness, late word from $\sigma \tau \eta \rho \iota \omega$, here alone in N.T.) as in Ga 5:4 ( $\tau \eta \varsigma \chi \alpha \rho ı \tau \circ \varsigma \varepsilon \xi \varepsilon \pi \varepsilon \sigma \alpha \tau \varepsilon$, ye fell out of grace).

2Pet 3:18
But grow ( $\alpha v \xi \alpha v \varepsilon \tau \varepsilon \delta \varepsilon$ ). Present active imperative of $\alpha v \xi \alpha v \omega$, in contrast with such a fate pictured in verse 17, "but keep on growing."

In the grace and knowledge ( $\varepsilon v \chi \alpha \rho \iota \tau \kappa \alpha \gamma \nu \omega \sigma \varepsilon$ ). Locative case with $\varepsilon v$. Grow in both. Keep it up. See on $1: 1$ for the idiomatic use of the single article ( $\tau 0$ ) here, "of our Lord and Saviour Jesus Christ."

To him ( $\alpha v \tau \omega$ ). To Christ.
For ever ( $\varepsilon \iota \varsigma ~ \eta \mu \varepsilon \rho \alpha \nu \alpha \iota \omega \nu \circ \varsigma)$. "Unto the day of eternity." So Sirach 18:9f. One of the various ways of expressing eternity by the use of aı $\omega v$. So $\varepsilon \iota \varsigma ~ \tau o v ~ \alpha ı \omega v \alpha$ in Joh 6:5; 12:34.

## THE FIRST EPISTLE OF JOHN

ABOUT A.D. 85 TO 90

## BY WAY OF INTRODUCTION

## RELATION TO THE FOURTH GOSPEL

There are few scholars who deny that the Epistles of John and the Fourth Gospel are by the same writer. As a matter of fact "in the whole of the First Epistle there is hardly a single thought that is not found in the Gospel" (Schulze). H. J. Holtzmann (Jahrbuch fur Protestantische Theologie, 1882, P. 128) in a series of articles on the "Problem of the First Epistle of St. John in its Relation to the Gospel" thinks that the similarities are closer than those between Luke's Gospel and the Acts. Baur argued that this fact was explained by conscious imitation on the part of one or the other, probably by the author of the Epistle. The solution lies either in identity of authorship or in imitation. If there is identity of authorship, Holtzmann argues that the Epistle is earlier, as seems to me to be true, while Brooke holds that the Gospel is the earlier and that the First Epistle represents the more complete ideas of the author. Both Holtzmann and Brooke give a detailed comparison of likenesses between the First Epistle and the Fourth Gospel in vocabulary, syntax, style, ideas. The arguments are not conclusive as to the priority of Epistle or Gospel, but they are as to identity of authorship. One who accepts, as I do, the Johannine authorship of the Fourth Gospel for the reasons given in Volume V of this series, does not feel called upon to prove the Johannine authorship of the three Epistles that pass under the Apostle's name. Westcott suggests that one compare Joh 1:1-18 with 1Jo 1:1-4 to see how the same mind deals with the same ideas in different connections. "No theory of conscious imitation can reasonably explain the subtle coincidences and differences in these two short crucial passages."

## GNOSTICISM

The Epistle is not a polemic primarily, but a letter for the edification of the readers in the truth and the life in Christ. And yet the errors of the Gnostics are constantly before John's mind. The leaders had gone out from among the true Christians, but there was an atmosphere of sympathy that constituted a subtle danger. There are only two passages (1Jo 2:18f.; 4:1-6 ) in which the false teachers are specifically denounced, but "this unethical intellectualism" (Robert Law) with its dash of Greek culture and Oriental mysticism and licentiousness gave a curious attraction for many who did not know how to think clearly. John, like Paul in Colossians, Ephesians, and the Pastoral Epistles, foresaw this dire peril to Christianity. In the second century it gave pure Christianity a gigantic struggle. "The great Gnostics were the first Christian philosophers" (Robert Law, The Tests of Life, p. 27) and threatened to undermine the Gospel message by "deifying the devil" (ib., p. 31) along with dethroning Christ. There were two kinds of Gnostics, both agreeing in the essential evil of matter. Both had trouble with the Person of Christ. The Docetic Gnostics denied the actual
humanity of Christ, the Cerinthian Gnostics distinguished between the man Jesus and the acov Christ that came on him at his baptism and left him on the Cross. Some practised asceticism, some licentiousness. John opposes both classes in his Epistles. They claimed superior knowledge ( $\gamma \nu \omega \sigma \iota \varsigma$ ) and so were called Gnostics ( $\Gamma \nu \omega \sigma \tau \iota \kappa$ ). Nine times John gives tests for knowing the truth and uses the verb $\gamma \iota \nu \omega \sigma \kappa \omega$ (know) each time (1Jo 2:3,5; 3:16,19,24; $4: 2,6,13 ; 5: 2$ ). Some of the leaders he calls antichrists. There are stories about John's dread of Cerinthus and his unwillingness to be seen in the same public bath with him. The Apostle of love, as he is, is a real son of thunder when Gnosticism shows its head. Westcott thinks that the Fourth Gospel was written to prove the deity of Christ, assuming his humanity, while I John was written to prove the humanity of Christ, assuming his deity. Certainly both ideas appear in both books.

## DESTINATION

It is not clear to whom the Epistle is addressed. Like the Gospel, the Epistle of John came out of the Asiatic circle with Ephesus as the centre. Augustine has the strange statement that the Epistle was addressed to the Parthians. There are other ingenious conjectures which come to nothing. The Epistle was clearly sent to those familiar with John's message, possibly to the churches of the Province of Asia (cf. the Seven Churches in Revelation).

THE DATE
The time seems to be considerably removed from the atmosphere of the Pauline and Petrine Epistles. Jerusalem has been destroyed. If John wrote the Fourth Gospel by A.D. 95, then the First Epistle would come anywhere from A.D. 85 to 95 . The tone of the author is that of an old man. His urgent message that the disciples, his "little children," love one another is like another story about the aged John, who, when too feeble to stand, would sit in his chair and preach "Little children, love one another." The Muratorian Fragment accepts the First Epistle and Origen makes full use of it, as does Clement of Alexandria. Irenaeus quotes it by name. Polycarp shows knowledge of it also.

## 1 John 1

## 1John 1:1

That which (o). Strictly speaking, the neuter relative here is not personal, but the message "concerning the Word of life" ( $\pi \varepsilon \rho \tau$ тov $\lambda$ oүov $\tau \eta \varsigma \zeta \omega \eta \varsigma)$, a phrase that reminds one at once of the Word ( $\Lambda$ оүос) in Joh 1:1,14; Re 19:14 (an incidental argument for identity of authorship for all these books). For discussion of the $\Lambda$ oүos see on Joh 1:1-18. Here the $\Lambda$ оүoc is described by $\tau \eta \varsigma \zeta \omega \eta \varsigma$ (of life), while in Joh 1:4 he is called $\eta \zeta \omega \eta$ (the Life) as here in verse 2 and as Jesus calls himself (Joh 11:25; 14:6), an advance on the phrase here, and in Re 19:14 he is termed o $\lambda$ oyos tov $\theta$ sou (the Word of God), though in Joh 1:1 the $\Lambda$ oүos is flatly named o $\theta \varepsilon o \varsigma$ (God). John does use o in a collective personal sense in Joh 6:37,39. See also $\pi \alpha v$ o in 1Jo 5:4.

From the beginning ( $\alpha \pi^{\prime} \alpha \rho \chi \eta \varsigma$ ). Anarthrous as in Joh 1:1; 6:64; 16:4. See same phrase in 2:7. The reference goes beyond the Christian dispensation, beyond the Incarnation, to the eternal purpose of God in Christ (Joh 3:16 ), "coeval in some sense with creation" (Westcott).

That which we have heard ( $о$ ак $п к о \alpha \mu \varepsilon v$ ). Note fourfold repetition of o (that which) without connectives (asyndeton). The perfect tense (active indicative of $\alpha \kappa \sigma \omega \omega$ ) stresses John's equipment to speak on this subject so slowly revealed. It is the literary plural unless John associates the elders of Ephesus with himself (Lightfoot) the men who certified the authenticity of the Gospel (Joh 21:24).

That which we have seen (o $\varepsilon \omega \rho \alpha \kappa \alpha \mu \varepsilon v$ ). Perfect active, again, of opa $\omega$, with the same emphasis on the possession of knowledge by John.

With our eyes ( $\tau \circ \varsigma \varsigma \varphi \theta \alpha \lambda \mu \circ \iota \varsigma \eta \mu \omega v$ ). Instrumental case and showing it was not imagination on John's part, not an optical illusion as the Docetists claimed, for Jesus had an actual human body. He could be heard and seen.

That which we beheld (o $\varepsilon \theta \varepsilon \alpha \sigma \alpha \mu \varepsilon \theta \alpha$ ). Repetition with the aorist middle indicative of $\theta \varepsilon \alpha o \mu \alpha$ (the very form in Joh 1:14 ), "a spectacle which broke on our astonished vision" (D. Smith).

Handled ( $\varepsilon \psi \eta \lambda \alpha \varphi \eta \sigma \alpha v)$. First aorist active indicative of $\psi \eta \lambda \alpha \varphi \alpha \omega$, old and graphic verb (from $\psi \alpha \omega$, to touch), the very verb used by Jesus to prove that he was not a mere spirit (Lu 24:39). Three senses are here appealed to (hearing, sight, touch) as combining to show the reality of Christ's humanity against the Docetic Gnostics and the qualification of John by experience to speak. But he is also "the Word of life" and so God Incarnate.

1John 1:2
Was manifested $(\varepsilon \varphi \alpha v \varepsilon \rho \omega \theta \eta)$. First aorist passive indicative of $\varphi a v \varepsilon \rho \circ \omega$, to make known what already exists, whether invisible (B. Weiss) or visible, "intellectual or sensible" (Brooke). In Col 3:4 Paul employs it of the second coming of Christ. Verse 2 here is an im-
portant parenthesis, a mark of John's style as in Joh 1:15. By the parenthesis John heaps reassurance upon his previous statement of the reality of the Incarnation by the use of $\varepsilon \omega \rho \alpha к \alpha \mu \varepsilon v$ (as in verse 1) with the assertion of the validity of his "witness" ( $\mu \alpha \rho \tau \cup \rho о v \mu \varepsilon v)$ and "message" ( $\alpha \pi \alpha \gamma \gamma \varepsilon \lambda \lambda о \mu \varepsilon v$ ), both present active indicatives (literary plurals), $\alpha \pi \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$ being the public proclamation of the great news (Joh 16:25).

The life, the eternal life ( $\tau \eta \nu \zeta \omega \eta \nu \tau \eta \nu$ aı $\omega v \iota \circ v$ ). Taking up $\zeta \omega \eta$ of verse 1, John defines the term by the adjective al $\omega v$ o $\rho$, used 71 times in the N.T., 44 times with $\zeta \omega \eta$ and 23 in John's Gospel and Epistles (only so used in these books by John). Here lt means the divine life which the Logos was and is (Joh 1:4; 1Jo 1:1).

Which ( $\eta \tau \iota \varsigma)$. Qualitative relative, "which very life."
Was with the Father ( $\eta v \pi \rho o \varsigma ~ \tau o v \pi \alpha \tau \varepsilon \rho \alpha)$. Not $\varepsilon \gamma \varepsilon v \varepsilon \tau o$, but $\eta \nu$, and $\pi \rho \circ \varsigma$ with the accusative of intimate fellowship, precisely as in Joh 1:1 $\eta \vee \pi \rho \circ \varsigma \operatorname{\tau ov} \theta \varepsilon o v$ (was with God). Then John closes the parenthesis by repeating $\varepsilon \varphi a v \varepsilon \rho \omega \theta \eta$.

1John 1:3
That which we have seen (о $\varepsilon \omega \rho \alpha \kappa \alpha \mu \varepsilon v$ ). Third use of this form (verses $1,2,3$ ), this time resumption after the parenthesis in verse 2.

And heard (ка акךкоацєv). Second (verse 1 for first) use of this form, a third in verse 5. Emphasis by repetition is a thoroughly Johannine trait.

Declare we ( $\alpha \pi \alpha \gamma \gamma \varepsilon \lambda \lambda о \mu \varepsilon v$ ). Second use of this word (verse 2 for first), but $\alpha \gamma \gamma \varepsilon \lambda_{ı} \alpha$ (message) and $\alpha v a \gamma \gamma \varepsilon \lambda \lambda o \mu \varepsilon \nu$ (announce) in verse 5.

That ye also may have (เva ка v $\downarrow \varepsilon ı \varsigma \varepsilon \chi \eta \tau \varepsilon$ ). Purpose clause with $i v \alpha$ and present active subjunctive of $\varepsilon \chi \omega$ (may keep on having). "Ye also" who have not seen Jesus in the flesh as well as those like John who have seen him. Like ка $v \mu \nu \nu$ (to you also) just before.

Fellowship with us ( $\kappa o v \omega \omega v \iota \alpha \nu \mu \varepsilon \theta^{\prime} \eta \mu \omega v$ ). Common word in this Epistle, from кoเv $\omega v$ oc, partner ( $\mathrm{Lu} 5: 10$ ), and кoı $\omega \omega v \varepsilon \omega$, to share, in ( $1 \mathrm{Pe} 4: 13$ ), with $\mu \varepsilon \tau \alpha$ emphasising mutual relationship (Ac 2:42). This Epistle often uses $\varepsilon \chi \omega$ with a substantive rather than a verb.

Yea, and our fellowship ( $\kappa \alpha \eta \kappa о \imath v \omega v i \alpha ~ \delta \varepsilon \eta \eta \mu \varepsilon \tau \varepsilon \rho \alpha)$. Careful explanation of his meaning in the word "fellowship" (partnership), involving fellowship with the Father and with his Son Jesus Christ and only possible in Christ.

1John 1:4
We write ( $\gamma \rho \alpha \varphi \rho \mu \varepsilon v \eta \mu \varepsilon \varsigma)$ ). Literary plural present active indicative of $\gamma \rho \alpha \varphi \omega$, which see in the singular in 2:12-14.

May be fulfilled ( $\eta \pi \varepsilon \pi \lambda \eta \rho \omega \mu \varepsilon v \eta$ ). Periphrastic perfect passive subjunctive of $\pi \lambda \eta \rho o \omega$, stressing the state of completion in the purpose (iva), remain full, precisely as in Joh 16:24 . See aorist subjunctive in Joh 15:11 and perfect indicative in Joh 17:13. The MSS. differ as often between $\eta \mu \omega \nu$ (our) and $v \mu \omega \nu$ (your).

1John 1:5

And (ка). Mutual fellowship depends on mutual knowledge (Westcott).
Message ( $\alpha \gamma \gamma \varepsilon \lambda_{ı} \alpha$ ). Old word (from $\alpha \gamma \gamma^{\prime} \lambda_{o} \varsigma$, messenger), in N.T. only here and 3:11, and note $\alpha \pi^{\prime} \alpha v \tau o v$ (from God like $\alpha \pi \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$ in verse 3) and $\alpha v \alpha \gamma \gamma \varepsilon \lambda \lambda o \mu \varepsilon \nu$, to announce, to disclose, here as in Joh 4:25 .

God is light (o $\theta \varepsilon \circ \varsigma \varphi \omega \varsigma \varepsilon \sigma \tau \iota \nu)$. Precisely so the $\Lambda о \gamma \circ \varsigma$ is light (Joh 1:4-9) and what Jesus claimed to be (Joh 8:12 ). John repeats it in negative form as he often does (Joh 1:3 ).

1John 1:6
If we say $(\varepsilon \alpha v \varepsilon \iota \pi \omega \mu \varepsilon v)$. Condition of third class with $\varepsilon \alpha v$ and second aorist (ingressive, up and say) active subjunctive. Claiming fellowship with God (see verse 3) involves walking in the light with God (verse 5) and not in the darkness (бкотоৎ here, but бкотıa in Joh 1:5 ). See $2: 11$ also for $\varepsilon \nu \tau \eta \sigma \kappa о \tau \iota \alpha \pi \varepsilon \rho \iota \pi \alpha \tau \varepsilon \omega$.

We lie $(\psi \varepsilon v \delta o \mu \varepsilon \theta \alpha)$. Present middle indicative, plain Greek and plain English like that about the devil in Joh 8:44 .

Do not the truth (ov $\pi o เ o v \mu \varepsilon \nu \tau \eta \nu \alpha \lambda \eta \theta \varepsilon \iota \alpha \nu)$. Negative statement of the positive $\psi \varepsilon v \delta o \mu \varepsilon \forall \alpha$ as in Joh 8:44. See Joh 3:21 for "doing the truth," like Ne 9:33 .

1John 1:7
If we walk ( $\varepsilon \alpha \nu \pi \varepsilon \rho \iota \pi \alpha \tau \omega \mu \varepsilon \nu$ ). Condition of third class also with $\varepsilon \alpha \nu$ and present active subjunctive (keep on walking in the light with God).

As he ( $\omega \varsigma$ avtoc). As God is light (verse 5) and dwells in light unapproachable (1Ti 6:16 ).

One with another ( $\mu \varepsilon \tau^{\prime} \alpha \lambda \lambda \eta \lambda \omega \nu$ ). As he has already said in verse 3 . But we cannot have fellowship with one another unless we have it with God in Christ, and to do that we must walk in the light with God.

And the blood of Jesus his Son cleanseth us from all sin ( $\kappa \alpha$ тo $\alpha \mu \alpha$ In $\sigma o v$ tov viov
 coordinate with the preceding one. Walking in the light with God makes possible fellowship with one another and is made possible also by the blood of Jesus (real blood and no mere phantom, atoning blood of the sinless Son of God for our sins). John is not ashamed to use this word. It is not the mere "example" of Jesus that "cleanses" us from sin. It does cleanse the conscience and life and nothing else does (Heb 9:13f.; Tit 2:14 ). See in verse 9 both forgiveness and cleansing. Cf. 1Jo 3:3 .

1John 1:8
If we say ( $\varepsilon \alpha v \varepsilon \iota \tau \omega \mu \varepsilon v$ ). See verse 6.
We have no sin ( $\alpha \mu \alpha \rho \tau \iota \alpha v$ ovk $\varepsilon \chi \circ \mu \varepsilon v$ ). For this phrase see Joh 9:41; 15:22,24. That is, we have no personal guilt, no principle of sin. This some of the Gnostics held, since matter was evil and the soul was not contaminated by the sinful flesh, a thin delusion with which so-called Christian scientists delude themselves today.

We deceive ourselves ( $\varepsilon \alpha v \tau o v \varsigma ~ \pi \lambda \alpha \nu \omega \mu \varepsilon \nu$ ). Present active indicative of $\pi \lambda \alpha \nu \alpha \omega$, to lead astray. We do not deceive others who know us. Negative statement again of the same idea, "the truth is not in us."

1John 1:9
If we confess $(\varepsilon \alpha \nu \quad o \mu o \lambda o \gamma \omega \mu \varepsilon \nu)$. Third-class condition again with $\varepsilon \alpha v$ and present active subjunctive of $о \mu о \lambda о \gamma \varepsilon \omega$, "if we keep on confessing." Confession of sin to God and to one another (Jas 5:16) is urged throughout the N.T. from John the Baptist (Mr 1:5) on.

Faithful ( $\pi$ Iбтоৎ). Jesus made confession of sin necessary to forgiveness. It is God's promise and he is "righteous" ( $\delta \iota \kappa \alpha \iota \varsigma)$.

To forgive (ıv $\alpha \varphi \eta$ ). Sub-final clause with $t v \alpha$ and second aorist active subjunctive of $\alpha \varphi ı \eta \mu$.

And to cleanse ( $\kappa \alpha \alpha \gamma \iota \alpha \sigma \eta$ ). So again with $\iota v \alpha$ and the first aorist active subjunctive of $\kappa \alpha \theta \alpha \rho \iota \zeta \omega$ (verse 7).

1John 1:10
If we say ( $\varepsilon \alpha \nu \varepsilon \iota \pi \omega \mu \varepsilon \nu)$. As in verses 6,8.
We have not sinned ( $o v \chi \alpha \mu \alpha \rho \tau \eta \kappa \alpha \mu \varepsilon v$ ). Perfect active indicative of $\alpha \mu \alpha \rho \tau \alpha v \omega$. This is a denial of any specific acts of sin, while in verse 8 we have the denial of the principle of sin. David Smith observes that the claim to personal perfectionism has two causes, one the stifling of conscience in making God a liar ( $\psi \varepsilon v \sigma \tau \eta \nu$, the word used of the devil by Jesus in Joh 8:44 ), and the other ignorance of God's word, which is not in us, else we should not make such a claim.

## 1 John 2

1John 2:1
My little children ( $\tau \varepsilon \kappa \nu \downarrow \alpha \mu \circ$ ). Tender tone with this diminutive of $\tau \varepsilon \kappa v o v$ (child), again in 2:12; 3:18, but $\pi \alpha \iota \delta \iota \alpha$ in 2:14. John is now an old man and regards his readers as his little children. That attitude is illustrated in the story of his visit to the robber to win him to Christ.

That ye may not $\sin (i v \alpha \mu \eta \alpha \mu \alpha \rho \tau \eta \tau \varepsilon)$. Purpose (negative) clause with $\stackrel{v \alpha}{\mu \eta}$ and the second aorist (ingressive, commit sin) active subjunctive of $\alpha \mu \alpha \rho \tau \alpha v \omega$, to sin. John has no patience with professional perfectionists ( 1:8-10), but he has still less with loose-livers like some of the Gnostics who went to all sorts of excesses without shame.

If any man $\sin$ ( $\varepsilon \alpha \nu \tau \iota \varsigma \alpha \mu \alpha \rho \tau \eta)$. Third-class condition with $\varepsilon \alpha v$ and second aorist (ingressive) active subjunctive again, "if one commit sin."

We have ( $\varepsilon \chi \circ \mu \varepsilon v)$. Present active indicative of $\varepsilon \chi \omega$ in the apodosis, a present reality like $\varepsilon \chi \circ \mu \varepsilon v$ in 2Co 5:1.

An advocate ( $\pi \alpha \rho \alpha \kappa \lambda \eta \tau 0 v$ ). See on Joh 14:16,26; 15:26; 16:7 for this word, nowhere else in the N.T. The Holy Spirit is God's Advocate on earth with men, while Christ is man's Advocate with the Father (the idea, but not the word, in Ro 8:31-39; Heb 7:25). As סıкаıо (righteous) Jesus is qualified to plead our case and to enter the Father's presence (Heb 2:18 ).

1John 2:2
And he (ка avtoc). He himself in his own person, both priest and sacrifice (Heb 9:14 ).

The propitiation ( $\lambda \lambda \alpha \sigma \mu \circ \varsigma)$. Late substantive from ı $\lambda \alpha \sigma \kappa \circ \mu \alpha$ (Lu 18:13; Heb 2:17), in LXX, Philo, Plutarch, in N.T. only here and 4:10. Christ himself is the means of propitiation for ( $\pi \varepsilon \rho$ concerning) our sins. See $\lambda \lambda a \sigma \tau \eta \rho i o v$ in Ro 3:15 .

For the whole world ( $\pi \varepsilon \rho$ o $\overline{0}$ ov tov $\kappa 0 \sigma \mu \circ v$ ). It is possible to supply the ellipsis here of $\tau \omega v$ a $\mu \alpha \rho \tau \iota \omega v$ (the sins of) as we have it in Heb 7:27, but a simpler way is just to regard "the whole world" as a mass of $\sin (5: 19)$. At any rate, the propitiation by Christ provides for salvation for all (Heb 2:9) if they will only be reconciled with God (2Co 5:19-21).

1John 2:3
Hereby ( $\varepsilon v \tau \operatorname{\tau ov} \tau \omega)$. See this phrase also in $2: 5 ; 3: 16,19,24 ; 4: 2,13 ; 5: 2$. That is explained by the $\varepsilon \alpha \nu$ clause, "if we keep his commandments " ( $\varepsilon \alpha \nu \tau \eta \rho \omega \mu \varepsilon \nu$, condition of the third class, $\varepsilon \alpha v$ with present active subjunctive, "if we keep on keeping"), the clause itself in apposition with $\tau 0 \cup \tau \omega$ (locative case).

Know we that we know him ( $\gamma$ เvoбко $\varepsilon \varepsilon v$ от $\varepsilon \gamma v \omega \kappa \alpha \mu \varepsilon v$ autov). "Know we that we have come to know and still know him," $\varepsilon \gamma \nu \omega \kappa \alpha \mu \varepsilon v$ the perfect active indicative of $\gamma \iota \nu \omega \sigma \kappa \omega$. The Gnostics boasted of their superior knowledge of Christ, and John here challenges their
boast by an appeal to experimental knowledge of Christ which is shown by keeping his (autov, Christ's) commandments, thoroughly Johannine phrase (12 times in the Gospel, 6 in this Epistle, 6 in the Apocalypse).

1John 2:4
I know him (E $\gamma v \omega \kappa \alpha$ avtov). Perfect active indicative with recitative ot like quotation marks just before it. This is one of the pious platitudes, cheap claptrap of the Gnostics, who would bob up in meetings with such explosions. John punctures such bubbles with the sharp addition "and keepeth not" (o $\mu \eta \tau \eta \rho \omega v$, present active linear participle). "The one who keeps on saying: 'I have come to know him,' and keeps on not keeping his commandments is a liar" ( $\psi \varepsilon v \sigma \tau \eta \varsigma$, just like Satan, Joh 8:44 and like 1Jo 1:8,10 ), followed by the negative statement as in 1:8,10. There is a whip-cracker effect in John's words.

1John 2:5
But whoso keepeth (os $\delta^{\prime} \alpha \nu \tau \eta \rho \eta$ ). Indefinite relative clause with modal $\alpha v$ and the present active subjunctive, "whoever keeps on keeping."

Verily ( $a \lambda \eta \theta \omega \varsigma$ ). Truly, of a truth. This prize is open to all, not confined to a few initiated Gnostic intellectuals or pneumatics.

Hath the love of God been perfected ( $\eta \alpha \gamma \alpha \pi \eta$ tov $\theta \varepsilon o v \tau \varepsilon \tau \varepsilon \lambda \varepsilon i \omega \tau \alpha$ ). Perfect passive indicative of $\tau \varepsilon \lambda \varepsilon \iota \omega$, stands completed. Probably objective genitive, our love for God, which is realized in absolute obedience (Brooke).

Hereby $(\varepsilon v \tau o v \tau \omega)$. That is by continuous keeping of Christ's commandments, not by loud talk and loose living.

1John 2:6
Himself also to walk ( $\kappa \alpha \alpha v \tau о \varsigma ~ \pi \varepsilon \rho ı \pi \alpha \tau \varepsilon ı v) . ~ P r e s e n t ~ a c t i v e ~ i n f i n i t i v e ~ a f t e r ~ о \varphi \varepsilon ı \lambda \varepsilon ~$ (ought), "Himself also to keep on walking," a continuous performance, not a spasmodic spurt.

Even as he walked ( $\kappa \alpha \theta \omega \varsigma \varepsilon \kappa \varepsilon เ v o \varsigma ~ \pi \varepsilon \rho เ \varepsilon \pi \alpha \tau \eta \sigma \varepsilon v)$. Constative aorist active indicative summing up the life of Christ on earth with the emphatic use of the demonstrative عкєıvos, in reference to Christ as in 3:3,5,7,16; 4:17; Joh 7:11; 9:12,28; 19:21.

1John 2:7
Beloved ( $\alpha \gamma \alpha \pi \eta \tau 0$ ). First instance of this favourite form of address in these Epistles (3:2,21; 4:1,7; 3Jo 1,2,5,11 ).

No new commandment (ovk $\varepsilon \nu \tau 0 \lambda \eta \nu \kappa \alpha \iota \nu \eta \nu$ ). Not novel or new in kind ( $\kappa \alpha \iota v \eta \nu$ as distinct from $v \varepsilon o \varsigma$, new in time, for which distinction see Lu 5:33-38 ).

But an old commandment ( $\alpha \lambda \lambda^{\prime} \varepsilon v \tau \tau \lambda \eta \nu \pi \alpha \lambda \alpha \iota \alpha v$ ). Ancient as opposed both to кaıvos and veoc. The Mosaic law taught love for one's neighbours and Christ taught love even of enemies.

Which ye had ( $\eta \vee \varepsilon \chi \chi \varepsilon \tau \varepsilon$ ). Imperfect active, reaching back to the beginning of their Christian lives ( $\alpha \pi^{\prime} \alpha \rho \chi \eta \varsigma$ ). They had heard it expressly from Jesus (Joh 13:34), who, however, calls it "a new commandment."

1John 2:8
Again a new commandment ( $\pi \alpha \lambda \iota \nu \varepsilon \nu \tau 0 \lambda \eta \nu \kappa \alpha ı \eta \eta \nu$ ). Paradox, but truth. Old in teaching (as old as the story of Cain and Abel, 3:11f.), but new in practice. For this use of $\pi \alpha \lambda \iota v$ for a new turn see Joh 16:28. To walk as Christ walked is to put in practice the old commandment and so make it new (ever new and fresh), as love is as old as man and fresh in every new experience.

True in him and in you ( $\alpha \lambda \eta \theta \varepsilon \varsigma \varepsilon \nu \alpha \cup \tau \omega \kappa \alpha \varepsilon \nu \nu \mu i v$ ). This newness is shown supremely in Christ and in disciples when they walk as Jesus did (verse 6).

Because (oт). Explanation of the paradox.
Is passing away ( $\pi \alpha \rho \alpha \gamma \varepsilon \tau \alpha$ ). Present middle indicative of $\pi \alpha \rho \alpha \gamma \omega$, old verb, to lead by, to go by (intransitive), as in Mt 20:30. Night does pass by even if slowly. See this verb in verse 17 of the world passing by like a procession.

True ( $\alpha \lambda \eta \theta$ ivov). Genuine, reliable, no false flicker.
Already shineth ( $\eta \delta \eta \varphi \alpha \imath v \varepsilon)$. Linear present active, "is already shining" and the darkness is already passing by. Dawn is here. Is John thinking of the second coming of Christ or of the victory of truth over error, of light over darkness (cf. Joh 1:5-9 ), the slow but sure victory of Christ over Satan as shown in the Apocalypse? See 1:5.

1John 2:9
And hateth his brother ( $\kappa \alpha \tau o v \alpha \delta \varepsilon \lambda \varphi o v$ autov $\mu \sigma \omega v$ ). Sharp contrast between the love just described and hate. The only way to walk in the light ( $1: 7$ ) is to have fellowship with God who is light ( $1: 3,5$ ). So the claim to be in the light is nullified by hating a brother.

Even until now ( $\varepsilon \omega \varsigma \alpha \rho \tau$ ). Up till this moment. In spite of the increasing light and his own boast he is in the dark.

1John 2:10
Abideth ( $\mu \varepsilon v \varepsilon$ ). Present active indicative, continues in the light and so does not interrupt the light by hating his brother.

Occasion of stumbling ( $\sigma \kappa \alpha v \delta \alpha \lambda o v$ ). See on Mt 13:41; 16:23 for this interesting word. It is a stumbling block or trap either in the way of others (its usual sense), as in Mt 18:7, or in one's own way, as is true of $\pi \rho о \sigma \kappa о \pi \tau \omega$ in Joh 11:9 and in verse 11 here. But, as Westcott argues, John may very well have the usual meaning here and the other in verse 11.

1John 2:11
Blinded ( $\varepsilon \tau \cup \varphi \lambda \omega \sigma \varepsilon v$ ). First aorist active indicative of $\tau \cup \varphi \lambda o \omega$, the very verb and form used in 2Co 4:4 of the god of this age to keep men from beholding the illumination of the gospel of the glory of Christ who is the image of God. The first part of the verse repeats verse

9, but adds this vivid touch of the blinding power of darkness. In the Mammoth Cave of Kentucky the fish in Echo River have eye-sockets, but no eyes.

1John 2:12
I write ( $\gamma \rho \alpha \varphi \omega$ ). Present active indicative, repeated three times, referring to this Epistle. For "the name" see 3:23; 3Jo 1:7. They were loyal to the name of Christ (Mt 10:22).

Are forgiven ( $\alpha \varphi \varepsilon \omega \nu \tau \alpha$ ). Doric perfect passive indicative of $\alpha \varphi \imath \eta \mu$ (seen also in Lu 5:20,23 ) for the usual $\alpha \varphi \varepsilon เ \nu \tau \alpha$. Tєкvia (little children) probably includes all, as in verse 1.

1John 2:13
Fathers ( $\pi \alpha \tau \varepsilon \rho \varepsilon \varsigma)$. Those mature believers with long and rich experience ( $\varepsilon \gamma v \omega \kappa \alpha \tau \varepsilon$, ye have come to know and still know).

Him which is from the beginning ( $\tau 0 v a \pi^{\prime} \alpha \rho \chi \eta \varsigma$ ). See $1: 1$ as explaining this crisp description of the Word of life (cf. Joh 1:1-18).

Young men (veavioko). The younger element in contrast to the fathers, full of vigor and conflict and victory.

Ye have overcome the evil one ( $v \varepsilon v i \kappa \eta \kappa \alpha \tau \varepsilon$ tov $\pi$ о $\eta \eta \rho o v$ ). Perfect active indicative of $v$ vкa $\omega$, a permanent victory after conflict. The masculine article tov shows that the prince of darkness is the one defeated in this struggle, the devil plain in 3:8,10 (Joh 8:44; 13:2 ).

1John 2:14
I have written $(\varepsilon \gamma \rho \alpha \psi \alpha)$. Repeated three times. Epistolary aorist referring to this Epistle, not to a previous Epistle. Law (Tests of Life, p. 309) suggests that John was interrupted at the close of verse 13 and resumes here in verse 14 with a reference to what he had previously written in verse 13. But that is needless ingenuity. It is quite in John's style to repeat himself with slight variations.

The Father ( $\tau 0 v \pi \alpha \tau \varepsilon \rho \alpha$ ). The heavenly Father as all of God's children should come to know him. He repeats from verse 13 what he said to "fathers." To the young men he adds $\iota \sigma \chi \rho \circ$ (strong) and the word of God abiding in them. That is what makes them powerful (ı $\sigma \chi \cup \rho \circ$ ) and able to gain the victory over the evil one.

1John 2:15
Love not the world ( $\mu \eta$ аү $\alpha \pi \alpha \tau \varepsilon$ tov коб $\mu \circ v$ ). Prohibition with $\mu \eta$ and the present active imperative of $\alpha \gamma \alpha \pi \alpha \omega$, either stop doing it or do not have the habit of doing it. This use of кобнос is common in John's Gospel (1:10; 17:14ff. ) and appears also in 1Jo 5:19. In epitome the Roman Empire represented it. See it also in Jas 4:4. It confronts every believer today.

If any man love ( $\varepsilon \alpha v \tau \iota \varsigma \gamma \alpha \pi \alpha$ ). Third-class condition with $\varepsilon \alpha v$ and present active subjunctive of $\alpha \gamma \alpha \pi \alpha \omega$ (same form as indicative), "if any keep on loving the world."

The love of the Father ( $\eta \alpha \gamma \alpha \pi \eta$ tov $\pi \alpha \tau \rho \circ \varsigma)$. Objective genitive, this phrase only here in N.T., with which compare "love of God" in 2:5. In antithesis to love of the world.

1John 2:16

All that ( $\pi \alpha \vee \tau 0$ ). Collective use of the neuter singular as in 5:4, like $\pi \alpha v$ o in Joh 6:37,39 .Three examples, not necessarily covering all sins, are given in the nominative in apposition with $\pi \alpha \nu \tau$ тo. "The lust of the flesh" ( $\eta \varepsilon \pi \iota \theta \nu \mu \alpha \tau \eta \varsigma \sigma \alpha \rho \kappa о \varsigma$, subjective genitive, lust felt by the flesh) may be illustrated by Mr 4:19; Ga 5:17. So the genitive with $\eta \varepsilon \pi \iota \theta \nu \mu \iota \alpha \omega \nu$ $\sigma \varphi \theta \alpha \lambda \mu \omega \nu$ (the lust of the eyes) is subjective, lust with the eyes as organs as shown by Jesus in Mt 5:28. The use of the "movies" today for gain by lustful exhibitions is a case in point. For $\alpha \lambda \alpha \zeta$ oveı $\alpha$ see on Jas $4: 16$, the only other N.T. example. $A \lambda \alpha \zeta \omega v$ (a boaster) occurs in Ro 1:30; 2Ti 3:2 . Boc (life) as in 3:17 is the external aspect (Lu 8:14), not the inward principle $(\zeta \omega \eta)$. David Smith thinks that, as in the case of Eve (Ge 3:1-6) and the temptations of Jesus (Mt 4:1-11), these three sins include all possible sins. But they are all "of the world" ( $\varepsilon \kappa$ tov коб $\mu \circ v$ ) in origin, in no sense "of the Father" ( $\varepsilon \kappa$ тоv $\pi \alpha \tau \rho о \varsigma)$. The problem for the believer is always how to be in the world and yet not of it (Joh 17:11,14ff. ).

1John 2:17
Passeth away ( $\pi \alpha \rho \alpha \gamma \varepsilon \tau \alpha$ ). "Is passing by" (linear action, present middle indicative), as in verse 8 . There is consolation in this view of the transitoriness of the conflict with the world. Even the lust which belongs to the world passes also. The one who keeps on doing ( $\pi \circ \iota \omega v$ present active participle of $\pi о \iota \varepsilon \omega$ ) the will of God "abides for ever" ( $\mu \varepsilon \varepsilon \varepsilon \varepsilon \varepsilon \varsigma \varsigma \tau$ $\alpha \iota \omega v \alpha)$ "amid the flux of transitory things" (D. Smith).

1John 2:18
It is the last hour ( $\varepsilon \sigma \chi \alpha \tau \eta \omega \rho \alpha \varepsilon \sigma \tau \iota v)$. This phrase only here in N.T., though John often uses $\omega \rho \alpha$ for a crisis (Joh 2:4; 4:21,23; 5:25,28 , etc.). It is anarthrous here and marks the character of the "hour." John has seven times "the last day" in the Gospel. Certainly in verse 28 John makes it plain that the $\pi \alpha \rho o v \sigma \iota \alpha$ might come in the life of those then living, but it is not clear that here he definitely asserts it as a fact. It was his hope beyond a doubt. We are left in doubt about this "last hour" whether it covers a period, a series, or the final climax of all just at hand.

As ye heard ( $\kappa \alpha \theta \varsigma \varsigma \kappa о и \sigma \alpha \tau \varepsilon)$. First aorist active indicative of $\alpha \kappa о \nu \omega$.
Antichrist cometh ( $\alpha$ тıхрıбтоৎ $\varepsilon \rho \chi \varepsilon \tau \alpha$ ). "Is coming." Present futuristic or prophetic middle indicative retained in indirect assertion. So Jesus taught (Mr 13:6,22; Mt 24:5,15,24 ) and so Paul taught (Ac 20:30; 2Th 2:3). These false Christs (Mt 24:24; Mr 13:22 ) are necessarily antichrists, for there can be only one. Avt can mean substitution or opposition, but both ideas are identical in the word avtıxpıбтoৎ (in N.T. only here, 2:22; 4:3; 2Jo 1:7 ). Westcott rightly observes that John's use of the word is determined by the Christian conception, not by the Jewish apocalypses.

Have there arisen ( $\gamma \varepsilon \gamma \circ v \alpha \sigma \iota v$ ). Second perfect active indicative of $\gamma \iota v o \mu \alpha$.
Many antichrists ( $\alpha v \tau \iota \chi \rho \iota \sigma \tau o \pi o \lambda \lambda o$ ). Not just one, but the exponents of the Gnostic teaching are really antichrists, just as some modern deceivers deserve this title.

Whereby ( $\mathrm{o} \theta \varepsilon v$ ). By the fact that these many antichrists have come.

1John 2:19
From us $(\varepsilon \xi \eta \mu \omega v)$
--of us $(\varepsilon \xi \eta \mu \omega v)$. The same idiom, $\varepsilon \xi$ and the ablative case $(\eta \mu \omega v)$, but in different senses to correspond with $\varepsilon \xi \eta \lambda \theta \alpha \nu$ (they went out from our membership) and ovк $\eta \sigma \alpha \nu$ (they were not of us in spirit and life). For $\varepsilon \xi$ in the sense of origin see Joh 17:15, for $\varepsilon \xi$ in the sense of likeness, Joh 17:14.

For if they had been of us $(\varepsilon \gamma \alpha \rho \varepsilon \xi \eta \mu \omega \nu \eta \sigma \alpha v)$. Condition of second class with $\varepsilon$ and imperfect tense (no aorist for $\varepsilon \not \mu$ ).

They would have continued ( $\mu \varepsilon \mu \varepsilon \nu \eta \kappa \varepsilon \iota \sigma \alpha \nu \alpha \nu$ ). Past perfect of $\mu \varepsilon \nu \omega$, to remain, without augment, with $\alpha v$ in apodosis of second-class condition.

With us $\left(\mu \varepsilon \theta^{\prime} \eta \mu \omega v\right)$. In fellowship, for which see $\mu \varepsilon \tau \alpha$ in $1: 3$. They had lost the inner fellowship and then apparently voluntarily broke the outward.

But they went ( $\alpha \lambda \lambda^{\prime}$ ). Ellipsis of the verb $\varepsilon \xi \eta \lambda \theta a \nu$ above, a common habit (ellipse) in John s Gospel (1:8; 9:3; 13:18; 15:25 ).

That they might be made manifest (ıva $\varphi \alpha \vee \varepsilon \rho \omega \theta \omega \sigma \iota)$ ). Purpose clause with $\tau v a$ and the first aorist passive subjunctive of $\varphi a v \varepsilon \rho o \omega$, for which verb see Joh 21:1; Col 3:4. See 2Co 3:3 for the personal construction with o $\tau$ as here.

They all are not (ovk $\varepsilon ו \sigma \iota v \pi \alpha \nu \tau \varepsilon \varsigma)$. Not just some, but all, as in 2:21; 3:5. These antichrists are thus revealed in their true light.

1John 2:20
Anointing $(\chi \rho \iota \sigma \mu \alpha)$. Old word for result $(\mu \alpha \tau)$ and for the material, from $\chi \rho เ \omega$, to anoint, perhaps suggested by the use of $\alpha v \tau \iota \chi \rho \iota \sigma \tau o$ in verse 18. Christians are "anointed ones," $\chi \rho \iota \sigma \tau$ in this sense, with which compare Ps 105:15 : "Touch not my anointed ones" ( $\mu \eta \alpha \psi \eta \sigma \theta \varepsilon \tau \omega v \chi \rho \iota \sigma \tau \omega \nu \mu \sigma v$ ). These antichrists posed as the equals of or even superior to Christ himself. But followers of Christ do have "the oil of anointing" ( $\tau$ ع $\varepsilon \alpha \iota \circ v \tau o v \chi \rho \iota \sigma \mu \alpha \tau \circ \varsigma$, Ex 29:7 ), the Holy Spirit. This word in the N.T. only here and verse 27. Later the term was applied to baptism after baptismal remission came to be taught (Tertullian, etc.).

From the Holy One (ato $\tau 0 v a \gamma$ ov). They receive this anointing of the Holy Spirit from the Anointed One, Jesus Christ (the Holy One). Cf. Joh 6:69; Ac 3:14.

And ye know all things ( $\kappa \alpha$ oı $\delta \alpha \tau \varepsilon \pi \alpha v \tau \alpha$ ). But the best MSS. read $\pi \alpha v \tau \varepsilon \varsigma$ rather than $\pi \alpha v \tau \alpha$, "Ye all know it." This anointing is open to all Christians, not just a select few.

1John 2:21
I have not written (ovk $\varepsilon \gamma \rho \alpha \psi \alpha$ ). Not epistolary aorist ( $2: 14$ ), but a reference to what he has just said.

And because no lie is of the truth ( $\kappa \alpha$ o $\tau \alpha \nu \psi \varepsilon \cup \delta \circ \varsigma \varepsilon \kappa \tau \eta \varsigma \alpha \lambda \eta \theta \varepsilon \iota \alpha \varsigma$ оик $\varepsilon \sigma \tau \iota \nu$ ). Not certain whether ot here is causal (because) or declarative (that). Either makes sense. Note the idiomatic use of $\varepsilon \kappa$ and $\pi \alpha \nu-$-ov $=0 v \delta \varepsilon \nu$ (no) as in verse 19.

1John 2:22

The liar (o $\psi \varepsilon \cup \sigma \tau \eta \varsigma)$. The liar (with the article) par excellence. Rhetorical question to sharpen the point made already about lying in 1:6,10; 2:4,21. See 5:5 for a like rhetorical question.

But $(\varepsilon \mu \eta)$. Except, if not.
 Common Greek idiom for ovk to appear after $\alpha \rho v \varepsilon o \mu \alpha$ like redundant $\mu \eta$ in Lu 20:27; Heb 12:19. The old Latin retains non here as old English did (Shakespeare, Comedy of Errors IV. ii. 7, "He denied you had in him no right"). The Cerinthian Gnostics denied the identity of the man Jesus and Christ (an acov, they held) like the modern Jesus or Christ controversy.

This is the antichrist (ov himself in particular.

Even he that denieth the Father and the Son (о $\alpha \rho v o \cup \mu \varepsilon v o \varsigma ~ \tau о v ~ \pi \alpha \tau \varepsilon \rho \alpha ~ к а ~ \tau о v ~ v o v) . ~$. This is the inevitable logic of such a rejection of the Son of God. Jesus had himself said this very same thing (Joh 5:23f. ).

1John 2:23
Hath not the Father (ouסع tov $\pi \alpha \tau \varepsilon \rho \alpha \varepsilon \chi \varepsilon$ ). "Not even does he have the Father" or God (2Jo 1:9).

He that confesseth the Son ( $о$ o $\mu о \lambda о \gamma \omega v$ tov vov). Because the Son reveals the Father (Joh 1:18; 14:9). Our only approach to the Father is by the Son (Joh 14:6 ). Confession of Christ before men is a prerequisite for confession by Christ before the Father (Mt 10:32; Lu 12:8).

1John 2:24
As for you (v $\mu \varepsilon \iota \varsigma)$. Emphatic proleptic position before the relative o and subject of $\eta \kappa o u \sigma \alpha \tau \varepsilon$, a familiar idiom in Joh 8:45; 10:29, etc. Here for emphatic contrast with the antichrists. See 1:1 for $\alpha \pi^{\prime} \alpha \rho \chi \eta \varsigma$ (from the beginning).

Let abide in you ( $\varepsilon \nu \nu \mu \nu \nu \mu \varepsilon v \varepsilon \tau \omega$ ). Present active imperative of $\mu \varepsilon \nu \omega$, to remain. Do not be carried away by the new-fangled Gnostic teaching.

1John 2:25
And this is the promise ( $\kappa \alpha \alpha \cup \tau \eta \varepsilon \sigma \tau \iota v ~ \eta \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda ı \alpha$ ). See 1:5 for the same idiom with $\alpha \gamma \gamma \varepsilon \lambda_{1} \alpha$ (message). This is the only instance of $\varepsilon \pi \alpha \gamma \gamma \gamma^{\prime} \lambda_{1} \alpha$ in the Johannine writings. Here "the promise" is explained to be "the life eternal" ( 1:2). In Ac 1:4 the word is used for the coming of the Holy Spirit.

He promised (av $\tau о \varsigma \varepsilon \pi \eta \gamma \gamma \varepsilon \lambda \lambda \alpha \tau)$ ). First aorist middle indicative of $\varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$. Av $\tau \circ \varsigma$ (he) is Christ as is seen in 3:3 by eкعıvoc.

1John 2:26
Concerning them that would lead you astray ( $\pi \varepsilon \rho \tau \omega v \pi \lambda \alpha \nu \omega v \tau \omega v \nu \mu \alpha \varsigma)$. "Concerning those that are trying to lead you astray" (conative use of the present active articular participle
of $\pi \lambda \alpha v \alpha \omega$. See 1:8 for this verb. John is doing his part to rescue the sheep from the wolves, as Paul did (Ac 20:29).

1John 2:27
And as for you ( $\kappa \alpha \cup \mu \varepsilon \iota \varsigma$ ). Prolepsis again as in verse 24.
Which ye received of him (o $\varepsilon \lambda \alpha \beta \varepsilon \tau \varepsilon \alpha \pi^{\prime} \alpha \cup \tau \sigma v$ ). Second aorist active indicative of $\lambda \alpha \mu \beta \alpha \nu \omega$, a definite experience, this anointing ( $\chi \rho \iota \sigma \mu \alpha$ ), from Christ himself as in verse 20. This Paraclete was promised by Christ (Joh 14:26; 16:13ff.) and came on the great Pentecost, as they knew, and in the experience of all who yielded themselves to the Holy Spirit.

That any one teach you (ıva $\tau ı \varsigma \delta \iota \delta \alpha \sigma \kappa \eta \nu \mu \alpha \varsigma)$. Sub-final use of $\tau v \alpha$ and the present active subjunctive of $\delta \iota \delta a \sigma \kappa \omega$, "that any one keep on teaching you."

Teacheth you ( $\delta t \delta \alpha \sigma \kappa \varepsilon v \mu \alpha \varsigma)$. Present active indicative. The Holy Spirit was to bring all things to their remembrance (Joh 14:26) and to bear witness concerning Christ (Joh $15: 26 ; 16: 12-15$ ). Yet they need to be reminded of what they already know to be "true" ( $\alpha \lambda \eta \theta \varepsilon \varsigma$ ) and "no lie" (ouk $\varepsilon \sigma \tau \iota \nu \psi \varepsilon \cup \delta o \varsigma)$, according to John's habit of positive and negative ( 1:5). So he exhorts them to "abide in him" ( $\mu \varepsilon v \varepsilon \tau \varepsilon \varepsilon v ~ \alpha u \tau \omega$, imperative active, though same form as the indicative). Precisely so Jesus had urged that the disciples abide in him (Joh 15:4f. ).

1John 2:28
And now ( $\kappa \alpha v v v$ ). John tenderly repeats the exhortation, "keep on abiding in him."
If he shall be manifested ( $\varepsilon \alpha v \varphi a v \varepsilon \rho \omega \theta \eta$ ). Condition of third class with $\varepsilon \alpha v$ and first aorist passive subjunctive as in verse 19; Col 3:3. A clear reference to the second coming of Christ which may be at any time.

That we have boldness ( $เ v \alpha \sigma \chi \omega \mu \varepsilon v \pi \alpha \rho \rho \eta \sigma \iota \downarrow)$ ). Purpose clause with $v^{2} \alpha$ and the ingressive second aorist active subjunctive of $\varepsilon \chi \omega$, "that we may get boldness."

And not be ashamed ( $\kappa \alpha \mu \eta \alpha \| \sigma \chi v v \theta \omega \mu \varepsilon v$ ). Likewise negative purpose (after John's fashion) with $\mu \eta$ and the first aorist passive subjunctive of aı $\chi \cup v \omega$, to put to shame.

Before him ( $\alpha \pi^{\prime}$ avtov). "From him," as if shrinking away from Christ in guilty surprise. See 2Th 1:9 for this use of a $\boldsymbol{\pi}$ (from the face of the Lord).

1John 2:29
If ye know ( $\varepsilon \alpha v \varepsilon \iota \delta \eta \tau \varepsilon$ ). Third-class condition again with $\varepsilon \alpha v$ and second perfect active subjunctive of ot $\delta \alpha$. If ye know by intuitive or absolute knowledge that Christ (because of verse 28) is righteous, then "ye know" or "know ye" ( $\gamma$ $\boldsymbol{\nu} \omega \sigma \kappa \varepsilon \tau \varepsilon$ either indicative or imperative) by experimental knowledge (so $\gamma \iota \nu \omega \sigma \kappa \omega$ means in contrast with ot $\delta \alpha$ ).

Is begotten ( $\gamma \varepsilon \gamma \varepsilon \nu v \eta \tau \alpha$ ). Perfect passive indicative of $\gamma \varepsilon v v \alpha \omega$, stands begotten, the second birth (regeneration) of Joh 3:3-8 .

Of him ( $\varepsilon \xi$ avtov). Plainly "of God" in verse 9 and so apparently here in spite of $\delta$ เкаıos referring to Christ. Doing righteousness is proof of the new birth.

## 1 John 3

1John 3:1
What manner of love ( $\pi о \tau \alpha \pi \eta \nu \alpha \gamma \alpha \pi \eta v$ ). Qualitative interrogative as in 2Pe 3:11; Mt 8:27. Only here in John's writings. Originally of what country or race.

Hath bestowed ( $\delta \varepsilon \delta \omega \kappa \varepsilon v$ ). Perfect active indicative of $\delta \iota \delta \omega \mu$, state of completion, "the endowment of the receiver" (Vincent).

That we should be called (iva $\kappa \lambda \eta \theta \omega \mu \varepsilon v$ ). Sub-final use of $\imath v \alpha$ with the first aorist passive subjunctive of $\kappa \alpha \lambda \varepsilon \omega$, to call or name, as in Mt 2:23.

Children ( $\tau \varepsilon \kappa \vee \alpha)$. As in Joh 1:12 and with an allusion to $\gamma \varepsilon \gamma \varepsilon \vee v \eta \tau \alpha$ in 2:29 in an effort "to restore the waning enthusiasm of his readers, and to recall them to their first love" (Brooke).

And such we are ( $\kappa \alpha \varepsilon \sigma \mu \varepsilon v$ ). "And we are." A parenthetical reflection characteristic of John ( $\kappa \alpha$ vov $\varepsilon \sigma \tau \iota v$ in Joh 5:25 and ка ovк عוбוv in Re 2:2; 3:9 ) omitted by Textus Receptus, though, in the old MSS.

Because it knew him not (oт ovk $\varepsilon \gamma \nu \omega$ avtov). Second aorist active indicative of $\gamma \iota \omega \omega \sigma \kappa \omega$, precisely the argument in Joh 15:18f.

1John 3:2
Now (vvv). Without waiting for the tapovaia or second coming. We have a present dignity and duty, though there is greater glory to come.

It is not yet made manifest (ov $\omega \omega \varepsilon \varphi a v \varepsilon \rho \omega \theta \eta$ ). First aorist passive indicative of pavepow. For the aorist indicative with out $\omega$ with a future outlook Brooke notes Mr 11:2; 1Co 8:2; Heb 12:4; Re 17:10,12 .

What we shall be ( $\tau \varepsilon \sigma \circ \mu \varepsilon \theta \alpha$ ). Not $\tau \operatorname{\tau } \varepsilon \varsigma$ (who), but $\tau$ (what) neuter singular predicate nominative. "This what suggests something unspeakable, contained in the likeness of God" (Bengel).

If he shall be manifested ( $\varepsilon \alpha v \varphi \alpha v \varepsilon \rho \omega \theta \eta$ ). As in 2:28, which see. The subject may be Christ as in verse 9, or the future manifestation just mentioned. Either makes sense, probably "it" here better than "he."

Like him (о $о$ оь $\alpha \cup \tau \omega$ ). Avt $\omega$ is associative instrumental case after ouoto. This is our destiny and glory (Ro 8:29), to be like Jesus who is like God (2Co 4:6 ).

We shall see him even as he is ( $о \psi о \mu \varepsilon \theta \alpha \alpha \cup \tau о \nu \kappa \alpha \theta \omega \varsigma \varepsilon \sigma \tau \iota v)$. Future middle indicative of opaw. The transforming power of this vision of Christ (1Co 13:12) is the consummation of the glorious process begun at the new birth (2Co 3:18).

1John 3:3
Set on him ( $\varepsilon \pi^{\prime} \alpha \cup \tau \omega$ ). Resting upon ( $\varepsilon \pi$ ) with locative rather than $\varepsilon \iota \varsigma$, looking to, Ac 24:15. That is upon Christ (Brooke), upon God (D. Smith), upon God in Christ (Westcott).

Purifieth himself ( $\alpha \gamma \nu \zeta \varepsilon \varepsilon \varepsilon \alpha \cup \tau o v$ ). Present active indicative of $\alpha \gamma v \iota \zeta \omega$, old verb, from $\alpha \gamma v o \varsigma$ (pure from contamination), used of ceremonial purifications (Joh 11:55; Ac 21:24,26 as in Ex 19:10) and then of personal internal cleansing of heart (Jas 4:8), soul (1Pe 1:22), self (here). Cf. Php 2:12f. the work of both God and man.
 ive) refers to Christ. Christ can be termed $\alpha \gamma v o \varsigma$ "in virtue of the perfection of his humanity" (Westcott). Our destiny is to be conformed to the image of God in Christ (Ro 8:29).

1John 3:4
Sin is lawlessness ( $\eta$ $\alpha \mu \alpha \rho \tau i \alpha \varepsilon \sigma \tau i v \eta ~\lceil v o \mu i \alpha)$. The article with both subject and predicate makes them coextensive and so interchangeable. Doing sin is the converse of doing righteousness ( 2:29). The present active participle ( $\pi \mathrm{mol} \omega v$ ) means the habit of doing sin.

1John 3:5
He (عкєıvos). As in verse 3; Joh 1:18.
Was manifested ( $\varepsilon \varphi a v \varepsilon \rho \omega \theta \eta$ ). Same form as in verse 2 , but here of the Incarnation as in Joh 21:1, not of the second coming (1Jo 2:28).

To take away sins (ıva тa¢ $\alpha \mu \alpha \rho \tau ı \alpha \varsigma ~ \alpha \rho \eta)$. Purpose clause with $ו v \alpha$ and first aorist active subjunctive of $\alpha \iota \rho \omega$ as in Joh 1:29. In Isa 53:11 we have $\alpha v \alpha \varphi \varepsilon \rho \omega$ for bearing sins, but $\alpha \iota \rho \omega$ properly means to lift up and carry away (Joh 2:16). So in Heb 10:4 we find $\alpha \varphi \alpha \iota \rho \varepsilon \omega$ and Heb 10:11 $\pi \varepsilon \rho \iota a \iota \rho \varepsilon \omega$, to take away sins completely (the complete expiation wrought by Christ on Calvary). The plural a $\mu \alpha \rho \tau \iota \alpha$ here, as in Col 1:14, not singular (collective sense) a $\mu \alpha \rho \tau$ tı $\alpha$ as in Joh 1:29.

And in him is no $\sin$ ( $\kappa \alpha \alpha \mu \alpha \rho \tau \iota a \varepsilon v \alpha \nu \tau \omega$ ouk $\varepsilon \sigma \tau \iota v$ ). "And $\sin$ (the sinful principle) in him is not." As Jesus had claimed about himself (Joh 7:18; $8: 46$ ) and as is repeatedly stated in the N.T. (2Co 5:21; Heb 4:15; 7:26; 9:13 ).

1John 3:6
Sinneth not ( $o v \chi \alpha \mu \alpha \rho \tau \alpha v \varepsilon$ ). Linear present (linear $\mu \varepsilon v \omega v$, keeps on abiding) active indicative of $\alpha \mu \alpha \rho \tau \alpha v \omega$, "does not keep on sinning." For $\mu \varepsilon v \omega$ (abide) see 2:6; Joh 15:4-10 .

Whosoever sinneth (o $\alpha \mu \alpha \rho \tau \alpha v \omega v$ ). Present (linear) active articular participle like $\mu \varepsilon v \omega v$ above, "the one who keeps on sinning" (lives a life of sin, not mere occasional acts of $\sin$ as $\alpha \mu \alpha \rho \tau \eta \sigma \alpha \varsigma$, aorist active participle, would mean).

Hath not seen him (oux $\varepsilon \omega \rho \alpha \kappa \varepsilon v \alpha v \tau o v$ ). Perfect active indicative of opa $\omega$. The habit of $\sin$ is proof that one has not the vision or the knowledge ( $\varepsilon \gamma v \omega \kappa \varepsilon v$, perfect active also) of Christ. He means, of course, spiritual vision and spiritual knowledge, not the literal sense of opaw in Joh 1:18; 20:29.

1John 3:7
Let no man lead you astray ( $\mu \eta \delta \varepsilon \varsigma \varsigma ~ \pi \lambda \alpha v \alpha \tau \omega \quad \nu \mu \alpha \varsigma$ ). Present active imperative of $\pi \lambda \alpha v a \omega$, "let no one keep on leading you astray." See 1:8;2:26. Break the spell of any Gnostic charmer.

He that doeth righteousness (o $\pi \circ \iota \omega \nu \tau \eta \nu \delta \iota \kappa \alpha \iota \sigma v \nu \eta \nu)$. "He that keeps on doing (present active participle of $\pi o t \varepsilon \omega$ ) righteousness." For this idiom with $\pi$ ot $\varepsilon \omega$ see 1:6; 3:4 .

He (عкєıขоৎ). Christ as in verse 5.
1John 3:8
He that doeth $\sin (o \pi o t \omega \nu \tau \eta \nu \alpha \mu \alpha \rho \tau \iota \alpha v)$. "He that keeps on doing sin" (the habit of $\sin )$.

Of the devil ( $\varepsilon \kappa$ tov $\delta ı \beta \beta \lambda o v$ ). In spiritual parentage as Jesus said of the Pharisees in Joh 8:44. When one acts like the devil he shows that he is not a true child of God.

Sinneth from the beginning ( $\alpha \pi^{\prime} \alpha \rho \chi \eta \varsigma \alpha \mu \alpha \rho \tau \alpha v \varepsilon$ ). Linear progressive present active indicative, "he has been sinning from the beginning" of his career as the devil. This is his normal life and those who imitate him become his spiritual children.

That he might destroy ( $\imath v \alpha \lambda v \sigma \eta$ ). Purpose clause with $ו v \alpha$ and the first aorist active subjunctive of $\lambda \nu \omega$. This purpose ( $\varepsilon \iota \varsigma \tau о v \tau 0$ ) Jesus had and has. There is eternal conflict, with final victory over Satan certain.

1John 3:9
Doeth no $\sin (\alpha \mu \alpha \rho \tau \iota \alpha v$ ov $\pi o \iota \varepsilon)$. Linear present active indicative as in verse 4 like $\alpha \mu \alpha \rho \tau \alpha v \varepsilon$ in verse 8 . The child of God does not have the habit of sin.

His seed ( $\sigma \pi \varepsilon \rho \mu \alpha$ avtov). God's seed, "the divine principle of life" (Vincent). Cf. Joh 1

And he cannot $\sin$ ( $\kappa \alpha$ ov $\delta v v \alpha \tau \alpha ~ \alpha \mu \alpha \rho \tau \alpha v \varepsilon เ v)$. This is a wrong translation, for this English naturally means "and he cannot commit sin" as if it were $\kappa \alpha$ ov $\delta v v \alpha \tau \alpha \alpha \mu \alpha \rho \tau \varepsilon \iota v$ or $\alpha \mu \alpha \rho \tau \eta \sigma \alpha$ (second aorist or first aorist active infinitive). The present active infinitive $\alpha \mu \alpha \rho \tau \alpha \nu \varepsilon เ \nu$ can only mean "and he cannot go on sinning," as is true of $\alpha \mu \alpha \rho \tau \alpha \nu \varepsilon$ in verse 8 and $\alpha \mu \alpha \rho \tau \alpha \nu \omega v$ in verse 6 . For the aorist subjunctive to commit a sin see $\alpha \mu \alpha \rho \tau \eta \tau \varepsilon$ and $\alpha \mu \alpha \rho \tau \eta$ in $2: 1$. A great deal of false theology has grown out of a misunderstanding of the tense of $\alpha \mu \alpha \rho \tau \alpha \nu \varepsilon \iota v$ here. Paul has precisely John's idea in Ro 6:1 $\varepsilon \pi \iota \mu \varepsilon \nu \omega \mu \varepsilon \nu \tau \eta \alpha \mu \alpha \rho \tau \iota \alpha$ (shall we continue in sin, present active linear subjunctive) in contrast with $\alpha \mu \alpha \rho \tau \eta \sigma \omega \mu \varepsilon \nu$ in Ro 6:15 (shall we commit a sin, first aorist active subjunctive).

1John 3:10
In this $(\varepsilon \nu \tau o u \tau \omega)$. As already shown. A life of sin is proof that one is a child of the devil and not of God. This is the line of cleavage that is obvious to all. See Joh 8:33-39 for the claim of the Pharisees to be the children of Abraham, whereas their conduct showed them to be children of the devil. This is not a popular note with an age that wishes to remove all distinctions between Christians and the world.

Doeth not righteousness (o $\mu \eta \pi \sigma \omega \nu \delta \iota \kappa \alpha \iota \sigma \nu \nu \eta \nu$ ). Habit (linear present participle) again of not doing righteousness, as in verse 7 of doing it. Cf. $\pi о \iota \varepsilon$ and $\mu \eta \pi \sigma \omega \nu$ (doing and not doing) in Mt 7:24,26.

Neither (ка). Literally, "and," but with the ellipsis of ouк عбтıv єк $\operatorname{\tau ov} \theta \varepsilon o v$ (is not of God). The addition here of this one item about not loving ( $\mu \eta \alpha \gamma \alpha \pi \omega v$ ) one's brother is like Paul's summary in Ro 13:9, a striking illustration of the general principle just laid down and in accord with 2:9-11.

1John 3:11
Message ( $\alpha \gamma \gamma \varepsilon \lambda_{\perp} \alpha$ ). In N.T. only here and 1:5, but $\varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda_{ı} \alpha$ (promise) fifty-one times.
From the beginning ( $\alpha \pi^{\prime} \alpha \rho \chi \eta \varsigma$ ). See 1:1 for this phrase and 2:7 for the idea. They had the message of love for the brotherhood from the beginning of the gospel and it goes back to the time of Cain and Abel (verse 12).

That we should love one another (ıv $\alpha \gamma \alpha \pi \omega \mu \varepsilon v \alpha \lambda \lambda \eta \lambda$ ov¢). Sub-final clause (content of the $\alpha \gamma \gamma \varepsilon \lambda \iota \alpha)$ with $i v \alpha$ and present active subjunctive. John repeats the message of 2:7f.

1John 3:12
Of the evil one ( $\varepsilon \kappa$ tov $\pi$ tov $\eta \rho \circ$ ). Ablative case and the same for neuter and masculine singular, but verse 10 makes it clear that the reference is to the devil.

Slew ( $\varepsilon \sigma \varphi \alpha \xi \varepsilon v$ ). First aorist active indicative of $\sigma \varphi \alpha \zeta \omega$, old verb, to slay, to butcher, to cut the throat (Latin jugulare) like an ox in the shambles, in N.T. only here and Rev. (Re 5:6,9,12 , etc.).

Wherefore? ( $\chi \alpha \rho ı v \tau i v o \sigma ;$ ). "For the sake of what?" Post-positive preposition (Eph 3:1,14 ) except here. The interpretation of the act of Cain (Ge 4:8ff.) is an addition to the narrative, but in accord with Heb 11:4 . Jealousy led to murder.

1John 3:13
If ( $\varepsilon$ ). Common construction after $\theta \alpha \nu \mu \alpha \zeta \omega$ (wonder) rather than ot (that, because). Present imperative here with $\mu \eta$ means "cease wondering." Note $\mu \eta \theta \alpha \nu \mu \alpha \sigma \eta \varsigma(d o n o t ~ b e g i n ~$ to wonder) in Joh 3:6 (an individual case). See this same condition and language in Joh 15:18

1John 3:14
We know ( $\eta \mu \varepsilon \iota \varsigma ~ o \iota \delta \alpha \mu \varepsilon v$ ). Emphatic expression of $\eta \mu \varepsilon \iota \varsigma$ (we) in contrast to the unregenerate world, the Christian consciousness shared by writer and readers.

We have passed ( $\mu \varepsilon \tau \alpha \beta \varepsilon \beta \eta \kappa \alpha \mu \varepsilon v)$. Perfect active indicative of $\mu \varepsilon \tau \alpha \beta \alpha \downarrow v \omega$, old compound to pass over from one place to another (Joh 7:3 ), to migrate, out of death into life. We have already done it while here on earth.

Because (ot). Proof of this transition, not the ground of it.
We love the brethren ( $\alpha \gamma \alpha \pi \omega \mu \varepsilon \nu$ тovৎ $\alpha \delta \varepsilon \lambda \varphi$ ои¢). Just this phrase (plural) here alone, but see 2:9 for the singular.

He that loveth not (o $\mu \eta \alpha \gamma \alpha \pi \omega v$ ). "The not loving man," general picture and picture of spiritual death.

1John 3:15

A murderer ( $\alpha v \theta \rho \omega \pi$ токтоvoc). Old compound (Euripides) from $\alpha v \theta \rho \omega \pi \sigma \varsigma$ (man) and $\kappa \tau \varepsilon เ v \omega$ (to kill), a man-killer, in N.T. only here and Joh 8:44 (of Satan).

No ( $\pi \alpha \sigma--o v$ ). According to current Hebraistic idiom= ou $\delta \varepsilon ı \varsigma$ as in 2:19,21 .
Abiding ( $\mu \varepsilon v o v \sigma \alpha v$ ). Present active feminine accusative predicate participle of $\mu \varepsilon v \omega$, "a continuous power and a communicated gift" (Westcott).

1John 3:16
Know we ( $\varepsilon \gamma \nu \omega \kappa \alpha \mu \varepsilon v)$. Perfect active indicative, "we have come to know and still know." See 2:3 for "hereby" ( $\varepsilon v$ тout $\omega$ ).

Love ( $\tau \eta v \alpha \gamma \alpha \pi \eta v)$. "The thing called love" (D. Smith).
He for us ( $\varepsilon \kappa \varepsilon เ v o \varsigma ~ v \pi \varepsilon \rho \eta \mu \omega v$ ). Eкєıvo̧ as in 2:6; 3:3,5 , v $\tau \varepsilon \rho$ here alone in this Epistle, though common in John's Gospel (10:11,15; 11:50, etc.) and in 3Jo 1:7.

Laid down his life ( $\tau \eta \nu \psi v \chi \eta \nu$ avtov $\varepsilon \theta \eta \kappa \varepsilon v)$. First aorist active indicative of $\tau ו \theta \eta \mu$, the very idiom used by Jesus of himself in Joh 10:11,17f.

We ought ( $\eta \mu \varepsilon ı \varsigma ~ о \varphi \varepsilon ı \lambda о \mu \varepsilon v$ ). Emphatic $\eta \mu \varepsilon \iota \varsigma$ again. For $о \varphi \varepsilon \iota \lambda \omega$ see 2:6. Of course our laying down our lives for the brethren has no atoning value in our cases as in that of Christ, but is a supreme proof of one's love (Joh 13:37f.; 15:13 ), as often happens.

1John 3:17
Whoso hath (oc $\alpha v \varepsilon \chi \eta$ ). Indefinite relative clause with modal $\alpha v$ with o o and the present active subjunctive of $\varepsilon \chi \omega$.

The world's goods ( $\operatorname{tov} \beta \iota \circ \nu$ tov коб $\mu$ оv). "The living or livelihood (not $\zeta \omega \eta$, the principle of life, and see 2:16 for $\beta$ Ioc) of the world" (not in the sense of evil or wicked, but simply this mundane sphere).

Beholdeth $(\theta \varepsilon \omega \rho \varepsilon)$. Present active subjunctive of $\theta \varepsilon \omega \rho \varepsilon \omega$, like $\varepsilon \chi \varepsilon$ just before.
In need ( $\chi \rho \varepsilon \iota \alpha \nu \varepsilon \chi \circ \nu \tau \alpha$ ). "Having need" (present active predicate participle of $\varepsilon \chi \omega$, agreeing with $\alpha \delta \varepsilon \lambda \varphi o v)$. See the vivid picture of a like case in Jas 2:15f.

Shutteth up ( $\kappa \lambda \varepsilon \iota \sigma \eta$ ). First aorist (effective) active subjunctive of $\kappa \lambda \varepsilon 1 \omega$, to close like the door, changed on purpose from present tense to aorist (graphic slamming the door of his compassion, $\sigma \pi \lambda a \gamma \chi \vee \alpha$, common in LXX and N.T. for the nobler viscera, the seat of the emotions, as in Php 2:11; Col 3:12 ). Only here in John.

How ( $\pi \omega \varsigma$ ). Rhetorical question like that in Jas 2:16 (what is the use?). It is practical, not speculative, that counts in the hour of need.

1John 3:18
In word, neither with the tongue ( $\lambda o \gamma \omega \mu \eta \delta \varepsilon \tau \eta \gamma \lambda \omega \sigma \sigma \eta$ ). Either instrumental or locative makes sense. What John means is "not merely by word or by the tongue." He does not condemn kind words which are comforting and cheering, but warm words should be accompanied by warm deeds to make real "in deed and in truth" ( $\varepsilon v \varepsilon \rho \gamma \omega \kappa \alpha \alpha \lambda \eta \theta \varepsilon i \alpha)$. Here is a case where actions do speak louder than mere words.

1John 3:19

Shall we know ( $\gamma \nu \omega \sigma \circ \mu \varepsilon \theta \alpha$ ). Future middle indicative of $\gamma \iota \nu \omega \sigma \kappa \omega$, at any future emergency, we shall come to know by this ( $\varepsilon v \tau 0 \cup \tau \omega)$ "that we are of the truth" (ot $\varepsilon \kappa \tau \eta$ $\alpha \lambda \eta \theta \varepsilon i \alpha \varsigma \varepsilon \sigma \mu \varepsilon v)$.

Before him ( $\varepsilon \mu \pi \rho \circ \sigma \theta \varepsilon v \alpha v \tau o v)$. In the very presence of God we shall have confident assurance ( $\pi \varepsilon เ \sigma \circ \mu \varepsilon \nu \tau \eta \nu \kappa \alpha \rho \delta \iota \alpha \nu \eta \mu \omega \nu$, either we shall persuade our heart or shall assure our heart) because God understands us.

1John 3:20
Whereinsoever our heart condemn us (oт $\varepsilon \alpha v \kappa \alpha \tau \alpha \gamma ı \nu \omega \sigma \kappa \eta \eta \mu \omega \nu \eta \kappa \alpha \rho \delta \iota \alpha)$. A construction like ot $\alpha v$, whatever, in Joh 2:5; 14:13. Kat $\alpha \boldsymbol{\gamma} \omega \omega \sigma \kappa \omega$ occurs only three times in the N.T., here, verse 21; Ga 2:11. It means to know something against one, to condemn.

Because God is greater than our heart ( $\circ \tau \mu \varepsilon \iota \zeta \omega v \varepsilon \sigma \tau \iota v \tau \eta \varsigma \kappa \alpha \rho \delta \iota \alpha \varsigma \eta \mu \omega v$ ). Ablative $\kappa \alpha \rho \delta ı \alpha$, after the comparative $\mu \varepsilon \iota \zeta \omega v$.

And knoweth all things ( $\kappa \alpha \gamma \iota \nu \omega \sigma \kappa \varepsilon \pi \alpha \nu \tau \alpha$ ). Just so Peter replied to Jesus in spite of his denials (Joh 21:17 ). God's omniscience is linked with his love and sympathy. God knows every secret in our hearts. This difficult passage strikes the very centre of Christian truth (Brooke).

1John 3:21
If our heart condemn us not ( $\varepsilon \alpha \nu \eta \kappa \alpha \rho \delta ı \alpha \mu \eta \kappa \alpha \tau \alpha \gamma \iota \omega \omega \sigma \kappa \eta)$. Condition of third class with $\varepsilon \alpha v \mu \eta$ and present active subjunctive. The converse of the preceding, but not a claim to sinlessness, but the consciousness of fellowship in God's presence.

Boldness toward God ( $\pi \alpha \rho \rho \eta \sigma \iota \alpha v \pi \rho o \varsigma ~ \tau o v ~ \theta \varepsilon o v)$. Even in prayer (Heb 4:16). See also 2:28.

1John 3:22
Whatsoever we ask (o $\varepsilon \alpha v \alpha i \tau \omega \mu \varepsilon v$ ). Indefinite relative clause with modal $\alpha v$ and the present active subjunctive, like ot $\varepsilon \alpha v \kappa \alpha \tau \alpha \gamma \iota \nu \omega \sigma \kappa \eta$ in verse 20 . In form no limitations are placed here save that of complete fellowship with God, which means complete surrender of our will to that of God our Father. See the clear teaching of Jesus on this subject in Mr 11:24; Lu 11:9; Joh 14:12f.; 16:23 and his example (Mr 14:36; Mt 26:39; Lu 22:42). The answer may not always be in the form that we expect, but it will be better.

We receive of him ( $\left.\lambda \alpha \mu \beta \alpha v o \mu \varepsilon v a \pi^{\prime} \alpha v \tau o v\right)$. See 1:5 for $\alpha \pi^{\prime}$ avtov (from him).
Because (o $\tau$ ). Twofold reason why we receive regularly ( $\lambda \alpha \mu \beta \alpha v o \mu \varepsilon v$ ) the answer to our prayers (1) "we keep" ( $\tau \eta \rho o u \mu \varepsilon v$, for which see 2:3) his commandments and (2) "we do" ( $\pi o \circ o u \mu \varepsilon v$, we practise regularly) "the things that are pleasing" ( $\tau \alpha \alpha \rho \varepsilon \sigma \tau \alpha$, old verbal adjective from a $\alpha \varepsilon \sigma \kappa \omega$, to please, with dative in Joh 8:29 with same phrase; Ac 12:3 and infinitive in Ac 6:2, only other N.T. examples) "in his sight" ( $\varepsilon v \omega \pi \iota \circ$ avtov, common late vernacular preposition in papyri, LXX, and in N.T., except Matthew and Mark, chiefly by Luke and in the Apocalypse), in God's eye, as in Heb 13:21.

1John 3:23

His commandment ( $\eta \varepsilon v \tau o \lambda \eta$ autov).
That ( $\llcorner v \alpha$ ). Subfinal use of $\iota v \alpha$ in apposition with $\varepsilon v \tau o \lambda \eta$ (commandment) and explanatory of it, as in Joh 15:12 ( $\varepsilon v \tau o \lambda \eta \stackrel{\nu \alpha}{ }$ ). See Christ's summary of the commandments (Mr 12:28-31; Mt 22:34-40 ). So these two points here (1)

We should believe ( $\pi \iota \sigma \tau \varepsilon v \sigma \omega \mu \varepsilon v$, first aorist active subjunctive according to B K L, though Aleph A C read the present subjunctive $\pi / \sigma \tau \varepsilon v \omega \mu \varepsilon v$ ) either in a crisis (aorist) or the continuous tenor (present) of our lives. The "name" of Jesus Christ here stands for all that he is, "a compressed creed " (Westcott) as in 1:3. Note dative ovouat here with $\pi \iota \sigma \tau \varepsilon v \omega$ as in 5:10, though عıৎ ovo $\alpha$ (on the name) in 5:13; Joh 1:12; 2:23; 3:18. But (2) we should love one another" ( $\alpha \gamma \alpha \pi \omega \mu \varepsilon v ~ a \lambda \lambda \eta \lambda$ ouc $)$, as he has already urged (2:7f.; $3: 11$ ) and as he will repeat (4:7,11f.; 2Jo 1:5) as Jesus (even as he gave us commandment, that is Christ) had previously done (Joh 13:34; 15:12,17). There are frequent points of contact between this Epistle and the words of Jesus in Joh 13-17.

1John 3:24
And he in him (ка autos $\varepsilon v$ aut $\omega$ ). That is "God abides in him" as in 4:15. We abide in God and God abides in us through the Holy Spirit (Joh 14:10,17,23; 17:21). "Therefore let God be a home to thee, and be thou the home of God: abide in God, and let God abide in thee" (Bede).

By the Spirit ( $\varepsilon \kappa$ tov $\pi v \varepsilon v \mu \alpha \tau o \varsigma)$. It is thus (by the Holy Spirit, first mention in this Epistle and "Holy" not used with "Spirit" in this Epistle or the Apocalypse) that we know that God abides in us.

Which (ov). Ablative case by attraction from accusative o (object of $\varepsilon \delta \omega \kappa \varepsilon v$ ) to agree with $\pi v \varepsilon v \mu \alpha \tau \circ \varsigma$ as often, though not always. It is a pity that the grammatical gender (which) is retained here in the English instead of "whom," as it should be.

## 1 John 4

## 1John 4:1

Beloved ( $\alpha \nmid \alpha \pi \eta \tau 0$ ). Three times in this chapter $(1,7,11)$ we have this tender address on love.

Believe not every spirit ( $\mu \eta \pi \alpha \nu \tau \pi \nu \varepsilon \cup \mu \alpha \tau \pi \iota \sigma \tau \varepsilon v \varepsilon \tau \varepsilon$ ). "Stop believing," as some were clearly carried away by the spirits of error rampant among them, both Docetic and Cerinthian Gnostics. Credulity means gullibility and some believers fall easy victims to the latest fads in spiritualistic humbuggery.

Prove the spirits ( $\delta о к ц \alpha \zeta \varepsilon \tau \varepsilon \tau \alpha \pi v \varepsilon \nu \mu \alpha \tau \alpha)$. Put them to the acid test of truth as the metallurgist does his metals. If it stands the test like a coin, it is acceptable ( $\delta о к \mu о \varsigma, ~ 2 С о ~$ 10:18 ), otherwise it is rejected ( $\alpha$ бокıноৎ, 1Со 9:27; 2Со 13:5-7 ).

Many false prophets ( $\pi о \lambda \lambda о \psi \varepsilon v \delta о \pi \rho о \varphi \eta \tau \alpha$ ). Jesus had warned people against them (Mt 7:15), even when they as false Christs work portents (Mt 24:11,24; Mr 13:22). It is an old story (Lu 6:26) and recurs again and again (Ac 13:6; Re 16:13; 19:20; 20:10) along with false teachers (2Pe 2:1).

Are gone out ( $\varepsilon \xi \varepsilon \lambda \eta \lambda \nu \theta a \sigma เ v)$. Perfect active indicative of $\varepsilon \xi \varepsilon \rho \chi \circ \mu \alpha$. Cf. aorist in 2:19. They are abroad always.

1John 4:2
Hereby know ye ( $\varepsilon \nu \tau 0 v \tau \omega \gamma \downarrow \nu \omega \sigma \kappa \varepsilon \tau \varepsilon$ ). Either present active indicative or imperative. The test of "the Spirit of God" ( $\tau 0 \pi \nu \varepsilon \cup \mu \alpha$ тov $\theta \varepsilon o v)$ here alone in this Epistle, save verse 13. With the clamour of voices then and now this is important. The test ( $\varepsilon v \tau 0 \cup \tau \omega$, as in 3:19) follows.

That Jesus Christ is come in the flesh (Inoouv Xpıotov $\varepsilon v \sigma \alpha \rho \kappa \varepsilon \lambda \eta \lambda \cup \theta \circ \tau \alpha$ ). The correct text (perfect active participle predicate accusative), not the infinitive ( $\varepsilon \lambda \eta \lambda \lambda \cup \varepsilon \varepsilon v \alpha, B$ Vg ). The predicate participle (see Joh 9:22 for predicate accusative with ouo $\boldsymbol{\rho} \boldsymbol{\gamma} \boldsymbol{\gamma} \varepsilon \omega$ ) describes Jesus as already come in the flesh (his actual humanity, not a phantom body as the Docetic Gnostics held). See this same idiom in 2Jo 1:7 with $\varepsilon \rho \chi o \mu \varepsilon v o v$ (coming). A like test is proposed by Paul for confessing the deity of Jesus Christ in 1Co 12:3 and for the Incarnation and Resurrection of Jesus in Ro 10:6-10 .

## 1John 4:3

Confesseth not ( $\mu \eta$ о $\mu \boldsymbol{\lambda} \boldsymbol{\lambda} \boldsymbol{\gamma \varepsilon}$ ). Indefinite relative clause with the subjective negative $\mu \eta$ rather than the usual objective negative ov (verse 6). It is seen also in 2Pe 1:9; Tit 1:11, a survival of the literary construction (Moulton, Prolegomena, p. 171). The Vulgate (along with Irenaeus, Tertullian, Augustine) reads solvit ( $\lambda \nu \varepsilon$ ) instead of $\mu \eta$ о $\mu \circ \lambda$ о $\gamma \varepsilon$, which means "separates Jesus," apparently an allusion to the Cerinthian heresy (distinction between Jesus and Christ) as the clause before refers to the Docetic heresy. Many MSS. have here also $\varepsilon v$ $\sigma \alpha \rho \kappa \varepsilon \lambda \eta \lambda \cup \nexists$ ota repeated from preceding clause, but not A B Vg Cop. and not genuine.

The spirit of the antichrist ( $\tau 0$ тоv $\alpha v \tau \iota \chi \rho เ \sigma \tau о v) . ~ П \nu \varepsilon \cup \mu \alpha$ (spirit) not expressed, but clearly implied by the neuter singular article to. It is a repetition of the point about antichrists made in 2:18-25.

Whereof (o). Accusative of person (grammatical neuter referring to $\pi v \varepsilon v \mu \alpha$ ) with $\alpha \kappa o v \omega$ along with accusative of the thing ( $о \tau \varepsilon \rho \chi \varepsilon \tau \alpha$, as in 2:18, futuristic present middle indicative). Here the perfect active indicative ( $к \kappa \eta \kappa \alpha \tau \varepsilon$ ), while in 2:18 the aorist ( $\eta \kappa о v \sigma \alpha \tau \varepsilon$ ).

And now already ( $\kappa \alpha v v \vee \eta \delta \eta$ ). As in 2:18 also (many have come). "The prophecy had found fulfilment before the Church had looked for it" (Westcott). It is often so. For $\eta \delta \eta$ see Joh 4:35; 9:27.

1John 4:4
Have overcome them (vєvıкпкатє avtou¢). Perfect active indicative of vıка $\omega$, calm confidence of final victory as in 2:13; Joh 16:33. The reference in avtous (them) is to the false prophets in 4:1.

Because (ot). The reason for the victory lies in God, who abides in them (3:20,24; Joh 14:20; 15:4f. ). God is greater than Satan, "he that is in the world" ( o $\varepsilon \tau \tau \omega \kappa \sigma \mu \omega$ ), the prince of this world (Joh 12:31; 14:30), the god of this age (2Co 4:4), powerful as he seems.

1John 4:5
Of the world ( $\varepsilon \kappa$ tov коб $\boldsymbol{\mu} \boldsymbol{\sim})$ ). As Jesus is not and as the disciples are not (Joh 17:14ff. ).

As of the world ( $\varepsilon \kappa$ тov коб $\mu \circ v$ ). No "as" ( $\omega \varsigma$ ), but that is the idea, for their talk proceeds from the world and wins a ready hearing. The false prophets and the world are in perfect unison.

1John 4:6
We ( $\eta \mu \varepsilon \iota)$ ). In sharp contrast with the false prophets and the world. We are in tune with the Infinite God. Hence "he that knoweth God" (o $\gamma \iota v \omega \sigma \kappa \omega \nu \tau o v \theta \varepsilon o v$, present active articular participle, the one who keeps on getting acquainted with God, growing in his knowledge of God) "hears us" ( $\alpha \kappa 0 v \varepsilon \eta \mu \omega v$ ). This is one reason why sermons are dull (some actually are, others so to dull hearers) or inspiring. There is a touch of mysticism here, to be sure, but the heart of Christianity is mysticism (spiritual contact with God in Christ by the Holy Spirit). John states the same idea negatively by a relative clause parallel with the preceding articular participle, the negative with both clauses. John had felt the cold, indifferent, and hostile stare of the worldling as he preached Jesus.

By this (єк тovtou). "From this," deduction drawn from the preceding; only example in the Epistle for the common $\varepsilon v$ tout $\omega$ as in 4:2. The power of recognition ( $\gamma \iota v \omega \sigma \kappa \circ \mu \varepsilon v$, we know by personal experience) belongs to all believers (Westcott). There is no reason for Christians being duped by "the spirit of error" ( $\tau 0 \pi \nu \varepsilon \cup \mu \alpha \tau \eta \varsigma \pi \lambda a v \eta \varsigma$ ), here alone in the
 truth may be due also to our not speaking the truth in love (Eph 4:15).

## 1John 4:7

Of God ( $\varepsilon \kappa$ tov $\theta$ हov). Even human love comes from God, "a reflection of something in the Divine nature itself" (Brooke). John repeats the old commandment of 2:7f. Persistence in loving (present tense $\alpha \gamma \alpha \pi \omega \mu \varepsilon v$ indicative and $\alpha \gamma \alpha \pi \omega v$ participle) is proof that one "has been begotten of God" ( $\varepsilon \kappa$ tov $\theta \varepsilon o v \gamma \varepsilon \gamma \varepsilon \vee \nu \eta \tau \alpha$ as in 2:29) and is acquainted with God. Otherwise mere claim to loving God accompanied by hating one's brother is a lie ( 2:9-11).

1John 4:8
He that loveth not ( $o \mu \eta \alpha \gamma \alpha \pi \omega v$ ). Present active articular participle of $\alpha \gamma \alpha \pi \alpha \omega$ "keeps on not loving."

Knoweth not God (ouk $\varepsilon \gamma v \omega$ tov $\theta \varepsilon o v$ ). Timeless aorist active indicative of $\gamma \iota \nu \omega \sigma \kappa \omega$, has no acquaintance with God, never did get acquainted with him.

God is love (o $\theta \varepsilon o \varsigma ~ a \gamma \alpha \pi \eta \varepsilon \sigma \tau \tau v)$. Anarthrous predicate, not $\eta \alpha \gamma \alpha \pi \eta$. John does not say that love is God, but only that God is love. The two terms are not interchangeable. God is also light ( 1:5) and spirit (Joh 4:24).

1John 4:9
Was manifested $(\varepsilon \varphi \alpha v \varepsilon \rho \omega \theta \eta)$. First aorist passive indicative of $\varphi \alpha v \varepsilon \rho o \omega$. The Incarnation as in 3:5. Subjective genitive as in 2:5.

In us ( $\varepsilon v \eta \mu v)$. In our case, not "among us" nor "to us." Cf. Ga 1:16.
Hath sent ( $\alpha \pi \varepsilon \sigma \tau \alpha \lambda \kappa \varepsilon v$ ). Perfect active indicative of $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$, as again in verse 14, the permanent mission of the Son, though in verse 10 the aorist $\alpha \pi \varepsilon \sigma \tau \varepsilon i \lambda \varepsilon v$ occurs for the single event. See Joh 3:16 for this great idea.

His only-begotten Son ( $\tau 0 v$ viov autou tov $\mu$ оvoүعvף). "His Son the only-begotten" as in Joh 3:16. John applies $\mu$ ovo $\begin{gathered}\text { evņ to Jesus alone (Joh 1:14,18), but Luke (Lu 7:12; 8:42; }\end{gathered}$ 9:38) to others. Jesus alone completely reproduces the nature and character of God (Brooke).

That we might live through him (ıva $\left\lceil\eta \sigma \omega \mu \varepsilon v \delta \iota^{\prime}\right.$ avtov). Purpose clause with $\imath v \alpha$ and the first aorist (ingressive, get life) active subjunctive of $\zeta \alpha \omega$. "Through him" is through Christ, who is the life (Joh 14:6 ). Christ also lives in us (Ga 2:20). This life begins here and now.

1John 4:10
Not that (ou or)
--but that ( $\alpha \lambda \lambda^{\prime}$ o ${ }^{\prime}$ ). Sharp contrast as in Joh 7:22; 2Co 7:9; Php 4:17.
We loved ( $\eta \gamma \alpha \pi \eta \sigma \alpha \mu \varepsilon v$ ). First aorist active indicative, but B reads $\eta \gamma \alpha \pi \eta \kappa \alpha \mu \varepsilon v$ (perfect active, we have loved).

He (avtoc). Emphatic nominative (God).
To be the propitiation ( $(\lambda \alpha \sigma \mu \circ v)$. Merely predicate accusative in apposition with voov (Son). For the word see 2:2; Ro 3:25 for $\lambda \lambda a \sigma \tau \eta \rho \circ o v$, and for $\pi \varepsilon \rho$ see also 2:2.

1John 4:11

If God so loved us ( $\varepsilon$ ov $\omega \omega \varsigma$ o $\theta \varepsilon o \varsigma ~ \eta \gamma \alpha \pi \eta \sigma \varepsilon \nu \eta \mu \propto \varsigma$ ). Condition of first class with $\varepsilon$ and the first aorist active indicative. As in Joh 3:16, so here out $\omega \varsigma$ emphasises the manifestation of God's love both in its manner and in its extent (Ro 8:32).

Ought (орعілонعv). As in 2:6. Noblesse oblige. "Keep on loving," ( $\alpha \gamma \alpha \pi \alpha ı v)$ as in 3:11. 1John 4:12
No one hath beheld God at any time ( $\theta \varepsilon \circ \vee$ ou $\delta \varepsilon ı \varsigma ~ \pi \omega \pi о \tau \varepsilon \tau \varepsilon \theta \varepsilon \alpha \tau \alpha$ ). Perfect middle
 $\varepsilon \omega \rho \alpha \kappa \varepsilon v$ (instead of $\tau \varepsilon \theta \varepsilon \alpha \tau \alpha)$.

If we love one another ( $\varepsilon \alpha v \alpha \gamma \alpha \pi \omega \mu \varepsilon v \alpha \lambda \lambda \eta \lambda$ ouc). Third-class condition with $\varepsilon \alpha v$ and the present active subjunctive, "if we keep on loving one another."

God abideth in us (o $\theta \varepsilon o \varsigma \varepsilon v \eta \mu \nu \nu \mu \varepsilon v \varepsilon$ ). Else we cannot go on loving one another.
His love ( $\eta \alpha \gamma \alpha \pi \eta$ avtou). More than merely subjective or objective (2:5; 4:9). "Mutual love is a sign of the indwelling of God in men" (Brooke).

Is perfected ( $\tau \varepsilon \tau \varepsilon \lambda \varepsilon เ \omega \mu \varepsilon v \eta \varepsilon \sigma \tau \iota v)$. Periphrastic (see usual form $\tau \varepsilon \tau \varepsilon \lambda \varepsilon เ \omega \tau \alpha$ in 2:5; 4:17 ) perfect passive indicative of $\tau \varepsilon \lambda \varepsilon เ o \omega$ (cf. 1:4). See verse 18 for "perfect love."

1John 4:13
Hereby know we ( $\varepsilon v$ tovt $\omega \boldsymbol{\gamma} \boldsymbol{\nu} \omega \sigma \kappa о \mu \varepsilon v$ ). The Christian's consciousness of the fact of God dwelling in him is due to the Spirit of God whom God has given ( $\delta \varepsilon \delta \omega \kappa \varepsilon v$, perfect active indicative here, though the aorist $\varepsilon \delta \omega \kappa \varepsilon v$ in 3:24). This gift of God is proof of our fellowship with God.

1John 4:14
We have beheld ( $\tau \varepsilon \theta \varepsilon \alpha \mu \varepsilon \theta \alpha$ ). Perfect middle of $\theta \varepsilon \alpha o \mu \alpha$ as in verse 12 , though the aorist in 1:1; Joh 1:14 ( $\varepsilon \theta \varepsilon \alpha \sigma \alpha \mu \varepsilon \theta \alpha)$. John is qualified to bear witness ( $\mu \alpha \rho \tau v \rho o v \mu \varepsilon v$ as in 1:2) as Jesus had charged the disciples to do (Ac 1:8).

Hath sent ( $\alpha \pi \varepsilon \sigma \tau \alpha \lambda \kappa \varepsilon v$ ). As in verse 9, though $\alpha \pi \varepsilon \sigma \tau \varepsilon 1 \lambda \varepsilon v$ in verse 10.
To be the Saviour of the world ( $\sigma \omega \tau \eta \rho \alpha$ $o v$ коб $\mu \circ v$ ). Predicate accusative of $\sigma \omega \tau \eta \rho$ (Saviour), like $\lambda \lambda a \sigma \mu \mathrm{ov}$ in verse 10. This very phrase occurs elsewhere only in Joh 4:42 as the confession of the Samaritans, but the idea is in Joh 3:17.

1John 4:15
Whosoever shall confess (o $\varepsilon$ عav ouo $\bar{\prime} о \gamma \eta \sigma \eta$ ). Indefinite relative clause with modal $\varepsilon \alpha v$ (=an) and the first aorist active subjunctive, "whoever confesses." See 2:23; 4:2f. for онодоүєш.

That (oт). Object clause (indirect assertion) after ouo $\boldsymbol{\rho} \boldsymbol{\gamma} \boldsymbol{\gamma} \varepsilon \omega$. This confession of the deity of Jesus Christ implies surrender and obedience also, not mere lip service (cf. 1Co 12:3; Ro 10:6-12 ). This confession is proof (if genuine) of the fellowship with God (1:3f.; 3:24).

1John 4:16

We know ( $\varepsilon \gamma v \omega \kappa \alpha \mu \varepsilon v)$. Perfect active indicative, "we have come to know and still know" as in Joh 6:9, only there order is changed ( $\pi \varepsilon \pi \iota \sigma \tau \varepsilon \cup \kappa \alpha \mu \varepsilon \nu$ coming before $\varepsilon \gamma v \omega \kappa \alpha \mu \varepsilon v$ ). Confession ( $о \mu \mathrm{o} \lambda о \gamma \varepsilon \omega$ ) follows experimental knowledge ( $\gamma \iota \nu \omega \sigma \kappa \omega$ ) and confident trust ( $\pi \iota \sigma \tau \varepsilon \cup \omega$ ). Believers are the sphere ( $\varepsilon v \eta \mu \nu$, in our case) in which the love of God operates (Westcott). See Joh 13:35 for "having love."

God is love (o $\theta \varepsilon o \varsigma ~ a \gamma \alpha \pi \eta ~ \varepsilon \sigma \tau \tau v)$. Repeated from verse 8 . So he gathers up the whole argument that one who is abiding in love is abiding in God and shows that God is abiding in him. Thoroughly Johannine style.

1John 4:17
Herein ( $\varepsilon v \tau o v \tau \omega)$. It is not clear whether the iva clause (sub-final use) is in apposition with $\varepsilon v \tau 0 \cup \tau \omega$ as in Joh 15:8 or the ot clause (because) with the tva clause as parenthesis. Either makes sense. Westcott argues for the latter idea, which is reinforced by the preceding sentence.

With us ( $\mu \varepsilon \theta^{\prime} \eta \mu \omega v$ ). Construed with the verb $\tau \varepsilon \tau \varepsilon \lambda \varepsilon \epsilon \omega \tau \alpha$ (is perfected). In contrast to $\varepsilon \nu \eta \mu \nu \nu$ (verses 12,16), emphasising cooperation. "God works with man" (Westcott). For boldness ( $\pi \alpha \rho \rho \eta \sigma ı \alpha v)$ in the day of judgment (only here with both articles, but often with no articles as in 2Pe 2:9) see 2:28.

As he is ( $\kappa \alpha \theta \omega \varsigma \varepsilon \kappa \varepsilon เ v o \varsigma ~ \varepsilon \sigma \tau \iota v)$. That is Christ as in 2:6; 3:3,5,7,16. Same tense (present) as in 3:7. "Love is a heavenly visitant" (David Smith). We are in this world to manifest Christ.

1John 4:18
Fear ( $\varphi$ о $\beta$ oc). Like a bond-slave (Ro 8:15), not the reverence of a son ( $\varepsilon \cup \lambda \alpha \beta \varepsilon ı \alpha$, Heb 5:7f. ) or the obedience to a father ( $\varepsilon v \varphi o \beta \omega, 1 \mathrm{Pe} 1: 17$ ). This kind of dread is the opposite of $\pi \alpha \rho \rho \eta \sigma \iota \alpha$ (boldness).

Perfect love ( $\eta \tau \varepsilon \lambda \varepsilon ⿺ \alpha ~ \alpha \gamma \alpha \pi \eta$ ). There is such a thing, perfect because it has been perfected (verses 12,17). Cf. Jas 1:4.

Casteth out fear ( $\varepsilon \xi \omega \beta \alpha \lambda \lambda \varepsilon$ tov $\varphi \circ \beta \circ v$ ). "Drives fear out" so that it does not exist in real love. See $\varepsilon \kappa \beta \alpha \lambda \lambda \omega \varepsilon \xi \omega$ in Joh 6:37; 9:34f.; 12:31; $15: 6$ to turn out-of-doors, a powerful metaphor. Perfect love harbours no suspicion and no dread (1Co 13 ).

Hath punishment ( $\kappa 0 \lambda \alpha \sigma \iota v \varepsilon \varepsilon$ ). Old word, in N.T. only here and Mt 25:46 . Tı $\mu \omega \rho \iota \alpha$ has only the idea of penalty, ко入aбıs has also that of discipline, while $\pi \alpha \iota \delta \varepsilon \iota \alpha$ has that of chastisement (Heb 12:7). The one who still dreads ( $\varphi$ о $\beta o \cup \mu \varepsilon v o c)$ has not been made perfect in love (ov $\tau \varepsilon \tau \varepsilon \lambda \varepsilon \omega \tau \tau \alpha)$. Bengel graphically describes different types of men: "sine timore et amore; cum timore sine amore; cum timore et amore; sine timore cum amore."

1John 4:19
 God loved us
before we loved him (Joh 3:16). Our love is in response to his love for us. A $\gamma \alpha \pi \omega \mu \varepsilon v$ is indicative (we love), not subjunctive (let us love) of the same form. There is no object expressed here.

1John 4:20
If a man say ( $\varepsilon \alpha v \tau \iota \varsigma \varepsilon \iota \pi \eta)$. Condition of third class with $\varepsilon \alpha v$ and second aorist active subjunctive. Suppose one say. Cf. 1:6.

I love God ( $\mathrm{A} \gamma a \pi \omega$ $\tau 0 v \theta \varepsilon o v$ ). Quoting an imaginary disputant as in 2:4.
And hateth ( $\kappa \alpha \mu \sigma \varepsilon)$. Continuation of the same condition with $\varepsilon \alpha v$ and the present active subjunctive, "and keep on hating." See $2: 9$; $3: 15$ for use of $\mu \operatorname{\sigma } \varepsilon \omega$ (hate) with $\alpha \delta \varepsilon \lambda \varphi \circ$, (brother). A liar ( $\psi \varepsilon \cup \sigma \tau \eta \varsigma)$. Blunt and to the point as in 1:10; 2:4.

That loveth not ( $o \mu \eta \alpha \gamma \alpha \pi \omega v$ ). "The one who does not keep on loving" (present active negative articular participle).

Hath seen ( $\varepsilon \omega \rho \alpha \kappa \varepsilon v)$. Perfect active indicative of opa $\omega$, the form in Joh 1:18 used of seeing God.

Cannot love (ov $\delta v v a \tau \alpha a \gamma \alpha \pi \alpha ı v)$. "Is not able to go on loving," with which compare 2:9, ov $\delta v v a \tau \alpha$ a $\mu \rho \tau \alpha v \varepsilon ı v$ (is not able to go on sinning). The best MSS. do not have $\pi \omega$ ¢ (how) here.

1John 4:21
That ( $\imath v \alpha$ ). Sub-final object clause in apposition with $\varepsilon v \tau o \lambda \eta \nu$ as in Joh 13:34; 15:13.
From him ( $\alpha \pi^{\prime} \alpha v \tau o v$ ). Either God or Christ. See Mr 12:29-31 for this old commandment (2:7f. ).

## 1 John 5

1John 5:1
That Jesus is the Christ (oт I $\eta$ бovc $\varepsilon \sigma \tau \iota v$ o X $\rho ı \sigma \tau o \varsigma$ ). The Cerinthian antichrist denies the identity of Jesus and Christ ( $2: 22$ ). Hence John insists on this form of faith ( $\pi \iota \sigma \tau \varepsilon v \omega v$ here in the full sense, stronger than in 3:23; 4:16, seen also in đıotıc in verse 4, where English and Latin fall down in having to use another word for the verb) as he does in verse 5 and in accord with the purpose of John's Gospel ( $20: 31$ ). Nothing less will satisfy John, not merely intellectual conviction, but full surrender to Jesus Christ as Lord and Saviour. "The Divine Begetting is the antecedent, not the consequent of the believing" (Law). For "is begotten of God" ( $\varepsilon \kappa$ tov $\theta$ عou $\gamma \varepsilon \gamma \varepsilon v \nu \eta \tau \alpha)$ see 2:29; 3:9; 4:7; 5:4,18. John appeals here to family relationship and family love.

Him that begat ( $\tau 0 v \gamma \varepsilon v \vee \eta \sigma \alpha v \tau \alpha$ ). First aorist active articular participle of $\gamma \varepsilon \vee v \alpha \omega$, to beget, the Father (our heavenly Father).

Him also that is begotten of him ( $\tau 0 \vee \gamma \varepsilon \gamma \varepsilon v v \eta \mu \varepsilon v o v \varepsilon \xi$ autou). Perfect passive articular participle of $\gamma \varepsilon v v a \omega$, the brother or sister by the same father. So then we prove our love for the common Father by our conduct towards our brothers and sisters in Christ.

1John 5:2
Hereby ( $\varepsilon v \tau 0 \cup \tau \omega)$. John's usual phrase for the test of the sincerity of our love. "The love of God and the love of the brethren do in fact include each the other" (Westcott). Each is a test of the other. So put 3:14 with 5:2.

When (otav). "Whenever" indefinite temporal clause with otav and the present active subjunctive (the same form $\alpha \gamma \alpha \pi \omega \mu \varepsilon v$ as the indicative with o $\tau$ (that) just before, "whenever we keep on loving God."

And do (ка $\pi о \omega \omega \mu \varepsilon$ ) "and whenever we keep on doing (present active subjunctive of $\pi о เ \varepsilon \omega)$ his commandments." See 1:6 for "doing the truth."

1John 5:3
This (avin)
--that (iva). Explanatory use of va with $\alpha v \tau \eta$, as in Joh 17:3, to show what "the love of God" (4:9,12) in the objective sense is, not mere declamatory boasting ( $4: 20$ ), but obedience to God's commands, "that we keep on keeping (present active subjunctive as in 2:3) his commandments." This is the supreme test.

Are not grievous ( $\beta$ арєı ouk $\varepsilon \iota \sigma \iota v$ ). "Not heavy," the adjective in Mt 23:4 with $\varphi$ ортıа (burdens), with $\lambda$ uto (wolves) in Ac 20:29, of Paul's letters in 2Co 10:10, of the charges against Paul in Ac 25:7 . Love for God lightens his commands.

1John 5:4
For (ot). The reason why God's commandments are not heavy is the power that comes with the new birth from God.

Whatsoever is begotten of God ( $\pi \alpha \nu$ то $\gamma \varepsilon \gamma \varepsilon \nu v \eta \mu \varepsilon v o v$ єк тov $\theta \varepsilon o v$ ). Neuter singular perfect passive participle of $\gamma \varepsilon v v a \omega$ rather than the masculine singular (verse 1 ) to express sharply the universality of the principle (Rothe) as in Joh $3: 6,8 ; 6: 37,39$.

Overcometh the world (vika $\tau о v$ коб $\mu$ оv). Present active indicative of vıка $\omega$, a continuous victory because a continuous struggle, "keeps on conquering the world" ("the sum of all the forces antagonistic to the spiritual life," D. Smith).

This is the victory ( $\alpha \cup \tau \eta \varepsilon \sigma \tau \tau \nu \eta \nu / \kappa \eta$ ). For this form of expression see 1:5; Joh 1:19. Nıкๆ (victory, cf. vıкаш), old word, here alone in N.T., but the later form vıкоৎ in Mt 12:20; 1Co 15:54f.,57.

That overcometh ( $\eta$ vıк $\eta \sigma \alpha \sigma \alpha$ ). First aorist active articular participle of vıка $\omega$. The English cannot reproduce the play on the word here. The aorist tense singles out an individual experience when one believed or when one met temptation with victory. Jesus won the victory over the world (Joh 16:33) and God in us (1Jo 4:4) gives us the victory.

Even our faith ( $\eta \pi \iota \sigma \tau \iota \varsigma \eta \mu \omega v$ ). The only instance of $\pi \iota \sigma \tau \iota \varsigma$ in the Johannine Epistles (not in John's Gospel, though in the Apocalypse). It is our faith in Jesus Christ as shown by our confession (verse 1) and by our life (verse 2).

1John 5:5
And who is he that overcometh? ( $\tau \iota \varsigma \varepsilon \sigma \tau \iota v \delta \varepsilon$ o $v ו \kappa \omega v$ ?). Not a mere rhetorical question ( 2:22), but an appeal to experience and fact. Note the present active articular participle ( $v / \kappa \omega v$ ) like vika (present active indicative in verse 4), "the one who keeps on conquering the world." See 1Co 15:57 for the same note of victory (viкоৎ) through Christ. See verse 1 for o $\pi เ \sigma \tau \varepsilon v \omega v$ (the one who believes) as here.

Jesus is the Son of God (I $\eta$ бovৎ $\varepsilon \sigma \tau i v$ o vioc tov $\theta$ rov). As in verse 1 save that here o vos tou $\theta$ gou in place of Xpıбтos and see both in 2:22f. Here there is sharp antithesis between "Jesus" (humanity) and "the Son of God" (deity) united in the one personality.

1John 5:6
This (outoc). Jesus the Son of God (verse 5).
He that came (o $\varepsilon \lambda \theta \omega v$ ). Second aorist active articular participle of $\varepsilon \rho \chi o \mu \alpha$, referring to the Incarnation as a definite historic event, the preexistent Son of God "sent from heaven to do God's will" (Brooke).

By water and blood ( $\delta \imath^{\prime}$ v $\left.\delta \alpha \tau о \varsigma ~ к \alpha ~ a ı \mu \tau \tau \varsigma\right) . ~ A c c o m p a n i e d ~ b y ~(~ \delta ı \alpha ~ u s e d ~ w i t h ~ t h e ~ g e n-~$ itive both as instrument and accompaniment, as in Ga 5:13 ) water (as at the baptism) and blood (as on the Cross). These two incidents in the Incarnation are singled out because at the baptism Jesus was formally set apart to his Messianic work by the coming of the Holy Spirit upon him and by the Father's audible witness, and because at the Cross his work reached its culmination ("It is finished," Jesus said). There are other theories that do not accord with the language and the facts. It is true that at the Cross both water and blood came out of the side of Jesus when pierced by the soldier, as John bore witness (Joh 19:34 ), a
complete refutation of the Docetic denial of an actual human body for Jesus and of the Cerinthian distinction between Jesus and Christ. There is thus a threefold witness to the fact of the Incarnation, but he repeats the twofold witness before giving the third. The repetition of both preposition ( $\varepsilon v$ this time rather than $\delta \iota \alpha$ ) and the article ( $\tau \omega$ locative case) argues for two separate events with particular emphasis on the blood ("not only" ouк povov, "but" $\alpha \lambda \lambda$ ') which the Gnostics made light of or even denied.

It is the Spirit that beareth witness ( $\tau 0 \pi \nu \varepsilon \cup \mu \alpha \Omega \sigma \tau \iota \nu \tau 0 \mu \alpha \rho \tau v \rho o v v$ ). Present active articular participle of $\mu \alpha \rho \tau v \rho \varepsilon \omega$ with article with both subject and predicate, and so interchangeable as in 3:4. The Holy Spirit is the third and the chief witness at the baptism of Jesus and all through his ministry.

Because (o $\tau$ ). Or declarative "that." Either makes sense. In Joh 15:26 Jesus spoke of "the Spirit of truth" (whose characteristic is truth). Here John identifies the Spirit with truth as Jesus said of himself (Joh 14:6 ) without denying personality for the Holy Spirit.

1John 5:7
For there are three who bear witness (o $\tau \rho \varepsilon \iota \varsigma \varepsilon \iota \sigma เ v$ o $\mu \alpha \rho \tau \cup \rho \circ \cup v \tau \varepsilon \varsigma)$. At this point the Latin Vulgate gives the words in the Textus Receptus, found in no Greek MS. save two late cursives ( 162 in the Vatican Library of the fifteenth century, 34 of the sixteenth century in Trinity College, Dublin). Jerome did not have it. Cyprian applies the language of the Trinity and Priscillian has it. Erasmus did not have it in his first edition, but rashly offered to insert it if a single Greek MS. had it and 34 was produced with the insertion, as if made

 Word, and the Holy Ghost: and these three are one. And there are three that bear witness in earth). The last clause belongs to verse 8. The fact and the doctrine of the Trinity do not depend on this spurious addition. Some Latin scribe caught up Cyprian's exegesis and wrote it on the margin of his text, and so it got into the Vulgate and finally into the Textus Receptus by the stupidity of Erasmus.

1John 5:8
The Spirit and the water and the blood ( $\tau о \pi v \varepsilon v \mu \alpha ~ к а ~ \tau о ~ v \delta \omega \rho ~ к \alpha ~ \tau о ~ \alpha ~ \mu \alpha) . ~ T h e ~ s a m e ~$ three witnesses of verses 6,7 repeated with the Spirit first.

The three (o $\tau \rho \varepsilon \iota \varsigma)$. The resumptive article.
Agree in one ( $\varepsilon \iota \varsigma ~ \tau o ~ \varepsilon v \varepsilon เ \sigma เ v$ ). "Are for the one thing," to bring us to faith in Jesus as the Incarnate Son of God, the very purpose for which John wrote his Gospel ( 20:31).

1John 5:9
If we receive ( $\varepsilon \lambda \alpha \mu \beta \alpha v o \mu \varepsilon v)$. Condition of first class with $\varepsilon$ and the present active indicative, assumed as true. The conditions for a legally valid witness are laid down in De 19:15 (cf. Mt 18:16; Joh 8:17f.; 10:25; 2Co 13:1).

Greater ( $\mu \varepsilon \iota \zeta \omega \nu$ ). Comparative of $\mu \varepsilon \gamma \alpha \varsigma$, because God is always true.

For (o $\tau$ ). So it applies to this case.
That (o $\boldsymbol{\tau}$ ). Thus taken in the declarative sense (the fact that) as in Joh 3:19, though it can be causal (because) or indefinite relative with $\mu \varepsilon \mu \alpha \rho \tau \nu \rho \eta \kappa \varepsilon \nu$ (what he hath testified, perfect active indicative of $\mu \alpha \rho \tau v \rho \varepsilon \omega$, as in Joh 1:32; 4:44, etc.), a harsh construction here because of $\mu \alpha \rho \tau v \rho \iota \alpha$, though some MSS. do read $\varepsilon v$ to agree with it (cf. verse 10). See o $\tau \varepsilon \alpha v$ in 3:20 for that idiom. Westcott notes the Trinity in verses 6-9: the Son comes, the Spirit witnesses, the Father has witnessed.

1John 5:10
Believeth on ( $\pi \iota \sigma \tau \varepsilon v \omega \nu \varepsilon \iota \varsigma)$. John draws a distinction between "not believing God" ( $\mu \eta$ $\pi \iota \sigma \tau \varepsilon \nu \omega \nu \tau \omega \theta \varepsilon \omega)$ in next clause, the testimony of God about his Son, and surrender to and reliance on the Son as here ( $\varepsilon ા \varsigma$ and the accusative). See the same distinction less clearly drawn in Joh 6:30f. See also $\varepsilon \iota \varsigma \tau \eta \nu \mu \alpha \rho \tau \nu \rho ı \alpha \nu$ after $\pi \varepsilon \pi \iota \sigma \tau \varepsilon v \kappa \varepsilon \nu$ in this same verse and Joh 2:23.

In him $(\varepsilon v \alpha v \tau \omega)$. "In himself," though the evidence is not decisive between $\alpha v \tau \omega$ and $\alpha \nu \tau \omega$.

Hath made ( $\pi \varepsilon \pi о \iota \eta \kappa \varepsilon v)$. Perfect active indicative of $\pi о \iota \varepsilon \omega$ like $\mu \varepsilon \mu \alpha \rho \tau \nu \rho \eta \kappa \varepsilon \nu$ and $\pi \varepsilon \pi \iota \sigma \tau \varepsilon \cup \kappa \varepsilon \nu$, permanent state.

A liar $(\psi \varepsilon v \sigma \tau \eta v)$. As in 1:10, which see.
Because he hath not believed ( $\circ \tau$ ov $\pi \varepsilon \pi \iota \sigma \tau \varepsilon v \kappa \varepsilon v$ ). Actual negative reason with negative $o v$, not the subjective reason as in Joh 3:18, where we have $o \tau \mu \eta \pi \varepsilon \pi \iota \sigma \tau \varepsilon v \kappa \varepsilon v)$. The subjective negative is regular with o $\mu \eta \pi \iota \sigma \tau \varepsilon \omega \omega \nu$. Relative clause here repeats close of verse 9.

## 1John 5:11

That God gave (o $\tau \varepsilon \delta \omega \kappa \varepsilon v$ o $\theta \varepsilon o \varsigma$ ). Declarative o $\tau$ in apposition with $\mu \alpha \rho \tau v \rho ı \alpha$ as in verse 14; Joh 3:19. Note aorist active indicative $\varepsilon \delta \omega \kappa \varepsilon v($ from $\delta \iota \delta \omega \mu$ ) as in 3:23f. , the great historic fact of the Incarnation (Joh 3:16) , but the perfect $\delta \varepsilon \delta \omega \kappa \varepsilon v$ in 1Jo 3:1 to emphasize the abiding presence of God's love.

Eternal life ( $\zeta \omega \eta \nu \alpha \iota \omega \nu \iota o v$ ). Anarthrous emphasizing quality, but with the article in 1:2.

In his Son ( $\varepsilon v \tau \omega v \iota \omega$ avtov). This life and the witness also. This is why Jesus who is life (Joh 14:6 ) came to give us abundant life (Joh 10:10).

1John 5:12
Hath the life ( $\varepsilon \chi \varepsilon \tau \eta \nu \zeta \omega \eta \nu$ ). The life which God gave (verse 11). This is the position of Jesus himself (Joh 5:24; 14:6).

1John 5:13
I have written $(\varepsilon \gamma \rho \alpha \psi \alpha)$. Not epistolary aorist, but refers to verses 1-12 of this Epistle as in 2:26 to the preceding verses.

That ye may know ( $\llcorner v \alpha \varepsilon \iota \delta \eta \tau \varepsilon$ ). Purpose clause with $\tau v \alpha$ and the second perfect active subjunctive of ot $\delta a$, to know with settled intuitive knowledge. He wishes them to have
eternal life in Christ (Joh 20:31) and to know that they have it, but not with flippant superficiality (2:3ff. ).

Unto you that believe on ( $\tau \circ \varsigma \varsigma \pi \iota \sigma \tau \varepsilon v o v \sigma \iota v \varepsilon \iota \varsigma)$. Dative of the articular present active participle of $\pi \iota \sigma \tau \varepsilon v \omega$ and $\varepsilon ı \varsigma$ as in verse 10 . For this use of ovo $\mu \alpha$ (name) with $\pi \iota \sigma \tau \varepsilon v \omega$ see 3:23; Joh 2:23.

1John 5:14
Toward him ( $\pi \rho \circ \rho \alpha \cup \tau o v)$. Fellowship with ( $\pi \rho \circ \varsigma$, face to face) Christ. For boldness see 2:28.

That (o $\tau$ ). Declarative again, as in verse 11.
If we ask anything ( $\varepsilon \alpha \nu \tau \alpha u \tau \omega \mu \varepsilon \theta \alpha$ ). Condition of third class with $\varepsilon \alpha \nu$ and present middle (indirect) subjunctive (personal interest as in Jas 4:3, though the point is not to be pressed too far, for see Mt 20:20,22; Joh 16:24,26 ).

According to his will ( $\kappa \alpha \tau \alpha$ тo $\theta \varepsilon \lambda \eta \mu \alpha \alpha v \tau o v)$. This is the secret in all prayer, even in the case of Jesus himself. For the phrase see 1Pe 4:19; Ga 1:4; Eph 1:5,11 .

He heareth us ( $\alpha \kappa о v \varepsilon \eta \mu \omega v$ ). Even when God does not give us what we ask, in particular then (Heb 5:7f. ).

1John 5:15
And if we know ( $\kappa \alpha \varepsilon \alpha v$ oi $\delta \alpha \mu \varepsilon v$ ). Condition of first class with $\varepsilon \alpha v$ (usually $\varepsilon$ ) and the perfect active indicative, assumed as true. See 1Th 3:8; Ac $8: 31$ for the indicative with $\varepsilon \alpha v$ as in the papyri. "An amplification of the second limitation" (D. Smith).

Whatsoever we ask (o $\varepsilon \alpha v \alpha I \tau \omega \mu \varepsilon \theta \alpha$ ). Indefinite relative clause with modal $\varepsilon \alpha v(=\alpha v)$ and the present middle (as for ourselves) subjunctive of $\alpha$ alt $\varepsilon \omega$. This clause, like $\eta \mu \omega v$, is also the object of akove.

We know that we have ( $o t \delta \alpha \mu \varepsilon v$ o $\tau \varepsilon \chi \circ \mu \varepsilon v$ ). Repetition of ot $\delta \alpha \mu \varepsilon v$, the confidence of possession by anticipation.

The petitions ( $\tau \alpha \alpha \iota \tau \eta \mu \alpha \tau \alpha$ ). Old word, from $\alpha \iota \tau \varepsilon \omega$, requests, here only in John, elsewhere in N.T. Lu 23:24; Php 4:6. We have the answer already as in Mr 11:24.

We have asked ( $\eta \iota \tau \eta \kappa \alpha \mu \varepsilon v$ ). Perfect active indicative of $\alpha \iota \tau \varepsilon \omega$, the asking abiding.
1John 5:16
If any man see ( $\varepsilon \alpha v \tau \iota \varsigma \iota \emptyset$ ). Third-class condition with $\varepsilon \alpha v$ and second aorist active subjunctive of $\varepsilon$ \& $\delta o v$ ( $o \rho \alpha \omega$ ).

Sinning a sin ( $\alpha \mu \alpha \rho \tau \alpha v o v \tau \alpha \alpha \mu \alpha \rho \tau \iota v$ ). Present active predicate (supplementary) participle agreeing with $\alpha \delta \varepsilon \lambda \varphi o v$ and with cognate accusative $\alpha \mu \alpha \rho \tau \iota \alpha$.

Not unto death ( $\mu \eta \pi \rho \circ \varsigma \theta \alpha v a \tau o v$ ). Repeated again with $\alpha \mu \alpha \rho \tau \alpha v o v \sigma ı v$ and in contrast with $\alpha \mu \alpha \rho \tau \iota \alpha \pi \rho o \varsigma ~ \theta a v a \tau o v(\sin$ unto death). Most sins are not mortal sins, but clearly John conceives of a sin that is deadly enough to be called "unto death." This distinction is common
 incur a death-bearing $\sin$ " as many crimes then and now bear the death penalty. There is a
distinction in Heb 10:26 between sinning wilfully after full knowledge and sins of ignorance (Heb 5:2 ). Jesus spoke of the unpardonable sin (Mr 3:29; Mt 12:32; Lu 12:10 ), which was attributing to the devil the manifest work of the Holy Spirit. It is possible that John has this idea in mind when he applies it to those who reject Jesus Christ as God's Son and set themselves up as antichrists.

Concerning this ( $\pi \varepsilon \rho$ عкєıvŋऽ). This sin unto death.
That he should make request (iva $\varepsilon \rho \omega \tau \eta \sigma \eta$ ). Sub-final use of tva with the first aorist active subjunctive of $\varepsilon \rho \omega \tau \alpha \omega$, used here as in Joh 17:15,20 (and often) for request rather than for question. John does not forbid praying for such cases; he simply does not command prayer for them. He leaves them to God.

1John 5:17
All unrighteousness is $\sin$ ( $\pi \alpha \sigma \alpha \alpha \delta ı \kappa ı \alpha ~ \alpha \mu \alpha \rho \tau \iota \alpha ~ \varepsilon \sigma \tau ı v)$. Unrighteousness is one manifestation of sin as lawlessness ( $3: 4$ ) is another (Brooke). The world today takes sin too lightly, even jokingly as a mere animal inheritance. Sin is a terrible reality, but there is no cause for despair. Sin not unto death can be overcome in Christ.

1John 5:18
We know (oi $\delta \alpha \mu \varepsilon v$ ). As in 3:2,14; 5:15,19,20. He has "ye know" in 2:20; 3:5,15.
Sinneth not (ovð $\alpha \mu \alpha \rho \tau \alpha v \varepsilon$ ). Lineal present active indicative, "does not keep on sinning," as he has already shown in 3:4-10.

He that was begotten of God (o $\gamma \varepsilon v v \eta \theta \varepsilon ı \varsigma ~ \varepsilon \kappa ~ \tau o v ~ \theta \varepsilon o v)$ ). First aorist passive articular participle referring to Christ, if the reading of A B is correct ( $\tau \eta \rho \varepsilon \alpha \cup \tau o v$, not $\tau \eta \rho \varepsilon \varepsilon \alpha \nu \tau o v)$ ). It is Christ who keeps the one begotten of God ( $\gamma \varepsilon \gamma \varepsilon \nu v \eta \mu \varepsilon v o \varsigma \varepsilon \kappa$ tov $\theta \varepsilon o v$ as in 3:9 and so different from o $\gamma \varepsilon v v \eta \theta \varepsilon ı \varsigma$ here). It is a difficult phrase, but this is probably the idea. Jesus (Joh 18:37) uses $\gamma \varepsilon \gamma \varepsilon v \nu \eta \mu \alpha$ of himself and uses also $\tau \eta \rho \varepsilon \omega$ of keeping the disciples (Joh 17:12,15; Re 3:10).

The evil one (o лоvŋроৎ). Masculine and personal as in 2:13, not neuter, and probably Satan as in Mt 6:13, not just any evil man.

Touchest him not (ovX $\alpha \pi \tau \varepsilon \tau \alpha \alpha 0 \tau o v$ ). Present middle indicative of $\alpha \pi \tau \omega$, elsewhere in John only Joh 20:17. It means to lay hold of or to grasp rather than a mere superficial touch ( $\theta<\gamma \gamma \alpha v \omega$, both in $\operatorname{Col} 2: 21)$. Here the idea is to touch to harm. The devil cannot snatch such a man from Christ (Joh 6:38f. ).

1John 5:19
Of God ( $\varepsilon \kappa$ tov $\theta \varepsilon \sigma v$ ). See 3:10; 4:6 for this idiom.
Lieth in the evil one ( $\varepsilon \nu \tau \omega \pi о \nu \eta \rho \omega \kappa \varepsilon \iota \alpha)$. Present middle indicative of the defective verb кєца, to lie, as in Lu 2:12. Пог $\rho \omega$ is masculine, like o $\pi о \nu \eta \rho o s$ in verse 18. This is a terrible picture of the Graeco-Roman world of the first century A.D., which is confirmed by Paul in Romans 1 and 2 and by Horace, Seneca, Juvenal, Tacitus.

1John 5:20

Is come ( $\eta \kappa \varepsilon$ ). Present active indicative, but the root has a perfect sense, "has come." See $\varepsilon \xi \eta \lambda \theta$ ov ка $\eta \kappa \omega$ in Joh 8:42.

An understanding ( $\delta$ ıavoıav). Here alone in John's writings, but in Paul (Eph 4:18) and Peter ( $1 \mathrm{Pe} 1: 13$ ). John does not use $\gamma v \omega \sigma \iota \varsigma$ (knowledge) and vouc (mind) only in Re 13:18; 17:9.

That we know ( $七 v \alpha \gamma \downarrow \omega \sigma \kappa \circ \mu \varepsilon v$ ). Result clause with $\imath v \alpha$ and the present active indicative, as is common with $t v a$ and the future indicative (Joh 7:3). It is possible that here o was pronounced $\omega$ as a subjunctive, but many old MSS. have iva $\gamma ı v \omega \sigma \kappa \sigma \sigma \sigma v$ (plainly indicative) in Joh 17:3, and in many other places in the N.T. the present indicative with $v \alpha$ occurs as a variant reading as in Joh 5:20 .

Him that is true ( $\tau 0 v a \lambda \eta \theta \iota v o v)$. That is, God. Cf. 1:8.
In him that is true $(\varepsilon v \tau \omega a \lambda \eta \theta \iota v \omega)$. In God in contrast with the world "in the evil one" (verse 19). See Joh 17:3.

Even in his Son Jesus Christ ( $\varepsilon \nu \tau \omega$ vit av $\tau \circ$ I $\eta \sigma o v$ X $\rho เ \sigma \tau \omega$ ). The $\alpha v \tau o v$ refers clearly to $\varepsilon \nu \tau \omega a \lambda \eta \theta \iota \nu \omega$ (God). Hence this clause is not in apposition with the preceding, but an explanation as to how we are "in the True One" by being "in his Son Jesus Christ."

This (ovtos). Grammatically outos may refer to Jesus Christ or to "the True One." It is a bit tautological to refer it to God, but that is probably correct, God in Christ, at any rate. God is eternal life (Joh 5:26 ) and he gives it to us through Christ.

## 1John 5:21

Yourselves ( $\varepsilon a v \tau \alpha$ ). Neuter plural reflexive because of $\tau \varepsilon \kappa v / \alpha$. The active voice $\varphi \cup \lambda \alpha \sigma \sigma \varepsilon \tau \varepsilon$ with the reflexive accents the need of effort on their part. Idolatry was everywhere and the peril was great. See Ac 7:41: 1Th 1:9 for this word.

## SECOND JOHN

ABOUT A.D. 85 TO 90

## BY WAY OF INTRODUCTION

There is little to add to what was said about the First Epistle except that here the author terms himself "the elder" (o $\pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho \circ \varsigma)$ and writes to "the elect lady" ( $\varepsilon \kappa \lambda \varepsilon \kappa \tau \eta ~ к \nu \rho ı \alpha)$. There is dispute about both of these titles. Some hold that it is the mythical "presbyter John" of whom Papias may speak, if so understood, but whose very existence is disproved by Dom Chapman in John the Presbyter and the Fourth Gospel (1911). Peter the apostle (1Pe 1:1) calls himself "fellow-elder" ( $\sigma \cup v \pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho о \varsigma)$ with the other elders ( $1 \mathrm{Pe} 5: 1$ ). The word referred originally to age ( $\operatorname{Lu}$ 15:25) , then to rank or office as in the Sanhedrin (Mt 16:21; Ac 6:12) and in the Christian churches (Ac 11:30; 20:17; 1Ti 5:17,19) as here also. A few even deny that the author is the same as in the First Epistle of John, but just an imitator. But the bulk of modern scholarly opinion agrees that the same man wrote all three Epistles and the Fourth Gospel (the Beloved Disciple, and many still say the Apostle John) whatever is true of the Apocalypse. There is no way of deciding whether "the elect lady" is a woman or a church. The obvious way of taking it is to a woman of distinction in one of the churches, as is true of "the co-elect lady in Babylon" (1Pe 5:13) , Peter's wife, who travelled with him (1Co 9:5 ). Some even take кupıa to be the name of the lady (Cyria). Some also take it to be "Eklecta the lady." Dr. Findlay (Fellowship in the Life Eternal, p. 31) holds that Pergamum is the church to which the letter was sent. The same commentaries treat I, II, and III John as a rule, though Poggel has a book on II, III John (1896) and Bresky (1906) has Das Verhaltnis des Zweiten Johannesbriefes zum dritten. Dr. J. Rendel Harris has an interesting article in The Expositor of London for March, 1901, on "The Problem of the Address to the Second Epistle of John," in which he argues from papyri examples that кupıa here means "my dear" or "my lady." But Findlay (Fellowship in the Life Eternal, p. 26) argues that "the qualifying adjunct 'elect' lifts us into the region of Christian calling and dignity." It is not certain that II John was written after I John, though probable. Origen rejected it and the Peshitta Syriac does not have II and III John.

## 2 John 1

## 2John 1:1

 be understood either literally as in 1Ti 3:4, or spiritually, as in $\mathrm{Ga} 4: 19,25$; 1Ti 1:2 . For the spiritual sense in $\tau \varepsilon \kappa \nu$ la see 1Jo 2:1,12 .

Whom (ovc). Masculine accusative plural, though тєкvoıs is neuter plural (dative), construction according to sense, not according to grammatical gender, "embracing the mother and the children of both sexes" (Vincent). See thus ous in Ga 4:19.

I (E $\gamma \omega$ ). Though o $\pi \rho \varepsilon \sigma \beta \nu \tau \varepsilon \rho o \varsigma$ is third person, he passes at once after the Greek idiom to the first and there is also special emphasis here in the use of $\alpha \gamma a \pi \omega$ with the addition of $\varepsilon v a \lambda \eta \theta \varepsilon \propto \alpha$ (in truth, in the highest sphere, as in Joh 17:19; 3Jo 1:1) and ouk $\varepsilon \gamma \omega \mu$ оvoc (not I only, "not I alone"). Brooke argues that this language is unsuitable if to a single family and not to a church. But Paul employs this very phrase in sending greetings to Prisca and Aquila (Ro 16:4).

That know (o $\varepsilon \gamma v \omega \kappa о \tau \varepsilon \varsigma)$. Perfect active articular participle of $\gamma \iota \nu \omega \sigma \kappa \omega$, "those that have come to know and still know."

2John 1:2
For the truth's sake ( $\delta i \alpha \tau \eta v \alpha \lambda \eta \theta \varepsilon i \alpha v$ ). Repetition of the word, one of which John is very fond (1Jo 1:6, "the truth, as revealed by the Christ, and gradually unfolded by the Spirit, who is truth" (Brooke).

Which abideth in us ( $\tau \eta v \mu \varepsilon v o v \sigma \alpha \nu \varepsilon v \eta \mu v)$. See Joh 17:19 for "sanctified in truth" and 1Jo 2:6 for abiding in Christ, and so it includes all who are in Christ.

It shall be with us ( $\left.\mu \varepsilon \theta^{\prime} \eta \mu \omega v \varepsilon \sigma \tau \alpha\right)$. Confident assertion, not a mere wish. Note the order of the words, "With us it shall be" ( $\varepsilon \sigma \tau \alpha$ future middle of $\varepsilon \mu$ ).

2John 1:3
Shall be with us ( $\varepsilon \sigma \tau \alpha \mu \varepsilon \theta^{\prime} \eta \mu \omega v$ ). He picks up the words before in reverse order. Future indicative here, not a wish with the optative ( $\varepsilon$ ( $\varepsilon$ ) as we have in $1 \mathrm{Pe} 1: 2 ; 2 \mathrm{Pe} 1: 2$. The salutation is like that in the Pastoral Epistles: "Xapıऽ, the wellspring in the heart of God; $\varepsilon \lambda \varepsilon \sigma \varsigma$, its outpourings; $\varepsilon \mid \rho \eta \nu \eta$, its blessed effect" (David Smith).

And from Jesus Christ ( $\kappa \alpha \pi \alpha \rho \alpha$ I $\eta \sigma o v$ X $\rho \iota \sigma \tau o v$ ). The repetition of $\pi \alpha \rho \alpha$ (with the ablative) is unique. "It serves to bring out distinctly the twofold personal relation of man to the Father and to the Son" (Westcott). "The Fatherhood of God, as revealed by one who being His Son can reveal the Father, and who as man (I $\eta \sigma o v$ ) can make him known to men" (Brooke).

2John 1:4

I rejoice $(\varepsilon \chi \propto \rho \eta v)$. Second aorist passive of $\chi \propto \iota \rho \omega$ as in 3Jo 1:3, "of a glad surprise" (D. Smith), as in Mr 14:11, over the discovery about the blessing of their godly home on these lads.

Greatly ( $\lambda_{\iota} \alpha v$ ). Only here and 3Jo 1:3 in John's writings.
I have found ( $\varepsilon \cup \rho \eta \kappa \alpha)$. Perfect active indicative of $\varepsilon v \rho \iota \sigma \kappa \omega$ as in Joh 1:41, our "eureka," here with its usual force, a continued discovery. "He sits down at once and writes to Kyria. How glad she would be that her lads, far away in the great city, were true to their early faith" (David Smith).

Certain of thy children ( $\varepsilon \kappa \tau \omega \nu \tau \varepsilon \kappa \nu \omega \nu$ ). No $\tau \iota \nu \alpha \varsigma$ as one would expect before $\varepsilon \kappa$, a not infrequent idiom in the N.T. (Joh 16:17).

Walking ( $\pi \varepsilon \rho \iota \pi \alpha \tau o v \nu \tau \alpha \varsigma)$. Present active accusative supplementary participle agreeing with tivac understood. Probably members of the church off here in Ephesus.

In truth ( $\varepsilon \vee \alpha \lambda \eta \theta \varepsilon \iota \alpha$ ). As in verse 1; 3Jo 1:4.
We received $(\varepsilon \lambda \alpha \beta o \mu \varepsilon v)$. Second aorist active (possibly, though not certainly, literary plural) of $\lambda \alpha \mu \beta \alpha \nu \omega$. This very idiom ( $\varepsilon v \tau o \lambda \eta \nu \lambda \alpha \mu \beta \alpha \nu \omega)$ in Joh 10:18; Ac 17:15; Co 4:10. Perhaps the reference here is to 1 Jo 2:7f.; 3:23 .

2John 1:5
Beseech $(\varepsilon \rho \omega \tau \omega)$. For pray as in 1Jo 5:16.
Lady ( $\kappa \cup \rho ı \alpha)$. Vocative case and in the same sense as in 1.
As though I wrote $(\omega \varsigma \gamma \rho \alpha \varphi \omega v)$. Common idiom $\omega \varsigma$ with the participle (present active) for the alleged reason.

New ( $\kappa \alpha / v \eta \nu$ ). As in 1Jo 2:7f., which see.
We had ( $\varepsilon \iota \chi \alpha \mu \varepsilon v$ ). Imperfect active (late - $\alpha$ form like $\varepsilon \iota \chi \alpha v$ in Mr 8:7) of $\varepsilon \chi \omega$ and note $\varepsilon \iota \chi \varepsilon \tau \varepsilon$ with $\alpha \pi^{\prime} \alpha \rho \chi \eta \varsigma$ in 1Jo 2:7. Not literary plural, John identifying all Christians with himself in this blessing.

That we love one another ( $\imath \nu \alpha \alpha \gamma \alpha \pi \omega \mu \varepsilon \nu \alpha \lambda \lambda \eta \lambda o v \varsigma)$. Either a final clause after $\varepsilon \rho \omega \tau \omega$ as in Joh 17:15 or an object clause in apposition with $\varepsilon v \tau o \lambda \eta \nu$, like 1 Jo 2:27; 3:23 and like verse 6.

2John 1:6
Love ( $\eta$ a $\alpha a \pi \eta$ ). The love just mentioned.
That we should walk ( $\imath v \alpha \pi \varepsilon \rho \iota \pi \alpha \tau \omega \mu \varepsilon v$ ). Object clause in nominative case in apposition with $\alpha \gamma a \pi \eta$, with $ו v a$ and the present active subjunctive of $\pi \varepsilon \rho \iota \pi \alpha \tau \varepsilon \omega$, "that we keep on walking."

The commandment ( $\eta \varepsilon v \tau o \lambda \eta$ ). The one just mentioned with the same construction with $ו v a$ as in 1Jo 3:23. John changes from the first person plural to the second ( $\eta \kappa 0 v \sigma \alpha \tau \varepsilon$ as in 1Jo 2:7, $\pi \varepsilon \rho \iota \pi \alpha \tau \eta \tau \varepsilon$ ) as in 1Jo 2:5,7 .

In it ( $\varepsilon v \alpha \cup \tau \eta$ ). Either to $\alpha \lambda \eta \theta \varepsilon ı \alpha$ (truth) of verse $4, \alpha \gamma \alpha \pi \eta$ of this verse, or $\varepsilon v \tau o \lambda \eta$ of this verse. Either makes good sense, probably "in love." With $\pi \varepsilon \rho \iota \pi \alpha \tau \varepsilon \omega$ (walk) we have often $\varepsilon v$ (1Jo 1:7,11, etc.) or ката (according to) as in Mr 7:5; 1Co 3:3; 2Co 10:2 , etc.

2John 1:7
Deceivers ( $\pi \lambda \alpha v o$ ). Late adjective (Diodorus, Josephus) meaning wandering, roving (1Ti 4:1). As a substantive in N.T. of Jesus (Mt 27:63 ), of Paul (2Co 6:8), and here. See the verb ( $\tau \omega v \pi \lambda \alpha v o v \tau \omega v \nu \mu \alpha \varsigma$ ) in 1Jo 2:26 of the Gnostic deceivers as here and also of Jesus (Joh 7:12 ). Cf. 1Jo 1:8.

Are gone forth ( $\varepsilon \xi \eta \lambda \theta \alpha v$, alpha ending). Second aorist active indicative of $\varepsilon \xi \varepsilon \rho \chi \circ \mu \alpha$, perhaps an allusion to the crisis when they left the churches (1Jo 2:19, same form).

Even they that confess not (o $\mu \eta$ о $о$ о $\lambda$ o $\gamma o u v \tau \varepsilon$ ). "The ones not confessing" ( $\mu \eta$ regular negative with the participle). The articular participle describes the deceivers ( $\pi \lambda \alpha v o$ ).

That Jesus Christ cometh in the flesh (I $\eta \sigma o u v$ X Christ coming in the flesh." Present middle participle of $\varepsilon \rho \chi \circ \mu \alpha$ treating the Incarnation as a continuing fact which the Docetic Gnostics flatly denied. In 1Jo 4:2 we have $\varepsilon \lambda \eta \lambda \cup \theta$ ota (perfect active participle) in this same construction with $\rho \mu \circ \lambda o \gamma \varepsilon \omega$, because there the reference is to the definite historical fact of the Incarnation. There is no allusion here to the second coming of Christ.

This (outoc). See 1Jo 2:18,22; 5:6,20 .
The deceiver and the antichrist ( $\left.\frac{\pi \lambda \alpha v o \varsigma ~ к \alpha ~ o ~}{\alpha} v \tau \iota \chi \rho \iota \sigma \tau \circ \varsigma\right)$. Article with each word, as in Re 1:17, to bring out sharply each separate phrase, though one individual is referred to. The one par excellence in popular expectation (1Jo 2:22), though many in reality (1Jo 2:18; 3Jo 1:7).

2John 1:8
Look to yourselves ( $\beta \lambda \varepsilon \pi \varepsilon \tau \varepsilon$ عavtovৎ). Imperative active with reflexive pronoun as in Mr 13:9. The verb often used absolutely (Php 3:2) like our "look out."

That ye lose not (iva $\mu \eta \alpha \pi 0 \lambda \varepsilon \sigma \eta \tau \varepsilon$ ). Negative purpose with $i v \alpha \mu \eta$ and first aorist active subjunctive of $\alpha \pi \sigma \lambda \lambda \nu \mu$. This is the correct text (B), not $\alpha \pi \sigma \lambda \varepsilon \sigma \omega \mu \varepsilon \nu$ (we). Likewise $\alpha \pi o \lambda \alpha \beta \eta \tau \varepsilon$ (that ye receive), not $\alpha \pi o \lambda \alpha \beta \omega \mu \varepsilon v$ (we).

Which we have wrought ( $\alpha \eta \rho \gamma \alpha \sigma \alpha \mu \varepsilon \theta \alpha$ ). This is also correct, first aorist middle indicative of $\varepsilon \rho \gamma \alpha \zeta_{\circ} \mu \alpha$, to work (Joh 6:27f. ). John does not wish his labour to be lost. See Ro 1:27 for this use of $\alpha \pi о \lambda \alpha \mu \beta \alpha v \omega$ for receiving. See Joh 4:36 for $\mu \iota \sigma \theta$ os in the harvest. The "full reward" ( $\mu \sigma \theta$ ov $\pi \lambda \eta \rho \eta$ ) is the full day's wages which each worker will get (1Co 3:8). John is anxious that they shall hold on with him to the finish.

2John 1:9
Whosoever goeth onward ( $\pi \alpha \varsigma$ о $\pi \rho о \alpha \gamma \omega v$ ). "Every one who goes ahead. Проаү literally means to go on before ( $\mathrm{Mr} 11: 9$ ). That in itself is often the thing to do, but here the bad sense comes out by the parallel clause.

And abideth not in the teaching of Christ ( $\kappa \alpha \mu \eta \mu \varepsilon \nu \omega \nu \varepsilon \nu \tau \eta \delta \iota \delta \alpha \chi \eta \tau o v$ X $\rho \iota \sigma \tau \sigma v$ ). Not the teaching about Christ, but that of Christ which is the standard of Christian teaching as the walk of Christ is the standard for the Christian's walk (1Jo 2:6 ). See Joh 7:16; 18:19. These Gnostics claimed to be the progressives, the advanced thinkers, and were anxious to relegate Christ to the past in their onward march. This struggle goes on always among those who approach the study of Christ. Is he a "landmark" merely or is he our goal and pattern? Progress we all desire, but progress toward Christ, not away from him. Reactionary obscurantists wish no progress toward Christ, but desire to stop and camp where they are. "True progress includes the past" (Westcott). Jesus Christ is still ahead of us all calling us to come on to him.

2John 1:10
If any one cometh and bringeth not ( $\varepsilon \tau \iota \varsigma \varepsilon \rho \chi \varepsilon \tau \alpha \kappa \alpha$ ov $\varphi \varepsilon \rho \varepsilon$ ). Condition of first class with $\varepsilon$ and two present indicatives ( $\varepsilon \rho \chi \varepsilon \tau \alpha \iota, \varphi \varepsilon \rho \varepsilon$ ).

This teaching ( $\tau \alpha v \tau \eta \nu \tau \eta \nu \delta \iota \delta \alpha \chi \eta \nu$ ). This teaching of Christ of verse 9 , which is the standard by which to test Gnostic deceivers (verse 7). John does not refer to entertaining strangers (He 13:2; $1 \mathrm{Ti} 5: 10$ ), but to the deceiving propagandists who were carrying dissension and danger with them.

Receive him not ( $\mu \eta \lambda \alpha \mu \beta \alpha v \varepsilon \tau \varepsilon \alpha v \tau \sigma \nu$ ). Present active imperative with $\mu \eta$. For $\lambda \alpha \mu \beta \alpha v \omega$ in this sense see Joh 1:12; 6:21; 13:20 .

Into your house ( $\varepsilon \iota \varsigma$ оıкıav). Definite without the article like our at home, to town.
Give him no greeting ( $\chi \alpha \iota \rho \varepsilon \iota v \alpha v \tau \omega \mu \eta \lambda \varepsilon \gamma \varepsilon \tau \varepsilon$ ). "Say not farewell to him." Apparently $\chi \alpha \iota \rho \varepsilon ı \nu$ here (present active infinitive, object of $\lambda \varepsilon \gamma \varepsilon \tau \varepsilon$ present active imperative with negative $\mu \eta$ ) is used of farewell as in 2Co 13:11, though usually in the N.T. (Ac 15:23; 23:26; Jas 1:1 ) of the salutation. But here the point turns on the stranger bringing into the house (or trying to do so) his heretical and harmful teaching which seems to be after the salutation is over. The usual greeting to a house is given in Lu 10:5. On the other hand, if $\chi \alpha \iota \rho \varepsilon \iota v$ means greeting, not farewell, here, it can very well be understood of the peril of allowing these Gnostic propagandists to spread their pernicious teachings (cf. Mormons or Bolshevists) in home and church (usually meeting in the home). This is assuming that the men were known and not mere strangers.

2John 1:11
 instrumental case with кoıv $\omega v \varepsilon$ as in $1 \mathrm{Ti} 5: 22$, common verb from кoı $\omega \omega v \circ$ (partner). It is to be borne in mind that the churches often met in private homes (Ro 16:5; Col 4:15), and if these travelling deceivers were allowed to spread their doctrines in these homes and then sent on with endorsement as Apollos was from Ephesus to Corinth (Ac 18:27), there was no way of escaping responsibility for the harm wrought by these propagandists of evil. It is not a case of mere hospitality to strangers.

2John 1:12
I would not (ouk $\varepsilon \beta o v \lambda \eta \theta \eta v$ ). Epistolary aorist (first passive indicative).
With paper and ink ( $\delta \iota \alpha \chi \alpha \rho \tau о v \kappa \alpha \mu \varepsilon \lambda \alpha v o \varsigma)$. The $\chi \propto \rho \tau \eta \varsigma$ was a leaf of papyrus prepared for writing by cutting the pith into strips and pasting together, old word (Jer 43:23), here only in N.T. Me $\lambda$ aç is old adjective for black (Mt 5:36; Re 6:5,12) , and for black ink here, 3Jo 1:13; 2Co 3:3 . Apparently John wrote this little letter with his own hand.

To come ( $\gamma \varepsilon v \varepsilon \sigma \theta \alpha$ ). Second aorist middle infinitive of $\gamma เ v o \mu \alpha$ after $\varepsilon \lambda \pi \iota \zeta \omega$, I hope.
Face to face ( $\sigma \tau о \mu \alpha \pi \rho \circ \varsigma \sigma \tau о \mu \alpha)$. "Mouth to mouth." So in 3Jo 1:14; Nu 12:8 . "Face to face" ( $\pi \rho \circ \sigma \omega \pi \pi$ оv $\pi \rho \circ \varsigma \pi \rho о \sigma \omega \pi \sigma v)$ we have in 1Co 13:12 .

Your $(\nu \mu \omega v)$. Or "our" ( $\eta \mu \omega v$ ). Both true.
That may be fulfilled ( $\llcorner v a \pi \varepsilon \pi \lambda \eta \rho \omega \mu \varepsilon v \eta \eta)$. Purpose clause with $ı v \alpha$ and the periphrastic perfect passive subjunctive of $\pi \lambda \eta \rho o \omega$, as in 1Jo 1:4, which see.

2John 1:13
Of thine elect sister ( $\tau \eta \varsigma \alpha \delta \varepsilon \lambda \varphi \eta \varsigma \sigma o v \tau \eta \varsigma \varepsilon \kappa \lambda \varepsilon \kappa \tau \eta \varsigma$ ). Same word $\varepsilon \kappa \lambda \varepsilon \kappa \tau \eta$ as in verse 1; Re 17:4. Apparently children of a deceased sister of the lady of verse 1 who lived in Ephesus and whom John knew as members of his church there.

## THIRD JOHN

ABOUT A.D. 85 TO 90

## BY WAY OF INTRODUCTION

Certainly III John is addressed to an individual, not to a church, though which Gaius we do not know. There are three friends of Paul with this name; Gaius of Corinth (1Co 1:14 ), Gaius of Macedonia (Ac 19:29), Gaius of Derbe (Ac 20:4), but it is unlikely that this Gaius of Pergamum (Findlay would call him) is either of these, though the Apostolical Constitutions does identify him with Gaius of Derbe. It is possible that in 3Jo 1:9 there is an allusion to II John and, if so, then both letters went to individuals in the same church (one a loyal woman, the other a loyal man). Three persons are sharply sketched in III John (Gaius, Diotrephes, Demetrius). Gaius is the dependable layman in the church, Diotrephes the dominating official, Demetrius the kindly messenger from Ephesus with the letter, a vivid picture of early church life and missionary work. John is at Ephesus, the last of the apostles, and with an eagle's eye surveys the work in Asia Minor. The same Gnostic deceivers are at work as in the other Johannine Epistles. Pergamum is described in Re 2:13 as the place "where Satan's throne is."

## 3 John 1

## 3John 1:1

The beloved ( $\tau \omega \alpha \gamma \alpha \pi \eta \tau \omega$ ). Four times in this short letter this verbal adjective is used of Gaius (here, 2,5,11). See 2Jo 1:1 for the same phrase here, "whom I love in truth."

3John 1:2
I pray ( $\varepsilon \cup \chi \circ \mu \alpha)$. Here only in John's writings. See Ro 9:3.
In all things ( $\pi \varepsilon \rho \pi \alpha v \tau \omega v$ ). To be taken with $\varepsilon v o \delta o v \sigma \theta a$ and like $\pi \varepsilon \rho$ in 1Co 16:1, "concerning all things."

Thou mayest prosper ( $\sigma \varepsilon \varepsilon v o \delta o v \sigma \theta \alpha$ ). Infinitive in indirect discourse (object infinitive) after $\varepsilon u \chi \circ \mu \alpha$, with accusative of general reference $\sigma \varepsilon$ (as to thee). Evooow is old verb (from $\varepsilon v o \delta o \varsigma, \varepsilon v$ and o ooc, prosperous in a journey), to have a good journey, to prosper, in LXX, in N.T. only this verse (twice), 1Co 16:2; Ro 1:10 .

Be in health (vүLaıvev). In Paul this word always means sound teaching (1Ti 1:10; 6:3 ), but here and in Lu 5:31; 7:10; 15:27, of bodily health. Brooke wonders if Gaius' health had caused his friends anxiety.

Even as thy soul prospereth ( $\kappa \alpha \theta \omega \varsigma \varepsilon v o \delta o v \tau \alpha \sigma o \cup \eta \psi \cup \chi \eta$ ). A remarkable comparison which assumes the welfare (present middle indicative of $\varepsilon v o \delta o \omega$ ) of his soul ( $\psi v \chi \eta$ here as the principle of the higher life as in Joh 12:27, not of the natural life as in Mt 6:25 ).

3John 1:3
I rejoiced greatly ( $\varepsilon \chi \alpha \rho \eta \nu \lambda ı \alpha v$ ). As in 2Jo 1:4; Php 4:10, not epistolary aorist, but reference to his emotions at the good tidings about Gaius.

When brethren came ( $\varepsilon \rho \chi \rho \mu \varepsilon v \omega v \alpha \delta \varepsilon \lambda \varphi \omega v$ ). Genitive absolute with present middle participle of $\varepsilon \rho \chi \circ \mu \alpha$, and so with $\mu \alpha \rho \tau \cup \rho o u v \tau \omega v$ (bare witness, present active participle of $\mu \alpha \rho \tau v \rho \varepsilon \omega)$. Present participle here denotes repetition, from time to time.

To the truth ( $\tau \eta \alpha \lambda \eta \theta \varepsilon ı \alpha$ ). Dative case. "As always in the Johannine writings, 'truth' covers every sphere of life, moral, intellectual, spiritual" (Brooke).

Even as thou walkest in truth ( $\kappa \alpha \theta \omega \varsigma \sigma v \varepsilon v \alpha \lambda \eta \theta \varepsilon ⿺ \alpha \pi \varepsilon \rho \iota \pi \alpha \tau \varepsilon \iota \varsigma)$. "Thou" in contrast to Diotrephes (verse 9) and others like him. On $\pi \varepsilon \rho \iota \pi \alpha \tau \varepsilon \omega$ see 1Jo 1:6 and on $\varepsilon v \alpha \lambda \eta \theta \varepsilon ı \alpha$ see 2Jo 1:4.

3John 1:4
Greater ( $\mu \varepsilon \iota \zeta о \tau \varepsilon \rho \alpha v$ ). A double comparative with - $\tau \varepsilon \rho \circ \varsigma$ added to $\mu \varepsilon \iota \zeta \omega \nu$, like our "lesser" and like $\mu \alpha \lambda \lambda$ ov крєוббov (more better) in Php 1:23. In Eph 3:8 we have $\varepsilon \lambda \alpha \chi$ Ібтот $\varepsilon \rho \omega$, a comparative on a superlative. Like forms occur in the vernacular papyri and even in Homer ( $\chi \varepsilon \iota \rho о \tau \varepsilon \rho о \varsigma, ~ m o r e ~ w o r s e) ~ a s ~ a l s o ~ i n ~ S h a k e s p e a r e . ~$

Joy ( $\chi \alpha \rho \alpha v$ ). B reads $\chi \alpha \rho ı v$ (grace).
Than this ( $\tau 0 \cup \tau \omega v$ ). Ablative neuter plural after the comparative.

To hear of ( $\imath v \alpha \alpha \kappa о v \omega$ ). Object clause (epexegetic) with $t v \alpha$ and $\alpha \kappa \circ v \omega$, the present active subjunctive (keep on hearing of) in apposition with tov $\omega \omega v$,

Walking in truth ( $\varepsilon \nu \alpha \lambda \eta \theta \varepsilon ı \alpha ~ \pi \varepsilon \rho ı \pi \alpha \tau о u \nu \tau \alpha)$. As in 2Jo 1:4, which see. By the use of $\tau \varepsilon \kappa v \alpha$ John may mean that Gaius is one of his converts ( $1 \mathrm{Ti} 1: 1$ ).

3John 1:5
A faithful work ( $\pi$ (Iбтov). Either thus or "thou makest sure," after an example in Xenophon quoted by Wettstein ( $\pi$ oıءıv $\pi \iota \sigma \tau \alpha$ ) and parallel to kaıva $\pi$ oı $\varepsilon \omega$ in Re 21:5 . But it is not certain.

In whatsoever thou doest (o $\varepsilon \alpha v \varepsilon \rho \gamma \alpha \sigma \eta$ ). Indefinite relative with modal $\varepsilon \alpha v$ ( $=\alpha v$ ) and the first aorist middle subjunctive of $\varepsilon \rho \gamma \alpha \zeta \rho \mu \alpha$. See Col 3:23 for both $\pi о เ \varepsilon \omega$ and $\varepsilon \rho \gamma \alpha \zeta о \mu \alpha$ in the same sentence.

And strangers withal (ка тоито $\xi$ ₹vov¢). "And that too" (accusative of general reference as in 1Co 6:6; Php 1:28; Eph 2:8). This praise of hospitality (Ro 12:13; $1 \mathrm{Pe} 4: 9 ; 1 \mathrm{Ti} 3: 2 ; 5: 10$; Tit 1:8; Heb 13:2 ) shows that in 2Jo 1:10 John has a peculiar case in mind.

3John 1:6
 єкк $\lambda \eta \sigma$ т indicates, like $\varepsilon v \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$ in 1Co 14:19,35.

Thou wilt do well ( $\left.\kappa \alpha \lambda \omega \varsigma \pi о \_\sigma \sigma \iota \varsigma\right)$. Future active of $\pi \circ เ \varepsilon \omega$ with adverb $\kappa \alpha \lambda \omega \varsigma$, a common polite phrase in letters (papyri) like our "please." See also Ac 10:33; Jas 2:19; 1Co 7:37f.; Php 4:14; 2Pe 1:19.

To set forward on their journey ( $\pi \rho о \pi \varepsilon \mu \psi \alpha \varsigma)$. First aorist active participle (simultaneous action) of $\pi \rho о \pi \varepsilon \mu \pi \omega$, to send forward, "sending forward," old word, in N.T. in Ac 15:3; 20:38; 21:5; 1Co 16:6,11; 2Co 1:16; Ro 15:24; Tit 3:13.

Worthily of God ( $\alpha \xi \omega \varsigma$ cov $\theta$ sou). Precisely this phrase in 1Th 2:12 and the genitive with $\alpha \xi \iota \omega \varsigma$ also in Ro 16:2; Php 1:27; Col 1:10; Eph 4:1 . See Joh 13:20 for Christ's words on the subject. "Since they are God's representatives, treat them as you would God" (Holtzmann). From Homer's time (Od. XV. 74) it was customary to speed the parting guest, sometimes accompanying him, sometimes providing money and food. Rabbis were so escorted and Paul alludes to the same gracious custom in Ro 15:24; Tit 3:13.

3John 1:7
For the sake of the Name (v $\frac{1}{} \rho$ тоv ovoцатос). The name of Jesus. See Ac 5:4; Ro 1:5 for vォז $\rho$ tov ovouatoc and Jas 2:7 for the absolute use of "the name" as in 1Pe 4:16. "This name is in essence the sum of the Christian creed" (Westcott) as in 1Co 12:3; Ro 10:9 . It is like the absolute use of "the Way" (Ac 9:2; 19:9,23; 24:22 ).

Taking nothing ( $\mu \eta \delta \varepsilon \nu \lambda \alpha \mu \beta \alpha v o v \tau \varepsilon \varsigma)$. Present active participle with the usual negative with participles (1Jo 2:4).

Of the Gentiles ( $\alpha \pi 0 \tau \omega v \varepsilon \theta v ı \kappa \omega v$ ). Instead of the usual $\varepsilon \theta v \omega v(\operatorname{Lu} 2: 32$ ), late adjective for what is peculiar to a people ( $\varepsilon \theta v \circ \varsigma)$ and then for the people themselves (Polybius, Diod-
orus, not in LXX), in N.T. only here, Mt 5:47; 6:7; 18:17 . Like our heathen, pagan. John is anxious that Christian missionaries receive nothing from the heathen, as our missionaries have to watch against the charge of being after money. There were many travelling lecturers out for money. Paul in 1Co 9 defends the right of preachers to pay, but refuses himself to accept it from Corinth because it would be misunderstood (cf. 1Th 2:6ff.; 2Co 12:16ff. 12:16ff. ). Note $\alpha \pi$ o here as in collecting taxes (Mt 17:25 ) rather than $\pi \alpha \rho \alpha$, which may be suggestive.

3John 1:8
Ought (очєілонعv). See for this word 1Jo 2:6; 3:16; 4:11.
To welcome (v $\quad$ то $\alpha \mu \beta \alpha \vee \varepsilon เ v$ ). Present active infinitive (habit of welcoming) of vто $\lambda \alpha \beta \beta \nu \omega$, old word, to take up under, to carry off (Ac 1:9), to reply (Lu 10:30), to suppose (Ac 2:15), only here in N.T. in this sense of receiving hospitably or to take under one's protection like v $\pi \mathbf{o \delta \varepsilon \chi о \mu \alpha ( L u ~ 1 0 : 3 8 ) . ~}$

Such (tous tooovtouc). "The such" according to the Greek idiom (1Co 16:16,18).
That we may be ( $\iota v \alpha \gamma \imath \omega \omega \mu \varepsilon \theta)$ ). Purpose clause with $\mathfrak{v \alpha}$ and the present middle subjunctive of $\gamma \mathrm{ivo} \mathrm{\mu a}$, "that we may keep on becoming."

Fellow-workers ( $\sigma v v \varepsilon \rho \gamma 0$ ). Old compound ( $\sigma \cup v, \varepsilon \rho \gamma \circ v$ ).
With the truth ( $\tau \eta \alpha \lambda \eta \theta \varepsilon ı \alpha$ ). So associative instrumental case with $\sigma u v$ in $\sigma u v \varepsilon \rho \gamma o$, but it is not certain that this is the idea, though ouvep $\varepsilon$ e $\omega$ is so used with $\varepsilon \rho \gamma o$, in Jas 2:22. इuveppoc itself occurs with the genitive of the person as in $\theta \varepsilon o v$ ovvep $\gamma$ ( 1 Co 3:9) or with genitive of the thing $\tau \eta \varsigma \chi \alpha \rho a \varsigma(1 C o 3: 9)$. So then here the meaning may be either "coworkers with such brethren for the truth" (dative of advantage) or "co-workers with the truth" (associative instrumental case).

3John 1:9
I wrote somewhat unto the church ( $\varepsilon \gamma \rho \alpha \psi \alpha \tau \tau \eta \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha)$. A few MSS. add $\alpha v$ to indicate that he had not written (conclusion of second-class condition), clearly spurious. Not epistolary aorist nor a reference to II John as Findlay holds, but an allusion to a brief letter of commendation (Ac 18:27; 2Co 3:1; Col 4:10) sent along with the brethren in verses 5-7 or to some other itinerant brethren. Westcott wrongly thinks that $\tau$ is never used of anything important in the N.T. (Ac 8:9; Ga 6:3), and hence that this lost letter was unimportant. It may have been brief and a mere introduction. $\Delta \iota o \tau \rho \varepsilon \varphi \varepsilon \varsigma$ ( $\Delta \iota \circ \varsigma$ and $\tau \rho \varepsilon \varphi \omega$, nourished by Zeus). This ambitious leader and sympathiser with the Gnostics would probably prevent the letter referred to being read to the church, whether it was II John condemning the Gnostics or another letter commending Demetrius and John's missionaries. Hence he sends Gaius this personal letter warning against Diotrephes.

Who loveth to have the preeminence among them (o $\varphi \lambda<\pi \rho \omega \tau \varepsilon v \omega \nu \alpha \nu \tau \omega v$ ). Present active articular participle of a late verb, so far found only here and in ecclesiastical writers (the example cited by Blass being an error, Deissmann, Light etc., p. 76), from $\varphi \downarrow \lambda о \pi \rho \omega \tau \sigma$, fond of being first (Plutarch), and made like $\varphi \backslash \lambda о \pi о v \varepsilon \omega$ (papyri), to be fond of toil. This
ambition of Diotrephes does not prove that he was a bishop over elders, as was true in the second century (as Ignatius shows). He may have been an elder (bishop) or deacon, but clearly desired to rule the whole church. Some forty years ago I wrote an article on Diotrephes for a denominational paper. The editor told me that twenty-five deacons stopped the paper to show their resentment against being personally attacked in the paper.

Receiveth us not (ovк $\varepsilon \pi \iota \delta \varepsilon \chi \varepsilon \tau \alpha \eta \mu \alpha \varsigma)$. Present active indicative of this old compound, in N.T. only here and verse 10. Diotrephes refused to accept John's authority or those who sided with him, John's missionaries or delegates (cf. Mt 10:40).

3John 1:10
If I come $(\varepsilon \alpha \nu \varepsilon \lambda \theta \omega)$. Condition of third class with $\varepsilon \alpha \nu$ and second aorist active subjunctive of $\varepsilon \rho \chi \circ \mu \alpha$. He hopes to come (verse 14), as he had said in 2Jo 1:12 (one argument for identifying II John with the letter in 3Jo 1:9).

I will bring to remembrance $(v \pi о \mu \nu \eta \sigma \omega)$. Future active indicative of $v \pi о \mu \mu \nu \eta \sigma \kappa \omega$, old compound (Joh 14:26; 2Pe 1:12 ). The aged apostle is not afraid of Diotrephes and here defies him.

Which he doeth ( $\alpha \pi \sigma เ \varepsilon$ ). Present active indicative, "which he keeps on doing."
Prating against us ( $\varphi \lambda \nu \alpha \rho \omega \nu \eta \mu \alpha \varsigma)$. Present active participle of old verb (from $\varphi \lambda \nu \alpha \rho \circ \varsigma$, babbling $1 \mathrm{Ti} 5: 13$ ), to accuse idly and so falsely, here only in N.T. with accusative $\eta \mu a \varsigma$ (us).

With wicked words ( $\lambda$ оүоıя $\pi о \nu \eta \rho \circ \iota \varsigma)$. Instrumental case. Not simply foolish chatter, but malevolent words.

Not content ( $\mu \eta \alpha \rho \kappa о \cup \mu \varepsilon \nu о \varsigma)$. Present passive participle of $\alpha \rho \kappa \varepsilon \omega$ with usual negative $\mu \eta$. For this verb in this sense see $1 \mathrm{Ti} 6: 8$; Heb 13:5, only there $\varepsilon \pi$ is absent. John knows that the conduct of Diotrephes will not stand the light. See Paul's threats of exposure (1Co 4:21; 2Co 10:11; 13:1-3 ). And John is the apostle of love all the same.

He himself (avtoc). That was bad enough.
 from John.

He forbiddeth $(\kappa \omega \lambda \nu \varepsilon)$. "He hinders." Present active indicative of $\kappa \omega \lambda \nu \omega$ and means either actual success in one case (punctiliar use of the present indicative) or repetition in several instances (linear action) or conative action attempted, but not successful as in Mt 3:14 (this same verb) and Joh 10:32 .

Casteth them out of the church ( $\varepsilon \kappa \tau \eta \varsigma \varepsilon \kappa \kappa \lambda \eta \sigma \iota \propto \varepsilon \kappa \beta \alpha \lambda \lambda \varepsilon$ ). Here again $\varepsilon \kappa \beta \alpha \lambda \lambda \varepsilon$ can be understood in various ways, like $\kappa \omega \lambda v \varepsilon$. This verb occurs in Joh 2:15 for casting out of the temple the profaners of it and for casting the blind man out of the synagogue (Joh 9:34f. ). If this ancient "church-boss" did not succeed in expelling John's adherents from the church, he certainly tried to do it.

3John 1:11

Imitate not $(\mu \eta \mu \mu \circ v)$. Present middle imperative in prohibition (do not have the habit of imitating) of $\mu \mu \varepsilon \sigma \mu \alpha$ (from $\mu \mu \circ \varsigma$, actor, mimic), old word, in N.T. only here, 2Th 3:7,9; Heb 13:7.

That which is evil ( $\tau \mathbf{\kappa \alpha \kappa о v ) . ~ " T h e ~ b a d , " ~ a s ~ i n ~ R o ~ 1 2 : 2 1 ~ ( n e u t e r ~ s i n g u l a r ~ a b s t r a c t ) . ~}$
But that which is good ( $\alpha \lambda \lambda \alpha$ тo $\alpha \gamma \alpha \theta o v$ ). "But the good." As in Ro 12:21 again. Probably by the contrast between Diotrephes and Demetrius.
 late and rare verb, in contrast with o какотоь $\omega v$ (old and common verb) as in Mr 3:4; Lu 6:9; 1Pe 3:17.

Is of God ( $\varepsilon \kappa$ tov $\theta \varepsilon o v \varepsilon \sigma \tau \iota v$ ). As in 1Jo 3:9f .
Hath not seen God (ouर $\varepsilon \omega \rho$ акєv $\operatorname{tov} \theta \varepsilon o v$ ). As in 1Jo 3:6. He does not say $\varepsilon \kappa$ tov $\delta ı \alpha \beta$ o $o$ ou as Jesus does in Joh 8:44, but he means it.

3John 1:12
Demetrius hath the witness of all men ( $\Delta \eta \mu \eta \tau \rho \omega \mu \varepsilon \mu \alpha \rho \tau v \rho \eta \tau \alpha \cup \pi \sigma \quad \pi \alpha \nu \tau \omega v)$. Perfect passive indicative of $\mu \alpha \rho \tau \cup \rho \varepsilon \omega$, "it has been witnessed to Demetrius (dative case) by all." We know nothing else about him, unless, as is unlikely, he be identified with Demas as a shortened form (Phm 1:24; Col 4:4; 2Ti 4:10), who has come back after his desertion or with the Ephesian silversmith (Ac 19:21ff. ), who may have been converted under John's ministry, which one would like to believe, though there is no evidence for it. He may indeed be the bearer of this letter from Ephesus to Gaius and may also have come under suspicion for some reason and hence John's warm commendation.

And of the truth itself ( $\kappa \alpha \cup \pi о \alpha \cup \tau \eta \varsigma \tau \eta \varsigma \alpha \lambda \eta \theta \varepsilon ו \alpha \varsigma)$. A second commendation of Demetrius. It is possible, in view of 1Jo 5:6 (the Spirit is the truth), that John means the Holy Spirit and not a mere personification of the truth.

Yea we also (ка $\eta \mu \varepsilon ı \varsigma \delta$ ). A third witness to Demetrius, that is John himself (literary plural).

Thou knowest (ot $\delta \alpha$ ). "The words in Joh 21:24 sound like an echo of this sentence" (Westcott). John knew Demetrius well in Ephesus.

3John 1:13
I had ( $\varepsilon \not \chi \circ v$ ). Imperfect active of $\varepsilon \chi \omega$, when I began to write ( $\gamma \rho \alpha \psi \alpha$, ingressive aorist active infinitive of $\gamma \rho \alpha \varphi \omega)$.

I am unwilling to write (ov $\theta \varepsilon \lambda \omega \gamma \rho \alpha \varphi \varepsilon เ v$ ). "I do not wish to go on writing them.
With ink and pen ( $\delta ı \alpha \mu \varepsilon \lambda \alpha v o \varsigma \kappa \alpha \kappa \alpha \lambda \alpha \mu о v)$, "by means of ( $\delta \iota \alpha$ ) black (ink) and reed (used as pen)." See 2Jo 1:12 for $\mu \varepsilon \lambda \alpha v o \varsigma$ and Mt 11:7 for ка入а $\mu$ с, used for papyrus and parchment, as $\gamma \rho \alpha \varphi \varepsilon$ sov (a sharp stilus) for wax tablets.

3John 1:14
I hope ( $\varepsilon \lambda \pi \iota \zeta \omega)$
--We shall speak ( $\lambda \alpha \lambda \eta \sigma о \mu \varepsilon v)$. Literary plural really singular like $\varepsilon \lambda \pi \iota \zeta \omega$.

Face to face $(\sigma \tau \sigma \mu \alpha \pi \rho o \varsigma \sigma \tau o \mu \alpha)$. As in 2Jo 1:12.
Peace to thee ( $\varepsilon \iota \rho \eta \vee \eta \sigma 0$ ). Pax tibi like the Jewish greeting shalom (Lu 10:5; 24:36; Joh 20:19,21).

The friends ( $o \varphi t \lambda_{0}$ ). Those in Ephesus.
By name ( $\kappa \alpha \tau^{\prime}$ ovo $\mu \alpha$ ). John knew the friends in the church (at Pergamum or wherever it was) as the good shepherd calls his sheep by name (Joh 10:3, the only other N.T. example of $\kappa \alpha \tau^{\prime}$ ovo $\mu \alpha$ ). The idiom is common in the papyri letters (Deissmann, Light, etc., p. 193, note 21 ).

## THE EPISTLE OF JUDE

ABOUT A.D. 65 TO 67

## BY WAY OF INTRODUCTION

THE AUTHOR
He calls himself Judas, but this was a very common name. In the N.T. itself we have Judas Iscariot and Judas not Iscariot (Joh 14:22 ; also called Judas of James, son or brother, Lu 6:6 ), Judas a brother of our Lord (Mt 13:55 ), Judas of Galilee (Ac 5:37 ), Judas of Damascus (Ac 9:11), Judas Barsabbas (Ac 15:22 ). The author explains that he is a "slave" of Jesus Christ as James did (Jude 1:1 ), and adds that he is also a brother of James. Clement of Alexandria thinks that, like James, he deprecated being called the brother of the Lord Jesus (as by Hegesippus later) as claiming too much authority. Keil identifies him with Jude the Apostle (not Iscariot), but that is most unlikely. The Epistle is one of the disputed books of Eusebius. It was recognized in the canon in the Third Council of Carthage (A.D. 397). It appears in the Muratorian Canon (A.D. 170).

## THE RELATION TO II PETER

Beyond a doubt one of these Epistles was used by the other, as one can see by comparing particularly Jude 1:3-18 and 2Pe 2:1-18. As already said concerning II Peter, scholars are greatly divided on this point, and in our present state of knowledge it does not seem possible to reach a solid conclusion. The probability is that not much time elapsed between them. Mayor devotes a whole chapter to the discussion of the relation between II Peter and Jude and reaches the conclusion "that in Jude we have the first thought, in Peter the second thought." That is my own feeling, but it is all so subjective that I have no desire to urge the point unduly. Bigg is equally positive that II Peter comes before Jude.

## THE USE OF APOCRYPHAL BOOKS

Jude (verse Jude 1:14 ) quotes from "Enoch" by name and says that he "prophesied." What he quotes is a combination of various passages in the Book of Enoch as we have it now. It used to be held that part of Enoch was later than Jude, but Charles seems to have disproved that, though the book as we have it has many interpolations. Tertullian wanted to canonise Enoch because of what Jude says, whereas Chrysostom says that the authenticity of Jude was doubted because of the use of Enoch. In verse Jude 1:9 there seems to be an allusion to the Assumption of Moses, another apocryphal book, but it is the use of "prophesied" in verse Jude 1:14 about Enoch that gave most offence. It is possible, of course, that Jude did not attach the full sense to that term.

THE STYLE
It is terse and picturesque, with a fondness for triplets. The use of the O.T. is very much like that in II Peter. Alford notes that it is impassioned invective with epithet on epithet, image on image. Bigg remarks on the stern and unbending nature of the author, with no
pathos and a harsh view of things and with frequent use of Pauline phraseology. There are some fifteen words not in the rest of the N.T. The grammar is less irregular than that of II Peter. There is often a poetic ring in his words.

## THE PURPOSE

The author undoubtedly has the Gnostics in mind and is seeking to warn his readers against them, as is true of II Peter. This same purpose appears in the Johannine Epistles, as was true also of Colossians, Ephesians, the Pastoral Epistles.

THE READERS
Of this we know nothing at all. Dr. Chase believes that the Epistle was sent to Antioch in Syria. That may be true, though it is mere conjecture. Any place or places in Asia Minor would suit so far as we know. The readers were probably both Jewish and Gentile Christians. Jerusalem and Alexandria are urged as the place of composition, but of that we have no real information.

THE DATE
This really turns on the genuineness of the Epistle. There is no clear indication of the date, for the Gnostics described can belong to the first or to the second century. If it was used by II Peter, that would place it slightly before that Epistle. The date suggested, 65 to 67 A.D., is purely conjectural.

SPECIAL BOOKS ON JUDE
(Apart from those on II Peter or the Catholic Epistles) Chase, F. H., Jude in Hastings D B (1899). Ermoni, V., L'epitre de Jude (1903, in Vigoroux, Diction- naire de la Bible). Georchin, B., Der Brief Judas (1901). Kasteren, J. P., De brief uan den apostel Judas (1916). Maier, F., Der Judasbrief (1906). Mayor, J. B., The Epistle of Jude (in Expositor's Greek Testament, 1910). Plummer, A., St. James and St. Jude (Expositor's Bible). Rampf, M. F., Der Brief Juda (1854). Stier, R., Der Brief Judas, des Bruders des Herrn (1850). Wandel, G., Der Brief des Judas (1898).

## Jude 1

Jude 1:1
Servant ( $\delta o \cup \lambda o \varsigma) . ~ P r e c i s e l y ~ a s ~ J a m e s ~(J a s ~ 1: 1), ~ o n l y ~ J a m e s ~ a d d e d ~ к и \rho ı o v ~(L o r d) . ~ . ~$
Brother of James ( $\alpha \delta \varepsilon \lambda \varphi$ оऽ Iaк $\omega \beta$ ov). Thus Jude identifies himself. But not the "Judas of James" (Lu 6:16; Ac 1:13).

To them that are called ( $\tau 0 เ \sigma--\kappa \lambda \eta \tau о \iota \varsigma)$. But this translation (treating $\kappa \lambda \eta \tau \circ \iota \varsigma$ as a substantive like Ro 1:6; 1Co 1:24 ) is by no means certain as two participles come in between
 But see 1Pe 1:1.

Beloved in God the Father ( $\varepsilon \nu \theta \varepsilon \omega \pi \alpha \tau \rho \eta \gamma \alpha \pi \eta \mu \varepsilon v o \iota)$ ). Perfect passive participle of $\alpha \gamma a \pi \alpha \omega$, but no precise parallel to this use of $\varepsilon v$ with $\alpha \gamma a \pi \alpha \omega$.

Kept for Jesus Christ (I $\eta \sigma o v$ X $\rho \iota \sigma \tau \omega \tau \varepsilon \tau \eta \rho \eta \mu \varepsilon \nu o \iota \varsigma)$. Perfect passive participle again with dative, unless it is the instrumental, "kept by Jesus Christ," a quite possible interpretation.

Jude 1:2
Be multiplied ( $\pi \lambda \eta \theta v v \theta \varepsilon ı \eta$ ). First aorist passive optative of $\pi \lambda \eta \theta v \nu \omega$ as in 1Pe 1:2; 2 Pe 1:2.

Jude 1:3
Beloved ( $\alpha \gamma \alpha \pi \eta \tau 0$ ). As in 3Jo 1:2.
All diligence ( $\pi \alpha \sigma \alpha v \sigma \pi o v \delta \eta v$ ). As in 2Pe 1:5.
Of our common salvation ( $\pi \varepsilon \rho \tau \eta \varsigma \kappa о \iota \nu \eta \varsigma \eta \mu \omega \nu \sigma \omega \tau \eta \rho \iota \alpha \varsigma)$. See this use of коוvoৎ (common to all) in Tit $1: 4$ with $\pi \iota \sigma \tau \iota \varsigma$, while in $2 \mathrm{Pe} 1: 1$ we have $\sigma \sigma \sigma \tau \mu \circ v \pi \iota \sigma \tau \iota v$, which see.

I was constrained ( $\alpha v \alpha \gamma \kappa \eta v \varepsilon \sigma \chi \circ v$ ). "I had necessity" like Lu 14:18; Heb 7:27.
To contend earnestly ( $\varepsilon \pi \alpha \gamma \omega v \iota \zeta \sigma \theta \alpha$ ). Late and rare (in Plutarch, inscriptions) compound, here only in N.T. A little additional $(\varepsilon \pi)$ striving to the already strong $\alpha \gamma \omega v \iota \zeta \varepsilon \sigma \theta \alpha$ ( $\alpha \gamma \omega \nu$ contest). Cf. 1Ti 6:12 $\alpha \gamma \omega v \iota$ ои $\tau о \nu \kappa \alpha \lambda о \nu \alpha \gamma \omega \nu \alpha$.

For the faith ( $\tau \eta l--\pi \iota \sigma \tau \varepsilon$ ). Dative of advantage. Here not in the original sense of trust, but rather of the thing believed as in verse 20; Ga 1:23; 3:23; Php 1:27.

Once for all delivered ( $\alpha \pi \alpha \xi \pi \alpha \rho \alpha \delta o \theta \varepsilon \iota \sigma \eta$ ). First aorist passive participle feminine dative singular of $\pi \alpha \rho \alpha \delta \iota \delta \omega \mu$, for which see $2 \mathrm{Pe} 2: 21$. See also $2 \mathrm{Th} 2: 15$; 1 Co 11:2; 1Ti 6:20

Jude 1:4
Are crept in ( $\pi \alpha \rho \varepsilon \iota \sigma \varepsilon \delta v \eta \sigma \alpha v)$. Second aorist passive indicative of $\pi \alpha \rho \varepsilon \iota \sigma \delta v \omega(-v \omega)$, late (Hippocrates, Plutarch, etc.) compound of $\pi \alpha \rho \alpha$ (beside) and $\varepsilon \iota \varsigma$ (in) and $\delta v \omega$ to sink or plunge, so to slip in secretly as if by a side door, here only in N.T.

Set forth ( $\pi \rho \sigma \gamma \varepsilon \gamma \rho \alpha \mu \mu \varepsilon \nu o$ ). Perfect passive participle of $\pi \rho \sigma \gamma \rho \alpha \varphi \omega$, to write of beforehand, for which verb see Ga 3:1; Ro 15:4 .

Unto this condemnation ( $\varepsilon \iota \varsigma ~ \tau о \cup \tau о ~ \tau о ~ к \rho \iota \mu \alpha)$. See 2Pe 2:3 for $\kappa \rho \iota \mu \alpha$ and $\varepsilon \kappa \pi \alpha \lambda \alpha$. Па入а here apparently alludes to verses 14,15 (Enoch).

Ungodly men ( $\alpha \sigma \varepsilon \beta \varepsilon \iota \varsigma$ ). Keynote of the Epistle (Mayor), in 15 again as in 2Pe 2:5; 3:7

Turning ( $\mu \varepsilon \tau \alpha \tau \iota \theta \varepsilon \nu \tau \varepsilon \varsigma)$. Present active participle of $\mu \varepsilon \tau \alpha \tau \iota \theta \eta \mu$, to change, for which verb see Ga 1:6. For the change of "grace" ( $\chi \alpha \rho \iota \tau \alpha)$ into "lasciviousness ( $\varepsilon เ \varsigma ~ \alpha \sigma \varepsilon \lambda \gamma \varepsilon \iota \alpha v)$ see 1Pe 2:16; 4:3; 2Pe 2:19; 3:16.

Our only Master and Lord ( $\tau \circ \nu \mu \circ v o v \delta \varepsilon \sigma \pi о \tau \eta \nu \kappa \alpha \kappa \nu \rho \circ v \eta \mu \omega v$ ). For the force of the one article for one person see on $2 \mathrm{Pe} 1: 1$. For $\delta \varepsilon \sigma \pi \mathrm{o} \tau \eta \nu$ of Christ see $2 \mathrm{Pe} 2: 1$.

Denying ( $\alpha \rho v o u \mu \varepsilon v o$ ). So 2Pe 2:1. See also Mt 10:33; 1Ti 5:8; Tit 1:16; 1Jo 2:22 .
Jude 1:5
To put you in remembrance $(v \pi о \mu \nu \eta \sigma \alpha)$. See $2 \mathrm{Pe} 1: 12 v \pi о \mu \mu \nu \eta \sigma \kappa \varepsilon \iota \nu$ (present active infinitive there, first aorist active infinitive here).

Though ye know all things once for all ( $\varepsilon$ I $\delta o \tau \alpha \varsigma ~ a \pi \alpha \xi \pi \alpha \nu \tau \alpha)$. Concessive perfect (sense of present) active participle as in $2 \operatorname{Pe} 1: 12$, but without каı $\kappa \varepsilon \rho$.

The Lord (кирья). Some MSS. add Inбоия. The use of кирьо here is usually understood to mean the Lord Jesus Christ, as Clement of Alex. (Adumbr. p. 133) explains, Ex 23:20, by
 Christ see 1Co 10:4,9; Heb 11:26. Some MSS. here add $\theta \varepsilon$ os instead of Iqoous.

Afterward ( $\tau 0 \delta \varepsilon v \tau \varepsilon \rho \circ v$ ). Adverbial accusative, "the second time." After having saved the people out of Egypt.

Destroyed ( $\alpha \pi \omega \lambda \varepsilon \sigma \varepsilon \nu$ ). First aorist active indicative of $\alpha \pi o \lambda \lambda \nu \mu$, old verb, to destroy.
Them that believed not ( $\tau 0 v \varsigma \mu \eta \pi \iota \sigma \tau \varepsilon v \sigma \alpha v \tau \alpha \varsigma)$. First aorist active articular participle of $\pi \iota \sigma \tau \varepsilon v \omega$. The reference is to Nu 14:27-37, when all the people rescued from Egypt perished except Caleb and Joshua. This first example by Jude is not in II Peter, but is discussed in 1Co 10:5-11; Heb 3:18-4:2 .

Jude 1:6
And angels ( $\alpha \gamma \gamma \varepsilon \lambda$ ouc $\delta \varepsilon$ ). The second example in Jude, the fallen angels, accusative case after $\tau \varepsilon \tau \eta \rho \eta \kappa \varepsilon \nu$ (perfect active indicative of $\tau \eta \rho \varepsilon \omega$, for which verb see $2 \mathrm{Pe} 2: 4,7$ ) at the end of the verse (two emphatic positions, beginning and end of the clause).

Kept not ( $\mu \eta \tau \eta \rho \eta \sigma \alpha v \tau \alpha \varsigma)$. First aorist active participle with negative $\mu \eta$, with play on "kept not" and "he hath kept."

Principality ( $\alpha \rho \chi \eta \nu$ ). Literally, "beginning," "rule," (first place of power as in 1Co 15:24; Ro 8:38). In Ac 10:11 it is used for "corners" (beginnings) of the sheet. In Eph 6:12 the word is used for evil angels. See De 32:8. Both Enoch and Philo (and Milton) discuss the fallen angels.

But left ( $\alpha \lambda \lambda \alpha \alpha \pi о \lambda ı \pi о \nu \tau \alpha \varsigma)$. Second aorist active participle of $\alpha \pi \sigma \lambda \varepsilon \imath \pi \omega$, old verb, to leave behind (2Ti 4:13,20).

Their own proper habitation（тo וסเov oıк $\tau \eta \rho ⿺ 𠃊 乛)$ ）．Old word for dwelling－place（from окл $\tau \eta \rho$ ，dweller at home，from оккоৎ），in N．T．only here and 2Co 5：2（the body as the abode of the spirit）．

In everlasting bonds（ $\delta \varepsilon \sigma \mu \circ \iota \varsigma ~ a ı \delta ı o ı \varsigma) . ~ E i t h e r ~ l o c a t i v e ~(i n) ~ o r ~ i n s t r u m e n t a l ~(b y, ~ w i t h) . ~$ Aı $\delta$ ıoc（from $\alpha \varepsilon$ ，always），old adjective，in N．T．only here and Ro 1：20（of God＇s power and deity）．It is synonymous with aı $\omega v$ loc（Mt 25：46 ）．Mayor terms aıסıoc an Aristotelian word， while aı $\omega$ voos is Platonic．

Under darkness（vто 弓очоv）．See 2Pe 2：4 for ऍочос．In Wisd．17：2 we find $\delta \varepsilon \sigma \mu ь$ бкотоия（prisoners of darkness）．

Great（ $\mu \varepsilon \gamma \alpha \lambda \eta \varsigma$ ）．Not in 2Pe 2：9，which see for discussion．
Jude 1：7
Even as $(\omega \varsigma)$ ．Just＂as．＂The third instance（Jude passes by the deluge）in Jude，the cities of the plain．

The cities about them（ $\alpha \pi \varepsilon \rho \alpha \cup \tau \alpha \varsigma \pi о \lambda \varepsilon เ \varsigma)$ ．These were also included，Admah and Zeboiim（De 29：23；Ho 11：8）．Zoar，the other city，was spared．

Having given themselves over to fornication（ $\varepsilon к \pi о \rho v \varepsilon v \sigma \alpha \sigma \alpha)$ ．First aorist active par－ ticiple feminine plural of $\varepsilon \kappa \pi о \rho v \varepsilon \nu \omega$ ，late and rare compound（perfective use of $\varepsilon \kappa$ ，outside the moral law），only here in N．T．，but in LXX（Ge 38：24；Ex 34：15f．，etc．）．Cf．$\alpha \sigma \varepsilon \lambda \gamma \varepsilon ı \sigma v$ in verse 4.

Strange flesh（баркоऽ єтєра¢）．Horrible licentiousness，not simply with women not their wives or in other nations，but even unnatural uses（Ro 1：27）for which the very word ＂sodomy＂is used（Ge 19：4－11）．The pronoun etepac（other，strange）is not in 2Pe 2：10 ．

Are set forth（ $\pi \rho \circ \kappa \varepsilon เ \nu \tau \alpha$ ）．Present middle indicative of $\pi \rho о \kappa \varepsilon เ \mu \alpha$ ，old verb，to lie before， as in Heb 12：1f．

As an example $(\delta \varepsilon ı \gamma \mu \alpha)$ ．Predicate nominative of $\delta \varepsilon ı \gamma \mu \alpha$ ，old word（from $\delta \varepsilon ı \kappa v v \mu$ to show），here only in N．T．，sample，specimen．2Pe 2：6 has vтобгı $\gamma \mu \alpha$（pattern）．

Suffering（v $\tau \varepsilon \chi \circ \vee \sigma \alpha)$ ．Present active participle of $\cup \pi \varepsilon \chi \omega$ ，old compound，to hold under， often with $\delta_{\text {ıк }} \nu$（right，justice，sentence 2Th 1：9 ）to suffer sentence（punishment），here only in N．T．
 5：22 ）and also Mt 25：46．Jude has no mention of Lot．

Jude 1：8
Yet（ $\mu \varepsilon v \tau 0$ ）．See Joh 4：27．In spite of these warnings．
In like manner（ $о \mu \circ \omega \varsigma$ ）．Like the cities of the plain．
These also（ка оито）．The false teachers of verse 4.

In their dreamings ( $\varepsilon v v \pi \nu \iota \alpha \zeta o \mu \varepsilon v o$ ). Present middle participle of $\varepsilon v v \pi \nu \iota \alpha \zeta \omega$, to dream (from $\varepsilon v v \pi \nu$ ov dream, Ac $2: 17$, from $\varepsilon v$ and $v \pi \nu o \varsigma$, in sleep), in Aristotle, Hippocrates, Plutarch, papyri, LXX (Joe 2:28 ), here only in N.T. Cf. Col 2:18 .

Defile ( $\mu \iota \alpha \iota v o v \sigma \iota v$ ). Present active indicative of $\mu \imath v a \iota v \omega$, old verb, to stain, with $\sin$ (Tit 1:15 ) as here. 2Pe 2:10 has $\mu \mathrm{L} \alpha \operatorname{lov}^{2}$.

Set at nought ( $\alpha \theta \varepsilon \tau \sigma v \sigma \iota v$ ). Present active indicative of $\alpha \theta \varepsilon \tau \varepsilon \omega$, to annul. Both $\kappa v \rho \iota \tau \tau\rceil$ (dominion) and $\delta \mathrm{o} \xi \alpha$ (dignities) occur in 2Pe 2:10, which see for discussion.

Jude 1:9
Michael the archangel (o Mı $\alpha \propto \lambda$ o $\alpha \rho \chi \alpha \gamma \gamma \varepsilon \lambda о \varsigma$ ). Michael is mentioned also in Da 10:13,21; 12:1; Re 12:7. A $\chi^{2} \alpha \gamma \varepsilon \lambda$ os in N.T. occurs only here and 1Th 4:16, but in Da 10:13,20; 12:1 .
 $\delta ı \alpha \kappa \rho \iota \nu \omega$, to separate, to strive with as in Ac 11:2 . Dative case $\delta ı \alpha \beta 0 \lambda \omega$.

When he disputed (o ot $\delta \iota \varepsilon \lambda \varepsilon \gamma \varepsilon \tau о$ ). Imperfect middle of $\delta \iota \alpha \lambda \varepsilon \gamma \circ \mu \alpha$ as in $\operatorname{Mr} 9: 34$.
Concerning the body of Moses ( $\pi \varepsilon \rho$ $\tau 0 v \mathrm{M} \omega v \sigma \varepsilon \omega \varsigma \sigma \omega \mu \alpha \tau \circ \varsigma$ ). Some refer this to Zec 3:1, others to a rabbinical comment on De 34:6. There is a similar reference to traditions in Ac 7:22; Ga 3:19; Heb 2:2; $2 \mathrm{Ti} 3: 8$. But this explanation hardly meets the facts.

Durst not bring (ovк $\varepsilon \tau о \lambda \mu \eta \sigma \varepsilon v \varepsilon \pi \varepsilon \nu \varepsilon \gamma \kappa \varepsilon เ v$ ). "Did not dare (first aorist active indicative of $\tau 0 \lambda \mu \alpha \omega$ ), to bring against him" (second aorist active infinitive of $\varepsilon \pi \iota \varphi \varepsilon \rho \omega$ ).

A railing accusation ( $\kappa \rho \iota \sigma \iota \nu \lambda \alpha \sigma \varphi \eta \mu \iota \varsigma)$. "Charge of blasphemy" where $2 \mathrm{Pe} 2: 11$ has " $\beta \lambda \alpha \sigma \varphi \eta \mu о \nu \kappa \rho \iota \sigma \iota v . "$ Peter also has $\pi \alpha \rho \alpha к \nu \rho ı \omega$ (with the Lord), not in Jude.

The Lord rebuke thee ( $\varepsilon \pi \iota \tau \iota \mu \eta \sigma \alpha \sigma 0$ кטрıоৎ). First aorist active optative of $\varepsilon \pi \iota \tau \iota \mu \omega$, a wish about the future. These words occur in Zec 3:1-10 where the angel of the Lord replies to the charges of Satan. Clement of Alex. (Adumb. in Ep. Judae) says that Jude quoted here the Assumption of Moses, one of the apocryphal books. Origen says the same thing. Mayor thinks that the author of the Assumption of Moses took these words from Zechariah and put them in the mouth of the Archangel Michael. There is a Latin version of the Assumption. Some date it as early as B.C. 2, others after A.D. 44.

Jude 1:10
Whatsoever things they know not (oбa ouk oı $\delta \alpha \sigma \iota v$ ). Here 2Pe 2:12 has $\varepsilon v$ oıs a $\gamma$ voovoıv. The rest of the sentence is smoother than $2 \mathrm{Pe} 2: 12$.

Naturally ( $\varphi v \sigma \iota \kappa \omega \varsigma)$. Here only in N.T. 2Pe 2:12 has $\gamma \varepsilon \gamma \varepsilon \nu \nu \eta \mu \varepsilon v \alpha$ рvбıка. Jude has the article $\tau \alpha$ with $\alpha \lambda o \gamma \alpha \zeta \omega \alpha$ and the present passive $\varphi \theta \varepsilon \iota \rho o v \tau \alpha$ instead of the future passive $\varphi \theta \alpha \rho \eta \sigma o v \tau \alpha$.

Jude 1:11
Woe to them (ova avtors). Interjection with the dative as is common in the Gospels (Mt 11:21).

Went ( $\varepsilon \pi о \rho \varepsilon v \theta \eta \sigma \alpha v$ ). First aorist passive (deponent) indicative of $\pi о \rho \varepsilon v o \mu \alpha$.

In the way of Cain ( $\tau \eta \circ \delta \omega \tau o v K \alpha ı$ ). Locative case $o \delta \omega$. Cain is Jude's fourth example. Not in II Peter, but in Heb 11:4; 1Jo 3:11f . From Ge 4:7.

Ran riotously ( $\varepsilon \xi \varepsilon \chi \cup \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\varepsilon \kappa \chi \varepsilon \omega$, to pour out, "they were poured out," vigorous metaphor for excessive indulgence. But it is used also of God's love for us (Ro 5:5 ).

In the error of Balaam ( $\tau \eta \pi \lambda \alpha \nu \eta \tau o v B \alpha \lambda \alpha \alpha \mu$ ). The fifth example in Jude. In II Peter also (2Pe 2:15 ). Either locative case (in) or instrumental (by). П $\lambda \alpha \nu \eta$ (in Peter also) is the common word for such wandering (Mt 24:4ff., etc.).

Perished ( $\alpha \pi \omega \lambda o v \tau o$ ). Second aorist middle (intransitive) of $\alpha \pi o \lambda \lambda \nu \mu$.
In the gainsaying of Korah ( $\tau \eta \alpha v \tau \iota \lambda о \gamma \iota \alpha \tau 0 v$ Ko $\rho \varepsilon$ ). Again either locative or instrumental. The word $\alpha v \tau i \lambda o \gamma \iota \alpha$ is originally answering back (Heb 6:16 ), but it may be by act also (Ro 10:21) as here. This is the sixth example in Jude, not in II Peter.

Jude 1:12
Hidden rocks ( $\sigma \pi i \lambda \alpha \delta \varepsilon \varsigma)$. Old word for rocks in the sea (covered by the water), as in Homer, here only in N.T. 2Pe 2:13 has $\sigma \pi ı \lambda$ o.

Love-feasts ( $\alpha \gamma \alpha \pi \alpha ı \varsigma)$. Undoubtedly the correct text here, though A C have atataıs as in 2Pe 2:14. For disorder at the Lord's Supper (and love-feasts?) see 1Co 11:17-34. The Gnostics made it worse, so that the love-feasts were discontinued.

When they feast with you ( $\sigma v v \varepsilon v \omega \chi о v \mu \varepsilon v o$ ). See 2Pe 2:13 for this very word and form. Masculine gender with outo o rather than with the feminine $\sigma \pi \iota \lambda \alpha \delta \varepsilon \varsigma$. Cf. Re 11:4. Construction according to sense.
 Cf. Re 7:17 for this use of $\pi \sigma \mu \alpha \iota v \omega$. Clouds without water ( $v \varepsilon \varphi \varepsilon \lambda \alpha \alpha v v \delta \rho o$ ). N $\varepsilon \varphi \varepsilon \lambda \eta$ common word for cloud (Mt 24:30). 2Pe 2:17 has $\pi \eta \gamma \alpha a v v \delta \rho o$ (springs without water) and then о $\mu \ell \lambda \alpha$ (mists) and $\varepsilon \lambda \alpha v \nu o \mu \varepsilon v \alpha$ (driven) rather than $\pi \varepsilon \rho \iota \varphi \varepsilon \rho о \mu \varepsilon \nu \alpha$ here (borne around, whirled around, present passive participle of $\pi \varepsilon \rho เ \varphi \varepsilon \rho \omega$ to bear around), a powerful picture of disappointed hopes.

Autumn trees ( $\delta \varepsilon v \delta \rho \alpha \varphi \theta \iota v o \pi \omega \rho ı v \alpha)$. Late adjective (Aristotle, Polybius, Strabo) from $\varphi \theta\llcorner\nu \omega$, to waste away, and $о \pi \omega \rho \alpha$, autumn, here only in N.T. For $\alpha \kappa \alpha \rho \pi \alpha$ (without fruit) see $2 \mathrm{Pe} 1: 8$.

Twice dead ( $\delta \iota \varsigma \pi \pi \theta \alpha v o v \tau \alpha$ ). Second aorist active participle of $\alpha \pi \sigma \theta \nu \eta \sigma \kappa \omega$. Fruitless and having died. Having died and also "uprooted" ( $\varepsilon \kappa \rho!\zeta \omega \theta \varepsilon v \tau \alpha)$. First aorist passive participle of $\varepsilon \kappa \rho \iota \zeta$ ow, late compound, to root out, to pluck up by the roots, as in Mt 13:29.

Jude 1:13
Wild waves ( $\kappa \cup \mu \alpha \tau \alpha \alpha \gamma \rho \iota \alpha)$. Waves (Mt 8:24, from $\kappa v \varepsilon \omega$, to swell) wild (from $\alpha \gamma \rho \circ \varsigma$, field, wild honey Mt 3:4) like untamed animals of the forest or the sea.

Foaming out ( $\varepsilon \pi \alpha \varphi \rho i \zeta o v \tau \alpha)$. Late and rare present active participle of $\varepsilon \pi \alpha \varphi \rho l \zeta \omega$, used in Moschus for the foaming waves as here. Cf. Isa 57:20 .

Shame (aıбұvvac). Plural "shames" (disgraces). Cf. Php 3:19.
Wandering stars ( $\alpha \sigma \tau \varepsilon \rho \varepsilon \varsigma \pi \lambda \alpha \nu \eta \tau \alpha$ ). "Stars wanderers." П $\pi \alpha \nu \eta \tau \eta \varsigma$, old word (from $\pi \lambda \alpha v a \omega)$, here alone in N.T. Some refer this to comets or shooting stars. See Isa 14:12 for an allusion to Babylon as the day-star who fell through pride.

For ever ( $\varepsilon \iota \varsigma \alpha \iota \omega \vee \alpha$ ). The rest of the relative clause exactly as in 2Pe 2:17.
Jude 1:14
And to these also ( $\delta \varepsilon \kappa \alpha$ тov $о \circ \varsigma)$. Dative case, for these false teachers as well as for his contemporaries.

Enoch the seventh from Adam ( $\varepsilon \beta \delta \circ \mu \circ \varsigma \alpha \pi \sigma \mathrm{A} \delta \alpha \mu \mathrm{H} \varepsilon \nu \omega \chi)$. The genealogical order occurs in Ge 5:4-20, with Enoch as seventh. He is so termed in Enoch 60:8; 93:3.

Prophesied ( $\varepsilon \pi \rho \circ \varphi \eta \tau \varepsilon v \sigma \varepsilon v$ ). First aorist active indicative of $\pi \rho \circ \varphi \eta \tau \varepsilon v \omega$. If the word is given its ordinary meaning as in 1Pe 1:10, then Jude terms the Book of Enoch an inspired book. The words quoted are "a combination of passages from Enoch" (Bigg), chiefly from Enoch 1:9.

With ten thousand of his holy ones ( $\varepsilon v$ aүıaıc $\mu v \rho \iota \alpha \sigma \iota \nu \alpha v \tau o v)$. "With ( $\varepsilon v$ of accompaniment, Lu 14:31 ) his holy ten thousands" ( $\mu$ v ten thousand, Ac 19:19, there an unlimited number like our myriads, Lu 12:1).

Jude 1:15
To execute judgment ( $\pi \circ \imath \eta \sigma \alpha$ крıбı). "To do justice."
To convict ( $\varepsilon \lambda \varepsilon \gamma \xi \alpha$ ). First aorist (effective) active infinitive like $\pi$ oı $\eta \sigma \alpha$ before it.
Ungodly ( $\alpha \sigma \varepsilon \beta \varepsilon เ \varsigma)$. See verse 4 and end of this verse.
Of ungodliness ( $\alpha \sigma \varepsilon \beta \varepsilon \iota \alpha \varsigma)$. Old word as in Ro 1:18, plural in Jude 1:18 as in Ro 11:26

Which $(\omega v)$. Genitive by attraction from $\alpha$ (cognate accusative with $\eta \sigma \varepsilon \beta \eta \sigma \alpha \nu$, old verb, to act impiously, here alone in N.T. save some MSS. in 2Pe 2:6 ) to agree with the antecedent $\varepsilon \rho \gamma \omega \nu$ (deeds).

Hard things ( $\sigma \kappa \lambda \eta \rho \omega v$ ). Harsh, rough things as in Joh 6:60.
Which $(\omega v)$. Genitive by attraction from $\alpha$ (object of $\varepsilon \lambda \alpha \lambda \eta \sigma \alpha v$, first aorist active indicative of $\lambda \alpha \lambda \varepsilon \omega)$ to the case of the antecedent $\sigma \kappa \lambda \eta \rho \omega v$. Four times in this verse as a sort of refrain $\alpha \sigma \varepsilon \beta \varepsilon ı \varsigma ~(t w i c e), ~ \alpha \sigma \varepsilon \beta \varepsilon ı \alpha \sigma, \eta \sigma \varepsilon \beta \eta \sigma \alpha \nu$.

Jude 1:16
Murmurers ( $\gamma 0 \gamma \gamma v \sigma \tau \alpha$ ). Late onomatopoetic word for agent, from $\gamma \circ \gamma \gamma v \zeta \omega$ (Mt 20:11; 1Co 10:10) in the LXX (Ex 16:8; Nu 11:1,14-29).

Complainers ( $\mu \varepsilon \mu \psi \iota \rho \circ \rho о$ ). Rare word (Isocrates, Aristotle, Plutarch) from $\mu \varepsilon \mu \varphi о \mu \alpha$ to complain and $\mu$ oı $\rho$ lot or fate. Here alone in N.T.

Lusts ( $\varepsilon \pi \iota \theta \nu \mu \iota \varsigma)$. As in 2Pe 3:3.
Swelling (vлєроүка). So in 2Pe 2:18 (big words).

Showing respect of persons ( $\theta \alpha 0 \mu \alpha \zeta$ оvteऽ $\pi \rho \circ \sigma \omega \pi \pi)$ ). Present active participle of $\theta \alpha v \mu \alpha \zeta \omega$ to admire, to wonder at. Nowhere else in N.T. with $\pi \rho \circ \sigma \omega \pi \alpha$, but a Hebraism (in Le 19:15; Job 13:10) like $\lambda \alpha \mu \beta \alpha v \varepsilon 1 v ~ \pi \rho о \sigma \omega \pi o v ~(L u ~ 20: 21) ~ a n d ~ \beta \lambda \varepsilon \pi \varepsilon ו v ~ \pi \rho o \sigma \omega \pi o v ~(M t ~ 22: 16 ~$ ) and $\pi \rho о \sigma о \pi \omega \lambda \varepsilon \mu \pi \tau \varepsilon \omega$ (Jas 2:9). Cf. Jas 2:1 .

For the sake of advantage ( $\omega \varphi \varepsilon \lambda \varepsilon \iota \alpha \varsigma \chi \alpha \rho ı v$ ). To themselves. See also verse 11. The covetousness of these Gnostic leaders is plainly shown in 2Pe 2:3,14. For $\chi \alpha \rho \circ v$ as preposition with genitive see Eph 3:1,14.

Jude 1:17
Remember ye ( $v \mu \varepsilon \iota \varsigma \mu \nu \eta \sigma \theta \eta \tau \varepsilon$ ). First aorist passive (deponent) imperative of $\mu \mu \nu \eta \sigma \kappa \omega$ with genitive $\rho \eta \mu \alpha \tau \omega \nu$ (words). In 2Pe 3:2 we have the indirect form (infinitive $\mu \nu \eta \sigma \theta \eta \nu \alpha$ ). The rest as in II Peter, but in simpler and more exact structure and with the absence of $\tau \omega v$ $\alpha \gamma \omega \nu \pi \rho \circ \varphi \eta \tau \omega \nu$ (the holy prophets).

Jude 1:18
How that (oт). Declarative ot as in verse 5. See discussion of 2Pe 3:3 for differences, no $\varepsilon v \varepsilon \mu \pi \alpha \iota \gamma \mu \circ \nu \eta$ here and no $\tau \omega \nu \alpha \sigma \varepsilon \beta \varepsilon เ \omega \nu$ there.

Jude 1:19

 rare word, in Aristotle for making logical distinctions, here only in N.T. $\Delta$ ıo $\dagger \zeta \omega$ occurs in

Sensual ( $\psi \cup \chi$ เко). Old adjective from $\psi v \chi \eta$ as in 1Co 2:14; 15:44; Jas 3:15. Opposed to $\pi \nu \varepsilon \cup \mu a \tau i k o s$. Not used by Peter.
 (present active of $\varepsilon \chi \omega$ ). Probably $\pi \nu \varepsilon v \mu \alpha$ here means the Holy Spirit, as is plain in verse 20. Cf. Ro 8:9 .

Jude 1:20
Building up ( $\varepsilon \pi о ю к о \delta о \mu о и \vee \tau \varepsilon \varsigma) . ~ P r e s e n t ~ a c t i v e ~ p a r t i c i p l e ~ o f ~ \varepsilon \pi о ю к о \delta о \mu \varepsilon \omega, ~ o l d ~ c o m p o u n d ~$ with metaphor of a house (оккоऽ), common in Paul (1Со 3:9-17; Col 2:7; Eph 2:20).

On your most holy faith ( $\tau \eta \alpha \gamma \omega \tau \alpha \tau \eta \nu \mu \omega \nu \pi / \sigma \tau \varepsilon$ ). For the spiritual temple see also 1Pe 2:3-5. See $\pi \iota \sigma \tau \iota \varsigma$ (faith) in this sense (cf. Heb 11:1) in 2Pe 1:5 with the list of graces added. A true superlative here $\alpha \gamma \omega \tau \alpha \tau \eta$, not elative.

Praying in the Holy Spirit ( $\varepsilon v \pi \nu \varepsilon v \mu \alpha \tau \alpha \gamma \omega \pi \rho \circ \sigma \varepsilon v \chi о \mu \varepsilon v o$ ). This is the way to build themselves up on their faith.

Jude 1:21
Keep yourselves ( $\varepsilon \alpha \cup \tau 0 v \varsigma \tau \rho \eta \sigma \alpha \tau \varepsilon$ ). First aorist active imperative (of urgency) of $\tau \eta \rho \varepsilon \omega$. In verse 1 they are said to be kept, but note the warning in verse 5 from the angels who did not keep their dominion. See also Jas 1:27. In Php 2:12 both sides (human responsibility and divine sovereignty are presented side by side).

Looking for ( $\pi \rho о \sigma \delta \varepsilon \chi о \mu \varepsilon v o$ ). Present middle participle of $\pi \rho o \sigma \delta \varepsilon \chi \circ \mu \alpha$, the very form in Tit 2:13. The same idea in $\pi \rho \circ \sigma \delta$ oк $\omega v \tau \varepsilon \varsigma$ in 2Pe 3:14.

Jude 1:22
And on some ( $\kappa \alpha$ ov $\mu \varepsilon v$ ). Demonstrative plural of oc $\mu \varepsilon v$--oc $\delta \varepsilon$ (ouc $\delta \varepsilon$, below), not the relative ovc, but by contrast ( $\mu \varepsilon v, \delta \varepsilon$ ). So Mt 13:8 .

Have mercy ( $\varepsilon \lambda \varepsilon \alpha \tau \varepsilon$ ). Present active imperative of $\varepsilon \lambda \varepsilon \alpha \omega$ (rare form in Ro 9:16 also for the usual $\varepsilon \lambda \varepsilon \varepsilon \omega$ Mt 9:27). But A C read $\varepsilon \lambda \varepsilon \gamma \chi \varepsilon \tau \varepsilon$, refute, in place of $\varepsilon \lambda \varepsilon \alpha \tau \varepsilon$. The text of this verse is in much confusion.

Who are in doubt ( $\delta ı \alpha к \rho ı v o \mu \varepsilon v o v ¢)$. Present middle participle of $\delta \iota \alpha \kappa \rho \imath \omega \omega$, in the accusative case agreeing with ouc $\mu \varepsilon v$, though K L P have the nominative. If the accusative and $\varepsilon \lambda \varepsilon \alpha \tau \varepsilon$ is read, see Jas 1:6 for the idea (doubters). If $\varepsilon \lambda \varepsilon \gamma \chi \varepsilon \tau \varepsilon$ is read, see Jude 1:9 for the idea (disputers).

Jude 1:23
And some save (ouc $\delta \varepsilon \sigma \omega \zeta \varepsilon \tau \varepsilon$ ). B omits ouc $\delta \varepsilon$.
Snatching them out of the fire ( $\varepsilon \kappa \pi \cup \rho о \varsigma ~ \alpha \rho \pi \alpha \zeta о v \tau \varepsilon \varsigma) . ~ P r e s e n t ~ a c t i v e ~ p a r t i c i p l e ~ o f ~$ $\alpha \rho \pi \alpha \zeta \omega$, old verb, to seize. Quotation from Am 4:11 and Zec 3:3. Cf. Ps 106:18 . Firemen today literally do this rescue work. Do Christians?

And on some have mercy with fear (ouc $\delta \varepsilon \varepsilon \lambda \varepsilon \alpha \tau \varepsilon \varepsilon v \varphi o \beta \omega$ ). In fear "of the contagion of sin while we are rescuing them" (Vincent). For this idea see 1Pe 1:17; 3:15; 2Co 7:1; Php 2:12.

Spotted ( $\varepsilon \sigma \pi \iota \lambda \omega \mu \varepsilon v o v$ ). Perfect passive participle of $\sigma \pi \iota \lambda o \omega$, late and common verb (from oriloc, spot, 2Pe 2:13 ), in N.T. only here and Jas 3:6.

Jude 1:24
From stumbling ( $\alpha \pi \tau \alpha \iota \sigma \tau 0 u \varsigma)$. Verbal from $\pi \tau \alpha \omega \omega$, to stumble (Jas 3:2; 2Pe 1:10), surefooted as of a horse that does not stumble (Xenophon), and so of a good man (Epictetus, Marcus Antoninus).

Before the presence of his glory ( $\kappa \alpha \tau \varepsilon v \omega \tau \iota \circ \tau \tau \varsigma \delta о \xi \eta \varsigma \alpha \cup \tau o v$ ). Late compound preposition ( $\kappa \alpha \tau \alpha, \varepsilon v, \omega \pi \varsigma$ ), right down before the eye of his glory as in Eph 1:4. Cf. Mt 25:31-33; Col 1:22, where Paul has $\pi \alpha \rho \alpha \sigma \tau \eta \sigma \alpha$ like $\sigma \tau \eta \sigma \alpha$ here (first aorist active infinitive) and also $\alpha \mu \omega \mu$ ovs as here, but $\alpha \mu \omega \mu \eta \tau$ о in 2Pe 3:14.

In exceeding joy ( $\varepsilon v \alpha \gamma \alpha \lambda \lambda ı \alpha \sigma \varepsilon)$. See Lu 1:14.
Jude 1:25
To the only God our Saviour ( $\mu \circ v \omega \theta \varepsilon \omega \sigma \omega \tau \eta \rho \eta \mu \omega v$ ). Dative in the noble doxology. See Ro 16:27, $\mu \mathbf{\nu} \omega \omega \sigma \circ \varphi \omega \theta \varepsilon \omega$ (to the alone wise God), where also we have $\delta \iota \alpha$ I $\eta \sigma o v$ X $\rho ı \sigma \tau o v$, but without tov кupıov $\eta \mu \omega v$ (our Lord) as here. $\Sigma \omega \tau \eta \rho$ is used of God eight times in the N.T., six of them in the Pastoral Epistles. $\Delta \mathrm{o} \xi \alpha$ (glory) to God or Christ in all the doxologies except 1Ti 6:16. Me $\gamma \alpha \lambda_{\text {oovvv ( }}$ (Majesty) is a late LXX word, in N.T. only here and Heb 1:3; 8:1.

Before all time ( $\pi \rho 0$ таvтоц $\operatorname{\tau ov} \alpha 1 \omega v o \varsigma)$. Eternity behind us. See same idea in 1Co 2:7 $\pi \rho o \tau \omega v \alpha \omega \nu \omega \nu$.

Now (vov). The present.
For ever more ( $\varepsilon ı \varsigma \pi \alpha \nu \tau \alpha \varsigma ~ \tau o v \varsigma ~ a ı \omega v a \varsigma) . ~ " U n t o ~ a l l ~ t h e ~ a g e s . " ~ A l l ~ t h e ~ f u t u r e . ~ A s ~ c o m p l e t e ~$ a statement of eternity as can be made in human language.

## THE REVELATION OF JOHN

ABOUT A.D. 95

## BY WAY OF INTRODUCTION

DIFFICULTY IN THE PROBLEM
Perhaps no single book in the New Testament presents so many and so formidable problems as the Apocalypse of John. These difficulties concern the authorship, the date, the apocalyptic method, the relation to the other Johannine books, the purpose, the historical environment, the reception of the book in the New Testament canon, the use and misuse of the book through the ages, etc. In the eastern churches the recognition of the Apocalypse of John was slower than in the west, since it was not in the Peshitta Syriac Version. Caius of Rome attributed the book to Cerinthus the Gnostic, but he was ably answered by Hippolytus, who attributed it to the Apostle John. The Council of Laodicea (about A.D. 360) omitted it, but the third Council of Carthage (A.D. 397) accepted it. The dispute about millenarianism led Dionysius of Alexandria (middle of the third century, A.D.) to deny the authorship to the Apostle John, though he accepted it as canonical. Eusebius suggested a second John as the author. But finally the book was accepted in the east as Hebrews was in the west after a period of doubt.

## POOR STATE OF THE TEXT

There are only five uncials that give the text of John's Apocalypse (Aleph A C P Q). Of these Aleph belongs to the fourth century, A and C to the fifth, Q (really $\mathrm{B} 2, \mathrm{~B}$ ending with Heb 9:13, both in the Vatican Library) to the eighth, P to the ninth. Only Aleph A Q (=B2) are complete, C lacking Re 1:1, 3:19-5:14, 7:14-17, 8:5-9:16, 10:10-11:3,14:13-18:2, 19:5-21 , P lacking Re 16:12--17:1, 19:21-20:9,22:6-21 . Both C and P are palimpsests. In the 400 verses of the book "over 1,600 variants have been counted" (Moffatt). Erasmus had only one cursive (of the twelfth century numbered Ir) for his first edition, and the last six verses of the Apocalypse, save verse 20, were a translation from the Vulgate. The result is that the versions are of special importance for the text of the book, since in no single MS. or group of MSS. do we have a fairly accurate text, though Aleph A C and A C Vulgate are the best two groups.

## THE APOCALYPTIC STYLE

The book claims to be an apocalypse ( $\operatorname{Re} 1: 1$ ) and has to be treated as such. It is an unveiling ( $\alpha \pi о к \alpha \lambda \cup \psi \iota \varsigma$, from $\alpha \pi о к \alpha \lambda \cup \pi \tau \omega$ ) or revelation of Jesus Christ, a prophecy, in other words, of a special type, like Ezekiel, Zechariah, and Daniel in the Old Testament. There was a considerable Jewish apocalyptic literature by this time when John wrote, much of it B.C., some of it A.D., like the Book of Enoch, the Apocalypse of Baruch, the Book of Jubilees, the Assumption of Moses, the Psalms of Solomon, the Testaments of the Twelve Patriarchs, the Sibylline Oracles, some of them evidently "worked over by Christian hands" (Swete).

Jesus himself used the apocalyptic style at times (Mr 13; Mt 24,25; Lu 21 ). Paul in 1Co 14 spoke of the unpremeditated apocalyptic utterances in the Christian meetings and suggested restraints concerning them. "The Revelation of John is the only written apocalypse, as it is the only written prophecy of the Apostolic age.... The first Christian apocalypse came on the crest of this long wave of apocalyptic effort" (Swete). The reason for this style of writing is usually severe persecution and the desire to deliver a message in symbolic form. The effort of Antiochus Epiphanes, who claimed to be "a god manifest," to hellenize the Jews aroused violent opposition and occasioned many apocalypses to cheer the persecuted Jews.

## EMPEROR WORSHIP AS THE OCCASION FOR JOHN'S <br> APOCALYPSE

There is no doubt at all that the emperor cult (emperor worship) played a main part in the persecution of the Christians that was the occasion for this great Christian apocalypse. The book itself bears ample witness to this fact, if the two beasts refer to the Roman power as the agent of Satan. It is not possible to single out each individual emperor in the graphic picture. Most would take the dragon to be Satan and the first and the second beasts to be the imperial and provincial Roman power. The Roman emperors posed as gods and did the work of Satan. In particular there were two persecuting emperors (Nero and Domitian) who were responsible for many martyrs for Christ. But emperor worship began before Nero. Julius Caesar was worshipped in the provinces. Octavius was called Augustus ( $\Sigma \varepsilon \beta \alpha \sigma \tau o \varsigma$, Reverend). The crazy Emperor Caius Caligula not simply claimed to be divine, but actually demanded that his statue be set up for worship in the Holy of Holies in the Temple in Jerusalem. He was killed in January A.D. 41 before he could execute his dire purpose. But the madcap Nero likewise demanded worship and blamed in A.D. 64 the burning of Rome on the Christians, though guilty of it himself. He set the style for persecuting Christians, which slumbered on and burst into flames again under Domitian, who had himself commonly termed Dominus ac Deus noster (Our Lord and God). The worship of the emperor did not disturb the worshippers of other gods save the Jews and the Christians, and in particular the Christians were persecuted after the burning of Rome when they were distinguished from the Jews. Up till then Christians were regarded (as by Gallio in Corinth) as a variety of Jews and so entitled to tolerance as a religio licita, but they had no standing in law by themselves and their refusal to worship the emperor early gave offence, as Paul indicates in 1Co 12:3 . It was Kupıoc Inбouc or Kvpıo̧ Kaıбap. On this very issue Polycarp lost his life. The emperors as a rule were tolerant about it, save Nero and Domitian, who was called Nero redivivus, or Nero back again. Trajan in his famous letter to Pliny advised tolerance except in stubborn cases, when the Christians had to be put to death. After Nero it was a crime to be a Christian and all sorts of slanders about them were circulated. We have seen already in 2Th 2:3ff. , the man of sin who sets himself above God as the object of worship. We have
seen also in 1Jo 2:18,22; 4:3; 2Jo 1:7 the term antichrist applied apparently to Gnostic heretics. One may wonder if, as Beckwith argues, in the Apocalypse the man of $\sin$ and the antichrist are united in the beast.

THE AUTHOR
The writer calls himself John (Re 1:1,4,9; 22:8). But what John? The book can hardly be pseudonymous, though, with the exception of the Shepherd of Hermas, that is the rule with apocalypses. There would have been a clearer claim than just the name. The traditional and obvious way to understand the name is the Apostle John, though Dionysius of Alexandria mentions John Mark as held by some and he himself suggests another John, like the socalled Presbyter John of Papias as quoted by Eusebius. The uncertain language of Papias has raised a deal of questioning. Swete thinks that the majority of modern critics ascribe the Apocalypse to this Presbyter John, to whom Moffatt assigns probably II and III John. Irenaeus represents the Apostle John as having lived to the time of Trajan, at least to A.D. 98. Most ancient writers agree with this extreme old age of John. Justin Martyr states expressly that the Apostle John wrote the Apocalypse. Irenaeus called it the work of a disciple of Jesus. In the ninth century lived Georgius Hamartolus, and a MS. of his alleges that Papias says that John the son of Zebedee was beheaded by the Jews and there is an extract in an Oxford MS. of the seventh century which alleges that Papias says John and James were put to death by the Jews. On the basis of this slim evidence some today argue that John did not live to the end of the century and so did not write any of the Johannine books. But a respectable number of modern scholars still hold to the ancient view that the Apocalypse of John is the work of the Apostle and Beloved Disciple, the son of Zebedee.

RELATION TO THE FOURTH GOSPEL
Here scholars divide again. Many who deny the Johannine authorship of the Fourth Gospel and the Epistles accept the apostolic authorship of the Apocalypse, Baur, for instance. Hort, Lightfoot, and Westcott argued for the Johannine authorship on the ground that the Apocalypse was written early (time of Nero or Vespasian) when John did not know Greek so well as when the Epistles and the Gospel were written. There are numerous grammatical laxities in the Apocalypse, termed by Charles a veritable grammar of its own. They are chiefly retention of the nominative case in appositional words or phrases, particularly participles, many of them sheer Hebraisms, many of them clearly intentional (as in Re 1:4), all of them on purpose according to Milligan (Revelation in Schaff's Pop. Comm.) and Heinrici (Der Litterarische Charakter der neutest. Schriften, p. 85). Radermacher (Neutestamentliche Grammatik, p. 3) calls it "the most uncultured literary production that has come down to us from antiquity," and one finds frequent parallels to the linguistic peculiarities in later illiterate papyri. J. H. Moulton (Grammar, Vol. II, Part I, p. 3) says: "Its grammar is perpetually stumbling, its idiom is that of a foreign language, its whole style that of a writer who neither knows nor cares for literary form." But we shall see that the best evidence is for a date in

Domitian's reign and not much later than the Fourth Gospel. It is worth noting that in Ac 4:13 Peter and John are both termed by the Sanhedrin $\alpha \not \rho \rho \alpha \mu \mu \alpha \tau 0 ~ \kappa \alpha ~ เ \delta เ \omega \tau \alpha$ (unlettered and unofficial men). We have seen the possibility that II Peter represents Peter's real style or at least that of a different amanuensis from Silvanus in 1Pe 5:12. It seems clear that the Fourth Gospel underwent careful scrutiny and possibly by the elders in Ephesus (Joh 21:24 ). If John wrote the Apocalypse while in Patmos and so away from Ephesus, it seems quite possible that here we have John's own uncorrected style more than in the Gospel and Epistles. There is also the added consideration that the excitement of the visions played a part along with a certain element of intentional variations from normal grammatical sequence. An old man's excitement would bring back his early style. There are numerous coincidences in vocabulary and style between the Fourth Gospel and the Apocalypse.

THE UNITY OF THE APOCALYPSE
Repeated efforts have been made to show that the Apocalypse of John is not the work of one man, but a series of Jewish and Christian apocalypses pieced together in a more or less bungling fashion. Spitta argued for this in 1889. Vischer was followed by Harnack in the view there was a Jewish apocalypse worked over by a Christian. Gunkel (Creation and Chaos, 1895) argued for a secret apocalyptic tradition of Babylonian origin. In 1904 J. Weiss carried on the argument for sources behind the Apocalypse. Many of the Jewish apocalypses do show composite authorship. There was a current eschatology which may have been drawn on without its being a written source. It is in chapter Re 12 where the supposed Jewish source is urged more vigorously about the woman, the dragon, and the man child. There are no differences in language (vocabulary or grammar) that argue for varied sources. The author may indeed make use of events in the reign of Nero as well as in the reign of Domitian, but the essential unity of the book has stood the test of the keenest criticism.

THE DATE
There are two chief theories, the Neronic, soon after Nero's death, the other in the reign of Domitian. Irenaeus is quoted by Eusebius as saying expressly that the Apocalypse of John was written at the close of the reign of Domitian. This testimony is concurred in by Clement of Alexandria, by Origen, by Eusebius, by Jerome. In harmony with this clear testimony the severity of the persecutions suit the later date better than the earlier one. There is, besides, in Re 17:11f. an apparent reference to the story that Nero would return again. The fifth king who is one of the seven is an eighth. There was a Nero legend, to be sure, that Nero either was not dead but was in Parthia, or would be redivivus after death. Juvenal termed Domitian "a bald Nero" and others called Domitian "a second Nero." But in spite of all this Hort, Lightfoot, Sanday, Westcott have argued strongly for the Neronic era. Peake is willing to admit allusions to the Neronic period as Swete is also, but both consider the Domitianic date the best supported. Moffatt considers any earlier date than Domitian "almost impossible."

THE VISIONS

No theory of authorship, sources, or date should ignore the fact that the author claims to have had a series of visions in Patmos. It does not follow that he wrote them down at once and without reflection, but it seems hardly congruous to think that he waited till he had returned from exile in Patmos to Ephesus before writing them out. In fact, there is a note of sustained excitement all through the book, combined with high literary skill in the structure of the book in spite of the numerous grammatical lapses. The series of sevens bear a relation to one another, but more in the fashion of a kaleidoscope than of a chronological panorama. And yet there is progress and power in the arrangement and the total effect. There is constant use of Old Testament language and imagery, almost a mosaic, but without a single formal quotation. There is constant repetition of words and phrases in true Johannine style. Each of the messages to the seven churches picks out a metaphor in the first picture of Christ in chapter I and there are frequent other allusions to the language in this picture. In fact there is genuine artistic skill in the structure of the book, in spite of the deflections from ordinary linguistic standards. In the visions and all through the book there is constant use of symbols, as is the fashion in apocalypses like the beasts, the scorpions, the horses, etc. These symbols probably were understood by the first readers of the book, though the key to them is lost to us. Even the numbers in the book ( $31 / 2,7,3,4,12,24,1000$ ) cannot be pressed, though some do so. Even Harnack called the Apocalypse the plainest book in the New Testament, by using Harnack's key for the symbols.

## THEORIES OF INTERPRETATION

They are literally many. There are those who make the book a chart of Christian and even of human history even to the end. These divide into two groups, the continuous and the synchronous. The continuous historical theory takes each vision and symbol in succession as an unfolding panorama. Under the influence of this theory there have been all sorts of fantastic identifications of men and events. The synchronous theory takes the series of sevens (seals, trumpets, bowls) as parallel with each other, each time going up to the end. But in neither case can any satisfactory program be arranged. Another historical interpretation takes it all as over and done, the preterist theory. This theory again breaks into two, one finding the fulfilment all in the Neronic period, the other in the Domitianic era. Something can be said for each view, but neither satisfies the whole picture by any means. Roman Catholic scholars have been fond of the preterist view to escape the Protestant interpretation of the second beast in chapter Re 13 as papal Rome. There is still another interpretation, the futurist, which keeps the fulfilment all in the future and which can be neither proved nor disproved. There is also the purely spiritual theory which finds no historical allusion anywhere. This again can be neither proved nor disproved. One of the lines of cleavage is the millennium in chapter Re 20 . Those who take the thousand years literally are either pre-millennialists who look for the second coming of Christ to be followed by a thousand years of personal reign here on earth or the postmillennialists who place the thousand years
before the second coming. There are others who turn to $2 \mathrm{Pe} 3: 8$ and wonder if, after all, in a book of symbols this thousand years has any numerical value at all. There seems abundant evidence to believe that this apocalypse, written during the stress and storm of Domitian's persecution, was intended to cheer the persecuted Christians with a view of certain victory at last, but with no scheme of history in view.

## A PRACTICAL PURPOSE

So considered, this vision of the Reigning Christ in heaven with a constant eye on the suffering saints and martyrs is a guarantee of certain triumph in heaven and ultimate triumph on earth. The picture of Christ in heaven is a glorious one. He is the Lamb that was slain, the Lion of the tribe of Judah, the Word of God, the Victor over his enemies, worshipped in heaven like the Father, the Light and Life of men. Instead of trying to fit the various symbols on particular individuals one will do better to see the same application to times of persecution from time to time through the ages. The same Christ who was the Captain of salvation in the time of Domitian is the Pioneer and Perfecter of our faith today. The Apocalypse of John gives glimpses of heaven as well as of hell. Hope is the word that it brings to God's people at all times.

THE READERS OF THE BOOK
The whole book is sent to the seven churches in Asia (Re 1:4). There is a special message to each of the seven (chapters Re 2;3), suited to the peculiar needs of each church and with a direct reference to the geography and history of each church and city, so Ramsay holds (The Letters to the Seven Churches). The book is to be read aloud in each church ( 1:3). One can imagine the intense interest that the book would arouse in each church. Children are charmed to hear the Apocalypse read. They do not understand the symbols, but they see the pictures in the unfolding panorama. There were other churches in the Province of Asia besides these seven, but these form a circle from Ephesus where John had lived and wrought. They do present a variety of churches, not necessarily all types, and by no means a chart of seven dispensations of Christian history.

## Revelation 1

Rev 1:1
The Revelation ( $\alpha \pi о к \alpha \lambda \nu \psi ı$ ). Late and rare word outside of N.T. (once in Plutarch and so in the vernacular Koine), only once in the Gospels (Lu 2:32), but in LXX and common in the Epistles (2Th 1:7), though only here in this book besides the title, from $\alpha \pi о к \alpha \lambda \nu \pi \tau \omega$, old verb, to uncover, to unveil. In the Epistles $\alpha \pi о \kappa \alpha \lambda \cup \psi i \varsigma$ is used for insight into truth (Eph 1:17) or for the revelation of God or Christ at the second coming of Christ (2Th 1:7; 1Pe 1:7). It is interesting to compare $\alpha \pi о к \alpha \lambda \nu \psi \iota \varsigma ~ w i t h ~ \varepsilon \pi ı \varphi \alpha v \varepsilon ı \alpha ~(2 T h ~ 2: 8) ~ a n d ~ \varphi a v \varepsilon \rho \omega \sigma ı \varsigma ~(1 C o ~$ 12:7). The precise meaning here turns on the genitive following.

Of Jesus Christ (I $\eta$ бov Xpıбтov). Hort takes it as objective genitive (revelation about Jesus Christ), but Swete rightly argues for the subjective genitive because of the next clause.

Gave him ( $\varepsilon \delta \omega \kappa \varepsilon v$ avto). It is the Son who received the revelation from the Father, as is usual (Joh 5:20f.,26 , etc.).

To shew ( $\delta \varepsilon ı \xi \alpha$ ). First aorist active infinitive of $\delta \varepsilon ו \kappa v v \mu$, purpose of God in giving the revelation to Christ.

Unto his servants ( $\tau o \iota \varsigma \delta o u \lambda o ı \varsigma ~ a u \tau o v) . ~ B e l i e v e r s ~ i n ~ g e n e r a l ~ a n d ~ n o t ~ j u s t ~ t o ~ o f f i c i a l s . ~$ Dative case. God's servants (or Christ's).

Must shortly come to pass ( $\delta \varepsilon \gamma \varepsilon v \varepsilon \sigma \theta \alpha \varepsilon v \tau \alpha \chi \varepsilon$ ). Second aorist middle infinitive of $\gamma ı v o \mu \alpha$ with $\delta \varepsilon$. See this same adjunct ( $\varepsilon v \tau \alpha \chi \varepsilon$ ) in $\operatorname{Lu} 18: 8 ;$ Ro 16:20; Re 22:6 . It is a relative term to be judged in the light of $2 \mathrm{Pe} 3: 8$ according to God's clock, not ours. And yet undoubtedly the hopes of the early Christians looked for a speedy return of the Lord Jesus. This vivid panorama must be read in the light of that glorious hope and of the blazing fires of persecution from Rome.

Sent and signified ( $\varepsilon \sigma \eta \mu \alpha v \varepsilon v$ a $\quad$ оот $\varepsilon \lambda \lambda \alpha \varsigma)$. "Having sent (first aorist active participle of $\alpha \pi \operatorname{o\sigma \tau } \varepsilon \lambda \lambda \omega$, Mt 10:16 and again in Re 22:6 of God sending his angel) signified" (first aorist active indicative of $\sigma \eta \mu a \imath \omega \omega$, from $\sigma \eta \mu \alpha$, sign or token, for which see Joh 12:33; Ac 11:28). See 12:1 for $\sigma \eta \mu \varepsilon ı \sigma$, though $\sigma \eta \mu a ı \omega \omega$ (only here in the Apocalypse) suits admirably the symbolic character of the book.

By his angel ( $\delta \iota \alpha$ тov $a \gamma \gamma \varepsilon \lambda$ ov autov). Christ's angel as Christ is the subject of the verb $\varepsilon \sigma \eta \mu a v \varepsilon v$, as in 22:16 Christ sends his angel, though in 22:6 God sends.

Unto his servant John ( $\tau \omega \delta o u \lambda \omega$ av $o v \mathrm{I} \omega a v \varepsilon$ ). Dative case. John gives his name here, though not in Gospel or Epistles, because "prophecy requires the guarantee of the individual who is inspired to utter it" (Milligan). "The genesis of the Apocalypse has now been traced from its origin in the Mind of God to the moment when it reached its human interpreter" (Swete). "Jesus is the medium of all revelation" (Moffatt).

Rev 1:2

Bare witness ( $\varepsilon \mu \alpha \rho \tau \nu \rho \eta \sigma \varepsilon v$ ). First aorist active indicative of $\mu \alpha \rho \tau v \rho \varepsilon \omega$, which, along with $\mu \alpha \rho \tau v \varsigma$ and $\mu \alpha \rho \tau v \rho t \alpha$, is common in all the Johannine books (cf. 22:18,20 ), usually with $\pi \varepsilon \rho$ or o $\tau$, but with cognate accusative as here in 22:16,20; 1Jo 5:10. Epistolary aorist here, referring to this book.

The word of God ( $\tau 0 v \lambda o \gamma o v$ qov $\theta \varepsilon o v$ ). Subjective genitive, given by God. The prophetic word as in 1:9; 6:9; 20:4, not the personal Word as in 19:14.

The testimony of Jesus Christ ( $\tau \eta \nu \mu \alpha \rho \tau \nu \rho ı a v$ I $\eta \sigma o v$ X $\rho \iota \sigma \tau \sigma v$ ). Subjective genitive again, borne witness to by Jesus Christ.

Even of all the things that he saw (oбa $\varepsilon \ell \delta \varepsilon v$ ). Relative clause in apposition with $\lambda o \gamma o v$

Rev 1:3
Blessed ( $\mu \alpha \kappa \alpha \rho \circ \varsigma)$ ) As in Mt 5:3f. . This endorses the book as a whole.
He that readeth (o $\alpha v \alpha \gamma \iota v \omega \sigma \kappa \omega v$ ). Present active singular articular participle of avaүıv $\omega \sigma \kappa \omega$ (as in Lu 4:16 ). Christians in their public worship followed the Jewish custom of public reading of the Scriptures (2Co 3:14f. ). The church reader ( $\alpha v \alpha \gamma v \omega \sigma \tau \eta \varsigma$, lector) gradually acquired an official position. John expects this book to be read in each of the seven churches mentioned ( $1: 4$ ) and elsewhere. Today the public reading of the Bible is an important part of worship that is often poorly done.

They that hear (o aкоvovte¢). Present active plural articular participle of aкоvف (the audience).

And keep ( $\kappa \alpha \tau \eta \rho о \nu \nu \tau \varepsilon \varsigma)$. Present active participle of $\tau \eta \rho \varepsilon \omega$, a common Johannine word (1Jo 2:4, etc.). Cf. Mt 7:24. "The content of the Apocalypse is not merely prediction; moral counsel and religious instruction are the primary burdens of its pages" (Moffatt).

Written ( $\gamma \varepsilon \gamma \rho \alpha \mu \mu \varepsilon v \alpha$ ). Perfect passive participle of $\gamma \rho \alpha \varphi \omega$.
For the time is at hand (о $\gamma \alpha \rho$ каı $\rho о \varsigma \varepsilon \gamma \gamma \cup \varsigma)$. Reason for listening and keeping. On кaıpos see Mt 12:1, time of crisis as in 1Co 7:29. How near $\varepsilon \gamma \gamma \cup \varsigma$ (at hand) is we do not know any more than we do about $\varepsilon \nu \tau \alpha \chi \varepsilon$ (shortly) in 1:1.

Rev 1:4
To the seven churches which are in Asia ( $\tau \alpha \iota \varsigma \varepsilon \pi \tau \alpha \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha \iota \varsigma \tau \alpha \iota \varepsilon \varepsilon \nu \tau \eta$ A $\varnothing \iota \alpha$ ). Dative case as in a letter (Ga 1:1). John is writing, but the revelation is from God and Christ through an angel. It is the Roman province of Asia which included the western part of Phrygia. There were churches also at Troas (Ac 20:5ff.) and at Colossal and Hierapolis (Col 1:1; 2:1; 4:13 ) and possibly at Magnesia and Tralles. But these seven were the best points of communication with seven districts (Ramsay) and, besides, seven is a favorite number of completion (like the full week) in the book ( $1: 4,12,16 ; 4: 5 ; 5: 1,6 ; 8: 2 ; 10: 3 ; 11: 13 ; 12: 3 ; 13: 1 ; 14: 6 f$. $)$.

From him which is ( $\alpha \pi \mathrm{o} o \omega v$ ). This use of the articular nominative participle of $\varepsilon \mu$ after $\alpha \pi 0$ instead of the ablative is not due to ignorance or a mere slip ( $\lambda \alpha \psi v \varsigma \pi \varepsilon v v a \varepsilon$ ), for in the next line we have the regular idiom with $\alpha \pi 0 \tau \omega v \varepsilon \pi \tau \alpha \pi \nu \varepsilon \nu \mu \alpha \tau \omega \nu$. It is evidently on
purpose to call attention to the eternity and unchangeableness of God. Used of God in Ex 3:14.

And which was ( $\kappa \alpha \circ \eta \nu$ ). Here again there is a deliberate change from the articular participle to the relative use of o (used in place of os to preserve identity of form in the three instances like Ionic relative and since no aorist participle of $\varepsilon \mu$ existed). The oracle in Pausanias X. 12 has it: Zعvc $\eta \nu$, Zevc $\varepsilon \sigma \tau \iota, ~ Z \varepsilon v \varsigma ~ \varepsilon \sigma \sigma \varepsilon \tau \alpha ~(Z e u s ~ w a s, ~ Z e u s ~ i s, ~ Z e u s ~ w i l l ~ b e) . ~$.

Which is to come (o $\varepsilon \rho \chi \circ \mu \varepsilon v o \varsigma)$. "The Coming One," futuristic use of the present par-
 in 11:17; 16:5.

From the seven spirits ( $\alpha \pi 0 \tau \omega v \varepsilon \pi \tau \alpha \pi v \varepsilon \nu \mu \alpha \tau \omega v$ ). A difficult symbolic representation of the Holy Spirit here on a par with God and Christ, a conclusion borne out by the symbolic use of the seven spirits in 3:1; 4:5; $5: 6$ (from Zec 4:2-10). There is the one Holy Spirit with seven manifestations here to the seven churches (Swete, The Holy Spirit in the N.T., p. 374), unity in diversity ( 1 Co 12:4).

Which are ( $\tau \omega v$ article Aleph A, a relative P ).
Before his throne ( $\varepsilon v \omega \pi \iota \circ v$ tov $\theta$ povov avtov). As in $4: 5 f$.
Rev 1:5
 in apposition like $\pi \rho \omega \tau о \tau о \kappa о \varsigma$ and $\alpha \rho \chi \omega v$ with the preceding ablative I I $\sigma$ ov X Xıбтоv with a $\pi \mathbf{0}$, a habit of John in this book (apparently on purpose) as in 2:13,20; $3: 12$, etc. See this same phrase in $2: 13 ; 3: 14$. The use of $\mu$ aptuc of Jesus here is probably to the witness ( $1: 1$ ) in this book (22:16f. ), not to the witness of Jesus before Pilate (1Ti 6:13).

The first-born of the dead (o $\pi \rho \omega \tau о \tau о к о \varsigma \tau \omega v \nu \varepsilon \kappa \rho \omega v$ ). A Jewish Messianic title (Ps 88:28) and as in Col 1:18 refers to priority in the resurrection to be followed by others. See Lu 2:7 for the word.

The ruler of the kings of the earth (o $\alpha \rho \chi \omega \nu \tau \omega \nu \beta \alpha \sigma \lambda \lambda \varepsilon \omega \nu \tau \eta \varsigma \gamma \eta \varsigma)$. Jesus by his resurrection won lordship over the kings of earth (17:14; 19:16), what the devil offered him by surrender (Mt 4:8f. ).

Unto him that loveth us ( $\tau \omega \alpha \gamma \alpha \pi \omega \nu \tau \eta \mu \alpha \varsigma$ ). Dative of the articular present (not aorist $\alpha \gamma \alpha \pi \eta \sigma \alpha \nu \tau)$ active participle of $\alpha \gamma \alpha \pi \alpha \omega$ in a doxology to Christ, the first of many others to God and to Christ ( $1: 6 ; 4: 11 ; 5: 9,12$ f.; 7:10,12 , etc.). For the thought see Joh 3:16 .

Loosed ( $\lambda v \sigma \alpha v \tau)$. First aorist active participle of $\lambda v \omega$ (Aleph A C), though some MSS. (P Q) read $\lambda_{\text {ovo } \alpha v \tau}$ (washed), a manifest correction. Note the change of tense. Christ loosed us once for all, but loves us always.

By his blood ( $\varepsilon \nu \tau \omega$ aı$\mu \alpha \tau \alpha \cup \tau o v$ ). As in 5:9. John here as in the Gospel and Epistles states plainly and repeatedly the place of the blood of Christ in the work of redemption.

Rev 1:6

And he made ( $\kappa \alpha \varepsilon \pi \sigma \sqcap \sigma \varepsilon v$ ). Change from the participle construction, which would be ка $\pi о \not \eta \sigma \alpha \nu \tau$ (first aorist active of $\pi о เ \varepsilon \omega$ ) like $\lambda \nu \sigma \alpha \nu \tau$ just before, a Hebraism Charles calls it, but certainly an anacoluthon of which John is very fond, as in 1:18; 2:2,9,20; 3:9; 7:14; 14:2f.; 15:3.

Kingdom ( $\beta \alpha \sigma \iota \lambda \varepsilon \iota \alpha v$ ). So correctly Aleph A C, not $\beta \alpha \sigma \iota \lambda \varepsilon \iota \zeta$ (P cursives). Perhaps a reminiscence of Ex 19:6 , a kingdom of priests. In 5:10 we have again "a kingdom and priests." The idea here is that Christians are the true spiritual Israel in God's promise to Abraham as explained by Paul in Ga 3; Ro 9 .

To be priests (ıعрєıc). In apposition with $\beta \alpha \sigma \iota \lambda \varepsilon ı \alpha v$, but with $\kappa \alpha$ (and) in 5:10. Each member of this true kingdom is a priest unto God, with direct access to him at all times.

Unto his God and Father ( $\tau \omega \theta \varepsilon \omega \kappa \alpha \pi \alpha \tau \rho$ autov). Dative case and autov (Christ) applies to both $\theta \varepsilon \omega$ and $\pi \alpha \tau \rho$. Jesus spoke of the Father as his God (Mt 27:46; Joh 20:17) and Paul uses like language (Eph 1:17), as does Peter (1Pe 1:3).

To him ( $\alpha \cup \tau \omega$ ). Another doxology to Christ. "The adoration of Christ which vibrates in this doxology is one of the most impressive features of the book" (Moffatt). Like doxologies to Christ appear in 5:13; 7:10; $1 \mathrm{Pe} 4: 11 ; 2 \mathrm{Pe} 3: 18 ; 2 \mathrm{Ti} 4: 18$; He 13:21. These same words ( $\eta$ ঠо $\xi_{\alpha} \kappa \alpha$ то кратоऽ) in $1 \mathrm{Pe} 4: 11$, only $\eta \delta$ о $\xi \alpha$ in $2 \mathrm{Pe} 3: 18$; $2 \mathrm{Ti} 4: 18$, but with several others in Re 5:13; 7:10.

## Rev 1:7

Behold, he cometh with the clouds (ı $\delta o v \varepsilon \rho \chi \varepsilon \tau \alpha \mu \varepsilon \tau \alpha \tau \omega v \nu \varepsilon \varphi \varepsilon \lambda \omega v$ ). Futuristic present middle indicative of $\varepsilon \rho \chi \circ \mu \alpha$, a reminiscence of Da 7:13 (Theodotion). "It becomes a common eschatological refrain" (Beckwith) as in Mr 13:26; 14:62; Mt 24:30; 26:64; Lu 21:27. Compare the manifestation of God in the clouds at Sinai, in the cloudy pillar, the Shekinah, at the transfiguration" (Vincent).

Shall see ( $\mathbf{o} \psi \varepsilon \tau \alpha$ ). Future middle of opa $\omega$, a reminiscence of Zec 12:10 according to the text of Theodotion (Aquila and Symmachus) rather than the LXX and like that of Mt 24:30 (similar combination of Daniel and Zechariah) and 26:64. This picture of the victorious Christ in his return occurs also in 14:14, 18-20; 19:11-21; 20:7-10 .

And they which ( $\kappa \alpha$ oıtıv६ऽ). "And the very ones who," Romans and Jews, all who shared in this act.

Pierced ( $\varepsilon \xi \varepsilon \kappa \varepsilon v \tau \eta \sigma \alpha v$ ). First aorist active indicative of $\varepsilon \kappa \kappa \varepsilon v \tau \varepsilon \omega$, late compound (Aristotle, Polybius, LXX), from $\varepsilon \kappa$ and $\kappa \varepsilon v \tau \varepsilon \omega$ (to stab, to pierce), in N.T., only here and Joh 19:37, in both cases from Zec 12:10, but not the LXX text (apparently proof that John used the original Hebrew or the translation of Theodotion and Aquila).

Shall mourn (кочоvта). Future middle (direct) of колт $\omega$, old verb, to cut, "they shall cut themselves," as was common for mourners (Mt 11:17; Lu 8:52; 23:27). From Zec 12:12 . See also Re 18:9.

Tribes $(\varphi \cup \lambda \alpha)$. Not just the Jewish tribes, but the spiritual Israel of Jews and Gentiles as in 7:4-8. No nation had then accepted Christ as Lord and Saviour, nor has any yet done so.

## Rev 1:8

The Alpha and the Omega ( то $A \lambda \varphi \alpha \kappa \alpha$ то O). The first and the last letters of the Greek alphabet, each with its own neuter (grammatical gender) article. This description of the eternity of God recurs in 21:6 with the added explanation $\eta \alpha \rho \chi \eta$ ка тo $\tau \varepsilon \lambda$ оऽ (the Beginning and the End) and of Christ in 22:13 with the still further explanation о $\pi \rho \omega \tau о \varsigma \kappa \alpha$ о $\varepsilon \sigma \chi \alpha \tau \circ$, (the First and the Last). This last phrase appears also in $1: 17 ; 2: 8$ without то $\mathrm{A} \lambda \varphi \alpha \kappa \alpha$ то O . The change of speaker here is unannounced, as in 16:15; 18:20. Only here and 21:5f . is God introduced as the speaker. The eternity of God guarantees the prophecy just made.

The Lord God (Kvpıos o $\theta \varepsilon$ оऽ). "The Lord the God." Common phrase in Ezekiel (Eze $6: 3,11 ; 7: 2$, etc.) and in this book $(4: 8 ; 11: 17 ; 15: 3 ; 16: 7 ; 19: 6 ; 21: 22)$. See $1: 4 ; 4: 8$ for the triple use of $o$, etc. to express the eternity of God.

The Almighty ( $о \pi \alpha \nu \tau о \kappa \rho a \tau \omega \rho$ ). Late compound ( $\tau \alpha \varsigma$ and $\kappa \rho \alpha \tau \varepsilon \omega$ ), in Cretan inscription and a legal papyrus, common in LXX and Christian papyri, in N.T. only in 2Co 6:18 (from Jer 38:35 ) and Re 1:8; 4:8; 11:17; 15:3; 16:7,14; 19:6,15; 21:22 .

Rev 1:9
I John (E $\gamma \omega \mathrm{I} \omega \alpha \nu \eta \varsigma)$. So 22:8. In apocalyptic literature the personality of the writer is always prominent to guarantee the visions ( $\mathrm{Da} 8: 1 ; 10: 2$ ).

Partaker with you ( $\sigma v \nu \kappa о \iota \omega \nu \circ$ ). See already 1Co 9:23. "Co-partner with you" (Ro 11:17 ). One article with $\alpha \delta \varepsilon \lambda \varphi о \varsigma$ and $\sigma u v \kappa o \iota \nu \omega \nu \circ \varsigma$ unifying the picture. The absence of a $о \sigma \tau о \lambda$ о , here does not show that he is not an apostle, but merely his self-effacement, as in the Fourth Gospel, and still more his oneness with his readers. So there is only one article ( $\tau \eta$ ) with $\theta \lambda ı \psi \varepsilon$ (tribulation), $\beta \alpha \sigma \iota \lambda \varepsilon \iota \alpha$ (kingdom), v $\pi о \mu \circ v \eta$ (patience), ideas running all through the book. Both the tribulation (see Mt 13:21 for $\theta \lambda เ \psi \iota \varsigma)$ and the kingdom (see Mt 3:2 for $\beta \alpha \sigma \iota \lambda \varepsilon \iota \alpha$ ) were present realities and called for patience ( $v \pi о \mu о v \eta$ being "the spiritual alchemy" according to Charles for those in the kingdom, for which see Lu 8:15; Jas 5:7 ). All this is possible only "in Jesus" ( $\varepsilon v$ I $\eta \sigma o v$ ), a phrase on a par with Paul's common $\varepsilon v$ X $\rho เ \sigma \tau \omega$ (in Christ), repeated in 14:13. Cf. 3:20; 2Th 3:5 .

Was $(\varepsilon \gamma \varepsilon \nu \circ \mu \eta v)$. Rather, "I came to be," second aorist middle indicative of $\gamma \iota v o \mu \alpha$.
In the isle that is called Patmos ( $\varepsilon \nu \tau \eta \nu \eta \sigma \omega \tau \eta \kappa \alpha \lambda o v \mu \varepsilon \nu \eta \Pi \alpha \tau \mu \omega$ ). Patmos is a rocky sparsely settled island some ten miles long and half that wide, one of the Sporades group in the Aegean Sea, south of Miletus. The present condition of the island is well described by W. E. Geil in The Isle That Is Called Patmos (1905). Here John saw the visions described in the book, apparently written while still a prisoner there in exile.

For the word of God and the testimony of Jesus ( $\delta \iota \alpha$ $\tau 0 v \lambda o \gamma o v \tau o v ~ \theta \varepsilon o v \kappa \alpha \tau \eta v$ $\mu \alpha \rho \tau v \rho ı \alpha v$ I $\eta \sigma o v)$. The reason for ( $\delta \iota \alpha$ and the accusative) John's presence in Patmos, nat-
urally as a result of persecution already alluded to, not for the purpose of preaching there or of receiving the visions. See verse 2 for the phrase.

Rev 1:10
I was in the Spirit ( $\varepsilon \gamma \varepsilon v o \mu \eta v \varepsilon v \pi v \varepsilon v \mu \alpha \tau)$. Rather, "I came to be (as in 1:9) in the Spirit," came into an ecstatic condition as in Ac 10:10f.; 22:17, not the normal spiritual condition ( $\varepsilon เ v \alpha \varepsilon \nu \pi v \varepsilon \nu \mu \alpha \tau$, Ro 8:9).

On the Lord's Day ( $\varepsilon v \tau \eta \kappa \cup \rho \iota \alpha \kappa \eta \eta \mu \varepsilon \rho \alpha)$. Deissmann has proven (Bible Studies, p. 217f.; Light, etc., p. 357ff.) from inscriptions and papyri that the word кupıaкоৎ was in common use for the sense "imperial" as imperial finance and imperial treasury and from papyri and ostraca that $\eta \mu \varepsilon \rho \alpha \sum \varepsilon \beta a \sigma \tau \eta$ (Augustus Day) was the first day of each month, Emperor's Day on which money payments were made (cf. 1Co 16:1f. ). It was easy, therefore, for the Christians to take this term, already in use, and apply it to the first day of the week in honour of the Lord Jesus Christ's resurrection on that day (Didache 14, Ignatius Magn. 9). In the N.T. the word occurs only here and 1Co 11:20 (кирькоь $\delta \varepsilon ı \pi v о \nu ~ \theta \varepsilon ~ \Lambda о \rho \delta ' \varsigma ~$ $\Sigma \cup \pi \pi \varepsilon \rho$ ). It has no reference to $\eta \mu \varepsilon \rho \alpha$ кироov (the day of judgment, $2 \mathrm{Pe} 3: 10$ ).

Behind me (o $\boldsymbol{\iota} \sigma \omega \mu \circ v$ ). "The unexpected, overpowering entrance of the divine voice" (Vincent). Cf. Eze 3:12 .

Voice ( $\varphi \omega \nu \eta \nu$ ). Of Christ, as is plain in verses 12 f .
As of a trumpet ( $\omega \varsigma \sigma \alpha \lambda \pi \downarrow \gamma \gamma \circ \varsigma)$. So in 4:1 referring to this.
Saying ( $\lambda \varepsilon \gamma \circ v \sigma \eta \varsigma)$. Present active participle genitive case agreeing with $\sigma \alpha \lambda \pi \iota \gamma \gamma \circ \varsigma$ rather than $\lambda \varepsilon \gamma o v \sigma \alpha \nu$, accusative agreeing with $\varphi \omega \nu \eta \nu$. So on purpose, as is clear from 4:1, where $\lambda \alpha \lambda$ ouø $\varsigma$ also agrees with $\sigma \alpha \lambda \pi \iota \gamma \gamma o \varsigma$.

Rev 1:11
Write in a book ( $\gamma \rho \alpha \psi o v \varepsilon \iota \varsigma \beta \iota \beta \lambda \iota v$ ). First aorist active imperative of $\gamma \rho \alpha \varphi \omega$ for instantaneous action. The commission covers the whole series of visions which all grow out of this first vision of the Risen Christ.

Send ( $\pi \varepsilon \mu \psi \sigma v$ ). First aorist active imperative of $\pi \varepsilon \mu \pi \omega$. Part of the commission from Christ. The names of the seven churches of 1:4 are now given, and the particular message to each church comes in chapters 2 and 3 and in the same order, the geographical order going north from Ephesus, then east and south to Laodicea. But apparently the whole book was to be read to each of the seven churches. It would probably also be copied at each church.

Rev 1:12
To see the voice ( $\beta \lambda \varepsilon \pi \varepsilon \iota \nu \tau \eta \nu \varphi \omega v \eta \nu$ ). The voice put for the person speaking.
Having turned ( $\varepsilon \pi \iota \sigma \tau \rho \varepsilon \psi \alpha \varsigma)$. First aorist active participle of $\varepsilon \pi \iota \sigma \tau \rho \varepsilon \varphi \omega$, from which also $\varepsilon \pi \varepsilon \sigma \tau \rho \varepsilon \psi \alpha$, just before, for which verb see Ac 15:36; 16:18 .

Seven golden candlesticks ( $\varepsilon \pi \tau \alpha \lambda \nu \chi \nu i \alpha \varsigma ~ \chi \rho v \sigma \alpha \varsigma)$. See Mt 5:15 for $\lambda \nu \chi v i \alpha$ (lampstand). Symbols of the seven churches as explained in verse 20. See Ex 25:35ff. for description of a seven-branched candlestick, but here the lampstands are separate.

Rev 1:13
One like unto a son of man (o $\mu \circ \circ v v \operatorname{vov} \alpha v \theta \rho \omega \pi \sigma v$ ). Note accusative here with ouotov (object of $\varepsilon \varepsilon \delta o v$ ) as in $14: 14$ and not the associative-as is usual ( $1: 15 ; 4: 3,6$ ). Charles holds that ouotov here has the sense of $\omega \varsigma$ (as) and compares $4: 6 ; 22: 1$ for proof. The absence of the article here shows also (Charles) that the idea is not "like the Son of man" for Christ is the Son of man. He is like "a son of man," but not a man.

Clothed ( $\varepsilon v \delta \varepsilon \delta v \mu \varepsilon v o v)$. Perfect passive participle of $\varepsilon v \delta v \omega$, accusative case agreeing with ouotov.

A garment down to the foot $(\pi o \delta \eta \rho \eta)$. Old adjective $\pi o \delta \eta \rho \eta \varsigma$ (from $\pi \sigma \cup \varsigma$, foot, and $\alpha \iota \omega)$, here only in N.T., accusative singular retained with the passive participle as often with verbs of clothing. Supply $\chi \iota \tau \omega v \alpha$ or $\varepsilon \sigma \theta \eta \tau \alpha$ (garment).

Girt about ( $\pi \varepsilon \rho \iota \varepsilon \zeta \omega \sigma \mu \varepsilon \nu \sigma \nu)$. Perfect passive participle of $\pi \varepsilon \rho \iota \zeta \omega \nu \nu \nu$, accusative singular agreeing with ouotov.

At the breasts ( $\pi \rho \circ \varsigma \tau<\iota \mu \alpha \sigma \tau o \iota \varsigma)$. Old word for breasts of a woman (Lu 11:27; 23:29 ) and nipples of a man, as here. High girding like this was a mark of dignity as of the high priest (Josephus, Ant. III. 7. 2). For $\pi \rho \circ \varsigma$ with the locative see $\operatorname{Mr} 5: 11$.

With a golden girdle $(\zeta \omega v \eta \nu \chi \rho v \sigma \alpha \nu)$. Accusative case again retained with the passive participle (verb of clothing). Note also $\chi \rho v \sigma a v$ (vernacular Koine) rather than the old form, $\chi \rho \cup \sigma \eta v$.

## Rev 1:14

As white wool ( $\omega \varsigma \varepsilon \rho \circ \frac{\nu}{\lambda} \lambda \varepsilon \kappa \frac{v}{}$ ). Epıov (wool) in N.T. only here and Heb 9:19, though old word. The person of the Lord Jesus is here described in language largely from Da 7:9 (the Ancient of Days).

White as snow ( $\omega \varsigma \chi \iota \omega \nu$ ). Just "as snow," also in Da 7:9. In N.T. only here and Mt 28:3

As a flame of fire ( $\left.\omega \varsigma \varphi \lambda_{\circ} \xi \pi \nu \rho \circ \varsigma\right)$. In Da 7:9 the throne of the Ancient of Days is $\varphi \lambda_{\circ} \xi$ $\pi \cup \rho o \varsigma$, while in $\mathrm{Da} 10: 6$ the eyes of the Ancient of Days are $\lambda \alpha \mu \pi \alpha \delta \varepsilon \varsigma \pi \nu \rho o \varsigma$ (lamps of fire). See also 2:18; 19:12 for this bold metaphor (like Heb 1:7).

Rev 1:15
Burnished brass ( $\chi \alpha \lambda \kappa о \lambda \iota \beta \nu \omega)$. Associative-instrumental case after o $\mu \circ$ oto. This word has so far been found nowhere else save here and 2:18. Suidas defines it as an $\eta \lambda \varepsilon \chi \kappa \tau \rho o v$ (amber) or a compound of copper and gold and silver (aurichalcum in the Latin Vulgate). It is in reality an unknown metal.

As if it had been refined ( $\omega \varsigma \pi \varepsilon \pi \nu \rho \circ \mu \varepsilon \nu \eta \varsigma$ ). Perfect passive participle of $\pi v \rho o \omega$, old verb, to set on fire, to glow, as in Eph 6:16; Re 3:18. The feminine gender shows that $\eta$ $\chi \alpha \lambda \kappa о \lambda_{\iota} \beta \alpha \nu о \varsigma$ is referred to with $\tau \eta \varsigma \chi \alpha \lambda \kappa о \lambda_{\iota} \beta \alpha v o v$ understood, for it does not agree in case with the associative-instrumental $\chi \alpha \lambda_{\kappa} \lambda_{ı} \beta \alpha \nu \omega$ just before. Some would call it a slip for $\pi \varepsilon \pi v \rho о \mu \varepsilon \nu \omega$ as Aleph, and some cursives have it (taking $\chi \alpha \lambda \kappa о \lambda ı \beta \alpha \nu \omega$ to be neuter, not
feminine). But P Q read $\pi \varepsilon \pi \nu \rho \omega \mu \varepsilon v o$ (masculine plural), a correction, making it agree in number and gender with $\pi$ по $\delta \varepsilon \varsigma$ (feet).

In a furnace ( $\varepsilon v \kappa \alpha \mu \nu \omega)$. Old word, in N.T. also 9:2; Mt 13:42,50.
As the voice of many waters ( $\omega \varsigma \varphi \omega v \eta \nu \delta \alpha \tau \omega v \pi \sigma \lambda \lambda \omega v$ ). So the voice of God in the Hebrew (not the LXX) of Eze 43:2 . Repeated in 14:2; 19:6 .

Rev 1:16
And he had ( $\kappa \alpha \varepsilon \chi \omega v$ ). "And having," present active participle of $\varepsilon \chi \omega$, loose use of the participle (almost like $\varepsilon \not \chi \varepsilon$, imperfect) and not in agreement with avtov, genitive case. This is a common idiom in the book; a Hebraism, Charles calls it.

In his right hand ( $\varepsilon v \tau \eta \delta \varepsilon \xi \not \propto \chi \varepsilon ı \rho$ ). For safe keeping as in Joh 10:28 .
Seven stars ( $\alpha \sigma \tau \varepsilon \rho \alpha \varsigma \varepsilon \pi \tau \alpha$ ). Symbols of the seven churches (verse 20), seven planets rather than Pleiades or any other constellation like the bear.

Proceeded ( $\varepsilon к \pi о \rho \varepsilon v o \mu \varepsilon v \eta$ ). Present middle participle of $\varepsilon к \pi о \rho \varepsilon v o \mu \alpha$, old compound (Mt 3:5 ) used loosely again like $\varepsilon \chi \omega v$.

A sharp two-edged sword ( $\rho \circ \mu \varphi \alpha \iota \alpha \delta_{\iota \sigma \tau о \mu о \varsigma ~ о \xi \varepsilon ı) . ~ " A ~ s w o r d ~ t w o-m o u t h e d ~ s h a r p . " ~}^{\text {" }}$ Po $\mu \varphi \alpha \iota \alpha$ (as distinct from $\mu \alpha \chi \alpha \iota \rho \alpha$ ) is a long sword, properly a Thracian javelin, in N.T. only Lu 2:35; Re 1:16; 2:12; Heb 4:12. See $\sigma \tau о \mu \alpha$ used with $\mu$ ахаı $\rho \eta$, in Lu 21:24 (by the mouth of the sword).

Countenance ( $\mathrm{o} \psi 1 \varsigma$ ). Old word (from ort $\omega$ ), in N.T. only here, Joh 7:24; 11:44.
As the sun shineth ( $\omega \varsigma$ o $\eta \lambda_{\iota} \varsigma \varsigma$ ¢aıve). Brachylogy, "as the sun when it shines." For pauve see Joh 1:5.

Rev 1:17
I fell ( $\varepsilon \pi \varepsilon \sigma \alpha$ ). Late form for the old $\varepsilon \pi \varepsilon \sigma o \nu$ (second aorist active indicative of $\pi \iota \pi \tau \omega$, to fall). Under the over-powering influence of the vision as in 19:10.

He laid ( $\varepsilon \bigoplus \eta \kappa \varepsilon v$ ). First aorist active indicative of $\tau \iota \theta \eta \mu$. The act restored John's confidence.

Fear not ( $\mu \eta \varphi \circ \beta o v$ ). Cf. Lu 1:13 to Zacharias to give comfort.
I am the first and the last ( $\varepsilon \gamma \omega \varepsilon \mu$ о $\pi \rho \omega \tau о \varsigma \kappa \alpha$ о $\varepsilon \sigma \chi \alpha \tau о \varsigma)$. Used in Isa 44:6; 48:12 of God, but here, 2:8; 22:13 of Christ.

And the Living One ( $\kappa \alpha \circ \zeta \omega v$ ). Present active articular participle of $\zeta \alpha \omega$, another epithet of God common in the O.T. (De 32:40; Isa 49:18, etc.) and applied purposely to Jesus, with which see Joh 5:26 for Christ's own words about it.

Rev 1:18
And I was dead (ка єүєvонך $\nu \varepsilon \kappa \rho о \varsigma) . ~ " A n d ~ I ~ b e ~ c a m e ~ d e a d " ~(a o r i s t ~ m i d d l e ~ p a r t i c i p l e ~$ of $\gamma เ v o \mu \alpha$ as in 1:9,10 , definite reference to the Cross).

I am alive ( $\zeta \omega v \varepsilon \mu)$. Periphrastic present active indicative, "I am living," as the words $o \zeta \omega v$ just used mean.

Forevermore ( $\varepsilon \iota \varsigma ~ \tau о \cup \varsigma ~ \alpha ı \omega v a \varsigma ~ \tau \omega v ~ \alpha ı \omega v \omega v$ ). "Unto the ages of the ages," a stronger expression of eternity even than in 1:6.

The keys ( $\tau \alpha \varsigma \kappa \lambda \varepsilon ı \varsigma)$. One of the forms for the accusative plural along with $\kappa \lambda \varepsilon \iota \delta \alpha \varsigma$, the usual one (Mt 16:19).

Of death and of Hades ( $\tau o v ~ \theta a v a \tau o v ~ к а ~ \tau o v ~ a ı \delta o v) . ~ C o n c e i v e d ~ a s ~ i n ~ M t ~ 16: 18 ~ a s ~ a ~$ prison house or walled city. The keys are the symbol of authority, as we speak of honouring one by giving him the keys of the city. Hades here means the unseen world to which death is the portal. Jesus has the keys because of his victory over death. See this same graphic picture in 6:8; 20:13f. For the key of David see 3:7, for the key of the abyss see 9:1; 20:1 .

Rev 1:19
Therefore (ouv). In view of Christ's words about himself in verse 18 and the command in verse 11.

Which thou sawest ( $\alpha \varepsilon \varepsilon \delta \varepsilon \varsigma)$. The vision of the Glorified Christ in verses 13-18.
The things which are ( $\alpha$ عוбıv). Plural verb (individualising the items) though $\alpha$ is neuter plural, certainly the messages to the seven churches ( $1: 20-3: 22$ ) in relation to the world in general, possibly also partly epexegetic or explanatory of a $\varepsilon เ \delta \varepsilon \varsigma$.

The things which shall come to pass hereafter ( $\alpha \mu \varepsilon \lambda \lambda \varepsilon \gamma \iota v \varepsilon \sigma \theta \alpha \mu \varepsilon \tau \alpha \tau \alpha v \tau \alpha$ ). Present middle infinitive with $\mu \varepsilon \lambda \lambda \varepsilon$, though both aorist and future are also used. Singular verb here ( $\mu \varepsilon \lambda \lambda \varepsilon$ ) blending in a single view the future. In a rough outline this part begins in 4:1 and goes to end of chapter 22, though the future appears also in chapters 2 and 3 and the present occurs in 4 to 22 and the elements in the vision of Christ ( $1: 13-18$ ) reappear repeatedly.

Rev 1:20
The mystery of the seven stars ( $\tau 0 \mu \nu \sigma \tau \eta \rho \circ \nu \tau \omega \nu \varepsilon \pi \tau \alpha \alpha \sigma \tau \varepsilon \rho \omega \nu$ ). On the word $\mu \nu \sigma \tau \eta \rho \iota v$ see on Mt 13:11; 2Th 2:7; Col 1:26. Here it means the inner meaning (the secret symbol) of a symbolic vision (Swete) as in 10:7; 13:18; 17:7,9; Da 2:47. Probably the accusative absolute (Charles), "as for the mystery" (Robertson, Grammar, pp. 490, 1130), as in Ro 8:3. This item is picked out of the previous vision ( $1: 16$ ) as needing explanation at once and as affording a clue to what follows (2:1,5 ).

Which (ovs). Masculine accusative retained without attraction to case of $\alpha \sigma \tau \varepsilon \rho \omega \nu$ (genitive, $\omega v$ ).

In my right hand $(\varepsilon \pi \tau \eta \varsigma \delta \varepsilon \xi \iota a \varsigma \mu \circ v)$. Or "upon," but $\varepsilon \nu \tau \eta$, etc., in verse 16.
And the seven golden candlesticks ( $\kappa \alpha \tau \alpha \varsigma \varepsilon \pi \tau \alpha \lambda \nu \chi \nu \iota \alpha \varsigma \tau \alpha \varsigma \chi \rho \cup \sigma \alpha \varsigma)$. "The seven lampstands the golden," identifying the stars of verse 16 with the lampstands of verse 12. The accusative case here is even more peculiar than the accusative absolute $\mu v \sigma \tau \eta \rho \circ v$, since the genitive $\lambda \nu \chi \nu t \omega \nu$ after $\mu \nu \sigma \tau \eta \rho ⿺ 辶 v$ is what one would expect. Charles suggests that John did not revise his work.

The angels of the seven churches $(\alpha \gamma \gamma \varepsilon \lambda o \tau \omega \nu \varepsilon \pi \tau \alpha \varepsilon \kappa \kappa \lambda \eta \sigma \iota \omega v)$. Anarthrous in the predicate (angels of, etc.). "The seven churches" mentioned in 1:4,11. Various views of
$\alpha \gamma \gamma \varepsilon \lambda o c$ here exist. The simplest is the etymological meaning of the word as messenger from $\alpha \gamma \gamma \varepsilon \lambda \lambda \omega$ (Mt 11:10) as messengers from the seven churches to Patmos or by John from Patmos to the churches (or both). Another view is that $\alpha \gamma \gamma \varepsilon \lambda o s$ is the pastor of the church, the reading $\tau \eta v$ үuvaika oov (thy wife) in 2:20 (if genuine) confirming this view. Some would even take it to be the bishop over the elders as $\varepsilon \pi \iota \sigma \chi \circ \pi \circ$, in Ignatius, but a separate $\alpha \gamma \gamma \varepsilon \lambda o c$ in each church is against this idea. Some take it to be a symbol for the church itself or the spirit and genius of the church, though distinguished in this very verse from the churches themselves (the lampstands). Others take it to be the guardian angel of each church assuming angelic patrons to be taught in Mt 18:10; Ac 12:15. Each view is encompassed with difficulties, perhaps fewer belonging to the view that the "angel" is the pastor.

Are seven churches ( $\varepsilon \pi \tau \alpha \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha \varepsilon เ \sigma \iota v)$. These seven churches ( $1: 4,11$ ) are themselves lampstands ( 1:12) reflecting the light of Christ to the world (Mt 5:14-16; Joh 8:12) in the midst of which Christ walks ( $1: 13$ ).

## Revelation 2

Rev 2:1
In Ephesus ( $\varepsilon \nu \mathrm{E} \varphi \varepsilon \sigma \omega$ ). Near the sea on the river Cayster, the foremost city of Asia Minor, the temple-keeper of Artemis and her wonderful temple (Ac 19:35 ), the home of the magic arts (Ephesian letters, Ac 19:19) and of the mystery-cults, place of Paul's three years' stay (Ac 19:1-10; 20:17-38) , where Aquila and Priscilla and Apollos laboured (Ac 18:24-28 ), where Timothy wrought (I and II Tim.), where the Apostle John preached in his old age. Surely it was a place of great privilege, of great preaching. It was about sixty miles from Patmos and the messenger would reach Ephesus first. It is a free city, a seat of proconsular government (Ac 19:38), the end of the great road from the Euphrates. The port was a place of shifting sands, due to the silting up of the mouth of the Cayster. Ramsay (Letters to the Seven Churches, p. 210) calls it "the City of Change."

These things $(\tau \alpha \delta \varepsilon)$. This demonstrative seven times here, once with the message to each church (2:1,8,12,18; 2:1,7,14 ), only once elsewhere in N.T. (Ac 21:11).

He that holdeth (o $\kappa \rho \alpha \tau \omega \nu$ ). Present active articular participle of $\kappa \rho \alpha \tau \varepsilon \omega$, a stronger word than $\varepsilon \chi \omega \nu$ in $1: 16$, to which it refers.

He that walketh (o $\pi \varepsilon \rho \iota \pi \alpha \tau \omega v$ ). Present active articular participle of $\pi \varepsilon \rho \iota \pi \alpha \tau \varepsilon \omega$, an allusion to $1: 13$. These two epithets are drawn from the picture of Christ in 1:13-18, and appropriately to conditions in Ephesus describe Christ's power over the churches as he moves among them.

Rev 2:2
I know (oı $\delta \alpha$ ). Rather than $\gamma \iota \omega \sigma \kappa \omega$ and so "emphasizes better the absolute clearness of mental vision which photographs all the facts of life as they pass" (Swete). So also in $2: 9,13,19 ; 3: 1,8,15$. For the distinction see Joh $21: 17$, "where the universal knowledge passes into the field of special observation."

Works $(\varepsilon \rho \gamma \alpha)$. The whole life and conduct as in Joh 6:29.
And thy toil and patience ( $\kappa \alpha \tau о \nu \kappa о \pi о \nu \kappa \alpha \tau \eta \nu v \pi о \mu о \nu \eta \nu \sigma о \nu)$. "Both thy toil and patience," in explanation of $\varepsilon \rho \gamma \alpha$, and see 1 Th $1: 3$, where all three words ( $\varepsilon \rho \gamma \circ \nu$, колоб, $v \pi о \mu о v \eta$ ) occur together as here. See 14:13 for sharp distinction between $\varepsilon \rho \gamma \alpha$ (activities) and коло (toils, with weariness). Endurance ( $v \pi о \mu о \nu \eta$ ) in hard toil (колос).

And that ( $\kappa \alpha о \tau)$. Further explanation of колоৎ (hard toil).
Not able (ov $\delta v v \eta$ ). This Koine form for the Attic $\delta v v a \sigma a$ (second person singular indicative middle) occurs also in Mr 9:22; Lu 16:2 .

Bear $(\beta \alpha \sigma \tau \alpha \sigma \alpha)$. First aorist active infinitive of $\beta \alpha \sigma \tau \alpha \zeta \omega$, for which verb see Joh 10:31; 12:6; Ga 6:2. These evil men were indeed a heavy burden.

And didst try ( $\kappa \alpha \varepsilon \pi \varepsilon \varsigma \rho \alpha \sigma \alpha \varsigma)$. First aorist active indicative of $\pi \varepsilon เ \rho \alpha \zeta \omega$, to test, a reference to a recent crisis when these Nicolaitans (verse 6) were condemned. The present tenses ( $\delta u v \eta \iota, ~ \varepsilon \chi \varepsilon ı$ ) indicate the continuance of this attitude. Cf. 1Jo 4:1.
 missionaries of these Nicolaitans who posed as equal to or even superior to the original apostles, like the Judaizers so described by Paul (2Co 11:5,13; 12:11 ). Paul had foretold such false teachers (Gnostics), grievous wolves, in Ac 20:29 ; in sheep's clothing, Jesus had said (Mt 7:15).

And they are not ( $\kappa \alpha$ ouk $\varepsilon$ عाбเv). A parenthesis in Johannine style (Joh 2:9; 3:9; 1Jo 3:1

And didst find (ка $\varepsilon \cup \rho \varepsilon \varsigma)$. Second aorist active indicative of $\varepsilon v \rho \iota \sigma \kappa \omega$. Dropping back to the regular structure parallel with $\varepsilon \pi \varepsilon ⿺ \rho a \sigma a \varsigma$.

False ( $\psi \varepsilon v \delta \varepsilon \iota \varsigma)$. Predicate accusative plural of $\psi \varepsilon v \delta \eta \varsigma$, self-deceived deceivers as in 21:8.

Rev 2:3
Thou hast ( $\varepsilon \chi \varepsilon \varsigma)$ ). Continued possession of patience.
Didst bear ( $\varepsilon \beta \alpha \sigma \tau \alpha \sigma \alpha \varsigma)$. First aorist indicative of $\beta \alpha \sigma \tau \alpha \zeta \omega$, repeated reference to the crisis in verse 2.

And hast not grown weary ( к ои кєкотьакєऽ). Perfect active indicative of котıа $\omega$, old verb, to grow weary (Mt 6:28), play on the word котоৎ, late form in - $\varsigma$, for the regular - $\alpha$,
 Ephesian church can bear anything except the presence of impostors in her membership" (Moffatt).

Rev 2:4
This against thee, that (ката бov от). For the phrase "have against" see Mt 5:23. The ot clause is the object of $\varepsilon \chi \omega$.

Thou didst leave ( $\alpha \varphi \eta \kappa \varepsilon \varsigma)$. First aorist active (kappa aorist, but with $-\varepsilon \varsigma$ instead of $-\alpha \varsigma$ ) of $\alpha \varphi \iota \eta \mu$, a definite and sad departure.

Thy first love ( $\tau \eta v \alpha \gamma \alpha \pi \eta \nu \sigma o v \tau \eta v \pi \rho \omega \tau \eta \nu)$. "Thy love the first." This early love, proof of the new life in Christ (1Jo 3:13f. ), had cooled off in spite of their doctrinal purity. They had remained orthodox, but had become unloving partly because of the controversies with the Nicolaitans.

Rev 2:5
Remember ( $\mu \nu \eta \mu$ oveve). Present active imperative of $\mu \nu \eta \mu \circ v \varepsilon v \omega$, "continue mindful" (from $\mu \nu \eta \mu \omega v$ ).

Thou art fallen ( $\pi \varepsilon \pi \tau \omega \kappa \varepsilon \varsigma)$. Perfect active indicative of $\pi \iota \pi \tau \omega$, state of completion. Down in the valley, look up to the cliff where pure love is and whence thou hast fallen down.

And repent ( $\kappa \alpha \mu \varepsilon \tau \alpha v o \eta \sigma o v)$. First aorist active imperative of $\mu \varepsilon \tau \alpha v o \varepsilon \omega$, urgent appeal for instant change of attitude and conduct before it is too late.

And do ( $\kappa \alpha \pi \sigma \eta \sigma o v$ ). First aorist active imperative of $\pi o \iota \varepsilon \omega$, "Do at once."
The first works ( $\tau \alpha \pi \rho \omega \tau \alpha \varepsilon \rho \gamma \alpha$ ). Including the first love (Ac 19:20; 20:37; Eph 1:3ff. ) which has now grown cold (Mt 24:12).

Or else ( $\varepsilon \delta \varepsilon \mu \eta$ ). Elliptical condition, the verb not expressed ( $\mu \varepsilon \tau \alpha v o \varepsilon \iota \varsigma)$, a common idiom, seen again in verse 16 , the condition expressed in full by $\varepsilon \alpha \nu \mu \eta$ in this verse and verse 22 .

I come ( $\varepsilon \rho \chi \circ \mu \alpha)$. Futuristic present middle (Joh 14:2f.).
To thee ( $\sigma 0$ ). Dative, as in 2:16 also.
Will move ( $\kappa เ \nu \eta \sigma \omega$ ). Future active of $\kappa เ v \varepsilon \omega$. In Ignatius' Epistle to Ephesus it appears that the church heeded this warning.

Except thou repent ( $\varepsilon \alpha v \mu \eta \mu \varepsilon \tau \alpha v o \eta \sigma \eta \iota \varsigma)$. Condition of third class with $\varepsilon \alpha v \mu \eta$ instead of $\varepsilon \mu \eta$ above, with the first aorist active subjunctive of $\mu \varepsilon \tau \alpha v o \varepsilon \omega$.

Rev 2:6
That thou hatest ( $о \tau \mu \tau \sigma \boxed{)}$ ). Accusative object clause in apposition with tovto (this). Trench tells of the words used in ancient Greek for hatred of evil ( $\mu \iota \sigma о \pi о \nu \eta \rho ı \alpha$ ) and $\mu$ нотоvŋроя (hater of evil), neither of which occurs in the N.T., but which accurately describe the angel of the church in Ephesus.

Of the Nicolaitans ( $\tau \omega \nu$ Nıко入aı $\tau \omega \nu$ ). Mentioned again in verse 15 and really meant in verse 2. Irenaeus and Hippolytus take this sect to be followers of Nicolaus of Antioch, one of the seven deacons (Ac 6:5), a Jewish proselyte, who is said to have apostatized. There was such a sect in the second century (Tertullian), but whether descended from Nicolaus of Antioch is not certain, though possible (Lightfoot). It is even possible that the Balaamites of verse 14 were a variety of this same sect (verse 15).

Which I also hate ( $\alpha \kappa \alpha \gamma \omega \mu \sigma \omega$ ). Christ himself hates the teachings and deeds of the Nicolaitans ( $\alpha$, not ouc, deeds, not people), but the church in Pergamum tolerated them.

Rev 2:7
He that hath an ear (o $\varepsilon \chi \omega \vee$ ovৎ). An individualizing note calling on each of the hearers ( $1: 3$ ) to listen ( $2: 7,11,17,28 ; 3: 3,6,13,22$ ) and a reminiscence of the words of Jesus in the Synoptics (Mt 11:15; 13:9,43; Mr 4:9,23; Lu 8:8; 14:35 ), but not in John's Gospel.

The spirit ( $\tau \mathrm{o} \pi \nu \varepsilon v \mu \alpha$ ). The Holy Spirit as in 14:13; 22:17. Both Christ and the Holy Spirit deliver this message. "The Spirit of Christ in the prophet is the interpreter of Christ's voice" (Swete).

To him that overcometh ( $\tau \omega v / \kappa \omega v \tau$ ). Dative of the present (continuous victory) active articular participle of $v ı \kappa \alpha \omega$, a common Johannine verb (Joh 16:33; 1Jo 2:13f; 4:4; 5:4f.; Re $2: 7,11,17,26 ; 3: 5,12,21 ; 5: 5 ; 12: 11 ; 15: 2 ; 17: 14 ; 21: 7$ ). Faith is dominant in Paul, victory in John, faith is victory (1Jo 5:4). So in each promise to these churches.

I will give $(\delta \omega \sigma \omega)$. Future active of $\delta \iota \delta \omega \mu$ as in $2: 10,17,23,26,28 ; 3: 8,21 ; 6: 4 ; 11: 3 ; 21: 6$

To eat ( $\varphi \propto \gamma \varepsilon \imath v$ ). Second aorist active infinitive of $\varepsilon \sigma \theta \iota \omega$.
Of the tree of life ( $\varepsilon \kappa \tau \circ v \xi \cup \lambda o v \tau \eta \varsigma \zeta \omega \eta \varsigma)$. Note $\varepsilon \kappa$ with the ablative with $\varphi \alpha \gamma \varepsilon \iota \nu$, like our "eat of" (from or part of). From Ge 2:9; 3:22. Again in Re 22:2,14 as here for immortality. This tree is now in the Garden of God. For the water of life see 21:6; 22:17 (Cf. Joh 4:10,13f. ).

Which (o). The $\xi v \lambda o v$ (tree).
In the Paradise of God ( $\varepsilon v \tau \omega \pi \alpha \rho \alpha \delta \varepsilon \iota \sigma \omega$ $\tau 0 v \theta \varepsilon o v$ ). Persian word, for which see Lu 23:43; 2Co 12:4. The abode of God and the home of the redeemed with Christ, not a mere intermediate state. It was originally a garden of delight and finally heaven itself (Trench), as here.

Rev 2:8
In Smyrna ( $\varepsilon v \Sigma \mu \nu \rho \nu \eta)$. North of Ephesus, on a gulf of the Aegean, one of the great cities of Asia (province), a seat of emperor-worship with temple to Tiberius, with many Jews hostile to Christianity who later join in the martyrdom of Polycarp, poor church (rich in grace) which receives only praise from Christ, scene of the recent massacre of Greeks by the Turks. Ramsay (op. cit., p. 251) terms Smyrna "the City of Life." Christianity has held on here better than in any city of Asia.

The first and the last (о $\pi \rho \omega \tau о \varsigma \kappa \alpha о \varepsilon \sigma \chi \alpha \tau о \varsigma) . ~ R e p e a t i n g ~ t h e ~ l a n g u a g e ~ o f ~ 1: 17 . ~$
Which was dead (oৎ $\varepsilon \uparrow \varepsilon \varepsilon \varepsilon \tau о ~ v \varepsilon \kappa \rho о \varsigma)$. Rather, "who became dead" (second aorist middle indicative of $\gamma เ v o \mu \alpha)$ as in 1:18.

And lived again ( $\kappa \alpha \varepsilon \zeta \eta \sigma \varepsilon v$ ). First aorist (ingressive, came to life) active of $\zeta \alpha \omega$ (o $\zeta \omega \nu$ in $1: 18$ ). Emphasis on the resurrection of Christ.

Rev 2:9
Thy tribulation and thy poverty ( $\sigma o v \tau \eta \nu \theta \lambda \iota \psi \iota \nu \kappa \alpha \pi \tau \omega \chi \varepsilon \iota \alpha \nu$ ). Separate articles of same gender, emphasizing each item. The tribulation was probably persecution, which helped to intensify the poverty of the Christians (Jas 2:5; 1Co 1:26; 2Co 6:10; 8:2 ). In contrast with the wealthy church in Laodicea ( $3: 17$ ).

But thou art rich ( $\alpha \lambda \lambda \alpha \pi \lambda$ ovбıoৎ $\varepsilon$ ). Parenthesis to show the spiritual riches of this church in contrast with the spiritual poverty in Laodicea ( $3: 17$ ), this a rich poor church, that a poor rich church. Rich in grace toward God (Lu 12:21) and in good deeds (1Ti 6:18 ). Perhaps Jews and pagans had pillaged their property (Heb 10:34), poor as they already were.

Blasphemy ( $\beta \lambda \alpha \sigma \varphi \eta \mu \iota \alpha v$ ). Reviling believers in Christ. See Mr 7:22. The precise charge by these Jews is not indicated, but see Ac 13:45.

Of them which say $(\varepsilon \kappa \tau \omega \nu \lambda \varepsilon \gamma o v \tau \omega v$ ). "From those saying" ( $\varepsilon \kappa$ with the ablative plural of the present active articular participle of $\lambda \varepsilon \gamma \omega)$.

They are Jews (Iovסaiouc eiva eavtouc). This is the accusative of general reference and the infinitive in indirect discourse after $\lambda \varepsilon \gamma \omega$ (Ac 5:36; 8:9) even though $\lambda \varepsilon \gamma 0 \nu \tau \omega v$ is here ablative (cf. 3:9), common idiom. These are actual Jews and only Jews, not Christians.

And they are not ( $\kappa \alpha$ оик $\varepsilon ו \sigma เ v)$. Another parenthesis like that in 2:2. These are Jews in name only, not spiritual Jews (Ga 6:15f., Ro 2:28).

A synagogue of Satan ( $\sigma \cup v \alpha \gamma \omega \gamma \eta$ tov $\Sigma a \tau \alpha v \alpha$ ). In 3:9 again and note 2:13,24, serving the devil (Joh 8:44) instead of the Lord (Nu 16:3; 20:4).

Rev 2:10
Fear not ( $\mu \eta \varphi \mathrm{\eta} \beta \boldsymbol{o}$ ). As in 1:17. Worse things are about to come than poverty and blasphemy, perhaps prison and death, for the devil "is about to cast" ( $\mu \varepsilon \lambda \lambda \varepsilon \beta \alpha \lambda \lambda \varepsilon ı v$ ), "is going to cast."

Some of you ( $\varepsilon \xi \nu \mu \omega v$ ). Without $\tau \imath v a \varsigma$ (some) before $\varepsilon \xi \nu \mu \omega v$, a common idiom as in 3:9; 11:19; Lu 11:49.

That ye may be tried ( $เ v \alpha \pi \varepsilon \iota \rho \alpha \sigma \theta \eta \tau \varepsilon$ ). Purpose clause with $\operatorname{iva}$ and the first aorist passive subjunctive of $\pi \varepsilon \iota \rho a \zeta \omega$. John himself is in exile. Peter and John had often been in prison together. James the brother of John, Paul, and Peter had all suffered martyrdom. In 3:10 a general persecution is outlined by $\pi \varepsilon \iota \rho \alpha \sigma \mu \circ \varsigma$.

Ye shall have ( $\varepsilon \xi \varepsilon \tau \varepsilon$ ). Future active, but some MSS. read $\varepsilon \chi \eta \tau \varepsilon$ (present active subjunctive with hina, "that ye may have").

Tribulation ten days $(\theta \lambda \iota \psi \iota \nu \eta \mu \varepsilon \rho \omega \nu \delta \varepsilon \kappa \alpha)$. "Tribulation of ten days" (or "within ten days"). It is unwise to seek a literal meaning for ten days. Even ten days of suffering might seem an eternity while they lasted.

Be thou faithful ( $\gamma$ ıvov $\pi \iota \sigma \tau o \varsigma$ ). "Keep on becoming faithful" (present middle imperative of $\gamma ı v o \mu \alpha)$, "keep on proving faithful unto death" (Heb 12:4) as the martyrs have done (Jesus most of all).

The crown of life ( $\tau 0 v \sigma \tau \varepsilon \varphi \alpha v o v \tau \eta \zeta \zeta \omega \eta \varsigma)$. See this very image in Jas 1:12, a familiar metaphor in the games at Smyrna and elsewhere in which the prize was a garland. See also 3:11. The crown consists in life ( 2:7). See Paul's use of $\sigma \tau \varepsilon \varphi \alpha v o c$ in 1 Co 9:25; 2Ti 4:8 .

Rev 2:11
Shall not be hurt (ov $\mu \eta \alpha \delta \iota \kappa \eta \theta \eta$ ). Strong double negative with first aorist passive subjunctive of $\alpha \delta ⿺ \kappa \varepsilon \omega$, old verb, to act unjustly (from $\alpha \delta \iota \kappa \circ \varsigma)$, here to do harm or wrong to one, old usage as in 6:6; 7:2f.; 9:4,10; 11:5.

Of the second death ( $\varepsilon \kappa$ тov $\theta a v a \tau o v ~ \tau o v ~ \delta \varepsilon v \tau \varepsilon \rho о и) . ~ E к ~ h e r e ~ u s e d ~ f o r ~ t h e ~ a g e n t ~ o r ~ i n-~$ strument as often ( $3: 18 ; 9: 2 ; 18: 1$ ). See 20:6,14; $21: 8$ where "the second death" is explained as "the lake of fire." The idea is present in Da 12:3; Joh 5:29 and is current in Jewish circles as in the Jerusalem Targum on De 33:6 and in Philo. It is not annihilation. The Christians put to death in the persecution will at least escape this second death (eternal punishment).

Rev 2:12

In Pergamum ( $\varepsilon v \Pi \varepsilon \rho \gamma \alpha \mu \omega$ ). In a north-easterly direction from Smyrna in the Caicus Valley, some fifty-five miles away, in Mysia, on a lofty hill, a great political and religious centre. Ramsay (Op. cit., p. 281) calls it "the royal city, the city of authority." Eumenes II (B.C. 197-159) extended it and embellished it with many great buildings, including a library with 200,000 volumes, second only to Alexandria. The Kingdom of Pergamum became a Roman province B.C. 130. Pliny termed it the most illustrious city of Asia. Parchment ( $\chi \alpha \rho \tau \alpha$ $\Pi \varepsilon \rho \gamma \alpha \mu \varepsilon v \alpha)$ derived its name from Pergamum. It was a rival of Ephesus in the temples to Zeus, Athena, Dionysos, in the great grove Nicephorium (the glory of the city). Next to this was the grove and temple of Asklepios, the god of healing, called the god of Pergamum, with a university for medical study. Pergamum was the first city in Asia (A.D. 29) with a temple for the worship of Augustus (Octavius Caesar). Hence in the Apocalypse Pergamum is a very centre of emperor-worship "where Satan dwells" ( 2:13). Here also the Nicolaitans flourished ( 2:15) as in Ephesus ( 2:6) and in Thyatira (2:20f. ). Like Ephesus this city is called temple-sweeper ( $v \varepsilon \omega \kappa о \rho o \varsigma)$ for the gods.

The sharp two-edged sword ( $\tau \eta \nu \rho \circ \mu \varphi \alpha \iota \alpha \nu \tau \eta \nu \delta$ เб $\tau \circ \mu \circ \nu \tau \eta \nu$ o $\xi \varepsilon \iota \alpha \nu$ ). This item repeated from 1:16 in the same order of words with the article three times (the sword the twomouthed the sharp) singling out each point.

Rev 2:13
Where ( $\pi 0 v$--олоv). Пov is interrogative adverb used here in an indirect question as
 Satan not simply resided in Pergamum, but his "throne" or seat of power of king or judge (Mt 19:28; Lu 1:32,52). The symbol of Asklepios was the serpent as it is of Satan (12:9; 20:2 ). There was, besides, a great throne altar to Zeus cut on the Acropolis rock, symbol of "rampant paganism" (Swete) and the new Caesar-worship with the recent martyrdom of Antipas made Pergamum indeed a very throne of Satan.

Holdest fast my name ( $\kappa \rho \alpha \tau \varepsilon \iota \varsigma ~ \tau o ~ o v o \mu \alpha ~ \sigma о v) . ~ P r e s e n t ~ a c t i v e ~ i n d i c a t i v e ~ o f ~ к \rho а \tau \varepsilon \omega, ~$ "dost keep on holding," as in 2:25, 3:11. This church refused to say Kvpıo̧ Kaıбap (Martyrd. Polyc. 8f.) and continued to say Kvpıos I $\eta$ бovs (1Co 12:3 ). They stood true against the emperor-worship.

Didst not deny (ovk $\eta \rho v \eta \sigma \omega$ ). First aorist middle second person singular of $\alpha \rho v \varepsilon o \mu \alpha$. Reference to a specific incident not known to us.

My faith ( $\tau \eta v \pi \iota \sigma \tau \iota \nu \mu \circ v$ ). Objective genitive, "thy faith in me."
Of Antipas (Aviıtac). Indeclinable in this form. It is possible that Avtıra (genitive) was really written, though unimportant as the nominative follows in apposition. Nothing is really known of this early martyr in Pergamum before the writing of the Apocalypse. One legend is that he was burnt to death in a brazen bull. Other martyrs followed him at Pergamum (Agathonice, Attalus, Carpus, Polybus).

My witness (o $\mu \alpha \rho \tau v \varsigma \mu \circ v$ ). Nominative in apposition with a genitive as in 1:5 (with ablative), common solecism in the Apocalypse. "Witness" as Jesus had said they should be (Ac 1:8) and Stephen was (Ac 22:20) and others were (Re 17:6). The word later (by third century) took on the modern meaning of martyr.

My faithful one (o $\pi / \sigma \tau o \varsigma \mu \circ v$ ). Nominative also, with $\mu \circ v$ also. Jesus gives Antipas his own title (Swete) as in 1:5; 3:14. Faithful unto death.

Was killed ( $\alpha \pi \varepsilon \kappa \tau \alpha v \theta \eta$ ). First aorist passive indicative of $\alpha \pi \circ \kappa \tau \varepsilon เ v \omega$, this passive form common in the Apocalypse (?2:13; 6:11; 5:9,13; 13:10,15; 18, 20; 19:21?).

Among you ( $\pi \alpha \rho \nu \mu \nu v$ ). By your side. Proof of the throne of Satan, "where Satan dwells" (отоv о $\Sigma a \tau \alpha v a \varsigma ~ к а т о к к \varepsilon), ~ r e p e a t e d ~ f o r ~ e m p h a s i s . ~$

Rev 2:14
There ( $\varepsilon \kappa \varepsilon$ ). That is $\pi \alpha \rho^{\prime} v \mu \nu v$ (among you). A party in the church that resisted emperorworship, to the death in the case of Antipas, yet were caught in the insidious wiles of the Nicolaitans which the church in Ephesus withstood.

Some that hold (кратоиขтаৎ). "Men holding" (present active participle of кратєш).
The teaching of Balaam ( $\tau \eta \nu \delta \Delta \delta \alpha \chi \eta \nu B \alpha \lambda \alpha \alpha \mu$ ). Indeclinable substantive Balaam ( Nu 25:1-9; 31:15f. ). The point of likeness of these heretics with Balaam is here explained.

Taught Balak ( $\varepsilon \delta \delta \delta \alpha \sigma \kappa \varepsilon \nu \tau \omega$ В $\alpha \lambda \alpha \kappa$ ). Imperfect indicative of $\delta \iota \delta \alpha \sigma \kappa \omega$, Balaam's habit, "as the prototype of all corrupt teachers" (Charles). These early Gnostics practised licentiousness as a principle since they were not under law, but under grace (Ro 6:15). The use of the dative with $\delta \iota \delta \alpha \sigma \kappa \omega$ is a colloquialism rather than a Hebraism. Two accusatives often occur with $\delta \iota \delta a \sigma \kappa \omega$.

To cast a stumbling-block ( $\beta \alpha \lambda \varepsilon ı v ~ \sigma \kappa \alpha v \delta \alpha \lambda o v$ ). Second aorist active infinitive (accusative case after $\varepsilon \delta \iota \delta \alpha \sigma \kappa \varepsilon v$ ) of $\beta \alpha \lambda \lambda \omega$, regular use with $\sigma \kappa \alpha v \delta \alpha \lambda$ ov (trap) like $\tau \iota \theta \eta \mu \sigma \kappa \alpha v \delta \alpha \lambda o v$ in Ro 14:13. Balaam, as Josephus and Philo also say, showed Balak how to set a trap for the Israelites by beguiling them into the double sin of idolatry and fornication, which often went together (and do so still).

To eat things sacrificed to idols ( $\varphi \alpha \gamma \varepsilon ı v \varepsilon เ \delta \omega \lambda 0 \theta v \tau \alpha)$ ). Second aorist active infinitive of $\varepsilon \sigma \theta \omega \omega$ and the verbal adjective (from $\varepsilon เ \delta \omega \lambda o v$ and $\theta v \omega$ ), quoted here from Nu 25:1f. , but in inverse order, repeated in other order in verse 20. See Ac 15:29; 21:25; 1Co 8:1ff. for the controversy over the temptation to Gentile Christians to do what in itself was harmless, but which led to evil if it led to participation in the pagan feasts. Perhaps both ideas are involved here. Balaam taught Balak how to lead the Israelites into sin in both ways.

Rev 2:15
So thou also (ovt $\omega \varsigma \kappa \alpha \sigma v$ ). Thou and the church at Pergamum as Israel had the wiles of Balaam.

The teaching of the Nicolaitans likewise ( $\tau \eta \nu \delta \Delta \delta \alpha \chi \eta \nu \tau \omega \nu$ Nıко $\alpha a \iota \tau \omega \nu$ о $\mu \circ \omega \varsigma \varsigma$ ). See on 1:6 for the Nicolaitans. The use of ouot $\omega \varsigma$ ( (likewise) here shows that they followed Balaam
in not obeying the decision of the Conference at Jerusalem (Ac 15:20,29) about idolatry and fornication, with the result that they encouraged a return to pagan laxity of morals (Swete). Some wrongly hold that these Nicolaitans were Pauline Christians in the face of Col 3:5-8; Eph 5:3-6 .

Rev 2:16
Repent therefore ( $\mu \varepsilon \tau \alpha v o \eta \sigma o v o u v$ ). First aorist (tense of urgency) active imperative of $\mu \varepsilon \tau \alpha v o \varepsilon \omega$ with the inferential particle ouv (as a result of their sin).

I come ( $\varepsilon \rho \chi \circ \mu \alpha)$. Futuristic present middle indicative, "I am coming" (imminent), as in $2: 5$ with $\tau \alpha \chi v$ as in $3: 11 ; 11: 14 ; 22: 7,12,20$. As with $\varepsilon v \tau \alpha \chi \varepsilon$ ( $1: 1$ ), we do not know how soon "quickly" is meant to be understood. But it is a real threat.

Against them ( $\mu \varepsilon \tau^{\prime} \alpha v \tau \omega v$ ). This proposition with $\pi o \lambda \varepsilon \mu \varepsilon \omega$ rather than $\kappa \alpha \tau \alpha$ (against) is common in the LXX, but in the N.T. only in Re 2:16; 12:7; 13:4; 17:14 and the verb itself nowhere else in N.T. except Jas 4:2 . "An eternal roll of thunder from the throne" (Renan). "The glorified Christ is in this book a Warrior, who fights with the sharp sword of the word" (Swete).

With ( $\varepsilon v$ ). Instrumental use of $\varepsilon v$. For the language see 1:16; 2:12; 19:15.
Rev 2:17
Of the hidden manna ( $\tau \circ v \mu \alpha v v \alpha$ тоv кєкр $\mu \mu \mu \varepsilon v o v$ ). "Of the manna the hidden" (perfect passive articular participle of $\kappa \rho v \pi \tau \omega$ ). The partitive genitive, the only N.T. example with $\delta \iota \delta \omega \mu$, though $Q$ reads to (accusative) here. For examples of the ablative with $\alpha \pi 0$ and $\varepsilon \kappa$ see Robertson, Grammar, p. 519. See Joh 6:31,49 for the indeclinable word $\mu \alpha v v a$. The golden pot of manna was "laid up before God in the ark" (Ex 16:23). It was believed that Jeremiah hid the ark, before the destruction of Jerusalem, where it would not be discovered till Israel was restored (II Macc. 2:5ff.). Christ is the true bread from heaven (Joh 6:31-33, 48-51 ) and that may be the idea here. Those faithful to Christ will have transcendent fellowship with him. Swete takes it to be "the life-sustaining power of the Sacred Humanity now hid with Christ in God."

A white stone ( $\psi \eta \varphi \circ \vee \lambda \varepsilon \cup \kappa \eta \nu$ ). This old word for pebble (from $\psi \alpha \omega$, to rub) was used in courts of justice, black pebbles for condemning, white pebbles for acquitting. The only other use of the word in the N.T. is in Ac 26:10, where Paul speaks of "depositing his pebble" ( $\kappa \alpha \tau \eta v \varepsilon \gamma \kappa \alpha \psi \eta \varphi \circ v$ ) or casting his vote. The white stone with one's name on it was used to admit one to entertainments and also as an amulet or charm.

A new name written (ovoна каıvov $\gamma^{\varepsilon} \gamma \rho \alpha \mu \mu \varepsilon v o v$ ). Perfect passive predicate participle of $\gamma \rho \alpha \varphi \omega$. Not the man's own name, but that of Christ (Heitmuller, Im Namen $\ \boxtimes \Delta u$, p. 128265). See $3: 12$ for the name of God so written on one. The man himself may be the $\psi \eta \varphi \circ \varsigma$ on which the new name is written. "The true Christian has a charmed life" (Moffatt).

But he that receiveth it ( $\varepsilon \mu \eta$ о $\lambda \alpha \mu \beta \alpha v \omega v$ ). "Except the one receiving it." See Mt 11:27 for like intimate and secret knowledge between the Father and the Son and the one to whom the Son wills to reveal the Father. See also Re 19:12.

Rev 2:18
In Thyatira ( $\varepsilon v \Theta v a \tau \varepsilon \iota \rho o \iota \varsigma)$. Some forty miles south-east of Pergamum, a Lydian city on the edge of Mysia, under Rome since B.C. 190, a centre of trade, especially for the royal purple, home of Lydia of Philippi (Ac 16:14f. ), shown by inscriptions to be full of trade guilds, Apollo the chief deity with no emperor-worship, centre of activity by the Nicolaitans with their idolatry and licentiousness under a "prophetess" who defied the church there. Ramsay calls it "Weakness Made Strong" (op. cit., p. 316).

The Son of God (o vios $\tau o v \theta \varepsilon o v$ ). Here Jesus is represented as calling himself by this title as in Joh 11:4 and as he affirms on oath in Mt 26:63f . "The Word of God" occurs in 19:13.

His eyes like a flame of fire ( $\tau 0 \cup \varsigma ~ о \varphi \theta \alpha \lambda \mu о v \varsigma ~ \alpha v \tau о v \omega \varsigma \varphi \lambda о \gamma \alpha \pi \nu \rho о \varsigma)$. As in 1:14.
His feet like burnished brass (о $\pi о \delta \varepsilon \varsigma ~ a v \tau о v ~ о \mu о ь о ~ \chi \alpha \lambda \kappa о \lambda ı \beta \alpha \nu \omega)$. As in 1:15.
Rev 2:19
Thy works ( $\sigma$ ov $\tau \alpha \varepsilon \rho \gamma \alpha$ ). As in 2:2 and explained (explanatory use of $\kappa \alpha=$ namely) by what follows. Four items are given, with separate feminine article for each ( $\tau \eta v a \gamma a \pi \eta \nu, \tau \eta v$ $\pi \iota \sigma \tau \iota \nu, \tau \eta \nu \delta \iota \alpha \kappa \nu \iota \alpha \nu, \tau \eta \nu v \pi o \mu \circ \nu \eta \nu)$, a longer list of graces than in 2:2 for Ephesus. More praise is given in the case of Ephesus and Thyatira when blame follows than in the case of Smyrna and Philadelphia when no fault is found. Love comes first in this list in true Johannine fashion. Faith ( $\pi \iota \sigma \tau \iota v$ ) here may be "faithfulness," and ministry ( $\delta \iota \alpha \kappa о v \iota \alpha v$ ) is ministration to needs of others (Ac 11:29; 1Co 16:15).

And that ( $\kappa \alpha$ ). Only $\kappa \alpha$ (and) in the Greek, but doubtless o $\tau$ (that) is understood.
Than the first ( $\tau \omega v \pi \rho \omega \tau \omega v$ ). Ablative after the comparative $\pi \lambda \varepsilon \iota o v a$ (more).
Rev 2:20
Thou sufferest ( $\alpha \varphi \varepsilon \iota \varsigma$ ). Late vernacular present active indicative second person singular as if from a form $\alpha \varphi \varepsilon \omega$ instead of the usual $\alpha \varphi \imath \eta \mu$ forms.

The woman Jezebel ( $\tau \eta \nu \gamma v v a \kappa \alpha \operatorname{I\varepsilon } \zeta \alpha \beta \varepsilon \lambda$ ). Symbolical name for some prominent woman in the church in Thyatira, like the infamous wife of Ahab who was guilty of whoredom and witchcraft ( $1 \mathrm{Ki} \mathrm{16:31;} \mathrm{2Ki} \mathrm{9:22} \mathrm{)} \mathrm{and} \mathrm{who} \mathrm{sought} \mathrm{to} \mathrm{drive} \mathrm{out} \mathrm{the} \mathrm{worship} \mathrm{of} \mathrm{God}$ from Israel. Some MSS. here (A Q 40 min.s) have oov (thy wife, thy woman Ramsay makes it), but surely Aleph C P rightly reject $\sigma o v$. Otherwise she is the pastor's wife!

Which calleth herself a prophetess ( $\eta \lambda \varepsilon \gamma \sigma v \sigma \alpha \varepsilon \alpha v \tau \eta \nu \pi \rho \circ \varphi \eta \tau \iota \nu$ ). Nominative articular participle of $\lambda \varepsilon \gamma \omega$ in apposition with the accusative $\gamma v v a \iota \kappa \alpha$ like o $\mu \alpha \rho \tau v \varsigma$ in apposition
 here and Lu 2:36 (Anna), two extremes surely. See Ac 21:9 for the daughters of Philip who prophesied.

And she teacheth and seduceth ( $\kappa \alpha \delta_{i} \delta \alpha \sigma \kappa \varepsilon \kappa \alpha \pi \lambda \alpha v \alpha$ ). A resolution of the participles ( $\delta \delta \delta \alpha \sigma \kappa 0 v \sigma \alpha$ ка $\pi \lambda \alpha v \omega \sigma \alpha$ ) into finite verbs (present active indicatives) as in 1:5f. This woman was not a real prophetess, but a false one with loud claims and loose living. One is puzzled to know how such a woman had so much shrewdness and sex-appeal as to lead astray the servants of God in that church. The church tolerated the Nicolaitans and this leader whose primary object was sexual immorality (Charles) and became too much involved with her to handle the heresy.

Rev 2:21
I gave her time ( $\varepsilon \delta \omega \kappa \alpha \alpha \cup \tau \eta \quad \chi \rho o v o v)$. First aorist active indicative of $\delta \iota \delta \omega \mu$, allusion to a definite visit or message of warning to this woman.

That she should repent (iva $\mu \varepsilon \tau \alpha v o \eta \sigma \eta$ ). Sub-final use of $\imath v a$ with first aorist active subjunctive of $\mu \varepsilon \tau \alpha v o \varepsilon \omega$.

And she willeth not ( $\kappa \alpha$ ov $\theta \varepsilon \lambda \varepsilon$ ). "And she is not willing." Blunt and final like Mt 23:37
To repent of ( $\mu \varepsilon \tau \alpha v o \eta \sigma \alpha \varepsilon \kappa$ ). First aorist (ingressive) active infinitive with $\varepsilon \kappa$, "to make a change out of," the usual construction with $\mu \varepsilon \tau \alpha v o \varepsilon \omega$ in this book (2:22; 9:20ff.; 16:11), with $\alpha \pi 0$ in Ac 8:22. Порvєı (fornication) here, but $\mu$ ot $\chi \varepsilon v \omega$ (to commit adultery) in verse 22.

Rev 2:22
I do cast $(\beta \alpha \lambda \lambda \omega)$. Futuristic present active indicative rather than the future $\beta \alpha \lambda \omega$, since judgment is imminent.

Into a bed ( $\varepsilon ા \varsigma \kappa \lambda \iota \nu \eta v)$. "A bed of sickness in contrast with the bed of adultery" (Beckwith).

Them that commit adultery with her ( $\tau 0 \cup \varsigma \mu о \chi \varepsilon v o v \tau \alpha \varsigma ~ \mu \varepsilon \tau^{\prime} \alpha \cup \tau \eta \varsigma$ ). Present active articular participle accusative plural of $\mu$ ог $\chi \cup \omega$. The actual paramours of the woman Jezebel, guilty of both $\pi$ орveıa (fornication, verse 21) and $\mu \circ \boldsymbol{\tau} \varepsilon ı \alpha$ (adultery), works of Jezebel of old and of this Jezebel. There may be also an allusion to the spiritual adultery (2Co 11:2) towards God and Christ as of old (Jer 3:8; 5:7; Eze 16:22).

Except they repent ( $\varepsilon \alpha v \mu \eta \mu \varepsilon \tau \alpha v o \eta \sigma o v \sigma \iota v$ ). Condition of first class with $\varepsilon a v \mu \eta$ and the future active indicative of $\mu \varepsilon \tau \alpha v o \varepsilon \omega$, put in this vivid form rather than the aorist subjunctive ( $-\omega \sigma \tau v$ ) third-class condition.

Of her works ( $\varepsilon \kappa \tau \omega v \varepsilon \rho \gamma \omega \nu \alpha \cup \tau \eta \varsigma$ ). Avinऽ (her) correct rather than $\alpha \nu \tau \omega v$ (their). Jezebel was chiefly responsible.

Rev 2:23
I will kill with death ( $\alpha \pi о \kappa \tau \varepsilon v \omega \varepsilon v \theta \alpha v \alpha \tau \omega$ ). Future (volitive) active of $\alpha \pi о \kappa \tau \varepsilon I v \omega$ with the tautological (cognate) $\varepsilon v \theta \alpha v a \tau \omega$ (in the sense of pestilence) as in Eze 33:27.

Her children ( $\tau \alpha \tau \varepsilon \kappa v \alpha \alpha \cup \tau \eta \varsigma)$. Either her actual children, like the fate of Ahab's sons (2Ki 10:7) or "her spiritual progeny" (Swete) who have completely accepted her Nicolaitan practices.

Shall know ( $\gamma \nu \omega \sigma 0 \nu \tau \alpha$ ). Future (ingressive punctiliar) middle of $\gamma ı \nu \omega \sigma \kappa \omega$, "shall come to know." "The doom of the offenders was to be known as widely as the scandal had been" (Charles).

Searcheth ( $\varepsilon \rho \alpha v v \omega v$ ). Present active articular participle of $\varepsilon \rho \alpha u v a \omega$, to follow up, to track out, late form for $\varepsilon \rho \varepsilon u v a \omega$, from Jer 17:10 .

Reins (veцpou¢). Old word for kidneys, here only in N.T., quoted also with карסıaৎ from Jer 17:10. See 22:17 for the reward of punishment.

Rev 2:24
To you the rest ( $\nu \mu \nu \nu$ тоıऽ $\lambda$ оוтоıৎ). Dative case. Those who hold out against Jezebel, not necessarily a minority ( $9: 20 ; 19: 21 ; 1$ Th $4: 13$ ).

As many as (ooo). Inclusive of all "the rest."
This teaching ( $\tau \eta v \delta \iota \delta \alpha \chi \eta \nu \tau \alpha u \tau \eta v$ ). That of Jezebel.
Which (oıtıve¢). "Which very ones," generic of the class, explanatory definition as in 1:7.

Know not (ouk $\varepsilon \gamma v \omega \sigma \alpha v)$. Second aorist (ingressive) active of $\gamma เ \nu \omega \sigma \kappa \omega$, "did not come to know by experience."

The deep things of Satan ( $\tau \alpha \beta \alpha \theta \varepsilon \alpha$ tov $\Sigma \alpha \tau \alpha v \alpha$ ). The Ophites (worshippers of the serpent) and other later Gnostics (Cainites, Carpocratians, Naassenes) boasted of their knowledge of "the deep things," some claiming this very language about Satan (the serpent) as Paul did of God (1Co 2:10). It is not clear whether the words here quoted are a boast of the Nicolaitans or a reproach on the other Christians for not knowing the depths of sin. Some even claimed that they could indulge in immorality without sinning ( 1 Jo 1:10; 3:10 ). Perhaps both ideas are involved.

As they say ( $\omega \varsigma \lambda \varepsilon \gamma \sigma 0 \sigma \iota v$ ). Probably referring to the heretics who ridicule the piety of the other Christians.

None other burden (ov-- $\alpha \lambda \lambda о \beta \alpha \rho o \varsigma) . ~ B \alpha \rho o c ~ r e f e r s ~ t o ~ w e i g h t ~(M t ~ 20: 12), ~ \varphi о \rho \tau ı o v, ~$ from $\varphi \varepsilon \rho \omega$, to bear, refers to load (Ga 6:5), oүкос to bulk (Heb 12:1). Apparently a reference to the decision of the Jerusalem Conference (Ac 15:28) where the very word $\beta a \rho o$, is used and mention is made about the two items in verse 20 (fornication and idolatry) without mentioning the others about things strangled, etc. See the Pharisaic narrowness in Mt 23:4

## Rev 2:25

Howbeit ( $\pi \lambda \eta \nu$ ). Common after ovk $\alpha \lambda \lambda$ o as a preposition with the ablative (Mr 12:32 ), but here a conjunction as in Php 1:18 .

Hold fast ( $\kappa \rho \alpha \tau \eta \sigma \alpha \tau \varepsilon$ ). First aorist active imperative of $\kappa \rho \alpha \tau \varepsilon \omega$, either ingressive (get a grip on) or constative (hold on as a single decisive effort). See present imperative кратع in 3:11 (keep on holding).

Till I come ( $\alpha \chi \rho$ ov $\alpha v \eta \xi \omega$ ). Indefinite temporal clause with $\alpha \chi \rho$ ov (until which time) with modal $\alpha \nu$ and either the future active indicative or the first aorist active subjunctive of $\eta \kappa \omega$ (usual idiom with $\alpha \chi \rho$ in Revelation as in 7:3; 15:8; 20:3,5 ).

Rev 2:26
He that overcometh and he that keepeth (o $v \iota \kappa \omega \nu \kappa \alpha$ о $\tau \eta \rho \omega v$ ). Present active articular participles of $v \kappa \alpha \omega$ and $\tau \eta \rho \varepsilon \omega$ in the nominative absolute (nominativus pendens) as in $3: 12,21$, resumed by the dative $\alpha v \tau \omega$ (to him), as in verses 7,17 .

Unto the end ( $\alpha \not \rho \tau \varepsilon \lambda o v \varsigma)$. That is, $\alpha \not \rho \rho$ ov $\alpha v \eta \xi$ o above.
Authority over the nations ( $\varepsilon \xi \sigma \sigma \sigma \iota \alpha v \varepsilon \pi \tau \omega v \varepsilon \theta v \omega v$ ). From Ps 2:8f. The followers of the Messiah will share in his victory over his enemies ( $1: 6 ; 12: 5 ; 19: 15$ ).

Rev 2:27
He shall rule ( $\pi о \mu \alpha \nu \varepsilon$ ). Future active of $\pi о \mu \alpha \iota v \omega$, to shepherd (from $\pi о \not \mu \eta \nu$, shepherd), also from Ps 2:8f. See again Re 7:17; 12:5; 19:15.

With a rod of iron ( $\varepsilon v \rho \alpha \beta \delta \omega \sigma \iota \delta \eta \rho \alpha)$. Continuing the quotation. Instrumental use of $\varepsilon v . \operatorname{Pa} \beta \delta o \varsigma$ (feminine) is the royal sceptre and indicates rigorous rule.

The vessels of the potter ( $\tau \alpha \sigma \kappa \varepsilon \cup \eta \tau \alpha \kappa \varepsilon \rho \alpha \mu \kappa \alpha$ ). Old adjective, belonging to a potter ( кєра $\mu \varepsilon v \sigma, \kappa \varepsilon \rho \alpha \mu о \varsigma), ~ h e r e ~ o n l y ~ i n ~ N . T . ~$

Are broken to shivers ( $\sigma \nu \nu \tau \rho \iota \beta \tau \alpha)$. Present passive indicative of $\sigma \nu \nu \tau \rho \iota \beta \omega$, old verb, to rub together, to break in pieces ( Mr 14:3 ).

Rev 2:28
As I also have received ( $\omega \varsigma \kappa \alpha \gamma \omega \varepsilon \varepsilon \lambda \eta \varphi \alpha$ ). Perfect active indicative of $\lambda \alpha \mu \beta \alpha \nu \omega$. Christ still possesses the power from the Father (Ac 2:33; Ps 2:7).

The morning star ( $\tau 0 v \alpha \sigma \tau \varepsilon \rho \alpha$ tov $\pi \rho \omega \iota v o v$ ). "The star the morning one." In 22:16 Christ is the bright morning star. The victor will have Christ himself.

## Revelation 3

Rev 3:1
In Sardis ( $\varepsilon v \Sigma \alpha \rho \delta \varepsilon \sigma \iota v)$. Some thirty miles south-east of Thyatira, old capital of Lydia, wealthy and the home of Croesus, conquered by Cyrus and then by Alexander the Great, in B.C. 214 by Antiochus the Great, at the crossing of Roman roads, in a plain watered by the river Pactolus, according to Pliny the place where the dyeing of wool was discovered, seat of the licentious worship of Cybele and the ruins of the temple still there, called by Ramsay (op. cit., p. 354) "the city of Death," city of softness and luxury, of apathy and immorality, "a contrast of past splendour and present unresting decline" (Charles). Along with Laodicea it was blamed most of all the seven churches.

That hath the seven Spirits of God (o $\varepsilon \chi \omega v \tau \alpha \varepsilon \pi \tau \alpha \pi v \varepsilon v \mu \alpha \tau \alpha \tau o v \theta \varepsilon o v$ ). For which picture of the Holy Spirit see 1:4.

And the seven stars ( $\kappa \alpha$ тоvৎ $\varepsilon \pi \tau \alpha \alpha \sigma \tau \varepsilon \rho \alpha \varsigma)$. As in 1:16,20.
 in apposition with ovoua.

And thou art dead (ка vєкроц $\varepsilon$ ). "The paradox of death under the name of life" (Swete). Not complete (a nucleus of life) death (verse 2), but rapidly dying. See the picture in Jas 2:17; 2Co 6:9; 2Ti 3:5.

Rev 3:2
Be thou watchful ( $\gamma \iota v o v \gamma \rho \eta \gamma \circ \rho \omega \nu$ ). Periphrastic imperative with present middle of $\gamma \iota v o \mu \alpha$ (keep on becoming) and present active participle of $\gamma \rho \eta \gamma \sigma \rho \varepsilon \omega$ (late present from perfect $\varepsilon \gamma \rho \eta \gamma \circ \rho \alpha$ and that from $\varepsilon \gamma \varepsilon \iota \rho \omega$, as in Mt 24:42) and see 16:15 for $\gamma \rho \eta \gamma \circ \rho \varepsilon \omega$ also. He does not say "Arise from the dead" (Eph 5:14), for there are vestiges of life. Those still alive are addressed through the angel of the church.

Stablish the things that remain ( $\sigma \tau \eta \rho \iota \sigma o v \tau \alpha \lambda o \iota \pi \alpha$ ). First aorist active imperative of $\sigma \tau \eta \rho i \zeta \omega$, to make stable. Those not actually dead, but in grave peril. See a like command to Titus in Crete (Tit 1:5 ). Every new pastor faces such a problem.

Which were ready to die ( $\alpha \varepsilon \mu \varepsilon \lambda \lambda o v \alpha \pi o \theta \alpha \nu \varepsilon \iota \nu$ ). Imperfect active plural because the individuals, though neuter plural, are regarded as living realities. The imperfect looking on the situation "with a delicate optimism" (Swete) as having passed the crisis, a sort of epistolary imperfect.

For I have found no works of thine (ov $\gamma \alpha \rho \varepsilon v \rho \eta \kappa \alpha \sigma o v \varepsilon \rho \gamma \alpha$ ). "For I have not found any works of thine." Perfect active indicative of $\varepsilon v \rho \iota \sigma \kappa \omega$. The church as a whole represented by $\sigma o v$ (thy).

Fulfilled ( $\pi \varepsilon \pi \lambda \eta \rho \omega \mu \varepsilon v \alpha$ ). Perfect passive predicate participle of $\pi \lambda \eta \rho o \omega$. Their works have not measured up to God's standard ( $\varepsilon v \omega \pi \iota \circ v$ tov $\theta \varepsilon o v \mu \circ v$ ).

Rev 3:3

Remember ( $\mu \nu \eta \mu$ оvعvع). "Keep in mind," as in 2:5.
Therefore (ouv). Resumptive and coordinating as in 1:19; 2:5.
Thou hast received ( $\varepsilon i \lambda \eta \varphi \alpha \varsigma)$. Perfect active indicative of $\lambda \alpha \mu \beta \alpha \nu \omega$, "as a permanent deposit" (Vincent).

Didst hear ( $\eta \kappa 0 v \sigma \alpha \varsigma)$. First aorist active indicative, the act of hearing at the time.
And keep it ( $\kappa \alpha \tau \eta \rho \varepsilon$ ). Present active imperative of $\tau \eta \rho \varepsilon \omega$, "hold on to what thou hast."
And repent ( $\kappa \alpha \mu \varepsilon \tau \alpha \nu \circ \eta \sigma \sigma$ ). First aorist active imperative of $\mu \varepsilon \tau \alpha \nu o \varepsilon \omega$, "Turn at once."
If therefore thou shalt not watch ( $\varepsilon \alpha \nu$ ov $\mu \eta \gamma \rho \eta \gamma \circ \rho \eta \sigma \eta \stackrel{)}{ })$. Condition of third class with $\varepsilon \alpha \nu \mu \eta$ and the first aorist (ingressive) active subjunctive of $\gamma \rho \eta \gamma \sigma \rho \varepsilon \omega$, "if then thou do not wake up."

I will come $(\eta \xi \omega)$. Certainly future active here, though probably aorist subjunctive in 2:25.

As a thief ( $\omega \varsigma \kappa \lambda \varepsilon \pi \tau \eta \zeta$ ). As Jesus had already said (Mt 24:43; Lu 12:39) , as Paul had said (1Th 5:2), as Peter had said (2Pe 3:10) , as Jesus will say again (Re 16:15).

Thou shalt not know (ov $\mu \eta \gamma \nu \omega \iota \varsigma$ ). Strong double negative $o v \mu \eta$ with second aorist active subjunctive of $\gamma \iota \omega \omega \sigma \omega \omega$, though some MSS. have the future middle indicative $\gamma \nu \omega \sigma \eta$.

What hour ( $\pi o t a v \omega \rho a v$ ). A rare classical idiom (accusative) surviving in the Koine rather than the genitive of time, somewhat like Joh 4:52; Ac 20:16 (Robertson, Grammar, p. 470f.). Indirect question with $\pi o l a v$.

Rev 3:4
A few names ( $0 \lambda_{1} \gamma \alpha$ ovo $\quad \alpha \tau \alpha$ ). This use of ovo $\alpha \alpha$ for persons is seen in the Koine (Deissmann, Bible Studies, p. 196f.) as in Ac 1:15; Re 11:13 .

Did not defile (ovk $\varepsilon \mu \mathrm{o} \lambda \nu v a v$ ). First aorist active indicative of $\mu \mathrm{o} \lambda \nu \nu \omega$ (1Co 8:7; 1 Pe 1:4), pollution.

They shall walk ( $\pi \varepsilon \rho \iota \pi \alpha \tau \eta \sigma o v \sigma \iota v$ ). Future active of $\pi \varepsilon \rho \iota \pi \alpha \tau \varepsilon \omega$, promise of fellowship with Christ ( $\mu \varepsilon \tau^{\prime} \varepsilon \mu \circ v$, with me) "in white" ( $\left.\varepsilon v \lambda \varepsilon \cup \kappa o \iota \varsigma\right)$, as symbols of purity ( $7: 9,13$ ) like the angel (Mt 28:3), with possibly a reference to Enoch (Ge 5:22). For they are worthy (o $\tau$ $\alpha \xi \iota$ عıбıv). To walk with Christ, not worthy in the same sense as God and Christ (4:11; 5:9 ), but in a relative sense. See $\operatorname{Re} 16: 6$ for bad sense of $\alpha \xi$ ıoc.

Rev 3:5
Shall be arrayed ( $\pi \varepsilon \rho ı \beta \alpha \lambda \varepsilon \iota \tau \alpha)$. Future middle indicative of $\pi \varepsilon \rho \iota \beta \alpha \lambda \lambda \omega$, to fling around one, here and in $4: 4$ with $\varepsilon v$ and the locative, but usually in this book with the accusative of the thing, retained in the passive or with the middle $(7: 9,13 ; 10: 1 ; 11: 3 ; 12: 1 ; 17: 4 ; 18: 16$; 19:8,13 ).

In white garments ( $\varepsilon \nu$ ццатьья $\lambda \varepsilon v \kappa о \iota)$ ). Apparently the spiritual bodies in the risen life as in 2Co 5:1,4 and often in Revelation (3:4,5; 6:11; 7:9,13f.; 19:8).

I will in no wise blot out (ov $\mu \eta \varepsilon \xi \alpha \lambda \varepsilon \iota \psi \omega$ ). Strong double negative ov $\mu \eta$ and the first aorist active (or future) of $\varepsilon \xi \alpha \lambda \varepsilon เ \varphi \omega$, old word, to wipe out (Ac 3:19).

Of the book of life ( $\varepsilon \kappa \tau \eta \varsigma \beta \iota \beta \lambda$ ov $\tau \eta \varsigma \zeta \omega \eta \varsigma)$. Ablative case with $\varepsilon \kappa$. This divine register first occurs in Ex 32:32f. and often in the O.T. See Lu 10:20; Php 4:3; Re 13:8; 20:15; 21:27. The book is in Christ's hands (13:8; 21:27).

His name ( $\tau$ o ovo $\alpha$ 人 $\alpha v \tau 0 v$ ). The name of the one who overcomes ( $\mathrm{o} v / \kappa \omega v$ ). Clear reminiscence of the words of Christ about confessing to the Father those who confess him here (Mt 10:32; Mr 8:38; Lu 9:26; 12:8). Whether John knew the Synoptic Gospels (and why not?) he certainly knew such sayings of Jesus.

Rev 3:7
In Philadelphia ( $\varepsilon v \Phi_{1} \lambda \alpha \delta \varepsilon \lambda \varphi \iota \alpha$ ). Some twenty-eight miles south-east of Sardis, in Lydia, subject to earthquakes, rebuilt by Tiberius after the great earthquake of A.D. 17, for a time called in coins Neo-Caesarea, in wine-growing district with Bacchus (Dionysos) as the chief deity, on fine Roman roads and of commercial importance, though not a large city, called by Ramsay (op. cit., p. 392) "the Missionary City" to promote the spread of the GraecoRoman civilization and then of Christianity, later offering stubborn resistance to the Turks (1379-90 A.D.) and now called Ala-Sheher (reddish city, Charles, from the red hills behind it). The chief opposition to the faithful little church is from the Jews (cf. Ro 9-11). There are some 1,000 Christians there today.

The holy, he that is true (o $\alpha \gamma 1 \circ \sigma, o \alpha \lambda \eta \theta \iota \nu o c)$. Separate articles (four in all) for each item in this description. "The holy, the genuine." Asyndeton in the Greek. Latin Vulgate, Sanctus et Verus. Ho $\alpha$ ץוoc is ascribed to God in 4:8; 6:10 (both $\alpha \gamma$ เoc and $\alpha \lambda \eta \theta \iota v o \varsigma$ as here), but to Christ in Mr 1:24; Lu 4:34; Joh 6:69; Ac 4:27,30; 1Jo 2:20, a recognized title of the Messiah as the consecrated one set apart. Swete notes that $\alpha \lambda \eta \theta$ voc is verus as distinguished from verax ( $\alpha \lambda \eta \theta \eta \varsigma)$. So it is applied to God in 6:10 and to Christ in 3:14; 19:11 as in Joh 1:9; 6:32; 15:1.

He that hath the key of David (o $\varepsilon \chi \omega \nu \tau \eta \nu \kappa \lambda \varepsilon ı \nu \Delta \alpha v \varepsilon \iota \delta$ ). This epithet comes from Isa 22:22, where Eliakim as the chief steward of the royal household holds the keys of power. Christ as the Messiah (Re 5:5; 22:16) has exclusive power in heaven, on earth, and in Hades (Mt 16:19; 28:18; Ro 14:9; Php 2:9f.; Re 1:18). Christ has power to admit and exclude of his own will (Mt 25:10f.; Eph 1:22; Re 3:21; 19:11-16; 20:4; 22:16 ).

And none shall shut ( $\kappa \alpha$ ov osıc $\kappa \lambda \varepsilon เ \sigma \varepsilon$ ). Charles calls the structure Hebrew (future active indicative of $\kappa \lambda \varepsilon \omega \omega$ ), and not Greek because it does not correspond to the present articular participle just before o avot $\gamma \omega v$ (the one opening), but it occurs often in this book as in the very next clause, "and none openeth" ( $\kappa \alpha$ ov $\delta \varepsilon ı \zeta ~ \alpha v o \iota \gamma \varepsilon$ ) over against $\kappa \lambda \varepsilon \epsilon \omega v$ (present active participle, opening) though here some MSS. read $\kappa \lambda \varepsilon \varepsilon \varepsilon$ (present active indicative, open).

## Rev 3:8

I have set ( $\delta \varepsilon \delta \omega \kappa \alpha$ ). Perfect active indicative of $\delta \delta \delta \omega \mu$, "I have given" (a gift of Christ, this open door). See Lu 12:51 for a like use of $\delta \iota \delta \omega \mu$.

A door opened ( $\theta v \rho a v \eta \nu \varepsilon \omega \iota \gamma \mu \varepsilon v \eta v$ ). Perfect (triple reduplication) passive predicate participle of $\alpha v o \gamma \gamma \omega$ (verse 7) accusative feminine singular. The metaphor of the open door was a common one (Joh 10:7-9; Ac 14:27; 1Co 16:9; 2Co 2:12; Col 4:3; Re 3:20; 4:1). Probably it means here a good opportunity for missionary effort in spite of the Jewish hostility.

Which ( $\eta v-\alpha v \tau \eta v$ ). Pleonastic vernacular and Hebrew repetition of the personal pronoun $\alpha v \tau \eta \nu$ (it) after the relative $\eta \nu$ (which). Direct reference to the statement in verse 7 .

That (oт). This conjunction resumes the construction of oo $\delta \alpha \sigma 0 \cup \tau \alpha \varepsilon \rho \gamma \alpha$ (I know thy works) after the parenthesis (ı $\delta$ ov-- $\alpha u \tau \eta v$, Behold--shut).

A little power ( $\mu \kappa \kappa \rho a v \delta v v a \mu v)$ ). Probably "little power," little influence or weight in Philadelphia, the members probably from the lower classes (1Co 1:26f. ).

And didst keep ( $\kappa \alpha \varepsilon \tau \eta \rho \eta \sigma \alpha \varsigma)$. "And yet (adversative use of $\kappa \alpha$ ) didst keep" (first aorist active indicative of $\tau \eta \rho \varepsilon \omega$ ) my word in some crisis of trial. See Joh 17:6 for the phrase "keeping the word."

Didst not deny (ouk $\eta \rho \vee \eta \sigma \omega$ ). First aorist middle indicative second person singular of $\alpha \rho v \varepsilon o \mu \alpha$. The issue was probably forced by the Jews (cf. 2:9), but they stood true.

Rev 3:9
I give $(\delta \iota \delta \omega)$. Late omega form for $\delta \iota \delta \omega \mu$, but the $-\mu$ form in 17:13 ( $\delta \iota \delta o \alpha \sigma \iota v)$. These Jewish converts are a gift from Christ. For this use of $\delta i \delta \omega \mu$ see Ac 2:27; 10:40; 14:3. There is ellipse of $\tau$ tvac before $\varepsilon \kappa$ as in 2:10 ( $\varepsilon \xi \nu \mu \omega v)$ and see 2:9 for "the synagogue of Satan."

Of them which say ( $\tau \omega \nu \lambda \varepsilon \gamma o v \tau \omega v$ ). Ablative plural in apposition with $\sigma v v a \gamma \omega \gamma \eta \varsigma$.
 of words being immaterial).

But do lie ( $\alpha \lambda \lambda \alpha \psi \varepsilon v \delta o v \tau \alpha$ ). Present middle indicative of $\psi \varepsilon v \delta o \mu \alpha$, explanatory positive, addition here to ка ovк $\varepsilon เ \sigma เ v$ of 2:9, in contrast also with o $\alpha \lambda \eta \theta \iota v o \varsigma$ of verse 7 and in Johannine style (Joh 8:44; 1Jo 1:10; 2:4).

I will make them ( $\pi о п \sigma \omega$ avtou¢). Future active indicative of $\pi о \varepsilon \omega$, resuming the prophecy after the parenthesis ( $\tau \omega v--\psi \varepsilon v \delta o v \tau a$, which say--but do lie).
 (final clause, like facio ut in Latin, with $\tau v \alpha$ and the future active of $\eta \kappa \omega$ and $\pi \rho о \sigma \kappa \nu v \varepsilon \omega)$. The language is based on Isa $45: 14 ; 60: 14$. The Jews expected homage (not worship in the strict sense) from the Gentiles, but it will come to the Christians at last (1Co 14:24 ). Later Ignatius (Philad. 6) warns this church against Judaizing Christians, perhaps one result of an influx of Jews.

And to know ( $\kappa \alpha \gamma v \omega \sigma \iota v$ ). Continuation of the purpose clause with $\tau v a$, but with the second aorist active subjunctive rather than the less usual future indicative. See both constructions also with $v \alpha$ in 22:14. Probably a reminiscence of Isa 43:4 in $\varepsilon \gamma \omega \eta \gamma \alpha \pi \eta \sigma \alpha \sigma \varepsilon$ (I loved thee), first aorist active indicative.

Rev 3:10

Patience (vтонвvŋऽ). "Endurance" as in 13:10; 14:12 as also in 2Th 3:5.
Thou didst keep ( $\varepsilon \tau \eta \rho \eta \sigma \alpha \varsigma$ )
--I also will keep ( $\kappa \alpha \gamma \omega \tau \eta \rho \eta \sigma \omega$ ). Aorist active indicative and future active corresponding to each other. For a like play on the tenses of this verb by Christ see Joh 17:6 ( $\tau \varepsilon \tau \eta \rho \eta \kappa \alpha v$ ), Joh 17:11 ( $\tau \eta \rho \eta \sigma o v)$, Joh 17:12 ( ( $\tau \eta \rho o u v)$.

From the hour of trial ( $\varepsilon \kappa \tau \eta \varsigma \omega \rho \alpha \varsigma ~ \tau о ⿱ ~ т \varepsilon є \rho a \sigma \mu о v) . ~ T h i s ~ u s e ~ o f ~ \varepsilon к ~ a f t e r ~ \tau \eta \rho \varepsilon \omega ~ i n ~ J o h ~$ 17:15, a $\pi \mathrm{o}$ in Jas 1:27. Trial brings temptation often (Jas 1:2,13). Jesus endured (Heb 12:1f. ) and he will help them. There is still a church in Philadelphia in spite of the Turks.

Which is to come ( $\tau \eta \varsigma \mu \varepsilon \lambda \lambda$ ovo $\varsigma \varsigma \varepsilon \rho \chi \varepsilon \sigma \theta \alpha$ ). Agreeing with $\omega \rho a \varsigma$ (feminine), not with $\pi \varepsilon เ \rho a \sigma \mu о v$ (masculine).

Upon the whole world ( $\varepsilon \pi \tau \eta \varsigma \varepsilon \pi о н к о \cup \mu \varepsilon v \eta \varsigma$ o $\lambda \eta \varsigma$ ). The inhabited earth ( $\gamma \eta \varsigma$ ) as in $\operatorname{Re}$ 12:19; Lu 2:1; Ac 16:6, etc.), not the physical earth, but the world of men as explained by the next clause.

To try $(\pi \varepsilon \rho \rho \alpha \sigma \alpha)$. First aorist active infinitive of purpose from $\pi \varepsilon \downharpoonright \rho \alpha \zeta \omega$, probably to tempt (cf. the demons in 9:1-21), not merely to afflict ( $2: 10$ ).

That dwell upon the earth ( $\tau$ оиц катоюкоиขтаৎ $\varepsilon \pi \tau \eta \varsigma \gamma \eta \varsigma$ ). Present active articular participle of катокк $\omega$, explaining "the whole world" just before.

Rev 3:11
I come quickly ( $\varepsilon \rho \chi \circ \mu \alpha$ тaұv). As in 2:16; 22:7,12,20 . "The keynote of the book" (Beckwith). But allow the author's own meaning of "quickly."

Hold fast that which thou hast (кратє o exєıৎ). Sort of motto for each church ( 2:25).
That no one take ( $\imath v \alpha \mu \eta \delta \varepsilon \iota \varsigma \lambda \alpha \beta \eta$ ). Purpose clause with $t v \alpha$ and second aorist active subjunctive of $\lambda \alpha \mu \beta \alpha v \omega$. Here to take away "thy crown" ( $2: 10$ ) which will be thine if really won and not forfeited by failure (2Ti 4:8). In that case it will go to another (Mt 25:28; Ro 11:17f. ).

Rev 3:12
He that overcometh (o $v / \kappa \omega v$ ). Nominative absolute as in 2:26, resumed by the accusative autov (him).

A pillar ( $\sigma \tau u \lambda \mathrm{ov}$ ). Old word for column, in N.T. only here, 10:1; Ga 2:9; 1Ti 3:15 . Metaphorical and personal use with a double significance of being firmly fixed and giving stability to the building. Philadelphia was a city of earthquakes. "Temple" (vaos) here is also metaphorical ( 7:15), as in 1Ti 3:15 for the people of God. In 21:22 we read that there is no temple in the heavenly Jerusalem ( 21:10-22:5) descending as the new Jerusalem with God himself as the temple, though the metaphorical temple is mentioned in 7:15.

He shall go out thence no more ( $\varepsilon \xi \omega$ ov $\mu \eta \varepsilon \lambda \theta \eta$ ). Strong double negative ov $\mu \eta$ with the second aorist active subjunctive of $\varepsilon \rho \chi \circ \mu \alpha$. The subject is o vik $\omega v$ (the one overcoming). "Fixity of character is at last achieved" (Charles). He, like the $\sigma \tau \cup$ خos (pillar), remains in place.

Upon him ( $\varepsilon \pi^{\prime} \alpha v \tau o v$ ). Upon o $v ı \kappa \omega v$ (the victor), not upon the pillar ( $\left.\sigma \tau \nu \lambda o \varsigma\right)$. He receives this triple name (of God, of the city of God, of Christ) on his forehead (14:1; 7:3; 17:5; 22:4) just as the high-priest wore the name of Jehovah upon his forehead (Ex 28:36,38 ), the new name ( $2: 17$ ), without any magical or talismanic power, but as proof of ownership by God, as a citizen of the New Jerusalem, with the new symbol of the glorious personality of Christ (Re 19:12) , in contrast with the mark of the beast on others (13:17; 14:17). For citizenship in God's city see Ga 4:26; Php 3:20; Heb 11:10; 12:22; 13:14 .
 See also 21:2,10 and already Ga 4:26; Heb 12:22. Charles distinguishes between the Jerusalem before the final judgment and this new Jerusalem after that event. Perhaps so! In the Apocalypse always this form $\operatorname{I\varepsilon } \rho \circ \cup \sigma \alpha \lambda \eta \mu(3: 12 ; 21: 2,10)$, but in John's Gospel Hı $\varepsilon \rho о \sigma 0 \lambda \nu \mu \alpha(1: 19$, etc.).

Which cometh down ( $\eta \kappa \alpha \tau \alpha \beta \alpha \iota v o v \sigma \alpha$ ). Nominative case in apposition with the preceding genitive $\pi 0 \lambda \varepsilon \omega \varsigma$ as in $1: 5 ; 2: 20$, etc.

Mine own new name ( $\tau$ o ovo $\mu \alpha$ $\mu$ ov $\tau$ кouvov). For which see $2: 17 ; 19: 12,16$. Christ himself will receive a new name along with all else in the future world (Gressmann).

Rev 3:14
In Laodicea ( $\varepsilon \nu \Lambda \alpha o \delta ı \kappa ı \alpha)$. Forty miles south-east of Philadelphia and some forty miles east of Ephesus, the last of the seven churches addressed with special messages, on the river Lycus on the border of Phrygia, near Colossae and Hierapolis, recipient of two letters by Paul ( $\mathrm{Col} 4: 16$ ), on the great trade-route from Ephesus to the east and seat of large manufacturing and banking operations (especially of woollen carpets and clothing, Ramsay, Cities and Bishoprics of Phrygia, p. 40ff.), centre of the worship of Asklepios and seat of a medical school and also of a provincial court where Cicero lived and wrote many of his letters, home of many Jews, called by Ramsay (op. cit., p. 413) "the City of Compromise," the church here founded apparently by Epaphras ( $\mathrm{Col} 1: 7 ; 4: 12 \mathrm{f}$. ), now a deserted ruin, one of six cities with this name (meaning justice of the people). No praise is bestowed on this church, but only blame for its lukewarmness.

The Amen (o A $\mu \eta v$ ). Personal (masculine article) name here alone, though in Isa 65:16 we have "the God of Amen" understood in the LXX as "the God of truth" ( $\tau 0 v \theta \varepsilon o v ~ \tau o v$
 3:7 for o $\alpha \lambda \eta \theta$ vos (the genuine), "whose testimony never falls short of the truth" (Swete).

The beginning of the creation of God ( $\eta \alpha \rho \chi \eta \tau \eta \varsigma \kappa \tau \iota \sigma \varepsilon \omega \varsigma \tau o v \theta \varepsilon \sigma v)$. Not the first of creatures as the Arians held and Unitarians do now, but the originating source of creation through whom God works (Col 1:15,18, a passage probably known to the Laodiceans, Joh $1: 3$; Heb $1: 2$, as is made clear by $1: 18 ; 2: 8 ; 3: 21 ; 5: 13$ ).

Rev 3:15

Neither cold (ovt $\psi v \chi \rho \circ \varsigma)$. Old word from $\psi v \chi \omega$, to grow cold (Mt 24:12 ), in N.T. only Mt 10:42 and this passage.
 in N.T.

I would thou wert ( $o \varphi \varepsilon \lambda o v \eta \zeta$ ). Wish about the present with $0 \varphi \varepsilon \lambda o v$ (really $\omega \varphi \varepsilon \lambda o v$, second aorist active indicative of $0 \varphi \varepsilon \iota \lambda \omega$, without augment) with the imperfect $\eta \varsigma$ (instead of the infinitive) as in 2Co 11:1, when the old Greek used $\varepsilon \in \theta \varepsilon$ or $\varepsilon \gamma \alpha \rho$. See 1Co $4: 8$ for the aorist indicative and Ga 5:12 for the future.

Rev 3:16
Lukewarm ( $\left.\chi \lambda_{1} \alpha \rho o \varsigma\right)$. Tepid. Old adjective from $\chi \lambda \iota \omega$, to liquefy, to melt, here alone in N.T.

I will ( $\mu \varepsilon \lambda \lambda \omega$ ). "I am about to," on the point of.
Spew thee ( $\sigma \varepsilon \varepsilon \mu \varepsilon \sigma \alpha$ ). First aorist active infinitive of $\varepsilon \mu \varepsilon \omega$, old verb to vomit, to reject with extreme disgust, here alone in N.T.

Rev 3:17
I am rich (o $\pi \lambda$ ovøıo $\varepsilon \mid \mu$ ). Recitative o $\tau$ like quotation marks before direct quotation. Old adjective from $\pi \lambda$ ovto, , riches, wealth. Laodicea was a wealthy city and the church "carried the pride of wealth into its spiritual life" (Swete).

Have gotten riches ( $\pi \varepsilon \pi \lambda о \cup \tau \eta \kappa \alpha$ ). Perfect active indicative of $\pi \lambda 0 v \tau \varepsilon \omega$, old verb from $\pi \lambda$ outo, , used here of imagined spiritual riches which the church did not possess, just the opposite of church in Smyrna (poor in wealth, rich in grace). This church was in a rich city and was rich in pride and conceit, but poor in grace and ignorant of its spiritual poverty (ouk oı $\delta a ¢$, knowest not).

The wretched one (o $\tau \alpha \lambda \alpha \iota \pi \omega \rho \circ \varsigma$ ). Old adjective from $\tau \lambda \alpha \omega$, to endure, and $\pi \omega \rho \circ \varsigma$, a callus, afflicted, in N.T. only here and Ro 7:24. Note the one article in the predicate with all these five adjectives unifying the picture of sharp emphasis on "thou" ( $\sigma 0$ ), "thou that boastest."

Miserable ( $\varepsilon \lambda \varepsilon \varepsilon$ عıoऽ). Pitiable as in 1Co 15:19.
Poor ( $\pi \tau \omega \chi \circ \varsigma)$. See 2:9 for spiritual poverty. Perhaps some local example of self-complacency is in mind.

Blind ( $\tau \cup \varphi \lambda$ ос). Spiritual blindness as often (Mt 23:17), and note "eye-salve" in verse 18.

Naked ( $\gamma \nu \mu \nu \circ \varsigma)$. "The figure completes the picture of actual poverty" (Beckwith). See 15,16.

Rev 3:18
I counsel ( $\sigma \cup \mu \beta$ ou $\lambda \varepsilon v \omega$ ). Present active indicative, old compound from $\sigma \cup \mu \beta \circ \cup \lambda о \varsigma$, counsellor (Ro 11:34), as in Joh 18:14 . Almost ironical in tone.

To buy ( $\alpha \gamma \rho \rho \alpha \sigma \alpha)$. First aorist active infinitive of $\alpha \gamma о \rho \alpha \zeta \omega$ (from $\alpha \gamma о \rho \alpha$, market-place), rich as they think themselves to be.

From me ( $\pi \alpha \rho^{\prime} \varepsilon \mu \rho v$ ). From my side, emphatic.
Refined by fire ( $\pi \varepsilon \pi \nu \rho \omega \mu \varepsilon v o v \varepsilon \kappa \pi \nu \rho \circ \varsigma$ ). Perfect passive participle of $\pi \nu \rho \circ \omega$ (as in 1:15) and the metaphor carried on by $\varepsilon \kappa \pi \cup \rho \circ \varsigma$, "fired by fire." Purity by removing dross (Ps 66:10 ) like 1Pe 1:7.

That thou mayest become rich (iva $\pi \lambda o v \tau \eta \sigma \eta ı$ ). Purpose clause with $ı v \alpha$ and the ingressive first aorist active of $\pi \lambda$ out $\omega$, spiritual riches.

That thou mayest clothe thyself (iva $\pi \varepsilon \rho ı \beta \alpha \lambda$ ). Purpose clause with iva and second aorist middle (direct) subjunctive of $\pi \varepsilon \rho(\beta a \lambda \lambda \omega$, to fling round one as in 3:5.

Be not made manifest ( $\mu \eta \varphi \alpha v \varepsilon \rho \omega \theta \eta$ ). Continued purpose clause with negative $\mu \eta$ and first aorist passive subjunctive of $\varphi$ avepo $\omega$.

Nakedness ( $\gamma \nu \mu \nu 0 \tau \eta \tau \circ \varsigma)$. Late and rare word from $\gamma \nu \mu \nu \circ \varsigma$, naked, in N.T. only here, 2Co 11:27; Ro 8:35. Cf. Re 16:15; 20:13; 2Co 5:2f.

Eye-salve (ко $\lambda \lambda$ oupıov). Diminutive of ко $\lambda \lambda \nu \rho \alpha$ (coarse bread of cylindrical shape), object of aүopaбa, name for a famous Phrygian powder for the eyes made in Laodicea (Charles), Latin collyrium (used for eye-salve by Horace and Juvenal).

To anoint ( $\varepsilon \gamma \chi \rho \iota \sigma \alpha)$. First aorist active infinitive (epexegetic) of $\varepsilon \gamma \chi \rho \iota \omega$, late compound ( $\varepsilon \nu, \chi \rho \omega \omega$, Strabo, Epictetus), to rub in, here only in N.T.

That thou mayest see ( $\imath v \beta \beta \lambda \varepsilon \pi \eta \iota)$. Another purpose clause with $v \alpha a$ and the present active subjunctive (keep on seeing).

Rev 3:19
Free rendering of $\operatorname{Pr}$ 3:12 (in Heb 12:6 ), but with ouc $\varepsilon \alpha v$ (indefinite relative plural) for ov (definite relative singular), with $\varphi \lambda \hat{A} \omega$ instead of $\alpha \gamma \alpha \pi \hat{A} \alpha$ and with the first person $\pi \alpha \iota \delta \varepsilon v \hat{A} \omega$ for $\pi \alpha \iota \delta \varepsilon v \varepsilon$ (the Lord chastens, from $\pi \alpha \iota$, child, training a child) and with $\varepsilon \lambda \varepsilon \gamma \chi \hat{A} \omega$ (reprove) added.

Be zealous ( $\zeta \eta \lambda \varepsilon v \varepsilon$ ). Present active imperative of $\zeta \eta \lambda \varepsilon v \omega$, in good sense (from $\zeta \eta \lambda \frac{}{\eta}$ $\zeta \varepsilon \omega$, to boil), in opposition to their lukewarmness, here only in N.T. (elsewhere $\zeta \eta \lambda o \omega)$, "keep on being zealous."

Repent ( $\mu \varepsilon \tau \alpha v o \eta \sigma o v$ ). Ingressive first aorist active imperative of $\mu \varepsilon \tau \alpha v o \varepsilon \omega$.

## Rev 3:20

I stand at the door ( $\varepsilon \sigma \tau \eta \kappa \alpha \varepsilon \pi \tau \eta \nu \theta v \rho \alpha v$ ). Perfect active of $\iota \sigma \tau \eta \mu$ (intransitive). Picture of the Lord's advent as in Mt 24:33; Jas 5:9, but true also of the individual response to Christ's call (Lu 12:36) as shown in Holman Hunt's great picture. Some see a use also of So 5:2 .

If any man hear--and open ( $\varepsilon \alpha \vee \tau \iota \varsigma ~ \alpha \kappa о \cup \sigma \eta ~ \kappa \alpha ~ \alpha v o ı \xi \eta)$. Condition of third class with $\varepsilon \alpha v$ and first aorist (ingressive) active subjunctive of $\alpha \kappa 0 v \omega$ and $\alpha v o t \gamma \omega$. See Joh 10:3; 18:37 . See the picture reversed (Swete) in Lu 13:25; Mt 25:10 .

I will come in to him ( $\varepsilon เ \sigma \varepsilon \lambda \varepsilon v \sigma o \mu \alpha$ ). Future middle of $\varepsilon \iota \sigma \varepsilon \rho \chi \circ \mu \alpha$. See Mr 15:43; Ac 11:3 for $\varepsilon เ \sigma \varepsilon \rho \chi о \mu \alpha \pi \rho \circ \varsigma$, to go into a man's house. Cf. Joh 14:23.

Will sup $(\delta \varepsilon \iota \pi \nu \eta \sigma \omega)$. Future active of $\delta \varepsilon \imath \pi v \varepsilon \omega$, old verb, from $\delta \varepsilon \imath \pi v o v$ (supper), as in Lu 17:8. Fellowship in the Messianic kingdom (Lu 22:30; Mr 14:25; Mt 26:29 ). Purely metaphorical, as is plain from 1Co 6:13 .

Rev 3:21
He that overcometh ( $\mathrm{o} v / \kappa \omega v$ ). Absolute nominative again as in 3:12, but resumed this time by the dative $\alpha v \tau \omega$ as in 2:26.

To sit $(\kappa \alpha \theta \iota \sigma \alpha)$. First aorist active infinitive of $\kappa \alpha \theta_{\iota} \zeta \omega$. This promise grows out of the prophecy that the saints will share in the Messiah's rule, made to the twelve (Mt 19:28; Lu 22:29f. ), repeated by Paul (1Co 6:2f. ), enlarged in Re 22:1-5 (to last forever, 2Ti 2:11f. ). James and John took this hope and promise literally (Mr 10:40) not metaphorically.

As I also overcame ( $\omega \varsigma \kappa \alpha \gamma \omega \varepsilon \nu \iota \kappa \eta \sigma \alpha$ ). First aorist active indicative of $\nu \iota \kappa \alpha \omega$, looking back on the victory as over in the past. In Joh 16:33 before the Cross Jesus says E $\omega \omega v \varepsilon \nu \kappa \kappa \kappa \alpha$ tov коб $\mu$ о (perfect active), emphasizing the abiding effect of the victory.

Sat down ( $\varepsilon \kappa \alpha \theta \iota \sigma \alpha)$. "I took my seat" (Heb 1:3) where Christ is now (Re 22:3; Col 3:1 ). Cf. 1 Jo $5: 4$; Re 2:27f. Each of these seven messages begins alike and ends alike. Each is the message of the Christ and of the Holy Spirit to the angel of the church. Each has a special message suited to the actual condition of each church. In each case the individual who overcomes has a promise of blessing. Christ the Shepherd knows his sheep and lays bare the particular peril in each case.

## Revelation 4

Rev 4:1
After these things ( $\mu \varepsilon \tau \alpha \tau \alpha \cup \tau \alpha)$. Change in the panorama, not chronology (7:1,9; 15:5; 18:1; 19:1). This vision is of heaven, not of earth as was true of chapters Re $1 ; 2$. The first vision of Christ and the messages to the seven churches began in 1:12f. This new vision of the throne in heaven ( $4: 1-11$ ) succeeds that to which it here alludes.

I saw ( $\varepsilon$ ו $\delta o v$ ). Second aorist active indicative of opa $\omega$.
Behold (ıסov). Exclamation of vivid emotion as John looked. No effect on the structure and nominative case $\theta$ vpa (door) follows it.

Opened ( $\eta v \varepsilon \omega \prime \gamma \mu \varepsilon v \eta$ ). Perfect (triple reduplication) passive participle of $\alpha v o l \gamma \omega$ as in 3:8 (door of opportunity) and 3:20 (door of the heart), here the door of revelation (Swete).

In heaven ( $\varepsilon v \tau \omega$ oupav $\omega$ ). As in Eze 1:1; Mr 1:10; Joh 1:51. In Revelation always in singular except 12:12.

The first ( $\eta \pi \rho \omega \tau \eta$ ). Reference is to 1:10.
Speaking ( $\lambda \alpha \lambda$ ovan¢). From $\lambda \alpha \lambda \varepsilon \omega$, rather $\lambda \varepsilon \gamma \circ v \sigma \eta \varsigma$ of 1:10 from $\lambda \varepsilon \gamma \omega$, both agreeing with $\sigma \alpha \lambda \pi \iota \gamma \gamma \circ$ (trumpet).

Saying ( $\lambda \varepsilon \gamma \omega v$ ). Present active participle of $\lambda \varepsilon \gamma \omega$ repeating the idea of $\lambda \alpha \lambda$ ovo $\eta \varsigma$, but in the nominative masculine singular construed with $\varphi \omega \nu \eta$ (feminine singular), construction according to sense because of the person behind the voice as in 11:15; 19:14.

Come up ( $\alpha v \alpha \beta \alpha$ ). Short Koine form for $\alpha v \alpha \beta \eta \theta$ (second aorist active imperative second person singular of $\alpha v \alpha \beta \alpha ı v \omega)$.

Hither ( $\omega \delta \varepsilon$ ). Originally "here," but vernacular use (Joh 6:25; 10:27).
I will show ( $\delta \varepsilon \varepsilon \xi \omega$ ). Future active of $\delta \varepsilon ı \kappa \nu v \mu$ in same sense in 1:1.
Hereafter ( $\mu \varepsilon \tau \alpha \tau \alpha v \tau \alpha$ ). Some editors (Westcott and Hort) connect these words with the beginning of verse 2 .

Rev 4:2
Straightway I was in the Spirit ( $\varepsilon v \theta \varepsilon \omega \varsigma \varepsilon \gamma \varepsilon v o \mu \eta \nu \varepsilon v \pi \nu \varepsilon \nu \mu a \tau$ ). But John had already "come to be in the Spirit" ( 1:10, the very same phrase). Perhaps here effective aorist middle indicative while ingressive aorist in 1:10 (sequel or result, not entrance), "At once I found myself in the Spirit" (Swete), not "I came to be in the Spirit" as in 1:10.

Was set ( $\varepsilon \kappa \varepsilon \iota \tau o$ ). Imperfect middle of $\kappa \varepsilon \mu \alpha$, old verb, used as passive of $\tau \iota \theta \eta \mu$. As the vision opens John sees the throne already in place as the first thing in heaven. This bold imagery comes chiefly from 1Ki 22:19; Isa 6:1ff.; Eze 1:26-28; Da 7:9f. One should not forget that this language is glorious imagery, not actual objects in heaven. God is spirit. The picture of God on the throne is common in the O.T. and the N.T. (Mt 5:34f.; 23:22; Heb 1:3 and in nearly every chapter in the Revelation, $1: 4$, etc.). The use of $\kappa \alpha \theta \eta \mu \varepsilon v o \varsigma$ (sitting) for the name
of God is like the Hebrew avoidance of the name Jahweh and is distinguished from the Son in 6：16；7：10．

Upon the throne（ $\varepsilon \pi \operatorname{\tau ov} \theta \rho o v o v)$ ．E $\pi$ with the accusative，as in $4: 4 ; 6: 2,4 \mathrm{f} . ; 11: 16 ; 20: 4$ ，but in verses $9,10,4: 1,7,13 ; 6: 16 ; 7: 15$ we have $\varepsilon \pi$ tou $\theta$ povov（genitive），while in 7：10；19：14； 21：5 we have $\varepsilon \pi \tau \omega \theta \rho \circ v \omega$（locative）with no great distinction in the resultant idea．

Rev 4：3
To look upon（opaø\＆）．Locative case of opaбıऽ，old word（from opa $\omega$ ，to see）for ap－ pearance（in appearance）as in Eze 1：5，26 ．

Like a jasper stone（o $\mu \circ \stackrel{\varsigma}{\iota} \iota \sigma \pi \iota \delta$ ）．Associative－instrumental case of $\iota \propto \sigma \pi \iota$ ，old word （Persian），used for stones of different colors，one opaque like opal，one translucent（21：11，18f． ，possibly here，only N．T．examples），one a red or yellow stone（Isa 54：12 ）．Some even take it for the diamond．Certainly not our cheap modern jasper．

A sardius（ $\sigma \alpha \rho \delta \iota \omega$ ）．Old word，in N．T．only here and 21：20．The carnelian or other red stone，derived from Sardis（Pliny）．

Rainbow（ $\uparrow \uparrow \varsigma)$ ）．Old word，in N．T．only here and 10：1．From Eze 1：28 ．
An emerald（ $\sigma \mu \alpha \rho \alpha \gamma \delta \iota v \omega$ ）．Adjective（from $\sigma \mu \alpha \rho \alpha \gamma \delta o \varsigma$, Re 21：19），of emerald（supply $\lambda_{1} \theta \omega$ ），in associative instrumental case after ouoosc．John sees no form for God（Ex 24：10）， but only the brilliant flashing gems．＂In the vision the flashing lustre of the taorıc and the fiery red of the $\sigma \alpha \rho \delta$ are relieved by the halo（ $\llcorner\rho \iota$ ）of emerald which encircled the Throne＂ （Swete）．A complete circle．

Rev 4：4
Round about the throne（ $\kappa \cup \kappa \lambda о \theta \varepsilon v ~ \tau o v ~ \theta \rho o v o v) . ~ H e r e ~ a s ~ a ~ p r e p o s i t i o n ~ w i t h ~ t h e ~ g e n i t i v e, ~$ though only adverb in 4：8（only N．T．examples save Textus Rec．in 5：11）．

Four and twenty thrones（ $\theta \rho \circ$ о⿱丷天 $\varepsilon$ וкоб $\tau \varepsilon \sigma \sigma \alpha \rho \varepsilon \varsigma)$ ．So P Q，but Aleph A have accusative $\theta \rho o v o u s$（supply $\varepsilon ו \delta o v$ from 4：1）and $\tau \varepsilon \sigma \sigma \alpha \rho \varepsilon \varsigma ~(l a t e ~ a c c u s a t i v e ~ i n ~-\varepsilon \varsigma) . ~ T h i s ~ f u r t h e r ~ c i r c l e ~$ of thrones beyond the great throne．

I saw four and twenty elders（ $\varepsilon \kappa о \sigma \tau \varepsilon \sigma \sigma \alpha \rho \alpha \varsigma ~ \pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho о \cup \varsigma) . ~ N o ~ \varepsilon \ell \delta o v$ in the text， but the accusative case calls for it．Twenty－four as a symbolic number occurs only in this book and only for these elders（ $4: 4,10 ; 5: 8 ; 11: 16 ; 19: 4$ ）．We do not really know why this number is chosen，perhaps two elders for each tribe，perhaps the twelve tribes and the twelve apostles（Judaism and Christianity），perhaps the twenty－four courses of the sons of Aaron （1Ch 24：1－19），perhaps some angelic rank（Col 1：16）of which we know nothing．Cf．Eph 2：6．

Sitting（ $\kappa \alpha \theta \eta \mu \varepsilon v o v \varsigma) . ~ U p o n ~ t h e i r ~ t h r o n e s . ~$
Arrayed（ $\pi \varepsilon \rho \iota \beta \varepsilon \beta \lambda \eta \mu \varepsilon v o u \varsigma)$ ．Perfect passive participle of $\pi \varepsilon \rho \iota \beta \alpha \lambda \lambda \omega$（to throw around）．
In white garments（ıатьоя $\lambda \varepsilon v \kappa о \iota \varsigma)$ ．Locative case here as in 3：5（with $\varepsilon v$ ），though accusative in 7：9，13．

Crowns of gold ( $\sigma \tau \varepsilon \varphi a v o v \varsigma ~ \chi \rho \cup \sigma o v \varsigma)$. Accusative case again like $\pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho o v \varsigma$ after $\varepsilon \iota \delta o v(4: 1)$, not $\iota \delta o v$. In 19:14 $\varepsilon \chi \omega \nu$ (having) is added. John uses $\delta \iota \alpha \delta \eta \mu \alpha$ (diadem) for the kingly crown in 12:3; 13:1; 19:12, but it is not certain that the old distinction between $\delta t a \delta \varepsilon \mu$ as the kingly crown and $\sigma \tau \varepsilon \varphi a v o \varsigma$ as the victor's wreath is always observed in late Greek.

Rev 4:5
Out of the throne ( $\varepsilon \kappa$ rov $\theta \rho o v o v$ ). Back to the throne itself. The imagery is kin to that in Ex 19:16; 24:9f.; Eze 1:22,27.

Proceed (єклорєvovта). Graphic historical present.
Lightnings and voices and thunders ( $\alpha \sigma \tau \rho \alpha \pi \alpha \kappa \alpha \varphi \omega v \alpha \kappa \alpha \beta \rho о \nu \tau \alpha$ ). So exactly in $11: 19 ; 16: 18$, but in $8: 5$ with $\beta \rho o v \tau \alpha$ first, aбт $\alpha \pi \alpha$ last, all old and common words. "The thunderstorm is in Hebrew poetry a familiar symbol of the Divine power: cf., e.g., 1Sa 2:10; Ps 18:9f.; Job 37:4f ." (Swete).

Seven lamps of fire ( $\varepsilon \pi \tau \alpha \lambda \alpha \mu \pi \alpha \delta \varepsilon \varsigma \pi \cup \rho \circ \varsigma)$. Return to the nominative ( $(\delta o v$, not $\varepsilon ו \delta o v)$ with $\eta \sigma \alpha v$ (were) understood. Metaphor drawn from Eze 1:13; Zec 4:12f. . Our word "lamp," but here a torch as in 8:10, identified with the Holy Spirit (the Seven Spirits of God) as in 1:4; 3:1, not $\lambda u \chi v i a$ (lampstands) as in 1:12,20, nor $\lambda u \chi$ voc a hand-lamp with oil (Mt 5:15 ). "These torches blaze perpetually before the throne of God" (Swete).

## Rev 4:6

As it were a glassy sea ( $\omega \varsigma \theta \alpha \lambda \alpha \sigma \sigma \alpha$ v $\alpha \lambda \iota v \eta$ ). Old adjective (from va $\lambda o \varsigma$, glass, 21:18,21 ), in N.T. only here and 15:2. Possibly from ve (it rains), like a raindrop. At any rate here it is the appearance, not the material. Glass was made in Egypt 4,000 years ago. In Ex 24:10 the elders see under the feet of God in the theophany a paved work of sapphire stone (cf. Eze 1:26). The likeness of the appearance of sky to sea suggests the metaphor here (Beckwith).

Like crystal ( $о \boldsymbol{\mu} \boldsymbol{\sigma} \kappa \rho v \sigma \tau \alpha \lambda \lambda \omega$ ). Associative-instrumental case after ouoı . Old word, from крvoc (ice and sometimes used for ice), in N.T. only here and 22:1, not semi-opaque, but clear like rock-crystal.

In the midst of the throne ( $\varepsilon v \mu \varepsilon \sigma \omega$ tov $\theta \rho o v o v$ ). As one looks from the front, really before.

Round about the throne (кик $\lambda \omega$ tov $\theta \rho \circ$ vov). Merely an adverb in the locative case (Ro 15:19), as a preposition in N.T. only here, 5:11; 7:11. This seems to mean that on each of the four sides of the throne was one of the four living creatures either stationary or moving rapidly round (Eze 1:12f. ).

Four living creatures ( $\tau \varepsilon \sigma \sigma \varepsilon \rho \alpha \zeta \omega \alpha$ ). Not $\theta \eta \rho \iota \alpha$ (beasts), but living creatures. Certainly kin to the $\zeta \omega \alpha$ of Eze 1; 2 which are cherubim (Eze 10:2,20 ), though here the details vary as to faces and wings with a significance of John's own, probably representing creation in contrast with the redeemed (the elders).

Full of eyes ( $\gamma \varepsilon \mu \circ \nu \tau \alpha$ o $\varphi \theta \alpha \lambda \mu \omega v$ ). Present active participle of $\gamma \varepsilon \mu \omega$, to be full of, with the genitive, signifying here unlimited intelligence (Beckwith), the ceaseless vigilance of nature (Swete).

Rev 4:7
Like a lion ( $\mathrm{o} \mu \mathrm{o}$ ov $\lambda \varepsilon \boldsymbol{\lambda} \boldsymbol{\tau} \tau$ ). Associative-instrumental case again. In Eze ( $1: 6,10$ ) each $\zeta \omega \mathrm{ov}$ has four faces, but here each has a different face. "The four forms represent whatever is noblest, strongest, wisest, and swiftest in nature" (Swete). But it is not necessary to try to find a symbolism in each face here like the early baseless identification with the Four Evangelists (the lion for Mark, the man for Matthew, the calf for Luke, the eagle for John). Moo $\chi$ oc is first a sprout, then the young of animals, then a calf (bullock or heifer) as in Lu 15:23, 27,30, or a full-grown ox (Eze 1:10).

Had ( $\varepsilon \chi \omega v$ ). Masculine singular (some MSS. $\varepsilon \chi o v$ neuter singular agreeing with $\zeta \omega 0 v$ ) present active participle of $\varepsilon \chi \omega$, changing the construction with the $\tau \rho \iota \tau \circ \nu \zeta \omega 0 \nu$ almost like a finite verb as in verse 8 .

A face as of a man ( $\pi \rho \circ \sigma \omega \pi \pi \circ \omega \omega \varsigma \nu \theta \rho \omega \pi \sigma)$. Shows that the likeness in each instance extended only to the face.

Like an eagle flying (o $\rho \circ \circ \circ \alpha \varepsilon \tau \omega \pi \varepsilon \tau о \mu \varepsilon v \omega$ ). Present middle participle of $\pi \varepsilon \tau \circ \mu \alpha$, to fly, old verb, in N.T. only in Re 4:7; 8:13; 12:14; 14:6; 19:17. The aعtoc in Mt 24:28; Lu 17:37 may be a form of vulture going after carrion, but not in Re 8:13; 12:14 .

Rev 4:8
Each one of them ( $\varepsilon v \kappa \alpha \theta^{\prime} \varepsilon v \alpha v \tau \omega v$ ). "One by one of them," a vernacular idiom like ઘાৎ ката عıৎ in Mr 14:19.

Having ( $\varepsilon \chi \omega v$ ). Masculine participle again as in verse 7, though $\zeta \omega$ ov neuter.
Six wings ( $\alpha v \alpha \pi \tau \varepsilon \rho \cup \gamma a \varsigma \varepsilon \xi$ ). Distributive use of $\alpha v \alpha$, "six wings apiece" as in Lu 10:1 (ava סvo, by twos). Like Isa 6:2, not like Eze 1:6, where only four wings are given apiece.

Are full of ( $\gamma \varepsilon \mu \circ v \sigma \iota v$ ). Plural verb, though $\zeta \omega \alpha$ neuter, to individualize each one.
Round about and within ( $\kappa \cup \kappa \lambda о \theta \varepsilon v \kappa \alpha \varepsilon \sigma \omega \theta \varepsilon v$ ). Perhaps before and behind (4:6) and under the wings, "pointing to the secret energies of nature" (Swete).

Rest ( $\alpha v \alpha \pi \alpha v \sigma เ v)$. See also 14:11. Old word (from avarav $\omega$, to relax), as in Mt 11:29. God and Christ cease not their activity (Joh 5:17). "This ceaseless activity of nature under the hand of God is a ceaseless tribute of praise" (Swete).

Day and night ( $\eta \mu \varepsilon \rho \alpha \varsigma \kappa \alpha$ vиктоৎ). Genitive of time, by day and by night.
 Seraphim and Ophannim is to sing the praises of God" (Charles) in the $\tau \rho \iota \sigma$ 人үюv (triple repetition of $\alpha \gamma \operatorname{loc})$.

Is the Lord God (Kıpıo o $\theta$ zoc). See Isa 6:3. The copula $\varepsilon \sigma \tau \iota v$ (is) is not expressed, but is implied.

The Almighty (o $\pi \alpha v \tau о к \rho a \tau \omega \rho$ ). See on 1:8.

Which was and which is and which is to come ( $о \downarrow \nu \alpha \circ$ о $\omega v \kappa \alpha$ о $\varepsilon \rho \chi о \mu \varepsilon v \circ \varsigma)$. Just as in 1:4,8, but with the order changed.

## Rev 4:9

When the living creatures shall give (o $\sigma \alpha v \delta \omega \sigma o v \sigma \tau v \tau \alpha \zeta \omega \alpha$ ). Indefinite temporal clause with otav and the future active indicative ( $\delta \omega \sigma \sigma 0 \sigma v$ ) rather than the more common second aorist active subjunctive ( $\delta \omega \sigma \tau v$ ) with the notion of repetition rather than unbroken continuance, "whenever they give." The giving of praise and glory to God by the four living creatures (representatives of nature) is met by corresponding worship by the redeemed (the four and twenty elders). "Created life adores the Uncreated" (Swete), "to the one living for ages of ages."

Rev 4:10
Shall fall down ( $\pi \varepsilon \sigma o u v \tau \alpha$, future middle of $\pi \iota \pi \tau \omega$ ),
shall worship ( $\pi \rho о \sigma \kappa \nu v \eta \sigma o v \sigma \iota v$, future active of $\pi \rho \circ \sigma \kappa \nu v \varepsilon \omega$ ),
shall cast their crowns ( $\beta \alpha \lambda$ ovoıv tovৎ $\sigma \tau \varepsilon \varphi a v o v \varsigma$, future active of $\beta \alpha \lambda \lambda \omega$ ). The two actions by the two groups (living creatures, elders) are coordinated (simultaneous in the repetition). They thus acknowledge that all this kingly dignity comes from God, who is King of kings and Lord of lords. Charles takes the elders, however, to be angels, not redeemed men.

## Rev 4:11

Our Lord and our God (о кирıос ка о $\theta \varepsilon о \varsigma ~ \eta \mu \omega v$ ). The nominative form here used as vocative as in Joh 20:28 and often.

To receive ( $\lambda \alpha \beta \varepsilon \iota v$ ). Epexegetic second aorist active infinitive of $\lambda \alpha \mu \beta \alpha v \omega$ with $\alpha \xi \iota o \varsigma$ (worthy).

The glory ( $\tau \eta \nu \delta o \xi \alpha v$ ). The article referring to $\delta o \xi \alpha v$ in verse 9 and so with $\tau \eta \nu \tau \mu \mu \eta$ (the honour), though $\tau \eta v \delta \nu v a \mu \nu v$ (the power) is not in verse 9, but is the power due to be ascribed to God.

Thou didst create ( $\sigma v \varepsilon \kappa \tau \iota \sigma \alpha \varsigma$ ). Emphasis on $\sigma v$ (thou), first aorist active indicative of $\kappa \tau \iota \zeta \omega$, the verb used about the act of creation by Paul in $\operatorname{Col} 1: 16$ ( $\varepsilon \kappa \tau \iota \sigma \theta \eta, \varepsilon \kappa \tau \iota \sigma \tau \alpha)$, constative aorist giving a summary picture of the whole (not as a process).

Because of thy will ( $\delta \iota \alpha$ тo $\theta \varepsilon \lambda \eta \mu \alpha \sigma o v$ ). Reason for creation of the universe as in Heb 2:10 ( $\delta \mathrm{l}^{\prime} \mathrm{ov}$ ).

They were ( $\eta \sigma \alpha v$ ). Imperfect tense with a cursory glance at the universe as a fact, possibly a potential existence in God's purpose in the eternal past before the actual creation in time.

And were created ( $\kappa \alpha \varepsilon \kappa \tau \iota \sigma \theta \eta \sigma \alpha v$ ). First aorist passive indicative of the same verb, $\kappa \tau \iota \zeta \omega$, just used and in the plural, while Paul (Col 1:16) uses the singular $\varepsilon \kappa \tau \iota \sigma \theta \eta$. See 1Co 8:6 . God's will wrought through the Logos (Christ).

## Revelation 5

Rev 5:1
In the right hand ( $\varepsilon \pi \tau \eta \nu \delta \varepsilon \xi \iota a v)$. "Upon the right hand" ( $\varepsilon \pi$, not $\varepsilon v$ ), the open palm. Anthropomorphic language drawn from Eze 2:9f .

A book ( $\beta \iota \beta \lambda_{\imath} \circ v$ ). Diminutive of $\beta \iota \beta \lambda$ o $\varsigma$, but no longer so used, $\beta \iota \beta \lambda \alpha \rho \iota \delta \iota v$ occurring instead ( 10:2).

Written ( $\gamma \varepsilon \gamma \rho \alpha \mu \mu \varepsilon v o v$ ). Perfect passive predicate participle of $\gamma \rho \alpha \varphi \omega$.
Within and on the back ( $\varepsilon \sigma \omega \theta \varepsilon v \kappa \alpha$ о $\quad\llcorner\theta \varepsilon \varepsilon v$ ). "Within and behind." Description of a roll like that in Lu 4:17, not a codex as some scholars think. Usually these papyrus rolls were written only on the inside, but this one was so full of matter that it was written also on the back side (o $\pi\llcorner\theta \varepsilon v$ ), and so was an o $\sigma \iota \sigma \theta$ oүpapov like that in Eze 2:10. There are many allegorical interpretations of this fact which are all beside the point.

Sealed ( $\kappa \alpha \tau \varepsilon \sigma \varphi \rho \alpha \gamma \iota \sigma \mu \varepsilon v o v)$. Perfect passive predicate participle of $\kappa \alpha \tau \alpha \sigma \varphi \rho \alpha \gamma \iota \zeta \omega$, old compound (perfective use of $\kappa \alpha \tau \alpha$ ), to seal up (down), here only in N.T.

With seven seals ( $\sigma \varphi \rho \alpha \gamma \iota \sigma v \varepsilon \varepsilon \pi \tau \alpha$ ). Instrumental case of $\sigma \varphi \rho \alpha \gamma \iota$, old word used in various senses, proof or authentication (1Co 9:2; Ro 4:11 ), signet-ring (Re 7:2 ), impression made by the seal ( $\operatorname{Re} 9: 4 ; 2 \mathrm{Ti} 2: 19$ ), the seal on books closing the book (Re 5:1,2,5,9; 6:1,3,5,7,9,12; 8:1 ). "A will in Roman law bore the seven seals of the seven witnesses" (Charles). But this sealed book of doom calls for no witnesses beyond God's own will. Alford sees in the number seven merely the completeness of God's purposes.

Rev 5:2
A strong angel ( $\alpha \gamma \gamma \varepsilon \lambda o v ~ เ \sigma \chi \cup \rho o v)$. One needed ( $10: 1 ; 18: 21$ ) "whose call could reach to the farthest limits of the universe" (Beckwith) and so "with a great voice" ( $\varepsilon v \varphi \omega v \eta \mu \varepsilon \gamma \alpha \lambda \eta$, in a great voice, as in 14:7,9,15, and without $\varepsilon v 5: 12 ; 6: 10 ; 7: 2,10 ; 8: 13 ; 10: 3$, etc.). See $\varepsilon v$ Іб $\chi \cup \rho \alpha \varphi \omega v \eta$ ( 18:2).

Proclaiming ( $\kappa \eta \rho v \sigma \sigma о v \tau \alpha)$. Present active predicate participle of $\kappa \eta \rho v \sigma \sigma \omega$, to herald, to preach.

Worthy to open and to loose ( $\alpha \xi$ เо¢ $\alpha v o ı \xi \alpha \kappa \alpha \lambda \nu \sigma \alpha$ ). Worthy by rank and character (cf. Joh 1:27) as well as by ability ( $\varepsilon \delta u v a \tau o$, verse 3 ), followed by two infinitives (first aorist active) of $\alpha v o \imath \gamma \omega$ and $\lambda \nu \omega$, though $v \alpha$ and the subjunctive can be used after $\alpha \xi$ เoৎ as in Joh 1:27. Here $\alpha \xi$ เoc is like וкаvoc (capable, qualified) as in Mt 8:8. The articles here (то, та¢) refer to the book and the seals in verse 1 . It is a husteron-proteron, since the loosing of the seals precedes the opening of the book.

Rev 5:3
$\mathrm{Ev}(\mathrm{in})$ with locative (oupav $\omega$ ), $\varepsilon \pi$ (upon) with genitive ( $\gamma \eta \varsigma$ ), vлокат $\omega$ (under) with ablative ( $\gamma \eta \varsigma$ ), as in verse 13, including the whole universe, as in Ex 20:4 (Php 2:10). The

MSS. vary in the negative conjunctions after ou $\delta \varepsilon ו \varsigma$ (no one) between ou $\delta \varepsilon$--ov $\delta \varepsilon$ (continuative, and not--nor) and ovte--oute (disjunctive, neither--nor).

To look thereon ( $\beta \lambda \varepsilon \pi \varepsilon เ v$ avto). Into the contents of the book. The universe declines the challenge.

Rev 5:4
I wept much ( $\varepsilon \gamma \omega \varepsilon \kappa \lambda \alpha \iota v \geqslant \pi \partial \lambda v$ ). Imperfect active of $\kappa \lambda \alpha \iota \omega$, picturesque, descriptive, I kept on weeping much; natural tense in these vivid visions ( $1: 12 ; 2: 14 ; 5: 4,14 ; 6: 8,9 ; 10: 10$; 19:14; 21:15 ). Perhaps weeping aloud.

Was found ( $\varepsilon \cup \rho \varepsilon \theta \eta)$. First aorist passive indicative of $\varepsilon u \rho \iota \sigma \kappa \omega$.
Worthy ( $\alpha \xi$ เoc). Predicative nominative after $\varepsilon \cup \rho \varepsilon \theta \eta$.
Rev 5:5
One of the elders ( $\varepsilon \iota \varsigma \varepsilon \kappa \tau \omega v \pi \rho \varepsilon \sigma \beta \nu \tau \varepsilon \rho \omega v$ ). "One from among the elders" of 4:4,10 ( $\varepsilon \kappa$ with the ablative 8 times in the Apocalypse, 12 in the Fourth Gospel, 10 in rest of the N.T., in place of the mere partitive genitive). No particular reason for one elder as the agent over another ( 7:13).

Saith ( $\lambda \varepsilon \gamma \varepsilon$ ). Dramatic vivid present.
Weep not ( $\mu \eta \kappa \lambda \alpha ı \varepsilon$ ). "Cease weeping" (prohibition with $\mu \eta$ and the present active imperative of $\kappa \lambda \alpha \omega \omega$.

The Lion (o $\lambda \varepsilon \omega v$ ). Satan is called a lion by Peter ( $1 \mathrm{Pe} 5: 8$ ), but the metaphor belongs to Jesus also. Judah is called a lion in the blessing of Jacob (Ge 49:9) and Jesus as the greatest of the tribe of Judah, "the Root of David" ( $\eta \rho \iota \zeta \alpha \Delta \alpha \varepsilon \varepsilon \delta$, Isa 11:1,10 ) or the Branch from this root (the Messiah).

Hath overcome ( $\varepsilon v / \kappa \eta \sigma \varepsilon v)$. First aorist active indicative of vıк $\alpha \omega$, "did overcome," coming first in the sentence as "the great historical fact of the victory of the Christ" (Swete).

Rev 5:6
And I saw ( $\kappa \alpha \varepsilon \iota \delta o v$ ). Stirred by the words of the elder in verse 5 (ı $\delta o v$, behold). "I beheld."

In the midst $(\varepsilon v \mu \varepsilon \sigma \omega)$. See $4: 6$ for this idiom. It is not quite clear where the Lamb was standing in the vision, whether close to the throne or in the space between the throne and the elders (perhaps implied by "came" in verse 7, but nearness to the throne is implied by 14:1; Ac 7:56; Heb 10:11).

A Lamb ( $\alpha \rho v$ vov). Elsewhere in the N.T. o a $\mu v o$ os is used of Christ (Joh 1:29,36; Acts 8:32; 1Pe 1:19 like Isa 53:7), but in the Apocalypse to apvov occurs for the Crucified Christ 29 times in twelve chapters.

Standing ( $\varepsilon \sigma \tau \eta \kappa \propto \varsigma)$. Second perfect active (intransitive of $\iota \sigma \tau \eta \mu$ ) neuter accusative singular (grammatical gender like $\alpha \rho v$ vov), though some MSS. read $\varepsilon \sigma \tau \eta \kappa \omega \varsigma$ (natural gender masculine and nominative in spite of $\varepsilon \in \delta o v$ construction according to sense).

As though it had been slain ( $\omega \varsigma \varepsilon \sigma \varphi \alpha \gamma \mu \varepsilon v o v$ ). Perfect passive predicate participle of $\sigma \varphi \alpha \zeta \omega$, old word, in N.T. only in $\operatorname{Re} 5: 6,9,12 ; 6: 4,9 ; 13: 3 ; 18: 24 ; 1$ Jo $3: 12$. H $\omega \varsigma$ (as if) is used because the Lamb is now alive, but (in appearance) with the marks of the sacrifice. The Christ as the Lamb is both sacrifice and Priest (Heb 9:12f.; 10:11).

Having $(\varepsilon \chi \omega v)$. Construction according to sense again with masculine nominative participle instead of $\varepsilon \chi \circ v \tau \alpha$ (masculine accusative singular) or $\varepsilon \chi \circ v$ (neuter accusative singular). Seven horns (кعраৎ) is a common symbol in the O.T. for strength and kingly power (1Sa 2:10; 1Ki 22:11; Ps 112:9; Da 7:7,20ff. ) and often in Rev. (Re 12:3; 13:1; 17:3,12 ). Fulness of power (the All-powerful one) is symbolized by seven.

Seven eyes ( $\varphi \theta \theta \lambda \mu$ оטऽ $\varepsilon \pi \tau \alpha$ ). Like Zec 3:9; 4:10 and denotes here, as there, omniscience. Here they are identified with the seven Spirits of Christ, while in 1:4 the seven Spirits are clearly the Holy Spirit of God (3:1), and blaze like torches (4:5), like the eyes of Christ ( 1:14). The Holy Spirit is both Spirit of God and of Christ (Ro 8:9).

Sent forth ( $\alpha \pi \varepsilon \sigma \tau \alpha \lambda \mu \varepsilon v o$ ). Perfect passive predicate participle of $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$, masculine plural (agreeing with o and o $\varphi \theta \alpha \lambda \mu o v \varsigma$ in gender), but some MSS. have $\alpha \pi \varepsilon \sigma \tau \alpha \lambda \mu \varepsilon v \alpha$ agreeing with the nearer $\pi v \varepsilon v \mu \alpha \tau \alpha$.

Rev 5:7
He taketh ( $\varepsilon \wedge \lambda \eta \varphi \varepsilon \nu$ ). Perfect active indicative of $\lambda \alpha \mu \beta \alpha \nu \omega$, not used for the aorist (cf. $\eta \lambda \theta \varepsilon v$, he came), but vivid dramatic picture of the actual scene, "he has taken it."

Rev 5:8
He had taken $(\varepsilon \lambda \alpha \beta \varepsilon v)$. Here John drops back to the narrative tense (the second aorist active indicative of $\lambda \alpha \mu \beta \alpha v \omega)$, not the past perfect as the English rendering might indicate, merely "when he took." For like vivid variation (not confusion) of tenses with $\varepsilon \iota \lambda \eta \varphi \varepsilon \nu$ see 3:3; 8:5; 11:17 and with $\varepsilon \iota \rho \eta \kappa \alpha$ in 7:13f.; 19:3.

Fell down $(\varepsilon \pi \varepsilon \sigma \alpha v)$. Second aorist active indicative of $\pi \iota \pi \tau \omega$ with first aorist ( $-\alpha v$ ) ending, just "fell."

Having ( $\varepsilon \chi \circ \vee \tau \varepsilon \varsigma)$. "Holding."
A harp ( $\kappa \iota \theta \alpha \rho \alpha v)$. Old word, the traditional instrument (lyre or zithern) for psalmody (Ps 33:2; 98:5 , etc.).

Golden bowls ( $\varphi ⿺ 𠃊 \lambda \alpha \varsigma ~ \chi \rho v \sigma \alpha \varsigma)$. Broad shallow saucers, old word, in N.T. only in Re $5: 8 ; 15: 7 ; 16: 1-4,8,10,12,17 ; 17: 1 ; 21: 9$.

Of incense $(\theta \nu \mu \iota \alpha \mu \alpha \tau \omega v)$. Old word from $\theta \nu \mu \iota \alpha \omega$, to burn incense (Lu 1:9), as in Lu 1:10.

Which are ( $\alpha$ عוбıv). "Which (these bowls of incense) symbolize the prayers of the saints as in Ps 140:2; Lu 1:10.

Rev 5:9
They sing ( $\alpha \iota \delta o v \sigma \iota v$ ). Present active indicative of $\alpha \iota \delta \omega$. Old verb, to chant with lyrical emotion ( Col 3:16 ).

A new song ( $\omega \iota \delta \eta \nu$ кaı $\nu \eta \nu$ ). Cognate accusative for oı $\delta \varepsilon$ ( $\omega \iota \delta \eta$, song) is $\alpha o \iota \delta \varepsilon$ from $\alpha \varepsilon \iota \delta \omega$, that is $\alpha \iota \delta \omega$ (the verb used), old word already used (Col 3:16; Eph 5:19), called kaıv$\nu$ because a fresh song for new mercies (Isa 42:10; Ps 33:3; 40:3 , etc.), here in praise of redemption to Christ ( $14: 3$ ) like the new name ( $2: 17 ; 3: 12$ ), the new Jerusalem ( $3: 12 ; 21: 2$ ), the new heaven and the new earth ( $21: 1$ ), not the old song of creation ( $4: 8,11$ ) to God.

For thou wast slain (oт $\varepsilon \sigma \varphi \alpha \gamma \eta \varsigma)$. Second aorist passive indicative of $\sigma \varphi \alpha \zeta \omega$. A $\gamma о \rho \alpha \zeta \omega$ used by Paul and Peter of our purchase from sin by Christ (1Co 6:20; 7:23; $\mathrm{Ga} 3: 13 ; 4: 5 ; 2 \mathrm{Pe}$ 2:1 ; cf. 1Pe 1:18f. ).

Unto God ( $\tau \omega \theta \varepsilon \omega$ ). Dative case of advantage as also in verse 10 .
With thy blood ( $\varepsilon v \tau \omega \alpha \mu \alpha \tau \sigma o v$ ). Instrumental use of $\varepsilon v$ as in 1:5. The blood of Christ as the price of our redemption runs all through the Apocalypse. This is the reason why Christ is worthy to "take the book and open its seals." That is, he is worthy to receive adoration and worship ( $4: 11$ ) as the Father does.

Men of every ( $\varepsilon \kappa \pi \alpha \sigma \eta \varsigma$ ). No $\alpha v \theta \rho \omega \pi$ оия (men) or $\tau \imath v a \varsigma$ (some) before $\varepsilon \kappa$ in the Greek. See a like ellipsis in 11:9 with a like grouping of words for all mankind, representatives of all races and nations ( $7: 9 ; 13: 7 ; 14: 6$ ).

## Rev 5:10

Madest ( $\varepsilon \pi \sigma \not \square \sigma \alpha \varsigma)$. First aorist active indicative of $\pi o เ \varepsilon \omega$, a prophetic use anticipating the final result.

A kingdom and priests ( $\beta \alpha \sigma \iota \lambda \varepsilon \iota \alpha v$ ка $\varepsilon \rho \varepsilon \iota \varsigma)$. As the correct text in 1:6.
They reign ( $\beta \alpha \sigma i \lambda \varepsilon v o v \sigma t v$ ). Present active indicative, futuristic use, though Aleph $P$ have the future $\beta \alpha \sigma \lambda \lambda \varepsilon v \sigma o v \sigma \iota v$ (shall reign) as in 20:6.

Rev 5:11
And I saw ( $\kappa \alpha \varepsilon ו \delta o v$ ). A new feature introduced by the outer and vaster circle ( $\kappa \cup \kappa \lambda \omega$ ) of angels who catch up the new song of redemption in antiphonal singing, answering the song of the four living creatures and the twenty-four elders. Some MSS. read $\omega \varsigma$ (as if) before $\varphi \omega v \eta \nu$ (voice). Ten thousand times ten thousand ( $\mu v \rho ı \alpha \delta \varepsilon \varsigma \mu v \rho \iota \alpha \delta \omega \nu$ ка $\chi \downarrow \lambda ı \alpha \delta \varepsilon \varsigma \chi ı \lambda ı \alpha \omega \nu v$ ). Literally, "myriads of myriads and thousands of thousands," a mild husteron-proteron. The regular order in I Enoch 40:I. See Da 7:10 for $\chi \lambda^{\prime} \lambda_{ı} \alpha \nmid \lambda \iota a \delta \varepsilon \varsigma$ (thousand thousands) and $\mu \nu \rho ı \alpha$ $\mu \nu \rho i a \delta \varepsilon \varsigma$ (countless myriads). They are all efforts to express the innumerable hosts of the angels.

Rev 5:12
Worthy ( $\alpha \xi_{\iota} \circ v$ ). Agreeing in gender (grammatical neuter) with $\alpha \rho v$ ov , but some MSS. have $\alpha \xi_{\imath o \varsigma ~(m a s c u l i n e, ~ n a t u r a l ~ g e n d e r) . ~ N o t e ~ c h a n g e ~ t o ~ t h i r d ~ p e r s o n ~ \varepsilon \sigma \tau ı v ~ i n s t e a d ~ o f ~ s e c o n d ~}^{\text {d }}$ $\varepsilon$. The point of the song is the same as that in verses 9,10 , but the language differs. Note the repeated article to (the lamb the slain) referring to verses 6,9 . Note also the one article $\tau \eta \nu$ before $\delta u v a \mu \nu v$ for all the seven grounds of praise ( $\delta \nu v a \mu ı \nu$, power, $\pi \lambda o v \tau o v$, wealth, $\sigma о \varphi ı \alpha v$, wisdom, $\iota \sigma \chi \nu v$, strength, $\tau \iota \mu \eta \nu$, honor, $\delta o \xi \alpha \nu$, glory, $\varepsilon \cup \lambda o \gamma \iota \alpha \nu$, blessing), though $\pi \lambda o v \tau o v$
is masculine, in contrast with separate article for each item (all three feminine) in 4:11, here grouping them all together, "a heptad of praise" (Swete).

Rev 5:13
Every created thing ( $\pi \alpha v \kappa \tau \iota \sigma \mu \alpha)$. Every creature in a still wider antiphonal circle beyond the circle of angels (from $\kappa \tau \iota \zeta \omega$, for which see 1 Ti 4:4; Jas 1:18), from all the four great fields of life (in heaven, upon the earth, under the earth as in verse 3 , with on the sea $\varepsilon \pi \tau \eta \varsigma \theta \alpha \lambda \alpha \sigma \sigma \eta \zeta$ added). No created thing is left out. This universal chorus of praise to Christ from all created life reminds one of the profound mystical passage in Ro 8:20-22 concerning the sympathetic agony of creation ( $\kappa \tau \iota \sigma \iota)$ in hope of freedom from the bondage of corruption. If the trail of the serpent is on all creation, it will be ultimately thrown off.

Saying ( $\lambda \varepsilon \gamma 0 v \tau \alpha \varsigma)$. Masculine (construction according to sense, personifying the created things) if genuine, though some MSS. have $\lambda \varepsilon \gamma o v \tau \alpha$ (grammatical gender agreeing with $\pi \alpha \nu \tau \alpha)$ present active participle of $\lambda \varepsilon \gamma \omega$, to say.

And to the Lamb ( $\kappa \alpha \tau \omega \alpha \rho v i \omega)$. Dative case. Praise and worship are rendered to the Lamb precisely as to God on the throne. Note separate articles here in the doxology as in 4:11 and the addition of to кратоৎ (active power) in place of $\iota \sigma \chi \cup \varsigma$ (reserve of strength) in 5:12.

Rev 5:14
Amen $(A \mu \eta \nu)$. The four living creatures give their approval to the doxology after the antiphonal songs.

Fell down and worshipped ( $\varepsilon \pi \varepsilon \sigma \alpha \nu ~ к а ~ \pi \rho о \sigma \varepsilon к и ข \eta \sigma \alpha v)$. In silent adoration that closes the whole service of praise to the One upon the throne and to the Lamb. As in $4: 10$ so here the representatives of the redeemed bow in silent worship. Pliny says that the Christians sing a song to Christ as to God. He is here worshipped by the universe (Php 2:10f. ).

## Revelation 6

Rev 6:1
And I saw ( $\kappa \alpha$ عı $\delta o v$ ). As in 4:1; 5:1. The vision unfolds without anything being said about opening the book and reading from it. In a more vivid and dramatic fashion the Lamb breaks the seals one by one and reveals the contents and the symbolism. The first four seals have a common note from one of the four $\zeta \omega \alpha$ and the appearance of a horse. No effort will be made here to interpret these seals as referring to persons or historical events in the past, present, or future, but simply to relate the symbolism to the other symbols in the book. It is possible that there is some allusion here to the symbolism in the so-called "Little Apocalypse" of Mr 13; Mt 24f.; Lu 21 . The imagery of the four horses is similar to that in Zec 1:7-11; 6:1-8 (cf. Jer 14:12; 24:10; 42:17). In the Old Testament the horse is often the emblem of war (Job 39:25; Ps 76:6; Pr 21:31; Eze 26:10 ). "Homer pictures the horses of Rhesus as whiter than snow, and swift as the wind" (Vincent).

When the Lamb opened (oт $\eta v o \iota \xi \varepsilon v$ to $\alpha \rho v ı v)$ ). First aorist active indicative of $\alpha v o \gamma \gamma \omega$. This same phrase recurs in rhythmical order at the opening of each seal ( $6: 1,3,5,7,9,12$ ) till
 to it).

One ( $\mu \alpha v$ ). Probably used here as an ordinal (the first) as in Mt 28:1. See Robertson, Grammar, p. 671f.

Of ( $\varepsilon \kappa$ ). This use of $\varepsilon \kappa$ with the ablative in the partitive sense is common in the Apocalypse, as twice in this verse ( $\varepsilon \kappa \tau \omega v$, etc.). So $\varepsilon v o \varsigma ~ \varepsilon \kappa \tau \omega v$ (one of the four living creatures) is "the first of," etc.

In a voice of thunder ( $\varepsilon v \varphi \omega v \eta \beta \rho o v \tau \eta \varsigma)$. Old word used of John and James (Mr 3:17 ) and elsewhere in N.T. only Joh 12:29 and a dozen times in the Apocalypse.

Come (Epरou). Present middle imperative of $\varepsilon \rho \chi \circ \mu \alpha$, but with exclamatory force (not strictly linear). The command is not addressed to the Lamb nor to John (the correct text omits $\kappa \alpha \downarrow \delta \varepsilon$ "and see") as in 17:1; 21:9, but to one of the four horsemen each time. Swete takes it as a call to Christ because $\varepsilon \rho \chi \circ 0$ is so used in 22:17,20, but that is not conclusive.

Rev 6:2
And I saw and behold ( $\kappa \alpha \varepsilon \varepsilon \delta о v \kappa \alpha เ \delta o v$ ). This combination is frequent in the Apocalypse (4:1; 6:2,5,8; 14:1,14; 19:11 ).

A white horse (ıптоৎ $\lambda \varepsilon \cup \kappa о \varsigma)$. In Zec 6:1-8 we have red, black, white, and grizzled bay horses like the four winds of heaven, ministers to do God's will. White seems to be the colour of victory (cf. the white horse of the Persian Kings) like the white horse ridden by the Roman conqueror in a triumphant procession.

Had ( $\varepsilon \chi \omega v$ ). Agreeing in gender and case with o ка $\theta \eta \mu \varepsilon v o c$.
A bow ( $\tau \mathrm{\xi} \xi \mathrm{ov}$ ). Old word (Zec 9:13f. of a great bow), here only in N.T.

Was given ( $\varepsilon \delta 0 \theta \eta$ ). First aorist passive indicative of $\delta \iota \delta \omega \mu$.
A crown ( $\sigma \tau \varepsilon \varphi \alpha \vee o \varsigma$ ). See on $4: 4$ for this word.
He came forth ( $\varepsilon \xi \eta \lambda \theta \varepsilon v$ ). Second aorist active indicative of $\varepsilon \xi \varepsilon \rho \chi \circ \mu \alpha$, either to come out or to go out (went forth).

Conquering ( $v ı \kappa \omega v$ ). Present active participle of vikaw.
 subjunctive of $v ı \kappa \alpha \omega$. Here $\omega \varsigma \nu$ v $\kappa \eta \sigma \omega \nu$ (future active participle with $\omega \varsigma$ ) could have been used. The aorist tense here points to ultimate victory. Commentators have been busy identifying the rider of the white horse according to their various theories. "It is tempting to identify him with the Rider on the white horse in 19:11f. , whose name is 'the Word of God'" (Swete). Tempting, "but the two riders have nothing in common beyond the white horse."

Rev 6:3
The second seal ( $\tau \eta v \sigma \varphi \rho \alpha \gamma \iota \delta \alpha \tau \eta v \delta \varepsilon v \tau \varepsilon \rho \alpha v)$ ) "The seal the second." The white horse with his rider vanished from the scene bent on his conquering career.

Rev 6:4
A red horse (ıлтоৎ $\pi \cup \rho \rho о \varsigma)$. Old adjective from $\pi v \rho$ (fire), flame-coloured, blood-red (2Ki 3:22), in N.T. only here and 12:3, like Zec 1:8; 6:2 (roan horse).

To take peace from the earth ( $\lambda \alpha \beta \varepsilon ı \nu \tau \eta v \varepsilon \rho \eta \eta \eta \eta v \varepsilon \kappa \eta \zeta \gamma \eta \varsigma)$. Second aorist active infinitive of $\lambda \alpha \mu \beta \alpha \nu \omega$, and here the nominative case, the subject of $\varepsilon \delta o \theta \eta$ (see verse 2), "to take peace out of the earth." Alas, how many red horses have been ridden through the ages.

And that they should slay one another ( $\kappa \alpha \iota v \alpha \alpha \lambda \lambda \eta \lambda o v \varsigma ~ \sigma \varphi \alpha \xi о v \sigma \iota v$ ). Epexegetical explanatory purpose clause with $\operatorname{vo\alpha }$ and the future active of $\sigma \varphi \alpha \zeta \omega$ ( 5:6) instead of the more usual subjunctive (verse 2). Cf. Robertson, Grammar, p. 998f. This is what war does to perfection, makes cannon fodder (cf. Joh 14:27) of men.

A great sword ( $\mu \alpha \chi \alpha u \rho \alpha \mu \varepsilon \gamma \alpha \lambda \eta$ ). Maүaupa may be a knife carried in a sheath at the girdle (Joh 18:10 ) or a long sword in battle as here. Poнبaıa, also a large sword, is the only other word for sword in the N.T. (Re 1:16; 2:12,16; 6:8; 19:15,21).

Rev 6:5
A black horse (ı $\pi \pi о \varsigma \mu \varepsilon \lambda \alpha \varsigma)$. Lust of conquest brings bloodshed, but also famine and hunger. "The colour of mourning and famine. See Jer 4:28; 8:21; Mal 3:14, where mournfully is, literally, in black" (Vincent).

Had ( $\varepsilon \chi \omega v)$ as in verse 2.
A balance ( $\zeta \cup \gamma \circ v$ ). Literally, a yoke (old word from $\zeta \varepsilon v \gamma v v \mu$, to join), of slavery (Ac 15:10; Ga 5:1 ), of teaching (Mt 11:29), of weight or measure like a pair of scales evenly balancing as here (Eze 5:1; 45:10). The rider of this black horse, like the spectral figure of hunger, carries in his hand a pair of scales. This is also one of the fruits of war.

Rev 6:6

As it were a voice $(\omega \varsigma \varphi \omega \nu \eta \nu)$. "This use of $\omega \varsigma$, giving a certain vagueness or mysteriousness to a phrase, is one of the characteristics of the writer's style, e.g., $8: 1 ; 14: 3 ; 19: 1,6$ " (Beckwith). This voice comes from the midst of the four living creatures, "the protest of nature against the horrors of famine" (Swete).

A measure $(\chi \circ \imath v \xi)$. Old word for less than a quart with us, here only in N.T.
Of wheat (бוтov). Old word for wheat, a number of times in N.T., in Rev. only here and $18: 13$. This was enough wheat to keep a man of moderate appetite alive for a day.

For a penny ( $\delta \eta v \alpha \rho ı v)$. Genitive of price, the wages of a day laborer (Mt 20:2 ), about eighteen cents in our money today.

Of barley ( $\kappa \rho \iota \theta \omega \nu$ ). Old word $\kappa \rho \iota \eta \eta$, usually in plural as here. Barley was the food of the poor and it was cheaper even in the famine and it took more of it to support life. Here the proportion is three to one (cf. $2 \mathrm{Ki} 7: 18$ ). The proclamation forbids famine prices for food (solid and liquid).

Hurt thou not ( $\mu \eta \alpha \delta \iota \kappa \eta \sigma \eta \iota)$. Prohibition with $\mu \eta$ and the ingressive first aorist active subjunctive of $\alpha \delta \iota \kappa \varepsilon \omega$. See 7:3; 9:4 for $\alpha \delta_{ı} \varepsilon \omega$ for injury to vegetable life. "The prohibition is addressed to the nameless rider who represents Dearth" (Swete). Wheat and barley, oil and the vine, were the staple foods in Palestine and Asia Minor.

## Rev 6:8

 tender green grass) used of green grass ( $\operatorname{Mr} 6: 39$; $\operatorname{Re~8:7;~9:4),~here~for~yellowish,~common~}$ in both senses in old Greek, though here only in N.T. in this sense, greenish yellow. We speak of a sorrel horse, never of a green horse. Zechariah (Zec 6:3) uses поєкı入оৎ (grizzled or variegated). Homer used $\chi \lambda \omega \rho \circ \varsigma$ of the ashen colour of a face blanched by fear (pallid) and so the pale horse is a symbol of death and of terror.

His name was Death (ovo $\mu \alpha \alpha \tau \tau \omega$ o $\theta a v \alpha \tau o \varsigma)$. Anacoluthon in grammatical structure like that in Joh 3:1 (cf. Re 2:26) and common enough. Death is the name of this fourth rider (so personified) and there is with Death "his inseparable comrade, Hades (1:16; 20:13f. )" (Swete). Hades ( $\alpha \iota \delta \eta \varsigma$, alpha privative, and $\delta \varepsilon \iota v$, to see, the unseen) is the abode of the dead, the keys of which Christ holds $(\operatorname{Re} 1: 18)$.

Followed ( $\eta \kappa о \lambda o v \theta \varepsilon$ ). Imperfect active of $\alpha \kappa о \lambda o v \theta \varepsilon \omega$, kept step with death, whether on the same horse or on another horse by his side or on foot John does not say.

Over the fourth part of the earth ( $\varepsilon \pi \tau \circ \tau \varepsilon \tau \alpha \rho \tau \circ \nu \tau \eta \varsigma \gamma \eta \varsigma)$. Partitive genitive $\gamma \eta \varsigma$ after $\tau \varepsilon \tau \alpha \rho \tau o v$. Wider authority ( $\varepsilon \xi$ оvбı $\alpha$ ) was given to this rider than to the others, though what part of the earth is included in the fourth part is not indicated.

To kill ( $\alpha \pi о \kappa \tau \varepsilon เ \nu \alpha$ ). First aorist active infinitive of $\alpha \pi о \kappa \tau \varepsilon เ \nu \omega$, explanation of the $\varepsilon \xi 0 v \sigma \iota \alpha$ (authority). The four scourges of Eze 14:21 are here reproduced with instrumental $\varepsilon v$ with the inanimate things ( $\rho \circ \mu \varphi \alpha \iota \alpha \iota, \lambda \iota \mu \omega \theta \alpha v \alpha \tau \omega$ ) and v $\tau \sigma$ for the beasts $(\theta \eta \rho \iota \omega v)$. Death here
( $\theta a v a \tau \omega)$ seems to mean pestilence as the Hebrew does ( $\lambda_{\circ} \mu \boldsymbol{\mu}$-- cf. $\lambda_{1 \mu}$ ос famine). Cf. the "black death" for a plague.

Rev 6:9
 sacrifices was poured at the bottom of the altar (Le 4:7). The altar of sacrifice (Ex 39:39; 40:29 ), not of incense. The imagery, as in Hebrews, is from the tabernacle. For the word see Mt 5:23f., often in Rev. (Re 8:3,5; 9:13; 11:1; 14:18; 16:7). This altar in heaven is symbolic, of course, the antitype for the tabernacle altar (Heb 8:5). The Lamb was slain (5:6,9,12) and these martyrs have followed the example of their Lord.

The souls ( $\tau \alpha \varsigma \psi \cup \chi \alpha \varsigma)$. The lives, for the life is in the blood (Le 17:11), were given for Christ (Php 2:17; 2Ti 4:6).

Of the slain ( $\tau \omega \nu \varepsilon \sigma \varphi \alpha \gamma \mu \varepsilon v \omega \nu$ ). See 5:6. Christians were slain during the Neronian persecution and now again under Domitian. A long line of martyrs has followed.

For the word of God ( $\delta$ ta $\tau$ ov $\lambda$ oүov $\operatorname{\tau ov} \theta \varepsilon o v$ ). As in 1:9, the confession of loyalty to Christ as opposed to emperor-worship.

And for the testimony which they held ( $\kappa \alpha \delta \iota \alpha \tau \eta \nu \mu \alpha \rho \tau \nu \rho ı \alpha \nu \eta \nu \varepsilon \ell \chi \circ v$ ). See also 1:9. Probably ка equals "even" here, explaining the preceding. The imperfect tense $\varepsilon \not \chi \chi \vee v$ suits the repetition of the witness to Christ and the consequent death.

Rev 6:10
How long ( $\varepsilon \omega \varsigma \pi 0 \tau \varepsilon$ ). "Until when." Cf. Mt 7:17; Joh 10:24.
O Master (o $\delta \varepsilon \sigma \pi о \tau \eta \varsigma)$. Nominative articular form, but used as vocative ( $\delta \varepsilon \sigma \pi \circ \tau \alpha$ ) as in 4:11 (Joh 20:28). On $\delta \varepsilon \sigma \pi$ orns (correlative of $\delta$ ou $\mathrm{\lambda o} \mathrm{\varsigma}$ ) see Lu 2:29. Here (alone in the Apocalypse) it is applied to God as in Lu 2:29; Ac 4:24, but to Christ in Jude 1:4; 2Pe 2:1 .

The holy and true ( $\mathrm{o} \alpha \nvdash \circ \varsigma \kappa \alpha \alpha \lambda \eta \theta$ voৎ). See 3:7 for these attributes of God.
Avenge our blood on them that dwell upon the earth ( $\varepsilon \kappa \delta ı к \varepsilon \iota$, то $\alpha \mu \alpha ~ \eta \mu \omega \nu \varepsilon \kappa \tau \omega \nu$ катоюкоиข $\omega \omega v \varepsilon \pi \tau \eta \varsigma \gamma \eta \varsigma)$. This same idiom in 19:2 and see it also in Lu 18:7f. , "a passage which goes far to answer many questions in theodicy" (Swete). We find $\varepsilon \kappa \delta \kappa \kappa \varepsilon \omega$, late compound, used with $\varepsilon \kappa$ as here in De 18:19; 1Sa 24:13, but with $\alpha \pi$ o in Lu 18:3. For $\varepsilon \pi \tau \eta \varsigma \gamma \eta \varsigma$ (upon the earth) see 3:10.

Rev 6:11
A white robe ( $\sigma \tau 0 \lambda \eta \lambda \varepsilon v \kappa \eta$ ). Old word from $\sigma \tau \varepsilon \lambda \lambda \omega$, to equip, an equipment in clothes, a flowing robe (Mr 12:38). For the white robe for martyrs see 3:4f.; 4:4; 7:9,13; 19:14 .

That they should rest (iva $\alpha v a \pi \alpha v \sigma o v \tau \alpha)$. Sub-final clause with $\mathrm{v} \alpha$ and the future indicative (as in $3: 9 ; 6: 4$ ) middle rather than the aorist middle subjunctive $\alpha v \alpha \pi \alpha v \sigma \omega v \tau \alpha$ of Aleph C.

Yet for a little time ( $\varepsilon \tau$ र $\rho$ ovov $\mu \kappa \kappa \rho \circ \vee$ ). Accusative of extension of time as in 20:3. Perhaps rest from their cry for vengeance and also rest in peace ( 14:13). For the verb avatave see on Mt 11:28.

Until should be fulfilled ( $\varepsilon \omega \varsigma \pi \lambda \eta \rho \omega \theta \omega \sigma \tau v$ ). Future indefinite temporal clause with $\varepsilon \omega \varsigma$ and the first aorist passive subjunctive of $\pi \lambda \eta \rho \circ \omega$, to fill full (Mt 23:32; Col 2:10 ), "until be filled full" (the number of), regular Greek idiom.

Which should be killed (o $\mu \varepsilon \lambda \lambda$ оv $\tau \varepsilon \varsigma ~ \alpha \pi о \kappa \tau \varepsilon v v \varepsilon \sigma \theta \alpha$ ). Regular construction of articular present active participle of $\mu \varepsilon \lambda \lambda \omega$ (about to be, going to be) with the present passive infinitive of $\alpha \pi о \kappa \tau \varepsilon \nu v \omega$, Aeolic and late form for $\alpha \pi о \kappa \tau \varepsilon เ v \omega$, to kill (also in Mr 12:5 ). John foresees more persecution coming ( $2: 10 ; 3: 10$ ).

Rev 6:12
There was a great earthquake ( $\sigma \varepsilon \iota \sigma \mu \circ \varsigma \mu \varepsilon \gamma \alpha \varsigma \varepsilon \gamma \varepsilon v \varepsilon \tau o$ ). "There came a great earthquake." Jesus spoke of earthquakes in his great eschatological discourse (Mr 13:8). In Mt 24:29 the powers of the heavens will be shaken. $\sum \varepsilon \iota \sigma \mu$ os is from $\sigma \varepsilon \omega \omega$, to shake, and occurs also in Re $8: 5 ; 11: 13,19 ; 16: 18$. The reference is not a local earthquake like those so common in Asia Minor
 sack, originally a bag for holding things (Ge 42:25,35), then coarse garment of hair ( $\tau \rho \chi \chi\llcorner\circ$, old word from $\theta \rho \iota$, here only in N.T.) clinging to one like a sack, of mourners, suppliants, prophets leading austere lives (Mt 3:4; 11:21; Lu 10:13 ). Here the hair is that of the black goat (Isa 50:3 ). Cf. Joe 2:10; Eze 32:7f.; Isa 13:10; Mr 13:24f. See Ec 12:2 for eclipses treated as symbols of old age. Apocalyptic pictures all have celestial phenomena following earthquakes.

As blood ( $\omega \varsigma \alpha \mu \alpha$ ). In Ac 2:20 we find Peter interpreting the apocalyptic eschatological language of Joe 2:31 about the sun being turned into darkness and the moon into blood as pointing to the events of the day of Pentecost as also "the great day of the Lord." Peter's interpretation of Joel should make us cautious about too literal an exegesis of these grand symbols.

Rev 6:13
Her unripe figs ( $\tau 0 \cup \varsigma$ o $\begin{gathered}\text { uvOOuc autnc). An old word (Latin grossi) for figs that grow }\end{gathered}$ in winter and fall off in the spring without getting ripe (So 2:11f. ), here only in N.T. Jesus used the fig tree (Mr 13:28) as a sign of the "end of the world's long winter" (Swete). Cf. Isa 34:4; Na 3:12 .

When she is shaken of a great wind (vпо $\alpha v \varepsilon \mu о v \mu \varepsilon \gamma \alpha \lambda о v \sigma \varepsilon ⿺ 辶 \mu v \eta \eta$ ). Present passive participle of $\sigma \varepsilon \omega \omega$, "being shaken by a great wind." See Mt 11:7 for the reed so shaken.

Rev 6:14
Was removed ( $\alpha \pi \varepsilon \chi \omega \rho \iota \sigma \theta \eta)$. First aorist passive indicative of $\alpha \pi \sigma \chi \omega \rho \iota \zeta \omega$, to separate, to part (Ac 15:39). "The heaven was parted."

As a scroll when it is rolled up ( $\omega \varsigma \beta \iota \beta \lambda_{\llcorner\circ} \varepsilon \lambda_{\iota} \sigma \sigma \circ \mu \varepsilon v o v$ ). Present passive participle of $\varepsilon \lambda เ \sigma \sigma \omega$, old verb, to roll up, in N.T. only here (from Isa 34:4) and Heb 1:12 (from Ps 102:27 ). Vivid picture of the expanse of the sky rolled up and away as a papyrus roll (Lu 4:17 ).

Were moved ( $\varepsilon \kappa ı \nu \eta \theta \eta \sigma \alpha v)$. First aorist passive indicative of $\kappa เ v \varepsilon \omega$, to move.
Out of their places ( $\varepsilon \kappa \tau \omega v \tau 0 \pi \omega v \alpha \nu \tau \omega v$ ). See also 16:20 for these violent displacements in the earth's crust. Cf. Na 1:5; Jer 4:24. Jesus spoke of faith removing mountains (of difficulty) as in Mr 11:23 (cf. 1Co 13:2 ).

Rev 6:15
The princes (o $\mu \varepsilon \gamma \iota \sigma \tau \alpha v \varepsilon \varsigma)$. Late word from the superlative $\mu \varepsilon \gamma เ \sigma \tau \circ \varsigma$, in LXX, Josephus, papyri, in N.T. only in Mr 6:21; Re 6:15; 18:23, for the grandees, the persecuting proconsuls (Swete).

The chief captains (o $\chi \downarrow \lambda 1 \alpha \rho \chi 0$ ). The commanders of thousands, the military tribunes (Mr 6:21; 19:18).

The rich (o $\pi \lambda$ ovoto). Not merely those in civil and military authority will be terrorstricken, but the self-satisfied and complacent rich (Jas 5:4f. ).

The strong (o เ $\sigma \chi \cup \rho o$ ). Who usually scoff at fear. See the list in 13:16; 19:18. Cf. Lu 21:26.

Every bondman ( $\pi \alpha \varsigma \delta o u \lambda o \varsigma)$
and freeman ( $\kappa \alpha \varepsilon \lambda \varepsilon v \theta \varepsilon \rho \circ \varsigma$ ). The two extremes of society.
Hid themselves in the caves and in the rocks of the mountains ( $к \kappa \rho \cup \psi a v ~ \varepsilon a u \tau о и \varsigma ~ \varepsilon ı \varsigma ~$ $\tau \alpha \sigma \pi \eta \lambda \alpha \iota \alpha$ ка $\varepsilon เ \varsigma \tau \alpha \varsigma \pi \varepsilon \tau \rho \alpha \varsigma \tau \omega \nu$ о $\rho \varepsilon \omega v$ ). Based on Isa 2:10,18f. First aorist active indicative of $\kappa \rho v \pi \tau \omega$ with the reflexive pronoun. For the old word $\sigma \pi \eta \lambda \alpha \circ \frac{}{}$ see Mt 21:13; Heb 11:38 . O $\rho \varepsilon \omega v$ is the uncontracted Ionic form (for op $\omega v$ ) of the genitive plural of opoc (mountain).

Rev 6:16
They say ( $\lambda \varepsilon \gamma o v \sigma เ v$ ). Vivid dramatic present active indicative, as is natural here.
Fall on us (Пєбатє $\left.\varepsilon \varphi^{\prime} \eta \mu \alpha \varsigma\right)$. Second aorist (first aorist ending) imperative of $\pi \iota \pi \tau \omega$, tense of urgency, do it now.

And hide us ( $\kappa \alpha \kappa \rho \cup \psi \alpha \tau \varepsilon ~ \eta \mu \alpha \varsigma) . ~ S a m e ~ t e n s e ~ o f ~ u r g e n c y ~ a g a i n ~ f r o m ~ к \rho ט \pi \tau \omega ~(v e r b ~ i n ~$ verse 15). Both imperatives come in inverted order from Ho 10:8 with ка $\lambda u \psi a \tau \varepsilon$ (cover) in place of кричатє (hide), quoted by Jesus on the way to the Cross (Lu 23:30) in the order here, but with ка入 $\nu \psi a \tau \varepsilon$, not $\kappa \rho \cup \psi \alpha \tau \varepsilon$.

From the face of him that ( $\alpha \pi 0 \pi \rho о \sigma \omega \pi \sigma v \tau 0 v$, etc.). "What sinners dread most is not death, but the revealed Presence of God" (Swete). Cf. Ge 3:8 .

And from the wrath of the Lamb (ка ало тŋऽ орүๆऽ тov a $\rho v$ оои). Repetition of "the grave irony" (Swete) of 5:5f. The Lamb is the Lion again in the terribleness of his wrath. Recall the mourning in 1:7. See Mt 25:41ff. where Jesus pronounces the woes on the wicked.

## Rev 6:17

The great day ( $\eta \eta \mu \varepsilon \rho \alpha \eta \mu \varepsilon \gamma \alpha \lambda \eta$ ). The phrase occurs in the O.T. prophets (Joe 2:11,31; Zep 1:14. Cf. Jude 1:6) and is here combined with "of their wrath" ( $\tau \eta \varsigma \quad \rho \gamma \eta \eta_{\varsigma} \alpha v \tau \omega v$ ) as in Zep 1:15,18; 2:3; Rom 2:5 . "Their" ( $\alpha v \tau \omega v$ ) means the wrath of God and of the Lamb put here on an equality as in 1:17f., $22: 3,13$; 1 Th $3: 11 ; 2 \mathrm{Th} 2: 16$. Beckwith holds that this language
about the great day having come "is the mistaken cry of men in terror caused by the portents which are bursting upon them." There is something, to be sure, to be said for this view which denies that John commits himself to the position that this is the end of the ages.

And who is able to stand? (ка $\tau \iota \varsigma ~ \delta u v a \tau \alpha ~ \sigma \tau \alpha \theta \eta v \alpha \iota ?$ ). Very much like the words in Na 1:6; Mal 3:2 . First aorist passive infinitive of $\iota \sigma \tau \eta \mu$. It is a rhetorical question, apparently by the frightened crowds of verse 15 . Swete observes that the only possible answer to that cry is the command of Jesus in Lu 21:36 : "Keep awake on every occasion, praying that ye may get strength to stand ( $\sigma \tau \alpha \theta \eta v \alpha$, the very form) before the Son of Man."

## Revelation 7

Rev 7:1
After this ( $\mu \varepsilon \tau \alpha$ тovio). Instead of the seventh seal ( 8:1) being opened, two other episodes or preliminary visions occupy chapter 7 (the sealing of the servants of God 7:1-8 and the vision of the redeemed before the throne 7:9-17).

Standing ( $\varepsilon \sigma \tau \omega \tau \alpha \varsigma)$. Second perfect predicate participle of $\iota \sigma \tau \eta \mu$, intransitive and followed by $\varepsilon \pi$ and the accusative case $\gamma \omega v i \alpha c$ as already in 3:20 ( $\varepsilon \pi \theta v \rho \iota \alpha v$ ) and often again ( 8:3 some MSS., others genitive; $11: 11 ; 12: 18 ; 14: 1 ; 15: 2$ ), but note $\varepsilon \pi$ with genitive $\theta \alpha \lambda \alpha \sigma \sigma \eta$, in the next clause, like $\varepsilon \pi \kappa \varepsilon \varphi \alpha \lambda \eta \zeta$ in 12:1; 7:3.

Corners ( $\gamma \omega v / a \varsigma$ ). Old word for angle (Mt 6:5 ), also in 20:8.
Holding (крatouvtac). Present active participle of к $\rho \alpha \tau \varepsilon \omega$, to hold fast (Mr 7:3; Joh 20:23). The four winds (cf. Mt 24:31) are held prisoner by angels at each of the four corners. Some Jews held the winds from due north, south, east, west to be favourable, while those from the angles (see Ac 27:14) were unfavourable (Charles). There is an angel of the fire ( 14:18) and an angel of the waters ( 16:5).

That no wind should blow ( $\imath v \alpha \mu \eta \pi v \varepsilon \eta \quad \alpha v \varepsilon \mu \circ \varsigma)$. Negative purpose clause with $v \propto \alpha \mu \eta$ and the present active subjunctive, "lest a wind keep on blowing."

Upon any tree ( $\varepsilon \pi \pi \alpha v \delta \varepsilon v \delta \rho o v)$. Accusative case here with $\varepsilon \pi$ rather than the preceding genitives ( $\gamma \eta \sigma, \theta \alpha \lambda \alpha \sigma \sigma \eta \varsigma)$, "upon the land or upon the sea," but "against any tree" (picture of attack on the tree like a tornado's path).

Rev 7:2
Ascend ( $\alpha v \alpha \beta \alpha เ v o v \tau \alpha)$. Present active participle of $\alpha v \alpha \beta \alpha \iota v \omega$, "ascending," "going up," picturing the process.

From the sun-rising ( $\alpha \pi \sigma$ avato $\lambda \eta \varsigma ~ \eta \lambda ı 0 u$ ). Same phrase in 16:12. From the east, though why is not told. Swete suggests it is because Palestine is east of Patmos. The plural a $\pi 0$ avato $\lambda \omega v$ occurs in Mt 2:1 without $\eta \lambda_{1}$ ov (sun).

The seal of the living God ( $\sigma \varphi \rho \alpha \gamma \iota \delta \alpha \theta \varepsilon \sigma \nu \zeta \omega v \tau \sigma \varsigma)$. Here the signet ring, like that used by an Oriental monarch, to give validity to the official documents. The use of $\zeta \omega v \tau o \varsigma$ with $\theta$ gov accents the eternal life of $\operatorname{God}(1: 18 ; 10: 6 ; 15: 7)$ as opposed to the ephemeral pagan gods.

To whom it was given (oıs $\varepsilon \delta o \theta \eta$ autoıs). For $\varepsilon \delta 0 \theta \eta$ see on $6: 2,4$, etc. The repetition of autors in addition to oıs (both dative) is a redundant Hebraism (in vernacular Koine to some extent) often in the Apocalypse ( $3: 8$ ). The angels are here identified with the winds as the angels of the churches with the churches ( $1: 20$ ).

To hurt ( $\alpha \delta \iota \kappa \eta \sigma \alpha$ ). First aorist active infinitive of $\alpha \delta \iota \kappa \varepsilon \omega$, subject of $\varepsilon \delta o \theta \eta$, common use of $\alpha \delta$ Iк $\varepsilon \omega$ in this sense of to hurt in the Apocalypse (2:11; 6:6 already), in Lu 10:19 also. The injury is to come by letting loose the winds, not by withholding them.

## Rev 7:3

Hurt not ( $\mu \eta \alpha \delta \iota \kappa \eta \sigma \eta \tau \varepsilon$ ). Prohibition with $\mu \eta$ and the ingressive aorist active subjunctive of $\alpha \delta \iota \kappa \varepsilon \omega$, not to begin to hurt.

Till we shall have sealed ( $\alpha \not \rho \rho \sigma \varphi \rho \alpha \gamma \iota \omega \mu \varepsilon v$ ). Temporal clause of indefinite action for the future with $\alpha \chi \rho$ (sometimes $\alpha \chi \rho ı \varsigma$ ov or $\alpha \chi \rho ı \varsigma ~ o v ~ \alpha v$ ) and the aorist subjunctive as in $15: 8 ; 20: 3,5$ or the future indicative ( $17: 7$ ), usually with the notion of ascent (up to) rather than extent like $\mu \varepsilon \chi \rho$.

An (modal) sometimes occurs, but it is not necessary. But there is no futurum exactum idea in the aorist subjunctive, simply "till we seal," not "till we shall have sealed."

Upon their foreheads $(\varepsilon \pi \tau \omega \nu \mu \varepsilon \tau \omega \pi \omega v)$. From Eze 9:4. Old word ( $\mu \varepsilon \tau \alpha, \omega \pi \varsigma$, after the eye, above the eye, the space above or between the eyes), in N.T. only in the Apocalypse
 who are to be thus marked linked with angels in the service of God see Re 1:1; 2:20; 19:2,5; 22:3,6.

Rev 7:4
The number of the sealed ( $\tau 0 v \alpha \rho ı \theta \mu \nu \tau \omega v \varepsilon \sigma \varphi \rho \alpha \gamma \iota \sigma \mu \varepsilon \nu \omega v$ ). Accusative case object of $\eta \kappa о v \sigma \alpha$ and genitive of the perfect passive articular participle of $\sigma \varphi \rho \alpha \gamma \iota \zeta \omega$. He did not see the sealing or count them himself, but only heard.

A hundred and forty and four thousand ( $\varepsilon \kappa \alpha \tau о \nu \tau \varepsilon \sigma \sigma \varepsilon \rho \alpha \kappa о \nu \tau \alpha \tau \varepsilon \sigma \sigma \alpha \rho \varepsilon \varsigma ~ \chi \iota \lambda ı \alpha \delta \varepsilon \varsigma)$. Symbolical, of course, and not meant to be a complete number of the sealed (or saved) even in that generation, let alone for all time. The number connotes perfection (Alford), $12 \times 12 \times 1000=$ a hundred and forty-four thousands ( $\chi \wedge \lambda ı \alpha \delta \varepsilon \varsigma, 5: 11$ ). Nominative absolute, not agreeing in case either with $\alpha \rho \iota \theta \mu o v$ (accusative) or $\varepsilon \sigma \varphi \rho \alpha \gamma \iota \sigma \mu \varepsilon \omega \nu$ (genitive). So as to the case of $\varepsilon \sigma \varphi \rho a \gamma \iota \sigma \mu \varepsilon v o$.

Out of every tribe of the children of Israel ( $\varepsilon \kappa \pi \alpha \sigma \eta \varsigma \varphi v \lambda \eta \varsigma v t \omega v$ I $\sigma \rho \alpha \eta \lambda$ ). There are two opposite views here, one taking the sealed as referring only to Jews (either actual Jews as a remnant or just Jewish Christians), the other including Gentiles as well as Jewish Christians, that is the true Israel as in 2:9; 3:9ff. and like Paul in Galatians and Romans. This is the more probable view and it takes the twelve tribes in a spiritual sense. But in either view there remains the difficulty about names of the tribes. The list is not geographical, since Levi is included, but Dan is omitted and Manasseh put in his place, though he as the son of Joseph is included in Joseph. Irenaeus suggested that Antichrist was expected to come from the tribe of Dan and hence the omission here. There are various lists of the tribes in the O.T. (Ge 35:22f.; 46:8ff.,49; Ex 1:1ff.; Nu 1:2; 13:4f.; 26:34; De 27:11f.; 33:6ff.; Jos 13-22; Jud 5; 1Ch 2-8; 12:24ff.; 27:16ff.; Eze 48 ) and given in various orders. In 1Ch 7:12 both Dan and Zebulon are omitted. Joseph is given here in place of Ephraim. The distribution is equal $(12,000)$ to each tribe.

Rev 7:9

Which no man could number (ov api $\theta \mu \eta \sigma \alpha \alpha \cup \tau o v$ ov $\delta \varepsilon ı \varsigma \varepsilon \delta u v a \tau o$ ). Redundant repetition of the pronoun avtov after the relative ov as in 7:5; 3:8. Eסuvato imperfect indicative and $\alpha \rho i \theta \mu \eta \sigma \alpha$ first aorist active infinitive of $\alpha \rho i \theta \mu \varepsilon \omega$, old verb, in N.T. only here, Mt 10:30; Lu 12:7. See 5:9 (also 11:9; 13:7; 14:10; 17:15) for the list of words after $\varepsilon \kappa$ (the spiritual Israel carried on all over the world), "a polyglott cosmopolitan crowd" (Swete).

Standing ( $\varepsilon \sigma \tau \omega \tau \varepsilon \varsigma)$. Same form in 7:1, only nominative masculine plural referring to o $\chi \lambda \circ \varsigma$ (masculine singular), construction according to sense like the plural $\lambda \varepsilon \gamma \circ v \tau \omega v$ with ox $\lambda$ ov in 19:1.

Arrayed ( $\pi \varepsilon \rho 1 \beta \varepsilon \beta \lambda \eta \mu \varepsilon v o u \varsigma)$. Perfect passive participle of $\pi \varepsilon \rho \iota \beta \alpha \lambda \lambda \omega$, but in the accusative plural (not nominative like $\varepsilon \sigma \tau \omega \tau \varepsilon \varsigma$ ), a common variation in this book when preceded by $\varepsilon \iota \delta o v$ and $\iota \delta o v$ as in $4: 4$ ( $\theta \rho \circ$ voı, $\pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho \circ \cup \varsigma)$. Charles regards this as a mere slip which would have been changed to $\pi \varepsilon \rho(\beta \varepsilon \beta \lambda \eta \mu \varepsilon v o$ if John had read the MS. over.

In white robes ( $\sigma \tau 0 \lambda a \varsigma \lambda \varepsilon v \kappa \alpha \varsigma)$. Predicate accusative retained with this passive verb of clothing as in 7:13; 10:1; 11:3; 12:1; 17:4; 18:16; 19:13 .

Palms ( $\varphi$ olvikec). Nominative again, back to construction with $1 \delta o v$, not $\varepsilon$ ı $\delta o v$. Old word, in N.T. only here for palm branches and Joh 12:13 for palm trees. Both these and the white robes are signs of victory and joy.

Rev 7:10
They cry ( $\kappa \rho \alpha \zeta о и \sigma)$. Vivid dramatic present.
With a great voice ( $\varphi \omega \vee \eta \mu \varepsilon \gamma \alpha \lambda \eta$ ). As in 6:10; 7:2 . "The polyglott multitude shouts its praises as with one voice" (Swete).

Salvation ( $\eta \sigma \omega \tau \eta \rho(\alpha)$. As in 12:10; 19:1 . Nominative absolute. Salvation here is regarded as an accomplished act on the part of those coming out of the great tribulation (verse 14) and the praise for it is given to $\operatorname{God}(\tau \omega \theta \varepsilon \omega$, dative case) and to the Lamb ( $\tau \omega \alpha \rho v \omega$, dative also). Both God and Christ are thus called $\sigma \omega \tau \eta \rho$ as in the Pastoral Epistles, as to God (1Ti
 Jude 1:3.

Rev 7:11
Were standing (เఠтףкєєбav). Past perfect active of $\iota \sigma \tau \eta \mu$ intransitive and used like an imperfect as in Joh 19:25.

Round about (кvк $\lambda \omega$ ). Preposition (in a circle) with genitive as in 4:6; 5:11. The angels here rejoice in the salvation of men ( Lu 15:7,10; 1Pe 1:12).

Upon their faces ( $\varepsilon \pi \tau \alpha \pi \rho 0 \sigma \omega \pi \alpha \alpha \cup \tau \omega v$ ). In reverential worship of God as in 11:16. For this worship (fell and worshipped) see also $4: 10 ; 5: 14 ; 11: 16 ; 19: 4,10 ; 22: 8$. The dative $\tau \omega \theta \varepsilon \omega$ (God) with $\pi \rho \circ \sigma \kappa v v \varepsilon \omega$ (to worship) is the usual construction for that meaning. When it means merely to do homage the accusative case is usual in this book (Charles). But in the Fourth Gospel the reverse order is true as to the cases with $\pi \rho о \sigma \kappa \nu v \varepsilon \omega$ (Abbott, Joh. Vocab. pp. 138-142).

Rev 7:12
Note $\alpha \mu \eta \nu$ at the beginning and the close of the doxology. Note also separate feminine article with each of the seven attributes given God, as in 4:11; 5:12,13 .

Rev 7:13
Answered ( $\alpha \pi \varepsilon \kappa \rho 1 \theta \eta$ ). First aorist passive (deponent) of $\alpha \pi о \kappa \rho \iota \nu o \mu \alpha$ with $\lambda \varepsilon \gamma \omega v$ (saying), a common (only here in the Apocalypse) Hebrew redundancy in the Gospels (Mr 9:5 ). An elder intervenes, though no question has been asked to interpret the vision (Swete).

These (ovto). Prophetic predicate nominative put before $\tau \iota v \varepsilon \varsigma \varepsilon \iota \sigma \iota v$ (who are they). Note article repeated with $\sigma \tau 0 \lambda a \varsigma$ pointing to verse 9 , and accusative also retained after $\pi \varepsilon \rho \iota \_\beta \lambda \eta \mu \varepsilon v o$ as there. Both "who" and "whence" as in Jos 9:8.

Rev 7:14
I say ( $\varepsilon \iota \rho \kappa \kappa)$. Perfect active indicative of $\varepsilon \iota \tau \circ v$, "I have said." "To the Seer's mind the whole scene was still fresh and vivid" (Swete) like кєк $\rho \alpha \gamma \varepsilon v$ in Joh 1:15 and $\varepsilon ı \lambda \eta \varphi \varepsilon v$ in $\operatorname{Re}$ 5:7, not the so-called "aoristic perfect" which even Moulton (Prol. p. 145) is disposed to admit.

My lord (Kv $\rho \varepsilon \mu \mathrm{ov}$ ). "An address of reverence to a heavenly being" (Vincent), not an act of worship on John's part.

Thou knowest ( $\sigma v$ ot $\delta \alpha \varsigma$ ). "At once a confession of ignorance, and an appeal for information" (Swete), not of full confidence like $\sigma v$ oı $\delta a \varsigma$ in Joh 21:15f. .

They which come out of the great tribulation (o ع $\rho \chi о \mu \varepsilon v o \varepsilon \kappa \tau \eta \varsigma \theta \lambda \iota \psi \varepsilon \omega \varsigma \tau \eta \varsigma \mu \varepsilon \gamma \alpha \lambda \eta \varsigma$ ). Present middle participle with the idea of continued repetition. "The martyrs are still arriving from the scene of the great tribulation" (Charles). Apparently some great crisis is contemplated (Mt 13:19ff.; 24:21; Mr 13:10 ), though the whole series may be in mind and so may anticipate final judgment.

And they washed ( $\kappa \alpha \varepsilon \pi \lambda \nu v a v$ ). First aorist active indicative of $\pi \lambda \nu v \omega$, old verb, to wash, in N.T. only $\operatorname{Lu} 5: 2 ; \operatorname{Re} 7: 14 ; 22: 14$. This change of construction after o $\varepsilon \rho \chi o \mu \varepsilon v$ o from o $\pi \lambda \nu \nu \eta \sigma \alpha \nu \tau \varepsilon \varsigma$ to $\kappa \alpha \varepsilon \pi \lambda \nu v a v$ is common in the Apocalypse, one of Charles's Hebraisms, like $\kappa \alpha \varepsilon \pi о$ п $\sigma \varepsilon v$ in 1:6 and $\kappa \alpha \pi \lambda \alpha \nu \alpha$ in 2:20.

Made them white ( $\varepsilon \lambda \varepsilon v \kappa \alpha v a v$ ). First aorist active indicative of $\lambda \varepsilon v \kappa \alpha \iota v \omega$, to whiten, old verb from $\lambda \varepsilon \cup \kappa \circ \varsigma$ (verse 13), in N.T. only here and Mr 9:3. "Milligan remarks that robes are the expression of character and compares the word habit used of dress" (Vincent). The language here comes partly from Ge 49:11 and partly from Ex 19:10,14. For the cleansing power of Christ's blood see also Ro 3:25; 5:9; Col 1:20: Eph 1:7; 1Pe 1:2; Heb 9:14; 1Jo 1:7; Re 1:5; 5:9;22:14. "The aorists look back to the life on earth when the cleansing was effected" (Swete). See Php 2:12f. for both divine and human aspects of salvation.

In the blood of the Lamb ( $\varepsilon v \tau \omega \alpha \not \mu \alpha \tau \tau o v \alpha \rho v i o v)$. There is power alone in the blood of Christ to cleanse from $\sin (1$ Jo 1:7 ), not in the blood of the martyrs themselves. The result is "white," not "red," as one might imagine.

## Rev 7:15

Therefore ( $\delta \iota \alpha$ tov $\tau 0$ ). Because of the washing described in verse 14.
They serve him ( $\lambda \alpha \tau \rho \varepsilon v o v \sigma ı \nu \nu \tau \omega$ ). Dative case with $\lambda \alpha \tau \rho \varepsilon v \omega$ (present active indicative, old verb, originally to serve for hire $\lambda \alpha \tau \rho o v$, then service in general, then religious service to God, Mt 4:10, then in particular ritual worship of the priests, Heb 8:5 ). All the redeemed are priests ( $\operatorname{Re} 16: 5,10$ ) in the heavenly temple (6:9) as here. But this service is that of spiritual worship, not of external rites (Ro 12:1; Php 3:3).

Day and night ( $\eta \mu \varepsilon \rho \alpha \varsigma \kappa \alpha$ vvктоৎ). Genitive of time, "by day and night," as in $4: 8$ of the praise of the four living creatures.

Shall spread his tabernacle over them ( $\left.\sigma \kappa \eta \nu \omega \sigma \varepsilon \varepsilon \pi^{\prime} \alpha v \tau o v \varsigma\right)$. Future (change of tense from present in $\lambda \alpha \tau \rho \varepsilon v o v \sigma \iota v)$ active of $\sigma \kappa \eta \nu \circ \omega$, old verb from $\sigma \kappa \eta \nu \circ \varsigma$ (tent, tabernacle), used in Joh $1: 14$ of the earthly life of Christ, elsewhere in N.T. only in Rev. (7:14; 12:12; 13:6; 21:3 ). In 12:12; 13:6 of those who dwell in tents, here of God spreading his tent "over" ( $\varepsilon \pi^{\prime}$ $\alpha v \tau 0 v \varsigma)$ the redeemed in heaven, in 21:3 of God tabernacling "with" ( $\mu \varepsilon \tau^{\prime} \alpha v \tau \omega v$ ) the redeemed, in both instances a picture of sacred fellowship, and "the further idea of God's Presence as a protection from all fear of evil" (Swete) like the overshadowing of Israel by the Shekinah and a possible allusion also to the tents ( $\sigma \kappa \eta \nu \alpha$ ) of the feast of tabernacles and to the tent of meeting where God met Moses (Ex 33:7-11).

Rev 7:16
They shall hunger no more (ov $\pi \varepsilon \iota v \alpha \sigma o v \sigma ı v \varepsilon \tau$ ). Future tense of $\pi \varepsilon \iota v \alpha \omega$, old verb with late form instead of $\pi \varepsilon \iota v \eta \sigma o v \sigma \iota v$ like Lu 6:25. It is a free translation of Isa 49:10 (not quotation from the LXX).

Neither thirst any more (ov $\delta \varepsilon \delta \iota \eta \sigma o v \sigma \iota v \tau$ ). Future tense of $\delta \iota \psi \alpha \omega$, the two strong human appetites will be gone, a clear refutation of a gross materialistic or sensual conception of the future life. Cf. Joh 6:35.

Neither shall strike (ov $\delta \varepsilon \mu \eta \pi \varepsilon \sigma \eta$ ). Strong double negative $o v \delta \varepsilon \mu \eta$ with second aorist active subjunctive of $\pi \iota \pi \tau \omega$, to fall. They will no longer be under the rays of the sun as upon earth.

Nor any heat ( $o v \delta \varepsilon \pi \alpha \nu \kappa \alpha v \mu \alpha$ ). Old word from $\kappa \alpha \iota \omega$, to burn, painful and burning heat, in N.T. only here and 16:9 (picture of the opposite condition). The use of the negative with $\pi \alpha v$ (all) for "not any" is common in N.T. Cf. Ps 121:6 .

Rev 7:17
In the midst ( $\alpha v \alpha \mu \varepsilon \sigma o v$ ). In 5:6 we have $\varepsilon v \mu \varepsilon \sigma \omega$ $\tau 0 v \theta \rho o v o v$ as the position of the Lamb, and so that is apparently the sense of $\alpha v \alpha \mu \varepsilon \sigma o v$ here as in Mt 13:25, though it can mean "between," as clearly so in 1Co 6:5.

Shall be their shepherd ( $\pi \alpha \mu \alpha v \varepsilon$ avтоия). "Shall shepherd them," future active of $\pi о \iota \mu \alpha \iota \omega$ (from $\pi о \iota \mu \nu$, shepherd), in Joh 21:16; Ac 20:28; 1Pe 5:2; Re 2:27; 7:17; 12:5; 19:15 . Jesus is still the Good Shepherd of his sheep (Joh 10:11,14ff. ). Cf. Ps 23:1 .

Shall guide them (o $\delta \eta \gamma \eta \sigma \varepsilon$ avtouc). Future active of o $\delta \eta \gamma \varepsilon \omega$, old word (from o $\delta \eta \gamma \circ \varsigma$, guide, Mt 15:14 ), used of God's guidance of Israel (Ex 15:13 ), of God's guidance of individual lives (Ps 5:9), of the guidance of the Holy Spirit (Joh 16:13), of Christ's own guidance here (cf. Joh 14:4; Re 14:4).

Unto fountains of waters of life ( $\varepsilon \pi \zeta \omega \eta \varsigma \pi \eta \gamma \alpha \varsigma \nu \delta \alpha \tau \omega v$ ). The language is like that in Isa 49:10; Jer 2:13. Note the order, "to life's water springs" (Swete) like the Vulgate ad vitae fontes aquarum, with emphasis on $\zeta \omega \eta \varsigma$ (life's). For this idea see also Joh 4:12,14; 7:38f.; Re 21:6; 22:1,17. No special emphasis on the plural here or in $8: 10 ; 14: 7 ; 16: 4$.

And God shall wipe away ( $\kappa \alpha \varepsilon \xi \alpha \lambda \varepsilon \tau \psi \varepsilon$ o $\theta \varepsilon о \varsigma)$. Repeated in 21:4 from Isa 25:8. Future active of $\varepsilon \xi \alpha \lambda \varepsilon \varphi \varphi \omega$, old compound, to wipe out ( $\varepsilon \xi)$, off, away, already in $3: 5$ for erasing a name and in Ac 3:19 for removing the stain (guilt) of sin.

Every tear ( $\pi \alpha v \delta \alpha \kappa \rho v o v$ ). Old word, with other form, $\delta \alpha \kappa \rho v$, in Lu 7:38,44. Note repetition of $\varepsilon \kappa$ with $o \varphi \theta \alpha \lambda \mu \omega \nu$ (out of their eyes). "Words like these of vv. 15-17 must sound as a divine music in the ears of the persecuted. God will comfort as a mother comforts" (Baljon).

## Revelation 8

Rev 8:1
And when he opened ( $\kappa \alpha$ o $\tau \alpha v \eta v o ı \xi \varepsilon v$ ). Here modal $\alpha v$ is used with o $\tau \varepsilon$ (used about the opening of the preceding six seals), but otav is not here rendered more indefinite, as is sometimes true (Mr 3:11; Re 4:9), but here and possibly (can be repetition) in Mr 11:19 it is a particular instance, not a general rule (Robertson, Grammar, p. 973).

There followed a silence ( $\varepsilon \gamma \varepsilon v \varepsilon \tau \sigma \sigma \tau \eta)$ ). Second aorist middle of $\gamma เ v o \mu \alpha$. "There came silence." Dramatic effect by this profound stillness with no elder or angel speaking, no chorus of praise nor cry of adoration, no thunder from the throne (Swete), but a temporary cessation in the revelations. See 10:4.

About the space of half an hour ( $\omega \varsigma \eta \mu \omega \rho \circ \nu$ ). Late and rare word ( $\eta \mu$, half, $\omega \rho \alpha$, hour), here only in N.T. Accusative of extent of time.

Rev 8:2
Stand ( $\varepsilon \sigma \tau \eta \kappa \alpha \sigma \iota v)$. Perfect active of $\iota \sigma \tau \eta \mu$ (intransitive). Another "hebdomad" so frequent in the Apocalypse. The article (the seven angels) seems to point to seven well-known angels. In Enoch 20:7 the names of seven archangels are given (Uriel, Raphael, Raguel, Michael, Sariel, Gabriel, Remiel) and "angels of the Presence" is an idea like that in Isa 63:9. We do not know precisely what is John's idea here.

Seven trumpets ( $\varepsilon \pi \tau \alpha \sigma \alpha \lambda \pi \gamma \gamma \gamma \varepsilon \varsigma)$. We see trumpets assigned to angels in Mt 24:31; 1Th 4:16; 1Co 15:52; Re 4:1,4. See also the use of trumpets in Jos 6:13; Joe 2:1. These seven trumpets are soon to break the half hour of silence. Thus the seven trumpets grow out of the opening of the seventh seal, however that fact is to be interpreted.

Rev 8:3
Another angel ( $\alpha \lambda \lambda$ os $\alpha \gamma \gamma \varepsilon \lambda o \varsigma)$. Not one of the seven of verse 2 and before they began to sound the trumpets. This preliminary incident of the offering of incense on the altar covers verses 3-6.

Stood ( $\varepsilon \sigma \tau \alpha \theta \eta$ ). Ingressive first aorist passive of $\iota \sigma \tau \eta \mu$ (intransitive), "took his place."
Over the altar ( $\varepsilon \pi$ tov $\theta$ vбıaб $\tau \eta \rho \circ v$ ). See $6: 9$ for the word for the burnt-offering, here apparently the altar of incense (clearly so in Lu 1:11; possibly also Re 9:13 ), but it is not clear that in apocalyptic the distinction between the two altars of the tabernacle and temple

A golden censer ( $\lambda_{1} \beta \alpha v \omega \tau \sigma v \chi \rho u \sigma o u v$ ). Old word for frankincense (from $\lambda_{1} \beta \alpha v o \varsigma, M t$ 2:11; Re 18:13 ), but here alone in N.T. and for censer, as is plain by the use of $\chi \rho 0 \sigma o u v$ (golden) with it. Cf. 1Ki 7:50 .

Much incense ( $\theta v \mu \propto \alpha \mu \tau \alpha \pi о \lambda \lambda \alpha$ ). See 5:8 for $\theta \nu \mu ı \alpha \mu \alpha$ (the aromatic substance burnt, also in $18: 13$ ), but here for the live coals on which the incense falls.

That he should add ( $\mathrm{vva} \delta \omega \sigma \varepsilon$ ). Sub-final clause (subject of $\varepsilon \delta o \theta \eta$, was given, singular because $\theta \nu \mu ı \mu \mu \tau \alpha \alpha$ neuter plural) with $ו v \alpha$ and the future active indicative of $\delta \iota \delta \omega \mu$, to give, instead of $\delta \omega$, the second aorist subjunctive.

Unto the prayers ( $\tau \alpha ı \varsigma \pi \rho \circ \sigma \varepsilon v \chi \alpha ı \varsigma)$. Dative case. In 5:18 the $\theta v \mu ı \alpha \mu \alpha \tau \alpha$ are the prayers.
 genitive as above, and apparently the altar of incense as indicated by the word golden (Ex 30:1ff.; Le 4:17 ). Note triple article here to (once before the substantive, once before the adjective, once before the adjunct "the one before the throne").

Rev 8:4
The smoke (o кãvoc). Old word, in N.T. only Ac 2:19; Re 8:4; 9:2f., 17f.; 14:11; 15:8; 18:9,18; 19:3. Here from the incense in the angel's hand.

With the prayers ( $\tau \alpha ı \varsigma \pi \rho о \sigma \varepsilon \varepsilon_{\chi \propto ı \varsigma) . ~ S o ~ a s s o c i a t i v e-i n s t r u m e n t a l ~ c a s e, ~ b u t ~ i t ~ m a y ~ b e ~}^{\text {b }}$ dative as in verse 3 (for).

Rev 8:5
Taketh ( $\varepsilon 1 \lambda \eta \varphi \varepsilon v$ ). Vivid dramatic perfect active indicative of $\lambda \alpha \mu \beta \alpha v \omega$ as in 5:7, "has taken." The angel had apparently ]aid aside the censer. Hardly merely the pleonastic use of $\lambda \alpha \mu \beta \alpha v \omega$ (Joh 19:23). John pictures the scene for us.

Filled ( $\varepsilon \gamma \varepsilon \mu \iota \sigma \varepsilon v)$. He drops back to the narrative use of the first aorist active indicative of $\gamma \varepsilon \mu!\zeta \omega$.

With the fire ( $\varepsilon \kappa$ тov $\pi \cup \rho \circ \varsigma$ ), live coals from the altar (cf. Isa 6:6 ).
Cast ( $\varepsilon \beta \alpha \lambda \varepsilon v$ ). Second aorist active indicative of $\beta \alpha \lambda \lambda \omega$. See Ge 19:24 (Sodom); Eze 10:2 and Christ's bold metaphor in Lu 12:49. See this use of $\beta a \lambda \lambda \omega$ also in Re 8:7; 12:4,9,13; 14:19.

Followed ( $\varepsilon$ ץعvovio). Came to pass naturally after the casting of fire on the earth. Same three elements in $4: 5$, but in different order (lightnings, voices, thunders), lightning naturally preceding thunder as some MSS. have it here. Perhaps $\varphi \omega v a$, the voices of the storm (wind, etc.).

Rev 8:6
Prepared themselves ( $\eta \tau о \mu \alpha \sigma \alpha \nu$ аvтоия). First aorist active indicative of $\varepsilon \tau о \mu \alpha \zeta \omega$. They knew the signal and got ready.

To sound ( $\imath v \alpha \sigma \alpha \lambda \pi \iota \sigma \omega \sigma \iota v$ ). Sub-final (object) clause with $\imath v \alpha$ and the first aorist ingressive active subjunctive of $\sigma \alpha \lambda \pi \iota \zeta \omega$. The infinitive could have been used.

Rev 8:7
Sounded ( $\varepsilon \sigma \alpha \lambda \pi \iota \sigma \varepsilon v)$. First aorist active indicative of $\sigma \alpha \lambda \pi \iota \zeta \omega$, repeated with each angel in turn ( $8: 8,10,12 ; 9: 1,13 ; 11: 15$ ).

Hail and fire mingled with blood ( $\chi \alpha \lambda \alpha \zeta \alpha \kappa \alpha \pi v \rho \mu \varepsilon \mu \tau \mu \varepsilon v \alpha \varepsilon v \alpha \mu \alpha \tau$ ). Like the plague of hail and fire in Ex 9:24. The first four trumpets are very much like the plagues in Egypt, this one like a semitropical thunderstorm (Swete) with blood like the first plague (Ex 7:17ff.;

Ps 106:35). The old feminine word $\chi \alpha \lambda \alpha \zeta \alpha$ (hail) is from the verb $\chi \alpha \lambda \alpha \omega$, to let down (Mr 2:4 ), in N.T. only in Re 8:7; 11:19; 16:21. The perfect passive participle $\mu \varepsilon \mu \gamma \mu \varepsilon v \alpha$ (from $\mu \gamma \nu \nu \mu$, to mix) is neuter plural because of $\pi \nu \rho$ (fire).

Were cast $(\varepsilon \beta \lambda \eta \theta \eta)$. First aorist passive singular because $\chi \alpha \lambda \alpha \zeta \alpha$ and $\pi \nu \rho$ treated as neuter plural. "The storm flung itself on the earth" (Swete).

Was burnt up (катєкаך). Second aorist (effective) passive indicative of катакаı $\omega$, old verb to burn down (effective use of ката, up, we say). Repeated here three times for dramatic effect. See 7:1-3 about the trees and 9:4 where the locusts are forbidden to injure the grass.

Rev 8:8
As it were ( $\omega \varsigma$ ). "As if," not a great mountain, but a blazing mass as large as a mountain.
Burning with fire ( $\pi \cup \rho \kappa \alpha \iota \rho \varepsilon \varepsilon v o v$ ). Present middle participle of $\kappa \alpha \omega \omega$. Somewhat like Enoch 18:13, but perhaps with the picture of a great volcanic eruption like that of Vesuvius in A.D. 79. Strabo tells of an eruption B.C. 196 which made a new island (Palaea Kaumene).

Became blood ( $\varepsilon \not \varepsilon v \varepsilon \tau \% ~ a \mu \alpha)$. Like the Nile in the first plague (Ex 7:20ff. ). Cf. also 16:3.

Rev 8:9
Of the creatures ( $\tau \omega v \kappa \tau \iota \sigma \mu \alpha \tau \omega v$ ). See 5:13 for this word $\kappa \tau \iota \sigma \mu \alpha$. Even they that had life ( $\tau \alpha \varepsilon \chi \circ v \tau \alpha \psi \nu \chi \alpha \varsigma)$. Here the nominative articular participle is in apposition with the genitive $\kappa \tau \iota \sigma \mu \alpha \tau \omega v$, as often in this book. See Ex 7:20 for the destruction of fish, and Zep 1:3.

Was destroyed ( $\delta เ \varepsilon \varphi \theta \alpha \rho \eta \sigma \alpha v$ ). Second aorist passive indicative of $\delta \iota \alpha \varphi \theta \varepsilon \rho \omega$, old compound, to corrupt, to consume, to destroy (perfective use of $\delta(\alpha)$, also 11:18. The plural $\pi \lambda$ oov just before the verb makes the idea plural.

Rev 8:10
Burning as a torch ( $\kappa \alpha \iota \mu \varepsilon v o \varsigma ~ \omega \varsigma \lambda \alpha \mu \pi \alpha \varsigma)$. See 4:5; Mt 2:2 , perhaps a meteor, striking at the fresh-water supply (rivers $\pi о \tau \alpha \mu \omega v$, springs $\pi \eta \gamma \alpha \varsigma$ ) as in the first Egyptian plague also.

Rev 8:11
Wormwood (o A $\psi \iota v$ Өos). Absinthe. Usually feminine ( $\eta$ ), but masculine here probably because $\alpha \sigma \tau \eta \rho$ is masculine. Only here in N.T. and not in LXX ( $\pi \kappa \kappa \rho ı a$, bitterness, $\chi$ о $\lambda \eta$, gall, etc.) except by Aquila in Pr 5:4; Jer 9:15; 23:15. There are several varieties of the plant in Palestine.

Became wormwood ( $\varepsilon \gamma \varepsilon v \varepsilon \tau \frac{\varepsilon}{\varepsilon} \varsigma \alpha \psi \iota \nu \theta o v$ ). This use of $\varepsilon \iota \varsigma$ in the predicate with $\gamma \iota \nu \circ \mu \alpha$ is common in the LXX and the N.T. (16:19; Joh 16:20; Ac 5:36 ).

Of the waters ( $\varepsilon \kappa \tau \omega v v \delta \alpha \tau \omega v$ ). As a result of ( $\varepsilon \kappa$ ) the use of the poisoned waters.
Were made bitter ( $\varepsilon \pi \kappa \kappa \rho \alpha v \theta \eta \sigma \alpha v)$. First aorist passive indicative of $\pi \kappa \kappa \rho \alpha ı v \omega$. Old verb (from $\pi \kappa \kappa \rho \circ \varsigma$, bitter), as in 10:9f. In a metaphorical sense to embitter in Col 3:19.

Rev 8:12

Was smitten ( $\varepsilon \pi \lambda \eta \gamma \eta$ ). Second aorist passive indicative of $\pi \lambda \eta \sigma \sigma \omega$, old verb (like $\pi \lambda \eta \gamma \eta$ plague), here only in N.T.

That should be darkened (ıva $\sigma \kappa о \tau \iota \theta \eta)$ ). Purpose clause with $\imath v \alpha$ and the first aorist passive subjunctive of бкотı亡 $\omega$, from бкотос (darkness) as in Mt 24:29, but бкото $\omega$ in Re 9:2.

And the day should not shine ( $\kappa \alpha \eta \eta \mu \varepsilon \rho \alpha \mu \eta \varphi \alpha \vee \eta$ ). Negative purpose clause with $v \alpha$ $\mu \eta$ and the first aorist active subjunctive of $\varphi a \iota v \omega$, to shed light upon, as in 18:23, not the second aorist passive subjunctive $\varphi \alpha \vee \eta$ with different accent. The eclipse here is only partial and is kin to the ninth Egyptian plague (Ex 10:21).

Rev 8:13
An eagle ( $\varepsilon v o \varsigma \alpha \varepsilon \tau o v)$ ) "One eagle," perhaps $\varepsilon v o \varsigma(\varepsilon ı \varsigma)$ used as an indefinite article (9:13; 18:21; 19:17 ). See 4:7 also for the flying eagle, the strongest of birds, sometimes a symbol of vengeance (De 28:49; Ho 8:1; Hab 1:8).

Flying in mid-heaven ( $\pi \varepsilon \tau о \mu \varepsilon v o v \varepsilon v \mu \varepsilon \sigma o v \rho \alpha v \eta \mu \alpha \tau$ ). Like the angel in 14:6 and the
 arch, papyri) for the sun at noon, in N.T. only these three examples. This eagle is flying where all can see, and crying so that all can hear.

Woe, woe, woe (oval, oval, ova). Triple because three trumpets yet to come. In 18:10,16,19 the double ova is merely for emphasis.

For them that dwell on the earth ( $\tau$ оия катонкоичтаৎ). Accusative of the articular present active participle of катокк $\omega$, is unusual (Aleph Q here and also in 12:12) as in Mt 11:21. There is even a nominative in 18:10.

By reason of the other voices ( $\varepsilon \kappa \tau \omega \nu \lambda o \iota \tau \omega \nu \varphi \omega v \omega v$ ). "As a result of ( $\varepsilon \kappa$ ) the rest of the voices." There is more and worse to come, "of the three angels who are yet to sound" ( $\tau \omega \nu \tau \rho \iota \omega \nu \alpha \gamma \gamma \varepsilon \lambda \omega \nu \tau \omega \nu \mu \varepsilon \lambda \lambda o \nu \tau \omega \nu \sigma \alpha \lambda \pi \iota \zeta \varepsilon \iota \nu)$.

## Revelation 9

Rev 9:1
Fallen ( $\pi \varepsilon \pi \tau \omega \kappa 0 \tau \alpha$ ). Perfect active participle of $\pi \iota \pi \tau \omega$, already down. In Lu 10:18 note $\pi \varepsilon \sigma o v \tau \alpha$ (constative aorist active, like a flash of lightning) after $\varepsilon \theta \varepsilon \omega \rho o u v$ and in Re 7:2 note $\alpha v \alpha \beta a \iota v o v \tau \alpha$ (present active and linear, coming up, picturing the process) after $\varepsilon \iota \delta o v$.

Of the pit of the abyss ( $\tau 0 v \varphi \rho \varepsilon \alpha \tau о \varsigma \tau \eta \varsigma \alpha \beta v \sigma \sigma o v)$. A $\beta v \sigma \sigma \circ \varsigma$ is an old adjective (alpha privative and $\beta v \theta o \varsigma$, depth, without depth), but $\eta \alpha \beta v \sigma \sigma o \varsigma ~(s u p p l y ~ \chi \omega \rho \alpha ~ p l a c e), ~ t h e ~ b o t t o m-~$ less place. It occurs in Ro 10:7 for the common receptacle of the dead for Hades (Sheol), but in Lu 8:31 a lower depth is sounded (Swete), for the abode of demons, and in this sense it occurs in $\operatorname{Re} 9: 1,2,11 ; 11: 7 ; 17: 8 ; 20: 1,3$. Фрع $\alpha \rho$ is an old word for well or cistern (Lu 14:5; Joh $4: 11 \mathrm{f}$. ) and it occurs in Re $9: 1 \mathrm{f}$. for the mouth of the abyss which is pictured as a cistern with a narrow orifice at the entrance and this fifth angel holds the key to it.

Rev 9:2
Opened ( $\eta v o \iota \xi \varepsilon v$ ). First aorist active indicative of avoı $\gamma \nu \nu \mu$. With the "key" ( $\kappa \lambda \varepsilon \iota \varsigma)$.
As the smoke of a great furnace ( $\omega \varsigma \kappa \alpha \pi \nu \circ \varsigma \kappa \alpha \mu \imath v o v \mu \varepsilon \gamma \alpha \lambda \eta \varsigma$ ). The plague of demonic locusts is here turned loose. Kaцıvos is old word for a smelting-furnace, already in 1:15.

Were darkened $(\varepsilon \sigma \kappa о \tau \omega \theta \eta)$. First aorist passive indicative of $\sigma \kappa о \tau \sigma \omega$, old causative verb from бкотоৎ, in N.T. only here, 16:10; Eph 4:18 .

By reason of ( $\varepsilon \kappa)$. "Out of," as a result of (8:13).
Rev 9:3
Locusts ( $\alpha<\rho \iota \delta \varepsilon \varsigma)$. Also verse 7 and already in Mt 3:4; Mr 1:6 (diet of the Baptist). The Israelites were permitted to eat them, but when the swarms came like the eighth Egyptian plague (Ex 10:13ff. ) they devoured every green thing. The smoke was worse than the fallen star and the locusts that came out of the smoke were worse still, "a swarm of hellish locusts" (Swete).

The scorpions ( $о \sigma \kappa о \rho \pi \iota$ ). Old name for a little animal somewhat like a lobster that lurks in stone walls in warm regions, with a venomous sting in its tail, in N.T. in Lu 10:19; 11:12; $\operatorname{Re} 9: 3,5,10$. The scorpion ranks with the snake as hostile to man.

Rev 9:4
It was said $(\varepsilon \rho \rho \varepsilon \theta \eta)$. First aorist passive indicative of $\varepsilon \iota \pi o v$.
That they should not hurt (ıva $\mu \eta$ $\alpha \delta_{ı \kappa \eta \sigma o v \sigma ı v) . ~ S u b-f i n a l ~(o b j e c t ~ c l a u s e ~ s u b j e c t ~ o f ~}^{\text {( }}$ $\varepsilon \rho \rho \varepsilon \theta \eta$ ) with $\iota \sim \alpha \mu \eta$ and the future active of $\alpha \delta \iota \kappa \varepsilon \omega$ as in 3:9; 8:3. Vegetation had been hurt sufficiently by the hail (8:7).

But only such men as ( $\varepsilon \mu \eta \tau$ тov $\alpha \nu \theta \rho \omega \pi$ ovৎ oıтıvєৎ). "Except (elliptical use of $\varepsilon \mu \eta$, if not, unless) the men who (the very ones who)." For this use of ootıc see 1:7; 2:24; 20:4 .

The seal of God upon their foreheads ( $\tau \eta \nu \sigma \varphi \rho \alpha \gamma เ \delta \alpha \operatorname{\tau ov} \theta \varepsilon \sigma v \varepsilon \pi \tau \omega \nu \mu \varepsilon \tau \omega \pi \omega \nu$ ). Provided for in 7:3f. . "As Israel in Egypt escaped the plagues which punished their neighbours, so the new Israel is exempted from the attack of the locusts of the Abyss" (Swete).

Rev 9:5
That they should not kill them ( $\imath \alpha \mu \eta$ алоктєıv $\omega \sigma \iota \nu \alpha v \tau о \cup \varsigma)$. Sub-final object clause (subject of $\varepsilon \delta \circ \theta \eta$ ) with $\imath \mathcal{\imath} \mu \eta$ and the subjunctive of $\alpha \pi \sigma \kappa \tau \varepsilon \imath \nu \omega$ either present (continued action) or aorist (constative, form the same), the usual construction with iva. The locusts are charged to injure men, but not to kill them.

But that they should be tormented ( $\alpha \lambda \lambda^{\prime} \imath v \alpha \beta \alpha \sigma \alpha v \iota \sigma \theta \eta \sigma o v \tau \alpha$ ). Sub-final clause again with $\imath v a$, but this time with the first future passive indicative (like 3:9; 6:4; 8:3; 13:12 ) of $\beta \alpha \sigma \alpha v_{l} \zeta \omega$, old verb, to test metals (from $\beta \alpha \sigma \alpha \nu o \varsigma$, Mt 4:24) by touchstone, then to torture like Mt 8:29, further in Re 11:10; 12:2; 14:10; 20:10 .

Five months ( $\mu \eta v a \varsigma \pi \varepsilon v \tau \varepsilon$ ). Accusative of extent of time. The actual locust is born in the spring and dies at the end of summer (about five months).

Torment $(\beta \alpha \sigma \alpha \nu \iota \sigma \mu \circ \varsigma)$. Late word for torture, from $\beta \alpha \sigma \alpha \nu \iota \zeta \omega$, in N.T. only in $\operatorname{Re} 9: 5$; $14: 11 ; 18: 7,10,15$. The wound of the scorpion was not usually fatal, though exceedingly painful.

When it striketh a man (o $\tau \alpha v \pi \alpha \iota \sigma \eta \alpha v \theta \rho \omega \pi \sigma \nu$ ). Indefinite temporal clause with o $\alpha \alpha v$ and the first aorist active subjunctive of $\pi \alpha \iota \omega$ (Mt 26:51), old verb, to smite, "whenever it smites a man."

Rev 9:6
Men (o $\alpha v \theta \rho \omega \pi \sigma)$. Generic use of the article (men as a class).
Shall not find it (ov $\mu \eta \varepsilon \cup \rho \eta \sigma o v \sigma \iota v \alpha v \tau o v$ ). Strong double negative $o v \mu \eta$ with the future active indicative according to Aleph Q , but $\varepsilon v \rho \omega \sigma \iota v$ (second aorist active subjunctive) according to A P (either construction regular). The idea here is found in Job 3:21; Jer 8:3 . "Such a death as they desire, a death which will end their sufferings, is impossible; physical death is no remedy for the $\beta \alpha \sigma \alpha v ı \sigma \mu \circ \varsigma$ of an evil conscience" (Swete).

They shall desire to die ( $\varepsilon \pi \iota \theta \cup \mu \eta \sigma o v \sigma \iota v a \pi \circ \theta a v \varepsilon \iota v)$. Future active of $\varepsilon \pi \iota \theta \cup \mu \varepsilon \omega$, a climax to $\zeta \eta \tau \eta \sigma o v \sigma \iota v$ (they shall seek), to desire vehemently. Paul in Php 1:23 shows a preference for death if his work is done, in order to be with Christ, a very different feeling from what we have here.

Fleeth $(\varphi \varepsilon v \gamma \varepsilon)$. Vivid futuristic present active indicative of $\varphi \varepsilon v \gamma \omega$. Even death does not come to their relief.

Rev 9:7
The shapes ( $\tau \alpha$ о $\mu \circ \iota \omega \mu \alpha \tau \alpha$ ). Old word from o $\mu \circ \iota \omega$, to make like (from o $\mu \circ \iota \varsigma$, like),
 is "midway between $\mu о \rho \varphi \eta$ and $\sigma \chi \eta \mu \alpha$ " (Lightfoot).

Unto horses (ıлтоוৎ). Associative-instrumental case, as is the rule with ouotoc (1:15; $2: 18$; 4:6ff.; $9: 10,19 ; 11: 1 ; 13: 2,11$ ), but with the accusative in $1: 13 ; 14: 14$. So also o 1 oto $\chi \rho v \sigma \omega$ (like gold) in this same verse.

Prepared for war ( $\eta \tau о \mu \alpha \sigma \mu \varepsilon \nu о \iota \varsigma \varepsilon \iota \varsigma \pi о \lambda \varepsilon \mu \circ \nu$ ). Perfect passive participle of $\varepsilon \tau о \mu \alpha \zeta \omega$. This imagery of war-horses is like that in Joe 2:4f. "The likeness of a locust to a horse, especially to a horse equipped with armour, is so striking that the insect is named in German Heupferd (hay horse), and in Italian cavalett a little horse" (Vincent).

As it were crowns (os $\sigma \tau \varepsilon \varphi \alpha \sim o$ ). Not actual crowns, but what looked like crowns of gold, as conquerors, as indeed they were $(4: 4 ; 6: 2 ; 12: 1 ; 14: 14)$. These locusts of the abyss have another peculiar feature.

As men's faces ( $\omega \varsigma \pi \rho \circ \sigma \omega \pi \alpha \alpha \nu \theta \rho \omega \pi \omega v$ ). Human-looking faces in these demonic locusts to give added terror, "suggesting the intelligence and capacity of man" (Swete). Vincent actually sees "a distinct resemblance to the human countenance in the face of the locust."

Rev 9:8
They had ( $\varepsilon \chi \chi \propto v$ ). Imperfect active, late form as in Mr 8:7 in place of the usual $\varepsilon$ ciरov.
As hair of women ( $\omega \varsigma \tau \rho \_\chi \alpha \varsigma \gamma v \alpha a \kappa \omega \nu$ ). That is long hair (1Co 11:15), with no reference to matters of sex at all, for $\alpha \nu \theta \rho \omega \pi \omega v$ just before is used, not $\alpha v \delta \rho \omega v$ (men as distinct from women). Perhaps the antennae of the locust were unusually long.

As the teeth of lions ( $\omega \varsigma \lambda \varepsilon \sigma v \tau \omega v$ ). Supply o o $\delta o v \tau \varepsilon \varsigma$ (the teeth) before $\lambda \varepsilon o v \tau \omega v$. See Joe 1:6. The locust is voracious.

Rev 9:9
As it were breastplates of iron ( $\omega \varsigma \theta \omega \rho \alpha \kappa \alpha \varsigma ~ \sigma ı \delta \varepsilon \rho о \nu \varsigma)$. The $\theta \omega \rho \alpha \xi$ was originally the breast (from the neck to the navel), then the breastplate, only N.T. usage (Re 9:9,17; 1Th 5:8; Eph 6:14 ). The armour for the breastplate was usually of iron ( $\sigma$ เ $\delta \varepsilon \rho \circ \cup$, , $\operatorname{Re} 2: 27$ ), but with the locusts it only seemed to be so $(\omega \varsigma)$. However, the scaly backs and flanks of the locusts do resemble coats of mail. "The locusts of the Abyss may be the memories of the past brought home at times of Divine visitation" (Swete).

The sound of their wings ( $\eta \varphi \omega v \eta \tau \omega \nu \pi \tau \varepsilon \rho v \gamma \omega v$ ). Graphic picture of the onrush of the swarms of demonic locusts and the hopelessness of resisting them.

As the sound of chariots, of many horses rushing to war ( $\omega \varsigma \varphi \omega \nu \eta \alpha \rho \mu \alpha \tau \omega \nu \imath \pi \pi \omega \nu$ $\pi о \lambda \lambda \omega \nu \tau \rho \varepsilon \chi о \nu \tau \omega \nu \varepsilon \iota \varsigma \pi о \lambda \varepsilon \mu \circ \nu)$. Both metaphors here, the clatter and clangour of the chariot wheels and the prancing of the horses are found in Joe $2: 4 \mathrm{f}$. T $\rho \varepsilon \chi o v \tau \omega v$ is present active predicate participle of $\tau \rho \varepsilon \chi \omega$, to run. Cf. 2 Ki 7:6; Jer 47:3 .

Rev 9:10
Tails (ovpac). Old word, in N.T. only in $\operatorname{Re} 9: 10,19 ; 12: 4$.
Like unto scorpions (оноьаৎ бкорпıоьৎ). Aleph A wrongly have ouоьоıৎ (agreeing with $\sigma \kappa о \rho \pi \iota \circ \iota$ instead of with oupaৎ). It is a condensed idiom for "like unto the tails of the scorpions" as we have it in 13:11 (cf. Mt 5:20; 1Jo 2:2 ).

Stings ( $\kappa \varepsilon v \tau \rho \alpha$ ). Old word from $\kappa \varepsilon v \tau \rho \varepsilon \omega$ (to prick, to sting), in N.T. only here, Ac 26:14 (about Paul); 1Co 15:55 (about death). It is used "of the spur of a cock, the quill of the porcupine, and the stings of insects" (Vincent). It was the goad used for oxen (Pr 26:3; Ac 26:14 ).

In their tails ( $\varepsilon v \tau \alpha \iota \varsigma ~ o u p a ı \varsigma ~ \alpha u \tau \omega v)$. This locates "their power to hurt" ( $\eta \varepsilon \xi o v \sigma ı \alpha \alpha \nu \tau \omega v$ $\alpha \delta_{ı} \eta \sigma \alpha$, infinitive here, $\tau v \alpha \alpha \delta_{ı \kappa \eta} \sigma o v \sigma เ v$ in 9:4) in their tails. It might have been in other organs.

Rev 9:11
As king ( $\beta \alpha \sigma i \lambda \varepsilon \alpha$ ). Predicate accusative and anarthrous. In $\operatorname{Pr}$ 30:27 it is stated that the locust has no king, but this is not true of these demonic locusts. Their king is "the angel of the abyss (verse 1) whose orders they obey."

His name is (ovoцa $\alpha \cup \tau \omega$ ). "Name to him" (nominative absolute and dative, as in 6:8).
In Hebrew (E $\beta \rho \alpha \iota \sigma \tau$ ). Adverb as in 16:16; Joh 5:2; 19:13,17,20; 20:16 . A $\beta \alpha \delta \delta \omega v$. A word almost confined to the Wisdom books (Job 26:6; Ps 88:11; Pr 15:11). It is rendered in the LXX by A $\pi \omega \lambda \varepsilon เ \alpha$, destruction.

In the Greek tongue ( $\varepsilon v \tau \eta H \varepsilon \lambda \lambda \eta \nu ı \kappa \eta$ ). With $\gamma \lambda \omega \sigma \sigma \eta$ or $\delta ı \alpha \lambda \varepsilon \kappa \tau \omega$ understood. As usual, John gives both the Hebrew and the Greek.

Apollyon (A $\pi \frac{\lambda}{\lambda} \nu \omega \omega v$ ). Present active masculine singular participle of $\alpha \pi \sigma \lambda \lambda \nu \omega$, meaning "destroying," used here as a name and so "Destroyer," with the nominative case retained though in apposition with the accusative ovo $\mu \alpha$. The personification of Abaddon occurs in the Talmud also. It is not clear whether by Apollyon John means Death or Satan. Bousset even finds in the name Apollyon an indirect allusion to Apollo, one of whose symbols was the locust, a doubtful point assuredly.

Rev 9:12
The first woe ( $\eta$ ova $\eta \mu \mathrm{l})$ ). Note feminine gender ascribed to the interjection ova as in 11:14, perhaps because $\theta \lambda ı \psi ı \varsigma$ is feminine, though we really do not know. Note also the ordinal use of $\mu \mathrm{\alpha}$ (one) like $\pi \rho \omega \tau \eta$ (first) as in 6:1; Mr 16:2 .

There come yet two Woes ( $\varepsilon \rho \chi \varepsilon \tau \alpha \varepsilon \tau \delta v o \mathrm{Ov} \mathrm{\alpha}$ ). Singular number $\varepsilon \rho \chi \varepsilon \tau \alpha$ instead of $\varepsilon \rho \chi o v \tau a$, though $\delta v o$ ova. It is true that ova is an interjection and indeclinable, but it is here used with $\delta v o$ and is feminine just before, and not neuter.

Rev 9:13
A voice ( $\varphi \omega \nu \eta \nu \mu \iota \alpha v$ ). For $\mu \iota \alpha \nu$ as indefinite article see 8:13. Accusative case here after $\eta \kappa o v \sigma \alpha$, though genitive in 8:13, a distinction between sound and sense sometimes exists (Ac 9:7; 22:9), but not here as the words are clearly heard in both instances.

From ( $\varepsilon \kappa$ ). "Out of the horns." Note triple use of the genitive article here as of the accusative article with this identical phrase in 8:3 ("the altar the golden the one before the throne").

Rev 9:14

One saying to the sixth angel ( $\lambda \varepsilon \gamma 0 \nu \tau \alpha \tau \omega \varepsilon \kappa \tau \omega$ ). Accusative masculine singular active participle of $\lambda \varepsilon \gamma \omega$, personifying $\varphi \omega \nu \eta \nu$ and agreeing with it in case, though not in gender. This voice speaks to the sixth angel (dative case).

Which had the trumpet (o $\varepsilon \chi \omega \nu \tau \eta \nu \sigma \alpha \lambda \pi \tau \gamma \gamma \alpha)$ ). Nominative case in apposition with $\alpha \gamma \gamma \varepsilon \lambda \omega$ (dative), the same anomalous phenomenon in 2:20; 3:12; 14:12 . Swete treats it as a parenthesis, like 4:1; 11:15.

Loose ( $\lambda v \sigma \sigma v$ ). First aorist (ingressive) active imperative of $\lambda \nu \omega$, "let loose." Another group of four angels (7:1) like Ac 12:4 , described here "which are bound" ( $\tau 0 \cup \varsigma \delta \varepsilon \delta \varepsilon \mu \varepsilon v o u \varsigma)$. Perfect passive articular participle of $\delta \varepsilon \omega$, evidently the leaders of the demonic horsemen (9:15ff. ) as the four angels let loose the demonic locusts (7:1ff. ), both quaternions agents of God's wrath.

At the great river Euphrates ( $\varepsilon \pi \tau \omega \pi о \tau \alpha \mu \omega \tau \omega \mu \varepsilon \gamma \alpha \lambda \omega \operatorname{Ev\varphi \rho } \alpha \tau \eta)$. A regular epithet of the Euphrates (16:12; Ge 15:18; De 1:7). It rises in Armenia and joins the Tigris in lower Babylonia, a total length of nearly 1800 miles, the eastern boundary of the Roman Empire next to Parthia.

Rev 9:15
Were loosed ( $\varepsilon \lambda u \theta \eta \sigma \alpha v$ ). First aorist (ingressive) passive indicative of $\lambda v \omega$, "were let loose."

Which had been prepared ( $\boldsymbol{\eta} \tau о \mu \alpha \sigma \mu \varepsilon v o$ ). Perfect passive articular participle of $\varepsilon \tau о \mu \alpha \zeta \omega$, to make ready ( $\varepsilon \tau о \mu \circ \varsigma)$, in a state of readiness prepared by $\operatorname{God}(12: 6 ; 16: 12 ; \mathrm{Mt}$ 25:34).

For the hour and day and month and year ( $\varepsilon ા \varsigma ~ \tau \eta \nu ~ \omega \rho a v ~ к \alpha ~ \eta \mu \varepsilon \rho \alpha \nu ~ к а ~ \mu \eta \nu \alpha к \alpha$ $\varepsilon v i \alpha u \tau o v)$. For this use of $\varepsilon ı \varsigma$ with $\eta \tau о \mu \alpha \sigma \mu \varepsilon v o v$ see $2 \mathrm{Ti} 2: 21$. All preparation over, the angels are waiting for the signal to begin.

That they should kill (ıva $\alpha \pi о \kappa \tau \varepsilon เ v \omega \sigma เ v)$. The same idiom in verse 5 about the fifth trumpet, which brought torture. This one brings death.

Rev 9:16
 The neuter articular singular тo וл兀єкоจ, the horse or the cavalry in contrast with то $\pi \varepsilon \zeta \kappa \kappa \circ v$ (the infantry), here only in N.T. For the numbers here see on 5:11; 7:4 .

Rev 9:17
And thus I saw in the vision ( $\kappa \alpha$ ov $\omega \omega \varsigma \varepsilon \delta o v \varepsilon v \tau \eta$ opaбq). Nowhere else does John allude to his own vision, though often in Dan. (Da 7:2; 8:2,15; 9:21).

Having ( $\varepsilon \chi \circ \vee \tau \alpha \varsigma)$. Accusative masculine plural of $\varepsilon \chi \omega$, probably referring to the riders

Breastplates as of fire and of hyacinth and of brimstone ( $\theta \omega \rho$ акаৎ лиріvouс ка vaкıv $\theta$ ıvouৎ $\kappa \alpha \theta \varepsilon ı \omega \delta \varepsilon ı \varsigma)$. There is no $\omega \varsigma$ (as) in the Greek, but that is the idea of these three adjectives which are only metaphors. Пирıvos is an old adjective (from $\pi \cup \rho$, fire), here only
 Re 21:20 ), of a red color bordering on black, here only in the N.T. $\Theta \varepsilon \epsilon \omega \delta \eta \varsigma$ is a late word (from $\theta \varepsilon \iota o v$, brimstone), sulphurous, here only in N.T.

As the heads of lions ( $\omega \varsigma \kappa \varepsilon \varphi \alpha \lambda \alpha \lambda \varepsilon \sigma v \tau \omega v$ ). This of the horses, war-horses as always in the Bible except in Isa 28:28. These horses likewise have "fire and smoke and brimstone" ( $\theta \varepsilon \iota \circ$, brimstone, is old word, in N.T. only in Rev. and Lu 17:29) proceeding (єклорєиعта, singular because it comes first and the subjects afterwards) out of their mouths. Both rider and horse are terrible.

Rev 9:18
By these three plagues ( $\alpha \pi \sigma \tau \omega \nu \tau \rho I \omega v \pi \lambda \eta \gamma \omega \nu \tau 0 \nu \tau \omega v$ ). Our "plague" or stroke from $\pi \lambda \eta \sigma \sigma \omega$, as in Lu 10:30 and often in Rev. (9:20; 11:6; 15:1,6,8; 16:9; 18:4,8; 22:18). It is used in Ex 11:1ff. for the plagues in Egypt. The three plagues here are the fire, smoke, and brimstone which proceed from the mouths of the horses.

Was killed ( $\alpha \pi \varepsilon \kappa \tau \alpha v \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\alpha \pi о \kappa \tau \varepsilon เ v \omega$, to kill, third person plural, though to $\tau \rho \iota \tau 0 v$ is neuter singular because a collective idea. See same form in verse 20 .

## Rev 9:19

The power ( $\eta \varepsilon \xi$ (ovaia). As in 2:26; 6:8. This power of the horses is both in their mouths (because of the fire, smoke, brimstone) and in their tails, "for their tails are like unto serpents"
 is old word for snake (Mt 7:10).

Having heads ( $\varepsilon \chi \circ \cup \sigma \alpha \kappa \varepsilon \varphi \alpha \lambda \alpha \varsigma)$. Feminine present active participle of $\varepsilon \chi \omega$, agreeing with oupa (tails).

With them ( $\varepsilon v$ avtaı). Instrumental use of $\varepsilon v$. Surely dreadful monsters.
Rev 9:20
Repented not (ov $\mu \varepsilon \tau \varepsilon v o \eta \sigma \alpha v$ ). First aorist active indicative of $\mu \varepsilon \tau \alpha v o \varepsilon \omega$. The twothirds of mankind still spared did not change their creed or their conduct.

Of the works ( $\varepsilon \kappa \tau \omega v \varepsilon \rho \gamma \omega v$ ). For this use of $\varepsilon \kappa$ after $\mu \varepsilon \tau \alpha v o \varepsilon \omega$ see 2:21; 9:21; 16:11 . By "works" ( $\varepsilon \rho \gamma \omega v$ ) here idolatries are meant, as the next verse shows.

That they should not worship ( $\imath \nu \alpha \mu \eta \pi \rho \circ \sigma \kappa v \nu \eta \sigma o v \sigma \imath v$ ). Negative purpose clause with iva $\mu \eta$ and the future active of $\pi \rho о \sigma \kappa \nu v \varepsilon \omega$ as in 9:5.

Devils ( $\tau \alpha \delta \alpha \mu \circ v i \alpha)$. Both in the O.T. (De 32:17; Ps 96:5; 106:37) and in the N.T. (1Co 10:21 ) the worship of idols is called the worship of unclean spirits. Perhaps this is one explanation of the hideous faces given these images. "The idols" ( $\tau \alpha \varepsilon \iota \delta \omega \lambda \alpha 1$ 1Jo 5:21, from $\varepsilon \iota \delta o \varsigma$, form, appearance) represented "demons," whether made of gold ( $\tau \alpha \times \rho \cup \sigma \alpha$ ) or of silver ( $\tau \alpha \alpha \rho \gamma \nu \rho \alpha$ ) or of brass ( $\tau \alpha \chi \alpha \lambda \kappa \alpha$ ) or of stone ( $\tau \alpha \lambda_{1} \theta \iota v \alpha$ ) or of wood ( $\tau \alpha \xi \nu \lambda \iota v \alpha$ ). See Da 5:23 for this picture of heathen idols. The helplessness of these idols, "which can neither see
 presented in the O.T. (Ps 113:12ff.; 115:4 ).

Rev 9:21
Of their murders ( $\varepsilon \kappa \tau \omega \nu$ $\varphi o v \omega \nu \alpha \nu \tau \omega v$ ). Heads the list, but "sorceries" ( $\varepsilon \kappa \tau \omega v$ чар $\mu \alpha \kappa \omega v$ ) comes next. Фарнакоv was originally enchantment, as also in Re 21:8, then drug. For $\varphi$ ар $\mu \boldsymbol{\kappa \iota \alpha}$ see Re 18:34; Ga 5:20. The two other items are fornication ( $\pi о \rho v \varepsilon ı \alpha$ ) and thefts ( $\kappa \lambda \varepsilon \mu \mu \alpha \tau \omega v$, old word from $\kappa \lambda \varepsilon \pi \tau \omega$, here alone in N.T.), all four characteristic of demonic worship and idolatry. See other lists of vices in Mr 7:21; Ga 5:20; Re 21:8; 22:15 . Our word "pharmacy" as applied to drugs and medicine has certainly come a long way out of a bad environment, but there is still a bad odour about "patent medicines."

## Revelation 10

Rev 10:1
Another strong angel ( $\alpha \lambda \lambda 0 v \alpha \gamma \gamma \varepsilon \lambda o v ~ t \sigma \chi \nu \rho o v$ ). But the seventh trumpet does not sound till 11:15. This angel is not one of the seven or of the four, but like the other strong angel in 5:2; 18:21 or the other angel in 14:6,15. The sixth trumpet of 9:13 ends in 9:21. The opening of the seventh seal was preceded by two visions (chapter Re 7 ) and so here the sounding of the seventh trumpet ( 11:15) is preceded by a new series of visions ( 10:1-11:14).

Coming down out of heaven (катаßаıvovта єк тov ovpavov). Present active participle of $\kappa \alpha \tau \alpha \beta a \iota v \omega$ picturing the process of the descent as in 20:1 (cf. 3:12).

Arrayed with a cloud ( $\pi \varepsilon \rho ı \beta \varepsilon \beta \lambda \eta \mu \varepsilon v o v \nu \varepsilon \varphi \varepsilon \lambda \eta \nu)$. Perfect passive participle of $\pi \varepsilon \rho ı \beta \alpha \lambda \lambda \omega$ with accusative case retained as in 7:9,13. Not proof that this angel is Christ, though Christ will come on the clouds ( 1:7) as he ascended on a cloud (Ac 1:9). God's chariot is in the clouds (Ps 104:3), but this angel is a special messenger of God's.

The rainbow ( $\eta \stackrel{\rho \iota \varsigma) \text {. See 4:3 for this word. The construction here is changed from the }}{\text { then }}$ accusative to the nominative.

As the sun ( $\omega \varsigma$ o $\left.\eta \lambda_{1} \circ \varsigma\right)$. The very metaphor applied to Christ in 1:16.
As pillars of fire ( $\omega \varsigma \sigma \tau \cup \lambda 0 \pi v \rho o \varsigma$ ). Somewhat like the metaphor of Christ in 1:15, but still no proof that this angel is Christ. On $\sigma \tau \cup \lambda$ oc see 3:12; Ga 2:9 .

Rev 10:2
And he had ( $\kappa \alpha \varepsilon \chi \omega v$ ). This use of the participle in place of $\varepsilon \not \chi \varepsilon v$ (imperfect) is like that in 4:7f.; 12:2; 19:12; 21:12,14, a Semitic idiom (Charles), or as if кataßaıv $\omega v$ (nominative) had preceded in place of кат $\beta \alpha$ ııvov $\alpha$.

A little book ( $\beta \iota \beta \lambda \alpha \rho \iota \delta \iota o v$ ). A diminutive of $\beta \iota \beta \lambda \alpha \rho \iota o v$ (papyri), itself a diminutive of $\beta \iota \beta \lambda_{\operatorname{lov}}$ ( $5: 1$ ) and perhaps in contrast with it, a rare form in Hermas and Re 10:2,9,10 . In 10:8 Tischendorf reads $\beta \iota \beta \lambda \iota \delta \alpha \rho \iota o v$, diminutive of $\beta \iota \beta \lambda \iota \delta \iota o v$ (Aristophanes) instead of $\beta ı \beta \lambda_{\text {ıov }}$ (Westcott and Hort). The contents of this little book are found in 11:1-13.

Open ( $\eta v \varepsilon \omega \iota \gamma \mu \varepsilon v o v)$. See Eze 2:9f. Perfect (triple reduplication) passive participle of $\alpha v o r \gamma \omega$, in contrast to the closed book in $5: 1$. There also we have $\varepsilon \pi$ (upon) $\tau \eta \nu \delta \varepsilon \xi \iota \alpha \nu$ (the right hand), for it was a large roll, but here the little open roll is held in the hand ( $\varepsilon \nu \tau \eta \chi \varepsilon เ \rho)$, apparently the left hand (verse 5).

He set $(\varepsilon \theta \eta \kappa \varepsilon v)$. First aorist active indicative of $\tau \iota \theta \eta \mu$. The size of the angel is colossal, for he bestrides both land and sea. Apparently there is no special point in the right foot ( $\tau 0 v$ $\pi o \delta \alpha \operatorname{\tau ov} \delta \varepsilon \xi \circ v$ ) being on the sea ( $\varepsilon \pi \tau \eta \varsigma \theta \alpha \lambda \alpha \sigma \sigma \eta \varsigma)$ and the left ( $\tau \circ v \varepsilon v \omega v \nu \mu \circ v$ ) upon the land ( $\varepsilon \pi \tau \eta \varsigma \gamma \eta \varsigma)$. It makes a bold and graphic picture.

As a lion roareth ( $\omega \sigma \pi \varepsilon \rho \lambda \varepsilon \omega v \mu \nu \kappa \alpha \tau \alpha$ ). Only instance of $\omega \sigma \pi \varepsilon \rho$ in the Apocalypse, but $\omega \varsigma$ in the same sense several times. Present middle indicative of $\mu v \kappa \alpha \circ \mu \alpha$, an old onomatopoetic word from $\mu v$ or $\mu$ oo (the sound which a cow utters), common for the lowing
and bellowing of cattle, Latin mugire, but in Theocritus for the roaring of a lion as here, though in 1Pe 5:8 we have $\omega \rho v o \mu \alpha$. Homer uses $\mu v \kappa \alpha o \mu \alpha$ for the clangour of the shield and Aristophanes for thunder. It occurs here alone in the N.T. It does not mean that what the angel said was unintelligible, only loud. Cf. 1:10; 5:2,12; 6:10; 7:2,10 , etc.

Rev 10:3
The seven thunders ( $\alpha \varepsilon \pi \tau \alpha \beta \rho o v \tau \alpha$ ). A recognized group, but not explained here, perhaps John assuming them to be known. For $\beta \rho 0$ v $\alpha$ see already $4: 5 ; 6: 1 ; 8: 5$. In Ps 29 the Lord speaks in the sevenfold voice of the thunderstorm upon the sea.

Their voices ( $\tau \alpha \varsigma \varepsilon \alpha \nu \tau \omega \nu \varphi \omega v \alpha \varsigma$ ). Cognate accusative with $\varepsilon \lambda \alpha \lambda \eta \sigma \alpha \nu$ and $\varepsilon \alpha \nu \tau \omega \nu$ (reflexive) means "their own." In Joh 12:28 the voice of the Father to Christ was thought by some to be thunder.

Rev 10:4
I was about to write ( $\eta \mu \varepsilon \lambda \lambda o v \gamma \rho \alpha \varphi \varepsilon เ v$ ). Imperfect active of $\mu \varepsilon \lambda \lambda \omega$ (double augment as in Joh 4:47; 12:33; 18:32) and the present (inchoative) active infinitive of $\gamma \rho \alpha \varphi \omega$, "I was on the point of beginning to write," as commanded in 1:11,19 .

Seal up ( $\sigma \varphi \rho \alpha \gamma \iota \sigma \sigma \nu$ ). Aorist active imperative of $\sigma \varphi \rho \alpha \gamma \zeta \zeta \omega$, tense of urgency, "seal up at once."

And write them not ( $\kappa \alpha \mu \eta \alpha \cup \tau \alpha \gamma \rho \alpha \psi \eta \iota$ ). Prohibition with $\mu \eta$ and the ingressive aorist active subjunctive of $\gamma \rho \alpha \varphi \omega$, "Do not begin to write." It is idle to conjecture what was in the utterances. Compare Paul's silence in 2Co 12:4.

Rev 10:5
Standing ( $\varepsilon \sigma \tau \omega \tau \alpha)$. Second perfect active participle of $\iota \sigma \tau \eta \mu$ (intransitive). John resumes the picture in verse 2.

Lifted up ( $\eta \rho \varepsilon v$ ). First aorist active indicative of alp $\omega$, to lift up.
To heaven ( $\varepsilon \iota \varsigma ~ \tau o v ~ o u p a v o v) . ~ T o w a r d ~ h e a v e n, ~ t h e ~ c u s t o m a r y ~ g e s t u r e ~ i n ~ t a k i n g ~ a ~ s o l e m n ~$ oath (Ge 14:22; De 32:40; Da 12:7).

Rev 10:6
Sware ( $\omega \mu \circ \sigma \varepsilon v$ ). First aorist indicative of o $\mu v v \omega$ to swear.
By him that liveth ( $\varepsilon v \tau \omega \zeta \omega v \tau$ ). This use of $\varepsilon v$ after o $\mu v \nu \omega$ instead of the usual accusative (Jas 5:12 ) is like the Hebrew (Mt 5:34,36). "The living one for ages of ages" is a common phrase in the Apocalypse for God as eternally existing ( $1: 18 ; 4: 9,10 ; 15: 7$ ). This oath proves that this angel is not Christ.

Who created (os $\varepsilon \kappa \tau \iota \sigma \varepsilon v)$. First aorist active indicative of $\kappa \tau \iota \zeta \omega$, a reference to God's creative activity as seen in Ge 1:1ff.; Ex 20:11; Isa 37:16; 42:5; Ps 33:6; 145:6 , etc.

That there shall be time no longer (от $\chi \rho \circ \vee \circ \varsigma$ оик $\tau \varepsilon \sigma \tau \alpha$ ). Future indicative indirect discourse with ot. But this does not mean that $\chi$ роvoc (time), Einstein's "fourth dimension" (added to length, breadth, height), will cease to exist, but only that there will be no more
delay in the fulfillment of the seventh trumpet (verse 7), in answer to the question, "How long?" ( 6:10).

Rev 10:7
When he is about to sound (otav $\mu \varepsilon \lambda \lambda \eta \sigma \alpha \lambda \pi \iota \zeta \varepsilon \tau v$ ). Indefinite temporal clause with otav and the present active subjunctive of $\mu \varepsilon \lambda \lambda \omega$ and the present (inchoative) active infinitive of $\sigma \alpha \lambda \pi \iota \zeta \omega$, "whenever he is about to begin to sound" (in contrast to the aorist in 11:15).

Then ( $\kappa \alpha$ ). So in apodosis often ( $14: 10$ ).
Is finished ( $\varepsilon \tau \varepsilon \lambda \varepsilon \sigma \theta \eta$ ). First aorist passive indicative of $\tau \varepsilon \lambda \varepsilon \omega$, proleptic or futuristic use of the aorist as in 1Co 7:28. So also 15:1.
 Col 2:2 . Here apparently the whole purpose of God in human history is meant.

According to the good tidings which he declared ( $\omega \varsigma \varepsilon \cup \eta \gamma \gamma \varepsilon \lambda_{\iota} \sigma \varepsilon v$ ). "As he gospelized to," first aorist active indicative of $\varepsilon v a \gamma \gamma \varepsilon \lambda_{l} \zeta \omega$, a rare use of the active as in $14: 6$ with the accusative. See the middle so used in Ga 1:9; 1Pe 1:12. See Am 3:7; Jer 7:25; $25: 4$ for this idea in the O.T. prophets who hoped for a cleaning up of all mysteries in the last days.

Rev 10:8
Again speaking and saying ( $\pi \alpha \lambda \iota v \lambda \alpha \lambda o v \sigma \alpha v \kappa \alpha \lambda \varepsilon \gamma \sigma \sigma \sigma \alpha v$ ). Present active predicate participles feminine accusative singular agreeing with $\eta \nu$ (object of $\eta$ кov $\sigma \alpha$ ), not with $\varphi \omega v \eta$ (nominative) as most of the cursives have it ( $\lambda \alpha \lambda$ ovoa ка $\lambda \varepsilon \gamma \circ v \sigma \alpha$ ). Ordinarily it would be $\varepsilon \lambda \alpha \lambda \varepsilon \kappa \alpha \varepsilon \lambda \varepsilon \gamma \varepsilon v$. See 4:1 for like idiom. This is the voice mentioned in verse 4 . No great distinction is to be made here between $\lambda \alpha \lambda \varepsilon \omega$ and $\lambda \varepsilon \gamma \omega$.

Go, take (Нипаүє $\lambda \alpha \beta \varepsilon$ ). Present active imperative of $v \pi \alpha \gamma \omega$ and second aorist active imperative of $\lambda \alpha \mu \beta \alpha v \omega$. The use of $v \pi \alpha \gamma \varepsilon$ (exclamation like $\delta \delta \varepsilon$ ) is common in N.T. (Mt $5: 24 ; 8: 4 ; 19: 21 ;$ Joh $4: 16 ; 9: 7$ ). Charles calls it a Hebraism ( $16: 1$ ). Note the repeated article here (тo) referring to the open book in the hand of the angel (verse 2 ), only here $\beta \iota \beta \lambda_{1}$ ov is used, not the diminutive of $\beta \iota \beta \lambda \alpha \rho \iota \delta \iota o v$ of verses $2,9,10$.

Rev 10:9
I went ( $\alpha \pi \eta \lambda \theta \alpha$ ). Second aorist active indicative ( $-\alpha$ form), "I went away" ( $\alpha \pi-$ ) to the angel. John left his position by the door of heaven ( $4: 1$ ).

That he should give ( $\delta o v v \alpha$ ). Second aorist active infinitive of $\delta \delta \delta \omega \mu$, indirect command after $\lambda \varepsilon \gamma \omega \nu$ (bidding) for $\delta$ o $\varsigma$ in the direct discourse (second aorist active imperative second person singular). This use of $\lambda \varepsilon \gamma \omega$ to bid occurs in 13:14; Ac 21:21.

He saith ( $\lambda \varepsilon \gamma \varepsilon$ ). Dramatic vivid present active indicative of $\lambda \varepsilon \gamma \omega$.
Take it and eat it up ( $\lambda \alpha \beta \varepsilon \kappa \alpha \kappa \alpha \tau \alpha \varphi \alpha \gamma \varepsilon \alpha \cup \tau 0$ ). Second aorist (effective) active imperatives of $\lambda \alpha \mu \beta \alpha v \omega$ and $\kappa \alpha \tau \varepsilon \sigma \theta \omega \omega$ (perfective use of $\kappa \alpha \tau \alpha$, "eat down," we say "eat up"). See the same metaphor in Eze 3:1-3; Jer 15:6f. The book was already open and was not to be read aloud, but to be digested mentally by John.

It shall make thy belly bitter ( $\pi \iota \kappa \rho \alpha \nu \varepsilon \sigma o v \tau \eta \nu \kappa о \iota \lambda \iota \alpha v$ ). Future active of $\pi \iota \kappa \rho a \iota \nu \omega$, for which verb see $8: 11 ; 10: 10$; Col 3:19. There is no reference in Ezekiel or Jeremiah to the bitterness here mentioned.

Sweet as honey ( $\gamma \lambda \nu \kappa v \omega \varsigma \mu \varepsilon \lambda$ ). For the sweetness of the roll see Ps 19:10f.; 119:103 . "Every revelation of God's purposes, even though a mere fragment, a $\beta \iota \beta \lambda \alpha \rho \iota \delta \iota v$, is 'bittersweet,' disclosing judgement as well as mercy" (Swete). Deep and bitter sorrows confront John as he comes to understand God's will and way.

Rev 10:10
I took--and ate it up ( $\varepsilon \lambda \alpha \beta \circ v--\kappa \alpha \kappa \alpha \tau \varepsilon \varphi \alpha \gamma \circ v \alpha v \tau о)$. Second aorist active indicatives of the same verbs to show John's prompt obedience to the command. The order of the results is here changed to the actual experience (sweet in the mouth, bitter in the belly). The simplex verb $\varepsilon \varphi a \gamma \circ \nu$ (I ate) is now used, not the compound кат $\varepsilon \varphi \alpha \gamma \circ \nu$ (I ate up).

Rev 10:11
They say ( $\lambda \varepsilon \gamma \sigma \sigma \sigma \iota$ ). Present active of vivid dramatic action and the indefinite statement in the plural as in $13: 16 ; 16: 15$. It is possible that the allusion is to the heavenly voice $(10: 4,8$ ) and to the angel (10:9).

Thou must prophesy again ( $\delta \varepsilon \sigma \varepsilon \pi \alpha \lambda ı \tau \rho \circ \varphi \eta \tau \varepsilon v \sigma \alpha)$. Not a new commission ( $1: 19$ ), though now renewed. C.f. Eze 4:7; 6:2; Jer 1:10. The $\pi \alpha \lambda ı v$ (again) points to what has preceded and also to what is to come in 11:15. Here it is predictive prophecy $(\pi \rho \circ \varphi \eta \tau \varepsilon v \sigma \alpha$, first aorist active infinitive of $\pi \rho \rho \varphi \eta \tau \varepsilon \nu \omega)$.

Over ( $\varepsilon \pi$ ). In the case, in regard to as in Joh 12:16 (with $\gamma \rho \alpha \varphi \omega$ ), not in the presence of ( $\varepsilon \pi$ with genitive, $\mathrm{Mr} 13: 9$ ) nor against ( $\varepsilon \pi$ with the accusative, $\mathrm{Lu} 22: 53$ ). For this list of peoples see 5:9, occurring seven times in the Apocalypse.

## Revelation 11

Rev 11:1
A reed (ка入аноऽ). Old word for a growing reed (Mt 11:7) which grew in immense brakes in the Jordan valley, a writer's reed (3Jo 1:7), a measuring-rod (here, 21:15f.; Eze 40:3-6; 42:16-19 ).

Like a rod ( $\mathrm{o} \mathrm{\mu} \boldsymbol{\circ} \boldsymbol{\circ} \varsigma \rho \alpha \beta \delta \omega$ ). See 2:27; Mr 6:8 for $\rho \alpha \beta \delta$ o $\varsigma$.
And one said $(\lambda \varepsilon \gamma \omega v)$. "Saying" (present active masculine participle of $\lambda \varepsilon \gamma \omega$ ) is all that the Greek has. The participle implies $\varepsilon \delta \omega \kappa \varepsilon v$ (he gave), not $\varepsilon \delta o \theta \eta$, a harsh construction seen in Ge 22:20; 38:24 , etc.

Rise and measure ( $\varepsilon \gamma \varepsilon เ \rho \varepsilon \kappa \alpha \mu \varepsilon \tau \rho \eta \sigma o v$ ). Present active imperative of $\varepsilon \gamma \varepsilon \iota \rho \omega$ (intransitive, exclamatory use as in Mr 2:11) and first aorist active imperative of $\mu \varepsilon \tau \rho \varepsilon \omega$. In Eze 42:2ff. the prophet measures the temple and that passage is probably in mind here. But modern scholars do not know how to interpret this interlude ( 11:1-13) before the seventh trumpet ( 11:15). Some (Wellhausen) take it to be a scrap from the Zealot party before the destruction of Jerusalem, which event Christ also foretold (Mr 13:2; Mt 24:2; Lu 21:6) and which was also attributed to Stephen (Ac 6:14). Charles denies any possible literal interpretation and takes the language in a wholly eschatological sense. There are three points in the interlude, however understood: the chastisement of Jerusalem or Israel (verses 1,2 ), the mission of the two witnesses ( 3-12), the rescue of the remnant (13). There is a heavenly sanctuary ( $7: 15 ; 11: 19 ; 14: 15$, etc.), but here vaoc is on earth and yet not the actual temple in Jerusalem (unless so interpreted). Perhaps here it is the spiritual (3:12; 2Th 2:4; 1Co 3:16f.; 2Co 6:16; Eph 2:19ff. ). For altar ( $\theta$ vбıaбтпрıov) see 8:3. Perhaps measuring as applied to "them that worship therein" ( $\tau 0 \cup \varsigma \pi \rho о \sigma \kappa \cup v o u v \tau \alpha \varsigma \varepsilon \nu \alpha \cup \tau \omega$ ) implies a word like numbering, with an allusion to the 144,000 in chapter 7 (a zeugma).

Rev 11:2
The court ( $\tau \eta v \alpha \cup \lambda \eta \nu)$. The uncovered yard outside the house. There were usually two, one between the door and the street, the outer court, the other the inner court surrounded by the buildings (Mr 14:66). This is here the outer court, "which is without the temple" ( $\tau \eta \nu$ $\varepsilon \xi \omega \theta \varepsilon v$ tov vaou), outside of the sanctuary, but within the $\varepsilon \varepsilon \rho \circ v$ where the Gentiles could go (carrying out the imagery of the Jerusalem temple).

Leave without ( $\varepsilon \kappa \beta \alpha \lambda \varepsilon \varepsilon \xi \omega \theta \varepsilon v$ ). Literally, "cast without" (second aorist active imperative of $\varepsilon \kappa \beta \alpha \lambda \lambda \omega$.

Do not measure it ( $\mu \eta \alpha \cup \tau \eta \nu \mu \varepsilon \tau \rho \eta \sigma \eta \vdash)$. Prohibition with $\mu \eta$ and the first aorist active (ingressive) subjunctive of $\mu \varepsilon \tau \rho \varepsilon \omega$. This outer court is left to its fate. In Herod's temple the outer court was marked off from the inner by "the middle wall of partition" ( $\tau \mathrm{\mu} \mu$ коьто七хоv тov $\varphi \rho a \gamma \mu \circ$, Eph 2:15 ), beyond which a Gentile could not go. In this outer court was a
house of prayer for the Gentiles (Mr 11:17), but now John is to cast it out and leave to its fate (given to the Gentiles in another sense) to be profaned by them.

They shall tread under foot ( $\pi \alpha \tau \eta \sigma o v \sigma ı v$ ). Future active of $\pi \alpha \tau \varepsilon \omega$, here to trample with contempt as in Lu 21:24, even the holy city (Mt 4:5; Isa 48:2; Ne 11:1). Charles thinks that only the heavenly city can be so called here ( $21: 2,10 ; 22: 19$ ) because of $11: 8$ (Sodom and Gomorrah). But the language may be merely symbolical. See Da 9:24 .

Forty and two months ( $\mu \eta \nu \alpha \varsigma \tau \varepsilon \sigma \sigma \varepsilon \rho \alpha \kappa о \nu \tau \alpha \kappa \alpha \delta v o$ ). Accusative of extent of time. This period in Da 7:25; 12:7. It occurs in three forms in the Apocalypse (forty-two months, here and 13:5; 1260 days, 11:3; 12:6 ; time, times and half a time or $31 / 2$ years, 12:14 and so in Daniel). This period, however its length may be construed, covers the duration of the triumph of the Gentiles, of the prophesying of the two witnesses, of the sojourn of the woman in the wilderness.

Rev 11:3
I will give $(\delta \omega \sigma \omega)$. Future active of $\delta \iota \delta \omega \mu$. The speaker may be God (Beckwith) or Christ (Swete) as in 2:13; $21: 6$ or his angel representative (22:7,12ff. ). The idiom that follows is Hebraic instead of either the infinitive after $\delta \iota \delta \omega \mu$ as in $2: 7 ; 3: 21 ; 6: 4 ; 7: 2 ; 13: 7,15 ; 16: 8$ or ıva with the subjunctive ( $9: 5 ; 19: 8$ ) we have ка $\pi \rho о \varphi \eta \tau \varepsilon v \sigma o v \sigma ı v$ (and they shall prophesy).

Unto my two witnesses ( $\tau \circ \imath \varsigma \delta v \sigma \iota \nu \mu \alpha \rho \tau v \sigma \iota \nu \mu \circ v$ ). Dative case after $\delta \omega \sigma \omega$. The article seems to point to two well-known characters, like Elijah, Elisha, but there is no possible way to determine who they are. All sorts of identifications have been attempted.

Clothed ( $\pi \varepsilon \rho 1 \beta \lambda \eta \mu \varepsilon v o v \varsigma)$. Perfect passive participle of $\pi \varepsilon \rho \iota \beta \alpha \lambda \lambda \omega$ as often before (7:9,13; 10:1, etc.). But Aleph A P Q here read the accusative plural in -ovc, while C has the nominative in -o. Charles suggests a mere slip for the nominative, but Hort suggests a primitive error in early MSS. for the dative $\pi \varepsilon \rho \lesssim \beta \varepsilon \beta \lambda \varepsilon \mu \varepsilon v o \iota s$ agreeing with $\mu \alpha \rho \tau v \sigma \iota v$.

In sackcloth (баккоия). Accusative retained with this passive verb as in 7:9,13. See 6:12 for баккоц and also Mt 3:4. The dress suited the message (Mt 11:21).

Rev 11:4
The two olive trees ( $\alpha \delta v o \varepsilon \lambda \alpha i \alpha$ ). The article seems to point to what is known. For this original use of $\varepsilon \lambda$ aıa see Ro 11:17,24. In Zec 4:2,3,14 the lampstand or candlestick ( $\lambda \nu \chi \nu \mathrm{v} \alpha$ ) is Israel, and the two olive trees apparently Joshua and Zerubbabel, but John makes his own use of this symbolism. Here the two olive trees and the candlesticks are identical.

Standing ( $\varepsilon \sigma \tau \omega \tau \varepsilon \varsigma)$. Masculine perfect active participle agreeing with outo instead of $\varepsilon \sigma \tau \omega \sigma \alpha$ (read by P and cursives) agreeing with $\varepsilon \lambda \alpha ı \alpha \kappa \alpha \lambda \nu \chi v ı \alpha$, even though $\alpha$ (feminine plural article) be accepted before $\varepsilon v \omega \pi \iota \circ$ tov кирьov (before the Lord).

Rev 11:5
If any man desireth to hurt them ( $\varepsilon \tau \iota \varsigma \alpha \cup \tau 0 \cup \varsigma ~ \theta \varepsilon \lambda \varepsilon \alpha \delta ı \kappa \eta \sigma \alpha)$. Condition of first class, assumed to be true, with $\varepsilon$ and present active indicative $(\theta \varepsilon \lambda \varepsilon)$ "if any one wants to hurt" ( $\alpha \delta$ ıкп $\sigma \alpha$ first aorist active infinitive). It is impossible to hurt these two witnesses till they
do their work. The fire proceeding out of the mouths of the witnesses is like Elijah's experience (2Ki 1:10).

Devoureth ( $\kappa \alpha \tau \varepsilon \sigma \theta เ \varepsilon)$. "Eats up (down)," present active indicative of $\kappa \alpha \tau \varepsilon \sigma \theta เ \omega$.
If any man shall desire $(\varepsilon \tau \iota \varsigma \varepsilon \varepsilon \lambda \eta \sigma \eta)$. Condition of third class with $\varepsilon$ and first aorist active subjunctive of $\theta \varepsilon \lambda \omega$ as in Lu 9:13; Php 3:12, but MSS. also read either $\theta \varepsilon \lambda \varepsilon$ (present active indicative) or $\theta \varepsilon \lambda \eta \sigma \varepsilon$ (future active, condition of the first class like the preceding one. The condition is repeated in this changed form, as less likely to happen and with inevitable death ( $\delta \varepsilon \alpha v \tau о \nu \alpha \pi о \kappa \tau \alpha \nu \theta \eta \nu \alpha$, must be killed, first aorist passive infinitive of $\alpha \pi о \kappa \tau \varepsilon เ \nu \omega$ with $\delta \varepsilon$ ).

Rev 11:6
To shut the heaven ( $\kappa \lambda \varepsilon \iota \sigma \alpha$ $\tau 0 \nu$ ovpavov). First aorist active infinitive of $\kappa \lambda \varepsilon \iota \omega$. As Elijah did by prayer (1Ki 17:1; Lu 4:25; Jas 5:17).

That it rain not ( $\iota v \alpha \mu \eta v \varepsilon \tau \circ \varsigma \beta \rho \varepsilon \chi \eta)$. Sub-final use of $v \alpha \alpha \mu \eta$ with the present active subjunctive of $\beta \rho \varepsilon \chi \omega$, old verb to rain (Mt 5:45) , here with veтos as subject.

During the days ( $\tau \alpha \varsigma \eta \mu \varepsilon \rho a \varsigma)$. Accusative of extent of time. In Lu 4:25; Jas 5:17 the period of the drouth in Elijah's time was three and a half years, just the period here.

Of their prophecy $(\tau \eta \varsigma \pi \rho \circ \varphi \eta \tau \varepsilon \iota \alpha \varsigma \alpha v \tau \omega \nu)$. Not here the gift of prophecy (1Co 12:10 ) or a particular prophecy or collection of prophecies ( $\operatorname{Re} 1: 3 ; 22: 7 \mathrm{f}$. ), but "the execution of the prophetic office" (Swete).

Over the waters ( $\varepsilon \pi \tau \omega \nu v \delta \alpha \tau \omega v$ ). "Upon the waters." As Moses had (Ex 7:20).
Into blood $(\varepsilon \iota \varsigma \alpha \not \mu \alpha)$. As already stated in 8:8 about the third trumpet and now again here.

To smite ( $\pi \alpha \tau \alpha \xi \alpha)$. First aorist active infinitive of $\pi \alpha \tau \alpha \sigma \sigma \omega$, used here with $\varepsilon \xi$ ovoıav $\varepsilon \chi o v \sigma \iota v$ (they have power), as is $\sigma \tau \rho \varepsilon \varphi \varepsilon \iota v$ (to turn).

With every plague ( $\varepsilon v \pi \alpha \sigma \eta \pi \lambda \eta \gamma \eta$ ). In $1 \mathrm{Ki} 4: 8$, but with reference to the plagues in Egypt.

As often as they shall desire (обакıৎ $\varepsilon \alpha v \theta \varepsilon \lambda \eta \sigma \omega \sigma \iota v$ ). Indefinite temporal clause with oбaкıц and modal $\varepsilon \alpha \nu(=\alpha v)$ and the first aorist active subjunctive of $\theta \varepsilon \lambda \omega$, "as often as they will."

Rev 11:7
When they shall have finished ( $\mathrm{o} \tau \alpha \nu \tau \varepsilon \lambda \varepsilon \sigma \omega \sigma \iota$ ). Merely the first aorist active subjunctive of $\tau \varepsilon \lambda \varepsilon \omega$ with o $\tau \alpha v$ in an indefinite temporal clause with no futurum exactum (future perfect), "whenever they finish."

The beast ( $\tau 0 \operatorname{\eta \eta } \rho \stackrel{\nu}{ }$ ). "The wild beast comes out of the abyss" of 9:1f. He reappears in 13:1; 17:8. In Da 7:3 $\begin{aligned} & \text { \# pıa occurs. Nothing less than antichrist will satisfy the picture }\end{aligned}$ here. Some see the abomination of Da 7:7; Mt 24:15. Some see Nero redivivus.

He shall make war with them ( $\pi o \imath \eta \sigma \varepsilon \mu \varepsilon \tau^{\prime} \alpha v \tau \omega v \pi o \lambda \varepsilon \mu \circ v$ ). This same phrase occurs in 12:17 about the dragon's attack on the woman. It is more the picture of single combat ( 2:16).

He shall overcome them (vıкŋ $\sigma \varepsilon \alpha v \tau о \nu \varsigma)$. Future active of $v \kappa \kappa \alpha \omega$. The victory of the beast over the two witnesses is certain, as in Da 7:21 .

And kill them ( $\kappa \alpha \alpha \pi о \kappa \tau \varepsilon \nu \varepsilon)$. Future active of $\alpha \pi о \kappa \tau \varepsilon เ \nu \omega$. Without attempting to apply this prophecy to specific individuals or times, one can agree with these words of Swete: "But his words cover in effect all the martyrdoms and massacres of history in which brute force has seemed to triumph over truth and righteousness."

Rev 11:8
Their dead bodies lie ( $\tau 0 \pi \tau \omega \mu \alpha \alpha v \tau \omega v$ ). Old word from $\pi \iota \pi \tau \omega$ (to fall), a fall, especially of bodies slain in battle, a corpse, a carcase (Mt 14:12), here the singular (some MSS. $\pi \tau \omega \mu \alpha \tau \alpha$, plural) as belonging to each of the $\alpha v \tau \omega \nu$ (their) like $\sigma \tau o \mu \alpha \tau o \varsigma ~ \alpha v \tau \omega \nu$ (their mouth) in verse 5. So also in verse 9. No word in the Greek for "lie."

In ( $\varepsilon \pi$ ). "Upon," as in verse 6, with genitive ( $\tau \eta \varsigma \pi \lambda \alpha \tau \varepsilon \iota \varsigma$ ), the broad way (o o ou understood), from $\pi \lambda a \tau v \varsigma$ (broad) as in Mt 6:5, old word (Re 21:21; 22:2).

Of the great city ( $\tau \eta \varsigma \pi \sigma \lambda \varepsilon \omega \varsigma \tau \eta \varsigma \mu \varepsilon \gamma \alpha \lambda \eta \varsigma)$. Clearly Jerusalem in view of the closing clause (o $\boldsymbol{\tau} \circ \boldsymbol{0}--\varepsilon \sigma \tau \alpha v \rho \omega \theta \eta$ ), though not here called "the holy city" as in verse 2 , and though elsewhere in the Apocalypse Babylon (Rome) is so described (14:8; 16:19; 17:5; 18:2,10,16,18,19,21 ).

Which ( $\eta \tau \iota \varsigma)$. Which very city, not "whichever."
Spiritually ( $\pi \nu \varepsilon v \mu \alpha \tau \iota \kappa \omega \varsigma$ ). This late adverb from $\pi \nu \varepsilon \nu \mu a \tau \iota \kappa \circ \varsigma$ (spiritual) occurs in the N.T. only twice, in 1Co 2:14 for the help of the Holy Spirit in interpreting God's message and here in a hidden or mystical (allegorical sense). For this use of $\pi v \varepsilon v \mu \alpha \tau \iota \kappa o c$ see 1 Co 10:3f . Judah is called Sodom in Isa 1:9f.; Eze 16:46,55. See also Mt 10:15; 11:23 . Egypt is not applied to Israel in the O.T., but is "an obvious symbol of oppression and slavery" (Swete).

Where also their Lord was crucified (олоv к о к кирьс $\alpha v \tau \omega \nu \varepsilon \sigma \tau \alpha v \rho \omega \theta \eta$ ). First aorist passive indicative of $\sigma \tau \alpha \cup \rho o \omega$, to crucify, a reference to the fact of Christ's crucifixion in Jerusalem. This item is one of the sins of Jerusalem and the disciple is not greater than the Master (Joh 15:20).

Rev 11:9
Men from among ( $\varepsilon \kappa \tau \hat{A} \omega \nu$ etc.). No word for "men" ( $\alpha \nu \theta \rho \hat{A} \omega \pi \sigma$ or $\pi o \lambda \lambda o$ ) before $\varepsilon \kappa$ $\tau \hat{A} \omega \nu$, but it is implied (partitive use of $\varepsilon \kappa$ ) as in 2:10 and often. See also 5:9; 7:9 for this enumeration of races and nations.

Do look upon ( $\beta \lambda \varepsilon \pi \sigma v \sigma \iota v$ ). Present (vivid dramatic) active indicative of $\beta \lambda \varepsilon \pi \omega$.
 is neuter singular though $\eta \mu \varepsilon \rho a \varsigma$ (days) is feminine as in $\operatorname{Mr} 6: 23$; Re 12:14. The days of the gloating over the dead bodies are as many as the years of the prophesying by the witnesses
( 11:3), but there is no necessary correspondence (day for a year). This delight of the spectators "is represented as at once fiendish and childish" (Swete).

Suffer not (очк $\alpha \varphi \iota ⿱ \sigma \iota \nu$ ). Present active indicative of $\alpha \varphi \iota \omega$, late form for $\alpha \varphi \iota \eta \mu$, as in
 Apocalypse, though common elsewhere (Joh 11:44,48; 12:7; 18:8 ).

Their dead bodies ( $\tau \alpha \pi \tau \omega \mu \alpha \tau \alpha \alpha v \tau \omega v$ ). "Their corpses," plural here, though singular just before and in verse 8 .

To be laid in a tomb ( $\tau \varepsilon \theta \eta v \alpha \varepsilon ı \varsigma ~ \mu \nu \eta \mu \alpha)$. First aorist passive of $\tau \iota \theta \eta \mu$, to place. $\mathrm{M} \nu \eta \mu \alpha$ (old word from $\mu \mu \nu \eta \sigma \kappa \omega$, to remind) is a memorial, a monument, a sepulchre, a tomb ( Mr 5:3 ). "In a country where burial regularly took place on the day of death the time of exposure and indignity would be regarded long" (Beckwith). See Tobit 1:18ff.

Rev 11:10
They that dwell upon the earth (o катокооv $\tau \varepsilon \varsigma \varepsilon \pi \tau \eta \varsigma \gamma \eta \varsigma$ ). Present active articular participle of катокк $\omega$, "an Apocalyptic formula" (Swete) for the non-Christian world (3:10; 6:10; 8:13; 13:8,12,14; 17:8).

Rejoice ( $\chi \alpha \iota \rho o v \sigma เ v$ ). Present active indicative of $\chi \alpha \rho \rho \omega$.
Over them ( $\varepsilon \pi^{\prime}$ autoıs). Locative (or dative) case with $\varepsilon \pi$ as in 10:11.
Make merry ( $\varepsilon \nu \varphi \rho \alpha, \nu \circ \nu \tau \alpha$ ). Present middle indicative of $\varepsilon \nu \varphi \rho \alpha ı \nu \omega$, old verb ( $\varepsilon v, \varphi \rho \eta \nu$, jolly mind), as in Lu 15:32; Re 12:12; 18:20 . Jubilant jollification over the cessation of the activity of the two prophets.

They shall send gifts to one another ( $\delta \omega \rho \alpha \pi \varepsilon \mu \psi о v \sigma เ \nu ~ \alpha \lambda \lambda \eta \lambda o \iota \varsigma)$. Future active of $\pi \varepsilon \mu \pi \omega$ with dative $\alpha \lambda \lambda \eta \lambda$ occ. Just as we see it done in Es 9:19,22; Ne 8:10,12 .

Tormented ( $\varepsilon \beta \alpha \sigma \alpha v / \sigma \alpha v)$. First aorist active indicative of $\beta \alpha \sigma \alpha v ı \zeta \omega$, for which see 9:5. This is the reason (oт) of the fiendish glee of Jew and Gentile, who no longer will have to endure the prophecies (11:3f. ) and dread miracles (11:5f. ) of these two prophets. "Such a sense of relief is perhaps not seldom felt today by bad men when a preacher of righteousness or a signal example of goodness is removed" (Swete).

Rev 11:11
After the ( $\mu \varepsilon \tau \alpha$ тац etc.). The article $\tau \alpha \varsigma$ (the) points back to 11:9.
The breath of life from God ( $\pi \nu \varepsilon \nu \mu \alpha \zeta \omega \eta \varsigma \varepsilon \kappa$ тov $\theta \varepsilon o v$ ). This phrase ( $\pi \nu \varepsilon \nu \mu \alpha \zeta \omega \eta \varsigma)$ occurs in Ge 6:17; 7:15,22 of the lower animals, but here there is clearly an allusion to Eze 37:5,10 (also 2Ki 13:21 ), where the dead bones lived again.

Entered into them ( $\varepsilon ו \sigma \eta \lambda \theta \varepsilon v \varepsilon v$ avtor¢). Second aorist active indicative of $\varepsilon ו \sigma \varepsilon \rho \chi \circ \mu \alpha$ with $\varepsilon v$ rather than $\varepsilon \varsigma \varsigma$ after it (cf. Lu 9:46 ). The prophecy has here become fact (change from future $\pi \varepsilon \mu \psi o v \sigma \iota v$ to aorist $\varepsilon ા \sigma \eta \lambda \theta \varepsilon v)$.

They stood upon their feet ( $\varepsilon \sigma \tau \eta \sigma \alpha v \varepsilon \pi$ тouc $\pi 0 \delta \alpha \varsigma \alpha u \tau \omega v)$ ). Ingressive second aorist active indicative of $\iota \sigma \tau \eta \mu$ (intransitive). Reference to Eze $37: 10$, but with the accusative in place of genitive there after $\varepsilon \pi$ as in 2 Ki 13:21 .

Fell upon ( $\varepsilon \pi \varepsilon \pi \varepsilon \sigma \varepsilon v \varepsilon \pi$ ). Second aorist active indicative of $\varepsilon \pi \iota \pi \iota \pi \tau \omega$ with repetition of $\varepsilon \pi$. The same prophetic use of the aorist as in $\varepsilon เ \sigma \eta \lambda \theta \varepsilon \nu$ and $\varepsilon \sigma \tau \eta \sigma \alpha \nu$.

Beheld ( $\theta \varepsilon \omega \rho 0 \cup v \tau \alpha \varsigma)$. Present active articular participle of $\theta \varepsilon \omega \rho \varepsilon \omega$. "The spectators were panic-stricken" (Swete).

Rev 11:12
Saying ( $\lambda \varepsilon \gamma 0 v \sigma \eta \varsigma)$. Present active predicate participle of $\lambda \varepsilon \gamma \omega$, feminine genitive agreeing with $\varphi \omega \nu \eta \varsigma$, though some MSS. have the accusative $\varphi \omega \nu \eta \nu \lambda \varepsilon \gamma o v \sigma \alpha \nu$, either construction being proper after $\eta \kappa о v \sigma \alpha \nu$ (they heard). There is a little evidence for $\eta \kappa о v \sigma \alpha$ like 12:10 (24 times in the book). Cf. Joh 5:28 .

Come up hither ( $\alpha v \alpha \beta \alpha \tau \varepsilon \omega \delta \varepsilon$ ). Second aorist active imperative of $\alpha v \alpha \beta \alpha \iota \omega$. The ascension of these two witnesses is in full view of their enemies, not just in the presence of a few friends as with Christ (Ac 1:9).

They went up $(\alpha v \varepsilon \beta \eta \sigma \alpha v)$. Second aorist active indicative of $\alpha \nu \alpha \beta \alpha \iota \omega \omega$.
In the cloud ( $\varepsilon \nu \tau \eta \nu \varepsilon \varphi \varepsilon \lambda \eta$ ). As Jesus did (Ac 1:9) and like Elijah (2Ki 2:11). Their triumph is openly celebrated before their enemies and is like the rapture described by Paul in 1Th 4:17.

Rev 11:13
There was ( $\varepsilon \gamma \varepsilon v \varepsilon \tau 0)$. "There came to pass" (second aorist middle indicative of $\gamma \iota v \circ \mu \alpha$ ). Earthquakes are often given as a symbol of great upheavals in social and spiritual order (Swete) as in Eze 37:7; 38:19; Hag 2:6; Mr 13:8; Heb 12:26f.; Re 6:12; 16:18 .

Fell ( $\varepsilon \pi \varepsilon \sigma \varepsilon v)$. Second aorist active indicative of $\pi \iota \pi \tau \omega$, to fall. Only the tenth ( $\tau 0$ $\delta \varepsilon \kappa \alpha \tau o v$ ) of the city fell. Cf. тo $\tau \rho \iota \tau \circ v$ (the third) in 8:7-12, perhaps a conventional number.

Were killed ( $\alpha \pi \varepsilon \kappa \tau \alpha v \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\alpha \pi о \kappa \tau \varepsilon \iota v \omega$ as in 9:18.
Seven thousand persons (ovo $\mu \alpha \tau \alpha \alpha \nu \theta \rho \omega \pi \omega \nu \chi_{\iota} \lambda_{\iota} \alpha \delta \varepsilon \varsigma \varepsilon \pi \tau \alpha$ ). This use of ovo $\mu \alpha \tau \alpha$ (names of men here) is like that in 3:4; Ac 1:15 and occurs in the papyri (Deissmann, Bible Studies, p. 196f.).

Were affrighted ( $\varepsilon \mu \varphi о \beta о \varepsilon \gamma \varepsilon v o v \tau о$ ). "Became terrified," old adjective ( $\varepsilon \nu, \varphi о \beta \circ \varsigma$, fear) as in $\operatorname{Lu} 24: 5$; Ac 10:4; 24:5. "A general movement toward Christianity, induced by fear or despair--a prediction fulfilled more than once in ecclesiastical history" (Swete).

Gave glory ( $\varepsilon \delta \omega \kappa \alpha \nu \delta o \xi \alpha \nu$ ). First aorist active indicative of $\delta เ \delta \omega \mu$, when they saw the effect of the earthquake, recognition of God's power (Joh 9:24; Ac 12:23; Ro 4:20 ).

Rev 11:14
Is past $(\alpha \pi \eta \lambda \theta \varepsilon v)$. Second aorist active indicative of $\alpha \pi \varepsilon \rho \chi \circ \mu \alpha$. See 9:12 for this use and $21: 1,4$. The second woe ( $\eta$ ova $\eta \delta \varepsilon v \tau \varepsilon \rho \alpha$ ) is the sixth trumpet (9:12) with the two episodes attached ( 10:1-11:13).

The third woe ( $\eta$ ova $\eta \tau \rho \iota \tau \eta$, feminine as in $9: 12$ ) is the seventh trumpet, which now "cometh quickly" ( $\varepsilon \rho \chi \varepsilon \tau \alpha \tau \alpha \chi v)$, for which phrase see $2: 16 ; 3: 11 ; 22: 7,12,20$. Usually pointing to the Parousia.

## Rev 11:15

There followed (eүعvovio). "There came to pass." There was silence in heaven upon the opening of the seventh seal ( $8: 1$ ), but here "great voices." Perhaps the great voices are the $\zeta \omega \alpha$ of 4:6ff.; 5:8.

Saying ( $\lambda \varepsilon \gamma 0 \nu \tau \varepsilon \varsigma)$. Construction according to sense; $\lambda \varepsilon \gamma 0 \nu \tau \varepsilon \varsigma$, masculine participle (not $\lambda \varepsilon \gamma o v \sigma \alpha$ ), though $\varphi \omega v a$, feminine. John understood what was said.

Is become (عүعveto). "Did become," prophetic use of the aorist participle, already a fact. See eүعveтo in Lu 19:9.
 Repeat $\eta \beta a \sigma \iota \lambda \varepsilon \iota \alpha$ from the preceding. God the Father is meant here by кupıov (Lord), as autou (his) shows. This is the certain and glorious outcome of the age-long struggle against Satan, who wields the kingdom of the world which he offered to Christ on the mountain for one act of worship. But Jesus scorned partnership with Satan in the rule of the world, and chose war, war up to the hilt and to the end. Now the climax has come with Christ as Conqueror of the kingdom of this world for his Father. This is the crowning lesson of the Apocalypse.

He shall reign ( $\beta \alpha \sigma \lambda \lambda \varepsilon v \sigma \varepsilon$ ). Future active of $\beta \alpha \sigma \iota \lambda \varepsilon v \omega$. God shall reign, but the rule of God and of Christ is one as the kingdom is one (1Co 15:27). Jesus is the Lord's Anointed (Lu 2:26; 9:20).

Rev 11:16
The four and twenty elders (о єוкоб тєббарєৎ $\pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho о$ ). They follow the living creatures (verse 15 , if correctly interpreted) in their adoration, as in 4:9f. . Though seated on thrones of their own (4:4), yet they fall upon their faces in every act of worship to God and Christ ( $4: 10 ; 5: 8,14 ; 19: 4$ ). Here $\varepsilon \pi \tau \alpha \pi \rho \circ \sigma \omega \pi \alpha \alpha \nu \tau \omega v$ (upon their faces) is added as in 7:11 about the angels. The elders here again represent the redeemed, as the four living creatures the forces of nature, in the great thanksgiving here ( $\varepsilon v \chi \propto \rho เ \sigma \tau o v \mu \varepsilon v$, present active indicative of $\varepsilon \cup \chi \propto \rho เ \sigma \tau \varepsilon \omega)$.

Rev 11:17
O Lord God (Kvpıє о $\theta \varepsilon о \varsigma)$. Vocative form ки $\rho \varepsilon$ and nominative form o $\theta \varepsilon о \varsigma$ (vocative in use). See $1: 8 ; 4: 8$ for this combination with o $\pi \alpha v \tau$ ократ $\omega \rho$ (the Almighty). For o $\omega v \kappa \alpha$ o $\eta \nu$ (which art and which wast) see $1: 4,8 ; 4: 8 ; 16: 5$.

Thou hast taken ( $\varepsilon \lambda \lambda \eta \varphi \varepsilon \varsigma$ ). Perfect active indicative of $\lambda \alpha \mu \beta \alpha v \omega$, emphasizing the permanence of God's rule, "Thou hast assumed thy power."

Didst reign ( $\varepsilon \beta \alpha \sigma \lambda \lambda \varepsilon v \sigma \alpha \varsigma)$. Ingressive first aorist active indicative of $\beta \alpha \sigma 1 \lambda \varepsilon v \omega$, "Didst begin to reign." See this combination of tenses (perfect and aorist) without confusion in 3:3; 5:7; 8:5 .

Rev 11:18

Were wroth ( $\omega \rho \gamma \iota \sigma \theta \eta \sigma \alpha v$ ). Ingressive first aorist active indicative of o $\rho \gamma \iota \zeta \rho \mu \alpha$, "became angry." The culmination of wrath against God (16:13ff.; 20:8f. ). Cf. Ps 2:1,5,12; 99:1; Ac $4: 25 \mathrm{f}$. . John sees the hostility of the world against Christ.

Thy wrath came ( $\eta \lambda \theta \varepsilon \nu \eta$ o $\rho \gamma \eta \sigma o v$ ). Second aorist active indicative of $\varepsilon \rho \chi o \mu \alpha$, the prophetic aorist again. The Dies Irae is conceived as already come.

The time of the dead to be judged (о каı $о \varsigma \tau \omega \nu \nu \varepsilon \kappa \rho \omega \nu \kappa \rho \iota \theta \eta \nu \alpha$ ). For this use of каıроя see Mr 11:13; Lu 21:24. By "the dead" John apparently means both good and bad (Joh 5:25; Ac 24:21), coincident with the resurrection and judgment (Mr 4:29; Re 14:15ff.; 20:1-15 ). The infinitive $\kappa \rho \iota \eta \nu \alpha$ is the first aorist passive of $\kappa \rho \iota v \omega$, epexegetic use with the preceding clause, as is true also of $\delta o v v a$ (second aorist active infinitive of $\delta \iota \delta \omega \mu$ ), to give.

Their reward ( $\tau 0 v \mu \mathrm{\sigma} \theta \mathrm{ov}$ ). This will come in the end of the day (Mt 20:8), from God (Mt 6:1), at the Lord's return (Re 22:12 ), according to each one's work (1Co 3:8).
 anacoluthon and fails to agree in case with the preceding datives after $\delta o v v \alpha \tau o v \mu \circ \sigma \circ v$, though some MSS. have the dative тоья $\mu$ кроья, etc. John is fond of this phrase "the small and the great" (13:16; 19:5,18; 20:12 ).

To destroy $(\delta \iota \alpha \varphi \theta \varepsilon \iota \rho \alpha)$. First aorist active infinitive of $\delta \iota \alpha \varphi \theta \varepsilon \iota \rho \omega$, carrying on the
 the earth). There is a double sense in $\delta \iota \alpha \varphi \theta \varepsilon \iota \rho \omega$ that justifies this play on the word. See 19:2. In 1Ti 6:5 we have those "corrupted in mind" ( $\delta \iota \alpha \varphi \theta \rho \mu \varepsilon v o \tau o v \nu o v \nu)$. God will destroy the destroyers (1Co 3:16f. ).

Rev 11:19
Was opened $(\eta v o r \gamma \eta)$. Second aorist passive indicative of $\alpha \nu o t \gamma \omega$, with augment on the preposition as in 15:5. For the sanctuary (vaoc) of God in heaven see 3:12; 7:15; 15:5ff.; 21:22.

Was seen $(\omega \varphi \theta \eta)$. First aorist passive indicative of opa $\omega$.
The ark of his covenant ( $\eta \kappa \kappa \omega \tau \circ \varsigma \tau \eta \varsigma \delta \iota \alpha \theta \eta \kappa \eta \varsigma \alpha v \tau \circ v$ ). The sacred ark within the second veil of the tabernacle (Heb 9:4) and in the inner chamber of Solomon's temple ( 1 Ki 8:6 ) which probably perished when Nebuchadrezzar burnt the temple (2Ki 25:9; Jer 3:16 ). For the symbols of majesty and power in nature here see also $6: 12 ; 8: 5 ; 11: 13 ; 16: 18,21$.

## Revelation 12

Rev 12:1
A great sign ( $\sigma \eta \mu \varepsilon เ o v \mu \varepsilon \gamma \alpha$ ). The first of the visions to be so described (13:3; 15:1), and it is introduced by $\omega \varphi \theta \eta$ as in 11:19; 12:3, not by $\mu \varepsilon \tau \alpha$ тauto or by $\varepsilon \iota \delta o v$ or by $\varepsilon ו \delta o v$ ка $\delta \delta o v$ as heretofore. This "sign" is really a тєpac (wonder), as it is so by association in Mt 24:24; Joh 4:48; Ac 2:22; 5:12. The element of wonder is not in the word $\sigma \eta \mu \varepsilon \iota \nu$ as in $\tau \varepsilon \rho \alpha \varsigma$, but often in the thing itself as in Lu 21:11; Joh 9:16; Re 13:13ff.; 15:1; 16:14; 19:20 .

A woman ( $\gamma \cup \vee \eta$ ). Nominative case in apposition with $\sigma \eta \mu \varepsilon \iota v$. "The first 'sign in heaven' is a Woman--the earliest appearance of a female figure in the Apocalyptic vision" (Swete).

Arrayed with the sun $(\pi \varepsilon \rho 1 \beta \varepsilon \beta \lambda \eta \mu \varepsilon v \eta$ tov $\eta \lambda \iota o v)$. Perfect passive participle of $\pi \varepsilon \rho \lesssim \beta \alpha \lambda \lambda \omega$, with the accusative retained as so often ( 9 times) in the Apocalypse. Both Charles and Moffatt see mythological ideas and sources behind the bold imagery here that leave us all at sea. Swete understands the Woman to be "the church of the Old Testament" as "the Mother of whom Christ came after the flesh. But here, as everywhere in the Book, no sharp dividing line is drawn between the Church of the Old Testament and the Christian Society." Certainly she is not the Virgin Mary, as verse 17 makes clear. Beckwith takes her to be "the heavenly representative of the people of God, the ideal Zion, which, so far as it is embodied in concrete realities, is represented alike by the people of the Old and the New Covenants." John may have in mind Isa 7:14 (Mt 1:23; Lu 1:31) as well as Mic 4:10; Isa 26:17f.; 66:7 without a definite picture of Mary. The metaphor of childbirth is common enough (Joh 16:21; Ga 4:19). The figure is a bold one with the moon "under her feet" (vтокат $\omega \tau \omega \nu$ $\pi o \delta \omega v a v \tau \eta \varsigma)$ and "a crown of twelve stars" ( $\sigma \tau \varepsilon \varphi \alpha v o \varsigma ~ a \sigma \tau \varepsilon \rho \omega v \delta \omega \delta \varepsilon \kappa \alpha)$ ), a possible allusion to the twelve tribes (Jas 1:1; Re 21:12) or to the twelve apostles (Re 21:14).

Rev 12:2
And she was with child ( $\kappa \alpha \varepsilon v \gamma \alpha \sigma \tau \rho \varepsilon \chi о \cup \sigma \alpha$ ). Perhaps $\varepsilon \sigma \tau \iota v$ to be supplied or the participle used as a finite verb as in 10:2. This is the technical idiom for pregnancy as in Mt 1:18,23 , etc.

Travailing in birth ( $\omega \delta \iota v o v \sigma \alpha$ ). Present active participle of $\omega \delta \iota v \omega$, old verb (from $\omega \delta \iota \nu$ birth-pangs 1Th 5:3 ), in N.T. only here and Ga 4:27.

And in pain ( $\kappa \alpha \beta \alpha \sigma \alpha v \iota \zeta о \mu \varepsilon v \eta)$. "And tormented" (present passive participle of $\beta \alpha \sigma \alpha \nu \iota \zeta$, for which see already 9:5; 11:10), only here in N.T. in sense of childbirth.

To be delivered ( $\tau \varepsilon \kappa \varepsilon เ v)$. Second aorist active infinitive of $\tau ו \kappa \tau \omega$, to give birth, epexegetical use. Also in verse 4.

Rev 12:3
Another sign ( $\alpha \lambda \lambda$ o $\sigma \eta \mu \varepsilon \iota o v$ ). "A second tableau following close upon the first and inseparable from it" (Swete).

And behold ( $\kappa \alpha \operatorname{\delta ov}$ ). As often ( $4: 1 ; 6: 2,5,8$, etc.).
A great red dragon ( $\delta \rho \alpha \kappa \omega v \mu \varepsilon \gamma \alpha \varsigma \pi \nu \rho \rho \circ \varsigma)$. Homer uses this old word (probably from $\delta \varepsilon \rho \kappa о \mu \alpha$, to see clearly) for a great monster with three heads coiled like a serpent that ate poisonous herbs. The word occurs also in Hesiod, Pindar, Eschylus. The Babylonians feared a seven-headed hydra and Typhon was the Egyptian dragon who persecuted Osiris. One wonders if these and the Chinese dragons are not race memories of conflicts with the diplodocus and like monsters before their disappearance. Charles notes in the O.T. this monster as the chief enemy of God under such title as Rahab (Isa 51:9f.; Job 26:12f. ), Behemoth (Job 40:15-24 ), Leviathan (Isa 27:1 ), the Serpent (Am 9:2ff. ). In Ps 74:13 we read of "the heads of the dragons." On $\pi u \rho \rho o \varsigma$ (red) see 6:4. Here (12:9) and in 20:2 the great dragon is identified with Satan. See Da 7 for many of the items here, like the ten horns ( $\mathrm{Da} 7: 7$ ) and hurling the stars (Da 8:10). The word occurs in the Apocalypse alone in the N.T.

Seven diadems ( $\varepsilon \pi \tau \alpha \delta \iota \alpha \delta \eta \mu \alpha \tau \alpha$ ). Old word from $\delta \iota \alpha \delta \varepsilon \omega$ (to bind around), the blue band marked with white with which Persian kings used to bind on the tiara, so a royal crown in contrast with $\sigma \tau \varepsilon \varphi a v o \varsigma$ (chaplet or wreath like the Latin corona as in $2: 10$ ), in N.T. only here, 13:1; 19:12. If Christ as Conqueror has "many diadems," it is not strange that Satan should wear seven (ten in 13:1).

Rev 12:4
His tail ( $\eta$ ov $\rho \alpha$ avtov). See 9:10,19.
Draweth ( $\sigma \cup \rho \varepsilon$ ). Present active indicative of $\sigma v \rho \omega$, old verb, to drag, here alone in the Apocalypse, but see Joh 21:8 .

The third part of the stars ( $\tau 0 \tau \rho \iota \tau o v \tau \omega v \alpha \sigma \tau \varepsilon \rho \omega v$ ). Like a great comet is this monster. See $\mathrm{Da} 8: 10$. Perhaps only the third is meant to soften the picture as in $\operatorname{Re} 8: 7 \mathrm{f}$.

Did cast them ( $\varepsilon \beta \alpha \lambda \varepsilon v \alpha v \tau 0 v \varsigma)$. Second aorist active indicative. Charles takes this to refer to a war in heaven between the good angels and Satan, with the fall of some angels (Jude 1:6 ). But John may have in mind the martyrs before Christ (Heb 11:32f. ) and after Christ's ascension (Mt 23:35).

Stood $(\varepsilon \sigma \tau \eta \kappa \varepsilon v)$. Imperfect active of a late verb, $\sigma \tau \eta \kappa \omega$, from the perfect $\varepsilon \sigma \tau \eta \kappa \alpha$ of $\iota \sigma \tau \eta \mu$, graphic picture of the dragon's challenge of the woman who is about to give birth.

When she was delivered (отаv $\tau \varepsilon \kappa \eta$ ). Indefinite temporal clause with o $\tau \alpha v$ and the second aorist active subjunctive of $\tau \iota \kappa \tau \omega$, "whenever she gives birth."

That he might devour (ıv $\kappa \alpha \tau \alpha \varphi \alpha \gamma \eta$ ). Purpose clause with $v \alpha$ and the second aorist active subjunctive of $\kappa \alpha \tau \varepsilon \sigma \theta \iota \omega$, to eat up (down). Cf. Jer 28:34. This is what Pharaoh did to Israel (Ex 1:15-22; Ps 85:13; Isa 27:1; 51:9; Eze 29:3 ). Precisely so the devil tried to destroy the child Jesus on his birth.

Rev 12:5
She was delivered of a son ( $\varepsilon \tau \varepsilon \kappa \varepsilon v$ viov). Literally, "she bore a son" (second aorist active indicative of $\tau \iota \kappa \tau \omega)$.

A man child $(\alpha \rho \sigma \varepsilon v)$. So A C with the neuter $\tau \varepsilon \kappa v o v$ or $\pi \alpha \iota \delta \iota v$ in mind, as often in O.T. ( $\varepsilon \tau \varepsilon \kappa \varepsilon \nu \alpha \rho \sigma \varepsilon \nu$, Ex 1:16ff.; 2:2; Le 12:2,7; Isa 66:7; Jer 20:15 , etc.), but P and some cursives read $\alpha \rho \sigma \varepsilon v \alpha$ (masculine accusative), as in verse 13 ( $\tau o v \alpha \rho \sigma \varepsilon v \alpha$ ), while Aleph Q have $\alpha \rho \rho \varepsilon v \alpha$. The word is old (either $\alpha \rho \sigma \eta \nu$ or $\alpha \rho \rho \eta \nu$ ), as in Mt 19:4, only in this chapter in the Apocalypse. It is really redundant after viov (son), as in Tob. 6:12 (Aleph).

Who is to rule all the nations with a rod of iron ( $\sigma \varsigma \mu \varepsilon \lambda \varepsilon \pi \sigma \mu \alpha \iota v \varepsilon \iota \nu \pi \alpha \nu \tau \alpha \tau \alpha \varepsilon \theta v \eta$ $\varepsilon v \rho \alpha \beta \delta \omega \sigma \iota \delta \eta \rho \alpha$ ). See $2: 27$ for these words (from Ps 2:9) applied there to victorious Christians also, and in 19:15 to the triumphant Christian. His rule will go beyond the Jews (Mt 2:6 ). There is here, of course, direct reference to the birth of Jesus from Mary, who thus represented in her person this "ideal woman" (God's people).

Was caught unto God ( $\eta \rho \pi \alpha \sigma \theta \eta$ ). First aorist passive indicative of $\alpha \rho \pi \alpha \zeta \omega$, old verb for seizing or snatching away, as in Joh 10:12, here alone in the Apocalypse. Reference to the ascension of Christ, with omission of the ministry, crucifixion, and resurrection of Christ because he is here simply showing that "the Dragon's vigilance was futile" (Swete). "The Messiah, so far from being destroyed, is caught up to a share in God's throne" (Beckwith).

Rev 12:6
Fled into the wilderness ( $\varepsilon \varphi v \gamma \varepsilon v \varepsilon \iota \varsigma \tau \eta v \varepsilon \rho \eta \mu \circ v)$. Second aorist active indicative of $\varphi \varepsilon v \gamma \omega$. Here, of course, not Mary, but "the ideal woman" (God's people) of the preceding verses, who fled under persecution of the dragon. God's people do not at once share the rapture of Christ, but the dragon is unable to destroy them completely. The phrases used here seem to be reminiscent of De 8:2ff. (wanderings of Israel in the wilderness), $1 \mathrm{Ki} 17: 2 \mathrm{f}$. and 19:3f. (Elijah's flight), I Macc. 2:29 (flight of the Jews from Antiochus Epiphanes), Mt 2:13 (flight of Joseph and Mary to Egypt), Mr 13:14 (the flight of Christians at the destruction of Jerusalem).

Where (отои--єкє). Hebrew redundancy (where--there) as in 3:8; 8:9,9; 13:8,12; 17:9; 20:8.

Prepared ( $\eta \tau о \mu \alpha \sigma \mu \varepsilon \nu o v)$. Perfect passive predicate participle of $\varepsilon \tau \sigma \mu \alpha \zeta \omega$, for which verb see Mt 20:23; Re 8:6; 9:7,15; 16:12; 19:7; 21:2 , and for its use with толос Joh 14:2f. and for the kind of fellowship meant by it (Ps 31:21; 2Co 13:13; Col 3:3; 1Jo 1:3 ).

Of God (ato $\tau 0 v \theta \varepsilon o v)$. "From (by) God," marking the source as God (9:18; Jas 1:13 ). This anticipatory symbolism is repeated in 12:13f.

That there they may nourish her (ıva $\varepsilon \kappa \varepsilon \tau \rho \varepsilon \varphi \omega \sigma \iota \nu \alpha v \tau \eta v$ ). Purpose clause with $\tau \alpha$ and the present for continued action: active subjunctive according to $\mathrm{A} P$ though C reads $\tau \rho \varepsilon \varphi$ ovoıv, present active indicative, as is possible also in 13:17 and certainly so in 1Jo 5:20 (Robertson, Grammar, p. 984), a solecism in late vernacular Greek. The plural is indefinite "they" as in $10: 11 ; 11: 9$. One MSS. has $\tau \rho \varepsilon \varphi \varepsilon \tau \alpha$ (is nourished). The stereotyped phrase occurs here, as in 11:2f., for the length of the dragon's power, repeated in 12:14 in more general terms and again in 13:5.

## Rev 12:7

There was war in heaven ( $\varepsilon \gamma \varepsilon v \varepsilon \tau о ~ \pi о \lambda \varepsilon \mu о \varsigma \varepsilon \nu \tau \omega$ ovpav $\omega$ ). "There came to be war in heaven" ( $\varepsilon \gamma \varepsilon v \varepsilon \tau \frac{1}{}$, not $\eta \nu$ ). "Another $\tau \alpha \beta \lambda \varepsilon a v$, not a $\sigma \eta \mu \varepsilon \iota \circ$ (vv. 1,3), but consequent upon the two $\sigma \eta \mu \varepsilon ⿺ \alpha$ which precede it. The birth and rapture of the Woman's Son issue in a war which invades the $\varepsilon$ roupavia" (Swete). The reference is not to the original rebellion of Satan, as Andreas held. As the coming of Christ brought on fresh manifestations of diabolic power (Mr 1:13; Lu 22:3,31; Joh 12:31; 14:30; 16:11), just so Christ's return to heaven is pictured as being the occasion of renewed attacks there. We are not to visualize it too literally, but certainly modern airplanes help us to grasp the notion of battles in the sky even more than the phalanxes of storm-clouds (Swete). John even describes this last conflict as in heaven itself. Cf. Lu 10:18; 1Ki 22:1ff.; Job 1; 2; Zec 3:1f. .

Michael and his angels (o Mı $\chi \propto \eta \lambda$ ка о $\alpha \gamma \gamma \varepsilon \lambda o \alpha v \tau o v$ ). The nominative here may be in apposition with $\pi 0 \lambda \varepsilon \mu \circ \varsigma$, but it is an abnormal construction with no verb, though $\varepsilon \gamma \varepsilon v \varepsilon \tau o$ (arose) can be understood as repeated. Michael is the champion of the Jewish people ( Da $10: 13,21 ; 12: 1$ ) and is called the archangel in Jude 9 .

Going forth to war ( $\tau 0 v \pi о \lambda \varepsilon \mu \eta \sigma \alpha$ ). This genitive articular infinitive is another grammatical problem in this sentence. If $\varepsilon \gamma \varepsilon v \varepsilon \tau 0$ (arose) is repeated as above, then we have the infinitive for purpose, a common enough idiom. Otherwise it is anomalous, not even like Ac 10:25.

With the dragon ( $\mu \varepsilon \tau \alpha$ tov $\delta \rho \alpha \kappa о \nu \tau о \varsigma)$. On the use of $\mu \varepsilon \tau \alpha$ with $\pi о \lambda \varepsilon \mu \varepsilon \omega$ see 2:16; 13:4; 17:14 (nowhere else in N.T.). The devil has angels under his command (Mt 25:41) and preachers also (2Co 11:14f. ).

Warred ( $\varepsilon \pi о \lambda \varepsilon \mu \eta \sigma \varepsilon v)$. Constative aorist active indicative of $\pi 0 \lambda \varepsilon \mu \varepsilon \omega$, picturing the whole battle in one glimpse.

Rev 12:8
And they prevailed not (ка оик $\sigma \chi \cup \sigma \alpha v$ ). Here ка equals "and yet" or "but." A few MSS. read the singular $\iota \sigma \chi \nu \sigma \varepsilon v$ like $\varepsilon \pi \sigma \lambda \varepsilon \mu \eta \sigma \varepsilon v$, but wrongly so.

Neither was their place found any more (ou $\delta \varepsilon \tau о \pi о \varsigma \varepsilon \cup \rho \varepsilon \theta \eta \quad \alpha \cup \tau \omega \nu \varepsilon \tau$ ). First aorist passive indicative of $\varepsilon \cup \rho \iota \sigma \kappa \omega$, to find. Probably aut $\omega v$ is the objective genitive (place for them), just as in 20:11 avtoıs (dative, for them) is used with тотоц oux $\varepsilon v \rho \varepsilon \theta \eta$. The phrase occurs in Da 2:35 Theod. and Zec 10:10 . The dragon is finally expelled from heaven (cf. Job 1:6 ), though to us it seems a difficult conception to think of Satan having had access to heaven.

Rev 12:9
Was cast down ( $\varepsilon \beta \lambda \eta \theta \eta$ ). Effective first aorist passive indicative of $\beta \alpha \lambda \lambda \omega$, cast down for good and all, a glorious consummation. This vision of final victory over Satan is given by Jesus in Lu 10:18; Joh 12:31. It has not come yet, but it is coming, and the hope of it should be a spur to missionary activity and zeal. The word megas (great) occurs here with
$\delta \rho a \kappa \omega v$ as in 12:3, and the whole picture is repeated in 20:2. The dragon in both places is identified with the old serpent (Ge 3:1ff. ) and called $\alpha \rho \chi \alpha \ldots \varsigma$ (from $\alpha \rho \chi \eta$, beginning), as Jesus said that the devil was a murderer "from the beginning" (Joh 8:44). Both סıaßo ${ }^{\circ} \mathrm{os}$ (slanderer) and Satan ( $\Sigma a \tau \alpha v a \varsigma)$ are common in N.T. for this great dragon and old serpent, the chief enemy of mankind. See on Mt 4:1; Re 2:10 for $\delta 1 \alpha \beta 0 \lambda o c$ and Lu 10:18 for $\Sigma \alpha \tau \alpha v \alpha \varsigma$.

The deceiver of the whole world (o $\pi \lambda \alpha \nu \omega \nu \tau \eta v$ окко $\mu \varepsilon v \eta \nu$ o $\lambda \eta \nu$ ). This is his aim and his occupation, pictured here by the nominative articular present active participle of $\pi \lambda \alpha v a \omega$, to lead astray. For "the inhabited world" see Lu 2:1; Re 3:10; 16:14. Satan can almost "lead astray" the very elect of God (Mt 24:24), so artful is he in his beguilings as he teaches us how to deceive ourselves (1Jo 1:8).

He was cast down to the earth ( $\varepsilon \beta \lambda \eta \theta \eta \varepsilon \varepsilon \varsigma \tau \eta \nu \gamma \eta v)$. Effective aorist repeated from the beginning of the verse. "The earth was no new sphere of Satan's working" (Swete).

Were cast down ( $\varepsilon \beta \lambda \eta \theta \eta \sigma \alpha v$ ). Triple use of the same verb applied to Satan's minions. The expulsion is complete.

Rev 12:10
A great voice saying ( $\varphi \omega v \eta \nu \mu \varepsilon \gamma \alpha \lambda \eta \nu \lambda \varepsilon \gamma \sigma \sigma \sigma \alpha v)$. Accusative after $\eta \kappa \circ v \sigma \alpha$ in this phrase as in $5: 11 ; 10: 4 ; 14: 2 ; 18: 4$, but the genitive $\varphi \omega v \eta \varsigma \lambda \varepsilon \gamma \sigma 0 \sigma \eta \varsigma$ in 11:12; 14:13. We are not told whence this voice or song comes, possibly from one of the twenty-four elders (Swete) or some other heavenly beings ( $11: 15$ ) who can sympathize with human beings ( $19: 10$ ), the martyrs in heaven (Charles).

Now is come ( $\alpha \rho \tau \varepsilon \gamma \varepsilon v \varepsilon \tau \sigma$ ). A $\rho \tau$ (Joh 13:33) shows how recent the downfall of Satan here proleptically pictured as behind us in time (aorist tense $\varepsilon$ ₹ยveto).

The salvation ( $\eta \sigma \omega \tau \eta \rho i \alpha)$. Here "the victory" as in 7:10; 19:1.
The power ( $\eta \delta$ vva $\mu \mathrm{L}$ ). Gods power over the dragon (cf. 7:12; 11:17; 19:1).
The kingdom ( $\eta \beta \alpha \sigma \lambda \lambda \varepsilon ı \alpha$ ). "The empire of God" as in 11:15.
The authority of his Christ ( $\eta$ ₹ $\xi_{0}$ ovia tov Xpıotov avtov). Which Christ received from the Father (Mt 28:18; Joh 17:2 ). See 11:15 (Ps 2:2) for "his Anointed."

The accuser (о кат $\eta \boldsymbol{\gamma} \rho$ ). The regular form, капп $\gamma о \rho о \varsigma$, occurs in Joh 8:10; Ac 23:30,35; 25:16,18 and in many MSS. here in Re 12:10, but A reads кaт $\eta \boldsymbol{\omega} \rho$, which Westcott and Hort accept. It was once considered a Greek transliteration of a Hebrew word, but Deissmann (Light, etc., p. 93f.) quotes it from a vernacular magical papyrus of the fourth century A.D. with no sign of Jewish or Christian influence, just as $\delta \iota \alpha \kappa \omega v$ appears as a vernacular form of סıaкovoc. Only here is the word applied to Satan in the N.T. In late Judaism Satan is the accuser, and Michael the defender, of the faithful.

Of our brethren ( $\tau \omega v \alpha \delta \varepsilon \lambda \varphi \omega \nu \eta \mu \omega v$ ). The saints still on earth battling with Satan and his devices.

Which accuseth them (o катп $\gamma$ оо $\omega v$ avtovs). Articular present active participle of катпүорє $\omega$, old verb, to accuse, usually with the genitive of the person (Joh 5:45), but here with the accusative. This is the devil's constant occupation (Job 1:6f. ).

Rev 12:11
They overcame him ( $\alpha \cup \tau о \quad \varepsilon v ı \kappa \eta \sigma \alpha v$ ). First aorist active indicative of $v$ ıк $\alpha \omega$, the verb used by Jesus of his own victory (Joh 16:33) and about him (Re 3:21; 5:5). "The victory of the martyrs marks the failure of Satan's endeavours" (Swete).

Because of the blood of the Lamb ( $\delta \iota \alpha$ то $\alpha \mu \alpha$ тоv $\alpha \rho v i o v$ ). As in 1:5; 5:6,9; 7:14. The blood of Christ is here presented by $\delta t a$ as the ground for the victory and not the means, as by $\varepsilon v$ in $1: 5 ; 5: 9$. Both ideas are true, but $\delta \iota \alpha$ with the accusative gives only the reason. The blood of Christ does cleanse us from $\sin$ (Joh 1:29; 1Jo 1:7). Christ conquered Satan, and so makes our victory possible (Lu 11:21f.; Heb 2:18). "Thus the Lamb is the true $\sigma v v \eta \gamma o \rho o s$ (like Michael) of the New Israel, its $\pi \alpha \rho \alpha \kappa \lambda \eta \tau о \varsigma \pi \rho о \varsigma ~ \tau о v ~ \pi а \tau \varepsilon \rho \alpha ~(1 J o ~ 2: 1) " ~(S w e t e) . ~ . ~$

Because of the Word of their testimony ( $\delta \iota \alpha$ тоv $\lambda о \gamma о \nu \tau \eta \varsigma \mu \alpha \rho \tau v \rho \iota \alpha \varsigma \alpha \cup \tau \omega v$ ). The same use of $\delta \iota \alpha$, "because of their testimony to Jesus" as in John's own case in 1:9. These martyrs have been true to their part.

They loved not their life even unto death (ovк $\eta \gamma \alpha \pi \eta \sigma \alpha \nu \tau \varepsilon \nu \psi v \chi \eta \nu \alpha \cup \tau \omega \nu$ axp Өavatov). First aorist active indicative of $\alpha \gamma \alpha \pi \alpha \omega$. They did resist "unto blood" ( $\mu \varepsilon \chi \rho ı \varsigma$ au $\mu$ aтoc Heb 12:4) and did not put their own lives before loyalty to Christ. There is a direct reference to the words of Jesus in Joh 12:25 as illustrated also in Mr 8:35; Mt 10:39; 16:25; Lu 9:24; 17:33. Paul's own example is pertinent (Ac 21:13; Php 1:20ff. ). Jesus himself had been "obedient unto death" (Php 2:8). These martyrs seem to be still alive on earth, but their heroism is proleptically pictured.

Rev 12:12
Therefore ( $\delta \iota \alpha$ тоито). "For this reason" as in 7:15; 18:8 ( 15 times in John's Gospel, Charles notes). It points back to verse 10.

Rejoice ( $\varepsilon \cup \varphi \rho \alpha \iota v \varepsilon \sigma \theta \varepsilon$ ). Present middle imperative of $\varepsilon \cup \varphi \rho a \iota v \omega$ as in 11:10; 18:20.
O heavens (o oupavo). Plural here alone in the Apocalypse, though common elsewhere in the N.T. Satan is no longer in the heavens.

They that dwell therein (o $\varepsilon v$ avtor $\sigma \kappa \eta v o u v \tau \varepsilon \varsigma)$. Present active articular participle of $\sigma \kappa \eta$ vow (see 7:15; 13:6) to dwell (tabernacle) as of Christ in Joh 1:14 and of God in Re 21:3. The inhabitants of heaven (angels and saints) have cause to rejoice, and earth reason to mourn.

Woe for the earth and for the sea (ova $\tau \eta \nu \gamma \eta v \kappa \alpha \tau \eta \nu \theta \alpha \lambda \alpha \sigma \sigma \alpha v$ ). The accusative after ova as in 8:13, but nominative in 18:10,16,19 in place of the usual dative (Mt 11:21; 18:7, etc.).

Is gone down $(\kappa \alpha \tau \varepsilon \beta \eta)$. Second aorist (effective) active indicative of $\kappa \alpha \tau \alpha \beta \alpha \iota v \omega$, "did go down."

But a short time (o入ıүov кaı $\rho \circ$ ). Accusative of extent of time, "a little time." The devil's departure from his warfare in the heavens reveals ( $\varepsilon \iota \delta \omega \varsigma$, knowing, perfect active participle) to him that his time for doing harm to men is limited, and hence his great wrath ( $\theta \cup \mu \mathrm{ov}$, boiling rage).

Rev 12:13
He persecuted $(\varepsilon \delta \iota \omega \xi \varepsilon v)$. First aorist active participle of $\delta \iota \omega \kappa \omega$, to pursue, to chase, hostile pursuit here as in Mt 5:10f.; 10:23, etc. John now, after the "voice" in 10-13, returns to the narrative in verse 9 . The child was caught away in verse 5 , and now the woman (the true Israel on earth) is given deadly persecution. Perhaps events since A.D. 64 (burning of Rome by Nero) amply illustrated this vision, and they still do so.

Which ( $\eta \tau \iota \varsigma)$. "Which very one."
Rev 12:14
There were given $(\varepsilon \delta \delta \theta \eta \sigma \alpha \nu)$. As in $8: 2 ; 9: 1,3$.
The two wings of the great eagle ( $\alpha \delta v o \pi \tau \varepsilon \rho v \gamma \varepsilon \varsigma \tau о v \alpha \varepsilon \tau o v \tau o v \mu \varepsilon \gamma \alpha \lambda o v$ ). Not the eagle of $8: 13$, but the generic use of the article. Every eagle had two wings. Probably here, as in Mt 24:28, the griffon or vulture rather than the true eagle is pictured. For the eagle in the O.T. see Ex 19:4; Isa 40:31; Job 9:26; Pr 24:54.

That she might fly ( $\imath \alpha \alpha \varepsilon \tau \eta \tau \alpha$ ). Purpose clause with $\iota v \alpha$ and present middle subjunctive of $\pi \varepsilon \tau о \mu \alpha$, old verb, to fly, in N.T. only in the Apocalypse ( $4: 7 ; 8: 13 ; 12: 14 ; 14: 6 ; 19: 17$ ). Resumption of the details in verse 6 (which see) about the "wilderness," her "place," the re-
 1260 days, but with $\tau \rho \varepsilon \varphi \varepsilon \tau \alpha$ (present passive indicative) instead of $\tau \rho \varepsilon \varphi \omega \sigma \iota v$ (general plural of the present active subjunctive), and with the addition of "from the face of the serpent" ( $\alpha \pi \sigma \pi \rho \circ \sigma \omega \pi \sigma v$ тоv $о \varphi \varepsilon \omega \varsigma$ ), because the serpent rules the earth for that period. "To the end of the present order the Church dwells in the wilderness" (Swete), and yet we must carry on for Christ.

Rev 12:15
Water as a flood ( $v \delta \omega \rho \omega \varsigma \pi \sigma \tau \alpha \mu \circ v$ ). "Water as a river," accusative case after $\varepsilon \beta \alpha \lambda \varepsilon v$ (cast). The serpent could not follow the woman or stop her flight and so sought to drown her.

That he might cause her to be carried away by the stream ( $\downarrow \alpha \alpha v \tau \eta \nu \pi о \tau \alpha \mu о \varphi о \rho \eta \tau о v$ $\pi o ı \eta \sigma \eta)$. Purpose clause with $\imath v a$ and the first aorist active subjunctive of $\pi \sigma \varepsilon \omega$. For this use of $\pi о \iota \varepsilon \omega$ see 17:16. This compound verbal $\pi о \tau \alpha \mu о \varphi о \rho \eta \tau о v$ in the predicate accusative ( $\pi о \tau \alpha \mu \circ \varsigma$, river, $\varphi о \rho \eta \tau о v$ from $\varphi о \rho \varepsilon \omega$, to bear) was not coined by John, but occurs in a papyrus of B.C. 110 and in several others after N.T. times. It means simply "carried away by the river."

Rev 12:16
Helped the woman ( $\varepsilon \beta \circ \eta \theta \eta \sigma \varepsilon \nu \tau \eta \gamma \cup v a i k)$. First aorist active indicative of $\beta \circ \eta \theta \varepsilon \omega$, old verb with the dative as in Heb 2:18, which see. Herodotus tells of the Lycus disappearing underground near Colossae. But this vivid symbol is not dependent on historical examples.

Swallowed up (катє $\pi\llcorner\varepsilon v$ ). Second aorist active indicative of $\kappa \alpha \tau \alpha \pi \iota v \omega$, literally "drank down."

Rev 12:17
Waxed wroth ( $\omega \rho \gamma \iota \sigma \eta \eta$ ). First aorist (ingressive) passive indicative of opyı $\zeta$ о $\alpha$, , "became angry."

With the woman ( $\varepsilon \pi \tau \eta \gamma \cup v a i k)$. "At the woman," "because of the woman."
Went away ( $\alpha \pi \eta \lambda \theta \varepsilon v$ ). "Went off" in his rage to make war with the scattered followers of the Lamb not in the wilderness, perhaps an allusion to Ge 3:15. The devil carries on relentless war with all those "which keep the commandments of God and hold the testimony of Jesus" ( $\tau \omega \nu \tau \eta \rho \circ 0 \nu \tau \omega \nu \tau \alpha \varsigma \varepsilon \nu \tau 0 \lambda \alpha \varsigma ~ \tau o v ~ \theta \varepsilon o v ~ к \alpha ~ \varepsilon \chi о \nu \tau \omega \nu \tau \eta \nu \mu \alpha \rho \tau \nu \rho ı \alpha \nu$ I I $\sigma o v)$. These two marks excite the wrath of the devil then and always. Cf. 1:9; 6:9; 14:12; 19:10; $20: 4$.

## Revelation 13

Rev 13:1
He stood ( $\varepsilon \sigma \tau \alpha \theta \eta$ ). First aorist passive indicative of $\iota \sigma \tau \eta \mu$ (intransitive), as in 8:3. "He stopped" on his way to war with the rest of the woman's seed. P Q read here $\varepsilon \sigma \tau \alpha \theta \eta \nu$ (I stood) when it has to be connected with chapter Re 13 .

Upon the sand ( $\varepsilon \pi \tau \eta \nu \alpha \mu \mu \circ v$ ). The accusative case as in 7:1; $8: 3$, etc. A $\mu \mu \circ \varsigma$ is an old word for sand, for innumerable multitude in 20:8.

Out of the sea ( $\varepsilon \kappa \tau \eta \varsigma ~ \theta a \lambda \alpha \sigma \sigma \eta \varsigma)$. See 11:7 for "the beast coming up out of the abyss." The imagery comes from Da 7:3 . See also Re 17:8 . This "wild beast from the sea," as in Da 7:17,23 , is a vast empire used in the interest of brute force. This beast, like the dragon ( 12:3), has ten horns and seven heads, but the horns are crowned, not the heads. The Roman Empire seems to be meant here (17:9,12). On "diadems" ( $\delta \iota \alpha \delta \eta \mu \alpha \tau \alpha)$ see 12:3, only ten here, not seven as there.

Names of blasphemy (оvо $\alpha \alpha \tau \alpha \beta \alpha \sigma \varphi \eta \mu \alpha$ ). See 17:3 for this same phrase. The meaning is made plain by the blasphemous titles assumed by the Roman emperors in the first and second centuries, as shown by the inscriptions in Ephesus, which have $\theta$ ros constantly applied to them.

Rev 13:2
Like unto a leopard (ouotov $\pi \alpha \rho \delta \alpha \lambda \varepsilon$ ). Associative-instrumental case of $\pi \alpha \rho \delta \alpha \lambda \iota \varsigma$, old word for panther, leopard, here only in N.T. The leopard ( $\lambda \varepsilon 0, \pi \alpha \rho \delta$ ) was considered a cross between a panther and a lioness.

As the feet of a bear ( $\omega \varsigma \alpha \rho \kappa о v$ ). Old word, also spelled $\alpha \rho \kappa \tau о \varsigma$, here only in N.T. From Da 7:4. No word in the Greek for "feet" before "bear."

As the mouth of a lion ( $\omega \varsigma \sigma \tau \circ \mu \alpha \lambda \varepsilon \sigma v \tau o \varsigma)$. From Da 7:4. This beast combines features of the first three beasts in Da 7:2f. . The strength and brutality of the Babylonian, Median, and Persian empires appeared in the Roman Empire. The catlike vigilance of the leopard, the slow and crushing power of the bear, and the roar of the lion were all familiar features to the shepherds in Palestine (Swete).

The dragon gave him ( $\varepsilon \delta \omega \kappa \varepsilon v \alpha v \tau \omega$ o $\delta \rho \alpha \kappa \omega v$ ). First aorist active indicative of $\delta \iota \delta \omega \mu$ (to give) and dative case $\alpha \nu \tau \omega$ (the beast). The dragon works through this beast. The beast is simply Satan's agent. Satan claimed this power to Christ (Mt 4:9; Lu 4:6) and Christ called Satan the prince of this world (Joh 12:31; 14:30; 16:11). So the war is on.

Rev 13:3
And I saw ( $\kappa \alpha$ ). No verb ( $\varepsilon$ ( $\delta \circ v$ ) in the old MSS., but clearly understood from verse 2.
As though it had been smitten ( $\omega \varsigma \varepsilon \sigma \varphi \alpha \gamma \mu \varepsilon \nu \eta \nu$ ). Perfect passive participle of $\sigma \varphi \alpha \zeta \omega$, as in 5:6, accusative singular agreeing with $\mu \alpha v$ (one of the heads), object of $\varepsilon \iota \delta o v$ understood,
"as though slain" (so the word means in seven other instances in the book). There is a reference to the death and new life of the Lamb in 5:6.

And his death-stroke was healed ( $\kappa \alpha \eta \pi \lambda \eta \gamma \eta$ avtov $\varepsilon \theta \varepsilon \rho \alpha \pi \varepsilon v \theta \eta$ ). First aorist passive indicative of $\theta \varepsilon \rho \alpha \pi \varepsilon v \omega$. "The stroke of death" (that led to death). Apparently refers to the death of Nero in June 68 A.D. by his own hand. But after his death pretenders arose claiming to be Nero redivivus even as late as 89 (Tacitus, Hist. i. 78, ii. 8, etc.). John seems to regard Domitian as Nero over again in the persecutions carried on by him. The distinction is not always preserved between the beast (Roman Empire) and the seven heads (emperors), but in 17:10 the beast survives the loss of five heads. Here it is the death-of one head, while in verses 12,14 the beast himself receives a mortal wound.

Wondered after the beast ( $\varepsilon \theta \alpha \nu \mu \alpha \sigma \theta \eta$ опı $\sigma \omega$ tov $\theta \eta \rho \iota ⿱ v)$. First aorist passive (deponent) indicative of $\theta \alpha \nu \mu \alpha \zeta \omega$, to wonder at, to admire, as in 17:8. For this pregnant use of o $\pi \iota \sigma \omega$ see Joh 12:9; Ac 5:37; 20:30; 1Ti 5:15 . "All the earth wondered at and followed after the beast," that is Antichrist as represented by Domitian as Nero redivivus. But Charles champions the view that Caligula, not Nero, is the head that received the death-stroke and recovered and set up statues of himself for worship, even trying to do it in Jerusalem.

Rev 13:4
They worshipped the dragon ( $\pi \rho о \sigma \varepsilon \kappa \nu \nu \eta \sigma \alpha \nu \tau \omega \delta \rho \alpha \kappa о \nu \tau)$. First aorist active indicative of $\pi \rho о \sigma \kappa \nu v \varepsilon \omega$, with dative case $\delta \rho \alpha \kappa о \nu \tau$ (from $\delta \rho \alpha \kappa \omega v$ ). They really worshipped Satan (the dragon) when "they worshipped the beast" ( $\pi \rho о \sigma \varepsilon \kappa \nu v \eta \sigma \alpha \nu \tau \omega \theta \eta \rho I \omega$ ) or any one of the heads (like Caligula, Nero, Domitian) of the beast. The beast is merely the tool of the devil for worship. Recall the fact that the devil even proposed that Jesus worship him. Emperorworship, like all idolatry, was devil-worship. The same thing is true today about self-worship (humanism or any other form of it).

Who is like unto the beast? ( $\tau \iota \varsigma$ о $о о \iota \varsigma ~ \tau \omega \theta \eta \rho \iota \omega ;$ ). Associative-instrumental case after oноoг. An echo, perhaps parody, of like language about God in Ex 15:11; Ps 35:10; 113:5. "The worship of such a monster as Nero was indeed a travesty of the worship of God" (Swete).

And who is able to war with him? ( $\kappa \alpha \tau \iota \varsigma \delta u v \alpha \tau \alpha \pi о \lambda \varepsilon \mu \eta \sigma \alpha \mu \varepsilon \tau^{\prime}$ avtov;). Worship of the devil and the devil's agent is justified purely on the ground of brute force. It is the doctrine of Nietzsche that might makes right.

Rev 13:5
There was given to him ( $\varepsilon \delta 0 \theta \eta \alpha \nu \tau \omega$ ). First aorist passive indicative of $\delta \delta \delta \omega \mu$, to give, as in next line and verse 7 . Perhaps a reference to $\varepsilon \delta \omega \kappa \varepsilon v$ (he gave) in verse 4 , where the dragon (Satan) gave the beast his power. The ultimate source of power is God, but the reference seems to be Satan here.

Speaking great things and blasphemies ( $\lambda \alpha \lambda о \nu v \mu \varepsilon \gamma \alpha \lambda \alpha \kappa \alpha \beta \lambda \alpha \sigma \varphi \eta \mu \alpha \varsigma)$. Present active participle of $\lambda \alpha \lambda \varepsilon \omega$, agreeing with $\sigma \tau o \mu \alpha$ (nominative neuter singular and subject of
$\varepsilon \delta o \theta \eta$ ）．The words are like Daniel＇s description of the Little Horn（7：8，20，25）and like the description of Antiochus Epiphanes（I Macc．1：24）．Cf．2Pe 2：11 ．

To continue（ $\pi о \neq \sigma \alpha$ ）．First aorist active infinitive（epexegetic use）of $\pi 0 เ \varepsilon \omega$ ，either in the sense of working（signs），as in Da 8：12－14，with the accusative of duration of time（ $\mu \eta v a c$, months），or more likely in the sense of doing time，with $\mu \eta$ vac as the direct object as in Mt 20：12；Ac 20：3；Jas 4：13．

Rev 13：6
For blasphemies（ $\varepsilon \varsigma \varsigma \lambda \alpha \sigma \varphi \eta \mu \mu \varsigma)$ ．＂For the purpose of blasphemies．＂
Against God（ $\pi \rho \circ \varsigma \operatorname{tov} \theta \varepsilon o v$ ）．＂Face to face with God＂in sheer defiance，like Milton＇s picture of Satan in Paradise Lost．See Da 7：25；8：10．The aorist $\eta v o l \xi \varepsilon v$ is probably constative， for he repeated the blasphemies，though the phrase（ $\alpha v o t \gamma \omega$ to stoma，to open the mouth） is normally ingressive of the beginning of an utterance（Mt 5：2；Ac 8：35）．This verse explains verse 5 ．The Roman emperors blasphemously assumed divine names in public documents． They directed their blasphemy against heaven itself（＂his tabernacle，＂$\tau \eta \nu \sigma \kappa \eta \nu \eta \nu$ avtov， $7: 15 ; 12: 12 ; 21: 3$ ）and against＂them that dwell in the heaven＂（ $\tau$ ouc $\varepsilon \nu \tau \omega$ oupav $\omega$ $\sigma \kappa \eta v o u v \tau a \varsigma)$ ，the same phrase of 12：12（either angels or the redeemed or both）．

Rev 13：7
To make war with the saints and to overcome them（ $\pi \circ \sqcap \eta \sigma \alpha \pi о \lambda \varepsilon \mu \circ v \mu \varepsilon \tau \alpha \tau \omega \nu \alpha \gamma \omega \nu$ $\kappa \alpha$ vıк $\sigma \sigma \alpha \cup \tau о \cup \varsigma)$ ．This clause with two epexegetical first aorist active infinitives（ $\pi о \lambda \varepsilon \mu \eta \sigma \alpha$ and $\nu$ เк $\eta \sigma \alpha$ ）is omitted in A C P，but probably by ouовот $\lambda \varepsilon \cup \tau \tau v$（like ending）because of the repetition of $\varepsilon \delta o \theta \eta$ ．The words seem to come from Da $7: 21,23$ ．There was no escape from the beast＇s rule in the Mediterranean world．See 5：9 for the phrases here used，there for praise to the Lamb．

Rev 13：8
Shall worship him（ $\pi \rho о \sigma \kappa \cup v \eta \sigma o v \sigma เ v ~ \alpha u \tau o v)$ ）．Future active of $\pi \rho о \sigma \kappa \nu v \varepsilon \omega$ with the ac－ cusative here as some MSS．in 13：4（ $\tau$ o $\theta \eta \rho \circ$ юv），both constructions in this book．

Whose（ov－－avtou）．Redundant use of genitive autou（his）with ov（whose）as common in this book，and singular instead of plural $\omega v$ with antecedent $\pi \alpha v \tau \varepsilon \varsigma$（all，plural），thus calling attention to the responsibility of the individual in emperor－worship．

Hath not been written（ $o v \gamma \varepsilon \gamma \rho \alpha \pi \tau \alpha$ ）．Perfect passive indicative of $\gamma \rho \alpha \varphi \omega$ ，permanent state，stands written．

In the book of life of the Lamb（ $\varepsilon v \tau \omega \beta \iota \beta \lambda \iota \omega \tau \eta \varsigma \zeta \omega \eta \varsigma$ tov $\alpha \rho v \circ o v$ ）．See 3：5 for this phrase and the O．T．references．It occurs again in 17：8；20：12，15；21：27．＂Here and in 21：27， the Divine Register is represented as belonging to＇the Lamb that was slain＂＇（Swete）．

That hath been slain from the foundation of the world（ $\tau \circ v \varepsilon \sigma \varphi \alpha \gamma \mu \varepsilon v o v$（for which see 5：6）ало катаßо入ŋऽ кобноv）．For the phrase ало катаßо入ŋऽ коб $\mu$ оv（not in the LXX） there are six other N．T．uses（Mt 13：35 without коб $\mu$ ov；25：34；Lu 11：50；Heb 4：3；9：26；Re 17：8），and for $\pi \rho о$ катаßо入ŋऽ коб $\mu$ оv three（Joh 17：24；Eph 1：4；1Pe 1：20）．It is doubtful
here whether it is to be taken with $\tau \operatorname{\tau ov} \varepsilon \sigma \varphi a \gamma \mu \varepsilon v o v(c f .1 \mathrm{Pe} 1: 20$ ) or with $\gamma \varepsilon \gamma \rho \alpha \pi \tau \alpha$ as in $\operatorname{Re} 17: 8$. Either makes sense, and here the most natural use is with $\varepsilon \sigma \varphi \alpha \gamma \mu \varepsilon v o v$. At any rate the death of Christ lies in the purpose of God, as in Joh 3:16.

Rev 13:9
If any one hath an ear ( $\varepsilon \tau \iota \varsigma \varepsilon \chi \varepsilon$ ouc). Condition of first class, repetition of the saying in 2:7,11,17,29, etc.

Rev 13:10
If any man is for captivity ( $\varepsilon \tau \iota \varsigma \varepsilon \iota \varsigma \alpha \not \propto \mu \lambda \lambda \omega \sigma \iota \alpha v$ ). Condition of first class, but with no copula ( $\varepsilon \sigma \tau \iota v$ ) expressed. For $\alpha ı \chi \mu \alpha \lambda \omega \sigma \iota \alpha v$ (from $\alpha ı \chi \mu \alpha \lambda \omega \tau$ т captive) see Eph $4: 8$, only other N.T. example. Apparently John means this as a warning to the Christians not to resist force with force, but to accept captivity as he had done as a means of grace. Cf. Jer 15:2 . The text is not certain, however.

If any man shall kill with the sword ( $\varepsilon \tau \iota \varsigma \varepsilon v \mu \alpha \chi \alpha \iota \rho \eta \pi \pi \kappa \tau \varepsilon \nu \varepsilon)$. First-class condition with future active of $\alpha \pi о \kappa \tau \varepsilon เ v \omega$, not future passive, for it is a picture of the persecutor drawn here like that by Jesus in Mt 26:52 .

Must he be killed ( $\delta \varepsilon \alpha v \tau о v \varepsilon v \mu \alpha \chi \alpha \iota \rho \eta$ алоктаv $\theta \eta v \alpha$ ). First aorist passive infinitive of $\alpha \pi о \kappa \tau \varepsilon เ v \omega$. The inevitable conclusion ( $\delta \varepsilon$ ) of such conduct. The killer is killed.

Here ( $\omega \delta \varepsilon$ ). In this attitude of submission to the inevitable. For $\omega \delta \varepsilon$ see 13:18; 14:12; 17:9 . "Faith" ( $\pi \iota \sigma \tau \iota \varsigma)$ here is more like faithfulness, fidelity.

Rev 13:11
 ferent beast).

Out of the earth ( $\varepsilon \kappa \tau \eta \varsigma \gamma \eta \varsigma$ ). Not "out of the sea" as the first (verse 1), perhaps locating him in Asia Minor without world-wide scope, but plainly the agent of the first beast and so of the dragon.

He had ( $\varepsilon<\varepsilon \varepsilon v$ ). Imperfect active of $\varepsilon \chi \omega$. Only two horns (not ten like the first, verse 1).
Like unto a lamb (ouot $\alpha \rho v i \omega)$. Usual construction. Only the two horns of a young lamb and without the ferocity of the other beast, but "he spake as a dragon" ( $\varepsilon \lambda \alpha \lambda \varepsilon \omega \varsigma$ $\delta \rho a \kappa \omega v)$. Gunkel and Charles confess their inability to make anything out of this item. But Swete thinks that he had the roar of a dragon with all the looks of a lamb (weakness and innocence). Cf. the wolves in sheep's clothing (Mt 7:15).

Rev 13:12
He exerciseth ( $\pi \circ \imath \varepsilon$ ). Present active dramatic present of $\pi o เ \varepsilon \omega$. In his sight ( $\varepsilon v \omega \pi \iota \circ v$ avtov). In the eye of the first beast who gets his authority from the dragon ( 13:2). The second beast carries on the succession of authority from the dragon and the first beast. It has been a common Protestant interpretation since the Reformation of Luther to see in the first beast Pagan Rome and in the second beast Papal Rome. There is undoubted verisimilitude in this interpretation, but it is more than doubtful if any such view comes within the
horizon of the imagery here. Ramsay takes the first beast to be the power of imperial Rome and the second beast to be the provincial power which imitated Rome in the persecutions.
 with ıva after $\pi$ or seen in Joh 11:37; Col 4:16; Re 3:9, usually with the subjunctive, but here with the future indicative as in $3: 9$. Note the accusative after $\pi \rho \circ \sigma \kappa \nu v \varepsilon \omega$ as in verse 8 . Here the death-stroke of one of the heads (verse 3 ) is ascribed to the beast. Clearly the delegated authority of the provincial priests of the emperor-worship is rigorously enforced, if this is the correct interpretation.

Rev 13:13
That he should even make fire come down out of heaven (ıvа ка тир тоџ єк тои oupavov kataßaıveıv). Purpose clause again with $t v a$ and the present active subjunctive of $\pi о เ \varepsilon \omega$ and the object infinitive of катаßaıv $\omega$ after $\pi o \iota \varepsilon$. Christ promised great signs to the disciples (Joh 14:12 ), but he also warned them against false prophets and false christs with their signs and wonders ( Mr 13:22). So also Paul had pictured the power of the man of sin (2Th 2:9). Elijah had called down fire from heaven (1Ki 18:38; 2Ki 1:10) and James and John had once even urged Jesus to do this miracle (Lu 9:54).

Rev 13:14
And he deceiveth ( $\kappa \alpha \pi \lambda \alpha v \alpha$ ). Present active (dramatic) indicative of $\pi \lambda \alpha v \alpha \omega$, the very thing that Jesus had said would happen (Mt 24:24 , "So as to lead astray" $\omega \sigma \tau \varepsilon \pi \lambda \alpha v a \sigma \theta a$, the word used here, if possible the very elect). It is a constant cause for wonder, the gullibility of the public at the hands of new charlatans who continually bob up with their pipe-dreams.

That they should make an image to the beast ( $\pi \circ \sqcap \sigma \sigma \alpha \varepsilon \kappa \circ v \alpha \tau \omega$ $\theta \eta \rho \omega \omega$ ). Indirect command (this first aorist active infinitive of $\pi o \iota \varepsilon \omega$ ) after $\lambda \varepsilon \gamma \omega v$ as in Ac 21:21, not indirect assertion. This "image" ( $\varepsilon เ \kappa \omega v$, for which word see Mt 22:20; Col 1:15) of the emperor could be his head upon a coin (Mr 12:16) , an imago painted or woven upon a standard, a bust in metal or stone, a statue, anything that people could be asked to bow down before and worship. This test the priests in the provinces pressed as it was done in Rome itself. The phrase "the image of the beast," occurs ten times in this book (13:14,15 ter; 14:9,11; 15:2; 16:2; 19:20; 20:4 ). Emperor-worship is the issue and that involves worship of the devil.

The stroke of the sword ( $\tau \eta \nu \pi \lambda \eta \gamma \eta \nu \tau \eta \varsigma \mu \alpha \chi a \downarrow \rho \eta \varsigma)$. This language can refer to the death of Nero by his own sword.

And lived (ка $\varepsilon \zeta \eta \sigma \varepsilon v)$ ). "And he came to life" (ingressive first aorist active indicative of $\zeta \alpha \omega)$. Perhaps a reference to Domitian as a second Nero in his persecution of Christians.

Rev 13:15
To give breath to it ( $\delta o u v \alpha \pi v \varepsilon v \mu \alpha \alpha v \tau \eta$ ). This second beast, probably a system like the first (not a mere person), was endowed with the power to work magical tricks, as was true of Simon Magus and Apollonius of Tyana and many workers of legerdemain since.
$\Pi \nu \varepsilon v \mu \alpha$ here has its original meaning of breath or wind like $\pi \nu \varepsilon v \mu \alpha \zeta \omega \eta \varsigma$ (breath of life) in 11:11.

Even to the image ( $\tau \eta \varepsilon \iota \kappa \circ v$ ). No "even" in the Greek, just apposition with $\alpha v \tau \eta$ (her).
That should both speak and cause (ı $\imath \alpha \kappa \alpha \lambda \alpha \lambda \eta \sigma \eta \kappa \alpha \pi о \imath \sigma \eta)$. Final clause with $\imath v \alpha$ and the first aorist active subjunctive of $\lambda \alpha \lambda \varepsilon \omega$ and $\pi o t \varepsilon \omega$. Ventriloquism like that in Ac 16:16 .

That should be killed (ıva $\alpha \pi о \kappa \tau \alpha \nu \theta \omega \sigma \iota v$ ). Sub-final clause with $\mathrm{v} \alpha \alpha$ and the first aorist passive subjunctive of $\alpha \pi о \kappa \tau \varepsilon เ v \omega$, after $\pi о \iota \eta \sigma \eta$, as in verse 12 (future indicative).

As many as should not worship ( $о \sigma о \varepsilon \alpha v \mu \eta \pi \rho о \sigma \kappa v \nu \eta \sigma \omega \sigma \tau v$ ). Indefinite relative clause with modal $\varepsilon \alpha v(=\alpha v)$ and the first aorist active subjunctive of $\pi \rho \circ \sigma \kappa v v \varepsilon \omega$ with the accusative $\tau \eta \nu$ вıкоva (some MSS. the dative). Note the triple use of "the image of the beast" in this sentence. "That refusal to worship the image of the emperor carried with it capital punishment in Trajan's time is clear from Pliny's letter to Trajan (X. 96)" (Charles).

Rev 13:16
He causeth all (same use of $\pi 0 เ \varepsilon \hat{A} \omega$ as in 12,15 ). Note article here with each class (the small and the great, etc.).

That there be given them (ıv $\delta \omega \sigma \iota v \alpha v \tau o ı$ ). Same use of $\imath v \alpha$ after $\pi \circ \iota \varepsilon \omega$ as in 12,15 , only here with indefinite plural $\delta \omega \sigma \iota \nu$ (second aorist active subjunctive), "that they give themselves," as in 10:11; 12:6; 16:15 .

A mark $(\chi \alpha \rho \alpha \gamma \mu \alpha)$. Old word from $\chi \alpha \rho \alpha \sigma \sigma \omega$, to engrave, in Ac 17:29 of idolatrous images, but in Rev. (Re 13:16,17; 14:9,11; 16:2; 19:20; 20:4) of the brand of the beast on the right hand or on the forehead or on both. Deissmann (Bible Studies, pp. 240ff.) shows that in the papyri official business documents often have the name and image of the emperor, with the date as the official stamp or seal and with $\chi \alpha \rho \alpha \gamma \mu \alpha$ as the name of this seal. Animals and slaves were often branded with the owner's name, as Paul (Ga 6:17) bore the stigmata of Christ. Ptolemy Philadelphus compelled some Alexandrian Jews to receive the mark of Dionysus as his devotees (III Macc. 3:29). The servants of God receive on their foreheads the stamp of the divine seal ( $\operatorname{Re} 7: 3$ ). Charles is certain that John gets his metaphor from the $\tau \varepsilon \varphi \iota \lambda \lambda \iota \nu$ (phylacteries) which the Jew wore on his left hand and on his forehead. At any rate, this "mark of the beast" was necessary for life and all social and business relations. On the right hand, that is in plain sight.

Upon their forehead ( $\varepsilon \pi \tau 0 \mu \varepsilon \tau \omega \pi \sigma v \alpha v \tau \omega \nu$ ). Accusative with $\varepsilon \pi$, though genitive just before with $\chi \varepsilon \rho \rho \circ \varsigma$ (hand). See already 7:3; 9:4 (genitive $\varepsilon \pi \tau \omega \nu \mu \varepsilon \tau \omega \pi \omega \nu$ ). Only in the Apocalypse in N.T.

Rev 13:17
That no man should be able to buy or to sell ( $\imath \alpha \alpha \mu \eta \tau \iota \varsigma \delta \nu \nu \eta \tau \alpha \alpha \gamma \rho \rho \alpha \sigma \alpha \eta \pi \omega \lambda \eta \sigma \alpha$ ). Final clause with $\imath v \alpha$ and present middle subjunctive of $\delta v v \alpha \mu \alpha$ with aorist active infinitives.

This is a regular boycott (Ramsay, Seven Letters, p. 106f.) against all not worshippers of the emperor.

Save $(\varepsilon \mu \eta)$. "If not," "except."
Even the name ( $\tau 0$ ovo $\mu \alpha$ ). No "even," just apposition with $\chi \alpha \rho \alpha \gamma \mu \alpha$ (the mark).
Or the number ( $\eta$ रov $\alpha \rho(\theta \mu \circ v$ ). The stamp (the mark) may bear either the name or the number of the beast. The name and the number are one and the same. They could write the name in numerals, for numbers were given by letters. Swete suggests that it was "according to a sort of $\gamma \varepsilon \mu \alpha \tau \rho ⿺ \alpha$ known to the Apocalyptist and his Asian readers, but not generally intelligible."

Rev 13:18
Here is wisdom ( $\omega \delta \varepsilon \eta \sigma 0 \varphi \iota \alpha$ ). The puzzle that follows as in 17:9. See Eph 1:17 for "a spirit of wisdom and of understanding."

He that understands (o $\varepsilon \chi \omega \vee v o v v$ ). "The one having intelligence" in such matters. Cf. the adverb vouve $\chi \omega$ (discreetly) in Mr 12:34.

Let him count ( $\psi \eta \varphi \mid \sigma \alpha \tau \omega$ ). First active imperative of $\psi \eta \varphi \iota \zeta \omega$, old verb (from $\psi \eta \varphi \circ \varsigma$ pebble), to count, in N.T. only here and Lu 14:28.

The number of a man ( $\alpha \rho i \theta \mu \circ \varsigma \alpha v \theta \rho \omega \pi \sigma v$ ). "A man's number." But what man and what name?
 616 instead of 666 . All sorts of solutions are offered for this conundrum. Charles is satisfied with the Hebrew letters for Nero Caesar, which give 666, and with the Latin form of Nero (without the final $n$ ), which makes 616 . Surely this is ingenious and it may be correct. But who can really tell?

## Revelation 14

Rev 14:1
The Lamb ( $\tau 0 \alpha \rho v i o v$ ). See $5: 6 ; 7: 17 ; 12: 11 ; 13: 8$ and is in contrast with the anarthrous $\alpha \rho v i o v$ in 13:11. This proleptic vision of the Lamb "standing on the mount Zion" ( $\varepsilon \sigma \tau \circ \varsigma \varepsilon \pi$ то opoc $\Sigma \mathrm{t} \omega \nu$, second perfect active participle neuter of $\iota \sigma \tau \eta \mu$ with $\varepsilon \pi$ and accusative) is reasoning after the visions of the two beasts. Mount Zion is the site of the new city of God (Heb 12:22 ), the Jerusalem above (Ga 4:26), the seat of the Messianic Kingdom whether heaven or the new earth ( $\operatorname{Re} 21 ; 22$ ). These victors have the name of the Lamb and God upon their foreheads as in $3: 12 ; 22: 4$, in place of the mark of the beast above $(13: 16 ; 14: 11$ ). This seal protects them (9:4).

A hundred and forty and four thousand ( $\varepsilon \kappa \alpha \tau о \nu \tau \varepsilon \sigma \sigma \varepsilon \rho \alpha \kappa о \nu \tau \alpha \tau \varepsilon \sigma \sigma \alpha \rho \varepsilon \varsigma \chi \iota \lambda \iota \alpha \delta \varepsilon \varsigma)$. "Thousands" literally ( $\chi \iota \lambda \iota a \varsigma$ feminine word for a thousand and so $\varepsilon \chi \circ v \sigma a$ feminine plural). For the 144,000 see $7: 5,8$, though some scholars seek a distinction somehow.

Rev 14:2
As a voice of many waters ( $\omega \varsigma \varphi \omega \nu \eta \nu \nu \delta \alpha \tau \omega \nu \pi \sigma \lambda \lambda \omega \nu$ ). For which see 1:15.
Of a great thunder ( $\beta \rho \circ \nu \tau \eta \varsigma \mu \varepsilon \gamma \alpha \lambda \eta \varsigma$ ). For which see 6:1; 19:6. For this voice out of heaven see $10: 4 ; 14: 15 ; 18: 4$ and note accusative with $\eta \kappa \sigma v \sigma \alpha$.

As the voice of harpers harping with their harps ( $\omega \varsigma \kappa \iota \theta \alpha \rho \omega \iota \delta \omega \nu \kappa \iota \theta \alpha \rho \iota \zeta \nu \tau \omega \nu \varepsilon \nu$ $\tau \alpha ı \varsigma ~ \kappa ı \theta \alpha \rho \alpha ı \varsigma ~ \alpha v \tau \omega v$ ). Triple use of кı $\theta \alpha \rho \alpha$ ( 5:8), кı $\theta \alpha \rho \omega \iota \delta \omega \nu$ ( 18:22), кı $\theta \alpha \rho \iota \zeta о \nu \tau \omega \nu$ (old verb кıӨapıち $\omega$, in N.T. only here and 1Co 14:7). Wonderful melody in this chorus by the angels, not by the 144,000 .

Rev 14:3
They sing as it were a new song ( $\alpha \iota \delta o v \sigma \iota \nu \omega \varsigma \omega \iota \delta \eta \nu \kappa \alpha \iota \eta \eta \nu$ ). See 5:9 for this phrase (cognate accusative) save that here $\omega \varsigma$ (as if) is added. There the new song was sung by the four living creatures and the elders, but here "before" ( $\varepsilon \nu \omega \pi \iota \circ v$ ) them and so apparently by the throng who were themselves redeemed by the Lamb.

No man could learn the song save (ov $\delta \varepsilon ı \varsigma \varepsilon \delta v \alpha \tau o \mu \alpha \theta \varepsilon ı \nu \tau \eta v \omega i \delta \eta v \varepsilon \mu \eta$ ). Imperfect ( $\varepsilon \delta v v a \tau o)$ of $\delta u v a \mu \alpha$ and second aorist (ingressive) active infinitive of $\mu \alpha v \theta \alpha \nu \omega$. In 5:9-12 the angels join in the song. In 15:3 it is the Song of Moses and the Lamb.

Even they that had been purchased out of the earth (o $\eta \gamma \circ \rho \alpha \sigma \mu \varepsilon \nu o \alpha \pi o \tau \eta \varsigma \gamma \eta \varsigma)$. Perfect passive articular participle of $\alpha \gamma 0 \rho \alpha \zeta \omega$, purchased by the blood of the Lamb (5:9), masculine plural in apposition with $\chi \iota \lambda \iota a \delta \varepsilon \varsigma$ (thousands) feminine plural (7:5,8; 14:1). А $л о$ (from) here, though $\varepsilon \kappa$ (out of) in 5:9. The 144,000 are not yet separated from the earth (Joh 17:15 ). Whether the 144,000 here are identical with that number in 7:4-8 or not, they must embrace both men and women.

Rev 14:4

Were not defiled with women ( $\mu \varepsilon \tau \alpha \gamma \cup v \alpha \_\kappa \omega v$ о $о \kappa \varepsilon \mu \circ \lambda \nu v \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\mu \mathrm{o} \lambda \nu v \omega$, old verb, to stain, already in $3: 4$, which see. The use of this word rules out marriage, which was not considered sinful.
 women. Swete takes this language "metaphorically, as the symbolical character of the Book suggests." Charles considers it an interpolation in the interest of celibacy for both men and women. If taken literally, the words can refer only to adultery or fornication (Beckwith). Jesus recognised abstinence only for those able to receive it (Mt 19:12) , as did Paul (1Co $7: 1,8,32,36$ ). Marriage is approved by Paul in 1Ti $4: 3$ and by Heb 13:4. The New Testament exalts marriage and this passage should not be construed as degrading it.

Whithersoever he goeth (олоv $\alpha v v \pi \alpha \gamma \varepsilon$ ). Indefinite local clause with modal $\alpha v$ and the present active indicative of $v \pi \alpha \gamma \omega$. The Christian life is following the Lamb of God as Jesus taught (Mr 2:14; 10:21; Lu 9:59; Joh 1:43; 21:19, etc.) and as Peter taught (1Pe 2:21) and John (1Jo 2:6).

Were purchased from among men ( $\eta \gamma \rho \rho \alpha \sigma \theta \eta \sigma \alpha v \alpha \pi o ~ \tau \omega v \alpha \nu \theta \rho \omega \pi \omega v$ ). First aorist passive indicative of $\alpha \gamma \circ \rho \alpha \zeta \omega$, repeating the close of verse 3 .

First fruits ( $\alpha \pi \alpha \rho \chi \eta$ ). See for this word 1Co 16:15; Ro 11:16; 16:5. This seems to mean that the 144,000 represent not the whole, but only a portion of the great harvest to come (Mt 9:37), not only the first installment, but those marked by high spiritual service to God and the Lamb (Ro 12:1; Heb 13:15; 1Pe 2:5).

Rev 14:5
Was found no lie ( $o u \chi \varepsilon \cup \rho \varepsilon \theta \eta \psi \varepsilon \cup \delta o \varsigma$ ). First aorist passive indicative of $\varepsilon \cup \rho \iota \sigma \kappa \omega$. In 1Pe 2:23 this passage (Isa 53:9) is quoted with $\delta 0 \lambda o \varsigma$ (deceit, guile) instead of $\psi \varepsilon \cup \delta o \varsigma$ (lie), but the difference is not great.

Without blemish ( $\alpha \mu \omega \mu \mathrm{o}$ ). Alpha privative and $\mu \omega \mu \circ$ (blemish, spot). As Christ the Paschal Lamb is ( 1 Pe 1:19; Heb 9:14) , so the followers of the Lamb are to be in the end (Php 2:15).

Rev 14:6
Another angel ( $\alpha \lambda \lambda o v a \gamma \gamma \varepsilon \lambda o v$ ). A new turn in the drama comes with each angel (7:2; $8: 3,13 ; 10: 1$ ). Here the angel is seen "flying in mid heaven" ( $\pi \varepsilon \tau о \mu \varepsilon v o v \varepsilon v \mu \varepsilon \sigma о v \rho \alpha v \eta \mu \alpha \tau)$, while in 8:13 John heard him "flying in mid heaven" (genitive case of same participle, which see). This one is in the sight and hearing of all.

Having ( $\varepsilon \chi \circ v \tau \alpha$ ). Accusative singular agreeing with $\alpha \gamma \gamma \varepsilon \lambda o v$ like $\pi \varepsilon \tau о \mu \varepsilon v o v$ (flying), but $\lambda \varepsilon \gamma \omega v$ in verse 7 is nominative, as if a new sentence like $\lambda \varepsilon \gamma \omega v$ in 4:1.

An eternal gospel ( $\varepsilon v a \gamma \gamma \varepsilon \lambda \iota \rho \alpha \omega \omega v \iota o v)$. The only use of $\varepsilon v a \gamma \gamma \varepsilon \lambda \iota o v$ in John's writings, though the verb $\varepsilon v a \gamma \gamma \varepsilon \lambda_{1} \sigma \alpha$ (first aorist active infinitive epexegetical with $\varepsilon \chi o v \tau \alpha$ like Joh 16:12) occurs here and in 10:7. Here it is not to $\varepsilon v a \gamma \gamma \varepsilon \lambda$ ıov (the gospel), but merely a proclamation of God's eternal (aı $\omega$ voç here alone in the Apocalypse, though common in the

Fourth Gospel and I John) purpose. Origen even took this "eternal gospel" to be another book to be written! Note the double use of $\varepsilon \pi$ (with accusative after $\varepsilon v a \gamma \gamma \varepsilon \lambda ı \sigma \alpha$ and the genitive with $\gamma \eta \varsigma)$. See 5:9 for the races, etc.

Rev 14:7
And he saith $(\lambda \varepsilon \gamma \omega v)$. See above.
Fear God ( $\varphi \circ \beta \eta \theta \eta \tau \varepsilon$ tov $\theta \varepsilon o v$ ). First aorist passive (deponent) imperative of $\varphi \circ \beta \varepsilon \circ \mu \alpha$, here transitive with the accusative as in Lu 12:5. It is a call to judgment with no hope offered except by implication (Ac 14:15ff. ).

Give him glory ( $\delta$ от $\varepsilon \alpha \cup \tau \omega \delta_{0} \xi \alpha v$ ). Second aorist active indicative of $\delta_{1} \delta \omega \mu$. For the phrase see 11:13.

The hour is come ( $\eta \omega \rho \alpha \eta \lambda \theta \varepsilon v$ ). Second aorist (prophetic use) active indicative of $\varepsilon \rho \chi о \mu \alpha$. Common idiom in John's Gospel (2:4; 4:21,23; 5:25,28; 7:30 , etc.).

Worship ( $\pi \rho \circ \sigma \kappa \nu v \eta \sigma \alpha \tau \varepsilon$ ). First aorist active imperative of $\pi \rho \circ \sigma \kappa \nu v \varepsilon \omega$ with the dative case. Solemn call to the pagan world to worship God as Creator (4:11; 10:6), as in Ps 96:6; Ac 14:15. For "the fountains of waters" see 8:10.

Rev 14:8
Another, a second angel ( $\alpha \lambda \lambda$ оৎ $\delta \varepsilon v \tau \varepsilon \rho \circ \varsigma ~ \alpha \gamma \gamma \varepsilon \lambda$ ос). This second angel "followed" ( $\eta \kappa о \lambda o v \theta \eta \sigma \varepsilon v$, first aorist active indicative of $\alpha \kappa о \lambda о v \theta \varepsilon \omega$ ) and interpreted in part the first one.

Fallen, fallen ( $\varepsilon \pi \varepsilon \sigma \varepsilon v, \varepsilon \pi \varepsilon \sigma \varepsilon v$ ). Prophetic aorist active indicative of $\pi \iota \pi \tau \omega$, repeated as a solemn dirge announcing the certainty of the fall. The English participle "fallen, fallen" is more musical and rhythmical than the literal rendering "fell, fell." The language is an echo of Isa 21:9, though B in the LXX has $\pi \varepsilon \pi \tau \omega \kappa \varepsilon v, \pi \varepsilon \pi \tau \omega \kappa \varepsilon v$ (perfect).

Babylon the great ( $B \alpha \beta \nu \lambda \omega \nu \eta \mu \alpha \gamma \alpha \lambda \eta$ ). The adjective $\mu \varepsilon \gamma \alpha \lambda \eta$ occurs with $B \alpha \beta \nu \lambda \omega v$ each time in the Apocalypse $(14: 8 ; 16: 19 ; 17: 5 ; 18: 2,10,21)$ as a reminder of Nebuchadrezzar. There is no doubt that Rome is meant by Babylon, as is probably seen already in 1Pe 5:13. As a prisoner in Patmos John can speak his mind by this symbolism.

Hath made to drink ( $\pi \varepsilon \pi о \tau \iota \kappa \varepsilon v$ ). Perfect active indicative of $\pi$ о $\iota \iota \zeta \omega$, old causative verb (from лотоৎ drinking, 1Pe 4:3), as in Mt 25:35. The remarkable phrase that follows seems based on Jer 51:8 (Jer 25:15). It is a combination also of Re 14:10 (the wine of God's wrath, also in 16:19; 19:15) and 17:2. There is no doubt of the dissoluteness of the old Babylon of Jeremiah's day as of the Rome of John's time. Rome is pictured as the great courtesan who intoxicates and beguiles the nations to fornication (17:2,4,6), but the cup of God's wrath for her and her paramours is full ( $14: 10 ; 16: 19 ; 18: 2$ ).

Rev 14:9
A third ( $\tau \rho \tau \tau \varsigma)$. "The third of this succession of herald angels denounces the Caesarworshippers" (Swete). Cf. 13:12f. . This counter proclamation (verses 9-12) warns those tempted to yield to the threats of the second beast about boycott and death ( 13:11-17).

If any man worshippeth the beast and his image（ $\varepsilon \tau \iota \varsigma \pi \rho о \sigma \kappa v v \varepsilon \tau o \quad \theta \eta \rho เ \nu v \kappa \alpha \tau \eta \nu$ $\varepsilon$ єкоva avtov）．Condition of first class challenging those afraid of the beast．Note accusative （ $\theta \eta \rho \iota ⿱ 亠 䒑$ ）after $\pi \rho о \sigma \kappa \nu \nu \varepsilon$ ，not dative as in verse 7.

And receiveth a mark（ $\kappa \alpha \lambda \alpha \mu \beta \alpha \nu \varepsilon \chi \alpha \rho \alpha \gamma \mu \alpha)$ ．Carries on the same condition and picks up the very language of 13：16．These Caesar－are guilty of an＂eternal sin＂（Mr 3：29）．

Rev 14：10
He also shall drink（ $\kappa \alpha \alpha \cup \tau о \varsigma \pi \iota \varepsilon \tau \alpha$ ）．Future middle of $\pi \iota v \omega$ ．Certainty for him as for Babylon and her paramours（ 16：17）．
 after $\pi เ \varepsilon \tau \alpha$ ．In 16：19；19：15 we have both $\theta \nu \mu \circ v$ and o $\rho \gamma \eta \varsigma$（wrath of the anger of God）．The white heat of God＇s anger，held back through the ages，will be turned loose．

Prepared unmixed（ $\tau \circ v \kappa \varepsilon \kappa \varepsilon \rho \alpha \sigma \mu \varepsilon v o v ~ \alpha \kappa \rho a \tau o v) . ~ A ~ b o l d ~ a n d ~ p o w e r f u l ~ o x y m o r o n, ~$ ＂the mixed unmixed．＂Aкратоऽ is an old adjective（alpha privative and кєраขvv $\mu$ to mix） used of wine unmixed with water（usually so mixed），here only in N．T．So it is strong wine mixed（perfect passive participle of $\kappa \varepsilon \rho \alpha \nu \nu v \mu$ ）with spices to make it still stronger（cf．Ps 75：9 ）．

In the cup of his anger（ $\varepsilon v \tau \omega \pi \sigma \tau \eta \rho \iota \omega \tau \eta \varsigma$ o $\rho \gamma \eta \varsigma \alpha v \tau o v$ ）．Both $\theta \nu \mu \circ \varsigma$（vehement fury） and $o \rho \gamma \eta$（settled indignation）．

He shall be tormented（ $\beta \alpha \sigma \alpha \nu \iota \sigma \theta \eta \sigma \varepsilon \tau \alpha)$ ．Future passive of $\beta \alpha \sigma \alpha v \iota \omega$ ．See 9：5；11：10．
With fire and brimstone（ $\varepsilon v \pi v \rho \kappa \alpha \theta \varepsilon ו \omega$ ）．See 9：17 for fire and brimstone and also 19：20；20：10；21：8．The imagery is already in Ge 19：24；Isa 30：33；Eze 38：22 ．

In the presence of the holy angels and in the presence of the Lamb（ $\varepsilon v \omega \pi \iota \circ \sim \alpha \gamma \gamma \varepsilon \lambda \omega v$ $\alpha \not \iota \omega \nu \kappa \alpha \varepsilon \nu \omega \pi \iota \circ \nu$ tov $\alpha \rho \nu \iota \circ v)$ ．This holy environment adds to the punishment．

Rev 14：11
The smoke of their torment（о калvоц тоv $\beta \alpha \sigma \alpha \nu ı \sigma \mu о v \alpha v \tau \omega v$ ）．See 9：5 for $\beta \alpha \sigma \alpha \nu ı \sigma \mu о \varsigma$, only there it was a limited penalty，here it is＂for ever and ever＂（ $\varepsilon เ \varsigma ~ \alpha ı \omega v a \varsigma ~ \alpha ı \omega \nu \omega v$ ，unto ages of ages）．See also 18：9；19：3；20：10 ．

They have no rest（ovk $\varepsilon \chi 0 v \sigma ı v$ ava $\alpha \alpha v \sigma \iota v$ ）．The very language used in $4: 8$ of the four living creatures in praising God．＂Those who desert Christ for Caesar will be the victims of a remorse that never dies or sleeps＂（Swete）．The rest of the verse repeats the solemn challenge of verse 9 ．

Rev 14：12
Here is the patience of the saints（ $\mathrm{H} \omega \delta \varepsilon \eta v \pi o \mu o v \eta \tau \omega \nu \alpha \gamma \iota \omega \nu \varepsilon \sigma \tau \iota \nu$ ）．John＇s own comment as in 13：10；17：9．In this struggle against emperor worship lay their opportunity （Ro 5：3）．It was a test of loyalty to Christ．

They that keep（o $\tau \eta \rho o v \nu \tau \varepsilon \varsigma)$ ．In apposition with $\tau \omega \nu \alpha \gamma เ \omega \nu$（genitive），though nom－ inative，a frequent anacoluthon in this book（2：20，etc．）．Cf．12：17．

The faith of Jesus ( $\tau \eta \vee \pi \iota \sigma \tau \iota v$ I $\eta \sigma o v$ ). "The faith in Jesus" (objective genitive) as in 2:13; Mr 11:22; Jas 2:1 .

Rev 14:13
Write ( $\Gamma \rho \alpha \psi o v$ ). First aorist active imperative of $\gamma \rho \alpha \varphi \omega$ as in 1:11. John's meditation is broken by this command. This new beatitude ( $\mu \alpha \kappa \alpha \rho \circ$, Blessed) for the Christian dead goes farther than Paul's words (1Th 4:14-16; 1Co 15:18). Probably "from henceforth" ( $\alpha \pi^{\prime}$ $\alpha \rho \tau)$ goes with "those who die in the Lord," giving comfort to those facing persecution and death.

That they may rest ( $\imath \alpha \alpha \alpha \nu \alpha \pi \alpha \eta \sigma o v \tau \alpha$ ). Purpose clause with $v \alpha \alpha$ and the second future passive of $\alpha v a \pi \alpha v \omega$.

From their labours ( $\varepsilon \kappa \tau \omega \nu \kappa о \pi \omega \nu \alpha \nu \tau \omega v$ ). From the toils, the wearinesses, but not from the activities $(\varepsilon \rho \gamma \alpha)$, for these "follow with them." There is this to comfort us for all our growth here. Even if cut short, it can be utilized in heaven, which is not a place of idleness, but of the highest form of spiritual service.

Rev 14:14
A white cloud ( $v \varepsilon \varphi \varepsilon \lambda \eta \lambda \varepsilon \cup \kappa \eta$ ). Like the "bright cloud" of Mt 17:5 (Transfiguration), a familiar object in the Mediterranean lands. See Da 7:13; Mt 24:30; 26:64; Ac 1:9,11 for the picture of Christ's return.

I saw one sitting ( $\kappa \alpha \theta \eta \mu \varepsilon \nu \circ \nu$ ). No $\varepsilon \iota \delta o v$ here, but the accusative follows the $\varepsilon \varepsilon \delta o v$ at the beginning, as $\nu \varepsilon \varphi \varepsilon \lambda \eta$ is nominative after $t \delta o v$, as in 4:1,4.

Like unto a son of man (ouotov viov $\alpha v \theta \rho \omega \pi \sigma v$ ). Accusative here after o $\mu \circ$ otov as in 1:13, instead of the usual associative instrumental ( $13: 4$ ).

Having $(\varepsilon \chi \omega v)$. Nominative again after the $1 \delta o v$ construction, just before, not after, عıסov.

A golden crown ( $\sigma \tau \varepsilon \varphi$ avo $\vee \rho \rho \sigma o v v$ ). Here a golden wreath, not the diadems of 19:12.
A sharp sickle ( $\delta \rho \varepsilon \pi \alpha \nu o v o \xi v$ ). Old form $\delta \rho \varepsilon \pi \alpha \vee \eta$ (from $\delta \rho \varepsilon \pi \omega$, to pluck), pruninghook, in N.T. only in this chapter and $\mathrm{Mr} 4: 29$. Christ is come for reaping this time (Heb 9:28 ) for the harvesting of earth (verses 15-17). The priesthood of Christ is the chief idea in 1:12-20 and "as the true Imperator" (Swete) in chapter Re 19.

Rev 14:15
Send forth ( $\pi \varepsilon \mu \psi o v$ ). First aorist (urgency) active imperative of $\pi \varepsilon \mu \pi \omega$. "Thrust in thy sickle now," this angel urges Christ.

And reap ( $\kappa \alpha \theta \varepsilon \rho \iota \sigma o v$ ). First aorist (urgency) active imperative of $\theta \varepsilon \rho \iota \zeta \omega$, old verb (from $\theta \varepsilon \rho \circ \varsigma$, summer), as in Mt 6:26. See verse 7 for "the hour is come." $\Theta \varepsilon \rho \iota \sigma \alpha$ (to reap) is epexegetical infinitive (first aorist active of $\theta \varepsilon \rho \zeta \zeta \omega)$.

The harvest (o $\theta \varepsilon \rho \iota \sigma \mu \circ \varsigma)$. Old, but rare word (from $\theta \varepsilon \rho \iota \zeta \omega$, to harvest), as in Mt 13:30; Joh 4:35, here only in Revelation.

Is over-ripe $(\varepsilon \xi \eta \rho \alpha v \theta \eta)$. First aorist (prophetic as in 10:17; 15:1) passive of $\xi \eta \rho a \iota v \omega$ (cf. Jas 1:11 ), to wither, to dry up. Perhaps just "ripe," not "over-ripe." Cf. Joe 1:17.

Rev 14:16
Cast $(\varepsilon \beta \alpha \lambda \varepsilon v)$. Second aorist active indicative of $\beta \alpha \lambda \lambda \omega$. No violence by the use of $\varepsilon \beta \alpha \lambda \varepsilon \nu$ as is seen in Mt 10:34 ( $\beta \alpha \lambda \varepsilon \iota v \varepsilon \iota \rho \eta \nu \eta \nu$, to bring peace).

Was reaped $(\varepsilon \theta \varepsilon \rho \iota \sigma \theta \eta)$. First aorist passive indicative of $\theta \varepsilon \rho \iota \zeta \omega$. Both prophetic aorists again. Christ puts in the sickle as he wills with his own agents (Mt 9:37f.; 13:39,41).

Rev 14:17
He also ( $\kappa \alpha \alpha v \tau о \varsigma) . ~ A s ~ w e l l ~ a s ~ t h e ~ R e a p e r ~ o n ~ t h e ~ c l o u d . ~ T h i s ~ i s ~ t h e ~ f i f t h ~ a n g e l ~ w h o ~ i s ~$ God's messenger from heaven (temple where God dwells). This fifth angel with his sharp sickle is to gather the vintage ( $18-20$ ) as Christ did the wheat.

Rev 14:18
Another angel ( $\alpha \lambda \lambda o \varsigma \alpha \gamma \gamma \varepsilon \lambda o \varsigma)$. The fifth angel above Swete terms "the Angel of vengeance." He responds to the call of the sixth angel here as Christ does to the call of the fourth angel in verse 15 .

Out from the altar ( $\varepsilon \kappa$ тov $\theta v \sigma \iota \alpha \sigma \tau \eta \rho ı v)$. From the altar of incense where he is in charge of the fire ( $\varepsilon \xi$ ovoıav $\varepsilon \pi$ tov $\pi \nu \rho \circ \varsigma)$. If it is the altar of burnt offering ( $6: 9 ; 11: 1$ ), we are reminded of the blood of the martyrs (Swete), but if the altar of incense (8:3,5; 9:13; 16:7 ), then of the prayers of the saints.

The sharp sickle ( $\tau 0 \delta \rho \varepsilon \pi \alpha v o v \tau o ~ o \xi v)$. Useful for vintage as for harvesting. So "send forth" ( $\pi \varepsilon \mu \psi o v)$ as in verse 15.

Gather $(\tau \rho v \gamma \eta \sigma o v)$. First aorist active imperative of $\tau \rho v \gamma \alpha \omega$, old verb (from $\tau \rho v \gamma \eta$ dryness, ripeness), in N.T. only Re 15:18f. and Lu 6:44 .

The clusters ( $\tau 0 v \varsigma \beta о \tau \rho v a \varsigma)$. Old word $\beta \circ \tau \rho \cup \varsigma$, here only in N.T. (Ge 40:10 ).
Her grapes ( $\alpha \sigma \tau \alpha \varphi v \lambda \alpha \alpha v \tau \eta)$ ). Old word again for grapes, bunch of grapes, in N.T. only here, Mt 7:16; Lu 6:44.

Are fully ripe ( $\eta \kappa \mu \alpha \sigma \alpha \nu$ ). Old and common verb (from $\alpha \kappa \mu \eta$, Mt 15:16), to come to maturity, to reach its acme, here only in N.T.

Rev 14:19
Cast $(\varepsilon \beta \alpha \lambda \varepsilon v)$. As in verse 16.
Gathered ( $\varepsilon \tau \rho v \gamma \eta \sigma \varepsilon v$ ). Like $\varepsilon \theta \varepsilon \rho \iota \sigma \theta \eta$ in verse 16 , in obedience to the instructions in verse 18 ( $\tau \rho \cup \gamma \eta \sigma o v)$.

The vintage of the earth ( $\tau \eta \nu \alpha \mu \pi \varepsilon \lambda o v \tau \eta \varsigma \gamma \eta \varsigma)$. "The vine of the earth." Here $\alpha \mu \pi \varepsilon \lambda o \varsigma$ is used for the enemies of Christ collectively pictured.

And cast it ( $\varepsilon \beta \alpha \lambda \varepsilon v$ ). Repeating $\varepsilon \beta \alpha \lambda \varepsilon v$ and referring to $\alpha \mu \pi \varepsilon \lambda o v$ (vintage) just before.
Into the winepress the great winepress ( $\varepsilon \varsigma \tau \eta \nu \lambda \eta \nu o v \tau o v \mu \varepsilon \gamma \alpha v$ ). $\Lambda \eta \nu \circ \varsigma$ is either feminine as in verse $20 ; 19: 15$, or masculine sometimes in ancient Greek. Here we have
both genders, a solecism frequent in the Apocalypse ( 21:14 тo $\tau \varepsilon \chi \circ \varsigma \varepsilon \chi \omega v$ ). See Mt 21:33 . For this metaphor of God $s$ wrath see 14:10; 15:1,7; 16:1,19; 19:15 .

Rev 14:20
Was trodden $(\varepsilon \pi \alpha \tau \eta \theta \eta)$. First aorist passive indicative of $\pi \alpha \tau \varepsilon \omega$, to tread. The image of treading out the grapes is a familiar one in the East. Perhaps Isa 63:3 is in mind.

Without the city ( $\varepsilon \xi \omega \theta \varepsilon v \tau \eta \varsigma \pi о \lambda \varepsilon \omega \varsigma)$. Ablative case with $\varepsilon \xi \omega \theta \varepsilon v$ (like $\varepsilon \xi \omega$ ). This was the usual place (Heb 13:12). See $\varepsilon \xi \omega \theta \varepsilon v$ in 11:2. Joel (Joe 3:12) pictures the valley of Jehoshaphat as the place of the slaughter of God's enemies. Cf. Zec 14:4 .

Blood from the winepress ( $\alpha \mu \alpha \varepsilon \kappa \tau \eta \varsigma \lambda \eta v o v$ ). Bold imagery suggested by the colour of the grapes.

Unto the bridles ( $\alpha \chi \rho \tau \omega v \chi \alpha \lambda \iota v \omega v$ ). Old word (from $\chi \alpha \lambda \alpha \omega$ to slacken), in N.T. only here and Jas 3:3. Bold picture.

As far as a thousand and six hundred furlongs ( $\alpha \pi \sigma \sigma \tau \alpha \delta \iota \omega \nu \chi \downarrow \lambda \iota \omega \nu \varepsilon \xi \alpha \kappa \sigma \sigma \omega \nu \nu$ ). A peculiar use of $\alpha \pi \mathbf{0}$, for "distance from (of)" as also in Joh 11:18; 21:8, somewhat like the use of $\pi \rho o$ in Joh 12:1. The distance itself covers the length of Palestine, but it is more likely that "the metaphor is worked out with the exuberance of apocalyptic symbolism" (Swete) for the whole earth.

## Revelation 15

Rev 15:1
Another sign in heaven ( $\alpha \lambda \lambda 0 \sigma \eta \mu \varepsilon \iota \circ \varepsilon \varepsilon \tau \omega$ ov $\rho \alpha \nu \omega$ ). Looking back to 12:1,3, after the series intervening. The Seven Bowls are parallel with the Seven Seals (ch. Re 6 ) and the Seven Trumpets (chapters Re 8-11 ), but there is an even closer connection with chapters Re 12-14, "the drama of the long conflict between the church and the world" (Swete).

Great and marvellous ( $\mu \varepsilon \gamma \alpha \kappa \alpha \theta \alpha \nu \mu \alpha \sigma \tau о v$ ). Ө $\Theta v \mu \alpha \sigma \tau о \varsigma$ is an old verbal adjective (from $\theta \alpha v \mu \alpha \zeta \omega$, to wonder) and is already in Mt 21:42. The wonder extends to the end of this vision or sign ( 16:21).

Seven angels ( $\alpha \gamma \gamma \varepsilon \lambda$ ovৎ $\varepsilon \pi \tau \alpha$ ). Accusative case in apposition with $\sigma \eta \mu \varepsilon \iota \sigma$ after $\varepsilon เ \delta o v$. Cf. 8:2.

Which are the last ( $\tau \alpha \varsigma \varepsilon \sigma \chi \alpha \tau \alpha \varsigma$ ). "Seven plagues the last." As in 21:9, "the final cycle of such visitations" (Swete).

Is finished $(\varepsilon \tau \varepsilon \lambda \varepsilon \sigma \theta \eta)$. Proleptic prophetic first aorist passive indicative of $\tau \varepsilon \lambda \varepsilon \omega$ as in 10:7. The number seven seems particularly appropriate here for finality and completeness.

Rev 15:2
As it were a glassy sea ( $\omega \varsigma \theta \alpha \lambda \alpha \sigma \sigma \alpha \nu v \alpha \lambda ı \nu \eta \nu)$. Accusative case after $\varepsilon \iota \delta o v$ and $\omega \varsigma$ here, not in $4: 6$, which see for the symbol.

Mingled with fire $(\mu \varepsilon \mu \tau \gamma \mu \varepsilon \nu \eta \nu \pi \nu \rho)$. Perfect passive participle of $\mu \tau \gamma \nu \nu \mu$, to mix, and the associative instrumental case $\pi v \rho$. This item not in 4:6 (a vision of peace), but here it adds to the splendour of the vision. This parenthesis (2-4) gives a picture of the martyrs in their state of bliss.

Them that come off victorious ( $\tau 0 \cup \varsigma \nu \kappa \kappa \omega \nu \tau \alpha \varsigma$ ). Present active articular participle of $\nu \kappa \alpha \omega$, accusative after $\varepsilon เ \delta o v$, "those that come off victorious" ( 14:4).
 of $\varepsilon \kappa$ after $v \iota \kappa \alpha \omega$ is unusual, also with $\varepsilon \kappa$ тov $\alpha \rho \iota \theta \mu \circ v$. For these items see $13: 1,14,17 ; 14: 9,11$; 19:20; 20:4.

By the glassy sea $(\varepsilon \pi \tau \eta v \theta \alpha \lambda \alpha \sigma \sigma \alpha \nu \tau \eta \nu v \alpha \lambda \iota \nu \eta v)$. Or "upon" more likely (4:6) with the accusative as in Mt 14:25f. .

Harps of God ( $\kappa \iota \theta \alpha \rho a \varsigma ~ \tau o v ~ \theta \varepsilon o v)$. Objective genitive, for the worship of God (5:8; 14:2; 1Ch 16:42 ).

Rev 15:3
The song of Moses ( $\tau \eta \nu \omega i \delta \eta \nu$ tov $\mathrm{M} \omega v \sigma \varepsilon \omega \varsigma$ ). Ex 14:31; 15:1-19 . A song of victory like that of Moses after crossing the Red Sea.

And the song of the Lamb ( $\tau \eta \nu \omega t \delta \eta \nu \tau o v \alpha \rho \nu \iota o v)$. A separate note of victory like that of Moses, though one song, not two. Charles finds it impossible to reconcile the two expressions, if genuine, but it is a needless objection. The words come from the O.T.: "great"
( $\mu \varepsilon \gamma \alpha \lambda \alpha$ ) from Ps 111:2 , "wonderful" ( $\theta \alpha \nu \mu \alpha \sigma \tau \alpha)$ from Ps 139:14, "O Lord God the Almighty" (Kıрıє о $\theta \varepsilon$ ся о таvтократ $\omega \rho$ ) from Am 4:13 (Re 4:8), "righteous and true" ( $\delta$ ıкаı ка $\alpha \lambda \eta \theta \iota v \alpha$ ) from De 32:4, "Thou King of the ages" (o $\beta a \sigma i \lambda \varepsilon v \varsigma ~ \tau \omega v ~ a \iota \omega v \omega v$ ) like Jer 10:10; 1Ti 1:17. Some MSS. have "the king of the saints" and some "the king of the nations," like Jer 10:7. John thus combines in Hebraic tone the expressions of the old and the new in the song to the Glorified Messiah.

## Rev 15:4

Who shall not fear? ( $\tau \iota \varsigma$ ov $\mu \eta \varphi o \beta \eta \theta \eta \upharpoonright$;). Rhetorical question with ov $\mu \eta$ (double negative) and first aorist passive subjunctive of $\varphi \circ \beta \varepsilon \sigma \mu \alpha$ future passive in Jer 10:7).

And glorify ( $\kappa \alpha \delta о \xi \alpha \sigma \varepsilon$ ). Change here to the future indicative instead of the aorist subjunctive, as often. Cf. Ps 86:9 .

Thou only art holy ( $\mu$ ovoৎ oбıоৎ). Both predicate adjectives, "Thou art alone holy." God alone is perfectly holy ( 16:5).

Shall come ( $\eta \xi$ бov $\sigma \nu$ ). Future active of $\eta \kappa \omega$.
And worship ( $\kappa \alpha \pi \rho о \sigma \kappa \nu v \eta \sigma o v \sigma \tau v)$. Future active of $\pi \rho \circ \sigma \kappa v v \varepsilon \omega$. Both from Ps 86:9 .
Have been made manifest ( $\varepsilon \varphi \alpha v \varepsilon \rho \omega \theta \eta \sigma \alpha v$ ). Prophetic first aorist passive indicative of $\varphi a v \varepsilon \rho o \omega$. This martyr's song has the ring of great poetry.

Rev 15:5
The temple of the tabernacle of the testimony (o vaos $\tau \eta \varsigma \sigma \kappa \eta v \eta \varsigma ~ \tau o v ~ \mu \alpha \rho \tau v \rho \iota o v) . ~$ Charles calls this "strange" language. Probably the tabernacle or tent of witness ( $\mathrm{Nu} 9: 15$; 17:7) is in mind and the tent of meeting (Ex 27:21 rather than the temple in Jerusalem.

Was opened ( $\eta v o \circ \gamma \eta$ ). Second aorist passive indicative of $\alpha v o l \gamma \omega$ as in 11:19. For vaos see 3:12; 7:15; 14:15,17; 16:1,17.

Rev 15:6
There came out ( $\varepsilon \xi \eta \lambda \theta \alpha v$ ). Second aorist active indicative of $\varepsilon \xi \varepsilon \rho \chi \circ \mu \alpha$ with - $\alpha v$ rather than -ov. Proleptic and prophetic aorist.

The seven angels ( $о \varepsilon \pi \tau \alpha \alpha \gamma \gamma \varepsilon \lambda o$ ). Those in verse 1.
The seven plagues ( $\tau \alpha \varsigma \varepsilon \pi \tau \alpha \pi \lambda \eta \gamma \alpha \varsigma$ ). The bowls are not given them till verse 7 .
Arrayed ( $\varepsilon v \delta \varepsilon \delta \nu \mu \varepsilon v o$ ). Perfect passive participle of $\varepsilon v \delta v \omega$.
With precious stone pure and bright ( $\lambda_{1} \theta o v \kappa \alpha \theta \alpha \rho \circ v \lambda \alpha \mu \pi \rho \circ v$ ). Accusative case retained with verb of clothing as so often, literally "with a stone pure bright." For both adjectives together see 19:8,14. Some MSS. read $\lambda_{\imath}$ vov (linen). For $\lambda_{\imath} \theta$ ov see 17:4; 18:16; Eze 28:13 .

Girt ( $\pi \varepsilon \rho \iota \varepsilon \zeta \omega \sigma \mu \varepsilon v o$ ). Perfect passive participle of $\pi \varepsilon \rho \iota \zeta \omega v v v \omega$. See 1:13 for both participles. For $\sigma \tau \eta \theta$ oc (breast) see Lu 18:13 .

With golden girdles ( $\zeta \omega v a \varsigma \chi \rho \cup \sigma a \varsigma)$ ). Accusative case after the perfect passive participle $\pi \varepsilon \rho \iota \varepsilon \zeta \omega \sigma \mu \varepsilon v o$ as in 1:13.

Rev 15:7

Seven golden bowls ( $\varepsilon \pi \tau \alpha$ 甲ı $\alpha \lambda \varsigma \propto \rho v \sigma \alpha \varsigma)$. Golden saucers, but not full of incense as in 5:8, but "full ( $\gamma \varepsilon \mu$ оuбac for which see 5:8) of the wrath of God who liveth for ever and
 events.

Rev 15:8
Was filled with smoke $(\varepsilon \gamma \varepsilon \mu \iota \sigma \theta \eta \kappa \alpha \pi \nu o v)$. First aorist passive indicative of $\gamma \varepsilon \mu \iota \zeta \omega$ (from $\gamma \varepsilon \mu \omega$ ), to fill full, and with the genitive $\kappa \alpha \pi v o v$ (smoke). Smoke is here the symbol of God's presence (Ex 19:18; Isa 6:5 ).

Till should be finished ( $\alpha \not \rho \tau \varepsilon \lambda \varepsilon \sigma \theta \omega \sigma \iota$ ). Temporal clause for future time with $\alpha \chi \rho$ (equal to $\varepsilon \omega \varsigma$ in import) and the first aorist passive subjunctive of $\tau \varepsilon \lambda \varepsilon \omega$, a metaphorical and symbolic "smoke screen" to keep all out of the sanctuary for the time being.

## Revelation 16

Rev 16:1
A great voice ( $\mu \varepsilon \gamma \alpha \lambda \eta \varsigma \varphi \omega \nu \eta \varsigma$ ). Not an angel as in 5:2; 7:2; 10:3; 14:7,9,15,18, but of God as 15:8 shows, since no one could enter the vaoc.

Pour out ( $\varepsilon \kappa \chi \varepsilon \varepsilon \tau \varepsilon$ ). Second aorist active imperative of $\varepsilon \kappa \chi \varepsilon \omega$ (same form as present active imperative). Blass would change to $\kappa \kappa \chi \propto \tau \varepsilon$ (clearly aorist) as in verse 6 .

The seven bowls ( $\tau \alpha \varsigma \varepsilon \pi \tau \alpha \varphi ı \alpha \lambda \alpha)$ ). The article points to verse 7 .
Rev 16:2
Went and poured out ( $\alpha \pi \eta \lambda \theta \varepsilon v \kappa \alpha \varepsilon \xi \varepsilon \chi \varepsilon \varepsilon v$ ). Second aorist active indicative of $\alpha \pi \varepsilon \rho \chi \circ \mu \alpha$ (redundant use like vтаүєtє with $\varepsilon \kappa \chi \varepsilon \varepsilon \tau \varepsilon$, "go and pour out," in verse 1) and of $\varepsilon \kappa \chi \varepsilon \omega$. Each angel "went off" to perform his task. For $\varepsilon \xi \varepsilon \chi \varepsilon \varepsilon v$ see it repeated in verses $3,4,8,10,12,17$.

Into the earth ( $\varepsilon ા \varsigma \tau \eta \nu \gamma \eta \nu)$. This same use of $\varepsilon \iota \varsigma$ after $\varepsilon \xi \varepsilon \chi \varepsilon \varepsilon v$ in verses 3,4 .
It became ( $\varepsilon \gamma \varepsilon v \varepsilon \tau 0)$. "There came" (second aorist middle indicative of $\gamma \iota v o \mu \alpha)$.
A noisome and grievous sore ( $\varepsilon \lambda \kappa о \varsigma ~ к а к о \nu ~ к а ~ \pi о \nu \eta \rho о \nu) . ~ " B a d ~ a n d ~ m a l i g n a n t ~ s o r e . " ~$ $H \varepsilon \lambda \kappa о \varsigma$ is old word for a suppurated wound (Latin ulcus), here, verse 11; Lu 16:21. See the sixth Egyptian plague (Ex 9:10; De 28:27,35 ) and Job 2:7 . The magicians were attacked in Egypt and the worshippers of Caesar here (13:17; 14:9,11; 19:20).

## Rev 16:3

Into the sea ( $\varepsilon \varsigma \varsigma \tau \eta \nu \theta \alpha \lambda \alpha \sigma \sigma \alpha v$ ). Like the first Egyptian plague (Ex 7:12-41) though only the Nile affected then.

Blood as of a dead man ( $\alpha \mu \alpha \omega \varsigma \nu \varepsilon \kappa \rho o v$ ). At the trumpet ( 8:11) the water becomes wormwood. Here $\omega \varsigma \nu \varepsilon \kappa \rho o v$ is added to Ex 7:19, "the picture of a murdered man weltering in his blood" (Swete). "Coagulated blood, fatal to animal life" (Moffatt).

Every living soul ( $\pi \alpha \sigma \alpha \psi v \chi \eta \zeta \omega\rceil)$. "Every soul of life" (Hebraism, Ge 1:21, marked by life).

Even the things that were in the sea ( $\tau \alpha \varepsilon v \tau \eta \theta \alpha \lambda \alpha \sigma \sigma \eta$ ). "The things in the sea," in apposition with $\psi \cup \chi \eta$. Complete destruction, not partial as in 8:9.

Rev 16:4
 $v \delta a \tau \omega v)$. See 8:10 for this phrase. Contamination of the fresh-water supply by blood follows that of the sea. Complete again.

Rev 16:5
The angel of the waters ( $\tau 0 v \alpha \gamma \gamma \varepsilon \lambda o v ~ \tau o v v \delta a \tau \omega v$ ). Genitive case object of $\eta \kappa о v \sigma \alpha$. See 7:1 for the four angels in control of the winds and 14:18 for the angel with power over fire. The rabbis spoke also of an angel with power over the earth and another over the sea.

Which art and which wast ( $о \omega \nu \kappa \alpha$ o $\eta \nu$ ). See this peculiar idiom for God's eternity with o as relative before $\eta \nu$ in $1: 4,8 ; 4: 8$, but without o $\varepsilon \rho \chi \circ \mu \varepsilon \nu \circ \varsigma$ (the coming on, the one who is to be) there for the future as in 11:17.

Thou Holy One (o oбtoc). Nominative form, but vocative case, as often. Note both Sıкаıоя and ooıos applied to God as in 3:1; 15:3f.

Because thou didst thus judge ( от таvта єкрıvaৎ). Reason for calling God סıкаıоऽ and oбıos. The punishment on the waters is deserved. First aorist active indicative of $\kappa \rho \iota \nu \omega$, to judge.

Rev 16:6
For ( $o \tau$ ). Second causal conjunction ( $o \tau$ ) explanatory of the first $o \tau$, like the two cases of ot in 15:4.

They poured out ( $\varepsilon \xi \varepsilon \chi \varepsilon \alpha v)$. Second aorist active indicative of $\varepsilon \kappa \chi \varepsilon \omega$ with - $\alpha v$ instead of -ov.

Blood hast thou given them to drink ( $\alpha \mu \alpha \alpha \cup \tau \circ \iota \varsigma \delta \varepsilon \delta \omega \kappa \alpha \varsigma \pi \varepsilon ı v$ ). Haı $\mu \alpha$ (blood) is the emphatic word, measure for measure for shedding the blood of saints and prophets (11:18; 18:24 ). Perfect active indicative of $\delta \iota \delta \omega \mu$, and so a permanent and just punishment. $\Pi \varepsilon \iota v$ is the abbreviated second aorist active infinitive of $\pi \iota v \omega$ for $\pi \iota \varepsilon \iota v(\varepsilon \pi \iota o v)$. It is the epexegetical infinitive after $\delta \varepsilon \delta \omega \kappa \alpha \varsigma$. There was no more drinking-water, but only this coagulated blood.

They are worthy ( $\alpha \xi_{\imath}$ عıбıv). "Terrible antithesis" (Swete) to 3:4. The asyndeton adds to it (Alford).

Rev 16:7
O Lord God, the Almighty (Kvpı о $\theta \varepsilon о \varsigma$ о $\pi \alpha v \tau о к \rho \alpha \tau \omega \rho$ ). Just as in 15:3 in the Song of Moses and of the Lamb, vocative with the article o. "Judgments" (крıбєıৎ) here instead of "ways" (o $\delta$ o) there, and with the order of the adjectives reversed ( $\alpha \lambda \eta \theta$ ıva к $\alpha \delta_{ı} \alpha ı \alpha$, true and righteous).

Rev 16:8
Upon the sun ( $\varepsilon \pi \tau \operatorname{\tau ov} \eta \lambda \iota \circ v$ ). Not $\varepsilon \iota \varsigma$ (into) as in verses $2,3,4$. The fourth trumpet ( 8:12) affected a third of the sun, moon, and stars with a plague of darkness, but here it is a plague of extreme heat.

To scorch with fire ( $\kappa \alpha v \mu \alpha \tau \iota \sigma \alpha \varepsilon v \pi \nu \rho$ ). First aorist active infinitive of $\kappa \alpha v \mu \alpha \tau \iota \zeta \omega$, late (Plutarch, Epictetus) causative verb (from каv $\alpha$, heat), in N.T. only here and verse $9 ; \mathrm{Mt}$ 13:6; $\operatorname{Mr} 4: 6$. The addition of $\varepsilon v \pi \nu \rho$ (in fire, with fire) intensifies the picture.

Rev 16:9
Were scorched ( $\varepsilon \kappa \alpha \nu \mu \alpha \tau \iota \sigma \theta \eta \sigma \alpha v)$. First aorist passive indicative of same verb.
With great heat ( $\kappa \alpha \cup \mu \alpha \mu \varepsilon \gamma \alpha)$. Cognate accusative retained with the passive verb. Old word (from кaı $\omega$ to burn), in N.T. only 7:16 and here. For blaspheming the name of God see $13: 6$; Jas $2: 7$; Ro $2: 24$; 1 Ti $6: 1$. They blamed God for the plagues.

They repented not ( $o v \mu \varepsilon \tau \varepsilon v o \eta \sigma \alpha v$ ). This solemn negative aorist of $\mu \varepsilon \tau \alpha v o \varepsilon \omega$ is a refrain like a funeral dirge ( $9: 20 f . ; 16: 11$ ). In 11:13 some did repent because of the earthquake. Even deserved punishment may harden the heart.

To give him glory ( $\delta o u v \alpha \alpha \cup \tau \omega \delta o \xi \alpha v$ ). Second aorist active infinitive of $\delta \iota \delta \omega \mu$, almost result. For the phrase see 11:13; 14:7; 19:7.

Rev 16:10
Upon the throne of the beast ( $\varepsilon \pi \tau \operatorname{\tau ov} \theta \rho o v o v$ tov $\theta \eta \rho \iota o v$ ). That is Rome ( $13: 2$ ). The dragon gave the beast his throne ( $2: 13$ ).

Was darkened ( $\varepsilon \not \varepsilon \varepsilon \varepsilon \varepsilon \tau \% ~ \varepsilon \sigma \kappa о \tau \omega \mu \varepsilon v \eta)$ ). Periphrastic past perfect passive with $\gamma เ v o \mu \alpha$ and $\sigma \kappa о \tau о \omega$ ( 9:2). Like the darkness of the Egyptian plague (Ex 10:22) and worse, for the effects of the previous plagues continue.

They gnawed their tongues ( $\varepsilon \mu \alpha \sigma \omega v \tau 0 ~ \tau \alpha \varsigma ~ \gamma \lambda \omega \sigma \sigma \alpha \varsigma ~ \alpha \nu \tau \omega v)$ ). Imperfect middle of $\mu \alpha \sigma \alpha o \mu \alpha$, old verb (to chew), from $\mu \alpha \omega$ (to knead), only here in N.T.

For pain ( $\varepsilon \kappa$ тov đovou). "Out of distress" (cf. єк in 8:13), rare sense of old word (from $\pi \varepsilon v o \mu \alpha$ to work for one's living), in N.T. only here, 21:4; Col 4:13. See Mt 8:12 .

Rev 16:11
They blasphemed ( $\varepsilon \beta \lambda \alpha \sigma \varphi \eta \mu \eta \sigma \alpha v)$
and they repented not ( $\kappa \alpha$ ov $\mu \varepsilon \tau \varepsilon v o \eta \sigma \alpha v$ ). Precisely as in verse 9 , which see. Not just because of the supernatural darkness, but also "because of their pains" ( $\varepsilon \kappa \tau \omega \nu \pi \sigma \nu \omega \nu \alpha \nu \tau \omega v$, plural here and same use of $\varepsilon \kappa$ ) and their sores ( $\kappa \alpha \varepsilon \kappa \tau \omega v \varepsilon \lambda \kappa \omega \nu \alpha \nu \tau \omega \nu$, as in verse 2 , only plural, and same use of $\varepsilon \kappa$ ).

Of their works ( $\varepsilon \kappa \tau \omega v \varepsilon \rho \gamma \omega v \alpha \nu \tau \omega v$ ). "Out of their deeds," and addition to verse 9 .
The God of heaven ( $\tau 0 v \theta \varepsilon o v ~ t o v ~ o u p a v o u) . ~ A s ~ i n ~ D a ~ 2: 44 . ~ L i k e ~ t h e ~ p r i d e ~ o f ~$ Nebuchadrezzar against Jehovah.

Rev 16:12
Upon the great river, the river Euphrates ( $\varepsilon \pi \tau \tau v \pi о \tau \alpha \mu о \nu \tau о v \mu \varepsilon \gamma \alpha v \tau о v E v \varphi \rho \alpha \tau \eta v$ ). The sixth trumpet brings up the river Euphrates also (9:14), only there $\varepsilon \pi$ with the locative, while here $\varepsilon \pi$ with the accusative. Note triple use of the article tov here.

Was dried up ( $\varepsilon \xi \eta \rho \alpha v \theta \eta$ ). First aorist (prophetic) passive of $\xi \eta \rho \alpha ı v \omega$ ( 14:15). Cf. Zec 10:11.

That may be made ready ( $เ v \alpha \varepsilon \tau о \mu \alpha \sigma \theta \eta$ ). Purpose clause with $i v \alpha$ and the first aorist passive of $\varepsilon \tau о \mu \mu \zeta \omega$. Common verb in Rev. (8:6; 9:7,15; 12:6; 19:7; 21:2 ).

The way for the kings ( $\eta$ o $\delta o \varsigma \tau \omega v \beta \alpha \sigma \iota \lambda \varepsilon \omega v$ ). Objective genitive $\beta \alpha \sigma i \lambda \varepsilon \omega v$.
That come from the sunrising ( $\tau \omega v$ ало $\alpha v a \tau о \lambda \eta \varsigma \varepsilon \lambda \iota o v$ ). "Those from the rising of the sun," the kings from the east (cf. Mt 2:2 ) in their march against Rome. Parthia in particular resisted Rome before Trajan's day.

Rev 16:13
Coming out of ( $\varepsilon \kappa$ alone, no participle $\varepsilon \rho \chi \circ \mu \varepsilon v \alpha$ ).

Of the dragon ( $\operatorname{\tau ov} \delta \rho \alpha \kappa о v \tau о \varsigma)$. That is $\operatorname{Satan}(12: 3,9)$.
Of the beast ( $\operatorname{\tau ov} \theta \eta \rho \circ \sim$ ). The first beast (13:1,12) and then just the beast (13:14ff.; $14: 9,11 ; 15: 2 ; 16: 2,10)$, the brute force of the World-power represented by the Roman Empire" (Swete).

Of the false prophet ( $\tau \circ \cup \psi \varepsilon v \delta о \pi \rho о \varphi \eta \tau \circ v$ ). Cf. Mt 7:15; Ас 13:6; 1Jo 2:22; 4:3; 2Jo 1:7 . Identified with the second beast ( 13:11-14) in 19:20; 20:10. So the sixth bowl introduces the dragon and his two subalterns of chapters Re 12; 13 (the two beasts).

Three unclean spirits ( $\pi v \varepsilon v \mu \alpha \tau \alpha \tau \rho ı \alpha \alpha \kappa \alpha \theta \alpha \rho \tau \alpha)$. Out of the mouths of each of the three evil powers (the dragon and the two beasts) comes an evil spirit. See the use of mouth in $1: 16$ ( $9: 17 \mathrm{f} . ; 11: 5 ; 12: 15 ; 19: 15,21$ ) as a chief seat of influence. In 2Th $2: 8$ we have "the breath of his mouth" (the other sense of $\pi v \varepsilon v \mu \alpha$ ). For $\alpha \kappa \alpha \theta \alpha \rho \tau o v$ (unclean) with $\pi v \varepsilon v \mu \alpha$ see Mr 1:23f.; 3:11; 5:2ff.; Ac 5:16; 8:7 . Christ expelled unclean spirits, but His enemies send them forth" (Swete). See Zec 13:2 "the false prophets and the unclean spirits."

As it were frogs ( $\omega \varsigma \beta \alpha \tau \rho \alpha \chi 0$ ). Cf. Ex 8:5; Le 11:10f. . Old word, here alone in N.T. Like loathsome frogs in form.

Rev 16:14
Spirits of devils ( $\pi v \varepsilon v \mu \alpha \tau \alpha \delta \alpha \not \mu \circ v \iota \omega v$ ). "Spirits of demons." Explanation of the simile $\omega \varsigma \beta a \tau \rho \alpha \chi$. See 1Ti 4:1 about "deceiving spirits and teachings of demons."
 The Egyptian magicians wrought "signs" (tricks), as did Simon Magus and later Apollonius of Tyana. Houdini claimed that he could reproduce every trick of the spiritualistic mediums.

Which go forth ( $\alpha \varepsilon \kappa \pi \sigma \rho \varepsilon v \varepsilon \tau \alpha$ ). Singular verb with neuter plural (collective) subject.
Unto the kings ( $\varepsilon \pi$ тovৎ $\beta \alpha \sigma \iota \lambda \varepsilon ı \varsigma)$. The three evil spirits (dragon and the two beasts) spur on the kings of the whole world to a real world war. "There have been times when nations have been seized by a passion for war which the historian can but imperfectly explain" (Swete).

To gather them together ( $\sigma v v \alpha \gamma \alpha \gamma \varepsilon \iota v$ ). Second aorist active infinitive of $\sigma v v \alpha \gamma \omega$, to express purpose (that of the unclean spirits).

Unto the war of the great day of God, the Almighty ( $\varepsilon \iota \varsigma \tau о \nu \pi о \lambda \varepsilon \mu о \nu \tau \eta \varsigma \eta \mu \varepsilon \rho a \varsigma \tau \eta \varsigma$
 13:8, but it is more likely war against God (Ps 2:2) and probably the battle pictured in 17:14; 19:19. Cf. 2Pe 3:12, "the day of God," his reckoning with the nations. See Joe 2:11; 3:4 . Paul uses "that day" for the day of the Lord Jesus (the Parousia) as in 1Th 5:2; 2Th 1:10; 2:2; 1 Co 1:8; 2Co 1:14; Php 1:6; 2:16; 2Ti 1:12,18; 4:8.

Rev 16:15
Behold, I come as a thief ( $\delta \delta o v \varepsilon \rho \chi \circ \mu \alpha \omega \varsigma \kappa \lambda \varepsilon \pi \tau \eta \varsigma)$. The voice of Christ breaks in with the same metaphor as in 3:3, which see. There comes one of seven beatitudes in Rev. (1:3;

14:13; 16:15; 19:9; 20:6; 22:7,14 ). For $\gamma \rho \eta \gamma \quad \rho \omega \nu$ (watching) see 3:2, and for $\tau \eta \rho \omega v$ (keeping), 1:3.
 the present active subjunctive of $\pi \varepsilon \rho \iota \pi \alpha \tau \varepsilon \omega$, and note predicate nominative $\gamma \cup \mu \nu \circ \varsigma$ (naked).

And they see his shame ( $\kappa \alpha \beta \lambda \varepsilon \pi \omega \sigma \tau \nu \tau \eta \nu \alpha \sigma \chi \eta \mu о \sigma v \nu \eta \nu$ autov). Continuation of the final clause with present active subjunctive of $\beta \lambda \varepsilon \pi \omega$. A $\alpha \chi \eta \mu \circ \sigma v \nu \eta \nu$ is old word (from $\alpha \sigma \chi \eta \mu \omega \nu$, indecent, 1Co 12:23 ), in N.T. only here and Ro 1:27, a euphemism for $\tau \eta \nu$ aıбүणvๆข (Re 3:18).

Rev 16:16
They gathered ( $\sigma \cup v \eta \gamma \alpha \gamma \varepsilon v$ ). Second aorist active indicative of $\sigma u v \alpha \gamma \omega$, singular (the three unclean spirits), like єклорєvєта in verse 14.

Har-Magedon (Hap-Maү\& $\delta \omega v$ ). John proceeds now after the interruption in verse 15. Perhaps "the mountains of Megiddo" though not certain. Megiddo is in the valley of Esdraelon, and by the waters of Megiddo (the Kishon) Israel gained a decisive victory over Sisera (Jud 5:19 ), celebrated in Deborah's song. See also Re 20:8ff. and Eze 39:2,4 .

Rev 16:17
Upon the air ( $\varepsilon \pi \tau \tau \vee \alpha \varepsilon \rho \alpha$ ). All men breathe the air and this is worse than the smiting of the earth (verse 2), the sea (3), the fresh waters ( 4), the sun (8).

A great voice ( $\varphi \omega \nu \eta \mu \varepsilon \gamma \alpha \lambda \eta)$. The voice of God as in 16:1.
It is done ( $\Gamma \varepsilon \gamma \circ v \varepsilon v$ ). Perfect active indicative of $\gamma เ \nu \circ \mu \alpha$. Like $\Gamma \varepsilon \gamma \circ v \alpha v$ in 21:6. The whole series of plagues is now complete.

Rev 16:18
And there were (ка ع $\gamma \varepsilon v \frac{1}{}$ ( for this list of terrible sounds and lightnings, and for the great earthquake ( $\sigma \varepsilon เ \sigma \mu \circ \varsigma \mu \varepsilon \gamma \alpha \varsigma$ ) see 6:12; 11:13 (cf. Lu 21:11 ).

Such as was not (oוoৎ ouk eүعveto). Qualitative relative with $\gamma$ ıvoua again, "such as came not."

Since there were men ( $\alpha \varphi^{\prime}$ ov $\alpha v \theta \rho \omega \pi \sigma$ $\varepsilon \gamma \varepsilon v o v \tau o$ ). "Since which time ( $\chi \rho o v o v$ understood) men came."

So great an earthquake, so mighty ( $\tau \eta \lambda \iota \kappa о \nu \tau о \varsigma ~ \sigma \varepsilon \iota \sigma \mu \circ \varsigma ~ o v \tau \omega \mu \varepsilon \gamma \alpha \varsigma)$. Quantitative
 обоц). And then оит $\omega \mu \varepsilon \gamma \alpha \varsigma$ repeats (redundant) $\tau \eta \lambda ı$ кочтоऽ. Cf. Mr 13:19 for oı $\alpha-$-тоьаvтп about like tribulation ( $\theta \lambda \iota \psi \iota \varsigma)$.

Rev 16:19
 again). In 11:3 a tenth part of the city fell. Babylon (Rome) is meant ( 17:18).

Fell ( $\varepsilon \pi \varepsilon \sigma \alpha v)$. Second aorist active indicative of $\pi / \pi \tau \omega$ ( $-\alpha v$ form in place of $-o v$ ).

Was remembered ( $\varepsilon \mu \nu \eta \sigma \theta \eta)$. First aorist (prophetic) passive indicative of $\mu \mu \nu \eta \sigma \kappa \omega$. Babylon (Rome) had not been overlooked. God was simply biding his time with Rome.

To give unto her ( $\delta o u v a \alpha u \tau \eta$ ). Second aorist active infinitive of $\delta \iota \delta \omega \mu$, epexegetic use as in 11:18; 16:9.
 $\tau \eta \varsigma ~ o \rho \gamma \eta \varsigma$ autou). "The cup of the wine of the wrath of his anger," using both $\theta \cup \mu \circ \varsigma$ (boiling rage) and o $\rho \gamma \eta$ (settled anger). See both in Jer 30:24.

Rev 16:20
Fled ( $\varepsilon \varphi \cup \gamma \varepsilon v$ ). Second aorist active indicative of $\varphi \varepsilon \cup \gamma \omega$. Islands sometimes sink in the sea in earthquakes ( 6:14).

Were not found (oux $\varepsilon u \rho \varepsilon \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\varepsilon u \rho \iota \sigma \kappa \omega$. See 20:11 for the same idea.

Rev 16:21
Hail ( $\chi \alpha \lambda \alpha \zeta \alpha$ ). As in 8:17; 11:19.
Every stone about the weight of a talent ( $\omega \varsigma \tau \alpha \lambda \alpha \nu \tau \iota \alpha \iota \alpha$ ). Old adjective (from тa入avтov), here only in N.T., but in Polybius and Josephus. See Ex 9:24 for the great hail in Egypt and also Jos 10:11; Isa 28:2; Eze 38:22 for hail as the symbol of God's wrath. In the LXX a $\tau \alpha \lambda \alpha \nu \tau 0 v$ ranged in weight from 108 to 130 pounds.

Because of the plague of hail ( $\varepsilon \kappa \tau \eta \varsigma \pi \lambda \eta \gamma \eta \varsigma \tau \eta \varsigma \chi \alpha \lambda \alpha \zeta \eta \varsigma)$. "As a result of the plague of hail." This punishment had the same effect as in verses 9,11 .

Exceeding great (M $\varepsilon \gamma \alpha \lambda \eta--\sigma \varphi \rho o \delta \rho \alpha$ ). Emphatic positions at ends of the clause (great--exceedingly).

## Revelation 17

Rev 17:1
I will show thee ( $\delta \varepsilon ı \xi \omega \sigma 0$ ). Future active of $\delta \varepsilon ו \kappa v v \mu$. It is fitting that one of the seven angels that had the seven bowls should explain the judgment on Babylon ( 16:19) already pronounced ( 14:8). That is now done in chapters Re 17; 18.

The judgment of the great harlot ( $\tau о к \rho \mu \alpha \tau \eta \varsigma \pi о \rho \vee \eta \varsigma \tau \eta \varsigma \mu \varepsilon \gamma \alpha \lambda \eta \varsigma$ ). The word крцца is the one used about the doom of Babylon in Jer 51:9 . Already in 14:8 Babylon is called the harlot. Порvŋऽ is the objective genitive, "the judgment on the great harlot."

That sitteth upon many waters ( $\tau \eta \varsigma \kappa \alpha Ө \eta \mu \varepsilon v \eta \varsigma \varepsilon \pi v \delta \alpha \tau \omega \nu \pi 0 \lambda \lambda \omega \nu$ ). Note triple use of the article $\tau \eta \varsigma$. In Jer 51:13 we have $\varepsilon \varphi^{\prime}$ v $\delta \alpha \sigma \pi$ то $\lambda \lambda$ оьऽ (locative in place of genitive as here). Babylon got its wealth by means of the Euphrates and the numerous canals for irrigation. Rome does not have such a system of canals, but this item is taken and applied to the New Babylon in 17:15. Nahum (Na 3:4) calls Nineveh a harlot, as Isaiah (Isa 23:16f. ) does Tyre.

Rev 17:2
 21:24 and "the kings of the inhabited earth" ( 16:14) either for human rulers in general or the vassal kings absorbed by the Roman Empire.

Committed fornication ( $\varepsilon \pi о \rho v \varepsilon \cup \sigma \alpha v)$. First aorist active indicative of $\pi о \rho v \varepsilon v \omega$. "In purchasing the favour of Rome by accepting her suzerainty and with it her vices and idolatries" (Swete).

Were made drunken ( $\varepsilon \mu \varepsilon \theta v \sigma \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\mu \varepsilon \theta v \sigma \kappa \omega$, old verb (from $\mu \varepsilon \theta v$ ), as in $\operatorname{Lu}$ 12:45, here only in the Apocalypse. Cf. Isa 51:7 and $\pi \varepsilon \pi о \tau เ \kappa \varepsilon v$ in Re 14:8. See 18:3.

Rev 17:3
He carried me away ( $\alpha \pi \eta \nu \varepsilon \gamma \kappa \varepsilon \nu \mu \varepsilon$ ). Second aorist active indicative of $\alpha \pi о \varphi \varepsilon \rho \omega$, to bear away, prophetic aorist. This verb is used of angels at death (Lu 16:22) or in an ecstasy (Re 21:10 and here).

In the Spirit ( $\varepsilon v \pi \nu \varepsilon v \mu \alpha \tau)$. Probably his own spirit, though the Holy Spirit is possible (1:10; 4:2; 21:10), without Paul's uncertainty (2Co 12:2 ). Cf. Eze 3:14f.; 8:3; 11:24.

Into a wilderness ( $\varepsilon \varsigma \varsigma \varepsilon \rho \eta \mu \circ v$ ). In Isa 21:1 there is to о $\rho \alpha \mu \alpha \tau \eta \varsigma \varepsilon \rho \eta \mu \circ v$ (the vision of the deserted one, Babylon), and in Isa 14:23 Babylon is called $\varepsilon \rho \eta \mu$ ov. John may here picture this to be the fate of Rome or it may be that he himself, in the wilderness (desert) this side of Babylon, sees her fate. In 21:10 he sees the New Jerusalem from a high mountain.

Sitting ( $\kappa \alpha \Theta \eta \mu \varepsilon v \eta \nu)$. Present middle participle of $\kappa \alpha \theta \eta \mu \alpha$ as in verse 1. "To manage and guide the beast" (Vincent).

Upon a scarlet-coloured beast ( $\varepsilon \pi$ Өпрюov коккıvov). Accusative with $\varepsilon \pi$ here, though genitive in verse 1. Late adjective (from коккос, a parasite of the ilex coccifera), a crimson tint for splendour, in Re 17:3,4; 18:12,16; Mt 27:28; Heb 9:19.

Full of names of blasphemy ( $\gamma \varepsilon \mu о \nu \tau \alpha$ оvон $\tau \alpha \beta \lambda \alpha \sigma \varphi \eta \mu \alpha \varsigma)$. See $13: 1$ for "names of blasphemy" on the seven heads of the beast, but here they cover the whole body of the beast (the first beast of 13:1; 19:20). The harlot city (Rome) sits astride this beast with seven heads and ten horns (Roman world power). The beast is here personified with masculine participles instead of neuter, like $\theta \eta \rho \circ o v(\gamma \varepsilon \mu \circ v \tau \alpha$ accusative singular, $\varepsilon \chi \omega \vee$ nominative singular, though some MSS. read $\varepsilon \chi \circ v \tau \alpha)$, construction according to sense in both instances. The verb $\gamma \varepsilon \mu \omega$ always has the genitive after it in the Apocalypse ( $4: 6,8 ; 5: 8 ; 15: 7 ; 17: 4 ; 21: 9$ ) save here and apparently once in 17:4.

Rev 17:4
Was arrayed ( $\eta \nu \pi \varepsilon \rho \iota \beta \varepsilon \beta \lambda \eta \mu \varepsilon v \eta$ ). Periphrastic past perfect indicative of $\pi \varepsilon \rho \iota \beta \alpha \lambda \lambda \omega$, to fling round one.

In purple and scarlet ( $л о р \varphi и \rho о и ข ~ к а ~ к о к к เ v о v) . ~ A c c u s a t i v e ~ r e t a i n e d ~ a f t e r ~ t h i s ~ p a s s i v e ~$ verb of clothing, as so often. Порфироия is old adjective for purple (from $\pi о \rho \varphi \cup \rho \alpha$ ), in N.T. only here and Joh 19:2,5 . See preceding verse for коккıvос.

Decked ( $\kappa \varepsilon \chi \rho v \sigma \omega \mu \varepsilon v \eta$ ). Perfect passive participle of $\chi \rho v \sigma o \omega$, old verb, to gild, to adorn with gold, here alone in N.T.

With gold and precious stone and pearls ( $\chi \rho \cup \sigma \iota \omega$ к $\left.\lambda_{\wedge} \theta \omega \tau \tau \mu \omega \kappa \alpha \mu \alpha \rho \gamma \alpha \rho ı \alpha \iota \varsigma\right)$. Instrumental case. X $\rho \cup \sigma \omega \omega$ is cognate with the participle. $\Lambda \iota \theta \omega \tau \tau \mu \omega$ is collective (18:12,16; 21:19 ). There is a $\zeta \varepsilon u \gamma \mu \alpha$ also with $\mu \alpha \rho \gamma \alpha \rho \iota \tau \alpha \iota(18: 12,16 ; 21: 21)$, for which word see Mt 7:6 . Probably John is thinking of the finery of the temple prostitutes in Asia Minor.

Full of abominations ( $\gamma \varepsilon \mu \circ v \beta \delta \varepsilon \lambda \nu \gamma \mu \alpha \tau \omega v$ ). Agreeing with $\pi о \tau \eta \rho \circ v, ~ " c u p " ~(n e u t e r ~$ singular accusative). Some MSS. read $\gamma \varepsilon \mu \omega \nu$ (nominative masculine like $\varepsilon \chi \omega v$ in verse 3, quite irregular). For $\beta \delta \varepsilon \lambda \nu \gamma \mu \alpha \tau \omega \nu$ (genitive after $\gamma \varepsilon \mu \circ v$ ) see $\operatorname{Mt~24:15;~(Mr~13:14),~common~}$ in the LXX for idol worship and its defilements (from $\beta \delta \varepsilon \lambda \nu \sigma \sigma \omega$, to render foul), both ceremonial and moral. See Jer 15:7.

Even the unclean things of her fornication ( $\kappa \alpha \tau \alpha \alpha \kappa \alpha \theta \alpha \rho \tau \alpha \tau \eta \varsigma \pi о \rho v \varepsilon ı \alpha \varsigma ~ \alpha v \tau \eta \varsigma)$. Either the accusative after $\gamma \varepsilon \mu \circ v$ as in verse 3 (and full of the unclean things of her fornication) or the object of $\varepsilon \chi 0 \cup \sigma a$, like $\pi о \tau \eta \rho \circ o v$.

## Rev 17:5

Upon her forehead a name written ( $\varepsilon \pi \tau \tau \mu \varepsilon \tau \omega \pi о v$ av $\tau \eta \varsigma$ оvона $\gamma \varepsilon \gamma \rho a \mu \mu \varepsilon v o v$ ). Roman harlots wore a label with their names on their brows (Seneca, Rhet. I. 2. 7; Juvenal VI. 122f.), and so here. In 19:16 Christ has a name on his garments and on his thigh, while in 14:1; 22:4 the redeemed have the name of God on their foreheads. There is undoubtedly a contrast between this woman here and the woman in chapter Re 12 .

Mystery ( $\mu v \sigma \tau \eta \rho$ ov). Either in apposition with ovo $\mu \alpha$ or as part of the inscription on her forehead. In either case the meaning is the same, that the name Babylon is to be interpreted mystically or spiritually (cf. $\pi v \varepsilon \nu \mu \alpha \tau \iota \kappa \omega \varsigma 11: 8$ ) for Rome.

The Mother of the Harlots and of the Abominations of the Earth ( $\mathrm{H} \eta \mathrm{M} \eta \tau \eta \rho \tau \omega \nu$ Порv $\omega v \kappa \alpha \tau \omega \nu \mathrm{~B} \delta \varepsilon \lambda \nu \gamma \mu \alpha \tau \omega \nu \tau \eta \varsigma \Gamma \eta \varsigma)$. The Metropolis of the Empire is the mother of harlotry and of the world's idolatries. Charles quotes Tacitus (Ann. XV. 44) about Rome as the city "quo cuncta undique atrocia aut pudenda confluunt celebranturque_."

Rev 17:6
Drunken with the blood of the saints ( $\mu \varepsilon \theta v o v \sigma \alpha v \varepsilon \kappa$ тоv $\alpha \mu \alpha \tau о \varsigma \tau \omega v \alpha \gamma \iota \omega v$ ). Present active feminine accusative singular participle of $\mu \varepsilon \theta v \omega$, old verb, to be drunk (Mt 24:49).

Of the martyrs of Jesus ( $\tau \omega \nu \mu \alpha \rho \tau v \rho \omega \nu$ I $\eta \sigma o v$ ). "Witnesses" ( $2: 13$ ) for Jesus (objective genitive) unto blood ( $16: 6 ; 18: 24$ ) and so martyrs in the modern sense of the word. "Drunk with blood" is a common idea with the ancients (Euripides, Josephus, Philo, Cicero, Pliny).

With a great wonder $(\theta \alpha \nu \mu \alpha \mu \varepsilon \gamma \alpha)$. Cognate accusative with $\varepsilon \theta \alpha \nu \mu \alpha \sigma \alpha$.
Rev 17:7
I will tell thee the mystery ( $\varepsilon \gamma \omega \varepsilon \rho \omega$ бо то $\mu v \sigma \tau \eta \rho \circ v)$ ). The angel gives his interpretation of the woman and the beast ( 17:7-18). Ep $\omega$ is the future active of $\varepsilon$ عाँov (defective verb), to tell, to say.

Rev 17:8
Was and is not ( $\eta \nu \kappa \alpha$ ovk $\varepsilon \sigma \tau \tau \nu$ ). Imperfect and present of $\varepsilon \varepsilon \mu$, an apparent antithesis to o $\eta \nu \kappa \alpha$ o $\omega \nu$ of 1:4. This is a picture of the beast of 13:1ff. which the woman is riding, but no longer just the empire, but one of the emperors who died (ouk عのтıv, is not).

And is about to come up out of the abyss ( $\kappa \alpha \mu \varepsilon \lambda \lambda \varepsilon \alpha v \alpha \beta \alpha ı v \varepsilon เ v \varepsilon \kappa \tau \eta \varsigma \alpha \beta v \sigma \sigma о v)$. That is, he is going to come to life again.

And to go into perdition ( $\kappa \alpha \varepsilon \varsigma \alpha \pi \omega \lambda \varepsilon \iota \alpha v v \pi \alpha \gamma \varepsilon$ ). So (and he goes into perdition) the best MSS. read rather than the infinitive $v \pi \alpha \gamma \varepsilon เ v$. Most interpreters see here an allusion to the "Nero redivivus" expectancy realized in Domitian, who was ruling when John wrote and who was called Nero redivivus.

Shall wonder ( $\theta a \nu \mu \alpha \sigma \theta \eta \sigma o v \tau \alpha)$. First future passive (deponent) of $\theta \alpha \nu \mu \alpha \zeta \omega$, with which compare $\varepsilon \theta \alpha v \mu \alpha \sigma \theta \eta$ in 13:3. John had wondered ( $\varepsilon \theta \alpha v \mu \alpha \sigma \alpha)$ in verse 6 "with the amazement of a horrible surprise; the world will wonder and admire" (Swete).

Whose name ( $\omega v$ оvo $\mu$ ). Singular ovo $\mu$, like $\pi \tau \omega \mu \alpha$ in 11:8. See 13:8 for the same description of those who worship the beast and for discussion of details.

When they behold ( $\beta \lambda \varepsilon \pi \sigma \nu \tau \omega v$ ). Genitive plural of the present active participle of $\beta \lambda \varepsilon \pi \omega$, agreeing with $\omega \nu$ (genitive relative) rather than with o катоккоuvteৎ (nominative just before $\omega v$ ).

How that (ot). "Namely that."

He was, and is not, and shall come ( $\eta \nu \kappa \alpha$ оик $\varepsilon \sigma \tau i v \kappa \alpha ~ \pi \alpha \rho \varepsilon \sigma \tau \alpha)$. Repetition of what is in verse 7 with $\pi \alpha \rho \varepsilon \sigma \tau \alpha$ (future of $\pi \alpha \rho \varepsilon \mu$, from which $\pi \alpha \rho o v \sigma \iota \alpha$ comes) in place of $\mu \varepsilon \lambda \lambda \varepsilon$, "parody of the divine name" (Charles) in 1:4,8; 4:8, "as the hellish antitype of Christ." The Neronic Antichrist has also a $\pi \alpha \rho o v \sigma i \alpha$.

Rev 17:9
Here is the mind which hath wisdom ( $\mathrm{H} \omega \delta \varepsilon$ o vouc o $\varepsilon \chi \omega v \sigma о \varphi\llcorner\alpha v$ ). "Here is the intelligence which has wisdom" (Charles). A variation of 13:18, but the same idea.

Seven mountains ( $\varepsilon \pi \tau \alpha \circ \rho \eta$ ). Rome was known as the city on seven hills (Vergil, Horace, Ovid, Cicero, etc.).

On which (o $о \boldsymbol{\sigma}--\varepsilon \pi^{\prime} \alpha v \tau \omega v$ ). "Where--upon them." Pleonasm like oтоv--єкє in 12:6. In $13: 1 \mathrm{ff}$. it is the beast that has the seven heads, while here the woman riding the beast has seven heads, a slight change in the symbolism, and the heads are further identified as kings.

Rev 17:10
Seven kings ( $\beta \alpha \sigma i \lambda \varepsilon \iota \varsigma \varepsilon \pi \tau \alpha$ ). This is another change in the symbolism. The identification of these seven kings is one of the puzzles of the book.

The five are fallen (o $\pi \varepsilon v \tau \varepsilon \varepsilon \pi \varepsilon \sigma \alpha v$ ). Second aorist active indicative of $\pi \iota \pi \tau \omega$ with the -av ending. Common for the downfall of kings (Eze 29:5; 30:6; Isa 21:9, etc.). See 2Sa 3:38

The one is (o $\begin{gathered}\text { ءц } \varepsilon \sigma \tau \iota v \text { ). The one when this vision is dated. }\end{gathered}$
The other is not yet come (o $\alpha \lambda \lambda o \varsigma ~ o u \pi \omega ~ \eta \lambda \theta \varepsilon v$ ). Prophetic second aorist active of $\varepsilon \rho \chi \circ \mu \alpha$. Charles takes this as the date of this "source" or part of the Apocalypse. But John could himself have used this language in the time of Domitian even if he was the one who had not yet come. The difficulty about counting these emperors is that Galba, Otho, Vitellius reigned so briefly that they hardly merit being included.

When he cometh ( $o \tau \alpha v \varepsilon \lambda \theta \eta$ ). Indefinite temporal clause for the future, with otav and the second aorist active subjunctive of $\varepsilon \rho \chi \circ \mu \alpha$, "whenever he comes."

He must continue a little while ( $\mathrm{o} \lambda \iota \gamma \circ \nu$ av $о \nu \delta \varepsilon \mu \varepsilon ı v \alpha$ ). Swete takes this to be Titus, who died September 13, 81, after a short reign.

Rev 17:11
Is himself also an eighth and is of the seven ( $\kappa \alpha \alpha \cup \tau о \varsigma ~ о \gamma \delta о о \varsigma ~ к \alpha ~ \varepsilon \kappa ~ \tau \omega v \varepsilon \pi \tau \alpha)$. This is the angel's interpretation and it looks like a reference to Domitian as the eighth, who is regarded as one of the seven because he was considered a second Nero (Nero redivivus). For $\varepsilon \kappa \tau \omega \nu \varepsilon \pi \tau \alpha$ see Ac 21:8. John may have used $\varepsilon \kappa \tau \omega v$ instead of $\varepsilon ı \varsigma \kappa \tau \omega \nu$ to avoid absolute identity between Domitian and Nero (Beckwith).

And he goeth unto perdition ( $\kappa \alpha \varepsilon \varsigma \varsigma \pi \pi \omega \lambda \varepsilon \iota v \nu \tau \pi \alpha \gamma \varepsilon$ ). As in verse 8. "Domitian was assassinated (September 18, 96), after a terrible struggle with his murderers. The tyrant's end was a symbol of the end to which the Beast which he personated was hastening" (Swete). Cf. 19:11-21.

Rev 17:12
Which have received no kingdom as yet (oı aorist (proleptic and prophetic) active indicative of $\lambda \alpha \mu \beta \alpha \nu \omega$. The heads are emperors and the horns are kings (both called $\beta \alpha \sigma \iota \lambda \varepsilon \iota \varsigma)$.

As kings ( $\omega \varsigma \beta \alpha \sigma \iota \lambda \varepsilon \iota \varsigma$ ). Compared to kings (see $\omega \varsigma$ in $1: 10 ; 4: 6 ; 9: 7 ; 13: 3 ; 14: 3 ; 16: 21$ ) without identification with the emperors, though succeeding them with "quasi-imperial powers" with the beast.

For one hour ( $\mu \tau \alpha \nu \omega \rho a v$ ). Accusative of extent of time, and that a brief time (18:10,16,19 ) in comparison with the beast ( 13:2).

Rev 17:13
Have one mind ( $\mu \iota \alpha \nu \gamma \nu \omega \mu \eta \nu \varepsilon \chi o v \sigma \iota)$. "One purpose" ( $\gamma \nu \omega \mu \eta$ from $\gamma \iota \nu \omega \sigma \kappa \omega$ ) as in Ac 20:3; 1Co 1:10. The new powers are allies of the beast.

They give their power and authority unto the beast ( $\tau \eta \nu \delta u v \alpha \mu \iota \nu \kappa \alpha \tau \eta \nu \varepsilon \xi_{0} \sigma \sigma \iota \alpha \nu$ $\alpha v \tau \omega \nu \tau \omega \theta \eta \rho \iota \omega \delta \iota \delta o a \sigma \iota v)$. Present active indicative of $\delta \iota \delta \omega \mu$. Just as the dragon gave both power and authority to the beast (13:2), so they are wholly at the service of the beast.

Rev 17:14
These (outo). These ten kings.
 to war. As allies of the beast (the servant of the dragon, 12:7) they will wage war with the Lamb (the enemy of the dragon). These kings gather for battle as in 16:13f.

And the Lamb shall overcome them ( $\kappa \alpha$ то $\alpha \rho v ı v \nu ı \kappa \eta \sigma \varepsilon \alpha \nu \tau о \nu \varsigma)$. Future active of $\nu \iota \kappa \alpha \omega$. This is the glorious outcome, victory by the Lamb over the coalition of kings as against the beast before.
 $\beta a \sigma \iota \lambda \varepsilon \omega v)$. The same words are again descriptive of Christ in 19:16, as of God in De 10:17 (God of gods and Lord of lords) and Da 10:17 (God of gods and Lord of kings). Cf. also 1 Ti 6:15; Re 1:5. Crowned heads are Christ's subjects.

And they also shall overcome that are with him ( $\kappa \alpha$ о $\mu \varepsilon \tau$ ' $\alpha v \tau o v$ ). "And those with him shall also overcome" (supply vıкךбоvбıv, not $\varepsilon \iota \sigma \iota v$ ). They will share in the triumph of the Lamb, as they shared in the conflict. Cf. $\mu \varepsilon \tau \alpha$ tov $\theta \eta \rho \iota o v$ in verse 12.

Called and chosen and faithful ( $\kappa \lambda \eta \tau о к \alpha \varepsilon к \lambda \varepsilon к \tau о ~ к а ~ \pi \iota \sigma \tau о) . ~ T h e s e ~ a r e ~ t h e ~ t h r e e ~ n o t e s ~$ of those who share in the victory. For $\kappa \lambda \eta \tau \circ \varsigma$ and $\varepsilon \kappa \lambda \varepsilon \kappa \tau \circ \varsigma$ see Mt 22:14 (contrasted); Ro 8:28ff.; $2 \mathrm{Pe} 1: 10$; Re $2: 10,13$. The elect are called and prove faithful.

Rev 17:15
Where the harlot sitteth (ov $\eta \pi о \rho v o \varsigma ~ \kappa \alpha \theta \eta \tau \alpha$ ). Relative adverb ov (where) referring to the waters $(v \delta \alpha \tau \alpha)$ of verse 1 on which the harlot sits. Present middle indicative of $\kappa \alpha \theta \eta \mu \alpha$.

Are peoples, and multitudes, and nations, and tongues ( $\lambda \alpha о \kappa \alpha$ о $\chi \lambda о \varepsilon \iota \sigma \iota \nu \alpha \alpha \theta \vee \eta$ $\kappa \alpha \gamma \lambda \omega \sigma \sigma \alpha)$. The O.T. uses "waters" as symbol for "peoples" (Isa 8:7; Jer 47:2; Ps 29:10, etc.). "Rome's greatest danger lay in the multitudes which were under her sway" (Swete).

Rev 17:16
These shall hate the harlot (ov $\mu \iota \sigma \eta \sigma o v \sigma \iota \nu \tau \eta \tau о \rho \nu \eta \nu$ ). Future active of $\mu \iota \sigma \varepsilon \omega$. Hovto is resumptive demonstrative pronoun (masculine) referring to the ten horns and the beast (neuter); construction according to sense. The downfall of Rome will come from the sudden change in subject peoples.

Shall make her desolate and naked ( $\eta \rho \eta \mu \omega \mu \varepsilon \nu \eta \nu \pi о \imath \sigma \sigma v \sigma \iota \nu \alpha v \tau \eta \nu \kappa \alpha \gamma \nu \mu \nu \eta \nu)$. Future active of $\pi o t \varepsilon \omega$ and perfect passive predicate accusative participle of $\varepsilon \rho \eta \mu \circ \omega$, old verb (from $\varepsilon \rho \eta \mu \circ \varsigma$ desolate), again in 18:16,19. $\Gamma \nu \mu \nu \eta \nu$ (naked) is predicate adjective.

Shall eat her flesh ( $\tau \alpha \varsigma \sigma \alpha \rho \kappa \alpha \varsigma ~ \alpha v \tau \eta \varsigma \varphi \alpha \gamma о \nu \tau \alpha)$. Future middle of the defective verb $\varepsilon \sigma \theta \iota \omega$, to eat. Note plural $\sigma \alpha \rho \kappa \alpha \varsigma$, portions of flesh (Jas 5:3) as in Ps 27:2; Mic 3:3.

Shall burn her utterly with fire ( $\alpha v \tau \eta \nu \kappa \alpha \tau \alpha \kappa \alpha v \sigma o v \sigma \iota v \varepsilon \nu \pi \nu \rho$ ). Future active of $\kappa \alpha \tau \alpha \kappa \alpha \iota \omega$, to burn down (perfective use of $\kappa \alpha \iota \omega$ ). John wrote before the days of Alaric, Genseric, Ricimer, Totila, with their hordes which devastated Rome and the west in the fifth and sixth centuries. "No reader of the Decline and Fall can be at a loss for materials which will at once illustrate and justify the general trend of St. John's prophecy" (Swete).

Rev 17:17
Did put ( $\varepsilon \delta \omega \kappa \varepsilon v$ ). "Did give" (first aorist active of $\delta \iota \delta \omega \mu$.
To do his mind ( $\pi \circ \not \eta \sigma \alpha \tau \eta \nu \gamma \nu \omega \mu \eta \nu \alpha \nu \tau o v$ ). Epexegetic first aorist active infinitive of $\pi o เ \varepsilon \omega$ after $\varepsilon \delta \omega \kappa \varepsilon \nu$, as often in this book. They are of one mind (verse 13) because God put them up to it, clear statement of God's over-ruling hand among the nations.

Until the words of God should be accomplished ( $\alpha \chi \rho \tau \varepsilon \lambda \varepsilon \sigma \theta \eta \sigma o v \tau \alpha$ o $\lambda о \gamma o \tau$ тov $\theta \varepsilon o v$ ). Temporal clause about the future with $\alpha \chi \rho$ (like $\varepsilon \omega \varsigma$ ), with the future indicative of $\tau \varepsilon \lambda \varepsilon \omega$, but with aorist passive subjunctive $\tau \varepsilon \lambda \varepsilon \sigma \theta \omega \sigma \iota$ in $15: 8$. For $\tau \varepsilon \lambda \varepsilon \omega$ see also 10:7. For "the words of God" see 19:9. They will be fulfilled.

Rev 17:18
The woman ( $\eta \gamma \cup \vee \eta$ ). She is now explained after the beast has been interpreted. Verse 9 made it plain enough, but this verse demonstrates that the woman is the city of Rome "which reigneth ( $\eta$ عхоט $\alpha \alpha \beta a \sigma \iota \lambda \varepsilon \iota \alpha \nu$, the one having a kingdom) over the kings of the earth $(\varepsilon \pi \tau \omega \vee \beta a \sigma \iota \lambda \varepsilon \omega \nu \tau \eta \varsigma \gamma \eta \varsigma)$." Rome followed Babylon, and other cities may follow in their train.

## Revelation 18

Rev 18:1
Coming down out of heaven ( $\kappa \alpha \tau \alpha \beta \alpha ı v o v \tau \alpha \varepsilon \kappa \tau о v$ оטраvоv). Present active predicate participle. Not the angel of 17:1,7,15 (John's guide), but one announcing the doom of Babylon (Rome). As in 10:1; 20:1 .

Was lightened $(\varepsilon \varphi \omega \tau \iota \sigma \theta \eta)$. First aorist passive of $\varphi \omega \tau \iota \zeta \omega$, old causative verb (from $\varphi \omega \varsigma$, light), common in N.T. as in Re 18:1; 21:23; 22:5.

With his glory ( $\varepsilon \kappa \tau\rceil \varsigma \delta o \xi \eta \varsigma \alpha \cup \tau o v$ ). "By reason of ( $\varepsilon \kappa$ as in $8: 13 ; 16: 10$ ) his glory." "So recently has he come from the Presence that in passing he flings a broad belt of light across the dark earth" (Swete).

Rev 18:2
Fallen, fallen is Babylon the great ( $\varepsilon \pi \varepsilon \sigma \varepsilon v, \varepsilon \pi \varepsilon \sigma \varepsilon \nu B \alpha \beta v \lambda \omega v \eta \mu \varepsilon \gamma \alpha \lambda \eta$ ). The very words of 14:8: "Did fall, did fall Babylon the great." Prophetic aorists of $\pi \iota \pi \tau \omega$ repeated like a solemn dirge of the damned.

Is become ( $\varepsilon \gamma \varepsilon v \varepsilon \tau o)$. Prophetic aorist middle.
A habitation of devils (катоькŋтпрıоv). Late word (from катоькع $\omega$, to dwell), in N.T. only here and Eph 2:22. Devils should be demons, of course. So Isaiah prophesied of Babylon (Isa 12:21f. ) and also Jeremiah (Jer 50:39 ) and Zephaniah of Nineveh (Zep 2:14 ). Both Babylon and Nineveh are ruins.

A hold of every unclean spirit ( $\varphi \nu \lambda \alpha \kappa \eta \pi \alpha \nu \tau о \varsigma \pi \nu \varepsilon \cup \mu \alpha \tau о \varsigma ~ \alpha \kappa \alpha \theta \alpha \rho \tau о v)$. Фи入акך is garrison or watch-tower as in Hab 2:1, rather than a prison (20:7).

A hold of every unclean and hateful bird ( $\varphi$ и $\alpha \kappa \eta \pi \alpha \nu \tau о \varsigma ~ о \rho \nu \varepsilon о v ~ \alpha к \alpha \theta \alpha \rho \tau о v ~ к \alpha$ $\mu \varepsilon \mu \iota \sigma \eta \mu \varepsilon v o v)$. Opveov is old word for bird, in N.T. only $\operatorname{Re} 18: 2 ; 19: 17,21$. "The evil spirits, watching over fallen Rome like night-birds or harpies that wait for their prey, build their eyries in the broken towers which rise from the ashes of the city" (Swete). Long ago true of Babylon and Nineveh, some day to be true of Rome.

Rev 18:3
By ( $\varepsilon \kappa$ ). "As a result of." Some MSS. omit "of the wine" ( $\tau$ ov oıvov). Cf. 14:10; 16:10.
Have fallen ( $\pi \varepsilon \pi \tau \omega \kappa \alpha v$ ). Perfect active third personal of $\pi \iota \pi \tau \omega$ for usual $\pi \varepsilon \pi \tau \omega \kappa \alpha \sigma$. Some MSS. read $\pi \varepsilon \pi \omega \kappa \alpha v$ (have drunk), from $\pi \iota v \omega$ like the metaphor in $14: 8,10 ; 16: 19 ; 17: 2$ . See 17:2 for the same charge about the kings of the earth.

The merchants of the earth (o $\varepsilon \mu \pi о \rho о \tau \eta \varsigma \gamma \eta \varsigma)$. Old word for one on a journey for trade (from $\varepsilon v, \pi о \rho о \varsigma)$, like drummers, in N.T. only Mt 13:45; Re 18:3,11,15,23 . Like $\varepsilon \mu \pi \sigma \rho \iota \nu$ (Joh 2:16 ) and $\varepsilon \mu \pi о \rho \varepsilon v o \mu a$ (Jas 4:13 ).

Waxed rich ( $\varepsilon \pi \lambda o v \tau \eta \sigma \alpha v$ ). First ingressive aorist active indicative of $\pi \lambda o v \tau \varepsilon \omega$, to be rich (cf. 3:17). Here alone in the N.T. do we catch a glimpse of the vast traffic between east and west that made Rome rich.

Of her wantonness ( $\tau 0 v \sigma \tau \rho \eta v o v \varsigma ~ \alpha v \tau \eta \varsigma)$. Late word for arrogance, luxury, here alone in N.T. See $\sigma \tau \rho \eta \nu \iota \omega \omega$ in verses 7,9 , to live wantonly.

## Rev 18:4

Come forth, my people, out of her ( $\varepsilon \xi \varepsilon \lambda \theta a \tau \varepsilon$, o $\lambda \alpha o \varsigma \mu o v, \varepsilon \xi \alpha v \tau \eta \varsigma)$. Second aorist (urgency) active imperative (- $\alpha$ form) of $\varepsilon \xi \varepsilon \rho \chi о \mu \alpha$. Like Isa 48:20; 52:11; Jer 50:8; 51:6, (about Babylon). See also the call of Abram (Ge 12:1). the rescue of Lot (Ge 19:12ff. ). In the N.T. see Mr 13:4; 2Co 6:14; Eph 5:11; 1Ti 5:11. Ho $\lambda \alpha o \varsigma$ is vocative with the form of the nominative.

That ye have no fellowship with her sins (ıva $\mu \eta \sigma u v \kappa \circ \iota \omega \nu \eta \sigma \eta \tau \varepsilon \tau \alpha \iota \varsigma \alpha \mu \alpha \rho \tau \alpha ı \varsigma \alpha \cup \tau \eta \varsigma)$. Purpose clause with $\imath v \alpha \mu \eta$ and the first aorist active subjunctive of $\sigma v v \kappa o \imath v \omega v \varepsilon \omega$, old compound ( $\sigma v \nu$, together, кoı $\nu \omega v o \varsigma$, partner), in N.T. only here, Php 4:14; Eph 5:11 . With associative instrumental case $\alpha \mu \alpha \rho \tau \iota \alpha ı \varsigma$.

And that ye receive not of her plagues ( $\kappa \alpha \varepsilon \kappa \tau \omega \nu \pi \lambda \eta \gamma \omega \nu \alpha v \tau \eta \varsigma \tau \nu \alpha \mu \lambda \alpha \beta \eta \tau \varepsilon$ ). Another purpose clause dependent on the preceding, with $ו v \alpha \mu \eta$ and the second aorist active subjunctive of $\lambda \alpha \mu \beta \alpha \nu \omega$, and with proleptic emphatic position of $\varepsilon \kappa \tau \omega \nu \pi \lambda \eta \gamma \omega \nu \alpha v \tau \eta \varsigma$ before ${ }_{\mathrm{t}} \mathrm{v} \alpha \mu \eta$.

Rev 18:5
Have reached ( $\varepsilon \kappa о \lambda \lambda \eta \theta \eta \sigma \alpha v$ ). First aorist passive (deponent) indicative of ко $\lambda \lambda \alpha \omega$, old verb (from ко $\lambda \lambda \alpha$, gluten, glue), to cleave to, to join one another in a mass "up to heaven" (axp тov ov $\alpha$ 人vov). Cf. Jer 51:9; Zec 14:5.

Hath remembered ( $\varepsilon \mu \nu \eta \mu \circ v \varepsilon v \sigma \varepsilon v)$. First aorist (prophetic) active indicative of $\mu \nu \eta \mu \mathrm{ov} \mathrm{\varepsilon v} \omega$, here with the accusative ( $\alpha \delta \iota \kappa \eta \mu \alpha \tau \alpha$, iniquities) instead of the genitive (Col 4:18).

Rev 18:6
Render as she rendered ( $\alpha \pi \sigma \delta o \tau \varepsilon \omega \varsigma \alpha \pi \varepsilon \delta \omega \kappa \varepsilon v$ ). Second aorist (effective) active imperative and first aorist (effective) active of $\alpha \pi o \delta \delta \delta \omega \mu$, old and common verb for requital, to give back, the lex talionis which is in the O.T. (Jer 50:15,29; 51:24,56; Ps $137: 8$ ), and in the N.T. also (Mt 7:2 ). Here the reference is to persecutions by Rome, particularly the martyrdom of the saints $(18: 24 ; 19: 2)$.

Double the double ( $\delta \iota \pi \lambda \omega \sigma \alpha \tau \varepsilon \tau \alpha \delta_{\imath} \pi \lambda \alpha$ ). First aorist imperative of $\delta \iota \pi \lambda o \omega$, old verb (from $\delta \iota \pi \lambda o o \varsigma$, double, Mt 23:15 ), here only in N.T. $\Delta \iota \pi \lambda \alpha$ is simply the neuter plural accusative (cognate) contract form for $\delta \iota \pi \lambda o \alpha$ (not $\delta \iota \pi \lambda \omega$ ). Requite here in double measure, a full requital (Ex 22:4,7,9; Isa 40:2; Jer 16:18; 17:18; Zec 9:12 ). The double recompense was according to the Levitical law.

Which she mingled ( $\omega \varepsilon \kappa \varepsilon \rho \alpha \sigma \varepsilon v$ ). First aorist active indicative of $\kappa \varepsilon \rho \alpha \nu \nu v \mu$. The relative $\omega$ is attracted to the locative case of its antecedent $\pi о \tau \eta \rho \iota \omega$ (cup), for which see $14: 8,10$; 17:4; 18:3.

Mingle unto her double ( $\kappa \varepsilon \rho \alpha \sigma \alpha \tau \varepsilon \alpha v \tau \eta \delta \iota \pi \lambda o v v$ ). First aorist active imperative of the same verb кєраขvv , with the same idea of double punishment.

Rev 18:7
How much soever (oo $)$. Indefinite quantitative relative pronoun oooc in the accusative (cognate) neuter plural object of $\varepsilon \delta o \xi \alpha \sigma \varepsilon \nu$ (first aorist active indicative of $\delta o \xi \alpha \zeta \omega$ ).

Herself ( $\alpha \cup \tau \eta v$ ). Reflexive pronoun, accusative also with $\varepsilon \delta o \xi \alpha \sigma \varepsilon v$.
Waxed wanton ( $\varepsilon \sigma \tau \rho \eta \nu \iota \sigma \sigma \varepsilon$ ). First aorist (ingressive) active indicative of $\sigma \tau \rho \eta \nu \iota \alpha \omega$ (to live luxuriously), verb in late comedy instead of $\tau \rho \cup \varphi \alpha \omega$ (Jas 5:5), from $\sigma \tau \rho \eta v o \varsigma$ (Re 18:3 ), only here in N.T.

So much give her of torment and mourning ( $\tau о \sigma о v \tau о v ~ \delta о \tau \varepsilon \alpha v \tau \eta \beta \alpha \sigma \alpha v \iota \sigma \mu \nu \kappa \alpha$ $\pi \varepsilon v \theta o \varsigma)$. Second aorist active imperative of $\delta \iota \delta \omega \mu$, to give. The correlative pronoun tooov $\tau 0 v$ is masculine singular accusative, agreeing with $\beta \alpha \sigma \alpha v \iota \sigma \mu o v$, for which see 9:5; 14:11, and is understood with the neuter word $\pi \varepsilon v \theta$ oc (mourning), in N.T. only in Jas 4:9; Re 18:7ff.; 21:4 (kin to $\pi \alpha \theta$ oб, $\pi \varepsilon \vee о \mu \alpha$ ).

I sit a queen ( $\left.\kappa \alpha \theta \eta \mu \alpha \beta \alpha \sigma \iota \lambda_{\iota} \sigma \sigma \alpha\right)$. Predicate nominative for the old form $\beta \alpha \sigma \iota \lambda \varepsilon \iota \alpha$ ( $\beta a \sigma \iota \lambda ı \varsigma)$, as in Mt 12:42. Babylon and Tyre had preceded Rome in such boasting (Isa 47:7-9; Eze 27:3; 28:2; Zep 2:15 ).

And am no widow ( $\kappa \alpha \chi \eta \rho \alpha$ оик $\varepsilon \not \mu)$. Feminine of the adjective $\chi \eta \rho \circ \varsigma$ (barren), old word (Mr 12:40).

Shall in no wise see mourning ( $\pi \varepsilon \nu \theta \circ \varsigma$ ov $\mu \eta \iota \delta \omega$ ). Confident boast of security with emphatic position of $\pi \varepsilon v \theta \circ \varsigma$ (see above) and double negative ov $\mu \eta$ with the second aorist active subjunctive of opa $\omega$ (defective verb).

Rev 18:8
Therefore ( $\delta \iota \alpha$ tov $\tau$ ). Because of her presumption added to her crimes.
In one day ( $\varepsilon \nu \mu \iota \alpha \eta \mu \varepsilon \rho \alpha$ ). Symbolical term for suddenness like $\mu \iota \alpha \omega \rho \alpha$, in one hour (18:10,16,19). John has in mind still Isa 47:7-9 .

Shall come ( $\eta \xi$ ovoıv). Future active of $\eta \kappa \omega$. Her plagues are named (death, mourning, famine).

She shall be utterly burned (катакаvӨŋбєта). Future passive of $\kappa \alpha \tau \alpha \kappa \alpha \iota \omega$ (perfective use of $\kappa \alpha \tau \alpha$ ).

With fire ( $\varepsilon v \pi v \rho$ ). "In fire," as in 17:16.
Which judged her (o крıvas $\alpha \nu \tau \eta \nu$ ). Articular first aorist active participle of $\kappa \rho \imath v \omega$ referring to кирıоя о $\theta \varepsilon o \varsigma$ (the Lord God). The doom of Babylon is certain because of the power of God.

Rev 18:9
Shall weep ( $\kappa \lambda \alpha v \sigma o v \sigma \iota v)$. Future active of $\kappa \lambda \alpha \iota \omega$, middle $\kappa \lambda \alpha v \sigma o v \tau \alpha$ in Attic, as in Joh 16:20 .

And wail over her ( $\kappa \alpha$ кочоvта $\varepsilon \pi^{\prime} \alpha \cup \tau \eta v$ ). Future direct middle of колт $\omega$, old verb, to beat, to cut, middle to beat oneself ( $\operatorname{Re} 1: 7$ ). For combination with $\kappa \lambda \alpha \omega \omega$ as here see Lu

When they look upon (o $\tau \alpha \nu \beta \lambda \varepsilon \pi \omega \sigma เ v$ ). Indefinite temporal clause with o $\tau \alpha v$ and the present active subjunctive of $\beta \lambda \varepsilon \pi \omega$.

The smoke of her burning ( $\tau \circ v$ калvov $\tau \eta \varsigma \pi v \rho \omega \sigma \varepsilon \omega \varsigma ~ \alpha \cup \tau \eta \varsigma) . ~ П \nu \rho \omega \sigma \iota \varsigma ~ i s ~ a n ~ o l d ~ w o r d ~$ (from $\pi$ upow to burn), in N.T. only 1Pe 4:12; Re 18:9,18 . See verse 8 for other plagues on Rome, but fire seems to be the worst (17:16; 18:8,9,17; 19:3).

Rev 18:10
Standing afar off ( $\alpha \pi о \mu \alpha \kappa \rho о \theta \varepsilon \nu \varepsilon \sigma \tau \eta \kappa о \tau \varepsilon \varsigma)$. Perfect active (intransitive) participle of เซт $\eta \mu$. Vivid picture of the terrible scene, fascinated by the lurid blaze (cf. Nero's delight in the burning of Rome in A.D. 64), and yet afraid to draw near. On $\alpha \pi о \mu \alpha \kappa \rho о \theta \varepsilon v$ see Mr 5:6 . There is a weird charm in a burning city. They feared the same fate (cf. verse 7 for $\beta a \sigma \alpha v i \sigma \mu o v$, torment).

Woe, woe, the great city (ovaı, ovaı, $\eta \pi \sigma \lambda ı \varsigma \eta \mu \varepsilon \gamma \alpha \lambda \eta$ ). Only example in the Apocalypse of the nominative with ova except verses 16,19, though in Lu 6:25 and common in LXX (Isa 5:7,11, etc.). For the dative see Re 8:13 , once so "strong" ( $\eta$ เซ $\chi \cup \rho \alpha$ )!

In one hour ( $\mu \mathrm{\mu} \alpha \omega \rho \alpha$ ). Repeated in verses 16,19 , and like $\mu \alpha \eta \mu \varepsilon \rho \alpha$ (in one day) in verse 8. Some MSS. have here $\mu \alpha \nu \omega \rho a v$, like notav $\omega \rho \alpha v$ (accusative of extent of time) in 3:3. See verse 8 (о крıvac) for $\eta$ крıбıৎ бov (thy judgment). This is the dirge of the kings.

Rev 18:11
The merchants (o $\varepsilon \mu \pi \mathrm{o} \rho \mathrm{o}$ ). As in 18:3,15,23. The dirge of the merchants follows the wail of the kings.

Weep and mourn ( $\kappa \lambda \alpha \ldots o v \sigma \iota v \kappa \alpha \pi \varepsilon v \theta$ ov $\kappa \iota v$ ). Present active indicatives of $\kappa \lambda \alpha \omega \omega$ and $\pi \varepsilon v \theta \varepsilon \omega$ as in verses 9 (for $\kappa \lambda \alpha \omega \omega$ ), 15,19 .
 оикєт). Reason enough for their sorrow over Rome's fall. Го $\boldsymbol{\sigma}$ с is old word (from $\gamma \varepsilon \mu \omega$ to be full) for a ship's cargo (Ac 21:3) and then any merchandise (Re 18:11f. ). Galen, Pliny, Aristides tell of the vastness of the commerce and luxury of Rome, the world's chief market. Many of the items here are like those in the picture of the destruction of Tyre in Eze 26; 27 . There are twenty-nine items singled out in verses 12,13 of this merchandise or cargo ( $\gamma \mathrm{\gamma} \mu \mathrm{ov}$ ), imports into the port of Rome. Only a few need any comment.

Rev 18:12
Of fine linen ( $\beta v \sigma \sigma \iota v o v$ ). Genitive case after $\gamma$ о $\mu о v$, as are all the items to коккıvov. Old adjective from $\beta$ טvoroc (linen, Lu 16:19), here a garment of linen, in N.T. only Re 18:12,16; 19:8,14.
 15:17,20; Lu 16:19.

Silk ( $\sigma \iota \iota к о v)$. So the uncials here. To $\sigma \eta \rho ı \kappa$ (the silken fabric) occurs in Plutarch, Strabo, Arrian, Lucian, only here in N.T. Probably from the name of the Indian or Chinese people (o $\Sigma \eta \rho \varepsilon \varsigma$ ) from whom the fabric came after Alexander invaded India. Silk was a costly article among the Romans, and for women as a rule.

Scarlet (коккıvov). See 17:4; 18:16.
All thyine wood ( $\pi \alpha v \xi \cup \lambda o v \theta v i v o v)$. Now accusative again without $\gamma \circ \mu \circ v$ dependence. An odoriferous North African citrus tree, prized for the colouring of the wood for diningtables, like a peacock's tail or the stripes of a tiger or panther. Here only in N.T.

Of ivory ( $\varepsilon \lambda \varepsilon \varphi a v \tau i v o v$ ). Old adjective (from $\varepsilon \lambda \varepsilon \varphi a \varsigma$ elephant) agreeing with $\sigma \kappa \varepsilon v o \varsigma$ (vessel), here only in N.T. Cf. Ahab's ivory palace (1Ki 22:39).

Of marble ( $\mu \alpha \rho \mu \alpha \rho o v)$. Old word (from $\mu \alpha \rho \mu \alpha \iota \rho \omega$, to glisten), genitive after $\sigma \kappa \varepsilon v o \varsigma$ (vessel), here only in N.T.

Rev 18:13
Cinnamon ( $\kappa ı v \alpha \mu \omega \mu \circ v$ ). Old word transliterated into English, here only in N.T. Of Phoenician origin (Herodotus) as to name and possibly from South China.

Spice $(\alpha \mu \omega \mu \nu v)$. A fragrant plant of India, $\alpha \mu \circ \mu \nu \mu$, for perfume.
Incense ( $\theta v \mu \nu \alpha \mu \alpha \tau)$. See 5:8; 8:3.
Ointment ( $\mu v \rho \circ \nu$ ). See Mt 26:7.
Frankincense ( $\lambda$ ( $\beta \alpha v o v$ ). See 8:3.
Fine flour ( $\sigma \varepsilon \mu \iota \delta \lambda \lambda \iota v$ ). Old word for finest wheaten flour, here only in N.T.
Of horses ( $\iota \pi \pi \omega v$ ). Here then is a return to the construction of the genitive after $\gamma \rho \mu \circ v$ in verse 12, though not used here, an anomalous genitive construction (Charles).

Of chariots ( $\rho \varepsilon \delta \omega v$ ). A Gallic word for a vehicle with four wheels, here only in N.T.
Of slaves ( $\sigma o \mu \alpha \tau \omega v$ ). "Of bodies," treated as animals or implements, like the horses and the chariots (cf. rickshaw men in China). This use of $\sigma \omega \mu \alpha$ for slave occurs in Ge 34:29; Tob 10:11 ( $\sigma \omega \mu \alpha \tau \alpha \kappa \alpha \kappa \tau \eta \nu \eta$, slaves and cattle); II Macc. 8:11.

Souls of men ( $\psi \vee \chi \alpha \varsigma \alpha v \theta \rho \omega \pi \omega v$ ). Deissmann (Bible Studies, p. 160) finds this use of $\sigma \omega \mu \alpha$ for slave in the Egyptian Delta. Return to the accusative $\psi v \chi \alpha \varsigma$. From Nu 31:35; 1Ch 5:21; Eze 27:13. This addition is an explanation of the use of $\sigma \omega \mu \alpha \tau \alpha$ for slaves, "human live stock" (Swete), but slaves all the same. Perhaps кa here should be rendered "even," not "and": "bodies even souls of men." The slave merchant was called $\sigma \omega \mu \alpha \tau \varepsilon \mu \pi о \rho о \varsigma$ (body merchant).

Rev 18:14
The fruits ( $\eta$ o $\pi \omega \rho \alpha$ ). The ripe autumn fruit (Jer 40:10,12 ). Here only in N.T. Of uncertain etymology (possibly опоৎ, sap, $\omega \rho \alpha$, hour, time for juicy sap). See Jude 1:12 for $\delta \varepsilon v \delta \rho \alpha \varphi \theta$ เvo $\quad \omega \rho$ ıvoc (autumn trees).

Which thy soul lusteth after ( $\sigma 0 \cup \tau \eta \varsigma \varepsilon \pi \nexists v \mu \not a \varsigma \tau \eta \varsigma \psi v \chi \eta \varsigma)$. "Of the lusting of thy soul."

Are gone from thee ( $\alpha \pi \eta \lambda \theta \varepsilon v \alpha \pi \sigma \sigma o v)$. Prophetic aorist active indicative of $\alpha \pi \varepsilon \rho \chi \circ \mu \alpha$ with repetition of $\alpha \pi 0$.

All things that were dainty and sumptuous ( $\pi \alpha \nu \tau \alpha \tau \alpha \lambda ı \pi \alpha \rho \alpha \kappa \alpha \tau \alpha \lambda \alpha \mu \pi \rho \alpha)$. "All the dainty and the gorgeous things." $\Lambda ı \pi \alpha \rho о \varsigma$ is from $\lambda ı \pi \circ \varsigma$ (grease) and so fat, about food (here only in N.T.), while $\lambda \alpha \mu \pi \rho o s$ is bright and shining (Jas 2:2f. ), about clothing.

Are perished from thee ( $\alpha \pi \omega \lambda \varepsilon \tau 0 \alpha \pi \sigma$ $\sigma o v$ ). Prophetic second aorist middle indicative of $\alpha \pi 0 \lambda \lambda \nu \mu$ (intransitive).

Shall find them no more at all (оикєт ov $\mu \eta$ $\alpha \cup \tau \alpha \varepsilon \cup \rho \eta \sigma o v \sigma \iota v$ ). Doubled double negative with future active, as emphatic a negation as the Greek can make.

Rev 18:15
Of these things ( $\tau 0 \cup \tau \omega v$ ). Listed above in verses 12-14.
Who were made rich by her (o $\pi \lambda$ ovt $\eta \sigma \alpha \nu \tau \varepsilon \varsigma \pi$ ' $\alpha \cup \tau \eta \varsigma$ ). "Those who grew rich (ingressive aorist active participle of $\pi \lambda$ out $\varepsilon \omega$, for which see verses 3,13 ) from her."

Shall stand afar off ( $\alpha \pi 0 \mu \alpha \kappa \rho \circ \theta \varepsilon v \sigma \tau \eta \sigma o v \tau \alpha$ ). Future middle of $\iota \sigma \tau \eta \mu$. Repeating the picture in verse 10 . Again in verse 17 . See verse 11 for the two participles $\kappa \lambda \alpha \ldots v \tau \varepsilon \varsigma \kappa \alpha$ $\pi \varepsilon v$ Өouvteऽ.

Rev 18:16
For the Woe see verses 10,19 . For the next clause see $17: 4$ with the addition here of $\beta$ voбıvov (18:12).

For in one hour so great riches is made desolate (oт $\mu \alpha \omega \rho \alpha \eta \rho \eta \mu \omega \theta \eta$ о тобоvтоऽ $\pi \lambda$ оитоৎ). The reason (от) for the "woe." First aorist passive indicative of $\varepsilon \rho \eta \mu \circ \omega$, for which verb see 17:16; 18:19. This is the dirge of the merchants.

Rev 18:17
Shipmaster ( $\kappa \nu \beta \varepsilon \rho \vee \eta \tau \eta \varsigma)$. Old word (from $\kappa \nu \beta \varepsilon \rho v \alpha \omega$, to steer), helmsman, sailing-
 er).

That saileth any whither (o $\varepsilon \pi$ то $\pi \frac{}{} \quad \pi \lambda \varepsilon \omega v$ ). "The one sailing to a place." See Ac 27:2
 (sea) here for толоv (place), but it makes sense as it is.

Mariners (vavid). Old word (from vavc, ship), in N.T. only here and Ac 27:27,30 .
Gain their living by the sea ( $\tau \eta v \theta \alpha \lambda \alpha \sigma \sigma \alpha \nu \varepsilon \rho \gamma \alpha \zeta о \nu \tau \alpha)$. "Work the sea." This idiom is as old as Hesiod for sailors, fishermen, etc. See verses 10,15 .

Rev 18:18
As they looked ( $\beta \lambda \varepsilon \pi \sigma v \tau \varepsilon \varsigma)$. Present active participle of $\beta \lambda \varepsilon \pi \omega$. See o o $\alpha v \beta \lambda \varepsilon \pi \omega \sigma \tau v$ in verse 10 .

What city is like the great city? ( $\tau \iota \varsigma$ о $\mu о \iota \alpha \tau \eta \pi о \lambda \varepsilon \tau \eta \mu \varepsilon \gamma \alpha \lambda \eta \iota$ ). No $\pi о \lambda ı \varsigma$ with $\tau \iota \varsigma$, but implied. Associative instrumental case, as usual, with ouota. "The eternal city" is eternal no longer.

Rev 18:19
They cast dust ( $\varepsilon \beta \alpha \lambda o v \chi o v v$ ). Second aorist active of $\beta \alpha \lambda \lambda \omega$. Xov is old word (from $\chi \varepsilon \omega$ to pour) for heap of earth, dust, in N.T. only here and Mr 6:11. Cf. Eze 27:30; Lu 10:13 . This is the dirge of the sea-folk (cf. verses 10,16 ).

By reason of her costliness ( $\varepsilon \kappa \tau \eta \varsigma \tau \iota \mu \circ \tau \eta \tau \circ \varsigma \alpha \cup \tau \eta \varsigma)$. Occasionally in later literary Greek, though here only in N.T. and not in LXX. The same use of $\tau \iota \mu \eta$ appears in 1Pe 2:7. Common in the papyri as a title like "Your Honor" (Moulton and Milligan's Vocabulary).

Rev 18:20
Rejoice over her (Evppaıvov $\varepsilon \pi^{\prime} \alpha v \tau \eta$ ). Present middle imperative of $\varepsilon v \varphi \rho \alpha \iota v \omega$, for which verb see 11:10, used there of the joy of the wicked over the death of the two witnesses, just the opposite picture to this. "The song of doom" (Charles) here seems to be voiced by John himself.

God hath judged your judgment ( $\varepsilon \kappa \rho \iota v \varepsilon v$ о $\theta \varepsilon \circ \varsigma$ то к $\rho \not \mu \alpha$ ). First aorist (prophetic) active of $\kappa \rho \iota \nu \omega$ and cognate accusative $\kappa \rho \iota \mu \alpha$, here a case for trial (Ex 18:22; 1Co 6:7 ), not a sentence as in 17:1. God has approved the case of heaven.

Rev 18:21
A strong angel ( $\varepsilon \iota \varsigma \propto \gamma \gamma \varepsilon \lambda о \varsigma \iota \sigma \cup \rho \circ \varsigma)$. Here $\varepsilon \iota \varsigma=a$, just an indefinite article, not "one" as a numeral.

Took up ( $\eta \rho \varepsilon \nu$ ). First aorist active indicative of $\alpha \iota \rho \omega$.
As it were a great millstone ( $\omega \varsigma \mu \nu \lambda \iota \nu o v \mu \varepsilon \gamma \alpha v$ ). Late adjective, in inscriptions, here only in N.T., made of millstone ( $\mu \nu \lambda \circ \varsigma$, Mt 18:6; Re 18:22 ), while $\mu \nu \lambda \iota \kappa \varsigma$ (Lu 17:2 ) means belonging to a mill. This is not a small millstone turned by women (Mt 24:41), but one requiring an ass to turn it ( $\mathrm{Mr} 9: 42$ ), and so "a great" one.

Cast $(\varepsilon \beta \alpha \lambda \varepsilon \nu)$. Second aorist active of $\beta \alpha \lambda \lambda \omega$, to hurl.
With a mighty fall (o $\rho \mu \eta \mu \alpha \tau$ ). Instrumental case (manner) of o $\rho \mu \eta \mu \alpha$, a rush, old word from o $\rho \mu \alpha \omega$, to rush (Mt 8:32 ), here only in N.T.

Shall be cast down ( $\beta \lambda \varepsilon \theta \eta \sigma \varepsilon \tau \alpha$ ). Future (first) passive of $\beta \alpha \lambda \lambda \omega$, the same verb ( $\varepsilon \beta \alpha \lambda \varepsilon v$ ), effective punctiliar future. Like a boulder hurled into the sea.

Shall be found no more at all (ov $\mu \eta \varepsilon v \rho \varepsilon \theta \eta \varepsilon \tau$ ). Double negative with first aorist passive subjunctive of $\varepsilon v \rho ı \sigma \kappa \omega$. See 9:6 for ov $\mu \eta$ with the active voice of $\varepsilon v \rho \iota \sigma \kappa \omega$. Already the old Babylon was a desert waste (Strabo, XVI. 1073).

Rev 18:22
The voice $(\varphi \omega \nu \eta)$. Cf. Eze 26:13. Or "sound" as in 1Co 14:8 with $\sigma \alpha \lambda \pi \iota \gamma \xi$ (trumpet). For this song of judgment see Jer 25:10.

Of harpers ( $\kappa \iota \theta \alpha \rho \omega \iota \omega \nu$ ). Old word (from $\kappa \iota \theta \alpha \rho \alpha$, harp, and $\omega \iota \delta o \varsigma$, singer) as in 14:2.
Of minstrels ( $\mu \circ v \sigma \iota \kappa \omega \nu$ ). Old word (from $\mu \circ v \sigma \alpha$, music), here only in N.T., one playing on musical instruments.

Of flute-players ( $\alpha u \lambda \eta \tau \omega v$ ). Old word (from $\alpha u \lambda \varepsilon \omega$, to play on a flute, Mt 11:17, $\alpha u \lambda o \varsigma$, flute, 1Co 14:7), in N.T. only here and Mt 9:23.

Of trumpeters ( $\sigma \alpha \lambda \pi \iota \sigma \tau \omega v$ ). Late form for the earlier $\sigma \alpha \lambda \pi \iota \gamma \kappa \tau \eta \varsigma($ from $\sigma \alpha \lambda \pi \iota \zeta \omega)$, here only in N.T.

Shall be heard no more at all ( $\circ \boldsymbol{\mu} \mu \boldsymbol{\eta} \alpha \sigma v \sigma \theta \eta$ ). First aorist passive subjunctive of $\alpha \kappa о v \omega$ with the double negative as below, with $\varphi \omega \nu \eta \mu \nu \lambda o v$ (sound of the millstone), and as in verse 21 with ou $\mu \varepsilon \varepsilon \cup \rho \varepsilon \theta \eta$ and again with $\pi \alpha \varsigma \tau \varepsilon \chi \nu \iota \tau \eta \varsigma$ (craftsman). This old word is from $\tau \varepsilon \chi \nu \eta$, art, as here in some MSS. ("of whatsoever craft," $\pi \alpha \sigma \eta \varsigma \tau \varepsilon \chi \nu \eta \varsigma)$ ) Tع $\chi \nu \iota \tau \eta \varsigma$ occurs also in this sense in Ac 19:24,38; and in Heb 11:10 of God as the Architect. There is power in this four-fold sonorous repetition of ov $\mu \eta$ and the subjunctive with two more examples in verse 23.

Rev 18:23
Of a lamp ( $\lambda u \chi v o v$ ). Old word (Mt 5:15 ), again in Re 22:5 .
Shall shine no more at all ( $o v \mu \eta \varphi \alpha v \eta$ ). Fifth instance in these verses of ov $\mu \eta$ with the aorist subjunctive, here the active of $\varphi a / v \omega$ as in Re 8:12. It is not known whether Rome had street lights or not.
 3:29; Jer 7:34; 16:9. "Even the occasional flash of the torches carried by bridal processions (Mt 25:1ff. ) is seen no more" (Swete). The sixth instance of ov $\mu \eta$, in verses 21-23, occurs with $\alpha \kappa 0 v \sigma \theta \eta$ (third instance of $\alpha \kappa о v \sigma \theta \eta$, two in verse 22).

Were the princes of the earth ( $\eta \sigma \alpha v$ o $\mu \varepsilon \gamma \iota \sigma \tau \alpha v \varepsilon \varsigma \tau \eta \varsigma \gamma \eta$ ). For $\mu \varepsilon \gamma \iota \sigma \tau \alpha v$ see Re 6:15; Mr 6:21. "Thy merchants were the grandees" once, but now these merchant princes are gone.

With thy sorcery ( $\varepsilon v \tau \eta \varphi а \rho \mu \propto \kappa \kappa ~ \sigma o v$ ). Ev (instrumental use) and the locative case of чариакıа, old word (from чарнаквvш, to prepare drugs, from чар $\mu \alpha к о v$, sorcery, Re 9:21 ), in N.T. only here and Ga 5:20 for sorcery and magical arts. If one is puzzled over the connection between medicine and sorcery as illustrated by this word (our pharmacy), he has only to recall quackery today in medicine (patent medicines and cure-alls), witch-doctors, professional faith-healers, medicine-men in Africa. True medical science has had a hard fight to shake off chicanery and charlatanry.

Were deceived ( $\varepsilon \pi \lambda \alpha v \eta \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\pi \lambda \alpha v \alpha \omega$. These charlatans always find plenty of victims. See Mr 12:24.

Rev 18:24
In her ( $\varepsilon v \alpha v \tau \eta$ ). In Rome.
Was found ( $\varepsilon \cup \rho \varepsilon \theta \eta$ ). First aorist passive indicative of $\varepsilon u \rho ı \sigma \kappa \omega$. See 16:6; 17:6 for the blood already shed by Rome. Rome "butchered to make a Roman holiday" (Dill, Roman Society, p. 242) not merely gladiators, but prophets and saints from Nero's massacre A.D. 64 to Domitian and beyond.

Of all that have been slain ( $\pi \alpha \nu \tau \omega \nu \tau \omega v \varepsilon \sigma \varphi \alpha \gamma \mu \varepsilon v \omega v$ ). Perfect passive articular participle genitive plural of $\sigma \varphi \alpha \zeta \omega$, the verb used of the Lamb slain (5:9,12; 13:8). Cf. Mt 23:35 about Jerusalem.

## Revelation 19

Rev 19:1
After these things ( $\mu \varepsilon \tau \alpha \tau \alpha \cup \tau \alpha)$. Often when a turn comes in this book. But Beckwith is probably correct in seeing in 19:1-5 the climax of chapter Re 18 . This first voice (verses $1,2) \omega \varsigma \varphi \omega v \eta \nu \mu \varepsilon \gamma \alpha \lambda \eta \nu$ ou $\chi \lambda$ ov $\pi 0 \lambda \lambda o v$ (as it were great voice of much multitude) is probably the response of the angelic host ( $\operatorname{Re} 5: 11 ;$ Heb 12:22 ). There is responsive singing (grand chorus) as in chapters Re 4; 5 .

Saying ( $\lambda \varepsilon \gamma \sigma \tau \tau \omega v$ ). Present active participle of $\lambda \varepsilon \gamma \omega$, genitive plural, though $o \chi \lambda o v$ is genitive singular (collective substantive, agreement in sense).

Hallelujah (A $\lambda \lambda_{\eta} \lambda_{\text {ovia }}$ ). Transliteration of the Hebrew seen often in the Psalms (LXX) and in III. Macc. 7:13, in N.T. only in Re 19:1,3,4,6 . It means, "Praise ye the Lord." Fifteen of the Psalms begin or end with this word. The Great Hallel (a title for Ps 104-109) is sung chiefly at the feasts of the passover and tabernacles. This psalm of praise uses language already in 12:10.

Rev 19:2
For (or). Because. The reason for God's judgments is given in 15:3; 16:7. The doom of Babylon seen in 14:7 is now realized.

For (o $\tau$ ). Second use of $o \tau$, explaining the first.
He hath judged ( $\varepsilon \kappa \rho เ v \varepsilon v)$ ). First aorist (prophetic and climacteric, effective) active indicative of $\kappa \rho / v \omega$.

Which ( $\eta \tau \iota \varsigma)$. The very one which.
Did corrupt ( $\varepsilon \varphi \theta \varepsilon \iota \rho \varepsilon v$ ). This is the terrible fact. First aorist active indicative of $\varphi \theta \varepsilon \iota \rho \omega$. Cf. 11:18; 14:8; 17:2; 18:3.

And he hath avenged ( $\kappa \alpha \varepsilon \varepsilon \delta \iota \kappa \eta \sigma \varepsilon v$ ). God has exacted vengeance for the blood of his servants from $(\varepsilon \kappa)$ her. Prophetic aorist again of $\varepsilon \kappa \delta \iota \kappa \varepsilon \omega$ with accusative and $\varepsilon \kappa$ with ablative as in 6:10.

Rev 19:3
A second time ( $\delta \varepsilon u \tau \varepsilon \rho o v)$. Adverbial accusative, a heavenly encore.
They say ( $\varepsilon \iota ๆ \kappa \alpha v)$. Perfect active indicative of $\varepsilon$ єпоv. "They have said," not an "aoristic" perfect for "they say," but vivid dramatic perfect as in 5:7 and the form in - $\alpha v$ instead of aбıv as in 18:3; 21:6.

Goeth up ( $\alpha v \alpha \beta \alpha ı v \varepsilon$ ). Linear present active indicative of $\alpha v \alpha \beta \alpha \iota v \omega$, "keeps on going up," "a last touch to the description already given (18:21ff. ) of Babylon's utter collapse" (Swete). The smoke of the city's ruin (14:11; 18:8f.,18) instead of incense ( 8:4). Cf. Isa 34:9f

Rev 19:4

Fell down and worshipped God ( $\varepsilon \pi \varepsilon \sigma \alpha \nu \kappa \alpha \pi \rho о \sigma \varepsilon \kappa \nu \nu \eta \sigma \alpha \nu \tau \omega \theta \varepsilon \omega$ ). Precisely as in 7:11, which see. The twenty-four elders and the four living creatures take up the antiphonal chorus of the angels.

Rev 19:5
A voice from the throne ( $\varphi \omega \nu \eta$ a $\omega$ o $\alpha 0 v \theta \rho o v o v$ ). Not the voice of God, nor of the Lamb, nor $\varepsilon \kappa$ тov vaov ( 16:17), but from an angel of the Presence. This angel summons all the servants of God to join in the antiphonal praise to God.

Give praise to our God ( $\alpha เ v \varepsilon \iota \tau \varepsilon \tau \omega \theta \varepsilon \omega \eta \mu \omega \nu$ ). Present active imperative of $\alpha เ v \varepsilon \omega$, old verb, with the accusative elsewhere in N.T., but here with the dative as occasionally in the LXX (1Ch 16:36, etc.).

Rev 19:6
As it were the voice $(\omega \varsigma \varphi \omega \nu \eta v)$. Used here three times, as once in verse 1 : once of a second great multitude ( $o \chi \lambda o v \pi o \lambda \lambda o v$ ), not of angels as in verse 1 , but the innumerable multitude of the redeemed of 7:9; then "of many waters" (v $\delta \alpha \tau \omega \nu \pi o \lambda \lambda \omega \nu$ ) as in 1:15; 14:2 like "the roar of a cataract" (Swete); and once more "the voice of mighty thunders" ( $\beta \rho 0 \nu \tau \omega \nu$ เ $\sigma \chi \cup \rho \omega v$ ) as in 6:1; 10:3f. .

Saying ( $\lambda \varepsilon \gamma 0 v \tau \omega v$ ). The best attested reading, genitive plural of $\lambda \varepsilon \gamma \omega$, agreeing with o $\chi \lambda \mathrm{ov}$ (genitive singular), for roll of the waters and the roar of the thunders were not articulate. Some MSS. have $\lambda \varepsilon \gamma 0 v \tau \varepsilon \varsigma$ (nominative plural) referring also to o $\chi \lambda o v$, though nominative instead of genitive. The fourth "Hallelujah" comes from this vast multitude.

The Lord our God, the Almighty (Кvрıоб, о $\theta \varepsilon о \sigma$, о таvтократ $\omega \rho$ ). For this designation of God see also $1: 8 ; 4: 8 ; 11: 17 ; 15: 3 ; 16: 7,14 ; 19: 15 ; 21: 22$. Cf. deus et dominus noster used of the Roman emperor.

Reigneth ( $\varepsilon \beta \alpha \sigma \lambda \lambda \varepsilon v \sigma \varepsilon v)$. First aorist active of $\beta \alpha \sigma \lambda \lambda \varepsilon v \omega$. Probably ingressive prophetic aorist, "God became king" in fulness of power on earth with the fall of the world power.

Rev 19:7
Let us rejoice and be exceeding glad ( $\chi \alpha \iota \rho \omega \mu \varepsilon \nu \kappa \alpha \alpha \gamma \alpha \lambda \lambda เ \omega \mu \varepsilon \nu$ ). Present active subjunctive (volitive) of $\chi \alpha \iota \rho \omega$ and $\alpha \gamma \alpha \lambda \lambda \iota \alpha \omega$ (elsewhere in N.T. in the middle except Lu 1:47; 1Pe 1:8 ). For both verbs together see Mt 5:12 .

Let us give ( $\delta \omega \mu \varepsilon v$ ). Second aorist active subjunctive of $\delta \delta \omega \mu$, but A reads $\delta \omega \sigma o \mu \varepsilon v$ (future active) and $\mathrm{P} \delta \omega \sigma \omega \mu \varepsilon v$. If the future indicative is read, the tone is changed from exhortation to declaration (we shall give glory unto him).

The marriage of the Lamb ( $о \gamma \alpha \mu \circ \varsigma \tau o v ~ a \rho v o v)$. In the O.T. God is the Bridegroom of Israel (Hos 2:16; Isa 54:6; Eze 16:7ff. ). In the N.T. Christ is the Bridegroom of the Kingdom (the universal spiritual church as seen by Paul, 2Co 11:2; Eph 5:25ff., and by John in Re 3:20; 19:7,9; 21:2,9; 22:17. In the Gospels Christ appears as the Bridegroom (Mr 2:19f.; Mt 9:15; Lu 5:34f.; Joh 3:29 ). The figure of $\gamma \alpha \mu \mathrm{o}$, occurs in Mt 22:2-14. Three metaphors of women appear in the Apocalypse (the Mother in chapter Re 12, the Harlot in Re 17-19,
and the Bride of Christ here to the end). "The first and third present the Church under two different aspects of her life, while the second answers to her great rival and enemy" (Swete).

Is come ( $\eta \lambda \theta \varepsilon v$ ). Prophetic aorist, come at last.
Made herself ready ( $\eta \tau о \mu \alpha \sigma \varepsilon v \varepsilon \alpha \nu \tau \eta v$ ). First aorist active indicative of $\varepsilon \tau о \mu \alpha \zeta \omega$ and the reflexive pronoun. See 22:2 for $\eta \tau o \mu \mu \sigma \mu \varepsilon \nu \eta \nu \omega \varsigma \nu \nu \mu \varphi \eta \nu$ (prepared as a bride). There is something for her to do ( 1 Jo 3:3; Jude 1:21; 2Co 7:1 ), but the chief preparation is the act of Christ (Eph 5:25ff. ).

## Rev 19:8

That she should array herself ( $\imath v \alpha \pi \varepsilon \rho ı \beta \alpha \lambda \eta \tau \alpha$ ). Sub-final object clause subject of $\varepsilon \delta o \theta \eta$ (was given to her) with $\tau \alpha$ and the second aorist middle (direct) of $\pi \varepsilon \rho \iota \beta \alpha \lambda \omega$ to fling around. This bridal dress is a gift from Christ. This form, $\varepsilon \delta 0 \theta \eta$ (it was given), occurs some 20 times in this book.

In fine linen, bright and pure ( $\beta v \sigma \sigma ı v o v \lambda \alpha \mu \pi \rho o v ~ к а \Theta \alpha \rho o v)$. See 19:14 for the same raiment on those accompanying "The Word of God" and for the seven angels in 15:6. See by contrast the garments of the harlot ( $17: 4 ; 18: 16$ ). For $\beta v \sigma \sigma i v o v$ see 18:16.

The righteous acts of the saints ( $\tau \alpha \delta \iota \kappa \alpha \iota \omega \mu \tau \alpha \alpha \omega \nu \alpha \gamma \iota \omega v$ ). This is the explanation ( $\gamma \propto \rho$ ) of the bridal dress and explains why there is work for the Bride as well as for Christ (Php 2:12f. ). See 15:4 for סıкаı $\omega \mu$ (also Ro 5:18 ).

Rev 19:9
Write ( $\Gamma \rho \alpha \neq v$ ). First aorist active imperative of $\gamma \rho \alpha \varphi \omega$ as in 1:11; 14:13. The speaker may be the angel guide of 17:1.

It is another beatitude ( $\mu$ aкарьo, Blessed) like that in 14:13 (fourth of the seven in the book).

They which are bidden ( $о \kappa \varepsilon \kappa \lambda \eta \mu \varepsilon v o$ ). Articular perfect passive participle of $\kappa \alpha \lambda \varepsilon \omega$, like Mt 22:3; Lu 14:17. Cf. Re 17:14 . This beatitude reminds us of that in Lu 14:15 . (Cf. Mt 8:11; 26:29.)

These are true words of God (Hovto o $\lambda o \gamma o a \lambda \eta \theta \iota v o$ tov $\theta$ sov $\varepsilon ા \sigma เ v)$. Undoubtedly, but one should bear in mind that apocalyptic symbolism "has its own methods and laws of interpretation, and by these the student must be guided" (Swete).

Rev 19:10
To worship him ( $\pi \rho о \sigma \kappa \cup v \eta \sigma \alpha \alpha v \tau \omega$ ). First aorist active infinitive of purpose. John either felt that the angel represented God or he was beside himself with excitement over the glorious consummation. He was tempted to worship an angel ( $\mathrm{Col} 2: 18$ ).

See thou do it not (opa $\mu \eta$ ). Repeated in 22:9. Here there is no verb after $\mu \eta$ (ellipse of
 $\mu \eta$ after op $\alpha$ (present active imperative of opa $\omega$ ), a common enough idiom.

Fellow-servant ( $\sigma v v \delta o u \lambda o c)$. The angel refuses worship from John on this ground. All Christians are $\sigma u v \delta o u \lambda o$ (fellow-servants) as Christ taught (Mt 18:28ff.; 24:49) and as Paul
(Col 1:7; 4:7) and John (Re 6:11) taught. Angels are God's servants also (Heb 1:4-14). For "the testimony of Jesus see 1:2,9; 6:9; 12:17; 22:4 .

Worship God ( $\tau \omega \theta \varepsilon \omega \pi \rho о \sigma \kappa v \nu \eta \sigma o v)$. And Christ, who is the Son of God (5:13f. ).
The spirit of prophecy ( $\tau 0 \pi \nu \varepsilon v \mu \alpha \tau \eta \varsigma \pi \rho \circ \varphi \eta \tau \varepsilon \varepsilon \alpha \varsigma)$. Explanatory use of $\gamma \alpha \rho$ (for) here as in 8 . The possession of the prophetic spirit shows itself in witness to Jesus. In illustration see Mr 1:10; Mt 3:16; Lu 3:21; Joh 1:51; Re 4:1; 10:1; 11:19; 14:17; 15:5; 18:1; 19:1,7-9 .

Rev 19:11
The heaven opened ( $\tau 0 v$ ovpavov $\eta v \varepsilon \omega \iota \gamma \mu \varepsilon v o v$ ). Perfect passive participle (triple reduplication) of $\alpha v o \iota \gamma \omega$. Accusative case after $\varepsilon เ \delta o v$. So Ezekiel ( $1: 1$ ) begins his prophecy. See
 the opened heavens to Nathanael (Joh 1:51 ). In Re 4:1 a door is opened in heaven, the sanctuary is opened ( $11: 19 ; 15: 5$ ), angels come out of heaven $(10: 1 ; 14: 17 ; 18: 1)$, and sounds come from heaven (19:1).
 Cf. 6:2 for $\imath \pi \pi о \varsigma ~ \lambda \varepsilon \cup \kappa о \varsigma . ~ T h e ~ e m b l e m ~ o f ~ v i c t o r y ~ i n ~ b o t h ~ c a s e s, ~ b u t ~ t h e ~ r i d e r s ~ a r e ~ v e r y ~ d i f f e r e n t . ~$ Here it is the Messiah who is the Warrior, as is made plain by "Faithful and True" ( $\pi \iota \sigma \tau 0 \varsigma$ $\kappa \alpha \alpha \lambda \eta \theta \iota v o \varsigma)$, epithets already applied to Christ (1:5; 3:7,14). Cf. also 22:6.

In righteousness he doth judge and make war ( $\varepsilon \nu \delta ı \kappa \alpha \iota \sigma \nu \nu \eta \kappa \rho \iota v \varepsilon \kappa \alpha \pi о \lambda \varepsilon \mu \varepsilon$ ). See Isa 11:3f. . The Messiah is both Judge and Warrior, but he does both in righteousness (15:3; 16:5,7; 19:2 ). He passes judgment on the beast (antichrist) and makes war on him. Satan had offered Christ a victory of compromise which was rejected.

Rev 19:12
A flame of fire ( $\left.\varphi \lambda \lambda_{0} \xi \pi \cup \rho \circ \varsigma\right)$. As in the opening vision of Christ in 1:14 (2:18).
Many diadems ( $\delta \iota \alpha \delta \eta \mu \alpha \tau \alpha \pi \sigma \lambda \lambda \alpha$ ). A new feature, but the dragon has a diadem on each of his seven heads ( $12: 3$ ) and the first beast one upon each of his ten horns ( $13: 1$ ). So the victorious Messiah will wear many royal diadems and not mere crowns, because he is King of kings ( 19:16).

And he hath ( $\kappa \alpha \varepsilon \chi \omega v$ ). Nominative active present participle of $\varepsilon \chi \omega$ either used absolutely as an independent verb (like indicative) or in an anacoluthon, though avtov (his) is genitive.

A name written ( $\quad \nu \gamma \mu \alpha \gamma \varepsilon \gamma \rho \alpha \mu \mu \varepsilon v o v$ ). Perfect passive participle of $\gamma \rho \alpha \varphi \omega$ as in 2:17 (cf. 3:12).

But he himself $(\varepsilon \mu \eta \alpha \cup \tau o \varsigma)$. "Except himself" (common ellipsis of the verb after $\varepsilon \mu \eta$, "if not"). See $2: 17 ; 3: 12$ for the new name there described. See $14: 1$ for the name of Christ on the forehead of the 144,000 , and 17:5 for the name on the forehead of the harlot. This word here supplements what Jesus says in Mt 11:27.

Rev 19:13

Arrayed ( $\pi \varepsilon \rho \iota \beta \varepsilon \beta \lambda \eta \mu \varepsilon v o \varsigma)$. Perfect passive participle of $\pi \varepsilon \rho \iota \beta \alpha \lambda \lambda \omega$, to clothe, often in this book.

In a garment ( $\mu \alpha \tau \tau \sigma v$ ). Accusative case after the passive participle $\pi \varepsilon \rho 1 \beta \varepsilon \beta \lambda \eta \mu \varepsilon v o c$.
Sprinkled ( $\rho \varepsilon \rho \alpha v \tau \iota \sigma \mu \varepsilon v o v$ ). Perfect passive participle of $\rho a v \tau \iota \zeta \omega$, in the predicate accusative case agreeing with $\mu \alpha \tau \iota \sigma$. A Q here read $\beta \varepsilon \beta \alpha \mu \mu \varepsilon v o v$ (perfect passive participle of $\beta a \pi \tau \omega$, to dip). Probably $\rho \varepsilon \rho a v \tau \iota \sigma \mu \varepsilon v o v$ (sprinkled) is correct, because the picture comes from Isa 63:3, where Aquila and Symmachus use $\rho a v \tau \iota \zeta \omega$. The use of $\beta \varepsilon \beta \alpha \mu \mu \varepsilon v o v$ (dipped) is a bolder figure and Charles considers it correct. In either case it is the blood of Christ's enemies with which his raiment ( $\mu \alpha \tau \iota \circ v$, perhaps a $\chi \lambda \alpha \mu \nu \varsigma$ Mt 27:28,31) is sprinkled or dipped as the case may be, not his own blood on Calvary ( $1: 5 ; 5: 9 ; 7: 14 ; 12: 11$ ), but proleptically and prophetically the blood of Christ's enemies. Hauat can be either locative case with $\beta \varepsilon \beta \alpha \mu \mu \varepsilon v o v$ (dipped in blood) or instrumental with $\rho \varepsilon \rho \alpha \nu \tau \iota \sigma \mu \varepsilon v o v$ (sprinkled with blood).

The Word of God (o $\Lambda$ oүos tov $\theta$ rov). Some scholars hold this addition inconsistent with verse 12 , but it may be merely the explanation of the secret name or still another name besides that known only to himself. The personal use of the Logos applied to Christ occurs only in the Johannine writings unless that is the idea in Heb 4:12. In Joh 1:1,14 it is merely o $\Lambda \circ \gamma \circ \varsigma$ (the Word), in 1Jo 1:1 o $\Lambda о \gamma \circ \varsigma \tau \eta \varsigma \zeta \omega \eta \varsigma$ (the Word of Life), while here it is o $\Lambda \circ \gamma \circ \varsigma$ rov $\theta \varepsilon$ ou (the Word of God), one of the strongest arguments for identity of authorship. The idiom here is one common in Luke and Paul for the teaching of Christ ( $\operatorname{Lu} 5: 1 ; 8: 11$, etc.; 1Co 14:36; 2Co 2:17, etc.). Jesus is himself the final and perfect revelation of God to men (Heb 1:1f.).

Rev 19:14
The armies which are in heaven ( $\tau \alpha \sigma \tau \rho \alpha \tau \varepsilon \cup \mu \alpha \tau \alpha \tau \alpha \varepsilon \nu \tau \omega$ ov $\alpha \alpha v \omega$ ). See 12:7 for Michael and angels warring with the dragon, and also Mt 26:53 for the angels at Christ's call, not to say Heb 1:6f.,14; Mt 13:41; Re 5:11f.

Followed ( $\eta \kappa \circ \lambda o v \theta \varepsilon$ ). Imperfect active and singular ( $\sigma \tau \rho \alpha \tau \varepsilon \cup \mu \alpha \tau \alpha$, neuter plural) of $\alpha \kappa о \lambda o v \theta \varepsilon \omega$, graphic picture of the celestial Warrior with his angelic hosts "upon white horses" ( $\varepsilon \varphi^{\prime}$ וлтоья $\left.\lambda \varepsilon \cup к о \iota \varsigma\right)$ like the Leader and, like him "clothed in fine linen white and pure" ( $\varepsilon v \delta \varepsilon \delta \nu \mu \varepsilon v o ~ \beta \nu \sigma \sigma ı v o v ~ \lambda \varepsilon u \kappa o v ~ к а Ө \alpha \rho о v)$ like the Leader again ( 19:8). Note $\varepsilon v \delta \varepsilon \delta \nu \mu \varepsilon v o$ here as in 1:13; 15:6.

Rev 19:15
A sharp sword ( $\rho о \mu \varphi \alpha ı \alpha$ o $\xi_{\varepsilon ı \alpha) . ~ A s ~ i n ~ 1: 16 ; ~ 2: 12,15 ~ . ~}^{\text {. }}$
That he should smite ( $\mathrm{tva} \pi \alpha \tau \alpha \xi \eta$ ). Purpose clause with $i v a$ and the first aorist active subjunctive of $\pi \alpha \tau \alpha \sigma \sigma \omega$, old verb already in 11:6 and like Isa 11:4, a figure here for forensic and judicial condemnation.

And he shall rule them (ка аuтоц тощаvв). Emphatic use of autoc twice (he himself). Future active of $\pi о \mu \alpha \iota v \omega$, to shepherd as in 2:27; $12: 5$ "with a rod of iron" ( $\varepsilon v \rho \alpha \beta \delta \omega \sigma \delta \delta \eta \rho \alpha)$ as there. See 1Pe 2:25; Heb 13:20 for Christ as Shepherd.

And he treadeth ( $\kappa \alpha \alpha v \tau о \varsigma ~ \pi \alpha \tau \varepsilon) . ~ C h a n g e ~ t o ~ p r e s e n t ~ t e n s e ~ o f ~ \pi \alpha \tau \varepsilon \omega, ~ t o ~ t r e a d ~(h e r e ~$ transitive), with solemn repetition of ka autoc.

The winepress of the fierceness of the wrath of Almighty God ( $\tau \eta \nu \lambda \eta \nu 0 \nu \tau 0 v$ oovov
 of the wrath of the anger of God the Almighty" (four genitives dependent on one another and on $\lambda \eta v o v$ ). These images are here combined from 14:8,10,19f.; 16:19. The fact is already in 19:13 after Isa 63:1f. .

Rev 19:16
And on his thigh ( $\kappa \alpha \varepsilon \pi$ tov $\mu \eta \rho o v$ autov). "Even upon his thigh." Old word, here alone in N.T.

King of kings, and Lord of lords (Baбi入vuc $\beta a \sigma i \lambda \varepsilon \omega v$ ка Kupıo̧ кupı $\omega v$ ). The title already given to the Lamb in 17:14, but in reverse order. See the same idea in 1Ti 6:15.

Rev 19:17
An angel ( $\varepsilon v \alpha a \gamma \gamma \varepsilon \lambda o v$ ). Like $\varepsilon ા \varsigma$ in 18:21, just "an," not "one."
Standing in the sun ( $\varepsilon \sigma \tau \omega \tau \alpha \varepsilon \nu \tau \omega \eta \lambda \iota \omega$ ). Second perfect active participle of $\iota \sigma \tau \eta \mu$ (intransitive). "Where all the birds of prey would behold him" (Beckwith). For opveotc (birds) see 18:2 and for $\varepsilon v \mu \varepsilon \sigma o v \rho \alpha v \eta \mu \alpha \tau$ (in mid heaven) see 18:13; 14:6 .

Come and be gathered together ( $\Delta \varepsilon v \tau \varepsilon \sigma v v a \chi \theta \eta \tau \varepsilon$ ). $\Delta \varepsilon v \tau \varepsilon$ is the adverb $\delta \varepsilon v \rho \omega$ (hither), used when two or more are addressed, possibly from $\delta \varepsilon u \rho o ~ \imath \tau \varepsilon$ (come here). Asyndeton also without ка (and). First aorist passive imperative of $\sigma v v \alpha \gamma \omega$. The metaphor is drawn from Eze 39:17.

Unto the great supper of God ( $\varepsilon \iota \varsigma ~$ to $\delta \varepsilon ı \pi \nu o v$ to $\mu \varepsilon \gamma \alpha$ тov $\theta \varepsilon o v$ ). The habits of vultures are described by Christ in Mt 24:28. This is a bold and powerful picture of the battlefield after the victory of the Messiah, "a sacrificial feast spread on God's table for all the vultures of the sky" (Swete). Is this battle the same as that of Har Magedon ( 16:16) and that of Gog and Magog ( $20: 8 \mathrm{ff}$. ) mentioned after the thousand years? The language in 20:8ff. seems like this derived from Eze 39:17ff., and "in the Apocalypse priority in the order of sequence does not always imply priority in time" (Swete). There seems no way to decide this point save that the end seems to be at hand.

Rev 19:18
That ye may eat ( $\imath v \alpha \varphi \alpha \gamma \eta \tau \varepsilon$ ). Purpose clause with $t v \alpha$ and the second aorist active subjunctive of $\varepsilon \sigma \theta \omega \omega$.

The flesh of kings ( $\sigma \alpha \rho к а \varsigma ~ \beta \alpha \sigma \iota \lambda \varepsilon \omega v)$ ). "Pieces of flesh" (plural of $\sigma \alpha \rho \xi$, flesh) and of all classes and conditions of men who fell in the battle ( $6: 18 ; 11: 13 ; 13: 16 ; 19: 5 ; 20: 12$ ). War is no respecter of persons.

Rev 19:19
Gathered together ( $\sigma v v \eta \gamma \mu \varepsilon v \alpha$ ). Perfect passive participle of $\sigma u v a \gamma \omega$. In battle array.

To make war against ( $\pi \circ \imath \eta \sigma \alpha \pi 0 \lambda \varepsilon \mu \circ \nu \mu \varepsilon \tau \alpha$ ). First aorist active infinitive of $\pi \circ \iota \varepsilon \omega$, to express purpose. See $\pi \sigma \lambda \varepsilon \mu \varepsilon \omega \mu \varepsilon \tau \alpha$ in 12:7 and the use of $\sigma v v \alpha \gamma \omega \varepsilon \iota \varsigma \pi \sigma \lambda \varepsilon \mu \circ v$ in 16:14; 20:8 . The beast (for his army see 16:13f. ) led a league of ten kings against Babylon in 17:16f. , but with the purpose also of fighting the Lamb (17:14).

Rev 19:20
Was taken $(\varepsilon \pi \iota \alpha \sigma \theta \eta)$. First aorist (prophetic) passive indicative of the Doric $\pi \iota \alpha \zeta \omega$ (Attic $\pi \iota \zeta \zeta \omega)$. Cf. 2Th 2:8 .

The false prophet ( $о \boldsymbol{\varepsilon} \cup \delta о \pi \rho о \varphi \eta \tau \eta \varsigma$ ). Possibly the second beast of 13:11-17; 16:13; 20:10. Charles takes him to be "the priesthood of the Imperial cult, which practised all kinds of magic and imposture to beguile men to worship the Beast."

That wrought the signs in his sight (о лоє $\sigma \alpha \varsigma \tau \alpha \sigma \eta \mu \varepsilon \iota \alpha \varepsilon \nu \omega \pi \iota \circ \sim \alpha v \tau \circ v)$. As in 13:14.
Wherewith ( $\varepsilon v$ oıৎ). "In which" signs.
He deceived $(\varepsilon \pi \lambda \alpha v \eta \sigma \varepsilon v)$. First aorist active indicative of $\pi \lambda \alpha v a \omega$. He was only able to deceive "them that had received" ( $\tau 0 \cup \varsigma \lambda \alpha \beta$ о $\tau \alpha \varsigma$, articular second aorist active participle of $\lambda \alpha \mu \beta \alpha \nu \omega$, "those receiving") "the mark of the beast" (13:16; 14:9ff.; 16:2; 20:4 ) "and them

They twain (o $\delta v o$ ). "The two."
Were cast $(\varepsilon \beta \lambda \eta \theta \eta \sigma \alpha \nu)$. First aorist passive Indicative of $\beta \alpha \lambda \lambda \omega$. They fall together as they fought together. "The day that sees the end of a false statecraft will see also that of a false priestcraft" (Swete).

Alive $(\zeta \omega v \tau \varepsilon \varsigma)$. Present active participle of $\zeta \alpha \omega$, predicative nominative, "living."
Into the lake of fire ( $\varepsilon \iota \varsigma \tau \eta \nu \lambda \iota \mu \nu \eta \nu \tau 0 v \pi \nu \rho \circ \varsigma)$. Genitive $\pi \nu \rho \circ \varsigma$ describes this $\lambda \iota \mu \nu \eta \nu$ (lake, cf. Lu 5:1) as it does $\gamma \varepsilon \varepsilon v \nu \alpha$ in Mt 5:22. See also 20:10; 21:8 . It is a different figure from the "abyss" in 9:1f.; 20:1f. . This is the final abode of Satan, the beast, the false prophet, and wicked men.

That burneth with brimstone ( $\tau \eta \varsigma \kappa \alpha \iota \mu \varepsilon \nu \eta \varsigma \varepsilon v \theta \varepsilon \iota \omega$ ). Note the genitive here in place of the accusative $\lambda_{\iota} \mu \nu \eta \nu$, perhaps because of the intervening genitive $\pi v \rho \circ \varsigma$ (neuter, not feminine). The agreement is regular in 21:8. For $\varepsilon v \theta \varepsilon ו \omega$ (with brimstone) see $14: 10 ; 20: 10$; 21:8. The fact of hell is clearly taught here, but the imagery is not to be taken literally any more than that of heaven in chapters $\operatorname{Re} 4 ; 5 ; 21 ; 22$ is to be so understood. Both fall short of the reality.

Rev 19:21
The rest (o خoıло). Of the enemy (the kings and their hosts of verse 19).
Were killed ( $\alpha \pi \varepsilon \kappa \tau \alpha v \theta \eta \sigma \alpha v$ ). First aorist (effective) passive indicative of $\alpha \pi \sigma \kappa \tau \varepsilon เ \nu \omega$. Those affected by the Caesar-worship (14:9ff. ) were not at once cast into the lake with the two beasts.

Were filled ( $\varepsilon \chi о \rho \tau \alpha \sigma \theta \eta \sigma \alpha v)$. First aorist (effective) passive of $\chi \circ \rho \tau \alpha \zeta \omega$. As they had been invited to do in verse 17.

## Revelation 20

Rev 20:1
Coming down out of heaven ( $\kappa \alpha \tau \alpha \beta \alpha \iota v o v \tau \alpha \varepsilon \kappa$ tov ovpavov). As in 10:1; 18:1.
The key of the abyss ( $\tau \eta \nu \kappa \lambda \varepsilon \tau \nu \tau \eta \varsigma ~ \alpha \beta v \sigma \sigma o v)$. As in 9:1.
A great chain ( $\alpha \lambda \nu \sigma \iota v \mu \varepsilon \gamma \alpha \lambda \eta \nu$ ). Paul wore a $\alpha \lambda \nu \sigma \iota \varsigma$ (alpha privative and $\lambda v \omega$, to loose) in Rome ( $2 \mathrm{Ti} 1: 16$;, as did Peter in prison in Jerusalem (Ac 12:6).

In his hand $(\varepsilon \pi \tau \eta \nu \chi \varepsilon \iota \rho \alpha \alpha v \tau o v)$. "Upon his hand," ready for use. See $\varepsilon \pi$ with the genitive in 1:20.

Rev 20:2
He laid hold on ( $\varepsilon \kappa \rho \alpha \tau \eta \sigma \varepsilon \nu)$. First aorist active indicative of $\kappa \rho \alpha \tau \varepsilon \omega$, to seize.
The dragon ( $\tau 0 v \delta \rho \alpha \kappa о \nu \tau \alpha$ ). Accusative after $\varepsilon \kappa \rho \alpha \tau \eta \sigma \varepsilon v$ instead of the genitive as in $2: 1$. He has been behind the beast and the false prophet from the start. Now he is seized.

The old serpent ( о очıৎ о а $\rho \chi \propto \iota \varsigma)$. Precisely the description in 12:9, only the nominative is here retained, though in apposition with the accusative $\tau 0 v \delta \rho \alpha \kappa \sigma \tau \alpha$, a frequent anacoluthon in the Apocalypse ( $1: 5$, etc.). Swete calls it a parenthesis.

Which is (oऽ $\varepsilon \sigma \tau \iota v)$. The relative here relieves the construction and takes the place of

And bound him ( $\kappa \alpha \varepsilon \delta \eta \sigma \varepsilon v \alpha v \tau o v$ ). First aorist active indicative of $\delta \varepsilon \omega$.
For a thousand years $\left(\chi_{\imath} \lambda_{\iota} \alpha \varepsilon \tau \eta\right)$. Accusative of extent of time. Here we confront the same problem found in the 1260 days. In this book of symbols how long is a thousand years? All sorts of theories are proposed, none of which fully satisfy one. Perhaps Peter has given us the only solution open to us in $2 \mathrm{Pe} 3: 8$ when he argues that "one day with the Lord is as a thousand years and a thousand years as one day." It will help us all to remember that God's clock does not run by ours and that times and seasons and programs are with him. This wonderful book was written to comfort the saints in a time of great trial, not to create strife among them.

Rev 20:3
Into the abyss ( $\varepsilon ı \varsigma \tau \eta \nu \alpha \beta v \sigma \sigma o v)$. The one in 9:1f. and the one spoken of by the legion of demons in Lu 8:31 under the charge of the angel of the abyss (Apollyon, Re 9:11) who is either Satan himself or a kindred power. "Already he has been cast out of Heaven (12:9), now he is cast out of the earth, and returns to his own place" (Swete).

Shut it and sealed it ( $\varepsilon \kappa \lambda \varepsilon \iota \sigma \varepsilon v \kappa \alpha \varepsilon \sigma \varphi \rho \alpha \gamma \iota \sigma \varepsilon v$ ). Effective first aorists active indicative of $\kappa \lambda \varepsilon \iota \omega$ and $\sigma \varphi \rho \alpha \gamma \iota \omega$.

That he should deceive no more ( $\imath \alpha \alpha \mu \eta \pi \alpha \nu \eta \sigma \eta$ ). Negative purpose clause with $\imath v \alpha$ $\mu \eta$ and the first aorist active subjunctive of $\pi \lambda \alpha v \alpha \omega$. Glorious relief after the strain of the previous visions of conflict. Small wonder that Christians today cherish this blessed hope whatever the actual meaning may be.

Until should be finished ( $\alpha \chi \rho \tau \varepsilon \lambda \varepsilon \sigma \theta \eta$ ). Temporal clause of future purpose with $\alpha \chi \rho$ (as a conjunction like $\varepsilon \omega \varsigma$ ) and the first aorist passive subjunctive of $\tau \varepsilon \lambda \varepsilon \omega$. Repeated in verse 5 and see $\alpha \chi \rho$ and the subjunctive in 7:3; 15:8 .

He must be loosed ( $\delta \varepsilon \lambda \nu \theta \eta v \alpha)$. Sad necessity, alas, with $\delta \varepsilon$ and the first aorist passive infinitive of $\lambda \nu \omega$.

For a little time ( $\mu$ ккроv $\chi \rho \circ$ ооv). Accusative of time. Whatever the thousand years means, it is here said plainly that after it is over the devil will again have power on earth "for a little time."

Rev 20:4
And they sat upon them ( $\kappa \alpha \varepsilon \kappa \alpha \theta \iota \sigma \alpha v \varepsilon \pi^{\prime}$ autou¢). First aorist active indicative of $\kappa \alpha \theta i \zeta \omega$. Another period here apparently synchronous (verse 7) with the confinement of Satan in the abyss. No subject is given for this plural verb. Apparently Christ and the Apostles (Mt 19:28; Lu 22:30 ) and some of the saints (1Co 6:3 ), martyrs some hold.

Judgment was given unto them ( $\kappa \rho \mu \alpha \varepsilon \delta о \theta \eta$ $\alpha \cup \tau о \iota)$. First aorist passive of $\delta \iota \delta \omega \mu$. Picture of the heavenly court of assizes.

The souls ( $\tau \alpha \varsigma \psi v \chi \propto \varsigma$ ). Accusative after $\varepsilon \delta \delta o v$ at the beginning of the verse.
Of them that had been beheaded ( $\tau \omega v \pi \varepsilon \pi \varepsilon \lambda \varepsilon \kappa ו \sigma \mu \varepsilon v \omega v$ ). Genitive of the articular perfect passive participle of $\pi \varepsilon \lambda \varepsilon \kappa \iota \zeta \omega$, old word (from $\pi \varepsilon \lambda \varepsilon \kappa \nu \varsigma$ an axe, the traditional instrument for execution in republican Rome, but later supplanted by the sword), to cut off with an axe, here only in N.T. See 6:9; 18:24; 19:2 for previous mention of these martyrs for the witness of Jesus ( $1: 9 ; 12: 17 ; 19: 10$ ). Others also besides martyrs shared in Christ's victory, those who refused to worship the beast or wear his mark as in 13:15; 14:9ff.; 16:2; 19:20 .

And they lived ( $\kappa \alpha \varepsilon \zeta \eta \sigma \alpha v$ ). First aorist active indicative of $\zeta \alpha \omega$. If the ingressive aorist, it means "came to life" or "lived again" as in 2:8 and so as to verse 5 . If it is the constative aorist here and in verse 5 , then it could mean increased spiritual life. See Joh 5:21-29 for the double sense of life and death (now literal, now spiritual) precisely as we have the second death in Re 2:11; 20:6,14 .

And reigned with Christ ( $\kappa \alpha \varepsilon \beta \alpha \sigma \iota \lambda \varepsilon v \sigma \alpha v \mu \varepsilon \tau \alpha$ tov Xpıбтоv). Same use of the first aorist active indicative of $\beta \alpha \sigma i \lambda \varepsilon v \omega$, but more clearly constative. Beckwith and Swete take this to apply solely to the martyrs, the martyrs' reign with Christ.

Rev 20:5
The rest of the dead (o $\lambda o \iota \pi o ~ \tau \omega v \nu \varepsilon \kappa \rho \omega v$ ). "All except the martyrs, both the righteous and the unrighteous" (Beckwith). But some take this to mean only the wicked.

Lived not until the thousand years should be finished (ovк $\varepsilon \zeta \eta \sigma \alpha \nu \alpha \chi \rho \tau \varepsilon \lambda \varepsilon \sigma \theta \eta \tau \alpha$ $\left.\chi^{\prime} \lambda^{\prime} \alpha \varepsilon \tau \eta\right)$. See verse 4 for the items here. "To infer from this statement, as many expositors have done, that the $\varepsilon \zeta \eta \sigma \alpha v$ of $v .4$ must be understood of bodily resuscitation, is to interpret apocalyptic prophecy by methods of exegesis which are proper to ordinary narrative" (Swete). I sympathize wholly with that comment and confess my own ignorance therefore as to the
meaning of the symbolism without any predilections for post-millennialism or premillennialism.

This is the first resurrection ( $\alpha 0 \tau \eta \eta \alpha v a \sigma \tau \alpha \sigma \iota \varsigma \eta \pi \rho \omega \tau \eta$ ). Scholars differ as to the genuineness of this phrase. Accepting it as genuine, Swete applies it to "the return of the martyrs and confessors to life at the beginning of the Thousand Years." According to this view the first resurrection is a special incident in the present life before the Parousia. It has no parallel with $1 \mathrm{Th} 4: 16$, where the dead in Christ are raised before those living are changed. Some think that John here pictures the "Regeneration" ( $\pi \alpha \lambda ı \nu \gamma \varepsilon v \varepsilon \sigma \iota \alpha)$ of Mt 19:28 and the "Restoration" (атокатабтабıৎ) of Ac 3:21. No effort is here made to solve this problem, save to call attention to the general judgment out of the books in 20:12 and to the general resurrection in Joh 5:29; Ac 24:15 .

Rev 20:6
Blessed and holy ( $\mu \alpha \kappa \alpha \rho \iota \varsigma \kappa \kappa \alpha \nless \iota \rho \varsigma)$. A fifth beatitude ( $1: 3 ; 14: 13 ; 16: 15 ; 19: 9$ ) already
 The second death (o $\delta \varepsilon \cup \tau \varepsilon \rho \circ \varsigma \quad \theta$ avatoc). The spiritual death of $2: 11 ; 20: 14 ; 21: 8$ in contrast to the first or physical death. This language raises a question about the interpretation of the first and the second resurrections, whether both are of the body or one of the spirit. There seems no way to reach a solid conception about it. In 1Co 15:23 there is no mention of the resurrection of any save "those of Christ" (o tov Xpıбтov), though the end follows (verse 24). However, Paul elsewhere (Ac 24:15) speaks of the resurrection of the just and of the unjust as if one event.

Priests of God and of Christ (เعряเৎ tov $\theta$ sou ka tov Xpıбтоv). As in 1:6; 5:10; 22:3,5

Shall reign with him ( $\beta a \sigma \lambda \varepsilon v \sigma \sigma v \sigma \iota \nu \mu \varepsilon \tau^{\prime}$ avtov). As promised in the same passages. The servants of God are to be priests with Christ and to reign with him (Mt 19:28). In 5:10 $\varepsilon \pi \tau \eta \varsigma \gamma \eta \varsigma$ (upon earth) occurs, but this item does not appear here. "No hint is given as to where this service is to be rendered and this royalty to be exercised" (Swete).

Rev 20:7
When are finished (o $\tau \alpha \nu \tau \varepsilon \lambda \varepsilon \sigma \theta \eta$ ). Indefinite future temporal clause with o $o \tau \nu$ and the first aorist passive subjunctive of $\tau \varepsilon \lambda \varepsilon \omega$, "whenever are finished."

Shall be loosed ( $\lambda \nu \theta \eta \sigma \varepsilon \tau \alpha$ ). Future passive of $\lambda \nu \omega$, no longer bound as in 20:2f. He uses the future as a prophet in verses 7,8 , but in 9,10 he uses the aorist as a seer.

Out of his prison ( $\varepsilon \kappa \tau \eta \varsigma \varphi \cup \lambda \alpha \kappa \eta \varsigma \alpha \cup \tau o v$ ). For $\varphi \cup \lambda \alpha \kappa \eta$ in this sense see $2: 10$. Out of the abyss of verses 2,3 .

Rev 20:8
To deceive the nations ( $\pi \lambda \alpha \nu \eta \sigma \alpha \tau \alpha \varepsilon \theta v \eta$ ). First aorist active infinitive of purpose of $\pi \lambda \alpha v a \omega$, Satan's chief task (chapters 12 to 18, in particular 12:9; 13:14; 19:20; 20:3,10).

Which are in the four corners of the earth ( $\tau \alpha \varepsilon v \tau \alpha ๙ \varsigma \tau \varepsilon \sigma \sigma \alpha \rho \sigma \gamma \omega v$ vaıৎ $\tau \eta \varsigma \gamma \eta \varsigma)$. Clearly the reign with Christ, if on earth, was not shared in by all on earth, for Satan finds a large and ready following on his release. See 7:1 (Isa 11:12) for "the four corners of the earth."

Gog and Magog ( $\tau \circ \nu \Gamma \omega \gamma \kappa \alpha M \alpha \gamma \omega \gamma$ ). Accusative in explanatory apposition with $\tau \alpha$ $\varepsilon \theta \vee \eta$ (the nations). Magog is first mentioned in Ge 10:2. The reference here seems to be Eze 38:2, where both are mentioned. Josephus (Ant. I. 6. 1) identifies Magog with the Scythians, with Gog as their prince. In the rabbinical writings Gog and Magog appear as the enemies of the Messiah. Some early Christian writers thought of the Goths and Huns, but Augustine refuses to narrow the imagery and sees only the final protest of the world against Christianity.

To gather them together to the war ( $\sigma \sim v a \gamma \alpha \gamma \varepsilon ו v ~ a u \tau о и \varsigma ~ \varepsilon ı \varsigma ~ \tau о v ~ \pi о \lambda \varepsilon \mu о v) . ~ S e c o n d ~$ aorist active infinitive of purpose of $\sigma v v a \gamma \omega$, a congenial task for Satan after his confinement. See 16:14 for this very phrase and also 17:14; 19:19.

Of whom ( $\omega v-\alpha \nu \tau \omega v$ ). Pleonasm or redundant pronoun as in 3:8 and often (of whom--of them).

As the sand of the sea ( $\omega \varsigma \eta \alpha \mu \mu \circ \varsigma \tau \eta \varsigma \theta \alpha \lambda \alpha \sigma \sigma \eta \varsigma$ ). Already in 12:18. Clearly then the millennium, whatever it is, does not mean a period when Satan has no following on earth, for this vast host rallies at once to his standard.

Rev 20:9
They went up ( $\alpha v \varepsilon \beta \eta \sigma \alpha v$ ). Second aorist active indicative of $\alpha v \alpha \beta \alpha \iota v \omega$, a return to the manner of the seer as in verses 4,5 .

Over the breadth of the earth ( $\varepsilon \pi$ тo $\pi \lambda \alpha \tau o \varsigma \tau \eta \varsigma \gamma \eta \varsigma$ ). П $\lambda \alpha \tau \circ \varsigma$ is old word, in N.T. only here, 21:16; Eph 3:18. The hosts of Satan spread over the earth.

Compassed ( $\varepsilon \kappa \cup \kappa \lambda \varepsilon v \sigma \alpha v)$ ). First aorist (prophetic) active indicative of кขк $\lambda \varepsilon v \omega$, to encircle, late verb (Strabo) from кок久оৎ (circle), in N.T. only here and margin in Joh 10:24 (for $\varepsilon \kappa \cup \kappa \lambda \omega \sigma \alpha v$ from кик $\lambda о \omega$ ).

The camp of the saints ( $\tau \eta \nu \pi \alpha \rho \varepsilon \mu \beta \circ \lambda \eta \nu \tau \omega \nu \alpha \gamma \omega \nu \nu$ ). П $\alpha \rho \varepsilon \mu \beta \circ \lambda \eta(\pi \alpha \rho \alpha, \varepsilon v, \beta \alpha \lambda \lambda \omega)$ is common late word for military camp, in LXX for the Israelites in the desert (Ex 29:14, etc.), in N.T. for Roman barracks (Ac 24:34,37) and for an army in line of battle (Heb 11:34; Re 20:9).

The beloved city ( $\tau \eta \nu \pi o \lambda \iota \nu \tau \eta \nu \eta \gamma \alpha \pi \eta \mu \varepsilon v \eta \nu$ ). Perfect passive participle of $\alpha \gamma \alpha \pi \alpha \omega$, "the city the beloved." See Ps 78:68; 87:2 for Jerusalem so described. So Charles takes it here, but Swete holds it to be "the Church the New Zion" that is meant.

And fire came down out of heaven ( $\kappa \alpha \kappa \alpha \tau \varepsilon \beta \eta \pi \cup \rho \varepsilon \kappa$ tov oupavov). Second aorist (prophetic) active indicative of катаßaıv $\omega$. Cf. Ge 19:24; 39:6; Eze 38:22; 2Ki 1:10,12; Lu 9:54 (about John).

Devoured them (катєழаүعv av $\frac{1}{}$ ). Second aorist (prophetic) active of $\kappa \alpha \tau \varepsilon \sigma \theta 1 \omega$, to eat up (down). Vivid climax to this last great battle with Satan.

Rev 20:10
Was cast $(\varepsilon \beta \lambda \eta \theta \eta)$. First aorist (prophetic, affective) passive indicative of $\beta \alpha \lambda \lambda \omega$ (verse $3)$.

Into the lake of fire and brimstone ( $\varepsilon \iota \varsigma \tau \eta \nu \lambda \iota \mu \nu \eta \nu \tau о v \pi \nu \rho \circ \varsigma \kappa \alpha \theta \varepsilon \iota \circ v)$. As in 19:20 with the two beasts, as he adds, "where are also the beast and the false prophet" (отои ка то Өпрьог ка о $\psi \varepsilon v \delta о \pi \rho о \varphi \eta \tau \eta \varsigma) . ~$

They shall be tormented ( $\beta \alpha \sigma \alpha v ı \sigma \eta \sigma o v \tau \alpha$ ). Return to the prophetic future of verses
 14:11. For "for ever and ever" (عıৎ тоטৎ aı $\omega v$ 人ц $\tau 0 \nu$ aı $\omega v \omega \nu$ ) see $1: 6,18 ; 4: 9,10 ; 5: 13 ; 7: 12$; $10: 6 ; 11: 15$, etc. The devil was cast down from heaven ( $12: 9$ ), then imprisoned ( $20: 2 \mathrm{ff}$. ), now he received his final doom.

Rev 20:11
A great white throne ( $\theta \rho \circ v o v \mu \varepsilon \gamma \alpha v \lambda \varepsilon v \kappa o v$ ). Here $\mu \varepsilon \gamma \alpha v$ (great) is added to the throne pictures in $4: 4 ; 20: 4$. The scene is prepared for the last judgment often mentioned in the N.T. (Mt 25:31-46; Ro 14:10; 2Co 5:10 ). "The absolute purity of this Supreme Court is symbolized by the colour of the Throne" (Swete) as in Da 7:9; Ps 9:1; 97:2 . The name of God is not mentioned, but the Almighty Father sits upon the throne (4:2f., $9 ; 5: 1,7,13 ; 6: 16$; $7: 10,15 ; 19: 4 ; 21: 5$ ), and the Son sits there with him (Heb 1:3) and works with the Father (Joh 5:19-21; 10:30; Mt 25:31ff.; Ac 17:31; 2Co 5:10; 2Ti 4:1).

From whose face the earth and the heaven fled away (ov a $\pi \sigma \pi \rho о \sigma \omega \pi о v \varepsilon \varphi \cup \gamma \varepsilon \nu \eta \gamma \varepsilon$ $\kappa \alpha$ о оираvоৎ). Second aorist (prophetic) active of $\varphi \varepsilon v \gamma \omega$. See 16:20. The non-of matter is a common teaching in the O.T. (Ps 97:5; 102:27; Isa 51:6) as in the N.T. (Mr 13:31; 2Pe 3:10 ).

Was found $(\varepsilon v \rho \varepsilon \theta \eta)$. First aorist passive indicative of $\varepsilon v \rho \iota \sigma \kappa \omega$. All is now spiritual. Even scientists today are speaking of the non-eternity of the universe.

Rev 20:12
 general resurrection of verse 13 is pictured by anticipation as already over. No living are mentioned after the battle of verses $7-10$, though some will be living when Jesus comes to judge the quick and the dead ( $2 \mathrm{Ti} 4: 1 ; 1 \mathrm{Th} 4: 13 \mathrm{ff}$. ). All classes and conditions (11:18; 13:16; 19:5,18 ) John saw "standing before the throne" ( $\varepsilon \sigma \tau \omega \tau \alpha \varsigma \varepsilon v \omega \pi \iota v \tau$ тov $\theta \rho o v o v)$.

Books were opened ( $\beta \iota \beta \lambda_{\iota} \alpha \nu_{\nu o r} \theta \eta \sigma \alpha v$ ). First aorist passive of $\alpha \nu o \iota \gamma \omega$. Like Da 7:10 . The record of each human being has been kept in God's books.

Were judged ( $\varepsilon \kappa \rho \iota \vartheta \eta \sigma \alpha v$ ). First aorist passive indicative of $\kappa \rho \iota \nu \omega$. The sentence upon each rests upon written evidence.

Another book which is the book of life ( $\alpha \lambda \lambda$ o $\beta \iota \beta \lambda \iota \circ$ o $\varepsilon \sigma \tau \iota v \tau \eta \varsigma \zeta \omega \eta \varsigma)$. This book has already been mentioned ( $3: 5 ; 13: 8 ; 17: 8$ ). "It is the roll of living citizens of Jerusalem" (Swete), "the church of the first born enrolled in heaven" (Heb 12:23). The books are "the vouchers for the book of life" (Alford). We are saved by grace, but character at last (according to their works) is the test as the fruit of the tree (Mt 7:16,20; 10:32f.; 25:31-46; Joh 15:6; 2Co 5:10; Ro 2:10; Re 2:23; 20:12; 22:12 ).

Rev 20:13
Gave up ( $\varepsilon \delta \omega \kappa \varepsilon v$ ). Just "gave" (first aorist active indicative of $\delta \iota \delta \omega \mu$ ), but for the sea to give is to give up (effective aorist). Sea as well as land delivers its dead (all kinds of dead, good and bad). Swete notes that accidental deaths will not prevent any from appearing. Milligan is sure that the sea here means "the sea of the troubled and sinful world."

Death and Hades (о $\begin{aligned} & \text { avatoc ка о } \alpha ı \delta \eta \varsigma) . ~ " A n ~ i n s e p a r a b l e ~ p a i r " ~(S w e t e) ~ a s ~ i n ~ 1: 18 ; ~ 6: 8 ; ~\end{aligned}$ 20:14. So in Mt 16:18 "the gates of Hades" means the power of death. Etymologically Hades is the unseen world where all who die are as opposed to this visible world, but in actual use Hades is sometimes treated as the abode of the unrighteous (Lu 16:23). Charles thinks that this is true here, though there is nothing to show it apart from the personification of death and Hades and the casting of both into the lake of fire in verse 14. Here again "each man" (єкабтоৎ) receives judgment according to his deeds (Mt 16:27; 1Co 3:13; 2Co 5:10; Ro 2:6; 14:12; 1Pe 1:17; Re 2:23 ).

Rev 20:14
Were cast ( $\varepsilon \beta \lambda \eta \theta \eta \sigma \alpha v$ ). As the devil ( $20: 10$ ) followed the two beasts ( $19: 20$ ) into the same dread lake of fire. Death is personified and is disposed of, "the last enemy" (1Co 15:26 ) and Paul sings the paean of victory over death (1Co 15:54f. , from Ho 13:14 ). Hades has no more terrors, for the saints are in heaven. There is no more fear of death (Heb 2:15), for death is no more ( $\operatorname{Re} 21: 4$ ). The second death $(2: 11 ; 20: 6 ; 21: 8)$ is here identified as in 21:8 with the lake of fire.

Rev 20:15
If any was not found written in the book of life ( $\varepsilon \tau \iota \varsigma$ ovX $\varepsilon v \rho \varepsilon \theta \eta \varepsilon \nu \tau \eta \beta \beta \beta \lambda \omega \tau \eta \varsigma$ $\zeta \omega \eta \varsigma)$. Condition of first class with $\varepsilon$ and the first aorist passive indicative of $\varepsilon v \rho \iota \sigma \kappa \omega$. In this short sentence the doom is told of all who are out of Christ, for they too follow the devil and the two beasts into the lake of fire (the counterpart of the Gehenna of fire, Mt 5:22 ). There is no room here for soul sleeping, for an intermediate state, for a second chance, or for annihilation of the wicked. In Da 12:2 there is a resurrection to death as well as to life and so in Joh 5:29; Ac 24:15 .

## Revelation 21

Rev 21:1
A new heaven and a new earth (oupavov кaıvov ка $\gamma \eta \nu \kappa \alpha \iota \nu \eta \nu$ ). This new vision ( $\varepsilon \delta \delta o v$ ) is the picture of the bliss of the saints.

The first heaven and the first earth (o $\pi \rho \omega \tau \circ \varsigma$ оט $\rho \alpha \nu \circ \varsigma \kappa \alpha \eta \pi \rho \omega \tau \eta \gamma \eta$ )
are passed away ( $\alpha \pi \eta \lambda \theta \alpha \nu$, went away, second aorist active indicative of $\alpha \pi \varepsilon \rho \chi \circ \mu \alpha$ ). "Fled away" ( $\varepsilon \varphi \cup \gamma \varepsilon v)$ in 20:11.

And the sea is no more ( $\kappa \alpha \eta \theta \alpha \lambda \alpha \sigma \sigma \alpha$ ouk $\varepsilon \sigma \tau \iota v \varepsilon \tau$ ). The sea had given up its dead ( 20:13). There were great risks on the sea (18:17ff. ). The old physical world is gone in this vision. It is not a picture of renovation of this earth, but of the disappearance of this earth and sky (not heaven where God dwells). It is a glorious picture here in 21:1-8 in sharp contrast to the lake of fire in 20:11-15. The symbolism in neither case is to be pressed too literally, but a stern and a glorious reality exists behind it all.

Rev 21:2
The holy city, new Jerusalem ( $\tau \eta \nu \pi \sigma \lambda \iota \nu \tau \eta \nu \alpha \gamma \iota \alpha \nu$ I $\varepsilon \rho \circ \sigma \sigma \alpha \lambda \eta \mu \kappa \alpha \iota \nu \eta \nu$ ). "The New Earth must have a new metropolis, not another Babylon, but another and greater Jerusalem" (Swete), and not the old Jerusalem which was destroyed A.D. 70. It was called the Holy City in a conventional way ( $\mathrm{Mt} 4: 5 ; 27: 53$ ), but now in reality because it is new and fresh ( $\kappa \alpha \iota \eta \nu$ ), this heavenly Jerusalem of hope (Heb 12:22 ), this Jerusalem above (Ga 4:26ff. ) where our real citizenship is (Php 3:20).

Coming down out of heaven from God ( $\kappa \alpha \tau \beta \alpha \iota v o v \sigma \alpha v \varepsilon \kappa ~ \tau o v ~ o v \rho \alpha v o v ~ \alpha \pi о ~ \tau o v$ $\theta \varepsilon o v)$. Glorious picture caught by John and repeated from 3:12 and again in 21:10. But Charles distinguishes this new city of God from that in 21:9-22:2 because there is no tree of life in this one. But one shrinks from too much manipulation of this symbolism. It is better to see the glorious picture with John and let it tell its own story.

Made ready ( $\eta \tau о \mu \alpha \sigma \mu \varepsilon \nu \eta v$ ). Perfect passive participle of $\varepsilon \tau \sigma \mu \alpha \zeta \omega$ as in 19:7. The Wife of the Lamb made herself ready in her bridal attire.

As a bride adorned $(\omega \varsigma \nu \nu \mu \varphi \eta \nu \kappa \varepsilon \kappa о \sigma \mu \eta \mu \varepsilon \nu \eta \nu)$. Perfect passive participle of $\kappa о \sigma \mu \varepsilon \omega$, old verb (from коб $\boldsymbol{\sigma}$ ¢ ornament like our cosmetics), as in 21:19. Only here the figure of bride is not the people of God as in 19:7, but the abode of the people of God (the New Jerusalem).

For her husband ( $\tau \omega \alpha \nu \delta \rho \alpha v \tau \eta \varsigma)$. Dative case of personal interest.
Rev 21:3
The tabernacle of God is with men ( $\eta \sigma \kappa \eta \nu \eta \tau \tau v \theta \varepsilon o v \mu \varepsilon \tau \alpha \tau \omega \nu \alpha \nu \theta \rho \omega \pi \omega v$ ). It is one of the angels of the Presence ( $16: 17 ; 19: 5$ ) speaking.

And he shall dwell with them ( $\kappa \alpha \sigma \kappa \eta \nu \omega \sigma \varepsilon \mu \varepsilon \tau^{\prime} \alpha \nu \tau \omega v$ ). Future active of $\sigma \kappa \eta v o \omega$, already in 7:15 from Eze 37:27; Zec 2:10; 8:8 and used of the Incarnate Christ on earth by

John (Joh 1:14), now a blessed reality of the Father. The metaphor stands for the Shekinah Glory of God in the old tabernacle $(7: 15 ; 13: 6 ; 15: 5)$, the true tabernacle of which it was a picture (Heb 8:2; 9:11). God is now Immanuel in fact, as was true of Christ (Mt 1:23).

Rev 21:4
Shall wipe away every tear from their eyes ( $\varepsilon \xi \alpha \lambda \varepsilon ı \psi \varepsilon \pi \alpha v \delta \alpha \kappa \rho v o v \varepsilon \kappa \tau \omega \nu$ о $\sigma \theta \alpha \lambda \mu \omega v$ $\alpha v \tau \omega v)$. More exactly, "shall wipe out every tear out of their eyes" (repetition of $\varepsilon \xi$ ) like a tender mother as in 7:17 (Isa 25:8). There is no more that ought to cause a tear, for death
 ing), and pain ( $\pi$ ovoc as in 16:10) are all gone. There is peace and bliss.

Rev 21:5
Behold, I make all things new (Iסov kaıva $\pi \circ \omega \omega$ $\pi \alpha \nu \tau \alpha$ ). The first time since 1:8 that God has been represented as speaking directly, though voices have come out of the throne before ( $21: 3$ ) and out of the sanctuary ( $16: 1,17$ ), which may be from God himself, though more likely from one of the angels of the Presence. This message is not addressed to John ( $7: 14 ; 17: 7 ; 21: 6 ; 22: 6$ ), but to the entire world of the blessed. See Isa $43: 18 f$. for the words (Iסov $\varepsilon \gamma \omega$ тоเ $\omega$ кaıva). The idea of a new heaven and a new earth is in Isa 65:17; 66:22; Ps 102:25f. For the locative here with $\varepsilon \pi(\varepsilon \pi \tau \omega \theta \rho o v \omega)$ see 7:10; 19:4 (genitive more usual, 4:9f.; 5:1,7,13 , etc.). See 20:11 for the picture.

And he saith ( $\kappa \alpha \lambda \varepsilon \gamma \varepsilon$ ). Probably this means a change of speakers, made plain by $\mu \mathrm{o}$ (to me) in many MSS. An angel apparently (as in 14:13; 19:9f. ) assures John and urges him to write ( $\gamma \rho \alpha \psi o v$ as in $1: 11 ; 2: 1,8,12,18 ; 3: 1,7,14 ; 14: 3$ ). The reason given ( $o \tau$, for) is precisely the saying in 22:6 and he uses the two adjectives ( $\pi \iota \sigma \tau \circ$ ка $\alpha \lambda \eta \theta \iota v o$ ) employed in 19:11 about God himself, and 3:14 about Christ. In 19:9 $\alpha \lambda \eta \theta$ tvo occurs also about "the words of God" as here. They are reliable and genuine.

Rev 21:6
They are come to pass ( $\Gamma \varepsilon \gamma \circ \vee \alpha v$ ). Second perfect active indicative of $\gamma ı v o \mu \alpha$ with $-\alpha v$
 voice of God because, as in $1: 8$, He says:

I am the Alpha and the Omega ( $\mathrm{E} \gamma \omega$ то $\mathrm{A} \lambda \varphi \alpha$ ка то O ) with the addition "the beginning and the end" ( $\eta \alpha \rho \chi \eta$ к $\alpha$ то $\tau \varepsilon \lambda о \varsigma)$, the whole used in 22:13 of Christ. In Isa 44:6 there is something like the addition, and in $\operatorname{Col} 1: 18 ; \operatorname{Re} 3: 14 \eta \alpha \rho \chi \eta$ is applied to Christ, while here God is the First Cause ( $\alpha \rho \chi \eta$ ) and the Finality ( $\tau \varepsilon \lambda o \varsigma$ ) as in Ro 11:36; Eph 4:6 . But God works through Christ (Joh 1:3; Heb 1:2f.; Col 1:12-20 ). God is the bountiful Giver (Jas 1:5,17 ) of the Water of Life. See 7:17; 22:1,17 for this metaphor, which is based on Isa 55:1 . It is God's own promise ( $\mathrm{E} \gamma \omega \delta \omega \sigma \omega$ ), "I will give."

Of the fountain ( $\varepsilon \kappa \tau \eta \varsigma \pi \eta \gamma \eta \varsigma)$. For this partitive use of $\varepsilon \kappa$ see Mt 25:8, without $\varepsilon \kappa \operatorname{Re}$ 2:17.

Freely ( $\delta \omega \rho \varepsilon \alpha v$ ). See Mt 10:8; Joh 4:10; Ro 3:24; Ac 8:20; Re 22:17 .

Rev 21:7
He that overcometh ( $o v i \kappa \omega v$ ). Recalls the promises at the close of each of the Seven Letters in chapters 2 and 3.

Shall inherit ( $\kappa \lambda \eta \rho о \nu о \mu \eta \sigma \varepsilon$ ). Future active of $\kappa \lambda \eta \rho \circ \nu \circ \mu \varepsilon \omega$, word with great history (Mr 10:17; 1Pe 1:4; Ga 4:7; Ro 8:17), here interpreted for the benefit of these who share in Christ's victory.

I will be his God (E $\sigma o \mu \alpha \alpha v \tau \omega \theta \varepsilon \sigma \varsigma)$. Repeated Old Testament promise (first to Abraham, Ge 17:7f. ). Cf. Re 21:3 .

He shall be my son ( $\alpha v \tau \circ \varsigma \varepsilon \sigma \tau \alpha \mu$ vioc). Made first of Solomon (2Sa 7:14) and applied to David later in Ps 89:26f .

Rev 21:8
Their part shall be ( $\tau 0 \mu \varepsilon \rho \circ \varsigma \alpha v \tau \omega v$ ). In contrast to the state of the blessed (verses 3-7) the state of "those who have disfranchised themselves from the Kingdom of God" (Charles) is given. They are with Satan and the two beasts, and are the same with those not in the book of life ( $20: 15$ ) in the lake of fire and brimstone ( $19: 20 ; 20: 10,14 \mathrm{f}$. ) , that is the second death ( $2: 11 ; 20: 6,14$ ). See also $14: 10$. There are eight epithets here used which apply to various sections of this direful list of the doomed and the damned, all in the dative (case of personal interest).

For the fearful ( $\tau$ oıs $\delta \varepsilon ı \lambda$ oıs). Old word (from $\delta \varepsilon \iota \delta \omega$, to fear) for the cowardly, who recanted under persecution, in N.T. only here, Mt 8:26; $\mathrm{Mr} 4: 40$.

Unbelieving (aлıбтоıৎ). "Faithless," "untrustworthy," in contrast with Christ "o $\pi \iota \sigma \tau \circ \varsigma$ " ( 1:5). Cf. 2:10,13; 3:14; 17:14. Disloyalty is close kin to cowardice.

Abominable ( $\varepsilon \beta \delta \varepsilon \lambda v \gamma \mu \varepsilon v o \iota s)$. Perfect passive participle of $\beta \delta \varepsilon \lambda v \sigma \sigma \omega$, old verb, in N.T. only here and Ro 2:22, common in LXX, to pollute (Ex 5:21). Those who have become defiled by the impurities of emperor-worship (7:4f.; 21:27; Ro 2:22; Tit 1:16 ).

Murderers ( $\varphi 0 \vee \varepsilon v \sigma \iota v$ ). As a matter of course and all too common always (Mr 7:21; Ro 1:29; Re 9:21).

Fornicators ( $\pi$ о $\rho$ voıs). Again all too common always, then and now (1Co 5:10; 1 Ti 1:9f. ). These two crimes often go together.

Sorcerers ( $\varphi \alpha \rho \mu \alpha \kappa \iota \varsigma)$. Old word, in N.T. only here and 22:15. Closely connected with idolatry and magic (9:21; 13:13f. ).

Idolaters ( $\varepsilon \iota \delta \omega \lambda$ o $\lambda \alpha \tau \rho a ı \varsigma)$. See 1Co 5:10f.; 10:7; Eph 5:5; Re 22:15. With a powerful grip on men's lives then and now.

All liars ( $\pi \alpha \sigma$ тoıৎ $\psi \varepsilon v \delta \varepsilon \sigma \iota v$ ). Repeated in 22:15 and stigmatized often (2:2; 3:9; 14:5; 21:8,27; 22:15 ). Not a "light" sin.

## Rev 21:9

One of the seven angels ( $\varepsilon ા \varsigma \varepsilon \kappa \tau \omega \nu \varepsilon \pi \tau \alpha \alpha \gamma \gamma \varepsilon \lambda \omega \nu$ ). As in 17:1 with the same introduction when the angel made the announcement about the harlot city (Babylon), so here the
description of the heavenly city，the New Jerusalem，is given by one of the same group of angels who had the seven bowls．Thus the $v v \mu \varphi \eta$（Bride）is placed in sharp contrast with the $\pi о \rho \vee \eta$（Harlot）．The New Jerusalem was briefly presented in verse 2，but now is pictured at length（ 21：9－22：5）in a nearer and clearer vision．

The bride the wife of the Lamb（ $\tau \eta \nu \nu \nu \mu \varphi \eta \nu \tau \eta \nu \gamma \cup v \alpha ı \kappa \alpha$ tov $\alpha \rho v ⿺ 辶)$ ）．Twice already the metaphor of the Bride has been used（19：7；21：2 ），here termed＂wife＂（ $\gamma$ טvaıка），men－ tioned proleptically as in 19：7 if the marriage is not yet a reality．For the use of the same metaphor elsewhere in the N．T．see on 19：7．

Rev 21：10
He carried me away in the Spirit（ $\alpha \pi \eta \nu \varepsilon \gamma \kappa \varepsilon \nu \mu \varepsilon \varepsilon v \pi \nu \varepsilon \nu \mu a \tau$ ）．See same language in 17：7 when John received a vision of the Harlot City in a wilderness．Here it is＂to a mountain great and high＂（ $\varepsilon \pi$ орос $\mu \varepsilon \gamma \alpha$ ка $v \psi \eta \lambda$ доv）．So it was with Ezekiel（Eze 40：2）and so the devil took Jesus（Mt 4：8）．It was apparently not Mount Zion（14：1），for the New Jerusalem is seen from this mountain．＂The Seer is carried thither＇in spirit＇（cf．1：10；4：1 ）；the Angel＇s $\delta \varepsilon u \rho o$ is a sursum cor to which his spirit under the influence of the＇Spirit of revelation＇（Eph 1：17 ）at once responds＂（Swete）．

And he shewed me（ $\kappa \alpha \varepsilon \delta \varepsilon ı \xi \varepsilon v \mu \mathrm{o}$ ）．First aorist active indicative of $\delta \varepsilon ו \kappa v \nu \mu$ ，just as he had said he would do in verse 9 （ $\delta \varepsilon ı \xi \omega \sigma 0$ ，I will shew thee）．Precisely the same words about Jerusalem as in verse 2，save the absence of kaıv $\nu \nu$（New）．

Rev 21：11
Having the glory of God（ $\varepsilon \chi \circ \cup \sigma \alpha \nu \tau \eta \nu \delta o \xi a \nu \tau o v ~ \theta \varepsilon o v)$ ．Syntactically this clause goes with verse 10 ，the feminine accusative singular participle $\varepsilon \chi o v \sigma \alpha v$ agreeing with $\pi 0 \lambda ı v$ ，the radiance of the dazzling splendour of God as seen in Isa 60：1；Eze 43：5．God＇s very presence is in the Holy City（the Bride）．

Light（ $\varphi \omega \sigma \tau \eta \rho$ ）．＂Luminary，＂late word（in LXX，papyri），in N．T．only here and Php 2：15．Christ is the light（ $\varphi \omega \varsigma$ ）of the world（Joh 8：12）and so are Christians（Mt 5：14）who have received the illumination（ $\varphi \omega \tau \iota \sigma \mu$ с）of God in the face of Christ（2Co 4：6）and who radiate it to men（Php 2：15）．See both words in Ge 1：3，14．＂The＇luminary＇of the Holy City is her witness to Christ＂（Swete）．

Like unto a stone most precious（ $о \mu о \circ \varsigma \varsigma \lambda \theta \omega \tau \mu \mu \omega \tau \alpha \tau \omega$ ）．Associative instrumental

As it were a jasper stone（ $\omega \varsigma \lambda_{1} \theta \omega \iota \alpha \sigma \pi \iota \delta$ ）．As in $4: 3$ ，which see．
Clear as crystal（ $\kappa \rho \cup \sigma \tau \alpha \lambda \lambda 1 \zeta о \nu \tau)$ ．Verb not found elsewhere from крvбта入入оc（old word，4：6；22：1 ），＂of crystalline brightness and transparency＂（Thayer），＂transparent and gleaming as rock－crystal＂（Moffatt）．

Rev 21：12
Having a wall great and high（ $\varepsilon \chi \circ v \sigma \alpha \tau \varepsilon \not \chi \circ \varsigma \mu \varepsilon \gamma \propto \kappa \alpha \cup \psi \eta \lambda о \nu$ ）．John returns，after the parenthesis in verse 11 ，to the structure in verse 10 ，only to use the accusative $\varepsilon \chi o v \sigma a v$ as
before to agree with $\pi 0 \lambda \iota v$, but the nominative $\varepsilon \chi \circ v \sigma \alpha$ as again with "twelve gates" ( $\pi \nu \lambda \omega v a \varsigma$ $\delta \omega \delta \varepsilon \kappa \alpha)$. Пu $\lambda \omega v$ is an old word (from $\pi \nu \lambda \eta$ gate) for a large gate as in Lu 16:20 and six times in Rev. for the gate tower of a city wall ( $\operatorname{Re} 21: 12,13,15,21,25 ; 22: 14$ ) as in 1Ki 17:10; Ac 14:13. See Eze 48:31ff. for these twelve gates, one for each tribe (cf. Re 7:1-8 ).

At the gates ( $\varepsilon \pi$ тoıs $\pi \nu \lambda \omega \sigma \tau v$ ). "Upon the gate towers."
Twelve angels ( $\alpha \gamma \gamma \varepsilon \lambda$ ouc $\delta \omega \delta \varepsilon \kappa \alpha$ ). As $\pi \cup \lambda \omega \rho o$ or $\varphi \cup \lambda \alpha \kappa \varepsilon \varsigma$ according to Isa 62:6; 2 Ch 8:14.

Names written thereon (ovoцата $\varepsilon \pi \imath \gamma \varepsilon \gamma \rho \alpha \mu \mu \varepsilon v \alpha)$. Perfect passive participle of $\varepsilon \pi \iota \gamma \rho \alpha \varphi \omega$.

Which are the names ( $\alpha$ ع $\sigma \tau v$ ). Just as in Ezekiel's vision (48:31ff. ), so here the names of the twelve tribes of Israel appear, one on each gate.

Rev 21:13
Three gates ( $\pi \nu \lambda \omega v \varepsilon \varsigma \tau \rho \varepsilon \iota)$ ) on each of the four sides as in Eze 42:16ff. ; "on the east" ( $\alpha \pi$ о $\alpha v a \tau 0 \lambda \eta \varsigma$, as in 16:12, starting from the east), "on the north" ( $\alpha \pi$ о $\beta$ oppa, from the north, as in Lu 13:29 ), "on the south" (aло voтоv, from the south, as in Lu 13:29), "on the west" ( $\alpha \pi 0 \delta v \sigma \mu \omega v$, from the west, as in Mt 8:11).

Rev 21:14
Had ( $\varepsilon \chi \omega v$ ). Masculine present active participle of $\varepsilon \chi \omega$ instead of $\varepsilon \chi \circ v$ (neuter like to $\tau \varepsilon \not \chi \circ \varsigma)$, and the participle occurs independently as if a principal verb ( $\varepsilon \not \chi \varepsilon v$ ) as often in this book.

Twelve foundations ( $\theta \varepsilon \mu \varepsilon \lambda \iota o v \varsigma ~ \delta \omega \delta \varepsilon \kappa \alpha$ ). Foundation stones, old adjective (from $\theta \varepsilon \mu \alpha$, from $\tau 1 \theta \eta \mu$ ), here as in 1Co 3:1 1ff.; 2Ti 2:19, with $\lambda_{\imath} \theta$ ouc (stones understood), though often neuter substantive to $\theta \varepsilon \mu \varepsilon \lambda_{\iota}$ ov (Lu 6:48f.; Ac 16:26 ). See Isa 28:16; Heb 11:10. Twelve because of the twelve apostles as foundation stones (Eph 2:20).

On them ( $\varepsilon \pi^{\prime} \alpha \nu \tau \omega v$ ). On the twelve foundation stones.
Names of the twelve apostles of the Lamb (оvоната $\tau \omega \nu \delta \omega \delta \varepsilon к \alpha \alpha \pi о \sigma \tau о \lambda \omega v \tau$ $\alpha \rho v i o v)$. Jesus had spoken of twelve thrones for the apostles (Mt 19:28); names of all twelve are here written, not just that of Peter, as some would argue from Mt 16:18. As a matter of fact, Christ is the corner stone or aкроү $\omega$ vıoıov (1Pe 2:6; 1Co 3:10; Eph 2:20), though rejected by the Sanhedrin (Mt 21:42ff. ). One may wonder if the name of Judas is on that stone or that of Matthias.

Rev 21:15
Had ( $\varepsilon \chi \chi \nu)$. Regular imperfect here, no longer $\varepsilon \chi \omega v$.
For a measure a golden reed ( $\mu \varepsilon \tau \rho о \nu \kappa \alpha \lambda \alpha \mu \circ v \chi \rho v \sigma o v v$ ). See 11:1 for к $\alpha \lambda \alpha \mu о \varsigma$ (reed). Met $\rho o v$ is an old word, kin to $\mu \eta \tau \eta \rho$ (mother, moulder, manager), an instrument for measuring $(\mu \varepsilon \tau \rho \varepsilon \omega)$ as in Mt 7:2, here in the predicate accusative.

To measure ( $\mathfrak{v a ~} \mu \varepsilon \tau \rho \eta \sigma \eta)$ ). Purpose clause with $v^{2} \alpha$ and the first aorist active subjunctive of $\mu \varepsilon \tau \rho \varepsilon \omega$. The rod of gold was in keeping with the dignity of the service of God (1:12; 5:8; 8:3; 9:13; 15:7).

Rev 21:16
Lieth foursquare ( $\tau \varepsilon \tau \rho \alpha \gamma \omega v \circ \varsigma \kappa \varepsilon \iota \tau \alpha)$. Present middle indicative of $\kappa \varepsilon \mu \alpha$. The predicate adjective is from $\tau \varepsilon \tau \rho \alpha$ (Aeolic for $\tau \varepsilon \sigma \sigma \alpha \rho \varepsilon \varsigma$ four) and $\gamma \omega v o \varsigma(\gamma \omega v i \alpha$ corner, Mt 6:5) here only in N.T. As in Eze 48:16,20 . It is a tetragon or quadrilateral quadrangle (21:12f. ).

The length thereof is as great as the breadth ( $\tau \boldsymbol{\mu} \eta \kappa \circ \varsigma \alpha \cup \tau \eta \varsigma ~ o \sigma o v ~ \tau o ~ \pi \lambda \alpha \tau о \varsigma) . ~ I t ~ i s ~$ rectangular, both walls and city within. Babylon, according to Herodotus, was a square, each side being 120 stadia. Diodorus Siculus says that Nineveh was also foursquare.

With the reed ( $\tau \omega \kappa \alpha \lambda \alpha \mu \omega$ ). Instrumental case (cf. verse 15 for $\kappa \alpha \lambda \alpha \mu \circ \varsigma$ ) and for $\mu \varepsilon \tau \rho \varepsilon \omega$ (aorist active indicative here)

Twelve thousand furlongs ( $\varepsilon \pi \sigma \tau \alpha \delta \iota \omega v \delta \omega \delta \varepsilon \kappa \alpha \chi_{\imath} \lambda \iota \alpha \delta \omega v$ ). This use of the genitive $\sigma \tau \alpha \delta \omega \omega$ with $\varepsilon \pi$ is probably correct (reading of Aleph P), though A Q have $\sigma \tau \alpha \delta$ ovc (more usual, but confusing here with $\chi \lambda \lambda \omega \delta \omega v$ ). Thucydides and Xenophon use $\varepsilon \pi$ with the genitive in a like idiom (in the matter of). It is not clear whether the 1500 miles ( 12,000 furlongs) is the measurement of each of the four sides or the sum total. Some of the rabbis argued that the walls of the New Jerusalem of Ezekiel would reach to Damascus and the height would be 1500 miles high.

Equal ( $ا \sigma \alpha$ ). That is, it is a perfect cube like the Holy of Holies in Solomon's temple ( 1 Ki 6:19f. ). This same measurement ( $\pi \lambda \alpha \tau \sigma \sigma, \mu \eta \kappa о \sigma, v \psi \circ \varsigma$ ) is applied to Christ's love in Eph 3:18, with $\beta \alpha \theta$ os (depth) added. It is useless to try to reduce the measurements or to put literal interpretations upon this highly wrought symbolic language. Surely the meaning is that heaven will be large enough for all, as Jesus said (Joh 14:1ff. ) without insisting on the materialistic measurement of a gorgeous apartment house full of inside rooms.

Rev 21:17
A hundred and forty and four cubits ( $\varepsilon \kappa \alpha \tau \circ \nu \tau \varepsilon \sigma \sigma \varepsilon \rho \alpha \kappa \circ \nu \tau \alpha \tau \varepsilon \sigma \sigma \alpha \rho \omega \nu \pi \eta \chi \omega v$ ). Another multiple of $12(12 \times 12=144)$ as in $7: 4 ; 14: 1$. It is not clear whether it is the height or the breadth of the wall that is meant, though v\%oc (height) comes just before. That would be 216 feet high (cf. verse 12), not enormous in comparison with the 7,000,000 feet (1500 miles) height of the city.

According to the measure of man, that is, of an angel ( $\mu \varepsilon \tau \rho о \nu \alpha v \theta \rho \omega \pi \sigma v$, о $\varepsilon \sigma \tau \tau$ $\alpha \gamma \gamma \varepsilon \lambda o v)$. No preposition for "according to," just the accusative case of general reference in apposition with the verb $\varepsilon \mu \varepsilon \tau \rho \eta \sigma \varepsilon v$. Though measured by an angel, a human standard was employed, man's measure which is angel's (Bengel).

Rev 21:18
The building of the wall ( $\eta \varepsilon v \delta \omega \mu \eta \sigma \iota \varsigma$ tov $\tau \varepsilon \iota \chi \circ \cup \varsigma)$. Or $\varepsilon v \delta о \mu \eta \sigma \varsigma$, elsewhere so far only in Josephus (Ant. XV. 9. 6, a mole or breakwater) and in an inscription (Syll. 583 31),
apparently from $\varepsilon v \delta o \mu \varepsilon \omega$, to build in, and so the fact of building in. The wall had jasper (verse 11) built into it.

Was pure gold ( $\chi \rho v \sigma \iota \nu \kappa \alpha \theta \alpha \rho o \nu$ ). No copula $\eta \nu$ (was) expressed. The city shone like a mass of gold in contrast with the jasper lustre of the wall.

Pure glass (va入 $\omega \kappa \alpha \alpha \rho \omega$ ). Associative instrumental case after o $\mu \circ \iota v$. Hva $\alpha o \varsigma$ (apparently from $v \varepsilon$, it rains, and so raindrop) in N.T. only Re 21:18,21 .

Rev 21:19
Were adorned ( $\kappa \varepsilon \kappa о \sigma \mu \eta \mu \varepsilon v o$ ). Perfect passive participle of $\kappa о \sigma \mu \varepsilon \omega$ as in verse 2, but without the copula $\eta \sigma \alpha \nu$ (were), followed by instrumental case $\lambda_{\imath} \theta \omega$ (stone).

With all manner of precious stones $(\pi \alpha \nu \tau \lambda \iota \theta \omega \tau \iota \mu t \omega)$. "With every precious stone." The list of the twelve stones in verses 19,20 has no necessary mystical meaning. "The writer is simply trying to convey the impression of a radiant and superb structure" (Moffatt). The twelve gems do correspond closely (only eight in common) with the twelve stones on the high priest's breastplate (Ex 28:17-20; 39:10ff.; Eze 28:13; Isa 54:11f. ). Charles identifies them with the signs of zodiac in reverse order, a needless performance here. See the stones in $\operatorname{Re} 4: 3$. These foundation stones are visible. For jasper (ıaблıৎ) see 4:3; 21:11,18; Isa 54:12 ; sapphire ( $\sigma \alpha \pi \varphi \varepsilon \iota \rho о \varsigma)$ see Ex 24:10;. Isa 54:11 (possibly the $\lambda \alpha \pi \iota \varsigma ~ \lambda \alpha \zeta \nu \lambda$ of Turkestan); chalcedony ( $\chi \alpha \lambda \kappa \eta \delta \omega v$ ) we have no other reference in N.T. or LXX (described by Pliny, H.N. XXXIII.21), possibly a green silicate of copper from near Chalcedon; emerald ( $\sigma \mu \rho \alpha \gamma \delta о \varsigma)$ here only in N.T., see 4:3 $\sigma \mu \alpha \rho \alpha \gamma \delta \iota \nu o \varsigma$, and like it a green stone.

Rev 21:20
Sardonyx ( $\sigma \alpha \rho \delta o v v \xi$ ), here only in N.T., white with layers of red, from sardion (red carnelian) and onyx (white); for sardius ( $\sigma \alpha \rho \delta \iota o v$ ) see 4:3; chrysolite ( $\chi \rho v \sigma o \lambda_{\imath} \theta o \varsigma$ ), here only in N.T. (Ex 28:20), stone of a golden colour like our topaz or amber or a yellow beryl or golden jasper; beryl ( $\beta \eta \rho v \lambda \lambda o \varsigma)$, again here only in N.T. (Ex 28:20 ), note the difficulty of identification, much like the emerald according to Pliny; for topaz ( $\tau о \pi \alpha \zeta \iota \nu)$, here only in N.T. (Ex 28:17 ), a golden-greenish stolle; chrysoprase (chrusoprasos), here only in N.T. (not in LXX), in colour like a teek, translucent golden-green; jacinth (vakıvӨoc), of the colour of the hyacinth, a violet colour (Pliny), already in 9:17 like blue smoke, like achates in LXX; amethyst ( $\alpha \mu \varepsilon \theta v \sigma \tau \sigma \varsigma$ ), only here in N.T. (Ex 28:19 ), of a violet and purple colour, more brilliant than the vakıvӨoc. Swete sums up the colours thus: blue (sapphire, jacinth, amethyst), green (jasper, chalcedony, emerald, beryl, topaz, chrysoprase), red (sardonyx, sardius), yellow (chrysolite). But even so there is great variety in hue and brilliancy and in the reaction on each other. Clement of Alexandria argues that this variety illustrates the variety of gifts and graces in the twelve apostles. Possibly so.

Rev 21:21

Twelve pearls ( $\delta \omega \delta \varepsilon \kappa \alpha \mu \alpha \rho \gamma \alpha \rho \iota \tau)$. These gate towers ( $\pi \nu \lambda \omega \nu \varepsilon \varsigma$ ) were mentioned in verses 12 f . Each of these (cf. Isa 54:12) is a pearl, one of the commonest of jewels (Mt 7:6; 13:46; 1Ti 2:9).

Each one ( $\alpha \vee \alpha$ عıৎ єкабтоৎ). Distributive use of $\alpha v \alpha$, but with the nominative (used as adverb, not preposition) rather than the accusative (as a preposition) as appears also in Mr 14:19; Joh 8:9 ; with кata in Ro 12:5 , "a barbaric construction" according to Charles.

Street ( $\pi \lambda \alpha \tau \varepsilon ı \alpha$ ). For which word (broad way, oסoc understood) see Mt 6:5, here the singular, but includes all the streets.

Transparent ( $\delta \iota \alpha \cup \gamma \eta \varsigma)$. Old word (from $\delta \iota \alpha$, through, $\alpha v \gamma \eta$, ray, shining through), here alone in N.T.

Rev 21:22
I saw no temple therein (vaov ovk $\varepsilon เ \delta o v \varepsilon v \alpha v \tau \eta)$. "Temple I did not see in it." The whole city is a temple in one sense (verse 16), but it is something more than a temple even with its sanctuary and Shekinah Glory in the Holy of Holies.

For the Lord God the Almighty, and the Lamb are the temple thereof (o $\gamma \alpha \rho$ Kvpıos о $\theta \varepsilon о \varsigma$ о $\pi \alpha \nu \tau о \kappa \rho \alpha \tau \omega \rho, v \alpha o \varsigma ~ \alpha v \tau \eta \varsigma \varepsilon \sigma \tau \iota v \kappa \alpha \tau о \alpha \rho v ı v)$. "For the Lord God, the Almighty, is the sanctuary of it and the Lamb." The Eternal Presence is the Shekinah Glory of God (verse 3). In 2Co 6:16 we are the sanctuary of God here, but now God is our Sanctuary, and so is the Lamb as in chapters $\operatorname{Re} 4 ; 5$. See 1:8 and often for the description of God here.

Rev 21:23
To shine upon it ( $\imath \alpha \rho \alpha \iota v \omega \sigma \iota \nu \alpha \tau \eta)$ ). Purpose clause with $\imath v \alpha$ and the present active subjunctive of $\varphi \alpha \iota v \omega$, to keep on shining. Light is always a problem in our cities. See Isa 60:19f. .

Did lighten it $(\varepsilon \varphi \omega \tau \iota \sigma \varepsilon \nu \alpha v \tau \eta \nu)$. First aorist active indicative of $\varphi \omega \tau \iota \zeta \omega$, to illumine, old verb from $\varphi \omega \varsigma$ (Lu 11:36). If the sun and moon did shine, they would give no added light in the presence of the Shekinah Glory of God. See verse 11 for "the glory of God." Cf. 18:1;21:3. "Their splendour is simply put to shame by the glory of God Himself" (Charles).

And the lamp thereof is the Lamb ( $\kappa \alpha$ о $\lambda \nu \chi \nu о \varsigma ~ \alpha \cup \tau \eta \varsigma ~ \tau о ~ \alpha \rho v ı o v) . ~ C h a r l e s ~ t a k e s ~ o ~$ $\lambda v \chi$ vos as predicate, "and the Lamb is the lamp thereof." Bousset thinks that John means to compare Christ to the moon the lesser light (Ge 1:16), but that contrast is not necessary. Swete sees Christ as the one lamp for all in contrast with the many $\lambda v \chi \nu / \alpha$ of the churches on earth (1:12,20). "No words could more clearly demonstrate the purely spiritual character of St. John's conception of the New Jerusalem" (Swete).

Rev 21:24
Amidst the light thereof ( $\delta ⿺ \alpha \operatorname{\tau ov} \varphi \omega \tau \circ \varsigma \alpha \cup \tau \eta \varsigma)$. Rather "by the light thereof." From Isa $60: 3,11,20$. All the moral and spiritual progress of moderns is due to Christ, and the nations of earth will be represented, including "the kings" (o $\beta a \sigma \iota \lambda \varepsilon \iota \varsigma)$, mentioned also in Isa 60:3 , "do bring their glory into it" ( $\varphi \varepsilon \rho \circ \cup \sigma \iota \nu \tau \eta \nu \delta o \xi \alpha \nu \alpha \nu \tau \omega \nu \varepsilon \iota \varsigma \alpha v \tau \eta v)$. Present active
indicative of $\varphi \varepsilon \rho \omega$. Swete is uncertain whether this is a picture of heaven itself or "some gracious purpose of God towards humanity which has not yet been revealed" and he cites 22:2 in illustration. The picture is beautiful and glorious even if not realized here, but only in heaven.

Rev 21:25
Shall in no wise be shut (ov $\mu \eta \kappa \lambda \varepsilon \iota \sigma \theta \omega \sigma \iota v$ ). Double negative with the first aorist passive subjunctive of $\kappa \lambda \varepsilon เ \omega$.

By day ( $\eta \mu \varepsilon \rho \alpha \varsigma)$. Genitive of time. Mentioned alone without vvктoৎ (by night), "for there shall be no night there" ( $v v \xi \gamma \alpha \rho$ ovk $\varepsilon \sigma \tau \alpha \varepsilon \kappa \varepsilon$ ). This looks like a continued picture of heaven.

Rev 21:26
They shall bring (oloovoıv). Future active indicative of $\varphi \varepsilon \rho \omega$. Rome gathered the merchandise of the world (18:11ff. ). The City of God will have the best of all the nations (Isa 60:5,11), an expansion of verse 24.

Rev 21:27
There shall in no wise enter into it (ov $\mu \eta \varepsilon \iota \sigma \varepsilon \lambda \theta \eta \varepsilon \iota \varsigma \alpha v \tau \eta v$ ). Double negative again with the second aorist active subjunctive of $\varepsilon \iota \sigma \varepsilon \rho \chi \circ \mu \alpha$ with $\varepsilon \iota \varsigma$ repeated. Like Isa 52:1; Eze 44:9.

Anything unclean ( $\pi \alpha \nu$ коıvov). Common use of $\pi \alpha \nu$ with negative like $o v \delta \varepsilon \nu$, and the use of kotvoc for defiled or profane as in Mr 7:2; Ac 10:14, not just what is common to all (Tit 1:4).

Or he that ( $\kappa \alpha$ о). "And he that."
Maketh an abomination and a lie ( $\pi \circ \iota \omega v \beta \delta \varepsilon \lambda \nu \gamma \mu \alpha \kappa \alpha \psi \varepsilon v \delta o \varsigma)$. Like Babylon ( 17:4 which see for $\beta \delta \varepsilon \lambda v \gamma \mu \alpha$ ) and 21:8 for those in the lake of fire and brimstone, and 22:15 for "every one loving and doing a lie." These recurrent glimpses of pagan life on earth and of hell in contrast to heaven in this picture raise the question already mentioned whether John is just running parallel pictures of heaven and hell after the judgment or whether, as Charles says: "The unclean and the abominable and the liars are still on earth, but, though the gates are open day and night, they cannot enter." In apocalyptic writing literalism and chronology cannot be insisted on as in ordinary books. The series of panoramas continue to the end.

But only they which are written ( $\varepsilon \mu \eta$ о $\gamma \varepsilon \gamma \rho a \mu \mu \varepsilon \nu о$ ). "Except those written." For "the book of life" see 3:5; 13:8; 20:15 . Cf. Da 12:1 .

## Revelation 22

Rev 22:1
He shewed me ( $\varepsilon \delta \varepsilon ı \xi \varepsilon v \mu 0$ ). The angel as in 21:9,10 (cf. 1:1; 4:1). Now the interior of the city.

A river of water of life ( $\pi о \tau \alpha \mu о \nu v \delta \alpha \tau о \varsigma \zeta \omega \eta \varsigma)$. For $v \delta \omega \rho \zeta \omega \eta \varsigma$ (water of life) see 7:17; 21:6; 22:17; Joh 4:14. There was a river in the Garden of Eden (Ge 2:10). The metaphor of river reappears in Zec 14:8; Eze 47:9, and the fountain of life in Joe 3:18; Jer 2:13; Pr 10:11; 13:14; 14:27; 16:22; Ps 36:10 .

Bright as crystal ( $\lambda \alpha \mu \pi \rho \circ v \omega \varsigma \kappa \rho v \sigma \tau \alpha \lambda \lambda o v)$. See 4:6 for $\kappa \rho \cup \sigma \tau \alpha \lambda \lambda$ ov and 15:6; 19:8; 22:16 for $\lambda \alpha \mu \pi \rho o v$. "Sparkling like rock crystal" (Swete), shimmering like mountain water over the rocks.

Proceeding out of the throne of God and of the Lamb ( $є к \pi о \rho \varepsilon v o \mu \varepsilon v o v ~ \varepsilon к ~ \tau o v ~ \theta \rho о v o v ~$ tov $\theta$ cou ка тov apviov). Cf. Eze 47:1; Zec 14:8. Already in 3:21 Christ is pictured as sharing the Father's throne as in Heb 1:3. See also 22:3. This phrase has no bearing on the doctrine of the Procession of the Holy Spirit.

Rev 22:2
In the midst of the street thereof ( $\varepsilon v \mu \varepsilon \sigma \omega \tau \eta \varsigma \pi \lambda a \tau \varepsilon ו \alpha \varsigma \alpha \cup \tau \eta \varsigma$ ). Connected probably with the river in verse 1 , though many connect it with verse 2 . Only one street mentioned here as in 21:21.

On this side of the river and on that ( $\tau 0 \cup \pi о \tau \alpha \mu о v \varepsilon v \tau \varepsilon v \theta \varepsilon v$ ка $\varepsilon \kappa \varepsilon เ \theta \varepsilon v$ ). Evт $\varepsilon v \theta \varepsilon v$ occurs as a preposition in Da 12:5 (Theodoret) and may be so here (post-positive), purely adverbial in Joh 19:18.
 is used for a green tree in Lu 23:31; Eze 47:12 .

Bearing ( $\pi$ otovv). Neuter active participle of $\pi$ oı $\varepsilon \omega$ (making, producing, as in Mt 7:17 ). Some MSS. have $\pi o \omega \omega v$ (masculine), though $\xi \nu \lambda o v$ is neuter.

Twelve manner of fruits (картоис $\delta \omega \delta \varepsilon к \alpha$ ). "Twelve fruits."
Yielding ( $\alpha \pi \mathrm{o} \delta \iota \delta o u v$ ). Neuter active participle of $\alpha \pi \mathrm{o} \delta \iota \delta \omega \mu$, to give back, but some MSS. have $\alpha \pi о \delta \iota \delta o u c$ (masculine) like $\pi о \omega \omega v$.

For the healing of the nations ( $\varepsilon \varsigma ~ \theta \varepsilon \rho \alpha \pi \varepsilon \iota \alpha \tau \omega v \varepsilon \theta v \omega v$ ). Spiritual healing, of course, as leaves ( $\varphi \cup \lambda \lambda \alpha$ ) are often used for obtaining medicines. Here again the problem occurs whether this picture is heaven before the judgment or afterwards. Charles distinguishes sharply between the Heavenly City for the millennial reign and the New Jerusalem that descends from heaven after the judgment. Charles rearranges these chapters to suit his theory. But chronology is precarious here.

Rev 22:3

There shall be no curse any more ( $\pi \alpha v \kappa \alpha \tau \alpha \theta \varepsilon \mu \alpha$ оик $\varepsilon \sigma \tau \alpha \varepsilon \tau$ ). No other example of $\kappa \alpha \tau \alpha \theta \varepsilon \mu \alpha$ has been found outside of the Didache XVI. 5, though the verb ката $\theta \varepsilon \mu \alpha \tau \iota \zeta \omega$ occurs in Mt 26:74, meaning to curse, while we have $\operatorname{ava} \theta \varepsilon \mu \alpha \tau \iota \zeta \omega$ in Mr 14:71 in the same sense. It may be a syncopated form of $\kappa \alpha \tau \alpha v \alpha \theta \varepsilon \mu \alpha$. The usual $\alpha v \alpha \theta \varepsilon \mu \alpha$ (curse) occurs in 1Co 16:22; Ga 1:8; Ro 9:3. For $\pi \alpha v$ with ouk=ov $\delta \varepsilon v$ see 21:27.

Shall do him service ( $\lambda \alpha \tau \rho \varepsilon \cup \sigma o v \sigma เ v ~ \alpha v \tau \omega$ ). Future active of $\lambda \alpha \tau \rho \varepsilon v \omega$, linear idea, "shall keep on serving." See 7:15 for present active indicative of this same verb with the dative $\alpha \cup \tau \omega$ as here, picturing the worship of God in heaven. See 27:1 for "the throne of God and of the Lamb."

Rev 22:4
 of God was withheld from Moses (Ex 33:20,23), but promised by Jesus to the pure in heart (Mt 5:8) and mentioned in Heb 12:14 as possible only to the holy, and promised in Ps 17:15 . Even here on earth we can see God in the face of Christ (2Co 4:6), but now in the New Jerusalem we can see Christ face to face (1Co 13:12), even as he is after we are made really like him (2Co 3:18; Ro 8:29; 1Jo 3:2 ). It is anthropomorphic language, to be sure, but it touches the essential reality of religion. "The supreme felicity is reached, immediate presence with God and the Lamb" (Beckwith).

His name on their foreheads ( $\tau 0$ ovo $\mu \alpha$ av $\alpha \sigma v \varepsilon \pi \tau \omega v \mu \varepsilon \tau \omega \pi \omega v \alpha \nu \tau \omega v$ ). As in 3:12; 7:3; 14:1.

## Rev 22:5

Shall be night no more ( $v v \xi$ ouk $\varepsilon \sigma \tau \alpha \varepsilon \tau$ ). As in 21:25.
They need ( $\varepsilon \chi$ оvбıv $\chi \rho \varepsilon \iota a v$ ). Present active indicative, "They have need," though A has $\varepsilon \xi$ ovaıv (shall have), future like $\varepsilon \sigma \tau \alpha$. Here again there is repetition of part of 21:23, but for the purpose of showing the delightsomeness of the New Jerusalem with no need of lamp or sun (change to $\varphi \omega \varsigma$ with $\eta \lambda \iota o v$ instead of $\varphi \omega \tau \circ \varsigma$, "they have no light of sun").

Shall give them light ( $\varphi \omega \tau \tau \sigma \varepsilon$ ). Future active of $\varphi \omega \tau \tau \zeta \omega$, while aorist $\varepsilon \varphi \omega \tau \iota \sigma \varepsilon v$ in 21:23.
They shall reign ( $\beta \alpha \sigma \iota \lambda \varepsilon v \sigma o v \sigma \iota v$ ). Future active of $\beta \alpha \sigma \iota \lambda \varepsilon v \omega$. Reign eternally in contrast with the limited millennial reign of 20:4,6. This glorious eternal reign with Christ occurs repeatedly in the book $(1: 6 ; 3: 21 ; 5: 10)$ as in Lu 22:30 . Christ's Kingdom is spiritual (Joh 18:36f. ). "The visions of the Apocalypse are now ended; they have reached their climax in the New Jerusalem" (Swete). Now John gives the parting utterances of some of the speakers, and it is not always clear who is speaking.

Rev 22:6
He said unto me ( $\varepsilon \pi \pi \varepsilon \nu \mu \mathrm{o}$ ). Apparently the same angel as in 22:1 (21:9,15).
These words (outo o $\lambda$ оүо). The same words used in 21:5 by the angel there. Whatever the application there, here the angel seems to endorse as "faithful and true" ( $\pi \iota \sigma \tau 0 ~ \kappa \alpha ~ \alpha \lambda \eta \theta$ เvo) not merely the preceding vision ( 21:9-22:5), but the revelations of the entire book. The
language added proves this: "Sent his angel to shew unto his servants the things which must
 $\varepsilon v \tau \alpha \chi \varepsilon$ ), a direct reference to 1:1 concerning the purpose of Christ's revelation to John in this book. For "the God of the spirits of the prophets" (o $\theta \varepsilon o \varsigma \tau \omega v \pi \nu \varepsilon \nu \mu \alpha \tau \omega \nu \tau \omega v \pi \rho \circ \varphi \eta \tau \omega v$ ) see 19:10; 1Co 14:32 . Probably the prophets' own spirits enlightened by the Holy Spirit (10:7; 11:8; 22:9).

Rev 22:7
And behold, I come quickly ( $\kappa \alpha$ เ $\delta$ ov $\varepsilon \rho \chi \circ \mu \alpha \tau \alpha \chi v$ ). Christ is the speaker, either through this angel or more probably directly from Christ without introduction as in verses 12,16. About Christ coming quickly see $2: 5,16 ; 3: 11 ; 16: 15$, and already in 1:2f. Once more we must recall that $\tau \alpha \chi \mathrm{u}$ and $\varepsilon v \tau \alpha \chi \varepsilon$ are according to God's time, not ours ( $2 \mathrm{Pe} 3: 8$ ).

Blessed ( $\mu$ ккарос). This beatitude is like in substance the first ( $1: 3$ ) and is in Christ's own words like the one in 16:15. This book is here called a "prophecy" ( $\pi \rho о \varphi \eta \tau \varepsilon ı \alpha)$ as in verses $10,18,19$. It is Christ's revelation from God, a direct message from God. Part of it is prediction of doom on Christ's enemies, but most of it is a comforting picture of final triumph and bliss for the faithful in a time of great distress and persecution.

Rev 22:8
And I John (Kaү $\operatorname{I} \omega \alpha v v \eta \varsigma)$. Here John the Seer is the speaker. He had already given his name (1:1,4,9). Here he claims to be the "one who hears and sees these things" (o $\alpha \kappa 0 v \omega v$ ка $\beta \lambda \varepsilon \pi \omega \nu \tau \alpha \nu \tau \alpha)$.

I fell down to worship ( $\varepsilon \pi \varepsilon \sigma \alpha \pi \rho о \sigma \kappa \nu v \eta \sigma \alpha$ ). Second aorist active indicative of $\pi \iota \pi \tau \omega$ (with - $\alpha$ form) and the first aorist active infinitive of purpose of $\pi \rho \circ \sigma \kappa \nu v \varepsilon \omega$. It was a natural, though a wrong, thing to do, especially after Christ's own voice followed that of the angel
 present active participle of $\delta \varepsilon ו \kappa v v \omega$. Cf. 1:1; 4:1; 17:1; 21:9f.; 22:1,6 .

Rev 22:9
See thou do it not (Hop $\alpha \mu \eta$ ). The angel promptly interposes ( $\lambda \varepsilon \gamma \varepsilon$, dramatic present). See 19:10 for discussion of this same phrase opa $\mu \eta$ when John had once before started to worship the angel in his excitement. Here we have added to the words in 19:10 "the prophets ( $\tau \omega v \pi \rho \circ \varphi \eta \tau \omega v$ ) and also "them which keep the words of this book" ( $\tau \omega v \tau \eta \rho o u v \tau \omega v \tau 0 v \varsigma$入oүous tou $\beta \iota \beta \lambda_{\text {ıov }}$ toutov), the last a repetition from 22:7. In both places we have "Worship God" ( $\tau \omega \theta \varepsilon \omega \pi \rho \circ \sigma \kappa \nu v \eta \sigma o v)$. And not an angel.

Rev 22:10
And he saith unto me ( $\kappa \alpha \lambda \varepsilon \gamma \varepsilon \mu \mathrm{o}$ ). The angel resumes as in 19:9.
Seal not up ( $\mu \eta \sigma \varphi \rho \alpha \gamma \iota \sigma \eta \iota$ ). Prohibition with $\mu \eta$ and the ingressive first aorist active subjunctive of $\sigma \varphi \rho \alpha \gamma \zeta \omega$. Charles takes this to be the command of Christ because in verses 7,18 "the words of the prophecy of this book" come from Christ. But that is not a conclusive argument, though Charles, as already stated, rearranges these chapters to suit his own notion.

Once only ( $10: 4$ ) was John directed to seal and not to write. See there for discussion of $\sigma \varphi \rho \alpha \gamma \iota \omega$. This book is to be left open for all to read ( $1: 3 ; 13: 18 ; 17: 9 ; 22: 7,18$ ).

## At hand ( $\varepsilon \gamma \gamma \cup \varsigma)$. As in 1:3.

Rev 22:11
Let him do unrighteousness still ( $\alpha \delta \kappa \kappa \eta \sigma \alpha \tau \omega \varepsilon \tau$ ). First aorist (constative) active imperative of $\alpha \delta เ \kappa \varepsilon \omega$, viewed here as a whole. The language is probably ironical, with a reminder of Da 12:10, in no sense a commendation of their lost estate. Charles rejects this verse as not like John. It is the hopelessness of the final state of the wicked which is here pictured. So as to "Let him be made filthy still" ( $\rho \cup \pi \alpha v \theta \eta \tau \omega \varepsilon \tau)$. First aorist (constative) passive imperative of $\rho \cup \pi a \imath v \omega$, old verb, to make foul or filthy (from $\rho \cup \pi \sigma$, filth, 1 Pe 3:21, as is $\rho \cup \pi \alpha \rho o \varsigma$, filthy), here only in N.T. The use of $\varepsilon \tau$ is not perfectly clear, whether "still" or "yet more." It is the time when Christ has shut the door to those outside who are now without
 (filthiness) only in Jas 1:21. So then "the righteous" (o סוкaıo؟) is to do righteousness still ( $\delta ı \alpha \iota \sigma \sigma \cup \nu \eta \nu \pi о \_\sigma \alpha \tau \omega \varepsilon \tau$, first constative aorist active imperative of toı $\varepsilon \omega$ ) and "the holy" ( $\mathrm{o} \alpha \gamma \iota \varsigma$ ) to be made holy still ( $\alpha \gamma \iota \omega \sigma \theta \eta \tau \omega \varepsilon \tau$, first constative aorist passive imperative of $\alpha \gamma ı \zeta \zeta)$. The states of both the evil and the good are now fixed forever. There is no word here about a "second chance" hereafter.

Rev 22:12
My reward is with me (o $\mu \tau \theta$ oc $\mu \circ v \mu \varepsilon \tau^{\prime} \varepsilon \mu \circ v$ ). It is Christ speaking again and he repeats his promise of coming quickly as in verse 7 . He speaks now as the Rewarder (o $\mu$ н $\sigma a \pi$ о $\delta o \tau \eta \varsigma$ ) of Heb 11:6. Cf. Re 11:18; Isa 40:10; 62:11 .

To render ( $\alpha \pi о \delta o v v \alpha$ ). Second aorist active infinitive of purpose of $\alpha \pi о \delta \Delta \delta \omega \mu$, to give back. Each will receive the reward according to his own work (Re 2:23; 2Co 5:10; Ro 2:26).

Rev 22:13
I am the Alpha and the Omega ( $\mathrm{E} \gamma \omega$ то $\mathrm{A} \lambda \varphi \alpha$ ка то O ). Applied to God in 1:8; 21:6, and here alone to Christ, crowning proof in this book of Christ's deity. So in 21:6 God is termed, as Christ is here, $\eta \alpha \rho \chi \eta \kappa \alpha$ то $\tau \varepsilon \lambda$ о (the beginning and the end), while o $\pi \rho \omega \tau о \varsigma$ ка о $\varepsilon \sigma \chi$ атоৎ (the first and the last) is applied only to Christ (1:17; 2:8). Solemn assurance is thus given that Christ is qualified to be the Judge of verse 12 (cf. Mt 25:31-46). In Heb 12:2 Jesus is the $\alpha \rho \chi \eta \gamma \circ \varsigma \kappa \alpha \tau \varepsilon \lambda \varepsilon เ \omega \tau \eta \varsigma \tau \eta \varsigma \pi \iota \sigma \tau \varepsilon \omega \varsigma$ (the author and finisher of faith). Christ was the Creator of the universe for the Father. So now he is the Consummation of redemption.

Rev 22:14
Blessed ( $\mu \alpha к \alpha \rho ı)$ ). This is the last beatitude of the book and "deals with the issues of the higher life" (Swete).

They that wash their robes (o $\pi \lambda \nu v o v \tau \varepsilon \varsigma \tau \alpha \varsigma ~ \sigma \tau o \lambda \alpha \varsigma \alpha v \tau \omega v$ ). Present active articular participle of $\pi \lambda \nu v \omega$. See 7:14 for this very verb with $\sigma \tau 0 \lambda \alpha \varsigma$, while in $3: 4$ the negative statement occurs. Cf. 1Co 6:11 .

That they may have the right ( $\llcorner\sim \alpha \varepsilon \sigma \tau \alpha \eta \varepsilon \xi \sigma \sigma \sigma \iota \alpha \sim \tau \tau \nu)$ ). Purpose clause with $ı v \alpha$ and the future middle of $\varepsilon \mu \mu$ (a common construction in this book, 6:4,11; 9:5,20; 13:12; 14:13 ), that there may be their right."

To come to the tree of life ( $\varepsilon \pi \tau$ тo $\xi \cup \lambda o \nu \tau \eta \varsigma \zeta \omega \eta \varsigma)$. "Over the tree of life." On $\varepsilon \xi \sigma 0 \sigma \iota \alpha$ $\varepsilon \pi=$ "power over" see 6:8; 13:7; 16:9; Lu 9:1 . On "the tree of life" see 2:7; 22:2 .

May enter in ( $\varepsilon เ \sigma \varepsilon \lambda \theta \omega \sigma \tau v$ ). Purpose clause with $\operatorname{va} \alpha$ and the second aorist active subjunctive of $\varepsilon ו \sigma \varepsilon \rho \chi \circ \mu \alpha$ parallel with $\operatorname{va} \varepsilon \sigma \tau \alpha$ (future).

By the gates ( $\tau$ oı $\pi \cup \lambda \omega \sigma \tau v$ ). Associative instrumental case of $\pi \cup \lambda \omega v$ ( $21: 12$ ), "by the gate towers."

Rev 22:15
Without ( $\varepsilon \xi \omega)$. Outside the holy city, with which compare 21:8,27. Dustierdieck supplies an imperative: "Out, ye dogs."

The dogs (o кvvec). Not literal dogs, but the morally impure (De 23:18; 2Ki 8:13; Ps 22:17,21; Mt 7:6; Mr 7:27; Php 3:3 ). Dogs in the Oriental cities are the scavengers and excite unspeakable contempt.

The sorcerers (о фариако). As in 21:8, where are listed "the fornicators and the murderers and the idolaters," all "outside" the holy city here as there "in the lake that burns with fire and brimstone, the second death." Both are pictures (symbolic language) of hell, the eternal absence from fellowship with God. Another time Jesus spoke of "the outer darkness" (عцऽ то бкотоऽ то $\varepsilon \xi \omega \tau \varepsilon \rho \circ \vee$, Mt 8:12; 22:13; 25:30 ), outside of lighted house, as the abode of the damned. Another symbol is the worm that dies not (Mr 9:48).

Every one that loveth and maketh a lie ( $\pi \alpha \varsigma \varphi \iota \lambda \omega \vee \kappa \alpha \pi о t \omega v \psi \varepsilon v \delta \circ \varsigma)$. An interpretation of $\pi \alpha \sigma \omega \nu$ toıs $\psi \varepsilon \cup \delta \varepsilon \sigma \omega v$ (all liars) of 21:8 and of $\pi о \omega \nu \psi \varepsilon \cup \delta o c$ (doing a lie) of 21:27. Satan is the father of lying (Joh 8:44) and Satan's home is a congenial place for those who love and practise lying (2Th 2:12 ). See 1Jo 1:6 for not doing the truth and see also Ro 1:25; Eph 4:25

Rev 22:16
I Jesus (E $\gamma \omega$ I $\eta$ oouc). The last and most solemn attestation to the book that from Jesus (the historic Jesus known to the churches), in harmony with 1:1f .

Have sent $(\varepsilon \pi \varepsilon \mu \psi \alpha)$. First aorist active indicative of $\pi \varepsilon \mu \pi \omega$, used here in the same sense as $\alpha \pi$ обтвı $\lambda$ 人 in 1:1 as his personal messenger. It is the Jesus of history here speaking, who is also the Christ of theology and the Lamb of God.

For the churches ( $\varepsilon \pi \tau$ таıऽ $\varepsilon \kappa \kappa \lambda \eta \sigma \varpi \alpha \iota)$ ). For this use of $\varepsilon \pi$ see 10:11; Joh 12:16. It is not just for the seven churches ( 1:4), but for all the churches in the world then and now.

I am the root and the offspring of David ( $\mathrm{E} \gamma \omega \varepsilon є \mu \eta \rho \iota \alpha \alpha \kappa \alpha$ то $\gamma \varepsilon \nu о \varsigma \Delta \alpha v \varepsilon เ \delta)$. See 5:5 for "the root of David," to which John now adds to $\gamma \varepsilon v o \varsigma$ in the sense of "offspring" (Ac 17:28f. ), not of family or race (Ac 4:6; 7:13 ). Cf. Mt 22:42-45.

The bright, the morning star ( $о \alpha \sigma \tau \eta \rho$ о $\lambda \alpha \mu \pi \rho \circ \varsigma$ о $\pi \rho \omega \iota \nu \circ \varsigma$ ). The Davidic King is called a star in Nu 24:17; Lu 1:78. This "day-star" ( $\varphi \omega \sigma \rho \rho \circ \varsigma)$ is interpreted as Christ (2Pe 1:19). In Re 2:28 the phrase "the morning star" occurs in Christ's words, which is here interpreted. Christ is the Light that was coming into the world (Joh 1:9; 8:12).

Rev 22:17
The Spirit and the bride ( $\tau о \pi \nu \varepsilon v \mu \alpha \kappa \alpha \eta \nu v \mu \varphi \eta$ ). The Holy Spirit, speaking through the prophets or the Spirit of prophecy $(2: 7 ; 16: 4 ; 18: 24)$, joins with the bride (21:2), the people of God, in a response to the voice of Jesus just heard. After the picture of heaven in 22:1-5 there is intense longing (19:7) of God's people for the consummation of the marriage of the Lamb and the Bride. So now "the prophets and the saints" (Swete) make a common plea to the Lord Jesus to "come" (E $\rho \chi \circ v$, present middle imperative of $\varepsilon \rho \chi \circ \mu \alpha$, Come on) as he has just said twice that he would do $(22: 1,12)$. The call for Christ is to be repeated by every hearer ( $\mathrm{o} \alpha \kappa о v \omega v$ ) as in 1:3.

Let him come $(\varepsilon \rho \chi \varepsilon \sigma \theta \omega)$. Change of person and this verb applied not to Christ as just before, but to the one who wishes to greet Christ. The thirsty man is bidden to come himself before it is too late. See 5:6 for $\delta \iota \psi \alpha \omega$, used for spiritual thirst, and in particular Joh 6:35; 7:37 for one thirsting for the water of life (21:6; 22:1). Cf. Isa 55:1 .

He that will (o $\theta \varepsilon \lambda \omega v$ ). Even if not yet eagerly thirsting. This one is welcome also. For this use of $\theta \varepsilon \lambda \omega$ see Php 2:13.

Let him take $(\lambda \alpha \beta \varepsilon \tau \omega)$. Second ingressive aorist active imperative of $\lambda \alpha \mu \beta \alpha \nu \omega$. In accordance with the free promise in 21:6, "freely" ( $\delta \omega \rho \varepsilon \alpha v$ ) here as there. This gracious and wide invitation is cheering after the gloomy picture of the doomed and the damned. The warnings against the dragon and the two beasts with all their dreadful consequences are meant to deter men from falling victims to all the devil's devices then and now. The door of mercy still stands wide open today, for the end has not yet come. The series of panoramas is over, with the consummation pictured as a reality. Now we drop back to the standpoint before we saw the visions through John's eyes. In verse 17 we hear the voice of the Spirit of God inviting all who hear and see to heed and to come and drink of the water of life freely offered by the Lamb of God.

## Rev 22:18

I testify ( $\mathrm{E} \gamma \omega \mu \alpha \rho \tau \nu \rho \omega$ ). Commentators disagree keenly about the words in verses 18,19. Charles rejects them as an interpolation and out of harmony with the rest of the book. Beckwith takes them to be John's own warning, drawn from De $4: 2$ "to every man that heareth" ( $\pi \alpha \nu \tau \tau \omega$ aкovov , dative of the articular present active participle of $\alpha \kappa \sigma \omega \omega$,
which compare 1:3). Swete properly holds these verses to be from Jesus himself, still bearing solemn witness to this book, with warning against wilful perversion of its teachings.

If any man shall add ( $\varepsilon \alpha v \tau \iota c \varepsilon \pi \forall \eta \eta$ ). Condition of the third class with $\varepsilon a v$ and the second aorist active subjunctive of $\varepsilon \pi \iota \tau \iota \eta \eta \mu$, with $\varepsilon \pi$ added with $\alpha v \tau \alpha$, as also in the conclusion $\varepsilon \pi \iota \theta \eta \sigma \varepsilon \varepsilon \pi^{\prime}$ avtov (future active). This warning is directed against perversions of this book, not about the New Testament or the Bible as a whole, though it may be true there also. Surely no warning was more needed when we consider the treatment accorded the Apocalypse, so that Dr. Robert South said that the Apocalypse either found one crazy or left him so.

Rev 22:19
If any man shall take away ( $\varepsilon \alpha v \tau \iota \zeta \alpha \varphi \varepsilon \lambda \eta$ ). Also condition of the third class with $\varepsilon \alpha v$ and second aorist active subjunctive of $\alpha \varphi \alpha \iota \rho \varepsilon \omega$, with $\alpha \pi \frac{\text { repeated both in the condition }}{}$ and in the conclusion ( $\alpha \varphi \varepsilon \lambda \varepsilon \alpha \pi 0$, future active indicative of $\alpha \varphi \alpha \rho \varepsilon \omega$ for the more usual $\alpha \varphi \propto \iota \rho \eta \sigma \varepsilon)$.

Which are written in this book ( $\tau \omega v \gamma \varepsilon \gamma \rho \alpha \mu \mu \varepsilon \nu \omega \nu \varepsilon v \tau \omega \beta\langle\beta \lambda \iota \omega$ $\tau 0 \nu \tau \omega$ ). Ablative neuter plural articular perfect passive participle in apposition with $\varepsilon \kappa$ тov $\xi \cup \lambda$ ou $\tau \eta \varsigma \zeta \omega \eta \varsigma$
 worthy of his inheritance.

Rev 22:20
He which testifieth (o $\mu \alpha \rho \tau v \rho \omega v$ ). That is Jesus ( $1: 2$ ) who has just spoken ( $22: 18$ ).
Yea: I come quickly (Naı, $\varepsilon \rho \chi \circ \mu \alpha \tau \alpha \chi \cup$ ). Affirmation again of the promise in 22:7,12 . On Na (Yes) see 1:7 for the Lord's assent to the call. Then John expresses his absolute belief in the Lord's promise: "Amen: come, Lord Jesus" (A $\mu \eta \nu, \varepsilon \rho \chi \circ v$, Kv $1 \varepsilon$ I $\eta \sigma o v)$. On A $\mu \eta \nu$ see 1:7. On epXou see 22:17. Note Kupıє with Inбov. As in 1Co 12:3; Php 2:11. For Paul's confidence in the deity of Christ and the certainty of his second coming see Tit 2:13; 2Ti 4:8 . Mapava $\theta$ a (1Co 16:22).

Rev 22:21
The grace of the Lord Jesus be with the saints ( $\eta \chi \alpha \rho ı \varsigma ~ \tau o v ~ K u \rho ı o v ~ I \eta \sigma o v ~ \mu \varepsilon \tau \alpha ~ \tau \omega v ~$ $\alpha \gamma \omega \omega v$ ). John's own benediction, an unusual ending for an apocalypse, but suitable for one meant to be read in the churches (1:3f. ). Grace is Paul's unvarying word in conclusion of his letters, as is true of Heb 13:25. "The saints" or the consecrated (o a $\gamma \ldots \mathrm{o}$ ) is John's constant word for believers in Christ (8:3f.; 11:18; 13:7,10; 14:12; 16:6; 17:6; 18:20,24; 19:8; $20: 9$ ). It is a good word for the close of this marvellous picture of God's gracious provision for his people in earth and heaven.
