## PREFACE

To
Dr. Adolf Deissmann
of Berlin
who has done so much
to make the words of the
New Testament glow with life

It has now been forty years since Dr. Marvin R. Vincent wrote his most useful series of volumes entitled Word Studies in the New Testament. They are still helpful for those for whom they were designed, but a great deal of water has run under the mill in these years. More scientific methods of philology are now in use. No longer are Greek tenses and prepositions explained in terms of conjectural English translations or interchanged according to the whim of the interpreter. Comparative grammar has thrown a flood of light on the real meaning of New Testament forms and idioms. New Testament writers are no longer explained as using one construction "for" another. New light has come also from the papyri discoveries in Egypt. Unusual Greek words from the standpoint of the literary critic or classical scholar are here found in everyday use in letters and business and public documents. The New Testament Greek is now known to be not a new or peculiar dialect of the Greek language, but the very lingo of the time. The vernacular Koin $\hat{A} \boxtimes$, the spoken language of the day, appears in the New Testament as in these scraps of Oxyrhynchus and Fayum papyri. There are specimens of the literary KoinÂ邓 in the papyri as also in the writings of Luke, the Epistles of Paul, the Epistle to the Hebrews. A new Greek-English lexicon of the New Testament will come in due time which will take note of the many startling discoveries from the Greek papyri and inscriptions first brought to notice in their bearing on the New Testament by Dr. Adolf Deissmann, then of Heidelberg, now of Berlin. His Bible Studies (Translation by Alexander Grieve, 1901) and his Light from the Ancient East (Revised Edition translated by L.R.M. Strachan, 1927) are accessible to students unfamiliar with the German originals.

There is no doubt of the need of a new series of volumes today in the light of the new knowledge. Many ministers have urged me to undertake such a task and finally I have agreed to do it at the solicitation of my publishers. The readers of these volumes (six are planned) are expected to be primarily those who know no Greek or comparatively little and yet who are anxious to get fresh help from the study of words and phrases in the New Testament, men who do not have access to the technical books required, like Moulton and Milligan's Vocabulary of the New Testament. The critical student will appreciate the more delicate distinctions in words. But it is a sad fact that many ministers, laymen, and women, who took courses in Greek at college, university, or seminary, have allowed the cares of the world
and the deceitfulness of riches to choke off the Greek that they once knew. Some, strangely enough, have done it even in the supposed interest of the very gospel whose vivid messages they have thus allowed to grow dim and faint. If some of these vast numbers can have their interest in the Greek New Testament revived, these volumes will be worth while. Some may be incited, as many have been by my volume, The Minister and His Greek New Testament, to begin the study of the Greek New Testament under the guidance of a book like Davis's Beginner's Grammar of the Greek New Testament. Others who are without a turn for Greek or without any opportunity to start the study will be able to follow the drift of the remarks and be able to use it all to profit in sermons, in Sunday school lessons, or for private edification.

The words of the Canterbury Version will be used, sometimes with my own rendering added, and the transliterated Greek put in parenthesis. Thus one who knows no Greek can read straight ahead and get the point simply by skipping the Greek words which are of great value to those who do know some Greek. The text of Westcott and Hort will be used though not slavishly. Those who know Greek are expected to keep the Greek text open as they read or study these volumes. The publishers insisted on the transliteration to cut down the cost of printing.

The six volumes will follow this order; Volume I, The Gospel according to Matthew and Mark; Vol. II, The Gospel according to Luke; Vol. III, The Acts of the Apostles; Vol. IV, The Pauline Epistles; Vol. V, The Gospel according to John and the Epistle to the Hebrews; Vol. VI, the general Epistles and the Revelation of John. For purely exegetical and expository development a more chronological order would be required. These volumes do not claim to be formal commentary. Nowhere is the whole text discussed, but everywhere those words are selected for discussion which seem to be richest for the needs of the reader in the light of present-day knowledge. A great deal of the personal equation is thus inevitable. My own remarks will be now lexical, now grammatical, now archaeological, now exegetical, now illustrative, anything that the mood of the moment may move me to write that may throw light here and there on the New Testament words and idioms. Another writer might feel disposed to enlarge upon items not touched upon here. But that is to be expected even in the more formal commentaries, useful as they are. To some extent it is true of lexicons. No one man knows everything, even in his chosen specialty, or has the wisdom to pick out what every reader wishes explained. But even diamonds in the rough are diamonds. It is for the reader to polish them as he will. He can turn the light this way and that. There is a certain amount of repetition at some points, part of it on purpose to save time and to emphasize the point.

I have called these volumes Word Pictures for the obvious reason that language was originally purely pictographic. Children love to read by pictures either where it is all picture or where pictures are interspersed with simple words. The Rosetta Stone is a famous illus-
tration. The Egyptian hieroglyphics come at the top of the stone, followed by the Demotic Egyptian language with the Greek translation at the bottom. By means of this stone the secret of the hieroglyphs or pictographs was unravelled. Chinese characters are also pictographic. The pictures were first for ideas, then for words, then for syllables, then for letters. Today in Alaska there are Indians who still use pictures alone for communicating their ideas. "Most words have been originally metaphors, and metaphors are continually falling into the rank of words" (Professor Campbell). Rather is it not true that words are metaphors, sometimes with the pictured flower still blooming, sometimes with the blossom blurred? Words have never gotten wholly away from the picture stage. These old Greek words in the New Testament are rich with meaning. They speak to us out of the past and with lively images to those who have eyes to see. It is impossible to translate all of one language into another. Much can be carried over, but not all. Delicate shades of meaning defy the translator. But some of the very words of Jesus we have still as he said: "The words that I have spoken unto you are spirit and are life" (Joh 6:63 ). We must never forget that in dealing with the words of Jesus we are dealing with things that have life and breath. That is true of all the New Testament, the most wonderful of all books of all time. One can feel the very throb of the heart of Almighty God in the New Testament if the eyes of his own heart have been enlightened by the Holy Spirit. May the Spirit of God take of the things of Christ and make them ours as we muse over the words of life that speak to us out of the New Covenant that we call the New Testament.
A.T. ROBERTSON.

LOUISVILLE, KY.

## THE GOSPEL ACCORDING TO MATTHEW BY WAY OF INTRODUCTION

The passing years do not make it any plainer who actually wrote our Greek Matthew. Papias records, as quoted by Eusebius, that Matthew wrote the Logia of Jesus in Hebrew (Aramaic). Is our present Matthew a translation of the Aramaic Logia along with Mark and other sources as most modern scholars think? If so, was the writer the Apostle Matthew or some other disciple? There is at present no way to reach a clear decision in the light of the known facts. There is no real reason why the Apostle Matthew could not have written both the Aramaic Logia and our Greek Matthew, unless one is unwilling to believe that he would make use of Mark's work on a par with his own. But Mark's book rests primarily on the preaching of Simon Peter. Scholfield has recently (1927) published An Old Hebrew Text of St. Matthew's Gospel. We know quite too little of the origin of the Synoptic Gospels to say dogmatically that the Apostle Matthew was not in any real sense the author.

If the book is genuine, as I believe, the date becomes a matter of interest. Here again there is nothing absolutely decisive save that it is later than the Gospel according to Mark which it apparently uses. If Mark is given an early date, between A.D. 50 to 60 , then Matthew's book may be between 60 and 70 , though many would place it between 70 and 80 . It is not certain whether Luke wrote after Matthew or not, though that is quite possible. There is no definite use of Matthew by Luke that has been shown. One guess is as good as another and each decides by his own predilections. My own guess is that A.D. 60 is as good as any.

In the Gospel itself we find Matthew the publican (Mt 9:9; 10:3) though Mark (Mr 2:14 ) and Luke (Lu 5:27) call him Levi the publican. Evidently therefore he had two names like John Mark. It is significant that Jesus called this man from so disreputable a business to follow him. He was apparently not a disciple of John the Baptist. He was specially chosen by Jesus to be one of the Twelve Apostles, a business man called into the ministry as was true of the fishermen James and John, Andrew and Simon. In the lists of the Apostles he comes either seventh or eighth. There is nothing definite told about him in the Gospels apart from the circle of the Twelve after the feast which he gave to his fellow publicans in honor of Jesus.

Matthew was in the habit of keeping accounts and it is quite possible that he took notes of the sayings of Jesus as he heard them. At any rate he gives much attention to the teachings of Jesus as, for instance, the Sermon on the Mount in chapters Mt 5-7, the parables in Mt 13, the denunciation of the Pharisees in Mt 23, the great eschatological discourse in Mt 24; Mt 25 . As a publican in Galilee he was not a narrow Jew and so we do not expect a book prejudiced in favor of the Jews and against the Gentiles. He does seem to show that Jesus is the Messiah of Jewish expectation and hope and so makes frequent quotations from the Old

Testament by way of confirmation and illustration. There is no narrow nationalism in Matthew. Jesus is both the Messiah of the Jews and the Saviour of the world.

There are ten parables in Matthew not in the other Gospels: The Tares, the Hid Treasure, the Net, the Pearl of Great Price, the Unmerciful Servant, the Labourers in the Vineyard, the Two Sons, the Marriage of the King's Son, the Ten Virgins, the Talents. The only miracles in Matthew alone are the Two Blind Men, the Coin in the Mouth of the Fish. But Matthew gives the narrative of the Birth of Jesus from the standpoint of Joseph while Luke tells that wonderful story from the standpoint of Mary. There are details of the Death and Resurrection given by Matthew alone.

The book follows the same general chronological plan as that in Mark, but with various groups like the miracles in Mt 8; Mt 9 , the parables in Mt 13 .

The style is free from Hebraisms and has few individual peculiarities. The author is fond of the phrase the kingdom of heaven and pictures Jesus as the Son of man, but also as the Son of God. He sometimes abbreviates Mark's statements and sometimes expands them to be more precise.

Plummer shows the broad general plan of both Mark and Matthew to be the same as follows:

Introduction to the Gospel: Mr 1:1-13; Mt 3:1-4:11 .
Ministry in Galilee: Mr 1:14-6:13; Mt 4:12-13:58 .
Ministry in the Neighborhood: Mr 6:14-9:50; Mt 14:1-18:35 .
Journey through Perea to Jerusalem: Mr 10:1-52; Mt 19:1-20:34 .
Last week in Jerusalem: Mr 11:1-16:8; Mt 21:1-28:8 .
The Gospel of Matthew comes first in the New Testament, though it is not so in all the Greek manuscripts. Because of its position it is the book most widely read in the New Testament and has exerted the greatest influence on the world. The book deserves this influence though it is later in date than Mark, not so beautiful as Luke, nor so profound as John. Yet it is a wonderful book and gives a just and adequate portraiture of the life and teachings of Jesus Christ as Lord and Saviour. The author probably wrote primarily to persuade Jews that Jesus is the fulfilment of their Messianic hopes as pictured in the Old Testament. It is thus a proper introduction to the New Testament story in comparison with the Old Testament prophecy.

THE TITLE
The Textus Receptus has "The Holy Gospel according to Matthew" ( $\tau \mathbf{~ к а \tau \alpha ~ M a \tau \theta a ı o v ~}$ aүıov Eva $\gamma \gamma \varepsilon \lambda_{\iota}$ ov), though the Elzevirs omit "holy," not agreeing here with Stephanus, Griesbach, and Scholz. Only minuscules (cursive Greek manuscripts) and all late have the adjective. Other minuscules and nine uncials including W (the Washington Codex of the fifth century), C of the fifth century (the palimpsest manuscript) and Delta of the ninth together with most Latin manuscripts have simply "Gospel according to Matthew" (Eva $\gamma \gamma \varepsilon \lambda ı$ ıv

ката Mat $\theta a \iota o v)$. But Aleph and B the two oldest and best Greek uncials of the fourth century have only "According to Matthew" (Kata Ma日Өaıov) (note double th) and the Greek uncial D of the fifth or sixth century follows Aleph and B as do some of the earliest Old Latin manuscripts and the Curetonian Syriac. It is clear, therefore, that the earliest form of the title was simply "According to Matthew." It may be doubted if Matthew (or the author, if not Matthew) had any title at all. The use of "according to" makes it plain that the meaning is not "the Gospel of Matthew," but the Gospel as given by Matthew, $\sigma \varepsilon \chi \cup v \delta \nu \mu$ Mac $\theta a \varepsilon v \mu$, to distinguish the report by Matthew from that by Mark, by Luke, by John. Least of all is there any authority in the manuscripts for saying "Saint Matthew," a Roman Catholic practice observed by some Protestants.

The word Gospel (Evap $\gamma \boldsymbol{\varepsilon}^{\lambda} \iota o v$ ) comes to mean good news in Greek, though originally a reward for good tidings as in Homer's Odyssey XIV. 152 and in 2Ki 4:10. In the New Testament it is the good news of salvation through Christ. The English word Gospel probably comes from the Anglo-Saxon Godspell, story or narrative of God, the life of Christ. It was early confused with the Anglo-Saxon godspell, good story, which seems like a translation of the Greek $\varepsilon v a \gamma \gamma \varepsilon \lambda_{\imath}$ ov. But primarily the English word means the God story as seen in Christ which is the best news that the world has ever had. One thinks at once of the use of "word" ( $\Lambda$ oүos) in Joh 1:1,Joh 1:14. So then it is, according to the Greek, not the Good News of Matthew, but the Good News of God, brought to us in Christ the Word, the Son of God, the Image of the Father, the Message of the Father. We are to study this story first as presented by Matthew. The message is God's and it is as fresh to us today in Matthew's record as when he first wrote it.

## Matthew 1

Matt 1：1
The Book（ $\beta, \beta \lambda_{o c}$ ）．There is no article in the Greek，but the following genitives make it definite．It is our word Bible that is here used，the Book as Sir Walter Scott called it as he lay dying．The usual word for book is a diminutive form（ $\beta \iota \beta \lambda \iota ⿱ ⺌ 兀$ ），a little book or roll such as we have in Lu 4：17，＂The roll of the prophet Isaiah．＂The pieces of papyrus（ $\pi \alpha \pi \nu \rho o \varsigma)$, our paper，were pasted together to make a roll of varying lengths according to one＇s needs． Matthew，of course，is not applying the word book to the Old Testament，probably not to his own book，but to＂the genealogical table of Jesus Christ＂（ $\beta \iota \beta \lambda$ оऽ $\gamma \varepsilon v \varepsilon \sigma \varepsilon \omega \varsigma$ I $\eta \sigma o v$ Xpıбтov）， ＂the birth roll of Jesus Christ＂Moffatt translates it．We have no means of knowing where the writer obtained the data for this genealogy．It differs radically from that in Lu 3：23－38． One can only give his own theory of the difference．Apparently in Matthew we have the ac－ tual genealogy of Joseph which would be the legal pedigree of Jesus according to Jewish custom．In Luke we apparently have the actual genealogy of Mary which would be the real line of Jesus which Luke naturally gives as he is writing for the Gentiles．

Jesus Christ ．Both words are used．The first is the name（I $\eta$ oovৎ）given by the angel to Mary（Mt 1：21）which describes the mission of the child．The second was originally a verbal adjective（ $\chi \rho \iota \sigma \tau о \varsigma)$ meaning anointed from the verb to anoint（ $\chi \rho \stackrel{\omega}{ }$ ）．It was used often in the Septuagint as an adjective like＂the anointed priest＂（1Ki 2：10）and then as a substantive to translate the Hebrew word＂Messiah＂（Meббıa¢）．So Andrew said to Simon：＂We have found the Messiah，which is，being interpreted，Christ＂（Joh 1：41）．In the Gospels it is sometimes＂the Anointed One，＂＂the Messiah，＂but finally just a proper name as here，Jesus Christ．Paul in his later Epistles usually has it＂Christ Jesus．＂

The Son of David，the son of Abraham（viov $\Delta \alpha v \varepsilon เ \delta$ viov A $\beta \rho \alpha \alpha \mu$ ）．Matthew proposes to show that Jesus Christ is on the human side the son of David，as the Messiah was to be， and the son of Abraham，not merely a real Jew and the heir of the promises，but the promise made to Abraham．So Matthew begins his line with Abraham while Luke traces his line back to Adam．The Hebrew and Aramaic often used the word son $(\beta \eta \nu)$ for the quality or char－ acter，but here the idea is descent．Christians are called sons of God because Christ has be－ stowed this dignity upon us（Ro $8: 14 ; 9: 26 ; \mathrm{Ga} 3: 26 ; 4: 5-7$ ）．Verse 1 is the description of the list in verses 2－17．The names are given in three groups，Abraham to David（ 2－6），David to Babylon Removal（ 6－11），Jechoniah to Jesus（ 12－16）．The removal to Babylon（ $\mu$ гтонкєбเаऽ $B \alpha \beta \nu \lambda \omega v o \varsigma)$ occurs at the end of verse 11 ，the beginning of verse 12 ，and twice in the resume in verse 17．This great event is used to mark off the two last divisions from each other．It is a good illustration of the genitive as the case of genus or kind．The Babylon removal could mean either to Babylon or from Babylon or，indeed，the removal of Babylon．But the readers would know the facts from the Old Testament，the removal of the Jews to Babylon．Then
verse 17 makes a summary of the three lists, fourteen in each by counting David twice and omitting several, a sort of mnemonic device that is common enough. Matthew does not mean to say that there were only fourteen in actual genealogy. The names of the women (Thamar, Rahab, Ruth, Bathsheba the wife of Uriah) are likewise not counted. But it is a most interesting list.

Matt 1:2
Begat ( $\varepsilon \gamma \varepsilon v v \eta \sigma \varepsilon v)$. This word comes, like some of the early chapters of Genesis, with regularity through verse 16 , until the birth of Jesus is reached when there is a sudden change. The word itself does not always mean immediate parentage, but merely direct descent. In verse 16 we have "Joseph the husband of Mary, from whom was begotten Jesus who is called
 article occurs here each time with the object of "begat," but not with the subject of the verb to distinguish sharply the proper names. In the case of David the King ( 1:6) and Joseph the husband of Mary ( $1: 16$ ) the article is repeated. The mention of the brethren of Judah ( $1: 2$ ) and of both Phares and Zara (1:3) may show that Matthew was not copying a family pedigree but making his own table. All the Greek manuscripts give verse 16 as above save the Ferrar Group of minuscules which are supported by the Sinaitic Syriac Version. Because of this fact Von Soden, whose text Moffatt translates, deliberately prints his text "Jacob begat Jesus" (I $\omega \sigma \eta \varphi \delta \varepsilon \varepsilon \not \varepsilon \varepsilon v \nu \eta \sigma \varepsilon v$ I $\eta \sigma o u v$ ). But the Sinaitic Syriac gives the Virgin Birth of Jesus in Mt $1: 18-25$. Hence it is clear that "begat" here in $1: 16$ must merely mean line of descent or the text has been tampered with in order to get rid of the Virgin Birth idea, but it was left untouched in 1:18-25. I have a full discussion of the problem in chapter XIV of Studies in the Text of the New Testament. The evidence as it now stands does not justify changing the text of the Greek uncials to suit the Sinaitic Syriac. The Virgin Birth of Jesus remains in 1:16. The spelling of these Hebrew names in English is usually according to the Hebrew form, not the Greek. In the Greek itself the Hebrew spelling is often observed in violation of the Greek rules for the ending of words with no consonants save $n, r, s$. But the list is not spelled consistently in the Greek, now like the Hebrew as in Abraham, Isaac, Jacob, now like the Greek as in Judah, Solomon, Hezekiah, though the Hebrew style prevails.

Matt 1:18
The birth of Jesus Christ ( $\tau$ [ov [I $\eta \sigma o v]$ X $\rho \iota \sigma \tau o v ~ \eta \gamma \varepsilon v \varepsilon \sigma \iota$ ). In the Greek Jesus Christ comes before birth as the important matter after 1:16. It is not certain whether "Jesus" is here a part of the text as it is absent in the old Syriac and the Old Latin while the Washington Codex has only "Christ." The Vatican Codex has "Christ Jesus." But it is plain that the story of the birth of Jesus Christ is to be told briefly as follows, "on this wise" (out $\omega \varsigma$ ), the usual Greek idiom. The oldest and best manuscripts have the same word genealogy ( $\gamma \varepsilon v \varepsilon \sigma เ \varsigma)$ used in 1:1, not the word for birth (begotten) as in 1:16 ( $\gamma \varepsilon \nu v \eta \sigma \iota)$ ). "It is in fact the word Genesis. The evangelist is about to describe, not the genesis of the heaven and the earth, but the
genesis of Him who made the heaven and the earth, and who will yet make a new heaven and a new earth" (Morison).

Betrothed to Joseph (Mv$\overline{\mathrm{L}} \tau \varepsilon \cup \theta \varepsilon \iota \sigma \eta \varsigma \tau \omega \mathrm{I} \omega \sigma \eta \varphi$ ). Matthew proceeds to explain his statement in 1:16 which implied that Joseph, though the legal father of Jesus in the royal line, was not the actual father of Mary's Son. Betrothal with the Jews was a serious matter, not lightly entered into and not lightly broken. The man who betrothed a maiden was legally husband (Ge 29:21; De 22:23f. ) and "an informal cancelling of betrothal was impossible" (McNeile). Though they did not live together as husband and wife till actual marriage, breach of faithfulness on the part of the betrothed was treated as adultery and punished with death. The New Testament in Braid Scots actually has "mairry't till Joseph" for "betrothed to Joseph." Matthew uses the genitive absolute construction here, a very common Greek idiom.

Of the Holy Ghost ( $\varepsilon \kappa \pi v \varepsilon \cup \mu \alpha \tau о \varsigma ~ \alpha \gamma เ \sim)$ ). The discovery that Mary was pregnant was inevitable and it is plain that she had not told Joseph. She "was found with child" (evpe日q $\varepsilon v \gamma \alpha \sigma \tau \rho \varepsilon \chi 0 \cup \sigma \alpha)$. This way of putting it, the usual Greek idiom, plainly shows that it was the discovery that shocked Joseph. He did not as yet know what Matthew plainly asserts that the Holy Ghost, not Joseph and not any man, was responsible for the pregnancy of Mary. The problem of the Virgin Birth of Jesus has been a disturbing fact to some through all the ages and is today to those who do not believe in the pre-existence of Christ, the Son of God, before his Incarnation on earth. This is the primal fact about the Birth of Christ. The Incarnation of Christ is clearly stated by Paul (2Co 8:9; Php 2:5-11 ; and involved in Col 1:15-19) and by John (Joh 1:14; 17:5). If one frankly admits the actual pre-existence of Christ and the real Incarnation, he has taken the longest and most difficult step in the matter of the supernatural Birth of Christ. That being true, no merely human birth without the supernatural element can possibly explain the facts. Incarnation is far more than the Indwelling of God by the Holy Spirit in the human heart. To admit real incarnation and also full human birth, both father and mother, creates a greater difficulty than to admit the Virgin Birth of Jesus begotten by the Holy Spirit, as Matthew here says, and born of the Virgin Mary. It is true that only Matthew and Luke tell the story of the supernatural birth of Jesus, though Joh 1:14 seems to refer to it. Mark has nothing whatever concerning the birth and childhood of Jesus and so cannot be used as a witness on the subject. Both Matthew and Luke present the birth of Jesus as not according to ordinary human birth. Jesus had no human father. There is such a thing in nature as parthenogenesis in the lower orders of life. But that scientific fact has no bearing here. We see here God sending his Son into the world to be the world's Saviour and he gave him a human mother, but not a human father so that Jesus Christ is both Son of God and Son of Man, the God Man. Matthew tells the story of the birth of Jesus from the standpoint of Joseph as Luke gives it from the standpoint of Mary. The two narratives harmonize with each other. One credits these most wonderful of all birth narratives according as he believes in the love and power of Almighty God to do what he
wills. There is no miracle with God who has all power and all knowledge. The laws of nature are simply the expression of God's will, but he has not revealed all his will in the laws that we discover. God is Spirit. He is Person. He holds in his own power all life. Joh 3:16 is called the Little Gospel because it puts briefly the love of God for men in sending his own Son to live and die for us.

Matt 1:19
A Righteous Man ( $\delta ı \kappa \alpha \iota \zeta$ ). Or just, not benignant or merciful. The same adjective is used of Zacharias and Elizabeth (Lu 1:6 ) and Simeon (Lu 2:25). "An upright man," the Braid Scots has it. He had the Jewish conscientiousness for the observance of the law which would have been death by stoning (De 22:23 ). Though Joseph was upright, he would not do that. "As a good Jew he would have shown his zeal if he had branded her with public disgrace" (McNeile).

And yet not willing ( $\kappa \alpha \mu \eta \theta \varepsilon \lambda \omega v$ ). So we must understand $\kappa \alpha$ here, "and yet." Matthew makes a distinction here between "willing" ( $\theta \varepsilon \lambda \omega v$ ) and "wishing" ( $\varepsilon \beta \circ \cup \lambda \eta \theta \eta)$, that between purpose $(\theta \varepsilon \lambda \omega)$ and desire ( $\beta$ ov $\lambda о \mu \alpha$ ) a distinction not always drawn, though present here. It was not his purpose to "make her a public example" ( $\delta \varepsilon \iota \gamma \mu \alpha \tau \iota \sigma \alpha)$, from the root ( $\delta \varepsilon ı \kappa \nu \cup \mu$ to show), a rare word ( $\mathrm{Col} 2: 15$ ). The Latin Vulgate has it traducere, the Old Latin divulgare, Wycliff pupplische (publish), Tyndale defame, Moffatt disgrace, Braid Scots "Be i the mooth o' the public." The substantive ( $\delta \varepsilon \tau \gamma \mu \alpha \tau \iota \sigma \mu \circ \varsigma)$ occurs on the Rosetta Stone in the sense of "verification." There are a few instances of the verb in the papyri though the meaning is not clear (Moulton and Milligan's Vocabulary). The compound form appears ( $\pi \alpha \rho \alpha \delta \varepsilon ı \gamma \mu \alpha \tau \iota \zeta \omega)$ in Heb 6:6 and there are earlier instances of this compound than of the uncompounded, curiously enough. But new examples of the simple verb, like the substantive, may yet be found. The papyri examples mean to furnish a sample (P Tebt. 5.75), to make trial of (P Ryl. I. 28.32). The substantive means exposure in (P Ryl. I. 28.70). At any rate it is clear that Joseph "was minded to put her away privily." He could give her a bill of divorcement ( $\alpha \pi 0 \lambda v \sigma \alpha$ ), the $\gamma \eta \tau$ laid down in the Mishna, without a public trial. He had to give her the writ ( $\gamma \eta \tau$ ) and pay the fine (De 24:1). So he proposed to do this privately ( $\lambda \alpha \theta \rho \alpha$ ) to avoid all the scandal possible. One is obliged to respect and sympathize with the motives of Joseph for he evidently loved Mary and was appalled to find her untrue to him as he supposed. It is impossible to think of Joseph as the actual father of Jesus according to the narrative of Matthew without saying that Matthew has tried by legend to cover up the illegitimate birth of Jesus. The Talmud openly charges this sin against Mary. Joseph had "a short but tragic struggle between his legal conscience and his love" (McNeile).

Matt 1:20
An angel of the Lord appeared unto him in a dream ( $\alpha \gamma \gamma \varepsilon \lambda о \varsigma ~ к и \rho ь о ~ к \alpha \tau ' ~ о \nu \alpha \rho ~ \varepsilon \varphi \alpha \nu \eta$ $\alpha \cup \tau \omega$ ). This expression ( $\alpha \gamma \gamma \varepsilon \lambda о \varsigma \kappa \cup \rho \circ \circ$ ) is without the article in the New Testament except when, as in 1:24, there is reference to the angel previously mentioned. Sometimes in the Old

Testament Jehovah Himself is represented by this phrase. Surely Joseph needed God's help if ever man did. If Jesus was really God's Son, Joseph was entitled to know this supreme fact that he might be just to both Mary and her Child. It was in a dream, but the message was distinct and decisive for Joseph. He is called "Son of David" as had been shown by Matthew in Mt 1:16. Mary is called his "wife" ( $\tau \eta \nu \gamma u v a i k a ~ \sigma o v)$ ). He is told "not to become afraid" (ingressive first aorist passive subjunctive in prohibition, ( $\mu \eta \varphi \circ \beta \eta \theta \eta \iota)$ ), "to take to his side" ( $\pi \alpha \rho \alpha \lambda \alpha \beta \varepsilon \iota v$, ingressive aorist active infinitive) her whom he had planned ( $\varepsilon v \theta \nu \mu \eta \theta \varepsilon v \tau o \varsigma$, genitive absolute again, from $\varepsilon v$ and $\theta v \mu \circ \varsigma$ ) to send away with a writ of divorce. He had pondered and had planned as best he knew, but now God had called a halt and he had to decide whether he was willing to shelter Mary by marrying her and, if necessary, take upon himself whatever stigma might attach to her. Joseph was told that the child was begotten of the Holy Spirit and thus that Mary was innocent of any sin. But who would believe it now if he told it of her? Mary knew the truth and had not told him because she could not expect him to believe it.

Matt 1:21
Thou shalt call his name Jesus (Ka入єбєєৎ to ovoua autov I $\eta \sigma o v v$ ). The rabbis named six whose names were given before birth: "Isaac, Ishmael, Moses, Solomon, Josiah, and the name of the Messiah, whom may the Holy One, blessed be His name, bring in our day." The angel puts it up to Joseph as the putative father to name the child. "Jesus is the same as Joshua, a contraction of Jehoshuah (Nu 13:16; 1Ch 7:27), signifying in Hebrew, 'Jehovah is helper,' or 'Help of Jehovah'" (Broadus). So Jesus is the Greek form of Joshua (Heb 4:8). He is another Joshua to lead the true people of God into the Promised Land. The name itself was common enough as Josephus shows. Jehovah is Salvation as seen in Joshua for the Hebrews and in Jesus for all believers. "The meaning of the name, therefore, finds expression in the title Saviour applied to our Lord (Lu 1:47; 2:11; Joh 4:42 )" (Vincent). He will save ( $\sigma \omega \sigma \varepsilon$ ) his people from their sins and so be their Saviour ( $\Sigma \omega \tau \eta \rho$ ). He will be prophet, priest, and king, but "Saviour" sums it all up in one word. The explanation is carried out in the promise, "for he is the one who (avtoc) will save ( $\sigma \omega \sigma \varepsilon$ with a play on the name Jesus) his people from their sins." Paul will later explain that by the covenant people, the children of promise, God means the spiritual Israel, all who believe whether Jews or Gentiles. This wonderful word touches the very heart of the mission and message of the Messiah. Jesus himself will show that the kingdom of heaven includes all those and only those who have the reign of God in their hearts and lives.

From their sins ( $\alpha \pi 0 \tau \omega v \alpha \mu \alpha \rho \tau \omega \omega v \alpha \nu \tau \omega v$ ). Both sins of omission and of commission. The substantive ( $\alpha \mu \alpha \rho \tau \iota \alpha$ ) is from the verb ( $\alpha \mu \alpha \rho \tau \alpha v \varepsilon เ v$ ) and means missing the mark as with an arrow. How often the best of us fall short and fail to score. Jesus will save us away from ( $\alpha \pi 0$ ) as well as out of $(\varepsilon \xi)$ our sins. They will be cast into oblivion and he will cover them up out of sight.

Matt 1:22
That it may be fulfilled (iva $\pi \lambda \eta \rho \omega \theta \eta$ ). Alford says that "it is impossible to interpret iva in any other sense than in order that." That was the old notion, but modern grammarians recognize the non-final use of this particle in the Koine and even the consecutive like the Latin $u t$. Some even argue for a causal use. If the context called for result, one need not hesitate to say so as in Mr 11:28; Joh 9:36; 1Jo 1:9; Re 9:20; 13:13. See discussion in my Grammar of the Greek New Testament in the Light of Historical Research, pp. 997-9. All the same it is purpose here, God's purpose, Matthew reports the angel as saying, spoken "by (vло, immediate agent) the Lord through ( $\delta \iota \alpha$, intermediate agent) the prophet."
"All this has happened" ( $\tau о \cup \tau о ~ \delta \varepsilon ~ o \lambda o v ~ \gamma \varepsilon \gamma \circ v \varepsilon v$, present perfect indicative), stands on record as historical fact. But the Virgin Birth of Jesus is not due to this interpretation of Isa 7:14. It is not necessary to maintain (Broadus) that Isaiah himself saw anything more in his prophecy than that a woman then a virgin, would bear a son and that in the course of a few years Ahaz would be delivered from the king of Syria and Israel by the coming of the Assyrians. This historical illustration finds its richest fulfilment in the birth of Jesus from Mary. "Words of themselves are empty. They are useful only as vessels to convey things from mind to mind" (Morison). The Hebrew word for young woman is translated by virgin ( $\pi \alpha \rho \theta \varepsilon v o c$ ), but it is not necessary to conclude that Isaiah himself contemplated the supernatural birth of Jesus. We do not have to say that the idea of the Virgin Birth of Jesus came from Jewish sources. Certainly it did not come from the pagan myths so foreign to this environment, atmosphere and spirit. It is far simpler to admit the supernatural fact than try to explain the invention of the idea as a myth to justify the deification of Jesus. The birth, life, and death of Jesus throw a flood of light on the Old Testament narrative and prophecies for the early Christians. In Matthew and John in particular we often see "that the events of Christ's life were divinely ordered for the express purpose of fulfilling the Old Testament" (McNeile). See Mt 2:15,23; 4:14-17; 8:17; 12:17-21; 13:25; 21:4f.; Joh 12:38f.; 13:18; 19:24,28,36f

Matt 1:23
They shall call ( $\kappa \alpha \lambda \varepsilon \sigma \sigma v \sigma \iota v)$. Men, people, will call his name Immanuel, God with us. "The interest of the evangelist, as of all New Testament writers, in prophecy, was purely religious" (Bruce). But surely the language of Isaiah has had marvellous illustration in the Incarnation of Christ. This is Matthew's explanation of the meaning of Immanuel, a descriptive appellation of Jesus Christ and more than a mere motto designation. God's help, Jesus=the Help of God, is thus seen. One day Jesus will say to Philip: "He that has seen me has seen the Father" (Joh 14:9).

Matt 1:24
Took unto him his wife ( $\pi \alpha \rho \varepsilon \lambda \alpha \beta \varepsilon v \tau \eta v \gamma \cup v a ı \kappa \alpha \alpha v \tau o v$ ). The angel had told him not to be afraid to "take to his side" Mary his wife ( 1:20). So when he awoke from his sleep he
promptly obeyed the angel and "took his wife home" (Moffatt). One can only imagine the relief and joy of Mary when Joseph nobly rose to his high duty toward her. I have tried to sketch Mary's problems in Mary the Mother of Jesus: Her Problems and Her Glory.

Matt 1:25
And knew her not ( $\kappa \alpha$ оик $\varepsilon \gamma เ v \omega \sigma \kappa \varepsilon v \alpha \cup \tau \eta v$ ). Note the imperfect tense, continuous or linear action. Joseph lived in continence with Mary till the birth of Jesus. Matthew does not say that Mary bore no other children than Jesus. "Her firstborn" is not genuine here, but is a part of the text in Lu 2:7. The perpetual virginity of Mary is not taught here. Jesus had brothers and sisters and the natural meaning is that they were younger children of Joseph and Mary and not children of Joseph by a previous marriage. So Joseph "called his name Jesus" as the angel had directed and the child was born in wedlock. Joseph showed that he was an upright man in a most difficult situation.

## Matthew 2

Matt 2:1
Now when Jesus was born ( $\tau 0 v \delta \varepsilon$ I $\eta \sigma o v \gamma \varepsilon v v \eta \theta \varepsilon v \tau o \varsigma)$. The fact of the birth of Jesus is stated by the genitive absolute construction (first aorist passive participle of the same verb $\gamma^{\varepsilon} v v a \omega$ used twice already of the birth of Jesus, 1:16,20, and used in the genealogy, 1:2-16). Matthew does not propose to give biographic details of the supernatural birth of Jesus, wonderful as it was and disbelieved as it is by some today who actually deny that Jesus was born at all or ever lived, men who talk of the Jesus Myth, the Christ Myth, etc. "The main purpose is to show the reception given by the world to the new-born Messianic King. Homage from afar, hostility at home; foreshadowing the fortunes of the new faith: reception by the Gentiles, rejection by the Jews" (Bruce).

In Bethlehem of Judea ( $\varepsilon v \mathrm{~B} \eta \theta \lambda \varepsilon \varepsilon \mu \tau \eta \varsigma$ Iov $\delta \alpha ı \alpha \varsigma$ ). There was a Bethlehem in Galilee seven miles northwest of Nazareth (Josephus, Antiquities XIX. 15). This Bethlehem (house of bread, the name means) of Judah was the scene of Ruth's life with Boaz (Ru 1:1f.; Mt. 1:5 ) and the home of David, descendant of Ruth and ancestor of Jesus (Mt. 1:5 ). David was born here and anointed king by Samuel (1Sa 17:12 ). The town came to be called the city of David (Lu 2:11). Jesus, who was born in this House of Bread called himself the Bread of Life (Joh 6:35), the true Manna from heaven. Matthew assumes the knowledge of the details of the birth of Jesus in Bethlehem which are given in Lu 2:1-7 or did not consider them germane to his purpose. Joseph and Mary went to Bethlehem from Nazareth because it was the original family home for both of them. The first enrolment by the Emperor Augustus as the papyri show was by families (кат' oוкıav). Possibly Joseph had delayed the journey for some reason till now it approached the time for the birth of the child.
 date for the birth of Christ given by Matthew. Luke gives a more precise date in his Gospel (Lu 2:1-3), the time of the first enrolment by Augustus and while Cyrenius was ruler of Syria. More will be said of Luke's date when we come to his Gospel. We know from Matthew that Jesus was born while Herod was king, the Herod sometimes called Herod the Great. Josephus makes it plain that Herod died B.C. 4. He was first Governor of Galilee, but had been king of Judaea since B.C. 40 (by Antony and Octavius). I call him "Herod the Great Pervert" in Some Minor Characters in the New Testament. He was great in sin and in cruelty and had won the favour of the Emperor. The story in Josephus is a tragedy. It is not made plain by Matthew how long before the death of Herod Jesus was born. Our traditional date A.D. 1, is certainly wrong as Matthew shows. It seems plain that the birth of Jesus cannot be put later than B.C. 5. The data supplied by Luke probably call for B.C. 6 or 7.

Wise men from the east ( $\mu \alpha \gamma o \alpha \pi o ~ a v \alpha \tau o \lambda \omega v$ ). The etymology of $M \alpha \gamma$ is quite uncertain. It may come from the same Indo-European root as (megas) magnus, though some find
it of Babylonian origin. Herodotus speaks of a tribe of Magi among the Medians. Among the Persians there was a priestly caste of Magi like the Chaldeans in Babylon (Da 1:4 ). Daniel was head of such an order (Da 2:48). It is the same word as our "magician" and it sometimes carried that idea as in the case of Simon Magus (Ac 8:9,11) and of Elymas Barjesus (Ac 13:6,8 ). But here in Matthew the idea seems to be rather that of astrologers. Babylon was the home of astrology, but we only know that the men were from the east whether Arabia, Babylon, Persia, or elsewhere. The notion that they were kings arose from an interpretation of Is 60:3; Re 21:24. The idea that they were three in number is due to the mention of three kinds of gifts (gold, frankincense, myrrh), but that is no proof at all. Legend has added to the story that the names were Caspar, Balthasar, and Melchior as in Ben Hur and also that they represent Shem, Ham, and Japhet. A casket in the Cologne Cathedral actually is supposed to contain the skulls of these three Magi. The word for east ( $\alpha \pi \sigma \alpha v \alpha \tau o \lambda \omega \nu$ ) means "from the risings" of the sun.

Matt 2:2
For we saw his star in the east ( $\varepsilon \iota \delta \circ \mu \varepsilon v \gamma \alpha \rho \alpha v \tau 0 v \tau 0 v \alpha \sigma \tau \varepsilon \rho \alpha \varepsilon \nu \tau \eta \alpha v \alpha \tau o \lambda \eta$ ). This does not mean that they saw the star which was in the east. That would make them go east to follow it instead of west from the east. The words "in the east" are probably to be taken with "we saw" i.e. we were in the east when we saw it, or still more probably "we saw his star at its rising" or "when it rose" as Moffatt puts it. The singular form here ( $\tau \eta \alpha v \alpha \tau o \lambda \eta$ ) does sometimes mean "east" (Re 21:13), though the plural is more common as in Mt 2:1. In Lu 1:78 the singular means dawn as the verb (aveтєı入عv) does in Mt 4:16 (Septuagint). The Magi ask where is the one born king of the Jews. They claim that they had seen his star, either a miracle or a combination of bright stars or a comet. These men may have been Jewish proselytes and may have known of the Messianic hope, for even Vergil had caught a vision of it. The whole world was on tiptoe of expectancy for something. Moulton (Journal of Theological Studies, 1902, p. 524) "refers to the Magian belief that a star could be the fravashi, the counterpart or angel (cf. Mt 18:10) of a great man" (McNeile). They came to worship the newly born king of the Jews. Seneca (Epistle 58) tells of Magians who came to Athens with sacrifices to Plato after his death. They had their own way of concluding that the star which they had seen pointed to the birth of this Messianic king. Cicero ( $D e$ Divin. i. 47) "refers to the constellation from which, on the birthnight of Alexander, Magians foretold that the destroyer of Asia was born" (McNeile). Alford is positive that no miracle is intended by the report of the Magi or by Matthew in his narrative. But one must be allowed to say that the birth of Jesus, if really God's only Son who has become Incarnate, is the greatest of all miracles. Even the methods of astrologers need not disturb those who are sure of this fact.

Matt 2:3

He was troubled, and all Jerusalem with him ( $\varepsilon \tau \alpha \rho \alpha \chi \theta \eta \kappa \alpha \pi \alpha \sigma \alpha$ I $\varepsilon \rho о \sigma о \lambda \nu \mu \alpha \mu \varepsilon \tau^{\prime}$ avtov). Those familiar with the story of Herod the Great in Josephus can well understand the meaning of these words. Herod in his rage over his family rivalries and jealousies put to death the two sons of Mariamne (Aristobulus and Alexander), Mariamne herself, and Antipater, another son and once his heir, besides the brother and mother of Mariamne (Aristobulus, Alexandra) and her grandfather John Hyrcanus. He had made will after will and was now in a fatal illness and fury over the question of the Magi. He showed his excitement and the whole city was upset because the people knew only too well what he could do when in a rage over the disturbance of his plans. "The foreigner and usurper feared a rival, and the tyrant feared the rival would be welcome" (Bruce). Herod was a hated Idumaean.

Matt 2:4
He inquired of them where the Christ should be born ( $\varepsilon \pi v v \theta \alpha v \varepsilon \tau о ~ \pi \alpha \rho ' ~ \alpha u \tau \omega v \pi о v$ o Xpıoтos $\gamma \varepsilon v v a \tau \alpha$ ). The prophetic present ( $\gamma \varepsilon v v a \tau \alpha$ ) is given, the very words of Herod retained by Matthew's report. The imperfect tense (epunthaneto) suggests that Herod inquired repeatedly, probably of one and another of the leaders gathered together, both Sadducees (chief priests) and Pharisees (scribes). McNeile doubts, like Holtzmann, if Herod actually called together all the Sanhedrin and probably "he could easily ask the question of a single scribe," because he had begun his reign with a massacre of the Sanhedrin (Josephus, Ant. XIV. ix. 4). But that was thirty years ago and Herod was desperately in earnest to learn what the Jews really expected about the coming of "the Messiah." Still Herod probably got together not the Sanhedrin since "elders" are not mentioned, but leaders among the chief priests and scribes, not a formal meeting but a free assembly for conference. He had evidently heard of this expected king and he would swallow plenty of pride to be able to compass the defeat of these hopes.

Matt 2:5
And they said unto him (o $\delta \varepsilon \varepsilon ו \pi \alpha \nu \alpha v \tau \omega$ ). Whether the ecclesiastics had to search their scriptures or not, they give the answer that is in accord with the common Jewish opinion that the Messiah was to come from Bethlehem and of the seed of David (Joh 7:42 ). So they quote Mic 5:2, "a free paraphrase" Alford calls it, for it is not precisely like the Hebrew text or like the Septuagint. It may have come from a collection of testimonia with which J. Rendel Harris has made the world familiar. He had consulted the experts and now he has their answer. Bethlehem of Judah is the place. The use of the perfect passive indicative ( $\gamma \varepsilon \gamma \rho \alpha \pi \tau \alpha)$ is the common form in quoting scripture. It stands written.

Shall be shepherd ( $\pi о \mu \alpha v \varepsilon$ ). The Authorized Version had "shall rule," but "shepherd" is correct. "Homer calls kings 'the shepherds of the people"' (Vincent). In Heb 13:20 Jesus is called "the great shepherd of the sheep." Jesus calls himself "the good shepherd" (Joh 10:11 ). Peter calls Christ "the chief shepherd" (1Pe 2:25). "The Lamb which is in the midst of the
throne shall be their shepherd" (Re 7:17). Jesus told Peter to "shepherd" the lambs (Joh 21:16 ). Our word pastor means shepherd.

Matt 2:7
Then Herod privily called the wise men ( $\tau о \tau \varepsilon ~ Н \eta \rho \omega ı \delta \eta \varsigma \lambda \alpha \theta \rho \alpha$ ка $\lambda \varepsilon \sigma \alpha \varsigma ~ \tau о и \varsigma ~ \mu \alpha \gamma о ч \varsigma) . ~$ He had manifestly not told members of the Sanhedrin why he was concerned about the Messiah. So he conceals his motives to the Magi. And yet he "learned of them carefully" ( $\varepsilon \kappa \rho \beta \omega \sigma \varepsilon v)$ ) "learned exactly" or "accurately." He was anxious to see if the Jewish prophecy of the birthplace of the Messiah agreed with the indications of the star to the Magi. He kept
 is not "the time when the star appeared," but the age of the star's appearance.

Matt 2:8
Sent them to Bethlehem and said ( $\pi \varepsilon \mu \psi \alpha \varsigma ~ a \cup \tau о ט \varsigma ~ \varepsilon ı \varsigma ~ B \eta ~ \theta \lambda \varepsilon \varepsilon \mu ~ \varepsilon ı \pi \varepsilon v) . ~ S i m u l t a n e o u s ~$ aorist participle, "sending said." They were to "search out accurately" ( $\varepsilon \xi \varepsilon \tau \alpha \sigma \alpha \tau \varepsilon \alpha \kappa \rho \curlywedge \beta \omega$ ) concerning the child. Then "bring me word, that I also may come and worship him." The deceit of Herod seemed plausible enough and might have succeeded but for God's intervention to protect His Son from the jealous rage of Herod.

Matt 2:9
Went before them ( $\pi \rho \circ \eta \gamma^{\varepsilon} v$ autous). Imperfect tense, kept on in front of them, not as a guide to the town since they now knew that, but to the place where the child was, the inn according to Lu 2:7. Justin Martyr says that it was in a cave. The stall where the cattle and donkeys stayed may have been beneath the inn in the side of the hill.

Matt 2:10
They rejoiced with exceeding great joy ( $\varepsilon \chi \alpha \rho \eta \sigma \alpha v \chi \alpha \rho \alpha v \mu \varepsilon \gamma \alpha \lambda \eta v \sigma \varphi \circ \delta \rho \alpha$ ). Second aorist passive indicative with cognate accusative. Their joy was due to the success of the search.

Matt 2:11
Opening their treasures ( $\alpha v o ı \xi \alpha v \tau \varepsilon \varsigma ~ \tau o u c ~ Ө \eta \sigma \alpha \cup \rho o u \varsigma ~ \alpha v \tau \omega v)$. Here "treasures" means "caskets" from the verb $(\tau i \theta \eta \mu)$, receptacle for valuables. In the ancient writers it meant "treasury" as in 1Macc. 3:29. So a "storehouse" as in Mt 13:52. Then it means the things laid up in store, treasure in heaven (Mt 6:20), in Christ (Col 2:3 ). In their "caskets" the Magi had gold, frankincense, and myrrh, all found at that time in Arabia, though gold was found in Babylon and elsewhere.

Matt 2:12
Warned in a dream ( $\chi \rho \eta \mu \alpha \tau \iota \sigma \theta \varepsilon v \tau \varepsilon \varsigma \kappa \alpha \tau^{\prime}$ ovap). The verb means to transact business ( $\chi \rho \eta \mu \alpha \tau \iota \zeta \omega$ from $\chi \rho \eta \mu \alpha$, and that from $\chi \rho \alpha o \mu \alpha$, to use. Then to consult, to deliberate, to make answer as of magistrates or an oracle, to instruct, to admonish. In the Septuagint and the New Testament it occurs with the idea of being warned by God and also in the papyri (Deissmann, Bible Studies, p. 122). Wycliff puts it here: "An answer taken in sleep."

Matt 2:15
Until the death of Herod ( $\varepsilon \omega \varsigma \tau \eta \varsigma \tau \varepsilon \lambda \varepsilon v \tau \eta \varsigma H \eta \rho \omega t \delta o v$ ). The Magi had been warned in a dream not to report to Herod and now Joseph was warned in a dream to take Mary and the child along ( $\mu \varepsilon \lambda \lambda \varepsilon \zeta \eta \tau \varepsilon \iota \nu \tau 0 v \alpha \pi o \lambda \varepsilon \sigma \alpha$ gives a vivid picture of the purpose of Herod in these three verbs). In Egypt Joseph was to keep Mary and Jesus till the death of Herod the monster. Matthew quotes Ho 11:1 to show that this was in fulfilment of God's purpose to call his Son out of Egypt. He may have quoted again from a collection of testimonia rather than from the Septuagint. There is a Jewish tradition in the Talmud that Jesus "brought with him magic arts out of Egypt in an incision on his body" (Shabb. 104b). "This attempt to ascribe the Lord's miracles to Satanic agency seems to be independent of Matthew, and may have been known to him, so that one object of his account may have been to combat it" (McNeile).

Matt 2:16
Slew all the male children that were in Bethlehem ( $\alpha v \varepsilon ı \lambda \varepsilon v \pi \alpha v \tau \alpha \varsigma ~ \tau o v \varsigma \pi \alpha ı \delta \alpha \varsigma ~ \tau o v \varsigma, ~$ $\varepsilon \nu B \eta \theta \lambda \varepsilon \varepsilon \mu$ ). The flight of Joseph was justified, for Herod was violently enraged ( $\varepsilon \theta v \mu \omega \theta \eta$ $\lambda(\alpha v)$ that he had been mocked by the Magi, deluded in fact ( $\varepsilon v \varepsilon \pi \alpha \downarrow \Theta \eta)$. Vulgate illusus esset. Herod did not know, of course, how old the child was, but he took no chances and included all the little boys ( $\tau 0 \vee \varsigma \pi \alpha \iota \delta \alpha$, masculine article) in Bethlehem two years old and under, perhaps fifteen or twenty. It is no surprise that Josephus makes no note of this small item in Herod's chamber of horrors. It was another fulfilment of the prophecy in Jer 31:15. The quotation ( $2: 18$ ) seems to be from the Septuagint. It was originally written of the Babylonian captivity but it has a striking illustration in this case also. Macrobius (Sat. II. iv. II) notes that Augustus said that it was better to be Herod's sow (vৎ) than his son (vioc), for the sow had a better chance of life.

Matt 2:20
For they are dead ( $\tau \varepsilon \theta \nu \eta \kappa \alpha \sigma \iota)$ ). Only Herod had sought to kill the young child, but it is a general statement of a particular fact as is common with people who say: "They say." The idiom may be suggested by Ex 4:19 : "For all are dead that sought thy life."

Matt 2:22
Warned in a dream ( $\chi \rho \eta \mu \alpha \tau \iota \sigma \theta \varepsilon \iota \varsigma ~ \kappa \alpha \tau^{\prime}$ оv $\alpha \rho$ ). He was already afraid to go to Judea because Archelaus was reigning (ruling, not technically king, $\beta a \sigma \iota \lambda \varepsilon v \varepsilon$ ). In a fret at last before his death Herod had changed his will again and put Archelaus, the worst of his living sons, in the place of Antipas. So Joseph went to Galilee. Matthew has had nothing about the previous dwelling of Joseph and Mary in Nazareth. We learn that from Luke who tells nothing of the flight into Egypt. The two narratives supplement one another and are in no sense contradictory.

Matt 2:23

Should be called a Nazarene ( $\mathrm{N} \alpha \zeta \omega \rho \alpha \iota \varsigma \kappa \lambda \eta \eta \eta \sigma \varepsilon \tau \alpha$ ). Matthew says "that it might be fulfilled which was spoken by the prophets" ( $\delta \iota \alpha \tau \omega \nu \pi \rho \circ \varphi \eta \tau \omega v$ ). It is the plural and no single prophecy exists which says that the Messiah was to be called a Nazarene. It may be that this term of contempt (Joh 1:46; 7:52) is what is meant, and that several prophecies are to be combined like Ps. 22:6,8; 69:11,19; Isa 53:2,3,4. The name Nazareth means a shoot or branch, but it is by no means certain that Matthew has this in mind. It is best to confess that we do not know. See Broadus on Matthew for the various theories. But, despised as Nazareth was at that time, Jesus has exalted its fame. The lowly Nazarene he was at first, but it is our glory to be the followers of the Nazarene. Bruce says that "in this case, therefore, we certainly know that the historic fact suggested the prophetic reference, instead of the prophecy creating the history." The parallels drawn by Matthew between the history of Israel and the birth and infancy of Jesus are not mere fancy. History repeats itself and writers of history find frequent parallels. Surely Matthew is not beyond the bounds of reason or of fact in illustrating in his own way the birth and infancy of Jesus by the Providence of God in the history of Israel.

## Matthew 3

Matt 3:1
And in those days cometh John the Baptist ( $\varepsilon v \delta \varepsilon \tau \alpha \iota \varsigma ~ \eta \mu \varepsilon \rho \alpha ı \varsigma ~ \pi \alpha \rho \alpha \gamma ı v \varepsilon \tau \alpha \mathrm{I} \omega \alpha \nu \eta \varsigma$ о $\mathrm{B} \alpha \pi \tau \iota \sigma \tau \eta \varsigma)$. Here the synoptic narrative begins with the baptism of John (Mt. 3:1; Mr 1:2; Lu 3:1) as given by Peter in Ac 1:22, "from the baptism of John, unto the day that he was received up from us" (cf. also Ac 10:37-43, Peter's summary to Cornelius very much like the outline of Mark's Gospel). Matthew does not indicate the date when John appeared as Luke does in ch. 3 (the fifteenth year of Tiberius's reign). It was some thirty years after the birth of John, precisely how long after the return of Joseph and Mary to Nazareth we do not know. Moffatt translates the verb ( $\pi \alpha \rho \alpha \gamma \iota v \varepsilon \tau \alpha$ ) "came on the scene," but it is the historical present and calls for a vivid imagination on the part of the reader. There he is as he comes forward, makes his appearance. His name John means "Gift of Jehovah" (cf. German Gotthold) and is a shortened form of Johanan. He is described as "the Baptist," "the Baptizer" for that is the rite that distinguishes him. The Jews probably had proselyte baptism as I. Abrahams shows (Studies in Pharisaism and the Gospels, p. 37). But this rite was meant for the Gentiles who accepted Judaism. John is treating the Jews as Gentiles in demanding baptism at their hands on the basis of repentance.

Preaching in the wilderness of Judea (K $\quad \rho \cup \sigma \sigma \omega v \varepsilon v \tau \eta \varepsilon \rho \eta \mu \omega \tau \eta \varsigma$ Iov $\delta a 1 a \varsigma$ ). It was the rough region in the hills toward the Jordan and the Dead Sea. There were some people scattered over the barren cliffs. Here John came in close touch with the rocks, the trees, the goats, the sheep, and the shepherds, the snakes that slipped before the burning grass over the rocks. He was the Baptizer, but he was also the Preacher, heralding his message out in the barren hills at first where few people were, but soon his startling message drew crowds from far and near. Some preachers start with crowds and drive them away.

## Matt 3:2

Repent ( $\mu \varepsilon \tau \alpha v o \varepsilon \iota \tau \varepsilon$ ). Broadus used to say that this is the worst translation in the New Testament. The trouble is that the English word "repent" means "to be sorry again" from the Latin repoenitet (impersonal). John did not call on the people to be sorry, but to change (think afterwards) their mental attitudes ( $\mu \varepsilon \tau \alpha v o \varepsilon ı \tau \varepsilon$ ) and conduct. The Vulgate has it "do penance" and Wycliff has followed that. The Old Syriac has it better: "Turn ye." The French (Geneva) has it "Amendez vous." This is John's great word (Bruce) and it has been hopelessly mistranslated. The tragedy of it is that we have no one English word that reproduces exactly the meaning and atmosphere of the Greek word. The Greek has a word meaning to be sorry ( $\mu \varepsilon \tau \alpha \mu \varepsilon \lambda o \mu \alpha$ ) which is exactly our English word repent and it is used of Judas (Mt 27:3). John was a new prophet with the call of the old prophets: "Turn ye" (Joe 2:12; Isa. 55:7; Eze 33:11,15 ).

For the kingdom of heaven is at hand ( $\eta \gamma \gamma \iota \kappa \varepsilon \nu \gamma \alpha \rho \eta$ B $\alpha \sigma \iota \lambda \varepsilon \iota \alpha \tau \omega \nu$ ov $\rho \alpha \nu \omega \nu$ ). Note the position of the verb and the present perfect tense. It was a startling word that John thundered over the hills and it re-echoed throughout the land. The Old Testament prophets had said that it would come some day in God's own time. John proclaims as the herald of the new day that it has come, has drawn near. How near he does not say, but he evidently means very near, so near that one could see the signs and the proof. The words "the kingdom of heaven" he does not explain. The other Gospels use "the kingdom of God" as Matthew does a few times, but he has "the kingdom of heaven" over thirty times. He means "the reign of God," not the political or ecclesiastical organization which the Pharisees expected. His words would be understood differently by different groups as is always true of popular preachers. The current Jewish apocalypses had numerous eschatological ideas connected with the kingdom of heaven. It is not clear what sympathy John had with these eschatological features. He employs vivid language at times, but we do not have to confine John's intellectual and theological horizon to that of the rabbis of his day. He has been an original student of the Old Testament in his wilderness environment without any necessary contact with the Essenes who dwelt there. His voice is a new one that strikes terror to the perfunctory theologians of the temple and of the synagogue. It is the fashion of some critics to deny to John any conception of the spiritual content of his words, a wholly gratuitous criticism.

For this is he that was spoken of by Isaiah the prophet (ov Eбaıov tov $\pi \rho \circ \varphi \eta \tau 0 v$ ). This is Matthew's way of interpreting the mission and message of the Baptist. He quotes Isa 40:3 where "the prophet refers to the return of Israel from the exile, accompanied by their God" (McNeile). He applies it to the work of John as "a voice crying in the wilderness" for the people to make ready the way of the Lord who is now near. He was only a voice, but what a voice he was. He can be heard yet across the centuries.

Matt 3:4
Now John himself ( $\alpha \cup \tau \circ \varsigma \delta \varepsilon$ o I $\omega \alpha \nu \eta \varsigma$ ). Matthew thus introduces the man himself and draws a vivid sketch of his dress (note $\varepsilon \iota \chi \varepsilon \nu$, imperfect tense), his habit, and his food. Would such an uncouth figure be welcome today in any pulpit in our cities? In the wilderness it did not matter. It was probably a matter of necessity with him, not an affectation, though it was the garb of the original Elijah (2Ki 1:8), rough sackcloth woven from the hair of camels. Plummer holds that "John consciously took Elijah as a model."

Matt 3:6
And they were baptized ( $\kappa \alpha \varepsilon \beta \alpha \pi \tau \iota \zeta о \nu \tau 0)$. It is the imperfect tense to show the repetition of the act as the crowds from Judea and the surrounding country kept going out to him ( $\varepsilon \xi \varepsilon \pi о \rho \varepsilon v \varepsilon \tau о$ ), imperfect again, a regular stream of folks going forth. Moffatt takes it as causative middle, "got baptized," which is possible. "The movement of course was gradual. It began on a small scale and steadily grew till it reached colossal proportions" (Bruce). It is a pity that baptism is now such a matter of controversy. Let Plummer, the great Church of

England commentator on Matthew, speak here of John's baptising these people who came in throngs: "It is his office to bind them to a new life, symbolized by immersion in water." That is correct, symbolized, not caused or obtained. The word "river" is in the correct text, "river Jordan." They came "confessing their sins" ( $\varepsilon \xi_{0} \mu \boldsymbol{\jmath}$ оүои $\mu \varepsilon v o$ ), probably each one confessing just before he was baptized, "making open confession" (Weymouth). Note $\varepsilon \xi$. It was a never to be forgotten scene here in the Jordan. John was calling a nation to a new life. They came from all over Judea and even from the other side of El Ghor (the Jordan Gorge), Perea. Mark adds that finally all Jerusalem came.

Matt 3:7
The Pharisees and Sadducees ( $\tau \omega \nu$ Фарıбаı $\omega v$ ка $\Sigma a \delta \delta o v \kappa \alpha \iota \omega \nu$ ). These two rival parties do not often unite in common action, but do again in Mt 16:1. "Here a strong attraction, there a strong repulsion, made them for the moment forget their differences" (McNeile). John saw these rival ecclesiastics "coming for baptism" ( $\varepsilon \rho \chi \circ \mu \varepsilon v o v \varsigma \varepsilon \pi \tau \tau \beta a \pi \tau \iota \sigma \mu \alpha)$. Alford speaks of "the Pharisees representing hypocritical superstition; the Sadducees carnal unbelief." One cannot properly understand the theological atmosphere of Palestine at this time without an adequate knowledge of both Pharisees and Sadducees. The books are numerous besides articles in the Bible dictionaries. I have pictured the Pharisees in my first (1916) Stone Lectures, The Pharisees and Jesus. John clearly grasped the significance of this movement on the part of the Pharisees and Sadducees who had followed the crowds to the Jordan. He had welcomed the multitudes, but right in the presence of the crowds he exposes the hypocrisy of the ecclesiastics.

Ye offspring of vipers ( $\gamma \varepsilon v v \eta \mu \alpha \tau \alpha \varepsilon \chi เ \delta v \omega v)$. Jesus (Mt 12:34; 23:33) will use the same language to the Pharisees. Broods of snakes were often seen by John in the rocks and when a fire broke out they would scurry ( $\varphi \cup \gamma \varepsilon เ v$ ) to their holes for safety. "The coming wrath" was not just for Gentiles as the Jews supposed, but for all who were not prepared for the kingdom of heaven ( 1 Th 1:10). No doubt the Pharisees and Sadducees winced under the sting of this powerful indictment.

Matt 3:8
Fruit worthy of repentance (Kарлоv $\alpha \xi ו \circ \nu \tau \eta \varsigma \mu \varepsilon \tau \alpha v o \iota \alpha \varsigma)$. John demands proof from these men of the new life before he administers baptism to them. "The fruit is not the change of heart, but the acts which result from it" (McNeile). It was a bold deed for John thus to challenge as unworthy the very ones who posed as lights and leaders of the Jewish people. "Any one can do ( $\pi$ oı $\sigma \sigma \alpha \varepsilon, \varsigma \iota \delta \varepsilon$ Ge 1:11) acts externally good but only a good man can grow a crop of right acts and habits" (Bruce).

Matt 3:9
And think not to say within yourselves ( $\kappa \alpha \mu \eta \delta o \xi \eta \tau \varepsilon \lambda \varepsilon \gamma \varepsilon เ v \varepsilon v \varepsilon a v \tau o เ \varsigma)$ ). John touched the tender spot, their ecclesiastical pride. They felt that the "merits of the fathers," especially
of Abraham, were enough for all Israelites. At once John made clear that, reformer as he was, a breach existed between him and the religious leaders of the time.

Of these stones ( $\varepsilon \kappa \tau \omega \vee \lambda_{\imath} \theta \omega \nu \tau o v \tau \omega v$ ). "Pointing, as he spoke to the pebbles on the beach of the Jordan" (Vincent).

Matt 3:10
Is the axe laid ( $\eta \alpha \xi \iota v \eta \kappa \varepsilon \iota \alpha)$ ). This verb $\kappa \varepsilon \iota \tau \alpha$ is used as the perfect passive of $\tau \iota \theta \eta \mu$. But the idea really is, "the axe lies at ( $\pi \rho \rho \varsigma$, before) the root of the trees." It is there ready for business. The prophetic present occurs also with "is hewn down" and "cast."

Matt 3:11
Mightier than I (เб $\chi \cup \rho о \tau \varepsilon \rho \circ \varsigma \mu \circ v$ ). Ablative after the comparative adjective. His baptism is water baptism, but the Coming One "will baptize in the Holy Spirit and fire." "Life in the coming age is in the sphere of the Spirit. Spirit and fire are coupled with one preposition as a double baptism" (McNeile). Broadus takes "fire" in the sense of separation like the use of the fan. As the humblest of servants John felt unworthy to take off the sandals of the Coming One. About $\beta \alpha \sigma \tau \alpha \zeta \omega$ see on Mt 8:17 .

Matt 3:12
Will burn up with unquenchable fire ( $\kappa \alpha \tau \alpha \kappa \alpha v \sigma \varepsilon ~ \pi v \rho ~ \alpha \sigma \beta \varepsilon \sigma \tau \omega$ ). Note perfective use of kata. The threshing floor, the fan, the wheat, the garner, the chaff ( $\alpha \chi$ voov, chaff, straw, stubble), the fire furnish a life-like picture. The "fire" here is probably judgment by and at the coming of the Messiah just as in verse 11. The Messiah "will thoroughly cleanse" ( $\delta \iota \alpha \kappa \alpha \theta \alpha \rho ı \varepsilon$, Attic future of $-\iota \zeta \omega$ and note $\delta \iota \alpha-$ ). He will sweep from side to side to make it clean.

Matt 3:13
Then cometh Jesus ( $\tau о \tau \varepsilon \pi \alpha \rho \alpha \gamma \iota \varepsilon \tau \alpha$ o I I $\sigma o u \varsigma)$. The same historical present used in 3:1. He comes all the way from Galilee to Jordan "to be baptized by him" ( $\tau$ vo $\beta a \pi \tau \iota \sigma \theta \eta v a$ ито avtov). The genitive articular infinitive of purpose, a very common idiom. The fame of John had reached Nazareth and the hour has come for which Jesus has waited.

Matt 3:14
Would have hindered ( $\delta \Sigma \varepsilon \kappa \omega \lambda \nu \varepsilon v$ ). Rather "tried to prevent" as Moffatt has it. It is the conative imperfect. The two men of destiny are face to face for the first time apparently. The Coming One stands before John and he recognizes him before the promised sign is given.

Matt 3:15
To fulfil all righteousness ( $\pi \lambda \eta \rho \omega \sigma \alpha \pi \alpha \sigma \alpha v \delta \iota \kappa \alpha \iota \sigma v v \eta v$ ). The explanation of Jesus satisfies John and he baptizes the Messiah though he has no sins to confess. It was proper ( $\pi \rho \varepsilon \pi \sigma v)$ to do so else the Messiah would seem to hold aloof from the Forerunner. Thus the ministries of the two are linked together.

Matt 3:16

The Spirit of God descending as a dove ( $\pi v \varepsilon \nu \mu \alpha$ Өعov катаßaıvov $\omega \sigma \varepsilon \pi \varepsilon \rho \iota \sigma \tau \varepsilon \rho \alpha v$ ). It is not certain whether Matthew means that the Spirit of God took the form of a dove or came upon Jesus as a dove comes down. Either makes sense, but Luke (Lu 3:22) has it "in bodily form as a dove" and that is probably the idea here. The dove in Christian art has been considered the symbol of the Holy Spirit.

Matt 3:17
A voice out of the heavens ( $\varphi \omega v \eta \varepsilon \kappa \tau \omega \nu$ oupav$\omega v$ ). This was the voice of the Father to the Son whom he identifies as His Son, "my beloved Son." Thus each person of the Trinity is represented (Father, Son, Holy Spirit) at this formal entrance of Jesus upon his Messianic ministry. John heard the voice, of course, and saw the dove. It was a momentous occasion for John and for Jesus and for the whole world. The words are similar to Ps 2:7 and the voice at the Transfiguration (Mt 17:5). The good pleasure of the Father is expressed by the timeless aorist ( $\varepsilon \cup \delta$ ок $\eta \sigma \alpha$ ).

## Matthew 4

Matt 4:1
To be tempted of the devil ( $\pi \varepsilon \iota \rho \alpha \sigma \theta \eta v a v \pi o ~ \tau o v \delta ı \beta \beta \lambda o v)$. Matthew locates the
 the same general region where John was preaching. It is not surprising that Jesus was tempted by the devil immediately after his baptism which signified the formal entrance upon the Messianic work. That is a common experience with ministers who step out into the open for Christ. The difficulty here is that Matthew says that "Jesus was led up into the wilderness by the Spirit to be tempted by the devil." Mark (Mr 1:12) puts it more strongly that the Spirit "drives" $(\varepsilon \kappa \beta \alpha \lambda \lambda \varepsilon)$ Christ into the wilderness. It was a strong impulsion by the Holy Spirit that led Jesus into the wilderness to think through the full significance of the great step that he had now taken. That step opened the door for the devil and involved inevitable conflict with the slanderer ( $\tau 0 v \delta i \alpha \beta o \lambda o v$ ). Judas has this term applied to him (Joh 6:70) as it is to men (2Ti 3:3; Tit 2:3) and women (she devils, 1Ti 3:11) who do the work of the arch slanderer. There are those today who do not believe that a personal devil exists, but they do not offer an adequate explanation of the existence and presence of sin in the world. Certainly Jesus did not discount or deny the reality of the devil's presence. The word "tempt" here $(\pi \varepsilon \iota \rho \alpha \zeta \omega)$ and in 4:3 means originally to test, to try. That is its usual meaning in the ancient Greek and in the Septuagint. Bad sense of $\varepsilon \kappa \pi \varepsilon \iota \rho \alpha \zeta \omega$ in $4: 7$ as in De 6:16. Here it comes to mean, as often in the New Testament, to solicit to sin. The evil sense comes from its use for an evil purpose.

Matt 4:2
Had fasted ( $v \eta \sigma \tau \varepsilon v \sigma a \varsigma)$. No perfunctory ceremonial fast, but of communion with the Father in complete abstention from food as in the case of Moses during forty days and forty nights (Ex 34:28). "The period of the fast, as in the case of Moses was spent in a spiritual ecstasy, during which the wants of the natural body were suspended" (Alford). "He afterward hungered" and so at the close of the period of forty days.

Matt 4:3
If thou art the Son of God ( $\varepsilon$ vios $\varepsilon$ रov $\theta \varepsilon o v$ ). More exactly, "If thou art Son of God," for there is no article with "Son." The devil is alluding to the words of the Father to Jesus at the baptism: "This is my Son the Beloved." He challenges this address by a condition of the first class which assumes the condition to be true and deftly calls on Jesus to exercise his power as Son of God to appease his hunger and thus prove to himself and all that he really is what the Father called him.

Become bread ( $\alpha \rho \tau 0 \gamma \varepsilon \nu \omega v \tau \alpha$ ). Literally, "that these stones (round smooth stones which possibly the devil pointed to or even picked up and held) become loaves" (each stone
a loaf). It was all so simple, obvious, easy. It would satisfy the hunger of Christ and was quite within his power.

It is written $(\gamma \varepsilon \gamma \rho \alpha \pi \tau \alpha)$. Perfect passive indicative, stands written and is still in force. Each time Jesus quotes Deuteronomy to repel the subtle temptation of the devil. Here it is De 8:3 from the Septuagint. Bread is a mere detail (Bruce) in man's dependence upon God.

## Matt 4:5

Then the devil taketh him ( $\tau о \tau \varepsilon \pi \alpha \rho \alpha \lambda \alpha \mu \beta \alpha v \varepsilon \alpha v \tau о v$ o $\delta ı \alpha \beta о \lambda о \varsigma)$. Matthew is very fond of this temporal adverb ( $\tau 0 \tau \varepsilon$ ). See already $2: 7 ; 3: 13 ; 4: 1,5$. Note historic present with vivid picturesqueness. Luke puts this temptation third, the geographical order. But was the person of Christ allowed to be at the disposal of the devil during these temptations? Alford so holds.

On the pinnacle of the temple ( $\varepsilon \pi \tau о \pi \tau \varepsilon \rho \cup \gamma\llcorner\sim \tau o v \iota \varepsilon \rho \circ$ ). Literally "wing:" the English word "pinnacle" is from the Latin pinnaculum, a diminutive of pinna (wing). "The temple" ( $\tau 0 v i \varepsilon \rho \circ$ ) here includes the whole temple area, not just the sanctuary (o vooc), the Holy Place and Most Holy Place. It is not clear what place is meant by "wing." It may refer to Herod's royal portico which overhung the Kedron Valley and looked down some four hundred and fifty feet, a dizzy height (Josephus, Ant. XV. xi. 5). This was on the south of the temple court. Hegesippus says that James the Lord's brother was later placed on the wing of the temple and thrown down therefrom.

Matt 4:6
Cast thyself down ( $\beta \alpha \lambda \varepsilon \sigma \varepsilon \alpha v \tau o v \kappa \alpha \tau \omega$ ). The appeal to hurl himself down into the abyss below would intensify the nervous dread that most people feel at such a height. The devil urged presumptuous reliance on God and quotes Scripture to support his view (Ps 91:11f. ). So the devil quotes the Word of God, misinterprets it, omits a clause, and tries to trip the Son of God by the Word of God. It was a skilful thrust and would also be accepted by the populace as proof that Jesus was the Messiah if they should see him sailing down as if from heaven. This would be a sign from heaven in accord with popular Messianic expectation. The promise of the angels the devil thought would reassure Jesus. They would be a spiritual parachute for Christ.

Matt 4:7
Thou shall not tempt (оик єклєєюабєıৎ). Jesus quotes Deuteronomy again (De 6:16) and shows that the devil has wholly misapplied God's promise of protection.

Matt 4:8
And showeth him ( $\kappa \alpha \delta \varepsilon \iota \kappa \nu v \sigma \iota \nu \alpha v \tau \omega$ ). This wonderful panorama had to be partially mental and imaginative, since the devil caused to pass in review "all the kingdoms of the world and the glory of them." But this fact does not prove that all phases of the temptations were subjective without any objective presence of the devil. Both could be true. Here again we have the vivid historical present ( $\delta \varepsilon ו \kappa v v \sigma \iota v)$. The devil now has Christ upon a very high
mountain whether the traditional Quarantania or not. It was from Nebo's summit that Moses caught the vision of the land of Canaan (De 34:1-3 ). Luke (Lu 4:5) says that the whole panorama was "in a moment of time" and clearly psychological and instantaneous.

## Matt 4:9

All these things will I give thee ( $\tau \alpha v \tau \alpha \sigma o \pi \alpha v \tau \alpha \delta \omega \sigma \omega$ ). The devil claims the rule of the world, not merely of Palestine or of the Roman Empire. "The kingdoms of the cosmos" ( $4: 8$ ) were under his sway. This word for world brings out the orderly arrangement of the universe while $\eta$ оькоט $\mu \varepsilon \nu \eta$ presents the inhabited earth. Jesus does not deny the grip of the devil on the world of men, but the condition ( $\varepsilon \alpha \nu$ and aorist subjunctive, second class undetermined with likelihood of determination), was spurned by Jesus. As Matthew has it Jesus is plainly to "fall down and worship me" ( $\pi \varepsilon \sigma \omega \nu \pi \rho о к \nu \nu \eta \sigma \eta \iota \varsigma \mu$ ), while Luke ( $\mathrm{Lu} 4: 7$ ) puts it, "worship before me" ( $\varepsilon \nu \omega \pi \iota \circ v \varepsilon \mu \circ v)$, a less offensive demand, but one that really involved worship of the devil. The ambition of Jesus is thus appealed to at the price of recognition of the devil's primacy in the world. It was compromise that involved surrender of the Son of God to the world ruler of this darkness. "The temptation was threefold: to gain a temporal, not a spiritual, dominion; to gain it at once; and to gain it by an act of homage to the ruler of this world, which would make the self-constituted Messiah the vice-regent of the devil and not of God" (McNeile).

Matt 4:10
Get thee hence, Satan (Нv $\quad \alpha \gamma \varepsilon, \Sigma \alpha \tau \alpha v \alpha$ ). The words "behind me" (о $\pi \tau \omega \mu \nu v$ ) belong to Mt 16:23 , not here. "Begone" Christ says to Satan. This temptation is the limit of diabolical suggestion and argues for the logical order in Matthew. "Satan" means the adversary and Christ so terms the devil here. The third time Jesus quotes Deuteronomy, this time De 6:13 , and repels the infamous suggestion by Scripture quotation. The words "him alone thou shalt serve" need be recalled today. Jesus will warn men against trying to serve God and mammon (Mt 6:24). The devil as the lord of the evil world constantly tries to win men to the service of the world and God. This is his chief camouflage for destroying a preacher's power for God. The word here in Mt 4:10 for serve is $\lambda \alpha \tau \rho \varepsilon v \sigma \varepsilon \iota \varsigma$ from $\lambda \alpha \tau \rho ı \varsigma$ a hired servant, one who works for hire, then render worship.

Matt 4:11
Then the devil leaveth him ( $\tau о \tau \varepsilon \alpha \varphi ı \eta \sigma \iota \sim \alpha \cup \tau \circ \nu$ о $\delta ı \alpha \beta о \lambda о \varsigma)$. Note the use of "then" ( $\tau \circ \tau \varepsilon$ ) again and the historical present. The movement is swift. "And behold" ( $\kappa \alpha$ เ $\delta о v$ ) as so often in Matthew carries on the life-like picture. " Angels came (aorist tense $\pi \rho o \sigma \eta \lambda \theta$ ov punctiliar action)
and were ministering ( $\delta \downarrow\rceil$ кovouv, picturesque imperfect, linear action)
unto him ." The victory was won in spite of the fast of forty days and the repeated onsets of the devil who had tried every avenue of approach. The angels could cheer him in the inevitable nervous and spiritual reaction from the strain of conflict, and probably also with
food as in the case of Elijah (1Ki 19:6f. ). The issues at stake were of vast import as the champions of light and darkness grappled for the mastery of men. Lu 4:13 adds, that the devil left Jesus only "until a good opportunity" (ах $\rho$ каı $\rho \circ$ ).

Matt 4:12
Now when he heard ( $\alpha \kappa о v \sigma \alpha \varsigma \delta \varepsilon$ ). The reason for Christ's return to Galilee is given here to be that John had been delivered up into prison. The Synoptic Gospels skip from the temptation of Jesus to the Galilean ministry, a whole year. But for Joh 1:19-3:36 we should know nothing of the "year of obscurity" (Stalker). John supplies items to help fill in the picture. Christ's work in Galilee began after the close of the active ministry of the Baptist who lingered on in prison for a year or more.

Matt 4:13
Dwelt in Capernaum (Катшıкŋ $\sigma \varepsilon v \varepsilon ı \varsigma К \alpha \varphi \alpha \rho \nu \alpha о \cup \mu)$. He went first to Nazareth, his old home, but was rejected there (Lu 4:16-31). In Capernaum (probably the modern $\mathrm{T} \varepsilon \lambda \lambda$ $\mathrm{H} \nu \mu$ ) Jesus was in a large town, one of the centres of Galilean political and commercial life, a fishing mart, where many Gentiles came. Here the message of the kingdom would have a better chance than in Jerusalem with its ecclesiastical prejudices or in Nazareth with its local jealousies. So Jesus "made his home" (катผเкךбєv) here.

Matt 4:16
Saw a great light ( $\varphi \omega \varsigma \varepsilon \varepsilon \delta \varepsilon \nu \mu \varepsilon \gamma \alpha$ ). Matthew quotes Isa 9:1f., and applies the words about the deliverer from Assyria to the Messiah. "The same district lay in spiritual darkness and death and the new era dawned when Christ went thither" (McNeile). Light sprang up from those who were sitting in the region and shadow of death ( $\varepsilon v \chi о \rho \alpha \kappa \alpha \sigma \kappa ı \alpha$ Өavaтov). Death is personified.

Matt 4:17
Began Jesus to preach ( $\eta \rho \xi \alpha \tau о$ o In $\sigma o v \varsigma \kappa \eta \rho v \sigma \sigma \varepsilon \iota v$ ). In Galilee. He had been preaching for over a year already elsewhere. His message carries on the words of the Baptist about "repentance" and the "kingdom of heaven" (Mt 3:2) being at hand. The same word for "preaching" (кŋ $\rho \cup \sigma \sigma \varepsilon \iota v)$ from к $\rho \rho \vartheta \xi$, herald, is used of Jesus as of John. Both proclaimed the good news of the kingdom. Jesus is more usually described as the Teacher, (o $\delta t \delta a \sigma \kappa \alpha \lambda o \varsigma)$ who taught ( $\varepsilon \delta เ \delta \alpha \sigma \kappa \varepsilon v)$ the people. He was both herald and teacher as every preacher should be.

## Matt 4:18

Casting a net into the sea ( $\beta \alpha \lambda \lambda \alpha \nu \tau \alpha \varsigma \alpha \mu \varphi \iota \beta \lambda \eta \sigma \tau \rho \circ \nu \varepsilon \iota \varsigma \tau \eta \nu \theta \alpha \lambda \alpha \sigma \sigma \alpha v)$. The word here for net is a casting-net (compare $\alpha \mu \varphi\langle\beta \lambda \lambda \omega$ in $\operatorname{Mr} 1: 16$, casting on both sides). The net was thrown over the shoulder and spread into a circle $(\alpha \mu \varphi)$. In 4:20 and 4:21 another word occurs for nets ( $\delta \iota \kappa \tau \cup \alpha)$, a word used for nets of any kind. The large drag-( $\sigma \alpha \gamma \eta \nu \eta)$ appears in Mt 13:47.

Matt 4:19

Fishers of men ( $\alpha \lambda \varepsilon \varepsilon ı \varsigma \alpha v \theta \rho \omega \pi \omega v$ ). Andrew and Simon were fishers by trade. They had already become disciples of Jesus (Joh 1:35-42 ), but now they are called upon to leave their business and to follow Jesus in his travels and work. These two brothers promptly ( $\varepsilon v \theta \varepsilon \omega \varsigma$ ) accepted the call and challenge of Jesus.

Matt 4:21
Mending their nets (катартıॅочтац та $\delta ı \kappa \tau v \alpha \alpha \cup \tau \omega \nu$ ). These two brothers, James and John, were getting their nets ready for use. The verb ( $\kappa \alpha \tau \alpha \rho \tau \iota \zeta \omega)$ means to adjust, to articulate, to mend if needed (Lu 6:40; Ro 9:22; Ga 6:1). So they promptly left their boat and father and followed Jesus. They had also already become disciples of Jesus. Now there are four who follow him steadily.

Matt 4:23
Went about in all Galilee ( $\pi \varepsilon \rho \iota \eta \gamma \varepsilon v \varepsilon v$ o $\lambda \eta \tau \eta \Gamma \alpha \lambda \wedge \lambda \alpha ı \alpha)$. Literally Jesus "was going around (imperfect) in all Galilee." This is the first of the three tours of Galilee made by Jesus. This time he took the four fishermen whom he had just called to personal service. The second time he took the twelve. On the third he sent the twelve on ahead by twos and followed after them. He was teaching and preaching the gospel of the kingdom in the synagogues chiefly and on the roads and in the streets where Gentiles could hear.

Healing all manner of diseases and all manner of sickness ( $\theta \varepsilon \rho \alpha \pi \varepsilon v \omega v \pi \alpha \sigma \alpha v$ vooov $\kappa \alpha \pi \alpha \sigma \alpha \nu \mu \alpha \lambda \alpha \kappa ı \alpha)$. The occasional sickness is called $\mu \alpha \lambda \alpha \kappa ı \alpha v$, the chronic or serious disease vooov.

Matt 4:24
The report of him went forth into all Syria ( $\alpha \pi \eta \lambda \theta \varepsilon v \eta \alpha \kappa о \eta \alpha \tau \tau 0 \varepsilon \varepsilon \varsigma$ o $\lambda \eta \nu \tau \eta \nu$ $\Sigma \psi \rho ı \alpha v$ ). Rumour ( $\alpha к о \eta$ ) carries things almost like the wireless or radio. The Gentiles all over Syria to the north heard of what was going on in Galilee. The result was inevitable. Jesus had a moving hospital of patients from all over Galilee and Syria. " Those that were sick " ( $\tau 0 \cup \varsigma \kappa \alpha \kappa \omega \varsigma ~ \varepsilon \chi о v \tau \alpha \varsigma)$, literally "those who had it bad," cases that the doctors could not cure.
 "Held together" or "compressed" is the idea of the participle. The same word is used by Jesus in Lu 12:50 and by Paul in Php 1:23 and of the crowd pressing on Jesus (Lu 8:45). They brought these difficult and chronic cases (present tense of the participle here) to Jesus. Instead of "divers" say "various" (локкıдац) like fever, leprosy, blindness. The adjective means literally many colored or variegated like flowers, paintings, jaundice, etc. Some had "torments"
 for testing gold because pure gold rubbed on it left a peculiar mark. Then it was used for examination by torture. Sickness was often regarded as "torture." These diseases are further described "in a descending scale of violence" (McNeile) as "demoniacs, lunatics, and paralytics" as Moffatt puts it, "demoniacs, epileptics, paralytics" as Weymouth has it,

lunatics or "moon-struck" because the epileptic seizures supposedly followed the phases of the moon (Bruce) as shown also in Mt 17:15, paralytics (our very word). Our word "lunatic" is from the Latin luna (moon) and carries the same picture as the Greek $\sigma \varepsilon \lambda \eta \nu i \alpha \zeta_{o \mu \alpha}$ from $\sigma \varepsilon \lambda \eta \nu \eta$ (moon). These diseases are called "torments."

Matt 4:25
Great multitudes (ox $\lambda \frac{\pi}{} \pi \boldsymbol{\lambda} \lambda \mathrm{o}$ ). Note the plural, not just one crowd, but crowds and crowds. And from all parts of Palestine including Decapolis, the region of the Ten Greek Cities east of the Jordan. No political campaign was equal to this outpouring of the people to hear Jesus and to be healed by Jesus.

## Matthew 5

Matt 5:1
He went up into the mountain ( $\alpha v \varepsilon \beta \eta \varepsilon \iota \varsigma$ to opoc). Not "a" mountain as the Authorized Version has it. The Greek article is poorly handled in most English versions. We do not know what mountain it was. It was the one there where Jesus and the crowds were. "Delitzsch calls the Mount of Beatitudes the Sinai of the New Testament" (Vincent). He apparently went up to get in closer contact with the disciples, "seeing the multitudes." Luke (Lu 6:12) says that he went out into the mountain to pray, Mark (Mr 3:13) that he went up and called the twelve. All three purposes are true. Luke adds that after a whole night in prayer and after the choice of the twelve Jesus came down to a level place on the mountain and spoke to the multitudes from Judea to Phoenicia. The crowds are great in both Matthew and in Luke and include disciples and the other crowds. There is no real difficulty in considering the Sermon on the Mount in Matthew and the Sermon on the Plain in Luke as one and the same. See full discussion in my Harmony of the Gospels.

Matt 5:2
Taught them ( $\varepsilon \delta \delta \delta a \sigma \kappa \varepsilon v$ ). Inchoative imperfect, began to teach. He sat down on the mountain side as the Jewish rabbis did instead of standing. It was a most impressive scene as Jesus opened his mouth wide and spoke loud enough for the great throng to hear him. The newly chosen twelve apostles were there, "a great number of disciples and a great number of the people" (Lu 6:17).

Matt 5:3
Blessed ( $\mu \alpha \kappa \alpha \rho ь$ ). The English word "blessed" is more exactly represented by the Greek verbal $\varepsilon \cup \lambda о ү \eta \tau 0$ as in Lu 1:68 of God by Zacharias, or the perfect passive participle $\varepsilon \cup \lambda o ү \eta \mu \varepsilon v o s$ as in Lu 1:42 of Mary by Elizabeth and in Mt 21:9. Both forms come from $\varepsilon \cup \lambda о ү \varepsilon \omega$, to speak well of ( $\varepsilon v, \lambda о ү о \varsigma$ ). The Greek word here ( $\mu \alpha \kappa \alpha \rho ı$ ) is an adjective that means "happy" which in English etymology goes back to hap, chance, good-luck as seen in our words haply, hapless, happily, happiness. "Blessedness is, of course, an infinitely higher and better thing than mere happiness" (Weymouth). English has thus ennobled "blessed" to a higher rank than "happy." But "happy" is what Jesus said and the Braid Scots New Testament dares to say "Happy" each time here as does the Improved Edition of the American Bible Union Version. The Greek word is as old as Homer and Pindar and was used of the Greek gods and also of men, but largely of outward prosperity. Then it is applied to the dead who died in the Lord as in Re 14:13. Already in the Old Testament the Septuagint uses it of moral quality. "Shaking itself loose from all thoughts of outward good, it becomes the express symbol of a happiness identified with pure character. Behind it lies the clear cognition of $\sin$ as the fountain-head of all misery, and of holiness as the final and effectual cure for every woe. For knowledge as the basis of virtue, and therefore of happiness, it substitutes
faith and love" (Vincent). Jesus takes this word "happy" and puts it in this rich environment. "This is one of the words which have been transformed and ennobled by New Testament use; by association, as in the Beatitudes, with unusual conditions, accounted by the world miserable, or with rare and difficult" (Bruce). It is a pity that we have not kept the word "happy" to the high and holy plane where Jesus placed it. "If you know these things, happy
 seen and yet have believed" (Joh 20:29). And Paul applies this adjective to God, "according to the gospel of the glory of the happy ( $\mu \alpha \kappa \alpha \rho \circ$ ) God" (1Ti 1:11 . Cf. also Tit 2:13 ). The term "Beatitudes" (Latin beatus) comes close to the meaning of Christ here by $\mu \alpha \kappa \alpha \rho ı$. It will repay one to make a careful study of all the "beatitudes" in the New Testament where this word is employed. It occurs nine times here (3-11), though the beatitudes in verses 10 and 11 are very much alike. The copula is not expressed in either of these nine beatitudes. In each case a reason is given for the beatitude, "for" (ot), that shows the spiritual quality involved. Some of the phrases employed by Jesus here occur in the Psalms, some even in the Talmud (itself later than the New Testament, though of separate origin). That is of small moment. "The originality of Jesus lies in putting the due value on these thoughts, collecting them, and making them as prominent as the Ten Commandments. No greater service can be rendered to mankind than to rescue from obscurity neglected moral commonplaces " (Bruce). Jesus repeated his sayings many times as all great teachers and preachers do, but this sermon has unity, progress, and consummation. It does not contain all that Jesus taught by any means, but it stands out as the greatest single sermon of all time, in its penetration, pungency, and power.

The poor in spirit (o $\pi \tau \omega \chi \circ \tau \omega \pi v \varepsilon \nu \mu \alpha \tau$ ). Luke has only "the poor," but he means the same by it as this form in Matthew, "the pious in Israel, for the most part poor, whom the worldly rich despised and persecuted" (McNeile). The word used here ( $\pi \tau \omega \chi 0$ ) is applied to the beggar Lazarus in Lu 16:20,22 and suggests spiritual destitution (from $\pi \tau \omega \sigma \sigma \omega$ to crouch, to cower). The other word $\pi \varepsilon v \eta \varsigma$ is from $\pi \varepsilon v o \mu \alpha$, to work for one's daily bread and so means one who works for his living. The word $\pi \tau \omega \chi \circ \varsigma$ is more frequent in the New Testament and implies deeper poverty than $\pi \varepsilon v \eta \varsigma$. "The kingdom of heaven" here means the reign of God in the heart and life. This is the summит bonum and is what matters most.

Matt 5:4
They that mourn (o $\pi \varepsilon v \theta$ ouvt\&¢). This is another paradox. This verb "is most frequent in the LXX for mourning for the dead, and for the sorrows and sins of others" (McNeile). "There can be no comfort where there is no grief" (Bruce). Sorrow should make us look for the heart and hand of God and so find the comfort latent in the grief.

Matt 5:5
The meek (o $\pi \rho \alpha \varepsilon ı \varsigma) . ~ W y c l i f f ~ h a s ~ i t ~ " B l e s s e d ~ b e ~ m i l d ~ m e n . " ~ T h e ~ a n c i e n t s ~ u s e d ~ t h e ~ w o r d ~$ for outward conduct and towards men. They did not rank it as a virtue anyhow. It was a
mild equanimity that was sometimes negative and sometimes positively kind. But Jesus lifted the word to a nobility never attained before. In fact, the Beatitudes assume a new heart, for the natural man does not find in happiness the qualities mentioned here by Christ. The English word "meek" has largely lost the fine blend of spiritual poise and strength meant by the Master. He calls himself "meek and lowly in heart" (Mt 11:29) and Moses is also called meek. It is the gentleness of strength, not mere effeminacy. By "the earth" ( $\tau \eta \nu \eta \eta$ ) Jesus seems to mean the Land of Promise (Ps 37:11) though Bruce thinks that it is the whole earth. Can it be the solid earth as opposed to the sea or the air?

Matt 5:6
They that hunger and thirst after righteousness (о $\pi \varepsilon เ \nu \omega v \tau \varepsilon \varsigma ~ к \alpha ~ \delta ı \psi \omega v \tau \varepsilon \varsigma \tau \eta \nu$ $\delta ı \kappa \alpha \circ \sigma v v \eta \nu)$. Here Jesus turns one of the elemental human instincts to spiritual use. There is in all men hunger for food, for love, for God. It is passionate hunger and thirst for goodness, for holiness. The word for "filled" ( $\chi$ ортаб $\dagger \eta \sigma 0 \nu \tau \alpha$ ) means to feed or to fatten cattle from the word for fodder or grass like Mr 6:39 "green grass" ( $\chi$ ортоऽ $\chi \lambda \omega \rho \circ \varsigma)$.

Matt 5:7
Obtain mercy ( $\varepsilon \lambda \varepsilon \eta \theta \eta \sigma o v \tau \alpha)$ "Sal win pitie theirsels" (Braid Scots). "A self-acting law of the moral world" (Bruce).

Matt 5:8
Shall see God ( $\operatorname{\tau ov} \theta$ عov oчovid). Without holiness no man will see the Lord in heaven (Heb 12:14 ). The Beatific Vision is only possible here on earth to those with pure hearts. No other can see the King now. Sin befogs and beclouds the heart so that one cannot see God. Purity has here its widest sense and includes everything.

## Matt 5:9

The peacemakers (о вєр up o' strife" (Braid Scots). It is hard enough to keep the peace. It is still more difficult to bring peace where it is not. "The perfect peacemaker is the Son of God (Eph 2:14f.)" (McNeile). Thus we shall be like our Elder Brother.

Matt 5:10
That have been persecuted for righteousness' sake (о $\delta \varepsilon \delta \omega\rceil \mu \varepsilon v o ~ \varepsilon v \varepsilon \kappa \varepsilon v ~ \delta ı к \alpha ı \sigma \nu v \eta \varsigma) . ~$ Posing as persecuted is a favourite stunt. The kingdom of heaven belongs only to those who suffer for the sake of goodness, not who are guilty of wrong.

Matt 5:11
Falsely, for my sake ( $\psi \varepsilon v \delta o \mu \varepsilon v o$ evek $\varepsilon v \varepsilon \mu \circ v$ ). Codex Bezae changes the order of these last Beatitudes, but that is immaterial. What does matter is that the bad things said of Christ's followers shall be untrue and that they are slandered for Christ's sake. Both things must be true before one can wear a martyr's crown and receive the great reward ( $\mu \sigma \theta \circ \varsigma)$ in heaven. No prize awaits one there who deserves all the evil said of him and done to him here.

Matt 5:13

Lost its savour ( $\mu \omega \rho \alpha v \theta \eta$ ). The verb is from $\mu \omega \rho \circ \varsigma$ (dull, sluggish, stupid, foolish) and means to play the fool, to become foolish, of salt become tasteless, insipid (Mr 9:50). It is common in Syria and Palestine to see salt scattered in piles on the ground because it has lost its flavour, "hae tint its tang" (Braid Scots), the most worthless thing imaginable. Jesus may have used here a current proverb.

Matt 5:15
Under the bushel (v $\pi \frac{\tau}{} \tau \boldsymbol{v} \mu \mathrm{o} \delta \iota v$ ). Not a bushel. "The figure is taken from lowly cottage life. There was a projecting stone in the wall on which the lamp was set. The house consisted of a single room, so that the tiny light sufficed for all" (Bruce). It was not put under the bushel (the only one in the room) save to put it out or to hide it. The bushel was an earthenware grain measure. " The stand " ( $\tau \eta \nu \lambda \nu \chi \nu \iota \alpha \nu$ ), not "candlestick." It is "lamp-stand" in each of the twelve examples in the Bible. There was the one lamp-stand for the single room.

Matt 5:16
Even so $(o v \tau \omega \varsigma)$. The adverb points backward to the lamp-stand. Thus men are to let their light shine, not to glorify themselves, but "your Father in heaven." Light shines to see others by, not to call attention to itself.

Matt 5:17
I came not to destroy, but to fulfil (ovк $\eta \lambda \theta$ ov $\kappa \alpha \tau \alpha \lambda v \sigma \alpha \alpha \lambda \lambda \alpha \pi \lambda \eta \rho \omega \sigma \alpha$ ). The verb "destroy" means to "loosen down" as of a house or tent (2Co 5:1). Fulfil is to fill full. This Jesus did to the ceremonial law which pointed to him and the moral law he kept. "He came to fill the law, to reveal the full depth of meaning that it was intended to hold" (McNeile).

Matt 5:18
One jot or one tittle ( $\iota \omega \tau \alpha \varepsilon \nu \eta \mu \iota \alpha \kappa \varepsilon \rho \varepsilon \alpha$ ). "Not an iota, not a comma" (Moffatt), "not the smallest letter, not a particle" (Weymouth). The iota is the smallest Greek vowel, which Matthew here uses to represent the Hebrew yod (jot), the smallest Hebrew letter. "Tittle" is from the Latin titulus which came to mean the stroke above an abbreviated word, then any small mark. It is not certain here whether кєрєа means a little horn, the mere point which distinguishes some Hebrew letters from others or the "hook" letter Vav. Sometimes yod and $v a v$ were hardly distinguishable. "In Vay. R. 19 the guilt of altering one of them is pronounced so great that if it were done the world would be destroyed" (McNeile).

Matt 5:19
 teacher must apply the doctrine to himself before he is qualified to teach others. The scribes and Pharisees were men who "say and do not" (Mt 23:3), who preach but do not perform. This is Christ's test of greatness.

Matt 5:20
Shall exceed ( $\pi \varepsilon \rho\llcorner\sigma \sigma \varepsilon v \sigma \eta \pi \lambda \varepsilon \iota \sigma v$ ). Overflow like a river out of its banks and then Jesus adds "more" followed by an unexpressed ablative ( $\tau \eta \varsigma \delta \iota \kappa \propto \circ \sigma \cup \nu \eta \varsigma)$, brachylogy. A daring
statement on Christ's part that they had to be better than the rabbis. They must excel the scribes, the small number of regular teachers (5:21-48), and the Pharisees in the Pharisaic life ( $6: 1-18$ ) who were the separated ones, the orthodox pietists.

Matt 5:22
But I say unto you ( $\varepsilon \gamma \omega \delta \varepsilon \lambda \varepsilon \gamma \omega v \mu v)$. Jesus thus assumes a tone of superiority over the Mosaic regulations and proves it in each of the six examples. He goes further than the Law into the very heart. " Raca " (Рака) and " Thou fool " ( $\mathrm{M} \omega \rho \varepsilon$ ). The first is probably an Aramaic word meaning "Empty," a frequent word for contempt. The second word is Greek (dull, stupid) and is a fair equivalent of "raca." It is urged by some that $\mu \omega \rho \varepsilon$ is a Hebrew word, but Field (Otium Norvicense) objects to that idea. "Raca expresses contempt for a man's head=you stupid! More expresses contempt for his heart and character=you scoundrel" (Bruce). " The hell of fire " ( $\tau \eta \nu \gamma \varepsilon \varepsilon \nu \nu a \nu \tau 0 v \pi \nu \rho \circ \varsigma)$, "the Gehenna of fire," the genitive case ( $\tau 0 \cup \pi \cup \rho \circ \varsigma$ ) as the genus case describing Gehenna as marked by fire. Gehenna is the Valley of Hinnom where the fire burned continually. Here idolatrous Jews once offered their children to Molech (2Ki 23:10). Jesus finds one cause of murder to be abusive language. Gehenna "should be carefully distinguished from Hades ( $\alpha, \delta \eta \varsigma$ ) which is never used for the place of punishment, but for the place of departed spirits, without reference to their moral condition" (Vincent). The place of torment is in Hades (Lu 16:23 ), but so is heaven.

Matt 5:24
First be reconciled $(\pi \rho \omega \tau o v \delta \iota \alpha \lambda \lambda \alpha \gamma \eta \theta)$. Second aorist passive imperative. Get reconciled (ingressive aorist, take the initiative). Only example of this compound in the New Testament where usually ката入入 $\alpha \sigma \sigma \omega$ occurs. Deissmann (Light from the Ancient East, p. 187, New Ed.) gives a papyrus example second century A.D. A prodigal son, Longinus, writes to his mother Nilus: "I beseech thee, mother, be reconciled ( $\delta \iota \alpha \lambda \gamma \eta \tau$ ) with me." The boy is a poor speller, but with a broken heart he uses the identical form that Jesus does. "The verb denotes mutual concession after mutual hostility, an idea absent from $\kappa \alpha \tau \alpha \lambda \lambda \alpha \sigma \sigma \omega^{\prime \prime}$ (Lightfoot). This because of $\delta \mathrm{ta}$ (two, between two).

Matt 5:25
Agree with ( $\llcorner\sigma \theta \varepsilon v v o \omega v$ ). A present periphrastic active imperative. The verb is from عuvoos (friendly, kindly disposed). "Mak up wi' yere enemy" (Braid Scots). Compromise is better than prison where no principle is involved, but only personal interest. It is so easy to see principle where pride is involved.

The officer ( $\tau \omega v \pi \eta \rho \varepsilon \tau \eta$ ). This word means "under rower" on the ship with several ranks of rowers, the bottom rower (v $\tau \boldsymbol{o}$ under and $\eta \rho \varepsilon \sigma \sigma \omega$, to row), the galley-slave, then any servant, the attendant in the synagogue ( $\mathrm{Lu} 4: 20$ ). Luke so describes John Mark in his relation to Barnabas and Saul (Ac 13:5 ). Then it is applied to the "ministers of the word" (Lu 1:2).

Matt 5:26

The last farthing ( $\tau 0 v \varepsilon \sigma \chi \alpha \tau 0 v$ кoठ $\rho \alpha v \tau \eta v$ ). A Latin word, quadrans, $1 / 4$ of an as_ (aбoapıov) or two mites (Mr 12:42), a vivid picture of inevitable punishment for debt. This is emphasized by the strong double negative ov $\mu \eta$ with the aorist subjunctive.

Matt 5:27
Thou shalt not commit adultery (ov $\mu$ огхعטбєı¢). These quotations (verses 21,27,33 ) from the Decalogue (Ex 20 and De 5 ) are from the Septuagint and use ov and the future indicative (volitive future, common Greek idiom). In 5:43 the positive form, volitive future, occurs ( $\alpha \gamma \alpha \pi \eta \sigma \varepsilon \iota \varsigma)$. In 5:41 the third person ( $(0 \tau \omega)$ singular second aorist active imperative is used. In 5:38 no verb occurs.

Matt 5:28
In his heart ( $\varepsilon v \tau \eta \kappa \alpha \rho \delta \iota \alpha$ av $\tau \circ$ ). Not just the centre of the blood circulation though it means that. Not just the emotional part of man's nature, but here the inner man including the intellect, the affections, the will. This word is exceedingly common in the New Testament and repays careful study always. It is from a root that means to quiver or palpitate. Jesus locates adultery in the eye and heart before the outward act. Wunsche (Beitrage) quotes two pertinent rabbinical sayings as translated by Bruce: "The eye and the heart are the two brokers of sin." "Passions lodge only in him who sees." Hence the peril of lewd pictures and plays to the pure.

Matt 5:29
Causeth thee to stumble ( $\sigma \kappa \alpha v \delta \alpha \lambda_{\iota}(\varepsilon \sigma \varepsilon)$. This is far better than the Authorized Version "Offend thee." Braid Scots has it rightly "ensnare ye." It is not the notion of giving offence or provoking, but of setting a trap or snare for one. The substantive ( $\sigma \kappa \alpha v \delta \alpha \lambda o v$, from $\sigma \kappa \alpha v \delta \alpha \lambda \eta \theta \rho o v)$ means the stick in the trap that springs and closes the trap when the animal touches it. Pluck out the eye when it is a snare, cut off the hand, even the right hand. These vivid pictures are not to be taken literally, but powerfully plead for self-mastery. Bengel says: Non oculum, sed scandalizentem oculum. It is not mutilating of the body that Christ enjoins, but control of the body against sin. The man who plays with fire will get burnt. Modern surgery finely illustrates the teaching of Jesus. The tonsils, the teeth, the appendix, to go no further, if left diseased, will destroy the whole body. Cut them out in time and the life will be saved. Vincent notes that "the words scandal and slander are both derived from $\sigma \kappa \alpha v \delta a \lambda o v$. And Wyc. renders, 'if thy right eye slander thee.'" Certainly slander is a scandal and a stumbling-block, a trap, and a snare.

Matt 5:31
A writing of divorcement ( $\alpha \pi \sigma \sigma \tau \alpha \sigma \circ v$ ), "a divorce certificate" (Moffatt), "a written notice of divorce" (Weymouth). The Greek is an abbreviation of $\beta \iota \beta \lambda \iota \rho$ a $\quad$ обтабьov (Ma
 commercial transactions as "a bond of release" (see Moulton and Milligan's Vocabulary,
etc.) The written notice ( $\beta \iota \beta \lambda_{\iota} \circ$ ) was a protection to the wife against an angry whim of the husband who might send her away with no paper to show for it.

Matt 5:32
Saving for the cause of fornication ( $\pi \alpha \rho \varepsilon к \tau о \varsigma ~ \lambda о ү о и ~ \pi о \rho v \varepsilon ı \varsigma) . ~ A n ~ u n u s u a l ~ p h r a s e ~$ that perhaps means "except for a matter of unchastity." "Except on the ground of unchastity" (Weymouth), "except unfaithfulness" (Goodspeed), and is equivalent to $\mu \eta \varepsilon \pi \pi о \rho v \varepsilon \iota \alpha$ in Mt 19:9. McNeile denies that Jesus made this exception because Mark and Luke do not give it. He claims that the early Christians made the exception to meet a pressing need, but one fails to see the force of this charge against Matthew's report of the words of Jesus. It looks like criticism to meet modern needs.

Matt 5:34
Swear not at all ( $\mu \eta \mathrm{o} \mu \circ \sigma \alpha \mathrm{o} \lambda \omega \varsigma$ ). More exactly "not to swear at all" (indirect command, and aorist infinitive). Certainly Jesus does not prohibit oaths in a court of justice for he himself answered Caiaphas on oath. Paul made solemn appeals to God (1Th 5:27; 1Co 15:31 ). Jesus prohibits all forms of profanity. The Jews were past-masters in the art of splitting hairs about allowable and forbidden oaths or forms of profanity just as modern Christians employ a great variety of vernacular "cuss-words" and excuse themselves because they do not use the more flagrant forms.

## Matt 5:38

An eye for an eye, and a tooth for a tooth ( $o \varphi \theta \alpha \lambda \mu \sigma \nu \alpha v \tau ~ o \varphi \theta \alpha \lambda \mu \sigma v \kappa \alpha ~ o \delta o v \tau \alpha \alpha \nu \tau$ oסovtoc). Note $\alpha v \tau$ with the notion of exchange or substitution. The quotation is from Ex 21:24; De 19:21; Le 24:20. Like divorce this jus talionis is a restriction upon unrestrained vengeance. "It limited revenge by fixing an exact compensation for an injury" (McNeile). A money payment is allowed in the Mishna. The law of retaliation exists in Arabia today.

Matt 5:39
Resist not him that is evil ( $\mu \varepsilon \alpha v \tau \iota \sigma \tau \eta \nu \alpha \tau \omega \pi о \nu \eta \rho \omega$ ). Here again it is the infinitive (second aorist active) in indirect command. But is it "the evil man" or the "evil deed"? The dative case is the same form for masculine and neuter. Weymouth puts it "not to resist a (the) wicked man," Moffatt "not to resist an injury," Goodspeed "not to resist injury." The examples will go with either view. Jesus protested when smitten on the cheek (Joh 18:22). And Jesus denounced the Pharisees (Mt 23 ) and fought the devil always. The language of Jesus is bold and picturesque and is not to be pressed too literally. Paradoxes startle and make us think. We are expected to fill in the other side of the picture. One thing certainly is meant by Jesus and that is that personal revenge is taken out of our hands, and that applies to "lynch-law." Aggressive or offensive war by nations is also condemned, but not necessarily defensive war or defence against robbery and murder. Professional pacifism may be mere cowardice.

Matt 5:40
 shirt or undergarment and would be demanded at law. A robber would seize first the outer garment or cloke (one coat). If one loses the undergarment at law, the outer one goes also (the more valuable one).

Matt 5:41
Shall compel thee ( $\alpha \gamma \gamma \alpha \rho \varepsilon \cup \sigma \varepsilon$ ). The Vulgate has angariaverit. The word is of Persian origin and means public couriers or mounted messengers ( $\alpha \gamma \gamma \alpha \rho o$ ) who were stationed by the King of Persia at fixed localities, with horses ready for use, to send royal messages from one to another. So if a man is passing such a post-station, an official may rush out and compel him to go back to another station to do an errand for the king. This was called impressment into service. This very thing was done to Simon of Cyrene who was thus compelled to carry the cross of Christ (Mt 27:32, $\eta \gamma \gamma \alpha \rho \varepsilon v \sigma \alpha v)$.

Matt 5:42
Turn not thou away ( $\mu \eta$ а $\pi о \sigma \tau \rho \alpha \varphi \eta ı$ ). Second aorist passive subjunctive in prohibition. "This is one of the clearest instances of the necessity of accepting the spirit and not the letter of the Lord's commands (see vv. $32,34,38$ ). Not only does indiscriminate almsgiving do little but injury to society, but the words must embrace far more than almsgiving" (McNeile). Recall again that Jesus is a popular teacher and expects men to understand his paradoxes. In the organized charities of modern life we are in danger of letting the milk of human kindness dry up.

Matt 5:43
And hate thine enemy ( $\kappa \alpha \mu \sigma \eta \sigma \varepsilon \iota \varsigma)$. This phrase is not in Le 19:18, but is a rabbinical inference which Jesus repudiates bluntly. The Talmud says nothing of love to enemies. Paul in Ro 12:20 quotes $\operatorname{Pr}$ 25:22 to prove that we ought to treat our enemies kindly. Jesus taught us to pray for our enemies and did it himself even when he hung upon the cross. Our word "neighbour" is "nigh-bor," one who is nigh or near like the Greek word $\pi \lambda \eta \sigma$ orv here. But proximity often means strife and not love. Those who have adjoining farms or homes may be positively hostile in spirit. The Jews came to look on members of the same tribe as neighbours as even Jews everywhere. But they hated the Samaritans who were half Jews and lived between Judea and Galilee. Jesus taught men how to act as neighbours by the parable of the Good Samaritan (Lu 10:29ff. ).

Matt 5:48
Perfect ( $\tau \varepsilon \lambda \varepsilon \iota o$ ). The word comes from $\tau \varepsilon \lambda o c$, end, goal, limit. Here it is the goal set before us, the absolute standard of our Heavenly Father. The word is used also for relative perfection as of adults compared with children.

## Matthew 6

Matt 6:1
Take heed ( $\pi \rho \circ \sigma \varepsilon \chi \varepsilon \tau \varepsilon)$. The Greek idiom includes "mind" (vouv) which is often expressed in ancient Greek and once in the Septuagint (Job 7:17). In the New Testament the substantive vouc is understood. It means to "hold the mind on a matter," take pains, take heed. "Righteousness" ( $\delta$ ıкаıoбuvŋ $v$ ) is the correct text in this verse. Three specimens of the Pharisaic "righteousness" are given (alms, prayer, fasting).

To be seen $(\theta \varepsilon \alpha \theta \eta \nu \alpha)$. First aorist passive infinitive of purpose. Our word theatrical is this very word, spectacular performance.

With your Father ( $\pi \alpha \rho \alpha \tau \omega \pi \alpha \tau \rho \nu \mu \omega v$ ). Literally "beside your Father," standing by his side, as he looks at it.

Matt 6:2
Sound not a trumpet ( $\mu \eta \sigma \alpha \lambda \pi \iota \sigma \eta \iota \varsigma)$. Is this literal or metaphorical? No actual instance of such conduct has been found in the Jewish writings. McNeile suggests that it may refer to the blowing of trumpets in the streets on the occasion of public fasts. Vincent suggests the thirteen trumpet-shaped chests of the temple treasury to receive contributions (Lu 21:2 ). But at Winona Lake one summer a missionary from India named Levering stated to me that he had seen Hindu priests do precisely this very thing to get a crowd to see their beneficences. So it looks as if the rabbis could do it also. Certainly it was in keeping with their love of praise. And Jesus expressly says that "the hypocrites" (о vтокрıта) do this very thing. This is an old word for actor, interpreter, one who personates another, from vлокрıvона to answer in reply like the Attic aлокрıvo $\mu \alpha$. Then to pretend, to feign, to dissemble, to act the hypocrite, to wear a mask. This is the hardest word that Jesus has for any class of people and he employs it for these pious pretenders who pose as perfect.

They have received their reward ( $\alpha \pi \varepsilon \chi \circ v \sigma \iota \nu$ tov $\mu \iota \sigma \theta \circ \nu \alpha \nu \tau \omega v$ ). This verb is common in the papyri for receiving a receipt, "they have their receipt in full," all the reward that they will get, this public notoriety. "They can sign the receipt of their reward" (Deissmann, Bible Studies, p. 229). So Light from the Ancient East, pp. 110f. Arox $\eta$ means "receipt." So also in 6:5.

Matt 6:4
In secret ( $\tau \omega \kappa \rho v \pi \tau \omega$ ). The Textus Receptus added the words $\varepsilon v \tau \omega \varphi a v \varepsilon \rho \omega$ (openly) here and in 6:6, but they are not genuine. Jesus does not promise a public reward for private piety.

Matt 6:5
In the synagogues and in the corners of the streets ( $\varepsilon v \tau \alpha \iota \varsigma ~ \sigma v v \alpha \gamma \omega \gamma \alpha \iota \varsigma \kappa \alpha \varepsilon \nu \tau \alpha \longleftarrow \varsigma$ $\gamma \omega \nu$ Laıs $\tau \omega v \pi \lambda \alpha \tau \varepsilon \epsilon \omega v$ ). These were the usual places of prayer (synagogues) and the street corners where crowds stopped for business or talk. If the hour of prayer overtook a Pharisee
here, he would strike his attitude of prayer like a modern Moslem that men might see that he was pious.

Matt 6:6
Into thy closet ( $\varepsilon \varsigma \varsigma ~ \tau о ~ \tau \alpha \mu \varepsilon เ ๐ v) . ~ T h e ~ w o r d ~ i s ~ a ~ l a t e ~ s y n c o p a t e d ~ f o r m ~ o f ~ \tau \alpha \mu \varepsilon є ю o v ~ f r o m ~$ $\tau \alpha \mu \alpha \varsigma$ (steward) and the root $\tau \alpha \mu$ - from $\tau \varepsilon \mu \nu \omega$, to cut. So it is a store-house, a separate apartment, one's private chamber, closet, or "den" where he can withdraw from the world and shut the world out and commune with God.

Matt 6:7
Use not vain repetitions ( $\mu \eta \beta \alpha \tau \tau \alpha \lambda o \gamma \eta \sigma \eta \tau \varepsilon$ ). Used of stammerers who repeat the words, then mere babbling or chattering, empty repetition. The etymology is uncertain, but it is probably onomatopoetic like "babble." The worshippers of Baal on Mount Carmel ( 1 Ki 8:26) and of Diana in the amphitheatre at Ephesus who yelled for two hours (Ac 19:34) are examples. The Mohammedans may also be cited who seem to think that they "will be heard for their much speaking" ( $\varepsilon v \tau \eta \pi o \lambda \nu \lambda o \gamma ı$ ). Vincent adds "and the Romanists with their paternosters and avast." The Syriac Sinaitic has it: "Do not be saying idle things." Certainly Jesus does not mean to condemn all repetition in prayer since he himself prayed three times in Gethsemane "saying the same words again" (Mt 26:44). "As the Gentiles do," says Jesus. "The Pagans thought that by endless repetitions and many words they would inform their gods as to their needs and weary them ('fatigare deos') into granting their requests" (Bruce).

## Matt 6:9

After this manner therefore pray ye (ovt $\omega \varsigma$ ouv $\pi \rho \circ \sigma \varepsilon u \chi \varepsilon \sigma \theta \varepsilon \nu \mu \varepsilon ı \varsigma)$. "You" expressed in contrast with "the Gentiles." It should be called "The Model Prayer" rather than "The Lord's Prayer." "Thus" pray as he gives them a model. He himself did not use it as a liturgy (cf. Joh 17 ). There is no evidence that Jesus meant it for liturgical use by others. In Lu 11:2-4 practically the same prayer though briefer is given at a later time by Jesus to the apostles in response to a request that he teach them how to pray. McNeile argues that the form in Luke is the original to which Matthew has made additions: "The tendency of liturgical formulas is towards enrichment rather than abbreviation." But there is no evidence whatever that Jesus designed it as a set formula. There is no real harm in a liturgical formula if one likes it, but no one sticks to just one formula in prayer. There is good and not harm in children learning and saying this noble prayer. Some people are disturbed over the words "Our Father" and say that no one has a right to call God Father who has not been "born again." But that is to say that an unconverted sinner cannot pray until he is converted, an absurd contradiction. God is the Father of all men in one sense; the recognition of Him as the Father in the full sense is the first step in coming back to him in regeneration and conversion.

Hallowed be thy name ( $\alpha \gamma \boldsymbol{\omega} \sigma \theta \eta \tau \omega$ тo ovo $\alpha \alpha$ $\sigma o v$ ). In the Greek the verb comes first as in the petitions in verse 10 . They are all aorist imperatives, punctiliar action expressing urgency.

Matt 6:11
Our daily bread ( $\tau \circ \vee$ aptov $\eta \mu \omega \nu$ tov $\varepsilon \pi \iota \circ \sigma \sigma \circ v$ ). This adjective "daily" ( $\varepsilon \pi \iota \circ \sigma \sigma \iota v$ ) coming after "Give us this day" ( $\delta o \varsigma ~ \eta \mu \nu \nu \quad \sigma \mu \varepsilon \rho \circ v$ ) has given expositors a great deal of trouble. The effort has been made to derive it from $\varepsilon \pi$ and $\omega v$ (ovo $\alpha$ ). It clearly comes from $\varepsilon \pi$ and $\iota \omega \nu(\varepsilon \pi$ and $\varepsilon \mu)$ like $\tau \eta \varepsilon \pi \iota o v \sigma \eta$ ("on the coming day," "the next day," Ac 16:12 ). But the adjective $\varepsilon \pi \iota o v \sigma \iota o \varsigma$ is rare and Origen said it was made by the Evangelists Matthew and Luke to reproduce the idea of an Aramaic original. Moulton and Milligan, Vocabulary say: "The papyri have as yet shed no clear light upon this difficult word (Mt 6:11; Lu 11:3), which was in all probability a new coinage by the author of the Greek Q to render his Aramaic Original" (this in 1919). Deissmann claims that only about fifty purely New Testament or "Christian" words can be admitted out of the more than 5,000 used. "But when a word is not recognizable at sight as a Jewish or Christian new formation, we must consider it as an ordinary Greek word until the contrary is proved. Erıovotoc has all the appearance of a word that originated in trade and traffic of the everyday life of the people (cf. my hints in Neutestamentliche Studien Georg Heinrici dargebracht, Leipzig, 1914, pp. 118f.). The opinion here expressed has been confirmed by A. Debrunner's discovery (Theol. Lit. Ztg. 1925, Col. 119) of $\varepsilon \pi \ldots 0 \sigma \omega \circ$ in an ancient housekeeping book" (Light from the Ancient East, New ed. 1927, p. 78 and note 1). So then it is not a word coined by the Evangelist or by Q to express an Aramaic original. The word occurs also in three late MSS. after 2Macc. 1:8, тouৎ $\varepsilon \pi$ пıvбıovs after tov $\alpha \rho \tau$ тovc. The meaning, in view of the kindred participle ( $\varepsilon \pi \iota \circ \cup \sigma \eta$ ) in Ac 16:12, seems to be "for the coming day," a daily prayer for the needs of the next day as every housekeeper understands like the housekeeping book discovered by Debrunner.

Matt 6:12
Our debts ( $\tau \alpha$ о $\varphi \varepsilon ı \eta \mu \alpha \tau \alpha \eta \mu \omega v$ ). Luke (Lu 11:4) has "sins" ( $\alpha \mu \alpha \rho \tau ı \alpha \varsigma)$. In the ancient Greek очєi入 $\eta \mu \alpha$ is common for actual legal debts as in Ro 4:4 , but here it is used of moral and spiritual debts to God. "Trespasses" is a mistranslation made common by the Church of England Prayer Book. It is correct in verse 14 in Christ's argument about prayer, but it is not in the Model Prayer itself. See Mt 18:28,30 for sin pictured again by Christ "as debt and the sinner as a debtor" (Vincent). We are thus described as having wronged God. The word очєi $\lambda \eta$ for moral obligation was once supposed to be peculiar to the New Testament. But it is common in that sense in the papyri (Deismann, Bible Studies, p. 221; Light from the Ancient East, New ed., p. 331). We ask forgiveness "in proportion as" ( $\omega \varsigma$ ) we also have forgiven those in debt to us, a most solemn reflection. A $\uparrow \uparrow \kappa \alpha \mu \varepsilon v$ is one of the three $k$ aorists ( $\varepsilon \theta \eta \kappa \alpha, \varepsilon \delta \omega \kappa \alpha, \eta \kappa \alpha)$. It means to send away, to dismiss, to wipe off.

Matt 6:13

And bring us not into temptation ( $\kappa \alpha \mu \eta \varepsilon є \sigma \varepsilon v \varepsilon \gamma \kappa \eta \iota \varsigma ~ \varepsilon \iota \varsigma ~ \pi \varepsilon \iota \rho a \sigma \mu о v)$ ) "Bring" or "lead" bothers many people. It seems to present God as an active agent in subjecting us to temptation, a thing specifically denied in Jas 1:13. The word here translated "temptation" ( $\pi \varepsilon \iota \rho a \sigma \mu \mathrm{ov}$ ) means originally "trial" or "test" as in Jas 1:2 and Vincent so takes it here. Braid Scots has it: "And lat us no be siftit." But God does test or sift us, though he does not tempt us to evil. No one understood temptation so well as Jesus for the devil tempted him by every avenue of approach to all kinds of $\sin$, but without success. In the Garden of Gethsemane Jesus will say to Peter, James, and John: "Pray that ye enter not into temptation" (Lu 22:40 ). That is the idea here. Here we have a "Permissive imperative" as grammarians term it. The idea is then: "Do not allow us to be led into temptation." There is a way out (1Co 10:13), but it is a terrible risk.

From the evil one ( $\alpha \pi \sigma$ tov $\pi$ ovnpov). The ablative case in the Greek obscures the gender. We have no way of knowing whether it is o $\pi \mathbf{~}$ (the evil thing). And if it is masculine and so o $\pi$ ovnpos, it can either refer to the devil as the Evil One par excellence or the evil man whoever he may be who seeks to do us ill. The word $\pi 0 v \eta \rho o \varsigma$ has a curious history coming from $\pi 0 v o \varsigma$ (toil) and $\pi 0 v \varepsilon \omega$ (to work). It reflects the idea either that work is bad or that this particular work is bad and so the bad idea drives out the good in work or toil, an example of human depravity surely.

The Doxology is placed in the margin of the Revised Version. It is wanting in the oldest and best Greek manuscripts. The earliest forms vary very much, some shorter, some longer than the one in the Authorized Version. The use of a doxology arose when this prayer began to be used as a liturgy to be recited or to be chanted in public worship. It was not an original part of the Model Prayer as given by Jesus.

Matt 6:14
Trespasses ( $\pi \alpha \rho \alpha \pi \tau \omega \mu \alpha \tau \alpha)$. This is no part of the Model Prayer. The word "trespass" is literally "falling to one side," a lapse or deviation from truth or uprightness. The ancients sometimes used it of intentional falling or attack upon one's enemy, but "slip" or "fault" (Ga 6:1) is the common New Testament idea. Параßабıৎ (Ro 5:14) is a positive violation, a transgression, conscious stepping aside or across.

Matt 6:16
Of a sad countenance ( $\sigma \kappa \nu \theta \rho \omega \pi$ ). Only here and $\mathrm{Lu} 24: 17$ in the N.T. It is a compound of $\sigma \kappa \cup \theta \rho \circ \varsigma$ (sullen) and oпऽ (countenance). These actors or hypocrites "put on a gloomy look" (Goodspeed) and, if necessary, even "disfigure their faces" ( $\alpha \varphi \alpha \nu \iota \zeta$ оvoıv $\tau \alpha \pi \rho о \sigma \omega \pi \alpha$ $\alpha v \tau \omega v)$, that they may look like they are fasting. It is this pretence of piety that Jesus so sharply ridicules. There is a play on the Greek words $\alpha \varphi \alpha v \iota$ ovo (disfigure) and $\varphi \alpha v \omega \sigma \iota v$ (figure). They conceal their real looks that they may seem to be fasting, conscious and pretentious hypocrisy.

Matt 6:18

In secret ( $\varepsilon v \tau \omega$ к $\rho \cup \varphi a 1 \omega$ ). Here as in 6:4,6 the Textus Receptus adds $\varepsilon v \tau \omega$ $\varphi \alpha v \varepsilon \rho \omega$ (openly), but it is not genuine. The word кричaıoс is here alone in the New Testament, but occurs four times in the Septuagint.

Matt 6:19
Lay not up for yourselves treasures ( $\mu \eta \theta \eta \sigma \alpha v \rho \iota \zeta \varepsilon \tau \varepsilon \nu \mu \nu \nu \theta \eta \sigma \alpha \cup \rho o v \varsigma)$ ). Do not have this habit ( $\mu \eta$ and the present imperative). See on Mt 2:11 for the word "treasure." Here there is a play on the word, "treasure not for yourselves treasures." Same play in verse 20 with the cognate accusative. In both verses $v \mu \nu v$ is dative of personal interest and is not reflexive, but the ordinary personal pronoun. Wycliff has it: "Do not treasure to you treasures."

Break through ( $\delta$ ıopvoбovovv). Literally "dig through." Easy to do through the mud walls or sun-dried bricks. Today they can pierce steel safes that are no longer safe even if a foot thick. The Greeks called a burglar a "mud-digger" (тохооихос).

Matt 6:20
Rust ( $\beta \rho \omega \sigma \iota \varsigma)$. Something that "eats" ( $\beta \iota \beta \rho \omega \sigma \kappa \omega)$ or "gnaws" or "corrodes."
Matt 6:22
Single ( $\alpha \pi \lambda$ ous). Used of a marriage contract when the husband is to repay the dowry "pure and simple" ( $\tau \eta v \varphi \varepsilon \rho v \eta \nu \alpha \pi \lambda \eta \nu$ ), if she is set free; but in case he does not do so promptly, he is to add interest also (Moulton and Milligan's Vocabulary, etc.). There are various other instances of such usage. Here and in Lu 11:34 the eye is called "single" in a moral sense. The word means "without folds" like a piece of cloth unfolded, simplex in Latin. Bruce considers this parable of the eye difficult. "The figure and the ethical meaning seem to be mixed up, moral attributes ascribed to the physical eye which with them still gives light to the body. This confusion may be due to the fact that the eye, besides being the organ of vision, is the seat of expression, revealing inward dispositions." The "evil" eye ( $\pi$ о $\eta \rho \rho \circ \varsigma$ ) may be diseased and is used of stinginess in the LXX and so a $\pi \lambda$ ouc may refer to liberality as Hatch argues (Essays in Biblical Greek, p. 80). The passage may be elliptical with something to be supplied. If our eyes are healthy we see clearly and with a single focus (without astigmatism). If the eyes are diseased (bad, evil), they may even be cross-eyed or cock-eyed. We see double and confuse our vision. We keep one eye on the hoarded treasures of earth and roll the other proudly up to heaven. Seeing double is double-mindedness as is shown in verse 24 .

Matt 6:24
No man can serve two masters (ou but failure awaits them all. Men even try "to be slaves to God and mammon" ( $\Theta \varepsilon \omega$ סou入zuevv $\kappa \alpha \mu \alpha \mu \omega v \alpha)$. Mammon is a Chaldee, Syriac, and Punic word like Plutus for the money-god (or devil). The slave of mammon will obey mammon while pretending to obey God. The United States has had a terrible revelation of the power of the money-god in public life in the Sinclair-Fall-Teapot-Air-Dome-Oil case. When the guide is blind and leads the blind,
both fall into the ditch. The man who cannot tell road from ditch sees falsely as Ruskin shows in Modern Painters. He will hold to one ( $\varepsilon v o c \alpha v \theta \varepsilon \xi \varepsilon \tau \alpha)$. The word means to line up face to face ( $\alpha v \tau$ ) with one man and so against the other.

## Matt 6:25

Be not anxious for your life ( $\mu \eta \mu \varepsilon \rho \mu \nu \alpha \tau \varepsilon \tau \eta \psi \nu \chi \eta \nu \mu \omega v$ ). This is as good a translation as the Authorized Version was poor; "Take no thought for your life." The old English word "thought" meant anxiety or worry as Shakespeare says:
"The native hue of resolution Is sicklied o'er with the pale cast of thought."
Vincent quotes Bacon (Henry VII): "Harris, an alderman of London, was put in trouble and died with thought and anguish." But words change with time and now this passage is actually quoted (Lightfoot) "as an objection to the moral teaching of the Sermon on the Mount, on the ground that it encouraged, nay, commanded, a reckless neglect of the future." We have narrowed the word to mere planning without any notion of anxiety which is in the Greek word. The verb $\mu \varepsilon \rho \mu \nu \alpha \omega$ is from $\mu \varepsilon \rho \iota \sigma, \mu \varepsilon \rho \iota \zeta \omega$, because care or anxiety distracts and divides. It occurs in Christ's rebuke to Martha for her excessive solicitude about something to eat (Lu 10:41). The notion of proper care and forethought appears in 1Co 7:32; 12:25; Php 2:20. It is here the present imperative with the negative, a command not to have the habit of petulant worry about food and clothing, a source of anxiety to many housewives, a word for women especially as the command not to worship mammon may be called a word for men. The command can mean that they must stop such worry if already indulging in it. In verse 31 Jesus repeats the prohibition with the ingressive aorist subjunctive: "Do not become anxious," "Do not grow anxious." Here the direct question with the deliberative subjunctive occurs with each verb ( $\varphi \alpha \gamma \omega \mu \varepsilon \nu, \pi \iota \omega \mu \varepsilon \nu, \pi \varepsilon \rho ı \beta \alpha \lambda \omega \mu \varepsilon \theta \alpha$ ). This deliberative subjunctive of the direct question is retained in the indirect question employed in verse 25 . A different verb for clothing occurs, both in the indirect middle ( $\pi \varepsilon \rho 1 \beta \alpha \lambda \omega \mu \varepsilon \theta a$, fling round ourselves in $31, \varepsilon v \delta v \sigma \eta \sigma \theta \varepsilon$, put on yourselves in 25).

For your life ( $\tau \eta \psi v \chi \eta$ ). "Here $\psi v \times \eta$ stands for the life principle common to man and beast, which is embodied in the $\sigma \omega \mu \alpha$ : the former needs food, the latter clothing" (McNeile). $\Psi \cup \chi \eta$ in the Synoptic Gospels occurs in three senses (McNeile): either the life principle in the body as here and which man may kill (Mr 3:4) or the seat of the thoughts and emotions
 something higher that makes up the real self (Mt 10:28; 16:26). In Mt 16:25 (Lu 9:25) $\psi v \chi \eta$ appears in two senses paradoxical use, saving life and losing it.

Matt 6:27
Unto his stature ( $\left.\varepsilon \pi \tau \eta \nu \eta \lambda_{ı} \kappa \iota \alpha \nu \alpha v \tau o v\right)$. The word $\eta \lambda_{\iota} \kappa \iota \alpha \nu$ is used either of height (stature) or length of life (age). Either makes good sense here, though probably "stature" suits the context best. Certainly anxiety will not help either kind of growth, but rather hinder
by auto-intoxication if nothing more. This is no plea for idleness, for even the birds are diligent and the flowers grow.

Matt 6:28
The lilies of the field ( $\tau \alpha$ крıva $\tau o v ~ \alpha \gamma \rho o v$ ). The word may include other wild flowers besides lilies, blossoms like anemones, poppies, gladioli, irises (McNeile).

Matt 6:29
Was not arrayed (oude $\pi \varepsilon \rho ı \varepsilon \beta \alpha \lambda \varepsilon \tau 0$ ). Middle voice and so "did not clothe himself," "did not put around himself."

Matt 6:30
 heightens the comparison.

Matt 6:33
First his kingdom ( $\pi \rho \omega \tau \sigma \nu \tau \eta \nu \beta a \sigma \iota \lambda \varepsilon \iota \alpha v$ ). This in answer to those who see in the Sermon on the Mount only ethical comments. Jesus in the Beatitudes drew the picture of the man with the new heart. Here he places the Kingdom of God and his righteousness before temporal blessings (food and clothing).

Matt 6:34
For the morrow ( $\varepsilon ı \tau \varepsilon v$ aupiov). The last resort of the anxious soul when all other fears are allayed. The ghost of tomorrow stalks out with all its hobgoblins of doubt and distrust.

## Matthew 7

Matt 7:1
Judge not ( $\mu \eta \kappa \rho \nu v \varepsilon \tau \varepsilon$ ). The habit of censoriousness, sharp, unjust criticism. Our word critic is from this very word. It means to separate, distinguish, discriminate. That is necessary, but pre-judice (prejudgment) is unfair, captious criticism.

Matt 7:3
The mote ( $\tau \boldsymbol{\kappa}$ кар甲оऽ). Not dust, but a piece of dried wood or chaff, splinter (Weymouth, Moffatt), speck (Goodspeed), a very small particle that may irritate.

The beam ( $\tau \eta \vee \delta o \kappa o v$ ). A log on which planks in the house rest (so papyri), joist, rafter, plank (Moffatt), pole sticking out grotesquely. Probably a current proverb quoted by Jesus like our people in glass houses throwing stones. Tholuck quotes an Arabic proverb: "How seest thou the splinter in thy brother's eye, and seest not the cross-beam in thine eye?"

## Matt 7:5

Shalt thou see clearly ( $\delta ı \alpha \beta \lambda \varepsilon \psi \varepsilon ı$ ). Only here and Lu 6:42 and Mr 8:25 in the New Testament. Look through, penetrate in contrast to $\beta \lambda \varepsilon \pi \varepsilon ⿺ \varsigma$, to gaze at, in verse 3 . Get the log out of your eye and you will see clearly how to help the brother get the splinter out ( $\varepsilon \kappa \beta \alpha \lambda \varepsilon ı \nu)$ of his eye.

Matt 7:6
 holy" refers, to ear-rings or to amulets, but that would not appeal to dogs. Trench (Sermon on the Mount, p . 136) says that the reference is to meat offered in sacrifice that must not be flung to dogs: "It is not that the dogs would not eat it, for it would be welcome to them; but that it would be a profanation to give it to them, thus to make it a skubalon, Ex 22:31 ." The yelping dogs would jump at it. Dogs are kin to wolves and infest the streets of oriental cities.

Your pearls before the swine ( $\tau о \cup \varsigma \mu \alpha \rho \gamma \alpha \rho \iota \tau \alpha \varsigma \nu \mu \nu \varepsilon \mu \pi \rho \circ \sigma \theta \varepsilon v \tau \omega v \chi о \iota \omega \nu)$ ). The word pearl we have in the name Margarita (Margaret). Pearls look a bit like peas or acorns and would deceive the hogs until they discovered the deception. The wild boars haunt the Jordan Valley still and are not far removed from bears as they trample with their feet and rend with their tusks those who have angered them.

Matt 7:9
Loaf--stone (aptov-- $\lambda_{1} \theta$ ov). Some stones look like loaves of bread. So the devil suggested that Jesus make loaves out of stones (Mt 4:3).

Matt 7:10
Fish--serpent ( $\downarrow \not \subset \cup v v--o \varphi \imath v$ ). Fish, common article of food, and water-snakes could easily be substituted. Anacoluthon in this sentence in the Greek.

Matt 7:11
How much more ( $\pi \sigma \sigma \omega \mu \alpha \lambda \lambda o v$ ). Jesus is fond of the a fortiori argument.

Matt 7:12
That men should do unto you ( $\iota v \alpha \pi o t \omega \sigma \iota v \nu \mu \imath v$ o $\alpha \nu \theta \rho \omega \pi \sigma$ ). Luke ( $\mathrm{Lu} 6: 31$ ) puts the Golden Rule parallel with Mt 5:42. The negative form is in Tobit 4:15. It was used by Hillel, Philo, Isocrates, Confucius. "The Golden Rule is the distilled essence of that 'fulfilment' ( $5: 17$ ) which is taught in the sermon" (McNeile). Jesus puts it in positive form.

Matt 7:13
By the narrow gate ( $\delta \iota \alpha \tau \eta \varsigma \sigma \tau \varepsilon \nu \eta \varsigma \pi \nu \lambda \eta \varsigma)$. The Authorized Version "at the strait gate" misled those who did not distinguish between "strait" and "straight." The figure of the Two Ways had a wide circulation in Jewish and Christian writings (cf. De 30:19; Jer 21:8; Ps 1 ). See the Didache i-vi; Barnabas xviii-xx. "The narrow gate" is repeated in verse 14 and
straitened the way ( $\tau \varepsilon \theta \lambda \mu \mu \varepsilon \nu \eta \eta$ o $о \varsigma$ ) added. The way is "compressed," narrowed as in a defile between high rocks, a tight place like $\sigma \tau \varepsilon \nu 0 \chi \omega \rho \prime \alpha$ in Ro 8:35. "The way that leads to life involves straits and afflictions" (McNeile). Vincent quotes the Pinax or Tablet of Cebes, a contemporary of Socrates: "Seest thou not, then, a little door, and a way before the door, which is not much crowded, but very few travel it? This is the way that leadeth unto true culture." "The broad way" ( $\varepsilon \cup \rho \cup \chi \omega \rho \circ \varsigma)$ is in every city, town, village, with the glaring white lights that lure to destruction.

Matt 7:15
False prophets ( $\tau \omega \nu \psi \varepsilon v \delta o \pi \rho o \varphi \eta \tau \omega \nu$ ). There were false prophets in the time of the Old Testament prophets. Jesus will predict "false Messiahs and false prophets" (Mt 24:24) who will lead many astray. They came in due time posing as angels of light like Satan, Judaizers (2Co 11:13f. .) and Gnostics (1Jo 4:1; 1Ti 4:1 ). Already false prophets were on hand when Jesus spoke on this occasion (cf. Ac 13:6; $2 \mathrm{Pe} 2: 1$ ). In outward appearance they look like sheep in the sheep's clothing which they wear, but within they are "ravening wolves" ( $\lambda \cup \kappa о \alpha \rho \pi \alpha ү \varepsilon \varsigma), ~ g r e e d y ~ f o r ~ p o w e r, ~ g a i n, ~ s e l f . ~ I t ~ i s ~ a ~ t r a g e d y ~ t h a t ~ s u c h ~ m e n ~ a n d ~ w o m e n ~ r e-~$ appear through the ages and always find victims. Wolves are more dangerous than dogs and hogs.

Matt 7:16
By their fruits ye shall know them ( $\alpha \pi 0 \tau \omega \nu \kappa \alpha \rho \pi \omega \nu \alpha \nu \tau \omega \nu \varepsilon \pi \tau \gamma \nu \omega \sigma \varepsilon \sigma \theta \varepsilon$ ). From their fruits you will recognize them." The verb "know " ( $\gamma \iota \nu \omega \sigma \kappa \omega)$ has $\varepsilon \pi$ added, fully know. The illustrations from the trees and vines have many parallels in ancient writers.

Matt 7:20
See on Mt 7:16.
Matt 7:21
Not--but (ov--a $\lambda \lambda^{\prime}$ ). Sharp contrast between the mere talker and the doer of God's will. Matt 7:22
Did we not prophesy in thy name? (ov $\tau \omega \sigma \omega$ ovo $\alpha \alpha \tau \varepsilon \pi \rho о \varphi \eta \tau \varepsilon v \sigma \alpha \mu \varepsilon v ;$ ). The use of $o v$ in the question expects the affirmative answer. They claim to have prophesied (preached)
in Christ's name and to have done many miracles. But Jesus will tear off the sheepskin and lay bare the ravening wolf. "I never knew you" (оиסєтотє $\varepsilon \gamma v \omega \nu \nu \mu \propto \varsigma)$. "I was never acquainted with you" (experimental knowledge). Success, as the world counts it, is not a criterion of one's knowledge of Christ and relation to him. "I will profess unto them" (o $\mu$ о $о \boldsymbol{\gamma} \eta \sigma \omega$ autoıs), the very word used of profession of Christ before men (Mt 10:32). This word Jesus will use for public and open announcement of their doom.

Matt 7:24
And doeth them (ка логє $\alpha \cup \tau 0 \cup \varsigma)$. That is the point in the parable of the wise builder, "who digged and went deep, and laid a foundation upon the rock" (Lu 6:48).

Matt 7:25
Was founded ( $\tau \varepsilon \theta \varepsilon \mu \varepsilon \lambda_{\iota} \omega \tau \sigma$ ). Past perfect indicative passive state of completion in the past. It had been built upon the rock and it stood. No augment.

Matt 7:26
And doeth them not ( $\kappa \alpha \mu \eta \pi о \omega \nu$ avtou¢). The foolish builder put his house on the sands that could not hold in the storm. One is reminded of the words of Jesus at the beginning of the Sermon in 5:19 about the one "who does and teaches." Hearing sermons is a dangerous business if one does not put them into practice.

Matt 7:28
The multitudes were astonished ( $\varepsilon \xi \varepsilon \pi \lambda \eta \sigma \sigma o v \tau$ o o o $\lambda \lambda$ ). They listened spell-bound to the end and were left amazed. Note the imperfect tense, a buzz of astonishment. The verb means literally "were struck out of themselves."

Matt 7:29
And not as their scribes ( $\kappa \alpha$ ov $\omega \varsigma$ о $\gamma \rho \alpha \mu \mu \alpha \tau \varepsilon ı \varsigma ~ \alpha \nu \tau \omega v$ ). They had heard many sermons before from the regular rabbis in the synagogues. We have specimens of these discourses preserved in the Mishna and Gemara, the Jewish Talmud when both were completed, the driest, dullest collection of disjounted comments upon every conceivable problem in the history of mankind. The scribes quoted the rabbis before them and were afraid to express an idea without bolstering it up by some predecessor. Jesus spoke with the authority of truth, the reality and freshness of the morning light, and the power of God's Spirit. This sermon which made such a profound impression ended with the tragedy of the fall of the house on the sand like the crash of a giant oak in the forest. There was no smoothing over the outcome.

Matt 8:2
If thou wilt ( $\varepsilon a v \theta \varepsilon \lambda \eta \iota \varsigma$ ). The leper knew that Jesus had the power to heal him. His doubt was about his willingness. "Men more easily believe in miraculous power than in miraculous love" (Bruce). This is a condition of the third class (undetermined, but with prospect of being determined), a hopeful doubt at any rate. Jesus accepted his challenge by "I will." The command to "tell no one" was to suppress excitement and prevent hostility.

Matt 8:5

Unto him ( $\alpha \cup \tau \omega$ ). Dative in spite of the genitive absolute $\varepsilon ו \sigma \varepsilon \lambda \theta$ ovtoc $\alpha 0 \tau 0 v$ as in verse 1, a not infrequent Greek idiom, especially in the koine.

Matt 8:6
Grievously tormented ( $\delta \varepsilon ı v \omega \varsigma \beta \alpha \sigma \alpha v \iota \zeta \rho \mu \varepsilon v o \varsigma)$. Participle present passive from root $\beta a \sigma \alpha v o \varsigma$ (see on Mt 4:24). The boy ( $\pi \alpha \iota \varsigma$ ), slave ( $\delta o u \lambda o c$, Lu 7:2 ), was a bedridden ( $\beta \varepsilon \beta \lambda \eta \tau \alpha$, perfect passive indicative of $\beta \alpha \lambda \lambda \omega)$ paralytic.

Matt 8:7
I will come and heal him ( $\varepsilon \gamma \omega \varepsilon \lambda \theta \omega v \theta \varepsilon \rho \alpha \pi \varepsilon v \sigma \omega$ avtov). Future indicative, not deliberative subjunctive in question (McNeile). The word here for heal ( $\theta \varepsilon \rho a \pi \varepsilon v \sigma \omega$ ) means first to serve, give medical attention, then cure, restore to health. The centurion uses the more
 like a physician, says that Jesus healed (ıato) those in need of treatment ( $\theta \varepsilon \rho \alpha \pi \varepsilon เ \propto \varsigma)$, but the distinction is not always observed. In Ac 28:8 Luke uses ıaбato of the miraculous healings in Malta by Paul while he employs $\varepsilon \theta \varepsilon \rho a \pi \varepsilon v o v \tau$ (Ac 28:9) apparently of the practice of Luke the physician (so W. M. Ramsay). Matthew represents the centurion himself as speaking to Jesus while Luke has it that two committees from the centurion brought the messages, apparently a more detailed narrative. What one does through others he does himself as Pilate "scourged Jesus" (had him scourged).

Matt 8:9
For I also am a man under authority ( $\kappa \alpha \gamma \alpha \rho \varepsilon \gamma \omega \alpha v \theta \rho \omega \pi о \varsigma v \pi о \varepsilon \xi о v \sigma \iota \alpha$ ). "Also" is in the text, though the $\kappa \alpha$ here may mean "even," even I in my subordinate position have soldiers under me. As a military man he had learned obedience to his superiors and so expected obedience to his commands, instant obedience (aorist imperatives and aoristic present indicatives). Hence his faith in Christ's power over the illness of the boy even without coming. Jesus had only to speak with a word ( $8: 8$ ), say the word, and it would be done.

Matt 8:10
So great faith ( $\tau 0 \sigma \alpha v \tau \eta \nu \pi \iota \sigma \tau \iota v)$. In a Roman centurion and greater than in any of the Jews. In like manner Jesus marvelled at the great faith of the Canaanitish woman (Mt 15:28 ).

Matt 8:11
Sit down ( $\alpha v \alpha \kappa \lambda 1 \theta \eta \sigma o v \tau \alpha$ ). Recline at table on couches as Jews and Romans did. Hence Leonardo da Vinci's famous picture of the Last Supper is an anachronism with all seated at table in modern style.

Matt 8:12
The sons of the kingdom (o vio $\tau \uparrow \varsigma \beta \alpha \sigma i \lambda \varepsilon i \alpha \varsigma)$. A favourite Hebrew idiom like "son of hell" (Mt 23:15), "sons of this age" (Lu 16:8). The Jews felt that they had a natural right to the privileges of the kingdom because of descent from Abraham (Mt 3:9). But mere natural birth did not bring spiritual sonship as the Baptist had taught before Jesus did.

Into the outer darkness ( $\varepsilon เ \varsigma ~ \tau о ~ \sigma к о \tau о \varsigma ~ \tau о ~ \varepsilon \xi ~(\omega \tau \varepsilon \rho о v) . ~ C o m p a r a t i v e ~ a d j e c t i v e ~ l i k e ~ o u r ~$ "further out," the darkness outside the limits of the lighted palace, one of the figures for hell or punishment (Mt 23:13; 25:30). The repeated article makes it bolder and more impressive, "the darkness the outside," there where the wailing and gnashing of teeth is heard in the thick blackness of night.

Matt 8:14
Lying sick of a fever ( $\beta\langle\beta \lambda \eta \mu \varepsilon v \eta \nu$ ка $\pi v \rho \varepsilon \sigma \sigma o v \sigma \alpha v$ ). Two participles, bedridden (perfect passive of $\beta a \lambda \lambda \omega$ ) and burning with fever (present active). How long the fever had had her we have no means of knowing, possibly a sudden and severe attack ( Mr 1:30) , as they tell Jesus about her on reaching the house of Peter. We are not told what kind of fever it was. Fever itself was considered a disease. "Fever" is from German feuer (fire) like the Greek $\pi v \rho$.

Matt 8:15
Touched her hand ( $\eta \psi a \tau 0$ т $\eta \varsigma \chi \varepsilon ו \rho o \varsigma \alpha \cup \tau \eta \varsigma)$. In loving sympathy as the Great Physician and like any good doctor today.

Ministered ( $\delta ı \eta \kappa o v \varepsilon$ ). "Began to minister" (conative imperfect) at once to Jesus at table in gratitude and love.

Matt 8:16
When even was come ( $o \psi \operatorname{la} \varsigma \varepsilon v o \mu \varepsilon v \eta \varsigma$ ). Genitive absolute. A beautiful sunset scene at the close of the Sabbath day (Mr 1:21). Then the crowds came as Jesus stood in the door of Peter's house (Mr 1:33; Mt 8:14) as all the city gathered there with the sick, "all those who had it bad" (see on Mt 4:24) and he healed them "with a word" ( $\lambda \mathrm{o} \gamma \omega$ ). It was a never to be forgotten memory for those who saw it.

Matt 8:17
Himself took our infirmities and bare our diseases ( $\alpha \cup \tau о \varsigma \tau \alpha \varsigma \alpha \sigma \varepsilon \varepsilon \varepsilon \varepsilon \alpha \varsigma \varepsilon \lambda \alpha \beta \varepsilon v \kappa \alpha$ таৎ vooovc $\varepsilon \beta \alpha \sigma \tau \alpha \sigma \varepsilon v)$. A quotation from Isa 53:4. It is not clear in what sense Matthew applies the words in Isaiah whether in the precise sense of the Hebrew or in an independent manner. Moffatt translates it: "He took away our sicknesses, and bore the burden of our diseases." Goodspeed puts it: "He took our sickness and carried away our diseases." Deissmann (Bible Studies, pp. 102f.) thinks that Matthew has made a free interpretation of the Hebrew, has discarded the translation of the Septuagint, and has transposed the two Hebrew verbs so that Matthew means: "He took upon himself our pains, and bore our diseases." Plummer holds that "It is impossible, and also unnecessary, to understand what the Evangelist understood by 'took ' $(\varepsilon \lambda \alpha \beta \varepsilon v)$ and 'bare' ( $\varepsilon \beta a \sigma \tau \alpha \sigma \varepsilon v)$. It at least must mean that Christ removed their sufferings from the sufferers. He can hardly have meant that the diseases were transferred to Christ." Baбтa$\zeta \omega$ occurs freely in the papyri with the sense of lift, carry, endure, carry away (the commonest meaning, Moulton and Milligan, Vocabulary), pilfer. In Mt 3:11 we have the common vernacular use to take off sandals. The Attic Greek did not use it in the sense of carrying off. "This passage is the cornerstone of the faith-cure theory, which
claims that the atonement of Christ includes provision for bodily no less than for spiritual healing, and therefore insists on translating 'took away'" (Vincent). We have seen that the word $\beta a \sigma \tau \alpha \zeta \omega$ will possibly allow that meaning, but I agree with McNeile: "The passage, as Mt. employs $i t$, has no bearing on the doctrine of the atonement." But Jesus does show his sympathy with us. "Christ's sympathy with the sufferers was so intense that he really felt their weaknesses and pains." In our burdens Jesus steps under the load with us and helps us to carry on.

Matt 8:19
A scribe ( $\varepsilon \varsigma \varsigma ~ \gamma \rho \alpha \mu \mu \alpha \tau \varepsilon v \varsigma)$. One ( $\varepsilon \varsigma)=" \mathrm{a}$," indefinite article. Already a disciple as shown by "another of the disciples" ( $\varepsilon \tau \varepsilon \rho \circ \varsigma ~ \tau \omega \nu \mu \alpha \theta \eta \tau \omega v$ ) in 8:21. He calls Jesus "Teacher" ( $\delta \iota \delta a \sigma \kappa \alpha \lambda \varepsilon$ ), but he seems to be a "bumptious" brother full of self-confidence and selfcomplacency. "Even one of that most unimpressionable class, in spirit and tendency utterly opposed to the ways of Jesus" (Bruce). Yet Jesus deals gently with him.

Matt 8:20
Holes ( $\varphi \omega \lambda \varepsilon \sigma \cup \varsigma)$. A lurking hole, burrow.
Nests (катабк $\nu \omega \omega \sigma \varepsilon \iota \varsigma)$. "Roosts, i.e. leafy, $\sigma \kappa \eta v \alpha$ for settling at night (tabernacula, habitacula), not nests" (McNeile). In the Septuagint it is used of God tabernacling in the Sanctuary. The verb (катабкпvow) is there used of birds (Ps 103:12).

The Son of man ( $\theta \mathrm{o}$ vioc $\operatorname{\tau ov} \alpha v \theta \rho \omega \pi \sigma v$ ). This remarkable expression, applied to himself by Jesus so often, appears here for the first time. There is a considerable modern literature devoted to it. "It means much for the Speaker, who has chosen it deliberately, in connection with private reflections, at whose nature we can only guess, by study of the many occasions on which the name is used" (Bruce). Often it means the Representative Man. It may sometimes stand for the Aramaic barnasha, the man, but in most instances that idea will not suit. Jesus uses it as a concealed Messianic title. It is possible that this scribe would not understand the phrase at all. Bruce thinks that here Jesus means "the unprivileged Man," worse off than the foxes and the birds. Jesus spoke Greek as well as Aramaic. It is inconceivable that the Gospels should never call Jesus "the Son of man" and always credit it to him as his own words if he did not so term himself, about eighty times in all, thirty-three in Matthew. Jesus in his early ministry, except at the very start in Joh 4 , abstains from calling himself Messiah. This term suited his purpose exactly to get the people used to his special claim as Messiah when he is ready to make it openly.

Matt 8:21
And bury my father ( $\kappa \alpha \theta \alpha \psi \alpha$ tov $\pi \alpha \tau \varepsilon \rho \alpha \mu \circ v$ ). The first man was an enthusiast. This one is overcautious. It is by no means certain that the father was dead. Tobit urged his son Tobias to be sure to bury him: "Son, when I am dead, bury me" (Tobit 4:3). The probability is that this disciple means that, after his father is dead and buried, he will then be free to follow Jesus. "At the present day, an Oriental, with his father sitting by his side, has been
known to say respecting his future projects: 'But I must first bury my father!'" (Plummer). Jesus wanted first things first. But even if his father was not actually dead, service to Christ comes first.

Matt 8:22
Leave the dead to bury their own dead ( $\alpha \varphi \varepsilon \varsigma \tau$ тоис vєкроис $\theta \alpha \psi \alpha$ тоиऽ $\varepsilon \alpha \cup \tau \omega \nu$ vєкроис). The spiritually dead are always on hand to bury the physically dead, if one's real duty is with Jesus. Chrysostom says that, while it is a good deed to bury the dead, it is a better one to preach Christ.

Matt 8:24
But he was asleep ( $\alpha v \tau о \varsigma ~ \delta \varepsilon \varepsilon \kappa \alpha \theta \varepsilon v \delta \varepsilon v$ ). Imperfect, was sleeping. Picturesque scene. The Sea of Galilee is 680 feet below the Mediterranean Sea. These sudden squalls come down from the summit of Hermon with terrific force ( $\sigma \varepsilon 1 \sigma \mu \circ \varsigma \mu \varepsilon \gamma \alpha \varsigma$ ) like an earthquake. Mark (Mr 4:37) and Luke (Lu 8:23) term it a whirlwind ( $\lambda a 1 \lambda \alpha \pi \varsigma)$ in furious gusts.

Matt 8:25
Save, Lord; we perish (Kvpıع, $\sigma \omega \sigma \sigma v, \alpha \pi o \lambda \lambda \nu \mu \varepsilon \theta \alpha$ ). More exactly, "Lord, save us at once (aorist), we are perishing (present linear)."

Matt 8:27
Even the winds and the sea obey him ( $\mathrm{K} \alpha$ о $\alpha v \eta \mu$ к ка $\eta \forall \alpha \lambda \alpha \sigma \sigma \alpha \alpha \nu \tau \omega$ v $\pi \alpha \kappa о v o v \sigma \tau v$ ). A nature miracle. Even a sudden drop in the wind would not at once calm the sea. "J. Weiss explains that by 'an astonishing coincidence' the storm happened to lull at the moment that Jesus spoke!" (McNeile). Some minds are easily satisfied by their own stupidities.

Matt 8:28
The country of the Gadarenes ( $\tau \varepsilon v \chi \omega \rho \alpha \nu \tau \omega v \Gamma \alpha \delta \alpha \rho \eta \nu \omega v$ ). This is the correct text in Matthew while in Mr 5:1 and Lu 8:26 it is "the country of the Gerasenes." Dr. Thomson discovered by the lake the ruins of Khersa (Gerasa). This village is in the district of the city of Gadara some miles southeastward so that it can be called after Gerasa or Gadara. So Matthew speaks of "two demoniacs" while Mark and Luke mention only one, the leading one. " The tombs " ( $\tau \omega \nu \mu \nu \eta \mu \varepsilon \omega \omega v$ ) were chambers cut into the mountain side common enough in Palestine then and now. On the eastern side of the lake the precipitous cliffs are of limestone formation and full of caves. It is one of the proofs that one is a maniac that he haunts the tombs. People shunned the region as dangerous because of the madmen.

Matt 8:29
Thou Son of God (vı tov $\theta \varepsilon o v$ ). The recognition of Jesus by the demons is surprising. The whole subject of demonology is difficult. Some hold that it is merely the ancient way of describing disease. But that does not explain the situation here. Jesus is represented as treating the demons as real existences separate from the human personality. Missionaries in China today claim that they have seen demons cast out. The devil knew Jesus clearly and it is not strange that Jesus was recognized by the devil's agents. They know that there is
nothing in common between them and the Son of God ( $\eta \mu \nu \tau \kappa \alpha \sigma 0$, ethical dative) and they
 Testament for demons, but in 8:31 we have o daupoves (the only example in the N.T.). $\Delta \alpha \mu \mu v \iota v$ is a diminutive of $\delta \alpha \mu \omega v$. In Homer $\delta a \mu \omega v$ is used synonymously with $\theta \varepsilon o$, and $\theta \varepsilon \alpha$. Hesiod employed $\delta \alpha \mu \mu \omega v$ of men of the golden age as tutelary deities. Homer has the adjective $\delta a \mu$ ovios usually in an evil sense. Empedocles considered the demons both bad and good. They were thus used to relieve the gods and goddesses of much rascality. Grote (History of Greece) notes that the Christians were thus by pagan usage justified in calling idolatry the worship of demons. See 1Co 10:20f.; 1Ti 4:1; Re 9:20; 16:13f. In the Gospels demons are the same as unclean spirits ( $\mathrm{Mr} 5: 12,15 ; 3: 22,30 ; \mathrm{Lu} 4: 33$ ). The demons are disturbers (Vincent) of the whole life of man (Mr 5:2f.; 7:25; Mt 12:45; Lu 13:11,16 ).

Matt 8:32
Rushed down the steep ( $\omega \rho \mu \eta \sigma \varepsilon v$ ката $\tau$ о $\kappa \rho \eta \mu \nu \circ v$ ). Down from the cliff (ablative case) into the sea. Constative aorist tense. The influence of mind on matter is now understood better than formerly, but we have the mastery of the mind of the Master on the minds of the maniacs, the power of Christ over the demons, over the herd of hogs. Difficulties in plenty exist for those who see only folk-lore and legend, but plain enough if we take Jesus to be really Lord and Saviour. The incidental destruction of the hogs need not trouble us when we are so familiar with nature's tragedies which we cannot comprehend.

Matt 8:34
That he would depart ( $0 \pi \omega \varsigma \mu \varepsilon \tau \alpha \beta \eta$ ). The whole city was excited over the destruction of the hogs and begged Jesus to leave, forgetful of the healing of the demoniacs in their concern over the loss of property. They cared more for hogs than for human souls, as often happens today.

## Matthew 9

Matt 9:1
His own city ( $\tau \eta v \iota \delta \iota \alpha \nu \pi o \lambda ı v)$. Capernaum (Mr 2:1; Mt 4:13).
Matt 9:2
They brought ( $\pi \rho o \sigma \varepsilon \varphi \varepsilon \rho \circ v$ ). Imperfect, "were bringing," graphic picture made very vivid by the details in Mr 2:1-4 and Lu 5:17. " Lying on a bed " (stretched on a couch), perfect passive participle, a little bed or couch ( $\kappa \lambda \iota \imath \iota \delta \iota \nu)$ in Lu 5:19, "a pallet" (краßатоৎ) in Mr 2:4,9,11.

Thy sins are forgiven ( $\alpha \varphi \iota \varepsilon \vee \tau \alpha$ ). Present passive indicative (aoristic present). Luke (Lu 5:21) has $\alpha \varphi \varepsilon \omega v \tau \alpha$, Doric and Ionic perfect passive indicative for the Attic $\alpha \varphi \varepsilon \iota \nu \tau \alpha$, one of the dialectical forms appearing in the Koine.

Matt 9:3
This man blasphemeth (ov os $\beta \lambda \alpha \sigma \varphi \eta \mu \varepsilon)$. See the sneer in "this fellow." "The prophet always is a scandalous, irreverent blasphemer from the conventional point of view" (Bruce).

Matt 9:6
That ye may know ( $七 \sim \alpha \varepsilon เ \delta \eta \tau \varepsilon$ ). Jesus accepts the challenge in the thoughts of the scribes and performs the miracle of healing the paralytic, who so far only had his sins forgiven, to prove his Messianic power on earth to forgive sins even as God does. The word $\varepsilon \xi$ ovoıa may mean either power or authority. He had both as a matter of fact. Note same word in 9:8.

Then saith he to the sick of the palsy ( $\tau 0 \tau \varepsilon \lambda \varepsilon \gamma \varepsilon \tau \omega \pi \alpha \rho \alpha \lambda \nu \tau \iota \kappa \omega$ ). These words of course, were not spoken by Jesus. Curiously enough Matthew interjects them right in the midst of the sayings of Jesus in reply to the scorn of the scribes. Still more remarkable is the fact that Mark (Mr 2:10) has precisely the same words in the same place save that Matthew has added $\tau 0 \tau \varepsilon$, of which he is fond, to what Mark already had. Mark, as we know, largely reports Peter's words and sees with Peter's eyes. Luke has the same idea in the same place without the vivid historical present $\lambda \varepsilon \gamma \varepsilon$ ( $\varepsilon \tau \pi \varepsilon \nu \tau \omega \pi \alpha \rho \alpha \lambda \varepsilon \lambda \nu \mu \varepsilon \nu \omega t)$ with the participle in place of the adjective. This is one of the many proofs that both Matthew and Luke made use of Mark's Gospel each in his own way.

Take up thy bed (a $\alpha \rho v \sigma o v \tau \eta v \kappa \lambda \iota v \eta v$ ). Pack up at once (aorist active imperative) the rolled-up pallet.

Matt 9:9
At the place of toll ( $\varepsilon \pi \tau \sigma \tau \varepsilon \lambda \omega v i o v)$. The tax-office or custom-house of Capernaum placed here to collect taxes from the boats going across the lake outside of Herod's territory or from people going from Damascus to the coast, a regular caravan route. " Called Matthew " (MaӨӨaıov $\lambda \varepsilon \gamma o \mu \varepsilon v o v$ ) and in 10:3 Matthew the publican is named as one of the Twelve Apostles. Mark (Mr 2:14) and Luke (Lu 5:27) call this man Levi. He had two names as was common, Matthew Levi. The publicans ( $\tau \varepsilon \lambda \omega v \alpha$ ) get their name in English from the Latin
publicanus (a man who did public duty), not a very accurate designation. They were detested because they practised graft. Even Gabinius the proconsul of Syria was accused by Cicero of relieving Syrians and Jews of legitimate taxes for graft. He ordered some of the tax-officers removed. Already Jesus had spoken of the publican ( $5: 46$ ) in a way that shows the public disfavour in which they were held.

Matt 9:10
Publicans and sinners ( $\tau \varepsilon \lambda \omega v \alpha \kappa \alpha \alpha \mu \alpha \rho \tau \omega \lambda o$ ). Often coupled together in common scorn and in contrast with the righteous ( $\delta$ เкaıo in 9:13). It was a strange medley at Levi's feast (Jesus and the four fisher disciples, Nathanael and Philip; Matthew Levi and his former companions, publicans and sinners; Pharisees with their scribes or students as on-lookers; disciples of John the Baptist who were fasting at the very time that Jesus was feasting and with such a group). The Pharisees criticize sharply "your teacher" for such a social breach of "reclining" together with publicans at Levi's feast.

Matt 9:12
But they that are sick ( $\alpha \lambda \lambda \alpha$ o как $\omega \varsigma \varepsilon \chi \circ v \tau \varepsilon \varsigma$ ). Probably a current proverb about the physician. As a physician of body and soul Jesus was bound to come in close touch with the social outcasts.

Matt 9:13
But go ye and learn ( $\pi$ ор $\varepsilon v \theta \varepsilon v \tau \varepsilon \varsigma \delta \varepsilon \mu \alpha \theta \varepsilon \tau \varepsilon$ ). With biting sarcasm Jesus bids these preachers to learn the meaning of Ho 6:6. It is repeated in Mt 12:7 . Ingressive aorist imperative ( $\mu \alpha \theta \varepsilon \tau \varepsilon$ ).

Matt 9:14
The disciples of John (o $\mu \alpha \theta \eta \tau \alpha$ I $\omega \alpha v o v$ ). One is surprised to find disciples of the Baptist in the role of critics of Christ along with the Pharisees. But John was languishing in prison and they perhaps were blaming Jesus for doing nothing about it. At any rate John would not have gone to Levi's feast on one of the Jewish fast-days. "The strict asceticism of the Baptist ( $11: 18$ ) and of the Pharisaic rabbis (Lu 18:12) was imitated by their disciples" (McNeile).

Matt 9:15
The sons of the bride-chamber ( $o$ vio $\tau 0 v \nu v \mu \varphi \omega v o \varsigma$ ). It is a late Hebrew idiom for the wedding guests, "the friends of the bridegroom and all the sons of the bride-chamber" (Tos. Berak. ii. 10). Cf. Joh 2:29 .

Matt 9:16
Undressed cloth ( $\rho \alpha \kappa о и \varsigma ~ a \gamma v \alpha \varphi o v)$ ). An unfulled, raw piece of woollen cloth that will shrink when wet and tear a bigger hole than ever.

A worse rent ( $\chi \varepsilon \iota \rho \circ v \sigma \chi \iota \rho \mu)$. Our word "schism." The "patch " ( $\pi \lambda \eta \rho \omega \mu \alpha$, filling up) thus does more harm than good.

Matt 9:17

Old wineskins (aбкou¢ $\pi \alpha \lambda$ aıovৎ). Not glass " bottles " but wineskins used as bottles as is true in Palestine yet, goatskins with the rough part inside. "Our word bottle originally carried the true meaning, being a bottle of leather. In Spanish bota means a leather bottle, a boot, and a butt. In Spain wine is still brought to market in pig-skins " (Vincent). The new wine will ferment and crack the dried-up old skins.

The wine is spilled ( $\varepsilon \kappa \chi \varepsilon \iota \tau \alpha$ ), poured out.
Matt 9:18
Is even now dead ( $\alpha \rho \tau \varepsilon \tau \varepsilon \lambda \varepsilon \cup \tau \eta \sigma \varepsilon v$ ). Aorist tense with $\alpha \rho \tau$ and so better, "just now died," "just dead" (Moffatt). Mark (Mr 5:23 ) has it "at the point of death," Luke (Lu 8:42) "lay a dying." It is not always easy even for physicians to tell when actual death has come. Jesus in 9:24 pointedly said, "The damsel is not dead, but sleepeth," meaning that she did not die to stay dead.

Matt 9:20
The border of his garment ( $\tau 0 v ~ к \rho а \sigma \pi \varepsilon \delta o v ~ \tau o v ~ ц \mu \alpha \tau ь v) . ~ T h e ~ h e m ~ o r ~ f r i n g e ~ o f ~ a ~ g a r-~$ ment, a tassel or tuft hanging from the edge of the outer garment according to Nu 15:38 . It was made of twisted wool. Jesus wore the dress of other people with these fringes at the four corners of the outer garment. The Jews actually counted the words Jehovah One from the numbers of the twisted white threads, a refinement that Jesus had no concern for. This poor woman had an element of superstition in her faith as many people have, but Jesus honours her faith and cures her.

## Matt 9:23

The flute-players ( $\tau 0 \cup \varsigma \alpha \cup \lambda \eta \tau \alpha \varsigma$ ). The girl was just dead, but already a crowd "making a tumult" ( $\theta$ op $\vee \beta$ ov $\mu \varepsilon v o v)$ with wild wailing and screaming had gathered in the outer court, "brought together by various motives, sympathy, money, desire to share in the meat and drink going at such a time" (Bruce). Besides the several flute-players (voluntary or hired) there were probably "some hired mourning women (Jer 9:17) praeficae, whose duty it was to sing naenia in praise of the dead" (Bruce). These when put out by Jesus, "laughed him to scorn" (катєүع $\lambda \omega v$ ), in a sort of loud and repeated (imperfect) guffaw of scorn. Jesus overcame all this repellent environment.

Matt 9:27
As Jesus passed by ( $\pi \alpha \rho \alpha \gamma o v \tau \operatorname{I\eta \sigma ov).~Associative~instrumental~case~with~} \eta \kappa о \lambda o u \theta \eta \sigma \alpha v$. It was the supreme opportunity of these two blind men. Note two demoniacs in Mt 8:28 and two blind men in Mt 20:30. See the same word $\pi \alpha \rho \alpha \gamma \omega v$ used of Jesus in 9:9.

Matt 9:29
Touched their eyes ( $\eta \psi \alpha \tau o \tau \omega \nu \circ \varphi \theta \alpha \lambda \mu \omega \nu$ ). The men had faith (9:28) and Jesus rewards their faith and yet he touched their eyes as he sometimes did with kindly sympathy.

Matt 9:30

Were opened ( $\eta v \varepsilon \omega \tau \chi \theta \eta \sigma \alpha v$ ). Triple augment ( $\mathrm{on} \mathrm{ol}=\omega \mathrm{t}, \varepsilon$ and then on preposition $\alpha v$ $=\eta v$ ).

Strictly charged them ( $\varepsilon v \varepsilon \beta \rho \mu \mu \eta \theta \eta$ avtoıs). A difficult word, compound of $\varepsilon v$ and $\beta \rho \mu \alpha о \mu \alpha$ (to be moved with anger). It is used of horses snorting (Aeschylus, Theb. 461), of men fretting or being angry ( $\mathrm{Da} 11: 30$ ). Allen notes that it occurs twice in Mark (Mr 1:43; 14:5 ) when Matthew omits it. It is found only here in Matthew. John has it twice in a different sense (Joh 11:33 with $\varepsilon v \varepsilon a v \tau \omega)$. Here and in $\mathrm{Mr} 1: 32$ it has the notion of commanding sternly, a sense unknown to ancient writers. Most manuscripts have the middle $\varepsilon v \varepsilon \beta \rho \mu \eta \sigma \alpha \tau 0$, but Aleph and B have the passive $\varepsilon v \varepsilon \beta \rho \rho \mu \eta \theta \eta$ which Westcott and Hort accept, but without the passive sense (cf. $\alpha \pi \varepsilon \kappa \rho i \theta \eta$ ). "The word describes rather a rush of deep feeling which in the synoptic passages showed itself in a vehement injunctive and in Joh 11:33 in look and manner" (McNeile). Bruce translates Euthymius Zigabenus on Mr 1:32 : "Looked severely, contracting His eyebrows, and shaking His head at them as they are wont to do who wish to make sure that secrets will be kept." "See to it, let no one know it" (opate, $\mu \eta \delta \varepsilon ı \varsigma$ $\gamma \iota \omega \omega \sigma \kappa \varepsilon \tau \omega)$. Note elliptical change of persons and number in the two imperatives.

Matt 9:32
A dumb man ( $\kappa \omega \varphi \circ \vee$ ). Literally blunted in tongue as here and so dumb, in ear as in Mt 11:5 and so deaf. Homer used it of a blunted dart (Iliad xi. 390). Others applied it to mental dulness.

Matt 9:34
By the prince of the devils ( $\varepsilon v \tau \omega \alpha \rho \chi \circ \nu \tau \tau \omega v \delta a \mu \mu \nu \omega \omega v$ ). Demons, not devils. The codex Bezae omits this verse, but it is probably genuine. The Pharisees are becoming desperate and, unable to deny the reality of the miracles, they seek to discredit them by trying to connect Jesus with the devil himself, the prince of the demons. They will renew this charge later (Mt 12:24) when Jesus will refute it with biting sarcasm.

Matt 9:35
And Jesus went about ( $\kappa \alpha \pi \varepsilon \rho ı \eta \gamma \varepsilon v$ o I $\eta \sigma o v \varsigma$ ). Imperfect tense descriptive of this third tour of all Galilee.

Matt 9:36
Were distressed and scattered ( $\eta \sigma \alpha \nu \varepsilon \sigma \kappa \nu \lambda \mu \varepsilon v o ~ \kappa \alpha \varepsilon \rho \mu \mu \varepsilon v o$ ). Periphrastic past perfect indicative passive. A sad and pitiful state the crowds were in. Rent or mangled as if by wild beasts. $\Sigma \kappa \nu \lambda \lambda \omega$ occurs in the papyri in sense of plunder, concern, vexation. "Used here of the common people, it describes their religious condition. They were harassed, importuned, bewildered by those who should have taught them; hindered from entering into the kingdom of heaven ( $23: 13$ ), laden with the burdens which the Pharisees laid upon them ( $23: 3$ ). Eрı $\mu \mu \varepsilon$ vo denotes men cast down and prostrate on the ground, whether from drunkenness, Polyb. v. 48.2, or from mortal wounds" (Allen): This perfect passive participle from $\rho \iota \pi \tau \omega$,
to throw down. The masses were in a state of mental dejection. No wonder that Jesus was moved with compassion ( $\varepsilon \sigma \pi \lambda \alpha \gamma \chi \nu \stackrel{\sigma}{ })$ ).

Matt 9:38
That he send forth labourers ( $0 \pi \omega \varsigma \varepsilon \kappa \beta \alpha \lambda \eta \varepsilon \rho \gamma \alpha \tau \alpha \varsigma$ ). Jesus turns from the figure of the shepherdless sheep to the harvest field ripe and ready for the reapers. The verb $\varepsilon \kappa \beta \alpha \lambda \lambda \omega$ really means to drive out, to push out, to draw out with violence or without. Prayer is the remedy offered by Jesus in this crisis for a larger ministerial supply. How seldom do we hear prayers for more preachers. Sometimes God literally has to push or force a man into the ministry who resists his known duty.

## Matthew 10

Matt 10:1
His twelve disciples ( $\tau$ оия $\delta \omega \delta \varepsilon \kappa \alpha \mu \alpha \theta \eta \tau \alpha \varsigma \alpha \cup \tau о v)$. First mention of the group of "learners" by Matthew and assumed as already in existence (note the article) as they were (Mr 3:14). They were chosen before the Sermon on the Mount was delivered, but Matthew did not mention it in connection with that sermon.

Gave them authority ( $\varepsilon \delta \omega \kappa \varepsilon v$ avtoı $\varepsilon \xi$ оvбıav). "Power" (Moffatt, Goodspeed). One may be surprised that here only the healing work is mentioned, though Luke (Lu 9:2) has it "to preach the kingdom of God, and to heal the sick." And Matthew says (Mt 10:7), "And as ye go, preach." Hence it is not fair to say that Matthew knows only the charge to heal the sick, important as that is. The physical distress was great, but the spiritual even greater. Power is more likely the idea of $\varepsilon \xi$ 话ı here. This healing ministry attracted attention and did a vast deal of good. Today we have hospitals and skilled physicians and nurses, but we should not deny the power of God to bless all these agencies and to cure disease as he wills. Jesus is still the master of soul and body. But intelligent faith does not justify us in abstaining from the help of the physician who must not be confounded with the quack and the charlatan.

## Matt 10:2

The names of the twelve apostles ( $\tau \omega v \delta \omega \delta \varepsilon \kappa \alpha \alpha \pi о \sigma \tau о \lambda \omega v \tau \alpha$ оvонат $)$. This is the official name (missionaries) used here by Matthew for the first time. The names are given here, but Matthew does not say that they were chosen at this time. Mark (Mr 3:13-19) and Luke (Lu 6:12-16 ) state that Jesus "chose" them, "appointed" them after a night of prayer in the mountain and came down with them and then delivered the Sermon (Lu 6:17). Simon heads the list ( $\pi \rho \omega \tau \sigma \varsigma)$ in all four lists including Ac 1:13f. He came to be first and foremost at the great Pentecost (Ac 2 and Ac 3 ). The apostles disputed a number of times as to which was greatest. Judas Iscariot comes last each time save that he is absent in Acts, being already dead. Matthew calls him the betrayer (o $\pi \alpha \rho \alpha \delta \iota \delta o v \varsigma)$. Iscariot is usually explained as "man of Kerioth" down near Edom (Jos 15:25 ). Philip comes fifth and James the son of Alphaeus the ninth. Bartholomew is the name for Nathanael. Thaddaeus is Judas the brother of James. Simon Zelotes is also called Simon the Canaanean (Zealous, Hebrew word). This is apparently their first preaching and healing tour without Jesus. He sends them forth by twos (Mr 6:7 ). Matthew names them in pairs, probably as they were sent out.

Matt 10:5
 "sent forth" ( $\alpha \pi \varepsilon \sigma \tau \varepsilon 1 \lambda \varepsilon v)$ is the same root as "apostles." The same word reappears in 10:16.

Way of the Gentiles (o $\delta o v \varepsilon \theta v \omega v$ ). Objective genitive, way leading to the Gentiles. This prohibition against going among the Gentiles and the Samaritans was for this special tour.

They were to give the Jews the first opportunity and not to prejudice the cause at this stage. Later Jesus will order them to go and disciple all the Gentiles (Mt 28:19).

Matt 10:6
The lost sheep ( $\tau \alpha \pi \rho \circ \beta \alpha \tau \alpha \tau \alpha \alpha \pi о \lambda \omega \lambda о \tau \alpha$ ). The sheep, the lost ones. Mentioned here first by Matthew. Jesus uses it not in blame, but in pity (Bruce). Bengel notes that Jesus says "lost" more frequently than "led astray." "If the Jewish nation could be brought to repentance the new age would dawn" (McNeile).

Matt 10:7
As ye go, preach ( $\pi$ орعvo $\mu \varepsilon v o$ к $\rho \cup \sigma \sigma \varepsilon \tau \varepsilon$ ). Present participle and present imperative. They were itinerant preachers on a "preaching tour," heralds (кприкєऽ) proclaiming good news. The summary message is the same as that of the Baptist ( 3:2) that first startled the country, "the kingdom of heaven has drawn nigh." He echoed it up and down the Jordan Valley. They are to shake Galilee with it as Jesus had done ( $4: 17$ ). That same amazing message is needed today. But "the apprentice apostles" (Bruce) could tell not a little about the King of the Kingdom who was with them.

Matt 10:9
Get you no gold ( $\mu \eta \kappa \tau \eta \sigma \eta \sigma \theta \varepsilon$ ). It is not, "Do not possess" or "own," but "do not acquire" or "procure" for yourselves, indirect middle aorist subjunctive. Gold, silver, brass (copper) in a descending scale (nor even bronze).

In your purses ( $\varepsilon \iota \varsigma \tau \alpha \varsigma \zeta \omega v \alpha \varsigma \nu \mu \omega v)$. In your girdles or belts used for carrying money.
Matt 10:10
No wallet ( $\mu \eta \pi \eta \rho \alpha v$ ). Better than "scrip." It can be either a travelling or bread bag. Deissmann (Light from the Ancient East, pp. 108f.) shows that it can mean the beggar's collecting bag as in an inscription on a monument at Kefr Hanar in Syria: "While Christianity was still young the beggar priest was making his rounds in the land of Syria on behalf of the national goddess." Deissmann also quotes a pun in the Didaskalia=Const. Apost. 3, 6 about some itinerant widows who said that they were not so much $\chi \eta \rho \alpha$ (spouseless) as $\pi \eta \rho \alpha$ (pouchless). He cites also Shakespeare, Troilus and Cressida III. iii. 145: "Time hath, my lord, a wallet at his back, wherein he puts alms for oblivion."

For the labourer is worthy of his food ( $\alpha \xi \nLeftarrow \varsigma \gamma \alpha \rho$ o $\varepsilon \rho \gamma \alpha \tau \eta \varsigma \tau \eta \varsigma \tau \rho \circ \varphi \eta \varsigma \alpha \cup \tau \circ v$ ). The sermon is worth the dinner, in other words. Luke in the charge to the seventy ( $\mathrm{Lu} 10: 7$ ) has the same words with $\mu \boldsymbol{\sigma} \theta$ ov (reward) instead of $\tau \rho \circ \varphi \eta \varsigma$ (food). In 1Ti 5:18 Paul quotes Luke's form as scripture ( $\eta \gamma \rho \alpha \varphi \eta$ ) or as a well-known saying if confined to the first quotation. The word for workman here ( $\varepsilon \rho \gamma \alpha \tau \eta$ ) is that used by Jesus in the prayer for labourers (Mt 9:38 ). The well-known Didach $\boxtimes$ or Teaching of the Twelve (xiii) shows that in the second century there was still a felt need for care on the subject of receiving pay for preaching. The travelling sophists added also to the embarrassment of the situation. The wisdom of these
restrictions was justified in Galilee at this time. Mark (Mr 6:6-13 ) and Luke (Lu 9:1-6 ) vary slightly from Matthew in some of the details of the instructions of Jesus.

Matt 10:13
If the house be worthy ( $\varepsilon \alpha \vee \eta \eta$ оıкı $\left.\alpha \xi_{ı}\right)$. Third class condition. What makes a house worthy? "It would naturally be readiness to receive the preachers and their message" (McNeile). Hospitality is one of the noblest graces and preachers receive their share of it. The apostles are not to be burdensome as guests.

Matt 10:14
Shake off the dust ( $\varepsilon \kappa \tau \iota v \alpha \xi \alpha \tau \varepsilon \tau 0 v \kappa o v i \rho \rho \tau o v)$. Shake out, a rather violent gesture of disfavour. The Jews had violent prejudices against the smallest particles of Gentile dust, not as a purveyor of disease of which they did not know, but because it was regarded as the putrescence of death. If the apostles were mistreated by a host or hostess, they were to be treated as if they were Gentiles (cf. Mt 18:17; Ac 18:6 ). Here again we have a restriction that was for this special tour with its peculiar perils.

Matt 10:15
More tolerable ( $\alpha v \varepsilon \kappa \tau о \tau \varepsilon \rho \circ v$ ). The papyri use this adjective of a convalescent. People in their vernacular today speak of feeling "tolerable." The Galileans were having more privileges than Sodom and Gomorrah had.

Matt 10:16
As sheep in the midst of wolves ( $\omega \varsigma \pi \rho \circ \beta \alpha \tau \alpha \varepsilon \nu \mu \varepsilon \sigma \omega \lambda \nu \kappa \omega \nu)$. The presence of wolves on every hand was a fact then and now. Some of these very sheep ( $10: 6$ ) at the end will turn out to be wolves and cry for Christ's crucifixion. The situation called for consummate wisdom and courage. The serpent was the emblem of wisdom or shrewdness, intellectual keenness (Ge 3:1; Ps 58:5 ), the dove of simplicity (Ho 7:11). It was a proverb, this combination, but one difficult of realization. Either without the other is bad (rascality or gullibility). The first clause with $\alpha \rho v a \varsigma$ for $\pi \rho o \beta \alpha \tau \alpha$ is in $\mathrm{Lu} 10: 3$ and apparently is in a Fragment of a Lost Gospel edited by Grenfell and Hunt. The combination of wariness and innocence is necessary for the protection of the sheep and the discomfiture of the wolves. For "harmless" (aкع $\alpha \boldsymbol{\iota} \circ$ ) Moffatt and Goodspeed have "guileless," Weymouth "innocent." The word means "unmixed" ( a privative and кєраขvvر), "unadulterated," "simple," "unalloyed."

Matt 10:17
Beware of men ( $\pi \rho \circ \sigma \varepsilon \chi \varepsilon \tau \varepsilon \alpha \pi o \tau \omega \nu \alpha \nu \theta \rho \omega \pi \omega v$ ). Ablative case with $\alpha \pi o$. Hold your mind (vovv understood) away from. The article with $\alpha \nu \theta \rho \omega \pi \omega \nu$ points back to $\lambda \nu \kappa \omega \nu$ (wolves) in 10:16.

To councils ( $\varepsilon \iota \varsigma \sigma \cup v \varepsilon \delta \rho ı \alpha)$. The local courts of justice in every Jewish town. The word is an old one from Herodotus on for any deliberative body $(\chi \circ v \chi \iota \lambda เ v \mu)$. The same word is used for the Sanhedrin in Jerusalem.

In their synagogues ( $\varepsilon v \tau 0 \iota \varsigma \sigma v v \alpha \gamma \omega \gamma \alpha \iota \varsigma \alpha \nu \tau \omega v$ ). Here not merely as the place of assembly for worship, but as an assembly of justice exercising discipline as when the man born blind was cast out of the synagogue (Joh 9:35 ). They were now after the exile in every town of any size where Jews were.

Matt 10:19
Be not anxious ( $\mu \eta \mu \varepsilon \rho \mu \nu \eta \sigma \eta \tau \varepsilon$ ). Ingressive aorist subjunctive in prohibition. "Do not become anxious" (Mt 6:31 ). "Self-defence before Jewish kings and heathen governors would be a terrible ordeal for humble Galileans. The injunction applied to cases when preparation of a speech would be impossible" (McNeile). "It might well alarm the bravest of these simple fishermen to be told that they would have to answer for their doings on Christ's behalf before Jewish councils and heathen courts" (Plummer). Christ is not talking about preparation of sermons. " In that hour " ( $\varepsilon \nu \varepsilon \kappa \varepsilon เ \nu \eta \tau \eta \omega \rho \alpha)$, if not before. The Spirit of your Father will speak to you and through you ( $10: 20$ ). Here is no posing as martyr or courting a martyr's crown, but real heroism with full loyalty to Christ.

Matt 10:22
Ye shall be hated $(\varepsilon \sigma \varepsilon \sigma \theta \varepsilon \mu \sigma \sigma 0 \mu \mu \varepsilon v o)$. Periphrastic future passive, linear action. It will go on through the ages.

For my name's sake ( $\delta 1 \alpha$ to ovo $\mu \alpha \mu \mathrm{ov}$ ). In the O.T. as in the Targums and the Talmud "the name" as here stands for the person (Mt 19:29; Ac 5:41; 9:16; 15:26). "He that endureth to the end" (o v $\pi о \mu \varepsilon เ v a \varsigma \varepsilon เ \varsigma \tau \varepsilon \lambda о \varsigma)$. Effective aorist participle with future indicative.

Matt 10:23
Till the Son of man be come ( $\varepsilon \omega \varsigma \varepsilon \lambda \theta \eta$ o vios $\tau 0 v a v \theta \rho \omega \pi \sigma v)$. Moffatt puts it "before the Son of man arrives" as if Jesus referred to this special tour of Galilee. Jesus could overtake them. Possibly so, but it is by no means clear. Some refer it to the Transfiguration, others to the coming of the Holy Spirit at Pentecost, others to the Second Coming. Some hold that Matthew has put the saying in the wrong context. Others bluntly say that Jesus was mistaken, a very serious charge to make in his instructions to these preachers. The use of $\varepsilon \omega \varsigma$ with aorist subjunctive for a future event is a good Greek idiom.

Matt 10:25
Beelzebub ( $\beta \varepsilon \varepsilon \zeta \varepsilon \beta$ ou $\lambda$ according to $B, \beta \varepsilon \varepsilon \lambda \zeta \varepsilon \beta o u \lambda$ by most Greek MSS., $\beta \varepsilon \varepsilon \lambda \zeta \varepsilon \beta o u \beta$ by many non-Greek MSS.). The etymology of the word is also unknown, whether "lord of a dwelling" with a pun on "the master of the house" (оккоб $\varepsilon \sigma \pi о \tau \eta v$ ) or "lord of flies" or "lord of dung" or "lord of idolatrous sacrifices." It is evidently a term of reproach. "An opprobrious epithet; exact form of the word and meaning of the name have given more trouble to commentators than it is all worth" (Bruce). See Mt 12:24 .

Matt 10:26
Fear them not therefore ( $\mu \eta$ ouv $\varphi o \beta \eta \theta \eta \tau \varepsilon$ av $о ⿱ 宀$ ). Repeated in verses 28 and 31 ( $\mu \eta$ $\varphi о \beta \varepsilon \iota \sigma \theta \varepsilon$ present middle imperative here in contrast with aorist passive subjunctive in the
preceding prohibitions). Note also the accusative case with the aorist passive subjunctive, transitive though passive. See same construction in Lu 12:5 . In Mt 10:28 the construction is with $\alpha \pi 0$ and the ablative, a translation Hebraism as in Lu 12:4 (Robertson, Grammar of the Greek N.T. in the Light of Historical Research, p. 577).

Matt 10:28
Destroy both soul and body in hell ( $\kappa \alpha \psi v \chi \eta \nu \kappa \alpha \sigma \omega \mu \alpha \alpha \pi о \lambda \varepsilon \sigma \alpha \varepsilon \nu \gamma \varepsilon \varepsilon v \nu \eta$ ). Note "soul" here of the eternal spirit, not just life in the body. "Destroy" here is not annihilation, but eternal punishment in Gehenna (the real hell) for which see on 5:22. Bruce thinks that the devil as the tempter is here meant, not God as the judge, but surely he is wrong. There is no more needed lesson today than the fear of God.

Matt 10:29
Two sparrows ( $\delta v o \sigma \tau \rho o v \theta ı \alpha)$. Diminutive of $\sigma \tau \rho o v \theta$ oc and means any small bird, sparrows in particular. They are sold today in the markets of Jerusalem and Jaffa. "For a farthing" ( $\alpha \sigma \sigma \alpha \rho \circ v)$ is genitive of price. Only here and Lu 12:6 in the N.T. Diminutive form of the Roman as, slightly more than half an English penny.

Without your Father ( $\alpha v \varepsilon v$ tov $\pi \alpha \tau \rho \circ \varsigma \nu \mu \omega v$ ). There is comfort in this thought for us all. Our father who knows about the sparrows knows and cares about us.

Matt 10:31
Than many sparrows ( $\pi \mathrm{o} \lambda \lambda \omega v \sigma \tau \rho \circ \cup \theta \omega \omega v$ ). Ablative case of comparison with $\delta 1 \alpha \varphi \varepsilon \rho \varepsilon \tau \varepsilon$ (our differ).

Matt 10:32
Shall confess me (o 0 o $\lambda \boldsymbol{\gamma} \eta \sigma \varepsilon \varepsilon v \varepsilon \mu \mathrm{o}$ ). An Aramaic idiom, not Hebrew, see also Lu 12:8 . So also here, "him will I also confess" (o $о \boldsymbol{\lambda} \boldsymbol{\lambda} \boldsymbol{\gamma} \eta \sigma \omega$ к'a $\alpha \omega \varepsilon \nu \alpha \nu \tau \omega$ ). Literally this Aramaic idiom reproduced in the Greek means "confess in me," indicating a sense of unity with Christ and of Christ with the man who takes the open stand for him.

Matt 10:33
Shall deny me ( $\alpha \rho \vee \eta \sigma \eta \tau \alpha \mu \varepsilon$ ). Aorist subjunctive here with ootıc, though future indicative $о \mu о \lambda о ү \eta \sigma \varepsilon$ above. Note accusative here (case of extension), saying "no" to Christ, complete breach. This is a solemn law, not a mere social breach, this cleavage by Christ of the man who repudiates him, public and final.

Matt 10:34
I came not to send peace, but a sword (ovк $\eta \lambda \theta$ ov $\beta \alpha \lambda \varepsilon \iota v \varepsilon \iota \rho \eta \nu \eta \nu, \alpha \lambda \lambda \alpha \mu \alpha \chi \alpha \iota \rho \alpha v$ ). A bold and dramatic climax. The aorist infinitive means a sudden hurling of the sword where peace was expected. Christ does bring peace, not as the world gives, but it is not the force of compromise with evil, but of conquest over wrong, over Satan, the triumph of the cross. Meanwhile there will be inevitably division in families, in communities, in states. It is no namby-pamby sentimentalism that Christ preaches, no peace at any price. The Cross is

Christ's answer to the devil's offer of compromise in world dominion. For Christ the kingdom of God is virile righteousness, not mere emotionalism.

Matt 10:35
Set at variance ( $\delta>\chi \propto \sigma \alpha)$. Literally divide in two, $\delta 1 \chi \alpha$. Jesus uses Mic 7:1-6 to describe the rottenness of the age as Micah had done. Family ties and social ties cannot stand in the way of loyalty to Christ and righteous living.

The daughter-in-law ( $v v \mu \varphi \eta v$ ). Literally bride, the young wife who is possibly living with the mother-in-law. It is a tragedy to see a father or mother step between the child and Christ.

Matt 10:38
Doth not take his cross (ov $\lambda \alpha \mu \beta \alpha v \varepsilon ~ \tau o v ~ \sigma \tau \alpha u \rho o v ~ \alpha u \tau o v) . ~ T h e ~ f i r s t ~ m e n t i o n ~ o f ~ c r o s s ~$ in Matthew. Criminals were crucified in Jerusalem. It was the custom for the condemned person to carry his own cross as Jesus did till Simon of Cyrene was impressed for that purpose. The Jews had become familiar with crucifixion since the days of Antiochus Epiphanes and one of the Maccabean rulers (Alexander Jannaeus) had crucified 800 Pharisees. It is not certain whether Jesus was thinking of his own coming crucifixion when he used this figure, though possible, perhaps probable. The disciples would hardly think of that outcome unless some of them had remarkable insight.

Matt 10:39
Shall lose it ( $\alpha \pi о \lambda \varepsilon \sigma \varepsilon \alpha v \tau \eta v$ ). This paradox appears in four forms according to Allen (I) Mt 10:39 (2) Mr 8:35; Mt 16:25; Lu 9:24 (3) Lu 17:33 (4) Joh 12:25. The Wisdom of Sirach (Hebrew text) in 51:26 has: "He that giveth his life findeth her (wisdom)." It is one of the profound sayings of Christ that he repeated many times. Plato (Gorgias 512) has language somewhat similar though not so sharply put. The article and aorist participles here (o $\varepsilon v \rho \omega v$, о $\alpha \pi о \lambda \varepsilon \sigma \alpha \varsigma)$ are timeless in themselves just like o $\delta \varepsilon \chi о \mu \varepsilon$ voc in verses 40 and 41.

Matt 10:41
In the name of a prophet ( $\varepsilon \varsigma \varsigma ~ о v о \mu \alpha \pi \rho о \varphi \eta \tau о v)$. "Because he is a prophet" (Moffatt). In an Oxyrhynchus Papyrus 37 (A.D. 49) we find ovouat $\varepsilon \lambda \varepsilon v \theta \varepsilon \rho o v$ in virtue of being freeborn. "He that receiveth a prophet from no ulterior motive, but simply qua prophet (ut prophetam, Jer.) would receive a reward in the coming age equal to that of his guest" (McNeile). The use of $\varepsilon \varsigma \varsigma$ here is to be noted. In reality $\varepsilon \varsigma \varsigma$ is simply $\varepsilon v$ with the same meaning. It is not proper to say that $\varepsilon \varsigma \varsigma$ has always to be translated "into." Besides these examples of $\varepsilon ı \varsigma ~ o v o \mu \alpha$ in verses 41 and 43 see Mt 12:41 $\varepsilon \iota \varsigma ~ \tau о ~ к \eta \rho ט ү \mu \alpha ~ I ~ \omega v a ~(s e e ~ R o b e r t s o n ' s ~$ Grammar, p. 593).

Unto one of these little ones ( $\varepsilon v \alpha \tau \omega v \mu \kappa \rho \omega \nu \tau 0 v \tau \omega v$ ). Simple believers who are neither apostles, prophets, or particularly righteous, just "learners," "in the name of a disciple" (عıৎ ovo $\mu \alpha \mu \theta \eta \tau \tau v)$. Alford thinks that some children were present (cf. Mt 18:2-6 ).

## Matthew 11

Matt 11:1
He departed thence to teach and preach ( $\mu \varepsilon \tau \varepsilon \beta \eta \varepsilon \kappa \varepsilon \iota \theta \varepsilon \nu \tau о v \delta \iota \delta \alpha \sigma \kappa \varepsilon \iota \nu \kappa \alpha \kappa \eta \rho \nu \sigma \sigma \varepsilon \iota \nu)$. In five instances $(7: 28 ; 11: 1 ; 13: 53 ; 19: 1 ; 26: 1)$ after great discourses by Jesus "the transition to what follows is made with the formula, 'And it came to pass when Jesus had ended"' (McNeile). This is a wrong chapter division, for $11: 1$ belongs with the preceding section. " Commanding" ( $\delta \iota \alpha \tau \alpha \sigma \sigma \omega \nu$, complementary participle with $\varepsilon \tau \varepsilon \lambda \varepsilon \sigma \varepsilon \nu$ ), means giving orders in detail ( $\delta, \alpha-$ ) for each of them. Note both "teach and preach" as in $4: 23$. Where did Jesus go? Did he follow behind the twelve as he did with the seventy "whither he himself was about to come" (Lu 10:1)? Bruce holds with Chrysostom that Jesus avoided the places where they were, giving them room and time to do their work. But, if Jesus himself went to the chief cities of Galilee on this tour, he would be compelled to touch many of the same points. Jesus would naturally follow behind at some distance. At the end of the tour the apostles come together in Capernaum and tell Jesus all that they had done and that they had taught (Mr 6:30 ). Matthew follows the general outline of Mark, but the events are not grouped in chronological order here.

Matt 11:2
John heard in the prison (o $\delta \varepsilon \mathrm{I} \omega \alpha \nu \eta \varsigma \alpha \kappa о \nu \sigma \alpha \varsigma \varepsilon \nu \tau \omega \delta \varepsilon \sigma \mu \omega \tau \eta \rho \iota \omega$ ). Probably (Lu 7:18 ) the raising of the son of the widow of Nain. The word for prison here is the place where one was kept bound (Ac 5:21,23; 16:26 ). See Mt 4:12. It was in Machaerus east of the Dead Sea which at this time belonged to the rule of Herod Antipas (Jos. Ant. XVIII. v.2). John's disciples had access to him. So he sent word by ( $\delta$ ıa, not $\delta v o$ as in Lu 7:19 ) them to Jesus.

Matt 11:3
He that cometh (o e $\rho \chi о \mu \varepsilon \nu о \varsigma)$. This phrase refers to the Messiah (Mr 11:9; Lu 13:35; 19:38; Heb 10:37; Ps 118:26; Da 7:13 ). Some rabbis applied the phrase to some forerunner of the kingdom (McNeile). Was there to be "another" ( $\varepsilon \tau \varepsilon \rho \circ v$ ) after Jesus? John had been in prison "long enough to develop a prison mood" (Bruce). It was once clear enough to him, but his environment was depressing and Jesus had done nothing to get him out of Machaerus (see chapter IX in my John the Loyal). John longed for reassurance.

Matt 11:4
The things which ye do hear and see ( $\alpha$ aкоט $\tau \varepsilon \kappa \alpha \beta \lambda \varepsilon \pi \varepsilon \tau \varepsilon$ ). This symbolical message was for John to interpret, not for them.

Matt 11:5
And the dead are raised up ( $\kappa \alpha \nu \varepsilon \kappa \rho о \varepsilon \gamma \varepsilon \iota \rho о \nu \tau \alpha$ ). Like that of the son of the widow of Nain. Did he raise the dead also on this occasion? "Tell John your story over again and remind him of these prophetic texts, Isa $35: 5 ; 61: 1$ " (Bruce). The items were convincing
enough and clearer than mere eschatological symbolism. "The poor" in particular have the gospel, a climax.

Matt 11:6
Whosoever shall find none occasion of stumbling in me (os $\alpha v \mu \eta \sigma \kappa \alpha v \delta \alpha \lambda ı \sigma \theta \eta \varepsilon v$ $\varepsilon \mu o)$. Indefinite relative clause with first aorist passive subjunctive. This beatitude is a rebuke to John for his doubt even though in prison. Doubt is not a proof of superior intellect, scholarship, or piety. John was in the fog and that is the time not to make serious decisions. "In some way even the Baptist had found some occasion of stumbling in Jesus" (Plummer).

Matt 11:7
As these went their way ( $\tau o v \tau \omega v \pi \circ \rho \varepsilon v o \mu \varepsilon \nu \omega v$ ). Present participle genitive absolute. The eulogy of Jesus was spoken as the two disciples of John were going away. Is it a matter of regret that they did not hear this wondrous praise of John that they might cheer him with it? "It may almost be called the funeral oration of the Baptist, for not long afterwards Herodias compassed his death" (Plummer).

A reed shaken by the wind ( $\kappa \alpha \lambda \mu \rho \nu v \pi о ~ \alpha \nu \varepsilon \mu о v \sigma \alpha \lambda \varepsilon v o \mu \varepsilon v о \nu)$. Latin calamus. Used of the reeds that grew in plenty in the Jordan Valley where John preached, of a staff made of a reed (Mt 27:29) , as a measuring rod (Re 11:1), of a writer's pen (3Jo 1:13). The reeds by the Jordan bent with the wind, but not so John.

Matt 11:9
And much more than a prophet ( $\kappa \alpha \pi \varepsilon \rho \iota \sigma \sigma о \tau \varepsilon \rho о \nu \pi \rho о \varphi \eta \tau о v$ ). Ablative of comparison after $\pi \varepsilon \rho เ \sigma \sigma o \tau \varepsilon \rho \circ v$ itself comparative though meaning exceeding (surrounded by, overflowing). John had all the great qualities of the true prophet: "Vigorous moral conviction, integrity, strength of will, fearless zeal for truth and righteousness" (Bruce). And then he was the Forerunner of the Messiah (Mal 3:1).

## Matt 11:11

He that is but little (о $\mu$ ккооєгос). The Authorized Version here has it better, "he that is least." The article with the comparative is a growing idiom in the vernacular Koine for the superlative as in the modern Greek it is the only idiom for the superlative (Robertson, Grammar of the Greek N.T., p. 668). The papyri and inscriptions show the same construction. The paradox of Jesus has puzzled many. He surely means that John is greater ( $\mu \varepsilon \iota \zeta \omega v$ ) than all others in character, but that the least in the kingdom of heaven surpasses him in privilege. John is the end of one age, "until John" ( $11: 14$ ), and the beginning of the new era. All those that come after John stand upon his shoulders. John is the mountain peak between the old and the new.

Matt 11:12
Suffereth violence ( $\beta \backslash \alpha \zeta \varepsilon \tau \alpha$ ). This verb occurs only here and in Lu 16:16 in the N.T. It seems to be middle in Luke and Deissmann (Bible Studies, p. 258) quotes an inscription "where $\beta \iota \alpha \zeta$ о $\mu \alpha$ is without doubt reflexive and absolute" as in $\mathrm{Lu} 16: 16$. But there are numer-
ous papyri examples where it is passive (Moulton and Milligan, Vocabulary, etc.) so that "there seems little that promises decisive help for the difficult Logion of Mt 11:12; Lu 16:16 ." So then in Mt 11:12 the form can be either middle or passive and either makes sense, though a different sense. The passive idea is that the kingdom is forced, is stormed, is taken by men of violence like "men of violence take it by force" ( $\beta \iota \alpha \sigma \tau \alpha \alpha \rho \pi \alpha \zeta_{o v \sigma ı v} \alpha \cup \tau \eta v$ ) or seize it like a conquered city. The middle voice may mean "experiences violence" or "forces its way" like a rushing mighty wind (so Zahn holds). These difficult words of Jesus mean that the preaching of John "had led to a violent and impetuous thronging to gather round Jesus and his disciples" (Hort, Judaistic Christianity, p. 26).

Matt 11:14
This is Elijah (avtoc eđ兀ıv Eleıac). Jesus here endorses John as the promise of Malachi. The people understood Mal 4:1 to mean the return of Elijah in person. This John denied as to himself (Joh 1:21). But Jesus affirms that John is the Elijah of promise who has come already (Mt 17:12 ). He emphasizes the point: "He that hath ears to hear, let him hear."

Matt 11:17
 parable of the children playing in the market place is given also in Lu 7:31f. Had Jesus as a child in Nazareth not played games with the children? He had certainly watched them often since. The interest of Christ in children was keen. He has really created the modern child's world out of the indifference of the past. They would not play wedding or funeral in a peevish fret. These metaphors in the Gospels are vivid to those with eyes to see. The $\alpha \gamma o \rho \alpha$ was originally the assembly, then the forum or public square where the people gathered for trade or for talk as in Athens (Ac 17:17) and in many modern towns. So the Roman Forum. The oriental bazaars today are held in streets rather than public squares. Even today with all the automobiles children play in the streets. In English the word "cheap" (Cheapside) meant only barter and price, not cheap in our sense. The word for mourn ( $\varepsilon \kappa \circ \psi \alpha \sigma \theta \varepsilon$ ) means to beat the heart, direct middle, after the fashion of eastern funeral lamentations.

Matt 11:19
Wisdom is justified by her works ( $\varepsilon \delta \iota \alpha \alpha \omega \theta \eta \quad \alpha \pi 0 \tau \omega v \varepsilon \rho \gamma \omega v \alpha v \tau \eta \varsigma)$. A timeless aorist passive (Robertson, Grammar, p. 836f.). The word "justified" means "set right" Luke (Lu 7:35 ) has "by all her children" as some MSS. have here to make Matthew like Luke. These words are difficult, but understandable. God's wisdom has planned the different conduct of both John and Jesus. He does not wish all to be just alike in everything. "This generation" (verse 16) is childish, not childlike, and full of whimsical inconsistencies in their faultfinding. They exaggerate in each case. John did not have a demon and Jesus was not a glutton or a winebibber. "And, worse than either, for $\varphi \iota \lambda o s$ is used in a sinister sense and implies that Jesus was the comrade of the worst characters, and like them in conduct. A malicious nick-
name at first, it is now a name of honour: the sinner's lover" (Bruce). Cf. Lu 15:2 . The plan of God is justified by results.

Matt 11:20
Most of his mighty works ( $\alpha \pi \lambda \varepsilon ı \sigma \tau \alpha \delta \nu v \alpha \mu \varepsilon ı \varsigma ~ \alpha v \tau o v)$. Literally, "His very many mighty works" if elative as usual in the papyri (Moulton, Prolegomena, p. 79; Robertson, Grammar, p. 670). But the usual superlative makes sense here as the Canterbury translation has it. This word $\delta u v a \mu c ̧$ for miracle presents the notion of power like our dynamite. The word $\tau \varepsilon \rho a \varsigma$ is wonder, portent, miraculum (miracle) as in Ac 2:19. It occurs only in the plural and always with $\sigma \eta \mu \varepsilon \iota \alpha$. The word $\sigma \eta \mu \varepsilon \iota \circ v$ means sign (Mt 12:38) and is very common in John's Gospel as well as the word $\varepsilon \rho \gamma \circ v$ (work) as in Joh 5:36. Other words used are $\pi \alpha \rho \alpha \delta_{0} \xi \circ v$, our word paradox, strange (Lu 5:26), $\varepsilon v \delta o \xi o v$, glorious (Lu 13:17), $\theta a \nu \mu \alpha \sigma ı v$, wonderful (Mt 21:15 ).

Matt 11:21
Chorazin (Xopaไgıv). Mentioned only here and in Lu 10:13. Proof of "the meagreness of our knowledge of Judaism in the time of Christ" (Plummer) and of the many things not told in our Gospels (Joh 21:25 ). We know something of Bethsaida and more about Capernaum as places of privilege. But ( $\pi \lambda \eta \nu$, howbeit) neither of these cities repented, changed their conduct. Note condition of the second class, determined as unfulfilled in verses 21 and 23.

Matt 11:25
At that season Jesus answered and said ( $\varepsilon v \varepsilon \kappa \varepsilon เ v \omega \tau \omega$ каı $\omega$ алокрı $\varepsilon \varepsilon ı \varsigma \varepsilon \iota \pi \varepsilon v$ ). Spoke to his Father in audible voice. The time and place we do not know. But here we catch a glimpse of Jesus in one of his moods of worship. "It is usual to call this golden utterance a prayer, but it is at once prayer, praise, and self-communing in a devout spirit" (Bruce). Critics are disturbed because this passage from the Logia of Jesus or Q of Synoptic criticism (Mt 11:25-30; Lu 10:21-24) is so manifestly Johannine in spirit and very language, "the Father" (o $\pi \alpha \tau \eta \rho$ ), "the son" (o vioc), whereas the Fourth Gospel was not written till the close of the first century and the Logia was written before the Synoptic Gospels. The only satisfying explanation lies in the fact that Jesus did have this strain of teaching that is preserved in John's Gospel. Here he is in precisely the same mood of elevated communion with the Father that we have reflected in John 14 to 17. Even Harnack is disposed to accept this Logion as a genuine saying of Jesus. The word "thank" (oнолоүоv $\alpha$ ) is better rendered "praise" (Moffatt). Jesus praises the Father "not that the бoبo were ignorant, but that the $\nu \eta \pi \ldots$ knew" (McNeile).

Matt 11:26
Wellpleasing in thy sight ( $\varepsilon v \delta о к ⿺ \alpha ~ \varepsilon \mu \pi \rho о \sigma \theta \varepsilon v \sigma o v)$. "For such has been thy gracious will" (Weymouth).

Matt 11:27

All things have been delivered unto me of my Father ( $\pi \alpha \nu \tau \alpha \mu о \pi \alpha \rho \varepsilon \delta o \theta \eta \nu \pi o ~ \tau o v$ $\pi \alpha \tau \rho \circ \varsigma \mu \circ v$ ). This sublime claim is not to be whittled down or away by explanations. It is the timeless aorist like $\varepsilon \delta 0 \theta \eta$ in $28: 18$ and "points back to a moment in eternity, and implies the pre-existence of the Messiah" (Plummer). The Messianic consciousness of Christ is here as clear as a bell. It is a moment of high fellowship. Note $\varepsilon \pi \iota \gamma \iota v \omega \sigma \kappa \varepsilon$ twice for "fully know." Note also $\beta$ ou $\lambda \eta \tau \alpha=$ wills, is willing. The Son retains the power and the will to reveal the Father to men.

Matt 11:28
Come unto me ( $\delta \varepsilon \cup \tau \varepsilon \pi \rho \circ \varsigma \mu \varepsilon$ ). Verses 28 to 30 are not in Luke and are among the special treasures of Matthew's Gospel. No sublimer words exist than this call of Jesus to the toiling and the burdened ( $\pi \varepsilon \varphi о \rho \tau \iota \sigma \mu \varepsilon v o$, perfect passive participle, state of weariness) to come to him. He towers above all men as he challenges us. "I will refresh you" ( $\kappa$ ' $\alpha \gamma$ o $\alpha v \alpha \pi \alpha v \sigma \omega v \mu \alpha \varsigma)$. Far more than mere rest, rejuvenation. The English slang expression "rest up" is close to the idea of the Greek compound $\alpha v \alpha-\pi \alpha v \omega$. It is causative active voice.

Matt 11:29
Take my yoke upon you and learn of me ( $\alpha \rho \alpha \tau \varepsilon$ тоv $\zeta \cup \gamma о \nu \mu о \nu \varepsilon \varphi \varphi^{\prime} \nu \mu \propto \kappa \alpha \mu \alpha \theta \varepsilon \tau \varepsilon$ $\left.\alpha \pi^{\prime} \varepsilon \mu o v\right)$. The rabbis used yoke for school as many pupils find it now a yoke. The English word "school" is Greek for leisure ( $\sigma \chi 0 \lambda \eta$ ). But Jesus offers refreshment ( $\alpha v a \pi \alpha v \sigma t v$ ) in his school and promises to make the burden light, for he is a meek and humble teacher. Humility was not a virtue among the ancients. It was ranked with servility. Jesus has made a virtue of this vice. He has glorified this attitude so that Paul urges it (Php 2:3), "in lowliness of mind each counting other better than himself." In portions of Europe today people place yokes on the shoulders to make the burden easier to carry. Jesus promises that we shall find the yoke kindly and the burden lightened by his help. "Easy" is a poor translation of $\chi \rho \eta \sigma \tau o \varsigma$. Moffatt puts it "kindly." That is the meaning in the Septuagint for persons. We have no adjective that quite carries the notion of kind and good. The yoke of Christ is useful, good, and kindly. Cf. So 1:10 .

## Matthew 12

Matt 12:1
On the sabbath day through the cornfields ( $\tau о \iota \varsigma \alpha \beta \beta \alpha \sigma \iota \nu \delta \iota \tau \omega v \sigma \pi о \rho ı \mu \nu v$ ). This paragraph begins exactly like 11:25 "at that season" ( $\varepsilon v \varepsilon \kappa \varepsilon เ v \omega \tau \omega \kappa \alpha \iota \rho \omega$ ), a general statement with no clear idea of time. So also 14:1. The word kalpos means a definite and particular time, but we cannot fix it. The word "cornfields" does not mean our maize or Indian corn, but simply fields of grain (wheat or even barley).

Matt 12:2
Thy disciples do ( $\mathrm{o} \mu \alpha \theta \eta \tau \alpha$ $\sigma o v \pi o เ o v \sigma ı v$ ). These critics are now watching a chance and they jump at this violation of their Pharisaic rules for Sabbath observance. The disciples were plucking the heads of wheat which to the Pharisees was reaping and were rubbing them in their hands ( Lu 6:1) which was threshing.

Matt 12:3
What David did ( $\tau \varepsilon \pi \sigma \not \eta \sigma \varepsilon v \Delta \alpha v \varepsilon ו \delta$ ). From the necessity of hunger. The first defence made by Christ appeals to the conduct of David (2Sa 21:6 ). David and those with him did "what was not lawful" (o ouk ع $\xi \circ \vee \eta v$ ) precisely the charge made against the disciples (o ouk $\varepsilon \xi \varepsilon \sigma \tau \iota v$ in verse 2 ).

Matt 12:6
One greater than the temple ( $\tau \circ \cup \iota \varepsilon \rho \circ \cup \mu \varepsilon \iota \zeta \circ$ ). Ablative of comparison, $\tau \circ \cup \iota \varepsilon \rho \circ \cup$. The Textus Receptus has $\mu \varepsilon \zeta \zeta \omega v$, but the neuter is correct. Literally, "something greater than the temple." What is that? It may still be Christ, or it may be: "The work and His disciples were of more account than the temple" (Plummer). "If the temple was not subservient to Sabbath rules, how much less the Messiah!" (Allen).

Matt 12:7
The guiltless (touc avaitiouc). So in verse 5. Common in ancient Greek. No real ground against, it means $\alpha v+$ altıoc. Jesus quotes Ho 6:6 here as he did in Mt 9:13. A pertinent prophecy that had escaped the notice of the sticklers for ceremonial literalness and the letter of the law.

Matt 12:9
Lord of the Sabbath (кvpıos tov $\sigma \alpha \beta \beta a \tau o v$ ). This claim that he as the Son of Man is master of the Sabbath and so above the Pharisaic regulations angered them extremely. By the phrase "the Son of man" here Jesus involves the claim of Messiahship, but as the Representative Man he affirms his solidarity with mankind, "standing for the human interest" (Bruce) on this subject.

Matt 12:10

Is it lawful? ( $\varepsilon \varepsilon \xi \varepsilon \sigma \tau \iota v$ ). The use of $\varepsilon$ in direct questions is really elliptical and seems an imitation of the Hebrew (Robertson, Grammar, p. 916). See also Mt 19:3. It is not translated in English.

Matt 12:12
How much then is a man ( $\pi \sigma \sigma \omega$ ovv $\delta \iota \alpha \varphi \varepsilon \rho \varepsilon \alpha v \theta \rho \omega \pi \sigma \varsigma)$. Another of Christ's pregnant questions that goes to the roots of things, an a fortiori argument. "By how much does a human being differ from a sheep? That is the question which Christian civilization has not even yet adequately answered" (Bruce). The poor pettifogging Pharisees are left in the pit.

Matt 12:13
Stretch forth thy hand ( $\varepsilon \kappa \tau \varepsilon เ \nu o v ~ \sigma o v ~ \tau \eta \nu \chi \varepsilon ı \rho \alpha$ ). Probably the arm was not withered, though that is not certain. But he did the impossible. "He stretched it forth," straight, I hope, towards the Pharisees who were watching Jesus (Mr 3:2).

Matt 12:14
Took counsel against him ( $\sigma \cup \mu \beta$ оv $\lambda \iota v \varepsilon \lambda \alpha \beta o v \kappa \alpha \tau^{\prime} \alpha v \tau o v$ ). An imitation of the Latin concilium capere and found in papyri of the second century A.D. (Deissmann, Bible Studies, p. 238.) This incident marks a crisis in the hatred of the Pharisees toward Jesus. They bolted out of the synagogue and actually conspired with their hated rivals, the Herodians, how to put Jesus to death (Mr 3:6; Mt 12:14; Lu 6:11 ). By "destroy" ( $\alpha \pi 0 \lambda \varepsilon \sigma \omega \sigma \iota$ ) they meant "kill."

Matt 12:15
Perceiving ( $\gamma \vee 0 \cup \varsigma$ ). Second aorist active participle of $\gamma \iota \omega \omega \sigma \kappa \omega$. Jesus read their very thoughts. They were now plain to any one who saw their angry countenances.

## Matt 12:17

That it might be fulfilled ( $\imath \propto \alpha \pi \lambda \eta \rho \omega \theta \eta$ ). The final use of $\imath v \alpha$ and the sub-final just before (verse 16). The passage quoted is Isa 42:1-4 "a very free reproduction of the Hebrew with occasional side glances at the Septuagint" (Bruce), possibly from an Aramaic collection of Testimonia (McNeile). Matthew applies the prophecy about Cyrus to Christ.

Matt 12:18
My beloved (o aүa $\quad$ п $\tau \circ \varsigma \mu \mathrm{ov}$ ). This phrase reminds one of Mt 3:17 (the Father's words at Christ's baptism).

Matt 12:20
A bruised reed ( $\kappa \alpha \lambda \alpha \mu о \nu \sigma \nu \nu \tau \varepsilon \tau \rho \iota \mu \mu \varepsilon \nu \nu \nu$ ). Perfect passive participle of $\sigma v \nu \tau \rho \mu \omega$. A crushed reed he will not break. The curious augment in $\kappa \alpha \tau \varepsilon \alpha \xi \varepsilon$ (future active indicative) is to be noted. The copyists kept the augment where it did not belong in this verb (Robertson, Grammar, p. 1212) even in Plato. "Smoking flax" ( $\lambda \iota v o v \tau \nu \varphi o \mu \varepsilon \nu o v$ ). The wick of a lamp, smoking and flickering and going out. Only here in N.T. Flax in Ex 9:31. Vivid images that picture Jesus in the same strain as his own great words in Mt 11:28-30 .

Matt 12:23

Is this the Son of David? ( $\mu \eta \tau$ ovtoc $\varepsilon \sigma \tau i v$ o vios $\Delta \alpha u \varepsilon \iota$ ?). The form of the question expects the answer "no," but they put it so because of the Pharisaic hostility towards Jesus. The multitudes "were amazed" or "stood out of themselves" ( $\varepsilon \xi \iota \sigma \tau \alpha \nu \tau 0)$, imperfect tense, vividly portraying the situation. They were almost beside themselves with excitement.

Matt 12:24
The Pharisees (o $\delta \varepsilon$ Фapıoaıo). Already (Mt 9:32-34) we have had in Matthew the charge that Jesus is in league with the prince of demons, though the incident may be later than this one. See on 10:25 about "Beelzebub." The Pharisees feel that the excited condition of the crowds and the manifest disposition to believe that Jesus is the Messiah (the Son of David) demand strenuous action on their part. They cannot deny the fact of the miracles for the blind and dumb men both saw and spoke ( 12:22). So in desperation they suggest that Jesus works by the power of Beelzebub the prince of the demons.

Matt 12:25
Knowing their thoughts ( $\varepsilon \iota \delta \omega \varsigma \delta \varepsilon \tau \alpha \varsigma \varepsilon v \theta v \mu \eta \sigma \varepsilon \iota \varsigma \alpha v \tau \omega v)$. What they were revolving in their minds. They now find out what a powerful opponent Jesus is. By parables, by a series of conditions (first class), by sarcasm, by rhetorical question, by merciless logic, he lays bare their hollow insincerity and the futility of their arguments. Satan does not cast out Satan. Note timeless aorist passive $\varepsilon \mu \varepsilon \rho \iota \sigma \theta \eta$ in $26, \varepsilon \varphi \theta a \sigma \varepsilon v$ in 28 (simple sense of arriving as in Php 3:16 from $\varphi \theta \alpha v \omega$ ). Christ is engaged in deathless conflict with Satan the strong man ( 29). "Goods" (бк\&uף) means house-gear, house furniture, or equipment as in Lu 17:36 and Ac 27:17, the tackling of the ship.

Matt 12:30
He that is not with me ( $o \mu \eta \omega v \mu \varepsilon \tau^{\prime} \varepsilon \mu \circ v$ ). With these solemn words Jesus draws the line of cleavage between himself and his enemies then and now. Jesus still has his enemies who hate him and all noble words and deeds because they sting what conscience they have into fury. But we may have our choice. We either gather with ( $\sigma v v \alpha \gamma \omega v$ ) Christ or scatter ( $\sigma \kappa о \rho \pi \iota \zeta \varepsilon)$ to the four winds. Christ is the magnet of the ages. He draws or drives away. "Satan is the arch-waster, Christ the collector, Saviour" (Bruce).

Matt 12:31
But the blasphemy against the Spirit ( $\eta \delta \varepsilon$ tov $\pi \nu \varepsilon v \mu \alpha \tau о \varsigma ~ \beta \lambda \alpha \sigma \varphi \eta \mu \mu \alpha$ ). Objective
 it plainer. What is the blasphemy against the Holy Spirit? These Pharisees had already committed it. They had attributed the works of the Holy Spirit by whose power Jesus wrought his miracles ( $12: 28$ ) to the devil. That sin was without excuse and would not be forgiven in their age or in the coming one (12:32). People often ask if they can commit the unpardonable sin. Probably some do who ridicule the manifest work of God's Spirit in men's lives and attribute the Spirit's work to the devil.

Matt 12:34

Ye offspring of vipers ( $\gamma \varepsilon \nu \nu \eta \mu \alpha \tau \alpha \varepsilon \chi \iota \delta \omega \nu)$ ). These same terrible words the Baptist had used to the Pharisees and Sadducees who came to his baptism (Mt 3:7). But these Pharisees had deliberately made their choice and had taken Satan's side. The charge against Jesus of being in league with Satan reveals the evil heart within. The heart "spurts out" $(\varepsilon \kappa \beta \alpha \lambda \lambda \varepsilon)$ good or evil according to the supply (treasure, $\theta \eta \sigma \alpha v \rho o v)$ within. Verse 33 is like Mt 7:17-19. Jesus often repeated his crisp pungent sayings as every teacher does.

Matt 12:36
Every idle word ( $\pi \alpha v \rho \eta \mu \alpha \alpha \rho \gamma o v)$. An ineffective, useless word ( $\alpha$ privative and $\varepsilon \rho \gamma o v$ ). A word that does no good and so is pernicious like pernicious anaemia. It is a solemn thought. Jesus who knows our very thoughts ( $12: 25$ ) insists that our words reveal our thoughts and form a just basis for the interpretation of character ( $12: 37$ ). Here we have judgment by words as in 25:31-46 where Jesus presents judgment by deeds. Both are real tests of actual character. Homer spoke of "winged words" ( $\pi \tau \varepsilon \rho o \varepsilon v \tau \alpha \varepsilon \pi \varepsilon \alpha$ ). And by the radio our words can be heard all round the earth. Who knows where they stop?

Matt 12:38
A sign from thee ( $\alpha \pi \sigma \sigma o v \sigma \eta \mu \varepsilon ו \sigma v$ ). One wonders at the audacity of scribes and Pharisees who accused Jesus of being in league with Satan and thus casting out demons who can turn round and blandly ask for a "sign from thee." As if the other miracles were not signs! "The demand was impudent, hypocritical, insulting" (Bruce).

Matt 12:39
An evil and adulterous generation ( $\gamma \varepsilon v \varepsilon \alpha \pi о \nu \eta \rho \alpha \kappa \alpha \mu \circ \iota \chi \alpha \lambda \iota \varsigma)$. They had broken the marriage tie which bound them to Jehovah (Plummer). See Ps 73:27; Isa 57:3ff.; 62:5; Eze 23:27; Jas 4:4; Re 2:20. What is "the sign of Jonah?"

Matt 12:40
The whale ( $\tau 0 \cup \kappa \eta \tau о \cup \varsigma)$. Sea-monster, huge fish. In Jon 2:1 the LXX has $\kappa \eta \tau \varepsilon \mu \varepsilon \gamma \alpha \lambda \omega$. "Three days and three nights" may simply mean three days in popular speech. Jesus rose "on the third day" (Mt 16:21), not "on the fourth day." It is just a fuller form for "after three days" (Mr 8:31; 10:34 ).

Matt 12:41
In the judgment ( $\varepsilon \nu \tau \eta \kappa \rho เ \sigma \varepsilon$ ). Except here and in the next verse Matthew has "day of judgment" ( $\eta \mu \varepsilon \rho \alpha \kappa \rho \iota \sigma \varepsilon \omega \varsigma)$ as in $10: 15 ; 11: 22,24 ; 12: 36$. Luke (Lu 10:14) has $\varepsilon \nu \tau \eta \kappa \rho \iota \sigma \varepsilon$.

They repented at the preaching of Jonah ( $\mu \varepsilon \tau \varepsilon v o \eta \sigma o v \varepsilon ı \varsigma ~ \tau о ~ \kappa \eta \rho v \gamma \mu \alpha I \omega v \alpha$ ). Note this use of $\varepsilon \iota \varsigma$ just like $\varepsilon v$. Note also $\pi \lambda \varepsilon \iota \nu$ (neuter), not $\pi \lambda \varepsilon \iota \omega \nu$ (masc.). See the same idiom in 12:6 and 12:48. Jesus is something greater than the temple, than Jonah, than Solomon. "You will continue to disbelieve in spite of all I can say or do, and at last you will put me to death. But I will rise again, a sign for your confusion, if not for your conversion" (Bruce).

Matt 12:44

Into my house ( $\varepsilon \iota \varsigma ~ \tau o v$ oıkov $\mu \circ v$ ). So the demon describes the man in whom he had dwelt. "The demon is ironically represented as implying that he left his victim voluntarily, as a man leaves his house to go for a walk" (McNeile). "Worse than the first" is a proverb.

Matt 12:46
His mother and his brothers ( $\eta \mu \eta \tau \eta \rho \kappa \alpha$ о $\alpha \delta \varepsilon \lambda \varphi о \alpha v \tau o v$ ). Brothers of Jesus, younger sons of Joseph and Mary. The charge of the Pharisees that Jesus was in league with Satan was not believed by the disciples of Jesus, but some of his friends did think that he was beside himself (Mr 3:21) because of the excitement and strain. It was natural for Mary to want to take him home for rest and refreshment. So the mother and brothers are pictured standing outside the house (or the crowd). They send a messenger to Jesus.

Matt 12:47
Aleph, B, L, Old Syriac, omit this verse as do Westcott and Hort. It is genuine in Mr 3:32; Lu 8:20 . It was probably copied into Matthew from Mark or Luke.

Matt 12:49
Behold my mother and my brothers ( $\llcorner\delta o v \eta \mu \eta \tau \eta \rho \mu \circ v \kappa \alpha$ о $\alpha \delta \varepsilon \lambda \varphi о \mu \circ v$ ). A dramatic wave of the hand towards his disciples (learners) accompanied these words. Jesus loved his mother and brothers, but they were not to interfere in his Messianic work. The real spiritual family of Jesus included all who follow him. But it was hard for Mary to go back to Nazareth and leave Jesus with the excited throng so great that he was not even stopping to eat (Mr 3:20).

## Matthew 13

Matt 13:1
On that day ( $\varepsilon v \tau \eta \eta \mu \varepsilon \rho \alpha \varepsilon \kappa \varepsilon \iota \nu \eta$ ). So this group of parables is placed by Matthew on the same day as the blasphemous accusation and the visit of the mother of Jesus. It is called "the Busy Day," not because it was the only one, but simply that so much is told of this day that it serves as a specimen of many others filled to the full with stress and strain.

Sat by the seaside ( $\varepsilon \kappa \alpha \theta \eta \tau о \pi \alpha \rho \alpha \tau \eta \nu \theta \alpha \lambda \alpha \sigma \sigma \alpha \nu)$. The accusative case need give no difficulty. Jesus came out of the stuffy house and took his seat ( $\varepsilon \kappa \alpha \forall \eta \tau$, imperfect) along the shore with the crowds stretched up and down, a picturesque scene.

Matt 13:2
And all the multitude stood on the beach ( $\kappa \alpha \pi \alpha \varsigma о$ о $\chi \lambda \circ \varsigma \varepsilon \pi \tau \circ \nu \alpha \iota \gamma \iota \alpha \lambda o \nu \iota \sigma \tau \eta \kappa \varepsilon$ ). Past perfect tense of $\iota \sigma \tau \eta \mu$ with imperfect sense, had taken a stand and so stood. Note accusative also with $\varepsilon \pi$ upon the beach where the waves break one after the other ( $\alpha \prime \gamma \iota \lambda \alpha \rho$ is from $\alpha \lambda \varsigma$, sea, and $\alpha \gamma \nu v \mu$, to break, or from $\alpha \iota \sigma \sigma \omega$, to rush). Jesus had to get into a boat and sit down in that because of the crush of the crowd.

Matt 13:3
Many things in parables ( $\pi 0 \lambda \lambda \alpha \varepsilon v \pi \alpha \rho \alpha \beta 0 \lambda \alpha \iota)$ ). It was not the first time that Jesus had used parables, but the first time that he had spoken so many and some of such length. He will use a great many in the future as in Luke 12 to 18 and Matt. 24 and 25. The parables already mentioned in Matthew include the salt and the light (5:13-16), the birds and the lilies ( $6: 26-30$ ), the splinter and the beam in the eye ( $7: 3-5$ ), the two gates ( $7: 13 \mathrm{f}$. ), the wolves in sheep's clothing ( $7: 15$ ), the good and bad trees (7:17-19), the wise and foolish builders ( 7:24-27), the garment and the wineskins (9:16f. ), the children in the market places (11:16f. ). It is not certain how many he spoke on this occasion. Matthew mentions eight in this chapter (the Sower, the Tares, the Mustard Seed, the Leaven, the Hid Treasure, the Pearl of Great Price, the Net, the Householder). Mark adds the Parable of the Lamp (Mr 4:21; Lu 8:16) , the Parable of the Seed Growing of Itself (Mr 4:26-29) , making ten of which we know. But both Mark (Mr 4:33 ) and Matthew ( 13:34) imply that there were many others. "Without a parable spake he nothing unto them" (Mt 13:34), on this occasion, we may suppose. The word parable ( $\pi \alpha \rho \alpha \beta o \lambda \eta$ from $\pi \alpha \rho \alpha \beta \alpha \lambda \lambda \omega$, to place alongside for measurement or comparison like a yardstick) is an objective illustration for spiritual or moral truth. The word is employed in a variety of ways (a) as for sententious sayings or proverbs (Mt 15:15; Mr 3:23; Lu 4:23; 5:36-39; 6:39), for a figure or type (Heb. 9:9; 11:19); (b) a comparison in the form of a narrative, the common use in the Synoptic Gospels like the Sower; (c) "A narrative illustration not involving a comparison" (Broadus), like the Rich Fool, the Good Samaritan, etc. "The oriental genius for picturesque speech found expression in a multitude of such utterances" (McNeile). There are parables in the Old Testament, in the Talmud, in sermons in
all ages. But no one has spoken such parables as these of Jesus. They hold the mirror up to nature and, as all illustrations should do, throw light on the truth presented. The fable puts things as they are not in nature, Aesop's Fables, for instance. The parable may not be actual fact, but it could be so. It is harmony with the nature of the case. The allegory ( $\alpha \lambda \lambda \eta \gamma \quad \rho i \alpha)$ is a speaking parable that is self-explanatory all along like Bunyan's Pilgrim's Progress. All allegories are parables, but not all parables are allegories. The Prodigal Son is an allegory, as is the story of the Vine and Branches (Joh 15 ). John does not use the word parable, but only $\pi \alpha \rho о \not \mu \alpha$, a saying by the way (Joh 10:6; 16:25,29). As a rule the parables of Jesus illustrate one main point and the details are more or less incidental, though sometimes Jesus himself explains these. When he does not do so, we should be slow to interpret the minor details. Much heresy has come from fantastic interpretations of the parables. In the case of the Parable of the Sower ( $13: 3-8$ ) we have also the careful exposition of the story by Jesus (18-23) as well as the reason for the use of parables on this occasion by Jesus (9-17).

Behold, the sower went forth ( $(\delta o v \eta \lambda \theta \varepsilon v$ o $\sigma \pi \varepsilon \iota \rho \omega v$ ). Matthew is very fond of this exclamation $\delta \delta o v$. It is "the sower," not "a sower." Jesus expects one to see the man as he stepped forth to begin scattering with his hand. The parables of Jesus are vivid word pictures. To understand them one must see them, with the eyes of Jesus if he can. Christ drew his parables from familiar objects.

Matt 13:4
As he sowed ( $\varepsilon v \tau \omega \sigma \pi \varepsilon \iota \rho \varepsilon เ v$ av $\tau \circ v$ ). Literally, "in the sowing as to him," a neat Greek idiom unlike our English temporal conjunction. Locative case with the articular present infinitive.

By the wayside ( $\pi \alpha \rho \alpha \tau \eta v o \delta o v$ ). People will make paths along the edge of a ploughed field or even across it where the seed lies upon the beaten track.

Devoured (катє甲аүعv). "Ate down." We say, "ate up." Second aorist active indicative of катєб $\theta \omega \omega$ (defective verb).

Matt 13:5
The rocky places ( $\tau \alpha \pi \varepsilon \tau \rho \omega \delta \eta$ ). In that limestone country ledges of rock often jut out with thin layers of soil upon the layers of rock.

Straightway they sprang up ( $\varepsilon v \theta \varepsilon \omega \varsigma \varepsilon \xi \alpha v \varepsilon \tau \varepsilon 1 \lambda \varepsilon v$ ). "Shot up at once" (Moffatt). Double compound ( $\varepsilon \xi$, out of the ground, $\alpha v \alpha$, up). Ingressive aorist of $\varepsilon \xi \alpha v a \tau \varepsilon \lambda \lambda \omega$.

Matt 13:6
The sun was risen ( $\eta \lambda_{\mathrm{l}} \mathrm{ov}$ avateı $\left.\lambda \alpha v \tau \circ \varsigma\right)$. Genitive absolute. "The sun having sprung up" also, same verb except the absence of $\varepsilon \xi$ ( $\alpha v \alpha \tau \varepsilon \lambda \lambda \omega, \varepsilon \xi \alpha v \alpha \tau \varepsilon \lambda \lambda \omega)$.

Matt 13:7
The thorns grew up ( $\alpha v \varepsilon \beta \eta \sigma \alpha v \alpha \alpha \kappa \alpha v \theta \alpha$ ). Not "sprang up" as in verse 5 , for a different verb occurs meaning "came up" out of the ground, the seeds of the thorns being already in the soil, "upon the thorns" ( $\varepsilon \pi \tau \alpha \varsigma \alpha \kappa \alpha v \theta a \varsigma)$ rather than "among the thorns." But the thorns
got a quick start as weeds somehow do and "choked them" ( $\alpha \pi \varepsilon \pi v i \xi \alpha v \alpha v \tau \alpha$, effective aorist of $\alpha \pi \sigma \pi \nu \imath \omega$ ), "choked them off" literally. Luke (Lu 8:33) uses it of the hogs in the water. Who has not seen vegetables and flowers and corn made yellow by thorns and weeds till they sicken and die?

Matt 13:8
Yielded fruit ( $\varepsilon \delta t \delta o v ~ \kappa \alpha \rho \pi \sigma v$ ). Change to imperfect tense of $\delta t \delta \omega \mu$, to give, for it was continuous fruit-bearing.

Some a hundredfold (o $\mu \varepsilon v \varepsilon \kappa \alpha \tau o v$ ). Variety, but fruit. This is the only kind that is worth while. The hundredfold is not an exaggeration (cf. Ge 26:12). Such instances are given by Wetstein for Greece, Italy, and Africa. Herodotus (i. 93) says that in Babylonia grain yielded two hundredfold and even to three hundredfold. This, of course, was due to irrigation as in the Nile Valley.

Matt 13:9
He that hath ears let him hear (o $\varepsilon \chi \omega \nu \omega \tau \alpha \alpha \kappa o v \varepsilon \tau \omega$ ), So also in 11:15 and 13:43. It is comforting to teachers and preachers to observe that even Jesus had to exhort people to listen and to understand his sayings, especially his parables. They will bear the closest thought and are often enigmatical.

## Matt 13:10

Why speakest thou unto them in parables? ( $\delta ı \alpha \tau \varepsilon \tau \alpha \rho \alpha \beta о \lambda \alpha ı \varsigma \lambda \alpha \lambda \varepsilon \varsigma \alpha \cup \tau о \iota)$. Already the disciples are puzzled over the meaning of this parable and the reason for giving them to the people. So they "came up" closer to Jesus and asked him. Jesus was used to questions and surpassed all teachers in his replies.

## Matt 13:11

To know the mysteries ( $\gamma \nu \omega v \alpha \tau \alpha \mu \nu \sigma \tau \eta \rho \iota \alpha$ ). Second aorist active infinitive of $\gamma \iota \nu \omega \sigma \kappa \omega$. The word $\mu \nu \sigma \tau \eta \rho \circ v$ is from $\mu \nu \sigma \tau \eta \varsigma$, one initiated, and that from $\mu \nu \varepsilon \omega(\mu \nu \omega)$, to close or shut (Latin, mutus). The mystery-religions of the east had all sorts of secrets and signs as secret societies do today. But those initiated knew them. So the disciples have been initiated into the secrets of the kingdom of heaven. Paul will use it freely of the mystery once hidden, but now revealed, now made known in Christ (Ro 16:25; 1Co 2:7, etc.). In Php 4:12 Paul says: "I have learned the secret or been initiated" $(\mu \varepsilon \mu \nu \eta \mu \alpha)$. So Jesus here explains that his parables are open to the disciples, but shut to the Pharisees with their hostile minds. In the Gospels $\mu v \sigma \tau \eta \rho \circ v$ is used only here and in the parallel passages ( $\mathrm{Mr} 4: 11 ; \mathrm{Lu} 8: 10$ ).

Matt 13:13
Because seeing (o $\tau \beta \varepsilon \pi \sigma \nu \tau \varepsilon \varsigma$ ). In the parallel passages in $\mathrm{Mr} 4: 12$ and $\mathrm{Lu} 8: 10$ we find $\iota v a$ with the subjunctive. This does not necessarily mean that in Mark and Luke $\imath v \alpha=0 \tau$ with the causal sense, though a few rare instances of such usage may be found in late Greek. For a discussion of the problem see my chapter on "The Causal Use of Hina" in Studies in Early Christianity (1928) edited by Prof. S.J. Case. Here in Matthew we have first "an adaptation
of Isa 6:9f. which is quoted in full in v. 14f. " (McNeile). Thus Matthew presents "a striking paradox, 'though they see, they do not (really) see'" (McNeile). Cf. Joh 9:41. The idiom here in Matthew gives no trouble save in comparison with Mark and Luke which will be discussed in due turn. The form $\sigma v v_{\text {lovolv is an omega verb form ( } \sigma v v i \omega \text { ) rather than the } \mu \text { verb }}$ ( $\sigma \cup v ı \eta \mu$ ) as is common in the Koine.

Matt 13:14
Is fulfilled ( $\alpha v \alpha \pi \lambda \eta \rho o v \tau \alpha$ ). Aoristic present passive indicative. Here Jesus points out the fulfilment and not with Matthew's usual formula (iva or o $\pi \omega \varsigma \pi \lambda \omega \rho \eta \theta \eta$ to $\rho \eta \theta \varepsilon v$ (see $1: 22)$. The verb avar $\lambda \eta \rho o \omega$ occurs nowhere else in the Gospels, but occurs in the Pauline Epistles. It means to fill up like a cup, to fill another's place (1Co 14:16), to fill up what is lacking (Php 2:30). Here it means that the prophecy of Isaiah is fully satisfied in the conduct of the Pharisees and Jesus himself points it out. Note two ways of reproducing the Hebrew idiom (infinitive absolute), one by aкоך the other by $\beta \lambda \varepsilon \pi о v \tau \varepsilon \varsigma$. Note also the strong negative ov $\mu \eta$ with aorist subjunctive.

Matt 13:15
Is waxed gross $(\varepsilon \pi \alpha \chi \cup v \theta \eta)$. Aorist passive tense. From $\pi \alpha \chi \cup \varsigma$, thick, fat, stout. Made callous or dull -- even fatty degeneration of the heart.
 (or hear) heavily with their ears." The hard of hearing are usually sensitive.

Their eyes they have closed ( $\tau o v \varsigma ~ o \varphi \theta \alpha \lambda \mu о v \varsigma ~ \alpha u \tau \omega \nu \varepsilon \kappa \alpha \mu \mu \nu \sigma \alpha v$ ). The epic and vernacular verb $\kappa \alpha \mu \mu \nu \omega$ is from ката $\mu \nu \omega$ (to shut down). We say shut up of the mouth, but the eyes really shut down. The Hebrew verb in Isa 6:10 means to smear over. The eyes can be smeared with wax or cataract and thus closed. "Sealing up the eyes was an oriental punishment" (Vincent). See Isa 29:10; 44:18 .

Lest ( $\mu \eta \pi \sigma \tau \varepsilon$ ). This negative purpose as a judgment is left in the quotation from Isaiah. It is a solemn thought for all who read or hear the word of God.

And I should heal them ( $\kappa \alpha \_\sigma \sigma о \mu \alpha$ avtouc). Here the LXX changes to the future indicative rather than the aorist subjunctive as before.

Matt 13:16
Blessed are your eyes ( $\nu \mu \omega \nu \delta \varepsilon \mu \alpha \kappa \alpha \rho \circ$ о о $\varphi \theta \alpha \lambda \mu$ ). A beatitude for the disciples in contrast with the Pharisees. Note position of "Happy" here also as in the Beatitudes in Mt 5.

Matt 13:18
Hear then ye the parable ( $\nu \mu \varepsilon \varsigma \varsigma ~ o v v ~ \alpha \kappa о v \sigma \alpha \tau \varepsilon ~ \tau \eta \nu ~ \pi \alpha \rho \alpha \beta о \lambda \eta \nu$ ). Jesus has given in 13:13 one reason for his use of parables, the condemnation which the Pharisees have brought on themselves by their spiritual dulness: "Therefore I speak to them in parables" ( $\delta$ ı $\alpha$ тov $о$ $\varepsilon v \pi \alpha \rho \alpha \beta \omega \lambda \alpha \iota \varsigma \alpha v \tau o \iota \varsigma \lambda \alpha \lambda \omega)$. He can go on preaching the mysteries of the kingdom without their comprehending what he is saying, but he is anxious that the disciples really get personal
knowledge ( $\gamma v \omega v a$, verse 11) of these same mysteries. So he explains in detail what he means to teach by the Parable of the Sower. He appeals to them (note position of $v \mu \varepsilon \iota)$ to listen as he explains.

Matt 13:19
When anyone heareth ( $\pi \alpha v \tau о \varsigma \alpha \kappa о v o v \tau о \varsigma) . ~ G e n i t i v e ~ a b s o l u t e ~ a n d ~ p r e s e n t ~ p a r t i c i p l e, ~$ "while everyone is listening and not comprehending" ( $\mu \eta$ бטvıะvтoc), "not putting together" or "not grasping." Perhaps at that very moment Jesus observed a puzzled look on some faces.

Cometh the evil one and snatcheth away ( $\varepsilon \rho \chi \varepsilon \tau \alpha$ о то $\eta \rho о \varsigma ~ к \alpha ~ \alpha \rho \pi \alpha \zeta \varepsilon) . ~ T h e ~ b i r d s ~$ pick up the seeds while the sower sows. The devil is busy with his job of snatching or seizing like a bandit or rogue the word of the kingdom before it has time even to sprout. How quickly after the sermon the impression is gone. "This is he" (ovtoc $\varepsilon \sigma \tau \iota v)$. Matthew, like Mark, speaks of the people who hear the words as the seed itself. That creates some confusion in this condensed form of what Jesus actually said, but the real point is clear.

The seed sown in his heart ( $\tau 0 \varepsilon \sigma \pi \alpha \rho \mu \varepsilon v o v \varepsilon \nu \tau \eta \kappa \alpha \rho \delta i \alpha \alpha \cup \tau o v$, perfect passive participle of $\sigma \pi \varepsilon \iota \rho \omega$, to sow) and "the man sown by the wayside" (o $\pi \alpha \rho \alpha \tau \eta v$ oסov $\sigma \pi \alpha \rho \varepsilon \iota$, aorist passive participle, along the wayside) are identified. The seed in the heart is not of itself responsible, but the man who lets the devil snatch it away.

Matt 13:21
Yet hath he not root in himself (ouk $\varepsilon \chi \varepsilon \delta \varepsilon \rho \zeta \zeta \alpha v \varepsilon v \varepsilon \alpha v \tau \omega$ ). Cf. Col 2:7 and Eph 3:18 $\varepsilon \rho \rho!\zeta \omega \mu \varepsilon \mu$. Stability like a tree. Here the man has a mushroom growth and "endureth for a while" ( $\pi \rho \circ \sigma \kappa \alpha \iota \rho o \varsigma)$, temporary, quick to sprout, quick to stumble ( $\left.\sigma \kappa \alpha v \delta \alpha \lambda_{\iota} \zeta \varepsilon \tau \alpha\right)$. What a picture of some converts in our modern revivals. They drop away overnight because they did not have the root of the matter in them. This man does not last or hold out.

Tribulation ( $\theta \lambda \iota \psi \varepsilon \omega \varsigma$ ). From $\theta \lambda \wedge \beta \omega$, to press, to oppress, to squeeze (cf. 7:14). The English word is from the Latin tribulum, the roller used by the Romans for pressing wheat. Cf. our "steam roller" Trench (Synonyms of the N.T., pp. 202-4): "When, according to the ancient law of England, those who wilfully refused to plead, had heavy weights placed on their breasts, and were pressed and crushed to death, this was literally $\theta \lambda \iota \psi \iota \varsigma . "$ The iron cage was $\sigma \tau \varepsilon v o \chi \omega \rho \mid \alpha$.

Matt 13:22
Choke the word ( $\sigma u v \pi v 1 \gamma \varepsilon$ tov $\lambda o \gamma o v$ ). We had $\alpha \pi \varepsilon \pi v ı \xi \alpha v$ (choked off) in 13:7. Here it is $\sigma u v \pi v i \gamma \varepsilon$ (choke together), historical present and singular with both subjects lumped together. "Lust for money and care go together and between them spoil many an earnest religious nature" (Bruce), "thorns" indeed. The thorns flourish and the character sickens and dies, choked to death for lack of spiritual food, air, sunshine.

Matt 13:23
Verily beareth fruit ( $\delta \eta \kappa \alpha \rho \pi о \varphi о \rho \varepsilon$ ). Who in reality ( $\delta \eta$ ) does bear fruit (cf. Mt 7:16-20 ). The fruit reveals the character of the tree and the value of the straw for wheat. Some grain
must come else it is only chaff, straw, worthless. The first three classes have no fruit and so show that they are unfruitful soil, unsaved souls and lives. There is variety in those who do bear fruit, but they have some fruit. The lesson of the parable as explained by Jesus is precisely this, the variety in the results of the seed sown according to the soil on which it falls. Every teacher and preacher knows how true this is. It is the teacher's task as the sower to sow the right seed, the word of the kingdom. The soil determines the outcome. There are critics today who scout this interpretation of the parable by Jesus as too allegorical with too much detail and probably not that really given by Jesus since modern scholars are not agreed on the main point of the parable. But the average Christian sees the point all right. This parable was not meant to explain all the problems of human life.

Matt 13:24
Set he before them ( $\pi \alpha \rho \varepsilon \theta \eta \kappa \varepsilon v$ ). So again in 13:31. He placed another parable beside ( $\pi \alpha \rho \alpha$ ) the one already given and explained. The same verb ( $\pi \alpha \rho \alpha \theta \varepsilon ı v \alpha$ ) occurs in Lu 9:16

Is likened $(\omega \mu \circ \omega \omega \theta \eta)$. Timeless aorist passive and a common way of introducing these parables of the kingdom where a comparison is drawn (18:23; 22:2; $25: 1$ ). The case of $\alpha v \theta \rho \omega \pi \omega$ is associative instrumental.

Matt 13:25
While men slept ( $\varepsilon v \tau \omega \kappa \alpha \theta \varepsilon v \delta \varepsilon \iota v \tau 0 v \varsigma \alpha v \theta \rho \omega \pi \sigma \cup \varsigma)$. Same use of the articular present infinitive with $\varepsilon v$ and the accusative as in 13:4.

Sowed tares also ( $\left.\varepsilon \pi \varepsilon \sigma \pi \varepsilon ı \rho \varepsilon v \tau \alpha \zeta_{\zeta} \zeta \alpha v ı\right)$. Literally "sowed upon," "resowed" (Moffatt).
 wheat) over ( $\varepsilon \pi$ ) the wheat, "in the midst of the wheat." This bearded darnel, lolium temulentum, is common in Palestine and resembles wheat except that the grains are black. In its earlier stages it is indistinguishable from the wheat stalks so that it has to remain till near the harvest. Modern farmers are gaining more skill in weeding it out.

Matt 13:26
Then appeared also ( $\tau о \tau \varepsilon \varepsilon \varphi \alpha \nu \eta \kappa \alpha$ ). The darnel became plain ( $\varepsilon \varphi \alpha \nu \eta$, second aorist passive, effective aorist of $\varphi$ aıv $\omega$ to show) by harvest.

Matt 13:29
Ye root up the wheat with them ( $\varepsilon \kappa \rho ı \zeta \omega \sigma \eta \tau \varepsilon \alpha \mu \alpha ~ \alpha u \tau о \iota \varsigma ~ \tau o v ~ \sigma \iota \tau о v) . ~ L i t e r a l l y, ~ " r o o t ~$ out." Easy to do with the roots of wheat and darnel intermingled in the field. So $\sigma u \lambda \lambda \varepsilon \gamma \sigma \nu \tau \varepsilon \varsigma$ is not "gather up," but "gather together," here and verses 28 and 30. Note other compound verbs here, "grow together" ( $\sigma v v \alpha v \xi \alpha v \varepsilon \sigma \theta \alpha$ ), "burn up" (катакаvба, burn down or completely), "bring together" ( $\sigma \cup v a \gamma \varepsilon \tau \varepsilon)$.

Matt 13:30
My barn ( $\tau \eta \nu \alpha \pi \sigma \theta \eta \kappa \eta \nu \mu \circ v$ ). See already 3:12; 6:26. Granary, storehouse, place for putting things away.

Matt 13:31
Is like (o $\quad$ ota $\varepsilon \sigma \tau \iota v$ ). Adjective for comparison with associative instrumental as in 13:13,44,45,47,52 .

Grain of mustard seed (кокк $\sigma \iota \nu \alpha \pi \varepsilon \omega \varsigma)$. Single grain in contrast with the collective $\sigma \pi \varepsilon \rho \mu \alpha$ ( 17:20).

Took and sowed ( $\lambda \alpha \beta \omega \nu \varepsilon \sigma \pi \varepsilon \iota \rho \varepsilon v$ ). Vernacular phrasing like Hebrew and all conversational style. In Koine.

Matt 13:32
A tree ( $\delta \varepsilon v \delta \rho o v)$. "Not in nature, but in size" (Bruce). "An excusable exaggeration in popular discourse."

Matt 13:33
Is like unto leaven ( $\circ \mu \circ \iota \alpha \varepsilon \sigma \tau \iota v \zeta \nu \mu \eta$ ). In its pervasive power. Curiously enough some people deny that Jesus here likens the expanding power of the Kingdom of heaven to leaven, because, they say, leaven is the symbol of corruption. But the language of Jesus is not to be explained away by such exegetical jugglery. The devil is called like a lion by Peter ( $1 \mathrm{Pe} 5: 8$ ) and Jesus in Revelation is called the Lion of the Tribe of Judah (Re 5:5 ). The leaven permeates all the "wheaten meal" ( $\alpha \lambda \varepsilon v \rho o v$ ) till the whole is leavened. There is nothing in the "three measures," merely a common amount to bake. Dr. T.R. Glover in his Jesus of History suggests that Jesus used to notice his mother using that amount of wheat flour in baking bread. To find the Trinity here is, of course, quite beside the mark. The word for leaven, $\zeta \nu \mu \eta$, is from $\zeta \varepsilon \omega$, to boil, to seethe, and so pervasive fermentation.

Matt 13:35
I will utter $(\varepsilon \rho \varepsilon v \xi \circ \mu \alpha)$. To cast forth like a river, to gurgle, to disgorge, the passion of a prophet. From Ps 19:2; 78:2. The Psalmist claims to be able to utter "things hidden from the foundation of the world" and Matthew applies this language to the words of Jesus. Certain it is that the life and teaching of Jesus throw a flood of light on the purposes of God long kept hidden (кєкрv $\mu \mu \varepsilon v \alpha)$.

Matt 13:36
Explain unto us ( $\delta \iota \alpha \sigma \alpha \varphi \eta \sigma o v \eta \mu v)$. Also in 18:31. "Make thoroughly clear right now" (aorist tense of urgency). The disciples waited till Jesus left the crowds and got into the house to ask help on this parable. Jesus had opened up the Parable of the Sower and now they pick out this one, passing by the mustard seed and the leaven.

Matt 13:38
The field is the world (о $\delta \varepsilon \alpha \gamma \rho о \varsigma \varepsilon \sigma \tau \iota \nu$ о коб $о \varsigma)$. The article with both "field" and "world" in Greek means that subject and predicate are coextensive and so interchangeable. It is extremely important to understand that both the good seed and the darnel (tares) are sown in the world, not in the Kingdom, not in the church. The separation comes at the
consummation of the age ( $\sigma v v \tau \varepsilon \lambda \varepsilon ı \alpha ~ \alpha ı \omega v o \varsigma, 39$ ), the harvest time. They all grow together in the field (the world).

Matt 13:41
Out of his kingdom ( $\varepsilon \kappa \tau \eta \varsigma \beta \alpha \sigma \lambda \lambda \varepsilon ı \alpha \varsigma \alpha \cup \tau о v$ ). Out from the midst of the kingdom, because in every city the good and the bad are scattered and mixed together. Cf. $\varepsilon \kappa \mu \varepsilon \sigma о v$ $\tau \omega v \delta \iota \kappa \alpha \omega \omega v$ in 13:49 "from the midst of the righteous." What this means is that, just as the wheat and the darnel are mixed together in the field till the separation at harvest, so the evil are mixed with the good in the world (the field). Jesus does not mean to say that these "stumbling-blocks" ( $\tau \alpha \sigma \kappa \alpha v \delta \alpha \lambda \alpha)$ are actually in the Kingdom of heaven and really members of the Kingdom. They are simply mixed in the field with the wheat and God leaves them in the world till the separation comes. Their destiny is "the furnace of fire" ( $\tau \eta \nu \kappa \alpha \mu \nu v \nu \nu$ tov $\pi \cup \rho о \varsigma)$.

Matt 13:43
Shine forth ( $\varepsilon \kappa \lambda \alpha \mu \psi o v \sigma เ v)$. Shine out as the sun comes from behind a cloud (Vincent) and drive away the darkness after the separation has come (cf. Da 12:3).

Matt 13:44
And hid (ка єкричعv). Not necessarily bad morality. "He may have hid it to prevent it being stolen, or to prevent himself from being anticipated in buying a field" (Plummer). But if it was a piece of sharp practice, that is not the point of the parable. That is, the enormous wealth of the Kingdom for which any sacrifice, all that one has, is not too great a price to pay.

Matt 13:46
He went and sold ( $\alpha \pi \varepsilon \lambda \theta \omega v \pi \varepsilon \pi \rho \alpha \kappa \varepsilon v)$. Rather eagerly and vividly told thus, "He has gone off and sold." The present perfect indicative, the dramatic perfect of vivid picture. Then he bought it. Present perfect, imperfect, aorist tenses together for lively action. E $\mu \pi \sigma \rho \omega$ is a merchant, one who goes in and out, travels like a drummer.

Matt 13:47
A net ( $\sigma \alpha \gamma \eta v \eta$ ). Drag-net. Latin, sagena, English, seine. The ends were stretched out and drawn together. Only example of the word in the N.T. Just as the field is the world, so the drag-net catches all the fish that are in the sea. The separation comes afterwards. Vincent pertinently quotes Homer's Odyssey (xxii. 384-389) where the slain suitors in the halls of Ulysses are likened to fishes on the shore caught by nets with myriad meshes.

Matt 13:48
Vessels ( $\alpha \gamma \gamma \eta$ ). Here only in the N.T. In Mt 25:4 we have $\alpha \gamma \gamma \varepsilon$. $\alpha$.
Matt 13:52
Made a disciple to the kingdom of heaven ( $\mu \alpha \theta \varepsilon \tau \varepsilon v \theta \varepsilon ı \varsigma \tau \eta \beta \alpha \sigma \iota \lambda \varepsilon \iota \alpha \tau \nu \nu$ ou $\alpha \nu \nu \omega v$ ). First aorist passive participle. The verb is transitive in 28:19. Here a scribe is made a learner to the kingdom. "The mere scribe, Rabbinical in spirit, produces only the old and stale. The
disciple of the kingdom like the Master, is always fresh-minded, yet knows how to value all old spiritual treasures of Holy Writ, or Christian tradition" (Bruce). So he uses things fresh ( $\kappa \alpha \iota v \alpha)$ and ancient ( $\pi \alpha \lambda \alpha \iota \alpha$ ). "He hurls forth" ( $\varepsilon \kappa \beta \alpha \lambda \lambda \varepsilon$ ) both sorts.

Matt 13:54
 known, the leading, or even for a time the only carpenter in Nazareth till Jesus took the place of Joseph as the carpenter. What the people of Nazareth could not comprehend was how one with the origin and environment of Jesus here in Nazareth could possess the wisdom which he appeared to have in his teaching ( $\varepsilon \delta \iota \delta \alpha \sigma \kappa \varepsilon v)$. That has often puzzled people how a boy whom they knew could become the man he apparently is after leaving them. They knew Joseph, Mary, the brothers (four of them named) and sisters (names not given). Jesus passed here as the son of Joseph and these were younger brothers and sisters (half brothers and sisters technically).

Matt 13:57
And they were offended in him ( $\kappa \alpha \varepsilon \sigma \kappa \alpha v \delta \alpha \lambda_{\iota} \zeta$ оvтo $\varepsilon v \alpha v \tau \omega$ ). Graphic imperfect passive. Literally, "They stumbled at him," "They were repelled by him" (Moffatt), "They turned against him" (Weymouth). It was unpardonable for Jesus not to be commonplace like themselves.

Not without honour (ovk عбтiv atц䒑оऽ). This is a proverb found in Jewish, Greek, and Roman writers. Seen also in the Logia of Jesus (Oxyr. Papyri i. 3).

Matt 13:58
Mighty works ( $\delta v v a \mu \varepsilon ı \varsigma) . ~ P o w e r s . ~ T h e ~ " d i s b e l i e f " ~(\alpha \pi ı \sigma \tau ı \alpha v) ~ o f ~ t h e ~ t o w n s p e o p l e ~ b l o c k e d ~$ the will and the power of Jesus to work cures.

## Matthew 14

Matt 14:1
Herod the tetrarch (H $\eta \rho \omega \iota \delta \eta \varsigma \tau \varepsilon \tau \rho \alpha \alpha \rho \chi \eta \varsigma)$. Herod Antipas ruler of Galilee and Perea, one-fourth of the dominion of Herod the Great.

The report concerning Jesus ( $\tau \eta \nu$ акоиๆ $\nu$ I $\eta \sigma o v$ ). See on 4:24. Cognate accusative, heard the hearing (rumour), objective genitive. It is rather surprising that he had not heard of Jesus before.

Matt 14:2
His servants ( $\tau$ oıs naıఠıv avtou). Literally "boys," but here the courtiers, not the menials of the palace.

Work in him ( $\varepsilon v \varepsilon \rho \gamma o v \sigma เ v)$. Cf. our "energize." "The powers of the invisible world, vast and vague in the king's imagination" (Bruce). John wrought no miracles, but one redivivus might be under the control of the unseen powers. So Herod argued. A guilty conscience quickened his fears. Possibly he could see again the head of John on a charger. "The King has the Baptist on the brain" (Bruce). Cf. Josephus (War, I. xxx. 7) for the story that the ghosts of Alexander and Aristobulus haunted the palace of Herod the Great. There were many conjectures about Jesus as a result of this tour of Galilee and Herod Antipas feared this one.

Matt 14:3
For the sake of Herodias ( $\delta \iota \alpha$ H $\rho \omega \omega \iota \delta \alpha \delta \alpha$ ). The death of John had taken place some time before. The Greek aorists here ( $\varepsilon \delta \eta \sigma \varepsilon v, a \pi \varepsilon \theta \varepsilon \tau \tau)$ are not used for past perfects. The Greek aorist simply narrates the event without drawing distinctions in past time. This Herodias was the unlawful wife of Herod Antipas. She was herself a descendant of Herod the Great and had married Herod Philip of Rome, not Philip the Tetrarch. She had divorced him in order to marry Herod Antipas after he had divorced his wife, the daughter of Aretas King of Arabia. It was a nasty mess equal to any of our modern divorces. Her first husband was still alive and marriage with a sister-in-law was forbidden to Jews (Le 18:16). Because of her Herod Antipas had put John in the prison at Machaerus. The bare fact has been mentioned in Mt 4:12 without the name of the place. See 11:2 also for the discouragement of John $\varepsilon v \tau \omega \delta \varepsilon \sigma \mu \omega \tau \eta \rho \omega \omega$ (place of bondage), here $\varepsilon v \tau \eta \varphi \cup \lambda \alpha \kappa \eta$ (the guard-house). Josephus (Ant. xviii. 5.2) tells us that Machaerus is the name of the prison. On a high hill an impregnable fortress had been built. Tristram (Land of Moab) says that there are now remains of "two dungeons, one of them deep and its sides scarcely broken in" with "small holes still visible in the masonry where staples of wood and iron had once been fixed. One of these must surely have been the prison-house of John the Baptist." "On this high ridge Herod the Great built an extensive and beautiful palace" (Broadus). "The windows com-
manded a wide and grand prospect, including the Dead Sea, the course of the Jordan, and Jerusalem" (Edersheim, Life and Times of Jesus).

Matt 14:4
For John said unto him ( $\varepsilon \lambda \varepsilon \gamma \varepsilon v \gamma \alpha \rho \mathrm{I} \omega \alpha \nu \eta \varsigma \alpha \cup \tau \omega$ ). Possibly the Pharisees may have put Herod up to inveigling John to Machaerus on one of his visits there to express an opinion concerning his marriage to Herodias (Broadus) and the imperfect tense ( $\varepsilon \lambda \varepsilon \gamma \varepsilon v$ ) probably means that John said it repeatedly. It was a blunt and brave thing that John said. It cost him his head, but it is better to have a head like John's and lose it than to have an ordinary head and keep it. Herod Antipas was a politician and curbed his resentment toward John by his fear of the people who still held (exðov, imperfect tense) him as a prophet.

Matt 14:6
 (cf. Mr 6:21) without the genitive absolute. The earlier Greeks used the word $\gamma \varepsilon v \varepsilon \sigma \iota \alpha$ for funeral commemorations (birthdays of the dead), $\gamma \varepsilon v \varepsilon \theta \lambda \_\alpha$ being the word for birthday celebrations of living persons. But that distinction has disappeared in the papyri. The word $\gamma \varepsilon v \varepsilon \sigma \iota \alpha$ in the papyri (Fayum Towns, 114-20, 115-8, 119-30) is always a birthday feast as here in Matthew and Mark. Philo used both words of birthday feasts. Persius, a Roman satirist (Sat. V. 180-183), describes a banquet on Herod's Day.

Danced in the midst ( $\omega \rho \chi \eta \sigma \alpha \tau 0 \varepsilon v \tau \omega \mu \varepsilon \sigma \omega$ ). This was Salome, daughter of Herodias by her first marriage. The root of the verb means some kind of rapid motion. "Leaped in the middle," Wycliff puts it. It was a shameful exhibition of lewd dancing prearranged by Herodias to compass her purpose for John's death. Salome had stooped to the level of an $\alpha \lambda \mu \varepsilon$, or common dancer.

Matt 14:7
Promised with an oath ( $\mu \varepsilon \tau \alpha$ оркоv $\omega \mu$ о $\lambda о \gamma \eta \sigma \varepsilon v$ ). Literally, "confessed with an oath." For this verb in the sense of promise, see Ac 7:17. Note middle voice of aıt $\quad$ б $\eta \tau \alpha$ (ask for herself). Cf. Es 5:3; 7:2 .

Matt 14:8
Put forward ( $\pi \rho \circ \beta \iota \beta \alpha \sigma \theta \varepsilon ו \sigma \alpha$ ). See Ac 19:33 for a similar verb ( $\pi \rho \circ \beta \alpha \lambda o v \tau \omega v$ ), "pushing forward." Here (Acts) the Textus Receptus uses $\pi \rho o \beta \iota \beta \alpha \zeta \omega$. "It should require a good deal of 'educating' to bring a young girl to make such a grim request" (Bruce).

Here $(\omega \delta \varepsilon)$. On the spot. Here and now.
In a charger ( $\varepsilon \pi \pi \imath v a \kappa)$. Dish, plate, platter. Why the obsolete "charger"?
Matt 14:9
Grieved ( $\lambda v \pi \eta \theta \varepsilon ı \varsigma)$. Not to hurt, for in verse 5 we read that he wanted $(\theta \varepsilon \lambda \omega v)$ to put him to death ( $\alpha \pi о \kappa \tau \varepsilon เ v \alpha$ ). Herod, however, shrank from so dastardly a deed as this public display of brutality and bloodthirstiness. Men who do wrong always have some flimsy excuses for their sins. A man here orders a judicial murder of the most revolting type "for the sake
of his oath" ( $\delta$ ı $\alpha$ tovৎ оркоис). "More like profane swearing than deliberate utterance once for all of a solemn oath" (Bruce). He was probably maudlin with wine and befuddled by the presence of the guests.

Matt 14:10
Beheaded John ( $\alpha \pi \varepsilon \kappa \varepsilon \varphi \alpha \lambda_{\iota \sigma \varepsilon v} \mathrm{I} \omega \alpha v \eta v$ ). That is, he had John beheaded, a causative active tense of a late verb $\alpha \pi о \kappa \varepsilon \varphi \alpha \lambda \iota \zeta \omega$. Took his head off.

Matt 14:11
She brought it to her mother ( $\eta v \varepsilon \gamma \kappa \varepsilon \nu \tau \eta \mu \eta \tau \rho \alpha v \tau \eta \varsigma)$. A gruesome picture as Herodias with fiendish delight witnesses the triumph of her implacable hatred of John for daring to reprove her for her marriage with Herod Antipas. A woman scorned is a veritable demon, a literal she-devil when she wills to be. Kipling's "female of the species" again. Legends actually picture Salome as in love with John, sensual lust, of which there is no proof.

Matt 14:12
And they went and told Jesus ( $\kappa \alpha \varepsilon \lambda \theta$ о $\tau \varepsilon \varsigma ~ \alpha \pi \eta \gamma \gamma \varepsilon 1 \lambda \alpha \nu \tau \omega$ I $\eta \sigma o v$ ). As was meet after they had given his body decent burial. It was a shock to the Master who alone knew how great John really was. The fate of John was a prophecy of what was before Jesus. According to Mt 14:13 the news of the fate of John led to the withdrawal of Jesus to the desert privately, an additional motive besides the need for rest after the strain of the recent tour.

Matt 14:13
In a boat $(\varepsilon \nu \pi \lambda o t \omega)$ "on foot" $(\pi \varepsilon \zeta \eta$, some MSS. $\pi \varepsilon \zeta \omega)$. Contrast between the lake and the land route.

Matt 14:14
Their sick ( $\tau 0 \cup \varsigma ~ \alpha \rho \rho \omega \sigma \tau o v \varsigma \alpha \cup \tau \omega v$ ). "Without strength" ( $\rho \omega v v \nu \mu$ and $\alpha$ privative). Eб $\pi \lambda \alpha \gamma \chi \nu \stackrel{\sigma}{ } \| \eta$ is a deponent passive. The verb gives the oriental idea of the bowels ( $\sigma \pi \lambda \alpha \gamma \chi v \alpha$ ) as the seat of compassion.

Matt 14:15
When even was come (o $\psi / a \varsigma \gamma \varepsilon v o \mu \varepsilon v \eta \varsigma)$. Genitive absolute. Not sunset about 6 P.M. as in 8:16 and as in 14:23, but the first of the two "evenings" beginning at 3 P.M.

The place is desert ( $\varepsilon \rho \eta \mu \circ \varsigma \varepsilon \sigma \tau \iota v$ о тотоৎ). Not a desolate region, simply lonely, comparatively uninhabited with no large towns near. There were "villages" ( $\kappa \omega \mu \alpha \varsigma$ ) where the people could buy food, but they would need time to go to them. Probably this is the idea of the disciples when they add:

The time is already past ( $\eta \omega \rho \alpha \eta \delta \eta \pi \alpha \rho \eta \lambda \theta \varepsilon v$ ). They must hurry.
Matt 14:16
Give ye them to eat ( $\delta$ отє avтоıऽ $v \mu \varepsilon ı \varsigma ~ \varphi a \gamma \varepsilon \iota)$ ). The emphasis is on $v \mu \varepsilon \iota \varsigma$ in contrast (note position) with their "send away" ( $\alpha \pi 0 \lambda v \sigma o v$ ). It is the urgent aorist of instant action ( $\delta$ ote). It was an astounding command. The disciples were to learn that "no situation appears to Him desperate, no crisis unmanageable" (Bruce).

## Matt 14:17

And they say unto him (o $\delta \varepsilon \lambda \varepsilon \gamma o v \sigma \iota \nu \alpha \nu \tau \omega$ ). The disciples, like us today, are quick with reasons for their inability to perform the task imposed by Jesus.

Matt 14:18
And he said (o $\delta \varepsilon \varepsilon \iota \pi \varepsilon v$ ). Here is the contrast between the helpless doubt of the disciples and the confident courage of Jesus. He used "the five loaves and two fishes" which they had mentioned as a reason for doing nothing. "Bring them hither unto me." They had overlooked the power of Jesus in this emergency.

Matt 14:19
To sit down on the grass ( $\alpha v \alpha \kappa \lambda \wedge \eta \eta \nu \alpha \varepsilon \pi$ $\tau 0 v \chi \circ \rho \tau \circ v)$. "Recline," of course, the word means, first aorist passive infinitive. A beautiful picture in the afternoon sun on the grass on the mountain side that sloped westward. The orderly arrangement (Mark) made it easy to count them and to feed them. Jesus stood where all could see him "break" ( $\kappa \lambda \alpha \sigma \alpha \varsigma)$ the thin Jewish cakes of bread and give to the disciples and they to the multitudes. This is a nature miracle that some men find it hard to believe, but it is recorded by all four Gospels and the only one told by all four. It was impossible for the crowds to misunderstand and to be deceived. If Jesus is in reality Lord of the universe as John tells us (Joh 1:1-18) and Paul holds ( Col 1:15-20 ), why should we balk at this miracle? He who created the universe surely has power to go on creating what he wills to do.

Matt 14:20
Were filled ( $\varepsilon \chi о \rho \tau \alpha \sigma \theta \eta \sigma \alpha \nu$ ). Effective aorist passive indicative of $\chi о \rho \tau \alpha \zeta \omega$. See Mt 5:6 . From the substantive $\chi \circ \rho \tau o \varsigma$ grass. Cattle were filled with grass and people usually with other food. They all were satisfied.

Broken pieces ( $\tau \omega v \kappa \lambda \alpha \sigma \mu \alpha \tau \omega v$ ). Not the scraps upon the ground, but the pieces broken by Jesus and still in the "twelve baskets" ( $\delta \omega \delta \varepsilon \kappa \alpha$ кочıvovৎ) and not eaten. Each of the twelve had a basketful left over ( $\tau$ o $\pi \varepsilon \rho เ \sigma \sigma \varepsilon v o v$ ). One hopes that the boy (Joh 6:9) who had the five loaves and two fishes to start with got one of the basketsful, if not all of them. Each of the Gospels uses the same word here for baskets (кочıоо), a wicker-basket, called "coffins" by Wycliff. Juvenal (Sat. iii. 14) says that the grove of Numa near the Capenian gate of Rome was "let out to Jews whose furniture is a basket (cophinus) and some hay" (for a bed). In the feeding of the Four Thousand (Matthew and Mark) the word $\sigma \varphi \cup \rho ı$ is used which was a sort of hamper or large provisions basket.

Matt 14:21
Beside women and children ( $\chi \omega \rho \iota \varsigma \gamma \nu \nu \alpha \iota \omega \nu \kappa \alpha \pi \alpha \iota \delta \iota \omega \nu$ ). Perhaps on this occasion there were not so many as usual because of the rush of the crowd around the head of the lake. Matthew adds this item and does not mean that the women and children were not fed, but simply that "the eaters" (o $\varepsilon \sigma \theta$ tovteऽ) included five thousand men ( $\alpha v \delta \rho \varepsilon \varsigma$ ) besides the women and children.

## Matt 14:22

Constrained ( $\eta v \alpha \gamma \kappa \alpha \sigma \varepsilon v$ ). Literally, "compelled" or "forced." See this word also in Lu 14:23. The explanation for this strong word in Mr 6:45 and Mt 14:22 is given in Joh 6:15 . It is the excited purpose of the crowd to take Jesus by force and to make him national king. This would be political revolution and would defeat all the plans of Jesus about his kingdom. Things have reached a climax. The disciples were evidently swept off their feet by the mob psychology for they still shared the Pharisaic hope of a political kingdom. With the disciples out of the way Jesus could handle the crowd more easily,
till he should send the multitudes away ( $\varepsilon \omega \varsigma$ ov $\alpha \pi \sigma \lambda v \sigma \eta \tau \tau v \varsigma$ o $\chi \lambda \frac{1}{}$ ). The use of the aorist subjunctive with $\varepsilon \omega \varsigma$ or $\varepsilon \omega \varsigma$ ov is a neat and common Greek idiom where the purpose is not yet realized. So in 18:30; 26:36 . "While" sometimes renders it well. The subjunctive is retained after a past tense instead of the change to the optative of the ancient Attic. The optative is very rare anyhow, but Luke uses it with $\pi \rho \iota v \eta$ in Ac 25:16.

Matt 14:23
Into the mountain (عıऽ то ороৎ). After the dismissal of the crowd Jesus went up alone into the mountain on the eastern side of the lake to pray as he often did go to the mountains to pray. If ever he needed the Father's sympathy, it was now. The masses were wild with enthusiasm and the disciples wholly misunderstood him. The Father alone could offer help now.

Matt 14:24
Distressed ( $\beta a \sigma \alpha v \iota \zeta \boldsymbol{\sigma} \varepsilon v o v$ ). Like a man with demons ( 8:29). One can see, as Jesus did (Mr 6:48), the boat bobbing up and down in the choppy sea.

Matt 14:25
Walking upon the sea ( $\pi \varepsilon \rho \iota \pi \alpha \tau \omega \nu \varepsilon \pi \tau \eta \nu \theta \alpha \lambda \alpha \sigma \sigma \alpha \nu$ ). Another nature miracle. Some scholars actually explain it all away by urging that Jesus was only walking along the beach and not on the water, an impossible theory unless Matthew's account is legendary. Matthew uses the accusative (extension) with $\varepsilon \pi$ in verse 25 and the genitive (specifying case) in 26.

Matt 14:26
They were troubled $(\varepsilon \tau \alpha \rho \alpha \chi \theta \eta \sigma \alpha v)$. Much stronger than that. They were literally "terrified" as they saw Jesus walking on the sea.

An apparition ( $\varphi \alpha v \tau \alpha \sigma \mu \alpha)$, or "ghost," or "spectre" from $\varphi \alpha v \tau \alpha \zeta \omega$ and that from $\varphi \alpha \imath v \omega$. They cried out "from fear" ( $\alpha$ то $\operatorname{\tau ov} \varphi \circ$ ооv) as any one would have done. "A little touch of sailor superstition" (Bruce).

Matt 14:28
Upon the waters ( $\varepsilon \pi \tau \alpha v \delta \alpha \tau \alpha$ ). The impulsiveness of Peter appears as usual. Matthew alone gives this Peter episode.

Matt 14:30

Seeing the wind $(\beta \lambda \varepsilon \pi \omega \nu \tau o v \alpha \nu \varepsilon \mu o v)$. Cf. Ex 20:18 and Re 1:12 "to see the voice" ( $\tau \eta \nu$ $\varphi \omega v \eta \nu)$. "It is one thing to see a storm from the deck of a stout ship, another to see it in the midst of the waves" (Bruce). Peter was actually beginning to $\operatorname{sink}$ ( $\kappa \alpha \tau \alpha \pi о \nu \tau \iota \zeta \varepsilon \sigma \theta \alpha$ ) to plunge down into the sea, "although a fisherman and a good swimmer" (Bengel). It was a dramatic moment that wrung from Peter the cry: "Lord, save me" (Kv $\rho \varepsilon, \sigma \omega \sigma o \nu \mu \varepsilon$ ), and do it quickly the aorist means. He could walk on the water till he saw the wind whirl the water round him.

## Matt 14:31

Didst thou doubt? ( $\varepsilon \delta \iota \sigma \tau \alpha \sigma \alpha \sigma$ ?). Only here and 28:17 in the N.T. From $\delta \iota \sigma \tau \alpha \zeta \omega$ and that from $\delta \iota \varsigma$ (twice). Pulled two ways. Peter's trust in the power of Christ gave way to his dread of the wind and waves. Jesus had to take hold of Peter ( $\varepsilon \pi \varepsilon \lambda \alpha \beta \varepsilon \tau \sigma$, middle voice) and pull him up while still walking on the water.

Matt 14:32
Ceased ( $\varepsilon \kappa о \pi \alpha \sigma \varepsilon v)$. From котоऽ, toil. The wind grew weary or tired, exhausted itself in the presence of its Master (cf. Mr 4:39). Not a mere coincidence that the wind ceased now.

Matt 14:33
Worshipped him ( $\pi \rho о \sigma \varepsilon \kappa v \nu \eta \sigma \alpha \nu \alpha v \tau \omega)$. And Jesus accepted it. They were growing in appreciation of the person and power of Christ from the attitude in $8: 27$. They will soon be ready for the confession of $16: 16$. Already they can say: "Truly God's Son thou art." The absence of the article here allows it to mean a Son of God as in 27:54 (the centurion). But they probably mean "the Son of God" as Jesus was claiming to them to be.

Matt 14:34
Gennesaret ( $\Gamma \varepsilon \nu \nu \eta \sigma \alpha \rho \varepsilon \tau)$. A rich plain four miles long and two broad. The first visit of Jesus apparently with the usual excitement at the cures. People were eager to touch the hem of Christ's mantle like the woman in 9:20. Jesus honoured their superstitious faith and "as many as touched were made whole" (oбo $\eta \psi \alpha v \tau o \delta ı \varepsilon \sigma \omega \theta \varepsilon \sigma \alpha v)$, completely ( $\delta \iota-$ ) healed.

## Matthew 15

Matt 15:1
From Jerusalem ( $\alpha \pi \sigma$ Iع $\rho о \sigma о \lambda \nu \mu \omega v$ ). Jerusalem is the headquarters of the conspiracy against Jesus with the Pharisees as the leaders in it. Already we have seen the Herodians combining with the Pharisees in the purpose to put Jesus to death (Mr 3:6; Mt 12:14; Lu 6:11). Soon Jesus will warn the disciples against the Sadducees also (Mt 16:6). Unusual order here, "Pharisees and scribes." "The guardians of tradition in the capital have their evil eye on Jesus and co-operate with the provincial rigorists" (Bruce), if the Pharisees were not all from Jerusalem.

Matt 15:2
The tradition of the elders ( $\tau \eta \nu \pi \alpha \rho \alpha \delta o \sigma \iota \nu \tau \omega \nu \pi \rho \varepsilon \sigma \beta \nu \tau \varepsilon \rho \omega v$ ). This was the oral law, handed down by the elders of the past in ex cathedra fashion and later codified in the Mishna. Handwashing before meals is not a requirement of the Old Testament. It is, we know, a good thing for sanitary reasons, but the rabbis made it a mark of righteousness for others at any rate. This item was magnified at great length in the oral teaching. The washing (vintov $\tau \alpha$, middle voice, note) of the hands called for minute regulations. It was commanded to wash the hands before meals, it was one's duty to do it after eating. The more rigorous did it between the courses. The hands must be immersed. Then the water itself must be "clean" and the cups or pots used must be ceremonially "clean." Vessels were kept full of clean water ready for use (Joh 2:6-8). So it went on ad infinitum. Thus a real issue is raised between Jesus and the rabbis. It was far more than a point of etiquette or of hygienics. The rabbis held it to be a mortal sin. The incident may have happened in a Pharisee's house.

Matt 15:3
Ye also (ка v $\mu \varepsilon \iota \varsigma)$. Jesus admits that the disciples had transgressed the rabbinical traditions. Jesus treats it as a matter of no great importance in itself save as they had put the tradition of the elders in the place of the commandment of God. When the two clashed, as was often the case, the rabbis transgress the commandment of God "because of your tradition" ( $\delta \iota \alpha \tau \eta \nu \pi \alpha \rho \alpha \delta o \sigma \iota v \nu \mu \omega v$ ). The accusative with $\delta \iota \alpha$ means that, not "by means of." Tradition is not good or bad in itself. It is merely what is handed on from one to another. Custom tended to make these traditions binding like law. The Talmud is a monument of their struggle with tradition. There could be no compromise on this subject and Jesus accepts the issue. He stands for real righteousness and spiritual freedom, not for bondage to mere ceremonialism and tradition. The rabbis placed tradition (the oral law) above the law of God.

Matt 15:5
But ye say (v $\boldsymbol{\text { (ıц }} \delta \varepsilon \lambda \varepsilon \gamma \varepsilon \tau \varepsilon$ ). In sharp contrast to the command of God. Jesus had quoted the fifth commandment (Ex 20:12,16) with the penalty "die the death" ( $\theta a v a \tau \omega \tau \varepsilon \lambda \varepsilon \nu \tau \alpha \tau \omega)$, "go on to his end by death," in imitation of the Hebrew idiom. They dodged this command
of God about the penalty for dishonouring one's father or mother by the use "Corban" ( $\kappa o \rho \beta \alpha v$ ) as Mark calls it (Mr 7:11). All one had to do to evade one's duty to father or mother was to say "Corban" or "Gift" ( $\Delta \omega \rho o v$ ) with the idea of using the money for God. By an angry oath of refusal to help one's parents, the oath or vow was binding. By this magic word one set himself free (ov $\mu \eta \tau \mu \eta \sigma \varepsilon$, he shall not honour) from obedience to the fifth commandment. Sometimes unfilial sons paid graft to the rabbinical legalists for such dodges. Were some of these very faultfinders guilty?

## Matt 15:6

Ye have made void the word of God ( $\varepsilon \kappa \cup \rho \omega \sigma \alpha \tau \varepsilon \tau о \nu \lambda o \gamma o v \tau o v \theta \varepsilon o v$ ). It was a stinging indictment that laid bare the hollow pretence of their quibbles about handwashing. Kvpos means force or authority, aкирос is without authority, null and void. It is a late verb, акирош but in the LXX, Gal 3:17 ; and in the papyri Adjective, verb, and substantive occur in legal phraseology like cancelling a will, etc. The moral force of God's law is annulled by their hairsplitting technicalities and immoral conduct.

Matt 15:7
Well did Isaiah prophesy of you ( $\kappa \alpha \lambda \omega \varsigma \varepsilon \pi \rho о \varphi \eta \tau \varepsilon v \sigma \varepsilon v \pi \varepsilon \rho \nu \mu \omega \nu$ Eбaıa¢). There is sarcasm in this pointed application of Isaiah's words (Isa 29:13) to these rabbis. He "beautifully pictured" them. The portrait was to the very life, "teaching as their doctrines the commandments of men." They were indeed far from God if they imagined that God would be pleased with such gifts at the expense of duty to one's parents.

Matt 15:11
 is used in two senses, either what is "common" to all and general like the Koine Greek, or what is unclean and "common" either ceremonially or in reality. The ceremonial "commonness" disturbed Peter on the housetop in Joppa (Ac 10:14 ). See also Ac 21:28; Heb 9:13 . One who is thus religiously common or unclean is cut off from doing his religious acts. "Defilement" was a grave issue with the rabbinical ceremonialists. Jesus appeals to the crowd here:

Hear and understand (акоvєโє ка бטvเะtє). He has a profound distinction to draw. Moral uncleanness is what makes a man common, defiles him. That is what is to be dreaded, not to be glossed over. "This goes beyond the tradition of the elders and virtually abrogates the Levitical distinctions between clean and unclean" (Bruce). One can see the pettifogging pretenders shrivel up under these withering words.

## Matt 15:12

Were offended ( $\varepsilon \sigma \kappa \alpha v \delta \alpha \lambda_{\iota} \sigma \eta \eta \sigma \alpha v$ ). First aorist passive. "Were caused to stumble," "have taken offence" (Moffatt), "have turned against you" (Weymouth), "were shocked" (Goodspeed), "War ill-pleased" (Braid Scots). They took umbrage at the public rebuke and at such a scorpion sting in it all. It cut to the quick because it was true. It showed in the
glowering countenances of the Pharisees so plainly that the disciples were uneasy. See on 5:29.

Matt 15:14
They are blind guides ( $\tau \cup \varphi \lambda o$ عוбוv o $\delta \eta \gamma \circ$ ). Graphic picture. Once in Cincinnati a blind man introduced me to his blind friend. He said that he was showing him the city. Jesus is not afraid of the Pharisees. Let them alone to do their worst. Blind leaders and blind victims will land in the ditch. A proverbial expression in the O.T.

Matt 15:15
Declare unto us the parable ( $\varphi \rho \alpha \sigma o v \nu \mu \nu \nu \tau \eta v \pi \alpha \rho \alpha \beta 0 \lambda \eta \nu)$. Explain the parable (pithy saying) in verse 11, not in verse 14. As a matter of fact, the disciples had been upset by Christ's powerful exposure of the "Corban" duplicity and the words about "defilement" in verse 11.

Matt 15:16
 is an adverbial accusative (classic aı $\chi \mu \eta$, point (of a weapon) $=\alpha \kappa \mu \eta \nu \chi \rho \circ v o v$ at this point of time, just now=et. It occurs in papyri and inscriptions, though condemned by the old grammarians. "In spite of all my teaching, are ye also like the Pharisees without spiritual insight and grasp?" One must never forget that the disciples lived in a Pharisaic environment. Their religious world-outlook was Pharisaic. They were lacking in spiritual intelligence or sense, "totally ignorant" (Moffatt).

Matt 15:17
Perceive ye not? (ov vositq). Christ expects us to make use of our vous, intellect, not for pride, but for insight. The mind does not work infallibly, but we should use it for its God-given purpose. Intellectual laziness or flabbiness is no credit to a devout soul.

Matt 15:18
Out of the mouth ( $\varepsilon \kappa$ tov $\sigma \tau о \mu \alpha \tau о \varsigma)$. Spoken words come out of the heart and so are a true index of character. By "heart" (карঠıaৎ) Jesus means not just the emotional nature, but the entire man, the inward life of "evil thoughts" ( $\delta \iota \lambda \lambda о \gamma \iota \sigma \mu \circ \pi о v \eta \rho o$ ) that issue in words and deeds. "These defile the man," not "eating with unwashed hands." The captious quibblings of the Pharisees, for instance, had come out of evil hearts.

Matt 15:22
A Canaanitish woman ( $\gamma v v \eta$ Xavavaıa). The Phoenicians were descended from the Canaanites, the original inhabitants of Palestine. They were of Semitic race, therefore, though pagan.

Have pity on me ( $\varepsilon \lambda \varepsilon \eta \sigma o v \mu \varepsilon$ ). She made her daughter's case her own, "badly demonized."

Matt 15:23

For she crieth after us (o $\kappa \rho \alpha \zeta \varepsilon$ o $\pi\llcorner\sigma \theta \varepsilon v \eta \mu \omega v$ ). The disciples greatly disliked this form of public attention, a strange woman crying after them. They disliked a sensation. Did they wish the woman sent away with her daughter healed or unhealed?

Matt 15:24
I was not sent (ouk $\alpha \pi \varepsilon \sigma \tau \alpha \lambda \eta \nu$ ). Second aorist passive indicative of $\alpha \pi о \sigma \tau \varepsilon \lambda \lambda \omega$. Jesus takes a new turn with this woman in Phoenicia. He makes a test case of her request. In a way she represented the problem of the Gentile world. He calls the Jews "the lost sheep of the house of Israel" in spite of the conduct of the Pharisees.

Matt 15:27
Even the dogs ( $\kappa \alpha \tau \alpha$ кvvapıa). She took no offence at the implication of being a Gentile dog. The rather she with quick wit took Christ's very word for little dogs ( $\kappa v v a \rho ı \alpha$ ) and deftly turned it to her own advantage, for the little dogs eat of the crumbs ( $\psi \tau \chi \omega v$, little morsels, diminutive again) that fall from the table of their masters ( $\kappa v \rho \iota \omega v$ ), the children.

Matt 15:28
As thou wilt ( $\omega \varsigma \theta \varepsilon \lambda \varepsilon เ \varsigma)$. Her great faith and her keen rejoinder won her case.
Matt 15:29
And sat there ( $\varepsilon \kappa \alpha \theta \eta \tau$ то $\varepsilon \kappa \varepsilon$ ). "Was sitting there" on the mountain side near the sea of Galilee, possibly to rest and to enjoy the view or more likely to teach.

Matt 15:30
 very strong word, flung them down, "not carelessly, but in haste, because so many were coming on the same errand" (Vincent). It was a great day for "they glorified the God of Israel."

Matt 15:32
Three days ( $\eta \mu \varepsilon \rho \alpha \tau \rho \varepsilon \varsigma \varsigma)$. A parenthetic nominative (Robertson, Grammar, p. 460).
What to eat ( $\tau \varphi \alpha \gamma \omega \sigma \tau v$ ). Indirect question with the deliberative subjunctive retained. In the feeding of the five thousand Jesus took compassion on the people and healed their sick ( $14: 14$ ). Here the hunger of the multitude moves him to compassion ( $\sigma \pi \lambda \alpha \gamma \chi v \zeta \rho \mu \alpha$, in both instances). So he is unwilling (ov $\theta \varepsilon \lambda \omega$ ) to send them away hungry.

Faint ( $\varepsilon \kappa \lambda \cup \theta \omega \sigma \tau v)$. Unloosed, ( $\varepsilon \kappa \lambda \nu \omega)$ exhausted.
Matt 15:33
And the disciples say to him ( $\kappa \alpha \lambda \varepsilon \gamma \gamma \sigma \sigma \tau v \alpha \cup \tau \omega$ o $\mu \alpha \theta \eta \tau \alpha$ ). It seems strange that they should so soon have forgotten the feeding of the five thousand (Mt 14:13-21), but they did. Soon Jesus will remind them of both these demonstrations of his power (16:9,10). They forgot both of them, not just one. Some scholars scout the idea of two miracles so similar as the feeding of the five thousand and the four thousand, though both are narrated in detail by both Mark and Matthew and both are later mentioned by Jesus. Jesus repeated his sayings and wrought multitudes of healings. There is no reason in itself why Jesus should not on
occasion repeat a nature miracle like this elsewhere. He is in the region of Decapolis, not in the country of Philip (Tpaxovitıc).

Matt 15:34
A few small fishes ( $0 \lambda \wedge \gamma \alpha \downarrow \chi \theta \cup \delta \iota \alpha$, diminutive again).
Matt 15:35
On the ground ( $\varepsilon \pi \tau \eta v \gamma \eta \nu$ ). No mention of "grass" as in 14:19 for this time, midsummer, the grass would be parched and gone.

Matt 15:36
Gave thanks ( $\varepsilon u \chi \alpha \rho \iota \sigma \tau \eta \sigma a \varsigma)$ ) In 14:19 the word used for "grace" or "blessing" is عu入oүךб\&v. Vincent notes that the Jewish custom was for the head of the house to say the blessing only if he shared the meal unless the guests were his own household. But we need not think of Jesus as bound by the peccadilloes of Jewish customs.

Matt 15:39
The borders of Magadan ( $\varepsilon ı \varsigma \tau \alpha$ opıa Maү $\alpha \delta \alpha v$ ). On the eastern side of the Sea of Galilee and so in Galilee again. Mark terms it Dalmanutha (Mr 8:10). Perhaps after all the same place as Magdala, as most manuscripts have it.

## Matthew 16

Matt 16:1
The Pharisees and Sadducees (о Фарıбаı ка $\Sigma \alpha \delta \delta$ оикаıо). The first time that we have this combination of the two parties who disliked each other exceedingly. Hate makes strange bedfellows. They hated Jesus more than they did each other. Their hostility has not decreased during the absence of Jesus, but rather increased.

Tempting him ( $\pi \varepsilon \iota \rho \alpha \zeta о \nu \tau \varepsilon \varsigma)$. Their motive was bad.
A sign from heaven ( $\sigma \eta \mu \varepsilon \circ \circ$ єк tov oupavou). The scribes and Pharisees had already asked for a sign ( 12:38). Now this new combination adds "from heaven." What did they have in mind? They may not have had any definite idea to embarrass Jesus. The Jewish apocalypses did speak of spectacular displays of power by the Son of Man (the Messiah). The devil had suggested that Jesus let the people see him drop down from the pinnacle of the temple and the people expected the Messiah to come from an unknown source (Joh 7:27 ) who would do great signs (Joh 7:31 ). Chrysostom (Hom. liii.) suggests stopping the course of the sun, bridling the moon, a clap of thunder.

Matt 16:2
Fair weather ( $\varepsilon v \delta i \alpha)$. An old poetic word from $\varepsilon v$ and $Z \varepsilon v \varsigma$ as the ruler of the air and giver of fair weather. So men today say "when the sky is red at sunset." It occurs on the Rosetta Stone and in a fourth century A.D. Oxyr. papyrus for "calm weather" that made it impossible to sail the boat. Aleph and B and some other MSS. omit verses 2 and 3. W omits part of verse 2. These verses are similar to Lu 12:54-56. McNeile rejects them here. Westcott and Hort place in brackets. Jesus often repeated his sayings. Zahn suggests that Papias added these words to Matthew.

Matt 16:3
Lowring ( $\sigma \tau v \gamma v \alpha \zeta \omega v)$. A sky covered with clouds. Used also of a gloomy countenance as of the rich young ruler in Mr 10:22. Nowhere else in the New Testament. This very sign of a rainy day we use today. The word for "foul weather" ( $\chi \varepsilon \mu \omega v$ ) is the common one for winter and a storm.

The signs of the times ( $\tau \alpha \sigma \eta \mu \varepsilon ı \alpha \tau \omega v \kappa \alpha \iota \rho \omega v$ ). How little the Pharisees and Sadducees understood the situation. Soon Jerusalem would be destroyed and the Jewish state overturned. It is not always easy to discern ( $\delta$ ıккрıveıv, discriminate) the signs of our own time. Men are numerous with patent keys to it all. But we ought not to be blind when others are gullible.

Matt 16:4
Same words in 12:39 except tov $\pi \rho о \varphi \eta \tau 0 v$, a real doublet.
Matt 16:5
Came ( $\varepsilon \lambda$ Өovteऽ). Probably= "went" as in Lu 15:20 ( $\llcorner\rho \varepsilon$, not $\varsigma \varepsilon v \iota \rho \varepsilon$ ). So in Mr 8:13 $\alpha \pi \eta \lambda \theta \varepsilon v$.

Forgot ( $\varepsilon \pi \varepsilon \lambda \alpha \theta$ ovto). Perhaps in the hurry to leave Galilee, probably in the same boat by which they came across from Decapolis.

Matt 16:7
 to understand the parabolic warning against "the leaven of the Pharisees and Sadducees" (verse 6) after the collision of Christ just before with both parties in Magadan. They kept it up, imperfect tense. It is "loaves" (aptous) rather than "bread."

Matt 16:8
Jesus asks four pungent questions about the intellectual dulness, refers to the feeding of the five thousand and uses the word корıvovs ( $14: 20$ ) for it and $\sigma \varphi$ טpi $\delta$ ac for the four thousand ( $15: 37$ ), and repeats his warning ( 16:11). Every teacher understands this strain upon the patience of this Teacher of teachers.

Matt 16:12
Then understood they ( $\tau \circ \tau \varepsilon \sigma \cup v \eta \kappa \alpha v$ ). First aorist active indicative of $\sigma \cup v ı \eta \mu$, to grasp, to comprehend. They saw the point after this elaborate rebuke and explanation that by "leaven" Jesus meant "teaching."

Matt 16:13
Caesarea Philippi (Kaıбapıaऽ $\tau \eta \varsigma Ф \iota \lambda \iota \pi \pi \sigma v)$. Up on a spur of Mt. Hermon under the rule of Herod Philip.

He asked ( $\eta \rho \omega \tau \alpha$ ). Began to question, inchoative imperfect tense. He was giving them a test or examination. The first was for the opinion of men about the Son of Man.

Matt 16:14
And they said (o $\delta \varepsilon \varepsilon \iota \pi \alpha v$ ). They were ready to respond for they knew that popular opinion was divided on that point (14:1f. ). They give four different opinions. It is always a risky thing for a pastor to ask for people's opinions of him. But Jesus was not much concerned by their answers to this question. He knew by now that the Pharisees and Sadducees were bitterly hostile to him. The masses were only superficially following him and they looked for a political Messiah and had vague ideas about him. How much did the disciples understand and how far have they come in their development of faith? Are they still loyal?

Matt 16:15
But who say ye that I am? (v $\mu \varepsilon ı \varsigma \delta \varepsilon \tau เ v \alpha \mu \varepsilon \lambda \varepsilon \gamma \varepsilon \tau \varepsilon \varepsilon เ v \alpha ı$ ?). This is what matters and what Jesus wanted to hear. Note emphatic position of
$\mathbf{h} \boxtimes$ meis , "But you, who say ye that I am?"
Matt 16:16
Peter is the spokesman now: "Thou art the Christ, the Son of the living God" ( $\Sigma v \varepsilon$ o Xpıбтоц o vios tov $\theta$ rov tov $\zeta \omega v \tau o \varsigma)$. It was a noble confession, but not a new claim by Jesus. Peter had made it before (Joh 6:69) when the multitude deserted Jesus in Capernaum. Since the early ministry (John 4) Jesus had avoided the word Messiah because of its political
meaning to the people. But now Peter plainly calls Jesus the Anointed One, the Messiah, the Son of the God the living one (note the four Greek articles). This great confession of Peter means that he and the other disciples believe in Jesus as the Messiah and are still true to him in spite of the defection of the Galilean populace (John 6).

## Matt 16:17

Blessed art thou ( $\mu \alpha \kappa \alpha \rho \iota \varsigma \varepsilon$ ). A beatitude for Peter. Jesus accepts the confession as true. Thereby Jesus on this solemn occasion solemnly claims to be the Messiah, the Son of the living God, his deity in other words. The disciples express positive conviction in the Messiahship or Christhood of Jesus as opposed to the divided opinions of the populace. "The terms in which Jesus speaks of Peter are characteristic--warm, generous, unstinted. The style is not that of an ecclesiastical editor laying the foundation for church power, and prelatic pretentions, but of a noble-minded Master eulogizing in impassioned terms a loyal disciple" (Bruce). The Father had helped Peter get this spiritual insight into the Master's Person and Work.

Matt 16:18
And I also say unto thee ( $\kappa$ ' $\alpha \gamma \omega \delta \varepsilon \sigma o \lambda \varepsilon \gamma \omega$ ). "The emphasis is not on 'Thou art Peter' over against 'Thou art the Christ,' but on Kaү $\omega$ : 'The Father hath revealed to thee one truth, and I also tell you another" (McNeile). Jesus calls Peter here by the name that he had said he would have (Joh 1:42). Peter (Пعг $\rho \circ \varsigma)$ is simply the Greek word for Cephas (Aramaic). Then it was prophecy, now it is fact. In verse 17 Jesus addresses him as "Simon Bar-Jonah," his full patronymic (Aramaic) name. But Jesus has a purpose now in using his nickname "Peter" which he had himself given him. Jesus makes a remarkable play on Peter's name, a pun in fact, that has caused volumes of controversy and endless theological strife.

On this rock $(\varepsilon \pi \tau \alpha v \tau \eta \tau \eta \pi \varepsilon \tau \rho \alpha)$ Jesus says, a ledge or cliff of rock like that in 7:24 on which the wise man built his house. Пعт $о$ os is usually a smaller detachment of the massive ledge. But too much must not be made of this point since Jesus probably spoke Aramaic to Peter which draws no such distinction $(\mathbb{K} \eta \varphi \alpha)$. What did Jesus mean by this word-play?

I will build my church (оєкобо $\mu \eta \sigma \omega \mu \circ v \tau \eta \nu \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha \nu$ ). It is the figure of a building and he uses the word $\varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha \nu$ which occurs in the New Testament usually of a local organization, but sometimes in a more general sense. What is the sense here in which Jesus uses it? The word originally meant "assembly" (Ac 19:39) , but it came to be applied to an "unassembled assembly" as in Ac 8:3 for the Christians persecuted by Saul from house to house. "And the name for the new Israel, $\varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$, in His mouth is not an anachronism. It is an old familiar name for the congregation of Israel found in Deut. (De 18:26;23:2) and Psalms (Ps 22:36 ), both books well known to Jesus" (Bruce). It is interesting to observe that in Ps 89 most of the important words employed by Jesus on this occasion occur in the LXX

with the word $\varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$ it will be helpful to turn to 1 Pe 2:5. Peter, the very one to whom Jesus is here speaking, writing to the Christians in the five Roman provinces in Asia ( 1 Pe
 to resist the impression that Peter recalls the words of Jesus to him on this memorable occasion. Further on (1Pe 2:9) he speaks of them as an elect race, a royal priesthood, a holy nation, showing beyond controversy that Peter's use of building a spiritual house is general, not local. This is undoubtedly the picture in the mind of Christ here in 16:18. It is a great spiritual house, Christ's Israel, not the Jewish nation, which he describes. What is the rock on which Christ will build his vast temple? Not on Peter alone or mainly or primarily. Peter by his confession was furnished with the illustration for the rock on which His church will rest. It is the same kind of faith that Peter has just confessed. The perpetuity of this church general is guaranteed.

The gates of Hades ( $\pi \cup \lambda \alpha \alpha \iota \delta o v$ )
shall not prevail against it (ov катіб $\quad$ vбovoıv aviņ). Each word here creates difficulty. Hades is technically the unseen world, the Hebrew Sheol, the land of the departed, that is death. Paul uses $\theta$ avate in 1Co 15:55 in quoting Ho $13: 14$ for $\alpha \iota \delta \eta$. It is not common in the papyri, but it is common on tombstones in Asia Minor, "doubtless a survival of its use in the old Greek religion" (Moulton and Milligan, Vocabulary). The ancient pagans divided Hades ( $\alpha$ privative and $\delta \delta \varepsilon ı v$, to see, abode of the unseen) into Elysium and Tartarus as the Jews put both Abraham's bosom and Gehenna in Sheol or Hades (cf. Lu 16:25). Christ was in Hades (Ac 2:27,31 ), not in Gehenna. We have here the figure of two buildings, the Church of Christ on the Rock, the House of Death (Hades). "In the Old Testament the 'gates of Hades' (Sheol) never bears any other meaning (Isa 38:10 ; Wisd. 16:3; 3Macc. 5:51) than death," McNeile claims. See also Ps 9:13; 107:18; Job 38:17 ( $\pi \cup \lambda \alpha$ Өavatov $\pi \cup \lambda \omega \rho o ~ \alpha ı \delta o v) . ~$ It is not the picture of Hades attacking Christ's church, but of death's possible victory over the church. "The єкк $\lambda \eta \sigma$ 就 is built upon the Messiahship of her master, and death, the gates of Hades, will not prevail against her by keeping Him imprisoned. It was a mysterious truth, which He will soon tell them in plain words (verse 21); it is echoed in Ac 2:24,31 " (McNeile). Christ's church will prevail and survive because He will burst the gates of Hades and come forth conqueror. He will ever live and be the guarantor of the perpetuity of His people or church. The verb $\kappa \alpha \tau \iota \sigma \chi \cup \omega$ (literally have strength against, $\iota \sigma \chi \nu \omega$ from $\sigma \chi \chi \varsigma$ and $\kappa \alpha \tau-$ ) occurs also in Lu 21:36; 23:23. It appears in the ancient Greek, the LXX, and in the papyri with the accusative and is used in the modern Greek with the sense of gaining the mastery over. The wealth of imagery in Mt 16:18 makes it difficult to decide each detail, but the main point is clear. The єкк $\eta \boldsymbol{\jmath}$ а which consists of those confessing Christ as Peter has just done will not cease. The gates of Hades or bars of Sheol will not close down on it. Christ will rise and will keep his church alive. Sublime Porte used to be the title of Turkish power in Constantinople.

Matt 16:19

The Keys of the kingdom ( $\tau \alpha \varsigma \kappa \lambda \varepsilon \varepsilon \delta \alpha \varsigma \tau \eta \varsigma \beta \alpha \sigma i \lambda \varepsilon ı \alpha \varsigma)$. Here again we have the figure of a building with keys to open from the outside. The question is raised at once if Jesus does not here mean the same thing by "kingdom" that he did by "church" in verse 18. In Re 1:18; 3:7 Christ the Risen Lord has "the keys of death and of Hades." He has also "the keys of the kingdom of heaven" which he here hands over to Peter as "gatekeeper" or "steward" (oıкоvоноя) provided we do not understand it as a special and peculiar prerogative belonging to Peter. The same power here given to Peter belongs to every disciple of Jesus in all the ages. Advocates of papal supremacy insist on the primacy of Peter here and the power of Peter to pass on this supposed sovereignty to others. But this is all quite beside the mark. We shall soon see the disciples actually disputing again (Mt 18:1) as to which of them is the greatest in the kingdom of heaven as they will again (20:21) and even on the night before Christ's death. Clearly neither Peter nor the rest understood Jesus to say here that Peter was to have supreme authority. What is added shows that Peter held the keys precisely as every preacher and teacher does. To "bind" ( $\delta \eta \sigma \eta \iota \varsigma)$ in rabbinical language is to forbid, to "loose" ( $\lambda \cup \sigma \eta \iota \varsigma)$ is to permit. Peter would be like a rabbi who passes on many points. Rabbis of the school of Hillel "loosed" many things that the school of Schammai "bound." The teaching of Jesus is the standard for Peter and for all preachers of Christ. Note the future perfect indicative ( $\varepsilon \sigma \tau \alpha \delta \varepsilon \delta \varepsilon \mu \varepsilon v o v, \varepsilon \sigma \tau \alpha \lambda \varepsilon \lambda \nu \mu \varepsilon v o v)$, a state of completion. All this assumes, of course, that Peter's use of the keys will be in accord with the teaching and mind of Christ. The binding and loosing is repeated by Jesus to all the disciples ( $18: 18$ ). Later after the Resurrection Christ will use this same language to all the disciples (Joh 20:23 ), showing that it was not a special prerogative of Peter. He is simply first among equals, primus inter pares, because on this occasion he was spokesman for the faith of all. It is a violent leap in logic to claim power to forgive sins, to pronounce absolution, by reason of the technical rabbinical language that Jesus employed about binding and loosing. Every preacher uses the keys of the kingdom when he proclaims the terms of salvation in Christ. The proclamation of these terms when accepted by faith in Christ has the sanction and approval of God the Father. The more personal we make these great words the nearer we come to the mind of Christ. The more ecclesiastical we make them the further we drift away from him.

Matt 16:20
That they should tell no man ( $\imath v \alpha \mu \eta \delta \varepsilon v \varepsilon ı \pi \omega \sigma \iota v$ ). Why? For the very reason that he had himself avoided this claim in public. He was the Messiah (o Xpıбтos), but the people would inevitably take it in a political sense. Jesus was plainly profoundly moved by Peter's great confession on behalf of the disciples. He was grateful and confident of the final outcome. But he foresaw peril to all. Peter had confessed him as the Messiah and on this rock of faith thus confessed he would build his church or kingdom. They will all have and use the keys to this greatest of all buildings, but for the present they must be silent.

Matt 16:21

From that time began ( $\alpha \pi о$ тотє $\eta \rho \xi \alpha \tau 0$ ). It was a suitable time for the disclosure of the greatest secret of his death. It is now just a little over six months before the cross. They must know it now to be ready then. The great confession of Peter made this seem an appropriate time. He will repeat the warnings (17:22f. with mention of betrayal; 20:17-19 with the cross) which he now "began." So the necessity ( $\delta \varepsilon$, must) of his suffering death at the hands of the Jerusalem ecclesiastics who have dogged his steps in Galilee is now plainly stated. Jesus added his resurrection "on the third day" ( $\tau \eta \tau \rho \iota \tau \eta \eta \mu \varepsilon \rho \alpha$ ), not "on the fourth day," please observe. Dimly the shocked disciples grasped something of what Jesus said.

Matt 16:22
 aside and apart, "as if by a right of his own. He acted with greater familiarity after the token of acknowledgment had been given. Jesus, however, reduces him to his level" (Bengel). "Peter here appears in a new character; a minute ago speaking under inspiration from heaven, now under inspiration from the opposite quarter" (Bruce). Syriac Sinaitic for Mr 8:32 has it "as though pitying him." But this exclamation and remonstrance of Peter was soon interrupted by Jesus.

God have mercy on thee ( $\lambda \varepsilon \varepsilon \omega \varsigma$. Supply $\varepsilon \eta \eta$ or $\varepsilon \sigma \tau \omega$ o $\theta \varepsilon$ ) $)$.
This shall never be ( $o v \mu \eta \varepsilon \sigma \tau \alpha \sigma 0$ тov $\tau$ ). Strongest kind of negation, as if Peter would not let it happen. Peter had perfect assurance.

Matt 16:23
But he turned (o $\delta \varepsilon \sigma \tau \rho \alpha \varphi \varepsilon \iota \varsigma)$. Second aorist passive participle, quick ingressive action, away from Peter in revulsion, and toward the other disciples (Mr 8:33 has $\varepsilon \pi \iota \sigma \tau \rho \alpha \varphi \varepsilon \iota \varsigma$ and เ $\delta \omega v$ тоия $\mu \alpha \theta \eta \tau \alpha \varsigma$ аитои).

Get thee behind me, Satan (Нип $\gamma \varepsilon$ о $п \iota \sigma \omega \mu о v, \Sigma \alpha \tau \alpha v \alpha$ ). Just before Peter played the part of a rock in the noble confession and was given a place of leadership. Now he is playing the part of Satan and is ordered to the rear. Peter was tempting Jesus not to go on to the cross as Satan had done in the wilderness. "None are more formidable instruments of temptation than well-meaning friends, who care more for our comfort than for our character" (Bruce). "In Peter the banished Satan had once more returned" (Plummer).

A stumbling-block unto me ( $\sigma \kappa \alpha v \delta \alpha \lambda o v \varepsilon \varepsilon \mu \circ v$ ). Objective genitive. Peter was acting as Satan's catspaw, in ignorance, surely, but none the less really. He had set a trap for Christ that would undo all his mission to earth. "Thou art not, as before, a noble block, lying in its right position as a massive foundation stone. On the contrary, thou art like a stone quite out of its proper place, and lying right across the road in which I must go--lying as a stone of stumbling" (Morison).

Thou mindest not (ov $\varphi \rho 0$ veıৎ). "Your outlook is not God's, but man's" (Moffatt). You do not think God's thoughts. Clearly the consciousness of the coming cross is not a new idea with Jesus. We do not know when he first foresaw this outcome any more than we
know when first the Messianic consciousness appeared in Jesus. He had the glimmerings of it as a boy of twelve, when he spoke of "My Father's house." He knows now that he must die on the cross.

Matt 16:24
Take up his cross ( $\alpha \rho \alpha \tau \omega$ tov $\sigma \tau \alpha u \rho o v$ av $\alpha o v$ ). Pick up at once, aorist tense. This same saying in 10:38, which see. But pertinent here also in explanation of Christ's rebuke to Peter. Christ's own cross faces him. Peter had dared to pull Christ away from his destiny. He would do better to face squarely his own cross and to bear it after Jesus. The disciples would be familiar with cross-bearing as a figure of speech by reason of the crucifixion of criminals in Jerusalem.

Follow ( $\alpha \kappa \alpha \lambda o u \theta \varepsilon \iota \tau \omega$ ). Present tense. Keep on following.
Matt 16:25
Save his life ( $\tau \eta \nu \psi \cup \chi \eta \vee$ avtov $\sigma \omega \sigma \alpha$ ). Paradoxical play on word "life" or "soul," using it in two senses. So about "saving" and "losing" ( $\alpha \pi \mathbf{\lambda \varepsilon \sigma \varepsilon ) . ~}$

Matt 16:26
Gain ( $\kappa \varepsilon \rho \delta \eta \sigma \eta)$ and
profit ( $\zeta \eta \mu \omega \theta \eta$ ). Both aorist subjunctives (one active, the other passive) and so punctiliar action, condition of third class, undetermined, but with prospect of determination. Just a supposed case. The verb for "forfeit" occurs in the sense of being fined or mulcted of money. So the papyri and inscriptions.

Exchange ( $\alpha \nu \tau \alpha \lambda \lambda \alpha \gamma \mu \alpha$ ). As an exchange, accusative in apposition with $\tau$. The soul has no market price, though the devil thinks so. "A man must give, surrender, his life, and nothing less to God; no $\alpha v \tau \alpha \lambda \lambda \alpha \gamma \mu \alpha$ is possible" (McNeile). This word $\alpha v \tau \alpha \lambda \lambda \alpha \gamma \mu \alpha$ occurs twice in the Wisdom of Sirach: "There is no exchange for a faithful friend" (6:15); "There is no exchange for a well-instructed soul" (26:14).

Matt 16:28
Some of them that stand here ( $\tau \tau v \varepsilon \varsigma \tau \omega v$ o $\delta \varepsilon \varepsilon \sigma \tau \omega \tau \omega v$ ). A crux interpretum in reality. Does Jesus refer to the Transfiguration, the Resurrection of Jesus, the great Day of Pentecost, the Destruction of Jerusalem, the Second Coming and Judgment? We do not know, only that Jesus was certain of his final victory which would be typified and symbolized in various ways. The apocalyptic eschatological symbolism employed by Jesus here does not dominate his teaching. He used it at times to picture the triumph of the kingdom, not to set forth the full teaching about it. The kingdom of God was already in the hearts of men. There would be climaxes and consummations.

## Matthew 17

Matt 17:1
After six days ( $\mu \varepsilon \theta^{\prime} \eta \mu \varepsilon \rho \alpha \varsigma \varepsilon \xi$ ). This could be on the sixth day, but as Luke (Lu 9:28) puts it "about eight days" one naturally thinks of a week as the probable time, though it is not important.

Taketh with him ( $\pi \alpha \rho \alpha \lambda \alpha \mu \beta \alpha v \varepsilon$ ). Literally,
takes along. Note historical present. These three disciples form an inner group who have shown more understanding of Jesus. So at Gethsemane.

Apart ( $\kappa \alpha \tau^{\prime} \iota \delta \iota \alpha v$ ) means "by themselves" ( alone, $\mu$ ovovc, Mark has it) up ( $\alpha v \alpha \varphi \varepsilon \rho \varepsilon$ ) into a high mountain, probably Mount Hermon again, though we do not really know. "The Mount of Transfiguration does not concern geography" (Holtzmann).

Matt 17:2
He was transfigured before them ( $\mu \varepsilon \tau \varepsilon \mu \circ \rho \varphi \omega \theta \eta \varepsilon \mu \pi \rho o \sigma \theta \varepsilon v \alpha v \tau \omega v)$. The word is the same as the metamorphoses (cf. Ovid) of pagan mythology. Luke does not use it. The idea is change ( $\mu \varepsilon \tau \alpha-)$ of form $(\mu \circ \rho \varphi \eta)$. It really presents the essence of a thing as separate from the $\sigma \chi \eta \mu \alpha$ (fashion), the outward accident. So in Ro 12:2 Paul uses both verbs, $\sigma v \nu \sigma \chi \varepsilon \mu \alpha \tau \iota \zeta \sigma \theta \varepsilon$ (be not fashioned) and $\mu \varepsilon \tau \alpha \mu о \rho \varphi о \nu \sigma \theta \varepsilon$ (be ye transformed in your inner life). So in 1Co 7:31 $\sigma \chi \eta \mu \alpha$ is used for the fashion of the world while in $\mathrm{Mr} 16: 12 \mu \circ \rho \varphi \eta$ is used of the form of Jesus after his resurrection. The false apostles are described by $\mu \varepsilon \tau \alpha \sigma \chi \eta \mu \alpha \tau \iota \sigma о \mu \alpha$ in 2Co 11:13-15. In Php 2:6 we have $\varepsilon v \mu о \rho \varphi \eta$ used of the Preincarnate state of Christ and $\mu о \rho \varphi \eta \nu \delta o u \lambda o v$ of the Incarnate state (Php 2:7), while $\sigma \chi \eta \mu \alpha \tau \omega \varsigma$ $\alpha v \theta \rho \omega \pi \sigma \varsigma$ emphasizes his being found "in fashion as a man." But it will not do in Mt 17:2 to use the English transliteration $\mu \varepsilon \tau \alpha \mu о \rho \varphi \omega \sigma \iota \varsigma$ because of its pagan associations. So the Latin transfigured (Vulgate transfiguratus est) is better. "The deeper force of $\mu \varepsilon \tau \alpha \mu о \rho \varphi о v \sigma \theta \alpha$ is seen in 2Co 3:18 (with reference to the shining on Moses' face), Ro 12:2" (McNeile). The word occurs in a second-century papyrus of the pagan gods who are invisible. Matthew guards against the pagan idea by adding and explaining about the face of Christ "as the sun" and his garments "as the light."

## Matt 17:3

There appeared $(\omega \varphi \theta \eta)$. Singular aorist passive verb with Moses (to be understood also with Elijah), but the participle $\sigma v \nu \lambda a \lambda o u v \tau \varepsilon \varsigma$ is plural agreeing with both. "Sufficient objectivity is guaranteed by the vision being enjoyed by all three" (Bruce). The Jewish apocalypses reveal popular expectations that Moses and Elijah would reappear. Both had mystery connected with their deaths. One represented law, the other prophecy, while Jesus represented the gospel (grace). They spoke of his decease (Lu 9:31), the cross, the theme uppermost in the mind of Christ and which the disciples did not comprehend. Jesus needed comfort and he gets it from fellowship with Moses and Elijah.

## Matt 17:4

And Peter answered ( $\alpha \pi о \kappa \rho \iota \theta \varepsilon \iota \varsigma \varepsilon$ о Пع $\varnothing \rho \circ \varsigma$ ). "Peter to the front again, but not greatly to his credit" (Bruce). It is not clear what Peter means by his saying: "It is good for us to be here" ( $\kappa \alpha \lambda о \nu \varepsilon \sigma \tau \iota \nu \eta \mu \alpha \varsigma \omega \delta \varepsilon \varepsilon \iota \nu \alpha)$. Luke (Lu 9:33 ) adds "not knowing what he said," as they "were heavy with sleep." So it is not well to take Peter too seriously on this occasion. At any rate he makes a definite proposal.

I will make $(\pi \alpha ı \eta \sigma \omega)$. Future indicative though aorist subjunctive has same form.
Tabernacles (бкףvaৎ), booths. The Feast of Tabernacles was not far away. Peter may have meant that they should just stay up here on the mountain and not go to Jerusalem for the feast.

Matt 17:5
Overshadowed ( $\varepsilon \pi \varepsilon \sigma \kappa \iota \alpha \sigma \varepsilon v$ ). They were up in cloud-land that swept round and over them. See this verb used of Mary (Lu 1:35) and of Peter's shadow (Ac 5:15).

This is (ovtoc $\varepsilon \sigma \tau \iota v)$. At the baptism (Mt 3:17) these words were addressed to Jesus. Here the voice out of the bright cloud speaks to them about Jesus.

Hear ye him (aкоиعтє avtov). Even when he speaks about his death. A sharp rebuke to Peter for his consolation to Jesus about his death.

Matt 17:7
And touched them ( $\kappa \alpha \alpha \psi \alpha \mu \varepsilon \nu \circ \varsigma \alpha v \tau \omega v$ ). Tenderness in their time of fear.
Matt 17:8
Lifting up their eyes ( $\varepsilon \pi \alpha \rho \alpha v \tau \varepsilon \varsigma \tau о v \varsigma о \varphi \theta \alpha \lambda \mu о \nu \varsigma \alpha v \tau \omega \nu)$. After the reassuring touch of Jesus and his words of cheer.

Jesus only (I $\eta$ oovv $\mu \mathrm{ovov}$ ). Moses and Elijah were gone in the bright cloud.
Matt 17:9
Until ( $\varepsilon \omega \varsigma \mathrm{ov}$ ). This conjunction is common with the subjunctive for a future event as his Resurrection ( $\varepsilon \gamma \varepsilon \rho \theta \eta$ ) was. Again (Mr 9:10) they were puzzled over his meaning. Jesus evidently hopes that this vision of Moses and Elijah and his own glory might stand them in good stead at his death.

Matt 17:10
Elijah must first come (E $\lambda \varepsilon ı \alpha v \delta \varepsilon \varepsilon \lambda \theta \varepsilon ı v \pi \rho \omega \tau o v$ ). So this piece of theology concerned them more than anything else. They had just seen Elijah, but Jesus the Messiah had come before Elijah. The scribes used Mal 4:5. Jesus had also spoken again of his death (resurrection). So they are puzzled.

Matt 17:12
Elijah is come already (E $\lambda \varepsilon \iota a \varsigma \eta \delta \eta \eta \lambda \theta \varepsilon v$ ). Thus Jesus identifies John the Baptist with the promise in Malachi, though not the real Elijah in person which John denied (Joh 1:21 ).

They knew him not（ovk eпıүvตбav autov）．Second aorist active indicative of $\varepsilon \pi \iota \downarrow \iota \omega \sigma \kappa \omega$ ，to recognize．Just as they do not know Jesus now（Joh 1：26）．They killed John as they will Jesus the Son of Man．

Matt 17：13
Then understood（ $\tau о \tau \varepsilon \sigma \cup v \eta \kappa \alpha v$ ）．One of the three $k$ aorists．It was plain enough even for them．John was Elijah in spirit and had prepared the way for the Messiah．

Matt 17：15
Epileptic（ $\sigma \varepsilon \lambda \eta v i \alpha \zeta \varepsilon \tau \alpha)$ ．Literally，＂moonstruck，＂＂lunatic．＂The symptoms of epilepsy were supposed to be aggravated by the changes of the moon（cf．4：24）．

He has it bad（ $\kappa \alpha \kappa \omega \varsigma \varepsilon \chi \varepsilon$ ）as often in the Synoptic Gospels．
Matt 17：17
Perverse（ $\delta \iota \varepsilon \sigma \tau \rho \alpha \mu \mu \varepsilon v \eta)$ ．Distorted，twisted in two，corrupt．Perfect passive participle of $\delta \iota \propto \sigma \tau \rho \varepsilon \varphi \omega$ ．

Matt 17：20
Little faith（o入ıүomı⿱宀兀ıv）．A good translation．It was less than＂a grain of mustard seed＂（коккоv $\sigma v a \pi \varepsilon \omega \varsigma)$ ．See 13：31 for this phrase．They had no miracle faith．Bruce holds ＂this mountain＂to be the Mount of Transfiguration to which Jesus pointed．Probably so． But it is a parable．Our trouble is always with＂this mountain＂which confronts our path． Note the form $\mu \varepsilon \tau \alpha \beta \alpha$（ $\mu \varepsilon \tau \alpha$ and $\beta \eta \theta$ ）．

Matt 17：23
And they were exceeding sorry（ $\kappa \alpha \varepsilon \lambda \nu \pi \eta \theta \eta \sigma \alpha v \sigma \varphi \rho \delta \rho \alpha$ ）．So they at last understood that he was talking about his death and resurrection．

Matt 17：24
They that received the half－shekel（o $\tau \alpha \delta \iota \delta \rho \alpha \not \mu \alpha \lambda \alpha \mu \beta \alpha v o v \tau \varepsilon \varsigma)$ ．This temple tax amounted to an Attic drachma or the Jewish half－shekel，about one－third of a dollar．Every Jewish man twenty years of age and over was expected to pay it for the maintenance of the temple．But it was not a compulsory tax like that collected by the publicans for the govern－ ment．＂The tax was like a voluntary church－rate；no one could be compelled to pay＂（Plum－ mer）．The same Greek word occurs in two Egyptian papyri of the first century A．D．for the receipt for the tax for the temple of Suchus（Milligan and Moulton＇s Vocabulary）．This tax for the Jerusalem temple was due in the month Adar（our March）and it was now nearly six months overdue．But Jesus and the Twelve had been out of Galilee most of this time．Hence the question of the tax－collectors．The payment had to be made in the Jewish coin，half－ shekel．Hence the money－changers did a thriving business in charging a small premium for the Jewish coin，amounting to some forty－five thousand dollars a year，it is estimated．It is significant that they approached Peter rather than Jesus，perhaps not wishing to embarrass ＂Your Teacher，＂＂a roundabout hint that the tax was overdue＂（Bruce）．Evidently Jesus had been in the habit of paying it（Peter＇s）．

## Matt 17:25

Jesus spake first to him ( $\pi \rho \circ \varepsilon \varphi \theta \alpha \sigma \varepsilon v \alpha v \tau o v$ o $\operatorname{I\eta } \sigma o v \varsigma \lambda \varepsilon \gamma \omega v$ ). Here only in the N.T. One example in a papyrus B.C. 161 (Moulton and Milligan, Vocabulary). The old idiomatic use of $\varphi \theta \alpha v \omega$ with the participle survives in this example of $\pi \rho o \varphi \theta \alpha v \omega$ in Mt 17:25, meaning to anticipate, to get before one in doing a thing. The Koine uses the infinitive thus with $\varphi \theta a \nu \omega$ which has come to mean simply to arrive. Here the anticipation is made plain by the use of $\pi \rho 0-$. See Robertson's Grammar, p. 1120. The "prevent" of the Authorized Version was the original idea of praevenire, to go before, to anticipate. Peter felt obliged to take the matter up with Jesus. But the Master had observed what was going on and spoke to Peter first.

Toll or tribute ( $\tau \varepsilon \lambda \eta \eta \kappa \eta v \sigma o v$ ). Customs or wares collected by the publicans (like $\varphi о \rho о \varsigma$, Ro 13:7) and also the capitation tax on persons, indirect and direct taxation. K $\eta v \sigma \circ \varsigma$ is the Latin census, a registration for the purpose of the appraisement of property like $\eta$ $\alpha \pi о \gamma \rho a \varphi \eta$ in Lu 2:2; Ac 5:37. By this parable Jesus as the Son of God claims exemption from the temple tax as the temple of his Father just as royal families do not pay taxes, but get tribute from the foreigners or aliens, subjects in reality.

Matt 17:26
The sons (o vio). Christ, of course, and the disciples also in contrast with the Jews. Thus a reply to Peter's prompt "Yes." Logically ( $\alpha \rho \alpha \gamma \varepsilon$ ) free from the temple tax, but practically not as he proceeds to show.

Matt 17:27
Lest we cause them to stumble (ı $\nu \alpha \mu \eta \sigma \kappa \alpha \nu \delta \alpha \lambda ı \sigma \omega \mu \varepsilon \nu \alpha v \tau o v \varsigma)$. He does not wish to create the impression that he and the disciples despise the temple and its worship. Aorist tense (punctiliar single act) here, though some MSS. have present subjunctive (linear). "A hook" ( $\alpha \gamma \kappa \iota \sigma \tau \rho \circ v$ ). The only example in the N.T. of fishing with a hook. From an unused verb $\alpha \gamma \kappa ı \zeta \omega$, to angle, and that from $\alpha \gamma \kappa о \varsigma$, a curve (so also $\alpha \gamma \kappa \alpha \lambda \eta$ the inner curve of the arm, Lu 2:38 ).

First cometh up ( $\tau 0 v \alpha v \alpha \beta \alpha v \tau \alpha \pi \rho \omega \tau 0 v \tau \nexists \theta v)$. More correctly, "the first fish that cometh up."

A shekel ( $\sigma \tau \alpha \tau \eta \rho \alpha)$. Greek stater $=$ four drachmae, enough for two persons to pay the tax.

For me and thee ( $\alpha \nu \tau \varepsilon \mu \circ v \kappa \alpha \sigma o v$ ). Common use of $\alpha \nu \tau$ in commercial transactions, "in exchange for." Here we have a miracle of foreknowledge. Such instances have happened. Some try to get rid of the miracle by calling it a proverb or by saying that Jesus only meant for Peter to sell the fish and thus get the money, a species of nervous anxiety to relieve Christ and the Gospel of Matthew from the miraculous. "All the attempts have been in vain which were made by the older Rationalism to put a non-miraculous meaning into these words"
(B. Weiss). It is not stated that Peter actually caught such a fish though that is the natural implication. Why provision is thus only made for Peter along with Jesus we do not know.

## Matthew 18

Matt 18:1
Who then is greatest ( $\tau \iota \varsigma \alpha \rho \alpha \mu \varepsilon \iota \zeta \omega \nu \varepsilon \sigma \tau \iota v$ ). The $\alpha \rho \alpha$ seems to point back to the taxcollection incident when Jesus had claimed exemption for them all as "sons" of the Father. But it was not a new dispute, for jealousy had been growing in their hearts. The wonderful words of Jesus to Peter on Mount Hermon (Mt 16:17-19) had evidently made Peter feel a fresh sense of leadership on the basis of which he had dared even to rebuke Jesus for speaking of his death ( 16:22). And then Peter was one of the three (James and John also) taken with the Master up on the Mount of Transfiguration. Peter on that occasion had spoken up promptly. And just now the tax-had singled out Peter as the one who seemed to represent the group. Mark (Mr 9:33) represents Jesus as asking them about their dispute on the way into the house, perhaps just after their question in Mt 18:1. Jesus had noticed the wrangling. It will break out again and again (Mt 20:20-28; Lu 22:24 ). Plainly the primacy of Peter was not yet admitted by the others. The use of the comparative $\mu \varepsilon ı \zeta \omega v$ (so o $\mu \varepsilon \iota \zeta \omega \nu$ in verse 4) rather than the superlative $\mu \varepsilon \gamma \iota \sigma \tau \circ$, is quite in accord with the Koine idiom where the comparative is displacing the superlative (Robertson, Grammar, pp. 667ff.). But it is a sad discovery to find the disciples chiefly concerned about their own places (offices) in the political kingdom which they were expecting.

Matt 18:2
Called to him ( $\pi \rho о \sigma \kappa \alpha \lambda \varepsilon \sigma \alpha \mu \varepsilon \nu \circ \varsigma)$. Indirect middle voice aorist participle. It may even be Peter's "little child" ( $\pi \alpha \iota \delta \iota \nu$ ) as it was probably in Peter's house (Mr 9:33 ).

Set him ( $\varepsilon \sigma \tau \eta \sigma \varepsilon v)$. Transitive first aorist active indicative, not intransitive second aorist, $\varepsilon \sigma \tau \eta$.

In the midst of them ( $\varepsilon v \mu \varepsilon \sigma \omega \alpha v \tau \omega \nu)$. Luke adds (Lu 9:47) "by his side" ( $\pi \alpha \rho^{\prime} \varepsilon \alpha v \tau \omega$ ). Both are true.

Matt 18:3
Except ye turn and become ( $\varepsilon \alpha \nu \mu \eta \sigma \tau \rho \alpha \varphi \eta \tau \varepsilon \kappa \alpha \gamma \varepsilon \nu \eta \sigma \theta \varepsilon)$. Third-class condition, undetermined but with prospect of determination. $\Sigma \tau \rho \alpha \varphi \eta \tau \varepsilon$ is second aorist passive subjunctive and $\gamma \varepsilon v \eta \sigma \theta \varepsilon$ second aorist middle subjunctive. They were headed in the wrong direction with their selfish ambition. "His tone at this time is markedly severe, as much as when He denounces the Pharisaism in the bud He had to deal with" (Bruce). The strong double negative ov $\mu \eta \varepsilon เ \sigma \varepsilon \lambda \theta \eta \tau \varepsilon$ means that they will otherwise not get into the kingdom of heaven at all, let alone have big places in it.

Matt 18:4
This little child ( $\tau 0 \pi \alpha \iota \delta \circ v \tau o v \tau o)$. This saying about humbling oneself Jesus repeated a number of times as for instance in Mt 23:12. Probably Jesus pointed to the child by his side. The ninth-century story that the child was Ignatius is worthless. It is not that the child
humbled himself, but that the child is humble from the nature of the case in relation to older persons. That is true, however "bumptious" the child himself may be. Bruce observes that to humble oneself is "the most difficult thing in the world for saint as for sinner."

Matt 18:5
In my name ( $\varepsilon \pi \tau \omega$ ovo $\mu \alpha \tau \mu v$ ). For "one such little child" ( $\alpha v \psi \beta \varepsilon \lambda ı \varepsilon \varsigma \varepsilon \rho$ ıv X $\rho \iota \sigma \tau$ ) Luke (Lu 9:48) has "this little child" as a representative or symbol. "On the basis or ground of my name," "for my sake." Very much like $\varepsilon ו \varsigma ~ o v o \mu \alpha$ in 10:41 which does not differ greatly from $\varepsilon v$ ovouat (Ac 10:48).

Matt 18:6
These little ones ( $\tau \omega \vee \mu \kappa \rho \omega \nu \tau 0 \nu \tau \omega \nu$ ). In the same sense as "one such little one" above. The child is the type of believers.

A great millstone ( $\mu \nu \lambda$ oc oviкoৎ), literally, "a millstone turned by an ass." The upper millstone was turned by an ass (ovoc). There were no examples of the adjective oviкos (turned by an ass) outside the N.T. until the papyri revealed several for loads requiring an ass to carry them, stones requiring an ass to move them, etc. Deissmann (Light from the Ancient East, p. 81) notes it also in papyri examples about the sale of an ass and tax for an ass's burden of goods.

The depth of the sea ( $\tau \omega \pi \varepsilon \lambda \alpha \gamma \varepsilon \tau \eta \varsigma \theta \alpha \lambda \alpha \sigma \sigma \eta \varsigma)$. "The sea of the sea." Пॄ $\lambda \alpha \gamma \circ \varsigma$ probably from $\pi \lambda \eta \sigma \sigma 0$, to beat, and so the beating, splashing waves of the sea. "Far out into the open sea, a vivid substitute for $\varepsilon \iota \varsigma \tau \eta \nu \theta \alpha \lambda \alpha \sigma \sigma \alpha \nu "$ (McNeile).

## Matt 18:7

Through whom ( $\delta \imath^{\prime}$ ov). Jesus recognizes the inevitableness of stumbling-blocks, traps, hindrances, the world being as it is, but he does not absolve the man who sets the trap (cf. Lu 17:1).

Matt 18:8
In verses 8 and 9 we have one of the dualities or doublets in Matthew ( 5:29-30). Jesus repeated his pungent sayings many times. Instead of $\varepsilon ા \varsigma \gamma \varepsilon \varepsilon v v a v$ ( $5: 29$ ) we have $\varepsilon$ וֹ to $\pi \cup \rho$ $\tau 0 \alpha \omega v$ ov and at the end of verse 9 tov $\pi \nu \rho o s$ is added to $\tau \eta \nu \gamma \varepsilon \varepsilon v v a v$. This is the first use in Matthew of aı $\omega v$ voc. We have it again in 19:16,29 with $\zeta$ oך, in 25:41 with $\pi v \rho$, in 25:46 with ко入aбıv and $\zeta \circ \eta v$. The word means ageless, without beginning or end as of God (Ro 16:26), without beginning as in Ro 16:25, without end as here and often. The effort to make it mean "acoviav" fire will make it mean "acoviav" life also. If the punishment is limited, $i p s o$ facto the life is shortened. In verse 9 also $\mu$ ovo $\varphi \theta \alpha \lambda \mu \sigma v$ occurs. It is an Ionic compound in Herodotus that is condemned by the Atticists, but it is revived in the vernacular Koine. Literally one-eyed. Here only and Mr 9:47 in the New Testament.

Matt 18:10
Despise ( $\kappa \alpha \tau \alpha \varphi \rho \circ \vee \eta \sigma \eta \tau \varepsilon)$. Literally, "think down on," with the assumption of superiority.

Their angels (o a $\gamma \gamma \varepsilon \lambda o \alpha v \tau \omega v$ ). The Jews believed that each nation had a guardian angel (Da 10:13,20f.; 12:1). The seven churches in Revelation (Re 1:20) have angels, each of them, whatsoever the meaning is. Does Jesus mean to teach here that each little child or child of faith had a special angel who appears in God's presence, "see the face of my Father" ( $\beta \lambda \varepsilon \pi \sigma v \sigma \iota \nu \tau$ т $\pi \rho \circ \sigma \omega \pi \sigma \nu$ тov $\pi \alpha \tau \rho \circ \varsigma \mu \circ v$ ) in special intimacy? Or does he simply mean that the angels do take an interest in the welfare of God's people (Heb $1: 14$ )? There is comfort to us in that thought. Certainly Jesus means that the Father takes special care of his "little ones" who believe in Him. There are angels in God's presence (Lu 1:19).

Matt 18:12
Leave the ninety and nine $(\alpha \varphi \eta \sigma \varepsilon \tau \alpha \varepsilon \nu \varepsilon \nu \eta \kappa о \nu \tau \alpha \varepsilon \nu \nu \varepsilon \alpha \varepsilon \pi \tau \alpha$ ор $\kappa \alpha \pi о \rho \varepsilon v \theta \varepsilon ı \varsigma \zeta \eta \tau \varepsilon$ тo $\pi \lambda \alpha \nu \omega \mu \varepsilon v o v ?$ ). This is the text of Westcott and Hort after BL, etc. This text means: "Will he not leave the ninety and nine upon the mountains and going does he not seek (change to present tense) the wandering one?" On the high pastures where the sheep graze at will one has wandered afield. See this parable later in Lu 15:4-7. Our word "planet" is from $\pi \lambda \alpha v \alpha o \mu \alpha$, wandering (moving) stars they were called as opposed to fixed stars. But now we know that no stars are fixed. They are all moving and rapidly.

Matt 18:14
The will of your Father $(\theta \varepsilon \lambda \eta \mu \alpha \varepsilon \mu \pi \rho o \sigma \theta \varepsilon v)$. Observe that Westcott and Hort read $\mu \mathrm{v}$ here rather than $\nu \mu \omega \nu$ after B Sahidic Coptic. Either makes good sense, though "your" carries on the picture of God's care for "each one of these little ones" ( $\varepsilon \nu \tau \omega \nu \mu \kappa \rho \omega \nu \tau o v \tau \omega \nu$ ) among God's children. The use of $\varepsilon \mu \pi \rho o \sigma \theta \varepsilon v$ with $\theta \varepsilon \lambda \eta \mu \alpha$ is a Hebraism like $\varepsilon \mu \pi \rho o \sigma \theta \varepsilon v$ oov in 11:25 with $\varepsilon \cup \delta$ окıa, "before the face" of God.

Matt 18:15
If thy brother sin against thee ( $\varepsilon \alpha \nu \alpha \mu \alpha \rho \tau \eta \sigma \eta \alpha \delta \varepsilon \lambda \varphi \circ \varsigma \sigma o v)$. Literally, commit a sin (ingressive aorist subjunctive of $\alpha \mu \alpha \rho \tau \alpha v \omega$ ). Aleph B Sahidic do not have "against thee" (દાऽ $\sigma \varepsilon)$.

Shew him his fault ( $\varepsilon \lambda \varepsilon \gamma \xi$ ov). Such private reproof is hard to do, but it is the way of Christ.

Thou hast gained ( $\varepsilon \kappa \varepsilon \rho \delta \eta \sigma \alpha \varsigma)$. Aorist active indicative of $\kappa \varepsilon \rho \delta \alpha \iota \nu \omega$ in conclusion of a third-class condition, a sort of timeless aorist, a blessed achievement already made.

Matt 18:16
Take with thee ( $\pi \alpha \rho \alpha \lambda \alpha \beta \varepsilon \mu \varepsilon \tau \alpha \sigma o v)$. Take alone ( $\pi \alpha \rho \alpha$ ) with ( $\mu \varepsilon \tau \alpha$ ) thee.
Matt 18:17
Refuse to hear ( $\pi \alpha \rho \alpha \kappa о \cup \sigma \eta)$. Like Isa 65:12. Many papyri examples for ignoring, disregarding, hearing without heeding, hearing aside ( $\pi \alpha \rho \alpha-$ ), hearing amiss, overhearing ( Mr 5:36 ).

The church ( $\tau \eta \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$ ). The local body, not the general as in Mt 16:18 which see for discussion. The problem here is whether Jesus has in mind an actual body of believers
already in existence or is speaking prophetically of the local churches that would be organized later (as in Acts). There are some who think that the Twelve Apostles constituted a local $\varepsilon к \kappa \lambda \eta \sigma \omega \alpha$, a sort of moving church of preachers. That could only be true in essence as they were a band of ministers and not located in any one place. Bruce holds that they were "the nucleus" of a local church at any rate.

Matt 18:18
Shall be bound in heaven ( $\varepsilon \sigma \tau \alpha \delta \varepsilon \delta \varepsilon \mu \varepsilon v \alpha \varepsilon v$ ovpav $\omega$ ). Future passive periphrastic perfect indicative as in "shall be loosed" ( $\varepsilon \sigma \tau \alpha \lambda \varepsilon \lambda \nu \mu \varepsilon v \alpha)$. In 16:19 this same unusual form occurs. The binding and the loosing is there addressed to Peter, but it is here repeated for the church or for the disciples as the case may be.

Matt 18:19
Shall agree ( $\sigma \nu \mu \varphi \omega v \eta \sigma \omega \sigma v \nu)$. Our word "symphony" is this very root. It is no longer looked at as a concord of voices, a chorus in harmony, though that would be very appropriate in a church meeting rather than the rasping discord sometimes heard even between two brethren or sisters.

Of my Father ( $\pi \alpha \rho \alpha$ тоv $\pi \alpha \tau \rho о \varsigma \mu о v$ ). From the side of, "by my Father."
Matt 18:20
There am I ( $\varepsilon \kappa \varepsilon \varepsilon \mu)$. This blessed promise implies that those gathered together are really disciples with the spirit of Christ as well as "in his name" ( $\varepsilon \iota \varsigma ~ \tau о ~ \varepsilon \mu о v ~ о v o \mu \alpha) . ~ O n e ~ o f ~$ the Oxyrhynchus Sayings of Our Lord is: "Wherever there are (two) they are not without God, and wherever there is one alone I say I am with him." Also this: "Raise the stone and there thou shalt find me, cleave the wood and there am I." See Mal 3:16 .

Matt 18:21
Until seven times? ( $\varepsilon \omega \varsigma \varepsilon \pi \tau \alpha \kappa ı \sigma$ ?) Peter thought that he was generous as the Jewish rule was three times (Am 1:6). His question goes back to verse 15. "Against me" is genuine here. "The man who asks such a question does not really know what forgiveness means" (Plummer).

Matt 18:22
Until seventy times seven ( $\varepsilon \omega \varsigma \varepsilon \beta \delta$ оипкоขтакı $\varepsilon \pi \tau \alpha)$ ) It is not clear whether this idiom means seventy-seven or as the Revised Version has it ( 490 times). If $\varepsilon \pi \tau \alpha \kappa \iota \varsigma$ were written it would clearly be 490 times. The same ambiguity is seen in Ge $4: 24$, the LXX text by omitting ка. In the Test. of the Twelve Patriarchs, Benj. vii. 4, it is used in the sense of seventy times seven. But it really makes little difference because Jesus clearly means unlimited forgiveness in either case. "The unlimited revenge of primitive man has given place to the unlimited forgiveness of Christians" (McNeile).

Matt 18:23
Make a reckoning ( $\sigma v v a \rho \alpha$ $\lambda o \gamma o v$ ). Seen also in 25:19. Perhaps a Latinism, rationes conferre. First aorist active infinitive of $\sigma v v a \iota \rho \omega$, to cast up accounts, to settle, to compare
accounts with. Not in ancient Greek writers, but in two papyri of the second century A.D. in the very sense here and the substantive appears in an ostracon from Nubia of the early third century (Deissmann, Light from the Ancient East, p. 117).

Matt 18:24
Ten thousand talents ( $\mu \nu \rho I \omega v \tau \alpha \lambda \alpha \nu \tau \omega v$ ). A talent was 6,000 denarii or about a thousand dollars or 240 pounds. Ten thousand times this is about ten or twelve million dollars, an enormous sum for that period. We live today in the age of national debts of billions of dollars or even of pounds sterling. The imperial taxes of Judea, Idumea, and Samaria for one year were only 600 talents while Galilee and Perea paid 200 (Josephus, Ant. xi. 4). But oriental kings were free in the use of money and in making debts like the native kings of India today.

## Matt 18:25

Had not wherewith to pay ( $\mu \eta$ घ $\chi$ оvтoৎ autov $\alpha \pi o \delta o u v \alpha$ ). There is no "wherewith" in the Greek. This idiom is seen in Lu 7:42; 14:14; Heb 6:13. Genitive absolute though autov in the same clause as often in the N.T.

To be sold ( $\pi \rho \alpha \theta \eta v \alpha$ ). First aorist passive infinitive of $\pi \iota \pi \rho \alpha \sigma \kappa \omega$. This was according to the law (Ex 22:3; Le 25:39,47 ). Wife and children were treated as property in those primitive times.

Matt 18:27
The debt ( $\tau \mathrm{o} \delta \alpha v \mathrm{v} \boldsymbol{v}$ ). The loan. Common in the papyri for a loan. The interest had increased the debt enormously. "This heavy oriental usury is of the scenery of the parable" (McNeile).

Matt 18:28
A hundred pence ( $\varepsilon \kappa \alpha \tau о v \delta \eta v \alpha \rho ı \alpha)$. A denarius was worth about eight and a half pence. The hundred denarii here were equal to some "fifty shillings" (Bruce), "about 4 pounds" (McNeile), "twenty pounds" (Moffatt), "twenty dollars" (Goodspeed), "100 shillings" (Weymouth). These are various efforts to represent in modern language the small amount of this debt compared with the big one.

Took him by the throat ( $\varepsilon \pi v / \gamma \varepsilon v)$. "Held him by the throat" (Allen). It is imperfect, probably inchoative, "began to choke or throttle him." The Roman law allowed this indignity. Vincent quotes Livy (iv. 53) who tells how the necks were twisted (collum torsisset) and how Cicero (Pro Cluentio, xxi.) says: "Lead him to the judgment seat with twisted neck (collo obtorto)."

What thou owest ( $\varepsilon \tau$ o¢عı $\lambda \varepsilon \iota \varsigma)$. Literally, "if thou owest anything," however little. He did not even know how much it was, only that he owed him something. "The 'if' is simply the expression of a pitiless logic" (Meyer).

Matt 18:30
And he would not (o $\delta \varepsilon$ ovk $\eta \theta \varepsilon \lambda \varepsilon \nu$ ). Imperfect tense of persistent refusal.

Till he should pay $(\varepsilon \omega \varsigma \alpha \pi \sigma \delta \omega)$. This futuristic aorist subjunctive is the rule with $\varepsilon \omega \varsigma$ for a future goal. He was to stay in prison till he should pay. "He acts on the instinct of a base nature, and also doubtless in accordance with long habits of harsh tyrannical behaviour towards men in his power" (Bruce). On imprisonment for debt among the Greeks and Romans see Deissmann, Light from the Ancient East, pp. 270,330.

Matt 18:31
Told ( $\delta \varepsilon \sigma \alpha \varphi \eta \sigma \alpha v$ ). Made wholly clear to their own lord. That is the usual result in the long run. There is a limit to what people will put up with.

Matt 18:33
Shouldst thou not? (ovk $\varepsilon \delta \varepsilon \sigma \varepsilon$ ?) "Was it not necessary?" The king fits the cap on this wicked slave that he put on the poor debtor.

Matt 18:34
The tormentors ( $\tau \circ \iota \varsigma \beta \alpha \sigma \alpha v ı \sigma \tau \alpha \iota \varsigma) . ~ N o t ~ t o ~ p r i s o n ~ s i m p l y, ~ b u t ~ t o ~ t e r r i b l e ~ p u n i s h m e n t . ~$ The papyri give various instances of the verb $\beta \alpha \sigma \alpha v \iota \zeta \omega$, to torture, used of slaves and others. "Livy (ii. 23) pictures an old centurion complaining that he was taken by his creditor, not into servitude, but to a workhouse and torture, and showing his back scarred with fresh wounds" (Vincent).

Till he should pay all ( $\varepsilon \omega \varsigma[o v] \alpha \pi o \delta \omega \pi \alpha v$ ). Just as in verse 30 , his very words. But this is not purgatorial, but punitive, for he could never pay back that vast debt.

Matt 18:35
From your hearts ( $\alpha \pi \sigma \tau \omega \nu \kappa \alpha \rho \delta t \omega \nu \nu \mu \omega \nu$ ). No sham or lip pardon, and as often as needed. This is Christ's full reply to Peter's question in 18:21. This parable of the unmerciful servant is surely needed today.

## Matthew 19

Matt 19:1
He departed ( $\mu \varepsilon \tau \eta \rho \varepsilon v$ ). Literally, to lift up, change something to another place. Transitive in the LXX and in a Cilician rock inscription. Intransitive in 13:53 and here, the only N.T. instances. Absence of o七 or ка after ка $\varepsilon \gamma \varepsilon \nu \varepsilon \tau о$, one of the clear Hebraisms in the N.T. (Robertson, Grammar, pp. 1042f.). This verse is a sort of formula in Matthew at the close of important groups of $\lambda \mathrm{o} \boldsymbol{\mathrm { t }}$ a as in 7:28; 11:1; 13:53.

The borders of Judea beyond Jordan ( $\varepsilon \iota \varsigma \tau \alpha$ орıа $\tau \eta \varsigma$ Iov $\alpha a \alpha \varsigma \pi \varepsilon \rho a v \tau о v$ Io $\rho \delta \alpha v o v$ ). This is a curious expression. It apparently means that Jesus left Galilee to go to Judea by way of Perea as the Galileans often did to avoid Samaria. Luke (Lu 17:11) expressly says that he passed through Samaria and Galilee when he left Ephraim in Northern Judea (Joh 11:54 ). He was not afraid to pass through the edge of Galilee and down the Jordan Valley in Perea on this last journey to Jerusalem. McNeile is needlessly opposed to the trans-Jordanic or Perean aspect of this phase of Christ's work.

Matt 19:3
Pharisees tempting him (Фарıбаıо $\pi \varepsilon \iota \rho \zeta о \nu \tau \varepsilon \varsigma \alpha \nu \tau о v)$. They "could not ask a question of Jesus without sinister motives" (Bruce). See 4:1 for the word ( $\pi \varepsilon \iota \rho a \zeta \omega)$.

For every cause ( $\kappa \alpha \tau \alpha \pi \alpha \sigma \alpha v \alpha \iota \tau \iota \alpha v$ ). This clause is an allusion to the dispute between the two theological schools over the meaning of De 24:1. The school of Shammai took the strict and unpopular view of divorce for unchastity alone while the school of Hillel took the liberal and popular view of easy divorce for any passing whim if the husband saw a prettier woman (modern enough surely) or burnt his biscuits for breakfast. It was a pretty dilemma and meant to do Jesus harm with the people. There is no real trouble about the use of ката here in the sense of $\pi \rho \circ \pi \tau \varepsilon \rho$ or because of (Robertson, Grammar, p. 509).

Matt 19:5
Shall cleave ( $\kappa о \lambda \lambda \eta \forall \eta \sigma \varepsilon \tau \alpha)$. First future passive, "shall be glued to," the verb means.
The twain shall become one flesh ( $\varepsilon \sigma о v \tau \alpha$ о $\delta v o \varepsilon ı \varsigma \sigma \alpha \rho \kappa \alpha \mu \iota \nu$ ). This use of $\varepsilon ı \varsigma$ after $\varepsilon \mu$ is an imitation of the Hebrew, though a few examples occur in the older Greek and in the papyri. The frequency of it is due to the Hebrew and here the LXX is a direct translation of the Hebrew idiom.

Matt 19:6
What therefore God hath joined together (o ouv o $\theta \varepsilon o \varsigma ~ \sigma u v \varepsilon \zeta \varepsilon v \xi \varepsilon v)$. Note "what," not "whom." The marriage relation God has made. "The creation of sex, and the high doctrine as to the cohesion it produces between man and woman, laid down in Gen., interdict separation" (Bruce). The word for "joined together" means "yoked together," a common verb for marriage in ancient Greek. It is the timeless aorist indicative ( $\sigma v \nu \varepsilon \zeta \varepsilon v \xi \varepsilon v)$, true always.

Bill ( $\beta \iota \beta \lambda_{\iota} \circ v$ ). A little $\beta \iota \beta \lambda_{o}$ (see on $1: 1$ ), a scroll or document (papyrus or parchment). This was some protection to the divorced wife and a restriction on laxity.

Matt 19:8
For your hardness of heart ( $\pi \rho \rho \varsigma \tau \eta v \sigma \kappa \lambda \eta \rho o \kappa \alpha \rho \delta \iota \alpha v \nu \mu \omega v$ ). The word is apparently one of the few Biblical words (LXX and the N.T.). It is a heart dried up ( $\sigma \kappa \lambda \eta \rho \circ \varsigma$ ), hard and tough.

But from the beginning it hath not been so ( $\alpha \pi^{\prime} \alpha \rho \chi \eta \varsigma \delta \varepsilon$ ouk $\gamma \varepsilon \gamma \circ v \varepsilon v$ ovt $\alpha \varsigma$ ). The present perfect active of $\gamma \iota v o \mu \alpha$ to emphasize the permanence of the divine ideal. "The original ordinance has never been abrogated nor superseded, but continues in force" (Vincent). "How small the Pharisaic disputants must have felt in presence of such holy teaching, which soars above the partisan view of controversialists into the serene region of ideal, universal, eternal truth" (Bruce).

Matt 19:9
 Westcott and Hort which also adds "maketh her an adulteress" ( $\pi \circ \varepsilon \varepsilon \alpha \nu \tau \eta \nu \mu \circ \chi \varepsilon \cup \theta \eta \nu \alpha$ ) and also these words: "and he that marrieth her when she is put away committeth adultery" ( $\kappa \alpha$ o $\alpha \pi \sigma \lambda \varepsilon \lambda \nu \mu \varepsilon v \eta \nu \gamma \alpha \mu \eta \sigma \alpha \varsigma \mu о \chi \alpha \tau \alpha$ ). There seems to be a certain amount of assimilation in various manuscripts between this verse and the words in 5:32. But, whatever reading is accepted here, even the short one in Westcott and Hort ( $\mu \eta \varepsilon \pi \pi \circ \rho v \varepsilon ⿺ \alpha$, not for fornication), it is plain that Matthew represents Jesus in both places as allowing divorce for fornication
 Here, as in 5:31f. , a group of scholars deny the genuineness of the exception given by Matthew alone. McNeile holds that "the addition of the saving clause is, in fact, opposed to the spirit of the whole context, and must have been made at a time when the practice of divorce for adultery had already grown up." That in my opinion is gratuitous criticism which is unwilling to accept Matthew's report because it disagrees with one's views on the subject of divorce. He adds: "It cannot be supposed that Matthew wished to represent Jesus as siding with the school of Shammai." Why not, if Shammai on this point agreed with Jesus? Those who deny Matthew's report are those who are opposed to remarriage at all. Jesus by implication, as in 5:31, does allow remarriage of the innocent party, but not of the guilty one. Certainly Jesus has lifted the whole subject of marriage and divorce to a new level, far beyond the petty contentions of the schools of Hillel and Shammai.

Matt 19:10
The disciples say unto him ( $\lambda \varepsilon \gamma o v \sigma \iota v \alpha v \tau \omega$ o $\mu \alpha \theta \eta \tau \alpha$ ). "Christ's doctrine on marriage not only separated Him toто $\chi \alpha \varepsilon \lambda$ o from Pharisaic opinions of all shades, but was too high even for the Twelve" (Bruce).

The case ( $\eta \alpha \iota \tau \iota \alpha)$. The word may refer to the use in verse 3 "for every cause." It may have a vague idea here $=\rho \varepsilon \varsigma$, condition. But the point clearly is that "it is not expedient to
marry" (ov $\sigma \nu \mu \varphi \varepsilon \rho \varepsilon \gamma \alpha \mu \eta \sigma \alpha$ ) if such a strict view is held. If the bond is so tight a man had best not commit matrimony. It is a bit unusual to have $\alpha v \theta \rho \omega \pi$ oc and $\gamma v v \eta$ contrasted rather than $\alpha v \eta \rho$ and $\gamma u v \eta$.

Matt 19:11
But they to whom it is given ( $\alpha \lambda \lambda^{\prime}$ oıs $\delta \varepsilon \delta o \tau \alpha$ ). A neat Greek idiom, dative case of relation and perfect passive indicative. The same idea is repeated at the close of verse 12. It is a voluntary renunciation of marriage for the sake of the kingdom of heaven. "Jesus recognizes the severity of the demand as going beyond the capacity of all but a select number." It was a direct appeal to the spiritual intelligence of the disciples not to misconceive his meaning as certainly the monastic orders have done.

Matt 19:13
Rebuked them ( $\varepsilon \pi \varepsilon \tau \tau \mu\rceil \sigma \varepsilon$ avtoıc). No doubt people did often crowd around Jesus for a touch of his hand and his blessing. The disciples probably felt that they were doing Jesus a kindness. How little they understood children and Jesus. It is a tragedy to make children feel that they are in the way at home and at church. These men were the twelve apostles and yet had no vision of Christ's love for little children. The new child world of today is due directly to Jesus.

Matt 19:14
Suffer ( $\alpha \varphi \varepsilon \tau \varepsilon$ ). "Leave them alone." Second aorist active imperative.
Forbid them not ( $\mu \eta \kappa \omega \lambda \nu \varepsilon \tau \varepsilon$ ). "Stop hindering them." The idiom of $\mu \eta$ with the present imperative means just that.

Of such ( $\tau \omega v$ totov $\tau \omega v$ ). The childlike as in 18:3f.
Matt 19:16
What good thing ( $\tau$ a $\gamma \alpha \theta$ ov). Mark (Mr 10:17) has the adjective "good" with "Teacher."
May have ( $\sigma \chi \omega$ ). Ingressive aorist subjunctive, "may get," "may acquire."
Matt 19:17
Concerning that which is good ( $\pi \varepsilon \rho$ тov $\alpha \gamma \alpha \theta o v$ ). He had asked Jesus in verse 16 "what good thing" he should do. He evidently had a light idea of the meaning of $\alpha \gamma \alpha \theta$ oc. "This was only a teacher's way of leading on a pupil" (Bruce). So Jesus explains that "One there is who is good," one alone who is really good in the absolute sense.

Matt 19:20
What lack I yet? ( $\tau \varepsilon \tau v \sigma \tau \varepsilon \rho \omega$ ?) Here is a psychological paradox. He claims to have kept all these commandments and yet he was not satisfied. He had an uneasy conscience and Jesus called him to something that he did not have. He thought of goodness as quantitative (a series of acts) and not qualitative (of the nature of God). Did his question reveal proud complacency or pathetic despair? A bit of both most likely.

Matt 19:21

If thou wouldest be perfect ( $\varepsilon \theta \varepsilon \lambda \varepsilon ı \varsigma \tau \varepsilon \lambda \varepsilon เ \rho \varsigma \varepsilon เ v \alpha$ ). Condition of the first class, determined as fulfilled. Jesus assumes that the young man really desires to be perfect (a big adjective that, perfect as God is the goal, 5:48).

That thou hast ( $\sigma o v \tau \alpha \cup \pi \alpha \rho \chi 0 v \tau \alpha$ ). "Thy belongings." The Greek neuter plural participle used like our English word "belongings." It was a huge demand, for he was rich.

Matt 19:22
Went away sorrowful ( $\alpha \pi \eta \lambda \theta \varepsilon v \lambda \lambda \tau \pi o \cup \mu \varepsilon v o \varsigma)$. "Went away grieved." He felt that Jesus had asked too much of him. He worshipped money more than God when put to the test. Does Jesus demand this same test of every one? Not unless he is in the grip of money. Different persons are in the power of different sins. One sin is enough to keep one away from Christ.

Matt 19:23
It is hard ( $\delta v \sigma \kappa о \lambda \omega \varsigma)$. With difficulty. Adverb from $\delta v \sigma \kappa о \lambda o \varsigma$, hard to find food, fastidious, faultfinding, then difficult.

Matt 19:24
It is easier for a camel to go through a needle's eye ( $\varepsilon ย \kappa о \pi \omega \tau \varepsilon \rho \circ v \varepsilon \sigma \tau \iota v ~ к \alpha \mu \eta \lambda о v \delta \iota \alpha$ $\tau \rho \eta \mu \alpha \tau о \varsigma \rho \alpha \varphi \iota \delta о \varsigma \varepsilon \iota \sigma \varepsilon \lambda \theta \varepsilon \iota v)$. Jesus, of course, means by this comparison, whether an eastern proverb or not, to express the impossible. The efforts to explain it away are jejune like a ship's cable, кадı入ov or papı̧ as a narrow gorge or gate of entrance for camels which recognized stooping, etc. All these are hopeless, for Jesus pointedly calls the thing "impossible" (verse 26). The Jews in the Babylonian Talmud did have a proverb that a man even in his dreams did not see an elephant pass through the eye of a needle (Vincent). The Koran speaks of the wicked finding the gates of heaven shut "till a camel shall pass through the eye of a needle." But the Koran may have got this figure from the New Testament. The word for an ordinary needle is $\rho \alpha \varphi ı$, but, Luke (Lu 18:25) employs $\beta \varepsilon \lambda$ ov $\eta$, the medical term for the surgical needle not elsewhere in the N.T.

Matt 19:25
Were astonished ( $\varepsilon \xi \varepsilon \pi \lambda \eta \sigma \sigma o v \tau 0)$. Imperfect descriptive of their blank amazement. They were literally "struck out."

Matt 19:26
Looking on them ( $\varepsilon \mu \beta \lambda \varepsilon \psi \alpha \varsigma)$. Jesus saw their amazement.
Matt 19:27
What then shall we have? ( $\tau \alpha \rho \alpha \varepsilon \sigma \tau \alpha \eta \mu v$ ?) A pathetic question of hopeless lack of comprehension.

Matt 19:28
In the regeneration ( $\varepsilon v \tau \eta \pi \alpha \lambda เ v \gamma \varepsilon v \varepsilon \sigma \iota \alpha$ ). The new birth of the world is to be fulfilled when Jesus sits on his throne of glory. This word was used by the Stoics and the Pythagoreans. It is common also in the mystery religions (Angus, Mystery Religions and Christianity, pp.

95ff.). It is in the papyri also. We must put no fantastic ideas into the mouth of Jesus. But he did look for the final consummation of his kingdom. What is meant by the disciples also sitting on twelve thrones is not clear.

Matt 19:29
 manifold. Eternal life is the real reward.

Matt 19:30
The last first and the first last (о єб $\chi \alpha \tau о ~ \pi \rho \omega \tau о ~ к \alpha ~ о ~ \pi \rho \omega \tau о ~ \varepsilon \sigma \chi \alpha \tau о$ ). This paradoxical enigma is probably in the nature of a rebuke to Peter and refers to ranks in the kingdom. There are many other possible applications. The following parable illustrates it.

## Matthew 20

Matt 20:1
For $(\gamma \alpha \rho)$. The parable of the house illustrates the aphorism in 19:30.
A man that is a householder $(\alpha \nu \theta \rho \omega \pi \omega$ otко $\delta \varepsilon \sigma \pi о \tau \eta)$. Just like $\alpha \nu \theta \rho \omega \pi \omega \beta \alpha \sigma \iota \lambda \varepsilon$ ( 18:23). Not necessary to translate $\alpha v \theta \rho \omega \pi \omega$, just "a householder."

Early in the morning $(\alpha \mu \alpha \pi \rho \omega)$. A classic idiom. Ha $\alpha \alpha$ as an "improper" preposition is common in the papyri. $\Pi \rho \omega$ is just an adverb in the locative. At the same time with early dawn, break of day, country fashion for starting to work.

To hire ( $\mu \tau \sigma \omega \sigma \alpha \sigma \theta \alpha)$. The middle voice aorist tense, to hire for oneself.
Matt 20:2
For a penny a day ( $\varepsilon \kappa \delta \eta v a \rho ı v \tau \eta \nu \eta \mu \varepsilon \rho \alpha \nu$ ). See on 18:28. "Penny" is not adequate, "shilling" Moffatt has it. The $\varepsilon \kappa$ with the ablative represents the agreement ( $\sigma v \vee \varphi \omega \vee \eta \sigma \alpha \varsigma$ ) with the workmen $(\varepsilon \rho \gamma \alpha \tau \omega v)$. "The day" the Greek has it, an accusative of extent of time.

## Matt 20:3

Standing in the marketplace idle ( $\varepsilon \sigma \tau \omega \tau \alpha \varsigma \alpha \gamma о \rho \alpha \alpha \rho \gamma o v \varsigma)$. The market place was the place where men and masters met for bargaining. At Hamadan in Persia, Morier in Second Journey through Persia, as cited by Trench in his Parables, says: "We observed every morning, before the sun rose, that a numerous band of peasants were collected, with spades in their hands, waiting to be hired for the day to work in the surrounding fields."

Matt 20:4
 just proportionate wage. Indefinite relative with subjunctive $\varepsilon \alpha v=\alpha v$.

Matt 20:6
All the day idle ( $o \lambda \eta \nu \tau \eta \nu \eta \mu \varepsilon \rho \alpha \nu \alpha \rho \gamma o$ ). Extent of time (accusative) again. A $\rho \gamma o$ is $a$ privative and $\varepsilon \rho \gamma \circ \nu$, work, no work. The problem of the unemployed.

Matt 20:10
Every man a penny ( $\alpha \nu \alpha \delta \eta v a \rho ı \nu \kappa \alpha \alpha v \tau o$ ). Literally, "themselves also a denarius apiece" (distributive use of $\alpha v \alpha$ ). Bruce asks if this householder was a humorist when he began to pay off the last first and paid each one a denarius according to agreement. False hopes had been raised in those who came first who got only what they had agreed to receive.

Matt 20:11
They murmured ( $\varepsilon \gamma \sigma \gamma \gamma \cup \zeta o v$ ). Onomatopoetic word, the meaning suiting the sound. Our words murmur and grumble are similar. Probably here inchoative imperfect, began to grumble. It occurs in old Ionic and in the papyri.

Matt 20:12
Equal unto us (ıбovs avtovৎ $\eta \mu \nu \nu$ ). Associative instrumental case $\eta \mu \nu \nu$ after ıбovৎ. It was a regular protest against the supposed injustice of the householder.

The burden of the day and the scorching wind ( $\tau о \beta \alpha \rho о \varsigma \tau \eta \varsigma \eta \mu \varepsilon \rho \alpha \varsigma ~ к \alpha ~ \tau о \nu ~ к \alpha \nu \sigma \omega v \alpha$ ). These last "did" work for one hour. Apparently they worked as hard as any while at it. A whole day's work on the part of these sweat-stained men who had stood also the sirocco, the hot, dry, dust-laden east wind that blasted the grain in Pharaoh's dream (Ge 41:6), that withered Jonah's gourd (Jon 4:8), that blighted the vine in Ezekiel's parable (Eze 17:10). They seemed to have a good case.

Matt 20:13
To one of them ( $\varepsilon v \alpha u \tau \omega v$ ). Evidently the spokesman of the group. "Friend" ( $\varepsilon \tau \alpha \iota \rho \varepsilon)$. Comrade. So a kindly reply to this man in place of an address to the whole gang. Ge 31:40; Job 27:21; Ho 13:15. The word survives in modern Greek.

Matt 20:14
Take up ( $\alpha \rho o v$ ). First aorist active imperative of alpw. Pick up, as if he had saucily refused to take it from the table or had contemptuously thrown the denarius on the ground. If the first had been paid first and sent away, there would probably have been no murmuring, but "the murmuring is needed to bring out the lesson" (Plummer). The $\delta \eta v a \rho i v c$ was the common wage of a day labourer at that time.

What I will (o $\theta \varepsilon \lambda \omega)$. This is the point of the parable, the will of the householder.
With mine own ( $\varepsilon v$ toı $\varepsilon \mu \circ \iota \varsigma$ ). In the sphere of my own affairs. There is in the Koine an extension of the instrumental use of $\varepsilon v$.

Matt 20:15
Is thine eye evil? (o o $\varphi \theta \alpha \lambda \mu \circ \varsigma$ бov $\pi 0 v \eta \rho \circ \varsigma \varepsilon \sigma \tau \iota v ?$ ) See on 6:22-24 about the evil eye and the good eye. The complainer had a grudging eye while the householder has a liberal or generous eye. See Ro 5:7 for a distinction between $\delta ı \kappa \alpha \iota \rho$ and $\alpha \gamma \alpha \theta$ os.

Matt 20:16
The last first and the first last (o ع $\sigma \chi \alpha \tau о \pi \rho \omega \tau о ~ к \alpha$ о $\pi \rho \omega \tau о \varepsilon \sigma \chi \alpha \tau о$ ). The adjectives change places as compared with 19:30. The point is the same, though this order suits the parable better. After all one's work does not rest wholly on the amount of time spent on it. "Even so hath Rabbi Bun bar Chija in twenty-eight years wrought more than many studious scholars in a hundred years" (Jer. Berak. ii. 5c).

Matt 20:17
Apart ( $\kappa \alpha \tau^{\prime}{ }^{\prime} \delta \delta \alpha v$ ). This is the prediction in Matthew of the cross (16:21; 17:22; 20:17 ). "Aside by themselves" (Moffatt). The verb is $\pi \alpha \rho \varepsilon \lambda \alpha \beta \varepsilon v$. Jesus is having his inward struggle (Mr 10:32) and makes one more effort to get the Twelve to understand him.

Matt 20:19
And to crucify ( $\kappa \alpha \sigma \tau \alpha \cup \rho \omega \sigma \alpha$ ). The very word now. The details fall on deaf ears, even the point of the resurrection on the third day.

Matt 20:20

Then ( $\tau 0 \tau \varepsilon$ ). Surely an inopportune time for such a request just after the pointed prediction of Christ's crucifixion. Perhaps their minds had been preoccupied with the words of Jesus ( 19:28) about their sitting on twelve thrones taking them in a literal sense. The mother of James and John, probably Salome, possibly a sister of the Master's mother (Joh 19:25), apparently prompted her two sons because of the family relationship and now speaks for them.

Asking a certain thing (aıtov $\sigma \alpha$ ). "Asking something," "plotting perhaps when their Master was predicting" (Bruce). The "something" put forward as a small matter was simply the choice of the two chief thrones promised by Jesus (19:28).

Matt 20:22
 indirect middle voice, "ask for yourselves," "a selfish request."

We are able ( $\delta v v \alpha \mu \varepsilon \theta \alpha)$. Amazing proof of their ignorance and self-confidence. Ambition had blinded their eyes. They had not caught the martyr spirit.

Matt 20:23
Ye shall drink ( $\pi เ \varepsilon \sigma \theta \varepsilon$ ). Future middle from $\pi \iota v \omega$. Christ's cup was martyrdom. James was the first of the Twelve to meet the martyr's death (Ac 12:2) and John the last if reports are true about him. How little they knew what they were saying.

Matt 20:24
Moved with indignation ( $\eta \gamma \alpha v \alpha \kappa \tau \eta \sigma \alpha v$ ). A strong word for angry resentment. In the papyri. The ten felt that James and John had taken advantage of their relation to Jesus.

Matt 20:25
 him.

Matt 20:26
Would become great ( $o \varsigma \alpha v \theta \varepsilon \lambda \eta \mu \varepsilon \gamma \alpha \varsigma \gamma \varepsilon v \varepsilon \sigma \theta a$ ). Jesus does not condemn the desire to become great. It is a laudable ambition. There are "great ones" ( $\mu \varepsilon \gamma \alpha \lambda 0)$ among Christians as among pagans, but they do not "lord it over" one another (катакvрıєvovбเv), a LXX word and very expressive, or "play the tyrant" ( $\kappa \alpha \tau \varepsilon \xi \circ 0 \sigma 1 \alpha \zeta о 0 \sigma เ v)$, another suggestive word.

Your minister ( $\nu \mu \omega v \delta_{\iota \alpha \kappa o v o c) . ~ T h i s ~ w o r d ~ m a y ~ c o m e ~ f r o m ~}^{\delta ı \alpha}$ and кovic (dust), to raise a dust by one's hurry, and so to minister. It is a general word for servant and is used in a variety of ways including the technical sense of our "deacon" in Php. 1:1. But it more frequently is applied to ministers of the Gospel (1Co 3:5). The way to be "first" ( $\pi \rho \omega \tau \circ \varsigma)$, says Jesus, is to be your "servant" ( $\delta o u \lambda o \varsigma)$, "bond-servant" (verse 27). This is a complete reversal of popular opinion then and now.

Matt 20:28
A ransom for many ( $\lambda \nu \tau \rho o v a v \tau \pi \rho \lambda \lambda \omega v$ ). The Son of man is the outstanding illustration of this principle of self-abnegation in direct contrast to the self-seeking of James and

John. The word translated "ransom" is the one commonly employed in the papyri as the price paid for a slave who is then set free by the one who bought him, the purchase money for manumitting slaves. See examples in Moulton and Milligan's Vocabulary and Deissmann's Light from the Ancient East, pp. 328f. There is the notion of exchange also in the use of avt. Jesus gave his own life as the price of freedom for the slaves of sin. There are those who refuse to admit that Jesus held this notion of a substitutionary death because the word in the N.T. occurs only here and the corresponding passage in Mr 10:45. But that is an easy way to get rid of passages that contradict one's theological opinions. Jesus here rises to the full consciousness of the significance of his death for men.

Matt 20:29
From Jericho ( $\alpha \pi \mathrm{I}$ I $\varepsilon \rho \varepsilon ı \chi \omega$ ). So Mr 10:46. But Luke (Lu 18:35) places the incident as they were drawing near to Jericho ( $\varepsilon \iota \varsigma$ I $\varepsilon \rho \varepsilon \not \chi \omega$ ). It is probable that Mark and Matthew refer to the old Jericho, the ruins of which have been discovered, while Luke alludes to the new Roman Jericho. The two blind men were apparently between the two towns. Mark (Mr 10:46 ) and Luke (Lu 18:35 ) mention only one blind man, Bartimaeus (Mark). In Kentucky there are two towns about a half mile apart both called Pleasureville (one Old Pleasureville, the other New Pleasureville).

Matt 20:30
That Jesus was passing by (ot I $\eta \sigma o u ¢ \pi \alpha \rho \alpha \gamma \varepsilon$ ). These men "were sitting by the wayside" ( $\kappa \alpha \theta \eta \mu \varepsilon v o ~ \pi \alpha \rho \alpha ~ \tau \varepsilon \nu ~ o \delta o v) ~ a t ~ t h e i r ~ r e g u l a r ~ s t a n d . ~ T h e y ~ h e a r d ~ t h e ~ c r o w d ~ y e l l i n g ~ t h a t ~ J e s u s ~$ of Nazareth was passing by ( $\pi \alpha \rho \alpha \gamma \varepsilon$, present indicative of direct discourse retained in the indirect). It was their one opportunity, now or never. They had heard of what he had done for other blind men. They hail him as "the son of David" (the Messiah). It is just one of many such incidents when Jesus stood still and opened their eyes, so many that even the multitude was impatient with the cries of these poor men that their eyes be opened ( $\alpha v o r \gamma \omega \sigma \iota v$, second aorist passive subjunctive).

Matt 20:34
Touched their eyes ( $\eta \psi \alpha \tau 0 \tau \omega v$ o $\mu \mu \alpha \tau \omega v$ ). A synonym for $o \varphi \theta \alpha \lambda \mu \omega v$ in $\operatorname{Mr}$ 8:23 and here alone in the N.T. In the LXX and a common poetic word (Euripides) and occurs in the
 The verb $\alpha \pi \tau о \mu \alpha$ is very common in the Synoptic Gospels. The touch of Christ's hand would sooth the eyes as they were healed.

## Matthew 21

Matt 21:1
Unto Bethphage ( $\varepsilon \iota \varsigma \operatorname{B\varepsilon } \theta \varphi \propto \gamma \eta$ ). An indeclinable Aramaic name here only in O.T. or N.T. (Mr 11:1; Lu 19:29 ). It means "house of unripe young figs." It apparently lay on the eastern slope of Olivet or at the foot of the mountain, a little further from Jerusalem than Bethany. Both Mark and Luke speak of Christ's coming "unto Bethphage and Bethany" as if Bethphage was reached first. It is apparently larger than Bethany.

Unto the Mount of Olives ( $\varepsilon \iota \varsigma ~ \tau о ~ о \rho о \varsigma ~ \tau \omega v E \lambda \alpha ı \omega v$ ). Matthew has thus three instances of $\varepsilon \iota \varsigma$ with Jerusalem, Mount of Olives. Mark and Luke use $\pi \rho \circ \varsigma$ with Mount of Olives, the Mount of Olive trees ( $\varepsilon \lambda \alpha \iota \omega v$ from $\varepsilon \lambda \alpha\lrcorner \alpha$, olive tree), the mountain covered with olive trees.

Matt 21:2
Into the village that is over against you ( $\varepsilon \varsigma \tau \tau \eta \kappa \omega \mu \eta \nu \tau \eta \nu \kappa \alpha \tau \varepsilon \nu \alpha \nu \tau \nu \mu \omega \nu$ ). Another use of $\varepsilon ા c$. If it means "into" as translated, it could be Bethany right across the valley and this is probably the idea.

And a colt with her ( $\left.\kappa \alpha \pi \omega \lambda o v \mu \varepsilon \tau^{\prime} \alpha v \tau \eta \zeta\right)$. The young of any animal. Here to come with the mother and the more readily so.

Matt 21:3
The Lord (о кирья). It is not clear how the word would be understood here by those who heard the message though it is plain that Jesus applies it to himself. The word is from $\kappa \cup \rho о \varsigma$, power or authority. In the LXX it is common in a variety of uses which appear in the N.T. as master of the slave (Mt 10:24), of the harvest (9:38), of the vineyard (20:8), of the emperor (Ac 13:27), of God (Mt 11:20; 11:25) , and often of Jesus as the Messiah (Ac 10:36 ). Note Mt 8:25. This is the only time in Matthew where the words о кvрıऽ, are applied to Jesus except the doubtful passage in 28:6. A similar usage is shown by Moulton and Milligan's Vocabulary and Deissmann's Light from the Ancient East. Particularly in Egypt it was applied to "the Lord Serapis" and Ptolemy and Cleopatra are called "the lords, the most great gods" (о кирıо $\theta \varepsilon о \mu \varepsilon \gamma \iota \sigma \tau о$ ). Even Herod the Great and Herod Agrippa I are addressed as "Lord King." In the west the Roman emperors are not so termed till the time of Domitian. But the Christians boldly claimed the word for Christ as Jesus is here represented as using it with reference to himself. It seems as if already the disciples were calling Jesus "Lord" and that he accepted the appellative and used it as here.

Matt 21:4
By the prophet ( $\delta \iota \alpha$ $\tau 0 v \pi \rho о \varphi \eta \tau о v$ ). The first line is from Isa $62: 11$, the rest from Zec 9:9. John (Joh 12:14f. ) makes it clear that Jesus did not quote the passage himself. In Matthew it is not so plain, but probably it is his own comment about the incident. It is not Christ's intention to fulfil the prophecy, simply that his conduct did fulfil it.

Matt 21:5

The daughter of Zion ( $\tau \eta \theta v \gamma \alpha \tau \rho \Sigma \mathrm{l} \omega v$ ). Jerusalem as in Isa 22:4 (daughter of my people). So Babylon (Isa 47:1), daughter of Tyre for Tyre (Ps 45:12 ).

Riding ( $\varepsilon \pi \iota \beta \varepsilon \beta \eta \kappa \omega \varsigma)$. Perfect active participle of $\varepsilon \pi \iota \beta \alpha \iota \nu \omega$, "having gone upon."
And upon a colt the foal of an ass ( $\kappa \alpha \varepsilon \pi \pi \omega \lambda \circ v v i o v v \pi \zeta \zeta v \gamma \iota v)$. These words give trouble if $\kappa \alpha$ is here taken to mean "and." Fritzsche argues that Jesus rode alternately upon each animal, a possible, but needless interpretation. In the Hebrew it means by common Hebrew parallelism "upon an ass, even upon a colt." That is obviously the meaning here in Matthew. The use of $v \pi о \zeta \cup \gamma \circ 0 v$ (a beast of burden, under a yoke) for ass is common in the LXX and in the papyri (Deissmann, Bible Studies p. 161).

Matt 21:7
And he sat thereon ( $\kappa \alpha \varepsilon \pi \varepsilon \kappa \alpha \theta \iota \sigma \varepsilon v \varepsilon \pi \alpha \nu \omega \alpha v \tau \omega \nu$ ), Mark (Mr 11:7) and Luke (Lu 19:35 ) show that Jesus rode the colt. Matthew does not contradict that, referring to the garments ( $\tau \alpha \mu \alpha \tau \iota \alpha$ ) put on the colt by "them" ( $\alpha v \tau \omega v$ ). not to the two asses. The construction is somewhat loose, but intelligible. The garments thrown on the animals were the outer garments (ı $\mu \alpha \tau \iota \alpha)$, Jesus "took his seat" ( $\varepsilon \pi \varepsilon \kappa \alpha \theta เ \sigma \varepsilon v$, ingressive aorist active) upon the garments.

Matt 21:8
The most part of the multitude (o $\pi \lambda \varepsilon เ \sigma \tau \circ \varsigma$ ox $\lambda \circ \varsigma$ ). See 11:20 for this same idiom, article with superlative, a true superlative (Robertson, Grammar, p. 670).

In the way $(\varepsilon \nu \tau \eta \circ \delta \omega)$. This the most of the crowd did. The disciples put their garments on the asses. Note change of tenses (constative aorist $\varepsilon \sigma \tau \rho \omega \sigma \alpha v$, descriptive imperfects $\varepsilon \kappa о \pi \tau о \nu \kappa \alpha \varepsilon \sigma \tau \rho \omega \nu \nu v o v$ showing the growing enthusiasm of the crowd). When the colt had passed over their garments, they would pick the garments up and spread them again before.

Matt 21:9
That went before him and that followed (о $\pi \rho о \alpha \gamma о \nu \tau \varepsilon \varsigma \alpha v \tau о \nu \kappa \alpha$ о $\alpha \kappa о \lambda о \cup \theta о v \nu \tau \varepsilon \varsigma)$. Note the two groups with two articles and the present tense (linear action) and the imperfect $\varepsilon \kappa \rho \alpha \zeta o v$ "were crying" as they went.

Hosanna to the Son of David (Ho $H \alpha v \nu \alpha \tau \omega v i \omega \Delta \alpha v \varepsilon i \delta$ ). They were now proclaiming Jesus as the Messiah and he let them do it. "Hosanna" means "Save, we pray thee." They repeat words from the Hallel (Ps 148:1) and one recalls the song of the angelic host when Jesus was born (Lu 2:14). "Hosanna in the highest" (heaven) as well as here on earth.

Matt 21:10
Was stirred $(\varepsilon \sigma \varepsilon \iota \sigma \theta \eta)$. Shaken as by an earthquake. "Even Jerusalem frozen with religious formalism and socially undemonstrative, was stirred with popular enthusiasm as by a mighty wind or by an earthquake" (Bruce).

Matt 21:12
Cast out ( $\varepsilon \xi \varepsilon \beta \alpha \lambda \varepsilon v$ ). Drove out, assumed authority over "the temple of God" (probably correct text with $\operatorname{\tau ov} \theta \varepsilon o v$, though only example of the phrase). John (Joh 2:14 ) has a similar incident at the beginning of the ministry of Jesus. It is not impossible that he should repeat
it at the close after three years with the same abuses in existence again. It is amazing how short a time the work of reformers lasts. The traffic went on in the court of the Gentiles and to a certain extent was necessary. Here the tables of
the money-changers ( $\tau \omega \nu \kappa о \lambda \lambda \nu \beta \iota \sigma \tau \omega v$, from ко $\lambda \lambda \nu \beta$ оऽ, a small coin) were overturned. See on 17:24 for the need of the change for the temple tax. The doves were the poor man's offering.

Matt 21:13
A den of robbers ( $\sigma \pi \eta \lambda \alpha \iota \circ v \lambda \eta \iota \tau \omega v$ ). By charging exorbitant prices.
Matt 21:15
The children ( $\tau 0 \cup \varsigma \pi \alpha \iota \delta a \varsigma$ ). Masculine and probably boys who had caught the enthusiasm of the crowd.

Matt 21:16
Hearest thou (aкоияı). In a rage at the desecration of the temple by the shouts of the boys they try to shame Jesus, as responsible for it.

Thou hast perfected ( $\kappa \alpha \tau \eta \rho \tau \iota \sigma \omega)$. The quotation is from Ps 8:3 (LXX text). See 4:21 where the same verb is used for mending nets. Here it is the timeless aorist middle indicative with the perfective use of $\kappa \alpha \tau \alpha-$. It was a stinging rebuke.

Matt 21:17
To Bethany ( $\varepsilon \iota \varsigma ~ B \eta \forall a v ı a v$ ). House of depression or misery, the Hebrew means. But the home of Martha and Mary and Lazarus there was a house of solace and comfort to Jesus during this week of destiny. He
lodged there ( $\eta \cup \lambda \iota \sigma \theta \eta \varepsilon \kappa \varepsilon$ ) whether at the Bethany home or out in the open air. It was a time of crisis for all.

Matt 21:18
He hungered ( $\varepsilon \pi \varepsilon เ v a \sigma \varepsilon v)$. Ingressive aorist indicative, became hungry, felt hungry (Moffatt). Possibly Jesus spent the night out of doors and so had no breakfast.

Matt 21:19
A fig tree ( $\sigma \cup \kappa \eta \nu \mu \mu \nu)$ ). "A single fig tree" (Margin of Rev. Version). But $\varepsilon \not \subset \varsigma$ was often used $=\tau$ tı or like our indefinite article. See Mt 8:10; 26:69. The Greek has strictly no indefinite article as the Latin has no definite article.

Let there be no fruit from thee henceforward for ever ( $о v \mu \eta \kappa \varepsilon \tau ~ \sigma о v ~ к а \rho \pi о \varsigma ~ \gamma \varepsilon v \eta \tau \alpha ~$ $\varepsilon ı \varsigma ~ \tau o v ~ a \iota \omega v \alpha)$. Strictly speaking this is a prediction, not a prohibition or wish as in Mr 11:14 (optative $\varphi$ aүo). "On you no fruit shall ever grow again" (Weymouth). The double negative ov $\mu \eta$ with the aorist subjunctive (or future indicative) is the strongest kind of negative prediction. It sometimes amounts to a prohibition like ov and the future indicative (Robertson, Grammar, pp. 926f.). The early figs start in spring before the leaves and develop after the leaves. The main fig crop was early autumn ( Mr 11:14). There should have been figs on the tree with the crop of leaves. It was a vivid object lesson. Matthew does not distin-
guish between the two mornings as Mark does (Mr 11:13,20), but says "immediately" ( $\pi \alpha \rho \alpha \chi \rho \eta \mu \alpha)$ twice ( $21: 19,20$ ). This word is really $\pi \alpha \rho \alpha$ тo $\chi \rho \eta \mu \alpha$ like our "on the spot" (Thayer). It occurs in the papyri in monetary transactions for immediate cash payment.

Matt 21:21
Doubt not ( $\mu \eta \delta \iota \alpha \kappa \rho 1 \theta \eta \tau \varepsilon$ ). First aorist passive subjunctive, second-class condition. To be divided in mind, to waver, to doubt, the opposite of "faith" ( $\pi \iota \sigma \tau \imath v$ ), trust, confidence.

What is done to the fig tree ( $\tau о \tau \eta \varsigma ~ \sigma ט \kappa \eta \varsigma) . ~ T h e ~ G r e e k ~ m e a n s ~ " t h e ~ m a t t e r ~ o f ~ t h e ~ f i g ~$ tree," as if a slight matter in comparison with
this mountain ( $\tau \omega$ ope $\tau 0 \cup \tau \omega$ ). Removing a mountain is a bigger task than blighting a fig tree. "The cursing of the fig-tree has always been regarded as of symbolic import, the tree being in Christ's mind an emblem of the Jewish people, with a great show of religion and no fruit of real godliness. This hypothesis is very credible" (Bruce). Plummer follows Zahn in referring it to the Holy City. Certainly "this mountain" is a parable and one already reported in Mt 17:20 (cf. sycamine tree in Lk 17:6 ). Cf. Zec 17:4.

Matt 21:22
Believing ( $\pi \iota \sigma \tau \varepsilon v o v \tau \varepsilon \varsigma)$. This is the point of the parable of the mountain, "faith in the efficacy of prayer" (Plummer).

Matt 21:24
One question ( ( opov $\varepsilon v \alpha$ ). Literally "one word" or "a word." The answer to Christ's word will give the answer to their query. The only human ecclesiastical authority that Jesus had came from John.

Matt 21:25
The baptism of John ( $\tau \mathrm{\beta} \beta \alpha \pi \tau \iota \sigma \mu \alpha$ to $\mathrm{I} \omega \alpha v o v$ ). This represents his relation to Jesus who was baptized by him. At once the ecclesiastical leaders find themselves in a dilemma created by their challenge of Christ.

They reasoned with themselves ( $\delta เ \varepsilon \lambda о \gamma \zeta \zeta$ оvto). Picturesque imperfect tense describing their hopeless quandary.

Matt 21:29
I will not (ov $\theta \varepsilon \lambda \omega$ ). So many old manuscripts, though the Vatican manuscript (B) has the order of the two sons reversed. Logically the "I, sir" ( $\varepsilon \gamma \omega, \kappa v \rho เ \varepsilon)$ suits better for the second son (verse 30) with a reference to the blunt refusal of the first. So also the manuscripts differ in verse 31 between the first ( $\boldsymbol{\pi} \pi \rho \omega \tau о \varsigma$ ) and the last (o vбт $\varepsilon \rho \circ \varsigma$ or $\varepsilon \sigma \chi \alpha \tau о \varsigma)$. But the one who actually did the will of the father is the one who
repented and went ( $\mu \varepsilon \tau \alpha \mu \varepsilon \lambda \eta \theta \varepsilon \iota \varsigma \alpha \pi \eta \lambda \theta \varepsilon v$ ). This word really means "repent," to be sorry afterwards, and must be sharply distinguished from the word $\mu \varepsilon \tau \alpha v o \varepsilon \omega$ used 34 times in the N.T. as in Mt 3:2 and $\mu \varepsilon \tau \alpha v o l \alpha$ used 24 times as in Mt 3:8. The verb $\mu \varepsilon \tau \alpha \mu \varepsilon \lambda \alpha \mu \alpha$ occurs in the N.T. only five times (Mt 21:29,32; 27:3; 2Co 7:8; Heb 7:21 from Ps 109:4). Paul distinguishes sharply between mere sorrow and the act "repentance" which he calls $\mu \varepsilon \tau \alpha v o t a v$
(2Co 7:9). In the case of Judas (Mt 27:3) it was mere remorse. Here the boy got sorry for his stubborn refusal to obey his father and went and obeyed. Godly sorrow leads to repentance ( $\mu \varepsilon \tau \alpha v o \iota \alpha v)$, but mere sorrow is not repentance.

Matt 21:31
Go before you ( $\pi \rho \circ \alpha \gamma o v \sigma i v)$ ). "In front of you" (Weymouth). The publicans and harlots march ahead of the ecclesiastics into the kingdom of heaven. It is a powerful indictment of the complacency of the Jewish theological leaders.

Matt 21:32
In the way of righteousness ( $\varepsilon v$ o $\delta \omega \delta$ เкaıo $\sigma v \eta \varsigma$ ). In the path of righteousness. Compare the two ways in Mt 7:13,14 and "the way of God" ( $22: 16$ ).

Matt 21:33
A hedge ( $\varphi \rho \alpha \gamma \mu \circ v$ ). Or fence as a protection against wild beasts.
Digged a winepress ( $\omega \rho \cup \xi \varepsilon \vee \lambda \eta v o v$ ). Out of the solid rock to hold the grapes and wine as they were crushed. Such wine-vats are to be seen today in Palestine.

Built a tower ( $\omega \kappa \kappa \circ \delta o \mu \eta \sigma \varepsilon v \pi v \rho \gamma \circ v$ ). This for the vinedressers and watchmen ( 2 Ch 26:10 ). Utmost care was thus taken. Note "a booth in a vineyard" (Isa 1:8). See also Isa
 given. The lease allowed three forms, money-rent, a proportion of the crop, or a definite amount of the produce whether it was a good or bad year. Probably the last form is that contemplated here.

Matt 21:34
His servants ( $\tau$ ouc $\delta o u \lambda$ ouc $\alpha \cup \tau o v)$. These slaves are distinguished from
the husbandmen ( $\gamma \varepsilon \omega \rho \gamma \circ$, workers of the soil) or workers of the vineyard who had leased it from the householder before he went away. The conduct of the husbandmen towards the householder's slaves portrays the behaviour of the Jewish people and the religious leaders in particular towards the prophets and now towards Christ. The treatment of God's prophets by the Jews pointedly illustrates this parable.

Matt 21:35
They will reverence my son ( $\varepsilon v \tau \rho \alpha \pi \eta \sigma o v \tau \alpha$ $\tau \circ v v o v \mu o v$ ). Second future passive from $\varepsilon v \tau \rho \varepsilon \pi \omega$, to turn at, but used transitively here as though active or middle. It is the picture of turning with respect when one worthy of it appears.

Matt 21:38
Take his inheritance ( $\sigma \chi \omega \mu \varepsilon \nu \tau \eta \nu \kappa \lambda \eta \rho o v o \mu \mu \nu \alpha \nu \tau o v$ ). Ingressive aorist active subjunctive (hortatory, volitive) of $\varepsilon \chi \omega$. Let us get his inheritance.

Matt 21:41
He will miserably destroy those miserable men (какоия какшৎ атодєбє аuтои¢). The paronomasia or assonance is very clear. A common idiom in literary Greek. "He will put the wretches to a wretched death" (Weymouth).

Which (otivec). Who, which very ones of a different character.
Matt 21:42
The stone which ( $\left.\lambda_{1} \theta \mathrm{ov} o v\right)$. Inverse attraction of the antecedent into the case of the relative.

The builders rejected ( $\alpha \pi \varepsilon \delta о к \mu \alpha \sigma \alpha v$ о оккобо $о и \nu \tau \varepsilon \varsigma)$. From Ps 118:22. A most telling quotation. These experts in building God's temple had rejected the corner-stone chosen by God for his own house. But God has the last word and sets aside the building experts and puts his Son as the Head of the corner. It was a withering indictment.

Matt 21:43
Shall be taken away from you ( $\alpha \rho \theta \eta \sigma \varepsilon \tau \alpha \alpha \varphi^{\prime} v \mu \omega v$ ). Future passive indicative of $\alpha, \rho \omega$. It was the death-knell of the Jewish nation with their hopes of political and religious world leadership.

Matt 21:44
Shall be broken to pieces ( $\sigma v v \theta \lambda \alpha \sigma \theta \eta \sigma \varepsilon \tau \alpha)$. Some ancient manuscripts do not have this verse. But it graphically pictures the fate of the man who rejects Christ. The verb means to shatter. We are familiar with an automobile that dashes against a stone wall, a tree, or a train and the ruin that follows.

Will scatter him as dust $\left(\lambda_{ı} \kappa \eta \sigma \varepsilon\right)$. The verb was used of winnowing out the chaff and then of grinding to powder. This is the fate of him on whom this Rejected Stone falls.

Matt 21:45
Perceived ( $\varepsilon \gamma v \omega \sigma \alpha v)$. Ingressive second aorist active of $\gamma ı v \omega \sigma \kappa \omega$. There was no mistaking the meaning of these parables. The dullest could see the point.

Matt 21:46
Took him ( $\varepsilon \chi \chi \circ v$ ). Descriptive imperfect of $\varepsilon \chi \omega$, to hold. This fear of the people was all that stayed the hands of the rabbis on this occasion. Murderous rage was in their hearts towards Jesus. People do not always grasp the application of sermons to themselves.

## Matthew 22

Matt 22:1
Again in parables ( $\pi \alpha \lambda \iota v \varepsilon v \pi \alpha \rho \alpha \beta 0 \lambda \alpha ı \varsigma)$. Matthew has already given two on this occasion (The Two Sons, The Wicked Husbandmen). He alone gives this Parable of the Marriage Feast of the King's Son. It is somewhat similar to that of The Supper in Lu 14:16-23 given on another occasion. Hence some scholars consider this merely Matthew's version of the Lucan parable in the wrong place because of Matthew's habit of grouping the sayings of Jesus. But that is a gratuitous indictment of Matthew's report which definitely locates the parable here by $\pi \alpha \lambda \iota \nu$. Some regard it as not spoken by Jesus at all, but an effort on the part of the writer to cover the sin and fate of the Jews, the calling of the Gentiles, and God's demand for righteousness. But here again it is like Jesus and suits the present occasion.

Matt 22:2
A marriage feast ( $\gamma \alpha \mu \circ v \varsigma)$. The plural, as here ( $2,3,4,9$ ), is very common in the papyri for the wedding festivities (the several acts of feasting) which lasted for days, seven in Jud 14:17. The very phrase here, $\gamma \alpha \mu \circ \cup \varsigma ~ \pi o เ \varepsilon เ v, ~ o c c u r s ~ i n ~ t h e ~ D o r i c ~ o f ~ T h e r a ~ a b o u t ~ B . C . ~ 200 . ~$. The singular $\gamma \alpha \mu \circ \varsigma$ is common in the papyri for the wedding contract, but Field (Notes, p. 16) sees no difference between the singular here in $22: 8$ and the plural (see also Ge 29:22; Es 9:22 ; Macc. 10:58).

Matt 22:3
To call them that were bidden ( $\kappa \alpha \lambda \varepsilon \sigma \alpha$ тov¢ $\kappa \varepsilon \kappa \lambda \eta \mu \varepsilon v o v \varsigma)$. "Perhaps an unconscious play on the words, lost in both A.V. and Rev.,
to call the called " (Vincent). It was a Jewish custom to invite a second time the already invited (Es 5:8; $6: 14$ ). The prophets of old had given God's invitation to the Jewish people. Now the Baptist and Jesus had given the second invitation that the feast was ready.

And they would not come ( $\kappa \alpha$ оик $\eta \theta \varepsilon \lambda$ ov $\varepsilon \lambda \theta \varepsilon \varepsilon v$ ). This negative imperfect characterizes the stubborn refusal of the Jewish leaders to accept Jesus as God's Son (Joh 1:11). This is "The Hebrew Tragedy" (Conder).

Matt 22:4
My dinner ( $\tau \mathrm{o}$ apıбтov $\mu \mathrm{ov}$ ). It is breakfast, not dinner. In Lu 14:12 both apıбтov (breakfast) and $\delta \varepsilon \iota \pi v o v$ (dinner) are used. This noon or midday meal, like the French breakfast at noon, was sometimes called $\delta \varepsilon ı \pi v o v \mu \varepsilon \sigma \eta \mu \beta \rho ı v o v$ (midday dinner or luncheon). The regular dinner ( $\delta \varepsilon ו \pi v o v$ ) came in the evening. The confusion arose from applying apıбтov to the early morning meal and then to the noon meal (some not eating an earlier meal). In Joh $21: 12,15$ apıotaw is used of the early morning meal, "Break your fast" ( $\alpha \rho \iota \sigma \tau \eta \sigma \alpha \tau \varepsilon$ ). When apıбтоv was applied to luncheon, like the Latin prandium, акратıб $\alpha$ a was the term for the early breakfast.

My fatlings ( $\tau \alpha \sigma \iota \tau \iota \tau \tau \alpha$ ). Verbal from $\sigma \iota \tau \iota \zeta \omega$, to feed with wheat or other grain, to fatten. Fed-up or fatted animals.

Matt 22:5
Made light of it ( $\alpha \mu \varepsilon \lambda \eta \sigma \alpha v \tau \varepsilon \zeta)$. Literally, neglecting, not caring for. They may even have ridiculed the invitation, but the verb does not say so. However, to neglect an invitation to a wedding feast is a gross discourtesy.

One to his own farm ( $\circ \varsigma \mu \varepsilon v \varepsilon \iota \varsigma ~ \tau o v ~ ı \delta ı o v ~ \alpha \gamma \rho \circ v$ ) or field,
another to his merchandise ( $o \varsigma \delta \varepsilon \varepsilon \pi \tau \eta \nu \varepsilon \mu \pi$ орıav av $\tau \circ v$ ) only example in the N.T., from $\varepsilon \mu \pi о \rho о \varsigma$, merchant, one who travels for traffic ( $\varepsilon \mu \pi о \rho \varepsilon v o \mu \alpha$ ), a drummer.

Matt 22:7
Armies ( $\sigma \tau \rho \alpha \tau \varepsilon v \mu \alpha \tau \alpha$ ). Bands of soldiers, not grand armies.
Matt 22:9
The partings of the highways ( $\tau \alpha \varsigma \delta เ \varepsilon \xi_{0} \delta o v \varsigma \tau \omega \nu$ o $\delta \omega \nu$ ). Vulgate, exitus viarum. $\Delta \mathrm{to} \delta \mathrm{o}$ are cross-streets, while $\delta_{\iota \varepsilon} \xi_{o} \delta o$ (double compound) seem to be main streets leading out of the city where also side-streets may branch off, "by-ways."

Matt 22:10
The wedding ( $\mathrm{o} \gamma \alpha \mu \mathrm{\rho})$. But Westcott and Hort rightly read here o $v \nu \mu \varphi \omega v$, marriage dining hall. The same word in 9:15 means the bridechamber.

Matt 22:12
Not having a wedding-garment ( $\mu \eta \varepsilon \chi \omega v \varepsilon v \delta \nu \mu \alpha \gamma \alpha \mu \circ v$ ). $M \eta$ is in the Koine the usual negative with participles unless special emphasis on the negative is desired as in ouk $\varepsilon v \delta \varepsilon \delta \nu \mu \varepsilon v o v$. There is a subtle distinction between $\mu \eta$ and ov like our subjective and objective notions. Some hold that the wedding-garment here is a portion of a lost parable separate from that of the Wedding Feast, but there is no evidence for that idea. Wunsche does report a parable by a rabbi of a king who set no time for his feast and the guests arrived, some properly dressed waiting at the door; others in their working clothes did not wait, but went off to work and, when the summons suddenly came, they had no time to dress properly and were made to stand and watch while the others partook of the feast.

Matt 22:13
Was speechless $(\varepsilon \psi(\mu \omega \theta \eta)$. Was muzzled, dumb from confusion and embarrassment. It is used of the ox ( $1 \mathrm{Ti} 5: 18$ ).

The outer darkness (то бкотоৎ то $\varepsilon \xi \omega \tau \varepsilon \rho \circ v)$. See Mt 8:12. All the blacker from the standpoint of the brilliantly lighted banquet hall.

There shall be ( $\varepsilon \kappa \varepsilon \varepsilon \sigma \tau \alpha$ ). Out there in the outer darkness.
Matt 22:14
 crisp saying of Christ occurs in various connections. He evidently repeated many of his
sayings many times as every teacher does. There is a distinction between the called ( $\kappa \lambda \eta \tau 0$ ) and the chosen ( $\varepsilon \kappa \lambda \varepsilon \kappa \tau о$ ) called out from the called.

Matt 22:15
Went ( $\pi о \rho \varepsilon v \theta \varepsilon v \tau \varepsilon \varsigma)$. So-called deponent passive and redundant use of the verb as in 9:13: "Go and learn."

Took counsel ( $\sigma \cup \mu \beta$ ov $\lambda \iota \circ v \varepsilon \lambda \alpha \beta o v$ ). Like the Latin consilium capere as in 12:14.
Ensnare in his talk ( $\pi \alpha \gamma \iota \delta \varepsilon v \sigma \omega \sigma \iota v \varepsilon \nu \lambda o \gamma \omega$ ). From $\pi \alpha \nLeftarrow \iota$, a snare or trap. Here only in the N.T. In the LXX (1Ki 28:9; Ec 9:12; Test. of Twelve Patriarchs, Joseph 7:1). Vivid picture of the effort to trip Jesus in his speech like a bird or wild beast.

Matt 22:16
Their disciples ( $\tau 0 v \varsigma \mu \alpha \forall \eta \tau \alpha \varsigma \alpha v \tau \omega v$ ). Students, pupils, of the Pharisees as in Mr 2:18 . There were two Pharisaic theological seminaries in Jerusalem (Hillel, Shammai).

The Herodians ( $\tau \omega \nu \mathrm{H} \varepsilon \rho \omega t \delta \iota \nu \omega v$ ). Not members of Herod's family or Herod's soldiers, but partisans or followers of Herod. The form in -ıavoc is a Latin termination like that in Xpıotıavoc (Ac 11:26 ). Mentioned also in Mr 3:6 combining with the Pharisees against Jesus.

The person of men $(\pi \rho \sigma \sigma \omega \pi \sigma v \alpha v \theta \omega \pi \omega \nu)$. Literally, face of men. Paying regard to appearance is the sin of partiality condemned by James (Jas 2:1,9) when $\pi \rho \sigma \sigma \omega \pi \sigma \lambda \eta \mu \psi \iota \alpha$, $\pi \rho o \sigma \omega \pi \sigma \lambda \eta \mu \pi \tau \varepsilon \iota \nu$ are used, in imitation of the Hebrew idiom. This suave flattery to Jesus implied "that Jesus was a reckless simpleton" (Bruce).

Matt 22:19
 or head-money, tributum capitis, for which silver denaria were struck, with the figure of Caesar and a superscription, e.g. "Tiberiou Kaisaros" (McNeile). No $\mu \sigma \mu \alpha$ is the Latin $n u-$ misma and occurs here only in the N.T., is common in the old Greek, from vo $\mu \zeta \omega$ sanctioned by law or custom.

Matt 22:20
This image and superscription ( $\eta \varepsilon \iota \kappa \omega \nu \alpha v \tau \eta \kappa \alpha \eta \varepsilon \pi \iota \gamma \rho \alpha \varphi \eta$ ). Probably a Roman coin because of the image (picture) on it. The earlier Herods avoided this practice because of Jewish prejudice, but the Tetrarch Philip introduced it on Jewish coins and he was followed by Herod Agrippa I. This coin was pretty certainly stamped in Rome with the image and name of Tiberius Caesar on it.

Matt 22:21
Render ( $\alpha \pi$ o $\delta \mathrm{o} \tau \varepsilon$ ). "Give back" to Caesar what is already Caesar's.
Matt 22:24
Shall marry ( $\varepsilon \pi \tau \gamma \alpha \mu \beta \rho \varepsilon v \sigma \varepsilon)$. The Sadducees were "aiming at amusement rather than deadly mischief" (Bruce). It was probably an old conundrum that they had used to the discomfiture of the Pharisees. This passage is quoted from De 25:5,6. The word appears here only in the N.T. and elsewhere only in the LXX. It is used of any connected by marriage as
in Ge 34:9; 1Sa 18:22. But in Ge $38: 8$ and De $25: 5$ it is used specifically of one marrying his brother's widow.

Matt 22:33
They were astonished ( $\varepsilon \xi \varepsilon \pi \lambda \eta \sigma \sigma o v \tau 0)$. Descriptive imperfect passive showing the continued amazement of the crowds. They were struck out (literally).

Matt 22:34
 Sadducees. The Pharisees could not restrain their glee though they were joining with the Sadducees in trying to entrap Jesus.

Gathered themselves together ( $\sigma v \nu \eta \chi \theta \eta \sigma \alpha v \varepsilon \pi \tau o \alpha v \tau o$ ). First aorist passive, were gathered together. E $\pi$ тo av $\tau$ o explains more fully $\sigma v v$-. See also Ac 2:47 . "Mustered their forces" (Moffatt).

Matt 22:36
The great commandment in the law ( $\varepsilon v \tau o \lambda \eta \mu \varepsilon \gamma \alpha \lambda \eta \varepsilon \nu \tau \omega \nu o \mu \omega$ ). The positive adjective is sometimes as high in rank as the superlative. See $\mu \varepsilon \gamma \alpha \varsigma$ in Mt 5:19 in contrast with $\varepsilon \lambda \alpha \chi เ \sigma \tau \circ \varsigma$. The superlative $\mu \varepsilon \gamma \iota \sigma \tau \sigma$ occurs in the N.T. only in 2Pe 1:4. Possibly this scribe wishes to know which commandment stood first (Mr 12:28) with Jesus. "The scribes declared that there were 248 affirmative precepts, as many as the members of the human body; and 365 negative precepts, as many as the days in the year, the total being 613, the number of letters in the Decalogue" (Vincent). But Jesus cuts through such pettifogging hair-splitting to the heart of the problem.

Matt 22:42
The Christ ( $\tau 0 v \mathrm{X} \rho \iota \sigma \tau 0 v$ ). The Messiah, of course, not Christ as a proper name of Jesus. Jesus here assumes that Ps 110 refers to the Messiah. By his pungent question about the Messiah as David's son and Lord he really touches the problem of his Person (his Deity and his Humanity). Probably the Pharisees had never faced that problem before. They were unable to answer.

Matt 23:2
Sit on Moses' seat ( $\varepsilon \pi \tau \eta \varsigma M \omega v \sigma \varepsilon \omega \varsigma \kappa \alpha \theta \varepsilon \delta \rho \alpha \varsigma \varepsilon \kappa \alpha \theta \iota \sigma \alpha v)$. The gnomic or timeless aorist tense, $\varepsilon \kappa \alpha \theta \iota \sigma \alpha v$, not the aorist "for" the perfect. The "seat of Moses" is a brief form for the chair of the professor whose function it is to interpret Moses. "The heirs of Moses' authority by an unbroken tradition can deliver ex cathedra pronouncements on his teaching" (McNeile).

Matt 23:3
For they say and do not ( $\lambda \varepsilon \gamma \circ \sim \sigma \iota \nu \kappa \alpha$ ov $\pi \circ \circ \circ v \sigma \iota)$. "As teachers they have their place, but beware of following their example" (Bruce). So Jesus said: "Do not ye after their works " ( $\mu \eta \pi$ тоוєıєع). Do not practice their practices. They are only preachers. Jesus does not here
disapprove any of their teachings as he does elsewhere. The point made here is that they are only teachers (or preachers) and do not practice what they teach as God sees it.

Matt 23:4
With their finger ( $\tau \omega \delta \alpha \kappa \tau \cup \lambda \omega \alpha \cup \tau \omega v$ ). A picturesque proverb. They are taskmasters, not burden-bearers, not sympathetic helpers.

Matt 23:5
To be seen of men ( $\pi \rho \circ \varsigma \tau$ то $\theta \varepsilon \alpha \theta \eta v \alpha$ тогৎ $\alpha v \theta \rho \omega \pi о \iota \varsigma$ ). See 6:1 where this same idiom occurs. Ostentation regulates the conduct of the rabbis.

Phylacteries ( $\varphi \cup \lambda \alpha \kappa \tau \eta \rho \iota \alpha$ ). An adjective from $\varphi \cup \lambda \alpha \kappa \tau \eta \rho, \varphi \cup \lambda \alpha \sigma \sigma \omega$ (to guard). So a fortified place, station for garrison, then a safeguard, protecting charm or amulet. The rabbis wore $\tau \varepsilon \varphi \iota \lambda \lambda \iota v$ or prayer-fillets, small leather cases with four strips of parchment on which were written the words of Ex 13:1-10,11-16; De 6:4-9; 11:13-21. They took literally the words about "a sign unto thy hand," "a memorial between thine eyes," and "frontlets." "That for the head was to consist of a box with four compartments, each containing a slip of parchment inscribed with one of the four passages. Each of these strips was to be tied up with a wellwashed hair from a calf's tail; lest, if tied with wool or thread, any fungoid growth should ever pollute them. The phylactery of the arm was to contain a single slip, with the same four passages written in four columns of seven lines each. The black leather straps by which they were fastened were wound seven times round the arm and three times round the hand. They were reverenced by the rabbis as highly as the scriptures, and, like them, might be rescued from the flames on a sabbath. They profanely imagined that God wore the tephillin" (Vincent). It is small wonder that Jesus ridiculed such minute concern for pretentious externalism and literalism. These tephillin "are still worn at the present day on the forehead and left arm by Jews at the daily Morning Prayer" (McNeile) . "The size of the phylacteries indexed the measure of zeal, and the wearing of large ones was apt to take the place of obedience" (Bruce). Hence they made them "broad." The superstitious would wear them as mere charms to ward off evil.

Enlarge the borders ( $\mu \varepsilon \gamma \alpha \lambda \nu v o v \sigma \iota \nu \tau \alpha \kappa \rho \alpha \sigma \pi \varepsilon \delta \alpha)$. In 9:20 we see that Jesus, like the Jews generally, wore a tassel or tuft, hem or border, a fringe on the outer garment according to Nu 15:38. Here again the Jewish rabbi had minute rules about the number of the fringes and the knots (see on 9:20). They made a virtue of the size of the fringes also. "Such things were useful as reminders; they were fatal when they were regarded as charms" (Plummer).

Matt 23:6
The chief place at feasts ( $\tau \eta \nu \pi \rho \omega \tau о \kappa \lambda \iota \sigma \iota \alpha \vee \varepsilon v \tau 0 เ \varsigma ~ \delta \varepsilon ı \pi v o \iota \varsigma)$. Literally, the first reclining place on the divan at the meal. The Persians, Greeks, Romans, Jews differed in their customs, but all cared for the post of honour at formal functions as is true of us today. Hostesses often solve the point by putting the name of each guest at the table. At the last passover meal the
apostles had an ugly snarl over this very point of precedence (Lu 22:24; Joh 13:2-11), just two days after this exposure of the Pharisees in the presence of the apostles.

The chief seats in the synagogues ( $\tau \alpha \varsigma \pi \rho \omega \tau о \kappa \alpha \theta \varepsilon \delta \rho ı \varsigma \varsigma \nu \tau \alpha \iota \varsigma \sigma \cup \nu \alpha \gamma \omega \gamma \alpha \iota \varsigma)$. "An insatiable hunger for prominence" (Bruce). These chief seats (Zuchermandel) were on the platform looking to the audience and with the back to the chest in which were kept the rolls of scripture. The Essenes had a different arrangement. People today pay high prices for front seats at the theatre, but at church prefer the rear seats out of a curious mock-humility. In the time of Jesus the hypocrites boldly sat up in front. Now, if they come to church at all, they take the rear seats.

Matt 23:7
Salutations ( $\alpha \sigma \pi \alpha \sigma \mu \sigma v \varsigma)$. The ordinary courtiers were coveted because in public. They had an itch for notice. There are occasionally today ministers who resent it if they are not called upon to take part in the services at church. They feel that their ministerial dignity has not been recognized.

Matt 23:8
But be not ye called Rabbi (v $v \varepsilon ı \varsigma \delta \varepsilon \mu \eta \kappa \lambda \eta \theta \eta \tau \varepsilon \mathrm{P} \alpha \beta \beta \varepsilon$ ). An apparent aside to the disciples. Note the emphatic position of $v \mu \varepsilon \varepsilon$. Some even regard verses 8-10 as a later addition and not part of this address to the Pharisees, but the apostles were present. Euthymius Zigabenus says: "Do not seek to be called (ingressive aorist subjunctive), if others call you this it will not be your fault." This is not far from the Master's meaning. Rabbi means "my great one," "my Master," apparently a comparatively new title in Christ's time.

Matt 23:9
Call no man your father ( $\pi \alpha \tau \varepsilon \rho \alpha \mu \eta \kappa \alpha \lambda \varepsilon \sigma \eta \tau \varepsilon \nu \mu \omega v$ ). Jesus meant the full sense of this noble word for our heavenly Father. "Abba was not commonly a mode of address to a living person, but a title of honour for Rabbis and great men of the past" (McNeile). In Gethsemane Jesus said: "Abba, Father" (Mr 14:36). Certainly the ascription of "Father" to pope and priest seems out of harmony with what Jesus here says. He should not be understood to be condemning the title to one's real earthly father. Jesus often leaves the exceptions to be supplied.

Matt 23:10
Masters ( $\kappa \alpha \theta \eta \gamma \eta \tau \alpha$ ). This word occurs here only in the N.T. It is found in the papyri for teacher (Latin, doctor). It is the modern Greek word for professor. "While $\delta \iota \delta a \sigma \kappa \alpha \lambda o s$ represents P $\alpha \beta$, $\kappa \alpha \theta \eta \gamma \eta \tau \varepsilon \varsigma$ stands for the more honourable P $\alpha \beta \beta \alpha v,-\beta \omega v$ " (McNeile). Dalman (Words of Jesus, p. 340) suggests that the same Aramaic word may be translated by either $\delta \iota \delta \alpha \sigma \kappa \alpha \lambda$ ос or ка $\theta \eta \gamma \eta \tau \varepsilon \varsigma$.

The Christ (o Xpıбтоৎ). The use of these words here by Jesus like "Jesus Christ" in his Prayer (Joh 17:3) is held by some to show that they were added by the evangelist to what Jesus actually said, since the Master would not have so described himself. But he commended

Peter for calling him "the Christ the Son of the living God" (Mt 16:16f. ). We must not empty the consciousness of Jesus too much.

Matt 23:12
Exalt himself ( $\nu \psi \omega \sigma \varepsilon \varepsilon \alpha u \tau o v)$. Somewhat like 18:4; 20:26 . Given by Luke in other contexts (14:11; 18:14 ). Characteristic of Christ.

Matt 23:13
Hypocrites (vтокрıта). This terrible word of Jesus appears first from him in the Sermon on the Mount (Mt 6:2,5,16; 7:5 ), then in 15:7 and 22:18. Here it appears "with terrific iteration" (Bruce) save in the third of the seven woes ( $23: 13,15,23,25,27,29$ ). The verb in the active (v $\tau \circ \kappa \rho \iota v \omega)$ meant to separate slowly or slightly subject to gradual inquiry. Then the middle was to make answer, to take up a part on the stage, to act a part. It was an easy step to mean to feign, to pretend, to wear a masque, to act the hypocrite, to play a part. This hardest word from the lips of Jesus falls on those who were the religious leaders of the Jews (Scribes and Pharisees), who had justified this thunderbolt of wrath by their conduct toward Jesus and their treatment of things high and holy. The _Textus Receptus has eight woes, adding verse 14 which the Revised Version places in the margin (called verse 13 by Westcott and Hort and rejected on the authority of Aleph B D as a manifest gloss from Mr 12:40 and Lu 20:47). The MSS. that insert it put it either before 13 or after 13. Plummer cites these seven woes as another example of Matthew's fondness for the number seven, more fancy than fact for Matthew's Gospel is not the Apocalypse of John. These are all illustrations of Pharisaic saying and not doing (Allen).

Ye shut the kingdom of heaven ( $\kappa \lambda \varepsilon \varepsilon \varepsilon \tau \varepsilon \tau \eta \nu \beta \alpha \sigma \iota \lambda \varepsilon \iota \alpha \nu \tau \omega \nu$ ov $\alpha \nu \omega \nu$ ). In Lu 11:52 the lawyers are accused of keeping the door to the house of knowledge locked and with flinging away the keys so as to keep themselves and the people in ignorance. These custodians of the kingdom by their teaching obscured the way to life. It is a tragedy to think how preachers and teachers of the kingdom of God may block the door for those who try to enter in (tous $\varepsilon І \sigma \varepsilon \rho \chi \circ \mu \varepsilon v o u \varsigma$, conative present middle participle).

Against ( $\varepsilon \mu \pi \rho \circ \sigma \theta \varepsilon v)$. Literally, before. These door-keepers of the kingdom slam it shut in men's faces and they themselves are on the outside where they will remain. They hide the key to keep others from going in.

Matt 23:15
Twofold more a son of hell than yourselves (vov $\gamma \varepsilon \varepsilon v v \eta \varsigma \delta i \pi \lambda о \tau \varepsilon \rho \circ v \nu \mu \omega v$ ). It is a convert to Pharisaism rather than Judaism that is meant by "one proselyte" ( $\varepsilon v \alpha \pi \rho о \sigma \eta \lambda \nu \tau o v$ ), from $\pi \rho о \sigma \varepsilon \rho \chi о \mu \alpha$, newcomers, aliens. There were two kinds of proselytes: of the gate (not actual Jews, but God-fearers and well-wishers of Judaism, like Cornelius), of righteousness who received circumcision and became actual Jews. But a very small per cent of the latter became Pharisees. There was a Hellenistic Jewish literature (Philo, Sibylline Oracles, etc.) designed to attract Gentiles to Judaism. But the Pharisaic missionary zeal (compass,
$\pi \varepsilon \rho ı a \gamma \eta \tau \varepsilon$, go around) was a comparative failure. And success was even worse, Jesus says with pitiless plainness. The "son of Gehenna" means one fitted for and so destined for Ge henna. "The more converted the more perverted" (H.J. Holtzmann). The Pharisees claimed to be in a special sense sons of the kingdom (Mt 8:12). They were more partisan than pious. $\Delta t \pi \lambda$ ouc (twofold, double) is common in the papyri. The comparative here used, as if from $\delta \iota \pi \lambda o \varsigma$, appears also in Appian. Note the ablative of comparison h $\|$ mon. It was a withering thrust.

Matt 23:16
Ye blind guides ( $\circ \delta \eta \gamma \circ \tau \cup \varphi \lambda o$ ). Note omission of "Scribes and Pharisees, hypocrites" with this third woe. In 15:14 Jesus had already called the Pharisees "blind guides" (leaders). They split hairs about oaths, as Jesus had explained in 5:33-37, between the temple and the gold of the temple.

He is a debtor ( $\circ \varphi \varepsilon \wedge \varepsilon \varepsilon$ ). He owes his oath, is bound by his oath. A.V., is guilty , is old English, obsolete sense of guilt as fine or payment.
Matt 23:17
Ye fools ( $\mu \omega \rho 0$ ). In 5:22 Jesus had warned against calling a man $\mu \omega \rho o \varsigma$ in a rage, but here he so terms the blind Pharisees for their stupidity, description of the class. "It shows that not the word but the spirit in which it is uttered is what matters" (McNeile).

Matt 23:23
Ye tithe ( $\alpha \pi о \delta \varepsilon к \alpha \tau о ⿱ \tau \varepsilon)$. The tithe had to be paid upon "all the increase of thy seed" (De 14:22; Le 27:30 ). The English word tithe is tenth. These small aromatic herbs, mint ( $\tau \mathrm{o}$ $\eta \delta v o \sigma \mu o v$, sweet-smelling), anise or dill ( $\alpha v \eta \theta$ ov), cummin ( $\kappa \nu \mu \nu v o v$, with aromatic seeds), show the Pharisaic scrupulous conscientiousness, all marketable commodities. "The Talmud tells of the ass of a certain Rabbi which had been so well trained as to refuse corn of which the tithes had not been taken" (Vincent).

These ye ought ( $\tau \alpha u \tau \alpha \varepsilon \delta \varepsilon$ ). Jesus does not condemn tithing. What he does condemn is doing it to the neglect of the
weightier matters ( $\tau \alpha \beta \alpha \rho \cup \tau \varepsilon \rho \alpha$ ). The Pharisees were externalists; cf. Lu 11:39-44 .
Matt 23:24
 "straining at" in swallowing so crudely suggested by the misprint in the A.V.

Swallow the camel ( $\tau \eta v \delta \varepsilon \kappa \alpha \mu \eta \lambda$ оv кататıvovтє¢). Gulping or drinking down the camel. An oriental hyperbole like that in 19:24. See also 5:29,30; 17:20; 21:21 . Both insects and camels were ceremonially unclean (Le 11:4,20,23,42). "He that kills a flea on the Sabbath is as guilty as if he killed a camel" (Jer. Shabb. 107).

Matt 23:25
From extortion and excess ( $\varepsilon \xi \alpha \rho \pi \alpha \gamma \eta \varsigma \kappa \alpha \alpha \kappa \rho \alpha \sigma \iota \alpha \varsigma)$. A much more serious accusation. These punctilious observers of the external ceremonies did not hesitate at robbery ( $\alpha \rho \pi \alpha \gamma \varepsilon \varsigma$ )
and graft ( $\alpha \kappa \rho \alpha \sigma เ \alpha \varsigma)$, lack of control. A modern picture of wickedness in high places both civil and ecclesiastical where the moral elements in life are ruthlessly trodden under foot. Of course, the idea is for both the outside єктоц and the inside ( $\varepsilon \vee \tau \circ \varsigma)$ of the cup and the platter (fine side dish). But the inside is the more important. Note the change to singular in verse 26 as if Jesus in a friendlier tone pleads with a Pharisee to mend his ways.

## Matt 23:27

Whited sepulchre ( $\tau \alpha \varphi o \iota \varsigma ~ \kappa \varepsilon \kappa о \nu ı \alpha \mu \varepsilon v o \iota \varsigma) . ~ T h e ~ p e r f e c t ~ p a s s i v e ~ p a r t i c i p l e ~ i s ~ f r o m ~ к о v ı a \omega ~$ and that from кovia, dust or lime. Whitened with powdered lime dust, the sepulchres of the poor in the fields or the roadside. Not the rock-hewn tombs of the well-to-do. These were whitewashed a month before the passover that travellers might see them and so avoid being defiled by touching them ( Nu 19:16). In Ac 23:3 Paul called the high priest a whited wall. When Jesus spoke the sepulchres had been freshly whitewashed. We today speak of whitewashing moral evil.

Matt 23:29
The tombs of the prophets ( $\tau 0 \cup \varsigma \tau \alpha \varphi o u \varsigma \tau \omega v \pi \rho \circ \varphi \eta \tau \omega v$ ). Cf. Lu 11:48-52. They were bearing witness against themselves (عaviols, verse 31) to "the murder-taint in your blood" (Allen). "These men who professed to be so distressed at the murdering of the Prophets, were themselves compassing the death of Him who was far greater than any Prophet" (Plummer). There are four monuments called Tombs of the Prophets (Zechariah, Absalom, Jehoshaphat, St. James) at the base of the Mount of Olives. Some of these may have been going up at the very time that Jesus spoke. In this seventh and last woe Jesus addresses the Jewish nation and not merely the Pharisees.

Matt 23:32
Fill ye up ( $\pi \lambda \eta \rho \omega \sigma \alpha \tau \varepsilon$ ). The keenest irony in this command has been softened in some MSS. to the future indicative ( $\pi \lambda \eta \rho \omega \sigma \varepsilon \tau \varepsilon$ ). "Fill up the measure of your fathers; crown their misdeeds by killing the prophet God has sent to you. Do at last what has long been in your hearts. The hour is come" (Bruce).

Matt 23:33
Ye serpents, ye offspring of vipers ( $\circ ¢ \varepsilon ı \varsigma \quad{ }^{\varepsilon} \vee \nu \eta \mu \alpha \tau \alpha \varepsilon \chi \iota \delta v \omega v$ ). These blistering words come as a climax and remind one of the Baptist ( $3: 17$ ) and of the time when the Pharisees accused Jesus of being in league with Beelzebub ( 12:34). They cut to the bone like whipcords.

How shall ye escape ( $\pi \omega \varsigma \varphi v \gamma \eta \tau \varepsilon$ ). Deliberate subjunctive. There is a curse in the Talmud somewhat like this: "Woe to the house of Annas! Woe to their serpent-like hissings."

Matt 23:35
Zachariah son of Barachiah (Zaxapıov vıov Bapaxıov). Broadus gives well the various alternatives in understanding and explaining the presence of "son of Barachiah" here which is not in Lu 11:51. The usual explanation is that the reference is to Zachariah the son of Je-
hoiada the priest who was slain in the court of the temple (2Ch 24:20ff. ). How the words, "son of Barachiah," got into Matthew we do not know. A half-dozen possibilities can be suggested. In the case of Abel a reckoning for the shedding of his blood was foretold ( Ge 4:10) and the same thing was true of the slaying of Zachariah (2Ch 24:22).

## Matt 23:37

How often would I have gathered ( $\tau о \sigma \alpha \kappa ı \varsigma ~ \eta \theta \varepsilon \lambda \eta \sigma \alpha \varepsilon \pi \iota \sigma v v \alpha \gamma \varepsilon ı v)$. More exactly, how often did I long to gather to myself (double compound infinitive). The same verb ( $\varepsilon \pi\llcorner\sigma u v a \gamma \varepsilon$ ) is used of the hen with the compound preposition vлокат $\omega$. Everyone has seen the hen quickly get together the chicks under her wings in the time of danger. These words naturally suggest previous visits to Jerusalem made plain by John's Gospel.

## Matthew 24

Matt 24:1
Went out from the temple ( $\varepsilon \xi \varepsilon \lambda \theta \omega v$ a $\pi 0$ tov $\varepsilon \rho \rho \circ$ ). All the discourses since Mt 21:23 have been in the temple courts (ıfpov, the sacred enclosure). But now Jesus leaves it for good after the powerful denunciation of the scribes and Pharisees in chapter 23. His public teaching is over. It was a tragic moment. As he was going out ( $\varepsilon \pi \sigma \rho \varepsilon \cup \varepsilon \tau 0$, descriptive imperfect) the disciples, as if to relieve the thought of the Master came to him ( $\pi \rho o \sigma \eta \lambda \theta o v$ ) to show ( $\varepsilon \pi \iota \delta \varepsilon \varepsilon \xi \alpha$, ingressive aorist infinitive) the buildings of the temple ( $\tau \alpha \varsigma$ оккобонас то⿱ ı $£ \rho 0$ ). They were familiar to Jesus and the disciples, but beautiful like a snow mountain (Josephus, Wars V,5,6), the monument that Herod the Great had begun and that was not yet complete (Joh 2:20). Great stones were there of polished marble.

Matt 24:2
One stone upon another ( $\left.\lambda_{1} \theta \circ \varsigma \varepsilon \pi \lambda_{1} \theta o v\right)$. Stone upon stone. A startling prediction showing that the gloomy current of the thoughts of Jesus were not changed by their words of admiration for the temple.

Matt 24:3
As he sat ( $\kappa \alpha \theta \eta \mu \varepsilon v o v)$. Genitive absolute. Picture of Jesus sitting on the Mount of Olives looking down on Jerusalem and the temple which he had just left. After the climb up the mountain four of the disciples (Peter, James, John, Andrew) come to Jesus with the problem raised by his solemn words. They ask these questions about the destruction of Jerusalem and the temple, his own second coming ( $\pi \alpha \rho o v \sigma i \alpha$, presence, common in the papyri for the visit of the emperor), and the end of the world. Did they think that they were all to take place simultaneously? There is no way to answer. At any rate Jesus treats all three in this great eschatological discourse, the most difficult problem in the Synoptic Gospels. Many theories are advanced that impugn the knowledge of Jesus or of the writers or of both. It is sufficient for our purpose to think of Jesus as using the destruction of the temple and of Jerusalem which did happen in that generation in A.D. 70, as also a symbol of his own second coming and of the end of the world ( $\sigma v \nu \tau \varepsilon \lambda \varepsilon เ \propto \varsigma ~ \tau o v ~ \alpha \iota \omega v o \varsigma$ ) or consummation of the age. In a painting the artist by skilful perspective may give on the same surface the inside of a room, the fields outside the window, and the sky far beyond. Certainly in this discourse Jesus blends in apocalyptic language the background of his death on the cross, the coming destruction of Jerusalem, his own second coming and the end of the world. He now touches one, now the other. It is not easy for us to separate clearly the various items. It is enough if we get the picture as a whole as it is here drawn with its lessons of warning to be ready for his coming and the end. The destruction of Jerusalem came as he foretold. There are some who would date the Synoptic Gospels after A.D. 70 in order to avoid the predictive element involved in the earlier date. But that is to limit the fore-knowledge of Jesus to a merely human
basis. The word $\pi \alpha \rho o v \sigma \iota \alpha$ occurs in this chapter alone $(3,27,37,39)$ in the Gospels, but often in the Epistles, either of presence as opposed to absence (Php 2:12) or the second coming of Christ (2Th 2:1).

Matt 24:4
Lead you astray ( $v \mu \alpha \varsigma \pi \lambda \alpha \nu \eta \sigma \eta$ ). This warning runs all through the discourse. It is amazing how successful deceivers have been through the ages with their eschatological programs. The word in the passive appears in 18:12 when the one sheep wanders astray. Here it is the active voice with the causative sense to lead astray. Our word planet comes from this root.

Matt 24:5
In my name $(\varepsilon \pi \tau \omega$ ovo $\mu \alpha \tau \mu o v)$. They will arrogate to themselves false claims of Messiahship in (on the basis of) the name of Christ himself. Josephus (Wars VI, 54) gives there false Christs as one of the reasons for the explosion against Rome that led to the city's destruction. Each new hero was welcomed by the masses including Barcochba. "I am the Messiah," each would say. Forty odd years ago two men in Illinois claimed to be Messiah, each with followers (Schlatter, Schweinfurth). In more recent years Mrs. Annie Besant has introduced a theosophical Messiah and Mrs. Eddy made claims about herself on a par with those of Jesus.

Matt 24:6
See that ye be not troubled (o $0 \alpha \tau \varepsilon \mu \eta \theta \rho о \varepsilon \iota \sigma \theta \varepsilon$ ). Asyndeton here with these two imperatives as Mr 8:15 o $0 \alpha \tau \varepsilon \beta \lambda \varepsilon \pi \varepsilon \tau \varepsilon$ (Robertson, Grammar, p. 949). Look out for the wars and rumours of wars, but do not be scared out of your wits by them. $\Theta \rho o \varepsilon \omega$ means to cry aloud, to scream, and in the passive to be terrified by an outcry. Paul uses this very verb ( $\mu \eta \delta \varepsilon \theta \rho \circ \varepsilon \iota \sigma \theta \alpha$ ) in 2Th 2:2 as a warning against excitement over false reports that he had predicted the immediate second coming of Christ.
 these words of Jesus and proceed to set dates for the immediate end. That happened during the Great War and it has happened since.

Matt 24:8
The beginning of travail ( $\alpha \rho \chi \eta o \delta t \nu \omega \nu$ ). The word means birth-pangs and the Jews used the very phrase for the sufferings of the Messiah which were to come before the coming of the Messiah (Book of Jubilees, 23:18; Apoc. of Baruch 27-29). But the word occurs with no idea of birth as the pains of death (Ps 18:5; Ac 2:24). These woes, says Jesus, are not a proof of the end, but of the beginning.

Matt 24:9
Ye shall be hated $(\varepsilon \sigma \varepsilon \sigma \theta \varepsilon \mu \sigma \sigma o v \mu \varepsilon v o)$. Periphrastic future passive to emphasize the continuous process of the linear action. For tribulation ( $\theta \lambda \iota \psi \iota \nu$ see 13:21), a word common
in the Acts, Epistles, and Apocalypse for the oppression (pressure) that the Christians received.

For my name's sake ( $\delta \iota \alpha$ тo ovo $\mu \alpha \mu \circ v$ ). The most glorious name in the world today, but soon to be a byword of shame (Ac 5:41). The disciples would count it an honour to be dishonoured for the Name's sake.

Matt 24:11
False prophets ( $\psi \varepsilon \cup \delta о \pi \rho о \varphi \eta \tau \alpha$ ). Jesus had warned against them in the Sermon on the Mount ( 7:15). They are still coming.

Matt 24:12
Shall wax cold ( $\psi v \gamma \eta \sigma \varepsilon \tau \alpha$ ). Second future passive indicative from $\psi v \chi \omega$. To breathe cool by blowing, to grow cold, "spiritual energy blighted or chilled by a malign or poisonous wind" (Vincent).

The love of many ( $\eta \alpha \gamma a \pi \eta \tau \omega v \pi \sigma \lambda \lambda \omega v$ ). Love of the brotherhood gives way to mutual hatred and suspicion.

Matt 24:14
Shall be preached (кعрихӨ $\eta \sigma \varepsilon \tau \alpha$ ). Heralded in all the inhabited world. $E v$ o $\lambda \eta \tau \eta$ oккоu$\mu \varepsilon v \eta$ supply $\gamma \eta$. It is not here said that all will be saved nor must this language be given too literal and detailed an application to every individual.

## Matt 24:15

The abomination of desolation ( $\tau$ о $\beta \delta \varepsilon \lambda \nu \gamma \mu \alpha \tau \eta \varsigma \varepsilon \rho \varepsilon \mu \omega \sigma \varepsilon \omega \varsigma$ ). An allusion to Da 9:27; 11:31; 12:11. Antiochus Epiphanes erected an altar to Zeus on the altar of Jehovah (1Macc. 1:54,59; 6:7; 2Macc. 6:1-5). The desolation in the mind of Jesus is apparently the Roman army ( $\mathrm{Lu} 21: 20$ ) in the temple, an application of the words of Daniel to this dread event. The verb $\beta \delta \varepsilon \lambda \nu \sigma \sigma o \mu \alpha$ is to feel nausea because of stench, to abhor, to detest. Idolatry was a stench to God (Lu 16:15; Re 17:4). Josephus tells us that the Romans burned the temple and offered sacrifices to their ensigns placed by the eastern gate when they proclaimed Titus as Emperor.

Let him that readeth understand (o $\alpha v \alpha \gamma เ v o \sigma \kappa \omega v$ vosit $\omega$ ). This parenthesis occurs also in Mr 13:14. It is not to be supposed that Jesus used these words. They were inserted by Mark as he wrote his book and he was followed by Matthew.

## Matt 24:16

Flee unto the mountains ( $\varphi \varepsilon \cup \gamma \varepsilon \tau \omega \sigma \alpha \nu \varepsilon \varsigma \varsigma \tau \alpha$ о $\bar{\eta}$ ). The mountains east of the Jordan. Eusebius (H.E. iii,5,3) says that the Christians actually fled to Pella at the foot of the mountains about seventeen miles south of the Sea of Galilee. They remembered the warning of Jesus and fled for safety.

Matt 24:17
On the housetop ( $\varepsilon \pi$ tov $\delta \omega \mu \alpha \tau \sigma \varsigma)$. They could escape from roof to roof and so escape, "the road of the roofs," as the rabbis called it. There was need for haste.

## Matt 24:18

In the field $(\varepsilon v \tau \omega \alpha \gamma \rho \omega)$. The peasant worked in his time and left his mantle at home then as now.

Matt 24:20
In winter nor on a sabbath $(\chi \varepsilon \mu \omega \nu \circ \varsigma$, genitive of time, $\mu \eta \delta \varepsilon \sigma \alpha \beta \beta \alpha \tau \omega$, locative of time). In winter because of the rough weather. On a sabbath because some would hesitate to make such a journey on the sabbath. Josephus in his Wars gives the best illustration of the horrors foretold by Jesus in verse 21.

Matt 24:22
Had been shortened ( $\varepsilon \kappa о \lambda о \beta \omega \theta \eta \sigma \alpha v$ ). From ко $\lambda о \beta$ оऽ, lopped, mutilated, as the hands, the feet. It is a second-class condition, determined as unfulfilled. It is a prophetic figure, the future regarded as past.

For the elect's sake ( $\delta \iota \alpha$ тоvৎ $\varepsilon \kappa \lambda \varepsilon \kappa \tau о \nu \varsigma)$. See Mt 22:14 for another use of this phrase by Jesus and also 24:31. The siege was shortened by various historical events like the stopping of the strengthening of the walls by Herod Agrippa by orders from the Emperor, the sudden arrival of Titus, the neglect of the Jews to prepare for a long siege. "Titus himself confessed that God was against the Jews, since otherwise neither his armies nor his engines would have availed against their defences" (Vincent).

## Matt 24:23

Lo, here is the Christ, or here ( $\delta \delta o v \omega \delta \varepsilon$ o X $\operatorname{X\rho } \sigma \tau \circ \varsigma \eta \omega \delta \varepsilon$ ). The false prophets (24:11) create the trouble and now false Christs ( $\psi \varepsilon v \delta o-X \rho \iota \sigma \tau о$, verse 24 ) offer a way out of these troubles. The deluded victims raise the cries of "Lo, here," when these false Messiahs arise with their panaceas for public ills (political, religious, moral, and spiritual).

Matt 24:24
Great signs and wonders ( $\sigma \eta \mu \varepsilon \iota \alpha \mu \varepsilon \gamma \alpha \lambda \alpha \kappa \alpha \tau \varepsilon \rho \alpha \tau \alpha)$. Two of the three words so often used in the N.T. about the works ( $\varepsilon \rho \gamma \alpha$ ) of Jesus, the other being $\delta v v a \mu \varepsilon ı \varsigma ~(p o w e r s) . ~ T h e y ~$ often occur together of the same work (Joh 4:48; Ac 2:22; 4:30; 2Co 12:12; Heb 2:4 ). Tع $\quad$ as is a wonder or prodigy, $\delta v v a \mu \iota$, a mighty work or power, $\sigma \eta \mu \varepsilon \iota o v$, a sign of God's purpose. Miracle ( $\mu \iota \rho \nless \nu \lambda \nu \mu)$ presents only the notion of wonder or portent. The same deed can be looked at from these different angles. But the point to note here is that mere "signs and wonders" do not of themselves prove the power of God. These charlatans will be so skilful that they will,
if possible ( $\varepsilon \delta v v a \tau o v$ ), lead astray the very elect. The implication is that it is not possible. People become excited and are misled and are unable to judge of results. Often it is post hoc, sed non propter hoc. Patent-medicine men make full use of the credulity of people along this line as do spiritualistic mediums. Sleight-of-hand men can deceive the unwary.

Matt 24:26
In the wilderness $(\varepsilon \nu \tau \eta \varepsilon \rho \eta \mu \omega)$. Like Simon son of Gioras (Josephus, War, IV,9,5,\&7).

In the inner chambers ( $\varepsilon v$ тoıৎ $\tau \alpha \mu \varepsilon ı \iota \varsigma)$. Like John of Giscala (Josephus, War, V,6,1). False Messiahs act the role of the Great Unseen and Unknown.

Matt 24:27
As seen ( $\varphi \alpha, v \varepsilon \tau \alpha$ ). Visible in contrast to the invisibility of the false Messiahs. Cf. Re 1:7. Like a flash of lightning.

Matt 24:28
Carcase $(\pi \tau \omega \mu \alpha)$. As in $14: 12$, the corpse. Originally a fallen body from $\pi \iota \pi \tau \omega$, to fall, like Latin cadaver from cado, to fall. The proverb here as in Lu 17:37, is like that in Job 39:30; $\operatorname{Pr} 30: 17$.

Eagles (aعto). Perhaps the griffon vulture, larger than the eagle, which (Aristotle) was often seen in the wake of an army and followed Napoleon's retreat from Russia.

Matt 24:29
Immediately $(\varepsilon v \theta \varepsilon \omega \varsigma)$. This word, common in Mark's Gospel as $\varepsilon v \theta v \varsigma$, gives trouble if one stresses the time element. The problem is how much time intervenes between "the tribulation of those days" and the vivid symbolism of verse 29. The use of $\varepsilon v \tau \alpha \chi \varepsilon$ in $\operatorname{Re} 1: 1$ should make one pause before he decides. Here we have a prophetic panorama like that with foreshortened perspective. The apocalyptic pictures in verse 29 also call for sobriety of judgment. One may compare Joel's prophecy as interpreted by Peter in Ac 21:16-22 . Literalism is not appropriate in this apocalyptic eschatology.

Matt 24:30
The sign of the Son of Man in heaven ( $\tau 0 \sigma \eta \mu \varepsilon \iota \circ v \tau o v$ vıov $\tau 0 v a v \theta \rho \omega \pi \sigma v \varepsilon v$ ov $\rho \alpha v \omega$ ). Many theories have been suggested like the cross in the sky, etc. Bruce sees a reference to Da 7:13 "one like the Son of man" and holds that Christ himself is the sign in question (the genitive of apposition). This is certainly possible. It is confirmed by the rest of the verse: "They shall see the Son of man coming." See Mt 16:27; 26:64. The Jews had repeatedly asked for such a sign (Broadus) as in Mt 12:38; 16:1; Joh 2:18 .

Matt 24:31
With a great sound of a trumpet ( $\mu \varepsilon \tau \alpha \sigma \alpha \lambda \pi \iota \gamma \gamma \circ \varsigma \varphi \omega \nu \eta \varsigma \mu \varepsilon \gamma \alpha \lambda \eta \varsigma)$. Some MSS. omit ( $\varphi \omega \vee \eta \varsigma$ ) "sound." The trumpet was the signal employed to call the hosts of Israel to march as to war and is common in prophetic imagery (Isa 27:13). Cf. the seventh angel ( $\operatorname{Re}$ 11:15 ). Clearly "the coming of the son of man is not to be identified with the judgment of Jerusalem but rather forms its preternatural background" (Bruce).

Matt 24:32
Putteth forth its leaves ( $\tau \alpha \varphi \cup \lambda \lambda \alpha \varepsilon \kappa \varphi \cup \eta$ ). Present active subjunctive according to Westcott and Hort. If accented $\varepsilon \kappa \varphi \cup \eta$ (last syllable), it is second aorist passive subjunctive (Erasmus).

Matt 24:34

This generation ( $\eta \gamma \varepsilon v \varepsilon \alpha \alpha \cup \tau \eta$ ). The problem is whether Jesus is here referring to the destruction of Jerusalem or to the second coming and end of the world. If to the destruction of Jerusalem, there was a literal fulfilment. In the Old Testament a generation was reckoned as forty years. This is the natural way to take verse 34 as of 33 (Bruce), "all things" meaning the same in both verses.

Matt 24:36
Not even the Son (ov $\varepsilon$ o vioc). Probably genuine, though absent in some ancient MSS. The idea is really involved in the words "but the Father only" ( $\varepsilon \mu \eta$ о $\pi \alpha \tau \eta \rho \mu$ оvoc). It is equally clear that in this verse Jesus has in mind the time of his second coming. He had plainly stated in verse 34 that those events (destruction of Jerusalem) would take place in that generation. He now as pointedly states that no one but the Father knows the day or the hour when these things (the second coming and the end of the world) will come to pass. One may, of course, accuse Jesus of hopeless confusion or extend his confession of ignorance of the date of the second coming to the whole chain of events. So McNeile: "It is impossible to escape the conclusion that Jesus as Man, expected the End, within the lifetime of his contemporaries." And that after his explicit denial that he knew anything of the kind! It is just as easy to attribute ignorance to modern scholars with their various theories as to Jesus who admits his ignorance of the date, but not of the character of the coming.

Matt 24:37
The days of Noah ( $\alpha \eta \mu \varepsilon \rho \alpha$ tov $N \omega \varepsilon$ ). Jesus had used this same imagery before to the Pharisees (Lu 17:26-30). In Noah's day there was plenty of warning, but utter unpreparedness. Most people are either indifferent about the second coming or have fanciful schemes or programs about it. Few are really eager and expectant and leave to God the time and the plans.

Matt 24:38
Were eating ( $\eta \sigma \alpha \nu \tau \rho \omega \gamma 0 \nu \tau \varepsilon \varsigma)$. Periphrastic imperfect. The verb means to chew raw vegetables or fruits like nuts or almonds.

Matt 24:41
At the mill $(\varepsilon \nu \tau \omega \mu \nu \lambda \omega)$. So Westcott and Hort and not $\mu \nu \lambda \omega \nu$ (millhouse) Textus Receptus. The millstone and then hand-mill which was turned by two women ( $\alpha \lambda \eta \theta$ ovo $\alpha$ ) as in Ex 11:5. This verb is a late form for $\alpha \lambda \varepsilon \omega$. There was a handle near the edge of the upper stone.

Matt 24:42
Watch therefore ( $\gamma \rho \eta \gamma \omega \rho \varepsilon \iota \tau \varepsilon$ ouv). A late present imperative from the second perfect $\varepsilon \gamma \rho \eta \gamma \quad \rho \alpha$ from $\varepsilon \gamma \varepsilon \iota \rho \omega$. Keep awake, be on the watch "therefore" because of the uncertainty of the time of the second coming. Jesus gives a half dozen parables to enforce the point of this exhortation (the Porter, the Master of the House, the Faithful Servant and the Evil Ser-
vants, the Ten Virgins, the Talents, the Sheep and the Goats). Matthew does not give the Parable of the Porter (Mr 13:35-37).

Matt 24:43
In what watch ( $\pi$ оь $\varphi \cup \lambda \alpha \kappa \eta$ ). As in 14:25 (four watches of the night).
Broken through ( $\delta$ ro $\rho v \chi \theta \eta v \alpha$ ). Digged through the tile roof or under the floor (dirt in the poorer houses).

Matt 24:44
That ye think not ( $\eta$ ov $\delta$ окعı $\tau \varepsilon \omega \rho \alpha$ ). It is useless to set the day and hour for Christ's coming. It is folly to neglect it. This figure of the thief will be used also by Paul concerning the unexpectedness of Christ's second coming (1Th 5:2 ). See also Mt 24:50 for the unexpectedness of the coming with punishment for the evil servant.

Matt 24:48
My lord tarrieth ( $\chi \rho \circ \vee \iota \zeta \varepsilon \mu \circ v$ o кирıос). That is the temptation and to give way to indulge in fleshly appetites or to pride of superior intellect. Within a generation scoffers will be asking where is the promise of the coming of Christ (2Pe 3:4). They will forget that God's clock is not like our clock and that a day with the Lord may be a thousand years or a thousand years as one day ( $2 \mathrm{Pe} 3: 8$ ).

## Matthew 25

Matt 25:1
Ten virgins ( $\delta \varepsilon \kappa \alpha \pi \alpha \rho \theta \varepsilon v o \iota \varsigma)$. No special point in the number ten. The scene is apparently centered round the house of the bride to which the bridegroom is coming for the wedding festivities. But Plummer places the scene near the house of the bridegroom who has gone to bring the bride home. It is not pertinent to the point of the parable to settle it.

Lamps ( $\lambda \alpha \mu \pi \alpha \delta a \varsigma)$. Probably torches with a wooden staff and a dish on top in which was placed a piece of rope or cloth dipped in oil or pitch. But sometimes $\lambda \alpha \mu \pi \alpha \varsigma$ has the meaning of oil lamp ( $\lambda \cup \chi \vee \circ \varsigma)$ as in Ac 20:8. That may be the meaning here (Rutherford, New Phrynichus).

Matt 25:3
Took no oil with them (ovk $\left.\varepsilon \lambda \alpha \beta o v \mu \varepsilon \theta^{\prime} \varepsilon \alpha \nu \tau \omega \nu \varepsilon \lambda \alpha \iota v\right)$ ). Probably none at all, not realizing their lack of oil till they lit the torches on the arrival of the bridegroom and his party.

Matt 25:4
In their vessels ( $\varepsilon v \tau$ тоı $\alpha \gamma \gamma \varepsilon เ о \iota \varsigma)$. Here alone in the N.T., through $\alpha \gamma \gamma \eta$ in 13:48. Extra supply in these receptacles besides the oil in the dish on top of the staff.

Matt 25:5
They all slumbered and slept ( $\varepsilon v v \sigma \tau \alpha \xi \alpha v \pi \alpha \sigma \alpha \kappa \alpha \varepsilon \kappa \alpha \theta \varepsilon v \delta o v)$. They dropped off to sleep, nodded (ingressive aorist) and then went on sleeping (imperfect, linear action), a vivid picture drawn by the difference in the two tenses. Many a preacher has seen this happen while he is preaching.

Matt 25:6
There is a cry ( $\kappa \rho \alpha v \gamma \eta \gamma \varepsilon \gamma о \nu \varepsilon v)$. A cry has come. Dramatic use of the present perfect (second perfect active) indicative, not the perfect for the aorist. It is not $\varepsilon \sigma \tau \iota \nu$, but $\gamma \varepsilon \gamma o v \varepsilon \nu$ which emphasizes the sudden outcry which has rent the air. The very memory of it is preserved by this tense with all the bustle and confusion, the rushing to the oil-venders.

Come ye forth to meet him ( $\varepsilon \xi \varepsilon \rho \chi \varepsilon \sigma \theta \varepsilon \varepsilon \iota \varsigma \alpha \pi \alpha v \tau \eta \sigma \iota)$. Or, Go out for meeting him, dependent on whether the cry comes from outside the house or inside the house where they were sleeping because of the delay. It was a ceremonial salutation neatly expressed by the Greek phrase.

Matt 25:7
Trimmed ( $\varepsilon \kappa о \sigma \mu \eta \sigma \alpha v$ ). Put in order, made ready. The wicks were trimmed, the lights being out while they slept, fresh oil put in the dish, and lit again. A marriage ceremony in India is described by Ward (View of the Hindoos) in Trench's Parables: "After waiting two or three hours, at length near midnight it was announced, as in the very words of Scripture, 'Behold the bridegroom cometh; go ye out to meet him.'"

Matt 25:8
Are going out ( $\sigma \beta \varepsilon v v v_{\tau \tau \alpha}$ ). Present middle indicative of linear action, not punctiliar or aoristic. When the five foolish virgins lit their lamps, they discovered the lack of oil. The sputtering, flickering, smoking wicks were a sad revelation. "And perhaps we are to understand that there is something in the coincidence of the lamps going out just as the Bridegroom arrived. Mere outward religion is found to have no illuminating power" (Plummer).

Matt 25:9
Peradventure there will not be enough for us and you ( $\mu \eta \pi о \tau \varepsilon$ оv $\mu \eta$ р $\rho \kappa \varepsilon \sigma \varepsilon ~ \eta \mu \nu v \kappa \alpha$ $v \mu \nu v)$. There is an elliptical construction here that is not easy of explanation. Some MSS. Aleph A L Z have ovk instead of ov $\mu \eta$. But even so $\mu \eta \pi \sigma \tau \varepsilon$ has to be explained either by supplying an imperative like $\gamma \iota v \varepsilon \sigma \theta \omega$ or by a verb of fearing like $\varphi \circ \beta \circ \nu \mu \varepsilon \theta \alpha$ (this most likely). Either ouk or ov $\mu \eta$ would be proper with the futuristic subjunctive $\alpha \rho \kappa \varepsilon \sigma \varepsilon$ (Moulton, Prolegomena, p. 192; Robertson, Grammar, pp. 1161,1174). "We are afraid that there is no possibility of there being enough for us both." This is a denial of oil by the wise virgins because there was not enough for both. "It was necessary to show that the foolish virgins could not have the consequences of their folly averted at the last moment" (Plummer). It is a courteous reply, but it is decisive. The compound Greek negatives are very expressive, $\mu \eta \pi о \tau \varepsilon-$-ov $\mu \eta$.

Matt 25:10
And while they went away ( $\alpha \pi \varepsilon \rho \chi \circ \mu \varepsilon v \omega v \delta \varepsilon \alpha v \tau \omega v$ ). Present middle participle, genitive absolute, while they were going away, descriptive linear action. Picture of their inevitable folly.

Was shut ( $\varepsilon \kappa \lambda \varepsilon เ \sigma \theta \eta)$. Effective aorist passive indicative, shut to stay shut.
Matt 25:11
Afterward (vбтє $\rho \circ v$ ). And find the door shut in their faces.
Lord, Lord, open to us (Kvpıє, Kvpıє, avoı\}ov $\eta \mu \nu \nu$ ). They appeal to the bridegroom who is now master whether he is at the bride's house or his own.

Matt 25:12
I know you not (ovk ot $\delta \alpha$ v $\mu \propto \varsigma$ ). Hence there was no reason for special or unusual favours to be granted them. They must abide the consequences of their own negligence.

Matt 25:13
Watch therefore ( $\gamma \rho \eta \gamma$ орєוtع ouv). This is the refrain with all the parables. Lack of foresight is inexcusable. Ignorance of the time of the second coming is not an excuse for neglect, but a reason for readiness. Every preacher goes up against this trait in human nature, putting off till another time what should be done today.

Matt 25:14
Going into another country ( $\alpha \pi \sigma \delta \eta \mu \omega v$ ). About to go away from one's people ( $\delta \eta \mu \sigma \varsigma)$, on the point of going abroad. This word in ancient use in this sense. There is an ellipse here that has to be supplied,

## It is as when or

The kingdom of heaven is as when. This Parable of the Talents is quite similar to the Parable of the Pounds in Lu 19:11-28, but they are not variations of the same story. Some scholars credit Jesus with very little versatility.

His goods ( $\tau \alpha \cup \pi \alpha \rho \chi 0 v \tau \alpha \alpha v \tau 0 v)$. His belongings, neuter participle used as a substantive.
Matt 25:15
To one $(\omega \mu \varepsilon v, \omega \delta \varepsilon, \omega \delta \varepsilon)$. Demonstrative os, not the relative. Neat Greek idiom.
According to his several ability ( $\kappa \alpha \tau \alpha \tau \eta v \iota \delta \iota \alpha \nu \delta v \nu \alpha \mu v)$ ). According to his own ability. Each had all that he was capable of handling. The use that one makes of his opportunities is the measure of his capacity for more. One talent represented a considerable amount of money at that time when a $\delta \varepsilon v a \rho \iota u s$ was a day's wage. See on 18:24 for the value of a talent.

Matt 25:16
Straightway $(\varepsilon \cup \theta \varepsilon \omega \varsigma)$. Beginning of verse 16 , not the end of verse 15 . The business temper of this slave is shown by his promptness.

With them ( $\varepsilon v \alpha \cup \tau o ぃ)$. Instrumental use of $\varepsilon v$. He worked ( $\eta \rho \gamma \alpha \sigma \alpha \tau o$ ), did business, traded with them. "The virgins wait, the servants work" (Vincent).

Made ( $\varepsilon \pi о \iota \eta \sigma \varepsilon v$ ). But Westcott and Hort read $\varepsilon \kappa \varepsilon \rho \delta \eta \sigma \varepsilon \nu$, gained, as in verse 17. K $\varepsilon \rho \delta o \varsigma$ means interest. This gain was a hundred per cent.

Matt 25:19
Maketh a reckoning ( $\sigma v \sim \alpha \iota \rho \varepsilon$ $\lambda o \gamma o v$ ). As in 18:23. Deissmann (Light from the Ancient East, p. 117) gives two papyri quotations with this very business idiom and one Nubian ostracon with it. The ancient Greek writers do not show it.

Matt 25:21
 feast on the master's return. So in verse 23 .

Matt 25:24
That had received the one talent (o тo $\tau \alpha \lambda \varepsilon v \tau \sigma \nu \varepsilon \iota \lambda \eta \varphi \omega \varsigma)$. Note the perfect active participle to emphasize the fact that he still had it. In verse 20 we have o-- $\lambda \alpha \beta \omega \nu$ (aorist active participle).

I knew thee $(\varepsilon \gamma \nu \omega v \sigma \varepsilon)$. Second aorist active indicative. Experimental knowledge ( $\gamma \iota \omega \sigma \kappa \omega$ ) and proleptical use of $\sigma \varepsilon$.

A hard man ( $\sigma \kappa \lambda \eta \rho \circ \varsigma)$. Harsh, stern, rough man, worse than $\alpha v \sigma \tau \eta \rho \circ \varsigma$ in Lu 19:21, grasping and ungenerous.

Where thou didst not scatter ( $\mathrm{o} \theta \varepsilon v$ ov $\delta \iota \varepsilon \sigma \kappa о \rho \pi \iota \sigma \alpha \varsigma$ ). But this scattering was the chaff from which wheat was winnowed, not the scattering of seed.

Matt 25:26

Thou wicked and slothful servant ( $\pi о v \eta \rho \varepsilon \delta о \cup \lambda \varepsilon \kappa \alpha$ окv $\rho \varepsilon \varepsilon$ ). From $\pi о v o \varsigma$ (work, annoyance, disturbance, evil) and oкve $\omega$ (to be slow, "poky," slothful). Westcott and Hort make a question out of this reply to the end of verse 26. It is sarcasm.

Matt 25:27
Thou oughtest therefore ( $\varepsilon \delta \sigma \sigma \varepsilon \sigma v v$ ). His very words of excuse convict him. It was a necessity $(\varepsilon \delta \varepsilon)$ that he did not see.

The bankers (тоıৎ $\tau \rho \alpha \pi \varepsilon$ (દıтаıऽ). The benchers, money-changers, brokers, who exchanged money for a fee and who paid interest on money. Word common in late Greek.

I should have received back ( $\varepsilon \gamma \omega \varepsilon \kappa о \mu \tau \sigma \alpha \mu \eta \nu \alpha v$ ). Conclusion of a condition of the second class (determined as unfulfilled). The condition is not expressed, but it is implied. "If you had done that."

With interest ( $\sigma \cup v \tau о \kappa \omega$ ). Not with "usury" in the sense of extortion or oppression. Usury only means "use" in itself. The word is from $\tau ו \kappa \tau \omega$, to bring forth. Compound interest at six per cent doubles the principal every twenty years. It is amazing how rapidly that piles up if one carries it on for centuries and millenniums. "In the early Roman Empire legal interest was eight per cent, but in usurious transactions it was lent at twelve, twenty-four, and even forty-eight" (Vincent). Such practices exist today in our cities. The Mosaic law did not allow interest in dealings between Hebrews, but only with strangers (De 23:19,20; Ps 15:5 ).

Matt 25:30
 itable, injurious. Doing nothing is doing harm.

Matt 25:32
All the nations (panta ta ethn区). Not just Gentiles, but Jews also. Christians and nonChristians. This program for the general judgment has been challenged by some scholars who regard it as a composition by the evangelist to exalt Christ. But why should not Christ say this if he is the Son of Man and the Son of God and realized it? A "reduced" Christ has trouble with all the Gospels, not merely with the Fourth Gospel, and no less with Q and Mark than with Matthew and Luke. This is a majestic picture with which to close the series of parables about readiness for the second coming. Here is the program when he does come. "I am aware that doubt is thrown on this passage by some critics. But the doubt is most wanton. Where is the second brain that could have invented anything so original and so sublime as vv. 35-40,42-45 ?" (Sanday, Life of Christ in Recent Research, p. 128).

As the shepherd separates ( $\omega \sigma \pi \varepsilon \rho$ о $\pi о \not \mu \eta \nu \alpha \varphi о \rho \iota(\varepsilon)$. A common figure in Palestine. The sheep are usually white and the goats black. There are kids ( $\varepsilon \rho \iota \varphi \omega v, \varepsilon \rho \iota \varphi \iota \alpha)$ which have grazed together. The goats devastate a field of all herbage. "Indeed they have extirpated many species of trees which once covered the hills" (Tristram, Natural History of the Bible,
pp. 89f.). The shepherd stands at the gate and taps the sheep to go to the right and the goats to the left.

Matt 25:34
From the foundation of the world ( $\alpha \pi о ~ к \alpha \tau \alpha \beta о \lambda \eta \varsigma ~ к о \sigma \mu о v$ ). The eternal purpose of the Father for his elect in all the nations. The Son of Man in verse 31 is the King here seated on the throne in judgment.

Matt 25:36
Clothed me ( $\pi \varepsilon \rho เ \varepsilon \beta \alpha \lambda \varepsilon \tau \varepsilon \mu \varepsilon$ ). Second aorist middle indicative, cast something around me.

Visited me ( $\varepsilon \pi \varepsilon \sigma \kappa \varepsilon \psi \alpha \sigma \theta \varepsilon \mu \varepsilon$ ). Looked after, came to see. Our "visit" is from Latin viso, video. Cf. our English "go to see."

Matt 25:40
Ye did it unto me ( $\varepsilon \mu$ о $\varepsilon \pi о п \eta \sigma \alpha \tau \varepsilon)$. Dative of personal interest. Christ identifies himself with the needy and the suffering. This conduct is proof of possession of love for Christ and likeness to him.

Matt 25:42
No meat (ouk $\varepsilon \delta \omega \kappa \alpha \tau \varepsilon \mu о \varphi \alpha \gamma \varepsilon ı v$ ). You did not give me anything to eat. The repetition of the negative ov in 42 and 43 is like the falling of clods on the coffin or the tomb. It is curious the surprise here shown both by the sheep and the goats. Some sheep will think that they are goats and some goats will think that they are sheep.

Matt 25:46
Eternal punishment (ко入абıv al $\omega v \iota \circ$ ). The word ко $\lambda \alpha \sigma \iota v$ comes from ко $\lambda \alpha \zeta \omega$, to mutilate or prune. Hence those who cling to the larger hope use this phrase to mean agelong pruning that ultimately leads to salvation of the goats, as disciplinary rather than penal. There is such a distinction as Aristotle pointed out between $\mu \omega \rho ı \alpha$ (vengeance) and кo $\lambda \alpha \sigma \iota s$. But the same adjective $\alpha \omega \omega v$ oc is used with кo入 $\alpha \sigma ı v$ and $\zeta \omega \eta \nu$. If by etymology we limit the scope of co $\alpha \sigma \sigma \tau$, we may likewise have only age-long $\zeta \omega \eta \nu$. There is not the slightest indication in the words of Jesus here that the punishment is not coeval with the life. We can leave all this to the King himself who is the Judge. The difficulty to one's mind about conditional chastisement is to think how a life of $\sin$ in hell can be changed into a life of love and obedience. The word $\alpha \iota \omega v$ loc (from $\alpha \omega \omega v$, age, $\alpha \varepsilon \varsigma \nu \mu, \alpha \varepsilon$ ) means either without beginning or without end or both. It comes as near to the idea of eternal as the Greek can put it in one word. It is a difficult idea to put into language. Sometimes we have "ages of ages" (au $\omega v \varepsilon$, $\tau \omega v \alpha \omega \nu \omega v)$.

Matt 26:2
Cometh ( $\gamma / v \varepsilon \tau \alpha)$. Futuristic use of the present middle indicative. This was probably our Tuesday evening (beginning of Jewish Wednesday). The passover began on our Thursday evening (beginning of Jewish Friday).

After two days ( $\mu \varepsilon \tau \alpha \delta v o \eta \mu \varepsilon \rho a \varsigma$ ) is just the familiar popular mode of speech. The passover came technically on the second day from this time.

Is delivered up ( $\pi \alpha \rho \alpha \delta \iota \delta o \tau \alpha$ ). Another instance of the futuristic present passive indicative. The same form occurs in verse 24 . Thus Jesus sets a definite date for the coming crucifixion which he has been predicting for six months.

Matt 26:3
Then were gathered together the chief priests and elders of the people (Тотв
 two groups indicate (cf. 21:23).

Unto the court ( $\varepsilon \varsigma \varsigma \tau \eta \nu \alpha \cup \lambda \eta v$ ). The atrium or court around which the palace buildings were built. Here in this open court this informal meeting was held. Caiaphas was high priest A.D. 18 to 36. His father-in-law Annas had been high priest A.D. 6 to 15 and was still called high priest by many.

Matt 26:4
They took counsel together ( $\sigma 0 v \varepsilon \beta$ ou $\lambda \varepsilon \cup \sigma \alpha v \tau 0$ ). Aorist middle indicative, indicating their puzzled state of mind. They have had no trouble in finding Jesus (Joh 11:57). Their problem now is how to
take Jesus by subtilty and kill him (ıva тov I I $\sigma o v v ~ \delta о \lambda \omega ~ к р а \tau \eta \sigma о \sigma ı v ~ к а ~ \alpha \pi о к \tau \varepsilon เ v \omega \sigma เ v) . ~$ The Triumphal Entry and the Tuesday debate in the temple revealed the powerful following that Jesus had among the crowds from Galilee.

Matt 26:5
A tumult ( $\theta \mathrm{o} \rho \cup \beta$ os). They feared the uprising in behalf of Jesus and were arguing that the matter must be postponed till after the feast was over when the crowds had scattered. Then they could catch him "by craft" $(\delta \mathrm{o} \lambda \omega)$ as they would trap a wild beast.

Matt 26:6
In the house of Simon the leper ( $\varepsilon v$ oıкıa $\Sigma \iota \mu \omega v \circ \varsigma$ тov $\lambda \varepsilon \pi \rho \circ v$ ). Evidently a man who had been healed of his leprosy by Jesus who gave the feast in honour of Jesus. All sorts of fantastic theories have arisen about it. Some even identify this Simon with the one in Lu 7:36ff. , but Simon was a very common name and the details are very different. Some hold that it was Martha's house because she served (Joh 12:2) and that Simon was either the father or husband of Martha, but Martha loved to serve and that proves nothing. Some identify Mary of Bethany with the sinful woman in Lu 7 and even with Mary Magdalene, both gratuitous and groundless propositions. For the proof that Mary of Bethany, Mary Magdalene, and the sinful woman of Lu 7 are all distinct see my Some Minor Characters in the New Testament. John (Joh 12:1 ) apparently locates the feast six days before the passover, while Mark (Mr 14:3) and Matthew (26:6) seem to place it on the Tuesday evening (Jewish Wednesday) just two days before the passover meal. It is possible that John anticipates the date and notes the feast at Bethany at this time because he does not refer to Bethany again.

If not, the order of Mark must be followed. According to the order of Mark and Matthew, this feast took place at the very time that the Sanhedrin was plotting about the death of Jesus (Mr 14:1f. ).

Matt 26:7
An alabaster cruse of exceeding precious ointment ( $\alpha \lambda \alpha \beta \alpha \sigma \tau \rho o v \mu \nu \rho o v \beta \alpha \rho v \tau \iota \mu \nu v$ ). The flask was of alabaster, a carbonate of lime or sulphate of lime, white or yellow stone, named alabaster from the town in Egypt where it was chiefly found. It was used for a phial employed for precious ointments in ancient writers, inscriptions and papyri just as we speak of a glass for the vessel made of glass. It had a cylindrical form at the top, as a rule, like a closed rosebud (Pliny). Matthew does not say what the ointment ( $\mu \nu \rho \circ v$ ) was, only saying that it was "exceeding precious" ( $\beta \alpha \rho v \tau \mu \circ v$ ), of weighty value, selling at a great price. Here only in the N.T. "An alabaster of nard ( $\mu \nu \rho o v$ ) was a present for a king" (Bruce). It was one of five presents sent by Cambyses to the King of Ethiopia (Herodotus, iii. 20).

She poured it upon his head ( $\kappa \alpha \tau \varepsilon \chi \varepsilon \varepsilon \nu \varepsilon \tau \eta \varsigma \kappa \varepsilon \varphi \alpha \lambda \eta \varsigma \alpha v \tau o v)$. So Mark (Mr 14:3), while John (Joh 12:3 ) says that she "anointed the feet of Jesus." Why not both? The verb $\kappa \alpha \tau \varepsilon \chi \varepsilon \varepsilon v$ is literally to pour down. It is the first aorist active indicative, unusual form.

Matt 26:8
This waste $(\eta \alpha \pi \omega \lambda \varepsilon \iota \alpha \alpha \nu \tau \eta)$. Dead loss $(\alpha \pi \omega \lambda \varepsilon \iota \alpha)$ they considered it, nothing but sentimental aroma. It was a cruel shock to Mary of Bethany to hear this comment. Matthew does not tell as John does (Joh 12:4) that it was Judas who made the point which the rest endorsed. Mark explains that they mentioned "three hundred pence," while Matthew ( $26: 9$ ) only says "for much" ( $\pi 0 \lambda \lambda \mathrm{ov}$ ).

Matt 26:10
Why trouble ye the woman? ( $\tau$ колоиৎ $\pi \alpha \rho \varepsilon \chi \varepsilon \tau \varepsilon \tau \eta ~ \gamma \cup v \alpha \iota \kappa \iota$ ?) A phrase not common in Greek writers, though two examples occur in the papyri for giving trouble. Колос is from $\kappa о \pi \tau \omega$, to beat, smite, cut. It is a beating, trouble, and often work, toil. Jesus champions Mary's act with this striking phrase. It is so hard for some people to allow others liberty for their own personalities to express themselves. It is easy to raise small objections to what we do not like and do not understand.

A good work upon me ( $\varepsilon \rho \gamma \circ \vee \kappa \alpha \lambda \circ \vee \varepsilon \iota \varsigma \varepsilon \mu \varepsilon$ ). A beautiful deed upon Jesus himself.
Matt 26:12
To prepare me for burial ( $\pi \rho \circ \varsigma \tau о \varepsilon \nu \tau \alpha \varphi \iota \alpha \sigma \alpha \mu \varepsilon$ ). Mary alone had understood what Jesus had repeatedly said about his approaching death. The disciples were so wrapped up in their own notions of a political kingdom that they failed utterly to sympathize with Jesus as he faced the cross. But Mary with the woman's fine intuitions did begin to understand and this was her way of expressing her high emotions and loyalty. The word here is the same used in Joh 19:40 about what Joseph of Arimathea and Nicodemus did for the body of Jesus before burial with the addition of $\pi \rho o \varsigma$ to showing the purpose of Mary (the infinitive of
purpose). Mary was vindicated by Jesus and her noble deed has become a "memorial of her" ( $\varepsilon \varsigma \varsigma ~ \mu \nu \eta \mu \circ \sigma \cup \mu \circ v \alpha \cup \tau \eta \varsigma)$ as well as of Jesus.

Matt 26:15
What are ye willing to give me? ( $\tau \in \varepsilon \lambda \varepsilon \tau \varepsilon \mu o \delta o u v \alpha ı$ ?) This "brings out the chaffering aspect of the transaction" (Vincent). "Mary and Judas extreme opposites: she freely spending in love, he willing to sell his Master for money" (Bruce). And her act of love provoked Judas to his despicable deed, this rebuke of Jesus added to all the rest.

And I will deliver him unto you ( $\kappa \alpha \gamma \omega \nu \mu \nu \nu \pi \alpha \rho \alpha \delta \omega \sigma \omega \alpha \nu \tau o v)$. The use of $\kappa \alpha$ with a co-ordinate clause is a colloquialism (common in the Koine as in the Hebrew use of wav. "A colloquialism or a Hebraism, the traitor mean in style as in spirit" (Bruce). The use of $\varepsilon \gamma \omega$ seems to mean "I though one of his disciples will hand him over to you if you give me enough."

They weighed unto him (o $\delta \varepsilon \varepsilon \sigma \tau \eta \sigma \alpha v \alpha v \tau o$ ). They placed the money in the balances or scales. "Coined money was in use, but the shekels may have been weighed out in antique fashion by men careful to do an iniquitous thing in the most orthodox way" (Bruce). It is not known whether the Sanhedrin had offered a reward for the arrest of Jesus or not.

Thirty pieces of silver ( $\tau \rho ı \alpha \kappa о \tau \tau \alpha$ apүv $1 \alpha$ ). A reference to Zec 11:12. If a man's ox gored a servant, he had to pay this amount (Ex 21:32). Some manuscripts have $\sigma \tau \alpha \tau \eta \rho a \varsigma$, (staters). These thirty silver shekels were equal to $120 \delta \varepsilon v a \rho$, less than five English pounds, less than twenty-five dollars, the current price of a slave. There was no doubt contempt for Jesus in the minds of both the Sanhedrin and Judas in this bargain.

Matt 26:16
Sought opportunity ( $\varepsilon \zeta \eta \tau \varepsilon \varepsilon \cup \kappa \alpha \rho ı \alpha v)$. A good chance. Note imperfect tense. Judas went at his business and stuck to it.

Matt 26:17
To eat the passover ( $\varphi \alpha \gamma \varepsilon ⿺ 辶 ~$ to $\pi \alpha \sigma \chi \alpha$ ). There were two feasts rolled into one, the passover feast and the feast of unleavened bread. Either name was employed. Here the passover meal is meant, though in Joh 18:28 it is probable that the passover feast is referred to as the passover meal (the last supper) had already been observed. There is a famous controversy on the apparent disagreement between the Synoptic Gospels and the Fourth Gospel on the date of this last passover meal. My view is that the five passages in John (Joh 13:1f.,27; 18:28; 19:14,31) rightly interpreted agree with the Synoptic Gospels (Mt 26:17,20; Mr 14:12,17; Lu 22:7,14 ) that Jesus ate the passover meal at the regular time about 6 P.M. beginning of 15 Nisan. The passover lamb was slain on the afternoon of 14 Nisan and the meal eaten at sunset the beginning of 15 Nisan. According to this view Jesus ate the passover meal at the regular time and died on the cross the afternoon of 15 Nisan . See my Harmony of the Gospels for Students of the Life of Christ, pp.279-284. The question of the disciples here assumes that
they are to observe the regular passover meal. Note the deliberative subjunctive ( $\varepsilon \tau о \mu \alpha \sigma \omega \mu \varepsilon v)$ after $\theta \varepsilon \lambda \varepsilon ı \varsigma$ with ıva. For the asyndeton see Robertson, Grammar, p. 935.

Matt 26:18
To such a man ( $\pi \rho \circ \varsigma \tau \operatorname{\tau ov} \delta \varepsilon เ v \alpha)$. The only instance in the N.T. of this old Attic idiom. The papyri show it for "Mr. X" and the modern Greek keeps it. Jesus may have indicated the man's name. Mark (Mr 14:13) and Luke (Lu 22:10) describe him as a man bearing a pitcher of water. It may have been the home of Mary the mother of John Mark.

I keep the passover at thy house ( $\pi \rho \circ \varsigma \sigma \varepsilon \pi о \omega \omega \tau 0 \pi \alpha \sigma \chi \alpha$ ). Futuristic present indicative. The use of $\pi \rho o \varsigma \sigma \varepsilon$ for "at thy house" is neat Greek of the classic period. Evidently there was no surprise in this home at the command of Jesus. It was a gracious privilege to serve him thus.

Matt 26:20
He was sitting at meat (avek\&ıтo). He was reclining, lying back on the left side on the couch with the right hand free. Jesus and the Twelve all reclined. The paschal lamb had to be eaten up entirely (Ex 12:4,43).

Matt 26:21
One of you ( $\varepsilon \varsigma \varsigma \xi \nu \mu \omega v$ ). This was a bolt from the blue for all except Judas and he was startled to know that Jesus understood his treacherous bargain.

Matt 26:22
Is it I, Lord? ( $\mu \eta \tau \varepsilon \gamma \omega \varepsilon \mu \mu$, Kvpı₹;). The negative expects the answer No and was natural for all save Judas. But he had to bluff it out by the same form of question (verse 25). The answer of Jesus,

Thou hast said ( $\sigma v \varepsilon ו \pi \alpha \varsigma)$, means Yes.
Matt 26:23
He that dipped (o $\varepsilon \mu \beta \alpha \psi \alpha \varsigma)$. They all dipped their hands, having no knives, forks, or spoons. The aorist participle with the article simply means that the betrayer is the one who dips his hand in the dish ( $\varepsilon v \tau \omega \tau \rho \nu \beta \lambda \iota \omega$ ) or platter with the broth of nuts and raisins and figs into which the bread was dipped before eating. It is plain that Judas was not recognized by the rest as indicated by what Jesus has said. This language means that one of those who had eaten bread with him had violated the rights of hospitality by betraying him. The Arabs today are punctilious on this point. Eating one's bread ties your hands and compels friendship. But Judas knew full well as is shown in verse 25 though the rest apparently did not grasp it.

Matt 26:24
Good were it for that man ( $\kappa \alpha \lambda о \nu \eta \nu \alpha \nu \tau \omega)$. Conclusion of second-class condition even though $\alpha v$ is not expressed. It is not needed with verbs of obligation and necessity. There are some today who seek to palliate the crime of Judas. But Jesus here pronounces
his terrible doom. And Judas heard it and went on with his hellish bargain with the Sanhedrin. Apparently Judas went out at this stage (Joh 13:31).

Matt 26:26
And blessed and brake it ( $\varepsilon v \lambda о \gamma \eta \sigma \alpha \varsigma \varepsilon \kappa \lambda \alpha \sigma \varepsilon v$ ). Special "Grace" in the middle of the passover meal, "as they were eating," for the institution of the Supper. Jesus broke one of the passover wafers or cakes that each might have a piece, not as a symbol of the breaking of his body as the Textus Receptus has it in 1Co 11:24. The correct text there has only to $v \pi \varepsilon \rho \nu \mu \omega v$ without $\kappa \lambda \omega \mu \varepsilon \nu 0 \nu$. As a matter of fact the body of Jesus was not "broken" (Joh 19:33 ) as John expressly states.

This is my body ( $\tau o v \tau o \varepsilon \sigma \tau \iota v ~ \tau o ~ \sigma \omega \mu \alpha \mu \circ v$ ). The bread as a symbol represents the body of Jesus offered for us, "a beautifully simple, pathetic, and poetic symbol of his death" (Bruce). But some have made it "run into fetish worship" (Bruce). Jesus, of course, does not mean that the bread actually becomes his body and is to be worshipped. The purpose of the memorial is to remind us of his death for our sins.

Matt 26:28
The Covenant ( $\tau \eta \varsigma \delta \iota \alpha \theta \eta \kappa \eta \varsigma$ ). The adjective кaıv $\bar{\varsigma}$ in Textus Receptus is not genuine. The covenant is an agreement or contract between two ( $\delta \iota \alpha, \delta v o, \theta \eta \kappa \varepsilon$, from $\tau \iota \theta \eta \mu$ ). It is used also for will (Latin, testamentum) which becomes operative at death (Heb 9:15-17 ). Hence our New Testament. Either covenant or will makes sense here. Covenant is the idea in Heb 7:22; 8:8 and often. In the Hebrew to make a covenant was to cut up the sacrifice and so ratify the agreement (Ge 15:9-18). Lightfoot argues that the word $\delta \iota a \eta \uparrow \varepsilon$ means covenant in the N.T. except in Heb 9:15-17. Jesus here uses the solemn words of Ex 24:8 "the blood of the covenant" at Sinai. "My blood of the covenant" is in contrast with that. This is the New Covenant of Jer 31; Heb 8.

Which is shed for many ( $\tau 0 \pi \varepsilon \rho \pi \sigma \lambda \lambda \omega \nu \varepsilon \kappa \chi \nu v \nu o \mu \varepsilon v o v$ ). A prophetic present passive participle. The act is symbolized by the ordinance. Cf. the purpose of Christ expressed in $20: 28$. There $\alpha v \tau$ and here $\pi \varepsilon \rho$.

Unto remission of sins ( $\varepsilon \iota \varsigma \alpha \varphi \varepsilon \sigma \iota v \alpha \mu \alpha \rho \tau \iota \omega v$ ). This clause is in Matthew alone but it is not to be restricted for that reason. It is the truth. This passage answers all the modern sentimentalism that finds in the teaching of Jesus only pious ethical remarks or eschatological dreamings. He had the definite conception of his death on the cross as the basis of forgiveness of $\sin$. The purpose of the shedding of his blood of the New Covenant was precisely to remove (forgive) sins.

Matt 26:29
When I drink it new with you (o $\tau \alpha v \alpha v \tau o \pi \iota \nu \omega \mu \varepsilon \theta^{\prime} v \mu \omega \nu \kappa \alpha \mu \rho \nu$ ). This language rather implies that Jesus himself partook of the bread and the wine, though it is not distinctly stated. In the Messianic banquet it is not necessary to suppose that Jesus means the language literally, "the fruit of the vine." Deissmann (Bible Studies, pp. 109f.) gives an instance of
$\gamma \varepsilon v \eta \mu \alpha$ used of the vine in a papyrus 230 B.C. The language here employed does not make it obligatory to employ wine rather than pure grape juice if one wishes the other.

Matt 26:30
Sang a hymn ( $\nu \mu \nu \eta \sigma \alpha v \tau \varepsilon \varsigma)$. The Hallel, part of Ps 115-118 . But apparently they did not go out at once to the Garden of Gethsemane. Jesus tarried with them in the Upper Room for the wonderful discourse and prayer in Joh 14-17. They may have gone out to the street after Joh 14:31. It was no longer considered obligatory to remain in the house after the passover meal till morning as at the start (Ex 12:22). Jesus went out to Gethsemane, the garden of the agony, outside of Jerusalem, toward the Mount of Olives.

Matt 26:33
I will never be offended ( $\varepsilon \gamma \omega$ ov $\delta \varepsilon \pi о \tau \varepsilon \sigma \kappa \alpha v \delta \alpha \lambda \iota \sigma \theta \eta \sigma о \mu \alpha)$. "Made to stumble," not "offended." Volitive future passive indicative. Peter ignored the prophecy of the resurrection of Jesus and the promised meeting in Galilee (32). The quotation from Zec 13:7 made no impression on him. He was intent on showing that he was superior to "all" the rest. Judas had turned traitor and all were weak, Peter in particular, little as he knew it. So Jesus has to make it plainer by pointing out "this night" as the time ( 34).

Before the cock crows ( $\pi \rho \iota \nu \alpha \lambda \varepsilon \kappa \tau о \rho \alpha ~ \varphi \omega v \eta \sigma \alpha)$ ). No article in the Greek, "before a cock crow." Mark (Mr 14:30) says that Peter will deny Jesus thrice before the cock crows twice. When one cock crows in the morning, others generally follow. The three denials lasted over an hour. Some scholars hold that chickens were not allowed in Jerusalem by the Jews, but the Romans would have them.

Matt 26:35
Even if I must die with thee ( $\kappa \boxtimes v \delta \varepsilon \eta \mu \varepsilon \sigma v v \sigma o \alpha \pi o \theta \alpha v \varepsilon เ v)$. Third-class condition. A noble speech and meant well. His boast of loyalty is made still stronger by ov $\mu \eta \sigma \varepsilon$ $\alpha \pi \alpha \rho v \eta \sigma о \mu \alpha$. The other disciples were undoubtedly embarrassed by Peter's boast and lightheartedly joined in the same profession of fidelity.

Matt 26:36
Gethsemane ( $\Gamma \varepsilon \theta \sigma \eta \mu \alpha v \varepsilon$ ). The word means oil-press in the Hebrew, or olive vat. The place ( $\chi \omega \rho \circ \frac{\nu}{}$ ) was an enclosed plot or estate, "garden," or orchard (кплос). It is called villa in the Vulgate according to Joh 18:1. It was beyond the torrent Kedron at the foot of the Mount of Olives about three-fourths of a mile from the eastern walls of Jerusalem. There are now eight old olive trees still standing in this enclosure. One cannot say that they are the very trees near which Jesus had his Agony, but they are very old. "They will remain so long as their already protracted life is spared, the most venerable of their race on the surface of the earth. Their guarded trunks and scanty foliage will always be regarded as the most affecting of the sacred memorials in or about Jerusalem" (Stanley, Sinai and Palestine).

Here (avtou),
Yonder (єкع). Jesus clearly pointed to the place where he would pray. Literally "there."

## Matt 26:37

He took with him ( $\pi \alpha \rho \alpha \lambda \alpha \beta \omega v$ ). Taking along, by his side ( $\pi \alpha \rho \alpha-$ ), as a mark of special favour and privilege, instead of leaving this inner circle of three (Peter, James, and John) with the other eight. The eight would serve as a sort of outer guard to watch by the gate of the garden for the coming of Judas while the three would be able to share the agony of soul already upon Jesus so as at least to give him some human sympathy which he craved as he sought help from the Father in prayer. These three had been with Jesus on the Mount of Transfiguration and now they are with him in this supreme crisis. The grief of Christ was now severe. The word for
sore troubled ( $\alpha \delta \eta \mu \mathrm{ov} \mathrm{\varepsilon} v$ ) is of doubtful etymology. There is an adjective $\alpha \delta \eta \mu o \varsigma$ equal to $\alpha \pi о \delta \eta \mu$ о meaning "not at home," "away from home," like the German unheimisch, unheimlich. But whatever the etymology, the notion of intense discomfort is plain. The word $\alpha \delta \eta \mu$ oveıv occurs in P.Oxy. II, 298,456 of the first century A.D. where it means "excessively concerned." See Php 2:26 where Paul uses it of Epaphroditus. Moffatt renders it here "agitated." The word occurs sometimes with $\alpha \pi о \rho \varepsilon \omega$ to be at a loss as to which way to go. The Braid Scots has it "sair putten-aboot." Here Matthew has also "to be sorrowful" ( $\lambda$ ขлعוб $\theta a)$, but Mark (Mr 14:33) has the startling phrase
greatly amazed and sore troubled ( $\varepsilon \kappa \theta \alpha \mu \beta \varepsilon เ \sigma \theta a \kappa \alpha \alpha \delta \eta \mu \circ v \varepsilon เ v)$, a "feeling of terrified surprise."

Matt 26:38
Watch with me ( $\gamma \rho \eta \gamma о \rho \varepsilon ı \tau \varepsilon \mu \varepsilon \tau^{\prime} \varepsilon \mu \circ v$ ). This late present from the perfect $\varepsilon \gamma \rho \eta \gamma \circ \rho \alpha$ means to keep awake and not go to sleep. The hour was late and the strain had been severe, but Jesus pleaded for a bit of human sympathy as he wrestled with his Father. It did not seem too much to ask. He had put his sorrow in strong language, "even unto death" ( $\varepsilon \omega \varsigma$ Өavatov) that ought to have alarmed them.

Matt 26:39
He went forward a little ( $\pi \rho \circ \varepsilon \lambda \theta \omega v \mu \kappa \rho o v$ ). As if he could not fight the battle in their immediate presence. He was on his face, not on his knees (McNeile).

This cup (то лотпрьо тоито). The figure can mean only the approaching death. Jesus had used it of his coming death when James and John came to him with their ambitious request, "the cup which I am about to drink" (Mt 20:22). But now the Master is about to taste the bitter dregs in the cup of death for the sin of the world. He was not afraid that he would die before the Cross, though he instinctively shrank from the cup, but instantly surrendered his will to the Father's will and drank it to the full. Evidently Satan tempted Christ now to draw back from the Cross. Here Jesus won the power to go on to Calvary.

Matt 26:40
What (ovtwc). The Greek adverb is not interrogation or exclamatory $\tau$, but only "so" or "thus." There is a tone of sad disappointment at the discovery that they were asleep after
the earnest plea that they keep awake (verse 38). "Did you not thus have strength enough to keep awake one hour?" Every word struck home.

Matt 26:41
Watch and pray ( $\gamma \rho \eta \gamma$ орєıє ка $\pi \rho о \sigma \varepsilon u \chi \varepsilon \sigma \theta \varepsilon$ ). Jesus repeats the command of verse 38 with the addition of prayer and with the warning against the peril of temptation. He himself was feeling the worst of all temptations of his earthly life just then. He did not wish then to enter such temptation ( $\pi \varepsilon \iota \rho \alpha \sigma \mu \circ v$, here in this sense, not mere trial). Thus we are to understand the prayer in Mt 6:13 about leading (being led) into temptation. Their failure was due to weakness of the flesh as is often the case.

Spirit ( $\pi \nu \varepsilon v \mu \alpha)$ here is the moral life ( $เ \nu \tau \varepsilon \lambda \lambda \varepsilon \chi \tau$, wı $\lambda \lambda$, $\varepsilon \mu \circ \tau \iota \circ v \varsigma$ ) as opposed to the flesh (cf. Isa 31:3; Ro 7:25 ).

Except I drink it ( $\varepsilon \alpha \nu \mu \eta$ av $\tau 0 \pi \omega)$. Condition of the third class undetermined, but with likelihood of determination, whereas
if this cannot pass away ( $\varepsilon$ ou $\delta u v a \tau \alpha$ тov $\tau 0 \pi \alpha \rho \varepsilon \lambda \theta \varepsilon ı v$ ) is first-class condition, determined as fulfilled, assumed to be true. This delicate distinction accurately presents the real attitude of Jesus towards this subtle temptation.

Matt 26:43
For their eyes were heavy ( $\eta \sigma \alpha \nu \gamma \alpha \rho \alpha v \tau \omega \nu$ o $o \varphi \theta \alpha \lambda \mu o \beta \varepsilon \beta \alpha \rho \eta \mu \varepsilon v o$ ). Past perfect passive indicative periphrastic. Their eyes had been weighted down with sleep and still were as they had been on the Mount of Transfiguration (Lu 9:32 ).

Matt 26:45
Sleep on now and take your rest ( $\kappa \alpha \theta \varepsilon v \delta \varepsilon \tau \varepsilon ~ \lambda о \iota \pi о \nu ~ к \alpha ~ \alpha v \alpha \pi \alpha \nu \varepsilon \sigma \theta \varepsilon$ ). This makes it "mournful irony" (Plummer) or reproachful concession: "Ye may sleep and rest indefinitely so far as I am concerned; I need no longer your watchful interest" (Bruce). It may be a sad query as Goodspeed: "Are you still sleeping and taking your rest?" So Moffatt. This use of dormov for now or henceforth is common in the papyri.

The hour is at hand ( $\eta \gamma \gamma \iota \kappa \varepsilon \vee \eta \omega \rho \alpha$ ). Time for action has now come. They have missed their chance for sympathy with Jesus. He has now won the victory without their aid. "The Master's time of weakness is past; He is prepared to face the worst" (Bruce).

Is betrayed ( $\pi \alpha \rho \alpha \delta \iota \delta o \tau \alpha$ ). Futuristic present or inchoative present, the first act in the betrayal is at hand. Jesus had foreseen his "hour" for long and now he faces it bravely.

## Matt 26:46

He is at hand ( $\eta \gamma \gamma \not \kappa \varepsilon v$ ). The same verb and tense used of the hour above, present perfect active of $\varepsilon \gamma \gamma \zeta \zeta \omega$, to draw near, the very form used by John the Baptist of the coming of the kingdom of heaven (Mt 3:2). Whether Jesus heard the approach of the betrayer with the crowd around him or saw the lights or just felt the proximity of the traitor before he was there (J. Weiss), we do not know and it matters little. The scene is pictured as it happened with lifelike power.

Matt 26:47
While he yet spake ( $\varepsilon \tau$ autov $\lambda \alpha \lambda$ ouv $\tau o c$ ). It was an electric moment as Jesus faced Judas with his horde of helpers as if he turned to meet an army.

Let us go ( $\alpha \gamma \omega \mu \varepsilon v$ ), Jesus had said. And here he is. The eight at the gate seemed to have given no notice. Judas is described here as "one of the twelve" ( $\varepsilon \varsigma \varsigma \tau \omega \nu \omega \delta \varepsilon \kappa \alpha$ ) in all three Synoptic Gospels (Mr 14:43; Mt 26:47; Lu 22:47). The very horror of the thing is thus emphasized, that one of the chosen twelve apostles should do this dastardly deed.

A great multitude (oх $\lambda$ оৎ $\pi \mathrm{o} \lambda \cup \varsigma$ ). The chief priests and Pharisees had furnished Judas a band of soldiers from the garrison in Antonia (Joh 18:3) and the temple police (Lu 22:52 ) with swords (knives) and staves (clubs) with a hired rabble who had lanterns also (Joh 18:3 ) in spite of the full moon. Judas was taking no chances of failure for he well knew the strange power of Jesus.

Matt 26:48
Gave them a sign ( $\varepsilon \delta \omega \kappa \varepsilon v$ avtoıc $\sigma \eta \mu \varepsilon \iota v$ ). Probably just before he reached the place, though Mark (Mr 14:44) has "had given" ( $\delta \varepsilon \delta \omega \kappa \varepsilon$ ) which certainly means before arrival at Gethsemane. At any rate Judas had given the leaders to understand that he would kiss ( $\varphi\rangle \lambda \eta \sigma \omega$ ) Jesus in order to identify him for certain. The kiss was a common mode of greeting and Judas chose that sign and actually "kissed him fervently" ( $\kappa \alpha \tau \varepsilon \varphi \lambda \eta \sigma \varepsilon v$, verse 49), though the compound verb sometimes in the papyri has lost its intensive force. Bruce thinks that Judas was prompted by the inconsistent motives of smouldering love and cowardice. At any rate this revolting ostentatious kiss is "the most terrible instance of the عкоvбıа $\varphi \downarrow \lambda \eta \mu \alpha \tau \alpha$ $\varepsilon \chi \theta \rho \circ 0$ ( $\operatorname{Pr} 27: 6$ )," the profuse kisses of an enemy (McNeile). This same compound verb occurs in Lu 7:38 of the sinful woman, in Lu 15:20 of the Father's embrace of the Prodigal Son, and in Ac 20:37 of the Ephesian elders and Paul.

Matt 26:50
Do that for which thou art come ( $\varepsilon \varphi^{\prime}$ o $\pi \alpha \rho \varepsilon$ ). Moffatt and Goodspeed take it: "Do your errand." There has been a deal of trouble over this phrase. Deissmann (Light from the Ancient East, pp. 125 to 131) has proven conclusively that it is a question, $\varepsilon \varphi^{\prime}$ o in late Greek having the interrogative sense of $\varepsilon \pi \tau$ (Robertson, Grammar, p. 725). The use of $\varepsilon \varphi^{\prime}$ o for "why here" occurs on a Syrian tablet of the first century A.D. 50 that it "was current coin in the language of the people" (Deissmann). Most of the early translations (Old Latin, Old Syriac) took it as a question. So the Vulgate has ad quid venisti. In this instance the Authorized Version is correct against the Revised. Jesus exposes the pretence of Judas and shows that he does not believe in his paraded affection (Bruce).

Matt 26:51
One of them that were with Jesus ( $\varepsilon \iota \tau \omega \nu \mu \varepsilon \tau \alpha$ I I $\sigma \sigma v$ ). Like the other Synoptics Matthew conceals the name of Peter, probably for prudential reasons as he was still living before A.D. 68. John writing at the end of the century mentions Peter's name (Joh 18:10).

The sword or knife was one of the two that the disciples had (Lu 22:38). Bruce suggests that it was a large knife used in connexion with the paschal feast. Evidently Peter aimed to cut off the man's head, not his ear ( $\omega \tau$ tov is diminutive in form, but not in sense, as often in the Koine). He may have been the leader of the band. His name, Malchus, is also given by John (Joh 18:10) because Peter was then dead and in no danger.

## Matt 26:52

Put up again thy sword ( $\alpha \pi \sigma \sigma \tau \rho \varepsilon \psi \sigma v \tau \eta \nu \mu \alpha \chi \alpha \iota \rho \alpha v \sigma o v)$. Turn back thy sword into its place. It was a stern rebuke for Peter who had misunderstood the teaching of Jesus in Lu 22:38 as well as in Mt 5:39 (cf. Joh 18:36). The reason given by Jesus has had innumerable illustrations in human history. The sword calls for the sword. Offensive war is here given flat condemnation. The Paris Pact of 1928 (the Kellogg Treaty) is certainly in harmony with the mind of Christ. The will to peace is the first step towards peace, the outlawing of war. Our American cities are often ruled by gangsters who kill each other off.

Matt 26:53
Even now ( $\alpha \rho \tau$ ). Just now, at this very moment.
Legions ( $\lambda \varepsilon \gamma \omega \mathrm{v} \alpha \varsigma)$. A Latin word. Roman soldiers in large numbers were in Palestine later in A.D. 66, but they were in Caesarea and in the tower of Antonia in Jerusalem. A full Roman legion had 6,100 foot and 726 horse in the time of Augustus. But Jesus sees more than twelve legions at his command (one for each apostle) and shows his undaunted courage in this crisis. One should recall the story of Elisha at Dothan (2Ki 6:17).

Matt 26:54
Must be ( $\delta \varepsilon$ ). Jesus sees clearly his destiny now that he has won the victory in Gethsemane.

Matt 26:55
As against a robber ( $\omega \varsigma \varepsilon \pi \lambda \eta \iota \sigma \tau \eta \nu$ ). As a robber, not as a thief, but a robber hiding from justice. He will be crucified between two robbers and on the very cross planned for their leader, Barabbas. They have come with no warrant for any crime, but with an armed force to seize Jesus as if a highway robber. Jesus reminds them that he used to sit (imperfect, $\varepsilon к \alpha \theta \varepsilon \zeta о \mu \eta v)$ in the temple and teach. But he sees God's purpose in it all for the prophets had foretold his "cup." The desertion of Jesus by the disciples followed this rebuke of the effort of Peter. Jesus had surrendered. So they fled.

Matt 26:58
To see the end (ı $\delta \varepsilon \iota v$ тo $\tau \varepsilon \lambda \circ \varsigma)$. Peter rallied from the panic and followed afar off ( $\mu \alpha \kappa \rho \circ \theta \varepsilon v$ ), "more courageous than the rest and yet not courageous enough" (Bruce). John the Beloved Disciple went on into the room where Jesus was. The rest remained outside, but Peter "sat with the officers" to see and hear and hoping to escape notice.

Matt 26:59

Sought false witness against Jesus ( $\varepsilon\lceil\eta \tau 0 v v \psi \varepsilon v \delta o \mu \alpha \rho \tau v \rho ı \alpha v)$. Imperfect tense, kept on seeking. Judges have no right to be prosecutors and least of all to seek after false witness and even to offer bribes to get it.

Matt 26:60
They found it not ( $\kappa \alpha$ ov $\begin{gathered}\text { cupov). They found false witnesses in plenty, but not the }\end{gathered}$ false witness that would stand any sort of test.

Matt 26:61
 he had said (Joh 2:19 ) referred to the temple of his body which they were to destroy (and did) and which he would raise again in three days as he did. It was a pitiful perversion of what Jesus had said and even so the two witnesses disagreed in their misrepresentation (Mr 14:59).

Matt 26:63
Held his peace ( $\varepsilon \sigma \omega \pi \tau)$. Kept silent, imperfect tense. Jesus refused to answer the bluster of Caiaphas.
 put Jesus on oath in order to make him incriminate himself, a thing unlawful in Jewish jurisprudence. He had failed to secure any accusation against Jesus that would stand at all. But Jesus did not refuse to answer under solemn oath, clearly showing that he was not thinking of oaths in courts of justice when he prohibited profanity. The charge that Caiaphas makes is that Jesus claims to be the Messiah, the Son of God. To refuse to answer would be tantamount to a denial. So Jesus answered knowing full well the use that would be made of his confession and claim.

Matt 26:64
Thou hast said ( $\sigma v \varepsilon ו \pi \alpha \varsigma)$. This is a Greek affirmative reply. Mark (Mr 14:62) has it plainly, "I am" ( $\varepsilon \mu)$. But this is not all that Jesus said to Caiaphas. He claims that the day will come when Jesus will be the Judge and Caiaphas the culprit using the prophetic language in Da 7:13 and Ps 109:1. It was all that Caiaphas wanted.

Matt 26:65
He hath spoken blasphemy ( $\varepsilon \beta \lambda \alpha \sigma \varphi \eta \mu \eta \sigma \varepsilon v)$. There was no need of witnesses now, for Jesus had incriminated himself by claiming under oath to be the Messiah, the Son of God. Now it would not be blasphemy for the real Messiah to make such a claim, but it was intolerable to admit that Jesus could be the Messiah of Jewish hope. At the beginning of Christ's ministry he occasionally used the word Messiah of himself, but he soon ceased, for it was plain that it would create trouble. The people would take it in the sense of a political revolutionist who would throw off the Roman yoke. If he declined that role, the Pharisees would have none of him for that was the kind of a Messiah that they desired. But the hour has now come. At the Triumphal Entry Jesus let the Galilean crowds hail him as Messiah, knowing
what the effect would be. Now the hour has struck. He has made his claim and has defied the High Priest.

Matt 26:66
He is worthy of death ( $\varepsilon v o \chi o c \theta a v a \tau o v \varepsilon \sigma \tau \iota v$ ). Held in the bonds of death $(\varepsilon v, \varepsilon \chi \omega)$ as actually guilty with the genitive ( $\theta$ avatov). The dative expresses liability as in Mt 5:21 ( $\tau \eta$ $\kappa \rho ı \sigma \varepsilon$ ) and as $\varepsilon ı \varsigma$ and the accusative (Mt 5:22). They took the vote though it was at night and they no longer had the power of death since the Romans took it away from them. Death was the penalty of blasphemy (Le 24:15). But they enjoyed taking it as their answer to his unanswerable speeches in the temple that dreadful Tuesday a few days before. It was unanimous save that Joseph of Arimathea and Nicodemus did not agree. They were probably absent and not even invited as being under suspicion for being secret disciples of Christ.

Matt 26:68
 controlled glee and abandon like a lot of hoodlums these doctors of divinity insulted Jesus. They actually spat in his face, buffeted him on the neck ( $\varepsilon к о \lambda \alpha \varphi เ \sigma \alpha v, ~ f r o m ~ к о \lambda \alpha \varphi о \varsigma ~ t h e ~$ fist), and struck him in the face with the palms of their hands ( $\varepsilon \rho \alpha \pi \iota \sigma \alpha v$, from $\rho a \pi \iota \varsigma$, a rod), all personal indignities after the legal injustice already done. They thus gave vent to their spite and hatred.

## Matt 26:69

Thou also ( $\kappa \alpha \sigma v$ ). Peter had gone within ( $\varepsilon \sigma \omega$ ) the palace ( $26: 58$ ), but was sitting
without $(\varepsilon \xi \omega)$ the hall where the trial was going on in the open central court with the servants or officers (vin $\rho \varepsilon \tau \omega v$, under rowers, literally, 26:58) of the Sanhedrin. But he could possibly see through the open door above what was going on inside. It is not plain at what stage of the Jewish trial the denials of Peter took place nor the precise order in which they came as the Gospels give them variously. This maid ( $\pi \alpha \iota \delta \iota \sigma \kappa \eta$, slave girl) stepped up to Peter as he was sitting in the court and pointedly said: "Thou also wast with Jesus the Galilean." Peter was warming himself by the fire and the light shone in his face. She probably had noticed Peter come in with John the Beloved Disciple who went on up into the hall of trial. Or she may have seen Peter with Jesus on the streets of Jerusalem.

Matt 26:70
I know not what thou sayest (оטк oı $\delta \alpha \tau \lambda \varepsilon \gamma \varepsilon \iota \varsigma$ ). It was an affectation of extreme ignorance (Bruce) that deceived no one. It was an easy and ancient dodge and easy subterfuge. Dalman (Words of Jesus, 80f.) suggests that Peter used the Galilean Aramaean word for know instead of the Judean Aramaean word which betrayed at once his Galilean residence.

Matt 26:71
Into the porch ( $\varepsilon ı \varsigma ~ \tau o v ~ \pi u \lambda \omega v \alpha$ ). But Peter was not safe out here, for another maid recognized him and spoke of him as "this fellow" (ovtoc) with a gesture to those out there.

Matt 26:72

With an oath ( $\mu \varepsilon \tau \alpha$ о окои). This time Peter added an oath, probably a former habit so common to the Jews at that time, and denied acquaintance with Jesus. He even refers to Jesus as "the man" ( $\tau 0 v \alpha v \theta \rho \omega \pi \sigma v$ ), an expression that could convey contempt, "the fellow."

Matt 26:73
They that stood by (o عбт $\omega \tau \varepsilon \varsigma)$. The talk about Peter continued. Luke (Lu 22:59) states that the little while was about an hour. The bystanders came up to Peter and bluntly assert that he was "of a truth" ( $\alpha \lambda \eta \theta \omega \varsigma$ ) one of the followers of Jesus for his speech betrayed him. Even the Revised Version retains "bewrayeth," quaint old English for "betrayeth." The Greek has it simply "makes thee evident" ( $\delta \eta \lambda o v \sigma \varepsilon$ roı $\varepsilon$ ). His dialect ( $\lambda \alpha \lambda ı \alpha)$ clearly revealed that he was a Galilean. The Galileans had difficulty with the gutterals and Peter's second denial had exposed him to the tormenting raillery of the loungers who continued to nag him.

Matt 26:74
Then began he to curse and to swear ( $\tau о \tau \varepsilon \eta \rho \xi \alpha \tau о ~ \kappa \alpha \tau \alpha \theta \varepsilon \mu \alpha \tau \iota(\varepsilon ı v ~ \kappa \alpha ~ о \mu v v \varepsilon ı v)$. He repeated his denial with the addition of profanity to prove that he was telling the truth instead of the lie that they all knew. His repeated denials gave him away still more, for he could not pronounce the Judean gutterals. He called down on himself (катаӨع $\mu \alpha \tau \iota(\varepsilon ו v)$ imprecations in his desperate irritation and loss of self-control at his exposure.

The cock crew ( $\alpha \lambda \varepsilon \kappa \tau \omega v \varepsilon \varphi \omega v \eta \sigma \varepsilon v$ ). No article in the Greek, just "a cock crew" at that juncture, "straightway" ( $\varepsilon v \theta v \varsigma)$. But it startled Peter.

Matt 26:75
Peter remembered ( $\varepsilon \mu \nu \eta \sigma \theta \eta$ о Пєтроৎ). A small thing, but magna circumstantia (Bengel). In a flash of lightning rapidity he recalled the words of Jesus a few hours before (Mt 26:34) which he had then scouted with the proud boast that "even if I must die with thee, yet will I not deny thee" ( $26: 35$ ). And now this triple denial was a fact. There is no extenuation for the base denials of Peter. He had incurred the dread penalty involved in the words of Jesus in Mt 10:33 of denial by Jesus before the Father in heaven. But Peter's revulsion of feeling was as sudden as his sin.

He went out and wept bitterly ( $\varepsilon \xi \varepsilon \lambda \theta \omega v \varepsilon \xi \omega \varepsilon \kappa \lambda \alpha v \sigma \varepsilon v \pi \iota \kappa \rho \omega \varsigma)$. Luke adds that the Lord turned and looked upon Peter (Lu 22:61). That look brought Peter back to his senses. He could not stay where he now was with the revilers of Jesus. He did not feel worthy or able to go openly into the hall where Jesus was. So outside he went with a broken heart. The constative aorist here does not emphasize as Mark's imperfect does (Mr 14:72, $\varepsilon \kappa \lambda \alpha \_\varepsilon v$ ) the continued weeping that was now Peter's only consolation. The tears were bitter, all the more so by reason of that look of understanding pity that Jesus gave him. One of the tragedies of the Cross is the bleeding heart of Peter. Judas was a total wreck and Peter was a near derelict. Satan had sifted them all as wheat, but Jesus had prayed specially for Peter (Lu 22:31f. ). Will Satan show Peter to be all chaff as Judas was?

## Matthew 27

Matt 27:1
Now when morning was come ( $\pi \rho \omega t a \varsigma \delta \varepsilon \gamma \varepsilon \nu \circ \mu \varepsilon \nu \eta \varsigma)$. Genitive absolute. After dawn came the Sanhedrin held a formal meeting to condemn Jesus and so ratify the illegal trial during the night ( Mr 15:1; Lu 22:66-71 ). Luke gives the details of this second ratification consultation. The phrase used,
took counsel ( $\sigma \cup \mu \beta o v \lambda \iota o v \varepsilon \lambda \alpha \beta o v$ ) is a Latin idiom (consilium ceperunt) for $\sigma u v \varepsilon \beta о u \lambda \varepsilon v \sigma \alpha v \tau 0$.

Matt 27:2
Delivered him up to Pilate the governor ( $\pi \alpha \rho \varepsilon \delta \omega \kappa \alpha \nu \Pi \varepsilon \iota \lambda \alpha \tau \omega \tau \omega \eta \gamma \varepsilon \mu \circ v$ ). What they had done was all a form and a farce. Pilate had the power of death, but they had greatly enjoyed the condemnation and the buffeting of Jesus now in their power bound as a condemned criminal. He was no longer the master of assemblies in the temple, able to make the Sanhedrin cower before him. He had been bound in the garden and was bound before Annas (Joh $18: 12,24$ ), but may have been unbound before Caiaphas.

Matt 27:3
Repented himself ( $\mu \varepsilon \tau \alpha \mu \varepsilon \lambda \eta \theta \varepsilon \iota \varsigma)$. Probably Judas saw Jesus led away to Pilate and thus knew that the condemnation had taken place. This verb (first aorist passive participle of $\mu \varepsilon \tau \alpha \mu \varepsilon \lambda o \mu \alpha)$ really means to be sorry afterwards like the English word repent from the Latin repoenitet, to have pain again or afterwards. See the same verb $\mu \varepsilon \tau \alpha \mu \varepsilon \lambda \eta \theta \varepsilon ı \varsigma$ in Mt 21:30 of the boy who became sorry and changed to obedience. The word does not have an evil sense in itself. Paul uses it of his sorrow for his sharp letter to the Corinthians, a sorrow that ceased when good came of the letter (2Co 7:8). But mere sorrow avails nothing unless it leads to change of mind and life ( $\mu \varepsilon \tau \alpha \nu o \iota \alpha)$, the sorrow according to God (2Co 7:9 ). This sorrow Peter had when he wept bitterly. It led Peter back to Christ. But Judas had only remorse that led to suicide.

Matt 27:4
See thou to it $(\sigma v o \psi \eta)$. Judas made a belated confession of his sin in betraying innocent blood to the Sanhedrin, but not to God, nor to Jesus. The Sanhedrin ignore the innocent or righteous blood ( $\alpha \iota \mu \alpha \beta \omega \iota \circ$ or $\delta \iota \kappa \alpha \iota ⿱ v$ ) and tell Judas to look after his own guilt himself. They ignore also their own guilt in the matter. The use of $\sigma v o \psi \eta$ as a volitive future, an equivalent of the imperative, is commoner in Latin (tu videris) than in Greek, though the Koine shows it also. The sentiment is that of Cain (Grotius, Bruce).

Matt 27:5
Hanged himself ( $\alpha \pi \eta \gamma \xi \alpha \tau 0$ ). Direct middle. His act was sudden after he hurled the money into the sanctuary ( $\varepsilon \iota \varsigma \tau 0 v \nu \alpha o v$ ), the sacred enclosure where the priests were. The
motives of Judas in the betrayal were mixed as is usually the case with criminals. The money cut a small figure with him save as an expression of contempt as the current price of a slave. Matt 27:6
Into the treasury ( $\varepsilon$ ء̧ tov кор $\beta$ avav). Josephus (War II. 9,4) uses this very word for the sacred treasury. Korban is Aramaic for gift ( $\delta \omega \rho o v$ ) as is plain in Mr 7:11. The price of blood (blood-money) was pollution to the treasury (De 23:18f. ). So they took the money out and used it for a secular purpose. The rabbis knew how to split hairs about Korban (Mr 7:1-23; Mt 15:1-20 ), but they balk at this blood-money.

Matt 27:7
The potter's field ( $\tau 0 v ~ a \gamma \rho \circ \cup \tau$ тov $\kappa \varepsilon \rho \alpha \mu \varepsilon \omega \varsigma$ ). Grotius suggests that it was a small field where potter's clay was obtained, like a brickyard (Broadus). Otherwise we do not know why the name exists. In Ac 1:18 we have another account of the death of Judas by bursting open (possibly falling after hanging himself) after he obtained the field by the wages of
 the money was still that of Judas though he was dead and so he really "acquired" the field by his blood-money.

Matt 27:8
The field of blood ( $\alpha$ рооя $\alpha \mu \alpha \tau о \varsigma$ ). This name was attached to it because it was the price of blood and that is not inconsistent with Ac 1:18f. Today potter's field carries the idea here started of burial place for strangers who have no where else to lie ( $\varepsilon \iota \varsigma \tau \alpha \varphi \eta \nu \tau$ тoı $\xi \varepsilon v o \iota s)$, probably at first Jews from elsewhere dying in Jerusalem. In Ac 1:19 it is called

## Aceldama or

place of blood ( $\chi \omega \rho \ldots \sim$ aц $\mu \tau \sigma \varsigma)$ for the reason that Judas' blood was shed there, here because it was purchased by blood money. Both reasons could be true.

Matt 27:9
By Jeremiah the prophet ( $\delta \iota \alpha$ I $\varepsilon \rho \varepsilon \mu \circ$ ) $)$. This quotation comes mainly from Zec 11:13 though not in exact language. In Jer 18:18 the prophet tells of a visit to a potter's house and in Jer 32:6ff. of the purchase of a field. It is in Zechariah that the thirty pieces of silver are mentioned. Many theories are offered for the combination of Zechariah and Jeremiah and attributing it all to Jeremiah as in Mr 1:2f. the quotation from Isaiah and Malachi is referred wholly to Isaiah as the more prominent of the two. Broadus and McNeile give a full discussion of the various theories from a mere mechanical slip to the one just given above. Matthew
 house of the Lord" in Zec 11:13. That makes it more parallel with the language of Mt 27:7

## Matt 27:11

Now Jesus stood before the governor (o $\delta \varepsilon$ I $\eta \sigma o v \varsigma ~ \varepsilon \sigma \tau \alpha \theta \eta ~ \varepsilon \mu \pi \rho о \sigma \theta \varepsilon v ~ \tau o v ~ \eta \gamma \varepsilon \mu о v o \varsigma) . ~$ Here is one of the dramatic episodes of history. Jesus stood face to face with the Roman
governor. The verb $\varepsilon \sigma \tau \alpha \theta \eta$, not $\varepsilon \sigma \tau \eta$ (second aorist active), is first aorist passive and can mean "was placed" there, but he stood, not sat. The term $\eta \gamma \varepsilon \mu \omega \nu$ (from $\eta \gamma \varepsilon \circ \mu \alpha$, to lead) was technically a legatus Caesaris, an officer of the Emperor, more exactly procurator, ruler under the Emperor of a less important province than propraetor (as over Syria). The senatorial provinces like Achaia were governed by proconsuls. Pilate represented Roman law.

Art thou the King of the Jews? ( $\Sigma v \varepsilon$ о $\beta \alpha \sigma \iota \lambda \varepsilon v \varsigma \tau \omega v$ Iov $\alpha \alpha \iota \omega v$;). This is what really mattered. Matthew does not give the charges made by the Sanhedrin (Lu 23:2) nor the private interview with Pilate (Joh 18:28-32 ). He could not ignore the accusation that Jesus claimed to be King of the Jews. Else he could be himself accused to Caesar for disloyalty. Rivals and pretenders were common all over the empire. So here was one more. By his answer ( thou sayest ) Jesus confesses that he is. So Pilate has a problem on his hands. What sort of a king does this one claim to be?

Thou ( $\sigma v$ ) the King of the Jews?
Matt 27:14
And he gave him no answer, not even to one word ( $\kappa \alpha$ оvк $\alpha \pi \varepsilon \kappa \rho \iota \eta \eta \cup \tau \omega \pi \rho \circ \varsigma о \cup \delta \varepsilon$ $\varepsilon v \rho \eta \mu \alpha)$. Jesus refused to answer the charges of the Jews (verse 12). Now he continued silent under the direct question of Pilate. The Greek is very precise besides the double negative. "He did not reply to him up to not even one word." This silent dignity amazed Pilate and yet he was strangely impressed.

Matt 27:17
Barabbas or Jesus which is called Christ? (Bapaßßav $\eta$ Inoovv $\tau 0 v \lambda \varepsilon \gamma о \mu \varepsilon v o v$ X $\rho \iota \sigma \tau \%$;). Pilate was catching at straws or seeking any loophole to escape condemning a harmless lunatic or exponent of a superstitious cult such as he deemed Jesus to be, certainly in no political sense a rival of Caesar. The Jews interpreted "Christ" for Pilate to be a claim to be King of the Jews in opposition to Caesar, "a most unprincipled proceeding" (Bruce). So he bethought him of the time-honoured custom at the passover of releasing to the people "a prisoner whom they wished" ( $\delta \varepsilon \sigma \mu \circ v$ ov $\eta \theta \varepsilon \lambda o v$ ). No parallel case has been found, but Josephus mentions the custom (Ant. xx. 9,3). Barabbas was for some reason a popular hero, a notable ( $\varepsilon \pi \iota \sigma \eta \mu \circ v$ ), if not notorious, prisoner, leader of an insurrection or revolution ( Mr 15:7 ) probably against Rome, and so guilty of the very crime that they tried to fasten on Jesus who only claimed to be king in the spiritual sense of the spiritual kingdom. So Pilate unwittingly pitted against each other two prisoners who represented the antagonistic forces of all time. It is an elliptical structure in the question, "whom do you wish that I release?" ( $\tau \imath v \alpha \theta \varepsilon \lambda \varepsilon \tau \varepsilon \alpha \pi \sigma \lambda v \sigma \omega ;$ ), either two questions in one (asyndeton) or the ellipse of $v \alpha a$ before $\alpha \pi \sigma \lambda v \sigma \omega$. See the same idiom in verse 21. But Pilate's question tested the Jews as well as himself. It tests all men today. Some manuscripts add the name Jesus to Barabbas and that makes it all the sharper. Jesus Barabbas or Jesus Christ?

Matt 27:18

For envy ( $\delta \iota \alpha \varphi \theta$ ovov). Pilate was dense about many things, but he knew that the Jewish leaders were jealous of the power of Jesus with the people. He may have heard of the events of the Triumphal Entry and the Temple Teaching. The envy, of course, came primarily from the leaders.

Matt 27:19
His wife ( $\eta \gamma \cup v \eta$ avtov). Poor Pilate was getting more entangled every moment as he hesitated to set Jesus free whom he knew to be free of any crime against Caesar. Just at the moment when he was trying to enlist the people in behalf of Jesus against the schemes of the Jewish leaders, his wife sent a message about her dream concerning Jesus. She calls Jesus "that righteous man" ( $\tau \omega \delta \iota \kappa \alpha \omega \omega$ єкєıv $\omega$ ) and her psychical sufferings increased Pilate's superstitious fears. Tradition names her Procla and even calls her a Christian which is not probable. But it was enough to unnerve the weak Pilate as he sat on the judgment-seat ( $\varepsilon \pi$ tov $\beta \eta \mu \alpha \tau$ то ) up over the pavement.

Matt 27:20
Persuaded ( $\varepsilon \pi \varepsilon เ \sigma \alpha v)$. The chief priests (Sadducees) and elders (Pharisees) saw the peril of the situation and took no chances. While Pilate wavered in pressing the question, they used all their arts to get the people to "ask for themselves" (aırך $\sigma \omega v \tau \alpha$, indirect middle ingressive aorist subjunctive) and to choose Barabbas and not Jesus.

Matt 27:22
What then shall I do unto Jesus which is called Christ? ( $\tau$ ouv $\pi 0 \not \eta \sigma \omega$ I $\eta \sigma o u v$ тov $\lambda \varepsilon \gamma o \mu \varepsilon v o v$ X $\rho ı \sigma \tau o v ;$ ). They had asked for Barabbas under the tutelage of the Sanhedrin, but Pilate pressed home the problem of Jesus with the dim hope that they might ask for Jesus also. But they had learned their lesson. Some of the very people who shouted "Hosannah" on the Sunday morning of the Triumphal Entry now shout

Let him be crucified ( $\sigma \tau \alpha v \rho \omega \theta \eta \tau \omega$ ). The tide has now turned against Jesus, the hero of Sunday, now the condemned criminal of Friday. Such is popular favour. But all the while Pilate is shirking his own fearful responsibility and trying to hide his own weakness and injustice behind popular clamour and prejudice.

Matt 27:23
Why, what evil hath he done? ( $\tau$ ү $\alpha \rho$ какоv $\varepsilon \pi о \succsim \eta \sigma \varepsilon$;). This was a feeble protest by a flickering conscience. Pilate descended to that level of arguing with the mob now inflamed with passion for the blood of Jesus, a veritable lynching fiasco. But this exhibition of weakness made the mob fear refusal by Pilate to proceed. So they "kept crying exceedingly" ( $\pi \varepsilon \rho \iota \sigma \sigma \omega \varsigma$ $\varepsilon \kappa \rho \alpha \zeta o v$, imperfect tense of repeated action and vehemently) their demand for the crucifixion of Jesus. It was like a gladiatorial show with all thumbs turned down.

Matt 27:24
Washed his hands ( $\alpha \pi \varepsilon v \iota \psi a \tau 0 \tau \alpha \varsigma \chi \varepsilon ı \rho \alpha \varsigma)$. As a last resort since the hubbub ( $\theta \circ \rho \cup \beta \circ \varsigma$ ) increased because of his vacillation. The verb $\alpha \pi \sigma v ı \pi \tau \omega$ means to wash off and the middle
voice means that he washed off his hands for himself as a common symbol of cleanliness and added his pious claim with a slap at them.

## I am innocent of the blood of this righteous man (or

 this blood ); as some manuscripts have it, $v \mu \varepsilon \iota \varsigma ~ o \psi \varepsilon \sigma \theta \varepsilon$.) The Jews used this symbol (De 21:6; Ps 26:6; 73:13 ). Plummer doubts if Pilate said these words with a direct reference to his wife's message ( $26: 19$ ), but I fail to see the ground for that scepticism. The so-called Gospel of Peter says that Pilate washed his hands because the Jews refused to do so.

Matt 27:25
His blood be upon us and upon our children ( $\tau \circ \alpha \mu \alpha \alpha v \tau о v \kappa \alpha \varepsilon \pi \tau \alpha \tau \varepsilon \kappa \nu \alpha \eta \mu \omega v$ ). These solemn words do show a consciousness that the Jewish people recognized their guilt and were even proud of it. But Pilate could not wash away his own guilt that easily. The water did not wash away the blood of Jesus from his hands any more than Lady Macbeth could wash away the blood-stains from her lily-white hands. One legend tells that in storms on Mt. Pilatus in Switzerland his ghost comes out and still washes his hands in the stormclouds. There was guilt enough for Judas, for Caiaphas and for all the Sanhedrin both Sadducees and Pharisees, for the Jewish people as a whole ( $\pi \alpha \varsigma$ о $\lambda \alpha \sigma \varsigma$ ), and for Pilate. At bottom the sins of all of us nailed Jesus to the Cross. This language is no excuse for race hatred today, but it helps explain the sensitiveness between Jew and Christians on this subject. And Jews today approach the subject of the Cross with a certain amount of prejudice.

## Matt 27:26

Scourged ( $\varphi \rho \alpha \gamma \varepsilon \lambda \lambda \omega \sigma \alpha \varsigma)$. The Latin verb flagellare. Pilate apparently lost interest in Jesus when he discovered that he had no friends in the crowd. The religious leaders had been eager to get Jesus condemned before many of the Galilean crowd friendly to Jesus came into the city. They had apparently succeeded. The scourging before the crucifixion was a brutal Roman custom. The scourging was part of the capital punishment. Deissmann (Light from the Ancient East, p. 269) quotes a Florentine papyrus of the year 85 A.D. wherein G. Septimius Vegetus, governor of Egypt, says of a certain Phibion: "Thou hadst been worthy of scourging ... but I will give thee to the people."

## Matt 27:27

Into the palace ( $\varepsilon \iota \varsigma$ тo $\pi \rho \alpha \iota \tau \omega \rho \iota v$ ). In Rome the praetorium was the camp of the praetorian (from praetor) guard of soldiers (Php 1:13), but in the provinces it was the palace in which the governor resided as in Ac 23:35 in Caesarea. So here in Jerusalem Pilate ordered Jesus and all the band or cohort (o $\lambda \eta \nu \tau \eta \nu \sigma \pi \varepsilon \iota \rho \alpha \nu$ ) of soldiers to be led into the palace in front of which the judgment-seat had been placed. The Latin spira was anything rolled into a circle like a twisted ball of thread. These Latin words are natural here in the atmosphere of the court and the military environment. The soldiers were gathered together for the sport
of seeing the scourging. These heathen soldiers would also enjoy showing their contempt for the Jews as well as for the condemned man.

Matt 27:28
A scarlet robe ( $\chi \lambda \alpha \mu \nu \delta \alpha$ коккıv $\eta$ ). A kind of short cloak worn by soldiers, military officers, magistrates, kings, emperors (2Macc. 12:35; Josephus, Ant. V. 1,10), a soldier's sagum or scarf. Carr (Cambridge Gk. Test.) suggests that it may have been a worn-out scarf of Pilate's. The scarlet colour (коккı $\nu \nu$ ) was a dye derived from the female insect ( $\kappa \varepsilon \rho \mu \varepsilon \varsigma$ ) which gathered on the $\iota \lambda \varepsilon \xi$ ХоХХ $\varphi \varepsilon \rho \alpha$ found in Palestine. These dried clusters of insects look like berries and form the famous dye. The word occurs in Plutarch, Epictetus, Herodas, and late papyri besides the Septuagint and New Testament. Mark (Mr 15:17) has "purple" ( $\pi о \rho \varphi \cup \rho \alpha v$ ). There are various shades of purple and scarlet and it is not easy to distinguish these colours or tints. The manuscripts vary here between "stripped" ( $\varepsilon \kappa \delta v \sigma \alpha v \tau \varepsilon \varsigma)$ and "clothed" ( $\varepsilon v \delta v \sigma a v \tau \varepsilon \varsigma)$. He had been stripped for the scourging. If "clothed" is correct, the soldiers added the scarlet (purple) mantle. Herodotus (iii. 139) relates that Darius richly rewarded a Samian exile for a rare scarlet robe which he obtained from him. This scarlet mantle on Jesus was mock imitation of the royal purple.

Matt 27:29
A crown of thorns ( $\sigma \tau \varepsilon \varphi \alpha v o v \varepsilon \xi \alpha \kappa \alpha v \theta \omega v$ ). They wove a crown out of thorns which would grow even in the palace grounds. It is immaterial whether they were young and tender thorn bushes, as probable in the spring, or hard bushes with sharp prongs. The soldiers would not care, for they were after ridicule and mockery even if it caused pain. It was more like a victor's garland ( $\sigma \tau \varepsilon \varphi \alpha v o v$ ) than a royal diadem ( $\delta i \alpha \delta \eta \mu \alpha)$, but it served the purpose. So with the reed ( $\kappa \alpha \lambda \alpha \mu \circ v$ ), a stalk of common cane grass which served as sceptre. The soldiers were familiar with the Ave Caesar and copy it in their mockery of Jesus:

Hail, King of the Jews ( $\chi \alpha \iota \rho \varepsilon$, Baбı $\lambda \varepsilon v \tau \omega v$ Iov $\delta a \iota \omega v$ ). The soldiers added the insults used by the Sanhedrin (Mt 26:67), spitting on him and smiting him with the reed. Probably Jesus had been unbound already. At any rate the garments of mockery were removed before the via dolorosa to the cross (verse 31).

Matt 27:32
Compelled ( $\eta \gamma \gamma \alpha \rho \varepsilon \cup \sigma \alpha v$ ). This word of Persian origin was used in Mt 5:41, which see. There are numerous papyri examples of Ptolemaic date and it survives in modern Greek vernacular. So the soldiers treat Simon of Cyrene (a town of Libya) as a Persian courier ( $\alpha \gamma \gamma \alpha \rho \circ \varsigma$ ) and impress him into service, probably because Jesus was showing signs of physical weakness in bearing his own Cross as the victims had to do, and not as a mere jest on Simon. "Gethsemane, betrayal, the ordeal of the past sleepless night, scourging, have made the flesh weak" (Bruce). Yes, and the burden of $\sin$ of the world that was breaking his heart.

His cross ( $\tau 0 v \sigma \tau \alpha \cup \rho o v a v \tau o v)$. Jesus had used the term cross about himself ( 16:24). It was a familiar enough picture under Roman rule. Jesus had long foreseen and foretold this horrible form of death for himself (Mt 20:19; 23:24; 26:2). He had heard the cry of the mob to Pilate that he be crucified (27:22) and Pilate's surrender (27:26) and he was on the way to the Cross (27:31). There were various kinds of crosses and we do not know precisely the shape of the Cross on which Jesus was crucified, though probably the one usually presented is correct. Usually the victim was nailed (hands and feet) to the cross before it was raised and it was not very high. The crucifixion was done by the soldiers ( $27: 35$ ) in charge and two robbers were crucified on each side of Jesus, three crosses standing in a row (27:38).

Matt 27:33
Golgotha (Го $\lambda \gamma_{0} \theta \alpha$ ). Chaldaic or Aramaic Gulgatha, Hebrew Gulgoleth, place of a skull-shaped mount, not place of skulls. Latin Vulgate Calvariae locus, hence our Calvary. Tyndale misunderstood it as a place of dead men's skulls. Calvary or Golgotha is not the traditional place of the Holy Sepulchre in Jerusalem, but a place outside of the city, probably what is now called Gordon's Calvary, a hill north of the city wall which from the Mount of Olives looks like a skull, the rock-hewn tombs resembling eyes in one of which Jesus may have been buried.

Matt 27:34
Wine mingled with gall (ovov $\mu \varepsilon \tau \alpha \chi о \lambda \eta \varsigma \mu \varepsilon \mu \tau \gamma \mu \varepsilon v o v)$ ). Late MSS. read
vinegar ( $\mathrm{o} \xi_{\mathrm{oc}}$ ) instead of wine and Mark (Mr 15:23) has myrrh instead of gall. The myrrh gave the sour wine a better flavour and like the bitter gall had a narcotic and stupefying effect. Both elements may have been in the drink which Jesus tasted and refused to drink. Women provided the drink to deaden the sense of pain and the soldiers may have added the gall to make it disagreeable. Jesus desired to drink to the full the cup from his Father's hand (Joh 18:11).

Matt 27:36
Watched him there ( $\varepsilon \tau \eta \rho o u v$ avtov $\varepsilon \kappa \varepsilon$ ). Imperfect tense descriptive of the task to prevent the possibility of rescue or removal of the body. These rough Roman soldiers casting lots over the garments of Christ give a picture of comedy at the foot of the Cross, the tragedy of the ages.

Matt 27:37
His accusation ( $\tau \eta v$ aı $\tau \iota \alpha v$ avtov). The title ( $\tau \iota \tau \lambda o \varsigma$, Joh 19:19) or placard of the crime (the inscription, $\varepsilon \varepsilon \pi \downarrow \gamma \rho \alpha \varphi \eta$ ) which was carried before the victim or hung around his neck as he walked to execution was now placed above ( $\varepsilon \pi^{\prime} \alpha v \omega$ ) the head of Jesus on the projecting piece ( $\chi \rho \cup \xi ~ \mu \mu \nu \rho \cup \varsigma)$. This inscription gave the name and home,

Jesus of Nazareth, and the charge on which he was convicted,
the King of the Jews and the identification,

This is . The four reports all give the charge and vary in the others. The inscription in full was: This is Jesus of Nazareth the King of the Jews. The three languages are mentioned only by John (Joh 19:20 ), Latin for law, Hebrew (Aramaic) for the Jews, Greek for everybody. The accusation (charge, cause, aitia) correctly told the facts of the condemnation.

Matt 27:38
Robbers ( $\lambda \eta \iota \sigma \tau \alpha$ ). Not thieves ( $\kappa \lambda \varepsilon \pi \tau \alpha$ ) as in Authorized Version. See Mt 26:55. These two robbers were probably members of the band of Barabbas on whose cross Jesus now hung.

Matt 27:39
Wagging their heads ( $\kappa เ v o u v \tau \varepsilon \varsigma \tau \alpha \varsigma ~ \kappa \varepsilon \varphi \alpha \lambda \alpha \varsigma ~ \alpha \cup \tau \omega v)$ ). Probably in mock commiseration. "Jews again appear on the scene, with a malice like that shewn in the trial before the Sanhedrin" (McNeile). "To us it may seem incredible that even his worst enemies could be guilty of anything so brutal as to hurl taunts at one suffering the agonies of crucifixion" (Bruce). These passers-by ( $\pi \alpha \rho \alpha \tau \eta \rho o u \mu \varepsilon v o)$ look on Jesus as one now down and out. They jeer at the fallen foe.

Matt 27:40
If thou art the Son of God ( $\varepsilon v i o \varsigma \varepsilon$ tov $\theta \varepsilon o v)$. More exactly, "If thou art a son of God," the very language of the devil to Jesus (Mt 4:3) in the early temptations, now hurled at Jesus under the devil's prompting as he hung upon the Cross. There is allusion, of course, to the claim of Jesus under oath before the Sanhedrin "the Son of God" (o voç tov $\theta$ rov) and a repetition of the misrepresentation of his words about the temple of his body. It is a pitiful picture of human depravity and failure in the presence of Christ dying for sinners.

Matt 27:41
The chief priests mocking (o $\alpha \rho \chi เ \varepsilon \rho \varepsilon ı \varsigma \varepsilon \mu \pi \alpha!\zeta о \nu \tau \varepsilon \varsigma)$. The Sanhedrin in fact, for "the scribes and elders" are included. The word for mocking ( $\varepsilon \mu \pi \alpha \iota \zeta$ оv $\tau \varepsilon \sigma, \varepsilon \nu$, and $\pi \alpha \iota \zeta \omega$, from
 reverend seniors had already given vent to their glee at the condemnation of Jesus by themselves (Mt 26:67f. ).

Matt 27:42
He saved others; himself he cannot save ( $\alpha \lambda \lambda o u c \varepsilon \sigma \omega \sigma \varepsilon v ;$ عautov ov $\delta u v a \tau \alpha \sigma \omega \sigma \alpha$ ). The sarcasm is true, though they do not know its full significance. If he had saved himself now, he could not have saved any one. The paradox is precisely the philosophy of life proclaimed by Jesus himself (Mt 10:39).

Let him now come down ( $\kappa \alpha \tau \alpha \beta \alpha \tau \omega v v v$ ). Now that he is a condemned criminal nailed to the Cross with the claim of being "the King of Israel" (the Jews) over his head. Their spiteful assertion that they would then believe upon Jesus ( $\varepsilon \pi^{\prime}$ avtov) is plainly untrue. They would have shifted their ground and invented some other excuse. When Jesus wrought his greatest miracles, they wanted "a sign from heaven." These "pious scoffers" (Bruce) are like
many today who make factitious and arbitrary demands of Christ whose character and power and deity are plain to all whose eyes are not blinded by the god of this world. Christ will not give new proofs to the blind in heart.

Matt 27:43
Let him deliver him now ( $\rho v \sigma \alpha \sigma \theta \omega v v v$ ). They add the word "now" to Ps 21; 22:8. That is the point of the sneer at Christ's claim to be God's son thrown in his teeth again and at the willingness and power of God to help his "son." The verb $\theta \varepsilon \lambda \omega$ here may mean
love as in the Septuagint (Ps 18:20; 41:12 ) or "cares for" (Moffatt), "gin he cares ocht for him" (Braid Scots).

Matt 27:44
The robbers also ( $\kappa \alpha$ о $\lambda \eta \iota \sigma \tau \alpha$ ). Probably "even the robbers" (Weymouth) who felt a momentary superiority to Jesus thus maligned by all. So the inchoative imperfect $\omega v \varepsilon \iota \delta \iota \zeta o v$ means "began to reproach him."

Matt 27:45
From the sixth hour ( $\alpha \pi \sigma \varepsilon \kappa \tau \eta \varsigma \omega \rho a \varsigma$ ). Curiously enough McNeile takes this to mean the trial before Pilate (Joh 18:14 ). But clearly John uses Roman time, writing at the close of the century when Jewish time was no longer in vogue. It was six o'clock in the morning Roman time when the trial occurred before Pilate. The crucifixion began at the third hour (Mr 15:25 ) Jewish time or nine A.M. The darkness began at noon, the sixth hour Jewish time and lasted till 3 P.M. Roman time, the ninth hour Jewish time (Mr 15:33; Mt 27:45; Lu 23:44 ). The dense darkness for three hours could not be an eclipse of the sun and Luke (Lu 23:45 ) does not so say, only "the sun's light failing." Darkness sometimes precedes earthquakes and one came at this time or dense masses of clouds may have obscured the sun's light. One need not be disturbed if nature showed its sympathy with the tragedy of the dying of the Creator on the Cross (Ro 8:22 ), groaning and travailing until now.

Matt 27:46
My God, My God, why hast thou forsaken me? ( $\Theta \varepsilon \varepsilon \mu o v, \forall \varepsilon \varepsilon \mu \nu v, ~ \imath v \alpha \tau \mu \varepsilon$ $\varepsilon ү \kappa \alpha \tau \varepsilon \lambda \iota \tau \varepsilon \sigma ;)$. Matthew first transliterates the Aramaic, according to the Vatican manuscript (B), the words used by Jesus: Eloi, eloi, lema sabachthanei; Some of the MSS. give the transliteration of these words from Ps 22:1 in the Hebrew (Eli, Eli, lama Zaphthanei). This is the only one of the seven sayings of Christ on the Cross given by Mark and Matthew. The other six occur in Luke and John. This is the only sentence of any length in Aramaic preserved in Matthew, though he has Aramaic words like amen, corban, mammon, pascha, raca, Satan, Golgotha. The so-called Gospel of Peter preserves this saying in a Docetic (Cerinthian) form: "My power, my power, thou hast forsaken me!" The Cerinthian Gnostics held that the aeon Christ came on the man Jesus at his baptism and left him here on the Cross so that only the man Jesus died. Nothing from Jesus so well illustrates the depth of his suffering of soul as he felt himself regarded as sin though sinless (2Co 5:21). Joh 3:16 comes to our relief
here as we see the Son of God bearing the sin of the world. This cry of desolation comes at the close of the three hours of darkness.

Matt 27:48
Gave him to drink ( $\varepsilon \pi \sigma \tau \iota \zeta \varepsilon v$ ). Imperfect of conative action,
offered him a drink of vinegar on the sponge on a reed. Others interrupted this kindly man, but Jesus did taste this mild stimulant (Joh 19:30) for he thirsted (Joh 19:28).

Matt 27:49
 a pious sound as they misunderstood the words of Jesus in his outcry of soul anguish. We have here one of the rare instances ( $\sigma \omega \sigma \omega v$ ) of the future participle to express purpose in the N.T. though a common Greek idiom. Some ancient MSS. add here what is genuine in Joh 19:34, but what makes complete wreck of the context for in verse 50 Jesus cried with a loud voice and was not yet dead in verse 49. It was a crass mechanical copying by some scribe from Joh 19:34. See full discussion in my Introduction to the Textual Criticism of the N.T.

Matt 27:50
Yielded up his spirit ( $\alpha \varphi \eta \kappa \varepsilon \nu$ тo $\pi v \varepsilon \nu \mu \alpha$ ). The loud cry may have been Ps 31:5 as given in Lu 23:46 : "Father, into thy hands I commend my spirit." John (Joh 19:30) gives

It is finished ( $\tau \varepsilon \tau \varepsilon \lambda \varepsilon \sigma \tau \alpha)$, though which was actually last is not clear. Jesus did not die from slow exhaustion, but with a loud cry.

He breathed out ( $\varepsilon \xi \varepsilon \pi v \varepsilon v \sigma \varepsilon v$, Mr 15:37),
sent back his spirit (Mt 27:50),
gave up his spirit ( $\pi \alpha \rho \varepsilon \delta \omega \kappa \varepsilon \nu$ то $\pi \nu \varepsilon \cup \mu \alpha$, Joh 19:30). "He gave up his life because he willed it, when he willed it, and as he willed it" (Augustine). Stroud (Physical Cause of the Death of Christ) considers the loud cry one of the proofs that Jesus died of a ruptured heart as a result of bearing the sin of the world.

Matt 27:51
Was rent ( $\varepsilon \sigma \chi ı \sigma \theta)$ ). Both Mark ( $\operatorname{Mr} 15: 38$ ) and Luke (Lu 23:45) mention also this fact. Matthew connects it with the earthquake, "the earth did quake" ( $\eta \quad \gamma \eta \varepsilon \sigma \varepsilon \iota \theta \eta$ ). Josephus (War VI. 299) tells of a quaking in the temple before the destruction and the Talmud tells of a quaking forty years before the destruction of the temple. Allen suggests that "a cleavage in the masonry of the porch, which rent the outer veil and left the Holy Place open to view, would account for the language of the Gospels, of Josephus, and of the Talmud." This veil was a most elaborately woven fabric of seventy-two twisted plaits of twenty-four threads each and the veil was sixty feet long and thirty wide. The rending of the veil signified the removal of the separation between God and the people (Gould).

Matt 27:52

The tombs were opened ( $\tau \alpha \mu v \eta \mu \varepsilon ı \alpha \alpha v \varepsilon \omega 1 \chi \theta \eta \sigma \alpha v$ ). First aorist passive indicative (double augment). The splitting of the rocks by the earthquake and the opening of tombs can be due to the earthquake. But the raising of the bodies of the dead after the resurrection of Jesus which appeared to many in the holy city puzzles many today who admit the actual bodily resurrection of Jesus. Some would brand all these portents as legends since they appear in Matthew alone. Others would say that "after his resurrection" should read "after their resurrection," but that would make it conflict with Paul's description of Christ as the first fruits of them that sleep (1Co 15:20). Some say that Jesus released these spirits after his descent into Hades. So it goes. We come back to miracles connected with the birth of Jesus, God's Son coming into the world. If we grant the possibility of such manifestations of God's power, there is little to disturb one here in the story of the death of God's Son.

Matt 27:54
Truly this was the Son of God ( $\alpha \lambda \eta \theta \omega \varsigma \theta$ sov vios $\eta v$ ovtoc). There is no article with God or Son in the Greek so that it means "God's Son," either "the Son of God" or "a Son of God." There is no way to tell. Evidently the centurion (£катоvтархоৎ here, ruler of a hundred, Latin word kenturion in Mr 15:39) was deeply moved by the portents which he had witnessed. He had heard the several flings at Jesus for claiming to be the Son of God and may even have heard of his claim before the Sanhedrin and Pilate. How much he meant by his words we do not know, but probably he meant more than merely "a righteous man" (Lu 23:47). Petronius is the name given this centurion by tradition. If he was won now to trust in Christ, he came as a pagan and, like the robber who believed, was saved as Jesus hung upon the Cross. All who are ever saved in truth are saved because of the death of Jesus on the Cross. So the Cross began to do its work at once.

Matt 27:55
Many women ( $\gamma$ vvaike¢ $\pi о \lambda \lambda \alpha$ ). We have come to expect the women from Galilee to be faithful, last at the Cross and first at the tomb. Luke (Lu 23:49) says that "all his acquaintance" ( $\pi \alpha \nu \tau \varepsilon \varsigma$ o $\gamma \nu \omega \sigma \tau 0 ~ \alpha \cup \tau \omega$ ) stood at a distance and saw the end. One may hope that the apostles were in that sad group. But certainly many women were there. The Mother of Jesus had been taken away from the side of the Cross by the Beloved Disciple to his own home (Joh 19:27). Matthew names three of the group by name. Mary Magdalene is mentioned as a well-known person though not previously named in Matthew's Gospel. Certainly she is not the sinful woman of Lu 7 nor Mary of Bethany. There is another Mary, the mother of James and Joseph (Joses) not otherwise known to us. And then there is the mother of the sons of Zebedee (James and John), usually identified with Salome (Mr 15:40). These noble and faithful women were "beholding from afar" ( $\alpha \pi \sigma \mu \alpha \kappa \rho \circ \theta \varepsilon v \theta \varepsilon \omega \rho о v \sigma \alpha$ ). These three women may have drawn nearer to the Cross for Mary the Mother of Jesus stood beside the Cross ( $\pi \alpha \rho \alpha \tau \omega \sigma \tau \alpha v \rho \omega$ ) with Mary of Clopas and Mary Magdalene (Joh 19:25) before she left. They had once ministered unto Jesus ( $\delta$ ıккоvovба $\alpha \nu \tau \omega$ ) and now he is dead. Matthew
does not try to picture the anguish of heart of these noble women nor does he say as Luke (Lu 23:48) does that "they returned smiting their breasts." He drops the curtain on that saddest of all tragedies as the loyal band stood and looked at the dead Christ on Golgotha. What hope did life now hold for them?

Matt 27:57
And when even was come ( $\quad \psi \iota \alpha \varsigma \delta \varepsilon \gamma \varepsilon v o \mu \varepsilon v \eta \varsigma$ ). It was the Preparation ( $\pi \alpha \rho \alpha \sigma \kappa \varepsilon \cup \eta$ ), the day before the sabbath ( $\mathrm{Mr} 15: 42$; Lu 23:54; Joh 31:42). Парабкعuך is the name in modern Greek today for Friday. The Jews were anxious that these bodies should be taken down before the sabbath began at 6 P.M. The request of Joseph of Arimathea for the body of Jesus was a relief to Pilate and to the Jews also. We know little about this member of the Sanhedrin save his name Joseph, his town Arimathea, that he was rich, a secret disciple, and had not agreed to the death of Jesus. Probably he now wished that he had made an open profession. But he has courage now when others are cowardly and asked for the personal privilege ( $\eta \iota \tau \eta \sigma \pi \tau$, middle voice, asked for himself) of placing the body of Jesus in his new tomb. Some today identify this tomb with one of the rock tombs now visible under Gordon's Calvary. It was a mournful privilege and dignity that came to Joseph and Nicodemus (Joh 19:39-41) as they wrapped the body of Jesus in clean linen cloth and with proper spices placed it in this fresh ( $\kappa \alpha \iota v \omega$ ) tomb in which no body had yet been placed. It was cut in the rock ( $\varepsilon \lambda \alpha \tau \circ \mu \eta \sigma \varepsilon v$ ) for his own body, but now it was for Jesus. But now (verse 60 ) he rolled a great stone to the door of the tomb and departed. That was for safety. But two women had watched the sad and lonely ceremony, Mary Magdalene and the other Mary (mother of James and Joseph). They were sitting opposite and looking in silence.

Matt 27:63
Sir, we remember ( $\kappa \nu \rho ı \varepsilon, \varepsilon \mu \nu \varepsilon \sigma \theta \eta \mu \varepsilon v$ ). This was the next day, on our Saturday, the Jewish Sabbath, the day after the Preparation (Mt 27:62 ). Ingressive aorist indicative, we have just recalled. It is objected that the Jewish rulers would know nothing of such a prediction, but in Mt 12:40 he expressly made it to them. Meyer scouts as unhistorical legend the whole story that Christ definitely foretold his resurrection on the third day. But that is to make legendary much of the Gospels and to limit Jesus to a mere man. The problem remains why the disciples forgot and the Jewish leaders remembered. But that is probably due on the one hand to the overwhelming grief of the disciples coupled with the blighting of all their hopes of a political Messiah in Jesus, and on the other hand to the keen nervous fear of the leaders who dreaded the power of Jesus though dead. They wanted to make sure of their victory and prevent any possible revival of this pernicious heresy.

That deceiver ( $\varepsilon \kappa \varepsilon เ v o \varsigma$ o $\pi \lambda \alpha v o \varsigma)$ they call him, a vagabond wanderer ( $\pi \lambda \alpha v o \varsigma$ ) with a slur in the use of
that (عкعivoc), a picturesque sidelight on their intense hatred of and fear of Jesus.
Matt 27:64

The last error ( $\eta \varepsilon \sigma \chi \alpha \tau \eta \pi \lambda \alpha \nu \eta$ ). The last delusion, imposture (Weymouth), fraud (Moffatt). Latin error is used in both senses, from errare, to go astray. The first fraud was belief in the Messiahship of Jesus, the second belief in his resurrection.

Matt 27:65
Make it as sure as you can ( $\alpha \sigma \varphi \alpha \lambda_{\perp \sigma \alpha \sigma \theta \varepsilon \omega \varsigma ~ o ı \delta \alpha \tau \varepsilon) . ~ " M a k e ~ i t ~ s e c u r e ~ f o r ~ y o u r s e l v e s ~}^{\text {. }}$ (ingressive aorist middle) as you know how."

Have a guard ( $\varepsilon \chi \varepsilon \tau \varepsilon$ коvбт $\omega \delta \iota \alpha v$ ), present imperative, a guard of Roman soldiers, not mere temple police. The Latin term koustodia occurs in an Oxyrhynchus papyrus of A.D. 22. "The curt permission to the Jews whom he despised is suitable in the mouth of the Roman official" (McNeile).

Matt 27:66
Sealing the stone, the guard being with them ( $\sigma \varphi \rho \alpha \gamma \vdash \sigma \alpha \tau \eta \varsigma$ тov $\lambda_{1} \theta \circ v \mu \varepsilon \tau \alpha \tau \eta \varsigma$ кovot $\omega \delta$ Iac). Probably by a cord stretched across the stone and sealed at each end as in Da 6:17. The sealing was done in the presence of the Roman guard who were left in charge to protect this stamp of Roman authority and power. They did their best to prevent theft and the resurrection (Bruce), but they overreached themselves and provided additional witness to the fact of the empty tomb and the resurrection of Jesus (Plummer).

## Matthew 28

Matt 28:1
Now late on the sabbath as it began to dawn toward the first day of the week (o $\psi \varepsilon$ $\delta \varepsilon \sigma \alpha \beta \beta \alpha \tau \omega v, \tau \eta \varepsilon \pi \iota \varphi \omega \sigma \kappa о v \sigma \eta \varepsilon \iota \varsigma \mu \iota \alpha \nu \sigma \alpha \beta \beta \alpha \tau \omega \nu)$. This careful chronological statement according to Jewish days clearly means that before the sabbath was over, that is before six P.M., this visit by the women was made "to see the sepulchre" ( $\theta \varepsilon \sigma \rho \eta \sigma \alpha$ тov $\tau \alpha \varphi o v$ ). They had seen the place of burial on Friday afternoon (Mr 15:47; Mt 27:61; Lu 23:55 ). They had rested on the sabbath after preparing spices and ointments for the body of Jesus (Lu 23:56 ), a sabbath of unutterable sorrow and woe. They will buy other spices after sundown when the new day has dawned and the sabbath is over (Mr 16:1). Both Matthew here and Luke (Lu 23:54) use dawn $(\varepsilon \pi \iota \varphi \omega \sigma \kappa \omega)$ for the dawning of the twenty-four hour-day at sunset, not of the dawning of the twelve-hour day at sunrise. The Aramaic used the verb for dawn in both senses. The so-called Gospel of Peter has $\varepsilon \pi \iota \varphi \omega \sigma \kappa \omega$ in the same sense as Matthew and Luke as does a late papyrus. Apparently the Jewish sense of "dawn" is here expressed by this Greek verb. Allen thinks that Matthew misunderstands Mark at this point, but clearly Mark is speaking of sunrise and Matthew of sunset. Why allow only one visit for the anxious women?

## Matt 28:2

There was a great earthquake ( $\sigma \varepsilon \iota \sigma \mu \circ \varsigma \varepsilon \gamma \varepsilon v \varepsilon \tau о \mu \varepsilon \gamma \alpha \varsigma)$. Clearly not the earthquake of 27:51. The precise time of this earthquake is not given. It was before sunrise on the first day of the week when the women made the next visit. Matthew alone relates the coming of the angel of the Lord who rolled away the stone and was sitting upon it ( $\alpha \pi \varepsilon \kappa \cup \lambda ı \sigma \varepsilon \tau o v \lambda_{ı} \theta$ ov $\kappa \alpha \varepsilon \kappa \alpha \theta \eta \tau о \varepsilon \pi \alpha v \omega \alpha v \tau о v)$. If one is querulous about these supernatural phenomena, he should reflect that the Resurrection of Jesus is one of the great supernatural events of all time. Cornelius $\boxtimes$ Lapide dares to say: "The earth, which trembled with sorrow at the Death of Christ as it were leaped for joy at His Resurrection." The Angel of the Lord announced the Incarnation of the Son of God and also His Resurrection from the grave. There are apparent inconsistencies in the various narratives of the Resurrection and the appearances of the Risen Christ. We do not know enough of the details to be able to reconcile them. But the very variations strengthen the independent witness to the essential fact that Jesus rose from the grave. Let each writer give his own account in his own way. The stone was rolled away not to let the Lord out, but to let the women in to prove the fact of the empty tomb (McNeile).

Matt 28:3
Appearance $(\varepsilon ו \delta \varepsilon \alpha)$. Here only in the N.T. Compare $\mu о \rho \varphi \eta$ and $\sigma \chi \eta \mu \alpha$.
Matt 28:4

The watchers did quake ( $\varepsilon \sigma \varepsilon \propto \theta \eta \sigma \alpha \nu$ o $\tau \eta \rho o u v \tau \varepsilon \varsigma)$. And no wonder that they became as dead men and fled before the women came.

Matt 28:5
Unto the women ( $\tau \alpha ı \varsigma ~ \gamma v v a ı \xi ı v$ ). According to John, Mary Magdalene had left to go and tell Peter and John of the supposed grave robbery (Joh 20:1f. ). But the other women remained and had the interview with the angel (or men, Luke) about the empty tomb and the Risen Christ.

Jesus the Crucified (I $\eta \sigma o u v$ tov $\varepsilon \sigma \tau \alpha \cup \rho \omega \mu \varepsilon v o v$ ). Perfect passive participle, state of completion. This he will always be. So Paul will preach as essential to his gospel "and this one crucified" (ка тoutov $\varepsilon \sigma \tau \alpha \cup \rho \omega \mu \varepsilon v o v, ~ 1 C o ~ 2: 2 ~) . ~$

Matt 28:6
Risen from the dead ( $\eta \gamma \varepsilon \rho \theta \eta \alpha \pi \sigma \tau \omega \nu \nu \varepsilon \kappa \rho \omega v$ ).
Jesus the Risen. This is the heart of the testimony of the angel to the women. It is what Paul wishes Timothy never to forget (2Ti 2:8), "Jesus Christ risen from the dead" (Inoouv Xpıбтоv $\varepsilon \gamma \eta \gamma \varepsilon \rho \mu \varepsilon v o v \varepsilon \kappa \nu \varepsilon \kappa \rho \omega v$ ). They were afraid and dazzled by the glory of the scene, but the angel said, "Come, see the place where the Lord lay" ( $\delta \varepsilon \cup \tau \varepsilon ~ t \delta \varepsilon \tau \varepsilon ~ \tau о \nu ~ \tau о т о v ~ о п о и ~$ єкєıто о Kирıоৎ). Some MSS. do not have o Kvpıo¢, but he is the subject of $\varepsilon \kappa \varepsilon ı \tau$. His body was not there. It will not do to say that Jesus arose in spirit and appeared alive though his body remained in the tomb. The empty tomb is the first great fact confronting the women and later the men. Various theories were offered then as now. But none of them satisfy the evidence and explain the survival of faith and hope in the disciples that do not rest upon the fact of the Risen Christ whose body was no longer in the tomb.

Matt 28:7
He goeth before you into Galilee ( $\pi \rho \circ \alpha \gamma \varepsilon v \mu a \varsigma \varepsilon \varepsilon \varsigma \tau \eta \nu \Gamma \alpha \lambda_{\lambda} \lambda \alpha \iota \alpha v$ ). Jesus did appear to the disciples in Galilee on two notable occasions (by the beloved lake, Joh 21 , and on the mountain, Mt 28:16-20 ). Probably before the women were permitted to tell this story in full to the disciples who scouted as idle talk (Joh 24:11 ) their first accounts, Jesus appeared to various disciples in Jerusalem on this first great Sunday. Jesus did not say that he would not see any of them in Jerusalem. He merely made a definite appointment in Galilee which he kept.

Matt 28:8
With fear and great joy ( $\mu \varepsilon \tau \alpha$ чоßоv ка $\chi \alpha \rho \alpha \varsigma \mu \varepsilon \gamma \alpha \lambda \eta \zeta$ ). A touch of life was this as the excited women ran quickly ( $\tau \alpha \chi \cup \varepsilon \delta \rho \alpha \mu \circ v$ ) as they had been told "to bring his disciples
 possible to have. Mark calls it fear and ecstasy. Anything seemed possible now. Mark even says that at first they told no one anything for they were afraid (Mr 16:9) , the tragic close of the text of Mark in Aleph and B, our two oldest manuscripts. But these mingled emotions of ecstasy and dread need cause no surprise when all things are considered.

Matt 28:9
Jesus met them (I $\eta \sigma o v \varsigma ~ v \pi \eta \nu \tau \eta \sigma \varepsilon v \alpha \cup \tau \alpha ı \varsigma) . ~ C a m e ~ s u d d e n l y ~ f a c e ~ t o ~ f a c e ~(~ \alpha \nu \tau \alpha \omega, ~ v \pi o) ~$ with them as they brooded over the message of the angel and the fact of the empty tomb (associative instrumental, avtaıc). Cf. 8:34; 24:1-6 . Probably the lost portion of Mark's Gospel contained the story of this meeting with Jesus which changed their fears into joy and peace. His greeting was the ordinary "Hail" ( $\chi$ aı $\rho \tau \varepsilon$ ). They fell at his feet and held them in reverence while they worshipped him. Jesus allowed this act of worship though he forbade eager handling of his body by Mary Magdalene (Joh 20:17 ). It was a great moment of faith and cheer.

Matt 28:10
Fear not ( $\mu \eta \varphi \circ \beta \varepsilon \iota \sigma \theta \varepsilon$ ). They were still afraid for joy and embarrassment. Jesus calms their excitement by the repetition of the charge from the angel for the disciples to meet him in Galilee. There is no special mention of Peter ("and Peter") as in Mr 16:7, but we may be sure that the special message to Peter was delivered.

Matt 28:11
Told unto the chief priests ( $\alpha \pi \eta \gamma \gamma \varepsilon ı \lambda \alpha \nu$ тoıc $\alpha \rho \chi ı \varepsilon \rho \varepsilon \cup \sigma เ v$ ). These Roman soldiers had been placed at the disposal of the Sanhedrin. They were probably afraid also to report to Pilate and tell him what had happened. They apparently told a truthful account as far as they understood it. But were the Sanhedrin convinced of the resurrection of Jesus?

Matt 28:12
They gave large money ( $\alpha \rho \gamma \cup \rho ı \alpha$ เкаvа $\varepsilon \delta \omega \kappa \alpha \nu$ ). The use of the plural for pieces of silver ( $\alpha \rho \gamma \cup \rho ı \alpha)$ is common. The papyri have many instances of tкava for considerable (from $\kappa \kappa \alpha \omega \omega$, to reach to, attain to). These pious Sanhedrists knew full well the power of bribes. They make a contract with the Roman soldiers to tell a lie about the resurrection of Jesus as they paid Judas money to betray him. They show not the slightest tendency to be convinced by the facts though one had risen from the dead.

Matt 28:13
Stole him away while we slept ( $\varepsilon \kappa \lambda \varepsilon \psi \alpha v ~ a v \tau o v \eta \mu \omega v \kappa о \mu \omega \mu \varepsilon \nu \omega v$ ). Genitive absolute. An Irish bull on the face of it. If they were asleep they would not know anything about it.

Matt 28:14
We will persuade him, and rid you of care ( $\eta \mu \varepsilon \iota \varsigma ~ \pi \varepsilon เ \sigma о \mu \varepsilon v ~ к а ~ v \mu а \varsigma ~ а \mu \varepsilon \rho ц \mu \nu о \nu \varsigma ~$ $\pi o 亢 \eta \sigma o \mu \varepsilon v)$. They would try money also on Pilate and assume all responsibility. Hence the soldiers have no anxiety ( $\alpha \mu \varepsilon \rho \mu \nu 0 \nu \varsigma$, alpha privative and $\mu \varepsilon \rho \mu \nu \alpha \omega$, to be anxious). They lived up to their bargain and this lie lives on through the ages. Justin (Dial. 108) accuses the Jews of spreading the charge. Bengel: Quam laboriosum bellum mendacii contra veritatem.

It was spread about ( $\delta \Sigma \varepsilon \varphi \eta \mu / \sigma \theta \eta$ ) diligently by the Jews to excuse their disbelief in the Messiahship of Jesus.

Matt 28:17

But some doubted (o $\delta \varepsilon \varepsilon \delta \iota \sigma \tau \alpha \sigma \alpha v$ ). From $\delta \iota \varsigma$ (in two, divided in mind). Cf. Mt 14:31 . The reference is not to the eleven who were all now convinced after some doubt, but to the others present. Paul states that over five hundred were present, most of whom were still alive when he wrote (1Co 15:6). It is natural that some should hesitate to believe so great a thing at the first appearance of Jesus to them. Their very doubt makes it easier for us to believe. This was the mountain where Jesus had promised to meet them. This fact explains the large number present. Time and place were arranged beforehand. It was the climax of the various appearances and in Galilee where were so many believers. They worshipped ( $\pi \rho \circ \sigma \varepsilon \kappa v v \eta \sigma \alpha v$ ) Jesus as the women had done (28:9). He is now their Risen Lord and Saviour.

Matt 28:18
All authority ( $\pi \alpha \sigma \alpha \varepsilon \xi 0 v \sigma ı \alpha)$. Jesus came close to them ( $\pi \rho \circ \sigma \varepsilon \lambda \theta \omega v$ ) and made this astounding claim. He spoke as one already in heaven with a world-wide outlook and with the resources of heaven at his command. His authority or power in his earthly life had been great (7:29; 11:27; 21:23f. ). Now it is boundless and includes earth and heaven.

Hath been given $(\varepsilon \delta 0 \theta \eta)$ is a timeless aorist (Robertson, Grammar, pp. 836f.). It is the sublimist of all spectacles to see the Risen Christ without money or army or state charging this band of five hundred men and women with world conquest and bringing them to believe it possible and to undertake it with serious passion and power. Pentecost is still to come, but dynamic faith rules on this mountain in Galilee.

Matt 28:19
All the nations ( $\pi \alpha \vee \tau \alpha \tau \alpha \varepsilon \theta v \eta$ ). Not just the Jews scattered among the Gentiles, but the Gentiles themselves in every land. And not by making Jews of them, though this point is not made plain here. It will take time for the disciples to grow into this Magna Charta of the missionary propaganda. But here is the world program of the Risen Christ and it should not be forgotten by those who seek to foreshorten it all by saying that Jesus expected his second coming to be very soon, even within the lifetime of those who heard. He did promise to come, but he has never named the date. Meanwhile we are to be ready for his coming at any time and to look for it joyfully. But we are to leave that to the Father and push on the campaign for world conquest. This program includes making disciples or learners ( $\mu \alpha \forall \eta \tau \varepsilon \cup \sigma \alpha \tau \varepsilon)$ such as they were themselves. That means evangelism in the fullest sense and not merely revival meetings. Baptism in ( $\varepsilon \varsigma \varsigma$, not into) the name of the Father, the Son, and the Holy Spirit, in the name of the Trinity. Objection is raised to this language in the mouth of Jesus as too theological and as not a genuine part of the Gospel of Matthew for the same reason. See Mt 11:27, where Jesus speaks of the Father and the Son as here. But it is all to no purpose. There is a chapter devoted to this subject in my The Christ of the Logia in which the genuineness of these words is proven. The name of Jesus is the essential part of it as is shown in the Acts. Trine immersion is not taught as the Greek Church holds and
practices, baptism in the name of the Father, then of the Son, then of the Holy Spirit. The use of name ( $\mathbf{o v o \mu \alpha}$ ) here is a common one in the Septuagint and the papyri for power or authority. For the use of $\varepsilon \varsigma \varsigma$ with ovo $\mu \alpha$ in the sense here employed, not meaning into, see Mt 10:41f. (cf. also 12:41).

Matt 28:20
Teaching them ( $\delta \iota \delta \alpha \sigma \kappa о \nu \tau \varepsilon \varsigma \alpha v \tau o u \varsigma)$. Christians have been slow to realize the full value of what we now call religious education. The work of teaching belongs to the home, to the church (sermon, Sunday school, young people's work, prayer-meeting, study classes, mission classes), to the school (not mixing of church and state, but moral instruction if not the reading of the Bible), good books which should be in every home, reading of the Bible itself. Some react too far and actually put education in the place of conversion or regeneration. That is to miss the mark. But teaching is part, a weighty part, of the work of Christians.

I am with you ( $\varepsilon \gamma \omega \mu \varepsilon \tau \alpha \nu \mu \omega v$ ). This is the amazing and blessed promise. He is to be with the disciples when he is gone, with all the disciples, with all knowledge, with all power, with them all the days (all sorts of days, weakness, sorrows, joy, power), till the consummation of the age ( $\varepsilon \omega \varsigma \tau \eta \varsigma \sigma u v \tau \varepsilon \lambda \varepsilon I \alpha \varsigma$ tov al $\omega v$ oৎ). That goal is in the future and unknown to the disciples. This blessed hope is not designed as a sedative to an inactive mind and complacent conscience, but an incentive to the fullest endeavor to press on to the farthest limits of the world that all the nations may know Christ and the power of his Risen Life. So Matthew's Gospel closes in a blaze of glory. Christ is conqueror in prospect and in fact. Christian history from that eventful experience on the Mountain in Galilee has been the fulfilment of that promise in as far as we allow God's power to work in us for the winning of the world to Christ, the Risen, all powerful Redeemer, who is with his people all the time. Jesus employs the prophetic present here $(\varepsilon \mu, \mathrm{I} \mathrm{am})$. He is with us all the days till he comes in glory.

## THE GOSPEL ACCORDING TO MARK BY WAY OF INTRODUCTION

One of the clearest results of modern critical study of the Gospels is the early date of Mark's Gospel. Precisely how early is not definitely known, but there are leading scholars who hold that A.D. 50 is quite probable. My own views are given in detail in my Studies in Mark's Gospel. Zahn still argues that the Gospel according to Matthew is earlier than that according to Mark, but the arguments are against him. The framework of Mark's Gospel lies behind both Matthew and Luke and nearly all of it is used by one or the other. One may satisfy himself on this point by careful use of a Harmony of the Gospels in Greek or English. Whether Mark made use of Q (Logia of Jesus) or not is not yet shown, though it is possible. But Mark and Q constitute the two oldest known sources of our Matthew and Luke. We have much of Q preserved in the Non-Markan portions of both Matthew and Luke, though the document itself has disappeared. But Mark's work has remained in spite of its exhaustive use by Matthew and Luke, all except the disputed close. For this preservation we are all grateful. Streeter (The Four Gospels) has emphasized the local use of texts in preserving portions of the New Testament. If Mark wrote in Rome, as is quite possible, his book was looked upon as the Roman Gospel and had a powerful environment in which to take root. It has distinctive merits of its own that helped to keep it in use. It is mainly narrative and the style is direct and simple with many vivid touches, like the historical present of an eyewitness. The early writers all agree that Mark was the interpreter for Simon Peter with whom he was at one time, according to Peter's own statement, either in Babylon or Rome (1Pe 5:13 ).

This Gospel is the briefest of the four, but is fullest of striking details that apparently came from Peter's discourses which Mark heard, such as green grass, flower beds (Mr 6:38 ), two thousand hogs (Mr 5:13 ), looking round about (Mr 3:5,34 ). Peter usually spoke in Aramaic and Mark has more Aramaic phrases than the others, like Boanerges ( $\mathrm{Mr} 3: 17$ ), Talitha cumi (Mr 5:41 ), Korban (Mr 7:11), Ephphatha (Mr 7:34 ), Abba (Mr 14:36 ). The Greek is distinctly vernacular KoinÂ like one-eyed ( $\mu \circ \nu \circ \varphi \theta \alpha \lambda \mu \circ \nu, \mathrm{Mr} 9: 47$ ) as one would expect from both Peter and Mark. There are also more Latin phrases and idioms like centurio (Mr 15:39), quadrans (Mr 12:42 ), flagellare (Mr 15:15 ), speculator (Mr 6:27), census (Mr 12:14 ), sextarius (Mr 7:4 ), praetorium (Mr 15:6), than in the other Gospels, so much so that C. H. Turner raises the question whether Mark wrote first in Latin, or at any rate in Rome. There are some who hold that Mark wrote first in Aramaic, but the facts are sufficiently accounted for by the fact of Peter's preaching and the activity in Rome. Some even think that he wrote the Gospel in Rome while with Peter who suggested and read the manuscript. B.W. Bacon holds that this Gospel has a distinct Pauline flavour and may have had several recensions. The Ur-Marcus theory does not have strong support now. Mark was
once a co-worker with Barnabas and Paul, but deserted them at Perga. Paul held this against Mark and refused to take him on the second mission tour. Barnabas took Mark, his cousin, with him and then he appeared with Simon Peter with whom he did his greatest work. When Mark had made good with Barnabas and Peter, Paul rejoiced and commends him heartily to the Colossians (Col 4:10) In the end Paul will ask Timothy to pick up Mark and bring him along with him to Paul in Rome, for he has found him useful for ministry, this very young man who made such a mistake that Paul would have no more of him. This tribute to Mark by Paul throws credit upon both of them as is shown in my Making Good in the Ministry. The character of the Gospel of Mark is determined largely by the scope of Peter's preaching as we see it in Ac 10:36-42, covering the period in outline from John the Baptist to the Resurrection of Jesus. There is nothing about the birth of the Baptist or of Jesus. This peculiarity of Mark's Gospel cannot be used against the narratives of the Virgin Birth of Jesus in Matthew and Luke, since Mark tells nothing whatever about his birth at all.

The closing passage in the Textus Receptus, Mr 16:9-20, is not found in the oldest Greek Manuscripts, Aleph and B, and is probably not genuine. A discussion of the evidence will appear at the proper place. Swete points out that Mark deals with two great themes, the Ministry in Galilee (Chs. 1 to 9) and the Last Week in Jerusalem (11 to 16) with a brief sketch of the period of withdrawal from Galilee (ch. 10). The first fourteen verses are introductory as Mr 16:9-20 is an appendix. The Gospel of Mark pictures Christ in action. There is a minimum of discourse and a maximum of deed. And yet the same essential pictures of Christ appear here as in the Logia, in Matthew, in Luke, in John, in Paul, in Peter, in Hebrews as is shown in my The Christ of the Logia. The cry of the critics to get back to the Synoptics and away from Paul and John has ceased since it is plain that the Jesus of Mark is the same as the Christ of Paul. There is a different shading in the pictures, but the same picture, Son of God and Son of Man, Lord of life and death, worker of miracles and Saviour from sin. This Gospel is the one for children to read first and is the one that we should use to lay the foundation for our picture of Christ. In my Harmony of the Gospels I have placed Mark first in the framework since Matthew, Luke, and John all follow in broad outline his plan with additions and supplemental material. Mark's Gospel throbs with life and bristles with vivid details. We see with Peter's eyes and catch almost the very look and gesture of Jesus as he moved among men in his work of healing men's bodies and saving men's souls.

## Mark 1

Mark 1:1
The beginning ( $\alpha \rho \chi \eta$ ). There is no article in the Greek. It is possible that the phrase served as a heading or title for the paragraph about the ministry of the Baptist or as the superscription for the whole Gospel (Bruce) placed either by Mark or a scribe. And then the Gospel of Jesus Christ means the Message about Jesus Christ (objective genitive). The word Gospel here ( $\varepsilon v a \gamma \gamma \varepsilon \lambda ı v$ ) comes close to meaning the record itself as told by Mark. Swete notes that each writer has a different starting point ( $\alpha \rho \chi \eta$ ). Mark, as the earliest form of the evangelic tradition, begins with the work of the Baptist, Matthew with the ancestry and birth of the Messiah, Luke with the birth of the Baptist, John with the Preincarnate Logos, Paul with the foundation of each of the churches (Php 4:15).

The Son of God (Hviov $\theta$ cov). Aleph 28, 255 omit these words, but B, D, L, have them and the great mass of the manuscripts have viov $\tau o v \theta \varepsilon o v$. If this is a heading added to what Mark wrote, the heading may have existed early in two forms, one with, one without "Son of God." If Mark wrote the words, there is no reason to doubt the genuineness since he uses the phrase elsewhere.

Mark 1:2
In Isaiah, the prophet $(\varepsilon \nu \tau \omega \operatorname{E\sigma \alpha ı\alpha } \tau \omega \pi \rho o \varphi \eta \tau \eta)$. The quotation comes from Mal 3:1 and Isa 40:3. The Western and Neutral classes read Isaiah, the Alexandrian and Syrian, "the prophets," an evident correction because part of it is from Malachi. But Isaiah is mentioned as the chief of the prophets. It was common to combine quotations from the prophets in testimonia and catenae (chains of quotations). This is Mark's only prophetic quotation on his own account (Bruce).

Mark 1:3
The voice of one crying ( $\varphi \circ \vee \eta \beta \circ \omega v \tau \circ \varsigma)$. God is coming to his people to deliver them from their captivity in Babylon. So the prophet cries like a voice in the wilderness to make ready for the coming of God. When the committee from the Sanhedrin came to ask John who he was, he used this very language of Isaiah (Joh 1:23). He was only a voice, but we can still hear the echo of that voice through the corridor of the centuries.

Paths straight ( $\varepsilon v \theta \varepsilon ı \alpha \varsigma \tau \alpha \varsigma \tau \rho ß$ оиৎ). Automobile highways today well illustrate the wonderful Persian roads for the couriers of the king and then for the king himself. The Roman Empire was knit together by roads, some of which survive today. John had a high and holy mission as the forerunner of the Messiah.

Mark 1:4
John came ( $\varepsilon \gamma \varepsilon v \varepsilon \tau \operatorname{I} \omega \alpha \nu \eta \varsigma)$. His coming was an epoch ( $\varepsilon \gamma \varepsilon v \varepsilon \tau \sigma$ ), not a mere event $(\eta \nu)$. His coming was in accordance with the prophetic picture ( $\kappa \alpha \theta \varsigma, 1: 2)$. Note the same
verb about John in Joh 1:6. The coming of John the Baptizer was the real beginning of the spoken message about Christ. He is described as
the baptizing one ( $o a \pi \tau \iota \zeta \omega \nu$ ) in the wilderness ( $\varepsilon \nu \tau \eta \varepsilon \rho \eta \mu \omega$ ). The baptizing took place in the River Jordan (Mr 1:5,9) which was included in the general term the wilderness or the deserted region of Judea.

Preached the baptism of repentance ( $\kappa \eta \rho v \sigma \sigma \omega \nu \beta \alpha \pi \tau \iota \sigma \mu \alpha \mu \varepsilon \tau \alpha \nu o \iota \alpha \varsigma)$. Heralded a repentance kind of baptism (genitive case, genus case), a baptism marked by repentance. See on Mt 3:2 for discussion of repent, an exceedingly poor rendering of John's great word $\mu \varepsilon \tau \alpha v o l a c$. He called upon the Jews to change their minds and to turn from their sins,
 confessions produced a profound impression as they would now.

Unto remission of sins ( $\varepsilon \iota \varsigma \alpha \varphi \varepsilon \sigma \iota \nu \alpha \mu \alpha \rho \tau \iota \omega v$ ). This is a difficult phrase to translate accurately. Certainly John did not mean that the baptism was the means of obtaining the forgiveness of their sins or necessary to the remission of sins. The trouble lies in the use of $\varepsilon \iota \varsigma$ which sometimes is used when purpose is expressed, but sometimes when there is no such idea as in Mt 10:41 and Mt 12:41. Probably "with reference to" is as good a translation here as is possible. The baptism was on the basis of the repentance and confession of sin and, as Paul later explained (Ro 6:4), was a picture of the death to sin and resurrection to new life in Christ. This symbol was already in use by the Jews for proselytes who became Jews. John is treating the Jewish nation as pagans who need to repent, to confess their sins, and to come back to the kingdom of God. The baptism in the Jordan was the objective challenge to the people.

Mark 1:5
Then went out unto him ( $\varepsilon \xi \varepsilon \pi о \rho \varepsilon v \varepsilon \tau \circ \pi \rho \circ \varsigma \alpha v \tau \sigma v$ ). Imperfect indicative describing the steady stream of people who kept coming to the baptism ( $\varepsilon \beta \alpha \pi \tau \iota \zeta o v \tau o$, imperfect passive indicative, a wonderful sight).

In the river Jordan ( $\varepsilon v \tau \omega$ Io $\rho \delta \alpha \nu \eta \pi \sigma \tau \alpha \mu \omega$ ). In the Jordan river, literally.
Mark 1:6
Clothed with camel's hair ( $\varepsilon v \delta \varepsilon \delta v \mu \varepsilon \nu о \varsigma \tau \rho \succ \chi \varsigma \kappa \alpha \mu \eta \lambda o v)$. Matthew (Mt 3:4) has it a garment $(\varepsilon \nu \delta \nu \mu \alpha)$ of camel's hair. Mark has it in the accusative plural the object of the perfect passive participle retained according to a common Greek idiom. It was, of course, not camel's skin, but rough cloth woven of camel's hair. For the locusts and wild honey, see on Mt 3:4 . Dried locusts are considered palatable and the wild honey, or "mountain honey" as some versions give it ( $\mu \varepsilon \lambda \alpha \gamma \rho \iota o v$ ), was bountiful in the clefts of the rocks. Some Bedouins make their living yet by gathering this wild honey out of the rocks.

Mark 1:7

Mightier than I (o i $\sigma \chi \cup \rho o \tau \varepsilon \rho o \varsigma ~ \mu o v)$ ). In each of the Synoptics. Gould calls it a skeptical depreciation of himself by John. But it was sincere on John's part and he gives a reason for it.

The Latchet ( $\tau \circ v \iota \alpha v \tau \alpha$ ). The thong of the sandal which held it together. When the guest comes into the house, performed by a slave before one enters the bath. Mark alone gives this touch.

Mark 1:8
With water (vסat). So Luke (Lu 3:16 ) the locative case,
in water. Matthew (Mt 3:11) has $\varepsilon v$ (in), both with (in) water and the Holy Spirit. The water baptism by John was a symbol of the spiritual baptism by Jesus.

Mark 1:9
In the Jordan ( $\varepsilon ı \varsigma \operatorname{\tau ov} \operatorname{Iop} \delta \alpha v \eta \nu)$. So in verse $10, \varepsilon \kappa$ тov v $\delta \alpha \tau \circ \varsigma$, out of the water, after the baptism into the Jordan. Mark is as fond of "straightway" ( $\varepsilon \cup \theta \cup \varsigma)$ as Matthew is of "then" (тотะ).

Rent asunder ( $\sigma \times 1$ Цодعvovৎ). Split like a garment, present passive participle. Jesus saw the heavens parting as he came up out of the water, a more vivid picture than the "opened" in Mt 3:16 and Lu 3:21. Evidently the Baptist saw all this and the Holy Spirit coming down upon Jesus as a dove because he later mentions it (Joh 1:32). The Cerinthian Gnostics took the dove to mean the heavenly aeon Christ that here descended upon the man Jesus and remained with him till the Cross when it left him, a sort of forecast of the modern distinction between the Jesus of history and the theological Christ.

Mark 1:11
Thou art ( $\sigma v \varepsilon$ ). So Lu 3:22. Mt 3:17 has
this is (outoc $\varepsilon \sigma \tau \iota v)$ which see. So both Mark and Luke have "in thee," while Matthew has "in whom."

Mark 1:12
Driveth him forth (avtov $\varepsilon \kappa \beta \alpha \lambda \lambda \varepsilon$ ). Vivid word, bolder than Matthew's "was led up" ( $\alpha v \eta \chi \theta \eta$ ) and Luke's "was led" ( $\eta \gamma \varepsilon \tau 0$ ). It is the same word employed in the driving out of demons (Mr 1:34,39). Mark has here "straightway" where Matthew has "then" (see on verse 9). The forty days in the wilderness were under the direct guidance of the Holy Spirit. The entire earthly life of Jesus was bound up with the Holy Spirit from his birth to his death and resurrection.

Mark 1:13
With the wild beasts ( $\mu \varepsilon \tau \alpha \tau \omega v \theta \eta \rho \iota \omega v$ ). Mark does not give the narrative of the three temptations in Matthew and Luke (apparently from the Logia and originally, of course, from Jesus himself). But Mark adds this little touch about the wild beasts in the wilderness. It was the haunt at night of the wolf, the boar, the hyena, the jackal, the leopard. It was lonely and depressing in its isolation and even dangerous. Swete notes that in Ps 90:13 the promise
of victory over the wild beasts comes immediately after that of angelic guardianship cited by Satan in Mt 4:6. The angels did come and minister ( $\delta ı \eta$ кovouv), imperfect tense, kept it up till he was cheered and strengthened. Dr. Tristram observes that some Abyssinian Christians are in the habit of coming to the Quarantania during Lent and fasting forty days on the summit amid the ruins of its ancient cells and chapels where they suppose Jesus was tempted. But we are all tempted of the devil in the city even worse than in the desert.

Mark 1:14
 narrative of the active ministry of Jesus and he is followed by Matthew and Luke. Mark undoubtedly follows the preaching of Peter. But for the Fourth Gospel we should not know of the year of work in various parts of the land (Perea, Galilee, Judea, Samaria) preceding the Galilean ministry. John supplements the Synoptic Gospels at this point as often. The arrest of John had much to do with the departure of Jesus from Judea to Galilee (Joh 4:1-4 ).
 genitive, the gospel that comes from God. Swete observes that repentance ( $\mu \varepsilon \tau \alpha v o l \alpha)$ is the keynote in the message of the Baptist as gospel ( $\varepsilon v a \gamma \gamma \varepsilon \lambda \iota o v$ ) is with Jesus. But Jesus took the same line as John and proclaimed both repentance and the arrival of the kingdom of God. Mark adds to Matthew's report the words "the time is fulfilled" ( $\pi \varepsilon \pi \lambda \eta \rho \omega \tau \alpha$ o кaı $\rho \circ \varsigma)$. It is a significant fact that John looks backward to the promise of the coming of the Messiah and signalizes the fulfilment as near at hand (perfect passive indicative). It is like Paul's fulness of time ( $\pi \lambda \eta \rho \omega \mu \alpha$ tov $\chi \rho \circ v o v$ ) in Ga 4:4 and fulness of the times ( $\pi \lambda \eta \rho \omega \mu \alpha$ тov кaı $\rho \omega v$ ) in Eph 1:10 when he employs the word кaı $\rho \circ \varsigma$, opportunity or crisis as here in Mark rather than the more general term र povoc. Mark adds here also: "and believe in the gospel" (ка $\pi ા \sigma \tau \varepsilon \cup \varepsilon \tau \varepsilon \varepsilon \nu \tau \omega \varepsilon v a \gamma \gamma \varepsilon \lambda เ \omega)$. Both repent and believe in the gospel. Usually faith in Jesus (or God) is expected as in John 14:1. But this crisis called for faith in the message of Jesus that the Messiah had come. He did not use here the term Messiah, for it had come to have political connotations that made its use at present unwise. But the kingdom of God had arrived with the presence of the King. It does make a difference what one believes. Belief or disbelief in the message of Jesus made a sharp cleavage in those who heard him. "Faith in the message was the first step; a creed of some kind lies at the basis of confidence in the Person of Christ, and the occurrence of the phrase $\pi \iota \sigma \tau \cup \varepsilon \tau \varepsilon \varepsilon v \tau \omega \varepsilon v a \gamma \gamma \varepsilon \lambda \iota \omega$ in the oldest record of the teaching of our Lord is a valuable witness to this fact" (Swete).

Mark 1:16
And passing along by the Sea of Galilee ( $\kappa \alpha \pi \alpha \rho \alpha \gamma \omega \nu \pi \alpha \rho \alpha \tau \eta \nu \quad \theta \alpha \lambda \alpha \sigma \sigma \alpha \nu \tau \eta$ Гa入ı入aıa¢). Mark uses $\pi \alpha \rho \alpha$ (along, beside) twice and makes the picture realistic. He catches this glimpse of Christ in action. Casting a
net ( $\alpha \mu \varphi \stackrel{\beta}{ }$ 人 $\lambda$ ov $\tau \alpha \varsigma$ ). Literally casting on both sides, now on one side, now on the other. Matthew (Mt 4:18) has a different phrase which see. There are two papyri examples of the verb $\alpha \mu \varphi \iota \beta \lambda \lambda \lambda \omega$, one verb absolutely for fishing as here, the other with the accusative. It is fishing with a net, making a cast, a haul. These four disciples were fishermen ( $\alpha \lambda_{\imath \varepsilon ı \varsigma) ~}^{\text {) }}$ and were

```
partners ( \(\mu \varepsilon \tau о \chi 0\) ) as Luke states (Lu 5:7).
```

Mark 1:17
Become ( $\gamma \varepsilon v \varepsilon \sigma \theta \alpha$ ). Mark has this word not in Matthew. It would be a slow and long process, but Jesus could and would do it. He would undertake to make fishers of men out of fishermen. Preachers are made out of laymen who are willing to leave their business for service for Christ.

Mark 1:19
A little further (o 0 ı $\gamma 0 v$ ). A Marcan detail.
Mending their nets (катарлıऍоvтаৎ $\tau \alpha \delta ı \kappa \tau v \alpha$ ). See on Mt 4:21. Getting ready that they might succeed better at the next haul.

Mark 1:20
With the hired servants ( $\mu \varepsilon \tau \alpha \tau \omega \nu \mu \iota \sigma \theta \omega \tau \omega \nu$ ). One hired for wages ( $\mu \iota \sigma \theta o \varsigma$ ), a very old Greek word. Zebedee and his two sons evidently had an extensive business in co-operation with Andrew and Simon (Lu 5:7,10 ). Mark alone has this detail of the hired servants left with Zebedee. They left the boat and their father (Mt 4:22) with the hired servants. The business would go on while they left all (Lu 5:11) and became permanent followers of Jesus. Many a young man has faced precisely this problem when he entered the ministry. Could he leave father and mother, brothers and sisters, while he went forth to college and seminary to become a fisher of men? Not the least of the sacrifices made in the education of young preachers is that made by the home folks who have additional burdens to bear because the young preacher is no longer a bread-winner at home. Most young preachers joyfully carry on such burdens after entering the ministry.

Mark 1:21
And taught ( $\varepsilon \delta \mathrm{t} \delta \alpha \sigma \kappa \varepsilon v$ ). Inchoative imperfect, began to teach as soon as he entered the synagogue in Capernaum on the sabbath. The synagogue in Capernaum afforded the best opening for the teaching of Jesus. He had now made Capernaum (Tell Hum) his headquarters after the rejection in Nazareth as explained in $\mathrm{Lu} 4: 16-31$ and $\mathrm{Mt} 4: 13$-16 . The ruins of this synagogue have been discovered and there is even talk of restoring the building since the stones are in a good state of preservation. Jesus both taught ( $\delta \iota \delta \alpha \sigma \kappa \omega$ ) and preached ( $\kappa \eta \rho v \sigma \sigma \omega)$ in the Jewish synagogues as opportunity was offered by the chief or leader of the synagogue ( $\alpha \rho \chi \iota \sigma v \nu \alpha \gamma \omega \gamma \sigma \varsigma)$. The service consisted of prayer, praise, reading of scripture, and exposition by any rabbi or other competent person. Often Paul was invited to speak at such meetings. In Lu 4:20 Jesus gave back the roll of Isaiah to the attendant or
beadle ( $\tau \omega$ v $\pi \eta \rho \varepsilon \tau \eta$ ) whose business it was to bring out the precious manuscript and return it to its place. Jesus was a preacher of over a year when he began to teach in the Capernaum synagogue. His reputation had preceded him (Lu 4:14).

Mark 1:22
They were astonished ( $\varepsilon \xi \varepsilon \pi \lambda \eta \sigma \sigma o v \tau 0)$. Pictorial imperfect as in Lu 4:32 describing the amazement of the audience, "meaning strictly to strike a person out of his senses by some strong feeling, such as fear, wonder, or even joy" (Gould).

And not as their scribes ( $\kappa \alpha$ ou $\omega \varsigma$ o $\gamma \rho \alpha \mu \mu \alpha \tau \varepsilon \varsigma)$. Lu 4:32 has only "with authority" ( $\varepsilon v \varepsilon \xi \circ v \sigma ı \alpha)$. Mark has it "as having authority" ( $\omega \varsigma \varepsilon \chi \omega \nu \varepsilon \xi$ ouđıav). He struck a note not found by the rabbi. They quoted other rabbis and felt their function to be expounders of the traditions which they made a millstone around the necks of the people. By so doing they set aside the word and will of God by their traditions and petty legalism (Mr 7:9,13). They were casuists and made false interpretations to prove their punctilious points of external etiquette to the utter neglect of the spiritual reality. The people noticed at once that here was a personality who got his power (authority) direct from God, not from the current scribes. "Mark omits much, and is in many ways a meagre Gospel, but it makes a distinctive contribution to the evangelic history in showing by a few realistic touches (this one of them) the remarkable personality of Jesus" (Bruce). See on Mt 7:29 for the like impression made by the Sermon on the Mount where the same language occurs. The chief controversy in Christ's life was with these scribes, the professional teachers of the oral law and mainly Pharisees. At once the people see that Jesus stands apart from the old group. He made a sensation in the best sense of that word. There was a buzz of excitement at the new teacher that was increased by the miracle that followed the sermon.

Mark 1:23
With an unclean spirit ( $\varepsilon v \pi \nu \varepsilon \nu \mu \alpha \tau \alpha \kappa \alpha \theta \alpha \rho \tau \omega)$. This use of $\varepsilon v$ "with" is common in the Septuagint like the Hebrew be, but it occurs also in the papyri. It is the same idiom as "in Christ," "in the Lord" so common with Paul. In English we speak of our being in love, in drink, in his cups, etc. The unclean spirit was in the man and the man in the unclean spirit, a man in the power of the unclean spirit. Luke has "having," the usual construction. See on Mt 22:43. Unclean spirit is used as synonymous with
demon ( $\delta a \mu \mu \mathrm{v} \iota \boldsymbol{v}$ ). It is the idea of estrangement from God (Zec 13:2 ). The whole subject of demonology is difficult, but no more so than the problem of the devil. Jesus distinguishes between the man and the unclean spirit. Usually physical or mental disease accompanied the possession by demons. One wonders today if the degenerates and confirmed criminals so common now are not under the power of demons. The only cure for confirmed criminals seems to be conversion (a new heart).

Mark 1:24

What have we to do with thee? ( $\tau \eta \mu \nu \kappa \alpha \sigma o$ ?) The same idiom in Mt 8:29. Ethical dative. Nothing in common between the demon and Jesus. Note "we." The man speaks for the demon and himself, double personality. The recognition of Jesus by the demons may surprise us since the rabbis (the ecclesiastics) failed to do so. They call Jesus "The Holy One of God" (o a $\gamma$ los tov $\theta \varepsilon o v$ ). Hence the demon feared that Jesus was come to destroy him and the man in his power. In Mt 8:29 the demon calls Jesus "Son of God." Later the disciples will call Jesus "The Holy One of God" (Joh 6:69). The demon cried out aloud (aveкра $\xi \varepsilon v$, late first aorist form, $\alpha v \varepsilon \kappa \rho \alpha \gamma \varepsilon v$, common second aorist) so that all heard the strange testimony to Jesus. The man says "I know" (oi $\delta \alpha$ ), correct text, some manuscripts "we know" (ot $\delta \alpha \mu \varepsilon v$ ), including the demon.

Mark 1:25
Hold thy peace $(\varphi \mu \omega \theta \eta \tau)$. First aorist passive imperative of $\varphi \mu$ о . "Be quiet," Moffatt translates it. But it is a more vigorous word, "Be muzzled" like an ox. So literally in De 25:4, 1Co 9:9; 1Ti 5:18. It is common in Josephus, Lucian, and the LXX. See Mt 22:12,34. Gould renders it "Shut up." "Shut your mouth" would be too colloquial. Vincent suggests "gagged," but that is more the idea of $\varepsilon \pi \iota \sigma \tau о \mu \alpha \zeta \varepsilon ı v$ in Tit 1:11, to stop the mouth.

Mark 1:26
Tearing him ( $\sigma \pi \alpha \rho \alpha \xi \alpha v \alpha u \tau o v$ ). Margin,
convulsing him like a spasm. Medical writers use the word for the rotating of the stomach. Lu 4:35 adds "when the demon had thrown him down in the midst." Mark mentions the "loud voice" ( $\varphi$ ov $\mu \varepsilon \gamma \alpha \lambda \eta$ ), a screech, in fact. It was a moment of intense excitement.

Mark 1:27
They questioned among themselves ( $\sigma \cup v \zeta \eta \tau \varepsilon เ v ~ a \cup \tau o v \varsigma) . ~ B y ~ l o o k ~ a n d ~ w o r d . ~$
A new teaching ( $\delta \iota \delta \alpha \chi \eta$ кaıv $\eta$ ). One surprise had followed another this day. The teaching was fresh ( $\kappa \alpha \iota v \eta$ ), original as the dew of the morning on the blossoms just blown. That was a novelty in that synagogue where only staid and stilted rabbinical rules had been heretofore droned out. This new teaching charmed the people, but soon will be rated as heresy by the rabbis. And it was with authority ( $\kappa \alpha \tau^{\prime} \varepsilon \xi \circ v \sigma \iota \alpha v$ ). It is not certain whether the phrase is to be taken with "new teaching," "It's new teaching with authority behind it," as Moffatt has it, or with the verb; "with authority commandeth even the unclean spirits" (ка тоıя $\pi v \varepsilon \cup \mu \alpha \sigma \iota \nu ~ \tau о \iota \varsigma ~ а к а Ө \alpha \rho \tau о \iota \varsigma ~ \varepsilon \pi \iota \tau \alpha \sigma \sigma \varepsilon)$. The position is equivocal and may be due to the fact that "Mark gives the incoherent and excited remarks of the crowd in this natural form" (Swete). But the most astonishing thing of all is that the demons "obey him" (vлакоvovaıv $\alpha \cup \tau \omega)$. The people were accustomed to the use of magical formulae by the Jewish exorcists (Mt 12:27; Ac 19:13), but here was something utterly different. Simon Magus could not understand how Simon Peter could do his miracles without some secret trick and even offered to buy it (Ac 8:19).

Mark 1:28

The report of him ( $\eta$ aкоך avtov). Vulgate, rumor. See Mt 14:1; 24:6. They had no telephones, telegraphs, newspapers or radio, but news has a marvellous way of spreading by word of mouth. The fame of this new teacher went out "everywhere" ( $\pi \alpha v \tau \alpha \chi o v$ ) throughout all Galilee.

Mark 1:29
The house of Simon and Andrew ( $\tau \eta \nu$ оккı $\alpha \nu \Sigma \mu \omega \nu о \varsigma \kappa \alpha A v \delta \rho \varepsilon о v$ ). Peter was married and both he and Andrew lived together in "Peter's house" (Mt 8:14) with Peter's wife and mother-in-law. Peter was evidently married before he began to follow Jesus. Later his wife accompanied him on his apostolic journeys (1Co 9:5). This incident followed immediately after the service in the synagogue on the sabbath. All the Synoptics give it. Mark heard Peter tell it as it occurred in his own house where Jesus made his home while in Capernaum. Each Gospel gives touches of its own to the story. Mark has "lay sick of a fever " (катєкєıто $\pi \nu \rho \varepsilon \sigma \sigma 0 v \sigma \alpha)$, lay prostrate burning with fever. Matthew puts it "stretched out ( $\beta \varepsilon \beta \lambda \eta \mu \varepsilon v \eta v$ ) with a fever." Luke has it "holden with a great fever" ( $\eta \nu \sigma \cup v \varepsilon \chi о \mu \varepsilon v \eta \pi \nu \rho \varepsilon \tau \omega \mu \varepsilon \gamma \alpha \lambda \omega$ ), a technical medical phrase. They all mention the instant recovery and ministry without any convalescence. Mark and Matthew speak of the touch of Jesus on her hand and Luke speaks of Jesus standing over her like a doctor. It was a tender scene.

Mark 1:32
When the sun did set (oтє $\varepsilon \delta v \sigma \varepsilon v$ o $\eta \lambda$ ıo). This picturesque detail Mark has besides "at even" (o千tac $\gamma \varepsilon v o \mu \varepsilon v \eta \varsigma$, genitive absolute, evening having come). Matthew has "when even was come," Luke "when the sun was setting." The sabbath ended at sunset and so the people were now at liberty to bring their sick to Jesus. The news about the casting out of the demon and the healing of Peter's mother-in-law had spread all over Capernaum. They brought them in a steady stream (imperfect tense, $\varepsilon \varphi \varepsilon \rho \circ v$ ). Luke (Lu 4:40) adds that Jesus laid his hand on every one of them as they passed by in grateful procession.

Mark 1:33
At the door ( $\pi \rho \circ \varsigma \tau \eta v \theta \nu \rho \alpha v$ ). At the door of Peter's house. The whole city was gathered together there ( $\boxtimes$ n episun $\boxtimes$ gmen $\boxtimes$, past perfect passive periphrastic indicative, double compound $\varepsilon \pi$ and $\sigma v v$ ). Mark alone mentions this vivid detail. He is seeing with Peter's eyes again. Peter no doubt watched the beautiful scene with pride and gratitude as Jesus stood in the door and healed the great crowds in the glory of that sunset. He loved to tell it afterwards.
 variegated. All sorts of sick folk came and were healed.

Mark 1:34
Devils ( $\delta \alpha \mu \mathrm{\mu} \boldsymbol{v} \alpha \alpha$ ). Demons it should be translated always.
Suffered not (ouk $\eta \varphi \iota \varepsilon$ ). Would not allow, imperfect tense of continued refusal. The

$\varepsilon ı v a)$ is genuine or not, that is the meaning and is a direct reference to $1: 24$ when in the synagogue the demon recognized and addressed Jesus as the Holy One of God. Testimony from such a source was not calculated to help the cause of Christ with the people. He had told the other demon to be silent. See on Mt 8:29 for discussion of the word demon.

Mark 1:35
In the morning, a great while before day ( $\pi \rho \omega \varepsilon v v v \chi \alpha$ 入ıav). Luke has only "when it was day" ( $\gamma \varepsilon v \circ \mu \varepsilon v \eta \varsigma \eta \mu \varepsilon \rho a \varsigma)$. The word $\pi \rho \omega$ in Mark means the last watch of the night from three to six A.M. Evvo $\alpha$ 人 $1 a v$ means in the early part of the watch while it was still a bit dark (cf. Mr 16:2 $\lambda \iota \alpha v \pi \rho \omega)$.

Rose up and went out ( $\alpha v a \sigma \tau \alpha \varsigma \varepsilon \xi \eta \lambda \theta \varepsilon v$ ). Out of the house and out of the city, off ( $\alpha \pi \eta \lambda \theta \varepsilon v$, even if not genuine, possibly a conflate reading from 6:32,46). "Flight from the unexpected reality into which His ideal conception of His calling had brought Him" (H.J. Holtzmann). Gould notes that Jesus seems to retreat before his sudden popularity, to prayer with the Father "that he might not be ensnared by this popularity, or in any way induced to accept the ways of ease instead of duty." But Jesus also had a plan for a preaching tour of Galilee and "He felt He could not begin too soon. He left in the night, fearing opposition from the people" (Bruce). Surely many a popular preacher can understand this mood of Jesus when in the night he slips away to a solitary place for prayer. Jesus knew what it was to spend a whole night in prayer. He knew the blessing of prayer and the power of prayer.

And there prayed ( $\kappa$ 'акع $\pi \rho о \sigma \eta \cup \chi \varepsilon \tau о$ ). Imperfect tense picturing Jesus as praying through the early morning hours.

Mark 1:36
Followed after him ( $\kappa \alpha \tau \varepsilon \delta \iota \omega \xi \varepsilon v$ avtov). Hunted him out (Moffatt). Perfective use of the preposition кata (down to the finish). The verb $\delta \iota \omega \kappa \omega$ is used for the hunt or chase, pursuit. Vulgate has persecutus est. The personal story of Peter comes in here. "Simon's intention at least was good; the Master seemed to be losing precious opportunities and must be brought back" (Swete). Peter and those with him kept up the search till they found him. The message that they brought would surely bring Jesus back to Peter's house.

Mark 1:38
Into the next towns ( $\varepsilon \varsigma \varsigma \tau \alpha \varsigma ~ \varepsilon \chi о \mu \varepsilon v a \varsigma ~ \kappa \omega \mu о \pi о \lambda \varepsilon ı \varsigma) . ~ I t ~ w a s ~ a ~ s u r p r i s i n g ~ d e c i s i o n ~ f o r ~$ Jesus to leave the eager, excited throngs in Capernaum for the country town or village cities without walls or much importance. Only instance of the word in the N.T. Late Greek word. The use of exouevac for next is a classic use meaning clinging to, next to a thing. So in Lu 13:33; Ac 13:44; 20:15; Heb 6:9 . "D" here has $\varepsilon \gamma \gamma \cup \varsigma$ (near).

Mark 1:39
Throughout all Galilee (Eıc o $\left.\lambda \eta \nu \tau \eta \nu \Gamma \alpha \lambda_{\imath} \lambda \alpha \iota \alpha v\right)$. The first tour of Galilee by Jesus. We are told little about this great preaching tour.

Mark 1:40

Kneeling down to him ( $\kappa \alpha \not \gamma \sigma v \pi \varepsilon \tau \omega v$ ). Picturesque detail omitted by some MSS. Lu 5:12 has "fell on his face."

Mark 1:41
Being moved with compassion ( $\sigma \pi \lambda \alpha \gamma \chi \nu \iota \sigma \theta \varepsilon ı \varsigma$ ). Only in Mark. First aorist passive participle.

Mark 1:43
Strictly charged ( $\varepsilon \mu \beta \rho \mu \eta \sigma \alpha \mu \varepsilon \nu \circ \varsigma)$. Only in Mark. Lu 5:14 has $\pi \alpha \rho \eta \gamma \gamma \varepsilon \iota \lambda \varepsilon \nu$ (commanded). Mark's word occurs also in 14:5 and in Mt 9:30 and Joh 11:38. See on Mt 9:30 . It is a strong word for the snorting of a horse and expresses powerful emotion as Jesus stood here face to face with leprosy, itself a symbol of sin and all its train of evils. The command to report to the priests was in accord with the Mosaic regulations and the prohibition against talking about it was to allay excitement and to avoid needless opposition to Christ.

Mark 1:44
For a testimony unto them ( $\varepsilon ı \varsigma \mu \rho \tau \nu \rho ı \nu \alpha v \tau о \iota \varsigma)$. Without the formal testimony of the priests the people would not receive the leper as officially clean.

Mark 1:45
Began to publish it much ( $\eta \rho \xi \alpha \tau о$ кп $\rho \cup \sigma \sigma \varepsilon \iota \nu \pi о \lambda \lambda \alpha$ ). Lu 5:15 puts it, "so much the more" ( $\mu \alpha \lambda \lambda o v$ ). One of the best ways to spread a thing is to tell people not to tell. It was certainly so in this case. Soon Jesus had to avoid cities and betake himself to desert places to avoid the crowds and even then people kept coming to Jesus ( $\eta \rho \chi o v \tau o$, imperfect tense). Some preachers are not so disturbed by the onrush of crowds.

## Mark 2

Mark 2:1
Again into Capernaum after some days ( $\pi \alpha \lambda \iota v \varepsilon \iota \varsigma ~ К \alpha \varphi \alpha \rho v \alpha o v \mu \delta \iota^{\prime} \eta \mu \varepsilon \rho \omega v$ ). After the first tour of Galilee when Jesus is back in the city which is now the headquarters for the work in Galilee. The phrase $\delta \iota^{\prime} \eta \mu \varepsilon \rho \omega \nu$ means days coming in between ( $\delta \iota \alpha, \delta v o$, two) the departure and return.

In the house ( $\varepsilon \nu$ оוк $\omega$ ). More exactly,
at home, in the home of Peter, now the home of Jesus. Another picture directly from Peter's discourse. Some of the manuscripts have here $\varepsilon \iota \varsigma$ оєкоv, illustrating the practical identity in meaning of $\varepsilon v$ and $\varepsilon ા \varsigma$ (Robertson, Grammar, pp. 591-6).

It was noised $(\eta \kappa о v \sigma \theta \eta)$. It was heard (first aorist, passive indicative from $\alpha \kappa 0 v \omega$, to hear). People spread the rumour, "He is at home, he is indoors."

Mark 2:2
So that there was no longer room for them, no, not even about the door ( $\omega \sigma \tau \varepsilon \mu \eta \kappa \varepsilon \tau$ $\chi \omega \rho \varepsilon \iota v \mu \eta \delta \varepsilon \tau \alpha \pi \rho \circ \varsigma \tau \eta v \theta v \rho \alpha v)$. Another graphic Markan detail seen through Peter's eyes. The double compound negative in the Greek intensifies the negative. This house door apparently opened into the street, not into a court as in the larger houses. The house was packed inside and there was a jam outside.

And he spake the word unto them ( $\kappa \alpha \varepsilon \lambda \alpha \lambda \varepsilon \alpha v \tau о \varsigma \tau<\nu \lambda о \gamma \sigma v$ ). And he was speaking the word unto them, Mark's favourite descriptive imperfect tense ( $\varepsilon \lambda \alpha \lambda \varepsilon$ ). Note this word $\lambda \alpha \lambda \varepsilon \omega$ about the preaching of Jesus (originally just sounds like the chatter of birds, the prattling of children, but here of the most serious kind of speech. As contrasted with $\lambda \varepsilon \gamma \omega$ (to say) it is rather an onomatopoetic word with some emphasis on the sound and manner of speaking. The word is com- mon in the vernacular papyri examples of social inter-course.

Mark 2:3
And they come ( $\kappa \alpha \varepsilon \rho \chi \circ v \tau \alpha$ ). Fine illustration of Mark's vivid dramatic historical present preserved by Luke Lu 5:18, but not by Mt 9:2 (imperfect).

Borne by four ( $\alpha \iota \rho \circ \mu \varepsilon v \circ v$ v $\pi \sigma \tau \varepsilon \sigma \sigma \alpha \rho \omega v$ ). Another picturesque Markan detail not in the others.

Mark 2:4
Come nigh ( $\pi \rho о \sigma \varepsilon \gamma \gamma \iota \sigma \alpha)$. But Westcott and Hort read $\pi \rho о \sigma \varepsilon \nu \varepsilon \gamma \kappa \alpha$, to bring to, after Aleph, B, L, 33, 63 (cf. Joh 5:18 ).

They uncovered the roof ( $\alpha \pi \varepsilon \sigma \tau \varepsilon \gamma \alpha \sigma \alpha \nu \tau \eta \nu \sigma \tau \varepsilon \gamma \eta \nu$ ). They unroofed the roof (note paronomasia in the Greek and cognate accusative). The only instance of this verb in the N.T. A rare word in late Greek, no papyrus example given in Moulton and Milligan Vocabulary. They climbed up a stairway on the outside or ladder to the flat tile roof and dug out or broke up ( $\varepsilon \xi_{\circ} \rho \nu \xi \alpha \nu \tau \varepsilon \varsigma$ ) the tiles (the roof). There were thus tiles ( $\delta \iota \alpha \tau \omega \nu \kappa \varepsilon \rho \alpha \mu \omega \nu$,

Lu 5：19）of laths and plaster and even slabs of stone stuck in for strength that had to be dug out．It is not clear where Jesus was（oпоv $\eta v$ ），either downstairs，（Holtzmann）or upstairs （Lightfoot），or in the quadrangle（atrium or compluvium，if the house had one）．＂A compos－ ition of mortar，tar，ashes and sand is spread upon the roofs，and rolled hard，and grass grows in the crevices．On the houses of the poor in the country the grass grows more freely， and goats may be seen on the roofs cropping it＂（Vincent）．

They let down the bed（ $\chi \alpha \lambda \omega \sigma$ $\tau \sigma v \rho \alpha \beta \alpha \tau \tau \sigma v$ ），historical present again，aorist tense in Lu 5：19（каӨ $к \kappa \alpha v)$ ．The verb means to lower from a higher place as from a boat．Probably the four men had a rope fastened to each corner of the pallet or poor man＇s bed（кра $\beta a \tau \tau ⿱ ⺌ 兀$ ， Latin grabatus．So one of Mark＇s Latin words）．Matthew（Mt 9：2 ）has $\kappa \lambda \iota \imath \eta$ ，general term for bed．Luke has $\kappa \lambda \iota v \iota \delta \iota o v$（little bed or couch）．Mark＇s word is common in the papyri and is spelled also кра $\beta \beta$ атос，sometimes краßато¢，while W ，Codex Washingtonius，has it кра $\beta \beta$ атог．

Mark 2：5
Their faith（ $\tau \eta \nu \pi\llcorner\sigma \tau \iota v \alpha v \tau \omega v$ ）．The faith of the four men and of the man himself．There is no reason for excluding his faith．They all had confidence in the power and willingness of Jesus to heal this desperate case．

Are forgiven（ $\alpha \varphi \vDash \nu \tau \alpha$ ，aoristic present passive，cf．punctiliar action，Robertson＇s Grammar，pp．864ff．）．So Mt 9：3，but Lu 5：20 has the Doric perfect passive $\alpha \varphi \varepsilon \omega v \tau \alpha$ ．The astonishing thing both to the paralytic and to the four friends is that Jesus forgave his sins instead of healing him．The sins had probably caused the paralysis．

Mark 2：6
Sitting there，and reasoning in their hearts（ $\varepsilon \kappa \varepsilon \kappa \alpha Ө \eta \mu \varepsilon v o ~ к \alpha ~ \delta ı \alpha \lambda о ү \iota \zeta о \mu \varepsilon v o ~ \varepsilon v \tau \alpha \iota$, $\kappa \alpha \rho \delta ı a ı \varsigma ~ \alpha v \tau \omega v$ ）．Another of Mark＇s pictures through Peter＇s eyes．These scribes（and Pharisees， Lu 5：21 ）were there to cause trouble，to pick flaws in the teaching and conduct of Jesus．His popularity and power had aroused their jealousy．There is no evidence that they spoke aloud the murmur in their hearts，＂within themselves＂（Mt 9：3 ）．It was not ne－ cessary，for their looks gave them away and Jesus knew their thoughts（Mt 9：4）and perceived their reasoning（Lu 5：22）．

Instantly Jesus recognized it in his own spirit（ $\varepsilon v \theta v \varsigma \varepsilon \pi \downarrow \gamma v o v \varsigma$ o I $\eta \sigma o v \varsigma ~ \tau \omega \pi \nu \varepsilon \cup \mu \alpha \tau$ autov， $\mathrm{Mr} 2: 8$ ）．The Master at once recognizes the hostile atmosphere in the house．The
 feeling did．

Mark 2：7
He blasphemeth（ $\beta \lambda \alpha \sigma \varphi \eta \mu \varepsilon$ ）．This is the unspoken charge in their hearts which Jesus read like an open book．The correct text here has this verb．They justify the charge with the conviction that God alone has the power（ $\delta u v a \tau \alpha)$ to forgive sins．The word $\beta \lambda \alpha \sigma \varphi \eta \mu \varepsilon \omega$ means injurious speech or slander．It was，they held，blasphemy for Jesus to assume this divine
prerogative. Their logic was correct. The only flaw in it was the possibility that Jesus held a peculiar relation to God which justified his claim. So the two forces clash here as now on the deity of Christ Jesus. Knowing full well that he had exercised the prerogative of God in forgiving the man's sins he proceeds to justify his claim by healing the man.

Mark 2:10
That ye may know ( $(v \alpha \varepsilon \iota \delta \eta \tau \varepsilon$ ). The scribes could have said either of the alternatives in verse 9 with equal futility. Jesus could say either with equal effectiveness. In fact Jesus chose the harder first, the forgiveness which they could not see. So he now performs the miracle of healing which all could see, that all could know that (the Son of Man, Christ's favourite designation of himself, a claim to be the Messiah in terms that could not be easily attacked) he really had the authority and power ( (₹<ovoıav) to forgive sins. He has the right and power here on earth to forgive sins, here and now without waiting for the day of judgment.

He saith to the sick of the palsy $(\lambda \varepsilon \gamma \varepsilon)$. This remarkable parenthesis in the middle of the sentence occurs also in Mt 9:6 and Lu 5:24, proof that both Matthew and Luke followed Mark's narrative. It is inconceivable that all three writers should independently have injected the same parenthesis at the same place.

Mark 2:12
Before them all ( $\varepsilon \mu \pi \rho \circ \sigma \theta \varepsilon v \pi \alpha \nu \tau \omega v)$. Lu 5:25 follows Mark in this detail. He picked up (арая) his pallet and walked and went home as Jesus had commanded him to do (Mr 2:11). It was an amazing proceeding and made it unnecessary for Jesus to refute the scribes further on this occasion. The amazement ( $\varepsilon \xi \iota \sigma \tau \alpha \sigma \theta \alpha$, our ecstasy, as Lu 5:26 has it), was too general and great for words. The people could only say: "We never saw it on this fashion" (Hout $\omega \varsigma$ ou $\delta \varepsilon \pi о \tau \varepsilon \varepsilon \iota \delta a \mu \varepsilon v$ ). Jesus had acted with the power of God and claimed equality with God and had made good his claim. They all marvelled at the
paradoxes $(\pi \alpha \rho \alpha \delta o \xi \alpha, \operatorname{Lu} 5: 26)$ of that day. For it all they glorified God.
Mark 2:13
By the seaside ( $\pi \alpha \rho \alpha \tau \eta v \theta \alpha \lambda \alpha \sigma \sigma \alpha v$ ). A pretty picture of Jesus walking by the sea and a walk that Jesus loved (Mr 1:16; Mt 4:18). Probably Jesus went out from the crowd in Peter's house as soon as he could. It was a joy to get a whiff of fresh air by the sea. But it was not long till all the crowd began to come to Jesus ( $\eta \rho \chi \varepsilon \tau \circ$, imperfect) and Jesus was teaching them ( $\varepsilon \delta \iota \delta a \sigma \kappa \varepsilon v$, imperfect). It was the old story over again, but Jesus did not run away.

Mark 2:14
And as he passed by ( $\kappa \alpha \pi \alpha \rho \alpha \gamma \omega v$ ). Present participle active, was passing by. Jesus was constantly on the alert for opportunities to do good. An unlikely specimen was Levi (Matthew), son of Alpheus, sitting at the toll-gate ( $\tau \varepsilon \lambda \omega v$ vov) on the Great West Road from Damascus to the Mediterranean. He was a publican ( $\tau \varepsilon \lambda \omega v \eta \varsigma$ ) who collected toll for Herod Antipas. The Jews hated or despised these publicans and classed them with sinners
( $\alpha \mu \alpha \rho \tau \omega \lambda 0$ ). The challenge of Jesus was sudden and sharp, but Levi (Matthew) was ready to respond at once. He had heard of Jesus and quickly decided. Great decisions are often made on a moment's notice. Levi is a fine object lesson for business men who put off service to Christ to carry on their business.

Mark 2:16
The scribes of the Pharisees (о $\gamma \rho \alpha \mu \mu \alpha \tau \varepsilon \varsigma \tau \omega \nu$ Фарıбаı $\tau v$ ). This is the correct text. Cf. "their scribes" in Lu 5:30. Matthew gave a great reception ( $\delta$ o $\chi \eta v, \operatorname{Lu} 5: 29$ ) in his house (Mr 2:15). These publicans and sinners not simply accepted Levi's invitation, but they imitated his example "and were following Jesus" ( $\kappa \alpha \kappa \kappa \lambda o v \theta o v \nu \alpha \nu \tau \omega$ ). It was a motly crew from the standpoint of these young theologues, scribes of the Pharisees, who were on hand, being invited to pick flaws if they could. It was probably in the long hall of the house where the scribes stood and ridiculed Jesus and the disciples, unless they stood outside, feeling too pious to go into the house of a publican. It was an offence for a Jew to eat with Gentiles as even many of the early Jewish Christians felt (Ac 11:3) and publicans and sinners were regarded like Gentiles (1Co 5:11).

Mark 2:17
The righteous ( $\delta$ ıкaıouc). Jesus for the sake of argument accepts the claim of the Pharisees to be righteous, though, as a matter of fact, they fell very far short of it. Elsewhere (Mt 23 ) Jesus shows that the Pharisees were extortionate and devoured widows' houses and wore a cloak of pride and hypocritical respectability. The words "unto repentance" (عıৎ $\mu \varepsilon \tau \alpha v o l a v)$ are not genuine in Mark, but are in Lu 5:32. Jesus called men to new spiritual life and away from sin and so to repentance. But this claim stopped their mouths against what Jesus was doing. The well or the strong (เซұvovte¢) are not those who need the physician in an epidemic.

Mark 2:18
 $\nu \eta \sigma \tau \varepsilon v o v \tau \varepsilon \varsigma)$. The periphrastic imperfect, so common in Mark's vivid description. Probably Levi's feast happened on one of the weekly fast-days (second and fifth days of the week for the stricter Jews). So there was a clash of standpoints. The disciples of John sided with the Pharisees in the Jewish ceremonial ritualistic observances. John was still a prisoner in Machaerus. John was more of an ascetic than Jesus (Mt 18f.; Lu 7:33-35 ), but neither one pleased all the popular critics. These learners ( $\mu \alpha \theta \eta \tau \alpha$ ) or disciples of John had missed the spirit of their leader when they here lined up with the Pharisees against Jesus. But there was no real congeniality between the formalism of the Pharisees and the asceticism of John the Baptist. The Pharisees hated John who had denounced them as broods of vipers. Here the disciples of John and the disciples of the Pharisees (o $\mu \alpha \theta \eta \tau \alpha$ I $\omega \alpha \nu$ vo ка о $\mu \alpha \theta \eta \tau \alpha \tau \omega \nu$ Фарıбаı $\omega v$ ) join in criticizing Jesus and his disciples. Later we shall see Pharisees, Sadducees, and Herodians, who bitterly detested each other, making com- mon cause against Jesus

Christ. So today we find various hostile groups combining against our Lord and Saviour. See on Mt 9:14-17 for comments. Matthew has here followed Mark closely.

Mark 2:19
The sons of the bridechamber (o vio $\tau 0 v \nu \nu \mu \varphi \omega v o \varsigma)$. Not merely the groomsmen, but the guests also, the $\pi \alpha \rho \alpha v \psi \mu \varphi \varsigma$ ( $\pi \alpha \rho \alpha v v \mu \varphi o$ of the old Greek). Jesus here adopts the Baptist's own metaphor (Joh 3:29), changing the friend of the bridegroom (o $\varphi\rangle \lambda о \varsigma ~ \tau o v ~ v \nu \mu \varphi ь o v) ~ t o ~$ sons of the bridechamber. Jesus identifies himself with the bridegroom of the O.T. (Ho 2:21 ), God in his covenant relation with Israel (Swete). Mourning does not suit the wedding feast. Mark, Matthew, and Luke all give the three parables (bridegroom, unfulled cloth, new wineskins) illustrating and defending the conduct of Jesus in feasting with Levi on a Jewish fast-day. Lu 5:36 calls these parables. Jesus here seems iconoclastic to the ecclesiastics and revolutionary in emphasis on the spiritual instead of the ritualistic and ceremonial.

Mark 2:21
Seweth on ( $\varepsilon \pi \iota \rho a \pi \tau \varepsilon$ ). Here only in the N.T. or elsewhere, though the uncompounded verb $\rho a \pi \tau \omega$ (to sew) is common enough,
sews upon: in Mt 9:16 and Lu 5:37 use $\varepsilon \pi \iota \beta \alpha \lambda \lambda \varepsilon$, put upon or clap upon.
Mark 2:22
But new wine into fresh wineskins ( $\alpha \lambda \lambda \alpha$ oıvov veov $\varepsilon เ \varsigma \alpha \sigma \kappa о ч \varsigma ~ \kappa \alpha ı v o v \varsigma) . ~ W e s t c o t t ~$ and Hort bracket this clause as a Western non-interpolation though omitted only in D and some old Latin MSS. It is genuine in Lu 5:38 and may be so here.

Mark 2:23
Through the cornfields ( $\delta 1 \alpha \tau \omega v \sigma \pi \sigma \rho \mu \omega v$ ). See on Mt 12:1 . So Matt. and Lu 6:1 . But Mark uses $\pi \alpha \rho \alpha \pi о \rho \varepsilon v \varepsilon \sigma \theta a$, to go along beside, unless $\delta ı \alpha \pi$ о $\varepsilon \cup \varepsilon \sigma \theta a(B C D)$ is accepted. Perhaps now on the edge, now within the grain. Mark uses also odov noוعוv, to
make a way like the Latin iter facere, as if through the standing grain,
plucking the ears ( $\tau \lambda \lambda \lambda$ ovieऽ tous $\sigma \tau \alpha \chi \cup \alpha \varsigma)$. Work of preparing food the rabbis called it. The margin of the Revised Version has it correctly: They began to make their way plucking the ears of corn (grain, wheat or barley, we should say). See on Mt 12:1-8 for discussion of this passage, parallel also in Lu 6:15.

Mark 2:26
The house of God ( $\tau 0 v$ ookov $\operatorname{\tau ov} \theta$ عov). The tent or tabernacle at Nob, not the temple in Jerusalem built by Solomon.

When Abiathar was high priest ( $\varepsilon \pi \mathrm{A} \beta \iota \alpha \theta \alpha \rho \alpha \rho \chi เ \varepsilon \rho \varepsilon \omega \varsigma)$. Neat Greek idiom, in the time of Abiathar as high priest. There was confusion in the Massoretic text and in the LXX about the difference between Ahimelech (Abimelech) and Abiathar (2Sa 8:17), Ahimelech's son and successor (1Sa 21:2; 22:20 ). Apparently Ahimelech, not Abiathar was high priest at this time. It is possible that both father and son bore both names ( $1 \mathrm{Sa} 22: 20$; 2Sa 8:17; 1Ch 18:16 ), Abiathar mentioned though both involved. E $\pi$ may so mean in the passage
about Abiathar. Or we may leave it unexplained. They had the most elaborate rules for the preparation of the shewbread ( $\tau$ ouc a $\rho \tau$ тои $\tau \eta \varsigma \pi \rho о \theta \varepsilon \sigma \varepsilon \omega \varsigma)$ ) the loaves of presentation, the loaves of the face or presence of God. It was renewed on the commencement of the sabbath and the old bread deposited on the golden table in the porch of the Sanctuary. This old bread was eaten by the priests as they came and went. This is what David ate.

Mark 2:27
For man ( $\delta \iota \alpha$ тov $\alpha v \theta \rho \omega \pi \sigma v$ ). Mark alone has this profound saying which subordinates the sabbath to man's real welfare (mankind, observe, generic article with $\alpha v \theta \rho \omega \pi \sigma$, class from class). Man was not made for the sabbath as the rabbis seemed to think with all their petty rules about eating an egg laid on the sabbath or looking in the glass, et cetera. See 2Macc. 5:19 and Mechilta on Ex 31:13 : "The sabbath is delivered unto you and ye are not delivered unto the sabbath." Christianity has had to fight this same battle about institutionalism. The church itself is for man, not man for the church.

Mark 2:28
Even of the sabbath ( $\kappa \alpha$ tov $\sigma \alpha \beta \beta \alpha \tau o v$ ). Mark, Matthew (Mt 12:8), and Luke (Lu 6:5 ) all give this as a climax in the five reasons given by Christ on the occasion for the conduct of the disciples, but Mark has the little word "even" ( $\kappa \alpha$ ) not in the others, showing that Jesus knew that he was making a great claim as the Son of Man, the Representative Man, the Messiah looked at from his human interest, to lordship (кирıоя) even of the sabbath. He was not the slave of the sabbath, but the master of it. "Even of the sabbath, so invaluable in your eyes. Lord, not to abolish, but to interpret and keep in its own place, and give it a new name" (Bruce).

## Mark 3

Mark 3:1
Had his hand withered ( $\varepsilon \xi \eta \rho \alpha \mu \mu \varepsilon \nu \eta \nu \varepsilon \chi \omega \nu \tau \eta \nu \chi \varepsilon \iota \rho \alpha$ ). He had his (the in the Greek, common idiom with article as possessive) hand (right hand, Lu 6:6) in a withered state, perfect passive participle (adjective $\xi \eta \rho a v$ in Matthew and Luke), showing that it was not congenital, but the result of injury by accident or disease. Bengel: Non ex utero, sed morbo aut vulnere.

Mark 3:2
They watched ( $\pi \alpha \rho \varepsilon \tau \eta \rho o v v$ ). Imperfect tense, were watching on the side (or sly). Luke uses the middle voice, $\pi \alpha \rho \varepsilon \tau \eta \rho o u v \tau \sigma$, to accent their personal interest in the proceedings. It was the sabbath day and in the synagogue and they were there ready to catch him in the act if he should dare to violate their rules as he had done in the wheat fields on the previous sabbath. Probably the same Pharisees are present now as then.

That they might accuse him (ıva катпүорŋб $\omega \sigma \iota \nu \alpha v \tau 0 v$ ). So Mt 12:10. Luke has it "that they might find how to accuse him" (ıva $\varepsilon v \rho \omega \sigma \iota v$ кат $\eta \gamma o \rho \varepsilon ı v ~ a v \tau o v) . ~ T h e y ~ w e r e ~ d e-~$ termined to accuse him. The sabbath controversy offered the best opening. So here they are ready for business.

## Mark 3:3

Stand forth ( $\varepsilon \gamma \varepsilon \iota \rho \varepsilon \varepsilon \iota \varsigma ~ \tau о ~ \mu \varepsilon \sigma o v)$. Step into the middle of the room where all can see. It was a bold defiance of the Christ's spying enemies. Wycliff rightly puts it:

They aspieden him. They played the spy on Jesus. One can see the commotion among the long-bearded hypocrites at this daring act of Jesus.

Mark 3:4
But they held their peace (o $\delta \varepsilon \varepsilon \sigma \omega \omega \pi \omega v$ ). Imperfect tense. In sullen silence and helplessness before the merciless questions of Jesus as the poor man stood there before them all. Jesus by his pitiless alternatives between doing good ( $\alpha \gamma \alpha$ опоь $\varepsilon \omega$, late Greek word in LXX and N.T.) and doing evil (каколоє $\varepsilon \omega$, ancient Greek word), to this man, for instance,
to save a life or to kill ( $\psi v \chi \eta \nu \sigma \omega \sigma \alpha \eta \alpha \pi o \kappa \tau \varepsilon \iota \nu \alpha$ ), as in this case. It was a terrible exposure.

Mark 3:5
When he had looked round on them with anger ( $\pi \varepsilon \rho ı \beta \lambda \varepsilon \psi \alpha \mu \varepsilon v o \varsigma \alpha v \tau o v \varsigma \mu \varepsilon \tau^{\prime}$ o $\rho \gamma \eta \varsigma$ ). Mark has a good deal to say about the looks of Jesus with this word (3:5,34; 5:37; 9:8; 10:23; 11:11) as here. So Luke only once, Lu 6:10. The eyes of Jesus swept the room all round and each rabbinical hypocrite felt the cut of that condemnatory glance. This indignant anger was not inconsistent with the love and pity of Jesus. Murder was in their hearts and Jesus knew it. Anger against wrong as wrong is a sign of moral health (Gould).

Being grieved at the hardness of their hearts ( $\sigma v \nu \lambda v \pi о \nu \mu \varepsilon \nu \circ \varsigma \varepsilon \pi \tau \eta \pi \omega \rho \omega \sigma \varepsilon \tau \eta \varsigma$ $\kappa \alpha \rho \delta ı \alpha \varsigma \alpha v \tau \omega v$ ). Mark alone gives this point. The anger was tempered by grief (Swete). Jesus is the Man of Sorrows and this present participle brings out the continuous state of grief whereas the momentary angry look is expressed by the aorist participle above. Their own heart or attitude was in a state of moral ossification ( $\pi \omega \rho \omega \sigma \iota \varsigma)$ like hardened hands or feet. $\Pi \omega \rho o \varsigma$ was used of a kind of marble and then of the callus on fractured bones. "They were hardened by previous conceptions against this new truth" (Gould). See also on Mt 12:9-14

Mark 3:6
And straightway with the Herodians took council ( $\varepsilon v \theta v \varsigma \mu \varepsilon \tau \alpha \tau \omega \nu H \eta \rho \omega t \delta \iota \alpha \nu \omega v$ ). The Pharisees could stand no more. So out they stalked at once in a rage of madness (Lu 6:11 ) and outside of the synagogue took counsel ( $\sigma \nu \mu \beta$ ov $\lambda \iota o v \varepsilon \pi o ı \eta \sigma \alpha v$ ) or gave counsel ( $\sigma \cup \mu \beta o v \lambda ı v \varepsilon \delta \iota \delta o v \nu$, as some MSS. have it, imperfect tense, offered counsel as their solution of the problem) with their bitter enemies, the Herodians, on the sabbath day still "how they might destroy him" (o $\pi \omega \varsigma \alpha \cup \tau \circ v a \pi o \lambda \varepsilon \sigma \omega \sigma \iota v$ ), a striking illustration of the alternatives of Jesus a few moments before, "to save life or to kill." This is the first mention of the Herodians or adherents of Herod Antipas and the Herod family rather than the Romans. The Pharisees would welcome the help of their rivals to destroy Jesus. In the presence of Jesus they unite their forces as in Mr 8:15; 12:13; Mt 22:16.

Mark 3:7
Withdrew to the sea ( $\alpha v \varepsilon \chi \omega \rho \eta \sigma \varepsilon v \varepsilon \iota \varsigma \tau \eta v \theta \alpha \lambda \alpha \sigma \sigma \alpha v$ ). Evidently Jesus knew of the plot to kill him, "perceiving it" (Mt 12:15 ). "He and His would be safer by the open beach" (Swete). He has the disciples with him. Vincent notes that on eleven occasions Mark mentions the withdrawals of Jesus to escape his enemies, for prayer, for rest, for private conference with his disciples ( $1: 12 ; 3: 7 ; 6: 31,46 ; 7: 24,31 ; 9: 2 ; 10: 1 ; 14: 34$ ). But, as often, a great multitude ( $\pi 0 \lambda v \pi \lambda \eta \theta \circ \varsigma$ ) from Galilee followed him.

Mark 3:8
Hearing what great things he did ( $\alpha \kappa 0 v o v \tau \varepsilon \varsigma ~ o \sigma \alpha \pi o \iota \varepsilon$ ). Masculine plural present participle, though $\pi \lambda \eta \theta$ os is neuter singular (construction according to sense in both number and gender). This crowd by the sea came from Galilee, Judea, Jerusalem, Idumea, beyond Jordan (Decapolis and Perea), Tyre and Sidon, Phoenicia, North, South, East, and Northwest, even from Idumea (mentioned here alone in the N.T.) won by John Hyrcanus to Palestine. "In our Lord's time Idumea was practically a part of Judea with a Jewish circumcised population" (George Adam Smith). Many of these were probably Gentiles (Phoenicia and Decapolis) and may have known only the Greek language. The fame of Jesus had spread through all the regions round about. There was a jam as the crowds came to Jesus by the Sea of Galilee.

Mark 3:9

That a little boat should wait on him ( $\imath \alpha \alpha \pi \lambda o \iota \rho ı v \geqslant \pi \rho о \sigma \kappa \alpha \rho \tau \varepsilon \rho \eta \alpha v \tau \omega$ ). The boat was to keep close (note present tense subjunctive of $\pi \rho о \sigma \kappa \alpha \rho \tau \varepsilon \rho \varepsilon \omega$ ) to the shore in constant readiness and move as Jesus did. Whether he needed it or not is not told, but it was there at hand.

Lest they should throng him ( $\imath \alpha \mu \eta \theta \lambda ı \beta \omega \sigma \iota v \alpha \tau \tau \circ v$ ). Press or crush him. Jesus stayed with the crowds for they needed him. Present subjunctive again.

Mark 3:10
Pressed upon him ( $\varepsilon \pi \iota \pi \iota \pi \tau \varepsilon เ \nu \alpha v \tau \omega)$. Were falling upon him to such an extent that it was dangerous. They were not hostile, but simply intensely eager, each to have his own case attended to by Jesus.

That they might touch him ( $\iota v \alpha \alpha v \tau o v ~ a \psi \omega v \tau \alpha$ ). If only that much. They hoped for a cure by contact with Christ. Aorist subjunctive. It was a really pathetic scene and a tremendous strain on Jesus.

As many as had plagues ( $о \sigma$ к $\varepsilon \not \chi \circ \nu \mu \alpha \sigma \tau \iota \gamma \alpha \varsigma$ ). Strokes or scourges, terms used by us today as a paralytic stroke, the influenza scourge. Our word plague is from $\pi \lambda \eta \gamma \eta$ (Latin plaga), from $\pi \lambda \eta \gamma v \nu \mu$, to strike a blow. Common in ancient Greek in this sense. See Mr 5:29,34; Lu 7:21 for the same use of $\mu \alpha \sigma \tau \iota \gamma \varepsilon$, and also 2Macc. 9:11.

Mark 3:11
Whensoever they beheld him (o o $\alpha v \alpha v \tau o v \varepsilon \theta \varepsilon \omega \rho \circ v v$ ). Imperfect indicative with o $\alpha \alpha v$ of repeated action. They kept falling down before him ( $\pi \rho \sigma \sigma \varepsilon \pi \iota \pi \tau \circ v$ ) and crying, ( $\varepsilon \kappa \rho \alpha \zeta \circ \nu$ ) and he kept charging or rebuking $(\varepsilon \pi \iota \tau \iota \mu \alpha)$ them, all imperfects. The unclean spirits (demons) recognize Jesus as the Son of God, as before. Jesus charged them not to make him known as he had also done before. He did not wish this testimony. It was a most exciting ordeal and is given only by Mark. Note non-final use of ıva.

Mark 3:13
 (Lu 6:12 ), "to pray" Luke adds. Historical present so common in Mark's vivid narrative. Neither Gospel gives the name of the mountain, assuming it as well known, probably not far from the lake.

Whom he himself would (ovৎ $\eta \theta \varepsilon \lambda \varepsilon v \alpha v \tau o \varsigma)$. Emphatic use of $\alpha v \tau \circ \varsigma$ (himself) at end of sentence. Whether by personal imitation or through the disciples Jesus invites or calls to himself ( $\pi \rho о \sigma \kappa \alpha \lambda \varepsilon ı \tau \alpha$, historical middle present indicative) a select number out of the vast crowds by the sea, those whom he really wished to be with him.

They went off to him ( $\alpha \pi \eta \lambda \theta o v \pi \rho \circ \varsigma \alpha v \tau o v)$. Luke states that Jesus "continued all night in prayer, to God." It was a crisis in the ministry of Christ. This select group up in the hills probably respected the long agony of Jesus though they did not comprehend his motive. They formed a sort of spiritual body-guard around the Master during his night vigil in the mountain.

## Mark 3:14

He appointed twelve ( $\varepsilon \pi \sigma \sqcap \eta \sigma \varepsilon v \delta \omega \delta \varepsilon \kappa \alpha$ ). This was a second selection out of those invited to the hills and after the night of prayer and after day came ( $\mathrm{Lu} 6: 13$ ). Why he chose twelve we are not told, probably because there were twelve tribes in Israel. It was a good round number at any rate. They were to be princes in the new Israel (cf. Mt 19:28; Lu 22:30; Re 21:14,15 ). Luke (Lu 6:13-16) also gives the list of the twelve at this point while Matthew (Mt 10:1-4 ) postpones giving the names till they are sent out in Galilee. There is a fourth list in Ac 1:13. See discussion of the names of the apostles on Mt 10:1-4 and pp. 271-3 of my Harmony of the Gospels for Students of the Life of Christ. The three groups of four begin alike (Simon, Philip, James). There are some difficulties.

Whom he also named apostles (ovc ка a ообто入ovs $\omega v$ vo $\alpha \sigma \varepsilon v$ ). Margin of Revised Version, the text of Westcott and Hort after Aleph, B, C, etc. Genuine in Lu 6:13 and probably so here. The meaning is that Jesus himself gave the name apostle or missionary ( $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$, to send) to this group of twelve. The word is applied in the New Testament to others besides as delegates or messengers of churches (2Co 8:23; Php 2:25), and messenger (Joh 13:16). It is applied also to Paul on a par with the twelve (Ga 1:1,11f. , etc.) and also to Barnabas (Ac 14:14 ), and perhaps also to Timothy and Silas (1Ti 2:6f. ). Two purposes of Jesus are mentioned by Mark in the choice of these twelve,
that they might be with him (ıva $\omega \sigma \imath v \mu \varepsilon \tau^{\prime}$ avtov),
and that he might send them forth ( $\kappa \alpha$ iva $\alpha \pi о \sigma \tau \varepsilon \lambda \lambda \eta$ $\alpha \cup \tau o v \varsigma)$. They were not ready to be sent forth till they had been with Jesus for some time. This is one of the chief tasks of Christ to train this group of men. See Bruce's The Training of the Twelve. The very word $\alpha \pi о \sigma \tau 0 \lambda o \varsigma$ is from $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$. There were two purposes in sending them forth expressed by two infinitives, one to preach ( $\kappa \eta \rho v \sigma \sigma \varepsilon \iota v$, from к $\eta \rho \cup \xi$, herald), the other to have power to cast out demons ( $\varepsilon \chi \varepsilon ı v ~ \varepsilon \xi o v \sigma ı \alpha \nu ~ \varepsilon \kappa \beta \alpha \lambda \lambda \varepsilon ı \nu ~ \tau \alpha ~ \delta \alpha ı \mu о v ı \alpha)$ ). This double ministry of preaching and healing was to mark their work. The two things are, however, different, and one does not necessarily involve the other.

Mark 3:16
Simon he surnamed Peter ( $\varepsilon \tau \varepsilon Ө \eta \kappa \varepsilon v$ оvoц $\alpha \tau \omega \Sigma \mu \omega v$ Пєт $\rho o v$ ). The Greek idiom seems awkward, but it is not. Peter is in apposition with name or ovoua (accusative). This surname Jesus gave in addition ( $\varepsilon \pi \varepsilon \theta \eta \kappa \varepsilon v$ ) to Simon (dative case). Here then is a direct reference to what is told in Joh 1:42 when Jesus met Simon for the first time. Mark here reflects Peter's own words. Luke (Lu 6:14) simply says "Whom he also surnamed Peter." See Mt 16:18 for the full explanation of the name Peter, a Rock, Cephas.

Mark 3:17
Boanerges, which is Sons of thunder (Boavnpүعя o eбтıv voo $\beta \rho o v \tau \eta \varsigma)$. This Hebrew nickname is given only by Mark and the reason for it is not clear. It may refer to the fiery
temperament revealed in Lu 9:34 when James and John wanted to call down fire on the Samaritan villages that were unfriendly to them. The word literally means
sons of tumult, sons of thunder in Syriac. No other epithets are given by Mark save descriptions to distinguish as Simon the Cananaean (or Zealot) and Judas Iscariot, who also betrayed him (verse 19). Andrew, (from $\alpha \vee \eta \rho$, a man) and Philip (Philippos, fond of horses) are both Greek names. Bartholomew, son of Tolmai, is the Nathanael of John's Gospel (Joh 21:2 ). He probably had both names. Matthew is a Hebrew name meaning gift of God (MaӨӨaıo؟). Thomas is Hebrew and means Twin (Didymus, Joh 11:16 ). There are two uses of the name of James (Ia $\alpha \omega \beta$ os, Jacob). Thaddeus is another name for Lebbaeus.

Mark 3:19
He cometh into a house ( $\varepsilon \rho \chi \varepsilon \tau \alpha \varepsilon \iota \varsigma ~ o \iota \kappa о v)$. Historical present again and no article with noun. He comes home from the mountain, probably the house of Simon as in 1:29. Mark passes by the Sermon on the Mount given by Matthew and Luke on the mountain (plateau on the mountain in Luke). We have to allow a reasonable interval for Mark's narrative. Mark's Gospel is full of action and does not undertake to tell all that Jesus did and said.

Mark 3:20
So that they could not so much as eat bread ( $\omega \sigma \tau \varepsilon \mu \eta \delta \nu v \alpha \sigma \theta \alpha \alpha v \tau o v \varsigma \mu \eta \delta \varepsilon \alpha \rho \tau о v$ $\varphi a \gamma \varepsilon \iota v)$. Note infinitive with $\omega \sigma \tau \varepsilon$. Apparently Jesus and the disciples indoors with the great crowd in the house and at the door as in 1:32; 2:2 to which Mark refers by "again." The jam was so great that they could not rest, could not eat, and apparently Jesus could not even teach. The crowd reassembled at once on Christ's return from the mountain.

Mark 3:21
His friends (o $\left.\pi \alpha \rho^{\prime} \alpha v \tau o v\right)$. The phrase means literally "those from the side of him (Jesus)." It could mean another circle of disciples who had just arrived and who knew of the crowds and strain of the Galilean ministry who now come at this special juncture. But the idiom most likely means the kinspeople or family of Jesus as is common in the LXX. The fact that in verse 31 "his mother and his brothers" are expressly mentioned would indicate that they are "the friends" alluded to in verse 21 . It is a mournful spectacle to think of the mother and brothers saying,

He is beside himself ( $\varepsilon \xi \varepsilon \sigma \tau \eta)$. Second aorist active indicative intransitive. The same charge was brought against Paul (Ac 26:24; 2Co 5:13 ). We say that one is out of his head. Certainly Mary did not believe that Jesus was in the power of Beelzebub as the rabbis said already. The scribes from Jerusalem are trying to discount the power and prestige of Jesus ( 3:22). See on Mt 9:32-34; 10:25; 12:24 for Beelzebub and Beelzebul. Mary probably felt that Jesus was overwrought and wished to take him home out of the excitement and strain that he might get rest and proper food. See my The Mother of Jesus: Her Problems and Her Glory. The brothers did not as yet believe the pretensions and claims of Jesus (Joh 7:5 ). Herod Antipas will later consider Jesus as John the Baptist redivivus, the scribes treat him as under
demonic possession, even the family and friends fear a disordered mind as a result of overstrain. It was a crucial moment for Jesus. His family or friends came to take him home, to lay hold of him ( $\kappa \rho \alpha \tau \eta \sigma \alpha$ ), forcibly if need be.

Mark 3:23
In parables ( $\varepsilon v \pi \alpha \rho \alpha \beta 0 \lambda \alpha \iota \varsigma)$. In crisp pungent thrusts that exposed the inconsistencies of the scribes and Pharisees. See on Mt 13 for discussion of the word
parable ( $\pi \alpha \rho \alpha \beta 0 \lambda \eta$, placing beside for comparison). These short parabolic quips concern Satan's casting out ( $\varepsilon \kappa \beta \alpha \lambda \lambda \varepsilon$, the very word used of casting out demons) Satan (rhetorical question), a kingdom divided ( $\mu \varepsilon \rho \iota \sigma \theta \eta$, for a mere portion) against itself, a house divided ( $\mu \varepsilon \rho \iota \sigma \theta \eta$ ) against itself, two conditions of the third class undetermined, but with prospect of determination.

Mark 3:27
Spoil ( $\delta 1 \alpha \rho \pi \alpha \sigma \alpha)$. Plunder, compound verb, thoroughly ransack. Picture of Satan plundering the demons, the very tools (бкะレף) by which he carried on his business. A reductio ad absurdum. Jesus is the conqueror of Satan, not in league with him.

Mark 3:29
 penalty occurs here with $\varepsilon$ voxoc. In saying that Jesus had an unclean spirit (verse 30) they had attributed to the devil the work of the Holy Spirit. This is the unpardonable sin and it can be committed today by men who call the work of Christ the work of the devil, Nietzsche may be cited as an instance in point. Those who hope for a second probation hereafter may ponder carefully how a soul that eternally sins in such an environment can ever repent. That is eternal punishment. The text here is $\alpha \mu \alpha \rho \tau \eta \mu \alpha \tau о \varsigma(\sin )$, not $\kappa \rho ı \sigma \varepsilon \omega \varsigma$ (judgment), as the Textus Receptus has it.

Mark 3:31
Standing without ( $\varepsilon \xi \omega \sigma \tau \eta \kappa о \nu \tau \varepsilon \varsigma$ ). A late present from the perfect $\varepsilon \sigma \tau \eta \kappa \alpha$. Pathetic picture of the mother and brothers standing on the outside of the house thinking that Jesus inside is beside himself and wanting to take him home. They were crowded out.

They sent unto him, calling him ( $\alpha \pi \varepsilon \sigma \tau \varepsilon 1 \lambda \alpha v \pi \rho \circ \varsigma \alpha \cup \tau o v ~ \kappa \alpha \lambda о u v \tau \varepsilon \varsigma ~ \alpha \cup \tau о v)$. They were unwilling to disclose their errand to take him home (Swete) and so get the crowd to pass word unto Jesus on the inside, "calling him" through others. Some of the MSS. add "sisters" to mother and brothers as seeking Jesus.

Mark 3:32
Was sitting about him ( $\varepsilon \kappa \alpha \theta \eta \tau о \pi \varepsilon \rho$ av $\tau о v$ ). They sat in a circle (кик $\lambda \omega$ ) around Jesus with the disciples forming a sort of inner circle.

Mark 3:34
Looking round on them ( $\pi \varepsilon \rho 1 \beta \lambda \varepsilon \psi \alpha \mu \varepsilon v o \varsigma)$. Another of Mark's life-like touches. Jesus calls those who do the will of God his mother, brothers, and sisters. This does not prove
that the sisters were actually there. The brothers were hostile and that gives point to the tragic words of Jesus. One's heart goes out to Mary who has to go back home without even seeing her wondrous Son. What did it all mean to her at this hour?

## Mark 4

Mark 4:1
Sat in the sea ( $\kappa \alpha \theta \eta \sigma \theta \alpha \varepsilon \nu \tau \eta \theta \alpha \lambda \alpha \sigma \sigma \eta)$. In the boat, of course, which was in the sea. He first sat by the beach (Mt 13:1) and then a very great multitude (o $\gamma \lambda \circ \varsigma \pi \lambda \varepsilon ו \sigma \tau o \varsigma)$ made him enter a boat in which he sat and taught. It was a common experience now to teach the crowds on the beach ( $2: 1,13 ; 3: 7-9$ ).

There is gathered ( $\sigma v v \alpha \gamma \varepsilon \tau \alpha$ ). Graphic pictorial present again. See the crowds pressing Jesus into the sea.

## Mark 4:2

He taught them ( $\varepsilon \delta เ \delta \alpha \sigma \kappa \varepsilon v \alpha v \tau o v \varsigma)$. Imperfect tense describing it as going on.
In parables ( $\varepsilon v \pi \alpha \rho \alpha \beta$ o $\lambda \alpha \iota \varsigma)$. As in 3:23, only here more extended parables. See on Mt 13 for discussion concerning Christ's use of parables. Eight are given there, one (the Lamp both in Mr 4:21 and Lu 8:16 (both Sower and the Lamp in Luke), one alone in Mr 4:26-29 (seed growing of itself) not in Matthew or Luke, ten on this occasion. Only four are mentioned in Mr 4:1-34 (The Sower, the Lamp, the Seed Growing of Itself, the Mustard Seed). But Mark adds ( $4: 34$ ) "without a parable spake he not unto them," clearly meaning that Jesus spoke many others on this occasion and Matt. after mentioning eight (Mt 13:34) makes the same statement. Manifestly, therefore, Jesus spoke many parables on this day and all theories of exegesis or dispensations on the basis of the number of these kingdom parables are quite beside the mark. In beginning Jesus said:

Hearken (Aкоטعтع). It is significant that even Jesus had to ask people to listen when he spoke. See also verse 9.

Mark 4:7
Choked ( $\sigma v v \varepsilon \pi v \iota \xi \alpha v$ ). Пvı $\gamma \omega$ means to strangle, throttle. Mark has the compounded form with $\sigma v^{-}$, squeezed together. Mt 13:7 has $\alpha \pi \varepsilon \pi \nu \iota \xi \alpha \nu$,
choked off .
Yielded no fruit ( $\kappa \alpha \rho \pi о v$ оик $\varepsilon \delta \omega \kappa \alpha v$ ). In Mark alone. Barren in results.
Mark 4:8
Growing up and increasing ( $\alpha v \alpha \beta \alpha \iota v o v \tau \alpha \kappa \alpha \alpha v \xi \alpha v o \mu \varepsilon v \alpha$ ). In Mark alone. A vivid detail enlarging on the continued growth implied in the imperfect "yielded fruit" ( $\varepsilon \delta$ t $\delta o v$ $\kappa \alpha \rho \pi о v)$. It kept on yielding as it grew. Fruit is what matters.

Mark 4:10
When he was alone (отє єүعvєто ката $\mu$ оva¢). Only in Mark. Vivid recollection of Peter. Mark has also "they that were about him with the twelve" (o $\pi \varepsilon \rho$ av $\tau \boldsymbol{\nu} \sigma v \nu$ тoוs $\delta \omega \delta \varepsilon \kappa \alpha)$, Matthew and Luke simply "the disciples." They did not want the multitude to see that they did not understand the teaching of Jesus.

Mark 4:11
 $\tau \eta \varsigma \beta a \sigma \iota \lambda \varepsilon \iota a \varsigma$ тov $\theta \varepsilon$ ov). See on Mt 13:11 for word $\mu v \sigma \tau \eta \rho ı v$. Here (Mr 4:11; Mt 13:11; Lu 8:10) alone in the Gospels, but in Paul 21 times and in the Revelation 4 times. It is frequent in Daniel and O.T. Apocrypha. Matthew and Luke use it here in the plural. Matthew and Luke add the word
to know ( $\gamma \nu \omega v \alpha$ ), but Mark's presentation covers a wider range than growing knowledge, the permanent possession of the mystery even before they understand it. The secret is no longer hidden from the initiated. Discipleship means initiation into the secret of God's kingdom and it will come gradually to these men.

But unto them that are without ( $\varepsilon \kappa \varepsilon \iota v o \iota \varsigma \delta \varepsilon \tau о \iota \varsigma \varepsilon \xi \omega$ ). Peculiar to Mark, those outside our circle, the uninitiated, the hostile group like the scribes and Pharisees, who were charging Jesus with being in league with Beelzebub. Lu 8:10 has "to the rest" ( тоıऽ 入оıлоıৎ), Mt 13:11 simply "to them" (عкعוvoוৎ). Without the key the parables are hard to understand, for parables veil the truth of the kingdom being stated in terms of another realm. Without a spiritual truth and insight they are unintelligible and are often today perverted. The parables are thus a condemnation on the wilfully blind and hostile, while a guide and blessing to the enlightened.

That (ıva). Mark has the construction of the Hebrew "lest" of Isa 6:9f. with the subjunctive and so Lu 8:10, while Mt 13:13 uses causal o $\tau$ with the indicative following the LXX. See on Mt 13:13 for the so-called causal use of ıva. Gould on $\operatorname{Mr} 4: 12$ has an intelligent discussion of the differences between Matthew and Mark and Luke. He argues that Mark here probably "preserves the original form of Jesus' saying." God ironically commands Isaiah to harden the hearts of the people. If the notion of purpose is preserved in the use of $t v \alpha$ in Mark and Luke, there is probably some irony also in the sad words of Jesus. If ova is given the causative use of $o \tau$ in Matthew, the difficulty disappears. What is certain is that the use of parables on this occasion was a penalty for judicial blindness on those who will not see.

## Mark 4:12

Lest haply they should turn again, and it should be forgiven them ( $\mu \eta \pi \sigma \tau \varepsilon$ $\varepsilon \pi \iota \sigma \tau \rho \varepsilon \psi \omega \sigma \iota \nu \kappa \alpha \alpha \varphi \varepsilon \theta \eta$ $\alpha \cup \tau \circ \iota)$. Luke does not have these difficult words that seem in Isaiah to have an ironical turn, though Mt 13:15 does retain them even after using o $\tau$ for the first part of the quotation. There is no way to make $\mu \eta \pi \sigma \tau \varepsilon$ in $\operatorname{Mr} 4: 12$ and $\operatorname{Mt} 13: 15$ have a causal sense. It is the purpose of condemnation for wilful blindness and rejection such as suits the Pharisees after their blasphemous accusation against Jesus. Bengel says: iam ante non videbant, nunc accedit iudicium divinum. Jesus is pronouncing their doom in the language of Isaiah. It sounds like the dirge of the damned.

Mark 4:13
Know ye not this parable? (ovк oı $\delta \alpha \tau \varepsilon \tau \eta \nu \pi \alpha \rho \alpha \beta о \lambda \eta \nu \tau \alpha \nu \tau \varepsilon \nu$;). They had asked Jesus his reasons for using parables. This question implies surprise at their dulness though initiated
into the secret of God's Kingdom. Incapacity to comprehend this parable of the sower raises doubt about all the others on this day and at all times.

Mark 4:14
The sower soweth the word (o $\sigma \pi \varepsilon \iota \rho \omega \nu \tau o v \lambda o \gamma o v \sigma \pi \varepsilon \iota \rho \varepsilon$ ). Not put thus clearly and simply in Mt 13:19 or Lu 8:11.

Mark 4:15
Where the word is sown ( $о \pi \circ v \sigma \pi \varepsilon \iota \rho \varepsilon \tau \alpha$ o $\lambda о \gamma \circ \varsigma$ ). Explanatory detail only in Mark.
Satan ( $\Sigma a \tau \alpha v a \varsigma)$ where Mt 13:19 has
the evil one ( $о \pi о v \eta \rho \circ \varsigma)$ and Lu 8:12 the devil (о $\delta \iota \beta$ о $\quad$ оя).
Sown in them ( $\varepsilon \sigma \pi \alpha \rho \mu \varepsilon \nu 0 v \varepsilon \iota \varsigma \alpha \cup \tau о \cup \varsigma)$. Within them, not just among them, "in his heart" (Matt.).

Mark 4:19
The lusts of other things ( $\alpha \pi \varepsilon \rho \tau \alpha \lambda_{o \imath \pi \alpha} \varepsilon \pi \iota \theta \cup \mu \iota \alpha$ ). All the passions or longings, sensual, worldly, "pleasures of this life" ( $\eta \delta o v \omega v$ тov $\beta$ ıov) as Luke has it (Lu 8:14), the world of sense drowning the world of spirit. The word $\varepsilon \pi \iota \theta v \mu \iota \alpha$ is not evil in itself. One can yearn (this word) for what is high and holy (Lu 22:15; Php 1:23).

Mark 4:20
Bear fruit ( $\kappa \alpha \rho \pi о \varphi о \rho о v \sigma ı v)$. Same word in Mt 13:23 and Lu 8:15. Mark gives the order from thirty, sixty, to a hundred, while Mt 13:23 has it reversed.

Mark 4:21
Not to be put on the stand? (ov $\quad \downarrow \alpha \varepsilon \pi \tau \eta v \lambda v \chi \nu \iota \alpha \nu \tau \varepsilon \theta \eta \iota$ ). First aorist passive subjunctive of $\tau \iota \theta \eta \mu$ with $\tau v a$ (purpose). The lamp in the one-room house was a familiar object along with the bushel, the bed, the lampstand. Note article with each. M $\eta \tau$ in the Greek expects the answer no. It is a curious instance of early textual corruption that both Aleph and $B$, the two oldest and best documents, have v $\pi о \tau \eta \nu \lambda \nu \chi \nu \operatorname{lo} \nu$ (under the lampstand) instead of $\varepsilon \pi \tau \eta \nu \lambda \nu \chi \nu \iota \alpha v$, making shipwreck of the sense. Westcott and Hort actually put it in the margin but that is sheer slavery to Aleph and B. Some of the crisp sayings were repeated by Jesus on other occasions as shown in Matthew and Luke. To put the lamp under the bushel ( $\mu \mathrm{o} \delta \iota \circ v$ ) would put it out besides giving no light. So as to the bed or table-couch ( $\kappa \lambda \iota \nu \eta \nu$ ) if it was raised above the floor and liable to be set on fire.

Mark 4:22
Save that it should be manifested $(\varepsilon \alpha v \mu \eta \imath v \alpha \varphi \alpha v \varepsilon \rho \omega \theta \eta)$. Note $\varepsilon \alpha v \mu \eta$ and $\imath v a . \mathrm{Lu}$ 8:17 has it
that shall not be made manifest (o ov $\varphi a v \varepsilon \rho o v \gamma \varepsilon \nu \eta \sigma \varepsilon \tau \alpha$ ). Here in Mark it is stated that the temporary concealment is for final manifestation and a means to that end. Those who are charged with the secret at this time are given the set responsibility of proclaiming it on the housetops after Ascension (Swete). The hidden (к $\rho v \pi \tau \tau v$ ) and the
secret ( $\alpha \pi о \kappa \rho \cup \varphi о v$ ) are to be revealed in due time.

Mark 4:23
Repeats verse 9 with conditional form instead of a relative clause. Perhaps some inattention was noted.

Mark 4:24
What ye hear ( $\tau$ aкоvє $\tau \varepsilon$ ). Lu 8:18 has it "how ye hear" ( $\pi \omega \varsigma \alpha \kappa о \cup \varepsilon \tau \varepsilon$ ) . Both are important. Some things should not be heard at all for they besmirch the mind and heart. What is worth hearing should be heard rightly and heeded.

With what measure $(\varepsilon \nu \omega \mu \varepsilon \tau \rho \omega)$. See already in the Sermon on the Mount (Mt 7:2; Lu 6:38).

Mark 4:25
Even that which he hath ( $\kappa \alpha$ о $\varepsilon \chi \varepsilon$ ). Lu 8:18 has
even that which he thinketh that he hath or seemeth to have ( $\kappa \alpha$ о бокє $\varepsilon \chi \varepsilon เ v$ ). It is possible that $\varepsilon \chi \varepsilon$ here has the notion of acquiring. The man who does not acquire soon loses what he thinks that he has. This is one of the paradoxes of Jesus that repay thought and practice.

Mark 4:26
As if a man should cast $(\omega \varsigma \alpha v \theta \rho \omega \pi \sigma \varsigma \beta \alpha \lambda \eta)$. Note $\omega \varsigma$ with the aorist subjunctive without $\alpha v$. It is a supposable case and so the subjunctive and the aorist tense because a single instance. Blass considers this idiom "quite impossible," but it is the true text here and makes good sense (Robertson, Grammar, p. 968). The more common idiom would have been $\omega \varsigma \varepsilon \alpha \nu$ (or $\alpha v$ ).

Mark 4:27
Should sleep and rise ( $\kappa \alpha \theta \varepsilon v \delta \eta \kappa \alpha \varepsilon \gamma \varepsilon \iota \rho \eta \tau \alpha)$. Present subjunctive for continued action. So also
spring up and grow ( $\beta \lambda \alpha \sigma \tau \alpha \kappa \alpha \mu \eta \kappa v \nu \eta \tau \alpha$ ) two late verbs. The process of growth goes on all night and all day ( $v v \kappa \tau \alpha \kappa \alpha ~ \eta \mu \varepsilon \rho \alpha \nu$, accusative of time).

He knoweth not how ( $\omega \varsigma$ оטк oı $\delta \varepsilon \nu \alpha \cup \tau \circ \varsigma$ ). Note position of $\omega \varsigma$ (beginning) and $\alpha \cup \tau \circ \varsigma$ (end) of clause:

How knows not he. The mystery of growth still puzzles farmers and scientists of today with all our modern knowledge. But nature's secret processes do not fail to operate because we are ignorant. This secret and mysterious growth of the kingdom in the heart and life is the point of this beautiful parable given only by Mark. "When man has done his part, the actual process of growth is beyond his reach or comprehension" (Swete).

Mark 4:28
Of herself ( $\alpha v \tau o \mu \alpha \tau \eta$ ). Automatically, we say. The secret of growth is in the seed, not in the soil nor in the weather nor in the cultivating. These all help, but the seed spontaneously works according to its own nature. The word $\alpha v \tau \circ \mu \alpha \tau \eta$ is from $\alpha v \tau o \varsigma$ (self) and $\mu \varepsilon \mu \alpha \alpha$ desire eagerly from obsolete $\mu \alpha \omega$. Common word in all Greek history. Only one other example in
N.T., in Ac 12:10 when the city gate opens to Peter of its own accord. "The mind is adapted to the truth, as the eye to the light" (Gould). So we sow the seed, God's kingdom truth, and the soil (the soul) is ready for the seed. The Holy Spirit works on the heart and uses the seed sown and makes it germinate and grow, "first the blade, then the ear, then the full corn in the ear" ( $\pi \rho \omega \tau 0 v \chi \circ \rho \tau o v, \varepsilon \iota \tau \varepsilon v \sigma \tau \alpha \chi \nu \nu, \varepsilon \iota \tau \varepsilon v \pi \lambda \eta \rho \eta \sigma \iota \tau \circ v \varepsilon \nu \tau \omega \sigma \tau \alpha \chi v$ ). This is the law and order of nature and also of grace in the kingdom of God. Hence it is worth while to preach and teach. "This single fact creates the confidence shown by Jesus in the ultimate establishment of his kingdom in spite of the obstacles which obstruct its progress" (Gould).

Mark 4:29
Is ripe ( $\pi \alpha \rho \alpha \delta o$, second aorist subjunctive with o $\tau \alpha v$ ). Whenever the fruit yields itself or permits.

Putteth forth $(\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \varepsilon)$. Sends forth the sickle. The word for apostle comes from this verb. See Joh $4: 38$ : "I sent you forth to reap" ( $\varepsilon \gamma 0 \alpha \pi \varepsilon \sigma \tau \varepsilon ı \lambda \alpha$ v $\alpha \varsigma \quad \theta \varepsilon \rho \iota \zeta \varepsilon \imath v)$. Sickle ( $\delta \rho \varepsilon \pi \alpha v o v$ ) here by metonymy stands for the reapers who use it when the harvest stands ready for it ( $\pi \alpha \rho \varepsilon \sigma \tau \eta \kappa \varepsilon \nu$, stands by the side, present perfect indicative).

## Mark 4:30

How shall we liken? ( $\Pi \omega \varsigma$ o $\mu \circ \iota \omega \sigma \omega \mu \varepsilon v$ ?) Deliberative first aorist subjunctive. This question alone in Mark. So with the other question:

In what parable shall we set it forth? ( $\varepsilon v \tau i v \alpha v \tau \eta \nu \pi \alpha \rho \alpha \beta \circ \lambda \eta \theta \omega \mu \varepsilon v ;$ ). Deliberative second aorist subjunctive. The graphic question draws the interest of the hearers (we) by fine tact. Lu 13:18f. retains the double question which Mt 13:31f. does not have, though he has it in a very different context, probably an illustration of Christ's favourite sayings often repeated to different audiences as is true of all teachers and preachers.

Mark 4:31
When it is sown (o $\tau \alpha v \sigma \pi \alpha \rho \eta$ ). Second aorist passive subjunctive of $\sigma \pi \varepsilon \iota \rho \omega$. Alone in Mark and repeated in verse 32.

Less than all the seeds ( $\mu \kappa \rho о \tau \varepsilon \rho о \nu \pi \alpha \nu \tau \omega \nu \tau \omega \nu \sigma \pi \varepsilon \rho \mu \alpha \tau \omega \nu$ ). Comparative adjective with the ablative case after it. Hyperbole, of course, but clearly meaning that from a very small seed a large plant grows, the gradual pervasive expansive power of the kingdom of God.

Mark 4:32
Groweth up ( $\alpha v \alpha \beta \alpha ı v \varepsilon$ ). Mt 13:32 When it is grown (o $\alpha \alpha v \alpha v \xi \eta \theta \eta$ ).
Under the shadow thereof (v $\tau о \tau \eta \nu \sigma \kappa \iota \alpha v \alpha v \tau \sigma v)$. A different picture from Matthew's
in the branches thereof ( $\varepsilon \nu \tau о \iota \varsigma \kappa \lambda \alpha \delta o \iota \varsigma \alpha \tau \tau \nu)$. But both use катабкŋvoıv, to tent or camp down, make nests in the branches in the shade or hop on the ground under the shade just like a covey of birds. In Mt 8:20 the birds have nests (катабкך $\nu \omega \sigma \varepsilon \iota \varsigma)$. The use of the mustard seed for smallness seems to have been proverbial and Jesus employs it elsewhere (Mt 17:20; Lu 17:6 ).

Mark 4:33
As they were able to hear it ( $\kappa \alpha \theta \omega \varsigma \eta \delta v v a v \tau о \alpha \kappa о \varepsilon \varepsilon \downarrow$ ). Only in Mark. Imperfect indicative. See Joh 16:12 for ov $\delta v v a \sigma \theta \varepsilon \beta a \sigma \tau \alpha \zeta \varepsilon \iota v$, not able to bear. Jesus used parables now largely, but there was a limit even to the use of them to these men. He gave them the mystery of the kingdom in this veiled parabolic form which was the only feasible form at this stage. But even so they did not understand what they heard.

Mark 4:34
 $\varepsilon \pi \varepsilon \lambda v \varepsilon v \pi \alpha v \tau \alpha)$. To his own (ıסıoıৎ) disciples in private, in distinction from the mass of the people Jesus was in the habit (imperfect tense, $\varepsilon \pi \varepsilon \lambda \nu \varepsilon v$ ) of
disclosing, revealing, all things ( $\pi \alpha \nu \tau \alpha$ ) in plain language without the parabolic form used before the crowds. This verb $\varepsilon \pi \iota \lambda \nu \omega$ occurs in the N.T. only here and in Ac 19:39 where the town-clerk of Ephesus says of the troubles by the mob: "It shall be settled in the regular assembly" ( $\varepsilon \nu \tau \eta \varepsilon v \nu 0 \mu \omega \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha \varepsilon \pi \iota \lambda \nu \theta \eta \sigma \varepsilon \tau \alpha)$. First future passive indicative from $\varepsilon \pi \iota \lambda v \omega$. The word means to give additional $(\varepsilon \pi)$ loosening $(\lambda v \omega)$, so to explain, to make plainer, clearer, even to the point of revelation. This last is the idea of the substantive in $2 \mathrm{Pe} 1: 20$ where even the Revised Version has it: "No prophecy of scripture is of private interpretation" ( $\pi \alpha \sigma \alpha \pi \rho о \varphi \eta \tau \varepsilon \iota \alpha \gamma \rho \alpha \varphi \eta \varsigma \iota \delta \iota \alpha \varsigma \varepsilon \pi \iota \lambda \nu \sigma \varepsilon \omega \varsigma$ ov $\gamma \iota v \varepsilon \tau \alpha$ ). Here the use of $\gamma \iota v \varepsilon \tau \alpha$ (comes) with the ablative case ( $\varepsilon \pi \iota \lambda v \sigma \varepsilon \omega \varsigma)$ and the explanation given in verse $2 \mathrm{Pe} 1: 21$ shows plainly that disclosure or revelation to the prophet is what is meant, not interpretation of what the prophet said. The prophetic impulse and message came from God through the Holy Spirit. In private the further disclosures of Jesus amounted to fresh revelations concerning the mysteries of the kingdom of God.

Mark 4:35
When even was come ( $о \psi \iota \propto \varsigma \varepsilon \nu \circ \mu \varepsilon \nu \eta \varsigma$ ). Genitive absolute. It had been a busy day. The blasphemous accusation, the visit of the mother and brothers and possibly sisters, to take him home, leaving the crowded house for the sea, the first parables by the sea, then more in the house, and now out of the house and over the sea.

Let us go over unto the other side ( $\delta \iota \varepsilon \lambda \theta \omega \mu \varepsilon v \varepsilon ı \varsigma \tau о \pi \varepsilon \rho a v)$. Hortatory (volitive) subjunctive, second aorist active tense. They were on the western side and a row over to the eastern shore in the evening would be a delightful change and refreshing to the weary Christ. It was the only way to escape the crowds.

Mark 4:36
Even as he was ( $\omega \varsigma \eta v$ ). Vulgate, ita ut erat. Bengel says: sine apparatu. That is, they take Jesus along ( $\pi \alpha \rho \alpha \lambda \alpha \mu \beta \alpha v o v \sigma ı v$ ) without previous preparation.

Other boats ( $\alpha \lambda \lambda \alpha \pi \lambda o t \alpha)$. This detail also is given only by Mark. Some people had got into boats to get close to Jesus. There was a crowd even on the lake.

Mark 4:37

There ariseth a great storm of wind ( $\gamma \iota v \varepsilon \tau \alpha \lambda \alpha ı \lambda \alpha \pi \varsigma \mu \varepsilon \gamma \alpha \lambda \eta \alpha \nu \varepsilon \mu o v)$. Mark's vivid historical present again. Mt 8:24 has $\varepsilon \gamma \varepsilon v \varepsilon \tau o ~(a r o s e) ~ a n d ~ L u ~ 8: 23 ~ \kappa \alpha \tau \varepsilon \beta \eta ~(c a m e ~ d o w n) . ~ L u k e ~$ has also $\lambda \alpha ı \lambda \alpha \pi \varsigma$, but Matthew $\sigma \varepsilon \iota \sigma \mu \circ \varsigma$ (tempest), a violent upheaval like an earthquake. $\Lambda a ı \lambda a \pi \varsigma$ is an old word for these cyclonic gusts or storms. Luke's "came down" shows that the storm fell suddenly from Mount Hermon down into the Jordan Valley and smote the Sea of Galilee violently at its depth of 682 feet below the Mediterranean Sea. The hot air at this depth draws the storm down with sudden power. These sudden storms continue to this day on the Sea of Galilee. The word occurs in the LXX of the whirlwind out of which God answered Job (Job 38:1) and in Jon 1:4.

The waves beat into the boat ( $\tau \alpha \kappa \nu \mu \alpha \tau \alpha \varepsilon \pi \varepsilon \beta \alpha \lambda \lambda \varepsilon v \varepsilon \iota \varsigma$ то $\pi \lambda о \iota \nu$ ). Imperfect tense (were beating) vividly picturing the rolling over the sides of the boat "so that the boat was covered with the waves" (Mt 8:24). Mark has it: "insomuch that the boat was now filling" ( $\omega \sigma \tau \varepsilon \eta \delta \eta \gamma \varepsilon \mu \iota \varepsilon \sigma \theta \alpha$ то $\pi \lambda$ oıov). Graphic description of the plight of the disciples.

Mark 4:38
Asleep on the cushion ( $\varepsilon \pi$ то $\pi \rho о \sigma \kappa \varepsilon \varphi \alpha \lambda \alpha ı v ~ \kappa \alpha \theta \varepsilon v \delta \omega \nu$ ). Mark also mentions the cushion or bolster and the stern of the boat $(\varepsilon \nu \tau \eta \pi \rho v \mu \nu \eta)$. Mt 8:24 notes that Jesus was sleeping ( $\varepsilon \kappa \alpha \theta \varepsilon v \delta \varepsilon v)$, Luke that
he fell asleep ( $\alpha \varphi v \pi \nu \omega \sigma \varepsilon v$, ingressive aorist indicative). He was worn out from the toil of this day.

They awake him ( $\varepsilon \gamma \varepsilon \iota \rho o v \sigma \iota v \alpha v \tau o v$ ). So Mark's graphic present. Matthew and Luke both have "awoke him." Mark has also what the others do not: "Carest thou not?" (ov $\mu \varepsilon \lambda \varepsilon$ $\sigma o l ;)$. It was a rebuke to Jesus for sleeping in such a storm. We are perishing ( $\alpha \pi 0 \lambda \lambda \nu \mu \varepsilon \theta \alpha$, linear present middle). Precisely this same form also in Mt 8:25 and Lu 8:24.

Mark 4:39
Rebuked the wind $(\varepsilon \pi \varepsilon \tau \tau \mu \eta \sigma \varepsilon \nu \tau \omega \alpha \nu \varepsilon \mu \omega)$ as in Mt 8:26 and Lu 8:24. He spoke to the sea also. All three Gospels speak of the sudden calm ( $\gamma \alpha \lambda \eta \nu \eta)$ and the rebuke to the disciples for this lack of faith.

Mark 4:40
Why are ye fearful? (T $\delta \varepsilon ı \lambda o \varepsilon \sigma \tau \varepsilon ;$ ). They had the Lord of the wind and the waves with them in the boat. He was still Master even if asleep in the storm.
 was really Lord of nature. They had accepted his Messiaship, but all the conclusions from it they had not yet drawn. How like us in our troubles they were!

Mark 4:41
They feared exceedingly ( $\varepsilon \varphi \rho \beta \eta \forall \eta \sigma \alpha v \varphi о \beta o v \mu \varepsilon \gamma \alpha v$ ). Cognate accusative with the first aorist passive indicative. They feared a great fear. Mt 8:27 and Lu 8:22 mention that "they marvelled." But there was fear in it also.

Who then is this? (Tıऽ a $\alpha$ оитоৎ $\varepsilon \sigma \tau \iota v ;$ ). No wonder that they feared if this One could command the wind and the waves at will as well as demons and drive out all diseases and speak such mysteries in parables. They were growing in their apprehension and comprehension of Jesus Christ. They had much yet to learn. There is much yet for us today to learn or seek to grow in the knowledge of our Lord Jesus Christ. This incident opened the eyes and minds of the disciples to the majesty of Jesus.

## Mark 5

Mark 5:1
The Gerasenes ( $\tau \omega \nu \Gamma \varepsilon \rho \alpha \sigma \eta \nu \omega \nu$ ). Like Lu 8:26 while Mt 8:28 has "the Gadarenes." The ruins of the village Khersa (Gerasa) probably point to this site which is in the district of Gadara some six miles southeastward, not to the city of Gerasa some thirty miles away.

Mark 5:2
Out of the boat ( $\varepsilon \kappa$ रov $\pi \lambda o \iota o v$ ). Straightway ( $\varepsilon v \theta \cup \varsigma$ ) Mark says, using the genitive absolute $(\varepsilon \xi \varepsilon \lambda \theta$ ov $\tau o \varsigma ~ \alpha v \tau o v)$ and then repeating $\alpha v \tau \omega$ associative instrumental after $\alpha \pi \eta v \tau \eta \sigma \varepsilon v$. The demoniac greeted Jesus at once. Mark and Lu 9:27 mention only one man while Matthew notes two demoniacs, perhaps one more violent than the other. Each of the Gospels has a different phrase. Mark has "a man with an unclean spirit" ( $\varepsilon v \pi \nu \varepsilon v \mu a \tau$
 demons" ( $\tau \iota \varsigma \varepsilon \chi \omega v \delta \alpha \iota \mu \circ \nu \iota \alpha)$. Mark has many touches about this miracle not retained in Matthew and Luke. See on Mt 8:28 .

Mark 5:3
No man could any more bind him, no, not with a chain (ov $\delta \varepsilon \alpha \lambda \sigma \varepsilon$ ov $\delta \varepsilon \iota \varsigma \varepsilon \delta v v a \tau o$ $\alpha v \tau o v \delta \eta \sigma \alpha$ ). Instrumental case $\alpha \lambda v \sigma \varepsilon$, a handcuff ( $\alpha$ privative and $\lambda v \omega$, to loosen). But this demoniac snapped a handcuff as if a string.

Mark 5:4
Often bound ( $\pi о \lambda \lambda \alpha \kappa ı \varsigma ~ \delta \varepsilon \delta \varepsilon \sigma \theta \alpha$ ). Perfect passive infinitive, state of completion. With fetters ( $\pi \varepsilon \delta \alpha \iota$, from $\pi \varepsilon \zeta$, foot, instep) and chains, bound hand and foot, but all to no purpose. The English plural of foot is feet (Anglo-Saxon fot, fet) and fetter is feeter.

Rent asunder ( $\delta \iota \varepsilon \sigma \pi \alpha \sigma \theta \alpha$ ). Drawn ( $\sigma \pi \alpha \omega$ ) in two ( $\delta ı \alpha-$ same root as $\delta v o$, two). Perfect passive infinitive.

Broken in pieces ( $\sigma \nu v \tau \varepsilon \tau \rho \iota \varphi \theta \alpha$.) Perfect passive infinitive again, from $\sigma \nu \nu \tau \rho \iota \beta \omega$, to rub together. Rubbed together, crushed together. Perhaps the neighbours who told the story could point to broken fragments of chains and fetters. The fetters may have been cords, or even wooden stocks and not chains.

No man had strength to tame him (ov $\varepsilon \varepsilon ı \varsigma ~ เ \sigma \chi v \varepsilon v ~ \alpha v \tau o v \delta \alpha \mu \alpha \sigma \alpha$ ). Imperfect tense. He roamed at will like a lion in the jungle.

Mark 5:5
He was crying out, and cutting himself with stones ( $\eta \nu \kappa \rho \alpha \zeta \omega \nu \kappa \alpha \kappa \alpha \tau \alpha \kappa о \pi \tau \omega \nu \varepsilon \alpha v \tau о \nu$ $\lambda_{1}$ Өoıs). Further vivid details by Mark. Night and day his loud scream or screech could be heard like other demoniacs (cf. 1:26;3:11; 9:26). The verb for cutting himself occurs here only in the N.T., though an old verb. It means to cut down (perfective use of ката-). We say cut $u$, gash, hack to pieces. Perhaps he was scarred all over with such gashes during his
moments of wild frenzy night and day in the tombs and on the mountains. Periphrastic imperfect active with $\eta \nu$ and the participles.

## Mark 5:6

Ran and worshipped ( $\varepsilon \delta \rho \alpha \mu \varepsilon \nu \kappa \alpha \pi \rho о \sigma \varepsilon \kappa v \nu \eta \sigma \varepsilon \nu)$. "At first perhaps with hostile intentions. The onrush of the naked yelling maniac must have tried the newly recovered confidence of the Twelve. We can imagine their surprise when, on approaching, he threw himself on his knees" (Swete).

## Mark 5:7

I adjure thee by God (оркıЦ $\omega$ б $\varepsilon$ тov $\theta \varepsilon o v$ ). The demoniac puts Jesus on oath (two accusatives) after the startled outcry just like the one in 1:24, which see. He calls Jesus here

Torment me not ( $\mu \eta \mu \varepsilon \beta \alpha \sigma \alpha v \iota \sigma \eta \iota$ ). Prohibition with $\mu \eta$ and the ingressive aorist subjunctive. The word means to test metals and then to test one by torture (cf. our "third degree"). Same word in all three Gospels.

Mark 5:8
For he said $(\varepsilon \lambda \varepsilon \gamma \varepsilon v \gamma \alpha \rho)$. For he had been saying (progressive imperfect). Jesus had already repeatedly ordered the demon to come out of the man whereat the demon made his outcry to Jesus and protested. Mt 8:29 had "before the time" ( $\pi \rho \circ$ каı $\rho о v$ ) and $8: 31$ shows that the demons did not want to go back to the abyss ( $\tau \eta v \alpha \beta v \sigma \sigma o v$ ) right now. That was their real home, but they did not wish to return to the place of torment just now.

Mark 5:9
My name is Legion ( $\Lambda \varepsilon \gamma \iota \omega \nu$ ovo $\alpha \alpha \mu$ ). So Lu 8:30, but not Matthew. Latin word (legio). A full Roman legion had 6,826 men. See on Mt 26:53. This may not have been a full legion, for Mr 5:13 notes that the number of hogs was "about two thousand." Of course, a stickler for words might say that each hog had several demons.

Mark 5:13
And he gave them leave ( $\kappa \alpha \varepsilon \pi \varepsilon \tau \rho \varepsilon \psi \varepsilon v \alpha v \tau о \iota \varsigma)$. These words present the crucial difficulty for interpreters as to why Jesus allowed the demons to enter the hogs and destroy them instead of sending them back to the abyss. Certainly it was better for hogs to perish than men, but this loss of property raises a difficulty of its own akin to the problem of tornadoes and earthquakes. The question of one man containing so many demons is difficult also, but not much more so than how one demon can dwell in a man and make his home there. One is reminded of the man out of whom a demon was cast, but the demon came back with seven other demons and took possession. Gould thinks that this man with a legion of demons merely makes a historical exaggeration. "I feel as if I were possessed by a thousand devils." That is too easy an explanation. See on Mt 8:32 for "rushed down the steep."

They were choked ( $\varepsilon \pi \nu \iota \gamma \circ v \tau 0$ ). Imperfect tense picturing graphically the disappearance of pig after pig in the sea. Lu 8:33 has $\alpha \pi \varepsilon \gamma \nu \tau \gamma \eta$,
choked off , constative second aorist passive indicative, treated as a whole, Mt 8:32 merely has "perished" ( $\alpha \pi \varepsilon$ Өavov; died).

Mark 5:14
 in the city as the excited men ran they told the tale of the destruction of the hogs. They came to see ( $\eta \lambda$ Өov $\delta \varepsilon \varepsilon \imath)$. All the city came out (Matthew), they went out to see (Luke).

Mark 5:15
They come to Jesus ( $\varepsilon \rho \chi o v \tau \alpha \pi \rho o \varsigma ~ \tau o v$ In $\sigma o v v$ ). Vivid present. To Jesus as the cause of it all, "to meet Jesus" ( $\varepsilon \iota \varsigma ~ v \pi \alpha v \tau \eta \sigma \iota v$ Iף $\sigma o v$, Mt 8:34 ).

And behold ( $\theta \varepsilon \omega \rho o v \sigma \iota v$ ). Present tense again.
And they were afraid ( $\kappa \alpha \varepsilon \varphi o \beta \eta \theta \eta \sigma \alpha v$ ). They became afraid. Mark drops back to the ingressive aorist tense (passive voice). They had all been afraid of the man, but there he was "sitting clothed and in his right mind," ( $\kappa \alpha \eta \mu \varepsilon v o v \mu \alpha \tau \iota \mu \varepsilon v \circ v \kappa \alpha \sigma \omega \varphi \rho о v o v \nu \tau \alpha$. Note the participles). "At the feet of Jesus," Luke adds (Lu 8:35 ). For a long time he had worn no clothes (Lu 8:17). Here was the healing of the wild man and the destruction of the hogs all by this same Jesus.

Mark 5:17
To depart from their borders ( $\alpha \pi \varepsilon \lambda \theta \varepsilon \iota \nu$ a $\alpha 0 \tau \omega v$ o $\rho \iota \omega \nu$ ). Once before the people of Nazareth had driven Jesus out of the city ( $\mathrm{Lu} 4: 16-31$ ). Soon they will do it again on his return there (Mr 6:1-6; Mt 13:54-58). Here in Decapolis pagan influence was strong and the owners of the hogs cared more for the loss of their property than for the healing of the wild demoniac. In the clash between business and spiritual welfare business came first with them as often today. All three Gospels tell of the request for Jesus to leave. They feared the power of Jesus and wanted no further interference with their business affairs.

Mark 5:18
As he was entering ( $\varepsilon \mu \beta \alpha \iota v o v \tau o \varsigma \alpha v \tau o v)$. The man began to beseech him ( $\pi \alpha \rho \varepsilon \kappa \alpha \lambda \varepsilon$ ) before it was too late.

Mark 5:19
 own folks" rather than "thy friends." Certainly no people needed the message about Christ more than these people who were begging Jesus to leave. Jesus had greatly blessed this man and so gave him the hardest task of all, to go home and witness there for Christ. In Galilee Jesus had several times forbidden the healed to tell what he had done for them because of the undue excitement and misunderstanding. But here it was different. There was no danger of too much enthusiasm for Christ in this environment.

Mark 5:20
He went his way $(a \pi \eta \lambda \theta \varepsilon v)$. He went off and did as Jesus told him. He heralded (кŋрvббєıv) or published the story till all over Decapolis men marvelled ( $\varepsilon \theta \alpha \cup \mu \alpha \zeta \circ v$ ) at
what Jesus did, kept on marvelling (imperfect tense). The man had a greater opportunity for Christ right in his home land than anywhere else. They all knew this once wild demoniac who now was a new man in Christ Jesus. Thousands of like cases of conversion under Christ's power have happened in rescue missions in our cities.

Mark 5:23
My little daughter ( $\tau 0 \theta v \gamma \alpha \tau \rho \circ v \mu \circ v$ ). Diminutive of $\theta v \gamma \alpha \tau \eta \rho$ (Mt 9:18 ). "This little endearing touch in the use of the diminutive is peculiar to Mark" (Vincent). "Is at the point of death" ( $\varepsilon \sigma \chi \alpha \tau \omega \varsigma \varepsilon \chi \varepsilon)$. Has it in the last stages. Mt 9:18 has: "has just died" ( $\alpha \rho \tau \varepsilon \tau \varepsilon \lambda \varepsilon v \sigma \varepsilon v$ ), Luke "she lay a dying" ( $\alpha \pi \varepsilon \theta v \eta \sigma \kappa \varepsilon v$, imperfect, she was dying). It was a tragic moment for Jairus.

I pray thee, not in the Greek. This ellipsis before iva not uncommon, a sort of imperative use of tva and the subjunctive in the Koine (Robertson, Grammar, p. 943).

Mark 5:24
He went with him $(\alpha \pi \eta \lambda \theta \varepsilon v)$. Aorist tense. Went off with him promptly, but a great multitude followed him ( $\eta \kappa 0 \lambda o v \theta \varepsilon$ ), was following, kept following (imperfect tense).

They thronged him ( $\sigma v v \varepsilon \theta \lambda_{ı} \beta o v a v \tau o v$ ). Imperfect tense again. Only example of (here and in verse 31) this compound verb in the N.T., common in old Greek. Were pressing Jesus so that he could hardly move because of the jam, or even to breathe ( $\sigma v \varepsilon \varepsilon \pi \nu \imath \gamma \nu$, Lu 8:42 ).

## Mark 5:26

Had suffered many things of many physicians ( $\pi \circ \lambda \lambda \alpha \pi \alpha \theta о v \sigma \alpha v \pi \sigma \pi \sigma \lambda \lambda \omega \nu \tau \alpha \tau \rho \omega \nu$ ). A pathetic picture of a woman with a chronic case who had tried doctor after doctor.

Had spent all that she had ( $\delta \alpha \pi \alpha v \eta \sigma \alpha \sigma \alpha \tau \alpha \pi \alpha \rho^{\prime} \alpha v \tau \eta \varsigma \pi \alpha \nu \tau \alpha$ ). Having spent the all from herself, all her resources. For the idiom with $\pi \alpha \rho \alpha$ see $\mathrm{Lu} 10: 7$; Php 4:18. The tragedy of it was that she "was nothing bettered, but rather grew worse" ( $\mu \eta \delta \varepsilon \nu \omega \varphi \varepsilon \lambda \eta \theta \varepsilon \iota \sigma \alpha \alpha \lambda \lambda \alpha$ $\mu a \lambda \lambda o v \varepsilon \iota \varsigma$ то $\chi \varepsilon \iota \rho o v \varepsilon \lambda(O) \quad \sigma \alpha)$. Her money was gone, her disease was gaining on her, her one chance came now with Jesus. Matthew says nothing about her experience with the doctors and Lu 8:43 merely says that she "had spent all her living upon physicians and could not be healed of any," a plain chronic case. Luke the physician neatly takes care of the physicians. But they were not to blame. She had a disease that they did not know how to cure. Vincent quotes a prescription for an issue of blood as given in the Talmud which gives one a most grateful feeling that he is not under the care of doctors of that nature. The only parallel today is Chinese medicine of the old sort before modern medical schools came.

Mark 5:28
If I touch but his garments (E $\left.\alpha \nu \alpha \psi \omega \mu \alpha \kappa^{\prime} \alpha \nu \tau \omega \nu \iota \mu \alpha \tau \iota \omega \nu \alpha \nu \tau o v\right)$. She was timid and shy from her disease and did not wish to attract attention. So she crept up in the crowd and touched the hem or border of his garment ( $\kappa \rho \alpha \sigma \pi \delta \delta \nu$ ) according to Mt 9:20 and Lu 8:44

Mark 5:29
She felt in her body $(\varepsilon \gamma \nu \omega \tau \omega \sigma \omega \mu \alpha \tau)$. She knew, the verb means. She said to herself,
I am healed $(\iota \alpha \mu \alpha)$. Ia $\alpha \alpha$ retains the perfect passive in the indirect discourse. It was a vivid moment of joy for her. The plague ( $\mu \alpha \sigma \tau \iota \gamma \circ \varsigma)$ or scourge was a whip used in flagellations as on Paul to find out his guilt (Ac 22:24, cf. Heb 11:26). It is an old word that was used for afflictions regarded as a scourge from God. See already on Mr 3:10 .

Mark 5:30
Perceiving in himself ( $\varepsilon \pi \imath \gamma v o v \varsigma \varepsilon v \varepsilon \alpha v \tau \omega$ ). She thought, perhaps, that the touch of Christ's garment would cure her without his knowing it, a foolish fancy, no doubt, but one due to her excessive timidity. Jesus felt in his own consciousness. The Greek idiom more exactly means: "Jesus perceiving in himself the power from him go out" ( $\tau \eta \vee \varepsilon \xi \alpha v \tau o v \delta v v \alpha \mu \iota v$ $\varepsilon \xi \varepsilon \lambda(\theta o v \sigma \alpha v)$. The aorist participle here is punctiliar simply and timeless and can be illustrated by Lu 10:18: "I was beholding Satan fall" ( $\left.\varepsilon \theta \varepsilon \omega \rho o v \nu \tau o v \sum \alpha \tau \alpha v \alpha \nu \pi \varepsilon \sigma o v \tau \alpha\right)$, where $\pi \varepsilon \sigma o v \tau \alpha$ does not mean fallen ( $\pi \varepsilon \pi \tau \omega$ ко $\tau \alpha$ ) as in $\operatorname{Re} 9: 1$ nor falling ( $\pi \iota \pi \tau 0 v \tau \alpha$ ) but simply the constative aorist
fall (Robertson, Grammar, p. 684). So here Jesus means to say: "I felt in myself the power from me go." Scholars argue whether in this instance Jesus healed the woman by conscious will or by unconscious response to her appeal. Some even argue that the actual healing took place after Jesus became aware of the woman's reaching for help by touching his garment. What we do know is that Jesus was conscious of the going out of power from himself. Lu 8:46 uses $\varepsilon \gamma \nu \omega \nu$ (personal knowledge), but Mark has $\varepsilon \pi \iota \gamma \nu o v \varsigma$ (personal and additional, clear knowledge). One may remark that no real good can be done without the outgoing of power. That is true of mother, preacher, teacher, doctor.

Who touched my garments? (Tı̧ $\mu \circ v \eta \psi \alpha \tau о \tau \omega \nu ~ \mu \alpha \tau \iota \omega \nu ;$ ). More exactly,
Who touched me on my clothes; The Greek verb uses two genitives, of the person and the thing. It was a dramatic moment for Jesus and for the timid woman. Later it was a common practice for the crowds to touch the hem of Christ's garments and be healed (Mr 6:56 ). But here Jesus chose to single out this case for examination. There was no magic in the garments of Jesus. Perhaps there was superstition in the woman's mind, but Jesus honoured her darkened faith as in the case of Peter's shadow and Paul's handkerchief.

Mark 5:31
Thronging thee $\left(\sigma v v \theta \lambda_{ı} \beta o v \tau \alpha \sigma \varepsilon\right)$. See verse 24 . The disciples were amazed at the sensitiveness of Jesus to the touch of the crowd. They little understood the drain on Jesus from all this healing that pulled at his heart-strings and exhausted his nervous energy even though the Son of God. He had the utmost human sympathy.

Mark 5:32
And he looked round about ( $\kappa \alpha \pi \varepsilon \rho \iota \varepsilon \beta \lambda \varepsilon \pi \varepsilon \tau \frac{}{}$ ). Imperfect middle indicative. He kept looking around to find out. The answer of Jesus to the protest of the disciples was this
scrutinizing gaze (see already 3:5,34). Jesus knew the difference between touch and touch (Bruce).

Mark 5:33
Fearing and trembling, knowing ( $\varphi \circ \beta \eta \theta \varepsilon \iota \sigma \alpha \kappa \alpha \tau \rho \varepsilon \mu \circ v \sigma \alpha, \varepsilon ı \delta \nu \iota \alpha$ ). These participles vividly portray this woman who had tried to hide in the crowd. She had heard Christ's question and felt his gaze. She had to come and confess, for something "has happened" ( $\gamma \varepsilon \gamma \circ v \varepsilon v$, second perfect active indicative, still true) to her.

Fell down before him ( $\pi \rho \circ \sigma \varepsilon \pi \varepsilon \sigma \varepsilon v \alpha \nu \tau \omega$ ). That was the only proper attitude now.
All the truth ( $\pi \alpha \sigma \alpha \nu \tau \eta \nu \alpha \lambda \eta \theta \varepsilon ı \alpha v$ ). Secrecy was no longer possible. She told "the pitiful tale of chronic misery" (Bruce).

Mark 5:34
Go in peace (Нижаүع єıৎ $\varepsilon \iota \rho \eta \nu \eta v$ ). She found sympathy, healing, and pardon for her sins, apparently. Peace here may have more the idea of the Hebrew shalom, health of body
 whole and well.

Mark 5:35
While he yet spake (E $\operatorname{av\tau }$ av $\lambda \alpha \lambda$ ouv $\tau \circ \varsigma$ ). Genitive absolute. Another vivid touch in Mark and Lu 8:49. The phrase is in Ge 29:9. Nowhere does Mark preserve better the lifelike traits of an eyewitness like Peter than in these incidents in chapter 5. The arrival of the messengers from Jairus was opportune for the woman just healed of the issue of blood ( $\varepsilon v$ vбг $\alpha \mu \alpha \tau о \varsigma)$ for it diverted attention from her. Now the ruler's daughter has died ( $\alpha \pi \varepsilon \theta \alpha v \varepsilon$ ).

Why troublest thou the master any further? (T $\varepsilon \tau \sigma \kappa \nu \lambda \lambda \varepsilon \iota \varsigma ~ \tau o v ~ \delta ı \delta a \sigma \kappa \alpha \lambda o v ;$ ). It was all over, so they felt. Jesus had raised from the dead the son of the widow of Nain (Lu 7:11-17 ), but people in general did not expect him to raise the dead. The word $\sigma \kappa \nu \lambda \lambda \omega$, from $\sigma \kappa \nu \lambda$ ov (skin, pelt, spoils), means to skin, to flay, in Aeschylus. Then it comes to mean to vex, annoy, distress as in Mt 9:36, which see. The middle is common in the papyri for bother, worry, as in Lu 7:6. There was no further use in troubling the Teacher about the girl.

Mark 5:36
Not heeding (ларакоибац). This is the sense in Mt 18:17 and uniformly so in the LXX. But here the other sense of hearing aside, overhearing what was not spoken directly to him, probably exists also. "Jesus might overhear what was said and disregard its import" (Bruce). Certainly he ignored the conclusion of the messengers. The present participle $\lambda \alpha \lambda o u \mu \varepsilon v o v$ suits best the idea of overhearing. Both Mark and Lu 8:50 have "Fear not, only believe" ( $\mu \eta$ بoßov, $\mu$ ovov $\pi \iota \sigma \tau \varepsilon \cup \varepsilon$ ). This to the ruler of the synagogue ( $\tau \omega \alpha \rho \chi \iota \sigma v \alpha \gamma \omega \gamma \omega$ ) who had remained and to whom the messenger had spoken.

Mark 5:37
Save Peter, and James, and John ( $\varepsilon \mu \eta$ Пє $\rho \rho \frac{v}{} \kappa \alpha \lambda \alpha \kappa \omega \beta o v \kappa \alpha \mathrm{I} \omega \alpha v \eta v$ ). Probably the house was too small for the other disciples to come in with the family. The first instance of
this inner circle of three seen again on the Mount of Transfiguration and in the Garden of Gethsemane. The one article in the Greek treats the group as a unit.

Mark 5:38
Wailing greatly ( $\alpha \lambda \alpha \lambda \alpha \zeta$ оvт $\alpha \varsigma \pi о \lambda \lambda \alpha$ ). An onomatopoetic word from Pindar down. The soldiers on entering battle cried $A \lambda \alpha \lambda \alpha$. Used of clanging cymbals (1Co 13:1). Like o $\lambda \mathrm{o} \lambda v \zeta \omega$ in Jas 5:1. It is used here of the monotonous wail of the hired mourners.

Mark 5:39
Make a tumult ( $\theta \circ \rho \cup \beta \varepsilon \iota \sigma \theta \varepsilon)$. Middle voice. Jesus had dismissed one crowd (verse 37), but finds the house occupied by the hired mourners making bedlam ( $\theta$ o $\rho \cup \beta$ oc) as if that showed grief with their ostentatious noise. Mt 9:23 spoke of flute-players ( $\alpha v \lambda \eta \tau \alpha \varsigma$ ) and the hubbub of the excited throng ( $\operatorname{lo\rho } \boldsymbol{\beta} \beta$ ou $\mu \varepsilon v o v$. Cf. Mr 14:2; Ac 20:1,21,34 ). Mark, Matthew, and Luke all quote Jesus as saying that "the child is not dead, but sleepeth." Jesus undoubtedly meant that she was not dead to stay dead, though some hold that the child was not really dead. It is a beautiful word (she is
sleeping, $\kappa \alpha \theta \varepsilon v \delta \varepsilon$ ) that Jesus uses of death.
Mark 5:40
And they laughed him to scorn ( $\kappa \alpha \kappa \alpha \tau \varepsilon \gamma \varepsilon \lambda \omega v$ ). "They jeered at him" (Weymouth). Note imperfect tense. They kept it up. And note also кат- (perfective use). Exactly the same words in Mt 9:24 and Lu 8:53. The loud laughter was ill suited to the solemn occasion. But Jesus on his part ( $\alpha \cup \tau \circ \varsigma \delta \varepsilon$ ) took charge of the situation.

Taketh the father of the child and her mother and them that were with him
 $(\varepsilon \kappa \beta \alpha \lambda \omega v)$ the rest by a stern assertion of authority as if he were master of the house, Jesus takes along with him these five and enters the chamber of death "where the child was" (oлov $\eta \nu$ тo $\pi \alpha \iota \delta \iota v$ ). He had to use pressure to make the hired mourners leave. The presence of some people will ruin the atmosphere for spiritual work.

Mark 5:41
Talitha cumi. These precious Aramaic words, spoken by Jesus to the child, Peter heard and remembered so that Mark gives them to us. Mark interprets the simple words into Greek for those who did not know Aramaic ( $\tau$ ко $о \alpha \sigma \iota \nu, \varepsilon \gamma \varepsilon \iota \rho \varepsilon$ ), that is,

Damsel, arise. Mark uses the diminutive ко $\alpha \sigma \iota \omega v$, a little girl, from ко $\eta$, girl. Braid Scots has it: "Lassie, wauken." Lu 8:5-9 has it Hך $\pi \alpha \iota \sigma, \varepsilon \gamma \varepsilon \iota \rho \varepsilon$,

Maiden, arise. All three Gospels mention the fact that Jesus took her by the hand, a touch of life (кратךбаৎ $\tau \eta \varsigma \chi \varepsilon \iota \rho о \varsigma)$, giving confidence and help.

Mark 5:42
Rose up, and walked ( $\alpha \nu \varepsilon \sigma \tau \eta \kappa \alpha \pi \varepsilon \rho เ \varepsilon \pi \alpha \tau \varepsilon$ ). Aorist tense (single act) followed by the imperfect ( the walking went on ).

For she was twelve years old ( $\eta v \gamma \alpha \rho \varepsilon \tau \omega \nu \delta \omega \delta \varepsilon \kappa \alpha$ ). The age mentioned by Mark alone and here as explanation that she was old enough to walk.

Amazed ( $\varepsilon \xi \varepsilon \sigma \tau \eta \sigma \alpha v$ ). We have had this word before in Mt 12:23 and Mr 2:12, which see. Here the word is repeated in the substantive in the associative instrumental case ( $\varepsilon \kappa \sigma \tau \alpha \sigma \varepsilon$ $\mu \varepsilon \gamma \alpha \lambda \eta$ ), with a great ecstasy, especially on the part of the parents (Lu 8:56), and no wonder.

Mark 5:43
That no one should know this ( $\imath v a \mu \delta \varepsilon ı \varsigma \gamma v o \tau 0 v \tau 0$ ). Second aorist active subjunctive, $\gamma v o$. But would they keep still about it? There was the girl besides. Both Mark and Luke note that Jesus ordered that food be given to the child
given her to eat , ( $\delta 0 \theta \eta \nu \alpha$ avin $\varphi \alpha \gamma \varepsilon เ v)$, a natural care of the Great Physician. Two infinitives here (first aorist passive and second aorist active). "She could walk and eat; not only alive, but well" (Bruce).

## Mark 6

Mark 6:1
Into his own country ( $\varepsilon ı \varsigma ~ \tau \eta v \pi \alpha \tau \rho ı \delta \alpha \alpha v \tau o v)$. So Mt 13:54. There is no real reason for identifying this visit to Nazareth with that recorded in Lu 4:26-31 at the beginning of the Galilean Ministry. He was rejected both times, but it is not incongruous that Jesus should give Nazareth a second chance. It was only natural for Jesus to visit his mother, brothers, and sisters again. Neither Mark nor Matthew mention Nazareth here by name, but it is plain that by $\pi \alpha \tau \rho \iota \delta \alpha$ the region of Nazareth is meant. He had not lived in Bethlehem since his birth.

Mark 6:2
Began to teach ( $\eta \rho \xi \alpha \tau 0 \delta \iota \delta \alpha \sigma \kappa \varepsilon เ v$ ). As was now his custom in the synagogue on the sabbath. The ruler of the synagogue ( $\alpha \rho \chi ı \sigma v a \gamma \omega \gamma \circ \varsigma$, see Mt 5:22) would ask some one to speak whensoever he wished. The reputation of Jesus all over Galilee opened the door for him. Jesus may have gone to Nazareth for rest, but could not resist this opportunity for service.

Whence hath this man these things? (По日ev $\tau 0 \cup \tau \omega$ тavta;). Laconic and curt, Whence these things to this fellow? With a sting and a fling in their words as the sequel shows. They continued to be amazed ( $\varepsilon \xi \varepsilon \pi \lambda \eta \sigma \sigma o v \tau 0$, imperfect tense passive). They challenge both the apparent
wisdom ( $\sigma \circ \varphi \not \propto$ ) with which he spoke and
the mighty works or powers ( $\alpha \delta \nu v \alpha \mu \varepsilon ı$ )
such as those ( $\tau 01 \alpha \cup \tau \alpha)$
coming to pass ( $\gamma$ ıvo $\mu \varepsilon v a$, present middle participle, repeatedly wrought)
by his hands ( $\delta \iota \alpha \tau \omega v \chi \varepsilon \iota \rho \omega v$ ). They felt that there was some hocus-pocus about it somehow and somewhere. They do not deny the wisdom of his words, nor the wonder of his works, but the townsmen knew Jesus and they had never suspected that he possessed such gifts and graces.

## Mark 6:3

Is not this the carpenter? (OvX ovтоৎ $\varepsilon \sigma \tau \iota v$ o $\tau \varepsilon \kappa \tau \omega v$;). Mt 13:55 calls him "the carpenter's son" (o tov тeктоvos vioc). He was both. Evidently since Joseph's death he had carried on the business and was "the carpenter" of Nazareth. The word $\tau \varepsilon \kappa \tau \omega v$ comes from $\tau \varepsilon \kappa \varepsilon เ \nu, \tau І \kappa \tau \omega$, to beget, create, like $\tau \varepsilon \chi \vee \eta$ (craft, art). It is a very old word, from Homer down. It was originally applied to the worker in wood or builder with wood like our carpenter. Then it was used of any artisan or craftsman in metal, or in stone as well as in wood and even of sculpture. It is certain that Jesus worked in wood. Justin Martyr speaks of ploughs, yokes, et cetera, made by Jesus. He may also have worked in stone and may even have helped build some of the stone synagogues in Galilee like that in Capernaum. But in Nazareth the
people knew him, his family (no mention of Joseph), and his trade and discounted all that they now saw with their own eyes and heard with their own ears. This word carpenter "throws the only flash which falls on the continuous tenor of the first thirty years from infancy to manhood, of the life of Christ" (Farrar). That is an exaggeration for we have Lu 2:41-50 and "as his custom was" (Lu 4:16), to go no further. But we are grateful for Mark's realistic use of $\tau \varepsilon \kappa \tau \omega \nu$ here.

And they were offended in him ( $\kappa \alpha \varepsilon \sigma \kappa \alpha v \delta \alpha \lambda ı \zeta о v \tau о ~ \varepsilon v ~ \alpha \cup \tau \omega)$ ). So exactly Mt 13:56, were made to stumble in him, trapped like game by the $\sigma \kappa \alpha v \delta \alpha \lambda$ ov because they could not explain him, having been so recently one of them. "The Nazarenes found their stumbling block in the person or circumstances of Jesus. He became-- $\pi \varepsilon \tau \rho \alpha \sigma \kappa \alpha v \delta \alpha \lambda$ ov (1Pe 2:7,8; Ro 9:33 ) to those who disbelieved" (Swete). Both Mark and Mt 13:57, which see, preserve the retort of Jesus with the quotation of the current proverb about a prophet's lack of honour in his own country. Joh 4:44 quoted it from Jesus on his return to Galilee long before this. It is to be noted that Jesus here makes a definite claim to being a prophet ( $\pi \rho \circ \varphi \eta \tau \eta \varsigma$, forspeaker for God), a seer. He was much more than this as he had already claimed to be Messiah (Joh 4:26; Lu 4:21), the Son of man with power of God (Mr 1:10; Mt 9:6; Lu 5:24 ), the Son of God (Joh 5:22). They stumble at Jesus today as the townspeople of Nazareth did.

In his own house ( $\varepsilon v \tau \eta$ oוкıa $\alpha v \tau 0 v$ ). Also in Mt 13:57. This was the saddest part of it all, that his own brothers in his own home disbelieved his Messianic claims (Joh 7:5 ). This puzzle was the greatest of all.

Mark 6:6
And he marvelled because of their unbelief ( $\kappa \alpha \varepsilon Ө \alpha \cup \mu \alpha \sigma \varepsilon v \delta \iota \alpha \tau \eta \nu \alpha \pi \iota \sigma \tau \iota \alpha \nu \alpha \tau \tau v)$. Aorist tense, but Westcott and Hort put the imperfect in the margin. Jesus had divine knowledge and accurate insight into the human heart, but he had human limitations in certain things that are not clear to us. He marvelled at the faith of the Roman centurion where one would not expect faith (Mt 8:10; Lu 7:9). Here he marvels at the lack of faith where he had a right to expect it, not merely among the Jews, but in his own home town, among his kinspeople, even in his own home. One may excuse Mary, the mother of Jesus, from this unbelief, puzzled, as she probably was, by his recent conduct (Mr 3:21,31). There is no proof that she ever lost faith in her wonderful Son.

He went round about the villages teaching ( $\pi \varepsilon \rho ı \eta \gamma \varepsilon \nu \tau \alpha \varsigma \kappa \omega \mu \alpha \varsigma \kappa \nu \kappa \lambda \omega \delta \iota \delta \alpha \sigma \kappa \omega v$ ). A good illustration of the frequent poor verse division. An entirely new paragraph begins with these words, the third tour of Galilee. They should certainly be placed with verse 7. The Revised Version would be justified if it had done nothing else than give us paragraphs according to the sense and connection. "Jesus resumes the role of a wandering preacher in Galilee" (Bruce). Imperfect tense, $\pi \varepsilon \rho ı \eta \gamma \varepsilon v$.

Mark 6:7

By two and two ( $\delta v o \delta v o$ ). This repetition of the numeral instead of the use of ava $\delta v o$ or кata $\delta v o$ is usually called a Hebraism. The Hebrew does have this idiom, but it appears in Aeschylus and Sophocles, in the vernacular Koine (Oxyrhynchus Papyri No. 121), in Byzantine Greek, and in modern Greek (Deissmann, Light from the Ancient East, pp. 122f.). Mark preserves the vernacular Koine better than the other Gospels and this detail suits his vivid style. The six pairs of apostles could thus cover Galilee in six different directions. Mark notes that he "began to send them forth" ( $\eta \rho \xi \alpha \tau 0$ avtous $\alpha \pi о \sigma \tau \varepsilon \lambda \lambda \varepsilon เ v)$. Aorist tense and present infinitive. This may refer simply to this particular occasion in Mark's picturesque way. But the imperfect tense $\varepsilon \delta i \delta o v$ means he kept on giving them all through the tour, a continuous power (authority) over unclean spirits singled out by Mark as representing "all manner of diseases and all manner of sickness" (Mt 10:1), "to cure diseases" ( $1 \alpha \sigma \theta$, Lu 9:1 ), healing power. They were to preach and to heal ( $\mathrm{Lu} 9: 1$; Mt 10:7). Mark does not mention preaching as a definite part of the commission to the twelve on this their first preaching tour, but he does state that they did preach ( 6:12). They were to be missioners or missionaries ( $\alpha \pi о \sigma \tau \varepsilon \lambda \lambda \varepsilon เ v$ ) in harmony with their office ( $\alpha \pi$ обто入o).

## Mark 6:8

Save a staff only ( $\varepsilon \mu \eta \rho \alpha \beta \delta o v \mu o v o v$ ). Every traveller and pilgrim carried his staff. Bruce thinks that Mark has here preserved the meaning of Jesus more clearly than Mt 10:10 (nor staff) and Lu 9:3 (neither staff). This discrepancy has given trouble to commentators. Grotius suggests no second staff for Matthew and Luke. Swete considers that Matthew and Luke report "an early exaggeration of the sternness of the command." "Without even a staff is the ne plus ultra of austere simplicity, and self-denial. Men who carry out the spirit of these precepts will not labour in vain" (Bruce).

Mark 6:9
Shod with sandals (vto $\delta \varepsilon \delta \varepsilon \mu \varepsilon v o v c ~ \sigma a v \delta \alpha \lambda ı \alpha)$. Perfect passive participle in the accusative case as if with the infinitive $\pi$ о $\rho \varepsilon v \varepsilon \sigma \theta a$ or $\pi \circ \rho \varepsilon \cup \theta \eta v a$, (to go). Note the aorist infinitive middle, $\varepsilon v \delta v \sigma \alpha \sigma \theta a$ (text of Westcott and Hort), but $\varepsilon v \delta v \sigma \eta \sigma \theta \varepsilon$ (aorist middle subjunctive) in the margin. Change from indirect to direct discourse common enough, not necessarily due to "disjointed notes on which the Evangelist depended" (Swete). Mt 10:10 has "nor shoes" ( $\mu \eta \delta \varepsilon$ v $\pi \mathbf{\pi} \delta \eta \mu \alpha \tau \alpha$ ), possibly preserving the distinction between "shoes" and "sandals" (worn by women in Greece and by men in the east, especially in travelling). But here again extra shoes may be the prohibition. See on Mt 10:10 for this.

Two coats ( $\delta v o \chi ı \tau \omega v a \varsigma)$. Two was a sign of comparative wealth (Swete). The mention of "two" here in all three Gospels probably helps us to understand that the same thing applies to shoes and staff. "In general, these directions are against luxury in equipment, and also against their providing themselves with what they could procure from the hospitality of others" (Gould).

Mark 6:10

There abide ( $\varepsilon \kappa \varepsilon \mu \varepsilon v \varepsilon \tau \varepsilon$ ). So also Mt 10:11; Lu 9:4. Only Matthew has city or village ( 10:11), but he mentions house in verse 12 . They were to avoid a restless and dissatisfied manner and to take pains in choosing a home. It is not a prohibition against accepting invitations.

Mark 6:11
 testimony against them" ( $\varepsilon \iota \varsigma \mu \alpha \rho \tau \cup \rho \iota o v \varepsilon \pi$ avtouc). The dative $\alpha \cup \tau o \iota \varsigma$ in Mark is the dative of disadvantage and really carries the same idea as $\varepsilon \pi$ in Luke. The dramatic figure of
shaking out ( $\varepsilon \kappa \tau \iota v a \xi \alpha \tau \varepsilon$, effective aorist imperative, Mark and Matthew),
shaking off ( $\alpha \pi о \tau \imath v a \sigma \sigma \varepsilon \tau \varepsilon$, present imperative, Luke).
Mark 6:12
Preached that men should repent ( $\varepsilon \kappa \eta \rho \nu \xi \alpha v ~ \imath v \alpha \mu \varepsilon \tau \alpha v o \omega \sigma v$ ). Constative aorist ( $\varepsilon \kappa \eta \rho \cup \xi \alpha v$ ), summary description. This was the message of the Baptist (Mt 3:2) and of Jesus (Mr 1:15).

Mark 6:13
They cast out many demons and they anointed with oil ( $\varepsilon \xi \varepsilon \beta \alpha \lambda \lambda \circ \vee \kappa \alpha \eta \lambda \varepsilon \iota \varphi \circ v \varepsilon \lambda \alpha \iota \omega)$. Imperfect tenses, continued repetition. Alone in Mark. This is the only example in the N.T. of $\alpha \lambda \varepsilon \varepsilon \varphi \omega \varepsilon \lambda \alpha \iota \omega$ used in connection with healing save in Jas 5:14. In both cases it is possible that the use of oil (olive oil) as a medicine is the basis of the practice. See Lu 10:34 for pouring oil and wine upon the wounds. It was the best medicine of the ancients and was used internally and externally. It was employed often after bathing. The papyri give a number of examples of it. The only problem is whether $\alpha \lambda \varepsilon ⿺ \varphi \omega \omega$ in Mark and James is used wholly in a ritualistic and ceremonial sense or partly as medicine and partly as a symbol of divine healing. The very word $\alpha \lambda \varepsilon \iota \varphi \omega$ can be translated rub or anoint without any ceremony. "Traces of a ritual use of the unction of the sick appear first among Gnostic practices of the second century" (Swete). We have today, as in the first century, God and medicine. God through nature does the real healing when we use medicine and the doctor.

Mark 6:14
Heard ( $\eta$ коvoॄv). This tour of Galilee by the disciples in pairs wakened all Galilee, for the name of Jesus thus became known ( $\varphi$ avepov) or known till even Herod heard of it in the palace. "A palace is late in hearing spiritual news" (Bengel).

Therefore do these powers work in him ( $\delta \iota \alpha$ тоито $\varepsilon v \varepsilon \rho \gamma о и \sigma \iota v ~ a ~ \delta u v a \mu \varepsilon \iota \varsigma ~ \varepsilon v ~ a u \tau \omega$ ). "A snatch of Herod's theology and philosophy" (Morison). John wrought no miracles (Joh 10:41), but if he had risen from the dead perhaps he could. So Herod may have argued. "Herod's superstition and his guilty conscience raised this ghost to plague him" (Gould). Our word energy is this same Greek word here used (eveppougiv). It means at work. Miraculous powers were at work in Jesus whatever the explanation. This all agreed, but they
differed widely as to his personality, whether Elijah or another of the prophets or John the Baptist. Herod was at first much perplexed ( $\delta ı \eta \pi \circ \rho \varepsilon$, Lu 9:7 and Mr 6:20).

Mark 6:16
John, whom I beheaded (ov $\varepsilon \gamma 0 \alpha \pi \varepsilon \kappa \varepsilon \varphi \alpha \lambda \iota \sigma \alpha \mathrm{I} \omega \alpha v \eta \nu$ ). His fears got the best of him and so Herod settled down on this nightmare. He could still see that charger containing John's head coming towards him in his dreams. The late verb $\alpha \pi о к \varepsilon \varphi \alpha \lambda_{\iota} \zeta \omega$ means to cut off the head. Herod had ordered it done and recognizes his guilt.

Mark 6:17
For Herod himself (Avtos $\gamma \alpha \rho$ o $H \eta \rho \omega \iota \delta \eta \varsigma$ ). Mark now proceeds to give the narrative of the death of John the Baptist some while before these nervous fears of Herod. But this post eventum narrative is very little out of the chronological order. The news of John's death at Machaerus may even have come at the close of the Galilean tour. "The tidings of the murder of the Baptist seem to have brought the recent circuit to an end" (Swete). The disciples of John "went and told Jesus. Now when Jesus heard it, he withdrew from thence in a boat" (Mt 14:12f. ). See on Mt 14:3-12 for the discussion about Herod Antipas and John and Herodias.

Mark 6:18
Thy brother's wife ( $\tau \eta \nu \gamma u v a i k \alpha ~ \tau o v ~ a \delta \varepsilon \lambda \varphi o v)$. While the brother was alive (Le 18:16; 20:21 ). After a brother's death it was often a duty to marry his widow.

Mark 6:19
 disadvantage. Literally,
had it in for him. This is modern slang, but is in exact accord with this piece of vernacular Koine. No object of $\varepsilon \not \chi \varepsilon v$ is expressed, though op$\gamma \eta v$ or $\chi 0 \lambda$ o $v$ may be implied. The tense is imperfect and aptly described the feelings of Herodias towards this upstart prophet of the wilderness who had dared to denounce her private relations with Herod Antipas. Gould suggests that she "kept her eye on him" or kept up her hostility towards him. She never let up, but bided her time which, she felt sure, would come. See the same idiom in Ge 49:23. She
desired to kill him ( $\eta \theta \varepsilon \lambda \varepsilon v$ avtov $\alpha \pi$ окт $\varepsilon เ v \alpha$ ). Imperfect again.
And she could not ( $\kappa \alpha$ оик $\eta \delta \cup v a \tau о$ ). Ka here has an adversative sense, but she could not. That is, not yet. "The power was wanting, not the will" (Swete).

Mark 6:20
Feared John ( $\varepsilon \varphi \circ \beta \varepsilon \iota \tau 0$ тov I $\omega \alpha v \eta \nu$ ). Imperfect tense, continual state of fear. He feared John and also Herodias. Between the two Herod vacillated. He knew him to be righteous and holy ( (ঠкаıov ка аүเьv) and so innocent of any wrong. So he
kept him safe ( $\sigma \cup v \varepsilon \tau \eta \rho \varepsilon$ ). Imperfect tense again. Late Greek verb. From the plots and schemes of Herodias. She was another Jezebel towards John and with Herod.

Much perplexed ( $\pi о \lambda \lambda \alpha \eta \pi \sigma \rho \varepsilon$ ). This the correct text not $\pi о \lambda \lambda \alpha \varepsilon \pi о \varepsilon$, did many things. Imperfect tense again.

He heard him gladly ( $\eta \delta \varepsilon \omega \varsigma \eta \kappa о v \varepsilon v$ ). Imperfect tense again. This is the way that Herod really felt when he could slip away from the meshes of Herodias. These interviews with the Baptist down in the prison at Machaerus during his occasional visits there braced "his jaded mind as with a whiff of fresh air" (Swete). But then he saw Herodias again and he was at his wits' end ( $\eta \pi о \rho \varepsilon$, lose one's way, a privative and $\pi о \rho \circ \varsigma$, way), for he knew that he had to live with Herodias with whom he was hopelessly entangled.

Mark 6:21
When a convenient day was come ( $\gamma \varepsilon v о \mu \varepsilon \nu \eta \varsigma \eta \mu \varepsilon \rho \alpha \varsigma \varepsilon$ викаıроv). Genitive absolute. A day well appointed $\varepsilon v$, well, кaı $\rho o \varsigma$, time) for the purpose, the day for which she had long waited. She had her plans all laid to spring a trap for her husband Herod Antipas and to make him do her will with the Baptist. Herod was not to know that he was the mere catspaw of Herodias till it was all over. See on Mt 14:6 for discussion of Herod's birthday ( $\gamma \varepsilon v \varepsilon \sigma \iota o \iota$, locative case or associative instrumental of time).

Made a supper ( $\delta \varepsilon ı \pi v o v \varepsilon \pi o \sqcap \eta \sigma \varepsilon v)$. Banquet.
To his lords (тoı $\mu \varepsilon \gamma \iota \sigma \tau \alpha \sigma เ v \alpha \cup \tau о v)$. From $\mu \varepsilon \gamma เ \sigma \tau \alpha v$ (that from $\mu \varepsilon \gamma \alpha \varsigma$, great), common in the LXX and later Greek. Cf. Re 6:15; 18:23. In the papyri. The grandees, magnates, nobles, the chief men of civil life.

The high captains ( $\tau$ oıs $\chi$ ı $\lambda$ ı $\alpha \rho \chi$ oıऽ). Military tribunes, commanders of a thousand men.

The chief men of Galilee ( $\tau$ oı $\varsigma \rho \omega \tau$ тoı $\tau \eta \varsigma \Gamma \alpha \lambda ı \lambda \alpha \iota \varsigma)$. The first men of social importance and prominence. A notable gathering that included these three groups at the banquet on Herod's birthday.

Mark 6:22
The daughter of Herodias herself ( $\tau \eta \varsigma \theta v \gamma \alpha \tau \rho \circ \varsigma \alpha v \tau \eta \varsigma H \eta \rho \omega \iota \delta i \alpha \delta o \varsigma)$. Genitive absolute again. Some ancient manuscripts read avtov (his, referring to Herod Antipas. So Westcott and Hort) instead of autnc (herself). In that case the daughter of Herodias would also have the name Herodias as well as Salome, the name commonly given her. That is quite possible in itself. It was toward the close of the banquet, when all had partaken freely of the wine,
 midst (Matthew). "Such dancing was an almost unprecedented thing for women of rank, or even respectability. It was mimetic and licentious, and performed by professionals" (Gould). Herodias stooped thus low to degrade her own daughter like a common etalpa in order to carry out her set purpose against John.

She pleased Herod and them that sat at meat ( $\eta \rho \varepsilon \sigma \varepsilon v$ Н $\eta \rho \omega \iota \delta \eta$ ка то» $\sigma u v a v a \kappa \varepsilon ı \mu \varepsilon v o \iota s)$. The maudlin group lounging on the divans were thrilled by the licentious dance of the half-naked princess.

Whatsoever thou wilt (o eav $\theta \varepsilon \lambda \eta ı$ ) The drunken Tetrarch had been caught in the net of Herodias. It was a public promise.

Mark 6:23
And he sware unto her ( $\kappa \alpha \omega \mu \circ \sigma \varepsilon v \alpha \nu \tau \eta$ ). The girl was of marriageable age though called кopaбıv (cf. Es 2:9). Salome was afterward married to Philip the Tetrarch. The swaggering oath to the half of the kingdom reminds one of Es 5:3f. , the same oath made to Esther by Ahasuerus.

Mark 6:24
What shall I ask? (T ait $\eta \sigma \omega \mu \alpha 1$ ). The fact that she went and spoke to her mother proves that she had not been told beforehand what to ask. Mt 14:8 does not necessarily mean that, but he simply condenses the account. The girl's question implies by the middle voice that she is thinking of something for herself. She was no doubt unprepared for her mother's ghastly reply.

Mark 6:25
Straightway with haste ( $\varepsilon v \theta v \varsigma \mu \varepsilon \tau \alpha \sigma \pi \sigma v \delta \eta \varsigma)$. Before the king's rash mood passed and while he was still under the spell of the dancing princess. Herodias knew her game well. See on Mt 14:8f.

Mark 6:26
He would not reject her (ovk $\eta \theta \varepsilon \lambda \eta \sigma \varepsilon v \alpha \theta \varepsilon \tau \eta \sigma \alpha \alpha v \tau \eta v$ ). He was caught once again between his conscience and his environment. Like many since his day the environment stifled his conscience.

Mark 6:27
A soldier of his guard ( $\sigma \pi \varepsilon \kappa о \cup \lambda \alpha \tau о \rho \alpha)$. Latin word speculator. A spy, scout, lookout, and often executioner. It was used of the bodyguard of the Roman emperor and so for one of Herod's spies. He was used to do errands of this sort and it was soon done. It was a gruesome job, but he soon brought John's head to the damsel, apparently in the presence of all, and she took it to her mother. This miserable Tetrarch, the slave of Herodias, was now the slave of his fears. He is haunted by the ghost of John and shudders at the reports of the work of Jesus.

Mark 6:29
His corpse ( $\tau$ o $\pi \tau \omega \mu \alpha \alpha \cup \tau \sigma v)$. See on Mt 24:28. It was a mournful time for the disciples of John. "They went and told Jesus" (Mt 14:12 ). What else could they do?

Mark 6:30
And the apostles gather themselves together unto Jesus ( $\kappa \alpha$ бטvаүогта о атобтоло $\pi \rho o s$ tov I $\eta \sigma o u v$ ). Vivid historical present.

All things whatsoever they had done and whatsoever they had taught ( $\pi \alpha v \tau \alpha$ oбa $\varepsilon \pi о \not ŋ \sigma \alpha v \kappa \alpha$ об $\alpha \varepsilon \delta \iota \delta \alpha \xi \alpha v)$. Not past perfect in the Greek, just the aorist indicative, constative
aorist that summed it all up, the story of this their first tour without Jesus. And Jesus listened to it all ( $\mathrm{Lu} 9: 10$ ). He was deeply concerned in the outcome.

Mark 6:31
Come ye yourselves apart into a desert place and rest awhile ( $\Delta \varepsilon \cup \tau \varepsilon ~ \cup \mu \varepsilon \varsigma \varsigma ~ \alpha \cup \tau о ~ к а \tau ' ~$
 and excited and needed refreshment (avãavรбӨ\&, middle voice, refresh yourselves, "rest up" literally). This is one of the needed lessons for all preachers and teachers, occasional change and refreshment. Even Jesus felt the need of it.

They had no leisure so much as to eat (ou $\varepsilon \varphi \alpha \gamma \varepsilon ı v$ घukalpouv). Imperfect tense again. Crowds were coming and going. Change was a necessity.

Mark 6:32
And they went away in a boat ( $\kappa \alpha \alpha \pi \eta \lambda \theta o v \varepsilon v \tau \omega \pi \lambda o \omega \omega$ ). They accepted with alacrity and off they went.

Mark 6:33
Outwent them ( $\pi \rho \circ \eta \lambda \theta$ ov autouc). The crowds were not to be outdone. They recognized $(\varepsilon \gamma v \omega \sigma \alpha v)$ Jesus and the disciples and ran around the head of the lake on foot $(\pi \varepsilon \zeta \eta)$ and got there ahead of Jesus and were waiting for Him when the boat came.

## Mark 6:34

They were as sheep not having a shepherd ( $\eta \sigma \alpha \nu \omega \varsigma \pi \rho \circ \beta \alpha \tau \alpha \mu \eta \varepsilon \chi \circ v \tau \alpha \pi о \mu \varepsilon \nu \alpha)$. Matthew has these words in another context (Mt 9:26), but Mark alone has them here. M $\eta$ is the usual negative for the participle in the Koine. These excited and exciting people (Bruce) greatly needed teaching. Mt 14:14 mentions healing as does Lu 9:11 (both preaching and healing). But a vigorous crowd of runners would not have many sick. The people had plenty of official leaders but these rabbis were for spiritual matters blind leaders of the blind. Jesus had come over for rest, but his heart was touched by the pathos of this situation. So "he
 the verb of teaching and the present tense of the infinitive. He kept it up.

Mark 6:35
When the day was now far spent ( $\eta \delta \eta \omega \rho \alpha \varsigma \pi о \lambda \lambda \eta \varsigma \gamma \varepsilon v \circ \mu \varepsilon \nu \eta \varsigma)$. Genitive absolute. $\mathrm{H} \omega \rho \alpha$ used here for day-time (so Mt 14:15) as in Polybius and late Greek.

Much day-time already gone. Lu 9:12 has it began to
incline ( $\kappa \lambda_{\imath v \varepsilon ı}$ ) or wear away. It was after 3 P.M., the first evening. Note second evening or sunset in Mr 6:47; Mt 14:23; Joh 6:16. The turn of the afternoon had come and sunset was approaching. The idiom is repeated at the close of the verse. See on Mt 14:15.

Mark 6:36
Into the country and villages round about ( $\varepsilon ા \varsigma ~ \tau о ч \varsigma ~ к и к \lambda \omega ~ а ү \rho о и с ~ к а ~ к \omega \mu а \varsigma) . ~ T h e ~$ fields (aүpouc) were the scattered farms (Latin, villae). The villages ( $\kappa \omega \mu \alpha \varsigma)$ may have in-
cluded Bethsaida Julias not far away (Lu 9:10). The other Bethsaida was on the Western side of the lake (Mr 6:45).

Somewhat to eat ( $\tau \varphi \alpha \gamma \omega \sigma \tau v$ ). Literally,
what to eat,
what they were to eat. Deliberative subjunctive retained in the indirect question.
Mark 6:38
Go and see (vđaүعтє $1 \delta \varepsilon \tau \varepsilon$ ). John says that Jesus asked Philip to find out what food they had (Joh 6:5f. ) probably after the disciples had suggested that Jesus send the crowd away as night was coming on (Mr 6:35f. ). On this protest to his command that they feed the crowds (Mr 6:37; Mt 14:16; Lu 9:13 ) Jesus said "Go see" how many loaves you can get hold of. Then Andrew reports the fact of the lad with five barley loaves and two fishes (Joh 6:8f. ). They had suggested before that two hundred pennyworth ( $\delta \eta v \alpha \rho \iota \omega v \delta \iota \alpha \kappa \sigma \sigma \omega v$. See on Mt 18:28) was wholly inadequate and even that (some thirty-five dollars) was probably all that or even more than they had with them. John's Gospel alone tells of the lad with his lunch which his mother had given him.

Mark 6:39
By companies ( $\sigma \cup \mu \pi \sigma \sigma \iota \alpha \sigma \nu \mu \pi \sigma \sigma \iota)$ ). Distribution expressed by repetition as in Mr 6:7 ( $\delta v o \delta v o$ ) instead of using ava or ката. Literally our word symposium and originally a drinking party, Latin convivium, then the party of guests of any kind without the notion of drinking. So in Plutarch and the LXX (especially I Macca.).

Upon the green grass ( $\varepsilon \pi \tau \omega \chi \lambda \omega \rho \omega \chi \circ \rho \tau \omega)$. Another Markan touch. It was passover time (Joh 6:4) and the afternoon sun shone upon the orderly groups upon the green spring grass. See on Mt 14:15. They may have been seated like companies at tables, open at one end.

## Mark 6:40

They sat down in ranks ( $\alpha v \varepsilon \pi \varepsilon \sigma \alpha v \pi \rho \alpha \sigma \iota \alpha \pi \rho \alpha \sigma \iota \alpha)$. They half-way reclined ( $\alpha v a \kappa \lambda 1 \theta \eta v \alpha$,
 arranged in groups by hundreds and by fifties and they looked like garden beds with their many-coloured clothes which even men wore in the Orient. Then again Mark repeats the word, $\pi \rho \alpha \sigma \iota \alpha \pi \rho \alpha \sigma \iota \alpha$, in the nominative absolute as in verse 39 instead of using $\alpha v \alpha$ or кат $\alpha$ with the accusative for the idea of distribution. Garden beds, garden beds. Peter saw and he never forgot the picture and so Mark caught it. There was colour as well as order in the grouping. There were orderly walks between the rows on rows of men reclining on the green grass. The grass is not green in Palestine much of the year, mainly at the passover time. So here the Synoptic Gospels have an indication of more than a one-year ministry of Jesus (Gould). It is still one year before the last passover when Jesus was crucified.

## Mark 6:41

Brake the loaves; and he gave to the disciples ( $\kappa \alpha \alpha \pi о \tau \omega \nu \imath \chi \theta \nu \omega v$ ). Apparently the fishes were in excess of the twelve baskets full of broken pieces of bread. See on Mt 14:20 for discussion of коүıvos and $\sigma \varphi \cup \rho \iota \varsigma$, the two kinds of baskets.

Mark 6:44
Men ( $\alpha v \delta \rho \varepsilon \varsigma$ ). Men as different from women as in Mt 14:21. This remarkable miracle is recorded by all Four Gospels, a nature miracle that only God can work. No talk about accelerating natural processes will explain this miracle. And three eyewitnesses report it: the Logia of Matthew, the eyes of Peter in Mark, the witness of John the Beloved Disciple (Gould). The evidence is overwhelming.

Mark 6:45
To Bethsaida ( $\pi \rho \rho \varsigma \mathrm{B} \eta \theta \sigma \alpha\llcorner\delta \alpha v$ ). This is Bethsaida on the Western side, not Bethsaida Julias on the Eastern side where they had just been (Lu 9:10).

While he himself sendeth the multitude away ( $\varepsilon \omega \varsigma$ аutoৎ $\alpha \pi \circ \lambda v \varepsilon$ тov ox $\lambda \circ$ ). Mt $14: 22$ has it "till he should send away" ( $\varepsilon \omega \varsigma$ ov $\alpha \pi 0 \lambda v \sigma \eta$ ) with the aorist subjunctive of purpose. Mark with the present indicative $\alpha \pi \sigma \lambda \nu \varepsilon$ pictures Jesus as personally engaged in persuading the crowds to go away now. Joh 6:41f. explains this activity of Jesus. The crowds had become so excited that they were in the mood to start a revolution against the Roman government and proclaim Jesus king. He had already forced in reality the disciples to leave in a boat
to go before him ( $\pi \rho \circ \alpha \gamma \varepsilon เ v$ ) in order to get them out of this atmosphere of overwrought excitement with a political twist to the whole conception of the Messianic Kingdom. They were in grave danger of being swept off their feet and falling heedlessly into the Pharisaic conception and so defeating the whole teaching and training of Jesus with them. See on Mt 14:22,23. To this pass things had come one year before the Crucifixion. He had done his best to help and bless the crowds and lost his chance to rest. No one really understood Jesus, not the crowds, not the disciples. Jesus needed the Father to stay and steady him. The devil had come again to tempt him with world dominion in league with the Pharisees, the populace, and the devil in the background.

Mark 6:47
When even was come (oчıas $\gamma \varepsilon v o \mu \varepsilon \vee \eta \varsigma)$. The second or late evening, six P.M. at this season, or sunset on.

He alone on the land ( $\kappa \alpha$ av $\tau \circ \varsigma \mu \circ v o \varsigma ~ \eta \pi \tau \eta \varsigma \gamma \eta \varsigma)$. Another Markan touch. Jesus had come down out of the mountain where he had prayed to the Father. He is by the sea again in the late twilight. Apparently Jesus remained quite a while, some hours, on the beach. "It was now dark and Jesus had not yet come to them" (Joh 6:17 ).

Mark 6:48
Seeing them distressed in rowing (ı $\delta \omega v$ avtovৎ $\beta \alpha \sigma \alpha v ı \zeta о \mu \varepsilon v o v \varsigma \varepsilon v \tau \omega \varepsilon \lambda \alpha v v \varepsilon เ v)$. See also Mt 8:29 for the word $\beta a \sigma \alpha v \iota \zeta \omega$, to torture, torment (Mt 4:24) with a touch-stone, then
to distress as here. Papyri have $\delta \iota \alpha \beta a \sigma \alpha v \omega v$ used on slaves like our third degree for criminals. Eגauveıv is literally to drive as of ships or chariots. They drove the boat with oars. Common in Xenophon for marching.

About the fourth watch of the night ( $\pi \varepsilon \rho \tau \varepsilon \tau \alpha \rho \tau \eta \nu \varphi \cup \lambda \alpha \kappa \eta \nu \tau \eta \varsigma \nu v \kappa \tau о \varsigma)$. That is, between three and six A.M. The wind was
contrary to them (evavitoc autoı), that is in their faces and rowing was difficult, "a great wind" (Joh 6:18) , and as a result the disciples had made little progress. They should have been over long before this.

And he would have passed by them ( $\kappa \alpha \eta \theta \varepsilon \lambda \varepsilon v \pi \alpha \rho \varepsilon \lambda \theta \varepsilon เ v ~ a u t o u ¢)$. Only in Mark. He wished to pass by them, praeterire eos (Vulgate). Imperfect tense $\eta \theta \varepsilon \lambda \varepsilon v$.

They thought ( $\varepsilon \delta \circ \xi \alpha v$ ). A natural conclusion.
And cried out ( $\alpha v \varepsilon \kappa \rho \alpha \xi \alpha v$ ).
Cried up, literally, a shriek of terror, or scream.
Mark 6:50
It is I $(\varepsilon \gamma o \varepsilon \mu)$ ). These were the astounding words of cheer. They did not recognize Jesus in the darkness. They had never seen him or any one walk on the water. His voice reassured them.

Mark 6:51
They were sore amazed in themselves ( $\lambda_{\iota} \alpha v \varepsilon v$ عav Imperfect tense picturing vividly the excited disciples. Mark does not give the incident of Peter's walking on the water and beginning to sink. Perhaps Peter was not fond of telling that story.

Mark 6:52
For they understood not ( $o v \gamma \alpha \rho \sigma v v \eta \kappa \alpha v$ ). Explanation of their excessive amazement, viz., their failure to grasp the full significance of the miracle of the loaves and fishes, a nature miracle. Here was another, Jesus walking on the water. Their reasoning process (kap $\delta \iota \alpha$ in the general sense for all the inner man)
was hardened ( $\eta \nu \pi \varepsilon \pi \omega \rho \omega \mu \varepsilon \nu \eta$ ). See on 3:5 about $\pi \omega \rho \omega \sigma \iota \varsigma$. Today some men have such intellectual hardness or denseness that they cannot believe that God can or would work miracles, least of all nature miracles.

Mark 6:53
And moored to the shore ( $\kappa \alpha \pi \rho о \sigma \omega \rho \mu \iota \sigma \eta \eta \sigma \alpha v$ ). Only here in the New Testament, though an old Greek verb and occurring in the papyri. Hop os is roadstead or anchorage. They cast anchor or lashed the boat to a post on shore. It was at the plain of Gennesaret several miles south of Bethsaida owing to the night wind.

Mark 6:54
Knew him ( $\varepsilon \pi \imath \gamma v o v \tau \varepsilon \varsigma \alpha \cup \tau o v)$. Recognizing Jesus, knowing fully $(\varepsilon \pi)$ as nearly all did by now. Second aorist active participle.

Mark 6:55
Ran about ( $\pi \varepsilon \rho \iota \varepsilon \delta \rho \alpha \mu \circ v$ ). Vivid constative aorist picturing the excited pursuit of Jesus as the news spread that he was in Gennesaret.

On their beds ( $\varepsilon \pi$ тогя краßаттоь). Pallets like that of the man let down through the roof (Mr 2:4).

Where they heard he was (отои $\eta \kappa о v о \nu$ от $\varepsilon \sigma \tau \iota v)$. Imperfect tense of $\alpha \kappa о \omega \omega$ (repetition), present indicative $\varepsilon \sigma \tau \iota v$ retained in indirect discourse.

Mark 6:56
Wheresoever he entered (отоv $\alpha v \varepsilon$ єбєторєиєто). The imperfect indicative with $\alpha v$ used to make a general indefinite statement with the relative adverb. See the same construction at the close of the verse, oбo $\alpha v \eta \psi \alpha v \tau 0$ avtov (aorist indicative and $\alpha v$ in a relative clause),
as many as touched him. One must enlarge the details here to get an idea of the richness of the healing ministry of Jesus. We are now near the close of the Galilean ministry with its many healing mercies and excitement is at the highest pitch (Bruce).

Mark 7:2
 instrumental case. Originally kotvos meant what was common to everybody like the Koine Greek. But in later Greek it came also to mean as here what is vulgar or profane. So Peter in Ac 10:14 "common and unclean." The next step was the ceremonially unclean. The emissaries of the Pharisees and the scribes from Jerusalem had seen "some of the disciples" eat without washing their hands, how many we are not told. Swete suggests that in going through the plain the disciples were seen eating some of the bread preserved in the twelve baskets the afternoon before across the lake. There was no particular opportunity to wash the hands, a very proper thing to do before eating for sanitary reasons. But the objection raised is on ceremonial, not sanitary, grounds.

Mark 7:3
Diligently ( $\pi v \gamma \mu \eta$ ). Instrumental case,
with the fist, up to the elbow, rubbing one hand and arm with the other hand clenched. Aleph had $\pi \nu \kappa v a$ probably because of the difficulty about $\pi v \gamma \mu \eta$ (kin to Latin pugnus). Schultess considers it a dry wash or rubbing of the hands without water as a ritualistic concession. The middle voice $v i \psi \omega v \tau \alpha$ means their own hands. This verb is often used for parts of the body while $\lambda o v \omega$ is used of the whole body (Joh 13:10). On the tradition of the elders see on Mt 15:2 .

Mark 7:4
From the marketplace ( $\alpha \pi^{\prime}$ a $\gamma о \rho a \varsigma$ ). Ceremonial defilement was inevitable in the mixing with men in public. This $\alpha \gamma 0 \rho \alpha$ from $\alpha \gamma \varepsilon ו \rho \omega$ to collect or gather, was a public forum
in every town where the people gathered like the courthouse square in American towns. The disciples were already ceremonially defiled.

Wash themselves ( $\beta a \pi \tau \iota \sigma \omega v \tau \alpha)$. First aorist middle subjunctive of $\beta a \pi \tau \iota \zeta \omega$, dip or immerse. Westcott and Hort put pavtıб $\omega v \tau \alpha$ in the text translated "sprinkle themselves" in the margin of the Revised Version, because Aleph, B, and some of the best cursives have it. Gould terms pavtı $\sigma \omega v \tau \alpha$ "a manifest emendation," to get rid of the difficulty of dipping or bathing the whole body. Meyer says: "The statement proceeds by way of climax: before eating they wash the hands always. When they come from market they take a bath before eating." This is not the place to enter into any controversy about the meaning of $\beta a \pi \tau \iota \zeta \omega$, to dip, $\operatorname{pav\tau i} \zeta \omega$, to sprinkle, and $\varepsilon \chi \chi \varepsilon \omega$, to pour, all used in the New Testament. The words have their distinctive meanings here as elsewhere. Some scribes felt a difficulty about the use of $\beta \alpha \pi \tau \iota \sigma \omega v \tau \alpha$ here. The Western and Syrian classes of manuscripts add "and couches" ( $\kappa \alpha$ $\kappa \lambda \iota \nu \omega v$ ) at the end of the sentence. Swete considers the immersions of beds ( $\beta a \pi \tau \iota \sigma \mu \circ v$, $\kappa \lambda \iota v \omega v)$ "an incongruous combination." But Gould says: "Edersheim shows that the Jewish ordinance required immersions, $\beta a \pi \tau \iota \sigma \mu o v c$, of these vessels." We must let the Jewish scrupulosity stand for itself, though "and couches" is not supported by Aleph, B LD Bohairic, probably not genuine.

Mark 7:6
Well ( $\kappa \alpha \lambda \omega \varsigma)$. Appositely here, but ironical sarcasm in verse 9 . Note here "you hypocrites" ( $\nu \mu \omega \nu \tau \omega \nu v \pi о \kappa \rho ı \tau \omega v$ ).

Mark 7:8
Ye leave the commandment of God ( $\alpha \varphi \varepsilon \nu \tau \varepsilon \varsigma \tau \eta \nu \varepsilon \nu \tau o \lambda \eta \nu$ tov $\theta \varepsilon o v$ ). Note the sharp contrast between the command of God and the traditions of men. Jesus here drives a keen wedge into the Pharisaic contention. They had covered up the Word of God with their oral teaching. Jesus here shows that they care more for the oral teaching of the scribes and elders than for the written law of God. The Talmud gives abundant and specific confirmation of the truthfulness of this indictment.

Mark 7:9
Full well do ye reject the commandment of God that ye may keep your traditions ( $\kappa \alpha \lambda \omega \varsigma \alpha \varepsilon \tau \varepsilon เ \tau \varepsilon \tau \eta \nu \varepsilon \nu \tau 0 \lambda \eta \nu$ тov $\theta \varepsilon o v ~ เ v \alpha \tau \eta \nu \pi \alpha \rho \alpha \delta o \sigma เ \nu \nu \mu \omega \nu \tau \eta \rho \eta \sigma \eta \tau \varepsilon)$. One can almost see the scribes withering under this terrible arraignment. It was biting sarcasm that cut to the bone. The evident irony should prevent literal interpretation as commendation of the Pharisaic pervasion of God's word. See my The Pharisees and Jesus for illustrations of the way that they placed this oral tradition above the written law. See on Mt 15:7.

Mark 7:11
Corban (кор $\beta \alpha v$ o $\varepsilon \sigma \tau \iota v \delta \omega \rho о \nu)$. See on Mt 15:5. Mark preserves the Hebrew word for a gift or offering to God (Ex 21:17; Le 20:9) , indeclinable here, meaning
gift ( $\delta \omega \rho o v$ ), but declinable кор $\beta$ аvac in Mt 27:6, meaning sacred treasury. The rabbis ( but ye say , $v \mu \varepsilon \iota \varsigma \varepsilon \lambda \varepsilon \gamma \varepsilon \tau \varepsilon$ ) actually allowed the mere saying of this word by an unfaithful son to prevent the use of needed money for the support of father or mother. It was a home thrust to these pettifogging sticklers for ceremonial punctilios. They not only justified such a son's trickery, but held that he was prohibited from using it for father or mother, but he might use it for himself.

Mark 7:13
 $\pi \alpha \rho \alpha \delta о \sigma \varepsilon \nu \mu \omega v$ ). See on Mt 15:6 for the word $\alpha \kappa \nu \rho о u v \tau \varepsilon$, , invalidating, a stronger word than $\alpha \theta \varepsilon \tau \varepsilon เ v$, to set aside, in verse 9 . See both used in $\mathrm{Ga} 3: 15,17$. Setting aside does invalidate.

Mark 7:14
And he called to him the multitude again ( $\kappa \alpha \pi \rho о \sigma \kappa \alpha \lambda \varepsilon \sigma \alpha \mu \varepsilon v о \varsigma ~ \pi \alpha \lambda ı \nu ~ \tau о v ~ о \chi \lambda о v) . ~$ Aorist middle participle, calling to himself. The rabbis had attacked the disciples about not washing their hands before eating. Jesus now turned the tables on them completely and laid bare their hollow pretentious hypocrisy to the people.

Hear me all of you and understand ( $\alpha \kappa о \cup \sigma \alpha \tau \varepsilon \mu \circ \cup \pi \alpha \nu \tau \varepsilon \varsigma \kappa \alpha ~ \sigma \cup v เ \varepsilon \tau \varepsilon)$. A most pointed appeal to the people to see into and see through the chicanery of these ecclesiastics. See on Mt 15:11 for discussion.

Mark 7:17
When he was entered into the house from the multitude (oтє $\varepsilon เ \sigma \eta \lambda \theta \varepsilon v \varepsilon ı \varsigma$ оюкоv $\alpha \pi о$ tov ox $\lambda$ ov). This detail in Mark alone, probably in Peter's house in Capernaum. To the crowd Jesus spoke the parable of corban, but the disciples want it interpreted (cf. 4:10ff.,33ff. ). Mt 15:15 represents Peter as the spokesman as was usually the case.

Mark 7:18
 15:16. You also as well as the multitude. It was a discouraging moment for the great Teacher if his own chosen pupils (disciples) were still under the spell of the Pharisaic theological outlook. It was a riddle to them. "They had been trained in Judaism, in which the distinction between clean and unclean is ingrained, and could not understand a statement abrogating this" (Gould). They had noticed that the Pharisees stumbled at the parable of Jesus (Mt 15:12 ). They were stumbling themselves and did not know how to answer the Pharisees. Jesus charges the disciples with intellectual dulness and spiritual stupidity.

Mark 7:19
Making all meats clean ( $\kappa \alpha \theta \alpha \rho \iota \zeta \omega v \tau \alpha \nu \tau \alpha \tau \alpha \beta \rho \omega \mu \alpha \tau \alpha)$. This anacoluthon can be understood by repeating
he says ( $\lambda \varepsilon \gamma \varepsilon$ ) from verse 18 . The masculine participle agrees with Jesus, the speaker. The words do not come from Jesus, but are added by Mark. Peter reports this item to Mark, probably with a vivid recollection of his own experience on the housetop in Joppa when in
the vision Peter declined three times the Lord's invitation to kill and eat unclean animals (Ac 10:14-16). It was a riddle to Peter as late as that day. "Christ asserts that Levitical uncleanness, such as eating with unwashed hands, is of small importance compared with moral uncleanness" (Vincent). The two chief words in both incidents, here and in Acts, are
defile (когош) and
cleanse (каӨapıॅ(). "What God cleansed do not thou treat as defiled" (Ac 10:15 ). It was a revolutionary declaration by Jesus and Peter was slow to understand it even after the coming of the Holy Spirit at Pentecost. Jesus was amply justified in his astonished question:

Perceive ye not? (ou vositc;). They were making little use of their intelligence in trying to comprehend the efforts of Jesus to give them a new and true spiritual insight.

Mark 7:21
Evil thoughts (о $\delta \iota \alpha \lambda о ү \iota \sigma \mu$ о како). These come out of the heart ( $\varepsilon \kappa \tau \eta \varsigma ~ к а \rho \delta ı а \varsigma), ~$ the inner man, and lead to the dreadful list here given like the crimes of a modern police court:
fornications (ropveıa, usually of the unmarried),
adulteries ( $\mu$ ог $\chi$ a $\alpha$, of the married),
thefts ( $\kappa \lambda о \pi \alpha$, stealings),
covetings ( $\pi \lambda \varepsilon o v \varepsilon \xi \not a$, craze for more and more),
murders ( $\varphi 0$ ovo, growing out of the others often),
 like German Knabe, and then criminal),
deceit ( $\delta 0 \lambda 0 \varsigma$, lure or snare with bait),
lasciviousness ( $\alpha \sigma \varepsilon \lambda \gamma \varepsilon \iota \alpha$, unrestrained sex instinct),
evil eye ( $о \varphi \theta \alpha \lambda \mu$ о $\pi о v \eta \rho \circ \varsigma)$ or eye that works evil and that haunts one with its gloating stare,
railing ( $\beta \lambda \alpha \sigma \varphi \eta \mu \iota \alpha$, blasphemy, hurtful speech),
pride (vлعр $\varphi \alpha v i a$, holding oneself above others, stuck up),
foolishness ( $\alpha \varphi \rho \circ \sigma u v \eta$, lack of sense), a fitting close to it all.
Mark 7:24
Into the borders of Tyre and Sidon ( $\varepsilon ı \tau \tau \alpha$ opı $\operatorname{Tv}$ рои ка $\Sigma \iota \delta \omega v o \varsigma)$. The departure from Capernaum was a withdrawal from Galilee, the second of the four withdrawals from Galilee. The first had been to the region of Bethsaida Julias in the territory of Herod Philip. This is into distinctly heathen land. It was not merely the edge of Phoenicia, but into the parts of Tyre and Sidon (Mt 15:21 ). There was too much excitement among the people, too much bitterness among the Pharisees, too much suspicion on the part of Herod Antipas, too much dulness on the part of the disciples for Jesus to remain in Galilee.

And he could not be hid (ка оик $\eta \delta \cup v a \sigma \theta \eta \lambda \alpha \theta \varepsilon ı$ ). Jesus wanted to be alone in the house after all the strain in Galilee. He craved a little privacy and rest. This was his purpose in going into Phoenicia. Note the adversative sense of $\kappa \alpha$ here= "but."

Mark 7:25
Whose little daughter ( $\eta \varsigma$ тo $\theta \cup \gamma a \tau \rho ı v$ av $\tau \varsigma)$. Diminutive with tender touch. Note "whose" and "her" like vernacular today.

Having heard of him ( $\alpha \kappa о \cup \sigma \alpha \sigma \alpha \pi \varepsilon \rho \alpha \cup \tau o v$ ). Even in this heathen territory the fame of Jesus was known. When the Sermon on the Mount was preached people were there from "the sea coast of Tyre and Sidon" (Lu 6:17).

Mark 7:26
A Greek, a Syro-Phoenician by race ( $\mathrm{H} \varepsilon \lambda \lambda \eta \nu \iota \sigma, \Sigma v \rho \circ \varphi о \iota \nu \iota \kappa \iota \sigma \sigma \alpha \tau \omega \gamma \varepsilon v \varepsilon$ ). "A Greek in religion, a Syrian in tongue, a Phoenician in race" (Bruce), from Euthymius Zigabenus. She was not a Phoenician of Carthage.

She besought ( $\eta \rho \omega \tau \alpha$ ). Imperfect tense. She kept at it. This verb, as in late Greek, is here used for a request, not a mere question. Abundant examples in the papyri in this sense.

Mark 7:27
Let the children first be filled ( $\alpha \varphi \varepsilon \varsigma \pi \rho \omega \tau \sigma v \chi о \rho \tau \alpha \sigma \theta \eta v \alpha \tau \alpha \pi \alpha \iota \delta \alpha$ ). The Jews had the first claim. See the command of Jesus in the third tour of Galilee to avoid the Gentiles and the Samaritans (Mt 10:5). Paul was the Apostle to the Gentiles, but he gave the Jew the first opportunity (Ro 2:9f. ). See on Mt 15:24f.

Mark 7:28
Even the dogs under the table ( $\kappa \alpha \tau \alpha \kappa v v a \rho ı \alpha$ v $о к \alpha \tau \omega \tau \eta \varsigma \tau \rho \alpha \pi \varepsilon\lceil\eta \varsigma)$. A delightful picture. Even the little dogs (кuvapıa) under the table
eat of the children's crumbs ( $\varepsilon \sigma \theta \iota o v \sigma \iota v a \pi o ~ \tau \omega \nu \psi \iota \chi \iota \omega \nu \tau \omega v \pi \alpha \iota \delta \iota \omega v$ ). Little dogs, little scraps of bread ( $\psi \iota \chi \circ \vee$, diminutive of $\psi \not \subset \circ \varsigma$, morsel), little children ( $\pi \alpha \iota \delta \iota \alpha$, diminutive of $\pi \alpha ı \varsigma)$. Probably the little children purposely dropped a few little crumbs for the little dogs. These household dogs, pets of and loved by the children. Braid Scots has it: "Yet the wee dowgs aneath the table eat o' the moole o' the bairns." "A unique combination of faith and wit" (Gould). Instead of resenting Christ's words about giving the children's bread to the dogs (Gentiles) in verse 27, she instantly turned it to the advantage of her plea for her little daughter.

Mark 7:29
For this saying ( $\delta \iota \alpha$ tov $\frac{1}{} v$ tov $\lambda o \gamma o v$ ). She had faith, great faith as Mt 15:28 shows, but it was her quick and bright repartee that pleased Jesus. He had missed his rest, but it was worth it to answer a call like this.

Mark 7:30
 children's table. The perfect active participle expresses the state of completion. The demon was gone for good and all.

Mark 7:31
Through the midst of the borders of Decapolis ( $\alpha v \alpha \mu \varepsilon \sigma \circ v \tau \omega v$ ор $\omega v \Delta \varepsilon \kappa \alpha \pi о \lambda \varepsilon \omega \varsigma$ ). Jesus left Phoenicia, but did not go back into Galilee. He rather went east and came down east of the Sea of Galilee into the region of the Greek cities of Decapolis. He thus kept out of the territory of Herod Antipas. He had been in this region when he healed the Gadarene demoniac and was asked to leave.

Mark 7:32
And they bring unto him ( $\kappa \alpha \varphi \varepsilon \rho о v \sigma เ v \alpha v \tau \omega)$. Another of Mark's dramatic presents. This incident only in Mark.

Mark 7:33
Took him aside ( $\alpha \pi 0 \lambda \alpha \beta$ ouvvoc $\alpha v \tau 0 v$ ). The secrecy here observed was partly to avoid excitement and partly to get the attention of the deaf and dumb demoniac. He could not hear what Jesus said. So Jesus put his fingers into his ears, spat, and touched his tongue. There was, of course, no virtue in the spittle and it is not clear why Jesus used it. Saliva was by some regarded as remedial and was used by exorcists in their incantations. Whether this was a concession to the man's denseness one does not know. But it all showed the poor man that Jesus healed him in his own way.

Mark 7:34
Ephphatha ( $\delta \operatorname{Lavol} \chi \theta A ̂ \eta \tau$, be opened). Another one of Mark's Aramaic words preserved and transliterated and then translated into Greek. "Be thou unbarred" (Braid Scots). Jesus sighed ( $\varepsilon \sigma \tau \varepsilon v \alpha \xi \varepsilon v)$ as he looked up into heaven and spoke the word $\varepsilon \varphi \varphi \alpha \theta \alpha$. Somehow he felt a nervous strain in this complex case (deaf, dumb, demoniac) that we may not quite comprehend.

## Mark 7:35

He spake plain ( $\varepsilon \lambda \alpha \lambda \varepsilon \mathrm{o} \rho \theta \omega \varsigma)$. He began to speak correctly. Inchoative imperfect tense.
Mark 7:36
So much the more a great deal they published it (avто $\mu \alpha \lambda \lambda o v \pi \varepsilon \rho เ \sigma \sigma о \tau \varepsilon \rho o v$ єкприббоv). Imperfect tense, continued action. Double comparative as occurs elsewhere
 Grammar, pp. 663f. Human nature is a peculiar thing. The command not to tell provoked these people to tell just as the leper had done (Mr 1:44f.). The more Jesus commanded (orov avtoıs $\delta เ \varepsilon \sigma \tau \varepsilon \lambda \lambda \varepsilon \tau 0)$ them not to tell the more they told. It was a continuous performance. Prohibitions always affect some people that way, especially superficial and light-headed folks. But we have to have prohibitions or anarchy.

[^0]He hath done all things well ( $К \alpha \lambda \omega \varsigma \pi \alpha \nu \tau \alpha \pi \varepsilon \pi о п \eta \kappa \varepsilon v$ ). The present perfect active shows the settled convictions of these people about Jesus. Their great amazement (v $\pi \varepsilon \rho \pi \varepsilon \rho เ \sigma \sigma \omega \varsigma \varepsilon \xi \varepsilon \pi \lambda \eta \sigma \sigma 0 v \tau 0$ ), imperfect passive and compound adverb, thus found expression in a vociferous championship of Jesus in this pagan land.

## Mark 8

Mark 8:1
Had nothing to eat ( $\mu \eta \varepsilon \chi o v \tau \omega \nu \tau \varphi \alpha \gamma \omega \sigma \iota v$ ). Genitive absolute and plural because ox $\lambda$ ov a collective substantive. Not having what to eat (deliberative subjunctive retained in indirect question). The repetition of a nature miracle of feeding four thousand in Decapolis disturbs some modern critics who cannot imagine how Jesus could or would perform another miracle elsewhere so similar to the feeding of the five thousand up near Bethsaida Julias. But both Mark and Matthew give both miracles, distinguish the words for baskets (кочıvoб, $\sigma \varphi \cup \rho ı \varsigma$ ), and both make Jesus later refer to both incidents and use these two words with the same distinction (Mr 8:19f.; Mt 16:9f. ). Surely it is easier to conceive that Jesus wrought two such miracles than to hold that Mark and Matthew have made such a jumble of the whole business.

Mark 8:2
Now three days ( $\eta \delta \eta \eta \mu \varepsilon \rho \alpha \tau \rho \varepsilon \iota \varsigma)$. This text preserves a curious parenthetic nominative of time (Robertson, Grammar, p. 460). See on Mt 15:32 .

Mark 8:3
Are come from far ( $\alpha \pi о \mu \alpha \kappa \rho о \theta \varepsilon v \varepsilon \iota \sigma \iota)$. This item alone in Mark.
Mark 8:4
Here $(\omega \delta \varepsilon)$. Of all places, in this desert region in the mountains. The disciples feel as helpless as when the five thousand were fed. They do not rise to faith in the unlimited power of Jesus after all that they have seen.

Mark 8:6
Brake and gave ( $\varepsilon \kappa \lambda \alpha \sigma \varepsilon v \kappa \alpha \varepsilon \delta \delta \delta o v)$. Constative aorist followed by imperfect. The giving kept on.

To set before them (ıva $\pi \alpha \rho \alpha \tau \iota \theta \omega \sigma \iota v$ ). Present subjunctive describing the continuous process.

Mark 8:7
A few small fishes ( $\iota \nexists \cup v \delta \iota \alpha$ o $\quad \lambda \downarrow \alpha$ ). Mark mentions them last as if they were served after the food, but not so Mt 15:34f .

Mark 8:8
Broken pieces that remained over ( $\pi \varepsilon \rho เ \sigma \sigma \varepsilon v \mu \alpha \tau \alpha \kappa \lambda \alpha \sigma \mu \alpha \tau \omega v$ ). Overplus, abundance, remains of broken pieces not used, not just scraps or crumbs.

Mark 8:10
Into the parts of Dalmanutha ( $\varepsilon เ \varsigma \tau \alpha \mu \varepsilon \rho \eta \Delta \alpha \lambda \mu \alpha v o v \theta \alpha)$. Mt 15:39 calls it "the borders of Magadan." Both names are unknown elsewhere, but apparently the same region of Galilee on the western side of the lake not far from Tiberias. Mark here uses "parts" $(\mu \varepsilon \rho \eta)$ in the same sense as "borders" (opıa) in 7:24 just as Matthew reverses it with "parts" in Mt 15:21
and "borders" here in Mt 15:39. Mark has here "with his disciples" ( $\mu \varepsilon \tau \alpha \tau \omega \nu \mu \alpha \theta \eta \tau \omega \nu$ autov) only implied in Mt 15:39 .

Mark 8:11
And the Pharisees came forth ( $\kappa \alpha \varepsilon \xi \eta \lambda \theta$ ov о Фарıбаıо). At once they met Jesus and opened a controversy. Mt 16:1 adds "and Sadducees," the first time these two parties appear together against Jesus. See discussion on Mt 16:1. The Pharisees and Herodians had already joined hands against Jesus in the sabbath controversy (Mr 3:6 ). They
began to question with him ( $\eta \rho \xi \alpha v \tau 0 ~ \sigma \cup v \zeta \eta \tau \varepsilon เ \nu \alpha \cup \tau \omega$ ). Dispute, not mere inquiry, associative instrumental case of auto. They began at once and kept it up (present infinitive).

Mark 8:12
He sighed deeply in his spirit ( $\alpha v a \sigma \tau \varepsilon v \alpha \xi \alpha \varsigma \tau \omega \pi v \varepsilon v \mu \alpha \tau$ ). The only instance of this compound in the N.T. though in the LXX. The uncompounded form occurs in Mr 7:34 and it is common enough. The preposition $\alpha v \alpha-$ intensifies the meaning of the verb (perfective use). "The sigh seemed to come, as we say, from the bottom of his heart, the Lord's human spirit was stirred to its depths" (Swete). Jesus resented the settled prejudice of the Pharisees (and now Sadducees also) against him and his work.

There shall no sign be given unto this generation ( $\varepsilon \delta 0 \theta \eta \sigma \varepsilon \tau \alpha \tau \eta \gamma \varepsilon v \varepsilon \alpha \tau \alpha v \tau \eta ~ \sigma \eta \mu \varepsilon \iota v)$ ). Mt 16:4 has simply ov $\delta 0 \theta \eta \sigma \varepsilon \tau \alpha$, plain negative with the future passive indicative. Mark has $\varepsilon$ instead of ov, which is technically a conditional clause with the conclusion unexpressed (Robertson, Grammar, p. 1024), really aposiopesis in imitation of the Hebrew use of $\mu$. This is the only instance in the N.T. except in quotations from the LXX (Heb 3:11; 4:3,5). It is very common in the LXX. The rabbis were splitting hairs over the miracles of Jesus as having a possible natural explanation (as some critics do today) even if by the power of Beelzebub, and those not of the sky (from heaven) which would be manifested from God. So they put up this fantastic test to Jesus which he deeply resents. Mt 16:4 adds "but the sign of Jonah" mentioned already by Jesus on a previous occasion (Mt 12:39-41 ) at more length and to be mentioned again (Lu 11:32). But the mention of the sign of Jonah was "an absolute refusal of signs in their sense" (Bruce). And when he did rise from the dead on the third day, the Sanhedrin refused to be convinced (see Acts 3 to 5).

Mark 8:14
Bread (aptovc).
Loaves, plural.
More than one loaf ( $\varepsilon \mu \eta \quad \imath \alpha \alpha \rho \tau o v)$. Except one loaf. Detail only in Mark. Practically for thirteen men when hungry.

Mark 8:15
Take heed, beware of the leaven of the Pharisees, and the leaven of Herod (Норатє, $\beta \lambda \varepsilon \pi \varepsilon \tau \varepsilon \alpha \pi о \tau \eta \varsigma \zeta \nu \mu \eta \varsigma \tau \omega \nu \Phi \alpha \rho \iota \sigma \alpha \iota \omega \nu \kappa \alpha \tau \eta \zeta \zeta \nu \mu \eta \varsigma$ H $\eta \rho \omega \iota \delta o v)$. Present imperatives. Note $\alpha \pi \%$ and the ablative case. $\mathrm{Zv} \mu \eta$ is from $\zeta \nu \mu \circ \omega$ and occurs already in Mt 13:33 in a good
sense. For the bad sense see 1Co 5:6. He repeatedly charged ( $\delta เ \varepsilon \sigma \tau \varepsilon \lambda \lambda \varepsilon \tau о$, imperfect indicative), showing that the warning was needed. The disciples came out of a Pharisaic atmosphere and they had just met it again at Dalmanutha. It was insidious. Note the combination of Herod here with the Pharisees. This is after the agitation of Herod because of the death of the Baptist and the ministry of Jesus (Mr 6:14-29; Mt 14:1-12; Lu 9:7-9 ). Jesus definitely warns the disciples against "the leaven of Herod" (bad politics) and the leaven of the Pharisees and Sadducees (bad theology and also bad politics).

Mark 8:16
They reasoned one with another ( $\delta \iota \varepsilon \lambda о ү \iota \zeta \circ \tau \tau 0 \pi \rho \circ \varsigma \alpha \lambda \lambda \eta \lambda o v \varsigma)$, implying discussion. Imperfect tense, kept it up. Mt 16:7 has $\varepsilon v \varepsilon a v \tau o \iota \varsigma$, in themselves or among themselves.

Mark 8:17
Mark here (vv. 17-20) gives six keen questions of Jesus while Mt 16:8-11 gives as four that really include the six of Mark running some together. The questions reveal the disappointment of Jesus at the intellectual dulness of his pupils. The questions concern the intellect (vocıte, from vouo, $\sigma u v i \varepsilon \tau \varepsilon$, comprehend), the heart in a
hardened state $(\pi \varepsilon \pi \hat{A} \omega \rho \hat{A} \omega \mu \varepsilon \nu \hat{A} \eta \nu$, perfect passive predicate participle as in $\operatorname{Mr}$ 6:52 , which see), the eyes, the ears, the memory of both the feeding of the five thousand and the four thousand here sharply distinguished even to the two kinds of baskets (кочוvovo, $\sigma \varphi v \rho i \delta \omega v)$. The disciples did recall the number of baskets left over in each instance, twelve and seven. Jesus "administers a sharp rebuke for their preoccupation with mere temporalities, as if there were nothing higher to be thought of than bread" (Bruce). "For the time the Twelve are way-side hearers, with hearts like a beaten path, into which the higher truths cannot sink so as to germinate" (Bruce).

Mark 8:18
See on 17.
Mark 8:19
See on 17.
Mark 8:20
See on 17.
Mark 8:21
Do ye not yet understand? (ov $\pi \omega \sigma \cup v \iota \varepsilon \tau \varepsilon ;$ ). After all this rebuke and explanation. The greatest of all teachers had the greatest of all classes, but he struck a snag here. Mt 16:12 gives the result: "Then they understood how that he bade them not beware of the loaves of bread, but of the teaching of the Pharisees and Sadducees." They had once said that they understood the parables of Jesus ( $\mathrm{Mt} 13: 51$ ). But that was a long time ago. The teacher must have patience if his pupils are to understand.

Mark 8:22

Unto Bethsaida ( $\varepsilon \iota \varsigma, B \eta \sigma \alpha \iota \delta \alpha v$ ). On the Eastern side not far from the place of the feeding of the five thousand, Bethsaida Julias. Note dramatic presents
they come ( $\varepsilon \rho \chi \circ \vee \tau \alpha$ ),
they bring ( $\varphi \varepsilon \rho \circ \cup \sigma \iota v)$. This incident in Mark alone (verses 22-26).
Mark 8:23
Brought him out of the village ( $\varepsilon \xi \eta \nu \varepsilon \gamma \kappa \varepsilon \nu \alpha \nu \tau 0 v \varepsilon \xi \omega \tau \eta \zeta \kappa \omega \mu \eta \varsigma)$. It had been a village, but Philip had enlarged it and made it a town or city ( $\pi \mathrm{o} \lambda_{\iota \varsigma}$ ), though still called a village (verses 23,26). As in the case of the deaf and dumb demoniac given also alone by Mark (Mr 7:31-37 ), so here Jesus observes the utmost secrecy in performing the miracle for reasons not given by Mark. It was the season of retirement and Jesus is making the fourth withdrawal from Galilee. That fact may explain it. The various touches here are of interest also. Jesus led him out by the hand, put spittle on his eyes (using the poetical and Koine papyri word o $\mu \mu \alpha \tau \alpha$ instead of the usual $о \pi \theta \alpha \lambda \mu о \nu \varsigma)$, and laid his hands upon him, perhaps all this to help the man's faith.

Mark 8:24
I see men, for I behold them as trees walking ( $\mathrm{B} \lambda \varepsilon \pi \omega \tau \tau \varsigma \alpha \nu \theta \rho \omega \pi \sigma \cup$ о $\tau \omega \varsigma \delta \varepsilon \nu \delta \rho a$ op $\omega \pi \varepsilon \rho \iota \pi \alpha \tau 0 \cup v \tau \alpha \varsigma)$. A vivid description of dawning sight. His vision was incomplete though he could tell that they were men because they were walking. This is the single case of a gradual cure in the healings wrought by Jesus. The reason for this method in this case is not given.

Mark 8:25
He looked steadfastly ( $\delta \iota \varepsilon \beta \lambda \varepsilon \psi \varepsilon \nu)$. He saw thoroughly now, effective aorist ( $\delta \varepsilon \varepsilon \beta \lambda \varepsilon \psi \varepsilon \nu$ ), he was completely restored ( $\alpha \pi \varepsilon \kappa \alpha \tau \varepsilon \sigma \tau \eta$, second aorist, double compound and double augment), and kept on seeing ( $\varepsilon v \varepsilon \beta \lambda \varepsilon \pi \varepsilon v$, imperfect, continued action) all things clearly or at a distance $(\tau \eta \lambda \alpha v \gamma \omega \varsigma$, common Greek word from $\tau \eta \lambda \varepsilon$, afar, and $\alpha v \gamma \eta$, radiance, farshining). Some manuscripts (margin in Westcott and Hort) read $\delta \eta \lambda \alpha v \gamma \omega \varsigma$, from $\delta \eta \lambda o \varsigma$, plain, and $\alpha v \gamma \eta$, radiance.

Mark 8:26
To his home (عıৎ o九кov avtov). A joyful homecoming that. He was not allowed to enter the village and create excitement before Jesus moved on to Caesarea Philippi.

Mark 8:27
Into the villages of Caesarea Philippi ( $\varepsilon \iota \varsigma \tau \propto \varsigma \omega \mu \propto \varsigma$ Kaı $\sigma \alpha \rho \iota \alpha \varsigma \tau \eta \varsigma \Phi_{\iota} \lambda \iota \pi \pi \sigma v$ ). Parts ( $\mu \varepsilon \rho \eta$ ) Mt 16:13 has, the Caesarea of Philippi in contrast to the one down on the Mediterranean Sea. Mark means the villages belonging to the district around Caesarea Philippi. This region is on a spur of Mount Hermon in Iturea ruled by Herod Philip so that Jesus is safe from annoyance by Herod Antipas or the Pharisees and Sadducees. Up here on this mountain slope Jesus will have his best opportunity to give the disciples special teaching
concerning the crucifixion just a little over six months ahead. So Jesus asked ( $\varepsilon \pi \eta \rho \omega \tau \alpha$, descriptive imperfect)

Who do men say that I am? (Tiva $\mu \varepsilon \lambda \varepsilon \gamma o v \sigma ı v$ o $\alpha \nu \theta \rho \omega \pi \sigma \varepsilon ı \nu \alpha ;$ ). Mt 16:13 has "the Son of Man" in place of "I" here in Mark and in Lu 9:18. He often described himself as "the Son of Man." Certainly here the phrase could not mean merely "a man." They knew the various popular opinions about Jesus of which Herod Antipas had heard (Mr 3:21,31). It was time that the disciples reveal how much they had been influenced by their environment as well as by the direct instruction of Jesus.

Mark 8:28
And they told him (o $\delta \varepsilon \varepsilon \iota \pi \alpha v$ ). They knew only too well. See on Mt 16:14,28 for discussion.

Mark 8:29
Thou art the Christ ( $\Sigma v \varepsilon$ o X $\rho \iota \sigma \tau \circ \varsigma)$. Mark does not give "the Son of the living God" (Mt 16:16) or "of God" (Lu 9:20). The full confession is the form in Matthew. Luke's language means practically the same, while Mark's is the briefest. But the form in Mark really means the full idea. Mark omits all praise of Peter, probably because Peter had done so in his story of the incident. For criticism of the view that Matthew's narrative is due to ecclesiastical development and effort to justify ecclesiastical prerogatives, see discussion on Mt 16:16,18 . The disciples had confessed him as Messiah before. Thus Joh 1:41; 4:29; 6:69; Mt 14:33 . But Jesus had ceased to use the word Messiah to avoid political complications and a revolutionary movement (Joh 6:14f. ). But did the disciples still believe in Jesus as Messiah after all the defections and oppositions seen by them? It was a serious test to which Jesus now put them.

Mark 8:30
Of him ( $\pi \varepsilon \rho \alpha \cup \tau o v$ ). As being the Messiah, that he was the Christ (Mt 16:20). Not yet, for the time was not yet ripe. When that comes, the triumphal entry into Jerusalem, the very stones will cry out, if men will not (Lu 19:40).

Mark 8:31
He began to teach them ( $\eta \rho \xi \alpha \tau о \delta \iota \delta \alpha \sigma \kappa \varepsilon เ \nu \alpha \cup \tau о \cup \varsigma)$. Mark is fond of this idiom, but it is not a mere rhetorical device. Mt 16:21 expressly says "from that time." They had to be told soon about the approaching death of Jesus. The confession of faith in Jesus indicated that it was a good time to begin. Death at the hands of the Sanhedrin (elders, chief priests, and scribes) in which Pharisees and Sadducees had about equal strength. The resurrection on the third day is mentioned, but it made no impression on their minds. This rainbow on the cloud was not seen.

After three days ( $\mu \varepsilon \tau \alpha \tau \rho \varepsilon \iota \varsigma \eta \mu \varepsilon \rho \alpha \varsigma)$. Mt 16:21 has "the third day" ( $\tau \eta \tau \rho \iota \tau \eta \mu \varepsilon \rho \alpha)$ in the locative case of point of time (so also $\mathrm{Lu} 9: 22$ ). There are some people who stickle for a strict interpretation of "after three days" which would be "on the fourth day," not "on the
third day." Evidently Mark's phrase here has the same sense as that in Matthew and Luke else they are hopelessly contradictory. In popular language "after three days" can and often does mean "on the third day," but the fourth day is impossible.

Mark 8:32
Spake the saying openly ( $\pi \alpha \rho \rho \eta \sigma \iota \alpha$ тov $\lambda o \gamma o v \varepsilon \lambda \alpha \lambda \varepsilon$ ). He held back nothing, told it all ( $\pi \alpha v$, all, $\rho \eta \sigma \iota \alpha$, from $\varepsilon \iota \pi o v$, say), without reserve, to all of them. Imperfect tense $\varepsilon \lambda \alpha \lambda \varepsilon$ shows that Jesus did it repeatedly. Mark alone gives this item. Mark does not give the great eulogy of Peter in Mt 16:17,19 after his confession (Mr 8:29; Mt 16:16; Lu 9:20), but he does tell the stinging rebuke given Peter by Jesus on this occasion. See discussion on Mt 16:21,26

Mark 8:33
He turning about and seeing his disciples ( $\varepsilon \pi \iota \sigma \tau \rho \alpha \varphi \varepsilon \iota \varsigma \kappa \alpha \iota \omega \nu \tau \tau \cup \varsigma \mu \alpha \theta \eta \tau \alpha \varsigma \alpha \cup \tau о v)$. Peter had called Jesus off to himself ( $\pi \rho о \sigma \kappa \alpha \lambda \varepsilon \sigma \alpha \mu \varepsilon v o \varsigma)$, but Jesus quickly wheeled round on Peter ( $\varepsilon \pi \iota \sigma \tau \rho \alpha \varphi \varepsilon \iota \varsigma$, only $\sigma \tau \rho \alpha \varphi \varepsilon \iota \varsigma$ in Matthew). In doing that the other disciples were in plain view also (this touch only in Mark). Hence Jesus rebukes Peter in the full presence of the whole group. Peter no doubt felt that it was his duty as a leader of the Twelve to remonstrate with the Master for this pessimistic utterance (Swete). It is even possible that the others shared Peter's views and were watching the effect of his daring rebuke of Jesus. It was more than mere officiousness on the part of Peter. He had not risen above the level of ordinary men and deserves the name of Satan whose role he was now acting. It was withering, but it was needed. The temptation of the devil on the mountain was here offered by Peter. It was Satan over again. See on Mt 16:23.

## Mark 8:34

And he called unto him the multitude with his disciples ( $\kappa \alpha \pi \rho о \sigma к а \lambda \varepsilon \sigma \alpha \mu \varepsilon v о \varsigma ~ \tau о v ~$
 here near Caesarea Philippi in heathen territory. In the presence of this crowd Jesus explains his philosophy of life and death which is in direct contrast with that offered by Peter and evidently shared by the disciples and the people. So Jesus gives this profound view of life and death to them all.

Deny himself ( $\alpha \pi \alpha \rho v \eta \sigma \alpha \sigma \theta \omega$ عavtov). Say no to himself, a difficult thing to do. Note reflexive along with the middle voice. Ingressive first aorist imperative. See on Mt 16:24 about taking up the Cross. The shadow of Christ's Cross was already on him (Mr 8:31) and one faces everyone.

Mark 8:35
And the gospel's sake ( $\kappa \alpha$ tov $\varepsilon v \alpha \gamma \gamma^{\varepsilon} \lambda_{\iota}$ оv). In Mark alone. See on Mt 16:25f. for this paradox. Two senses of "life" and "save." For the last "save" ( $\sigma \omega \sigma \varepsilon$ ) Mt 16:25 has "find" ( $\varepsilon \cup \rho \eta \sigma \varepsilon)$. See on Mt 16:26 for "gain," "profit," and "exchange."

Mark 8:38

For whosoever shall be ashamed of me and my words (os $\gamma \alpha \rho \varepsilon \alpha v \varepsilon \pi \alpha เ \sigma \chi \cup v \theta \eta \mu \varepsilon \kappa \alpha$ tous $\varepsilon \mu$ оия $\lambda$ оүоия). More exactly,
whosoever is ashamed (first aorist passive subjunctive with indefinite relative and $\varepsilon \alpha v$ $=\alpha v$. See Robertson, Grammar, pp. 957-9. It is not a statement about the future conduct of one, but about his present attitude toward Jesus. The conduct of men toward Christ now determines Christ's conduct then ( $\varepsilon \pi \alpha ı \sigma \chi \cup v \theta \eta \sigma \varepsilon \tau \alpha$, first future passive indicative). This passive verb is transitive and uses the accusative ( $\mu \varepsilon$, av $\tau \sigma v$ ).

In this adulterous and sinful generation ( $\varepsilon \nu \tau \eta \gamma \varepsilon v \varepsilon \alpha \tau \alpha v \tau \eta \tau \eta \mu \circ \not \chi \alpha \lambda เ \delta \kappa \alpha \alpha \mu \alpha \rho \tau \omega \lambda \omega)$. Only in Mark.

When he cometh (o $o \tau \alpha v \varepsilon \lambda \theta \eta$ ). Aorist active subjunctive with reference to the future second coming of Christ with the glory of the Father with his holy angels (cf. Mt 16:27). This is a clear prediction of the final eschatological coming of Christ. This verse could not be separated from Mr 9:1 as the chapter division does. These two verses in Mr 8:38; 9:1 form one paragraph and should go together.

## Mark 9

Mark 9:1
Till they see the kingdom of God come with power ( $\varepsilon \omega \varsigma \alpha \nu \iota \delta \omega \sigma \iota \nu \tau \eta \nu \beta \alpha \sigma \iota \lambda \varepsilon \iota \alpha \nu \tau 0 v$ $\theta \varepsilon o v \varepsilon \lambda \eta \lambda v \theta v \iota a v \varepsilon v \delta v v a \mu \varepsilon)$. In 8:38 Jesus clearly is speaking of the second coming. To what is he referring in 9:1? One is reminded of $\mathrm{Mr} 13: 32$; Mt 24:36 where Jesus expressly denies that anyone save the Father himself (not even the Son) knows the day or the hour. Does he contradict that here? It may be observed that Luke has only "see the kingdom of God," while Matthew has "see the Son of man coming" ( $\varepsilon \rho \chi \circ \mu \varepsilon v o v$, present participle, a process). Mark has "see the kingdom of God come" ( $\varepsilon \lambda \eta \lambda v \theta v ı a \nu$, perfect active participle, already come) and adds "with power." Certainly the second coming did not take place while some of those standing there still lived. Did Jesus mean that? The very next incident in the Synoptic Gospels is the Transfiguration on Mount Hermon. Does not Jesus have that in mind here? The language will apply also to the coming of the Holy Spirit on the great Day of Pentecost. Some see in it a reference to the destruction of the temple. It is at least open to question whether the Master is speaking of the same event in Mr 8:38; 9:1.

Mark 9:2
By themselves ( $\mu \mathrm{ovov} \mathrm{\varsigma)}. \mathrm{Alone} .\mathrm{This} \mathrm{word} \mathrm{only} \mathrm{in} \mathrm{Mark} .\mathrm{See} \mathrm{on} \mathrm{Mt} \mathrm{17:1-8} \mathrm{for} \mathrm{discussion}$ of the Transfiguration. Lu 9:28 adds "to pray" as the motive of Jesus in taking Peter, James, and John into the high mountain.

Mark 9:3
Glistering, exceeding white ( $\left.\sigma \tau \iota \lambda \beta o v \tau \alpha \lambda \varepsilon v \kappa \alpha \lambda_{\iota} \alpha v\right)$. Old words, all of them. Mt 17:2 has
white as the light ( $\lambda \varepsilon v \kappa \alpha \omega \varsigma$ то $\varphi \omega \varsigma)$, Lu 9:29 "white and dazzling" ( $\lambda \varepsilon \cup \kappa \circ \varsigma$ $\varepsilon \xi \alpha \sigma \tau \rho \alpha \pi \tau \omega v)$ like lightning.

So as no fuller on earth can whiten them (oı $\alpha \vee \alpha \varphi \varepsilon v \varsigma \varepsilon \pi \tau \eta \varsigma \gamma \eta \varsigma$ ov $\delta v v \alpha \tau \alpha$ ou $\tau \omega \varsigma$ $\lambda \varepsilon v \kappa a v a) . \Gamma v \alpha \varphi \omega$ is an old word to card wool. Note ovt $\omega \varsigma$, so, so white. Some manuscripts in Matthew add $\omega \varsigma \chi \iota \omega \nu$, as snow. Probably the snow-capped summit of Hermon was visible on this very night. See on Mt 17:2 for "transfigured."

Mark 9:4
Elijah with Moses (E $\lambda \varepsilon \iota a \varsigma ~ \sigma v v ~ M \omega v \sigma \varepsilon)$. Matthew and Luke have "Moses and Elijah." Both, as a matter of fact were prophets and both dealt with law. Both had mysterious deaths. The other order in Mr 9:5.

Mark 9:6
For he wist not what to answer (ov $\gamma \alpha \rho \eta \iota \delta \varepsilon \tau \alpha \pi o \kappa \rho \iota \theta \eta$ ). Deliberative subjunctive retained in indirect question. But why did Peter say anything? Luke says that he spoke, "not knowing what he said," as an excuse for the inappropriateness of his remarks. Perhaps Peter felt embarrassed at having been asleep (Lu 9:32) and the feast of tabernacles or booths
( $\sigma \kappa \eta \vee \alpha$ ) was near. See on Mt 17:4. Peter and the others apparently had not heard the talk of Moses and Elijah with Jesus about his decease ( $\varepsilon \xi_{0} \delta o v$, exodus, departure) and little knew the special comfort that Jesus had found in this understanding of the great approaching tragedy concerning which Peter had shown absolute stupidity (Mr 8:32f. ) so recently. See on Mt 17:5 about the overshadowing and the voice.

Mark 9:8
Suddenly looking round about ( $\varepsilon \xi \alpha \pi \iota v \alpha \pi \varepsilon \rho ı \beta \lambda \varepsilon \psi \alpha \mu \varepsilon v o)$. Mt 17:8 has it "lifting up their eyes." Mark is more graphic. The sudden glance around on the mountain side when the cloud with Moses and Elijah was gone.

Jesus only with themselves ( $\mu \varepsilon \theta^{\prime} \varepsilon \alpha v \tau \omega \nu \varepsilon \mu \eta$ I $\eta \sigma o v \nu \mu o v o v$ ). Mark shows their surprise at the situation. They were sore afraid (Mt 17:6) before Jesus touched them.

Mark 9:9
Save when $(\varepsilon \mu \eta$ o $\tau \alpha v)$. Matthew has "until" ( $\varepsilon \omega \varsigma \circ\rangle)$.
Should have risen ( $\alpha v \alpha \sigma \tau \eta$ ). Second aorist active subjunctive. More exactly, "should rise" (punctiliar aorist and futuristic, not with any idea of perfect tense). Lu 9:36 merely says that they told no man any of these things. It was a high and holy secret experience that the chosen three had had for their future good and for the good of all.

Mark 9:10
They kept the saying ( $\tau 0 v \lambda о \gamma o v \varepsilon \kappa \rho \alpha \tau \eta \sigma \alpha v$ ) to themselves as Jesus had directed, but questioning among themselves ( $\pi \rho \circ \varsigma \varepsilon \alpha v \tau o v \varsigma \sigma \cup \nu \zeta \eta \tau 0 \cup v \tau \varepsilon \varsigma)$. Now they notice his allusion to rising from the dead which had escaped them before ( $\mathrm{Mr} \mathrm{8:31}$ ).

Mark 9:12
Restoreth all things ( $\alpha \pi о \kappa \alpha \tau \iota \sigma \tau \alpha v \varepsilon \pi \alpha \nu \tau \alpha$ ). This late double compound verb, usual form $\alpha \pi о \kappa \alpha \theta ı \sigma \tau \eta \mu$ in the papyri, is Christ's description of the Baptist as the promised Elijah and Forerunner of the Messiah. See on Mt 17:10-13. The disciples had not till now understood that the Baptist fulfilled the prophecy in Mal 3:5f. They had just seen Elijah on the mountain, but Jesus as Messiah preceded this coming of Elijah. But Jesus patiently enlightens his dull pupils as they argue about the exegesis of the scribes.

Mark 9:14
 alone gives this item. He is much fuller on this incident (9:14-29) than either Matthew (Mt 17:14-20 ) or Luke (Lu 9:37-43 ). It was just like the professional scribes to take keen interest in the failure of the nine disciples to cure this poor boy. They gleefully nagged and quizzed them. Jesus and the three find them at it when they arrive in the plain.

Mark 9:15
Were greatly amazed $(\varepsilon \xi \varepsilon \theta \alpha \mu \beta \eta \theta \eta \sigma \alpha v)$. First aorist passive ingressive aorist with perfective compound $\varepsilon \xi$-. The sudden and opportune appearance of Jesus in the midst of the dispute when no one was looking for him turned all eyes to him. He would not fail, however
the disciples might do so. The people were awed for the moment and then running began to welcome him ( $\pi \rho о \tau \rho \varepsilon \chi о \nu \tau \varepsilon \varsigma \eta \sigma \pi \alpha \zeta о \nu \tau 0)$. Present participle and imperfect middle indicative.

Mark 9:16
What question ye with them? (T $\sigma \cup v\lceil\eta \tau \varepsilon \iota \tau \varepsilon \pi \rho o \varsigma ~ a v \tau o v \sigma ;$ ). Jesus had noticed the embarrassment of the nine and at once takes hold of the situation.

Mark 9:17
I brought unto thee my son ( $\eta v \varepsilon \gamma \kappa \alpha$ тov viov $\mu \circ v \pi \rho \circ \varsigma \sigma \varepsilon$ ). The father stepped out and gave the explanation of the excited dispute in direct and simple pathos.

Mark 9:18
Wheresoever it taketh him (отоv вav autоv кат $\alpha \lambda \alpha \beta \eta$ ). Seizes him down. Our word catalepsy is this same word. The word is used by Galen and Hippocrates for fits. The word is very common in the papyri in various senses as in the older Greek. Each of the verbs here in Mark is a graphic picture.

Dashes down ( $\rho \eta \sigma \sigma \varepsilon$ ). Also $\rho \eta \gamma v v \mu \mathrm{t}, \mu$ form. Convulses, rends, tears asunder. Old and common word.

Foameth $(\alpha \varphi \rho!(\varepsilon)$. Here only in the N.T. Poetic and late word.
Grindeth $(\tau \rho!(\varepsilon)$. Another hapax legomenon in the N.T. Old word for making a shrill cry or squeak.

Pineth away ( $\xi \eta \rho \alpha \iota v \varepsilon \tau \alpha$ ). Old word for drying or withering as of grass in Jas 1:11.
 handle this case. See Mt 17:16; Lu 9:40 ( $\kappa \alpha$ ouk $\eta \delta u v \eta \theta \eta \sigma \alpha v$, first aorist passive). It was a tragedy.

Mark 9:19
Bring him unto me ( $\varphi \varepsilon \rho \varepsilon \tau \varepsilon$ avtov $\pi \rho \circ \varsigma \mu \varepsilon$ ). The disciples had failed and their unbelief had led to this fiasco. Even the disciples were like and part of the
faithless (ađıбтoৎ, unbelieving) generation in which they lived. The word
faithless does not here mean treacherous as it does with us. But Jesus is not afraid to undertake this case. We can always come to Jesus when others fail us.

Mark 9:20
Tare him grievously ( $\sigma u v \varepsilon \sigma \pi \alpha \rho \alpha \xi \varepsilon v \alpha u \tau o v) . ~ L u ~ 9: 42 ~ h a s ~ b o t h ~ \varepsilon \rho \rho \eta \xi \varepsilon v ~(d a s h e d ~ d o w n, ~$ like $\mathrm{Mr} 9: 18, \rho \eta \sigma \sigma \varepsilon$ ) and $\sigma u v \varepsilon \sigma \pi \alpha \rho \alpha \xi \varepsilon v$ (convulsed). This compound with $\sigma u v$ - (together with), strengthens the force of the verb as in $\sigma v v \pi v \imath \gamma \omega$ (Mr 4:7) and $\sigma \cup v \tau \eta \rho \varepsilon \omega$ ( 6:20). The only other instance of this compound verb known is in Maximus Tyrius (second century B.C.).

Wallowed (عки入ıєто). Imperfect passive, was rolled. A pitiful sight. Late form of the old $\kappa \nu \lambda \iota \nu \delta \omega$.

Mark 9:22

But if thou canst ( $\alpha \lambda \lambda$ ' $\varepsilon \tau \delta u v \eta$ ). Jesus had asked (verse 21) the history of the case like a modern physician. The father gave it and added further pathetic details about the fire and the water. The failure of the disciples had not wholly destroyed his faith in the power of Jesus, though the conditional form (first class, assuming it to be true) does suggest doubt whether the boy can be cured at all. It was a chronic and desperate case of epilepsy with the demon possession added.

Help us ( $\beta$ os $\theta \eta \sigma o v \varepsilon \mu \nu v$ ). Ingressive aorist imperative. Do it now. With touching tenderness he makes the boy's case his own as the Syrophoenician woman had said, "Have mercy on me" (Mt 15:21 ). The leper had said: "If thou wilt" (Mr 1:40). This father says: "If thou canst."

Mark 9:23
If thou canst ( $\tau 0 \varepsilon \delta u v \eta$ ). The Greek has a neat idiom not preserved in the English translation. The article takes up the very words of the man and puts the clause in the accusative case of general reference. "As to the 'if thou canst,' all things can ( $\delta v v a \tau \alpha)$ to the one who believes." The word for "possible" is $\delta u v a \tau \alpha$, the same root as $\delta u v \eta$ (canst). This quick turn challenges the father's faith. On this use of the Greek article see Robertson, Grammar, p. 766.

Mark 9:24
Cried out (кра $\xi \propto \varsigma)$. Loud outcry and at once ( $\varepsilon v \theta \iota \varsigma)$. The later manuscripts have "with tears" ( $\mu \varepsilon \tau \alpha \delta \alpha \kappa \rho v \omega v$ ), not in the older documents.

I believe; help my unbelief ( $\Pi \iota \tau \tau v \omega: ~ \beta \circ \eta \theta \varepsilon \tau \eta \alpha \pi \iota \sigma \tau \iota \alpha)$. An exact description of his mental and spiritual state. He still had faith, but craved more. Note present imperative here (continuous help) $\beta \circ \eta \theta \varepsilon$, while aorist imperative (instant help) $\beta$ o $\eta \theta \eta \sigma o v$, verse 22 . The word comes from $\beta$ oŋ, a cry and $\theta \varepsilon \omega$, to run, to run at a cry for help, a vivid picture of this father's plight.

Mark 9:25
A multitude came running together ( $\varepsilon \pi \iota \sigma \cup v \tau \rho \varepsilon \chi \varepsilon$ o $\chi \lambda \circ \varsigma$ ). A double compound here alone in the N.T. and not in the old Greek writers. Eлıт $\rho \chi \chi \omega$ occurs in the papyri, but not $\varepsilon \pi \iota \sigma \cup v \tau \rho \varepsilon \chi \omega$. The double compound vividly describes the rapid gathering of the crowd to Jesus and the epileptic boy to see the outcome.

Come out of him ( $\varepsilon \xi \varepsilon \lambda \theta \varepsilon \varepsilon \xi$ avtov). Jesus addresses the demon as a separate being from the boy as he often does. This makes it difficult to believe that Jesus was merely indulging popular belief in a superstition. He evidently regards the demon as the cause in this case of the boy's misfortune.

Mark 9:26
Having torn much ( $\sigma \pi \alpha \rho \alpha \xi \alpha \varsigma)$. The uncompounded verb used in verse 20.
Became as one dead ( $\left.\varepsilon \gamma \varepsilon v \varepsilon \tau \frac{\omega \sigma \varepsilon}{} v \varepsilon \kappa \rho \circ \varsigma\right)$. As if dead from the violence of the spasm. The demon did him all possible harm in leaving him.

Mark 9:28
Privately, saying ( $\kappa \alpha \tau^{\prime} \iota \delta \iota \alpha \nu \quad o \tau$ ). Indoors the nine disciples seek an explanation for their colossal failure. They had cast out demons and wrought cures before. The Revisers are here puzzled over Mark's use of ot as an interrogative particle meaning
why where Mt 17:19 has $\delta \iota \alpha \tau$. Some of the manuscripts have $\delta \iota \alpha \tau$ here in Mr 9:28 as all do in Mt 17:19. See also Mr 2:16 and 9:11. It is probable that in these examples ot really means
why. See Robertson, Grammar, p. 730. The use of os as interrogative "is by no means rare in the late Greek" (Deissmann, Light from the Ancient East, p. 126).

Mark 9:29
Save by prayer ( $\varepsilon \mu \eta \varepsilon v \pi \rho o \sigma \varepsilon v \chi \eta$ ). The addition of "and of fasting" does not appear in the two best Greek manuscripts (Aleph and B). It is clearly a late addition to help explain the failure. But it is needless and also untrue. Prayer is what the nine had failed to use. They were powerless because they were prayerless. Their self-complacency spelled defeat. Mt 17:20 has "because of your little faith" (o $\lambda \iota \gamma o \pi \iota \sigma \tau \iota \alpha \nu$ ). That is true also. They had too much faith in themselves, too little in Christ. "They had trusted to the semi-magical power with which they thought themselves invested" (Swete). "Spirits of such malignity were quick to discern the lack of moral power and would yield to no other" (ibid.).

Mark 9:30
He would not that any man should know it (ovк $\eta \theta \varepsilon \lambda \varepsilon \nu \iota v \alpha \tau ı \varsigma \gamma \nu 0$ ). Imperfect tense followed by ingressive aorist subjunctive ( $\gamma \nu 0=\gamma \nu \omega$, the usual form). He was not willing that any one should learn it. Back in Galilee Jesus was, but he was avoiding public work there now (cf. 7:24). He was no longer the hero of Galilee. He had left Caesarea Philippi for Galilee.

## Mark 9:31

For he taught ( $\varepsilon \delta_{t} \delta \alpha \sigma \kappa \varepsilon v \gamma \alpha \rho$ ). Imperfect tense, and the reason given for secrecy. He was renewing again definitely the prediction of his death in Jerusalem some six months ahead as he had done before ( Mr 8:31; Mt 16:21; Lu 9:22). Now as then Jesus foretells his resurrection "after three days" ("the third day," Mt 17:23 ).

Mark 9:32
But they understood not the saying (o $\delta \varepsilon \eta \gamma$ voouv to $\rho \eta \mu \alpha$ ). An old word. Chiefly in Paul's Epistles in the N.T. Imperfect tense. They continued not to understand. They were agnostics on the subject of the death and resurrection even after the Transfiguration experience. As they came down from the mountain they were puzzled again over the Master's allusion to his resurrection (Mr 9:10). Mt 17:23 notes that "they were exceeding sorry" to hear Jesus talk this way again, but Mark adds that they "were afraid to ask him" ( $\varepsilon \varphi \rho \beta$ $\alpha v \tau o v \varepsilon \pi \varepsilon \rho \omega \tau \eta \sigma \alpha)$. Continued to be afraid (imperfect tense), perhaps with a bitter memory of the term "Satan" hurled at Peter when he protested the other time when Jesus spoke of
his death (Mr 8:33; Mt 16:23). Lu 9:45 explains that "it was concealed from them," probably partly by their own preconceived ideas and prejudices.

Mark 9:33
In the house ( $\varepsilon v \tau \eta$ оккıa). Probably Peter's house in Capernaum which was the home of Jesus when in the city.

What were ye reasoning in the way? ( $\mathrm{T} \varepsilon \nu \tau \eta$ o $\delta \omega \delta \iota \varepsilon \lambda o \gamma \iota \sigma \zeta \varepsilon \theta \varepsilon ;$ ). Imperfect tense. They had been disputing (verse 34), not about the coming death of the Master, but about the relative rank of each of them in the political kingdom which they were expecting him to establish. Jesus had suspected the truth about them and they had apparently kept it up in the house. See on Mt 18:1 where the disciples are represented as bringing the dispute to Jesus while here Jesus asks them about it. Probably they asked Jesus first and then he pushed the matter further and deeper to see if this had not been the occasion of the somewhat heated discussion on the way in.

Mark 9:34
But they held their peace (Ho $\delta \varepsilon \varepsilon \sigma \omega \omega \pi \omega v$ ). Imperfect tense. Put thus to them, they felt ashamed that the Master had discovered their jealous rivalry. It was not a mere abstract query, as they put it to Jesus, but it was a canker in their hearts.

Mark 9:35
He sat down and called the twelve ( $\kappa \alpha \theta \iota \sigma \alpha \varsigma \varepsilon \varphi \omega v \eta \sigma \varepsilon v \tau$ тou $\delta \omega \delta \varepsilon \kappa \alpha$ ). Deliberate action of Jesus to handle this delicate situation. Jesus gives them the rule of greatness: "If any man
 saying of Christ, like many others, he repeated at other times (Mr 10:43f.; Mt 23:8ff.; Lu 22:24f. ). Mt 18:2 says that he called a little child, one there in the house, perhaps Peter's child. Lu 9:47 notes that he "set him by his side." Then Jesus
taking him in his arms ( $\varepsilon v \alpha \nless \kappa \lambda \iota \sigma \alpha \mu \varepsilon v o \varsigma$, aorist middle participle, late Greek word from $\alpha \gamma \kappa \alpha \lambda \eta$ as in Lu 2:28) spoke again to the disciples.

Mark 9:37
One of such little children ( $\varepsilon v \tau \omega v \tau o o v \tau \omega v \pi \alpha \iota \delta \omega v$ ). Mt 18:5 has "one such little child" and Lu 9:48 "this little child." It was an object lesson to the arrogant conceit of the twelve apostles contending for primacy. They did not learn this lesson for they will again wrangle over primacy (Mr 10:33-45; Mt 20:20-28) and they will be unable to comprehend easily what the attitude of Jesus was toward children (Mr 10:13-16; Mt 19:13-15; Lu 8:15-17 ). The child was used as a rebuke to the apostles.

## Mark 9:38

Because he followed not us (от ouк $\eta \kappa о \lambda o u \theta \varepsilon \eta \mu \nu \nu$ ). Note vivid imperfect tense again. John evidently thought to change the subject from the constraint and embarrassment caused by their dispute. So he told about a case of extra zeal on his part expecting praise from Jesus. Perhaps what Jesus had just said in verse 37 raised a doubt in John's mind as to the propriety
of his excessive narrowness. One needs to know the difference between loyalty to Jesus and stickling over one's own narrow prejudices.

Mark 9:39
Forbid him not ( $\mu \eta \kappa \omega \lambda v \varepsilon \tau \varepsilon$ ). Stop hindering him ( $\mu \eta$ and the present-imperative) as John had been doing.

Mark 9:40
He that is not against us is with us (oৎ ovк $\varepsilon \sigma \tau \iota v \kappa \alpha \theta^{\prime} \eta \mu \omega \nu v \pi \varepsilon \rho \eta \mu \omega \nu \varepsilon \sigma \tau \iota v$ ). This profound saying throws a flood of light in every direction. The complement of this logion is that in Mt 12:30 : "He that is not with me is against me." Both are needed. Some people imagine that they are really for Christ who refuse to take a stand in the open with him and for him.

Mark 9:41
Because ye are Christ's (o X X $\quad \sigma \tau \sigma v \varepsilon \sigma \tau \varepsilon$ ). Predicate genitive, belong to Christ. See Ro 8:9; 1Co 1:12; 2Co 10:7. That is the bond of universal brotherhood of the redeemed. It breaks over the lines of nation, race, class, sex, everything. No service is too small, even a cup of cold water, if done for Christ's sake. See on Mt 18:6f. for discussion on stumblingblocks for these little ones that believe on Jesus (Mr 9:42) , a loving term of all believers, not just children.

Mark 9:43
Into hell, into the unquenchable fire ( $\varepsilon \iota \varsigma \tau \eta \nu \gamma \varepsilon \varepsilon v \nu \alpha \nu, \varepsilon \iota \varsigma ~ \tau о \pi \nu \rho \tau о \alpha \sigma \beta \varepsilon \sigma \tau \sigma v$ ). Not Hades, but Gehenna. $A \sigma \beta \varepsilon \sigma \tau \sigma v$ is alpha privative and $\sigma \beta \varepsilon \sigma \tau o c$ from $\sigma \beta \varepsilon v \nu v \mu$ to quench. It occurs often in Homer. Our word asbestos is this very word. Mt 18:8 has "into the eternal fire." The Valley of Hinnom had been desecrated by the sacrifice of children to Moloch so that as an accursed place it was used for the city garbage where worms gnawed and fires burned. It is thus a vivid picture of eternal punishment.

Mark 9:44
The oldest and best manuscripts do not give these two verses. They came in from the Western and Syrian (Byzantine) classes. They are a mere repetition of verse 48. Hence we lose the numbering 44 and 46 in our verses which are not genuine.

Mark 9:46
See on 44
Mark 9:47
With one eye ( $\mu \circ v \circ \varphi \theta a \lambda \mu \circ v$ ). Literally one-eyed. See also Mt 18:9. Vernacular Koine and condemned by the Atticists. See Mt 18:8f. Mark has here "kingdom of God" where Mt 18:9 has "life."

Mark 9:48
Their worm (o $\sigma \kappa \omega \lambda \eta \xi \alpha v \tau \omega v$ ). "The worm, i.e. that preys upon the inhabitants of this dread realm" (Gould). Two bold figures of Gehenna combined (the gnawing worm, the
burning flame). No figures of Gehenna can equal the dread reality which is here described. See Isa 66:24.

Mark 9:50
Have salt in yourselves ( $\varepsilon \chi \varepsilon \tau \varepsilon \varepsilon v \varepsilon \alpha v \tau o \iota \varsigma ~ \alpha \lambda \alpha$ ). Jesus had once called them the salt of the earth (Mt 5:13) and had warned them against losing the saltness of the salt. If it is $\alpha v a \lambda o v$, nothing can
season ( $\alpha \rho \tau v \omega$ ) it and it is of no use to season anything else. It is like an exploded shell, a burnt-out crater, a spent force. This is a warning for all Christians.

## Mark 10

Mark 10:1
Into the border of Judea and beyond Jordan ( $\varepsilon ı \varsigma \tau \alpha$ орıа $\tau \eta \varsigma$ Iovסaıaৎ ка $\pi \varepsilon \rho \alpha v$ тои Iop $\delta a v o v)$. See on Mt 19:1 for discussion of this curious expression. Matthew adds "from Galilee" and Lu 17:11 says that Jesus "was passing through the midst of Samaria and Galilee" after leaving Ephraim (Joh 11:54 ). A great deal has intervened between the events at the close of Mark 9 and those in the beginning of Mark 10. For these events see Mt 18; Joh 7-11; Lu 9:57-18:14 (one-third of Luke's Gospel comes in here). It was a little over six months to the end at the close of Mark 9. It is just a few weeks now in Mark 10. Jesus has begun his last journey to Jerusalem going north through Samaria, Galilee, across the Jordan into Perea, and back into Judea near Jericho to go up with the passover pilgrims from Galilee.

Multitudes (ox $\lambda \mathrm{o}$ ). Caravans and caravans journeying to Jerusalem. Many of them are followers of Jesus from Galilee or at least kindly disposed towards him. They go together ( $\sigma \cup v \pi o \rho \varepsilon v o v \tau \alpha)$ with Jesus. Note dramatic historical present.

As he was wont ( $\omega \varsigma \varepsilon \omega \omega \theta \varepsilon$ ). Second past perfect used like an imperfect from $\varepsilon i \omega \theta a$, second perfect active. Jesus
was teaching ( $\varepsilon \delta \iota \delta \alpha \sigma \kappa \varepsilon v$, imperfect, no longer present tense) this moving caravan.

## Mark 10:2

Tempting him ( $\pi \varepsilon เ \rho a \zeta о v \tau \varepsilon \varsigma)$. As soon as Jesus appears in Galilee the Pharisees attack him again (cf. 7:5; 8:11). Gould thinks that this is a test, not a temptation. The word means either (see on Mt 4:1), but their motive was evil. They had once involved the Baptist with Herod Antipas and Herodias on this subject. They may have some such hopes about Jesus, or their purpose may have been to see if Jesus will be stricter than Moses taught. They knew that he had already spoken in Galilee on the subject (Mt 5:31f. ).

Mark 10:3
What did Moses command you? (T v $\mu \nu v \varepsilon v \varepsilon \tau \varepsilon เ \lambda \alpha \tau o ~ M \omega v \sigma \eta \sigma$;). Jesus at once brought up the issue concerning the teaching of Moses (De 24:1). But Jesus goes back beyond this concession here allowed by Moses to the ideal state commanded in Ge 1:27.

Mark 10:4
To write a bill of divorcement and to put her away ( $\beta \iota \beta \lambda_{\imath \rho v} \alpha \pi о \sigma \tau \alpha \sigma \iota v \gamma \rho \alpha \psi \alpha \kappa \alpha$ $\alpha \pi о \lambda \nu \sigma \alpha)$. The word for "bill" ( $\beta \iota \beta \lambda \iota \rho v$ ) is a diminutive and means "little book," like the Latin libellus, from which comes our word libel (Vincent). Wycliff has it here "a libel of forsaking." This same point the Pharisees raise in Mt 19:7, showing probably that they held to the liberal view of Hillel, easy divorce for almost any cause. That was the popular view as now. See on Mt 19:7 for this and for discussion of "for your hardness of heart" ( $\sigma \kappa \lambda \eta \rho o \kappa \alpha \rho \delta ı \alpha$ ). Jesus expounds the purpose of marriage (Ge 2:24) and takes the stricter view of divorce, that of the school of Shammai. See on Mt 19:1-12 for discussion. Mr 10:10
notes that the disciples asked Jesus about this problem "in the house" after they had gone away from the crowd.

Mark 10:11
Mark does not give the exception stated in Mt 19:9 "except for fornication" which see for discussion, though the point is really involved in what Mark does record. Mere formal divorce does not annul actual marriage consummated by the physical union. Breaking that bond does annul it.

Mark 10:12
If she herself shall put away her husband and marry another ( $\varepsilon \alpha v \alpha v \tau \eta ~ \alpha \pi o \lambda v \sigma \alpha \sigma \alpha$ $\tau 0 v a v \delta \rho \alpha \alpha v \tau \eta \varsigma \gamma \alpha \mu \eta \sigma \eta)$. Condition of the third class (undetermined, but with prospect of determination). Greek and Roman law allowed the divorce of the husband by the wife though not provided for in Jewish law. But the thing was sometimes done as in the case of Herodias and her husband before she married Herod Antipas. So also Salome, Herod's sister, divorced her husband. Both Bruce and Gould think that Mark added this item to the words of Jesus for the benefit of the Gentile environment of this Roman Gospel. But surely Jesus knew that the thing was done in the Roman world and hence prohibited marrying such a "grass widow."

## Mark 10:13

They brought ( $\pi \rho \circ \sigma \varepsilon \varphi \varepsilon \rho \circ v$ ). Imperfect active tense, implying repetition. So also Lu 18:15, though Mt 19:13 has the constative aorist passive ( $\pi \rho \circ \sigma \eta \nu \varepsilon \chi \theta \eta \sigma \alpha v$ ). "This incident follows with singular fitness after the Lord's assertion of the sanctity of married life" (Swete). These children ( $\pi \alpha \iota \delta \iota \alpha$, Mark and Matthew; $\beta \rho \varepsilon \varphi \eta$ in Luke) were of various ages. They were brought to Jesus for his blessing and prayers (Matthew). The mothers had reverence for Jesus and wanted him to touch $(\alpha \psi \eta \tau \alpha)$ them. There was, of course, no question of baptism or salvation involved, but a most natural thing to do.

Mark 10:14
He was moved with indignation ( $\eta \gamma \alpha v \alpha \kappa \tau \eta \sigma \varepsilon v$ ). In Mark alone. The word is ingressive aorist, became indignant, and is a strong word of deep emotion (from $\alpha \gamma \alpha v$ and $\alpha \chi \theta o \mu \alpha$, to feel pain). Already in Mt 21:15; 26:8. Old and common word.

Suffer the little children to come unto me ( $\alpha \varphi \varepsilon \tau \varepsilon \tau \alpha \pi \alpha \iota \delta \iota \alpha \varepsilon \rho \chi \varepsilon \sigma \theta \alpha \pi \rho \circ \varsigma \mu \varepsilon$ ). Mark has the infinitive $\varepsilon \rho \chi \varepsilon \sigma \theta \alpha$ (come) not in Matthew, but in Luke. Surely it ought to be a joy to parents to bring their children to Jesus, certainly to allow them to come, but to hinder their coming is a crime. There are parents who will have to give answer to God for keeping their children away from Jesus.

Mark 10:15
As a little child ( $\omega \varsigma \pi \alpha \iota \delta \iota v$ ). How does a little child receive the kingdom of God? The little child learns to obey its parents simply and uncomplainingly. There are some new psychologists who argue against teaching obedience to children. The results have not been
inspiring. Jesus here presents the little child with trusting and simple and loving obedience as the model for adults in coming into the kingdom. Jesus does not here say that children are in the kingdom of God because they are children.

## Mark 10:16

He took them in his arms ( $\varepsilon v \alpha \gamma \kappa \alpha \lambda_{\iota \sigma \alpha \mu \varepsilon v o c) . ~ A ~ d i s t i n c t ~ r e b u k e ~ t o ~ t h e ~ p r o t e s t ~ o f ~ t h e ~}^{\text {en }}$ over-particular disciples. This word already in Mr 9:36. In Lu 2:28 we have the full idiom, to receive into the arms ( $\varepsilon \varsigma \varsigma \tau \alpha \varsigma ~ \alpha \gamma \kappa \alpha \lambda a \varsigma \delta \varepsilon \chi \varepsilon \sigma \theta \alpha)$. So with tender fondling Jesus repeatedly blessed (катєט入оүє, imperfect), laying his hands upon each of them ( $\tau \uparrow \theta \varepsilon \iota \varsigma$, present participle). It was a great moment for each mother and child.

Mark 10:17
Ran $(\pi \rho o \sigma \delta \rho \alpha \mu \omega v)$. Jesus had left the house ( $10: 10$ ) and was proceeding with the caravan on the way ( $\varepsilon \iota \varsigma \circ \delta o v$ ) when this ruler eagerly ran and kneeled ( $\gamma \circ v \cup \pi \varepsilon \tau \eta \sigma \alpha \varsigma)$ and was asking ( $\varepsilon \pi \eta \rho \omega \tau \alpha$, imperfect) Jesus about his problem. Both these details alone in Mark.

Mark 10:18
Why callest thou me good? (T $\mu \varepsilon \lambda \varepsilon \gamma \varepsilon \iota \varsigma ~ \alpha \gamma \alpha \theta$ ov;). So Lu 18:19. Mt 19:17 has it: "Why asketh thou concerning that which is good? "The young ruler was probably sincere and not using mere fulsome compliment, but Jesus challenges him to define his attitude towards him as was proper. Did he mean "good" ( $\alpha \gamma \alpha \theta$ oc) in the absolute sense as applied to God? The language is not a disclaiming of deity on the part of Jesus.

That I may inherit (ıva к $\lambda \eta \rho \circ \sim o \mu \eta \sigma \omega$ ). Mt 19:16 has ( $\sigma \chi \omega$ ), that I may "get."
Mark 10:20
All these ( $\tau \alpha \cup \tau \alpha \pi \alpha \nu \tau \alpha)$. Literally,
these all (of them).
Mark 10:21
Looking upon him loved him ( $\varepsilon \mu \beta \lambda \varepsilon \psi \alpha \varsigma \alpha \cup \tau \omega \eta \gamma \alpha \pi \eta \sigma \varepsilon v$ ). Mark alone mentions this glance of affection, ingressive aorist participle and verb. Jesus fell in love with this charming youth.

One thing thou lackest (H $\varepsilon v \sigma \varepsilon v \sigma \tau \varepsilon \rho \varepsilon)$. Lu 18:22 has it: "One thing thou lackest yet" (E $\tau \varepsilon \vee \sigma$ $\lambda \varepsilon \iota \pi \varepsilon$ ). Possibly two translations of the same Aramaic phrase. Mt 19:20 represents the youth as asking "What lack I yet?" (T $\varepsilon \tau$ voтepw;). The answer of Jesus meets that inquiry after more than mere outward obedience to laws and regulations. The verb vбtep $\omega$ is from the adjective votepoc (behind) and means to be too late, to come short, to fail of, to lack. It is used either with the accusative, as here, or with the ablative as in 2Co 11:5, or the dative as in Textus Receptus here, $\sigma$ o.

Mark 10:22
But his countenance fell (o $\delta \varepsilon \sigma \tau v \gamma v a \sigma a \varsigma)$. In the LXX and Polybius once and in Mt 16:3 (passage bracketed by Westcott and Hort). The verb is from $\sigma \tau \nu \gamma v o \varsigma$, sombre, gloomy, like a lowering cloud. See on Mt 19:22 for discussion of "sorrowful" ( $\lambda$ илоицвvo¢).

## Mark 10:23

Looked round about ( $\pi \varepsilon \rho ı \beta \lambda \varepsilon \psi \alpha \mu \varepsilon \nu o \varsigma)$. Another picture of the looks of Jesus and in Mark alone as in 3:5,34. "To see what impression the incident had made on the Twelve" (Bruce). "When the man was gone the Lord's eye swept round the circle of the Twelve, as he drew for them the lesson of the incident" (Swete).

How hardly (Пیৎ $\delta v \sigma \kappa о \lambda \omega \varsigma)$. So Lu 18:24. Mt 19:23 has it: "With difficulty ( $\delta v \sigma \kappa о \lambda \omega \varsigma)$ shall a rich man." See on Matthew for this word.

Mark 10:24
Were amazed ( $\varepsilon \theta \alpha \mu \beta$ ouv $\tau 0$ ). Imperfect passive. A look of blank astonishment was on their faces at this statement of Jesus. They in common with other Jews regarded wealth as a token of God's special favour.

Children ( $\tau \varepsilon \kappa \nu \alpha$ ). Here alone to the Twelve and this tender note is due to their growing perplexity.

For them that trust in riches ( $\tau о \cup \varsigma \pi \varepsilon \pi о \iota \theta о \tau \alpha \varsigma \varepsilon \pi \tau о \iota \varsigma \rho \eta \mu \alpha \sigma \iota v$ ). These words do not occur in Aleph B Delta Memphitic and one Old Latin manuscript. Westcott and Hort omit them from their text as an evident addition to explain the difficult words of Jesus.

Mark 10:25
Needle's eye ( $\tau \rho \cup \mu \alpha \lambda ı \alpha \varsigma \rho a \varphi ı \delta o \varsigma)$. See on Mt 19:24 for discussion. Luke uses the surgical needle, $\beta \varepsilon \lambda$ ovŋヶ. Matthew has the word $\rho a \varphi ı \varsigma$ like Mark from $\rho a \pi \tau \omega$, to sew, and it appears in the papyri. Both Matthew and Luke employ $\tau \rho \eta \mu \alpha \tau o \varsigma$ for eye, a perforation or hole from $\tau \iota \tau \rho \alpha \omega$, to bore. Mark's word $\tau \rho v \mu \alpha \lambda \iota a \varsigma$ is from $\tau \rho v \omega$, to wear away, to perforate. In the LXX and Plutarch.

Mark 10:26
Then who (ка тıৎ). Mt 19:25 has Tıৎ ouv. Evidently $\kappa \alpha$ has here an inferential sense like ouv.

Mark 10:27
Looking on them ( $\varepsilon \mu \beta \lambda \varepsilon \psi \alpha \varsigma ~ \alpha v \tau o \iota \varsigma) . ~ S o ~ i n ~ M t ~ 19: 26 . ~ T h e i r ~ a m a z e m e n t ~ i n c r e a s e d ~(~$ 26).

But not with God ( $\alpha \lambda \lambda^{\prime}$ ov $\pi \alpha \rho \alpha \theta \varepsilon \omega$ ). Locative case with $\pi \alpha \rho \alpha$ (beside). The impossible by the side of men ( $\pi \alpha \rho \alpha \alpha \nu \theta \rho \omega \pi \sigma \iota)$ becomes possible by the side of God. That is the whole point and brushes to one side all petty theories of a gate called needle's eye, etc.

Mark 10:28
Peter began to say ( $\eta \rho \xi \alpha \tau о \lambda \varepsilon \gamma \varepsilon \iota \nu$ о $П \varepsilon \tau \rho \circ \varsigma)$. It was hard for Peter to hold in till now. Mt 19:27 says that "Peter answered" as if the remark was addressed to him in particular. At any rate Peter reminds Jesus of what they had left to follow him, four of them that day by the sea (Mr 1:20; Mt 4:22; Lu 5:11). It was to claim obedience to this high ideal on their part in contrast with the conduct of the rich young ruler.

Mark 10:30

With persecutions ( $\mu \varepsilon \tau \alpha \delta \mathrm{t} \omega \gamma \mu \omega v$ ). This extra touch is in Mark alone. There is a reminiscence of some of "the apocalyptic of the familiar descriptions of the blessings of the Messianic kingdom. But Jesus uses such language from the religious idiom of this time only to idealize it" (Gould). The apostles were soon to see the realization of this foreshadowing of persecution. Vincent notes that Jesus omits "a hundred wives" in this list, showing that Julian the Apostate's sneer on that score was without foundation.

Mark 10:31
See on Mt 19:30 for the use of the paradox about
first and
last, probably a rebuke here to Peter's boast.
Mark 10:32
And they were amazed ( $\kappa \alpha \varepsilon \theta \alpha \mu \beta$ оиv $о$ ). Imperfect tense describing the feelings of the disciples as Jesus was walking on in front of them ( $\eta \nu \pi \rho o \alpha \gamma \omega \nu \alpha v \tau o v \varsigma$, periphrastic imperfect active), an unusual circumstance in itself that seemed to bode no good as they went on through Perea towards Jerusalem. In fact,
they that followed were afraid (о $\delta \varepsilon \alpha \kappa о \lambda о \cup \theta$ оиvт $\varepsilon \varsigma \varphi о \beta о \cup \nu \tau о$ ) as they looked at Jesus walking ahead in solitude. The idiom (o $\delta \varepsilon$ ) may not mean that all the disciples were afraid, but only some of them. "The Lord walked in advance of the Twelve with a solemnity and a determination which foreboded danger" (Swete). Cf. Lu 9:5. They began to fear coming disaster as they neared Jerusalem. They read correctly the face of Jesus.

And he took again the twelve ( $\kappa \alpha \pi \alpha \rho \alpha \lambda \alpha \beta \omega \nu \tau о \nu \varsigma \delta \omega \delta \varepsilon \kappa \alpha)$. Matthew has "apart" from the crowds and that is what Mark also means. Note $\pi \alpha \rho \alpha \lambda \alpha \beta \omega v$, taking to his side.

And began to tell them the things that were to happen to him ( $\eta \rho \xi \alpha \tau \circ \alpha \cup \tau \circ ๙ \lambda \varepsilon \gamma \varepsilon เ v$ $\tau \alpha \mu \varepsilon \lambda \lambda o v \tau \alpha \alpha v \tau \omega \sigma v \mu \beta \alpha \iota v \varepsilon \iota \nu)$. He had done it before three times already (Mr 8:31; 9:13; 9:31 ). So Jesus tries once more. They had failed utterly heretofore. How is it now? Luke adds ( 18:34): "They understood none of these things." But Mark and Matthew show how the minds of two of the disciples were wholly occupied with plans of their own selfish ambition while Jesus was giving details of his approaching death and resurrection.

Mark 10:35
There come near unto him James and John ( $\kappa \alpha \pi \rho о \sigma \pi о \rho \varepsilon v o v \tau \alpha \operatorname{I} \alpha \omega \beta \circ \varsigma \kappa \alpha \mathrm{I} \omega \alpha \nu \eta \varsigma)$. Dramatic present tense. Matthew has $\tau 0 \tau \varepsilon$, then, showing that the request of the two brothers with their mother (Mt 20:20) comes immediately after the talk about Christ's death.

We would $(\theta \varepsilon \lambda o \mu \varepsilon v)$. We wish, we want, bluntly told.
She came worshipping ( $\pi \rho о \sigma \kappa v \nu о v \sigma \alpha)$ Matthew says. The mother spoke for the sons. But they try to commit Jesus to their desires before they tell what they are, just like spoiled children.

Mark 10:37

In thy glory $(\varepsilon v \tau \eta \delta o \xi \eta)$. Mt 20:21 has "in thy kingdom." See on Mt 20:20 for the literal interpretation of Mt 19:28. They are looking for a grand Jewish world empire with apocalyptic features in the eschatological culmination of the Messiah's kingdom. That dream brushed aside all the talk of Jesus about his death and resurrection as mere pessimism.

Mark 10:38
Or be baptized with the baptism that I am baptized with ( $\eta$ тo $\beta \alpha \pi \tau \iota \sigma \mu \alpha$ o $\varepsilon \gamma \omega$ $\beta a \pi \tau \iota \zeta о \mu \alpha \beta \alpha \pi \tau \iota \sigma \theta \eta v \alpha)$. Cognate accusative with both passive verbs. Mt 20:22 has only the cup, but Mark has both the cup and the baptism, both referring to death. Jesus in the Garden of Gethsemane will refer to his death again as "the cup" (Mr 14:36; Mt 26:39; Lu 22:42 ). He had already used baptism as a figure for his death (Lu 12:50). Paul will use it several times (1Co 15:29; Ro 6:3-6; Col 2:12 ).

Mark 10:39
See on Mt 20:23-28 for discussion on these memorable verses ( 39-45) identical in both Matthew and Mark. In particular in verse 45 note the language of Jesus concerning his death as "a ransom for many" ( $\lambda \nu \tau \rho \circ v \alpha \nu \tau \pi 0 \lambda \lambda \omega v$ ), words of the Master that were not understood by the apostles when spoken by Jesus and which have been preserved for us by Peter through Mark. Some today seek to empty these words of all real meaning as if Jesus could not have or hold such a conception concerning his death for sinners.

Mark 10:40
See on 39
Mark 10:41
See on 39
Mark 10:42
See on 39
Mark 10:43
See on 39
Mark 10:44
See on 39
Mark 10:45
See on 39
Mark 10:46
From Jericho ( $\alpha \pi$ o I $\varepsilon \varepsilon \varepsilon ı \chi \omega$ ). See on Mt 20:29 for discussion of this phrase and Luke's (Lu 18:35) "nigh unto Jericho" and the two Jerichos, the old and the new Roman (Luke). The new Jericho was "about five miles W. of the Jordan and fifteen E. of Jerusalem, near the mouth of the Wady Kelt, and more than a mile south of the site of the ancient town" (Swete).

Great multitude (ox ${ }^{\text {ov }}$ เкаvov). Considerable, more than sufficient. Often in Luke and the papyri in this sense. See Mt 3:11 for the other sense of fit for וкаvoc.

Bartimaeus (Baptıaøı¢). Aramaic name like Bartholomew, $\beta \alpha \rho$ meaning son like Hebrew ben. So Mark explains the name meaning "the son of Timaeus" (o vıos Tıцаıо). Mark alone gives his name while Mt 20:30 mentions two which see for discussion.

Blind beggar ( $\tau \cup \varphi \lambda$ оৎ $\pi \rho \circ \sigma \alpha \iota \tau \eta \varsigma)$, "begging" ( $\varepsilon \pi \alpha \iota \tau \omega v$ ) Luke has it (Lu 18:35). All three Gospels picture him as
sitting by the roadside ( $\varepsilon \kappa \alpha \theta \eta \tau 0 \pi \alpha \rho \alpha \tau \eta v$ o $\delta o v$ ). It was a common sight. Bartimaeus had his regular place. Vincent quotes Thomson concerning Ramleh: "I once walked the streets counting all that were either blind or had defective eyes, and it amounted to about one-half the male population. The women I could not count, for they are rigidly veiled" (The Land and the Book). The dust, the glare of the sun, the unsanitary habits of the people spread contagious eye-diseases.

Mark 10:48
Rebuked him ( $\varepsilon \pi \varepsilon \tau \tau \mu \omega \nu \alpha \cup \tau \omega)$. Imperfect tense. Kept rebuking repeatedly. So Lu 18:39 . Aorist tense in Mt 20:31 .

Should hold his peace ( $\sigma \omega \tau \eta \eta \eta$ ). Ingressive aorist subjunctive, become silent.
The more a great deal ( $\pi 0 \lambda \lambda \omega \mu \alpha \lambda \lambda o v$ ). So Lu 18:39. Only $\mu \varepsilon 亡 \zeta o v$ in Mt 20:31 .
Mark 10:49
Stood still (бтaৎ). Second aorist active ingressive participle. So Mt 20:32 . Lu 18:40 has $\sigma \tau \alpha \theta \varepsilon \iota$, , aorist passive participle.

He calleth thee ( $\varphi \omega v \varepsilon \sigma \varepsilon$ ). That was joyful news to Bartimaeus. Vivid dramatic presents here in Mark.

Mark 10:50
Casting away his garment ( $\alpha \pi \circ \beta \alpha \lambda \omega \nu \tau 0$ ц $\mu \alpha \tau \circ v \alpha v \tau o v$ ). Second aorist active participle. Outer robe in his haste.

Sprang up ( $\alpha \vee \alpha \pi \eta \delta \eta \sigma \alpha \varsigma)$. Leaping up, vivid details again in Mark.
Mark 10:51
That I should do ( $\pi$ oוף $\sigma \omega$ ). Neat Greek idiom with aorist subjunctive without iva after $\theta \varepsilon \lambda \varepsilon ı \varsigma$. For this asyndeton (or parataxis) see Robertson, Grammar, p. 430.

Rabboni (Paßßouve). The Aramaic word translated Lord (Kurie) in Mt 20:33 and Lu 18:41. This very form occurs again in Joh 20:16.

That I may receive my sight ( $\iota v \alpha \alpha v \alpha \beta \lambda \varepsilon \psi \omega$ ). To recover sight ( $\alpha v \alpha-$ ), see again. Apparently he had once been able to see. Here $\iota v a$ is used though $\theta \varepsilon \lambda \omega$ is not (cf. 10:35). The Messiah was expected to give sight to the blind (Isa 61:1; Lu 4:18; 7:22 ).

Mark 10:52
Followed ( $\eta \kappa 0 \lambda o u \theta \varepsilon$ ). Imperfect tense picturing joyful Bartimaeus as he followed the caravan of Jesus into the new Jericho.

Made thee whole ( $\sigma \varepsilon \sigma \omega \kappa \varepsilon v$ ). Perfect active indicative. The word commonly means save and that may be the idea here.

## Mark 11

Mark 11:1
Unto Bethphage and Bethany ( $\varepsilon \iota \varsigma \mathrm{B} \eta \theta \varphi \alpha \gamma \eta \kappa \alpha \mathrm{B} \eta \theta a v ı \alpha v$ ). Both together as in Lu 19:29 , though Mt 21:1 mentions only Bethphage. See discussion in Matthew for this and the Mount of Olives.

Mark 11:2
As ye enter ( $\varepsilon \iota \sigma \pi о \rho \varepsilon v o \mu \varepsilon v o$ ). So also Lu 19:30. Present middle participle.
Colt ( $\pi \omega \lambda$ ov). So Lu 19:30 . Mt 21:2 speaks of the ass (ovov) also.
Whereon no one ever yet sat ( $\varepsilon \varphi^{\prime}$ ov ov ovıı $\left.\alpha v \theta \rho \omega \pi \omega \nu \varepsilon \kappa \alpha \theta \iota \sigma \varepsilon v\right)$. So Lu 19:30 .
Mark 11:3
The Lord (o Kupioc). So Matt. and Luke. See on Mt 21:3 for discussion of this word applied to Jesus by himself.

He will send him back ( $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \varepsilon$ ). Present indicative in futuristic sense. Mt 21:3 has the future $\alpha \pi о \sigma \tau \varepsilon \lambda \varepsilon$.

Mark 11:4
A colt tied at the door without in the open street ( $\pi \omega \lambda$ ov $\delta \varepsilon \delta \varepsilon \mu \varepsilon v o v \pi \rho o \varsigma ~ \theta u \rho a v \varepsilon \xi \omega$ $\varepsilon \pi$ tov $\alpha \mu \varphi \circ \delta o v)$. A carefully drawn picture. The colt was outside the house in the street, but fastened (bound, perfect passive participle) to the door. "The better class of houses were built about an open court, from which a passage way under the house led to the street outside. It was at this outside opening to the street that the colt was tied" (Gould). The word $\alpha \mu \varphi o \delta o s$ (from $\alpha \mu \varphi \omega$, both, and oठo, road) is difficult. It apparently means road around a thing, a crooked street as most of them were (cf. Straight Street in Ac 9:11). It occurs only here in the N.T. besides D in Ac 19:28. It is very common in the papyri for vicus or "quarter."

And they loose him (ка גvovoiv avtov). Dramatic present tense. Perhaps Peter was one of those sent this time as he was later (Lu 22:8). If so, that explains Mark's vivid details here.

Mark 11:5
Certain of those that stood there ( $\tau \iota v \varepsilon \varsigma \tau \omega v \varepsilon \kappa \varepsilon \varepsilon \sigma \tau \eta \kappa \circ \tau \omega v$ ). Perfect active participle, genitive plural. Bystanders. Lu 19:33 terms them "the owners thereof" (o кupıo autou). The lords or masters of the colt. They make a natural protest.

## Mark 11:7

 ical present. The owners acquiesced as Jesus had predicted. Evidently friends of Jesus.

Mark 11:8
Branches ( $\sigma \tau 1 \beta \alpha \delta \alpha \varsigma)$. A litter of leaves and rushes from the fields. Textus Receptus spells this word $\sigma \tau o ß \beta \alpha \delta \alpha \varsigma$. Mt 21:8 has $\kappa \lambda \alpha \delta o u \varsigma$, from $\kappa \lambda \alpha \omega$, to break, branches broken or cut from trees. Joh 12:13 uses the branches of the palm trees ( $\tau \alpha \beta \alpha \iota \alpha \tau \omega v \varphi$ огıाк $\omega v$ ), "the
feathery fronds forming the tufted crown of the tree" (Vincent). That is to say, some of the crowd did one of these things, some another. See on Mt 21:4-9 for discussion of other details. The deliberate conduct of Jesus on this occasion could have but one meaning. It was the public proclamation of himself as the Messiah, now at last for his "hour" has come. The excited crowds in front (o $\pi \rho \circ \alpha \gamma 0 v \tau \varepsilon \varsigma)$ and behind (o $\alpha \kappa 0 \lambda o u \theta$ ouvtec) fully realize the significance of it all. Hence their unrestrained enthusiasm. They expect Jesus, of course, now to set up his rule in opposition to that of Caesar, to drive Rome out of Palestine, to conquer the world for the Jews.

Mark 11:11
When he had looked round about upon all things ( $\pi \varepsilon \rho \curlywedge \beta \lambda \varepsilon \psi \alpha \mu \varepsilon v o \varsigma ~ \pi \alpha \nu \tau \alpha)$. Another Markan detail in this aorist middle participle. Mark does not give what Lu 19:39-55 has nor what Mt 21:10-17 does. But it is all implied in this swift glance at the temple before he went out to Bethany with the Twelve,
it being now eventide ( $\circ \psi \varepsilon \eta \delta \eta$ ovaŋऽ $\tau \eta \varsigma \omega \rho \alpha \varsigma$ ). Genitive absolute, the hour being already late. What a day it had been! What did the apostles think now?

Mark 11:12
On the morrow ( $\tau \eta \varepsilon \pi \alpha u \rho i o v$ ). Mt 21:18 has "early" $(\pi \rho \omega)$, often of the fourth watch before six A.M. This was Monday morning. The Triumphal Entry had taken place on our Sunday, the first day of the week.

Mark 11:13
If haply he might find anything thereon ( $\varepsilon \alpha \rho \alpha \tau \varepsilon v \rho \eta \sigma \varepsilon \varepsilon v \alpha v \tau \eta$ ). This use of $\varepsilon$ and the future indicative for purpose (to see if, a sort of indirect question) as in Ac 8:22; 17:27. Jesus was hungry as if he had had no food on the night before after the excitement and strain of the Triumphal Entry. The early figs in Palestine do not get ripe before May or June, the later crop in August. It was not the season of figs, Mark notes. But this precocious tree in a sheltered spot had put out leaves as a sign of fruit. It had promise without performance.

Mark 11:14
No man eat fruit from thee henceforward forever (Мףкєт єıऽ тov aı $\omega v \alpha \varepsilon \kappa ~ \sigma о v ~ \mu \eta \delta \varepsilon ı \varsigma$, $\kappa \alpha \rho \pi о v \varphi \alpha ү о)$. The verb $\varphi \alpha \gamma о$ is in the second aorist active optative. It is a wish for the future that in its negative form constitutes a curse upon the tree. Mt 21:19 has the aorist subjunctive with double negative ov $\mu \eta \kappa \varepsilon \tau \gamma \varepsilon v \eta \tau \alpha$, a very strong negative prediction that amounts to a prohibition. See on Matthew. Jesus probably spoke in the Aramaic on this occasion.

And his disciples heard it ( $\kappa \alpha$ $\eta \kappa о v о v$ о $\mu \alpha \theta \eta \tau \alpha \alpha \nu \tau о v)$. Imperfect tense, "were listening to it," and evidently in amazement, for, after all, it was not the fault of the poor fig tree that it had put out leaves. One often sees peach blossoms nipped by the frost when they are too precocious in the changeable weather. But Jesus offered no explanation at this time.

Mark 11:15

Began to cast out（ $\eta \rho \xi \alpha \tau \tau=\varepsilon \kappa \beta \alpha \lambda \lambda \varepsilon เ v)$ ．Mark is fond of＂began．＂See on Mt 21：12f．for discussion of this second cleansing of the temple in its bearing on that in Joh 2：14f．

Money－changers（ко入入৩ßьбт $\omega v$ ）．This same late word in Mt 21：12 which see for discus－ sion．It occurs in papyri．

## Mark 11：16

Through the temple（ $\delta \iota \alpha$ тov ıء $\rho \circ$ ）．The temple authorities had prohibited using the outer court of the temple through the Precinct as a sort of short cut or by－path from the city to the Mount of Olives．But the rule was neglected and all sorts of irreverent conduct was going on that stirred the spirit of Jesus．This item is given only in Mark．Note the use of tva after $\eta \varphi \iota \varepsilon$（imperfect tense）instead of the infinitive（the usual construction）．

Mark 11：17
For all the nations（ $\pi \alpha \sigma \iota v$ тоı $\varepsilon \theta v \varepsilon \sigma เ v$ ）．Mark alone has this phrase from Isa 56：7；Jer 7：11．The people as well as the temple authorities were guilty of graft，extortion，and desec－ ration of the house of prayer．Jesus assumes and exercises Messianic authority and dares to smite this political and financial abuse．Some people deny the right of the preacher to de－ nounce such abuses in business and politics even when they invade the realm of morals and religion．But Jesus did not hesitate．

Mark 11：18
Sought how they might destroy him（ $\varepsilon \zeta \eta \tau 0 \cup v \pi \omega \varsigma \alpha v \tau o v ~ a \pi o \lambda \varepsilon \sigma \omega \sigma เ v$ ）．Imperfect in－ dicative，a continuous attitude and endeavour．Note deliberative subjunctive with $\pi \omega \varsigma$ re－ tained in indirect question．Here both Sadducees（chief priests）and Pharisees（scribes） combine in their resentment against the claims of Jesus and in the determination to kill him．Long ago the Pharisees and the Herodians had plotted for his death（Mr 3：6 ）．Now in Jerusalem the climax has come right in the temple．

For they feared him（ $\varepsilon \varphi \rho \beta$ ouv $\tau \boldsymbol{\gamma} \gamma \rho$ ）．Imperfect middle indicative．Hence in wrath they planned his death and yet they had to be cautious．The Triumphal Entry had shown his power with the people．And now right in the temple itself＂all the multitude was astonished at his teaching＂（ $\pi \alpha \varsigma$ о о $\chi \lambda о \varsigma \varepsilon \xi \varepsilon \pi \lambda \eta \sigma \sigma \varepsilon \tau \sigma \varepsilon \pi \tau \eta \delta \iota \delta a \chi \eta$ avtov）．Imperfect passive．The people looked on Jesus as a hero，as the Messiah．This verse aptly describes the crisis that has now come between Christ and the Sanhedrin．

Mark 11：19
Every evening（oтav o $\bar{\varepsilon} \varepsilon \gamma \varepsilon v \varepsilon \tau 0$ ）．Literally，
whenever evening came on or more exactly
whenever it became late．The use of o七 $\alpha v$（от $\alpha v$ ）with the aorist indicative is like отоv $\alpha v$ with the imperfect indicative（ $\varepsilon \sigma \varepsilon \pi о \rho \varepsilon \cup \varepsilon \tau о)$ and oбo $\alpha \nu$ with the aorist indicative （ $\eta \psi \alpha v \tau 0$ ）in Mr 6：56．The use of $\alpha v$ makes the clause more indefinite and general，as here， unless it renders it more definite，a curious result，but true．Lu 21：37 has the accusative of
extent of time, "the days," "the nights." The imperfect tense he (or they) would go (६乡єторєиєто, є乡єторєиovto) out of the city suggests "whenever" as the meaning here.

Mark 11:20
As they passed by in the morning ( $\pi \alpha \rho \alpha \pi о \rho \varepsilon v o \mu \varepsilon v o \pi \rho \omega$ ). Literally, passing by in the morning. The next morning. They went back by the lower road up the Mount of Olives and came down each morning by the steep and more direct way. Hence they saw it. Mt 21:20 does not separate the two mornings as Mark does.

From the roots ( $\varepsilon \kappa \rho \iota \zeta \omega \nu)$. Mark alone gives this detail with $\varepsilon \xi \eta \rho \alpha \mu \mu \varepsilon v \eta \nu$ perfect passive predicate participle from $\xi \eta \rho \alpha ı v \omega$.

Mark 11:21
Peter calling to remembrance ( $\alpha v \alpha \mu \nu \eta \sigma \theta \varepsilon ı \varsigma$ о Пєт $\rho \circ \varsigma$ ). First aorist participle, being reminded. Only in Mark and due to Peter's story. For his quick memory see also 14:72.

Which thou cursedst ( $\eta \nu \kappa \alpha \tau \eta \rho \alpha \sigma \omega)$. First aorist middle indicative second person singular from катараона. It almost sounds as if Peter blamed Jesus for what he had done to the fig tree.

## Mark 11:22

Have faith in God ( $\varepsilon \chi \varepsilon \tau \varepsilon \pi \iota \sigma \tau \iota v ~ \theta \varepsilon o v)$. Objective genitive $\theta \varepsilon o v$ as in Gal 2:26; Ro 3:22,26 . That was the lesson for the disciples from the curse on the fig tree so promptly fulfilled. See this point explained by Jesus in Mt 21:21 which see for "this mountain" also.

Mark 11:23
Shall not doubt in his heart ( $\mu \eta \delta \iota \alpha \kappa \rho 1 \theta \eta \varepsilon v \tau \eta \kappa \alpha \rho \delta ı \alpha$ avtov). First aorist passive subjunctive with os $\alpha v$. The verb means a divided judgment ( $\delta \iota \alpha$ from $\delta v o$, two, and $\kappa \rho \imath v \omega$, to judge). Wavering doubt. Not a single act of doubt ( $\delta ı \alpha \kappa \rho(\theta \eta)$, but continued faith ( $\pi \iota \sigma \tau \varepsilon \cup \eta)$.

Cometh to pass ( $\gamma\llcorner v \varepsilon \tau \alpha$ ). Futuristic present middle indicative.
Mark 11:24
Believe that ye have received them ( $\pi \iota \sigma \tau \varepsilon \cup \varepsilon \tau \varepsilon$ ot $\varepsilon \lambda \alpha \beta \varepsilon \tau \varepsilon$ ). That is the test of faith, the kind that sees the fulfilment before it happens. E $\lambda \alpha \beta \varepsilon \tau \varepsilon$ is second aorist active indicative, antecedent in time to $\pi \ldots \tau \varepsilon v \varepsilon \tau \varepsilon$, unless it be considered the timeless aorist when it is simultaneous with it. For this aorist of immediate consequence see Joh 15:6.

Mark 11:25
Whensoever ye stand (o $\boldsymbol{\tau} \alpha v \sigma \tau \eta \kappa \varepsilon \tau \varepsilon$ ). Late form of present indicative $\sigma \tau \eta \kappa \omega$, from perfect stem $\varepsilon \sigma \tau \eta \kappa \alpha$. In LXX. Note use of otav as in 11:19. Jesus does not mean by the use of "stand" here to teach that this is the only proper attitude in prayer.

That your Father also may forgive you (ıv к $\kappa$ о $\pi \alpha \tau \eta \rho \alpha \varphi \eta \nu \mu \imath v$ ). Evidently God's willingness to forgive is limited by our willingness to forgive others. This is a solemn thought for all who pray. Recall the words of Jesus in Mt 6:12,14f.

Mark 11:26
This verse is omitted by Westcott and Hort. The Revised Version puts it in a footnote.

## Mark 11:27

The chief priests, and the scribes, and the elders (о архıєряıৎ ка о $\gamma \rho \alpha \mu \mu \alpha \tau \varepsilon ı \varsigma ~ к \alpha ~ о ~$ $\pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho \sigma)$. Note the article with each separate group as in Lu 20:1 and Mt 21:23. These three classes were in the Sanhedrin. Clearly a large committee of the Sanhedrin including both Sadducees and Pharisees here confront Jesus in a formal attack upon his authority for cleansing the temple and teaching in it.

Mark 11:28
By what authority ( $\varepsilon v \pi o \neq \varepsilon \xi \circ v \sigma ı \alpha)$. This question in all three Gospels was a perfectly legitimate one. See on Mt 21:23-27 for discussion. Note present subjunctive here (ıva tav $\alpha$ $\pi$ roııৎ), that you keep on doing these things.

Mark 11:30
Answer me ( $\alpha \pi о к \rho ө \eta \eta \varepsilon \mu \rho$ ). This sharp demand for a reply is only in Mark. See also verse 29. Jesus has a right to take this turn because of John's direct relation to himself. It was not a dodge, but a home thrust that cleared the air and defined their attitude both to John and Jesus. They rejected John as they now reject Jesus.

Mark 11:31
If we say ( $\varepsilon \alpha v \varepsilon ו \pi \omega \mu \varepsilon v$ ). Third-class condition with aorist active subjunctive. The alternatives are sharply presented in their secret conclave. They see the two horns of the dilemma clearly and poignantly. They know only too well what Jesus will say in reply. They wish to break Christ's power with the multitude, but a false step now will turn the laugh on them. They see it.

Mark 11:32
But should we say ( $\alpha \lambda \lambda \alpha \varepsilon ו \pi \omega \mu \varepsilon v$ ). Deliberative subjunctive with aorist active subjunctive again. It is possible to supply $\varepsilon \alpha v$ from verse 31 and treat it as a condition as there. So Mt 21:26 and Lu 20:6 . But in Mark the structure continues rugged after "from men" with anacoluthon or even aposiopesis--"they feared the people" Mark adds. Matthew has it: "We fear the multitude." Luke puts it: "all the people will stone us." All three Gospels state the popular view of John as a prophet. Mark's "verily" is ovt $\omega$ c really, actually. They feared John though dead as much as Herod Antipas did. His martyrdom had deepened his power over the people and disrespect towards his memory now might raise a storm (Swete).

Mark 11:33
We know not (ovk oi $\delta a \mu \varepsilon v$ ). It was for the purpose of getting out of the trap into which they had fallen by challenging the authority of Jesus. Their self-imposed ignorance, refusal to take a stand about the Baptist who was the Forerunner of Christ, absolved Jesus from a categorical reply. But he has no notion of letting them off at this point.

## Mark 12

Mark 12:1
He began to speak unto them in parables ( $\eta \rho \xi \alpha \tau о$ autoı $\varepsilon v \pi \alpha \rho \alpha \beta о \lambda \alpha \iota \varsigma ~ \lambda \alpha \lambda \varepsilon ı v)$. Mark's common idiom again. He does not mean that this was the beginning of Christ's use of parables (see 4:2), but simply that his teaching on this occasion took the parabolic turn. "The circumstances called forth the parabolic mood, that of one whose heart is chilled, and whose spirit is saddened by a sense of loneliness, and who, retiring within himself, by a process of reflection, frames for his thoughts forms which half conceal, half reveal them" (Bruce). Mark does not give the Parable of the Two Sons (Mt 21:28-32) nor that of the Marriage Feast of the King's Son (Mt 22:1-14 ). He gives here the Parable of the Wicked Husbandmen. Also in Mt 21:33-46 and Lu 20:9-19. See discussion in Matthew. Mt 21:33 calls the man "a householder" (окобголотпऽ).

A pit for the winepress (v $\pi \mathrm{o} \lambda \eta v i o v$ ). Only here in the N.T. Common in the LXX and in late Greek. Matthew had $\lambda \eta$ vov, winepress. This is the vessel or trough under the winepress on the hillside to catch the juice when the grapes were trodden. The Romans called it lacus (lake) and Wycliff dalf (lake), like delved. See on Matthew for details just alike.

Husbandmen ( $\gamma \varepsilon \omega \rho \gamma o \iota \varphi$ ). Workers in the ground, tillers of the soil ( $\varepsilon \rho \gamma \circ \nu, \gamma \eta$ ).
Mark 12:2
At the season ( $\tau \omega \kappa \alpha \mu \omega)$. For fruits as in the end of the sentence.
A servant ( $\delta o u \lambda o v$ ). Bondslave. Matthew has plural.
That he might receive ( $\quad v \alpha \lambda \alpha \beta \eta$ ). Purpose clause with second aorist subjunctive. Matthew has infinitive $\lambda \alpha \beta \varepsilon เ v$, purpose also.

Wounded in the head ( $\varepsilon \kappa \varepsilon \varphi \alpha \lambda \iota \omega \sigma \alpha v$ ). An old verb ( $\kappa \varepsilon \varphi \alpha \lambda \alpha \iota \omega$ ), to bring under heads ( $\kappa \varepsilon \varphi a \lambda \eta$ ), to summarize. Then to hit on the head. Only here in the N.T.

Mark 12:5
Beating some and killing some (ou¢ $\mu \varepsilon v \delta \varepsilon \rho \circ \nu \tau \varepsilon \sigma$, ou¢ $\delta \varepsilon \alpha \pi о к \tau \varepsilon \nu \nu v \nu \tau \varepsilon \varsigma)$. This distributive use of the demonstrative appears also in Mt 21:35 in the singular (ov $\mu \varepsilon v$, ov $\delta \varepsilon$, ov $\delta \varepsilon$ ). Originally $\delta \varepsilon \rho \omega$ in Homer meant to skin, flay, then to smite, to beat. A is a $\mu$ form of the verb ( $\alpha \pi о \kappa \tau \varepsilon v v \nu \mu$ ) and means to kill off.

Mark 12:6
 has in mind the language of the Father to him at his baptism (Mr 1:11; Mt 3:17; Lu 3:22).

Last ( $\varepsilon \sigma \chi \alpha \tau o v)$. Only in Mark. See on Mt 21:37 for discussion of "reverence."
Mark 12:7
Among themselves ( $\pi \rho \circ \varsigma$ вavtous). This phrase alone in Mark. Lu 20:14 has "with one another" ( $\pi \rho \circ \varsigma \alpha \lambda \lambda \eta \lambda$ ou¢), reciprocal instead of reflexive, pronoun.

Mark 12:8

Killed him and cast him forth ( $\alpha \pi \varepsilon \kappa \tau \varepsilon เ v a v ~ \alpha u \tau о v, ~ \kappa \alpha ~ \varepsilon \xi \varepsilon \beta \alpha \lambda о v \alpha \cup \tau о v)$. Matthew and Luke reverse the order, cast forth and killed.

Mark 12:10
This scripture ( $\tau \eta v \gamma \rho \alpha \varphi \eta \nu \tau \alpha \nu \tau \eta v)$. This passage of scripture (Lu 4:21; Joh 19:37; Ac 1:16 ). It is a quotation from Ps 118:22f. See on Mt 21:42 for discussion.

Mark 12:11
This (autq). Feminine in LXX may refer to
kephal $\boxtimes$ (head) or may be due to the Hebrew original
zoth (this thing) which would be neuter tovto in a Greek original, a translation Hebraism.

Mark 12:12
Against them ( $\pi \rho \circ \varsigma$ avtovৎ). So Luke. It was a straight shot, this parable of the Rejected Stone (12:10f. ) and the longer one of the Wicked Husbandmen. There was no mistaking the application, for he had specifically explained the application (Mt 21:43-45). The Sanhedrin were so angry that they actually started or sought to seize him, but fear of the populace now more enthusiastic for Jesus than ever held them back. They went off in disgust, but they had to listen to the Parable of the King's Son before going (Mt 22:1-14 ).

Mark 12:13
 subjunctive. The verb is late from $\alpha \gamma \rho \alpha$ (a hunt or catching). It appears in the LXX and papyri. Here alone in the N.T. Lu 20:20 has the same idea, "that they may take hold of his speech" ( $\varepsilon \pi \iota \lambda \alpha \beta \omega v \tau \alpha \alpha \cup \tau o v \lambda o \gamma o v$ ) while Mt 22:15 uses $\pi \alpha \gamma \iota \delta \varepsilon v \sigma \omega \sigma \sigma v$ (to snare or trap). See discussion in Matthew. We have seen the scribes and Pharisees trying to do this very thing before (Lu 11:33f. ). Mark and Matthew note here the combination of Pharisees and Herodians as Mark did in 3:6. Matthew speaks of "disciples" or pupils of the Pharisees while Luke calls them "spies" ( $\varepsilon v к \alpha \theta \varepsilon \tau о ч \varsigma)$.

Mark 12:14
Shall we give or shall we not give? ( $\delta \omega \mu \varepsilon v \eta \mu \eta \delta \omega \mu \varepsilon v$;). Mark alone repeats the question in this sharp form. The deliberative subjunctive, aorist tense active voice. For the discussion of the palaver and flattery of this group of theological students see on Mt 22:16-22 .

Mark 12:15
 wickedness" ( $\gamma$ vouc $\tau \eta v$ по $\quad \eta \rho \iota a v \alpha \cup \tau \omega v$ ) while Lu 20:23 says, "perceived their craftiness" (катаvoŋбац $\alpha v \tau \omega \nu \tau \eta v \pi \alpha v o v \rho \gamma \iota \alpha v)$. Each of these words throws a flash-light on the spirit and attitude of these young men. They were sly, shrewd, slick, but they did not deceive Jesus with their pious palaver. See on Matthew for further details.

Mark 12:17

Marvelled greatly at him ( $\left.\varepsilon \xi \varepsilon \theta \alpha \nu \mu \alpha \zeta o v \varepsilon \pi^{\prime} \alpha v \tau \omega\right)$. Imperfect tense with perfective use of the preposition $\varepsilon \xi$. Both Matthew and Luke use the ingressive aorist. Luke adds that they "held their peace" ( $\varepsilon \sigma \tau \gamma \eta \sigma \alpha \nu$ ) while Matthew notes that they "went their way" ( $\alpha \pi \eta \lambda \theta \alpha v$ ), went off or away.

Mark 12:18
 The Pharisees and Herodians had had their turn after the formal committee of the Sanhedrin had been so completely routed. It was inevitable that they should feel called upon to show their intellectual superiority to these raw Pharisaic and Herodian theologians. See on Mt 22:23-33 for discussion of details. It was a good time to air their disbelief in the resurrection at the expense of the Pharisees and to score against Jesus where the Sanhedrin and then the Pharisees and Herodians had failed so ignominiously.

Mark 12:19
Moses wrote (M $\mathrm{M} \omega \mathrm{v}^{2} \uparrow \varsigma \varepsilon \gamma \rho \alpha \psi \varepsilon v$ ). So Lu 20:28 (Ge 38:8; De. 25:5f. ). Matthew has "said" ( $\varepsilon \pi \varepsilon v)$.

Mark 12:20
Took a wife ( $\varepsilon \lambda \alpha \beta \varepsilon v \gamma \cup v a i k \alpha$ ). So Lu 20:29. Matthew has "married" ( $\gamma \eta \mu \alpha \varsigma$ ).
Mark 12:22
Last of all ( $\varepsilon \sigma \chi \alpha \tau o v \pi \alpha \nu \tau \omega v)$. Adverbial use of $\varepsilon \sigma \chi \alpha \tau o v$.
Mark 12:23
To wife ( $\gamma$ vvaıк $)$ ). Predicate accusative in apposition with "her" ( $\alpha \cup \tau \eta v$ ). So Luke, but Matthew merely has "had her" ( $\varepsilon \sigma \chi \circ v \alpha v \tau \eta v$ ), constative aorist indicative active.

Mark 12:24
Is it not for this cause that ye err? ( $O v \delta \iota \alpha$ тоvто $\pi \lambda \alpha v a \sigma \theta \varepsilon ;$ ). Mark puts it as a question with ov expecting the affirmative answer. Matthew puts it as a positive assertion: "Ye are." $\Pi \lambda \alpha v \alpha o \mu \alpha$ is to wander astray (cf. our word planet, wandering stars, $\alpha \sigma \tau \varepsilon \rho \varepsilon \varsigma \pi \lambda \alpha v \eta \tau \alpha$, Jude 1:13 ) like the Latin errare (our error, err).

That ye know not the scriptures ( $\mu \eta$ عוסотєऽ tac $\gamma \rho \alpha \varphi \propto \varsigma$ ). The Sadducees posed as men of superior intelligence and knowledge in opposition to the traditionalists among the Pharisees with their oral law. And yet on this very point they were ignorant of the Scriptures. How much error today is due to this same ignorance among the educated!

Nor the power of God ( $\mu \eta \delta \varepsilon \tau \eta \nu \delta \nu v a \mu \nu \nu$ tov $\theta \varepsilon o v$ ). The two kinds of ignorance generally go together (cf. 1Co 15:34).

Mark 12:25
When they shall rise from the dead (o $\tau \alpha v \varepsilon \kappa ~ v \varepsilon \kappa \rho \omega v ~ a v a \sigma \tau \omega \sigma เ v)$ ). Second aorist active subjunctive with otav (ote plus av). Mt 22:30 has it "in the resurrection," Lu 20:35 "to attain to the resurrection." The Pharisees regarded the future resurrection body as performing marriage functions, as Mohammedans do today. The Pharisees were in error on this point.

The Sadducees made this one of their objections to belief in the resurrection body, revealing thus their own ignorance of the true resurrection body and the future life where marriage functions do not exist.

As angels in heaven ( $\omega \varsigma$ a $\gamma \gamma \varepsilon \lambda$ o $\varepsilon v \tau \omega$ ovpav $\omega$ ). So Mt 22:30. Lu 20:36 has "equal unto the angels" (เбaүүع入o). "Their equality with angels consists in their deliverance from mortality and its consequences" (Swete). The angels are directly created, not procreated.

Mark 12:26
In the place concerning the Bush ( $\varepsilon \pi$ tov $\beta a \tau o v$ ). This technical use of $\varepsilon \pi$ is good Greek, in the matter of, in the passage about, the Bush. Batos is masculine here, feminine in $\operatorname{Lu}$ 20:37. The reference is to Ex 3:3-6 (in the book of Moses, $\varepsilon \nu \tau \eta \beta \iota \beta \lambda \omega$ ).

Mark 12:27
Ye do greatly err ( $\pi \mathrm{o} \lambda \mathrm{v} \pi \lambda \alpha v a \sigma \theta \varepsilon$ ). Only in Mark. Solemn, severe, impressive, but kindly close (Bruce).

Mark 12:28
Heard them questioning together ( $\alpha \kappa о \nu \sigma \alpha \varsigma ~ \alpha v \tau \omega v ~ \sigma v \vee\lceil\eta \tau о \nu \nu \tau \omega v$ ). The victory of Christ over the Sadducees pleased the Pharisees who now had come back with mixed emotions over the new turn of things (Mt 22:34). Lu 20:39 represents one of the scribes as commending Jesus for his skilful reply to the Sadducees. Mark here puts this scribe in a favourable light, "knowing that he had answered them well" ( $\varepsilon \delta \omega \varsigma$ от ка $\lambda \omega \varsigma ~ a \pi \varepsilon \kappa \rho ı \eta \eta$ аuтоьऽ). "Them" here means the Sadducees. But Mt 22:35 says that this lawyer (vонкос) was "tempting" ( $\pi \varepsilon \iota \rho \alpha \zeta \omega v)$ by his question. "A few, among whom was the scribe, were constrained to admire, even if they were willing to criticize, the Rabbi who though not himself a Pharisee, surpassed the Pharisees as a champion of the truth." That is a just picture of this lawyer.

The first of all ( $\pi \rho \omega \tau \eta \pi \alpha \nu \tau \omega v$ ). First in rank and importance. Mt 22:36 has "great" ( $\mu \varepsilon \gamma a \lambda \eta$ ). See discussion there. Probably Jesus spoke in Aramaic. "First" and "great" in Greek do not differ essentially here. Mark quotes De 6:4f. as it stands in the LXX and also Le 19:18 . Mt 22:40 adds the summary: "On these two commandments hangeth ( $\kappa \rho \varepsilon \mu \alpha \tau \alpha)$ the whole law and the prophets."

Mark 12:32
And the scribe said ( $\varepsilon i \pi \varepsilon v \alpha \cup \tau \omega$ o $\gamma \rho \alpha \mu \mu \alpha \tau \varepsilon \cup \varsigma)$. Mark alone gives the reply of the scribe to Jesus which is a mere repetition of what Jesus had said about the first and the second commandments with the additional allusion to 1Sa 15:22 about love as superior to whole burnt offerings.

Well ( $\kappa \alpha \lambda \omega \varsigma)$. Not to be taken with "saidst" ( $\varepsilon \iota \pi \varepsilon \varsigma)$ as the Revised Version has it following Wycliff. Probably ка $\lambda \omega \varsigma$ (well) is exclamatory. "Fine, Teacher. Of a truth ( $\left.\varepsilon \pi^{\prime} a \lambda \eta \theta \varepsilon \iota \alpha \varsigma\right)$ didst thou say."

Mark 12:34

Discreetly (vovve $\chi \omega \varsigma$ ). From vous (intellect) and $\varepsilon \chi \omega$, to have. Using the mind to good effect is what the adverb means. He had his wits about him, as we say. Here only in the N.T. In Aristotle and Polybius. Nouve $\chi o v \tau \omega \varsigma$ would be the more regular form, adverb from a participle.

Not far (ov $\mu \alpha \kappa \rho \alpha v$ ). Adverb, not adjective, feminine accusative, a long way (oסov understood). The critical attitude of the lawyer had melted before the reply of Jesus into genuine enthusiasm that showed him to be near the kingdom of God.

No man after that (ov $\delta \varepsilon ı \varsigma ~ о \cup \kappa \varepsilon \tau)$. Double negative. The debate was closed ( $\varepsilon \tau о \lambda \mu \alpha$, imperfect tense, dared). Jesus was complete victor on every side.

Mark 12:35
How say the scribes ( $\Pi \omega \varsigma \lambda \varepsilon \gamma \sigma v \sigma \iota \nu$ o $\gamma \rho \alpha \mu \mu \alpha \tau \varepsilon \iota \varsigma)$. The opponents of Jesus are silenced, but he answers them and goes on teaching ( $\delta \iota \delta \alpha \sigma \omega v$ ) in the temple as before the attacks began that morning ( 11:27). They no longer dare to question Jesus, but he has one to put to them "while the Pharisees were gathered together" (Mt 22:41). The question is not a conundrum or scriptural puzzle (Gould), but "He contents himself with pointing out a difficulty, in the solution of which lay the key to the whole problem of His person and work" (Swete). The scribes all taught that the Messiah was to be the son of David (Joh 7:41). The people in the Triumphal Entry had acclaimed Jesus as the son of David (Mt 21:9). But the rabbis had overlooked the fact that David in Ps 110:1 called the Messiah his Lord also. The deity and the humanity of the Messiah are both involved in the problem. Mt 22:45 observes that "no one was able to answer him a word."

Mark 12:36
The footstool (vполоסıov). Westcott and Hort read vпокатш (under) after Aleph B D L.

## Mark 12:37

The common people heard him gladly (o $\pi \circ \lambda \cup \varsigma ~ о \chi \lambda о \varsigma ~ \eta \kappa о v \varepsilon \nu ~ a v \tau о v \varepsilon \delta \varepsilon \omega \varsigma)$. Literally, the much multitude (the huge crowd) was listening (imperfect tense) to him gladly. Mark alone has this item. The Sanhedrin had begun the formal attack that morning to destroy the influence of Jesus with the crowds whose hero he now was since the Triumphal Entry. It had been a colossal failure. The crowds were drawn closer to him than before.

Mark 12:38
Beware of the scribes ( $\beta \lambda \varepsilon \pi \varepsilon \tau \varepsilon \alpha \pi 0 \tau \omega \nu \gamma \rho \alpha \mu \mu \alpha \tau \varepsilon \omega \nu$ ). Jesus now turns to the multitudes and to his disciples (Mt 23:1) and warns them against the scribes and the Pharisees while they are still there to hear his denunciation. The scribes were the professional teachers of the current Judaism and were nearly all Pharisees. Mark (Mr 14:38-40) gives a mere summary sketch of this bold and terrific indictment as preserved in Mt 23 in words that fairly blister today. Lu 20:45-47 follows Mark closely. See Mt 8:15 for this same use of $\beta \lambda \varepsilon \pi \varepsilon \tau \varepsilon \alpha \pi 0$ with the ablative. It is usually called a translation-Hebraism, a usage not found with $\beta \lambda \varepsilon \pi \omega$ in
the older Greek. But the papyri give it, a vivid vernacular idiom. "Beware of the Jews" ( $\beta \lambda \varepsilon \pi \varepsilon$ $\sigma \alpha \tau 0 v a \pi 0 ~ \tau \omega v$ Iov $\alpha a 1 \omega v$, Berl. G. U. 1079. A.D. 41). See Robertson, Grammar, p. 577. The pride of the pompous scribes is itemized by Mark:

To walk in long robes ( $\sigma \tau 0 \lambda \alpha ı$ ),
stoles , the dress of dignitaries like kings and priests.
Salutations in the marketplaces ( $\alpha \sigma \pi \alpha \sigma \mu о \cup \varsigma \varepsilon v \tau \alpha ı \varsigma ~ \alpha \gamma о \rho \alpha ı \varsigma)$, where the people could see their dignity recognized.

Mark 12:39
First seats in the synagogues ( $\pi \rho \omega \tau о \kappa \alpha \theta \varepsilon \delta \rho ı \alpha \varsigma)$. As a mark of special piety, seats up in front while now the hypocrites present in church prefer the rear seats.

Chief places at feasts ( $\pi \rho \omega \tau о \kappa \lambda \iota \sigma \iota \Omega \varsigma \varepsilon \nu$ тoıৎ $\delta \varepsilon \iota \pi v o \iota \varsigma)$. Recognizing proper rank and station. Even the disciples fall victims to this desire for precedence at table (Lu 22:24).

Mark 12:40
 nominative. Terrible pictures of civil wrong by graft grabbing the homes of helpless widows. They inveigled widows into giving their homes to the temple and took it for themselves.

For a pretence make long prayers ( $\pi \rho о \varphi \alpha \sigma \varepsilon \mu \alpha \kappa \rho \alpha \pi \rho о \sigma \varepsilon v \chi о \mu \varepsilon v o$ ). Прочабє instrumental case of the same word ( $\pi \rho \circ \varphi \eta \mu)$ from which prophet comes, but here pretext, pretence of extra piety while robbing the widows and pushing themselves to the fore. Some derive it from $\pi \rho о \varphi \alpha \iota v \omega$, to show forth.

Greater ( $\pi \varepsilon \rho \iota \sigma \sigma о \tau \varepsilon \rho \circ v$ ). More abundant condemnation. Some comfort in that at any rate.

Mark 12:41
 is over. The Pharisees, Sadducees, Herodians, scribes, have all slunk away in terror ere the closing words. Mark draws this immortal picture of the weary Christ sitting by the treasury (compound word in the LXX from $\gamma \alpha \zeta \alpha$, Persian word for treasure, and $\varphi \cup \lambda \alpha \kappa \eta$, guard, so safe for gifts to be deposited).

Beheld ( $\varepsilon \theta \varepsilon \omega \rho \varepsilon$ ). Imperfect tense. He was watching
how the multitude cast money ( $\pi \omega \varsigma$ o ox $\lambda$ o $\beta \alpha \lambda \lambda \varepsilon$ ) into the treasury. The rich were casting in ( $\varepsilon \beta \alpha \lambda \lambda o v$, imperfect tense) as he watched.

Mark 12:42
One poor widow ( $\mu \boldsymbol{\alpha} \chi \eta \rho \alpha \pi \tau \omega \chi \eta$ ). Luke has $\pi \varepsilon \nu \iota \chi \rho \alpha$, a poetical late form of $\pi \varepsilon \nu \eta \varsigma$. In the N.T. the $\pi \tau \omega \chi$ os is the pauper rather than the mere peasant, the extreme opposite of the rich ( $\pi \lambda$ 人ovaıo). The money given by most was copper ( $\chi \alpha \lambda \kappa \circ v$ ).

Two mites ( $\delta$ vo $\lambda \varepsilon \pi \tau \alpha$ ). $\Lambda \varepsilon \pi \tau \sigma \rho$ means peeled or stripped and so very thin. Two $\lambda \varepsilon \pi \tau \alpha$ were about two-fifths of a cent.

Farthing (кобраvтєऽ, Latin quadrans, a quarter of an as).

Mark 12:43
Called unto him ( $\pi \rho о \sigma \kappa \alpha \lambda \varepsilon \sigma \alpha \mu \varepsilon v o \varsigma)$ ). Indirect middle voice. The disciples themselves had slipped away from him while the terrific denunciation of the scribes and Pharisees had gone on, puzzled at this turn of affairs.

More than all ( $\pi \lambda \varepsilon \iota \circ v \pi \alpha v \tau \omega v$ ). Ablative of comparison ( $\pi \alpha v \tau \omega v$ ). It may mean, more than all the rich put together.

All that she had ( $\pi \alpha v \tau \alpha$ o $\sigma \alpha \varepsilon \ell \chi \varepsilon v$ ). Imperfect tense.
Cast in ( $\varepsilon \beta \alpha \lambda \varepsilon v$ ). Aorist tense, in sharp contrast.
All her living (odov tov $\beta$ oov autņ). Her
livelihood ( $\beta \iota \rho$ ), not her life ( $\zeta \omega \eta$ ). It is a tragedy to see a stingy saint pose as giving the widow's mite when he could give thousands instead of pennies.

## Mark 13

Mark 13:1
Master, behold, what manner of stones and what manner of buildings ( $\delta \iota \alpha \sigma \kappa \alpha \lambda \varepsilon$, เ $\delta \varepsilon$ лотало $\lambda_{\imath} \theta$ о ка лотала оько $\left.о \boldsymbol{\rho} \alpha\right) . \mathrm{Mt} \mathrm{24:1} \mathrm{and} \mathrm{Lu} 21: 5$ tell of the fact of the comment, but Mark alone gives the precise words. Perhaps Peter himself (Swete) was the one who sought thus by a pleasant platitude to divert the Teacher's attention from the serious topics of recent hours in the temple. It was not a new observation, but the merest commonplace might serve at this crisis. Josephus (Ant. xv. II, 3) speaks of the great size of these stones and the beauty of the buildings. Some of these stones at the southeastern and southwestern angles survive today and measure from twenty to forty feet long and weigh a hundred tons. Jesus had, of course, often observed them.

Mark 13:2
These great buildings ( $\tau \alpha \cup \tau \alpha \varsigma \tau \alpha \varsigma$ оєкобо $\mu \alpha \varsigma$ ). Jesus fully recognizes their greatness and beauty. The more remarkable will be their complete demolition ( $\kappa \alpha \tau \alpha \lambda v \theta \eta$ ),
loosened down. Only the foundation stones remain.

## Mark 13:3

Over against the temple ( $\kappa \alpha \tau \varepsilon v a v \tau ~ \tau o v ~ เ \varepsilon \rho о v) . ~ I n ~ f u l l ~ v i e w ~ o f ~ t h e ~ t e m p l e ~ a b o u t ~ w h i c h ~$ they had been speaking.

Privately ( $\kappa \alpha \tau^{\prime} \iota \delta \iota \alpha \nu$ ). Peter and James and John and Andrew (named only in Mark) had evidently been discussing the strange comment of Jesus as they were coming out of the temple. In their bewilderment they ask Jesus a bit to one side, though probably all the rest drew up as Jesus began to speak this great eschatological discourse.

Mark 13:4
Tell us, when shall these things be? (Eıлоv $\eta \mu \imath v \pi о \tau \varepsilon \tau \alpha \cup \tau \alpha \varepsilon \sigma \tau \alpha!$;). The Revised Version punctuates it as a direct question, but Westcott and Hort as an indirect inquiry. They asked about the
when ( $\pi \sigma \tau \varepsilon$ ) and the
what sign ( $\tau$ $\sigma \eta \mu \varepsilon ו o v$ ). Mt 24:3 includes "the sign of thy coming and the end of the world," showing that these tragic events are brought before Jesus by the disciples. See discussion of the interpretation of this discourse on Mt 24:3. This chapter in Mark is often called "The Little Apocalypse" with the notion that a Jewish apocalypse has been here adapted by Mark and attributed to Jesus. Many of the theories attribute grave error to Jesus or to the Gospels on this subject. The view adopted in the discussion in Matthew is the one suggested here, that Jesus blended in one picture his death, the destruction of Jerusalem within that generation, the second coming and end of the world typified by the destruction of the city. The lines between these topics are not sharply drawn in the report and it is not possible for us to separate the topics clearly. This great discourse is the longest preserved in Mark and
may be due to Peter. Mark may have given it in order "to forewarn and forearm" (Bruce) the readers against the coming catastrophe of the destruction of Jerusalem. Both Matthew (Mt 24 ) and Luke (Lu 21:5-36) follow the general line of Mark 13 though Mt 24:43-25:46 presents new material (parables).

Mark 13:5
Take need that no man lead you astray (B $\lambda \varepsilon \pi \varepsilon \tau \varepsilon \mu \eta \tau \iota \varsigma \nu \mu \alpha \varsigma \pi \lambda \alpha \nu \eta \sigma \eta$ ). Same words in Mt 24:4. Lu 21:8 has it "that ye be not led astray" ( $\mu \eta \pi \lambda \alpha v \eta \theta \eta \tau \varepsilon$ ). This word $\pi \lambda \alpha v \alpha \omega$ (our planet) is a bold one. This warning runs through the whole discussion. It is pertinent today after so many centuries. About the false Christs then and now see on Mt 24:5. It is amazing the success that these charlatans have through the ages in winning the empty-pated to their hare-brained views. Only this morning as I am writing a prominent English psychologist has challenged the world to a radio communication with Mars asserting that he has made frequent trips to Mars and communicated with its alleged inhabitants. And the daily papers put his ebullitions on the front page. For discussion of the details in verses 6-8 see on Mt 24:5-8. All through the ages in spite of the words of Jesus men have sought to apply the picture here drawn to the particular calamity in their time.

## Mark 13:7

Must needs come to pass ( $\delta \varepsilon \gamma \varepsilon v \varepsilon \sigma \theta \alpha$ ). Already there were outbreaks against the Jews in Alexandria, at Seleucia with the slaughter of more than fifty thousand, at Jamnia, and elsewhere. Caligula, Claudius, Nero will threaten war before it finally comes with the destruction of the city and temple by Titus in A.D. 70. Vincent notes that between this prophecy by Jesus in A.D. 30 (or 29) and the destruction of Jerusalem there was an earthquake in Crete (A.D. 46 or 47), at Rome (A.D. 51), at Apamaia in Phrygia (A.D. 60), at Campania (A.D. 63). He notes also four famines during the reign of Claudius A.D. 41-54. One of them was in Judea in A.D. 44 and is alluded to in Ac 11:28. Tacitus (Annals xvi. 10-13) describes the hurricanes and storms in Campania in A.D. 65.

Mark 13:9
But take heed to yourselves (B入єлєtє $\delta \varepsilon \cup \mu \varepsilon \iota \varsigma \varepsilon \alpha \cup \tau 0 v \varsigma)$. Only in Mark, but dominant note of warning all through the discourse. Note $\nu \mu \varepsilon \iota \varsigma$ here, very emphatic.

Councils (ouve $\delta \rho ı \alpha$ ). Same word as the Sanhedrin in Jerusalem. These local councils ( $\sigma u v, \varepsilon \delta \rho \alpha$, sitting together) were modelled after that in Jerusalem.

Shall ye be beaten ( $\delta a \rho \eta \sigma \varepsilon \sigma \theta \varepsilon$ ). Second future passive indicative second person plural. The word $\delta \varepsilon \rho \omega$ means to flay or skin and here has been softened into
beat like our $\tan$ or skin in the vernacular. Aristophanes has it in this colloquial sense as have the papyri in the Koine. Before governors and kings ( $\varepsilon \pi \eta \gamma \varepsilon \mu \circ v \omega v \kappa \alpha \beta \alpha \sigma \iota \lambda \varepsilon \omega v$ ). Gentile rulers as well as before Jewish councils.

Shall stand ( $\sigma \tau \alpha \theta \eta \sigma \varepsilon \sigma \theta \varepsilon)$. First aorist passive indicative second person plural of $\iota \sigma \tau \eta \mu$.
Mark 13:10

Must first be preached ( $\pi \rho \omega \tau \sigma v \delta \varepsilon \kappa \eta \rho v \chi \forall \eta v \alpha$ ). This only in Mark. It is interesting to note that Paul in Col 1:6,23 claims that the gospel has spread all over the world. All this was before the destruction of Jerusalem.

Mark 13:11
Be not anxious beforehand what ye shall speak ( $\mu \eta \pi \rho о \mu \varepsilon \rho \mu \nu \alpha \tau \varepsilon \tau \lambda \alpha \lambda \eta \sigma \eta \tau \varepsilon$ ). Negative with present imperative to make a general prohibition or habit. Jesus is not here referring to preaching, but to defences made before these councils and governors. A typical example is seen in the courage and skill of Peter and John before the Sanhedrin in Acts. The $\operatorname{verb} \mu \varepsilon \rho \iota \mu \nu \alpha \omega$ is from $\mu \varepsilon \rho \iota \zeta \omega(\mu \varepsilon \rho \iota \varsigma)$, to be drawn in opposite directions, to be distracted. See on Mt 6:25. They are not to be stricken with fright beforehand, but to face fearlessly those in high places who are seeking to overthrow the preaching of the gospel. There is no excuse here for the lazy preacher who fails to prepare his sermon out of the mistaken reliance upon the Holy Spirit. They will need and will receive the special help of the Holy Spirit (cf. Joh 14-16 ).

Mark 13:13
But he that endureth to the end (o $\delta \varepsilon v \pi о \mu \varepsilon ı v a \varsigma \varepsilon \iota \varsigma \tau \varepsilon \lambda о \varsigma)$. Note this aorist participle with the future verb. The idea here is true to the etymology of the word, remaining under (v $\tau \circ \mu \varepsilon v \omega$ ) until the end. The divisions in families Jesus had predicted before (Lu 12:52f.; 14:25f. ).

Be saved ( $\sigma \omega \theta \eta \sigma \varepsilon \tau \alpha$ ). Here Jesus means final salvation (effective aorist future passive), not initial salvation.

Mark 13:14
Standing where he ought not ( $\varepsilon \sigma \tau \eta к о \tau \alpha$ олоv ov $\delta \varepsilon$ ). Mt 24:15 has "standing in the holy place" ( $\varepsilon \sigma \tau \circ \varsigma \varepsilon v$ то $\tau о \alpha \gamma \omega)$, neuter and agreeing with $\beta \delta \varepsilon \lambda \nu \gamma \mu \alpha$ (abomination), the very phrase applied in 1Macc. 1:54 to the altar to Zeus erected by Antiochus Epiphanes where the altar to Jehovah was. Mark personifies the abomination as personal (masculine), while Lu 21:20 defines it by reference to the armies (of Rome, as it turned out). So the words of Daniel find a second fulfilment, Rome taking the place of Syria (Swete). See on Mt 24:15 for this phrase and the parenthesis inserted in the words of Jesus ("Let him that readeth understand"). See also on Mt 24:16-25 for discussion of details in Mr 13:14-22 .

Mark 13:16
In the field ( $\varepsilon \iota \varsigma ~ \tau o v a \gamma \rho o v$ ). Here Mt 24:18 has $\varepsilon v \tau \omega \alpha \gamma \rho \omega$, showing identical use of $\varepsilon ı \varsigma$ with accusative and $\varepsilon v$ with the locative.

Mark 13:19
Which God created ( $\eta v \varepsilon \kappa \tau \iota \sigma \varepsilon v$ o $\theta \varepsilon \circ \varsigma)$. Note this amplification to the quotation from Da 12:1.

Mark 13:20

Whom he chose (ouc $\varepsilon \xi \varepsilon \lambda \varepsilon \xi \alpha \tau 0)$. Indirect aorist middle indicative. In Mark alone. Explains the sovereign choice of God in the end by and for himself.

Mark 13:22
That they may lead astray ( $\pi \rho \circ \varsigma \tau 0 \alpha \pi \sigma \pi \lambda \alpha v a เ v$ ). With a view to leading off ( $\pi \rho \circ \varsigma$ and the infinitive). Mt 24:24 has $\omega \sigma \tau \varepsilon \alpha \pi о \pi \lambda \alpha \sigma \theta \alpha$, so as to lead off.

## Mark 13:23

But take ye heed (Нv emphatic position of you ( $v \mu \varepsilon \iota \varsigma)$. Credulity ranks no higher than scepticism. God gave us our wits for self-protection. Christ has warned us beforehand.

Mark 13:24
The sun shall be darkened ( $\mathrm{o} \varepsilon \lambda \iota \varsigma \sigma \kappa о \tau \iota \sigma \eta \sigma \varepsilon \tau \alpha$ ). Future passive indicative. These figures come from the prophets (Isa 13:9f.; Eze 32:7f.; Joe 2:1f.,10f.; Am 8:9; Zep 1:14-16; Zec 12:12 ). One should not forget that prophetic imagery was not always meant to be taken literally, especially apocalyptic symbols. Peter in Ac 2:15-21 applies the prophecy of Joel about the sun and moon to the events on the day of Pentecost. See on Mt 24:29-31 for details of verses 24-27.

Mark 13:25
The stars shall be falling (o $\alpha \sigma \tau \varepsilon \rho \varepsilon \varsigma \varepsilon \sigma o v \tau \alpha \pi \iota \pi \tau 0 v \tau \varepsilon \varsigma)$. Periphrastic future indicative, $\varepsilon \sigma o v \tau \alpha$, future middle indicative and $\pi \iota \pi \tau 0 \nu \tau \varepsilon \varsigma$, present active participle.

Mark 13:27
Shall gather together his elect ( $\varepsilon \pi \iota \sigma v v \alpha \xi \varepsilon \tau o v \varsigma \varepsilon \kappa \lambda \varepsilon \kappa \tau о \cup \varsigma \alpha v \tau o v)$. This is the purpose of God through the ages.

From the uttermost part of the earth to the uttermost part of heaven ( $\alpha \pi^{\prime} \alpha \kappa \rho o v \gamma \eta \varsigma$ $\varepsilon \omega \varsigma$ акроv ov $\alpha$ аvov). The Greek is very brief, "from the tip of earth to the tip of heaven." This precise phrase occurs nowhere else.

Mark 13:28
Coming to pass $(\gamma \iota \nu \circ \mu \varepsilon v \alpha)$. Present middle participle, linear action. See on Mt 24:32-36 for details of verses 28-32 (the Parable of the Fig Tree).

Mark 13:32
Not even the Son (ov $\delta \varepsilon$ o vioc). There is no doubt as to the genuineness of these words here such as exists in Mt 24:36. This disclaimer of knowledge naturally interpreted applies to the second coming, not to the destruction of Jerusalem which had been definitely limited to that generation as it happened in A.D. 70.

Mark 13:34
Commanded also the porter to watch ( $\kappa \alpha \tau \omega \theta \nu \rho \omega \rho \omega \varepsilon \nu \varepsilon \tau \varepsilon \iota \lambda \alpha \tau \circ \iota \alpha \gamma \rho \eta \gamma \circ \rho \eta$ ). The porter or door-keeper ( $\theta v \rho \omega \rho \circ \varsigma$ ), as well as all the rest, to keep a watch (present subjunctive, $\gamma \rho \eta \gamma o \rho \eta)$. This Parable of the Porter is only in Mark. Our ignorance of the time of the

Master's return is an argument not for indifference nor for fanaticism, but for alertness and eager readiness for his coming.

Mark 13:35
The four watches of the night are named here: evening ( $о \psi \varepsilon$ ), midnight ( $\mu \varepsilon \sigma о v \cup \kappa \tau \circ \circ$ ), cock-crowing ( $\alpha \lambda \varepsilon \kappa \tau о \rho о \varphi \omega v / a \varsigma)$, morning ( $\pi \rho \omega)$.

Mark 13:37
Watch ( $\gamma \rho \eta \gamma$ о $\rho \varepsilon \iota \tau$ ). Be on the watch. Present imperative of a verb made on the second perfect, $\varepsilon \gamma \rho \eta \gamma \circ \rho a$, to be awake. Stay awake till the Lord comes.

## Mark 14

Mark 14:1
After two days ( $\mu \varepsilon \tau \alpha \delta v o \eta \mu \varepsilon \rho \alpha \varsigma)$. This was Tuesday evening as we count time (beginning of the Jewish Wednesday). In Mt 26:2 Jesus is reported as naming this same date which would put it our Thursday evening, beginning of the Jewish Friday. The Gospel of John mentions five items that superficially considered seem to contradict this definite date in Mark and Matthew, but which are really in harmony with them. See discussion on Mt 26:17 and my

Harmony of the Gospels , pp. 279 to 284. Mark calls it here the feast of "the passover and the unleavened bread," both names covering the eight days. Sometimes "passover" is applied to only the first day, sometimes to the whole period. No sharp distinction in usage was observed.

Sought ( $\varepsilon \zeta \eta$ qouv). Imperfect tense. They were still at it, though prevented so far.
Mark 14:2
Not during the feast ( $\mathrm{M} \eta \varepsilon v \tau \eta \varepsilon o \rho \tau \eta$ ). They had first planned to kill him at the feast (Joh 11:57), but the Triumphal Entry and great Tuesday debate (this very morning) in the temple had made them decide to wait till after the feast was over. It was plain that Jesus had too large and powerful a following. See on Mt 26:47.

Mark 14:3
 meaning reclining (leaning down or up or back) and in the genitive absolute. See on Mt 26:6 in proof that this is a different incident from that recorded in Lu 7:36-50. See on Mt 26:6-13 for discussion of details.
 in Joh 12:3. The adjective is common enough in the older Greek and appears in the papyri also in the sense of genuine, unadulterated, and that is probably the idea here. The word spikenard is from the Vulgate nardi spicati, probably from the Old Latin nardi pistici.

Brake ( $\sigma \cup v \tau \rho \prime \psi o v \sigma \alpha$ ). Only in Mark. She probably broke the narrow neck of the vase holding the ointment.

Mark 14:5
Above three hundred pence ( $\varepsilon \pi \alpha v \omega \delta \eta v \alpha \rho \iota \omega v \tau \rho ı \alpha \kappa о \sigma \omega \omega v$ ). Matthew has "for much" while Joh 12:5 has "for three hundred pence." The use of "far above" may be a detail from Peter's memory of Judas' objection whose name in this connection is preserved in Joh 12:4

And they murmured against her ( $\kappa \alpha \varepsilon v \varepsilon \beta \rho \mu \mu \omega v \tau o \alpha v \tau \eta$ ). Imperfect tense of this striking word used of the snorting of horses and seen already in Mr 1:43; 11:38. It occurs
in the LXX in the sense of anger as here (Da 11:30). Judas made the complaint against Mary of Bethany, but all the apostles joined in the chorus of criticism of the wasteful extravagance.

## Mark 14:8

She hath done what she could (o $\varepsilon \sigma \chi \varepsilon v \varepsilon \pi o \not \eta \sigma \varepsilon v$ ). This alone in Mark. Two aorists. Literally, "what she had she did." Mary could not comprehend the Lord's death, but she at least showed her sympathy with him and some understanding of the coming tragedy, a thing that not one of her critics had done.

She hath anointed my body aforehand for the burying ( $\pi \rho о \varepsilon \lambda \alpha \beta \varepsilon \nu \mu \nu \rho \iota \sigma \alpha$ то $\sigma \omega \mu \alpha$ $\mu \circ v$ عıऽ $\tau 0 v \varepsilon v \tau \alpha \varphi \iota(\alpha \sigma \mu \circ v)$. Literally, "she took beforehand to anoint my body for the burial." She anticipated the event. This is Christ's justification of her noble deed. Mt 26:12 also speaks of the burial preparation by Mary, using the verb $\varepsilon v \tau \alpha \varphi \iota \alpha \sigma \alpha$.

Mark 14:9
For a memorial of her ( $\varepsilon ા \varsigma ~ \mu \nu \eta \mu$ oovvov avtnc). So in Mt 26:13. There are many mausoleums that crumble to decay. But this monument to Jesus fills the whole world still with its fragrance. What a hint there is here for those who wish to leave permanent memorials.

Mark 14:10
He that was one of the twelve ( $о \varepsilon \iota \varsigma \tau \omega v \delta \omega \delta \varepsilon \kappa \alpha)$. Note the article here, "the one of the twelve," Matthew has only $\varepsilon \iota$, "one." Some have held that Mark here calls Judas the primate among the twelve. Rather he means to call attention to the idea that he was the one of the twelve who did this deed.

Mark 14:11
And they, when they heard it, were glad (o $\delta \varepsilon$ aкоvбаvtєৎ $\varepsilon \chi \alpha \rho \eta \sigma \alpha v$ ). No doubt the rabbis looked on the treachery of Judas as a veritable dispensation of Providence amply justifying their plots against Jesus.

Conveniently ( $\varepsilon v \kappa \alpha \iota \rho \varsigma)$. This was the whole point of the offer of Judas. He claimed that he knew enough of the habits of Jesus to enable them to catch him "in the absence of the multitude" (Lu 22:6 ) without waiting for the passover to be over, when the crowds would leave. For discussion of the motives of Judas, see on Mt 26:15. Mark merely notes the promise of "money" while Matthew mentions "thirty pieces of silver" (Zec 11:12) , the price of a slave.

Mark 14:12
When they sacrificed the passover (oтє to $\pi \alpha \sigma \chi \alpha \varepsilon \theta v o v$ ). Imperfect indicative, customary practice. The paschal lamb (note $\pi \alpha \sigma \chi \alpha$ ) was slain at 6 P.M., beginning of the fifteenth of the month (Ex 12:6), but the preparations were made beforehand on the fourteenth (Thursday). See on Mt 26:17 for discussion of "eat the passover."

## Mark 14:13

Two of his disciples ( $\delta v o \tau \omega v \mu \alpha \theta \eta \tau \omega v$ av $\tau o v$ ). Lu 22:8 names them, Peter and John.

Bearing a pitcher of water ( $\kappa \varepsilon \rho \alpha \mu \circ v v \delta \alpha \tau \circ \varsigma \beta \alpha \sigma \tau \alpha \zeta \omega v)$. This item also in Luke, but not in Matthew.

Mark 14:14
The goodman of the house ( $\tau \omega$ o七кo$\delta \varepsilon \sigma \pi \sigma \tau \eta$ ). A non-classical word, but in late papyri. It means master ( $\delta \varepsilon \sigma \pi \sigma \tau$ ) of the house, householder. The usual Greek has two separate words, oוкоv $\delta \varepsilon \sigma \pi о \tau \eta \varsigma$ (master of the house).

My guest-chamber ( $\tau о ~ \kappa \alpha \tau \alpha \lambda \nu \mu \alpha \mu о v$ ). In LXX, papyri, and modern Greek for lodgingplace (inn, as in Lu 2:7 or guest-chamber as here). It was used for $\kappa \alpha v$ or $\chi \alpha \rho \alpha \varsigma \alpha v \sigma \varepsilon \rho \alpha$.

I shall eat $(\varphi \alpha \gamma \omega)$. Futuristic aorist subjunctive with o $\pi о v$.
Mark 14:15
And he ( $\kappa \alpha \alpha \cup \tau о \varsigma) . ~ E m p h a t i c, ~ a n d ~ h e ~ h i m s e l f . ~$
A large upper room ( $\alpha v \alpha \gamma \alpha \iota o v \mu \varepsilon \gamma \alpha$ ). Anything above ground $(\gamma \eta)$, and particularly upstairs as here. Here and in Lu 22:12. Example in Xenophon. Jesus wishes to observe this last feast with his disciples alone, not with others as was often done. Evidently this friend of Jesus was a man who would understand.

Furnished ( $\varepsilon \sigma \tau \rho \omega \mu \varepsilon v o v$ ). Perfect passive participle of $\sigma \tau \rho \omega \nu \nu v \mu$, state of readiness. "Strewed with carpets, and with couches properly spread" (Vincent).

Mark 14:17
He cometh ( $\varepsilon \rho \chi \varepsilon \tau \alpha)$. Dramatic historical present. It is assumed here that Jesus is observing the passover meal at the regular time and hour, at 6 P.M. at the beginning of the fifteenth (evening of our Thursday, beginning of Jewish Friday). Mark and Matthew note the time as evening and state it as the regular passover meal.

Mark 14:18
As they sat ( $\alpha v \alpha \kappa \varepsilon \mu \varepsilon v \omega \nu \alpha \nu \tau \omega v$ ). Reclined, of course. It is a pity that these verbs are not translated properly in English. Even Leonardo da Vinci in his immortal painting of the Last Supper has Jesus and his apostles sitting, not reclining. Probably he took an artist's license for effect.

Even he that eateth with me (o $\left.\varepsilon \sigma \theta \iota \omega \nu \mu \varepsilon \tau^{\prime} \varepsilon \mu o v\right)$. See Ps 4:9. To this day the Arabs will not violate hospitality by mistreating one who breaks bread with them in the tent.

Mark 14:20
One of the twelve ( $\varepsilon \iota \varsigma \tau \omega \nu \delta \omega \delta \varepsilon \kappa \alpha$ ). It is as bad as that. The sign that Jesus gave,
the one dipping in the dish with me (o $\varepsilon \mu \beta \alpha \pi \tau о \mu \varepsilon v o \varsigma \mu \varepsilon \tau^{\prime} \varepsilon \mu \circ v \varepsilon \iota \varsigma \tau о \tau \rho v \beta \lambda \iota o v$ ), escaped the notice of all. Jesus gave the sop to Judas who understood perfectly that Jesus knew his purpose. See on Mt 26:21-24 for further details.

Mark 14:23
A cup ( $\pi 0 \tau \eta \rho \iota o v$ ). Probably the ordinary wine of the country mixed with two-thirds water, though the word for wine (oıvoৎ) is not used here in the Gospels, but "the fruit of the vine" ( $\varepsilon \kappa \tau \operatorname{\tau ov} \gamma \varepsilon \vee \eta \mu \alpha \tau о \varsigma \tau \eta \varsigma \alpha \mu \pi \varepsilon \lambda о v)$. See Mt 26:26-29 for discussion of important details.

Mark and Matthew give substantially the same account of the institution of the Supper by Jesus, while Lu 22:17-20 agrees closely with 1Co 11:23-26 where Paul claims to have obtained his account by direct revelation from the Lord Jesus.

Mark 14:26
Sung a hymn ( $\nu \mu \nu \eta \sigma \alpha v \tau \varepsilon \varsigma)$. See Mt 26:30 for discussion.

## Mark 14:29

Yet will not I ( $\alpha \lambda \lambda^{\prime}$ ouk $\varepsilon \gamma \omega$ ). Mark records here Peter's boast of loyalty even though all desert him. All the Gospels tell it. See discussion on Mt 26:33 .

Mark 14:30
Twice ( $\delta \iota \varsigma)$. This detail only in Mark. One crowing is always the signal for more. The Fayum papyrus agrees with Mark in having $\delta$ ıc. The cock-crowing marks the third watch of the night ( Mr 13:35).

## Mark 14:31

Exceeding vehemently ( $\varepsilon \kappa \pi \varepsilon \rho \iota \sigma \sigma \omega \varsigma)$. This strong compounded adverb only in Mark and probably preserves Peter's own statement of the remark. About the boast of Peter see on Mt 26:35 .

Mark 14:32
Which was named (ov to ovo $\alpha$ ). Literally, "whose name was." On Gethsemane see on Mt 26:36 .

While I pray ( $\varepsilon \omega \varsigma \pi \rho 0 \sigma \varepsilon v \xi \omega \mu \alpha)$. Aorist subjunctive with $\varepsilon \omega \varsigma$ really with purpose involved, a common idiom. Matthew adds "go yonder" ( $\alpha \pi \varepsilon \lambda \theta \omega v \varepsilon \kappa \varepsilon$ ).

Mark 14:33
Greatly amazed and sore troubled ( $\varepsilon \kappa Ө \alpha \mu \beta \varepsilon เ \sigma \theta \alpha$ ка $\alpha \delta \eta \mu о v \varepsilon เ v)$ ). Mt 26:37 has "sorrowful and sore troubled." See on Matt. about $\alpha \delta \eta \mu \circ v \varepsilon เ v$. Mark alone uses $\varepsilon \xi \theta \alpha \mu \beta \varepsilon เ \sigma \theta \alpha$ (here and in 9:15). There is a papyrus example given by Moulton and Milligan's Vocabulary. The verb $\theta \alpha \mu \beta \varepsilon \omega$ occurs in Mr 10:32 for the amazement of the disciples at the look of Jesus as he went toward Jerusalem. Now Jesus himself feels amazement as he directly faces the struggle in the Garden of Gethsemane. He wins the victory over himself in Gethsemane and then he can endure the loss, despising the shame. For the moment he is rather amazed and homesick for heaven. "Long as He had foreseen the Passion, when it came clearly into view its terror exceeded His anticipations" (Swete). "He learned from what he suffered," (Heb 5:8) and this new experience enriched the human soul of Jesus.

Mark 14:35
Fell on the ground ( $\varepsilon \pi ル \pi \tau \varepsilon v \varepsilon \pi \tau \eta \varsigma \gamma \eta \varsigma)$. Descriptive imperfect. See him falling. Matthew has the aorist $\varepsilon \pi \varepsilon \sigma \varepsilon v$.

Prayed ( $\pi \rho о \sigma \eta \cup \chi \varepsilon \tau 0)$. Imperfect, prayed repeatedly or inchoative, began to pray. Either makes good sense.

The hour ( $\eta \omega \rho \alpha)$. Jesus had long looked forward to this "hour" and had often mentioned it (Joh 7:30; 8:20; 12:23,27; 13:1). See again in Mr 14:41. Now he dreads it, surely a human trait that all can understand.

Mark 14:36
Abba, Father (A $\beta \beta \alpha$ o $\pi \alpha \tau \eta \rho$ ). Both Aramaic and Greek and the article with each. This is not a case of translation, but the use of both terms as is $\mathrm{Ga} 4: 6$, a probable memory of Paul's childhood prayers. About "the cup" see on Mt 26:39. It is not possible to take the language of Jesus as fear that he might die before he came to the Cross. He was heard (Heb 5:7f. ) and helped to submit to the Father's will as he does instantly.

Not what I will (ov $\tau \varepsilon \gamma \omega \theta \varepsilon \lambda \omega$ ). Matthew has "as" ( $\omega \varsigma$ ). We see the humanity of Jesus in its fulness both in the Temptations and in Gethsemane, but without sin each time. And this was the severest of all the temptations, to draw back from the Cross. The victory over self brought surrender to the Father's will.

Mark 14:37
Simon, sleepest thou? ( $\Sigma \mu \omega \nu, \kappa \alpha \theta \varepsilon v \delta \varepsilon ı \sigma ;)$. The old name, not the new name, Peter. Already his boasted loyalty was failing in the hour of crisis. Jesus fully knows the weakness of human flesh (see on Mt 26:41).

Mark 14:40
Very heavy ( $\kappa \alpha \tau \alpha \beta \alpha \rho v v o \mu \varepsilon v o$ ). Perfective use of $\kappa \alpha \tau \alpha-$ with the participle. Matthew has the simple verb. Mark's word is only here in the N.T. and is rare in Greek writers. Mark has the vivid present passive participle, while Matthew has the perfect passive $\beta \varepsilon \beta \alpha \rho \eta \mu \varepsilon v o$.

And they wist not what to answer him (ка оик $\eta \iota \delta \varepsilon ı \sigma \alpha \nu \tau \alpha \pi о \kappa \rho ı \theta \omega \sigma \iota v \alpha \cup \tau \omega)$. Deliberative subjunctive retained in the indirect question. Alone in Mark and reminds one of the like embarrassment of these same three disciples on the Mount of Transfiguration (Mr 9:6 ). On both occasions weakness of the flesh prevented their real sympathy with Jesus in his highest and deepest experiences. "Both their shame and their drowsiness would make them dumb" (Gould).

Mark 14:41
It is enough ( $\alpha \pi \varepsilon \chi \varepsilon$ ). Alone in Mark. This impersonal use is rare and has puzzled expositors no little. The papyri (Deissmann's Light from the Ancient East and Moulton and Milligan's Vocabulary) furnish many examples of it as a receipt for payment in full. See also Mt 6:2ff.; Lu 6:24; Php 4:18 for the notion of paying in full. It is used here by Jesus in an ironical sense, probably meaning that there was no need of further reproof of the disciples for their failure to watch with him. "This is no time for a lengthened exposure of the faults of friends; the enemy is at the gate" (Swete). See further on Mt 26:45 for the approach of Judas.

Mark 14:43

And the scribes ( $\kappa \alpha \tau \omega \nu \gamma \rho \alpha \mu \mu \alpha \tau \varepsilon \omega v$ ). Mark adds this item while Joh 18:3 mentions "Pharisees." It was evidently a committee of the Sanhedrin for Judas had made his bargain with the Sanhedrin (Mr 14:1; Mt 26:3; Lu 22:2 ). See discussion of the betrayal and arrest on Mt 26:47-56 for details.

Mark 14:44
Token ( $\sigma v \sigma \sigma \eta \mu o v$ ). A common word in the ancient Greek for a concerted signal according to agreement. It is here only in the New Testament. Mt 26:48 has $\sigma \eta \mu \varepsilon \iota o v$, sign. The signal was the kiss by Judas, a contemptible desecration of a friendly salutation.

And lead him away safely ( $\kappa \alpha \alpha \pi \alpha \gamma \varepsilon \tau \varepsilon \alpha \sigma \varphi \alpha \lambda \omega \varsigma)$. Only in Mark. Judas wished no slip to occur. Mark and Matthew do not tell of the falling back upon the ground when Jesus challenged the crowd with Judas. It is given by John alone (Joh 18:4-9 ).

Mark 14:47
A certain one ( $\varepsilon \iota \varsigma \tau \iota \varsigma)$. Mark does not tell that it was Peter. Only Joh 18:10 does that after Peter's death. He really tried to kill the man, Malchus by name, as John again tells (Joh 18:10 ). Mark does not give the rebuke to Peter by Jesus in Mt 26:52f. .

Mark 14:48
Against a robber ( $\varepsilon \pi \lambda \eta \iota \sigma \tau \eta v)$. Highway robbers like Barabbas were common and were often regarded as heroes. Jesus will be crucified between two robbers in the very place that Barabbas would have occupied.

Mark 14:51
A certain young man (veavıซкoऽ $\tau \iota \varsigma)$. This incident alone in Mark. It is usually supposed that Mark himself, son of Mary (Ac 12:12) in whose house they probably had observed the passover meal, had followed Jesus and the apostles to the Garden. It is a lifelike touch quite in keeping with such a situation. Here after the arrest he was following with Jesus ( $\sigma \cup \nu \eta \kappa о \lambda o v \theta \varepsilon \alpha \cup \tau \omega$, imperfect tense). Note the vivid dramatic present крatovoıv (they seize him).

Mark 14:52
Linen cloth ( $\sigma \iota \delta \delta o v \alpha$ ). An old Greek word of unknown origin. It was fine linen cloth used often for wrapping the dead (Mt 27:59; Mr 15:46; Lu 23:53). In this instance it could have been a fine sheet or even a shirt.

Mark 14:54
Peter had followed him afar off (Но Пєт $\rho о \varsigma \alpha \pi о \mu \alpha \kappa \rho о \theta \varepsilon v \eta \kappa о \lambda о v \theta \eta \sigma \varepsilon v \alpha v \tau \omega$ ). Here Mark uses the constative aorist ( $\eta \kappa 0 \lambda o v \theta \eta \sigma \varepsilon v$ ) where Mt 26:58, and Lu 22:54 have the picturesque imperfect ( $\eta \kappa \circ \lambda o u \theta \varepsilon$ ), was following. Possibly Mark did not care to dwell on the picture of Peter furtively following at a distance, not bold enough to take an open stand with Christ as the Beloved Disciple did, and yet unable to remain away with the other disciples.

Was sitting with ( $\eta \nu \sigma \cup v \kappa \alpha \theta \eta \mu \varepsilon v o \varsigma)$. Periphrastic imperfect middle, picturing Peter making himself at home with the officers (v $\tau \eta \rho \varepsilon \tau \omega v$ ), under rowers, literally, then servants of any kind. Joh 18:25 describes Peter as standing ( $\varepsilon \sigma \tau \omega \varsigma)$. Probably he did now one, now the other, in his restless weary mood.

Warming himself in the light ( $\theta \varepsilon \rho \mu \alpha \downarrow$ vo $\mu \varepsilon v o \varsigma ~ \pi \rho \omega \varsigma \tau \tau \varphi \omega \varsigma)$. Direct middle. Fire has light as well as heat and it shone in Peter's face. He was not hidden as much as he supposed he was.

Mark 14:56
Their witness agreed not together (ı $\sigma \alpha \alpha \mu \alpha \rho \tau \cup \rho ı \alpha ~ o v \kappa \eta \sigma \alpha v$ ). Literally, the testimonies were not equal. They did not correspond with each other on essential points.

Many were bearing false witness ( $\varepsilon \psi \varepsilon v \delta o \mu \alpha \rho \tau v \rho o u v$, imperfect, repeated action)
against him. No two witnesses bore joint testimony to justify a capital sentence according to the law (De 19:15 ). Note imperfects in these verses (55-57) to indicate repeated failures.

## Mark 14:57

Bare false witness ( $\varepsilon \psi \varepsilon v \delta o \mu \alpha \rho \tau v \rho o u v)$ ). In desperation some attempted once more (conative imperfect).

Mark 14:58
Made with hands ( $\chi \varepsilon ь \rho о \pi о п \eta \tau о v) . ~ I n ~ M a r k ~ a l o n e . ~ A n ~ o l d ~ G r e e k ~ w o r d . ~ T h e ~ n e g a t i v e ~$ form ax\&ıротопŋ $\tau$ ov here occurs elsewhere only in 2Co 5:1; Col 2:11. In Heb 9:11 the negative $o v$ is used with the positive form. It is possible that a real $\lambda$ oprov of Jesus underlies the perversion of it here. Mark and Matthew do not quote the witnesses precisely alike. Perhaps they quoted Jesus differently and therein is shown part of the disagreement, for Mark adds verse 59 (not in Matthew). "And not even so did their witness agree together," repeating the point of verse 57. Swete observes that Jesus, as a matter of fact, did do what he is quoted as saying in Mark: "He said what the event has proved to be true; His death destroyed the old order, and His resurrection created the new." But these witnesses did not mean that by what they said. The only saying of Jesus at all like this preserved to us is that in Joh 2:19, when he referred not to the temple in Jerusalem, but to the temple of his body, though no one understood it at the time.

Mark 14:60
Stood up in the midst ( $\alpha v a \sigma \tau \alpha \varsigma \varepsilon ı \varsigma \mu \varepsilon \sigma o v$ ). Second aorist active participle. For greater solemnity he arose to make up by bluster the lack of evidence. The high priest stepped out into the midst as if to attack Jesus by vehement questions. See on Mt 26:59-68 for details here.

Mark 14:61

And answered nothing (ка оик алєкрıvaтo ov $\delta \varepsilon v$ ). Mark adds the negative statement to the positive "kept silent" ( $\varepsilon \sigma \omega \omega \pi \alpha)$, imperfect, also in Matthew. Mark does not give the solemn oath in Matthew under which Jesus had to answer. See on Matthew.

Mark 14:62
I am ( $\varepsilon \gamma \delta \varepsilon \mu)$. Matthew has it, "Thou hast said," which is the equivalent of the affirmative. But Mark's statement is definite beyond controversy. See on Mt 26:64-68 for the claims of Jesus and the conduct of Caiaphas.

Mark 14:64
They all (o $\delta \varepsilon \pi \alpha \nu \tau \varepsilon \varsigma$ ). This would mean that Joseph of Arimathea was not present since he did not consent to the death of Jesus ( $\mathrm{Lu} 23: 51$ ). Nicodemus was apparently absent also, probably not invited because of previous sympathy with Jesus (Joh 7:50 ). But all who were present voted for the death of Jesus.

Mark 14:65
Cover his face ( $\pi \varepsilon \rho เ \kappa \alpha \lambda \nu \pi \tau \varepsilon เ v ~ a v \tau o v ~ \tau o ~ \pi \rho o \sigma \omega \pi о v)$ ). Put a veil around his face. Not in
 All three Gospels give the jeering demand of the Sanhedrin: "Prophesy" ( $\pi \rho о \varphi \eta \tau \varepsilon v \sigma \sigma v$ ), meaning, as Matthew and Luke add, thereby telling who struck him while he was blindfolded. Mark adds "the officers" (same as in verse 54) of the Sanhedrin, Roman lictors or sergeants-at-who had arrested Jesus in Gethsemane and who still held Jesus (o бטvexovtes autov, Lu 22:63 ). Mt 26:67 alludes to their treatment of Jesus without clearly indicating who they were.

With blows of their hands ( $\rho \alpha \pi \iota \sigma \mu \alpha \sigma \iota v$ ). The verb $\rho \alpha \pi \iota \zeta \omega$ in Mt 26:67 originally meant to smite with a rod. In late writers it comes to mean to slap the face with the palm of the hands. The same thing is true of the substantive $\rho a \pi \iota \sigma \mu \alpha$ used here. A papyrus of the sixth century A.D. uses it in the sense of a scar on the face as the result of a blow. It is in the instrumental case here. "They caught him with blows," Swete suggests for the unusual $\varepsilon \lambda \alpha \beta o v$ in this sense. "With rods" is, of course, possible as the lictors carried rods. At any rate it was a gross indignity.

Mark 14:66
Beneath in the court ( $\kappa \alpha \tau \omega \varepsilon v \tau \eta \alpha \cup \lambda \eta$ ). This implies that Jesus was upstairs when the Sanhedrin met. Mt 22:69 has it
without in the court ( $\varepsilon \xi \omega \varepsilon \nu \tau \eta \alpha \cup \lambda \eta$ ). Both are true. The open court was outside of the rooms and also below.

## Mark 14:67

Warminghimself ( $\theta \varepsilon \rho \mu a ı v o \mu \varepsilon v o v)$. Mark mentions this fact about Peter twice ( $14: 54,67$ ) as does John (Joh 18:18,25 ). He was twice beside the fire. It is quite difficult to relate clearly the three denials as told in the Four Gospels. Each time several may have joined in, both maids and men.

The Nazarene ( $\operatorname{tov} \mathrm{Na} \zeta \alpha \rho \eta v o v$ ). In Mt 26:69 it is "the Galilean." A number were probably speaking, one saying one thing, another another.

Mark 14:68
I neither know nor understand (oviє oı $\delta \alpha$ ov $\varepsilon \varepsilon \pi \tau \sigma \tau \alpha \mu \alpha$ ). This denial is fuller in Mark, briefest in John.

What thou sayest ( $\sigma \cup \tau \lambda \varepsilon \gamma \varepsilon \iota \varsigma)$. Can be understood as a direct question. Note position of
thou ( $\sigma v$ ), proleptical.
Into the porch ( $\varepsilon \iota \varsigma ~ \tau o ~ \pi \rho o a u \lambda ı o v$ ). Only here in the New Testament. Plato uses it of a prelude on a flute. It occurs also in the plural for preparations the day before the wedding. Here it means the vestibule to the court. Mt 26:71 has $\pi v \lambda \omega v a$, a common word for gate or front porch.

And the cock crew ( $\kappa \alpha \alpha \lambda \varepsilon \kappa \tau \omega \rho \varepsilon \varphi \omega \nu \eta \sigma \varepsilon v$ ). Omitted by Aleph B L Sinaitic Syriac. It is genuine in verse 72 where "the second time" ( $\varepsilon \kappa \delta \varepsilon \cup \tau \varepsilon \rho \circ 0$ ) occurs also. It is possible that because of verse 72 it crept into verse 68 . Mark alone alludes to the cock crowing twice, originally ( $\mathrm{Mr} 14: 30$ ), and twice in verse 72 , besides verse 68 which is hardly genuine.

Mark 14:69
To them that stood by ( $\tau \circ \iota \varsigma \pi \alpha \rho \varepsilon \sigma \tau \omega \sigma เ v$ ). This talk about Peter was overheard by him. "This fellow (outoc) is one of them." So in verse 70 the talk is directly to Peter as in Mt 26:73 , but in $\mathrm{Lu} 22: 59$ it is about him. Soon the bystanders (o $\pi \alpha \rho \varepsilon \sigma \tau \omega \tau \varepsilon \varsigma$ ) will join in the accusation to Peter (verse 70; Mt 26:73) , with the specially pungent question in Joh 18:26 which was the climax. See on Mt 26:69-75 for discussion of similar details.

## Mark 14:71

Curse ( $\alpha v \alpha \theta \varepsilon \mu \alpha \tau \iota \zeta \varepsilon เ v)$. Our word anathema ( $\alpha v \alpha, \theta \varepsilon \mu \alpha$, an offering, then something devoted or a curse). Finally the two meanings were distinguished by avaOn $\mu \alpha$ for offering and $\alpha v a \theta \varepsilon \mu \alpha$ for curse. Deissmann has found examples at Megara of $\alpha v a \theta \varepsilon \mu \alpha$ in the sense of curse. Hence the distinction observed in the N.T. was already in the Koine. Mt 26:74 has $\kappa \alpha \tau \alpha \theta \varepsilon \mu \alpha \tau \iota \zeta \varepsilon \iota v$, which is a $\alpha \pi \alpha \xi \lambda \varepsilon \gamma \circ \mu \varepsilon v o v$ in the N.T., though common in the LXX. This word has the notion of calling down curses on one's self if the thing is not true.

Mark 14:72
Called to mind ( $\alpha v \varepsilon \mu v \eta \sigma \theta \eta$ ). First aorist passive indicative. Mt 26:75 has the uncompounded verb $\varepsilon \mu \nu \eta \sigma \theta \eta$ while Lu 22:61 has another compound $v \pi \varepsilon \mu \nu \eta \sigma \theta \eta$, was reminded.

When he thought thereon ( $\varepsilon \pi \iota \beta \alpha \lambda \omega v$ ). Second aorist active participle of $\varepsilon \pi \iota \beta \alpha \lambda \lambda \omega$. It is used absolutely here, though there is a reference to to $\rho \eta \mu \alpha$ above, the word of Jesus, and the idiom involves tov vouv so that the meaning is to put the mind upon something. In Lu 15:12 there is another absolute use with a different sense. Moulton (Prolegomena, p. 131) quotes a Ptolemaic papyrus Tb P 50 where $\varepsilon \pi \iota \beta \alpha \lambda \omega v$ probably means "set to," put his mind on.

Wept ( $\varepsilon \kappa \lambda \alpha \iota \varepsilon v$ ). Inchoative imperfect, began to weep. Mt 26:75 has the ingressive aorist $\varepsilon \kappa \lambda \alpha v \sigma \varepsilon v$, burst into tears.

## Mark 15

Mark 15:1
In the morning $(\pi \rho \omega)$. The ratification meeting after day. See on Mt 26:1-5 for details.
Held a consultation ( $\sigma \nu \mu \beta \circ \cup \lambda \iota \circ v \pi o \imath \eta \sigma \alpha \nu \tau \varepsilon \varsigma)$. So text of Westcott and Hort (Vulgate consilium facientes), though they give eтонабаvтєऽ in the margin. The late and rare word $\sigma \nu \mu \beta o u \lambda \iota o v$ is like the Latin consilium. If eтощабаvteऽ is the correct text, the idea would be rather to prepare a concerted plan of action (Gould). But their action was illegal on the night before and they felt the need of this ratification after dawn which is described in Lu 22:66-71, who does not give the illegal night trial.
 brought before Annas who sent him on bound to Caiaphas (Joh 18:24) and now he is bound again as he is sent to Pilate (Mr 15:1; Mt 27:2). It is implied that he was unbound while before Annas and then before Caiaphas and the Sanhedrin.

Mark 15:2
Art thou the King of the Jews? ( $\Sigma v \varepsilon$ o $\beta a \sigma \iota \lambda \varepsilon \cup \varsigma \tau \omega v$ Iov $\delta \alpha \iota \omega v$;). This is the only one of the charges made by the Sanhedrin to Pilate (Lu 23:2) that he notices. He does not believe this one to be true, but he has to pay attention to it or be liable to charges himself of passing over a man accused of rivalry and revolution against Caesar. Joh 18:28-32 gives the interview with Jesus that convinces Pilate that he is a harmless religious fanatic. See on Mt 26:11 .

Thou sayest ( $\sigma \cup \lambda \varepsilon \gamma \varepsilon \varsigma)$ ). An affirmation, though in Joh 18:34-37 there is a second and fuller interview between Pilate and Jesus. "Here, as in the trial before the Sanhedrin, this is the one question that Jesus answers. It is the only question on which his own testimony is important and necessary" (Gould). The Jews were out on the pavement or sidewalk outside the palace while Pilate came out to them from above on the balcony (Joh 18:28f. ) and had his interviews with Jesus on the inside, calling Jesus thither (Joh 18:33).

Mark 15:3
Accused him of many things ( $\kappa \alpha \tau \eta \gamma \quad \rho o u v$ av $о \boldsymbol{\tau} \pi \boldsymbol{\pi} \lambda \lambda \alpha$ ). Imperfect tense, repeated accusations besides those already made. They let loose their venom against Jesus. One of the common verbs for speaking against in court ( $\kappa \alpha \tau \alpha$ and $\alpha \gamma о \rho \varepsilon v \omega$ ). It is used with the genitive of the person and the accusative of the thing.

Mark 15:5
Marvelled ( $\theta \alpha 0 \mu \alpha \zeta \varepsilon ı v)$. Pilate was sure of the innocence of Jesus and saw through their envy ( $\mathrm{Mr} 15: 10$ ), but he was hoping that Jesus would answer these charges to relieve him of the burden. He marvelled also at the self-control of Jesus.

## Mark 15:6

Used to release ( $\alpha \pi \varepsilon \lambda \nu \varepsilon v$ ). Imperfect tense of customary action where Mt 27:15 has the verb $\varepsilon \epsilon \omega \theta \varepsilon$ (was accustomed to).

They asked of him ( $\pi \alpha \rho \eta \iota \tau o u v \tau o)$. Imperfect middle, expressing their habit also.
Mark 15:7
Bound with them that had made insurrection ( $\mu \varepsilon \tau \alpha \tau \omega v \sigma \tau \alpha \sigma \omega \alpha \sigma \tau \omega v \delta \varepsilon \delta \varepsilon \mu \varepsilon v o \varsigma)$. A desperate criminal, leader in the insurrection, sedition ( $\varepsilon v \tau \eta \sigma \tau \alpha \sigma \varepsilon$ ), or revolution against Rome, the very thing that the Jews up at Bethsaida Julias had wanted Jesus to lead (Joh 6:15 ). Barabbas was the leader of these rioters and was bound with them.

Had committed murder ( $\varphi$ оvov $\pi \varepsilon \pi о ו \eta \kappa \varepsilon เ \sigma \alpha v)$ ). Past perfect indicative without augment. Murder usually goes with such rioters and the priests and people actually chose a murderer in preference to Jesus.

Mark 15:8
As he was wont to do unto them ( $\kappa \alpha \theta \omega \varsigma \varepsilon \pi о \iota \varepsilon \alpha \cup \tau о \iota \varsigma)$. Imperfect of customary action again and dative case.

Mark 15:9
The King of the Jews ( $\tau 0 v \beta \alpha \sigma \iota \lambda \varepsilon \alpha \tau \omega v$ Iov $\delta \alpha \omega \omega v$ ). That phrase from this charge sharpened the contrast between Jesus and Barabbas which is bluntly put in Mt 27:17 "Barabbas or Jesus which is called Christ." See discussion there.

Mark 15:10
He perceived ( $\varepsilon \gamma เ \nu \omega \sigma \kappa \varepsilon v)$. Imperfect tense descriptive of Pilate's growing apprehension from their conduct which increased his intuitive impression at the start. It was gradually dawning on him. Both Mark and Matthew give "envy" ( $\varphi \theta$ ovov) as the primary motive of the Sanhedrin. Pilate probably had heard of the popularity of Jesus by reason of the triumphal entry and the temple teaching.

Had delivered ( $\pi \alpha \rho \alpha \delta \varepsilon \delta \omega \kappa \varepsilon I \sigma \alpha v)$. Past perfect indicative without augment where Mt 27:18 has the first aorist (kappa aorist) indicative $\pi \alpha \rho \varepsilon \delta \omega \kappa \alpha \nu$, not preserving the distinction made by Mark. The aorist is never used "as" a past perfect.

Mark 15:11
Stirred up (aveб\&iбav).
Shook up like an earthquake ( $\sigma \varepsilon 1 \sigma \mu \circ \varsigma)$. Mt 27:20 has a weaker word, "persuaded" ( $\varepsilon \pi \varepsilon เ \sigma \alpha v)$. Effective aorist indicative. The priests and scribes had amazing success. If one wonders why the crowd was fickle, he may recall that this was not yet the same people who followed him in triumphal entry and in the temple. That was the plan of Judas to get the thing over before those Galilean sympathizers waked up. "It was a case of regulars against an irregular, of priests against prophet" (Gould). "But Barabbas, as described by Mark, represented a popular passion, which was stronger than any sympathy they might have for so unworldly a character as Jesus--the passion for political liberty" (Bruce). "What unprincipled characters they were! They accuse Jesus to Pilate of political ambition, and they recommend Barabbas to the people for the same reason" (Bruce). The Sanhedrin would say to the people
that Jesus had already abdicated his kingly claims while to Pilate they went on accusing him of treason to Caesar.

Rather ( $m \boxtimes l l o n$ ). Rather than Jesus. It was a gambler's choice.
Mark 15:12
Whom ye call the King of the Jews (ov $\lambda \varepsilon \gamma \varepsilon \tau \varepsilon$ tov $\beta \alpha \sigma \iota \lambda \varepsilon \alpha \tau \omega \nu$ Iov $\alpha a \omega \omega v$ ). Pilate rubs it in on the Jews (cf. verse 9). The "then" (ovv) means since you have chosen Barabbas instead of Jesus.

Mark 15:13
Crucify him ( $\Sigma \tau \alpha v \rho \omega \sigma o v \alpha \cup \tau o v)$. Lu 23:21 repeats the verb. Mt 27:22 has it, "Let him be crucified." There was a chorus and a hubbub of confused voices all demanding crucifixion for Christ. Some of the voices beyond a doubt had joined in the hallelujahs to the Son of David in the triumphal entry. See on Mt 27:23 for discussion of Mr 15:14.

Mark 15:15
To content the multitude ( $\tau \omega$ ох $\lambda \omega$ тo וкаvov $\pi о ו \eta \sigma \alpha$ ). A Latin idiom (satisfacere alicui), to do what is sufficient to remove one's ground of complaint. This same phrase occurs in Polybius, Appian, Diogenes Laertes, and in late papyri. Pilate was afraid of this crowd now completely under the control of the Sanhedrin. He knew what they would tell Caesar about him. See on Mt 27:26 for discussion of the scourging.

Mark 15:16
The Praetorium ( $\pi \rho \alpha \iota \tau \omega \rho \iota o v)$. In Mt 27:27 this same word is translated "palace." That is its meaning here also, the palace in which the Roman provincial governor resided. In Php 1:13 it means the Praetorian Guard in Rome. Mark mentions here "the court" ( $\tau \eta \varsigma \alpha \cup \lambda \eta \varsigma$ ) inside of the palace into which the people passed from the street through the vestibule. See further on Matthew about the "band."

Mark 15:17
Purple ( $\pi о \rho \varphi \cup \rho \alpha v) . ~ M t ~ 27: 28 ~ h a s ~ " s c a r l e t ~ r o b e " ~ w h i c h ~ s e e ~ f o r ~ d i s c u s s i o n ~ a s ~ w e l l ~ a s ~ f o r ~$ the crown of thorns.

Mark 15:19
Worshipped him ( $\pi \rho о \sigma \varepsilon \kappa v v o v v)$. In mockery. Imperfect tense as are $\varepsilon \tau v \pi \tau \circ v$ (smote) and $\varepsilon v \varepsilon \pi \tau v o v$ (did spit upon). Repeated indignities.

Mark 15:20
They lead him out ( $\varepsilon \xi \alpha \gamma$ оибıv avtov). Vivid historical present after imperfects in verse 19.

## Mark 15:21

They compel ( $\alpha \gamma \gamma \alpha \rho \varepsilon v o v \sigma ı v$ ). Dramatic present indicative again where Mt 27:32 has the aorist. For this Persian word see on Mt 5:41; 27:32 .

Coming out of the country ( $\left.\varepsilon \rho \chi \circ \mu \varepsilon v o v a \pi^{\prime} \alpha \gamma \rho o v\right)$. Hence Simon met the procession. Mark adds that he was "the father of Alexander and Rufus." Paul mentions a Rufus in Ro

16:13, but it was a common name and proves nothing. See on Mt 27:32 for discussion of cross-bearing by criminals. Luke adds "after Jesus" (o $\pi\llcorner\sigma \varepsilon v \tau$ tov I $\eta \sigma o v$ ). But Jesus bore his own cross till he was relieved of it, and he walked in front of his own cross for the rest of the way.

Mark 15:22
They bring him ( $\varphi \varepsilon \rho \circ$ ouøıv autov). Historical present again. See on Mt 27:33f. for discussion of Golgotha.

Mark 15:23
They offered him ( $\varepsilon \delta \delta \delta o u v \alpha \nu \tau \omega)$. Imperfect tense where Matthew has the aorist $\varepsilon \delta \omega \kappa \alpha v$.
Mingled with myrrh ( $\varepsilon \sigma \mu v \rho v \iota \sigma \mu \varepsilon v o v)$. Perfect passive participle. The verb means flavoured with myrrh, myrrhed wine. It is not inconsistent with Mt 27:34 "mingled with gall," which see.

But he received it not (o $\sigma \delta$ ouk $\varepsilon \lambda \alpha \beta \varepsilon v$ ). Note the demonstrative o $\varsigma$ with $\delta \varepsilon$. Matthew has it that Jesus was not willing to take. Mark's statement is that he refused it.

Mark 15:24
What each should take ( $\tau \iota \varsigma \tau \alpha \rho \eta$ ). Only in Mark. Note double interrogative, Who What? The verb $\alpha \rho \eta$ is first aorist active deliberative subjunctive retained in the indirect question. The details in Mr 15:24-32 are followed closely by Mt 27:35-44. See there for discussion of details.

## Mark 15:25

The third hour ( $\omega \rho \alpha \tau \rho \iota \tau)$ ). This is Jewish time and would be nine A.M. The trial before Pilate was the sixth hour Roman time (Joh 19:14), six A.M.

Mark 15:26
The superscription ( $\eta \varepsilon \pi \downarrow \gamma \rho \alpha \varphi \eta$ ). The writing upon the top of the cross (our word epigraph). Lu 23:38 has this same word, but Mt 27:37 has "accusation" (aıtıav). See Matthew for discussion. Joh 19:19 has "title" ( $\tau \iota \tau \lambda 0 v$ ).

Mark 15:32
Now come down ( $\kappa \alpha \tau \alpha \beta \alpha \tau \omega v v v$ ). Now that he is nailed to the cross.
That we may see and believe ( $\imath \alpha \alpha \_\omega \mu \varepsilon v \kappa \alpha \pi \iota \sigma \tau \varepsilon v \sigma \omega \mu \varepsilon v$ ). Aorist subjunctive of purpose with iva. They use almost the very language of Jesus in their ridicule, words that they had heard him use in his appeals to men to see and believe.

Reproached him ( $\omega v \varepsilon \varepsilon \delta_{1} \zeta$ ov autov). Imperfect tense. They did it several times. Mark and Matthew both fail to give the story of the robber who turned to Christ on the Cross as told in Lu 23:39-43.

Mark 15:33
The sixth hour ( $\omega \rho \alpha \varsigma \varepsilon \kappa \tau \eta \varsigma$ ). That is, noon (Jewish time), as the third hour was nine A.M. (Mr 15:25 ). See on Mt 27:45 for discussion. Given also by Lu 23:44. Mark gives the Aramaic transliteration as does B in Mt 27:45, which see for discussion.

Forsaken ( $\varepsilon \nmid \kappa \alpha \tau \varepsilon \lambda ı \pi \varepsilon \varsigma)$. Some MSS. give $\omega v \varepsilon I \delta I \sigma \alpha \varsigma$ (reproached). We are not able to enter into the fulness of the desolation felt by Jesus at this moment as the Father regarded him as $\sin$ (2Co 5:21). This desolation was the deepest suffering. He did not cease to be the Son of God. That would be impossible.

Mark 15:35
He calleth Elijah (E $\lambda \varepsilon \iota \alpha \nu \varphi \omega \nu \varepsilon$ ). They misunderstood the $E \lambda \omega$ or $E \lambda \varepsilon$ (my God) for Elijah.

Mark 15:36
To take him down ( $\kappa \alpha \theta \varepsilon \lambda \varepsilon \iota v \alpha v \tau o v)$. Mt 27:49 has "to save him" ( $\sigma \omega \sigma \omega v$ ), which see for discussion.

Mark 15:37
Gave up the ghost $(\varepsilon \xi \varepsilon \pi v \varepsilon v \sigma \varepsilon v)$. Literally, breathed out. See "yielded up his spirit" in Mt 27:50 for discussion for details. Mark uses this word $\varepsilon \xi \varepsilon \pi \nu \varepsilon v \sigma \varepsilon \nu$ again in verse 39 .

Mark 15:39
The centurion (o кعv $\tau \nu \rho \omega \omega v$ ). A Latin word (centurio) used also in verse 44 and here only in the N.T.

Which stood by over against him (o $\pi \alpha \rho \varepsilon \sigma \tau \eta \kappa \omega \varsigma \varepsilon \xi \varepsilon v \alpha v \tau \iota \alpha \varsigma \alpha v \tau 0 v)$. This description alone in Mark, picturing the centurion "watching Jesus" (Mt 27:54).

So (ovtwc). With the darkness and the earthquake. See on Mt 27:54 for discussion of "the Son of God," more probably "a Son of God."

Mark 15:40
And Salome ( $\kappa \alpha \Sigma \alpha \lambda \omega \mu \eta$ ). Apparently the "mother of the sons of Zebedee" (Mt 27:56 ). Only in Mark.

Mark 15:41
Followed him and ministered unto him ( $\eta \kappa о \lambda о v \theta$ оиv ка $\delta ı \eta \kappa о v o u v \alpha \cup \tau \omega$ ). Two imperfects describing the long Galilean ministry of these three women and many other women in Galilee ( $\mathrm{Lu} 8: 1-3$ ) who came up with him ( $\alpha \sigma v v \alpha v \alpha \beta \alpha \sigma \alpha \alpha v \tau \omega$ ) to Jerusalem. This summary description in Mark is paralleled in Mt 27:55f. and Lu 23:49. These faithful women were last at the Cross as they stood afar and saw the dreadful end to all their hopes.

Mark 15:42
The preparation ( $\pi \alpha \rho \alpha \sigma \kappa \varepsilon \cup \eta)$. Mark explains the term as meaning "the day before the sabbath" ( $\pi \rho o \sigma \alpha \beta \beta \alpha \tau o v$ ), that is our Friday, which began at sunset. See discussion on Mt 27:57. The Jews had already taken steps to get the bodies removed (Joh 19:31).

## Mark 15:43

A councillor of honourable estate $(\varepsilon v \sigma \chi \eta \mu \omega \nu \beta o v \lambda \varepsilon v \tau \eta \varsigma)$. A senator or member of the Sanhedrin of high standing, rich (Mt 27:57).

Looking for the Kingdom of God ( $\eta \nu \pi \rho \circ \sigma \delta \varepsilon \chi \circ \mu \varepsilon v \circ \varsigma \tau \eta \nu \beta a \sigma \iota \lambda \varepsilon ı \alpha \nu \tau o v \theta \varepsilon o v$ ). Periphrastic imperfect. Also Lu 23:51. The very verb used by Luke of Simeon and Anna (Lu

2:25,38 ). Mt 27:57 calls him "Jesus' disciple" while Joh 19:38 adds "secretly for fear of the Jews." He had evidently taken no public stand for Jesus before now.

Boldly ( $\tau 0 \lambda \mu \eta \sigma a \varsigma)$. Aorist (ingressive) active participle, becoming bold. It is the glory of Joseph and Nicodemus, secret disciples of Jesus, that they took a bold stand when the rest were in terror and dismay. That is love psychology, paradoxical as it may seem.

Mark 15:44
If he were already dead ( $\varepsilon \eta \delta \eta \tau \varepsilon \theta v \eta \kappa \varepsilon v$ ). Perfect active indicative with $\varepsilon$ after a verb of wondering, a classical idiom, a kind of indirect question just as we say "I wonder if." Usually death by crucifixion was lingering. This item is only in Mark.

Whether he had been any while dead ( $\varepsilon \pi \alpha \lambda \alpha \alpha \pi \varepsilon \theta a v \varepsilon v)$. B D read $\eta \delta \eta$ (already) again here instead of $\pi \alpha \lambda \alpha$ (a long time). Mark does not tell the request of the Jews to Pilate that the legs of the three might be broken (Joh 19:31-37 ). Pilate wanted to make sure that Jesus was actually dead by official report.

Mark 15:45
Granted the corpse ( $\varepsilon \delta \omega \rho \eta \sigma \alpha \tau 0$ to $\pi \tau \omega \mu \alpha$ ). This official information was necessary before the burial. As a matter of fact Pilate was probably glad to turn the body over to Joseph else the body would go to the potter's field. This is the only instance when $\pi \tau \omega \mu \alpha$ (cadaver, corpse) is applied to the body ( $\sigma \omega \mu \alpha$ ) of Jesus, the term used in Mt 27:59; Lu 23:53; Joh 19:40 ).

## Mark 15:46

Wound ( $\varepsilon v \varepsilon ı \lambda \eta \sigma \varepsilon v$ ). This word is only here in the N.T. As $\varepsilon v \tau u \lambda เ \sigma \sigma \omega$ is only in Mt 27:59; Lu 23:53; Joh 20:7. Both verbs occur in the papyri, Plutarch, etc. They both mean to wrap, wind, roll in. The body of Jesus was wound in the linen cloth bought by Joseph and the hundred pounds of spices brought by Nicodemus (Joh 19:39) for burying were placed in the folds of the linen and the linen was bound around the body by strips of cloth (Joh 19:40). The time was short before the sabbath began and these two reverently laid the body of the Master in Joseph's new tomb, hewn out of a rock. The perfect passive participle ( $\lambda \varepsilon \lambda \alpha \tau о \mu \eta \mu \varepsilon v o v$ ) is from $\lambda \alpha \tau о \mu \circ \varsigma$, a stonecutter ( $\lambda \omega \varsigma$, stone, $\tau \varepsilon \mu \nu \omega$, to cut). For further details see on Mt 27:57-60. Lu 23:53 and Joh 19:41 also tell of the new tomb of Joseph. Some modern scholars think that this very tomb has been identified in Gordon's Calvary north of the city.

Against the door ( $\varepsilon \pi \tau \eta v \theta v \rho a v$ ). Matthew has the dative $\tau \eta \theta v \rho \alpha$ without $\varepsilon \pi$ and adds the adjective "great" ( $\mu \varepsilon \gamma \alpha v$ ).

Mark 15:47
Beheld ( $\varepsilon \theta \varepsilon \omega \rho o u v)$. Imperfect tense picturing the two Marys "sitting over against the sepulchre" (Mt 27:61) and watching in silence as the shadows fell upon all their hopes and dreams. Apparently these two remained after the other women who had been beholding from afar the melancholy end (Mr 15:40) had left and "were watching the actions of Joseph
and Nicodemus" (Swete). Probably also they saw the body of Jesus carried and hence they knew where it was laid and saw that it remained there ( $\tau \varepsilon \theta \varepsilon \iota \tau \alpha$, perfect passive indicative, state of completion). "It is evident that they constituted themselves a party of observation" (Gould).

## Mark 16

Mark 16:1
 sabbath having come in between, and now over. For this sense of the verb (common from Demosthenes on) see Ac 25:13; 27:9. It was therefore after sunset.

Bought spices ( $\eta \gamma o \rho \alpha \sigma \alpha \nu \alpha \rho \omega \mu \alpha \tau \alpha$ ). As Nicodemus did on the day of the burial (Joh 19:40 ). Gould denies that the Jews were familiar with the embalming process of Egypt, but at any rate it was to be a reverential anointing (iva $\alpha \lambda \varepsilon \tau \psi \omega \sigma \tau v$ ) of the body of Jesus with spices. They could buy them after sundown. Salome in the group again as in Mr 15:40. See on Mt 28:1 for discussion of "late on the sabbath day" and the visit of the women to the tomb before sundown. They had returned from the tomb after the watching late Friday afternoon and had prepared spices ( $\mathrm{Lu} 23: 56$ ). Now they secured a fresh supply.

Mark 16:2
When the sun was risen ( $\alpha v \alpha \tau \varepsilon ı \lambda \alpha \tau \circ \varsigma$ tov $\eta \lambda \iota \circ v$ ). Genitive absolute, aorist participle, though some manuscripts read $\alpha v a t \varepsilon \lambda \lambda$ ovtoc, present participle. Lu 24:1 has it "at early dawn" (o $\rho \theta \rho o u ~ \beta \alpha \theta \varepsilon o \varsigma)$ and Joh 20:1 "while it was yet dark." It was some two miles from Bethany to the tomb. Mark himself gives both notes of time, "very early" ( $\lambda_{\iota} \alpha v \pi \rho \omega$ ), "when the sun was risen." Probably they started while it was still dark and the sun was coming up when they arrived at the tomb. All three mention that it was on the first day of the week, our Sunday morning when the women arrive. The body of Jesus was buried late on Friday before the sabbath (our Saturday) which began at sunset. This is made clear as a bell by Lu 23:54 "and the sabbath drew on." The women rested on the sabbath (Luke 23:56 ). This visit of the women was in the early morning of our Sunday, the first day of the week. Some people are greatly disturbed over the fact that Jesus did not remain in the grave full seventy-two hours. But he repeatedly said that he would rise on the third day and that is precisely what happened. He was buried on Friday afternoon. He was risen on Sunday morning. If he had really remained in the tomb full three days and then had risen after that, it would have been on the fourth day, not on the third day. The occasional phrase "after three days" is merely a vernacular idiom common in all languages and not meant to be exact and precise like "on the third day." We can readily understand "after three days" in the sense of "on the third day." It is impossible to understand "on the third day" to be "on the fourth day." See my Harmony of the Gospels, pp. 289-91.

Mark 16:3
Who shall roll us away the stone? (Тıৎ $\alpha \pi о к \nu \lambda_{\llcorner\sigma \varepsilon ~} \eta \mu \nu \tau$ тоv $\lambda_{\imath} \theta o v ;$ ). Alone in Mark. The opposite of $\pi \rho о \sigma к \nu \lambda \iota \omega$ in 15:46. In verse 4 rolled back (avєкєки入ıбта, perfect passive indicative) occurs also. Both verbs occur in Koine writers and in the papyri. Clearly the
women have no hope of the resurrection of Jesus for they were raising the problem ( $\varepsilon \lambda \varepsilon \gamma \circ \mathrm{v}$, imperfect) as they walked along.

Mark 16:4
Looking up they see ( $\alpha v \alpha \beta \lambda \varepsilon \psi \alpha \sigma \alpha \theta \varepsilon \omega \rho o v \sigma \tau v)$. With downcast eyes and heavy hearts (Bruce) they had been walking up the hill. Mark has his frequent vivid dramatic present "behold." Their problem is solved for the stone lies rolled back before their very eyes. Lu 24:2 has the usual aorist "found."

For ( $\gamma \alpha \rho$ ). Mark explains by the size of the stone this sudden and surprising sight right before their eyes.

Mark 16:5
Entering into the tomb ( $\varepsilon \sigma \sigma \varepsilon \lambda$ Өovoa $\varepsilon \iota \varsigma ~ \tau o ~ \mu \nu \eta \mu \varepsilon เ o v)$. Told also by Lu 24:3, though not by Matthew.

A young man (veaviokov). An angel in Mt 28:5, two men in Lu 24 . These and like variations in details show the independence of the narrative and strengthen the evidence for the general fact of the resurrection. The angel sat upon the stone (Mt 28:2), probably at first. Mark here speaks of the young man
sitting on the right side ( $\kappa \alpha \theta \eta \mu \varepsilon v o v \varepsilon v$ тоıৎ $\delta \varepsilon \xi$ ૬oı) inside the tomb. Luke has the two men standing by them on the inside (Luke 24:4). Possibly different aspects and stages of the incident.

Arrayed in a white robe ( $\pi \varepsilon \rho(\beta \varepsilon \beta \lambda \eta \mu \varepsilon v o v \sigma \tau o \lambda \eta \nu \lambda \varepsilon \cup \kappa \eta \nu)$. Perfect passive participle with the accusative case of the thing retained (verb of clothing). Lu 24:4 has "in dazzling apparel."

They were amazed $(\varepsilon \xi \varepsilon \theta \alpha \mu \beta \eta \theta \eta \sigma \alpha v)$. They were utterly ( $\varepsilon \xi$ in composition) amazed. Lu 24:5 has it "affrighted." Mt 28:3f. tells more of the raiment white as snow which made the watchers quake and become as dead men. But this was before the arrival of the women. Mark, like Matthew and Luke, does not mention the sudden departure of Mary Magdalene to tell Peter and John of the grave robbery as she supposed (Joh 20:1-10).

Mark 16:6
Be not amazed ( $\mu \eta \varepsilon \kappa \theta \alpha \mu \beta \varepsilon \iota \theta \varepsilon$ ). The angel noted their amazement (verse 5) and urges the cessation of it using this very word.

The Nazarene ( $\tau 0 v$ Na $\alpha^{\prime} \rho \eta \sim o v$ ). Only in Mark, to identify "Jesus" to the women.
The crucified one ( $\tau 0 v \varepsilon \sigma \tau \alpha \cup \rho \omega \mu \varepsilon v o v$ ). This also in Mt 28:5. This description of his shame has become his crown of glory, for Paul (Gal 6:14 ), and for all who look to the Crucified and Risen Christ as Saviour and Lord. He is risen ( $\eta \gamma \varepsilon \rho \theta \eta)$. First aorist passive indicative, the simple fact. In 1Co 15:4 Paul uses the perfect passive indicative $\varepsilon \gamma \eta \gamma \varepsilon \rho \tau \alpha$ to emphasize the permanent state that Jesus remains risen.

Behold the place (เסع о тотоৎ). Here $\delta \delta \varepsilon$ is used as an interjection with no effect on the case (nominative). In Mt 28:6 $1 \delta \varepsilon \tau \varepsilon$ is the verb with the accusative. See Robertson, Grammar, p. 302.

## Mark 16:7

And Peter ( $\kappa \alpha \tau \omega \Pi \varepsilon \tau \rho \omega$ ). Only in Mark, showing that Peter remembered gratefully this special message from the Risen Christ. Later in the day Jesus will appear also to Peter, an event that changed doubt to certainty with the apostles ( Lu 24:34; 1Co 15:5). See on Mt 28:7 for discussion of promised meeting in Galilee.

Mark 16:8
Had come upon them ( $\varepsilon ı \chi \varepsilon v \alpha \cup \tau \alpha \varsigma)$. Imperfect tense, more exactly,
held them, was holding them fast .
Trembling and astonishment ( $\tau \rho о \mu о \varsigma ~ к \alpha ~ \varepsilon к \sigma \tau \alpha \sigma \iota \varsigma, ~ t r e m b l i n g ~ a n d ~ e c s t a s y), ~ M a r k ~ h a s ~$ it, while Mt 28:8 has "with fear and great joy" which see for discussion. Clearly and naturally their emotions were mixed.

They said nothing to any one (ou $\delta \varepsilon v$ ou $\delta \varepsilon v \varepsilon \varepsilon \pi \alpha v$ ). This excitement was too great for ordinary conversation. Mt 28:8 notes that they "ran to bring his disciples word." Hushed to silence their feet had wings as they flew on.

For they were afraid ( $\varepsilon \varphi \rho \beta$ ouvto $\gamma \alpha \rho$ ). Imperfect tense. The continued fear explains their continued silence. At this point Aleph and B, the two oldest and best Greek manuscripts of the New Testament, stop with this verse. Three Armenian MSS. also end here. Some documents (cursive 274 and Old Latin k) have a shorter ending than the usual long one. The great mass of the documents have the long ending seen in the English versions. Some have both the long and the short endings, like L, Psi, 0112, 099, 579, two Bohairic MSS; the Harklean Syriac (long one in the text, short one in the Greek margin). One Armenian MS. (at Edschmiadzin) gives the long ending and attributes it to Ariston (possibly the Aristion of Papias). W (the Washington Codex) has an additional verse in the long ending. So the facts are very complicated, but argue strongly against the genuineness of verses 9-20 of Mark 16. There is little in these verses not in Mt 28 . It is difficult to believe that Mark ended his Gospel with verse 8 unless he was interrupted. A leaf or column may have been torn off at the end of the papyrus roll. The loss of the ending was treated in various ways. Some documents left it alone. Some added one ending, some another, some added both. A full discussion of the facts is found in the last chapter of my Studies in Mark's Gospel and also in my Introduction to the Textual Criticism of the New Testament, pp. 214-16.

Mark 16:9
When he had risen early on the first day of the week ( $\alpha v \alpha \sigma \tau \alpha \varsigma ~ \pi \rho \omega \pi \rho \omega \tau \eta \quad \sigma \alpha \beta \beta \alpha \tau \sigma v$ ). It is probable that this note of time goes with "risen" (avactac), though it makes good sense with "appeared" ( $\varepsilon \varphi \alpha v \eta)$. Jesus is not mentioned by name here, though he is clearly the one
meant. Mark uses $\mu \alpha \alpha$ in verse 2, but $\pi \rho \omega \tau \eta$ in 14:12 and the plural $\sigma \alpha \beta \beta \alpha \tau \omega v$ in verse 2, though the singular here.

First ( $\pi \rho \omega \tau \sigma v$ ). Definite statement that Jesus
appeared ( $\varepsilon \varphi \alpha \vee \eta$ ) to Mary Magdalene first of all. The verb $\varepsilon \varphi \alpha \vee \eta$ (second aorist passive of $\varphi \alpha \iota v \omega$ ) is here alone of the Risen Christ (cf. E $\lambda \varepsilon เ \alpha \varsigma \varepsilon \varphi \alpha \vee \eta, \mathrm{Lu} 9: 8$ ), the usual verb being $\omega \varphi \theta \eta$ (Lu 24:34; 1Co 15:5ff. ).

From whom ( $\pi \alpha \rho^{\prime} \eta \varsigma$ ). Only instance of $\pi \alpha \rho \alpha$ with the casting out of demons, $\varepsilon \kappa$ being usual ( $1: 25,26 ; 5: 8 ; 7: 26,29 ; 9: 25$ ). Ек $\beta \varepsilon \beta \lambda \eta \kappa \varepsilon$ is past perfect indicative without augment. This description of Mary Magdalene is like that in Lu 8:2 and seems strange in Mark at this point, described as a new character here, though mentioned by Mark three times just before (15:40,47; 16:1). The appearance to Mary Magdalene is given in full by Joh 20:11-18 .

Mark 16:10
She ( $\varepsilon \kappa \varepsilon เ \nu \eta)$. Only instance of this pronoun (=ı $\lambda \lambda \alpha$ ) absolutely in Mark, though a good Greek idiom. (See Joh 19:35.) See also verses 11,20 .

Went ( $\pi \circ \rho \varepsilon \cup \theta \varepsilon เ \sigma \alpha$ ). First aorist passive participle. Common word for going, but in Mark so far only in 9:30 in the uncompounded form. Here also in verses 12,15.

Them that had been with him (тоı $\mu \varepsilon \tau^{\prime}$ avtov $\left.\gamma \varepsilon v o \mu \varepsilon v o ı \varsigma\right)$. This phrase for the disciples occurs here alone in Mark and the other Gospels if the disciples ( $\mu \alpha \theta \eta \tau \alpha$ ) are meant. All these items suggest another hand than Mark for this closing portion.

As they mourned and wept ( $\pi \varepsilon v \theta$ ovoıv $\kappa \alpha \kappa \lambda \alpha \iota v \sigma \iota)$ ). Present active participles in dative plural agreeing with toıs ... $\gamma$ ₹vousvoıs and describing the pathos of the disciples in their utter bereavement and woe.

Mark 16:11
Disbelieved ( $\eta \pi \iota \sigma \tau \eta \sigma \alpha v$ ). This verb is common in the ancient Greek, but rare in the N.T. and here again verse 16 and nowhere else in Mark. The usual N.T. word is $\alpha \pi \varepsilon \theta \varepsilon \varepsilon \omega$. Lu 24:11 uses this verb ( $\eta$ mıбтouv) of the disbelief of the report of Mary Magdalene and the other women. The verb $\varepsilon \theta \varepsilon \alpha \theta \eta$ (from $\theta \varepsilon \alpha \omega \mu \alpha$ ) occurs only here and in verse 14 in Mark.

Mark 16:12
After these things ( $\mu \varepsilon \tau \alpha \tau \alpha \cup \tau \alpha)$. Only here in Mark. Luke tells us that it was on the same day (Lu 24:13).

In another form ( $\varepsilon v \varepsilon \tau \varepsilon \rho \alpha \mu о \rho \varphi \eta$ ). It was not a $\mu \varepsilon \tau \alpha \mu о \rho \varphi \omega \sigma ı \varsigma$ or transfiguration like that described in 9:2. Luke explains that their eyes were holden so that they could not recognize Jesus (Lu 24:16). This matchless story appears in full in Lu 24:13-32 .

Mark 16:13
Neither believed they them (ou $\varepsilon \varepsilon \varepsilon \kappa \varepsilon เ v o \iota \varsigma ~ \varepsilon \pi เ \sigma \tau \varepsilon v \sigma \alpha v)$. The men fared no better than the women. But Luke's report of the two on the way to Emmaus is to the effect that they met a hearty welcome by them in Jerusalem (Lu 24:33-35). This shows the independence of the two narratives on this point. There was probably an element who still discredited all
the resurrection stories as was true on the mountain in Galilee later when "some doubted" (Mt 28:17).

Mark 16:14
To the eleven themselves (avтоьৎ тоья $\varepsilon v \delta \varepsilon \kappa \alpha$ ). Both terms, eleven and twelve (Joh 20:24), occur after the death of Judas. There were others present on this first Sunday evening according to Lu 24:33 .

Afterward (vбт\& $\rho \circ v$ ) is here alone in Mark, though common in Matthew.
Upbraided ( $\omega v \varepsilon \iota \delta \iota \sigma \varepsilon v$ ). They were guilty of unbelief ( $\alpha \pi \iota \sigma \tau \iota \alpha v$ ) and hardness of heart ( $\sigma \kappa \lambda \eta \rho о к \alpha \rho \delta \iota \alpha v$ ). Doubt is not necessarily a mark of intellectual superiority. One must steer between credulity and doubt. That problem is a vital one today in all educated circles. Some of the highest men of science today are devout believers in the Risen Christ. Luke explains how the disciples were upset by the sudden appearance of Christ and were unable to believe the evidence of their own senses (Lu 24:38-43).

Mark 16:15
To the whole creation ( $\pi \alpha \sigma \eta \tau \eta \kappa \tau \iota \sigma \varepsilon$ ). This commission in Mark is probably another report of the missionary Magna Charta in Mt 28:16-20 spoken on the mountain in Galilee. One commission has already been given by Christ (Joh 20:21-23). The third appears in Lu 24:44-49; Ac 1:3-8 .

## Mark 16:16

And is baptized ( $\kappa \alpha \beta \alpha \pi \tau \iota \sigma \theta \varepsilon \iota \varsigma)$. The omission of
baptized with "disbelieveth" would seem to show that Jesus does not make baptism essential to salvation. Condemnation rests on disbelief, not on baptism. So salvation rests on belief. Baptism is merely the picture of the new life not the means of securing it. So serious a sacramental doctrine would need stronger support anyhow than this disputed portion of Mark.

Mark 16:17
They shall speak with new tongues ( $\gamma \lambda \omega \sigma \sigma \alpha \iota \varsigma ~ \lambda \alpha \lambda \eta \sigma o v \sigma \iota v[\kappa \alpha ı \alpha a \sigma])$. Westcott and Hort put kaivalc (new) in the margin. Casting out demons we have seen in the ministry of Jesus. Speaking with tongues comes in the apostolic era (Ac 2:3f.; 10:46; 19:6; 1Co 12:28; 14 ).

## Mark 16:18

 10:19 and Paul was unharmed by the serpent in Malta (Ac 28:3f. ).

If they drink any deadly thing ( $\left.\kappa^{\prime} \alpha v \theta \alpha v a \sigma \mu \circ \rho \tau \pi \tau \omega \sigma v\right)$ ). This is the only N.T. instance
 considers these verses in Mark "a great lapse from the high level of Matthew's version of the farewell words of Jesus" and holds that "taking up venomous serpents and drinking deadly poison seem to introduce us into the twilight of apocryphal story." The great doubt concern-
ing the genuineness of these verses (fairly conclusive proof against them in my opinion) renders it unwise to take these verses as the foundation for doctrine or practice unless supported by other and genuine portions of the N.T.

Mark 16:19
Was received up into heaven ( $\alpha v \varepsilon \lambda \eta \mu \pi \theta \eta \varepsilon \iota \varsigma$ тov oupavov). First aorist passive indicative. Luke gives the fact of the Ascension twice in Gospel (Lu 24:50f. ) and Ac 1:9-11 . The Ascension in Mark took place after Jesus spoke to the disciples, not in Galilee ( 16:15-18), nor on the first or second Sunday evening in Jerusalem. We should not know when it took place nor where but for Luke who locates it on Olivet ( $\mathrm{Lu} 24: 50$ ) at the close of the forty days (Ac 1:3) and so after the return from Galilee (Mt 28:16).

Sat down at the right hand of God ( $\varepsilon \kappa \alpha \theta เ \sigma \varepsilon v \varepsilon \kappa ~ \delta \varepsilon \xi \iota \omega v \tau o v \theta \varepsilon \sigma v)$. Swete notes that the author "passes beyond the field of history into that of theology," an early and most cherished belief (Ac 7:55f.; Ro 8:34; Eph 1:20; Col 3:1; Heb 1:3; 8:1; 10:12; 12:2; 1Pe 3:22; Re 3:21).

Mark 16:20

 all in Paul's Epistles. Пavtaरov once in Luke. Westcott and Hort give the alternative ending found in L: "And they announced briefly to Peter and those around him all the things enjoined. And after these things Jesus himself also sent forth through them from the east even unto the west the holy and incorruptible proclamation of the eternal salvation."

## THE GOSPEL OF LUKE <br> BY WAY OF INTRODUCTION

There is not room here for a full discussion of all the interesting problems raised by Luke as the author of the Gospel and Acts. One can find them ably handled in the Introduction to Plummer's volume on Luke's Gospel in the International and Critical Commentary, in the Introduction to Ragg's volume on Luke's Gospel in the Westminster Commentaries, in the Introduction to Easton's Gospel According to St. Luke, Hayes' Synoptic Gospels and the Book of Acts, Ramsay's Luke the Physician, Harnack's Date of the Acts and the Synoptic Gospels, Foakes-Jackson and Kirsopp Lake's Beginnings of Christianity, Carpenter's Christianity According to St. Luke, Cadbury's The Making of Luke-Acts, McLachlan's St. Luke: The Man and His Work, Robertson's Luke the Historian in the Light of Research, to go no further. It is a fascinating subject that appeals to scholars of all shades of opinion.

THE SAME AUTHOR FOR GOSPEL AND ACTS
The author of Acts refers to the Gospel specifically as "the first treatise," $\tau 0 v \pi \rho \hat{A} \omega \tau \tau v$入opov, (Ac 1:1) and both are addressed to Theophilus (Lu 1:3; Ac 1:1). He speaks of himself in both books as "me" (кало, Lu 1:3) and

I made ( $\varepsilon \pi \sigma$ Â $\eta \sigma \alpha \mu A ̂ \eta v$, Ac 1:1). He refers to himself with others as "we" and "us" as in Ac 16:10, the "we" sections of Acts. The unity of Acts is here assumed until the authorship of Acts is discussed in Volume III. The same style appears in Gospel and Acts, so that the presumption is strongly in support of the author's statement. It is quite possible that the formal Introduction to the Gospel ( Lu 1:1-4) was intended to apply to the Acts also which has only an introductory clause. Plummer argues that to suppose that the author of Acts imitated the Gospel purposely is to suppose a literary miracle. Even Cadbury, who is not convinced of the Lucan authorship, says: "In my study of Luke and Acts, their unity is a fundamental and illuminating axiom." He adds: "They are not merely two independent writings from the same pen; they are a single continuous work. Acts is neither an appendix nor an afterthought. It is probably an integral part of the author's original plan and purpose."

THE AUTHOR OF ACTS A COMPANION OF PAUL
The proof of this position belongs to the treatment of Acts, but a word is needed here. The use of "we" and "us" in Ac 16:10 and from Ac 20:6 to the end of chapter Ac 28 shows it beyond controversy if the same man wrote the "we" sections and the rest of the Acts. This proof Harnack has produced with painstaking detail in his Date of the Acts and the Synoptic Gospels and in his volume The Acts of the Apostles and in his Luke the Physician.

THIS COMPANION OF PAUL A PHYSICIAN
The argument for this position lies in the use of medical terms throughout the Gospel and the Acts. Hobart in his Medical Language of St. Luke proves that the author of both Gospel and Acts shows a fondness for medical terms best explained by the fact that he was
a physician. Like most enthusiasts he overdid it and some of his proof does not stand the actual test of sifting. Harnack and Hawkins in his Horae Synopticae have picked out the most pertinent items which will stand. Cadbury in his Style and Literary Method of Luke denies that Luke uses Greek medical words more frequently in proportion than Josephus, Philo, Plutarch, or Lucian. It is to miss the point about Luke merely to count words. It is mainly the interest in medical things shown in Luke and Acts. The proof that Luke is the author of the books does not turn on this fact. It is merely confirmatory. Paul calls Luke "the beloved physician" (o เaт $\rho \circ \varsigma$ o $\alpha \gamma \alpha \pi$ Â $\eta \tau \circ \varsigma, \operatorname{Col} 4: 14$ ), "my beloved physician." Together they worked in the Island of Malta (Ac 28:8-10) where many were healed and Luke shared with Paul in the appreciation of the natives who "came and were healed ( $\varepsilon \theta \varepsilon \rho \alpha \pi \varepsilon v o v \tau o)$ who also honoured us with many honours." The implication there is that Paul wrought miracles of healing (เવбato), while Luke practised his medical art also. Other notes of the physician's interest will be indicated in the discussion of details like his omitting Mark's apparent discredit of physicians ( $\mathrm{Mr} 5: 26$ ) by a milder and more general statement of a chronic case (Lu 8:43).

## THIS COMPANION AND AUTHOR LUKE

All the Greek manuscripts credit the Gospel to Luke in the title. We should know that Luke wrote these two books if there was no evidence from early writers. Irenaeus definitely ascribes the Gospel to Luke as does Clement of Alexandria, Tertullian, the Muratorian Fragment. Plummer holds that the authorship of the four great Epistles of Paul (I and II Corinthians, Galatians, Romans) which even Baur accepted, is scarcely more certain than the Lukan authorship of the Gospel. Even Renan says: "There is no very strong reason for supposing that Luke was not the author of the Gospel which bears his name."

## A SKETCH OF LUKE

His name is not a common one, and is probably a shortened form of $\Lambda v \kappa \kappa o s$ and $\Lambda u \kappa \alpha v o c$. Some of the manuscripts of the Gospel actually have as the title Kata $\Lambda v \kappa \alpha v o v$. Dean Plumptre suggests that the Latin poet Lucanus was named after Luke who probably was the family physician when he was born. That is conjecture as well as the notion of Hayes that, since the brothers Gallio and Seneca were uncles of Lucanus they were influenced by Luke to be friendly toward Paul both in Corinth and in Rome. It is probable that Luke was a Greek, certainly a Gentile, possibly a freedman. So this man who wrote more than onefourth of the New Testament was not a Jew. It is not certain whether his home was in Antioch or in Philippi. It is also uncertain whether he was already converted when Paul met him at Troas. The Codex Bezae has a "we" passage after Ac 11:27 which, if genuine, would bring Luke in contact with Paul before Troas. Hayes thinks that he was a slave boy in the family of Theophilus at Antioch, several conjectures in one. We do not know that Theophilus lived at Antioch. It may have been Rome. But, whether one of Paul's converts or not, he was a loyal friend to Paul. If he lived at Antioch, he could have studied medicine there and the
great medical temple of Aesculapius was at Aegae, not far away. As a Greek physician, Luke was a university man and in touch with the science of his day. Greek medicine is the beginning of the science of medicine as it is known today. Tradition calls him a painter, but of that we know nothing. Certainly he was a humanist and a man of culture and broad sympathies and personal charm. He was the first genuine scientist who faced the problem of Christ and of Christianity. It must be said of him that he wrote his books with open mind and not as a credulous enthusiast.

THE DATE OF THE GOSPEL
There are two outstanding facts to mark off the date of this Gospel by Luke. It was later than the Gospel of Mark since Luke makes abundant use of it. It was before the Acts of the Apostles since he definitely refers to it in Ac 1:1. Unfortunately the precise date of both termini is uncertain. There are still some scholars who hold that the author of the Acts shows knowledge of the Antiquities of Josephus and so is after A.D. 85, a mistaken position, in my opinion, but a point to be discussed when Acts is reached. Still others more plausibly hold that the Acts was written after the destruction of Jerusalem and that the Gospel of Luke has a definite allusion to that event (Lu 21:20f. ), which is interpreted as a prophecy post eventum instead of a prediction by Christ a generation beforehand. Many who accept this view hold to authorship of both Acts and Gospel by Luke. I have long held the view, now so ably defended by Harnack, that the Acts of the Apostles closes as it does for the simple and obvious reason that Paul was still a prisoner in Rome. Whether Luke meant the Acts to be used in the trial in Rome, which may or may not have come to pass, is not the point. Some argue that Luke contemplated a third book which would cover the events of the trial and Paul's later career. There is no proof of that view. The outstanding fact is that the book closes with Paul already a prisoner for two years in Rome. If the Acts was written about A.D. 63, as I believe to be the case, then obviously the Gospel comes earlier. How much before we do not know. It so happens that Paul was a prisoner a little over two years in Caesarea. That period gave Luke abundant opportunity for the kind of research of which he speaks in Lu 1:1-4. In Palestine he could have access to persons familiar with the earthly life and teachings of Jesus and to whatever documents were already produced concerning such matters. Luke may have produced the Gospel towards the close of the stay of Paul in Caesarea or during the early part of the first Roman imprisonment, somewhere between A.D. 59 and 62. The other testimony concerns the date of Mark's Gospel which has already been discussed in volume I. There is no real difficulty in the way of the early date of Mark's Gospel. All the facts that are known admit, even argue for a date by A.D. 60. If Mark wrote his Gospel in Rome, as is possible, it would certainly be before A.D. 64, the date of the burning of Rome by Nero. There are scholars, however, who argue for a much earlier date for his gospel, even as early as A.D. 50. The various aspects of the Synoptic problem are ably discussed by Hawkins in his Horae Synopticae, by Sanday and others in Oxford Studies in the Synoptic

Problem, by Streeter in his The Four Gospels, by Hayes in his The Synoptic Gospels and the Book of Acts, by Harnack in his Date of the Acts and the Synoptic Gospels, by Stanton in his The Gospels as Historical Documents, and by many others. My own views are given at length in my Studies in Mark's Gospel and in Luke the Historian in the Light of Research.

THE SOURCES OF THE GOSPEL
In his Preface or Prologue ( Lu 1:1-4) the author tells us that he had two kinds of sources, oral and written, and that they were many, how many we have no way of telling. It is now generally accepted that we know two of his written sources, Mark's Gospel and Q or the Logia of Jesus (written by Matthew, Papias says). Mark is still preserved and it is not difficult for any one by the use of a harmony of the Gospels to note how Luke made use of Mark, incorporating what he chose, adapting it in various ways, not using what did not suit his purposes. The other source we only know in the non-Markan portions of Matthew and Luke, that is the material common to both, but not in Mark. This also can be noted by any one in a harmony. Only it is probable that this source was more extensive than just the portions used by both Matthew and Luke. It is probable that both Matthew and Luke each used portions of the Logia not used by the other. But there is a large portion of Luke's Gospel which is different from Mark and Matthew. Some scholars call this source L. There is little doubt that Luke had another document for the material peculiar to him, but it is also probable that he had several others. He spoke of "many." This applies especially to chapters 9 to 21. But Luke expressly says that he had received help from "eye-witnesses and ministers of the word," in oral form this means. It is, then, probable that Luke made numerous notes of such data and used them along with the written sources at his command. This remark applies particularly to chapters 1 and 2 which have a very distinct Semitic (Aramaic) colouring due to the sources used. It is possible, of course, that Mary the mother of Jesus may have written a statement concerning these important matters or that Luke may have had converse with her or with one of her circle. Ramsay, in his volume, Was Christ Born at Bethlehem? shows the likelihood of Luke's contact with Mary or her circle during these two years at Caesarea. Luke handles the data acquired with care and skill as he claims in his Prologue and as the result shows. The outcome is what Renan called the most beautiful book in the world.

THE CHARACTER OF THE BOOK
Literary charm is here beyond dispute. It is a book that only a man with genuine culture and literary genius could write. It has all the simple grace of Mark and Matthew plus an indefinable quality not in these wonderful books. There is a delicate finish of detail and proportion of parts that give the balance and poise that come only from full knowledge of the subject, the chief element in a good style according to Dr. James Stalker. This scientific physician, this man of the schools, this converted Gentile, this devoted friend of Paul, comes to the study of the life of Christ with a trained intellect, with an historian's method of research, with a physician's care in diagnosis and discrimination, with a charm of style all his own,
with reverence for and loyalty to Jesus Christ as Lord and Saviour. One could not afford to give up either of the Four Gospels. They each supplement the other in a wonderful way. John's Gospel is the greatest book in all the world, reaching the highest heights of all. But if we had only Luke's Gospel, we should have an adequate portrait of Jesus Christ as Son of God and Son of Man. If Mark's is the Gospel for the Romans and Matthew's for the Jews, the Gospel of Luke is for the Gentile world. He shows the sympathy of Jesus for the poor and the outcast. Luke understands women and children and so is the universal Gospel of mankind in all phases and conditions. It is often called the Gospel of womanhood, of infancy, of prayer, of praise. We have in Luke the first Christian hymns. With Luke we catch some glimpses of the child Jesus for which we are grateful. Luke was a friend and follower of Paul, and verbal parallels with Paul's Epistles do occur, but there is no Pauline propaganda in the Gospel as Moffatt clearly shows (Intr. to Lit. of the N.T., p. 281). The Prologue is in literary Koine and deserves comparison with those in any Greek and Latin writers. His style is versatile and is often coloured by his source. He was a great reader of the Septuagint as is shown by occasional Hebraisms evidently due to reading that translation Greek. He has graciousness and a sense of humour as McLachlan and Ragg show. Every really great man has a saving sense of humour as Jesus himself had. Ramsay dares to call Luke, as shown by the Gospel and Acts, the greatest of all historians not even excepting Thucydides. Ramsay has done much to restore Luke to his rightful place in the estimation of modern scholars. Some German critics used to cite Lu 2:1-7 as a passage containing more historical blunders than any similar passage in any historian. The story of how papyri and inscriptions have fully justified Luke in every statement here made is carefully worked out by Ramsay in his various books, especially in The Bearing of Recent Discovery on the Trustworthiness of the New Testament. The main feature of this proof appears also in my Luke the Historian in the Light of Research. So many items, where Luke once stood alone, have been confirmed by recent discoveries that the burden of proof now rests on those who challenge Luke in those cases where he still stands alone.

## Luke 1

Luke 1:1
Forasmuch as ( $\varepsilon \pi \varepsilon \| \delta \eta \pi \varepsilon \rho)$. Here alone in the N.T., though common in literary Attic. Appears in the papyri. A triple compound $(\varepsilon \pi \varepsilon=$ since, $\delta \eta=$ admittedly true, $\pi \varepsilon \rho=$ intensive particle to emphasize importance).

Many ( $\pi 0 \lambda \lambda 0$ ). How many no one knows, but certainly more than two or three. We know that Luke used the Logia of Jesus written by Matthew in Aramaic (Papias) and Mark's Gospel. Undoubtedly he had other written sources.

Have taken in hand ( $\varepsilon \pi \varepsilon \chi \varepsilon เ \rho \eta \sigma \alpha \nu$ ). A literal translation of $\varepsilon \pi \iota \chi \varepsilon \varphi \varepsilon \omega($ from $\chi \varepsilon \iota \rho$, hand and $\varepsilon \pi$, upon). Both Hippocrates and Galen use this word in their introduction to their medical works. Here only in the N.T., though a common literary word. Common in the papyri for undertaking with no idea of failure or blame. Luke does not mean to cast reflection on those who preceded him. The apocryphal gospels were all much later and are not in his mind. Luke had secured fuller information and planned a book on a larger scale and did surpass them with the result that they all perished save Mark's Gospel and what Matthew and Luke possess of the Logia of Jesus. There was still room for Luke's book. That motive influences every author and thus progress is made.

To draw up, a narrative ( $\alpha v \alpha \tau \alpha \xi \alpha \sigma \theta \alpha \delta ı \eta \gamma \eta \sigma ı v)$. Ingressive aorist middle infinitive. This verb $\alpha v a \tau \alpha \xi \alpha \sigma \theta \alpha$ has been found only in Plutarch's Moral. 968 CD about an elephant "rehearsing" by moonlight certain tricks it had been taught (Moulton and Milligan, Vocabulary). That was from memory going regularly through the thing again. But the idea in the word is plain enough. The word is composed of $\tau \alpha \sigma \sigma \omega$, a common verb for arranging things in proper order and $\alpha v \alpha$, again. Luke means to say that those before him had made attempts to rehearse in orderly fashion various matters about Christ. "The expression points to a connected series of narratives in some order ( $\tau \alpha \xi \varsigma \varsigma$ ), topical or chronological rather than to isolated narratives" (Bruce). "They had produced something more than mere notes or anecdotes" (Plummer). $\Delta ı \eta \gamma \eta \sigma \iota \varsigma$ means leading or carrying a thing through, not a mere incident. Galen applies this word some seventy-five times to the writing of Hippocrates.

Which have been fulfilled ( $\tau \omega \nu \pi \varepsilon \pi \lambda \eta \rho \omega \varphi \rho \rho \eta \mu \varepsilon v \omega v$ ). Perfect passive participle from $\pi \lambda \eta \rho о \varphi о \rho \varepsilon \omega$ and that from $\pi \lambda \eta \rho \eta \varsigma$ (full) and $\varphi \varepsilon \rho \omega$ (to bring). Hence to bring or make full. The verb is rare outside of the LXX and the N.T. Papyri examples occur for finishing off a legal matter or a financial matter in full. Deissmann (Light from the Ancient East, pp. 86f.) gives examples from the papyri and inscriptions for completing a task or being convinced or satisfied in mind. The same ambiguity occurs here. When used of persons in the N.T. the meaning is to be convinced, or fully persuaded (Ro 4:21; 14:5; Heb 6:11; 10:22). When used of things it has the notion of completing or finishing (2Ti 4:5,17). Luke is here speaking of "matters" ( $\pi \rho \alpha \gamma \mu \alpha \tau \omega v)$. Luke may refer to the matters connected with Christ's life which
have been brought to a close among us or accomplished. Bruce argues plausibly that he means fulness of knowledge "concerning the things which have become widely known among us Christians." In Col 2:2 we have "fulness of understanding" ( $\tau \eta \varsigma \pi \lambda \eta \rho \circ \varphi о \rho \iota \alpha \varsigma \tau \eta \varsigma$ $\sigma u v \varepsilon \sigma \varepsilon \omega \varsigma)$. In modern Greek the verb means to inform. The careful language of Luke here really pays a tribute to those who had preceded him in their narratives concerning Christ.

Luke 1:2
Even as ( $\kappa \alpha \theta \omega \varsigma$ ). This particle was condemned by the Atticists though occurring occasionally from Aristotle on. It is in the papyri. Luke asserts that the previous narratives had their sound basis.

Delivered unto us ( $\pi \alpha \rho \varepsilon \delta \omega \sigma \alpha \nu \eta \mu i v$ ). Second aorist active indicative of $\pi \alpha \rho \alpha \delta \Delta \delta \omega \mu$. Luke received this tradition along with those who are mentioned above (the many). That is he was not one of the "eyewitnesses." He was a secondary, not a primary, witness of the events. Tradition has come to have a meaning of unreliability with us, but that is not the idea here. Luke means to say that the handing down was dependable, not mere wives' fables. Those who drew up the narratives had as sources of knowledge those who handed down the data. Here we have both written and oral sources. Luke had access to both kinds.

Which from the beginning were eyewitnesses and ministers of the word ( $\alpha a \pi^{\prime} \alpha \rho \chi \eta \varsigma$
 The word for
eyewitnesses ( $\alpha \cup \tau 0 \pi \tau \alpha$ ) is an old Greek word and appears in the papyri also. It means seeing with one's own eyes. It occurs here only in the N.T. We have the very word in the medical term autopsy. Greek medical writers often had the word. It is a different word from $\varepsilon \pi о \pi \tau \alpha$ (eyewitness) in 2Pe 1:16, a word used of those who beheld heavenly mysteries. The word for "ministers" (v $\tau \eta \rho \varepsilon \tau \alpha)$, under rowers or servants we have had already in Mt 5:25; 26:58; Mr 14:54,65, which see. We shall see it again in $\mathrm{Lu} 4: 20$ of the attendant in the synagogue. In the sense of a preacher of the gospel as here, it occurs also in Ac 26:16. Here "the word" means the gospel message, as in Ac 6:4; 8:4 , etc.

From the beginning apparently refers to the beginning of the ministry of Jesus as was true of the apostles (Ac 1:22) and of the early apostolic preaching (Ac 10:37-43). The Gospel of Mark follows this plan. The Gospel of Luke goes behind this in chapters 1 and 2 as does Matthew in chapters 1 and 2. But Luke is not here referring to himself. The matters about the childhood of Jesus Christ would not form part of the traditional preaching for obvious reasons.

Luke 1:3
It seemed good to me also ( $\varepsilon \delta$ о $\xi \varepsilon \kappa \alpha \mu о$ ). A natural conclusion and justification of Luke's decision to write his narrative. They had ample reason to draw up their narratives. Luke has more reason to do so because of his fuller knowledge and wider scope.

Having traced the course of all things ( $\pi \alpha \rho \eta \kappa о \lambda о v \theta \eta \kappa о \tau \pi \alpha \sigma v$ ). The perfect active participle of a common verb of the ancient Greek. Literally it means to follow along a thing in mind, to trace carefully. Both meanings occur abundantly in the ancient Greek. Cadbury (Appendix C to Beginnings of Christianity, Vol. II, pp. 489ff.) objects to the translation "having traced" here as implying research which the word does not here mean. Milligan (Vocabulary) is somewhat impressed by this argument. See my discussion of the point in Chapter XVI of Studies in the Text of the N.T. (The Implications in Luke's Preface) where the point is made that Luke here claims fulness of knowledge before he began to write his book. He had the traditions of the eyewitnesses and ministers of the word and the narratives previously drawn up. Whether he was a personal contemporary with any or all of these events we do not know and it is not particularly pertinent. He had mentally followed along by the side of these events. Galen used this verb for the investigation of symptoms. Luke got himself ready to write before he began by full and accurate knowledge of the subject. Aк $1 \beta \omega \varsigma$ (accurately) means going into minute details, from $\alpha \kappa \rho \circ v$, the topmost point. And he did it
from the first ( $\alpha v \omega \theta \varepsilon v$ ). He seems to refer to the matters in Chapters 1:5-2:52, the Gospel of the Infancy.

In order ( $\kappa \alpha \theta \varepsilon \xi \eta \varsigma)$. Chronological order in the main following Mark's general outline. But in 9:51-18:10 the order is often topical. He has made careful investigation and his work deserves serious consideration.

Most excellent Theophilus (кратьбтє $\Theta \varepsilon о \varphi \iota \lambda \varepsilon$ ). The name means god-lover or godbeloved. He may have been a believer already. He was probably a Gentile. Ramsay holds that "most excellent" was a title like "Your Excellency" and shows that he held office, perhaps a Knight. So of Felix (Ac 23:26) and Festus (Ac 26:25). The adjective does not occur in the dedication in Ac 1:1.

Luke 1:4
Mightest know ( $\varepsilon \pi \iota \gamma v \omega \iota \varsigma)$. Second aorist active subjunctive of $\varepsilon \pi \iota \gamma \iota \nu \omega \sigma \kappa \omega$. Full knowledge ( $\varepsilon \pi-$ ), in addition to what he already has.

The certainty ( $\tau \eta v \alpha \sigma \varphi \alpha \lambda \varepsilon \iota \alpha v$ ). Make no slip ( $\sigma \varphi \alpha \lambda \lambda \omega$, to totter or fall, and $\alpha$ privative). Luke promises a reliable narrative. "Theophilus shall know that the faith which he has embraced has an impregnable historical foundation" (Plummer).

The things $(\lambda o \gamma \omega v)$. Literally "words," the details of the words in the instruction.
Wast instructed ( $\kappa \alpha \tau \eta \chi \eta \theta \eta \varsigma)$. First aorist passive indicative. Not in O.T. and rare in ancient Greek. Occurs in the papyri. The word $\eta \chi \varepsilon \omega$ is our word echo (cf. 1Th 1:8 for $\varepsilon \xi \eta \chi \eta \tau \alpha$, has sounded forth). Karn $\chi \varepsilon \omega$ is to sound down, to din, to instruct, to give oral instruction. Cf. 1Co 14:9; Ac 21:21,24; 18:25; Gal 6:6. Those men doing the teaching were called catechists and those receiving it were called catechumens. Whether Theophilus was still a catechumen is not known. This Preface by Luke is in splendid literary Koine and is not surpassed by
those in any Greek writer (Herodotus, Thucydides, Polybius). It is entirely possible that Luke was familiar with this habit of Greek historians to write prefaces since he was a man of culture.

## Luke 1:5

There was ( $\varepsilon \gamma \varepsilon v \varepsilon \tau 0)$. Not the usual $\varepsilon v$ for "was," but there arose or came into notice. With this verse the literary Koine of verses 1 to 4 disappears. To the end of chapter 2 we have the most Hebraistic (Aramaic) passage in Luke's writings, due evidently to the use of documents or notes of oral tradition. Plummer notes a series of such documents ending with 1:80, 2:40, 2:52. If the mother of Jesus was still alive, Luke could have seen her. She may have written in Aramaic an account of these great events. Natural reserve would keep her from telling too much and from too early publicity. Luke, as a physician, would take special interest in her birth report. The supernatural aspects disturb only those who do not admit the real Incarnation of Jesus Christ and who are unable to believe that God is superior to nature and that the coming of the Son of God to earth justifies such miraculous manifestations of divine power. Luke tells his story from the standpoint of Mary as Matthew gives his from the standpoint of Joseph. The two supplement each other. We have here the earliest documentary evidence of the origins of Christianity that has come down to us (Plummer).
 the events before the death of Herod the Great (as he was called later), appointed King of Judea by the Roman Senate B.C. 40 at the suggestion of Octavius and Antony. He died B.C. 4.

Of the course of Abijah ( $\varepsilon \xi \varepsilon \varphi \eta \mu \varepsilon \rho ı \alpha \varsigma A \beta \iota \alpha)$. Not in old Greek, but in LXX and modern Greek. Papyri have a verb derived from it, $\varepsilon \varphi \eta \mu \varepsilon \rho \varepsilon \omega$. Daily service (Ne 13:30; 1Ch 25:8) and then a course of priests who were on duty for a week ( $1 \mathrm{Ch} 23: 6 ; 28: 13$ ). There were 24 such courses and that of Abijah was the eighth (1Ch 24:10; 2Ch 8:14). Only four of these courses (Jedaiah, Immer, Pashur, Harim) returned from Babylon, but these four were divided into twenty-four with the old names. Each of these courses did duty for eight days, sabbath to sabbath, twice a year. On sabbaths the whole course did duty. At the feast of tabernacles all twenty-four courses were present.

Of the daughters of Aaron ( $\varepsilon \kappa \tau \omega v \theta v \gamma \alpha \tau \varepsilon \rho \omega v$ A $\alpha \rho \omega v$ ). "To be a priest and married to a priest's daughter was a double distinction" (Plummer). Like a preacher married to a preacher's daughter.

Luke 1:6
Righteous before God ( $\delta \iota \kappa \alpha \iota$ evavtıov tov $\theta$ zou). Old Testament conception and idiom. Cf. 2:25 about Simeon. Expanded in Old Testament language. Picture of "noblest product of Old Testament education" (Ragg) is Zacharias and Elisabeth, Mary and Joseph, Simeon and Anna who were "privileged to see with clear eyes the dawn of the New Testament revelation."

Luke 1:7
Because that ( $\kappa \alpha \theta \mathrm{o} \tau$ ). Good Attic word, according to what. Only in Luke and Acts in the N.T. In the papyri.

Well stricken in years ( $\pi \rho о \beta \varepsilon \beta \eta \kappa о \tau \varepsilon \varsigma \varepsilon v \tau \alpha \iota \varsigma \eta \mu \varepsilon \rho \alpha \iota \varsigma \alpha \tau \tau \omega v)$. Wycliff has it right: "Had gone far in their days." Perfect active participle. See also verse 18.

Luke 1:8
While he executed the priest's office ( $\varepsilon v \tau \omega \tau \varepsilon \rho a \tau \varepsilon v \varepsilon \iota v$ av $\tau \circ v$ ). A favourite idiom in Luke, $\varepsilon v$ with the articular infinitive and the accusative of general reference where the genitive absolute could have been used or a temporal conjunction and finite verb. It is proper Greek, but occurs often in the LXX, which Luke read, particularly in imitation of the Hebrew infinitive construct. The word $\varepsilon \varepsilon \rho a \tau \varepsilon v \omega$ does not appear in the ancient Greek, but in the LXX and this one example in Luke. It is on the Rosetta Stone and the early inscriptions so that the word was simply applied by the LXX translators from current usage.

Luke 1:9
His lot was ( $\varepsilon \lambda \alpha \chi \varepsilon$ ). Literally,
he obtained the lot. Second aorist active indicative of $\lambda \alpha \gamma \chi \alpha \nu \omega$, to obtain by lot, a very old verb from Homer on. It is used either with the genitive as here, or the accusative as in Ac 1:17; 2Pe 1:1. Papyri show examples with the accusative. It was only once in a lifetime that a priest obtained the lot of going $(\varepsilon \iota \sigma \varepsilon \lambda \theta \omega \nu$, here nominative aorist active participle agreeing with the subject of $\varepsilon \lambda \alpha \chi \varepsilon$ ) into the sanctuary ( $\tau 0 v$ vaov, not $\tau \boldsymbol{\tau} \varepsilon \rho \circ v$, the outer courts) and burning incense on the golden altar. "It was the great moment of Zacharias's life, and his heart was no doubt alert for the supernatural" (Ragg). The fortunate lot was "a white stone" to which Re 2:17 may refer.

Burn incense ( $\tau 0 v \theta v \mu \iota \sigma \alpha$ ). Here only in the N.T. Occurs on inscriptions. Hobart finds it used by medical writers for fumigating herbs. "Ascending the steps to the Holy Place, the priests spread the coals on the golden altar, and arranged the incense, and the chief operating priest was then left alone within the Holy Place to await the signal of the president to burn the incense. It was probably at this time that the angel appeared to Zacharias" (Vincent).

Luke 1:10
Were praying without ( $\eta \nu \pi \rho o \sigma \varepsilon v \chi \circ \mu \varepsilon \nu \circ \nu \varepsilon \xi \omega$ ). Periphrastic imperfect indicative picturing the posture of the people while the clouds of incense rose on the inside of the sanctuary.

Luke 1:11
Appeared $(\omega \varphi \theta \eta)$. First aorist passive indicative. It is the form used by Paul of the resurrection appearances of Jesus (1Co 15:5-8 ). There is no use in trying to explain away the reality of the angel. We must choose between admitting an objective appearance and a myth (Plummer).

## Luke 1:13

Is heard ( $\varepsilon ו \sigma \eta \kappa o v \sigma \theta \eta)$ ). First aorist passive indicative. A sort of timeless aorist, "was heard" when made, and so "is heard" now. Probably the prayer was for a son in spite of the great age of Elisabeth, though the Messianic redemption is possible also.

John (I $\omega a v \eta v$ ). The word means that God is gracious. The mention of the name should have helped Zacharias to believe. The message of the angel (verses 13-17) takes on a metrical form when turned into Hebrew (Ragg) and it is a prose poem in Greek and English like 1:30-33,35-37,42-45,46-55,68-70; 2:10-12,14,29-32,34-35. Certainly Luke has preserved the earliest Christian hymns in their oldest sources. He is the first critic of the sources of the Gospels and a scholarly one.

Luke 1:14
Gladness ( $\alpha \gamma \alpha \lambda \lambda ı \alpha \sigma \iota \varsigma)$. Only in the LXX and N.T. so far as known. A word for extreme exultation.

Rejoice ( $\chi \alpha \rho \eta \sigma o v \tau \alpha$ ). Second future passive indicative. The coming of a prophet will indeed be an occasion for rejoicing.

Luke 1:15
Strong drink ( $\sigma \kappa \varepsilon \rho \alpha$ ). A Hebrew word transliterated into Greek, an intoxicating drink. Here only in the N.T. John was to be a personal "dry" or Nazarite (Nu 6:3).

Shall not drink (ov $\mu \eta \pi \imath \eta$ ). Strong prohibition, double negative and second aorist subjunctive.

The Holy Ghost ( $\pi v \varepsilon v \mu a \tau o \varsigma ~ a \gamma เ o v)$. The Holy Spirit in contrast to the physical excitement of strong drink (Plummer). Luke uses this phrase 53 times, 12 in the Gospel, Mark and John 4 each, Matthew 5 times.

Even from his mother's womb ( $\varepsilon \tau \varepsilon \kappa \kappa o \iota \lambda \iota \varsigma \varsigma \eta \tau \rho \circ \varsigma \alpha v \tau o v$ ). A manifest Hebraism. Cf. verse 41.

Luke 1:17
Before his face ( $\varepsilon v \omega \pi \iota \circ v$ avtov). Not in the ancient Greek, but common in the papyri as in LXX and N.T. It is a vernacular Koine word, adverb used as preposition from adjective $\varepsilon v \omega \pi \iota \circ \varsigma$, and that from o $\varepsilon v \omega \pi \omega v$ (the one who is in sight).

Autou here seems to be "the Lord their God" in verse 16 since the Messiah has not yet been mentioned, though he was to be actually the Forerunner of the Messiah.

In the spirit and power of Elijah ( $\varepsilon v \pi v \varepsilon \nu \mu a \tau \kappa \alpha \delta \nu v a \mu \varepsilon E \lambda \varepsilon i \alpha)$. See Isa 40:1-11; Mal 3:1-5 . John will deny that he is actually Elijah in person, as they expected (Joh 1:21), but Jesus will call him Elijah in spirit (Mr 9:12; Mt 17:12).

Hearts of fathers ( $\kappa \alpha \rho \delta \iota \alpha \varsigma \pi \alpha \tau \varepsilon \omega v)$ ). Paternal love had died out. This is one of the first results of conversion, the revival of love in the home.

Wisdom ( $\varphi \rho \circ \vee \eta \sigma \varepsilon)$. Not $\sigma \circ \varphi \iota a$, but a word for practical intelligence.

Prepared (катєбк\&vaбuغvov). Perfect passive participle, state of readiness for Christ. This John did. This is a marvellous forecast of the character and career of John the Baptist, one that should have caught the faith of Zacharias.

Luke 1:18
Whereby ( $\kappa \alpha \tau \alpha \tau)$. According to what. It was too good to be true and Zacharias demanded proof and gives the reason (for, $\gamma \alpha \rho$ ) for his doubt. He had prayed for this blessing and was now sceptical like the disciples in the house of Mary about the return of Peter (Ac 12:14f. ).

Luke 1:19
Gabriel ( $\Gamma \alpha \beta \rho ı \eta \lambda$ ). The Man of God ( $\mathrm{Da} 8: 6 ; 9: 21$ ). The other angel whose name is given in Scripture is Michael ( Da 10:13,21; Jude 1:9; Re 12:7). The description of himself is a rebuke to the doubt of Zacharias.

Luke 1:20
Thou shalt be silent ( $\varepsilon \sigma \eta \sigma \omega \omega \omega \omega v$ ). Volitive future periphrastic.
Not able to speak ( $\mu \eta \delta u v \alpha \mu \varepsilon v o s \lambda \alpha \lambda \eta \sigma \alpha$ ). Negative repetition of the same statement. His dumbness will continue "until" ( $\alpha \chi \rho \eta \varsigma \eta \mu \varepsilon \rho \alpha \varsigma$ ) the events come to pass "because" ( $\alpha v \theta^{\prime}$ $\omega v$ ). The words were to become reality in due season (kaı $\rho \circ v$, not $\chi \rho \circ$ оос, time).

Luke 1:21
Were waiting ( $\eta v \pi \rho о \sigma \delta o \kappa \omega v$ ). Periphrastic imperfect again. An old Greek verb for expecting. Appears in papyri and inscriptions. It denotes mental direction whether hope or fear.

They marvelled ( $\varepsilon \theta \alpha v \mu \alpha \zeta o v)$. Imperfect tense, were wondering. The Talmud says that the priest remained only a brief time in the sanctuary.

While he tarried ( $\varepsilon v \tau \omega \chi \rho \circ \vee \iota \zeta \varepsilon \iota v$ ). See verse 8 for the same idiom.
Luke 1:22
Perceived ( $\varepsilon \pi \varepsilon \gamma v \omega \sigma \alpha v)$. Second aorist indicative. Clearly knew because he was not able to pronounce the benediction from the steps ( Nu 6:24-26).

Continued making signs ( $\eta v \delta \iota \alpha v \varepsilon v \omega v$ ). Periphrastic imperfect again. He nodded and beckoned back and forth ( $\delta$ ia, between). Further proof of a vision that caused his dumbness.

Luke 1:23
Ministration ( $\lambda_{\varepsilon ı \tau о \cup \rho \gamma \mid a \varsigma) . ~ O u r ~ w o r d ~ l i t u r g y . ~ A ~ c o m m o n ~ w o r d ~ i n ~ a n c i e n t ~ G r e e k ~ f o r ~}^{\text {for }}$ public service, work for the people ( $\lambda \varepsilon \omega \varsigma \varepsilon \rho \gamma \circ v$ ). It is common in the papyri for the service of the Egyptian priesthood as we see it in the LXX of Hebrew priests (see also Heb 8:6; 9:21; 2Co 9:12; Php 2:17,30 ).

Luke 1:24
Conceived ( $\sigma v v \varepsilon \lambda \alpha \beta \varepsilon v$ ). Luke uses this word eleven times and it occurs only five other times in the N.T. It is a very old and common Greek word. He alone in the N.T. has it for conceiving offspring ( $1: 24,31,36 ; 2: 21$ ) though Jas $1: 15$ uses it of lust producing sin. Hobart
(Medical Language of Luke, p. 91) observes that Luke has almost as many words for pregnancy and barrenness as Hippocrates ( $\varepsilon v \gamma \alpha \sigma \tau \rho \varepsilon \chi \varepsilon เ v, 21: 23 ; \varepsilon \gamma \kappa v \circ \varsigma, 2: 5 ; \sigma \tau \varepsilon \rho \alpha, 1: 7$; атєкvоৎ, 20:28).

Hid ( $\pi \varepsilon \rho \varepsilon \varepsilon \kappa \rho \cup \beta \varepsilon v$ ). Only here in the N.T., but in late Koine writers. Usually considered second aorist active indicative from $\pi \varepsilon \rho \ldots \kappa \rho \cup \pi \tau \omega$, though it may be the imperfect indicative of a late form $\pi \varepsilon \rho \kappa \kappa \rho \cup \beta \omega$. If it is aorist it is the constative aorist. The preposition $\pi \varepsilon \rho$ makes it mean completely (on all sides) hid.

Luke 1:25
My reproach (ovet $\delta o \varsigma \mu o v$ ). Keenly felt by a Jewish wife because the husband wanted an heir and because of the hope of the Messiah, and because of the mother's longing for a child.

Luke 1:26
Was sent $(\alpha \pi \varepsilon \sigma \tau \alpha \lambda \eta)$. Second aorist passive indicative of $\alpha \pi 0 \sigma \tau \varepsilon \lambda \lambda \omega$ from which apostle comes. The angel Gabriel is God's messenger to Mary as to Zacharias ( $1: 19$ ).

Luke 1:27
Betrothed ( $\varepsilon \mu \nu \eta \sigma \tau \varepsilon \nu \mu \varepsilon \nu \eta \nu)$. Perfect passive participle. Betrothal usually lasted a year and unfaithfulness on the part of the bride was punished with death (De 23:24f. ).

Luke 1:28
Highly favoured ( $\kappa \varepsilon \chi \alpha \rho \iota \tau \omega \mu \varepsilon \nu \eta$ ). Perfect passive participle of $\chi \alpha \rho \iota \tau o \omega$ and means endowed with grace ( $\chi$ 人pıऽ), enriched with grace as in Eph 1:6, non ut mater gratiae, sed ut filia gratiae (Bengel). The Vulgate gratiae plena "is right, if it means 'full of grace which thou hast received'; wrong, if it means 'full of grace which thou hast to bestow"' (Plummer). The oldest MSS. do not have "Blessed art thou among women" here, but in verse 42.

Luke 1:29
Cast in her mind ( $\delta \iota \varepsilon \lambda o \gamma \downharpoonright \zeta \varepsilon \tau 0)$. Imperfect indicative. Note aorist $\delta \iota \varepsilon \tau \alpha \rho \alpha \chi \theta \eta$. Common verb for reckoning up different reasons. She was both upset and puzzled.

Luke 1:30
Favour ( $\chi \alpha \rho \stackrel{\nu}{ }$ ). Grace. Same root as $\chi \alpha \iota \rho \omega$ (rejoice) and $\chi \alpha \rho \iota \tau o \omega$ in verse 28. To find favour is a common O.T. phrase. Xapıs is a very ancient and common word with a variety of applied meanings. They all come from the notion of sweetness, charm, loveliness, joy, delight, like words of grace, Lu 4:22, growing grace, Eph 4:29, with grace, Col 4:6 . The notion of kindness is in it also, especially of God towards men as here. It is a favourite word for Christianity, the Gospel of the grace of God (Ac 20:24) in contrast with law or works (Joh 1:16). Gratitude is expressed also (Lu 6:32 ), especially to God (Ro 6:17).

With God ( $\pi \alpha \rho \alpha \tau \omega \theta \varepsilon \omega$ ). Beside God.
Luke 1:31
Conceive in thy womb ( $\sigma \nu \lambda \lambda \eta \mu \psi \eta \varepsilon \nu \gamma \alpha \sigma \tau \rho$ ). Adding $\varepsilon v \gamma \alpha \sigma \tau \rho$ to the verb of 1:24. Same idiom in Isa 7:14 of Immanuel.

Jesus (I $\eta \sigma o v v$ ). As to Joseph in Mt 1:21, but without the explanation of the meaning. See on Matthew.

Luke 1:32
The Son of the Most High (vios Huчıoтov). There is no article in the Greek, but the use of Most High in verse 35 clearly of God as here. In Lu 6:35 we find "sons of the Most High" (vio Huчıбтov) so that we cannot insist on deity here, though that is possible. The language of 2Sa 7:14; Isa 9:7 is combined here.

Luke 1:33
Shall be no end (ovk $\varepsilon \sigma \tau \alpha \tau \varepsilon \lambda o c)$. Luke reports the perpetuity of this Davidic kingdom over the house of Jacob with no Pauline interpretation of the spiritual Israel though that was the true meaning as Luke knew. Joseph was of the house of David (Lu 1:27) and Mary also apparently (Lu 2:5).

Luke 1:35
Shall overshadow thee ( $\varepsilon \pi \iota \sigma \kappa \iota \alpha \sigma \varepsilon)$. A figure of a cloud coming upon her. Common in ancient Greek in the sense of obscuring and with accusative as of Peter's shadow in Ac 5:15 . But we have seen it used of the shining bright cloud at the Transfiguration of Jesus (Mt 17:5; Mr 9:7; Lu 9:34 ). Here it is like the Shekinah glory which suggests it (Ex 40:38) where the cloud of glory represents the presence and power of God.

Holy, the Son of God (Haүıov vios $\theta$ عov). Here again the absence of the article makes it possible for it to mean "Son of God." See Mt 5:9. But this title, like the Son of Man (Ho vos tov $\alpha v \theta \rho \omega \pi$ тov) was a recognized designation of the Messiah. Jesus did not often call himself Son of God (Mt 27:43 ), but it is assumed in his frequent use of the Father, the Son (Mt 11:27; Lu 10:21; Joh 5:19ff. ). It is the title used by the Father at the baptism (Lu 3:22) and on the Mount of Transfiguration ( $\mathrm{Lu} 9: 35$ ). The wonder of Mary would increase at these words. The Miraculous Conception or Virgin Birth of Jesus is thus plainly set forth in Luke as in Matthew. The fact that Luke was a physician gives added interest to his report.

Luke 1:36
Kinswoman ( $\sigma u \gamma \gamma \varepsilon v ı$ ). Not necessarily cousin, but simply relative.
Luke 1:37
No word (ouk $\rho \eta \mu \alpha$ ). P $\eta \mu \alpha$ brings out the single item rather than the whole content ( $\lambda$ оүос). So in verse 38.

Luke 1:39
Arose ( $\alpha v \alpha \sigma \tau \alpha \sigma \alpha$ ). Luke is very fond of this word, sixty times against twenty-two in the rest of the N.T.

Into the hill country ( $\varepsilon ા \varsigma ~ \tau \eta \nu$ opıv$\eta \nu$ ). Luke uses this adjective twice in this context (here and 1:65) instead of to opoc, the mountains. It is an old word and is in the LXX, but nowhere else in the N.T. The name of the city where Zacharias lived is not given unless Judah here means Juttah (Jos 15:55 ). Hebron was the chief city of this part of Judea.

Luke 1:40
Saluted ( $\eta \sigma \pi \alpha \sigma \alpha \tau 0$ ). Her first glance at Elisabeth showed the truth of the angel's message. The two mothers had a bond of sympathy.

Luke 1:41
Leaped ( $\varepsilon \sigma \kappa \iota \rho \tau \eta \sigma \varepsilon v$ ). A common enough incident with unborn children (Ge 25:22), but Elisabeth was filled with the Holy Spirit to understand what had happened to Mary.

Luke 1:42
With a loud cry ( $\kappa \rho \alpha \cup \gamma \eta \mu \varepsilon \gamma \alpha \lambda \eta$ ). A moment of ecstatic excitement.
Blessed art thou ( $\varepsilon v \lambda o \gamma \eta \mu \varepsilon v \eta$ ). Perfect passive participle. A Hebraistic equivalent for the superlative.

Luke 1:43
The mother of my Lord ( $\eta \mu \eta \tau \eta \rho$ tov Kvpıo $\mu \circ v$ ). See Ps 110:1. Only by the help of the Holy Spirit could Elisabeth know that Mary was to be the mother of the Messiah.

Luke 1:45
For (ot). It is not certain whether ot here is "that" or "because." It makes good sense either way. See also 7:16. This is the first beatitude in the New Testament and it is similar to the last one in the Gospels spoken to Thomas to discourage his doubt (Joh 20:29). Elisabeth wishes Mary to have full faith in the prophecy of the angel. This song of Elisabeth is as real poetry as is that of Mary ( $1: 47-55$ ) and Zacharias ( $1: 68-70$ ). All three spoke under the power of the Holy Spirit. These are the first New Testament hymns and they are very beautiful. Plummer notes four strophes in Mary's Magnificat ( 46-48,49,50, 51-53,54,55 ). Every idea here occurs in the Old Testament, showing that Mary's mind was full of the spiritual message of God's word.

Luke 1:46
Doth magnify ( $\mu \varepsilon \gamma a \lambda \nu v \varepsilon$ ). Latin, magnificat. Harnack argues that this is also the song of Elisabeth because a few Latin MSS. have it so, but Mary is correct. She draws her material from the O.T. and sings in the noblest strain.

Luke 1:47
Hath rejoiced ( $\eta \gamma \alpha \lambda \lambda \iota \alpha \sigma \varepsilon v)$. This is aorist active indicative. Greek tenses do not correspond to those in English. The verb $\alpha \gamma \alpha \lambda \lambda \iota \alpha \omega$ is a Hellenistic word from the old Greek $\alpha \gamma \alpha \lambda \lambda \omega$. It means to exult. See the substantive $\alpha \gamma \alpha \lambda \lambda \iota \alpha \sigma \iota \varsigma$ in $\operatorname{Lu} 1: 14,44$. Mary is not excited like Elisabeth, but breathes a spirit of composed rapture.

My spirit ( $\tau$ o $\pi v \varepsilon \nu \mu \alpha \mu \circ v$ ). One need not press unduly the difference between "soul" ( $\psi v \times \eta$ ) in verse 46 and "spirit" here. Bruce calls them synonyms in parallel clauses. Vincent argues that the soul is the principle of individuality while the spirit is the point of contact between God and man. It is doubtful, however, if the trichotomous theory of man (body, soul, and spirit) is to be insisted on. It is certain that we have an inner spiritual nature for
which various words are used in Mr 12:30. Even the distinction between intellect, emotions, and will is challenged by some psychologists.

God my Saviour ( $\tau \omega \theta \varepsilon \omega \tau \omega$ бo $\tau \eta \rho \mu o v$ ). Article with each substantive. God is called Saviour in the O.T. (De 32:15, Ps 24:5; 95:1 ).

Luke 1:48
The low estate ( $\tau \eta \nu \tau \alpha \pi \varepsilon เ \nu \omega \sigma เ \nu$ ). The bride of a carpenter and yet to be the mother of the Messiah. Literal sense here as in 1:52.

Shall call me blessed ( $\mu \alpha \kappa \alpha \rho เ o v \sigma ı v \mu \varepsilon$ ). So-called Attic future of an old verb, to felicitate. Elisabeth had already given her a beatitude ( $\mu \alpha \kappa \alpha \rho ı \alpha, 1: 45$ ). Another occurs in 11:27. But this is a very different thing from the worship of Mary (Mariolatry) by Roman Catholics. See my The Mother of Jesus: Her Problems and Her Glory.

Luke 1:50
Fear ( $\varphi$ о ßov $\mu \varepsilon$ voıs). Dative of the present middle participle. Here it is reverential fear as in Ac 10:2; Col 3:22. The bad sense of dread appears in Mt 21:46; Mr 6:20; Lu 12:4 .

Luke 1:51
Showed strength ( $\varepsilon \pi о п \eta \sigma \varepsilon v$ кратоৎ). "Made might" (Wycliff). A Hebrew conception as in Ps 118:15. Plummer notes six aorist indicatives in this sentence ( 51-63), neither corresponding to our English idiom, which translates here by "hath" each time.

Imagination ( $\delta \iota \alpha v o \iota \alpha$ ). Intellectual insight, moral understanding.
Luke 1:52
Princes ( $\delta v v a \sigma \tau \alpha \varsigma)$. Our word dynasty is from this word. It comes from $\delta u v a \mu \alpha$, to be able.

Luke 1:54
Hath holpen ( $\alpha v \tau \varepsilon \lambda \alpha \beta \varepsilon \tau 0$ ). Second aorist middle indicative. A very common verb. It means to lay hold of with a view to help or succour.

Servant ( $\pi \alpha \iota \delta o \varsigma)$. Here it means "servant," not "son" or "child," its usual meaning.
Luke 1:58
Had magnified ( $\varepsilon \mu \varepsilon \gamma a \lambda u v \varepsilon v)$. Aorist active indicative. Same verb as in verse 46.
Rejoiced with her ( $\sigma \cup v \varepsilon \chi \alpha 1 \rho o v \alpha \cup \tau \eta$ ). Imperfect tense and pictures the continual joy of the neighbours, accented also by $\sigma 0 v$ - (cf. Php 2:18) in its mutual aspect.

Luke 1:59
Would have called ( $\varepsilon \kappa \alpha \lambda о \cup v)$. Conative imperfect, tried to call.
Luke 1:62
Made signs ( $\varepsilon v \varepsilon v \varepsilon v o v$ ). Imperfect tense, repeated action as usual when making signs. In 1:22 the verb used of Zacharias is $\delta \iota a v \varepsilon v \omega v$.

What he would have him called ( $\left.\tau \frac{\tau}{} \alpha v \theta \varepsilon \lambda o ~ к \alpha \lambda \varepsilon เ \sigma \theta \alpha \alpha \cup \tau o\right)$. Note article $\tau 0$ with the indirect question, accusative of general reference. The optative with $\alpha v$ is here because it was used in the direct question (cf. Ac 17:18), and is simply retained in the indirect.

What would he wish him to be called? (if he could speak ), a conclusion of the fourthclass condition.

Luke 1:63
 tablet, probably covered with wax. Sometimes it was a little table, like Shakespeare's "the table of my memory" (Hamlet, i.5). It was used also of a physician's note-book.

Wrote, saying ( $\varepsilon \gamma \rho a \psi \varepsilon v \lambda \varepsilon \gamma \omega v$ ). Hebrew way of speaking (2Ki 10:6 ).
Luke 1:64
Immediately ( $\pi \alpha \rho \alpha \chi \rho \eta \mu \alpha$ ). Nineteen times in the N.T., seventeen in Luke.
Opened ( $\alpha v \varepsilon \omega 1 \chi \theta \eta$ ). First aorist passive indicative with double augment. The verb suits "mouth," but not "tongue" ( $\gamma \lambda \omega \sigma \sigma \alpha$ ). It is thus a zeugma with tongue. Loosed or some such verb to be supplied.

Luke 1:65
Fear ( $\varphi о \beta \circ \varsigma)$. Not terror, but religious awe because of contact with the supernatural as in the case of Zacharias ( $1: 12$ ). Were noised abroad ( $\delta \iota \varepsilon \lambda \alpha \lambda \varepsilon \iota \tau 0$ ). Imperfect passive. Occurs in Polybius. In the N.T. only here and Lu 6:11. It was continuous talk back and forth between ( $\delta(\alpha)$ the people.

Luke 1:66
What then ( $\tau \alpha \rho \alpha$ ). With all these supernatural happenings they predicted the marvellous career of this child. Note T,
what, not Tis,
who. Cf. Ac 12:18 .
They laid them up ( $\varepsilon \theta \varepsilon v \tau 0$, second aorist middle indicative) as Mary did ( $2: 19$ ).
The hand of the Lord ( $\chi \varepsilon \iota \rho$ Kvpıov). Luke's explanation in addition to the supernatural events. The expression occurs only in Luke's writing (Ac 11:21; 13:11).

Luke 1:67
Prophesied ( $\varepsilon \pi \rho \circ \varphi \eta \tau \varepsilon v \sigma \varepsilon v)$. Under the guidance of the Holy Spirit. This Benedictus (Ev入oүптоя,

Blessed ) of Zacharias (68-79) may be what is referred to in verse 64 "he began to speak blessing God" ( $\varepsilon v \lambda o \gamma \omega v$ ). Nearly every phrase here is found in the O.T. (Psalms and Prophets). He, like Mary, was full of the Holy Spirit and had caught the Messianic message in its highest meaning.

Luke 1:68
Hath visited ( $\varepsilon \pi \varepsilon \sigma \kappa \varepsilon \psi \alpha \tau 0)$. An old Greek word with a Hebraic colouring to look into with a view to help. The papyri have plenty of examples of the verb in the sense of inspecting, examining.

Redemption $(\lambda \nu \tau \rho \omega \sigma v)$ here originally referred to political redemption, but with a moral and spiritual basis (verses 75,77 ).

Luke 1:69
Horn of salvation (кєраৎ $\sigma \omega \tau \eta \rho ı \alpha \varsigma)$. A common metaphor in the O.T. (1Sa 2:10; 2Sa 23:3 , etc.). It represents strength like the horns of bulls. Cf. Ps. 132:17.

Luke 1:70
Since the world began ( $\left.\alpha \pi^{\prime} \alpha \iota \omega v o \varsigma\right)$. Better "from of old" (Weymouth, American Revision).

Luke 1:73
The oath which he sware (оркоv ov $\omega \mu \sigma \sigma \varepsilon v$ ). Antecedent attracted to case of the relative. The oath appears in Ge 22:16-18. The oppression of the Gentiles seems to be in the mind of Zacharias. It is not certain how clearly he grasped the idea of the spiritual Israel as Paul saw it in Galatians and Romans.

Luke 1:74
Delivered ( $\rho v \sigma \theta \varepsilon v \tau \alpha \varsigma)$. First aorist passive participle of an old verb, $\rho v o \mu \alpha$. The accusative case appears, where the dative could have been used to agree with $\eta \mu \nu v$, because of the

to serve (from
latros, for hire). But Plato uses the word of service for God so that the bad sense does not always exist.

Luke 1:75
In holiness and righteousness ( $\varepsilon v$ обюот $\eta \tau \alpha \delta \iota \kappa \alpha \circ \sigma v \vee \eta$ ). Not a usual combination (Eph 4:24; Tit 1:8; 1Th 2:10). The Godward and the manward aspects of conduct (Bruce). Hoбıo¢, the eternal principles of right, $\delta$ เкaıos, the rule of conduct before men.

Luke 1:76
Yea and thou ( $\kappa \alpha \sigma v \delta \varepsilon$ ). Direct address to the child with forecast of his life (cf. 1:13-17).
Prophet $(\pi \rho \circ \varphi \eta \tau \eta \varsigma)$. The word here directly applied to the child. Jesus will later call John a prophet and more than a prophet.

The Lord (Kupıou). Jehovah as in 1:16.
Luke 1:77
Knowledge of salvation ( $\gamma v \omega \sigma \iota v \sigma \omega \tau \eta \rho \iota \alpha$ ). "This is the aim and end of the work of the Forerunner" (Plummer).

Luke 1:78
Tender mercy ( $\sigma \pi \lambda \alpha \gamma \chi \vee \alpha \varepsilon \lambda \varepsilon o u \varsigma)$. Bowels of mercy literally (1Pe 3:8; Jas 3:11). Revised margin has it, hearts of mercy.

The dayspring from on high (avato $\eta \varepsilon \xi$ vץouc). Literally, rising from on high, like the rising sun or stars (Isa 60:19). The word is used also of a sprouting plant or branch (Jer 23:5; Zec 6:12 ), but that does not suit here.

Shall visit ( $\varepsilon \pi \varepsilon \sigma \kappa \varepsilon \psi \varepsilon \tau \alpha)$, correct text, cf. 1:68.
Luke 1:79

To shine upon ( $\varepsilon \pi \iota \varphi \alpha \nu \alpha$ ). First aorist active infinitive of $\varepsilon \pi \iota \varphi a \iota v \omega$ (liquid verb). An old verb to give light, to shine upon, like the sun or stars. See also Ac 27:20; Tit 2:11; 3:4 .

The shadow of death ( $\sigma \kappa \iota \alpha$ Өavatov). See Ps 107:10, where darkness and shadow of death are combined as here. Cf. also Isa 9:1. See on Mt 4:16. To guide ( $\tau 0 v \kappa \alpha \tau \varepsilon v \theta v v a$ ). Genitive of the articular infinitive of purpose. The light will enable them in the dark to see how to walk in a straight path that leads to "the way of peace." We are still on that road, but so many stumble for lack of light, men and nations.

Luke 1:80
Grew ( $\eta \cup \xi \propto \vee \varepsilon$ ). Imperfect active, was growing.
Waxed strong ( $\varepsilon \kappa \rho a \tau \alpha \iota \nu \tau o)$. Imperfect again. The child kept growing in strength of body and spirit.

His shewing ( $\alpha v \alpha \delta \varepsilon ı \xi \varepsilon \omega \varsigma ~ \alpha v \tau o v)$. Here alone in the N.T. It occurs in Plutarch and Polybius. The verb appears in a sacrificial sense. The boy, as he grew, may have gone up to the passover and may have seen the boy Jesus (Lu 2:42-52), but he would not know that he was to be the Messiah. So these two boys of destiny grew on with the years, the one in the desert hills near Hebron after Zacharias and Elisabeth died, the other, the young Carpenter up in Nazareth, each waiting for "his shewing unto Israel."

## Luke 2

Luke 2:1
Decree from Caesar Augustus ( $\delta о \gamma \mu \alpha$ тара Kaıбароৎ Avүouбтov). Old and common word from $\delta$ ок $\varepsilon \omega$, to think, form an opinion. No such decree was given by Greek or Roman historians and it was for long assumed by many scholars that Luke was in error. But papyri and inscriptions have confirmed Luke on every point in these crucial verses 2:1-7. See W.M. Ramsay's books (Was Christ Born at Bethelehem? Luke the Physician. The Bearing of Recent Discovery on the Trustworthiness of the N.T.).

The World ( $\tau \eta v$ окко $\mu \varepsilon v \eta \nu$ ). Literally,
the inhabited (land, $\gamma \eta v$ ). Inhabited by the Greeks, then by the Romans, then the whole world (Roman world, the world ruled by Rome). So Ac 11:28; 17:6.

Should be enrolled ( $\alpha \pi \sigma \gamma \rho \alpha \varphi \varepsilon \sigma \theta \alpha$ ). It was a census, not a taxing, though taxing generally followed and was based on the census. This word is very old and common. It means to write or copy off for the public records, to register.

Luke 2:2
The first enrolment ( $\alpha \pi \sigma \gamma \rho \alpha \varphi \eta \pi \rho \omega \tau \eta$ ). A definite allusion by Luke to a series of censuses instituted by Augustus, the second of which is mentioned by him in Ac 5:37. This second one is described by Josephus and it was supposed by some that Luke confused the two. But Ramsay has shown that a periodical fourteen-year census in Egypt is given in dated papyri back to A.D. 20. The one in Ac 5:37 would then be A.D. 6. This is in the time of Augustus. The first would then be B.C. 8 in Egypt. If it was delayed a couple of years in Palestine by Herod the Great for obvious reasons, that would make the birth of Christ about B.C. 6 which agrees with the other known data

When Quirinius (Kvp $\quad$ viov). Genitive absolute. Here again Luke has been attacked on the ground that Quirinius was only governor of Syria once and that was A.D. 6 as shown by Josephus (Ant. XVIII. I.I). But Ramsay has proven by inscriptions that Quirinius was twice in Syria and that Luke is correct here also. See summary of the facts in my Luke the Historian in the Light of Research, pp. 118-29.

Luke 2:3
 the heading enrolment by household ( $\alpha \pi о ү \rho а \varphi \eta ~ к а т ' ~ о к к ı \alpha v) . ~ H e r e ~ a g a i n ~ L u k e ~ i s ~ v i n d i c a t e d . ~$ Each man went to the town where his family register was kept.

## Luke 2:5

To enrol himself with Mary ( $\alpha \pi \sigma \rho \alpha \psi \alpha \sigma \theta \alpha \sigma \cup \nu$ Mapıa $)$. Direct middle. "With Mary" is naturally taken with the infinitive as here. If so, that means that Mary's family register was in Bethlehem also and that she also belonged to the house of David. It is possible to connect "with Mary" far back with "went up" ( $\alpha v \varepsilon \beta \eta$ ) in verse 4, but it is unnatural to do so.

There is no real reason for doubting that Mary herself was a descendant of David and that is the obvious way to understand Luke's genealogy of Jesus in Lu 3:23-38). The Syriac Sinaitic expressly says that both Joseph and Mary were of the house and city of David.

Betrothed ( $\varepsilon \mu \nu \eta \sigma \tau \varepsilon \nu \mu \varepsilon v \eta \nu)$. Same verb as in 1:27, but here it really means "married" or "espoused" as Mt 1:24f. shows. Otherwise she could not have travelled with Joseph.

Great with child ( $\varepsilon \nu \kappa \nu \omega)$ ). Only here in N.T. Common Greek word.
Luke 2:6
That she should be delivered ( $\tau 0 \cup \tau \varepsilon \kappa \varepsilon เ \nu \alpha \cup \tau \eta v$ ).
For the bearing the child as to her. A neat use of the articular infinitive, second aorist active, with the accusative of general reference. From $\tau ו \kappa \tau \omega$, common verb.

Luke 2:7
Her firstborn ( $\tau 0 v \pi \rho \omega \tau$ тотокоv). The expression naturally means that she afterwards had other children and we read of brothers and sisters of Jesus. There is not a particle of evidence for the notion that Mary refused to bear other children because she was the mother of the Messiah.

Wrapped in swaddling clothes ( $\varepsilon \sigma \pi \alpha \rho \gamma \alpha v \omega \sigma \varepsilon v)$. From $\sigma \pi \alpha \rho \gamma \alpha v o v$, a swathing band. Only here and verse 12 in the N.T., but in Euripides, Aristotle, Hippocrates, Plutarch. Frequent in medical works.

In a manger ( $\varepsilon v \varphi a \tau v \eta$ ). In a crib in a stall whether in a cave (Justin Martyr) or connected with the inn we do not know. The cattle may have been out on the hills or the donkeys used in travelling may have been feeding in this stall or another near.

In the inn ( $\varepsilon v \tau \omega \kappa \alpha \tau \alpha \lambda \nu \mu \alpha \tau$ ). A lodging-house or khan, poor enough at best, but there was not even room in this public place because of the crowds for the census. See the word also in Lu 22:11; Mr 14:14 with the sense of guest-room (cf. $1 \mathrm{Ki} 1: 13$ ). It is the Hellenistic equivalent for кат $\gamma \omega \gamma \varepsilon \circ \circ$ and appears also in one papyrus. See Ex 4:24. There would sometimes be an inner court, a range or arches, an open gallery round the four sides. On one side of the square, outside the wall, would be stables for the asses and camels, buffaloes and goats. Each man had to carry his own food and bedding.

## Luke 2:8

Abiding in the field ( $\alpha \gamma \rho \alpha \cup \lambda$ ouvtє¢). From $\alpha \gamma \rho \circ \varsigma$, field and $\alpha \cup \lambda \eta$, court. The shepherds were making the field their court. Plutarch and Strabo use the word.

Keeping watch ( $\varphi \cup \lambda \alpha \sigma \sigma о v \tau \varepsilon \varsigma \varphi \cup \lambda \alpha \kappa \alpha \varsigma)$. Cognate accusative. They were bivouacking by night and it was plainly mild weather. In these very pastures David had fought the lion and the bear to protect the sheep (1Sa 17:34f. ). The plural here probably means that they watched by turns. The flock may have been meant for the temple sacrifices. There is no way to tell.

Luke 2:9

Stood by them ( $\varepsilon \pi \varepsilon \sigma \tau \eta$ avtoıc). Ingressive aorist active indicative. Stepped by their side. The same word in Ac 12:7 of the angel there. Paul uses it in the sense of standing by in Ac 22:20. It is a common old Greek word, $\varepsilon \varphi เ \sigma \tau \eta \mu$.

Were sore afraid ( $\varepsilon \varphi \rho \beta \eta \theta \eta \sigma \alpha v \varphi \circ \beta o v \mu \varepsilon \gamma \alpha v)$. First aorist passive indicative with cognate accusative (the passive sense gone), they feared a great fear.

Luke 2:10
I bring you good tidings of great joy ( $\varepsilon v \alpha \gamma \gamma \varepsilon \lambda_{\iota} \zeta \rho \mu \alpha \nu \mu \nu \nu \chi \alpha \rho \alpha v \mu \varepsilon \gamma \alpha \lambda \eta \nu$ ). Wycliff, "I evangelize to you a great joy." The active verb $\varepsilon \cup \alpha \gamma \gamma \varepsilon \lambda_{1} \zeta \omega$ occurs only in late Greek writers, LXX, a few papyri examples, and the N.T. The middle (deponent) appears from Aristophanes on. Luke and Paul employ both substantive $\varepsilon \Delta \alpha \gamma \gamma \varepsilon \lambda_{\iota}$ ov and verb $\varepsilon v a \gamma \gamma \varepsilon \lambda \iota \zeta \omega$ very frequently. It is to Paul's influence that we owe their frequency and popularity in the language of Christendom (George Milligan, The Epistles to the Thessalonians, p. 143). The other Gospels do not have the verb save Mt 11:5 and that in a quotation (Isa 61:1).

## Luke 2:11

Is $\beta$ opv ( $\varepsilon \tau \varepsilon \chi \theta \eta$ ). First aorist passive indicative from $\tau \iota \kappa \tau \omega$. Was born.
Saviour ( $\sigma \omega \tau \eta \rho$ ). This great word is common in Luke and Paul and seldom elsewhere in the N.T. (Bruce). The people under Rome's rule came to call the emperor "Saviour" and Christians took the word and used it of Christ. See inscriptions (Deissmann, Light from the Ancient East, p. 344).

Christ the Lord (Xpıfтos Kupıos). This combination occurs nowhere else in the N.T. and it is not clear what it really means. Luke is very fond of Kupıos ( Lord ) where the other Gospels have Jesus. It may mean "Christ the Lord," "Anointed Lord," "Messiah, Lord," "The Messiah, the Lord," "An Anointed One, a Lord," or "Lord Messiah." It occurs once in the LXX (La 4:20) and is in Ps. of Sol. 17:36. Ragg suggests that our phrase "the Lord Jesus Christ" is really involved in "A Saviour (Jesus) which is Christ the Lord." See on Mt 1:1 for Christ and Mt 21:3 for Lord.

Luke 2:13
Host ( $\sigma \tau \rho \alpha \tau 1 a \varsigma$ ). A military term for a band of soldiers common in the ancient Greek. Bengel says: "Here the army announces peace."

Praising ( $\alpha \downarrow v o u v \tau \omega v$ ). Construction according to sense (plural, though $\sigma \tau \rho \alpha \tau \iota \alpha$, is singular).

Luke 2:14
Among men in whom he is well pleased ( $\varepsilon v a v \theta \rho \omega \pi о \iota \varsigma \varepsilon v \delta о к ı \alpha \varsigma)$. The Textus Receptus (Authorized Version also has $\varepsilon v \delta o \kappa ı \alpha$, but the genitive $\varepsilon v \delta o \kappa ı \alpha \varsigma ~ i s ~ u n d o u b t e d l y ~ c o r r e c t, ~$ supported by the oldest and best uncials. (Aleph, A B D W). C has a lacuna here. Plummer justly notes how in this angelic hymn Glory and Peace correspond, in the highest and on earth, to God and among men of goodwill. It would be possible to connect "on earth" with "the highest" and also to have a triple division. There has been much objection raised to the
genitive عuסокıaৎ, the correct text. But it makes perfectly good sense and better sense. As a matter of fact real peace on earth exists only among those who are the subjects of God's goodwill, who are characterized by goodwill toward God and man. This word عuסoкıa we have already had in Mt 11:26. It does not occur in the ancient Greek. The word is confined to Jewish and Christian writings, though the papyri furnish instances of عuסокךбıc. Wycliff has it "to men of goodwill."

Luke 2:15
Said to one another ( $\varepsilon \lambda \alpha \lambda 0 u v \pi \rho o \varsigma ~ \alpha \lambda \lambda \eta \lambda o v \varsigma)$. Imperfect tense, inchoative, "began to speak," each to the other. It suggests also repetition, they kept saying,

Now ( $\delta \eta$ ). A particle of urgency.
This thing ( $\tau о ~ \rho \eta \mu \alpha$ тоvто). A Hebraistic and vernacular use of $\rho \eta \mu \alpha$ (something said) as something done. See on Lu 1:65. The ancient Greek used $\lambda o \gamma o$ o in this same way.

Luke 2:16
With haste ( $\sigma \pi \varepsilon \cup \sigma \alpha v \tau \varepsilon \varsigma)$. Aorist active participle of simultaneous action.
Found ( $\alpha v \varepsilon v \rho \alpha v$ ). Second aorist active indicative of a common Greek verb $\alpha v \varepsilon v \rho ı \sigma \kappa \omega$, but only in Luke in the N.T. The compound ava suggests a search before finding.

Luke 2:17
 common from Aeschylus on, from the root of $\gamma \iota v \omega \sigma \kappa \omega$ (to know). It is both transitive and intransitive in the N.T.

Luke 2:19
Kept ( $\sigma v v \varepsilon \tau \eta \rho \varepsilon$ ). Imperfect active. She kept on keeping together ( $\sigma v v-$ ) all these things. They were meat and drink to her. She was not astonished, but filled with holy awe. The verb occurs from Aristotle on. She could not forget. But did not Mary keep also a Baby Book? And may not Luke have seen it?

Pondering ( $\sigma v \vee \beta \alpha \lambda \lambda o v \sigma \alpha$ ). An old Greek word. Placing together for comparison. Mary would go over each detail in the words of Gabriel and of the shepherds and compare the sayings with the facts so far developed and brood over it all with a mother's high hopes and joy.

Luke 2:21
His name was called Jesus ( $\kappa \alpha \varepsilon \kappa \lambda \eta \theta \eta$ то ovoна $\alpha v \tau о v$ I $\eta \sigma о \cup \varsigma)$. The ка is left untranslated or has the sense of "then" in the apodosis. The naming was a part of the ceremony of circumcision as is shown also in the case of John the Baptist (Lu 1:59-66).

Luke 2:22
The days of their purification ( $\alpha \eta \mu \varepsilon \rho \alpha$ тov $\kappa \alpha \theta \alpha \rho \iota \sigma \mu \circ v \alpha \nu \tau \omega v$ ). The old manuscripts have "their" ( $\alpha v \tau \omega v$ ) instead of "her" ( $\alpha v \tau \eta \varsigma)$ of the later documents. But it is not clear whether "their" refers to Mary and Joseph as is true of "they brought" or to Mary and the
child. The mother was Levitically unclean for forty days after the birth of a son (Le 12:1-8 ).

To present him to the Lord ( $\pi \alpha \rho \alpha \sigma \tau \eta \sigma \alpha \tau \omega K v \rho \omega)$. Every first-born son was thus redeemed by the sacrifice (Ex 13:2-12) as a memorial of the sparing of the Israelitish families (Nu 18:15f. ). The cost was about two dollars and a half in our money.

Luke 2:23
In the law of the Lord ( $\varepsilon v v o \mu \omega$ Kvpıov). No articles, but definite by preposition and genitive. Vincent notes that "law" occurs in this chapter five times. Paul (Gal 4:4) will urge that Jesus "was made under the law" as Luke here explains. The law did not require that the child be brought to Jerusalem. The purification concerned the mother, the presentation the son.

Luke 2:24
A pair of turtledoves, or two young pigeons (Z $\varepsilon v \gamma \circ \varsigma \tau \rho \cup \gamma o v \omega \nu \eta \delta v o$ vo $\tau \sigma o v \varsigma$ $\pi \varepsilon \rho เ \sigma \tau \varepsilon \rho \omega v)$. The offspring of the poor, costing about sixteen cents, while a lamb would cost nearly two dollars. The "young of pigeons" is the literal meaning.

Luke 2:25
Devout ( $\varepsilon v \lambda \alpha \beta \eta \varsigma$ ). Used only by Luke (Ac 2:5; 8:2; 22:12 ) in the N.T. Common in ancient Greek from Plato on. It means taking hold well or carefully ( $\varepsilon v$ and $\lambda \alpha \beta \varepsilon \imath v$ ) and so reverently, circumspectly.

Looking for the consolation of Israel ( $\pi \rho о \sigma \delta \varepsilon \chi \circ \mu \varepsilon v o \varsigma \pi \alpha \rho \alpha \kappa \lambda \eta \sigma \nu \nu$ тov I $\sigma \rho \alpha \varepsilon \lambda$ ). Old Greek verb to admit to one's presence ( $\operatorname{Lu}$ 15:2 ) and then to expect as here and of Anna in verse 38.

Parakl\|sin here means the Messianic hope (Isa 11:10; 40:1), calling to one's side for cheer.

Upon him ( $\varepsilon \pi^{\prime}$ avtov). This is the explanation of his lively Messianic hope. It was due to the Holy Spirit. Simeon and Anna are representatives of real piety in this time of spiritual dearth and deadness.

Luke 2:26
It had been revealed unto him ( $\eta \nu \alpha v \tau \omega \kappa \varepsilon \chi \rho \eta \mu \alpha \tau ı \sigma \mu \varepsilon v o v$ ). Periphrastic past perfect passive indicative. Common Greek verb. First to transact business from $\chi \rho \eta \mu \alpha$ and that from $\chi \rho \alpha о \mu \alpha$, to use, make use of; then to do business with public officials, to give advice (judges, rulers, kings), then to get the advice of the Delphic and other oracles (Diodorus, Plutarch). The LXX and Josephus use it of God's commands. A Fayum papyrus of 257 B.C. has the substantive $\chi \rho \eta \mu \alpha \sigma \tau \iota \sigma \mu \circ$, for a divine response (cf. Ro 11:4). See Deissmann, Light From the Ancient East, p. 153.

Before ( $\pi \rho ı \vee \eta$ ). Classic Greek idiom after a negative to have subjunctive as here (only example in the N.T.) or the optative after past tense as in Ac 25:16 (subjunctive changed to
optative in indirect discourse). Elsewhere in the N.T. the infinitive follows $\pi \rho \iota v$ as in Mt 1:18.

Luke 2:27
 I $\eta \sigma o u v$ ). A neat Greek and Hebrew idiom difficult to render into English, very common in the LXX;

In the bringing the Child Jesus as to the parents. The articular infinitive and two accusatives (one the object, the other accusative of general reference).

After the custom of the law ( $\kappa \alpha \tau \alpha$ то $\varepsilon ө \ell \sigma \mu \varepsilon v \circ v$ тov vouov). Here the perfect passive participle $\varepsilon \nmid \theta \iota \sigma \mu \varepsilon v o v$, neuter singular from $\varepsilon \theta_{\iota} \zeta \omega$ (common Greek verb, to accustom) is used as a virtual substantive like to $\varepsilon \theta$ os in $1: 8$. Luke alone in the N.T. uses either word save $\varepsilon \theta$ os in Joh 19:40, though $\varepsilon เ \omega \theta$ a from $\varepsilon \theta \omega$, occurs also in Mt 27:15; Mr 10:1 .

Luke 2:28
Then he ( $\kappa \alpha \alpha \cup \tau о \varsigma) . ~ K \alpha$ as in 2:21. Avтoऽ, emphatic subject, he after the parents.
Arms ( $\alpha \gamma \kappa \alpha \lambda \alpha \varsigma$ ). Old Greek word, here only in the N.T. It means the curve or inner angle of the arm.

Luke 2:29
Now lettest thou ( $v v v a \pi 0 \lambda \nu \varepsilon \iota \varsigma)$. Present active indicative,
Thou art letting. The Nunc Dimittis, adoration and praise. It is full of rapture and vivid intensity (Plummer) like the best of the Psalms. The verb $\alpha \pi 0 \lambda v \omega$ was common for the manumission of slaves and Simeon here calls himself "thy slave ( $\delta o u \lambda o v ~ \sigma o v), ~ L o r d ~(~(\Delta \varepsilon \sigma \pi о \tau \alpha, ~$ our despot)." See 2Pe 2:1.

Luke 2:31
Of all the peoples ( $\pi \alpha v \tau \omega v \tau \omega v \lambda \alpha \omega v$ ). Not merely Jews. Another illustration of the universality of Luke's Gospel seen already in 1:70 in the hymn of Zacharias. The second strophe of the song according to Plummer showing what the Messiah will be to the world after having shown what the Messiah is to Simeon.

Luke 2:32
Revelation to the Gentiles ( $\alpha \pi о \kappa \alpha \lambda \nu \psi \iota v \varepsilon \theta v \omega v$ ). Objective genitive. The Messiah is to be light ( $\varphi \omega \varsigma$ ) for the Gentiles in darkness ( 1:70) and glory ( $\delta 0 \xi \alpha$ ) for Israel (cf. Ro 9:1-5; Isa 49:6 ). The word $\varepsilon \theta v o s$ originally meant just a crowd or company, then a race or nation, then the nations other than Israel (the people, o $\lambda$ oos) or the people of God. The word Gentile is Latin from gens, a tribe or nation. But the world-wide mission of the Messiah comes out clearly in these early chapters in Luke.

Luke 2:33
His father and his mother (o $\pi \alpha \tau \eta \rho$ av $\tau 0 \cup \kappa \alpha ~ \eta \mu \eta \tau \eta \rho$ ). Luke had already used "parents" in 2:27. He by no means intends to deny the Virgin Birth of Jesus so plainly stated in 1:34-38.

He merely employs here the language of ordinary custom. The late MSS. wrongly read "and Joseph" instead of "his father."

Were marvelling ( $\eta \vee \theta \alpha \nu \mu \zeta \rho \nu \tau \varepsilon \varsigma)$. The masculine gender includes the feminine when both are referred to. But $\eta v$ is singular, not $\eta \sigma \alpha v$, the normal imperfect plural in this periphrastic imperfect. This is due to the wide space between copula and participle. The copula $\eta \nu$ agrees in number with o $\pi \alpha \tau \eta \rho$ while the participle coming last agrees with both o $\pi \alpha \tau \varepsilon \rho$ $\kappa \alpha \eta \mu \eta \tau \eta \rho$ (cf. Mt 17:3; 22:40). If one wonders why they marvelled at Simeon's words after what they had heard from Gabriel, Elisabeth, and the Shepherds, he should bear in mind that every parent is astonished and pleased at the fine things others see in the child. It is a mark of unusual insight for others to see so much that is obvious to the parent. Simeon's prophecy had gone beyond the angel's outline and it was surprising that he should know anything about the child's destiny.

Luke 2:34
Is set for the falling and the rising up of many in Israel (Кદıт $\varepsilon \iota \varsigma \pi \tau \omega \sigma เ v \kappa \alpha \alpha v \alpha \sigma \tau \alpha \sigma \iota \nu$ $\pi о \lambda \lambda \omega v \varepsilon v \tau \omega \operatorname{I\sigma } \rho a \eta \lambda)$. Present indicative of the old defective verb appearing only in present and imperfect in the N.T. Sometimes it is used as the passive of $\tau i \theta \eta \mu$ as here. The falling of some and the rising up of others is what is meant. He will be a stumbling-block to some (Isa 8:14; Mt 21:42,44; Ro 9:33; 1Pe 2:16f.) who love darkness rather than light (Joh 3:19), he will be the cause of rising for others (Ro 6:4,9; Eph 2:6 ). "Judas despairs, Peter repents: one robber blasphemes, the other confesses" (Plummer). Jesus is the magnet of the ages. He draws some, he repels others. This is true of all epoch-making men to some extent.

Spoken against ( $\alpha v \tau i \lambda \varepsilon \gamma \circ \mu \varepsilon v o v$ ). Present passive participle, continuous action. It is going on today. Nietzsche regarded Jesus Christ as the curse of the race because he spared the weak.

Luke 2:35
A sword ( $\rho о \mu \varphi \alpha ı \alpha$ ). A large sword, properly a long Thracian javelin. It occurs in the LXX of Goliath's sword (1Sa 17:51 ). How little Mary understood the meaning of Simeon's words that seemed so out of place in the midst of the glorious things already spoken, a sharp thorn in their roses, a veritable bitter-sweet. But one day Mary will stand by the Cross of Christ with this Thracian javelin clean through her soul, $\sigma \tau \alpha \beta a \tau$ Mate $\Delta \mathrm{o}$ оо 0 oбa (Joh 19:25 ). It is only a parenthesis here, and a passing cloud perhaps passed over Mary's heart already puzzled with rapture and ecstasy.

May be revealed ( $\alpha \pi о \kappa \alpha \lambda \nu \varphi \theta \omega \sigma \tau v$ ). Unveiled. First aorist passive subjunctive after $o \pi \omega \varsigma \alpha v$ and expresses God's purpose in the mission of the Messiah. He is to test men's thoughts ( $\delta \iota \alpha \lambda o \gamma เ \sigma \mu \circ)$ and purposes. They will be compelled to take a stand for Christ or against him. That is true today.

Luke 2:36

One Anna a prophetess (Havva $\pi \rho \circ \varphi \eta \tau \iota \varsigma)$. The word $\pi \rho о \varphi \eta \tau \iota \varsigma$ occurs in the N.T. only here and Re 2:20. In old Greek writers it means a woman who interprets oracles. The long parenthesis into verse 37 tells of her great age. Montefiore makes it 106 as she was 15 when married, married 7 years, a widow 84 .

Luke 2:37
 leaving. The Spirit kept her in the temple as he led Simon to the temple (Plummer). The case of "the temple" ( $\tau 0 \cup$ וєpov) is ablative.

Night and day ( $v \cup \kappa \tau \alpha \kappa \alpha \eta \mu \varepsilon \rho \alpha v$ ). Accusative of duration of time, all night and all day. She never missed a service in the temple.

Luke 2:38
Coming up ( $\varepsilon \pi \iota \sigma \tau \alpha \sigma \alpha)$. Second aorist active participle. The word often has the notion of coming suddenly or bursting in as of Martha in Lu 10:40. But here it probably means coming up and standing by and so hearing Simeon's wonderful words so that her words form a kind of footnote to his.

Gave thanks ( $\alpha v \theta \omega \mu \circ \lambda$ o $\gamma \varepsilon \iota \tau o$ ). Imperfect middle of a verb ( $\alpha v \theta$ o $\mu \mathrm{o} \lambda \mathrm{\lambda} \gamma \boldsymbol{\varepsilon} \omega$ ) in common use in Greek writers and in the LXX though here alone in the N.T. It had the idea of a mutual agreement or of saying something before one ( $\alpha v \tau$ ). Anna was evidently deeply moved and repeated her thanksgiving and kept speaking ( $\varepsilon \lambda \alpha \lambda \varepsilon$, imperfect again) "to all them that were looking for ( $\pi \rho \circ \sigma \delta \varepsilon \chi \circ \mu \varepsilon v o \iota$, as in 1:35 of Simeon) the redemption of Jerusalem ( $\lambda \nu \tau \rho \omega \sigma \iota \operatorname{I\varepsilon \rho ov\sigma \alpha \lambda \eta \mu \text {)."Therewasevidentlyagroupofsuchspiritsthatgatheredinthe}}$ temple either men around her and Simeon or whom she met from time to time. There was thus a nucleus of old saints in Jerusalem prepared for the coming of the Messiah when he at last appears as the Messiah in Jerusalem (John 2 and 3). These probably all passed away. But they had a happy hour of hope and joy. The late MSS. have "in Jerusalem" but "of Jerusalem" is correct. What they meant by the "redemption of Jerusalem" is not clear, whether political or spiritual or both. Simeon was looking for the consolation of Israel ( $2: 25$ ) and Zacharias ( 1:68) sang of redemption for Israel (Isa 40:2 ).

Luke 2:39
To their own city Nazareth ( $\varepsilon เ \varsigma \pi o \lambda \iota v \varepsilon \alpha v \tau \omega v N \alpha \zeta \alpha \rho \varepsilon \tau)$. See on Mt 2:23 about Nazareth. Luke tells nothing of the flight to Egypt and the reason for the return to Nazareth instead of Bethlehem, the place of the birth of Jesus as told in Mt 2:13-23. But then neither Gospel gives all the details of this period. Luke has also nothing about the visit of the wise men (Mt 2:1-12) as Matthew tells nothing of the shepherds and of Simeon and Anna (Lu 2:8-28). The two Gospels supplement each other.

Luke 2:40
The child grew ( $\eta \cup \xi \alpha v \varepsilon$ ). Imperfect indicative of a very ancient verb ( $\alpha v \xi \alpha v \omega$ ). This child grew and waxed strong (eкратаıоито, imperfect middle), a hearty vigorous little boy
( $\pi \alpha \iota \delta \iota o v)$. Both verbs Luke used in 1:80 of the growth of John the Baptist as a child. Then he used also $\pi \nu \varepsilon \cup \mu \alpha \tau$, in spirit. Here in addition to the bodily development Luke has "filled with wisdom" ( $\pi \lambda \eta \rho o v \mu \varepsilon v o v \sigma o \varphi เ \alpha)$. Present passive participle, showing that the process of filling with wisdom kept pace with the bodily growth. If it were only always true with others! We need not be troubled over this growth in wisdom on the part of Jesus any more than over his bodily growth. "The intellectual, moral, and spiritual growth of the Child, like the physical, was real. His was a perfect humanity developing perfectly, unimpeded by hereditary or acquired defects. It was the first instance of such a growth in history. For the first time a human infant was realizing the ideal of humanity" (Plummer).

The grace of God ( $\chi \alpha \rho ı \varsigma \theta \varepsilon o v$ ). In full measure.
Luke 2:41
Every year (кат' عтос). This idiom only here in the N.T., a common Greek construction. Every male was originally expected to appear at the passover, pentecost, and tabernacles (Ex 23:14-17; 34:23; De 16:16 ). But the Dispersion rendered that impossible. But pious Palestinian Jews made a point of going at least to the passover. Mary went with Joseph as a pious habit, though not required by law to go.

Luke 2:42
Twelve years old ( $\varepsilon \tau \omega \nu \delta \omega \delta \varepsilon \kappa \alpha)$. Predicate genitive. Luke does not say that Jesus had not been to Jerusalem before, but at twelve a Jewish boy became a "son of the law" and began to observe the ordinances, putting on the phylacteries as a reminder.

They went up ( $\alpha v \alpha \beta \alpha \iota v o v \tau \omega v \alpha \nu \tau \omega v$ ). Genitive absolute with present active participle, a loose construction here, for the incident narrated took place after they had gone up, not while they were gong up. "On their usual going up" (Plummer).

Luke 2:43
When they had fulfilled the days ( $\tau \varepsilon \lambda \varepsilon \epsilon \omega \sigma \alpha \nu \tau \omega v \tau \alpha \varsigma \eta \mu \varepsilon \rho \alpha \varsigma)$. Genitive absolute again, but aorist participle (effective aorist). "The days" may mean the full seven days (Ex 12:15f.; Le 23:6-8; De 16:3 ), or the two chief days after which many pilgrims left for home.

As they were returning ( $\varepsilon \nu \tau \omega$ v $\tau о \sigma \tau \rho \varepsilon \varphi \varepsilon ו \nu \alpha \nu \tau 0 v \varsigma)$. The articular infinitive with $\varepsilon \nu$, a construction that Luke often uses (1:21; 2:27).

The boy, Jesus (Inoous o тaıc). More exactly, "Jesus the boy." In verse 40 it was "the child " ( $\tau \mathrm{o} \pi \alpha \iota \delta \iota \circ$ ), here it is "the boy" (o тaıৎ, no longer the diminutive form). It was not disobedience on the part of "the boy" that made him remain behind, but intense interest in the services of the temple; "involuntary preoccupation" (Bruce) held him fast.

Luke 2:44
In the company ( $\varepsilon v \tau \eta \sigma \cup v o \delta i \alpha)$. The caravan going together on the road or way ( $\sigma \cup v$, odoc), a journey in company, then by metonymy the company itself. A common Greek word (Plutarch, Strabo, etc.). The women usually went ahead and the men followed. Joseph
may have thought Jesus was with Mary and Mary that he was with Joseph. "The Nazareth caravan was so long that it took a whole day to look through it" (Plummer).

They sought for him ( $\alpha v \varepsilon \zeta \eta \tau 0 u v$ avtov). Imperfect active. Common Greek verb. Note force of $\alpha v \alpha$. They searched up and down, back and forth, a thorough search and prolonged, but in vain.

Luke 2:45
Seeking for him ( $\alpha v \alpha\lceil\eta \tau$ тouvteऽ $\alpha \cup \tau \circ v$ ). Present participle of the same verb. This was all that was worth while now, finding the lost boy.

Luke 2:46
After three days ( $\mu \varepsilon \tau \alpha \eta \mu \varepsilon \rho \alpha \varsigma \tau \rho \varepsilon \iota \varsigma)$. One day out, one day back, and on the third day finding him.

In the temple ( $\varepsilon v \tau \omega \tau \varepsilon \rho \omega)$. Probably on the terrace where members of the Sanhedrin gave public instruction on sabbaths and feast-days, so probably while the feast was still going on. The rabbis probably sat on benches in a circle. The listeners on the ground, among whom was Jesus the boy in a rapture of interest.

Both hearing them and asking them questions ( $\kappa \alpha \alpha \kappa о \cup о \nu \tau \alpha \alpha \cup \tau \omega \nu \kappa \alpha \varepsilon \pi \varepsilon \rho \omega \tau \omega \nu \tau \alpha$ avtous). Paul sat at the feet of Gamaliel (Ac 22:3). Picture this eager boy alive with interest. It was his one opportunity in a theological school outside of the synagogue to hear the great rabbis expound the problems of life. This was the most unusual of all children, to be sure, in intellectual grasp and power. But it is a mistake to think that children of twelve do not think profoundly concerning the issues of life. What father or mother has ever been able to answer a child's questions?

Luke 2:47
Were amazed ( $\varepsilon \xi \sigma \tau \alpha v \tau 0)$. Imperfect indicative middle, descriptive of their continued and repeated astonishment. Common verb $\varepsilon \xi$ ৷бт $\mu \mu$ meaning that they stood out of themselves as if their eyes were bulging out. The boy had a holy thirst for knowledge (Plummer), and he used a boy's way of learning.

At his understanding ( $\varepsilon \pi \tau \eta \sigma u v \varepsilon \sigma \varepsilon$ ). Based on ( $\varepsilon \pi$ ), the grasp and comprehension from $\sigma u v i \eta \mu$, comparing and combining things. Cf. Mr 12:33.

His answers ( $\tau \alpha \iota \varsigma ~ \alpha \pi о к \rho \iota \sigma \varepsilon \sigma \iota v ~ \alpha u \tau o v) . ~ I t ~ i s ~ n o t ~ d i f f i c u l t ~ t o ~ a s k ~ h a r d ~ q u e s t i o n s, ~ b u t ~ t h i s ~$ boy had astounding answers to their questions, revealing his amazing intellectual and spiritual growth.

Luke 2:48
They were astonished ( $\varepsilon \xi \varepsilon \pi \lambda \alpha \gamma \eta \sigma \alpha v)$. Second aorist passive indicative of an old Greek word ( $\varepsilon \kappa \pi \lambda \eta \sigma \sigma \omega)$, to strike out, drive out by a blow. Joseph and Mary "were struck out" by what they saw and heard. Even they had not fully realized the power in this wonderful boy. Parents often fail to perceive the wealth of nature in their children.

Luke 2:49

Son ( $\tau \varepsilon \kappa v o v)$. Child, literally. It was natural for Mary to be the first to speak.
Why (T). The mother's reproach of the boy is followed by a confession of negligence on her part and of Joseph ( sorrowing , oठuv $\omega \mu \varepsilon v o$ ).

Thy father (o $\pi \alpha \tau \varepsilon \rho$ бov). No contradiction in this. Alford says: "Up to this time Joseph had been so called by the holy child himself, but from this time never."

Sought ( $\varepsilon \zeta \eta \tau 0 \cup \mu \varepsilon v)$. Imperfect tense describing the long drawn out search for three days.

How is it that (T or). The first words of Jesus preserved to us. This crisp Greek idiom without copula expresses the boy's amazement that his parents should not know that there was only one possible place in Jerusalem for him.

I must be ( $\delta \varepsilon \varepsilon ו v \propto \mu \varepsilon$ ). Messianic consciousness of the necessity laid on him. Jesus often uses $\delta \varepsilon$ (must) about his work. Of all the golden dreams of any boy of twelve here is the greatest.

In my Father's house ( $\varepsilon v$ tois $\operatorname{\tau ov} \pi \alpha \tau \rho \circ \varsigma \mu \circ v$ ). Not "about my Father's business," but "in my Father's house" (cf. Ge 41:51 ). Common Greek idiom. And note "my," not "our." When the boy first became conscious of his peculiar relation to the Father in heaven we do not know. But he has it now at twelve and it will grow within him through the years ahead in Nazareth.

Luke 2:50
They understood not (ov $\sigma v v \eta \kappa \alpha v$ ). First aorist active indicative (one of the k aorists). Even Mary with all her previous preparation and brooding was not equal to the dawning of the Messianic consciousness in her boy. "My Father is God," Jesus had virtually said, "and I must be in His house." Bruce observes that a new era has come when Jesus calls God "Father," not $\Delta \varepsilon \sigma \pi$ otec. "Even we do not yet fully understand" (Bruce) what Jesus the boy here said.

Luke 2:51
He was subject unto them ( $\eta \vee \cup \pi о \tau \alpha \sigma \sigma \circ \mu \varepsilon v o \varsigma ~ a v \tau o เ \varsigma) . ~ P e r i p h r a s t i c ~ i m p e r f e c t ~ p a s s i v e . ~$ He continued subject unto them, this wondrous boy who really knew more than parents and rabbis, this gentle, obedient, affectionate boy. The next eighteen years at Nazareth (Lu 3:23 ) he remained growing into manhood and becoming the carpenter of Nazareth (Mr 6:3) in succession to Joseph (Mt 13:55) who is mentioned here for the last time. Who can tell the wistful days when Jesus waited at Nazareth for the Father to call him to his Messianic task?

Kept ( $\delta เ \varepsilon \tau \eta \rho \varepsilon$ ). Imperfect active. Ancient Greek word ( $\delta ı a \tau \eta \rho \varepsilon \omega$ ), but only here and Ac 15:29 in the N.T. though in Ge 37:11. She kept thoroughly $(\delta \Delta \alpha)$ all these recent sayings (or things, $\rho \eta \mu \alpha \tau \alpha$ ). In 2:19 $\sigma u v \varepsilon \tau \eta \rho \varepsilon$ is the word used of Mary after the shepherds left. These she kept pondering and comparing all the things. Surely she has a full heart now. Could she foresee how destiny would take Jesus out beyond her mother's reach?

Luke 2:52
Advanced in wisdom and stature ( $\pi \rho о \varepsilon к о \pi \tau \varepsilon v \tau \eta \sigma о \varphi \iota \alpha \kappa \alpha \eta \lambda \iota \kappa \iota \alpha$ ). Imperfect active, he kept cutting his way forward as through a forest or jungle as pioneers did. He kept growing in stature ( $\eta \lambda_{\iota}$ เı $\alpha$ may mean age, as in 12:25, but stature here) and in wisdom (more than mere knowledge). His physical, intellectual, moral, spiritual development was perfect. "At each stage he was perfect for that stage" (Plummer).

In favour ( $\chi \alpha \rho \iota \tau$ ). Or grace. This is ideal manhood to have the favour of God and men.

## Luke 3

Luke 3:1
Now in the fifteenth year ( $\varepsilon \nu \varepsilon \tau \varepsilon \delta \varepsilon \pi \varepsilon v \tau \varepsilon \kappa \alpha \iota \delta \varepsilon \kappa \alpha \tau \omega$ ). Tiberius Caesar was ruler in the provinces two years before Augustus Caesar died. Luke makes a six-fold attempt here to indicate the time when John the Baptist began his ministry. John revived the function of the prophet ( $\mathrm{E} \chi \chi \varepsilon \mathrm{Ho}_{\mathrm{H}} \mathrm{o}, \mathrm{p} .2$ ) and it was a momentous event after centuries of prophetic silence. Luke begins with the Roman Emperor, then mentions Pontius Pilate Procurator of Judea, Herod Antipas Tetrarch of Galilee (and Perea), Philip, Tetrarch of Iturea and Trachonitis, Lysanias, Tetrarch of Abilene (all with the genitive absolute construction) and concludes with the high-priesthood of Annas and Caiaphas (son-in-law and successor of Annas). The ancients did not have our modern system of chronology, the names of rulers as here being the common way. Objection has been made to the mention of Lysanias here because Josephus (Ant. XXVII. I) tells of a Lysanias who was King of Abila up to B.C. 36 as the one referred to by Luke with the wrong date. But an inscription has been found on the site of Abilene with mention of "Lysanias the tetrarch" and at the time to which Luke refers (see my Luke the Historian in the Light of Research, pp. 167f.). So Luke is vindicated again by the rocks.

## Luke 3:2

The Word of God came unto John ( $\varepsilon \gamma \varepsilon v \varepsilon \tau о \rho \eta \mu \alpha \theta \varepsilon o v \varepsilon \pi I \omega \alpha \nu \eta \nu$ ). The great epoch marked by $\varepsilon \gamma \varepsilon v \varepsilon \tau$ rather than $\eta \nu$. P $\eta \mu \alpha \theta \varepsilon o v$ is some particular utterance of God (Plummer), common in LXX, here alone in the N.T. Then John is introduced as the son of Zacharias according to Chapter 1. Matthew describes him as the Baptist, Mark as the Baptizer. No other Gospel mentions Zacharias. Mark begins his Gospel here, but Matthew and Luke have two Infancy Chapters before. Luke alone tells of the coming of the word to John. All three Synoptics locate him "in the wilderness" ( $\varepsilon \nu \tau \eta \varepsilon \rho \eta \mu \omega)$ as here, Mr 1:4; Mt 3:1 (adding "of Judea").

Luke 3:3
All the region round about Jordan ( $\pi \alpha \sigma \alpha v \pi \varepsilon \rho \iota \chi \omega \rho o v \tau 0 v$ Io $\delta \alpha \alpha v o v$ ). The wilderness was John's abode ( $1: 80$ ) so that he began preaching where he was. It was the plain (Ge 13:10f. ) or valley of the Jordan, El Ghor, as far north as Succoth (2Ch 4:17). Sometimes he was on the eastern bank of the Jordan (Joh 10:40 ), though usually on the west side. His baptizing kept him near the river.

The baptism of repentance unto remission of sins ( $\beta \alpha \pi \tau \iota \sigma \alpha \mu \varepsilon \tau \alpha v o \iota \alpha \varsigma ~ \varepsilon \iota \varsigma ~ \alpha \varphi \varepsilon \sigma \iota v$ $\alpha \mu \alpha \rho \tau \iota \omega v)$. The same phrase as in Mr 1:4, which see for discussion of these important words. The word remission ( $\alpha \varphi \varepsilon \sigma \iota \varsigma$ ) "occurs in Luke more frequently than in all the other New Testament writers combined" (Vincent). In medical writers it is used for the relaxing of disease.

Luke 3:4
As it is written ( $\omega \varsigma \gamma \varepsilon \gamma \rho \alpha \pi \tau \alpha$ ). The regular formula for quotation, perfect passive indicative of $\gamma \rho \alpha \varphi \omega$.

Isaiah the prophet (Eбalov tov $\pi \rho \circ \varphi \eta \tau \sigma v)$. The same phrase in Mr 1:2 (correct text) and Mt 3:3. Mark, as we have seen, adds a quotation from Mal 3:1 and Luke gives verses 4 and 5 of Isa. 40 not in Matthew or Mark (Lu 3:5,6 ). See Mt 3:3; Mr 1:3 for discussion of Luke 4:4.

Luke 3:5
Valley $(\varphi \alpha \rho a \gamma \xi)$. Here only in the N.T., though in the LXX and ancient Greek. It is a ravine or valley hedged in by precipices.

Shall be filled ( $\pi \lambda \eta \rho \omega \theta \eta \sigma \varepsilon \tau \alpha)$. Future passive indicative of $\pi \lambda \eta \rho o \omega$. In 1845 when the Sultan visited Brusa the inhabitants were called out to clear the roads of rocks and to fill up the hollows. Oriental monarchs often did this very thing. A royal courier would go ahead to issue the call. So the Messiah sends his herald (John) before him to prepare the way for him. Isaiah described the preparation for the Lord's triumphal march and John used it with great force.

Hill (ßovvoc). Called a Cyrenaic word by Herodotus, but later Greek writers use it as does the LXX.

Brought low ( $\tau \alpha \pi \varepsilon \iota v \omega \theta \eta \sigma \varepsilon \tau \alpha)$. Future passive indicative of $\tau \alpha \pi \varepsilon \iota \nu 0 \omega$. Literal meaning here of a verb common in the metaphorical sense.

Crooked ( $\left.\sigma \kappa о \lambda_{\imath} \alpha\right)$. Common word, curved, opposite of o $\rho \theta$ os or $\varepsilon v \theta v \varsigma$, straight.
Luke 3:6
All flesh $(\pi \alpha \sigma \alpha \sigma \alpha \rho \xi)$. Used in the N.T. of the human race alone, though in the LXX brutes are included.

The salvation of God ( $\tau 0 \sigma o \tau \eta \rho \iota v \tau \tau v \theta \varepsilon o v$ ). The saving act of God. This phrase aptly describes Luke's Gospel which has in mind the message of Christ for all men. It is the universal Gospel.

## Luke 3:7

To the multitude that went out ( $\tau о \iota \varsigma \varepsilon \xi \pi о \rho \varepsilon v o \mu \varepsilon v o \iota \varsigma ~ o \chi \lambda о \iota \varsigma) . ~ P l u r a l, ~$
Multitudes. The present participle also notes the repetition of the crowds as does $\varepsilon \lambda \varepsilon \gamma \varepsilon v$ (imperfect), he used to say. Mt 3:7-10 singles out the message of John to the Pharisees and Sadducees, which see for discussion of details. Luke gives a summary of his preaching to the crowds with special replies to these inquiries: the multitudes, 10,11 , the publicans 12,13 , the soldiers 14 .

To be baptized of him ( $\beta a \pi \tau \iota \sigma \theta \eta v \alpha v \pi^{\prime} \alpha v \tau o v$ ). This is the purpose of their coming. Mt 3:7 has simply "to his baptism." John's metaphors are from the wilderness (vipers, fruits, axe, slave boy loosing sandals, fire, fan, thrashing-floor, garner, chaff, stones).

Who warned you? ( $\tau \iota \varsigma \varepsilon \pi \varepsilon \delta \varepsilon ı \xi \varepsilon v ~ v \mu \nu v ;$ ). The verb is like our "suggest" by proof to eye, ear, or brain (Lu 6:47; 12:5; Ac 9:16; 20:35; Mt 3:7 ). Nowhere else in the N.T. though common ancient word ( $v \pi 0 \delta \varepsilon \varepsilon \kappa v v \mu$, show under, point out, give a tip or private hint).

Luke 3:10
Asked ( $\varepsilon \pi \eta \rho \omega \tau \omega v$ ). Imperfect tense, repeatedly asked.
What then must we do? ( $\tau$ ouv $\pi o \imath \eta \sigma \omega \mu \varepsilon v$;). Deliberative aorist subjunctive. More exactly,

What then are we to do,
What then shall we do? Same construction in verses 12,14. The ouv refers to the severe things already said by John (Lu 3:7-9).

Luke 3:11
Coats ( $\chi ı \tau \omega v \alpha)$ ). The inner and less necessary undergarment. The outer indispensable unatıov is not mentioned. Note the specific and different message to each class. John puts his finger on the weaknesses of the people right before him.

Luke 3:12
Also publicans ( $\kappa \alpha \tau \varepsilon \lambda \omega v \alpha$ ). We have had the word already in Matthew (Mt 5:46; 9:10; 11:19; 18:17; 21:31f. ) and Mark (Mr 11:15f. ). It is sometimes coupled with harlots and other sinners, the outcasts of society. The word is made up from $\tau \varepsilon \lambda \rho \varsigma$, tax, and $\omega v \varepsilon \circ \mu \alpha$, to buy, and is an old one. The renter or collector of taxes was not popular anywhere, but least of all when a Jew collected taxes for the Romans and did it by terrible graft and extortions.

Extort ( $\pi \rho \alpha \sigma \sigma \varepsilon \tau \varepsilon$ ). The verb means only to do or practice, but early the tax-collectors learned how to "do" the public as regular "blood-suckers." Lucian links them with crows and sycophants.

Luke 3:14
Soldiers also (ка $\sigma \tau \rho a \tau \varepsilon v о \mu \varepsilon v o$ ). Men on service, militantes rather than milites (Plummer). So Paul in 2Ti 2:4. An old word like $\sigma \tau \rho \alpha \tau \omega \omega \tau \eta \varsigma$, soldier. Some of these soldiers acted as police to help the publicans. But they were often rough and cruel.

Do violence to no man ( $\mu \eta \delta \varepsilon v \alpha$ $\delta ı \alpha \sigma \varepsilon ı \sigma \eta \tau \varepsilon$ ). Here only in the N.T., but in the LXX and common in ancient Greek. It means to shake (seismic disturbance, earthquake) thoroughly ( $\delta(\alpha)$ and so thoroughly to terrify, to extort money or property by intimidating (3Macc. 7:21). The Latin employs concutere, so. It was a process of blackmail to which Socrates refers (Xenophon, Memorabilia, ii. 9,1). This was a constant temptation to soldiers. Might does not make right with Jesus.

Neither exact anything wrongfully ( $\mu \eta \delta \varepsilon \sigma \cup \kappa о \varphi a \nu \tau \eta \sigma \eta \tau \varepsilon$ ). In Athens those whose business it was to inform against any one whom they might find exporting figs out of Attica were called fig-showers or sycophants ( $\sigma \cup к о \varphi \alpha \nu \tau \alpha)$. From $\sigma \cup \kappa о \nu$, fig, and $\varphi \alpha \iota v \omega$, show. Some modern scholars reject this explanation since no actual examples of the word meaning merely a fig-shower have been found. But without this view it is all conjectural. From the
time of Aristophanes on it was used for any malignant informer or calumniator. These soldiers were tempted to obtain money by informing against the rich, blackmail again. So the word comes to mean to accuse falsely. The sycophants came to be a regular class of informers or slanderers in Athens. Socrates is quoted by Xenophon as actually advising Crito to employ one in self-defence, like the modern way of using one gunman against another. Demosthenes pictures a sycophant as one who "glides about the market like a scorpion, with his venomous sting all ready, spying out whom he may surprise with misfortune and ruin and from whom he can most easily extort money, by threatening him with an action dangerous in its consequences" (quoted by Vincent). The word occurs only in Luke in the N.T., here and in Lu 19:8 in the confession of Zaccheus. It occurs in the LXX and often in the old Greek.

Be content with your wages ( $\alpha \rho \kappa \varepsilon \sigma \theta \varepsilon \varepsilon$ тoı $о \psi \omega v$ voı $\nu \mu \omega v$ ). Discontent with wages was a complaint of mercenary soldiers. This word for wages was originally anything cooked (o $\%$ ov, cooked food), and bought (from $\omega v \varepsilon o \mu \alpha$, to buy). Hence, "rations," "pay," wages. O $\psi \alpha \rho \circ \rho$, diminutive of o $\%$ ov, was anything eaten with bread like broiled fish. So o $\psi \omega v \iota o v$ comes to mean whatever is bought to be eaten with bread and then a soldier's pay or allowance (Polybius, and other late Greek writers) as in 1Co 9:7. Paul uses the singular of a preacher's pay (2Co 11:8) and the plural of the wages of $\sin$ (Ro 6:23) $=$ death (death is the diet of $\sin$ ).

Luke 3:15
Were in expectation ( $\pi \rho \circ \sigma \delta o \kappa \omega \nu \tau \circ \varsigma)$. Genitive absolute of this striking verb already seen in 1:21.

Reasoned ( $\delta 1 \alpha \lambda o \gamma \iota \zeta_{o \mu \varepsilon v \omega v) \text { ). Genitive absolute again. John's preaching about the }}$ Messiah and the kingdom of God stirred the people deeply and set them to wondering.

Whether haply he were the Christ ( $\mu \eta \pi о \tau \varepsilon \alpha \cup \tau о \varsigma \varepsilon \emptyset\rceil$ о X $\rho \circ \tau \tau \varsigma)$. Optative $\varepsilon \eta \eta$ in indirect question changed from the indicative in the direct (Robertson, Grammar, p. 1031). John wrought no miracles and was not in David's line and yet he moved people so mightily that they began to suspect that he himself (avtoc) was the Messiah. The Sanhedrin will one day send a formal committee to ask him this direct question (Joh 1:19).

Luke 3:16
He that is mightier than I (o ו $\sigma \chi \cup \rho o \tau \varepsilon \rho о \varsigma ~ \mu о v)$. Like Mr 1:7, "the one mightier than I." Ablative case ( $\mu \mathrm{\rho} \boldsymbol{\nu}$ ) of comparison. John would not turn aside for the flattery of the crowd. He was able to take his own measure in comparison with the Messiah and was loyal to him (see my John the Loyal). Compare Lu 3:16 with Mr 1:7f. and Mt 3:11f. for discussion of details. Luke has "fire" here after "baptize with the Holy Ghost" as Mt 3:11, which see. This bold Messianic picture in the Synoptic Gospels shows that John saw the Messiah's coming as a judgment upon the world like fire and the fan of the thrashing-floor, and with unquenchable fire for the chaff ( Lu 3:17; Mt 3:12). But he had the spiritual conception also, the baptism
in the Holy Spirit which will characterize the Messiah's Mission and so will far transcend the water baptism which marked the ministry of John.

Luke 3:18
Many other exhortations ( $\pi \mathrm{o} \lambda \lambda \alpha \mu \varepsilon \nu$ ouv $\kappa \alpha \varepsilon \tau \varepsilon \rho \alpha$ ). Literally, many and different things did John $\varepsilon \varsigma a v \gamma \varepsilon \lambda_{l} \zeta_{\varepsilon}, \varepsilon v a \gamma \gamma \varepsilon \lambda_{l} \zeta \varepsilon \tau 0$, to the people. Luke has given a bare sample of the wonderful messages of the Baptist. Few as his words preserved are they give a definite and powerful conception of his preaching.

Luke 3:19
Reproved ( $\varepsilon \lambda \varepsilon \gamma \chi \circ \mu \varepsilon v o c)$. Present passive participle of $\varepsilon \lambda \varepsilon \gamma \chi \omega$, an old verb meaning in Homer to treat with contempt, then to convict (Mt 18:15), to expose (Eph 5:11), to reprove as here. The substantive $\varepsilon \lambda \varepsilon \gamma \chi \circ \rho$ means proof (Heb 11:1) and $\varepsilon \lambda \varepsilon \gamma \mu \mathrm{\mu}$, censure (2Ti 3:16 ). Josephus (Ant. XVIII. V.4) shows how repulsive this marriage was to Jewish feeling.

Evil things ( $\pi \circ v \eta \rho \omega v$ ). Incorporated into the relative sentence. The word is from $\pi$ rovor, $\pi o v \varepsilon \omega$, toil, work, and gives the active side of evil, possibly with the notion of work itself as evil or at least an annoyance. The "evil eye" (o $\varphi \theta \alpha \lambda \mu \circ \varsigma \pi о v \eta \rho o \varsigma$ in $\operatorname{Mr} 7: 22$ ) was a "mischief working eye" (Vincent). In Mt 6:23 it is a diseased eye. So Satan is "the evil one" (Mt 5:37; 6:13 , etc.). It is a very common adjective in the N.T. as in the older Greek.

Had done ( $\varepsilon \pi o \not \eta \sigma \varepsilon v$ ). Aorist active indicative, not past perfect, merely a summary constative aorist,
he did.
Luke 3:20
Added ( $\pi \rho \circ \sigma \varepsilon \theta \eta \kappa \varepsilon v$ ). First aorist active indicative (kappa aorist). Common verb ( $\pi \rho \circ \sigma \pi(\theta \eta \mu$ ) in all Greek. In N.T. chiefly in Luke and Acts. Hippocrates used it of applying wet sponges to the head and Galen of applying a decoction of acorns. There is no evidence that Luke has a medical turn to the word here. The absence of the conjunction ot (that) before the next verb каєєк $\lambda \varepsilon ⿺ \sigma \varepsilon v$ (shut up) is asyndeton. This verb literally means
shut down , possibly with a reference to closing down the door of the dungeon, though it makes sense as a perfective use of the preposition, like our "shut up" without a strict regard to the idea of "down." It is an old and common verb, though here and Ac 26:10 only in the N.T. See Mt 14:3 for further statement about the prison.

Luke 3:21
When all the people were baptised ( $\varepsilon v \tau \omega \beta \alpha \pi \tau เ \sigma \theta \eta v \alpha \alpha \pi \alpha v \tau \alpha$ тov $\lambda \alpha o v$ ). The use of the articular aorist infinitive here with $\varepsilon v$ bothers some grammarians and commentators. There is no element of time in the aorist infinitive. It is simply punctiliar action, literally "in the being baptized as to all the people." Luke does not say that all the people were baptized before Jesus came or were baptized at the same time. It is merely a general statement that Jesus was baptized in connexion with or at the time of the baptizing of the people as a whole.

Jesus also having been baptized ( $\kappa \alpha \operatorname{I\eta \sigma ov~} \beta \alpha \pi \tau \iota \sigma \theta \varepsilon v \tau \circ \varsigma)$. Genitive absolute construction, first aorist passive participle. In Luke's sentence the baptism of Jesus is merely introductory to the descent of the Holy Spirit and the voice of the Father. For the narrative of the baptism see Mr 1:9; Mt 3:13-16.

And praying ( $\kappa \alpha \pi \rho о \sigma \varepsilon v \chi о \mu \varepsilon v o v)$. Alone in Luke who so often mentions the praying of Jesus. Present participle and so naturally meaning that the heaven was opened while Jesus was praying though not necessarily in answer to his prayer.

The heaven was opened ( $\alpha v \varepsilon \omega \iota \chi \theta \eta v a$ тov ov $\rho \alpha v o v$ ). First aorist passive infinitive with double augment, whereas the infinitive is not supposed to have any augment. The regular form would be $\alpha v o r \chi \theta \eta v a$ as in D (Codex Bezae). So the augment appears in the future indicative $\kappa \alpha \tau \varepsilon \alpha \xi \varepsilon$ (Mt 12:20) and the second aorist passive subjunctive кат $\varepsilon \alpha \gamma \omega \sigma \iota v$ (Joh 19:31 ). Such unusual forms appear in the Koine. This infinitive here with the accusative of general reference is the subject of $\varepsilon \gamma \varepsilon v \varepsilon \tau 0$ (it came to pass). Mt 3:16 uses the same verb, but Mr 1:10 has $\sigma \chi 1 \zeta$ оцвvov¢, rent asunder.

Luke 3:22
Descended ( $\kappa \alpha \tau \alpha \beta \eta \nu \alpha$ ). Same construction as the preceding infinitive.
The Holy Ghost ( $\tau 0 \pi v \varepsilon \cup \mu \alpha$ to $\alpha \gamma เ \circ v$ ). The Holy Spirit. Mr 1:10 has merely the Spirit ( $\tau 0 \pi v \varepsilon \nu \mu \alpha$ ) while Mt 3:16 has the Spirit of God ( $\pi v \varepsilon \cup \mu \alpha \theta \varepsilon o v$ ).

In a bodily form ( $\sigma \omega \mu \alpha \tau \kappa \omega \omega \varepsilon \varepsilon \delta$ ). Alone in Luke who has also "as a dove" ( $\omega \varsigma$ $\pi \varepsilon \rho \prime \sigma \tau \varepsilon \rho \alpha v)$ like Matthew and Mark. This probably means that the Baptist saw the vision that looked like a dove. Nothing is gained by denying the fact or possibility of the vision that looked like a dove. God manifests his power as he will. The symbolism of the dove for the Holy Spirit is intelligible. We are not to understand that this was the beginning of the Incarnation of Christ as the Cerinthian Gnostics held. But this fresh influx of the Holy Spirit may have deepened the Messianic consciousness of Jesus and certainly revealed him to the Baptist as God's Son.

And a voice came out of heaven ( $\kappa \alpha \varphi \omega v \eta \vee \varepsilon \xi$ ov $\rho \alpha v o v ~ \gamma \varepsilon v \varepsilon \sigma \theta \alpha$ ). Same construction of infinitive with accusative of general reference. The voice of the Father to the Son is given here as in Mr 1:11, which see, and Mt 3:17 for discussion of the variation there. The Trinity here manifest themselves at the baptism of Jesus which constitutes the formal entrance of Jesus upon his Messianic ministry. He enters upon it with the Father's blessing and approval and with the power of the Holy Spirit upon him. The deity of Christ here appears in plain form in the Synoptic Gospels. The consciousness of Christ is as clear on this point here as in the Gospel of John where the Baptist describes him after his baptism as the Son of God (Joh 1:34).

Luke 3:23
Jesus Himself (avtoc Inoouc). Emphatic intensive pronoun calling attention to the personality of Jesus at this juncture. When he entered upon his Messianic work.

When he began to teach ( $\alpha \rho \chi \circ \mu \varepsilon v o \varsigma)$. The words "to teach" are not in the Greek text. The Authorized Version "began to be about thirty years of age," is an impossible translation. The Revised Version rightly supplies "to teach" ( $\delta \delta \delta \alpha \sigma \kappa \varepsilon เ v$ ) after the present participle $\alpha \rho \chi \circ \mu \varepsilon v o \varsigma$. Either the infinitive or the participle can follow $\alpha \rho \chi \circ \mu \alpha$, usually the infinitive in the Koine. It is not necessary to supply anything (Ac 1:22).

Was about thirty years of age ( $\eta \nu \omega \sigma \varepsilon \varepsilon \tau \omega \nu \tau \rho \iota \alpha \kappa о \nu \tau \alpha$ ). Tyndale has it right "Jesus was about thirty yere of age when he beganne." Luke does not commit himself definitely to precisely thirty years as the age of Christ. The Levites entered upon full service at that age, but that proves nothing about Jesus. God's prophets enter upon their task when the word of God comes to them. Jesus may have been a few months under or over thirty or a year or two less or more.

Being Son (as was supposed) of Joseph, the son of Heli ( $\omega v$ voo $\omega \varsigma \varepsilon v \circ \mu \iota \zeta \varepsilon \tau \circ \mathrm{I} \omega \sigma \eta \varphi$ $\tau \operatorname{~\tau } \mathrm{H} \varepsilon \lambda \varepsilon$ ). For the discussion of the genealogy of Jesus see on Mt 1:1-17. The two genealogies differ very widely and many theories have been proposed about them. At once one notices that Luke begins with Jesus and goes back to Adam, the Son of God, while Matthew begins with Abraham and comes to "Joseph the husband of Mary of whom was born Jesus who is called Christ" (Mt 1:16 ). Matthew employs the word "begot" each time, while Luke has the article tov repeating voov (Son) except before Joseph. They agree in the mention of Joseph, but Matthew says that "Jacob begat Joseph" while Luke calls "Joseph the son of Heli." There are other differences, but this one makes one pause. Joseph, of course, did not have two fathers. If we understand Luke to be giving the real genealogy of Jesus through Mary, the matter is simple enough. The two genealogies differ from Joseph to David except in the cases of Zorobabel and Salathiel. Luke evidently means to suggest something unusual in his genealogy by the use of the phrase "as was supposed" ( $\omega \varsigma \varepsilon$ voul!£тo). His own narrative in Lu 1:26-38 has shown that Joseph was not the actual father of Jesus. Plummer objects that, if Luke is giving the genealogy of Jesus through Mary, vooc must be used in two senses here (son as was supposed of Joseph, and grandson through Mary of Heli). But that is not an unheard of thing. In neither list does Matthew or Luke give a complete genealogy. Just as Matthew uses "begat" for descent, so does Luke employ "son" in the same way for descendant. It was natural for Matthew, writing for Jews, to give the legal genealogy through Joseph, though he took pains to show in Mt 1:16,18-25 that Joseph was not the actual father of Jesus. It was equally natural for Luke, a Greek himself and writing for the whole world, to give the actual genealogy of Jesus through Mary. It is in harmony with Pauline universality (Plummer) that Luke carries the genealogy back to Adam and does not stop with Abraham. It is not clear why Luke adds "the Son of God" after Adam ( 3:38). Certainly he does not mean that Jesus is the Son of God only in the sense that Adam is. Possibly he wishes to dispose of the heathen myths about the origin of man and to show that God is the Creator of the whole
human race, Father of all men in that sense. No mere animal origin of man is in harmony with this conception.

## Luke 4

Luke 4:1
Full of the Holy Spirit ( $\pi \lambda \eta \rho \eta \varsigma \pi \nu \varepsilon v \mu \alpha \tau \circ \varsigma \alpha \gamma \circ v$ ). An evident allusion to the descent of the Holy Spirit on Jesus at his baptism (Lu 3:21f. ). The distinctness of the Persons in the Trinity is shown there, but with evident unity. One recalls also Luke's account of the overshadowing of Mary by the Holy Spirit ( $1: 35$ ). Mt 4:1 says that "Jesus was led of the Spirit" while Mr 1:12 states that "the Spirit driveth him forth" which see for discussion. "Jesus had been endowed with supernatural power; and He was tempted to make use of it in furthering his own interests without regard to the Father's will" (Plummer).

Was led by the Spirit ( $\eta \gamma \varepsilon \tau о ~ \varepsilon v ~ \tau o ~ \pi \nu \varepsilon v \mu \alpha \tau$ ). Imperfect passive, continuously led. Ev may be the instrumental use as often, for Mt 4:1 has here vio of direct agency. But Matthew has the aorist passive $\alpha v \eta \chi \theta \eta$ which may be ingressive as he has $\varepsilon \iota \varsigma \tau \eta v \varepsilon \rho \eta \mu \circ v$ (into the wilderness) while Luke has $\varepsilon \nu \tau \omega \varepsilon \rho \eta \mu \omega$ (in the wilderness). At any rate Luke affirms that Jesus was now continuously under the guidance of the Holy Spirit. Hence in this same sentence he mentions the Spirit twice.

During the forty days ( $\eta \mu \varepsilon \rho \alpha \varsigma \tau \varepsilon \sigma \sigma \varepsilon \rho \alpha \kappa о \nu \tau \alpha$ ). Accusative of duration of time, to be connected with "led" not with "tempted." He was led in the Spirit during these forty days (cf. De 8:2 , forty years). The words are amphibolous also in Mr 1:13. Mt 4:2 seems to imply that the three recorded temptations came at the close of the fasting for forty days. That can be true and yet what Luke states be true also. These three may be merely specimens and so "representative of the struggle which continued throughout the whole period" (Plummer).

Luke 4:2
Being tempted ( $\pi \varepsilon \rho \rho \alpha \zeta о \mu \varepsilon \nu о \varsigma)$. Present passive participle and naturally parallel with the imperfect passive $\eta \gamma \varepsilon \tau 0$ (was led) in verse 1 . This is another instance of poor verse division which should have come at the end of the sentence. See on Mt 4:1; Mr 1:13 for the words "tempt" and "devil." The devil challenged the Son of man though also the Son of God. It was a contest between Jesus, full of the Holy Spirit, and the slanderer of men. The devil had won with Adam and Eve. He has hopes of triumph over Jesus. The story of this conflict is given only in Mt 4:1-11; Lu 4:1-13. There is a mere mention of it in $\mathrm{Mr} 1: 12 \mathrm{f}$. So then here is a specimen of the Logia of Jesus $(\mathrm{Q})$, a non-Markan portion of Matthew and Luke, the earliest document about Christ. The narrative could come ultimately only from Christ himself. It is noteworthy that it bears all the marks of the high conception of Jesus as the Son of God found in the Gospel of John and in Paul and Hebrews, the rest of the New Testament in fact, for Mark, Matthew, Luke, Acts, Peter, and Jude follow in this same strain. The point is that modern criticism has revealed the Messianic consciousness of Jesus as God's Son at his Baptism and in his Temptations at the very beginning of his ministry and in the oldest known documents about Christ (The Logia, Mark's Gospel).

He did eat nothing (ouk $\varepsilon \varphi \alpha \gamma \varepsilon v$ ov $\delta \varepsilon v$ ). Second aorist (constative) active indicative of the defective verb $\varepsilon \sigma \theta \omega \omega$. Mark does not give the fast. Mt 4:2 has the aorist active participle $\nu \eta \sigma \tau \varepsilon \cup \sigma a \varsigma$ which usually means a religious fast for purposes of devotion. That idea is not excluded by Luke's words. The entrance of Jesus upon his Messianic ministry was a fit time for this solemn and intense consecration. This mental and spiritual strain would naturally take away the appetite and there was probably nothing at hand to eat. The weakness from the absence of food gave the devil his special opportunity to tempt Jesus which he promptly seized.

When they were completed ( $\sigma v \nu \tau \varepsilon \lambda \varepsilon \sigma \theta \varepsilon ו \sigma \omega v \alpha \nu \tau \omega v$ ). Genitive absolute with the first aorist passive participle feminine plural because $\varepsilon \mu \varepsilon \rho \omega v$ (days) is feminine. According to Luke the hunger ( $\varepsilon \pi \varepsilon เ v a \sigma \varepsilon v$, became hungry, ingressive aorist active indicative) came at the close of the forty days as in Mt 4:2 .

Luke 4:3
The Son of God (vios tov $\theta \varepsilon o v)$. No article as in Mt 4:3. So refers to the relationship as Son of God rather than to the office of Messiah. Manifest reference to the words of the Father in Lu 3:22. Condition of the first class as in Matthew. The devil assumes that Jesus is Son of God.

This stone ( $\tau \omega \lambda_{1} \theta \omega$ tov $\tau \omega$ ). Perhaps pointing to a particular round stone that looked in shape and size like a loaf of bread. Stanley (Sinai and Palestine, p. 154) on Mt. Carmel found crystallizations of stones called "Elijah's melons." The hunger of Jesus opened the way for the diabolic suggestion designed to inspire doubt in Jesus toward his Father. Matthew has "these stones."

Bread (aptoc). Better "loaf." For discussion of this first temptation see on Mt 4:3f. Jesus felt the force of each of the temptations without yielding at all to the sin involved. See discussion on Matthew also for reality of the devil and the objective and subjective elements in the temptations. Jesus quotes De 8:3 in reply to the devil.

Luke 4:5

In a moment of time ( $\varepsilon v \sigma \tau \iota \gamma \mu \eta \chi \rho o v o v)$. Only in Luke and the word $\sigma \tau \tau \gamma \mu \eta$ nowhere else in the N.T. (from $\sigma \tau \iota \zeta \omega$, to prick, or puncture), a point or dot. In Demosthenes, Aristotle, Plutarch. Like our "second" of time or tick of the clock. This panorama of all the kingdoms of the world and the glory of them in a moment of time was mental, a great feat of the imagination (a mental satanic "movie" performance), but this fact in no way discredits the idea of the actual visible appearance of Satan also. This second temptation in Luke is the third in Matthew's order. Luke's order is geographical (wilderness, mountain, Jerusalem). Matthew's is climacteric (hunger, nervous dread, ambition). There is a climax in Luke's order also (sense, man, God). There is no way to tell the actual order.

Luke 4:6

All this authority ( $\tau \eta \nu \varepsilon \xi \circ 0 \sigma \iota \alpha v \tau \alpha \nu \tau \eta \nu \alpha \pi \alpha \sigma \alpha \nu$ ). Mt 4:9 has "all these things." Luke's report is more specific.

And the glory of them ( $\kappa \alpha \tau \eta v \delta o \xi \alpha v \alpha v \tau \omega v$ ). Mt 4:8 has this in the statement of what the devil did, not what he said.

For it hath been delivered unto me (o $\tau \varepsilon \mu$ о $\pi \alpha \rho \alpha \delta \varepsilon \delta o \tau \alpha$ ). Perfect passive indicative. Satan here claims possession of world power and Jesus does not deny it. It may be due to man's sin and by God's permission. Jesus calls Satan the ruler of this world (Joh 12:31; 14:30; 16:11).

To whomsoever I will (o $\alpha v \theta \varepsilon \lambda \omega$ ). Present subjunctive with $\alpha v$ in an indefinite relative sentence. This audacious claim, if allowed, makes one wonder whether some of the world rulers are not, consciously or unconsciously, agents of the devil. In several American cities there has been proven a definite compact between the police and the underworld of crime. But the tone of Satan here is one of superiority to Jesus in world power. He offers him a share in it on one condition.

## Luke 4:7

Wilt worship before me ( $\pi \rho о \sigma \kappa \nu v \eta \sigma \eta ı \varsigma \varepsilon v \omega \pi \kappa \circ v \varepsilon \mu \circ v$ ). Mt 4:9 has it more bluntly "worship me." That is what it really comes to, though in Luke the matter is more delicately put. It is a condition of the third class ( $\varepsilon a v$ and the subjunctive). Luke has it "thou therefore if" ( $\sigma \sim$ ouv $\varepsilon \alpha v$ ), in a very emphatic and subtle way. It is the ingressive aorist ( $\pi \rho о \sigma \kappa \nu v \eta \sigma \eta \upharpoonright)$, just bow the knee once up here in my presence. The temptation was for Jesus to admit Satan's authority by this act of prostration (fall down and worship), a recognition of authority rather than of personal merit.

It shall all be thine ( $\varepsilon \sigma \tau \alpha \sigma 0 v \pi \alpha \sigma \alpha)$. Satan offers to turn over all the keys of world power to Jesus. It was a tremendous grand-stand play, but Jesus saw at once that in that case he would be the agent of Satan in the rule of the world by bargain and graft instead of the Son of God by nature and world ruler by conquest over Satan. The heart of Satan's program is here laid bare. Jesus here rejected the Jewish idea of the Messiah as an earthly ruler merely. "He rejects Satan as an ally, and thereby has him as an implacable enemy" (Plummer.)

Luke 4:8
Thou shalt worship ( $\pi \rho о \sigma \kappa \cup v \eta \sigma \varepsilon ı \varsigma)$. Satan used this verb to Jesus who turns it against him by the quotation from De 6:13. Jesus clearly perceived that one could not worship both Satan and God. He had to choose whom he would serve. Luke does not give the words, "Get thee hence, Satan" (Mt 4:10), for he has another temptation to narrate.

Luke 4:9
Led him ( $\eta \gamma \alpha \gamma \varepsilon v$ ). Aorist active indicative of $\alpha \gamma \omega$. Mt 4:5 has $\pi \alpha \rho \alpha \lambda \alpha \mu \beta \alpha v \varepsilon$ (dramatic present).

The wing of the temple ( $\tau 0 \pi \tau \varepsilon \rho \cup \gamma\llcorner\circ \sim$ tov $\varepsilon \rho \rho \circ u$ ). See on Mt 4:5. It is not easy to determine precisely what it was.

From hence ( $\varepsilon v \tau \varepsilon v \theta \varepsilon v)$. This Luke adds to the words in Matthew, which see.
To guard thee ( $\tau 0 v \delta 1 \alpha \varphi u \lambda \alpha \xi \alpha \sigma \varepsilon$ ). Not in Mt 4:6 quoted by Satan from Ps 91:11,12. Satan does not misquote this Psalm, but he misapplies it and makes it mean presumptuous reliance on God. This compound verb is very old, but occurs here alone in the N.T. and that from the LXX. Luke repeats ot (recitative ot after $\gamma \varepsilon \gamma \rho \alpha \pi \tau \alpha$, is written) after this part of the quotation.

Luke 4:12
It is said ( $\varepsilon \rho \eta \tau \alpha)$. Perfect passive indicative, stands said, a favourite way of quoting Scripture in the N.T. In Mt 4:7 we have the usual "it is written" ( $\gamma \varepsilon \gamma \rho \alpha \pi \tau \alpha$ ). Here Jesus quotes De 6:16. Each time he uses Deuteronomy against the devil. The LXX is quoted. It is the volitive future indicative with ovк, a common prohibition. Jesus points out to the devil that testing God is not trusting God (Plummer).

Luke 4:13
Every temptation ( $\pi \alpha v \tau \alpha \pi \varepsilon \rho \alpha \sigma \mu \circ v$ ). These three kinds exhaust the avenues of approach (the appetites, the nerves, the ambitions). Satan tried them all. They formed a cycle (Vincent). Hence "he was in all points tempted like as we are" (Heb 4:15). "The enemy tried all his weapons, and was at all points defeated" (Plummer). Probably all during the forty days the devil tempted him, but three are representatives of all.

For a season ( $\alpha \chi \rho$ каı $\rho \circ v$ ). Until a good opportunity should return, the language means. We are thus to infer that the devil returned to his attack from time to time. In the Garden of Gethsemane he tempted Jesus more severely than here. He was here trying to thwart the purpose of Jesus to go on with his Messianic plans, to trip him at the start. In Gethsemane the devil tried to make Jesus draw back from the culmination of the Cross with all its agony and horror. The devil attacked Jesus by the aid of Peter (Mr 8:33), through the Pharisees (Joh 8:40ff. ), besides Gethsemane (Lu 22:42,53 ).

Luke 4:14
Returned (vđ\& $\quad \tau \rho \varepsilon \psi \varepsilon v$ ). Luke does not fill in the gap between the temptations in the wilderness of Judea and the Galilean Ministry. He follows the outline of Mark. It is John's Gospel alone that tells of the year of obscurity (Stalker) in various parts of the Holy Land.

In the power of the Spirit ( $\varepsilon v \tau \eta \delta \nu v a \mu \varepsilon$ tov $\pi v \varepsilon \cup \mu \alpha \tau o \varsigma)$. Luke in these two verses $(14,15)$ gives a description of the Galilean Ministry with three marked characteristics (Plummer): the power of the spirit, rapid spread of Christ's fame, use of the Jewish synagogues. Luke often notes the power of the Holy Spirit in the work of Christ. Our word dynamite is this same word $\delta v v a \mu c ̧$ (power).

A fame ( $\varphi \eta \mu \eta$ ). An old Greek word found in the N.T. only here and Mt 9:26. It is from $\varphi \eta \mu$, to say. Talk ran rapidly in every direction. It assumes the previous ministry as told by John.

Luke 4:15

And he taught (ка аuтоৎ $\varepsilon \delta \iota \delta \alpha \sigma \kappa \varepsilon v)$. Luke is fond of this mode of transition so that it is not certain that he means to emphasize "he himself" as distinct from the rumour about him. It is the imperfect tense, descriptive of the habit of Jesus. The synagogues were an open door to Jesus before the hostility of the Pharisees was aroused.

Being glorified ( $\delta 0 \xi \alpha \zeta o \mu \varepsilon v o \varsigma)$. Present passive participle, durative action like the imperfect $\varepsilon \delta \iota \delta \alpha \sigma \kappa \varepsilon v$. General admiration of Jesus everywhere. He was the wonder teacher of his time. Even the rabbis had not yet learned how to ridicule and oppose Jesus.

Luke 4:16
Where he had been brought up (ov $\eta \nu \tau \varepsilon \theta \rho \alpha \mu \mu \varepsilon v o \varsigma)$. Past perfect passive periphrastic indicative, a state of completion in past time, from $\tau \rho \varepsilon \varphi \omega$, a common Greek verb. This visit is before that recorded in Mr 6:1-6; Mt 13:54-58 which was just before the third tour of Galilee. Here Jesus comes back after a year of public ministry elsewhere and with a wide reputation (Lu 4:15 ). Luke may have in mind 2:51, but for some time now Nazareth had not been his home and that fact may be implied by the past perfect tense.

As his custom was ( $\kappa \alpha \tau \alpha$ to $\varepsilon \epsilon \omega \theta$ oৎ $\alpha \cup \tau \omega$ ). Second perfect active neuter singular participle of an old $\varepsilon \theta \omega$ (Homer), to be accustomed. Literally according to what was customary to him ( $\alpha \cup \tau \omega$, dative case). This is one of the flashlights on the early life of Jesus. He had the habit of going to public worship in the synagogue as a boy, a habit that he kept up when a grown man. If the child does not form the habit of going to church, the man is almost certain not to have it. We have already had in Matthew and Mark frequent instances of the word synagogue which played such a large part in Jewish life after the restoration from Babylon.

Stood up ( $\alpha v \varepsilon \sigma \tau \eta$ ). Second aorist active indicative and intransitive. Very common verb. It was the custom for the reader to stand except when the Book of Esther was read at the feast of Purim when he might sit. It is not here stated that Jesus had been in the habit of standing up to read here or elsewhere. It was his habit to go to the synagogue for worship. Since he entered upon his Messianic work his habit was to teach in the synagogues ( $\operatorname{Lu}$ 4:15 ). This was apparently the first time that he had done so in Nazareth. He may have been asked to read as Paul was in Antioch in Pisidia (Ac 13:15 ). The ruler of the synagogue for that day may have invited Jesus to read and speak because of his now great reputation as a teacher. Jesus could have stood up voluntarily and appropriately because of his interest in his home town.

To read ( $\alpha v \alpha \gamma v \omega v \alpha$ ). Second aorist active infinitive of $\alpha v \alpha \gamma \iota \nu \omega \sigma \kappa \omega$, to recognize again the written characters and so to read and then to read aloud. It appears first in Pindar in the sense of read and always so in the N.T. This public reading aloud with occasional comments may explain the parenthesis in Mt 24:15 (Let him that readeth understand).

Luke 4:17

Was delivered ( $\varepsilon \pi \varepsilon \delta 0 \theta \eta$ ). First aorist passive indicative of $\varepsilon \pi \iota \delta \iota \delta \omega \mu$, to give over to, a common verb. At the proper stage of the service "the attendant" or "minister" (vin $\rho \varepsilon \tau \eta \varsigma$, under rower) or "beadle" took out a roll of the law from the ark, unwrapped it, and gave it to some one to read. On sabbath days some seven persons were asked to read small portions of the law. This was the first lesson or Parashah. This was followed by a reading from the prophets and a discourse, the second lesson or Haphtarah. This last is what Jesus did.

The book of the prophet Isaiah ( $\beta \iota \beta \lambda \iota v$ tov $\pi \rho о \varphi \eta \tau$ tov Eбaıov). Literally, "a roll of the prophet Isaiah." Apparently Isaiah was handed to Jesus without his asking for it. But certainly Jesus cared more for the prophets than for the ceremonial law. It was a congenial service that he was asked to perform. Jesus used Deuteronomy in his temptations and now Isaiah for this sermon. The Syriac Sinaitic manuscript has it that Jesus stood up after the attendant handed him the roll.

Opened ( $\alpha v o ı \xi \alpha \varsigma)$. Really it was
unrolled ( $\alpha v a \pi \tau \cup \xi \alpha \varsigma$ ) as Aleph D have it. But the more general term $\alpha v o ı \xi \alpha \varsigma$ (from avor $\gamma \omega$, common verb) is probably genuine. Avantvoo $\omega$ does not occur in the N.T. outside of this passage if genuine.

Found the place ( $\varepsilon v \rho \varepsilon v$ тov тотоv). Second aorist active indicative. He continued to unroll (rolling up the other side) till he found the passage desired. It may have been a fixed lesson for the day or it may have been his own choosing. At any rate it was a marvellously appropriate passage (Isa 61:1,2 with one clause omitted and some words from Isa 58:6 ). It is a free quotation from the Septuagint.

Where it was written (ov $\eta v \gamma \varepsilon \gamma \rho a \mu \mu \varepsilon v o v$ ). Periphrastic pluperfect passive again as in 4:16.

Luke 4:18
Anointed me ( $\varepsilon \chi \rho \iota \sigma \varepsilon v \mu \varepsilon$ ). First aorist active indicative of the verb $\chi \rho \omega \omega$ from which
Christ (Xpıбтoc) is derived, the Anointed One. Isaiah is picturing the Jubilee year and the release of captives and the return from the Babylonian exile with the hope of the Messiah through it all. Jesus here applies this Messianic language to himself. "The Spirit of the Lord is upon me" as was shown at the baptism (Lu 3:21) where he was also "anointed" for his mission by the Father's voice (3:22).

To the poor ( $\pi \tau \omega \chi$ oıs). Jesus singles this out also as one of the items to tell John the Baptist in prison (Lu 7:22). Our word Gospel is a translation of the Greek Evaүүع 1 ıov, and it is for the poor.

He hath sent me ( $\alpha \pi \varepsilon \sigma \tau \alpha \lambda \kappa \varepsilon v \mu \varepsilon$ ). Change of tense to perfect active indicative. He is now on that mission here. Jesus is God's Apostle to men (Joh 17:3, Whom thou didst send).

Proclaim ( $\kappa \eta \rho \cup \xi \alpha$ ). As a herald like Noah (2Pe 2:5).

To the captives ( $\alpha \not \chi \mu \alpha \lambda \omega \tau o \iota \varsigma)$. Prisoners of war will be released ( $\alpha ı \chi \mu \eta$, a spear point, and $\alpha \lambda \omega \tau \sigma \varsigma$, from $\alpha \lambda_{\iota \sigma \kappa \sigma \mu \alpha}$, to be captured). Captured by the spear point. Common word, but here only in the N.T.

Set at liberty ( $\alpha \pi 0 \sigma \tau \varepsilon 1 \lambda \alpha$ ). First aorist active infinitive of $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$. Same verb as $\alpha \pi \varepsilon \sigma \tau \alpha \lambda_{\kappa \varepsilon \nu}$, above. Brought in here from Isa 58:6. Plummer suggests that Luke inserts it here from memory. But Jesus could easily have turned back the roll and read it so.

Them that are bruised ( $\tau \varepsilon \theta \rho \alpha \cup \sigma \mu \varepsilon \varepsilon \sigma v \varsigma)$. Perfect passive participle of $\theta \rho \alpha v \omega$, an old verb, but here only in the N.T. It means to break in pieces broken in heart and often in body as well. One loves to think that Jesus felt it to be his mission to mend broken hearts like pieces of broken earthenware, real rescue-mission work. Jesus mends them and sets them free from their limitations.

Luke 4:19
 ministry is to be only one year in length as Clement of Alexandria and Origen argued. That is to turn figures into fact. The Messianic age has come, Jesus means to say. On the first day of the year of Jubilee the priests with sound of trumpet proclaimed the blessings of that year (Le 25:8-17 ). This great passage justly pictures Christ's conception of his mission and message.

Luke 4:20
He closed the book ( $\pi \tau v \xi \alpha \varsigma \tau$ тo $\beta \iota \beta \lambda_{\iota} \nu v$ ). Aorist active participle of $\pi \tau v \sigma \sigma \omega$. Rolled up the roll and gave it back to the attendant who had given it to him and who put it away again in its case.

Sat down ( $\varepsilon \kappa \alpha \theta \iota \sigma \varepsilon v$ ). Took his seat there as a sign that he was going to speak instead of going back to his former seat. This was the usual Jewish attitude for public speaking and teaching (Lu 5:3; Mt 5:1; Mr 4:1; Ac 16:13 ).

Were fastened on him ( $\eta \sigma \alpha \nu \alpha \tau \varepsilon v \iota \zeta \quad \nu \tau \varepsilon \varsigma \alpha \cup \tau \omega$ ). Periphrastic imperfect active and so a vivid description. Literally, the eyes of all in the synagogue were gazing fixedly upon him. The verb $\alpha \tau \varepsilon v \zeta \zeta \omega$ occurs in Aristotle and the Septuagint. It is from the adjective $\alpha \tau \varepsilon v \eta \varsigma$ and that from $\tau \varepsilon เ \nu \omega$, to stretch, and copulative or intensive $\alpha$, not $\alpha$ privative. The word occurs in the N.T. here and in 22:56, ten times in Acts, and in 2Co 3:7,13. Paul uses it of the steady eager gaze of the people at Moses when he came down from the mountain when he had been communing with God. There was something in the look of Jesus here that held the people spellbound for the moment, apart from the great reputation with which he came to them. In small measure every effective speaker knows what it is to meet the eager expectations of an audience.

Luke 4:21
And he began to say ( $\eta \rho \xi \alpha$ тo $\delta \varepsilon \lambda \varepsilon \gamma \varepsilon เ v$ ). Aorist ingressive active indicative and present infinitive. He began speaking. The moment of hushed expectancy was passed. These may
or may not be the first words uttered here by Jesus. Often the first sentence is the crucial one in winning an audience. Certainly this is an arresting opening sentence.

Hath been fulfilled ( $\pi \varepsilon \pi \lambda \eta \rho \omega \tau \alpha$ ). Perfect passive indicative,
stands fulfilled . "Today this scripture (Isa 61:1,2 , just read) stands fulfilled in your ears." It was a most amazing statement and the people of Nazareth were quick to see the Messianic claim involved. Jesus could only mean that the real year of Jubilee had come, that the Messianic prophecy of Isaiah had come true today, and that in him they saw the Messiah of prophecy. There are critics today who deny that Jesus claimed to be the Messiah. To be able to do that, they must reject the Gospel of John and all such passages as this one. And it is no apocalyptic eschatological Messiah whom Jesus here sets forth, but the one who forgives $\sin$ and binds up the broken-hearted. The words were too good to be true and to be spoken here at Nazareth by one of their own townsmen!

Luke 4:22
Bare him witness ( $\varepsilon \mu \alpha \rho \tau v \rho o v v)$. Imperfect active, perhaps inchoative. They all began to bear witness that the rumours were not exaggerations ( $4: 14$ ) as they had supposed, but had foundation in fact if this discourse or its start was a fair sample of his teaching. The verb $\mu \alpha \rho \tau v \rho \varepsilon \omega$ is a very old and common one. It is frequent in Acts, Paul's Epistles, and the Johannine books. The substantive $\mu \alpha \rho \tau v \rho$ is seen in our English $\mu \alpha \rho \tau \psi \rho$, one who witnesses even by his death to his faith in Christ.

And wondered ( $\kappa \alpha \varepsilon \theta \alpha \nu \mu \alpha \zeta o v$ ). Imperfect active also, perhaps inchoative also. They began to marvel as he proceeded with his address. This verb is an old one and common in the Gospels for the attitude of the people towards Jesus.

At the words of grace ( $\varepsilon \pi$ тоıৎ $\lambda$ оүоья $\tau \eta \varsigma ~ \chi \alpha \rho \iota \tau о \varsigma) . ~ S e e ~ o n ~ L u ~ 1: 30 ; ~ 2: 52 ~ f o r ~ t h i s ~ w o n-~$ derful word $\chi \alpha \rho \iota \varsigma$ so full of meaning and so often in the N.T. The genitive case (case of genus or kind) here means that the words that came out of the mouth of Jesus in a steady stream (present tense, єклорвvouєvoı¢) were marked by fascination and charm. They were "winning words" as the context makes plain, though they were also "gracious" in the Pauline sense of "grace." There is no necessary antithesis in the ideas of graceful and gracious in these words of Jesus.
 way to bewilderment as they began to explain to themselves the situation. The use of ouX intensive form of ouk in a question expects the answer "yes." Jesus passed in Nazareth as the son of Joseph as Luke presents him in 3:23. He does not stop here to correct this misconception because the truth has been already amply presented in 1:28-38; 2:49. This popular conception of Jesus as the son of Joseph appears also in Joh 1:45. The puzzle of the people was due to their previous knowledge of Jesus as the carpenter (Mr 6:3 ; the carpenter's son, Mt 13:55 ). For him now to appear as the Messiah in Nazareth where he had lived and laboured as the carpenter was a phenomenon impossible to credit on sober reflection. So the
mood of wonder and praise quickly turned with whispers and nods and even scowls to doubt and hostility, a rapid and radical transformation of emotion in the audience.

Luke 4:23
Doubtless ( $\pi \alpha \nu \tau \omega \varsigma)$. Adverb. Literally, at any rate, certainly, assuredly. Cf. Ac 21:22; 28:4.

This parable ( $\tau \eta \nu \pi \alpha \rho \alpha \beta 0 \lambda \eta \nu \tau \alpha \nu \tau \eta \nu$ ). See discussion on Mt 13 . Here the word has a special application to a crisp proverb which involves a comparison. The word physician is the point of comparison. Luke the physician alone gives this saying of Jesus. The proverb means that the physician was expected to take his own medicine and to heal himself. The word $\pi \alpha \rho \alpha \beta 0 \lambda \eta$ in the N.T. is confined to the Synoptic Gospels except Heb 9:9; 11:19. This use for a proverb occurs also in Lu 5:36; 6:39. This proverb in various forms appears not only among the Jews, but in Euripides and Aeschylus among the Greeks, and in Cicero's Letters. Hobart quotes the same idea from Galen, and the Chinese used to demand it of their physicians. The point of the parable seems to be that the people were expecting him to make good his claim to the Messiahship by doing here in Nazareth what they had heard of his doing in Capernaum and elsewhere. "Establish your claims by direct evidence" (Easton). This same appeal (Vincent) was addressed to Christ on the Cross (Mt 27:40,42 ). There is a tone of sarcasm towards Jesus in both cases.

Heard done ( $\eta \kappa о v \sigma \alpha \mu \varepsilon v \gamma \varepsilon v o \mu \varepsilon v \alpha$ ). The use of this second aorist middle participle $\gamma \varepsilon v o \mu \varepsilon v \alpha$ after $\eta \kappa о v \sigma \alpha \mu \varepsilon v$ is a neat Greek idiom. It is punctiliar action in indirect discourse after this verb of sensation or emotion (Robertson, Grammar, pp. 1040-42, 1122-24).

Do also here ( $\pi$ oin $\sigma 0 v \kappa \alpha \omega \delta \varepsilon$ ). Ingressive aorist active imperative. Do it here in thy own country and town and do it now. Jesus applies the proverb to himself as an interpretation of their real attitude towards himself.

Luke 4:24
And he said ( $\varepsilon เ \pi \varepsilon v \delta \varepsilon$ ). Also in 1:13. The interjection of these words here by Luke may indicate a break in his address, though there is no other indication of an interval here. Perhaps they only serve to introduce solemnly the new proverb like the words

Verily I say unto you ( $\alpha \mu \eta \nu \lambda \varepsilon \gamma \omega \nu \mu \nu)$. This proverb about the prophet having no honour in his own country Jesus had already applied to himself according to Joh 4:44. Both Mr 6:4 and Mt 13:57 give it in a slightly altered form on the last visit of Jesus to Nazareth. The devil had tempted Jesus to make a display of his power to the people by letting them see him floating down from the pinnacle of the temple (Lu 4:9-11).

Luke 4:25
Three years and six months ( $\varepsilon \tau \eta \tau \rho \iota \alpha \kappa \alpha \mu \eta \nu \alpha \varsigma \varepsilon \xi)$. Accusative of duration of time without $\varepsilon \pi$ (doubtful). The same period is given in Jas $5: 17$, the popular Jewish way of speaking. In 1Ki 18:1 the rain is said to have come in the third year. But the famine probably lasted still longer.

## Luke 4:26

Unto Zarephath ( $\varepsilon \iota \varsigma \Sigma \alpha \rho \varepsilon \pi \tau \alpha$ ). The modern village Surafend on the coast road between Tyre and Sidon.

Unto a woman that was a widow ( $\pi \rho \circ \varsigma \gamma \nu v a \iota \alpha \chi \eta \rho \alpha \nu$ ). Literally, unto a woman a widow (like our vernacular widow woman). This is an illustration of the proverb from the life of Elijah (1Ki 17:8,9 ). This woman was in the land of Sidon or Phoenicia, a heathen, where Jesus himself will go later.

Luke 4:27
In the time of Elisha the prophet ( $\varepsilon \pi E \lambda ı \sigma a \iota o v \tau o v \pi \rho o \varphi \eta \tau o v)$. This use of $\varepsilon \pi$ with the genitive for "in the time of" is a good Greek idiom. The second illustration of the proverb is from the time of Elisha and is another heathen,

Naaman the Syrian ( $\mathrm{N} \alpha \mu \mu \nu$ o $\Sigma \psi \rho \circ \varsigma$ ). He was the lone leper that was cleansed by Elisha (2Ki 5:1,14).

## Luke 4:28

They were all filled with wrath $(\varepsilon \pi \lambda \eta \sigma \theta \eta \sigma \alpha v \pi \alpha v \tau \varepsilon \varsigma \theta \nu \mu \circ v)$. First aorist passive indicative of the common verb $\pi \mu \mu \pi \lambda \eta \mu$ followed by the genitive case. The people of Nazareth at once caught on and saw the point of these two Old Testament illustrations of how God in two cases blessed the heathen instead of the Jewish people. The implication was evident. Nazareth was no better than Capernaum if as good. He was under no special obligation to do unusual things in Nazareth because he had been reared there. Town pride was insulted and it at once exploded in a burst of rage.

Luke 4:29
They rose up and cast him forth ( $\alpha v \alpha \sigma \tau \alpha \nu \tau \varepsilon \varsigma \varepsilon \xi \varepsilon \beta \alpha \lambda o v$ ). Second aorist ingressive active participle and second aorist effective active indicative. A movement towards lynching Jesus.
 any jutting prominence. Only here in the N.T. Hippocrates speaks of the eyebrow hanging over.

Was built ( $\omega$ เкобо $\mu \eta \tau$ ). Past perfect indicative, stood built.
That they might throw him down headlong ( $\omega \sigma \tau \varepsilon \kappa \alpha \tau \alpha \kappa \rho \eta \mu \nu \sigma \alpha \alpha v \tau o v$ ). Neat Greek idiom with $\omega \sigma \tau \varepsilon$ for intended result, "so as to cast him down the precipice." The infinitive alone can convey the same meaning (Mt 2:2; 20:28; Lu 2:23). K $\rho \eta \mu \nu$ с is an overhanging bank or precipice from $\kappa \rho \varepsilon \mu \alpha v v \nu \mu$, to hang. Ka $\alpha \alpha$ is down. The verb occurs in Xenophon, Demosthenes, LXX, Josephus. Here only in the N.T. At the southwest corner of the town of Nazareth such a cliff today exists overhanging the Maronite convent. Murder was in the hearts of the people. By pushing him over they hoped to escape technical guilt.

Luke 4:30
He went his way ( $\varepsilon \pi о \rho \varepsilon v \varepsilon \tau \circ$ ). Imperfect tense, he was going on his way.

Luke 4:31
Came down ( $\kappa \alpha \tau \eta \lambda \theta \varepsilon v$ ). Mr 1:21 has the historical present,
 Galilean ministry, since Nazareth has rejected Jesus. Lu 4:31-37 is parallel with $\mathrm{Mr} 1: 21-28$ which he manifestly uses. It is the first of Christ's miracles which they give.

Was teaching them ( $\eta \nu \delta \iota \delta \alpha \sigma \kappa \omega \nu \alpha v \tau 0 \nu \varsigma)$. Periphrastic imperfect. Mark has $\varepsilon \delta \iota \delta \alpha \sigma \kappa \varepsilon \nu$ first and then $\varepsilon v \delta \iota \delta a \sigma \kappa \omega \nu$. "Them" here means the people present in the synagogue on the sabbath, construction according to sense as in Mr 1:22.

Luke 4:32
Rest of the sentence as in Mark, which see, except that Luke omits "and not as their scribes" and uses o $\tau \eta v$ instead of $\omega \varsigma \varepsilon \chi \omega \nu$.

Luke 4:33
Which had ( $\varepsilon \chi \omega \nu$ ). Mark has $\varepsilon \nu$.
A spirit of an unclean demon ( $\pi \nu \varepsilon \cup \mu \alpha \delta \alpha\lrcorner \rho о \nu \iota v \alpha \kappa \alpha \theta \rho \tau о v)$. Mark has "unclean spirit." Luke's phrase here is unique in this combination. Plummer notes that Matthew has $\delta \alpha ı \mu o v i o v$ ten times and akaӨaptov twice as an epithet of $\pi v \varepsilon \nu \mu \alpha$; Mark has $\delta \alpha \mu \rho v \iota v$ thirteen times and $\alpha \kappa \alpha \theta \alpha \rho \tau о v$ eleven times as an epithet of $\pi \nu \varepsilon \nu \mu \alpha$. Luke's Gospel uses $\delta \alpha \iota \mu$ ovov twenty-two times and $\alpha \kappa \alpha \theta \alpha \rho \tau o v$ as an epithet, once of $\delta \alpha \mu$ оvıov as here and once of $\pi v \varepsilon v \mu \alpha$. In Mark the man is in $(\varepsilon v)$ the power of the unclean spirit, while here the man "has" a spirit of an unclean demon.

With a loud voice ( $\varphi \omega \nu \eta \mu \varepsilon \gamma \alpha \lambda \eta)$. Not in Mark. Really a scream caused by the sudden contact of the demon with Jesus.

Luke 4:34
Ah! (Ea). An interjection frequent in the Attic poets, but rare in prose. Apparently second person singular imperative of $\varepsilon \alpha \omega$, to permit. It is expressive of wonder, fear, indignation. Here it amounts to a diabolical screech. For the rest of the verse see discussion on Mr 1:24 and Mt 8:29. The muzzle ( $\varphi \boldsymbol{\mu} \boldsymbol{\rho})$ occurs literally in $1 \operatorname{Co} 9: 9,1 \mathrm{Ti} 5: 18$, and metaphorically here and Mr 1:25; 4:39; Mt 22:12.

Luke 4:35
Had thrown him down in the midst ( $\rho \iota \psi \alpha \nu \alpha \nu \tau 0 v \varepsilon \iota \varsigma \tau 0 \mu \varepsilon \sigma o v)$. First aorist (effective) participle of $\rho \iota \pi \tau \omega$, an old verb with violent meaning, to fling, throw, hurl off or down.

Having done him no hurt ( $\mu \eta \delta \varepsilon v \beta \lambda \alpha \psi \alpha v \alpha v \tau o v$ ). Luke as a physician carefully notes this important detail not in Mark. $B \lambda \alpha \pi \tau \omega$, to injure, or hurt, occurs in the N.T. only here and in Mr 16:18, though a very common verb in the old Greek.

Luke 4:36
Amazement came ( $\varepsilon \gamma \varepsilon v \varepsilon \tau о$ $\theta \alpha \mu \beta$ оऽ). Mark has $\varepsilon \theta \alpha \mu \beta \eta \theta \eta \sigma \alpha v$.
They spake together one with another ( $\sigma v v \varepsilon \lambda \alpha \lambda o u v \pi \rho o \varsigma \alpha \lambda \lambda \eta \lambda o v \varsigma$ ). Imperfect indicative active and the reciprocal pronoun. Mark has simply the infinitive $\sigma v \nu \zeta \eta \tau \varepsilon เ \nu$ (question).

For (ot). We have here an ambiguous ot as in 1:45, which can be either the relative "that" or the casual ot "because" or "for," as the Revised Version has it. Either makes good sense. Luke adds here $\delta u v a \mu \varepsilon$ (with power) to Mark's "authority" ( $\varepsilon \xi o v \sigma \iota \alpha v)$ ).

And they come out ( $\varepsilon \xi \varepsilon \rho \chi \circ v \tau \alpha$ ). So Luke where Mark has "and they obey him" (ка итакоиоибเv аut $\omega$ ).

Luke 4:37
Went forth a rumour ( $\varepsilon \xi \varepsilon \pi о \rho \varepsilon v \varepsilon \tau о ~ \eta \chi \circ \varsigma)$. Imperfect middle, kept on going forth. Our very word $\varepsilon \chi \circ$ in this word. Late Greek form for $\eta \chi \omega$ in the old Greek. Used for the roar of the waves on the shore. So in Lu 21:25. Vivid picture of the resounding influence of this day's work in the synagogue, in Capernaum.

Luke 4:38
He rose up ( $\alpha$ vaбtac). Second aorist active participle of $\alpha v i \sigma \tau \eta \mu$, a common verb. B. Weiss adds here "from the teacher's seat." Either from his seat or merely leaving the synagogue. This incident of the healing of Peter's mother-in-law is given in Mr 1:29-34 and Mt 8:14-17, which see for details.

Into the house of Simon ( $\varepsilon \varsigma \varsigma \tau \nu$ оккıа $\Sigma \mu \omega v$ оৎ). "Peter's house" (Mt 8:14). "The house of Simon and Andrew" (Mr 1:29). Paul's reference to Peter's wife (1Co 9:5) is pertinent. They lived together in Capernaum. This house came also to be the Capernaum home of Jesus.

Simon's wife's mother ( $\pi \varepsilon v \theta \varepsilon \rho \alpha$ тov $\Sigma 1 \mu \omega v o \varsigma)$. The word $\pi \varepsilon v \theta \varepsilon \rho \alpha$ for mother-in-law is old and well established in usage. Besides the parallel passages (Mr 1:30; Mt 8:14; Lu 4:38 ) it occurs in the N.T. only in Lu 12:53. The corresponding word $\pi \varepsilon v \theta \varepsilon \rho o \varsigma$, father-in-law, occurs in Joh 18:13 alone in the N.T.

Was holden with a great fever ( $\eta \nu \sigma \nu v \varepsilon \chi \circ \mu \varepsilon v \eta \pi \nu \rho \varepsilon \tau \omega \mu \varepsilon \gamma \alpha \lambda \omega$ ). Periphrastic imperfect passive, the analytical tense accenting the continuous fever, perhaps chronic and certainly severe. Luke employs this verb nine times and only three others in the N.T. (Mt 4:24 passive with diseases here; 2Co 5:14 active; Php 1:23 passive). In Ac 28:8 the passive "with dysentery" is like the construction here and is a common one in Greek medical writers as in Greek literature generally. Luke uses the passive with "fear," Lu 8:37, the active for holding the hands over the ears (Ac 7:57) and for pressing one or holding together ( $\mathrm{Lu} 8: 45 ; 19: 43 ; 22: 63$ ), the direct middle for holding oneself to preaching (Ac 18:5). It is followed here by the instrumental case. Hobart (Medical Language of Luke, p. 3) quotes Galen as dividing fevers into "great" ( $\mu \varepsilon \gamma \alpha \lambda 0$ ) and "small" ( $\sigma \mu \kappa \rho o)$.

Luke 4:39
He stood over her ( $\varepsilon \pi\llcorner\sigma \tau \alpha \varsigma \varepsilon \pi \alpha v \omega \alpha \cup \tau \eta \varsigma)$. Second aorist active participle. Only in Luke. Surely we are not to take Luke to mean that Jesus here took the exorcist's position and was rebuking a malignant personality. The attitude of Jesus is precisely that of any kindly sym-
pathetic physician. Mr 1:31; Mt 8:15 mention the touch of her hand rather than the tender look over her head.

Rebuked ( $\varepsilon \pi \varepsilon \tau \mu \eta\rceil \sigma v$ ). Only in Luke. Jesus bade the fever leave her as he spoke to the wind and the waves and Luke uses this same verb ( 8:24).

Rose up and ministered ( $\alpha v a \sigma \tau \alpha \sigma \alpha \delta ı \eta \kappa o v \varepsilon$ ). Second aorist active participle as in verse 38, but inchoative imperfect tense $\delta ı \eta \kappa о v \varepsilon$, from $\delta \iota \alpha \kappa о v \varepsilon \omega$ (note augment of compound verb). She rose up immediately, though a long high fever usually leaves one very weak. The cure was instantaneous and complete. She began to minister at once and kept it up.

Luke 4:40
When the sun was setting ( $\delta$ vvov toc $\tau$ tov $\eta \lambda^{\prime} \circ 0$ ). Genitive absolute and present participle $(\delta v v \omega$, late form of $\delta v \omega)$ picturing the sunset scene. Even Mr 1:32 has here the aorist indicative $\varepsilon \delta u \sigma \varepsilon v$ (punctiliar active). It was not only cooler, but it was the end of the sabbath when it was not regarded as work (Vincent) to carry a sick person (Joh 5:10). And also by now the news of the cure of the demoniac of Peter's mother-in-law had spread all over the town.

Had ( $\varepsilon<\chi \circ v$ ). Imperfect tense including all the chronic cases.
With divers diseases (voooıs поккı入aı). Instrumental case. For "divers" say "many coloured" or "variegated." See on Mt 4:24; Mr 1:34.

Brought ( $\eta \gamma \alpha \gamma \circ v$ ). Constative summary second aorist active indicative like Mt 8:16, $\pi \rho o \sigma \varepsilon v \varepsilon \gamma \kappa \alpha v$, where Mr 1:32 has the imperfect $\varepsilon \varphi \varepsilon \rho \circ v$, brought one after another.

He laid his hands on every one of them and healed them (o $\delta \varepsilon \varepsilon v \varepsilon \kappa \alpha \sigma \tau \omega \alpha \cup \tau \omega v \tau \alpha \varsigma$ $\chi \varepsilon ı \rho a \varsigma \varepsilon \pi \iota \tau \iota \theta \varepsilon \varsigma \varepsilon \theta \varepsilon \rho a \pi \varepsilon \cup \varepsilon v$ autous). Note the present active participle $\varepsilon \pi \iota \tau \bullet \theta \varepsilon \varsigma$ and the imperfect active $\varepsilon \theta \varepsilon \rho \alpha \pi \varepsilon v \varepsilon v$, picturing the healing one by one with the tender touch upon each one. Luke alone gives this graphic detail which was more than a mere ceremonial laying on of hands. Clearly the cures of Jesus reached the physical, mental, and spiritual planes of human nature. He is Lord of life and acted here as Master of each case as it came.

Luke 4:41
Came out ( $\varepsilon \xi A ̂ \eta \rho \chi \varepsilon \tau 0$, singular, or $\varepsilon \xi A ̂ \eta \rho \chi \circ \nu \tau 0$, plural). Imperfect tense, repetition, from one after another.

Thou art the Son of God ( $\Sigma v \varepsilon$ o vioc $\operatorname{\tau ov} \theta \varepsilon o v$ ). More definite statement of the deity of Jesus than the witness of the demoniac in the synagogue ( $\operatorname{Lu} 4: 34 ; \mathrm{Mr} 1: 24$ ), like the words of the Father ( $\mathrm{Lu} 3: 22$ ) and more so than the condition of the devil ( $\mathrm{Lu} 4: 3,9$ ). In the Canterbury Revision "devils" should always be "demons" ( $\delta a \mu \mathrm{\mu} \boldsymbol{v} \boldsymbol{\alpha})$ as here.

Suffered them not to speak (ovk $\varepsilon \iota \alpha \alpha \cup \tau \alpha \lambda \alpha \lambda \varepsilon ı v$ ). Imperfect third singular active of $\varepsilon \alpha \omega$, very old and common verb with syllabic augment $\varepsilon$. The tense accents the continued refusal of Jesus to receive testimony to his person and work from demons. Cf. Mt 8:4 to the lepers.

Because they knew (oт $\eta \iota \delta \varepsilon เ \sigma \alpha v)$. Causal, not declarative, oт. Past perfect of the second perfect oı $\delta$ a.

That he was the Christ ( $\tau 0 v \mathrm{X} \rho \circ \tau \tau 0 v a v \tau o v \varepsilon ı v a$ ). Infinitive in indirect assertion with the accusative of general reference. Tov Xpıбтov =
the Anointed, the Messiah.
Luke 4:42
When it was day ( $\gamma \varepsilon v o \mu \varepsilon v \eta \varsigma \eta \mu \varepsilon \rho a \varsigma)$. Genitive absolute with aorist middle participle. Mr 1:35 notes it was "a great while before day" (which see for discussion) when Jesus rose up to go after a restless night. No doubt, because of the excitement of the previous sabbath in Capernaum. He went out to pray (Mr 1:35).

Sought after him ( $\varepsilon \pi \varepsilon\lceil\eta \tau$ touv avtov). Imperfect active indicative. The multitudes kept at it until "they came unto him" ( $\eta \lambda \theta \circ \vee \varepsilon \omega \varsigma \alpha v \tau o v$, aorist active indicative). They accomplished their purpose, $\varepsilon \omega \varsigma \alpha \cup \tau 0 v$, right up to him.

Would have stayed him (катعıхоv autov). Better,
They tried to hinder him. The conative imperfect active of $\kappa \alpha \tau \varepsilon \chi \omega$, an old and common verb. It means either to hold fast (Lu 8:15), to take, get possession of (Lu 14:9) or to hold back, to retain, to restrain (Phm 1:13; Ro 1:18; 7:6; 2Th 2:6; Lu 4:42 ). In this passage it is followed by the ablative case.

That he should not go from them ( $\tau 0 v \mu \eta \pi о \rho \varepsilon \cup \varepsilon \sigma \theta \alpha \alpha \pi^{\prime} \alpha u \tau \omega v$ ). Literally, "from going away from them." The use of $\mu \eta$ (not) after кatel $\chi$ ov is the neat Greek idiom of the redundant negative after a verb of hindering like the French ne (Robertson, Grammar, p. 1171).

Luke 4:43
I must ( $\mu \varepsilon \delta \varepsilon$ ). Jesus felt the urge to go with the work of evangelism "to the other cities also," to all, not to a favoured few.

For therefore was I sent (o $\varepsilon \varepsilon \pi$ тov $\alpha=\alpha \pi \varepsilon \sigma \tau \alpha \lambda \eta \nu$ ). "A phrase of Johannine ring" (Ragg). Second aorist passive indicative of $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$. Christ is the great Apostle of God to men.

Luke 4:44
Was preaching ( $\eta \nu \kappa \eta \rho v \sigma \sigma \omega v$ ). Periphrastic imperfect active, describing his first tour of Galilee in accord with the purpose just stated. One must fill in details, though Mr 1:39 and Mt 8:23-25 tell of the mass of work done on this campaign.

## Luke 5

Luke 5:1
Pressed upon him ( $\varepsilon \pi / \kappa \varepsilon เ \sigma \theta \alpha$ ). Luke in this paragraph (5:1-11; Mr 1:16-20; Mt 4:18-22 ) does not follow the chronology of Mark as he usually does. It seems reasonably clear that the renewed call of the four fishermen came before the first tour of Galilee in Lu 4:42-44 . It is here assumed that Luke is describing in his own way the incident given in Mark and Matthew above. Luke singles out Simon in a graphic way. This verb $\varepsilon \pi!\kappa \varepsilon \iota \sigma \theta \alpha$ is an old one and means to $\lambda \iota \varepsilon$ v $\pi \mathbf{~} \mathrm{v}$, rest upon as of a stone on the tomb (Joh 11:38) or of fish on the burning coals (Joh 21:9). So it is used of a tempest (Ac 27:20) and of the urgent demands for Christ's crucifixion (Lu 23:23). Here it vividly pictures the eager crowds around Jesus. Ev $\tau \omega \varepsilon \pi \kappa \kappa \varepsilon \sigma \theta a$ is a favourite idiom with Luke as we have already seen, $\varepsilon v$ with the articular infinitive in the locative case.

That ( $\kappa \alpha$ ). Ka does not technically mean the declarative conjunction "that," but it is a fair rendering of the somewhat awkward idiom of Luke to a certain extent imitating the Hebrew use of wav.

Was standing ( $\eta \nu \varepsilon \sigma \tau \omega \varsigma)$. Periphrastic second past perfect of $\iota \sigma \tau \eta \mu$ which here is equal to a practical imperfect.
 verb of rest used to be called the pregnant use, came and was standing. But that is no longer necessary, for the accusative as the case of extension is the oldest of the cases and in later Greek regains many of the earlier uses of the other cases employed for more precise distinctions. See the same idiom in verse 2 . We need not here stress the notion of extension. "With characteristic accuracy Luke never calls it a sea, while the others never call it a lake" (Plummer).

Luke 5:2
Two boats ( $\pi \lambda$ ool $\delta v o$ ). Some MSS. have $\pi \lambda o \ldots \rho ı a$, little boats, but $\pi \lambda$ oıa was used of boats of various sizes, even of ships like $v \eta \varepsilon \varsigma$.

The fishermen (o $\alpha \lambda \varepsilon \varepsilon \iota \varsigma)$ ). It is an old Homeric word that has come back to common use in the Koine. It means "sea-folk" from $\alpha \lambda \varsigma$, sea.

Were washing ( $\varepsilon \pi \lambda \nu v o v)$. Imperfect active, though some MSS. have aorist $\varepsilon \pi \lambda \nu v a v$. Vincent comments on Luke's use of five verbs for washing: this one for cleaning, $\alpha \pi о \mu \alpha \sigma \sigma \omega$ for wiping the dust from one's feet ( $10: 11$ ), $\varepsilon \kappa \mu \alpha \sigma \sigma \omega$ of the sinful woman wiping Christ's feet with her hair (7:38,44), a $\pi$ o $\lambda o v \omega$ of washing away sins (symbolically, of course) as in Ac 22:16, and $\lambda$ ouv of washing the body of Dorcas (Ac 9:37) and the stripes of the prisoners (Ac 16:33). On "nets" see on Mt 4:20; Mr 1:18.

Luke 5:3

To put out a little ( $\varepsilon \pi \alpha v a \gamma a \gamma \varepsilon ı v ~ o \lambda ı \gamma o v)$. Second aorist infinitive of the double compound verb $\varepsilon \pi-\alpha v-\alpha \gamma \omega$, found in Xenophon and late Greek writers generally. Only twice in the N.T. In Mt 21:18 in the sense of leading back or returning and here in the sense of leading a ship up upon the sea, to put out to sea, a nautical term.

Taught ( $\varepsilon \delta \iota \kappa \alpha \sigma \kappa \varepsilon v)$ ). Imperfect active, picturing Jesus teaching from the boat in which he was seated and so safe from the jam of the crowd. "Christ uses Peter's boat as a pulpit whence to throw the net of the Gospel over His hearers" (Plummer).

Luke 5:4
Had left speaking ( $\varepsilon \pi \alpha \cup \sigma \alpha \tau \tau \lambda \alpha \lambda \omega v$ ). He ceased speaking (aorist middle indicative and present active participle, regular Greek idiom).

Put out into the deep ( $\varepsilon \pi \alpha v \alpha \gamma \alpha \gamma \varepsilon \varepsilon เ \varsigma ~ \tau о ~ \beta \alpha \theta$ oc). The same double compound verb as in verse 3 , only here second aorist active imperative second person singular.

Let down ( $\chi \alpha \lambda \alpha \sigma \alpha \tau \varepsilon$ ). Peter was master of the craft and so he was addressed first. First aorist active imperative second person plural. Here the whole crew are addressed. The verb is the regular nautical term for lowering cargo or boats (Ac 27:17,30). But it was used for lowering anything from a higher place (Mr 2:4; Ac 9:25; 2Co 11:33). For a catch ( $\varepsilon ı ~ \alpha \gamma \rho \alpha v$ ). This purpose was the startling thing that stirred up Simon.

Luke 5:5
Master ( $\varepsilon$ пı। $\tau \alpha \tau \alpha$ ). Used only by Luke in the N.T. and always in addresses to Christ ( $8: 24,45 ; 9: 33,49 ; 17: 13$ ). Common in the older writers for superintendent or overseer (one standing over another). This word recognizes Christ's authority.

We toiled (котıабаขтєऽ). This verb is from котоৎ (шорк, тоь入) and occurs from Aristophanes on. It used to be said that the notion of weariness in toil appears only in the LXX and the N.T. But Deissmann (Light from the Ancient East, pp. 312f.) cites examples from inscriptions on tombstones quite in harmony with the use in the N.T. Peter's protest calls attention also to the whole night of fruitless toil.

But at thy word ( $\varepsilon \pi \delta \varepsilon \tau \omega \rho \eta \mu \alpha \tau \sigma o v$ ). On the base of $\varepsilon \pi$. Acquiescence to show his obedience to Christ as "Master," but with no confidence whatsoever in the wisdom of this particular command. Besides, fishing in this lake was Peter's business and he really claimed superior knowledge on this occasion to that of Jesus.

Luke 5:6
They inclosed ( $\sigma \cup v \varepsilon \kappa \lambda \varepsilon I \sigma \alpha v)$ ). Effective aorist active indicative with perfective compound ouv.

They shut together. Were breaking ( $\delta \iota \varepsilon \rho \eta \sigma \sigma \varepsilon \tau о$ ). Imperfect passive singular ( $\delta_{ı \kappa \tau \cup \alpha}$ being neuter plural). This is the late form of the old verb $\delta \Delta \alpha \rho \eta \gamma v v \mu$. The nets were actually tearing in two ( $\delta 1 \alpha-)$ and so they would lose all the fish.

Luke 5:7

They beckoned ( $\kappa \alpha \tau \varepsilon v \varepsilon v \sigma \alpha v$ ). Possibly they were too far away for a call to be understood. Simon alone had been ordered to put out into the deep. So they used signs.

Unto their partners ( $\tau \circ \iota \varsigma \varepsilon \tau \varepsilon \chi \circ \iota$ ). This word $\mu \varepsilon \tau \circ \chi \circ \varsigma$, from $\mu \varepsilon \tau \varepsilon \chi \omega$, to have with, means participation with one in common blessings (Heb 3:1,14; 6:4; 12:8). While кot $\nu \omega \nu$, (verse 10 here of James and John also) has the notion of personal fellowship, partnership. Both terms are here employed of the two pairs of brothers who have a business company under Simon's lead.

Help them ( $\sigma u \lambda \lambda \alpha \beta \varepsilon \sigma \theta \alpha$ ). Second aorist middle infinitive. Take hold together with and so to help. Paul uses it in Php 4:3. It is an old word that was sometimes employed for seizing a prisoner ( $\mathrm{Lu} 22: 54$ ) and for conception (con-capio) by a woman (Lu 1:24).

So that they began to $\operatorname{sink}\left(\omega \sigma \tau \varepsilon \beta v \theta_{\imath} \zeta \varepsilon \sigma \theta \alpha \alpha v \tau \alpha\right)$. Consecutive use of $\omega \sigma \tau \varepsilon$ and the infinitive (present tense, inchoative use, beginning to sink). An old verb from $\beta v \theta$ oc. In the N.T. only here and 1Ti 6:9.

Luke 5:8
Fell down at Jesus' knees ( $\pi \rho \circ \sigma \varepsilon \pi \varepsilon \sigma \varepsilon \nu \tau o \iota \varsigma \gamma 0 v a \sigma \iota \nu$ I $\eta \sigma o v$ ). Just like Peter, from extreme self-confidence and pride (verse 5) to abject humilation. But his impulse here was right and sincere. His confession was true. He was a sinful man.

Luke 5:9
For he was amazed $(\theta \alpha \mu \beta \circ \varsigma \gamma \alpha \rho \pi \varepsilon \rho \iota \sigma \chi \varepsilon v)$. Literally,
For a wonder held him round. Aorist active indicative. It held Peter fast and all the rest.

Luke 5:10
Thou shalt catch men $(\varepsilon \sigma \eta \zeta \omega \gamma \rho \omega v)$. Periphrastic future indicative, emphasizing the linear idea. The old verb $\mathrm{Z} \omega \gamma \rho \varepsilon \omega$ means to catch alive, not to kill. So then Peter is to be a catcher of men, not of fish, and to catch them alive and for life, not dead and for death. The great Pentecost will one day prove that Christ's prophecy will come true. Much must happen before that great day. But Jesus foresees the possibilities in Simon and he joyfully undertakes the task of making a fisher of men out of this poor fisher of fish.

Luke 5:11
They left all, and followed him ( $\alpha \varphi \varepsilon v \tau \varepsilon \varsigma \pi \alpha \nu \tau \alpha \eta \kappa о \lambda o v \theta \eta \sigma \alpha v$ ). Then and there. They had already become his disciples. Now they leave their business for active service of Christ. The conduct of this group of business men should make other business men to pause and see if Jesus is calling them to do likewise.

Luke 5:12
Behold ( $\kappa \alpha เ \delta o v$ ). Quite a Hebraistic idiom, this use of $\kappa \alpha$ after $\varepsilon \gamma \varepsilon v \varepsilon \tau o$ (almost like $o \tau)$ with $\mathrm{i} \delta \mathrm{ov}$ (interjection) and no verb.

Full of leprosy ( $\pi \lambda \eta \rho \eta \varsigma \lambda \varepsilon \pi \rho a \varsigma)$. Mr 1:40 and Mt 8:2 have simply "a leper" which see. Evidently a bad case full of sores and far advanced as Luke the physician notes. The law (Le 13:12f. ) curiously treated advanced cases as less unclean than the earlier stages.

Fell on his face ( $\pi \varepsilon \sigma \omega v \varepsilon \pi \pi \pi \rho \sigma \omega \pi \sigma v$ ). Second aorist active participle of $\pi \iota \pi \tau \omega$, common verb. Mr 1:40 has "kneeling" ( $\gamma$ оvu $\varepsilon \varepsilon \tau \omega v$ ) and Mt 8:40 "worshipped" ( $\pi \rho о \sigma \varepsilon \kappa \nu v \varepsilon$ ). All three attitudes were possible one after the other. All three Synoptics quote the identical language of the leper and the identical answer of Jesus. His condition of the third class turned on the "will" ( $\theta \varepsilon \lambda \eta \stackrel{)}{ }$ of Jesus who at once asserts his will $(\theta \eta \lambda \omega)$ and cleanses him. All three likewise mention the touch ( $\eta \psi \alpha \tau 0$, verse 13) of Christ's hand on the unclean leper and the instantaneous cure.

Luke 5:14
To tell no man ( $\mu \eta \delta \varepsilon v \varepsilon \varepsilon \pi \varepsilon เ v$ ). This is an indirect command after the verb "charged" ( $\pi \alpha \rho \eta \gamma \gamma \varepsilon ו \lambda \varepsilon v$ ). But Luke changes (constructio variata) to the direct quotation, a common idiom in Greek and often in Luke (Ac 1:4f. ). Here in the direct form he follows Mr 1:43; Mt 8:4. See discussion there about the direction to go to the priest to receive a certificate showing his cleansing, like our release from quarantine (Le 13:39; 14:2-32).
 "according to sense," as we say, for it has no antecedent in the context, just to people in general. But this identical phrase with absence of direct reference occurs in Mark and Matthew, pretty good proof of the use of one by the other. Both Mt 8:4; Lu 5:14 follow Mr 1:44

## Luke 5:15

So much the more ( $\mu \alpha \lambda \lambda o v$ ). Mr 1:45 has only "much" ( $\pi о \lambda \lambda \alpha$, many), but Mark tells more about the effect of this disobedience.

Went abroad ( $\delta ı \eta \rho \chi \varepsilon \tau 0)$. Imperfect tense. The fame of Jesus kept going.
Came together ( $\sigma \cup v \eta \rho \chi$ оvтo). Imperfect tense again. The more the report spread, the more the crowds came.

Luke 5:16
But he withdrew himself in the deserts and prayed (av $\alpha \circ \varsigma \delta \varepsilon \eta v \cup \pi о \chi \omega \rho \omega v \varepsilon v \tau \alpha ル$, $\varepsilon \rho \eta \mu \circ \varsigma \kappa \kappa \pi \rho о \sigma \varepsilon v \chi о \mu \varepsilon v o \varsigma)$. Periphrastic imperfects. Literally, "But he himself was with drawing in the desert places and praying." The more the crowds came as a result of the leper's story, the more Jesus turned away from them to the desert regions and prayed with the Father. It is a picture of Jesus drawn with vivid power. The wild enthusiasm of the crowds was running ahead of their comprehension of Christ and his mission and message. $Н \nu \pi о \chi \omega \rho \varepsilon \omega$ (perhaps with the notion of slipping away secretly, vлo-) is a very common Greek verb, but in the N.T. occurs in Luke alone. Elsewhere in the N.T. avax $\omega \rho \varepsilon \omega$ (to go back) appears.

Luke 5:17

That ( $\kappa \alpha$ ). Use of $\kappa \alpha=\mathrm{o} \tau$ (that) like the Hebrew wav, though found in Greek also.
He (avтоৎ). Luke sometimes has avтоц in the nominative as unemphatic "he" as here, not "he himself."

Was teaching ( $\eta v \delta \iota \delta \alpha \sigma \kappa \omega \nu$ ). Periphrastic imperfect again like our English idiom.
Were sitting by ( $\eta \sigma \alpha \nu \kappa \alpha \theta \eta \mu \varepsilon v o$ ). Periphrastic imperfect again. There is no "by" in the Greek.

Doctors of the law ( $\nu \circ \mu o \delta ı \delta \alpha \sigma \kappa \alpha \lambda o$ ). A compound word formed after analogy of ı $\rho \circ \delta \iota \delta \alpha \sigma \kappa \alpha \lambda о \varsigma$, but not found outside of the N.T. and ecclesiastical writers, one of the very few words apparently N.T. in usage. It appears here and Ac 5:34; 1Ti 1:7. It is not likely that Luke and Paul made the word, but they simply used the term already in current use to describe teachers and interpreters of the law. Our word "doctor" is Latin for "teacher." These "teachers of the law" are called elsewhere in the Gospels "scribes" ( $\gamma \rho \alpha \mu \mu \alpha \tau \varepsilon ı$ ) as in Matthew and Mark (see on Mt 5:20; 23:34 ) and Lu 5:21; 19:47; 21:1; 22:2 . Luke also employs vo $\boldsymbol{\mu}$ кко (one skilled in the law, vo $\mu \circ$ ¢) as in 10:25. One thinks of our LL.D. (Doctors of Civil and Canon Law), for both were combined in Jewish law. They were usually Pharisees (mentioned here for the first time in Luke) for which see on Mt 3:7,20. Luke will often speak of the Pharisees hereafter. Not all the "Pharisees" were "teachers of the law" so that both terms often occur together as in verse 21 where Luke has separate articles (о $\gamma \rho \alpha \mu \mu \alpha \tau \varepsilon \iota \kappa \alpha$ о Фа $\rho ı \sigma \alpha ı$ ), distinguishing between them, though one article may occur as in Mt 5:20 or no article as here in verse 17. Luke alone mentions the presence here of these Pharisees and doctors of the law "which were come" (o $\eta \sigma \alpha \nu \varepsilon \lambda \eta \lambda \nu \theta$ o $\tau \varepsilon \varsigma$, periphrastic past perfect active,
had come ).
Out of every village of Galilee and Judea and Jerusalem ( $\varepsilon \kappa \pi \alpha \sigma \eta \varsigma \kappa \omega \mu \eta_{\varsigma} \tau \eta \varsigma \Gamma \alpha \lambda_{ı} \lambda \alpha \iota \alpha \varsigma$ $\kappa \alpha$ Iov $\alpha ı a \varsigma \kappa \alpha \operatorname{I\varepsilon \rho ои\sigma \alpha \lambda \eta \mu ).~Edersheim~(Jewish~Social~Life)~observes~that~the~Jews~distin-~}$ guished Jerusalem as a separate district in Judea. Plummer considers it hyperbole in Luke to use "every village." But one must recall that Jesus had already made one tour of Galilee which stirred the Pharisees and rabbis to active opposition. Judea had already been aroused and Jerusalem was the headquarters of the definite campaign now organized against Jesus. One must bear in mind that Joh 4:1-4 shows that Jesus had already left Jerusalem and Judea because of the jealousy of the Pharisees. They are here on purpose to find fault and to make charges against Jesus. One must not forget that there were many kinds of Pharisees and that not all of them were as bad as these legalistic and punctilious hypocrites who deserved the indictment and exposure of Christ in Mt 23 . Paul himself is a specimen of the finer type of Pharisee which, however, developed into the persecuting fanatic till Jesus changed his whole life.
 So the best texts. It is neat Greek, but awkward English: "Then was the power of the Lord for the healing as to him (Jesus)." Here Kupıov refers to Jehovah.

Dunamis (dynamite) is one of the common words for "miracles" ( $\delta v v a \mu \varepsilon ı$ ). What Luke means is that Jesus had the power of the Lord God to heal with. He does not mean that this power was intermittent. He simply calls attention to its presence with Jesus on this occasion.

Luke 5:18
That was palsied (oऽ $\eta \nu \pi \alpha \rho \alpha \lambda \varepsilon \lambda \nu \mu \varepsilon \nu \circ \varsigma)$. Periphrastic past perfect passive where Mr 2:3; Mt 9:2 have $\pi \alpha \rho a \lambda \nu \tau \kappa \kappa v$ (our paralytic). Luke's phrase is the technical medical term (Hippocrates, Galen, etc.) rather than Mark's vernacular word (Ramsay, Luke the Physician, pp. 57f.).

They sought ( $\varepsilon \zeta \eta$ touv). Conative imperfect.
Luke 5:19
By what way they might bring him in ( $\pi \circ \iota \propto \varsigma \varepsilon \varsigma \varepsilon \nu \varepsilon \gamma \kappa \omega \sigma \iota \nu \alpha \nu \tau \circ v$ ). Deliberative subjunctive of the direct question retained in the indirect.

The housetop ( $\tau 0 \delta \omega \mu \alpha$ ). Very old word. The flat roof of Jewish houses was usually reached by outside stairway. Cf. Ac 10:9 where Peter went for meditation.

Through the tiles ( $\delta \iota \alpha \tau \omega \nu \kappa \varepsilon \rho \alpha \mu \omega v$ ). Common and old word for the tile roof. Mr 2:4 speaks of digging a hole in this tile roof.

Let him down ( $\kappa \alpha \theta \eta \kappa \alpha \nu \alpha v \tau o v$ ). First aorist (k aorist) effective active of $\kappa \alpha \theta$ ı $\eta \mu$, common verb. Mr 2:4 has historical present $\chi \alpha \lambda \omega \sigma$, the verb used by Jesus to Peter and in Peter's reply (Lu 5:4f.).

With his couch ( $\sigma v \nu \tau \omega \kappa \lambda \iota v \delta \iota \omega$ ). Also in verse 24. Diminutive of $\kappa \lambda \iota \nu \eta$ (verse 18) occurring in Plutarch and Koine writers. Mr 2:4 has краßa兀兀оv (pallet). It doubtless was a pallet on which the paralytic lay.

Into the midst before Jesus ( $\varepsilon \iota \varsigma \tau о \mu \varepsilon \sigma o v \varepsilon \mu \pi \rho \circ \sigma \theta \varepsilon v \tau o v$ I $\eta \sigma o v$ ). The four friends had succeeded, probably each holding a rope to a corner of the pallet. It was a moment of triumph over difficulties and surprise to all in the house (Peter's apparently, Mr 2:1).

Luke 5:20
Their faith ( $\tau \eta \nu \pi \iota \sigma \tau \iota \nu \alpha \nu \tau \omega v$ ). In all three Gospels.
Man $(\alpha v \theta \rho \omega \pi \varepsilon)$. Mark and Matthew have "child" or "Son" ( $\tau \varepsilon \kappa \nu \circ v$ ). Are forgiven $(\alpha \varphi \varepsilon \omega v \tau \alpha)$. This Doric form of the perfect passive indicative is for the Attic $\alpha \varphi \varepsilon เ v \tau \alpha$. It appears also in $\operatorname{Lu} 5: 23 ; 7: 47,48$; Joh 20:23; 1Jo 2:12. Mr 2:6; Mt 9:2 have the present passive $\alpha \varphi \_\varepsilon v \tau \alpha$. Possibly this man's malady was due to his sin as is sometimes true (Joh 5:14). The man had faith along with that of the four, but he was still a paralytic when Jesus forgave his sins.

Luke 5:21
But God alone ( $\varepsilon \mu \eta \mu \circ v \circ \varsigma$ o $\theta \varepsilon o \varsigma)$. Mark has $\varepsilon \iota \varsigma$ (one) instead of $\mu$ ovoৎ (alone).
Luke 5:22

Perceiving ( $\varepsilon \pi \iota \gamma v o v \varsigma)$. Same form (second aorist active participle of $\varepsilon \pi \imath \gamma \iota \nu \omega \sigma \kappa \omega$, common verb for knowing fully) in Mr 2:8 .

Reason ye ( $\delta \iota \alpha \lambda о ү \iota \zeta \varepsilon \sigma \theta \varepsilon$ ) as in Mr 2:8. Mt 9:4 has $\varepsilon v \theta \cup \mu \varepsilon \iota \sigma \theta \varepsilon$.
Luke 5:24
He saith unto him that was palsied ( $\varepsilon \iota \pi \varepsilon v \tau \omega \pi \alpha \rho \alpha \lambda \varepsilon \lambda \nu \mu \varepsilon v \omega$ ). This same parenthesis right in the midst of the words of Jesus is in Mr 2:11; Mt 9:6, conclusive proof of interrelation between these documents. The words of Jesus are quoted practically alike in all three Gospels, the same purpose also $\tau v \alpha \varepsilon \iota \delta \eta \tau \varepsilon$ (second perfect active subjunctive).

Luke 5:25
Whereon he lay ( $\varepsilon \varphi^{\prime}$ о катєкєıтo). Imperfect, upon which he had been lying down. Luke uses this phrase instead of repeating $\kappa \lambda \iota v ı \delta ı o v$ (verse 24).

Glorifying God ( $\delta o \xi \alpha \zeta \omega \nu \tau 0 \nu \theta \varepsilon o v$ ). As one can well imagine.
Luke 5:26
Amazement ( $\varepsilon \kappa \sigma \tau \alpha \sigma ı \varsigma)$. Something out of its place, as the mind. Here the people were almost beside themselves as we say with the same idiom. See on Mr 5:42. So they kept glorifying God (imperfect tense, $\varepsilon \delta 0 \xi a \zeta o v)$ and at the same time "were filled with fear" ( $\varepsilon \pi \lambda \eta \sigma \theta \eta \sigma \alpha \nu \varphi o \beta o v$, aorist passive).

Strange things ( $\pi \alpha \rho \alpha \delta 0 \xi \alpha$ ). Our very word paradox, contrary to ( $\pi \alpha \rho \alpha$ ) received opinion ( $\delta \circ \xi \alpha$ ). Plato, Xenophon, and Polybius use it. Here alone in the N.T.

Luke 5:27
A publican named Levi ( $\tau \varepsilon \lambda \omega v \varepsilon v$ ovo $\mu \alpha \tau$ $\Lambda \varepsilon v \varepsilon เ v$ ). Mr 2:13 has also "The son of Alphaeus" while Mt 9:9 calls him "Matthew." He had, of course, both names. All three use the same words ( $\varepsilon \pi$ тo $\tau \varepsilon \lambda \omega v$ vov) for the place of toll. See discussion of
publican ( $\tau \varepsilon \lambda \omega v \eta \varsigma$ ) on Mt 9:9. All three Gospels give the command of Jesus,
Follow me ( $\alpha к \nearrow о \cup \theta \varepsilon)$.
Luke 5:28
He forsook all ( $\kappa \alpha \tau \alpha \lambda ı \pi \omega \nu \pi \alpha \nu \tau \alpha)$. This detail in Luke alone. He left his profitable business for the service of Christ.

Followed him ( $\eta \kappa 0 \lambda o v \theta \varepsilon \alpha \cup \tau \omega$ ). Imperfect active, perhaps inchoative. He began at once to follow him and he kept it up. Both Mr 2:14; Mt 9:9 have the aorist ( $\eta \kappa о \lambda o u \theta \eta \sigma \varepsilon v$ ), perhaps ingressive.

Luke 5:29
A great feast ( $\delta o \chi \eta \nu \mu \varepsilon \gamma a \lambda \eta v$ ). Here and in $L u$ 14:13 only in the N.T. The word $\delta o \chi \eta$, from $\delta \varepsilon \chi \circ \mu \alpha$, means reception. Occurs in Plutarch and LXX. Levi made Jesus a big reception.

Publicans and others ( $\tau \varepsilon \lambda \omega v \omega v \kappa \alpha \alpha \lambda \lambda \omega v$ ). Luke declines here to use "sinners" like Mr 2:15 and Mt 9:10 though he does so in verse 30 and in 15:1. None but social outcasts would eat with publicans at such a feast or barbecue, for it was a very large affair.

Were sitting at meat with them ( $\left.\eta \sigma \alpha \nu \mu \varepsilon \tau^{\prime} \alpha \nu \tau \omega \nu \kappa \alpha \tau \alpha \kappa \varepsilon\right\lrcorner \mu \varepsilon \nu 0$ ). Literally, were reclining with them (Jesus and the disciples). It was a motley crew that Levi had brought together, but he showed courage as well as loyalty to Jesus.

Luke 5:30
The Pharisees and their scribes (о Фарıбаı ка о $\gamma \rho \alpha \mu \mu \alpha \tau \varepsilon ı \varsigma ~ \alpha v \tau \omega v)$. Note article with each substantive and the order, not "scribes and Pharisees," but "the Pharisees and the scribes of them" (the Pharisees). Some manuscripts omit "their," but Mr 2:16 (the scribes of the Pharisees) shows that it is correct here. Some of the scribes were Sadducees. It is only the Pharisees who find fault here.

Murmured ( $\varepsilon \gamma \circ \gamma \gamma \cup \zeta o v)$. Imperfect active. Picturesque onomatopoetic word that sounds like its meaning. A late word used of the cooing of doves. It is like the buzzing of bees, like $\tau o v \theta o \rho \rho v \zeta \omega$ of literary Greek. They were not invited to this feast and would not have come if they had been. But, not being invited, they hang on the outside and criticize the disciples of Jesus for being there. The crowd was so large that the feast may have been served out in the open court at Levi's house, a sort of reclining garden party.

The publicans and sinners ( $\tau \omega \nu \tau \varepsilon \lambda \omega \nu \omega \nu \kappa \alpha \alpha \mu \alpha \rho \tau \omega \lambda \omega \nu)$. Here Luke is quoting the criticism of the critics. Note one article making one group of all of them.

Luke 5:31
They that are whole (o vүıaıvoviç). Old Greek word for good health from $v \gamma \eta \varsigma$, sound in body. So also in $\mathrm{Lu} 7: 10 ; 15: 27 ; 3 \mathrm{Jo} \mathrm{1:2}$. This is the usual word for good health used by Greek medical writers. Mr 2:17; Mt 9:12 have o וб $\chi$ vovtєৎ (those who have strength).

Luke 5:32
To repentance ( $\varepsilon \iota \varsigma \mu \varepsilon \tau \alpha v o \iota \alpha v$ ). Alone in Luke not genuine in Mr 2:17; Mt 9:12. Only sinners would need a call to repentance, a change of mind and life. For the moment Jesus accepts the Pharisaic division between "righteous" and "sinners" to score them and to answer their criticism. At the other times he will show that they only pretend to be "righteous" and are "hypocrites" in reality. But Jesus has here blazed the path for all soul-winners. The selfsatisfied are the hard ones to win and they often resent efforts to win them to Christ.

Luke 5:33
Often ( $\pi v \kappa v \alpha$ ). Only in Luke. Common word for thick, compact, often.
And make supplications ( $\kappa \alpha \delta \varepsilon \eta \sigma \varepsilon \iota \varsigma \pi о \iota \circ v \tau \tau \alpha$ ). Only in Luke.
But thine ( $o \delta \varepsilon \sigma o$ ). Sharp contrast between the conduct of the disciples of Jesus and those of John and the Pharisees who here appear together as critics of Christ and his disciples (Mr 2:18; Mt 9:14 ), though Luke does not bring that out sharply. It is probable that Levi had his reception for Jesus on one of the Jewish fast days and, if so, this would give special edge to their criticism.

Luke 5:34
Can ye ( $\mu \eta \delta \nu v a \sigma \theta \varepsilon$ ). So Luke, adding
make, $\pi о ו \eta \sigma \alpha$, where Mark and Matthew have $\mu \eta \delta \nu v \alpha v \tau \alpha$. All three have $\mu \eta$ and expect the answer no.

Luke 5:35
 and Mt 9:15 only "then."

Luke 5:36
Also a parable ( $\kappa \alpha \pi \alpha \rho \alpha \beta о \lambda \eta v$ ). There are three parables here in the answer of Jesus (the bridegroom, the patch on the garment, the wineskin). They are not called parables save here, but they are parables and Luke's language means that.

Rendeth ( $\sigma \chi$ เбac). This in Luke alone. Common verb. Used of splitting rocks (Mt 27:51 ). Our word schism comes from it.

Putteth it ( $\varepsilon \pi / \beta \alpha \lambda \lambda \varepsilon$ ). So Mt 9:16 when Mr 2:21 has $\varepsilon \pi \iota \rho a \pi \tau \varepsilon$ (sews on). The word for "piece" or "patch" ( $\varepsilon \pi \mu \beta \lambda \eta \mu \alpha)$ in all the three Gospels is from the verb $\varepsilon \pi \iota \beta \alpha \lambda \lambda \omega$, to clap on, and is in Plutarch, Arrian, LXX, though the verb is as old as Homer. See on Matthew and Mark for distinction between кaıvos (fresh), veoc (new), and $\pi \alpha \lambda \alpha \ldots \rho$ (old).

He will rend the new ( $\kappa \alpha$ тo кaıvov $\sigma \chi$ เб). Future active indicative. So the best MSS.
Will not agree ( $o v \sigma \nu \mu \varphi \omega v \eta \sigma \varepsilon$ ). Future active indicative. So the best manuscripts again.
With the old ( $\tau \omega \pi \alpha \lambda \alpha \omega \omega)$. Associative instrumental case. Instead of this phrase in Luke, Mr 2:21; Mt 9:16 have "a worse rent" ( $\chi \varepsilon เ \rho o v ~ \sigma \chi เ \sigma \mu \alpha)$.

## Luke 5:38

Must be put ( $\beta \lambda \eta \tau \varepsilon \circ v$ ). This verbal adjective in - $\tau \varepsilon \circ \varsigma$ rather than - $\tau 0 \varsigma$ appears here alone in the N.T. though it is common enough in Attic Greek. It is a survival of the literary style. This is the impersonal use and is transitive in sense here and governs the accusative "new wine" (otvov veov), though the agent is not expressed (Robertson, Grammar, p. 1097).

Luke 5:39
The old is good (Ho $\pi \alpha \lambda \alpha \ldots \rho \varsigma \rho \eta \sigma \tau о \varsigma \varepsilon \sigma \tau \iota v)$. So the best MSS. rather that $\chi \rho \eta \sigma \tau о \tau \varepsilon \rho \circ \varsigma$, comparative (better). Westcott and Hort wrongly bracket the whole verse, though occurring in Aleph, B C L and most of the old documents. It is absent in D and some of the old Latin MSS. It is the philosophy of the obscurantist, that is here pictured by Christ. "The prejudiced person will not even try the new, or admit that it has any merits. He knows that the old is pleasant, and suits him; and that is enough; he is not going to change" (Plummer). This is Christ's picture of the reactionary Pharisees.

## Luke 6

Luke 6:1
On a sabbath $(\varepsilon v \sigma \alpha \beta \beta \alpha \tau \omega)$. This is the second sabbath on which Jesus is noted by Luke. The first was Lu 4:31-41. There was another in Joh 5:1-47. There is Western and Syrian (Byzantine) evidence for a very curious reading here which calls this sabbath "secondfirst" ( $\delta \varepsilon \cup \tau \varepsilon \rho о \pi \rho \omega \tau \omega$ ). It is undoubtedly spurious, though Westcott and Hort print it in the margin. A possible explanation is that a scribe wrote "first" ( $\pi \rho \omega \tau \omega$ ) on the margin because of the sabbath miracle in Lu 6:6-11. Then another scribe recalled $\mathrm{Lu} 4: 31$ where a sabbath is mentioned and wrote "second" ( $\delta \varepsilon v \tau \varepsilon \rho \omega)$ also on the margin. Finally a third scribe combined the two in the word $\delta \varepsilon u \tau \varepsilon \rho \circ \pi \rho \omega \tau \omega$ that is not found elsewhere. If it were genuine, we should not know what it means.

Plucked ( $\varepsilon \tau i \lambda \lambda o v$ ). Imperfect active. They were plucking as they went on through ( $\delta$ iáoргยєб $\theta \alpha$ ). Whether wheat or barley, we do not know, not our "corn" (maize).

Did eat ( $\eta \sigma \theta \iota o v$ ). Imperfect again. See on Mt 12:1f.; Mr 2:23f. for the separate acts in supposed violence of the sabbath laws.

Rubbing them in their hands ( $\psi \omega \chi$ оvтєऽ тaıc $\chi \varepsilon \rho \sigma \tau v$ ). Only in Luke and only here in the N.T. This was one of the chief offences. "According to Rabbinical notions, it was reaping, threshing, winnowing, and preparing food all at once" (Plummer). These Pharisees were straining out gnats and swallowing camels! This verb $\psi \omega \chi \omega$ is a late one for $\psi \alpha \omega$, to rub.

Luke 6:3
Not even this (oude touto). This small point only in Luke.
What (o). Literally,
which . Mr 2:25; Mt 12:3 have $\tau$ (what).
Luke 6:4
Did take $(\lambda \alpha \beta \omega v)$. Second aorist active participle of $\lambda \alpha \mu \beta \alpha v \omega$. Not in Mark and Matthew. See Mt 12:1-8; Mr 2:23-28 for discussion of details about the shewbread and the five arguments in defence of his conduct on the sabbath (example of David, work of the priests on the sabbath, prophecy of Ho 6:6, purpose of the sabbath for man, the Son of Man lord of the sabbath). It was an overwhelming and crushing reply to these pettifogging ceremonialists to which they could not reply, but which increased their anger. Codex D transfers verse 5 to after verse 10 and puts here the following: "On the same day beholding one working on the sabbath he said to him: Man, if you know what you are doing, happy are you; but if you do not know, cursed are you and a transgressor of the law."

Luke 6:6
On another sabbath ( $\varepsilon v \varepsilon \tau \varepsilon \rho \omega \sigma \alpha \beta \beta \alpha \tau \omega$ ). This was a second ( $\varepsilon \tau \varepsilon \rho o v$, as it often means), but not necessarily the next, sabbath. This incident is given by all three synoptics (Mr 3:1-6;

Mt 12:9-14; Lu 6:6-11 ). See Matt. and Mark for details. Only Luke notes that it was on a sabbath. Was this because Luke as a physician had to meet this problem in his own practise?

Right hand ( $\eta \delta \varepsilon \xi \iota \alpha$ ). This alone in Luke, the physician's eye for particulars.
Luke 6:7
The scribes and the Pharisees (о $\gamma \rho \alpha \mu \mu \alpha \tau \varepsilon \varsigma ~ к \alpha ~ о ~ Ф а \rho ı \sigma \alpha ı) . ~ O n l y ~ L u k e ~ h e r e ~ t h o u g h ~$ Pharisees named in Mt 12:14 and Pharisees and Herodians in Mr 3:6 .

Watched him ( $\pi \alpha \rho \varepsilon \tau \eta \rho o u v \tau 0 ~ a v \tau o v$ ). Imperfect middle, were watching for themselves on the side $(\pi \alpha \rho \alpha)$. Mr 3:2 has the imperfect active $\pi \alpha \rho \varepsilon \tau \eta \rho o u v$. Common verb, but the proposition $\pi \alpha \rho \alpha$ gave an extra touch, watching either assiduously like the physician at the bedside or insidiously with evil intent as here.

Would heal ( $\theta \varepsilon \rho \alpha \pi \varepsilon v \sigma \varepsilon)$. But the present active indicative ( $(\varepsilon \varepsilon \rho \alpha \pi \varepsilon v \varepsilon$ ) may be the correct text here. So Westcott and Hort.
 aorist active subjunctive of $\varepsilon v \rho \circ \sigma \kappa \omega$ and the infinitive with it means to find out how to do a thing. They were determined to make a case against Jesus. They felt sure that their presence would prevent any spurious work on the part of Jesus.

Luke 6:8
 Imperfect in sense, second past perfect in form $\eta \iota \delta \varepsilon$ from ot $\delta \alpha$. Jesus, in contrast to these spies (Plummer), read their intellectual processes like an open book.

His hand withered ( $\xi \eta \rho \alpha v \tau \eta v \chi \varepsilon \vdash \rho \alpha$ ). Predicate position of the adjective. So in Mr 3:3

Stand forth $(\sigma \tau \eta \theta)$. Luke alone has this verb, second aorist active imperative. Mr 3:3 has

Arise into the midst ( $\varepsilon \gamma \varepsilon \iota \rho \varepsilon \varepsilon \iota \varsigma$ тo $\mu \varepsilon \sigma o v$ ). Luke has
Arise and step forth into the midst ( $\varepsilon \gamma \varepsilon \iota \rho \varepsilon \kappa \alpha \sigma \tau \eta \theta \varepsilon \iota \varsigma \tau 0 \mu \varepsilon \sigma \circ v$ ). Christ worked right out in the open where all could see. It was a moment of excitement when the man stepped forth ( $\varepsilon \sigma \tau \eta)$ there before them all.

Luke 6:9
I ask you ( $\varepsilon \pi \varepsilon \rho \omega \tau \omega \nu \mu a \varsigma)$. They had questions in their hearts about Jesus. He now asks in addition ( $\left.\varepsilon \pi \pi^{\prime}\right)$ an open question that brings the whole issue into the open.

A life ( $\psi \cup \times \eta v$ ). So the Revised Version. The rabbis had a rule: Periculum vitae pellit sabbatum. But it had to be a Jew whose life was in peril on the sabbath. The words of Jesus cut to the quick.

Or to destroy it ( $\eta \alpha \pi \sigma \lambda \varepsilon \sigma \alpha$ ). On this very day these Pharisees were plotting to destroy Jesus (verse 7).

Luke 6:10

He looked round about on them all ( $\pi \varepsilon \rho \wedge \beta \lambda \varepsilon \psi \alpha \mu \varepsilon v o \varsigma)$. First aorist middle participle as in Mr 3:5, the middle voice giving a personal touch to it all. Mark adds "with anger" which Luke here does not put in. All three Gospels have the identical command:

Stretch forth thy hand ( $\varepsilon \xi \tau \varepsilon เ v o v \tau \eta v \chi \varepsilon \rho \rho \alpha \sigma o v)$. First aorist active imperative.
Stretch out, clean out, full length. All three Gospels also have the first aorist passive indicative $\alpha \pi \varepsilon \kappa \alpha \tau \varepsilon \sigma \tau \alpha \theta \eta$ with the double augment of the double compound verb $\alpha \pi о к \alpha \theta_{\iota \sigma \tau \eta \mu}$. As in Greek writers, so here the double compound means complete restoration to the former state.

Luke 6:11
They were filled with madness ( $\varepsilon \pi \lambda \eta \sigma \theta \eta \sigma \alpha v$ avolac) First aorist passive (effective) with genitive: In 5:26 we saw the people filled with fear. Here is rage that is kin to insanity, for avolac is lack of sense ( $\alpha$ privative and vouৎ, mind). An old word, but only here and 2 Ti 3:9 in the N.T.

Communed ( $\delta เ \varepsilon \lambda \alpha \lambda o v v$ ), imperfect active, picturing their excited counsellings with one another. Mr 3:6 notes that they bolted out of the synagogue and outside plotted even with the Herodians how to destroy Jesus, strange co-conspirators these against the common enemy.

What they might do to Jesus ( $\tau$ av $\pi \sigma \not \square \sigma \alpha \iota \varepsilon$ I $\eta \sigma o v$ ). Luke puts it in a less damaging way than $\mathrm{Mr} 3: 6 ; \mathrm{Mt}$ 12:14. This aorist optative with $\alpha v$ is the deliberative question like that in Ac 17:18 retained in the indirect form here. Perhaps Luke means, not that they were undecided about killing Jesus, but only as to the best way of doing it. Already nearly two years before the end we see the set determination to destroy Jesus. We see it here in Galilee. We have already seen it at the feast in Jerusalem (Joh 5:18) where "the Jews sought the more to kill him." John and the Synoptics are in perfect agreement as to the Pharisaic attitude toward Jesus.

Luke 6:12
 Note $\varepsilon \xi$ - where Mr 3:13 has
goeth up (avaßaive). Luke alone has "to pray" as he so often notes the habit of prayer in Jesus.

He continued all night ( $\eta v \delta \iota \alpha v u \kappa \tau \varepsilon \rho \varepsilon v \omega v)$ ). Periphrastic imperfect active. Here alone in the N.T., but common in the LXX and in late Greek writers. Medical writers used it of whole night vigils.

In prayer to God ( $\varepsilon v \tau \eta \pi \rho \circ \sigma \varepsilon v \chi \eta$ रov $\theta \varepsilon o v$ ). Objective genitive $\tau 0 v \theta \varepsilon o v$. This phrase occurs nowhere else. Пробгvхๆ does not mean "place of prayer" or synagogue as in Ac 16:13 , but the actual prayer of Jesus to the Father all night long. He needed the Father's guidance now in the choice of the Apostles in the morning.

Luke 6:13

When it was day (o $\boldsymbol{\tau} \varepsilon \boldsymbol{\varepsilon} \varepsilon v \varepsilon \tau \frac{}{} \eta \mu \varepsilon \rho \alpha$ ). When day came, after the long night of prayer.
He chose from them twelve ( $\varepsilon \kappa \lambda \varepsilon \xi \alpha \mu \varepsilon v o \varsigma \alpha \pi^{\prime} \alpha \nu \tau \omega v \delta \omega \delta \varepsilon \kappa \alpha$ ). The same root ( $\lambda \varepsilon \gamma$ ) was used for picking out, selecting and then for saying. There was a large group of "disciples" or "learners" whom he "called" to him ( $\pi \rho \circ \sigma \varepsilon \varphi \omega v \eta \sigma \varepsilon v$ ), and from among whom he chose (of himself, and for himself, indirect middle voice ( $\varepsilon \kappa \lambda \varepsilon \xi \alpha \mu \varepsilon v o \varsigma)$. It was a crisis in the work of Christ. Jesus assumed full responsibility even for the choice of Judas who was not forced upon Jesus by the rest of the Twelve. "You did not choose me, but I chose you," (Joh 15:16 ) where Jesus uses $\varepsilon \xi \varepsilon \lambda \varepsilon \xi \alpha \sigma \theta \varepsilon$ and $\varepsilon \xi \varepsilon \lambda \varepsilon \xi \alpha \mu \eta v$ as here by Luke.
 the twelve chosen disciples this appellation. Aleph and B have these same words in Mr 3:14 besides the support of a few of the best cursives, the Bohairic Coptic Version and the Greek margin of the Harclean Syriac. Westcott and Hort print them in their text in Mr 3:14, but it remains doubtful whether they were not brought into Mark from $\mathrm{Lu} 6: 13$ where they are undoubtedly genuine. See Mt 10:2 where the connection with sending them out by twos in the third tour of Galilee. The word is derived from $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$, to send (Latin, mitto) and apostle is missionary, one sent. Jesus applies the term to himself ( $\alpha \pi \varepsilon \sigma \tau \varepsilon ı \lambda \alpha$, Joh 17:3) as does Heb 3:1 . The word is applied to others, like Barnabas, besides these twelve including the Apostle Paul who is on a par with them in rank and authority, and even to mere messengers of the churches (2Co 8:23). But these twelve apostles stand apart from all others in that they were all chosen at once by Jesus himself "that they might be with him" (Mr 3:14), to be trained by Jesus himself and to interpret him and his message to the world. In the nature of the case they could have no successors as they had to be personal witnesses to the life and resurrection of Jesus (Ac 1:22). The selection of Matthias to succeed Judas cannot be called a mistake, but it automatically ceased. For discussion of the names and groups in the list see discussion on Mt 10:1-4; Mr 3:14-19.

Luke 6:16
Which was the traitor ( $\circ \varsigma \varepsilon \gamma \varepsilon v \varepsilon \tau 0 ~ \pi \rho o \delta o \tau \eta \varsigma$ ). Who became traitor, more exactly, $\varepsilon \gamma \varepsilon v \varepsilon \tau 0$, not $\eta \nu$. He gave no signs of treachery when chosen.

Luke 6:17
He came down with them ( $\kappa \alpha \tau \alpha \beta \alpha \varsigma \mu \varepsilon \tau^{\prime} \alpha \cup \tau \omega v$ ). Second aorist active participle of $\kappa \alpha \tau \alpha \beta \alpha \iota v \omega$, common verb. This was the night of prayer up in the mountain (Mr 31:3; Lu 6:12 ) and the choice of the Twelve next morning. The going up into the mountain of Mt 5:1 may simply be a summary statement with no mention of what Luke has explained or may be a reference to the elevation, where he "sat down" (Mt 5:1 ), above the plain or "level place" ( $\varepsilon \pi \tau \pi \pi o v \pi \varepsilon \delta \iota v o v)$ on the mountain side where Jesus "stood" or "stopped" ( $\varepsilon \sigma \tau \eta$ ). It may be a level place towards the foot of the mountain. He stopped his descent at this level place and then found a slight elevation on the mountain side and began to speak. There is not the slightest reason for making Matthew locate this sermon on the mountain and Luke
in the valley as if the places, audiences, and topics were different. For the unity of the sermon see discussion on Mt 5:1f. The reports in Matthew and Luke begin alike, cover the same general ground and end alike. The report in Matthew is longer chiefly because in Chapter 5, he gives the argument showing the contrast between Christ's conception of righteousness and that of the Jewish rabbis. Undoubtedly, Jesus repeated many of the crisp sayings here at other times as in Luke 12, but it is quite gratuitous to argue that Matthew and Luke have made up this sermon out of isolated sayings of Christ at various times. Both Matthew and Luke give too much that is local of place and audience for that idea. Mt 5:1 speaks of "the multitudes" and "his disciples." Lu 6:17 notes "a great multitude of his disciples, and a great number of the people from all Judea and Jerusalem, and the sea coast of Tyre and Sidon." They agree in the presence of disciples and crowds besides the disciples from whom the twelve apostles were chosen. It is important to note how already people were coming from "the sea coast of Tyre and Sidon" "to hear him and to be healed (ı $\alpha \theta \eta \alpha$, first aorist passive of $1 \alpha \circ \mu \alpha)$ of their diseases."

Luke 6:18
With unclean spirits ( $\alpha \pi о \pi \nu \varepsilon \nu \mu \alpha \tau \omega \nu \alpha \kappa \alpha \theta \alpha \rho \tau \omega v$ ). In an amphibolous position for it can be construed with "troubled," (present passive participle $\varepsilon v o \chi \lambda o u \mu \varepsilon v o$ ) or with "were healed" (imperfect passive, $\varepsilon \theta \varepsilon \rho a \pi \varepsilon v o v \tau o)$. The healings were repeated as often as they came. Note here both verbs, ı $\propto \circ \mu \alpha$ and $\theta \varepsilon \rho \alpha \pi \varepsilon v \omega$, used of the miraculous cures of Jesus. $\Theta \varepsilon \rho a \pi \varepsilon v \omega$ is the verb more commonly employed of regular professional cures, but no such distinction is made here.

Luke 6:19
 surging, eager crowd pressing up to Jesus. Probably some of them felt that there was a sort of virtue or magic in touching his garments like the poor woman in Lu 8:43f. (Mr 5:23; Mt 9:21).

For power came forth from him ( $о \tau \delta v v \alpha \mu \iota \varsigma \pi \alpha \rho^{\prime} \alpha \cup \tau о v \varepsilon \xi \eta \rho \chi \varepsilon \tau о$ ). Imperfect middle, power was coming out from him. This is the reason for the continual approach to Jesus.
And healed them all (ка tato $\pi \alpha v \tau \alpha \varsigma)$. Imperfect middle again. Was healing all, kept on healing all. The preacher today who is not a vehicle of power from Christ to men may well question why that is true. Undoubtedly the failure to get a blessing is one reason why many people stop going to church. One may turn to Paul's tremendous words in Php 4:13 : "I have strength for all things in him who keeps on pouring power into me" ( $\pi \alpha v \tau \alpha \_\sigma \chi \nu \omega$ $\varepsilon v \tau \omega \varepsilon v \delta v v \alpha \mu \circ u v \tau \mu \varepsilon$ ). It was at a time of surpassing dynamic spiritual energy when Jesus delivered this greatest of all sermons so far as they are reported to us. The very air was electric with spiritual power. There are such times as all preachers know.

Luke 6:20
 participle from $\varepsilon \pi \alpha \iota \rho \omega$. Note also Luke's favourite use of $\kappa \alpha$ avtoc in beginning a paragraph. Vivid detail alone in Luke. Jesus looked the vast audience full in the face. Mt 5:2 mentions that "he opened his mouth and taught them" (began to teach them, inchoative imperfect, $\varepsilon \delta \delta \delta a \sigma \kappa \varepsilon v)$. He spoke out so that the great crowd could hear. Some preachers do not open their mouths and do not look up at the people, but down at the manuscript and drawl along while the people lose interest and even go to sleep or slip out.

Ye poor ( $\mathrm{o} \pi \tau \omega \chi 0$ ).
The poor , but "yours" (v address in all the four beatitudes and four woes given by him. It is useless to speculate why Luke gives only four of the eight beatitudes in Matthew or why Matthew does not give the four woes in Luke. One can only say that neither professes to give a complete report of the sermon. There is no evidence to show that either saw the report of the other. They may have used a common source like Q (the Logia of Jesus) or they may have had separate sources. Luke's first beatitude corresponds with Matthew's first, but he does not have "in spirit" after "poor." Does Luke represent Jesus as saying that poverty itself is a blessing? It can be made so. Or does Luke represent Jesus as meaning what is in Matthew, poverty of spirit?

The kingdom of God ( $\eta \beta \alpha \sigma \lambda \lambda \varepsilon \iota \alpha$ tov $\theta \varepsilon o v$ ). Mt 5:3 has "the kingdom of heaven" which occurs alone in Matthew though he also has the one here in Luke with no practical difference. The rabbis usually said "the kingdom of heaven." They used it of the political Messianic kingdom when Judaism of the Pharisaic sort would triumph over the world. The idea of Jesus is in the sharpest contrast to that conception here and always. See on Mt 3:2 for discussion of the meaning of the word "kingdom." It is the favourite word of Jesus for the rule of God in the heart here and now. It is both present and future and will reach a glorious consummation. Some of the sayings of Christ have apocalyptic and eschatological figures, but the heart of the matter is here in the spiritual reality of the reign of God in the hearts of those who serve him. The kingdom parables expand and enlarge upon various phases of this inward life and growth.

Luke 6:21
Now (vov). Luke adds this adverb here and in the next sentence after "weep." This sharpens the contrast between present sufferings and the future blessings.

Filled ( $\chi$ ор $\tau \alpha \sigma \theta \eta \sigma \varepsilon \sigma \theta \varepsilon$ ). Future passive indicative. The same verb in Mt 5:6. Originally it was used for giving fodder ( $\chi$ ортоৎ) to animals, but here it is spiritual fodder or food except in $\operatorname{Lu}$ 15:16; 16:21 . Luke here omits "and thirst after righteousness."

Weep (к入aıovtєऽ). Audible weeping. Where Mt 5:4 has "mourn" ( $\pi \varepsilon v \theta$ ouvtєऽ).
Shall laugh ( $\gamma \varepsilon \lambda \alpha \sigma \varepsilon \tau \varepsilon$ ). Here Mt 5:4 has "shall be comforted." Luke's words are terse.
Luke 6:22

When they shall separate you (oтаv a $\rho \rho \circ \sigma \omega \sigma เ v \nu \mu \alpha)$ ). First aorist active subjunctive, from $\alpha \varphi \rho \rho!\zeta \omega$, common verb for marking off a boundary. So either in good sense or bad sense as here. The reference is to excommunication from the congregation as well as from social intercourse.

Cast out your name as evil ( $\varepsilon \xi \beta \alpha \lambda \omega \sigma \iota v$ to ovo $\mu \alpha \nu \mu \omega \nu \omega \varsigma \pi o v \eta \rho o v)$. Second aorist active subjunctive of $\varepsilon \kappa \beta \alpha \lambda \lambda \omega$, common verb. The verb is used in Aristophanes, Sophocles, and Plato of hissing an actor off the stage. The name of Christian or disciple or Nazarene came to be a byword of contempt as shown in the Acts. It was even unlawful in the Neronian persecution when Christianity was not a religio licita.

For the Son of man's sake ( $\varepsilon v \varepsilon \kappa \alpha ~ \tau o v ~ v o v ~ \tau o v ~ a v \theta \rho \omega \pi о и) . ~ J e s u s ~ f o r e t o l d ~ w h a t ~ w i l l ~$ befall those who are loyal to him. The Acts of the Apostles is a commentary on this prophecy. This is Christ's common designation of himself, never of others save by Stephen (Ac 7:56) and in the Apocalypse (Re 1:13;14:14). But both Son of God and Son of man apply to him (Joh 1:50,52; Mt 26:63f. ). Christ was a real man though the Son of God. He is also the representative man and has authority over all men.

Luke 6:23
Leap for joy ( $\sigma \kappa \iota \rho \tau \eta \sigma \alpha \tau \varepsilon$ ). Old verb and in LXX, but only in Luke in the N.T. (here and 1:41,44 ). It answers to Matthew's (Mt 5:12 ) "be exceeding glad."

Did ( $\varepsilon$ rooovv). Imperfect active, the habit of "their fathers" (peculiar to both here). Mt 5:12 has "persecuted." Thus they will receive a prophet's reward (Mt 1:41).

Luke 6:24
But woe unto you that are rich ( $\Pi \lambda \eta \nu$ ova $v \mu \nu \nu$ toıs $\pi \lambda$ ovoıoıऽ). Sharp contrast ( $\pi \lambda \eta \nu$ ). As a matter of fact the rich Pharisees and Sadducees were the chief opposers of Christ as of the early disciples later (Jas 5:1-6 ).

Ye have received ( $\alpha \pi \varepsilon \chi \varepsilon \tau \varepsilon)$. Receipt in full $\alpha \pi \varepsilon \chi \omega$ means as the papyri show.
Consolation ( $\pi \alpha \rho \alpha \kappa \lambda \eta \sigma \tau v$ ). From $\pi \alpha \rho \alpha \kappa \alpha \lambda \varepsilon \omega$, to call to one's side, to encourage, to help, to cheer.

Luke 6:25
Now (vvv). Here twice as in verse 21 in contrast with future punishment. The joys and sorrows in these two verses are turned round, measure for measure reversed. The Rich Man and Lazarus (Lu 16:19-31) illustrate these contrasts in the present and the future.

Luke 6:26
In the same manner did their fathers ( $\tau \alpha \alpha \cup \tau \alpha \varepsilon \pi о \circ о v \nu$ о $\pi \alpha \tau \varepsilon \rho \varepsilon \varsigma \alpha \cup \tau \omega v$ ). Literally, their fathers did the same things to the false prophets. That is they spoke well ( $\kappa \alpha \lambda \omega \varsigma$ ), finely of false prophets. Praise is sweet to the preacher but all sorts of preachers get it.

Of you ( $\nu \mu \alpha \varsigma)$. Accusative case after words of speaking according to regular Greek idiom, to speak one fair, to speak well of one.

Luke 6:27

But I say unto you that hear ( $A \lambda \lambda \alpha v \mu เ \nu \lambda \varepsilon \gamma \omega$ тoıৎ $\alpha \kappa о v o v \sigma เ v)$. There is a contrast in this use of $\alpha \lambda \lambda \alpha$ like that in Mt 5:44. This is the only one of the many examples given by Mt 5 of the sharp antithesis between what the rabbis taught and what Jesus said. Perhaps that contrast is referred to by Luke. If necessary, $\alpha \lambda \lambda \alpha$ could be coordinating or paratactic conjunction as in 2Co 7:11 rather than adversative as apparently here. See Mt 5:43f. Love of enemies is in the O.T., but Jesus ennobles the word, $\alpha \gamma \alpha \pi \alpha \omega$, and uses it of love for one's enemies.

Luke 6:28
That despitefully use you ( $\tau \omega v \varepsilon \pi \eta \rho \varepsilon \alpha \zeta о v \tau \omega \nu v \mu \alpha \varsigma$ ). This old verb occurs here only in the N.T. and in $1 \mathrm{Pe} 3: 16$, not being genuine in Mt 5:44.

Luke 6:29
On the cheek $(\varepsilon \pi \tau \eta \nu \sigma \iota \alpha \gamma \circ v \alpha)$. Mt 5:39 has "right." Old word meaning jaw or jawbone, but in the N.T. only here and Mt 5:39, which see for discussion. It seems an act of violence rather than contempt. Sticklers for extreme literalism find trouble with the conduct of Jesus in Joh 18:22f. where Jesus, on receiving a slap in the face, protested against it.

Thy cloke ( $\tau \circ$ ц $\mu \alpha \tau \circ \nu$ ),
thy coat ( $\tau o v \chi \iota \tau \omega \nu \alpha$ ). Here the upper and more valuable garment ( $\mu \mu \alpha \iota \circ v$ ) is first taken, the under and less valuable $\chi \iota \tau \omega \nu$ last. In Mt 5:40 the process (apparently a legal one) is reversed.

Withhold not ( $\mu \eta \kappa \omega \lambda \nu \sigma \eta \stackrel{)}{ }$ ). Aorist subjunctive in prohibition against committing an act. Do not hinder him in his robbing. It is usually useless anyhow with modern armed bandits.

Luke 6:30
Ask them not again ( $\mu \eta \alpha \pi \alpha \iota \tau \varepsilon$ ). Here the present active imperative in a prohibition, do not have the habit of asking back. This common verb only here in the N.T., for aıtovoıv is the correct text in Lu 12:20. The literary flavour of Luke's Koine style is seen in his frequent use of words common in the literary Greek, but appearing nowhere else in the N.T.

Luke 6:31
As ye would ( $\kappa \alpha \theta \omega \varsigma \theta \varepsilon \lambda \varepsilon \tau \varepsilon$ ). In Mt 7:12 the Golden Rule begins: $\Pi \alpha v \tau \alpha$ o $\sigma \alpha \varepsilon \alpha \nu \theta \varepsilon \lambda \eta \tau \varepsilon$. Luke has "likewise" (о $\mu \circ \omega \varsigma)$ where Matthew has ovt $\omega \varsigma$. See on Matthew for discussion of the saying.

Luke 6:32
What thank have ye? ( $\pi \circ \iota \alpha v \mu \imath \chi \chi \rho \iota \varsigma \varepsilon \sigma \tau \iota v ;)$. What grace or gratitude is there to you? Mt 5:46 has $\mu$ o大日ov (reward).

Luke 6:33
Do good ( $\alpha \gamma \alpha \theta$ о $\pi о \imath \eta \tau$ ). Third-class condition, $\varepsilon \alpha v$ and present subjunctive. This verb not in old Greek, but in LXX.

Even sinners ( $\kappa \alpha$ о $\alpha \mu \alpha \rho \tau \omega \lambda о$ ). Even the sinners, the article distinguishing the class. Mt 5:46 has "even the publicans" and 5:47 "even the Gentiles." That completes the list of the outcasts for "sinners" includes "harlots" and all the rest.

Luke 6:34
If ye lend ( $\varepsilon \alpha v \delta \alpha v ı \sigma \eta \tau \varepsilon$ ). Third-class condition, first aorist active subjunctive from $\delta a v ı \zeta \omega$ (old form $\delta a v \varepsilon \iota \zeta \omega$ ) to lend for interest in a business transaction (here in active to lend and Mt 5:42 middle to borrow and nowhere else in N.T.), whereas кıх $\rho \eta \mu$ (only Lu 11:5 in N.T.) means to loan as a friendly act.

To receive again as much ( $\imath \alpha \alpha \pi \sigma \lambda \alpha \beta \omega \sigma \iota \nu \tau \alpha \iota \sigma \alpha$ ). Second aorist active subjunctive of $\alpha \pi \sigma \lambda \alpha \mu \beta \alpha \nu \omega$, old verb, to get back in full like $\alpha \pi \varepsilon \chi \omega$ in 6:24. Literally here, "that they may get back the equal" (principal and interest, apparently). It could mean "equivalent services." No parallel in Matthew.

Luke 6:35
But $(\pi \lambda \eta \nu)$. Plain adversative like $\pi \lambda \eta \nu$ in verse 24. Never despairing ( $\mu \eta \delta \varepsilon v$ $\alpha \pi \varepsilon \lambda \pi \iota \zeta \circ v \tau \varepsilon \varsigma) . \mathrm{M} \eta \delta \varepsilon v$ is read by A B L Bohairic and is the reading of Westcott and Hort. The reading $\mu \eta \delta \varepsilon v \alpha$ is translated "despairing of no man." The Authorized Version has it "hoping for nothing again," a meaning for $\alpha \pi \varepsilon \lambda \pi \iota \zeta \omega$ with no parallel elsewhere. Field (Otium Nor. iii. 40) insists that all the same the context demands this meaning because of $\alpha \pi \varepsilon \lambda \pi \iota \zeta \varepsilon \iota v$ in verse 34 , but the correct reading there is $\varepsilon \lambda \pi \iota \zeta \varepsilon \iota v$, not $\alpha \pi \varepsilon \lambda \pi \iota \zeta \varepsilon \iota v$. Here Field's argument falls to the ground. The word occurs in Polybius, Diodorus, LXX with the sense of despairing and that is the meaning here. D and Old Latin documents have nihil desperantes, but the Vulgate has nihil inde sperantes (hoping for nothing thence) and this false rendering has wrought great havoc in Europe. "On the strength of it Popes and councils have repeatedly condemned the taking of any interest whatever for loans. As loans could not be had without interest, and Christians were forbidden to take it, money lending passed into the hands of the Jews, and added greatly to the unnatural detestation in which Jews were held" (Plummer). By "never despairing" or "giving up nothing in despair" Jesus means that we are not to despair about getting the money back. We are to help the apparently hopeless cases. Medical writers use the word for desperate or hopeless cases.

Sons of the Most High (vo Hv here all real children or sons of God (Lu 20:36 ) are so termed. See also 1:35,76 for the use of "the Highest" of God. He means the same thing that we see in Mt 5:45,48 by "your Father."

Toward the unthankful and evil ( $\varepsilon \pi$ тоиৎ ахарıбтоия ка лоvпроия). God the Father is kind towards the unkind and wicked. Note the one article with both adjectives.

Luke 6:36
Even as your Father ( $\kappa \alpha \theta \omega \varsigma$ о $\pi \alpha \tau \eta \rho v \mu \omega \nu$ ). In Mt 5:48 we have $\omega \varsigma$ о $\pi \alpha \tau \eta \rho v \mu \omega v$. In both the perfection of the Father is placed as the goal before his children. In neither case is it said that they have reached it.

## Luke 6:37

And judge not ( $\kappa \alpha \mu \eta \kappa \rho \iota \nu \varepsilon \tau \varepsilon)$. $M \eta$ and the present active imperative, forbidding the habit of criticism. The common verb $\kappa \rho \iota v \omega$, to separate, we have in our English words critic, criticism, criticize, discriminate. Jesus does not mean that we are not to form opinions, but not to form them rashly, unfairly, like our prejudice.

Ye shall not be judged (ov $\mu \eta \kappa \rho(\theta \eta \tau \varepsilon$ ). First aorist passive subjunctive with double negative ou $\mu \eta$, strong negative.

Condemn not ( $\mu \eta \kappa \alpha \tau \alpha \delta \iota \kappa \alpha \zeta \varepsilon \tau \varepsilon$ ). To give judgment ( $\delta \iota \kappa \eta, \delta_{\iota} \xi \alpha \zeta \omega$ ) against ( $\kappa \alpha \tau \alpha$ ) one. $\mathrm{M} \eta$ and present imperative. Either cease doing or do not have the habit of doing it. Old verb.

Ye shall not be condemned ( $o v \mu \eta \kappa \alpha \tau \alpha \delta ı \kappa \alpha \sigma \theta \eta \tau \varepsilon$ ). First aorist passive indicative again with the double negative. Censoriousness is a bad habit.

Release ( $\alpha \pi \mathrm{o} \lambda \nu \varepsilon \tau \varepsilon$ ). Positive command the opposite of the censoriousness condemned.

## Luke 6:38

Pressed down ( $\pi \varepsilon \pi \iota \varepsilon \sigma \mu \varepsilon v o v)$. Perfect passive participle from $\pi \iota \varepsilon \zeta \omega$, old verb, but here alone in the N.T., though the Doric form $\pi \iota \varsigma \zeta \omega$, to seize, occurs several times (Joh 7:30,32,44 ).

Shaken together ( $\sigma \varepsilon \sigma \alpha \lambda \varepsilon v \mu \varepsilon v o v$ ). Perfect passive participle again from common verb $\sigma \alpha \lambda \varepsilon v \omega$.

Running over (v $\tau \varepsilon \rho \varepsilon \kappa \chi \nu v v o \mu \varepsilon v o v)$. Present middle participle of this double compound verb not found elsewhere save in A Q in Joe 2:24. Xvv $\omega$ is a late form of $\chi \varepsilon \omega$. There is asyndeton here, no conjunction connecting these participles. The present here is in contrast to the two preceding perfects. The participles form an epexegesis or explanation of the "good measure" ( $\mu \varepsilon \tau \rho \circ v \kappa \alpha \lambda o v$ ). Into your bosom ( $\varepsilon \iota \varsigma \tau о v \kappa о \lambda \pi \sigma v \nu \mu \omega v$ ). The fold of the wide upper garment bound by the girdle made a pocket in common use (Ex 4:6; $\operatorname{Pr} 6: 27 ; \operatorname{Ps} 79: 12$; Isa 65:6f.; Jer 32:18 ). So Isa 65:7 :

I will measure their former work unto their bosom. Shall be measured to you again ( $\alpha v \tau \iota \mu \varepsilon \tau \rho \forall \eta \sigma \varepsilon \tau \alpha$ ). Future passive indicative of the verb here only in the N.T. save late MSS. in Mt 7:2 . Even here some MSS. have $\mu \varepsilon \tau \rho \eta \theta \eta \sigma \varepsilon \tau \alpha$. The $\alpha \nu \tau$ has the common meaning of in turn or back, measured back to you in requital.

Luke 6:39
Also a parable ( $\kappa \alpha \pi \alpha \rho \alpha \beta о \lambda \eta \nu)$. Plummer thinks that the second half of the sermon begins here as indicated by Luke's insertion of "And he spake ( $\varepsilon \iota \pi \varepsilon \nu \delta \varepsilon$ ) at this point. Luke has the word parable some fifteen times both for crisp proverbs and for the longer narrative comparisons. This is the only use of the term parable concerning the metaphors in the Sermon on the Mount. But in both Matthew and Luke's report of the discourse there are some sixteen possible applications of the word. Two come right together: The blind leading the blind, the mote and the beam. Matthew gives the parabolic proverb of the blind leading the
blind later (Mt 15:14). Jesus repeated these sayings on various occasions as every teacher does his characteristic ideas. So Luke 6:40; Mt 10:24, Lu 6:45; Mt 12:34f. Can (Mit סuvata). The use of $\mu \eta \tau$ in the question shows that a negative answer is expected.

Guide (o $\delta \eta \gamma \varepsilon \varepsilon v)$. Common verb from o $\delta \eta \gamma o \varsigma$ (guide) and this from o ooc (way) and $\eta \gamma \varepsilon o \mu a$, to lead or guide.

Shall they not both fall? (ovX ацчотєро $\varepsilon \mu \pi \varepsilon \sigma о и \nu \tau \alpha!;$ ). Ovх, a sharpened negative from ouk, in a question expecting the answer Yes. Future middle indicative of the common verb $\varepsilon \mu \pi \iota \tau \tau \omega$.

Into a pit ( $\varepsilon \varsigma \varsigma ~ \beta o \theta v v o v$ ). Late word for older $\beta$ o $\theta \rho \circ \varsigma$.
Luke 6:40
The disciple is not above his master (ovk $\varepsilon \sigma \tau \iota v \mu \alpha \theta \eta \tau \eta \varsigma v \pi \varepsilon \rho \tau \operatorname{\tau ov} \delta \iota \delta \alpha \sigma \kappa \alpha \lambda o v$ ). Literally, a learner (or pupil) is not above the teacher. Precisely so in Mt 10:24 where "slave" is added with "lord." But here Luke adds: "But everyone when he is perfected shall be as his master" (катпртıбиєvoৎ $\delta \varepsilon \pi \alpha \varsigma ~ \varepsilon \sigma \tau \alpha ~ \omega \varsigma ~ о ~ \delta \iota \delta \alpha \sigma к а \lambda о \varsigma ~ \alpha v \tau о и) . ~ T h e ~ s t a t e ~ o f ~ c o m p l e t i o n, ~$
 broken things or nets (Mt 4:21) or men (Ga 6:1). So it is a long process to get the pupil patched up to the plane of his teacher.

Luke 6:41
Mote (карчоऽ) and
beam ( $\delta$ oкоv). See on Mt 7:3-5 for discussion of these words in this parabolic proverb kin to several of ours today.

Luke 6:42
Canst thou say ( $\delta u v a \sigma \alpha \lambda \varepsilon \gamma \varepsilon เ v)$. Here Mt 7:4 has
wilt thou say ( $\varepsilon \rho \varepsilon \boxed{\varsigma}$ ).
Beholdest not (ov $\beta \lambda \varepsilon \pi \omega v$ ). Mt 7:4 has "lo" (iסov).
Thou hypocrite (vтокрıта). Contrast to the studied politeness of "brother" ( $\alpha \delta \varepsilon \lambda \varphi \varepsilon$ ) above. Powerful picture of blind self-complacence and incompetence, the keyword to argument here.

Luke 6:44
Is known ( $\gamma เ \nu \omega \sigma \kappa \varepsilon \tau \alpha$ ). The fruit of each tree reveals its actual character. It is the final test. This sentence is not in Mt 7:17-20, but the same idea is in the repeated saying (Mt 7:16,20 ): "By their fruits ye shall know them," where the verb
epignosesthe means full knowledge. The question in Mt 7:16 is put here in positive declarative form. The verb is in the plural for "men" or "people," $\sigma u \lambda \lambda \varepsilon \gamma o v \sigma \tau v$. See on Mt 7:16.

Bramble bush ( $\beta a \tau o v$ ). Old word, quoted from the LXX in Mr 12:26; Lu 20:37 (from Ex 3:6 ) about the burning bush that Moses saw, and by Stephen (Ac 7:30,35) referring to
the same incident. Nowhere else in the N.T. "Galen has a chapter on its medicinal uses, and the medical writings abound in prescriptions of which it is an ingredient" (Vincent).

Gather ( $\tau \rho v \gamma \omega \sigma เ v)$. A verb common in Greek writers for gathering ripe fruit. In the N.T. only here and Re 14:18f.

Grapes ( $\sigma \tau \alpha \varphi \nu \lambda \eta \nu$ ). Cluster of grapes.
Luke 6:45
Bringeth forth ( $\pi \rho \circ \varphi \varepsilon \rho \varepsilon$ ). In a similar saying repeated later. Mt 12:34f. has the verb $\varepsilon \kappa \beta \alpha \lambda \lambda \varepsilon$ (throws out, casts out), a bolder figure. "When men are natural, heart and mouth act in concert. But otherwise the mouth sometimes professes what the heart does not feel" (Plummer).

Luke 6:46
And do not ( $\kappa \alpha$ ov $\pi o \iota \varepsilon เ \tau \varepsilon$ ). This is the point about every sermon that counts. The two parables that follow illustrate this point.

Luke 6:47
Hears and does ( $\alpha \kappa \sigma \omega \omega v \kappa \alpha \pi \sigma \omega v$ ). Present active participles. So in Mt 7:24. (Present indicative.)

I will show you ( $v \pi о \delta \varepsilon ı \xi \omega \nu \mu \nu)$ ). Only in Luke, not Matthew.
Luke 6:48
Digged and went deep ( $\varepsilon \sigma \kappa \alpha \psi \varepsilon v \kappa \alpha \varepsilon \beta \alpha \theta v v \varepsilon v)$ ). Two first aorist indicatives. Not a hendiadys for dug deep. $\Sigma \kappa \alpha \pi \tau \omega$, to dig, is as old as Homer, as is $\beta \alpha \theta \cup v \omega$, to make deep.

And laid a foundation ( $\kappa \alpha \varepsilon \theta \eta \kappa \varepsilon v \theta \varepsilon \mu \varepsilon \lambda \iota v$ ). That is the whole point. This wise builder struck the rock before he laid the foundation.

When a flood arose ( $\pi \lambda \eta \mu \mu \nu \rho \eta \varsigma \gamma \varepsilon v o \mu \varepsilon v \eta \varsigma)$. Genitive absolute. Late word for flood, $\pi \lambda \eta \mu \mu \nu \rho a$, only here in the N.T., though in Job 40:18 .

Brake against ( $\pi \rho \circ \sigma \varepsilon \rho \eta \xi \varepsilon v)$. First aorist active indicative from $\pi \rho \circ \sigma \rho \eta \gamma v v \mu$ and in late writers $\pi \rho \circ \sigma \rho \eta \sigma \sigma \omega$, to break against. Only here in the N.T. Mt 7:25 has $\pi \rho \circ \sigma \varepsilon \pi \varepsilon \sigma \alpha v$, from $\pi \rho o \sigma \pi \iota \pi \tau \omega$, to fall against.

Could not shake it (ouk $\sigma \chi \cup \sigma \varepsilon v \sigma \alpha \lambda \varepsilon v \sigma \alpha \alpha v \tau \eta v$ ). Did not have strength enough to shake it.

Because it had been well builded ( $\delta \iota \alpha$ то к $\alpha \lambda \omega \varsigma$ окко $\delta о \mu \eta \sigma \theta \alpha \alpha \nu \tau \eta v$ ). Perfect passive articular infinitive after $\delta \iota \alpha$ and with accusative of general reference.

Luke 6:49
He that heareth and doeth not (o $\delta \varepsilon \alpha \kappa о v \sigma \alpha \varsigma ~ к \alpha \mu \eta \pi о п \eta \sigma \alpha \varsigma)$ ). Aorist active participle with article. Particular case singled out (punctiliar, aorist).

Like a man ( $\circ \mu \circ \circ \varsigma \varsigma \varepsilon \sigma \tau \iota v \alpha v \rho \omega \pi \omega)$. Associative instrumental case after ouoos as in verse 47.

Upon the earth ( $\varepsilon \pi \tau \eta v \gamma \eta \nu)$. Mt 7:26 has "upon the sand" ( $\varepsilon \pi \tau \eta \nu \alpha \mu \mu \circ v$ ), more precise and worse than mere earth. But not on the rock.

Without a foundation ( $\chi \omega \rho \iota \varsigma \theta \varepsilon \mu \varepsilon \lambda \iota o v)$. The foundation on the rock after deep digging as in verse 48 .

It fell in ( $\sigma \cup v \varepsilon \pi \varepsilon \sigma \varepsilon v$ ). Second aorist active of $\sigma \cup v \pi \iota \pi \tau \omega$, to fall together, to collapse. An old verb from Homer on, but only here in the N.T.

The ruin ( $\tau \mathrm{o} \rho \eta \gamma \mu \alpha$ ). The crash like a giant oak in the forest resounded far and wide. An old word for a rent or fracture as in medicine for laceration of a wound. Only here in the N.T.

## Luke 7

Luke 7:1
After ( $\varepsilon \pi \varepsilon เ \delta \eta, \varepsilon \pi \varepsilon \alpha v \delta \delta \eta$ ). This conjunction was written $\varepsilon \pi \varepsilon \delta \eta$ in Homer and is simple $\varepsilon \pi \varepsilon$ with the intensive $\delta \eta$ added and even $\varepsilon \pi \varepsilon \delta \eta \pi \varepsilon \rho$ once in N.T. (Lu 1:1). This is the only instance of the temporal use of $\varepsilon \pi \varepsilon เ \delta \eta$ in the N.T. The causal sense occurs only in Luke and Paul, for $\varepsilon \pi \varepsilon$ is the correct text in Mt 21:46 .

Had ended ( $\varepsilon \pi \lambda \eta \rho \omega \sigma \varepsilon v)$. First aorist active indicative. There is here a reference to the conclusion of the Sermon on the Mount, but with nothing concerning the impression produced by the discourse such as is seen in Mt 7:28. This verse really belongs as the conclusion of Chapter 6, not as the beginning of Chapter 7 .

In the ears of the people ( $\varepsilon เ \varsigma ~ \tau \alpha \varsigma ~ а к о \alpha \varsigma ~ \tau о и ~ \lambda \alpha о v) . ~ А к о \eta ~ f r o m ~ а к о и \omega, ~ t o ~ h e a r, ~ i s ~ u s e d ~$ of the sense of hearing (1Co 12:17), the ear with which one hears (Mr 7:35; Heb 5:11) , the thing heard or the report (Rom 10:16) or oral instruction (Ga 3:2,5). Both Mt 8:5-13; Lu 7:1-10 locate the healing of the centurion's servant in Capernaum where Jesus was after the Sermon on the Mount.

Luke 7:2
Centurion's servant (HeкатоvтарХоv тivoc $\delta o u \lambda o c$ ). Slave of a certain centurion (Latin word $\chi$ £vtvpio, commander of a century or hundred). Mr 15:39,44 has the Latin word in Greek letters, кعv $\tau \rho \rho \omega v$. The centurion commanded a company which varied from fifty to a hundred. Each cohort had six centuries. Each legion had ten cohorts or bands (Ac 10:1 ). The centurions mentioned in the N.T. all seem to be fine men as Polybius states that the best men in the army had this position. See also Lu 23:47. The Greek has two forms of the word, both from $\varepsilon \kappa \alpha \tau о v$, hundred, and $\alpha \rho \chi \omega$, to rule, and they appear to be used interchangeably. So we have єкатоvтархоৎ; here, the form is -архоऽ, and єкатоvтархŋऽ, the form is $\alpha \rho \chi \eta \varsigma$ in verse 6 . The manuscripts differ about it in almost every instance. The $-\alpha \rho \chi \circ \varsigma$ form is accepted by Westcott and Hort only in the nominative save the genitive singular here in Lu 7:2 and the accusative singular in Ac 22:25. See like variation between them in Mt 8:5,8 (- $\alpha \rho \chi \circ \varsigma)$ and Mt 8:13 ( $\alpha \rho \chi \eta$ ). So also - $\alpha \rho \chi$ оv (Ac 22:25) and - $\alpha \rho \chi \eta \varsigma$ (Ac 22:26).

Dear to him ( $\alpha \cup \tau \omega \varepsilon \varepsilon \tau \tau \mu \circ \varsigma$ ). Held in honour, prized, precious, dear (Lu 14:8; 1Pe 2:4; Php 2:29 ), common Greek word. Even though a slave he was dear to him.

Was sick ( $\kappa \alpha \kappa \omega \varsigma ~ \varepsilon \chi \omega v$ ). Having it bad. Common idiom. See already Mt 4:24; 8:16; Mr 2:17; Lu 5:31 , etc. Mt 8:6 notes that the slave was a paralytic.

And at the point of death ( $\eta \mu \varepsilon \lambda \lambda \varepsilon v \tau \varepsilon \lambda \varepsilon u \tau \alpha เ v$ ). Imperfect active of $\mu \varepsilon \lambda \lambda \omega$ (note double augment $\eta$ ) which is used either with the present infinitive as here, the aorist ( $\operatorname{Re} 3: 16$ ), or even the future because of the future idea in $\mu \varepsilon \lambda \lambda \omega$ (Ac 11:28; 24:15). He was about to die.

Luke 7:3

Sent unto him elders of the Jews ( $\alpha \pi \varepsilon \sigma \tau \varepsilon \lambda \lambda \varepsilon \nu \pi \rho \circ \varsigma \alpha v \tau o v \pi \rho \varepsilon \sigma \beta o v \tau \varepsilon \rho o v \varsigma \tau \omega \nu$ Iov $\alpha, \omega \nu)$. Mt 8:5 says "the centurion came unto him." For discussion of this famous case of apparent discrepancy see discussion on Matthew. One possible solution is that Luke tells the story as it happened with the details, whereas Matthew simply presents a summary statement without the details. What one does through another he does himself.

Asking him ( $\varepsilon \rho \omega \tau \omega \nu \alpha v \tau o v)$. Present active participle, masculine singular nominative, of the verb $\varepsilon \rho \omega \tau \alpha \omega$ common for asking a question as in the old Greek (Lu 22:68). But more frequently in the N.T. the verb has the idea of making a request as here. This is not a Hebraism or an Aramaism, but is a common meaning of the verb in the papyri (Deissmann, Light from the Ancient East, p. 168). It is to be noted here that Luke represents the centurion himself as "asking" through the elders of the Jews (leading citizens). In Mt 8:6 the verb is $\pi \alpha \rho \alpha \kappa \alpha \lambda \omega \nu$ (beseeching).

That he would come and save ( $0 \pi \omega \varsigma \varepsilon \lambda \theta \omega \nu \delta \iota \alpha \sigma \omega \sigma \eta$ ). Hıva is the more common final or sub-final (as here) conjunction, but o $\pi \omega \varsigma$ still occurs. $\Delta \iota \alpha \sigma \omega \sigma \eta$ is effective aorist active subjunctive, to bring safe through as in a storm (Ac 28:1,4 ). Common word.

Luke 7:4
Besought ( $\pi \alpha \rho \varepsilon \kappa \alpha \lambda o v v$ ). Imperfect active, began and kept on beseeching. This is the same verb used by Matthew in Mt 8:5 of the centurion himself.

Earnestly ( $\sigma \pi о \cup \delta a \iota \omega \varsigma)$. From $\sigma \pi 0 v \delta \eta$ haste. So eagerly, earnestly, zealously, for time was short.

That thou shouldst do this for him ( $\omega \pi \alpha \rho \varepsilon \xi \eta \tau 0 v \tau 0$ ). Second future middle singular of $\pi \alpha \rho \varepsilon \chi \omega$. Old and common verb, furnish on thy part. $\mathrm{H} \omega$ is relative in dative case almost with notion of contemplated result (Robertson, Grammar, p. 961).

Luke 7:5
For ( $\gamma \alpha \rho$ ). This clause gives the reason why the elders of the Jews consider him "worthy" ( $\alpha \xi \iota \rho$, drawing down the scale, $\alpha \xi \iota \varsigma, \alpha \gamma 0$ ). He was hardly a proselyte, but was a Roman who had shown his love for the Jews.

Himself (avtoc). All by himself and at his own expense.
Us $(\eta \mu v)$. Dative case, for us. It is held by some archaeologists that the black basalt ruins in Tell Hum are the remains of the very synagogue ( $\tau \eta \nu \sigma v v \alpha \gamma \omega \gamma \eta \nu$ ). Literally,
the synagogue, the one which we have, the one for us.
Luke 7:6
Went with them ( $\varepsilon \pi о \rho \varepsilon v \varepsilon \tau о ~ \sigma u v \alpha v \tau o \iota \varsigma)$. Imperfect indicative middle. He started to go along with them.

Now ( $\eta \delta \eta$ ). Already like Latin jam. In 1Co $4: 8$ vvv $\eta \delta \eta$ like jam nunc.
Sent friends ( $\varepsilon \pi \varepsilon \mu \psi \varepsilon \nu \varphi \iota \lambda o v \varsigma)$. This second embassy also, wanting in Matthew's narrative. He "puts the message of both into the mouth of the centurion himself" (Plummer). Note
saying $(\lambda \varepsilon \gamma \omega v)$, present active singular participle, followed by direct quotation from the centurion himself.

Trouble not thyself ( $\mathrm{M} \eta \sigma \kappa \nu \lambda \lambda o v$ ). Present middle (direct use) imperative of $\sigma \kappa \nu \lambda \lambda \omega$, old verb originally meaning to skin, to mangle, and then in later Greek to vex, trouble, annoy. Frequent in the papyri in this latter sense.
 as in Mt 8:8, which see for discussion, from $\tau \kappa \omega$, $\iota \kappa \alpha \nu \omega$, to fit, to reach, be adequate for. Hıva in both places as common in late Greek. See Mt 8:8 also for "roof" ( $\sigma \tau \varepsilon \gamma \eta \nu$, covering).

Luke 7:7
Wherefore neither thought I myself worthy to come unto thee ( $\delta$ o ov $\delta \varepsilon \varepsilon \mu \alpha v \tau o v$ $\eta \xi \iota \omega \sigma \alpha \pi \rho \circ \varsigma \sigma \varepsilon \varepsilon \lambda \theta \varepsilon \iota v)$. Not in Matthew because he represents the centurion as coming to Jesus.

Speak the word $(\varepsilon \iota \pi \varepsilon \lambda o \gamma \omega)$. As in Mt 8:8. Second aorist active imperative with instrumental case, speak with a word.

My servant shall be healed ( $\iota \alpha \eta \tau \omega$ o $\pi \alpha \iota \varsigma \mu \circ v$ ). Imperative first aorist passive, let be healed. Пaıc literally means "boy," an affectionate term for the "slave," סou入oc (verse 2), who was "dear" to him.

Luke 7:8
"Set" ( $\tau \alpha \sigma \sigma o \mu \varepsilon \nu \circ \varsigma)$. Genuine here, though doubtful in Mt 8:9 where see discussion of this vivid and characteristic speech of the centurion.

## Luke 7:9

Turned ( $\sigma \tau \rho \alpha \varphi \varepsilon ı)$ ). Second aorist passive participle of $\sigma \tau \rho \varepsilon \varphi \omega$, to turn. Common verb. A vivid touch not in Matthew's account. In both Matthew and Luke Jesus marvels at the great faith of this Roman centurion beyond that among the Jews. As a military man he had learned how to receive orders and to execute them and hence to expect obedience to his commands, He recognized Jesus as Master over disease with power to compel obedience.

Luke 7:10
Whole (vүıaıvov $\alpha$ ). Sound, well. See Lu 5:31.
Luke 7:11
Soon afterwards ( $\varepsilon v$ тo $\varepsilon \xi \eta \varsigma$ ). According to this reading supply $\chi \rho o v \omega$, time. Other MSS. read $\tau \eta \varepsilon \xi \eta \varsigma$ (supply $\eta \mu \varepsilon \rho a$, day). Hє $\eta \eta \varsigma$ occurs in Luke and Acts in the N.T. though old adverb of time.

That (Ho $\tau$ ). Not in the Greek, the two verbs $\varepsilon \gamma \varepsilon v \varepsilon \tau o$ and $\varepsilon \pi o \rho \varepsilon v \theta \eta$ having no connective (asyndeton).

Went with him ( $\sigma v v \varepsilon \pi \sigma \rho \varepsilon v o v \tau o ~ a v \tau \omega$ ). Imperfect middle picturing the procession of disciples and the crowd with Jesus. Nain is not mentioned elsewhere in the N.T. There is today a hamlet about two miles west of Endor on the north slope of Little Hermon. There
is a burying-place still in use. Robinson and Stanley think that the very road on which the crowd with Jesus met the funeral procession can be identified.

## Luke 7:12

Behold ( $\kappa \alpha \iota \delta o v$ ). The $\kappa \alpha$ introduces the apodosis of the temporal sentence and has to be left out in translations. It is a common idiom in Luke, ка ı $\delta$ ov.

There was carried out ( $\varepsilon \xi \varepsilon \kappa о \mu \iota \zeta \tau \tau)$. Imperfect passive indicative. Common verb in late Greek for carrying out a body for burial, though here only in the N.T. ( $\varepsilon \kappa \kappa о \mu \zeta \zeta \omega)$. Rock tombs outside of the village exist there today.

One that was dead ( $\tau \varepsilon \theta \nu \eta \kappa \omega \varsigma)$. Perfect active participle of $\theta \nu \eta \sigma \kappa \omega$, to die.
The only son of his mother ( $\mu \circ \nu \circ \gamma \varepsilon \vee \eta \varsigma v i o \varsigma \tau \eta \mu \eta \tau \rho \alpha v \tau o v$ ). Only begotten son to his mother (dative case). The compound adjective $\mu \circ v o \gamma \varepsilon \nu \eta \varsigma$ ( $\mu \circ v o \varsigma$ and $\gamma \varepsilon \nu \circ \varsigma$ ) is common in the old Greek and occurs in the N.T. about Jesus (Joh 3:16,18). The "death of a widow's only son was the greatest misfortune conceivable" (Easton).

And she was a widow ( $\kappa \alpha \alpha v \tau \eta \eta \nu \chi \eta \rho \alpha)$. This word $\chi \eta \rho \alpha$ gives the finishing touch to the pathos of the situation. The word is from $\chi \eta \rho \circ \varsigma$, bereft. The mourning of a widow for an only son is the extremity of grief (Plummer).

Much people (оүлоऽ เкаขоऽ). Considerable crowd as often with this adjective tкаvоৎ. Some were hired mourners, but the size of the crowd showed the real sympathy of the town for her.

Luke 7:13
The Lord saw her ( $\llcorner\omega \nu \alpha v \tau \eta \nu$ о кирıоऽ). The Lord of Life confronts death (Plummer) and Luke may use Kvpıos here purposely.

Had compassion ( $\varepsilon \sigma \pi \lambda \alpha \gamma \chi \theta \eta$ ). First aorist (ingressive) passive indicative of $\sigma \pi \lambda \alpha \gamma \chi v i \zeta o \mu \alpha$. Often love and pity are mentioned as the motives for Christ's miracles (Mt $14: 14 ; 15: 32$, etc.). It is confined to the Synoptics in the N.T. and about Christ save in the parables by Christ.

Weep not ( $\mu \eta \kappa \lambda \alpha \iota \varepsilon$ ). Present imperative in a prohibition. Cease weeping.
Luke 7:14
Touched the bier ( $\eta \psi a \tau o$ tov $\sigma o \rho o v$ ). An urn for the bones or ashes of the dead in Homer, then the coffin (Ge 5:26) , then the funeral couch or bier as here. Only here in the N.T. Jesus touched the bier to make the bearers stop, which they did ( stood still , $\varepsilon \sigma \tau \eta \sigma \alpha v$ ), second aorist active indicative of $ו \sigma \tau \eta \mu$.

Luke 7:15
Sat up ( $\alpha v \varepsilon \kappa \alpha \theta \iota \sigma \varepsilon v$ ). First aorist active indicative. The verb in the N.T. only here and Ac 9:40. Medical writers often used it of the sick sitting up in bed (Hobart, Med. Lang. of St. Luke, p. 11). It is objected that the symmetry of these cases (daughter of Jairus raised from the death-bed, this widow's son raised from the bier, Lazarus raised from the tomb) is suspicious, but no one Gospel gives all three (Plummer).

Gave him to his mother ( $\varepsilon \delta \omega \kappa \varepsilon v$ autov $\tau \eta \mu \eta \tau \rho \alpha v \tau o v)$. Tender way of putting it. "For he had already ceased to belong to his mother" (Bengel). So in Lu 9:42 .

Luke 7:16
Fear seized all ( $\varepsilon \lambda \alpha \beta \varepsilon v \delta \varepsilon \varphi о \beta$ оц $\pi \alpha v \tau \alpha \varsigma)$. Aorist active indicative. At once.
They glorified God ( $\varepsilon \delta \circ \xi \alpha \zeta \circ v$ tov $\theta \varepsilon o v$ ). Imperfect active, inchoative, began and increased.

Luke 7:17
This report (o $\lambda о$ үos ovtoc). That God had raised up a great prophet who had shown his call by raising the dead.

Luke 7:18
And the disciples of John told him ( $\kappa \alpha \alpha \pi \eta \gamma \gamma \varepsilon \iota \lambda \alpha \nu \mathrm{I} \omega \alpha \nu \eta$ о $\mu \alpha \theta \eta \tau \alpha \alpha \cup \tau \circ v$ ). Literally, and his disciples announced to John. Such news (verse 17) was bound to come to the ears of the Baptist languishing in the dungeon of Machaerus ( $\mathrm{Lu} 3: 20$ ). Lu 7:18-35 runs parallel with Mt 11:2-19, a specimen of Q , the non-Marcan portion of Matthew and Luke.

Luke 7:19
Calling unto him ( $\pi \rho \circ \sigma \kappa \alpha \lambda \varepsilon \sigma \alpha \mu \varepsilon v o \varsigma)$. First aorist middle (indirect) participle.
Two ( $\delta v o$ тıvac). Certain two. Not in Mt 11:2.
Saying ( $\lambda \varepsilon \gamma \omega v$ ). John saying by the two messengers. The message is given precisely alike in Mt 11:3, which see. In both we have $\varepsilon \tau \varepsilon \rho o v$ for "another," either a second or a different kind. In verse 20 Westcott and Hort read $\alpha \lambda \lambda o v$ in the text, $\varepsilon \tau \varepsilon \rho \circ v$ in the margin. Пробठокш $\mu \varepsilon v$, may be present indicative or present subjunctive (deliberative), the same contract form ( $\alpha 0=\omega, \alpha \omega \omega$ ).

Luke 7:21
In that hour he cured ( $\varepsilon v \varepsilon \kappa \varepsilon ı v \eta \tau \eta$ opa $\varepsilon \theta \varepsilon \rho \alpha \pi \varepsilon v \sigma \varepsilon v$ ). This item is not in Matthew. Jesus gave the two disciples of John an example of the direct method. They had heard. Then they saw for themselves.

Diseases (vo $\sigma \omega v$ ),
plagues ( $\mu \alpha \sigma \tau \imath \gamma \omega v$ ),
evil spirits ( $\pi v \varepsilon \nu \mu \alpha \tau \omega v \pi о \nu \eta \rho \omega v$ ), all kinds of bodily ills, and he singles out the
blind ( $\tau \cup \varphi \lambda$ оıऽ) to whom in particular he bestowed sight ( $\varepsilon \chi \alpha \rho \iota \zeta \alpha \tau 0 \beta \lambda \varepsilon \pi \varepsilon \imath v$ ), gave as a free gift (from $\chi \alpha \rho \iota \varsigma$, grace) seeing ( $\beta \lambda \varepsilon \pi \varepsilon เ v$ ).

Luke 7:22
What things ye have seen and heard ( $\alpha \varepsilon \delta \varepsilon \tau \varepsilon \kappa \alpha \not \eta \kappa о v \sigma \alpha \tau \varepsilon$ ). In Mt 11:4, present tense "which ye do hear and see." Rest of verse 22,23 as in Mt 11:4-6, which see for details. Luke mentions no raisings from the dead in verse 21 , but the language is mainly general, while here it is specific. $\Sigma \kappa \alpha v \delta \alpha \lambda ı \zeta o \mu \alpha$ used here has the double notion of to trip up and to entrap and in the N.T. always means causing to sin.

Luke 7:24

When the messengers of John were departed ( $\alpha \pi \varepsilon \lambda \theta o v \tau \omega \nu \tau \omega \nu \alpha \gamma \gamma \varepsilon \lambda \omega \nu \mathrm{I} \omega \alpha \nu o v$ ). Genitive absolute of aorist active participle. Mt 11:7 has the present middle participle $\pi о \rho \varepsilon v o \mu \varepsilon \nu \omega v$, suggesting that Jesus began his eulogy of John as soon as the messengers (angels, Luke calls them) were on their way. The vivid questions about the people's interest in John are precisely alike in both Matthew and Luke.

Luke 7:25
Gorgeously apparelled ( $\varepsilon \nu \iota \mu \tau \iota \sigma \mu \omega \varepsilon \nu \delta o \xi \omega$ ). In splendid clothing. Here alone in this sense in the N.T.

And live delicately $(\tau \rho \cup \varphi \eta)$. From $\theta \rho v \pi \tau \omega$ to break down, to enervate, an old word for luxurious living. See the verb $\tau \rho \cup \varphi a \omega$ in Jas 5:5 .

In kings' courts ( $\varepsilon \nu$ тоıৎ $\beta$ абл $\lambda \varepsilon \iota \circ \varsigma)$. Only here in the N.T. Mt 11:8 has it "in kings' houses." Verses 26,27 are precisely alike in Mt 11:9,10, which see for discussion.

Luke 7:26
A prophet? $(\pi \rho o \varphi \eta \tau \eta v ;)$. A real prophet will always get a hearing if he has a message from God. He is a for-speaker, forth-teller ( $\pi \rho o-\varphi \eta \tau \eta \varsigma)$. He may or may not be a fore-teller. The main thing is for the prophet to have a message from God which he is willing to tell at whatever cost to himself. The word of God came to John in the wilderness of Judea (Lu 3:2 ). That made him a prophet. There is a prophetic element in every real preacher of the Gospel. Real prophets become leaders and moulders of men.

Luke 7:28
There is none (ov $\delta \varepsilon \iota \varsigma ~ \varepsilon \sigma \tau \iota v)$. No one exists, this means. Mt 11:11 has ovк $\varepsilon \gamma \eta \gamma \varepsilon \rho \tau \alpha$ (hath not arisen). See Matthew for discussion of "but little" and "greater."

Luke 7:29
Justified God ( $\varepsilon \delta \iota \kappa \alpha \iota \omega \sigma \alpha v \tau \operatorname{\tau ov} \theta \varepsilon o v)$. They considered God just or righteous in making these demands of them. Even the publicans did. They submitted to the baptism of John ( $\beta a \pi \tau \iota \sigma \theta \varepsilon v \tau \varepsilon \varsigma \tau$ то $\beta \alpha \pi \tau \iota \sigma \mu \alpha$ 兀ov I $\omega \alpha v o v$. First aorist passive participle with the cognate accusative retained in the passive. Some writers consider verses 29,30 a comment of Luke in the midst of the eulogy of John by Jesus. This would be a remarkable thing for so long a comment to be interjected. It is perfectly proper as the saying of Jesus.

Luke 7:30
Rejected for themselves ( $\eta \theta \varepsilon \tau \eta \sigma \alpha \nu \varepsilon ı \varsigma \varepsilon \alpha v \tau o v \varsigma)$. The first aorist active of $\alpha \theta \varepsilon \tau \varepsilon \omega$ first seen in LXX and Polybius. Occurs in the papyri. These legalistic interpreters of the law refused to admit the need of confession of sin on their part and so set aside the baptism of John. They annulled God's purposes of grace so far as they applied to them.

Being not baptized by him ( $\mu \eta \beta \alpha \pi \tau \iota \sigma \theta \varepsilon v \tau \varepsilon \varsigma v \pi^{\prime} \alpha v \tau o v$ ). First aorist passive participle. $\mathrm{M} \eta$ is the usual negative of the participle in the Koine.

Luke 7:31

And to what are they like? ( $\kappa \alpha$ тıv عוซเv ouoto;). This second question is not in Mt 11:16. It sharpens the point. The case of tiv is associative instrumental after opoor. See discussion of details in Matthew.

Luke 7:32
And ye did not weep ( $\kappa \alpha$ оик $\varepsilon \kappa \lambda \alpha v \sigma \alpha \tau \varepsilon$ ). Here Mt 1:17 has "and ye did not mourn (or beat your breast, ovк $\varepsilon \kappa о \psi \alpha \sigma \theta \varepsilon$ ). They all did it at funerals. These children would not play wedding or funeral.

Luke 7:33
John the Baptist is come ( $\varepsilon \lambda \eta \lambda u \theta \varepsilon v$ ). Second perfect active indicative where Mt 11:18 has $\eta \lambda \theta \varepsilon v$ second aorist active indicative. So as to verse 34 . Luke alone has "bread" and "wine." Otherwise these verses like Mt 11:18,19, which see for discussion of details. There are actually critics today who say that Jesus was called the friend of sinners and even of harlots because he loved them and their ways and so deserved the slur cast upon him by his enemies. If men can say that today we need not wonder that the Pharisees and lawyers said it then to justify their own rejection of Jesus.

## Luke 7:35

Of all her children ( $\alpha \pi 0 \pi \alpha \nu \tau \omega \nu \tau \omega \nu \tau \varepsilon \kappa v \omega \nu \alpha \nu \tau \eta \varsigma)$. Here Mt 11:19 has "by her works" ( $\alpha \pi 0 \tau \omega \nu \varepsilon \rho \gamma \omega \nu \alpha v \tau \eta \varsigma)$. Aleph has $\varepsilon \rho \gamma \omega \nu$ here. The use of "children" personifies wisdom as in $\operatorname{Pr} 8 ; 9$.

Luke 7:36
That he would eat with him (iva $\varphi \alpha \gamma \eta \mu \varepsilon \tau^{\prime} \alpha v \tau o v$ ). Second aorist active subjunctive. The use of tva after $\varepsilon \rho \omega \tau \alpha \omega$ (see also Lu 16:27) is on the border between the pure object clause and the indirect question (Robertson, Grammar, p. 1046) and the pure final clause. Luke has two other instances of Pharisees who invited Jesus to meals (11:37; 14:1) and he alone gives them. This is the Gospel of Hospitality (Ragg). Jesus would dine with a Pharisee or with a publican ( $\mathrm{Lu} 5: 29$; $\mathrm{Mr} 2: 15 ; \mathrm{Mt} \mathrm{9:10)} \mathrm{and} \mathrm{even} \mathrm{invited} \mathrm{himself} \mathrm{to} \mathrm{be} \mathrm{the} \mathrm{guest} \mathrm{of}$ Zaccheus (Lu 9:5). This Pharisee was not as hostile as the leaders in Jerusalem. It is not necessary to think this Pharisee had any sinister motive in his invitation though he was not overly friendly (Plummer).

Luke 7:37
A woman which was in the city, a sinner ( $\gamma \cup v \eta \eta \tau \tau \varsigma \varepsilon \nu \tau \eta \pi 0 \lambda \varepsilon \alpha \mu \alpha \rho \tau \omega \lambda o \varsigma)$. Probably in Capernaum. The use of $\eta \tau \iota \varsigma$ means "Who was of such a character as to be" (cf. 8:3) and so more than merely the relative $\eta$, who, that is, "who was a sinner in the city," a woman of the town, in other words, and known to be such. Ha $\alpha \rho \tau \omega \lambda$ oc, from $\alpha \mu \alpha \rho \tau \alpha v \omega$, to sin, means devoted to sin and uses the same form for feminine and masculine. It is false and unjust to Mary Magdalene, introduced as a new character in Lu 8:2, to identify this woman with her. Luke would have no motive in concealing her name here and the life of a courtesan would be incompatible with the sevenfold possession of demons. Still worse is it to identify
this courtesan not only with Mary Magdalene, but also with Mary of Bethany simply because it is a Simon who gives there a feast to Jesus when Mary of Bethany does a beautiful deed somewhat like this one here (Mr 14:3-9; Mt 26:6-13; Joh 12:2-8 ). Certainly Luke knew full well the real character of Mary of Bethany ( $10: 38-42$ ) so beautifully pictured by him. But a falsehood, once started, seems to have more lives than the cat's proverbial nine. The very name Magdalene has come to mean a repentant courtesan. But we can at least refuse to countenance such a slander on Mary Magdalene and on Mary of Bethany. This sinful woman had undoubtedly repented and changed her life and wished to show her gratitude to Jesus who had rescued her. Her bad reputation as a harlot clung to her and made her an unwelcome visitor in the Pharisee's house.

When she knew ( $\varepsilon \pi \iota \gamma v o v \sigma \alpha)$. Second aorist active participle from $\varepsilon \pi \iota \gamma \iota v \omega \sigma \kappa \omega$, to know fully, to recognize. She came in by a curious custom of the time that allowed strangers to enter a house uninvited at a feast, especially beggars seeking a gift. This woman was an intruder whereas Mary of Bethany was an invited guest. "Many came in and took their places on the side seats, uninvited and yet unchallenged. They spoke to those at table on business or the news of the day, and our host spoke freely to them" (Trench in his Parables, describing a dinner at a Consul's house at Damietta).

He was sitting at meat (катак\&เта). Literally, he is reclining (present tense retained in indirect discourse in Greek).

An alabaster cruse of ointment ( $\alpha \lambda \alpha \beta \alpha \sigma \tau \rho o v \mu \nu \rho o v$ ). See on Mt 26:7 for discussion of $\alpha \lambda \alpha \beta \alpha \sigma \tau \rho o v$ and $\mu \nu \rho o v$.

Luke 7:38
Standing behind at his feet ( $\sigma \tau \alpha \sigma \alpha$ опı $\sigma \omega \pi \alpha \rho \alpha$ тоиц $\pi о \delta \alpha \varsigma \alpha \cup \tau 0 v$ ). Second aorist active participle from $\mid \sigma \tau \eta \mu$ and intransitive, first aorist $\varepsilon \sigma \tau \eta \sigma \alpha$ being transitive. The guest removed his sandals before the meal and he reclined on the left side with the feet outward. She was standing beside ( $\pi \alpha \rho \alpha$ ) his feet
weeping ( $\kappa \lambda \alpha \circ \circ \sigma \alpha$ ). She was drawn irresistibly by gratitude to Jesus and is overcome with emotion before she can use the ointment; her tears (тоья $\delta \alpha \kappa \rho \cup \sigma \iota \nu$, instrumental case of $\delta \alpha \kappa \rho v)$ take the place of the ointment.

Wiped them with the hair of her head ( $\tau \alpha ı \varsigma ~ \theta \rho ı \xi ı v \tau \eta \varsigma \kappa \varepsilon \varphi \alpha \lambda \eta \varsigma \alpha v \tau \eta \varsigma \varepsilon \xi \varepsilon \mu \alpha \sigma \sigma \varepsilon v)$. Inchoative imperfect of an old verb $\varepsilon \kappa \mu \alpha \sigma \sigma \omega$, to rub out or off, began to wipe off, an act of impulse evidently and of embarrassment. "Among the Jews it was a shameful thing for a woman to let down her hair in public; but she makes this sacrifice" (Plummer). So Mary of Bethany wiped the feet of Jesus with her hair (Joh 12:3) with a similar sacrifice out of her great love for Jesus. This fact is relied on by some to prove that Mary of Bethany had been a woman of bad character, surely an utter failure to recognize Mary's motive and act.

Kissed ( $\kappa \alpha \tau \varepsilon \varphi \downarrow \lambda \varepsilon$ ). Imperfect active of $\kappa \alpha \tau \alpha \varphi \mid \lambda \varepsilon \omega$, to kiss repeatedly (force of $\kappa \alpha \tau \alpha$ ), and accented by the tense of continued action here. The word in the N.T. occurs here, of
the prodigal's father ( $15: 20$ ), of the kiss of Judas (Mr 14:45; Mt 26:49 ), of the Ephesian elders (Ac 20:37). " Kissing the feet was a common mark of deep reverence, especially to leading rabbis" (Plummer).

Anointed them with the ointment ( $\eta \lambda \varepsilon \iota \varphi \varepsilon \nu \tau \omega \mu \nu \rho \omega$ ). Imperfect active again of $\alpha \lambda \varepsilon \iota \varphi \omega$, a very common verb. X $\rho \iota \omega$ has a more religious sense. The anointing came after the burst of emotional excitement.

Luke 7:39
This man (ovtoc). Contemptuous, this fellow.
If he were a (the) prophet ( $\varepsilon \eta v[0] \pi \rho \circ \varphi \eta \tau \eta \varsigma)$. Condition of the second class, determined as unfulfilled. The Pharisee assumes that Jesus is not a prophet (or the prophet, reading of $B$, that he claims to be). A Greek condition puts the thing from the standpoint of the speaker or writer. It does not deal with the actual facts, but only with the statement about the facts.

Would have perceived ( $\varepsilon \not \tau \nu \omega \sigma \kappa \varepsilon v \alpha v$ ). Wrong translation, would now perceive or know (which he assumes that Jesus does not do). The protasis is false and the conclusion also. He is wrong in both. The conclusion (apodosis), like the condition, deals here with the present situation and so both use the imperfect indicative ( $\alpha v$ in the conclusion, a mere device for making it plain that it is not a condition of the first class).

Who and what manner of woman ( $\tau \iota \varsigma \kappa \alpha \pi о \tau \alpha \pi \eta \eta \gamma \cup \nu \eta$ ). She was notorious in person and character.

Luke 7:40
Answering ( $\alpha \pi \sigma \kappa \rho \theta \varepsilon ı \varsigma)$. First aorist passive participle, redundant use with $\varepsilon \iota \pi \varepsilon v$. Jesus answers the thoughts and doubts of Simon and so shows that he knows all about the woman also. Godet notes a tone of Socratic irony here.

Luke 7:41
A certain lender ( $\delta a v \iota \sigma \tau \eta \tau \iota v$ ). A lender of money with interest. Here alone in the N.T. though a common word.

Debtors ( $\chi \rho \varepsilon о \varphi \backslash \lambda \varepsilon \tau \alpha$ ). From $\chi \rho \varepsilon \omega$ (debt, obligation) and $о \varphi \varepsilon \iota \lambda \omega$, to owe. Only here and 16:5 in the N.T., though common in late Greek writers.

Owed $(\omega \varphi \varepsilon \iota \lambda \varepsilon v)$. Imperfect active and so unpaid. Five hundred $\delta \eta v \alpha \rho ı \alpha$ and fifty like two hundred and fifty dollars and twenty-five dollars.

Luke 7:42
Will love him most ( $\pi \lambda \varepsilon \iota o v a \gamma \alpha \pi \eta \sigma \varepsilon \alpha v \tau o v)$. Strictly, comparative
more , $\pi \lambda \varepsilon \iota \circ v$, not superlative $\pi \lambda \varepsilon \iota \sigma \tau \alpha$, but most suits the English idiom best, even between two. Superlative forms are vanishing before the comparative in the Koine. This is the point of the parable, the attitude of the two debtors toward the lender who forgave both of them (Plummer).

Luke 7:43

I suppose $(v \pi о \lambda \alpha \mu \beta \alpha v \omega)$. Old verb, originally to take up from under, to bear away as on high, to take up in speech ( Lu 10:30) , to take up in mind or to assume as here and Ac 2:15. Here with an air of supercilious indifference (Plummer).

The most ( $\tau 0 \pi \lambda \varepsilon \iota \sigma v$ ). The more.
Rightly ( $o \rho \theta \omega \varsigma$ ). Correctly. Socrates was fond of $\pi \alpha v v$ o $\rho \theta \omega \varsigma$. The end of the argument.

## Luke 7:44

Turning ( $\sigma \tau \rho \alpha \varphi \varepsilon \iota \varsigma)$. Second aorist passive participle.
Seest thou ( $\beta \lambda \varepsilon \pi \varepsilon \iota \varsigma)$. For the first time Jesus looks at the woman and he asks the Pharisee to look at her. She was behind Jesus. Jesus was an invited guest. The Pharisee had neglected some points of customary hospitality. The contrasts here made have the rhythm of Hebrew poetry. In each contrast the first word is the point of defect in Simon:
water (44),
kiss (45),
oil (46).
Luke 7:45
Hath not ceased to kiss (ov $\delta \iota \varepsilon \lambda \iota \pi \varepsilon v \kappa \alpha \tau \alpha \varphi ı \lambda o v \sigma \alpha$ ). Supplementary participle.
Luke 7:46
With ointment $(\mu v \rho \omega)$. Instrumental case. She used the costly ointment even for the feet of Jesus.

Luke 7:47
Are forgiven ( $\alpha \varphi \varepsilon \omega v \tau \alpha$ ). Doric perfect passive form. See Lu 5:21,23.
For she loved much (o $\eta \gamma \alpha \pi \eta \sigma \varepsilon v \pi o \lambda v$ ). Illustration or proof, not reason for the forgiveness. Her sins had been already forgiven and remained forgiven.

But to whom little is forgiven, the same loveth little ( $\mathrm{H} \omega \delta \varepsilon$ o $\lambda \iota \gamma o v \alpha \varphi \iota \tau \tau \alpha$ o $\lambda_{\imath} \gamma \circ v$ $\alpha \gamma a \pi \alpha)$. This explanation proves that the meaning of o $\tau$ preceding is proof, not cause.

Luke 7:48
Are forgiven $(\alpha \varphi \varepsilon \omega v \tau \alpha)$. As in verse 47. Remain forgiven, Jesus means, in spite of the slur of the Pharisee.

Luke 7:49
Who even forgiveth sins (oৎ ка $\alpha \mu \alpha \rho \tau \iota \alpha \varsigma \alpha \varphi ı \eta \sigma \iota \nu$ ). Present indicative active of same verb, $\alpha \varphi ı \eta \mu$. Once before the Pharisees considered Jesus guilty of blasphemy in claiming the power to forgive sins ( $\mathrm{Lu} 5: 21$ ). Jesus read their inmost thoughts as he always does.

## Luke 8

Luke 8:1
Soon afterwards ( $\varepsilon v \tau \omega \kappa \alpha \theta \varepsilon \xi \eta \varsigma)$. In 7:11 we have $\varepsilon v \tau \omega \varepsilon \xi \eta \varsigma$. This word means one after the other, successively, but that gives no definite data as to the time, only that this incident in 8:1-3 follows that in 7:36-50. Both in Luke alone.

That ( $\kappa \alpha$ ). One of Luke's idioms with $\kappa \alpha$ e $\gamma \varepsilon v \varepsilon \tau \frac{1}{2}$ like Hebrew wav. Went about ( $\delta \omega \omega \delta \varepsilon v \varepsilon v$ ). Imperfect active of $\delta \iota o \delta \varepsilon v \omega$, to make one's way through ( $\delta \iota \alpha$, o $\delta$ oc), common in late Greek writers. In the N.T. here only and Ac 17:1 .

Through cities and villages ( $\kappa \alpha \tau \alpha \pi о \lambda ı v ~ \kappa \alpha ~ \kappa \omega \mu \eta v$ ). Distributive use of ката (up and down). The clause is amphibolous and goes equally well with $\delta \omega \omega \delta \varepsilon v \varepsilon v$ or with $\kappa \eta \rho v \sigma \sigma \omega \nu$
 this time the Twelve with him.

Luke 8:2
Which had been healed ( $\alpha \eta \sigma \alpha \nu \tau \varepsilon \theta \varepsilon \rho \alpha \pi \varepsilon \nu \mu \varepsilon v \alpha$ ). Periphrastic past perfect passive, suggesting that the healing had taken place some time before this tour. These women all had personal grounds of gratitude to Jesus.

From whom seven devils (demons) had gone out ( $\alpha \varphi^{\prime} \eta \varsigma \delta \alpha \mu \rho \nu i \alpha \varepsilon \pi \tau \alpha \varepsilon \xi \varepsilon \lambda \eta \lambda \nu \theta \varepsilon$ ). Past perfect active third singular for the $\delta a \mu \boldsymbol{\mu} \boldsymbol{v i \alpha}$ are neuter plural. This first mention of Mary Magdalene describes her special cause of gratitude. This fact is stated also in Mr 16:9 in the disputed close of the Gospel. The presence of seven demons in one person indicates special malignity ( Mr 5:9). See Mt 17:45 for the parable of the demon who came back with seven other demons worse than the first. It is not known where Magdala was, whence Mary came.

Luke 8:3
Joanna ( $\mathrm{I} \omega \alpha \vee \alpha$ ). Her husband $\mathrm{X} \zeta \zeta \alpha$, steward ( $\varepsilon \pi \iota \tau \rho \circ \pi \circ v$ ) of Herod, is held by some to be the nobleman ( $\beta$ aбıлıкос) of Joh 4:46-53 who believed and all his house. At any rate Christ had a follower from the household of Herod Antipas who had such curiosity to see and hear him. One may recall also Manaen (Ac 13:1), Herod's foster brother. Joanna is mentioned again with Mary Magdalene in Lu 24:10 .

Who ministered unto them (aıtıveऽ $\delta ı \eta \kappa o v o u v ~ a u \tau o \iota \varsigma) . ~ I m p e r f e c t ~ a c t i v e ~ o f ~ \delta ı \alpha к о v \varepsilon \omega, ~$ common verb, but note augment as if from $\delta \iota \alpha$ and $\alpha \kappa о \varepsilon \varepsilon \omega$, but from $\delta \iota \alpha \kappa о$ ос, and that from $\delta \iota \alpha$ and кovic (dust). The very fact that Jesus now had twelve men going with him called for help from others and the women of means responded to the demand.

Of their substance ( $\varepsilon \kappa \tau \omega v \nu \pi \alpha \rho \chi \circ v \tau \omega v \alpha v \tau \alpha \iota \varsigma)$. From the things belonging to them. This is the first woman's missionary society for the support of missionaries of the Gospel. They had difficulties in their way, but they overcame these, so great was their gratitude and zeal.

Luke 8:4
By a parable ( $\delta ı \alpha \pi \alpha \rho \alpha \beta \circ \lambda \eta \varsigma)$. Mr 4:2 says "in parables" as does Mt 13:3. This is the beginning of the first great group of parables as given in $\operatorname{Mr} 4: 1-34$ and Mt 13:1-53. There are ten of these parables in Mark and Matthew and only two in Lu 8:4-18 (The Sower and the Lamp, 8:16) though Luke also has the expression "in parables" ( 8:10). See Mt 13 and Mr 4 for discussion of the word parable and the details of the Parable of the Sower. Luke does not locate the place, but he mentions the great crowds on hand, while both Mark and Matthew name the seaside as the place where Jesus was at the start of the series of parables.

Luke 8:5
His seed ( $\tau 0 v \sigma \pi \sigma \rho o v a v \tau o v)$. Peculiar to Luke.
Was trodden under foot ( $\kappa \alpha \tau \varepsilon \pi \alpha \tau \eta \theta \eta$ ). First aorist passive indicative of $\kappa \alpha \tau \alpha \pi \alpha \tau \varepsilon \omega$. Peculiar to Luke here.

Of the heavens ( $\tau 0 v$ oupavov). Added in Luke.
Luke 8:6
Upon the rock ( $\varepsilon \pi \tau \eta \nu \pi \varepsilon \tau \rho a \nu$ ). Mr 4:5 "the rocky ground" ( $\varepsilon \pi \tau$ тo $\pi \varepsilon \tau \rho \omega \delta \varepsilon \varsigma)$, Mt 13:5 "the rocky places.

As soon as it grew ( $\varphi \cup \varepsilon \nu$ ). Second aorist passive participle of $\varphi v \omega$, an old verb to spring up like a sprout.

Withered away $(\varepsilon \xi \eta \rho \alpha v \theta \eta)$. First aorist passive indicative of $\zeta \eta \rho a \iota v \omega$, old verb, to dry up.

Moisture (ıк $\mu \alpha \alpha$ ). Here only in the N.T., though common word.
Luke 8:7
Amidst the thorns ( $\varepsilon \nu \mu \varepsilon \sigma \omega \tau \omega \nu \alpha \kappa \alpha \nu \theta \omega \nu$ ). Mr 4:7 has $\varepsilon \iota \varsigma$ (among) and Mt 13:7 has $\varepsilon \pi$ "upon."

Grew with it ( $\sigma \cup v \varphi \cup \varepsilon \iota \sigma \alpha$ ). Same participle as $\varphi \cup \varepsilon v$ above with $\sigma \cup v$ - (together).
Choked ( $\alpha \pi \varepsilon \pi \nu \imath \xi \nu$ ). From $\alpha \pi o \pi \nu \iota \gamma \omega$, to choke off as in Mt 13:7. In Mr 4:7 the verb is $\sigma u v \varepsilon \pi v i \xi a v$ (choked together).

Luke 8:8
A hundredfold ( $\varepsilon \kappa \alpha \tau о v \pi \lambda \alpha \sigma \iota \circ v a)$. Luke omits the thirty and sixty of Mr 4:8; Mt 13:8

He cried $(\varepsilon \varphi \omega v \varepsilon)$. Imperfect active, and in a loud voice, the verb means. The warning about hearing with the ears occurs also in $\mathrm{Mr} 4: 9$; Mt 13:9.

Luke 8:9
Asked ( $\varepsilon \pi \eta \rho \omega \tau \omega v$ ). Imperfect of $\varepsilon \pi \varepsilon \rho \omega \tau \alpha \omega$ ( $\varepsilon \pi$ and $\varepsilon \rho \omega \tau \alpha \omega$ ) where Mr 4:10 has $\eta \rho \omega \tau \omega \nu$ (uncompounded imperfect), both the tense and the use of $\varepsilon \pi$ indicate eager and repeated questions on the part of the disciples, perhaps dimly perceiving a possible reflection on their own growth.

What this parable might be ( $\tau\llcorner\varsigma \alpha v \tau \eta \varepsilon ı \eta \eta \pi \alpha \rho \alpha \beta o \lambda \eta$ ). A mistranslation, What this parable was (or meant). The optative $\varepsilon$ I $\eta$ is merely due to indirect discourse, changing the indicative $\varepsilon \sigma \tau \iota v$ (is) of the direct question to the optative $\varepsilon ı \eta$ of the indirect, a change entirely with the writer or speaker and without any change of meaning (Robertson, Grammar, pp. 1043f.).

Luke 8:10
The mysteries ( $\tau \alpha \mu v \sigma \tau \eta \rho ı \alpha$ ). See for this word on Mt 13:11; Mr 4:11. Part of the mystery here explained is how so many people who have the opportunity to enter the kingdom fail to do so because of manifest unfitness.

That (ıva). Here Mr 4:11 also has ıva while Mt 13:13 has ot (because). On the so-called causal use of tva as here equal to ot see discussion on $\mathrm{Mt} 13: 13$; $\mathrm{Mr} 4: 11$. Plummer sensibly argues that there is truth both in the causal ot of Matthew and the final $v \boldsymbol{v}$ of Mark and Matthew. "But the principle that he who hath shall receive more, while he who hath not shall be deprived of what he seemeth to have, explains both the $t v \alpha$ and the $o \tau$. Jesus speaks in parables because the multitudes see without seeing and hear without hearing. But He also speaks in parable
in order that they may see without seeing and hear without hearing." Only for "hearing" Luke has "understand" $\sigma \nu v \iota \omega \sigma \iota v$, present subjunctive from a late omega form $\sigma \nu \nu \iota \omega$ instead of the $-\mu$ verb $\sigma v \nu ı \eta \mu$.

Luke 8:11
Is this $(\varepsilon \sigma \tau \iota v \delta \varepsilon \alpha v \tau \eta)$. Means this. Jesus now proceeds to interpret his own parable.
 subject and predicate as here means that they are interchangeable and can be turned round: The word of God is the seed. The phrase "the word of God" does not appear in Matthew and only once in Mark (Mr 7:13 ) and John (Joh 10:35 ), but four times in Luke (5:1; 8:11,21; 11:28) and twelve times in Acts. In Mr 4:14 we have only "the word." In Mr 3:31 we have "the will of God," and in Mt 12:46 "the will of my Father" where Lu 8:21 has "the word of God." This seems to show that Luke has the subjective genitive here and means the word that comes from God.

Luke 8:12
Those by the wayside (o $\pi \alpha \rho \alpha \tau \eta \nu$ oסov). As in $\operatorname{Mr} 4: 15$; Mt 13:19 so here the people who hear the word $=$ the seed are discussed by metonymy.

The devil (o $\delta ı \beta$ o $10 \varsigma$ ). The slanderer. Here $\mathrm{Mr} 4: 15$ has Satan.
From their heart ( $\alpha \pi \sigma \tau \eta \varsigma \kappa \alpha \rho \delta \iota \alpha \varsigma ~ \alpha v \tau \omega v$ ). Here Mark has "in them." It is the devil's business to snatch up the seed from the heart before it sprouts and takes root. Every preacher knows how successful the devil is with his auditors. Mt 13:19 has it "sown in the heart."

That they may not believe and be saved ( $\iota \alpha \alpha \mu \eta \pi \iota \sigma \tau \varepsilon v \sigma \alpha v \tau \varepsilon \varsigma \sigma \omega \theta \omega \sigma \iota v$ ). Peculiar to Luke. Negative purpose with aorist active participle and first aorist (ingressive) passive subjunctive. Many reasons are offered today for the failure of preachers to win souls. Here is the main one, the activity of the devil during and after the preaching of the sermon. No wonder then that the sower must have good seed and sow wisely, for even then he can only win partial success.

Luke 8:13
Which for a while believe ( $о \pi \rho \circ \varsigma$ кaı $\rho \sigma \nu \pi \sigma \tau \varepsilon v o v \sigma \iota \nu$ ). Ostensibly they are sincere and have made a real start in the life of faith.
 stop coming to church, drop out of sight. It is positively amazing the number of new church members who "stumble" as Mr 4:17 has it ( $\sigma \kappa \alpha v \delta \alpha \lambda_{ı} \zeta о v \tau \alpha$ ), do not like the pastor, take offence at something said or done by somebody, object to the appeals for money, feel slighted. The "season of trial" becomes a "season of temptation" ( $\varepsilon \nu \kappa \alpha \iota \rho \omega \pi \varepsilon \iota \rho \alpha \sigma \mu \circ v)$ for these superficial, emotional people who have to be periodically rounded up if kept within the fold.

Luke 8:14
They are choked ( $\sigma v v \pi \nu \tau \gamma 0 v \tau \alpha$ ). Present passive indicative of this powerfully vivid compound verb $\sigma v v \pi v \iota \gamma \omega$ used in $\mathrm{Mr} 4: 19$; Mt 13:22, only there these worldly weeds choke the word while here the victims themselves are choked. Both are true. Diphtheria will choke and strangle the victim. Who has not seen the promise of fair flower and fruit choked into yellow withered stalk without fruit "as they go on their way" ( $\pi \mathbf{\sigma} \rho \varepsilon v o \mu \varepsilon v o$ ).

Bring no fruit to perfection (ov $\tau \varepsilon \lambda \varepsilon \sigma \varphi \circ \rho o v \sigma \iota v)$. Compound verb common in the late writers ( $\tau \varepsilon \lambda o \sigma, \varphi \circ \rho \varepsilon \omega)$. To bring to completion. Used of fruits, animals, pregnant women. Only here in the N.T.

Luke 8:15
In an honest and good heart ( $\varepsilon v \kappa \alpha \rho \delta ı \alpha \kappa \alpha \lambda \eta \kappa \alpha \alpha \gamma \alpha \theta \eta$ ). Peculiar to Luke. In verse 8 the land $(\gamma \eta \nu)$ is called $\alpha \gamma \alpha \theta \eta \nu$ (really good, generous) and in verse 15 we have $\varepsilon \nu \tau \eta \kappa \alpha \lambda \eta$ $\gamma \eta$ ( in the beautiful or noble land ). So Luke uses both adjectives of the heart. The Greeks used ка入ос к' $\alpha \gamma \alpha \theta$ os of the high-minded gentleman. It is probable that Luke knew this idiom. It occurs here alone in the N.T. It is not easy to translate. We have such phrases as "good and true," "sound and good," "right and good," no one of which quite suits the Greek. Certainly Luke adds new moral qualities not in the Hellenic phrase. The English word "honest" here is like the Latin honestus (fair, noble). The words are to be connected with "hold fast" (кatєұоvoıv), "hold it down" so that the devil does not snatch it away, having depth of soil so that it does not shrivel up under the sun, and is not choked by weeds and thorns. It bears fruit ( $\kappa \alpha \rho \pi о ч о \rho о \nu \sigma \iota v$, an old expressive verb, ка $л о \varsigma$ and $\varphi о \rho \varepsilon \omega$ ). That is the proof of spiritual life.

In patience ( $\varepsilon v$ vпоноvŋ). There is no other way for real fruit to come. Mushrooms spring up overnight, but they are usually poisonous. The best fruits require time, cultivation, patience.

Luke 8:16
When he hath lighted a lamp ( $\lambda \nu \chi v o v a \psi \alpha \varsigma)$. It is a portable lamp ( $\lambda \nu \chi v o v$ ) that one lights ( $\alpha \psi \alpha \varsigma$ aorist active participle of $\alpha \pi \tau \omega$, to kindle, fasten to, light).

With a vessel ( $\sigma \kappa \varepsilon v \varepsilon$, instrumental case of $\sigma \kappa \varepsilon \cup \circ \varsigma)$. Here Mr 4:21 has the more definite figure "under the bushel" as has Mt 5:15 .

Under the bed (vтокат $\omega \kappa \lambda \iota \nu \eta \varsigma)$. Here Mr 4:21 has the regular v $\pi о \tau \eta \nu \kappa \lambda \iota \nu \eta v$ instead of the late compound vпокат $\omega$. Ragg notes that Matthew distributes the sayings of Jesus given here by Lu 8:16-18; Mr 4:21-25 concerning the parable of the lamp and gives them in three separate places (Mt 5:15; 10:26; 13:12). That is true, but it does not follow that Mark and Luke have bunched together separate sayings or that Matthew has scattered sayings delivered only on one occasion. One of the slowest lessons for some critics to learn is that Jesus repeated favourite sayings on different occasions and in different groupings just as every popular preacher and teacher does today. See on Mr 4:21 for further discussion of the lamp and stand.

May see the light (B $\lambda \varepsilon \pi \omega \sigma \iota v$ to $\varphi \omega \varsigma)$. In Mt 5:16 Jesus has it "may see your good works." The purpose of light is to let one see something else, not the light. Note present subjunctive ( $\beta \lambda \varepsilon \pi \omega \sigma \tau v$ ), linear action "Jesus had kindled a light within them. They must not hide it, but must see that it spreads to others" (Plummer). The parable of the lamp throws light on the parable of the sower.

Luke 8:17
That shall not be known ( $o$ ov $\mu \eta \gamma \nu \omega \sigma \theta \eta$ ). Peculiar to Luke. First aorist passive subjunctive of $\gamma \iota v \omega \sigma \kappa \omega$ with the strong double negative ov $\mu \eta$. See on Mr 4:22 for discussion of криттоv and алокричоv.

Luke 8:18
How ye hear ( $\pi \omega \varsigma$ akovete). The manner of hearing. Mr 4:24 has "what ye hear" ( $\tau$ aкоиعтє), the matter that is heard. Both are supremely important. Some things should not be heard at all. Some that are heard should be forgotten. Others should be treasured and practised.

For whosoever hath (Hoc $\alpha v \gamma \alpha \rho \varepsilon \chi \eta$ ). Present active subjunctive of the common verb $\varepsilon \chi \omega$ which may mean "keep on having" or "acquiring." See on Mr 4:25 for discussion.

Thinketh he hath ( $\delta$ окє $\varepsilon \chi \varepsilon เ v$ ), or
seems to acquire or to hold . Losses in business illustrate this saying as when we see their riches take wings and fly away. So it is with hearing and heeding. Self-deception is a common complaint.

Luke 8:19

His mother and brethren ( $\eta \mu \eta \tau \eta \rho$ ка о $\alpha \delta \varepsilon \lambda \varphi о$ av $\tau о v$ ). Mr 3:31-35; Mt 12:46-50 place the visit of the mother and brothers of Jesus before the parable of the sower. Usually Luke follows Mark's order, but he does not do so here. At first the brothers of Jesus (younger sons of Joseph and Mary, I take the words to mean, there being sisters also) were not unfriendly to the work of Jesus as seen in Joh 2:12 when they with the mother of Jesus are with him and the small group (half dozen) disciples in Capernaum after the wedding in Cana. But as Jesus went on with his work and was rejected at Nazareth (Lu 4:16-31), there developed an evident disbelief in his claims on the part of the brothers who ridiculed him six months before the end (Joh 7:5). At this stage they have apparently come with Mary to take Jesus home out of the excitement of the crowds, perhaps thinking that he is beside himself ( $\mathrm{Mr} 3: 21$ ). They hardly believed the charge of the rabbis that Jesus was in league with Beelzebub. Certainly the mother of Jesus could give no credence to that slander. But she herself was deeply concerned and wanted to help him if possible. See discussion of the problem in my little book The Mother of Jesus and also on Mr 3:31 and Mt 12:46.

Come to him ( $\sigma \cup v \tau \cup \chi \varepsilon เ v$ ). Second aorist active infinitive of $\sigma \cup v \tau v \gamma \chi \propto \nu \omega$, an old verb, though here alone in the N.T., meaning to meet with, to fall in with as if accidentally, here with associative instrumental case $\alpha v \tau \omega$.

Luke 8:20
Was told ( $\alpha \pi \eta \gamma \gamma \varepsilon \lambda \eta$ ). Second aorist passive indicative of $\alpha \pi \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$, to bring word or tidings. Common verb. See on Mr 3:32 and Mt 12:47 for details.

Luke 8:21
 пootouvte¢). The absence of the article with "mother" and "brothers" probably means, as Plummer argues, "Mother to me and brothers to me are those who \&c." No one is a child of God because of human parentage (Joh 1:13 ). "Family ties are at best temporal; spiritual ties are eternal" (Plummer). Note the use of "hear and do" together here as in Mt 7:24; Lu 6:47 at the close of the Sermon on the Mount. The parable of the sower is almost like a footnote to that sermon. Later Jesus will make "doing" a test of friendship for him (Joh 15:14 ).

Luke 8:22
And they launched forth ( $\kappa \alpha \alpha v \eta \chi \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\alpha v \alpha \gamma \omega$, an old verb, to lead up, to put out to sea (looked at as going up from the land). This nautical sense of the verb occurs only in Luke in the N.T. and especially in the Acts (Ac 13:13; 16:11; 18:21; 20:3,13; 21:I,2; 27:2,4,12,21; 28:10f. ).

Luke 8:23
He fell asleep ( $\alpha \varphi \cup \pi v \omega \sigma \varepsilon v$ ). First aorist (ingressive) active indicative of $\alpha \varphi \cup \pi v o \omega$, to put to sleep, to fall off to sleep, a late verb for which the older Greek used $\kappa \alpha \theta v \pi v o \omega$. Origin-
ally $\alpha \varphi u \pi v o \omega$ meant to waken from sleep, then to fall off to sleep (possibly a medical use). This is the only passage which speaks of the sleep of Jesus. Here only in the N.T.

Came down ( $\kappa \alpha \tau \varepsilon \beta \eta$ ). Second aorist active indicative of $\kappa \alpha \tau \alpha \beta \alpha\llcorner v \omega$, common verb. It was literally true. These wind storms ( $\lambda \alpha i \lambda \alpha \pi \varsigma$. So also Mr 4:37) rushed from Hermon down through the Jordan gorge upon the Sea of Galilee and shook it like a tempest (Mt 8:24). Mark's (Mr 4:37) vivid use of the dramatic present $\gamma$ ıveta (ariseth) is not so precise as Luke's "came down." See on Mt 8:24. These sudden squalls were dangerous on this small lake.

They were filling ( $\sigma v v \varepsilon \pi \lambda \eta \rho o u v \tau 0$ ). Imperfect passive. It was the boat that was being filled (Mr 4:37) and it is here applied to the navigators as sailors sometimes spoke. An old verb, but in the N.T. used only by Luke (8:23; 9:51; Ac 2:1).

Were in jeopardy ( $\varepsilon \kappa เ v \delta u v \varepsilon v o v)$ ). Imperfect active, vivid description. Old verb, but in the N.T. only here, Ac 19:27; 1Co 15:30 .

Luke 8:24
Master, Master (E $\pi\llcorner\sigma \tau \alpha \tau \alpha, \varepsilon \pi\llcorner\sigma \tau \alpha \tau \alpha)$. See on Lu 5:5 for discussion. Mr 4:38 has
Teacher ( $\Delta \iota \delta \alpha \sigma \kappa \alpha \lambda \varepsilon$ ), Mt 8:25 has
Lord (Kvpı\&). The repetition here shows the uneasiness of the disciples.
We perish ( $\alpha \pi о \lambda \lambda \nu \mu \varepsilon \theta \alpha$ ). So in Mr 4:38; Mt 8:25 . Linear present middle indicative, we are perishing.

The raging of the water ( $\tau \omega \kappa \lambda \nu \delta o v \tau o v v \delta a \tau o \varsigma$ ). $\mathrm{K} \lambda \nu \delta \omega v$, common Greek word, is a boisterous surge, a violent agitation. Here only in the N.T. save Jas 1:6 . Kv $\mu$ ( $\mathrm{Mr} 4: 37$ ) is the regular swell or wave. A
calm ( $\gamma \alpha \lambda \eta \nu \eta$ ). Only in the parallels in the N.T., though common word. Here Mr 4:39; Mt 8:26 add
great ( $\mu \varepsilon \gamma \alpha \lambda \eta$ ).
That (ot). This use of ot as explanatory of the demonstrative pronoun ovtoc occurs in the parallels Mr 4:36; Mt 8:27 and also in Lu 4:36. It is almost result.

He commandeth ( $\varepsilon \pi \iota \tau \alpha \sigma \sigma \varepsilon)$. Peculiar to Luke.
Luke 8:26
They arrived (катє $\pi \lambda \varepsilon v \sigma \alpha v)$. First aorist active indicative of $\kappa \alpha \tau \alpha \pi \lambda \varepsilon \omega$, common verb, but here only in the N.T. Literally,
they sailed down from the sea to the land, the opposite of
launched forth ( $\alpha v \eta \chi \theta \eta \sigma \alpha v$ ) of verse 22. So we today use like nautical terms, to bear up, to bear down.

The Gerasenes ( $\tau 0 v \Gamma \varepsilon \rho \alpha \sigma \eta \nu \omega v$ ). This is the correct text here as in $\mathrm{Mr} 5: 1$ while Gadarenes is correct in Mt 8:28. See there for explanation of this famous discrepancy, now cleared up by Thomson's discovery of Khersa ( $\Gamma \varepsilon \rho \sigma \alpha$ ) on the steep eastern bank and in the vicinity of Gadara.
 form is $\alpha v \tau \iota \pi \varepsilon \rho \alpha v$ (Polybius, etc.). Some MSS. here have $\pi \varepsilon \rho \alpha v$ like Mr 5:1; Mt 8:28 .

Luke 8:27
And for a long time ( $\kappa \alpha \chi \rho \circ v \omega$ เк $\alpha v \omega$ ). The use of the associative instrumental case in expressions of time is a very old Greek idiom that still appears in the papyri (Robertson, Grammar, p. 527).

He had worn no clothes (ouk eve $\delta v \sigma \alpha \tau o ~ \mu \mu \tau \iota o v$ ). First aorist middle indicative, constative aorist, viewing the "long time" as a point. Not pluperfect as English has it and not for the pluperfect, simply "and for a long time he did not put on himself (indirect middle) any clothing." The physician would naturally note this item. Common verb $\varepsilon v \delta \nu \omega$ or $\varepsilon v \delta u v \omega$. This item in Luke alone, though implied by Mr 5:15 "clothed" ( $\mu \alpha \tau \iota \sigma \mu \varepsilon v o v)$.

And abode not in any house ( $\kappa \alpha \varepsilon v$ oוкıa ovк $\varepsilon \mu \varepsilon v \varepsilon v$ ). Imperfect active. Peculiar to Luke, though implied by the mention of tombs in all three (Mr 5:3; Mt 8:28; Lu 8:27).

Luke 8:28
Fell down ( $\pi \rho \circ \sigma \varepsilon \pi \varepsilon \sigma \varepsilon v$ ). Second aorist active of $\pi \rho \circ \sigma \pi \iota \pi \tau \omega$, to fall forward, towards, prostrate before one as here. Common verb. Mr 5:6 has $\pi \rho о \sigma \varepsilon \kappa v \nu \eta \sigma \varepsilon v$ (worshipped).

The Most High God ( $\tau 0 v \theta \varepsilon o v$ tov $v \psi \iota \sigma \tau o v)$. Uncertain whether tov $\theta \varepsilon o v$ genuine or not. But "the Most High" clearly means God as already seen (Lu 1:32,35,36; 6:35). The phrase is common among heathen ( Nu 24:16; Mic 6:6; Isa 14:14). The demoniac may have been a Gentile, but it is the demon here speaking. See on Mr 2:7; Mt 8:29 for the Greek idiom ( $\tau$ $\varepsilon \mu$ ка бо). "What have I to do with thee?" See there also for "Torment me not."

Luke 8:29
For he commanded ( $\pi \alpha \rho \eta \gamma \gamma \varepsilon \lambda \lambda \varepsilon v \gamma \alpha \rho$ ). Imperfect active, correct text, for he was commanding.
 Robertson, Grammar, p. 537, for the plural here).

It had seized ( $\sigma \cup \vee \eta \rho \pi \alpha \kappa \varepsilon)$. Past perfect active of $\sigma \cup v \alpha \rho \pi \alpha \zeta \omega$, to lay hold by force. An old verb, but only in Luke in the N.T. (Lu 8:29; Ac 6:12; 19:29; 27:15 ).

Was kept under guard ( $\varepsilon \delta \varepsilon \sigma \mu \varepsilon \cup \varepsilon \tau 0)$. Imperfect passive of $\delta \varepsilon \sigma \mu \varepsilon v \omega$ to put in chains, from $\delta \varepsilon \sigma \mu \circ \varsigma$, bond, and that from $\delta \varepsilon \omega$ to bind. Old, but rather rare verb. Only here and Ac 22:4 in this sense. In Mt 23:4 it means to bind together. Some MSS. read $\delta \varepsilon \sigma \mu \varepsilon \omega$ in $\operatorname{Lu}$ 8:29

Breaking the bands asunder ( $\delta \iota \alpha \rho \eta \sigma \sigma \omega \nu \tau \alpha \delta \varepsilon \sigma \mu \alpha$ ). Old verb, the preposition $\delta \iota \alpha$ (in two) intensifying the meaning of the simple verb $\rho \eta \sigma \sigma \omega$ or $\rho \eta \gamma v v \mu$, to rend.

Was driven ( $\eta \lambda \alpha u v \varepsilon \tau 0$ ). Imperfect passive of $\varepsilon \lambda \alpha u v \omega$, to drive, to row, to march (Xenophon). Only five times in the N.T. Here alone in Luke and peculiar to Luke in this incident.

Luke 8:30

Legion $(\Lambda \varepsilon \gamma \iota \omega v)$. See on Mr 5:9.
Luke 8:31
Into the abyss ( $\varepsilon เ \varsigma \tau \eta \nu \alpha \beta v \sigma \sigma o v)$. Rare old word common in LXX from a privative and $\beta a \theta u s$ (deep). So bottomless place (supply $\chi \omega \rho \alpha$ ). The deep sea in Ge 1:2; 7:11. The common receptacle of the dead in Ro 10:7 and especially the abode of demons as here and $\operatorname{Re}$ 9:1-11; 11:7; 17:8; 20:1,3 .

Luke 8:32
A herd of many swine ( $\alpha \gamma \varepsilon \lambda \eta \chi \circ \rho \omega \nu \iota \kappa \alpha \nu \omega \nu$ ). Word
herd ( $\alpha \gamma \varepsilon \lambda \eta$ ) old as Homer, but in N.T. only here and parallels (Mr 5:11; Mt 8:30). Luke shows his fondness for adjective ıкаvos here again (see verse 27) where Mark has $\mu \varepsilon \gamma \alpha \lambda \eta$ and Matthew $\pi o \lambda \lambda \omega \nu$.

Luke 8:33
Rushed down the steep ( $\omega \rho \mu \eta \sigma \varepsilon \nu \kappa \alpha \tau \alpha$ тov к $\kappa \eta \mu \nu \circ v$ ). Ablative with $\kappa \alpha \tau \alpha$ as in Mr 5:13; Mt 8:32 and the same vivid verb in each account, to hurl impetuously, to rush.

Were choked ( $\alpha \pi \varepsilon \pi \nu t \gamma \eta$ ). Second aorist (constative) passive indicative third singular (collective singular) where $\mathrm{Mr} 5: 13$ has the picturesque imperfect $\varepsilon \pi \nu \imath \gamma 0 v \tau 0$.

Luke 8:34
 neat Greek idiom to $\gamma \varepsilon \gamma \circ \vee \circ \varsigma$, articular second perfect active participle of $\gamma \iota \nu \circ \mu \alpha$. Repeated in verse 35 and in Mr 5:14. Note numerous participles here in verse 35 as in Mr 5:15.

Luke 8:36
He that was possessed with devils (demons) (only two words in Greek, o $\delta \alpha ı \mu \circ v ı \sigma \theta \varepsilon ı \varsigma$, the demonized).

Was made whole $(\varepsilon \sigma \omega \theta \eta)$. First aorist passive indicative of $\sigma \omega \zeta \omega$ to save from $\sigma \omega \varsigma$ (safe and sound). This is additional information to the news carried to them in verse 34 .

Luke 8:37
Were holden with great fear ( $\varphi \rho \beta \omega \mu \varepsilon \gamma \alpha \lambda \omega \sigma v \nu \varepsilon \iota \chi \circ v \tau o$ ). Imperfect passive of $\sigma v \nu \varepsilon \chi \omega$ with the instrumental case of $\varphi$ oßос. See a similar use of this vigorous verb in Lu 12:50 of Jesus and in Php 1:23 of Paul.

Luke 8:38
From whom the devils (demons) were gone out ( $\alpha \varphi^{\prime}$ ov $\left.\varepsilon \xi \varepsilon \lambda \eta \lambda v \theta \varepsilon \tau \alpha \delta \alpha \not \mu o v i \alpha\right)$ ). Past perfect active of $\varepsilon \xi \varepsilon \rho \chi \circ \mu \alpha$, state of completion in the past.

Prayed him ( $\varepsilon \delta \varepsilon \varepsilon \iota \tau \circ \alpha v \tau o v)$. Imperfect middle, kept on begging.
Luke 8:39
Throughout the whole city ( $\kappa \alpha \theta^{\prime}$ o $\lambda \eta \nu \tau \eta \nu \pi o \lambda ı v$ ). Mr 5:20 has it "in Decapolis." He had a great story to tell and he told it with power. The rescue missions in our cities can match this incident with cases of great sinners who have made witnesses for Christ.

Luke 8:40

Welcomed ( $\alpha \pi \varepsilon \delta \varepsilon \xi \alpha \tau 0)$. Peculiar to Luke. To receive with pleasure, from $\alpha \pi о \delta \varepsilon \chi о \mu \alpha$, a common verb.

For they were all waiting for him ( $\eta \sigma \alpha \vee \gamma \alpha \rho \pi \alpha \nu \tau \varepsilon \varsigma \pi \rho о \sigma \delta о \kappa \omega \nu \tau \varepsilon \varsigma \alpha \cup \tau 0 v$ ). Periphrastic imperfect active of
prosdokao, an old verb for eager expectancy, a vivid picture of the attitude of the people towards Jesus. Driven from Decapolis, he is welcomed in Capernaum.

Luke 8:41
Was ( $v \pi \eta \rho \chi \varepsilon v$ ). Imperfect of $v \pi \alpha \rho \chi \omega$ in sense of $\eta v$ as in modern Greek. Common in Luke, and Acts, but not in other Gospels.

Luke 8:42
An only daughter ( $\theta \cup \gamma a \tau \eta \rho \mu \circ v o \gamma \varepsilon v \eta \varsigma)$. The same adjective used of the widow's son ( $7: 12$ ) and the epileptic boy ( $9: 38$ ) and of Jesus (Joh 1:18; $3: 16$ ).

She lay a dying ( $\alpha \pi \varepsilon \theta v \eta \sigma \kappa \varepsilon v$ ). Imperfect active, she was dying. Mt 9:18 has it that she has just died.

Thronged ( $\sigma v v \varepsilon \pi v \imath \gamma o v$ ). Imperfect active of $\sigma v \mu \pi v \imath \gamma \omega$, to press together, the verb used of the thorns choking the growing grain ( Lu 8:14 ). It was a jam.

Luke 8:43
 First aorist active participle of an old verb $\pi \rho \circ \sigma a v a \lambda \iota \sigma \kappa \omega$, only here in the N.T. But Westcott and Hort reject this clause because it is not in B D Syriac Sinaitic. Whether genuine or not, the other clause in Mr 5:26 certainly is not in Luke: "had suffered many things of many physicians." Probably both are not genuine in Luke who takes care of the physicians by the simple statement that it was a chronic case:
could not be healed of any ( $о$ к $\iota \sigma \chi \cup \sigma \varepsilon v a \pi$ ' ou $\delta \varepsilon v o c ~ \theta \varepsilon \rho \alpha \pi \varepsilon v \theta \eta v \alpha$ ). He omitted also what Mark has: "and was nothing bettered but rather grew worse."

Luke 8:44
 overgarment. Of the four corners two were in front and two behind. See on Mt 9:20 .

Stanched ( $\varepsilon \sigma \tau \eta)$. Second aorist active indicative,
stopped at once (effective aorist).
Luke 8:45
Press thee and crush thee ( $\sigma u v \varepsilon \chi о v \sigma i v ~ \sigma \varepsilon ~ к \alpha ~ \alpha \pi о \theta \lambda ı \beta o v \sigma ı v)$. Hold thee together, hold thee in ( $\sigma v v \varepsilon \chi \omega$, see verse 37).

Crush thee $(\alpha \pi \sigma \theta \lambda \iota \beta \omega)$ here only in the N.T., a verb used of pressing out grapes in Diodorus and Josephus. Mr 5:31 has $\sigma v v \theta \lambda \perp \beta \omega$, to press together.

Luke 8:46
For I perceived that power had gone forth from me ( $\varepsilon \gamma \omega \gamma \alpha \rho \varepsilon \gamma v \omega \nu \delta u v a \mu \nu$ $\left.\varepsilon \xi \varepsilon \lambda \eta \lambda v \theta v i \alpha v a \pi^{\prime} \varepsilon \mu \circ v\right)$. Ep $\gamma \omega v$ is second aorist active indicative of $\gamma ı v \omega \sigma \kappa \omega$, knowledge by
personal experience as here. It is followed by the second perfect active participle $\varepsilon \xi \varepsilon \lambda \eta \lambda \nu \theta v i \alpha v$ in indirect discourse (Robertson, Grammar, pp. 1040-42). Jesus felt the sensation of power already gone. Who does not know what this sense of "goneness" or exhaustion of nervous energy means?

Luke 8:47
Trembling ( $\tau \rho \varepsilon \mu \circ v \sigma \alpha$ ). Vivid touch of the feeling of this sensitive woman who now had to tell everybody of her cure, "in the presence of all the people" ( $\varepsilon v \omega \pi \iota o v \pi \alpha v \tau o s ~ t o v ~$ $\lambda \alpha o v)$. She faced the widest publicity for her secret cure.

Luke 8:49
From the ruler of the synagogue's house ( $\pi \alpha \rho \alpha$ tov $\alpha \rho \chi \iota \sigma v a \gamma \omega \gamma \circ v$ ). The word "house" is not in the Greek here as in Mr 5:35 where $\alpha \pi 0$ is used rather than $\pi \alpha \rho \alpha$, as here. But the ruler himself had come to Jesus ( Lu 8:41) and this is the real idea. Trouble not ( $\mu \eta \kappa \varepsilon \tau$ $\sigma \kappa \nu \lambda \lambda \varepsilon)$. See on Lu 7:6 for this verb and also Mr 5:35; Mt 9:36 .

Luke 8:50
And she shall be made whole ( $\kappa \alpha \sigma \omega \theta \eta \sigma \varepsilon \tau \alpha$ ). This promise in addition to the words in Mr 5:36. See there for discussion of details.

Luke 8:53
Knowing that she was dead ( $\varepsilon \delta \delta о \tau \varepsilon \varsigma ~ о \tau ~ \alpha \pi \varepsilon Ө \alpha v \varepsilon v)$. That she died ( $\alpha \pi \varepsilon \theta a v \varepsilon v$ ), second aorist active indicative of $\alpha \pi \sigma \theta v \eta \sigma \kappa \omega$.

Luke 8:54
Called ( $\varepsilon \varphi \omega v \eta \sigma \varepsilon v$ ). Certainly not to wake up the dead, but to make it plain to all that she rose in response to his elevated tone of voice. Some think that the remark of Jesus in verse 52 ( $\mathrm{Mr} 5: 39$; Mt 9:24) proves that she was not really dead, but only in a trance. It matters little. The touch of Christ's hand and the power of his voice restored her to life.

Maiden ( $\eta$ raıs) rather than Mark's (Mr 5:41) to кopaбov (vernacular Koine).
Luke 8:55
Her spirit returned ( $\varepsilon \pi \varepsilon \sigma \tau \rho \varepsilon \psi \varepsilon v$ to $\pi \nu \varepsilon v \mu \alpha \alpha 0 \tau \eta \varsigma)$. The life came back to her at once.
Be given her to eat ( $\alpha \cup \tau \eta \delta o \theta \eta v \alpha$ $\varphi \alpha \gamma \varepsilon เ v$ ). The first infinitive $\delta 0 \theta \eta v \alpha$ is an indirect command. The second $\varphi a \gamma \varepsilon เ v$ (second aorist active of $\varepsilon \sigma \theta \omega \omega$ ) is epexegetic purpose.

## Luke 9

Luke 9:1
He called the twelve together ( $\sigma \sim v к \alpha \lambda \varepsilon \sigma \alpha \mu \varepsilon v o \varsigma ~ \tau о и \varsigma ~ \delta \omega \delta \varepsilon к \alpha)$ ). Mr 6:7; Mt 10:1 have $\pi \rho \circ \sigma \kappa \alpha \lambda \varepsilon \omega \mu \alpha$, to call to him. Both the indirect middle voice.

Luke 9:2
He sent them forth ( $\alpha \pi \varepsilon \sigma \tau \varepsilon \mid \lambda \varepsilon v$ autou¢). First aorist active indicative of $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$.
To preach the kingdom of God and to heal the sick (кпрvббєıv $\tau \eta \nu \beta a \sigma \iota \lambda \varepsilon \iota \nu$ тov $\theta \varepsilon o v ~ \kappa \alpha \iota \alpha \sigma \theta \alpha)$. Present indicative for the continuous functions during this campaign. This double office of herald ( $\kappa \eta \rho v \sigma \sigma \varepsilon เ v$ ) and healer ( $\llcorner\propto \sigma \theta \alpha)$ is stated directly in Mt 10:7-8. Note the verb $\alpha \propto \mu \alpha$ for healing here, though $\theta \varepsilon \rho \alpha \pi \varepsilon v \varepsilon ı v$ in verse 1 , apparently used interchangeably.

Luke 9:3
Neither staff ( $\mu \eta \tau \varepsilon \rho \alpha \beta \delta o v$ ). For the apparent contradiction between these words (Mt 10:10) and Mr 6:8 see discussion there. For $\pi \eta \rho a v$ (wallet) see also on Mr 6:8 (Mt 10:10) for this and other details here.

Luke 9:5
As many as receive you not ( $\sigma \sigma 0 \alpha v \mu \eta \delta \varepsilon \chi \omega v \tau \alpha \nu \mu \alpha \varsigma$ ). Indefinite relative plural with $\alpha v$ and present middle subjunctive and the negative $\mu \eta$. Here Mt 10:14 has the singular (whosoever) and Mr 6:11 has "whatsoever place."

For a testimony against them ( $\varepsilon ા \varsigma \mu \alpha \rho \tau v \rho ı o v ~ \varepsilon \pi '$ avtouc). Note use of $\varepsilon \pi$ ' autouc where Mr 6:11 has simply the dative autoıs (disadvantage), really the same idea.

Luke 9:6
Went ( $\delta i \eta \rho \chi$ оvтo). Imperfect middle, continuous and repeated action made plainer also by three present participles ( $\left.\varepsilon \xi \varepsilon \rho \chi \circ \mu \varepsilon v o \iota, \varepsilon v a \gamma \gamma \varepsilon \lambda_{\iota} \zeta \circ \mu \varepsilon v o \iota, \theta \varepsilon \rho \alpha \pi \varepsilon v o v \tau \varepsilon \varsigma\right)$, describing the wide extent of the work through all the villages ( $\kappa \alpha \tau \alpha \tau \alpha \varsigma ~ \kappa \omega \mu \alpha \varsigma$, distributive use of $\kappa \alpha \tau \alpha)$ everywhere ( $\pi \alpha \nu \tau \alpha \chi \circ 0$ ) in Galilee.

Luke 9:7
All that was done ( $\tau \alpha \gamma(v o \mu \varepsilon v \alpha \pi \alpha v \tau \alpha)$. Present middle participle, "all that was coming to pass."

He was much perplexed ( $\delta ı \eta \pi о \rho \varepsilon$ ). Imperfect active of $\delta ı \alpha \pi o \rho \varepsilon \omega$, to be thoroughly at
 only in Luke's writings in the N.T.

Because it was said ( $\delta \iota \alpha$ тo $\lambda \varepsilon \gamma \varepsilon \sigma \theta \alpha$ ). Neat Greek idiom, the articular passive infinitive after $\delta ı a$. Three reports came to the ears of Herod as Luke has it, each introduced by o $\tau$ (that) in indirect discourse: "By some" (v $\tau \circ \tau \tau \nu \omega v$ ), "by some" (v $\tau \circ \tau \tau \nu \omega \nu \delta \varepsilon$ ), "by others" ( $\alpha \lambda \lambda \omega \nu \delta \varepsilon$, vпо not here expressed, but carried over). The verbs in the indirect discourse
here (verses 7,8) are all three aorists ( $\eta \gamma \varepsilon \rho \theta \eta$ first passive; $\varepsilon \varphi a \nu \eta$ second passive; $\alpha v \varepsilon \sigma \tau \eta$ second active), not past perfects as the English has them.

Luke 9:9
He sought ( $\varepsilon \zeta \eta \tau \varepsilon$ ). Imperfect active. He keep on seeking to see Jesus. The rumours disturbed Herod because he was sure that he had put him to death ("John I beheaded").

Luke 9:10
Declared ( $\delta ı \eta \gamma \eta \sigma \alpha \nu \tau o$ ). First aorist middle of $\delta ı \eta \gamma \varepsilon \circ \mu \alpha$, to carry a narrative through to the end. Jesus listened to it all.

They had done ( $\varepsilon \pi \sigma \nmid \sigma \alpha v$ ). Aorist active indicative, they did.
He took them ( $\pi \alpha \rho \alpha \lambda \alpha \beta \omega v$ avtov¢). Second aorist active participle of $\pi \alpha \rho \alpha \lambda \alpha \mu \beta \alpha v \omega$. Very common verb.

Bethsaida ( $\mathrm{B} \eta \theta \sigma \alpha \iota \delta \alpha$ ). Peculiar to Luke. Bethsaida Julias is the territory of Philip, for it is on the other side of the Sea of Galilee (Joh 6:1).

Luke 9:11
Spake ( $\varepsilon \lambda \alpha \lambda \varepsilon$ ). Imperfect active, he continued speaking.
He healed (เato). Imperfect middle, he continued healing.
Luke 9:12
To wear away ( $\kappa \lambda \iota \nu \varepsilon เ v)$. Old verb usually transitive, to bend or bow down. Many compounds as in English decline, incline, recline, clinic ( $\kappa \lambda \iota v \eta$, bed), etc. Luke alone in the N.T. uses it intransitively as here. The sun was turning down towards setting.

Lodge ( $\kappa \alpha \tau \alpha \lambda \nu \sigma \omega \sigma \iota v$ ). First aorist active subjunctive of $\kappa \alpha \tau \alpha \lambda \nu \omega$, a common verb, to dissolve, destroy, overthrow, and then of travellers to break a journey, to lodge ( $\kappa \alpha \tau \alpha \lambda \nu \mu \alpha$, inn, Lu 2:7 ). Only here and 19:7 in the N.T. in this sense.

Get victuals ( $\varepsilon v \rho \omega \sigma \iota v \varepsilon \pi \iota \sigma \iota \tau \iota \sigma \mu \circ v$ ). Ingressive aorist active of $\varepsilon v \rho \iota \sigma \kappa \omega$, very common verb.

Victuals ( $\varepsilon \pi \iota \sigma \iota \tau \iota \sigma \mu \circ v$, from $\varepsilon \pi \iota \sigma \iota \tau \zeta \rho \mu \alpha$, to provision oneself, $\sigma \iota \tau \iota \zeta \omega$, from $\sigma \iota \tau 0 v$, wheat) only here in the N.T., though common in ancient Greek, especially for provisions for a journey (snack). See on Mr 6:32-44; Mt 14:13-21 for discussion of details.

Luke 9:13
Except we should go and buy food ( $\varepsilon \mu \eta \tau \pi \circ \rho \varepsilon v \theta \varepsilon \nu \tau \varepsilon \varsigma \eta \mu \varepsilon \iota \varsigma \alpha \gamma \circ \rho \alpha \sigma \omega \mu \varepsilon \nu \beta \rho \omega \mu \alpha \tau \alpha)$. This is a condition of the third class with the aorist subjunctive ( $\alpha \gamma 0 \rho \alpha \sigma \omega \mu \varepsilon v$ ), where the conjunction is usually $\varepsilon \alpha v$ (with negative $\varepsilon \alpha v \mu \eta$ ), but not always or necessarily so especially in the Koine. So in 1Co 14:5 $\varepsilon \mu \eta \delta$ เєр $\mu \eta \nu \varepsilon \cup \eta$ and in Php 3:12 $\varepsilon \kappa \alpha \kappa \alpha \tau \alpha \lambda \alpha \beta \omega$. "Unless" is better here than "except."

Food ( $\beta \rho \omega \mu \alpha \tau \alpha$ ), means eaten pieces from $\beta \iota \beta \rho \omega \sigma \kappa \omega$, to eat, somewhat like our "edibles" or vernacular "eats."

Luke 9:14

#### Abstract

About ( $\omega \sigma \varepsilon$ ). Luke as Mt 14:21 adds this word to the definite statement of Mr 6:44 that there were 5,000 men, a hundred companies of fifty each.

Sit down (катак $\lambda_{\imath v a \tau \varepsilon) . ~ F i r s t ~ a o r i s t ~ a c t i v e ~ i m p e r a t i v e . ~ R e c l i n e, ~ l i e ~ d o w n . ~ O n l y ~ i n ~ L u k e ~}^{\text {Le }}$ in the N.T. See also verse 15.

In companies ( $\kappa \lambda \iota \sigma$ Iac). Cognate accusative after
kataklinate. Only here in the N.T. A row of persons reclining at meals (table company).
About fifty each ( $\omega \sigma \varepsilon \alpha v \alpha \pi \varepsilon v \tau \eta \kappa o v \tau \alpha$ ). Distributive use of $\alpha v \alpha$ and approximate number again ( $\omega \sigma \varepsilon$ ).

Luke 9:16
The five ... the two ( $\tau 0 v \varsigma \pi \varepsilon \nu \tau \varepsilon$... $\tau 0 \cup \varsigma \delta v o$ ). Pointing back to verse 13 , fine example of the Greek article.

And gave ( $\kappa \alpha \varepsilon \delta \iota \delta o v$ ). Imperfect active of $\delta \iota \delta \omega \mu$, kept on giving. This picturesque imperfect is preceded by the aorist $\kappa \alpha \tau \varepsilon \kappa \lambda \alpha \sigma \varepsilon v$ (brake), a single act. This latter verb in the N.T. only here and the parallel in Mr 6:41, though common enough in ancient Greek. We say "break off" where here the Greek has "break down" (or thoroughly), perfective use of kata.

Luke 9:17
Twelve baskets ( $\kappa о \varphi เ v o ~ \delta \omega \delta \varepsilon \kappa \alpha)$ ). For discussion of кочоvo and $\sigma \varphi \cup \rho ı \delta \varepsilon \varsigma$ as well as of $\kappa \lambda \alpha \sigma \mu \alpha \tau \alpha$ (broken pieces) see on Mr 6:43; Mt 14:20 .

Luke 9:18
As he was praying ( $\varepsilon v \tau \omega \varepsilon เ v \alpha$ avtov $\pi \rho \circ \sigma \varepsilon \cup \chi \circ \mu \varepsilon v o v$ ). Common Lukan idiom of $\varepsilon v$ with the articular infinitive for a temporal clause, only here Luke has the periphrastic infinitive ( $\varepsilon$ viva $\pi \rho o \sigma \varepsilon u \chi o \mu \varepsilon v o v)$ as also in 11:1. This item about Christ's praying alone in Luke.

Alone (ката $\mu \circ$ 人аৎ). In the N.T. only here and $\mathrm{Mr} 4: 10$. Perhaps $\chi \omega \rho \alpha \varsigma$ (places) is to be supplied with $\mu$ ovac (lonely places).

Were with him ( $\sigma v v \eta \sigma \alpha v \alpha v \tau \omega$ ). This seems like a contradiction unless "alone" is to be taken with $\sigma u v \eta \sigma \alpha v$. Westcott and Hort put $\sigma u v \eta \nu \tau \eta \sigma \alpha v$ in the margin. This would mean that as Jesus was praying alone, the disciples fell in with him. At any rate he was praying apart from them.

Luke 9:19
That I am ( $\mu \varepsilon \varepsilon \varepsilon v \alpha$ ). Accusative and infinitive in indirect assertion, a common Greek idiom. Mt 16:13 for "I" has "the Son of man" as identical in the consciousness of Christ. The various opinions of men about Jesus here run parallel to the rumours heard by Herod (verses 8,9 ).

Luke 9:20
But who say ye? (Hv $\mu \varepsilon \iota \varsigma \delta \varepsilon \tau v \alpha \lambda \varepsilon \gamma \varepsilon \tau \varepsilon$;). Note the emphatic proleptical position of $\nu \mu \varepsilon \iota$ : "But ye who do ye say? This is really what mattered now with Jesus.

The Christ of God (Tov $\chi$ pıбтov tov $\theta \varepsilon o v$ ). The accusative though the infinitive is not expressed. The Anointed of God, the Messiah of God. See on 2:26 for "the Anointed of the

Lord." See on Mt 16:17 for discussion of Peter's testimony in full. Mr 6:29 has simply "the Christ." It is clear from the previous narrative that this is not a new discovery from Simon Peter, but simply the settled conviction of the disciples after all the defections of the Galilean masses and the hostility of the Jerusalem ecclesiastics. The disciples still believed in Jesus as the Messiah of Jewish hope and prophecy. It will become plain that they do not grasp the spiritual conception of the Messiah and his kingdom that Jesus taught, but they are clear that he is the Messiah however faulty their view of the Messiah may be. There was comfort in this for Jesus. They were loyal to him.

Luke 9:21
To tell this to no man ( $\mu \eta \delta \varepsilon v \lambda \varepsilon \gamma \varepsilon เ \nu \tau 0 \nu \tau 0$ ). Indirect command with the negative infinitive after
commanded ( $\pi \alpha \rho \eta \gamma \gamma \varepsilon ا \lambda \varepsilon v$ ). It had been necessary for Jesus to cease using the word
Messiah (X by the disciples would lead to revolution as was plain after the feeding of the five thousand (Joh 6:15).

## Luke 9:22

Rejected ( $\alpha \pi о \delta о к \mu \alpha \sigma \theta \eta v \alpha$ ). First aorist passive infinitive of $\alpha \pi о \delta о к \mu \alpha \zeta \omega$, to reject after trial.

The third day ( $\tau \eta \tau \rho \iota \tau \eta \eta \mu \varepsilon \rho \alpha)$. Locative case of time as in Mt 16:21. Here in the parallel passage Mr 8:31 has "after three days" ( $\mu \varepsilon \tau \alpha \tau \rho \varepsilon \iota \varsigma \eta \mu \varepsilon \rho a \varsigma)$ in precisely the same sense. That is to say, "after three days" is just a free way of saying "on the third day" and cannot mean "on the fourth day" if taken too literally. For discussion of this plain prediction of the death of Christ with various details see discussion on Mt 16:21; Mr 8:31. It was a melancholy outlook that depressed the disciples as Mark and Matthew show in the protest of Peter and his rebuke.

Luke 9:23
He said unto all ( $\varepsilon \lambda \varepsilon \gamma \varepsilon v \delta \varepsilon \pi \rho \circ \varsigma \pi \alpha \nu \tau \alpha \varsigma)$. This is like Luke (cf. verse 43). Jesus wanted all (the multitude with his disciples, as Mr 8:34 has it) to understand the lesson of self-sacrifice. They could not yet understand the full meaning of Christ's words as applied to his approaching death of which he had been speaking. But certainly the shadow of the cross is already across the path of Jesus as he is here speaking. For details (soul, life, forfeit, gain, profit, lose, world) see discussion on Mt 16:24-26; Mr 8:34-37. The word for lose ( $\alpha \pi 0 \lambda \varepsilon \sigma \varepsilon$, from $\alpha \pi \sigma \lambda \lambda \nu \mu$, a very common verb) is used in the sense of destroy, kill, lose, as here. Note the mercantile terms in this passage (gain, lose, fine or forfeit, exchange).

Daily ( $\kappa \alpha \theta^{\prime} \eta \mu \varepsilon \rho \alpha v$ ). Peculiar to Luke in this incident. Take up the cross (his own cross) daily (aorist tense, $\alpha \rho \alpha \tau \omega$ ), but keep on following me ( $\alpha \kappa 0 \lambda o u \theta \varepsilon ı \tau \omega$, present tense). The cross was a familiar figure in Palestine. It was rising before Jesus as his destiny. Each man has his own cross to meet and bear.

Luke 9:26
Whosoever shall be ashamed ( $o \varsigma \alpha v \varepsilon \pi \alpha \iota \sigma \chi v v \theta \eta$ ). Rather,
Whosoever is ashamed as in Mr 8:38. The first aorist passive subjunctive in an indefinite relative clause with $\alpha \nu$. The passive verb is transitive here also. This verb is from $\varepsilon \pi$ and $\alpha \iota \sigma \chi \cup \vee \eta$, shame (in the eyes of men). Jesus endured the shame of the cross (Heb 12:2 ). The man at the feast who had to take a lower seat did it with shame (Lu 14:9). Paul is not ashamed of the Gospel (Ro 1:16). Onesiphorus was not ashamed of Paul (2Ti 1:16 ).

In his own glory ( $\varepsilon v \tau \eta \delta o \xi \eta$ avtov). This item added to what is in Mr 8:38; Mt 16:27

Luke 9:27
Till they see ( $\varepsilon \omega \varsigma \alpha \nu \iota \omega \omega \sigma \iota \nu$ ). Second aorist active subjunctive with $\varepsilon \omega \varsigma$ and $\alpha \nu$ referring to the future, an idiomatic construction. So in $\mathrm{Mr} 9: 1 ; \mathrm{Mt} \mathrm{16:28}$. In all three passages "shall not taste of death" (ov $\mu \eta \gamma \varepsilon v \sigma \omega v \tau \alpha \theta \alpha v \alpha \tau o v$, double negative with aorist middle subjunctive) occurs also. Rabbinical writings use this figure. Like a physician Christ tasted death that we may see how to die. Jesus referred to the cross as "this cup" (Mr 14:36; Mt 26:39; Lu 22:42 ). Mark speaks of the kingdom of God as "come" ( $\varepsilon \lambda \eta \lambda \nu \theta v \iota \alpha \nu$, second perfect active participle). Matthew as "coming" ( $\varepsilon \rho \chi \circ \mu \varepsilon v o v$ ) referring to the Son of man, while Luke has neither form. See Matthew and Mark for discussion of the theories of interpretation of this difficult passage. The Transfiguration follows in a week and may be the first fulfilment in the mind of Jesus. It may also symbolically point to the second coming.

Luke 9:28
About eight days $(\omega \sigma \varepsilon \eta \mu \varepsilon \rho \alpha$ ок $\tau \omega)$. A nominativus pendens without connexion or construction. Mr 9:2 (Mt 17:1) has "after six days" which agrees with the general statement.

Into the mountain ( $\varepsilon \iota \varsigma$ то ороৎ). Probably Mount Hermon because we know that Jesus was near Caesarea Philippi when Peter made the confession (Mr 8:27; Mt 16:13 ). Hermon is still the glory of Palestine from whose heights one can view the whole of the land. It was a fit place for the Transfiguration.

To pray ( $\pi \rho \circ \sigma \varepsilon v \xi \alpha \sigma \theta \alpha)$. Peculiar to Luke who so often mentions Christ's habit of prayer (cf. 3:21). See also verse 29 "as he was praying" ( $\varepsilon v \tau \omega \pi \rho o \sigma \varepsilon v \chi \varepsilon \sigma \theta a$, one of Luke's favourite idioms).

His countenance was altered ( $\varepsilon \gamma \varepsilon v \varepsilon \tau о \tau о \varepsilon เ \delta \circ \varsigma \tau о v \pi \rho о \sigma \omega \pi о v$ av $\tau о v \varepsilon \tau \varepsilon \rho \circ v$ ). Literally, "the appearance of his face became different." Mt 17:2 says that "his face did shine as the sun." Luke does not use the word "transfigured" ( $\mu \varepsilon \tau \varepsilon \mu \circ \rho \varphi \omega \theta \eta$ ) in Mr 9:2; Mt 17:2 . He may have avoided this word because of the pagan associations with this word as Ovid's Мєтанорфобєя.

And his raiment became white and dazzling (ка о $ц \alpha \tau \iota \sigma \mu \varsigma ~ \alpha v \tau о v ~ \lambda \varepsilon v \kappa о \varsigma ~$ $\varepsilon \xi \alpha \sigma \tau \rho \alpha \pi \tau \omega v)$. Literally,

And his raiment white radiant . There is no and between "white" and "dazzling." The participle $\varepsilon \xi \alpha \sigma \tau \rho \alpha \pi \tau \omega v$ is from the compound verb meaning to flash ( $\alpha \sigma \tau \rho \alpha \pi \tau \omega$ ) out or forth ( $\varepsilon \xi)$. The simple verb is common for lightning flashes and bolts, but the compound in the LXX and here alone in the N.T. See Mr 9:3 "exceeding white" and Mt 17:2 "white as the light."

Luke 9:31
There talked with him ( $\sigma u v \varepsilon \lambda \alpha \lambda o u v a v \tau \omega$ ). Imperfect active, were talking with him.
Who appeared in glory ( $00 \varphi \theta \varepsilon v \tau \varepsilon \varsigma \varepsilon v \delta o \xi \eta$ ). First aorist passive participle of opa $\omega$. This item peculiar to Luke. Compare verse 26.

Spake of his decease ( $\varepsilon \lambda \varepsilon \gamma \circ v \tau \eta \nu \varepsilon \xi \circ \delta o v$ ). Imperfect active, were talking about his $\varepsilon \xi$ oठuc (departure from earth to heaven) very much like our English word "decease" (Latin decessus, a going away). The glorious light graphically revealed Moses and Elijah talking with Jesus about the very subject concerning which Peter had dared to rebuke Jesus for mentioning (Mr 8:32; Mt 16:22). This very word $\varepsilon \xi$ goduc (way out) in the sense of death occurs in $2 \mathrm{Pe} \mathrm{1:15} \mathrm{and} \mathrm{is} \mathrm{followed} \mathrm{by} \mathrm{a} \mathrm{brief} \mathrm{description} \mathrm{of} \mathrm{the} \mathrm{Transfiguration} \mathrm{glory}$. words for death ( $\theta$ ava兀oৎ) in the N.T. are $\varepsilon \kappa \beta \alpha \sigma \iota$, , going out as departure (Heb 13:7), $\alpha \varphi \iota \xi \iota$, departing (Ac 20:29), ava入uøı, loosening anchor (2Ti 4:6) and $\alpha v \alpha \lambda \nu \sigma \alpha$ (Php 1:23).

To accomplish ( $\pi \lambda \eta \rho o u v$ ). To fulfil. Moses had led the Exodus from Egypt. Jesus will accomplish the exodus of God's people into the Promised Land on high. See on Mark and Matthew for discussion of significance of the appearance of Moses and Elijah as representatives of law and prophecy and with a peculiar death. The purpose of the Transfiguration was to strengthen the heart of Jesus as he was praying long about his approaching death and to give these chosen three disciples a glimpse of his glory for the hour of darkness coming. No one on earth understood the heart of Jesus and so Moses and Elijah came. The poor disciples utterly failed to grasp the significance of it all.

Luke 9:32
Were heavy with sleep ( $\eta \sigma \alpha v \beta \varepsilon \beta \alpha \rho \eta \mu \varepsilon v o v \pi v \omega$ ). Periphrastic past perfect of $\beta \alpha \rho \varepsilon \omega$, a late form for the ancient $\beta \alpha \rho u v \omega$ (not in N.T. save Textus Receptus in Lu 21:34). This form, rare and only in passive (present, aorist, perfect) in the N.T., is like $\beta \alpha \rho v v \omega$, from $\beta \alpha \rho v \varsigma$, and that from $\beta \alpha \rho o \varsigma$, weight, burden (Ga 6:2). Hv $\tau v \omega$ is in the instrumental case. They had apparently climbed the mountain in the early part of the night and were now overcome with sleep as Jesus prolonged his prayer. Luke alone tells of their sleep. The same word is used of the eyes of these three disciples in the Garden of Gethsemane (Mt 26:43) and of the hearts of many ( Lu 21:34).

But when they were fully awake ( $\delta \iota \alpha \gamma \rho \eta \gamma \circ \rho \eta \sigma \alpha v \tau \varepsilon \varsigma \delta \varepsilon$ ). First aorist active participle of this late (Herodian) and rare compound verb (here alone in the N.T.), $\delta \iota \alpha \gamma \rho \eta \gamma \quad \rho \varepsilon \omega$ (Luke is fond of compounds with $\delta(\alpha)$ ). The simple verb $\gamma \rho \eta \gamma \circ \rho \varepsilon \omega$ (from the second perfect active $\varepsilon \gamma \rho \eta \gamma o \rho \alpha)$ is also late, but common in the LXX and the N.T. The effect of $\delta \iota \alpha$ can be either
to remain awake in spite of desire to sleep (margin of Revised Version) or to become thoroughly awake (ingressive aorist tense also) as Revised Version has it. This is most likely correct. The Syriac Sinaitic has it "When they awoke." Certainly they had been through a strain.

His glory ( $\tau \eta \nu \delta o \xi a v \alpha v \tau o v)$. See also verse 26 in the words of Jesus.
Luke 9:33
As they were departing from him ( $\varepsilon v \tau \omega \delta \iota \alpha \chi \omega \rho \iota \zeta \varepsilon \sigma \theta \alpha \alpha v \tau o v \varsigma \alpha \pi^{\prime} \alpha v \tau o v$ ). Peculiar to Luke and another instance of Luke's common idiom of $\varepsilon v$ with the articular infinitive in a temporal clause. This common verb occurs here only in the N.T. The present middle voice means to separate oneself fully (direct middle). This departing of Moses and Elijah apparently accompanied Peter's remark as given in all three Gospels. See for details on Mark and Matthew.

Master (Eлıбтата) here,
Rabbi (Mr 9:5),
Lord (Kvpıع, Mt 17:4).
Let us make ( $\pi$ oוף $\sigma \omega \mu \varepsilon v$, first aorist active subjunctive) as in $\mathrm{Mr} 9: 5$, but Mt 17:4 has "I will make" ( $\pi$ оוך $\sigma \omega$ ). It was near the time of the feast of the tabernacles. So Peter proposes that they celebrate it up here instead of going to Jerusalem for it as they did a bit later (Joh 7 ).

Not knowing what he said ( $\mu \eta \varepsilon \delta \omega \varsigma$ o $\lambda \varepsilon \gamma \varepsilon$ ). Literally,
not understanding what he was saying ( $\mu \eta$, regular negative with participle and $\lambda \varepsilon \gamma \varepsilon$, present indicative retained in relative clause in indirect discourse). Luke puts it more bluntly than Mark (Peter's account), "For he wist not what to answer; for they became sore afraid" (Mr 9:6 ). Peter acted according to his impulsive nature and spoke up even though he did not know what to say or even what he was saying when he spoke. He was only half awake as Luke explains and he was sore afraid as Mark (Peter) explains. He had bewilderment enough beyond a doubt, but it was Peter who spoke, not James and John.

Luke 9:34
Overshadowed them ( $\varepsilon \pi \varepsilon \sigma \kappa เ a \zeta \varepsilon v$ avtouc). Imperfect active (aorist in Mt 17:5) as present participle in Mr 9:7, inchoative, the shadow began to come upon them. On Hermon as on many high mountains a cloud will swiftly cover the cap. I have seen this very thing at Blue Ridge, North Carolina. This same verb is used of the Holy Spirit upon Mary (Lu 1:35 ). Nowhere else in the N.T., though an old verb ( $\varepsilon \pi \iota, \sigma \kappa \iota \Omega \zeta \omega$, from $\sigma \kappa \iota \alpha$, shadow).

As they entered into the cloud ( $\varepsilon \nu \tau \omega \varepsilon เ \sigma \varepsilon \lambda \theta \varepsilon ı \nu$ av $\tau 0 \nu \varsigma \varepsilon \varepsilon \varsigma \tau \eta \nu \nu \varepsilon \varphi \varepsilon \lambda \eta \nu)$. Luke's idiom of $\varepsilon v$ with the articular infinitive again (aorist active this time, on the entering in as to them). All six "entered into" the cloud, but only Peter, James, and John "became afraid" ( $\varepsilon \varphi \circ \beta \eta \theta \eta \sigma \alpha v$, ingressive first aorist passive).

Luke 9:35

If eкยıvous be accepted here instead of autous, the three disciples would be outside of the cloud.

Out of the cloud ( $\varepsilon \kappa \tau \eta \varsigma \nu \varepsilon \varphi \varepsilon \lambda \eta \varsigma$ ). This voice was the voice of the Father like that at the baptism of Jesus (Lu 3:22; Mr 1:11; Mt 3:17) and like that near the end (Joh 12:28-30) when the people thought it was a clap of thunder or an angel.

My son, my chosen (Ho vıoৎ $\mu \circ$, o єк $\lambda \varepsilon \lambda \varepsilon \gamma \mu \varepsilon v o \varsigma)$. So the best documents (Aleph B L Syriac Sinaitic). The others make it "My Beloved" as in Mr 9:7; Mt 17:5. These disciples are commanded to hear Jesus, God's Son, even when he predicts his death, a pointed rebuke to Simon Peter as to all.

Luke 9:36
When the voice came ( $\varepsilon v$ to $\gamma \varepsilon v \varepsilon \sigma \theta a \tau \eta \nu \varphi \omega v \eta \nu$ ). Another example of Luke's idiom, this time with the second aorist middle infinitive. Literally, "on the coming as to the voice" (accusative of general reference). It does not mean that it was "after" the voice was past that Jesus was found alone, but simultaneously with it (ingressive aorist tense).

Alone ( $\mu$ оvoৎ). Same adjective in Mr 9:8; Mt 17:8 translated "only." Should be rendered "alone" there also.

They held their peace ( $\varepsilon \sigma \iota \gamma \eta \sigma \alpha \nu)$. Ingressive aorist active of common verb $\sigma \gamma \gamma \omega$, became silent. In Mr 9:9; Mt 17:9, Jesus commanded them not to tell till His Resurrection from the dead. Luke notes that they in awe obeyed that command and it turns out that they finally forgot the lesson of this night's great experience. By and by they will be able to tell them, but not "in those days."

Which they had seen ( $\omega v \varepsilon \omega \rho \alpha \kappa \alpha v$ ). Attraction of the relative $\alpha$ into the case of the unexpressed antecedent tov $\omega \omega v$. Perfect active indicative $\varepsilon \omega$ paка $\nu$ with Koine (papyri) form for the ancient $\varepsilon \omega \rho \alpha \kappa \alpha \sigma \iota v$ changed by analogy to the first aorist ending in $-\alpha v$ instead of aбı.

Luke 9:37
On the next day ( $\tau \eta \varepsilon \xi \eta \varsigma \eta \mu \varepsilon \rho \alpha$ ). Alone in Luke. It shows that the Transfiguration took place on the preceding night.

They were come down ( $\kappa \alpha \tau \varepsilon \lambda \theta$ ov $\tau \omega \nu \alpha \nu \tau \omega \nu$ ). Genitive absolute of second aorist active participle of катерхо $\mu$, a common enough verb, but in the N.T. only in Luke's writings save Jas 3:15.

Met him ( $\sigma u v \eta \nu \tau \eta \sigma \varepsilon \nu \alpha v \tau \omega$ ). First aorist active of $\sigma u v \alpha \nu \tau \alpha \omega$, common compound verb, to meet with, only in Luke's writings in the N.T. save Heb 7:1. With associative instrumental case $\alpha u \tau \omega$.

Luke 9:38
Master ( $\Delta \Delta \delta \alpha \sigma \kappa \alpha \lambda \varepsilon$ ). Teacher as in Mr 9:17.
Lord (кирєє, Mt 17:15).

To look upon ( $\varepsilon \pi \iota \beta \lambda \varepsilon \psi \alpha)$. Aorist active infinitive of $\varepsilon \pi \iota \beta \lambda \varepsilon \pi \omega(\varepsilon \pi$, upon, $\beta \lambda \varepsilon \pi \omega$, look), common verb, but in the N.T. only here and Jas 2:3 except Lu 1:48 in quotation from LXX. This compound verb is common in medical writers for examining carefully the patient.

Mine only child ( $\mu$ оvoүعvŋऽ $\mu$ ). Only in Luke as already about an only child in 7:12; 8:42.

Luke 9:39
Suddenly ( $\varepsilon \xi \varepsilon \varphi \vee \eta \varsigma$ ). Old adverb, but in the N.T. only in Luke's writings save Mr 13:36 . Used by medical writers of sudden attacks of disease like epilepsy.

It teareth him that he foameth ( $\sigma \pi \alpha \rho \alpha \sigma \sigma \varepsilon \alpha v \tau o v \mu \varepsilon \tau \alpha \alpha \varphi \rho \circ v$ ). Literally, "It tears him with (accompanied with, $\mu \varepsilon \tau \alpha)$ foam" (old word, $\alpha \varphi \rho o \varsigma$, only here in the N.T.). From $\sigma \pi \alpha \rho a \sigma \sigma \omega$, to convulse, a common verb, but in the N.T. only here and Mr 1:26; 9:26 (and $\sigma u v \sigma \pi \alpha \rho \alpha \sigma \sigma \omega, \mathrm{Mr} 9: 20$ ). See Mr 9:17; Mt 17:15; Lu 9:39 for variations in the symptoms in each Gospel. The use of $\mu \varepsilon \tau \alpha \alpha \varphi \rho o v$ is a medical item.

Hardly ( $\mu \mathrm{o} \lambda ı \varsigma$ ). Late word used in place of $\mu$ оүヶ, the old Greek term (in some MSS. here) and alone in Luke's writings in the N.T. save 1Pe 4:18; Ro 5:7 .

Bruising him sorely ( $\sigma \cup v \tau \rho(\beta$ ov avtov). Common verb for rubbing together, crushing together like chains (Mr 5:4) or as a vase (Mr 14:3). See on Matthew and Mark for discussion of details here.

Luke 9:41
How long shall I be with you and bear with you? ( $\varepsilon \omega \varsigma ~ \pi о \tau \varepsilon ~ \varepsilon \sigma о \mu \alpha ~ \pi \rho о \varsigma ~ v \mu \alpha \varsigma ~ к \alpha ~$ $\alpha v \varepsilon \xi \circ \mu \alpha \nu \mu \omega v$;). Here the two questions of Mr 9:19 (only one in Mt 17:17) are combined in one sentence.

Bear with ( $\alpha v \varepsilon \xi_{o \mu} \alpha$, direct middle future) is, hold myself from you (ablative case $v \mu \omega v$ ).
Faithless ( $\alpha \pi \iota \sigma \tau \sigma \varsigma$ ) is disbelieving and perverse ( $\delta ı \varepsilon \sigma \tau \rho \alpha \mu \mu \varepsilon v \eta$, perfect passive participle of $\delta \iota \alpha \sigma \tau \rho \varepsilon \varphi \omega)$, is twisted, turned, or torn in two.

Luke 9:42
As he was yet a coming ( $\varepsilon \tau \pi \rho \circ \sigma \varepsilon \rho \chi \circ \mu \varepsilon v o v \alpha u \tau o u$ ). Genitive absolute. While he was yet coming (the boy, that is, not Jesus). Note quaint English "a coming" retained in the Revised Version.

Dashed him ( $\varepsilon \rho \rho \eta \xi \varepsilon v \alpha \cup \tau o v$ ). First aorist active indicative of $\rho \eta \gamma v \cup \mu$ or $\rho \eta \sigma \sigma \omega$, to rend or convulse, a common verb, used sometimes of boxers giving knockout blows.

Tare grievously ( $\sigma u v \varepsilon \sigma \pi \alpha \rho \alpha \xi \varepsilon v$ ). Rare word as only here and $\mathrm{Mr} 9: 20$ in the N.T., which see.

Gave him back to his father ( $\alpha \pi \varepsilon \delta \omega \kappa \varepsilon v$ av $\alpha \circ v \tau \omega \pi \alpha \tau \rho \alpha v \tau o v)$. Tender touch alone in Luke as in 7:15.

They were all astonished ( $\varepsilon \xi \varepsilon \pi \lambda \eta \sigma \sigma o v \tau 0 ~ \delta \varepsilon \pi \alpha \nu \tau \varepsilon \varsigma)$. Imperfect passive of the common verb $\varepsilon \kappa \pi \lambda \eta \sigma \sigma \omega$ or $\varepsilon \kappa \pi \lambda \eta \gamma \nu v \mu$, to strike out, a picturesque description of the amazement of all at the easy victory of Jesus where the nine disciples had failed.

At the majesty of God $(\varepsilon \pi \tau \eta \mu \varepsilon \gamma \alpha \lambda \varepsilon \iota \sigma \tau \tau \tau \operatorname{\tau ov} \theta \varepsilon o v)$. A late word from the adjective $\mu \varepsilon \gamma a \lambda \varepsilon \iota \circ \varsigma$ and that from $\mu \varepsilon \gamma \alpha \varsigma$ (great). In the N.T. only here and Ac 19:27 of Artemis and in $2 \mathrm{Pe} 1: 16$ of the Transfiguration. It came to be used by the emperors like our word "Majesty."

Which he did (oıs $\varepsilon \pi \circ \iota \varepsilon$ ). This is one of the numerous poor verse divisions. This sentence has nothing to do with the first part of the verse. The imperfect active $\varepsilon \pi \sigma, \varepsilon$ covers a good deal not told by Luke (see Mr 9:30; Mt 17:22 ). Note the attraction of the relative
hois into the case of
$\mathbf{p} \boxtimes \mathbf{s i n}$, its antecedent.
Luke 9:44
Sink into your ears $(\Theta \varepsilon \sigma \theta \varepsilon v \mu \varepsilon \iota \varsigma \varepsilon \iota \varsigma \tau \alpha \omega \tau \alpha \nu \mu \omega v)$. Second aorist imperative middle of $\tau \iota \theta \eta \mu$, common verb. "Do you (note emphatic position) yourselves (whatever others do) put into your ears." No word like "sink" here. The same prediction here as in Mr 9:31; Mt 17:22 about the Son of man only without mention of death and resurrection as there, which see for discussion.

Luke 9:45
It was concealed from them ( $\eta \nu \pi \alpha \rho \alpha \kappa \varepsilon \kappa \alpha \lambda \nu \mu \mu \varepsilon \nu \circ \nu \alpha \pi^{\prime} \alpha \nu \tau \omega \nu$ ). Periphrastic past perfect of $\pi \alpha \rho \alpha \kappa \alpha \lambda v \pi \tau \omega$, a common verb, but only here in the N.T., to cover up, to hide from. This item only in Luke.

That they should not perceive it ( $\imath v \alpha \mu \eta \alpha \iota \sigma \theta \omega v \tau \alpha \alpha v \tau o$ ). Second aorist middle subjunctive of the common verb aı $\sigma$ O $\alpha \circ \mu \alpha$ used with $ו v \alpha \mu \eta$, negative purpose. This explanation at least relieves the disciples to some extent of full responsibility for their ignorance about the death of Jesus as Mr 9:32 observes, as does Luke here that they were afraid to ask him. Plummer says, "They were not allowed to understand the saying then, in order that they might remember it afterwards, and see that Jesus had met His sufferings with full knowledge and free will." Perhaps also, if they had fully understood, they might have lacked courage to hold on to the end. But it is a hard problem.

Luke 9:46
 in Mr 9:33 about this incident. In Luke this dispute follows immediately after the words of Jesus about his death. They were afraid to ask Jesus about that subject, but Mt 18:1 states that they came to Jesus to settle it.

Which of them should be greatest ( $\tau 0 \tau \iota \varsigma \alpha \nu \varepsilon ı \eta \mu \varepsilon \iota \zeta \omega \nu \alpha \nu \tau \omega \nu$ ). Note the article with the indirect question, the clause being in the accusative of general reference. The optative with $\alpha v$ is here because it was so in the direct question (potential optative with $\alpha v$ retained in the indirect). But Luke makes it plain that it was not an abstract problem about greatness in the kingdom of heaven as they put it to Jesus (Mt 18:1), but a personal problem in their own group. Rivalries and jealousies had already come and now sharp words. By and by

James and John will be bold enough to ask for the first places for themselves in this political kingdom which they expect ( Mr 10:35; Mt 20:20 ). It is a sad spectacle.

Luke 9:47
Took a little child ( $\varepsilon \pi i \lambda \alpha \beta$ o $\mu \varepsilon v o \varsigma \pi \alpha \iota \delta \iota v$ ). Second aorist middle participle of the common verb $\varepsilon \pi \iota \lambda \alpha \mu \beta \alpha v \omega$. Strictly, Taking a little child to himself (indirect middle). Mr 9:36 has merely the active $\lambda \alpha \beta \omega v$ of the simple verb $\lambda \alpha \mu \beta \alpha v \omega$. Set him by his side ( $\varepsilon \sigma \tau \eta \sigma \varepsilon v$ avto $\left.\pi \alpha \rho^{\prime} \varepsilon \alpha \cup \tau \omega\right)$. "In his arms" Mr 9:36 has it, "in the midst of them" Mt 18:3 says. All three attitudes following one another (the disciples probably in a circle around Jesus anyhow) and now the little child (Peter's child?) was slipped down by the side of Jesus as he gave the disciples an object lesson in humility which they sorely needed.

Luke 9:48
 head of the child. Mt 18:5 has "one such little child." The honoured disciple, Jesus holds, is the one who welcomes little children "in my name" ( $\varepsilon \pi \tau \omega$ ovo $\mu \alpha \tau \mu \circ$ ), upon the basis of my name and my authority. It was a home-thrust against the selfish ambition of the Twelve. Ministry to children is a mark of greatness. Have preachers ever yet learned how to win children to Christ? They are allowed to slip away from home, from Sunday school, from church, from Christ.

For he that is least among you all (o $\gamma \alpha \rho \mu \kappa \rho о \tau \varepsilon \rho о \varsigma \varepsilon v \pi \alpha \sigma \iota v ~ v \mu ı v ~ v \pi \alpha \rho \chi \omega v$ ). Note the use of $v \pi \alpha \rho \chi \omega$ as in $8: 41 ; 23: 50$. The comparative $\mu \kappa \rho о \tau \varepsilon \rho \circ \varsigma$ is in accord with the Koine idiom where the superlative is vanishing (nearly gone in modern Greek). But
great $(\mu \varepsilon \gamma \alpha \varsigma)$ is positive and very strong. This saying peculiar to Luke here.
Luke 9:49
And John answered ( $\alpha \pi о к \rho ı \theta \varepsilon \varsigma \delta \varepsilon \mathrm{I} \omega \alpha \nu \eta \varsigma$ ). As if John wanted to change the subject after the embarrassment of the rebuke for their dispute concerning greatness (Lu 9:46-48 ).

Master ( $\varepsilon \pi \iota \sigma \tau \alpha \tau \alpha)$. Only in Luke in the N.T. as already four times ( $5: 5 ; 8: 24,45 ; 9: 33$ ).
We forbade him ( $\varepsilon \kappa \omega \lambda \nu$ vo $\boldsymbol{\varepsilon} v$ avtov). Conative imperfect as in Mr 9:38, We tried to hinder him.

Because he followeth not with us (от очк $\alpha \kappa о \lambda o u \theta \varepsilon \mu \varepsilon \theta \eta \mu \omega v$ ). Present tense preserved for vividness where Mark has imperfect
$\boxtimes k$ kolouthei . Note also here "with us" ( $\mu \varepsilon \theta^{\prime} \eta \mu \omega v$ ) where Mark has associative instrumental $\eta \mu \nu$. It is a pitiful specimen of partisan narrowness and pride even in the Beloved Disciple, one of the Sons of Thunder. The man was doing the Master's work in the Master's name and with the Master's power, but did not run with the group of the Twelve.

Luke 9:50
"Against you is for you" ( $\left.\kappa \alpha \theta^{\prime} v \mu \omega v \nu \pi \varepsilon \rho \nu \mu \omega v\right)$. Mr 9:40 has "against us is for us" ( $\eta \mu \omega \nu \ldots \eta \mu \omega v$ ). The Koine Greek $\eta$ and $v$ were often pronounced alike and it was easy to
interchange them. So many MSS. here read just as in Mark. The point is precisely the same as it is a proverbial saying. See a similar saying in Lu 11:23: "He that is not with me is against me." The prohibition here as in Mr 9:39 is general: "Stop hindering him" ( $\mu \eta \kappa \omega \lambda \nu \varepsilon \tau \varepsilon, \mu \eta$ and the present imperative, not $\mu \eta$ and the aorist subjunctive). The lesson of toleration in methods of work for Christ is needed today.

Luke 9:51
When the days were well-nigh come ( $\varepsilon v \tau \omega \sigma \nu \mu \pi \lambda \eta \rho \circ v \sigma \theta \alpha \tau \alpha \varsigma \eta \mu \varepsilon \rho \alpha \varsigma)$. Luke's common idiom $\varepsilon v$ with the articular infinitive, "in the being fulfilled as to the days." This common compound occurs in the N.T. only here and Lu 8:23; Ac 2:1. The language here makes it plain that Jesus was fully conscious of the time of his death as near as already stated (Lu 9:22,27,31).

That he should be received up ( $\tau \eta \varsigma \alpha v \alpha \lambda \eta \mu \psi \varepsilon \omega \varsigma ~ a u \tau o v$ ). Literally, "of his taking up." It is an old word (from Hippocrates on), but here alone in the N.T. It is derived from $\alpha v a \lambda \alpha \mu \beta \alpha v \omega$ (the verb used of the Ascension, Ac 1:2,11,22; 1Ti 3:16) and refers here to the Ascension of Jesus after His Resurrection. Not only in John's Gospel (Joh 17:5 ) does Jesus reveal a yearning for a return to the Father, but it is in the mind of Christ here as evidently at the Transfiguration (9:31) and later in Lu 12:49f.

He steadfastly set his face ( $\alpha \cup \tau \circ \varsigma ~ \tau о ~ \pi \rho о \sigma \omega \pi о v ~ \varepsilon \sigma \tau \eta \rho \iota \sigma \varepsilon v) . ~ N o t e ~ e m p h a t i c ~ \alpha u \tau о \varsigma, ~$
he himself, with fixedness of purpose in the face of difficulty and danger. This look on Christ's face as he went to his doom is noted later in Mr 10:32. It is a Hebraistic idiom (nine times in Ezekiel), this use of face here, but the verb (effective aorist active) is an old one from $\sigma \tau \eta \rho \iota \zeta \omega$ (from $\sigma \tau \eta \rho \iota \gamma \xi$, a support), to set fast, to fix.
 Luke three times mentions Christ making his way to Jerusalem (9:51; 13:22; 17:11) and John mentions three journeys to Jerusalem during the later ministry (Joh 7:10; 11:17; 12:1 ). It is natural to take these journeys to be the same in each of these Gospels. Luke does not make definite location of each incident and John merely supplements here and there. But in a broad general way they seem to correspond.

Luke 9:52
Sent messengers ( $\alpha \pi \varepsilon \sigma \tau \varepsilon 1 \lambda \varepsilon v$ a $\gamma \gamma \varepsilon$ خouc). As a precaution since he was going to Jerusalem through Samaria. The Samaritans did not object when people went north from Jerusalem through their country. He was repudiating Mount Gerizim by going by it to Jerusalem. This was an unusual precaution by Jesus and we do not know who the messengers (angels ) were.

To make ready for him ( $\omega \varsigma \varepsilon \tau о \not \mu \alpha \sigma \alpha \alpha \nu \tau \omega$ ). $\mathrm{H} \omega \varsigma$ is correct here, not $\omega \sigma \tau \varepsilon$. The only examples of the final use of $\omega \varsigma$ with the infinitive in the N.T. are this one and Heb 7:9 (absolute use). In Acts 20:24 Westcott and Hort read $\omega \varsigma \tau \varepsilon \lambda \varepsilon \epsilon \omega \sigma \omega$ and put $\omega \varsigma \tau \varepsilon \lambda \varepsilon \epsilon \omega \sigma \alpha$ in the margin (Robertson, Grammar, p. 1091).

Luke 9:53
And they did not receive him ( $\kappa \alpha$ ouк $\varepsilon \delta \varepsilon \xi \alpha \nu \tau 0 ~ \alpha \cup \tau o v$ ). Adversative use of $\kappa \alpha=$ But.
 Iع $\rho \circ v \sigma \alpha \lambda \eta \mu$ ). Periphrastic imperfect middle. It was reason enough to the churlish Samaritans.

Luke 9:54
Saw this (ıסovtє¢). Second aorist active participle of opaw. Saw the messengers returning.
We bid ( $\theta \varepsilon \lambda \varepsilon \iota \varsigma ~ \varepsilon ו \pi \omega \mu \varepsilon v$ ). Deliberative subjunctive $\varepsilon ו \pi \omega \mu \varepsilon v$ after $\theta \varepsilon \lambda \varepsilon \iota \varsigma$ without ıva, probably two questions, Dost thou wish? Shall we bid? Perhaps the recent appearance of Elijah on the Mount of Transfiguration reminded James and John of the incident in 2 Ki 1:10-12 . Some MSS. add here "as Elijah did." The language of the LXX is quoted by James and John, these fiery Sons of Thunder. Note the two aorist active infinitives ( $\kappa \alpha \tau \alpha \beta \eta v a \iota$, $\alpha v a \lambda \omega \sigma \alpha$, the first ingressive, the second effective).

Luke 9:55
But he turned ( $\sigma \tau \rho \alpha \varphi \varepsilon \iota \varsigma \delta \varepsilon$ ). Second aorist passive participle of $\sigma \tau \rho \varepsilon \varphi \omega$, common verb, to turn round. Dramatic act. Some ancient MSS. have here:
 sounds like Christ and may be a genuine saying though not a part of Luke's Gospel. A smaller number of MSS. add also:

For the Son of Man came not to destroy men's lives, but to save them (Ho $\gamma \alpha \rho$ vios тov $\alpha v \theta \rho \omega \pi$ оv оик $\eta \lambda \theta \varepsilon v \psi v \chi \alpha \varsigma \alpha v \theta \rho \omega \pi \omega v \alpha \pi о \lambda \varepsilon \sigma \alpha \alpha \lambda \lambda \alpha \sigma \omega \sigma \alpha$ ), a saying reminding us of Mt 5:17; Lu 19:10. Certain it is that here Jesus rebuked the bitterness of James and John toward Samaritans as he had already chided John for his narrowness towards a fellowworker in the kingdom.

Luke 9:57
A certain man ( $\tau \iota \varsigma)$. Mt 8:19 calls him "a scribe." Lu 9:57-60; Mt 8:19-22 , but not in Mark and so from Q or the Logia.

Wherever you go (отоv $\varepsilon \alpha v ~ a \pi \varepsilon \rho \chi \eta$ ) is the present middle subjunctive with the indefinite relative adverb $\varepsilon \alpha v$, common Greek idiom. See on Matthew for "holes," "nests," "Son of man." The idiom "where to lay his head" ( $\pi \circ \nu \tau \eta v \kappa \varepsilon \varphi \alpha \lambda \eta \nu \kappa \lambda \iota \nu \eta$ ) is the same in both, the deliberative subjunctive retained in the indirect question. "Jesus knows the measure of the scribe's enthusiasm" (Plummer). The wandering life of Jesus explains this statement.

Luke 9:59
And he said unto another ( $\varepsilon เ \pi \varepsilon v \delta \varepsilon \pi \rho \circ \varsigma \varepsilon \tau \varepsilon \rho \circ v)$. Mt 8:21 omits Christ's "Follow me" ( $\alpha \kappa о \lambda o v \theta \varepsilon \mu \mathrm{o}$ ) and makes this man a volunteer instead of responding to the appeal of Jesus. There is no real opposition, of course. In Matthew's account the man is apologetic as in Luke. Plummer calls him "one of the casual disciples" of whom there are always too many. The scribes knew how to give plausible reasons for not being active disciples.

First ( $\pi \rho \omega \tau \sigma v$ ). One of the problems of life is the relation of duties to each other, which comes first. The burial of one's father was a sacred duty (Ge 25:9), but, as in the case of Tobit $4: 3$, this scribe's father probably was still alive. What the scribe apparently meant was that he could not leave his father while still alive to follow Jesus around over the country.

Luke 9:60
Leave the dead to bury their own dead ( $\alpha \varphi \varepsilon \varsigma \tau$ тоиऽ vєкроия $\forall \alpha \psi \alpha$ тоvৎ $\varepsilon \alpha \nu \tau \omega \nu \nu \varepsilon \kappa \rho о \nu \varsigma)$. This paradox occurs so in Mt 8:22. The explanation is that the spiritually dead can bury the literally dead. For such a quick change in the use of the same words see Joh 5:21-29 (spiritual resurrection from sin in Joh 5:21-27, bodily resurrection from the grave, Joh 5:28,29) and Joh 11:25f. The harshness of this proverb to the scribe probably is due to the fact that he was manifestly using his aged father as an excuse for not giving Christ active service.

But go thou and publish abroad the kingdom of God ( $\sigma v \delta \varepsilon \alpha \pi \varepsilon \lambda \theta \omega \nu \delta \iota \alpha \gamma \gamma \varepsilon \lambda \lambda \varepsilon \tau \eta \nu$ $\beta a \sigma \iota \lambda \varepsilon \iota \alpha v$ тov $\theta \varepsilon o v)$. The scribe's duty is put sharply ( $B v \tau \delta o \theta o v, \sigma v \delta \varepsilon$ ). Christ called him to preach, and he was using pious phrases about his father as a pretext. Many a preacher has had to face a similar delicate problem of duty to father, mother, brothers, sisters and the call to preach. This was a clear case. Jesus will help any man called to preach to see his duty. Certainly Jesus does not advocate renunciation of family duties on the part of preachers.

Luke 9:61
And another also said ( $\varepsilon \iota \tau \varepsilon v \delta \varepsilon \kappa \alpha \varepsilon \tau \varepsilon \rho \circ \varsigma)$. A volunteer like the first. This third case is given by Luke alone, though the incident may also come from the same Logia as the other two. Hetєpos does not here mean one of a "different" sort as is sometimes true of this pronoun, but merely another like $\alpha \lambda \lambda o \varsigma$ (Robertson, Grammar, p. 749).

But first ( $\pi \rho \omega \tau \sigma v \delta \varepsilon$ ). He also had something that was to come "first."
To bid farewell to them that are at my house ( $\alpha \pi о \tau \alpha \xi \alpha \sigma \theta \alpha$ тоьऽ $\varepsilon ⿺ 𠃊 ~ \tau о v$ оєкоv $\mu \circ v$ ). In itself that was a good thing to do. This first aorist middle infinitive is from $\alpha \pi \sigma \tau \alpha \sigma \sigma \omega$, an old verb, to detach, to separate, to assign as a detachment of soldiers. In the N.T. it only appears in the middle voice with the meaning common in late writers to bid adieu, to separate oneself from others. It is used in Ac 18:18 of Paul taking leave of the believers in Corinth. See also Mr 6:46; 2Co 2:13. It is thus a formal function and this man meant to go home and set things in order there and then in due time to come and follow Jesus.

Luke 9:62
Having put his hand to the plough ( $\left.\varepsilon \pi \iota \beta \alpha \lambda \omega \nu \tau \eta \nu \chi \varepsilon \iota \rho \alpha \varepsilon \pi^{\prime} \alpha \rho o \tau \rho o v\right)$. Second aorist active participle of $\varepsilon \pi \iota \beta \alpha \lambda \lambda \omega$, an old and common verb, to place upon. Note repetition of preposition $\varepsilon \pi$ before $\alpha \rho o \tau \rho o v$ (plough). This agricultural proverb is as old as Hesiod. Pliny observes that the ploughman who does not bend attentively to his work goes crooked. It has always been the ambition of the ploughman to run a straight furrow. The Palestine fellah had good success at it.

And looking back ( $\kappa \alpha \beta \lambda \varepsilon \pi \omega v \varepsilon \iota \varsigma \tau \alpha$ о $\pi \iota \sigma \omega$ ). Looking to the things behind. To do that is fatal as any ploughman knows. The call to turn back is often urgent.

Fit ( $\varepsilon \cup \theta \varepsilon \tau \cos )$. From $\varepsilon v$ and $\tau ו \theta \eta \mu=$ well-placed, suited for, adapted to. "The first case is that of inconsiderate impulse, the second that of conflicting duties, the third that of a divided mind" (Bruce).

## Luke 10

Luke 10：1
Appointed（ $\alpha v \varepsilon \delta \varepsilon ı \xi \varepsilon v$ ）．First aorist active indicative of $\alpha v \alpha \delta \varepsilon ı \kappa v \nu \mu$ ，an old verb，not only common，but in LXX．In the N．T．only here and Ac 1：24．Cf．avaסعı $\xi ⿺ 𠃊 ⺊$ in Lu 1：80 ．To show forth，display，proclaim，appoint．

Seventy others（ $\varepsilon \tau \varepsilon \rho о \cup \varsigma \varepsilon \beta \delta о \mu \eta \kappa о \nu \tau \alpha \kappa \alpha)$ ．The＂also＂（ $\kappa \alpha$ ）and the＂others＂point back to the mission of the Twelve in Galilee（ 9：1－6）．Some critics think that Luke has confused this report of a mission in Judea with that in Galilee，but needlessly so．What earthly objection can there be to two similar missions？B D Syr．Cur．and Syr．Sin．have＂seventy－two．＂The seventy elders were counted both ways and the Sanhedrin likewise and the nations of the earth．It is an evenly balanced point．

Two and two（ $\alpha v \alpha \delta v o$ ）．For companionship as with the Twelve though Mr 6：7 has it $\delta v o$（vernacular idiom）．B K have here $\alpha v \alpha \delta v o$ ，a combination of the idiom in Mr 6：7 and that here．
 present infinitive and note autoc．Jesus was to follow after and investigate the work done． This was only a temporary appointment and no names are given，but they could cover a deal of territory．

Luke 10：2
Harvest（ $\theta \varepsilon \rho \iota \sigma \mu \mathrm{c})$ ．Late word for the older $\theta \varepsilon \rho o \varsigma$ ，summer，harvest．The language in this verse is verbatim what we have in Mt 9：37，38 to the Twelve．Why not？The need is the same and prayer is the answer in each case．Prayer for preachers is Christ＇s method for in－ creasing the supply．

Luke 10：3
As lambs（ $\omega \varsigma \alpha \rho v a \varsigma)$ ．Here again the same language as that in Mt 10：16 except that there＂sheep＂（ $\pi \rho \circ \beta \alpha \tau \alpha)$ appears instead of＂lambs．＂Pathetic picture of the risks of mission－ aries for Christ．They take their life in their hands．

Luke 10：4
Purse（ $\beta \alpha \lambda \lambda \alpha v \tau \iota o v$ ）．Old word for money－bag，sometimes a javelin as if from $\beta \alpha \lambda \lambda \omega$ ． Only in Luke in the N．T．（10：4；12：33；22：35ff．）．See Lu 9：3；Mr 6：7f．；Mt 10：9f．for the other similar items．

Salute no man on the way（ $\mu \eta \delta \varepsilon v \alpha$ ка $\alpha \alpha \tau \eta v$ o $\delta$ оv $\alpha \sigma \pi \alpha \sigma \eta \sigma \theta \varepsilon$ ）．First aorist（ingressive） middle subjunctive with $\mu \eta \delta \varepsilon v a$ ．The peril of such wayside salutations was palaver and delay．The King＇s business required haste．Elisha＇s servant was not to tarry for salutations or salaams（ $2 \mathrm{Ki} \mathrm{4:29}$ ）．These oriental greetings were tedious，complicated，and often meddlesome if others were present or engaged in a bargain．

Luke 10：5

First say ( $\pi \rho \omega \tau$ ov $\lambda \varepsilon \gamma \varepsilon \tau \varepsilon$ ). Say first. The adverb $\pi \rho \omega \tau 0 v$ can be construed with "enter" ( $\varepsilon \| \sigma \varepsilon \lambda \theta \eta \tau \varepsilon$ ), but probably with $\lambda \varepsilon \gamma \varepsilon \tau \varepsilon$ is right. The word spoken is the usual oriental salutation.

Luke 10:6
A son of peace (voc $\varepsilon เ \rho \eta \nu \eta \varsigma)$. A Hebraism, though some examples occur in the vernacular Koine papyri. It means one inclined to peace, describing the head of the household.

Shall rest (£ $\pi \alpha v a \pi \alpha \eta \sigma \varepsilon \tau \alpha)$. Second future passive of $\varepsilon \pi \alpha v a \pi \alpha v \omega$, a late double compound $(\varepsilon \pi l, \alpha v a)$ of the common verb $\pi \alpha v \omega$.

It shall turn to you again ( $\varepsilon \varphi^{\prime} v \mu \alpha \varsigma \alpha v \alpha \kappa \alpha \mu \psi \varepsilon$ ). Common verb $\alpha v \alpha \kappa \alpha \mu \pi \tau \omega$, to bend back, return. The peace in that case will bend back with blessing upon the one who spoke it.

## Luke 10:7

In that same house ( $\varepsilon v \alpha \cup \tau \eta \tau \eta$ oוкı). Literally, in the house itself, not "in the same house" ( $\varepsilon v \tau \eta \alpha \cup \tau \eta$ oוкıa), a different construction. A free rendering of the common Lukan idiom is, "in that very house."

Eating ( $\varepsilon \sigma \theta \mathrm{ov} \mathrm{\tau} \mathrm{\varepsilon} \mathrm{\varsigma)} .\mathrm{An} \mathrm{old} \mathrm{poetic} \mathrm{verb} \varepsilon \sigma \theta \omega$ for $\varepsilon \sigma \theta \omega \omega$ that survives in late Greek.
Such things as they give ( $\tau \alpha \pi \alpha \rho^{\prime} \alpha v \tau \omega v$ ). "The things from them."
 10:10 we have $\tau \uparrow \varsigma \tau \rho о \varphi \eta \varsigma$ avtou (his food). 1Ti 5:18 has this saying quoted as scripture. That is not impossible if Luke wrote by A.D. 62. Paul there however may quote only De 25:4 as scripture and get this quotation either from Lu 10:7 or from a proverbial saying of Jesus. It is certainly not a real objection against the Pauline authorship of First Timothy.

Go not from house to house ( $\mu \eta \mu \varepsilon \tau \alpha \beta \alpha ı v \varepsilon \tau \varepsilon \varepsilon \xi$ оוкıаৎ єıৎ оוкıav). As a habit, $\mu \eta$ and the present imperative, and so avoid waste of time with such rounds of invitations as would come.

Luke 10:8
Such things as are set before you ( $\tau \alpha \pi \alpha \rho \alpha \tau \iota \theta \varepsilon \mu \varepsilon v \alpha \nu \mu \nu v$ ). The things placed before you from time to time (present passive participle, repetition). Every preacher needs this lesson of common politeness. These directions may seem perfunctory and even commonplace, but every teacher of young preachers knows how necessary they are. Hence they were given both to the Twelve and to the Seventy.

Luke 10:9
Is come nigh unto you ( $\eta \gamma \gamma \nless \varepsilon v \varepsilon \varphi^{\prime} v \mu \alpha \varsigma$ ). Perfect active indicative of $\varepsilon \gamma \gamma \zeta \zeta \omega$ as in Mt 3:2 of the Baptist and Mr 1:15 of Jesus. Note $\varepsilon \varphi^{\prime} v \mu a \varsigma$ here.

Luke 10:10
Into the streets thereof ( $\varepsilon \varsigma \varsigma \tau \alpha \varsigma \pi \lambda \alpha \tau \varepsilon เ a \varsigma \alpha v \tau \eta \varsigma)$. Out of the inhospitable houses into the broad open streets.

Luke 10:11

Even the dust ( $\kappa \alpha$ тov коvioptov). Old word from коvı, dust, and opvu $\mu$, to stir up. We have seen it already in Mt 10:14; $\mathrm{Lu} 9: 5$. Dust is a plague in the east. Shake off even that.

Cleaveth ( $\kappa о \lambda \lambda \eta \theta \varepsilon \nu \tau \alpha$ ). First aorist passive participle of ко $\lambda \lambda \alpha \omega$, to cling as dust and mud do to shoes. Hence the orientals took off the sandals on entering a house.

We wipe off ( $\alpha \pi о \mu \alpha \sigma \sigma о \mu \varepsilon \theta \alpha)$. Middle voice of an old verb $\alpha \pi о \mu \alpha \sigma \sigma \omega$, to rub off with the hands. Nowhere else in the N.T. But $\varepsilon \kappa \mu \alpha \sigma \sigma \omega$, occurs in Lu 7:38,44 .

Against you (H $\nu \mu \mathrm{L} v$ ). Fine example of the dative of disadvantage (the case of personal interest, the dative).

Luke 10:12
More tolerable (aveктотвpov). Comparative of the verbal adjective aveктос from avexoua. An old adjective, but only the comparative in the N.T. and in this phrase (Mt 10:15; 11:22,24; Lu 10:12,14 ).

Luke 10:13
Would have repented ( $\alpha v \mu \varepsilon \tau \varepsilon v o \eta \sigma \alpha v$ ). Conclusion (apodosis) of second-class condition, determined as unfulfilled.

Long ago ( $\pi \alpha \lambda \alpha$ ). Implies a considerable ministry in these cities of which we are not told. Chorazin not mentioned save here and Mt 11:21. Perhaps Kapaऍe near Tell Hum (Capernaum).

Sitting in sackcloth and ashes ( $\varepsilon v \sigma \alpha \kappa \kappa \omega \kappa \alpha ~ \sigma \pi о \delta о ~ \kappa \alpha Ө \eta \mu \varepsilon v o$ ). Pictorial and graphic. The баккоৎ (sackcloth) was dark coarse cloth made of goat's hair and worn by penitents, mourners, suppliants. It is a Hebrew word, sag. The rough cloth was used for sacks or bags. To cover oneself with ashes was a mode of punishment as well as of voluntary humiliation.

Luke 10:15
Shalt thou be exalted? ( $\mu \eta \nu \psi \omega \theta \eta \sigma \eta \upharpoonright$ ). M $\eta$ expects the answer No. The verb is future passive indicative second singular of $v \psi o \omega$, to lift up, a late verb from $v \psi o \varsigma$, height. It is used by Jesus of the Cross (Joh 12:32).

Unto Hades ( $\varepsilon \omega \varsigma$ Haı $\delta o v$ ). See on Mt 16:18 for this word which is here in contrast to Heaven as in Isa 14:13-15. Hades is not Gehenna. "The desolation of the whole neighbourhood, and the difficulty of identifying even the site of these flourishing towns, is part of the fulfilment of this prophecy" (Plummer). Ragg notes the omission of Nazareth from this list of cities of neglected privilege and opportunity. "Is it the tender memories of boyhood that keep from His lips the name of the arch-rejector ( $4: 28$ sqq.) Nazareth?"

## Luke 10:16

Rejecteth him that sent me ( $\alpha \theta \varepsilon \tau \varepsilon$ тov $\alpha \pi о \sigma \tau \varepsilon ı \lambda \alpha \tau \tau \alpha \mu$ ). These solemn words form a fit close for this discourse to the Seventy. The fate of Chorazin, Bethsaida, Capernaum will befall those who set aside ( $\alpha$ privative and $\theta \varepsilon \tau \varepsilon \omega$, from $\tau \tau \theta \eta \mu$ ) the mission and message of these messengers of Christ. See this verb used in 7:30 of the attitude of the scribes and

Pharisees toward John and Jesus．It is this thought that makes it so grave a responsibility to be co－with Christ，high privilege as it is（Joh 9：4）．

Luke 10：17
Returned with joy（ $\cup \pi \varepsilon \sigma \tau \rho \varepsilon \psi \alpha v \mu \varepsilon \tau \alpha \chi \alpha \rho \alpha \varsigma)$ ．They had profited by the directions of Jesus．Joy overflows their faces and their words．

Even the demons（ $\kappa \alpha \tau \alpha \delta \alpha \mu \nu v \Delta \alpha$ ）．This was a real test．The Twelve had been expressly endowed with this power when they were sent out（Lu 9：1），but the Seventy were only told to heal the sick（ 10：9）．It was better than they expected．The Gospel worked wonders and they were happy．The demons were merely one sign of the conflict between Christ and Satan． Every preacher has to grapple with demons in his work．

Are subject（u $\left.\frac{1}{2} \tau \alpha \sigma \sigma \varepsilon \tau \alpha\right)$ ．Present passive indicative（repetition）．
Luke 10：18
I beheld Satan fallen（ $\varepsilon \theta \varepsilon \omega \rho \circ 0 v \tau$ tov $\sum \alpha \tau \alpha v \alpha v \pi \varepsilon \sigma o v \tau \alpha$ ）．Imperfect active（I was behold－ ing）and second aorist（constative）active participle of $\pi \iota \pi \tau \omega$（not
fallen，$\pi \varepsilon \pi \tau \omega \kappa о \tau \alpha$ ，perfect active participle，nor
falling ，$\pi \iota \pi \tau 0 v \tau \alpha$ ，present active participle，but
fall ，$\pi \varepsilon \sigma \circ v \tau \alpha)$ ．As a flash of lightning out of heaven，quick and startling，so the victory of the Seventy over the demons，the agents of Satan，forecast his downfall and Jesus in vision pictured it as a flash of lightning．

Luke 10：19
And over all the power of the enemy（ $\kappa \alpha \varepsilon \pi \pi \alpha \sigma \alpha \nu \tau \eta v \delta \nu v \alpha \mu \nu \nu \tau o v \varepsilon \chi \theta \rho o v)$ ．This is the heart of＂the authority＂（ $\tau \eta \nu \varepsilon \xi o v \sigma \omega \alpha v$ ）here given by Jesus which is far beyond their ex－ pectations．The victory over demons was one phase of it．The power to tread upon serpents is repeated in Mr 16：18（the Appendix）and exemplified in Paul＇s case in Malta（Ac 28：3－5 ）．But protection from physical harm is not the main point in this struggle with Satan＂the enemy＂（Mt 13：25；Ro 16：20；1Pe 5：8）．

Nothing shall in any wise hurt you（ov $\delta \varepsilon v \nu \mu \alpha \varsigma o v \mu \eta \alpha \delta ı \kappa \eta \sigma \varepsilon$ ）．Text has future active indicative，while some MSS．read $\alpha \delta \iota \kappa \eta \sigma \eta$ ，aorist active subjunctive of $\alpha \delta \iota \kappa \varepsilon \omega$ ，common verb from $\alpha \delta_{⿺ 𠃊 八}$ ¢（ $\alpha$ privative and $\delta_{\iota \kappa о \varsigma), ~ t o ~ s u f f e r ~ w r o n g, ~ t o ~ d o ~ w r o n g . ~ T h e ~ t r i p l e ~ n e g a t i v e ~}^{\text {en }}$ here is very strong．Certainly Jesus does not mean this promise to create presumption or foolhardiness for he repelled the enemy＇s suggestion on the pinnacle of the temple．

Luke 10：20
Are written（ $\varepsilon v \gamma \varepsilon \gamma \rho \alpha \pi \tau \alpha)$ ．Perfect passive indicative，state of completion，stand written， enrolled or engraved，from $\varepsilon \gamma \gamma \rho \alpha \varphi \omega$ ，common verb．＂As citizens possessing the full privileges of the commonwealth＂（Plummer）．

Luke 10：21

In that same hour ( $\varepsilon v a v \tau \eta \tau \eta \omega \rho \alpha$ ). Literally, "at the hour itself," almost a demonstrative use of avtoc (Robertson, Grammar, p. 686) and in Luke alone in the N.T. (2:38; 10:21; 12:12; 20:19 ). Mt 11:25 uses the demonstrative here, "at that time" ( $\varepsilon v \varepsilon \kappa \varepsilon เ v \omega \tau \omega \kappa \alpha \iota \rho \omega)$.

Rejoiced in the Holy Spirit ( $\eta \gamma \alpha \lambda \lambda ı \alpha \sigma \alpha \tau 0 ~ \tau \omega \pi \nu \varepsilon \nu \mu \alpha \tau \tau \omega \alpha \gamma \omega)$ ). First aorist middle of the late verb $\alpha \gamma \alpha \lambda \lambda \iota \alpha \omega$ for $\alpha \gamma \alpha \lambda \lambda \omega$, to exult. Always in the middle in the N.T. save Lu 1:47 in Mary's Magnificat. This holy joy of Jesus was directly due to the Holy Spirit. It is joy in the work of his followers, their victories over Satan, and is akin to the joy felt by Jesus in Joh 4:32-38 when the vision of the harvest of the world stirred his heart. The rest of this verse is precisely like Mt 11:25f. , a peculiarly Johannine passage in Matthew and Luke, but not in Mark, and so from Q (the Logia of Jesus). It has disturbed critics who are unwilling to admit the Johannine style and type of teaching as genuine, but here it is. See on Matthew for discussion. "That God had proved his independence of the human intellect is a matter for thankfulness. Intellectual gifts, so far from being necessary, are often a hindrance" (Plummer).

Luke 10:22
Knoweth who the Son is ( $\gamma \iota \nu \omega \sigma \kappa \varepsilon \tau \iota \varsigma \varepsilon \sigma \tau \iota v$ o vıo̧). Knows by experience, $\gamma \iota \nu \omega \sigma \kappa \varepsilon$. Here Mt 11:27 has $\varepsilon \pi \iota \gamma \iota \nu \omega \sigma \kappa \varepsilon$ (fully knows) and simply tov viov (the Son) instead of the "who" ( $\tau \iota \varsigma)$ clause. So also in "who the Father is" ( $\tau \iota \varsigma \varepsilon \sigma \tau \iota v$ o $\pi \alpha \tau \varepsilon \rho$ ). But the same use and contrast of "the Father," "the Son." in both Matthew and Luke, "an aerolite from the Johannean heaven" (Hase). No sane criticism can get rid of this Johannine bit in these Gospels written long before the Fourth Gospel was composed. We are dealing here with the oldest known document about Christ (the Logia) and the picture is that drawn in the Fourth Gospel (see my The Christ of the Logia). It is idle to try to whittle away by fantastic exegesis the high claims made by Jesus in this passage. It is an ecstatic prayer in the presence of the Seventy under the rapture of the Holy Spirit on terms of perfect equality and understanding between the Father and the Son in the tone of the priestly prayer in Joh 17 . We are justified in saying that this prayer of supreme Fellowship with the Father in contemplation of final victory over Satan gives us a glimpse of the prayers with the Father when the Son spent whole nights on the mountain alone with the Father. Here is the Messianic consciousness in complete control and with perfect confidence in the outcome. Here as in Mt 11:27 by the use of
willeth to reveal him ( $\beta 00 \lambda \eta \tau \alpha \alpha \pi о \kappa \alpha \lambda \nu \psi \alpha)$. The Son claims the power to reveal the Father "to whomsoever he wills" ( $\omega \alpha v \beta$ ou $\eta \tau \tau \alpha$, indefinite relative and present subjunctive of $\beta$ ou $\lambda o \mu \alpha$, to will, not the future indicative). This is divine sovereignty most assuredly. Human free agency is also true, but it is full divine sovereignty in salvation that is here claimed along with possession ( $\pi \alpha \rho \varepsilon \delta o \theta \eta$, timeless aorist passive indicative) of all power from the Father. Let that supreme claim stand.

Luke 10:23

Turning to the disciples ( $\sigma \tau \rho \alpha \varphi \varepsilon \iota \varsigma \pi \rho \circ \varsigma \tau 0 \cup \varsigma \mu \alpha \theta \eta \tau \alpha \varsigma)$. Second aorist passive of $\sigma \tau \rho \varepsilon \varphi \omega$ as in 9:55. The prayer was a soliloquy though uttered in the presence of the Seventy on their return. Now Jesus turned and spoke "privately" or to the disciples (the Twelve, apparently), whether on this same occasion or a bit later.

Blessed ( $\mu \alpha \kappa \alpha \rho ь)$ ) A beatitude, the same adjective as in Mt 5:3-11. A beatitude of privilege very much like that in Mt 5:13-16. Jesus often repeated his sayings.

Luke 10:24
 contrast with the prophets and kings of former days.

Luke 10:25
And tempted him ( $\varepsilon \kappa \pi \varepsilon\llcorner\rho \alpha \zeta \omega \vee \alpha \cup \tau \circ v$ ). Present active participle, conative idea, trying to tempt him. There is no "and" in the Greek. He "stood up (aveб亢ך, ingressive second aorist active) trying to tempt him." Пєıра弓 $\omega$ is a late form of $\pi \varepsilon \iota \rho \alpha \omega$ and $\varepsilon \kappa \pi \varepsilon \iota \rho \alpha \zeta \omega$ apparently only in the LXX, and N.T. (quoted by Jesus from De 6:16 in Mt 4:7; Lu 4:12 against Satan). Here and 1Co 10:9. The spirit of this lawyer was evil. He wanted to entrap Jesus if possible.

What shall I do to inherit eternal life? (T лоוך $\sigma \alpha \varsigma ~ \zeta \omega \eta \nu ~ \alpha ו \omega v ı v ~ к \lambda \eta \rho о v о \mu \eta \sigma \omega ;$ ). Literally, "By doing what shall I inherit eternal life?" Note the emphasis on "doing" (лопŋбаৎ). The form of his question shows a wrong idea as to how to get it.

Eternal life ( $\zeta \omega \eta \nu \alpha \omega \nu v o v$ ) is endless life as in John's Gospel (Joh 16:9; 18:18,30) and in Mt 25:46, which see.

Luke 10:26
How readest thou? ( $\pi \omega \varsigma ~ \alpha \nu \alpha \gamma ı \nu \omega \sigma \kappa \varepsilon \iota \sigma ;$ ). As a lawyer it was his business to know the facts in the law and the proper interpretation of the law. See on Lu 7:30 about vонккоя (lawyer). The rabbis had a formula, "What readest thou?"

Luke 10:27
And he answering (o $\delta \varepsilon \alpha \pi о \kappa \rho \mid \theta \varepsilon เ \varsigma)$. First aorist participle, no longer passive in idea. The lawyer's answer is first from the Shema (De 6:3; 11:13) which was written on the phylacteries. The second part is from Le 19:18 and shows that the lawyer knew the law. At a later time Jesus himself in the temple gives a like summary of the law to a lawyer ( Mr 12:28-34; Mt 22:34-40 ) who wanted to catch Jesus by his question. There is no difficulty in the two incidents. God is to be loved with all of man's four powers (heart, soul, strength, mind) here as in Mr 12:30 .

Luke 10:28
Thou hast answered right ( $\mathrm{o} \theta \omega \varsigma \varsigma \alpha \varepsilon \kappa \rho ı \theta \eta \varsigma$ ). First aorist passive indicative second singular with the adverb op $\theta \omega c$. The answer was correct so far as the words went. In Mr 12:34 Jesus commends the scribe for agreeing to his interpretation of the first and the second commandments. That scribe was "not far from the kingdom of God," but this lawyer was "tempting" Jesus.

Do this and thou shalt live (тоито тоєє ка $\lceil\eta \sigma \eta)$. Present imperative (keep on doing this forever) and the future indicative middle as a natural result. There was only one trouble with the lawyer's answer. No one ever did or ever can "do" what the law lays down towards God and man always. To slip once is to fail. So Jesus put the problem squarely up to the lawyer who wanted to know
by doing what. Of course, if he kept the law
perfectly always, he would inherit eternal life.
Luke 10:29
Desiring to justify himself ( $\theta \varepsilon \lambda \omega v \delta$ ıкаı $\omega \sigma \alpha$ عavтov). The lawyer saw at once that he had convicted himself of asking a question that he already knew. In his embarrassment he asks another question to show that he did have some point at first:

And who is my neighbour? ( $\kappa \alpha \tau \iota \varsigma ~ \varepsilon \sigma \tau \iota v ~ \mu о v ~ \pi \lambda \eta \sigma ı v ;) . ~ T h e ~ J e w s ~ s p l i t ~ h a i r s ~ o v e r ~ t h i s ~$ question and excluded from "neighbour" Gentiles and especially Samaritans. So here was his loop-hole. A neighbour is a nigh dweller to one, but the Jews made racial exceptions as many, alas, do today. The word $\pi \lambda \eta \sigma \iota o v$ here is an adverb (neuter of the adjective $\pi \lambda \eta \sigma \circ \rho \varsigma)$ meaning o $\pi \lambda \eta \sigma \iota \rho \omega \nu$ (the one who is near), but $\omega v$ was usually not expressed and the adverb is here used as if a substantive.

Luke 10:30
Made answer ( $v \pi о \lambda \alpha \beta \omega v$ ). Second aorist active participle of $v \pi о \lambda \alpha \mu \beta \alpha v \omega$ (see 7:43), to take up literally, and then in thought and speech, old verb, but in this sense of interrupting in talk only in the N.T.

Was going down ( $\kappa \alpha \tau \varepsilon \beta a \iota v \varepsilon v$ ). Imperfect active describing the journey.
Fell among robbers ( $\lambda \eta \iota \tau \alpha \iota \varsigma ~ \pi \varepsilon \rho \iota \varepsilon \pi \varepsilon \sigma \varepsilon v)$ ). Second aorist ingressive active indicative of $\pi \varepsilon \rho \iota \pi \iota \pi \tau \omega$, old verb with associative instrumental case, to fall among and to be encompassed by ( $\pi \varepsilon \rho$, around), to be surrounded by robbers. A common experience to this day on the road to Jericho. The Romans placed a fort on this "red and bloody way." These were bandits, not petty thieves.

Stripped ( $\varepsilon \kappa \delta v \sigma a v \tau \varepsilon \varsigma)$. Of his clothing as well as of his money, the meanest sort of robbers.

Beat him ( $\pi \lambda \eta \gamma \alpha \varsigma \varepsilon \pi \imath \theta \varepsilon v \tau \varepsilon \varsigma)$. Second aorist active participle of $\varepsilon \pi \iota \tau i \theta \eta \mu$, a common verb. Literally, "placing strokes or blows" ( $\pi \lambda \eta \gamma \alpha \varsigma$, plagues) upon him. See Lu 12:48; Ac 16:23; Re 15:1,6,8 for "plagues."

Half-dead ( $\eta \mu \theta \alpha \nu \eta$ ). Late word from $\eta \mu$, half, and $\theta \nu \eta \sigma \kappa \omega$, to die. Only here in the N.T. Vivid picture of the robbery.

Luke 10:31
By chance (ката $\sigma \cup ү к \cup \rho ı \alpha v)$ ). Here only in the N.T., meaning rather, "by way of coincidence." It is a rare word elsewhere and in late writers like Hippocrates. It is from the verb $\sigma \cup \gamma к \cup \rho \varepsilon \omega$, though $\sigma \cup \gamma \kappa v \rho \eta \sigma ı$ is more common.

Was going down ( $\kappa \alpha \tau \varepsilon \beta \alpha \iota v \varepsilon)$ ). Imperfect active as in verse 30. Passed by on the other side ( $\alpha v \tau \iota \pi \alpha \rho \eta \lambda \theta \varepsilon v$ ). Second aorist active indicative of $\alpha v \tau \iota \pi \alpha \rho \varepsilon \rho \chi \circ \mu \alpha$, a late double compound here (verses 31,32 ) only in the N.T., but in the papyri and late writers. It is the ingressive aorist ( $\eta \lambda \theta \varepsilon v$ ), came alongside ( $\pi \alpha \rho \alpha$ ), and then he stepped over to the opposite side ( $\alpha v \tau$ ) of the road to avoid ceremonial contamination with a stranger. A vivid and powerful picture of the vice of Jewish ceremonial cleanliness at the cost of moral principle and duty. The Levite in verse 32 behaved precisely as the priest had done and for the same reason.

Luke 10:33
A certain Samaritan ( $\Sigma a \mu \alpha \rho \varepsilon \iota \tau \eta \varsigma \delta \varepsilon \tau \iota \varsigma)$. Of all men in the world to do a neighbourly act!

As he journeyed (o $\delta \varepsilon v \omega v$ ). Making his way.
Came where he was ( $\eta \lambda \theta \varepsilon v$ кat' avtov). Literally, "came down upon him." He did not sidestep or dodge him, but had compassion on him.

Luke 10:34
Bound up his wounds ( $\kappa \alpha \tau \varepsilon \delta \eta \sigma \varepsilon v \tau \alpha \tau \rho \alpha \nu \mu \alpha \tau \alpha)$. First aorist active indicative of $\kappa \alpha \tau \alpha \delta \varepsilon \omega$, old verb, but here only in the N.T. The verb means "bound down." We say "bind up." Medical detail that interested Luke. The word for "wounds" ( $\tau \rho \alpha v \mu \alpha \tau \alpha)$ here only in the N.T.

Pouring on them oil and wine ( $\varepsilon \pi \downarrow \chi \varepsilon \omega v \varepsilon \lambda \alpha \ldots v \kappa \alpha$ oovov). Old verb again, but here only in the N.T. Oil and wine were household remedies even for wounds (soothing oil, antiseptic alcohol). Hippocrates prescribed for ulcers: "Bind with soft wool, and sprinkle with wine and oil."

Set him ( $\varepsilon \pi \imath \beta \curlywedge \beta \alpha \sigma \alpha \varsigma)$. An old verb $\varepsilon \pi \imath \beta \iota \beta \alpha \zeta \omega(\varepsilon \pi, \beta \iota \beta \alpha \zeta \omega)$, to cause to mount. In the N.T. only here and Ac 19:35; 23:24, common in LXX.

Beast ( $\kappa \tau \eta v o \varsigma)$. Old word from $\kappa \tau \alpha o \mu \alpha$, to acquire, and so property ( $\kappa \tau \eta \mu \alpha$ ) especially cattle or any beast of burden.

An inn ( $\pi \alpha \nu \delta o \chi \varepsilon เ \circ v$ ). The old Attic form was $\pi \alpha v \delta o \kappa \varepsilon เ \rho v$ (from $\pi \alpha \nu$, all, and $\delta \varepsilon \chi \circ \mu \alpha$, to receive). A public place for receiving all comers and a more pretentious caravanserai than a ката $\mathrm{v}_{\mathrm{\mu}} \boldsymbol{\alpha}$ like that in Lu 2:7. Here only in the N.T. There are ruins of two inns about halfway between Bethany and Jericho.

Luke 10:35
On the morrow ( $\varepsilon \pi \tau \eta v$ avpıov). Towards the morrow as in Ac 4:5 . (Cf. also Ac 3:1). Syriac Sinaitic has it "at dawn of the day." An unusual use of $\varepsilon \pi$.

Took out ( $\varepsilon \kappa \beta \alpha \lambda \omega v$ ). Second aorist active participle of $\varepsilon \kappa \beta \alpha \lambda \lambda \omega$. It could mean, "fling out," but probably only means "drew out." Common verb.

Two pence ( $\delta v o \delta \eta \eta v \rho ı \alpha)$. About thirty-five cents, but worth more in purchasing power.
To the host ( $\tau \omega \pi \alpha v \delta o \chi \varepsilon$ ). The innkeeper. Here only in the N.T.

Whatsoever thou spendest more (o av $\pi \rho \circ \sigma \delta \alpha \pi \alpha v \eta \sigma \eta เ \varsigma)$. Indefinite relative clause with $\alpha v$ and the aorist active subjunctive of $\pi \rho \circ \sigma \delta a \pi \alpha v \alpha \omega$, to spend besides ( $\pi \rho \circ \varsigma$ ), a late verb for the common $\pi \rho \circ \sigma \alpha v a \lambda_{\iota} \sigma \kappa \omega$ and here only in the N.T.

I will repay ( $\varepsilon \gamma \mathrm{o} \alpha \pi o \delta \omega \sigma \omega)$. Emphatic. What he had paid was merely by way of pledge. He was a man of his word and known to the innkeeper as reliable.

When I come back again ( $\varepsilon v \tau \omega \varepsilon \pi \alpha v \varepsilon \rho \chi \varepsilon \sigma \theta a \mu \varepsilon$ ). Luke's favourite idiom of $\varepsilon v$ and the articular infinitive with accusative of general reference. Double compound verb $\varepsilon \pi \alpha v \varepsilon \rho \chi \circ \mu \alpha$.

Luke 10:36
Proved neighbour to him that fell ( $\pi \lambda \eta \sigma \iota \circ \gamma \gamma \varepsilon \gamma \circ v \varepsilon v \alpha$ tov $\varepsilon \mu \pi \varepsilon \sigma \circ v \tau o \varsigma)$. Second perfect infinitive of $\gamma เ v o \mu \alpha$ and second aorist active participle of $\varepsilon \mu \pi \iota \pi \tau \omega$. Objective genitive, became neighbour to the one, etc. Jesus has changed the lawyer's standpoint and has put it up to him to decide which of "these three" ( $\tau 0 v \tau \omega \nu \tau \omega \nu \tau \rho I \omega v$, priest, Levite, Samaritan) acted like a neighbour to the wounded man.

Luke 10:37
On him ( $\mu \varepsilon \tau^{\prime}$ avtou). With him, more exactly. The lawyer saw the point and gave the correct answer, but he gulped at the word "Samaritan" and refused to say that.

Do thou ( $\sigma v \pi o เ \varepsilon$ ). Emphasis on "thou." Would this Jewish lawyer act the neighbour to a Samaritan? This parable of the Good Samaritan has built the world's hospitals and, if understood and practised, will remove race prejudice, national hatred and war, class jealousy.

## Luke 10:38

Now as they went on their way ( $\eta \nu \delta \varepsilon \tau \omega \pi$ тор $\varepsilon v \varepsilon \sigma \theta a \alpha 0 \tau \circ \cup \varsigma)$. Luke's favourite temporal clause again as in verse 35 .
 of vло $\delta \varepsilon \chi о \mu \alpha$, an old verb to welcome as a guest (in the N.T. only here and Lu 19:6; Ac 17:7; Jas 2:25 ). Martha is clearly the mistress of the home and is probably the elder sister. There is no evidence that she was the wife of Simon the leper (Joh 12:1f. ). It is curious that in an old cemetery at Bethany the names of Martha, Eleazar, and Simon have been found.

Luke 10:39
Which also sat ( $\eta$ ка $\tau \alpha \rho \alpha к \alpha Ө \varepsilon \sigma \theta \varepsilon ı \sigma \alpha)$. First aorist passive participle of $\pi \alpha \rho \alpha \kappa \alpha \theta \varepsilon \zeta о \mu \alpha$, an old verb, but only here in the N.T. It means to sit beside ( $\pi \alpha \rho \alpha$ ) and $\pi \rho o \varsigma$ means right in front of the feet of Jesus. It is not clear what the point is in $\kappa \alpha$ here. It may mean that Martha loved to sit here also as well as Mary.

Heard ( $\eta$ коuعv). Imperfect active. She took her seat by the feet of Jesus and went on listening to his talk.

Luke 10:40
Was cumbered ( $\pi \varepsilon \rho เ \varepsilon \sigma \pi \alpha \tau 0$ ). Imperfect passive of $\pi \varepsilon \rho ⿺ \sigma \pi \alpha \omega$, an old verb with vivid metaphor, to draw around. One has sometimes seen women whose faces are literally drawn round with anxiety, with a permanent twist, distracted in mind and in looks.

She came up to him $(\varepsilon \pi \iota \sigma \tau \alpha \sigma \alpha)$. Second aorist active participle of $\varepsilon \varphi \iota \sigma \tau \eta \mu$, an old verb to place upon, but in the N.T. only in the middle voice or the intransitive tenses of the active (perfect and second aorist as here). It is the ingressive aorist here and really means. stepping up to or bursting in or upon Jesus. It is an explosive act as is the speech of Martha.

Dost thou not care (ov $\mu \varepsilon \lambda \varepsilon \sigma o$ ). This was a reproach to Jesus for monopolizing Mary to Martha's hurt.

Did leave me ( $\mu \varepsilon \kappa \alpha \tau \varepsilon \lambda \varepsilon \iota \pi \varepsilon v$ ). Imperfect active, she kept on leaving me.
Bid her ( $\varepsilon \iota \pi \circ \nu \alpha v \tau \eta)$. Late form instead of $\varepsilon \iota \pi \varepsilon$, second aorist active imperative, common in the papyri. Martha feels that Jesus is the key to Mary's help.

That she help me (ıva $\mu \circ \sigma v v a v \tau i \lambda \alpha \beta \eta \tau \alpha)$. Sub-final use of $v \alpha \alpha$ with second aorist middle subjunctive of $\sigma v v a v \tau ı \lambda \alpha \mu \beta \alpha \nu o \mu \alpha$, a double compound verb ( $\sigma v \nu$, with, $\alpha \nu \tau$, at her end of the line, and $\lambda \alpha \mu \beta \alpha \nu o \mu \alpha$, middle voice of $\lambda \alpha \mu \beta \alpha \nu \omega$, to take hold), a late compound appearing in the LXX, Diodorus and Josephus. Deissmann (Light from the Ancient East, p. 87) finds it in many widely scattered inscriptions "throughout the whole extent of the Hellenistic world of the Mediterranean." It appears only twice in the N.T. (here and Ro 8:26 ). It is a beautiful word, to take hold oneself (middle voice) at his end of the task ( $\alpha v \tau$ ) together with ( $\sigma \cup v$ ) one.

Luke 10:41
Art anxious ( $\mu \varepsilon \rho \iota \mu \nu \alpha \iota \varsigma)$. An old verb for worry and anxiety from $\mu \varepsilon \rho \iota \zeta \omega$ ( $\mu \varepsilon \rho \iota \varsigma$, part) to be divided, distracted. Jesus had warned against this in the Sermon on the Mount (Mt 6:25,28,31,34. See also Lu 12:11,22,26 ).

And troubled ( $\kappa \alpha \theta о \rho v \beta \alpha \zeta \eta)$. From $\theta$ о $\rho v \beta \alpha \zeta о \mu \alpha$, a verb found nowhere else so far. Many MSS. here have the usual form $\tau v \rho \beta \alpha \zeta \eta$, from $\tau v \rho \beta \alpha \zeta \omega$. Apparently from $\theta$ o $\rho \cup \beta$ о , a common enough word for tumult. Martha had both inward anxiety and outward agitation.

But one thing is needful ( $\varepsilon \nu \circ \varsigma \delta \varepsilon \varepsilon \sigma \tau \iota \nu \chi \rho \varepsilon \iota \alpha)$. This is the reading of A C and may be correct. A few manuscripts have: "There is need of few things." Aleph B L (and Westcott and Hort) have: "There is need of few things or one," which seems like a conflate reading though the readings are all old. See Robertson, Introduction to Textual Criticism of the N.T., p. 190. Jesus seems to say to Martha that only one dish was really necessary for the meal instead of the "many" about which she was so anxious.

Luke 10:42
The good portion ( $\tau \eta v a \gamma \alpha \theta \eta \nu \mu \varepsilon \rho เ \delta \alpha$ ). The best dish on the table, fellowship with Jesus. This is the spiritual application of the metaphor of the dishes on the table. Salvation is not "the good portion" for Martha had that also.

From her ( $\alpha \cup \tau \eta \varsigma)$. Ablative case after $\alpha \varphi \alpha \iota \eta \forall \eta \sigma \varepsilon \tau \alpha$ (future passive indicative). Jesus pointedly takes Mary's side against Martha's fussiness.

## Luke 11

Luke 11:1
As he was praying in a certain place ( $\varepsilon v \tau \omega \varepsilon เ v a \alpha v \tau o v \varepsilon v \tau о \pi \omega \tau \tau \nu \pi \rho \circ \sigma \varepsilon \cup \chi \circ \mu \varepsilon v o v$ ). Characteristically Lukan idiom: $\varepsilon v$ with articular periphrastic infinitive ( $\varepsilon ı \sim \alpha \pi \rho o \sigma \varepsilon v \chi o \mu \varepsilon v o v$ ) with accusative of general reference (avtov).

That . Not in the Greek, asyndeton ( $\kappa \alpha \varepsilon \gamma \varepsilon v \varepsilon \tau 0 ~ \varepsilon ı \pi \varepsilon v$ ).
When he ceased ( $\omega \varsigma \varepsilon \pi \alpha v \sigma \alpha \tau o$ ). Supply $\pi \rho \circ \sigma \varepsilon v \chi \circ \mu \varepsilon v o \varsigma$ (praying), complementary or supplementary participle.

Teach us ( $\delta \iota \delta \alpha \xi$ ov $\eta \mu \alpha \varsigma$ ). Jesus had taught them by precept (Mt 6:7-15) and example (Lu 9:29). Somehow the example of Jesus on this occasion stirred them to fresh interest in the subject and to revival of interest in John's teachings ( $\mathrm{Lu} 5: 33$ ). So Jesus gave them the substance of the Model Prayer in Matthew, but in shorter form. Some of the MSS. have one or all of the phrases in Matthew, but the oldest documents have it in the simplest form. See on Mt 6:7-15 for discussion of these details (Father, hallowed, kingdom, daily bread, forgiveness, bringing us into temptation). In Mt 6:11 "give" is $\delta$ oc (second aorist active imperative second singular, a single act) while here Lu 11:3 "give" is $\delta \iota \delta o v$ (present active imperative, both from $\delta \delta \delta \omega \mu$ ) and means, "keep on giving." So in Lu 11:4 we have "For we ourselves also forgive" (ка $\gamma \alpha \rho \alpha 0 \tau о \alpha \varphi เ \rho \mu \varepsilon v$ ), present active indicative of the late $\omega$ verb $\alpha \varphi \iota \omega$ while Mt 6:12 has "as we also forgave" ( $\omega \varsigma \kappa \alpha \eta \mu \varepsilon ı \varsigma \alpha \varphi \eta \kappa \alpha \mu \varepsilon v$ ), first aorist ( $\kappa$ aorist) active of $\alpha \varphi \iota \eta \mu$. So also where Mt 6:12 has "debts" ( $\tau \alpha$ оч $\varepsilon \lambda \eta \mu \alpha \tau \alpha)$ Lu 11:4 has "sins" ( $\tau \alpha \varsigma ~ \alpha \mu \alpha \rho \tau \iota \alpha \varsigma) . ~ B u t ~$ the spirit of each prayer is the same. There is no evidence that Jesus meant either form to
 $\mu \eta$ in prohibition, ingressive aorist). "Bring us not" is a better translation than "lead us not." There is no such thing as God enticing one to $\sin$ (Jas 1:13). Jesus urges us to pray not to be tempted as in Lu 22:40 in Gethsemane.

Luke 11:5
At midnight ( $\mu \varepsilon \sigma о v \cup \kappa \tau เ o v$ ). Genitive of time.
And say to him ( $\kappa \alpha \varepsilon ו \pi \eta \alpha v \tau \omega$ ). This is the deliberative subjunctive, but it is preceded by two future indicatives that are deliberative also ( $\varepsilon \xi \varepsilon \iota, \pi о \rho \varepsilon \cup \sigma \varepsilon \tau \alpha)$.

Lend me ( $\chi \rho \eta \sigma o v \mu o$ ). First aorist active imperative second singular. Lend me
now . From кıх $\uparrow \eta \mu$, an old verb, to lend as a matter of friendly interest as opposed to $\delta a v \varepsilon \iota \zeta \omega$, to lend on interest as a business. Only here in the N.T.

Luke 11:6
To set before him (o $\pi \alpha \rho \alpha \theta \eta \sigma \omega \alpha v \tau \omega$ ).
Which I shall place beside him . Future active of $\pi \alpha \rho \alpha \tau 1 \theta \eta \mu$. See 9:16 for this same verb.

Luke 11:7

And he (каквıvоৎ). Emphatic.
Shall say ( $\varepsilon ו \pi \eta)$. Still the aorist active deliberative subjunctive as in verse 5 (the same long and somewhat involved sentence).

Trouble me not ( $\mu \eta \mu$ о котоис $\pi \alpha \rho \varepsilon \chi \varepsilon$ ). M $\eta$ and the present imperative active. Literally, "Stop furnishing troubles to me." On this use of котоия $\pi \alpha \rho \varepsilon \chi \omega$ see also Mt 26:10; Mr 14:6; Ga 6:17 and the singular котог, Lu 18:5.

The door is now shut ( $\eta \delta \eta \eta \theta$ upa $\kappa \varepsilon \kappa \lambda \varepsilon \iota \sigma \tau \alpha$ ). Perfect passive indicative, shut to stay shut. Oriental locks are not easy to unlock. From $\kappa \lambda \varepsilon \iota \omega$, common verb.

In bed ( $\varepsilon \varsigma \varsigma \tau \varepsilon \nu$ кoıт $\eta \nu$ ). Note use of $\varepsilon \iota \zeta$ in sense of $\varepsilon v$. Often a whole family would sleep in the same room.

I cannot (ov $\delta v v \alpha \mu \alpha$ ). That is, I am not willing.
Luke 11:8
Though ( $\varepsilon \kappa \alpha$ ). K $\alpha \varepsilon$ would be "Even if," a different idea.
Because he is his friend ( $\delta \iota \alpha$ тo $\varepsilon ı v \alpha$ pi $\lambda$ ov $\alpha v \tau o v$ ). $\Delta \iota \alpha$ and the accusative articular infinitive with accusative of general reference, a causal clause="because of the being a friend of his."

Yet because of his importunity ( $\delta ı \alpha \gamma \varepsilon \tau \eta \sim \alpha v a \iota \delta ı \alpha v \alpha v \tau o v)$. From $\alpha v a \_\delta \eta \varsigma$, shameless, and that from $\alpha$ privative and $\alpha \iota \delta \omega \varsigma$, shame, shamelessness, impudence. An old word, but here alone in the N.T. Examples in the papyri. The use of $\gamma \varepsilon$ here, one of the intensive particles, is to be noted. It sharpens the contrast to "though" by "yet." As examples of importunate prayer Vincent notes Abraham in behalf of Sodom (Ge 18:23-33) and the SyroPhoenician woman in behalf of her daughter (Mt 15:22-28).

Luke 11:9
Shall be opened ( $\alpha v o r \gamma \eta \sigma \varepsilon \tau \alpha$ ). Second future passive third singular of $\alpha v o t \gamma v v \mu$ and the later $\alpha v o l \gamma \omega$.

Luke 11:11
Of which of you that is a father ( $\tau \iota v \alpha \delta \varepsilon \varepsilon \xi \nu \mu \omega v \tau o v \pi \alpha \tau \varepsilon \rho \alpha$ ). There is a decided anacoluthon here. The MSS. differ a great deal. The text of Westcott and Hort makes tov $\pi \alpha \tau \varepsilon \rho \alpha$ (the father) in apposition with $\tau i v \alpha$ (of whom) and in the accusative the object of aıt $\eta \sigma \varepsilon$ (shall ask) which has also another accusative (both person and thing) "a loaf." So far so good. But the rest of the sentence is,
will ye give him a stone? ( $\mu \eta \lambda_{1} \theta o v \varepsilon \pi \iota \delta \omega \sigma \varepsilon \alpha \nu \tau \omega t$;). M $\eta$ shows that the answer No is expected, but the trouble is that the interrogative $\tau i v \alpha$ in the first clause is in the accusative the object of aıt $\eta \sigma \varepsilon$ while here the same man (he) is the subject of $\varepsilon \pi \iota \delta \omega \sigma \varepsilon$. It is a very awkward piece of Greek and yet it is intelligible. Some of the old MSS. do not have the part about "loaf" and "stone," but only the two remaining parts about "fish" and "serpent," "egg" and "scorpion." The same difficult construction is carried over into these questions also.

Luke 11:13

Know how to give（ot $\delta a t \varepsilon \delta \iota \delta o v a)$ ．See on Mt 7：11 for this same saying．Only here Jesus adds the Holy Spirit（ $\pi v \varepsilon v \mu \alpha \alpha \gamma ו \rho v$ ）as the great gift（the summum bonum）that the Father is ready to bestow．Jesus is fond of＂how much more＂（ $\pi 0 \sigma \omega \mu \lambda \lambda \lambda o v$ ，by how much more， instrumental case）．

Luke 11：14
 and $\varepsilon \lambda \alpha \lambda \eta \sigma \varepsilon v$ as often in Luke（no ot or $\kappa \alpha$ ）．

## Luke 11：15

Dumb（ $\kappa \omega \varphi \rho v$ ）．See on Mt 9：32．
By Beelzebub（ $\varepsilon v$ B $\varepsilon \varepsilon 〔 \varepsilon \beta o u \lambda$ ）．Blasphemous accusation here in Judea as in Galilee（Mr 3：22；Mt 12：24，27）．See on Matthew for discussion of the form of this name and the various items in the sin against the Holy Spirit involved in the charge．It was useless to deny the fact of the miracles．So they were explained as wrought by Satan himself，a most absurd explan－ ation．

Luke 11：16
Tempting him（ $\pi \varepsilon\llcorner\rho \alpha \zeta о \nu \tau \varepsilon \varsigma)$ ．These＂others＂（ $\varepsilon \tau \varepsilon \rho \circ$ ）apparently realized the futility of the charge of being in league with Beelzebub．Hence they put up to Jesus the demand for＂a sign from heaven＂just as had been done in Galilee（Mt 12：38）．By＂sign＂（ $\sigma \eta \mu \varepsilon \iota o v$ ）they meant a great spectacular display of heavenly power such as they expected the Messiah to give and such as the devil suggested to Jesus on the pinnacle of the temple．

Sought（ $\varepsilon$ 〔ך $\dagger$ touv）．Imperfect active，kept on seeking．
Luke 11：17
But he（avtoc $\delta \varepsilon$ ）．In contrast with them．
Knowing their thoughts（ $\varepsilon \delta \omega \varsigma \alpha \cup \tau \omega \nu \tau \alpha \delta \iota \alpha v o \eta \mu \alpha \tau \alpha$ ）．From $\delta \iota \alpha v o \varepsilon \omega$ ，to think through or distinguish．This substantive is common in Plato，but occurs nowhere else in the N．T．It means intent，purpose．Jesus knew that they were trying to tempt him．

And a house divided against a house falleth（ка оюкос $\varepsilon \pi$ оюкоv $\pi \iota \pi \tau \varepsilon$ ）．It is not certain that $\delta ı \alpha \mu \varepsilon \rho \iota \sigma \theta \varepsilon \iota \sigma \alpha$（divided）is to be repeated here as in Mt 12：25；Mr 3：25．It may mean，
and house falls upon house ，＂one tumbling house knocking down its neighbour，a graphic picture of what happens when a kingdom is divided against itself＂（Bruce）．

Luke 11：18
Because ye say（ $\circ \tau \lambda \varepsilon \gamma \varepsilon \tau \varepsilon$ ）．Jesus here repeats in indirect discourse（accusative and in－ finitive）the charge made against him in verse 15．The condition is of the first class，determ－ ined as fulfilled．

Luke 11：19
And if I by Beelzebub（ $\varepsilon \delta \varepsilon \varepsilon \gamma \omega \varepsilon v$ B $\varepsilon \varepsilon 〔 \varepsilon \beta o v \lambda$ ）．Also a condition of the first class，de－ termined as fulfilled．A Greek condition deals only with the statement，not with the actual facts．For sake of argument，Jesus here assumes that he casts out demons by Beelzebub．The
conclusion is a reductio ad absurdum. The Jewish exorcists practiced incantations against demons (Ac 19:13).

Luke 11:20
By the finger of God ( $\varepsilon v \delta \alpha \kappa \tau \nu \lambda \omega \theta \varepsilon \sigma v$ ). In distinction from the Jewish exorcists. Mt 12:28 has "by the Spirit of God."

Then is come ( $\alpha \rho \alpha \varepsilon \varphi \theta \alpha \sigma \varepsilon v$ ). $\Phi \theta \alpha v \omega$ in late Greek comes to mean simply to come, not to come before. The aorist indicative tense here is timeless. Note $\alpha \rho \alpha$ (accordingly) in the conclusion ( $\alpha \pi$ обобıৎ).

Luke 11:21
Fully armed ( $\kappa \alpha \theta \omega \pi \lambda \iota \sigma \mu \varepsilon \nu \circ \varsigma)$. Perfect passive participle of $\kappa \alpha \theta$ o $\pi \lambda \iota \zeta \omega$, an old verb, but here only in the N.T. Note perfective use of $\kappa \alpha \tau \alpha$ in composition with o $\pi \lambda \iota \zeta \omega$, to arm (from o $\pi \lambda \alpha$, arms). Note indefinite temporal clause ( $o \tau \alpha \nu$ and present subjunctive $\varphi v \lambda \alpha \sigma \sigma \eta$ ).

His own court ( $\tau \eta v$ عav $\frac{1}{}$ ov $\alpha v \lambda \eta v$ ). His own homestead. Mr 3:27; Mt 12:29 has "house" (oıкı $\alpha v$ ). $A v \lambda \eta$ is used in the N.T. in various senses (the court in front of the house, the court around which the house is built, then the house as a whole).

His goods ( $\tau \alpha v \pi \alpha \rho \chi o v \tau \alpha \alpha v \tau 0 v)$. "His belongings." Neuter plural present active participle of $v \pi \alpha \rho \chi \omega$ used as substantive with genitive.

Luke 11:22
But when ( $\varepsilon \pi \alpha \nu \delta \varepsilon$ ). Note o $\tau \alpha v$ in verse 21.
Stronger than he (ı $\sigma \cup \rho \circ \tau \varepsilon \rho \circ \varsigma \alpha \cup \tau \circ v$ ). Comparative of $ו \sigma \chi \cup \rho \circ \varsigma$ followed by the ablative.
Come upon him and overcome him ( $\varepsilon \pi \varepsilon \lambda \theta \omega \nu \nu \iota \kappa \eta \sigma \eta \alpha v \tau o v)$. Second aorist active participle of $\varepsilon \pi \varepsilon \rho \chi \circ \mu \alpha$ and first aorist active subjunctive of $v \iota \kappa \alpha \omega$. Aorist tense here because a single onset while in verse 22 the guarding ( $\varphi \cup \lambda \alpha \sigma \sigma \eta$, present active subjunctive) is continuous.

His whole armour ( $\tau \eta \nu \pi \alpha \nu o \pi \lambda \iota a \nu \alpha v \tau o v$ ). An old and common word for all the soldier's outfit (shield, sword, lance, helmet, greaves, breastplate). Tyndale renders it "his harness." In the N.T. only here and Eph 6:11,13 where the items are given.

Wherein he trusted ( $\varepsilon \varphi^{\prime} \eta \varepsilon \pi \varepsilon \pi \sigma \theta \varepsilon$ ). Second past perfect active of $\pi \varepsilon \iota \theta \omega$, to persuade. The second perfect $\pi \varepsilon \pi o \iota \theta \alpha$ is intransitive, to trust. Old and common verb. He trusted his weapons which had been so efficacious.

His spoils ( $\tau \alpha \sigma \kappa \cup \lambda \alpha \alpha v \tau o v)$. It is not clear to what this figure refers. Strong as Satan is Jesus is stronger and wins victories over him as he was doing then. In Col 2:15 Christ is pictured as triumphing openly over the powers of evil by the Cross.

Luke 11:23
He that is not with me (o $\mu \eta \omega \nu \mu \varepsilon \tau^{\prime} \varepsilon \mu \mathrm{ov}$ ). This verse is just like Mt 12:30.
Luke 11:24
And finding none ( $\kappa \alpha \mu \eta \varepsilon v \rho \iota \sigma \kappa o v$ ). Here Mt 12:43 has $\kappa \alpha$ ov $\chi \varepsilon \cup \rho \iota \sigma \kappa \varepsilon$ (present active indicative instead of present active participle). Lu 11:24-26 is almost verbatim like Mt

12:43-45, which see. Instead of just "taketh" ( $\pi \alpha \rho \alpha \lambda \alpha \mu \beta a v \varepsilon$ ) in verse 26, Matthew has "taketh with himself" ( $\pi \alpha \rho \alpha \lambda \alpha \mu \beta \alpha v \varepsilon \mu \varepsilon \theta^{\prime}$ عavтou). And Luke omits: "Even so shall it be also unto this evil generation" of Mt 12:45.

Than the first ( $\tau \omega v \pi \rho \omega \tau \omega v$ ). Ablative case after the comparative $\chi \varepsilon \rho \rho o v a$. The seven demons brought back remind one of the seven that afflicted Mary Magdalene (Lu 8:2).

Luke 11:27
As he said these things ( $\varepsilon v \tau \omega \lambda \varepsilon \gamma \varepsilon I v$ avtov). Luke's common idiom, $\varepsilon v$ with articular infinitive. Verses 27,28 are peculiar to Luke. His Gospel in a special sense is the Gospel of Woman. This woman "speaks well, but womanly" (Bengel). Her beatitude ( $\mu \alpha \kappa \alpha \rho ı \alpha)$ reminds us of Elisabeth's words (Lu 1:42, $\varepsilon \cup \lambda \neq \gamma \eta \mu \varepsilon v \eta$ ). She is fulfilling Mary's own prophecy in 1:48 ( $\mu \alpha \kappa \alpha \rho \stackrel{v}{ } \sigma \iota \nu \mu \varepsilon$, shall call me happy).

Luke 11:28
But he said ( $\alpha \cup \tau 0 \varsigma \delta \varepsilon \varepsilon I \pi \varepsilon v$ ). Jesus in contrast turns attention to others and gives them a beatitude ( $\mu \alpha к \alpha \rho ь) . ~ " T h e ~ o r i g i n a l i t y ~ o f ~ C h r i s t ' s ~ r e p l y ~ g u a r a n t e e s ~ i t s ~ h i s t o r i c a l ~ c h a r a c t e r . ~$ Such a comment is beyond the reach of an inventor" (Plummer).

## Luke 11:29

Were gathering together unto him ( $\varepsilon \pi \alpha \theta \rho \circ \iota \zeta о \mu \varepsilon v \omega v$ ). Genitive absolute present middle participle of $\varepsilon \pi \alpha \theta \rho o \iota \zeta \omega$, a rare verb, Plutarch and here only in the N.T., from $\varepsilon \pi$ and $\alpha \theta \rho o \iota \zeta \omega$ (a common enough verb). It means to throng together ( $\alpha \theta \rho o o \varsigma$, in throngs). Vivid picture of the crowds around Jesus.

But the sign of Jonah ( $\varepsilon \mu \eta$ тo $\sigma \eta \mu \varepsilon \iota \nu \mathrm{I} \omega v \alpha$ ). Luke does not give here the burial and resurrection of Jesus of which Jonah's experience in the big fish was a type (Mt 12:39ff. ), but that is really implied (Plummer argues) by the use here of "shall be given" ( $\delta$ o $\eta \quad \sigma \varepsilon \tau \alpha)$ and "shall be" ( $\varepsilon \sigma \tau \alpha)$, for the resurrection of Jesus is still future. The preaching of Jesus ought to have been sign enough as in the case of Jonah, but the resurrection will be given. Luke's report is much briefer and omits what is in Mt 12:41 .

Luke 11:31
With the men of this generation ( $\mu \varepsilon \tau \alpha \tau \omega \nu \alpha v \delta \rho \omega \nu \tau \eta \varsigma \gamma \varepsilon v \varepsilon \alpha \varsigma \tau \alpha \nu \tau \eta \varsigma)$. Here Mt 12:42 has simply "with this generation," which see.

Luke 11:32
 12:41. Luke inserts the words about the Queen of the South (31) in between the discussion
 after the comparative $\pi \lambda \varepsilon \iota \circ$ (more,
something more ).
Luke 11:33
In a cellar ( $\varepsilon ા \varsigma \kappa \rho \cup \pi \tau \eta \nu$ ). A crypt (same word) or hidden place from $\kappa \rho \cup \pi \tau \omega$, to hide. Late and rare word and here only in the N.T. These other words (lamp, $\lambda u \chi$ vov, bushel,
$\mu \mathrm{o}$ ıov，stand，$\lambda \mathrm{u} \chi$ viav）have all been discussed previously（Mt 5：15 ）．Lu 11：33 is like Mt 6：22f．，which see for details．

Luke 11：35
Whether not（ $\mu \eta$ ）．This use of $\mu \eta$ in an indirect question is good Greek（Robertson， Grammar，p．1045）．It is a pitiful situation if the very light is darkness．This happens when the eye of the soul is too diseased to see the light of Christ．

Luke 11：36
With its bright shining（ $\tau \eta \alpha \sigma \tau \rho \alpha \pi \eta$ ）．Instrumental case，as if by a flash of lightning the light is revealed in him．See on 10：18．

Luke 11：37
Now as he spake（ $\varepsilon v \delta \varepsilon \tau \omega \lambda \alpha \lambda \eta \sigma \alpha$ ）．Luke＇s common idiom，$\varepsilon v$ with the articular infin－ itive（aorist active infinitive）but it does not mean＂after he had spoken＂as Plummer argues， but simply＂in the speaking，＂no time in the aorist infinitive．See 3：21 for similar use of aorist infinitive with $\varepsilon v$ ．

Asketh（ $\varepsilon \rho \omega \tau \alpha$ ）．Present active indicative，dramatic present．Request，not question．
To dine（o $\pi \omega \varsigma \alpha \rho \iota \sigma \tau \eta \sigma \eta$ ）．Note $o \pi \omega \varsigma$ rather than the common $v \alpha \alpha$ ．Aorist active sub－ junctive rather than present，for a single meal．The verb is from apıotov（breakfast）．See distinction between apıб⿱亠䒑ov and $\delta \varepsilon ı \pi v o v$（dinner or supper）in Lu 14：12．It is the morning meal（breakfast or lunch）after the return from morning prayers in the synagogue（Mt 22：4 ），not the very early meal called $\alpha к \rho \alpha \tau \iota \sigma \mu$ ．The verb is，however，used for the early meal on the seashore in Joh 21：12，15 ．

With him（ $\pi \alpha \rho^{\prime} \alpha \cup \tau \omega$ ）．By his side．
Sat down to meat（ $\alpha v \varepsilon \pi \varepsilon \sigma \varepsilon v$ ）．Second aorist active indicative of $\alpha v a \pi \iota \pi \tau \omega$ ，old verb， to recline，to fall back on the sofa or lounge．No word here for＂to meat．＂

Luke 11：38
That he had not first washed before dinner（oт ov $\pi \rho \omega \tau \tau v \varepsilon \beta \alpha \pi \tau \iota \sigma \theta \eta \pi \rho \circ$ тov $\alpha \rho \iota \tau \tau \circ v$ ）． The verb is first aorist passive indicative of $\beta a \pi \tau \iota \zeta \omega$ ，to dip or to immerse．Here it is applied to the hands．It was the Jewish custom to dip the hands in water before eating and often between courses for ceremonial purification．In Galilee the Pharisees and scribes had sharply criticized the disciples for eating with unwashed hands（Mr 7：1－23；Mt 15：1－20）when Jesus had defended their liberty and had opposed making a necessity of such a custom（tradition） in opposition to the command of God．Apparently Jesus on this occasion had himself reclined at the breakfast（not dinner）without this ceremonial dipping of the hands in water．The Greek has＂first before＂（ $\pi \rho \omega \tau \sigma \nu \pi \rho o$ ），a tautology not preserved in the translation．

Luke 11：39
The Lord（о кирьос）．The Lord Jesus plainly and in the narrative portion of Luke．
Now（vvv）．Probably refers to him．You Pharisees do now what was formerly done．

The platter ( $\tau$ ои $\pi$ เvaкоऽ). The dish. Old word, rendered "the charger" in Mt 14:8 . Another word for "platter" ( $\pi \alpha \rho \circ \psi ı \varsigma)$ in Mt 23:25 means "side-dish."

But your inward part ( $\tau 0 \delta \varepsilon \varepsilon \sigma \omega \theta \varepsilon v v \mu \omega v$ ). The part within you (Pharisees). They keep the external regulations, but their hearts are full of plunder ( $\alpha \rho \pi \alpha ү \eta \varsigma$, from $\alpha \rho \pi \alpha \zeta \omega$, to seize) and wickedness ( $\pi$ огทрıа¢, from $\pi$ огท $\rho \circ \varsigma$, evil man). See Mt 23:25 for a like indictment of the Pharisees for care for the outside of the cup but neglect of what is on the inside. Both inside and outside should be clean, but the inside first.

Luke 11:40
Howbeit ( $\pi \lambda \eta \nu$ ). See Lu 6:24. Instead of devoting so much attention to the outside.
Those things which are within ( $\tau \alpha \varepsilon v o v \tau \alpha$ ). Articular neuter plural participle from $\varepsilon v \varepsilon \mu$, to be in, common verb. This precise phrase only here in the N.T. though in the papyri, and it is not clear what it means. Probably, give as alms the things within the dishes, that is have inward righteousness with a brotherly spirit and the outward becomes "clean" ( $\kappa \alpha \theta \alpha \rho \alpha$ ). Properly understood, this is not irony and is not Ebionism, but good Christianity (Plummer).

Luke 11:42
Tithe ( $\alpha \pi о \delta \varepsilon \kappa \alpha \tau о v \tau \varepsilon)$. Late verb for the more common $\delta \varepsilon \kappa \alpha \tau \varepsilon v \omega$. So in Mt 23:23. Take a tenth off ( $\alpha \pi 0-$ ). Rue ( $\pi \eta \gamma \alpha v o v$ ). Botanical term in late writers from $\pi \eta \gamma v v \mu$, to make fast because of its thick leaves. Here Mt 23:23 has "anise."

Every herb ( $\pi \alpha v \lambda \alpha \chi \alpha v o v$ ). General term as in Mr 4:32. Matthew has "cummin."
Pass by ( $\pi \alpha \rho \varepsilon \rho \chi \varepsilon \sigma \theta \varepsilon$ ). Present middle indicative of $\pi \alpha \rho \varepsilon \rho \chi \circ \mu \alpha$, common verb, to go by or beside. Mt 23:23 has "ye have left undone" ( $\alpha \varphi \eta \kappa \alpha \tau \varepsilon$ ). Luke here has "love" ( $\alpha \gamma \alpha \pi \eta \nu$ ), not in Matthew.

Ought ( $\varepsilon \delta \varepsilon$ ). As in Matthew. Imperfect of a present obligation, not lived up to just like our "ought" (ow $\delta$, not paid). Парєıva, as in Matthew, the second aorist active infinitive of $\alpha \varphi ı \eta \mu$. to leave off. Common verb. Luke does not have the remark about straining out the gnat and swallowing the camel (Mt 23:34). It is plain that the terrible exposure of the scribes and Pharisees in Mt 23 in the temple was simply the culmination of previous conflicts such as this one.

Luke 11:43
The chief seats in the synagogues ( $\tau \eta v \pi \rho \omega \tau$ ок $\alpha \theta \varepsilon \delta \rho ı \alpha v \varepsilon v \tau \alpha ı \varsigma \sigma v v \alpha \gamma \omega \gamma \alpha \iota \varsigma)$. Singular here, plural in Mt 23:6. This semi-circular bench faced the congregation. Mt 23:6 has also the chief place at feasts given by Luke also in that discourse ( $20: 46$ ) as well as in 14:7, a marked characteristic of the Pharisees.

Luke 11:44
The tombs which appear not ( $\tau \alpha \mu \nu \eta \nu \varepsilon ı \alpha \tau \alpha \delta \eta \lambda \alpha$ ). These hidden graves would give ceremonial defilement for seven days ( $\mathrm{Nu} 19: 16$ ). Hence they were usually whitewashed as a warning. So in Mt 23:27 the Pharisees are called "whited sepulchres." Men do not know
how rotten they are. The word $\alpha \delta \eta \lambda o \varsigma$ ( $\alpha$ privative and $\delta \eta \lambda o \varsigma$, apparent or plain) occurs in the N.T. only here and 1Co $14: 8$, though an old and common word.

Here men walking around ( $\pi \varepsilon \rho \iota \pi \alpha \tau o u v \tau \varepsilon \varsigma)$ walk over the tombs without knowing it. These three woes cut to the quick and evidently made the Pharisees wince.

## Luke 11:45

Thou reproachest us also ( $\kappa \alpha \eta \mu \alpha \varsigma \nu \beta \rho \iota(\varepsilon ı \varsigma)$. Because the lawyers (scribes) were usually Pharisees. The verb $v \beta \rho \iota \zeta \omega$ is an old one and common for outrageous treatment, a positive insult (so Lu 18:32; Mt 22:6; Ac 14;5; 1Th 2:2 ). So Jesus proceeds to give the lawyers three woes as he had done to the Pharisees.

Luke 11:46
Grievous to be borne ( $\delta v \sigma \beta a \sigma \tau \alpha \kappa \tau \alpha$ ). A late word in LXX and Plutarch ( $\delta v \varsigma$ and $\beta \alpha \sigma \tau \alpha \zeta \omega)$. Here alone in text of Westcott and Hort who reject it in Mt 23:4 where we have "heavy burdens" ( $\varphi$ о $\tau \tau \alpha \beta \alpha \rho \varepsilon \alpha)$ ). In Gal 6:2 we have $\beta$ ap $\eta$ with a distinction drawn. Here we have $\varphi$ ортıЦєтє (here only in the N.T. and Mt 11:28) for "lade," $\varphi$ ортıа as cognate accusative and then $\varphi$ ортıos (dative after ou $\pi \rho \circ \sigma \psi \alpha \cup \varepsilon \tau \varepsilon$, touch not). It is a fierce indictment of scribes (lawyers) for their pettifogging interpretations of the written law in their oral teaching (later written down as Mishna and then as Gemarah), a terrible load which these lawyers did not pretend to carry themselves, not even "with one of their fingers" to "touch" ( $\pi \rho \circ \sigma \psi \alpha v \omega$, old verb but only here in the N.T.), touch with the view to remove. Mt 23:4 has $\kappa ı \nu \eta \sigma \alpha$, to move. A physician would understand the meaning of $\pi \rho \circ \sigma \pi \alpha \nu \omega$ for feeling gently a sore spot or the pulse.

Luke 11:48
Consent ( $\sigma \cup v \varepsilon \cup \delta$ oкعıtє). Double compound ( $\sigma \cup v, \varepsilon v, \delta о \kappa \varepsilon \omega$ ), to think well along with others, to give full approval. A late verb, several times in the N.T., in Ac 8:1 of Saul's consenting to and agreeing to Stephen's death. It is a somewhat subtle, but just, argument made here. Outwardly the lawyers build tombs for the prophets whom their fathers (forefathers) killed as if they disapproved what their fathers did. But in reality they neglect and oppose what the prophets teach just as their fathers did. So they are "witnesses" ( $\mu \alpha \rho \tau \cup \rho \varepsilon \varsigma)$ against themselves (Mt 23:31).

Luke 11:49
The wisdom of God ( $\eta$ борıa tov $\theta$ zov). In Mt 23:34 Jesus uses "I send" ( $\varepsilon \gamma \omega$ $\alpha \pi \operatorname{\sigma } \sigma \tau \varepsilon \lambda \lambda \omega)$ without this phrase "the wisdom of God." There is no book to which it can refer. Jesus is the wisdom of God as Paul shows (1Co 1:30), but it is hardly likely that he so describes himself here. Probably he means that God in his wisdom said, but even so "Jesus here speaks with confident knowledge of the Divine counsels" (Plummer). See Lu 10:22; 15:7,10 . Here the future tense occurs, "I will send" ( $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \omega$ ).

Some of them ( $\varepsilon \xi \alpha \cup \tau \omega v$ ). No "some" ( $\tau \imath v \alpha \varsigma)$ in the Greek, but understood. They will act as their fathers did. They will kill and persecute.

Luke 11:50
That ... may be required ( $\llcorner v \alpha \ldots \varepsilon \kappa \zeta \eta \tau \eta \theta \eta$ ). Divinely ordered sequence, first aorist passive subjunctive of $\varepsilon \kappa\lceil\eta \tau \varepsilon \omega$, a late and rare verb outside of LXX and N.T., requiring as a debt the blood of the prophets.

Which was shed (то $\varepsilon \kappa \kappa \varepsilon \chi \cup \mu \varepsilon v o v$ ). Perfect passive participle of $\varepsilon \kappa \chi \varepsilon \omega$ and $\varepsilon \kappa \chi \cup v v \omega$ (an Aeolic form appearing in the margin of Westcott and Hort here, $\varepsilon \kappa \chi \cup v v o \mu \varepsilon v o v$, present passive participle). If the present passive is accepted, it means the blood which is perpetually shed from time to time.

From the foundation of the world ( $\alpha \pi$ к кат $\alpha \beta$ о $\eta \varsigma ~ к о \sigma \mu о v) . ~ S e e ~ a l s o ~ M t ~ 25: 34 ; ~ J o h ~$ 17:24; Eph 1:4 , etc. It is a bold metaphor for the purpose of God.

Luke 11:51
From the blood of Abel to the blood of Zachariah ( $\alpha \pi о ~ \alpha \mu \alpha \tau о \varsigma ~ A \beta \varepsilon \lambda ~ \varepsilon \omega \varsigma ~ а \mu \alpha \tau о \varsigma, ~$ Zaxapıov). The blood of Abel is the first shed in the Old Testament (Ge 4:10), that of Zacharias the last in the O.T. canon which ended with Chronicles (2Ch 24:22). Chronologically the murder of Uriah by Jehoiakim was later (Jer 26:23 ), but this climax is from Genesis to II Chronicles (the last book in the canon). See on Mt 23:35 for discussion of Zachariah as "the son of Barachiah" rather than "the son of Jehoiada."

Between the altar and the sanctuary ( $\mu \varepsilon \tau \alpha \xi \cup$ тov Өvбıaбтпрıо ка тоט оюкоv). Literally, between the altar and the house (Mt 23:35 has temple, vaou).

Luke 11:52
Ye took away the key of knowledge ( $\eta \rho \alpha \tau \varepsilon \tau \eta \nu \kappa \lambda \varepsilon เ \delta \alpha \sim \eta \varsigma \gamma \nu \omega \sigma \varepsilon \omega \varsigma$ ). First aorist active indicative of aı $\rho \omega$, common verb. But this is a flat charge of obscurantism on the part of these scribes (lawyers), the teachers (rabbis) of the people. They themselves (avto) refused to go into the house of knowledge (beautiful figure) and learn. They then locked the door and hid the key to the house of knowledge and hindered ( $\varepsilon \kappa \omega \lambda \nu \sigma \alpha \tau \varepsilon$, effective aorist active) those who were trying to enter ( $\tau 0 \cup \varsigma \varepsilon เ \sigma \varepsilon \rho \chi \circ \mu \varepsilon v o v \varsigma$, present participle, conative action). It is the most pitiful picture imaginable of blind ecclesiastics trying to keep others as blind as they were, blind leaders of the blind, both falling into the pit.

Luke 11:53
From thence ( $\kappa$ ' $\alpha \kappa \varepsilon \theta \varepsilon v)$. Out of the Pharisee's house. What became of the breakfast we are not told, but the rage of both Pharisees and lawyers knew no bounds.

To press upon him ( $\varepsilon v \varepsilon \chi \varepsilon เ v)$. An old Greek verb to hold in, to be enraged at, to have it in for one. It is the same verb used of the relentless hatred of Herodias for John the Baptist (Mr 6:19).

To provoke him to speak ( $\alpha \pi \sigma \sigma \tau o \mu \alpha \tau \iota \zeta \varepsilon \downarrow v)$. From $\alpha \pi o$ and $\sigma \tau o \mu \alpha$ (mouth). Plato uses it of repeating to a pupil for him to recite from memory, then to recite by heart (Plutarch). Here (alone in the N.T.) the verb means to ply with questions, to entice to answers, to catechize.

Of many things ( $\pi \varepsilon \rho \pi \lambda \varepsilon \iota o v \omega v)$ ) "Concerning more (comparative) things." They were stung to the quick by these woes which laid bare their hollow hypocrisy.

Luke 11:54
Laying wait for him ( $\varepsilon v \varepsilon \delta \rho \varepsilon v o v \tau \varepsilon \varsigma ~ \alpha v \tau o v)$. An old verb from $\varepsilon v$ and $\varepsilon \delta \rho \alpha$, a seat, so to lie in ambush for one. Here only and Ac 23:21 in the N.T. Vivid picture of the anger of these rabbis who were treating Jesus as if he were a beast of prey.

To catch something out of his mouth ( $\theta \eta \rho \varepsilon v \sigma \alpha$ то $\varepsilon \kappa$ тоv $\sigma \tau о \mu \alpha \tau о \varsigma ~ \alpha \cup \tau о v)$. An old Greek verb, though here only in the N.T., from $\theta \eta \rho \alpha$ (cf. Ro 11:9), to ensnare, to catch in hunting, to hunt. These graphic words from the chase show the rage of the rabbis toward Jesus. Luke gives more details here than in 20:45-47; Mt 23:1-7 , but there is no reason at all why Jesus should not have had this conflict at the Pharisee's breakfast before that in the temple in the great Tuesday debate.

## Luke 12

Luke 12:1
In the meantime ( $\varepsilon v$ olc). It is a classic idiom to start a sentence or even a paragraph as here with a relative, "in which things or circumstances," without any expressed antecedent other than the incidents in 11:53f. In 12:3 Luke actually begins the sentence with two relatives $\alpha v \theta^{\prime} \omega v$ oo $\alpha$ (wherefore whatsoever).

Many thousands ( $\mu \nu \rho \iota \alpha \delta \omega v$ ). Genitive absolute with $\varepsilon \pi \iota \sigma v v \alpha \chi \theta \varepsilon \iota \sigma \omega v$ (first aorist passive participle feminine plural because of $\mu \nu \rho \iota \alpha \delta \omega v)$, a double compound late verb, $\varepsilon \pi เ \sigma v v a \gamma \omega$, to gather together unto. The word "myriads" is probably hyperbolical as in Ac 21:20, but in the sense of ten thousand, as in Ac 19:19, it means a very large crowd apparently drawn together by the violent attacks of the rabbis against Jesus.

Insomuch that they trode one upon another ( $\omega \sigma \tau \varepsilon \kappa \alpha \tau \alpha \pi \alpha \tau \varepsilon เ v ~ a \lambda \lambda \eta \lambda o u \varsigma)$. The imagination must complete the picture of this jam.

Unto his disciples first of all ( $\pi \rho \circ \varsigma \tau о \cup \varsigma \mu \alpha \theta \eta \tau \alpha \varsigma \alpha \cup \tau \circ v \pi \rho \omega \tau \sigma v$ ). This long discourse in Lu 12 is really a series of separate talks to various groups in the vast crowds around Jesus. This particular talk goes through verse 12 .

Beware of ( $\pi \rho \circ \sigma \varepsilon \chi \varepsilon \tau \varepsilon \varepsilon \alpha \cup \tau о \iota \varsigma \alpha \pi 0$ ). Put your mind (vouv understood) for yourselves (dative) and avoid ( $\alpha \pi 0$ with the ablative).

The leaven of the Pharisees which is hypocrisy ( $\tau \eta \zeta \zeta \nu \mu \eta \varsigma \eta \tau \iota \varsigma \varepsilon \sigma \tau \iota v$ v vохрıбє $\tau \omega \nu$ Фарıбaı $\omega v$ ). In Mr 8:15 Jesus had coupled the lesson of the Pharisees with that of Herod, in Mt 16:6 with that of the Sadducees also. He had long ago called the Pharisees hypocrites (Mt 6:2,5,16 ). The occasion was ripe here for this crisp saying. In Mt 13:33 leaven does not have an evil sense as here, which see. See Mt 23:13 for hypocrites. Hypocrisy was the leading Pharisaic vice (Bruce) and was a mark of sanctity to hide an evil heart.

Luke 12:2
Covered up ( $\sigma \cup \gamma \kappa \varepsilon \kappa \alpha \lambda \nu \mu \mu \varepsilon v o v \varepsilon \sigma \tau \iota v$ ). Periphrastic perfect passive indicative of $\sigma \cup \gamma \kappa \alpha \lambda \nu \pi \tau \omega$, an old verb, but here only in the N.T., to cover up on all sides and so completely. Verses 2-9 here are parallel with Mt 10:26-33 spoken to the Twelve on their tour of Galilee, illustrating again how often Jesus repeated his sayings unless we prefer to say that he never did so and that the Gospels have hopelessly jumbled them as to time and place. See the passage in Matthew for discussion of details.

Luke 12:3
In the inner chambers ( $\varepsilon v \tau o \iota \varsigma \tau \alpha \mu \varepsilon ı o \iota)$ ). Old form $\tau \alpha \mu ı \varepsilon ו \circ v$, a store chamber (Lu 12:24 ), secret room (Mt 6:6; Lu 12:3).

Luke 12:4
Unto you my friends ( $\nu \mu \nu \nu$ тoı $\varphi \iota \lambda$ oı $)$. As opposed to the Pharisees and lawyers in 11:43,46,53.

Be not afraid of ( $\mu \eta \varphi \circ \beta \eta \theta \eta \tau \varepsilon \alpha \pi \sigma$ ). First aorist passive subjunctive with $\mu \eta$, ingressive aorist, do not become afraid of, with $\alpha \pi$ and the ablative like the Hebrew min and the English "be afraid of," a translation Hebraism as in Mt 10:28 (Moulton, Prolegomena, p. 102).

Have no more that they can do ( $\mu \eta \varepsilon \chi \circ \nu \tau \omega \nu \pi \varepsilon \rho เ \sigma \sigma o \tau \varepsilon \rho \circ \nu \tau \pi \sigma \neq \sigma \alpha$ ). Luke often uses the infinitive thus with $\varepsilon \chi \omega$, a classic idiom ( $7: 40,42 ; 12: 4,50 ; 14: 14 ;$ Ac $4: 14$, etc.).

Luke 12:5
Whom ye shall fear ( $\tau \iota v \alpha \varphi \circ \beta \eta \theta \eta \tau \varepsilon$ ). First aorist passive subjunctive deliberative retained in the indirect question. Tiva is the accusative, the direct object of this transitive passive verb (note $\alpha \pi$ o in verse 4).

Fear him who ( $\varphi \circ \beta \eta \theta \eta \tau \varepsilon \tau o v)$. First aorist passive imperative, differing from the preceding form only in the accent and governing the accusative also.

After he hath killed ( $\mu \varepsilon \tau \alpha$ тo $\alpha \pi о \kappa \tau \varepsilon เ v \alpha$ ). Preposition $\mu \varepsilon \tau \alpha$ with the articular infinitive. Literally, "After the killing" (first aorist active infinitive of the common verb $\alpha \pi о \kappa \tau \varepsilon เ v \omega$, to kill.

Into hell ( $\varepsilon \iota \varsigma \tau \eta v \gamma \varepsilon \varepsilon v v a v)$ ). See on Mt 5:22. Gehenna is a transliteration of Ge-Hinnom, Valley of Hinnon where the children were thrown on to the red-hot arms of Molech. Josiah (2Ki 23:10) abolished these abominations and then it was a place for all kinds of refuse which burned ceaselessly and became a symbol of punishment in the other world.

This one fear ( $\tau$ ov $\tau o v ~ \varphi o \beta \eta \theta \eta \tau \varepsilon$ ). As above.
Luke 12:6
Is forgotten ( $\varepsilon \sigma \tau \iota v \varepsilon \pi i \lambda \varepsilon \lambda \eta \sigma \mu \varepsilon v o v)$. Periphrastic perfect passive indicative of $\varepsilon \pi \iota \lambda \alpha v \theta a v o \mu a$, common verb to forget. See Mt 10:29 for a different construction.

Luke 12:7
Numbered ( $\eta \rho 1 \theta \mu \eta \nu \tau \alpha$ ). Perfect passive indicative. Periphrastic form in Mt 10:30 which see for details about sparrows, etc.

Luke 12:8
Everyone who shall confess me ( $\pi \alpha \varsigma$ oऽ $\alpha v$ о $о$ о $о о \gamma \eta \sigma \varepsilon \varepsilon \varepsilon \varepsilon \mu \mathrm{o}$ ). Just like Mt 10:32 except the use of $\alpha v$ here which adds nothing. The Hebraistic use of $\varepsilon v$ after ouо $\lambda о \boldsymbol{\varepsilon} \varepsilon \omega$ both here and in Matthew is admitted by even Moulton (Prolegomena, p. 104).

The Son of man (o vioc tov $\alpha v \theta \rho \omega \pi$ tov). Here Mt 10:32 has $\kappa^{\prime} \alpha \gamma \omega$ (I also) as the equivalent.

Luke 12:9
Shall be denied ( $\alpha \pi \alpha \rho v \eta \theta \eta \sigma \varepsilon \tau \alpha$ ). First future passive of the compound verb $\alpha \pi \alpha \rho v \varepsilon o \mu \alpha$. Here Mt 10:33 has apvŋбoبa simply. Instead of "in the presence of the angels of God" ( $\varepsilon \mu \pi \rho \circ \sigma \theta \varepsilon v \tau \omega v$ a $\gamma \gamma \varepsilon \lambda \omega \nu$ тov $\theta \varepsilon o v$ ) Mt 10:33 has "before my Father who is in heaven."

Luke 12:10

But unto him that blasphemeth against the Holy Spirit ( $\tau \omega \delta \varepsilon \varepsilon \iota \varsigma \tau o \alpha \gamma \iota v \pi v \varepsilon \cup \mu \alpha$ $\beta \lambda \alpha \sigma \varphi \eta \mu \eta \sigma \alpha \nu \tau)$. This unpardonable sin is given by Mr 3:28f.; Mt 12:31f. immediately after the charge that Jesus was in league with Beelzebub. Luke here separates it from the same charge made in Judea ( $11: 15-20$ ). As frequently said, there is no sound reason for saying that Jesus only spoke his memorable sayings once. Luke apparently finds a different environment here. Note the use of $\varepsilon \iota \varsigma$ here in the sense of "against."

Luke 12:11
Be not anxious ( $\mu \eta \mu \varepsilon \rho \mu \nu \eta \sigma \eta \tau \varepsilon$ ). First aorist active subjunctive with $\mu \eta$ in prohibition. Do not become anxious. See a similar command to the Twelve on their Galilean tour (Mt 10:19f. ) and in the great discourse on the Mount of Olives at the end (Mr 13:11; Lu 21:14f. ), given twice by Luke as we see.

How or what ye shall answer ( $\pi \omega \varsigma \eta \tau \alpha \pi \sigma \lambda o \gamma \eta \sigma \eta \sigma \theta \varepsilon$ ). Indirect question and retaining the deliberative subjunctive $\alpha \pi о \lambda о \gamma \eta \sigma \eta \sigma \theta \varepsilon$ and also $\varepsilon ו \pi \eta \tau \varepsilon$ (say).

Luke 12:12
What ye ought to say ( $\alpha \delta \varepsilon \varepsilon \iota \pi \varepsilon \iota \nu$ ). Literally, what things it is necessary ( $\delta \varepsilon$ ) to say. This is no excuse for neglect in pulpit preparation. It is simply a word for courage in a crisis to play the man for Christ and to trust the issue with God without fear.

Luke 12:13
Bid my brother ( $\varepsilon \iota \pi \varepsilon \tau \omega \alpha \delta \varepsilon \lambda \varphi \omega \mu \mathrm{ov}$ ). This volunteer from the crowd draws attention to the multitude (verses 13-21). He does not ask for arbitration and there is no evidence that his brother was willing for that. He wants a decision by Jesus against his brother. The law (De 21:17) was two-thirds to the elder, one-third to the younger.

Luke 12:14
A judge or a divider ( $\kappa \rho \iota \tau \eta \eta \mu \varepsilon \rho \iota \sigma \tau \eta \nu$ ). Jesus repudiates the position of judge or arbiter in this family fuss. The language reminds one of Ex 2:14. Jesus is rendering unto Caesar the things of Caesar (Lu 20:25) and shows that his kingdom is not of this world (Joh 18:36 ). The word for divider or arbiter ( $\mu \varepsilon \rho \iota \sigma \tau \eta \varsigma)$ is a late word from $\mu \varepsilon \rho \iota \zeta \rho \mu \alpha$ (verse 13) and occurs here only in the N.T.

Luke 12:15
From all covetousness ( $\alpha \pi 0 \pi \alpha \sigma \eta \varsigma \pi \lambda \varepsilon о v \varepsilon \xi, \alpha \varsigma)$. Ablative case. From every kind of greedy desire for more ( $\pi \lambda \varepsilon o v$, more, $\varepsilon \xi ı a$, from $\varepsilon \chi \omega$, to have) an old word which we have robbed of its sinful aspects and refined to mean business thrift.

In the abundance of the things which he possesseth ( $\varepsilon \nu \tau \omega \pi \varepsilon \rho \iota \sigma \sigma \varepsilon v \varepsilon \iota \nu \tau \iota \nu \kappa \tau \omega \nu$ $v \pi \alpha \rho \chi o v \tau \omega \nu \alpha \nu \tau \omega)$. A rather awkward Lukan idiom: "In the abounding (articular infinitive) to one out of the things belonging (articular participle) to him."

Luke 12:16
A parable unto them ( $\pi \alpha \rho \alpha \beta о \lambda \eta \nu \pi \rho \circ \varsigma \alpha v \tau o v \varsigma)$. The multitude of verses 13,15 . A short and pungent parable suggested by the covetousness of the man of verse 13.

Brought forth plentifully ( $\varepsilon \cup \varphi \rho \rho \eta \sigma \varepsilon v$ ). Late word from $\varepsilon \cup \varphi \rho \rho o \varsigma$ (bearing well), in medical writers and Josephus, here only in the N.T.

Luke 12:17
Reasoned within himself ( $\delta \iota \varepsilon \lambda о ү \check{\iota} \tau \sigma \varepsilon \nu \alpha \cup \tau \omega$ ). Imperfect middle, picturing his continued cogitations over his perplexity.

Where to bestow ( $\pi \circ \vee \sigma \cup v \alpha \xi \omega$ ). Future indicative deliberative, where I shall gather together.

My fruits (тоия картоис $\mu \mathbf{\mu}$ ). So it is with the rich fool: my fruits, my barns, my corn, my goods, just like Nabal whose very name means fool (1Sa $25: 11$ ), whether a direct reference to him or not.

Luke 12:18
I will pull down ( $\kappa \alpha \theta \varepsilon \lambda \omega$ ). Future active of $\kappa \alpha \theta \alpha \iota \rho \varepsilon \omega$, an old verb, the usual future being каӨaı $\eta \sigma \omega$. This second form from the second aorist $\kappa \alpha \theta \varepsilon \iota \lambda$ ov (from obsolete $\varepsilon \lambda \omega$ ) like $\alpha \varphi \varepsilon \lambda \varepsilon$ in Re 22:19.

My barns ( $\mu$ ои тац $\alpha \pi о \theta \eta \kappa \alpha \varsigma$ ). From $\alpha \pi о \tau \iota \theta \eta \mu$, to lay by, to treasure. So a granary or storehouse, an old word, six times in the N.T. (Mt 3:12; 6:26; 13:30; Lu 3:17; 12:18,24 ).

All my corn ( $\pi \alpha \vee \tau \alpha$ tov $\sigma \iota \tau o v$ ). Better grain (wheat, barley), not maize or Indian corn.
My goods ( $\tau \alpha \alpha \gamma \alpha \theta \alpha \mu o v$ ). Like the English, my good things. So the English speak of goods (freight) train.

## Luke 12:19

Laid up for many years ( $\kappa \varepsilon \mu \varepsilon v \alpha \varepsilon \iota \varsigma \varepsilon \tau \eta \pi o \lambda \lambda \alpha$ ). Not in D and some other Latin MSS. The man's apostrophe to his "soul" ( $\psi \cup \chi \eta$ ) is thoroughly Epicurean, for his soul feeds on his goods. The asyndeton here (take thine ease, eat, drink, be merry) shows his eagerness. Note difference in tenses (avaravov, keep on resting, $\varphi \alpha \gamma \varepsilon$, eat at once, $\pi \iota \varepsilon$, drink thy fill, عuppaivov, keep on being merry), first and last presents, the other two aorists.

Luke 12:20
Thou foolish one ( $\alpha \varphi \rho \omega v$ ). Fool, for lack of sense ( $\alpha$ privative and $\varphi \rho \eta \nu$, sense) as in 11:40; 2Co 11:19. Old word, used by Socrates in Xenophon. Nominative form as vocative.

Is thy soul required of thee ( $\tau \eta \vee \psi v \chi \eta v \sigma o v$ aıtovoiv a $\pi \sigma \sigma o v$ ). Plural active present, not passive: "They are demanding thy soul from thee." The impersonal plural (aitousin) is common enough (Lu 6:38; 12:11; 16:9; 23:31). The rabbis used "they" to avoid saying "God."

Luke 12:21
Not rich toward God ( $\mu \eta \varepsilon \iota \varsigma \varepsilon \sigma \nu \pi \lambda o u \tau \omega v$ ). The only wealth that matters and that lasts. Cf. 16:9; Mt 6:19f. Some MSS. do not have this verse. Westcott and Hort bracket it.

Luke 12:22
Unto his disciples ( $\pi \rho \circ \varsigma$ тоис $\mu \alpha \forall \eta \tau \alpha \varsigma \alpha \cup \tau о v$ ). So Jesus turns from the crowd to the disciples (verses 22-40, when Peter interrupts the discourse). From here to the end of the chapter Luke gives material that appears in Matthew, but not in one connection as here. In

Matthew part of it is in the charge to the Twelve on their tour in Galilee, part in the eschatological discourse on the Mount of Olives. None of it is in Mark. Hence Q or the Logia seems to be the source of it. The question recurs again whether Jesus repeated on other occasions what is given here or whether Luke has here put together separate discourses as Matthew is held by many to have done in the Sermon on the Mount. We have no way of deciding these points. We can only say again that Jesus would naturally repeat his favourite sayings like other popular preachers and teachers. So Lu 12:22-31 corresponds to Mt 6:25-33 , which see for detailed discussion. The parable of the rich fool was spoken to the crowd, but this exhortation to freedom from care (22-31) is to the disciples. So the language in Lu 12:22 is precisely that in Mt 6:25. See there for $\mu \eta \mu \varepsilon \rho \mu \nu \alpha \tau \varepsilon$ (stop being anxious) and the deliberative subjunctive retained in the indirect question ( $\varphi \alpha \gamma \eta \tau \varepsilon, \varepsilon v \delta v \sigma \eta \sigma \theta \varepsilon)$. So verse 23 here is the same in Mt 6:25 except that there it is a question with oux expecting the affirmative answer, whereas here it is given as a reason ( $\gamma \alpha \rho$, for) for the preceding command.

Luke 12:24
The ravens (тоия коракаৎ). Nowhere else in the N.T. The name includes the whole crow group of birds (rooks and jackdaws). Like the vultures they are scavengers. Mt 6:26 has simply "the birds" ( $\tau \alpha \pi \varepsilon \tau \varepsilon เ v \alpha)$.

Storechamber (tameion). Not in Mt 6:26. Means secret chamber in Lu 12:3.
Of how much more ( $\pi$ o $\sigma \omega \mu \alpha \lambda \lambda o v$ ). Mt 6:26 has question, ov $\mu \alpha \lambda \lambda o v$.
Luke 12:25
A cubit ( $\pi \eta \chi \cup v$ ). Mt 6:27 has $\pi \eta \chi \cup v \varepsilon v \alpha$ (one cubit, though $\varepsilon v \alpha$ is sometimes merely the indefinite article.

Stature ( $\eta \lambda_{ı \kappa ı \alpha v) ~ a s ~ i n ~ M a t t h e w, ~ w h i c h ~ s e e . ~}^{\text {sen }}$
Luke 12:26
Not able to do even that which is least (ou $\delta \varepsilon \varepsilon \lambda \alpha \chi$ Iбтov $\delta v v a \sigma \theta \varepsilon$ ). Negative ou $\delta \varepsilon$ in the condition of the first class. Elative superlative, very small. This verse not in Matthew and omitted in D. Verse 27 as in Mt 6:28, save that the verbs for toil and spin are plural in Matthew and singular here (neuter plural subject, $\tau \alpha \kappa \rho \stackrel{v}{ }$ ).

Luke 12:28
 (Mt 6:30). See Matthew for discussion of details. Matthew has "the grass of the field" instead of "the grass in the field" as here.

Luke 12:29
Seek not ye ( $\nu \mu \varepsilon \iota \varsigma \mu \eta \zeta \eta \tau \varepsilon \iota \tau \varepsilon$ ). Note emphatic position of "ye" ( $\nu \mu \varepsilon \iota \varsigma)$. Stop seeking ( $\mu \eta$ and present imperative active). Mt 6:31 has: "Do not become anxious" ( $\mu \eta \mu \varepsilon \rho \mu \nu \eta \sigma \eta \tau \varepsilon$ ), $\mu \eta$ and ingressive subjunctive occur as direct questions (What are we to eat? What are we to drink? What are we to put on?) whereas here they are in the indirect form as in verse 22 save that the problem of clothing is not here mentioned:

Neither be ye of doubtful mind ( $\kappa \alpha \mu \eta \mu \varepsilon \tau \varepsilon \omega \rho \iota \zeta \varepsilon \sigma \theta \varepsilon)$. M $\eta$ and present passive imperative (stop being anxious) of $\mu \varepsilon \tau \varepsilon \omega \rho \zeta \zeta \omega$. An old verb from $\mu \varepsilon \tau \varepsilon \omega \rho o \varsigma$ in midair, high (our meteor), to lift up on high, then to lift oneself up with hopes (false sometimes), to be buoyed up, to be tossed like a ship at sea, to be anxious, to be in doubt as in late writers (Polybius, Josephus). This last meaning is probably true here. In the LXX and Philo, but here only in the N.T.

Luke 12:31
See Mt 6:33 for this verse. Luke does not have "first" nor "his righteousness" nor "all."
Luke 12:32
Little flock ( $\tau \boldsymbol{\mu} \mu \kappa \rho о \nu \pi о \mu \nu \imath \circ v$ ). Vocative with the article as used in Hebrew and often in the Koine and so in the N.T. See both $\pi \alpha \tau \varepsilon \rho$ and o $\pi \alpha \tau \eta \rho$ in the vocative in Lu 10:21. See Robertson, Grammar, pp. 465f. Поццvov (flock) is a contraction from $\pi о \not \mu \varepsilon v o v$ from $\pi о \mu \eta \nu$ (shepherd) instead of the usual rou $\mu \nu \eta$ (flock). So it is not a diminutive and $\mu \kappa \kappa \rho o v$ is not superfluous, though it is pathetic.

For it is your Father's good pleasure (o $\varepsilon v \delta o \kappa \eta \sigma \varepsilon v$ o $\pi \alpha \tau \eta \rho v \mu \omega v$ ). First aorist active indicative of $\varepsilon \cup \delta$ oк $\varepsilon \omega$. Timeless aorist as in Lu 3:22. This verse has no parallel in Matthew.

Luke 12:33
Sell that ye have ( $\Pi \omega \lambda \eta \sigma \alpha \tau \varepsilon \tau \alpha v \pi \alpha \rho \chi o v \tau \alpha \nu \mu \omega v)$. Not in Matthew. Did Jesus mean this literally and always? Luke has been charged with Ebionism, but Jesus does not condemn property as inherently sinful. "The attempt to keep the letter of the rule here given (Ac 2:44,45 ) had disastrous effects on the church of Jerusalem, which speedily became a church of paupers, constantly in need of alms (Ro 15:25,26; 1Co 16:3; 2Co 8:4; 9:1)" (Plummer).

Purses which wax not old ( $\beta \alpha \lambda \lambda \alpha v \tau \iota \alpha \mu \eta \pi \alpha \lambda \alpha \ldots v \mu \varepsilon v \alpha)$. So already $\beta \alpha \lambda \lambda \alpha v \tau \circ v$ in Lu 10:4 . Late verb $\pi \alpha \lambda \alpha \circ \omega$ from $\pi \alpha \lambda \alpha \circ \varsigma$, old, to make old, declare old as in Heb 8:13, is passive to become old as here and Heb 1:11.

That faileth not ( $\alpha v \varepsilon \kappa \lambda \varepsilon ı \pi \tau o v$ ). Verbal from a privative and $\varepsilon \kappa \lambda \varepsilon ı \pi \omega$, to fail. Late word in Diodorus and Plutarch. Only here in the N.T. or LXX, but in papyri. "I prefer to believe that even Luke sees in the words not a mechanical rule, but a law for the spirit" (Bruce).

Draweth near ( $\varepsilon \gamma \gamma\llcorner\zeta \varepsilon)$. Instead of Mt 6:19 "dig through and steal."
Destroyeth ( $\delta(\alpha \varphi \theta \varepsilon ı \rho \varepsilon$ ). Instead of "doth consume" in Mt 6:19.
Luke 12:34
Will be ( $\varepsilon \sigma \tau \alpha)$. Last word in the sentence in Luke. Otherwise like Mt 6:21. See 1Co 7:32-34 for similar principle.

Luke 12:35
Be girded about ( $\varepsilon \sigma \tau \omega \sigma \alpha v \pi \varepsilon \rho \mid \varepsilon \zeta \omega \sigma \mu \varepsilon v \alpha)$. Periphrastic perfect passive imperative third plural of the verb $\pi \varepsilon \rho!\zeta \omega v \nu \cup \mu$ or $\pi \varepsilon \rho!\zeta \omega v v \nu \omega$ (later form), an old verb, to gird around, to fasten the garments with a girdle. The long garments of the orientals made speed difficult. It was important to use the girdle before starting. Cf. 17:8; Ac 12:8 .

Burning ( $\kappa \alpha \iota \mu \varepsilon v o$ ). Periphrastic present middle imperative, already burning and continuously burning. The same point of the Parable of the Ten Virgins (Mt 25:1-13) is found here in condensed form. This verse introduces the parable of the waiting servants (Lu 12:35-40).

Luke 12:36
When he shall return from the marriage feast ( $\pi о \tau \varepsilon \alpha v \alpha \lambda \nu \sigma \eta \varepsilon \kappa \tau \omega v \gamma \alpha \mu \omega v$ ). The interrogative conjunction $\pi о \tau \varepsilon$ and the deliberative aorist subjunctive retained in the indirect question. The verb $\alpha v a \lambda \nu \omega$, very common Greek verb, but only twice in the N.T. (here and Php 1:23 ). The figure is breaking up a camp or loosening the mooring of a ship, to depart. Perhaps here the figure is from the standpoint of the wedding feast (plural as used of a single wedding feast in Lu 14:8), departing from there. See on Mt 22:2 .

When he cometh and knocketh ( $\varepsilon \lambda \theta$ оvтоц ка кроибаvтоц). Genitive absolute of the aorist active participle without $\alpha \cup \tau \circ v$ and in spite of avto (dative) being used after $\alpha v o \iota \xi \omega \sigma \iota$ (first aorist active subjunctive of $\alpha v o t \gamma \omega$ ).

Luke 12:37
He shall gird himself ( $\pi \varepsilon \rho \iota \zeta \omega \sigma \varepsilon \tau \alpha)$. Direct future middle. Jesus did this (Joh 13:4), not out of gratitude, but to give the apostles an object lesson in humility. See the usual course in Lu 17:7-10 with also the direct middle (verse 8) of $\pi \varepsilon \rho \iota \sigma \omega v \vee v \omega$.

Luke 12:38
And if ( $\kappa^{\prime} \alpha v=\kappa \alpha+\varepsilon \alpha v$ ). Repeated. $E \lambda \theta \eta$ and $\varepsilon v \rho \eta$, both second aorist subjunctive with $\varepsilon \alpha v$, condition of the third class, undetermined, but with prospect of being determined.

Blessed ( $\mu \alpha \kappa \alpha \rho ı$ ). Beatitude here as in verse 37.
Luke 12:39
The thief (o $\kappa \lambda \varepsilon \pi \tau \eta \varsigma)$. The change here almost makes a new parable to illustrate the other, the parable of the housebreaking (verses 39,40 ) to illustrate the parable of the waiting servants ( $35-38$ ). This same language appears in Mt 24:43f. "The Master returning from a wedding is replaced by a thief whose study it is to come to the house he means to plunder at an unexpected time" (Bruce). The parallel in Mt 24:43-51 with Lu 12:39-46 does not have the interruption by Peter.

He would have watched ( $\varepsilon \gamma \rho \eta \gamma o \rho \eta \sigma \varepsilon v \alpha v$ ). Apodosis of second-class condition, determined as unfulfilled, made plain by use of $\alpha v$ with aorist indicative which is not repeated with ovk $\alpha \varphi \eta \kappa \varepsilon \nu$ (first aorist active indicative of $\alpha \varphi ı \eta \mu, \kappa$ aorist), though it is sometimes repeated (Mt 24:43).

Luke 12:40
Be ye ( $\gamma \iota v \varepsilon \sigma \theta \varepsilon$ ). Present middle imperative, keep on becoming.
Cometh ( $\varepsilon \rho \chi \varepsilon \tau \alpha$ ). Futuristic present indicative. See Mt 24:43-51 for details in the comparison with Luke.

Luke 12:41

Peter said (Еıлєv $\delta \varepsilon$ о Пєтроৎ). This whole paragraph from verse 22-40 had been addressed directly to the disciples. Hence it is not surprising to find Peter putting in a question. This incident confirms also the impression that Luke is giving actual historical data in the environment of these discourses. He is certain that the Twelve are meant, but he desires to know if others are included, for he had spoken to the multitude in verses 13-21. Recall Mr 13:37. This interruption is somewhat like that on the Mount of Transfiguration (Lu 9:33) and is characteristic of Peter. Was it the magnificent promise in verse 37 that stirred Peter's impulsiveness? It is certainly more than a literary device of Luke. Peter's question draws out a parabolic reply by Jesus ( $42-48$ ).

Luke 12:42
Who then ( $\tau \iota \varsigma \rho \alpha$ ). Jesus introduces this parable of the wise steward ( $42-48$ ) by a rhetorical question that answers itself. Peter is this wise steward, each of the Twelve is, anyone is who acts thus.
 the wise one. A steward is house manager (oוкоб, $\nu \varepsilon \mu \omega$, to manage). Each man is a steward in his own responsibilities.

Household ( $\theta \varepsilon \rho \alpha \pi \varepsilon \iota \propto \varsigma)$. Literally, service from $\theta \varepsilon \rho \alpha \pi \varepsilon v \omega$. medical service as in Lu 9:11 , by metonymy household (a body of those domestics who serve).

Their portion of food ( $\tau 0 ~ \sigma \iota \tau о \mu \varepsilon \tau \rho \iota o v$ ). Late word from $\sigma \iota \tau о \mu \varepsilon \tau \rho \varepsilon \omega$ ( $\mathrm{Ge} 47: 12$ ) for the Attic $\operatorname{cov}$ oıtov $\mu \varepsilon \tau \rho \varepsilon \omega$, to measure the food, the rations. Here only in the N.T. or anywhere else till Deissmann (Bible Studies, p. 158) found it in an Egyptian papyrus and then an inscription in Lycia (Light from the Ancient East, p. 104).

Luke 12:44
Over all ( $\varepsilon \pi \pi \alpha \sigma \iota v$ ). See Mt 24-47 for $\varepsilon \pi$ with locative in this sense. Usually with genitive as in verse 42 and sometimes with accusative as in verse 14.

Luke 12:45
Shall say ( $\varepsilon ו \pi \eta)$. Second aorist subjunctive, with $\varepsilon \alpha v$, condition of the third class, undetermined, but with prospect of being determined.

Delayeth ( $\chi \rho \circ v ı(\varepsilon)$ ). From $\chi \rho \circ$ ооৎ, time, spends time, lingers.
Shall begin ( $\alpha \rho \xi \eta \tau \alpha$ ). First aorist middle subjunctive with $\varepsilon \alpha v$ and the same condition as $\varepsilon ו \pi \eta$, above.

The menservants ( tovৎ $\pi \alpha \| \delta \alpha \varsigma$ )
and the maidservants ( $\kappa \alpha \tau \alpha \varsigma \pi \alpha ı \delta ı \sigma \kappa \alpha \varsigma) . ~ П \alpha ı \delta ı \sigma к \eta ~ i s ~ a ~ d i m i n u t i v e ~ o f ~ \pi \alpha ı \varsigma ~ f o r ~ a ~ y o u n g ~$ female slave and occurs in the papyri, orginally just a damsel. Here taıs can mean slave also though strictly just a boy.

Luke 12:46

Shall cut him asunder ( $\delta \chi \chi о \tau о \mu \eta \sigma \varepsilon$ ). An old and somewhat rare word from $\delta \chi \chi о \tau о \mu о \varsigma$ and that from $\delta ı \chi \propto$ and $\tau \varepsilon \mu \nu \omega$, to cut, to cut in two. Used literally here. In the N.T. only here and Mt 24:51 .

With the unfaithful ( $\mu \varepsilon \tau \alpha \tau \omega v \alpha \pi \iota \sigma \tau \omega v$ ). Not here "the unbelieving" though that is a common meaning of $\alpha \pi \neg \sigma \tau \circ \varsigma$ ( $\alpha$ privative and $\pi \iota \sigma \tau \circ \varsigma$, from $\pi \varepsilon ө \theta \omega$ ), but the unreliable, the untrustworthy. Here Mt 24:51 has "with the hypocrites," the same point. The parallel with Mt 24:43-51 ends here. Mt 24:51 adds the saying about the wailing and the gnashing of teeth. Clearly there Luke places the parable of the wise steward in this context while Matthew has it in the great eschatological discourse. Once again we must either think that Jesus repeated the parable or that one of the writers has misplaced it. Luke alone preserves what he gives in verses 47,48 .

Luke 12:47
Which knew (o $\gamma$ vouc). Articular participle (second aorist active, punctiliar and timeless). The one who knows. So as to $\mu \eta$ єтонабац $\eta$ поı $\eta \sigma \alpha \varsigma$ (does not make ready or do).

Shall be beaten with many stripes ( $\delta \alpha \rho \eta \sigma \varepsilon \tau \alpha \pi о \lambda \lambda \alpha \varsigma)$. Second future passive of $\delta \varepsilon \rho \omega$, to skin, to beat, to flay (see on Mt 21:35; Mr 12:3,5 ). The passive voice retains here the accusative $\pi \mathbf{\pi} \lambda \lambda \alpha \varsigma$ (supply $\pi \lambda \eta \gamma \alpha \varsigma$, present in Lu 10:30). The same explanation applies to o $\lambda \iota$ رүas in verse 48.

Luke 12:48
To whomsoever much is given ( $\pi \alpha v \tau \delta \varepsilon \omega \varepsilon \delta o \theta \eta \pi o \lambda v$ ). Here is inverse attraction from o to $\pi \alpha v \tau$ (Robertson, Grammar, pp. 767f.). Note $\pi \alpha \rho^{\prime}$ avtov (from him) without any regard to $\pi \alpha \nu \tau$.

They commit ( $\pi \alpha \rho \varepsilon \theta \varepsilon v \tau 0$ ). Second aorist middle indicative, timeless or gnomic aorist. Note the impersonal plural after the passive voice just before.

Luke 12:49
I came to cast fire ( $\Pi \cup \rho \eta \lambda \theta o v \beta \alpha \lambda \varepsilon ı v)$. Suddenly Jesus lets the volcano in his own heart burst forth. The fire was already burning. "Christ came to set the world on fire, and the conflagration had already begun" (Plummer). The very passion in Christ's heart would set his friends on fire and his foes in opposition as we have just seen (Lu 11:53f. ). It is like the saying of Jesus that he came to bring not peace, but a sword, to bring cleavage among men (Mt 10:34-36 ).

And what will I, if it is already kindled? ( $\kappa \alpha \tau \theta \varepsilon \lambda \omega \varepsilon \eta \delta \eta \alpha \vee \eta \varphi \theta \eta$;). It is not clear what this passage means. Probably $\tau$ is be taken in the sense of "how" ( $\pi \omega \varsigma)$. How I wish. Then $\varepsilon$ can be taken as equal to o $\tau$. How I wish that it were already kindled. A $v \eta \varphi \theta \eta$ is first aorist passive of $\alpha v \alpha \pi \tau \omega$, to set fire to, to kindle, to make blaze. Probably Luke means the conflagration to come by his death on the Cross for he changes the figure and refers to that more plainly.

Luke 12:50

I have a baptism ( $\beta \alpha \pi \tau \iota \sigma \mu \alpha \delta \varepsilon \varepsilon \chi \omega)$. Once again Jesus will call his baptism the baptism of blood and will challenge James and John to it (Mr 10:32f.; Mt 20:22f. ). So here. "Having used the metaphor of fire, Christ now uses the metaphor of water. The one sets forth the result of his coming as it affects the world, the other as it affects himself. The world is lit up with flames and Christ is bathed in blood" (Plummer).

And how I am straitened ( $\kappa \alpha \pi \omega \varsigma ~ \sigma \cup v \varepsilon \chi о \mu \alpha$ ). See this same vivid verb $\sigma \cup v \varepsilon \chi \circ \mu \alpha$ in Lu 8:37; Ac 18:5; Php 1:23 where Paul uses it of his desire for death just as Jesus does here. The urge of the Cross is upon Jesus at the moment of these words. We catch a glimpse of the tremendous passion in his soul that drove him on.

Till it be accomplished ( $\varepsilon \omega \varsigma$ o o $\sigma \tau \tau \varepsilon \lambda \varepsilon \sigma \theta \eta$ ). First aorist passive subjunctive of $\tau \varepsilon \lambda \varepsilon \omega$ with $\varepsilon \omega \varsigma$ otov (until which time), the common construction for the future with this conjunction.

Luke 12:51
But rather division ( $\alpha \lambda \lambda^{\prime} \eta \delta \delta \alpha \mu \varepsilon \rho \iota \sigma \mu \circ v$ ). Peace at any price is not the purpose of Christ. It is a pity for family jars to come, but loyalty to Christ counts more than all else. These ringing words ( Lu 12:51-53) occur in Mt 10:34-36 in the address to the Twelve for the Galilean tour. See discussion of details there. These family feuds are inevitable where only part cleave to Christ. In Matthew we have кata with the genitive whereas in Luke it is $\varepsilon \pi$ with the dative (and accusative once).

Luke 12:54
To the multitudes also (ка тоı oх $\boldsymbol{\lambda} \boldsymbol{\circ} \varsigma$ ). After the strong and stirring words just before with flash and force Jesus turns finally in this series of discourses to the multitudes again as in verse 15 . There are similar sayings to these verses $54-59$ in Mt 16:1f; $5: 25 \mathrm{f}$. There is a good deal of difference in phraseology whether that is due to difference of source or different use of the same source (Q or Logia) we do not know. Not all the old MSS. give Mt 16:2,3 . In Matthew the Pharisees and Sadducees were asking for a sign from heaven as they often did. These signs of the weather, "a shower" (о $\beta$ роос, Lu 12:54) due to clouds in the west, "a hot wave" ( $\kappa \alpha v \sigma \omega v$, verse 55) due to a south wind (votov) blowing, "fair weather" ( $\varepsilon v \delta \iota \alpha$, Mt 16:2 ) when the sky is red, are appealed to today. They have a more or less general application due to atmospheric and climatic conditions.

Luke 12:56
 chemists. No wonder that Jesus here calls them "hypocrites" because of their blindness when looking at and hearing him. So it is today with those who are willfully blind to the steps of God among men. This ignorance of the signs of the times is colossal.

Luke 12:57

Even of yourselves ( $\kappa \alpha \alpha \varphi^{\prime} \varepsilon \alpha v \tau \omega v$ ). Without the presence and teaching of Jesus they had light enough to tell what is right ( $\tau 0$ סוкaıov) and so without excuse as Paul argued in Ro 1-3.

Luke 12:58
Give diligence to be quit of him ( $\delta o \varsigma \varepsilon \rho \gamma \alpha \sigma \iota \alpha v \alpha \pi \eta \lambda \lambda \alpha \chi \theta \alpha \alpha \pi^{\prime} \alpha v \tau o v$ ). Second aorist active imperative $\delta o \varsigma$ from $\delta \iota \delta \omega \mu$. $А \pi \eta \lambda \lambda \alpha \chi \theta \alpha$, perfect passive infinitive of $\alpha \pi \alpha \lambda \lambda \alpha \sigma \sigma \omega$ an old verb common, but only twice in the N.T. (here and Ac 19:12). Used here in a legal sense and the tense emphasizes a state of completion, to be rid of him for good.

Hale thee (катабטノך). Drag down forcibly, old verb, only here in the N.T.
To the officer ( $\tau \omega \pi \rho \alpha \kappa \tau о \rho$ ). The doer, the proctor, the exactor of fines, the executor of punishment. Old word, only here in the N.T.

Luke 12:59
Till thou have paid ( $\varepsilon \omega \varsigma \alpha \pi o \delta \omega \iota \varsigma)$. Second aorist active subjunctive of $\alpha \pi o \delta \iota \delta \omega \mu$, to pay back in full.

The last mite ( $\tau 0 \varepsilon \sigma \chi \alpha \tau o v \lambda \varepsilon \pi \tau o v$ ). From $\lambda \varepsilon \pi \omega$, to peel off the bark. Very small brass coin, one-eighth of an ounce. In the N.T. only here and Lu 21:2; Mr 12:42 (the poor widow's mite) which see.

## Luke 13

Luke 13:1
At that very season ( $\varepsilon v \alpha \cup \tau \omega \tau \omega \kappa \alpha \rho \omega$ ). Luke's frequent idiom, "at the season itself." Apparently in close connexion with the preceding discourses. Probably "were present" ( $\pi \alpha \rho \eta \sigma \alpha v$, imperfect of $\pi \alpha \rho \varepsilon \varepsilon \mu$ ) means "came," "stepped to his side," as often (Mt 26:50; Ac 12:20; Joh 11:28). These people had a piece of news for Jesus.

Whose blood Pilate had mingled with their sacrifices ( $\omega \nu$ то $\alpha \mu \alpha$ Пعı入атоৎ $\varepsilon \mu \xi \varepsilon \nu$ $\mu \varepsilon \tau \alpha \tau \omega v \theta v \sigma \omega \omega v \alpha v \tau \omega v)$. The verb $\varepsilon \mu \xi \varepsilon \varepsilon v$ is first aorist active (not past perfect) of $\mu \gamma \gamma v \nu \mu$, a common verb. The incident is recorded nowhere else, but is in entire harmony with Pilate's record for outrages. These Galileans at a feast in Jerusalem may have been involved in some insurrection against the Roman government, the leaders of whom Pilate had slain right in the temple courts where the sacrifices were going on. Jesus comments on the incident, but not as the reporters had expected. Instead of denunciation of Pilate he turned it into a parable for their own conduct in the uncertainty of life.

Luke 13:2
Sinners above all ( $\alpha \mu \alpha \rho \tau \omega \lambda$ о $\pi \alpha \rho \alpha \pi \alpha \nu \tau \alpha \varsigma)$. Пара means "beside," placed beside all the Galileans, and so beyond or above (with the accusative).

Have suffered ( $\pi \varepsilon \pi \sigma v \theta \alpha \sigma เ v$ ). Second perfect active indicative third plural from $\pi \alpha \sigma \chi \omega$, common verb, to experience, suffer. The tense notes that it is "an irrevocable fact" (Bruce).

Luke 13:3
Except ye repent ( $\varepsilon \alpha v \mu \eta \mu \varepsilon \tau \alpha v o \eta \tau \varepsilon$ ). Present active subjunctive of $\mu \varepsilon \tau \alpha v o \varepsilon \omega$, to change mind and conduct, linear action, keep on changing. Condition of third class, undetermined, but with prospect of determination.

Ye shall perish ( $\alpha \pi о \lambda \varepsilon ו \sigma \theta \varepsilon$ ). Future middle indicative of $\alpha \pi о \lambda \lambda v \mu$ and intransitive. Common verb.

Luke 13:4
The tower in Siloam (o $\pi \nu \rho \gamma \circ \varsigma \varepsilon \nu \Sigma i \lambda \omega \alpha \mu$ ). Few sites have been more clearly located than this. Jesus mentions this accident (only in Luke) of his own accord to illustrate still further the responsibility of his hearers. Jesus makes use of public events in both these incidents to teach spiritual lessons. He gives the "moral" to the massacre of the Galilean pilgrims and the "moral" of the catastrophe at Siloam.

Offenders ( $o \varphi \varepsilon \backslash \lambda \varepsilon \tau \alpha$ ). Literally,
debtors, not sinners as in verse 2 and as the Authorized Version renders here. See 7:41; 11:4; Mt 6:12; 18:24-34.

Luke 13:5
Except ye repent ( $\varepsilon \alpha v \mu \eta \mu \varepsilon \tau \alpha v o \eta \sigma \eta \tau \varepsilon$ ). First aorist active subjunctive, immediate repentance in contrast to continued repentance, $\mu \varepsilon \tau \alpha v o \eta \tau \varepsilon$ in verse 3 , though Westcott and

Hort put $\mu \varepsilon \tau \alpha v o \eta \tau \varepsilon$ in the margin here. The interpretation of accidents is a difficult matter, but the moral pointed out by Jesus is obvious.

Luke 13:6
Planted ( $\pi \varepsilon \varphi \cup \tau \varepsilon \nu \mu \varepsilon v \eta \nu)$. Perfect passive participle of $\varphi \cup \tau \varepsilon v \omega$, to plant, an old verb, from $\varphi \cup \tau o v$, a plant, and that from $\varphi \nu \omega$, to grow. But this participle with $\varepsilon \not \chi \varepsilon v$ (imperfect active of $\varepsilon \chi \omega$ ) does not make a periphrastic past perfect like our English "had planted." It means rather, he had a fig tree, one already planted in his vineyard.

Luke 13:7
The vinedresser ( $\tau \circ v \alpha \mu \pi \varepsilon \lambda o v \rho \gamma \circ v$ ). Old word, but here only in the N.T., from $\alpha \mu \pi \varepsilon \lambda о$, vine, and $\varepsilon \rho \gamma \circ$, work.

These three years I come ( $\tau \rho \prime \alpha \varepsilon \tau \eta \alpha \varphi^{\prime}$ ov $\varepsilon \rho \chi \circ \mu \alpha$ ). Literally, "three years since (from which time) I come." These three years, of course, have nothing to do with the three years of Christ's public ministry. The three years are counted from the time when the fig tree would normally be expected to bear, not from the time of planting. The Jewish nation is meant by this parable of the barren fig tree. In the withering of the barren fig tree later at Jerusalem we see parable changed to object lesson or fact (Mr 11:12-14; Mt 21:18f. ).

Cut it down (єккочоv). "Cut it out," the Greek has it, out of the vineyard, perfective use of $\varepsilon \kappa$ with the effective aorist active imperative of кол $\tau \omega$, where we prefer "down."

Why? (ıva $\tau$ ). Ellipsis here of $\gamma \varepsilon v \eta \tau \alpha$ of which $\tau$ is subject (Robertson, Grammar, pp. 739,916).

Also ( $\kappa \alpha$ ). Besides bearing no fruit.
Doth cumber the ground ( $\tau \eta \nu \gamma \eta \nu$ ката $\rho \gamma \varepsilon$ ). Makes the ground completely idle, of no use (ката, $\alpha \rho \gamma \varepsilon \omega$, from $\alpha \rho \gamma \circ \varsigma$, a privative and $\varepsilon \rho \gamma \circ$, work). Late verb, here only in the N.T. except in Paul's Epistles.

Luke 13:8
Till I shall dig ( $\varepsilon \omega \varsigma$ otov $\sigma \kappa \alpha \psi \omega$ ). First aorist active subjunctive like $\beta \alpha \lambda \omega$ (second aorist active subjunctive of $\beta \alpha \lambda \lambda \omega$ ), both common verbs.

Dung it ( $\beta \alpha \lambda \omega$ кол $\rho \iota$ ). Cast dung around it, manure it. Ко $\rho \rho \iota \alpha$, late word, here alone in the N.T.

Luke 13:9
And if it bear fruit thenceforth ( $\kappa$ ' $\alpha v \mu \varepsilon v \pi о п \sigma \eta ~ к \alpha \rho \pi о v ~ \varepsilon ء \varsigma ~ \tau о ~ ~ \mu \varepsilon \lambda \lambda о v) . ~ A p o s i o p e s i s, ~$ sudden breaking off for effect (Robertson, Grammar, p. 1203). See it also in Mr 11:32; Ac 23:9. Trench (Parables) tells a story like this of intercession for the fig tree for one year more which is widely current among the Arabs today who say that it will certainly bear fruit this time.

Luke 13:10
He was teaching ( $\eta v \delta_{\iota} \delta \alpha \sigma \kappa \omega v$ ). Periphrastic imperfect active.
Luke 13:11

A spirit of infirmity ( $\pi v \varepsilon v \mu \alpha \alpha \sigma \theta \varepsilon v \varepsilon เ \alpha \varsigma)$. A spirit that caused the weakness ( $\alpha \sigma \theta \varepsilon v \varepsilon ı \alpha$, lack of strength) like a spirit of bondage (Ro 8:15), genitive case.

She was bowed together ( $\eta \nu \sigma \cup v \kappa v \pi \tau \sigma v \sigma \alpha)$. Periphrastic imperfect active of $\sigma v \nu \kappa v \pi \tau \omega$, old verb, here only in the N.T., to bend together, medical word for curvature of the spine.

And could in no wise lift herself up ( $\kappa \alpha \mu \eta \delta \nu v \alpha \mu \varepsilon v \eta ~ \alpha v \alpha \kappa \nu \psi \alpha \varepsilon є \varsigma ~ \tau о ~ \pi \alpha v \tau \varepsilon \lambda \varepsilon \varsigma) . ~$ Negative form of the previous statement. Avaкич $\alpha$, first aorist active infinitive of $\alpha v \alpha к и \pi \tau \omega$ ( $\alpha v \alpha, \kappa v \pi \tau \omega$, same verb above compounded with $\sigma v v$ ). Unable to bend herself up or back at all ( $\varepsilon ı \varsigma ~ \tau o ~ \pi \alpha v \tau \varepsilon \lambda \varepsilon \varsigma, ~ w h o l l y ~ a s ~ i n ~ H e b ~ 7: 25 ~ o n l y ~ o t h e r ~ p a s s a g e ~ i n ~ t h e ~ N . T . ~ w h e r e ~ i t ~ o c c u r s) . ~$ The poor old woman had to come in all bent over.

Luke 13:12
He called her ( $\pi \rho \circ \sigma \varepsilon \varphi \omega v \eta \sigma \varepsilon v$ ). To come to him ( $\pi \rho \circ \varsigma)$ ).
Thou art loosed ( $\alpha \pi 0 \lambda \varepsilon \lambda \nu \sigma \alpha$ ). Perfect passive indicative of $\alpha \pi \sigma \lambda \nu \omega$, common verb, loosed to stay free. Only N.T. example of use about disease.

Luke 13:13
He laid his hands upon her ( $\varepsilon \pi \varepsilon \theta \eta \kappa \varepsilon v \alpha v \tau \eta \tau \alpha \varsigma \chi \varepsilon \mid \rho a \varsigma)$. First aorist active indicative of $\varepsilon \pi \iota \tau \iota \theta \eta \mu$. As the Great Physician with gentle kindness.

She was made straight $(\alpha v \omega \rho \theta \omega \theta \eta)$. First aorist (effective) passive indicative of $\alpha v o \rho \theta o \omega$, old verb, but only three times in the N.T. (Lu 13:13; Heb 12:12; Ac 15:16), to make straight again. Here it has the literal sense of making straight the old woman's crooked back.

She glorified God ( $\varepsilon \delta \circ \xi \alpha \zeta \varepsilon v \tau o v \theta \varepsilon o v)$. Imperfect active. Began it (inchoative) and kept it up.

Luke 13:14
Answered ( $\alpha \pi о к \rho ı \theta \varepsilon \iota \varsigma)$. First aorist passive participle of $\alpha \pi о к \rho ı v o \mu \alpha$. No one had spoken to him, but he felt his importance as the ruler of the synagogue and was indignant ( $\alpha \gamma \alpha v \alpha \kappa \tau \omega v$, from $\alpha \gamma \alpha v$ and $\alpha \chi \circ \mu \alpha$, to feel much pain). His words have a ludicrous sound as if all the people had to do to get their crooked backs straightened out was to come round to his synagogue during the week. He forgot that this poor old woman had been coming for eighteen years with no result. He was angry with Jesus, but he spoke to the multitude ( $\tau \omega$ ox $\lambda \omega$ ).

Ought ( $\delta \varepsilon$ ). Really, must, necessary, a direct hit at Jesus who had "worked" on the sabbath in healing this old woman.

And not ( $\kappa \alpha \mu \eta$ ). Instead of $\kappa \alpha$ ov, because in the imperative clause.
Luke 13:15
The Lord answered him ( $\alpha \pi \varepsilon \kappa \rho 1 \theta \eta \delta \varepsilon \alpha \cup \tau \omega$ o Kvpıoc). Note use of "the Lord" of Jesus again in Luke's narrative. Jesus answered the ruler of the synagogue who had spoken to the crowd, but about Jesus. It was a crushing and overwhelming reply.

Hypocrites (vлокрıка). This pretentious faultfinder and all who agree with him.

Each of you ( $\varepsilon \kappa \alpha \sigma \tau \circ \varsigma \nu \mu \omega v)$. An argumentum ad hominen. These very critics of Jesus cared too much for an ox or an ass to leave it all the sabbath without water.

Stall ( $\varphi a \tau \vee \eta \varsigma)$. Old word, in the N.T. only here and Lu 2:7,12,16 the manger where the infant Jesus was placed.

To watering ( $\pi 0 \tau \iota \zeta \varepsilon$ ). Old verb, causative, to give to drink.
Luke 13:16
Daughter of Abraham ( $\theta v \gamma \alpha \tau \varepsilon \rho \alpha A \beta \rho \alpha \alpha \mu$ ). Triple argument, human being and not an ox or ass, woman, daughter of Abraham (Jewess), besides being old and ill.

Ought not (ovk $\varepsilon \delta \varepsilon$ ). Imperfect active. Of necessity. Jesus simply had to heal her even if on the sabbath.

Whom S区tan bound ( $\eta v \varepsilon \delta \eta \sigma \varepsilon v$ o $\Sigma a \tau \alpha v a \varsigma)$. Definite statement that her disease was due to Satan.

Luke 13:17
Were put to shame ( $\kappa \alpha \tau \eta \iota \chi \nu \nu o v \tau \tau)$. Imperfect passive of $\kappa \alpha \tau \alpha \prime \sigma \chi \nu \nu \omega$, old verb, to make ashamed, make one feel ashamed. Passive here, to blush with shame at their predicament.

Rejoiced ( $\varepsilon \chi \alpha \iota \rho \varepsilon v$ ). Imperfect active. Sharp contrast in the emotions of the two groups. Were done ( $\gamma \iota v \circ \mu \varepsilon v o \iota)$ ) Present middle participle, were continually being done.
Luke 13:18
He said therefore ( $\varepsilon \lambda \varepsilon \gamma \varepsilon v o u v$ ). It is not clear to what to refer "therefore," whether to the case of the woman in verse 11 , the enthusiasm of the crowd in verse 17 , or to something not recorded by Luke.

Luke 13:19
A grain of mustard seed ( $\kappa о \kappa \kappa \omega \sigma ı \sim \pi \varepsilon \omega \varsigma)$. Either the sinapis nigra or the salvadora persica, both of which have small seeds and grow to twelve feet at times. The Jews had a proverb: "Small as a mustard seed." Given by Mr 4:30-32; Mt 13:31f. in the first great group of parables, but just the sort to be repeated.

Cast into his own garden ( $\varepsilon \beta \alpha \lambda \varepsilon v \varepsilon ı \varsigma ~ \kappa \eta \pi \sigma v \varepsilon \alpha v \tau o v)$. Different from "earth" (Mark) or "field" (Matthew.)" Кплоৎ, old word for garden, only here in the N.T. and Joh 19:1,26; 19:41 .

Became a tree ( $\varepsilon \gamma \varepsilon v \varepsilon \tau \sigma \varepsilon \iota \varsigma \delta \varepsilon v \delta \rho o v)$. Common Hebraism, very frequent in LXX, only in Luke in the N.T., but does appear in Koine though rare in papyri; this use of eıৎ after words like ginomai. It is a translation Hebraism in Luke.

Lodged ( $\kappa \alpha \varepsilon \sigma \kappa \eta \nu \omega \sigma \varepsilon \nu)$. Mark and Matthew have катабкๆvoıv infinitive of the same verb, to make tent (or nest).

Luke 13:20
Whereunto shall I liken? (Tı $\boldsymbol{o} \mu \circ t \omega \sigma \omega$;). This question alone in Luke here as in verse 18. But the parable is precisely like that in Mt 13:33, which see for details.

Luke 13:22
Journeying on unto Jerusalem ( $\pi о \rho \varepsilon ı \alpha \nu \pi о ю \nu \mu \varepsilon v o \varsigma ~ \varepsilon \varsigma \varsigma ~ I \varepsilon \rho о \sigma о \lambda \nu \mu \alpha)$. Making his way to Jerusalem. Note tenses here of continued action, and distributive use of кata with cities and villages. This is the second of the journeys to Jerusalem in this later ministry corresponding to that in Joh 11.

Luke 13:23
Are they few that be saved? ( $\varepsilon$ o $\lambda \iota \gamma$ о o $\sigma \omega \zeta$ онعvot;). Note use of $\varepsilon$ as an interrogative which can be explained as ellipsis or as $\varepsilon \iota=\eta$ (Robertson, Grammar, p. 1024). This was an academic theological problem with the rabbis, the number of the elect.

Luke 13:24
Strive ( $\alpha \gamma \omega v 1 \zeta \varepsilon \sigma \theta \varepsilon$ ). Jesus makes short shrift of the question. He includes others (present middle plural of $\alpha \gamma \omega v \iota \zeta \rho \alpha$, common verb, our agonize). Originally it was to contend for a prize in the games. The kindred word $\alpha \gamma \omega v / \alpha$ occurs of Christ's struggle in Gethsemane ( $\operatorname{Lu}$ 22:44). The narrow gate appears also in Mt 7:13, only there it is an outside gate ( $\pi \cup \lambda \eta \varsigma$ ) while here it is the entrance to the house, "the narrow door" ( $\theta$ vpac).

Luke 13:25
When once ( $\alpha \varphi^{\prime}$ ov $\alpha v$ ). Possibly to be connected without break with the preceding verse (so Westcott and Hort), though Bruce argues for two parables here, the former (verse 24) about being in earnest, while this one (verses $25-30$ ) about not being too late. The two points are here undoubtedly. It is an awkward construction, $\alpha \varphi^{\prime}$ ov = $\alpha \pi 0$ tov $\tau 0 v$ o $\tau \varepsilon$ with $\alpha v$ and the aorist subjunctive ( $\varepsilon \gamma \varepsilon \rho \theta \eta$ and $\alpha \pi о \kappa \lambda \varepsilon ו \sigma \eta)$. See Robertson, Grammar, p. 978.

Hath shut to ( $\alpha \pi о \kappa \lambda \varepsilon i \sigma \eta$ ), first aorist active subjunctive of $\alpha \pi о \kappa \lambda \varepsilon \omega \omega$, old verb, but only here in the N.T. Note effective aorist tense and perfective use of $\alpha \pi 0$, slammed the door fast.

And ye begin ( $\kappa \alpha \alpha \rho \xi \eta \sigma \theta \varepsilon$ ). First aorist middle subjunctive of $\alpha \rho \chi \circ \mu \alpha$ with $\alpha \varphi^{\prime}$ ov $\alpha v$ like $\varepsilon \gamma \varepsilon \rho \theta \eta$ and $\alpha \pi о \kappa \lambda \varepsilon ı \sigma \eta$.

To stand ( $\varepsilon \sigma \tau \alpha v \alpha)$. Second perfect active infinitive of $\iota \sigma \tau \eta \mu$, intransitive tense
and to knock ( $\kappa \alpha$ кроиєıv). Present active infinitive, to keep on knocking.
Open to us (avoıkov $\eta \mu \nu v$ ). First aorist active imperative, at once and urgent.
He shall say ( $\varepsilon \rho \varepsilon$ ). Future active of $\varepsilon$ \& $\pi$ ov (defective verb). This is probably the apodosis of the $\alpha \varphi^{\prime}$ ov clause.

Luke 13:26
Shall ye begin ( $\alpha \rho \xi \varepsilon \sigma \theta \varepsilon$ ). Future middle, though Westcott and Hort put $\alpha \rho \xi \eta \sigma \theta \varepsilon$ (aorist middle subjunctive of $\alpha \rho \chi \circ \mu \alpha$ ) and in that case a continuation of the $\alpha \varphi^{\prime}$ ov construction. It is a difficult passage and the copyists had trouble with it.

In thy presence ( $\varepsilon v \omega \pi \tau \circ v \sigma o v)$. As guests or hosts or neighbours some claim, or the master of the house. It is grotesque to claim credit because Christ taught in their streets, but they are hard run for excuses and claims.

Luke 13:27

I know not whence ye are (ovk oı $\delta \alpha \pi 0 \theta \varepsilon v \varepsilon \sigma \tau \varepsilon$ ). This blunt statement cuts the matter short and sweeps away the flimsy cobwebs. Acquaintance with Christ in the flesh does not open the door. Jesus quotes Ps 8:9 as in Mt 7:23, there as in the LXX, here with $\pi a v \tau \varepsilon$, $\varepsilon \rho \gamma \alpha \tau \alpha \alpha \delta \kappa \kappa 1 \alpha \varsigma$, there with o $\varepsilon \rho \gamma \alpha \zeta_{\circ} \mu \varepsilon v o \tau \eta \nu \alpha v o \mu \ldots v$. But $\alpha \pi о \sigma \tau \eta \tau \varepsilon$ (second aorist active imperative) here, and there $\alpha \pi о \chi \omega \rho \varepsilon \iota \tau \varepsilon$ (present active imperative).

Luke 13:28
There ( $\varepsilon \kappa \varepsilon$ ). Out there, outside the house whence they are driven.
When ye shall see (otav o $\sigma \eta \sigma \theta \varepsilon$ ). First aorist middle subjunctive (of a late aorist $\omega \psi \alpha \mu \eta v$ ) of o $\rho \alpha \omega$, though $o \psi \varepsilon \sigma \theta \varepsilon$ (future middle) in margin of Westcott and Hort, unless we admit here a "future" subjunctive like Byzantine Greek (after Latin).

And yourselves cast forth without (v $\mu \alpha \varsigma \delta \varepsilon \varepsilon \kappa \beta \alpha \lambda \lambda о \mu \varepsilon v o v \varsigma \varepsilon \xi \omega)$. Present passive participle, continuous action, "you being cast out" with the door shut. See on Mt 8:11f. for this same picture.

Luke 13:29
Shall sit down (аvaк $\left.\lambda_{1} \theta \eta \sigma o v \tau \alpha\right)$. Future passive indicative third plural. Recline, of course, is the figure of this heavenly banquet. Jesus does not mean that these will be saved in different ways, but only that many will come from all the four quarters of the earth.

Luke 13:30
Last ( $\varepsilon \sigma \chi \alpha \tau \circ$ ). This saying was repeated many times (Mt 19:30; Mr 10:31; Mt 20:16 ).
Luke 13:31
In that very hour ( $\varepsilon v \alpha v \tau \eta \tau \eta \omega \rho \alpha$ ). Luke's favourite notation of time.
Pharisees (Фapıбaıo). Here we see the Pharisees in a new role, warning Jesus against the machinations of Herod, when they are plotting themselves.

Luke 13:32
That fox ( $\tau \eta \alpha \lambda \omega \pi \varepsilon \kappa$ т $\alpha \cup \tau \eta$ ). This epithet for the cunning and cowardice of Herod shows clearly that Jesus understood the real attitude and character of the man who had put John the Baptist to death and evidently wanted to get Jesus into his power in spite of his superstitious fears that he might be John the Baptist redivivus. The message of Jesus means that he is independent of the plots and schemes of both Herod and the Pharisees. The preacher is often put in a tight place by politicians who are quite willing to see him shorn of all real power.

Cures (ıaఠعıऽ). Old word, but in the N.T. only here and Ac 4:22,30 .
I am perfected ( $\tau \varepsilon \lambda \varepsilon ו \circ \cup \mu \alpha)$. Present passive indicative of $\tau \varepsilon \lambda \varepsilon \iota o \omega$, old verb from $\tau \varepsilon \lambda \varepsilon \iota \circ$, to bring to perfection, frequent in the N.T. Used in Heb 2:10 of the Father's purpose in the humanity of Christ. Perfect humanity is a process and Jesus was passing through that, without sin, but not without temptation and suffering. It is the prophetic present with the sense of the future.

Luke 13:33

The day following ( $\tau \eta \varepsilon \chi \circ \mu \varepsilon v \eta$ ). See Ac 20:15. The same as the third day in verse 32 . A proverb.

It cannot be (ouk $\varepsilon v \delta \varepsilon \chi \varepsilon \tau \alpha$ ). It is not accepted, it is inadmissible. A severely ironical indictment of Jerusalem. The shadow of the Cross reaches Perea where Jesus now is as he starts toward Jerusalem.

Luke 13:34
O Jerusalem, Jerusalem (I $\varepsilon \rho \circ \cup \sigma \alpha \lambda \eta \mu$, I $\varepsilon \rho \circ \cup \sigma \alpha \lambda \eta \mu$ ). In Mt 23:37f. Jesus utters a similar lament over Jerusalem. The connection suits both there and here, but Plummer considers it "rather a violent hypothesis" to suppose that Jesus spoke these words twice. It is possible, of course, though not like Luke's usual method, that he put the words here because of the mention of Jerusalem. In itself it is not easy to see why Jesus could not have made the lament both here and in Jerusalem. The language of the apostrophe is almost identical in both places (Lu 13:34f.; Mt 23:37-39). For details see on Matthew. In Luke we have $\varepsilon \pi \iota \sigma u v a \xi \alpha$ (late first aorist active infinitive) and in Matthew $\varepsilon \pi \iota \sigma v v a \gamma a \gamma \varepsilon \iota v$ (second aorist active infinitive), both from $\varepsilon \pi \iota \sigma v v a \gamma \omega$, a double compound of late Greek (Polybius). Both have "How often would I" (побакıৎ $\eta \theta \varepsilon \lambda \eta \sigma \alpha)$. How often did I wish. Clearly showing that Jesus made repeated visits to Jerusalem as we know otherwise only from John's Gospel.

Even as (ov $\tau \rho \circ \pi o v$ ). Accusative of general reference and in Mt 23:37 also. Incorporation of antecedent into the relative clause.

Brood (vooбıav) is in Luke while Matthew has
chickens (vooбıa), both late forms for the older veoofia. The adjective
desolate ( $\varepsilon \rho \eta \mu \circ \varsigma)$ is wanting in Lu 13:35 and is doubtful in Mt 23:39.

## Luke 14

Luke 14:1
When he went ( $\varepsilon v \tau \omega \varepsilon \lambda \theta \varepsilon ı v$ aviov). Luke's favourite temporal clause = "on the going as to him."

That ( $\kappa \alpha$ ). Another common Lukan idiom, $\kappa \alpha \iota=o \tau$ after $\varepsilon \gamma \varepsilon v \varepsilon \tau \tau$, like Hebrew wav.
They (avto). Emphatic.
Were watching ( $\eta \sigma \alpha v \pi \alpha \rho \alpha \tau \eta \rho o v \mu \varepsilon v o$ ). Periphrastic imperfect middle. Note force of avto, middle voice, and $\pi \alpha \rho \alpha-$. They were themselves watching on the side (on the sly), watching insidiously, with evil intent as in Mr 3:2 (active).

Luke 14:2
Which had the dropsy ( $v \delta \rho \omega \pi \kappa \kappa \varsigma)$. Late and medical word from $v \delta \omega \rho$ (water), one who has internal water ( $v \delta \rho \omega \pi \varsigma)$. Here only in the N.T. and only example of the disease healed by Jesus and recorded.

Luke 14:3
Answering ( $\alpha \pi \sigma \kappa \rho \mid \theta \varepsilon \iota \varsigma)$. First aorist passive participle without the passive meaning. Jesus answered the thoughts of those mentioned in verse 1. Here "lawyers and Pharisees" are treated as one class with one article ( $\tau$ ouc) whereas in 7:30 they are treated as two classes with separate articles.

Or not ( $\eta \mathrm{ov}$ ). The dilemma forestalled any question by them.
They held their peace ( $\eta \sigma v \chi \alpha \sigma \alpha v$ ). Ingressive aorist active of old verb $\eta \sigma v \chi \alpha \zeta \omega$. They became silent, more so than before.

Luke 14:4
Tookhim ( $\varepsilon \pi \iota \lambda \alpha \beta o \mu \varepsilon v o \varsigma)$. Second aorist middle participle of $\varepsilon \pi \iota \lambda \alpha \mu \beta \alpha v \omega$, an old verb, only in the middle in the N.T. It is not redundant use, "took and healed," but "took hold of him and healed him." Only instance in the N.T. of its use in a case of healing.

Let him go ( $\alpha \pi \varepsilon \lambda u \sigma \varepsilon v$ ). Probably, dismissed from the company to get him away from these critics.

Luke 14:5
An ass or an ox (ovoc $\eta$ ßouc). But Westcott and Hort voç $\eta$ ßouc ( a son or an ox ). The manuscripts are much divided between vos (son) and ovoc (ass) which in the abbreviated uncials looked much alike (TC, OC) and were much alike. The sentence in the Greek reads literally thus: Whose ox or ass of you shall fall ( $\pi \varepsilon \sigma \varepsilon \iota \tau \alpha$, future middle of $\pi \iota \pi \tau 0$ ) into a well and he (the man) will not straightway draw him up (avaøtaб\&, future active of $\alpha v a \sigma \pi \alpha \omega)$ on the sabbath day? The very form of the question is a powerful argument and puts the lawyers and the Pharisees hopelessly on the defensive.

Luke 14:6

Could not answer again (ovк וбұטбаv avталокріӨŋva). Did not have strength to answer back or in turn ( $\alpha \vee \tau t-$ ) as in Ro 9:20. They could not take up the argument and were helpless. They hated to admit that they cared more for an ox or ass or even a son than for this poor dropsical man.

Luke 14:7
A parable for those which were bidden ( $\pi \rho \circ \varsigma \tau$ тоvя $\kappa \varepsilon \kappa \lambda \eta \mu \varepsilon v o v \varsigma \pi \alpha \rho \alpha \beta \circ \lambda \eta \nu$ ). Perfect passive participle of $\kappa \alpha \lambda \varepsilon \omega$, to call, to invite. This parable is for the guests who were there and who had been watching Jesus.

When he marked ( $\varepsilon \pi \varepsilon \chi \omega v)$. Present active participle of $\varepsilon \pi \varepsilon \chi \omega$ with $\tau 0 v$ vouv understood, holding the mind upon them, old verb and common.

They chose out ( $\varepsilon \xi \varepsilon \lambda \varepsilon \gamma \circ v \tau 0$ ). Imperfect middle, were picking out for themselves.
The chief seats ( $\tau \alpha \varsigma \pi \rho \omega \tau о \kappa \lambda \iota \sigma \iota \varsigma)$ ). The first reclining places at the table. Jesus condemned the Pharisees later for this very thing (Mt 23:6; Mr 12:39; Lu 20:46). On a couch holding three the middle place was the chief one. At banquets today the name of the guests are usually placed at the plates. The place next to the host on the right was then, as now, the post of honour.

Luke 14:8
Sit not down ( $\mu \eta \kappa \alpha \tau \alpha \kappa \lambda \iota \theta \eta \iota)$. First aorist (ingressive) passive subjunctive of катак $\lambda \iota \omega \omega$, to recline. Old verb, but peculiar to Luke in the N.T. (7:36; 9:14; 14:8; $24: 30$ ).

Be bidden ( $\eta \kappa \varepsilon \kappa \lambda \eta \mu \varepsilon v o \varsigma)$. Periphrastic perfect passive subjunctive of $\kappa \alpha \lambda \varepsilon \omega$ after $\mu \eta$ тотє.

Luke 14:9
And say ( $\kappa \alpha \varepsilon \rho \varepsilon$ ). Changes to future indicative with $\mu \eta \pi о \tau \varepsilon$ as in 12:58.
Shalt begin with shame ( $\left.\alpha \rho \xi \eta \mu \varepsilon \tau \alpha \alpha \_\sigma \chi \cup v \eta \varsigma\right)$. The moment of embarrassment.
To take the lowest place ( $\tau \circ \vee \varepsilon \sigma \chi \alpha \tau о \nu \tau о \pi о \nu ~ к а \tau \varepsilon \chi \varepsilon เ v) . ~ T o ~ h o l d ~ d o w n ~ t h e ~ l o w e s t ~ p l a c e, ~$ all the intermediate ones being taken.

Luke 14:10
Sit down ( $\alpha v \alpha \pi \varepsilon \sigma \varepsilon$ ). Second aorist active imperative of $\alpha v \alpha \pi \iota \pi \tau \omega$, to fall up or back, to lie back or down. Late Greek word for $\alpha v a \kappa \lambda ı v \omega$ (cf. катак $\lambda \iota v \omega$ in verse 8 ).

He that hath bidden thee (o $\kappa \varepsilon \kappa \lambda \eta \kappa \omega \varsigma \sigma \varepsilon$ ). Perfect active participle as in verse 12 ( $\tau \omega$ $\kappa \varepsilon \kappa \lambda \eta \kappa о \tau)$ with which compare o ка入єбас in verse 9 (first aorist active participle).

He may say ( $\varepsilon \rho \varepsilon$ ). The future indicative with iva does occur in the Koine (papyri) and so in the N.T. (Robertson, Grammar, p. 984).

Go up higher ( $\pi \rho \circ \sigma \alpha v \alpha \beta \eta \theta$ ). Second aorist active imperative second singular of $\pi \rho o \sigma \alpha v \alpha \beta a \iota v \omega$, an old double compound verb, but here only in the N.T. Probably, "Come up higher," because the call comes from the host and because of $\pi \rho \circ \varsigma$.

Luke 14:11

Shall be humbled ( $\tau \alpha \pi \varepsilon เ v \omega \theta \eta \sigma \varepsilon \tau \alpha)$. First future passive. One of the repeated sayings of Jesus (18:14; Mt 23:12 ).

Luke 14:12
A dinner or a supper ( $\alpha \rho \iota \sigma \tau o v \eta \delta \varepsilon ı \pi v o v$ ). More exactly, a breakfast or a dinner with distinction between them as already shown. This is a parable for the host as one had just been given for the guests, though Luke does not term this a parable.

Call not ( $\mu \eta \varphi \omega \nu \varepsilon$ ). M $\eta$ and the present imperative active, prohibiting the habit of inviting only friends. It is the exclusive invitation of such guests that Jesus condemns. There is a striking parallel to this in Plato's Phaedrus 233.

Recompense ( $\alpha v \tau \alpha \pi о \delta о \mu \alpha)$. In the form of a return invitation. Like $\alpha v \tau$ in "bid thee again" ( $\alpha \nu \tau \iota \kappa \alpha \lambda \varepsilon \sigma \omega \sigma เ v)$.

Luke 14:13
When thou makest a feast (oтаv $\delta \circ \chi \eta v \tau о ו \eta เ \varsigma) . ~ H o \tau \alpha v$ and the present subjunctive in an indefinite temporal clause. $\Delta \mathrm{ox} \eta$ means reception as in Lu 5:29, late word, only in these two passages in the N.T. Note absence of article with these adjectives in the Greek (poor people, maimed folks, lame people, blind people).

Luke 14:14
To recompense thee ( $\alpha v \tau \alpha \pi \sigma \delta o u v \alpha \sigma o$ ). Second aorist active infinitive of this old and common double compound verb, to give back in return. The reward will come at the resurrection if not before and thou shalt be happy.

Luke 14:15
Blessed ( $\mu \alpha к а р ь о \varsigma) . ~ H a p p y, ~ s a m e ~ w o r d ~ i n ~ t h e ~ B e a t i t u d e s ~ o f ~ J e s u s ~(M t ~ 5: 3 f f . ~) . ~ T h i s ~ p i o u s ~$ platitude whether due to ignorance or hypocrisy was called forth by Christ's words about the resurrection. It was a common figure among the rabbis, the use of a banquet for the bliss of heaven. This man may mean that this is a prerogative of the Pharisees. He assumed complacently that he will be among the number of the blest. Jesus himself uses this same figure of the spiritual banquet for heavenly bliss (Lu 22:29).

Shall eat ( $\varphi \alpha \gamma \varepsilon \tau \alpha$ ). Future middle from $\varepsilon \sigma \theta \iota \omega$, defective verb, from stem of the aorist ( $\varepsilon \propto \alpha \gamma \circ v$ ) like $\varepsilon \delta o \mu \alpha$ of the old Greek.

Luke 14:16
Made ( $\varepsilon$ тоוє). Imperfect active, was on the point of making (inchoative).
Great supper ( $\delta \varepsilon ו \pi v o v)$. Or dinner, a formal feast. Jesus takes up the conventional remark of the guest and by this parable shows that such an attitude was no guarantee of godliness (Bruce). This parable of the marriage of the King's son (Lu 14:15-24) has many points of likeness to the parable of the wedding garment (Mt 22:1-14) and as many differences also. The occasions are very different, that in Matthew grows out of the attempt to arrest Jesus while this one is due to the pious comment of a guest at the feast and the wording is also quite different. Hence we conclude that they are distinct parables.

And he bade many ( $\kappa \alpha \varepsilon \kappa \alpha \lambda \varepsilon \sigma \varepsilon v$ по $\lambda \lambda$ оис). Aorist active, a distinct and definite act following the imperfect $\varepsilon \pi \sigma \varepsilon$.

Luke 14:17
His servant ( $\tau 0 v$ סou入ov avtou). His bondservant. Vocator or Summoner (Es 5:8; 6:14 ). This second summons was the custom then as now with wealthy Arabs. Tristram (Eastern Customs, p. 82) says: "To refuse the second summons would be an insult, which is equivalent among the Arab tribes to a declaration of war."

Luke 14:18
With one consent ( $\alpha \pi \sigma \mu \boldsymbol{\mu} \alpha$ ). Some feminine substantive like $\gamma v \omega \mu \eta \varsigma$ or $\psi v \chi \eta \varsigma$ has to be supplied. This precise idiom occurs nowhere else. It looked like a conspiracy for each one in his turn did the same thing.

To make excuse ( $\pi \alpha \rho \alpha \iota \tau \varepsilon \iota \sigma \theta)$ ). This common Greek verb is used in various ways, to ask something from one ( $\mathrm{Mr} 15: 6$ ), to deprecate or ask to avert (Heb 12:19), to refuse or decline (Ac 25:11), to shun or to avoid (2Ti 2:23), to beg pardon or to make excuses for not doing or to beg (Lu 14:18ff. ). All these ideas are variations of aıtع $\omega$, to ask in the middle voice with $\pi \alpha \rho \alpha$ in composition.

The first (o $\pi \rho \omega \tau$ тс). In order of time. There are three of the "many" ("all"), whose excuses are given, each more flimsy than the other.

I must needs ( $\varepsilon \chi \omega \alpha v \alpha \gamma \kappa \eta v$ ). I have necessity. The land would still be there, a strange "necessity."

Have me excused ( $\varepsilon \chi \varepsilon \mu \varepsilon \pi \alpha \rho \eta \iota \tau \eta \mu \varepsilon v o v)$. An unusual idiom somewhat like the English perfect with the auxiliary "have" and the modern Greek idiom with $\varepsilon \chi \omega$, but certainly not here a Greek periphrasis for $\pi \alpha \rho \eta \iota \tau \eta \sigma o$. This perfect passive participle is predicate and agrees with $\mu$. See a like idiom in Mr 3:1; Lu 12:19 (Robertson, Grammar, pp. 902f.). The Latin had a similar idiom, habe me excusatum. Same language in verse 19.

Luke 14:19
To prove them ( $\delta о к ц \alpha \sigma \alpha \alpha \cup \tau \alpha)$. He could have tested them before buying. The oxen would not run away or be stolen.

Luke 14:20
I cannot come (ov $\delta u v a \mu \alpha \varepsilon \lambda \theta \varepsilon ı v$ ). Less polite than the others but a more plausible pretence if he wanted to make it so. The law excused a newly married man from war (De 24:5), "but not from social courtesy" (Ragg). The new wife would probably have been glad to go with him to the feast if asked. But see 1Co 7:33. There is here as often a sharp difference between the excuses offered and the reasons behind them.

Luke 14:21
Being angry (opүıӨधءı). First aorist (ingressive) passive, becoming angry.
Quickly ( $\tau \alpha \chi \varepsilon \omega \varsigma$ ). The dinner is ready and no time is to be lost. The invitation goes still to those in the city.

Streets and lanes ( $\tau \alpha \varsigma \pi \lambda \alpha \tau \varepsilon ו \propto \varsigma \kappa \alpha \rho \nu \mu \alpha \varsigma)$. Broadways and runways (broad streets and narrow lanes).

Maimed (avar\&ıouc). So Westcott and Hort for the old word avarn itacism ( $\varepsilon \iota=\eta$ in pronunciation). The word is compounded of $\alpha v \alpha$ and $\pi \eta \rho o \varsigma$, lame all the way up.

Luke 14:22
And yet there is room ( $\kappa \alpha \varepsilon \tau \tau о \pi \circ \varsigma \varepsilon \sigma \tau \iota \nu$ ). The Master had invited "many" (verse 16) who had all declined. The servant knew the Master wished the places to be filled.

Luke 14:23
The highways and hedges ( $\tau \alpha \varsigma$ обov¢ $\kappa \alpha ~ \varphi \rho \alpha \gamma \mu \circ u \varsigma$ ). The public roads outside the city of Judaism just as the streets and lanes were inside the city. The heathen are to be invited this time.

Hedges is fenced in places from $\varphi \rho \alpha \sigma \sigma \omega$, to fence in (Ro 3:19).
Compel ( $\alpha v \alpha \gamma \kappa \alpha \sigma o v$ ). First aorist active imperative of $\alpha v \alpha \gamma \kappa \alpha \zeta \omega$, from $\alpha v \alpha \gamma \kappa \eta$ (verse 18). By persuasion of course. There is no thought of compulsory salvation. "Not to use force, but to constrain them against the reluctance which such poor creatures would feel at accepting the invitation of a great lord" (Vincent). As examples of such "constraint" in this verb see Mt 14:22; Ac 26:11; Ga 6:12 .

That my house may be filled ( $\imath v \alpha \gamma \varepsilon \mu \sigma \theta \eta \mu$ оv o oוкос). First aorist passive subjunctive of $\gamma \varepsilon \mu \iota \zeta \omega$, to fill full, old verb from $\gamma \varepsilon \mu \omega$, to be full. Effective aorist. Subjunctive with $\tau v \alpha$ in final clause. The Gentiles are to take the place that the Jews might have had (Ro 11:25). Bengel says: Nec natura nec gratia patitur vacuum.

## Luke 14:24

My supper ( $\mu \mathrm{ov}$ tov $\delta \varepsilon ı \pi v o v$ ). Here it is still the Master of the feast who is summing up his reasons for his conduct. We do not have to say that Jesus shuts the door now in the face of the Jews who may turn to him.

Luke 14:25
And he turned ( $\kappa \alpha \sigma \tau \rho \alpha \varphi \varepsilon \iota \varsigma)$. Second aorist passive participle of $\sigma \tau \rho \varepsilon \varphi \omega$, common verb. It is a dramatic act on the part of Jesus, a deliberate effort to check the wild and unthinking enthusiasm of the crowds who followed just to be following. Note "many multitudes"

Luke 14:26
Hateth not (ov $\mu(\sigma \varepsilon)$. An old and very strong verb $\mu \tau \sigma \varepsilon \omega$, to hate, detest. The orientals use strong language where cooler spirits would speak of preference or indifference. But even so Jesus does not here mean that one must hate his father or mother of necessity or as such, for Mt 15:4 proves the opposite. It is only where the element of choice comes in (cf. Mt 6:24 ) as it sometimes does, when father or mother opposes Christ. Then one must not hesitate. The language here is more sharply put than in Mt 10:37. The ov here coalesces with the
verb $\mu \iota \sigma \varepsilon$ in this conditional clause of the first class determined as fulfilled. It is the language of exaggerated contrast, it is true, but it must not be watered down till the point is gone. In mentioning "and wife" Jesus has really made a comment on the excuse given in verse 20 (I married a wife and so I am not able to come).

And his own life also ( $\varepsilon \tau \tau \varepsilon \kappa \alpha \tau \eta \nu \psi v \chi \eta v \varepsilon \alpha v \tau o v)$. Note $\tau \varepsilon \kappa \alpha$, both--and. "The $\tau \varepsilon$ (B L) binds all the particulars into one bundle of renuncianda" (Bruce). Note this same triple group of conjunctions ( $\varepsilon \tau \tau \varepsilon \kappa \alpha$ ) in Ac 21:28, "And moreover also," "even going as far as his own life." Martyrdom should be an ever-present possibility to the Christian, not to be courted, but not to be shunned. Love for Christ takes precedence "over even the elemental instinct of self-preservation" (Ragg).

Luke 14:27
His own cross ( $\tau 0 v$ otaupov qautov). This familiar figure we have had already ( Lu 9:23; Mr 8:34; Mt 10:38; 16:24). Each follower has a cross which he must bear as Jesus did his. Baбтaऍ $\omega$ is used of cross bearing in the N.T. only here (figuratively) and Joh 19:17 literally of Jesus. Crucifixion was common enough in Palestine since the days of Antiochus Epiphanes and Alexander Jannaeus.

Luke 14:28
Build a tower ( $\pi \cup \rho \gamma \circ v$ оוко $\delta о \mu \eta \sigma \alpha$ ). A common metaphor, either a tower in the city wall like that by the Pool of Siloam (Lu 13:4) or a watchtower in a vineyard (Mt 21:33) or a tower-shaped building for refuge or ornament as here. This parable of the rash builder has the lesson of counting the cost.

Sit down (кaӨıбаऽ). Attitude of deliberation.
First ( $\pi \rho \omega \tau 0 v$ ). First things first. So in verse 31.
Count ( $\psi \eta \varphi \downharpoonright(\varepsilon)$. Common verb in late writers, but only here and Re 13:18 in the N.T. The verb is from $\psi \eta \varphi \rho \varsigma$, a stone, which was used in voting and so counting. Calculate is from the Latin calculus, a pebble. To vote was to cast a pebble ( $\tau \bullet \eta \eta \mu \psi \eta \varphi \circ v$ ). Luke has Paul using "deposit a pebble" for casting his vote (Ac 26:10).

The cost ( $\tau \eta v \delta a \pi \alpha v \eta v$ ). Old and common word, but here only in the N.T. from $\delta \alpha \pi \tau \omega$, to tear, consume, devour. Expense is something which eats up one's resources.

Whether he hath wherewith to complete it ( $\varepsilon \varepsilon \chi \varepsilon \varepsilon \varsigma \varsigma \alpha \pi \alpha \rho \tau \iota \sigma \mu \circ v$ ). If he has anything for completion of it. A $\pi \alpha \rho \tau \iota \sigma \mu \circ v$ is a rare and late word (in the papyri and only here in the N.T.). It is from $\alpha \pi \alpha \rho \tau \iota \zeta \omega$, to finish off ( $\alpha \pi$ - and $\alpha \rho \tau \iota \zeta \omega$ like our articulate), to make even or square. Cf. $\varepsilon \xi \eta \rho \tau \iota \sigma \mu \varepsilon v o c$ in 2Ti 3:17.

Luke 14:29
Lest haply (iva $\mu \eta \pi \circ \tau \varepsilon$ ). Double final particles (positive and negative with addition of $\pi о \tau \varepsilon)$. Used here with aorist middle subjunctive in $\alpha \rho \xi \omega \nu \tau \alpha$ (begin).

to finish ( $\varepsilon \kappa \tau \varepsilon \lambda \varepsilon \sigma \alpha)$. First aorist active infinitive. Note perfective use of $\varepsilon \kappa$, to finish out to the end. Two genitive absolutes, first, second aorist active participle $\theta \varepsilon v \tau o \varsigma ;$ second, present active participle toұvovtoc.

To mock him ( $\alpha v \tau \omega \varepsilon \mu \pi \alpha \iota \zeta \varepsilon ı v$ ). An old verb, $\varepsilon \mu-\pi \alpha ı \zeta \omega$, to play like a child ( $\pi \alpha ı \varsigma$ ), at or with, to mock, scoff at, to trifle with like Latin illudere.

Luke 14:30
This man (ovtoc o $\alpha v \theta \rho \omega \pi$ оऽ). This fellow, contemptuous or sarcastic use of ovtoc.
Luke 14:31
To encounter ( $\sigma v v \beta \alpha \lambda \varepsilon ı v$ ). Second aorist active infinitive of $\sigma \sim v \beta \alpha \lambda \lambda \omega$, old and common verb, to throw or bring together, to dispute, to clash in war as here.

Another king ( $\varepsilon \tau \varepsilon \rho \omega \beta \alpha \sigma \iota \lambda \varepsilon$ ), to grapple with another king in war or for war ( $\varepsilon \varsigma$ $\pi о \lambda \varepsilon \mu \circ v)$. Associative instrumental case.

Take counsel ( $\beta$ ou $\lambda \varepsilon v \sigma \varepsilon \tau \alpha$ ). Future middle indicative of old and common verb $\beta$ ou $\lambda \varepsilon v \omega$, from $\beta$ ou $\lambda \eta$, will, counsel. The middle means to take counsel with oneself, to deliberate, to ponder.

With ten thousand ( $\varepsilon v \delta \varepsilon \kappa \alpha \chi_{\lambda} \lambda_{\iota} \alpha \sigma \iota v$ ). Literally, in ten thousand. See this so-called instrumental use of $\varepsilon v$ in Jude 1:14. Equipped in or with ten thousand. See Lu 1:17. Note $\mu \varepsilon \tau \alpha \varepsilon$ عוкоб $\chi \backslash \lambda ı \alpha \delta \omega \nu$ just below (midst of twenty thousand).

To meet ( $\cup \pi \alpha \nu \tau \eta \sigma \alpha$ ). Common verb (like $\alpha \pi \alpha \nu \tau \alpha \omega$ ) from $\alpha \nu \tau \alpha \omega$ ( $\alpha \nu \tau \alpha$, end, face to face, from which $\alpha v \tau$ ) with preposition $v \pi \frac{(o r}{\alpha} \alpha \pi 0$ ), to go to meet. Here it has a military meaning.

Luke 14:32
Or else ( $\varepsilon \delta \varepsilon \mu \eta \gamma \varepsilon$ ). Same idiom in 5:36. Luke is fond of this formula.
An ambassage ( $\pi \rho \varepsilon \sigma \beta \varepsilon \varepsilon \alpha v$ ). Old and common word for the office of ambassador, composed of old men ( $\pi \rho \varepsilon \sigma \beta \varepsilon \iota \varsigma)$ like Japanese Elder Statesmen who are supposed to possess wisdom. In the N.T. only here and Lu 19:14 .

Asketh conditions of peace ( $\varepsilon \rho \omega \tau \alpha \pi \rho \circ \varsigma \varepsilon \iota \rho \eta \eta \nu)$. The use of $\varepsilon \rho \omega \tau \alpha \omega$ in this sense of beg or petition is common in the papyri and Koine generally. The original use of asking a question survives also. The text is uncertain concerning $\pi \rho o \varsigma \varepsilon \varepsilon \rho \eta \nu \eta \nu$ which means with $\varepsilon \rho \omega \tau \alpha \omega$, to ask negotiations for peace. In B we have $\varepsilon \iota \varsigma$ instead of $\pi \rho o \varsigma$ like verse 28. Most MSS. have $\tau \alpha$ before $\pi \rho \circ \varsigma$ or $\varepsilon \iota$, , but not in Aleph and B. It is possible that the $\tau \alpha$ was omitted because of preceding $\tau \alpha$ (o $о$ огот $\varepsilon \lambda \varepsilon \cup \tau o v$ ), but the sense is the same. See Ro 14:19 $\tau \alpha \tau \eta \varsigma \varepsilon \iota \rho \eta \nu \eta \varsigma$, the things of peace, which concern or look towards peace, the preliminaries of peace.

Luke 14:33
Renounceth not (ovк $\alpha \pi о \tau \alpha \sigma \sigma \varepsilon \tau \alpha$ ). Old Greek word to set apart as in a military camp, then in the middle voice to separate oneself from, say good-bye to ( $\mathrm{Lu} 9: 61$ ), to renounce, forsake, as here.
 property, "all his own belongings" (neuter plural participle used as substantive) as named in verse 26 . This verse gives the principle in the two parables of the rash builder and of the rash king. The minor details do not matter. The spirit of self-sacrifice is the point.

Luke 14:35
Dunghill (колрıаv). Later word in the Koine vernacular. Here only in the N.T., though in the LXX.

Men cast it out ( $\varepsilon \xi \omega \beta \alpha \lambda \lambda$ ovoıv $\alpha \cup \tau 0)$. Impersonal plural. This saying about salt is another of Christ's repeated sayings (Mt 5:13; Mr 9:50). Another repeated saying is the one here about having ears to hear ( $\operatorname{Lu} 8: 8 ; 14: 35$, $\mathrm{Mt} \mathrm{11:15;} \mathrm{13:43)}$.

## Luke 15

Luke 15:1
All the publicans and sinners ( $\pi \alpha v \tau \varepsilon \varsigma$ о $\tau \varepsilon \lambda \omega v \alpha$ ка о $\alpha \mu \alpha \rho \tau \omega \lambda о$ ). The two articles separate the two classes (all the publicans and the sinners). They are sometimes grouped together (5:30; Mt 9:11 ), but not here. The publicans are put on the same level with the outcasts or sinners. So in verse 2 the repeated article separates Pharisees and scribes as not quite one. The use of "all" here may be hyperbole for very many or the reference may be to these two classes in the particular place where Jesus was from time to time.

Were drawing near unto him ( $\eta \sigma \alpha \nu \alpha \cup \tau \omega \varepsilon \gamma \gamma \iota \bar{\zeta} \tau \varepsilon \varsigma)$. Periphrastic imperfect of $\varepsilon \gamma \gamma \zeta \omega \omega$, from $\varepsilon \gamma \gamma \cup \varsigma$ (near), late verb.

For to hear ( $\alpha \kappa 0 v \varepsilon เ v$ ). Just the present active infinitive of purpose.
Luke 15:2
Both ... and ( $\tau \varepsilon \ldots \kappa \alpha$ ). United in the complaint.
Murmured ( $\delta เ \varepsilon \gamma \circ \gamma \gamma \cup \zeta \circ v$ ). Imperfect active of $\delta \iota \alpha \gamma \circ \gamma \gamma \cup \zeta \omega$, late Greek compound in the LXX and Byzantine writers. In the N.T. only here and Lu 19:7. The force of $\delta$ ta here is probably between or among themselves. It spread (imperfect tense) whenever these two classes came in contact with Jesus. As the publicans and the sinners were drawing near to Jesus just in that proportion the Pharisees and the scribes increased their murmurings. The social breach is here an open yawning chasm.

This man (ovtoc). A contemptuous sneer in the use of the pronoun. They spoke out openly and probably pointed at Jesus.

Receiveth ( $\pi \rho \circ \sigma \delta \varepsilon \chi \varepsilon \tau \alpha$ ). Present middle indicative of the common verb $\pi \rho o \sigma \delta \varepsilon \chi \circ \mu \alpha$. In 12:36 we had it for expecting, here it is to give access to oneself, to welcome like $v \pi \varepsilon \delta \varepsilon \xi \alpha \tau 0$ of Martha's welcome to Jesus ( Lu 10:38). The charge here is that this is the habit of Jesus. He shows no sense of social superiority to these outcasts (like the Hindu "untouchables" in India).
 after $\sigma v v$ - in composition. This is an old charge ( $\mathrm{Lu} 5: 30$ ) and a much more serious breach from the standpoint of the Pharisees. The implication is that Jesus prefers these outcasts to the respectable classes (the Pharisees and the scribes) because he is like them in character and tastes, even with the harlots. There was a sting in the charge that he was the "friend" ( $\varphi \backslash \lambda \varsigma \varsigma$ ) of publicans and sinners (Lu 7:34).

Luke 15:3
This parable ( $\tau \eta v \pi \alpha \rho \alpha \beta 0 \lambda \eta v \tau \alpha v \tau \eta v$ ). The Parable of the Lost Sheep ( 15:3-7). This is Christ's way of answering the cavilling of these chronic complainers. Jesus gave this same parable for another purpose in another connection (Mt 18:12-14). The figure of the Good Shepherd appears also in Joh 10:1-18. "No simile has taken more hold upon the mind of

Christendom" (Plummer). Jesus champions the lost and accepts the challenge and justifies his conduct by these superb stories. "The three Episodes form a climax: The Pasture--the House--the Home; the Herdsman--the Housewife--the Father; the Sheep--the Treasure-the Beloved Son" (Ragg).

## Luke 15:4

In the wilderness $(\varepsilon \nu \tau \eta \varepsilon \rho \eta \mu \omega)$. Their usual pasturage, not a place of danger or peril. It is the owner of the hundred sheep who cares so much for the one that is lost. He knows each one of the sheep and loves each one.

Go after that which is lost ( $\pi \circ \rho \varepsilon v \varepsilon \tau \alpha \varepsilon \pi$ то $\alpha \pi \circ \lambda \omega \lambda$ оऽ). The one lost sheep ( $\alpha \pi \sigma \lambda \omega \lambda o \varsigma$, second perfect active participle of $\alpha \pi \sigma \lambda \lambda \nu \mu$, to destroy, but intransitive, to be lost). There is nothing more helpless than a lost sheep except a lost sinner. The sheep went off by its own ignorance and folly. The use of $\varepsilon \pi$ for the goal occurs also in Mt 22:9; Ac 8:26; 9:11 .

Until he find it ( $\varepsilon \omega \varsigma \varepsilon \cup \rho \eta$ auto). Second aorist active subjunctive of $\varepsilon \cup \rho \iota \sigma \kappa \omega$, common verb, with $\varepsilon \omega \varsigma$, common Greek idiom. He keeps on going ( $\pi$ орєvє $\frac{1}{\alpha}$, linear present middle indicative) until success comes (effective aorist, $\varepsilon \cup \rho \eta$ ).

Luke 15:5
On his shoulders ( $\varepsilon \pi$ tovৎ $\omega \mu$ оиц autov). He does it himself in exuberant affection and of necessity as the poor lost sheep is helpless. Note the plural shoulders showing that the sheep was just back of the shepherd's neck and drawn around by both hands. The word for shoulder ( $\omega \mu \circ \varsigma$ ) is old and common, but in the N.T. only here and Mt 23:4 .

Rejoicing ( $\chi \propto \iota \rho \omega v$ ). "There is no upbraiding of the wandering sheep, nor murmuring at the trouble" (Plummer).

Luke 15:6
Rejoice with me ( $\sigma v \vee \chi \alpha \rho \eta \tau \varepsilon \mu 0$ ). Second aorist passive of $\sigma \cup v \chi a \iota \rho \omega$, an old and common verb for mutual joy as in Php 2:17f. Joy demands fellowship. Same form in verse 9. So the shepherd
calls together ( $\sigma \cup v \kappa \alpha \lambda \varepsilon$, note $\sigma \cup v$ again) both his friends and his neighbours. This picture of the Good Shepherd has captured the eye of many artists through the ages.

Luke 15:7
Over one sinner that repenteth ( $\varepsilon \pi \varepsilon v \alpha \mu \alpha \rho \tau \omega \lambda \omega \mu \varepsilon \tau \alpha v o o v v \tau)$. The word sinner points to verse 1 . Repenting is what these sinners were doing, these lost sheep brought to the fold. The joy in heaven is in contrast with the grumbling Pharisees and scribes.

More than over ( $\eta \varepsilon \pi$ ). There is no comparative in the Greek. It is only implied by a common idiom like our "rather than."
 to say that the Pharisees and the scribes do not need repentance or are perfect. He for the sake of argument accepts their claims about themselves and by their own words condemns them for their criticism of his efforts to save the lost sheep. It is the same point that he made
against them when they criticized Jesus and the disciples for being at Levi's feast (Lu 5:31f. ). They posed as "righteous." Very well, then. That shuts their mouths on the point of Christ's saving the publicans and sinners.

Luke 15:8
Ten pieces of silver ( $\delta \rho \alpha \chi \mu \alpha \varsigma \delta \varepsilon \kappa \alpha$ ). The only instance in the N.T. of this old word for a coin of 65.5 grains about the value of the common $\delta \eta v a \rho i v ¢$ (about eighteen cents), a quarter of a Jewish shekel. The double drachma ( $\delta \mathrm{t} \delta \rho \alpha \chi \mu \mathrm{ov}$ ) occurs in the N.T. only in Mt 17:24. The root is from $\delta \rho \alpha \sigma \sigma o \mu \alpha$, to grasp with the hand (1Co 3:19), and so a handful of coin. Ten drachmas would be equal to nearly two dollars, but in purchasing power much more.

Sweep ( $\sigma \alpha \rho o$ ). A late colloquial verb $\sigma \alpha \rho o \omega$ for the earlier $\sigma \alpha \iota \rho \omega$, to clear by sweeping. Three times in the N.T. (Lu 11:25; 15:8; Mt 12:44). The house was probably with out windows (only the door for light and hence the lamp lit) and probably also a dirt floor. Hence Bengel says: non sine pulvere. This parable is peculiar to Luke.

Luke 15:9
Her friends and neighbours ( $\tau \alpha \varsigma \varphi ı \lambda \alpha \varsigma \kappa \alpha \gamma \varepsilon \tau о v \alpha \varsigma)$. Note single article and female friends (feminine article and $\varphi \backslash \lambda \propto \varsigma$ ). H $\varepsilon \omega \varsigma$ ov $\varepsilon \cup \rho \eta$ here as in verse 4 , only ov added after $\varepsilon \omega \varsigma$ (until which time) as often.

Which I lost ( $\eta v \alpha \pi \omega \lambda \varepsilon \sigma \alpha)$. First aorist active indicative of $\alpha \pi \sigma \lambda \lambda \nu \mu$. She lost the coin (note article). The shepherd did not lose the one sheep.

Luke 15:10
There is joy ( $\gamma \downarrow \nu \varepsilon \tau \alpha \chi \alpha \rho \alpha$ ). More exactly, joy arises. Futuristic present of $\gamma \iota v o \mu \alpha$ (cf. $\varepsilon \sigma \tau \alpha$ in verse 7).

In the presence of the angels of God ( $\varepsilon v \omega \pi \iota \circ \nu \tau \omega v a \gamma \gamma \varepsilon \lambda \omega \nu \tau o v \theta \varepsilon o v$ ). That is to say, the joy of God himself. The angels are in a sense the neighbours of God.

Luke 15:11
Had ( $\varepsilon \chi \chi \varepsilon v$ ). Imperfect active. Note $\varepsilon \chi \omega v$ (verse 4), $\varepsilon \chi \circ u \sigma \alpha$ (verse 8), and now $\varepsilon \not \chi \varepsilon v$. The self-sacrificing care is that of the owner in each case. Here (verses 11-32) we have the most famous of all the parables of Jesus, the Prodigal Son, which is in Luke alone. We have had the Lost Sheep, the Lost Coin, and now the Lost Son. Bruce notes that in the moral sphere there must be self-recovery to give ethical value to the rescue of the son who wandered away. That comes out beautifully in this allegory.

Luke 15:12
The portion ( $\tau \boldsymbol{\mu} \mu \varepsilon \rho \varsigma)$ ). The Jewish law alloted one-half as much to the younger son as to the elder, that is to say one-third of the estate (De 21:17) at the death of the father. The father did not have to abdicate in favour of the sons, but "this very human parable here depicts the impatience of home restraints and the optimistic ambition of youth" (Ragg).

And he divided (o $\delta \varepsilon \delta \iota \varepsilon i \lambda \varepsilon v$ ). The second aorist active indicative of $\delta ı a \iota \rho \varepsilon \omega$, an old and common verb to part in two, cut asunder, divide, but in the N.T. only here and 1Co 12:11. The elder son got his share also of the "substance" or property or estate ( $\tau \eta \varsigma$ ovaiac), "the living" ( $\tau$ ov $\beta$ ıov) as in Mr 12:44, not "life" as in Lu 8:14.

Luke 15:13
Not many days after ( $\mu \varepsilon \tau^{\prime}$ ov $\left.\pi о \lambda \lambda \alpha \varsigma ~ \eta \mu \varepsilon \rho \alpha \varsigma\right)$. Literally, after not many days. Luke is fond of this idiom (7:6; Ac 1:5).

Took his journey ( $\alpha \pi \varepsilon \delta \eta \mu \eta \sigma \varepsilon v$ ). First aorist active indicative of $\alpha \pi o \delta \eta \mu \varepsilon \omega$ (from $\alpha \pi о \delta \eta \mu \circ \varsigma$, away from home). Common verb. In the N.T. here and Mt 21:33; 25:14; Mr 12:1; Lu 20:9. He burned all his bridges behind him, gathering together all that he had.

Wasted ( $\delta \iota \varepsilon \sigma \kappa о \rho \pi \iota \sigma \varepsilon v)$. First aorist active indicative of $\delta \iota a \sigma \kappa о \rho \pi \iota \zeta \omega$, a somewhat rare verb, the very opposite of "gathered together" ( $\sigma v v a \gamma o \gamma \omega v$ ). More exactly he scattered his property. It is the word used of winnowing grain (Mt 25:24).

With riotous living ( $\zeta \omega \nu \alpha \sigma \omega \tau \omega \varsigma)$. Living dissolutely or profligately. The late adverb $\alpha \sigma \omega \tau \omega \varsigma$ (only here in the N.T.) from the common adjective $\alpha \sigma \omega \tau \sigma \varsigma$ ( $\alpha$ privative and $\sigma \omega \zeta \omega$ ), one that cannot be saved, one who does not save, a spendthrift, an abandoned man, a profligate, a prodigal. He went the limit of sinful excesses. It makes sense taken actively or passively (prodigus or perditus), active probably here.

Luke 15:14
 in a bad sense as in Jas 4:3. See on $\delta a \pi \alpha v \eta$ Lu 14:28 .

He (avtoc). Emphasis.
 We use "fall behind" (Vincent) of one in straitened circumstances. Plummer notes the coincidences of Providence. The very land was in a famine when the boy had spent all.

Luke 15:15
Joined himself ( $\varepsilon \kappa о \lambda \lambda \eta \theta \eta$ ). First aorist passive of ко $\lambda \lambda \alpha \omega$, an old verb to glue together, to cleave to. In the N.T. only the passive occurs. He was glued to, was joined to. It is not necessary to take this passive in the middle reflexive sense.

The citizens ( $\tau \omega \nu \pi 0 \lambda \iota \tau \omega v$ ). Curiously enough this common word citizen ( $\pi 0 \lambda \iota \tau \eta \varsigma$ from $\pi 0 \lambda \iota \varsigma$, city) is found in the N.T. only in Luke's writings (15:15; 19:14; Ac 21:39) except in He 8:11 where it is quoted from Jer 38:34.

To feed swine (ßобкعוv रoוןov¢). A most degrading occupation for anyone and for a Jew an unspeakable degradation.

Luke 15:16
He would fain have been filled ( $\varepsilon \pi \varepsilon \theta \nu \mu \varepsilon \chi о \rho \tau \alpha \sigma \theta \eta v \alpha$ ). Literally, he was desiring (longing) to be filled. Imperfect indicative and first aorist passive infinitive. Xop $\tau \alpha \sigma \theta \eta \alpha$ is
from $\chi о \rho \tau \alpha \zeta \omega$ and that from $\chi$ ортоৎ (grass), and so to feed with grass or with anything. Westcott and Hort put $\gamma \varepsilon \mu \iota \sigma \alpha \tau \eta \nu$ коı $\lambda \iota \alpha v$ avtov in the margin (the Textus Receptus).

With the husks ( $\varepsilon \kappa \tau \omega v \kappa \varepsilon \rho \alpha \tau \iota \omega v$ ). The word occurs here alone in the N.T. and is a diminutive of кєрас (horn) and so means little horn. It is used in various senses, but here refers to the pods of the carob tree or locust tree still common in Palestine and around the Mediterannean, so called from the shape of the pods like little horns, Bockshornbaum in German or goat's-horn tree. The gelatinous substance inside has a sweetish taste and is used for feeding swine and even for food by the lower classes. It is sometimes called Saint John's Bread from the notion that the Baptist ate it in the wilderness.

No man gave unto him (ov anyone to allow him even the food of the hogs.

Luke 15:17
But when he came to himself ( $\varepsilon ા \varsigma ~ \varepsilon a v \tau о v ~ \delta \varepsilon \varepsilon \lambda \theta \omega v$ ). As if he had been far from himself as he was from home. As a matter of fact he had been away, out of his head, and now began to see things as they really were. Plato is quoted by Ackerman (Christian Element in Plato) as thinking of redemption as coming to oneself.

Hired servants ( $\mu \circ \sigma$ เo). A late word from $\mu \iota \theta \circ \varsigma$ (hire). In the N.T. only in this chapter. The use of "many" here suggests a wealthy and luxurious home.

Have bread enough and to spare ( $\pi \varepsilon \rho เ \sigma \sigma \varepsilon v o v \tau \alpha \alpha \rho \tau \omega v$ ). Old verb from $\pi \varepsilon \rho \circ \sigma \sigma \circ \varsigma$ and that from $\pi \varepsilon \rho$ (around). Present passive here, "are surrounded by loaves" like a flood.

I perish ( $\varepsilon \gamma \omega \delta \varepsilon \lambda \iota \mu \omega \omega \delta \varepsilon \alpha \pi \sigma \lambda \lambda \nu \mu \alpha)$. Every word here counts: While I on the other hand am here perishing with hunger. It is the linear present middle of $\alpha \pi 0 \lambda \lambda \nu \mu$. Note $\varepsilon \gamma \omega$ expressed and $\delta \varepsilon$ of contrast.

Luke 15:18
I will arise and go ( $\alpha v \alpha \sigma \tau \alpha \varsigma ~ \pi \rho о \rho \varepsilon \cup \sigma о \mu \alpha)$. This determination is the act of the will after he comes to himself and sees his real condition.

I did $\sin (\eta \mu \alpha \rho \tau o v)$. That is the hard word to say and he will say it first. The word means to miss the mark. I shot my bolt and I missed my aim (compare the high-handed demand in verse 12).

Luke 15:19
No longer worthy (оикะт $\alpha \xi_{ı}$ ). Confession of the facts. He sees his own pitiful plight and is humble.

As one ( $\omega \varsigma \varepsilon v \alpha$ ). The hired servants in his father's house are high above him now.
Luke 15:20
To his father ( $\pi \rho \circ \varsigma$ रov $\pi \alpha \tau \varepsilon \rho \alpha$ عavtov). Literally, to his own father. He acted at once on his decision.
 odov understood: While he was yet holding off a distant way. This shows that the father
had been looking for him to come back and was even looking at this very moment as he came in sight.

Ran $(\delta \rho \alpha \mu \omega v)$. Second aorist active participle of the defective verb $\tau \rho \varepsilon \chi \omega$. The eager look and longing of the father.

Kissed ( $\kappa \alpha \tau \varepsilon \varphi i \lambda \eta \sigma \varepsilon v$ ). Note perfective use of $\kappa \alpha \tau \alpha$ kissed him much, kissed him again and again. The verb occurs so in the older Greek.

Luke 15:21
The son made his speech of confession as planned, but it is not certain that he was able to finish as a number of early manuscripts do not have "Make me as one of the hired servants," though Aleph B D do have them. It is probable that the father interrupted him at this point before he could finish.

Luke 15:22
The best robe ( $\sigma \tau 0 \lambda \eta \nu \tau \eta \nu \pi \rho \omega \tau \eta \nu)$. $\Sigma \tau o \lambda \eta$ is an old word for a fine stately garment that comes down to the feet (from $\sigma \tau \varepsilon \lambda \lambda$ o, to prepare, equip), the kind worn by kings ( Mr 16:5; Lu 22:46 ). Literally, "a robe the first." But not the first that you find, but the first in rank and value, the finest in the house. This in contrast with his shabby clothes.

A ring ( $\delta a \kappa \tau \cup \lambda ı v$ ). Common in classical writers and the LXX, but here only in the

Shoes (v $\boldsymbol{\tau} \delta \delta \eta \mu \alpha \tau \alpha)$. Sandals, "bound under." Both sandals and ring are marks of the freeman as slaves were barefooted.

Luke 15:23
The fatted calf ( $\tau 0 v \mu \circ \sigma \chi \circ v$ tov oıtevtov). The calf the fatted one. $\Sigma$ itevtov is the verbal adjective of $\sigma \iota \lambda \varepsilon v \omega$, to feed with wheat ( $\sigma \iota \tau \circ \varsigma$ ). The calf was kept fat for festive occasions, possibly in the hope of the son's return.

Kill ( $\theta v \sigma a t \varepsilon$ ). Not as a sacrifice, but for the feast.
Make merry ( $\varepsilon \nu \varphi \rho \alpha v \theta \omega \mu \varepsilon v$ ). First aorist passive subjunctive (volitive). From $\varepsilon \cup \varphi \rho a ı v \omega$, an old verb from $\varepsilon v$ (well) and $\varphi \rho \eta \nu$ (mind).

Luke 15:24
And is alive ( $\kappa \alpha \alpha v \varepsilon\lceil\eta \sigma \varepsilon v)$ ). First aorist active indicative of $\alpha v \alpha \zeta \alpha \omega$, to live again. Literally, he was dead and he came back to life.

He was lost ( $\eta v \alpha \pi o \lambda \omega \lambda \omega \varsigma$, periphrastic past perfect active of $\alpha \pi \sigma \lambda \lambda \nu \mu$ and intransitive, in a lost state) and he was found ( $\varepsilon v \rho \varepsilon \theta \eta$ ). He was found, we have to say, but this aorist passive is really timeless, he is found after long waiting (effective aorist) The artists have vied with each other in picturing various items connected with this wonderful parable.

Luke 15:25
As he came and drew nigh ( $\omega \varsigma \varepsilon \rho \chi \circ \mu \varepsilon v o \varsigma \eta \gamma \gamma \iota \sigma v \nu$ ). More exactly, "As, coming, he drew nigh," for $\varepsilon \rho \chi \circ \mu \varepsilon v o \varsigma$ is present middle participle and $\eta \gamma \gamma เ \sigma \varepsilon v$ is aorist active indicative.

Music ( $\sigma \nu \mu \varphi \omega v / \alpha \varsigma)$. Our word "symphony." An old Greek word from $\sigma \cup \mu \varphi \omega v o \varsigma$ ( $\sigma \cup v$, together, and $\varphi \omega \vee \eta$, voice or sound),
harmony, concord, by a band of musicians. Here alone in the N.T.
And dancing ( $\kappa \alpha \chi \circ \rho \omega v$ ). An old word again, but here alone in the N.T. Origin uncertain, possibly from opxoc by metathesis (opxรо $\mu$, to dance). A circular dance on the green. Luke 15:26
Servants ( $\pi \alpha \iota \delta \omega v$ ). Not $\delta o u \lambda o$ (bondslaves) as in verse 22. The Greeks often used $\pi \alpha \iota \varsigma$ for servant like the Latin puer. It could be either a hired servant ( $\mu \iota \sigma$ เoc, verse 17) or slave ( $\delta o u \lambda o \varsigma)$.

He inquired ( $\varepsilon \pi v v \theta a v \varepsilon \tau 0)$. Imperfect middle, inquired repeatedly and eagerly.
What these things might be ( $\tau \alpha \vee \varepsilon ŋ \eta \tau \alpha \cup \tau \alpha$ ). Not "poor" Greek as Easton holds, but simply the form of the direct question retained in the indirect. See the direct form as the apodosis of a condition of the fourth class in Ac 17:18. In Ac 10:17 we have the construction with $\alpha v \varepsilon \eta \eta$ of the direct retained in the indirect question. So also in Lu 1:62: See Robertson, Grammar, p. 1044.

Luke 15:27
Is come ( $\eta \kappa \varepsilon$ ). Present indicative active, but a stem with perfect sense, old verb $\eta \kappa \omega$ retaining this use after perfect tenses came into use (Robertson, Grammar, p. 893).

Hath killed ( $\varepsilon \forall v \sigma \varepsilon v)$. Aorist active indicative and literally means,
did kill . Difficult to handle in English for our tenses do not correspond with the Greek.
Hath received ( $\alpha \pi \varepsilon \lambda \alpha \beta \varepsilon v$ ). Second aorist active indicative with similar difficulty of translation. Note $\alpha \pi \sigma$ in compositions, like re-in "receive," hath gotten him back ( $\alpha \pi-$ ).

Safe and sound ( $v \gamma \iota \omega v o v \tau \alpha$ ). Present active participle of $v \gamma \omega^{\circ} \nu \omega$ from $v \gamma ı \varsigma$, to be in good health. In spite of all that he has gone through and in spite of the father's fears.

Luke 15:28
But he was angry ( $\omega \rho \gamma\llcorner\sigma \theta \eta$ ). First aorist (ingressive) passive indicative. But he became angry, he flew into a rage (o $\rho \gamma \eta$ ). This was the explosion as the result of long resentment towards the wayward brother and suspicion of the father's partiality for the erring son.

Would not go in (ouk $\eta \theta \varepsilon \lambda \varepsilon v \varepsilon เ \sigma \varepsilon \lambda \theta \varepsilon เ v$ ). Imperfect tense (was not willing, refused) and aorist active (ingressive) infinitive.

Entreated ( $\pi \alpha \rho \varepsilon \kappa \alpha \lambda \varepsilon$ ). Imperfect tense, he kept on beseeching him.
Luke 15:29
Do I serve thee ( $\delta o u \lambda \varepsilon v \omega \sigma o$ ). Progressive present tense of this old verb from $\delta o u \lambda o s$ (slave) which the elder son uses to picture his virtual slavery in staying at home and perhaps with longings to follow the younger son (Robertson, Grammar, p. 879).

Transgressed ( $\pi \alpha \rho \eta \lambda \theta o v$ ). Second aorist active indicative of $\pi \alpha \rho \varepsilon \rho \chi \circ \mu \alpha$, to pass by. Not even once (aorist) in contrast with so many years of service (linear present).

A kid ( $\varepsilon \rho!\varphi \rho v$ ). Some MSS. have $\varepsilon \rho!\varphi \vdash \circ$, diminutive, a little kid. So margin of Westcott and Hort. B has it also in Mt 25:32, the only other N.T. passage where the word occurs.

That I might make merry ( $\imath v \alpha \varepsilon \cup \varphi \rho \alpha v \theta \omega$ ). Final clause, first aorist passive subjunctive of the same verb used in verses 23,25 .

Luke 15:30
This thy son (o vos oov outoc). Contempt and sarcasm. He does not say: "This my brother."

Came ( $\eta \lambda \theta \varepsilon \nu$ ). He does not even say, came back or came home.
Devoured ( $\kappa \alpha \tau \alpha \varphi \alpha \gamma \omega v$ ). We say, "eaten up," but the Greek has, "eaten down" (perfective use of ката-). Suggested by the feasting going on.

With harlots ( $\mu \varepsilon \tau \alpha \pi о \rho v \omega v$ ). This may be true (verse 13), but the elder son did not know it to be true. He may reflect what he would have done in like case.

Luke 15:31
Son (T\&кvov). Child.
Thou ( $\sigma v$ ). Expressed and in emphatic position in the sentence. He had not appreciated his privileges at home with his father.

Luke 15:32
It was meet $(\varepsilon \delta \varepsilon)$. Imperfect tense. It expressed a necessity in the father's heart and in the joy of the return that justifies the feasting. Ev $\rho \rho a v \theta \eta \nu \alpha$ is used again (first aorist passive infinitive) and $\chi \alpha \rho \eta \nu \alpha$ (second aorist passive infinitive) is more than mere hilarity, deepseated joy. The father repeats to the elder son the language of his heart used in verse 24 to his servants. A real father could do no less. One can well imagine how completely the Pharisees and scribes (verse 2) were put to silence by these three marvellous parables. The third does it with a graphic picture of their own attitude in the case of the surly elder brother. Luke was called a painter by the ancients. Certainly he has produced a graphic pen picture here of God's love for the lost that justifies forever the coming of Christ to the world to seek and to save the lost. It glorifies also soul-saving on the part of his followers who are willing to go with Jesus after the lost in city and country, in every land and of every race.

## Luke 16

Luke 16:1
Unto the disciples ( $\kappa \alpha \pi \rho \circ \varsigma$ тov $\mu \alpha \theta \eta \tau \alpha \varsigma$ ). The three preceding parables in chapter 15 exposed the special faults of the Pharisees, "their hard exclusiveness, self-righteousness, and contempt for others" (Plummer). This parable is given by Luke alone. The ка (also) is not translated in the Revised Version. It seems to mean that at this same time, after speaking to the Pharisees (chapter 15), Jesus proceeds to speak a parable to the disciples ( 16:1-13), the parable of the Unjust Steward. It is a hard parable to explain, but Jesus opens the door by the key in verse 9 .

Which had a steward (os $\eta \not \subset \varepsilon v$ oוкоvo $\mu \circ v$ ). Imperfect active, continued to have. Steward is house-manager or overseer of an estate as already seen in Lu 12:42.

Was accused ( $\delta \iota \varepsilon \beta \lambda \eta \theta \eta$ ). First aorist indicative passive, of $\delta \iota \alpha \beta \alpha \lambda \lambda \omega$, an old verb, but here only in the N.T. It means to throw across or back and forth, rocks or words and so to
 (slanderer) is this same root and it is used even of women, she-devils ( $1 \mathrm{Ti} 3: 11$ ).

That he was wasting ( $\omega \varsigma \delta \iota \alpha \sigma \kappa 0 \rho \pi \iota \zeta \omega v$ ). For the verb see on 15:13. The use of $\omega \varsigma$ with the participle is a fine Greek idiom for giving the alleged ground of a charge against one.

His goods ( $\tau \alpha$ v $\pi \alpha \rho \chi \circ v \tau \alpha \alpha \cup \tau 0 v)$. "His belongings," a Lukan idiom.
Luke 16:2
What is this that I hear? ( $\tau$ тоито $\alpha \kappa о \omega \omega$;). There are several ways of understanding this terse Greek idiom. The Revised Version (above) takes $\tau$ to be equal to $\tau \varepsilon \sigma \tau \iota v$ tov $\frac{0}{}$ $\alpha \kappa о v \omega$; That is a possible use of the predicate touto. Another way is to take $\tau$ to be exclamatory, which is less likely. Still another view is that $\tau$ is " Why": "Why do I hear this about thee?" See Ac 14:15 where that is the idiom employed.

Render ( $\alpha \pi \mathrm{o} \delta \mathrm{o})$ ). Second aorist active imperative of $\alpha \pi \mathrm{o} \delta \iota \delta \omega \mu$, Give back (and at once).
The account ( $\tau 0 v \lambda o \gamma o v$ ). The reckoning or report. Common use of $\lambda$ oүoc.
Stewardship (oккоvонац). Same root as oוкоvоноऽ (steward). This demand does not necessarily mean dismissal if investigation proved him innocent of the charges. But the reason given implies that he is to be dismissed:

Thou canst no longer ( $o v \gamma \alpha \rho \delta u v \eta$ ).
Luke 16:3
Within himself ( $\varepsilon v \varepsilon \alpha u \tau \omega)$. As soon as he had time to think the thing over carefully. He knew that he was guilty of embezzlement of the Master's funds.

Taketh away ( $\alpha \varphi \alpha \iota \rho \varepsilon \iota \tau \alpha$ ). Present (linear) middle indicative of $\alpha \varphi \alpha \iota \rho \varepsilon \omega$, old verb to take away. Here the middle present means, He is taking away for himself.
 ashamed to begin to beg. The participle, $\varepsilon \pi \alpha \iota \tau \omega v$ aı $\sigma \chi \nu v o \mu \alpha$ would mean, ashamed while begging, ashamed of begging while doing it.

Luke 16:4
I am resolved $(\varepsilon \gamma \nu \omega v)$. Second aorist active indicative of $\gamma ı \nu \omega \sigma \kappa \omega$. A difficult tense to reproduce in English. I knew, I know, I have known, all miss it a bit. It is a burst of daylight to the puzzled, darkened man: I've got it, I see into it now, a sudden solution.

What to do ( $\tau \pi \circ \neg \eta \sigma \omega)$. Either deliberative first aorist active subjunctive or deliberative future active indicative.

When I am put out (o $\tau \alpha \nu \mu \varepsilon \tau \alpha \sigma \tau \alpha \theta \omega$ ). First aorist passive subjunctive of $\mu \varepsilon \theta$ เб $\tau \eta \mu$, ( $\mu \varepsilon \tau \alpha, \iota \sigma \tau \eta \mu$ ), old verb, to transpose, transfer, remove. He is expecting to be put out.

They may receive me ( $\delta \varepsilon \xi \omega \nu \tau \alpha$ ). First aorist middle subjunctive of $\delta \varepsilon \chi o \mu \alpha$, common verb. Subjunctive with final particle iva. He wishes to put the debtors under obligation to himself.

Debtors ( $\tau \omega v \chi \rho \varepsilon о \varphi i \lambda \varepsilon \tau \omega v$ ). A late word. In the N.T. only here and Lu 7:41 from $\chi \rho \varepsilon o \varsigma$,

Luke 16:6
Measures ( $\beta$ atovc). Transliterated word for Hebrew bath, between eight and nine gallons. Here alone in the N.T. Not the same word as $\beta$ atoc ( bush ) in Lu 6:44 .

Thy bond ( $\sigma o v \tau \alpha \gamma \rho \alpha \mu \mu \alpha \tau \alpha$ ). Thy writings, thy contracts, thy note.
Quickly ( $\tau \alpha \chi \varepsilon \omega \varsigma)$. It was a secret arrangement and speed was essential.
Luke 16:7
Measures (короия). Another Hebrew word for dry measure. The Hebrew cor was about ten bushels. Data are not clear about the Hebrew measures whether liquid ( bath ) or dry ( cor ).

Luke 16:8
His lord commended ( $\varepsilon \pi \eta \imath v \varepsilon \sigma \varepsilon v$ o кирюoৎ). The steward's lord praised him though he himself had been wronged again (see verse 1 "wasting his goods").

The unrighteous steward ( $\tau$ о оккоvо $\mu \circ \vee \tau \eta \varsigma \alpha \delta ı к ⿺ 辶 \varsigma$ ). Literally, the steward of unrighteousness. The genitive is the case of genus, species, the steward distinguished by unrighteousness as his characteristic. See "the mammon of unrighteousness" in verse 9. See "the forgetful hearer" in Jas 1:25. It is a vernacular idiom common to Hebrew, Aramaic, and the Koine.

Wisely $(\varphi \rho \circ v \mu \omega \varsigma)$. An old adverb, though here alone in the N.T. But the adjective $\varphi \rho o v \mu \mathrm{o}$ from which it comes occurs a dozen times as in Mt 10:16. It is from $\varphi \rho o v \varepsilon \omega$ and that from $\varphi \rho \eta \nu$, the mind (1Co 14:20), the discerning intellect. Perhaps "shrewdly" or "discreetly" is better here than "wisely." The lord does not absolve the steward from guilt and he was apparently dismissed from his service. His shrewdness consisted in finding a place
to go by his shrewdness. He remained the steward of unrighteousness even though his shrewdness was commended.

For (o $\tau$ ). Probably by this second o Jesus means to say that he cites this example of shrewdness because it illustrates the point. "This is the moral of the whole parable. Men of the world in their dealings with men like themselves are more prudent than the children of light in their intercourse with one another" (Plummer). We all know how stupid Christians can be in their co-operative work in the kingdom of God, to go no further.

Wiser than ( $\varphi \rho о \nu \mu \omega \tau \varepsilon \rho о$ v $\tau \varepsilon \rho$ ). Shrewder beyond, a common Greek idiom.
Luke 16:9
By the mammon of unrighteousness ( $\varepsilon \kappa \operatorname{\tau ov} \mu \alpha \mu \omega v \alpha \tau \eta \varsigma \alpha \delta \iota \kappa เ \alpha \varsigma$ ). By the use of what is so often evil (money). In Mt 6:24 mammon is set over against God as in Lu 16:13 below. Jesus knows the evil power in money, but servants of God have to use it for the kingdom of God. They should use it discreetly and it is proper to make friends by the use of it.

When it shall fail (o $\tau \alpha v \varepsilon \kappa \lambda \iota \pi \eta$ ). Second aorist active subjunctive with o $o \tau \alpha v$, future time. The mammon is sure to fail.

That they may receive you into the eternal tabernacles ( $\downarrow v \alpha \delta \varepsilon \xi \omega v \tau \alpha$ v $\mu \alpha \varsigma \varepsilon \_\varsigma \tau \alpha$, at $\omega v$ vovৎ $\sigma \kappa \eta v a \varsigma)$. This is the purpose of Christ in giving the advice about their making friends by the use of money. The purpose is that those who have been blessed and helped by the money may give a welcome to their benefactors when they reach heaven. There is no thought here of purchasing an entrance into heaven by the use of money. That idea is wholly foreign to the context. These friends will give a hearty welcome when one gives him mammon here. The wise way to lay up treasure in heaven is to use one's money for God here on earth. That will give a cash account there of joyful welcome, not of purchased entrance.

Luke 16:10
Faithful in a very little ( $\pi เ \sigma \tau o \varsigma \varepsilon v \varepsilon \lambda \alpha \chi เ \sigma \tau \omega)$. Elative superlative. One of the profoundest sayings of Christ. We see it in business life. The man who can be trusted in a very small thing will be promoted to large responsibilities. That is the way men climb to the top. Men who embezzle in large sums began with small sums. Verses 10-13 here explain the point of the preceding parables.

Luke 16:11
Faithful in the unrighteous mammon ( $\varepsilon \nu \tau \omega \alpha \delta \iota \kappa \omega \mu \alpha \mu \omega v \alpha$ ). In the use of what is considered "unrighteous" as it so often is. Condition of the first class, "if ye did not prove to be" ( $\varepsilon$ оик $\varepsilon \gamma \varepsilon v \varepsilon \sigma \theta \varepsilon$ ). Failure here forfeits confidence in "the true riches" ( $\tau \mathrm{a} \alpha \lambda \eta \theta \iota v o v$ ). There is no sadder story than to see a preacher go down by the wrong use of money, caught in this snare of the devil.

Luke 16:12
That which is your own ( $\tau 0 \mathrm{v} \mu \varepsilon \tau \varepsilon \rho \circ \mathrm{v}$ ). But Westcott and Hort read to $\eta \mu \varepsilon \tau \varepsilon \rho \circ v$ (our own) because of B L Origen. The difference is due to itacism in the pronunciation of $v$-and
$\eta$ alike (long ). But the point in the passage calls for "yours" as correct. Earthly wealth is ours as a loan, a trust, withdrawn at any moment. It belongs to another $(\varepsilon v \tau \omega \alpha \lambda \lambda o \tau \rho \omega \omega)$. If you did not prove faithful in this, who will give you what is really yours forever? Compare "rich toward God" (Lu 12:21 ).

Luke 16:13
Servant (oıкะтŋऽ). Household (огкоऽ) servant. This is the only addition to Mt 6:24 where otherwise the language is precisely the same, which see. Either Matthew or Luke has put the $\lambda o y$ ov in the wrong place or Jesus spoke it twice. It suits perfectly each context. There is no real reason for objecting to repetition of favourite sayings by Jesus.

Luke 16:14
Who were lovers of money ( $\varphi \backslash \lambda \alpha \rho \gamma \cup \rho \circ$ v $\pi \alpha \rho \chi \circ v \tau \varepsilon \varsigma)$. Literally, being lovers of money. $\Phi เ \lambda \alpha \rho \gamma \rho_{\rho o}$ is an old word, but in the N.T. only here and 2Ti 3:2 . It is from $\varphi \backslash \lambda o s$ and арүирос.

Heard ( $\eta$ коvov). Imperfect active, were listening (all the while Jesus was talking to the disciples (verses 1-13).

And they scoffed at him ( $\kappa \alpha \varepsilon \xi \varepsilon \mu \nu \kappa \tau \eta \rho \iota \zeta$ ov). Imperfect active again of $\varepsilon \kappa \mu \nu \kappa \tau \eta \rho \iota \zeta \omega$. LXX where late writers use simple verb. In the N.T. only here and Lu 23:35. It means to turn out or up the nose at one, to sneer, to scoff. The Romans had a phrase, naso adunco suspendere, to hang on the hooked nose (the subject of ridicule). These money-loving Pharisees were quick to see that the words of Jesus about the wise use of money applied to them. They had stood without comment the three parables aimed directly at them (the lost sheep, the lost coin, the lost son). But now they do not remain quiet while they hear the fourth parable spoken to the disciples. No words were apparently spoken, but their eyes, noses, faces were eloquent with a fine disdain.

Luke 16:15
That justify yourselves (o סıкaıovvteऽ عavtov¢). They were past-masters at that and were doing it now by upturned noses.

An abomination in the sight of God ( $\beta \delta \varepsilon \lambda \nu \gamma \mu \alpha \varepsilon v \omega \pi \iota \circ v$ tov $\theta \varepsilon o v)$. See on Mt 24:15; Mr 13:14 for this LXX word for a detestable thing as when Antiochus Epiphanes set up an altar to Zeus in place of that to Jehovah. There is withering scorn in the use of this phrase by Jesus to these pious pretenders.

Luke 16:16
Entereth violently into it ( $\varepsilon \varsigma \varsigma \nu \tau \tau \nu \beta\langle\alpha \zeta \varepsilon \tau \alpha$ ). A corresponding saying occurs in Mt 11:12 in a very different context. In both the verb $\beta ı \alpha \zeta \varepsilon \tau \alpha$, occurs also, but nowhere else in the N.T. It is present middle here and can be middle or passive in Matthew, which see. It is rare in late prose. Deissmann (Bible Studies, p. 258) cites an inscription where $\beta \iota \alpha \zeta_{o \mu \alpha}$ is reflexive middle and used absolutely. Here the meaning clearly is that everyone forces his
way into the kingdom of God, a plea for moral enthusiasm and spiritual passion and energy that some today affect to despise.

Luke 16:17
One tittle ( $\mu$ iav кع $\rho \varepsilon \alpha v$ ). See on Mt 5:18 .
Luke 16:18
Committeth adultery ( $\mu$ oxzeve). Another repeated saying of Christ (Mt 5:32; Mr 10:11f.; Mt 19:9f. ). Adultery remains adultery, divorce or no divorce, remarriage or no marriage.

Luke 16:19
He was clothed ( $\varepsilon v \varepsilon \delta \iota \delta v \sigma \kappa \varepsilon \tau \sigma$ ). Imperfect middle of $\varepsilon v \delta \iota \delta v \sigma \kappa \omega$, a late intensive form of $\varepsilon v \delta v \omega$. He clothed himself in or with. It was his habit.

Purple ( $\pi о \rho \varphi \cup \rho a v)$. This purple dye was obtained from the purple fish, a species of mussel or $\mu \nu \rho \varepsilon \xi$ ( $1 \mathrm{Macc} .4: 23$ ). It was very costly and was used for the upper garment by the wealthy and princes (royal purple). They had three shades of purple (deep violet, deep scarlet or crimson, deep blue). See also Mr 15:17,20; Re 18:12 .

Fine linen ( $\beta \cup \sigma \sigma \circ v$ ).
Byssus or Egyptian flax (India and Achaia also). It is a yellowed flax from which fine linen was made for undergarments. It was used for wrapping mummies. "Some of the Egyptian linen was so fine that it was called woven air" (Vincent). Here only in the N.T. for the adjective $\beta$ voбrvos occurs in Re 18:12; 19:8,14 .

Faring sumptuously ( $\varepsilon \cup \varphi \rho \alpha \downarrow \nu \circ \mu \varepsilon v o \varsigma \lambda \alpha \mu \pi \rho \omega \varsigma)$.
Making merry brilliantly . The verb $\varepsilon \cup \varphi \rho a ı v o \mu \alpha$ we have already had in 12:19; $15: 23,25,32$. $\Lambda \alpha \mu \pi \rho \omega \varsigma$ is an old adverb from $\lambda \alpha \mu \pi \rho o \varsigma$, brilliant, shining, splendid, magnificent. It occurs here only in the N.T. This parable apparently was meant for the Pharisees (verse 14) who were lovers of money. It shows the wrong use of money and opportunity.

Luke 16:20
Beggar ( $\pi \tau \omega \chi \circ \varsigma$ ). Original meaning of this old word. See on Mt 5:3. The name Lazarus
 with a pestilential disease.

Was laid ( $\varepsilon \beta \varepsilon \beta \lambda \eta \tau 0$ ). Past perfect passive of the common verb $\beta \alpha \lambda \lambda \omega$. He had been flung there and was still there, "as if contemptuous roughness is implied" (Plummer).

At his gate ( $\pi \rho \circ \varsigma \tau 0 v \pi \nu \lambda \omega v \alpha \alpha v \tau o v$ ). Right in front of the large portico or gateway, not necessarily a part of the grand house, porch in Mt 26:71 .

Full of sores ( $\varepsilon \iota \lambda \kappa \omega \mu \varepsilon v o \varsigma)$. Perfect passive participle of $\varepsilon \lambda \kappa \sigma \omega$, to make sore, to ulcerate, from $\varepsilon \lambda \kappa о \varsigma$, ulcer (Latin ulcus). See use of $\varepsilon \lambda \kappa о \varsigma$ in verse 21. Common in Hippocrates and other medical writers. Here only in the N.T.

Luke 16:21
With the crumbs that fell ( $\alpha \pi 0 \tau \omega v \pi \iota \pi \tau o v \tau \omega v$ ). From the things that fell from time to time. The language reminds one of Lu 15:16 (the prodigal son) and the Syro-Phoenician
woman (Mr 7:28). Only it does not follow that this beggar did not get the scraps from the rich man's table. Probably he did, though nothing more. Even the wild street dogs would get them also.

Yea, even the dogs ( $\alpha \lambda \lambda \alpha$ ка о киขєৎ). For $\alpha \lambda \lambda \alpha$ ка see also 12:7; 24:22. A $\lambda \lambda \alpha$ can mean "yea," though it often means "but." Here it depends on how one construes Luke's meaning. If he means that he was dependent on casual scraps and it was so bad that even the wild dogs moreover were his companions in misery, the climax came that he was able to drive away the dogs. The other view is that his hunger was unsatisfied, but even the dogs increased his misery.

Licked his sores ( $\varepsilon \pi \varepsilon \lambda \varepsilon \iota \chi \circ v \tau \alpha \varepsilon \lambda \kappa \eta \alpha v \tau o v$ ). Imperfect active of $\varepsilon \pi i \lambda \varepsilon \iota \chi \omega$, a late vernacular Koine verb, to lick over the surface. It is not clear whether the licking of the sores by the dogs added to the misery of Lazarus or gave a measure of comfort, as he lay in his helpless condition. "Furrer speaks of witnessing dogs and lepers waiting together for the refuse" (Bruce). It was a scramble between the dogs and Lazarus.

Luke 16:22
Was borne $(\alpha \pi \varepsilon v \varepsilon \chi \theta \eta v \alpha)$. First aorist passive infinitive from $\alpha \pi \sigma \varphi \varepsilon \rho \omega$, a common compound defective verb. The accusative case of general reference ( $\alpha v \tau \sigma v$ ) is common with the infinitive in such clauses after $\varepsilon \gamma \varepsilon v \varepsilon \tau \sigma$, like indirect discourse. It is his soul, of course, that was so borne by the angels, not his body.

Into Abraham's bosom ( $\varepsilon \iota \varsigma \tau o v$ о $\lambda \pi \sigma \nu \mathrm{A} \beta \rho \alpha \alpha \mu$ ). To be in Abraham's bosom is to the Jew to be in Paradise. In Joh 1:18 the Logos is in the bosom of the Father. Abraham, Isaac, and Jacob are in heaven and welcome those who come (Mt 8:11; 4Macc. 14:17). The beloved disciple reclined on the bosom of Jesus at the last passover (Joh 13:23) and this fact indicates special favour. So the welcome to Lazarus was unusual.

Was buried ( $\varepsilon \tau \alpha \varphi \eta$ ). Second aorist (effective) passive of the common verb $\theta a \pi \tau \omega$. Apparently in contrast with the angelic visitation to the beggar.

Luke 16:23
In Hades ( $\varepsilon \nu \tau \omega$ Haı $\delta \eta$ ). See on Mt 16:18 for discussion of this word. Lazarus was in Hades also for both Paradise (Abraham's bosom) and Gehenna are in the unseen world beyond the grave.

In torments ( $\varepsilon \nu \beta \alpha \sigma \alpha v o \iota s)$. The touchstone by which gold and other metals were tested, then the rack for torturing people. Old word, but in the N.T. only here, Lu 16:28; Mt 4:24 .

Sees ( $o \rho \alpha$ ). Dramatic present indicative. The Jews believed that Gehenna and Paradise were close together. This detail in the parable does not demand that we believe it. The picture calls for it.

From afar ( $\alpha \pi о \mu \alpha \kappa \rho о \theta \varepsilon v$ ). Pleonastic use of $\alpha \pi о$ as $\mu \alpha \kappa \rho о \theta \varepsilon v$ means
from afar .
Luke 16:24

That he may dip (ıva $\beta \alpha \psi \eta$ ). First aorist active subjunctive of $\beta \alpha \pi \tau \omega$, common verb, to dip.

In water (vסatoc). Genitive, the specifying case, water and not something else.
Cool ( $\kappa \alpha \tau \alpha \psi \nu \xi \eta)$. First aorist active subjunctive of $\kappa \alpha \tau \alpha \psi v \chi \omega$, a late Greek compound, to cool off, to make cool. Only here in the N.T. but common in medical books. Note perfective use of kata- (down). A small service that will be welcome.

For I am in anguish (o o o $v v \omega \omega \mu$ ). The active has a causative sense to cause intense pain, the middle to torment oneself ( $\operatorname{Lu}$ 2:48; Ac 20:38) , the passive to be translated as here. Common verb, but no other examples in the N.T.

Luke 16:25
Receivedst ( $\alpha \pi \varepsilon \lambda \alpha \beta \varepsilon \varsigma$ ). Second aorist indicative of $\alpha \pi \sigma \lambda \alpha \mu \beta \alpha v \omega$, old verb to get back what is promised and in full. See also $\mathrm{Lu} 6: 34 ; 18: 30 ; 23: 41$.

Evil things ( $\tau \alpha \kappa \alpha \kappa \alpha$ ). Not "his," but "the evil things" that came upon him.
Thou art in anguish (o $\delta u v a \sigma \alpha$ ). Like каuұ $\alpha \sigma \alpha$ in Ro 2:17. They contracted - $\alpha \varepsilon \sigma \alpha$ without the loss of $\varsigma$. Common in the Koine.

Luke 16:26
Beside all this ( $\varepsilon v \pi \alpha \sigma$ тov $\tau o \iota)$.
In all these things (or regions).
Gulf ( $\chi \alpha \sigma \mu \alpha$ ). An old word from $\chi \alpha \iota \nu \omega$, to yawn, our chasm, a gaping opening. Only here in the N.T.

Is fixed ( $\varepsilon \sigma \tau \eta \rho ı \kappa \tau \alpha)$. Perfect passive indicative of $\sigma \tau \eta \rho!\zeta \omega$, old verb (see on Lu 9:51). Permanent chasm.

May not be able ( $\mu \eta \delta v v \omega v \tau \alpha$ ). Present middle subjunctive of $\delta v v a \mu \alpha$. The chasm is there on purpose ( that not, $o \pi \omega \varsigma \mu \eta$ ) to prevent communication.

Luke 16:27
That you send him (iva $\pi \varepsilon \mu \psi \eta \iota \varsigma \alpha v \tau o v)$. As if he had not had a fair warning and opportunity. The Roman Catholics probably justify prayer to saints from this petition from the Rich Man to Abraham, but both are in Hades (the other world). It is to be observed besides, that Abraham makes no effort to communicate with the five brothers. But heavenly recognition is clearly assumed. Dante has a famous description of his visit to the damned (Purg. iii, 114).

Luke 16:28
That he may testify ( $\mathrm{o} \pi \omega \varsigma \delta ı \alpha \mu \alpha \rho \tau v \rho \eta \tau \alpha$ ). An old verb for solemn and thorough ( $\delta ı \alpha-$ ) witness. The Rich Man labours under the delusion that his five brothers will believe the testimony of Lazarus as a man from the dead.

Luke 16:29

Let them hear them ( $\alpha \kappa о \cup \sigma \alpha \tau \omega \sigma \alpha v \alpha \nu \tau \omega v$ ). Even the heathen have the evidence of nature to show the existence of God as Paul argues in Romans so that they are without excuse (Ro 1:20f.).

Luke 16:30
They will repent ( $\mu \varepsilon \tau \alpha v o \eta \sigma o v \sigma \iota v$ ). The Rich Man had failed to do this and he now sees that it is the one thing lacking. It is not wealth, not poverty, not alms, not influence, but repentance that is needed. He had thought repentance was for others, not for all.

Luke 16:31
Neither will they be persuaded (ov $\delta^{\prime} \pi \varepsilon \iota \sigma \theta \eta \sigma o v \tau \alpha$ ). First future passive of $\pi \varepsilon 1 \theta \omega$. Gressmann calls attention to the fact that Jesus is saying this in the conclusion of the parable. It is a sharp discouragement against efforts today to communicate with the dead. "Saul was not led to repentance when he saw Samuel at Endor nor were the Pharisees when they saw Lazarus come forth from the tomb. The Pharisees tried to put Lazarus to death and to explain away the resurrection of Jesus" (Plummer). Alford comments on the curious fact that Lazarus was the name of the one who did rise from the dead but whose return from the dead "was the immediate exciting cause of their (Pharisees) crowning act of unbelief."

## Luke 17

Luke 17:1
It is impossible ( $\alpha v \varepsilon v \delta \varepsilon \kappa \tau o v \varepsilon \sigma \tau \iota v$ ). See ouk $\varepsilon v \delta \varepsilon \chi \varepsilon \tau \alpha$ in 13:33. Alpha privative ( $\alpha v-$-) and $\varepsilon v \delta \varepsilon \kappa \tau о \varsigma$, verbal adjective, from $\varepsilon v \delta \varepsilon \chi \circ \mu \alpha$. The word occurs only in late Greek and only here in the N.T. The meaning is inadmissible, unallowable.

But that occasions of stumbling should come ( $\tau 0 v \tau \alpha \sigma \kappa \alpha v \delta \alpha \lambda \alpha \mu \eta \varepsilon \lambda \theta \varepsilon ı v$ ). This genitive articular infinitive is not easy to explain. In Ac 10:25 there is another example where the genitive articular infinitive seems to be used as a nominative (Robertson, Grammar, p. 1040). The loose Hebrew infinitive construction may have a bearing here, but one may recall that the original infinitives were either locatives $(-\varepsilon v)$ or datives $(-\alpha)$. T $\alpha \sigma \kappa \alpha \nu \delta \alpha \lambda \alpha$ is simply the accusative of general reference. Literally, the not coming as to occasions of stumbling. For $\sigma \kappa \alpha v \delta \alpha \lambda$ ov (a trap) see on Mt 5:29; 16:23. It is here only in Luke. The positive form of this saying appears in Mt 18:7, which see.

Luke 17:2
It were well for him ( $\lambda v \sigma i \tau \varepsilon \lambda \varepsilon \alpha v \tau \omega)$. An old word, but only here in the N.T., from $\lambda v \sigma \iota \tau \lambda \lambda \eta \varsigma$ and this from $\lambda v \omega$, to pay, and $\tau \alpha \tau \varepsilon \lambda \eta$, the taxes. So it pays the taxes, it returns expenses, it is profitable. Literally here, "It is profitable for him" (dative case, $\alpha \cup \tau \omega$ ). Matthew has $\sigma \nu \mu \varphi \varepsilon \rho \varepsilon$ (it is advantageous, bears together for).

If a millstone were hanged ( $\left.\varepsilon \lambda_{\lambda} \theta_{0} \varsigma \mu \nu \lambda_{\iota \kappa}<\varsigma \pi \varepsilon \rho เ \kappa \varepsilon \iota \tau \alpha\right)$. Literally, "if a millstone is hanged." Present passive indicative from $\pi \varepsilon \rho \not \kappa \varepsilon \mu \alpha$ (to lie or be placed around). It is used as a perfect passive of $\pi \varepsilon \rho \iota \tau 1 \theta \eta \mu$. So it is a first-class condition, determined as fulfilled, not second-class as the English translations imply. Mu $\lambda_{ı}$ кос is simply a stone ( $\lambda_{\imath} \theta \circ \varsigma$ ), belonging to a mill. Here only in the text of Westcott and Hort, not in Mr 9:42 which is like Mt 18:6 $\mu \nu \lambda o s$ ovıкos where the upper millstone is turned by an ass, which see.

Were thrown ( $\varepsilon \rho \rho \iota \pi \tau \alpha$ ). Perfect passive indicative from $\rho \iota \pi \tau \omega$, old verb. Literally, is thrown or has been thrown or cast or hurled. Mark has $\beta \varepsilon \beta \lambda \eta \tau \alpha$ and Matthew кат $\alpha \pi \sigma v \tau 1 \sigma \theta \eta$, which see, all three verbs vivid and expressive. Rather than $(\eta)$. The comparative is not here expressed before $\eta$ as one would expect. It is implied in $\lambda v \sigma i \tau \varepsilon \lambda \varepsilon$. See the same idiom in Lu 15:7.

Luke 17:3
If thy brother $\sin (\varepsilon \alpha v \alpha \mu \alpha \rho \tau \eta)$. Second aorist (ingressive) subjunctive in condition of third class.

Luke 17:4
Seven times in a day ( $\varepsilon \pi \tau \alpha \kappa \iota \varsigma \tau \eta \varsigma \eta \mu \varepsilon \rho \alpha \varsigma)$. Seven times within the day. On another occasion Peter's question (Mt 18:21) brought Christ's answer "seventy times seven" (verse 22), which see. Seven times during the day would be hard enough for the same offender.

Luke 17:5

Increase ( $\pi \rho \circ \sigma \theta \varepsilon \varsigma)$. Second aorist active imperative of $\pi \rho \circ \sigma \tau 1 \theta \eta \mu$, to add to. Bruce thinks that this sounds much like the stereotyped petition in church prayers. A little reflection will show that they should answer the prayer themselves.

Luke 17:6
If ye have ( $\varepsilon \varepsilon \chi \varepsilon \tau \varepsilon)$. Condition of the first class, assumed to be true.
Ye would say ( $\varepsilon \lambda \varepsilon \gamma \varepsilon \tau \varepsilon \alpha v$ ). Imperfect active with $\alpha v$ and so a conclusion (apodosis) of the second class, determined as unfulfilled, a mixed condition therefore.

Sycamine tree ( $\sigma \cup \kappa \alpha \mu \nu \omega)$. At the present time both the black mulberry (sycamine) and the white mulberry (sycamore) exist in Palestine. Luke alone in the N.T. uses either word, the sycamine here, the sycamore in 19:4. The distinction is not observed in the LXX, but it is observed in the late Greek medical writers for both trees have medicinal properties. Hence it may be assumed that Luke, as a physician, makes the distinction. Both trees differ from the English sycamore. In Mt 17:20 we have "mountain" in place of "sycamine tree."

Be thou rooted up ( $\varepsilon \kappa \rho \iota \zeta \omega \theta \eta \tau)$. First aorist passive imperative as is $\varphi \cup \tau \varepsilon \cup \theta \eta \tau$.
Would have obeyed (v $\quad \eta \kappa \sigma \cup \sigma \varepsilon v \alpha v$ ). First aorist active indicative with $\alpha \nu$, apodosis of a second-class condition (note aorist tense here, imperfect $\varepsilon \lambda \varepsilon \gamma \varepsilon \tau \varepsilon$ ).

Luke 17:7
Sit down to meat (avađع $\sigma \varepsilon$ ). Recline (for the meal). Literally, fall up (or back).
Luke 17:8
And will not rather say ( $\alpha \lambda \lambda^{\prime}$ ovk $\varepsilon \rho \varepsilon$ ).
But will not say? Оvк in a question expects the affirmative answer.
Gird thyself ( $\pi \varepsilon \rho \downharpoonright \zeta \omega \sigma \alpha \mu \varepsilon v o \varsigma)$. Direct middle first aorist participle of $\pi \varepsilon \rho \downharpoonright \zeta \omega v \nu v \mu$, to gird around.

Till I have eaten and drunken ( $\varepsilon \omega \varsigma \varphi \alpha \gamma \omega \kappa \alpha \pi \omega \omega$ ). More exactly, till I eat and drink. The second aorist subjunctives are not future perfects in any sense, simply punctiliar action, effective aorist.

Thou shalt eat and drink ( $\varphi \propto \gamma \varepsilon \sigma \alpha \kappa \alpha \pi \not \approx \sigma \alpha$ ). Future middle indicative second person singular, the uncontracted forms $-\varepsilon \sigma \alpha$ as often in the Koine. These futures are from the aorist stems $\varepsilon \varphi a \nless \circ$ and $\varepsilon \pi \iota \circ v$ without sigma.

Luke 17:9
Does he thank? ( $\mu \eta \varepsilon \chi^{\varepsilon} \chi \alpha \rho ı v ;$ ). M $\eta$ expects the negative answer. E $\chi \omega \chi \alpha \rho ı \nu$, to have gratitude toward one, is an old Greek idiom (1Ti 1:12; 2Ti 1:3; Heb 12:28).

Luke 17:10
Unprofitable (aүpعıo). The Syriac Sinaitic omits "unprofitable." The word is common in Greek literature, but in the N.T. only here and Mt 25:30 where it means "useless" ( $\alpha$ privative and $\chi \rho \varepsilon$ гос from $\chi \rho \alpha o \mu \alpha$, to use). The slave who only does what he is commanded by his master to do has gained no merit or credit. "In point of fact it is not commands, but
demands we have to deal with, arising out of special emergencies" (Bruce). The slavish spirit gains no promotion in business life or in the kingdom of God.

Luke 17:11
Through the midst of Samaria and Galilee ( $\delta ı \alpha \mu \varepsilon \sigma о v ~ \Sigma \alpha \mu \alpha \rho ı \alpha \varsigma ~ к \alpha ~ Г \alpha \lambda ı \lambda \alpha ı \alpha \varsigma) . ~ T h i s ~$ is the only instance in the N.T. of $\delta \iota a$ with the accusative in the local sense of "through." Xenophon and Plato use $\delta \iota \alpha \mu \varepsilon \sigma o v$ (genitive). Jesus was going from Ephraim (Joh 11:54) north through the midst of Samaria and Galilee so as to cross over the Jordan near Bethshean and join the Galilean caravan down through Perea to Jerusalem. The Samaritans did not object to people going north away from Jerusalem, but did not like to see them going south towards the city (Lu 9:51-56).

Luke 17:12
Which stood afar off (o $\alpha v \varepsilon \sigma \tau \eta \sigma \alpha v \pi o \rho \rho \omega \theta \varepsilon v$ ). The margin of Westcott and Hort reads simply $\varepsilon \sigma \tau \eta \sigma a v$. The compound read by B means "rose up," but they stood at a distance (Le 13:45f. ). The first healing of a leper ( 5:12-16) like this is given by Luke only.

Luke 17:13
Lifted up ( $\eta \rho \alpha v$ ). First aorist active of the liquid verb aı $\rho \omega$.
Luke 17:14
As they went ( $\varepsilon v \tau \omega v \pi \alpha \gamma \varepsilon เ v a v \tau o v ¢)$. Favourite Lukan idiom of $\varepsilon v$ with articular infinitive as in 17:11 and often.

Luke 17:16
And he was a Samaritan ( $\left.\kappa \alpha \alpha \cup \tau о \varsigma ~ \eta \nu \sum a \mu \alpha \rho \varepsilon ı \tau \eta \varsigma\right)$. This touch colours the whole incident. The one man who felt grateful enough to come back and thank Jesus for the blessing was a despised Samaritan. The autoc has point here.

Luke 17:18
 a $\lambda \lambda$ oүعvŋऽ occurs in the LXX, Josephus, and inscriptions. Deissmann (Light from the Ancient East, p. 80) gives the inscription from the limestone block from the Temple of Israel in Jerusalem which uses this very word which may have been read by Jesus:

Let no foreigner enter within the screen and enclosure surrounding the sanctuary

Luke 17:20
With observation ( $\mu \varepsilon \tau \alpha \pi \alpha \rho \alpha \tau \eta \sigma \varepsilon \omega \varsigma$ ). Late Greek word from $\pi \alpha \rho \alpha \tau \eta \rho \varepsilon \omega$, to watch closely. Only here in the N.T. Medical writers use it of watching the symptoms of disease. It is used also of close astronomical observations. But close watching of external phenomena will not reveal the signs of the kingdom of God.

Luke 17:21
Within you ( $\varepsilon \nu \tau o \varsigma v \mu \omega v$ ). This is the obvious, and, as I think, the necessary meaning

"among" do not bear that out when investigated. Field (Ot. Norv.) "contends that there is no clear instance of $\varepsilon v \tau o s$ in the sense of among" (Bruce), and rightly so. What Jesus says to the Pharisees is that they, as others, are to look for the kingdom of God within themselves, not in outward displays and supernatural manifestations. It is not a localized display "Here" or "There." It is in this sense that in Lu 11:20 Jesus spoke of the kingdom of God as "come upon you" ( $\left.\varepsilon \varphi \theta \alpha \sigma \varepsilon v \varepsilon \varphi^{\prime} v \mu \alpha \varsigma\right)$, speaking to Pharisees. The only other instance of $\varepsilon v \tau \sigma \varsigma$ in the N.T. (Mt 23:26 ) necessarily means "within" ("the inside of the cup"). There is, beside, the use of evtoc meaning "within" in the Oxyrhynchus Papyrus saying of Jesus of the Third Century (Deissmann, Light from the Ancient East, p. 426) which is interesting: "The kingdom of heaven is within you" ( $\varepsilon v \tau о \varsigma ~ v \mu \omega v$ as here in Lu 17:21).

Luke 17:23
Go not away nor follow after them ( $\mu \eta \alpha \pi \varepsilon \lambda \theta \eta \tau \varepsilon \mu \eta \delta \varepsilon \delta \omega \omega \xi \eta \tau \varepsilon$ ). Westcott and Hort bracket $\alpha \pi \varepsilon \lambda \theta \eta \tau \varepsilon \mu \eta \delta \varepsilon$. Note aorist subjunctive with $\mu \eta$ in prohibition, ingressive aorist. Do not rush after those who set times and places for the second advent. The Messiah was already present in the first advent (verse 21) though the Pharisees did not know it.

Luke 17:24
Lighteneth ( $\alpha \sigma \tau \rho \alpha \pi \tau o v \sigma \alpha$ ). An old and common verb, though only here and 24:4 in the N.T. The second coming will be sudden and universally visible. There are still some poor souls who are waiting in Jerusalem under the delusion that Jesus will come there and nowhere else.

Luke 17:25
But first ( $\pi \rho \omega \tau \operatorname{\tau } \delta \delta \varepsilon$ ). The second coming will be only after the Cross.
Luke 17:27
They ate, they drank, they married, they were given in marriage ( $\eta \sigma \theta \iota \circ v, \varepsilon \pi \imath v o v$, $\varepsilon \gamma \alpha \mu \circ \nu \nu, \varepsilon \gamma \alpha \mu \iota \zeta$ оvтo). Imperfects all of them vividly picturing the life of the time of Noah. But the other tenses are aorists (Noah entered $\varepsilon เ \sigma \eta \lambda \theta \varepsilon v$, the flood came $\eta \lambda \theta \varepsilon v$, destroyed $\alpha \pi \omega \lambda \varepsilon \sigma \varepsilon v)$.

Luke 17:28
Note the same sharp contrast between the imperfects here (ate $\eta \sigma \theta$ เov,
drank emivov,
bought $\eta$ үора弓оv,
sold $\varepsilon \pi \omega \lambda$ ouv,
planted $\varepsilon \varphi u \tau \varepsilon \cup o v$,
builded $\omega$ וкoסo $\mu \circ v v$ ) and the aorists in verse 29 ( went out $\varepsilon \xi \eta \lambda \theta \varepsilon v$,
rained $\varepsilon \beta \rho \varepsilon \xi \varepsilon v$,
destroyed $\alpha \pi \omega \lambda \varepsilon \sigma \varepsilon v)$.
Luke 17:30
Is revealed ( $\alpha \pi о \kappa \alpha \lambda \cup \pi \tau \varepsilon \tau \alpha)$. Prophetic and futuristic present passive indicative.

## Luke 17:31

Let him not go down ( $\mu \eta \kappa \alpha \tau \alpha \beta \alpha \tau \omega$ ). Second aorist active imperative of $\kappa \alpha \tau \alpha \beta \alpha \iota \nu \omega$ with $\mu \eta$ in a prohibition in the third person singular. The usual idiom here would be $\mu \eta$ and the aorist subjunctive. See Mr 13:15f.; Mt 24:17f. when these words occur in the great eschatological discussion concerning flight before the destruction of Jerusalem. Here the application is "absolute indifference to all worldly interests as the attitude of readiness for the Son of Man" (Plummer).

Luke 17:32
Remember Lot's wife ( $\mu \nu \eta \mu \circ v \varepsilon v \varepsilon \tau \varepsilon \tau \eta \varsigma \gamma \cup v a \iota \kappa ๐ \varsigma \omega \tau$ ). Here only in the N.T. A pertinent illustration to warn against looking back with yearning after what has been left behind (Ge 19:26).

Luke 17:33
Shall preserve it ( $\zeta \omega 0 \gamma 0 v \eta \sigma \varepsilon \alpha v \tau \eta v$ ). Or save it alive. Here only in the N.T. except 1 Ti 6:13; Ac 7:19. It is a late word and common in medical writers, to bring forth alive ( $\zeta \omega 0 \sigma$, $\gamma \varepsilon \nu \omega)$ and here to keep alive.

Luke 17:34
In that night ( $\tau \alpha v \tau \eta \tau \eta \nu v \kappa \tau)$. More vivid still, "on this night," when Christ comes.
Luke 17:35
Shall be grinding ( $\varepsilon \sigma o v \tau \alpha \alpha \lambda \eta \theta o v \sigma \alpha)$. Periphrastic future active indicative of $\alpha \lambda \eta \theta \omega$, an old verb only in the N.T. here and Mt 24:41 .

Together ( $\varepsilon \pi$ тo $\alpha v \tau 0$ ). In the same place, near together as in Ac 2:1.
Luke 17:37
The eagles ( o aعтo). Or the vultures attracted by the carcass. This proverb is quoted also in Mt 24:28. See Job 39:27-30; Heb 1:8; Ho 8:1. Double compound ( $\varepsilon \pi \iota-\sigma v v-$ ) in $\varepsilon \pi \iota-$ $\sigma v v-\alpha \chi \theta \eta \sigma o v \tau \alpha$ completes the picture.

## Luke 18

Luke 18:1
To the end that ( $\pi \rho \circ \varsigma$ to $\delta \varepsilon เ v$ ).
With a view to the being necessary, $\pi \rho o \varsigma$ and the articular infinitive. The impersonal verb $\delta \varepsilon$ here is in the infinitive and has another infinitive loosely connected with it $\pi \rho о \sigma \varepsilon u \chi \varepsilon \sigma \theta a$, to pray.

Not to faint ( $\mu \eta \varepsilon \nu \kappa \alpha \kappa \varepsilon เ v$ ). Literally, not to give in to evil ( $\varepsilon v$, как $\varepsilon \omega$, from какос, bad or evil), to turn coward, lose heart, behave badly. A late verb used several times in the N.T. (2Co 4:1,16, etc.).

Luke 18:2
Regarded not ( $\mu \eta \varepsilon \nu \tau \rho \varepsilon \pi \sigma \mu \varepsilon v o \varsigma)$. Present middle participle of $\varepsilon \nu \tau \rho \varepsilon \pi \omega$, old verb, to turn one on himself, to shame one, to reverence one. This was a "hard-boiled" judge who knew no one as his superior. See on Mt 21:37.

Luke 18:3
Came oft ( $\eta \rho \chi \varepsilon \tau 0$ ). Imperfect tense denotes repetitions, no adverb for "oft" in the Greek.
Avenge me of ( $\varepsilon \kappa \delta \kappa \kappa \eta \sigma o v \mu \varepsilon \alpha \pi о$ ). A late verb for doing justice, protecting one from another (note both $\varepsilon \kappa$ and $\alpha \pi \mathrm{o}$, here). Deissmann (Light from the Ancient East, pp. 420ff.) quotes a $\sigma \tau \eta \lambda \eta$ of the second century B.C. with a prayer for vengeance for a Jewish girl that had been murdered which has this very verb $\varepsilon \kappa \delta ı \kappa \varepsilon \omega$.

Luke 18:4
He would not (ouk $\eta \theta \varepsilon \lambda \varepsilon v$ ). Imperfect tense of continued refusal.
Though ( $\varepsilon \kappa \alpha$ ). Concerning sentence, not $\kappa \alpha \varepsilon$ (even if).
Luke 18:5
Yet ( $\gamma \varepsilon$ ). Delicate intensive particle of deep feeling as here.
Because this widow troubleth me ( $\delta ı \alpha$ то $\pi \alpha \rho \varepsilon \chi \varepsilon เ v \mu о$ копо $\nu \tau \eta \nu \chi \eta \rho \alpha \nu \tau \alpha \nu \tau \eta v$ ). Literally, because of the furnishing me trouble as to this widow (accusative of general reference with the articular infinitive).

Lest she wear me out ( $\llcorner v \alpha \mu \eta \nu \pi \omega \pi \tau \alpha \zeta \eta \mu \varepsilon$ ). Some take it that the judge is actually afraid that the widow may come and assault him, literally beat him under the eye. That idea would be best expressed here by the aorist tense.

## Luke 18:6

The unrighteous judge (о крıтпऽ $\tau \eta \varsigma \alpha \delta ı \kappa ı \alpha)$ ). The judge of unrighteousness (marked by unrighteousness), as in 16:8 we have "the steward of unrighteousness," the same idiom.

Luke 18:7
And he is longsuffering ( $\mu \alpha \kappa \rho о \theta \nu \mu \varepsilon$ ). This present active indicative comes in awkwardly after the aorist subjunctive $\pi o \neq \sigma \eta$ after ov $\mu \eta$, but this part of the question is positive. Probably ка here means "and yet" as so often (Joh 9:30; 16:32, etc.). God delays taking
vengeance on behalf of his people, not through indifference, but through patient forbearance.
Luke 18:8
Howbeit ( $\pi \lambda \eta \nu$ ). It is not clear whether this sentence is also a question or a positive statement. There is no way to decide. Either will make sense though not quite the same sense. The use of $\alpha \rho \alpha$ before $\varepsilon v \rho \eta \sigma \varepsilon$ seems to indicate a question expecting a negative answer as in Ac 8:30; Ro 14:19. But here apa comes in the middle of the sentence instead of near the beginning, an unusual position for either inferential $\alpha \rho \alpha$ or interrogative $\alpha \rho \alpha$. On the whole the interrogative $\alpha \rho \alpha$ is probably correct, meaning to question if the Son will find a persistence of faith like that of the widow.

Luke 18:9
 ou $\delta \varepsilon v \varepsilon \omega$, from ou $\theta \varepsilon v$ (ou $\delta \varepsilon v$ ), to consider or treat as nothing. In LXX and chiefly in Luke and Paul in the N.T.

Luke 18:10
Stood ( $\sigma \tau \alpha \theta \varepsilon ı)$ ). First aorist passive participle of $\iota \tau \tau \eta \mu$. Struck an attitude ostentatiously where he could be seen. Standing was the common Jewish posture in prayer (Mt 6:5; Mr 11:25).

Prayed thus (тavта $\pi \rho о \sigma \eta \cup \chi \varepsilon \tau 0)$. Imperfect middle, was praying these things (given following).

With himself ( $\pi \rho \circ \varsigma \varepsilon \alpha \cup \tau 0 v)$. A soliloquy with his own soul, a complacent recital of his own virtues for his own self-satisfaction, not fellowship with God, though he addresses God.

I thank thee ( $\varepsilon v \chi \alpha \rho \iota \sigma \tau \omega \sigma 0$ ). But his gratitude to God is for his own virtues, not for God's mercies to him. One of the rabbis offers a prayer like this of gratitude that he was in a class by himself because he was a Jew and not a Gentile, because he was a Pharisee and not of the am-haaretz or common people, because he was a man and not a woman.

Extortioners ( $\alpha \rho \pi \alpha \gamma \varepsilon \varsigma)$. An old word, $\alpha \rho \pi \alpha \xi$ from same root as $\alpha \rho \pi \alpha \zeta \omega$, to plunder. An adjective of only one gender, used of robbers and plunderers, grafters, like the publicans (Lu 3:13 ), whether wolves (Mt 7:15 ) or men (1Co 5:19f. ). The Pharisee cites the crimes of which he is not guilty.

Or even ( $\eta \kappa \alpha$ ). As the climax of iniquity (Bruce), he points to "this publican." Zaccheus will admit robbery (Lu 19:8).

God (o $\theta$ roc). Nominative form with the article as common with the vocative use of $\theta$ zoc (so verse 13; Joh 20:28).

Luke 18:12
Twice in the week ( $\delta \iota \varsigma$ tov $\sigma \alpha \beta \beta \alpha \tau \sigma 0$ ). One fast a year was required by the law (Le 16:29; Nu 29:7 ). The Pharisees added others, twice a week between passover and pentecost, and between tabernacles and dedication of the temple.

I get ( $\kappa \tau \omega \mu \alpha$ ). Present middle indicative, not perfect middle $\kappa \varepsilon \kappa \tau \eta \mu \alpha$ (I possess). He gave a tithe of his income, not of his property.

Luke 18:13
Standing afar off ( $\mu \alpha \kappa \rho \circ \theta \varepsilon \nu \varepsilon \sigma \tau \omega \varsigma)$. Second perfect active participle of $\iota \sigma \tau \eta \mu$, intransitive like $\sigma \tau \alpha \theta \varepsilon ı \varsigma$ above. But no ostentation as with the Pharisee in verse 11. At a distance from the Pharisee, not from the sanctuary.

Would not lift (ouk $\eta \theta \varepsilon \lambda \varepsilon v$ ov $\delta \varepsilon \varepsilon \pi \alpha \rho \alpha$ ). Negatives (double) imperfect of
thelo , was not willing even to lift up, refused to lift ( $\varepsilon \pi \alpha \rho \alpha$, first aorist active infinitive of the liquid compound verb, $\varepsilon \pi-\alpha \imath \rho \omega)$. Smote ( $\varepsilon \tau v \pi \tau \varepsilon$ ). Imperfect active of $\tau v \pi \tau \omega$, old verb, kept on smiting or beating. Worshippers usually lifted up their closed eyes to God.

Be merciful ( $\lambda \lambda \alpha \sigma \theta \eta \tau)$. First aorist passive imperative of $\lambda \lambda \alpha \sigma \kappa \circ \mu \alpha$, an old verb, found also in LXX and inscriptions ( $\varepsilon \xi \backslash \lambda \alpha \sigma \kappa о \mu \alpha$, Deissmann, Bible Studies, p. 224).

A sinner ( $\tau \omega \alpha \mu \alpha \rho \tau \omega \lambda \omega)$. The sinner, not a sinner. It is curious how modern scholars ignore this Greek article. The main point in the contrast lies in this article. The Pharisee thought of others as sinners. The publican thinks of himself alone as the sinner, not of others at all.

Luke 18:14
This man (outoc). This despised publican referred to contemptuously in verse 11 as "this" (ovtoc) publican.

Rather than the other ( $\left.\pi \alpha \rho^{\prime} \varepsilon \kappa \varepsilon เ v o v\right)$ ). In comparison with (placed beside) that one. A neat Greek idiom after the perfect passive participle $\delta \varepsilon \delta \iota \kappa \alpha \iota \rho \mu \varepsilon v o \varsigma$.

For (ot). This moral maxim Christ had already used in 14:11. Plummer pertinently asks: "Why is it assumed that Jesus did not repeat his sayings?"

Luke 18:15
They brought ( $\pi \rho \circ \sigma \varepsilon \varphi \varepsilon \rho \circ v$ ). Imperfect active, they were bringing. So Mr 10:13 .
Their babes ( $\tau \alpha \beta \rho \varepsilon \varphi \eta$ ). Old word for
infants . Here Mr 10:13; Mt 19:13 have $\pi \alpha \iota \delta \iota \alpha$ (little children). Note "also" ( $\kappa \alpha$ ) in Luke, not in Mark and Matthew.

That he should touch them (iva $\alpha v \tau \omega v \alpha \pi \tau \eta \tau \alpha$ ). Present middle subjunctive (linear action, repeatedly touch or one after the other), where Mr 10:13 has aorist middle subjunctive ( $\alpha \psi \eta \tau \alpha$ ).

Rebuked $(\varepsilon \pi \varepsilon \tau \mid \mu \omega v)$. Imperfect indicative active. Either inchoative began to rebuke, or continued, kept on rebuking. Matthew and Mark have the aorist $\varepsilon \pi \varepsilon \tau \tau \mu \eta \sigma \alpha v$.

Luke 18:16
Called ( $\pi \rho о \sigma \varepsilon \kappa \alpha \lambda \varepsilon \sigma \alpha \tau о)$. Indirect middle aorist indicative, called the children with their parents to himself and then rebuked the disciples for their rebuke of the parents. The language of Jesus is precisely that of Mr 10:14 which see, and nearly that of Mt 19:14 which see also. The plea of Jesus that children be allowed to come to him is one that many parents
need to heed. It is a tragedy to think of parents "forbidding" their children or of preachers doing the same or of both being stumbling-blocks to children.

Luke 18:17
As a little child ( $\omega \varsigma \pi \alpha \iota \delta \iota v$ ). Jesus makes the child the model for those who seek entrance into the kingdom of God, not the adult the model for the child. He does not say that the child is already in the kingdom without coming to him. Jesus has made the child's world by understanding the child and opening the door for him.

## Luke 18:18

Ruler ( $\alpha \rho \chi \omega v$ ). Not in Mr 10:17; Mt 19:16.
What shall I do to inherit? (T лопп $\sigma \varsigma ~ к \lambda \eta \rho о v о \mu \eta \sigma \omega ;$ ). "By doing what shall I inherit?" Aorist active participle and future active indicative. Precisely the same question is asked by the lawyer in Lu 10:25. This young man probably thought that by some one act he could obtain eternal life. He was ready to make a large expenditure for it.

Good ( $\alpha \gamma \alpha \theta$ ov). See on Mr 10:17; Mt 19:16 for discussion of this adjective for absolute goodness. Plummer observes that no Jewish rabbi was called "good" in direct address. The question of Jesus will show whether it was merely fulsome flattery on the part of the young man or whether he really put Jesus on a par with God. He must at any rate define his attitude towards Christ.

Luke 18:22
One thing thou lackest yet ( $\varepsilon \tau \varepsilon v \sigma o \lambda \varepsilon ı \pi \varepsilon$ ). Literally, one thing still fails thee or is wanting to thee. An old verb with the dative of personal interest. Mr 10:21 has here votepe $\sigma \varepsilon$, which see. It was an amazing compliment for one who was aiming at perfection (Mt 19:21 ). The youth evidently had great charm and was sincere in his claims.

Distribute ( $\delta \iota \alpha \delta \varsigma)$ ). Second aorist active imperative of $\delta \iota \alpha \delta \iota \omega \mu$ (give to various ones, $\delta ı \alpha-$ ). Here Mark and Matthew simply have $\delta$ o $\varsigma$ (give). The rest the same in all three Gospels.

Luke 18:23
Became ( $\varepsilon \not \varepsilon \varepsilon v \eta \theta \eta$ ). First aorist passive indicative of $\gamma$ ıvo $\mu \alpha$. Like his countenance fell (бтvүvaбac), in Mr 10:22.

Exceedingly sorrowful ( $\pi \varepsilon \rho \wedge \lambda \cup \pi \circ \varsigma)$. Old adjective ( $\pi \varepsilon \rho \iota, \lambda \cup \pi \eta$ ) with perfective use of $\pi \varepsilon \rho$.

Very rich ( $\pi \lambda$ дovoıo $\sigma \varphi o \delta \rho \alpha$ ). Rich exceedingly. Today, a multimillionaire.
Luke 18:24
Shall they enter ( $\varepsilon$ Iotopsvov $\tau \alpha$ ). Present middle indicative, futuristic present.
Luke 18:25
Through a needle's eye ( $\delta ı \alpha \tau \eta \eta \mu \tau \sigma \varsigma \beta \varepsilon \lambda$ ov $\bar{\varsigma}$ ). Both words are old. T $\rho \eta \mu \alpha$ means a perforation or hole or eye and in the N.T. only here and Mt 19:24 . Be $\lambda$ ov $\eta$ means originally the point of a spear and then a surgeon's needle. Here only in the N.T. Mr 10:25; Mt 19:24
have $\rho a \varphi \iota \delta$ oc for needle. This is probably a current proverb for the impossible. The Talmud twice speaks of an elephant passing through the eye of a needle as being impossible.

Luke 18:26
Then who ( $\kappa \alpha$ тıৎ). Literally,
and who. The ka calls attention to what has just been said. Wealth was assumed to be mark of divine favour, not a hindrance to salvation.

Luke 18:27
The impossible with men possible with God ( $\tau \alpha \alpha \delta v v a \tau \alpha \pi \alpha \rho \alpha \alpha v \theta \rho \omega \pi о \iota \varsigma ~ \delta u v a \tau \alpha$ $\pi \alpha \rho \alpha \tau \omega \theta \varepsilon \omega$ ). Paradoxical, but true. Take your stand "beside" ( $\pi \alpha \rho \alpha)$ God and the impossible becomes possible. Clearly then Jesus meant the humanly impossible by the parabolic proverb about the camel going through the needle's eye. God can break the grip of gold on a man's life, but even Jesus failed with this young ruler.

Luke 18:28
Our own ( $\tau \alpha \_\delta \iota \alpha$ ). Our own things (home, business, etc.). Right here is where so many fail. Peter speaks here not in a spirit of boastfulness, but rather with his reactions from their consternation at what has happened and at the words of Jesus (Plummer).

Luke 18:30
Shall not receive (ov $\mu \eta \lambda \alpha \beta \eta$ ). Very strong double negative with aorist active subjunctive of $\lambda \alpha \mu \beta \alpha v \omega$.

Manifold more ( $\pi \mathrm{o} \lambda \lambda \alpha \pi \lambda \alpha \sigma \circ \sigma \alpha)$. Late Greek word, here alone in the N.T. save Mt 19:29 where Westcott and Hort have it though many MSS. there read єкатоvт入абıova (a hundredfold) as in Mr 10:30 .

Luke 18:31
Took unto him ( $\pi \alpha \rho \alpha \lambda \alpha \beta \omega v$ ). Second aorist active participle of $\pi \alpha \rho \alpha \lambda \alpha \mu \beta \alpha \nu \omega$. Taking along with himself. So Mr 10:32 . Mt 20:17 adds $\kappa$ at' $\delta \operatorname{\delta av}$ (apart). Jesus is making a special point of explaining his death to the Twelve.

We go up ( $\alpha v \alpha \beta a i v o \mu \varepsilon v$ ). Present active indicative, we are going up.
Unto the Son of man ( $\tau \omega v \omega \omega$ tov $\alpha v \theta \rho \omega \pi \sigma v$ ). Dative case of personal interest. The position is amphibolous and the construction makes sense either with "shall be accomplished" ( $\tau \varepsilon \lambda \varepsilon \sigma \theta \eta \sigma \varepsilon \tau \alpha$ ) or "that are written" ( $\tau \alpha \gamma \varepsilon \gamma \rho \alpha \mu \mu \varepsilon v \alpha$ ), probably the former. Compare these minute details of the prophecy here (verses 32f. ) with the words in Mr 10:33f.; Mt 20:18f. , which see.

Luke 18:33
The third day ( $\tau \eta \eta \mu \varepsilon \rho \alpha \tau \eta \tau \rho \iota \tau \eta$ ). The day the third. In Mt 20:19 it is "the third day" while in Mr 10:34 "after three days" occurs in the same sense, which see.

Luke 18:34
And they perceived not ( $\kappa \alpha$ ovk $\varepsilon \gamma \iota v \omega \sigma \kappa o v$ ). Imperfect active. They kept on not perceiving. Twice already Luke has said this in the same sentence.

They understood none of these things (ov $\delta \varepsilon \tau \tau 0 \tau \tau \omega v \sigma \cup v \eta \kappa \alpha v$ ). First aorist active indicative, a summary statement.

This saying was hid from them ( $\eta \nu \tau$ то $\rho \eta \mu \alpha$ тоvто кєкрv $\mu \mu \varepsilon v o \nu \alpha \pi^{\prime} \alpha \nu \tau \omega v$ ). Past perfect passive indicative (periphrastic), state of completion. It was a puzzling experience. No wonder that Luke tries three times to explain the continued failure of the apostles to understand Jesus. The words of Christ about his death ran counter to all their hopes and beliefs.

Luke 18:35
Unto Jericho ( $\varepsilon \varsigma \varsigma \varepsilon \rho \varepsilon \chi \chi \omega$ ). See on Mt 20:29; Mr 10:46, for discussion of the two Jerichos in Mark and Matt. (the old and the new as here).

Begging ( $\varepsilon \pi \alpha \iota \tau \omega v$ ). Asking for something. He probably was by the wayside between the old Jericho and the new Roman Jericho. Mark gives his name Bartimaeus ( 10:46). Mt 20:30 mentions two.

Luke 18:36
Inquired (عпиv $\begin{aligned} & \text { aveto). Imperfect middle. Repeatedly inquired as he heard the tramp }\end{aligned}$

What this meant (T $\varepsilon$ घ $\eta$ тоито). Literally, What it was. Without $\alpha v$ the optative is due to indirect discourse, changed from $\varepsilon \sigma \tau \tau v$. With $\alpha v$ (margin of Westcott and Hort) the potential optative of the direct discourse is simply retained.

Luke 18:37
Passeth by ( $\pi \alpha \rho \varepsilon \rho \chi \varepsilon \tau \alpha$ ). Present middle indicative retained in indirect discourse as $\pi \alpha \rho a \gamma \varepsilon$ is in Mt 20:30. No reason for differences of English tenses in the two passages (was passing by, passeth by).

Luke 18:38
He cried ( $\varepsilon \beta \circ \eta \sigma \varepsilon v$ ). Old verb, $\beta$ oa $\omega$, to shout, as in 9:38.
Son of David (vı $\Delta a v \varepsilon i \delta$ ). Shows that he recognizes Jesus as the Messiah.
Luke 18:39
That he should hold his peace (iva $\sigma \gamma \gamma \eta \sigma \eta$ ). Ingressive aorist subjunctive. That he should become silent; as with $1 v \alpha \sigma \omega \pi \pi \eta \sigma \eta$ in Mr 10:48.

The more a great deal ( $\pi \mathrm{o} \lambda \lambda \omega \mu \alpha \lambda \lambda o v$ ). By much more as in Mr 10:48 .
Luke 18:40
Stood ( $\sigma \tau \alpha \theta \varepsilon \iota \varsigma)$. First aorist passive where Mr 10:49; Mt 20:32 have $\sigma \tau \alpha \varsigma$ (second aorist active) translated "stood still." One is as "still" as the other. The first is that Jesus " stopped."

Be brought ( $\alpha \chi \theta \eta v \alpha$ ). First aorist infinitive in indirect command.
Luke 18:41
What wilt thou that I should do unto thee? (T $\sigma о$ $\theta \varepsilon \lambda \varepsilon ı \varsigma ~ \pi о ı \eta \sigma \omega ;$ ). Same idiom in Mr 10:51; Mt 20:32 which see, the use of $\theta \varepsilon \lambda \omega$ without iva with aorist subjunctive (or future
indicative). See same references also for $\mathrm{tv} \alpha \alpha v \alpha \beta \lambda \varepsilon \psi \omega$ "that I may see again" without verb before $\tau v \alpha$. Three uses of $\alpha v \alpha \beta \lambda \varepsilon \pi \omega$ here (verses $41,42,43$ ).

Luke 18:43
Followed ( $\eta \kappa \circ \lambda o u \theta \varepsilon$ ). Imperfect active as in Mr 10:52. Either inchoative he began to follow, or descriptive, he was following.

## Luke 19

Luke 19:1
Was passing through ( $\delta$ ıпрхєто). Imperfect middle. Now Jesus was inside the Roman Jericho with the procession.

Luke 19:2
Chief publican $(\alpha \rho \chi ı \varepsilon \varepsilon \lambda \omega \vee \eta \varsigma)$. The word occurs nowhere else apparently but the meaning is clear from the other words with $\alpha \rho \chi \iota$ like $\alpha \rho \chi \iota \rho \varepsilon \varepsilon \varphi$ (chief priest) $\alpha \rho \chi \iota \pi о \iota \mu \nu$ (chief shepherd). Jericho was an important trading point for balsam and other things and so Zacchaeus was the head of the tax collections in this region, a sort of commissioner of taxes who probably had other publicans serving under him.

Luke 19:3
He sought ( $\varepsilon \zeta \eta \tau \varepsilon)$. Imperfect active. He was seeking, conative idea.
Jesus who he was (I $\eta \sigma o u v \tau \iota \varsigma \varepsilon \sigma \tau \iota v$ ). Prolepsis, to see who Jesus was. He had heard so much about him. He wanted to see which one of the crowd was Jesus.

For the crowd (aio tov o $\chi \lambda$ ov). He was short and the crowd was thick and close.
Stature ( $\left.\tau \eta \eta \lambda_{\iota \kappa ı}\right)$. No doubt of that meaning here and possibly so in 2:52. Elsewhere "age" except Lu 12:25; Mt 6:27 where it is probably "stature" also.

Luke 19:4
 $\pi \rho о \tau \rho \varepsilon \chi \omega$ (defective verb). "Before" occurs twice ( $\pi \rho \circ$ - and $\varepsilon \iota \varsigma ~ \tau о ~ \varepsilon \mu \pi \rho о \sigma \theta \varepsilon v$ ).

Into a sycamore tree ( $\varepsilon \pi \sigma \cup \kappa о \mu о \rho \varepsilon \alpha v)$. From $\sigma v \kappa \sigma v$, fig, and $\mu о \rho o v$, mulberry. The fig-mulberry and quite a different tree from the sycamine tree in 17:6, which see. It bore a poor fruit which poor people ate (Am 7:14). It was a wide open tree with low branches so that Zacchaeus could easily climb into it.

That way ( $\varepsilon \kappa \varepsilon \iota \sim \eta \varsigma)$. Feminine for oठoc (way) is understood. Genitive case with $\delta$ in composition ( $\delta เ \varepsilon \rho \chi \varepsilon \sigma \theta \alpha)$ or as an adverbial use.

Luke 19:5
Make haste and come down ( $\sigma \pi \varepsilon v \sigma \alpha \varsigma \kappa \alpha \tau \alpha \beta \eta \theta$ ). Simultaneous aorist active participle ( $\sigma \pi \varepsilon v \sigma \alpha \varsigma)$ with the second aorist active imperative. "Come down in a hurry."

Luke 19:6
He made haste and came down ( $\sigma \pi \varepsilon v \sigma \alpha \varsigma \kappa \alpha \tau \varepsilon \beta \eta$ ). Luke repeats the very words of Jesus with the same idiom.

Received him joyfully (v $\tau \varepsilon \delta \varepsilon \xi \alpha \tau \circ \alpha v \tau o v \chi \alpha \iota \rho \omega v$ ). The very verb used of Martha's welcome to Jesus ( $10: 38$ ). "Joyfully" is the present active participle, "rejoicing" ( $\chi \alpha \iota \rho \nu$ ).

Luke 19:7
 $\delta \iota \alpha-\gamma \circ \gamma \gamma \cup \zeta \omega$. In Lu 5:30 we have the simple $\gamma \circ \gamma \gamma \cup \zeta \omega$, a late word like the cooing doves or the hum of bees. This compound with $\delta \iota \alpha$ - is still rarer, but more expressive.

To lodge ( $\kappa \alpha \tau \alpha \lambda \nu \sigma \alpha$ ). Jesus was the hero of this crowd from Galilee on their way to the passover. But here he had shocked their sensibilities and those of the people of Jericho by inviting himself to be the guest of this chief publican and notorious sinner who had robbed nearly everybody in the city by exorbitant taxes.

Luke 19:8
Stood ( $\sigma \tau \alpha \theta \varepsilon \iota \varsigma)$. Apparently Jesus and Zacchaeus had come to the house of Zacchaeus and were about to enter when the murmur became such a roar that Zacchaeus turned round and faced the crowd.

If I have wrongfully exacted aught of any man ( $\varepsilon \tau \tau v o \varsigma \tau \varepsilon \sigma \cup \kappa \circ \varphi \alpha v \tau \eta \sigma \alpha$ ). A most significant admission and confession. It is a condition of the first class ( $\varepsilon$ and the aorist active indicative) that assumes it to be true. His own conscience was at work. He may have heard audible murmurs from the crowd. For the verb $\sigma \cup \kappa о \varphi a v \tau \varepsilon เ v$, see discussion on 3:14, the only two instances in the N.T. He had extorted money wrongfully as they all knew.

I return fourfold ( $\alpha \pi \sigma \delta i \delta \omega \mu \tau \varepsilon \tau \rho \alpha \pi \lambda o u v$ ). I offer to do it here and now on this spot. This was the Mosaic law (Ex 22:1; Nu 5:6f. ). Restitution is good proof of a change of heart. D. L. Moody used to preach it with great power. Without this the offer of Zacchaeus to give half his goods to the poor would be less effective. "It is an odd coincidence, nothing more, that the fig-mulberry (sycamore) should occur in connexion with the fig-shewer (sycophant)."

Luke 19:10
The lost ( $\tau \boldsymbol{\alpha} \boldsymbol{\alpha \pi о} \lambda \omega \lambda$ ) $)$. The neuter as a collective whole, second perfect active participle of $\alpha \pi \sigma \lambda \lambda \nu \mu$, to destroy. See Lu 15 for the idea of the lost.

Luke 19:11
He added and spake ( $\pi \rho \circ \sigma \theta \varepsilon \iota \varsigma \varepsilon \pi \varepsilon v$ ). Second aorist active participle of $\pi \rho \circ \sigma \tau \iota \theta \eta \mu$ with $\varepsilon ו \pi \varepsilon v$. It is a Hebrew idiom seen also in $\mathrm{Lu} 20: 1 \mathrm{f}$. he added to send ( $\pi \rho \circ \sigma \varepsilon \theta \varepsilon \tau 0 \pi \varepsilon \mu \psi \alpha$ ) and in Ac 12:3 "he added to seize" ( $\pi \rho \circ \sigma \varepsilon \theta \varepsilon \tau \sim \sigma u \lambda \lambda \alpha \beta \varepsilon เ v)$. This undoubted Hebraism occurs in the N.T. in Luke only, probably due to the influence of the LXX on Luke the Greek Christian.

To appear ( $\alpha v \alpha \varphi \alpha ı v \varepsilon \sigma \theta \alpha$ ). Present passive infinitive of an old verb to be made manifest, to be shown up. In the N.T. only here and Ac 21:3 .

Luke 19:12
To take to himself a kingdom ( $\lambda \alpha \beta \varepsilon ı v \varepsilon \alpha \cup \tau \omega \beta \beta \sigma \iota \lambda \varepsilon \iota \alpha v$ ). Second aorist active infinitive of $\lambda \alpha \mu \beta \alpha v \omega$ with the dative reflexive $\varepsilon \alpha v \tau \omega$ where the middle voice could have been used. Apparently this parable has the historical basis of Archelaus who actually went from Jerusalem to Rome on this very errand to get a kingdom in Palestine and to come back to it. This happened while Jesus was a boy in Nazareth and it was a matter of common knowledge.

## Luke 19:13

Trade ye herewith till I come ( $\pi \rho \alpha \gamma \mu \alpha \tau \varepsilon v \sigma \alpha \sigma \theta \varepsilon \varepsilon \nu \omega \varepsilon \rho \chi \circ \mu \alpha$ ). First aorist middle imperative of $\pi \rho \alpha \gamma \mu \alpha \tau \varepsilon v o \mu \alpha$, an old verb from $\pi \rho \alpha \gamma \mu \alpha$, business. Here only in the N.T. Westcott and Hort in their text read $\pi \rho \alpha \gamma \mu \alpha \tau \varepsilon \sigma \alpha \sigma \theta \alpha$, first aorist middle infinitive ( $-\alpha$ and $-\varepsilon$ were pronounced alike). The infinitive makes it indirect discourse, the imperative direct.

While I am coming is what $\varepsilon v \omega \varepsilon \rho \chi \circ \mu \alpha$ really means.
Luke 19:14
His citizens (o $\pi о \lambda ı \tau \alpha \alpha \tau 0 v$ ). That actually happened with Archelaus.
Luke 19:15
When he was come back again ( $\varepsilon v \tau \omega \varepsilon \pi \alpha v \varepsilon \lambda \theta \varepsilon \iota v \alpha \nu \tau o v$ ). "On the coming back again as to him." Luke's favourite idiom of the articular infinitive after $\varepsilon v$ and with the accusative of general reference.

Had given ( $\delta \varepsilon \delta \omega \kappa \varepsilon$ ). Past perfect active indicative without augment of $\delta \iota \delta \omega \mu$.
That he might know (ı $\downarrow \alpha \gamma \vee$ ). Second aorist active subjunctive of $\gamma เ v o \sigma \kappa \omega$. The optative would be $\gamma$ voin.

Luke 19:16
Hath made ( $\pi \rho o \sigma \eta \rho \gamma \alpha \sigma \alpha \tau o$ ). Only here in the N.T. Note $\pi \rho o \sigma-$ in addition, besides, more.

Luke 19:17
Have thou authority ( $\iota \theta \varepsilon \xi$ ovoıav $\varepsilon \chi \omega v$ ). Periphrastic present active imperative. Keep on having authority.

Luke 19:19
Be thou also over ( $\kappa \alpha \sigma v \varepsilon \pi \alpha v o \gamma ı v o v$ ). Present middle imperative. Keep on becoming over. There is no real reason for identifying this parable of the pounds with the parable of the talents in Mt 25 . The versatility of Jesus needs to be remembered by those who seek to flatten out everything.

Luke 19:20
I kept ( $\varepsilon \tau \chi \circ v$ ). Imperfect active of $\varepsilon \chi \omega$. I kept on keeping.
Laid up ( $\alpha \pi о \kappa \varepsilon \iota \mu \varepsilon \nu \eta \nu$ ). Present passive participle agreeing with $\eta \nu$ (which), used often as perfect passive of $\tau \iota \theta \eta \mu$ as here, laid away or off ( $\alpha \pi 0$ ). It is not the periphrastic construction, but two separate verbs, each with its own force.

In a napkin ( $\varepsilon v \sigma o v \delta \alpha \rho \iota \omega$ ). A Latin word sudarium from sudor (sweat) transliterated into Greek, a sweatcloth handkerchief or napkin. Found in papyrus marriage contracts as part of the dowry (second and third centuries A.D., Deissmann, Bible Studies, p. 223). Used also for swathing the head of the dead (Joh 11:44; 20:7).

Luke 19:21
I feared $(\varepsilon \varphi o \beta o v \mu \eta \nu)$. Imperfect middle, I continued to fear.

Austere ( $\alpha v \sigma \tau \eta \rho o \varsigma)$. Old Greek word from $\alpha v \omega$, to dry up. Reproduced in Latin austeros and English austere. It means rough to the taste, stringent. Here only in the N.T. Compare $\sigma \kappa \lambda \eta \rho \circ \varsigma($ hard ) in Mt 25:24 . "Harsh in flavour, then in disposition" (Bruce).

Thou layedst not down (ovк $\varepsilon Ө \eta \kappa \alpha \varsigma)$ ). Probably a proverb for a grasping profiteer.
Luke 19:22
 to know. Either it must be taken as a question as Westcott and Hort do or be understood as sarcasm as the Revised Version has it. The words of the wicked ( $\pi о v \eta \rho \circ \varsigma)$ slave are turned to his own condemnation.

Luke 19:23
Then wherefore ( $\kappa \alpha \delta \iota \alpha \tau$ ). Note this inferential use of $k \alpha u-$ in that case.
Into the bank ( $\varepsilon \pi \tau \rho \alpha \pi \varepsilon \zeta \alpha v)$. Literally,
upon a table. This old word $\tau \rho \alpha \pi \varepsilon \zeta \alpha$, from $\tau \varepsilon \tau \rho \alpha \pi \varepsilon \zeta \alpha$ ( $\tau \varepsilon \tau \rho \alpha$, four, $\pi \circ \cup \varsigma$, foot). It means then any table (Mr 7:28) , food on the table (Ac 16:34), feast or banquet (Ro 11:9), table of the money-changers (Joh 2:15; Mr 11:15; Mt 21:12 ), or bank as here. Our word bank is from Old English bench.

With interest ( $\sigma \cup \vee \tau о \kappa \omega$ ). Not usury, but proper and legal interest. Old word from $\tau ו \kappa \tau \omega$, to bring forth. In the N.T. only here and Mt 25:27.

Should have required it ( $\alpha v \alpha \cup \tau 0 \varepsilon \pi \rho \alpha \xi \alpha$ ). Conclusion of second-class condition the condition or apodosis being implied in the participle "coming" ( $\varepsilon \lambda \theta \omega v$ ), and the previous question. On this technical use of $\pi \rho \alpha \sigma \sigma \omega$ ( $\varepsilon \pi \rho \alpha \xi \alpha$ ) see Lu 3:13.

Luke 19:25
And they said unto him ( $\kappa \alpha \varepsilon ו \pi \alpha v \alpha v \tau \omega$ ). Probably the eager audience who had been listening to this wonderful parable interrupted Jesus at this point because of this sudden turn when the one pound is given to the man who has ten pounds. If so, it shows plainly how keenly they followed the story which Jesus was giving because of their excitement about the kingdom (Lu 19:11).

Luke 19:26
That hath not ( $\tau 0 \cup \mu \eta \varepsilon \chi \circ v \tau 0 \varsigma)$. The present tense of $\varepsilon \chi \omega$ here, that keeps on not having, probably approaches the idea of acquiring or getting, the one who keeps on not acquiring. This is the law of nature and of grace.

Luke 19:27
Reign ( $\beta a \sigma \iota \lambda \varepsilon v \sigma \alpha$ ). First aorist active infinitive, ingressive aorist, come to rule.
Slay ( $\kappa \alpha \tau \alpha \sigma \varphi \alpha \xi \alpha \tau \varepsilon)$. First aorist active imperative of $\kappa \alpha \tau \alpha \sigma \varphi \alpha \zeta \omega$, to slaughter, an old verb, but only here in the N.T.

Luke 19:28
Went on before ( $\varepsilon \pi$ орвveto $\varepsilon \mu \pi \rho \circ \sigma \theta \varepsilon v$ ). Imperfect middle. Jesus left the parable to do its work and slowly went on his way up the hill to Jerusalem.

Luke 19:29
Unto Bethphage and Bethany ( $\varepsilon \iota \varsigma \bar{B} \theta \varphi \alpha \gamma \eta \kappa \alpha B \eta \theta \alpha \nu \iota \alpha)$. Both indeclinable forms of the Hebrew or Aramaic names. In Mr 11:1 "Bethany" is inflected regularly, which see.

Of Olives (E $\lambda \omega \iota \omega v$ ). As in Mr 11:1; Mt 21:1, though some editors take it to be, not the genitive plural of $\varepsilon \lambda \alpha ı \alpha$ (olive tree), but the name of the place Olivet. In the Greek it is just a matter of accent (circumflex or acute) Olivet is correct in Ac 1:12. See on Mt 21:1ff.; Mr 11:1ff. for details.

Luke 19:30
Whereon no man ever yet sat ( $\varepsilon \varphi^{\prime}$ ov ou holds that this fact indicated to the disciples a royal progress into the city of a piece with the Virgin Birth of Jesus and the burial in a new tomb.

## Luke 19:32

As he had said unto them ( $\kappa \alpha \theta \omega \varsigma \varepsilon \iota \varepsilon \varepsilon \nu \alpha \cup \tau о \iota)$. Luke alone notes this item.
Luke 19:33
As they were loosing ( $\lambda \nu 0 v \tau \omega \nu \alpha v \tau \omega v$ ). Genitive absolute.
The owners thereof (о кирı avтоv). The same word кирıя used of the Lord Jesus in verse 31 (and 34) and which these "owners" would understand. See on Mt 21:3; Mr 11:3 for кטрıo̧ used by Jesus about himself with the expectation that these disciples would recognize him by that title as they did. The word in common use for the Roman emperor and in the LXX to translate the Hebrew Elohim (God).

Luke 19:35
Set Jesus thereon ( $\varepsilon \pi \varepsilon \beta$, $\beta a \sigma \alpha v$ tov In $\sigma o v v$ ). First aorist active. Old verb, to cause to mount, causative verb from $\beta a \iota v \omega$, to go. In the N.T. only here and Lu 10:34; Ac 23:24 .

Luke 19:36
They spread ( $v \pi \varepsilon \sigma \tau \rho \omega \nu v v o v$ ). Imperfect active describing the continued spreading as they went on. Нv $\quad 0 \sigma \tau \rho \omega v \nu v \omega$ is a late form of the old verb $v \pi о \sigma \tau о \rho \varepsilon v v v \mu$. Here only in the N.T.

Luke 19:37
At the descent ( $\pi \rho \circ \varsigma \tau \eta \kappa \alpha \tau \alpha \beta \alpha \sigma \varepsilon$ ). Epexegetic of "drawing nigh." They were going by the southern slope of the Mount of Olives. As they turned down to the city, the grand view stirred the crowd to rapturous enthusiasm. This was the first sight of the city on this route which is soon obscured in the descent. The second view bursts out again (verse 41). It was a shout of triumph from the multitude with their long pent-up enthusiasm (verse 11), restrained no longer by the parable of the pounds.

For all the mighty works which they had seen ( $\pi \varepsilon \rho \pi \alpha \sigma \omega v \varepsilon \iota \delta o v \delta v v \alpha \mu \varepsilon \omega v$ ). Neat Greek idiom, incorporation of the antecedent ( $\delta v v \alpha \mu \varepsilon \omega v$ ) into the relative clause and attraction of the case of the relative from the accusative $\alpha \varsigma$ to the genitive $\omega v$. And note "all." The climax had come, Lazarus, Bartimaeus, and the rest.

Luke 19:38
The king cometh (o $\varepsilon \rho \chi \circ \mu \varepsilon v o \sigma$, o $\beta a \sigma \iota \lambda \varepsilon v \varsigma)$. The Messianic hopes of the people were now all ablaze with expectation of immediate realization. A year ago in Galilee he had frustrated their plans for a revolutionary movement "to take him by force to make him king" (Joh 6:15 ). The phrase "the coming king" like "the coming prophet" (Joh 6:14; De 18:15 ) expressed the hope of the long-looked-for Messiah. They are singing from the Hallel in their joy that Jesus at last is making public proclamation of his Messiahship.

Peace in heaven, and glory in the highest ( $\varepsilon v$ ov $\alpha \nu \omega \varepsilon \iota \rho \eta \nu \eta \kappa \alpha \delta o \xi \alpha \varepsilon \nu v \psi \iota \sigma \tau \circ \varsigma)$. This language reminds one strongly of the song of the angels at the birth of Jesus (Lu 2:14 ). Mr 11:10; Mt 21:9 have "Hosannah in the highest."

Luke 19:39
Some of the Pharisees ( $\tau \iota v \varepsilon \varsigma \tau \omega \nu \Phi \alpha \rho \iota \sigma \alpha \omega v$ ). Luke seems to imply by "from the multitude" ( $\alpha \pi \sigma$ тov o $\lambda \lambda$ ov) that these Pharisees were in the procession, perhaps half-hearted followers of the mob. But Joh 12:19 speaks of Pharisees who stood off from the procession and blamed each other for their failure and the triumph of Jesus. These may represent the bolder spirits of their same group who dared to demand of Jesus that he rebuke his disciples.

Luke 19:40
If these shall hold their peace ( $\varepsilon \alpha \nu$ ov $\sigma \sigma \omega \omega \pi \eta \sigma o v \sigma \iota \nu$ ). A condition of the first class, determined as fulfilled. The use of $\varepsilon \alpha v$ rather than $\varepsilon$ cuts no figure in the case (see Ac $8: 31$; 1Th 3:8; $1 \mathrm{Jo} 5: 15$ ). The kind of condition is determined by the mode which is here indicative. The future tense by its very nature does approximate the aorist subjunctive, but after all it is the indicative.

The stones will cry out (о $\lambda_{ı} \theta_{0} \kappa \rho \alpha \xi o v \sigma \iota v$ ). A proverb for the impossible happening.
Luke 19:41
Wept ( $\varepsilon \kappa \lambda \alpha \cup \sigma \varepsilon v)$. Ingressive aorist active indicative, burst into tears. Probably audible weeping.

Luke 19:42
If thou hadst known $(\varepsilon \varepsilon \gamma \nu \omega \varsigma)$. Second aorist active indicative of $\gamma \iota \nu \omega \sigma \kappa \omega$. Secondclass condition, determined as unfulfilled.

Even thou ( $\kappa \alpha \sigma v$ ). Emphatic position of the subject.
But now ( $v v v \delta \varepsilon$ ). Aposiopesis. The conclusion is not expressed and the sudden breaking off and change of structure is most impressive.

They are hid $(\varepsilon \kappa \rho v \beta \eta)$. Second aorist passive indicative of $\kappa \rho v \pi \tau \omega$, common verb, to hide.

Luke 19:43
Shall cast up a bank ( $\pi \alpha \rho \varepsilon \mu \beta \alpha \lambda$ оvбıv $\chi \alpha \rho \alpha \kappa \alpha)$. Future active indicative of $\pi \alpha \rho \varepsilon \mu \beta \alpha \lambda \lambda \omega$, a double compound ( $\pi \alpha \rho \alpha, \varepsilon \nu, \beta \alpha \lambda \lambda \omega$ ) of long usage, finally in a military sense of line of
battle or in camp. Here alone in the N.T. So also the word $\chi \alpha \rho \alpha \kappa \alpha(\chi \alpha \rho \alpha \xi)$ for bank, stake, palisade, rampart, is here alone in the N.T., though common enough in the old Greek.

Compass thee round ( $\pi \varepsilon \rho ı к \cup \kappa \lambda \omega \sigma \sigma v \sigma \iota v \sigma \varepsilon)$. Future active indicative. Another common compound to make a circle (кvклоৎ) around ( $\pi \varepsilon \rho$ ), though here only in the N.T.

Keep thee in ( $\sigma u v \varepsilon \xi o v \sigma ı v \sigma \varepsilon$ ). Shall hold thee together on every side ( $\pi \alpha v \tau 0 \theta \varepsilon v$ ). See about $\sigma v v \varepsilon \omega$ on 4:38.

Luke 19:44
Shall dash to the ground ( $\varepsilon \delta \alpha \varphi \stackrel{v}{ }$ to the ground, a rare verb from $\varepsilon \delta \alpha \varphi \circ \varsigma$, bottom, base, ground (Ac 22:7), here alone in the N.T.

Because ( $\alpha v \theta^{\prime} \omega v$ ). "In return for which things."
Thou knewest not (ovk $\varepsilon \gamma \nu \omega \varsigma$ ). Applying the very words of the lament in the condition in verse 42 . This vivid prophecy of the destruction of Jerusalem is used by those who deny predictive prophecy even for Jesus as proof that Luke wrote the Gospel after the destruction of Jerusalem. But it is no proof at all to those who concede to Jesus adequate knowledge of his mission and claims.

Luke 19:45
Began to cast out ( $\eta \rho \xi \alpha \tau 0 \varepsilon \kappa \beta \alpha \lambda \lambda \varepsilon \imath v$ ). So Mr 11:15 whereas Mt 21:12 has simply "he cast out." See Mark and Matthew for discussion of this second cleansing of the temple at the close of the public ministry in relation to the one at the beginning in Joh 2:14-22. There is nothing gained by accusing John or the Synoptics of a gross chronological blunder. There was abundant time in these three years for all the abuses to be revived.

Luke 19:47
He was teaching ( $\eta \nu \delta \iota \delta \alpha \sigma \kappa \omega \nu$ ). Periphrastic imperfect.
Daily ( $\tau$ ко $\kappa \theta^{\prime} \eta \mu \varepsilon \rho \alpha v$ ). Note the accusative neuter article, "as to the according to the day," very awkward English surely, but perfectly good Greek. The same idiom occurs in 11:3.

Sought ( $\varepsilon\lceil\eta \tau \operatorname{lov}$ ). Imperfect active, conative imperfect, were seeking, trying to seek.
The principal men of the people ( $о \pi \rho \omega \tau \sigma$ тov $\lambda \alpha o v$ ). The first men of the people. The position after the verb and apart from the chief priests and the scribes calls special attention to them. Some of these "first men" were chief priests or scribes, but not all of them. The lights and leaders of Jerusalem were bent on the destruction ( $\alpha \pi \boldsymbol{\pi} \boldsymbol{\lambda} \sigma \alpha$ ) of Jesus. The raising of Lazarus from the dead brought them together for this action (Joh 11:47-53; 12:9-11 ).

Luke 19:48
They could not find (oux $\eta \cup \rho i \sigma \kappa o v$ ). Imperfect active. They kept on not finding.
What they might do ( $\tau 0 \tau \pi o \not \tau \sigma \omega \sigma \iota v$ ). First aorist active deliberative subjunctive in a direct question retained in the indirect. Note the article to (neuter accusative) with the question.

Hung upon him ( $\varepsilon \xi \varepsilon \kappa \rho \varepsilon \mu \varepsilon \tau о$ avтov). Imperfect middle of $\varepsilon \kappa \kappa \rho \varepsilon \mu \alpha \mu \alpha$, an old verb ( $\mu$ form) to hang from, here only in the N.T. The form is an o $\mu \varepsilon \gamma \alpha$ form from $\varepsilon \kappa \kappa \rho \varepsilon \mu о \mu \alpha$, a constant tendency to the $o \mu \varepsilon \gamma \alpha$ form in the Koine. It pictures the whole nation (save the leaders in verse 47) hanging upon the words of Jesus as if in suspense in mid-air, rapt attention that angered these same leaders. Tyndale renders it "stuck by him."

## Luke 20

Luke 20:1
On one of the days ( $\varepsilon v \mu \alpha \tau \omega \nu \eta \mu \varepsilon \rho \omega v$ ). Luke's favourite way of indicating time. It was the last day of the temple teaching (Tuesday). Lu 20:1-19 is to be compared with Mr 11:27-12:12; Mt 21:23-46.

There came upon him ( $\varepsilon \pi \varepsilon \sigma \tau \eta \sigma \alpha v$ ). Second aorist active indicative, ingressive aorist of $\varepsilon \varphi เ \sigma \tau \eta \mu$, old and common verb, stood up against him, with the notion of sudden appearance. These leaders (cf. 19:47) had determined to attack Jesus on this morning, both Sadducees (chief priests) and Pharisees (scribes), a formal delegation from the Sanhedrin.

Luke 20:2
Tell us ( $\varepsilon ו \pi o v \eta \mu \nu v$ ). Luke adds these words to what Mark and Matthew have. Second aorist active imperative for the old form $\varepsilon ו \pi \varepsilon$ and with ending -ov of the first aorist active. Westcott and Hort punctuate the rest of the sentence as an indirect question after $\varepsilon ו \pi o v$, but the Revised Version puts a semicolon after "us" and retains the direct question. The Greek manuscripts have no punctuation.

Luke 20:3
Question (lojov). Literally, word. So in Mr 11:29; Mt 21:24.
Luke 20:5
They reasoned with themselves ( $\sigma v v \varepsilon \lambda о \gamma \iota \sigma \alpha \nu \tau 0$ ). First aorist middle of $\sigma \nu \lambda \lambda о \gamma \iota \zeta \rho \mu \alpha$, to bring together accounts, an old word, only here in the N.T. Mark and Matthew have $\delta ı \varepsilon \lambda o \gamma \iota \zeta_{0}$ то (imperfect middle of $\delta \iota \alpha \lambda o \gamma \iota \zeta о \mu \alpha$, a kindred verb, to reckon between one another, confer). This form ( $\delta \iota \varepsilon \lambda o \gamma \iota \zeta$ оvтo) in verse 14 below.

If we shall say ( $\varepsilon \alpha v \varepsilon ו \pi \omega \mu \varepsilon v$ ). Third-class condition with second aorist active subjunctive. Suppose we say! So in verse 6.

Luke 20:6
Will stone us (ката入ı $\theta \alpha \sigma \varepsilon)$. Late verb and here only in the N.T. Literally, will throw stones down on us, stone us down, overwhelm us with stones.

They be persuaded ( $\pi \varepsilon \pi \varepsilon \neg \sigma \mu \varepsilon v o \varsigma \varepsilon \sigma \tau \iota v)$. Periphrastic perfect passive indicative of $\pi \varepsilon ו \theta \omega$, to persuade, a settled state of persuasion, "is persuaded" (no reason for use of "be" here).

That John was a prophet ( $\mathrm{I} \omega \alpha \vee \eta \nu \pi \rho \circ \varphi \eta \tau \eta \nu \varepsilon เ v \alpha$ ). Accusative and infinitive in indirect assertion.

Luke 20:7
That they knew not ( $\mu \eta \varepsilon \varepsilon \delta \varepsilon v \alpha$ ). Accusative and infinitive in indirect assertion again with the negative $\mu \eta$ rather than $o v$.

Luke 20:9
Vineyard ( $\alpha \mu \pi \varepsilon \lambda \omega v \alpha$ ). Late word from $\alpha \mu \pi \varepsilon \lambda o \varsigma$ (vine), place of vines. So in Mr 12:1; Mt 21:33.

Let it out ( $\varepsilon \xi \varepsilon \delta \varepsilon \tau \sigma$ ). Second aorist middle of $\varepsilon \kappa \delta เ \delta \omega \mu$, but with variable vowel $\varepsilon$ in place of o of the stem $\delta$ o ( $\varepsilon \xi \varepsilon \delta o \tau o)$. Same form in Mark and Matthew.

For a long time ( $\chi$ роvovৎ ıкаvovৎ). Accusative of extent of time, considerable times or periods of time. Not in Mark and Matthew, though all three have $\alpha \pi \varepsilon \delta \eta \mu \eta \sigma \varepsilon \nu$ (went off from home). See on Lu 7:6 for เкаvos.

Luke 20:10
At the season ( $\kappa \alpha \iota \rho \omega$ ). The definite season for the fruit like o к $\alpha \iota \rho \circ \varsigma \tau \omega \nu \kappa \alpha \rho \pi \omega \nu$ (Mt 21:34 ). That they should give (ıva $\delta \omega \sigma o v \sigma \iota v$ ). Future indicative with $v v a$ for purpose like the aorist subjunctive, though not so frequent.

Luke 20:11
He sent yet another ( $\pi \rho \circ \sigma \varepsilon \theta \varepsilon \tau \sigma \varepsilon \tau \varepsilon \rho \circ v \pi \varepsilon \mu \psi \alpha$ ). Literally,
he added to send another. A clear Hebraism repeated in verse 12 and also in 19:11.
Luke 20:12
They wounded ( $\tau \rho \alpha v \mu \alpha \tau \iota \sigma \alpha v \tau \varepsilon \varsigma)$. First aorist active participle of $\tau \rho \alpha v \mu \alpha \tau \iota \zeta \omega$. An old verb, from $\tau \rho \alpha v \mu \alpha$, a wound, but in the N.T. only here and Ac 19:16.

Luke 20:13
What shall I do? (T $\pi$ oı $\eta \omega \omega$;). Deliberative future indicative or aorist subjunctive (same form). This detail only in Luke. Note the variations in all three Gospels. All three have "will reverence" ( $\varepsilon \nu \tau \rho \alpha \pi \eta \sigma o v \tau \alpha)$ for which see Matthew and Mark.

It may be $(\iota \omega \varsigma)$. Perhaps, from $\iota \sigma o \varsigma$, equal. Old adverb, but only here in the N.T.
Luke 20:14
That the inheritance may be ours ( $\imath v \alpha \eta \mu \omega \nu \gamma \varepsilon \nu \eta \tau \alpha \eta \kappa \lambda \eta \rho \circ \nu \circ \mu \iota \alpha$ ). That the inheritance may become ( $\gamma \varepsilon \nu \eta \tau \alpha$, second aorist middle subjunctive of $\gamma \iota \nu o \mu \alpha$ ). Here Mt 21:39 has $\sigma \chi \omega \mu \varepsilon v$ "let us get, ingressive aorist active subjunctive." Cf. $\varepsilon \chi \omega \mu \varepsilon v$, present subjunctive of the same verb $\varepsilon \chi \omega$ in Ro $5: 1$; Mr 12:7 has "and it will be ours" $(\varepsilon \sigma \tau \alpha)$.

Luke 20:16
God forbid ( $\mu \eta \gamma \varepsilon$ voito). Optative of wish about the future with $\mu \eta$. Literally,
may it not happen. No word "God" in the Greek. This was the pious protest of the defeated members of the Sanhedrin who began to see the turn of the parable against themselves.

Luke 20:17
He looked upon them ( $\varepsilon \mu \beta \lambda \varepsilon \psi \alpha \varsigma ~ \alpha v \tau o ו \varsigma)$. Not in Mark and Matthew. First aorist active participle of $\varepsilon \mu \beta \lambda \varepsilon \pi \omega$, to look on. It was a piercing glance. The scripture quoted is from Ps 118:22 and is in Mr 11:10; Mt 21:42, which see for the inverted attraction of the case $\lambda ı \theta \mathrm{ov}$ (stone) to that of the relative ov (which).

Luke 20:18
Shall be broken to pieces ( $\sigma v v \theta \lambda \alpha \sigma \theta \eta \sigma \varepsilon \tau \alpha$ ). Future passive indicative of $\sigma v v \theta \lambda \alpha \omega$, a rather late compound, only here in the N.T. unless Mt 21:44 is genuine. It means to shatter.

Will scatter him as dust $\left(\lambda_{\iota} \kappa \mu \eta \sigma \varepsilon\right)$. From $\lambda_{\iota \kappa} \mu \alpha \omega$, an old verb to winnow and then to grind to powder. Only here in the N.T. unless in Mt 21:44 is genuine, which see.

Luke 20:19
To lay hands on him ( $\varepsilon \pi \iota \beta \alpha \lambda \varepsilon ı v \varepsilon \pi^{\prime}$ avtov $\left.\tau \alpha \varsigma ~ \chi \varepsilon \iota \rho a \varsigma\right) . ~ S e c o n d ~ a o r i s t ~ a c t i v e ~ i n f i n i t i v e ~$ of $\varepsilon \pi \kappa \beta \alpha \lambda \lambda \omega$, an old verb and either transitively as here or intransitively as in Mr 4:37. Vivid picture here where Mr 12:12; Mt 21:46 has "to seize" (кратпба).

In that very hour ( $\varepsilon v \alpha v \tau \eta \tau \eta \omega \rho \alpha$ ). Luke's favourite idiom, in the hour itself. Not in Mark or Matthew and shows that the Sanhedrin were angry enough to force the climax then.

And they feared ( $\kappa \alpha \varepsilon \varphi о \beta \eta \theta \eta \sigma \alpha v$ ). Adversative use of $\kappa \alpha=$ but they feared. Hence they refrained.

For they perceived ( $\varepsilon \gamma v \omega \sigma \alpha v \gamma \alpha \rho)$. The reason for their rage. Second aorist active indicative of $\gamma \iota \nu \omega \sigma \kappa \omega$.

Against them ( $\pi \rho \circ \varsigma$ avtouc). As in Mr 12:12. The cap fitted them and they saw it.
Luke 20:20
They watched him ( $\pi \alpha \rho a \tau \eta \rho \eta \sigma \alpha \nu \tau \varepsilon \varsigma)$. First aorist active participle of $\pi \alpha \rho \alpha \tau \eta \rho \varepsilon \omega$, a common Greek verb to watch on the side or insidiously or with evil intent as in Lu 6:7 ( $\pi \alpha \rho \varepsilon \tau \eta \rho o u v \tau 0)$ of the scribes and Pharisees. See on Mr 3:2 . There is no "him" in the Greek. They were watching their chance.

Spies ( $\varepsilon \nu \kappa \alpha \theta \varepsilon \tau о \cup \varsigma)$. An old verbal adjective from $\varepsilon \nu \kappa \alpha \theta ı \eta \mu$, to send down in or secretly. It means liers in wait who are suborned to spy out, one who is hired to trap one by crafty words. Only here in the N.T.

Feigned themselves (vлокрıvouzvovc eavtouc). Hypocritically professing to be "righteous" ( $\delta$ ıкaıouc). "They posed as scrupulous persons with a difficulty of conscience" (Plummer).

That they might take hold of his speech ( $\imath v \alpha \varepsilon \pi \iota \lambda \alpha \beta \omega v \tau \alpha \alpha \cup \tau o v \lambda o \gamma o v$ ). Second aorist middle of $\varepsilon \pi \iota \lambda \alpha \mu \beta \alpha v \omega$, an old verb for seizing hold with the hands and uses as here the genitive case. These spies are for the purpose of ( $1 v \alpha$ ) catching hold of the talk of Jesus if they can get a grip anywhere. This is their direct purpose and the ultimate purpose or result is also stated, "so as to deliver him up" ( $\omega \sigma \tau \varepsilon \pi \alpha \rho \alpha \delta o u v \alpha \alpha v \tau o v)$. Second aorist active infinitive of $\pi \alpha \rho \alpha \delta t \delta \omega \mu$, to hand over, to give from one's side to another. The trap is all set now and ready to be sprung by these "spies."

Of the governor ( $\tau \circ v \eta \gamma \varepsilon \mu \circ v o c$ ). The Sanhedrin knew that Pilate would have to condemn Jesus if he were put to death. So then all their plans focus on this point as the goal. Luke alone mentions this item here.

Luke 20:21
Rightly (op $\theta \omega \varsigma$ ). Matthew (Mt 22:16) notes that these "spies" were "disciples" (students) of the Pharisees and Mark (Mr 12:13) adds that the Herodians are also involved in the plot.

These bright theologues are full of palaver and flattery and openly endorse the teaching of Jesus as part of their scheme.

Acceptest not the person of any (ov $\lambda \alpha \mu \beta \alpha v \varepsilon ı \varsigma ~ \pi \rho o \sigma \omega \pi \sigma$ ). Dost not take the face (or personal appearance) as the test. It is a Hebraism from which the word $\pi \rho о \sigma \omega \pi о \lambda \varepsilon \mu \psi ı \alpha$ (Jas 2:1) comes. Originally it meant to lift the face, to lift the countenance, to regard the face, to accept the face value. See Mr 12:13-17; Mt 22:15-22 for discussion of details here. They both have $\beta \lambda \varepsilon \pi \varepsilon ı$, here.

Luke 20:22
Tribute ( $\varphi$ opov). Old word for the annual tax on land, houses, etc. Mark and Matthew have $\kappa \eta v \sigma o v$, which see for this Latin word in Greek letters. The picture on the coin may have been that of Tiberius.

Luke 20:23
Perceived (катаvoпба¢). From катаvoء $\omega$, to put the mind down on. Mark has $\varepsilon เ \delta \omega \varsigma$, "knowing," and Matthew $\gamma$ vouৎ, coming to know or grasping (second aorist active participle of $\gamma ı \nu \omega \sigma \kappa \omega)$.

Craftiness ( $\pi \alpha v o v \rho \gamma \iota \alpha v$ ). Old word for doing any deed. Matthew has "wickedness" ( $\pi \mathbf{\prime} \downarrow \eta \rho ı \alpha v$ ) and Mark "hypocrisy" (ขтокрıбь). Unscrupulous they certainly were. They would stoop to any trick and go the limit.

Luke 20:26
They were not able (ouk ı $\sigma \chi \cup \sigma a v$ ). They did not have strength. An old verb $\iota \sigma \chi \cup \omega$ from เ $\sigma \chi \cup \varsigma$ (strength). They failed "to take hold (cf. verse 20) of the saying before the people." These "crack" students had made an ignominious failure and were not able to make a case for the surrender of Jesus to Pilate. He had slipped through their net with the utmost ease.

Held their peace ( $\varepsilon \sigma \iota \gamma \eta \sigma \alpha v$ ). Ingressive aorist active of $\sigma \iota \gamma \alpha \omega$. They became silent as they went back with the "dry grins."

Luke 20:27
There is no resurrection ( $\alpha v \alpha \sigma \tau \alpha \sigma \iota \nu \mu \eta \varepsilon \iota v \alpha$ ). Accusative and infinitive with negative $\mu \eta$ in indirect assertion. The Sadducees rally after the complete discomfiture of the Pharisees and Herodians. They had a stock conundrum with which they had often gotten a laugh on the Pharisees. So they volunteer to try it on Jesus. For discussion of details here see on Mt 22:23-33; Mr 12:18-27. Only a few striking items remain for Luke.

## Luke 20:33

Had her ( $\varepsilon \sigma \chi \circ v$ ). Constative second aorist indicative of $\varepsilon \chi \omega$ including all seven seriatim. So Mt 22:28; Mr 12:33 To wife ( $\quad$ vvaık $)$ ). As wife, accusative in apposition with "her."

Luke 20:36
 Only here in the N.T. Mark and Matthew have "as angels" ( $\omega \varsigma \alpha \gamma \gamma \varepsilon \lambda 0$ ). Angels do not marry, there is no marriage in heaven.

Sons of God, being sons of the resurrection (vio $\theta \varepsilon o v ~ \tau \eta \varsigma ~ \alpha v a \sigma \tau \alpha \sigma \varepsilon \omega \varsigma ~ v i o ~ o v \tau \varepsilon \varsigma) . ~$ This Hebraistic phrase, "sons of the resurrection" defines "sons of God" and is a direct answer to the Sadducees.

Luke 20:37
Even Moses ( $\kappa \alpha \mathrm{M} \omega v \sigma \eta \varsigma$ ). Moses was used by the Sadducees to support their denial of the resurrection. This passage (Ex 3:6) Jesus skilfully uses as a proof of the resurrection. See discussion on Mt 22:32; Mr 12:26f .

Luke 20:39
Certain of the scribes ( $\tau \iota v \varepsilon \varsigma \tau \omega v \gamma \rho \alpha \mu \mu \alpha \tau \varepsilon \omega v)$. Pharisees who greatly enjoyed this use by Jesus of a portion of the Pentateuch against the position of the Sadducees. So they praise the reply of Jesus, hostile though they are to him.

Luke 20:40
They durst not any more (ouк\&t $\varepsilon \tau \circ \lambda \mu \omega \nu$ ov $\delta \varepsilon v$ ). Double negative and imperfect active of to $\lambda \mu \alpha \omega$. The courage of Pharisees, Sadducees, Herodians vanished.

Luke 20:41
How say they? ( $\Pi \omega \varsigma \lambda \varepsilon \gamma o v \sigma \tau v$;). The Pharisees had rallied in glee and one of their number, a lawyer, had made a feeble contribution to the controversy which resulted in his agreement with Jesus and in praise from Jesus (Mr 12:28-34; Mt 27:34-40). Luke does not give this incident which makes it plain that by "they say" ( $\lambda \varepsilon \gamma \circ \mathrm{\sigma} \sigma \mathrm{v})$ Jesus refers to the Pharisees (rabbis, lawyers), carrying on the discussion and turning the tables on them while the Pharisees are still gathered together (Mt 22:41). The construction with $\lambda \varepsilon \gamma o v \sigma w$ is the usual infinitive and the accusative in indirect discourse. By "the Christ" ( $\tau 0 v$ Xpıotov) "the Messiah" is meant.

Luke 20:42
For David himself ( $\alpha \cup \tau o \varsigma ~ \gamma \alpha \rho \Delta \alpha v \varepsilon \iota \delta$ ). This language of Jesus clearly means that he treats David as the author of Ps 110 . The inspiration of this Psalm is expressly stated in Mr 12:36; Mt 22:43 (which see) and the Messianic character of the Psalm in all three Synoptics who all quote the LXX practically alike. Modern criticism that denies the Davidic authorship of this Psalm has to say either that Jesus was ignorant of the fact about it or that he declined to disturb the current acceptation of the Davidic authorship. Certainly modern scholars are not agreed on the authorship of Ps 110 . Meanwhile one can certainly be excused for accepting the natural implication of the words of Jesus here, "David himself."

In the book of the Psalms ( $\varepsilon v \beta 1 \beta \lambda \omega \Psi \alpha \lambda \mu \omega v)$. Compare 3:4 "in the book of the words of Isaiah the prophet."

Luke 20:44
David therefore ( $\Delta \alpha v \varepsilon \varepsilon \delta o u v$ ). Without $\varepsilon$ as in Mt 22:45. On the basis of this definite piece of exegesis (ouv, therefore) Jesus presses the problem ( $\pi \omega \varsigma$, how) for an explanation.

The deity and the humanity of the Messiah in Ps 110 are thus set forth, the very problems that disturbed the rabbis then and that upset many critics today.

Luke 20:45
In the hearing of all the people (aкоvovтоৎ $\pi \alpha v \tau о \varsigma ~ \tau o v ~ \lambda \alpha o v) . ~ G e n i t i v e ~ a b s o l u t e, ~$ "while all the people were listening" (present active participle). That is the time to speak. The details in this verse and verse 47 are precisely those given in Mr 12:38f. , which see for discussion of details. Mt 23:1-39 has a very full and rich description of this last phase of the debate in the temple where Jesus drew a full-length portrait of the hypocrisy of the Pharisees and scribes in their presence. It was a solemn climax to this last public appearance of Christ in the temple when Jesus poured out the vials of his indignation as he had done before (Mt 16:2; Lu 11:37-54; 12-1 ).

## Luke 21

Luke 21:1
And he looked up ( $\mathrm{A} v \alpha \beta \lambda \varepsilon \psi a \varsigma \delta \varepsilon$ ). He had taken his seat, after the debate was over and the Sanhedrin had slunk away in sheer defeat, "over against the treasury" (Mr 12:41). The word for "treasury" ( $\gamma \alpha \zeta о \varphi \cup \lambda \alpha \kappa \iota v$ ) is a compound of $\gamma \alpha \zeta \alpha$ (Persian word for royal treasury) and $\varphi \cup \lambda \alpha \kappa \eta$ guard or protection. It is common in the LXX, but in the N.T. only here and Mr 12:41,43; Joh 8:20 . Jesus was watching (Mr 12:41) the rich put in their gifts as a slight diversion from the intense strain of the hours before.

Luke 21:2
Poor ( $\pi \varepsilon v i \chi \rho a v$ ). A rare word from $\pi \varepsilon v \eta \varsigma$ ( $\pi \varepsilon v o \mu \alpha$, to work for one's living). Latin penuria and Greek $\pi \varepsilon เ v a \omega$, to be hungry are kin to it. Here only in the N.T. Mr 12:42 has $\pi \tau \omega \chi \eta$, a more common word from $\pi \tau \omega \sigma \sigma \omega$, to be frightened, to strike and hide from fear, to be in beggary. And Luke uses this adjective also of her in verse 3 .

Luke 21:3
More than they all ( $\pi \lambda \varepsilon \iota \circ v \pi \alpha v \tau \omega v$ ). Ablative case after the comparative $\pi \lambda \varepsilon \iota o v$.
Luke 21:4
All these did cast ( $\pi \alpha v \tau \varepsilon \varsigma$ outo $\varepsilon \beta \alpha \lambda o v$ ). Constative second aorist active indicative covering the whole crowd except the widow.

Living ( $\beta \stackrel{\circ}{ }$ ). Livelihood as in Mr 12:44, not $\zeta \omega \eta \nu$, principle of life.
Luke 21:5
As some spake ( $\tau \iota v \omega v \lambda \varepsilon \gamma o v \tau \omega v)$. Genitive absolute. The disciples we know from Mr 13:1; Mt 24:1 .

How (o $\tau$ ). Literally, "that."
It was adorned (кєкобнךта). Perfect passive indicative, state of completion, stands adorned, tense retained in indirect discourse, though English has to change it. Koб $\mu \varepsilon \omega$, old and common verb for orderly arrangement and adorning.
 Some of these stones in the substructure were enormous. "The columns of the cloister or portico were monoliths of marble over forty feet high" (Plummer). Cf. Josephus, War, V.5. The word $\alpha v \alpha \theta \eta \mu \alpha$ (here only in the N.T.) is not to be confused with $\alpha v \alpha \theta \varepsilon \mu \alpha$ from the same verb $\alpha v \alpha \tau \iota \theta \eta \mu$, but which came to mean a curse (Ga 1:8; Ac 23:14 ). So $\alpha v \alpha \theta \varepsilon \mu \alpha$ came to mean devoted in a bad sense, $\alpha v a \theta \eta \mu \alpha$ in a good sense. "Thus knave, lad, becomes a rascal; villain, a farmer, becomes a scoundrel; cunning, skilful, becomes crafty" (Vincent). These offerings in the temple were very numerous and costly (2Macc. 3:2-7) like the golden vine of Herod with branches as tall as a man (Josephus, Ant. XV. ii.3).

Luke 21:6
As for these things ( $\tau \alpha \cup \tau \alpha)$. Accusative of general reference.

One stone upon another ( $\left.\lambda_{1} \theta \mathrm{o} \varsigma \varepsilon \pi \lambda_{1} \theta \omega\right)$. Stone upon stone (locative). Here both Mr 13:2; Mt 24:2 have $\varepsilon \pi \lambda_{1} \theta$ ov (accusative). Instead of ouk $\alpha \varphi \varepsilon \theta \eta \sigma \varepsilon \tau \alpha$ (future passive) they both have ov $\mu \eta \alpha \varphi \varepsilon \theta \eta$ (double negative with aorist passive subjunctive). It was a shock to the disciples to hear this after the triumphal entry.

Luke 21:8
That ye be not led astray ( $\mu \eta \pi \lambda \alpha \nu \eta \theta \eta \tau \varepsilon$ ). First aorist passive subjunctive with $\mu \eta$ (lest). This verb $\pi \lambda a v a \omega$ occurs here only in Luke though often in the rest of the N.T. (as Mt 24:4,5,11,24, which see). Our word planet is from this word.

The time is at hand (o кaıюoৎ $\eta \gamma \gamma \not \kappa \varepsilon v$ ). Just as John the Baptist did of the kingdom (Mt 3:2 ) and Jesus also (Mr 1:15).

Go ye not after them ( $\mu \eta \pi о \rho \varepsilon \cup \theta \eta \tau \varepsilon$ о $\pi \iota \sigma \omega \alpha \cup \tau \omega v$ ). First aorist passive subjunctive with $\mu \eta$. A needed warning today with all the false cries in the religious world.

Luke 21:9
Be not terrified ( $\mu \eta \pi \tau o \eta \theta \eta \tau \varepsilon$ ). First aorist passive subjunctive with $\mu \eta$ from $\pi \tau 0 \varepsilon \omega$ an old verb to terrify, from $\pi \tau 0 \alpha$, terror. In the N.T. only here and Lu 24:37.

First ( $\Pi \rho \omega \tau 0 v$ ). It is so easy to forget this and to insist that the end is "immediately" in spite of Christ's explicit denial here. See Mt 24:4-42; Mr 13:1-37 for discussion of details for $\operatorname{Lu}$ 21:8-36 , the great eschatological discourse of Jesus

Luke 21:11
Famines and pestilences ( $\lambda_{\circ} \boldsymbol{\mu}$ о ка $\lambda_{\iota} \mu \mathrm{o}$ ). Play on the two words pronounced just alike in the Koine (itacism).

And terrors $(\varphi \circ \beta \eta \theta \rho \alpha \tau \varepsilon)$. The use of $\tau \varepsilon \ldots \tau \varepsilon$ in this verse groups the two kinds of woes. This rare word $\varphi o \beta \eta \theta \rho \alpha$ is only here in the N.T. It is from $\varphi o \beta \varepsilon \omega$, to frighten, and occurs only in the plural as here.

Luke 21:12
But before all these things ( $\pi \rho o \delta \varepsilon \tau o v \tau \omega v \pi \alpha \nu \tau \omega v$ ). In $\mathrm{Mr} 13: 8 ; \mathrm{Mt} \mathrm{24:8}$ these things are termed "the beginning of travail." That may be the idea here. Plummer insists that priority of time is the point, not magnitude.

Bringing you ( $\alpha \pi \alpha \gamma o \mu \varepsilon v o v \varsigma)$. Present passive participle from $\alpha \pi \alpha \gamma \omega$, an old verb to lead off or away. But here the participle is in the accusative plural, not the nominative like $\pi \alpha \rho a \delta i \delta o v \tau \varepsilon \varsigma$ (present active participle, delivering you up), agreeing with $\nu \mu a \varsigma$ not expressed the object of $\pi \alpha \rho \alpha \delta \iota \delta o v \tau \varepsilon \varsigma$, "you being brought before or led off." "A technical term in Athenian legal language" (Bruce).

Luke 21:13
It shall turn unto you ( $\alpha \pi \sigma \beta \eta \sigma \varepsilon \tau \alpha \nu \mu v)$ ). Future middle of $\alpha \pi o \beta \alpha ı v \omega$. It will come off, turn out for you (dative of advantage).

For a testimony ( $\varepsilon \iota \mu \mu \rho \tau \cup \rho\llcorner\circ v$ ). To their loyalty to Christ. Besides, "the blood of the martyrs is the seed of the church."

## Luke 21:14

Not to meditate beforehand ( $\mu \eta \pi \rho о \mu \varepsilon \lambda \varepsilon \tau \alpha \iota v$ ). The classical word for conning a speech beforehand. Mr 13:11 has $\pi \rho о \mu \varepsilon \rho \mu \nu \alpha \omega$, a later word which shows previous anxiety rather than previous preparation.

How to answer ( $\alpha \pi 0 \lambda o \gamma \eta \theta \eta v \alpha$ ). First aorist passive infinitive. It is the preparation for the speech of defence (apology) that Jesus here forbids, not the preparation of a sermon.

Luke 21:15
Your adversaries (o $\alpha v \tau \iota \kappa \varepsilon \mu \varepsilon v o ~ v \mu \nu v$ ). Those who stand against, line up face to face with (note avti-).

To withstand or to gainsay ( $\alpha v \tau \iota \sigma \tau \eta \nu \alpha \eta$ $\alpha \vee \tau \varepsilon \llbracket \pi \varepsilon เ v$ ). Two second aorist active infinitives with $\alpha \vee \tau \iota-$ in composition again. But these "antis" will go down before the power of Christ.

Luke 21:16
Shall they cause to be put to death ( $\theta \alpha v a \tau \omega \sigma \sigma v \sigma \tau v$ ). Future active of $\theta \alpha v a \tau o \omega$, to put to death or to make to die (causative). Either makes sense here. Old and common verb.

Luke 21:17
Not a hair of your head shall perish ( $\theta \rho \iota \xi \varepsilon \kappa \tau \eta \varsigma \kappa \varepsilon \varphi \alpha \lambda \eta \varsigma \nu \mu \omega v$ ov $\mu \eta \alpha \pi \alpha \lambda \eta \tau \alpha$ ). Only in Luke. Second aorist middle subjunctive of $\alpha \pi \sigma \lambda \lambda \nu \mu$ with ov $\mu \eta$ (double negative). Jesus has just said that some they will put to death. Hence it is spiritual safety here promised such as Paul claimed about death in Php 1:21.

Luke 21:19
Ye shall win ( $\kappa \tau \eta \sigma \varepsilon \sigma \theta \varepsilon$ ). Future middle of $\kappa \tau \alpha \circ \mu \alpha$, to acquire. They will win their souls even if death does come.

Luke 21:20
Compassed with armies ( $\kappa \cup \kappa \lambda о \nu \mu \varepsilon v \eta \nu \nu \pi о ~ \sigma \tau \rho \alpha \tau о \pi \varepsilon \delta \omega v$ ). Present passive participle of кик $\lambda о \omega$, to circle, encircle, from кик ${ }^{\prime}$ о , circle. Old verb, but only four times in N.T. The point of this warning is the present tense, being encircled. It will be too late after the city is surrounded. It is objected by some that Jesus, not to say Luke, could not have spoken (or written) these words before the Roman armies came. One may ask why not, if such a thing as predictive prophecy can exist and especially in the case of the Lord Jesus. The word $\sigma \tau \rho \alpha \tau 0 \pi \varepsilon \delta \omega v$ ( $\sigma \tau \rho \alpha \tau o \varsigma$, army, $\pi \varepsilon \delta o v$, plain) is a military camp and then an army in camp. Old word, but only here in the N.T.

Then know ( $\tau \circ \tau \varepsilon \gamma \nu \omega \tau \varepsilon$ ). Second aorist active imperative of $\gamma เ \nu \omega \sigma \kappa \omega$. Christians did flee from Jerusalem to Pella before it was too late as directed in Lu 21:21; Mr 13:14f.; Mt 24:16f.

Luke 21:22
That may be fulfilled ( $\tau 0 v \pi \lambda \eta \sigma \theta \eta v \alpha$ ). Articular infinitive passive to express purpose with accusative of general reference. The O.T. has many such warnings (Ho 9:7; De 28:49-57 , etc.).

## Luke 21:24

Edge of the sword ( $\sigma \tau о \mu \alpha \tau \mu \alpha \chi \alpha \rho \rho \eta \varsigma$ ). Instrumental case of $\sigma \tau о \mu \alpha \tau$ which means "mouth" literally (Ge 34:26). This verse like the close of verse 22 is only in Luke. Josephus (War, VI. 9.3) states that 1,100,000 Jews perished in the destruction of Jerusalem and 97,000 were taken captive. Surely this is an exaggeration and yet the number must have been large.

Shall be led captive ( $\alpha \downarrow \chi \mu \lambda \omega \tau \tau \sigma \theta \eta \sigma o v \tau \alpha)$. Future passive of $\alpha ı \chi \mu \alpha \lambda \omega \tau \iota \zeta \omega$ from $\alpha ı \chi \mu \eta$, spear and $\alpha \lambda \omega \tau$ то $(\alpha \lambda \iota \sigma \kappa о \mu \alpha)$. Here alone in the literal sense in the N.T.

Shall be trodden under foot ( $\varepsilon \sigma \tau \alpha \pi \alpha \tau o u \mu \varepsilon v \eta)$. Future passive periphrastic of $\pi \alpha \tau \varepsilon \omega$, to tread, old verb.

Until the times of the Gentiles be fulfilled ( $\alpha \chi \rho$ ov $\pi \lambda \eta \rho \omega \theta \omega \sigma \tau v$ каı $\rho \circ \varepsilon \theta v \omega v$ ). First aorist passive subjunctive with $\alpha \chi \rho$ ov like $\varepsilon \omega \varsigma$ ov. What this means is not clear except that Paul in Ro 11:25 shows that the punishment of the Jews has a limit. The same idiom appears there also with $\alpha \chi \rho$ ov and the aorist subjunctive.

Luke 21:25
Distress ( $\sigma 0 v o \chi \eta$ ). From $\sigma v v \varepsilon \chi \omega$. In the N.T. only here and 2Co 2:4. Anguish.
In perplexity ( $\varepsilon v \alpha \pi \sigma \rho ı \alpha)$. State of one who is $\alpha \pi о \rho o \varsigma$, who has lost his way ( $\alpha$ privative and $\pi о \rho о \varsigma)$. Here only in the N.T. though an old and common word.

For the roaring of the sea ( $\eta$ Øouc $\theta a \lambda \alpha \sigma \sigma \eta \varsigma)$ ) Our word echo (Latin echo) is this word $\eta \chi \circ \varsigma$, a reverberating sound. Sense of rumour in Lu 4:37.

Billows ( $\sigma \alpha \lambda o v$ ). Old word $\sigma \alpha \lambda o \varsigma$ for the swell of the sea. Here only in the N.T.
Luke 21:26
Men fainting ( $\alpha \pi \sigma \psi v \chi \circ v \tau \omega v \alpha v \theta \rho \omega \pi \omega v$ ). Genitive absolute of $\alpha \pi \sigma \psi v \chi \omega$, to expire, to breathe off or out. Old word. Here only in N.T.

Expectation ( $\pi \rho о \sigma \delta$ окіаऽ). Old word from $\pi \rho о \sigma \delta$ ока $\omega$, to look for or towards. In the N.T. only here and Ac 12:11 .

The world ( $\tau \eta$ oккоu $\mu \varepsilon v \eta$ ). Dative case, "the inhabited" (earth, $\gamma \eta$ ).
Luke 21:27
And then shall they see ( $\kappa \alpha$ тот $\frac{\mathrm{o}}{\boldsymbol{\gamma} \boldsymbol{o v \tau \alpha}) \text { ). As much as to say that it will be not till then. }}$ Clearly the promise of the second coming of the Son of man in glory here ( Mr 13:26f.; Mt 24:30f. ) is pictured as not one certain of immediate realization. The time element is left purposely vague.

Luke 21:28
Look up ( $\alpha$ vaки $\alpha \tau \varepsilon$ ). First aorist active imperative of $\alpha v \alpha \kappa \cup \pi \tau \omega$, to raise up. Here of the soul as in Joh 8:7,10, but in Lu 13:11 of the body. These the only N.T. examples of this common verb.

Redemption ( $\alpha \pi о \lambda \nu \tau \rho \omega \sigma \iota)$ ). Act of redeeming from $\alpha \pi о \lambda \nu \tau \rho o \omega$. The final act at the second coming of Christ, a glorious hope.

Luke 21:29

The fig tree, and all the trees ( $\tau \eta \nu \sigma v \kappa \eta \nu \kappa \alpha \pi \alpha \nu \tau \alpha \tau \alpha \delta \varepsilon \nu \delta \rho \alpha)$. This parable of the figtree (Mr 13:28-32; Mt 24:32-35 ) Luke applies to "all the trees." It is true about all of them, but the fig tree was very common in Palestine.

Luke 21:30
Shoot forth ( $\pi \rho o \beta \alpha \lambda \omega \sigma v)$. Second aorist active subjunctive of $\pi \rho o \beta \alpha \lambda \lambda \omega$, common verb, but in the N.T. only here and Ac 19:33 .

Summer ( $\theta \varepsilon \rho \circ \varsigma)$. Not harvest, but summer. Old word, but in the N.T. only here $(\mathrm{Mr}$ 13:28; Mt 24:32 ).

Luke 21:31
Coming to pass $(\gamma \iota \nu o \mu \varepsilon v \alpha)$. Present middle participle of $\gamma \iota v o \mu \alpha$ and so descriptive of the process.

Nigh ( $\varepsilon \gamma \gamma \cup \varsigma)$. The consummation of the kingdom is here meant, not the beginning.
Luke 21:32
This generation ( $\eta \gamma \varepsilon v \varepsilon \alpha \alpha v \tau \eta$ ). Naturally people then living.
Shall not pass away ( $o v \mu \eta \pi \alpha \rho \varepsilon \lambda \theta \eta$ ). Second aorist active subjunctive of $\pi \alpha \rho \varepsilon \rho \chi \circ \mu \alpha$. Strongest possible negative with ov $\mu \eta$.

Till all things be accomplished ( $\varepsilon \omega \varsigma \alpha \nu \pi \alpha \nu \tau \alpha \gamma \varepsilon \nu \eta \tau \alpha$ ). Second aorist middle subjunctive of $\gamma เ v o \mu \alpha$ with $\varepsilon \omega \varsigma$, common idiom. The words give a great deal of trouble to critics. Some apply them to the whole discourse including the destruction of the temple and Jerusalem, the second coming and the end of the world. Some of these argue that Jesus was simply mistaken in his eschatology, some that he has not been properly reported in the Gospels. Others apply them only to the destruction of Jerusalem which did take place in A.D. 70 before that generation passed away. It must be said for this view that it is not easy in this great eschatological discourse to tell clearly when Jesus is discussing the destruction of Jerusalem and when the second coming. Plummer offers this solution: "The reference, therefore, is to the destruction of Jerusalem regarded as the type of the end of the world."

Luke 21:33
My words shall not pass away ( $о \lambda o \gamma o \mu o v o v \mu \eta \pi \alpha \rho \varepsilon \lambda \varepsilon v \sigma o v \tau \alpha$ ). Future middle indicative with ov $\mu \eta$, a bit stronger statement than the subjunctive. It is noteworthy that Jesus utters these words just after the difficult prediction in verse 32 .

Luke 21:34
Lest haply your hearts be overcharged ( $\mu \eta \pi \sigma \tau \varepsilon \beta \alpha \rho \eta \theta \omega \sigma \iota \nu$ a $\kappa \alpha \rho \delta ı \alpha \nu \mu \omega v$ ). First aorist passive subjunctive of $\beta a \rho \varepsilon \omega$, an old verb to weigh down, depress, with $\mu \eta \pi 0 \tau \varepsilon$.

With surfeiting ( $\varepsilon \nu \kappa \rho \varepsilon \pi \alpha \lambda \eta$ ). A rather late word, common in medical writers for the nausea that follows a debauch. Latin crapula, the giddiness caused by too much wine. Here only in the N.T.

Drunkenness $(\mu \varepsilon \theta \eta)$. From $\mu \varepsilon \theta v$ (wine). Old word but in the N.T. only here and Ro 13:13; Ga 5:21 .

Cares of this life ( $\mu \varepsilon \rho \mu \nu \alpha \iota \varsigma \beta \iota \omega \tau \iota \kappa \alpha \iota \varsigma)$. Anxieties of life. The adjective $\beta \iota \omega \tau \iota \kappa о \varsigma$ is late and in the N.T. only here and 1Co 6:3f .

Come on you ( $\varepsilon \pi / \sigma \tau \eta$ ). Second aorist active subjunctive of $\varepsilon \varphi \vdash \sigma \tau \eta \mu$, ingressive aorist. Construed also with $\mu \eta \pi$ тот $\varepsilon$.

Suddenly ( $\varepsilon \varphi v \iota \delta \iota o \varsigma)$. Adjective in predicate agreeing with $\eta \mu \varepsilon \rho \alpha$ (day).
As a snare ( $\omega \varsigma \pi \alpha \gamma \varsigma)$. Old word from $\pi \eta \gamma \nu v \mu$, to make fast a net or trap. Paul uses it several times of the devil's snares for preachers ( $1 \mathrm{Ti} 3: 7$; 2Ti 2:26).

Luke 21:36
But watch ye ( $\alpha \gamma \rho \cup \pi v \varepsilon i \tau \varepsilon \delta \varepsilon$ ). A $\gamma \rho \cup \pi v \varepsilon \omega$ is a late verb to be sleepless ( $\alpha$ privative and $v \pi v o c$, sleep). Keep awake and be ready is the pith of Christ's warning.

That ye may prevail to escape ( $\imath \propto \alpha \kappa \alpha \tau \iota \sigma \chi \cup \sigma \eta \tau \varepsilon \varepsilon \kappa \varphi \cup \gamma \varepsilon เ v$ ). First aorist active subjunctive with $t v \alpha$ of purpose. The verb $k \alpha \tau \iota \sigma \chi v \omega$ means to have strength against (cf. Mt 16:18) . Common in later writers. Eкцuүعוv is second aorist active infinitive, to escape out.

To stand before the Son of man ( $\sigma \tau \alpha \theta \eta v \alpha \varepsilon \mu \pi \rho \circ \sigma \theta \varepsilon v \tau$ रov viov $\tau 0 v \alpha v \theta \rho \omega \pi \sigma v$ ). That is the goal. There will be no dread of the Son then if one is ready. $\Sigma \tau \alpha \theta \eta \nu \alpha$ is first aorist passive infinitive of $\iota \sigma \tau \eta \mu$.

Luke 21:37
Every day ( $\tau \alpha \varsigma \eta \mu \varepsilon \rho \alpha \varsigma$ ). During the days, accusative of extent of time.
Every night ( $\tau \alpha \varsigma ~ v v \kappa \tau \alpha \varsigma) . ~ " D u r i n g ~ t h e ~ n i g h t s, " ~ a c c u s a t i v e ~ o f ~ e x t e n t ~ o f ~ t i m e . ~$
Lodged ( $\eta \cup \lambda_{ı} \zeta \varepsilon \tau \sigma$ ). Imperfect middle, was lodging, $\alpha \cup \lambda ı \zeta \circ \mu \alpha$ from $\alpha \cup \lambda \eta$ (court).
Luke 21:38
Came early ( $\omega \rho \theta \rho \iota \zeta \varepsilon v$ ). Imperfect active of o $\rho \theta \rho \iota \zeta \omega$ from o $\rho \theta \rho \circ \varsigma$, late form for $o \rho \theta \rho \varepsilon \nu \omega$, to rise early. Only here in the N.T.

## Luke 22

Luke 22:1
The Passover ( $\pi \alpha \sigma \chi \alpha$ ) Both names (unleavened bread and passover) are used here as in Mr 14:1. Strictly speaking the passover was Nisan 14 and the unleavened bread 15-21. This is the only place in the N.T. where the expression "the feast of unleavened bread" (common in LXX, Ex. 23:15 , etc.) occurs, for Mr 14:1 has just "the unleavened bread." Mt 26:17 uses unleavened bread and passover interchangeably.

Drew nigh ( $\eta \gamma \gamma \zeta(\varepsilon v)$. Imperfect active. Mr 14:1; Mt 26:2 mention "after two days" definitely.

Luke 22:2
Sought ( $\varepsilon\lceil\eta \tau 0 v v$ ). Imperfect active of $\zeta \eta \tau \varepsilon \omega$, were seeking, conative imperfect.
How they might put him to death ( $\tau 0 \pi \omega \varsigma \alpha v \varepsilon \lambda \omega \sigma \tau v \alpha \tau \sigma v$ ). Second aorist active deliberative subjunctive (retained in indirect question) of avalpع $\omega$, to take up, to make away with, to slay. Common in Old Greek. Luke uses it so here and in 23:32 and eighteen times in the Acts, a favourite word with him. Note the accusative neuter singular article to with the whole clause, "as to the how, etc."

For they feared ( $\varepsilon \varphi \circ \beta$ ouvto $\gamma \alpha \rho$ ). Imperfect middle describing the delay of the "how." The triumphal entry and the temple speeches of Jesus had revealed his tremendous power with the people, especially the crowds from Galilee at the feast. They were afraid to go on with their plan to kill him at the feast.

Luke 22:3
Satan entered into Judas ( $\varepsilon ા \sigma\rceil \lambda \theta \varepsilon v \varepsilon \varsigma \varsigma$ Iov $\delta \alpha v$ ). Ingressive aorist active indicative. Satan was now renewing his attack on Jesus suspended temporarily ( $\operatorname{Lu} 4: 13$ ) "until a good chance." He had come back by the use of Simon Peter (Mr 8:33; Mt 16:23). The conflict went on and Jesus won ultimate victory ( Lu 10:18) . Now Satan uses Judas and has success with him for Judas allowed him to come again and again (Joh 13:27). Judas evidently opened the door to his heart and let Satan in. Then Satan took charge and he became a devil as Jesus said (Joh 6:70). This surrender to Satan in no way relieves Judas of his moral responsibility.

Luke 22:4
Went away ( $\alpha \pi \varepsilon \lambda \theta \omega v)$. Second aorist active participle of $\alpha \pi \varepsilon \rho \chi \circ \mu \alpha$. He went off under the impulse of Satan and after the indignation over the rebuke of Jesus at the feast in Simon's house (Joh 12:4-6 ).

Captains ( $\sigma \tau \rho \alpha \tau \eta \gamma o \iota s)$. Leaders of the temple guards (Ac 4:1), the full title, "captains of the temple," occurs in verse 52.

How he might deliver him unto them ( $\tau 0 \pi \omega \varsigma ~ \alpha u \tau o \iota \varsigma ~ \pi \alpha \rho \alpha \delta \omega \alpha \cup \tau o v$ ). The same construction as in verse 2, the article to with the indirect question and deliberative subjunctive second aorist active ( $\pi \alpha \rho \alpha \delta \omega)$.

Luke 22:5
Were glad ( $\varepsilon \chi \alpha \rho \eta \sigma \alpha \nu)$. Second aorist passive indicative of $\chi \alpha \iota \rho \omega$ as in Mr 14:11. Ingressive aorist, a natural exultation that one of the Twelve had offered to do this thing.

Covenanted ( $\sigma u v \varepsilon \theta \varepsilon v \tau \sigma$ ). Second aorist indicative middle of $\sigma v \nu \tau \iota \theta \eta \mu$. An old verb to put together and in the middle with one another. In the N.T. outside of Joh 9:22 only in Luke (here and Ac 23:20; 24:9). Luke only mentions "money" ( $\alpha \rho \gamma \mathrm{\rho} \rho \stackrel{\mathrm{ov}}{ }$ ), but not "thirty pieces" (Mt 26:15 ).

Luke 22:6
Consented ( $\varepsilon \xi \omega \mu \circ \lambda o \gamma \eta \sigma \varepsilon v$ ). Old verb, but the ancients usually used the simple form for promise or consent rather than the compound. This is the only instance of this sense in the N.T. It is from o $o \mu \mathrm{\lambda} \boldsymbol{\gamma} \gamma \circ \varsigma$ (o $\mu \circ \varsigma$, same, and $\lambda \varepsilon \gamma \omega$, to say), to say the same thing with another and so agree.

Opportunity ( $\varepsilon v \kappa \alpha \rho \iota \alpha v$ ). From $\varepsilon v \kappa \alpha \iota \rho \circ \varsigma ~(\varepsilon v, ~ \kappa \alpha \iota \rho о \varsigma), ~ a ~ g o o d ~ c h a n c e . ~ O l d ~ w o r d, ~ b u t ~$ in the N.T. only here and parallel passage Mt 26:16.

In the absence of the multitude ( $\alpha \tau \varepsilon \rho$ o $\chi \lambda o v$ ). A $\tau \varepsilon \rho$ is an old preposition, common in the poets, but rare in prose. Also in verse 35. It means "without," "apart from," like $\chi \omega \rho ı \varsigma$. The point of Judas was just this. He would get Jesus into the hands of the Sanhedrin during the feast in spite of the crowd. It was necessary to avoid tumult (Mt 26:5) because of the popularity of Jesus.

Luke 22:7
The day of unleavened bread came ( $\eta \lambda \theta \varepsilon \nu \eta \eta \mu \varepsilon \rho \alpha \tau \omega \nu \alpha \zeta \nu \mu \omega \nu$ ). The day itself came, not simply was drawing nigh (verse 1).

Must be sacrificed $(\varepsilon \delta \varepsilon \theta v \varepsilon \sigma \theta \alpha)$. This was Nisan 14 which began at sunset. Luke is a Gentile and this fact must be borne in mind. The lamb must be slain by the head of the family (Ex 12:6). The controversy about the day when Christ ate the last passover meal has already been discussed (Mt 26:17; Mr 14:12). The Synoptics clearly present this as a fact. Jesus was then crucified on Friday at the passover or Thursday (our time) at the regular hour 6 P.M. (beginning of Friday). The five passages in John (13:1f.; 13:27; 18:28; 19:14; 19:31 ) rightly interpreted teach the same thing as shown in my Harmony of the Gospels for Students of the Life of Christ (pp.279-284).

Luke 22:8
 the disciples take the initiative. The word passover in this context is used either of the meal, the feast day, the whole period (including the unleavened bread). "Eat the passover" can refer to the meal as here or to the whole period of celebration (Joh 18:28).

Luke 22:9
Where wilt thou that we make ready? (Поv $\theta \varepsilon \lambda \varepsilon ı \varsigma ~ \varepsilon \tau о \iota \mu \alpha \sigma \omega \mu \varepsilon v ;$ ). Deliberative first aorist active subjunctive without $\mathrm{v} \alpha$ after $\theta \varepsilon \lambda \varepsilon ı \varsigma$, perhaps originally two separate questions.

Luke 22:10
When you are entered ( $\varepsilon เ \sigma \varepsilon \lambda \theta o v \tau \omega \nu v \mu \omega v$ ). Genitive absolute.
Meet you ( $\sigma v v \alpha \nu \tau \eta \sigma \varepsilon v \mu v$ ). An old verb $\sigma v v a v \tau \alpha \omega$ (from $\sigma v v$, with, and $\alpha v \tau \alpha \omega$, to face, $\alpha v \tau$ ) with associative instrumental ( $v \mu \nu v)$. See on $\mathrm{Mr} 14: 13$ about the "man bearing a pitcher of water."

Luke 22:11
Goodman of the house (оккобعблотп). Master of the house as in Mr 14:14; Mt 10:25 . A late word for the earlier $\delta \varepsilon \sigma \pi о \tau \eta \varsigma$ oוкоט.

I shall eat $(\varphi \propto \gamma \omega)$. Second aorist futuristic (or deliberative) subjunctive as in Mr 14:14

Luke 22:12
And he (к'акєıขоৎ). Ka and єкєıขоৎ (храбıৎ) where Mr 14:15 has ка avтоৎ. Literally, And that one. See on Mark for rest of the verse.

Luke 22:13
He had said ( $\varepsilon \iota \rho \eta \kappa \varepsilon$ ). Past perfect active indicative of $\varepsilon \iota \pi \frac{\nu}{}$ where Mr 14:16 has $\varepsilon \iota \pi \varepsilon \nu$ (second aorist).

Luke 22:14
Sat down ( $\alpha v \varepsilon \pi \varepsilon \sigma \varepsilon v$ ). Reclined, fell back (or up). Second aorist active of $\alpha v \alpha \pi \iota \pi \tau \omega$.
Luke 22:15
With desire I have desired ( $\varepsilon \pi \iota \theta v \mu \wedge \alpha \varepsilon \pi \varepsilon \theta v \mu \eta \sigma \alpha)$. A Hebraism common in the LXX. Associative instrumental case of substantive and first aorist active indicative of same like a cognate accusative. Peculiar to Luke is all this verse. See this idiom in Joh 3:29; Ac 4:17.

Before I suffer ( $\pi \rho \circ \tau \tau v \mu \varepsilon \pi \alpha \theta \varepsilon เ v$ ). Preposition $\pi \rho o$ with articular infinitive and accusative of general reference, "before the suffering as to me." Пaرعıv is second aorist active infinitive of $\pi \alpha \sigma \chi \omega$.

Luke 22:16
Until it be fulfilled ( $\varepsilon \omega \varsigma$ o o ov $\pi \lambda \eta \rho \omega \theta \eta$ ). First aorist passive subjunctive of $\pi \lambda \eta \rho o \omega$ with $\varepsilon \omega \varsigma$ (otov), the usual construction about the future. It seems like a Messianic banquet that Jesus has in mind (cf. 14:15).

Luke 22:17
He received a cup ( $\delta \varepsilon \xi \alpha \mu \varepsilon v o \varsigma \pi о \tau \eta \rho \iota v$ ). This cup is a diminutive of $\pi \sigma \tau \eta \rho$. It seems that this is still one of the four cups passed during the passover meal, though which one is uncertain. It is apparently just before the formal introduction of the Lord's Supper, though he gave thanks here also ( $\varepsilon v \chi \alpha \rho \iota \sigma \tau \eta \sigma \alpha \varsigma)$. It is from this verb $\varepsilon v \chi \alpha \rho ı \sigma \tau \varepsilon \omega$ (see also verse 19) that our word Eucharist comes. It is a common verb for giving thanks and was used also for "saying grace" as we call it.

Luke 22:18

The fruit of the vine ( $\tau 0 v \gamma \varepsilon \vee \eta \mu \alpha \tau о \varsigma \tau \eta \varsigma \alpha \pi \varepsilon \lambda$ оv). So Mr 14:25; Mt 26:29 and not otvos though it was wine undoubtedly. But the language allows anything that is "the fruit of the vine."

Come $(\varepsilon \lambda \theta \eta)$. Second aorist active subjunctive with $\varepsilon \omega \varsigma$ as in verse 16 . Here it is the consummation of the kingdom that Jesus has in mind, for the kingdom had already come.

Luke 22:19
Which is given for you ( $\tau 0 v \pi \varepsilon \rho \cup \mu \omega v \delta \iota \delta o \mu \varepsilon v o v)$ ). Some MSS. omit these verses though probably genuine. The correct text in 1Co 11:24 has "which is for you," not "which is broken for you." It is curious to find the word "broken" here preserved and justified so often, even by Easton in his commentary on Luke, p. 320.

In remembrance of me ( $\varepsilon \iota \varsigma \tau \eta v \varepsilon \mu \eta \nu \alpha v \alpha \mu \nu \eta \sigma \tau v)$. Objective use of the possessive pronoun $\varepsilon \mu \eta \nu$, not the subjective.

This do (тоито тоєєєє). Present active indicative, repetition, keep on doing this.
Luke 22:20
After the supper ( $\mu \varepsilon \tau \alpha$ тo $\delta \varepsilon ו \pi v \eta \sigma \alpha$ ). Preposition $\mu \varepsilon \tau \alpha$ and the accusative articular infinitive. The textual situation here is confusing, chiefly because of the two cups (verses 17,20 ). Some of the documents omit the latter part of verse 19 and all of verse 20. It is possible, of course, that this part crept into the text of Luke from 1Co 11:24f. But, if this part is omitted, Luke would then have the order reversed, the cup before the bread. So there are difficulties whichever turn one takes here with Luke's text whether one cup or two cups.

The New Covenant ( $\varepsilon$ каıv $\eta \delta_{i \alpha} \theta \eta \kappa \eta$ ). See on Mt 26:28; Mr 14:24 for "covenant." Westcott and Hort reject "new" there, but accept it here and in 1Co 11:25. See on Lu 5:38 for difference between $\kappa \alpha \iota v \eta$ and $v \varepsilon \alpha$. "The ratification of a covenant was commonly associated with the shedding of blood; and what was written in blood was believed to be indelible" (Plummer).

Poured out ( $\varepsilon \kappa \chi \cup v v o \mu \varepsilon v o v)$. Same word in Mr 14:24; Mt 26:28 translated "shed." Late form present passive participle of $\varepsilon \kappa \chi \cup v v \omega$ of $\varepsilon \kappa \chi \varepsilon \omega$, to pour out.

Luke 22:21
That betrayeth ( $\tau 0 v \pi \alpha \rho \alpha \delta \delta \delta o v \tau o \varsigma)$. Present active participle, actually engaged in doing it. The hand of Judas was resting on the table at the moment. It should be noted that Luke narrates the institution of the Lord's Supper before the exposure of Judas as the traitor while Mark and Matthew reverse this order.

Luke 22:22
 to limit or define, mark off the border, our "horizon." But this fact does not absolve Judas of his guilt as the "woe" here makes plain.

Luke 22:23

Which of them it was ( $\tau 0 \tau \varsigma \varsigma \rho \alpha \varepsilon \eta \eta \xi \alpha v \tau \omega v$ ). Note the article $\tau 0$ with the indirect question as in verses 2,4 . The optative $\varepsilon \eta \eta$ here is changed from the present active indicative $\varepsilon \sigma \tau \iota v$, though it was not always done, for see $\delta$ окє in verse 24 where the present indicative is retained. They all had their hands on the table. Whose hand was it?

Luke 22:24
Contention ( $\varphi \backslash \lambda$ оvєıкıa). An old word from $\varphi ı \lambda о v \varepsilon ı \kappa о$, fond of strife, eagerness to contend. Only here in the N.T.

Greatest ( $\mu \varepsilon 亡 \zeta \omega v$ ). Common use of the comparative as superlative.
Luke 22:25
Have lordship over (кvpıєvovбıv). From кирıю̧. Common verb, to lord it over.
Benefactors ( $\varepsilon v \varepsilon \rho \gamma \varepsilon \tau \alpha$ ). From $\varepsilon v$ and $\varepsilon \rho \gamma \circ v$. Doer of good. Old word. Here only in the N.T. Latin Benefactor is exact equivalent.

Luke 22:26
Become ( $\gamma\llcorner v \varepsilon \sigma \theta \omega$ ). Present middle imperative of $\gamma ı v o \mu \alpha$. Act so. True greatness is in service, not in rank.

Luke 22:27
But I ( $\mathrm{E} \gamma \omega \delta \varepsilon$ ). Jesus dares to cite his own conduct, though their leader, to prove his point and to put a stop to their jealous contention for the chief place at this very feast, a wrangling that kept up till Jesus had to arise and give them the object lesson of humility by washing their feet (Joh 13:1-20).

Luke 22:28
In my temptations ( $\varepsilon \nu$ тoı $\pi \varepsilon \iota \rho a \sigma \mu \circ \iota \varsigma \mu \circ v$ ). Probably "trials" is better here as in Jas 1:2 though temptations clearly in Jas 1:13f. . This is the tragedy of the situation when Jesus is facing the Cross with the traitor at the table and the rest chiefly concerned about their own primacy and dignity.

Luke 22:29
And I appoint unto you ( $\kappa^{\prime} \alpha \gamma \omega \delta \iota \alpha \tau \iota \theta \eta \mu \alpha \nu \mu \nu v$ ). They had on the whole been loyal and so Jesus passes on to them ( $\delta ı \alpha \theta \eta \mu \alpha$ verb from which $\delta \iota \alpha \theta \eta \kappa \eta$ comes).

Luke 22:30
And ye shall sit ( $\kappa \alpha \theta \eta \sigma \varepsilon \sigma \theta \varepsilon$ ). But Westcott and Hort read in the text $\kappa \alpha \theta \eta \sigma \theta \varepsilon$ (present middle subjunctive with $\mathrm{tv} \alpha$ ). The picture seems to be that given in Mt 19:28 when Jesus replied to Peter's inquiry. It is not clear how literally this imagery is to be taken. But there is the promise of honour for the loyal among these in the end.

Luke 22:31
Asked to have you ( $\varepsilon \xi \eta \iota \tau \eta \sigma \alpha \tau 0)$. First aorist indirect middle indicative of $\varepsilon \xi \alpha \iota \tau \varepsilon \omega$, an old verb to beg something of one and (middle) for oneself. Only here in the N.T. The verb is used either in the good or the bad sense, but it does not mean here "obtained by asking" as margin in Revised Version has it.

That he might sift you ( $\tau 0 v \sigma \iota v \iota \sigma \alpha$ ). Genitive articular infinitive of purpose. First aorist active infinitive of $\sigma \iota \nu \iota \zeta \omega$, to shake a sieve, to sift, from $\sigma \iota v \iota v$, a winnowing fan. Later word. Here only in the N.T.

Luke 22:32
That thy faith fail not ( $\iota \alpha \alpha \mu \eta \varepsilon \kappa \lambda \iota \pi \eta \varepsilon \pi \iota \sigma \tau \iota \varsigma \mu \circ v$ ). Second aorist active subjunctive of purpose with $\iota v \alpha$ after $\varepsilon \delta \varepsilon \eta \theta \eta \nu$ ( I prayed ) of $\varepsilon \kappa \lambda \varepsilon \iota \pi \omega$, old verb. Our word eclipse is this word. Evidently Jesus could not keep Satan from attacking Peter. He had already captured Judas. Did he not repeatedly attack Jesus? But he could and did pray for Peter's faith and his praying won in the end, though Peter stumbled and fell.

And do thou ( $\kappa \alpha \sigma v$ ). The words single out Peter sharply.
Once thou hast turned again ( $\pi \sigma \tau \varepsilon \varepsilon \pi \iota \sigma \tau \rho \varepsilon \psi \alpha \varsigma)$. First aorist active participle of $\varepsilon \pi \iota \sigma \tau \rho \varepsilon \varphi \omega$, common verb to turn to, to return. But the use of this word implied that Peter would fall though he would come back and "strengthen thy brethren."

Luke 22:33
To prison and to death ( $\varepsilon \iota \varsigma \varphi \cup \lambda \alpha \kappa \eta \nu \kappa \alpha \varepsilon \iota ৎ \theta a v a \tau o v$ ). Evidently Peter was not flattered by the need of Christ's earnest prayers for his welfare and loyalty. Hence this loud boast.

Luke 22:34
Until thou shalt thrice deny that thou knowest me ( $\varepsilon \omega \varsigma \tau \rho \iota \mu \varepsilon \alpha \pi \alpha \rho \nu \eta \sigma \eta \varepsilon \varepsilon \delta \varepsilon \nu \alpha)$. "Thrice" is in all four Gospels here for they all give this warning to Peter (Mr 14:30; Mt 26:34; Lu 22:34; Joh 18:38 ). Peter will even deny knowing Jesus ( $\varepsilon \iota \varepsilon v \alpha)$.

Luke 22:35
Without purse ( $\alpha \tau \varepsilon \rho \beta \alpha \lambda \lambda \alpha v \tau \iota o v)$. Money bag or purse. Old word, but in the N.T. only in Luke (10:4; 12:33; 22:35ff. ).

Wallet ( $\pi \eta \rho \alpha \varsigma)$. See on Mt 10:10 .
Lacked ye anything ( $\mu \eta \tau \imath \nu \circ \varsigma v \sigma \tau \varepsilon \rho \eta \sigma \alpha \tau \varepsilon ;$ ). Answer No expected (ov $\theta \varepsilon v o \varsigma$ below). Ablative case after vo兀 $\rho \varepsilon \omega$.

Luke 22:36
Buy a sword ( $\alpha \gamma \circ \rho \alpha \sigma \alpha \tau \omega \mu \alpha \chi \alpha \iota \rho \alpha v$ ). This is for defence clearly. The reference is to the special mission in Galilee (Lu 9:1-6; Mr 6:6-13; $\mathrm{Mt} 9: 35-11: 1$ ). They are to expect persecution and bitter hostility (Joh 15:18-21). Jesus does not mean that his disciples are to repel force by force, but that they are to be ready to defend his cause against attack. Changed conditions bring changed needs. This language can be misunderstood as it was then.

Luke 22:38
Lord, behold, here are two swords (кvрı $\delta о v \mu \alpha \chi \propto ı \rho \alpha \omega \delta \varepsilon \delta v o$ ). They took his words literally. And before this very night is over Peter will use one of these very swords to try to cut off the head of Malchus only to be sternly rebuked by Jesus (Mr 14:47; Mt 26:51f.; Lu 22:50f.; Joh 18:10f. ). Then Jesus will say: "For all that take the sword shall perish with the sword" (Mt 26:52 ). Clearly Jesus did not mean his language even about the sword to be
pressed too literally. So he said: "It is enough" (Hıкavov $\varepsilon \sigma \tau \iota v)$. It is with sad irony and sorrow that Jesus thus dismisses the subject. They were in no humour now to understand the various sides of this complicated problem. Every preacher and teacher understands this mood, not of impatience, but of closing the subject for the present.

Luke 22:39
As his custom was ( $\kappa \alpha \tau \alpha \tau о \varepsilon \theta$ оৎ). According to the custom (of him). It was because Judas knew the habit of Jesus of going to Gethsemane at night that he undertook to betray him without waiting for the crowd to go home after the feast.

Luke 22:40
At the place ( $\varepsilon \pi$ тov толоv). The place of secret prayer which was dear to Jesus.
Pray that ye enter not into temptation ( $\pi \rho \circ \sigma \varepsilon v \chi \varepsilon \sigma \theta \varepsilon \mu \eta \varepsilon \iota \sigma \varepsilon \lambda \theta \varepsilon \iota v \varepsilon \iota \varsigma \pi \varepsilon \iota \rho a \sigma \mu \circ v$ ). "Keep on praying not to enter (ingressive aorist infinitive, not even once) into temptation." It is real "temptation" here, not just "trial." Jesus knew the power of temptation and the need of prayer. These words throw a light on the meaning of his language in Mt 6:13. Jesus repeats this warning in verse 46 .

Luke 22:41
About a stone's throw ( $\omega \sigma \varepsilon \lambda_{\imath} \theta$ ov $\beta o \lambda \eta v$ ). Accusative of extent of space. Luke does not tell of leaving eight disciples by the entrance to Gethsemane nor about taking Peter, James, and John further in with him.

Kneeled down ( $\theta \varepsilon ı \varsigma \tau \alpha$ үоva $\tau \alpha$ ). Second aorist active participle from $\tau \iota \theta \eta \mu$. Mr 14:35 says "fell on the ground" and Mt 26:39 "fell on his face." All could be true at different moments.

Prayed ( $\pi \rho о \sigma \eta \cup \chi \varepsilon \tau о)$. Imperfect middle, was praying, kept on praying.
Luke 22:42
If thou be willing $(\varepsilon \beta o v \lambda \varepsilon)$. This condition is in the first petition at the start.
Be done $(\gamma \iota v \varepsilon \sigma \theta \omega)$. Present middle imperative, keep on being done, the Father's will.
Luke 22:43
An angel ( $\alpha \gamma \gamma \varepsilon \lambda o \varsigma)$. The angels visited Jesus at the close of the three temptations at the beginning of his ministry ( $\mathrm{Mt} 4: 11$ ). Here the angel comes during the conflict.

Luke 22:44
In an agony ( $\varepsilon \vee \alpha \gamma \omega v / \alpha$ ). It was conflict, contest from $\alpha \gamma \omega v$. An old word, but only here in the N.T. Satan pressed Jesus harder than ever before.

As it were great drops of blood ( $\omega \sigma \varepsilon \theta \rho \circ \mu \beta$ o $\alpha \mu \alpha \tau \sigma \varsigma)$. Thick, clotted blood. An old word $(\theta \rho o \mu \beta o)$ common in medical works, but here only in the N.T. This passage (verses 43,44 ) is absent from some ancient documents. Aristotle speaks of a bloody sweat as does Theophrastus.

Luke 22:45
 turnings of Jesus to the trusted three for human sympathy.

Luke 22:46
Why sleep ye? (T $\kappa \alpha \theta \varepsilon v \delta \varepsilon \tau \varepsilon$;). This reproach Luke gives, but not the almost bitter details in Mr 14:37-42; Mt 26:40-46 ).

Luke 22:47
Went before them ( $\pi \rho \circ \eta \rho \chi \varepsilon \tau 0$ ). Imperfect middle. Judas was leading the band for he knew the place well (Joh 18:2).

Luke 22:48
With a kiss ( $\varphi, \lambda \eta \mu \alpha \tau)$. Instrumental case. Jesus challenges the act of Judas openly and calls it betrayal, but it did not stop him.

Luke 22:49
What would follow ( $\tau 0 \varepsilon \sigma o \mu \varepsilon v o v$ ). Article and the future middle participle of $\varepsilon \not \mu$, to be.

Shall we smite with a sword? ( $\left.\varepsilon \pi \alpha \tau \alpha \xi_{o \mu} \mu \nu \varepsilon \nu \mu \alpha \chi \alpha \rho \eta \imath ;\right)$. Note $\varepsilon$ in a direct question like the Hebrew. Luke alone gives this question. Instrumental use of $\varepsilon v$. They had the two swords already mentioned ( 22:38).

Luke 22:50
His right ear ( $\tau 0$ ou¢ $\alpha \cup \tau 0 v$ to $\delta \varepsilon \xi \iota v$ ). Mark 14:47; Mt 26:51 do not mention "right," but Luke the Physician does. Joh 18:10 follows Luke in this item and also adds the names of Peter and of Malchus since probably both were dead by that time and Peter would not be involved in trouble.

Luke 22:51
Suffer us thus far ( $\varepsilon \alpha \tau \varepsilon \varepsilon \omega \varsigma$ रov $\frac{1}{}$ ). Present active imperative of $\varepsilon \alpha \omega$, to allow. But the meaning is not clear. If addressed to Peter and the other disciples it means that they are to suffer this much of violence against Jesus. This is probably the idea. If it is addressed to the crowd, it means that they are to excuse Peter for his rash act.

He touched his ear and healed him ( $\alpha \psi \alpha \mu \varepsilon v o \varsigma ~ \tau o v ~ o \tau เ o v ~ ı ~ a \sigma \alpha \tau о ~ \alpha v \tau o v) . ~ W h e t h e r ~ J e s u s ~$ picked up the piece of the ear and put it back is not said. He could have healed the wound without that. This miracle of surgery is given alone by Luke.

Luke 22:52
As against a robber? ( $\omega \varsigma \varepsilon \pi \lambda \eta \iota \sigma \tau \eta v ;)$. They were treating Jesus as if he were a bandit like Barabbas.

Luke 22:53
But this is your hour ( $\alpha \lambda \lambda^{\prime} \alpha v \tau \eta \varepsilon \sigma \tau \iota v v \mu \omega \nu \eta \omega \rho \alpha$ ). So Jesus surrenders. The moral value of his atoning sacrifice on the Cross consists in the voluntariness of his death. He makes it clear that they have taken undue advantage of him in this hour of secret prayer
and had failed to seize him in public in the temple. But "the power of darkness" ( $\eta$ £ $\xi \circ 0 \sigma \iota \alpha$ tov бкотouc), had its turn. A better day will come. The might, authority of darkness.

Luke 22:54
Into the high priest's house ( $\varepsilon \varsigma \varsigma \tau \eta \nu$ оккı $\alpha v$ тоv $\alpha \rho \chi เ \varepsilon \rho \varepsilon \omega \varsigma)$. Luke alone mentions "the house." Though it is implied in Mr 14:53; Mt 26:57 .

Followed ( $\eta \kappa 0 \lambda o u \theta \varepsilon$ ). Imperfect, was following, as Mt 26:58; Joh 18:15. Curiously Mr 14:54 has the aorist.

Luke 22:55
When they had kindled a fire ( $\pi \varepsilon \rho \iota \alpha \psi \alpha \nu \tau \omega \nu \pi \nu \rho$ ). Genitive absolute, first aorist active participle of $\pi \varepsilon \rho เ a \pi \tau \omega$, an old verb, but here only in the N.T. Kindle around, make a good fire that blazes all over. It was April and cool at night. The servants made the fire.

And had sat down together ( $\kappa \alpha \quad \sigma \nu v \kappa \alpha \theta \iota \sigma \alpha \nu \tau \omega v)$ ). Genitive absolute again. Note $\sigma v v-$ (together), all had taken seats around the fire.

Peter sat in the midst of them ( $\varepsilon \kappa \alpha Ө \eta \tau$ о о Пєт $о \varsigma \mu \varepsilon \sigma о \varsigma \alpha \nu \tau \omega v$ ). Imperfect tense, he was sitting, and note $\mu \varepsilon \sigma \circ \varsigma$, nominative predicate adjective with the genitive, like Joh 1:26 , good Greek idiom.

Luke 22:56
In the light ( $\pi \rho \circ \varsigma \tau о \varphi \omega \varsigma$ ). Facing ( $\pi \rho \circ \varsigma$ ) the light, for the fire gave light as well as heat. Mr 14:65 has "warming himself in the light," John (Joh 18:18,25 ) "warming himself."

Looking steadfastly ( $\alpha \tau \varepsilon v / \sigma \alpha \sigma \alpha$ ). Favourite word in Luke ( 4:20, etc.) for gazing steadily at one.

This man also ( $\kappa \alpha$ ovtoc). As if pointing to Peter and talking about him. The other Gospels (Mr 14:67; Mt 26:69; Joh 18:25 ) make a direct address to Peter. Both could be true, as she turned to Peter.

Luke 22:57
I know him not (ovk ot $\delta \alpha$ avtov). Just as Jesus had predicted that he would do (Lu 22:34).

Luke 22:58
After a little while another ( $\mu \varepsilon \tau \alpha \beta \rho \alpha \chi v$ eтє $\rho \circ \varsigma$ ). Mt 26:71 makes it after Peter had gone out into the porch and mentions a maid as speaking as does Mr 14:69, while here the "other" ( $\varepsilon \tau \varepsilon \rho \circ \varsigma)$ is a man (masculine gender). It is almost impossible to co-ordinate the three denials in the four accounts unless we conceive of several joining in when one led off. This time Peter's denial is very blunt, "I am not."

Luke 22:59
After the space of about one hour ( $\delta ı \alpha \sigma \tau \alpha \sigma \eta \varsigma \omega \sigma \varepsilon \omega \rho \alpha \varsigma \mu \mu \varsigma)$. Genitive absolute with second aorist active participle feminine singular of $\delta u \sigma \tau \eta \mu$. This classical verb in the N.T. is used only by Luke (22:59; 24:51; Ac 27:28). It means standing in two or apart, about an hour intervening.

Confidently affirmed ( $\delta u \sigma \chi \cup \rho \iota \zeta \varepsilon \tau 0)$. Imperfect middle, he kept affirming strongly. An old verb ( $\delta \iota \alpha, \stackrel{\sigma \chi \cup \rho \iota \zeta}{\zeta} \mu \alpha$ ), to make oneself strong, to make emphatic declaration. In the N.T. only here and Ac 12:15 .

For he is a Galilean ( $\kappa \alpha \gamma \alpha \rho$ Г $\quad \lambda \iota \lambda \alpha \iota \varsigma \varsigma \varepsilon \sigma \tau \nu)$ ). Mt 26:73 makes it plain that it was his speech that gave him away, which see.

Luke 22:60
I know not what thou sayest (ouk oı $\delta \alpha$ o $\lambda \varepsilon \gamma \varepsilon ı$ ). Each denial tangles Peter more and more.

While he yet spake ( $\varepsilon \tau \lambda \alpha \lambda$ ouvtos $\alpha \cup \tau o u$ ). Genitive absolute. Peter could hear the crowing all right.

Luke 22:61
The Lord turned ( $\sigma \tau \rho \alpha \varphi \varepsilon \iota \varsigma$ о кирıюऽ). Second aorist passive participle of $\sigma \tau \rho \varepsilon \varphi \omega$, coming verb. Graphic picture drawn by Luke alone.

Looked upon Peter ( $\varepsilon v \varepsilon \beta \lambda \varepsilon \psi \varepsilon \nu \tau \omega \Pi \varepsilon \tau \rho \omega$ ). Ingressive aorist active indicative of $\varepsilon \nu \beta \lambda \varepsilon \pi \omega$, an old and vivid verb, to glance at.

Remembered ( $v \pi \varepsilon \mu \nu \eta \sigma \theta \eta$ ). First aorist passive indicative of $v \pi о \mu \mu \nu \eta \sigma \kappa \omega$, common verb to remind one of something (vло giving a suggestion or hint). The cock crowing and the look brought swiftly back to Peter's mind the prophecy of Jesus and his sad denials. The mystery is how he had forgotten that warning.

Luke 22:62
And he went out and wept bitterly ( $\kappa \alpha \varepsilon \xi \varepsilon \lambda \theta \omega v \varepsilon \xi \omega \varepsilon \kappa \lambda \alpha v \sigma \varepsilon v \pi \kappa \kappa \rho \omega \varsigma)$. A few old Latin documents omit this verse which is genuine in Mt 26:75. It may be an insertion here from there, but the evidence for the rejection is too slight. It is the ingressive aorist ( $\varepsilon \kappa \lambda \alpha v \sigma \varepsilon v$ ), he burst into tears. "Bitter" is a common expression for tears in all languages and in all hearts.

Luke 22:63
That held (o $\sigma v v \varepsilon \chi \circ v \tau \varepsilon$ ). See on 8:45; 19:43 for this verb $\sigma \cup v \varepsilon \chi \omega$. Here alone in the N.T. for holding a prisoner (holding together). The servants or soldiers, not the Sanhedrin.

Mocked (everaıఢov). Imperfect active, were mocking, inchoative, began to mock, to play like boys.

And beat him ( $\delta \varepsilon \rho o v \tau \varepsilon \varsigma)$. Present active participle of $\delta \varepsilon \rho \omega$, to flay, tan, or hide. Literally, "beating."

Luke 22:64
Blindfolded ( $\pi \varepsilon \rho\llcorner\kappa \alpha \lambda \cup \psi \alpha v \tau \varepsilon \varsigma)$. First aorist active participle of $\pi \varepsilon \rho \iota \kappa \alpha \lambda \cup \pi \tau \omega$, old verb, to put a veil around. In the N.T. only here and Mr 14:65. See Mr 14:65; Mt 26:67f. for further discussion.

Luke 22:65
Many other things ( $\varepsilon \tau \varepsilon \rho \alpha \pi 0 \lambda \lambda \alpha$ ). These are just samples.

Luke 22:66
As soon as it was day ( $\omega \varsigma \varepsilon \gamma \varepsilon \nu \varepsilon \tau \tau \eta \mu \varepsilon \rho \alpha$ ). Mr 15:1 (Mt 27:1) has "morning."
The assembly of the people ( $\tau 0 \pi \rho \varepsilon \sigma \beta v \tau \varepsilon \rho \circ v \tau o v \lambda \alpha o v$ ). The technical word for "the eldership" (from $\pi \rho \varepsilon \sigma \beta v \tau \varepsilon \rho \circ \varsigma$, an old man or elder) or group of the elders composing the Sanhedrin. The word occurs in the LXX for the Sanhedrin. In the N.T. occurs only here and Ac 22:5 of the Sanhedrin. In 1Ti 4:14 Paul uses it of the elders in a church (or churches). The Sanhedrin was composed of the elders and scribes and chief priests (Mr 15:1) and all three groups are at this meeting. Luke's language (both chief priests and scribes, $\tau \varepsilon \ldots \kappa \alpha$ ) seems to apply the word $\pi \rho \varepsilon \sigma \beta \nu \tau \varepsilon \rho \circ v$ to the whole Sanhedrin. Sadducees (chief priests) and Pharisees (scribes) were nearly equally represented.

Into their council ( $\varepsilon \iota \varsigma$ тo $\sigma v v \varepsilon \delta \rho \iota o v \alpha \nu \tau \omega v$ ). The place of the gathering is not given, but Jesus was led into the council chamber.

Luke 22:67
If thou art the Christ (E $\sigma v \varepsilon$ o Xpıбтoৎ). The Messiah, they mean. The condition is the first class, assuming it to be true.

If I tell you (Eav $v \mu \imath v \varepsilon \iota \pi \omega)$. Condition of the third class, undetermined, but with likelihood of being determined. This is the second appearance of Jesus before the Sanhedrin merely mentioned by $\mathrm{Mr} 15: 1$; Mt 27:1 who give in detail the first appearance and trial. Luke merely gives this so-called ratification meeting after daybreak to give the appearance of legality to their vote of condemnation already taken (Mr 14:64; Mt 26:66).

Ye will not believe ( $o v \mu \eta \pi \iota \sigma \tau \varepsilon v \sigma \eta \tau \varepsilon$ ). Double negative with the aorist subjunctive, strongest possible negative. So as to verse 68.

Luke 22:69
The Son of man (o vioc $\tau 0 v a v \theta \rho \omega \pi \sigma v$ ). Jesus really answers their demand about "the Messiah" by asserting that he is "the Son of man" and they so understand him. He makes claims of equality with God also which they take up.

Luke 22:70
Art thou the Son of God? ( $\Sigma v$ ovv $\varepsilon$ o vios $\tau 0 v \theta \varepsilon o v ;$ ). Note how these three epithets are used as practical equivalents. They ask about "the Messiah." Jesus affirms that he is the Son of Man and will sit at the right hand of the power of God. They take this to be a claim to be the Son of God (both humanity and deity). Jesus accepts the challenge and admits that he claims to be all three (Messiah, the Son of man, the Son of God).

Ye say (Hu $\mathrm{H} \varepsilon \varsigma \varsigma \varepsilon \gamma \varepsilon \tau \varepsilon$ ). Just a Greek idiom for "Yes" (compare "I am" in Mr 14:62 with "Thou has said" in Mt 26:64 ).

Luke 22:71
For we ourselves have heard ( $\alpha v \tau о \gamma \alpha \rho \eta \kappa о v \sigma \alpha \mu \varepsilon v$ ). They were right if Jesus is not what he claimed to be. They were eternally wrong for he is the Christ, the Son of man, the Son of God. They made their choice and must face Christ as Judge.

## Luke 23

Luke 23:1
The whole company ( $\alpha \pi \alpha \nu$ to $\pi \lambda \eta \theta$ oc). All but Nicodemus and Joseph of Arimathea who were probably not invited to this meeting.

Luke 23:2
Began to accuse ( $\eta \rho \xi \alpha v \tau 0 ~ \kappa \alpha \tau \eta \gamma o \rho \varepsilon เ v)$. They went at it and kept it up. Luke mentions three, but neither of them includes their real reason nor do they mention their own condemnation of Jesus. They had indulged their hatred in doing it, but they no longer have the power of life and death. Hence they say nothing to Pilate of that.

We found ( $\varepsilon v \rho a \mu \varepsilon v)$. Second aorist active indicative with first aorist vowel $\alpha$. Probably they mean that they had caught Jesus in the act of doing these things (in flagrante delicto) rather than discovery by formal trial.

Perverting our nation ( $\delta 1 \alpha \sigma \tau \rho \varepsilon \varphi o v \tau \alpha$ тo $\varepsilon \theta v o \varsigma ~ \eta \mu \omega v$ ). Present active participle of $\delta ı \alpha \sigma \tau \rho \varepsilon \varphi \omega$, old verb to turn this way and that, distort, disturb. In the N.T. only here and Ac 13:10. The Sanhedrin imply that the great popularity of Jesus was seditious.

Forbidding to give tribute to Caesar , ( $\kappa \omega \lambda \nu о \nu \tau \alpha$ 甲ороиц каıбар $\delta \iota \delta o v \alpha$ ). Note object infinitive $\delta \iota \delta o v a$ after the participle $\kappa \omega \lambda \nu o v \tau \alpha$. Literally, hindering giving tribute to Caesar. This was a flat untruth. Their bright young students had tried desperately to get Jesus to say this very thing, but they had failed utterly ( Lu 20:25).
 the indirect discourse here after the participle $\lambda \varepsilon \gamma 0 v \tau \alpha$ with the accusative (avtov where autov could have been used), and the infinitive. This charge is true, but not in the sense meant by them. Jesus did claim to be the Christ and the king of the kingdom of God. But the Sanhedrin wanted Pilate to think that he set himself up as a rival to Caesar. Pilate would understand little from the word "Christ," but "King" was a different matter. He was compelled to take notice of this charge else he himself would be accused to Caesar of winking at such a claim by Jesus.

Luke 23:3
Thou sayest ( $\sigma \nu \lambda \varepsilon \gamma \varepsilon \iota \varsigma)$. A real affirmative as in 22:70. The Gospels all give Pilate's question about Jesus asking of the Jews in precisely the same words (Mr 15:2; Mt 27:11; Lu 23:3; Joh 18:33 ).

Luke 23:4
The multitude ( $\tau 0 \cup \varsigma$ ox $\lambda$ ouc). The first mention of them. It is now after daybreak. The procession of the Sanhedrin would draw a crowd (Plummer) and some may have come to ask for the release of a prisoner ( $\mathrm{Mr} 15: 8$ ). There was need of haste if the condemnation went through before friends of Jesus came.

I find no fault (ouסgv $\varepsilon v \rho \iota \sigma \kappa \omega$ aıtiov). In the N.T. Luke alone uses this old adjective aıtioc ( $\operatorname{Lu}$ 23:4,14,22; Ac 19:40) except Heb. 5:9. It means one who is the author, the cause of or responsible for anything. Luke does not give the explanation of this sudden decision of Pilate that Jesus is innocent. Evidently he held a careful examination before he delivered his judgment on the case. That conversation is given in Joh 18:33-38. Pilate took Jesus inside the palace from the upper gallery (Joh 18:33) and then came out and rendered his decision to the Sanhedrin (Joh 18:38) who would not go into the palace of Pilate (Joh 18:28).

Luke 23:5
But they were the more urgent (o $\delta \varepsilon \varepsilon \pi \iota \sigma \chi \nu o v$ ). Imperfect active of $\varepsilon \pi / \sigma \chi \nu \omega$, to give added $(\varepsilon \pi)$ strength ( $\llcorner\sigma \chi \omega \omega)$. And they kept insisting. Evidently Pilate had taken the thing too lightly.

He stirred up the people (avaб\&є tov $\lambda \alpha o v$ ). This compound is rare, though old (Thucydides), to shake up (back and forth). This is a more vigorous repetition of the first charge (verse 2, "perverting our nation").

Beginning from Galilee ( $\left.\alpha \rho \xi \alpha \mu \varepsilon v o \varsigma \alpha \pi о ~ \tau \eta \varsigma ~ \Gamma \alpha \lambda_{\iota} \lambda \alpha ı \alpha \varsigma\right)$. These very words occur in the address of Peter to the group in the house of Cornelius (Ac 10:37). The idiomatic use of $\alpha \rho \xi \alpha \mu \varepsilon v o c$ appears also in Ac 1:22. Galilee (Grote) was the mother of seditious men (see Josephus).

Luke 23:6
A Galilean (Гa $1 \lambda \alpha \ldots \circ \varsigma)$. If so, here was a way out for Herod without going back on his own decision.

Luke 23:7
When he knew ( $\varepsilon \pi \imath \gamma v o u \varsigma)$. Second aorist active participle from $\varepsilon \pi \iota \gamma \iota v \omega \sigma \kappa \omega$, having gained full ( $\varepsilon \pi$, added knowledge).

Of Herod's jurisdiction ( $\varepsilon \kappa \tau \eta \varsigma \varepsilon \xi \circ 0 \sigma \iota \propto \varsigma ~ H \eta \rho \omega \iota \delta o v$ ). Herod was naturally jealous of any encroachment by Pilate, the Roman Procurator of Judea. So here was a chance to respect the prerogative ( $\varepsilon \xi \circ 0 \sigma 1 \alpha)$ of Herod and get rid of this troublesome case also.

Sent him up ( $\alpha v \varepsilon \pi \varepsilon \mu \psi \varepsilon v$ ). First aorist active indicative of $\alpha v \alpha \pi \varepsilon \mu \pi \omega$. This common verb is used of sending back as in verse 11 or of sending up to a higher court as of Paul to Caesar (Ac 25:21).

Who himself also was (ovta ка $\alpha \cup \tau о v$ ). Being also himself in Jerusalem. Present active participle of $\varepsilon \mu \mu$.

Luke 23:8
Was exceeding glad ( $\varepsilon \chi \alpha \rho \eta \lambda \iota \alpha v)$. Second aorist passive indicative of $\chi \alpha \iota \rho \omega$, ingressive aorist, became glad.

Of a long time ( $\varepsilon \xi$ เкаv $\omega v \chi \rho \circ v \omega v$ ). For this idiom see 8:27; 20:9; Ac 8:11).
He hoped ( $\eta \lambda \pi \iota \zeta \varepsilon v$ ). Imperfect active. He was still hoping. He had long ago gotten over his fright that Jesus was John the Baptist come to life again ( 9:7-9).

Done ( $\gamma / v o \mu \varepsilon v o v$ ). Present middle participle. He wanted to see a miracle happening like a stunt of a sleight-of-hand performer.

Luke 23:9
He questioned ( $\varepsilon \pi \eta \rho \omega \tau \alpha$ ). Imperfect active, kept on questioning.
In many words ( $\varepsilon v$ गоүоьц ıкаvoıৎ). Same use of ıкаvoc as in verse 8.
Luke 23:10
Stood (เซтŋкદוбav). Second perfect active intransitive of $\iota \sigma \tau \eta \mu$ with sense of imperfect. They stood by while Herod quizzed Jesus and when he refused to answer, they broke loose with their accusations like a pack of hounds with full voice ( $\varepsilon v \tau o v \omega \varsigma$, adverb from adjective $\varepsilon \cup \tau o v o \varsigma$, from $\varepsilon v$, well, and $\tau \varepsilon เ v \omega$, to stretch, well tuned). Old word, but in the N.T. only here and Ac 18:28.

Luke 23:11
Set him at nought ( $\varepsilon \xi \circ \cup \theta \varepsilon v \eta \sigma \alpha \varsigma)$. First aorist active participle from $\varepsilon \xi \sigma 0 \in \varepsilon v \varepsilon \omega$, to count as nothing, to treat with utter contempt, as zero.

Arraying him in gorgeous apparel ( $\pi \varepsilon \rho \iota \beta \alpha \lambda \omega v \varepsilon \sigma \theta \eta \tau \alpha \lambda \alpha \mu \pi \rho \alpha v)$. Second aorist active participle of $\pi \varepsilon \rho \curlywedge \beta \alpha \lambda \lambda \omega$, to fling around one. $\Lambda \alpha \mu \pi \rho \alpha v$ is brilliant, shining as in Jas 2:2, so different from the modest dress of the Master. This was part of the shame.

Luke 23:12
For before they were at enmity between themselves ( $\pi \rho \circ \cup \pi \eta \rho \chi \circ \vee \gamma \alpha \rho \varepsilon \nu \varepsilon \chi \theta \rho \alpha$ ov $\tau \varepsilon \varsigma$ $\pi \rho \circ \varsigma \varepsilon a v \tau o v \varsigma)$. A periphrastic imperfect of the double compound $\pi \rho \circ 0 \pi \varepsilon \rho \chi \omega$, an old verb, to exist ( $\cup \pi \alpha \rho \chi \omega$ ) previously ( $\pi \rho \circ-$ ), here alone in the N.T., with ovtec (participle of $\varepsilon \mu \mu$ ) added.

Luke 23:13
Called together ( $\sigma v v \kappa \alpha \lambda \varepsilon \sigma \alpha \mu \varepsilon v o \varsigma)$. First aorist middle participle (to himself). Pilate included "the people" in the hope that Jesus might have some friends among them.

Luke 23:14
As one that perverteth the people ( $\omega \varsigma \alpha \pi \sigma \sigma \tau \rho \varepsilon \varphi \rho \nu \tau \alpha$ тov $\lambda \alpha o v$ ). Pilate here condenses the three charges in verse 2 into one (Plummer). He uses a more common compound of $\sigma \tau \rho \varepsilon \varphi \omega$ here, $\alpha \pi \sigma \sigma \tau \rho \varepsilon \varphi \omega$, to turn away from, to seduce, to mislead, whereas $\delta \alpha \alpha \sigma \tau \rho \varepsilon \varphi \omega$ in verse 2 has more the notion of disturbing (turning this way and that). Note the use of $\omega \varsigma$ with the particle, the alleged reason. Pilate understands the charge against Jesus to be that he is a revolutionary agitator and a dangerous rival to Caesar, treason in plain words.

Having examined him before you ( $\varepsilon \nu \omega \pi \iota \rho \nu \nu \mu \omega \nu \alpha v \alpha \kappa \rho ı v a \varsigma)$. Right before your eyes I have given him a careful examination ( $\alpha v \alpha$ ) up and down, $\kappa \rho \iota v \omega$, to judge, sift. Old and common verb in the general sense and in the forensic sense as here and which Luke alone has in the N.T. (Lu 23:14; 4:9; 12:19; 28:18; Ac 24:8) except 1Co 9:3.

Whereof $(\omega v)$. Attraction of the relative $\alpha$ to the case (genitive) of the unexpressed antecedent tov $\omega v$.

Luke 23:15
No nor yet ( $\alpha \lambda \lambda^{\prime}$ ov $\delta \varepsilon$ ). But not even.
Hath been done by him ( $\varepsilon \sigma \tau \iota v \pi \varepsilon \pi \rho \alpha \gamma \mu \varepsilon v o v \alpha v \tau \omega)$. Periphrastic perfect passive indicative of $\pi \rho \alpha \sigma \sigma \omega$, common verb, to do. The case of $\alpha \nu \tau \omega$ can be regarded as either the dative or the instrumental (Robertson, Grammar, pp. 534,542).

Luke 23:16
Chastise ( $\pi \alpha \iota \delta \varepsilon v \sigma \alpha \varsigma)$. First aorist active participle of $\pi \alpha \iota \delta \varepsilon v \omega$, to train a child ( $\pi \alpha \iota \varsigma$ ), and then, as a part of the training, punishment. Our English word chasten is from the Latin castus, pure, chaste, and means to purify (cf. Heb 12:6f. ). Perhaps Pilate may have split a hair over the word as Wycliff puts it: "I shall deliver him amended." But, if Jesus was innocent, Pilate had no doubt to "chastise" him to satisfy a mob. Verse 17 is omitted by Westcott and Hort as from Mr 15:6; Mt 27:15 .

Luke 23:18
All together $(\pi \alpha v \pi \lambda \eta \theta \varepsilon)$. An adverb from the adjective $\pi \alpha v \pi \lambda \eta \theta \eta \varsigma$, all together. Used by Dio Cassius. Only here in the N.T.

Away ( $\alpha\llcorner\rho \varepsilon$ ). Present active imperative, Take him on away and keep him away as in Ac 21:36; 22:22, of Paul. But
release $(\alpha \pi \sigma \lambda \cup \sigma o v)$ is first aorist active imperative, do it now and at once.
Luke 23:19
Insurrection ( $\sigma \tau \alpha \sigma \iota v$ ). An old word for sedition, standing off, the very charge made against Jesus (and untrue). If Jesus had raised insurrection against Caesar, these accusers would have rallied to his standard.

And for murder ( $\kappa \alpha \varphi \circ \vee \circ v$ ). They cared nought for this. In fact, the murderer was counted a hero like bandits and gangsters today with some sentimentalists.

Was cast ( $\eta \vee \beta \lambda \eta \theta \varepsilon ı \varsigma)$. Periphrastic aorist passive indicative of $\beta \alpha \lambda \lambda \omega$, a quite unusual form.

Luke 23:21
But they shouted (o $\delta \varepsilon \varepsilon \pi \varepsilon \varphi \omega v o v v$ ). Imperfect active of $\varepsilon \pi \iota \varphi \omega v \varepsilon \omega$, to call to. Old verb and a verb pertinent here. They kept on yelling.

Crucify, crucify ( $\sigma \tau \alpha v \rho o v, \sigma \tau \alpha \cup \rho o v)$. Present active imperative. Go on with the crucifixion. $\operatorname{Mr}$ 15:13 has $\sigma \tau \alpha v \rho \omega \sigma o v$ (first aorist active imperative), do it now and be done with it. No doubt some shouted one form, some another.

Luke 23:22
Why, what evil? (Т $\gamma \alpha \rho \kappa \alpha \kappa о v ;$ ). Note this use of $\gamma \alpha \rho$ (explanatory and argumentative combined).

Luke 23:23
But they were instant (o $\delta \varepsilon \varepsilon \pi \varepsilon \kappa \varepsilon เ \nu \tau 0$ ). Imperfect middle of $\varepsilon \pi \kappa \kappa \varepsilon \mu \mu \alpha$, an old verb for the rush and swirl of a tempest.

With loud voices ( $\varphi \omega$ vaıs $\mu \varepsilon \gamma \alpha \lambda \alpha ı \varsigma)$. Instrumental case. Poor Pilate was overwhelmed by this tornado.

Prevailed (katıб $\quad$ vov). Imperfect active of $\kappa \alpha \tau \iota \sigma \chi v \omega$ (see Mt 16:18; Lu 21:36 ). The tempest Pilate had invited ( 23:13).

Luke 23:24
Gave sentence ( $\varepsilon \pi \varepsilon \kappa \rho / v \varepsilon v)$. Pronounced the final sentence. The usual verb for the final decision. Only here in the N.T.

Luke 23:25
Whom they asked for (ov $\mathfrak{\eta}$ וтоиvтo). Imperfect middle, for whom they had been asking for themselves. Luke repeats that Barabbas was in prison "for insurrection and murder."

To their will ( $\tau \omega \theta \varepsilon \lambda \eta \mu \alpha \tau \alpha \nu \tau \omega v$ ). This is mob law by the judge who surrenders his own power and justice to the clamour of the crowd.

Luke 23:26
They laid hold ( $\varepsilon \pi i \lambda \alpha \beta o \mu \varepsilon v o$ ). Second aorist middle participle of the common verb $\varepsilon \pi i \lambda \alpha \mu \beta \alpha v \omega$. The soldiers had no scruples about taking hold of any one of themselves (middle voice). Mr 15:21; Lu 27:32 use the technical word for this process $\alpha \gamma \gamma \alpha \rho \varepsilon v \omega$, which see for discussion and also about Cyrene.

Laid on him ( $\varepsilon \pi \varepsilon \theta \eta \kappa \alpha v$ ). K first aorist of $\varepsilon \pi \iota \tau \iota \theta \eta \mu$.
To bear it ( $\varphi \varepsilon \rho \varepsilon เ v$ ). Present infinitive, to go on bearing.
Luke 23:27
Followed ( $\eta \kappa 0 \lambda \mathrm{ov} \theta \varepsilon$ ). Imperfect active, was following. Verses 27-32 are peculiar to Luke.

Bewailed ( $\varepsilon \kappa о \pi \tau о v \tau о)$. Imperfect middle of $\kappa о \pi \tau \omega$, to cut, smite, old and common verb. Direct middle, they were smiting themselves on the breast. "In the Gospels there is no instance of a woman being hostile to Christ" (Plummer). Luke's Gospel is appropriately called the Gospel of Womanhood (1:39-56; 2:36-38; 7:11-15, 37-50; 8:1-3; 10:38-42; 11:27; 13:11-16 ).

Lamented ( $\varepsilon \theta \rho \eta v o v v)$. Imperfect active of $\theta \rho \eta v \varepsilon \omega$, old verb from $\theta \rho \varepsilon o \mu \alpha$, to cry aloud, lament.

Luke 23:28
Turning ( $\sigma \tau \rho \alpha \varphi \varepsilon ı \varsigma)$. Luke is fond of this second aorist passive participle of $\sigma \tau \rho \varepsilon \varphi \omega$ ( $7: 9,44,55 ; 10: 23$ ). If he had been still carrying the Cross, he could not have made this dramatic gesture.

Weep not ( $\mu \eta \kappa \lambda \alpha \_\varepsilon \tau \varepsilon$ ). Present active imperative with $\mu \eta$, Stop weeping.
Luke 23:29
Blessed ( $\mu \alpha \kappa \alpha \rho(\alpha)$. A beatitude to the barren, the opposite of the hopes of Jewish mothers. Childless women are commiserated (1:25,36).

To the hills (тoıs ßouvoı¢). A Cyrenaic word. In the N.T. only here and 3:5. Quotation from Ho 10:8.

Luke 23:31
In the green tree $(\varepsilon v v \gamma \rho \omega \xi v \lambda \omega)$. Green wood is hard to burn and so is used for the innocent.

In the dry ( $\varepsilon \nu \tau \omega \xi \eta \rho \omega$ ). Dry wood kindles easily and is a symbol for the guilty. This common proverb has various applications. Here the point is that if they can put Jesus to death, being who he is, what will happen to Jerusalem when its day of judgment comes?

What shall be done ( $\tau \gamma^{\varepsilon v \eta \tau \alpha) \text {. Deliberative subjunctive. }}$
Luke 23:32
Were led ( $\boxtimes$ gonto). Imperfect passive of $\alpha \gamma \hat{A} \omega$, were being led.
Malefactors (какоирүо). Evil (какоv), doers (work, $\varepsilon \rho \gamma \circ$ ). Old word, but in the N.T. only in this passage ( $32,33,39$ ) and 2Ti 2:9. Luke does not call them "robbers" like Mr 15:27; Mt 27:38,44.

To be put to death ( $\alpha v \alpha \iota \rho \varepsilon \theta \eta v \alpha$ ). First aorist passive infinitive of $\alpha v a \iota \rho \varepsilon \omega$, old verb, to take up, to take away, to kill.

Luke 23:33
The skull ( $\tau \mathrm{o}$ к $\rho \alpha \mathrm{v} เ \mathrm{ov}$ ). Probably because it looked like a skull. See on Mt 27:33; Mr 15:22.

There they crucified him ( $\varepsilon \kappa \varepsilon ~ \varepsilon \sigma \tau \alpha u \rho \omega \sigma \alpha v$ ). There between the two robbers and on the very cross on which Barabbas, the leader of the robber band, was to have been crucified.

One ( $o v \mu \varepsilon v$ ),
the other ( $o v \delta \varepsilon$ ). Common idiom of contrast with this old demonstrative oc and $\mu \varepsilon v$ and $\delta \varepsilon$.

Luke 23:34
Father forgive them (Пaтєр, $\alpha \varphi \varepsilon \varsigma \alpha \cup \tau \circ \iota \varsigma)$. Second aorist active imperative of $\alpha \varphi \iota \eta \mu$, with dative case. Some of the oldest and best documents do not contain this verse, and yet, while it is not certain that it is a part of Luke's Gospel, it is certain that Jesus spoke these words, for they are utterly unlike any one else. Jesus evidently is praying for the Roman soldiers, who were only obeying, but not for the Sanhedrin.

Cast lots ( $\varepsilon \beta \alpha \lambda$ ov $\kappa \lambda \eta \rho o v$ ). Second aorist active indicative of $\beta \alpha \lambda \lambda \omega$. See Mr 15:24; Mt 27:35. Joh 19:23f. shows how the lot was cast for the seamless garment, the four soldiers dividing the other garments.

Luke 23:35
The people stood beholding (เซтךкع). Past perfect active of $\iota \sigma \tau \eta \mu$, intransitive and like imperfect. A graphic picture of the dazed multitude, some of whom may have been in the Triumphal Entry on Sunday morning.

Scoffed ( $\varepsilon \xi \varepsilon \mu \nu \kappa \tau \eta \rho \iota(\zeta v)$ ). Imperfect active, perhaps inchoative, began to turn up (out, $\varepsilon \xi)$ at the dying Christ. The language comes from Ps 22:7 .

The Christ of God (o Xpıбтos tov $\theta$ rov). He had claimed to be just this (22:67,70 ). The sarcastic sneer (he saved others; let him save others, for himself he cannot save) is in Mr 15:31; Mt 27:42. Luke alone gives the contemptuous use of ovtoc (this fellow) and the fling in "the elect" (o єк $\lambda \varepsilon \kappa \tau о \varsigma) . ~ T h e s e ~ r u l e r s ~ w e r e ~ h a v i n g ~ t h e i r ~ d a y ~ a t ~ l a s t . ~$

Luke 23:36
Mocked ( $\varepsilon v \varepsilon \pi a \iota \xi a v$ ). Even the soldiers yielded to the spell and acted like boys in their jeers. Aorist tense here and different verb also from that used of the rulers. They were not so bitter and persistent.

Luke 23:37
If $(\varepsilon)$. Condition of the first class as is text in verse 35 used by the rulers. The soldiers pick out "the king of the Jews" as the point of their sneer, the point on which Jesus was condemned. But both soldiers and rulers fail to understand that Jesus could not save himself if he was to save others.

Luke 23:38
A superscription ( $\varepsilon \pi \tau \gamma \rho \alpha \varphi \eta$ ). Mr 15:26 has "the superscription of his accusation" Mt 27:37 , "his accusation," Joh 19:19 "a title." But they all refer to the charge written at the top on the cross giving, as was the custom, the accusation on which the criminal was condemned, with his name and residence. Put all the reports together and we have: This is Jesus of Nazareth the King of the Jews. This full title appeared in Latin for law, in Aramaic for the Jews, in Greek for everybody (Joh 19:20).

Luke 23:39
Railed ( $\varepsilon \beta \lambda \alpha \sigma \varphi \eta \mu \varepsilon$ ). Imperfect active, implying that he kept it up. His question formally calls for an affirmative answer (oux), but the ridicule is in his own answer: "Save thyself and us." It was on a level with an effort to break prison. Luke alone gives this incident ( 39-43), though Mr 15:32; Mt 27:44 allude to it.

Luke 23:40
Rebuking ( $\varepsilon \pi \iota \tau \mu \omega v$ ). From what Mark and Matthew say both robbers sneered at Jesus at first, but this one came to himself and turned on his fellow robber in a rage.

Dost thou not even fear God? ( $O v \delta \varepsilon \varphi o \beta \eta$ tov $\theta \varepsilon o v$;). Ov $\delta \varepsilon$ here goes with the verb. $\Phi \circ \beta \eta$ (second person singular present indicative middle of $\varphi \circ \beta \varepsilon \sigma \mu \alpha$. Both of you will soon appear before God. Jesus has nothing to answer for and you have added this to your other sins.

Luke 23:41
Nothing amiss (ovסev ato $\frac{\pi}{}$ ). Nothing out of place ( $\alpha$ privative, тотоऽ, place). Old word, three times in the N.T. (Lu 23:44; Ac 28:6; 2Th 3:2 ). This can only mean that this
robber accepts the claims of Jesus to be true．He is dying for claiming to be Messiah，as he is．

Luke 23：42
In thy kingdom（ $\varepsilon \varsigma \varsigma \tau \eta \nu \beta \alpha \sigma \lambda \lambda \varepsilon \iota \nu \sigma o v$ ，text of Westcott and Hort or $\varepsilon \nu \tau \varepsilon \beta \alpha \sigma \iota \lambda \varepsilon \propto$ $\sigma o v$, margin）．Probably no difference in sense is to be found，for $\varepsilon \varsigma \varsigma$ and $\varepsilon v$ are essentially the same preposition．He refers to the Messianic rule of Jesus and begs that Jesus will remem－ ber him．It is not clear whether he hopes for immediate blessing or only at the judgment．

Luke 23：43
Today shalt thou be with me in Paradise（ $\Sigma \eta \mu \varepsilon \rho \circ v \mu \varepsilon \tau^{\prime} \varepsilon \mu \circ v \varepsilon \sigma \eta \varepsilon v \tau \omega \pi \alpha \rho \alpha \delta \varepsilon \varepsilon \sigma \omega$ ）． However crude may have been the robber＇s Messianic ideas Jesus clears the path for him． He promises him immediate and conscious fellowship after death with Christ in Paradise which is a Persian word and is used here not for any supposed intermediate state；but the very bliss of heaven itself．This Persian word was used for an enclosed park or pleasure ground（so Xenophon）．The word occurs in two other passages in the N．T．（2Co 12：4；Re 2：7），in both of which the reference is plainly to heaven．Some Jews did use the word for the abode of the pious dead till the resurrection，interpreting＂Abraham＇s bosom＂（Lu 16：22f． ）in this sense also．But the evidence for such an intermediate state is too weak to warrant belief in it．

Luke 23：45
 participle of $\varepsilon \kappa \lambda \varepsilon \iota \pi \omega$ ，an old verb，to leave out，omit，pass by，to fail，to die．The word was used also of the eclipse of the sun or moon．But this was impossible at this time because the moon was full at the passover．Hence many documents change this correct text to＂the sun was darkened＂（ $\varepsilon \sigma \kappa \circ \tau \iota \sigma \theta \eta \circ \eta \lambda \iota \varsigma)$ to obviate the difficulty about the technical eclipse．But the sun can be darkened in other ways．In a London fog at noon the street lights are often turned on．The Revised Version translates it correctly，＂the sun＇s light failing．＂Leave the darkness unexplained．

In the midst（ $\mu$ عбо⿱亠乂口）．In the middle．Mr 15：38；Mt 27：51 have＂in two＂（ $\varepsilon \iota \varsigma \delta v o$ ）．
Luke 23：46
Father（Патєр）．Jesus dies with the words of Ps 31：5 on his lips．
Gave up the ghost（ $\varepsilon \xi \varepsilon \pi v \varepsilon v \sigma \varepsilon v)$ ．First aorist active indicative of $\varepsilon \kappa \pi v \varepsilon \omega$ ，to breathe out， to expire，old word，but in the N．T．only here and Mr 15：37，39．There is no special reason for retaining＂ghost＂in the English as both Mt 27：50（yielded up his spirit，$\alpha \varphi \eta \kappa \varepsilon v$ то $\pi v \varepsilon \cup \mu \alpha$ ） and Joh 19：30（gave up his spirit，$\pi \alpha \rho \varepsilon \delta \omega \kappa \varepsilon \nu$ тo $\pi \nu \varepsilon v \mu \alpha$ ）use $\pi \nu \varepsilon v \mu \alpha$ which is the root of $\varepsilon \kappa \pi v \varepsilon \omega$ ，the verb in Mark and Luke．

Luke 23：47
Glorified（ $\varepsilon \delta 0 \xi_{\alpha} \zeta \varepsilon v$ ）．Imperfect active．Began to glorify（inchoative）or kept on glorify－ ing．

Luke 23:48
Certainly (ov $\tau \omega \varsigma$ ). Really, old adverb from the participle ov from $\varepsilon \varepsilon \mu$, to be. Used also in 24:34 of the resurrection of Jesus.

A righteous man ( $\delta$ เкаıоৎ). Mr 15:39 (Mt 27:54) which see, represents the centurion as saying $\theta$ cou vioc (God's Son) which may mean to him little more than "righteous man."

That came together ( $\sigma v \nu \pi \alpha \rho \alpha \gamma \varepsilon \nu o \mu \varepsilon v o$ ). Double compound ( $\sigma v \nu$, together, $\pi \alpha \rho \alpha$, along), that came along together.

To this sight $(\varepsilon \pi \tau \eta \nu \theta \varepsilon \omega \rho ı \alpha \nu \tau \alpha v \tau \eta \nu)$. This spectacle $(\theta \varepsilon \omega \rho ı \alpha \nu$ from $\theta \varepsilon \omega \rho \varepsilon \omega$, verse 35).

Returned (v $v \varepsilon \sigma \tau \rho \varepsilon \varphi \circ v$ ). Imperfect active of $v \pi \sigma \sigma \tau \rho \varepsilon \varphi \omega$. See them slowly wending their way back to the city from this Tragedy of the Ages which they had witnessed in awe.

Luke 23:49
Stood afar off ( $\iota \tau \eta \kappa \varepsilon \iota \sigma \alpha v \alpha \pi о \mu \alpha \kappa \rho \circ \theta \varepsilon v$ ). Same verb as in verse 35. Melancholy picture of the inner circle of the acquaintances of Jesus and the faithful band of women from Galilee.

Seeing these things (o $\rho \omega \sigma \alpha \tau \alpha \cup \tau \alpha$ ). And helpless either to prevent them or to understand them. They could only stand and look with blinded eyes.

Luke 23:51
He had not consented to their counsel and deed (ov ǒ ovк $\eta v \sigma u v \kappa \alpha \tau \alpha \tau \varepsilon \theta \varepsilon \mu \varepsilon \nu \circ \varsigma$ $\tau \eta \beta o v \lambda \eta \kappa \alpha \tau \eta \pi \rho \alpha \xi \varepsilon \alpha v \tau \omega v)$. This parenthesis is given by Luke alone and explains that,
 It is fairly certain that both Joseph and Nicodemus were suspected of sympathy with Jesus and so were not invited to the trial of Jesus.

Was looking for ( $\pi \rho \circ \sigma \varepsilon \delta \varepsilon \chi \varepsilon \tau 0$ ). Imperfect middle. Mr 15:43 has the periphrastic imperfect ( $\eta \nu \pi \rho o \sigma \delta \varepsilon \chi \circ \mu \varepsilon \nu \circ \varsigma)$.

Luke 23:52
Asked for ( $\eta \iota \tau \eta \sigma \alpha \tau 0$ ). First aorist middle (indirect) indicative as in Mr 15:43; Mt 27:58 . The middle voice shows that Joseph of Arimathea asked the body of Jesus as a personal favour.

Luke 23:53
Took it down ( $\kappa \alpha \theta \varepsilon \lambda \omega v$ ). Second aorist active participle of $\kappa \alpha \theta \alpha \iota \rho \varepsilon \omega$ as in Mr 15:46.
Wrapped ( $\varepsilon v \varepsilon \tau \cup \lambda_{\imath} \xi \varepsilon v$ ), as in Mt 27:59 where Mr 15:46 has $\varepsilon v \varepsilon ı \lambda \eta \sigma \varepsilon v$ (wound), which see. Joh 19:40 has "bound" ( $\varepsilon \delta \eta \sigma a v$ ). See Matt. and Mark also for the linen cloth ( $\sigma \iota v \delta o v$ ).

Hewn in stone $(\lambda \alpha \xi \varepsilon v \tau \omega)$. From $\lambda \alpha \xi \varepsilon v \omega$ ( $\lambda \alpha \varsigma$, a stone, $\xi \varepsilon \omega$, to polish). In the LXX and here only in the N.T. Nowhere else so far as known. See the usual Greek verb $\lambda \alpha \tau o \mu \varepsilon \omega$ in Mr 15:46; Mt 27:60 .

Where never man had yet lain (ov ovк $\varepsilon v$ оט $\delta \varepsilon ı \varsigma ~ о ט \pi \omega ~ \kappa \varepsilon ı \mu \varepsilon \nu о \varsigma) . ~ T r i p l e ~ n e g a t i v e ~ a n d ~$ periphrastic past perfect passive in sense ( $\kappa \varepsilon \not \mu \alpha)$, though periphrastic imperfect passive in
form. Same item in Joh 19:40 who uses $\eta \nu \tau \varepsilon \theta \varepsilon \varepsilon \mu \varepsilon v o \varsigma$ (periphrastic past perfect passive in form).

Luke 23:54
The day of the Preparation ( $\eta \mu \varepsilon \rho \alpha \pi \alpha \rho \alpha \sigma \kappa \varepsilon \cup \eta \varsigma)$. The technical Jewish phrase for the day before the sabbath for which see discussion on Mt 27:62 .

Drew on ( $\varepsilon \pi \varepsilon \varphi \omega \sigma \kappa \varepsilon v)$. Imperfect active, began to dawn or give light. However, it was sundown, not sunrise when the Jewish sabbath (twenty-four-hour day) began. The confusion is to us, not to the Jews or the readers of the Greek New Testament. Luke is not speaking of the twelve-hour day which began with sunrise, but the twenty-four-hour day which began with sunset.

Luke 23:55
Had come with him ( $\eta \sigma \alpha v \sigma v v \varepsilon \lambda \eta \lambda \nu \theta v i \alpha)$. Periphrastic past perfect active of $\sigma \cup v \varepsilon \rho \chi \circ \mu \alpha$.
Followed after ( $\kappa \alpha \tau \alpha \kappa о \lambda о v \theta \eta \sigma \alpha \sigma \alpha$ ). Aorist active participle of катако入ou $\theta \varepsilon \omega$, an old verb, but in the N.T. only here and Ac 16:17. It is possible that they followed after Joseph and Nicodemus so that they "beheld the tomb," ( $\varepsilon \theta \varepsilon \alpha \sigma \alpha \nu$ то тo $\mu \nu \eta \mu \varepsilon \iota o v)$, and also "how his body was laid" ( $\omega \varsigma \varepsilon \tau \varepsilon \theta \eta$ тo $\sigma \omega \mu \alpha \alpha \cup \tau 0 v)$. First aorist passive indicative of $\tau \iota \theta \eta \mu$. They may in fact, have witnessed the silent burial from a distance. The Syriac Sinaitic and the Syriac Curetonian give it thus: "and the women, who came with Him from Galilee went to the sepulchre in their footsteps, and saw the body when they had brought it in there." At any rate the women saw "that" and "how" the body of Jesus was laid in this new tomb of Joseph in the rocks.

Luke 23:56
On the sabbath they rested ( $\tau 0 \sigma \alpha \beta \beta \alpha \tau o v \eta \sigma v \chi \alpha \sigma \alpha v$ ). They returned and prepared spices before the sabbath began. Then they rested all during the sabbath (accusative of extent of time, to $\sigma \alpha \beta \beta \alpha \tau o v)$.

## Luke 24

Luke 24:1
At early dawn (o $\rho \theta \rho o v \beta \alpha \theta \varepsilon o \varsigma)$. Genitive of time. Literally, at deep dawn. The adjective $\beta \alpha \theta v c$ (deep) was often used of time. This very idiom occurs in Aristophanes, Plato, et cetera. Joh 20:1 adds "while it was yet dark." That is, when they started, for the sun was risen when they arrived (Mr 16:2).

Which they had prepared ( $\alpha$ $\eta$ тон $\mu \sigma \sigma \alpha$ ). Mr 16:1 notes that they bought other spices after the sabbath was over besides those which they already had (Lu 23:56).

Luke 24:2
Rolled away ( $\alpha \pi о к \varepsilon к \nu \lambda \iota \sigma \mu \varepsilon v o v)$. Perfect passive participle of $\alpha \pi о к \nu \lambda \iota \omega$, late verb and in the N.T. only in this context (Mr 16:3; Mt 28:2) while Joh 20:1 has $\eta \rho \mu \varepsilon v_{0} v$ (taken away).

Luke 24:3
Of the Lord Jesus ( $\tau 0 \cup$ кupıov I $\eta \sigma o v$ ). The Western family of documents does not have these words and Westcott and Hort bracket them as Western non-interpolations. There are numerous instances of this shorter Western text in this chapter. For a discussion of the subject see my Introduction to the Textual Criticism of the New Testament, pp. 225-237. This precise combination (the Lord Jesus) is common in the Acts, but nowhere else in the Gospels.

Luke 24:4
While they were perplexed thereabout ( $\varepsilon v \tau \omega \alpha \pi о \rho \varepsilon เ \sigma \theta \alpha \alpha \cup \tau \alpha \varsigma \pi \varepsilon \rho$ тоט $\tau 0 v$ ). Luke's common Hebraistic idiom, $\varepsilon v$ with the articular infinitive (present passive $\alpha \pi \circ \rho \varepsilon เ \sigma \theta \alpha$ from $\alpha \pi о \rho \varepsilon \omega$, to lose one's way) and the accusative of general reference.

Two men ( $\alpha v \delta \rho \varepsilon \varsigma \delta v o$ ). Men, not women. Mr 16:5 speaks of a young man ( $v \varepsilon \alpha v \iota \sigma \kappa o v$ ) while Mt 28:5 has "an angel." We need not try to reconcile these varying accounts which agree in the main thing. The angel looked like a man and some remembered two. In verse 23 Cleopas and his companion call them "angels."

Stood by ( $\varepsilon \pi \varepsilon \sigma \tau \eta \sigma \alpha v)$. Second aorist active indicative of $\varepsilon \varphi / \sigma \tau \eta \mu$. This common verb usually means to step up suddenly, to burst upon one.

In dazzling apparel ( $\varepsilon v \varepsilon \sigma \theta \eta \tau \alpha \sigma \tau \rho \alpha \pi \tau o v \sigma \eta)$ ) This is the correct text. This common simplex verb occurs only twice in the N.T., here and Lu 17:24 (the Transfiguration). It has the same root as $\alpha \sigma \tau \rho a \pi \eta$ (lightning). The "men" had the garments of "angels."

Luke 24:5
As they were affrighted ( $\varepsilon \mu \varphi \rho \beta \omega v \gamma \varepsilon v o \mu \varepsilon \nu \omega v \alpha \nu \tau \omega v$ ). Genitive absolute with second aorist middle of $\gamma ı v o \mu \alpha$, to become. Hence,
when they became affrighted. They had utterly forgotten the prediction of Jesus that he would rise on the third day.

Luke 24:6

He is not here, but is risen (ovк $\varepsilon \sigma \tau \iota v \omega \delta \varepsilon, \alpha \lambda \lambda \alpha \eta \gamma \varepsilon \rho \theta \eta$ ). Another Western non-interpolation according to Westcott and Hort. The words are genuine at any rate in Mr 16:6; Mt 28:7.

The third day rise again ( $\tau \eta \tau \rho \iota \tau \eta \eta \mu \varepsilon \rho \alpha \alpha v \alpha \sigma \tau \eta v \alpha$ ). See 9:22; 18:32,33 where Jesus plainly foretold this fact. And yet they had forgotten it, for it ran counter to all their ideas and hopes.

Luke 24:9
From the tomb (ato $\tau 0 v \mu \nu \eta \mu \varepsilon \iota o v)$. Some documents omit these words. This word for tomb is like our "memorial" from $\mu \mu \nu \eta \sigma \kappa \omega$, to remind.

Told ( $\alpha \pi \eta \gamma \gamma \varepsilon \iota \lambda \alpha v$ ). It was a wonderful proclamation. Luke does not separate the story of Mary Magdalene from that of the other women as John does (Joh 20:2-18).

Luke 24:11
As idle talk ( $\omega \varsigma \lambda \eta \rho \circ \varsigma$ ). Old word for nonsense, only here in the N.T. Medical writers used it for the wild talk of those in delirium or hysteria.

Disbelieved ( $\boxtimes$ pistoun). Imperfect active of $\alpha \pi \iota \sigma \tau \varepsilon \omega$, old verb from $\alpha \pi \iota \sigma \tau \circ \varsigma$, without confidence or faith in. They kept on distrusting the story of the women.

Luke 24:12
This entire verse is a Western non-interpolation. This incident is given in complete form in Joh 18:2-10 and most of the words in this verse are there also. It is of a piece with many items in this chapter about which it is not easy to reach a final conclusion.

Stooping and looking in ( $\pi \alpha \rho \alpha \kappa v \psi \alpha \varsigma)$. First aorist active participle of $\pi \alpha \rho \alpha \kappa v \pi \tau \omega$, to stoop besides and peer into. Old verb used also in Joh 20:5,11; Jas 1:25; 1Pe 1:12 .

By themselves ( $\mu \mathrm{o} \nu \alpha$ ). Without the body.
To his home ( $\pi \rho \circ \varsigma \alpha \cup \tau o v)$. Literally, "to himself."
Luke 24:13
Were going ( $\eta \sigma \alpha v \pi о \rho \varepsilon v o \mu \varepsilon v o$ ). Periphrastic imperfect middle of $\pi о \rho \varepsilon v o \mu \alpha$.
Sixty stadia ( $\sigma \tau \alpha \delta$ ıovৎ $\varepsilon \xi \eta \kappa о \nu \tau \alpha$ ). About seven miles.
Luke 24:14
They communed ( $\omega \mu \mathrm{i} \lambda \mathrm{ov} \nu$ ). Imperfect active of o $\mu \mathrm{I} \lambda \varepsilon \omega$, old and common verb (from o $\mu \mathrm{\lambda} \lambda \mathrm{o}$, in company with). In the N.T. only here (and verse 15) and Ac 20:11; 24:26 . Our word homiletics is derived from this word for preaching was at first largely conversational in style and not declamatory.

Luke 24:15
While they communed and questioned together ( $\varepsilon v \tau \omega$ o $\mu \lambda \varepsilon \varepsilon \nu \alpha v \tau o v \varsigma \kappa \alpha \sigma v \nu \zeta \eta \tau \varepsilon \imath \nu$ ). Same idiom as in verse 14 , which see. Note $\sigma v \nu \zeta \eta \tau \varepsilon เ v$; each questioned the other.

Jesus himself ( $\alpha \cup \tau \circ \varsigma$ Iף $\sigma o v \varsigma$ ). In actual person.
Went with them ( $\sigma \cup v \varepsilon \pi о \rho \varepsilon v \varepsilon \tau о ~ \alpha \cup \tau о \iota) . ~ I m p e r f e c t ~ m i d d l e, ~ w a s ~ g o i n g ~ a l o n g ~ w i t h ~ t h e m . ~$
Luke 24:16

Were holden that they should not know him (єкратоиvто тоט $\mu \eta \varepsilon \pi \iota \gamma \nu \omega v \alpha \alpha \cup \tau о v)$. Imperfect passive of $\kappa \rho a \tau \varepsilon \omega$, continued being held, with the ablative case of the articular infinitive, "from recognizing him," from knowing him fully ( $\varepsilon \pi t-\gamma v \omega v a$, ingressive aorist of $\varepsilon \pi \iota \downarrow \iota \nu \omega \sigma \kappa 0)$. The $\mu \eta$ is a redundant negative after the negative idea in $\varepsilon \kappa \rho \alpha \tau о \nu \nu \tau 0$.

Luke 24:17
That you have with another (ovc $\alpha v \tau \iota \beta \alpha \lambda \lambda \varepsilon \tau \varepsilon \pi \rho \circ \varsigma \alpha \lambda \lambda \eta \lambda o v \varsigma)$ ). Av $\tau 1-\beta \alpha \lambda \lambda \omega$ is an old verb and means to throw in turn, back and forth like a ball, from one to another, a beautiful picture of conversation as a game of words. Only here in the N.T.

They stood still ( $\varepsilon \sigma \tau \alpha \theta \eta \sigma \alpha v)$. First aorist passive of $ו \sigma \tau \eta \mu$, intransitive. They stopped.
Looking sad ( $\sigma \kappa \cup \theta \rho \omega \pi$ ). This is the correct text. It is an old adjective from $\sigma \kappa \nu \theta \rho \circ \varsigma$, gloomy and o $\quad \varsigma$, countenance. Only here in the N.T.

Luke 24:18
Dost thou alone sojourn? ( $\sigma \nu \mu о v o \varsigma ~ \pi \alpha \rho о ו к \varepsilon \iota \sigma ;) . ~ M o v o \varsigma ~ i s ~ p r e d i c a t e ~ a d j e c t i v e . ~ " H a s t ~$ thou been dwelling alone (all by thyself)?"

And not know? ( $\kappa \alpha$ ovk $\varepsilon \gamma v \omega \sigma$;). Second aorist active indicative and difficult to put into English as the aorist often is. The verb лароккє $\omega$ means to dwell beside one, then as a stranger like тарокко (Eph 2:19). In Jerusalem everybody was talking about Jesus.

Luke 24:21
But we hoped ( $\eta \mu \varepsilon \iota \varsigma \delta \varepsilon \eta \lambda \pi \iota \zeta \circ \mu \varepsilon v$ ). Imperfect active, we were hoping. Note emphasis in $\eta \mu \varepsilon \iota \varsigma$ (we).

Redeem ( $\lambda v \tau \rho o v \sigma \theta \alpha)$. From the bondage of Rome, no doubt.
Yea and beside all this ( $\alpha \lambda \lambda \alpha \gamma \varepsilon \kappa \alpha \sigma \nu \nu \pi \alpha \sigma \iota \nu$ tov $\tau o \iota)$. Particles pile up to express their emotions.

Yea ( $\alpha \lambda \lambda \alpha$ here affirmative, as in verse 22, not adversative) at least ( $\gamma \varepsilon$ ) also ( $\kappa \alpha$ ) together with all these things ( $\sigma \cup v \pi \alpha \sigma \iota v \tau 0 \cup \tau o เ \varsigma) . ~ L i k e ~ P e l i o n ~ o n ~ O s s a ~ w i t h ~ t h e m ~ i n ~ t h e i r ~ p e r p l e x i t y . ~$

Now the third day ( $\tau \rho \iota \tau \eta \nu \tau \alpha \nu \tau \eta \nu \eta \mu \varepsilon \rho a v a \gamma \varepsilon$ ). A difficult idiom for the English. "One is keeping this a third day." And he is still dead and we are still without hope.

Luke 24:22
Amazed us ( $\varepsilon \xi \varepsilon \sigma \tau \eta \sigma \alpha v \eta \mu \alpha \varsigma)$. First aorist active (transitive) indicative with accusative $\eta \mu a \varsigma$ of $\varepsilon \xi l \sigma \tau \eta \mu$. The second aorist active is intransitive.

Early (op $\rho \rho \stackrel{v \alpha}{ }$ ). A poetic and late form for o $\rho \theta \rho \stackrel{c}{ }$. In the N.T. only here and Re 24:22 . Predicate adjective agreeing with the women.

Luke 24:23
Had seen ( $\varepsilon \omega \rho \alpha \kappa \varepsilon v \alpha)$. Perfect active infinitive in indirect assertion after $\lambda \varepsilon \gamma \circ 0 \sigma \alpha$. Same construction for $\zeta \eta ı \nu$ after $\lambda \varepsilon \gamma o v \sigma \iota v$. But all this was too indirect and uncertain (women and angels) for Cleopas and his companion.

Luke 24:25

Foolish men (avoŋтo). Literally without sense (vouc), not understanding. Common word.

Slow of heart ( $\beta \rho \alpha \delta \varepsilon \iota \varsigma \tau \eta \kappa \alpha \rho \delta ı \alpha)$. Slow in heart (locative case). Old word for one dull, slow to comprehend or to act.

All that ( $\pi \alpha \sigma v$ olc). Relative attracted from the accusative $\alpha$ to the case of the antecedent maбıv (dative). They could only understand part of the prophecies, not all.

Luke 24:26
Behooved it not? (oux $\varepsilon \delta \varepsilon i ;$ ). Was it not necessary? The very things about the death of Jesus that disturbed them so were the strongest proof that he was the Messiah of the Old Testament.

Luke 24:27
Interpreted ( $\delta i \eta \rho \mu \eta v \varepsilon v \sigma \varepsilon v)$. First aorist active (constative aorist) indicative of $\delta ı \varepsilon \rho \mu \eta \nu \varepsilon v \omega$ (Margin has the imperfect $\delta ı \eta \rho \mu \eta \nu \varepsilon v \varepsilon v$ ), intensive compound ( $\delta \iota \alpha$ ) of $\varepsilon \rho \mu \eta \nu \varepsilon v \omega$, the old verb to interpret from $\varepsilon \rho \mu \eta \nu \varepsilon \cup \varsigma$, interpreter, and that from Нгр $\mu \eta$, the messenger of the gods as the people of Lystra took Paul to be (Ac 14:12). But what wonderful exegesis the two disciples were now hearing!

Concerning himself ( $\pi \varepsilon \rho \varepsilon \alpha \cup \tau o v$ ). Jesus found himself in the Old Testament, a thing that some modern scholars do not seem able to do.

Luke 24:28
Made as though ( $\pi \rho о \sigma \varepsilon \pi о$ п $\eta \sigma \alpha \tau о$ ). First aorist active middle (Some MSS. have
 Only here in the N.T. Of course he would have gone on if the disciples had not urged him to stay.

Luke 24:29
Constrained ( $\pi \alpha \rho \varepsilon \beta ı \alpha \sigma \alpha \nu \tau о$ ). Strong verb $\pi \alpha \rho \alpha \beta \iota \alpha \zeta \rho \alpha$, to compel by use of force (Polybius and LXX). In the N.T. only here and Ac 16:15. It was here compulsion of courteous words.
 setting.

Luke 24:30
When he had sat down ( $\varepsilon v \tau \omega$ катак $\lambda_{1} \theta \eta v \alpha \alpha \nu \tau o v$ ). Luke's common idiom as in verses 4,15 . Note first aorist passive infinitive (on the reclining as to him).

Gave ( $\varepsilon \pi \varepsilon \delta \iota \delta o v)$. Imperfect, inchoative idea, began to give to them, in contrast with the preceding aorist (punctiliar) participles.

Luke 24:31
Were opened ( $\delta \iota \eta v o \circ \chi \theta \eta \sigma \alpha v$ ). Ingressive first aorist passive indicative of $\delta ı \alpha v o r \gamma \omega$.
Knew ( $\varepsilon \pi \varepsilon \gamma v \omega \sigma \alpha v$ ). Effective first aorist active indicative fully recognized him. Same word in verse 16.

Vanished (apavtoc $\varepsilon \nless \varepsilon v \varepsilon \tau 0)$. Became invisible or unmanifested. A $\alpha$ 人vtoc from a privative and $\varphi$ aıvo $\mu$, to appear. Old word, only here in the N.T.

Luke 24:32
Was not our heart burning? (Ovх $\eta \kappa \alpha \rho \delta \iota \alpha \mu \omega \nu$ каıо $\kappa \varepsilon \eta \eta \eta$;). Periphrastic imperfect middle.

Spake ( $\varepsilon \lambda \alpha \lambda \varepsilon$ ). Imperfect active, was speaking. This common verb $\lambda \alpha \lambda \varepsilon \omega$ is onomatopoetic, to utter a sound, $\lambda \alpha-\lambda \alpha$ and was used of birds, children chattering, and then for conversation, for preaching, for any public speech.

Opened ( $\delta ı \eta v o r \gamma \varepsilon v$ ). Imperfect active indicative of the same verb used of the eyes in verse 31 .

Luke 24:33
That very hour ( $\alpha v \tau \eta \tau \eta \omega \rho \alpha$ ). Locative case and common Lukan idiom, at the hour itself. They could not wait.

Gathered ( $\eta \theta$ рoı $\sigma \mu \varepsilon v o u \varsigma)$. Perfect passive participle of $\alpha \theta \rho o \iota \zeta \omega$, old verb from $\alpha \theta \rho o o \varsigma$ (copulative $\alpha$ and $\theta$ pooc, crowd). Only here in the N.T.

Luke 24:34
Saying ( $\lambda \varepsilon$ ₹ $0 v \tau \alpha \varsigma$ ). Accusative present active participle agreeing with "the eleven and those with them" in verse 33.

Indeed (ov $\tau \omega \varsigma)$. Really, because "he has appeared to Simon" ( $\omega \pi \theta \eta \Sigma \mu \mu \omega v$ ). First aorist passive indicative of opa $\omega$. This is the crucial evidence that turned the scales with the disciples and explains "indeed." Paul also mentions it (1Co 15:5).

Luke 24:35
Rehearsed ( $\varepsilon \xi \eta \gamma$ ouvto). Imperfect middle indicative of $\varepsilon \xi \eta \gamma \varepsilon o \mu \alpha$, verb to lead out, to rehearse. Our word exegesis comes from this verb. Their story was now confirmatory, not revolutionary. The women were right then after all.

Of them (autoıc). To them, dative case. They did not recognize Jesus in his exegesis, but did in the breaking of bread. One is reminded of that saying in the Logia of Jesus: "Raise the stone and there thou shalt find me, cleave the wood and there am I."

Luke 24:36
He himself stood (avtoc $\varepsilon \sigma \tau \eta$ ). He himself stepped and stood. Some documents do not have "Peace be unto you."

Luke 24:37
Terrified ( $\pi \tau 0 \eta \theta \varepsilon v \tau \varepsilon \varsigma)$. First aorist passive participle of $\pi \tau o \varepsilon \omega$, old verb and in the N.T. only here and Lu 21:9 which see.
 terms of fear are strong.

Supposed ( $\varepsilon \delta$ oкovv). Imperfect active of $\delta$ oк $\varepsilon \omega$, kept on thinking so.
Luke 24:38

Why are ye troubled? ( $\tau \tau \varepsilon \tau \alpha \rho \alpha \gamma \mu \varepsilon v o \varepsilon \sigma \tau \varepsilon ;$ ). Periphrastic perfect passive indicative of $\tau \alpha \rho \alpha \sigma \sigma \omega$, old verb, to agitate, to stir up, to get excited.

Luke 24:39
Myself (autoc). Jesus is patient with his proof. They were convinced before he came into the room, but that psychological shock had unnerved them all.

Handle ( $\psi \eta \lambda \alpha \varphi \eta \sigma \alpha \tau \varepsilon)$. This very word is used in 1Jo 1:1 as proof of the actual human body of Jesus. It is an old verb for touching with the hand.

Flesh and bones ( $\sigma \alpha \rho \kappa \alpha ~ к \alpha ~ о \sigma \tau \varepsilon \alpha) . ~ A t ~ l e a s t ~ t h i s ~ p r o v e s ~ t h a t ~ h e ~ i s ~ n o t ~ j u s t ~ a ~ g h o s t ~ a n d ~$ that Jesus had a real human body against the Docetic Gnostics who denied it. But clearly we are not to understand that our resurrection bodies will have "flesh and bones." Jesus was in a transition state and had not yet been glorified. The mystery remains unsolved, but it was proof to the disciples of the identity of the Risen Christ with Jesus of Nazareth.

Luke 24:40
Another Western non-interpolation according to Westcott and Hort. It is genuine in Joh 20:20 .

Luke 24:41
Disbelieved for joy ( $\alpha \pi\llcorner\sigma \tau 0 v \nu \tau \omega v \alpha \nu \tau \omega v \alpha \pi 0 \tau \eta \varsigma \chi \propto \rho \alpha \varsigma$ ). Genitive absolute and a quite understandable attitude. They were slowly reconvinced, but it was after all too good to be true.

Anything to eat $(\beta \rho \omega \sigma \mu \sigma v)$. Only here in the N.T., though an old word from $\beta \iota \beta \rho \omega \sigma \kappa \omega$, to eat.

Luke 24:42
A piece of broiled fish ( $\imath \chi \theta v o \varsigma ~ o \pi \tau о v \mu \varepsilon \rho \circ \varsigma)$. O $\pi \tau \circ \varsigma$ is a verbal from $\circ \pi \tau \alpha \omega$, to cook, to roast, to broil. Common word, but only here in the N.T. The best old documents omit "and a honeycomb" (ка ало $\mu \varepsilon \lambda \iota \sigma \sigma \iota о$ к крюои).

Luke 24:44
While I was yet with you ( $\varepsilon \tau \omega \nu \sigma \nu v \nu \mu \nu v$ ). Literally,
Being yet with you. The participle $\omega v$ takes the time of the principal verb.
Luke 24:45
Opened he their mind ( $\delta ı \eta v o!\xi \varepsilon v \alpha \nu \tau \omega v$ tov vouv). The same verb as that in verses 31,32 about the eyes and the Scriptures. Jesus had all these years been trying to open their minds that they might understand the Scriptures about the Messiah and now at last he makes one more effort in the light of the Cross and the Resurrection. They can now see better the will and way of God, but they will still need the power of the Holy Spirit before they will fully know the mind of Christ.

Luke 24:46
It is written $(\gamma \varepsilon \gamma \rho \alpha \pi \tau \alpha)$. Perfect passive indicative of $\gamma \rho \alpha \varphi \omega$, to write, the usual phrase for quoting Scripture. Jesus now finds in the Old Testament his suffering, his resurrection,
and the preaching of repentance and forgiveness of sins to all nations. Note the infinitives $\pi \alpha \theta \varepsilon ı v, \alpha v a \sigma \tau \eta v a ı, \kappa \eta \rho u \chi \theta \eta v \alpha$.

Luke 24:47
Beginning ( $\alpha \rho \xi \alpha \mu \varepsilon v o$ ). Aorist middle participle of $\alpha \rho \chi \omega$, but the nominative plural with no syntactical connection (an anacoluthon).

Luke 24:49
Until ye be clothed ( $\varepsilon \omega \varsigma$ ov $\varepsilon v \delta v \sigma \eta \sigma \theta \varepsilon$ ). First aorist middle subjunctive of $\varepsilon v \delta v \omega$ or $\varepsilon v \delta u v \omega$. It is an old verb for putting on a garment. It is here the indirect middle, put on yourselves power from on high as a garment. They are to wait till this experience comes to them. This is "the promise of the Father." It is an old metaphor in Homer, Aristophanes, Plutarch, and Paul uses it often.

Luke 24:50
Over against Bethany ( $\varepsilon \omega \varsigma \pi \rho \circ \varsigma B \eta \theta \alpha v ı \alpha v$ ). That is on Olivet. On this blessed spot near where he had delivered the great Eschatological Discourse he could see Bethany and Jerusalem.

Luke 24:51
He parted from them ( $\delta เ \varepsilon \sigma \tau \eta \alpha \pi^{\prime} \alpha \nu \tau \omega v$ ). Second aorist active (intransitive) indicative of $\delta u \sigma \tau \eta \mu$. He stood apart $(\delta \iota \alpha)$ and he was gone. Some manuscripts do not have the words "and was carried into heaven." But we know that Jesus was taken up into heaven on a cloud (Ac 1:9).

Luke 24:52
Worshipped him ( $\pi \rho \circ \sigma \kappa \cup v \eta \sigma a v \tau \varepsilon \varsigma \alpha \cup \tau o v)$. Here again we have one of Westcott and Hort's Western non-interpolations that may be genuine or not.

With great joy ( $\mu \varepsilon \tau \alpha \chi \alpha \rho \alpha \varsigma \mu \varepsilon \gamma \alpha \lambda \eta \varsigma)$. Now that the Ascension has come they are no longer in despair. Joy becomes the note of victory as it is today. No other note can win victories for Christ. The bells rang in heaven to greet the return of Jesus there, but he set the carillon of joy to ringing on earth in human hearts in all lands and for all time.

## THE FOURTH GOSPEL BY WAY OF INTRODUCTION

## GREATEST OF BOOKS

The test of time has given the palm to the Fourth Gospel over all the books of the world. If Luke's Gospel is the most beautiful, John's Gospel is supreme in its height and depth and reach of thought. The picture of Christ here given is the one that has captured the mind and heart of mankind. It is not possible for a believer in Jesus Christ as the Son of God to be indifferent to modern critical views concerning the authorship and historical value of this Holy of Holies of the New Testament. Here we find The Heart of Christ (E. H. Sears), especially in chapters Joh 14-17. If Jesus did not do or say these things, it is small consolation to be told that the book at least has symbolic and artistic value for the believer. The language of the Fourth Gospel has the clarity of a spring, but we are not able to sound the bottom of the depths. Lucidity and profundity challenge and charm us as we linger over it.

THE BELOVED DISCIPLE
The book claims to be written by "the disciple whom Jesus loved" (Joh 21:20) who is pointedly identified by a group of believers (apparently in Ephesus) as the writer: "This is the disciple which beareth witness of these things, and wrote these things: and we know that his witness is true" (Joh 21:24). This is the first criticism of the Fourth Gospel of which we have any record, made at the time when the book was first sent forth, made in a postscript to the epilogue or appendix. Possibly the book closed first with Joh 20:31, but chapter 21 is in precisely the same style and was probably added before publication by the author. The natural and obvious meaning of the language in Joh 21:24 is that the Beloved Disciple wrote the whole book. He is apparently still alive when this testimony to his authorship is given. There are scholars who interpret it to mean that the Beloved Disciple is responsible for the facts in the book and not the actual writer, but that is a manifest straining of the language. There is in this verse no provision made for a redactor as distinct from the witness as is plausibly set forth by Dr. A. E. Garvie in The Beloved Disciple (1922).

## A PERSONAL WITNESS

It is manifest all through the book that the writer is the witness who is making the contribution of his personal knowledge of the Lord Jesus Christ during his earthly ministry. In Joh 1:14 he plainly says that "the Word became flesh, and dwelt among us and we beheld his glory" ( $\varepsilon$ ह $\alpha \sigma \alpha \mu \varepsilon \theta \alpha \tau \eta v \delta o \xi \alpha v \alpha v \tau o v)$. He here associates others with him in this witness to the glory of the Word, but in Joh 21:25 he employs the singular "I suppose" (o $\mu \alpha$ ) in sharp dis- tinction from the plural "we know" (ot $\delta \alpha \mu \varepsilon v$ ) just before. The writer is present in nearly all the scenes described. The word witness ( $\mu \alpha \rho \tau \cup \rho \varepsilon \omega, \mu \alpha \rho \tau v \rho ı \alpha)$ so common in this Gospel (Joh 1:7,8,19; 3:11,26,33; 5:31; 12:17; 21:24 , etc.) illustrates well this point of view. In the Gospel of Luke we have the work of one who was not a personal witness of

Christ (Lu 1:1-4). In the Gospel of Matthew we possess either the whole work of a personal follower and apostle or at least the Logia of Matthew according to Papias preserved in it. In Mark's Gospel we have as the basis the preaching of Simon Peter as preserved by his interpreter John Mark. John's Gospel claims to be the personal witness of "the disciple whom Jesus loved" and as such deserves and has received exceptional esteem. One may note all through the book evidences of an eye-witness in the vivid details.

## WITH A HOME IN JERUSALEM

It is not only that the writer was a Jew who knew accurately places and events in Palestine, once denied though now universally admitted. The Beloved Disciple took the mother of Jesus "to his own home" ( $\varepsilon \iota \varsigma \tau \alpha \iota \delta \iota \alpha$, Joh 19:27) from the Cross when Jesus commended his mother to his care. But this Beloved Disciple had access to the palace of the high priest (Joh 18:15f. ). Delff (Das vierte Evangelium wiederhergestellt, 1890) argues that this fact shows that the Beloved Disciple was not one of the twelve apostles, one of a priestly family of wealth in Jerusalem. He does seem to have had special information concerning what took place in the Sanhedrin (Joh 7:45-52; 11:47-53; 12:10ff. ). But at once we are confronted with the difficulty of supposing one outside of the circle of the twelve on even more intimate terms with Jesus than the twelve themselves and who was even present at the last passover meal and reclined on the bosom of Jesus (Joh 13:23). Nor is this all, for he was one of the seven disciples by the Sea of Galilee (Joh 21:1ff. ) when Peter speaks to Jesus about the "Beloved Disciple" (Joh 21:20).

## ONLY ONE JOHN OF EPHESUS

It is true that an ambiguous statement of Papias (circa A.D. 120) is contained in Eusebius where the phrase "the Elder John " (о $\pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho \circ \varsigma \mathrm{I} \omega a v v \eta \varsigma)$ occurs. The most natural way to understand Papias is that he is referring to the Apostle John by this phrase as he describes the teachings of the apostles by "the words of the elders" just before. This interpretation of the allusion of Papias has been rendered almost certain by the work of Dom John Chapman, John the Presbyter and the Fourth Gospel (1911). Not before Eusebius is the error found of two Johns in Ephesus, one the apostle, the other the so-called Presbyter. "Papias is no witness for the admission of two Johns of Asia Minor. Irenaeus, too, in any case, knows of but one John of Asia Minor. And this John was an eye-witness of our Lord's Life" (Bousset, Die Offenbarumg des Joh., p. 38, translation of Nolloth, The Fourth Evangelist, p. 63, note). Let this be admitted and much becomes clear.

## NO EARLY MARTYRDOM FOR THE APOSTLE JOHN

In 1862 a fragment of the Chronicle of Georgius Hamartolus, a Byzantine monk of the ninth century, was published. It is the Codex Coislinianus, Paris, 305, which differs from the other manuscripts of this author in saying that John according to Papias was slain by the Jews (v $v o$ Iov $\delta a t \omega v a v \eta \iota \rho \varepsilon \theta \eta$ ) while the other manuscripts say that John rested in peace ( $\varepsilon v \varepsilon \rho \eta \nu \eta ~ \alpha v \varepsilon \pi \alpha v \sigma \alpha \tau o)$. The passage also quotes Eusebius to the effect that John received

Asia as his sphere of work and lived and died in Ephesus. This same George the Sinner misquotes Origen about the death of John for Origen really says that the Roman king condemned him to the Isle of Patmos, not to death. Another fragment of Philip of Side, apparently used by Georgius, makes the same erroneous reference to Papias. It is therefore a worthless legend growing out of the martyrdom promised James and John by Jesus (Mr 10:39; Mt 20:23 ) and realized by James first of all (Ac 12:1f. ). John drank the cup in the exile to Patmos. The correction to Peter in Joh 21:20-23 would have no meaning if the Apostle John had already been put to death.

## THE AUTHOR THE APOSTLE JOHN

Loisy (Le Quatr. Evangile, p. 132) says that if one takes literally what is given in the body of the Gospel of the Beloved Disciple he is bound to be one of the twelve. Loisy does not take it "literally." But why not? Are we to assume that the author of this greatest of books is playing a part or using a deliberate artifice to deceive? It may be asked why John does not use his own name instead of a nom de plume. Reference can be made to the Gospels of Matthew, Mark, and Luke, no one of which gives the author's name. One can see a reason for the turn here given since the book consists so largely of personal experiences of the author with Christ. He thus avoids the too frequent use of the personal pronoun and preserves the element of witness which marks the whole book. One by one the other twelve apostles disappear if we test their claims for the authorship. In the list of seven in chapter Joh 21 it is easy to drop the names of Simon Peter, Thomas, and Nathanael. There are left two unnamed disciples and the sons of Zebedee (here alone mentioned, not even named, in the book). John in this Gospel always means the Baptist. Why does the author so uniformly slight the sons of Zebedee if not one of them himself? In the Acts Luke does not mention his own name nor that of Titus his brother, though so many other friends of Paul are named. If the Beloved Disciple is John the Apostle, the silence about James and himself is easily understood. James is ruled out because of his early death (Ac 12:1). The evidence in the Gospel points directly to the Apostle John as the author.

EARLY AND CLEAR WITNESS TO THE APOSTLE JOHN
Ignatius (ad Philad. vii. 1) about A.D. 110 says of the Spirit that "he knows whence he comes and whither he is going," a clear allusion to Joh 3:8. Polycarp (ad Phil. S 7) quotes 1Jo 4:2,3. Eusebius states that Papias quoted First John. Irenaeus is quoted by Eusebius (H.E. V, 20) as saying that he used as a boy to hear Polycarp tell "of his intercourse with John and the others who had seen the Lord." Irenaeus accepted all our Four Gospels. Tatian made his Diatessaron out of the Four Gospels alone. Theophilus of Antioch (Ad Autol. ii. 22) calls John the author of the Fourth Gospel. This was about A.D. 180. The Muratorian Canon near the close of the second century names John as the author of the Fourth Gospel. Till after the time of Origen no opposition to the Johannine authorship appears outside of Marcion and the Alogi. No other New Testament book has stronger external evidence.

## THE USE OF THE SYNOPTIC GOSPELS

As the latest of the Gospels and by the oldest living apostle, it is only natural that there should be an infrequent use of the Synoptic Gospels. Outside of the events of Passion Week and the Resurrection period the Fourth Gospel touches the Synoptic narrative in only one incident, that of the Feeding of the Five Thousand and the walking on the water. The author supplements the Synoptic record in various ways. He mentions two passovers not given by the other Gospels (Joh 2:23; 6:4) and another (Joh 5:1) may be implied. Otherwise we could not know certainly that the ministry of Jesus was more than a year in length. He adds greatly to our knowledge of the first year of our Lord's public ministry ("the year of obscurity," Stalker) without which we should know little of this beginning (Joh 1:19-4:45 ). The Synoptics give mainly the Galilean and Perean and Judean ministry, but John adds a considerable Jerusalem ministry which is really demanded by allusions in the Synoptics. The Prologue (Joh 1:1-18) relates the Incarnation to God's eternal purpose as in Col 1:14-20 and Heb 1:1-3 and employs the language of the intellectuals of the time ( $\Lambda \circ \gamma \circ$ о -- Word) to interpret Christ as the Incarnate Son of God.

## A DIFFERENT STYLE OF TEACHING

So different is it in fact that some men bluntly assert that Jesus could not have spoken in the same fashion as presented in the Synoptics and in the Fourth Gospel. Such critics need to recall the Socrates of Xenophon's Memorabilia and of Plato's Dialogues. There is a difference beyond a doubt, but there is also some difference in the reports in the Synoptics. Jesus for the most part spoke in Aramaic, sometimes in Greek, as to the great crowds from around Palestine (the Sermon on the Mount, for instance). There is the Logia of Jesus (Q of criticism) preserved in the non-Markan portions of Matthew and Luke besides Mark, and the rest of Matthew and Luke. Certain natural individualities are preserved. The difference is greater in the Fourth Gospel, because John writes in the ripeness of age and in the richness of his long experience. He gives his reminiscences mellowed by long reflection and yet with rare dramatic power. The simplicity of the language leads many to think that they understand this Gospel when they fail to see the graphic pictures as in chapters Joh 7-11. The book fairly throbs with life. There is, no doubt, a Johannine style here, but curiously enough there exists in the Logia (Q) a genuine Johannine passage written long before the Fourth Gospel (Mt 11:25-30; Lu 10:21-24 ). The use of "the Father" and "the Son" is thoroughly Johannine. It is clear that Jesus used the Johannine type of teaching also. Perhaps critics do not make enough allowance for the versatility and variety in Jesus.

THE SAME STYLE IN THE DISCOURSES
It is further objected that there is no difference in style between the discourses of Jesus in John's Gospel and his own narrative style. There is an element of truth in this criticism. There are passages where it is not easy to tell where discourse ends and narrative begins. See, for instance, Joh 3:16-21 . Does the discourse of Jesus end with verse 15,16 , or 21 ? So
in Joh 12:44-50 . Does John give here a resume of Christ's teaching or a separate discourse? It is true also that John preserves in a vivid way the conversational style of Christ as in chapters $4,6,7,8,9$. In the Synoptic Gospels this element is not so striking, but we do not have to say that John has done as Shakespeare did with his characters. Each Gospel to a certain extent has the colouring of the author in reporting the words of Jesus. An element of this is inevitable unless men are mere automata, phonographs, or radios. But each Gospel preserves an accurate and vivid picture of Christ. We need all four pictures including that of John's Gospel for the whole view of Christ.

HISTORICAL VALUE OF THE FOURTH GOSPEL
It is just here that the chief attack is made on the Fourth Gospel even by some who admit the Johannine authorship. It is now assumed by some that the Fourth Gospel is not on a par with the Synoptics in historical reliability and some harmonies omit it entirely or place it separately at the close, though certainly Tatian used it with the Synoptics in his Diatessaron, the first harmony of the Gospels. Some even follow Schmiedel in seeing only a symbolic or parabolic character in the miracles in the Fourth Gospel, particularly in the narrative of the raising of Lazarus in chapter Joh 11 which occurs here alone. But John makes this miracle play quite an important part in the culmination of events at the end. Clearly the author professes to be giving actual data largely out of his own experience and knowledge. It is objected by some that the Fourth Gospel gives an unnatural picture of Christ with Messianic claims at the very start. But the Synoptics give that same claim at the baptism and temptation, not to mention Luke's account of the Boy Jesus in the temple. The picture of the Jews as hostile to Jesus is said to be overdrawn in the Fourth Gospel. The answer to that appears in the Sermon on the Mount, the Sabbath miracles, the efforts of the Pharisees and lawyers to catch Jesus in his talk, the final denunciation in Mt 23 , all in the Synoptics. The opposition to Jesus grew steadily as he revealed himself more clearly. Some of the difficulties raised are gratuitous as in the early cleansing of the temple as if it could not have happened twice, confounding the draught of fishes in chapter Joh 21 with that in Lu 5 , making Mary of Bethany at the feast of a Simon in chapter Joh 12 the same as the sinful woman at the feast of another Simon in Lu 7 , making John's Gospel locate the last passover meal a day ahead instead of at the regular time as the Synoptics have it. Rightly interpreted these difficulties disappear. In simple truth, if one takes the Fourth Gospel at its face value, the personal recollections of the aged John phrased in his own way to supplement the narratives in the Synoptics, there is little left to give serious trouble. The Jerusalem ministry with the feasts is a case in point. The narrative of the call of the first disciples in chapter Joh 1 is another. The author followed Simon in bringing also his own brother James to Jesus. John was present in the appearance of Christ before Annas, and Pilate. He was at the Cross when no other apostles were there. He took the mother of Jesus to his home and then returned to the Cross. He saw the piercing of the side of Jesus. He knew and saw the deed of Joseph of Arimathea
and Nicodemus. E. H. Askwith has a most helpful discussion of this whole problem in The Historical Value of the Fourth Gospel (1910).

## LIKE THE JOHANNINE EPISTLES

Critics of all classes agree that, whoever was the author of the Fourth Gospel, the same man wrote the First Epistle of John. There is the same inimitable style, the same vocabulary, the same theological outlook. Undoubtedly the same author wrote also Second and Third John, for, brief as they are, they exhibit the same characteristics. In Second and Third John the author describes himself as "the Elder" (o $\pi \rho \varepsilon \sigma \beta v \tau \varepsilon \rho \circ \varsigma)$, which fact has led some to argue for the mythical "Presbyter John" as the author in place of the Apostle John and so of First John and the Fourth Gospel. It is argued that the Apostle John would have termed himself "the Apostle John" after the fashion of Paul. But the example of the Apostle Peter disposes of that argument, for in addressing the elders (1Pe 5:1) he calls himself "your fellow-elder" (o $\sigma v v \pi \rho \varepsilon \sigma \beta v \tau \varepsilon \rho \circ \varsigma)$. In the Epistles John opposes Gnosticism both of the Docetic type which denied the actual humanity of Jesus as in 1Jo 1:1-4 and the Cerinthian type which denied the identity of the man Jesus and the aeon Christ which came on Jesus at his baptism and left him at his death on the Cross as in 1Jo 2:22. One of the many stories told about John is his abhorrence of Cerinthus when found in the same public bath with him. As Westcott shows, the Epistles of John prove his actual humanity while assuming his deity, whereas the Fourth Gospel proves his deity while assuming his humanity.

BUT DIFFERENT FROM THE APOCALYPSE
It should be said at once that the Johannine authorship of the Fourth Gospel does not depend on that of the Apocalypse. In fact, some men hold to the Johannine authorship of the Apocalypse who deny that of the Gospel while some hold directly the opposite view. Some deny the Johannine authorship of both Gospel and Apocalypse, while the majority hold to the Johannine authorship of Gospel, Epistles, and Apocalypse as was the general rule till after the time of Origen. The author of the Apocalypse claims to be John (Re 1:4,9; 22:8 ), though what John he does not say. Denial of the existence of a "Presbyter John" naturally leads one to think of the Apostle John. Origen says that John, the brother of James, was banished to the Isle of Patmos where he saw the Apocalypse. There is undoubted radical difference in language between the Apocalypse and the other Johannine books which will receive discussion when the Apocalypse is reached. Westcott explained these differences as due to the early date of the Apocalypse in the reign of Vespasian before John had become master of the Greek language. Even J. H. Moulton (Prolegomena, p. 9, note 4) says bluntly: "If its date was 95 A.D., the author cannot have written the fourth Gospel only a short time after." Or before, he would say. But the date of the Apocalypse seems definitely to belong to the reign of Domitian. So one ventures to call attention to the statement in Ac $4: 13$ where Peter and John are described as $\alpha \gamma \rho \alpha \mu \mu \alpha \tau о$ ка $\iota \delta \iota \omega \tau \alpha$ (unlettered and private or unschooled men). It is curious also that it is precisely in 2Peter and the Apocalypse that we have so many
grammatical solecisms and peculiarities. We know that the Fourth Gospel was reviewed by a group of John's friends in Ephesus, while he was apparently alone in the Isle of Patmos. The excitement of the visions would naturally increase the uncouth vernacular of the Apocalypse so much like that in the Greek papyri as seen in Milligan's Greek Papyri, for instance. This being true, one is able, in spite of Moulton's dictum, to hold to the Johannine authorship of both Gospel and Apocalypse and not far apart in date.

THE UNITY OF THE GOSPEL
This has been attacked in various ways in spite of the identity of style throughout. There are clearly three parts in the Gospel: the Prologue, Joh 1:1-18, the Body of the Book, Joh 1:19-20:31, the Epilogue, Joh 21 . But there is no evidence that the Prologue was added by another hand, even though the use of Logos (Word) for Christ does not occur thereafter. This high conception of Christ dominates the whole book. Some argue that the Epilogue was added by some one else than John, but here again there is no proof and no real reason for the supposition. It is possible, as already stated, that John stopped at Joh 20:31 and then added Joh 21 before sending the book forth after his friends added Joh 21:24 as their endorsement of the volume. Some scholars claim that they detect various displacements in the arrangement of the material, but such subjective criticism is never convincing. There are undoubtedly long gaps in the narrative as between chapters 5 and 6, but John is not giving a continuous narrative, but only a supplementary account assuming knowledge of the Synoptics. It is held that editorial comments by redactors can be detected here and there. Perhaps, and perhaps not. The unity of this great book stands even if that be true.

## ORIGINAL LANGUAGE OF THE BOOK

The late Dr. C. F. Burney of Oxford wrote a volume called, The Aramaic Origin of the Fourth Gospel (1922) in which he tried to prove that the Fourth Gospel is really the first in time and was originally written in Aramaic. The theory excited some interest, but did not convince either Aramaic or Greek scholars to an appreciable extent. Some of the examples cited are plausible and some quite fanciful. This theory cannot be appealed to in any serious interpretation of the Fourth Gospel. The author was beyond doubt a Jew, but he wrote in the Koine Greek of his time that is comparatively free from crude Semiticisms, perhaps due in part to the help of the friends in Ephesus.

THE PURPOSE OF THE BOOK
He tells us himself in Joh 20:30f. He has made a selection of the many signs wrought by Jesus for an obvious purpose: "But these are written, that ye may believe that Jesus is the Christ, the Son of God; and that believing ye may have life in his name." This is the high and noble purpose plainly stated by the author. The book is thus confessedly apologetic and this fact ruins it with the critics who demand a dull and dry chronicle of events without plan or purpose in a book of history. Such a book would not be read and would be of little value if written. Each of the Synoptics is written with a purpose and every history or biography
worth reading is written with a purpose. It is one thing to have a purpose in writing, but quite another to suppress or distort facts in order to create the impression that one wishes. This John did not do. He has given us his deliberate, mature, tested view of Jesus Christ as shown to him while alive and as proven since his resurrection. He writes to win others to like faith in Christ.

## JOHN'S PORTRAIT OF CHRIST

No one questions that the Fourth Gospel asserts the deity of Christ. It is in the Prologue at the very start: "And the Word was God" (Joh $1: 1$ ) and in the correct text of Joh $1: 18$, "God only begotten" ( $\theta \varepsilon \sigma \varsigma \mu \circ v o \gamma \varepsilon v \eta \varsigma)$. It occurs repeatedly in the book as in the witness of the Baptist: "This is the Son of God" (Joh 1:34). It is in the charge of the Pharisees (Joh 5:18 ) and the claim of Christ himself (Joh 5:20-23; $6: 48 ; 8: 12,58 ; 11: 25 ; 14: 9 ; 17: 5$ ) with the full and frank conviction of the author in Joh 20:31. He has made good his purpose. He has proven that Jesus of Nazareth is the Son of God. With some critics this purpose has vitiated the entire book. The effort has been made to show that Paul, Peter, the Epistle to the Hebrews, the Synoptics give a lower view of Christ without the term $\theta \varepsilon o \varsigma$ applied to him. In particular it was once argued that Q, the Logia of Jesus, used by Matthew and Luke (the non-Markan portions in both Matthew and Luke), gives a reduced picture of Jesus as on a lower plane than God, the Arian or Ritschlian view at any rate as answering for God to us though not God in actual nature. But in the Logia of Jesus we find the same essential picture of Jesus Christ as the Son of God and the Son of Man as I have shown in my The Christ of the Logia (1924). The only way to get rid of the deity of Christ in the New Testament is to throw overboard all the books in it as legendary or reflections of late theological development away from the original picture. The very earliest picture drawn of Christ that has been preserved to us, that in the Logia of Jesus (drawn W. M. Ramsay believes before Christ's crucifixion), is in essential agreement with the fully drawn portrait in the Fourth Gospel. Each picture in the Four Gospels adds touches of its own, but the features are the same, those of the GodMan Jesus Christ, the Saviour of the world. The brilliant blind preacher of Edinburgh, George Matheson, sees this clearly (Studies in the Portrait of the Messiah, 1900; St. John's Portrait of Christ, 1910).

## John 1

John 1:1
In the beginning ( $\varepsilon v \alpha \rho \chi \eta$ ). A $\rho \chi \eta$ is definite, though anarthrous like our at home, in town, and the similar Hebrew be reshith in Ge 1:1. But Westcott notes that here John carries our thoughts beyond the beginning of creation in time to eternity. There is no argument here to prove the existence of God any more than in Genesis. It is simply assumed. Either God exists and is the Creator of the universe as scientists like Eddington and Jeans assume or matter is eternal or it has come out of nothing.

Was ( $\eta v$ ). Three times in this sentence John uses this imperfect of $\varepsilon \mu$ to be which conveys no idea of origin for God or for the Logos, simply continuous existence. Quite a different verb ( $\varepsilon$ ₹ยveтo, became) appears in verse 14 for the beginning of the Incarnation of the Logos. See the distinction sharply drawn in 8:58 "before Abraham came ( $\gamma \varepsilon v \varepsilon \sigma \theta \alpha$ ) I $\mathrm{am}^{\prime \prime}(\varepsilon \mu$, timeless existence).

The Word (o $\lambda o \gamma o \varsigma) . ~ \Lambda o \gamma o \varsigma ~ i s ~ f r o m ~ \lambda \varepsilon \gamma \omega$, old word in Homer to lay by, to collect, to put words side by side, to speak, to express an opinion. $\Lambda$ oүo $\varsigma$ is common for reason as well as speech. Heraclitus used it for the principle which controls the universe. The Stoics employed it for the soul of the world ( $\alpha \nu \mu \alpha \mu \nu v \delta$ ) and Marcus Aurelius used $\sigma \pi \varepsilon \rho \mu \alpha \tau \iota \kappa о$,入o $\gamma$ os for the generative principle in nature. The Hebrew memra was used in the Targums for the manifestation of God like the Angel of Jehovah and the Wisdom of God in Pr 8:23 . Dr. J. Rendel Harris thinks that there was a lost wisdom book that combined phrases in Proverbs and in the Wisdom of Solomon which John used for his Prologue (The Origin of the Prologue to St. John, p. 43) which he has undertaken to reproduce. At any rate John's standpoint is that of the Old Testament and not that of the Stoics nor even of Philo who uses the term $\Lambda$ oүoc, but not John's conception of personal pre-existence. The term $\Lambda \frac{\gamma}{} \boldsymbol{\gamma}$ о is applied to Christ only in Joh 1:1,14; Re 19:13; 1Jo 1:1 "concerning the Word of life" (an incidental argument for identity of authorship). There is a possible personification of "the Word of God" in Heb 4:12. But the personal pre-existence of Christ is taught by Paul (2Co 8:9; Php 2:6f.; Col 1:17) and in Heb 1:2f. and in Joh 17:5. This term suits John's purpose better than бочıа (wisdom) and is his answer to the Gnostics who either denied the actual humanity of Christ (Docetic Gnostics) or who separated the arov Christ from the man Jesus (Cerinthian Gnostics). The pre-existent Logos "became flesh" ( $\sigma \alpha \rho \xi \varepsilon \gamma \varepsilon v \varepsilon \tau o$, verse 14) and by this phrase John answered both heresies at once.

With God ( $\pi \rho \circ \varsigma$ cov $\theta \varepsilon o v)$ ). Though existing eternally with God the Logos was in perfect fellowship with God. Прos with the accusative presents a plane of equality and intimacy, face to face with each other. In 1Jo 2:1 we have a like use of $\pi \rho o \mathrm{c}$ : "We have a Paraclete with the Father" ( $\pi \alpha \rho \alpha \kappa \lambda \eta \tau 0 v \varepsilon \chi \circ \mu \varepsilon v \pi \rho o \varsigma \tau o v \pi \alpha \tau \varepsilon \rho \alpha$ ). See $\pi \rho о \sigma \omega \pi о v \pi \rho \circ \varsigma \pi \rho o \sigma \omega \pi \sigma v$ (face to face, 1Co 13:12 ), a triple use of $\pi \rho o \varsigma$. There is a papyrus example of $\pi \rho o \varsigma$ in this sense $\tau$
$\gamma \nu \omega \sigma \tau 0 \nu \tau \eta \varsigma \pi \rho \circ \varsigma \alpha \lambda \lambda \eta \lambda$ ous $\sigma \cup v \eta \theta \varepsilon ı \alpha$, , "the knowledge of our intimacy with one another" (M.\&M., Vocabulary) which answers the claim of Rendel Harris, Origin of Prologue, p. 8) that the use of $\pi \rho o s$ here and in $\mathrm{Mr} 6: 3$ is a mere Aramaism. It is not a classic idiom, but this is Koine, not old Attic. In Joh 17:5 John has tapa oo the more common idiom.

And the Word was God ( $\kappa \alpha \varepsilon$ кос $\eta \nu$ о $\lambda о \gamma о \varsigma)$. By exact and careful language John denied Sabellianism by not saying o $\theta \varepsilon o \varsigma ~ \eta v$ o $\lambda о \gamma o \varsigma$. That would mean that all of God was expressed in o $\lambda$ oүoc and the terms would be interchangeable, each having the article. The subject is made plain by the article (o $\lambda о \gamma o \varsigma)$ and the predicate without it ( $\theta$ roc) just as in Joh 4:24 $\pi v \varepsilon \cup \mu \alpha$ o $\theta$ roc can only mean "God is spirit," not "spirit is God." So in 1Jo 4:16 o
 scientist would confusedly say. For the article with the predicate see Robertson, Grammar,
 Word." Luther argues that here John disposes of Arianism also because the Logos was eternally God, fellowship of Father and Son, what Origen called the Eternal Generation of the Son (each necessary to the other). Thus in the Trinity we see personal fellowship on an equality.

John 1:2
The same (outoc). "This one," the Logos of verse 1, repeated for clarity, characteristic of John's style. He links together into one phrase two of the ideas already stated separately, "in the beginning he was with God," "afterwards in time he came to be with man" (Marcus Dods). Thus John clearly states of the Logos Pre-existence before Incarnation, Personality, Deity.

John 1:3
All things ( $\pi \alpha \nu \tau \alpha$ ). The philosophical phrase was $\tau \alpha \pi \alpha \nu \tau \alpha$ (the all things) as we have it in 1Co 8:6; Ro 11:36; Col 1:16. In verse 10 John uses o кобноя (the orderly universe) for the whole.

Were made (egeneto). Second aorist middle indicative of $\gamma \iota v o \mu \alpha$, the constative aorist covering the creative activity looked at as one event in contrast with the continuous existence of $\eta v$ in verses 1,2 . All things "came into being." Creation is thus presented as a becoming ( $\gamma \imath v o \mu \alpha)$ in contrast with being ( $\varepsilon \mu$ ).

By him ( $\delta \delta^{\prime}$ avtov). By means of him as the intermediate agent in the work of creation. The Logos is John's explanation of the creation of the universe. The author of Hebrews (Heb 1:2) names God's Son as the one "through whom he made the ages." Paul pointedly asserts that "the all things were created in him" (Christ) and "the all things stand created through him and unto him" (Col 1:16). Hence it is not a peculiar doctrine that John here enunciates. In 1Co 8:6, Paul distinguishes between the Father as the primary source ( $\varepsilon \xi$ ov) of the all things and the Son as the intermediate agent as here ( $\delta \mathrm{t}^{\prime}$ ov).

Without him ( $\chi \omega \rho \iota \varsigma \alpha \tau \tau 0 v$ ). Old adverbial preposition with the ablative as in Php 2:14 , "apart from." John adds the negative statement for completion, another note of his style as in Joh 1:20; 1Jo 1:5. Thus John excludes two heresies (Bernard) that matter is eternal and that angels or aeons had a share in creation.

Not anything (ov $\delta \varepsilon \varepsilon v$ ). "Not even one thing." Bernard thinks the entire Prologue is a hymn and divides it into strophes. That is by no means certain. It is doubtful also whether the relative clause "that hath been made" (o $\gamma \varepsilon \gamma o v \varepsilon v$ ) is a part of this sentence or begins a new one as Westcott and Hort print it. The verb is second perfect active indicative of $\gamma เ v o \mu \alpha$. Westcott observes that the ancient scholars before Chrysostom all began a new sentence with o $\gamma \varepsilon \gamma o v \varepsilon v$. The early uncials had no punctuation.

John 1:4
In him was life ( $\varepsilon v \alpha v \tau \omega \zeta \omega \eta \eta \nu$ ). That which has come into being (verse 3) in the Logos was life. The power that creates and sustains life in the universe is the Logos. This is what Paul means by the perfect passive verb $\varepsilon \kappa \tau \iota \sigma \tau \alpha$ (stands created) in Col 1:16. This is also the claim of Jesus to Martha (Joh 11:25 ). This is the idea in Heb 1:3 "bearing (upholding) the all things by the word of his power." Once this language might have been termed unscientific, but not so now after the spiritual interpretation of the physical world by Eddington and Jeans. Usually in John $\zeta \omega \eta$ means spiritual life, but here the term is unlimited and includes all life; only it is not $\beta$ ıos (manner of life), but the very principle or essence of life. That is spiritual behind the physical and to this great scientists today agree. It is also personal intelligence and power. Some of the western documents have $\varepsilon \sigma \tau \iota \nu$ here instead of $\eta \nu$ to bring out clearly the timelessness of this phrase of the work of the $\Lambda$ оүос.

And the life was the light of men ( $\kappa \alpha \eta \zeta \omega \eta \eta \nu \tau$ о $\varphi \omega \varsigma \tau \omega \nu \alpha \nu \theta \rho \omega \pi \omega \nu$ ). Here the article with both $\zeta \omega \eta$ and $\varphi \omega \varsigma$ makes them interchangeable. "The light was the life of men" is also true. That statement is curiously like the view of some physicists who find in electricity (both light and power) the nearest equivalent to life in its ultimate physical form. Later Jesus will call himself the light of the world (Joh 8:12 ). John is fond of these words life and light in Gospel, Epistles, Revelation. He here combines them to picture his conception of the Preincarnate Logos in his relation to the race. He was and is the Life of men ( $\tau \omega \nu \alpha v \theta \rho \omega \pi \sigma \nu$, generic use of the article) and the Light of men. John asserts this relation of the Logos to the race of men in particular before the Incarnation.

John 1:5
Shineth ( $\varphi \alpha \vee v \varepsilon$ ). Linear present active indicative of $\varphi \alpha \downarrow v \omega$, old verb from $\varphi \alpha \omega$, to shine ( $\varphi \alpha \circ \sigma, \varphi \omega \varsigma)$. "The light keeps on giving light."

In the darkness ( $\varepsilon \vee \tau \eta \sigma \kappa \circ \tau \iota \alpha)$. Late word for the common $\sigma \kappa о \tau \circ \varsigma$ (kin to $\sigma \kappa \iota \alpha$, shadow). An evident allusion to the darkness brought on by sin. In 2Pe 2:17 we have o ऍочоৎ тov бкотоv (the blackness of darkness). The Logos, the only real moral light, keeps on shining both in the Pre-incarnate state and after the Incarnation. John is fond of бкотıа (бкотоৎ)
for moral darkness from $\sin$ and $\varphi \omega \varsigma(\varphi \omega \tau \iota \zeta \omega, \varphi \alpha ı \nu \omega)$ for the light that is in Christ alone. In 1 Jo 2:8 he proclaims that "the darkness is passing by and the true light is already shining." The Gnostics often employed these words and John takes them and puts them in the proper place.

Apprehended it not ( $\alpha \cup \tau о$ ov кат $\lambda \lambda \beta \varepsilon v$ ). Second aorist active indicative of $\kappa \alpha \tau \alpha \lambda \alpha \mu \beta \alpha v \omega$, old verb to lay hold of, to seize. This very phrase occurs in Joh 12:35 ( $\imath v \alpha \mu \eta$ бкоть $v \mu \alpha \varsigma \kappa \alpha \tau \alpha \lambda \alpha \beta \eta)$ "that darkness overtake you not," the metaphor of night following day and in 1Th 5:4 the same idiom (ıva кат $\alpha \lambda \beta \eta$ ) is used of day overtaking one as a thief. This is the view of Origen and appears also in 2Macc. 8:18. The same word appears in Aleph D in Joh 6:17 катє $\lambda \alpha \beta \varepsilon \delta \varepsilon$ avтоия $\eta$ бкотıа ("but darkness overtook them," came down on them). Hence, in spite of the Vulgate comprehenderunt, "overtook" or "overcame" seems to be the idea here. The light kept on shining in spite of the darkness that was worse than a London fog as the Old Testament and archaeological discoveries in Egypt, Assyria, Babylonia, Persia, Crete, Asia Minor show.

John 1:6
There came a man ( $\varepsilon \not \varepsilon v \varepsilon \tau \sigma \alpha v \theta \rho \omega \pi \sigma \varsigma)$. Definite event in the long darkness, same verb in verse 3 .

Sent ( $\alpha \pi \varepsilon \sigma \tau \alpha \lambda \mu \varepsilon v o \varsigma)$. Perfect passive participle of $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$, to send.
From God ( $\pi \alpha \rho \alpha$ $\theta \varepsilon o v$ ). From the side of ( $\pi \alpha \rho \alpha$ ) God (ablative case $\theta \varepsilon o v$ ).
Whose name (ovo $\alpha \alpha \alpha 0 \tau \omega$ ). "Name to him," nominative parenthetic and dative (Robertson, Grammar, p. 460).

John (I $\omega a v \eta \varsigma$ ). One $v$ in Westcott and Hort. In the giving of the name see Lu 1:59-63 , Hellenized form of Jonathan, Joanan (Gift of God), used always of the Baptist in this Gospel which never mentions the name of John son of Zebedee (the sons of Zebedee once, 21:2).

John 1:7
For witness ( $\varepsilon ı \varsigma \mu \alpha \rho \tau \cup \rho ı \alpha v$ ). Old word from $\mu \alpha \rho \tau \nu \rho \varepsilon \omega$ (from $\mu \alpha \rho \tau v \varsigma)$, both more common in John's writings than the rest of the N.T. This the purpose of the Baptist's ministry.

That he might bear witness (ıva $\mu \alpha \rho \tau v \rho \eta \sigma \eta$ ). Final clause with $ı v \alpha$ and aorist active subjunctive of $\mu \alpha \rho \tau \cup \rho \varepsilon \omega$ to make clearer $\varepsilon เ \varsigma \mu \alpha \rho \tau \cup \rho ı \alpha v$.

Of the light ( $\pi \varepsilon \rho$ tov $\varphi \omega \tau \circ \varsigma)$. "Concerning the light." The light was shining and men with blinded eyes were not seeing the light (Joh 1:26 ), blinded by the god of this world still (2Co 4:4). John had his own eyes opened so that he saw and told what he saw. That is the mission of every preacher of Christ. But he must first have his own eyes opened.

That all might believe (ıva $\pi \iota \sigma \tau \varepsilon v \sigma \omega \sigma เ v)$. Final clause with $t v \alpha$ and first aorist active subjunctive of $\pi \iota \sigma \tau \varepsilon v \omega$, ingressive aorist "come to believe." This is one of John's great words (about 100 times), "with nine times the frequency with which it is used by the Synoptists" (Bernard). And yet $\pi \iota \sigma \tau \iota \varsigma$, so common in Paul, John uses only in 1Jo 5:4 and four times in
the Apocalypse where $\pi \iota \sigma \tau \varepsilon v \omega$ does not occur at all. Here it is used absolutely as in Joh 1:50 , etc.

Through him ( $\delta \iota^{\prime}$ avtov). As the intermediate agent in winning men to believe in Christ (the Logos) as the Light and the Life of men. This is likewise the purpose of the author of this book ( $21: 31$ ). The preacher is merely the herald to point men to Christ.

John 1:8
He (عкعıvoc). "That one," i.e. John. He was a light (Joh 5:35) as all believers are (Mt 5:14 ), but not "the light" ( $\tau 0 \varphi \varsigma$ ).

But came ( $\alpha \lambda \lambda^{\prime}$ ). No verb in the Greek, to be supplied by repeating $\eta \lambda \theta \varepsilon v$ of verse 7 . See similar ellipses in 9:3; 13:18; 15:25. In Johannine fashion we have the final tva clause of verse 7 repeated.

John 1:9
There was ( $\eta v$ ). Imperfect indicative. Emphatic position at the beginning of the sentence and so probably not periphrastic conjugation with $\varepsilon \rho \chi \circ \mu \varepsilon v o v$ (coming) near the end, though that is possible.

The true light ( $\tau 0 \varphi \omega \varsigma$ тo $\alpha \lambda \eta \theta$ เvov). "The light the genuine," not a false light of wreckers of ships, but the dependable light that guides to the harbor of safety. This true light had been on hand all the time in the darkness ( $\eta v$ imperfect, linear action) before John came.

Even the light (not in the Greek). Added in the English to make plain this interpretation.
Lighteth every man ( $\varphi \omega \tau \iota \zeta \varepsilon \pi \alpha \nu \tau \alpha \alpha v \theta \rho \omega \pi o v$ ). Old verb (from $\varphi \omega \varsigma$ ) to give light as in $\operatorname{Re} 22: 5 ; \mathrm{Lu} 11: 35 \mathrm{f}$. The Quakers appeal to this phrase for their belief that to every man there is given an inner light that is a sufficient guide, the Quaker's text it is called. But it may only mean that all the real light that men receive comes from Christ, not necessarily that each one receives a special revelation.

Coming ( $\varepsilon \rho \chi \circ \mu \varepsilon v o v$ ). This present middle participle of $\varepsilon \rho \chi \circ \mu \alpha$ can be taken with $\alpha v \theta \rho \omega \pi$ ov just before (accusative masculine singular), "every man as he comes into the world." It can also be construed with $\varphi \omega \varsigma$ (nominative neuter singular). This idea occurs in Joh 3:19; 11:27; 12:46. In the two last passages the phrase is used of the Messiah which makes it probable here. But even so the light presented in 11:27; 12:46 is that of the Incarnate Messiah, not the Pre-incarnate Logos. Here коб $о$ о rather than $\pi \alpha \nu \tau \alpha$ occurs in the sense of the orderly universe as often in this Gospel. See Eph 1:4.

John 1:10
He was in the world ( $\varepsilon \nu \tau \omega \kappa \circ \sigma \mu \omega \eta \nu$ ). Imperfect tense of continuous existence in the universe before the Incarnation as in verses 1,2 .

Was made by him ( $\delta \iota^{\prime}$ avtov $\varepsilon$ ₹ยveto). "Through him." Same statement here of "the world" (o коб $\mu$ оя) as that made in verse 3 of $\pi \alpha \nu \tau \alpha$.

Knew him not (autov ouk $\varepsilon \gamma v \omega$ ). Second aorist active indicative of common verb $\gamma \iota v o \sigma \kappa \omega$, what Gildersleeve called a negative aorist, refused or failed to recognize him, his
world that he had created and that was held together by him (Col 1:16 ). Not only did the world fail to know the Pre-incarnate Logos, but it failed to recognize him when he became Incarnate (Joh 1:26 ). Two examples in this sentence of John's fondness for $\kappa \alpha$ as in verses $1,4,5,14$, the paratactic rather than the hypotactic construction, like the common Hebrew use of wav.

John 1:11
Unto his own ( $\varepsilon \iota \varsigma \tau \alpha \iota \delta \iota \alpha$ ). Neuter plural, "unto his own things," the very idiom used in 19:27 when the Beloved Disciple took the mother of Jesus "to his own home." The world was "the own home" of the Logos who had made it. See also 16:32; Ac 21:6.

They that were his own (o o $\delta ⿺ 0$ ). In the narrower sense, "his intimates," "his own family," "his own friends" as in 13:1. Jesus later said that a prophet is not without honour save in his own country (Mr 6:4; Joh 4:44) , and the town of Nazareth where he lived rejected him (Lu 4:28f.; Mt 13:58). Probably here o $1 \delta$ to means the Jewish people, the chosen people to whom Christ was sent first (Mt 15:24), but in a wider sense the whole world is included in o $\boldsymbol{\delta}\llcorner\mathrm{o}$. Conder's The Hebrew Tragedy emphasizes the pathos of the situation that the house of Israel refused to welcome the Messiah when he did come, like a larger and sadder Enoch Arden experience.

Received him not (autov ov $\pi \alpha \rho \varepsilon \lambda \alpha \beta o v)$. Second aorist active indicative of $\pi \alpha \rho \alpha \lambda \alpha \mu \beta \alpha v \omega$, old verb to take to one's side, common verb to welcome, the very verb used by Jesus in 14:3 of the welcome to his Father's house. Cf. кatع $\alpha \beta \beta v$ in verse 5 . Israel slew the Heir (Heb 1:2) when he came, like the wicked husbandmen (Lu 20:14).

John 1:12
As many as received him (oбo $\varepsilon \lambda \alpha \beta o v \alpha u \tau o v$ ). Effective aorist active indicative of $\lambda \alpha \mu \beta \alpha v \omega$ "as many as did receive him," in contrast with o $\iota \delta \iota \circ$ just before, exceptional action on the part of the disciples and other believers.

To them (avtos). Dative case explanatory of the relative clause preceding, an anacoluthon common in John 27 times as against 21 in the Synoptists. This is a common Aramaic idiom and is urged by Burney (Aramaic Origin, etc., p. 64) for his theory of an Aramaic original of the Fourth Gospel.

The right ( $\varepsilon \xi$ ovalav). In 5:27 $\varepsilon \delta \omega \kappa \varepsilon v$ (first aorist active indicative of $\delta \iota \delta \omega \mu$ ) $\varepsilon \xi$ оuđıav means authority but includes power ( $\delta v v a \mu \iota \varsigma)$. Here it is more the notion of privilege or right.

To become ( $\gamma \varepsilon v \varepsilon \sigma \theta \alpha$ ). Second aorist middle of $\gamma \iota v o \mu \alpha$, to become what they were not before.

Children of God ( $\tau \varepsilon \kappa v a \operatorname{\theta \varepsilon ov}$ ). In the full spiritual sense, not as mere offspring of God true of all men (Ac 17:28). Paul's phrase vio $\theta$ zov (Gal 3:26) for believers, used also by Jesus of the pure in heart (Mt 5:9 ), does not occur in John's Gospel (but in Re 21:7). It is possible that John prefers $\tau \alpha \tau \varepsilon \kappa v \alpha$ тov $\theta$ हov for the spiritual children of God whether Jew or Gentile
(Joh 11:52 ) because of the community of nature ( $\tau \varepsilon \kappa v o v$ from root $\tau \varepsilon \kappa$-, to beget). But one cannot follow Westcott in insisting on "adoption" as Paul's reason for the use of vio since Jesus uses vio $\theta \varepsilon$ ov in Mt 5:9. Clearly the idea of regeneration is involved here as in Joh 3:3

Even to them that believe ( $\tau o \iota \varsigma \pi \iota \sigma \tau \varepsilon v o v \sigma ı v)$. No "even" in the Greek, merely explanatory apposition with autoı, dative case of the articular present active participle of $\pi\llcorner\sigma \tau \varepsilon \cup \omega$.
 in or on. See also 2:23; 3:38 for $\pi \iota \sigma \tau \varepsilon v \omega$ عıৎ to ovoนa avtov. This common use of ovo $\mu \alpha$ for the person is an Aramaism, but it occurs also in the vernacular papyri and عוৎ to ovo $\alpha \alpha$ is particularly common in the payment of debts (Moulton and Milligan's Vocabulary). See Ac 1:15 for ovouata for persons.

John 1:13
Which were born (o $\varepsilon \gamma \varepsilon v \nu \eta \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\gamma \varepsilon v v \alpha \omega$, to beget, "who were begotten." By spiritual generation (of God, $\varepsilon \kappa \theta \varepsilon o v)$, not by physical ( $\varepsilon \xi \alpha \mu \alpha \tau \omega v$, plural as common in classics and O.T., though why it is not clear unless blood of both father and mother; єк $\theta \varepsilon \lambda \eta \mu \alpha \tau о \varsigma ~ \sigma \alpha \rho к о \varsigma, ~ f r o m ~ s e x u a l ~ d e s i r e ; ~ \varepsilon к ~ \theta \varepsilon \lambda \eta \mu \alpha \tau о \varsigma ~ \alpha v \delta \rho o \varsigma, ~ f r o m ~$ the will of the male). But $b$ of the old Latin reads qui natus est and makes it refer to Christ and so expressly teach the Virgin Birth of Jesus. Likewise Irenaeus reads qui natus est as does Tertullian who argues that qui nati sunt (o $\varepsilon \gamma \varepsilon v v \eta \theta \eta \sigma \alpha v$ ) is an invention of the Valentinian Gnostics. Blass (Philology of the Gospels, p. 234) opposes this reading, but all the old Greek uncials read o $\varepsilon \gamma \varepsilon v v \eta \theta \eta \sigma \alpha v$ and it must be accepted. The Virgin Birth is doubtless implied in verse 14 , but it is not stated in verse 13 .

John 1:14
And the Word became flesh ( $\kappa \alpha$ о $\lambda о \gamma о \varsigma ~ \sigma \alpha \rho \xi \varepsilon \gamma \varepsilon v \varepsilon \tau о$ ). See verse 3 for this verb and note its use for the historic event of the Incarnation rather than $\eta v$ of verse 1 . Note also the absence of the article with the predicate substantive $\sigma \alpha \rho \xi$, so that it cannot mean "the flesh became the Word." The Pre-existence of the Logos has already been plainly stated and argued. John does not here say that the Logos entered into a man or dwelt in a man or filled a man. One is at liberty to see an allusion to the birth narratives in Mt 1:16-25; Lu 1:28-38, if he wishes, since John clearly had the Synoptics before him and chiefly supplemented them in his narrative. In fact, one is also at liberty to ask what intelligent meaning can one give to John's language here apart from the Virgin Birth? What ordinary mother or father ever speaks of a child "becoming flesh"? For the Incarnation see also 2Co 8:9; Ga 4:4; Ro 1:3; 8:3; Php 2:7f.; 1Ti 3:16; Heb 2:14. "To explain the exact significance of $\varepsilon \gamma \varepsilon v \varepsilon \tau o ~ i n ~ t h i s ~ s e n t e n c e ~$ is beyond the powers of any interpreter" (Bernard). Unless, indeed, as seems plain, John is referring to the Virgin Birth as recorded in Matthew and Luke. "The Logos of philosophy is, John declares, the Jesus of history" (Bernard). Thus John asserts the deity and the real humanity of Christ. He answers the Docetic Gnostics who denied his humanity.

Dwelt among us ( $\varepsilon \sigma \kappa \eta \nu \omega \sigma \varepsilon v \varepsilon v \eta \mu \nu)$. First aorist ingressive aorist active indicative of $\sigma \kappa \eta v o \omega$, old verb, to pitch one's tent or tabernacle ( $\sigma \kappa \eta v o \varsigma$ or $\sigma \kappa \eta \nu \eta$ ), in N.T. only here and Re 7-15; 12:12; 13:6; 21:3. In Revelation it is used of God tabernacling with men and here of the Logos tabernacling, God's Shekinah glory here among us in the person of his Son.

We beheld his glory ( $\varepsilon \theta \varepsilon \alpha \sigma \alpha \mu \varepsilon \theta \alpha \tau \eta v \delta o \xi \alpha v \alpha v \tau o v)$. First aorist middle indicative of $\theta \varepsilon \alpha o \mu \alpha$ (from $\theta \varepsilon \alpha$, spectacle). The personal experience of John and of others who did recognize Jesus as the Shekinah glory ( $\delta 0 \xi \alpha$ ) of God as James, the brother of Jesus, so describes him (Jas 2:1 ). John employs $\theta \varepsilon \alpha o \mu \alpha$ again in 1:32 (the Baptist beholding the Spirit coming down as a dove) and 1:38 of the Baptist gazing in rapture at Jesus. So also 4:35; 11:45; 1Jo 1:1f.; 4:12,14 . By this word John insists that in the human Jesus he beheld the Shekinah glory of God who was and is the Logos who existed before with God. By this plural John speaks for himself and all those who saw in Jesus what he did.

As of the only begotten from the Father ( $\omega \varsigma \mu$ оvoүعvouc $\pi \alpha \rho \alpha \pi \alpha \tau \rho о \varsigma)$. Strictly, "as of an only born from a father," since there is no article with $\mu$ оvopevouc or with $\pi \alpha \tau \rho o \varsigma$. In Joh 3:16; 1Jo 4:9 we have $\operatorname{tov} \mu$ ovoүعv $\begin{aligned} \text { referring to Christ. This is the first use in the Gospel }\end{aligned}$ of $\pi \alpha \tau \eta \rho$ of God in relation to the Logos. Movoүعvŋऽ (only born rather than only begotten) here refers to the eternal relationship of the Logos (as in 1:18) rather than to the Incarnation. It distinguishes thus between the Logos and the believers as children ( $\tau \varepsilon \kappa v \alpha$ ) of God. The word is used of human relationships as in $\operatorname{Lu} 7: 12 ; 8: 42$; 9:38. It occurs also in the LXX and Heb 11:17, but elsewhere in N.T. only in John's writings. It is an old word in Greek literature. It is not clear whether the words $\pi \alpha \rho \alpha \pi \alpha \tau \rho \circ \varsigma$ (from the Father) are to be connected with $\mu$ ovoүعvous (cf. 6:46; 7:29, etc.) or with $\delta o \xi \alpha v$ (cf. 5:41,44 ). John clearly means to say that "the manifested glory of the Word was as it were the glory of the Eternal Father shared with His only Son" (Bernard). Cf. 8:54; 14:9; 17:5 .

Full ( $\pi \lambda \eta \rho \eta \varsigma$ ). Probably indeclinable accusative adjective agreeing with $\delta 0 \xi \alpha v$ (or genitive with $\mu$ ovoүعvous) of which we have papyri examples (Robertson, Grammar, p. 275). As nominative $\pi \lambda \eta \rho \eta \varsigma$ can agree with the subject of $\varepsilon \sigma \kappa \eta \nu \omega \sigma \varepsilon v$.

Of grace and truth ( $\chi \alpha \rho \iota \tau о \varsigma \kappa \alpha \alpha \lambda \eta \theta \varepsilon ı \alpha \varsigma)$. Curiously this great word $\chi \alpha \rho ı \varsigma$ (grace), so common with Paul, does not occur in John's Gospel save in 1:14,16,17, though $\alpha \lambda \eta \theta \varepsilon ı \alpha$ (truth) is one of the keywords in the Fourth Gospel and in 1John, occurring 25 times in the Gospel and 20 in the Johannine Epistles, 7 times in the Synoptics and not at all in Revelation (Bernard). In 1:17 these two words picture the Gospel in Christ in contrast with the law of Moses. See Epistles of Paul for origin and use of both words.

John 1:15
Beareth witness ( $\mu \alpha \rho \tau v \rho \varepsilon$ ). Historical (dramatic) present indicative of this characteristic word in John (cf. 1:17f. ). See 1:32,34 for historical examples of John's witness to Christ. This sentence is a parenthesis in Westcott and Hort's text, though the Revised Version makes
a parenthesis of most of verse 14. The witness of John is adduced in proof of the glory full of grace and truth already claimed for the Incarnate Logos.

Crieth (кєкраүєv). Second perfect active indicative of $\kappa \rho \alpha \zeta \omega$, old verb for loud crying, repeated in dramatic form again for emphasis recalling the wonderful Voice in the wilderness which the Beloved Disciple can still hear echoing through the years.

This was (ovtoc $\eta v$ ). Imperfect indicative where John throws the tense back in past time when he looked forward to the coming of the Messiah as in Ac 3:10 where we should prefer "is" (عбтıv). Gildersleeve (Syntax, p. 96) calls this the "imperfect of sudden appreciation of the real state of things."

Of whom I said (ov $\varepsilon ⿺ 𠃊 \pi \sim v$ ). But B C and a corrector of Aleph (Westcott and Hort) have o $\varepsilon ו \pi \omega v$ "the one who said," a parenthetical explanation about the Baptist, not the words of the Baptist about Christ.

After me (o $\quad \tau \sigma \omega \mu \circ$ ). See also 1:27. Later in time John means. He described "the Coming One" (o $\varepsilon \rho \chi \circ \mu \varepsilon v o \varsigma)$ before he saw Jesus. The language of John here is precisely that
 say these very words, but he also had the Synoptic Gospels.

Is become ( $\gamma \varepsilon \gamma^{\prime} \nu \varepsilon v$ ). Second perfect active indicative of $\gamma เ v o \mu \alpha$. It is already an actual fact when the Baptist is speaking.

Before me ( $\varepsilon \mu \pi \rho \circ \sigma \theta \varepsilon v \mu \circ v$ ). In rank and dignity, the Baptist means, o $\sigma \chi \cup \rho о \tau \varepsilon \rho о \varsigma$ $\mu \circ v$ "the one mightier than I" (Mr 1:7) and ıбхupotepos $\mu \circ v$ "mightier than I" (Mt 3:11). In Joh 3:28 $\varepsilon \mu \pi \rho \circ \sigma \theta \varepsilon v$ єкєıvov (before him, the Christ) does mean priority in time, but not here. This superior dignity of the Messiah John proudly recognizes always (Joh 3:25-30 ).

For he was before me (o $\pi \rho \omega \tau$ о $\mu \boldsymbol{\mu} \boldsymbol{\eta} \eta \nu$ ). Paradox, but clear. He had always been ( $\eta v$ $\mu \pi \varepsilon \rho \varphi \varepsilon \chi \tau)$ before John in his Pre-incarnate state, but "after" John in time of the Incarnation, but always ahead of John in rank immediately on his Incarnation. Пр $\omega$ тos $\mu$ ov (superlative with ablative) occurs here when only two are compared as is common in the vernacular Koine. So the Beloved Disciple came first ( $\pi \rho \omega \tau$ тос) to the tomb, ahead of Peter ( 20:4). So also $\pi \rho \omega \tau \tau v \nu \mu \omega v$ in 15:18 means "before you" as if it were $\pi \rho o \tau \varepsilon \rho o v \nu \mu \omega v$. Verse 30 repeats these words almost exactly.

John 1:16
For (ot). Correct text (Aleph B C D L) and not $\kappa \alpha$ (and) of the Textus Receptus. Explanatory reason for verse 14.

Of his fulness ( $\varepsilon \kappa$ tov $\pi \lambda \eta \rho \omega \mu \alpha \tau \sigma \varsigma)$. The only instance of $\pi \lambda \eta \rho \omega \mu \alpha$ in John's writings, though five times of Christ in Paul's Epistles (Col 1:19; 2:9; Eph 1:23; 3:19; 4:13 ). See Col 1:19 for discussion of these terms of the Gnostics that Paul employs for all the attributes of God summed up in Christ (Col 2:9) and so used here by John of the Incarnate Logos.

We all ( $\eta \mu \varepsilon \varsigma \varsigma ~ \pi \alpha \nu \tau \varepsilon \varsigma)$ ) John is facing the same Gnostic depreciation of Christ of which Paul writes in Colossians. So here John appeals to all his own contemporaries as participants with him in the fulness of the Logos.

Received ( $\varepsilon \lambda \alpha \beta \mathrm{o} \mu \varepsilon v$ ). Second aorist active indicative of $\lambda \alpha \mu \beta \alpha v \omega$, a wider experience than beholding ( $\varepsilon \theta \varepsilon \alpha \sigma \alpha \mu \varepsilon \theta \alpha$, verse 14) and one that all believers may have.

Grace for grace ( $\chi \alpha \rho \iota v \alpha v \tau \chi \alpha \rho \iota \tau \varsigma)$ ). The point is in $\alpha v \tau$, a preposition disappearing in the Koine and here only in John. It is in the locative case of $\alpha v \tau \alpha$ (end), "at the end," and was used of exchange in sale. See Lu 11:11, avt ıXUvoc opıv, "a serpent for a fish," Heb 12:2 where "joy" and "cross" are balanced against each other. Here the picture is "grace" taking the place of "grace" like the manna fresh each morning, new grace for the new day and the new service.

John 1:17
Was given ( $\varepsilon \delta \circ \theta \eta$ ). First aorist passive indicative of $\delta \iota \delta \omega \mu$.
By Moses ( $\delta \iota \alpha \mathrm{M} \omega v \sigma \varepsilon \omega \varsigma)$. "Through Moses" as the intermediate agent of God.
Came ( $\varepsilon \gamma \varepsilon v \varepsilon \tau о)$. The historical event, the beginning of Christianity.
By Jesus Christ ( $\delta ı \alpha \operatorname{I\eta \sigma ov~X\rho ı\sigma \tau ov).~"Through~Jesus~Christ,"~the~intermediate~agent~}$ of God the Father. Here in plain terms John identifies the Pre-incarnate Logos with Jesus of Nazareth, the Messiah. The full historical name "Jesus Christ" is here for the first time in John. See also 17:3 and four times in 1John and five times in Revelation. Without Christ there would have been no Christianity. John's theology is here pictured by the words "grace and truth" ( $\eta \chi \alpha \rho ı \varsigma \kappa \alpha \eta \alpha \lambda \eta \theta \varepsilon ı \alpha)$, each with the article and each supplementary to the other. It is grace in contrast with law as Paul sets forth in Galatians and Romans. Paul had made grace "a Christian commonplace" (Bernard) before John wrote. It is truth as opposed to Gnostic and all other heresy as Paul shows in Colossians and Ephesians. The two words aptly describe two aspects of the Logos and John drops the use of $\Lambda$ oүos and $\chi$ apı, but clings to $\alpha \lambda \eta \theta \varepsilon \iota \alpha$ (see 8:32 for the freedom brought by truth), though the ideas in these three words run all through his Gospel.

John 1:18
No man hath seen God at any time ( $\theta \varepsilon o v$ ov $\delta \varepsilon \iota \varsigma ~ \varepsilon \omega \rho \alpha \kappa \varepsilon v ~ \pi \omega \pi о \tau \varepsilon$ ). "God no one has ever seen." Perfect active indicative of opaw. Seen with the human physical eye, John means. God is invisible (Ex 33:20; De 4:12 ). Paul calls God aopatoc (Col 1:15; 1Ti 1:17 ). John repeats the idea in Joh 5:37; 6:46. And yet in 14:7 Jesus claims that the one who sees him has seen the Father as here.

The only begotten Son (o $\mu$ оvoүعvŋऽ vioc). This is the reading of the Textus Receptus and is intelligible after $\omega \varsigma \mu \circ v o \gamma \varepsilon v o u \varsigma \pi \alpha \rho \alpha \pi \alpha \tau \rho o \varsigma$ in verse 14 . But the best old Greek manuscripts (Aleph B C L) read $\mu$ ovoүعvŋ¢ $\theta$ عoc (God only begotten) which is undoubtedly the true text. Probably some scribe changed it to o $\mu$ ovopevnc vios to obviate the blunt statement of the deity of Christ and to make it like 3:16. But there is an inner harmony in
the reading of the old uncials. The Logos is plainly called $\theta$ voc in verse 1 . The Incarnation is stated in verse 14 , where he is also termed $\mu$ оvoүєvŋऽ. He was that before the Incarnation. So he is "God only begotten," "the Eternal Generation of the Son" of Origen's phrase.
 relation of the Son with the Father like $\pi \rho \circ \varsigma$ tov $\theta \varepsilon o v$ in verse 1. In 3:13 there is some evidence for o $\omega v \varepsilon v \tau \omega$ oupav $\omega$ used by Christ of himself while still on earth. The mystic sense here is that the Son is qualified to reveal the Father as Logos (both the Father in Idea and Expression) by reason of the continual fellowship with the Father.

He ( $\varepsilon \kappa ı v o \varsigma)$. Emphatic pronoun referring to the Son.
Hath declared him ( $\varepsilon \xi \eta \gamma \eta \sigma \alpha \tau 0)$. First aorist (effective) middle indicative of $\varepsilon \xi \eta \gamma \varepsilon \circ \mu \alpha$, old verb to lead out, to draw out in narrative, to recount. Here only in John, though once in Luke's Gospel ( $24: 35$ ) and four times in Ac (10:8; 15:12,14; 21:19). This word fitly closes the Prologue in which the Logos is pictured in marvellous fashion as the Word of God in human flesh, the Son of God with the Glory of God in him, showing men who God is and what he is.

John 1:19
 already alluded to it (verses 7f., 15 ) and now he proceeds to give it as the most important item to add after the Prologue. Just as the author assumes the birth narratives of Matthew and Luke, so he assumes the Synoptic accounts of the baptism of Jesus by John, but adds various details of great interest and value between the baptism and the Galilean ministry, filling out thus our knowledge of this first year of the Lord's ministry in various parts of Palestine. The story in John proceeds along the same lines as in the Synoptics. There is increasing unfolding of Christ to the disciples with increasing hostility on the part of the Jews till the final consummation in Jerusalem.

When the Jews sent unto him (от $\alpha \pi \varepsilon \sigma \tau \varepsilon ı \lambda \alpha v \pi \rho \circ \varsigma \alpha \cup \tau \circ v$ o Iov $\alpha a \circ$ ). John, writing in Ephesus near the close of the first century long after the destruction of Jerusalem, constantly uses the phrase "the Jews" as descriptive of the people as distinct from the Gentile world and from the followers of Christ (at first Jews also). Often he uses it of the Jewish leaders and rulers in particular who soon took a hostile attitude toward both John and Jesus. Here it is the Jews from Jerusalem who sent ( $\alpha \pi \varepsilon \sigma \tau \varepsilon ı \lambda \alpha v$, first aorist active indicative of $\alpha \pi о \sigma \tau \varepsilon \lambda \lambda \omega)$.

Priests and Levites (єррєı¢ ка $\Lambda \varepsilon v \varepsilon \iota \tau \alpha \varsigma) . ~ S a d d u c e e s ~ t h e s e ~ w e r e . ~ D o w n ~ b e l o w ~ i n ~ v e r s e ~$ 24 the author explains that it was the Pharisees who sent the Sadducees. The Synoptics throw a flood of light on this circumstance, for in Mt 3:7 we are told that the Baptist called the Pharisees and Sadducees "offspring of vipers" (Lu 3:7 ). Popular interest in John grew till people were wondering "in their hearts concerning John whether haply he were the Christ"
(Lu 3:15). So the Sanhedrin finally sent a committee to John to get his own view of himself, but the Pharisees saw to it that Sadducees were sent.

To ask him ( $\iota v \alpha \varepsilon \rho \omega \tau \eta \sigma \omega \sigma \tau v \alpha v \tau o v$ ). Final $t v \alpha$ and the first aorist active subjunctive of $\varepsilon \rho \omega \tau \alpha \omega$, old verb to ask a question as here and often in the Koine to ask for something (Joh 14:16) like aıtء $\omega$.

Who art thou? ( $\sigma \cup \tau \iota \varsigma \varepsilon i ;$ ). Direct question preserved and note proleptic position of $\sigma 0$, "Thou, who art thou?" The committee from the Sanhedrin put the question sharply up to John to define his claims concerning the Messiah.

John 1:20
And he confessed ( $\kappa \alpha \omega \mu \circ \lambda о \gamma \eta \sigma \varepsilon v$ ). The continued paratactic use of $\kappa \alpha$ (and) and the
 same thing), to confess, in the Synoptics (Mt 10:32 ) as here.

And denied not ( $\kappa \alpha$ оик $\eta \rho \vee \eta \sigma \alpha \tau о$ ). Negative statement of same thing in Johannine fashion, first aorist middle indicative of a $\rho v \varepsilon o \mu \alpha$, another Synoptic and Pauline word (Mt 10:33; 2 Ti 2:12 ). He did not contradict or refuse to say who he was.

And he confessed ( $\kappa \alpha \omega \mu о \lambda о \gamma \eta \sigma \varepsilon v$ ). Thoroughly Johannine again in the paratactic repetition.

I am not the Christ ( $\mathrm{E} \gamma \omega$ ovк $\varepsilon \mu$ о X Xıбтоऽ). Direct quotation again with recitative o $\tau$ before it like our modern quotation marks. "I am not the Messiah," he means by o Xpıбтos (the Anointed One). Evidently it was not a new question as Luke had already shown (Lu 3:15).

John 1:21
And they asked him ( $\kappa \alpha \eta \rho \omega \tau \eta \sigma \alpha v$ av $\quad$ тov). Here the paratactic $\kappa \alpha$ is like the transitional ouv (then).

What then? (T ouv;). Argumentative ouv like Paul's $\tau$ ouv in Ro 6:15. Quid ergo? Art thou Elijah? ( $\Sigma v \mathrm{E} \lambda \iota a \varsigma \varepsilon ;$ ). The next inevitable question since Elijah had been understood to be the forerunner of the Messiah from Mal 4:5. In Mr 9:11f. Jesus will identify John with the Elijah of Malachi's prophecy. Why then does John here flatly deny it? Because the expectation was that Elijah would return in person. This John denies. Jesus only asserts that John was Elijah in spirit. Elijah in person they had just seen on the Mount of Transfiguration.

He saith ( $\lambda \varepsilon \gamma \varepsilon$ ). Vivid dramatic present.
I am not (ouk $\varepsilon \mu$ ). Short and blunt denial.
Art thou the prophet? (o $\pi \rho о \varphi \eta \tau \eta \varsigma \varepsilon \sigma v$;). "The prophet art thou?" This question followed naturally the previous denials. Moses (De 18:15) had spoken of a prophet like unto himself. Christians interpreted this prophet to be the Messiah (Ac 3:22; 7:37), but the Jews thought him another forerunner of the Messiah (Joh 7:40). It is not clear in Joh 6:15 whether the people identified the expected prophet with the Messiah, though apparently so. Even the Baptist later became puzzled in prison whether Jesus himself was the true

Messiah or just one of the forerunners (Lu 7:19). People wondered about Jesus himself whether he was the Messiah or just one of the looked for prophets (Mr 8:28; Mt 16:14 ).

And he answered ( $\kappa \alpha \alpha \pi \varepsilon \kappa \rho ө \eta \eta$ ). First aorist passive (deponent passive, sense of voice

No (Ov). Shortest possible denial.
John 1:22
They said therefore ( $\varepsilon เ \pi \alpha v o v v$ ). Second aorist active indicative of defective verb $\varepsilon \iota \pi \circ v$ with $\alpha$ instead of usual $o$. Note ouv, inferential here as in verse 21 though often merely transitional in John.

Who art thou? (Tıৎ $\varepsilon ;$ ). Same question as at first (verse 19), but briefer.
That we give answer ( $\imath \alpha \alpha \pi о \kappa \rho \iota \sigma \imath \nu \omega \mu \varepsilon v$ ). Final use of $\imath v \alpha$ with second aorist active

To those that sent ( $\tau \circ \iota \varsigma \pi \varepsilon \mu \psi \alpha \sigma \iota v$ ). Dative case plural of the articular participle first aorist active of $\pi \varepsilon \mu \pi \omega$.

What sayest thou of thyself? (T $\lambda \varepsilon \gamma \varepsilon ı \varsigma \pi \varepsilon \rho \sigma \varepsilon \alpha v \tau o v ;$ ). This time they opened wide the door without giving any hint at all.

John 1:23
He said $(\varepsilon \varphi \eta)$. Common imperfect active (or second aorist active) of $\varphi \eta \mu$, to say, old defective verb.

I am the voice of one crying in the wilderness ( $\mathrm{E} \gamma \omega \varphi \omega \nu \eta \beta \circ \omega \nu \tau \circ \varsigma \varepsilon \nu \tau \eta \varepsilon \rho \eta \mu \omega$ ). For his answer John quotes Isa 40:3. The Synoptics (Mr 1:3; Mt 3:3; Lu 3:4) quote this language from Isaiah as descriptive of John, but do not say that he also applied it to himself. There is no reason to think that he did not do so. John also refers to Isaiah as the author of the words and also of the message, " Make straight the way of the Lord " (EvӨuvatє $\tau \eta v$ oסov $\tau 0 v$ $\kappa \cup \rho ı о v)$. By this language ( $\varepsilon v \theta v v \omega$ in N.T. only here and Jas 3:4, first aorist active imperative here) John identifies himself to the committee as the forerunner of the Messiah. The early writers note the differences between the use of $\Lambda$ oүoৎ (Word) for the Messiah and $\varphi \omega v \eta$ (Voice) for John.

John 1:24
They had been sent ( $\alpha \pi \varepsilon \sigma \tau \alpha \lambda \mu \varepsilon \nu \sigma \eta \sigma \alpha \nu$ ). Periphrastic past perfect passive of $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$.
From the Pharisees ( $\varepsilon \kappa \tau \omega \nu \Phi \alpha \rho \iota \sigma \alpha \iota \omega v$ ). As the source ( $\varepsilon \kappa$ ) of the committee of Sadducees (verse 19).

John 1:25
Why then baptizest thou? (T ouv $\beta \alpha \pi \tau \iota \zeta \varepsilon є ;$ ). In view of his repeated denials (three here mentioned).

If thou art not ( $\varepsilon \sigma v$ ovk $\varepsilon$ ). Condition of first class. They did not interpret his claim to be "the voice" to be important enough to justify the ordinance of baptism. Abrahams
(Studies in Pharisaism and the Gospels) shows that proselyte baptism was probably practised before John's time, but its use by John was treating the Jews as if they were themselves Gentiles.

John 1:26
In the midst of you standeth ( $\mu \varepsilon \sigma о \varsigma ~ \nu \mu \omega \nu \sigma \tau \eta \kappa \varepsilon$ ). Adjective as in 19:18, not $\varepsilon v \mu \varepsilon \sigma \omega$ $\nu \mu \omega v$. Present active indicative of late verb $\sigma \tau \eta \kappa \omega$ from perfect stem $\varepsilon \sigma \tau \eta \kappa \alpha$. John had already baptized Jesus and recognized him as the Messiah.

Whom ye know not ( $\circ$ v $\cup \mu \varepsilon \iota \varsigma ~ o v \kappa ~ o \iota \delta \alpha \tau \varepsilon$ ). This was the tragedy of the situation ( $1: 11$ ). Apparently this startling declaration excited no further inquiry from the committee.

John 1:27
Coming after me (o $\pi \iota \sigma \omega \mu \circ v \varepsilon \rho \chi \circ \mu \varepsilon v o \varsigma)$ ). No article (o) in Aleph B. John as the forerunner of the Messiah has preceded him in time, but not in rank as he instantly adds.

The latchet of whose shoe I am not worthy to unloose (ov ouk $\varepsilon \mu \alpha \xi_{\imath o \varsigma} v \alpha \alpha \lambda v \sigma \omega$
 latchet (see Mr 1:7 for $\mu \mu \varsigma$ ) of his sandal (see Mt 3:11 for v $\pi$ о $\delta \eta \mu \alpha$, bound under the foot)." Only use of $\alpha \xi$ Łoc with $\iota v \alpha$ in John, though used by Paul in this saying of the Baptist (Ac 13:25), ıкаvос $\tau \alpha$ in Mt 3:8, but ıкаvос $\lambda \nu \sigma \alpha$ (aorist active infinitive instead of $\lambda \nu \sigma \omega$, aorist active subjunctive) in $\mathrm{Mr} 1: 7$ ( $\mathrm{Lu} 3: 16$ ) and $\beta a \sigma \tau \alpha \sigma \alpha$ in $\mathrm{Mt} \mathrm{3:11} \mathrm{}$.

John 1:28
In Bethany beyond Jordan ( $\varepsilon v B \eta \theta a v i \alpha ~ \pi \varepsilon \rho \alpha v \tau o v \operatorname{Io\rho } \delta \alpha v o v)$. Undoubtedly the correct text, not "in Bethabara" as Origen suggested instead of "in Bethany" of all the known Greek manuscripts under the mistaken notion that the only Bethany was that near Jerusalem.

Was baptizing ( $\eta \nu \beta \alpha \pi \tau \iota \zeta \omega v$ ). Periphrastic imperfect, common idiom in John.
John 1:29
On the morrow ( $\tau \eta \varepsilon \pi \alpha u \rho ı o v$ ). Locative case with $\eta \mu \eta \rho \alpha$ (day) understood after the adverb eraupıov. "Second day of this spiritual diary" (Bernard) from verse 19.

Seeth Jesus coming ( $\beta \lambda \varepsilon \pi \varepsilon$ тov I $\eta \sigma o u v \varepsilon \rho \chi \circ \mu \varepsilon v o v$ ). Dramatic historical present indicative ( $\beta \lambda \varepsilon \pi \varepsilon$ ) with vivid present middle participle ( $\varepsilon \rho \chi \circ \mu \varepsilon v o v$ ). Graphic picture.
 and so nominative $\alpha \mu v o c$. Common idiom in John ( $1: 36 ; 3: 26$, etc.). For "the Lamb of God" see 1Co 5:7 (cf. Joh 19:36) and 1Pe 1:19. The passage in Isa 53:6f. is directly applied to Christ by Philip in Ac 8:32. See also Mt 8:17; 1Pe 2:22f.; Heb 9:28. But the Jews did not look for a suffering Messiah (Joh 12:34) nor did the disciples at first (Mr 9:32; Lu 24:21). But was it not possible for John, the Forerunner of the Messiah, to have a prophetic insight concerning the Messiah as the Paschal Lamb, already in Isa 53 , even if the rabbis did not see it there? Symeon had it dimly (Lu 2:35 ), but John more clearly. So Westcott rightly. Bernard is unwilling to believe that John the Baptist had more insight on this point than
current Judaism. Then why and how did he recognize Jesus as Messiah at all? Certainly the Baptist did not have to be as ignorant as the rabbis.

Which taketh away the sin of the world ( $\frac{\alpha \iota \rho \omega \nu}{} \tau \eta \nu$ a $\mu \alpha \rho \tau \iota \alpha \nu \tau 0 v$ коб $\mu \circ v$ ). Note singular $\alpha \mu \alpha \rho \tau \iota \alpha v$ not plural $\alpha \mu \alpha \rho \tau ı \alpha \varsigma ~(1 J o ~ 3: 5) ~ w h e r e ~ s a m e ~ v e r b ~ a ı \rho \omega, ~ t o ~ b e a r ~ a w a y, ~ i s ~$ used. The future work of the Lamb of God here described in present tense as in 1Jo 1:7 about the blood of Christ. He is the Lamb of God for the world, not just for Jews.

John 1:30
Of whom (v $\tau \varepsilon \rho \mathrm{ov})$. Not $\pi \varepsilon \rho$, but $v \pi \varepsilon \rho$. "On behalf of whom." John points to Jesus as he speaks: "This is he." There he is. See verse 15 for discussion of these words of John.

John 1:31
And I knew him not ( $\kappa \alpha \gamma \omega$ оик $\eta \iota \delta \varepsilon ı v$ avtov). Repeated in verse 33 . Second past perfect of ot $\delta \alpha$ as imperfect. He had predicted the Messiah and described him before he met him and baptized him. See the Synoptics for that story. Whether John knew Jesus personally before the baptism we do not know.

But that he should be made manifest to Israel ( $\alpha \lambda \lambda^{\prime} เ v \alpha \varphi \alpha v \varepsilon \rho \omega \theta \eta \tau \omega$ I $\sigma \rho \alpha \eta \lambda$ ). Final clause with $\operatorname{vo\alpha }$ and first aorist passive subjunctive of $\varphi \alpha v \varepsilon \rho o \omega$. The purpose of John's ministry was to manifest to Israel with their spiritual privileges ( $1: 49$ ) the presence of the Messiah. Hence he was baptizing in water those who confessed their sins, he means, as in Mr 1:5. The Synoptic account is presupposed all along here.

John 1:32
Bare witness ( $\varepsilon \mu \alpha \rho \tau v \rho \eta \sigma \varepsilon v$ ). First aorist active indicative of $\mu \alpha \rho \tau \cup \rho \varepsilon \omega$. Another specimen of John's witness to the Messiah (1:7,15,19,29,35,36).

I have beheld $(\tau \varepsilon \theta \varepsilon \alpha \mu \alpha)$. Perfect middle indicative of $\theta \varepsilon \alpha o \mu \alpha$, the realization of the promise of the sign (verse 33) by which he should recognize the Messiah. As a matter of fact, we know that he so recognized Jesus as Messiah when he came for baptism before the Holy Spirit came (Mt 3:14ff. ). But this sight of the Spirit descending as a dove upon Jesus at his baptism (Mr 1:10; Mt 3:16; Lu 3:22 ) became permanent proof to him. John's allusion assumes the Synoptic record. The Semites regarded the dove as a symbol of the Spirit.

John 1:33
He said ( $\varepsilon \kappa \varepsilon เ v o \varsigma ~ \varepsilon ı \pi \varepsilon v) . ~ E x p l i c i t ~ a n d ~ e m p h a t i c ~ p r o n o u n ~ a s ~ i n ~ v e r s e ~ 8, ~ r e f e r r i n g ~ t o ~ G o d ~$ as the one who sent John (verse 6).

With the Holy Spirit ( $\varepsilon v \pi \nu \varepsilon v \mu \alpha \tau \alpha \gamma \omega)$. "In the Holy Spirit." Here again one needs the background of the Synoptics for the contrast between John's baptism in water (Joh 1:26 ) and that of the Messiah in the Holy Spirit (Mr 1:8; Mt 3:11; Lu 3:16 ).

John 1:34
I have seen ( $\varepsilon \omega \rho \alpha \kappa \alpha)$. Present perfect active of opac). John repeats the statement of verse 32 ( $\tau \varepsilon \theta \varepsilon \alpha \mu \alpha)$.

Have borne witness ( $\mu \varepsilon \mu \alpha \rho \tau v \rho \eta \kappa \alpha)$. Perfect active indicative of $\mu \alpha \rho \tau \nu \rho \varepsilon \omega$ for which verb see 32.

This is the Son of God (o vios qov $\theta \varepsilon o v$ ). The Baptist saw the Spirit come on Jesus at his baptism and undoubtedly heard the Father's voice hail him as "My Beloved Son" (Mr 1:11; Mt 3:17; Lu 3:22 ). Nathanael uses it as a Messianic title (Joh 1:49) as does Martha ( 11:27). The Synoptics use it also of Christ (Mr 3:11; Mt 14:33; Lu 22:70 ). Caiaphas employs it to Christ as a Messianic title (Mt 26:63) and Jesus confessed under oath that he was (verse Mt 26:64 ), thus applying the term to himself as he does in John's Gospel (5:25; 10:36; 11:4 ) and by implication (the Father, the Son) in Mt 11:27 (Lu 10:22). Hence in the Synoptics also Jesus calls himself the Son of God. The phrase means more than just Messiah and expresses the peculiar relation of the Son to the Father (Joh 3:18; 5:25; 17:5; 19:7; 20:31) like that of the Logos with God in 1:1.

John 1:35
Again on the morrow ( $\tau \eta \varepsilon \pi \alpha v \rho \iota o v \pi \alpha \lambda \iota v$ ). Third day since verse 19.
Was standing ( $\iota \tau \eta \kappa \varepsilon)$. Past perfect of $\iota \sigma \tau \eta \mu$, intransitive, and used as imperfect in sense. See same form in 7:37.

Two ( $\delta v o$ ). One was Andrew (verse 40), the other the Beloved Disciple (the Apostle John), who records this incident with happy memories.

John 1:36
He looked ( $\varepsilon \mu \beta \lambda \varepsilon \psi \alpha \varsigma)$. First aorist active participle of $\varepsilon \mu \beta \lambda \varepsilon \pi \omega$, antecedent action before $\lambda \varepsilon \gamma \varepsilon$ (says).

As he walked ( $\pi \varepsilon \rho \iota \pi \alpha \tau o v \nu \tau)$. Present active participle in dative case after $\varepsilon \mu \beta \lambda \varepsilon \psi \alpha \varsigma$ and like $\varepsilon \rho \chi \circ \mu \varepsilon v o v$ in verse 29 vividly pictures the rapture of John in this vision of Jesus, so far as we know the third and last glimpse of Jesus by John (the baptism, verse 29, and here).

Saith $(\lambda \varepsilon \gamma \varepsilon)$. Historical present, change from $\sigma \tau \eta \kappa \varepsilon$ before. He repeats part of the tribute in verse 29.

John 1:37
Heard him speak ( $\eta \kappa о \cup \sigma \alpha v$ avtov $\lambda \alpha \lambda о \cup v \tau о \varsigma)$. First active indicative of $\alpha \kappa о \cup \omega$ and present active participle of $\lambda \alpha \lambda \varepsilon \omega$ in genitive case agreeing with $\alpha v \tau o v$, object of $\alpha \kappa 0 v \omega$. "Heard him speaking" (kind of indirect discourse). John had disciples ( $\mu \alpha \theta \eta \tau \alpha$, learners, from $\mu \alpha v \theta \alpha \nu \omega$, to learn).

They followed Jesus ( $\eta \kappa о \lambda o v \theta \eta \sigma \alpha \nu \tau \omega$ I $\eta \sigma o v$ ). Associative instrumental case after verb (first aorist active indicative, ingressive aorist, of $\alpha \kappa 0 \lambda o v \theta \varepsilon \omega$ ). These two disciples of the Baptist (Andrew and John) took him at his word and acted on it. John the Baptist had predicted and portrayed the Messiah, had baptized him, had interpreted him, and now for the second time had identified him.

John 1:38

Turned ( $\sigma \tau \rho \alpha \varphi \varepsilon \iota \varsigma)$. Second aorist passive participle of $\sigma \tau \rho \varepsilon \varphi \omega$, vividly picturing the sudden act of Jesus on hearing their steps behind him.

Beheld ( $\theta \varepsilon \alpha \sigma \alpha \mu \varepsilon v o \varsigma)$. First aorist middle participle of $\theta \varepsilon \alpha o \mu \alpha$ (verse 32). Both participles here express antecedent action to $\lambda \varepsilon \gamma \varepsilon$ (saith).

Following ( $\alpha \kappa о \lambda о \theta$ ovvtac). Present active participle of $\alpha \kappa 0 \lambda o v \theta \varepsilon \omega$ (verse 37). It was Christ's first experience of this kind and the two came from the Baptist to Jesus.

What seek ye? (T $\lceil\uparrow \tau \varepsilon \tau \varepsilon ;$ ). Not "whom" ( $\tau \iota v a 18: 4 ; 20: 15$ ), but "what purpose have you." The first words of Jesus preserved in this Gospel. See Lu 2:49; Mt 3:15 for words spoken before this and Mr 1:15 for Mark's first report in the Galilean ministry.

Rabbi (Paßßع). Aramaic title for "Teacher" which John here translates by $\Delta \mathrm{t} \delta \alpha \sigma \kappa \alpha \lambda \varepsilon$ as he is writing late and for general readers. Luke, a Greek Christian, does not use it, but John recalls his first use of this term to Jesus and explains it. Matthew has it only in the greeting of Judas to the Master (Mt 26:25,49) and Mark once by Judas (Mr 14:45) and twice by Peter (Mr 9:5; 11:21). John's Gospel has the disciples at first addressing Jesus by Rabbi while others address him by Kupı (Lord or Sir) as in 4:11,49; 5:7. Peter uses Kupı in 6:68. In the end the disciples usually say $\operatorname{Kupı\varepsilon }(13: 6,25$, etc.), but Mary Magdalene says Pa $\beta \beta$ ouve (20:16).

Being interpreted ( $\mu \varepsilon \theta \varepsilon \rho \mu \eta \mu \varepsilon v o \mu \varepsilon v o v$ ). Present passive participle of $\mu \varepsilon \theta \varepsilon \rho \mu \eta \nu \varepsilon v \omega$, late compound of $\mu \varepsilon \tau \alpha$ and $\varepsilon \rho \mu \eta \nu \varepsilon v \omega$, to explain (Joh 1:42), old word from Hع $\rho \mu \varepsilon \varsigma$, the god of speech (hermeneutics). John often explains Aramaic words (1:38,41,42; 4:25; 9:7, etc.).

Where abidest thou? (Поv $\mu \varepsilon v \varepsilon \iota \sigma ;)$. They wished a place for quiet converse with Jesus. John 1:39
Come and ye shall see ( $\varepsilon \rho \chi \varepsilon \sigma \theta \varepsilon \kappa \alpha$ о $\boldsymbol{q}^{\prime} \varepsilon \sigma \theta \varepsilon$ ). Polite invitation and definite promise (future middle indicative $\mathrm{o} \psi \varepsilon \sigma \theta \varepsilon$ from opa $\omega$, correct text, not imperative $\downarrow \delta \varepsilon \tau \varepsilon$ ).

Where he abode ( $\pi \mathrm{o} \nu \mu \varepsilon v \varepsilon$ ). Indirect question preserving the present active indicative after secondary tense ( $\varepsilon \iota \delta \alpha v$, saw) according to regular Greek idiom. Same verb $\mu \varepsilon v \omega$ as in 38.

With him ( $\left.\pi \alpha \rho^{\prime} \alpha v \tau \omega\right)$. "By his side," "beside him."
That day ( $\tau \eta v \eta \mu \varepsilon \rho a v \varepsilon \kappa \varepsilon \imath v \eta v$ ). Accusative of extent of time, all during that day.
About the tenth hour ( $\omega \rho \alpha \omega \varsigma \delta \varepsilon \kappa \alpha \tau \eta$ ). Roman time and so ten o'clock in the morning. John in Ephesus at the close of the century naturally uses Roman time. See 20:19 "evening on that day," clearly Roman time. Thus also Joh 19:14 (sixth hour, morning) and Mr 15:25 (third hour, nine A.M.) suit. To his latest day John never forgot the hour when first he met Jesus.

John 1:40

Andrew (Av $\rho \rho \varepsilon a \varsigma)$. Explained by John as one of the two disciples of the Baptist and identified as the brother of the famous Simon Peter (cf. also 6:8; 12:22). The more formal call of Andrew and Simon, James and John, comes later (Mr 1:16ff.; Mt 4:18ff.; Lu 3:1-11 ).

That heard John speak ( $\tau \omega v \alpha \kappa о v \sigma \alpha \nu \tau \omega v \pi \alpha \rho \alpha \mathrm{I} \omega \alpha v o v)$. "That heard from John," a classical idiom ( $\pi \alpha \rho \alpha$ with ablative after $\alpha \kappa о v \omega$ ) seen also in $6: 45 ; 7: 51 ; 8: 26,40 ; 15: 15$.

John 1:41
He findeth first ( $\varepsilon \cup \rho \iota \sigma \kappa \varepsilon ~ o v \tau о \varsigma \pi \rho \omega \tau \circ v$ ). "This one finds (vivid dramatic present) first" ( $\pi \rho o \tau \omega v$ ). Прот $\omega \nu$ (adverb supported by Aleph A B fam. 13) means that Andrew sought "his own brother Simon" ( $\left.\tau 0 v a \delta \varepsilon \lambda \varphi o v \tau o v \operatorname{tov} \sum \iota \mu \omega \alpha\right)$ before he did anything else. But Aleph L W read $\pi \rho \omega \tau$ с (nominative adjective) which means that Andrew was the first who went after his brother implying that John also went after his brother James. Some old Latin manuscripts (b, e, r apparently), have $\mu a v \varepsilon$ for Greek $\pi \rho \omega$ (early in the morning). Bernard thinks that this is the true reading as it allows more time for Andrew to bring Simon to Jesus. Probably $\pi \rho \omega \tau 0 v$ is correct, but even so John likely brought also his brother James after Andrew's example.

We have found the Messiah (Hعvр $К \kappa \alpha \mu \varepsilon v \tau o v \operatorname{M\varepsilon \sigma \sigma \iota av).~First~aorist~active~indicative~}$ of $\varepsilon \cup \rho \iota \sigma \kappa \omega$. Andrew and John had made the greatest discovery of the ages, far beyond gold or diamond mines. The Baptist had told about him. "We have seen him."

Which is (o $\varepsilon \sigma \tau \iota v)$. Same explanatory neuter relative as in verse 38 , "which word is." This Aramaic title Messiah is preserved in the N.T. only here and $4: 25$, elsewhere translated into X $\rho \iota \sigma \tau \circ \varsigma$, Anointed One, from $\chi \rho \iota \omega$, to anoint. See on Mt 1:1 for discussion.

John 1:42
Looked upon him $(\varepsilon \mu \beta \lambda \varepsilon \psi \alpha \varsigma \alpha v \tau \omega)$. See verse 36 for same word and form of John's eager gaze at Jesus. Luke uses this word of Jesus when Peter denied him (Lu 22:61).

He brought him ( $\eta \gamma \alpha \gamma \varepsilon v \alpha v \tau o v$ ). Effective second aorist active indicative of $\alpha \gamma 0$ as if Andrew had to overcome some resistance on Simon's part.

Thou shalt be called Cephas ( $\sigma v \kappa \lambda \eta \forall \eta \sigma \eta К \eta \varphi a \varsigma$ ). Apparently before Simon spoke. We do not know whether Jesus had seen Simon before or not, but he at once gives him a nickname that will characterize him some day, though not yet, when he makes the noble confession (Mt 16:17f. ), and Jesus will say, "Thou art Peter." Here the future passive indicative of $\kappa \alpha \lambda \varepsilon \omega$ is only prophecy. The Aramaic X $\eta \varphi \alpha \varsigma$ (rock) is only applied to Simon in John except by Paul (1Co 1:12; Ga $1: 18$, etc.). But the Greek Пع $\tau \rho \circ \varsigma$ is used by all. In the ancient Greek $\pi \varepsilon \tau \rho a$ was used for the massive ledge of rock like Stone Mountain while $\pi \varepsilon \tau \rho \circ \varsigma$ was a detached fragment of the ledge, though itself large. This distinction may exist in Mt 16:17f. , except that Jesus probably used Aramaic which would not have such a distinction.

John 1:43
On the morrow ( $\tau \eta \varepsilon \pi \alpha u \rho i o v)$. The fourth of the days from verse 19.

He findeth Philip ( $\varepsilon \cup \rho \iota \sigma \kappa \varepsilon Ф \backslash \lambda \iota \pi \pi \circ v$ ). Vivid dramatic present as in 41 , though $\eta \theta \varepsilon \lambda \eta \sigma \varepsilon v$ (was minded, wished) is aorist active indicative. Apparently not an accidental finding, possibly due to the efforts of Andrew and Peter. Both Andrew and Philip have Greek names.

Follow me ( $\alpha \kappa о \lambda o v \theta \varepsilon \mu \mathrm{o}$ ). Present active imperative, a direct challenge to Philip. Often Jesus uses this verb to win disciples (Mr 2:14; Mt 8:22; 9:21; 19:21; Lu 9:59; Joh 21:19 ). Already Jesus had four personal followers (Andrew and Simon, John and James). He has begun his work.

John 1:44
From Bethsaida ( $\alpha \pi \mathrm{B} \mathrm{B} \eta \quad \sigma \alpha \iota \delta \alpha$ ). Same expression in 12:21 with the added words "of Galilee," which locates it in Galilee, not in Iturea. There were two Bethsaidas, one called Bethsaida Julias in Iturea (that in $\mathrm{Lu} 9: 10$ ) or the Eastern Bethsaida, the other the Western Bethsaida in Galilee (Mr 6:45), perhaps somewhere near Capernaum. This is the town of Andrew and Peter and Philip. Hence Philip would be inclined to follow the example of his townsmen.

John 1:45
Philip findeth ( $\varepsilon v \rho \iota \sigma \kappa \varepsilon Ф \downarrow \lambda \iota \pi \pi \circ \varsigma)$. Dramatic present again. Philip carries on the work. One wins one. If that glorious beginning had only kept on! Now it takes a hundred to win one.

Nathaniel ( $\operatorname{cov} \operatorname{Na\theta ava\eta } \lambda$ ). It is a Hebrew name meaning "God has given" like the Greek $\Theta \varepsilon o \delta o \rho \varepsilon$ (Gift of God). He was from Cana of Galilee (Joh 21:2), not far from Bethsaida and so known to Philip. His name does not occur in the Synoptics while Bartholomew (a patronymic, Bar Tholmai) does not appear in John. They are almost certainly two names of the same man. Philip uses $\varepsilon v \rho \eta \kappa \alpha \mu \varepsilon v$ (verse 41) also to Nathanael and so unites himself with the circle of believers, but instead of Meббıav describes him "of whom (ov accusative with $\varepsilon \gamma \rho a \psi \varepsilon v$ ) Moses in the law (De 18:15) and the prophets (so the whole O.T. as in Lu 24:27,44 ) did write."

Jesus of Nazareth the son of Joseph (I $\eta \sigma o u v$ viov tov $\operatorname{I} \omega \sigma \eta \varphi$ тоv $\alpha \pi о \mathrm{Na} \mathrm{\zeta} \mathrm{\alpha} \mathrm{\rho} \mathrm{\varepsilon} \mathrm{\tau)}$. exactly, "Jesus, son of Joseph, the one from Nazareth." Jesus passed as son (no article in the Greek) of Joseph, though John has just described him as "God-only Begotten" in verse 18, but certainly Philip could not know this. Bernard terms this part "the irony of St. John" for he is sure that his readers will agree with him as to the real deity of Jesus Christ. These details were probably meant to interest Nathanael.

John 1:46
Can any good thing come out of Nazareth? (Ек Naऍарєт $\delta v v a \tau \alpha \tau \alpha \gamma \alpha$ Oov $\varepsilon ı v a l ;)$. Literally, "Out of Nazareth can anything good be." There is a tinge of scorn in the question as if Nazareth (note position at beginning of sentence) had a bad name. Town rivalry may account to some extent for it since Cana (home of Nathanael) was near Nazareth. Clearly he had never heard of Jesus. The best thing in all the world came out of Nazareth, but Philip
does not argue the point. A saying had arisen that no prophet comes out of Galilee (Joh 7:52 ), untrue like many such sayings.

Come and see ( $\varepsilon \rho \chi$ ои $\kappa \alpha \downarrow \delta \varepsilon$ ). Present middle imperative (come on) and second active imperative (and see at once). Philip followed the method of Jesus with Andrew and John (verse 39), probably without knowing it. Wise is the one who knows how to deal with the sceptic.

John 1:47
Behold ( $1 \delta \varepsilon$ ). Here an exclamation (see 1:29) as often like $\delta \delta o u$.
An Israelite indeed ( $\alpha \lambda \eta \theta \omega \varsigma$ I $\sigma \rho a \eta \lambda \varepsilon \iota \tau \eta \varsigma$ ). "Truly an Israelite," one living up to the covenant name, Israel at its best (Ro 2:29), without the guile ( $\delta 0 \lambda 0 \varsigma$, deceit, bait for fish, from $\delta \varepsilon \lambda \varepsilon \alpha \zeta \omega$, to catch with bait) that Jacob once had of which Isaac complained (Ge 27:35 , ठo $\lambda o \varsigma$, here in LXX). The servant of Jehovah was to be without guile (Isa 53:9).

John 1:48
Whence knowest thou me? ( $П о \theta \varepsilon \nu \mu \varepsilon \gamma \iota \nu \omega \sigma \kappa \varepsilon \iota \sigma ;)$. Nathanael is astonished at this tribute, at any knowledge about himself by Jesus. He had overheard Christ's comment and longed to know its source.

Before Philip called thee ( $\Pi \rho о$ тov $\sigma \varepsilon \Phi \downarrow \lambda ı \pi \tau \nu \varphi \omega v \eta \sigma \alpha$ ). Idiomatic Greek, $\pi \rho o$ and the ablative case of the articular aorist active infinitive ( $\tau 0 v \varphi \omega v \eta \sigma \alpha$, from $\varphi \omega v \varepsilon \omega$, to call) with $\sigma \varepsilon$ as the object and $\Phi i \lambda \iota \pi \pi \sigma v$, the accusative of general reference, "before the calling thee as to Philip."

When thou wast under the fig tree (огта vпо $\tau \eta v$ бикๆv). "Being under the fig tree," accusative present participle agreeing with $\sigma \varepsilon$. The fig tree was a familiar object in Palestine, probably in leaf at this time, the accusative with vro may suggest that Nathanael had withdrawn there for prayer. Note genitive with $v \pi о к а \tau \omega$ in verse 50 . Jesus saw Nathanael's heart as well as his mere presence there. He saw him in his worship and so knew him.

John 1:49
Thou art the Son of God ( $\sigma v \varepsilon$ o vioc $\operatorname{\tau ov} \theta$ sou). Whether Nathanael had heard the Baptist say this of Jesus ( $1: 34$ ) we do not know, apparently not, but Nathanael was a student of the Old Testament as Philip implied ( 1:45) and was quick to put together his knowledge, the statement of Philip, and the manifest supernatural knowledge of Jesus as just shown. There is no reason for toning down the noble confession of Nathanael in the light of Christ's claim in verse 51. Cf. the confession of Peter in 6:69; Mt 16:16 and Martha's in Joh 11:27 . Nathanael goes further.

Thou art King of Israel (Baбi $1 \varepsilon v \varsigma \varepsilon$ tov I $\sigma \rho a \eta \lambda$ ). To us this seems an anti-climax, but not so to Nathanael for both are Messianic titles in Ps 2 and Jesus is greeted in the Triumphal Entry as the King of Israel (Joh 12:13 ).

John 1:50

Answered and said ( $\alpha \pi \varepsilon \kappa \rho \iota \forall \eta \kappa \alpha \varepsilon \iota \pi \varepsilon v$ ). This redundant use of both verbs (cf. 1:26) occurs in the Synoptics also and in the LXX also. It is Aramaic also and vernacular. It is not proof of an Aramaic original as Burney argues (Aramaic Origin, etc., p. 53).

Because (o $\tau$ ). Causal use of o $\tau$ at beginning of the sentence as in 14:19; 15:19; 16:6. The second ot before $\varepsilon \iota \delta o v$ (I saw) is either declarative (that) or merely recitative (either makes sense here).

Thou shalt see greater things than these ( $\mu \varepsilon \iota \zeta \omega \tau o v \tau \omega \nu$ о $\psi \eta$ ). Perhaps volitive future middle indicative of o $\rho \alpha \omega$ (though merely futuristic is possible as with $o \psi \varepsilon \sigma \theta \varepsilon$ in 51 ) ablative case of $\tau 0 v \tau \omega \nu$ after the comparative adjective $\mu \varepsilon \iota \zeta \omega$. The wonder of Nathanael no doubt grew as Jesus went on.

John 1:51
Verily, Verily (A $\mu \eta \nu, \alpha \mu \eta \nu$ ). Hebrew word transliterated into Greek and then into English, our "amen." John always repeats it, not singly as in the Synoptics, and only in the words of Jesus, an illustration of Christ's authoritative manner of speaking as shown also by $\lambda \varepsilon \gamma \omega v \mu \nu \nu$ (I say unto you). Note plural $v \mu \iota v$ though $\alpha v \tau \omega$ just before is singular (to him). Jesus addresses thus others besides Nathanael.

The heaven opened ( $\tau 0 v$ ovpavov ave $\omega \iota \gamma \sigma \tau \alpha$ ). Second perfect active participle of $\alpha v o r \gamma \omega$ with double reduplication, standing open. The words remind one of what took place at the baptism of Jesus (Mt 3:16; Lu 3:21), but the immediate reference is to the opened heaven as the symbol of free intercourse between God and man (Isa 64:1) and as it was later illustrated in the death of Stephen (Ac 7:56 ). There is a quotation from Ge 28:12f. , Jacob's vision at Bethel. That was a dream to Jacob, but Christ is himself the bond of fellowship between heaven and earth, between God and man, for Jesus is both "the Son of God" as Nathanael said and "the Son of Man" ( $\varepsilon \pi \tau \operatorname{\tau } \boldsymbol{v} v \iota v \tau \operatorname{\tau ov} \alpha \nu \theta \rho \omega \pi \sigma v)$ as Jesus here calls himself. God and man meet in Christ. He is the true Jacob's Ladder. "I am the Way," Jesus will say. He is more than King of Israel, he is the Son of Man (the race). So quickly has this Gospel brought out in the witness of the Baptist, the faith of the first disciples, the claims of Jesus Christ, the fully developed picture of the Logos who is both God and man, moving among men and winning them to his service. At the close of the ministry Christ will tell Caiaphas that he will see the Son of Man sitting at the right hand of power and coming with the clouds of heaven (Mr 14:62). Here at the start Jesus is conscious of the final culmination and in apocalyptic eschatological language that we do not fully understand he sets forth the dignity and majesty of his Person.

## John 2

John 2:1
The third day ( $\tau \eta \eta \mu \varepsilon \rho \alpha \tau \eta \tau \rho \iota \tau \eta$ ). "On the day the third" (locative case), from the start to Galilee when Philip was found ( 1:43), seven days since 1:19.

There was a marriage ( $\gamma \alpha \mu \circ \varsigma \varepsilon \gamma \varepsilon v \varepsilon \tau о$ ). "A wedding (or marriage festival) took place." See on Mt 22:8.

In Cana of Galilee ( $\varepsilon v$ K $\left.\alpha v \alpha \tau \eta \varsigma \Gamma \alpha \lambda_{\iota} \lambda \alpha ı \alpha\right)$ ). This town, the home of Nathanael ( 21:2), is only mentioned again in 4:46 as the home of the nobleman. There was a Cana in CoeleSyria. It is usually located at Kefr Kenna ( $31 / 2$ miles from Nazareth), though Ain Kana and Khirbet Kana are also possible. Bernard thinks that it was probably on Wednesday afternoon the fourth day of the week (usual day for marriage of virgins), when the party of Jesus arrived.

And the mother of Jesus was there ( $\kappa \alpha \eta \nu \eta \mu \eta \tau \eta \rho$ тov I $\eta \sigma \circ v \varepsilon \kappa \varepsilon$ ). When they arrived. John does not mention her name, probably because already well known in the Synoptics. Probably Joseph was already dead. Mary may have been kin to the family where the wedding took place, an intimate friend clearly.

John 2:2
Jesus also was bidden ( $\varepsilon \kappa \lambda \eta \theta \eta \kappa \alpha$ o I $\eta \sigma o v \varsigma)$. First aorist passive indicative of $\kappa \alpha \lambda \varepsilon \omega$, "was also invited" as well as his mother and because of her presence, possibly at her suggestion.

And his disciples ( $\kappa \alpha$ о $\mu \alpha \theta \eta \tau \alpha$ ). Included in the invitation and probably all of them acquaintances of the family. See on 1:35 for this word applied to John's followers. This group of six already won form the nucleus of the great host of "learners" through the ages who will follow Jesus as Teacher and Lord and Saviour. The term is sometimes restricted to the twelve apostles, but more often has a wider circle in view as in Joh 6:61,66; 20:30 .

John 2:3
When the wine failed (vбזєр $\quad \sigma \alpha v \tau o \varsigma ~ o w v o v)$. Genitive absolute with first aorist active participle of $v \sigma \tau \varepsilon \rho \varepsilon \omega$, old verb from vote $\rho$ os, late or lacking. See same use in Mr 10:21 . A longer Western paraphrase occurs in some manuscripts. It was an embarrassing circumstance, especially to Mary, if partly due to the arrival of the seven guests.

They have no wine (Otvov ouk e $\chi$ ouovv). The statement of the fact was in itself a hint and a request. But why made by the mother of Jesus and why to Jesus? She would not, of course, make it to the host. Mary feels some kind of responsibility and exercises some kind of authority for reasons not known to us. Mary had treasured in her heart the wonders connected with the birth of Jesus (Lu 2:19,51). The ministry of the Baptist had stirred her hopes afresh. Had she not told Jesus all that she knew before he went to the Jordan to be baptized of John? This group of disciples meant to her that Jesus had begun his Messianic work. So she dares propose the miracle to him.

John 2:4
Woman ( $\gamma \cup v \alpha$ ). Vocative case of $\gamma \cup v \eta$, and with no idea of censure as is plain from its use by Jesus in 19:26. But the use of $\gamma v v a$ instead of $\mu \eta \tau \varepsilon \rho$ (Mother) does show her she can no longer exercise maternal authority and not at all in his Messianic work. That is always a difficult lesson for mothers and fathers to learn, when to let go.

What have I to do with thee? (T $\varepsilon \mu \circ \kappa \alpha \sigma o \iota ;)$. There are a number of examples of this ethical dative in the LXX (Jud 11:12; 2Sa 16:10; 1Ki 17:18; 2Ki 3:13; 2Ch 35:21) and in the N.T. (Mr 1:24; 5:7; Mt 8:29; 27:19; Lu 8:28). Some divergence of thought is usually indicated. Literally the phrase means, "What is it to me and to thee?" In this instance F.C. Burkitt (Journal of Theol. Studies, July, 1912) interprets it to mean, "What is it to us?" That is certainly possible and suits the next clause also.

Mine hour is not yet come ( $0 v \pi \omega \eta \kappa \varepsilon \eta \omega \rho \alpha \mu \circ v$ ). This phrase marks a crisis whenever it occurs, especially of his death $(7: 30 ; 8: 20 ; 12: 23 ; 13: 1 ; 17: 1)$. Here apparently it means the hour for public manifestation of the Messiahship, though a narrower sense would be for Christ's intervention about the failure of the wine. The Fourth Gospel is written on the plane of eternity (W. M. Ramsay) and that standpoint exists here in this first sign of the Messiah.

John 2:5
Unto the servants ( $\tau$ oıs $\delta$ ıккоvoıৎ). See on Mt 20:26 for this word (our "deacon," but not that sense here).

Whatsoever he saith unto you, do it (Ho $\operatorname{\alpha } \alpha \lambda \varepsilon \gamma \eta v \mu \nu \tau \sigma \circ \eta \sigma \alpha \tau \varepsilon$ ). Indefinite relative sentence (o $\tau \alpha v$ and present active subjunctive, general statement) with aorist active imperative of $\pi \sigma \varepsilon \omega \omega$ for instant execution. Mary took comfort in the "not yet" (ov $\pi \omega$ ) and recognized the right of Jesus as Messiah to independence of her, but evidently expected him to carry out her suggestion ultimately as he did. This mother knew her Son.

John 2:6
Waterpots ( $v \delta \rho \iota \alpha$ ). Old word from $v \delta \omega \rho$ (water) and used in papyri for pots or pans for holding money or bread as well as water. These stone ( $\lambda_{\imath} \theta \iota v \alpha$ as in 2Co 3:3) jars full of water were kept handy ( set there , $\kappa \varepsilon \mu \mu \varepsilon \alpha$, present middle participle of $\kappa \varepsilon \mu \mu \alpha$ ) at a feast for ceremonial cleansing of the hands ( $2 \mathrm{Ki} 3: 11$; Mr 7:3 ), "after the Jews' manner of purifying"
 $\kappa \alpha \theta \alpha \rho ı \zeta \omega)$ which fact also raised a controversy with disciples of John because of his baptizing (Joh 3:25 ).

Containing ( $\chi \omega \rho \circ v \sigma \alpha$ ). Present active participle feminine plural of $\chi \omega \rho \varepsilon \omega$, old verb from $\chi \omega \rho \circ \varsigma$, place, space, having space or room for.

Two or three firkins apiece ( $\alpha v \alpha \mu \varepsilon \tau \rho \eta \tau \alpha \varsigma \delta v o \eta \tau \rho \varepsilon ı \varsigma)$. The word $\mu \varepsilon \tau \rho \eta \tau \eta \varsigma$, from $\mu \varepsilon \tau \rho \varepsilon \omega$, to measure, simply means "measurer," an amphora for measuring liquids (in Demosthenes, Aristotle, Polybius), the Hebrew bath (2Ch 4:5 ), here only in N.T., about $81 / 2$ English gallons. Each vסpıa thus held about 20 gallons. This common distributive use of
$\alpha v \alpha$ occurs here only in this Gospel, but is in Re 4:8. In Joh 4:28 a much smaller vסpıa was used for carrying water.

John 2:7
Fill ( $\gamma \varepsilon \mu / \sigma \alpha \tau \varepsilon$ ). Effective first aorist active imperative of $\gamma \varepsilon \mu \iota \zeta \omega$, to fill full.
With water (vסatoc). Genitive case of material.
Up to the brim ( $\varepsilon \omega \varsigma \alpha v \omega$ ). "Up to the top." See $\varepsilon \omega \varsigma \kappa \alpha \tau \omega$ (Mt 27:51) for "down to the bottom." No room left in the waterpots now full of water.

John 2:8
Draw out now (Av$\tau \lambda \eta \sigma \alpha \tau \varepsilon v v v)$. First aorist active imperative of $\alpha v \tau \lambda \varepsilon \omega$, from o $\alpha v \tau \lambda o$, bilge water, or the hold where the bilge water settles (so in Homer). The verb occurs in Joh 4:7,15, for drawing water from the well, and Westcott so interprets it here, but needlessly so, since the servants seem bidden to draw from the large water-jars now full of water. Apparently the water was still water when it came out of the jars (verse 9), but was changed to wine before reaching the guests. The water in the jars remained water.

Unto the ruler of the feast ( $\tau \omega \alpha \rho \chi ı \rho \rho \kappa \lambda \iota \nu \omega)$. Dative case. The $\tau \rho ı \kappa \lambda \iota \nu o s$ was a room
 intendent of the dining-room who arranged the couches and tasted the food, not the toastmaster ( $\sigma \nu \mu \pi о \sigma ı \rho \chi \chi \eta \varsigma)$.

And they bare it (o $\delta \varepsilon \eta \nu \varepsilon \gamma \kappa \alpha v$ ). Second aorist active indicative of $\varphi \varepsilon \rho \omega$. Apparently not knowing at first that they bore wine.

John 2:9
Tasted ( $\varepsilon \gamma \varepsilon \cup \sigma \alpha \tau 0)$. First aorist middle indicative of $\gamma \varepsilon v o \mu \alpha$. As it was his function to do.

The water now become wine ( $\tau 0 v \delta \omega \rho$ oıvov $\gamma \varepsilon \gamma \varepsilon v \eta \mu \varepsilon v o v$ ). Accusative case, though the genitive also occurs with $\gamma \varepsilon v o \mu \alpha$. Perfect passive participle of $\gamma ו v o \mu \alpha$ and oıvov, predicative accusative. The tablemaster knew nothing of the miracle, "whence it was" ( $\pi \circ \theta \varepsilon v \varepsilon \sigma \tau \iota v$, indirect question retaining present indicative). The servants knew the source of the water, but not the power that made the wine.

Calleth the bridegroom ( $\varphi \omega \nu \varepsilon \tau \circ \nu v \nu \mu \varphi \vdash v$ ). As apparently responsible for the supply of the wine ( thou hast kept $\tau \varepsilon \tau \eta \rho \eta \kappa а \varsigma)$. See Mt 9:15 for $v v \mu \varphi \stackrel{\varsigma}{ }$. When men have drunk freely (o o $\alpha v \mu \varepsilon \theta v \sigma \theta \omega \sigma v$ ). Indefinite temporal clause with o $\tau \alpha \nu$ and first aorist passive subjunctive of $\mu \varepsilon \theta v \sigma \kappa \omega$. The verb does not mean that these guests are now drunk, but that this is a common custom to put "the worse" ( $\tau 0 v \varepsilon \lambda \alpha \sigma \sigma \omega$, the less, the inferior) wine last. It is real wine that is meant by orvoc here. Unlike the Baptist Jesus mingled in the social life of the time, was even abused for it (Mt 11:19; Lu 7:34). But this fact does not mean that today Jesus would approve the modern liquor trade with its damnable influences. The law of love expounded by Paul in 1Co 8-10 and in Ro 14,15 teaches modern Christians to be willing gladly to give up what they see causes so many to stumble into sin.

John 2:11
This beginning of his signs did Jesus ( $\tau \alpha v \tau \eta \nu \varepsilon \pi o \iota \eta \sigma \varepsilon \nu \alpha \rho \chi \eta \nu \tau \omega \nu \sigma \eta \mu \varepsilon \iota \omega \nu$ o I $\eta \sigma o v \varsigma$ ). Rather, "this Jesus did as a beginning of his signs," for there is no article between $\tau \alpha v \tau \eta v$ and $\alpha \rho \chi \eta \nu$. "We have now passed from the 'witness' of the Baptist to the 'witness' of the works of Jesus" (Bernard). This is John's favourite word "signs" rather than wonders ( $\tau \varepsilon \rho \alpha \tau \alpha$ ) or powers ( $\delta v \nu \alpha \mu \varepsilon ı \varsigma)$ for the works ( $\varepsilon \rho \gamma \alpha$ ) of Jesus. $\Sigma \eta \mu \varepsilon \iota o v$ is an old word from $\sigma \eta \mu \alpha ı \nu \omega$, to give a sign ( $12: 33$ ). He selects eight in his Gospel by which to prove the deity of Christ ( $20: 30$ ) of which this is the first.

Manifested his glory ( $\varepsilon \varphi \alpha \nu \varepsilon \rho \omega \sigma \varepsilon \nu \tau \eta \nu \delta o \xi \alpha \nu \alpha v \tau o v$ ). First aorist (effective) active indicative of $\varphi a v \varepsilon \rho \circ \omega$, that glory of which John spoke in 1:14.

Believed on him ( $\varepsilon \pi \iota \sigma \tau \varepsilon v \sigma \alpha \nu \varepsilon \iota \varsigma \alpha v \tau o v)$. First aorist active indicative of $\pi \iota \sigma \tau \varepsilon v \omega$, to believe, to put trust in, so common in John. These six disciples (learners) had already believed in Jesus as the Messiah ( $1: 35-51$ ). Now their faith was greatly strengthened. So it will be all through this Gospel. Jesus will increasingly reveal himself while the disciples will grow in knowledge and trust and the Jews will become increasingly hostile till the culmination.

John 2:12
He went down to Capernaum ( $\kappa \alpha \tau \varepsilon \beta \eta \varepsilon \iota \varsigma К \alpha \varphi \alpha \rho v \alpha о \cup \mu \alpha \nu \tau о \varsigma)$. Second aorist active indicative of $\kappa \alpha \tau \alpha \beta \alpha \iota v \omega$. Cana was on higher ground. This brief stay ( not many days, ov $\pi о \lambda \lambda \alpha \varsigma \eta \mu \varepsilon \rho a \varsigma)$ in this important city (Tell Hum) on the north shore of Galilee was with Christ's mother, brothers (apparently friendly at first) and the six disciples, all in the fresh glow of the glory manifested at Cana. Surely Mary's heart was full.

John 2:13
The passover of the Jews ( $\tau 0 \pi \alpha \sigma \chi \alpha \tau \omega v$ Iov $\alpha \alpha \iota \omega \nu$ ). The Synoptics do not give "of the Jews," but John is writing after the destruction of the temple and for Gentile readers. John mentions the passovers in Christ's ministry outside of the one when Christ was crucified, this one and one in 6:4. There may be another ( $5: 1$ ), but we do not know. But for John we should not know that Christ's ministry was much over a year in length.

John 2:14
Those that sold ( $\tau 0 \cup \varsigma \pi \omega \lambda o v v \tau \alpha \varsigma)$. Present active articular participle of $\pi \omega \lambda \varepsilon \omega$, to sell. They were in the Court of the Gentiles within the temple precinct ( $\varepsilon v \tau \omega \tau \varepsilon \rho \omega$ ), but not in the $v a o s$ or temple proper. The sacrifices required animals (oxen, $\beta \circ \alpha \varsigma$, sheep, $\pi \rho \circ \beta \alpha \tau \alpha$, doves, $\pi \varepsilon \rho \iota \sigma \tau \varepsilon \rho \alpha \varsigma)$ and "changers of money" (кєр $\mu \alpha \tau \sigma \tau \alpha \varsigma$, from $\kappa \varepsilon \rho \mu \alpha \tau \iota \zeta \omega$, to cut into small pieces, to change money, only here in N.T., late and rare). Probably their very presence in his Father's house angered Jesus. The Synoptics (Mr 11:15-17; Mt 21:12f.; Lu 10:45f. ) record a similar incident the day after the Triumphal Entry. If there was only one, it would seem more natural at the close. But why could it not occur at the beginning also? Here it is an obvious protest by Christ at the beginning of his ministry as in the Synoptics it is an indignant outcry against the desecration. The cessation was only temporary in both instances.

John 2：15
A scourge of cords（ $\varphi \rho \alpha \gamma \varepsilon \lambda \lambda \iota v \varepsilon \kappa \sigma \chi \circ \iota \nu \iota \omega \nu$ ）．The Latin flagellum．In papyri，here only in N．T．and note Latin $l$ becomes $\rho$ in Koine．$\Sigma \chi o \iota \nu \omega \nu$ is a diminutive of $\sigma \chi o \iota v o \varsigma ~(a ~ r u s h), ~$ old word for rope，in N．T．only here and Ac 27：32 ．

Cast out（ $\varepsilon \xi \varepsilon \beta \alpha \lambda \varepsilon \nu)$ ．Second aorist active indicative of $\varepsilon \kappa \beta \alpha \lambda \lambda \omega$ ．It is not said that Jesus smote the sheep and oxen（note $\tau \varepsilon \kappa \alpha$ ，both and），for a flourish of the scourge would answer．

He poured out（ $\varepsilon \xi \varepsilon \chi \varepsilon \varepsilon v$ ）．Second aorist active indicative of $\varepsilon \kappa \chi \varepsilon \omega$ ，to pour out．
The changers＇money（ $\tau \omega \nu \kappa о \lambda \lambda \nu \beta \iota \sigma \tau \omega \nu \tau \alpha \kappa \varepsilon \rho \mu \alpha \tau \alpha$ ）．＂The small pieces of money （ $\kappa \varepsilon \rho \mu \alpha \tau \alpha$ ，cut in pieces，change）of the bankers（ $\kappa о \lambda \nu \beta \iota \sigma \tau \eta \varsigma$ from ко $\lambda \lambda \nu \beta \circ \varsigma$ ，clipped，late word see on Mt 21：12 ）．＂Perhaps he took up the boxes and emptied the money．

Overthrew their tables（ $\tau \alpha \varsigma \tau \rho \alpha \pi \varepsilon \zeta \alpha \varsigma \alpha \nu \varepsilon \tau \rho \varepsilon \psi \varepsilon v$ ）．First aorist active indicative of $\alpha \nu \alpha \tau \rho \varepsilon \pi \omega$ ，to turn up，though some MSS．have $\alpha v \varepsilon \sigma \tau \rho \varepsilon \psi \varepsilon \nu$ from $\alpha \nu \alpha \sigma \tau \rho \varepsilon \varphi \omega$ ，also to turn up．

John 2：16
Take these things hence（A $\rho \alpha \tau \varepsilon \tau \alpha v \tau \alpha \varepsilon v \tau \varepsilon v \theta \varepsilon v)$ ．First aorist active imperative of $\alpha \iota \rho \omega$ ． Probably the doves were in baskets or cages and so had to be taken out by the traders．

Make not my Father＇s house a house of merchandise（ $\mu \eta \pi \circ \varepsilon \varepsilon \tau \varepsilon \tau \circ v$ оєкоv $\tau \circ v \pi \alpha \tau \rho \circ \varsigma$ $\mu \circ v$ оוко $v \varepsilon \mu \pi о \rho เ o v)$ ．＂Stop making，＂it means，$\mu \eta$ and the present active imperative．They had made it a market－house（ $\varepsilon \mu \pi \sigma \rho \iota o v$, here only in N．T．，old word from $\varepsilon \mu \pi \sigma \rho \circ \varsigma$ ，merchant， one who goes on a journey for traffic，a drummer）．Note the clear－cut Messianic claim here （My Father as in Lu 2：49）．Jerome says：＂A certain fiery and starry light shone from his eyes and the majesty of Godhead gleamed in His face．＂

John 2：17
Remembered（ $\varepsilon \mu \nu \eta \sigma \theta \eta \sigma \alpha \nu)$ ．First aorist passive indicative of $\mu \mu \nu \eta \sigma \kappa \omega$ ，to remind， ＂were reminded．＂Westcott notes the double effect of this act as is true of Christ＇s words and deeds all through John＇s Gospel．The disciples are helped，the traders are angered．

That it is written（ $o \tau \gamma \varepsilon \gamma \rho \alpha \mu \mu \varepsilon v o v \varepsilon \sigma \tau \iota v$ ）．Periphrastic perfect passive indicative of $\gamma \rho \alpha \varphi \omega$ retained in indirect discourse（assertion）．

The zeal of thine house（о そך入oऽ 兀ov oıкov oov）．Objective genitive．＂The zeal for thy house．＂

Shall eat me up（ $\kappa \alpha \tau \alpha \varphi \alpha \gamma \varepsilon \tau \alpha \mu \varepsilon)$ ．Future middle indicative of $\kappa \alpha \tau \varepsilon \sigma \theta \iota \omega$ ，defective verb， to eat down（＂up＂we say），perfective use of кат $\alpha$－．This future $\varphi \alpha \gamma о \mu \alpha$ is from the second aorist $\varepsilon \varphi a \gamma \circ v$ ．It is a quotation from Ps 69：9，frequently quoted in the N．T．

John 2：18
What sign shewest thou unto us？（T $\sigma \eta \mu \varepsilon \iota v v \delta \varepsilon ı \kappa v v \varepsilon ı \varsigma ~ \eta \mu v$ ；）．They may have heard of the＂sign＂at Cana or not，but they have rallied a bit on the outside of the temple area and demand proof for his Messianic assumption of authority over the temple worship．These
traders had paid the Sadducees and Pharisees in the Sanhedrin for the concession as traffickers which they enjoyed. They were within their technical rights in this question.

John 2:19
Destroy this temple ( $\lambda v \sigma \alpha \tau \varepsilon$ $\tau 0 v v \alpha o v \tau o v \tau o v$ ). First aorist active imperative of $\lambda v \omega$, to loosen or destroy. It is the permissive imperative, not a command to do it. Note also vaoc, not $\varepsilon \rho \rho o v$, the sanctuary, symbol of God's vaoc, in our hearts (1Co 3:16f. ). There is much confusion about this language since Jesus added: "And in three days I will raise it up" ( $\kappa \alpha$ $\varepsilon \nu \tau \rho \iota \sigma \iota \downarrow \eta \varepsilon \rho \alpha \iota \varsigma \varepsilon \gamma \varepsilon \rho \omega \alpha \cup \tau о v)$. Those who heard Jesus, including the disciples till after the resurrection (verse 22), understood the reference to be to Herod's temple. Certainly that is the obvious way to take it. But Jesus often spoke in parables and even in enigmas. He may have spoken of the literal temple as a parable for his own body which of course they would not understand, least of all the resurrection in three days.

John 2:20
Forty and six years was this temple in building (Тєббєракоข $\alpha \kappa \alpha \varepsilon \xi \varepsilon \tau \varepsilon \sigma \iota \nu$ оєкобо $\mu \eta \eta \eta$ o vaoc ovtoc). "Within forty and six years (associative instrumental case) was built (first aorist passive indicative, constative or summary use of the aorist, of o七ко $\delta \circ \mu \varepsilon \omega$, without augment) this temple." As a matter of fact, it was not yet finished, so distrustful had the Jews been of Herod.

And wilt thou? ( $\kappa \alpha \sigma v$;). An evident sneer in the use of $\sigma v$ (thou, an unknown upstart from Galilee, of the peasant class, not one of the Sanhedrin, not one of the ecclesiastics or even architects).

John 2:21
But he spake of the temple of his body ( $\varepsilon \kappa \varepsilon เ \nu \circ \varsigma \delta \varepsilon \varepsilon \lambda \varepsilon \gamma \varepsilon v \pi \varepsilon \rho \tau 0 v$ vaov $\tau 0 v \sigma \omega \mu \alpha \tau \circ$, avtov). Emphatic he ( $\varepsilon \kappa \varepsilon \iota v o \varsigma) ~ a n d ~ i m p e r f e c t ~ t e n s e ~(h e ~ h a d ~ b e e n ~ s p e a k i n g) . ~ T h i s ~ i s ~ J o h n ' s ~$ view as he looks back at it, not what he understood when Jesus spoke the words.

John 2:22
When therefore he was raised from the dead (Нотє ouv $\eta \gamma \varepsilon \rho \theta \eta \varepsilon \kappa \nu \varepsilon \kappa \rho \omega \nu$ ). First aorist passive indicative of $\varepsilon \gamma \varepsilon \iota \rho \omega$, to raise up. And not at first then, but only slowly after the disciples themselves were convinced. Then "they believed the Scripture" ( $\varepsilon \pi \iota \sigma \tau \varepsilon v \sigma \alpha \nu \tau \eta$ $\gamma \rho \alpha \varphi \eta$ ). They "believed" again. Dative case $\gamma \rho \alpha \varphi \eta$. Probably Ps 16:10 is meant (Ac 2:31; 13:35).

And the word which Jesus had said ( $\kappa \alpha \tau \omega \lambda о \gamma \omega$ ov $\varepsilon \iota \pi \varepsilon \nu$ ). Dative case $\lambda о \gamma \omega$ also, but $o v$ (relative) is not attracted to the dative. Clearly then John interprets Jesus to have a parabolic reference to his death and resurrection by his language in $2: 19$. There are those who bluntly say that John was mistaken. I prefer to say that these scholars are mistaken. Even Bernard considers it "hardly possible" that John interprets Jesus rightly in 1:21. "Had he meant that, He would have spoken with less ambiguity." But how do we know that Jesus wished to be understood clearly at this time? Certainly no one understood Christ when he
spoke the words. The language of Jesus is recalled and perverted at his trial as "I will destroy" (Mr 14:58), "I can destroy" (Mt 26:61), neither of which he said.

John 2:23
In Jerusalem ( $\varepsilon v$ тоья Iع $\rho о \sigma о \lambda \nu \mu о \iota$ ). The form I $\varepsilon \rho о \sigma о \lambda \nu \mu \alpha$ as in 2:13 always in this Gospel and in Mark, and usually in Matthew, though I $\varepsilon \rho \circ 0 \sigma \alpha \lambda \eta \mu$ only in Revelation, and both forms by Luke and Paul.

During the feast ( $\varepsilon v \tau \eta \varepsilon o \rho \tau \eta$ ). The feast of unleavened bread followed for seven days right after the passover (one day strictly), though to $\pi \alpha \sigma \chi \alpha$ is used either for the passover meal or for the whole eight days.

Believed on his name ( $\varepsilon \pi \iota \sigma \tau \varepsilon \cup \sigma a v ~ \varepsilon ء \varsigma ~ \tau o ~ o v o \mu \alpha ~ \alpha u \tau o u) . ~ S e e ~ o n ~ 1: 12 ~ f o r ~ t h i s ~ p h r a s e . ~$ Only one has to watch for the real import of $\pi\llcorner\tau \tau v \omega$.

Beholding his signs ( $\theta \varepsilon \omega \rho \circ \cup v \tau \varepsilon \varsigma$ av $\tau \circ \cup \tau \alpha ~ \sigma \eta \mu \varepsilon ı \alpha$ ). Present active participle (causal use) of $\theta \varepsilon \omega \rho \varepsilon \omega$.

Which he did ( $\alpha$ ع $\pi 0 เ \varepsilon$ ). "Which he was doing" (imperfect tense). He did his first sign in Cana, but now he was doing many in Jerusalem. Already Jesus had become the cynosure of all eyes in Jerusalem at this first visit in his ministry.

John 2:24
 "But Jesus himself kept on refusing (negative imperfect) to trust himself to them." The double use of $\pi \iota \sigma \tau \varepsilon v \omega$ here is shown by Ac 8:13 where Simon Magus "believed" ( $\varepsilon \pi \iota \sigma \tau \varepsilon v \sigma \varepsilon v$ ) and was baptized, but was unsaved. He merely believed that he wanted what Philip had.

For that he knew all men ( $\delta \iota \alpha$ to avtov $\gamma เ v \omega \sigma \kappa \varepsilon เ v \pi \alpha \nu \tau \alpha \varsigma)$. Causal use of $\delta ı \alpha$ and the accusative case of the articular infinitive to $\gamma \iota \nu \omega \sigma \kappa \varepsilon เ v$ (because of the knowing) with the object of the infinitive ( $\pi \alpha \nu \tau \alpha \varsigma$, all men) and the accusative of general reference (av $\tau \circ v$, as to himself).

John 2:25
And because he needed not ( $\kappa \alpha$ от $\chi \rho \varepsilon ı \alpha v \varepsilon \chi \chi \varepsilon v$ ). Imperfect active, "and because he did not have need."

That any one should bear witness concerning man (ıva $\tau \varsigma \varsigma \mu \rho \tau \cup \rho \eta \sigma \eta \pi \varepsilon \rho$ тov $\alpha v \theta \rho \omega \pi \sigma v)$. Non-final use of $\operatorname{v\alpha } \alpha$ with first aorist active subjunctive of $\mu \alpha \rho \tau v \rho \varepsilon \omega$ and the generic article ( $\pi \varepsilon \rho$ tov $\alpha v \theta \rho \omega \pi \sigma v$ ) concerning mankind as in the next clause also.

For he himself knew (avtos $\gamma \alpha \rho \varepsilon \gamma \iota v \omega \sigma \kappa \varepsilon v$ ). Imperfect active, "for he himself kept on knowing" as he did from the start.

What was in man ( $\tau \eta v \varepsilon \nu \tau \omega \alpha v \theta \rho \omega \pi \omega$ ). Indirect question with $\varepsilon \sigma \tau \iota v$ of the direct changed to the imperfect $\eta \nu$, a rare idiom in the Koine. This supernatural knowledge of man is a mark of deity. Some men of genius can read men better than others, but not in the sense meant here.

## John 3

John 3:1
Now ( $\delta \varepsilon$ ). So often in John $\delta \varepsilon$ is explanatory and transitional, not adversative. Nicodemus is an instance of Christ's knowledge of men (2:25) and of one to whom he did trust himself unlike those in 2:24. As a Pharisee "he belonged to that party which with all its bigotry contained a salt of true patriotism and could rear such cultured and high-toned men as Gamaliel and Paul" (Marcus Dods).

Named Nicodemus (Nıко $\delta \eta \mu$ ос оvo $\mu$ ). Same construction as in 1:6, "Nicodemus name to him." So Re 6:8 . It is a Greek name and occurs in Josephus (Ant. XIV. iii. 2) as the name of an ambassador from Aristobulus to Pompey. Only in John in N.T. (here, 7:50; 19:39 ). He was a Pharisee, a member of the Sanhedrin, and wealthy. There is no evidence that he was the young ruler of $\mathrm{Lu} 18: 18$ because of $\alpha \rho \chi \omega \nu$ (ruler) here.

John 3:2
The same (outoc). "This one."
By night (vuктos). Genitive of time. That he came at all is remarkable, not because there was any danger as was true at a later period, but because of his own prominence. He wished to avoid comment by other members of the Sanhedrin and others. Jesus had already provoked the opposition of the ecclesiastics by his assumption of Messianic authority over the temple. There is no ground for assigning this incident to a later period, for it suits perfectly here. Jesus was already in the public eye ( $2: 23$ ) and the interest of Nicodemus was real and yet he wished to be cautious.

Rabbi (Paßßع). See on 1:38. Technically Jesus was not an acknowledged Rabbi of the schools, but Nicodemus does recognize him as such and calls him "My Master" just as Andrew and John did ( $1: 38$ ). It was a long step for Nicodemus as a Pharisee to take, for the Pharisees had closely scrutinized the credentials of the Baptist in 1:19-24 (Milligan and Moulton's Comm.).

We know ( $o \delta \delta \alpha \mu \varepsilon v$ ). Second perfect indicative first person plural. He seems to speak for others of his class as the blind man does in 9:31. Westcott thinks that Nicodemus has been influenced partly by the report of the commission sent to the Baptist ( 1:19-27).

Thou art a teacher come from God ( $\alpha \pi о$ $\theta \varepsilon o v \varepsilon \lambda \eta \lambda \cup \theta \alpha \varsigma \delta \iota \delta a \sigma \kappa \alpha \lambda о \varsigma)$. "Thou hast come from God as a teacher." Second perfect active indicative of $\varepsilon \rho \chi \circ \mu \alpha$ and predicative nominative $\delta \iota \delta a \sigma \kappa \alpha \lambda o c$. This is the explanation of Nicodemus for coming to Jesus, obscure Galilean peasant as he seemed, evidence that satisfied one of the leaders in Pharisaism.

Can do ( $\delta u v a t \alpha \pi o เ \varepsilon เ v)$. "Can go on doing" (present active infinitive of $\pi \circ เ \varepsilon \omega$ and so linear).

These signs that thou doest ( $\tau \alpha \cup \tau \alpha \tau \alpha \sigma \eta \mu \varepsilon \alpha \alpha \sigma \sigma \pi o เ \varepsilon \iota \varsigma)$. Those mentioned in 2:23 that convinced so many in the crowd and that now appeal to the scholar. Note $\sigma v$ (thou) as
quite out of the ordinary. The scorn of Jesus by the rulers held many back to the end (Joh 12:42 ), but Nicodemus dares to feel his way.

Except God be with him ( $\varepsilon \alpha v \mu \eta \eta$ o $\theta \varepsilon o \varsigma \mu \varepsilon \tau^{\prime} \alpha v \tau o v$ ). Condition of the third class, presented as a probability, not as a definite fact. He wanted to know more of the teaching accredited thus by God. Jesus went about doing good because God was with him, Peter says (Ac 10:38).

John 3:3
Except a man be born anew ( $\varepsilon \alpha v \mu \eta \tau \iota \varsigma \gamma \varepsilon v v \eta \theta \eta \alpha v \omega \theta \varepsilon v)$. Another condition of the third class, undetermined but with prospect of determination. First aorist passive subjunctive of $\gamma \varepsilon v v a \omega$. A $\omega \omega \theta \varepsilon v$. Originally "from above" (Mr 15:38) , then "from heaven" (Joh 3:31), then "from the first" ( $\operatorname{Lu} 1: 3$ ), and then "again" ( $\pi \alpha \lambda \iota \nu \alpha v \omega \theta \varepsilon v, G a 4: 9$ ). Which is the meaning here? The puzzle of Nicodemus shows ( $\delta \varepsilon v \tau \varepsilon \rho o v$, verse 4) that he took it as "again," a second birth from the womb. The Vulgate translates it by renatus fuerit denuo. But the misapprehension of Nicodemus does not prove the meaning of Jesus. In the other passages in John ( $3: 31 ; 19: 11,23$ ) the meaning is "from above" ( $\delta \varepsilon \sigma \cup \pi \varepsilon \rho$ ) and usually so in the Synoptics. It is a second birth, to be sure, regeneration, but a birth from above by the Spirit.

He cannot see the kingdom of God (ou $\delta u v a \tau \alpha ~ i \delta \varepsilon เ v ~ \tau \eta v ~ \beta a \sigma i \lambda \varepsilon ı \alpha \nu ~ \tau o v ~ \theta \varepsilon o v) . ~ T o ~$ participate in it as in Lu 9:27. For this use of $\mathrm{\delta} \delta \iota \nu$ (second aorist active infinitive of opaw) see Joh 8:51; Re 18:7.

John 3:4
Being old ( $\gamma \varepsilon \rho \omega \nu \omega \nu$ ). Nicodemus was probably familiar with the notion of re-birth for proselytes to Judaism for the Gentiles, but not with the idea that a Jew had to be reborn. But "this stupid misunderstanding" (Bernard) of the meaning of Jesus is precisely what John represents Nicodemus as making. How "old" Nicodemus was we do not know, but surely too old to be the young ruler of Lu 18:18 as Bacon holds. The blunder of Nicodemus is emphasized by the second question with the $\mu \eta$ expecting the negative answer. The use of סcutzpov adds to the grotesqueness of his blunder. The learned Pharisee is as jejune in spiritual insight as the veriest tyro. This is not an unheard of phenomenon.

John 3:5
Of water and the Spirit ( $\varepsilon \xi$ v $\delta \alpha \tau о \varsigma \kappa \alpha \pi v \varepsilon v \mu \alpha \tau о \varsigma)$. Nicodemus had failed utterly to grasp the idea of the spiritual birth as essential to entrance into the Kingdom of God. He knew only Jews as members of that kingdom, the political kingdom of Pharisaic hope which was to make all the world Jewish (Pharisaic) under the King Messiah. Why does Jesus add $\varepsilon \xi \cup \delta a \tau o c h e r e$ ? In verse 3 we have "av $\omega \theta \varepsilon v$ " (from above) which is repeated in verse 7 , while in verse 8 we have only $\varepsilon \kappa$ tov $\pi v \varepsilon \nu \mu a \tau o c$ (of the Spirit) in the best manuscripts. Many theories exist. One view makes baptism, referred to by $\varepsilon \xi$ v $\delta \alpha \tau 0 \varsigma$ (coming up out of water), essential to the birth of the Spirit, as the means of obtaining the new birth of the Spirit. If so, why is water mentioned only once in the three demands of Jesus (3,5,7) ? Calvin makes
water and Spirit refer to the one act (the cleansing work of the Spirit). Some insist on the language in verse 6 as meaning the birth of the flesh coming in a sac of water in contrast to the birth of the Spirit. One wonders after all what was the precise purpose of Jesus with Nicodemus, the Pharisaic ceremonialist, who had failed to grasp the idea of spiritual birth which is a commonplace to us. By using water (the symbol before the thing signified) first and adding Spirit, he may have hoped to turn the mind of Nicodemus away from mere physical birth and, by pointing to the baptism of John on confession of sin which the Pharisees had rejected, to turn his attention to the birth from above by the Spirit. That is to say the mention of "water" here may have been for the purpose of helping Nicodemus without laying down a fundamental principle of salvation as being by means of baptism. Bernard holds that the words vঠatoৎ ка (water and) do not belong to the words of Jesus, but "are a gloss, added to bring the saying of Jesus into harmony with the belief and practice of a later generation." Here Jesus uses $\varepsilon \iota \sigma \varepsilon \lambda \theta \varepsilon \iota v$ (enter) instead of $\iota \varepsilon \varepsilon \imath$ (see) of verse 3, but with the same essential idea (participation in the kingdom).

John 3:6
That which is born ( $\tau 0 \gamma \varepsilon \gamma \varepsilon \nu \nu \eta \mu \varepsilon v o v$ ). Perfect passive articular participle. The sharp contrast between flesh $(\sigma \alpha \rho \xi)$ and Spirit ( $\pi \nu \varepsilon \nu \mu \alpha)$, drawn already in $1: 13$, serves to remind Nicodemus of the crudity of his question in $3: 4$ about a second physical birth.

John 3:7
Marvel not ( $\mu \eta \theta \alpha v \mu \alpha \sigma \eta \iota \varsigma)$. "Do not begin to wonder" (ingressive first aorist active subjunctive with $\mu \eta$ ), as clearly Nicodemus had done. In John the word $\theta \alpha v \mu \alpha \zeta \omega$ usually means "unintelligent wonder" (Bernard).

Ye must be born anew ( $\delta \varepsilon v \mu \alpha \varsigma \gamma \varepsilon \nu \nu \eta \theta \eta \nu \alpha \alpha \nu \omega \theta \varepsilon v$ ). Jesus repeats the point in verse 3 ( $\delta \varepsilon$ and the infinitive instead of $\varepsilon \alpha \nu \mu \eta$ and the subjunctive) with $\alpha v \omega \theta \varepsilon \nu$ (from above) only and not $\varepsilon \xi \cup \delta \alpha \tau o \varsigma$.

John 3:8
The wind ( $\tau 0 \pi \nu \varepsilon v \mu \alpha$ ). In Greek $\pi \nu \varepsilon v \mu \alpha$ means either wind or spirit as spiritus does in Latin (so also in Hebrew and Syriac). Wycliff follows the Latin and keeps spirit here and Marcus Dods argues for it. The word $\pi v \varepsilon v \mu a$ occurs 370 times in the N.T. and never means wind elsewhere except in a quotation from the O.T. (Heb 1:7 from Ps 104:4), though common in the LXX. On the other hand $\pi \nu \varepsilon \omega$ (bloweth, $\pi \nu \varepsilon$ ) occurs five times elsewhere in the N.T. and always of the wind (like Joh 6:18 ). So $\varphi \omega \vee \eta$ can be either sound (as of wind) or voice (as of the Spirit). In simple truth either sense of $\pi \nu \varepsilon v \mu \alpha$ can be taken here as one wills. Tholuck thinks that the night-wind swept through the narrow street as Jesus spoke. In either case the etymology of $\pi \nu \varepsilon v \mu \alpha$ is "wind" from $\pi \nu \varepsilon \omega$, to blow. The Spirit is the use of $\pi v \varepsilon v \mu a$ as metaphor. Certainly the conclusion "of the Spirit" is a direct reference to the Holy Spirit who works his own way beyond our comprehension even as men even yet do not know the law of the wind.

John 3:9
How? ( $\Pi \omega \sigma ;$ ) Nicodemus is not helped either by the use of $v \delta \omega \rho$ or $\pi v \varepsilon v \mu \alpha$ to understand $\delta \varepsilon \gamma \varepsilon \nu \nu \eta \theta \eta v \alpha \alpha \nu \omega \theta \varepsilon v$ (the necessity of the birth from above or regeneration). He falls back into his "stupid misunderstanding." There are none so dull as those who will not see. Preoccupation prevents insight. Literally one must often empty his mind to receive new truth.

John 3:10
The teacher of Israel (o $\delta \iota \delta \sigma \kappa \alpha \lambda$ оऽ $\operatorname{\tau ov} \operatorname{I\sigma } \rho a \eta \lambda$ ). The well-known or the authorized (the accepted) teacher of the Israel of God. Note both articles.

And understandest not these things? ( $\kappa \alpha \tau \alpha \cup \tau \alpha$ ov $\gamma \iota \nu \omega \sigma \kappa \varepsilon \iota \sigma ;$ ). After being told by Jesus and after so propitious a start. His Pharisaic theology had made him almost proof against spiritual apprehension. It was outside of his groove (rote, rut, rot, the three terrible r's of mere traditionalism).

John 3:11
We speak that we do know (o oı $\delta \alpha \mu \varepsilon v \lambda \alpha \lambda o v \mu \varepsilon v$ ). Jesus simply claims knowledge of what he has tried to make plain to the famous Rabbi without success. John uses $\lambda \alpha \lambda \varepsilon \omega$ some 60 times, half of them by Jesus, very little distinction existing between the use of $\lambda \alpha \lambda \varepsilon \omega$ and $\lambda \varepsilon \gamma \omega$ in John. Originally $\lambda \alpha \lambda \varepsilon \omega$ referred to the chatter of birds. Note John's frequent use of $\alpha \mu \eta \nu \alpha \mu \eta \nu$ and $\lambda \varepsilon \gamma \omega$ (double emphasis).

And bear witness of that we have seen ( $\kappa \alpha о \varepsilon \omega \rho \alpha \kappa \alpha \mu \varepsilon \nu \mu \alpha \rho \tau v \rho о \nu \mu \varepsilon v$ ). The same use of neuter singular relative o as before. Perfect active indicative of o $\rho \alpha \omega$. He is not a dreamer, guesser, or speculator. He is bearing witness from personal knowledge, strange as this may seem to Nicodemus.

And ye receive not our witness ( $\kappa \alpha \tau \eta \nu \mu \alpha \rho \tau \nu \rho \iota \alpha \nu \eta \mu \omega \nu$ ov $\lambda \alpha \mu \beta \alpha \nu \varepsilon \tau \varepsilon$ ). This is the tragedy of the matter as John has shown $(1: 11,26)$ and as will continue to be true even today. Jesus probably associates here with himself ("we") those who have personal experience of grace and so are qualified as witnesses. Note the plural in 1Jo 1:1f. Bernard thinks that John has here read into the words of Jesus the convictions of a later age, a serious charge to make.

John 3:12
If I told ( $\varepsilon$ عıлоv). Condition of the first class, assumed to be true.
Earthly things ( $\tau \alpha \varepsilon \pi \iota \gamma \varepsilon \iota \alpha$ ). Things upon the earth like $\tau \alpha \varepsilon \pi \tau \eta \varsigma \gamma \eta \varsigma(\operatorname{Col} 3: 2$ ), not things of an earthly nature or worldly or sinful. The work of the kingdom of God including the new birth which Nicodemus did not understand belongs to $\tau \alpha \varepsilon \pi \iota \gamma \varepsilon \iota a$.

If I tell you heavenly things ( $\varepsilon \alpha \vee \varepsilon \iota \pi \omega v \mu \iota \tau \tau \alpha \varepsilon \pi \circ \cup \rho \alpha \nu \iota \alpha)$. Condition of the third class, undetermined. What will Nicodemus do in that case? By $\tau \alpha \varepsilon \pi \sigma \nu \rho \alpha, \alpha$ Jesus means the things that take place in heaven like the deep secrets of the purpose of God in the matter of redemption such as the necessity of the lifting up of Christ as shown in verse 14 . Both Godet and Westcott note that the two types of teaching here pointed out by Jesus (the earthly, the
heavenly) correspond in general to the difference between the Synoptics (the earthly) and the Fourth Gospel (the heavenly), a difference noted here in the Fourth Gospel as shown by Jesus himself. Hence the one should not be pitted against the other. There are specimens of the heavenly in the Synoptics as in Mt 11:25ff.; Lu 10:18f. .

John 3:13
But he that descended out of heaven ( $\varepsilon \mu \eta$ о вк тov ov pavov катаßа¢). The Incarnation of the Pre-existent Son of God who was in heaven before he came down and so knows what he is telling about "the heavenly things." There is no allusion to the Ascension which came later. This high conception of Christ runs all through the Gospel and is often in Christ's own words as here.

Which is in heaven ( $o \omega v \varepsilon v \tau \omega \operatorname{ov} \rho \alpha v \omega$ ). This phrase is added by some manuscripts, not by Aleph B L W 33, and, if genuine, would merely emphasize the timeless existence of God's Son who is in heaven even while on earth. Probably a gloss. But "the Son of man" is genuine. He is the one who has come down out of heaven.

John 3:14
Moses lifted up the serpent ( $\mathrm{M} \omega v \sigma \eta \varsigma v \psi \omega \sigma \varepsilon v$ tov o $\varphi \stackrel{v}{ }$ ). Reference to Nu 21:7ff. where Moses set the brazen serpent upon the standard that those who believed might look and live. Jesus draws a vivid parallel between the act of Moses and the Cross on which he himself (the Son of man) "must" ( $\delta \varepsilon$, one of the heavenly things) "be lifted up" ( $v \psi \omega \theta \eta v a$, first aorist passive infinitive of $v \psi o \omega$, a word not used about the brazen serpent). In John $v \psi o \omega$ always refers to the Cross ( $8: 28 ; 12: 32,34$ ), though to the Ascension in Acts (Ac 2:33; 5:31 ). Jesus is complimenting the standing and intelligence of Nicodemus as "the teacher of Israel" by telling him this great truth and fact that lies at the basis of the work of the kingdom of God (the atoning death of Christ on the Cross).

John 3:15
That whosoever believeth may in him have eternal life (ıva $\pi \alpha \varsigma ~ o ~ \pi เ \sigma \tau \varepsilon v \omega v ~ \varepsilon v ~ a v \tau \omega$ $\varepsilon \chi \eta \zeta \omega \eta \nu \alpha \iota \omega v \iota v \nu)$. Final use of $\iota v \alpha$ with present active subjunctive of $\varepsilon \chi \omega$, that he may keep on having eternal life (a frequent phrase in John, always in John al $\omega v$ voc occurs with $\zeta \omega \eta$, 16 times in the Gospel, 6 in 1John, ageless or endless life, beginning now and lasting forever). It is more than endless, for it is sharing in the life of God in Christ (5:26; 17:3; 1Jo 5:12). So here $\varepsilon v \alpha \cup \tau \omega$ (in him) is taken with $\varepsilon \chi \eta$ rather than with $\pi \iota \sigma \tau \varepsilon v \omega v$. The interview with Nicodemus apparently closes with verse 15 . In verses $16-21$ we have past tenses constantly as is natural for the reflection of John, but unnatural for Jesus speaking. There are phrases like the Prologue (verse 19; 1:9-11). "Only begotten" does not occur elsewhere in the words of Jesus, but is in 1:14,18; 1Jo 4:9. John often puts in explanatory comments (1:16-18; 12:37-41).

John 3:16

For so (out $\omega \varsigma \gamma \alpha \rho$ ). This use of $\gamma \alpha \rho$ is quite in John's style in introducing his comments (2:25; 4:8; 5:13 , etc.). This "Little Gospel" as it is often called, this "comfortable word" (the Anglican Liturgy), while not a quotation from Jesus is a just and marvellous interpretation of the mission and message of our Lord. In verses 16-21 John recapitulates in summary fashion the teaching of Jesus to Nicodemus.

Loved ( $\eta \gamma \alpha \pi \eta \sigma \varepsilon v$ ). First aorist active indicative of $\alpha \gamma \alpha \pi \alpha \omega$, the noble word so common in the Gospels for the highest form of love, used here as often in John (14:23; 17:23; 1Jo 3:1; 4:10) of God's love for man (cf. 2Th 2:16; Ro 5:8; Eph 2:4 ). In 21:15 John presents a distinction between $\alpha \gamma \alpha \pi \alpha \omega$ and $\varphi \lambda \lambda \varepsilon \omega$. A $\gamma \alpha \pi \alpha \omega$ is used also for love of men for men ( 13:34), for Jesus ( 8:42), for God (1Jo 4:10).

The world ( $\tau 0 v$ коб $\mu \circ v$ ). The whole cosmos of men, including Gentiles, the whole human race. This universal aspect of God's love appears also in 2Co 5:19; Ro 5:8 .

That he gave ( $\omega \sigma \tau \varepsilon \varepsilon \delta \omega \kappa \varepsilon v$ ). The usual classical construction with $\omega \sigma \tau \varepsilon$ and the indicative (first aorist active) practical result, the only example in the N.T. save that in Ga 2:13. Elsewhere $\omega \sigma \tau \varepsilon$ with the infinitive occurs for actual result (Mt 13:32) as well as purpose (Mt 10:1), though even this is rare.

His only begotten Son ( $\tau 0 v$ voov $\operatorname{\tau ov} \mu \circ$ ооүعvŋ). "The Son the only begotten." For this word see on $1: 14,18 ; 3: 18$. The rest of the sentence, the purpose clause with $1 v \alpha-\varepsilon \chi \eta$ precisely reproduces the close of $3: 15$ save that $\varepsilon \varsigma$ autov takes the place of $\varepsilon v$ aut $\omega$ (see 1:12) and goes certainly with $\pi \iota \sigma \tau \varepsilon \nu \omega \nu$ (not with $\varepsilon \chi \eta$ as $\varepsilon v a v \tau \omega$ in verse 15) and the added clause "should not perish but" ( $\mu \eta \alpha \pi 0 \lambda \eta \tau \alpha \alpha \lambda \lambda \alpha$, second aorist middle subjunctive, intransitive, of $\alpha \pi \sigma \lambda \lambda \nu \mu$, to destroy). The same contrast between "perish" and "eternal life" (for this world and the next) appears also in 10:28. On "perish" see also 17:12.

John 3:17
For God sent not the Son (ov $\gamma \alpha \rho \alpha \pi \varepsilon \sigma \tau \varepsilon \lambda \lambda \varepsilon$ o $\theta \varepsilon o \varsigma ~ \tau o v ~ v o v) . ~ E x p l a n a t i o n ~(~ \gamma \alpha \rho) ~ o f ~$ God's sending the Son into the world. First aorist active indicative of $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$. John uses both $\alpha \pi о \sigma \tau \varepsilon \lambda \lambda \omega$ from which comes $\alpha \pi$ обто入os ( $3: 34 ; 5: 36,38$, etc.) and $\pi \varepsilon \mu \pi \omega$ (4:34; $5: 23,24,30$, etc.) for God's sending the Son and $\pi \varepsilon \mu \pi \omega$ more frequently, but with no real difference in meaning. All the Gospels use o vios in the absolute sense in contrast with the Father (Mr 13:32; Mt 11:27; Lu 10:22 ).

To judge (ıva кpıvๆ). Final clause with iva and the present (or aorist) active subjunctive of $\kappa \rho / v \omega$. The Messiah does judge the world as Jesus taught (Mt 25:31f.; Joh 5:27), but this was not the primary or the only purpose of his coming. See on Mt 7:1 for $\kappa \rho \iota v \omega$, to pick out, select, approve, condemn, used so often and in so many varying contexts in the N.T.

But that the world should be saved through him ( $\alpha \lambda \lambda \iota v a \sigma \omega \theta \eta$ о коб $\mu$ оऽ $\delta \iota^{\prime}$ avtov). First aorist passive subjunctive of $\sigma \omega \zeta \omega$, the common verb to save (from $\sigma \omega \varsigma$, safe and sound), from which $\sigma \omega \tau \eta \rho$ (Saviour) comes (the Saviour of the world, 4:42; 1Jo 4:14) and
$\sigma \omega \tau \eta \rho \iota \alpha$ (salvation, 4:22 here only in John). The verb $\sigma \omega \zeta \omega$ is often used for physical health ( $\operatorname{Mr} 5: 28$ ), but here of the spiritual salvation as in 5:34.

John 3:18
Is not judged (ov крıveta). Present passive indicative. Trust in Christ prevents condemnation, for he takes our place and pays the penalty for sin for all who put their case in his hands (Ro 8:32f. ). The believer in Christ as Saviour does not come into judgment (Joh 5:24 ).

Hath been judged already ( $\eta \delta \eta \kappa \varepsilon \kappa \rho \iota \tau \alpha$ ). Perfect passive indicative of $\kappa \rho \iota v \omega$. Judgment has already been passed on the one who refuses to believe in Christ as the Saviour sent by the Father, the man who is not willing to come to Christ for life ( 5:40).

Because he hath not believed ( $о \tau \mu \eta \pi \varepsilon \pi \iota \sigma \tau \varepsilon \cup \kappa \varepsilon v$ ). Perfect active indicative of $\pi \iota \sigma \tau \varepsilon \cup \omega$, has taken a permanent attitude of refusal. Here o $\tau \eta$ states the reason subjectively as the judgment of the Judge in any such case (o $\mu \eta \pi / \sigma \tau \varepsilon v \omega \nu$ already mentioned) while in 1Jo 5:10 o七 ou $\pi \varepsilon \pi \iota \sigma \tau \varepsilon \cup \kappa \varepsilon v$ gives the reason objectively ( $o v$ instead of $\mu \eta$ ) conceived as an actual case and no longer hypothetical. See 1:12 for $\varepsilon ı \varsigma ~ \tau о ~ о v o \mu \alpha ~ w i t h ~ \pi ı \sigma \tau \varepsilon v \omega ~(b e l i e v i n g ~ o n ~ t h e ~$ name) and 1:14 for $\mu$ оvoүعvouc (only begotten) and also 3:16.

John 3:19
And this is the judgment ( $\alpha \cup \tau \eta \delta \varepsilon \varepsilon \sigma \tau \iota \nu \eta$ крıбıৎ). A thoroughly Johannine phrase for sequence of thought ( $15: 12 ; 17: 3 ; 1$ Jo $1: 5 ; 5: 11,14 ; 3 \mathrm{Jo} 1: 6$ ). It is more precisely the process of judging ( $\kappa \rho \iota-\sigma \iota \varsigma)$ rather than the result ( $\kappa \rho \iota-\mu \alpha$ ) of the judgment. "It is no arbitrary sentence, but the working out of a moral law" (Bernard).

The light is come ( $\tau 0 \varphi \omega \varsigma \varepsilon \lambda \eta \lambda v \theta \varepsilon v$ ). Second perfect active indicative of $\varepsilon \rho \chi \circ \mu \alpha$, a permanent result as already explained in the Prologue concerning the Incarnation (1:4,5,9,11 ). Jesus is the Light of the world.

Loved darkness ( $\eta \gamma \alpha \pi \eta \sigma \alpha v$ to бкотоऽ). Job (Job 24:13) spoke of men rebelling against the light. Here то бкотос, common word for moral and spiritual darkness (1Th 5:5), though $\eta$ бкотіа in Joh 1:5. "Darkness" is common in John as a metaphor for the state of sinners ( $8: 12 ; 12: 35,46 ; 1$ Jo $1: 6 ; 2: 8,9,11$ ). Jesus himself is the only moral and spiritual light of the world ( $8: 12$ ) as he dared claim to his enemies. The pathos of it all is that men fall in love with the darkness of sin and rebel against the light like denizens of the underworld, "for their works were evil ( $\pi о \nu \eta \rho \alpha)$." When the light appears, they scatter to their holes and dens. Поvпроц (from тоvoৎ, toil, $\pi \mathbf{\nu} \varepsilon \omega$, to toil) is used of the deeds of the world by Jesus ( 7:7). In the end the god of this world blinds men's eyes so that they do not see the light (2Co 4:4 ). The fish in the Mammoth Cave have no longer eyes, but only sockets where eyes used to be. The evil one has a powerful grip on the world (1Jo 5:19).

John 3:20

That doeth ill (o $\varphi \alpha u \lambda \alpha \pi \rho \alpha \sigma \sigma \omega v$ ). The word $\varphi \alpha u \lambda o c$ means first worthless and then wicked (usually so in N.T.) and both senses occur in the papyri. In 5:29 see contrast between $\alpha \gamma \alpha \theta \alpha \pi$ лоเ $\omega$ (doing good things) and $\varphi \alpha \cup \lambda \alpha \pi \rho \alpha \sigma \sigma \omega$ (practising evil things).

Hateth the light ( $\mu \sigma \varepsilon$ тo $\varphi \omega \varsigma$ ). Hence talks against it, ridicules Christ, Christianity, churches, preachers, etc. Does it in talk, magazines, books, in a supercilious tone of sheer ignorance.

Cometh not to the light (ovк $\varepsilon \rho \chi \varepsilon \tau \alpha \pi \rho \circ \varsigma ~ \tau о ~ \varphi \omega \varsigma$ ). The light hurts his eyes, reveals his own wickedness, makes him thoroughly uncomfortable. Hence he does not read the Bible, he does not come to church, he does not pray. He goes on in deeper darkness.

Lest his works should be reproved (iva $\mu \eta \varepsilon \lambda \varepsilon \gamma \chi \theta \eta \tau \alpha \varepsilon \rho \gamma \alpha \alpha 0 \tau \circ v$ ). Negative final clause ( $\tau \sim \alpha \mu \eta$ ) with first aorist passive subjunctive of $\varepsilon \lambda \varepsilon \gamma \chi \omega$, old word to correct a fault, to reprove, to convict. See also 8:46; 16:8. To escape this unpleasant process the evil man cuts out Christ.

John 3:21
That doeth the truth (o $\pi o \omega \omega v \tau \eta v \alpha \lambda \eta \theta \varepsilon ı \alpha v$ ). See 1Jo 1:6 for this striking phrase.
Comes to the light ( $\varepsilon \rho \chi \varepsilon \tau \alpha \pi \rho \circ \varsigma$ то $\varphi \omega \varsigma$ ). Is drawn by the light, spiritual heliotropes, not driven from it.

That may be made manifest (ıva $\varphi \alpha v \varepsilon \rho \omega \theta \eta$ ). Final $\imath v a$ with first aorist passive subjunctive of $\varphi$ avepo $\omega$.

They have been wrought in God ( $\varepsilon v \theta \varepsilon \omega$ عбтıv $\varepsilon \iota \rho \gamma \alpha \sigma \mu \varepsilon v \alpha$ ). Periphrastic perfect passive indicative of $\varepsilon \rho \gamma \alpha \zeta \circ \mu \alpha$. He does not claim that they are perfect, only that they have been wrought in the sphere of and in the power of God. Hence he wants the light turned on.

John 3:22
After these things ( $\mu \varepsilon \tau \alpha \tau \alpha v \tau \alpha$ ). Transition after the interview with Nicodemus. For the phrase see $5: 1 ; 6: 1 ; 7: 1$.

Into the land of Judea ( $\varepsilon \iota \varsigma \tau \eta \nu$ Iov $\alpha a \iota \alpha \nu \gamma \eta \nu$ ). Into the country districts outside of Jerusalem. The only example of this phrase in the N.T., but "the region of Judea" ( $\eta$ Iovסaıa $\chi \omega \rho \alpha)$ in Mr 1:5.

He tarried ( $\delta \varepsilon \varepsilon \tau \rho \mu \beta \varepsilon v)$. Descriptive imperfect active of $\delta \iota \alpha \tau \rho ß \omega \omega$, old verb to rub between or hard, to spend time (Ac 14:3).

Baptized ( $\varepsilon \beta \alpha \pi \tau \iota \zeta \varepsilon v)$. Imperfect active of $\beta \alpha \pi \tau \iota \zeta \omega$. "He was baptizing." The six disciples were with him and in 4:2 John explains that Jesus did the baptizing through the disciples.

John 3:23
John was also baptizing ( $\eta \nu \delta \varepsilon \kappa \alpha$ о $I \omega \alpha v \eta \varsigma \beta \alpha \pi \tau \iota \zeta \omega v$ ). Periphrastic imperfect picturing the continued activity of the Baptist simultaneous with the growing work of Jesus. There was no real rivalry except in people's minds.

In Aenon near to Salim ( $\varepsilon v$ Aıv $\omega v \varepsilon \gamma \gamma v \varsigma$ tov $\Sigma a \lambda \varepsilon \mu)$ ). It is not clearly known where this place was. Eusebius locates it in the Jordan valley south of Beisan west of the river where are many springs (fountains, eyes). There is a place called Salim east of Shechem in Samaria with a village called 'Aimen, but with no water there. There may have been water there then, of course.

Because there was much water there (oт v $\delta \alpha \tau \alpha \pi о \lambda \lambda \alpha \eta \nu \varepsilon \kappa \varepsilon$ ). "Because many waters were there." Not for drinking, but for baptizing. "Therefore even in summer baptism by immersion could be continued" (Marcus Dods).

And they came, and were baptized (ка та $\rho \varepsilon \gamma \iota v o v \tau о ~ к \alpha \varepsilon \beta \alpha \pi \tau \iota \zeta о \nu \tau о)$. Imperfects both, one middle and the other passive, graphically picturing the long procession of pilgrims who came to John confessing their sins and receiving baptism at his hands.

John 3:24
For John had not yet been cast into prison (ov $\pi \omega \gamma \alpha \rho \eta \nu \beta \varepsilon \beta \lambda \eta \mu \varepsilon v o \varsigma \varepsilon ı \varsigma \tau \eta \nu \varphi \cup \lambda \alpha \kappa \eta \nu$ I $\omega \alpha v \eta \varsigma$ ). Periphrastic past perfect indicative of $\beta \alpha \lambda \lambda \omega$ explaining ( $\gamma \alpha \rho$ ) why John was still baptizing, the reason for the imprisonment having been given by Luke (Lu 3:19f. ).

John 3:25
A questioning ( $\lceil\eta \tau \eta \sigma \iota)$ ). Old word from $\zeta \eta \tau \varepsilon \omega$. See Ac 15:2 for the word where also $\zeta \eta \tau \eta \mu \alpha$ (question) occurs. Z $\eta \tau \eta \sigma \varsigma \varsigma$ (process of inquiry) means a meticulous dispute ( 1 Ti 6:4).

With a Jew ( $\mu \varepsilon \tau \alpha$ Iov $\delta a \iota o v$ ). So correct text, not Iov $\alpha a \iota \omega v$ (Jews). Probably some Jew resented John's baptism of Jesus as implying impurity or that they were like Gentiles (cf. proselyte baptism).

About purifying ( $\pi \varepsilon \rho \kappa \alpha \theta \alpha \rho \sigma \mu \circ v)$. See 2:6 for the word. The committee from the Sanhedrin had challenged John's right to baptize ( 1:25). The Jews had various kinds of baptisms or dippings (Heb 6:2), "baptisms of cups and pots and brazen vessels" (Mr 6:4). The disciples of John came to him with the dispute (the first known baptismal controversy, on the meaning of the ceremony) and with a complaint.

John 3:26
Rabbi ( $\mathrm{P} \alpha \beta \beta \varepsilon$ ). Greeting John just like Jesus (1:38; 3:2 ).
Beyond Jordan ( $\pi \varepsilon \rho \alpha v$ tov Io $\rho \delta a v o v$ ). Evident reference to John's witness to Jesus told in 1:29-34.

To whom thou hast borne witness ( $\omega \sigma v \mu \varepsilon \mu \alpha \rho \tau v \rho \eta к а \varsigma)$. Note avoidance of calling the name of Jesus. Perfect active indicative of $\mu \alpha \rho \tau \nu \rho \varepsilon \omega$ so common in John ( 1:7, etc.). These disciples of John are clearly jealous of Jesus as a rival of John and they distinctly blame John for his endorsement of one who is already eclipsing him in popularity.

The same baptizeth (outoc $\beta a \pi \tau \iota(\varepsilon)$ ) "This one is baptizing." Not personally ( 4:2), as John did, but through his six disciples.

And all men come to him ( $\kappa \alpha \pi \alpha v \tau \varepsilon \varsigma \varepsilon \rho \chi о v \tau \alpha \pi \rho \circ \varsigma \alpha v \tau о v$ ). Linear present middle indicative, "are coming." The sight of the growing crowds with Jesus and the dwindling crowds with John stirred John's followers to keenest jealousy. What a life-like picture of ministerial jealousy in all ages.

John 3:27
Except it have been given him from heaven ( $\varepsilon \alpha \nu \mu \eta \eta \delta \varepsilon \delta o \mu \varepsilon v o v \alpha v \tau \omega \varepsilon \kappa \tau o v o v \rho a v o v$ ). See the same idiom in Joh 6:65 (cf. 19:11). Condition of third class, undetermined with prospect of determination, $\varepsilon \alpha v \mu \eta$ with the periphrastic perfect passive subjunctive of $\delta i \delta \omega \mu$. The perfect tense is rare in the subjunctive and an exact rendering into English is awkward, "unless it be granted him from heaven." See 1Co $4: 7$ where Paul says the same thing.

John 3:28
I said ( $\varepsilon$ וпоv). As in 1:20,23. He had always put Jesus ahead of him as the Messiah ( 1:15).

Before him ( $\varepsilon \mu \pi \rho о \sigma \theta \varepsilon v \varepsilon \kappa \varepsilon เ v o v) . ~ " B e f o r e ~ t h a t ~ o n e " ~(J e s u s) ~ a s ~ h i s ~ f o r e r u n n e r ~ s i m p l y . ~$
I am sent ( $\alpha \pi \varepsilon \sigma \tau \alpha \lambda \mu \varepsilon \nu \circ \varsigma \varepsilon \mu$ ). Periphrastic perfect passive indicative of $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$.
John 3:29
The bridegroom ( $v v \mu \varphi \iota \varsigma)$. Predicate nominative without article. Both $v v \mu \varphi \eta$ (bride) and $v v \mu \varphi \stackrel{\varsigma}{ }$ are old and common words. Jesus will use this metaphor of himself as the Bridegroom (Mr 2:19) and Paul develops it (2Co 11:2; Eph 5:23-32) and so in Revelation (19:7; 21:2). John is only like the paranymph ( $\pi \alpha \rho \alpha \nu v \mu \varphi \iota \varsigma)$ or "the friend of the bridegroom." His office is to bring groom and bride together. So he stands expectant ( $\varepsilon \sigma \tau \eta \kappa \omega \varsigma$, second perfect active participle of $\iota \sigma \tau \eta \mu$ ) and listens ( $\alpha \kappa \sigma \omega \omega \nu$, present active participle of $\alpha \kappa 0 v \omega$ ) with joy ( rejoiceth greatly, $\chi \alpha \rho \alpha \chi \alpha \iota \rho \varepsilon$, "with joy rejoices") to the music of the bridegroom's voice.

This my joy therefore is fulfilled ( $\alpha v \tau \eta$ ov $\eta \chi \alpha \rho \alpha \pi \varepsilon \pi \lambda \eta \rho \omega \tau \alpha$ ). Perfect passive indicative of $\pi \lambda \eta \rho o \omega$, stands filled like a cup to the brim with joy.

John 3:30
Must $(\delta \varepsilon)$. It has to be (see $3: 14$ ). He is to go on growing (present active infinitive $\alpha v \xi \alpha v \varepsilon เ v$ ) while I go on decreasing (present passive infinitive $\varepsilon \lambda \alpha \tau \tau 0 v \sigma \theta \alpha$, from comparative $\varepsilon \lambda \alpha \tau \tau \omega \nu$, less). These are the last words that we have from John till the despondent message from the dungeon in Machaerus whether Jesus is after all the Messiah (Mt 11:2; Lu 7:19 ). He went on to imprisonment, suspense, martyrdom, while Jesus grew in popular favour till he had his via dolorosa. "These last words of St. John are the fulness of religious sacrifice and fitly close his work" (Westcott).

John 3:31
Is above all $(\varepsilon \pi \alpha v \omega \pi \alpha v \tau \omega v)$. Ablative case with the compound preposition $\varepsilon \pi \alpha v \omega$. See the same idea in Ro 9:5. Here we have the comments of Evangelist (John) concerning the last words of John in verse 30 which place Jesus above himself. He is above all men, not
alone above the Baptist. Bernard follows those who treat verses 31-36 as dislocated and put them after verse 21 (the interview with Nicodemus), but they suit better here.

Of the earth ( $\varepsilon \kappa \tau \eta \varsigma \gamma \eta \varsigma)$. John is fond of this use of $\varepsilon \kappa$ for origin and source of character as in 1:46; 1Jo 4:5. Jesus is the one that comes out of heaven (o $\varepsilon \kappa$ тov ov $\rho \alpha v o v \varepsilon \rho \chi о \mu \varepsilon \nu \circ \varsigma$ ) as he has shown in 1:1-18. Hence he is "above all."

John 3:32
What he hath seen and heard (о $\varepsilon \omega \rho \alpha \kappa \varepsilon \nu \kappa \alpha \eta \kappa о \cup \sigma \varepsilon v$ ). Perfect active indicative followed by aorist active indicative, because, as Westcott shows, the first belongs to the very existence of the Son and the latter to his mission. There is no confusion of tenses here.

No man (oudeıs). There were crowds coming to Jesus, but they do not really accept him as Saviour and Lord (1:11;2:24). It is superficial as time will show. But "no one" is not to be pressed too far, for it is the rhetorical use.

John 3:33
Hath set his seal ( $\varepsilon \sigma \varphi \rho \alpha \gamma \iota \sigma \varepsilon \nu)$. First aorist active indicative of $\sigma \varphi \rho \alpha \gamma \iota \zeta \omega$ for which verb see Mt 27:66. The metaphor of sealing is a common one for giving attestation as in 6:27. The one who accepts the witness of Jesus attests that Jesus speaks the message of God.

John 3:34
The words of God ( $\tau \alpha \rho \eta \mu \alpha \tau \alpha$ $\tau 0 v \theta \varepsilon o v)$. God sent his Son ( $3: 17$ ) and he speaks God's words.

By measure ( $\varepsilon \kappa \mu \varepsilon \tau \rho \circ v$ ). That is God has put no limit to the Spirit's relation to the Son. God has given the Holy Spirit in his fulness to Christ and to no one else in that sense.

John 3:35
Hath given all things into his hand ( $\pi \alpha v \tau \alpha \delta \varepsilon \delta \omega \kappa \varepsilon \nu \varepsilon \nu \tau \eta \chi \varepsilon\llcorner\rho \alpha \nu \tau 0 v)$. John makes the same statement about Jesus in 13:3 (using $\varepsilon \iota \varsigma \tau \alpha \varsigma \chi \varepsilon \iota \rho a \varsigma$ instead of $\varepsilon \nu \tau \eta \chi \varepsilon \iota \rho$ ). Jesus makes the same claim in 5:19-30; Mt 11:27; 28:18 .

John 3:36
Hath eternal life ( $\varepsilon \chi \varepsilon \zeta \omega \eta \nu \alpha \iota \omega v \iota o v)$. Has it here and now and for eternity.
That obeyeth not $(o \alpha \pi \varepsilon \bullet \theta \omega v)$. "He that is disobedient to the Son." Jesus is the test of human life as Simeon said he would be (Lu 2:34f. ). This verb does not occur again in John's Gospel.

## John 4

John 4:1
When therefore ( $\mathrm{H} \omega \varsigma \mathrm{ovv}$ ). Reference to 3:22f. the work of the Baptist and the jealousy of his disciples. Ovv is very common in John's Gospel in such transitions.

The Lord (o Kupıo̧). So the best manuscripts (Neutral Alexandrian), though the Western class has o I $\eta \sigma o v \varsigma$. Mark usually has o I $\eta$ oovs and Luke often o Kvpıoc. In the narrative portion of John we have usually o I I $\sigma o v \varsigma$, but o Kvpıo in five passages (4:1; 6:23; 11:2; 20:20; 21:12 ). There is no reason why John should not apply o Kupıos to Jesus in the narrative sections as well as Luke. Bernard argues that these are "explanatory glosses," not in the first draft of the Gospel. But why? When John wrote his Gospel he certainly held Jesus to be Kıpıos (Lord) as Luke did earlier when he wrote both Gospel and Acts This is hypercriticism.

Knew $(\varepsilon \gamma v \omega)$. Second aorist active indicative of $\gamma \iota \nu \omega \sigma \kappa \omega$. The Pharisees knew this obvious fact. It was easy for Jesus to know the attitude of the Pharisees about it ( 2:24). Already the Pharisees are suspicious of Jesus.

How that (o $\tau$ ). Declarative ot (indirect assertion).
Was making and baptizing more disciples than John ( $\pi \lambda \varepsilon เ \circ v a \varsigma ~ \mu \alpha Ө \eta \tau \alpha \varsigma \pi о є \varepsilon$ ка $\beta \alpha \pi \tau \iota \zeta \varepsilon \eta \mathrm{I} \omega \alpha \nu \eta \varsigma)$. Present active indicative in both verbs retained in indirect discourse. Recall the tremendous success of John's early ministry ( $\mathrm{Mr} \mathrm{1:5;} \mathrm{Mt} \mathrm{3:5;} \mathrm{Lu} \mathrm{3:7,15)} \mathrm{in} \mathrm{order}$ to see the significance of this statement that Jesus had forged ahead of him in popular favour. Already the Pharisees had turned violently against John who had called them broods of vipers. It is most likely that they drew John out about the marriage of Herod Antipas and got him involved directly with the tetrarch so as to have him cast into prison (Lu 3:19f. ). Josephus (Ant. XVIII. v. 2) gives a public reason for this act of Herod Antipas, the fear that John would "raise a rebellion," probably the public reason for his private vengeance as given by Luke. Apparently John was cast into prison, though recently still free (Joh 3:24), before Jesus left for Galilee. The Pharisees, with John out of the way, turn to Jesus with envy and hate.

John 4:2
Although Jesus himself baptized not, but his disciples (каıтоү₹ I I боия аuтоৎ оик $\left.\varepsilon \beta \alpha \pi \tau \iota \zeta \varepsilon v \alpha \lambda \lambda^{\prime} \mathrm{o} \mu \alpha \theta \eta \tau \alpha \alpha \cup \tau 0 v\right)$. Parenthetical explanation that applies also to 3:22. Imperfect tense means that it was not the habit of Jesus. This is the only N.T. instance of kaıtor $\gamma \varepsilon$ (and yet indeed), compound conjunction (каıто in Ac 14:17; Heb 4:3) with intensive particle $\gamma \varepsilon$ added. This is the last mention of baptism under the direction of Jesus till the Great Commission (Mt 28:19). It is possible that Jesus stopped the baptizing because of the excitement and the issue raised about his Messianic claims till after his resurrection when he enjoined it upon his disciples as a rite of public enlistment in his service.

## John 4:3

Left Judea ( $\alpha \varphi \eta \kappa \varepsilon \nu \tau \eta v$ Iov $\alpha a \iota \alpha \nu$ ). Unusual use of $\alpha \varphi \imath \eta \mu$. First (K $\alpha \pi \pi \alpha$ ) aorist active indicative. Originally the word means to send away, to dismiss, to forsake, to forgive, to allow. Jesus uses it in this sense in 16:28. Evidently because Jesus did not wish to bring the coming conflict with the Pharisees to an issue yet. So he mainly avoids Jerusalem and Judea now till the end. Each time hereafter that Jesus appears in Jerusalem and Judea before the last visit there is an open breach with the Pharisees who attack him (Joh 5:1-47; 7:14-10:21; 10:22-42; 11:17-53).

Again into Galilee ( $\pi \alpha \lambda \iota v \varepsilon ı \varsigma \tau \eta \nu \Gamma \alpha \lambda_{\imath} \lambda \alpha \iota \alpha v$ ). Reference to 2:1-12. The Synoptics tell nothing of this early work in Perea (Joh 1:19-51 ), Galilee, or Judea ( $2: 13-4: 2$ ). John supplements their records purposely.

John 4:4
He must needs pass through Samaria (E $\delta \varepsilon \delta \varepsilon \alpha \cup \tau o v ~ \delta ı \varepsilon \rho \chi \varepsilon \sigma \theta a \delta i \alpha \tau \eta \varsigma \Sigma \alpha \mu \alpha \rho ı a \varsigma)$. Imperfect indicative of the impersonal verb $\delta \varepsilon$ with subject infinitive ( $\delta \varepsilon \rho \rho \chi \varepsilon \sigma \alpha$ ) and accusative of general reference ( $\alpha \cup \tau \tau v$ ). Note repetition of $\delta \iota \alpha$. It was only necessary to pass through Samaria in going directly north from Judea to Galilee. In coming south from Galilee travellers usually crossed over the Jordan and came down through Perea to avoid the hostility of the Samaritans towards people who passed through their land to go to Jerusalem. Jesus once met this bitterness on going to the feast of tabernacles ( $\mathrm{Lu} 9: 51-56$ ).

John 4:5
So he cometh ( $\varepsilon \rho \chi \varepsilon \tau \alpha \mathrm{ovv}$ ). Vivid present middle indicative and transitional ouv.
Sychar ( $\Sigma v \chi \propto \rho$ ). There is a dispute whether this is just a variation of Shechem as meaning "drunken-town" (Isa 28:1) or "lying-town" (Hab 2:18) or is a separate village near Shechem (Neapolis, Nablous) as the Talmud and Eusebius indicate. Apparently the present village Askar corresponds well with the site. The use of mo入ıv (city) does not mean that it was a large town. Mark and John use it freely for small places.

Parcel of ground ( $\chi \omega \rho \circ \rho v$ ). Old use of this diminutive of $\chi \omega \rho o \varsigma$ or $\chi \omega \rho \alpha$, a piece of ground.

That Jacob gave to his son Joseph (o $\varepsilon \delta \omega \kappa \varepsilon \nu \operatorname{I} \alpha \kappa \omega \beta \tau \omega \operatorname{I} \omega \sigma \eta \varphi \tau \omega \nu \omega \omega \alpha \tau \tau o v$ ). See Ge 33:19; 48:22. Relative o is not attracted to case of $\chi \omega \rho$ ovo. First aorist active indicative $\varepsilon \delta \omega \kappa \varepsilon v$.

John 4:6
Jacob's well ( $\pi \eta \gamma \eta$ тov Iak $\omega \beta$ ). "A spring of Jacob" (here and verse 14), but $\varphi \rho \varepsilon \alpha \rho$ (well, pit, cistern) in verses 11,12 . It is really a cistern 100 feet deep dug by a stranger apparently in a land of abundant springs (Ge 26:19).
 verb means to toil excessively (Lu 5:5). John emphasizes the human emotions of Jesus (1:14; 11:3,33,35,38,41f.; 12:27; 13:21; 19:28 ).

With his journey ( $\varepsilon \kappa \tau \eta \varsigma$ oסoıторıаऽ). As a result ( $\varepsilon \kappa$ ) of the journey. Old compound word from oסоторос (wayfarer), in N.T. only here and 2Co 11:26.

Sat ( $\varepsilon \kappa \alpha \theta \varepsilon \zeta \varepsilon \tau о)$. Imperfect (descriptive) middle of $\kappa \alpha \theta \varepsilon \zeta$ о $\alpha$, "was sitting."
Thus (ov $\tau \omega \varsigma)$. Probably "thus wearied," graphic picture.
By the well ( $\varepsilon \pi \tau \eta \pi \eta \gamma \eta$ ). Literally, "upon the curbstone of the well."
Sixth hour ( $\omega \varsigma \varepsilon \kappa \tau \eta$ ). Roman time, about 6 P.M., the usual time for drawing water.
John 4:7
There cometh ( $\varepsilon \rho \chi \varepsilon \tau \alpha)$. Vivid historical present as in verse 5.
A woman of Samaria ( $\gamma \cup v \eta \varepsilon \kappa \tau \eta \varsigma \Sigma \alpha \mu \alpha \rho ı \alpha \varsigma)$. The country, not the city which was two hours away.

To draw water ( $\alpha v \tau \lambda \eta \sigma \alpha v \delta \omega \rho$ ). First aorist active infinitive of purpose of $\alpha v \tau \lambda \varepsilon \omega$ for which see $2: 8 \mathrm{f}$. Cf. Rebecca in Ge 24:11,17.

Give me to drink ( $\delta o \varsigma \mu o \pi \varepsilon \iota v$ ). Second aorist active imperative of $\delta \iota \delta \omega \mu$ and second aorist active infinitive (object of $\delta o \varsigma$ ) of $\pi \iota \nu \omega$, shortened form of $\pi \iota \varepsilon \iota v$. A polite request.

John 4:8
For $(\gamma \alpha \rho)$. Explanation of the reason for asking her.
Were gone away ( $\alpha \pi \varepsilon \lambda \eta \lambda \nu \theta \varepsilon เ \sigma \alpha v$ ). Past perfect of $\alpha \pi \varepsilon \rho \chi \circ \mu \alpha$, to go off. They had already gone before she came. To Sychar $(5,39)$.

To buy food (ıva $\tau \rho о \varphi \alpha \varsigma ~ a \gamma о \rho \alpha \sigma \omega \sigma \iota v)$. Hıva in purpose clause with first aorist active subjunctive of $\alpha \gamma о \rho \alpha \zeta \omega$, old verb from $\alpha \gamma o \rho \alpha$ (marketplace). See Mt 21:12 . T $\rho o \varphi \eta$ (nourishment) is old word from $\tau \rho \varepsilon \varphi \omega$, to nourish (Mt 3:4). "Victuals" (plural).

John 4:9
The Samaritan woman ( $\eta \gamma \cup \nu \eta \eta \Sigma \alpha \mu \alpha \rho \varepsilon ı \tau \iota \varsigma)$. Different idiom from that in 7, "the woman the Samaritan." The Samaritans were a mixture by intermarriage of the Jews left in the land (2Ch 30:6,10; 34:9) with colonists from Babylon and other regions sent by Shalmaneser. They had had a temple of their own on Mt. Gerizim and still worshipped there.

Thou being a Jew ( $\sigma v$ Iov $\delta \alpha \circ \varsigma \omega v$ ). Race antipathy was all the keener because the Samaritans were half Jews.

Drink ( $\pi \varepsilon เ \nu$ ). Same infinitive form as in 7 and the object of aıtعıৎ (askest).
Of me ( $\left.\pi \alpha \rho^{\prime} \varepsilon \mu o v\right)$. "From me," ablative case with $\pi \alpha \rho \alpha$.
For Jews have no dealings with Samaritans (ov $\gamma \alpha \rho \sigma v v \chi \rho \omega v \tau \alpha$ Iov $\delta \alpha ı \nu \Sigma \alpha \mu \alpha \rho \varepsilon \iota \alpha \iota \varsigma)$. Explanatory ( $\gamma \alpha \rho$ ) parenthesis of the woman's astonishment. Associative instrumental case with $\sigma v v \chi \rho \omega v \tau \alpha$ (present middle indicative of $\sigma v v \chi \rho \alpha o \mu \alpha$, compound in literary Koine, here only in N.T.). The woman's astonishment is ironical according to Bernard. At any rate the disciples had to buy food in a Samaritan village and they were travelling through Samaria. Perhaps she was surprised that Jesus would drink out of her waterpot. The Western class omit this explanatory parenthesis of the author.

John 4:10
Answered and said ( $\alpha \pi \varepsilon \kappa \rho \iota \theta \eta \kappa \alpha \varepsilon \iota \pi \varepsilon v$ ). As often (redundant) in John. The first aorist passive $(\alpha \pi \varepsilon \kappa \rho ı \theta \eta)$ is deponent, no longer passive in sense.

If thou knewest ( $\varepsilon \eta \iota \delta \varepsilon \iota \varsigma)$. Condition of second class, determined as unfulfilled, $\varepsilon$ and past perfect $\eta \iota \delta \varepsilon \iota \varsigma$ (used as imperfect) in condition and $\alpha v$ and aorist active indicative in conclusion ( $\alpha \nu \eta \iota \tau \eta \sigma \alpha \varsigma \kappa \alpha \alpha \nu \varepsilon \delta \omega \kappa \varepsilon v$, note repetition of $\alpha v$, not always done).

The gift of God ( $\tau \eta \nu \delta \omega \rho \varepsilon \alpha \nu \tau$ тov $\theta \varepsilon o v)$. Naturally the gift mentioned in 3:16 (Westcott), the inexpressible gift (2Co 9:15). Some take it to refer to the living water below, but that is another allusion (metaphor) to 3:16. See Eph 4:7 for Paul's use of both $\chi \alpha \rho ı \varsigma ~ a n d ~ \delta \omega \rho \varepsilon \alpha$ (from $\delta \delta \delta \omega \mu$, to give).

Who it is ( $\tau \iota \varsigma \varepsilon \sigma \tau \iota v)$. She only knew that he was a Jew. This Messianic self-consciousness of Jesus is plain in John, but it is early in the Synoptics also.

Living water ( $v \delta \omega \rho \zeta \omega v$ ). Running water like a spring or well supplied by springs. This Jacob's Well was filled by water from rains percolating through, a sort of cistern, good water, but not equal to a real spring which was always preferred (Ge 26:19; Le 14:5; Nu 19:17 ). Jesus, of course, is symbolically referring to himself as the Living Water though he does not say it in plain words as he does about the Living Bread ( 6:51). The phrase "the fountain of life" occurs in $\operatorname{Pr}$ 13:14. Jesus supplies the water of life (Joh 7:39). Cf. Re 7:17; 22:1 .

John 4:11
Sir (Kupıq). So it has to mean here in the mouth of the Samaritan woman, not Lord.
Thou hast nothing to draw with and the well is deep (ov $\tau \varepsilon \alpha \tau \tau \lambda \mu \alpha \varepsilon \chi \varepsilon ı \varsigma \kappa \alpha$ то $\varphi \rho \varepsilon \alpha \rho$ $\varepsilon \sigma \tau \iota v \beta \alpha \theta)$. This broken construction of ovte-ка (neither--and) occurs in N.T. elsewhere only in 3Jo 1:10. Av $\lambda \lambda \eta \mu \alpha$ (from $\alpha v \tau \lambda \varepsilon \omega$, to draw) is a late word for that which is drawn, then (Plutarch) for the act of drawing, and then for the rope as here to draw with. This well ( $\varphi \rho \varepsilon \alpha \rho$ ) is 100 feet deep and Jesus had no rope. The bucket of skin ("with three cross sticks at the mouth to keep it open," Vincent) was kept at the well to be let down by a goat's hair rope.

That living water ( $\tau 0 v \delta \omega \rho$ тo $\zeta \omega v$ ). "The water the living," with the article referring to the language of Jesus in verse 10 . She is still thinking only of literal water.

John 4:12
Art thou ( $M \eta \sigma \cup \varepsilon$ ). Expecting a negative answer.
Greater than our father Jacob ( $\mu \varepsilon \iota \zeta \omega v \varepsilon$ тоט $\pi \alpha \tau \rho \circ \varsigma ~ \eta \mu \omega v$ I $\alpha \kappa \omega \beta$ ). Ablative case $\pi \alpha \tau \rho \circ \varsigma$ after the comparative adjective $\mu \varepsilon \iota \zeta \omega v$ (positive $\mu \varepsilon \gamma \alpha \varsigma$ ). The Samaritans claimed descent from Jacob through Joseph (tribes of Ephraim and Manasseh).

Cattle ( $\theta \rho \varepsilon \mu \mu \alpha \tau \alpha)$. Old word from $\tau \rho \varepsilon \varphi \omega$, to nourish, nursling, child, flock, cattle. Only here in N.T.

John 4:13
Every one that drinketh ( $\pi \alpha \varsigma$ o $\pi เ v \omega v$ ). Present active articular participle with $\pi \alpha \varsigma$, parallel to the indefinite relative with the second aorist active subjunctive (os av $\pi \iota \eta$ ) in verse 14 . With this difference in the tenses used ( $\pi \imath v \omega v$, keep on drinking, $\pi \imath \eta$, once for all). Note $\varepsilon \kappa$ and the ablative both times, out of the water. Jesus pointed to the well ("this water").

John 4:14
That I shall give him (ov $\varepsilon \gamma \omega \delta \omega \sigma \omega \alpha v \tau \omega$ ). Relative ov attracted to the case (genitive) of the antecedent ( $v \delta \alpha \tau o \varsigma)$. Future active indicative of $\delta i \delta \omega \mu$.

Shall never thirst (ov $\mu \eta \delta \iota \psi \eta \sigma \varepsilon \varepsilon \iota \varsigma ~ \tau o v ~ a ı o v \alpha$ ). The double negative ov $\mu \eta$ is used with either the future indicative as here or the aorist subjunctive, the strongest possible negative. See both constructions (ov $\mu \eta \pi \varepsilon \iota v a \sigma \eta$ and ov $\mu \varepsilon \delta \iota \psi \eta \sigma \varepsilon$ ) in Joh 6:35. Jesus has not answered the woman's question save by the necessary implication here that he is superior to Jacob.

A well of water springing up unto eternal life ( $\pi \eta \gamma \eta v \delta \alpha \tau \circ \varsigma a \lambda \lambda о \mu \varepsilon v o v \varepsilon \iota \varsigma \zeta \omega \eta \nu$ $\alpha \iota \omega v ı v)$. "Spring (or fountain) of water leaping (bubbling up) unto life eternal." Present middle participle of $\alpha \lambda \lambda o \mu \alpha$, old verb, in N.T. only here and Ac 3:8; 14:10. The woman's curiosity is keenly excited about this new kind of water.

John 4:15
Sir (Kvpıع). Not yet "Lord" for her. See verse 11.
This water ( $\tau 0 v \tau$ то $v \delta \omega \rho$ ). This peculiar kind of water. She did not grasp the last phrase "unto life eternal," and speaks half ironically of "this water."

That I thirst not ( $\imath v \alpha \mu \eta \delta \iota \psi \omega)$. Final clause with $\imath v \alpha$, alluding to the words of Jesus, water that will prevent thirst.

Neither come ( $\mu \eta \delta \varepsilon \delta \varepsilon \rho \rho \chi \omega \mu \alpha$ ). Carrying on the negative purpose with present middle subjunctive, "nor keep on coming" as she has to do once or twice every day. She is evidently puzzled and yet attracted.

John 4:16
Go, call thy husband (Ни $\quad \alpha \gamma \varepsilon \varphi \omega \nu \eta \sigma o v \sigma o v \tau o v \alpha \nu \delta \rho \alpha$ ). Two imperatives (present active, first aorist active). Had she started to leave after her perplexed reply? Her frequent trips to the well were partly for her husband. We may not have all the conversation preserved, but clearly Jesus by this sudden sharp turn gives the woman a conviction of sin and guilt without which she cannot understand his use of water as a metaphor for eternal life.

## John 4:17

I have no husband (ovk $\varepsilon \chi \omega \alpha \nu \delta \rho \alpha$ ). The Greek $\alpha \nu \eta \rho$ means either "man" or "husband." She had her "man," but he was not a legal "husband." Her language veils her deceit.

Thou saidst well ( $\kappa \alpha \lambda \omega \varsigma \varepsilon \iota \pi \varepsilon \varsigma)$. Jesus saw through the double sense of her language and read her heart as he only can do, a supernatural gift of which John often speaks (1:48; 2:24f.; 5:20 ).

For thou hast had five husbands ( $\pi \varepsilon \nu \tau \varepsilon \gamma \alpha \rho \alpha \nu \delta \rho \alpha \varsigma \varepsilon \sigma \chi \varepsilon \varsigma)$. "For thou didst have five men." Second aorist (constative) active indicative of $\varepsilon \chi \omega$.

Is not thy husband (ovк $\varepsilon \sigma \tau \iota v$ oov $\alpha \nu \eta \rho$ ). In the full and legal sense of $\alpha \nu \eta \rho$, not a mere "man."
 Note absence of article with $\alpha \lambda \eta \theta \varepsilon \varsigma$ (predicate accusative). Perfect active indicative $\varepsilon \iota \rho \eta \kappa \alpha \varsigma$ here, not aorist $\varepsilon \iota \pi \varepsilon \varsigma ~(v e r s e ~ 17) . ~$

John 4:19
Sir (Kıpıع). So still.
I perceive $(\theta \varepsilon \omega \rho \omega)$. "I am beginning to perceive" from what you say, your knowledge of my private life (verse 29). See 2:23 for $\theta \varepsilon \omega \rho \varepsilon \omega$ which John's Gospel has 23 times, of bodily sight $(20: 6,14)$, of mental contemplation ( $12: 45 ; 14: 17$ ). See both $\theta \varepsilon \omega \rho \varepsilon \omega$ and o $\pi \tau \sigma \mu \alpha$ in 1:51; 16:16.

That thou art a prophet (o $\pi \rho о \varphi \eta \tau \eta \varsigma \varepsilon \sigma v$ ). "That a prophet art thou" (emphasis on "thou"). She felt that this was the explanation of his knowledge of her life and she wanted to change the subject at once to the outstanding theological dispute.

John 4:20
In this mountain $(\varepsilon \nu \tau \omega \mathrm{o} \rho \varepsilon \tau o v \tau \omega)$. Jacob's Well is at the foot of Mount Gerizim toward which she pointed. Sanballat erected a temple on this mountain which was destroyed by John Hyrcanus B.C. 129. Abraham (Ge 12:7) and Jacob (Ge 33:20) set up altars at Shechem. On Gerizim were proclaimed the blessings recorded in De 28 . The Samaritan Pentateuch records an altar set up on Gerizim that is on Ebal (over 200 feet higher than Gerizim) in the Hebrew (De 27:4 ). The Samaritans held that Abraham offered up Isaac on Gerizim. The Samaritans kept up this worship on this mountain and a handful do it still.

And ye say ( $\kappa \alpha \cup \mu \varepsilon \iota \varsigma \lambda \varepsilon \gamma \varepsilon \tau \varepsilon$ ). Emphasis on $v \mu \varepsilon \iota \varsigma$ (ye). Ye Jews.
Ought to worship ( $\pi \rho \circ \sigma \kappa \nu \nu \varepsilon เ \nu \delta \varepsilon$ ). "Must worship," as of necessity ( $\delta \varepsilon$ ). The woman felt that by raising this theological wrangle she would turn the attention of Jesus away from herself and perhaps get some light on the famous controversy. Пробкvve $\omega$ in John is always worship, not just respect.

John 4:21
Believe me ( $\pi เ \sigma \tau \varepsilon v \varepsilon \mu \circ$ ). Correct text. Present active imperative. Unique phrase in place of the common $\alpha \mu \eta \nu \alpha \mu \eta \nu$ (verily, verily).

The hour cometh ( $\varepsilon \rho \chi \varepsilon \tau \alpha \omega \rho \alpha$ ). "There is coming an hour." The same idiom occurs also in John 4:34; 5:25,28; 16:2,25,32 .

Neither in this mountain nor in Jerusalem (ovic $\varepsilon \nu \tau \omega$ ope $\tau 0 v \tau \omega$ ovte $\varepsilon v$ Iءробо $\lambda \nu \mu о \iota \varsigma)$. The worship of God will be emancipated from bondage to place. Both Jews and Samaritans are wrong as to the "necessity" $(\delta \varepsilon)$. "These ancient rivalries will disappear when the spirituality of true religion is fully realized." Jesus told this sinful woman one of his greatest truths.

John 4:22

That which ye know not (o ovк oı $\delta \alpha \tau \varepsilon$ ). Cf. Ac 17:23. "You know whom to worship, but you do not know him" (Westcott). The Samaritans rejected the prophets and the Psalms and so cut themselves off from the fuller knowledge of God.

We ( $\eta \mu \varepsilon \iota \varsigma)$. We Jews. Jesus is a Jew as he fully recognizes (Mt 15:24).
That which we know (o ot $\delta \alpha \mu \varepsilon v$ ). Neuter singular relative as before. The Jews, as the chosen people, had fuller revelations of God (Ps 147:19f.; Ro 9:3-5 ). But even so the Jews as a whole failed to recognize God in Christ (1:11,26; 7:28).

For salvation is from the Jews ( $о \tau \eta \sigma \omega \tau \eta \rho ı \alpha \varepsilon \kappa \tau \omega \nu$ Iov $\alpha a \iota \omega v \varepsilon \sigma \tau \iota v$ ). "The salvation," the Messianic salvation which had long been the hope and guiding star of the chosen people (Lu 1:69,71,77; Ac 13:26,47). It was for the whole world (Joh 3:17), but it comes "out of" $(\varepsilon \kappa)$ the Jews. This tremendous fact should never be forgotten, however unworthy the Jews may have proved of their privilege. The Messiah, God's Son, was a Jew.

John 4:23
And now is ( $\kappa \alpha v v v \varepsilon \sigma \tau \iota v$ ). See this same phrase in 5:25. This item could not be added in verse 21 for local worship was not abolished, but spiritual independence of place was called for at once. So contrast 5:25,28; 16:25,32 .
 Пробкขvŋ $\tau \uparrow$ is a late word from $\pi \rho о \sigma \kappa \cup v \varepsilon \omega$, to bow the knee, to worship, occurs here only in N.T., but is found in one pre-Christian inscription (Deissmann, Light, etc., p. 101) and in one of the 3rd century A.D. (Moulton \& Milligan, Vocabulary).

In spirit and truth ( $\varepsilon v \pi v \varepsilon v \mu \alpha \tau \kappa \alpha \alpha \lambda \eta \theta \varepsilon ı \alpha)$. This is what matters, not where, but how (in reality, in the spirit of man, the highest part of man, and so in truth). All this is according to the Holy Spirit (Ro 8:5) who is the Spirit of truth (Joh 16:13 ). Here Jesus has said the final word on worship, one needed today.

Seeketh $(\zeta \eta \tau \varepsilon)$. The Father has revealed himself in the Son who is the truth (Joh 14:6,9 ). It does matter whether we have a true conception of God whom we worship.

To be his worshippers ( $\tau о ч \varsigma \pi \rho о \sigma к \nu \nu о v v \tau \alpha \varsigma ~ \alpha v \tau о v)$. Rather, "seeks such as those who worship him" (predicate accusative articular participle in apposition with totovtous (such). John pictures the Father as seeking worshippers, a doctrine running all through the Gospel (3:16; 6:44; 15:16; 1 Jo 4:10 ).

John 4:24
God is a Spirit ( $\pi v \varepsilon \cup \mu \alpha$ o $\theta \varepsilon o \varsigma)$. More precisely, "God is Spirit" as "God is Light" (1Jo 1:5 ), "God is Love" (1Jo 4:8). In neither case can we read Spirit is God, Light is God, Love is God. The non-corporeality of God is clearly stated and the personality of God also. All this is put in three words for the first time.

Must $(\delta \varepsilon)$. Here is the real necessity $(\delta \varepsilon)$, not the one used by the woman about the right place of worship (verse 20).

John 4:25

Messiah cometh (Mعббıаऽ $\varepsilon \rho \chi \varepsilon \tau \alpha$ ). Hebrew word in N.T. only here and 1:41 and explained by Xpıбтoc in both places. The Samaritans looked for a Messiah, a prophet like Moses (De 18:18). Simon Magus gave himself out in Samaria as some great one and had a large following (Ac 8:9). Pilate quelled an uprising in Samaria over a fanatical Messianic claimant (Josephus, Ant. XVIII. iv. 1).

When he is come (oтav $\varepsilon \lambda \theta \eta \varepsilon \kappa \varepsilon เ v o \varsigma) . ~ " W h e n e v e r ~ t h a t ~ o n e ~ c o m e s . " ~ I n d e f i n i t e ~ t e m p o r a l ~$ clause with $o \tau \alpha v(o \tau \varepsilon, \alpha v)$ and the second aorist active subjunctive. Wistfully she turns to this dim hope as a bare possibility about this strange "prophet."

He will declare unto us all things ( $\alpha v \alpha \gamma \gamma \varepsilon \lambda \varepsilon \eta \mu \nu \nu \alpha \pi \alpha \nu \tau \alpha$ ). Future active indicative of $\alpha v a \gamma \gamma \varepsilon \lambda \lambda \omega$, old and common verb to announce fully ( $\alpha v \alpha$, up and down). See also 16:13. Perhaps here is light on the knowledge of her life by Jesus as well as about the way to worship God.

John 4:26
I that speak unto thee am he ( $\mathrm{E} \gamma \omega \varepsilon \iota \mu$ o $\lambda \alpha \lambda \omega \nu \sigma o$ ). "I am he, the one speaking to thee." In plain language Jesus now declares that he is the Messiah as he does to the blind man (Joh 9:37).

John 4:27
Upon this $(\varepsilon \pi \tau o v \tau \omega)$. This idiom only here in N.T. At this juncture. Apparently the woman left at once when the disciples came.

They marvelled ( $\varepsilon \theta \alpha v \mu \alpha \zeta o v)$. Imperfect active describing the astonishment of the disciples as they watched Jesus talking with a woman.

Was speaking $(\varepsilon \lambda \alpha \lambda \varepsilon)$. As in 2:25, so here the tense is changed in indirect discourse from $\lambda \alpha \lambda \varepsilon$ to $\varepsilon \lambda \alpha \lambda \varepsilon$, an unusual idiom in Greek. However, o $\tau$ here may be "because" and then the imperfect is regular. It is not "with the woman" ( $\mu \varepsilon \tau \alpha \tau \eta \varsigma \gamma \cup v \alpha \iota \kappa$ ) , but simply "with a woman" ( $\mu \varepsilon \tau \alpha \gamma \nu \boldsymbol{\gamma} \boldsymbol{\jmath} \boldsymbol{\jmath})$. There was a rabbinical precept: "Let no one talk with a woman in the street, no, not with his own wife" (Lightfoot, Hor, Hebr. iii. 287). The disciples held Jesus to be a rabbi and felt that he was acting in a way beneath his dignity.

Yet no man said (ov $\delta \varepsilon ı \varsigma \mu \varepsilon \nu \tau o \varepsilon \iota \pi \varepsilon v)$. John remembers through the years their amazement and also their reverence for Jesus and unwillingness to reflect upon him.

John 4:28
Left her waterpot ( $\alpha \varphi \eta \kappa \varepsilon \nu \tau \eta \nu v \delta \rho \iota \alpha \nu$ ). First aorist active indicative of $\alpha \varphi \neg \eta \mu$, ingressive aorist, in her excitement and embarrassment. It was too large for speed anyhow (2:6). And says ( $\kappa \alpha \lambda \varepsilon \gamma \varepsilon$ ). Graphic historic present indicative again.

John 4:29
All things that ever I did ( $\pi \alpha v \tau \alpha \alpha \varepsilon \pi \circ \not \eta \sigma \alpha$ ).
Ha, not ood (as many as), no "ever" in the Greek. But a guilty conscience (verse 18f. ) led her to exaggerate a bit.

Can this be the Christ? ( $\mu \eta \tau$ оито¢ $\varepsilon \sigma \tau \iota v$ o X $\rho เ \sigma \tau о \sigma ;$ ). She is already convinced herself (verses 26 f . ), but she puts the question in a hesitant form to avoid arousing opposition. With a woman's intuition she avoided ovk and uses $\mu \eta \tau$. She does not take sides, but piques their curiosity.

John 4:30
They went out ( $\varepsilon \xi \eta \lambda \theta \mathrm{ov})$. Second aorist (effective) indicative of $\varepsilon \xi \varepsilon \rho \chi \circ \mu \alpha$, at once and in a rush.

And were coming to him ( $\kappa \alpha \eta \rho \chi о v \tau 0 \pi \rho \circ \varsigma \alpha \tau \tau \circ$ ). Imperfect middle, graphically picturing the long procession as they approached Jesus.

John 4:31
 "the next Sabbath" (Ac 13:42 ) and $\varepsilon v \tau \omega \mu \varepsilon \tau \alpha \xi v$ (Lu 8:1 ). M $\mathcal{\tau} \alpha \xi v$ means between.

Prayed him ( $\eta \rho \omega \tau \omega v$ avtov). Imperfect active, "kept beseeching him." For this late (Koine) use of $\varepsilon \rho \omega \tau \alpha \omega$, to beseech, instead of the usual sense to question see also verses 40,47 . Their concern for the comfort of Jesus overcame their surprise about the woman.

## John 4:32

Meat ( $\beta \rho \omega \sigma \tau v$ ). Originally the act of eating (Ro 14:17) from $\beta \iota \beta \rho \omega \sigma \kappa \omega$, but soon and commonly as that which is eaten like $\beta \rho \omega \mu \alpha$ once in John (verse 34). So here and 6:27,55 . Cf. vernacular English "good eating," "good eats."

I ... ye ( $\varepsilon \gamma \omega \ldots \nu \mu \varepsilon \varsigma)$. Emphatic contrast. Spiritual food Jesus had.
John 4:33
Hath any man brought him aught to eat? ( $M \eta \tau \iota \varsigma \eta \nu \varepsilon \gamma \kappa \varepsilon \nu \alpha \nu \tau \omega \varphi \alpha \gamma \varepsilon \iota \gamma ;$ ). Negative answer expected ( $\mu \eta$ ). "Did any one bring him (something) to eat?" During our absence, they mean. Second aorist active indicative of $\varphi \varepsilon \rho \omega$ ( $\eta \nu \varepsilon \gamma \kappa \varepsilon v$ ) and second aorist active infinitive of $\varepsilon \sigma \theta \iota \omega$ ( $\varphi \alpha \gamma \varepsilon เ v$ ), defective verbs both of them. See 4:7 for like infinitive construction ( $\delta$ оऽ $\pi \varepsilon เ v$ ).

John 4:34
To do the will (ıva $\pi о \imath \eta \sigma \omega$ тo $\theta \varepsilon \lambda \eta \mu \alpha$ ). Non-final use of $t v \alpha$ and the first aorist active subjunctive as subject or predicate nominative as in $6: 29 ; 15: 8 ; 17: 3$. The Messianic consciousness of Jesus is clear and steady $(5: 30 ; 6: 38)$. He never doubted that the Father sent him.

And to accomplish his work ( $\kappa \alpha \tau \varepsilon \lambda \varepsilon เ \omega \sigma \omega$ av $\tau \circ v \tau о \varepsilon \rho \gamma \circ v$ ). Hıva understood with $\tau \varepsilon \lambda \varepsilon \epsilon \omega \sigma \omega$ in like idiom, first aorist active subjunctive of $\tau \varepsilon \lambda \varepsilon \omega \circ \omega$ (from $\tau \varepsilon \lambda \varepsilon \omega \circ$ ), to bring to an end. See 5:36. In 17:4 (the Intercessory Prayer) he will say that he has done ( $\tau \varepsilon \lambda \varepsilon \omega \omega \sigma a \varsigma$ ) this task which the Father gave him to do. On the Cross Jesus will cry Tete $\lambda \varepsilon \sigma \tau \alpha$ (It is finished). He will carry through the Father's programme (Joh 3:16 ). That is his "food." He had been doing that in winning the woman to God.

John 4:35

Say not ye? ( $O v \chi$ v $\quad$ кєء $\lambda \varepsilon \gamma \varepsilon \tau \varepsilon$;). It is not possible to tell whether Jesus is alluding to a rural proverb of which nothing is known about there being four months from seedtime to harvest (a longer time than four months in fact) or whether he means that it was then actually four months to harvest. In the latter sense, since harvest began about the middle of April, it would be December when Jesus spoke.

There are yet four months ( $\varepsilon \tau \tau \varepsilon \tau \rho \alpha \mu \eta \nu \circ \varsigma \varepsilon \sigma \tau \iota v$ ). The use of $\varepsilon \tau$ (yet) and the fact that the space between seedtime and harvest is longer than four months ( $\tau \varepsilon \tau \rho \alpha$, Aeolic for $\tau \varepsilon \sigma \sigma \alpha \rho a$, and $\mu \eta \nu$, month) argue against the proverb idea.

And then cometh the harvest ( $\kappa \alpha$ о $\theta \varepsilon \rho เ \sigma \mu \circ \varsigma \varepsilon \rho \chi \varepsilon \tau \alpha)$. "And the harvest ( $\theta \varepsilon \rho \iota \sigma \mu \circ \varsigma$, from $\theta \varepsilon \rho \iota \zeta \omega$, rare in Greek writers) comes." The possible Iambic verse here is purely accidental as in 5:14.

Lift up your eyes ( $\varepsilon \pi \alpha \rho \alpha \tau \varepsilon$ тovৎ $о \varphi \theta \alpha \lambda \mu \circ v \varsigma v \mu \omega v$ ). First aorist active imperative of $\varepsilon \pi \alpha \iota \rho \omega$. Deliberate looking as in Joh 6:5 where $\theta \varepsilon \alpha o \mu \alpha$ also is used as here.

Fields ( $\chi \omega \rho a \varsigma)$. Cultivated or ploughed ground as in Lu 21:21.
White ( $\lambda \varepsilon \cup \kappa \alpha$ ). Ripened grain like grey hair (Mt 5:36).
Already unto harvest ( $\pi \rho \circ \varsigma \theta \varepsilon \rho \iota \sigma \mu \circ v \eta \delta \eta$ ). Probably $\eta \delta \eta$ (already) goes with verse 36. The Samaritans could already be seen approaching and they were the field "white for harvest." This is the meaning of Christ's parable. If it is the spring of the year and Christ can point to the ripened grain, the parable is all the plainer, but it is not dependent on this detail. Recall the parable of the sower in Mt 13 .

John 4:36
Already he that reapeth receiveth wages ( $\eta \delta \eta$ o $\theta \varepsilon \rho \iota \zeta \omega \nu \mu \iota \sigma \theta$ ov $\lambda \alpha \mu \beta \alpha v \varepsilon$ ). The spiritual harvester can gather his harvest without waiting four months. Jesus is reaping a harvest right now by the conversion of this woman. The labourer is worthy of his hire ( $\mathrm{Lu} 10: 7 ; 2 \mathrm{Ti}$ 2:6 ). John does not use $\mu$ юбӨоৎ (reward) again, but картоৎ ( 15:2-16), "fruit for life eternal" (cf. 4:14).

That he that soweth and he that reapeth may rejoice together ( $\imath v \alpha$ o $\sigma \pi \varepsilon \iota \rho \omega v$ ouov $\chi \alpha \iota \rho \eta$ ка о $\theta \varepsilon \rho ı \zeta \omega v)$. Final use of $\iota \alpha \alpha$ with present active subjunctive of $\chi \alpha \iota \rho \omega$, to rejoice, in the singular with o $\sigma \pi \varepsilon \iota \rho \omega \nu$ (the sower) and to be repeated with o $\theta \varepsilon \rho \iota \zeta \omega v$ (the reaper). The adverb ouov (together) elsewhere in N.T. only 20:4; 21:2; Ac 2:1 . Usually considerable time passes between the sowing and the reaping as in verse 35. Amos (Am 9:13) spoke of the time when "the ploughman shall overtake the reaper" and that has happened here with the joy of the harvest time (Isa 9:3). Jesus the Sower and the disciples as the reapers are here rejoicing simultaneously.

## John 4:37

For herein ( $\varepsilon v \gamma \alpha \rho \tau o v \tau \omega$ ). In this relation between the sower and the reaper.
The saying (o $\lambda \mathrm{o} \gamma \circ \varsigma$ ). Like $1 \mathrm{Ti} 1: 15 ; 3: 1$, etc. Probably a proverb that is particularly true ( $\alpha \lambda \eta \theta$ ıvoc for which see $1: 9$ ) in the spiritual realm.

One soweth, and another reapeth ( $\alpha \lambda \lambda$ ос $\varepsilon \sigma \tau \iota \nu$ о $\sigma \pi \varepsilon เ \rho \omega v$ ка $\alpha \lambda \lambda$ оऽ о $\theta \varepsilon \rho ı \zeta \omega v$ ). "One is the sower and another the reaper." It is sad when the sower misses the joy of reaping (Job 31:8) and has only the sowing in tears (Ps 126:5f. ). This may be the punishment for $\sin$ (De 28:30; Mic 6:15 ). Sometimes one reaps where he has not sown (De 6:11; Jos 24:13 ). It is the prerogative of the Master to reap (Mt 25:26f. ), but Jesus here lets the disciples share his joy.

John 4:38
I sent $(\varepsilon \gamma \omega \alpha \pi \varepsilon \sigma \tau \varepsilon \wedge \lambda)$. Emphatic use of $\varepsilon \gamma \omega$ and first aorist active indicative of $\alpha \pi о \sigma \tau \varepsilon \lambda \lambda \omega$ common in John for to send.
 котı $\alpha \omega$ for which see $4: 6$. So also кєкотıкабьv in next line. The disciples had done no sowing here in Sychar, only Jesus and the woman.

Others ( $\alpha \lambda \lambda \mathrm{o}$ : Jesus, the Baptist, the prophets).
And ye ( $\kappa \alpha$ v $\mu \varepsilon \iota \varsigma$ ). Emphatic contrast.
Have entered ( $\varepsilon \sigma \varepsilon \lambda \eta \lambda \nu \theta a \tau \varepsilon)$. Perfect active indicative of $\varepsilon \sigma \sigma \varepsilon \rho \chi \circ \mu \alpha$.
Into their labour ( (ءц тоv копоv $\alpha \cup \tau \omega v$ ). Into the fruit and blessed results of their toil (котос). This is always true as seen in Ac 8:5-7,14f.

John 4:39
Because of the saying of the woman who testified ( $\delta$ $\alpha \alpha$ тоv $\lambda о \gamma о \nu \tau \eta \varsigma \gamma \cup v a ı к о$, $\mu \alpha \rho \tau v \rho о и \sigma \eta \varsigma)$. She bore her witness clearly and with discretion. She told enough to bring her neighbours to Christ. They knew her evil life and she frankly confessed Christ's rebuke to her. She had her share in this harvest. How timid and cowardly we often are today in not giving our testimony for Christ to our neighbour.

John 4:40
Two days ( $\delta v o \eta \mu \varepsilon \rho \alpha \varsigma$ ). Accusative of extent of time. They wanted to cultivate the acquaintance of Jesus. So he remained in Sychar in a continuous revival, a most unexpected experience when one recalls the feeling between the Jews and the Samaritans (4:9). The reaping went on gloriously.

John 4:41
Many more ( $\pi 0 \lambda \lambda \omega \pi \lambda \varepsilon$ souc). "More by much" (instrumental case $\pi 0 \lambda \lambda \omega$ ) in comparison with just "many" ( $\pi$ о $\lambda \lambda$ o) of verse 39 . Jesus was reaping more rapidly than the woman did. But all were rejoicing that so many "believed" ( $\varepsilon \pi \iota \sigma \tau \varepsilon \cup \sigma a v$, really believed).

John 4:42
Not because of thy speaking (oukะ $\delta \iota \alpha \tau \eta v \sigma \eta v \lambda \alpha \lambda \iota a v$ ). "No longer because of thy talk," good and effective as that was. $\Lambda \alpha \lambda \iota \alpha$ (cf. $\lambda \alpha \lambda \varepsilon \omega$ ) is talk, talkativeness, mode of speech, one's vernacular, used by Jesus of his own speech (Joh 8:43).

We have heard ( $\alpha \kappa \eta \kappa о \alpha \mu \varepsilon v$ ). Perfect active indicative of $\alpha \kappa \sigma v \omega$, their abiding experience.
For ourselves (auto). Just "ourselves."

The Saviour of the world (o $\sigma \omega \tau \eta \rho$ тov коб $\mu \circ$ ). See Mt 1:21 for sosei used of Jesus by the angel Gabriel. John applies the term $\sigma \omega \tau \eta \rho$ to Jesus again in 1Jo 4:14. Jesus had said to the woman that salvation is of the Jews (verse 22). He clearly told the Samaritans during these two days that he was the Messiah as he had done to the woman (verse 26) and explained that to mean Saviour of Samaritans as well as Jews. Sanday thinks that probably John puts this epithet of Saviour in the mouth of the Samaritans, but adds: "At the same time it is possible that such an epithet might be employed by them merely as synonymous with Messiah." But why "merely"? Was it not natural for these Samaritans who took Jesus as their "Saviour," Jew as he was, to enlarge the idea to the whole world? Bernard has this amazing statement on Joh 4:42 : "That in the first century Messiah was given the title sot $\boxtimes \mathrm{r}$ is not proven." The use of "saviour and god" for Ptolemy in the third century B.C. is well known. "The ample materials collected by Magie show that the full title of honour, Saviour of the world, with which St. John adorns the Master, was bestowed with sundry variations in the Greek expression on Julius Caesar, Augustus, Claudius, Vespasian, Titus, Trajan, Hadrian, and other Emperors in inscriptions in the Hellenistic East" (Deissmann, Light, etc., p. 364). Perhaps Bernard means that the Jews did not call Messiah Saviour. But what of it? The Romans so termed their emperors and the New Testament so calls Christ (Lu 2:11; Joh 4:42; Ac 5:31; 3:23; Php 3:20; Eph 5:23; Tit 1:4; 2:13; 3:6; 2Ti 1:10; 2Pe 1:1,11; 2:20; 3:2,18 ). All these are writings of the first century A.D. The Samaritan villagers rise to the conception that he was the Saviour of the world.

John 4:43
After the two days (Мغта таৎ $\delta v o \eta \mu \varepsilon \rho a \varsigma)$. Those in verse 40.
Into Galilee ( $\varepsilon ı \varsigma \tau \eta \nu\left\lceil\alpha \lambda_{\wedge} \lambda \alpha \iota \alpha v\right)$. As he had started to do (verse 3) before the interruption at Sychar.

John 4:44
For Jesus himself testified (avтoৎ $\gamma \alpha \rho$ I $\eta \sigma о \cup \varsigma \varepsilon \mu \alpha \rho \tau \nu \rho \eta \sigma \varepsilon v$ ). John's explanation of the conduct of Jesus by quoting a proverb often used by Jesus (Mr 6:4; Mt 13:57; Lu 4:24 in reference to Nazareth), but not necessarily used by Jesus on this occasion. A similar proverb has been found in Plutarch, Pliny, Seneca.

A prophet hath no honour in his own country ( $\pi \rho \circ \varphi \eta \tau \eta \varsigma \varepsilon \nu \tau \eta เ \delta i \alpha \pi \alpha \tau \rho เ \delta \tau \tau \mu \eta v$ ovk $\varepsilon \chi \varepsilon$ ). What is meant by $\pi \alpha \tau \rho \iota \delta$ ? In the Synoptics (Lu 4:24; Mr 6:4; Mt 13:57) the reference is to Nazareth where he was twice rejected. But what has John in mind in quoting it here? He probably knew the quotations in the Synoptics. Does John refer to Judea by "his own country"? If so, the application hardly fits for he had already explained that Jesus was leaving Judea because he was too popular there ( 4:1-3). If he means Galilee, he immediately mentions the cordial welcome accorded Jesus there (verse 45). But even so this is probably John's meaning for he is speaking of the motive of Jesus in going into Galilee where he had not yet laboured and where he apparently had no such fame as in Judea and now in Samaria.

## John 4:45

So when (ote ouv). Transitional use of ouv, sequence, not consequence.
Received him ( $\varepsilon \delta \varepsilon \xi \alpha v \tau 0 ~ a v \tau o v)$. First aorist middle of $\delta \varepsilon \chi \circ \mu \alpha$, "welcomed him." Jesus had evidently anticipated a quiet arrival.

Having seen ( $\varepsilon \omega \rho \alpha \kappa о \tau \varepsilon \varsigma)$. Perfect active participle of opa $\omega$. Note $\theta \varepsilon \omega \rho$ оuvt $\varepsilon \varsigma$ in 2:23 about this very thing at the feast in Jerusalem. The miracles of Jesus at that first passover made a stir.

For they also went ( $\kappa \alpha \alpha v \tau о ~ \gamma \alpha \rho ~ \eta \lambda \theta o v$ ). The Samaritans did not go and so Jesus was a new figure to them, but the Galileans, as orthodox Jews, did go and so were predisposed in his favour.

John 4:46
Again ( $\pi \alpha \lambda \imath v$ ). A second time.
Unto Cana ( $\varepsilon \varsigma \varsigma ~ \tau \eta \nu K a v \alpha$ ). Note article, "the Cana of Galilee" already mentioned in 2:1.

Where he made the water wine (о ооv єтопп $\sigma \varepsilon v$ тo $v \delta \omega \rho$ oıvov). That outstanding first miracle would still be remembered in Cana and would indicate that Jesus had some friends there.

Nobleman ( $\beta \alpha \sigma \iota \lambda \iota \kappa \varsigma)$. One connected with the king ( $\beta \alpha \sigma \iota \lambda \varepsilon u \varsigma$ ), whether by blood or by office. Probably here it is one of the courtiers of Herod the tetrarch of Galilee, Chuzas ( $\operatorname{Lu} 8: 3$ ), Manaen ( $\operatorname{Ac~13:1}$ ), or some one else. Some of the manuscripts used $\beta a \sigma \iota \lambda_{ı} \sigma \kappa \circ$, a petty king, a diminutive of $\beta \alpha \sigma \iota \lambda \varepsilon u \varsigma$.

Was sick ( $\eta \sigma \theta \varepsilon v \varepsilon$ ). Imperfect active of $\alpha \sigma \theta \varepsilon v \varepsilon \omega$ ( $\alpha$ privative and $\sigma \theta \varepsilon v o c$, without strength, Mt 25:36 ), continued sick.

At Capernaum ( $\varepsilon v$ Ka $\alpha \rho \nu \alpha o v \mu$ ). Some miles from Cana near where the Jordan enters the Sea of Galilee.

John 4:47
When he heard ( $\alpha \kappa 0 \cup \sigma \alpha \varsigma)$. First aorist active participle of $\alpha \kappa 0 v \omega$. The news spread rapidly about Jesus.

Was come ( $\eta \kappa \varepsilon$ ). Present active indicative of $\eta \kappa \omega$, one of the perfective presents, retained in indirect discourse. He had heard the people talk about the miracles in Jerusalem and the first one in Cana.

Went and besought ( $\alpha \pi \eta \lambda \theta \varepsilon \nu \kappa \alpha \eta \rho \omega \tau \alpha$ ). Ingressive aorist indicative (went off at once) and imperfect active ( $\eta \rho \omega \tau \alpha$, began to beg and kept it up).

That he would come down (ıva кат $\alpha \beta \eta$, $\imath \propto \alpha$ and second aorist active subjunctive of кат $\alpha \beta a เ v \omega$, come down at once)
and heal his son ( $\kappa \alpha เ \alpha \sigma \eta \tau \alpha$ av $\frac{1}{}$ रov vov, $t v \alpha$ construction, sub-final use or object clause, with first aorist middle subjunctive of $1 \alpha 0 \mu \alpha$, completely heal).

For he was at the point of death ( $\eta \mu \varepsilon \lambda \lambda \varepsilon v \gamma \alpha \rho \alpha \pi \sigma \theta v \eta \sigma \kappa \varepsilon เ v$ ). Reason ( $\gamma \alpha \rho$ ) for the urgency. Imperfect active of $\mu \varepsilon \lambda \lambda \omega$ with present active infinitive old and common verb for what is about to be and it is used with the infinitive present as here, the aorist infinitive ( Re 13:16), or the future infinitive (Ac 11:28). The idiom is used of the impending death of Jesus (Joh 11:51; 12:33; 18:32).

John 4:48
 aorist active subjunctive of opa $\omega$ ). Jesus is not discounting his "signs and wonders" ( $\sigma \eta \mu \varepsilon \iota \alpha$ ка $\tau \varepsilon \rho \alpha \tau \alpha$, both words together here only in John, though common in N.T. as in Mt 24:24; Mr 13:22; Ac 2:19,22,43; 2Th 2:9; Heb 2:4), though he does seem disappointed that he is in Galilee regarded as a mere miracle worker.

Ye will in no wise believe ( $o v \mu \eta \pi / \sigma \tau \varepsilon v \sigma \eta \tau \varepsilon$ ). Strong double negative with aorist active subjunctive of $\pi\llcorner\sigma \tau \varepsilon v \omega$, picturing the stubborn refusal of people to believe in Christ without miracles.

## John 4:49

Sir (Kupız). See 1:38.
Come down ( $\kappa \alpha \tau \alpha \beta \eta \theta$ ). Second aorist active imperative, tense and tone of urgency.
 second aorist active infinitive of $\alpha \pi \circ \theta \nu \eta \sigma \kappa \omega$ and accusative of general reference, "before dying as to my child." Bengel notes that he only thought Jesus had power before death as even Martha and Mary felt at first (11:21,32). But the father's heart goes out to Jesus.

## John 4:50

Thy son liveth (o vooc $\sigma 0 v \zeta \eta$ ). "Thy son is living," and will not now die, Jesus means. Words too good and gracious to be true. His son is healed without Jesus even going to Capernaum, "absent treatment" so to speak, but without the cure being absent.

Believed the word ( $\varepsilon \pi\lrcorner \sigma \tau \varepsilon v \sigma \varepsilon v \tau \omega \lambda o \gamma \omega$ ). Instantaneous faith (aorist active indicative), trusted the word (dative case $\lambda o \gamma \omega$ ).

Went his way (غпорعטعто). Inchoative imperfect middle, "started on his way," acted on his faith.

John 4:51
As he was now going down ( $\eta \delta \eta$ avтоv катаßаıvovтоৎ). Genitive absolute in-spite of the fact that $\alpha v \tau \omega$ (associative instrumental case with $v \pi \eta v \tau \eta \sigma \alpha v$ aorist active indicative of vпаvта $\omega$ ) is near.

That his son lived (от o таıร $\alpha \cup \tau 0 v \zeta \eta$ ). Present active indicative preserved in indirect discourse (cf. the words of Jesus in verse 50). Note $\pi$ aıs here (only example in John), vios in 50 , $\pi$ aı $\delta$ เov (diminutive of tenderness) in 49.

John 4:52
Inquired ( $\varepsilon \pi v \theta \varepsilon \tau \sigma$ ). Second aorist middle indicative of $\pi v v \theta a v o \mu \alpha$.

Began to mend (кон廿отєроv $\varepsilon \sigma \chi \varepsilon v$ ). Second aorist ingressive active indicative of $\varepsilon \chi \omega$ (took a turn, got better) and comparative of adverb ко $\mu \psi \omega$ c. Arrian (_Epictetus iii. 10.13) has ко $\mu \psi \omega \varsigma \varepsilon \chi \varepsilon \varsigma \varsigma ~ f r o m ~ a ~ p h y s i c i a n, ~ " T h o u ~ h a s t ~ i t ~ f i n e, " ~ " T h o u ~ a r t ~ d o i n g ~ f i n e l y . " ~ T h e ~ p a p y r i ~$ give several similar examples. $К о \mu \psi \omega \varsigma$ (neat) is from ко $\mu \varepsilon \omega$, to take care of.

At the seventh hour ( $\omega \rho \alpha v \varepsilon \beta \delta o \mu \eta \nu$ ). The accusative case without a preposition as in Re 3:3 , though we have $\pi \varepsilon \rho \omega \rho a v \varepsilon v a \tau \eta \nu$ (about the ninth hour) in Ac 10:3. See the accusative also in Ex 9:18 $\tau \alpha v \tau \eta \nu \tau \eta \nu \omega \rho \alpha v$ avpıov (tomorrow about this hour). The accusative has the notion of extension and can be thus loosely used. It can even mean here "during the seventh hour." In verse 53 the locative is more exact, "at that hour" ( $\varepsilon v \varepsilon \kappa \varepsilon เ v \eta \tau \eta \omega \rho \alpha$ ). The seventh hour would be (Roman time) seven P.M.

John 4:53
So the father knew ( $\varepsilon \gamma \nu \omega$ ovv o $\pi \alpha \tau \eta \rho$ ). Second aorist active indicative of $\gamma \downarrow \nu \omega \sigma \kappa \omega$. Inferential use of ouv.

Himself believed ( $\varepsilon \pi \iota \sigma \tau \varepsilon \cup \sigma \varepsilon v$ avtoc). Not just the word of Jesus (verse 50), but complete faith in Jesus himself as the Messiah, absolute use of $\pi \iota \sigma \tau \varepsilon v \omega$ as in 1:7.

And his whole house ( $\kappa \alpha \eta$ окка $\alpha \cup \tau о v$ ). All his family, the first example of a whole family believing in Jesus like the later case of Crispus (Ac 18:8).

John 4:54
The second sign that ( $\delta \varepsilon v \tau \varepsilon \rho \circ v \sigma \eta \mu \varepsilon \iota \sigma$ ). No article, simply predicate accusative, "This again a second sign did Jesus having come out of Judea into Galilee." The first one was also in Cana (2:1ff. ), but many were wrought in Jerusalem also (2:23).

## John 5

John 5:1
After these things ( $\mu \varepsilon \tau \alpha \tau \alpha \cup \tau \alpha)$. John is fond of this vague phrase (3:22; 6:1). He does not mean that this incident follows immediately. He is supplementing the Synoptic Gospels and does not attempt a full story of the work of Jesus. Some scholars needlessly put chapter 5 after chapter 6 because in chapter 6 Jesus is in Galilee as at the end of chapter 4 . But surely it is not incongruous to think of Jesus making a visit to Jerusalem before the events in chapter 6 which undoubtedly come within a year of the end ( 6:4).

A feast of the Jews ( $\varepsilon o \rho \tau \eta \tau \omega v$ Iov $\alpha a \iota \omega v$ ). Some manuscripts have the article $(\eta)$ "the feast" which would naturally mean the passover. As a matter of fact there is no way of telling what feast it was which Jesus here attended. Even if it was not the passover, there may well be another passover not mentioned besides the three named by John (2:13,23; 6:4: 12:1).

Went up $(\alpha v \varepsilon \beta \eta)$. Second aorist active indicative of $\alpha v \alpha \beta \alpha \iota v \omega$. It was up towards Jerusalem from every direction save from Hebron.

John 5:2
There is ( $\varepsilon \sigma \tau \iota v)$. Bengel argues that this proves a date before the destruction of Jerusalem, but it is probably only John's vivid memory.

By the sheep gate ( $\varepsilon \pi \tau \eta \pi \rho \circ \beta a \tau \iota \kappa \eta$ ). Supply $\pi \nu \lambda \eta$ (gate) which occurs with the adjective $\pi \rho о \beta \alpha \tau ⿺ \kappa \eta$ (pertaining to sheep, $\pi \rho о \beta a \tau \alpha$ ) in Ne 3:1,22 .

A pool ( $\kappa о \lambda \nu \mu \beta \eta \theta \rho \alpha$ ). A diving or swimming pool (from ко $\lambda \nu \mu \beta \alpha \omega$, to swim, Ac 27:43 ), old word, only here in N.T.

Which is called ( $\eta \varepsilon \pi \lambda \lambda \varepsilon \gamma \circ \mu \varepsilon v \eta$ ). "The surnamed" (present passive participle, only N.T. example except Ac 15:40 first aorist middle participle $\varepsilon \pi i \lambda \varepsilon \xi a \mu \varepsilon v o \varsigma)$ ).

In Hebrew (Eßpaıбт). "In Aramaic" strictly as in 19:13,17,20; 20:16; Re 9:11; 16:16.
Bethesda (Be $\theta \varepsilon \sigma \delta \alpha$, or House of Mercy. So A C Syr cu). Aleph D L 33 have B $\varepsilon Ө \zeta \alpha \theta a$ or House of the Olive, while B W Vulg. Memph. have BeӨoaıסa.

Having five porches ( $\pi \varepsilon \nu \tau \varepsilon \sigma \tau \circ \alpha \varsigma \varepsilon \chi \circ v \sigma \alpha)$ ). $\Sigma \tau 0 \alpha$ was a covered colonnade where people can gather from which Stoic comes (Ac 17:18). See Joh 10:23; Ac 3:11. Schick in 1888 found twin pools north of the temple near the fortress of Antonia one of which has five porches. It is not, however, certain that this pool existed before A.D. 70 when the temple was destroyed (Sanday, Sacred Sites of the Gospels, p. 55). Some have identified it with the Pool of Siloam (9:7), though John distinguishes them. There is also the Virgin's Well, called the Gusher, because it periodically bubbles over from a natural spring, a kind of natural siphon. This is south of the temple in the Valley of Kedron and quite possibly the real site.

John 5:3
In these ( $\varepsilon v$ tautaıc). In these five porches.

Lay (катєкยєто). Imperfect middle of катакєца, to lie down, singular number because $\pi \lambda \eta \theta$ oc (multitude) is a collective substantive.

Withered ( $\xi \eta \rho \omega v$ ). Old adjective $\xi \eta \rho o \varsigma$ for dry, wasted as the hand (Mt 12:10). The oldest and best manuscripts omit what the Textus Receptus adds here "waiting for the moving of the water" ( $\varepsilon \kappa \delta \varepsilon \chi \circ \mu \varepsilon v \circ \nu \tau \eta \nu \tau 0 v$ v $\delta \alpha \tau о \varsigma \kappa \kappa \nu \eta \sigma เ \nu)$, a Western and Syrian addition to throw light on the word $\tau \alpha \rho \alpha \chi \theta \eta$ (is troubled) in verse 7.

John 5:4
All of this verse is wanting in the oldest and best manuscripts like Aleph B C D W 33 Old Syriac, Coptic versions, Latin Vulgate. It is undoubtedly added, like the clause in verse 3, to make clearer the statement in verse 7 . Tertullian is the earliest writer to mention it. The Jews explained the healing virtues of the intermittent spring by the ministry of angels. But the periodicity of such angelic visits makes it difficult to believe. It is a relief to many to know that the verse is spurious.

John 5:5
Which had been thirty and eight years ( $\tau \rho ⿺ \alpha \kappa о \nu \tau \alpha \kappa \alpha$ окт $\varepsilon \tau \tau \eta \chi \omega v$ ). Literally, "having thirty and eight years," "having spent thirty and eight years."

John 5:6
Knew that he had been a long time ( $\gamma$ vovc o兀 $\pi о \lambda \nu v \eta \delta \eta \chi \rho \circ v o v \varepsilon \chi \varepsilon$ ). How Jesus "knew" ( $\gamma v o v \varsigma$, second aorist active participle of $\gamma \iota v \omega \sigma \kappa \omega$ ) we are not told, whether supernatural knowledge (2:24f. ) or observation or overhearing people's comments. In $\eta \delta \eta \varepsilon \chi \varepsilon$ we have a progressive present active indicative, "he has already been having much time" ( $\chi$ povov, accusative of extent of time).

Wouldest thou be made whole? ( $\Theta \varepsilon \lambda \varepsilon ı \varsigma ~ v ү ı \varsigma \varsigma ~ \gamma \varepsilon v \varepsilon \sigma \theta a ı ;)$. "Dost thou wish to become whole?" Predicate nominative $v \gamma \iota \eta \varsigma$ with $\gamma \varepsilon v \varepsilon \sigma \theta \alpha$ (second aorist middle infinitive). It was a pertinent and sympathetic question.

John 5:7
When the water is troubled (o $\tau \alpha v \tau \alpha \rho \alpha \chi \theta \eta$ тo $v \delta \omega \rho$ ). Indefinite temporal clause with otav and the first aorist passive subjunctive of tapa $\sigma \sigma \omega$, old verb to agitate (Mt 2:3). The popular belief was that, at each outflow of this intermittent spring, there was healing power in the water for the first one getting in.

To put me into the pool (ıva $\beta \alpha \lambda \eta \mu \varepsilon \varepsilon ı \varsigma \tau \eta v \kappa о \lambda \nu \mu \beta \eta \theta \rho \alpha v$ ). Final use of $t v \alpha$ and the second aorist active subjunctive of $\beta \alpha \lambda \lambda \omega$, "that he throw me in" quickly before any one else. For this use of $\beta \alpha \lambda \lambda \omega$ see Mr 7:30; Lu 16:20.

But while I am coming ( $\varepsilon v \omega \delta \varepsilon \varepsilon \rho \chi o \mu \alpha)$. Temporal use of the relative, "in which time" ( $\chi \rho \circ v \omega$ or $\kappa \alpha \iota \omega$ understood). $E \gamma \omega$ (I) is emphatic.

John 5:8
 Present active imperative of $\varepsilon \gamma \varepsilon \iota \rho \omega$, a sort of exclamation, like our "Get up." The first active
imperative ( $\alpha \rho \circ v$ of $\alpha \iota \rho \omega$ ) means to pick up the pallet, and then "go on walking" (present

John 5:9
Took up his bed and walked ( $\eta \rho \varepsilon$ тоv краßаттоv avтоט ка лєрєєпатє). The same distinction in tenses in the same verbs preserved, punctiliar action in $\eta \rho \varepsilon$ (first aorist active of $\alpha u \rho \omega$, took it up at once) and linear act (imperfect active of $\pi \varepsilon \rho \iota \pi \alpha \tau \varepsilon \omega$, went on walking).

The sabbath on that day ( $\sigma \alpha \beta \beta \alpha \tau 0 v \varepsilon v \varepsilon \kappa \varepsilon เ v \eta \tau \eta \eta \mu \varepsilon \rho \alpha$ ). The first of the violations of the Sabbath rules of the Jews by Jesus in Jerusalem that led to so much bitterness (cf. 9:14,16 ). This controversy will spread to Galilee on Christ's return there (Mr 2:23-3:6; Mt 12:1-14; Lu 6:1-11).

John 5:10
Unto him that was cured ( $\tau \omega \tau \varepsilon \theta \varepsilon \rho a \pi \varepsilon \nu \mu \varepsilon v \omega$ ). Perfect passive articular participle of $\theta \varepsilon \rho a \pi \varepsilon \cup \omega$ (only example in John), "to the healed man." See Mt 8:7.

To take up thy bed ( $\alpha \rho \alpha$ тov кр $\alpha \beta \alpha \tau \tau 0 v$ ). The very words of Jesus (verse 8), only infinitive (first aorist active). Carrying burdens was considered unlawful on the Sabbath (Ex 23:12; Ne 13:19; Jer 17:21 ). Stoning was the rabbinical punishment. The healing of the man was a minor detail.

John 5:11
But he answered (os $\delta \varepsilon \alpha \pi \varepsilon \kappa \rho \iota \theta \eta$ ). Demonstrative o (But this one) and deponent use of $\alpha \pi \varepsilon \kappa \rho ı \theta \eta$ (first aorist passive indicative of $\alpha \pi о к \rho ı v o \mu \alpha$ with no passive force).

The same (عкะเvoc). "That one," emphatic demonstrative as often in John (1:18,33; 9:37; 10:1, etc.). The man did not know who Jesus was nor even his name. He quotes the very words of Jesus.

Whole (vүıף). Predicate accusative agreeing with $\mu \varepsilon$ (me).
John 5:12
Who is the man? (Tıৎ $\varepsilon \sigma \tau \iota v$ o $\alpha v \theta \rho \omega \pi$ об;). Contemptuous expression, "Who is the fellow?" They ask about the command to violate the Sabbath, not about the healing.

John 5:13
He that was healed (o $\alpha \theta \theta \varepsilon \varsigma)$ ). First aorist passive articular participle of tao $\mu \alpha$ (John's usual word).

Who it was ( $\tau \iota \varsigma \varepsilon \sigma \tau \iota v$ ). Present tense preserved in indirect question.
Had conveyed himself away ( $\varepsilon \xi \varepsilon v \varepsilon v \sigma \varepsilon v$ ). First aorist active indicative of $\varepsilon \kappa v \varepsilon \omega$, old verb to swim out, to slip out, or from $\varepsilon \kappa v \varepsilon v \omega$, to turn out, to turn the head to one side (to one side with which compare evevevov, they nodded, Lu 1:62 ). Either of these verbs can explain the form here. The aorist tense simply states an antecedent action without being a pastperfect.

A multitude being in the place ( $o \chi \lambda o v$ ov $\tau \circ \varsigma \varepsilon \nu \tau \omega \tau \circ \pi \omega$ ). Genitive absolute and the reason for Christ's departure.

John 5:14
Findeth him (evpıoкع autov). Dramatic present as in 1:45, possibly after search as in 9:35.

Sin no more ( $\mu \eta \kappa \varepsilon \tau ~ \alpha \mu \alpha \rho \tau \alpha v \varepsilon$ ). "No longer go on sinning." Present active imperative with $\mu \eta \kappa \varepsilon \tau$, a clear implication that disease was due to personal $\sin$ as is so often the case. Jesus used the same words to the woman taken in adultery in the spurious passage (Joh 8:11 ). He had suffered for 38 years. All sickness is not due to personal $\sin$ ( 9:3), but much is and nature is a hard paymaster. Jesus is here living up to his name (Mt 1:21).

Lest a worse thing befall thee ( $เ v \alpha \mu \eta \chi \varepsilon \iota \rho \circ v \sigma o \tau \gamma \varepsilon v \eta \tau \alpha$ ). Negative final clause with second aorist middle subjunctive of $\gamma ı v o \mu \alpha$. X $\varepsilon \rho \rho \frac{v}{}$ is comparative of какоৎ, bad. Worse than the illness of 38 years, bad as that is. He will now be sinning against knowledge.

John 5:15
Went away and told ( $\alpha \pi \eta \lambda \theta \varepsilon v \kappa \alpha \varepsilon \iota \pi \varepsilon v$ ). Both aorist active indicatives. Instead of giving heed to the warning of Jesus about his own sins he went off and told the Jews that now he knew who the man was who had commanded him to take up his bed on the Sabbath Day, to clear himself with the ecclesiastics and escape a possible stoning.

That it was Jesus (oт I $\eta \sigma 0 \cup \varsigma$ ع $\varepsilon \tau \iota v$ ). Present indicative preserved in indirect discourse. The man was either ungrateful and wilfully betrayed Jesus or he was incompetent and did not know that he was bringing trouble on his benefactor. In either case one has small respect for him.

John 5:16
Persecute ( $\varepsilon \delta \omega \kappa \kappa \circ v$ ). Inchoative imperfect, "began to persecute" and kept it up. They took this occasion as one excuse ( $\delta$ ia tov to, because of this). They disliked Jesus when here first (2:18) and were suspicious of his popularity ( $4: 1$ ). Now they have cause for an open breach.

Because he did (ot $\varepsilon \pi \frac{1}{} \varepsilon$ ). Imperfect active, not just this one act, but he was becoming a regular Sabbath-breaker. The Pharisees will watch his conduct on the Sabbath henceforth (Mr 2:23; 3:2).

John 5:17
Answered ( $\alpha \pi \varepsilon \rho เ v a \tau о)$. Regular aorist middle indicative of $\alpha \pi о к \rho เ v о \mu \alpha$, in John here only and verse 19 , elsewhere $\alpha \pi \varepsilon \kappa \rho \dagger \theta \eta$ as in verse 11.

My Father (o $\pi \alpha \tau \varepsilon \rho \mu \circ v$ ). Not "our Father," claim to peculiar relation to the Father.
Worketh even until now ( $\varepsilon \omega \varsigma \alpha \rho \tau \varepsilon \rho \gamma \alpha \zeta \varepsilon \tau \alpha)$. Linear present middle indicative, "keeps on working until now" without a break on the Sabbath. Philo points out this fact of the continuous activity of God. Justin Martyr, Origen and others note this fact about God. He made the Sabbath for man's blessing, but cannot observe it himself.

And I work ( $\kappa \alpha \gamma \omega \varepsilon \rho \gamma \alpha \zeta о \mu \alpha$ ). Jesus puts himself on a par with God's activity and thus justifies his healing on the Sabbath.

John 5:18
Sought the more ( $\mu \alpha \lambda \lambda o v \varepsilon \zeta \eta \tau o v v)$. Imperfect active of $\zeta \eta \tau \varepsilon \omega$, graphic picture of increased and untiring effort "to kill him" (avtov atoктєıva, first aorist active, to kill him off and be done with him). John repeats this clause "they sought to kill him" in 7:1,19,25; 8:37,40 . Their own blood was up on this Sabbath issue and they bend every energy to put Jesus to death. If this is a passover, this bitter anger, murderous wrath, will go on and grow for two years.

Not only brake the Sabbath (ov $\mu \circ v o v \varepsilon \lambda v \varepsilon \tau о \sigma \alpha \beta \beta a \tau o v$ ). Imperfect active of $\lambda v \omega$. He was now a common and regular Sabbath-breaker. $\Lambda v \omega$ means to loosen, to set at naught. The papyri give examples of $\lambda v \omega$ in this sense like $\lambda v \varepsilon \iota v \tau \alpha \pi \varepsilon v \theta \eta$ (to break the period of mourning). This was the first grudge against Jesus, but his defence had made the offence worse and had given them a far graver charge.

But also called God his own Father ( $\alpha \lambda \lambda \alpha \kappa \alpha \pi \alpha \tau \varepsilon \rho \alpha \iota \operatorname{s} \circ v \varepsilon \lambda \varepsilon \gamma \varepsilon \tau о v \theta \varepsilon \circ v$ ). "His own" ( $\delta$ \&ov) in a sense not true of others. That is precisely what Jesus meant by "My Father." See Ro 8:32 for o $\begin{aligned} & \text { ©ıos vioc, "his own Son." }\end{aligned}$

Making himself equal with God ( $\sigma \circ v \varepsilon \alpha v \tau o v \pi o \iota \omega \nu \tau \omega \theta \varepsilon \omega$ ). I $\sigma \circ \varsigma$ is an old common adjective (in papyri also) and means
equal. In Php 2:6 Paul calls the Pre-incarnate Christ $\tau \sigma \alpha \theta \varepsilon \omega$, "equal to God" (plural $\iota \sigma \alpha$, attributes of God). Bernard thinks that Jesus would not claim to be tooc $\theta \varepsilon \omega$ because in Joh 14:28 he says: "The Father is greater than I." And yet he says in 14:7 that the one who sees him sees in him the Father. Certainly the Jews understood Jesus to claim equality with the Father in nature and privilege and power as also in 10:33; 19:7 . Besides, if the Jews misunderstood Jesus on this point, it was open and easy for him to deny it and to clear up the misapprehension. This is precisely what he does not do. On the contrary Jesus gives a powerful apologetic in defence of his claim to equality with the Father (verses 19-47).

John 5:19
The Son (o vios). The absolute use of the Son in relation to the Father admitting the charge in verse 18 and defending his equality with the Father.

Can do nothing by himself (ov $\delta v v a \tau \alpha \pi о เ \varepsilon เ v ~ \alpha \varphi ' \varepsilon \alpha v \tau o v ~ o v \delta \varepsilon v)$ ). True in a sense of every man, but in a much deeper sense of Christ because of the intimate relation between him and the Father. See this same point in $5: 30 ; 7: 28 ; 8: 28 ; 14: 10$. Jesus had already made it in $5: 17$. Now he repeats and defends it.

But what he seeth the Father doing ( $\alpha \nu \mu \eta \tau \beta \lambda \varepsilon \pi \eta \tau \sim \nu \pi \alpha \tau \varepsilon \rho \alpha \pi o เ o v \nu \tau \alpha$ ). Rather, "unless he sees the Father doing something." Negative condition ( $\alpha \nu \mu \eta=\varepsilon \alpha \nu \mu \eta$, if not, unless) of third class with present (habit) subjunctive ( $\beta \lambda \varepsilon \pi \eta$ ) and present active participle ( $\pi o t o v v \tau \alpha$ ). It is a supreme example of a son copying the spirit and work of a father. In his
work on earth the Son sees continually what the Father is doing. In healing this poor man he was doing what the Father wishes him to do.

For what things soever he doeth, these the Son also doeth in like manner ( $\alpha \gamma \alpha \rho \alpha v$
 active subjunctive ( $\pi$ оוף). Note єкعıvoc, emphatic demonstrative, that one, referring to the Father. This sublime claim on the part of Jesus will exasperate his enemies still more.

John 5:20
Loveth ( $\varphi \backslash \lambda \varepsilon$ ). In 3:35 we have $\alpha \gamma \alpha \pi \alpha$ from $\alpha \gamma \alpha \pi \alpha \omega$, evidently one verb expressing as noble a love as the other. Sometimes a distinction (21:17) is made, but not here, unless $\varphi \iota \lambda \varepsilon \omega$ presents the notion of intimate friendship ( $\varphi \iota \lambda o \varsigma$, friend), fellowship, the affectionate side, while a $\gamma \alpha \pi \alpha \omega$ (Latin diligo) is more the intelligent choice. But John uses both verbs for the mystery of love of the Father for the Son.

Greater works than these ( $\mu \varepsilon 亡 \zeta о v \alpha$ 亩 comparative $\mu \varepsilon \zeta$ ¢ova (from $\mu \varepsilon \gamma \alpha \varsigma$, great). John often uses $\varepsilon \rho \gamma \alpha$ for the miracles of Christ ( $5: 36 ; 7: 3,21 ; 10: 25,32,38$, etc.). It is the Father who does these works ( $14: 10$ ). There is more to follow. Even the disciples will surpass what Christ is doing in the extent of the work ( 14:12). $\Delta \varepsilon ı \xi \varepsilon$ is future active indicative of $\delta \varepsilon ו \kappa v v \mu$, to show. See also 10:32.
 subjunctive of $\theta \alpha \nu \mu \alpha \zeta \omega$. Wonder belongs to childhood and to men of knowledge. Modern science has increased the occasion for wonder. Clement of Alexandria has a saying of Jesus: "He that wonders shall reign, and he that reigns shall rest."

John 5:21
Quickeneth whom he will (ovя $\theta \varepsilon \lambda \varepsilon \zeta \omega о \pi о \iota \varepsilon$ ). Present active indicative of $\zeta \omega о \pi о เ \varepsilon \omega$ (from $\zeta \omega о \pi о ь \varsigma \varsigma$, making alive), common in Paul (1Co 15:45, etc.). As yet, so far as we know, Jesus had not raised the dead, but he claims the power to do it on a par with the power of the Father. The raising of the son of the widow of Nain (Lu 7:11-17) is not far ahead, followed by the message to the Baptist which speaks of this same power (Lu 7:22; Mt 11:5), and the raising of Jairus' daughter (Mt 9:18,22-26 ). Jesus exercises this power on those "whom he wills." Christ has power to quicken both body and soul.

John 5:22
He hath given all judgement unto the Son ( $\tau \eta \nu \kappa \rho \iota \sigma \imath \tau \pi \alpha \sigma \alpha v \delta \varepsilon \delta \omega \kappa \varepsilon v \tau \omega v i \omega)$. Perfect active indicative of $\delta \iota \delta \omega \mu$, state of completion (as in $3: 35 ; 6: 27,29 ; 10: 29$, etc.). See this prerogative claimed for Christ already in 3:17. See the picture of Christ as Judge of men in Mt 25:31-46 .

John 5:23
 and present active subjunctive of $\tau \mu \alpha \omega$ (may keep on honouring the Son).

He that honoureth not the Son (o $\mu \eta \tau \mu \omega \nu \tau o v v ı v)$. Articular present active participle of $\tau \iota \mu \alpha \omega$ with negative $\mu \eta$. Jesus claims here the same right to worship from men that the Father has. Dishonouring Jesus is dishonouring the Father who sent him (8:49; 12:26; 15:23; 1Jo 2:23 ). See also Lu 10:16. There is small comfort here for those who praise Jesus as teacher and yet deny his claims to worship. The Gospel of John carries this high place for Christ throughout, but so do the other Gospels (even Q, the Logia of Jesus) and the rest of the New Testament.

John 5:24
Hath eternal life ( $\varepsilon \chi \varepsilon \zeta \omega \eta \nu$ aı $\omega v \iota v$ ). Has now this spiritual life which is endless. See 3:36. In verses 24,25 Jesus speaks of spiritual life and spiritual death. In this passage (21-29) Jesus speaks now of physical life and death, now of spiritual, and one must notice carefully the quick transition. In Re 20:14 we have the phrase "the second death" with which language compare Re 20:4-6.

But hath passed out of death into life ( $\alpha \lambda \lambda \alpha \mu \varepsilon \tau \alpha \beta \varepsilon \beta \eta \kappa \varepsilon \nu \varepsilon \kappa$ тоv $\theta a v \alpha \tau о v$ عıৎ $\tau \eta v$ $\zeta \omega \eta \nu)$. Perfect active indicative of $\mu \varepsilon \tau \alpha \beta \alpha \iota v \omega$, to pass from one place or state to another. Out of spiritual death into spiritual life and so no judgement (крıбıৎ).

John 5:25
And now is ( $\kappa \alpha v v \nu \varepsilon \sigma \tau \iota v$ ). See 4:23 for this phrase. Not the future resurrection in verse 28 , but the spiritual resurrection here and now.

The dead (o vєкро). The spiritually dead, dead in trespasses and sins (Eph 2:1,5; 5:14 ).

Shall hear the voice of the Son of God (akovoovoıv $\tau \eta \varsigma \varphi \omega \nu \eta \varsigma$ रov viov $\operatorname{\tau ov} \theta \varepsilon o v$ ). Note three genitives ( $\varphi \omega \nu \eta \varsigma$ after $\alpha \kappa 0 v \sigma o v \sigma \iota \nu$, vıov with $\varphi \omega \nu \eta \varsigma, \theta \varepsilon \sigma v$ with vıov). Note three articles (correlation of the article) and that Jesus here calls himself "the Son of God" as in 10:36; 11:4.

Shall live (そŋoovoıv). Future active indicative, shall come to life spiritually.
John 5:26
In himself ( $\varepsilon v \varepsilon \alpha v \tau \omega$ ). The Living God possesses life wholly in himself and so he has bestowed this power of life to the Son as already stated in the Prologue of the Logos ( 1:3). For "gave" ( $\varepsilon \delta \omega \kappa \varepsilon \nu$, timeless aorist active indicative) see also $3: 35 ; 17: 2,24$. The particles "as" ( $\omega \sigma \pi \varepsilon \rho$ ) and "so" (ov $\omega \omega \varsigma)$ mark here the fact, not the degree (Westcott).

John 5:27
Because he is the Son of man ( $\circ \tau v \iota \varsigma \alpha v \theta \rho \omega \pi \sigma v \varepsilon \sigma \tau \iota v$ ). Rather, "because he is a son of man" (note absence of articles and so not as the Messiah), because the judge of men must partake of human nature himself (Westcott). Bernard insists that John is here giving his own reflections rather than the words of Jesus and uses vıos $\alpha v \theta \rho \omega \pi \sigma v$ in the same sense as o vıos tov av $\theta \rho \omega \pi$ ov (always in the Gospels used by Jesus of himself). But that in my
opinion is a wrong view since we have here ostensibly certainly the words of Jesus himself. So in Re 1:13; 4:14 viov $\alpha v \theta \rho \omega \pi$ ou means "a son of man."

John 5:28
In the tombs ( $\varepsilon \nu \tau о \varsigma \varphi \mu \eta \eta \varepsilon \iota \circ \varsigma)$. Tapo¢ (grave) presents the notion of burial ( $\theta a \pi \tau \omega$, to bury) as in Mt 23:27, $\mu \nu \eta \mu \varepsilon ו o v$ (from $\mu \nu \alpha o \mu \alpha, \mu \mu \nu \eta \sigma \kappa \omega$, to remind) is a memorial (sepulchre as a monument). Jesus claims not only the power of life (spiritual) and of judgement, but of power to quicken the actual dead at the Last Day. They will hear his voice and come out (єкторвибоขта, future middle indicative of єкторвиоиа). A general judgement and a general bodily resurrection we have here for both good and bad as in Mt 25:46; Ac 24:15; 2Co 5:10 and as often implied in the words of Jesus (Mt 5:29f.; 10:28; Lu 11:32 ). In Joh 6:39 Jesus asserts that he will raise up the righteous.

John 5:29
Unto the resurrection of life ( $\varepsilon ı \varsigma ~ \alpha v a \sigma \tau \alpha \sigma \iota \nu ~ \zeta \omega \eta \varsigma)$. Avaбта⿱ıৎ is an old word (Aeschylus) from $\alpha v i \sigma \tau \eta \mu$, to raise up, to arise. This combination occurs nowhere else in the N.T. nor does "the resurrection of judgement" ( $\varepsilon \varsigma \varsigma$ avaбтабıv крıбع $\omega \varsigma$ ), but in Lu 14:14 there is the similar phrase "in the resurrection of the just" ( $\varepsilon v \tau \eta$ $\alpha v a \sigma \tau \alpha \sigma \varepsilon \tau \omega v \delta \kappa \kappa \alpha \omega \nu)$. Only there note both articles. Here without the articles it can mean "to a resurrection of life" and "to a resurrection of judgement," though the result is practically the same. There are two resurrections as to result, one to life, one to judgement. See both in Da 12:2 .

John 5:30
I $(\mathrm{E} \gamma \omega)$. The discourse returns to the first person after using "the Son" since verse 19. Here Jesus repeats in the first person (as in 8:28) the statement made in verse 19 about the Son. In John $\varepsilon \mu a v \tau o v$ is used by Jesus 16 times and not at all by Jesus in the Synoptics. It occurs in the Synoptics only in Mt 8:8; Lu 7:7f.

Righteous ( $\delta ı \alpha \not \approx \alpha)$. As all judgements should be. The reason is plain (ot, because), the guiding principle with the Son being the will of the Father who sent him and made him Judge. Judges often have difficulty in knowing what is law and what is right, but the Son's task as Judge is simple enough, the will of the Father which he knows (verse 20).

John 5:31
If I bear witness of myself (E $\alpha v \varepsilon \gamma \omega \mu \alpha \rho \tau v \rho \omega \pi \varepsilon \rho \varepsilon \mu \alpha \nu \tau o v$ ). Condition of third class, undetermined with prospect of determination ( $\varepsilon \alpha v$ and present active subjunctive of $\mu \alpha \rho \tau v \rho \varepsilon \omega)$. The emphasis is on $\varepsilon \gamma \omega$ (I alone with no other witness).

Is not true (ouk $\varepsilon \sigma \tau \iota v a \lambda \eta \theta \eta \varsigma$ ). In law the testimony of a witness is not received in his own case (Jewish, Greek, Roman law). See De 19:15 and the allusion to it by Jesus in Mt 18:16. See also 2Co 13:1; 1Ti 5:19. And yet in 8:12-19 Jesus claims that his witness concerning himself is true because the Father gives confirmation of his message. The Father and the Son are the two witnesses ( 8:17). It is a paradox and yet true. But here Jesus yields to the rabbinical demand for proof outside of himself. He has the witness of another (the Father,

5:32,37 ), the witness of the Baptist ( $5: 33$ ), the witness of the works of Jesus ( $5: 36$ ), the witness of the Scriptures ( $5: 39$ ), the witness of Moses in particular (5:45).

John 5:32
Another ( $\alpha \lambda \lambda$ oc). The Father, not the Baptist who is mentioned in verse 33. This continual witness of the Father ( $o \mu \alpha \rho \tau v \rho \omega v$, who is bearing witness, and $\mu \alpha \rho \tau v \rho \varepsilon$, present active indicative) is mentioned again in verses $36-38$ as in 8:17.

John 5:33
Ye have sent ( $\cup \mu \varepsilon \iota \varsigma ~ \alpha \pi \varepsilon \sigma \tau \alpha \lambda \kappa \alpha \tau \varepsilon$ ). Emphatic use of $v \mu \varepsilon \iota \varsigma$ (ye) and perfect active indicative of $\alpha \pi о \sigma \tau \varepsilon \lambda \lambda \omega$, official and permanent fact and so the witness of the Baptist has to be recognized as trustworthy by the Sanhedrin. The reference is to the committee in 1:19-28.

He hath borne witness ( $\mu \varepsilon \mu \alpha \rho \tau \cup \rho \eta \kappa \varepsilon v)$. Perfect active indicative of $\mu \alpha \rho \tau \cup \rho \varepsilon \omega$ showing the permanent and abiding value of John's testimony to Christ as in 1:34; 3:26; 5:37. So also 19:35 of the testimony concerning Christ's death. This was the purpose of the Baptist's mission ( 1:7).

John 5:34
But the witness which I receive ( $\mathrm{E} \gamma \omega \delta \varepsilon$ ov $\tau \eta \nu \mu \alpha \rho \tau \cup \rho ı \alpha \nu \lambda \alpha \mu \beta \alpha v \omega$ ). "But I do not receive the witness" simply from a man (like John). The $\varepsilon \gamma \omega$ (I) in sharp contrast with $v \mu \varepsilon \varsigma$ (ye) of verse 33. Jesus complained of Nicodemus for not accepting his witness ( 3:11). Cf. also 3:32. In 1Jo 5:9 the witness of God is greater than that of men and this Jesus has.

That ye may be saved ( $\iota v \alpha \cup \mu \varepsilon \iota \varsigma \sigma \omega \theta \eta \tau \varepsilon$ ). Final clause with $\operatorname{v} \alpha$ and first aorist passive subjunctive of $\sigma \omega \zeta \omega$. This was the purpose of Christ's coming, that the world might be saved (3:17).

John 5:35
He (عкعاvoc). "That one" (John of 33). Common demonstrative (that one) in John to point out the subject. Used in 1:8 of the Baptist as here. John was now in prison and so Christ uses $\eta v$ (was). His active ministry is over.

The lamp (o $\lambda \cup \chi \vee o c)$. The lamp in the room (Mr 4:21). Old word for lamp or candle as in Mt 5:15. Used of Christ (the Lamb) as the Lamp of the New Jerusalem (Re 21:23). $\Lambda \alpha \mu \pi \alpha \varsigma_{~(M t ~ 25: 1,3, ~ e t c .) ~ i s ~ a ~ t o r c h ~ w h o s e ~ w i c k ~ i s ~ f e d ~ w i t h ~ o i l . ~ T h e ~ B a p t i s t ~ w a s ~ n o t ~ t h e ~ L i g h t ~}^{\text {I }}$ ( $\tau \mathrm{o} \varphi \omega \varsigma, 1: 8$ ), but a lamp shining in the darkness. "When the Light comes, the lamp is no longer needed" (Bernard). "Non Lux iste, sed lucerna." Jesus by his own claim is the Light of the World ( $8: 12 ; 9: 5 ; 12: 46$ ). And yet all believers are in a sense "the light of the world" (Mt 5:14 ) since the world gets the Light of Christ through us.
 candle or lamp). The lamp that is lit and is burning (present passive participle of kail and so is consumed).

And shineth ( $\kappa \alpha \varphi \alpha ı v \omega v$ ). See 1:4 for this verb used of the Logos shining in the darkness. Cf. 1Jo 2:8 . John was giving light as he burned for those in darkness like these Jews.

And ye were willing (upદıৎ $\delta \varepsilon \eta \theta \varepsilon \lambda \eta \sigma \alpha \tau \varepsilon)$. "But ye became willing." Ingressive aorist active indicative of $\theta \varepsilon \lambda \omega$. Reference again to $1: 19$. Cf. also for the temporary popularity of the Baptist Mr 1:5; Mt 3:5; 11:7; 21:26. The Jews were attracted to John "like moths to a candle" (Bernard).

To rejoice $\left(\alpha \gamma \alpha \lambda \lambda_{\iota} \alpha \theta \eta \nu \alpha\right)$. First aorist passive infinitive of $\alpha \gamma \alpha \lambda \lambda_{\iota} \alpha o \mu \alpha$, late word for $\alpha \gamma \alpha \lambda \lambda o \mu \alpha$ for which see Mt 5:12. "They were attracted by his brightness, not by his warmth" (Bengel). Even so the brightness of John's shining did not really enlighten their minds. "The interest in the Baptist was a frivolous, superficial, and short-lived excitement" (Vincent). It was only "for an hour" ( $\pi \rho \circ \varsigma \omega \rho a v$ ) when they turned against him.

John 5:36
But the witness which I have is greater than that of John ( $\mathrm{E} \gamma \omega \delta \varepsilon \varepsilon \chi \omega \tau \eta \nu \mu \alpha \rho \tau \nu \rho \iota \alpha \nu$
 is predicate accusative and $I \omega \alpha \nu o v$ is ablative of comparison after $\mu \varepsilon l \zeta \omega$. Good as the witness of John is, Christ has superior testimony.

To accomplish ( $\imath v \alpha \tau \varepsilon \lambda \varepsilon \iota \omega \sigma \omega$ ). Final clause with $\tau v \alpha$ and first aorist active subjunctive of $\tau \varepsilon \lambda \varepsilon \iota o \omega$, the same idiom in 4:34. Jesus felt keenly the task laid on him by the Father (cf. $3: 35)$ and claimed at the end that he had performed it $(17: 4 ; 19: 30)$. Jesus held that the highest form of faith did not require these "works" $(\varepsilon \rho \gamma \alpha)$ as in $2: 23 ; 10: 38 ; 14: 11$. But these "works" bear the seal of the Father's approval $(5: 20,36 ; 10: 25)$ and to reject their witness is wrong (10:25; 10:37f.; 15:24).

The very works ( $\alpha v \tau \alpha \tau \alpha \varepsilon \rho \gamma \alpha$ ). "The works themselves," repeating $\tau \alpha \varepsilon \rho \gamma \alpha$ just before for vernacular emphasis.

Hath sent me ( $\mu \varepsilon \alpha \pi \varepsilon \sigma \tau \alpha \lambda \kappa \varepsilon v$ ). Perfect active indicative of $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$, the permanence of the mission. Cf. 3:17. The continuance of the witness is emphasized in 5:32; 8:18.

John 5:37
 $\alpha v \tau o \varsigma$. Perfect active indicative of $\mu \alpha \rho \tau \nu \rho \varepsilon \omega$, the direct witness of the Father, besides the indirect witness of the works. Jesus is not speaking of the voice of the Father at his baptism (Mr 1:11), the transfiguration (Mr 9:7), nor even at the time of the visit of the Greeks (Joh 12:28 ). This last voice was heard by many who thought it was thunder or an angel. The language of Jesus refers to the witness of the Father in the heart of the believers as is made plain in 1Jo 5:9,10. God's witness does not come by audible "voice" ( $\varphi \omega v \eta \nu$ ) nor visible "form" ( $\varepsilon \delta$ ос). Cf. 1:18; 6:46; 1Jo 4:12 . Акךкоатє is perfect active indicative of $\alpha \kappa 0 v \omega$, to hear, and $\varepsilon \omega \rho \alpha \kappa \alpha \tau \varepsilon$ is perfect active indicative of o $\rho \alpha \omega$, to see. It is a permanent state of failure to hear and see God. The experience of Jacob in Peniel (Ge 32:30) was unusual, but Jesus will say that those who have seen him have seen the Father (Joh 14:9), but here he means the Father's "voice" and "form" as distinct from the Son.

John 5:38

And ( $\kappa \alpha$ ). "And yet" as in 1:10 and 5:40 below.
His word abiding in you ( $\tau 0 v \lambda o \gamma o v a v \tau o v \varepsilon v \nu \mu เ \nu \mu \varepsilon \nu o v \tau \alpha$ ). But God's word had come to them through the centuries by the prophets. For the phrase see $10: 35 ; 15: 3 ; 17: 6$; 1Jo 1:10; 2:14.

Him ye believe not ( $\tau 0 v \tau \omega \cup \mu \varepsilon ı \varsigma ~ o v ~ \pi ı \sigma \tau \varepsilon v \varepsilon \tau \varepsilon)$. "This one" ( $\tau 0 v \tau \omega$, dative case with
 word, but they reject both Jesus and God's word (Joh 14:9 ).

John 5:39
Ye search ( $\varepsilon \rho \alpha u v a \tau \varepsilon$ ). Proper spelling as the papyri show rather than $\varepsilon \rho \varepsilon u v a \tau \varepsilon$, the old form (from $\varepsilon \rho \varepsilon v v a$, search) as in 7:52. The form here can be either present active indicative second person plural or the present active imperative second person plural. Only the context can decide. Either makes sense here, but the reason given "because ye think" (oт v $\mu \varepsilon ı \varsigma ~ \delta о к \varepsilon ı \tau \varepsilon, ~$ clearly indicative), supports the indicative rather than the imperative. Besides, Jesus is arguing on the basis of their use of "the Scriptures" ( $\tau \alpha \varsigma \gamma \rho \alpha \varphi \alpha \varsigma)$. The plural with the article refers to the well-collection in the Old Testament (Mt 21:42; Lu 24:27 ). Elsewhere in John the singular refers to a particular passage ( $2: 22 ; 7: 38 ; 10: 35$ ).

In them ye have eternal life ( $\varepsilon \nu \alpha \cup \tau \alpha \iota \varsigma \zeta \omega \eta \nu \alpha \iota \omega \nu \iota \nu \varepsilon \varepsilon \chi \varepsilon \iota \nu$ ). Indirect assertion after סoкєıєє without "ye" expressed either as nominative (v $\mu \varepsilon \iota \varsigma$ ) or accusative (v $\mu \propto \varsigma$ ). Bernard holds that in John $\delta$ oкع $\omega$ always indicates a mistaken opinion (5:45; 11:13,31; 13:29; 16:20; 20:15 ). Certainly the rabbis did make a mechanical use of the letter of Scripture as a means of salvation.

These are they ( $\varepsilon \kappa \varepsilon เ v \alpha \varepsilon เ \sigma \iota v \alpha$ ). The true value of the Scriptures is in their witness to Christ (of me, $\pi \varepsilon \rho \varepsilon \mu \mathrm{ov}$ ). Luke (24:27,45 ) gives this same claim of Jesus, and yet some critics fail to find the Messiah in the Old Testament. But Jesus did.

John 5:40
And ye will not come to me ( $\kappa \alpha$ ov $\theta \varepsilon \lambda \varepsilon \tau \varepsilon \varepsilon \lambda \theta \varepsilon เ \nu \pi \rho \circ \varsigma \mu \varepsilon$ ). "And yet" ( $\kappa \alpha$ ) as often in John. "This is the tragedy of the rejection of Messiah by the Messianic race" (Bernard). See Joh 1:11; Mt 23:37 (ка оuк $\eta \theta \varepsilon \lambda \eta \sigma \alpha \tau \varepsilon$, and ye would not). Men loved darkness rather than light (Joh 3:19).

That ye may have life ( $\llcorner\sim \alpha \zeta \omega \eta \nu \varepsilon \chi \eta \tau \varepsilon$ ). Life in its simplest form as in 3:36 (cf. 3:16). This is the purpose of John in writing the Fourth Gospel (20:31). There is life only in Christ Jesus.

John 5:41
Glory from men ( $\delta o \xi \alpha v \pi \alpha \rho \alpha \alpha v \theta \rho \omega \pi \omega v$ ). Mere honour and praise Jesus does not expect from men (verse 34). This is not wounded pride, for ambition is not Christ's motive. He is unlike the Jews (5:44; 12:43; Mt 6:1f. ) and seeks not his own glory, but the glory and fellowship of the Father ( $1: 14 ; 2: 11 ; 7: 18$ ). Paul did not seek glory from men (1Th 2:6).

John 5:42

But I know you ( $\alpha \lambda \lambda \alpha \varepsilon \gamma v \omega \kappa \alpha \nu \mu \alpha \varsigma)$. Perfect active indicative of $\gamma \iota v \omega \sigma \kappa \omega$, "I have come to know and still know," the knowledge of personal experience (2:24f. ).

The love o' God ( $\tau \eta \nu \alpha \gamma a \pi \eta \nu \tau 0 v$ Өrov). Objective genitive, "the love toward God." See Lu 11:42 for this phrase in the same sense (only other instance in the Gospels, but common in 1John (1Jo 2:5; 3:17; 4:7,9; 5:3) and in 2Th 3:5; 2Co 13:14; Ro 5:5. The sense of God's love for man occurs in 1Jo 3:1; 4:9,10,16; Joh 15:9f. of Christ's love for man. These rabbis did not love God and hence did not love Christ.

John 5:43
In my Father's name ( $\varepsilon v \tau \omega$ ovouat $\tau 0 v \pi \alpha \tau \rho \circ \varsigma \mu \circ v$ ). Seven times Jesus in John speaks of the "Name" of the Father ( $5: 43 ; 10: 25 ; 12: 28 ; 17: 6,11,12,26$ ). See 1:12 for use of ovo $\mu \alpha$ (Lu 1:49).

And ye receive me not ( $\kappa \alpha$ ov $\lambda \alpha \mu \beta \alpha v \varepsilon \tau \varepsilon \mu \varepsilon$ ). "And yet ye do not receive me," as in verse 40, "the Gospel of the Rejection" ( $1: 11 ; 3: 11,32 ; 12: 37$ ) often applied to the Fourth Gospel.

If another come ( $\varepsilon \alpha \nu \alpha \lambda \lambda o \varsigma \varepsilon \lambda \theta \eta$ ). Condition of third class ( $\varepsilon \alpha v$ and second aorist active subjunctive of $\varepsilon \rho \chi \circ \mu \alpha)$. Note $\alpha \lambda \lambda$ oc, not $\varepsilon \tau \varepsilon \rho \circ \varsigma$, like $\alpha \lambda \lambda o v$ In $\sigma o v v$ in 2Co 11:4 . Similar prophecies occur in Mr 13:6,22 (Mt 24:5,24), all general in character like Antichrist in 2Th 2:8-12. There is no occasion for a reference to any individual like Barcochba (about A.D. 134) as Pfleiderer and Schmiedel hold. These Messianic upstarts all come "in their own name" and always find a following.

Him ye will receive ( $\varepsilon \kappa \varepsilon ા v o v \lambda \eta \mu \psi \varepsilon \sigma \theta \varepsilon$ ). "That one," whoever he is, as Jesus said. Future active indicative of $\lambda \alpha \mu \beta \alpha v \omega$. Credulous about the false Messiahs, incredulous about Christ.

John 5:44
How can ye believe? ( $\pi \omega \varsigma \delta \nu v \alpha \sigma \theta \varepsilon v \mu \varepsilon \iota \varsigma \pi \iota \sigma \tau \varepsilon \nu \sigma a ı ;)$. Emphasis on "ye" ( $v \mu \varepsilon \iota \varsigma)$, ye being what ye are. They were not true Jews (Ro 2:29; Es 9:28) who cared for the glory of God, but they prefer the praise of men (Mt 6:1f.; 23:5) like the Pharisees who feared to confess Christ (Joh 12:43).

From the only God ( $\pi \alpha \rho \alpha$ tov $\mu \circ v o v ~ \theta \varepsilon o v)$. B and $W$ omit $\theta \varepsilon o v$ which is certainly meant even if not genuine here. See 17:3; Ro 16:27; 1Ti 6:15f.

John 5:45
Think not ( $\mu \eta \delta$ окєıt $)$ ). Prohibition with $\mu \eta$ and the present imperative. See on verse 39 for סok $\varepsilon \omega$ for mistaken opinions in John.

I will accuse you ( $\varepsilon \gamma \omega$ кат $\eta \gamma \circ \rho \eta \sigma \omega \nu \mu \omega v$ ). Emphasis on $\varepsilon \gamma \omega$ (I). Future active indicative of катпүорє $\omega$ (ката, against, a $\gamma \circ \rho \varepsilon v \omega$, to speak in the assembly a $\gamma \circ \rho \alpha$, to bring an accusation in court, a public accusation). See Ro 3:9 for $\pi \rho o a \iota \tau \iota \alpha o \mu \alpha$ for making previous charge and Lu 16:1 for $\delta \iota \alpha \beta \alpha \lambda \lambda \omega$, a secret malicious accusation, and Ro 8:33 for $\varepsilon \gamma \kappa \alpha \lambda \varepsilon \omega$, for public charge, not necessarily before tribunal.

Even Moses (M $\omega v \sigma \eta \varsigma)$. No "even" in the Greek.

On whom ye have set your hope ( $\varepsilon \iota \varsigma$ ov $v \mu \varepsilon ı \varsigma ~ \eta \lambda \pi \iota \kappa \alpha \tau \varepsilon$ ). Perfect active indicative of $\varepsilon \lambda \pi \iota \zeta \omega$, state of repose in Moses. Only example of $\varepsilon \lambda \pi \iota \zeta \omega$ in John. See 2Co 1:10 for use of $\varepsilon \iota \varsigma$ with $\varepsilon \lambda \pi \iota \zeta \omega$ instead of the usual $\varepsilon \pi$ ( $1 \mathrm{Ti} 4: 10$ ).

John 5:46
Ye would believe me ( $\varepsilon \pi \iota \sigma \tau \varepsilon v \varepsilon \tau \varepsilon ~ a v \varepsilon \mu \circ$ ). Conclusion of condition of second class (determined as unfulfilled) with imperfect indicative in both protasis and apodosis and $\alpha v$ in apodosis. This was a home-thrust, proving that they did not really believe Moses.

For he wrote of me ( $\pi \varepsilon \rho \gamma \alpha \rho \varepsilon \mu о v \varepsilon \kappa \varepsilon เ \nu \circ \varsigma \varepsilon \gamma \rho \alpha \psi \varepsilon v)$. De 18:18f. is quoted by Peter (Ac 3:22 ) as a prophecy of Christ and also by Stephen in Ac 7:37. See also Joh 3:14 about the brazen serpent and 8:56 about Abraham foreseeing Christ's day. Jesus does here say that Moses wrote concerning him.

John 5:47
His writings ( $\tau 0 \iota \varsigma \varepsilon \kappa \varepsilon เ v o v ~ \gamma \rho \alpha \mu \mu \alpha \sigma เ v)$. Dative case with $\pi \iota \sigma \tau v \varepsilon \tau \varepsilon$. See Lu 16:31 for a like argument. The authority of Moses was the greatest of all for Jews. There is a contrast also between
writings ( $\gamma \rho \alpha \mu \mu \alpha \sigma \iota$, from $\gamma \rho \alpha \varphi \omega$, to write) and
words ( $\rho \eta \mu \alpha \sigma \iota v$, from $\varepsilon \iota \pi \sigma v)$. Г $\rho \alpha \mu \mu \alpha$ may mean the mere letter as opposed to spirit (2Co 3:6; Ro 2:27,29; 7:6 ), a debtor's bond (Lu 16:6f. ), letters or learning (Joh 7:15; Ac 26:24 ) like aүран $\alpha \tau$ т for unlearned (Ac 4:13) , merely written characters (Lu 23:38; 2Co 3:7; Ga 6:11), official communications (Ac 28:21), once $\varepsilon \rho \rho \alpha \gamma \rho \mu \mu \alpha \tau \alpha$ for the sacred writings ( 2 Ti 3:15) instead of the more usual $\alpha \alpha \gamma \iota \alpha \gamma \rho \alpha \varphi \alpha$. Г $\rho \alpha \varphi \eta$ is used also for a single passage ( Mr $12: 10$ ), but $\beta \iota \beta \lambda \iota$ ı for a book or roll ( $\operatorname{Lu} 4: 17$ ) or $\beta \iota \beta$ os ( $\operatorname{Lu} 20: 42$ ). Jesus clearly states the fact that Moses wrote portions of the Old Testament, what portions he does not say. See also $\operatorname{Lu} 24: 27,44$ for the same idea. There was no answer from the rabbis to this conclusion of Christ. The scribes ( $о \gamma \rho \alpha \mu \mu \alpha \tau \varepsilon ı \varsigma)$ made copies according to the letter ( $\kappa \alpha \tau \alpha \tau 0 \gamma \rho \alpha \mu \mu \alpha$ ).

## John 6

John 6:1
After these things ( $\mu \varepsilon \tau \alpha \tau \alpha \nu \tau \alpha$ ). A common, but indefinite, note of time in John (3:22; $5: 1 ; 6: 1 ; 7: 1$ ). The phrase does not mean immediate sequence of events. As a matter of fact, a whole year may intervene between the events of chapter 5 in Jerusalem and those in chapter 6 in Galilee. There is no sufficient reason for believing that chapter 6 originally preceded chapter 5 . The feeding of the five thousand is the only event before the last visit to Jerusalem recorded in all Four Gospels (Mr 6:30-44; Mt 14:13-21; Lu 9:10-17; Joh 6:1-13). The disciples have returned from the tour of Galilee and report to Jesus. It was the passover time (Joh 6:4 ) just a year before the end.

To the other side of the Sea of Galilee ( $\pi \varepsilon \rho \alpha v \tau \eta \varsigma \theta \alpha \lambda \alpha \sigma \sigma \eta \varsigma \tau \eta \varsigma \Gamma \alpha \lambda 1 \lambda \alpha \omega \alpha)$ ). The name given in Mark and Matthew. It is called Gennesaret in Lu 5:1 and "Sea of Tiberias" in Joh 21:1. Here "of Tiberias" ( $\tau \eta \varsigma T ı \beta \varepsilon \rho \iota \alpha \delta o \varsigma)$ is added as further description. Herod Antipas A.D. 22 built Tiberias to the west of the Sea of Galilee and made it his capital. See verse 23 for this city. Luke (Lu 9:10) explains that it was the eastern Bethsaida (Julias) to which Jesus took the disciples, not the western Bethsaida of $\mathrm{Mr} 6: 45$ in Galilee.

John 6:2
Followed ( $\eta \kappa 0 \lambda o u \theta \varepsilon$ ). Descriptive imperfect active, picturing the crowd, but without the details of the boat for Christ and the rapid race of the crowd on foot (Mr 6:32f.; Mt 14:13f. ).

They beheld ( $\varepsilon \theta \varepsilon \omega \rho \rho o u v$ ). Imperfect active of $\theta \varepsilon \omega \rho \varepsilon \omega$. They had been beholding the signs which Jesus had been doing ( $\varepsilon \pi o \iota \varepsilon$, imperfect again) for a long time ( $2: 23$ ), most of which John has not given (Mr 1:29f.; 2:1;3:1; 6:5). The people were eager to hear Jesus again ( $\operatorname{Lu}$ 9:11) and to get the benefit of his healing power "on them that were sick" ( $\varepsilon \pi \tau \omega \nu$ $\alpha \sigma \theta \varepsilon v o u v \tau \omega v$, the weak or feeble, without strength, a privative and $\sigma \theta \varepsilon v o \varsigma$, strength).

John 6:3
Into the mountain ( $\varepsilon$ ء , to opoc). From the level of the Jordan valley up into the high hill on the eastern side. Mark (Mr 6:46) and Matthew (Mt 14:23) mention that after the miracle Jesus went further up into the mountain to pray.

Sat ( $\varepsilon \kappa \alpha \theta \eta \tau$ ). Imperfect middle of $\kappa \alpha \theta \eta \mu \alpha$, was sitting, a picture of repose.
John 6:4
The feast of the Jews ( $\eta \varepsilon \sigma \rho \tau \eta \tau \omega v$ Iov $\alpha a \omega \omega v$ ). Here used of the passover ( $\tau 0 \pi \alpha \sigma \chi \alpha$ ) as in 7:2 of the tabernacles. This is probably the third passover in Christ's ministry ( 2:13 and one unmentioned unless 5:1 be it). In 2:13, here, and 11:55 (the last one) the adverb $\varepsilon \gamma \gamma \cup \varsigma$ ( $n e a r$ ) is used. John is fond of notes of time. Jesus failed to go to this passover because of the hostility in Jerusalem (7:1).

John 6:5

Lifting up his eyes ( $\varepsilon \pi \alpha \rho \alpha \varsigma ~ \tau o v \varsigma ~ o \varphi \theta \alpha \lambda \mu о \cup \varsigma)$. First aorist active participle of $\varepsilon \pi \alpha \iota \rho \omega$. See the same phrase in $4: 35$ where it is also followed by $\theta \varepsilon \alpha o \mu \alpha ; 11: 41 ; 17: 1$; Lu 6:20 . Here it is particularly expressive as Jesus looked down from the mountain on the approaching multitude.

Cometh unto him ( $\varepsilon \rho \chi \varepsilon \tau \alpha \pi \rho \circ \varsigma \alpha \cup \tau \circ v)$. Present middle indicative, "is coming to him."
 head of the lake.

Whence are we to buy? (ПоӨвv аүораб $\omega \mu \varepsilon v ;$ ). Deliberative subjunctive (aorist active). John passes by the earlier teaching and healing of the Synoptics (Mr 6:34f.; Mt 14:14f.; Lu 9:11f. ) till mid-afternoon. In John also Jesus takes up the matter of feeding the multitude with Philip (from the other Bethsaida, 1:44) whereas in the Synoptics the disciples raise the problem with Jesus. So the disciples raise the problem in the feeding of the four thousand (Mr 8:4; Mt 15:33 ). See Nu 11:13-22 (about Moses) and 2Ki 4:42f. (about Elisha).

Bread (aptouc). "Loaves" (plural) as in Mt 4:3 .
That these may eat (iva $\varphi \alpha \gamma \omega \sigma \imath v$ ovto). Purpose clause with $v \alpha$ and the second aorist active subjunctive of $\varepsilon \sigma \theta \omega \omega$ (defective verb).

John 6:6
To prove him ( $\pi \varepsilon \iota \rho \alpha \zeta \omega \nu \alpha v \tau o v)$. Present active participle of $\pi \varepsilon \iota \rho \alpha \zeta \omega$, testing him, not here in bad sense of tempting as so often (Mt 4:1).

What he would do ( $\tau \eta \mu \varepsilon \lambda \lambda \varepsilon v \pi o เ \varepsilon เ v)$. Indirect question with change of tense to imperfect. As in 2:25 so here John explains why Jesus put the question to Philip.

John 6:7
Two hundred pennyworth of bread ( $\delta \iota \alpha \kappa о \sigma \iota \omega v \delta \eta v \alpha \rho \iota \omega v$ a $\rho \tau 0$ ). "Loaves of two hundred denarii." The Roman coin originally for ten asses (afterwards sixteen), about 16 2/3 cents. The denarius was the usual pay for a day's labour (Mt 20:2,9,13 ). This item in Mr 6:37, but not in Matthew or Luke.

That every one may take a little ( $เ v \alpha \varepsilon \kappa \alpha \sigma \tau о \varsigma ~ \beta \rho \alpha \chi \cup ~ \lambda \alpha \beta \eta$ ). Final clause with $v \alpha a$ and second aorist active subjunctive of $\lambda \alpha \mu \beta \alpha v \omega$. This detail in John alone.

John 6:8
One of ( $\varepsilon \iota \varsigma \varepsilon \kappa)$. So in 12:4; 13:23; Mr 13:1 without $\varepsilon \kappa$.
 distinction of Andrew was precisely this that he brought Simon to Christ. Philip and Andrew appear together again in 12:20-22, but in the Synoptics he is distinguished only in Mr 13:3 . In the Muratorian Fragment Andrew received the revelation for John to write the Fourth Gospel.

John 6:9
A lad here ( $\pi \alpha \iota \delta \alpha \rho \circ \rho \omega \delta \varepsilon$ ). Old word, diminutive of $\pi \alpha \iota$, here only in N.T., not genuine in Mt 11:16. How he came to have this small supply we do not know.

Barley (крıӨıvovя). Adjective, here and verse 13 only in N.T., in the papyri, from крı $\theta \eta$, barley (Re 6:6). Considered an inferior sort of bread.

Fishes (o $\psi \alpha \rho ı$ ). Late diminutive of o $\%$ ov, common in papyri and inscriptions for delicacies with bread like fish. In N.T. only here, verse 11; 21:9-13. Synoptics have $\quad \chi$ Ovac.

John 6:10
Sit down (avađ\&б\&ıv). Literally, "fall back," lie down, recline. Second aorist active infinitive of $\alpha v a \pi \iota \pi \tau \omega$.
 3:12 ). It was spring (Joh 6:4) and plenty of green grass on the hillside.

The men (o $\alpha v \delta \rho \varepsilon \varsigma)$. Word for men as distinct from women, expressly stated in Mt 14:21.

In number ( $\tau 0 v a \rho \bullet \theta \mu \circ v$ ). Adverbial accusative (of general reference).
About (oc). General estimate, though they were arranged in orderly groups by hundreds and fifties, "in ranks" like "garden beds" ( $\pi \rho \alpha \sigma \iota \alpha, \mathrm{Mr}$ 6:40 ).

John 6:11
The loaves ( $\tau 0 \cup \varsigma$ aptouc). Those of verse 9.
Having given thanks ( $\varepsilon v \chi \alpha \rho ı \sigma \tau \eta \sigma \alpha \varsigma)$. The usual grace before meals (De 8:10). The Synoptics use "blessed" $\varepsilon \cup \lambda$ доү $\quad \sigma \varepsilon v$ (Mr 6:41; Mt 14:19; Lu 9:16 ).

He distributed ( $\delta \iota \delta \omega \kappa \varepsilon v$ ). First aorist active indicative of $\delta \iota \alpha \delta \iota \delta \omega \mu$, old verb to give to several ( $\delta \iota \alpha$, between).
 case) of $\alpha v a \kappa \varepsilon \mu \alpha$, old verb to recline like $\alpha v a \pi \varepsilon \sigma \varepsilon เ v$ in verse 10.

As much as they would (ooov $\eta \theta \varepsilon \lambda o v$ ). Imperfect active of $\theta \varepsilon \lambda \omega$, "as much as they wished."

John 6:12
And when they were filled ( $\omega \varsigma \delta \varepsilon \varepsilon v \varepsilon \pi \lambda \eta \sigma \theta \eta \sigma \alpha v$ ). First aorist (effective) passive indicative of $\varepsilon \mu \pi \mu \mu \pi \lambda \eta \mu$, old verb to fill in, to fill up, to fill completely. They were all satisfied. The Synoptics have $\varepsilon \chi о \rho \tau \alpha \sigma \theta \eta \sigma \alpha v$ like Joh 6:26 ( $\varepsilon \chi о \rho \tau \alpha \sigma \theta \eta \tau \varepsilon$ ).

Gather up ( $\sigma v v a \gamma \alpha \gamma \varepsilon \tau \varepsilon$ ). Second aorist active imperative of $\sigma v v a \gamma \omega$, to gather together.
Broken pieces ( $\kappa \lambda \alpha \sigma \mu \alpha \tau \alpha$ ). From $\kappa \lambda \alpha \omega$, to break. Not crumbs or scraps on the ground, but pieces broken by Jesus (Mr 6:41) and not consumed.

Be lost ( $\alpha \pi \sigma \lambda \eta \tau \alpha$ ). Second aorist middle subjunctive of $\alpha \pi \sigma \lambda \lambda \nu \mu$ with $v \alpha \alpha$ in purpose clause. Only in John. There was to be no wastefulness in Christ's munificence. The Jews had a custom of leaving something for those that served.

John 6:13
Twelve baskets ( $\delta \omega \delta \varepsilon к \alpha$ кочıvov¢). One for each of the apostles. What about the lad? Stout wicker baskets (coffins, Wycliff) in distinction from the soft and frail $\sigma \varphi \cup \rho \iota \delta \varepsilon \varsigma$ used at the feeding of the four thousand (Mr 8:8; Mt 15:37). Here all the Gospels (Mr 6:43; Mt

14:20; $\mathrm{Lu} 9: 17$; Joh 6:13 ) use корıvo. The same distinction between корıvo and $\sigma \varphi \cup \rho ı \delta \varepsilon \varsigma$ is preserved in the allusion to the incidents by Jesus in Mr 8:19,20; Mt 16:9,10 .

Unto them that had eaten ( $\tau 0 \leftarrow \varsigma \beta \varepsilon \beta \rho \omega \kappa \sigma \sigma v)$ ). Articular perfect active participle (dative case) of $\beta \iota \beta \rho \omega \sigma \kappa \omega$, old verb to eat, only here in N.T., though often in LXX.

John 6:14
 sign added to those already wrought (verse 2). Cf. 2:23; 3:2 .

They said ( $\varepsilon \lambda \varepsilon \gamma \circ v$ ). Inchoative imperfect, began to say.
Of a truth ( $\alpha \lambda \eta \theta \omega \varsigma$ ). Common adverb (from $\alpha \lambda \eta \theta \eta \varsigma$ ) in John ( 7:40).
The prophet that cometh ( $о \pi \rho о \varphi \eta \tau \eta \varsigma о \varepsilon \rho \chi \circ \mu \varepsilon v \circ \varsigma)$. There was a popular expectation about the prophet of De $18: 15$ as being the Messiah (Joh $1: 21 ; 11: 27$ ). The phrase is peculiar to John, but the idea is in Acts ( $3: 22 ; 7: 37$ ). The people are on the tiptoe of expectation and believe that Jesus is the political Messiah of Pharisaic hope.

John 6:15
Perceiving ( $\gamma$ vous). Second aorist active participle of $\gamma เ \nu \omega \sigma \kappa \omega$. It was not hard for Christ to read the mind of this excited mob.

They were about ( $\mu \varepsilon \lambda \lambda$ ovavv). Present active indicative of $\mu \varepsilon \lambda \lambda \omega$. Probably the leaders were already starting.

Take him by force ( $\alpha \rho \pi \alpha \zeta \varepsilon \varepsilon v)$. Present active infinitive of $\alpha \rho \pi \alpha \zeta \omega$, old verb for violent seizing (Mt 11:12; 13:19). There was a movement to start a revolution against Roman rule in Palestine by proclaiming Jesus King and driving away Pilate.

To make him king ( $\imath \alpha \alpha \pi o \imath \eta \omega \sigma \sigma \nu \beta \alpha \sigma \lambda \lambda \varepsilon \alpha$ ). Purpose clause with $t v \alpha$ and the first aorist active subjunctive of $\pi$ or $\varepsilon \omega$ with $\beta a \sigma i \lambda \varepsilon \alpha$ as predicate accusative. It was a crisis that called for quick action.

Himself alone (avtoc $\mu$ ovoc). At first he had the disciples with him (verse 3). But he sent them hurriedly by boat to the western side (Mr 6:45f.; Mt 14:22f. ) because clearly the apostles were sympathetic with the revolutionary impulse of the crowd. Then Jesus sent the multitudes away also and went up into the mountain alone. He was alone in every sense, for no one but the Father understood him at this stage, not even his own disciples. He went up to pray (Mr 6:46; Mt 14:23).

John 6:16
 late Greek the adjective is used as a substantive. It is late evening (real evening), not the early evening in mid-afternoon (Mt 14:15). The disciples were in no hurry to start back to Bethsaida in Galilee (Mr 6:45 ), Capernaum in John (Joh 6:17).

John 6:17
Were going ( $\eta \rho \chi$ оvтo). Picturesque imperfect.

It was now dark ( $\sigma \kappa о \tau \iota \alpha \eta \delta \eta \varepsilon \gamma \varepsilon \gamma o v \varepsilon$ ). Past perfect active of $\gamma \iota v o \mu \alpha$. While they were going, "darkness had already come."

And Jesus had not yet come to them ( $\kappa \alpha$ оик $\varepsilon \lambda \eta \lambda \nu \theta \varepsilon \pi \rho \circ \varsigma$ autovৎ o I $\eta \sigma о \cup \varsigma)$ ). Another past perfect active of $\varepsilon \rho \chi \circ \mu \alpha$ with negative ou $\pi \omega$. Darkness had come, but Jesus had not come, while they were going over the sea. The tenses in these verses are very graphic.

John 6:18
And the sea was rising ( $\eta \tau \varepsilon \theta a \lambda \alpha \sigma \sigma \alpha \alpha \varepsilon \varepsilon \gamma \varepsilon \rho \varepsilon \tau 0)$. Imperfect (without augment) passive of $\delta เ \varepsilon \gamma \varepsilon เ \rho \omega$, late compound to wake up thoroughly, to arouse.

By reason of a great wind that blew ( $\alpha v \varepsilon \mu \circ v \mu \varepsilon \gamma \alpha \lambda o v \pi v \varepsilon o v \tau o \varsigma)$. Genitive absolute with present active participle of $\pi \nu \varepsilon \omega$, to blow, "a great wind blowing."

John 6:19
When therefore they had rowed ( $\varepsilon \lambda \eta \lambda \alpha \kappa о \tau \varepsilon \varsigma o v v$ ). Perfect active participle of $\varepsilon \lambda \alpha u v \omega$, old verb to march (Xenophon), to drive (Jas 3:4 ), to row (Mr 6:48).

Furlongs ( $\sigma \tau \alpha \delta \iota o u \varsigma)$. Stadia, accusative of extent of space, a little over halfway across, "in the midst of the sea" (Mr 6:47). It was about forty stadia (six miles) across.

They behold ( $\theta \varepsilon \omega \rho 0 v \sigma \tau v$ ). Graphic dramatic present active indicative of $\theta \varepsilon \omega \rho \varepsilon \omega$, vividly preserving the emotions of the disciples.

Walking ( $\pi \varepsilon \rho \iota \pi \alpha \tau o u v \tau \alpha)$. Present active participle in the accusative case agreeing with Inoouv.

Drawing nigh unto the boat ( $\varepsilon \gamma \gamma \cup \varsigma$ tov $\pi \lambda$ ooov $\gamma \iota v o \mu \varepsilon v o v$ ). Present middle participle of $\gamma$ ıvo $\mu \alpha$ describing the process. "Coming near the boat." They behold Jesus slipping closer and closer to them on the water.

They were afraid ( $\varepsilon \varphi \circ \beta \eta \theta \eta \sigma \alpha v$ ). Ingressive aorist passive indicative of $\varphi \circ \beta \varepsilon \circ \mu \alpha$, "they became afraid." Sudden change to the regular historical sequence.

John 6:20
Be not afraid ( $\mu \eta \varphi \rho \beta \varepsilon \iota \sigma \theta \varepsilon$ ). Prohibition with $\mu \eta$ and present middle imperative of $\varphi о \beta \varepsilon o \mu \alpha$. So in Mr 6:50 (Mt 14:27). John does not tell that the disciples thought Jesus was an apparition (Mr 6:49; Mt 14:26), nor does he give the account of Peter walking on the water (Mt 14:28-31).

John 6:21
They were willing therefore ( $\eta \theta \varepsilon \lambda o v o u v$ ). Inchoative imperfect, "they began to be willing." This does not contradict Mr 6:51 as Bernard thinks. Both Jesus and Peter climbed into the boat.

Whither they were going ( $\varepsilon \varsigma \emptyset \vee \cup \pi \eta \gamma>v$ ). Progressive imperfect active, "to which land they had been going" (intransitive use of $v \pi \alpha \gamma \omega$, to lead under, to go under or away as in verse 67; 7:33; 12:11; 18:8.

John 6:22

Which stood (o $\varepsilon \sigma \tau \eta \kappa \omega \varsigma)$. Perfect active (intransitive) participle of $\sigma \tau \tau \mu$, to put, to stand. Jesus had sent the multitudes away the evening before (Mr 6:45; Mt 14:22 ), but evidently some did not go very far, still lingering in excitement on the eastern side of the lake next morning.

Boat ( $\pi \lambda o \iota \alpha \rho \circ o v$ ). Diminutive of $\pi \lambda$ ooov, little boat (Mr 3:9).
Entered not with (ov $\sigma v v \varepsilon เ \sigma \eta \lambda \theta \varepsilon v$ ). Second aorist active of the double compound verb $\sigma u v \varepsilon \iota \sigma \varepsilon \rho \chi \circ \mu \alpha$, followed by associative instrumental case $\mu \alpha \theta \eta \tau \alpha ı \varsigma$.

Went away alone ( $\mu$ ovo $\alpha \pi \eta \lambda \theta o v$ ). Second aorist active indicative of $\alpha \pi \varepsilon \rho \chi \circ \mu \alpha$, to go away or off. Movo is predicate nominative. These people noted these three items.

John 6:23
Howbeit ( $\alpha \lambda \lambda \alpha$ ). Verse 23 is really an explanatory parenthesis in this long sentence. Tiberias, capital of Herod Antipas, diagonally across the lake, is only mentioned in John in the N.T. (6:1,23; 21:1 ).

Boats ( $\pi \lambda$ oı $\alpha$ ). Called "little boats" ( $\pi \lambda$ oıopı $\alpha$ ) in verse 24 .
John 6:24
 ation of the complicated statements of verse 22.
 direct discourse. They still did not understand how Jesus had crossed over, but they acted on the basis of the plain fact.

They themselves got into ( $\varepsilon v \varepsilon \beta \eta \sigma \alpha \nu$ avto $\varepsilon \iota)$ ). Second aorist active indicative of $\varepsilon \mu \beta a \iota v \omega$ followed by $\varepsilon \iota \varsigma$ (both $\varepsilon v$ and $\varepsilon ı \varsigma$ together as often in N.T.).

Seeking Jesus ( $\zeta \eta \tau 0 \cup v \tau \varepsilon \varsigma ~ \tau o v ~ I \eta \sigma o v v) . ~ P r e s e n t ~ a c t i v e ~ p a r t i c i p l e ~ o f ~ \zeta \eta \tau \varepsilon \omega . ~ T h e y ~ h a d ~ a ~$ double motive apart from the curiosity explained in verse 22. They had clearly not given up the impulse of the evening before to make Jesus king ( 6:15) and they had hopes of still another bountiful repast at the hands of Jesus as he said ( 6:26).

John 6:25
When they found him (عupovieৎ avtov). Second aorist active participle of $\varepsilon v \rho ı \sigma \kappa \omega$. Found him after search and in the synagogue as John explains (verse 59) in Capernaum, perhaps that very synagogue built by a centurion ( $\mathrm{Lu} 7: 5$ ).

Rabbi $(\operatorname{Pa} \beta \beta \varepsilon)$. See on 1:38 for this courteous title.
When camest thou hither? ( $\pi о \tau \varepsilon \omega \delta \varepsilon \gamma \varepsilon \gamma o v a \sigma ;$ ). Second perfect active indicative of $\gamma$ гvoua. "When hast thou come?" We sought you anxiously on the other side of the lake and could not see how you came across (verses 22-24).

John 6:26
Not because ye saw signs (ou ot $\varepsilon เ \delta \varepsilon \tau \varepsilon \sigma \eta \mu \varepsilon ı \alpha$ ). Second aorist active indicative of the defective verb opaw. They had seen the "signs" wrought by Jesus (verse 2), but this one had led to wild fanaticism (verse 14) and complete failure to grasp the spiritual lessons.

But because ye ate of the loaves ( $\alpha \lambda \lambda^{\prime}$ o $\tau \varepsilon \varphi \alpha \gamma \varepsilon \tau \varepsilon \varepsilon \kappa \tau \omega \nu \alpha \rho \tau \omega \nu$ ). Second aorist active indicative of $\varepsilon \sigma \theta \iota \omega$, defective verb.

Ye were filled $(\varepsilon \chi \circ \rho \tau \alpha \sigma \theta \eta \tau \varepsilon)$. First aorist passive indicative of $\chi о \rho \tau \alpha \zeta \omega$, from $\chi о \rho \tau о \varsigma$ (grass) as in verse 10 , to eat grass, then to eat anything, to satisfy hunger. They were more concerned with hungry stomachs than with hungry souls. It was a sharp and deserved rebuke.

John 6:27
Work not for ( $\mu \eta \varepsilon \rho \gamma \alpha \zeta \varepsilon \sigma \theta \varepsilon$ ). Prohibition with $\mu \eta$ and present middle imperative of $\varepsilon \rho \gamma \alpha \zeta о \mu \alpha$, old verb from $\varepsilon \rho \gamma \circ v$, work.

The meat ( $\tau \eta \nu \beta \rho \omega \sigma \iota v$ ). The act of eating (Ro 14:17) , corrosion (Mt 6:19) , the thing eaten as here (2Co 9:10). See on Joh 4:32.

Which perisheth ( $\tau \eta \nu \alpha \pi o \lambda \lambda \nu \mu \varepsilon \nu \eta \nu$ ). Present middle participle of $\alpha \pi \sigma \lambda \lambda \nu \mu$. They were already hungry again.

Unto eternal life ( $\varepsilon \iota \zeta \zeta \omega \eta \nu \alpha \iota \omega \nu \iota \nu)$. Mystical metaphor quite beyond this crowd hungry only for more loaves and fishes. Bernard thinks that John has here put together various sayings of Christ to make one discourse, a gratuitous interpretation.

Will give $(\delta \omega \sigma \varepsilon)$. Future active indicative of $\delta t \delta \omega \mu$. The outcome is still future and will be decided by their attitude towards the Son of man (verse 51).

For him the Father, even God, hath sealed ( $\tau 0 v \tau о \nu \gamma \alpha \rho$ о $\pi \alpha \tau \eta \rho \varepsilon \sigma \varphi \rho \alpha \gamma \iota \sigma \varepsilon \nu$ о $\theta \varepsilon \circ \varsigma)$. Literally, "For this one the Father sealed, God." First aorist active indicative of $\sigma \varphi \rho \alpha \gamma \iota \zeta \omega$, to seal. See elsewhere in Joh 3:33 (attestation by man). Sealing by God is rare in N.T. (2Co 1:22; Eph 1:13; 4:30 ). It is not clear to what item, if any single one, John refers when the Father set his seal of approval on the Son. It was done at his baptism when the Holy Spirit came upon him and the Father spoke to him. Cf. 5:37.

John 6:28
What must we do? (T $\pi \circ \iota \omega \mu \varepsilon v$;). Present active deliberative subjunctive of $\pi \sigma เ \varepsilon \omega$, "What are we to do as a habit?" For the aorist subjunctive ( $\pi \sigma \neq \sigma \omega \mu \varepsilon v$ ) in a like question for a single
 see Joh 11:47 (what are we doing?).

That we may work the works of God ( $\imath v \alpha \varepsilon \rho \gamma \alpha \zeta \omega \mu \varepsilon \theta \alpha \tau \alpha \varepsilon \rho \gamma \alpha \tau 0 v \theta \varepsilon o v)$. Final clause with $ı v \alpha$ and the present middle subjunctive, "that we may go on working the works of God." There may have been an element of vague sincerity in this question in spite of their supercilious attitude.

John 6:29
The work of God that ye believe ( $\tau \circ \varepsilon \rho \gamma \circ v$ रov $\theta \varepsilon o v ~ \imath v \alpha \pi \iota \sigma \tau \varepsilon v \eta \tau \varepsilon$ ). In 1Th 1:3 Paul speaks of "your work of faith" ( $\nu \mu \omega \nu \tau 0 v \varepsilon \rho \gamma 0 v \tau \eta \varsigma \pi \iota \sigma \tau \varepsilon \omega \varsigma)$. So here Jesus terms belief in him as the work of God. These Jews were thinking of various deeds of the Pharisaic type and rules. Jesus turns their minds to the central fact. "This simple formula contains the
complete solution of the relation of faith and works" (Westcott). Note the present active subjunctive $\pi \iota \sigma \tau \varepsilon \cup \eta \tau \varepsilon$, "that ye may keep on believing."

On him whom he hath sent ( $\varepsilon ા \varsigma ~ o v ~ a \pi \varepsilon \sigma \tau \varepsilon ı \lambda \varepsilon v ~ \varepsilon \kappa \varepsilon เ v o \varsigma) . ~ T h e ~ p r o n o m i n a l ~ a n t e c e d e n t ~$ ( $\varepsilon \varsigma \varsigma ~ \tau o u \tau o v o v$ ) is omitted and the preposition $\varepsilon \varsigma \varsigma$ is retained with the relative ov really the direct object of $\alpha \pi \varepsilon \sigma \tau \varepsilon ı \lambda \varepsilon v$ (sent). Note $\varepsilon \kappa \varepsilon เ v o \varsigma$ for God (emphatic he).

## John 6:30

For a sign ( $\sigma \eta \mu \varepsilon \iota o v$ ). Predicate accusative, as a sign, with $\tau$ (what). As if the sign of the day before was without value. Jesus had said that they did not understand his signs (verse 26).

That we may see, and believe thee ( $\imath \alpha \alpha \iota \omega \mu \varepsilon v \kappa \alpha \pi \iota \sigma \tau \varepsilon v \sigma \omega \mu \varepsilon v$ ). Purpose clause with $v^{\prime} \alpha$ and the second aorist (ingressive) active subjunctive of o $\rho \alpha \omega$ and the first aorist (ingressive) active subjunctive of $\pi \iota \sigma \tau \varepsilon v \omega$, "that we may come to see and come to have faith in thee." It is hard to have patience with this superficial and almost sneering mob.

What workest thou? (T $\varepsilon \rho \gamma \alpha \zeta \eta ;$ ). They not simply depreciate the miracle of the day before, but set up a standard for Jesus.

John 6:31
Ate the manna ( $\tau 0 \mu \alpha v v \alpha \varepsilon \varphi \alpha \gamma o v$ ). The rabbis quoted Ps $72: 16$ to prove that the Messiah, when he comes, will outdo Moses with manna from heaven. Jesus was claiming to be the Messiah and able to give bread for eternal life (verse 27). Lightfoot (Biblical Essays, p. 152) says: "The key to the understanding of the whole situation is an acquaintance with the national expectation of the greater Moses." They quote to Jesus Ex 16:15 (of. Nu 11:7; 21:5; De 8:3). Their plea is that Moses gave us bread "from heaven" ( $\varepsilon \kappa$ tov oupavou). Can Jesus equal that deed of Moses?

John 6:32
It was not Moses that gave you (ov $\mathrm{M} \omega v \sigma \eta \varsigma \varepsilon \delta \omega \kappa \varepsilon v \nu \mu \mathrm{\nu})$ ). "Not Moses gave you." Blunt and pointed denial (aorist active indicative of $\delta \iota \delta \omega \mu$ ) that Moses was the giver of the bread from heaven (the manna). Moses was not superior to Christ on this score.

But my Father ( $\alpha \lambda \lambda$ o $\pi \alpha \tau \eta \rho \mu \circ v$ ). Not "our Father," but same claim as in 5:17f. Which caused so much anger in Jerusalem.

Gives ( $\delta \iota \delta \omega \sigma \tau v$ ). Present active indicative, not aorist ( $\varepsilon \delta \omega \kappa \varepsilon v)$. Continual process.
The true bread out of heaven ( $\tau$ о $\alpha \rho \tau о v \varepsilon \kappa$ тоv oupavov тov $\alpha \lambda \eta \theta เ v o v$ ). "The bread out of heaven" as the manna and more "the genuine bread" of which that was merely a type. On $\alpha \lambda \eta \theta$ tvos see 1:9; 4:23.

John 6:33
The bread of God (o aptos tov $\theta$ rov). All bread is of God (Mt 6:11). The manna came down from heaven ( $\mathrm{Nu} 11: 9$ ) as does this bread (о кат $\alpha \beta a ı \nu \omega v$ ). Refers to the bread (o a $\rho \tau \boldsymbol{\text { c }}$, masculine). Bernard notes that this phrase (coming down) is used seven times in this discourse (33,38,41,42,50,51,58).

Giveth life ( $\zeta \omega \eta \nu \delta \iota \delta o u \varsigma)$. Chrysostom observes that the manna gave nourishment ( $\tau \rho \circ \varphi \eta$ ), but not life ( $\zeta \omega \eta$ ). This is a most astounding statement to the crowd.

John 6:34
Lord (Kvpıs). Used now instead of Rabbi (25) though how much the people meant by it is not clear.
