he ), $\tau 0 \pi \nu \varepsilon v \mu \alpha$ (neuter). See also Joh 16:26 (o--غкعivoc). It is a grave mistake to use the neuter "it" or "itself" when referring to the Holy Spirit.

Beareth witness with our spirit ( $\sigma \cup \mu \mu \alpha \rho \tau v \rho \varepsilon \tau \omega \pi \nu \varepsilon v \mu a \tau \eta \mu \omega v$ ). See on Ro 2:15 for this verb with associative instrumental case. See 1Jo 5:10f. for this double witness.

Rom 8:17
 Philo, an Ephesian inscription of the imperial period (Deissmann, Light from the Ancient East, p. 92), papyri of the Byzantine period. See 8:29 for this idea expanded. Paul is fond of compounds of $\sigma v v$, three in this verse ( $\sigma v v \kappa \lambda \eta \rho o v o \mu o t, \sigma v v \pi \alpha \sigma \chi \omega \mu \varepsilon v, \sigma v v \delta o \xi \alpha \sigma \theta \omega \mu \varepsilon v)$.

The last (first aorist passive subjunctive of $\sigma v v \delta o \xi a \zeta \omega$ with $\mathfrak{v \alpha}$ (purpose), late and rare, here only in N.T.

## Rom 8:18

To us-ward ( $\varepsilon \iota \varsigma ~ \eta \mu a \varsigma)$. We shall be included in the radiance of the coming glory which will put in the shadow the present sufferings. Precisely the same idiom here with $\mu \varepsilon \lambda \lambda o v \sigma \alpha v$ $\delta o \xi \alpha v$ (aorist passive infinitive of $\alpha \pi о \kappa \alpha \lambda \nu \varphi \theta \eta v \alpha$ ) occurs in $\mathrm{Ga} 3: 23$ with $\mu \varepsilon \lambda \lambda$ оvб $\alpha v \pi ı \sigma \tau \iota v$, which see.

Rom 8:19
The earnest expectation of creation ( $\eta$ алокар $\alpha \delta о к ı \alpha \tau \eta \varsigma \kappa \tau \iota \sigma \varepsilon \omega \varsigma$ ). This substantive has so far been found nowhere save here and Php 1:20, though the verb алокарабокє $\omega$ is common in Polybius and Plutarch. Milligan (Vocabulary) thinks that Paul may have made the substantive from the verb. It is a double compound ( $\alpha \pi о$, off from, кара, head, $\delta о \kappa \varepsilon \omega$, Ionic verb, to watch), hence to watch eagerly with outstretched head.

Waiteth for ( $\alpha \pi \varepsilon \kappa \delta \varepsilon \chi \varepsilon \tau \alpha$ ). See on 1Co 1:7; Ga 5:5 for this rare word (possibly formed by Paul, Milligan). "To wait it out" (Thayer).

The revealing of the sons of God ( $\tau \eta v \alpha \pi о к \alpha \lambda \nu \psi i v \tau \omega v \nu t \omega v \tau \tau v \theta \varepsilon o v)$. Cf. 1Jo 3:2; $2 \mathrm{Th} 2: 8 ; \mathrm{Col} 3: 4$. This mystical sympathy of physical nature with the work of grace is beyond the comprehension of most of us. But who can disprove it?

Rom 8:20
Was subjected (vлєтаүף). Second aorist passive indicative of $v \pi \alpha \tau \alpha \sigma \sigma \omega$ (cf. verse 7).
To vanity ( $\tau \eta \mu \alpha \tau \alpha \circ \tau \eta \tau)$. Dative case. Rare and late word, common in LXX. From $\mu \alpha \tau \alpha \iota \rho$, empty, vain. Eph 4:17; 2Pe 2:18 .

Not of its own will (ovð $\varepsilon \kappa \circ \cup \sigma \alpha$ ). Common adjective, in N.T. only here and 1Co 9:27 . It was due to the effect of man's sin.

But by reason of him ( $\alpha \lambda \lambda \alpha \delta 1 \alpha \tau \tau v$ ). Because of God.
In hope that ( $\varepsilon \varphi^{\prime} \varepsilon \lambda \pi \iota \delta$ o $)$. Note the form $\varepsilon \lambda \pi \iota \delta$ rather than the usual $\varepsilon \lambda \pi \iota \delta$ and so $\varepsilon \varphi^{\prime}$ '. Hot can be causal "because" instead of declarative "that."

Rom 8:21
The creation itself (aut $\eta \eta \kappa \tau \iota \sigma \varsigma)$. It is the hope of creation, not of the Creator. Nature "possesses in the feeling of her unmerited suffering a sort of presentiment of her future deliverance" (Godet).

Rom 8:22
Groaneth and travaileth in pain ( $\sigma v v \sigma \tau \varepsilon v \alpha \zeta_{\varepsilon} \kappa \alpha \sigma v v \omega \delta \iota v \varepsilon$ ). Two more compounds with $\sigma u v$. Both rare and both here alone in N.T. Nature is pictured in the pangs of childbirth.

Rom 8:23
The first fruits ( $\tau \eta v \alpha \pi \alpha \rho \chi \eta \nu$ ). Old and common metaphor.

Of the Spirit ( $\tau 0 v \pi v \varepsilon \cup \mu a \tau \circ \varsigma)$. The genitive of apposition. The Holy Spirit came on the great Pentecost and his blessings continue as seen in the "gifts" in 1Co 12-14, in the moral and spiritual gifts of Ga 5:22f. And greater ones are to come (1Co 15:44ff.).

Even we ourselves ( $\kappa \alpha$ avto). He repeats for emphasis. We have our "groaning" ( $\sigma \tau \varepsilon v a \zeta$ о $\mu \varepsilon v$ ) as well as nature.

Waiting for ( $\alpha \pi \varepsilon \kappa \delta \varepsilon \chi \circ \mu \varepsilon v o$ ). The same verb used of nature in verse 19.
Our adoption (vio $\theta \varepsilon \sigma \iota \alpha v$ ). Our full "adoption" (see verse 15), "the redemption of our body" ( $\tau \eta \nu$ ало $\lambda \tau \tau \rho \omega \sigma \iota v$ тоv $\sigma \omega \mu \alpha \tau о \varsigma ~ \eta \mu \omega \nu$ ). That is to come also. Then we shall have complete redemption of both soul and body.

## Rom 8:24

For by hope were we saved ( $\tau \eta \gamma \alpha \rho \varepsilon \lambda \pi \kappa \delta \varepsilon \sigma \omega \theta \eta \mu \varepsilon v$ ). First aorist passive indicative of $\sigma \omega \zeta \omega$. The case of $\varepsilon \lambda \pi \iota \delta$ is not certain, the form being the same for locative, instrumental and dative. Curiously enough either makes good sense in this context: "We were saved in hope, by hope, for hope" (of the redemption of the body).

Rom 8:25
With patience ( $\delta \iota^{\prime}$ vпо $\mu о v \eta \varsigma$ ). Paul repeats the verb $\alpha \pi \varepsilon \kappa \delta \varepsilon \chi \circ \mu \alpha$ of verse 23 .

## Rom 8:26

Helpeth our infirmity ( $\sigma u v \alpha v \tau \iota \lambda \alpha \mu \beta \alpha v \varepsilon \tau \alpha \tau \eta ~ \alpha \sigma \theta \varepsilon v \varepsilon ı \alpha ~ \eta \mu \omega v$ ). Present middle indicative of $\sigma u v a v \tau i \lambda \alpha \mu \beta \alpha v o \mu \alpha$, late and striking double compound (Diodorus, LXX, Josephus, frequent in inscriptions, Deissmann, Light, etc., p. 87), to lend a hand together with, at the same time with one. Only twice in N.T., here and Lu 10:40 in Martha's plea for Mary's help. Here beautifully Paul pictures the Holy Spirit taking hold at our side at the very time of our weakness (associative instrumental case) and before too late.

How to pray ( $\tau \mathrm{\tau} \tau \pi \rho \circ \sigma \varepsilon v \xi \omega \mu \varepsilon \theta \alpha$ ). Articular clause object of oı $\delta a \mu \varepsilon v$ (we know) and indirect question with the deliberative aorist middle subjunctive $\pi \rho \circ \sigma \varepsilon v \xi \omega \mu \varepsilon \theta \alpha$, retained in the indirect question.

As we ought ( $\kappa \alpha \theta \mathrm{o} \delta \varepsilon$ ). "As it is necessary." How true this is of all of us in our praying.
Maketh intercession (v $\tau \varepsilon \rho \varepsilon v \tau \cup \gamma \chi \propto v \varepsilon$ ). Present active indicative of late double compound, found only here and in later ecclesiastical writers, but $\varepsilon v \tau \nu \gamma \chi \propto v \omega$ occurs in verse 27 (a common verb). It is a picturesque word of rescue by one who "happens on" ( $\varepsilon v \tau v \gamma \chi \propto v \varepsilon$ ) one who is in trouble and "in his behalf" ( $v \pi \varepsilon \rho$ ) pleads "with unuttered groanings" (instrumental case) or with "sighs that baffle words" (Denney). This is work of our Helper, the Spirit himself.

Rom 8:27
He that searcheth (o e $\rho \alpha u v \omega v$ ). God (1Sa 16:7).
According to the will of God ( $\kappa \alpha \tau \alpha$ $\theta \varepsilon o v$ ). See 2Co 7:9-11 for this phrase ката $\theta$ zov (according to God). The Holy Spirit is the "other Paraclete" (Joh 14:16) who pleads God's cause with us as Christ is our Paraclete with the Father (1Jo 2:1 ). But more is true as here,
for the Holy Spirit interprets our prayers to God and "makes intercession for us in accord with God's will."

Rom 8:28
All things work together ( $\pi \alpha \nu \tau \alpha \sigma \nu v \varepsilon \rho \gamma \varepsilon$ ). A B have o $\theta \varepsilon o \varsigma$ as the subject of $\sigma u v \varepsilon \rho \gamma \varepsilon$ (old verb, see on 1Co 16:16; 2Co 6:1). That is the idea anyhow. It is God who makes "all things work together" in our lives "for good" ( $\varepsilon \iota \varsigma ~ \alpha \gamma \alpha \theta o v$ ), ultimate good.

According to his purpose ( $\kappa \alpha \tau \alpha \pi \rho \circ \theta \varepsilon \sigma เ v$ ). Old word, seen already in Ac 27:13 and for "shewbread" in Mt 12:4. The verb $\pi \rho 0 \tau 1 \theta \eta \mu$ Paul uses in 3:24 for God's purpose. Paul accepts fully human free agency but behind it all and through it all runs God's sovereignty as here and on its gracious side (9:11; 3:11; 2Ti 1:9).

Rom 8:29
Foreknew ( $\pi \rho \circ \varepsilon \gamma v \omega$ ). Second aorist active indicative of $\pi \rho o \gamma \iota v \omega \sigma \kappa \omega$, old verb as in Ac 26:5. See Ps 1:6 (LXX) and Mt 7:23. This fore-knowledge and choice is placed in eternity in Eph 1:4.
 appoint beforehand as in Ac 4:28; 1Co 2:7. Another compound with $\pi \rho 0$ - (for eternity).

Conformed to the image ( $\sigma \nu \mu \mu о р \varphi о и \varsigma \tau\rceil \varsigma \varepsilon$ ккоvoৎ). Late adjective from $\sigma \nu v$ and $\mu о \rho \varphi \eta$ and so an inward and not merely superficial conformity. Eıк $\omega v$ is used of Christ as the very image of the Father (2Co 4:4; Col 1:15). See Php 2:6f. for $\mu о \rho \varphi \eta$. Here we have both $\mu о \rho \varphi \eta$ and $\varepsilon ו \kappa \omega \nu$ to express the gradual change in us till we acquire the likeness of Christ the Son of God so that we ourselves shall ultimately have the family likeness of sons of God. Glorious destiny.

That he might be ( $\varepsilon \varsigma \varsigma ~ \tau o ~ \varepsilon ı v \alpha ~ \alpha u \tau o v) . ~ C o m m o n ~ i d i o m ~ f o r ~ p u r p o s e . ~$
First born among many brethren ( $\pi \rho \omega \tau$ тококоv $\varepsilon v$ по $\lambda \lambda$ оıц $\alpha \delta \varepsilon \lambda \varphi о \iota \varsigma)$. Christ is "first born" of all creation (Col 1:15 ), but here he is "first born from the dead" (Col 1:18 ), the Eldest Brother in this family of God's sons, though "Son" in a sense not true of us.

Rom 8:30
Called ( $\varepsilon \kappa \alpha \lambda \varepsilon \sigma \varepsilon v$ )
--Justified ( $\varepsilon \delta \iota \kappa a \iota \omega \sigma \varepsilon v)$
--Glorified ( $\varepsilon \delta \circ \xi \alpha \sigma \varepsilon v$ ). All first aorist active indicatives of common verbs ( $\kappa \alpha \lambda \varepsilon \omega$, $\delta ı \kappa \alpha \iota \omega, \delta o \xi \alpha \zeta \omega)$. But the glorification is stated as already consummated (constative aorists, all of them), though still in the future in the fullest sense. "The step implied in $\varepsilon \delta 0 \xi \alpha \sigma \varepsilon v$ is both complete and certain in the Divine counsels" (Sanday and Headlam).

## Rom 8:31

For these things ( $\pi \rho \circ \varsigma \tau \alpha \cup \tau \alpha$ ). From 8:12 on Paul has made a triumphant presentation of the reasons for the certainty of final sanctification of the sons of God. He has reached the climax with glorification ( $\varepsilon \delta 0 \xi \alpha \sigma \varepsilon v$ in verse 30 ). But Paul lets the objector have his say as he usually does so that in verses 31-39 he considers the objections.

If God is for us, who is against us? ( $\varepsilon$ o $\theta \varepsilon о \varsigma ~ v \pi \varepsilon \rho \eta \mu \omega v$, $\tau \iota \varsigma \kappa \alpha \theta^{\prime} \eta \mu \omega v$ ?). This condition of the first class carries Paul's challenge to all doubters. There is no one on a par with God. Note the two prepositions in contrast (v $\tau \varepsilon \rho$, over, $\kappa \alpha \tau \alpha$, down or against).

Rom 8:32
He that (oc $\gamma \varepsilon$ ). "Who as much as this" ( $\gamma \varepsilon$ here magnifying the deed, intensive particle).
Spared not (ovк $\varepsilon \varphi \varepsilon \iota \sigma \alpha \tau o$ ). First aorist middle of $\varphi \varepsilon \varepsilon \delta \circ \mu \alpha$, old verb used about the offering of Isaac in Ge 22:16. See Ac 20:29.

Also with him ( $\kappa \alpha \sigma \cup \vee \alpha \cup \tau \omega$ ). The gift of "his own son" is the promise and the pledge of the all things for good of verse 28 . Christ is all and carries all with him.

Rom 8:33
Who shall lay anything to the charge of God's elect? ( $\tau \varsigma \varsigma \varepsilon \gamma \kappa \alpha \lambda \varepsilon \sigma \varepsilon \kappa \alpha \tau \alpha \varepsilon \kappa \lambda \varepsilon \kappa \tau \omega \nu$ $\theta \varepsilon o v$ ?). Future active indicative of $\varepsilon \gamma \kappa \alpha \lambda \varepsilon \omega$, old verb, to come forward as accuser (forensic term) in case in court, to impeach, as in Ac 19:40; 23:29; 26:2 , the only N.T. examples. Satan is the great Accuser of the brethren.

It is God that justifieth ( $\theta \varepsilon o \varsigma$ o $\delta \iota \kappa \alpha \iota \omega v$ ). God is the Judge who sets us right according to his plan for justification ( $3: 21-31$ ). The Accuser must face the Judge with his charges.

Rom 8:34
Shall condemn ( $\kappa \alpha \tau \alpha \kappa \rho \imath v \omega v$ ). Can be either present active participle (condemns) or the future (shall condemn). It is a bold accuser who can face God with false charges or with true ones for that matter for we have an "Advocate" at God's Court (1Jo 2:1), "who is at the right hand of God" (oc $\varepsilon \sigma \tau \iota v \varepsilon v \delta \varepsilon \xi \iota \alpha$ tov $\theta$ عov) "who also maketh intercession for us" (os $\kappa \alpha \varepsilon v \tau v \gamma \chi \propto v \varepsilon v \pi \varepsilon \rho \eta \mu \omega v)$. Our Advocate paid the debt for our sins with his blood. The score is settled. We are free ( $8: 1$ ).

Rom 8:35
Shall separate ( $\chi \omega \rho \iota \sigma \varepsilon$ ). Future active of old verb $\chi$ о $\rho \iota \omega$ from adverb $\chi \omega \rho \iota \varsigma$ and that from $\chi \omega \rho \alpha$, space. Can any one put a distance between Christ's love and us (objective genitive)? Can any one lead Christ to cease loving us? Such things do happen between husband and wife, alas. Paul changes the figure from "who" ( $\tau \iota \varsigma$ ) to "what" ( $\tau$ ). The items mentioned will not make Christ love us less. Paul here glories in tribulations as in 5:3f. .

Rom 8:36
Even as it is written ( $\kappa \alpha \theta \omega \varsigma \gamma \varepsilon \gamma \rho \alpha \pi \tau \alpha)$. He quotes Ps 44:23.
We are killed $(\theta \alpha v a \tau o v \mu \varepsilon \theta \alpha)$. Present passive indicative of $\theta$ avatow for which see on 7:4. Same idea of continuous martyrdom in 1Co 15:31.

As sheep for the slaughter ( $\omega \varsigma \pi \rho \circ \beta \alpha \tau \alpha \sigma \varphi \alpha \gamma \eta \varsigma)$. Objective genitive ( $\sigma \varphi \alpha \gamma \eta \varsigma)$.
Rom 8:37
Nay ( $\alpha \lambda \lambda \alpha$ ). On the contrary, we shall not be separated.
We are more than conquerors ( $v \pi \varepsilon \rho v i \kappa \omega \mu \varepsilon v$ ). Late and rare compound. Here only in N.T. "We gain a surpassing victory through the one who loved us."

Rom 8:38
For I am persuaded ( $\pi \varepsilon \pi \varepsilon \iota \sigma \mu \alpha \gamma \alpha \rho)$. Perfect passive participle of $\pi \varepsilon \iota \theta \omega$, "I stand convinced." The items mentioned are those that people dread (life, death, supernatural powers, above, below, any creature to cover any omissions).

Rom 8:39
To separate us ( $\eta \mu \alpha \varsigma \chi \omega \rho \iota \sigma \alpha$ ). Aorist active infinitive of $\chi о \rho \iota \zeta \omega$ (same verb as in 35). God's love is victor over all possible foes, "God's love that is in Christ Jesus." Paul has reached the mountain top. He has really completed his great argument concerning the God-kind of righteousness save for its bearing on some special problems. The first of these concerns the fact that the Jews (God's chosen people) have so largely rejected the gospel (chapters 9-11).

## Romans 9

Rom 9:1
In Christ $(\varepsilon \nu \mathrm{X} \rho \iota \sigma \tau \omega)$. Paul really takes a triple oath here so strongly is he stirred. He makes a positive affirmation in Christ, a negative one (not lying), the appeal to his conscience as co-witness ( $\sigma v \nu \mu \alpha \rho \tau \cup \rho о v \sigma \eta \varsigma$, genitive absolute as in $2: 15$ which see) "in the Holy Spirit."

Rom 9:2
Sorrow ( $\lambda v \pi \eta$ ). Because the Jews were rejecting Christ the Messiah. "We may compare the grief of a Jew writing after the fall of Jerusalem" (Sanday and Headlam).

Unceasing pain in my heart ( $\alpha \delta \iota \alpha \wedge \varepsilon \iota \tau \sigma \varsigma ~ o \delta v \nu \eta \tau \eta \kappa \alpha \rho \delta \iota \alpha$ ). Like angina pectoris. O $\delta v \nu \eta$ is old word for consuming grief, in N.T. only here and and 1Ti 6:10 .

Unceasing ( $\alpha \delta \iota \alpha \lambda \varepsilon \iota \pi \tau \circ \varsigma$ ). Late and rare adjective (in an inscription 1 cent. B.C.), in N.T. only here and 2 Ti 1:3. Two rare words together and both here only in N.T. and I and II Timothy (some small argument for the Pauline authorship of the Pastoral Epistles).

Rom 9:3
I could wish ( $\eta \sim \chi \circ \mu \eta v$ ). Idiomatic imperfect, "I was on the point of wishing." We can see that $\varepsilon v \chi \circ \mu \alpha$ (I do wish) would be wrong to say. $A v \eta \cup \chi \circ \mu \eta \nu$ would mean that he does not wish (conclusion of second class condition). A $\nu \cup \chi \circ \mu \eta \nu$ would be conclusion of fourth class condition and too remote. He is shut up to the imperfect indicative (Robertson, Grammar, p. 886).

Anathema ( $\alpha v \alpha \theta \varepsilon \mu \alpha$ ). See for this word as distinct from $\alpha v \alpha \theta \eta \mu \alpha$ (offering) 1Co 12:3; Ga 1:8f. I myself ( $\alpha \cup \tau \circ \varsigma \varepsilon \gamma \omega$ ). Nominative with the infinitive $\varepsilon \iota v \alpha$ and agreeing with subject of $\eta v \chi о \mu \eta \nu$.

According to the flesh ( $\kappa \alpha \tau \alpha \sigma \alpha \kappa \alpha)$. As distinguished from Paul's Christian brethren.
Rom 9:4
Who (oıtıvec). The very ones who, inasmuch as they.
Israelites (I $\sigma \rho \alpha \eta \lambda \varepsilon ı \tau \alpha$ ). Covenant name of the chosen people.
Whose ( $\omega v$ ). Predicate genitive of the relative, used also again with o $\pi \alpha \tau \varepsilon \rho \varepsilon \varsigma$. For "the adoption" ( $\eta$ vıO $\theta \sigma \iota \alpha$ ) see 8:15.

The glory ( $\eta \delta o \xi \alpha$ ). The Shekinah Glory of God ( $3: 23$ ) and used of Jesus in Jas 2:1.
The covenants ( $\alpha \delta \iota \alpha \eta \kappa \alpha$ ). Plural because renewed often (Ge 6:18; 9:9; 15:18; 17:2,7,9; Ex 2:24).

The giving of the law ( $\eta \nu 0 \mu \circ \theta \varepsilon \sigma \iota \alpha$ ). Old word, here only in N.T., from $v o \mu \circ \varsigma$ and $\tau \iota \theta \eta \mu$.

The service ( $\eta \lambda \alpha \tau \rho \varepsilon \iota \alpha$ ). The temple service (Heb 9:1,6 ).
The fathers (o $\pi \alpha \tau \varepsilon \rho \varepsilon \varsigma)$. The patriarchs (Ac 3:13; 7:32).
Rom 9:5
Of whom $(\varepsilon \xi \omega v)$. Fourth relative clause and here with $\varepsilon \xi$ and the ablative.

Christ (o Xpıбтоৎ). The Messiah.
As concerning the flesh ( $\tau о \kappa \alpha \tau \alpha \sigma \alpha \rho \kappa \alpha$ ). Accusative of general reference, "as to the according to the flesh." Paul limits the descent of Jesus from the Jews to his human side as he did in 1:3f.

Who is over all, God blessed for ever (o ov $\varepsilon \pi \pi \alpha v \tau \omega \nu \theta \varepsilon o \varsigma \varepsilon v \lambda o \gamma \eta \tau o \varsigma)$. A clear statement of the deity of Christ following the remark about his humanity. This is the natural and the obvious way of punctuating the sentence. To make a full stop after $\sigma \alpha \rho \kappa \alpha$ (or colon) and start a new sentence for the doxology is very abrupt and awkward. See Ac 20:28; Tit 2:13 for Paul's use of $\theta \varepsilon o \varsigma$ applied to Jesus Christ.

Rom 9:6
But it is not as though (ov ooov $\delta \varepsilon o \tau$ ). Supply $\varepsilon \sigma \tau \iota \nu$ after ov $\chi$ : "But it is not such as that," an old idiom, here alone in N.T.

Hath come to nought ( $\varepsilon \kappa \pi \varepsilon \pi \tau \omega \kappa \varepsilon v)$. Perfect active indicative of $\varepsilon \kappa \pi \iota \pi \tau \omega$, old verb, to fall out.

For they are not all Israel, which are of Israel (ov $\gamma \alpha \rho \pi \alpha \nu \tau \varepsilon \varsigma$ o $\varepsilon \xi \operatorname{I\sigma } \rho a \eta \lambda$ ov $\frac{1}{}$ I $\sigma \rho \alpha \eta \lambda$ ). "For not all those out of Israel (the literal Jewish nation), these are Israel (the spiritual Israel)." This startling paradox is not a new idea with Paul. He had already shown (Ga 3:7-9) that those of faith are the true sons of Abraham. He has amplified that idea also in Ro 4 . So he is not making a clever dodge here to escape a difficulty. He now shows how this was the original purpose of God to include only those who believed.

Seed of Abraham ( $\sigma \pi \varepsilon \rho \mu \alpha \mathrm{A} \beta \rho \alpha \alpha \mu$ ). Physical descent here, but spiritual seed by promise in verse 8 . He quotes Ge 21:12f.

Rom 9:8
The children of the promise ( $\left.\tau \alpha \tau \varepsilon \kappa v \alpha \tau \eta \varsigma \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda_{ı} \alpha \varsigma\right)$. Not through Ishmael, but through Isaac. Only the children of the promise are "children of God" ( $\tau \varepsilon \kappa v \alpha \operatorname{\tau ov} \theta \varepsilon \circ v$ ) in the full sense. He is not speaking of Christians here, but simply showing that the privileges of the Jews were not due to their physical descent from Abraham. Cf. Lu 3:8 .

Rom 9:9
A word of promise ( $\varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda ı \alpha \varsigma$ o $\lambda o \gamma \circ \varsigma$ ov $\sigma \circ$ ). Literally, "this word is one of promise." Paul combines Ge 18:10,14 from the LXX.

Rom 9:10
Having conceived of one ( $\varepsilon \xi \varepsilon \nu \circ \varsigma \kappa o \iota \tau \eta \nu \varepsilon \chi \circ v \sigma \alpha)$. By metonomy with cause for the effect we have this peculiar idiom (кoו $\eta$ being bed, marriage bed), "having a marriage bed from one" husband. One father and twins.

Rom 9:11
The children being not yet born ( $\mu \eta \pi \omega \gamma \varepsilon \nu \nu \eta \theta \varepsilon \nu \tau \omega \nu$ ). Genitive absolute with first aorist passive participle of $\gamma \varepsilon v \nu \alpha \omega$, to beget, to be born, though no word for children nor even the pronoun $\alpha v \tau \omega \nu$ (they).

Neither having done anything good or bad ( $\mu \eta \delta \varepsilon \pi \rho \alpha \xi \alpha \nu \tau \omega \nu \tau \alpha \gamma \alpha \theta o v \eta \varphi \alpha \nu \lambda o v$ ). Genitive absolute again with first active participle of $\pi \rho \alpha \sigma \sigma \omega$. On $\varphi \alpha u \lambda o v$, see 2Co 5:10 .

The purpose of God ( $\eta \pi \rho \circ \theta \varepsilon \sigma \iota \varsigma$ tov $\theta \varepsilon o v)$. See 8:28 for $\pi \rho \circ \theta \varepsilon \sigma ı \varsigma$.
According to election ( $\kappa \alpha \tau^{\prime} \varepsilon \kappa \lambda о \gamma \eta v$ ). Old word from $\varepsilon \kappa \lambda \varepsilon \gamma \omega$, to select, to choose out. See 1Th 1:4. Here it is the purpose ( $\pi \rho \circ \theta \varepsilon \sigma \iota \varsigma)$ of God which has worked according to the principles of election.

Not of works (ouk $\varepsilon \xi \varepsilon \rho \gamma \omega \nu$ ). Not of merit.
Rom 9:12
But of him that calleth ( $\alpha \lambda \lambda^{\prime} \varepsilon \kappa$ тov к $\alpha \lambda$ ouv $\tau \circ \varsigma$ ). Present active articular participle of $\kappa \alpha \lambda \varepsilon \omega$ in the ablative case after $\varepsilon \kappa$. The source of the selection is God himself. Paul quotes Ge 25:33 (LXX).

## Rom 9:13

Paul quotes Mal 1:2f.
But Esau I hated ( $\tau 0 v \delta \varepsilon$ E $\sigma \alpha v \varepsilon \mu \tau \sigma \eta \sigma \alpha$ ). This language sounds a bit harsh to us. It is possible that the word $\mu \iota \sigma \varepsilon \omega$ did not always carry the full force of what we mean by "hate." See Mt 6:24 where these very verbs ( $\mu \tau \sigma \varepsilon \omega$ and $\alpha \gamma \alpha \pi \alpha \omega$ ) are contrasted. So also in Lu 14:26 about "hating" ( $\mu \tau \sigma \omega)$ one's father and mother if coming between one and Christ. So in Joh 12:25 about "hating" one's life. There is no doubt about God's preference for Jacob and rejection of Esau, but in spite of Sanday and Headlam one hesitates to read into these words here the intense hatred that has always existed between the descendants of Jacob and of Esau.

Rom 9:14
Is there unrighteousness with God? ( $\mu \eta \alpha \delta \iota \kappa ı \alpha \pi \alpha \rho \alpha \tau \omega \theta \varepsilon \omega t ?)$. Paul goes right to the heart of the problem. My expects a negative answer. "Beside" ( $\pi \alpha \rho \alpha$ ) God there can be no injustice to Esau or to any one because of election.

Rom 9:15
For he says to Moses ( $\tau \omega \mathrm{M} \omega v \sigma \varepsilon \gamma \alpha \rho \lambda \varepsilon \gamma \varepsilon$ ). He has an Old Testament illustration of God's election in the case of Pharaoh (Ex 33:19).

On whom I have mercy ( $o v a v \varepsilon \lambda \varepsilon \omega$ ). Indefinite relative with $\alpha v$ and the present active subjunctive of $\varepsilon \lambda \varepsilon \alpha \omega$, late verb only here and Jude 1:23 in N.T. "On whomsoever I have mercy." The same construction in ov av oוк $\tau \varepsilon \rho \omega$, "on whomsoever I have compassion."

Rom 9:16
So then ( $\alpha \rho \alpha o v v$ ). In view of this quotation.
It is not of (ov). We must supply $\varepsilon \sigma \tau \iota v \varepsilon \lambda \varepsilon o \varsigma$ with ov. "Mercy is not of." The articular participles ( $\tau \circ v \theta \varepsilon \lambda o v \tau \circ \sigma, \tau o v \tau \rho \varepsilon \chi \circ v \tau 0 \sigma, \tau o v \varepsilon \lambda \varepsilon \omega \nu \tau \circ \varsigma)$ can be understood as in the genitive with $\varepsilon \lambda \varepsilon \sigma \varsigma$ understood (mercy is not a quality of) or as the predicate ablative of source like $\varepsilon \pi i \lambda v \sigma \varepsilon \omega \varsigma$ in 2 Pe 1:20. Paul is fond of the metaphor of running.

Rom 9:17

To Pharaoh ( $\tau \omega \Phi$ Фара $\omega$ ). There is a national election as seen in verses 7-13, but here Paul deals with the election of individuals. He "lays down the principle that God's grace does not necessarily depend upon anything but God's will" (Sanday and Headlam). He quotes Ex 9:16.

Might be published ( $\delta ı \alpha \gamma \gamma \varepsilon \lambda \eta$ ). Second aorist passive subjunctive of $\delta \iota \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$.

## Rom 9:18

He hardeneth ( $\sigma \kappa \lambda \eta \rho \cup v \varepsilon$ ). Pharaoh hardened his own heart also (Ex 8:15,32; 9:34), but God gives men up also ( $1: 24,26,28$ ). This late word is used by the Greek physicians Galen and Hippocrates. See on Ac 19:9. Only here in Paul.

Rom 9:19
Why doth he still find fault? ( $\tau \varepsilon \tau \mu \varepsilon \mu \varphi \varepsilon \tau \alpha l ?)$. Old verb, to blame. In N.T. only here and Heb 8:8. Paul's imaginary objector picks up the admission that God hardened Pharaoh's heart. "Still" ( $\varepsilon \tau$ ) argues for a change of condition since that is true.

Withstandeth his will ( $\tau \omega \beta$ ou入 $\eta \mu \alpha \tau$ av $\tau o v ~ a v \theta \varepsilon \sigma \tau \eta \kappa \varepsilon v$ ). Perfect active indicative of $\alpha v \theta t \sigma \tau \eta \mu$, old verb, maintains a stand (the perfect tense). Many have attempted to resist God's will ( $\beta o u \lambda \eta \mu \alpha$, deliberate purpose, in N.T. only here and Ac 27:43; 1Pe 4:3). Elsewhere $\theta \varepsilon \lambda \eta \mu \alpha$ (Mt 6:10).

Rom 9:20
Nay, but, O man, who art thou? (O $\alpha v \theta \rho \omega \pi \varepsilon, \mu \varepsilon v$ ouv $\gamma \varepsilon \sigma v \tau \iota \varsigma \varepsilon$ ?). "O man, but surely thou who art thou?" Unusual and emphatic order of the words, prolepsis of $\sigma v$ (thou) before $\tau \iota \varsigma$ (who) and $\mu \varepsilon \nu$ ouv $\gamma \varepsilon$ (triple particle, $\mu \varepsilon \nu$, indeed, ouv, therefore, $\gamma \varepsilon$, at least) at the beginning of clause as in Ro 10:18; Php 3:8 contrary to ancient idiom, but so in papyri.

That repliest (o avталокрıодєvo¢). Present middle articular participle of double compound verb $\alpha v \tau \alpha \pi о к \rho เ v o \mu \alpha$, to answer to one's face ( $\alpha v \tau 1-)$ late and vivid combination, also in Lu 14:6, nowhere else in N.T., but in LXX.

The thing formed ( $\tau$ o $\pi \lambda \alpha \sigma \mu \alpha$ ). Old word (Plato, Aristophanes) from $\pi \lambda \alpha \sigma \sigma \omega$, to mould, as with clay or wax, from which the aorist active participle used here ( $\tau \omega \pi \lambda \alpha \sigma \alpha v \tau$ ) comes. Paul quotes these words from Isa 29:16 verbatim. It is a familiar idea in the Old Testament, the absolute power of God as Creator like the potter's use of clay (Isa 44:8; 45:8-10; Jer 18:6 ). M $\eta$ expects a negative answer.

Why didst thou make me thus? ( $\tau \mu \varepsilon \varepsilon \pi о \sqcap \eta \sigma \alpha \varsigma ~ o v \tau \omega \sigma$ ?). The original words in Isaiah dealt with the nation, but Paul applies them to individuals. This question does not raise the problem of the origin of sin for the objector does not blame God for that but why God has used us as he has, made some vessels out of the clay for this purpose, some for that. Observe "thus" (ovtac). The potter takes the clay as he finds it, but uses it as he wishes.

Rom 9:21
 $\pi \eta \lambda o v$ ?). This question, expecting an affirmative answer, is Paul's reply to the previous one,
"Why didst thou make me thus?" Пŋ $\quad$ оऽ, old word for clay, is mud or wet clay in Joh 9:6,11,14f . The old word for potter (кєрацєvৎ) in N.T. only here and Mt 27:7,10 .

Lump ( $\varphi$ טрацатос). Late word from $\varphi$ р $\rho \alpha \omega$, to mix (clay, dough, etc.).
One part (o $\mu \varepsilon v$ )
--another (o $\delta \varepsilon$ ). Regular idiom for contrast ( $\mu \varepsilon \nu--\delta \varepsilon$ ) with the old demonstrative o (this), "this vessel ( $\sigma \kappa \varepsilon v o \varsigma$, old word as in Mr 11:16 ) for honour, that for dishonour." Paul thus claims clearly God's sovereign right ( $\varepsilon \xi_{o v \sigma \iota \alpha v, ~ p o w e r, ~ r i g h t, ~ a u t h o r i t y, ~ f r o m ~}^{\varepsilon \xi \varepsilon \sigma \tau) \text { to }}$ use men (already sinners) for his own purpose.

Rom 9:22
Willing ( $\theta \varepsilon \lambda \omega v$ ). Concessive use of the participle, "although willing," not causal, "because willing" as is shown by "with much long-suffering" ( $\varepsilon v \pi о \lambda \lambda \eta \mu \alpha \kappa \rho \circ \theta v \mu a \alpha$, in much longsuffering).

His power ( $\tau 0$ סuvatov avtov). Neuter singular of the verbal adjective rather than the substantive $\delta v v a \mu \nu$.

Endured ( $\eta \nu \varepsilon \gamma \kappa \varepsilon v$ ). Constative second aorist active indicative of the old defective verb $\varphi \varepsilon \rho \omega$, to bear.

Vessels of wrath ( $\sigma \kappa \varepsilon \cup \eta$ о $\rho ү \eta \varsigma)$. The words occur in Jer 50:25 (LXX Jer 27:25), but not in the sense here (objective genitive like $\tau \varepsilon \kappa v \alpha$ орүпऽ, Eph 2:3 , the objects of God's wrath).

Fitted (катпртıб $\mu \varepsilon v \alpha$ ). Perfect passive participle of катартı $\omega$, old verb to equip (see Mt 4:21; 2Co 13:11), state of readiness. Paul does not say here that God did it or that they did it. That they are responsible may be seen from 1Th 2:15f.

Unto destruction ( $\varepsilon \varsigma \varsigma \alpha \pi \omega \lambda \varepsilon \iota \alpha v$ ). Endless perdition (Mt 7:13; 2Th 2:3; Php 3:19), not annihilation.

Rom 9:23
Vessels of mercy ( $\sigma \kappa \varepsilon \cup \eta ~ \varepsilon \lambda \varepsilon \sigma \cup \varsigma)$. Objective genitive like $\sigma \kappa \varepsilon \cup \eta$ орүŋऽ.
Afore prepared ( $\pi \rho \circ \eta \tau о \mu \alpha \sigma \varepsilon v)$. First aorist active indicative of $\pi \rho о \varepsilon \tau о \mu \alpha \zeta \omega$, old verb to make ready (from $\varepsilon \tau о \mu \circ \varsigma$, ready) and $\pi \rho \circ$, before, in N.T. only here and Eph 2:10 . But same idea in Ro 8:28-30 .

Rom 9:24
But also from the Gentiles ( $\alpha \lambda \lambda \alpha \kappa \alpha \varepsilon \xi \varepsilon \theta v \omega v$ ). Paul had already alluded to this fact in 9:6f. (cf. Ga 3:7-9 ). Now he proceeds to prove it from the Old Testament.

## Rom 9:25

In Hosea ( $\varepsilon v \tau \omega \mathrm{H} \omega \sigma \eta \varepsilon$ ). He quotes 2:23 with some freedom. Hosea refers to the ten tribes and Paul applies the principle stated there to the Gentiles. Hosea had a son named Lo-ammi $=$ ov $\lambda \alpha o c$. So here o ov $\lambda \alpha o c ~ \mu o v$ "the not people of mine." Ov with substantives obliterates the meaning of the substantive, an idiom seen in Thucydides and other Greek writers. See also Ro 10:19; 1Pe 2:10 .

Which was not beloved ( $\tau \eta v$ ovk $\eta \gamma a \pi \eta \mu \varepsilon \nu \eta \nu$ ). The LXX rendering of Lo-ruhamah (not mercy, without mercy or love), name of Hosea's daughter. The use of ouk with the perfect passive participle is emphatic, since $\mu \eta$ is the usual negative of the participle in the Koine.

Rom 9:26
Ye are not my people (ov $\lambda \alpha o \varsigma ~ \mu o v ~ v \mu \varepsilon ı \varsigma) . ~ Q u o t a t i o n ~ f r o m ~ H o ~ 1: 10 ~(L X X ~ H o ~ 2: 1 ~) . ~$.
There ( $\varepsilon \kappa \varepsilon$ ). Palestine in the original, but Paul applies it to scattered Jews and Gentiles everywhere.

Rom 9:27
Isaiah (Eбaıac). Shortened quotation from Isa 10:22 (LXX).
It is the remnant that shall be saved ( $\tau 0$ v $о \lambda \varepsilon \mu \mu \mu \alpha \omega \theta \eta \sigma \varepsilon \tau \alpha$ ). First future passive of $\sigma \omega \zeta \omega$. Literally, "the remnant will be saved." Late word from vпо入єוл $\omega$, to leave behind ( 11:3), here only in N.T. Textus Receptus has $\kappa \alpha \tau \alpha \lambda \varepsilon \mu \mu \alpha$, but Aleph A B have vто $\lambda \varepsilon \mu \mu \alpha$. Isaiah cries in anguish over the outlook for Israel, but sees hope for the remnant.

Rom 9:28
Finishing it and cutting it short ( $\sigma \nu \nu \tau \varepsilon \lambda \omega \nu \kappa \alpha \sigma \nu \nu \tau \varepsilon \mu \nu \omega \nu$ ). Present active participles and note $\sigma u v$ - with each (perfective use of the preposition, finishing completely as in Lu 4:13, cutting off completely or abridging and here only in N.T.) The quotation is from Isa 28:22.

Rom 9:29
Hath said before ( $\pi \rho о \varepsilon ı \rho \eta \kappa \varepsilon v$ ). Perfect active indicative of $\pi \rho о \varepsilon ı \pi о v$ (defective verb). Stands on record in Isa 1:9.

Had left ( $\varepsilon \gamma \kappa \alpha \tau \varepsilon \lambda ı \pi \varepsilon v)$. Second aorist active indicative of old verb $\varepsilon \gamma \kappa \alpha \tau \alpha \lambda \varepsilon ı \pi \omega$, to leave behind. Condition of second class, determined as unfulfilled, with $\alpha v \varepsilon \gamma \varepsilon v \eta \theta \eta \mu \varepsilon v$ and $\alpha v \omega \mu o t \omega \theta \eta \mu \varepsilon v$ as the conclusions (both first aorist passives of $\gamma i v o \mu \alpha$ and o o $\mu \circ \circ \omega$, common verbs).

A seed ( $\sigma \pi \varepsilon \rho \mu \alpha)$. The remnant of verse 27.
Rom 9:30
Attained ( $\kappa \alpha \tau \varepsilon \lambda \alpha \beta \varepsilon v$ ). Second aorist active indicative of $\kappa \alpha \tau \alpha \lambda \alpha \mu \beta \alpha v \omega$, old verb, to grasp, to seize, to overtake (carrying out the figure in $\delta \omega \omega \kappa \omega$ (to pursue). It was a curious paradox.

Which is of faith ( $\tau \eta v \varepsilon \kappa \pi / \sigma \tau \varepsilon \omega \varsigma$ ). As Paul has repeatedly shown, the only way to get the God-kind of righteousness.

Rom 9:31
Did not arrive at that law ( $\varepsilon ı \varsigma ~ v o \mu \circ v$ ouk $\varepsilon \varphi \theta \alpha \sigma \varepsilon v$ ). First aorist active indicative of $\varphi \theta \alpha v \omega$, old verb to anticipate (1Th 4:15), now just to arrive as here and 2Co 10:14. The word "that" is not in the Greek. Legal righteousness Israel failed to reach, because to do that one had to keep perfectly all the law.

Rom 9:32
We must supply the omitted verb $\varepsilon \delta \iota A ̂ \omega \xi \alpha$ (pursued) from verse 31 . That explains the rest.

They stumbled at the stone of stumbling ( $\pi \rho о \sigma \varepsilon к о \psi \alpha \nu \tau \omega \lambda \iota \theta \omega \tau о v \pi \rho о \sigma \kappa о \mu \mu \alpha \tau о$ ). The quotation is from Isa 8:14. Пробко $\tau \tau \omega$ means to cut ( $\kappa о \pi \tau \omega$ ) against ( $\pi \rho \circ \varsigma$ ) as in Mt 4:6; Joh 11:9f. The Jews found Christ a $\sigma \kappa \alpha v \delta \alpha \lambda$ ov (1Co 1:23 ).

Rom 9:33
Paul repeats the phrase just used in the whole quotation from Isa 8:14 with the same idea in "a rock of offence" ( $\pi \varepsilon \tau \rho \alpha \nu \sigma \kappa \alpha \nu \delta \alpha \lambda o v$, "a rock of snare," a rock which the Jews made a cause of stumbling). The rest of the verse is quoted from Isa 28:16. However, the Hebrew means "shall not make haste" rather than "shall not be put to shame." In 1Pe 2:8 we have the same use of these Scriptures about Christ. Either Peter had read Romans or both Paul and Peter had a copy of Christian Testimonia like Cyprian's later.

## Romans 10

Rom 10:1
 LXX and N.T., but no example for "desire" unless this is one, though the verb $\varepsilon \cup \delta o \kappa \varepsilon \omega$ is common in Polybius, Diodorus, Dion, Hal. It means will, pleasure, satisfaction (Mt 11:26; 2Th 1:11; Php 1:15; 2:13; Eph 1:5,9 ).

Supplication ( $\delta \varepsilon \eta \sigma ı \varsigma)$. Late word from $\delta \varepsilon o \mu \alpha$, to want, to beg, to pray. In the papyri. See Lu 1:13. It is noteworthy that, immediately after the discussion of the rejection of Christ by the Jews, Paul prays so earnestly for the Jews "that they may be saved" ( $\varepsilon ı \varsigma \sigma \omega \tau \eta \rho \iota \alpha v$ ), literally "unto salvation." Clearly Paul did not feel that the case was hopeless for them in spite of their conduct. Bengel says: Non orasset Paul si absolute reprobati essent (Paul would not have prayed if they had been absolutely reprobate). Paul leaves God's problem to him and pours out his prayer for the Jews in accordance with his strong words in 9:1-5.

Rom 10:2
A zeal for God ( $\zeta \eta \lambda o v \theta \varepsilon o v)$. Objective genitive like Php 3:9, "through faith in Christ" ( $\delta \iota \alpha \pi \iota \sigma \tau \varepsilon \omega \varsigma$ X $\rho \stackrel{\sigma \tau \sigma ⿱) \text { ). }}{\text {. }}$

But not according to knowledge ( $\alpha \lambda \lambda^{\prime}$ ov $\kappa \alpha \tau^{\prime} \varepsilon \pi \imath \gamma v \omega \sigma \iota v$ ). They had knowledge of God and so were superior to the Gentiles in privilege (2:9-11), but they sought God in an external way by rules and rites and missed him (9:30-33). They became zealous for the letter and the form instead of for God himself.

Rom 10:3
Being ignorant of God's righteousness ( $\alpha \gamma v o o u v \tau \varepsilon \varsigma \tau \eta \nu \tau 0 v$ $\theta \varepsilon o v \delta \iota \kappa \alpha \iota \sigma \nu \nu \eta \nu$ ). A blunt thing to say, but true as Paul has shown in 2:1-3:20. They did not understand the Godkind of righteousness by faith ( $1: 17$ ). They misconceived it ( $2: 4$ ).

They did not subject themselves (ovX $\cup \pi \varepsilon \tau \alpha \gamma \eta \sigma \alpha v)$. Second aorist passive indicative of $\cup \pi о \tau \alpha \sigma \sigma \omega$, common Koine verb, to put oneself under orders, to obey, here the passive in sense of the middle (Jas 4:7) like $\alpha \pi \varepsilon \kappa \rho 1 \theta \eta \nu$, I answered.

Rom 10:4
The end of the law ( $\tau \varepsilon \lambda о \varsigma$ vouov). Christ put a stop to the law as a means of salvation (6:14; 9:31; Eph 2:15; Col 2:14) as in Lu 16:16. Christ is the goal or aim of the law (Gal 3:24 ). Christ is the fulfilment of the law (Mt 5:17; Ro 13:10; 1Ti 1:5 ). But here (Denney) Paul's main idea is that Christ ended the law as a method of salvation for "every one that believeth" whether Jew or Gentile. Christ wrote finis on law as a means of grace.

Rom 10:5
Thereby ( $\varepsilon v$ avin). That is by or in "the righteousness that is from law." He stands or falls with it. The quotation is from Le 18:5.

Rom 10:6

Saith thus (out $\omega \varsigma \lambda \varepsilon \gamma \varepsilon$ ). Paul personifies "the from faith righteousness" ( $\eta \varepsilon \kappa \pi / \sigma \tau \varepsilon \omega \varsigma$ $\delta ı \kappa \alpha \ldots \sigma u v \eta)$. A free reproduction from De 30:11-14 . Paul takes various phrases from the LXX and uses them for "his inspired conviction and experiences of the gospel" (Denney). He does not quote Moses as saying this or meaning this.

Say not in thy heart ( $\mu \eta \varepsilon ו \pi \eta ı \varsigma \varepsilon \nu \tau \eta \kappa \alpha \rho \delta \iota \alpha \sigma o v)$. Second aorist active subjunctive with $\mu \eta$ like De 8:17. To say in the heart is to think (Mt 3:9).
 infinitive of the common verb $\kappa \alpha \tau \alpha \gamma \omega$, to bring or lead down. It is dependent on the preceding verb $\alpha v a \beta \eta \sigma \varepsilon \tau \alpha$ (shall ascend). Tout' $\varepsilon \sigma \tau \iota v$ (that is) is what is called Midrash or interpretation as in 9:8. It occurs three times here (verses 6-8). Paul applies the words of Moses to Christ. There is no need for one to go to heaven to bring Christ down to earth. The Incarnation is already a glorious fact. Today some men scout the idea of the Deity and Incarnation of Christ.

## Rom 10:7

Into the abyss ( $\varepsilon ı \varsigma \tau \eta v \alpha \beta v \sigma \sigma o v)$ ) See Lu 8:31 for this old Greek word (a privative and $\beta \cup \sigma \sigma o \varsigma)$ bottomless like sea (Ps 106:26), our abyss. In Re 9:1 it is the place of torment. Paul seems to refer to Hades or Sheol (Ac 2:27,31) , the other world to which Christ went after death.

To bring Christ up (Xpıotov $\alpha v a \gamma \alpha \gamma \varepsilon เ v)$. Second aorist active infinitive of $\alpha v \alpha \gamma \omega$ and dependent on $\kappa \alpha \tau \alpha \beta \eta \sigma \varepsilon \tau \alpha$ (shall descend). Christ has already risen from the dead. The deity and resurrection of Christ are precisely the two chief points of attack today on the part of sceptics.

Rom 10:8
But what saith it? ( $\alpha \lambda \lambda \alpha \tau \lambda \varepsilon \gamma \varepsilon$ ?). That is "the from faith righteousness."
The word of faith ( $\tau 0 \rho \eta \mu \alpha \tau \eta \varsigma \pi / \sigma \tau \varepsilon \omega \varsigma$ ). The gospel message concerning faith (objective genitive). Only here. In contrast to the law.

Which we preach (о кп $\rho \cup \sigma \sigma о \mu \varepsilon v$ ). The living voice brings home to every one the faith kind of righteousness. Paul seizes upon the words of Moses with the orator's instinct and with rhetorical skill (Sanday and Headlam) applies them to the facts about the gospel message about the Incarnation and Resurrection of Christ.

Rom 10:9
If thou shalt confess ( $\varepsilon \alpha v$ о $\mu \circ \lambda о \gamma \eta \sigma \eta \iota \varsigma)$. Third class condition ( $\varepsilon \alpha \nu$ and first aorist active subjunctive of o $\mu \mathrm{o} \lambda \mathrm{o} \gamma \varepsilon \omega$ ).

With thy mouth Jesus as Lord ( $\varepsilon v \tau \omega \sigma \tau \sigma \mu \alpha \tau \sigma o v$ Kvpoov I $\eta \sigma o v v$ ). This is the reading of nearly all the MSS. But B 71 Clem of Alex. read $\tau 0 \rho \eta \mu \alpha \varepsilon v \tau \omega \sigma \tau о \mu \alpha \tau \sigma o v$ oт Kvpıos Inoous (the word in thy mouth that Jesus is Lord). The idea is the same, the confession of Jesus as Lord as in 1Co 12:3; Php 2:11. No Jew would do this who had not really trusted

Christ, for Kupıos in the LXX is used of God. No Gentile would do it who had not ceased worshipping the emperor as Kvpıoc. The word Kupıos was and is the touchstone of faith.

And shalt believe ( $\kappa \alpha \pi \iota \sigma \tau \varepsilon \cup \sigma \eta \vdash)$ ). Same construction. Faith precedes confession, of course.

Rom 10:10
Man believeth ( $\pi$ ) $\sigma \tau \varepsilon \cup \varepsilon \tau \alpha$ ). Impersonal construction, "it is believed" (present passive indicative of $\pi \iota \sigma \tau \varepsilon v \omega)$. The order is reversed in this verse and the true order (faith, then confession).

Confession is made ( $\mathrm{o} \mu \mathrm{o} \lambda о \boldsymbol{\varepsilon} \varepsilon \tau \alpha$ ). Impersonal construction again, "it is confessed," "man confesses." Both кар $\delta \iota \alpha$ (heart) and $\sigma \tau о \mu \alpha \tau$ (mouth) are in the instrumental case.

Rom 10:11
Every one ( $\pi \alpha \varsigma$ ). Paul adds this word to the quotation from Isa 28:16 already made in 9:33.

Rom 10:12
Distinction ( $\delta 1 \alpha \sigma \tau 0 \lambda \eta$ ). See on this word 3:22. Here it is followed by the ablative case

Lord of all (Kvpıoc $\pi \alpha v \tau \omega v$ ). See Ga 3:28.
Rich ( $\pi \lambda \mathrm{\lambda ov} \tau \omega v$ ). Present active participle of $\pi \lambda$ ovt $\tau \omega$. See Eph 3:8 "the unsearchable riches of Christ."

Rom 10:13
Paul here quotes Joe 3:5 (Joe 2:32 LXX).

## Rom 10:14

How then shall they call? ( $\pi \omega \varsigma$ ouv $\varepsilon \pi!\kappa \alpha \lambda \varepsilon \sigma \omega v \tau \alpha!$ ). Deliberative subjunctive (first aorist middle) of $\varepsilon \pi \iota \kappa \alpha \lambda \varepsilon \circ \mu \alpha$ (see verses 12,13 ). The antecedent of $\varepsilon ı \varsigma ~ o v$ (in whom) is not expressed.

How shall they believe? ( $\pi 0 \varsigma \pi \mid \sigma \tau \varepsilon v \sigma \omega \sigma \omega v$ ?). Deliberative subjunctive again (first aorist active of $\pi / \sigma \tau \varepsilon v \omega$ just used). Each time Paul picks up the preceding verb and challenges that. Here again the antecedent $\varepsilon$ ह८ $\varsigma$ touto $v$ before $o v$ is not expressed.

How shall they hear? ( $\pi \circ \varsigma ~ \alpha \kappa о v \sigma \omega \sigma ı v ?) . ~ D e l i b e r a t i v e ~ s u b j u n c t i v e ~(f i r s t ~ a o r i s t ~ a c t i v e ~ o f ~$ акоиш).

Without a preacher? ( $\chi \omega \rho ı \varsigma \kappa \eta \rho \cup \sigma \sigma о v \tau о \sigma$ ?). Preposition $\chi \omega \rho \iota \varsigma$ with ablative singular masculine present active participle of кпрטбб $\omega$, "without one preaching."

How shall they preach? ( $\pi \omega \varsigma \kappa \eta \rho \nu \xi \omega \sigma \iota v$ ?). Deliberative subjunctive again (first aorist active кприбб $\omega$, to preach).

Except they be sent? ( $\varepsilon \alpha v \mu \eta \alpha \pi o \sigma \tau \alpha \lambda \omega \sigma \iota v$ ?). Second aorist passive deliberative subjunctive of $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$, to send, from which verb $\alpha \pi \sigma \sigma \tau o \lambda o s ~ a p o s t l e ~ c o m e s . ~ N e g a t i v e ~ c o n-~$ dition of third class. In graphic style Paul has made a powerful plea for missions. It is just as true today as then.

Rom 10:15
How beautiful (H $\omega \varsigma \omega \rho a \iota o$ ). A quotation from Isa 52:7 more like the Hebrew than the LXX, picturing the messengers of the restoration from the Jewish captivity. Paul assumes that the missionaries ( $\alpha \pi \sigma \sigma \tau 0 \lambda 0$ ) have been sent as implied in verse 14.

## Rom 10:16

But they did not all hearken ( $o v \pi \alpha \nu \tau \varepsilon \varsigma v \pi \eta \kappa о v \sigma \alpha v$ ). They heard, but did not heed. Some disbelieve now ( $3: 3$ ) as they did then. On obedience and disobedience see $5: 19$; 1 Th 2:13; Ga 3:2. He quotes Isa 53:1 to show how Isaiah felt.

Report (aкоך). Literally, "hearing" (Mt 14:1; Mr 13:7).
Rom 10:17
By the word of Christ ( $\delta ı \alpha \rho \eta \mu \alpha \tau \circ \mathrm{X} \rho \iota \sigma \tau o v$ ). "By the word about Christ" (objective genitive).

Rom 10:18
Did they not hear? ( $\mu \eta$ оик $\eta \kappa о \cup \sigma \alpha \nu$ ?). Rather, "Did they fail to hear?" (expecting the negative answer $\mu \eta$, while ouk blends with the verb). See on 1Co 9:5 for this construction.

Yea, verily ( $\mu \varepsilon v o v v \gamma \varepsilon$ ). Triple particle ( $\mu \varepsilon v, o v v, \gamma \varepsilon$ ) as in 9:20.
Sound ( $\varphi \theta$ оүүоৎ). Vibration of a musical string. See on 1Co 14:7. Only two N.T. examples.

The world ( $\tau \eta \varsigma$ oוкои $\mu \varepsilon \vee \eta \varsigma)$. The inhabited earth as in Lu 2:1.
Rom 10:19
Did Israel not know? ( $\mu \eta$ I $\sigma \rho \alpha \varepsilon \lambda$ оик $\varepsilon \gamma \nu \omega$ ?). "Did Israel fail to know?" See above.
First ( $\pi \rho \omega \tau \sigma \varsigma)$. Moses first before any one else. LXX quotation De 32:21. See on 1Co 10:22 for $\pi \alpha \rho \alpha \zeta \eta \lambda \omega \sigma \omega$ (I will provoke you to jealousy).

With that which is no nation ( $\varepsilon \pi^{\prime}$ ouk $\varepsilon \theta v \varepsilon$ ). The Jews had worshipped "no-gods" and now God shows favours to a "no-nation" (people).

Will I anger you ( $\pi \alpha \rho o \rho \gamma เ \omega v \mu \alpha \varsigma)$. Future active (Attic future) of $\pi \alpha \rho o \rho \gamma \iota \zeta \omega$, rare word, to rouse to wrath.

Rom 10:20
Is very bold ( $\alpha \pi \sigma \tau \sigma \lambda \mu \alpha$ ). Present active indicative of $\alpha \pi \sigma \tau \sigma \lambda \mu \alpha \omega$, old word, to assume boldness ( $\alpha \pi 0$, off) and only here in N.T. Isaiah "breaks out boldly" (Gifford). Paul cites Isa 65:1 in support of his own courage against the prejudice of the Jews. See 9:30-33 for illustration of this point.

I was found $(\varepsilon v \rho \varepsilon \theta \eta v)$. First aorist passive indicative of $\varepsilon v \rho \iota \sigma \kappa \omega$.
Rom 10:21
All the day long (o $\lambda \eta \nu \tau \eta \nu \eta \mu \varepsilon \rho \alpha \nu$ ). Accusative of extent of time. He quotes Isa 65:2.
Did I spread out ( $\varepsilon \xi \varepsilon \pi \varepsilon \tau \alpha \sigma \alpha$ ). First aorist active indicative of $\varepsilon \kappa \pi \varepsilon \tau \alpha \nu \nu \nu \mu$, old verb, to stretch out, bold metaphor, only here in N.T.

Unto a disobedient and a gainsaying people ( $\pi \rho \circ \varsigma \lambda \alpha o v \alpha \pi \varepsilon \forall \theta$ ouv $\alpha \alpha \kappa \alpha \alpha \nu \tau 1 \lambda \varepsilon \gamma \sigma \nu \tau \alpha$ ). "Unto a people disobeying and talking back." The two things usually go together. Contrary and contradictory (Lu 13:34f. ).

## Romans 11

Rom 11:1
I say then $(\lambda \varepsilon \gamma \omega \mathrm{ovv})$. As in verse 11 . Ovv looks back to 9:16-33 and 10:19-21.
Did God cast off? ( $\mu \eta \alpha \pi \omega \sigma \alpha \tau o$ o $\theta \varepsilon \sigma \sigma$ ?). An indignant negative answer is called for by $\mu \eta$ and emphasized by $\mu \eta \gamma \varepsilon v o ו \tau o$ (God forbid). Paul refers to the promise in the O.T. made three times: 1Sa 12:22; Ps 94:14 (Ps 93:14 LXX); Ps 94:4. First aorist middle indicative (without augment) of $\alpha \pi \omega \theta \varepsilon \omega$, to push away, to repel, middle, to push away from one as in Ac 7:27.

For I also ( $\kappa \alpha \gamma \alpha \rho \varepsilon \gamma \omega$ ). Proof that not all the Jews have rejected Christ. See Php 3:5 for more of Paul's pedigree.

Rom 11:2
Whom he foreknew (ov $\pi \rho o \varepsilon \gamma \nu \omega$ ). The same form and sense as in 8:29, which see. Probably the Hebrew sense of choice beforehand. The nation of Israel was God's chosen people and so all the individuals in it could not be cast off.

Wot ye not? (ovk ot $\delta \alpha \tau \varepsilon$ ?). "Know ye not?" Why keep the old English "wot"?
Of Elijah ( $\varepsilon v$ E $\lambda \varepsilon \iota \alpha$ ). "In the case of Elijah." Cf. "in the bush" (Mr 12:26).
He pleadeth ( $\varepsilon v \tau v \gamma \chi \alpha v \varepsilon)$. See on 8:27. Ev $v \gamma \chi \alpha v \omega$ means to happen on one and so to converse with (Ac 25:24), to plead for (Ro 8:27,34), to plead against as here with кata, but the "against" is in $\kappa \alpha \tau \alpha$.

Rom 11:3
They have digged down ( $\kappa \alpha \tau \varepsilon \sigma \kappa \alpha \psi \alpha v$ ). First aorist active indicative of $\kappa \alpha \tau \alpha \sigma \kappa \alpha \pi \tau \omega$, to dig under or down. Old verb, here only in N.T. (critical text). LXX has $\kappa \alpha \theta \varepsilon \iota \lambda \alpha v$ "pulled down." Paul has reversed the order of the LXX of 1Ki 19:10,14,18.

Altars ( $\theta v \sigma \iota \alpha \sigma \tau \eta \rho \iota \alpha)$. Late word (LXX, Philo, Josephus, N.T. eccl. writers) from $\theta v \sigma \iota \alpha \zeta \omega$, to sacrifice. See Ac 17:23.

And I am left alone ( $\kappa \alpha \gamma \omega v \pi \varepsilon \lambda \varepsilon \iota \varphi \theta \eta \nu \mu \circ \nu \circ \varsigma)$. First aorist passive indicative of $v \pi о \lambda \varepsilon \iota \pi \omega$, old word, to leave under or behind, here only in N.T. Elijah's mood was that of utter dejection in his flight from Jezebel.

Life $(\psi v \chi \eta v)$. It is not possible to draw a clear distinction between $\psi v \chi \eta$ (soul) and $\pi \nu \varepsilon v \mu \alpha$ (spirit). $\Psi v \chi \eta$ is from $\psi v \chi \omega$, to breathe or blow, $\pi \nu \varepsilon v \mu \alpha$ from $\pi \nu \varepsilon \omega$, to blow. Both are used for the personality and for the immortal part of man. Paul is usually dichotomous in his language, but sometimes trichotomous in a popular sense. We cannot hold Paul's terms to our modern psychological distinctions.

Rom 11:4
The answer of God (o $\chi \rho \eta \mu \alpha \tau \iota \sigma \mu \circ \varsigma)$. An old word in various senses like $\chi \rho \eta \mu \alpha \tau \iota \zeta \omega$, only here in N.T. See this use of the verb in Mt 2:12,22; Lu 2:26; Ac 10:22 .

To Baal ( $\tau \eta B \alpha \alpha \lambda$ ). Feminine article. In the LXX the name B $\alpha \alpha \lambda$ is either masculine or feminine. The explanation is that the Jews put Bosheth ( $\alpha, \sigma \chi \cup v \eta$, shame) for Baal and in the LXX the feminine article occurs because aı $\sigma \chi$ vv is so, though here the LXX has the masculine $\tau \omega$.

Rom 11:5
Remnant $(\lambda \mu \mu \alpha)$. Old word, but only here in N.T., but in papyri also and with this spelling rather than $\lambda \varepsilon \varepsilon \mu \mu \alpha$. From $\lambda \varepsilon ו \pi \omega$, to leave.

According to the election of grace ( $\left.\kappa \alpha \tau^{\prime} \varepsilon \kappa \lambda о \gamma \eta \nu \chi \alpha \rho ı \tau о \varsigma\right)$. As in 9:6-13. The election is all of God. Verse 6 explains it further.

Rom 11:6
Otherwise ( $\varepsilon \pi \varepsilon$ ). Ellipse after $\varepsilon \pi \varepsilon$ (since), "since, in that case."
Is no more (ouket $\gamma \iota \nu \varepsilon \tau \alpha$ ). "No longer becomes" grace, loses its character as grace. Augustine: Gratia nisi gratis sit gratia non est.

Rom 11:7
What then? ( $\tau$ ouv?). Since God did not push Israel away (verse 1), what is true?
The election ( $\eta \varepsilon \kappa \lambda o \gamma \eta$ ). Abstract for concrete (the elect).
Obtained ( $\varepsilon \pi \varepsilon \tau \cup \chi \varepsilon v)$. Second aorist active indicative of $\varepsilon \pi \iota \tau v \gamma \chi \alpha v \omega$, old verb, to hit upon, only here in Paul. See 9:30-33 for the failure of the Jews.

Were hardened ( $\varepsilon \pi \omega \rho \omega \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\pi \omega \rho o \omega$, late verb, to cover with thick skin ( $\pi \omega \rho \circ \varsigma)$. See on 2Co 3:14; Mr 3:5.

Rom 11:8
A spirit of stupor ( $\pi \nu \varepsilon \cup \mu \alpha$ катаvv $\xi \varepsilon \omega \varsigma)$. The quotation is a combination of De 19:4; Isa 29:10; 6:9f. This phrase is from Isa 29:10. Katavu $\xi_{\text {ıc }}$ is a late and rare word from кат $\alpha v v \sigma \sigma \omega$, to prick or stick (Ac 2:37), in LXX, here only in N.T., one example in PelagiaLegende. The torpor seems the result of too much sensation, dulled by incitement into apathy.

That they should not see ( $\tau 0 v \mu \eta \beta \lambda \varepsilon \pi \varepsilon \iota v$ ). Genitive articular infinitive of negative purpose.

That they should not hear ( $\tau$ ои $\mu \eta$ акоvะıv). So here also. See Stephen's speech (Ac 7:51f. ).

Rom 11:9
David says ( $\Delta a v \varepsilon \delta \delta \lambda \varepsilon \gamma \varepsilon$ ). From Ps 69:23f ; (68:23f LXX); 34:8; $28: 4$ (combined quotation).

Table ( $\tau \rho \alpha \pi \varepsilon \zeta \alpha)$. For what is on the table, "a feast."
A snare ( $\varepsilon \iota \varsigma \pi \alpha \downarrow \delta \alpha$ ). From $\pi \eta \gamma \nu v \mu$, to make fast, old word for snares for birds and beasts. See on Lu 21:35. Etc in predicate with $\gamma$ lvo $\mu \alpha$ is a translation-Hebraism.

A trap ( $\varepsilon \iota \varsigma \quad \theta \eta \rho a v)$. Old word for hunting of wild beasts, then a trap. Only here in N.T.

A stumbling-block ( $\varepsilon \iota \varsigma \sigma \kappa \alpha v \delta \alpha \lambda o v)$. A third word for trap, snare, trap-stick or trigger over which they fall. See on 1Co 1:23; Ro 9:33.

A recompense ( $\varepsilon \varsigma \varsigma \alpha \tau \tau \pi \sigma \delta \circ \mu \alpha$ ). Late word from double compound verb $\alpha v \tau \alpha \pi \sigma \delta \iota \delta \omega \mu$, to repay (both $\alpha v \tau$ and $\alpha \pi \sigma$ ). Ancient Greeks used $\alpha v \tau \alpha \pi o \delta o \sigma \iota c$. In LXX and Didache. In N.T. only here (bad sense) and Lu 14:12 (good sense).

Rom 11:10
Let their eyes be darkened ( $\sigma \kappa \sigma \tau \iota \sigma \theta \eta \tau \omega \sigma \alpha \nu$ o o $\rho \theta \alpha \lambda \mu \mathrm{o} \alpha \nu \tau \omega v$ ). First aorist passive imperative of $\sigma \kappa о \tau \iota \zeta \omega$, to darken. A terrible imprecation.

That they may not see ( $\tau 0 v \mu \eta \beta \lambda \varepsilon \pi \varepsilon เ v$ ). Repeated from verse 8.
Bow down ( $\sigma v v \kappa \alpha \mu \psi o v$ ). First aorist active imperative of $\sigma v v \kappa \alpha \mu \pi \tau \omega$, old verb, to bend together as of captives whose backs ( $v \omega \tau$ tov, another old word, only here in N.T.) were bent under burdens. Only here in N.T.

Rom 11:11
Did they stumble that they might fall? ( $\mu \eta \varepsilon \pi \tau \alpha ı \sigma \alpha \nu \stackrel{\iota}{ } \pi \varepsilon \sigma \omega \sigma \iota v$ ?). Negative answer expected by $\mu \eta$ as in verse 1 . First aorist active indicative of $\pi \tau \alpha \iota \omega$, old verb, to stumble, only here in Paul (see Jas 3:2 ), suggested perhaps by $\sigma \kappa \alpha v \delta \alpha \lambda o v$ in verse 9 . If tva is final, then we must add "merely" to the idea, "merely that they might fall" or make a sharp distinction between $\pi \tau \alpha \omega \omega$, to stumble, and $\pi \iota \tau \tau \omega$, to fall, and take $\pi \varepsilon \sigma \omega \sigma \omega v$ as effective aorist active subjunctive to fall completely and for good. Hiva, as we know, can be either final, sub-final, or even result. See 1Th 5:4; 1Co 7:29; Ga 5:17. Paul rejects this query in verse 11 as vehemently as he did that in verse 1 .

By their fall ( $\tau \omega \alpha \nu \tau \omega v \pi \alpha \rho \alpha \pi \tau \omega \mu \alpha \tau$ ). Instrumental case. For the word, a falling aside or a false step from $\pi \alpha \rho \alpha \pi \iota \pi \tau \omega$, see 5:15-20.

Is come. No verb in the Greek, but $\gamma \iota \nu \varepsilon \tau \alpha$ or $\gamma \varepsilon \gamma \circ v \varepsilon v$ is understood.
For to provoke them to jealousy ( $\varepsilon \iota \varsigma ~ \tau о ~ \pi \alpha \rho \alpha \zeta \eta \lambda \omega \sigma \alpha$ ). Purpose expressed by $\varepsilon \iota \varsigma$ and the articular infinitive, first aorist active, of $\pi \alpha \rho \alpha \zeta \eta \lambda 0 \omega$, for which verb see 1Co 10:22. As an historical fact Paul turned to the Gentiles when the Jews rejected his message (Ac 13:45ff.; 28:28 , etc.).

The riches of the world ( $\pi \lambda$ оотос коб $\mu о v$ ). See 10:12.
Their loss ( $\tau 0 \eta \tau \tau \eta \mu \alpha \alpha v \tau \omega v$ ). So perhaps in 1Co 6:7, but in Isa 31:8 defeat is the idea. Perhaps so here.

Fulness ( $\pi \lambda \eta \rho \omega \mu \alpha)$. Perhaps "completion," though the word from $\pi \lambda \eta \rho o \omega$, to fill, has a variety of senses, that with which anything is filled (1Co 10:26,28), that which is filled (Eph 1:23).

How much more? ( $\pi \sigma \sigma \omega \mu \alpha \lambda \lambda o v$ ). Argument a fortiori as in verse 24. Verse 25 illustrates the point.

Rom 11:13

To you that are Gentiles (v $\mu ı \nu \tau o \iota \varepsilon \theta v \varepsilon \sigma \tau v)$. "To you the Gentiles." He has a serious word to say to them.

Inasmuch then ( $\varepsilon \varphi^{\prime}$ ooov $\mu \varepsilon v$ ovv). Not temporal, quamdiu, "so long as" (Mt 9:15 ), but qualitative quatenus "in so far then as" (Mt 25:40).

I glorify my ministry ( $\tau \eta \nu \delta \iota \alpha \kappa \frac{v ı}{} \nu \nu \mu \circ \delta \delta o \xi \alpha \zeta \omega$ ). As apostle to the Gentiles ( $\varepsilon \theta v \omega v$ $\alpha \pi о \sigma \tau 0 \lambda o \varsigma$, objective genitive). Would that every minister of Christ glorified his ministry.

If by any means ( $\varepsilon \pi \omega \varsigma$ ). This use of $\varepsilon$ with purpose or aim is a kind of indirect discourse.
I may provoke ( $\pi \alpha \rho \alpha \zeta \eta \lambda \omega \sigma \omega)$. Either future active indicative or first aorist active subjunctive, see same uncertainty in Php 3:10 кат $\alpha v \tau \eta \sigma \omega$, but in 3:11 ка $\tau \alpha \lambda \alpha \beta \omega$ after $\varepsilon$ is subjunctive. The future indicative is clear in Ro 1:10 and the optative in Ac 27:12. Doubtful whether future indicative or aorist subjunctive also in $\sigma \omega \sigma \omega$ (save).

Rom 11:15
The casting away of them ( $\eta \alpha \pi \circ \beta \circ \lambda \eta \alpha v \tau \omega v$ ). Objective genitive ( $\alpha v \tau \omega v$ ) with $\alpha \pi \circ \beta o \lambda \eta$, old word from $\alpha \pi \sigma \beta \alpha \lambda \lambda \omega$, to throw off (Mr 10:50), in N.T. only here and Ac 27:22 .

The reconciling of the world ( $\kappa \alpha \tau \alpha \lambda \lambda \alpha \gamma \eta \kappa о \sigma \mu \circ v)$. See 5:10f. for кат $\alpha \lambda \lambda \alpha \gamma \eta$ (reconciling). It explains verse 12 .

The receiving ( $\eta \pi \rho \circ \sigma \lambda \eta \mu \psi \iota \varsigma$ ). Old word from $\pi \rho \circ \sigma \lambda \alpha \mu \beta \alpha \nu \omega$, to take to oneself, only here in N.T.

Life from the dead ( $\zeta \omega \eta \varepsilon \kappa \nu \varepsilon \kappa \rho \omega v$ ). Already the conversion of Jews had become so difficult. It is like a miracle of grace today, though it does happen. Many think that Paul means that the general resurrection and the end will come when the Jews are converted. Possibly so, but it is by no means certain. His language may be merely figurative.

Rom 11:16
First fruit ( $\alpha \pi \alpha \rho \chi \eta$ ). See on 1Co 15:20,23. The metaphor is from Nu 15:19f. The LXX has $\alpha \pi \alpha \rho \chi \eta \nu \varphi v \rho \alpha \mu \alpha \tau о \varsigma$, first of the dough as a heave offering.

The lump ( $\tau о \varphi \cup \rho \alpha \mu \alpha$ ). From which the first fruit came. See on 9:21. Apparently the patriarchs are the first fruit.

The root ( $\eta \rho \zeta \zeta \alpha$ ). Perhaps Abraham singly here. The metaphor is changed, but the idea is the same. Israel is looked on as a tree. But one must recall and keep in mind the double sense of Israel in 9:6f. (the natural and the spiritual).

Rom 11:17
Branches ( $\kappa \lambda \alpha \delta \omega v$ ). From $\kappa \lambda \alpha \omega$, to break.
Were broken off ( $\varepsilon \xi \varepsilon \kappa \lambda \alpha \sigma \theta \eta \sigma \alpha v)$. First aorist passive indicative of $\varepsilon \kappa \kappa \lambda \alpha \omega$. Play on the word $\kappa \lambda \alpha \delta$ oc (branch) and $\varepsilon \kappa \kappa \lambda \alpha \omega$, to break off. Condition of first class, assumed as true. Some of the individual Jews (natural Israel) were broken off the stock of the tree (spiritual Israel).

And thou ( $\kappa \alpha \sigma v$ ). An individual Gentile.

Being a wild olive ( $\alpha \gamma \rho \iota \lambda \alpha \iota \varsigma \omega v$ ). This word, used by Aristotle, occurs in an inscription. Ramsay (Pauline Studies, pp. 219ff.) shows that the ancients used the wild-olive graft upon an old olive tree to reinvigorate the tree precisely as Paul uses the figure here and that both the olive tree and the graft were influenced by each other, though the wild olive graft did not produce as good olives as the original stock. But it should be noted that in verse 24 Paul expressly states that the grafting of Gentiles on to the stock of the spiritual Israel was "contrary to nature" ( $\pi \alpha \rho \alpha$ $\varphi v \sigma \iota \nu$ ).

Wast grafted in ( $\varepsilon \nu \varepsilon \kappa \varepsilon \nu \tau \rho \iota \sigma \theta \eta \varsigma)$. First aorist passive indicative of $\varepsilon \nu \kappa \varepsilon \nu \tau \rho \iota \zeta \omega$, to cut in, to graft, used by Aristotle. Belongs "to the higher Koine" (literary Koine) according to Milligan.

Partaker ( $\sigma \cup v \kappa о \iota \omega \nu \circ \varsigma)$. Co-partner.
Fatness ( $\pi \iota \circ \tau \eta \tau \varsigma)$. Old word from $\pi \iota \omega \nu$ (fat), only here in N.T. Note three genitives here "of the root of the fatness of the olive."

Rom 11:18
Glory not over the branches ( $\mu \eta \kappa \alpha \tau \alpha \kappa \alpha \nu \chi \omega \tau \omega \nu \kappa \lambda \alpha \delta \omega \nu$ ). Genitive case after $\kappa \alpha \tau \alpha$. Present middle imperative second person singular of катак $\alpha \cup \chi \alpha$ о $\alpha$ with negative $\mu \eta$, "stop glorying" or "do not have the habit of glorying over the branches." The conclusion of the preceding condition.

Gloriest ( $\kappa \alpha \tau \alpha \kappa \alpha \cup \chi \alpha \sigma \alpha$ ). Late form - $\alpha \varepsilon \sigma \alpha$ retaining $\varsigma$.
Not thou (ov $\sigma v$ ). Very emphatic position. The graft was upon the stock and root, though each affected the other.

Rom 11:19
Thou wilt say then ( $\varepsilon \rho \varepsilon \iota \varsigma o v v$ ). A presumptuous Gentile speaks.
That I might be grafted in ( $\imath \alpha \alpha \varepsilon \omega \omega \varepsilon \kappa \varepsilon \nu \tau \rho \iota \sigma \theta \omega$ ). Purpose clause with $\imath v \alpha$ and first aorist passive subjunctive. He shows contempt for the cast-off Jews.

Rom 11:20
Well ( $\kappa \alpha \lambda \omega \varsigma)$. Perhaps ironical, though Paul may simply admit the statement (cf. Mr 12:32 ) and show the Gentile his real situation.

By unbelief ( $\tau \eta \alpha \pi \iota \sigma \tau \iota \alpha$ )
--by faith ( $\pi / \sigma \tau \varepsilon$ ). Instrumental case with both contrasted words (by unbelief, by belief).

## Rom 11:21

Be not highminded ( $\mu \eta \nu \psi \eta \lambda \alpha \varphi \rho o v \varepsilon$ ). "Stop thinking high (proud) thoughts."
Of God spared not ( $\varepsilon \gamma \alpha \rho$ о $\theta \varepsilon o \varsigma ~ o v \kappa ~ \varepsilon \varphi \varepsilon ו \sigma \alpha \tau o)$. It is not $\varepsilon \mu \eta$ (unless), but the ovк negatives the verb $\varepsilon \varphi \varepsilon \iota \sigma \alpha \tau$ (first aorist middle indicative of $\varphi \varepsilon \iota \delta o \mu \alpha$, to spare. Condition of first class.

## Rom 11:22

The goodness and the severity of God ( $\chi \rho \eta \sigma \tau о \tau \eta \tau \alpha \kappa \alpha \alpha \pi о \tau о \mu \iota \alpha v \varepsilon \sigma v$ ). See on Ro 2:2 for $\chi \rho \eta \sigma \tau о \tau \eta \varsigma$, kindness of God. Алото $\mu \alpha$ (here alone in the N.T.) is from $\alpha \pi о \tau о \mu \circ \varsigma$,
cut off, abrupt, and this adjective from $\alpha \pi \sigma \tau \varepsilon \mu v \omega$, to cut off. This late word occurs several times in the papyri.

If thou continue ( $\varepsilon \alpha v \varepsilon \pi \mu \mu \varepsilon \eta \eta)$. Third class condition, $\varepsilon a v$ and present active subjunctive.

Otherwise ( $\varepsilon \pi \varepsilon$ ). Ellipse after $\varepsilon \pi \varepsilon$, "since if thou dost not continue."
Thou also ( $\kappa \alpha \sigma v$ ). Precisely as the Jewish branches of verse 17 were.
Shalt be cut off ( $\varepsilon к к о \pi \eta \sigma \eta)$. Second future passive of $\varepsilon \kappa \kappa о \pi \tau \omega$, to cut out.
Rom 11:23
If they continue not in their unbelief ( $\varepsilon \alpha v \mu \eta \varepsilon \pi \mu \mu \varepsilon v \omega \sigma \tau \eta \alpha \pi \iota \sigma \tau \iota \alpha)$. Third class condition with the same verb used in verse 22 of the Gentile. Locative case of $\alpha \pi \iota \sigma \tau \iota \alpha$ here (same form as the instrumental in verse 20).
 than $\delta v v a \tau \alpha$. This is the $\chi \rho v \xi$ of the whole matter. God is able.

## Rom 11:24

Contrary to nature ( $\pi \alpha \rho \alpha \varphi v \sigma i v$ ). This is the gist of the argument, the power of God to do what is contrary to natural processes. He put the wild olive (Gentile) into the good olive tree (the spiritual Israel) and made the wild olive (contrary to nature) become the good olive ( $\kappa \alpha \lambda \lambda \iota \varepsilon \lambda \alpha \iota \varrho$, the garden olive, $\kappa \alpha \lambda \lambda \circ \varsigma$ and $\varepsilon \lambda \alpha \iota \alpha$ in Aristotle and a papyrus).

Into their own olive tree ( $\tau \eta\llcorner\delta \iota \alpha \varepsilon \lambda \alpha \iota \alpha$ ). Dative case. Another argument a fortiori, "how much more" ( $\pi \mathrm{o} \lambda \lambda \omega \mu \alpha \lambda \lambda \mathrm{ov}$ ). God can graft the natural Israel back upon the spiritual Israel, if they become willing.

Rom 11:25
This mystery ( $\tau \boldsymbol{\mu \nu \sigma \tau \tau \eta \rho เ o v ~ \tau о и \tau о ) . ~ N o t ~ i n ~ t h e ~ p a g a n ~ s e n s e ~ o f ~ a n ~ e s o t e r i c ~ d o c t r i n e ~ f o r ~}$ the initiated (from $\mu \nu \varepsilon \omega$, to blink, to wink), unknown secrets (2Th 2:7), or like the mystery religions of the time, but the revealed will of God now made known to all (1Co 2:1,7; 4:1) which includes Gentiles also (Ro 16:25; Col 1:26f.; Eph 3:3f.) and so far superior to man's wisdom (Col 2:2; 4:13; Eph 3:9; 5:32; 6:19; Mt 13:11; Mr 4:11). Paul has covered every point of difficulty concerning the failure of the Jews to accept Jesus as the Messiah and has shown how God has overruled it for the blessing of the Gentiles with a ray of hope still held out for the Jews. "In early ecclesiastical Latin $\mu \nu \sigma \tau \eta \rho \iota o v$ was rendered by sacramentum, which in classical Latin means the military oath. The explanation of the word sacrament, which is so often founded on this etymology, is therefore mistaken, since the meaning of sacrament belongs to $\mu v \sigma \tau \eta \rho o v$ and not to sacramentum in the classical sense" (Vincent).

Wise in your own conceits ( $\varepsilon$ ع عavtoıc $\varphi \rho о \nu \mu \circ$ ). "Wise in yourselves." Some MSS. read $\pi \alpha \rho$ ' عavtoıc (by yourselves). Negative purpose here ( $v \alpha \mu \eta \eta \tau \varepsilon$ ), to prevent self-conceit on the part of the Gentiles who have believed. They had no merit in themselves

A hardening ( $\pi \omega \rho \omega \sigma \iota)$. Late word from $\pi \omega \rho o \omega$ ( 11:7). Occurs in Hippocrates as a medical term, only here in N.T. save Mr 3:5; Eph 4:18 . It means obtuseness of intellectual discernment, mental dulness.

In part ( $\alpha \pi \sigma \mu \varepsilon \rho o u c)$. Goes with the verb $\gamma \varepsilon \gamma o v \varepsilon v$ (has happened in part). For $\alpha \pi o$ $\mu \varepsilon \rho о и \varsigma$, see 2Co 1:14; 2:5; Ro 15:24; for ava $\mu \varepsilon \rho о \varsigma$, see 1Co 14:27 ; for $\varepsilon \kappa ~ \mu \varepsilon \rho о и \varsigma, ~ s e e ~ 1 C o ~$ 12:27; 13:9 ; for ката $\mu \varepsilon \rho о \varsigma$, see Heb 9:5 ; for $\mu \varepsilon \rho о \varsigma \tau$ (adverbial accusative) partly see 1Co 11:18. Paul refuses to believe that no more Jews will be saved.

Until the fulness of the Gentiles be come in ( $\alpha \chi \rho$ ov $\tau 0 \pi \lambda \eta \rho \omega \mu \alpha \tau \omega v \varepsilon \theta v \omega v \varepsilon ા \sigma \varepsilon \lambda \theta \eta$ ). Temporal clause with $\alpha \chi \rho$ ov (until which time) and the second aorist active subjunctive of عוбєрХона, to come in (Mt 7:13,21).

For fulness of the Gentiles ( $\tau 0 \pi \lambda \eta \rho \omega \mu \alpha \tau \omega v \varepsilon \theta v \omega v$ ) see on verse 12 , the complement of the Gentiles.

Rom 11:26
And so ( $\kappa \alpha$ ov $\tau \omega \varsigma$ ). By the complement of the Gentiles stirring up the complement of the Jews (verses 11f. ).

All Israel ( $\pi \alpha \varsigma I \sigma \rho \alpha \eta \lambda$ ). What does Paul mean? The immediate context (use of $\pi \alpha \varsigma$ in contrast with $\alpha \pi 0 \mu \varepsilon \rho o v \sigma, \pi \lambda \eta \rho \omega \mu \alpha$ here in contrast with $\pi \lambda \eta \rho \omega \mu \alpha$ in verse 12) argues for the Jewish people "as a whole." But the spiritual Israel (both Jews and Gentiles) may be his idea in accord with 9:6 ( Ga 6:16) as the climax of the argument. At any rate we should strive for and pray for the conversion of Jews as a whole. Paul here quotes from Isa 59:20f.; 27:9 .

The Deliverer ( $o \rho v o \mu \varepsilon v o \varsigma)$. Present middle articular participle of $\rho v o \mu \alpha$, to rescue, to deliver. See on 1Th 1:10; 2Co 1:10. The Hebrew Goel, the Avenger, the Messiah, the Redeemer (De 25:5-10; Job 19:25; Ru 3:12f. ). Paul interprets it of Jesus as Messiah.

Rom 11:27
My covenant ( $\left.\eta \pi \alpha \rho^{\prime} \varepsilon \mu \circ v \delta i \alpha \theta \eta \kappa \eta\right)$ ). "The from me covenant," "my side of the covenant I have made with them" (Sanday and Headlam). Cf. Jer 31:31f. . Not a political deliverance, but a religious and ethical one.

When I shall take away ( $\quad \tau \alpha \nu \alpha \varphi \varepsilon \lambda \omega \mu \alpha$ ). Second aorist middle subjunctive of $\alpha \varphi \alpha \rho \varepsilon \omega$, old and common verb, to take away.

Rom 11:28
As touching the gospel (ката тo $\varepsilon \cup \alpha \gamma \gamma \varepsilon \lambda \iota \nu)$ ). "According to (ката with the accusative) the gospel" as Paul has shown in verses 11-24, the gospel order as it has developed.

Enemies ( $\varepsilon \chi \theta \rho o$ ). Treated as enemies (of God), in passive sense, because of their rejection of Christ (verse 10), just as $\alpha \gamma \alpha \pi \eta \tau o$ (beloved) is passive.

As touching the election ( $\kappa \alpha \tau \alpha \tau \eta v \varepsilon \kappa \lambda о \gamma \eta v$ ). "According to the election" (the principle of election, not as in verses 5 f. the elect or abstract for concrete).

For the fathers' sake ( $\delta \iota \alpha$ тouৎ $\pi \alpha \tau \varepsilon \rho \alpha \varsigma)$. As in 9:4; 11:16f .
Rom 11:29

Without repentance $(\alpha \mu \varepsilon \tau \alpha \mu \varepsilon \lambda \eta \tau \alpha)$. See on 2Co 7:10 for this word ( $\alpha$ privative and $\mu \varepsilon \tau \alpha \mu \varepsilon \lambda о \mu \alpha$, to be sorry afterwards). It is not $\alpha \mu \varepsilon \tau \alpha v o \eta \tau o v(R o 2: 5)$ from $\alpha$ privative and $\mu \varepsilon \tau \alpha v o \varepsilon \omega$, to change one's mind. God is not sorry for his gifts to and calling of the Jews (9:4f. ).

Rom 11:30
Ye in time past ( $\nu \mu \varepsilon ı \varsigma ~ \pi о \tau \varepsilon) . ~ Y e ~ G e n t i l e s ~(~ 1: 18-32) . ~ . ~$
Were disobedient ( $\varepsilon \pi \varepsilon \mid \theta \eta \sigma \alpha \tau \varepsilon$ ). First aorist active indicative of $\alpha \pi \varepsilon \vDash \varepsilon \varepsilon \omega$, to disbelieve and then to disobey. "Ye once upon a time disobeyed God."

By their disobedience ( $\tau \eta \tau 0 \cup \tau \omega \nu \alpha \pi \varepsilon 1 \theta \iota \alpha$ ). Instrumental case, "by the disobedience of these" (Jews). Note "now" ( $v \mathrm{v} v$ ) three times in this sentence.

Rom 11:31
By the mercy shown to you ( $\tau \omega v \mu \varepsilon \tau \varepsilon \rho \omega \varepsilon \lambda \varepsilon \varepsilon$ ). Objective sense of $v \mu \varepsilon \tau \varepsilon \rho \circ \varsigma$ (possessive pronoun, your). Proleptic position also for the words go with $\varepsilon \lambda \varepsilon \eta \theta \omega \sigma \varpi v$ (first aorist passive subjunctive of $\varepsilon \lambda \varepsilon \varepsilon \omega$, from $\varepsilon \lambda \varepsilon \sigma \varsigma$ with $\operatorname{vva}$, purpose clause). God's purpose is for the Jews to receive a blessing yet.

Rom 11:32
Hath shut up ( $\sigma u v \varepsilon \kappa \lambda \varepsilon เ \sigma \varepsilon v$ ). First aorist active indicative of $\sigma u v \kappa \lambda \varepsilon เ \omega$, to shut together like a net (Lu 5:6). See Ga 3:22 for this word with vтo $\alpha \mu \alpha \rho \tau \iota \alpha v$ (under sin). This is a resultant (effective) aorist because of the disbelief and disobedience of both Gentile ( $1: 17-32$ ) and Jew ( 2:1-3:20).

All ( $\tau$ оия $\pi \alpha \nu \tau \alpha \varsigma) . ~ " T h e ~ a l l " ~(b o t h ~ G e n t i l e s ~ a n d ~ J e w s) . ~$
That he might have mercy (ıva--غ $\varepsilon \varepsilon \eta \sigma \eta$ ). Purpose with $\stackrel{v \alpha}{ }$ and aorist active subjunctive. No merit in anyone, but all of grace. "The all" again, who receive God's mercy, not that "all" men are saved.

Rom 11:33
O the depth ( $\mathrm{O} \beta \alpha \theta \mathrm{o})$ ). Exclamation with omega and the nominative case of $\beta \alpha \theta$ os (see on 2Co 8:2; Ro 8:39). Paul's argument concerning God's elective grace and goodness has carried him to the heights and now he pauses on the edge of the precipice as he contemplates God's wisdom and knowledge, fully conscious of his inability to sound the bottom with the plummet of human reason and words.

Unsearchable ( $\alpha v \varepsilon \xi \varepsilon \rho a u v \eta \tau \alpha$ ). Double compound ( $\alpha$ privative and $\varepsilon \xi$ ) verbal adjective of $\varepsilon \rho \varepsilon v v a \omega$ (old spelling $-\varepsilon v-$ ), late and rare word (LXX, Dio Cassius, Heraclitus), only here in N.T. Some of God's wisdom can be known (1:20f. ), but not all.

Past tracing out ( $\alpha \vee \varepsilon \xi \chi \chi \nu I \alpha \sigma \tau 0)$. Another verbal adjective from $\alpha$ privative and $\varepsilon \xi \not \chi v ı \alpha \zeta \omega$, to trace out by tracks (ixvoc Ro 4:12). Late word in Job (Job 5:9; 9:10; 34:24) from which use Paul obtained it here and Eph 3:8 (only N.T. examples). Also in ecclesiastical writers. Some of God's tracks he has left plain to us, but others are beyond us.

Rom 11:34

Who hath known? ( $\tau \iota \varsigma \varepsilon \gamma \nu \omega$ ?). Second aorist active indicative of $\gamma \iota \nu \omega \sigma \kappa \omega$, a timeless aorist, did know, does know, will know. Quotation from Isa 40:13. Quoted already in 1Co 2:16.

Counsellor ( $\sigma v \mu \beta o v \lambda o \varsigma)$. Old word from $\sigma v \nu$ and $\beta o v \lambda \eta$. Only here in N.T.
His (avtov). Objective genitive, counsellor to him (God). Some men seem to feel competent for the job.

Rom 11:35
First driven to him $(\pi \rho o \varepsilon \delta \omega \kappa \varepsilon \nu \alpha \nu \tau \omega)$. First aorist active indicative of $\pi \rho o \delta t \delta \omega \mu$, to give beforehand or first. Old verb, here alone in N.T. From Job 41:11, but not like the LXX, Paul's own translation.

Shall be recompensed ( $\alpha v \tau \alpha \pi o \delta o \theta \eta \sigma \varepsilon \tau \alpha$ ). First future passive of double compound $\alpha v \tau \alpha \pi o \delta i \delta \omega \mu$, to pay back (both $\alpha v \tau$ and $\alpha \pi 0$ ), old word in good sense, as here and Lu 14:14; 1Th 3:9 and in bad sense as 2Th 1:6; Ro 12:19.

Rom 11:36
Of him ( $\varepsilon \xi \alpha \cup \tau 0 v$ ),
through him ( $\delta \iota^{\prime} \alpha v \tau o v$ ),
unto him ( $\varepsilon \iota \varsigma \alpha \cup \tau o v)$. By these three prepositions Paul ascribes the universe ( $\tau \alpha \pi \alpha \nu \tau \alpha$ ) with all the phenomena concerning creation, redemption, providence to God as the

Source ( $\varepsilon \xi$ ), the
Agent ( $\delta$ ), the
Goal ( $\varepsilon$ (ऽ).
For ever ( $\varepsilon \iota \varsigma ~ \tau o u \varsigma ~ a ı \omega v a \varsigma) . ~ " F o r ~ t h e ~ a g e s . " ~ A l f o r d ~ t e r m s ~ t h i s ~ d o x o l o g y ~ i n ~ v e r s e s ~ 33-36 ~$ "the sublimest apostrophe existing even in the pages of inspiration itself."

## Romans 12

Rom 12:1
Therefore (ovv). This inferential participle gathers up all the great argument of chapters $1-11$. Now Paul turns to exhortation ( $\pi \alpha \rho \alpha \kappa \alpha \lambda \omega)$, "I beseech you."

By the mercies ( $\delta \iota \alpha \tau \omega \nu$ oıк $\tau \iota \rho \mu \omega \nu$ ). "By means of the mercies of God" as shown in his argument and in our lives. See 2Co 1:3 for "the Father of mercies."

To present ( $\pi \alpha \rho \alpha \sigma \tau \eta \sigma \alpha$ ). First aorist active infinitive of $\pi \alpha \rho \iota \sigma \tau \eta \mu$, for which verb see 6:13, a technical term for offering a sacrifice (Josephus, Ant. IV. 6, 4), though not in the O.T. Used of presenting the child Jesus in the temple ( $\mathrm{Lu} 2: 22$ ), of the Christian presenting himself (Ro 6:13 ), of God presenting the saved (Eph 5:27), of Christ presenting the church (Col 1:28).

Bodies ( $\sigma \omega \mu \alpha \tau \alpha$ ). So literally as in $6: 13,19 ; 2$ Co $5: 10$ and in contrast with vous (mind) in verse 2.

A living sacrifice $(\theta v \sigma \iota \alpha v \zeta \omega \sigma \alpha v)$. In contrast with the Levitical sacrifices of slain animals. Cf. 6:8,11,13 . Not a propitiatory sacrifice, but one of praise.

Which is your reasonable service ( $\tau \eta v \lambda o \gamma \iota \kappa \eta v \nu \mu \omega v \lambda a \tau \rho \varepsilon \iota \alpha v$ ). "Your rational (spiritual) service (worship)." For $\lambda \alpha \tau \rho \varepsilon \iota \alpha$, see on 9:4. $\Lambda о ү \iota \kappa \varsigma$ is from $\lambda о \gamma \circ \varsigma$, reason. The phrase means here "worship rendered by the reason (or soul)." Old word, in N.T. only here and 1Pe 2:2 то $\lambda$ о $\gamma$ 七коv $\gamma \alpha \lambda \alpha$ (not logical milk, but the milk nourishing the soul).

Rom 12:2
Be not fashioned ( $\mu \eta \sigma v v \sigma \chi \eta \mu \alpha \tau \iota \zeta \varepsilon \sigma \theta \varepsilon$ ). Present passive imperative with $\mu \eta$, stop being fashioned or do not have the habit of being fashioned. Late Greek verb $\sigma v \sigma \chi \eta \mu \alpha \tau \iota \zeta \omega$, to conform to another's pattern (1Co 7:31; Php 2:7f. ). In N.T. only here and 1Pe 1:14.

According to this world ( $\tau \omega \alpha \iota \omega \nu \tau 0 v \tau \omega)$. Associative instrumental case. Do not take this age as your fashion plate.

Be ye transformed ( $\mu \varepsilon \tau \alpha \mu о \rho \varphi о v \sigma \theta \varepsilon$ ). Present passive imperative of $\mu \varepsilon \tau \alpha \mu о \rho \varphi о \omega$, another late verb, to transfigure as in Mt 17:2 (Mr 9:2); 2Co 3:18, which see. On the distinction between $\sigma \chi \eta \mu \alpha$ and $\mu о \rho \varphi \eta$, see Php 2:7. There must be a radical change in the inner man for one to live rightly in this evil age, "by the renewing of your mind" ( $\tau \eta$ avaкaıv $\omega \sigma \varepsilon$ tov $v o o \varsigma)$. Instrumental case. The new birth, the new mind, the new (кaıvoc) man.

That ye may prove ( $\varepsilon ı \varsigma ~ \tau о ~ \delta о к ц \alpha \zeta \varepsilon ı v) . ~ I n f i n i t i v e ~ o f ~ p u r p o s e ~ w i t h ~ \varepsilon ı \varsigma ~ \tau o, ~ " t o ~ t e s t " ~ w h a t ~$ is God's will, "the good and acceptable and perfect" ( $\tau о \alpha \gamma \alpha \theta о \nu ~ \kappa \alpha ~ \varepsilon v a \rho \varepsilon \sigma \tau о \nu ~ к \alpha ~ \tau \varepsilon \lambda \varepsilon ı o v) . ~$

Rom 12:3
Not to think of himself more highly than he ought to think ( $\mu \eta v \pi \varepsilon \rho \varphi \rho о \nu \varepsilon \iota \tau \pi \rho^{\prime}$ o $\delta \varepsilon \varphi \rho o v \varepsilon \iota v$ ). Indirect negative command after $\lambda \varepsilon \gamma \omega$ (I say). Play on the two infinitives $\varphi \rho o v \varepsilon \iota v$, to think, and $v \pi \varepsilon \rho \varphi \rho o v \varepsilon \iota \nu$ (old verb from $v \pi \varepsilon \rho \varphi \rho \omega \nu$, over-proud, here only in

N．T．）to＂over－think＂with $\pi \alpha \rho^{\prime}$ o（beyond what）added．Then another play on $\varphi \rho o v \varepsilon ı v$ and $\sigma \omega \varphi \rho o v \varepsilon \iota v$（old verb from $\sigma \omega \varphi \rho \omega v$ ，sober－minded），to be in one＇s right mind（ $\mathrm{Mr} 5: 15$ ；2Co 5：13 ）．Self－conceit is here treated as a species of insanity．

A measure of faith（ $\mu \varepsilon \tau \rho \circ v \pi / \sigma \tau \varepsilon \omega \varsigma)$ ．Accusative case，the object of the verb $\varepsilon \mu \varepsilon \rho \iota \sigma \varepsilon v$ ． Each has his gift from God（ 1 Co $3: 5 ; 4: 7$ ）．There is no occasion for undue pride．

To each man（ $\varepsilon \kappa \alpha \sigma \tau \omega)$ ．Emphatic position before $\omega \varsigma$（as）and emphasizes the diversity． Rom 12：4
The same office（ $\tau \eta \vee \alpha \cup \tau \eta \nu \pi \rho \alpha \xi ı v$ ）．Mode of acting or function．Cf．Ac 19：18；Ro 8：13

Rom 12：5
And severally（ $\tau$ o $\left.\delta \varepsilon \kappa \alpha \theta^{\prime} \varepsilon ı \varsigma\right)$ ．A difficult late idiom where the preposition $\kappa \alpha \theta^{\prime}$（ $\kappa \alpha \tau \alpha$ ） is treated adverbially with no effect on the nominative case $\varepsilon \iota \varsigma$ like $v \pi \varepsilon \rho \varepsilon \gamma \omega$（2Co 11：23）．
 have $\kappa \alpha \theta^{\prime} \varepsilon v \alpha$ in 1Co 14：31．The use of the neuter article here to with $\kappa \alpha \theta^{\prime} \varepsilon ı \varsigma$ is probably the accusative of general reference，＂as to each one．＂

Rom 12：6
Differing（ $\delta ı \alpha \varphi \rho \rho \alpha$ ）．Old adjective from $\delta \iota \alpha \varphi \varepsilon \rho \omega$ ，to differ，to vary．So Heb 9：10．
According to the proportion of our faith（ $\kappa \alpha \tau \alpha \tau \eta \nu \alpha v a \lambda о \gamma \iota \nu \tau \eta \varsigma \pi \iota \sigma \tau \varepsilon \omega \varsigma)$ ．The same use of mıotıc（faith）as in verse 3 ＂the measure of faith．＂Old word．ava $\lambda$ opıa（our word ＂analogy＂）from ava入oүoc（analogous，conformable，proportional）．Here alone in N．T．The verb $\pi \rho о \varphi \eta \tau \varepsilon v \omega \mu \varepsilon v$（present active volitive subjunctive，let us prophesy）must be supplied with which eरovteऽ agrees．The context calls for the subjective meaning of＂faith＂rather than the objective and outward standard though mıotıc does occur in that sense（Ga 1：23； 3：23）．

Rom 12：7
Let us give ourselves．There is no verb in the Greek．We must supply $\delta \hat{A} \omega \mu \varepsilon v$ عavtous or some such phrase．

Or he that teacheth（ $\varepsilon \iota \tau \varepsilon$ o $\delta \iota \delta \alpha \sigma \kappa \omega v$ ）．Here the construction changes and no longer do we have the accusative case like $\delta \iota \alpha \kappa 0 v ı \alpha v$（general word for Christian service of all kinds including ministers and deacons）as the object of exovte¢，but the nominative articular participle．A new verb must be supplied of which o $\delta \iota \delta a \sigma \kappa \omega v$ is the subject as with the suc－ ceeding participles through verse 8．Perhaps in each instance the verb is to be repeated from the participle like $\delta \iota \delta a \sigma \kappa \varepsilon \tau \omega$ here（let him teach）or a general term $\pi ⿱ ⺌ 兀 \varepsilon \iota \tau \omega$（let him do it） can be used for all of them as seems necessary before＂with liberality＂in verse 8 （ $\varepsilon v \alpha \pi \lambda o \tau \eta \tau$ ， in simplicity，for which word，see Mt 6：22；2Co 8：2；9：11，13）．

He that ruleth（o $\left.\pi \rho o เ \sigma \tau \alpha \mu \varepsilon v_{0} \varsigma\right)$ ．＂The one standing in front＂for which see 1Th 5：12．
With diligence（ $\varepsilon v \sigma \pi \sigma \cup \delta \eta$ ）．＂In haste＂as if in earnest（Mr 6：25；2Co 7：11f．，8：8，16）， from $\sigma \pi \varepsilon v \delta \omega$ ，to hasten．Again verse 11.

With cheerfulness ( $\varepsilon v \iota \lambda \alpha \rho o \tau \eta \tau$ ). Late word, only here in N.T., from $\lambda \lambda \alpha \rho o \varsigma(2 C o$ 9:7 ) cheerful, hilarious.

Rom 12:9
Without hypocrisy ( $\alpha v v \pi о \kappa \rho ı \tau о \varsigma)$. Late double compound adjective for which see 2Co 6:6. Hypocritical or pretended love is no love at all as Paul describes $\alpha \gamma \alpha \pi \eta$ in 1Co 13.

Abhor ( $\alpha \pi \sigma \sigma \tau \cup \gamma 0 v \nu \tau \varepsilon \varsigma$ ). Old verb with intensive ( $\alpha \pi 0$ ) dislike, only here in N.T. The present active participle is here employed in the sense of the present active indicative as sometimes happens with the independent participle (Robertson, Grammar, pp. 1132ff.). This same idiom appears with кo $\lambda \lambda \omega \mu \varepsilon v o$ (cleaving) for which verb see on 1 Co $6: 17$, with $\pi \rho o \eta \gamma o v \mu \varepsilon v_{o}$ (preferring) in verse 10 (old verb here only in N.T.), and with the participles in verses 11-13 and again in verses 16-18. One can supply $\varepsilon \sigma \tau \varepsilon$ if he prefers.

Rom 12:10
In love of the brethren $(\tau \eta \varphi t \lambda \alpha \delta \varepsilon \lambda \varphi / \alpha)$. Late word for brotherly love for which see 1Th 4:9.

Tenderly affectioned ( $\varphi \lambda \lambda о \sigma \tau o \rho \gamma o$ ). Old compound adjective from $\varphi i \lambda o \varsigma$ and $\sigma \tau \sigma \rho \gamma \eta$ (mutual love of parents and children), here alone in N.T.

Rom 12:11
Slothful (oкvๆро). Old adjective from oкve $\omega$, to hesitate, to be slow. Slow and "poky" as in Mt 25:26 .

Rom 12:12
Patient in tribulation ( $\tau \eta \theta \lambda \iota \psi \varepsilon v \pi \sigma \mu \varepsilon v o v \tau \varepsilon \varsigma)$. So soon this virtue became a mark of the Christians.

Rom 12:13
 9:13. Paul had raised a great collection for the poor saints in Jerusalem.

Given to hospitality ( $\tau \eta \nu \varphi \iota \lambda o \xi \varepsilon v \iota \alpha \nu \delta \iota \omega \kappa o v \tau \varepsilon \varsigma)$. "Pursuing (as if in a chase or hunt) hospitality" ( $\varphi \iota \lambda \circ \xi \varepsilon \nu \iota \alpha$, old word from $\varphi \iota \lambda o \xi \varepsilon \nu \circ \varsigma$, fond of strangers, $\varphi \iota \lambda \circ \varsigma$ and $\xi \varepsilon \nu \circ \varsigma$ as in 1Ti 3:2 ). In N.T. only here and Heb 13:2. See 2Co 3:1. They were to pursue ( $\delta t \omega \kappa \omega$ ) hospitality as their enemies pursued ( $\delta \iota \omega \kappa 0 v \tau \alpha \varsigma)$ them.

Rom 12:14
And curse not ( $\kappa \alpha \mu \eta \kappa \alpha \tau \alpha \rho \alpha \sigma \theta \varepsilon$ ). Present middle imperative with $\mu \eta$. Like Mt 5:44 in spirit, not a quotation, but a reminiscence of the words of Jesus. The negative addition gives emphasis. See Lu 6:28 for the old verb кат $\alpha \rho \alpha о \mu \alpha$ from кат $\alpha \rho \alpha$ (curse).

## Rom 12:15

Rejoice ( $\chi \alpha \iota \rho \varepsilon \iota v$ ). Present active infinitive of $\chi \alpha \iota \rho \omega$, absolute or independent use of the infinitive as if a finite verb as occurs sometimes (Robertson, Grammar, pp. 1092ff.). Literally here, "Rejoicing with rejoicing people, weeping with weeping people."

Rom 12:16

Be of the same mind ( $\tau о \alpha v \tau о ~ \varphi \rho о v o v \nu \tau \varepsilon \varsigma)$. Absolute or independent use of the participle again as with all the participles through verse 18 , "thinking the same thing."

Set not your mind on high things ( $\mu \eta \tau \alpha \nu \psi \eta \lambda \alpha \varphi \rho \circ v o v \nu \tau \varepsilon \varsigma)$. "Not thinking the high

 with (borne along with) the lowly things" (in contrast with $\tau \alpha v \psi \eta \lambda \alpha$, though the associative instrumental case may be masculine, "with lowly men." See Ga 2:13; 2Pe 3:17 for the only other N.T. examples of this old verb.

Be not wise ( $\mu \eta \gamma \iota \nu \varepsilon \sigma \theta \varepsilon \varphi \rho o v \iota \mu$ ). "Do not have the habit of becoming ( $\gamma \iota v \varepsilon \sigma \theta \varepsilon$ ) wise in your own conceits" ( $\pi \alpha \rho^{\prime} \varepsilon \alpha v \tau o \iota$, beside yourselves). Note the imperative in the midst of infinitives and participles.

Rom 12:17
Render to no man ( $\mu \eta \delta \varepsilon \nu \alpha \pi o \delta i \delta o v \tau \varepsilon \varsigma)$. "Giving back to no man." Independent participle again.

Evil for evil (какоv $\alpha \nu \tau$ какои). Directly opposite to the law of retaliation of the Pharisees as in Mt 5:39; 1Th 5:15; 1Co 13:5f .

Take thought of ( $\pi \rho \frac{v o o v \mu \varepsilon v o) . ~ " T a k i n g ~ t h o u g h t ~ b e f o r e h a n d . " ~ O l d ~ w o r d . ~ S e e ~ 2 C o ~}{\text { Con }}$ 8:21.

Rom 12:18
As much as in you lieth ( $\tau 0 \varepsilon \xi v \mu \omega v$ ). Accusative of general reference, "so far as what proceeds from you" ("the from you part"). See то $\kappa \alpha \tau^{\prime} \varepsilon \mu \varepsilon$ in $1: 15$. This phrase explains "if it be possible" ( $\varepsilon \delta v v a \tau o v) . ~ " A l l ~ y o u r ~ p a r t ~ i s ~ t o ~ b e ~ p e a c e " ~(A l f o r d) . ~ F o r ~ " b e ~ a t ~ p e a c e " ~$ ( $\varepsilon \iota \rho \nu \varepsilon v o \nu \tau \varepsilon \varsigma)$ see 2Co 13:11.

Rom 12:19
Avenge not ( $\mu \eta \varepsilon \kappa \delta \iota \kappa 0 \nu \nu \tau \varepsilon \varsigma$ ). Independent participle again of late verb $\varepsilon \kappa \delta \iota \kappa \varepsilon \omega$ from $\varepsilon \kappa \delta \iota \kappa$ оऽ, exacting justice ( 13:4). See already Lu 18:5; 2Co 10:6 .

But give place unto wrath ( $\alpha \lambda \lambda \alpha \delta о \tau \varepsilon \tau о \pi о \nu \tau \eta о \rho \gamma \eta$ ). Second aorist active imperative of $\delta t \delta \omega \mu$, to give. "Give room for the (note article as in 5:9; 1Th 2:16 ) wrath" of God instead
 (the Hebrew rather than the LXX). So have Heb 10:30 and the Targum of Onkelos, but the relation between them and Paul we cannot tell. Socrates and Epictetus condemned personal vindictiveness as Paul does here.

I will recompense $(\alpha \nu \tau \alpha \pi \sigma \delta \omega \sigma \omega)$. Future active of the double compound verb quoted also in 11:35.

Rom 12:20
Feed him ( $\psi \omega \mu \zeta \varepsilon \alpha v \tau o v$ ). Quotation from LXX text of Pr 25:21f. Present active imperative of verb from $\psi \omega \mu \circ$, a morsel, and so to feed crumbs to babies, then to feed in general. In N.T. only here and 1Co 13:3.

Thou shalt heap ( $\sigma \omega \rho \varepsilon v \sigma \varepsilon \varsigma)$ ). Future active of old verb $\sigma \omega \rho \varepsilon v \omega$ from $\sigma \omega \rho \circ \varsigma$, a heap. In N.T. only here and 2Ti 3:6.

Coals of fire ( $\alpha v \theta \rho \alpha к \alpha \varsigma \pi v \rho o \varsigma)$. That is, burning or live coals.
Anthrax (our "anthracite") is an old word, only here in N.T. It is a metaphor for keen anguish. The Arabs have a proverb "coals in the heart," "fire in the liver." Such kindness may lead to repentance also.

Rom 12:21
Be not overcome of evil ( $\mu \eta$ vıк $\omega$ v $\tau о$ тоv какоv). Present passive imperative of $v ı \kappa \alpha \omega$, to conquer. "Stop being conquered by the evil (thing or man),"

But overcome evil with good ( $\alpha \lambda \lambda \alpha$ vıка $\varepsilon v \tau \omega \alpha \gamma \alpha \theta \omega$ то какоv). "But keep on conquering the evil in the good." Drown the evil in the good. Seneca: Vincit malos pertinax bonitas.

## Romans 13

Rom 13:1
Every soul ( $\pi \alpha \sigma \alpha \psi v \chi \eta$ ). As in 2:9; Ac 2:43. A Hebraism for $\pi \alpha \varsigma \alpha v \theta \rho \omega \pi o \varsigma$ (every man).
To the higher powers ( $\varepsilon \xi$ ovбıaıৎ $v \pi \varepsilon \rho \varepsilon \chi о v \sigma \alpha ı \varsigma)$. Abstract for concrete. See Mr 2:10 for $\varepsilon \xi$ оvбıa. Hи $\frac{1}{} \rho \varepsilon \chi \omega$ is an old verb to have or hold over, to be above or supreme, as in 1 Pe 2:13.

Except by God ( $\varepsilon \mu \eta v \pi \sigma \theta \varepsilon o v$ ). So the best MSS. rather than $\alpha \pi \sigma \theta \varepsilon o v$ (from God). God is the author of order, not anarchy.

The powers that be ( $\alpha 0 \cup \sigma \alpha$ ). "The existing authorities" (supply $\varepsilon \xi$ ovoı $\alpha$ ). Art ordained ( $\tau \varepsilon \tau \alpha \gamma \mu \varepsilon v \alpha \varepsilon \iota \sigma \iota v)$. Periphrastic perfect passive indicative of $\tau \alpha \sigma \sigma \omega$, "stand ordained by God." Paul is not arguing for the divine right of kings or for any special form of government, but for government and order. Nor does he oppose here revolution for a change of government, but he does oppose all lawlessness and disorder.

Rom 13:2
He that resisteth (o $\alpha \nu \tau \iota \tau \alpha \sigma \sigma o \mu \varepsilon v o \varsigma)$. Present middle articular participle of $\alpha \nu \tau \iota \tau \alpha \sigma \sigma \omega$, old verb to range in battle against as in Ac 18:6, "he that lines himself up against."

Withstandeth ( $\alpha v \theta \varepsilon \sigma \tau \eta \kappa \varepsilon v$ ). Perfect active indicative of $\alpha \nu \theta \iota \sigma \tau \eta \mu$ and intransitive, "has taken his stand against."

The ordinance of God ( $\tau \eta \tau \operatorname{\tau ov} \theta \operatorname{cov} \delta \iota \alpha \tau \alpha \gamma \eta$ ). Late word, but common in papyri (Deissmann, Light, etc., p. 89), in N.T. only here and Ac 7:53. Note repetition of root of $\tau \alpha \sigma \sigma \omega$.

To themselves ( $\varepsilon \alpha \cup \tau о \iota \varsigma)$. Dative of disadvantage. See Mr 12:40 for "shall receive a judgment" ( $\kappa \rho \imath v \alpha \lambda \eta \mu \psi o v \tau \alpha)$. Future middle of $\lambda \alpha \mu \beta \alpha v \omega$.

Rom 13:3
A terror ( $\varphi$ о $\beta \circ \varsigma$ ). This meaning in Isa 8:13. Paul does not approve all that rulers do, but he is speaking generally of the ideal before rulers. Nero was Emperor at this time.

From the same $(\varepsilon \xi \alpha \cup \tau \eta \varsigma)$. "From it" ( $\varepsilon \xi$ ovoıa, personified in verse 4$)$.
Rom 13:4
 was God's minister "to thee ( $\sigma$ o ethical dative) for good ( $\varepsilon \iota \varsigma ~ \tau o ~ \alpha \gamma \alpha \theta o v$, for the good)." That is the ideal, the goal.

Beareth ( $\varphi \circ \rho \varepsilon$ ). Present active indicative of $\varphi \rho \rho \varepsilon \omega$, old frequentative form of $\varphi \varepsilon \rho \omega$, to bear, to wear.

But if thou do ( $\varepsilon \alpha \vee \delta \varepsilon \pi$ oıףıऽ). Condition of third class, $\varepsilon \alpha \vee$ and present active subjunctive of $\pi \sigma เ \varepsilon \omega$, "if thou continue to do."

Sword ( $\mu \alpha \chi \alpha \iota \rho \alpha v$ ). Symbol of authority as to-day policemen carry clubs or pistols. "The Emperor Trajan presented to a provincial governor on starting for his province, a dagger, with the words, 'For me. If I deserve it, in me'" (Vincent).

An avenger ( $\varepsilon \kappa \delta \iota \kappa о \varsigma)$. Old adjective from $\varepsilon \kappa$ and $\delta \iota \kappa \eta$ (right), "outside of penalty," unjust, then in later Greek "exacting penalty from one," in N.T. only here and 1Th 4:6.

Rom 13:5
Ye must needs ( $\alpha v \alpha \gamma \kappa \eta$ ). "There is necessity," both because of the law and because of conscience, because it is right (2:15; 9:1).

Rom 13:6
Ye pay ( $\tau \varepsilon \lambda \varepsilon \iota \tau \varepsilon$ ). Present active indicative (not imperative) of $\tau \varepsilon \lambda \varepsilon \omega$, to fulfil.
Tribute ( $\varphi \circ \rho \circ \vee \varsigma)$. Old word from $\varphi \varepsilon \rho \omega$, to bring, especially the annual tax on lands, etc. (Lu 20:22; 23:1). Paying taxes recognizes authority over us.

Ministers of God's service ( $\lambda \varepsilon \iota \tau o v \rho \gamma o \theta \varepsilon o v$ ). Late word for public servant (unused $\lambda \varepsilon ı \tau o \varsigma$ from Attic $\lambda \varepsilon \omega \varsigma$, people, and $\varepsilon \rho \gamma \omega$, to work). Often used of military servants, servants of the king, and temple servants (Heb 8:2 ). Paul uses it also of himself as Christ's $\lambda \varepsilon \iota \tau o v \rho \gamma o$, (Ro 15:16) and of Epaphroditus as a minister to him (Php 2:25). See $\theta \varepsilon$ ои $\delta \iota \alpha \kappa о v o \varsigma$ in verse 4.

Attending continually ( $\pi \rho о \sigma \kappa \alpha \rho \tau \varepsilon \rho о \cup v \tau \varepsilon \varsigma)$. Present active participle of the late verb $\pi \rho о \sigma \kappa \alpha \rho \tau \varepsilon \rho \varepsilon \omega$ ( $\pi \rho о \varsigma$ and ка $\rho \tau \varepsilon \rho \varepsilon \omega$ from ка $\rho \tau о \varsigma$ or кратоৎ, strength) to persevere. See on Ac 2:42; 8:13.

Rom 13:7
Dues (oчعı $\lambda \alpha \varsigma$ ). Debts, from o $о \varepsilon \iota \lambda \omega$, to owe. Often so in the papyri, though not in Greek authors. In N.T. only here, Mt 18:32; 1Co 7:3. Paying debts needs emphasis today, even for ministers.

To whom tribute is due ( $\tau \omega$ tov $\varphi o \rho o v$ ). We must supply a participle with the article $\tau \omega$ like a $\alpha \alpha \iota \tau 0 v \nu \tau$ ("to the one asking tribute"). So with the other words (to whom custom, $\tau \omega \tau$ то $\tau \varepsilon \lambda о \varsigma \alpha \pi \alpha \iota \tau o v \nu \tau$; to whom fear, $\tau \omega \tau \sigma \nu \varphi o \beta o \nu \alpha \pi \alpha \iota \tau o v \nu \tau$; to whom honour, $\tau \omega \tau \eta \nu$ $\tau \mu \eta \nu$ a $\alpha a \iota \tau 0 v \nu \tau$ ). Форос is the tribute paid to a subject nation (Lu 20:22), while $\tau \varepsilon \lambda о \varsigma$ is tax for support of civil government (Mt 17:25).

## Rom 13:8

Save to love one another ( $\varepsilon \mu \eta \tau 0 \alpha \lambda \lambda \eta \lambda o v \varsigma \alpha \gamma \alpha \pi \alpha ı)$. "Except the loving one another." This articular infinitive is in the accusative case the object of $0 \varphi \varepsilon \iota \lambda \varepsilon \tau \varepsilon$ and partitive apposition with $\mu \eta \delta \varepsilon v$ (nothing). This debt can never be paid off, but we should keep the interest paid up.

His neighbour ( $\tau 0 v \varepsilon \tau \varepsilon \rho \circ v$ ). "The other man," "the second man." "Just as in the relations of man and God $\pi \iota \sigma \tau \iota c$ has been substituted for $v o \mu \circ \varsigma$, so between man and man $\alpha \gamma a \pi \eta$ takes the place of definite legal relations" (Sanday and Headlam). See Mt 22:37-40 for the words of Jesus on this subject. Love is the only solution of our social relations and national problems.

Rom 13:9

For this ( $\tau 0 \gamma \alpha \rho$ ). For the article ( $\tau 0$ ) pointing to a sentence see $8: 26$, here to the quotation. The order of the commandments here is like that in $\mathrm{Lu} 18: 20$; Jas 2:11 and in B for De 5, but different from that of the Hebrew in Ex 20; De 5. The use of ov with the volitive future in prohibitions in place of $\mu \eta$ and the imperative or subjunctive is a regular Greek idiom.

And if there be any other ( $\kappa \alpha \varepsilon \tau \iota \varsigma \varepsilon \tau \varepsilon \rho \alpha$ ). Paul does not attempt to give them all.
It is summed up ( $\alpha v \alpha \kappa \varepsilon \varphi \alpha \lambda \alpha เ \nu \tau \tau \alpha)$. Present passive indicative of $\alpha v \alpha \kappa \varepsilon \varphi \alpha \lambda \alpha \iota \sigma$, late literary word or "rhetorical term" ( $\alpha v \alpha, \kappa \varepsilon \varphi \alpha \lambda \alpha \iota v$, head or chief as in Heb 8:1 ). Not in the papyri, but кєழа入aıov, quite common for sum or summary. In N.T. only here and Eph 1:10

Namely ( $\varepsilon \nu \tau \omega$ ). See $\tau 0 \gamma \alpha \rho$ at the beginning of the verse, though omitted by B F. The quotation is from Le 19:18. Quoted in Mt 5:43; 22:39; Mr 12:31; Lu 10:27; Ga 5:14; Jas 2:8 it is called $\beta a \sigma \iota \lambda \iota \kappa о \varsigma$ vо $\mu \circ \varsigma$ (royal law).

Thy neighbour ( $\tau 0 \nu \pi \lambda \eta \sigma \iota v \sigma o v$ ). П $\lambda \eta \sigma \iota v$ is an adverb and with the article it means "the one near thee." See on Mt 5:43.

Rom 13:10
The fulfilment of the law ( $\pi \lambda \eta \rho \omega \mu \alpha$ vo $\mu o v$ ). "The filling up or complement of the law" like $\pi \varepsilon \pi \lambda \eta \rho \omega \kappa \varepsilon \nu$ (perfect active indicative of $\pi \lambda \eta \rho o \omega$, stands filled up) in verse 8 . See 1 Co 13 for the fuller exposition of this verse.

Rom 13:11
And this (ка тоvто). Either nominative absolute or accusative of general reference, a common idiom for "and that too" (1Co 6:6,8, etc.).

Knowing ( $\varepsilon$ ( $\delta o \tau \varepsilon \varsigma)$. Second perfect active participle, nominative plural without a principal verb. Either we must supply a verb like $\pi о \imath \eta \sigma \omega \mu \varepsilon v$ (let us do it) or $\pi о \imath \eta \sigma \alpha \varepsilon$ (do ye do it) or treat it as an independent participle as in 12:10f.

The season ( $\tau 0 \vee \kappa \alpha \iota \rho \circ v$ ). The critical period, not $\chi \rho \circ \vee \circ$ (time in general).
High time ( $\omega \rho \alpha$ ). Like our the "hour" has come, etc. MSS. vary between $\eta \mu a \varsigma$ (us) and $v \mu a \varsigma$ (you), accusative of general reference with $\varepsilon \gamma \varepsilon \rho \theta \eta \nu \alpha$ (first aorist passive infinitive of $\varepsilon \gamma \varepsilon \iota \rho \omega$, to awake, to wake up), "to be waked up out of sleep" ( $\varepsilon \xi v \pi v o v)$.

Nearer to us ( $\varepsilon \gamma \gamma v \tau \varepsilon \rho o v \eta \mu \omega v$ ). Probably so, though $\eta \mu \omega \nu$ can be taken equally well with $\eta \sigma \omega \tau \eta \rho \iota \alpha$ (our salvation is nearer). Final salvation, Paul means, whether it comes by the second coming of Christ as they all hoped or by death. It is true of us all.

Rom 13:12
Is far spent ( $\pi \rho о \varepsilon \kappa о \psi \varepsilon v$ ). First aorist active indicative of $\pi \rho \circ \kappa о \pi \tau \omega$, to cut forward, to advance, old word for making progress. See Lu 2:52; Ga 1:14; 2Ti 2:16; 3:9.

Is at hand ( $\eta \gamma \gamma(\kappa \varepsilon \nu)$. Perfect active indicative, "has drawn nigh." Vivid picture for daybreak.

Let us therefore cast off ( $\alpha \pi \sigma \theta \omega \mu \varepsilon \theta \alpha$ ovv). Aorist middle subjunctive (volitive) of $\alpha \pi о \tau 1 \theta \eta \mu$, to put off from oneself "the works of darkness" ( $\tau \alpha \varepsilon \rho \gamma \alpha$ тоv бкотоия) as we do our night-clothes.

Let us put on ( $\varepsilon v \delta v \sigma \omega \mu \varepsilon \theta \alpha)$. Aorist middle subjunctive (volitive) of $\varepsilon v \delta \nu \omega$, to put on. For this same contrast between putting off ( $\alpha \pi \circ \tau \imath \eta \eta \mu$ and $\alpha \pi \varepsilon \kappa \delta \nu \omega)$ and putting on ( $\varepsilon v \delta v \omega)$ see Col 3:8-12 .

The armour of light ( $\tau \alpha$ о $\pi \lambda \alpha$ tov $\varphi \circ \tau \circ \varsigma$ ). The weapons of light, that belong to the light (to the day time). For the metaphor of the Christian armour see 1Th 5:8; 2Co 6:7; Ro 6:13; Eph 6:13f. .

## Rom 13:13

Honestly ( $\varepsilon v \sigma \chi \eta \mu \circ v \omega \varsigma)$. Paul is fond of the metaphor "walk" ( $\pi \varepsilon \rho \iota \pi \alpha \tau \varepsilon \omega), 33$ times though not in the Pastoral Epistles. This old adverb (from $\varepsilon v \sigma \chi \eta \mu \omega \nu$, graceful) occurs also in 1Th 4:12; 1Co 14:40. The English word "honest" means honourable (Latin honor) and so decent. Wycliff translates 1Co 12:32 by "unhonest," "honesty," "honest" for "less honourable, honour, honourable."

Not in revelling ( $\mu \eta \kappa \omega \mu \circ \iota$ ). Plural "revellings." See on Ga 5:21.
Drunkenness ( $\mu$ ع $\begin{aligned} & \text { aıı). Plural again, "drunkennesses." See on Ga 5:21 . }\end{aligned}$
In chambering (коıтаıц). Plural also. See on Ro 9:10 .
Wantonness ( $\alpha \sigma \varepsilon \lambda \gamma \varepsilon \iota \alpha \iota)$ ). Plural likewise. See on 2Co 12:21; Ga 5:19.
Not in strife and jealousy ( $\mu \eta \varepsilon \rho \delta \delta \alpha \zeta \eta \lambda \omega$ ). Singular here, but some MSS. have the plural like the previous words. Quarrelling and jealousy go with the other vices (Shedd).

Rom 13:14
But ye on ( $\varepsilon v \delta v \sigma \alpha \sigma \theta \varepsilon)$. The same metaphor as in verse 12. The Lord Jesus Christ is the garment that we all need. See Ga 3:27 with baptism as the symbol.

Provision ( $\pi \rho 0$ volav). Old word for forethought (from $\pi \rho o v o o c)$. In N.T. only here and Ac 24:2 .

For the flesh ( $\tau \eta \varsigma \sigma \alpha \rho \kappa о \varsigma)$. Objective genitive.
To fulfil the lusts thereof ( $\varepsilon \iota \varsigma \varepsilon \pi \iota \theta v \mu \iota \varsigma)$ ) "For lusts." No verb.

## Romans 14

Rom 14:1
Him that is weak ( $\tau 0 v \alpha \sigma \theta \varepsilon v o u v \tau \alpha)$. See on 1 Co 8:7-12; 9:22; Ro 4:19.
Receive ye ( $\pi \rho \circ \sigma \lambda \alpha \mu \beta \alpha \nu \varepsilon \sigma \theta \varepsilon$ ). Present middle imperative (indirect), "take to yourselves."
Yet not to doubtful disputations ( $\mu \eta \varepsilon \iota \varsigma \delta \iota \alpha \kappa \rho \iota \varepsilon \iota \varsigma \delta \iota \alpha \lambda о \gamma \iota \sigma \mu \omega \nu$ ). "Not for decisions of opinions." Note $\delta \iota a$ (between, two or $\delta v o$ ) in both words. Discriminations between doubts or hesitations. For $\delta \iota \alpha \kappa \rho \iota \sigma ı \varsigma$, see 1 Co 12:10; Heb 5:14 (only N.T. examples). For $\delta \iota \alpha \lambda o \gamma \iota \sigma \mu o$, see Lu 2:35; $24: 38 ;$ Php 2:14. The "strong" brother is not called upon to settle all the scruples of the "weak" brother. But each takes it on himself to do it.

Rom 14:2
One man (os $\mu \varepsilon v$ ). "This one," demonstrative pronoun oc with $\mu \varepsilon \nu$.
Hath faith ( $\pi \iota \sigma \tau \varepsilon v \varepsilon$ ). Like $\varepsilon \chi \varepsilon \pi \iota \sigma \tau \iota \nu($ Ac 14:9).
But he that is weak (o $\delta \varepsilon \alpha \sigma \theta \varepsilon v \omega v$ ). One would expect oc $\delta \varepsilon$ (but that one) in contrast with os $\mu \varepsilon v$. Ho is demonstrative with $\delta \varepsilon$ sometimes, but here is probably just the article with $\alpha \sigma \theta \varepsilon \nu \omega \nu$.

Herbs ( $\lambda \alpha \chi \alpha v \alpha$ ). From $\lambda \alpha \chi \alpha v \omega$, to dig. Hence garden herbs or vegetables. Denney feels certain that Paul has in mind a party of vegetarians in Rome.

## Rom 14:3

Set at nought $(\varepsilon \xi \circ \cup \theta \varepsilon v \varepsilon I \tau \omega)$. Present active imperative of $\varepsilon \xi$ ou $\theta \varepsilon v \varepsilon \omega$, to treat as nothing and so with contempt (Lu 23:11; 1Th 5:20).

Judge ( $\kappa \rho \iota \varepsilon \tau \tau)$. Present active imperative of $\kappa \rho \iota \nu \omega$, criticize. One side (the meat-eaters) despises the vegetarians, while the vegetarians criticize the meat-eaters.

Received him ( $\alpha v \tau o v \pi \rho o \sigma \varepsilon \lambda \alpha \beta \varepsilon \tau 0$ ). Aorist middle (indirect) of $\pi \rho o \sigma \lambda \alpha \mu \beta \alpha \nu \omega$, same verb used in verse 1 . God took both sides into his fellowship without requiring that they be vegetarians or meat-eaters.

Rom 14:4
Who art thou? ( $\sigma v \tau \iota \varsigma \varepsilon$ ع). Proleptic position of $\sigma v$, "thou who art thou?"
The servant of another ( $\alpha \lambda \lambda$ о $\tau \rho ⿺ v$ оькє $\tau \nu$ ). Not another ( $\alpha \lambda \lambda \rho \nu$ ) servant (household
 10:15f.

Shall be made to stand $(\sigma \tau \alpha \theta \eta \sigma \varepsilon \tau \alpha)$. Future passive of $\iota \sigma \tau \eta \mu$. In spite of your sharp criticisms of one another.

Hath power ( $\delta v v a \tau \varepsilon$ ). Verb found only in Paul (2Co 9:8; 13:3; Ro 14:4), from verbal adjective $\delta v v a \tau o s$.

Rom 14:5
One man ( $o \varsigma \mu \varepsilon v$ ),
another ( $o \varsigma \delta \varepsilon$ ). Regular idiom of contrasted demonstratives (this one, that one).

One day above another ( $\eta \mu \varepsilon \rho \alpha \nu \tau \alpha \rho^{\prime} \eta \mu \varepsilon \rho \alpha v$ ). "Day beyond day." For this use of $\pi \alpha \rho \alpha$ (beside) in comparison see 1:25; Lu 13:2 .

Be fully assured ( $\pi \lambda \eta \rho \circ \varphi о \rho \varepsilon ו \sigma \theta \omega$ ). Present passive imperative of $\pi \lambda \eta \rho \circ \varphi о \rho \varepsilon \omega$, late compound verb for which see on Lu 1:1; Ro 4:21 .

In his own mind ( $\varepsilon v \tau \omega \iota \delta \iota \omega$ vo). Intelligent and honest decision according to the light possessed by each.

Rom 14:6
Regardeth ( $\varphi \rho \circ \vee \varepsilon$ ). "Thinks of," "esteems," "observes," "puts his mind on" (from $\varphi \rho \eta \nu$, mind). The Textus Receptus has also "he that regardeth not," but it is not genuine.

Unto the Lord ( $\kappa \nu \rho \iota \omega)$. Dative case. So as to $\tau \omega \theta \varepsilon \omega$ (unto God). He eats unto the Lord, he eats not unto the Lord. Paul's principle of freedom in non-essentials is most important. The Jewish Christians still observed the Seventh day (the Sabbath). The Gentile Christians were observing the first day of the week in honour of Christ's Resurrection on that day. Paul pleads for liberty.

Rom 14:7
To himself $(\varepsilon \alpha v \tau \omega)$. Dative of advantage again. But to the Lord as he shows in verse 8 . Life and death focus in the Lord.

Rom 14:8
Whether--or ( $\varepsilon \alpha \nu \tau \varepsilon--\varepsilon \alpha \nu \tau \varepsilon$ ). "Both if--and if" (condition of third class with present subjunctive ( $\zeta \omega \mu \varepsilon v--\alpha \pi \circ \theta v \eta \sigma \kappa \omega \mu \varepsilon v$ ). Both living and dying are "to the Lord." Paul repeats the idiom ( $\varepsilon \alpha \nu \tau \varepsilon-\varepsilon \alpha \nu \tau \varepsilon$ ) with the conclusion "we are the Lord's ( $\tau 0 v \kappa v \rho \circ v \varepsilon \sigma \mu \varepsilon v$ ). Predicate genitive, "we belong to the Lord."

Rom 14:9
And lived again ( $\kappa \alpha \varepsilon \zeta \eta \sigma \varepsilon v)$ ) First ingressive aorist active indicative of $\zeta \alpha \omega$, "he came to life."

Might be lord of (кטрเعvбє). Ingressive aorist active subjunctive of $\kappa v \rho เ \varepsilon \cup \omega$, "become Lord of." Purpose clause with iva (that). Old verb from кvpıoc, lord. See Lu 22:25; Ro 6:9.

Rom 14:10
But thou, why dost thou judge? ( $\sigma v \delta \varepsilon \tau \sigma v \kappa \rho ı v \varepsilon ı \sigma$ ?). Referring to the conduct of the "weak" brother in verse 3.

Or thou again ( $\eta \kappa \alpha \sigma v$ ). Referring to the "strong" brother.
Shall stand before ( $\pi \alpha \rho \alpha \sigma \tau \eta \sigma \sigma \mu \varepsilon \theta \alpha$ ). Future middle of $\pi \alpha \rho ı \sigma \tau \eta \mu$ and intransitive, to stand beside ( $\pi \alpha \rho \alpha$ ) with the locative case ( $\tau \omega \beta \varepsilon \mu \alpha \tau$, the judgment seat) as in Ac 27:24. See the same figure of God in 2Co 5:10 .

Rom 14:11
As I live ( $\zeta \omega \varepsilon \gamma \omega$ ). "I live." The LXX here (Isa 45:23 ) has кат' $\varepsilon \mu \alpha v \tau o v ~ o \mu \nu v v \omega$, "I swear by myself."

Shall confess to God ( $\varepsilon \xi_{0} \mu \circ \lambda о \gamma \eta \sigma \varepsilon \tau \alpha \tau \omega \theta \varepsilon \omega$ ). Future middle of $\varepsilon \xi_{0 \mu} \mu \lambda о \gamma \varepsilon \omega$, to confess openly $(\varepsilon \xi)$ with the accusative as in Mt 3:6. With the dative as here the idea is to give praise to, to give gratitude to (Mt 11:25).

Rom 14:12
Shall give account ( $\lambda o \gamma o v \delta \omega \sigma \varepsilon$ ). So Aleph A C rather than $\alpha \pi o \delta \omega \sigma \varepsilon$ of Textus Receptus. Common use of $\lambda$ opoc for account (bookkeeping, ledger) as in Lu 16:2 .

Rom 14:13
Let us not therefore judge one another any more ( $\mu \eta \kappa \varepsilon \tau$ ovv $\alpha \lambda \lambda \eta \lambda o v \varsigma \kappa \rho \iota v \omega \mu \varepsilon \nu$ ). Present active subjunctive (volitive). "Let us no longer have the habit of criticizing one another." A wonderfully fine text for modern Christians and in harmony with what the Master said (Mt 7:1).

That no man put a stumbling block in his brother's way or an occasion of falling ( $\tau 0 \mu \eta \tau \imath \theta \varepsilon v \alpha \pi \rho о \sigma \kappa о \mu \mu \alpha \tau \omega \alpha \delta \varepsilon \lambda \varphi \omega \eta \sigma \kappa \alpha v \delta \alpha \lambda o v$ ). Articular present active infinitive of $\tau \iota \theta \eta \mu$ in apposition with $\tau 0 v \tau 0$, accusative case after крıvate: "Judge this rather, the not putting a stumbling block (see 9:32 for $\pi \rho о \sigma к о \mu \mu \alpha$ ) or a trap ( $\sigma \kappa \alpha v \delta \alpha \lambda o v, 9: 33$ ) for his brother" ( $\alpha \delta \varepsilon \lambda \varphi \omega$, dative of disadvantage).

## Rom 14:14

I know and am persuaded in the Lord Jesus (oı $\alpha$ ка $\pi \varepsilon \pi \varepsilon เ \sigma \mu \alpha \varepsilon v \kappa \nu \rho \iota \omega \operatorname{I\eta \sigma ov).~He~}$ knows it and stands persuaded (perfect passive indicative of $\pi \varepsilon \theta \omega \omega$, to persuade), but in the sphere of the Lord Jesus (cf. 9:1), not by mere rational processes.

Unclean of itself (kaıvov $\delta \iota^{\prime}$ عautou). So Paul takes his stand with the "strong" as in 1Co 8:4f., but he is not a libertine. Paul's liberty as to food is regulated by his life in the Lord. For this use of kovo¢, not as common to all (Ac 2:44; 4:32), but unhallowed, impure, see on Mr 7:2,5; Ac 10:14,28. God made all things for their own uses.

Save that $(\varepsilon \mu \eta)$. The exception lies not in the nature of the food ( $\delta \mathrm{t}^{\prime}$ عavtov), but in the man's view of it (to him, $\varepsilon \kappa \varepsilon เ v \omega$, dative case).

Rom 14:15
Because of meat ( $\delta \iota \alpha \beta \rho \omega \mu \alpha)$. "Because of food."
In love ( $\kappa \alpha \tau \alpha \alpha \gamma \alpha \pi \eta v)$. "According to love" as the regulating principle of life. See 1Co 8 where Paul pleads for love in place of knowledge on this point.

Destroy not ( $\mu \eta \alpha \pi \sigma \lambda \lambda \nu \varepsilon$ ). Present active imperative of $\alpha \pi \sigma \lambda \lambda \nu \omega$, the very argument made in 1Co 8:10f.

With thy meat ( $\tau \omega \beta \rho \omega \mu \alpha \tau \sigma o v$ ). Instrumental case, "with thy food." It is too great a price to pay for personal liberty as to food.

Rom 14:16
Your good ( $v \mu \omega \nu \tau$ тo $\alpha \gamma \alpha \theta$ ov). "The good thing of you" = the liberty or Christian freedom which you claim.

Be evil spoken of $(\beta \lambda \alpha \sigma \varphi \eta \mu \varepsilon \iota \sigma \theta \omega)$. Present passive imperative of $\beta \lambda \alpha \sigma \varphi \eta \mu \varepsilon \omega$ for which see Mt 9:3; Ro 3:8 .

## Rom 14:17

The kingdom of God ( $\eta \beta \alpha \sigma \iota \lambda \varepsilon \alpha \alpha$ tov $\theta \varepsilon o v$ ). Not the future kingdom of eschatology, but the present spiritual kingdom, the reign of God in the heart, of which Jesus spoke so often. See 1Co 4:21. Paul scores heavily here, for it is not found in externals like food and drink, but in spiritual qualities and graces.

Rom 14:18
Herein ( $\varepsilon \vee \tau \operatorname{\tau ov} \tau \omega)$. "On the principle implied by these virtues" (Sanday and Headlam).
Approved of men ( $\delta$ окцос тогя $\alpha v \theta \rho \omega \pi о \iota \varsigma)$. "Acceptable to men." Stands the test for men. See 1Co 11:19; 2Co 10:18; 2Ti 2:15.

Rom 14:19
So then ( $\alpha \rho \alpha o u v$ ). Two inferential particles, "accordingly therefore."
Let us follow after ( $\delta \omega \omega \kappa \omega \mu \varepsilon v$ ). Present active subjunctive (volitive). "Let us pursue." Some MSS. have present indicative, "we pursue."

The things which make for peace ( $\tau \alpha \tau \eta \varsigma \varepsilon \iota \rho \eta \eta \varsigma)$ ) "The things of peace," literally, genitive case. So "the things of edification for one another" ( $\tau \alpha \tau \eta \varsigma$ оккоסо $\mu \eta \varsigma \tau \eta \varsigma$ عוऽ $\alpha \lambda \lambda \eta \lambda o u c)$.

Rom 14:20
Overthrow not ( $\mu \eta \kappa \alpha \tau \alpha \lambda \nu \varepsilon$ ). "Destroy not," "do not loosen down" (carrying on the metaphor in oккобо $\mu \eta$, building).

The work of God ( $\tau \boldsymbol{\varepsilon} \varepsilon \rho \gamma \circ \sim$ tov $\theta \varepsilon o v$ ). The brother for whom Christ died, verse 15. Perhaps with a side-glance at Esau and his mess of pottage.

But it is evil ( $\alpha \lambda \lambda \alpha$ какоv). Paul changes from the plural коьva to the singular какоv.
With offence ( $\delta \iota \alpha \pi \rho о \sigma \kappa о \mu \mu \alpha \tau о \varsigma)$. "With a stumbling-block" as in verse 13. This use of $\delta \iota \alpha$ (accompaniment) is common. So then it is addressed to the "strong" brother not to cause a stumbling-block by the way he eats and exercises his freedom.

Rom 14:21
Not to eat ( $\tau 0 \mu \eta \varphi \alpha \gamma \varepsilon \downarrow$ ). "The not eating." Articular infinitive (second aorist active of $\varepsilon \sigma \theta \omega \omega)$ and subject of ка入ov $\varepsilon \sigma \tau \iota v$ (copula, understood).

Flesh (крғац). Old word, in N.T. only here and 1Co 8:13.
To drink ( $\pi \varepsilon เ v$ ). Shortened form for $\pi \iota \varepsilon \iota v$ (second aorist active infinitive of $\pi \iota v \omega$ ).
Whereby ( $\varepsilon v \omega$ ). "On which thy brother stumbleth" ( $\pi \rho о \sigma \kappa о \pi \tau \varepsilon$ ).
Rom 14:22
Have thou to thyself before God ( $\sigma 0--\kappa \alpha \tau \alpha \sigma \varepsilon \alpha \cup \tau o v \varepsilon \chi \varepsilon \varepsilon v \omega \pi \iota o v$ tov $\theta \varepsilon o v$ ). Very emphatic position of $\sigma v$ at the beginning of the sentence, "Thou there." The old MSS. put $\eta \nu$ (relative "which") after $\pi \iota \sigma \tau \iota v$ and before $\varepsilon \chi \varepsilon \iota \varsigma$. This principle applies to both the "strong"
and the "weak." He is within his rights to act "according to thyself," but it must be "before God" and with due regard to the rights of the other brethren.

In that which he approveth ( $\varepsilon v$ о $\delta о \kappa \mu \alpha \zeta \varepsilon)$. This beatitude cuts both ways. After testing and then approving $(1: 28 ; 2: 18)$ one takes his stand which very act may condemn himself by what he says or does. "It is a rare felicity to have a conscience untroubled by scruples" (Denney).

Rom 14:23
He that doubteth (o $\delta \iota \kappa \kappa \iota v o \mu \varepsilon v o \varsigma)$. Present middle participle of $\delta ı \alpha \kappa \rho ı v \omega$, to judge between $(\delta ı \alpha)$, to hesitate. See Jas 1:6f. for this same picture of the double-minded man. Cf. Ro 4:20; Mr 11:23.

Is condemned (катакєкрıта). Perfect passive indicative of катакрıvш (note ката-), "stands condemned."

If he eat ( $\varepsilon \alpha v \varphi \alpha \gamma \eta$ ). Third class condition, $\varepsilon \alpha v$ and second aorist active subjunctive. If in spite of his doubt, he eat.

Whatsoever is not of faith is $\sin$ ( $\pi \alpha v$ o оик $\varepsilon \kappa \pi \iota \sigma \tau \varepsilon \omega \varsigma ~ \alpha \mu \alpha \rho \tau \iota \alpha ~ \varepsilon \sigma \tau \iota v$ ).
Faith ( $\pi \iota \sigma \tau \iota \varsigma)$ here is subjective, one's strong conviction in the light of his relation to Christ and his enlightened conscience. To go against this combination is sin beyond a doubt. Some MSS. (A L etc.) put the doxology here which most place in 16:25-27. But they all give chapters 15 and 16. Some have supposed that the Epistle originally ended here, but that is pure speculation. Some even suggest two editions of the Epistle. But chapter 15 goes right on with the topic discussed in chapter 14.

## Romans 15

Rom 15:1
We the strong ( $\eta \mu \varepsilon \iota \varsigma$ о $\delta u v a \tau o$ ). Paul identifies himself with this wing in the controversy. He means the morally strong as in 2Co 12:10; 13:9, not the mighty as in 1Co 1:26.

The infirmities ( $\tau \alpha \alpha \sigma \theta \varepsilon \nu \eta \mu \alpha \tau \alpha)$. "The weaknesses" (cf. $\alpha \sigma \theta \varepsilon \nu \omega v$ in 14:1,2 ), the scruples "of the not strong" ( $\tau \omega \nu \alpha \delta v \nu \alpha \tau \omega v$ ). See Ac 14:8 where it is used of the man weak in his feet (impotent).

To bear ( $\beta \alpha \sigma \tau \alpha \zeta \varepsilon \imath v)$. As in Ga 6:2, common in the figurative sense.
Not to please ourselves ( $\mu \eta$ عavтоוऽ $\alpha \rho \varepsilon \sigma \kappa \varepsilon เ v$ ). Precisely Paul's picture of his own conduct in 1Co 10:33.

Rom 15:2
For that which is good ( $\varepsilon เ \varsigma ~ \tau о ~ \alpha \gamma \alpha \theta o v$ ). "For the good." As in $14: 16,19$. Not to please men just for popular favours, but for their benefit.

Rom 15:3
Pleased not himself ( $o v \chi \varepsilon \alpha v \tau \omega \eta \rho \varepsilon \sigma \varepsilon \nu$ ). Aorist active indicative of $\alpha \rho \varepsilon \sigma \kappa \omega$ with the usual dative. The supreme example for Christians. See 14:15. He quotes Ps 69:9 (Messianic Psalm) and represents the Messiah as bearing the reproaches of others.

Rom 15:4
Were written aforetime ( $\pi \rho o \varepsilon \gamma \rho \alpha \varphi \eta$ ). Second aorist passive indicative of $\pi \rho \sigma \gamma \rho \alpha \varphi \omega$, old verb, in N.T. only here, Ga 3:1 (which see); Eph 3:3; Jude 1:4.

For our learning ( $\varepsilon ı \varsigma \tau \eta \nu \eta \mu \varepsilon \tau \varepsilon \rho \alpha v \delta \iota \alpha \sigma \kappa \alpha \lambda \iota \alpha v$ ). "For the instruction of us." Objective sense of possessive pronoun $\eta \mu \varepsilon \tau \varepsilon \rho \circ \varsigma$. See Mt 15:9; $2 \mathrm{Ti} 3: 16$ for $\delta \iota \delta \alpha \sigma \kappa \alpha \lambda \iota \alpha \nu$ (from $\delta \iota \delta \alpha \sigma \kappa \omega$, to teach).

We might have hope ( $\tau \eta v \varepsilon \lambda \pi \iota \delta \alpha \varepsilon \chi \omega \mu \varepsilon v$ ). Present active subjunctive of $\varepsilon \chi \omega$ with $v \alpha \alpha$ in final clause, "that we might keep on having hope." One of the blessed uses of the Scriptures.

Rom 15:5
The God of patience and comfort ( $о \varepsilon \kappa \varsigma \tau \eta \varsigma v \pi о \mu о \nu \eta \varsigma \kappa \alpha \tau \eta \varsigma \pi \alpha \rho \alpha \kappa \lambda \eta \sigma \varepsilon \omega \varsigma)$. Genitive case of the two words in verse 4 used to describe God who uses the Scriptures to reveal himself to us. See 2Co 1:3 for this idea; Ro 15:13 for "the God of hope"; 15:33 for "the God of peace."

Grant you ( $\delta \omega ı \eta \nu \mu v$ ). Second aorist active optative (Koine form for older $\delta o t \eta$ ) as in 2Th 3:16; Eph 1:17; 2Ti 1:16,18; 2:25, though MSS. vary in Eph 1:17; 2Ti 2:25 for $\delta \omega \eta$ (subjunctive). The optative here is for a wish for the future (regular idiom).

According to Christ Jesus ( $\kappa \alpha \tau \alpha$ X $\rho \iota \sigma \tau o v$ I $\eta \sigma o v v$ ). "According to the character or example of Christ Jesus" (2Co 11:17; Col 2:8; Eph 5:24 ).

Rom 15:6

With one accord ( $\mathrm{o} \mu \mathrm{o} \theta \mathrm{v} \mu \mathrm{\alpha} \delta \mathrm{ov}$ ). Here alone in Paul, but eleven times in Acts (Ac 1:14 , etc.).

With one mouth ( $\varepsilon v \varepsilon v \sigma \tau o \mu a \tau$ ). Vivid outward expression of the unity of feeling.
May glorify ( $\delta o \xi \alpha \zeta \eta \tau \varepsilon$ ). Present active subjunctive of $\delta o \xi \alpha \zeta \omega$, final clause with va "that ye may keep on glorifying." For "the God and Father of our Lord Jesus Christ" see 2Co 1:3; 9:31 for discussion. It occurs also in Eph 1:3; 1Pe 1:3.

Rom 15:7
Receive ye ( $\pi \rho \circ \sigma \lambda \alpha \mu \beta \alpha \nu \varepsilon \sigma \theta \varepsilon$ as in 14:1),
received ( $\pi \rho о \sigma \varepsilon \lambda \alpha \beta \varepsilon \tau 0$, here of Christ as in 14:3 of God). The repetition here is addressed to both the strong and the weak and the "us" ( $\eta \mu \alpha \varsigma$ ) includes all.

Rom 15:8
A minister of the circumcision ( $\delta$ ıакоvov $\pi \varepsilon \rho \iota \tau о \mu \eta \zeta$ ). Objective genitive, "a minister to the circumcision." $\Delta$ takovov is predicate accusative with $\gamma \varepsilon \gamma \varepsilon v \eta \sigma \theta \alpha$ (perfect passive infinitive of $\gamma \iota v o \mu \alpha$ in indirect assertion after $\lambda \varepsilon \gamma \omega$, I say) and in apposition with Xpıбтov, accusative of general reference with the infinitive. See $\mathrm{Ga} 4: 4 \mathrm{f}$.

That he might confirm ( $\varepsilon ı \varsigma ~ \tau о ~ \beta \varepsilon \beta \alpha \iota \omega \sigma \alpha)$. Purpose clause with $\varepsilon \iota \varsigma ~ t o ~ a n d ~ t h e ~ i n f i n i t i v e ~$ $\beta \varepsilon \beta \alpha \omega \omega \sigma \alpha$ (first aorist active of $\beta \varepsilon \beta \alpha \iota \omega$, to make stand).

The promises given unto the fathers ( $\tau \alpha \varsigma \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \iota \alpha \varsigma \tau \omega v \pi \alpha \tau \varepsilon \rho \omega v$ ). No "given" in the Greek, just the objective genitive, "the promises to the fathers." See 9:4,5 .

Rom 15:9
And that the Gentiles might praise ( $\tau \alpha \delta \varepsilon \varepsilon \theta \nu \eta \delta o \xi \alpha \sigma \alpha$ ). Coordinate with $\beta \varepsilon \beta \alpha \omega \omega \sigma \alpha$ and $\varepsilon ı \varsigma \tau 0$, to be repeated with $\tau \alpha \varepsilon \theta v \eta$, the accusative of general reference and $\tau 0 v \theta \varepsilon o v$ the object of $\delta o \xi \alpha \sigma \alpha$. Thus the Gentiles were called through the promise to the Jews in the covenant with Abraham (4:11f.,16f. ). Salvation is of the Jews. Paul proves his position by a chain of quotations from the O.T., the one in verse 9 from Ps 18:50. For $\varepsilon \xi \circ \mu о \lambda o \gamma \varepsilon \omega$, see 14:10.

I will sing $(\psi \alpha \lambda \omega)$. Future active of $\psi \alpha \lambda \lambda \omega$, for which verb see on 1Co 14:15.
Rom 15:10
Rejoice, ye Gentiles ( $\varepsilon v \varphi \rho \alpha v \theta \eta \tau \varepsilon$ ). First aorist passive imperative of $\varepsilon \cup \varphi \rho \alpha \iota v \omega$, old word from $\varepsilon v$, well and $\varphi \rho \eta \nu$, mind. See Lu 15:32. Quotation from De 32:43 (LXX).

Rom 15:11
All the Gentiles ( $\pi \alpha \vee \tau \alpha \tau \alpha \varepsilon \theta v \eta$ ). From Ps 117:1 with slight variations from the LXX text.

Rom 15:12
The root ( $\eta \rho \iota \zeta(\alpha)$. Rather here, as in $\operatorname{Re} 5: 5 ; 23: 16$, the sprout from the root. From Isa 11:10.

On him shall the Gentiles hope ( $\varepsilon \pi^{\prime} \alpha v \tau \omega \varepsilon \theta \nu \eta \varepsilon \lambda \pi \iota o v \sigma \iota v$ ). Attic future of $\varepsilon \lambda \pi \iota \zeta \omega$ for the usual $\varepsilon \lambda \pi \iota \sigma o v \sigma \iota v$.

Rom 15:13
The God of hope (o $\theta \varepsilon o \varsigma \tau \eta \varsigma \varepsilon \lambda \pi \iota \delta o \varsigma)$. Taking up the idea in verse 12 as in verse 5 from 4.

Fill you ( $\pi \lambda \eta \rho \omega \sigma \alpha \nu \mu \alpha \varsigma$ ). Optative (first aorist active of $\pi \lambda \eta \rho \circ \omega$ ) of wish for the future. Cf. $\delta \omega i \eta$ in verse 5 .

In believing ( $\varepsilon \nu \tau \omega \pi \iota \sigma \tau \varepsilon v \varepsilon \iota \nu)$. "In the believing" ( $\varepsilon \nu$ with locative of the articular infinitive, the idiom so common in Luke's Gospel).

That ye may abound ( $\varepsilon ı \varsigma ~ \tau о ~ \pi \varepsilon \rho ı \sigma \sigma \varepsilon v \varepsilon ı \nu ~ v \mu a \varsigma) . ~ P u r p o s e ~ c l a u s e ~ w i t h ~ \varepsilon ı \varsigma ~ \tau o, ~ a s ~ i n ~ v e r s e ~$ 8 , with $\pi \varepsilon \rho \iota \sigma \sigma \varepsilon v \varepsilon \iota \nu$ (present active infinitive of $\pi \varepsilon \rho \iota \sigma \sigma \varepsilon v \omega$, with accusative of general reference, $v \mu a \varsigma$ ). This verse gathers up the points in the preceding quotations.

Rom 15:14
I myself also ( $\kappa \alpha \alpha \cup \tau о \varsigma \varepsilon \gamma \omega$ ). See 7:25 for a like emphasis on himself, here in contrast with "ye yourselves" ( $\kappa \alpha \alpha \cup \tau 0)$. The argument of the Epistle has been completed both in the main line (chapters 1-8) and the further applications ( 9:1-15:13). Here begins the Epilogue, the personal matters of importance.

Full of goodness ( $\mu \varepsilon \sigma \tau \sigma \alpha \gamma \alpha \theta o \sigma v \nu \eta \varsigma)$. See 2Th 1:11; Ga 5:22 for this LXX and Pauline word (in ecclesiastical writers also) made from the adjective $\alpha \gamma \alpha \theta$ os, good, by adding - $\sigma v \nu \eta$ (common ending for words like $\delta \iota \kappa \iota \iota \sigma u v \eta$. See 1:29 for $\mu \varepsilon \sigma \tau o \varsigma$ with genitive and $\pi \varepsilon \pi \lambda \eta \rho \omega \mu \varepsilon \nu$ (perfect passive participle of $\pi \lambda \eta \rho o \omega$ as here), but there with instrumental case after it instead of the genitive. Paul gives the Roman Christians (chiefly Gentiles) high praise. The "all knowledge" is not to be pressed too literally, "our Christian knowledge in its entirety" (Sanday and Headlam).

To admonish ( $\operatorname{vov} \theta \varepsilon \tau \varepsilon เ v)$. To put in mind (from vov $\operatorname{vo\tau \tau \eta }$, and this from vovs and $\tau(\theta \eta \mu)$. See on 1 Th 5:12,14. "Is it laying too much stress on the language of compliment to suggest that these words give a hint of St. Paul's aim in this Epistle?" (Sanday and Headlam). The strategic position of the church in Rome made it a great centre for radiating and echoing the gospel over the world as Thessalonica did for Macedonia (1Th 1:8).

Rom 15:15
I write $(\varepsilon \gamma \rho \alpha \psi \alpha)$. Epistolary aorist.
The more boldly ( $\tau 0 \lambda \mu \eta \rho о \tau \varepsilon \rho \omega \varsigma$ ). Old comparative adverb from $\tau 0 \lambda \mu \eta \rho \omega \varsigma$. Most MSS. read $\tau 0 \lambda \mu \eta \rho o \tau \varepsilon \rho o v$. Only here in N.T.

In some measure ( $\alpha \pi \sigma \mu \varepsilon \rho о \cup \varsigma)$. Perhaps referring to some portions of the Epistle where he has spoken plainly ( $6: 12,19 ; 8: 9 ; 11: 17 ; 14: 3,4,10$, etc.).

As putting you again in remembrance (os $\varepsilon \pi \alpha \nu \alpha \mu \mu \nu \eta \sigma \kappa \omega \nu \nu \mu \alpha \varsigma)$. Delicately put with $\omega \varsigma$ and $\varepsilon \pi$ in the verb, "as if calling back to mind again" $(\varepsilon \pi)$. This rare verb is here alone in the N.T.

Rom 15:16

That I should be ( $\varepsilon เ \varsigma ~ \tau o ~ \varepsilon ı v a \mu \varepsilon)$. The $\varepsilon$ וֹ to idiom with the infinitive again (verses 8,13 ).

Minister ( $\lambda \varepsilon \iota \tau o \cup \rho \gamma o v$ ). Predicate accusative in apposition with $\mu \varepsilon$ and see 13:6 for the word. "The word here derives from the context the priestly associations which often attach to it in the LXX" (Denney). But this purely metaphorical use does not show that Paul attached a "sacerdotal" character to the ministry.

Ministering (ı $\varepsilon \rho \circ \cup \rho \gamma o u v \tau \alpha$ ). Present active participle of $\varepsilon \varepsilon \rho o v \rho \gamma \varepsilon \omega$, late verb from ı $\rho о \cup \rho \gamma о \varsigma$ ( $\varepsilon \rho \circ \sigma, \varepsilon \rho \gamma \omega$ ), in LXX, Philo, and Josephus, only here in N.T. It means to work in sacred things, to minister as a priest. Paul had as high a conception of his work as a preacher of the gospel as any priest did.

The offering up of the Gentiles ( $\eta \pi \rho \circ \sigma \varphi \rho \rho \alpha \tau \omega v \varepsilon \theta v \omega v$ ). Genitive of apposition, the Gentiles being the offering. They are Paul's offering. See Ac 21:26 .

Acceptable ( $\varepsilon v \pi \rho о \sigma \delta \varepsilon \kappa \tau о \varsigma)$. See 2Co 6:2; 8:12 . Because "sanctified in the Holy Spirit" ( $\eta \gamma \iota \alpha \sigma \mu \varepsilon v \eta \varepsilon \nu \pi \nu \varepsilon \nu \mu \alpha \tau \alpha \gamma \omega \omega$, perfect passive participle of $\alpha \gamma \iota \omega(\omega)$.

Rom 15:17
In things pertaining to God ( $\tau \alpha \pi \rho o \varsigma \tau \operatorname{\tau ov} \theta \varepsilon o v$ ). Accusative of general reference of the article used with the prepositional phrase, "as to the things relating to ( $\pi \rho \circ \varsigma$, facing) God."

Rom 15:18
Any things save those which Christ wrought through me ( $\tau \omega v$ ov кат $\varepsilon \rho \rho \neq \sigma \alpha \tau о$ Xpıбтоৎ $\left.\delta \iota^{\prime} \varepsilon \mu \circ v\right)$. Rather, "any one of those things which Christ did not work through me." The antecedent of $\omega v$ is the unexpressed $\tau 0 v \tau \omega v$ and the accusative relative $\alpha$ (object of кат $\varepsilon \rho \gamma(\sigma \alpha \tau о)$ is attracted into the genitive case of $\tau 0 v \tau \omega v$ after a common idiom.

By word and deed ( $\lambda o \gamma \omega \kappa \alpha \varepsilon \rho \gamma \omega)$. Instrumental case with both words. By preaching and life (Lu 24:19; Ac 1:1; 7:22; 2Co 10:11).

Rom 15:19
In power of signs and wonders ( $\varepsilon v \delta v v a \mu \varepsilon \sigma \eta \mu \varepsilon \omega \omega v \kappa \alpha \tau \varepsilon \rho \alpha \tau \omega v$ ). Note all three words as in Heb 2:4, only here $\delta u v a \mu ı$ is connected with $\sigma \eta \mu \varepsilon \iota \alpha$ and $\tau \varepsilon \rho a \tau \alpha$. See all three words used of Paul's own work in 2Co 12:12 and in 2Th 2:9 of the Man of Sin. See 1Th 1:5; 1Co 2:4 for the "power" of the Holy Spirit in Paul's preaching. Note repetition of $\varepsilon v \delta \nu v a \mu \varepsilon$ here with $\pi v \varepsilon v \mu a \tau o \varsigma ~ a \gamma ı v$.

So that ( $\omega \sigma \tau \varepsilon$ ). Result expressed by the perfect active infinitive $\pi \varepsilon \pi \lambda \eta \rho \omega \kappa \varepsilon v \alpha$ (from $\pi \lambda \eta \rho \circ \omega$ ) with the accusative $\mu \varepsilon$ (general reference).

Round about even unto Illyricum (кขк $\lambda \omega \mu \varepsilon \chi \rho$ тоv $I \lambda \lambda \nu \rho ı \kappa о v$ ). "In a ring" ( $\kappa \nu \kappa \lambda \omega$, locative case of кvк入oc). Probably a journey during the time when Paul left Macedonia and waited for II Corinthians to have its effect before coming to Corinth. If so, see 2Co 13; Ac 20:1-3. When he did come, the trouble with the Judaizers was over. Illyricum seems to be the name for the region west of Macedonia (Dalmatia). Strabo says that the Egnatian Way
passed through it. Arabia and Illyricum would thus be the extreme limits of Paul's mission journeys so far.

Rom 15:20
Yea (ov $\omega \varsigma \delta \varepsilon$ ). "And so," introducing a limitation to the preceding statement.
Making it my aim ( $\varphi \iota \lambda o \tau \iota \mu o v \mu \varepsilon \nu o v$ ). Present middle participle (accusative case agreeing with $\mu \varepsilon$ ) of $\varphi \iota \lambda o \tau \iota \mu \varepsilon \sigma \mu \alpha$, old verb, to be fond of honour ( $\varphi \iota \lambda o \sigma, \tau \iota \mu \eta)$. In N.T. only here and 1Th 4:11; 2Co 5:9. A noble word in itself, quite different in aim from the Latin word for
ambition ( $\alpha \mu \beta$ ı, to go on both sides to carry one's point).
Not where (ov otov). Paul was a pioneer preacher pushing on to new fields after the manner of Daniel Boone in Kentucky.

That I might now build upon another man's foundation ( $\imath \alpha \mu \eta \varepsilon \pi^{\prime} \alpha \lambda \lambda о \tau \rho \iota v \theta \varepsilon \mu \varepsilon \lambda \iota \nu$ оько $\delta \rho \mu \omega$ ). For $\alpha \lambda \lambda$ о $\tau \rho ı \varsigma ~(n o t ~ \alpha \lambda \lambda о \varsigma) ~ s e e ~ 14: 4 . ~ F o r ~ ~ \theta \varepsilon \mu \varepsilon \lambda ı o v, ~ s e e ~ L u ~ 6: 48 f . ; ~ 1 C o ~ 3: 11 . ~ T h i s ~$ noble ambition of Paul's is not within the range of some ministers who can only build on another's foundation as Apollos did in Corinth. But the pioneer preacher and missionary has a dignity and glory all his own.

Rom 15:21
As it is written ( $\kappa \alpha \theta \omega \varsigma \gamma \varepsilon \gamma \rho a \pi \tau \alpha$ ). From Isa 52:15. Paul finds an illustration of his word about his own ambition in the words of Isaiah. Fritzsche actually argues that Paul understood Isaiah to be predicting his (Paul's) ministry! Some scholars have argued against the genuineness of verses 9-21 on wholly subjective and insufficient grounds.

Rom 15:22
I was hindered ( $\varepsilon v \varepsilon \kappa о \pi \tau \sigma \mu \eta v)$. Imperfect passive (repetition) of $\varepsilon v \kappa о \pi \tau \omega$, late verb, to cut in, to cut off, to interrupt. Seen already in Ac $24: 4$; 1Th 2:18; Ga 5:7. Cf. modern telephone and radio and automobile.

These many times ( $\tau \alpha \pi \sigma \lambda \lambda \alpha$ ). "As to the many things." In 1:13 Paul used $\pi 0 \lambda \lambda \alpha \kappa \iota$ (many times) and B D read it here. But Paul's work ( $\tau \alpha \pi o \lambda \lambda \alpha$ ) had kept him away.

From coming to you ( $\tau 0 v \varepsilon \lambda \theta \varepsilon \iota v \pi \rho \circ \varsigma v \mu a \varsigma$ ). Ablative case (after the verb of hindering) of the articular infinitive, "from the coming."

Rom 15:23
Having no more any place in these regions ( $\mu \eta \kappa \varepsilon \tau \tau о \pi о \nu \varepsilon \chi \omega \nu \varepsilon \nu \tau о \iota \varsigma \kappa \lambda \iota \mu \sigma \iota v$ ). Surprising frankness that the average preacher would hardly use on such a matter. Paul is now free to come to Rome because there is no demand for him where he is. For $\kappa \lambda_{\mu} \mu \alpha$ (from $\kappa \lambda \iota \nu \omega$, to incline), slope, then tract of land, region, see already 2Co 11:10; Ga 1:21 (the only N.T. examples).

A longing ( $\varepsilon \pi \iota \pi \circ \theta \varepsilon \iota \alpha \nu)$. A hapax legomenon, elsewhere $\varepsilon \pi \iota \pi \circ$ Өŋбıৎ (2Co 7:7,11), from $\varepsilon \pi \iota \pi o \theta \varepsilon \omega$ as in Ro 1:11.

These many years ( $\alpha \pi 0$ เ $\alpha \alpha v \omega v \varepsilon \tau \omega v$ ). "From considerable years." So B C, but Aleph A D have $\pi о \lambda \lambda \omega v$, "from many years."

Rom 15:24
Whensoever I go ( $\omega \varsigma$ av $\pi о \rho \varepsilon v \omega \mu \alpha$ ). Indefinite temporal clause with $\omega \varsigma \alpha v$ and the present middle subjunctive (cf. 1Co 11:34; Php 2:23 with aorist subjunctive).

Into Spain ( $\varepsilon \varsigma \varsigma \tau \eta \nu \Sigma \pi \alpha v ı \alpha v)$. It was a Roman province with many Jews in it. The Greek name was I $\beta \varepsilon \rho \iota \alpha$, the Latin Hispania. The Textus Receptus adds here $\varepsilon \lambda \varepsilon v \sigma \circ \mu \alpha \pi \rho \circ \varsigma v \mu \alpha \varsigma$ (I shall come to you), but it is not in Aleph A B C D and is not genuine. Without it we have a parenthesis (or anacoluthon) through the rest of verse 24.

In my journey ( $\delta$ ıatopsvouعvoৎ). Present middle participle, "passing through." Paul planned only a brief stay in Rome since a strong church already existed there.

To be brought on my way thitherward ( $\pi \rho \circ \pi \varepsilon \mu \varphi \theta \eta \nu \alpha \varepsilon \kappa \varepsilon$ ). "To be sent forward there." First aorist passive infinitive of $\pi \rho о \pi \varepsilon \mu \pi \omega$, common word for escorting one on a journey (1Co 16:6,11; 2Co 1:16; Tit 3:13; 2Jo 1:6 ).

If first in some measure I shall have been satisfied with your company ( $\varepsilon \alpha v \nu \mu \omega v$ $\pi \rho \circ \tau \omega \nu \alpha \pi 0 \mu \varepsilon \rho \circ \nu \varsigma \varepsilon \mu \pi \lambda \eta \sigma \theta \omega)$. Condition of third class with $\varepsilon \alpha \nu$ and first aorist passive subjunctive of $\varepsilon \mu \pi \mu \mu \pi \lambda \eta \mu$, old verb, to fill up, to satisfy, to take one's fill. See Lu 6:25. Literally, "if I first in part be filled with you" (get my fill of you). delicate compliment for the Roman church.

Rom 15:25
But now ( $v o v \delta \varepsilon$ ). Repeats the very words used in 23.
I go ( $\pi$ о $о \varepsilon v o \mu \alpha)$. Futuristic present as in Joh 14:2.
 like $\varepsilon u \lambda$ opouvta in Ac 3:26. This collection had been one of Paul's chief cares for over a year now (see 2Co 8; 9 ). See 2Co 8:4.

Rom 15:26
For it hath been the good pleasure of Macedonia and Achaia ( $\eta v \delta о \kappa \eta \sigma \alpha v \gamma \alpha \rho$
 (first aorist active indicative of $\varepsilon v \delta \circ \kappa \varepsilon \omega$ ) shows that it was voluntary (2Co 8:4). Paul does not here mention Asia and Galatia.

A certain contribution ( $\kappa o \iota v \omega v i \alpha v \tau \iota v a$ ). Put thus because it was unknown to the Romans. For this sense of koıv $\omega v$ vav, see 2Co 8:4; 9:13.

For the poor among the saints ( $\varepsilon \varsigma \varsigma \tau 0 \cup \varsigma \pi \tau \omega \chi$ оиц $\tau \omega \nu \alpha \gamma \omega v$ ). Partitive genitive. Not all there were poor, but Ac 4:32-5:11; 6:1-6; 11:29f.; Ga 2:10 prove that many were.

Rom 15:27
Their debtors ( $0 \varphi \varepsilon 1 \lambda \varepsilon \tau \alpha \alpha \cup \tau \omega v$ ). Objective genitive: the Gentiles are debtors to the Jews. See the word o甲 $\varnothing \lambda \varepsilon \tau \eta \varsigma$ in $1: 14 ; 8: 12$.

For if $(\varepsilon \gamma \alpha \rho)$. Condition of the first class, assumed as true, first aorist active indicative ( $\varepsilon \kappa о \iota \omega \nu \eta \sigma \alpha \nu$, from коı $\nu \omega \nu \varepsilon \omega$, to share) with associative instrumental case ( $\pi \nu \varepsilon v \mu \alpha \tau \iota \kappa о \iota$, , spiritual things).

To minister unto ( $\lambda \varepsilon \iota \tau о \nu \rho \gamma \eta \sigma \alpha$, first aorist active infinitive of $\lambda \varepsilon \iota \tau о \cup \rho \gamma \varepsilon \omega$ with dative case avtoıs, to them), but here certainly with no "sacerdotal" functions (cf. verse 16).

In carnal things ( $\varepsilon \nu \tau о ъ \sigma \alpha \rho к ⿺ 𠃊 о \iota) . ~ T h i n g s ~ w h i c h ~ b e l o n g ~ t o ~ t h e ~ n a t u r a l ~ l i f e ~ o f ~ t h e ~ f l e s h ~$ $(\sigma \alpha \rho \xi)$, not the sinful aspects of the flesh at all.

Rom 15:28
Have sealed ( $\sigma \varphi \rho \alpha \gamma \iota \sigma \alpha \mu \varepsilon \nu o \varsigma)$. First aorist middle participle (antecedent action, having sealed) of $\sigma \varphi \rho a \gamma \iota \zeta \omega$, old verb from $\sigma \varphi \rho a \gamma \iota \varsigma$, a seal (Ro 4:11), to stamp with a seal for security (Mt 27:66) or for confirmation (2Co 1:22) and here in a metaphorical sense. Paul was keenly sensitive that this collection should be actually conveyed to Jerusalem free from all suspicion (2Co 8:18-23).

I will go on by you ( $\alpha \pi \varepsilon \lambda \varepsilon v \sigma o \mu \alpha \delta i^{\prime} v \mu \omega v$ ). Future middle of $\alpha \pi \varepsilon \rho \chi \circ \mu \alpha$, to go off or on. Note three prepositions here ( $\alpha \pi^{\prime}$ from Rome, $\delta \imath^{\prime}$ by means of you or through you, $\varepsilon ו \varsigma$ unto Spain). He repeats the point of verse 24, his temporary stay in Rome with Spain as the objective. How little we know what is ahead of us and how grateful we should be for our ignorance on this point.

Rom 15:29
When I come ( $\varepsilon \rho \chi \circ \mu \varepsilon \nu \circ \varsigma)$. Present middle participle of $\varepsilon \rho \chi \circ \mu \alpha$ with the time of the future middle indicative $\varepsilon \lambda \varepsilon v \sigma o \mu \alpha$ (coming I shall come).

In the fulness of the blessing of Christ ( $\varepsilon \vee \pi \lambda \eta \rho \omega \mu \alpha \tau \varepsilon v \lambda о \gamma \iota \alpha$ X $\rho \iota \sigma \tau \circ v$ ). On $\pi \lambda \eta \rho \omega \mu \alpha \tau$, see $11: 12$. Paul had already ( $1: 11 \mathrm{f}$.) said that he had a $\chi \alpha \rho \iota \sigma \mu \alpha \pi \nu \varepsilon v \mu \alpha \tau \iota \kappa o v$ (spiritual blessing) for Rome. He did bring that to them.

Rom 15:30
By ( $\delta 1 \alpha$ ). The intermediate agents of the exhortation (the Lord Jesus and the love of the Spirit) as $\delta t \alpha$ is used after $\pi \alpha \rho \alpha \kappa \alpha \lambda \omega$ in 12:1.

That ye strive together with me ( $\sigma v v \alpha \gamma \omega v \iota \sigma \alpha \sigma \theta \alpha \mu o$ ). First aorist middle infinitive of $\sigma v v a \gamma \omega \nu \zeta$ o $\mu \alpha$, old compound verb, only here in N.T., direct object of $\pi \alpha \rho \alpha \kappa \alpha \lambda \omega$, and with associative instrumental case $\mu$ o, the simplex $\alpha \gamma \omega v \iota \zeta \mu \varepsilon \nu o \varsigma$, occurring in Col $4: 12$ of the prayers of Epaphras. For Christ's agony in prayer see Mt 26:42; Lu 22:44 .

Rom 15:31
That I may be delivered ( $\mathrm{\imath} v \alpha \rho v \sigma \theta \omega$ ). First aorist passive subjunctive of $\rho v o \mu \alpha$, old verb to rescue. This use of $t v a$ is the sub-final one after words of beseeching or praying. Paul foresaw trouble all the way to Jerusalem (Ac 20:23; 21:4,13 ).

May be acceptable to the saints ( $\varepsilon v \pi \rho о \sigma \delta \varepsilon \kappa \tau о \varsigma \tau о \varsigma ~ \alpha \gamma เ \circ \varsigma ~ \gamma \varepsilon \nu \eta \tau \alpha)$. "May become (second aorist middle subjunctive of $\gamma \iota v \circ \mu \alpha$ ) acceptable to the saints." The Judaizers would give him trouble. There was peril of a schism in Christianity.

## Rom 15:32

That ( $\mathfrak{v \alpha}$ ). Second use of $v \alpha$ in this sentence, the first one sub-final ( $\mathfrak{v \alpha} \rho v \sigma \theta \omega$ ), this one final with $\sigma v v a v a \pi \alpha v \sigma \omega \mu \alpha$, first aorist middle subjunctive of the double compound verb ovvavatavo $\mu \alpha$, late verb to rest together with, to refresh (avaravo as in Mt 11:28) one's spirit with ( $\sigma v v$ ), with the associative instrumental case $\nu \mu \nu \nu$ (with you), only here in the N.T.

Rom 15:33
The God of peace (o $\theta$ zoऽ $\tau \eta \varsigma \varepsilon เ \rho \eta \nu \eta \varsigma)$. One of the characteristics of God that Paul often mentions in benedictions (1Th 5:23; 2Th 3:16; 2Co 13:11; Php 4:9; Ro 16:20). Because of the "amen" here some scholars would make this the close of the Epistle and make chapter 16 a separate Epistle to the Ephesians. But the MSS. are against it. There is nothing strange at all in Paul's having so many friends in Rome though he had not yet been there himself. Rome was the centre of the world's life as Paul realized ( 1:15). All men sooner or later hoped to see Rome.

## Romans 16

Rom 16:1
I commend ( $\sigma \cup v / \sigma \tau \eta \mu$ ). The regular word for letters of commendation as in 2Co 3:1 ( $\sigma 0 \sigma \tau \alpha \tau ı \kappa \omega v \varepsilon \pi \iota \sigma \tau o \lambda \omega v$ ). See also Ro 3:5. So here verses 1,2 constitute Paul's recommendation of Phoebe, the bearer of the Epistle. Nothing else is known of her, though her name ( $\Phi \circ$ oß $\wp$ ) means bright or radiant.

Sister ( $\alpha \delta \varepsilon \lambda \varphi \eta v$ ). In Christ, not in the flesh.
Who is a servant of the church (ovoav $\delta \iota \alpha \kappa о v o v \tau \eta \varsigma \varepsilon \kappa \kappa \lambda \eta \sigma \omega \propto)$ ). The etymology of $\delta$ oakovos we have had repeatedly. The only question here is whether it is used in a general sense or in a technical sense as in Php 1:1; 1Ti 3:8-13. In favour of the technical sense of "deacon" or "deaconess" is the addition of "тŋऽ єкк $\downarrow \boldsymbol{\sigma} \boldsymbol{\alpha}$ " (of the church). In some sense Phoebe was a servant or minister of the church in Cenchreae. Besides, right in the midst of the discussion in 1Ti 3:8-13 Paul has a discussion of $\gamma$ voaıkac (verse 11) either as women as deaconesses or as the wives of deacons (less likely though possible). The Apostolic Constitutions has numerous allusions to deaconesses. The strict separation of the sexes made something like deaconesses necessary for baptism, visiting the women, etc. Cenchreae, as the eastern port of Corinth, called for much service of this kind. Whether the deaconesses were a separate organization on a par with the deacons we do not know nor whether they were the widows alluded to in $1 \mathrm{Ti} 5: 9 \mathrm{f}$.

Rom 16:2
Worthily of the saints ( $\alpha \xi \omega \omega \varsigma \tau \omega v \alpha \gamma \omega \omega v$ ). Adverb with the genitive as in Php 1:27 because the adjective $\alpha \xi$ וos is used with the genitive (Lu 3:8). "Receive her in a way worthy of the saints." This word $\alpha$ ү 10 , had come to be the accepted term for followers of Christ.

Assist her ( $\pi \alpha \rho \alpha \sigma \tau \eta \tau \varepsilon)$. Second aorist (intransitive) active subjunctive of $\pi \alpha \rho เ \sigma \tau \eta \mu$, to stand by, with the dative case ("beside her"), the very word used by Paul of the help of Jesus

In whatsoever matter ( $\varepsilon v \omega \pi \rho \alpha \gamma \mu \alpha \tau)$. Incorporation of the antecedent ( $\pi \rho \alpha \gamma \mu \alpha \tau)$ into the relative clause $(\omega)$.

She may have need of you ( $\alpha v \nu \mu \omega v \chi \rho \eta\llcorner\zeta \eta$ ). Indefinite relative clause with $\alpha v$ and the present subjunctive of $\chi \rho \eta \zeta \zeta \omega$ with genitive.

A succourer ( $\pi \rho \circ \sigma \tau \alpha \tau \iota \varsigma)$. Old and rare feminine form for the masculine $\pi \rho o \sigma \tau \alpha \tau \eta \varsigma$, from $\pi \rho o เ \sigma \tau \eta \mu$ ( $\pi \rho o \sigma \tau \alpha \tau \varepsilon \omega$, common, but not in the N.T.), here only in the N.T. and not in the papyri. The word illustrates her work as $\delta$ owkovov and is perhaps suggested here by $\pi \alpha \rho a \sigma \tau \eta \tau \varepsilon$, just before.

Of mine own self ( $\varepsilon \mu \circ v$ autov). "Of me myself."
Rom 16:3
In verses 3-16 Paul sends his greetings to various brethren and sisters in Rome.

Prisca and Aquila (Прıбкаv ка Аки $\lambda \alpha v$ ). This order always (Ас 18:18,26; 2Ti 4:19, and here) save in Ac 18:2; 1Co 16:19, showing that Prisca was the more prominent. Priscilla is a diminutive of Prisca, a name for women in the Acilian gens. She may have been a noble Roman lady, but her husband was a Jew of Pontus and a tent-maker by trade. They were driven from Rome by Claudius, came to Corinth, then to Ephesus, then back to Rome, and again to Ephesus. They were good travelling Christians.

My fellow-workers ( $\tau 0 \cup \varsigma ~ \sigma u v \varepsilon \rho \gamma o v \varsigma \mu \circ v$ ). Both in tent-making and in Christian service in Corinth and Ephesus.

Rom 16:4
Laid down their own necks ( $\tau \circ v \varepsilon \alpha v \tau \omega \nu \tau \rho \alpha \chi \varepsilon \lambda o v v \pi \varepsilon \theta \eta \kappa \alpha \nu$ ). First aorist active of vлотı $\theta \eta \mu$, old verb to place under (the axe of the executioner), only here in N.T. in this sense, though in 1 Ti 4:16 to suggest. If literal or figurative, the incident may be connected with the uproar created by Demetrius in Ephesus. Certainly Paul felt deep obligation toward them (see Ac 20:34).

Not only I (ovk $\varepsilon \gamma \omega \mu \circ \vee \circ \varsigma)$. Rather, "not I alone" (adjective $\mu \circ \vee \circ \varsigma)$. The Gentile churches also (great mission workers).

Rom 16:5
The church that is in their house ( $\tau \eta \nu \kappa \alpha \tau^{\prime}$ o七коv $\alpha \nu \tau \omega \nu \varepsilon \kappa \kappa \lambda \eta \sigma \iota \nu$ ). The early Christians had no church buildings. See also Ac 12:2; 1Co 16:19; Phm 1:2; Col 4:15. The Roman Christians had probably several such homes where they would meet.

Epainetus (Etaıvetov). Nothing is known of him except this item, "the first-fruits of Asia" ( $\alpha \pi \alpha \rho \chi \eta \tau \eta \varsigma$ Aбıaৎ). An early convert from the province of Asia. Cf. Ac 2:9; 1Co 16:15 (about Stephanus and Achaia).

Rom 16:6
Mary (Mapıav). Some MSS. have Mapıaر, the Hebrew form. The name indicates a Jewish Christian in Rome. Paul praises her toil. See Lu 5:5 .

Rom 16:7
Andronicus and Junias (Av $\delta \rho o v i \chi o v ~ к \alpha$ Iovviav). The first is a Greek name found even in the imperial household. The second name can be either masculine or feminine.

Kinsmen ( $\sigma v \gamma \gamma \varepsilon v \varepsilon \iota \varsigma$ ). Probably only fellow-countrymen as in 9:13.
Fellow-prisoners ( $\sigma v \nu \alpha ı \chi \mu \lambda \omega \tau \nu \varsigma)$. Late word and rare (in Lucian). One of Paul's frequent compounds with $\sigma v v$. Literally, fellow captives in war. Perhaps they had shared one of Paul's numerous imprisonments (2Co 11:23 ). In N.T. only here, Phm 1:23; Col 4:10.

Of note $(\varepsilon \pi \iota \sigma \eta \mu o)$. Stamped, marked $(\varepsilon \pi \sigma \eta \mu \alpha)$. Old word, only here and Mt 27:16 (bad sense) in N.T.

Among the apostles ( $\varepsilon v \tau$ тоぃ $\alpha \pi о \sigma \tau 0 \lambda о \iota)$ ). Naturally this means that they are counted among the apostles in the general sense true of Barnabas, James, the brother of Christ, Silas,
and others. But it can mean simply that they were famous in the circle of the apostles in the technical sense.

Who have been in Christ before me ( $о \kappa \alpha \pi \rho \circ \varepsilon \mu \circ v \gamma \varepsilon \gamma \circ v \alpha \nu \varepsilon v$ X $\rho \iota \sigma \tau \omega$ ). Andronicus and Junias were converted before Paul was. Note $\gamma \varepsilon \gamma o v a v$ (Koine form by analogy) instead of the usual second perfect active indicative form $\gamma \varepsilon \gamma \sigma v a \sigma \iota v$, which some MSS. have. The perfect tense notes that they are still in Christ.

Rom 16:8
Ampliatus ( $\mathrm{A} \mu \pi \lambda \iota \alpha \tau o v$ ). Some MSS. have a contracted form Amplias.
Rom 16:9
Urbanus (Ovpßavov). "A common Roman slave name found among members of the household" (Sanday and Headlam). A Latin adjective from urbs, city (city-bred).

Stachys ( $\Sigma \tau \alpha \chi \cup v)$. A Greek name, rare, but among members of the imperial household. It means a head or ear of grain (Mt 12:1).

Rom 16:10
Apelles $(A \pi \varepsilon \lambda \lambda \eta v)$. A name among Jews and a famous tragic actor also.
The approved ( $\tau 0 v \delta o \kappa \mu \circ v$ ). The tried and true (1Co 11:19; 2Co 10:18; 13:7).
Them which are of the household of Aristobulus ( $\tau о v \varsigma \varepsilon \kappa \tau \omega v$ Apıбтоßоv $\tau \circ v$ ). The younger Aristobulus was a grandson of Herod the Great. Lightfoot suggests that some of the servants in this household had become Christians, Aristobulus being dead.

Rom 16:11
Herodion (H $\varepsilon \rho \omega t \delta t \omega v \alpha$ ). Probably one belonging to the Herod family like that above.
Kinsman ( $\sigma v \gamma \gamma \varepsilon \vee \eta$ ). Merely fellow-countryman.
Them of the household of Narcissus ( $\tau о \cup \varsigma \varepsilon \kappa \tau \omega \nu$ Napкıббоv). "Narcissiani." There was a famous freedman of this name who was put to death by Agrippa. Perhaps members of his household.

Rom 16:12
Tryphaena and Tryphosa (Tpvpaıvav ка T $\rho v \varphi \omega \sigma \alpha v$ ). Probably sisters and possibly twins. Both names come from the same root, the verb $\tau \rho v \varphi a \omega$, to live luxuriously (Jas 5:5 ). Denney suggests "Dainty and Disdain."

Persis (חع $\rho \sigma \delta \delta \alpha)$. A freedwoman was so named. She is not Paul's "beloved," but the "beloved" of the whole church.

Rom 16:13
Rufus (Poupov). A very common slave name, possibly the Rufus of Mr 15:21. The word means "red."

The chosen ( $\tau 0 \nu \varepsilon \kappa \lambda \varepsilon \kappa \tau \circ v$ ). Not "the elect," but "the select."
And mine ( $\kappa \alpha \varepsilon \mu \circ v)$. Paul's appreciation of her maternal care once, not his real mother. Rom 16:14

Asyncritus (Aбuvкрıтov). There is an inscription of a freedman of Augustus with this name.

Phlegon ( $\Phi \lambda \varepsilon \gamma \circ \vee \tau \alpha)$. No light on this name till the historian of the second century A.D.

Hermes (Hع $\rho \mu \eta v)$. A very common slave name.
Patrobas (Пат $\rho \circ \beta \alpha v$ ). Name of a freedman of Nero, abbreviated form of Patrobius.
Hermas (Hep $\mu \alpha$ ). Not the author of the Shepherd of Hermas. Common as a slave name, shortened form of Hermagoras, Hermogenes, etc.

The brethren that are with them ( $\tau$ очц $\sigma u v$ autoıs $\alpha \delta \varepsilon \lambda$ ¢оuc). Perhaps a little church in the house of some one.

Rom 16:15
Philologus ( $Ф 1 \lambda 0 \lambda 0 \gamma o v)$. Another common slave name.
Julia (Iou入ıav). The commonest name for female slaves in the imperial household because of Julius Caesar. Possibly these two were husband and wife.

Nereus ( $\mathrm{N} \eta \rho \varepsilon \alpha$ ). Found in inscriptions of the imperial household. But the sister's name is not given. One wonders why.

Olympas (O $\lambda \nu \mu \pi \alpha v$ ). Possibly an abbreviation for Olympiodorus.
All the saints that are with them ( $\tau 0 \cup \varsigma ~ \sigma o v ~ \alpha \cup \tau o ı \varsigma ~ \pi \alpha v \tau \alpha \varsigma ~ \alpha \gamma ı o v \varsigma) . ~ P o s s i b l y ~ a n o t h e r ~$ church in the house. These unnamed, the "and others," constitute the great majority in all our churches.

Rom 16:16
With a holy kiss ( $\varepsilon v \varphi i \lambda \eta \mu \alpha \tau \alpha \gamma \omega)$. The near-east mode of salutation as hand-shaking in the Western. In China one shakes hands with himself. Men kissed men and women kissed women. See 1Th 5 26; 1Co 16:20; 2Co 13:12.

Rom 16:17
Mark ( $\sigma \kappa о \pi \varepsilon \iota \tau$ ). Keep an eye on so as to avoid. $\Sigma \kappa о \pi о \varsigma$ is the goal, $\sigma \kappa о \pi \varepsilon \omega$ means keeping your eye on the goal.
 and Ga 5:20 .
 it not only the objects of the participle but the relative clause $\eta v \nu \mu \varepsilon \iota \varsigma \varepsilon \mu \alpha \theta \varepsilon \tau \varepsilon$ (which you learned), a thoroughly Greek idiom.

Rom 16:18
But their own belly ( $\alpha \lambda \lambda \alpha \tau \eta \varepsilon \alpha \nu \tau \omega v \kappa о \lambda \lambda \alpha$ ). Dative case after $\delta o u \lambda \varepsilon v o v \sigma ı v$. A blunt phrase like the same picture in Php 3:19 "whose god is the belly," more truth than caricature in some cases.
 of $\lambda$ oүoc (speech), the first (from $\chi \rho \eta \sigma \tau o \varsigma$ and $\lambda о \gamma o \varsigma$ ) is very rare (here only in N.T.), the second is very common ( $\varepsilon v$ and $\lambda о \gamma \circ \varsigma$ ).

Beguile ( $\varepsilon \xi \alpha \pi \alpha \tau \omega \sigma \iota v)$. Present active indicative of the double compound verb $\varepsilon \xi \alpha \pi \alpha \tau \alpha \omega$ (see 2Th 2:3; 1Co 3:18).

Of the innocent ( $\tau \omega v \alpha \kappa \alpha \kappa \omega v$ ). Old adjective ( $\alpha$ privative and какоऽ), without evil or guile, in N.T. only here and Heb 7:26 (of Christ).

Rom 16:19
Is come abroad ( $\alpha \varphi \iota \kappa \varepsilon \tau 0$ ). Second aorist middle indicative of $\alpha \varphi \not \kappa v \varepsilon \circ \mu \alpha$, old verb, to come from, then to arrive at, only here in N.T.
 какоv). Old adjective from a privative and кع $\rho \alpha v v \nu \mu$, to mix. Unmixed with evil, unadulterated.

Rom 16:20
Shall bruise ( $\sigma \nu \nu \tau \rho \backslash \psi \varepsilon$ ). Future active of $\sigma u \nu \tau \rho \iota \beta \omega$, old verb, to rub together, to crush, to trample underfoot. Blessed promise of final victory over Satan by "the God of peace." "Shortly" ( $\varepsilon \nu \tau \alpha \chi \varepsilon$ ). As God counts time. Meanwhile patient loyalty from us.

Rom 16:21
Verses 21-23 form a sort of postscript with greetings from Paul's companions in Corinth. Timothy was with Paul in Macedonia (2Co 1:1 ) before he came to Corinth. Lucius may be the one mentioned in Ac 13:1 . Jason was once Paul's host (Ac 17:5-9 ) in Thessalonica, Sosipater may be the longer form of Sopater of Ac 20:4. They are all Paul's fellow-countrymen (ovүүعveıc).

Rom 16:22
I Tertius ( $\varepsilon \gamma \omega$ Tع $\rho \tau \iota o \varsigma)$. The amanuensis to whom Paul dictated the letter. See 2Th 3:17; 1Co 16:21; Col 4:18.

## Rom 16:23

Gaius my host (Гaıऽ o $\xi_{\varepsilon v o \varsigma ~}^{\mu} \boldsymbol{\mu} \mathbf{\nu}$ ). Perhaps the same Gaius of 1Co 1:14 (Ac 19:29; 20:4 ), but whether the one of 3Jo 1:1 we do not know. $\Xi \varepsilon v o \varsigma$ was a guest friend, and then either a stranger (Mt 25:35) or a host of strangers as here. This Gaius was plainly a man of some means as he was the host of all the church. Erastus (2Ti 4:20) was "the treasurer of the city" (o oккоvоноऽ $\tau \eta \varsigma \pi о \lambda \varepsilon \omega \varsigma$ ), one of the outstanding men of Corinth, the "steward" (housemanager) or city manager. See Lu 12:42; 16:1. He is probably the administrator of the city's property.

Quartus (Kovaptos). Latin name for fourth.
Rom 16:24
Is not genuine, not in Aleph A B C Coptic.
Rom 16:25

Verses 25-27 conclude the noble Epistle with the finest of Paul's doxologies.
To him that is able $(\tau \omega \delta \nu v \alpha \mu \varepsilon v \omega)$. Dative of the articular participle of $\delta v v \alpha \mu \alpha$. See similar idiom in Eph 3:20 .

To stablish ( $\sigma \tau \eta \rho \downharpoonright \xi \alpha$ ). First aorist active infinitive of $\sigma \tau \eta \rho!\zeta \omega$, to make stable.
According to my gospel ( $\kappa \alpha \tau \alpha$ to $\varepsilon v \alpha \gamma \gamma \varepsilon \lambda_{\iota} \circ v \mu \circ v$ ). Same phrase in 2:16; 2Ti 2:8 . Not a book, but Paul's message as here set forth.

The preaching ( $\tau 0 \kappa \eta \rho v \gamma \mu \alpha)$. The proclamation, the heralding.
Of Jesus Christ (I $\eta \sigma o v$ Xpıбтov). Objective genitive, "about Jesus Christ."
Revelation ( $\alpha \pi о к а \lambda \nu \psi \iota v$ ). "Unveiling."
Of the mystery ( $\mu v \sigma \tau \eta \rho \circ o v$ ). Once unknown, but now revealed.
Kept in silence ( $\sigma \varepsilon \sigma \gamma \gamma \eta \mu \varepsilon v o v$ ). Perfect passive participle of $\sigma \gamma \gamma \alpha \omega$, to be silent, state of silence.

Through times eternal (xpovoıs aı $\omega$ vioıs). Associative instrumental case, "along with times eternal" (Robertson, Grammar, p. 527). See 1Co 2:6,7,10 .

Rom 16:26
But now is manifested ( $\varphi \alpha v \varepsilon \rho \omega \theta \varepsilon v \tau o \varsigma ~ \delta \varepsilon v v v$ ). First aorist passive participle of بave $\rho o \omega$, to make plain, genitive case in agreement with $\mu v \sigma \tau \eta \rho \circ$.

By the scriptures of the prophets ( $\delta \iota \alpha \gamma \rho \alpha \varphi \omega \nu \pi \rho \circ \varphi \eta \tau \iota \kappa \omega v$ ). "By prophetic scriptures." Witnessed by the law and the prophets ( $3: 21$ ). This thread runs all through Romans.

According to the command of the eternal God ( $\kappa \alpha \tau^{\prime} \varepsilon \pi \iota \tau \alpha \gamma \eta \nu \tau o v \alpha \iota \omega v \iota o v \theta \varepsilon o v$ ). Paul conceives that God is in charge of the redemptive work and gives his orders (1:1-5; 10:15f. ). The same adjective at $\omega$ vıos is here applied to God that is used of eternal life and eternal punishment in Mt 25:46.

Unto obedience of faith ( $\varepsilon ı \varsigma ~ v \pi \alpha \kappa о \eta \nu \tau \eta \varsigma \pi \iota \sigma \tau \varepsilon \omega \varsigma)$. See 1:5.
Made known unto all the nations ( $\varepsilon \varsigma \varsigma \pi \alpha \nu \tau \alpha \tau \alpha \varepsilon \theta \nu \eta \gamma \nu \omega \rho \iota \sigma \theta \varepsilon v \tau o \varsigma)$. First aorist passive participle of $\gamma \nu \omega \rho \stackrel{\zeta}{\omega}$, still the genitive case agreeing with $\mu v \sigma \tau \eta \rho \circ 0 v$ in verse 25.

Rom 16:27
To the only wise God ( $\mu$ ov $\omega \operatorname{\sigma o\varphi \omega } \theta \varepsilon \omega)$. Better, "to God alone wise." See 1Ti 1:17 without $\sigma 0 \varphi \omega$.

To whom ( $\omega$ ). Some MSS. omit.

## FIRST CORINTHIANS

## FROM EPHESUS A.D. 54 OR 55

## BY WAY OF INTRODUCTION

It would be a hard-boiled critic today who would dare deny the genuineness of I Corinthians. The Dutch wild man, Van Manen, did indeed argue that Paul wrote no epistles if indeed he ever lived. Such intellectual banality is well answered by Whateley's Historic Doubts about Napolean Bonaparte which was so cleverly done that some readers were actually convinced that no such man ever existed, but is the product of myth and legend. Even Baur was compelled to acknowledge the genuineness of I and II Corinthians, Galatians and Romans (the Big Four of Pauline criticism). It is a waste of time now to prove what all admit to be true. Paul of Tarsus, the Apostle to the Gentiles, wrote I Corinthians.

We know where Paul was when he wrote the letter for he tells us in 1Co 16:8 : "But I will tarry at Ephesus until Pentecost." That was, indeed, his plan, but the uproar in Ephesus at the hands of Demetrius caused his departure sooner than he expected (Ac 18:21-20:1; 2Co 2:12f. ). But he is in Ephesus when he writes.

We know also the time of the year when he writes, in the spring before pentecost. Unfortunately we do not know the precise year, though it was at the close of his stay of three years (in round numbers) at Ephesus (Ac 20:31 ). Like all the years in Paul's ministry we have to allow a sliding scale in relation to his other engagements. One may guess the early spring of A.D. 54 or 55.

The occasion of the Epistle is made plain by numerous allusions personal and otherwise. Paul had arrived in Ephesus from Antioch shortly after the departure of Apollos for Corinth with letters of commendation from Priscilla and Aquila (Ac 18:28-19:1 ). It is not clear how long Apollos remained in Corinth, but he is back in Ephesus when Paul writes the letter and he has declined Paul's request to go back to Corinth (1Co 16:12). Some of the household of Chloe had heard or come from Corinth with full details of the factions in the church over Apollos and Paul, clearly the reason why Apollos left (1Co 1:10-12 ). Even Cephas nominally was drawn into it, though there is no evidence that Peter himself had come to Corinth. Paul had sent Timothy over to Corinth to put an end to the factions (1Co 4:17), though he was uneasy over the outcome (1Co 16:10f. ). This disturbance was enough of itself to call forth a letter from Paul. But it was by no means the whole story. Paul had already written a letter, now lost to us, concerning a peculiarly disgusting case of incest in the membership (1Co 5:9 ). They were having lawsuits with one another before heathen judges. Members of the church had written Paul a letter about marriage whether any or all should marry (1Co 7:1 ). They were troubled also whether it was right to eat meat that had been offered to idols in the heathen temples (1Co 8:1). Spiritual gifts of an unusual nature were manifested in Corinth and these were the occasion of a deal of trouble (1Co 12:1). The doctrine of the
resurrection gave much trouble in Corinth (1Co 15:12). Paul was interested in the collection for the poor saints in Jerusalem (1Co 16:1) and in their share in it. The church in Corinth had sent a committee (Stephanas, Fortunatus, Achaicus) to Paul in Ephesus. He hopes to come himself after passing through Macedonia (1Co 16:5f. ). It is possible that he had made a short visit before this letter (2Co 13:1), though not certain as he may have intended to go one time without going as he certainly once changed his plans on the subject (2Co 1:15-22 ). Whether Titus took the letter on his visit or it was sent on after the return of Timothy is not perfectly clear. Probably Timothy returned to Ephesus from Corinth shortly after the epistle was sent on, possibly by the committee who returned to Corinth (1Co 16:17), for Timothy and Erastus were sent on from Ephesus to Macedonia before the outbreak at the hands of Demetrius (Ac 19:22). Apparently Timothy had not fully succeeded in reconciling the factions in Corinth for Paul dispatched Titus who was to meet him at Troas as he went on to Macedonia. Paul's hurried departure from Ephesus (Ac 20:1) took him to Troas before Titus arrived and Paul's impatience there brought him to Macedonia where he did meet Titus on his return from Corinth (2Co 2:12f. ).

It is clear therefore that Paul wrote what we call I Corinthians in a disturbed state of mind. He had founded the church there, had spent two years there (Ac 18 ), and took pardonable pride in his work there as a wise architect (1Co 3:10) for he had built the church on Christ as the foundation. He was anxious that his work should abide. It is plain that the disturbances in the church in Corinth were fomented from without by the Judaizers whom Paul had defeated at the Jerusalem Conference (Ac 15:1-35; Ga 2:1-10 ). They were overwhelmed there, but renewed their attacks in Antioch (Ga 2:11-21). Henceforth throughout the second mission tour they are a disturbing element in Galatia, in Corinth, in Jerusalem. While Paul is winning the Gentiles in the Roman Empire to Christ, these Judaizers are trying to win Paul's converts to Judaism. Nowhere do we see the conflict at so white a heat as in Corinth. Paul finally will expose them with withering sarcasm (2Co 10-13) as Jesus did the Pharisees in Mt 23 on that last day in the temple. Factional strife, immorality, perverted ideas about marriage, spiritual gifts, and the resurrection, these complicated problems are a vivid picture of church life in our cities today. The discussion of them shows Paul's manysidedness and also the powerful grasp that he has upon the realities of the gospel. Questions of casuistry are faced fairly and serious ethical issues are met squarely. But along with the treatment of these vexed matters Paul sings the noblest song of the ages on love (chapter 1Co 13 ) and writes the classic discussion on the resurrection (chapter 1Co 15 ). If one knows clearly and fully the Corinthian Epistles and Paul's dealings with Corinth, he has an understanding of a large section of his life and ministry. No church caused him more anxiety than did Corinth (2Co 11:28).

Some good commentaries on I Corinthians are the following: On the Greek Bachmann in the Zahn Kommentar, Edwards, Ellicott, Findlay (Expositor's Greek Testament), Godet,

Goudge, Lietzmann (Handbuch zum N.T.), Lightfoot (chs. 1-7), Parry, Robertson and Plummer (Int. Crit.), Stanley, J. Weiss (Meyer Kommentar); on the English Dods (Exp. Bible), McFadyen, Parry, Ramsay, Rendall, F. W. Robertson, Walker (Reader's Comm.).

## 1 Corinthians 1

1Cor 1:1
Called to be an apostle ( $\kappa \lambda \eta \tau \circ \varsigma \alpha \pi о \sigma \tau о \lambda о \varsigma)$. Verbal adjective $\kappa \lambda \eta \tau \circ \varsigma$ from $\kappa \alpha \lambda \varepsilon \omega$, without $\varepsilon เ v a$, to be. Literally,
a called apostle (Ro 1:1), not so-called, but one whose apostleship is due not to himself or to men (Ga 1:1), but to God,
through the will of God ( $\delta \iota \alpha \theta \varepsilon \lambda \eta \mu \alpha \tau o \varsigma ~$ tov $\theta \varepsilon o v$ ). The intermediate ( $\delta \iota \alpha, \delta v o$, two) agent between Paul's not being Christ's apostle and becoming one was God's will $(\theta \varepsilon \lambda \eta \mu \alpha$, something willed of God), God's command (1Ti 1:1). Paul knows that he is not one of the twelve apostles, but he is on a par with them because, like them, he is chosen by God. He is an apostle of Jesus Christ or Christ Jesus (MSS. vary here, later epistles usually Christ Jesus). The refusal of the Judaizers to recognize Paul as equal to the twelve made him the more careful to claim his position. Bengel sees here Paul's denial of mere human authority in his position and also of personal merit: Namque mentione Dei excluditur auctoramentum humanum, mentione Voluntatis Dei, meritum Pauli.

Our brother (o $\alpha \delta \varepsilon \lambda \varphi \circ \varsigma)$. Literally, the brother, but regular Greek idiom for our brother. This Sosthenes, now with Paul in Ephesus, is probably the same Sosthenes who received the beating meant for Paul in Corinth (Ac 18:17). If so, the beating did him good for he is now a follower of Christ. He is in no sense a co-author of the Epistle, but merely associated with Paul because they knew him in Corinth. He may have been compelled by the Jews to leave Corinth when he, a ruler of the synagogue, became a Christian. See 1Th 1:1 for the mention of Silas and Timothy in the salutation. Sosthenes could have been Paul's amanuensis for this letter, but there is no proof of it.

1Cor 1:2
The church of God ( $\tau \eta \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$ tov $\theta \varepsilon o v$ ). Belonging to God, not to any individual or faction, as this genitive case shows. In 1Th 1:1 Paul wrote "the church of the Thessalonians in God" ( $\varepsilon v \theta \varepsilon \omega)$, but "the churches of God" in 1Th 2:14. See same idiom in 1Co 10:32; 11:16,22; 15:9; 2Co 1:1; Ga 1:13, etc.

Which is in Corinth ( $\tau \eta$ ova $\eta v$ Kopıv $\theta \omega$ ). See on Ac 13:1 for idiom. It is God's church even in Corinth, "laetum et ingens paradoxon" (Bengel). This city, destroyed by Mummius B.C. 146 , had been restored by Julius Caesar a hundred years later, B.C. 44 , and now after another hundred years has become very rich and very corrupt. The very word "to Corinthianize" meant to practise vile immoralities in the worship of Aphrodite (Venus). It was located on the narrow Isthmus of the Peloponnesus with two harbours (Lechaeum and Cenchreae). It had schools of rhetoric and philosophy and made a flashy imitation of the real culture of Athens. See Ac 18 for the story of Paul's work here and now the later developments and divisions in this church will give Paul grave concern as is shown in detail in I and II Corinthians.

All the problems of a modern city church come to the front in Corinth. They call for all the wisdom and statesmanship in Paul.

That are sanctified ( $\eta \gamma \mid \alpha \sigma \mu \varepsilon v o \iota s)$. Perfect passive participle of $\alpha \gamma ı \alpha \zeta \omega$, late form for $\alpha \gamma \iota \zeta \omega$, so far found only in the Greek Bible and in ecclesiastical writers. It means to make or to declare $\alpha \gamma \operatorname{lov}$ (from $\alpha \gamma o \varsigma$, awe, reverence, and this from $\alpha \zeta \omega$, to venerate). It is significant that Paul uses this word concerning the
called saints or
 they are sanctified
in Christ Jesus ( $\varepsilon \nu \mathrm{X} \rho \stackrel{\sigma \tau \omega}{ } \mathrm{I} \eta \sigma \circ v$ ). He is the sphere in which this act of consecration takes place. Note plural, construction according to sense, because $\varepsilon \kappa \kappa \lambda \eta \sigma \boldsymbol{\alpha}$ is a collective substantive.

With all that call upon ( $\sigma \cup v \tau \pi \sigma \sigma v$ toı $\varepsilon \pi ı \kappa \alpha \lambda о \nu \mu \varepsilon v o ı \varsigma)$. Associative instrumental case with $\sigma v v$ rather than $\kappa \alpha$ (and), making a close connection with "saints" just before and so giving the Corinthian Christians a picture of their close unity with the brotherhood everywhere through the common bond of faith. This phrase occurs in the LXX (Ge 12:8; Zec 13:9 ) and is applied to Christ as to Jehovah (2Th 1:7,9,12; Php 2:9,10 ). Paul heard Stephen pray to Christ as Lord (Ac 7:59). Here "with a plain and direct reference to the Divinity of our Lord" (Ellicott).

Their Lord and ours ( $\alpha \nu \tau \omega v \kappa \alpha \eta \mu \omega v$ ). This is the interpretation of the Greek commentators and is the correct one, an afterthought and expansion ( $\varepsilon \pi \alpha v o \rho \theta \omega \sigma \iota \varsigma)$ of the previous "our," showing the universality of Christ.

1Cor 1:3
Identical language of 2Th 1:2 save absence of $\eta \mu \omega \nu$ (our), Paul's usual greeting. See on 1Th 1:1.

1Cor 1:4
I thank my God ( $\varepsilon u \chi \alpha \rho \iota \sigma \tau \omega \tau \omega \theta \varepsilon \omega$ ). Singular as in Ro $1: 8$; Php 1:3; Phm 1:4, but plural in 1Th 1:2; Col 1:3. The grounds of Paul's thanksgivings in his Epistles are worthy of study. Even in the church in Corinth he finds something to thank God for, though in II Cor. there is no expression of thanksgiving because of the acute crisis in Corinth nor is there any in Galatians. But Paul is gracious here and allows his general attitude (always, $\pi \alpha v \tau о \tau \varepsilon$ ) concerning ( $\pi \varepsilon \rho$, around) the Corinthians to override the specific causes of irritation.

For the grace of God which was given to you in Christ Jesus ( $\varepsilon \pi \tau \eta \chi \alpha \rho ı \tau \tau 0 v$ $\theta \varepsilon o v$ $\tau \eta \delta o \theta \varepsilon \iota \sigma \eta \nu \mu \nu v \varepsilon v$ X $\rho \iota \sigma \tau \omega$ I $\eta \sigma o v$ ). Upon the basis of ( $\varepsilon \pi$ ) God's grace, not in general, but specifically given ( $\delta o \theta \varepsilon \iota \sigma \eta$, first aorist passive participle of $\delta \iota \delta \omega \mu$ ), in the sphere of ( $\varepsilon v$ as in verse 2) Christ Jesus.

1Cor 1:5

That (ot). Explicit specification of this grace of God given to the Corinthians. Paul points out in detail the unusual spiritual gifts which were their glory and became their peril (chapters 1Co 12-14).

Ye were enriched in him ( $\varepsilon \pi \lambda 0 v \tau \iota \sigma \eta \eta \tau \varepsilon \varepsilon \nu \alpha \cup \tau \omega$ ). First aorist passive indicative of $\pi \lambda$ outi $\zeta \omega$, old causative verb from $\pi \lambda$ ov $\tau \circ \varsigma$, wealth, common in Attic writers, dropped out for centuries, reappeared in LXX. In N.T. only three times and alone in Paul (1Co 1:5; 2Co 6:10,11 ). The Christian finds his real riches in Christ, one of Paul's pregnant phrases full of the truest mysticism.

In all utterance and all knowledge ( $\varepsilon v \pi \alpha \nu \tau \lambda \not \lambda \gamma \omega \kappa \alpha \pi \alpha \sigma \eta \gamma \nu \omega \sigma \varepsilon$ ). One detail in explanation of the riches in Christ. The outward expression $(\lambda o \gamma \omega)$ here is put before the inward knowledge ( $\gamma \nu \omega \sigma \varepsilon$ ) which should precede all speech. But we get at one's knowledge by means of his speech. Chapters 1Co 12-14 throw much light on this element in the spiritual gifts of the Corinthians (the gift of tongues, interpreting tongues, discernment) as summed up in 1Co 13:1,2, the greater gifts of 12:31. It was a marvellously endowed church in spite of their perversions.

1Cor 1:6
Even as ( $\kappa \alpha \theta \omega \varsigma$ ). In proportion as ( 1 Th 1:5) and so inasmuch as (Php 1:7; Eph 1:4).
 to or concerning Christ, the witness of Paul's preaching.

Was confirmed in you $(\varepsilon \beta \varepsilon \beta \alpha \omega \omega \theta \eta \varepsilon v \nu \mu \nu v)$. First aorist passive of $\beta \varepsilon \beta \alpha \iota \omega \omega$, old verb from $\beta \varepsilon \beta a \iota o s$ and that from $\beta \alpha \iota v \omega$, to make to stand, to make stable. These special gifts of the Holy Spirit which they had so lavishly received (ch. 1Co 12 ) were for that very purpose.

1Cor 1:7
So that ye come behind in no gift ( $\omega \sigma \tau \varepsilon \nu \mu \alpha \varsigma \mu \eta$ vбт $\varepsilon \rho \varepsilon เ \sigma \theta \alpha \varepsilon v \mu \eta \delta \varepsilon v \chi \alpha \rho เ \sigma \mu \alpha \tau$ ). Consecutive clause with $\omega \sigma \tau \varepsilon$ and the infinitive and the double negative. Come behind (vбтepeเซӨa) is to be late (vбтepoc), old verb seen already in Mr 10:21; Mt 19:20 . It is a wonderful record here recorded. But in 2Co 8:7-11; 9:1-7 Paul will have to complain that they have not paid their pledges for the collection, pledges made over a year before, a very modern complaint.

Waiting for the revelation ( $\alpha \pi \varepsilon \kappa \delta \varepsilon \chi \circ \mu \varepsilon v o v \varsigma \tau \eta \nu \alpha \pi о \kappa \alpha \lambda \nu \psi \tau v$ ). This double compound is late and rare outside of Paul (1Co 1:7; Ga 5:5; Ro 8:19,23,25; Php 3:20 ), 1Pe 3:20; Heb 9:28. It is an eager expectancy of the second coming of Christ here termed revelation like the eagerness in $\pi \rho o \sigma \delta \varepsilon \chi \circ \mu \varepsilon v o$ in Tit 2:13 for the same event. "As if that attitude of expectation were the highest posture that can be attained here by the Christian" (F.W. Robertson).

1Cor 1:8
Shall confirm ( $\beta \varepsilon \beta a \iota \omega \sigma \varepsilon$ ). Direct reference to the same word in verse 6 . The relative oऽ (who) points to Christ.

Unto the end ( $\varepsilon \omega \varsigma \tau \varepsilon \lambda o u \varsigma)$. End of the age till Jesus comes, final preservation of the saints.

That ye be unreproveable ( $\alpha v \varepsilon \gamma \kappa \lambda \eta$ тovc). Alpha privative and $\varepsilon \gamma \kappa \alpha \lambda \varepsilon \omega$, to accuse, old verbal, only in Paul in N.T. Proleptic adjective in the predicate accusative agreeing with v $\mu \mathrm{a} \varsigma$ (you) without $\omega \sigma \tau \varepsilon$ and the infinitive as in 1Th 3:13; 5:23; Php 3:21. "Unimpeachable, for none will have the right to impeach" (Robertson and Plummer) as Paul shows in Ro 8:33; Col 1:22,28 .

1Cor 1:9
God is faithful ( $\pi \iota \sigma \tau \circ \varsigma$ o $\theta \varepsilon \sigma \varsigma)$. This is the ground of Paul's confidence as he loves to say (1Th 5:24; 1Co 10:13; Ro 8:36; Php 1:16 ). God will do what he has promised.

Through whom ( $\delta \iota^{\prime}$ ov). God is the agent ( $\delta \iota^{\prime}$ ) of their call as in Ro 11:36 and also the ground or reason for their call ( $\delta \mathrm{I}^{\prime} \mathrm{ov}$ ) in Heb 2:10 .

Into the fellowship ( $\varepsilon \varsigma \varsigma \kappa \circ v \omega v \iota \alpha v$ ). Old word from коเv $\omega v \circ \varsigma$, partner for partnership, participation as here and 2Co 13:13f.; Php 2:1; 3:10 . Then it means fellowship or intimacy as in Ac 2:42; Ga 2:9; 2Co 6:14; 1Jo 1:3,7. And particularly as shown by contribution as in 2Co 8:4; 9:13; Php 1:5 . It is high fellowship with Christ both here and hereafter.

1Cor 1:10
Now I beseech you ( $\pi \alpha \rho \alpha \kappa \alpha \lambda \omega \delta \varepsilon \nu \mu \alpha \varsigma)$. Old and common verb, over 100 times in N.T., to call to one's side. Corresponds here to $\varepsilon v \chi \alpha \rho \circ \sigma \tau \omega$,

I thank, in verse 4. Direct appeal after the thanksgiving.
Through the name ( $\delta \iota \alpha$ tov ovoнatoc). Genitive, not accusative (cause or reason), as the medium or instrument of the appeal (2Co 10:1; Ro 12:1; 15:30).

That ( $\mathrm{v} \alpha$ ). Purport (sub-final) rather than direct purpose, common idiom in Koine (Robertson, Grammar, pp.991-4) like Mt 14:36. Used here with $\lambda \varepsilon \gamma \eta \tau \varepsilon, \eta \iota, \eta \tau \varepsilon$ катпр $\rho \iota \sigma \mu \varepsilon v o$, though expressed only once.

All speak ( $\lambda \varepsilon \gamma \eta \tau \varepsilon \pi \alpha \nu \tau \varepsilon \varsigma)$. Present active subjunctive, that ye all keep on speaking. With the divisions in mind. An idiom from Greek political life (Lightfoot). This touch of the classical writers argues for Paul's acquaintance with Greek culture.

There be no divisions among you ( $\mu \eta \eta \varepsilon v \nu \mu \nu \sigma \sigma \iota \sigma \mu \alpha \tau \alpha$ ). Present subjunctive, that divisions may not continue to be (they already had them). Negative statement of preceding idea. $\Sigma \chi ı \sigma \mu \alpha$ is from $\sigma \chi\llcorner\zeta \omega$, old word to split or rend, and so means a rent (Mt 9:16; Mr 2:21 ). Papyri use it for a splinter of wood and for ploughing. Here we have the earliest instance of its use in a moral sense of division, dissension, see also 1Co 11:18 where a less complete change than aıpعбєıऽ; 12:25; Joh 7:43 (discord); 9:16; 10:19 . "Here, faction, for which the classical word is $\sigma \tau \alpha \sigma \iota \varsigma$ division within the Christian community" (Vincent). These divisions were over the preachers ( 1:12-4:21), immorality ( $5: 1-13$ ), going to law before the heathen ( 6:1-11), marriage ( 7:1-40), meats offered to idols (1Co 8-10), conduct of women in church
( 11:1-16), the Lord's Supper ( 11:17-34), spiritual gifts (1Co 12-14), the resurrection (1Co 15 ).

But that ye be perfected together ( $\eta \tau \varepsilon \delta \varepsilon \kappa \alpha \tau \eta \rho \tau \tau \sigma \mu \varepsilon v o$ ). Periphrastic perfect passive subjunctive. See this verb in Mt 4:21 (Mr 1:19) for mending torn nets and in moral sense already in 1Th 3:10. Galen uses it for a surgeon's mending a joint and Herodotus for composing factions. See 2Co 13:11; Ga 6:1 .

Mind (vo),
judgment ( $\gamma \nu \omega \mu \eta$ ). "Of these words vouc denotes the frame or state of mind, $\gamma \nu \omega \mu \eta$ the judgment, opinion or sentiment, which is the outcome of vous" (Lightfoot).

1Cor 1:11
For it hath been signified unto me ( $\varepsilon \delta \eta \lambda \omega \theta \eta \gamma \quad \rho \rho \mu \mathrm{o}$ ). First aorist passive indicative of $\delta \eta \lambda o \omega$ and difficult to render into English. Literally, It was signified to me.

By them of Chloe (v $\tau о \tau \omega \nu \mathrm{X} \lambda о \eta \varsigma)$. Ablative case of the masculine plural article $\tau \omega v$, by the (folks) of Chloe (genitive case). The words "which are of the household" are not in the Greek, though they correctly interpret the Greek, "those of Chloe." Whether the children, the kinspeople, or the servants of Chloe we do not know. It is uncertain also whether Chloe lived in Corinth or Ephesus, probably Ephesus because to name her if in Corinth might get her into trouble (Heinrici). Already Christianity was working a social revolution in the position of women and slaves. The name

Chloe means tender verdure and was one of the epithets of Demeter the goddess of agriculture and for that reason Lightfoot thinks that she was a member of the freedman class like Phoebe (Ro 16:1), Hermes (Ro 16:14), Nereus (Ro 16:15). It is even possible that Stephanas, Fortunatus, Achaicus (1Co 16:17) may have been those who brought Chloe the news of the schisms in Corinth.

Contentions ( $\varepsilon \rho \iota \delta \varepsilon \varsigma)$. Unseemly wranglings (as opposed to discussing, $\delta \iota \alpha \lambda \varepsilon \gamma \rho \mu \alpha$ ) that were leading to the
schisms . Listed in works of the flesh (Ga 5:19f. ) and the catalogues of vices (2Co 12:20; Ro 1:19f.; 1Ti 6:4).

1Cor 1:12
Now this I mean ( $\lambda \varepsilon \gamma \omega \delta \varepsilon$ touto). Explanatory use of $\lambda \varepsilon \gamma \omega$. Each has his party leader.
 in Codex Bezae for Ac 18:24. See on Acts for discussion of this "eloquent Alexandrian" (Ellicott), whose philosophical and oratorical preaching was in contrast "with the studied plainness" of Paul (1Co 2:1; 2Co 10:10 ). People naturally have different tastes about styles of preaching and that is well, but Apollos refused to be a party to this strife and soon returned to Ephesus and refused to go back to Corinth (1Co 16:12). Х $\eta \varphi \alpha$ is the genitive of Х $\eta \varphi \alpha \varsigma$, the Aramaic name given Simon by Jesus (Joh 1:42 ), Пعт $\rho o$ ç in Greek. Except in Ga 2:7,8 Paul calls him Cephas. He had already taken his stand with Paul in the Jerusalem Conference
(Ac 15:7-11; Ga 2:7-10 ). Paul had to rebuke him at Antioch for his timidity because of the Judaizers (Ga 2:11-14 ), but, in spite of Baur's theory, there is no evidence of a schism in doctrine between Paul and Peter. If $2 \mathrm{Pe} 3: 15 \mathrm{f}$. be accepted as genuine, as I do, there is proof of cordial relations between them and 1Co 9:5 points in the same direction. But there is no evidence that Peter himself visited Corinth. Judaizers came and pitted Peter against Paul to the Corinthian Church on the basis of Paul's rebuke of Peter in Antioch. These Judaizers made bitter personal attacks on Paul in return for their defeat at the Jerusalem Conference. So a third faction was formed by the use of Peter's name as the really orthodox wing of the church, the gospel of the circumcision.

And I of Christ ( $\varepsilon \gamma \omega \delta \varepsilon$ Xpıбтov). Still a fourth faction in recoil from the partisan use of Paul, Apollos, Cephas, with "a spiritually proud utterance" (Ellicott) that assumes a relation to Christ not true of the others. "Those who used this cry arrogated the common watchword as their peculium" (Findlay). This partisan use of the name of Christ may have been made in the name of unity against the other three factions, but it merely added another party to those existing. In scouting the names of the other leaders they lowered the name and rank of Christ to their level.

1Cor 1:13
Is Christ divided? ( $\mu \varepsilon \mu \varepsilon \rho \iota \sigma \tau \alpha$ o X $\quad$ เбтoб;). Perfect passive indicative, Does Christ stand divided? It is not certain, though probable, that this is interrogative like the following clauses. Hofmann calls the assertory form a "rhetorical impossibility." The absence of $\mu \eta$ here merely allows an affirmative answer which is true. The fourth or Christ party claimed to possess Christ in a sense not true of the others. Perhaps the leaders of this Christ party with their arrogant assumptions of superiority are the false apostles, ministers of Satan posing as angels of light (2Co 11:12-15).
 is demanded by $\mu \eta$. Paul shows his tact by employing himself as the illustration, rather than Apollos or Cephas. Probably $v \pi \varepsilon \rho$, over, in behalf of, rather than $\pi \varepsilon \rho$ (concerning, around) is genuine, though either makes good sense here. In the Koine $v \pi \varepsilon \rho$ encroaches on $\pi \varepsilon \rho$ as in 2Th 2:1.

Were ye baptized into the name of Paul? ( $\varepsilon \iota \varsigma ~ \tau о ~ о v o \mu \alpha ~ П а u \lambda о v ~ \varepsilon \beta \alpha \pi \tau \iota \sigma \theta \eta \tau \varepsilon ;) . ~ I t ~ i s ~$ unnecessary to say
into for $\varepsilon$ וֹ rather than
in since $\varepsilon \iota \varsigma$ is the same preposition originally as $\varepsilon v$ and both are used with $\beta \alpha \pi \tau \iota \zeta \omega$ as in Ac 8:16; 10:48 with no difference in idea (Robertson, Grammar, p. 592). Paul evidently knows the idea in Mt 28:19 and scouts the notion of being put on a par with Christ or the Trinity. He is no rival of Christ. This use of ovo $\mu$ a for the person is not only in the LXX, but the papyri, ostraca, and inscriptions give numerous examples of the name of the king
or the god for the power and authority of the king or god (Deissmann, Bible Studies, pp. 146ff., 196ff.; Light from the Ancient East, p. 121).

1Cor 1:14
I thank God $(\varepsilon v \chi \alpha \rho ı \sigma \tau \omega \tau \omega \theta \varepsilon \omega)$. See verse 4 , though uncertain if $\tau \omega \theta \varepsilon \omega$ is genuine here.

Save Crispus and Gaius ( $\varepsilon \mu \eta$ К $\rho \iota \sigma \pi о v \kappa \alpha \Gamma \alpha \iota \nu$ ). Crispus was the ruler of the synagogue in Corinth before his conversion (Ac 18:8), a Roman cognomen, and Gaius a Roman praenomen, probably the host of Paul and of the whole church in Corinth (Ro 16:23), possibly though not clearly the hospitable Gaius of 3 Jo 1:5,6. The prominence and importance of these two may explain why Paul baptized them.

1Cor 1:15
Lest any man should say (ıva $\mu \eta \tau \iota \varsigma \varepsilon \iota \pi \eta)$. Certainly sub-final $\iota v \alpha$ again or contemplated result as in 7:29; Joh 9:2. Ellicott thinks that already some in Corinth were laying emphasis on the person of the baptizer whether Peter or some one else. It is to be recalled that Jesus himself baptized no one (Joh 4:2 ) to avoid this very kind of controversy. And yet there are those today who claim Paul as a sacramentalist, an impossible claim in the light of his words here.

1Cor 1:16
Also the household of Stephanas ( $\kappa \alpha$ тоv $\Sigma \tau \varepsilon \varphi \alpha \nu \alpha$ оькоv). Mentioned as an afterthought. Robertson and Plummer suggest that Paul's amanuensis reminded him of this case. Paul calls him a first-fruit of Achaia (1Co 16:15 ) and so earlier than Crispus and he was one of the three who came to Paul from Corinth ( 16:17), clearly a family that justified Paul's personal attention about baptism.

Besides ( $\lambda_{o \iota \pi}$ v). Accusative of general reference, "as for anything else." Added to make clear that he is not meaning to omit any one who deserves mention. See also $1 \mathrm{Th} 4: 1 ; 1 \mathrm{Co}$ 4:2;2Co 13:11; 2Ti 4:8. Ellicott insists on a sharp distinction from $\tau$ र $\lambda o t \pi o v$ "as for the rest" (2Th 3:1; Php 3:1; 4:8; Eph 6:10). Paul casts no reflection on baptism, for he could not with his conception of it as the picture of the new life in Christ (Ro 6:2-6 ), but he clearly denies here that he considers baptism essential to the remission of sin or the means of obtaining forgiveness.

1Cor 1:17
For Christ sent me not to baptize (ov $\gamma \alpha \rho \alpha \pi \varepsilon \sigma \tau \varepsilon ı \lambda \varepsilon \nu \mu \varepsilon$ X $\rho \iota \sigma \tau о \varsigma \beta \alpha \pi \tau \iota \zeta \varepsilon \iota \nu)$. The negative ov goes not with the infinitive, but with $\alpha \pi \varepsilon \sigma \tau \varepsilon \downarrow \lambda \nu$ (from $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$, $\alpha \pi о \sigma \tau \circ \lambda \circ \varsigma$, apostle).

For Christ did not send me to be baptizer (present active infinitive, linear action) like John the Baptist.

But to preach the gospel ( $\alpha \lambda \lambda \alpha \varepsilon v a \gamma \gamma \varepsilon \lambda_{l} \zeta \varepsilon \sigma \theta \alpha$ ). This is Paul's idea of his mission from Christ, as Christ's apostle, to be
a gospelizer . This led, of course, to baptism, as a result, but Paul usually had it done by others as Peter at Caesarea ordered the baptism to be done, apparently by the six brethren with him (Ac 10:48). Paul is fond of this late Greek verb from eva $\gamma \gamma \varepsilon \lambda \iota o v$ and sometimes uses both verb and substantive as in 1Co 15:1 "the gospel which I gospelized unto you."

Not in wisdom of words (ouk $\varepsilon v \sigma \circ \varphi ı \alpha \lambda o \gamma o v)$. Note $o v$, not $\mu \eta$ (the subjective negative), construed with $\alpha \pi \varepsilon \sigma \tau \varepsilon \iota \lambda \varepsilon \nu$ rather than the infinitive. Not in wisdom of speech (singular). Preaching was Paul's forte, but it was not as a pretentious philosopher or professional rhetorician that Paul appeared before the Corinthians (1Co 2:1-5 ). Some who followed Apollos may have been guilty of a fancy for external show, though Apollos was not a mere performer and juggler with words. But the Alexandrian method as in Philo did run to dialectic subtleties and luxuriant rhetoric (Lightfoot).
 Negative purpose ( $t v \alpha \mu \eta$ ) with first aorist passive subjunctive, effective aorist, of $\kappa \varepsilon v o \omega$, old verb from $\kappa \varepsilon v o \varsigma$, to make empty. In Paul's preaching the Cross of Christ is the central theme. Hence Paul did not fall into the snare of too much emphasis on baptism nor into too little on the death of Christ. "This expression shows clearly the stress which St. Paul laid on the death of Christ, not merely as a great moral spectacle, and so the crowning point of a life of self-renunciation, but as in itself the ordained instrument of salvation" (Lightfoot).

1Cor 1:18
For the word of the cross (o $\lambda о \gamma o \varsigma \gamma \alpha \rho$ o $\tau o v \sigma \tau \alpha v \rho o u)$. Literally, "for the preaching (with which I am concerned as the opposite of
wisdom of word in verse 17) that (repeated article 0 , almost demonstrative) of the cross." "Through this incidental allusion to preaching St. Paul passes to a new subject. The discussions in the Corinthian Church are for a time forgotten, and he takes the opportunity of correcting his converts for their undue exaltation of human eloquence and wisdom" (Lightfoot).

To them that are perishing ( $\tau о \iota \varsigma \mu \varepsilon \nu \alpha \pi \sigma \lambda \lambda \nu \mu \varepsilon v o \iota \varsigma)$. Dative of disadvantage (personal interest). Present middle participle is here timeless, those in the path to destruction (not annihilation. See 2Th 2:10 ). Cf. 2Co 4:3 .

Foolishness ( $\mu \omega \rho(\alpha)$. Folly. Old word from $\mu \omega \rho o \varsigma$, foolish. In N.T. only in 1 Co 1:18,21,23; 2:14; 3:19.

But unto us which are being saved ( $\tau$ oıs $\sigma \omega \zeta$ о $\omega \varepsilon v o \iota \varsigma ~ \eta \mu v \nu$ ). Sharp contrast to those that are perishing and same construction with the articular participle. No reason for the change of pronouns in English. This present passive participle is again timeless. Salvation is described by Paul as a thing done in the past, "we were saved" (Ro 8:24), as a present state, "ye have been saved" (Ep 2:5), as a process, "ye are being saved" (1Co 15:2), as a future result, "thou shalt be saved" (Ro 10:9).

The power of God ( $\delta v v a \mu \iota \varsigma \theta \varepsilon o v)$. So in Ro 1:16. No other message has this dynamite of God (1Co 4:20). God's power is shown in the preaching of the Cross of Christ through all the ages, now as always. No other preaching wins men and women from sin to holiness or can save them. The judgment of Paul here is the verdict of every soul winner through all time.

1Cor 1:19
I will destroy $(\alpha \pi \sigma \lambda \omega)$. Future active indicative of $\alpha \pi \sigma \lambda \lambda \nu \mu$. Attic future for $\alpha \pi \sigma \lambda \varepsilon \sigma \omega$. Quotation from Isa 29:14 (LXX). The failure of worldly statesmanship in the presence of Assyrian invasion Paul applies to his argument with force. The wisdom of the wise is often folly, the understanding of the understanding is often rejected. There is such a thing as the ignorance of the learned, the wisdom of the simple-minded. God's wisdom rises in the Cross sheer above human philosophizing which is still scoffing at the Cross of Christ, the consummation of God's power.

1Cor 1:20
Where is the wise? Where is the scribe? Where is the disputer of this world? (Поv
 without exact quotation. The sudden retreat of Sennacherib with the annihilation of his officers. "On the tablet of Shalmaneser in the Assyrian Gallery of the British Museum there is a surprisingly exact picture of the scene described by Isaiah" (Robertson and Plummer). Note the absence of the Greek article in each of these rhetorical questions though the idea is clearly definite. Probably бочос refers to the Greek philosopher, $\gamma \rho \alpha \mu \mu \alpha \tau \cup \varsigma$ to the Jewish scribe and $\sigma 0 v \zeta \eta \tau \eta \tau \eta \varsigma$ suits both the Greek and the Jewish disputant and doubter (Ac 6:9; 9:29; 17:18; 28:29). There is a note of triumph in these questions. The word $\sigma \cup v\lceil\eta \tau \eta \tau \eta \varsigma$ occurs here alone in the N.T. and elsewhere only in Ignatius, Eph. 18 quoting this passage, but the papyri give the verb $\sigma \cup v \zeta \eta \tau \varepsilon \omega$ for disputing (questioning together).

Hath not God made foolish? (ouर $\varepsilon \mu \omega \rho a v \varepsilon v$ o $\theta \varepsilon o \sigma ;$ ). Strong negative form with aorist active indicative difficult of precise translation, "Did not God make foolish?" The old verb $\mu \omega \rho \alpha \iota v \omega$ from $\mu \omega \rho o \varsigma$, foolish, was to be foolish, to act foolish, then to prove one foolish as here or to make foolish as in Ro 1:22. In Mt 5:13; Lu 14:34 it is used of salt that is tasteless.

World (коб $\mu \circ v$ ). Synonymous with $\alpha \omega \nu$ (age), orderly arrangement, then the nonChristian cosmos.

1Cor 1:21
Seeing that ( $\varepsilon \pi \varepsilon \delta \delta \eta$ ). Since ( $\varepsilon \pi \varepsilon$ and $\delta \eta$ ) with explanatory $\gamma \alpha \rho$.
Through its wisdom ( $\delta \iota \alpha \tau \eta \varsigma \sigma о \varphi ı \alpha \varsigma$ ). Article here as possessive. The two wisdoms contrasted.

Knew not God (ovk $\varepsilon \gamma v \omega$ ). Failed to know, second aorist (effective) active indicative of $\gamma i v \omega \sigma \kappa \omega$, solemn dirge of doom on both Greek philosophy and Jewish theology that failed to know God. Has modern philosophy done better? There is today even a godless theology
(Humanism). "Now that God's wisdom has reduced the self-wise world to ignorance" (Findlay).

Through the foolishness of the preaching ( $\delta ı \alpha \tau \eta \varsigma \mu \omega \rho\llcorner\varsigma ~ \tau о v ~ к \eta \rho v \gamma \mu \alpha \tau о \varsigma) . ~ P e r h a p s ~$ "proclamation" is the idea, for it is not к $\boldsymbol{\rho \cup \xi \longleftarrow \varsigma , ~ t h e ~ a c t ~ o f ~ h e r a l d i n g , ~ b u t ~ к \eta \rho \cup \gamma \mu \alpha , ~ t h e ~ m e s s a g e ~}$ heralded or the proclamation as in verse 23 . The metaphor is that of the herald proclaiming the approach of the king (Mt 3:1; 4:17). See also кприүна in 1Co 2:4; 2Ti 4:17. The proclamation of the Cross seemed foolishness to the wiseacres then (and now), but it is consummate wisdom, God's wisdom and good-pleasure ( $\varepsilon v \delta o \kappa \eta \sigma \alpha v$ ). The foolishness of preaching is not the preaching of foolishness.

To save them that believe ( $\sigma \omega \sigma \alpha$ тovৎ $\pi \iota \sigma \tau \varepsilon v o v \tau \alpha \varsigma$ ). This is the heart of God's plan of redemption, the proclamation of salvation for all those who trust Jesus Christ on the basis of his death for $\sin$ on the Cross. The mystery-religions all offered salvation by initiation and ritual as the Pharisees did by ceremonialism. Christianity reaches the heart directly by trust in Christ as the Saviour. It is God's wisdom.

1Cor 1:22
Seeing that ( $\varepsilon \pi \varepsilon \iota \delta \eta$ ). Resumes from verse 21 . The structure is not clear, but probably verses 23,24 form a sort of conclusion or apodosis to verse 22 the protasis. The resumptive, almost inferential, use of $\delta \varepsilon$ like $\alpha \lambda \lambda \alpha$ in the apodosis is not unusual.

Ask for signs ( $\sigma \eta \mu \varepsilon \iota \alpha$ aıтovaıv). The Jews often came to Jesus asking for signs (Mt 12:38; 16:1; Joh 6:30 ).

Seek after wisdom ( $\sigma о \varphi ı \propto \vee \zeta \eta \tau 0 v \sigma ı)$ ). "The Jews claimed to possess the truth: the Greeks were seekers, speculators" (Vincent) as in Ac 17:23 .

1Cor 1:23
 Grammatically stated as a partial result ( $\delta \varepsilon$ ) of the folly of both Jews and Greeks, actually in sharp contrast. We proclaim, "we do not discuss or dispute" (Lightfoot). Christ (Messiah) as crucified, as in 2:2; Ga 3:1, "not a sign-shower nor a philosopher" (Vincent). Perfect passive participle of $\sigma \tau \alpha 0 \rho o \omega$.

Stumbling-block ( $\sigma \kappa \alpha v \delta \alpha \lambda o v$ ). Papyri examples mean trap or snare which here tripped the Jews who wanted a conquering Messiah with a world empire, not a condemned and crucified one (Mt 27:42; Lu 24:21).

Foolishness ( $\mu \omega \rho \stackrel{\alpha}{ })$ ). Folly as shown by their conduct in Athens (Ac 17:32).
1Cor 1:24
But to them that are called (avтoıৎ $\delta \varepsilon$ тоı $\kappa \lambda \eta \tau о \iota \varsigma)$. Dative case, to the called themselves.

Christ (Xpıбтov). Accusative case repeated, object of кŋ $\rho$ иббон $\mu v$, both
the power of God $(\theta \varepsilon o v \delta \nu v a \mu v)$ and
the wisdom of God ( $\theta$ عov $\sigma \circ \varphi ı \alpha v$ ). No article, but made definite by the genitive. Christ crucified is God's answer to both Jew and Greek and the answer is understood by those with open minds.

1Cor 1:25
The foolishness of God ( $\tau 0 \mu \omega \rho \circ v$ тov $\theta \varepsilon o v$ ). Abstract neuter singular with the article, the foolish act of God (the Cross as regarded by the world).

Wiser than men ( $\sigma \circ \varphi \omega \tau \varepsilon \rho \circ \vee \tau \omega v \alpha v \theta \rho \omega \pi \omega v$ ). Condensed comparison, wiser than the wisdom of men. Common Greek idiom (Mt 5:20; Joh 5:36 ) and quite forcible, brushes all men aside.

The weakness of God ( $\tau 0 \alpha \sigma \theta \varepsilon v \varepsilon \varsigma ~ \tau o v ~ \theta \varepsilon o v)$ ). Same idiom here,
the weak act of God, as men think,
is stronger (เซ $\chi \cup \rho \circ \tau \varepsilon \rho \circ \vee$ ). The Cross seemed God's defeat. It is conquering the world and is the mightiest force on earth.

1Cor 1:26
Behold ( $\beta \lambda \varepsilon \pi \varepsilon \tau \varepsilon$ ). Same form for imperative present active plural and indicative. Either makes sense as in Joh 5:39 epauvate and 14:1 тюбтєบรтє.

Calling ( $\kappa \lambda \eta \sigma \iota v$ ). The act of calling by God, based not on the external condition of those called ( $\kappa \lambda \eta \tau$ o, verse 2 ), but on God's sovereign love. It is a clinching illustration of Paul's argument, an argumentum ad hominen.

How that (oт). Explanatory apposition to $\kappa \lambda \eta \sigma \iota v$.
After the flesh (ката $\sigma \alpha \rho \kappa \alpha)$. According to the standards of the flesh and to be used not only with $\sigma о \varphi 0$ (wise, philosophers), but also $\delta$ vvato (men of dignity and power), عuүعveıৎ (noble, high birth), the three claims to aristocracy (culture, power, birth).

Are called. Not in the Greek, but probably to be supplied from the idea in $\kappa \lambda \eta \sigma \iota v$.
1Cor 1:27
God chose ( $\varepsilon \xi \varepsilon \lambda \varepsilon \xi \alpha \tau$ o o $\theta \varepsilon o \varsigma)$. First aorist middle of $\varepsilon \kappa \lambda \varepsilon \gamma \omega$, old verb to pick out, to choose, the middle for oneself. It expands the idea in $\kappa \lambda \eta \sigma \iota v$ (verse 26). Three times this solemn verb occurs here with the purpose stated each time. Twice the same purpose is expressed,
that he might put to shame (ıva катаı $\sigma \chi v \vee \eta$, first aorist active subjunctive with $\imath v \alpha$ of old verb $\kappa \alpha \tau \alpha ı \sigma \chi \cup v \omega$, perfective use of $\kappa \alpha \tau \alpha)$. The purpose in the third example is
that he might bring to naught (ıva кат $\rho \gamma \eta \sigma \eta$, make idle, $\alpha \rho \gamma \circ \varsigma$, rare in old Greek, but frequent in Paul). The contrast is complete in each paradox:
the foolish things ( $\tau \alpha \mu \omega \rho \alpha$ ),
the wild men ( tous бо甲ou¢);
the weak things ( $\tau \alpha \alpha \sigma \theta \varepsilon v \eta$ ),
the strong things ( $\tau \alpha \mid \sigma \chi \cup \rho \alpha$ );
the things that are not ( $\tau \alpha \mu \eta \mathrm{ov} \tau \alpha$ ),
and that are despised ( $\tau \alpha \varepsilon \xi \circ 0 \cup \varepsilon v \eta \mu \varepsilon v a$, considered nothing, perfect passive participle of $\varepsilon \xi \circ v \theta \varepsilon v \varepsilon \omega)$,
the things that are ( $\tau \alpha \mathrm{ov} \tau \alpha$ ). It is a studied piece of rhetoric and powerfully put.
1Cor 1:29
That no flesh should glory before God ( $о \pi \omega \varsigma \mu \eta \kappa \alpha u \chi \eta \sigma \eta \tau \alpha \pi \alpha \sigma \alpha \sigma \alpha \rho \xi \varepsilon v \omega \pi \iota \circ v$ тov $\theta \varepsilon o v)$. This is the further purpose expressed by o $\pi \omega \varsigma$ for variety and appeals to God's ultimate choice in all three instances. The first aorist middle of the old verb кauर $\alpha \mu \alpha$, to boast, brings out sharply that not a single boast is to be made. The papyri give numerous examples of $\varepsilon v \omega \pi \iota \circ$ as a preposition in the vernacular, from adjective $\varepsilon v-\omega \pi \iota \rho$, in the eye of God. One should turn to 2Co 4:7 for Paul's further statement about our having this treasure in earthen vessels that the excellency of the power may be of God and not of us.

1Cor 1:30
Of him ( $\varepsilon \xi$ avtou). Out of God. He chose you.
In Christ Jesus ( $\varepsilon v$ X $\rho \iota \sigma \tau \omega$ I $\eta \sigma o v$ ). In the sphere of Christ Jesus the choice was made. This is God's wisdom.

Who was made unto us wisdom from God ( $о \varsigma \varepsilon \gamma \varepsilon v \eta \theta \eta$ боюıа $\eta \mu \imath \nu$ ало $\theta \varepsilon о v$ ). Note $\varepsilon \gamma \varepsilon v \eta \theta \eta$, became (first aorist passive and indicative), not $\eta \nu$, was, the Incarnation, Cross, and Resurrection. Christ is the wisdom of God (Co 2:2f. ) "both righteousness and sanctification and redemption" ( $\delta \iota \alpha \propto \circ \sigma \nu v \eta \tau \varepsilon \kappa \alpha ~ \alpha ү \iota \sigma \mu \mu \varsigma \varsigma \alpha \alpha \pi о \lambda \nu \tau \rho \omega \sigma \iota \varsigma)$, as is made plain by
 shown to be an epexegesis of бoبıа (Lightfoot). All the treasures of wisdom and knowledge in Christ Jesus. We are made righteous, holy, and redeemed in Christ Jesus. Redemption comes here last for emphasis though the foundation of the other two. In Ro 1:17 we see clearly Paul's idea of the God kind of righteousness ( $\delta$ ıкaıoovvף) in Christ. In Ro 3:24 we have Paul's conception of redemption ( $\alpha \pi о \lambda \nu \tau \rho \omega \sigma \iota \varsigma$, setting free as a ransomed slave) in Christ. In Ro 6:19 we have Paul's notion of holiness or sanctification ( $\alpha \boldsymbol{\gamma} \alpha \sigma \mu \circ \varsigma$ ) in Christ. These great theological terms will call for full discussion in Romans, but they must not be overlooked here. See also Ac 10:35; 24:25; 1Th 4:3-7; 1Co 1:2 .

1Cor 1:31
That ( $\mathrm{v} \alpha$ ). Probably ellipse ( $\gamma \varepsilon v \eta \tau \alpha$ to be supplied) as is common in Paul's Epistles (2Th 2:3; 2Co 8:13; Ga 1:20; 2:9; Ro 4:16; 13:1; 15:3). Some explain the imperative каuх $\alpha \sigma \theta \omega$ as an anacoluthon. The shortened quotation is from Jer 9:24. Deissmann notes the importance of these closing verses concerning the origin of Paul's congregations from the lower classes in the large towns as "one of the most important historical witnesses to Primitive Christianity" (New Light on the N.T., p. 7; Light from the Ancient East, pp. 7, 14, 60, 142).

## 1 Corinthians 2

1Cor 2:1
 Hипє $\rho \circ \chi \eta$ is an old word from the verb v $\pi \varepsilon \rho \varepsilon \chi \omega$ (Php 4:7) and means preeminence, rising above. In N.T. only here and 1Ti 2:2 of magistrates. It occurs in inscriptions of Pergamum for persons of position (Deissmann, Bible Studies, p. 255). Here it means excess or superfluity, "not in excellence of rhetorical display or of philosophical subtlety" (Lightfoot).

The mystery of God ( $\tau \boldsymbol{\mu} \mu \sigma \tau \eta \rho \circ$ vov $\operatorname{tov}$ (rov). So Aleph A C Copt. like 2:7, but B D L P read $\mu \alpha \rho \tau 0 \rho ı v$ like 1:6. Probably
mystery is correct. Christ crucified is the mystery of God (Col 2:2 ). Paul did not hesitate to appropriate this word in common use among the mystery religions, but he puts into it his ideas, not those in current use. It is an old word from $\mu \nu \varepsilon \omega$, to close, to shut, to initiate (Php 4:12 ). This mystery was once hidden from the ages (Col 1:26), but is now made plain in Christ (1Co 2:7; Ro 16:25f. ). The papyri give many illustrations of the use of the word for secret doctrines known only to the initiated (Moulton and Milligan's Vocabulary).

1Cor 2:2
For I determined not to know anything among you (ov $\gamma \alpha \rho \varepsilon \kappa \rho ı v \alpha \tau \varepsilon \iota \delta \varepsilon v \alpha \varepsilon v \nu \mu \nu)$ ). Literally, "For I did not decide to know anything among you." The negative goes with $\varepsilon \kappa \rho \iota v a$, not with $\tau$. Paul means that he did not think it fit or his business to know anything for his message beyond this "mystery of God."

Save Jesus Christ ( $\varepsilon \mu \eta$ I $\eta \sigma o u v$ X $\rho ı \sigma \tau o v$ ). Both the person and the office (Lightfoot). I had no intent to go beyond him and in particular,

and this one as crucified (perfect passive participle). This phase in particular ( $1: 18$ ) was selected by Paul from the start as the centre of his gospel message. He decided to stick to it even after Athens where he was practically laughed out of court. The Cross added to the $\sigma \chi \alpha v \delta \alpha \lambda o v$ of the Incarnation, but Paul kept to the main track on coming to Corinth.

1Cor 2:3
I was with you ( $\varepsilon \gamma \varepsilon v o \mu \eta \nu \pi \rho \circ \varsigma \nu \mu \alpha \varsigma)$. Rather, "I came to you" (not $\eta \nu$, was). "I not only eschewed all affectation of cleverness or grandiloquence, but I went to the opposite extreme of diffidence and nervous self-effacement" (Robertson and Plummer). Paul had been in prison in Philippi, driven out of Thessalonica and Beroea, politely bowed out of Athens. It is a human touch to see this shrinking as he faced the hard conditions in Corinth. It is a common feeling of the most effective preachers. Cool complacency is not the mood of the finest preaching. See $\varphi \circ \beta$ о (fear) and $\tau \rho о \mu \circ \varsigma$ (trembling) combined in 2Co 7:15; Php 2:12; Eph 6:5.

1Cor 2:4
 false disclaimer or mock modesty, for surely the preacher desires to be persuasive. This adjective $\pi \bullet \theta$ oc (MSS. $\pi \varepsilon \forall \theta \circ \varsigma$ ) has not yet been found elsewhere. It seems to be formed directly from $\pi \varepsilon \iota \theta \omega$, to persuade, as $\varphi \varepsilon \iota \delta o \varsigma(\varphi \iota \delta o \varsigma)$ is from $\varphi \varepsilon \iota \delta o \mu \alpha$, to spare. The old Greek form $\pi \iota \theta a v o c$ is common enough and is used by Josephus (Ant. VIII. 9. 1) of "the plausible words of the lying prophet" in 1 Ki 13 . The kindred word $\pi \bullet \theta \alpha v o \lambda o \gamma 1 \alpha$ occurs in Col 2:4 for the specious and plausible Gnostic philosophers. And gullible people are easy marks for these plausible pulpiteers. Corinth put a premium on the veneer of false rhetoric and thin thinking.

But in demonstration ( $\alpha \lambda \lambda^{\prime} \varepsilon v \alpha \pi o \delta \varepsilon ı \xi \varepsilon$ ). In contrast with the
plausibility just mentioned. This word, though an old one from $\alpha \pi \sigma \delta \varepsilon ו \kappa v \nu \mu$, to show forth, occurs nowhere else in the New Testament.

Spirit ( $\pi v \varepsilon v \mu \alpha)$ here can be the Holy Spirit or inward spirit as opposed to superficial expression and
power ( $\delta v v a \mu \varsigma)$ is moral power rather than intellectual acuteness (cf. 1:18).
1Cor 2:5
That your faith should not stand (ıva $\eta \pi \iota \sigma \tau \iota \varsigma \nu \mu \omega \nu \mu \eta \eta$ ). Purpose of God, but $\mu \eta \eta$ is "not be" merely. The only secure place for faith to find a rest is in God's power, not in the wisdom of men. One has only to instance the changing theories of men about science, philosophy, religion, politics to see this. A sure word from God can be depended on.

1Cor 2:6
Among the perfect ( $\varepsilon v$ toıs $\tau \varepsilon \lambda \varepsilon ı o \iota \varsigma)$. Paul is not here drawing a distinction between exoteric and esoteric wisdom as the Gnostics did for their initiates, but simply to the necessary difference in teaching for babes ( $3: 1$ ) and adults or grown men (common use of $\tau \varepsilon \lambda \varepsilon \iota o \varsigma$ for relative perfection, for adults, as is in 1Co 14:20; Php 3:15; Eph 4:13; Heb 5:14). Some were simply old babes and unable in spite of their years to digest solid spiritual food, "the ample teaching as to the Person of Christ and the eternal purpose of God. Such 'wisdom' we have in the Epistles to the Ephesians and the Colossians especially, and in a less degree in the Epistle to the Romans. This 'wisdom' is discerned in the Gospel of John, as compared with the other Evangelists" (Lightfoot). These imperfect disciples Paul wishes to develop into spiritual maturity.

Of this world ( $\tau 00$ alevoc tovtov). This age, more exactly, as in 1:20. This wisdom does not belong to the passing age of fleeting things, but to the enduring and eternal (Ellicott).

Which are coming to naught ( $\tau \omega \nu \kappa \alpha \tau \alpha \rho \gamma о \nu \mu \varepsilon \nu \omega v)$. See on 1:28. Present passive participle genitive plural of $\kappa \alpha \tau \alpha \rho \gamma \varepsilon \omega$. The gradual nullification of these "rulers" before the final and certain triumph of the power of Christ in his kingdom.

1Cor 2:7
God's wisdom in a mystery ( $\theta \varepsilon \sigma v \sigma o \varphi \iota \nu \varepsilon \varepsilon \nu \mu \nu \sigma \tau \eta \rho \omega)$. Two points are here sharply made. It is God's wisdom (note emphatic position of the genitive $\theta \varepsilon \sigma v$ ) in contrast to the
wisdom of this age. Every age of the world has a conceit of its own and it is particularly true of this twentieth century, but God's wisdom is eternal and superior to the wisdom of any age or time. God's wisdom is alone absolute. See on 2:1 for mystery. It is not certain whether
in a mystery is to be taken with
wisdom or
we speak. The result does not differ greatly, probably with
wisdom , so long a secret and now at last revealed ( $\operatorname{Col} 1: 26 ; 2 \mathrm{Th} 2: 7$ ).
That hath been hidden ( $\tau \eta v$ a $\alpha о к \varepsilon \kappa \rho \nu \mu \mu \varepsilon \nu \eta \nu)$. See Ro 16:25; Col 1:26; Eph 3:5. Articular perfect passive participle of a $\pi о \kappa \rho \cup \pi \tau \omega$, more precisely defining the indefinite $\sigma о \varphi \iota \alpha v$ (wisdom).

Foreordained before the worlds ( $\pi \rho \circ \omega \rho \iota \sigma \varepsilon v \pi \rho o \tau \omega v \alpha \iota \omega v \omega v$ ). This relative clause $(\eta v)$ defines still more closely God's wisdom. Note $\pi \rho o$ with both verb and substantive ( $\alpha \omega \nu \omega \nu$ ). Constative aorist of God's elective purpose as shown in Christ crucified (1Co 1:18-24 ). "It was no afterthought or change of plan" (Robertson and Plummer).

Unto our glory ( $\varepsilon \varsigma \varsigma \delta o \xi \alpha \nu \eta \mu \omega v$ ). "The glory of inward enlightenment as well as of outward exaltation" (Lightfoot).

1Cor 2:8
Knoweth ( $\varepsilon \gamma \nu \omega \kappa \varepsilon v$ ). Has known, has discerned, perfect active indicative of $\gamma \iota v \omega \sigma \kappa \omega$. They have shown amazing ignorance of God's wisdom.

For had they known it ( $\varepsilon \gamma \alpha \rho \varepsilon \gamma v \omega \sigma \alpha v$ ). Condition of the second class, determined as unfulfilled, with aorist active indicative in both condition ( $\varepsilon \gamma v \omega \sigma \alpha v$ ) and conclusion with $\alpha v$ (ovk $\alpha v \varepsilon \sigma \tau \alpha \cup \rho \omega \sigma \alpha v$ ). Peter in the great sermon at Pentecost commented on the "ignorance" (кат $\alpha$ аүvoı $\alpha v$ ) of the Jews in crucifying Christ (Ac 3:17) as the only hope for repentance on their part (Ac 3:19).

The Lord of glory ( $\tau 0 v$ Kupıov $\tau \eta \varsigma \delta o \xi \eta \varsigma$ ). Genitive case $\delta o \xi \eta \varsigma$, means characterized by glory, "bringing out the contrast between the indignity of the Cross (Heb 12:2) and the majesty of the Victim (Lu 22:69; 23:43 )" (Robertson and Plummer). See Jas 2:1; Ac 7:2; Eph 1:17; Heb 9:5.

1Cor 2:9
But as it is written ( $\alpha \lambda \lambda \alpha \kappa \alpha \theta \omega \varsigma \gamma \varepsilon \gamma \rho \alpha \pi \tau \alpha$ ). Elliptical sentence like Rom 15:3 where $\gamma \varepsilon \gamma o v \varepsilon v$ (it has happened) can be supplied. It is not certain where Paul derives this quotation as Scripture. Origen thought it a quotation from the Apocalypse of Elias and Jerome finds it also in the Ascension of Isaiah. But these books appear to be post-Pauline, and Jerome denies that Paul obtained it from these late apocryphal books. Clement of Rome finds it in the LXX text of Isa 64:4 and cites it as a Christian saying. It is likely that Paul here combines freely Isa $64: 4 ; 65: 17 ; 52: 15$ in a sort of catena or free chain of quotations as he does in Ro 3:10-18. There is also an anacoluthon for $\alpha$ (which things) occurs as the direct object (ac-
cusative) with $\varepsilon \ell \delta \varepsilon v$ (saw) and $\eta \kappa \sigma \quad \sigma \alpha v$ (heard), but as the subject (nominative) with $\alpha v \varepsilon \beta \eta$ (entered, second aorist active indicative of $\alpha v \alpha \beta \alpha, v \omega$, to go up).

Whatsoever (o $\sigma \alpha$ ). A climax to the preceding relative clause (Findlay).
Prepared ( $\eta \tau о \mu \alpha \sigma \varepsilon v$ ). First aorist active indicative of $\varepsilon \tau о \mu \alpha \zeta \omega$. The only instance where Paul uses this verb of God, though it occurs of final glory (Lu 2:31; Mt 20:23; 25:34; $\mathrm{Mr} 10: 40$; Heb 11:16 ) and of final misery (Mt 25:41). But here undoubtedly the dominant idea is the present blessing to these who love God (1Co 1:5-7).

Heart ( $\kappa \alpha \rho \delta \iota \alpha v$ ) here as in Ro 1:21 is more than emotion. The Gnostics used this passage to support their teaching of esoteric doctrine as Hegesippus shows. Lightfoot thinks that probably the apocryphal Ascension of Isaiah and Apocalypse of Elias were Gnostic and so quoted this passage of Paul to support their position. But the next verse shows that Paul uses it of what is now
revealed and made plain, not of mysteries still unknown.
1Cor 2:10
But unto us God revealed them ( $\eta \mu \nu \gamma \rho \alpha \rho \pi \varepsilon \kappa \alpha \lambda \cup \psi \varepsilon v$ o $\theta \varepsilon o \varsigma)$ ). So with $\gamma \alpha \rho$ B 37 Sah Cop read instead of $\delta \varepsilon$ of Aleph A C D. " $\Delta \varepsilon$ is superficially easier; $\gamma \alpha \rho$ intrinsically better" (Findlay). Paul explains why this is no longer hidden, "for God revealed unto us" the wonders of grace pictured in verse 9 . We do not have to wait for heaven to see them. Hence we can utter those things hidden from the eye, the ear, the heart of man. This revelation ( $\alpha \pi \varepsilon \kappa \alpha \lambda \nu \psi \varepsilon \nu$, first aorist active indicative) took place, at "the entry of the Gospel into the world," not "when we were admitted into the Church, when we were baptized" as Lightfoot interprets it.

Through the Spirit ( $\delta \iota \alpha$ tov $\pi v \varepsilon v \mu \alpha \tau \sigma \varsigma)$. The Holy Spirit is the agent of this definite revelation of grace, a revelation with a definite beginning or advent (constative aorist), an unveiling by the Spirit where "human ability and research would not have sufficed" (Robertson and Plummer), "according to the revelation of the mystery" (Ro 16:25), "the revelation given to Christians as an event that began a new epoch in the world's history" (Edwards).

Searcheth all things ( $\pi \alpha v \tau \alpha \varepsilon \rho \alpha v v \alpha$ ). This is the usual form from A.D. 1 on rather than the old $\varepsilon \rho \varepsilon u v a \omega$. The word occurs (Moulton and Milligan's Vocabulary) for a professional searcher's report and $\varepsilon \rho a u v \eta \tau \alpha$, searchers for customs officials. "The Spirit is the organ of understanding between man and God" (Findlay). So in Ro 8:27 we have this very verb epauva $\omega$ again of God's searching our hearts. The Holy Spirit not merely investigates us, but he searches "even the deep things of God" ( $\kappa \alpha \tau \alpha \beta \alpha \theta \eta$ тov $\theta$ vov). Profunda Dei (Vulgate). Cf. "the deep things of Satan" (Re 2:24) and Paul's language in Ro 11:33 "Oh the depth of the riches and wisdom and knowledge of God." Paul's point is simply that the Holy Spirit fully comprehends the depth of God's nature and his plans of grace and so is fully competent to make the revelation here claimed.

1Cor 2:11
Knoweth (ot $\delta \varepsilon \nu, \varepsilon \gamma \nu \omega \kappa \varepsilon \nu$ ). Second perfect of root $\delta \delta$-, to see and so know, first perfect of $\gamma \iota \omega \sigma \kappa \omega$, to know by personal experience, has come to know and still knows. See First John for a clear distinction in the use of ot $\delta \alpha$ and $\gamma \iota v \omega \sigma \kappa \omega$.

The spirit of man that is in him ( $\tau 0 \pi \nu \varepsilon v \mu \alpha \operatorname{\tau ov} \alpha v \theta \rho \omega \pi \sigma v$ $\tau о \varepsilon \nu \alpha v \tau \omega$ ). The selfconsciousness of man that resides in the man or woman (generic term for mankind, $\alpha \nu \theta \rho \omega \pi \sigma \varsigma)$.

The Spirit of God ( $\tau 0 \pi v \varepsilon v \mu \alpha \operatorname{\tau ov} \theta \varepsilon \sigma v$ ). Note the absence of $\tau o \varepsilon v \alpha v \tau \omega$. It is not the mere self-consciousness of God, but the personal Holy Spirit in his relation to God the Father. Paul's analogy between the spirit of man and the Spirit of God does not hold clear through and he guards it at this vital point as he does elsewhere as in Ro 8:26 and in the full Trinitarian benediction in 2Co 13:13. Пvev $\mu \alpha$ in itself merely means breath or wind as in Joh 3:8. To know accurately Paul's use of the word in every instance calls for an adequate knowledge of his theology, and psychology. But the point here is plain. God's Holy Spirit is amply qualified to make the revelation claimed here in verses 6-10.

1Cor 2:12
But we ( $\eta \mu \varepsilon \iota \varsigma \delta \varepsilon$ ). We Christians like
us $(\eta \mu \nu v)$ in verse 10 of the revelation, but particularly Paul and the other apostles.
Received ( $\varepsilon \lambda \alpha \beta o \mu \varepsilon v$ ). Second aorist active indicative of $\lambda \alpha \mu \beta \alpha \nu \omega$ and so a definite event, though the constative aorist may include various stages.

Not the spirit of the world (ov $\tau о \pi \nu \varepsilon v \mu \alpha$ тov коб $\mu \circ v$ ). Probably a reference to the wisdom of this age in verse 6 . See also Ro $8: 4,6,7 ; 1$ Co $11: 4$ ( $\theta \varepsilon \pi \nu \varepsilon v \mu \alpha \varepsilon \tau \varepsilon \rho o v)$.

But the spirit which is of God ( $\alpha \lambda \lambda \alpha$ то $\pi \nu \varepsilon \cup \mu \alpha$ то $\varepsilon \kappa \theta \varepsilon o v)$. Rather, "from God" ( $\varepsilon \kappa$ ), which proceeds from God.

That we might know ( $\imath v \alpha \varepsilon \iota \delta \omega \mu \varepsilon v$ ). Second perfect subjunctive with $t v \alpha$ to express purpose. Here is a distinct claim of the Holy Spirit for understanding (Illumination) the Revelation received. It is not a senseless rhapsody or secret mystery, but God expects us to understand "the things that are freely given us by God" ( $\tau \alpha v \pi о$ тov $\theta \varepsilon о v \chi \alpha \rho \circ \sigma \theta \varepsilon v \tau \alpha \eta \mu v$ ). First aorist passive neuter plural articular participle of $\chi \alpha \rho \zeta \zeta \mu \alpha$, to bestow. God gave the revelation through the Holy Spirit and he gives us the illumination of the Holy Spirit to understand the mind of the Spirit. The tragic failures of men to understand clearly God's revealed will is but a commentary on the weakness and limitation of the human intellect even when enlightened by the Holy Spirit.

1Cor 2:13
Which things also we speak ( $\alpha \kappa \alpha \lambda \alpha \lambda о \cup \mu \varepsilon v$ ). This onomatopoetic verb $\lambda \alpha \lambda \varepsilon \omega$ (from $\lambda \alpha-\lambda \alpha)$, to utter sounds. In the papyri the word calls more attention to the form of utterance while $\lambda \varepsilon \gamma \omega$ refers more to the substance. But $\lambda \alpha \lambda \varepsilon \omega$ in the N.T. as here is used of the highest and holiest speech. Undoubtedly Paul employs the word purposely for the utterance of the
revelation which he has understood. That is to say, there is revelation (verse 10), illumination (verse 12), and inspiration (verse 13). Paul claims therefore the help of the Holy Spirit for the reception of the revelation, for the understanding of it, for the expression of it. Paul claimed this authority for his preaching (1Th 4:2) and for his epistles (2Th 3:14).

Not in words which man's wisdom teacheth (оטк $\varepsilon v \delta \iota \delta \alpha \kappa \tau о \iota \varsigma ~ a v Ө \rho \omega \pi ı \nu \eta \varsigma ~ \sigma о \varphi \iota \alpha \varsigma$, $\lambda о ү о \iota \varsigma) . ~ L i t e r a l l y, ~ " n o t ~ i n ~ w o r d s ~ t a u g h t ~ b y ~ h u m a n ~ w i s d o m . " ~ T h e ~ v e r b a l ~ a d j e c t i v e ~ \delta ı \delta \alpha \kappa \tau o \iota \varsigma ~$ (from $\delta เ \delta a \sigma \kappa \omega$, to teach) is here passive in idea and is followed by the ablative case of origin or source as in Joh 6:45, $\varepsilon \sigma o v \tau \alpha \pi \alpha v \tau \varepsilon \varsigma ~ \delta ı \delta a \kappa \tau о ~ \theta \varepsilon o v ~(f r o m ~ I s a ~ 54: 13 ~), ~ " T h e y ~ s h a l l ~ a l l ~ b e ~$ taught by God." The ablative in Greek, as is well known, has the same form as the genitive, though quite different in idea (Robertson, Grammar, p. 516). So then Paul claims the help of the Holy Spirit in the utterance $(\lambda \alpha \lambda o v \mu \varepsilon v)$ of the words, "which the Spirit teacheth ( $\varepsilon v$ $\delta เ \delta \alpha \kappa \tau о \iota \varsigma \pi v \varepsilon \cup \mu \alpha \tau о \varsigma)$, "in words taught by the Spirit" (ablative $\pi v \varepsilon v \mu \alpha \tau o \varsigma$ as above). Clearly Paul means that the help of the Holy Spirit in the utterance of the revelation extends to the words. No theory of inspiration is here stated, but it is not mere human wisdom. Paul's own Epistles bear eloquent witness to the lofty claim here made. They remain today after nearly nineteen centuries throbbing with the power of the Spirit of God, dynamic with life for the problems of today as when Paul wrote them for the needs of the believers in his time, the greatest epistles of all time, surcharged with the energy of God.
 Each of these words is in dispute. The verb $\sigma v \vee \kappa \rho \iota v \omega$, originally meant to combine, to join together fitly. In the LXX it means to interpret dreams (Ge 40:8,22; 41:12 ) possibly by comparison. In the later Greek it may mean to compare as in 2Co 10:12. In the papyri Moulton and Milligan (Vocabulary) give it only for "decide," probably after comparing. But "comparing," in spite of the translations, does not suit well here. So it is best to follow the original meaning to combine as do Lightfoot and Ellicott. But what gender is $\pi \nu \varepsilon v \mu a \tau \iota \kappa o \iota c$ ? Is it masculine or neuter like $\pi v \varepsilon v \mu a \tau \iota \kappa \alpha$ ? If masculine, the idea would be "interpreting (like LXX) spiritual truths to spiritual persons" or "matching spiritual truths with spiritual persons." This is a possible rendering and makes good sense in harmony with verse 14. If $\pi \nu \varepsilon \cup \mu a \tau \iota \kappa о \iota$ be taken as neuter plural (associative instrumental case after $\sigma v v$ in $\sigma v \nu \kappa \rho \iota \nu o v \tau \varepsilon \varsigma$ ), the idea most naturally would be, "combining spiritual ideas ( $\pi v \varepsilon v \mu \alpha \tau \iota \kappa \alpha$ ) with spiritual words" ( $\pi v \varepsilon \cup \mu \alpha \tau \iota \kappa о \iota)$ ). This again makes good sense in harmony with the first part of verse 13 . On the whole this is the most natural way to take it, though various other possibilities exist.

1Cor 2:14
Now the natural man ( $\psi v \chi \iota \kappa о \varsigma \delta \varepsilon \alpha v \theta \rho \omega \pi о \varsigma)$. Note absence of article here, "A natural man" (an unregenerate man). Paul does not employ modern psychological terms and he exercises variety in his use of all the terms here present as $\pi v \varepsilon v \mu \alpha$ and $\pi v \varepsilon v \mu \alpha \tau \iota \kappa \sigma \sigma, \psi v \chi \eta$ and $\psi v \chi \iota к о \sigma, \sigma \alpha \rho \xi$ and $\sigma \alpha \rho \kappa \iota \nu о \varsigma$ and баркıкоৎ. A helpful discussion of the various uses of
these words in the New Testament is given by Burton in his New Testament Word Studies, pp. 62-68, and in his

Spirit, Soul, and Flesh . The papyri furnish so many examples of $\sigma \alpha \rho \xi, \pi \nu \varepsilon \cup \mu \alpha$, and $\psi v \times \eta$ that Moulton and Milligan make no attempt at an exhaustive treatment, but give a few miscellaneous examples to illustrate the varied uses that parallel the New Testament. $\Psi \cup \chi ו \kappa о \varsigma$ is a qualitative adjective from $\psi v \chi \eta$ (breath of life like $\alpha \nu \mu \alpha$, life, soul). Here the Vulgate renders it by animalis and the German by sinnlich, the original sense of animal life as in Jude 1:19; Jas 3:15. In 1Co 15:44,46 there is the same contrast between $\psi v \chi$ ккоৎ and $\pi v \varepsilon v \mu a \tau \iota \kappa о \varsigma$ as here. The $\psi v \chi \iota \kappa о \varsigma$ man is the unregenerate man while the $\pi \nu \varepsilon \cup \mu \alpha \tau \iota \kappa о \varsigma$ man is the renewed man, born again of the Spirit of God.

Receiveth not (ov $\delta \varepsilon \chi \varepsilon \tau \alpha$ ). Does not accept, rejects, refuses to accept. In Ro 8:7 Paul definitely states the inability (ov $\delta \varepsilon \gamma \alpha \rho \delta u v a \tau \alpha$ ) of the mind of the flesh to receive the things of the Spirit untouched by the Holy Spirit. Certainly the initiative comes from God whose Holy Spirit makes it possible for us to accept the things of the Spirit of God. They are no longer "foolishness" ( $\mu \omega \rho$ ı $\alpha$ ) to us as was once the case ( $1: 23$ ). Today one notes certain of the intelligentsia who sneer at Christ and Christianity in their own blinded ignorance.

He cannot know them (ov $\delta v v \alpha \tau \alpha ~ \gamma v \omega v \alpha$ ). He is not able to get a knowledge (ingressive second aorist active infinitive of $\gamma \iota \nu \omega \sigma \kappa \omega)$. His helpless condition calls for pity in place of impatience on our part, though such an one usually poses as a paragon of wisdom and commiserates the deluded followers of Christ.

They are spiritually judged ( $\pi v \varepsilon \cup \mu \alpha \tau ı \kappa \omega \varsigma ~ a v \alpha \kappa \rho ı \nu \varepsilon \tau \alpha)$. Paul and Luke are fond of this verb, though nowhere else in the N.T. Paul uses it only in I Corinthians. The word means a sifting process to get at the truth by investigation as of a judge. In Ac 17:11 the Beroeans scrutinized the Scriptures. These $\psi v \chi$ ıко men are incapable of rendering a decision for they are unable to recognize the facts. They judge by the $\psi v \chi \eta$ (mere animal nature) rather than by the $\pi v \varepsilon v \mu \alpha$ (the renewed spirit).

1Cor 2:15
Judgeth all things (avaкрıve $\pi \alpha \nu \tau \alpha$ ). The spiritual man (о $\pi \nu \varepsilon \nu \mu \alpha \tau ь к о \varsigma)$ is qualified to sift, to examine, to decide rightly, because he has the eyes of his heart enlightened (Eph 1:18) and is no longer blinded by the god of this world (2Co 4:4). There is a great lesson for Christians who know by personal experience the things of the Spirit of God. Men of intellectual gifts who are ignorant of the things of Christ talk learnedly and patronizingly about things of which they are grossly ignorant. The spiritual man is superior to all this false knowledge.

He himself is judged of no man ( $\alpha \cup \tau о \varsigma ~ \delta \varepsilon ~ v \pi^{\prime}$ ou $\delta \varepsilon v o c, \alpha v \alpha \kappa \rho ı v \varepsilon \tau \alpha$ ). Men will pass judgment on him, but the spiritual man refuses to accept the decision of his ignorant judges. He stands superior to them all as Polycarp did when he preferred to be burnt to saying,
"Lord Caesar" in place of "Lord Jesus." He was unwilling to save his earthly life by the worship of Caesar in place of the Lord Jesus. Polycarp was a $\pi v \varepsilon \cup \mu a \tau ⿺ \kappa \varsigma$, man.

1Cor 2:16
For who hath known the mind of the Lord (Tıs $\gamma \alpha \rho \varepsilon \gamma v \omega$ vouv Kupıov;). Quotation from Isa 40:13.

That he should instruct him ( $\circ \varsigma \sigma \cup \nu \beta \curlywedge \beta \alpha \sigma \varepsilon \alpha v \tau o v$ ). This use of oc (relative
who ) is almost consecutive (result). The $\pi \nu \varepsilon v \mu \alpha \tau \iota \kappa o s ~ m a n ~ i s ~ s u p e r i o r ~ t o ~ o t h e r s ~ w h o ~$ attempt even to instruct God himself. See on Ac 9:22; 16:10 for $\sigma \cup v \beta \iota \beta a \zeta \omega$, to make go together.

But we have the mind of Christ ( $\eta \mu \varepsilon เ \varsigma ~ \delta \varepsilon$ vouv X $\rho \iota \sigma \tau о v \varepsilon \chi \circ \mu \varepsilon v$ ). As he has already shown (verses 6-13). Thus with the mind (vouc. Cf. Php 2:5; Ro 8:9,27 ). Hence Paul and all $\pi v \varepsilon v \mu \alpha \tau \iota \kappa o$ men are superior to those who try to shake their faith in Christ, the mystery of God. Paul can say, "I know him whom I have believed." "I believe; therefore I have spoken."

## 1 Corinthians 3

1Cor 3：1
But as unto carnal（ $\left.\alpha \lambda \lambda^{\prime} \omega \varsigma \sigma \alpha \rho \kappa ı v o ı \varsigma\right) . ~ L a t i n ~ c a r n e u s . ~ " A s ~ m e n ~ o ' ~ f l e s h, " ~ B r a i d ~ S c o t s ; ~$ ＂as worldlings，＂Moffatt．This form in－tvoc like $\lambda_{1} \theta$ ıvos in 2Co 3：3 means the material of flesh，＂not on tablets of stone，but on fleshen tablets on hearts．＂So in Heb 7：16．But in Ro 7：14 Paul says，＂I am fleshen（ $\sigma \alpha \rho \kappa ı о \varsigma) ~ s o l d ~ u n d e r ~ s i n, " ~ a s ~ i f ~ \sigma \alpha \rho к ı v o c ~ r e p r e s e n t e d ~ t h e ~ e x-~$ treme power of the $\sigma \alpha \rho \xi$ ．Which does Paul mean here？He wanted to speak the wisdom of God among the adults（1Co 2：6 ），the spiritual（o $\pi v \varepsilon v \mu a \tau \iota \kappa 0,2: 15$ ），but he was unable to treat them as $\pi \nu \varepsilon \cup \mu \alpha \tau$ ıкo in reality because of their seditions and immoralities．It is not wrong to be $\sigma \alpha \rho \kappa เ v o c$ ，for we all live in the flesh（ $\varepsilon v \sigma \alpha \rho \kappa, G a 2: 20$ ），but we are not to live according to the flesh（ката барка，Ro 8：12）．It is not culpable to a babe in Christ（ $v \eta \pi ⿱ 䒑 龰, ~, ~$ 1Co 13：11），unless unduly prolonged（ 1 Co 14：20；Heb 5：13f．）．It is one of the tragedies of the minister＇s life that he has to keep on speaking to the church members＂as unto babes in Christ＂（ $\omega \varsigma \nu \eta \pi \iota \circ \varsigma \varepsilon v$ X $\rho \iota \sigma \tau \omega$ ），who actually glory in their long babyhood whereas they ought to be teachers of the gospel instead of belonging to the cradle roll．Paul＇s goal was for all the babes to become adults（Col 1：28）．

1Cor 3：2
I fed you with milk，not with meat（ $\gamma \alpha \lambda \alpha \cup \mu \alpha \varsigma \varepsilon \pi о \tau \iota \sigma \alpha$ ，ov $\beta \rho \omega \mu \alpha$ ）．Note two accusat－ ives with the verb，$\varepsilon \pi о \tau \iota \sigma \alpha$ ，first aorist active indicative of $\pi о \tau \iota \zeta \omega$ ，as with other causative verbs，that of the person and of the thing．In the LXX and the papyri the verb often means to irrigate．Bp $\omega \mu \alpha$ does not mean meat（flesh）as opposed to bread，but all solid food as in ＂meats and drinks＂（Heb 9：7）．It is a zeugma to use $\varepsilon \pi о \tau \iota \sigma \alpha$ with $\beta \rho \omega \mu \alpha$ ．Paul did not glory in making his sermons thin and watery．Simplicity does not require lack of ideas or dulness． It is pathetic to think how the preacher has to clip the wings of thought and imagination because the hearers cannot go with him．But nothing hinders great preaching like the dulness caused by $\sin$ on the part of auditors who are impatient with the high demands of the gospel．

1Cor 3：3
For ye are yet carnal（ $\varepsilon \tau \gamma \alpha \rho$ баркıко єбтє）．इаркıкоৎ，unlike баркıขоৎ，like ıкоৎ formations，means adapted to，fitted for the flesh（ $\sigma \alpha \rho \xi$ ），one who lives according to the
 regenerate man．Both classes are баркıvo made in flesh，and both may be баркıко though the $\pi v \varepsilon \nu \mu \alpha \tau ו \kappa o$ should not be．The $\pi \nu \varepsilon \cup \mu \alpha \tau \iota \kappa o$ who continue to be $\sigma \alpha \rho \kappa เ v o$ are still babes （ $v \eta \pi \iota$ ），not adults（ $\tau \varepsilon \lambda \varepsilon \iota \circ$ ），while those who are still $\sigma \alpha \rho к ⿺ \kappa о$（carnal）have given way to the flesh as if they were still $\psi v \chi$ ıко（unregenerate）．It is a bold and cutting figure，not without sarcasm，but necessary to reveal the Corinthians to themselves．

Jealousy and strife（ $\zeta \eta \lambda о \varsigma \kappa \alpha \varepsilon \rho \iota \varsigma)$ ．Zeal（ $\zeta \eta \lambda>\varsigma$ from $\zeta \varepsilon \omega$ ，to boil）is not necessarily evil，but good if under control．It may be not according to knowledge（Ro 10：2）and easily
becomes jealousy (same root through the French jaloux) as zeal. Ardour may be like the jealousy of God (2Co 11:2) or the envy of men (Ac 5:17). Epıs is an old word, but used only by Paul in N.T. (see on 1Co 1:11 ). Wrangling follows jealousy. These two voices of the spirit are to Paul proof that the Corinthians are still барккко and walking according to men, not according to the Spirit of Christ.

1Cor 3:4
For when one saith (o $\tau \alpha v \gamma \alpha \rho \lambda \varepsilon \gamma \eta \tau \iota \varsigma)$. Indefinite temporal clause with the present subjunctive of repetition (Robertson, Grammar, p. 972). Each instance is a case in point and proof abundant of the strife.

Of Paul (Пavגou). Predicate genitive, belong to Paul, on Paul's side.
Of Apollos (A $\pi 0 \lambda \lambda \omega$ ). Same genitive, but the form is the so-called Attic second declension. See the nominative $А \pi о \lambda \lambda \omega \varsigma$ in verse 5.

Men ( $\alpha v \theta \rho \omega \pi \sigma$ ). Just mere human creatures ( $\alpha v \theta \rho \omega \pi \mathrm{o}$, generic term for mankind), in the flesh ( $\sigma \alpha \rho \kappa ı v o$ ), acting like the flesh ( $\sigma \alpha \rho \kappa ı к о$ ), not $\pi v \varepsilon \cup \mu \alpha \tau ı \kappa о$, as if still $\psi \cup \chi ı к о$. It was a home-thrust. Paul would not even defend his own partisans.

1Cor 3:5
What then? ( $\tau$ ouv;). He does not say $\tau \iota \varsigma$ (who), but $\tau$ (what), neuter singular interrogative pronoun.

Ministers ( $\delta$ ıккоvo). Not leaders of parties or sects, but merely servants through whom ye believed. The etymology of the word Thayer gives as $\delta 1 \alpha$ and kovis "raising dust by hastening." In the Gospels it is the servant (Mt 20:26 ) or waiter (Joh 2:5 ). Paul so describes himself as a minister (Col 1:23,25). The technical sense of deacon comes later (Php 1:1; 1Ti 3:8,12).

As the Lord gave to him ( $\omega \varsigma$ o Kupıo $\varepsilon \delta \omega \kappa \varepsilon v$ ). Hence no minister of the Lord like Apollos and Paul has any basis for pride or conceit nor should be made the occasion for faction and strife. This idea Paul enlarges upon through chapters 1Co 3; 4 and it is made plain in chapter 1Co 12 .

1Cor 3:6
I planted ( $\varepsilon \gamma \omega \varepsilon \varphi \cup \tau \varepsilon \cup \sigma \alpha$ ). First aorist active indicative of old verb $\varphi \cup \tau \varepsilon \cup \omega$. This Paul did as Luke tells us in Ac 18:1-18 .

Apollos watered (А $А \boldsymbol{\pi} \lambda \lambda \omega \varsigma \varepsilon \pi о \tau \iota \sigma \varepsilon \nu)$. Apollos irrigated the church there as is seen in Ac 18:24-19:1. Another aorist tense as in verse 2.

But God gave the increase ( $\alpha \lambda \lambda \alpha$ o $\theta \varepsilon \circ \varsigma \eta \cup \xi \alpha \nu \varepsilon v$ ). Imperfect tense here (active indicative) for the continuous blessing of God both on the work of Paul and Apollos, co-labourers with God in God's field (verse 9). Reports of revivals sometimes give the glory to the evangelist or to both evangelist and pastor. Paul gives it all to God. He and Apollos cooperated as successive pastors.

1Cor 3:7

So then neither--neither--but (H $\omega \sigma \tau \varepsilon$ ov $\tau \varepsilon--$ ovt $\left.--\alpha \lambda \lambda^{\prime}\right)$. Paul applies his logic relentlessly to the facts. He had asked
what ( $\tau$ ) is Apollos or Paul (verse 5). The answer is here.
Neither is anything ( $\tau$ )
the one who plants nor the one who waters. God is the whole and we are not anything. 1Cor 3:8
Are one ( $\varepsilon v \varepsilon \iota \sigma \iota v$ ). The neuter singular again ( $\varepsilon v$, not $\varepsilon \varsigma \varsigma)$ as with the interrogative $\tau$ and the indefinite $\tau$. By this bold metaphor which Paul expands he shows how the planter and the waterer work together. If no one planted, the watering would be useless. If no one watered, the planting would come to naught as the dreadful drouth of 1930 testifies while these words are written.

According to his own labour ( $\kappa \alpha \tau \alpha$ tov $\delta \iota \circ v$ котоv). God will bestow to each the reward that his labour deserves. That is the pay that the preacher is sure to receive. He may get too little or too much here from men. But the due reward from God is certain and it will be adequate however ungrateful men may be.

1Cor 3:9
God's fellow-workers ( $\theta$ عov $\sigma u v \varepsilon \rho \gamma o$ ). This old word (co-workers of God) has a new dignity here. God is the major partner in the enterprise of each life, but he lets us work with him. Witness the mother and God with the baby as the product.

God's husbandry ( $\theta \varepsilon \circ v \gamma \varepsilon \omega \rho \gamma\llcorner v$ ). God's tilled land ( $\gamma \eta, \varepsilon \rho \gamma \circ v$ ). The farmer works with God in God's field. Without the sun, the rains, the seasons the farmer is helpless.

God's building ( $\theta$ عov oוкобо䒑ŋ). God is the Great Architect. We work under him and carry out the plans of the Architect. It is building (orкоৎ, house, $\delta \varepsilon \mu \omega$, to build). Let us never forget that God sees and cares what we do in the part of the building where we work for him.

1Cor 3:10
As a wise masterbuilder ( $\omega \varsigma \sigma 0 \varphi \circ \varsigma \alpha \rho \chi \iota \tau \varepsilon \kappa \tau \omega v$ ). Paul does not shirk his share in the work at Corinth with all the sad outcome there. He absolves Apollos from responsibility for the divisions. He denies that he himself is to blame. In doing so he has to praise himself because the Judaizers who fomented the trouble at Corinth had directly blamed Paul. It is not always wise for a preacher to defend himself against attack, but it is sometimes necessary. Factions in the church were now a fact and Paul went to the bottom of the matter. God gave Paul the grace to do what he did. This is the only New Testament example of the old and common word $\alpha \rho \chi \iota \tau \varepsilon \kappa \tau \omega v$, our architect. Tعк $\tau \omega v$ is from $\tau \iota \kappa \tau \omega$, to beget, and means a begetter, then a worker in wood or stone, a carpenter or mason (Mt 13:55; Mr 6:3). Apxt- is an old inseparable prefix like $\alpha \rho \chi \alpha \gamma \gamma \varepsilon \lambda$ оऽ (archangel), $\alpha \rho \chi \varepsilon \pi \iota \sigma \chi$ отоৎ (archbishop), $\alpha \rho \chi ı \rho \rho \varepsilon \cup \varsigma$ (chiefpriest). Apxıtєкт $\omega v$ occurs in the papyri and inscriptions in an even wider sense than our use of architect, sometimes of the chief engineers. But Paul means to claim primacy as
pastor of the church in Corinth as is true of every pastor who is the architect of the whole church life and work. All the workmen (тєктоv\&ৎ, carpenters) work under the direction of the architect (Plato, Statesman, 259). "As a wise architect I laid a foundation" ( $\theta \varepsilon \mu \varepsilon \lambda \iota o v$ $\varepsilon \theta \eta \kappa \alpha)$. Much depends on the wisdom of the architect in laying the foundation. This is the technical phrase (Lu 6:48; 14:29) , a cognate accusative for $\theta \varepsilon \mu \varepsilon \lambda_{\iota}$ 。 . The substantive $\theta \varepsilon \mu \varepsilon \lambda_{\text {ıov }}$ is from the same root $\theta \varepsilon$ as $\varepsilon \theta \eta \kappa \alpha(\tau \iota-\theta \eta \mu)$. We cannot neatly reproduce the idiom in English. "I placed a placing" does only moderately well. Paul refers directly to the events described by Luke in Ac 18:1-18. The aorist $\varepsilon \not \eta^{\prime} \kappa \alpha$ is the correct text, not the perfect $\tau \varepsilon \theta \varepsilon ı \alpha \alpha$.

Another buildeth thereon ( $\alpha \lambda \lambda$ ос $\varepsilon \pi о \ldots к о \delta о \mu \varepsilon$ ). Note the preposition $\varepsilon \pi$ with the verb each time ( $10,11,12,14$ ). The successor to Paul did not have to lay a new foundation, but only to go on building on that already laid. It is a pity when the new pastor has to dig up the foundation and start all over again as if an earthquake had come.

Take heed how he buildeth thereon ( $\beta \lambda \varepsilon \pi \varepsilon \tau \omega \pi \omega \varsigma \varepsilon \pi о \ldots \kappa \delta \circ \mu \varepsilon \varepsilon$ ). The carpenters have need of caution how they carry out the plans of the original architect. Successive architects of great cathedrals carry on through centuries the original design. The result becomes the wonder of succeeding generations. There is no room for individual caprice in the superstructure.

1Cor 3:11
Other foundation ( $\left.\theta \varepsilon \mu \varepsilon \lambda \_o v ~ a \lambda \lambda o v\right)$. The gender of the adjective is here masculine as is shown by $\alpha \lambda \lambda o v$. If neuter, it would be $\alpha \lambda \lambda$. It is masculine because Paul has Christ in mind. It is not here $\varepsilon \tau \varepsilon \rho \circ v$ a different kind of gospel ( $\varepsilon \tau \varepsilon \rho \circ v \varepsilon v a \gamma \gamma \varepsilon \lambda เ \rho v, ~ G a ~ 1: 6 ; 2$ Co 11:4 ) which is not another ( $\alpha \lambda \lambda 0$, Ga 1:7) in reality. But another Jesus (2Co 11:4, $\alpha \lambda \lambda$ ov I I $\sigma o v v$ ) is a reflection on the one Lord Jesus. Hence there is no room on the platform with Jesus for another Saviour, whether Buddha, Mahomet, Dowie, Eddy, or what not. Jesus Christ is the one foundation and it is gratuitous impudence for another to assume the role of Foundation.

Than that which is laid, which is Christ Jesus ( $\pi \alpha \rho \alpha$ тov $\kappa \varepsilon \mu \varepsilon v o v$, os $\varepsilon \sigma \tau \iota v$ I $\eta \sigma o v \varsigma$ Xрıбтоৎ). Literally, "alongside ( $\pi \alpha \rho \alpha$ ) the one laid ( $\kappa \varepsilon \mu \varepsilon v o v$ )," already laid (present middle participle of $\kappa \varepsilon \mu \alpha$, used here as often as the perfect passive of $\tau \uparrow \theta \eta \mu$ in place of $\tau \varepsilon \theta \varepsilon \mu \mu \varepsilon v o v$ ). Paul scouts the suggestion that one even in the interest of so-called "new thought" will dare to lay beside Jesus another foundation for religion. And yet I have seen an article by a professor in a theological seminary in which he advocates regarding Jesus as a landmark, not as a goal, not as a foundation. Clearly Paul means that on this one true foundation, Jesus Christ, one must build only what is in full harmony with the Foundation which is Jesus Christ. If one accuses Paul of narrowness, it can be replied that the architect has to be narrow in the sense of building here and not there. A broad foundation will be too thin and unstable for a solid and abiding structure. It can be said also that Paul is here merely repeating the claim of Jesus himself on this very subject when he quoted Ps 118:22f. to the members of the Sanhedrin who challenged his authority (Mr 11:10f.; Mt 21:42-45; Lu 20:17f. ). Apostles
and prophets go into this temple of God, but Christ Jesus is the chief corner stone ( $\alpha к \rho о \gamma \omega v \alpha \iota \varsigma$, Eph 2:20 ). All believers are living stones in this temple (1Pe 2:5). But there is only one foundation possible.

1Cor 3:12
Gold, silver, precious stones, wood, hay, stubble ( $\chi \rho v \sigma \iota \circ v, ~ a \rho \gamma v \rho ı o v, \lambda_{\imath} \theta$ ov $\tau \tau \mu \circ v \sigma$, $\xi \cup \lambda \alpha, \chi$ о тоv, $\kappa \alpha \lambda \alpha \mu \eta v$ ). The durable materials are three (gold, silver, marble or precious stones), perishable materials (pieces of wood, hay, stubble), "of a palace on the one hand, of a mud hut on the other" (Lightfoot). Gold was freely used by the ancients in their palaces. Their marble and granite pillars are still the wonder and despair of modern men. The wooden huts had hay ( $\chi$ ортоৎ, grass, as in Mr 6:39) and stubble ( $\kappa \lambda \alpha \mu \eta$, old word for stubble after the grain is cut, here alone in the N.T., though in LXX as Ex 5:12) which were employed to hold the wood pieces together and to thatch the roof. It is not made clear whether Paul's metaphor refers to the persons as in God's building in verse 9 or to the character of the teaching as in verse 13 . Probably both ideas are involved, for look at the penalty on shoddy work (verse 15) and shoddy men (verse 17). The teaching may not always be vicious and harmful. It may only be indifferent and worthless. A co-worker with God in this great temple should put in his very best effort.

1Cor 3:13
The day ( $\eta \eta \mu \varepsilon \rho \alpha$ ). The day of judgment as in 1Th 5:4 (which see), Ro 13:12; Heb 10:25 . The work ( $\varepsilon \rho \gamma \circ v$ ) of each will be made manifest. There is no escape from this final testing.

It is revealed in fire ( $\varepsilon v \pi v \rho \alpha \pi о \kappa \alpha \lambda \cup \pi \tau \varepsilon \tau \alpha$ ). Apparently "the day" is the subject of the verb, not the work, not the Lord. See 2Th 1:8; 2:8. This metaphor of fire was employed in the O.T. (Da 7:9f.; Mal 4:1) and by John the Baptist (Mt 3:12; Lu 3:16f. ). It is a metaphor that must not be understood as purgatorial, but simple testing (Ellicott) as every fire tests (
 building,
of what sort it is (oтoov $\varepsilon \sigma \tau \iota v)$, qualitative relative pronoun. Men today find, alas, that some of the fireproof buildings are not fireproof when the fire actually comes.

1Cor 3:14
If any man's work shall abide ( $\varepsilon \tau \tau v o \varsigma ~ \tau o ~ \varepsilon \rho \gamma o v \mu \varepsilon v \varepsilon$ ). Condition of the first class with future indicative, determined as fulfilled, assumed as true. When the fire has done its work, what is left? That is the fiery test that the work of each of us must meet. Suitable reward (Mt 20:8) will come for the work that stands this test (gold, silver, precious stones)

1Cor 3:15
Shall be burned (катакаךбєєа). First-class condition again, assumed as true. Second future (late form) passive indicative of катакаเ $\omega$, to burn down, old verb. Note perfective use of preposition $\kappa \alpha \tau \alpha$, shall be burned down. We usually say "burned up," and that is true also, burned up in smoke.

He shall suffer loss ( $\zeta \eta \mu \omega \theta \eta \eta \sigma \varepsilon \tau \alpha)$. First future passive indicative of $\zeta \eta \mu \omega \omega$, old verb from $\zeta \eta \mu \boldsymbol{\alpha}$ (damage, loss), to suffer loss. In Mt 16:26; Mr 8:36; Lu 9:25 the loss is stated to be the man's soul ( $\psi v \times \eta v$ ) or eternal life. But here there is no such total loss as that. The man's work ( $\varepsilon \rho \gamma \circ v$ ) is burned up (sermons, lectures, books, teaching, all dry as dust).

But he himself shall be saved ( $\alpha \cup \tau o \varsigma ~ \delta \varepsilon \sigma \omega \theta \eta \sigma \varepsilon \tau \alpha$ ). Eternal salvation, but not by purgatory. His work is burned up completely and hopelessly, but he himself escapes destruction because he is really a saved man a real believer in Christ.

Yet so as through fire ( $0 \cup \tau \omega \varsigma \delta \varepsilon \omega \varsigma \delta \iota \alpha \pi \nu \rho o \varsigma)$. Clearly Paul means with his work burned down (verse 15). It is the tragedy of a fruitless life, of a minister who built so poorly on the true foundation that his work went up in smoke. His sermons were empty froth or windy words without edifying or building power. They left no mark in the lives of the hearers. It is the picture of a wasted life. The one who enters heaven by grace, as we all do who are saved, yet who brings no sheaves with him. There is no garnered grain the result of his labours in the harvest field. There are no souls in heaven as the result of his toil for Christ, no enrichment of character, no growth in grace.

1Cor 3:16
Ye are a temple of God (vaoc $\theta \varepsilon o v \varepsilon \sigma \tau \varepsilon$ ). Literally, a sanctuary (vaoc, not $\varepsilon \varepsilon \rho \circ v$, the sacred enclosure, but the holy place and the most holy place) of God. The same picture of building as in verse 9 (оккобонף), only here the sanctuary itself.

Dwelleth in you ( $\varepsilon v \cup \mu \nu v$ огк $)$. The Spirit of God makes his home (oık $\varepsilon$ ) in us, not in temples made with hands (Ac 7:48; 17:24).

1Cor 3:17
Destroyeth ( $\varphi \theta \varepsilon \rho \rho \varepsilon$ ). The outward temple is merely the symbol of God's presence, the Shechinah (the Glory). God makes his home in the hearts of his people or the church in any given place like Corinth. It is a terrible thing to tear down ruthlessly a church or temple of God like an earthquake that shatters a building in ruins. This old verb $\varphi \theta \varepsilon ı \rho \omega$ means to corrupt, to deprave, to destroy. It is a gross sin to be a church-wrecker. There are actually a few preachers who leave behind them ruin like a tornado in their path.

Him shall God destroy ( $\varphi \theta \varepsilon \rho \varepsilon$ тoutov o $\theta \varepsilon \circ \varsigma)$. There is a solemn repetition of the same verb in the future active indicative. The condition is the first class and is assumed to be true. Then the punishment is certain and equally effective. The church-wrecker God will wreck. What does Paul mean by "will destroy"? Does he mean punishment here or hereafter? May it not be both? Certainly he does not mean annihilation of the man's soul, though it may well include eternal punishment. There is warning enough here to make every pastor pause before he tears a church to pieces in order to vindicate himself.

Holy ( $\alpha \boldsymbol{\gamma} \circ \varsigma$ ). Hence deserves reverential treatment. It is not the building or house of which Paul speaks as "the sanctuary of God" ( $\tau 0 v$ vaov $\tau 0 v \theta$ हov), but the spiritual organization or organism of God's people in whom God dwells, "which temple ye are" (oıtıvءৎ عбтє
$\nu \mu \varepsilon ı \varsigma)$. The qualitative relative pronoun oוtıvعৎ is plural to agree with $\nu \mu \varepsilon \iota \varsigma ~(y e) ~ a n d ~ r e f e r s ~$ to the holy temple just mentioned. The Corinthians themselves in their angry disputes had forgotten their holy heritage and calling, though this failing was no excuse for the ringleaders who had led them on. In 6:19 Paul reminds the Corinthians again that the body is the temple (vaoc, sanctuary) of the Holy Spirit, which fact they had forgotten in their immoralities.

1Cor 3:18
Let no man deceive himself ( $\mathrm{M} \eta \delta \varepsilon ı \varsigma ~ \varepsilon \alpha u \tau o v \varepsilon \xi \alpha \pi \alpha \tau \omega$ ). A warning that implied that some of them were guilty of doing it ( $\mu \eta$ and the present imperative). Excited partisans can easily excite themselves to a pious phrenzy, hypnotize themselves with their own supposed devotion to truth.

Thinketh that he is wise ( $\delta о к \varepsilon ~ \sigma о \varphi о \varsigma ~ \varepsilon ı v \alpha) . ~ C o n d i t i o n ~ o f ~ f i r s t ~ c l a s s ~ a n d ~ a s s u m e d ~ t o ~ b e ~$ true. Predicate nominative $\sigma о \varphi \circ \varsigma$ with the infinitive to agree with subject of $\delta$ окع (Robertson, Grammar, p. 1038). Paul claimed to be "wise" himself in verse 10 and he desires that the claimant to wisdom may become wise ( $\imath \alpha \alpha \gamma \varepsilon \eta \eta \tau \alpha \sigma \circ \circ \varsigma$, purpose clause with iva and subjunctive) by becoming a fool ( $\mu \omega \rho \circ \varsigma \gamma \varepsilon \nu \varepsilon \sigma \theta \omega$, second aorist middle imperative of $\gamma \iota \nu \circ \mu \alpha$ ) as this age looks at him. This false wisdom of the world ( $1: 18-20,23 ; 2: 14$ ), this self-conceit, has led to strife and wrangling. Cut it out.

1Cor 3:19
Foolishness with God ( $\mu \omega \rho \iota \alpha \pi \alpha \rho \alpha \tau \omega \theta \varepsilon \omega$ ). Whose standard does a church (temple) of God wish, that of this world or of God? The two standards are not the same. It is a pertinent inquiry with us all whose idea rules in our church. Paul quotes Job 5:13.

That taketh (o $\delta \rho \alpha \sigma \sigma \sigma \mu \varepsilon v o \varsigma)$. Old verb $\delta \rho \alpha \sigma \sigma o \mu \alpha$, to grasp with the hand, is used here for the less vivid word in the LXX кат $\alpha \lambda \alpha \mu \beta \alpha v \omega v$. It occurs nowhere else in the N.T., but appears in the papyri to lay hands on. Job is quoted in the N.T. only here and in Ro 11:35 and both times with variations from the LXX. This word occurs in Ecclesiasticus 26:7; 34:2. In Ps 2:12 the LXX has $\delta \rho \alpha \xi \alpha \sigma \theta \varepsilon \pi \alpha \iota \delta \varepsilon ı \alpha$, , lay hold on instruction.

Craftiness ( $\pi \alpha v o v \rho \gamma(\alpha)$. The $\pi \alpha v o v \rho \gamma o \varsigma ~ m a n ~ i s ~ r e a d y ~ f o r ~ a n y ~ o r ~ a l l ~ w o r k ~(i f ~ b a d ~ e n o u g h) . ~$ So it means versatile cleverness (Robertson and Plummer), astutia (Vulgate).

1Cor 3:20
And again ( $\kappa \alpha \pi \alpha \lambda ı v$ ). Another confirmatory passage from Ps 94:11.
Reasonings ( $\delta$ ı $\alpha$ 入oүı $\sigma \mu$ оиऽ). More than cogitationes (Vulgate), sometimes disputations (Php 2:14). Paul changes "men" of LXX to wise ( $\sigma \circ \varphi \omega v$ ) in harmony with the Hebrew context.

Vain ( $\mu \alpha \tau \alpha \omega$ ). Useless, foolish, from $\mu \alpha \tau \eta$, a futile attempt.
1Cor 3:21
Wherefore let no one glory in men ( $\omega \sigma \tau \varepsilon \mu \eta \delta \varepsilon \iota \varsigma \kappa \alpha \cup \chi \alpha \sigma \theta \omega \varepsilon v \alpha v \theta \rho \omega \pi \sigma \iota \varsigma)$. The conclusion ( $\omega \sigma \tau \varepsilon$ ) from the self-conceit condemned. This particle here is merely inferential
with no effect on the construction ( $\omega \sigma+\tau \varepsilon=$ and so) any more than ouv would have, a paratactic conjunction. There are thirty such examples of $\omega \sigma \tau \varepsilon$ in the N.T., eleven with the imperative as here (Robertson, Grammar, p. 999). The spirit of glorying in party is a species of self-conceit and inconsistent with glorying in the Lord (1:31).

1Cor 3:22
Yours $(\nu \mu \omega v)$. Predicate genitive, belong to you. All the words in this verse and 23 are anarthrous, though not indefinite, but definite. The English reproduces them all properly without the definite article except коб $\mu$ ऽ (the world), and even here just world will answer. Proper names do not need the article to be definite nor do words for single objects like world, life, death. Things present ( $\varepsilon \nu \varepsilon \sigma \tau \omega \tau \alpha$, second perfect participle of $\varepsilon \nu เ \sigma \tau \eta \mu$ ) and things to come divide two classes. Few of the finer points of Greek syntax need more attention than the absence of the article. We must not think of the article as "omitted" (Robertson, Grammar, p. 790). The wealth of the Christian includes all things, all leaders, past, present, future, Christ, and God. There is no room for partisan wrangling here.

## 1 Corinthians 4

1Cor 4:1
 Covenant (1Co 3:5) are under-rowers, subordinate rowers of Christ, only here in Paul's Epistles, though in the Gospels ( $\operatorname{Lu}$ 4:20 the attendant in the synagogue) and the Acts (Ac 13:5 ) of John Mark. The
so (ovtcc) gathers up the preceding argument (3:5-23) and applies it directly by the
as $(\omega \varsigma)$ that follows.
Stewards of the mysteries of God (oוкоvo $\mu о v \varsigma \mu v \sigma \tau \eta \rho I \omega v \theta \varepsilon \sigma v$ ). The steward or house manager (окоৎ, house, $\nu \varepsilon \mu \omega$, to manage, old word) was a slave ( $\delta$ ou $\lambda o \varsigma$ ) under his lord (кupıoc, Lu 12:42), but a master (Lu 16:1) over the other slaves in the house (menservants
 ). Hence the under-rower (v $\quad \eta \rho \varepsilon \tau \eta \varsigma$ ) of Christ has a position of great dignity as steward (oıкоvoноऽ) of the mysteries of God. Jesus had expressly explained that the mysteries of the kingdom were open to the disciples (Mt 13:11). They were entrusted with the knowledge of some of God's secrets though the disciples were not such apt pupils as they claimed to be (Mt 13:51; 16:8-12 ). As stewards Paul and other ministers are entrusted with the mysteries (see on 1Co 2:7 for this word) of God and are expected to teach them. "The church is the
 2:19)" (Lightfoot). Paul had a vivid sense of the dignity of this stewardship (oккоvoнia) of God given to him (Col 1:25; Eph 1:10). The ministry is more than a mere profession or trade. It is a calling from God for stewardship.

1Cor 4:2
Here ( $\omega \delta \varepsilon$ ). Either here on earth or in this matter. It is always local.
 for what is left, besides.

It is required ( $\zeta \eta \tau \varepsilon \iota \tau \alpha$ ). It is sought. Many MSS. read $\zeta \eta \tau \varepsilon \iota \varepsilon$, ye seek, an easy change as $\alpha$ and $\varepsilon$ came to be pronounced alike (Robertson, Grammar, p. 186).

That a man be found faithful (ıva $\tau \iota \sigma \tau o \varsigma \tau \iota \varsigma \varepsilon v \rho \varepsilon \theta \eta$ ). Non-final use of $\iota v a$ with first aorist passive subjunctive of $\varepsilon u \rho เ \sigma \kappa \omega$, the result of the seeking $(\zeta \eta \tau \varepsilon \omega)$. Fidelity is the essential requirement in all such human relationships, in other words, plain honesty in handling money like bank-clerks or in other positions of trust like public office.

1Cor 4:3
But with me ( $\varepsilon \mu \mathrm{o} \delta \varepsilon$ ). The ethical dative of personal relation and interest, "as I look at my own case." Cf. Php 1:21.

It is a very small thing ( $\left.\varepsilon \varsigma \varsigma \_\lambda \alpha \chi เ \sigma \tau 0 v \varepsilon \sigma \tau \iota v\right)$. This predicate use of $\varepsilon ા \varsigma$ is like the Hebrew, but it occurs also in the papyri. The superlative e $\lambda \alpha \chi$ ıotov is elative, very little, not the true superlative, least. "It counts for very little with me."

That I should be judged of you ( $\iota v \alpha \nu \varphi^{\prime} \nu \mu \omega \nu \alpha v a \kappa \rho ı \theta \omega$ ). Same use of $t v a$ as in verse 2. For the verb (first aorist passive subjunctive of $\alpha v a \kappa \rho เ v \omega)$ see on 1Co 2:14f . Paul does not despise public opinion, but he denies "the competency of the tribunal" in Corinth (Robertson and Plummer) to pass on his credentials with Christ as his Lord.
 to the Lord's Day (der Tag) in 3:13. "That is the tribunal which the Apostle recognizes; a human tribunal he does not care to satisfy" (Robertson and Plummer).

Yea, I judge not mine own self ( $\alpha \lambda \lambda^{\prime}$ ov $\delta \varepsilon \varepsilon \mu \alpha \nu \tau о v ~ \alpha v a \kappa \rho ı v \omega$ ). A $\lambda \lambda \alpha$ here is confirmatory, not adversative. "I have often wondered how it is that every man sets less value on his own opinion of himself than on the opinion of others" (M. Aurelius, xii. 4. Translated by Robertson and Plummer). Paul does not even set himself up as judge of himself.

1Cor 4:4
For I know nothing against myself ( $o v \delta \varepsilon v \gamma \alpha \rho \varepsilon \mu \alpha \cup \tau \omega \sigma v v o t \delta \alpha$ ). Not a statement of fact, but an hypothesis to show the unreliability of mere complacent self-satisfaction. Note the use of $\sigma u v o r \delta \alpha$ (second perfect active indicative with dative (disadvantage) of the reflexive pronoun) for guilty knowledge against oneself (cf. Ac 5:2; 12:12; 14:6 ).

Yet ( $\alpha \lambda \lambda^{\prime}$ ). Adversative use of $\alpha \lambda \lambda \alpha$.
Am I not hereby justified (ovk $\varepsilon v \tau \operatorname{\tau ov} \tau \omega \delta \varepsilon \delta ı \kappa \alpha \iota \omega \mu \alpha$ ). Perfect passive indicative of state of completion. Failure to be conscious of one's own sins does not mean that one is innocent. Most prisoners plead "not guilty." Who is the judge of the steward of the mysteries of God? It is the Lord "that judgeth me" (o avak $\rho v \omega v \mu \varepsilon$ ). Probably, who examines me and then passes on my fidelity ( $\pi \iota \sigma \tau \circ$, in verse 2 ).

1Cor 4:5
Wherefore ( $\omega \sigma \tau \varepsilon$ ). As in 3:21 which see.
 See the words of Jesus in Mt 7:1. The censorious habit was ruining the Corinthian Church.

Before the time ( $\pi \rho \circ$ кal $\rho o v$ ). The day of the Lord in 3:13. "Do not therefore anticipate the great judgment (крьбıऽ) by any preliminary investigation (аvaкрıбıя) which must be futile and incomplete" (Lightfoot).

Until the Lord come ( $\varepsilon \omega \varsigma \alpha v \varepsilon \lambda \theta \eta$ о кטрıоৎ). Common idiom of $\varepsilon \omega \varsigma$ and the aorist subjunctive with or without $\alpha v$ for a future event. Simple futurity, but held forth as a glorious hope, the Second Coming of the Lord Jesus as Judge.

Who will both bring to light ( $\varsigma \varsigma \kappa \alpha \varphi \tau \tau \sigma \varepsilon$ ). Future indicative of this late verb (in papyri also) from $\varphi \omega \varsigma$ (light), to turn the light on the hidden things of darkness.

And make manifest ( $\kappa \alpha \varphi \alpha v \varepsilon \rho \omega \sigma \varepsilon$ ). (Ionic and late) causative verb $\varphi \alpha v \varepsilon \rho \circ \omega$ from pavepoc. By turning on the light the counsels of all hearts stand revealed.

His praise (o $\varepsilon \pi \alpha, v o \varsigma)$. The praise (note article) due him from God (Ro 2:29) will come to each then ( (от $\varepsilon$ ) and not till then. Meanwhile Paul will carry on and wait for the praise from God.

1Cor 4:6
I have in a figure transferred ( $\mu \varepsilon \tau \varepsilon \sigma \chi \eta \mu \alpha \tau \iota \sigma \alpha$ ). First aorist active (not perfect) indicative of $\mu \varepsilon \tau \alpha-\sigma \chi \eta \mu \alpha \tau \iota \zeta \omega$, used by Plato and Aristotle for changing the form of a thing (from $\mu \varepsilon \tau \alpha$, after, and $\sigma \chi \eta \mu \alpha$, form or habit, like Latin habitus from $\varepsilon \chi \omega$ and so different from $\mu \circ \rho \varphi \eta$ as in Php 2:7; Ro 12:2 ). For the idea of refashioning see Field, Notes, p. 169f. and Preisigke, Fachworter). Both Greek and Latin writers (Quintilian, Martial) used $\sigma \chi \eta \mu \alpha$ for a rhetorical artifice. Paul's use of the word (in Paul only in N.T.) appears also further in 2Co 11:13-15 where the word occurs three times, twice of the false apostles posing and passing as apostles of Christ and ministers of righteousness, and once of Satan as an angel of light, twice with $\varepsilon \iota \varsigma$ and once with $\omega \varsigma$. In Php 3:21 the word is used for the change in the body of our humiliation to the body of glory. But here it is clearly the rhetorical figure for a veiled allusion to Paul and Apollos "for your sakes" ( $\delta \iota \alpha \nu \mu \alpha \varsigma)$.

That in us ye may learn ( $i v \alpha \varepsilon v \eta \mu \nu \nu \mu \theta \eta \tau \varepsilon$ ). Final clause with $t v \alpha$ and the second aorist active subjunctive of $\mu \alpha v \theta \alpha v \omega$, to learn. As an object lesson in our cases ( $\varepsilon v \eta \mu v \nu$ ). It is no more true of Paul and Apollos than of other ministers, but the wrangles in Corinth started about them. So Paul boldly puts himself and Apollos to the fore in the discussion of the principles involved.

Not to go beyond the things which are written ( $\tau 0 \mathrm{M} \eta \quad \cup \pi \varepsilon \rho$ a $\gamma \varepsilon \gamma \rho \alpha \pi \tau \alpha$ ). It is difficult to reproduce the Greek idiom in English. The article to is in the accusative case as the object of the verb $\mu \alpha \theta \eta \tau \varepsilon$ (learn) and points at the words "M $\quad \nu \pi \varepsilon \rho$ a $\gamma \varepsilon \gamma \rho \alpha \pi \tau \alpha$," apparently a proverb or rule, and elliptical in form with no principal verb expressed with $\mu \eta$, whether "think" (Auth.) or "go" (Revised). There was a constant tendency to smooth out Paul's ellipses as in 2Th 2:3; 1Co 1:26,31. Lightfoot thinks that Paul may have in mind O.T. passages quoted in 1Co 1:19,31; 3:19,20.

That ye be not puffed up ( $\imath v \alpha \mu \eta \varphi v \sigma \iota o v \sigma \theta \varepsilon$ ). Sub-final use of $1 v \alpha$ (second use in this sentence) with notion of result. It is not certain whether $\varphi \cup \sigma 10 v \sigma \theta \varepsilon$ (late verb form like $\varphi \cup \sigma ı \alpha \omega, \varphi \cup \sigma \alpha \omega$, to blow up, to inflate, to puff up), used only by Paul in the N.T., is present indicative with $\iota v \alpha$ like $\zeta \eta \lambda o u \tau \varepsilon$ in Ga 4:17 (cf. $\iota v \alpha \gamma \iota v \omega \sigma \kappa о \mu \varepsilon v$ in 1Jo 5:20) or the present subjunctive by irregular contraction (Robertson, Grammar, pp. 203, 342f.), probably the present indicative. Фuбıo $\omega$ is from $\varphi$ voıc (nature) and so meant to make natural, but it is used by Paul just like $\varphi$ voaw or $\varphi$ vбıa $\omega$ (from $\varphi$ voa, a pair of bellows), a vivid picture of self-conceit.
 precise idea of this idiom of partitive apposition. This is the rule with partisans. They are "for" (vாєр) the one and "against" ( $\kappa \alpha \tau \alpha$, down on, the genitive case) the other ( $\tau 0 v \varepsilon \tau \varepsilon \rho \circ \cup$, not merely another or a second, but the different sort, $\varepsilon \tau \varepsilon \rho \circ \delta \circ \xi$ ).

1 Cor 4:7
Maketh thee to differ ( $\sigma \varepsilon \delta \iota \alpha \kappa \rho \iota v \varepsilon$ ). Distinguishes thee, separates thee. $\Delta \iota \alpha \kappa \rho \iota v \omega$ means to sift or separate between ( $\delta(\alpha)$ as in Ac 15:9 (which see) where $\mu \varepsilon \tau \alpha \xi_{v}$ is added to make it plainer. All self-conceit rests on the notion of superiority of gifts and graces as if they were self-bestowed or self-acquired.

Which thou didst not receive (o ovк $\varepsilon \lambda \alpha \beta \varepsilon \varsigma)$. "Another home-thrust" (Robertson and Plummer). Pride of intellect, of blood, of race, of country, of religion, is thus shut out.

Dost thou glory (каuүаба). The original second person singular middle ending - $\sigma \alpha$ is here preserved with variable vowel contraction, $\kappa \alpha \cup \chi \propto \varepsilon \sigma \alpha \mathrm{l}=\kappa \alpha \cup \chi \alpha \sigma \alpha$ (Robertson, Grammar, p. 341). Paul is fond of this old and bold verb for boasting.

As if thou hadst not received it ( $\omega \varsigma \mu \eta \lambda \alpha \beta \omega v$ ). This neat participial clause (second aorist active of $\lambda \alpha \mu \beta \alpha v \omega$ ) with $\omega \varsigma$ (assumption) and negative $\mu \eta$ punctures effectually the inflated bag of false pride. What pungent questions Paul has asked. Robertson and Plummer say of Augustine, "Ten years before the challenge of Pelagius, the study of St. Paul's writings, and especially of this verse and of Ro 9:16, had crystallized in his mind the distinctively Augustinian doctrines of man's total depravity, of irresistible grace, and of absolute predestination." Human responsibility does exist beyond a doubt, but there is no foundation for pride and conceit.

1Cor 4:8
Already are ye filled? ( $\eta \delta \eta \kappa \varepsilon \kappa о \rho \varepsilon \sigma \mu \varepsilon v o ~ \varepsilon \sigma \tau \varepsilon$ ?). Perfect passive indicative, state of completion, of корعvvv $\mu$, old Greek verb to satiate, to satisfy. The only other example in N.T. is Ac 27:38 which see. Paul may refer to De 31:20; $32: 15$. But it is keen irony, even sarcasm. Westcott and Hort make it a question and the rest of the sentence also.

Already ye are become rich ( $\eta \delta \eta \varepsilon \pi \lambda$ ovt $\eta \sigma \alpha \tau \varepsilon$ ). Note change to ingressive aorist indicative of $\pi \lambda$ out $\omega$, old verb to be rich (cf. 2Co 8:9 ). "The aorists, used instead of perfects, imply indecent haste" (Lightfoot). "They have got a private millennium of their own" (Robertson \& Plummer) with all the blessings of the Messianic Kingdom (Lu 22:29f.; 1Th 2:12; 2Ti 2:12 ).

Ye have reigned without us ( $\chi \omega \rho \iota \varsigma \mu \omega v \varepsilon \beta \alpha \sigma \iota \lambda \varepsilon v \sigma \alpha \tau \varepsilon$ ). Withering sarcasm. Ye became kings without our company. Some think that Paul as in 3:21 is purposely employing Stoic phraseology though with his own meanings. If so, it is hardly consciously done. Paul was certainly familiar with much of the literature of his time, but it did not shape his ideas.

I would that ye did reign ( $\kappa \alpha$ op $\varepsilon \lambda o v \gamma \varepsilon \varepsilon \beta \alpha \sigma \iota \lambda \varepsilon v \sigma \alpha \tau \varepsilon$ ). More exactly, "And would at least that ye had come to reign (or become kings)." It is an unfulfilled wish about the past
expressed by $0 \varphi \varepsilon \lambda o v$ and the aorist indicative instead of $\varepsilon \gamma \alpha \rho$ and the aorist indicative (the ancient idiom). See Robertson, Grammar, p. 1003, for the construction with particle $0 \varphi \varepsilon \lambda o v$ (an unaugmented second aorist form).

That we also might reign with you (ıva ка $\eta \mu \varepsilon ı \varsigma ~ v \mu \nu v \sigma v \nu \beta \alpha \sigma \iota \lambda \varepsilon v \sigma \omega \mu \varepsilon v$ ). Ironical contrast to $\chi \omega \rho \iota \varsigma \eta \mu \omega v \varepsilon \beta \alpha \sigma \iota \lambda \varepsilon v \sigma \alpha \tau \varepsilon$, just before. Associative instrumental case of $v \mu \nu v$ after ouv-.

1Cor 4:9
 first aorist active indicative of $\alpha \pi \mathrm{o} \delta \varepsilon ו \kappa \nu v \mu$, old verb to show, to expose to view or exhibit (Herodotus), in technical sense (cf. 2Th 2:4) for gladiatorial show as in $\varepsilon \theta \eta \rho \ldots \rho \mu \alpha \eta \sigma \alpha$ (1Co 15:32). In this grand pageant Paul and other apostles come last ( $\varepsilon \sigma \chi \alpha \tau o v \varsigma$, predicate accusative after $\alpha \pi \varepsilon \delta \varepsilon ı \xi \varepsilon v)$ as a grand finale.

As men doomed to die ( $\omega \varsigma \varepsilon \pi \iota \theta \alpha v a \tau \iota o v \varsigma)$. Late word, here alone in N.T. The LXX (Bel and the Dragon 31) has it for those thrown daily to the lions. Dionysius of Halicarnassus (A.R. vii. 35) uses it of those thrown from the Tarpeian Rock. The gladiators would say morituri salutamus. All this in violent contrast to the kingly Messianic pretensions of the Corinthians.

A spectacle ( $\theta \varepsilon \alpha \tau \rho o v)$. Cf. Heb 11:33-40. The word, like our theatre, means the place of the show (Ac 19:29,31). Then, it means the spectacle shown there ( $\theta \varepsilon \alpha \mu \alpha$ or $\theta \varepsilon \alpha$ ), and, as here, the man exhibited as the show like the verb $\theta \varepsilon \alpha \tau \rho \iota \zeta о \mu \varepsilon v o$, made a spectacle (Heb 10:33 ). Sometimes it refers to the spectators ( $\theta \varepsilon \alpha \tau \alpha)$ like our "house" for the audience. Here the spectators include "the world, both to angels and men" ( $\tau \omega$ коб $\mu \omega$ ка а $\gamma \gamma \varepsilon \lambda$ оья ка $\alpha v \theta \rho \omega \pi \sigma \iota \varsigma)$, dative case of personal interest.

1Cor 4:10
We--you ( $\eta \mu \varepsilon ו \sigma--\nu \mu \varepsilon ı \varsigma)$. Triple contrast in keenest ironical emphasis. "The three antitheses refer respectively to teaching, demeanour, and worldly position" (Robertson and Plummer). The apostles were fools for Christ's sake (2Co 4:11; Php 3:7 ). They made "union with Christ the basis of worldly wisdom" (Vincent). There is change of order (chiasm) in the third ironical contrast. They are over strong in pretension. Ev $\delta 0 \xi_{o c}$, illustrious, is one of the 103 words found only in Luke and Paul in the N.T. Notion of display and splendour.

1Cor 4:11
Even unto this present hour ( $\alpha \chi \rho \tau \eta \varsigma \alpha \rho \tau \omega \rho \alpha \varsigma)$. A $\rho \tau$ (just now, this very minute) accents the continuity of the contrast as applied to Paul. Ten verbs and four participles from 11-13 give a graphic picture of Paul's condition in Ephesus when he is writing this epistle.

```
We hunger ( \(\pi \varepsilon \downarrow \omega \omega \mu \varepsilon v\) ),
we thirst ( \(\delta \iota \psi \omega \mu \varepsilon \nu\) ),
are naked ( \(\gamma \nu \mu \nu \iota \tau \varepsilon \cup \rho \mu \varepsilon)\), late verb for scant clothing from \(\gamma \nu \mu \nu \eta \tau \eta \varsigma\),
```

 the few N.T. and ecclesiastical words and see on Mt 26:67,
have no certain dwelling place ( $\alpha \sigma \tau \alpha \tau \sigma u \mu \varepsilon v$ ) from $\alpha \sigma \tau \alpha \tau o \varsigma$, strolling about and only here save Anthol. Pal. and Aquila in Isa 58:7. Field in Notes, p. 170 renders 1Co 4:11 "and are vagabonds" or spiritual hobos.

1Cor 4:12
We toil ( $\kappa о \pi \iota \omega \mu \varepsilon v)$. Common late verb for weariness in toil ( $\mathrm{Lu} 5: 5$ ),
 and not simply for himself but also for Aquila and Priscilla as he explains in Ac 20:34. This personal touch gives colour to the outline. Paul alludes to this fact often (1Th 2:9; 2Th 3:8; 1Co 9:6; 2Co 11:7). "Greeks despised manual labour; St. Paul glories in it" (Robertson and Plummer). Cf. Deissmann, Light, etc., p. 317.

Being reviled we bless ( $\lambda o t \delta o \rho o v \mu \varepsilon v o ~ \varepsilon v \lambda o \gamma o v \mu \varepsilon v$ ). Almost the language of Peter about Jesus (1Pe 2:23) in harmony with the words of Jesus in Mt 5:44; Lu 6:27.

Being persecuted we endure ( $\delta \omega \kappa \kappa \circ \mu \varepsilon v o ~ \alpha \nu \varepsilon \chi \circ \mu \varepsilon \theta \alpha$ ). We hold back and do not retaliate. Turn to Paul's other picture of his experiences in the vivid contrasts in 2Co 4:7-10; 6:3-10 for an interpretation of his language here.

1Cor 4:13
Being defamed we intreat ( $\delta v \sigma \varphi \eta \mu о \nu \mu \varepsilon v o \quad \pi \alpha \rho \alpha \kappa \alpha \lambda о \nu \mu \varepsilon v)$. The participle $\delta \nu \sigma \varphi \eta \mu \sigma \nu \mu \varepsilon v o$ is an old verb (in I Macc. 7:41) to use ill, from $\delta \nu \sigma \varphi \eta \mu \circ \varsigma$, but occurs here only in the N.T. Paul is opening his very heart now after the keen irony above.

As the filth of the world ( $\omega \varsigma \pi \varepsilon \rho \kappa \kappa \alpha \theta \rho \mu \alpha \tau \alpha$ tov коб $\mu \circ v$ ). Literally, sweepings, rinsings, cleansings around, dust from the floor, from $\pi \varepsilon \rho ı \kappa \alpha \not \theta ı \rho \omega$, to cleanse all around (Plato and Aristotle) and so the refuse thrown off in cleansing. Here only in the N.T. and only twice elsewhere. KaӨap $\mu \alpha$ was the refuse of a sacrifice. In $\operatorname{Pr} 21: 18 \pi \varepsilon \rho ı \kappa \alpha \theta \alpha \rho \mu \alpha$ occurs for the scapegoat. The other example is Epictetus iii. 22,78, in the same sense of an expiatory offering of a worthless fellow. It was the custom in Athens during a plague to throw to the sea some wretch in the hope of appeasing the gods. One hesitates to take it so here in Paul, though Findlay thinks that possibly in Ephesus Paul may have heard some such cry like that in the later martyrdoms Christiani ad leones. At any rate in 1Co 15:32 Paul says "I fought with wild beasts" and in 2Co 1:9 "I had the answer of death." Some terrible experience may be alluded to here. The word shows the contempt of the Ephesian populace for Paul as is shown in Ac 19:23-41 under the influence of Demetrius and the craftsmen.

The offscouring of all things ( $\pi \alpha \nu \tau \omega v \pi \varepsilon \rho \iota \psi \eta \mu \alpha)$. Late word, here only in N.T., though in Tob. 5:18. The word was used in a formula at Athens when victims were flung into the sea, $\pi \varepsilon \rho ı \psi \eta \mu \alpha \eta \mu \omega \nu \gamma \varepsilon v o v$ (Became a $\pi \varepsilon \rho ı \psi \eta \mu \alpha$ for us), in the sense of expiation. The word merely means scraping around from $\pi \varepsilon \rho \iota \psi \alpha \omega$, offscrapings or refuse. That is probably the idea here as in Tob. 5:18. It came to have a complimentary sense for the Christians who in
a plague gave their lives for the sick. But it is a bold figure here with Paul of a piece with $\pi \varepsilon \rho ı к \alpha \theta \alpha \rho \mu \alpha \tau \alpha$.

1Cor 4:14
To shame you ( $\varepsilon v \tau \rho \varepsilon \pi \omega \nu$ ). Literally, shaming you (present active participle of $\varepsilon v \tau \rho \varepsilon \pi \omega$ ), old verb to turn one on himself either middle or with reflexive pronoun and active, but the reflexive eavtoıs is not expressed here. See on 2Th 3:14. The harsh tone has suddenly changed.

1Cor 4:15
To admonish ( $v o v \theta \varepsilon \tau \omega v$ ). Literally, admonishing (present active participle of vou $\theta \varepsilon \tau \varepsilon \omega$ ). See on 1Th 5:12,14.

For though ye should have ( $\varepsilon \alpha \nu \gamma \alpha \rho \varepsilon \chi \eta \tau \varepsilon)$. Third-class condition undetermined, but with prospect of being determined ( $\varepsilon \alpha v$ and present subjunctive), "for if ye have."

Tutors ( $\pi \alpha \iota \delta \alpha \omega \gamma \circ \cup \varsigma)$. This old word ( $\pi \alpha \iota \varsigma$, boy, $\alpha \gamma \omega \gamma \circ \varsigma$, leader) was used for the guide or attendant of the child who took him to school as in Ga 3:24 (Christ being the schoolmaster) and also as a sort of tutor who had a care for the child when not in school. The papyri examples (Moulton and Milligan, Vocabulary) illustrate both aspects of the paedagogue. Here it is the "tutor in Christ" who is the Teacher. These are the only two N.T. examples of the common word.

I begot you ( $v \mu \alpha \varsigma \varepsilon \gamma \varepsilon \nu \nu \eta \sigma \alpha$ ). Paul is their
spiritual father in Christ, while Apollos and the rest are their
tutors in Christ.
1Cor 4:16
Be ye imitators of me ( $\mu \iota \eta \tau \alpha \mu \circ v \gamma เ v \varepsilon \sigma \theta \varepsilon$ ). "Keep on becoming (present middle imperative) imitators of me (objective genitive)." $М \nmid \mu \eta \tau \eta \varsigma$ is an old word from $\mu \mu \varepsilon \sigma \mu \alpha$, to copy, to mimic ( $\mu \mu \boldsymbol{)}$ ). Paul stands for his rights as their spiritual father against the pretensions of the Judaizers who have turned them against him by the use of the names of Apollos and Cephas.

1Cor 4:17
Have I sent $(\varepsilon \pi \varepsilon \mu \psi \alpha)$. First aorist active indicative. Probably Timothy had already gone as seems clear from 16:10f. Apparently Timothy came back to Ephesus and was sent on to Macedonia before the uproar in Ephesus (Ac 19:22 ). Probably also Titus was then despatched to Corinth, also before the uproar.

In every church ( $\varepsilon v \pi \alpha \sigma \eta \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$ ). Paul expects his teachings and practices to be followed in every church (1Co 14:33 ). Note his language here "my ways those in Christ Jesus." Timothy as Paul's spokesman
will remind ( $\alpha v \alpha \mu \nu \eta \sigma \varepsilon$ ) the Corinthians of Paul's teachings.
1Cor 4:18

Some are puffed up ( $\varepsilon \varphi v \sigma \omega \omega \theta \eta \sigma \alpha v$ ). First aorist (effective) passive indicative of $\varphi v \sigma \iota \sigma$ which see on verse 6 .

As though I were not coming to you ( $\omega \varsigma \mu \eta \varepsilon \rho \chi \circ \mu \varepsilon v o v \mu \circ v \pi \rho \circ \varsigma v \mu \alpha \varsigma$ ). Genitive absolute with particle (assuming it as so) with $\mu \eta$ as negative.

1Cor 4:19
If the Lord will ( $\varepsilon \alpha \vee$ о кирью $\theta \varepsilon \lambda \eta \sigma \eta$ ). Third-class condition. See James 4:15; Ac 18:21; 1Co 16:7 for the use of this phrase. It should represent one's constant attitude, though not always to be spoken aloud.

But the power ( $\alpha \lambda \lambda \alpha \tau \eta v \delta v v \alpha \mu v \nu$ ). The puffed up Judaizers did a deal of talking in Paul's absence. He will come and will know their real strength. II Corinthians gives many evidences of Paul's sensitiveness to their talk about his inconsistencies and cowardice (in particular chs. 2 Co $1 ; 2 ; 10 ; 11 ; 12 ; 13$ ). He changed his plans to spare them, not from timidity. It will become plain later that Timothy failed on this mission and that Titus succeeded.

1Cor 4:21
With a rod ( $\varepsilon v \rho \alpha \beta \delta \omega)$. The so-called instrumental use of $\varepsilon v$ like the Hebrew (1Sa 17:43 ). The shepherd leaned on his rod, staff, walking stick. The paedagogue had his rod also.

Shall I come? ( $\varepsilon \lambda \theta \omega ;$ ). Deliberative subjunctive. Paul gives them the choice. They can have him as their spiritual father or as their paedagogue with a rod.

## 1 Corinthians 5

1Cor 5:1
Actually ( $\mathrm{o} \lambda \omega \varsigma$ ). Literally, wholly, altogether, like Latin omnino and Greek $\pi \alpha \nu \tau \omega \varsigma$ (1Co 9:22). So papyri have it for "really" and also for "generally" or "everywhere" as is possible here. See also 6:7. With a negative it has the sense of "not at all" as in 15:29; Mt 5:34 the only N.T. examples, though a common word.

It is reported ( $\alpha \kappa о \cup \varepsilon \tau \alpha$ ). Present passive indicative of $\alpha \kappa о v \omega$, to hear; so literally, it is heard. "Fornication is heard of among you." Probably the household of Chloe ( 1:11) brought this sad news (Ellicott).

And such ( $\kappa \alpha$ toolautף). Climactic qualitative pronoun showing the revolting character of this particular case of illicit sexual intercourse. Порveıo is sometimes used (Ac 15:20,29 ) of such sin in general and not merely of the unmarried whereas $\mu \circ \boldsymbol{\chi \varepsilon ı}$ is technically adultery on the part of the married ( $\mathrm{Mr} 7: 21$ ).

As is not even among the Gentiles ( $\eta \tau \iota \varsigma$ ov $\delta \varepsilon \varepsilon v \tau 0 \iota \varsigma \varepsilon \theta v \varepsilon \sigma เ v$ ). Height of scorn. The Corinthian Christians were actually trying to win pagans to Christ and living more loosely than the Corinthian heathen among whom the very word "Corinthianize" meant to live in sexual wantonness and license. See Cicero pro Cluentio, v. 14.
 (usual force of $\omega \sigma \tau \varepsilon$ ) for one to go on having ( $\varepsilon \chi \varepsilon \downarrow \nu$, present infinitive) a wife of the (his) father." It was probably a permanent union (concubine or mistress) of some kind without formal marriage like Joh 4:8. The woman probably was not the offender's mother (stepmother) and the father may have been dead or divorced. The Jewish law prescribed stoning for this crime (Le 18:8; 22:11; De 22:30). But the rabbis (Rabbi Akibah) invented a subterfuge in the case of a proselyte to permit such a relation. Perhaps the Corinthians had also learned how to split hairs over moral matters in such an evil atmosphere and so to condone this crime in one of their own members. Expulsion Paul had urged in 2Th 3:6 for such offenders.

1Cor 5:2
And ye are puffed up ( $\kappa \alpha \cup \mu \varepsilon ı \varsigma \pi \varepsilon \varphi v \sigma \iota \omega \mu \varepsilon v o \varepsilon \sigma \tau \varepsilon$ ). Emphatic position of $\nu \mu \varepsilon \iota \varsigma$ (you). It may be understood as a question. Perfect passive periphrastic indicative of the same verb $\varphi$ vorow used already of the partisans in Corinth (4:6,19,20). Those of the same faction with this scoundrel justified his rascality.

Did not rather mourn ( $\kappa \alpha$ ov $\chi \mu \alpha \lambda$ дov $\varepsilon \pi \varepsilon v \theta \eta \sigma \alpha \tau \varepsilon$ ). Possibly question also and note strong negative form oux, which favours it. The very least that they could have done ( $\mu \mathrm{a} \lambda \lambda \mathrm{ov}$ rather than be puffed up) was to mourn for shame ( $\pi \varepsilon v \theta \varepsilon \omega$, old verb for lamentation) as if for one dead.

That he might be taken away ( $\iota \sim \alpha \rho \theta \eta$ ). The sub-final use of $t v \alpha$ of desired result ( $1: 15)$ so common in the Koine. First aorist passive subjunctive of aı $\rho \omega$, to lift up, to carry
off. Decent self-respect should have compelled the instant expulsion of the man instead of pride in his rascality.

1Cor 5:3
For I verily ( $\varepsilon \gamma \omega \mu \varepsilon v \gamma \alpha \rho$ ). Emphatic statement of Paul's own attitude of indignation, $\varepsilon \gamma \omega$ in contrast with $\nu \mu \varepsilon \iota \varsigma$. He justifies his demand for the expulsion of the man.

Being absent ( $\alpha \pi \omega v$ ) Although absent (concessive participle) and so of $\pi \alpha \rho \omega v$ though present. Each with locative case ( $\tau \omega \sigma \omega \mu \mu \tau \iota, \tau \omega \pi \nu \varepsilon \nu \mu \alpha \tau)$.

Have already judged ( $\eta \delta \eta \kappa \varepsilon \kappa \rho ı \kappa \alpha$ ). Perfect active indicative of $\kappa \rho ı \nu \omega$. I have already decided or judged, as though present ( $\omega \varsigma \pi \alpha \rho \omega v$ ). Paul felt compelled to reach a conclusion about the case and in a sentence of much difficulty seems to conceive an imaginary church court where the culprit has been tried and condemned. There are various ways of punctuating the clauses in this sentence in verses 3-5. It is not merely Paul's individual judgment. The genitive absolute clause in verse 4 ,
ye being gathered together ( $\sigma v v \alpha \chi \theta \varepsilon \nu \tau \omega \nu \nu \mu \omega v$, first aorist passive participle of $\sigma v v \alpha \gamma \omega$, in regular assembly)
and my spirit ( $\kappa \alpha \operatorname{\tau ov} \varepsilon \mu \circ v \pi v \varepsilon v \mu \alpha \tau о \varsigma)$ with the assembly (he means)
and meeting in the name of our Lord Jesus ( $\varepsilon v \tau \omega$ ovo $\mu \alpha \tau \tau \operatorname{\tau ov}$ Kvpıov [ $\eta \mu \omega v$ ] I $\eta \sigma o v$ ) with the power of the Lord Jesus ( $\sigma \nu \nu \tau \eta \delta v v a \mu \varepsilon \tau o v K v \rho ı v ~ \eta \mu \omega v$ I $\eta \sigma o v$ ), though this clause can be taken with the infinitive to deliver ( $\pi \alpha \rho \alpha \delta o u v \alpha)$. It makes good syntax and sense taken either way. The chief difference is that, if taken with "gathered together" ( $\sigma v \alpha a \chi \theta \varepsilon v \tau \omega v$ ) Paul assumes less apostolic prerogative to himself. But he did have such power and used it against Elymas (Ac 13:8ff. ) as Peter did against Ananias and Sapphira (Ac 5:1ff.).

1Cor 5:5
To deliver such an one unto Satan ( $\pi \alpha \rho \alpha \delta o u v a ~ \tau o v ~ \tau o เ o v \tau o v ~ \tau \omega ~ \Sigma \alpha \tau \alpha v \alpha)$. We have the same idiom in 1Ti 1:20 used of Hymenius and Alexander. In 2Co 12:7 Paul speaks of his own physical suffering as a messenger ( $\alpha \gamma \gamma \varepsilon \lambda o \varsigma$ ) of Satan. Paul certainly means expulsion from the church (verse 2) and regarding him as outside of the commonwealth of Israel (Eph 2:11f. ). But we are not to infer that expulsion from the local church means the damnation of the offender. The wilful offenders have to be expelled and not regarded as enemies, but admonished as brothers (2Th 3:14f. ).

For the destruction of the flesh ( $\varepsilon \varsigma \varsigma ~ o \lambda \varepsilon \theta \rho o \nu \tau \eta \varsigma \sigma \alpha \rho \kappa о \varsigma)$. Both for physical suffering as in the case of Job (Job 2:6) and for conquest of the fleshly sins, remedial punishment.

That the spirit may be saved (ıva 兀o $\pi v \varepsilon v \mu \alpha \sigma \omega \theta \eta$ ). The ultimate purpose of the expulsion as discipline. Note the use of to $\pi \nu \varepsilon v \mu \alpha$ in contrast with $\sigma \alpha \rho \xi$ as the seat of personality (cf. 3:15). Paul's motive is not merely vindictive, but the reformation of the offender who is not named here nor in 2Co 2:5-11 if the same man is meant, which is very doubtful. The final salvation of the man in the day of Christ is the goal and this is to be attained not by condoning his sin.

1Cor 5:6
Not good (ov ка入ov). Not beautiful, not seemly, in view of this plague spot, this cancer on the church. They needed a surgical operation at once instead of boasting and pride (puffed up). Kavðף $\mu \alpha$ is the thing gloried in.

A little leaven leaveneth the whole lump ( $\mu \kappa \rho \alpha \zeta \nu \mu \eta$ о $о \nu$ то $\varphi v \rho \alpha \mu \alpha \zeta \nu \mu о$ ). This proverb occurs verbatim in Ga 5:9. $\mathrm{Zv} \mu \eta$ (leaven) is a late word from $\zeta \varepsilon \omega$, to boil, as is $\zeta \nu \mu o \omega$, to leaven. The contraction is regular ( $-\mathrm{o} \mathrm{\varepsilon} \iota=0$ ) for the third person singular present indicative. See the parables of Jesus for the pervasive power of leaven (Mt 13:33). Some of the members may have argued that one such case did not affect the church as a whole, a specious excuse for negligence that Paul here answers. The emphasis is on the "little" ( $\mu$ וк $\rho \alpha$, note position). Lump ( $\varphi v \rho \alpha \mu \alpha$ from $\varphi v \rho a \omega$, to mix, late word, in the papyri mixing a medical prescription) is a substance mixed with water and kneaded like dough. Compare the pervasive power of germs of disease in the body as they spread through the body.

1Cor 5:7
Purge out ( $\varepsilon \kappa \kappa \alpha \theta \alpha \rho \alpha \tau \varepsilon$ ). First aorist (effective) active imperative of $\varepsilon \kappa \kappa \alpha \theta \alpha \iota \rho \omega$, old verb to cleanse out ( $\varepsilon \kappa$ ), to clean completely. Aorist tense of urgency, do it now and do it effectively before the whole church is contaminated. This turn to the metaphor is from the command to purge out the old ( $\pi \alpha \lambda \alpha \iota \alpha \nu$, now old and decayed) leaven before the passover feast (Ex 12:15f.; 13:7; Zep 1:12 ). Cf. modern methods of disinfection after a contagious disease.

A new lump ( $v \varepsilon o v \varphi \cup \rho \alpha \mu \alpha$ ). Make a fresh start as a new community with the contamination removed. Nzoc is the root for veavıoкoৎ, a young man, not yet old ( $\gamma \eta \rho \alpha \iota \rho$ ). So new wine (oıvov veov Mt 9:17 ). Kaıvos is fresh as compared with the ancient ( $\pi \alpha \lambda \alpha \iota \varsigma$ ). See the distinction in Col 3:10; Eph 4:22ff.; 2Co 5:17 .

Unleavened ( $\alpha \zeta \nu \mu \mathrm{O}$ ). Without ( $\alpha$ privative) leaven, the normal and ideal state of Christians. Rare word among the ancients (once in Plato). They are a new creation (kaıv $\kappa \tau \iota \sigma \iota)$ ), "exemplifying Kant's maxim that you should treat a man as if he were what you would wish him to be" (Robertson and Plummer).

For our passover also hath been sacrificed, even Christ ( $\kappa \alpha \gamma \alpha \rho \tau o \pi \alpha \sigma \chi \alpha \eta \mu \omega \nu \varepsilon \tau v \theta \eta$ $X \rho ı \sigma \tau \circ \varsigma)$. First aorist passive indicative of $\theta v \omega$, old verb to sacrifice. Euphony of consonants, $\theta$ to $\tau$ because of $-\theta \eta$. Reference to the death of Christ on the Cross as the Paschal Lamb (common use of $\pi \alpha \sigma \chi \alpha$ as $\mathrm{Mr} 14: 12$; Lu 22:7 ), the figure used long before by the Baptist of Jesus (Joh 1:29 ). Paul means that the Lamb was already slain on Calvary and yet you have not gotten rid of the leaven.

1Cor 5:8
Wherefore let us keep the feast ( $\omega \sigma \tau \varepsilon \varepsilon \sigma \rho \tau \alpha \zeta \omega \mu \varepsilon v$ ). Present active subjunctive (volitive). Let us keep on keeping the feast, a perpetual feast (Lightfoot), and keep the leaven out. It is quite possible that Paul was writing about the time of the Jewish passover, since it was before
pentecost (1Co 16:8). But, if so, that is merely incidental, and his language here is not a plea for the observance of Easter by Christians.

With the leaven of malice and wickedness ( $\varepsilon v \zeta \nu \mu \eta$ какıцৎ ка тоvŋрıаৎ). Vicious disposition and evil deed.

With the unleavened bread of sincerity and truth ( $\varepsilon v \alpha \zeta \nu \mu о \iota \varepsilon \varepsilon \lambda ı \kappa \rho ı v ı \alpha \varsigma \kappa \alpha \alpha \lambda \eta \theta \varepsilon ı \alpha \varsigma)$. No word for "bread." The plural of $\alpha \zeta \nu \mu о \iota \varsigma ~ m a y ~ s u g g e s t ~ " e l e m e n t s " ~ o r ~ " l o a v e s . " ~ E ı \lambda ı к р ı v i \alpha ~$ (sincerity) does not occur in the ancient Greek and is rare in the later Greek. In the papyri it means probity in one example. The etymology is uncertain. Boisacq inclines to the notion of $\varepsilon \mid \lambda \eta$ or $\varepsilon \lambda \eta$, sunlight, and $\kappa \rho เ v \omega$, to judge by the light of the sun, holding up to the light. $A \lambda \eta \theta \varepsilon ı \alpha$ (truth) is a common word from $\alpha \lambda \eta \theta \eta \varsigma$ (true) and this from a privative and $\lambda \eta \theta \omega$ ( $\lambda \alpha \theta \varepsilon เ v, \lambda \alpha v \theta \alpha v \omega$, to conceal or hide) and so unconcealed, not hidden. The Greek idea of truth is out in the open. Note Ro 1:18 where Paul pictures those who are holding down the truth in unrighteousness.

1Cor 5:9
I wrote unto you in my epistle ( $\varepsilon \gamma \rho \alpha \psi \alpha \cup \mu ı v \varepsilon \nu \tau \eta \varepsilon \pi \iota \sigma \tau o \lambda \eta$ ). Not the epistolary aorist, but a reference to an epistle to the Corinthians earlier than this one (our First Corinthians), one not preserved to us. What a "find" it would be if a bundle of papyri in Egypt should give it back to us?

To have no company with fornicators ( $\mu \eta \sigma v v a v \alpha \mu \gamma v v \sigma \theta a \pi o \rho v o i \varsigma)$. Present middle infinitive with $\mu \eta$ in an indirect command of a late double compound verb used in the papyri to mix up with ( $\sigma v v-\alpha v \alpha-\mu \gamma \nu v \sigma \theta a$, a $\mu$ verb). It is in the N.T. only here and verse 11; 2Th 3:14 which see. It is used here with the associative instrumental case ( $\pi$ o $\rho v o r$, , from $\pi \varepsilon \rho \alpha \omega$, $\pi \varepsilon \rho v \eta \mu$, to sell, men and women who sell their bodies for lust). It is a pertinent question today how far modern views try to put a veneer over the vice in men and women.

1Cor 5:10
Not altogether (ov $\pi \alpha v \tau \omega \varsigma)$. Not absolutely, not in all circumstances. Paul thus puts a limitation on his prohibition and confines it to members of the church. He has no jurisdiction over the outsiders (this world, tov коб $\mu$ ov tovtov).

The covetous (тоıৎ $\pi \lambda$ عоveктоıৎ). Old word for the over-reachers, those avaricious for more and more ( $\pi \lambda \varepsilon \circ \vee, \varepsilon \chi \omega$, to have more). In N.T. only here, 6:10; Eph 5:5 . It always comes in bad company (the licentious and the idolaters) like the modern gangsters who form a combination of liquor, lewdness, lawlessness for money and power.

Extortioners ( $\alpha \rho \pi \alpha \xi เ v$ ). An old adjective with only one gender, rapacious (Mt 7:15; Lu 18:11), and as a substantive robber or extortioner (here and 6:10). Bandits, hijackers, grafters they would be called today.

Idolaters ( $\varepsilon \varepsilon \delta \omega \lambda$ o $\lambda \alpha \tau \rho \alpha ı \varsigma)$. Late word for hirelings ( $\lambda \alpha \tau \rho ı \varsigma)$ of the idols ( $\varepsilon \iota \delta \omega \lambda o v$ ), so our very word idolater. See 6:9; 10:7; Eph 5:5; Re 21:8; 22:15. Nageli regards this word as a Christian formation.

For then must ye needs ( $\varepsilon \pi \varepsilon \omega \varphi \varepsilon ı \lambda \varepsilon \tau \varepsilon \circ 0 v)$. This neat Greek idiom of $\varepsilon \pi \varepsilon$ with the imperfect indicative ( $\omega \varphi \varepsilon \iota \lambda \varepsilon \tau \varepsilon$, from $0 \varphi \varepsilon \iota \lambda \omega$, to be under obligation) is really the conclusion of a second-class condition with the condition unexpressed (Robertson, Grammar, p. 965). Sometimes $\alpha v$ is used also as in Heb 10:2, but with verbs of obligation or necessity $\alpha v$ is usually absent as here (cf. Heb 9:20). The unexpressed condition here would be, "if that were true" (including fornicators, the covetous, extortioners, idolaters of the outside world). Apa means in that case.

1Cor 5:11
But now I write unto you ( $v v v \delta \varepsilon \varepsilon \gamma \rho \alpha \psi \alpha \nu \mu \nu v$ ). This is the epistolary aorist referring to this same epistle and not to a previous one as in verse 9 . As it is (when you read it) I did write unto you.

If any man that is named a brother be ( $\varepsilon \alpha v \tau \iota \varsigma \alpha \delta \varepsilon \lambda \varphi о \varsigma о v \circ \mu \alpha \zeta о \mu \varepsilon v o \varsigma \eta)$. Condition of the third class, a supposable case.
 an adjective and in later writings. In N.T. only here and 6:10. For the verb see 1Co 4:12 . M $\varepsilon$ Өvoos is an old Greek word for women and even men (cf. $\pi \alpha \rho o \iota v o \varsigma$, of men, 1Ti 3:3). In N.T. only here and 6:10. Cf. Ro 13:13 . Deissmann (Light from the Ancient East, p. 316) gives a list of virtues and vices on counters for Roman games that correspond remarkably with Paul's list of vices here and in 6:10. Chrysostom noted that people in his day complained of the bad company given by Paul for revilers and drunkards as being men with more "respectable" vices!

With such a one, no, not to eat ( $\tau \omega \tau \tau o v \tau \omega \mu \eta \delta \varepsilon \sigma u v \varepsilon \sigma \theta \varepsilon \varepsilon \varepsilon)$ ). Associative instrumental case of tooov $\omega$ after $\sigma \cup v \varepsilon \sigma \theta เ \varepsilon เ v$, "not even to eat with such a one." Social contacts with such "a brother" are forbidden

1Cor 5:12
For what have I to do? ( $\tau \quad \gamma \rho \rho \mu o ;$;). "For what is it to me (dative) to judge those without ( $\tau 0 \cup \varsigma \varepsilon \xi_{o}$ )?" They are outside the church and not within Paul's jurisdiction. God passes judgment on them.

1Cor 5:13
Put away the wicked man ( $\varepsilon \xi \alpha \rho \alpha \tau \varepsilon$ tov $\pi 0 v \eta \rho \circ v$ ). By this quotation from De 17:7 Paul clinches the case for the expulsion of the offender (5:2). Note $\varepsilon \xi$ twice and effective aorist tense.

## 1 Corinthians 6

1Cor 6:1
Dare any of you? ( $\tau о \lambda \mu \alpha \tau \iota \varsigma \nu \omega \nu ;$ ). Does any one of you dare? Rhetorical question with present indicative of to $\lambda \mu \alpha \omega$, old verb from to $\lambda \mu \alpha$, daring. Bengel: grandi verbo notatur laesa majestas Christianorum. "The word is an argument in itself" (Robertson and Plummer). Apparently Paul has an actual case in mind as in chapter 1Co 5 though no name is called.

Having a matter against his neighbour ( $\pi \rho \alpha \gamma \mu \alpha \varepsilon \chi \omega v \pi \rho o \varsigma \tau \sigma v \tau \varepsilon \rho \circ v$ ). Forensic sense of $\pi \rho \alpha \gamma \mu \alpha$ (from $\pi \rho \alpha \sigma \sigma \omega$, to do, to exact, to extort as in $\mathrm{Lu} 3: 13$ ), a case, a suit (Demosthenes 1020, 26), with the other or the neighbour as in 10:24; 14:17; Ga 6:4; Ro 2:1 .

Go to law ( $\kappa \rho \iota v \varepsilon \sigma \theta \alpha$ ). Present middle or passive (ch. Ro 3:4) in the same forensic sense as $\mathrm{k} \rho \bullet \theta \eta v a$ in Mt 5:40. K $\rho ı \tau \eta \varsigma$, judge, is from this verb.

Before the unrighteous ( $\varepsilon \pi \tau \omega \nu \alpha \delta ı \kappa \omega v$ ). This use of $\varepsilon \pi$ with the genitive for "in the presence of" is idiomatic as in 2Co 7:14, $\varepsilon \pi$ Titov, in the case of Titus. The Jews held that to bring a lawsuit before a court of idolaters was blasphemy against the law. But the Greeks were fond of disputatious lawsuits with each other. Probably the Greek Christians brought cases before pagan judges.

1Cor 6:2
Shall judge the world ( $\tau 0 \vee$ коб $\mu$ оv крıvovбıv). Future active indicative. At the last day with the Lord Jesus (Mt 19:28; Lu 22:30).
 $A v \alpha \xi_{ı} \circ$ is an old word ( $\alpha v$ and $\alpha \xi_{ו} \varsigma$ ), though only here in the N.T. There is dispute as to the meaning of крıт $\rho เ a$ here and in verse 4 , old word, but nowhere else in N.T. save in Jas 2:6. Naturally, like other words in - tnpıov (aкроатпрюov, auditorium, Ac 25:23), this word means the place where judgment is rendered, or court. It is common in the papyri in the sense of tribunal. In the Apost. Const. ii. 45 we have $\mu \eta \varepsilon \rho \chi \varepsilon \sigma \theta \omega \varepsilon \pi \kappa \rho ı \tau \eta \rho ı v \varepsilon \theta v ı \kappa o v$ (Let him not come before a heathen tribunal). Hence here it would mean, "Are ye unworthy of the smallest tribunals?" That is, of sitting on the smallest tribunals, of forming courts yourselves to settle such things?

1Cor 6:3
How much more, things that pertain to this life? ( $M \eta \tau \gamma \varepsilon \beta \omega \tau \tau \alpha ;$ ). The question expects the answer no and $\gamma \varepsilon$ adds sharp point to Paul's surprised tone, "Need I so much as say?" It can be understood also as ellipsis, "let me not say" ( $\mu \eta \tau \iota \gamma \varepsilon \lambda \varepsilon \gamma \omega$ ), not to say. Bı $\omega \tau \iota \kappa \alpha$ occurs first in Aristotle, but is common afterwards. In the papyri it is used of business matters. It is from $\beta$ oc (manner of life in contrast to $\zeta \omega \eta$, life principle).

1Cor 6:4
If then ye have to judge things pertaining to this life ( $\beta \iota \omega \tau \iota \kappa \alpha \mu \varepsilon v$ ouv крıтпрı $\varepsilon \alpha v$ $\varepsilon \chi \eta \tau \varepsilon$ ). Note emphatic position (proleptic) of $\beta \omega \omega \tau \iota \kappa \alpha$ к $\rho \iota \tau \eta \rho \iota \alpha$ (tribunals pertaining to this
life, as above). "If ye have tribunals pertaining to this life" (condition of third class, $\varepsilon \alpha v$ $\varepsilon \chi \eta \tau \varepsilon)$. If $\kappa \alpha \theta \iota(\varepsilon \tau \varepsilon$ (do ye set) is indicative and interrogative, then by "who are of no account in the church" ( $\tau$ оис $\varepsilon \xi$ ои $\theta \varepsilon v \eta \mu \varepsilon v o v \varsigma \varepsilon v \tau \eta \varepsilon \kappa \kappa \lambda \eta \sigma ı \alpha)$ Paul means the heathen as in verse 1. If $\kappa \alpha \theta_{l}$ ¢ $\varepsilon \varepsilon$ be imperative, then Paul means the least esteemed members of the church for such unwished for work. It is a harsh term for the heathen, but one of indignation toward Christians.

1Cor 6:5
I say this to move you to shame ( $\pi \rho \circ \varsigma \varepsilon v \tau \rho \circ \pi \eta \nu \nu \mu \nu \nu \varepsilon \gamma \omega)$. Old word $\varepsilon v \tau \rho \circ \pi \eta$ from $\varepsilon v \tau \rho \varepsilon \pi \omega$, to turn in (1Co 4:14 which see). In N.T. only here and 15:34.

One wise man (бочоऽ). From sarcasm to pathos Paul turns.
Does there not exist ( $\varepsilon$, short form for $\varepsilon v \varepsilon \sigma \tau$ )? With double negative ouk--ov $\begin{gathered}\text { sı, }\end{gathered}$ expecting the answer yes. Surely
one such man exists in the church.
Who (oc). Almost consecutive in idea, of such wisdom that he will be able.
To decide between his brethren ( $\delta \iota \alpha \kappa \rho \imath v \alpha \alpha v \alpha \mu \varepsilon \sigma o v ~ \tau o v ~ a \delta \varepsilon \lambda \varphi o v ~ a v \tau о v) . ~ K \rho ı v a ~ i s ~$ to judge or decide (first aorist active infinitive of $\kappa \rho ı v \omega$ and $\delta \iota \alpha$ (two) carries on the idea of between. Then $\alpha v \alpha \mu \varepsilon \sigma o v$ makes it still plainer, in the midst as
arbitrator between brother and brother like $\alpha v \alpha \mu \varepsilon \sigma о v \varepsilon \mu \circ v \kappa \alpha \sigma o v ~(G e ~ 23: 15) . ~ I t ~ i s ~$ even so a condensed expression with part of it unexpressed ( $\alpha v \alpha \mu \varepsilon \sigma \circ \vee \kappa \alpha$ тov $\alpha \delta \varepsilon \lambda \varphi \circ \sim$ avtov) between brother and his brother. The use of $\alpha \delta \varepsilon \lambda \varphi$ о has a sharp reflection on them for their going to heathen judges to settle disputes between brothers in Christ.

1Cor 6:6
And that before unbelievers ( $\kappa \alpha$ тоито $\varepsilon \pi \alpha \pi \iota \sigma \tau \omega v$ ). Climactic force of $\kappa \alpha$. The accusative of general reference with touto. "That there should be disputes about $\beta \iota \omega \tau \iota \kappa \alpha$ is bad; that Christian should go to law with Christian is worse; that Christians should do this before unbelievers is worst of all" (Robertson and Plummer).

1Cor 6:7
Nay, already it is altogether a defect among you ( $\eta \delta \eta \mu \varepsilon v$ ovv $o \lambda \omega \varsigma \eta \tau \tau \eta \mu \alpha \nu \mu \tau v \varepsilon \sigma \tau \iota v$ ). "Indeed therefore there is to you already (to begin with, $\eta \delta \eta$, before any question of courts) wholly defeat." H $\dagger \tau \tau \eta \mu \alpha$ (from $\eta \tau \tau \alpha o \mu \alpha$ ) is only here, Ro 11:12; Isa 31:8 and ecclesiastical writers. See $\eta \tau \tau \alpha o \mu \alpha$ (from $\eta \tau \tau \omega v$, less) in 2Co 12:13; 2Pe 2:19f. Nıк $\eta$ was victory and $\eta \tau \tau \alpha$ defeat with the Greeks. It is defeat for Christians to have lawsuits (крıиата, usually decrees or judgments) with one another. This was proof of the failure of love and forgiveness (Col 3:13).
 not right). Better undergo wrong yourself than suffer
defeat in the matter of love and forgiveness of a brother.

Be defrauded ( $\alpha \pi о \sigma \tau \varepsilon \rho \varepsilon \iota \sigma \theta \varepsilon$ ). Permissive middle again like $\alpha \delta$ Iк $\kappa \iota \sigma \theta \varepsilon$. Allow yourselves to be robbed (old verb to deprive, to rob) rather than have a lawsuit.

1Cor 6:8
Nay, but ye yourselves do wrong and defraud ( $\alpha \lambda \lambda \alpha$ v $\mu \varepsilon \iota \varsigma ~ \alpha \delta ı \kappa \varepsilon \iota \tau \varepsilon \kappa \alpha ~ \alpha \pi о \sigma \tau \varepsilon \rho \varepsilon \iota \tau \varepsilon$ ). "But (adversative $\alpha \lambda \lambda \alpha$, on the contrary) you (emphatic) do the wronging and the robbing" (active voices) "and that your brethren" (ка тоито $\alpha \delta \varepsilon \lambda$ ¢оис). Same idiom as at close of verse 6. The very climax of wrong-doings, to stoop to do this with one's brethren in Christ.

1Cor 6:9
The unrighteous ( $\alpha \delta$ เко). To remind them of the verb $\alpha \delta \iota \kappa \varepsilon \omega$ just used.
The Kingdom of God ( $\theta \varepsilon o v \beta \alpha \sigma \iota \varepsilon \varepsilon \iota v$ ). Precisely, God's kingdom.
Be not deceived ( $\mu \eta \pi \lambda \alpha v a \sigma \theta \varepsilon$ ). Present passive imperative with negative $\mu \eta$. Do not be led astray by plausible talk to cover up sin as mere animal behaviourism. Paul has two lists in verses 9,10 , one with repetition of oute, neither (fornicators, idolaters, adulterers, effeminate, or $\mu \alpha \lambda \alpha \kappa о$, abusers of themselves with men or $\alpha \rho \sigma \varepsilon v o \kappa о \iota \tau \alpha$ or sodomites as in 1Ti 1:10 a late word for this horrid vice, thieves, covetous), the other with ov not (drunkards, revilers, extortioners). All these will fall short of the kingdom of God. This was plain talk to a city like Corinth. It is needed today. It is a solemn roll call of the damned even if some of their names are on the church roll in Corinth whether officers or ordinary members.

1Cor 6:11
And such were some of you ( $\kappa \alpha \tau \alpha \cup \tau \alpha \tau \tau v \varepsilon \varsigma \eta \tau \varepsilon$ ). A sharp homethrust. Literally, "And these things ( $\tau \alpha \cup \tau \alpha$, neuter plural) were ye (some of you)." The horror is shown by $\tau \alpha \cup \tau \alpha$, but by $\tau i v \varepsilon$, Paul narrows the picture to some, not all. But that was in the past ( $\eta \tau \varepsilon$, imperfect indicative) like Ro 6:17. Thank God the blood of Jesus does cleanse from such sins as these. But do not go back to them.

But ye were washed ( $\alpha \pi \varepsilon \lambda o v \sigma \alpha \sigma \theta \varepsilon$ ). First aorist middle indicative, not passive, of $\alpha \pi \mathrm{o}$ ov $\omega$. Either direct middle, ye washed yourselves, or indirect middle, as in Ac 22:16, ye washed your sins away (force of $\alpha \pi 0$ ). This was their own voluntary act in baptism which was the outward expression of the previous act of God in cleansing ( $\eta \gamma \iota \propto \sigma \theta \eta \tau \varepsilon$, ye were sanctified or cleansed before the baptism) and justified ( $\varepsilon \delta เ \kappa \alpha \iota \omega \theta \eta \tau \varepsilon$, ye were put right with God before the act of baptism). "These twin conceptions of the Christian state in its beginning appear commonly in the reverse order" (Findlay). The outward expression is usually mentioned before the inward change which precedes it. In this passage the Trinity appear as in the baptismal command in Mt 28:19 .

## 1Cor 6:12

Lawful ( $\varepsilon \xi \varepsilon \sigma \tau \iota v$ ). Apparently this proverb may have been used by Paul in Corinth (repeated in 10:23), but not in the sense now used by Paul's opponents. The "all things" do not include such matters as those condemned in chapter 1Co 5; 6:1-11. Paul limits the proverb to things not immoral, things not wrong per se. But even here liberty is not license.

But not all things are expedient ( $\alpha \lambda \lambda^{\prime}$ ov $\pi \alpha v \tau \alpha \sigma \nu \mu \varphi \varepsilon \rho \varepsilon$ ). Old word $\sigma \nu \mu \varphi \varepsilon \rho \varepsilon$, bears together for good and so worthwhile. Many things, harmless in themselves in the abstract, do harm to others in the concrete. We live in a world of social relations that circumscribe personal rights and liberties.

 from $\varepsilon \xi$ gativ. Verb from Aristotle on, though not common (Dion. of Hal., LXX and inscriptions). In N.T. only here, 7:4; Lu 22:25. Paul is determined not to be a slave to anything harmless in itself. He will maintain his self-control. He gives a wholesome hint to those who talk so much about personal liberty.

1Cor 6:13
But God shall bring to nought both it and them (о $\delta \varepsilon$ $\theta \varepsilon о \varsigma ~ к \alpha ~ \tau \alpha u \tau \eta \nu ~ к \alpha ~ \tau \alpha u \tau \alpha ~$ $\kappa \alpha \tau \alpha \rho \gamma \eta \sigma \varepsilon)$. Another proverb about the adaptation of the belly ( $\kappa о \lambda \lambda 1 \alpha$ ) and food ( $\beta \rho \omega \mu \alpha \tau \alpha$, not just flesh), which had apparently been used by some in Corinth to justify sexual license (fornication and adultery). These Gentiles mixed up matters not alike at all (questions of food and sensuality). " We have traces of this gross moral confusion in the circumstances which dictated the Apostolic Letter (Ac 15:23-29), where things wholly diverse are combined, as directions about meats to be avoided and a prohibition of fornication" (Lightfoot). Both the belly ( $\tau \alpha \cup \tau \eta v$ ) and the foods ( $\tau \alpha \cup \tau \alpha$ ) God will bring to an end by death and change.

But the body is not for fornication, but for the Lord, and the Lord for the body ( $\tau$ $\delta \varepsilon \sigma \omega \mu \alpha$ оv $\tau \eta \pi о \rho v \varepsilon \iota \alpha \alpha \lambda \lambda \alpha \tau \omega \kappa \nu \rho \iota \omega \iota$, ка о кирьоৎ $\tau \omega \sigma \omega \mu \alpha \tau)$. Paul here boldly shows the fallacy in the parallel about appetite of the belly for food. The human body has a higher mission than the mere gratification of sensual appetite. Sex is of God for the propagation of the race, not for prostitution. Paul had already stated that God dwells in us as the sanctuary of the Holy Spirit (3:16f. ). This higher function of the body he here puts forward against the debased Greek philosophy of the time which ignored completely Paul's idea, "the body for the Lord and the Lord for the body" (dative of personal interest in both cases). "The Lord Jesus and ropveıa contested for the bodies of Christian men; loyal to him they must renounce that, yielding to that they renounce him" (Findlay).

1Cor 6:14
Will raise up us ( $\eta \mu \alpha \varsigma \varepsilon \xi \varepsilon \gamma \varepsilon \rho \varepsilon)$. Future active indicative of $\varepsilon \xi \varepsilon \gamma \varepsilon เ \rho \omega$ though the MSS. vary greatly, some having the present and some even the aorist. But the resurrection of the body gives added weight to Paul's argument about the dignity and destiny of the body (quanta dignitas, Bengel) which should not be prostituted to sensuality.

1Cor 6:15
Members of Christ ( $\mu \varepsilon \lambda \eta$ Xpıбтov). Old word for limbs, members. Even the Stoics held the body to be common with the animals (Epictetus, Diss. 1. iii. 1) and only the reason like the gods. Without doubt some forms of modern evolution have contributed to the li-
centious views of animalistic sex indulgence, though the best teachers of biology show that in the higher animals monogamy is the rule. The body is not only adapted for Christ (verse 13), but it is a part of Christ, in vital union with him. Paul will make much use of this figure further on (12:12-31; Eph 4:11-16; 5:30 ).

Shall I then take away? ( $\alpha \rho \alpha \varsigma o v v ;$ ). First aorist active participle of $\alpha \iota \rho \omega$, old verb to snatch, carry off like Latin rapio (our rape).

Make ( $\pi$ oı $\eta \omega \omega$ ). Can be either future active indicative or first aorist active subjunctive (deliberative). Either makes good sense. The horror of deliberately taking "members of Christ" and making them "members of a harlot" in an actual union staggers Paul and should stagger us.

God forbid ( $\mu \eta \gamma \varepsilon v o \iota \tau o$ ). Optative second aorist in a negative wish for the future.
May it not happen! The word "God" is not here. The idiom is common in Epictetus though rare in the LXX. Paul has it thirteen times and Luke once (Lu 20:16).

1Cor 6:16
One body $(\varepsilon v \sigma \omega \mu \alpha)$. With the harlot. That union is for the harlot the same as with the wife. The words quoted from Ge 2:24 describing the sexual union of husband and wife, are also quoted and explained by Jesus in Mt 19:5f. which see for discussion of the translation Hebraism with use of $\varepsilon ı \varsigma$.

Saith he ( $\varphi \eta \sigma \iota \nu)$. Supply either o $\theta \varepsilon \circ \varsigma$ (God) or $\eta \gamma \rho \alpha \varphi \eta$ (the Scripture).
1Cor 6:17
One spirit ( $\varepsilon v \pi \nu \varepsilon v \mu \alpha)$. With the Lord, the inner vital spiritual union with the Lord Jesus (Eph 4:4; 5:30 ).

1Cor 6:18
Flee $(\varphi \varepsilon \cup \gamma \varepsilon \tau \varepsilon)$. Present imperative. Have the habit of fleeing without delay or parley. Note abruptness of the asyndeton with no connectives. Fornication violates Christ's rights in our bodies (verses 13-17) and also ruins the body itself.

Without the body ( $\varepsilon \kappa \tau о \varsigma ~ \tau o v ~ \sigma \omega \mu \alpha \tau о \varsigma) . ~ E v e n ~ g l u t t o n y ~ a n d ~ d r u n k e n n e s s ~ a n d ~ t h e ~ u s e ~$ of dope are sins wrought on the body, not "within the body" ( $\varepsilon v \tau \circ \varsigma \tau o v \sigma \omega \mu \alpha \tau \circ \varsigma)$ in the same sense as fornication. Perhaps the dominant idea of Paul is that fornication, as already shown, breaks the mystic bond between the body and Christ and hence the fornicator (o $\pi о \rho v \varepsilon v \omega v$ )
sins against his own body ( $\varepsilon \iota \varsigma ~ \tau o ~ \iota \delta ı \nu ~ \sigma \omega \mu \alpha ~ \alpha \mu \alpha \rho \tau \alpha \nu \varepsilon$ ) in a sense not true of other dreadful sins. The fornicator takes his body which belongs to Christ and unites it with a harlot. In fornication the body is the instrument of $\sin$ and becomes the subject of the damage wrought. In another sense fornication brings on one's own body the two most terrible bodily diseases that are still incurable (gonorrhea and syphilis) that curse one's own body and transmit the curse to the third and fourth generation. Apart from the high view given here by Paul of the relation of the body to the Lord no possible father or mother has the
right to lay the hand of such terrible diseases and disaster on their children and children's children. The moral and physical rottenness wrought by immorality defy one's imagination. 1Cor 6:19
Your body is a temple ( $\tau 0 \sigma \omega \mu \alpha \nu \mu \omega v v \alpha o \varsigma ~ \varepsilon \sigma \tau \iota v)$. A sanctuary as in 3:16 which see. Our spirits dwell in our bodies and the Holy Spirit dwells in our spirits. Some of the Gnostics split hairs between the sins of the body and fellowship with God in the spirit. Paul will have none of this subterfuge. One's body is the very shrine for the Holy Spirit. In Corinth was the temple to Aphrodite in which fornication was regarded as consecration instead of desecration. Prostitutes were there as priestesses of Aphrodite, to help men worship the goddess by fornication.

Ye are not your own (ouk $\varepsilon \sigma \tau \varepsilon \varepsilon \alpha u \tau \omega v$ ). Predicate genitive. Ye do not belong to yourselves, even if you could commit fornication without personal contamination or selfviolation. Christianity makes unchastity dishonour in both sexes. There is no double standard of morality. Paul's plea here is primarily to men to be clean as members of Christ's body.

## 1Cor 6:20

For ye were bought with a price ( $\eta \gamma \circ \rho \alpha \sigma \theta \eta \tau \varepsilon \gamma \alpha \rho \tau \tau \mu \eta \varsigma)$. First aorist passive indicative of $\alpha \gamma \circ \rho \alpha \zeta \omega$, old verb to buy in the marketplace ( $\alpha \gamma \circ \rho \alpha$ ). With genitive of price. Paul does not here state the price as Peter does in 1Pe 1:19 (the blood of Christ) and as Jesus does in Mt 20:28 (his life a ransom). The Corinthians understood his meaning.
 sionate conclusion to his powerful argument against sexual uncleanness. $\Delta \eta$ is a shortened form of $\eta \delta \eta$ and is an urgent inferential particle. See on $\mathrm{Lu} 2: 15$. Paul holds to his high ideal of the destiny of the body and urges glorifying God in it. Some of the later Christians felt that Paul's words could be lightened a bit by adding "and in your spirits which are his," but these words are found only in late MSS. and are clearly not genuine. Paul's argument stands four-square for the dignity of the body as the sanctuary of the Holy Spirit united to the Lord Jesus.

## 1 Corinthians 7

1Cor 7:1
Now concerning the things whereof ye wrote ( $\pi \varepsilon \rho \delta \varepsilon \omega v \varepsilon \gamma \rho \alpha \psi \alpha \tau \varepsilon$ ). An ellipsis of $\pi \varepsilon \rho$ $\tau o v \tau \omega v$, the antecedent of $\pi \varepsilon \rho \omega v$, is easily supplied as in papyri. The church had written Paul a letter in which a number of specific problems about marriage were raised. He answers them seriatim. The questions must be clearly before one in order intelligently to interpret Paul's replies. The first is whether a single life is wrong. Paul pointedly says that it is not wrong, but good ( $\kappa \alpha \lambda о v$ ). One will get a one-sided view of Paul's teaching on marriage unless he keeps a proper perspective. One of the marks of certain heretics will be forbidding to marry (1Ti 4:3). Paul uses marriage as a metaphor of our relation to Christ (2Co 11:2; Ro 7:4; Eph $5: 28-33$ ). Paul is not here opposing marriage. He is only arguing that celibacy may be good in certain limitations. The genitive case with $\alpha \pi \tau \varepsilon \sigma \theta \alpha$ (touch) is the usual construction.

## 1Cor 7:2

Because of fornications ( $\delta \iota \alpha \tau \alpha \varsigma \pi о \rho v \varepsilon \iota \alpha \varsigma)$. This is not the only reason for marriage, but it is a true one. The main purpose of marriage is children. Mutual love is another. The family is the basis of all civilization. Paul does not give a low view of marriage, but is merely answering questions put to him about life in Corinth.

1Cor 7:3
Render the due ( $\tau \eta \nu$ oৎعi $\lambda \downarrow$ $a \pi o \delta \iota \delta o \tau \omega$ ). Marriage is not simply not wrong, but for many a duty. Both husband and wife have a mutual obligation to the other. "This dictum defends marital intercourse against rigorists, as that of ver. 1 commends celibacy against sensualists" (Findlay).

1Cor 7:4
The wife $(\eta \gamma \cup \vee \eta)$. The wife is mentioned first, but the equality of the sexes in marriage is clearly presented as the way to keep marriage undefiled (Heb 13:4). "In wedlock separate ownership of the person ceases" (Robertson and Plummer).

1Cor 7:5
Except it be by consent for a season ( $\varepsilon \mu \eta \tau[\alpha v] \varepsilon \kappa \sigma \nu \mu \varphi \omega v o v \pi \rho o \varsigma \kappa \alpha \iota \rho \nu v$ ). If $\alpha v$ is genuine, it can either be regarded as like $\varepsilon \alpha v$ though without a verb or as loosely added after $\varepsilon \mu \eta \tau$ and construed with it.

That ye may give yourselves unto prayer ( $1 v \alpha \sigma \chi 0 \lambda \alpha \sigma \eta \tau \varepsilon \tau \eta \pi \rho o \sigma \varepsilon v \chi \eta$ ). First aorist active subjunctive of $\sigma \chi 0 \lambda \alpha \zeta \omega$, late verb from $\sigma \chi \circ \lambda \eta$, leisure (our "school"), and so to have leisure (punctiliar act and not permanent) for prayer. Note private devotions here.

That Satan tempt you not ( $1 v \alpha \mu \eta \pi \varepsilon \rho \alpha \zeta \eta$ ). Present subjunctive, that Satan may not keep on tempting you.

Because of your incontinency ( $\delta \iota \alpha \tau \eta v \alpha \kappa \rho \alpha \sigma \iota \alpha v[v \mu \omega v]$ ). A late word from Aristotle on for $\alpha \kappa \rho \alpha \tau \varepsilon \iota \alpha$ from $\alpha \kappa \rho \alpha \tau \eta \varsigma ~(w i t h o u t ~ s e l f-c o n t r o l, ~ a ~ p r i v a t i v e ~ a n d ~ к \rho \alpha \tau \varepsilon \omega$, to control, common old word). In N.T. only here and Mt 23:25 which see.

1Cor 7:6
By way of permission ( $\kappa \alpha \tau \alpha \sigma \nu \nu \gamma \nu \omega \mu \eta \nu$ ). Old word for pardon, concession, indulgence. Secundum indulgentiam (Vulgate). Only here in N.T., though in the papyri for pardon. The word means "knowing together," understanding, agreement, and so concession.

Not of commandment (ov ка $\tau^{\prime} \varepsilon \pi \iota \tau \alpha \gamma \eta \nu$ ). Late word (in papyri) from $\varepsilon \pi \iota \tau \alpha \sigma \sigma \omega$, old word to enjoin. Paul has not commanded people to marry. He has left it an open question.

1Cor 7:7
Yet I would $(\theta \varepsilon \lambda \omega \delta \varepsilon)$. "But I wish." Followed by accusative and infinitive ( $\alpha v \theta \rho \omega \pi \sigma$, $\varepsilon \iota v \alpha)$. This is Paul's personal preference under present conditions (7:26).

Even as I myself ( $\omega \varsigma \kappa \alpha \varepsilon \mu \alpha v \tau o v$ ). This clearly means that Paul was not then married and it is confirmed by 9:5. Whether he had been married and was now a widower turns on the interpretation of Ac 26:10 "I cast my vote." If this is taken literally (the obvious way to take it) as a member of the Sanhedrin, Paul was married at that time. There is no way to decide.

His own gift from God (ı $\delta \iota \nu \chi \chi \rho \iota \sigma \mu \alpha \varepsilon \kappa \theta \varepsilon o v)$. So each must decide for himself. See on 1:7 for $\chi \alpha \rho \iota \sigma \mu \alpha$, a late word from $\chi \alpha \rho ı \zeta о \mu \alpha$.

1Cor 7:8
To the unmarried and to the widows ( $\tau о \iota \varsigma ~ а \gamma \alpha \mu о \iota \varsigma \kappa \alpha \tau \alpha \iota \varsigma \chi \rho \alpha \iota \varsigma)$. It is possible that by "the unmarried" (masculine plural) the apostle means only men since widows are added and since virgins receive special treatment later (verse 25) and in verse $320 \alpha \gamma \alpha \mu \circ \varsigma$ is the unmarried man. It is hardly likely that Paul means only widowers and widows and means to call himself a widower by $\omega \varsigma \kappa \alpha \gamma \omega$ (even as I). After discussing marital relations in verses 2-7 he returns to the original question in verse 1 and repeats his own personal preference as in verse 7. He does not say that it is better to be unmarried, but only that it is good (ка入ov as in verse 1) for them to remain unmarried. A $\gamma \alpha \mu \circ$, is an old word and in N.T. occurs only in this passage. In verses 11,34 it is used of women where the old Greeks would have used $\alpha v a v \delta \rho o \varsigma$, without a husband.

1Cor 7:9
But if they have not continency ( $\varepsilon \delta \varepsilon$ ovк $\varepsilon \gamma \kappa \rho \alpha \tau \varepsilon v o v \tau \alpha)$. Condition of the first class, assumed as true. Direct middle voice $\varepsilon \gamma \kappa \rho \alpha \tau \varepsilon v o v \tau \alpha$, hold themselves in, control themselves.

Let them marry ( $\gamma \alpha \mu \eta \sigma \alpha \tau \omega \sigma \alpha v$ ). First aorist (ingressive) active imperative. Usual Koine form in $-\tau \omega \sigma \alpha v$ for third plural.

Better ( $\kappa \rho \varepsilon \iota \tau \tau \circ$ ). Marriage is better than continued sexual passion. Paul has not said that celibacy is
better than marriage though he has justified it and expressed his own personal preference for it. The metaphorical use of $\pi \cup \rho o v \sigma \theta a$ (present middle infinitive) for sexual passion is common enough as also for grief (2Co 11:29).

1Cor 7:10
To the married ( $\tau$ oı $\gamma \varepsilon \gamma \alpha \mu \eta \kappa о \sigma เ v$ ). Perfect active participle of $\gamma \alpha \mu \varepsilon \omega$, old verb, to marry, and still married as the tense shows.

I give charge ( $\pi \alpha \rho \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$ ). Not mere wish as in verses 7,8 .
Not I, but the Lord (оик $\varepsilon \gamma \omega \alpha \lambda \lambda \alpha$ о кирюo¢). Paul had no commands from Jesus to the unmarried (men or women), but Jesus had spoken to the married (husbands and wives) as in Mt 5:31f.; 19:3-12; Mr 10:9-12; Lu 16:18. The Master had spoken plain words about divorce. Paul reenforces his own inspired command by the command of Jesus. In Mr 10:9 we have from Christ: "What therefore God joined together let not man put asunder" ( $\mu \eta$ $\chi$ ор! (धт $\omega$ ).

That the wife depart not from her husband ( $\gamma \cup v a ı \kappa \alpha \pi \pi о \alpha v \delta \rho о \varsigma \mu \eta \chi о \rho\llcorner\sigma \theta \eta v \alpha)$. First aorist passive infinitive (indirect command after $\pi \alpha \rho \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$ ) of $\chi \circ \rho \iota \zeta \omega$, old verb from adverbial preposition $\chi \omega \rho \iota \varsigma$, separately, apart from, from. Here used of divorce by the wife which, though unusual then, yet did happen as in the case of Salome (sister of Herod the Great) and of Herodias before she married Herod Antipas. Jesus also spoke of it (Mr 10:12 ). Now most of the divorces are obtained by women. This passive infinitive is almost reflexive in force according to a constant tendency in the Koine (Robertson, Grammar, p. 817).

1Cor 7:11
But and if she depart ( $\varepsilon \alpha v \delta \varepsilon \kappa \alpha \chi \omega \rho \circ \sigma \theta \eta$ ). Third class condition, undetermined. If, in spite of Christ's clear prohibition, she get separated (ingressive passive subjunctive),
let her remain unmarried ( $\mu \varepsilon v \varepsilon \tau \omega \alpha \gamma \alpha \mu \circ \varsigma)$. Paul here makes no allowance for remarriage of the innocent party as Jesus does by implication.

Or else be reconciled to her husband ( $\eta \tau \omega \alpha v \delta \rho \kappa \alpha \tau \alpha \lambda \lambda \alpha \gamma \eta \tau \omega$ ). Second aorist (ingressive) passive imperative of $\kappa \alpha \tau \alpha \lambda \lambda \alpha \sigma \sigma \omega$, old compound verb to exchange coins as of equal value, to reconcile. One of Paul's great words for reconciliation with God (2Co 5:18-20; Ro 5:10 ). $\Delta \iota \lambda \lambda \lambda \sigma \sigma \sigma \omega$ (Mt 5:24 which see) was more common in the older Greek, but $\kappa \alpha \tau \alpha \lambda \lambda \alpha \sigma \sigma \omega$ in the later. The difference in idea is very slight, $\delta \iota \alpha-$ accents notion of exchange, кат- the perfective idea (complete reconciliation). Dative of personal interest is the case of $\alpha v \delta \rho$. This sentence is a parenthesis between the two infinitives $\chi \omega \rho \iota \sigma \theta \eta v \alpha$ and $\alpha \varphi \iota \varepsilon v \alpha$ (both indirect commands after $\pi \alpha \rho \alpha \gamma \gamma \varepsilon \lambda \lambda \omega)$.

And that the husband leave not his wife ( $\kappa \alpha \alpha v \delta \rho \alpha \mu \eta \alpha \varphi เ \varepsilon v \alpha$ ). This is also part of the Lord's command (Mr 10:11). A $\pi \mathbf{\lambda} \nu \omega \omega$ occurs in Mark of the husband's act and $\alpha \varphi!\varepsilon v \alpha$ here, both meaning to send away. Bengel actually stresses the difference between $\chi \omega \rho \iota \sigma \theta \eta v \alpha$ of the woman as like separatur in Latin and calls the wife "pars ignobilior" and the husband "nobilior." I doubt if Paul would stand for that extreme.

## 1Cor 7:12

 no word about marriage from Jesus beyond the problem of divorce. This is no disclaimer of inspiration. He simply means that here he is not quoting a command of Jesus.

An unbelieving wife ( $\gamma \cup v a \iota \kappa \alpha \alpha \pi \iota \sigma \tau \sigma v$ ). This is a new problem, the result of work among the Gentiles, that did not arise in the time of Jesus. The form $\alpha \pi \iota \sigma \tau 0 v$ is the same as the masculine because a compound adjective. Paul has to deal with mixed marriages as missionaries do today in heathen lands. The rest (o خoıto) for Gentiles (Eph 2:3) we have already had in 1 Th $4: 13 ; 5: 6$ which see. The Christian husband married his wife when he
 not here (cf. Joh 20:27).

She is content ( $\sigma v v \varepsilon \cup \delta o \kappa \varepsilon$ ). Late compound verb to be pleased together with, agree together. In the papyri.

Let him not leave her ( $\mu \eta \alpha \varphi \iota \tau \tau \omega \alpha v \tau \eta v)$. Perhaps here and in verses $11,13 \alpha \varphi \not \eta \mu$ should be translated "put away" like $\alpha \pi \sigma \lambda \nu \omega$ in $\mathrm{Mr} 10: 1$. Some understand $\alpha \varphi \not \eta \mu$ as separation from bed and board, not divorce.

1Cor 7:13
Which hath an unbelieving husband ( $\eta \tau \iota \varsigma \varepsilon \chi \varepsilon \alpha v \delta \rho \alpha \alpha \pi \iota \sigma \tau \circ v$ ). Relative clause here, while a conditional one in verse 12 ( $\varepsilon \tau \tau \varsigma$, if any one). Paul is perfectly fair in stating both sides of the problem of mixed marriages.

1Cor 7:14
Is sanctified in the wife ( $\eta \gamma \iota \alpha \sigma \tau \alpha \varepsilon \nu \tau \eta \gamma \cup v \alpha \iota \kappa)$. Perfect passive indicative of $\alpha \gamma \iota \alpha \zeta \omega$, to set apart, to hallow, to sanctify. Paul does not, of course, mean that the unbelieving husband is saved by the faith of the believing wife, though Hodge actually so interprets him. Clearly he only means that the marriage relation is sanctified so that there is no need of a divorce. If either husband or wife is a believer and the other agrees to remain, the marriage is holy and need not be set aside. This is so simple that one wonders at the ability of men to get confused over Paul's language.

Else were your children unclean ( $\varepsilon \pi \varepsilon \alpha \rho \alpha \tau \alpha \tau \varepsilon \kappa \nu \alpha \alpha \kappa \alpha \theta \alpha \rho \tau \alpha)$. The common ellipse of the condition with $\varepsilon \pi \varepsilon$ : "since, accordingly, if it is otherwise, your children are illegitimate ( $\alpha \kappa \alpha \theta \alpha \rho \tau \alpha$ )." If the relations of the parents be holy, the child's birth must be holy also (not illegitimate). "He is not assuming that the child of a Christian parent would be baptized; that would spoil rather than help his argument, for it would imply that the child was not $\alpha \gamma เ \circ$ till it was baptized. The verse throws no light on the question of infant baptism" (Robertson and Plummer).

1Cor 7:15
Is not under bondage ( $o v \delta \varepsilon \delta o v \lambda \omega \tau \alpha$ ). Perfect passive indicative of $\delta o v \lambda o \omega$, to enslave, has been enslaved, does not remain a slave. The believing husband or wife is not at liberty
to separate, unless the disbeliever or pagan insists on it. Wilful desertion of the unbeliever sets the other free, a case not contemplated in Christ's words in Mt 5:32; 19:9. Luther argued that the Christian partner, thus released, may marry again. But that is by no means clear, unless the unbeliever marries first.

But God hath called us in peace ( $\varepsilon v \delta \varepsilon \varepsilon \iota \rho \eta \nu \eta \kappa \varepsilon \kappa \lambda \eta \kappa \varepsilon v \eta \mu \alpha \varsigma$ or $v \mu \alpha \varsigma)$. Perfect active indicative of $\kappa \alpha \lambda \varepsilon \omega$, permanent call in the sphere or atmosphere of peace. He does not desire enslavement in the marriage relation between the believer and the unbeliever.

1Cor 7:16
For how knowest thou? ( $\tau$ ү $\alpha \rho$ oi $\delta \alpha \sigma ;$ ). But what does Paul mean? Is he giving an argument against the believer accepting divorce or in favour of doing so? The syntax allows either interpretation with $\varepsilon$ (if) after ot $\delta a c$. Is the idea in $\varepsilon$ (if) hope of saving the other or fear of not saving and hence peril in continuing the slavery of such a bondage? The latter idea probably suits the context best and is adopted by most commentators. And yet one hesitates to interpret Paul as advocating divorce unless strongly insisted on by the unbeliever. There is no problem at all unless the unbeliever makes it. If it is a hopeless case, acquiescence is the only wise solution. But surely the believer ought to be sure that there is no hope before he agrees to break the bond. Paul raises the problem of the wife first as in verse 10.

1Cor 7:17
Only $(\varepsilon \mu \eta)$. This use of $\varepsilon \mu \eta$ as an elliptical condition is very common (7:5; Ga 1:7,19; Ro 14:14 ), "except that" like $\pi \lambda \eta \nu$. Paul gives a general principle as a limitation to what he has just said in verse 15. "It states the general principle which determines these questions about marriage, and this is afterwards illustrated by the cases of circumcision and slavery" (Robertson and Plummer). He has said that there is to be no compulsory slavery between the believer and the disbeliever (the Christian and the pagan). But on the other hand there is to be no reckless abuse of this liberty, no license.
 active indicative of $\mu \varepsilon \rho \check{\zeta} \omega$, old verb from $\mu \varepsilon \rho \circ \varsigma$, apart. Each has his lot from the Lord Jesus, has his call from God. He is not to seek a rupture of the marriage relation if the unbeliever does not ask for it.

And so ordain I ( $\kappa \alpha$ out $\omega \varsigma \delta(\alpha \tau \alpha \sigma \sigma \sigma \mu \alpha$ ). Military term, old word, to arrange in all the churches (distributed, $\delta \iota \alpha-$ ). Paul is conscious of authoritative leadership as the apostle of Christ to the Gentiles.

1Cor 7:18
Let him not become uncircumcized ( $\mu \eta \varepsilon \pi \iota \sigma \pi \alpha \sigma \theta \omega$ ). Present middle imperative of $\varepsilon \pi \iota \sigma \pi \alpha \omega$, old verb to draw on. In LXX (I Macc. 1:15) and Josephus (Ant. XII, V. I) in this sense. Here only in N.T. The point is that a Jew is to remain a Jew, a Gentile to be a Gentile. Both stand on an equality in the Christian churches. This freedom about circumcision illustrates the freedom about Gentile mixed marriages.

## 1Cor 7:19

But the keeping of the commandments of God ( $\alpha \lambda \lambda \alpha \tau \eta \rho \eta \sigma \iota \varsigma \varepsilon \nu \tau o \lambda \omega \nu \theta \varepsilon o v$ ). Old word in sense of watching (Ac 4:3). Paul's view of the worthlessness of circumcision or of uncircumcision is stated again in Ga 5:6; 6:15; Ro 2:25-29 (only the inward or spiritual Jew counts).

1Cor 7:20
Wherein he was called $(\eta \varepsilon \kappa \lambda \eta \theta \eta)$. When he was called by God and saved, whether a Jew or a Gentile, a slave or a freeman.

1Cor 7:21
Wast thou called being a bondservant? ( $\delta o v \lambda o \varsigma \varepsilon \kappa \lambda \eta \theta \eta \sigma$;). First aorist passive indicative. Wast thou, a slave, called?

Care not for it ( $\mu \eta \sigma 0 \mu \varepsilon \lambda \varepsilon \tau \omega$ ). "Let it not be a care to thee." Third person singular (impersonal) of $\mu \varepsilon \lambda \varepsilon$, old verb with dative $\sigma o$. It was usually a fixed condition and a slave could be a good servant of Christ (Col 3:22; Eph 6:5; Tit 2:9) , even with heathen masters.

Use it rather ( $\mu \alpha \lambda \lambda$ ov $\chi \rho \eta \sigma \alpha$ ). Make use of what? There is no "it" in the Greek. Shall we supply $\varepsilon \lambda \varepsilon v \theta \varepsilon \rho ı \alpha$ (instrumental case after $\chi \rho \eta \sigma \alpha$ or $\delta o v \lambda \varepsilon ı \alpha$ )? Most naturally $\varepsilon \lambda \varepsilon v \theta \varepsilon \rho ı \alpha$, freedom, from $\varepsilon \lambda \varepsilon \cup \theta \varepsilon \rho \circ \varsigma$, just before. In that case $\varepsilon \kappa \alpha$ is not taken as although, but $\kappa \alpha$ goes with $\delta v v a \sigma \alpha$, "But if thou canst also become free, the rather use your opportunity for freedom." On the whole this is probably Paul's idea and is in full harmony with the general principle above about mixed marriages with the heathen. X $\rho \eta \sigma \alpha$ is second person singular aorist middle imperative of $\chi \rho \alpha \circ \mu \alpha$, to use, old and common verb.

1Cor 7:22
The Lord's freedman ( $\alpha \pi \varepsilon \lambda \varepsilon v \theta \varepsilon \rho \circ \varsigma$ Kv $1 \circ v$ ). A $\pi \varepsilon \lambda \varepsilon v \theta \varepsilon \rho \circ \varsigma$ is an old word for a manumitted slave, $\varepsilon \lambda \varepsilon v \theta \varepsilon \rho o \varsigma$ from $\varepsilon \rho \chi \circ \mu \alpha$, to go and so go free, $\alpha \pi$ - from bondage. Christ is now the owner of the Christian and Paul rejoices to call himself Christ's slave ( $\delta o v \lambda o \varsigma)$. But Christ set us free from sin by paying the ransom ( $\lambda v \tau \rho o v$ ) of his life on the Cross (Mt 20:28; Ro 8:2; Ga $5: 1$ ). Christ is thus the patronus of the libertus who owes everything to his patronus. He is no longer the slave of $\sin (\operatorname{Ro} 6: 6,18)$, but a slave to God (Ro 6:22 ).

Likewise the freeman when called is Christ's slave (o $о \circ \iota \omega$ о $\varepsilon \lambda \varepsilon v \theta \varepsilon \rho \circ \varsigma \kappa \lambda \eta \theta \varepsilon ı \varsigma \delta o v \lambda$ оऽ $\varepsilon \sigma \tau \iota v$ X $\rho \iota \sigma \tau \circ v)$. Those who were not slaves, but freemen, when converted, are as much slaves of Christ as those who were and still were slaves of men. All were slaves of $\sin$ and have been set free from sin by Christ who now owns them all.

1Cor 7:23
Ye were bought with a price ( $\tau \iota \mu \varsigma \eta \gamma o \rho \alpha \sigma \theta \eta \tau \varepsilon$ ). See on 6:20 for this very phrase, here repeated. Both classes (slaves and freemen) were purchased by the blood of Christ.

Become not bondservants of men ( $\mu \eta \gamma \iota v \varepsilon \sigma \theta \varepsilon \delta o u \lambda o \alpha v \theta \rho \omega \pi \omega v$ ). Present middle imperative of $\gamma \iota v o \mu \alpha$ with negative $\mu \eta$. Literally, stop becoming slaves of men. Paul here clearly defines his opposition to human slavery as an institution which comes out so
powerfully in the Epistle to Philemon. Those already free from human slavery should not become enslaved.

1Cor 7:24
With God ( $\pi \alpha \rho \alpha \theta \varepsilon \omega)$. There is comfort in that. Even a slave can have God at his side by remaining at God's side.

1Cor 7:25
I have no commandment of the Lord ( $\varepsilon \pi \iota \tau \alpha \gamma \eta \nu$ Kıpıov ouk $\varepsilon \chi \omega$ ). A late word from $\varepsilon \pi \iota \tau \alpha \sigma \sigma \omega$, old Greek verb to enjoin, to give orders to. Paul did have (verse 10) a command from the Lord as we have in Matthew and Mark. It was quite possible for Paul to know this command of Jesus as he did other sayings of Jesus (Ac 20:35) even if he had as yet no access to a written gospel or had received no direct revelation on the subject from Jesus (1Co 11:23 ). Sayings of Jesus were passed on among the believers. But Paul had no specific word from Jesus on the subject of virgins. They call for special treatment, young unmarried women only Paul means ( $7: 25,28,34,36-38$ ) and not as in Re $14: 4$ (metaphor). It is probable that in the letter ( $7: 1$ ) the Corinthians had asked about this problem.

But I give my judgment ( $\gamma v \omega \mu \eta v \delta \varepsilon \delta \iota \delta \omega \mu$ ). About mixed marriages (12-16) Paul had the command of Jesus concerning divorce to guide him. Here he has nothing from Jesus at all. So he gives no "command," but only "a judgment," a deliberately formed decision from knowledge (2Co 8:10), not a mere passing fancy.

As one that hath obtained mercy of the Lord to be faithful ( $\omega \varsigma \eta \lambda \varepsilon \eta \mu \varepsilon v \circ \varsigma v \pi о$ кvpıov $\pi \iota \sigma \tau o \varsigma \varepsilon ו v \alpha)$. Perfect passive participle of $\varepsilon \lambda \varepsilon \varepsilon \omega$, old verb to receive mercy ( $\varepsilon \lambda \varepsilon \sigma \varsigma)$. Пเбтoৎ is predicate nominative with infinitive $\varepsilon เ v a$. This language, so far from being a disclaimer of inspiration, is an express claim to help from the Lord in the forming of this duly considered judgment, which is in no sense a command, but an inspired opinion.

1Cor 7:26
I think therefore ( $v o \mu \iota \zeta \omega$ ovv). Paul proceeds to express therefore the previously mentioned judgment ( $\gamma \nu \omega \mu \eta \nu$ ) and calls it his opinion, not because he is uncertain, but simply because it is not a command, but advice.

By reason of the present distress ( $\delta \iota \alpha \tau \eta v \varepsilon v \varepsilon \sigma \tau \omega \sigma \alpha v \alpha v \alpha \gamma \kappa \eta v$ ). The participle $\varepsilon v \varepsilon \sigma \tau \omega \sigma \alpha v$ is second perfect active of $\varepsilon v ı \sigma \tau \eta \mu$ and means "standing on" or "present" (cf. Ga 1:4; Heb 9:9 ). It occurs in 2Th 2:2 of the advent of Christ as not "present." Whether Paul has in mind the hoped for second coming of Jesus in this verse we do not certainly know, though probably so. Jesus had spoken of those calamities which would precede his coming (Mt 24:8ff. ) though Paul had denied saying that the advent was right at hand (2Th 2:2). Ava $\gamma \kappa \eta$ is a strong word (old and common), either for external circumstances or inward sense of duty. It occurs elsewhere for the woes preceding the second coming ( $\operatorname{Lu} 21: 23$ ) and also for Paul's persecutions (1Th 3:7; 2Co 6:4; 12:10). Perhaps there is a mingling of both ideas here.

Namely. This word is not in the Greek. The infinitive of indirect discourse (v $\tau \alpha \rho \chi \varepsilon เ v$ ) after $\nu о \mu \iota \zeta \omega$ is repeated with recitative $o \tau$, "That the being so is good for a man" (o $\kappa \alpha \lambda o v$ $\alpha v \theta \rho \omega \pi \omega$ to ov $\omega \omega \varsigma \varepsilon ı v \alpha)$. The use of the article $\tau 0$ with $\varepsilon ı v a$ compels this translation. Probably Paul means for one ( $\alpha \nu \theta \rho \omega \pi \omega$, generic term for man or woman) to remain as he is whether married or unmarried. The copula $\varepsilon \sigma \tau \iota v$ is not expressed. He uses $\kappa \alpha \lambda o v$ (good) as in 7:1.

1Cor 7:27
Art thou bound to a wife? ( $\delta \varepsilon \delta \varepsilon \sigma \alpha \gamma v v a \iota \kappa \iota ;)$. Perfect passive indicative of $\delta \varepsilon \omega$, to bind, with dative case $\gamma$ vvaıк. Marriage bond as in Ro 7:2 .

Seek not to be loosed ( $\mu \eta \zeta \eta \tau \varepsilon \lambda v \sigma \iota v$ ). Present active imperative with negative $\mu \eta$, "Do not be seeking release" ( $\lambda v \sigma \iota v$ ) from the marriage bond, old word, here only in N.T.

Seek not a wife ( $\mu \eta \zeta \eta \tau \varepsilon \gamma \cup v \alpha ו \kappa \alpha)$. Same construction, Do not be seeking a wife. Bachelors as well as widowers are included in $\lambda \varepsilon \lambda v \sigma \alpha$ (loosed, perfect passive indicative of $\lambda v \omega)$. This advice of Paul he only urges "because of the present necessity" (verse 26). Whether he held on to this opinion later one does not know. Certainly he gives the noblest view of marriage in Eph 5:22-33. Paul does not present it as his opinion for all men at all times. Men feel it their duty to seek a wife.

1Cor 7:28
But and if thou marry ( $\varepsilon \alpha \vee \delta \varepsilon \kappa \alpha \gamma \alpha \mu \eta \sigma \eta \iota \varsigma)$. Condition of the third class, undetermined with prospect of being determined, with the ingressive first aorist (late form) active subjunctive with eav: "But if thou also commit matrimony or get married," in spite of Paul's advice to the contrary.

Thou hast not sinned ( $o v \chi \eta \mu \alpha \rho \tau \varepsilon \varsigma$ ). Second aorist active indicative of $\alpha \mu \alpha \rho \tau \alpha \nu \omega$, to $\sin$, to miss a mark. Here either Paul uses the timeless (gnomic) aorist indicative or by a swift transition he changes the standpoint (proleptic) in the conclusion from the future (in the condition) to the past. Such mixed conditions are common (Robertson, Grammar, pp. 1020,1023 ). Precisely the same construction occurs with the case of the virgin ( $\pi \alpha \rho \theta \varepsilon v o \varsigma$ ) except that the old form of the first aorist subjunctive $(\gamma \eta \mu \eta)$ occurs in place of the late $\gamma \alpha \mu \eta \sigma \eta$ above. The MSS. interchange both examples. There is no special point in the difference in the forms.

Shall have tribulation in the flesh ( $\theta \lambda \iota \psi \iota \nu \tau \eta \sigma \alpha \rho \kappa \varepsilon \xi \sigma \sigma \sigma \iota v)$. Emphatic position of $\theta \lambda \iota \psi \iota \nu$ (pressure). See 2Co 12:7 $\sigma \kappa о \lambda о \pi \varsigma ~ \tau \eta ~ \sigma \alpha \rho \kappa ~(t h o r n ~ i n ~ t h e ~ f l e s h) . ~$

And I would spare you ( $\varepsilon \gamma \omega \delta \varepsilon v \mu \omega \nu \varphi \varepsilon \iota \delta o \mu \alpha$ ). Possibly conative present middle indicative, I am trying to spare you like $\alpha \gamma \varepsilon$ in Ro 2:4 and $\delta \iota \kappa \alpha \iota \nu \sigma \theta \varepsilon$ in Ga 5:4.

1Cor 7:29
But this I say ( $\tau 0 v \tau o \delta \varepsilon \varphi A ̂ \eta \mu$. Note $\varphi \hat{A} \eta \mu$ here rather than $\lambda \varepsilon \gamma \hat{A} \omega$ (verses 8,12 ). A new turn is here given to the argument about the present necessity.

The time is shortened (o каıроऽ $\sigma u v \varepsilon \sigma \tau \alpha \lambda \mu \varepsilon v o \varsigma \varepsilon \sigma \tau \tau v$ ). Perfect periphrastic passive indicative of $\sigma v \sigma \tau \varepsilon \lambda \lambda \omega$, old verb to place together, to draw together. Only twice in the N.T., here and Ac $5: 6$ which see. Found in the papyri for curtailing expenses. Calvin takes it for the shortness of human life, but apparently Paul pictures the foreshortening of time (opportunity) because of the possible nearness of and hope for the second coming. But in Philippians Paul faces death as his fate (Php 1:21-26 ), though still looking for the coming of Christ ( 3:20).
 accusative of general reference and iva has the notion of result rather than purpose (Robertson, Grammar, p. 997).

As though they had none ( $\omega \varsigma \mu \eta \varepsilon \chi \circ v \tau \varepsilon \varsigma$ ). This use of $\omega \varsigma$ with the participle for an assumed condition is regular and $\mu \eta$ in the Koine is the normal negative of the participle. So the idiom runs on through verse 31 .

1Cor 7:30
As though they possessed not ( $\omega \varsigma \mu \eta \kappa \alpha \tau \varepsilon \chi \circ v \tau \varepsilon \varsigma$ ). See this use of $\kappa \alpha \tau \varepsilon \chi \omega$, old verb to hold down (Lu 14:9), to keep fast, to possess, in 2Co 6:10 . Paul means that all earthly relations are to hang loosely about us in view of the second coming.

1Cor 7:31
Those that use the world ( $о \chi \rho \omega \mu \varepsilon v o$ tov коб $\mu \circ v$ ). Old verb $\chi \rho \alpha \circ \mu \alpha$, usually with the instrumental case, but the accusative occurs in some Cretan inscriptions and in late writers according to a tendency of verbs to resume the use of the original accusative (Robertson, Grammar, p. 468).

As not abusing it ( $\omega \varsigma \mu \eta \kappa \alpha \tau \alpha \chi \rho \eta \mu \varepsilon v o$ ). Perfective use of $\kappa \alpha \tau \alpha$ in composition, old verb, but here only in N.T., to use up, use to the full. Papyri give examples of this sense. This is more likely the idea than "abusing" it.

For the fashion of this world passeth away ( $\pi \alpha \rho \alpha \gamma \varepsilon \gamma \alpha \rho$ то $\sigma \chi \eta \mu \alpha$ тоv коб $\mu о v$ тоv $\tau о v$ ). Cf. 1Jo 2:17. $\Sigma \chi \eta \mu \alpha$ is the habitus, the outward appearance, old word, in N.T. only here and Php 2:7f. Параүع (old word) means "passes along" like a moving panorama (movie show!). Used of Jesus passing by in Jericho (Mt 20:30 ).

1Cor 7:32
Free from cares ( $\alpha \mu \varepsilon \rho \mu \nu о \nu \varsigma)$. Old compound adjective ( $\alpha$ privative and $\mu \varepsilon \rho \mu \nu \alpha$, anxiety). In N.T. only here and Mt 28:14 which see.

The things of the Lord ( $\tau \alpha$ $\tau 0 \mathrm{~K}$ Kupıov). The ideal state (so as to the widow and the virgin in verse 33), but even the unmarried do let the cares of the world choke the word (Mr 4:19).

How he may please the Lord ( $\pi \omega \varsigma \alpha \rho \varepsilon \sigma \eta \tau \omega \mathrm{Kv} \mathrm{\rho} \omega$ ). Deliberative subjunctive with $\pi \omega \varsigma$ retained in an indirect question. Dative case of $K v \rho \omega \omega$. Same construction in verse 33 with $\pi \omega \varsigma \alpha \rho \varepsilon \sigma \eta \tau \eta \gamma$ үvalk (his wife) and in $34 \pi \omega \varsigma \alpha \rho \varepsilon \sigma \eta \tau \omega \alpha v \delta \rho$ (her husband).

## 1Cor 7:34

And there is a difference also between the wife and the virgin ( $\kappa \alpha \mu \varepsilon \mu \varepsilon \rho \iota \sigma \tau \alpha \kappa \alpha \eta$ $\gamma \cup v \eta \kappa \alpha \eta \pi \alpha \rho \theta \varepsilon v \circ \varsigma)$. But the text here is very uncertain, almost hopelessly so. Westcott and Hort put $\kappa \alpha \mu \varepsilon \mu \varepsilon \rho ı \sigma \tau \alpha$ in verse 33 and begin a new sentence with $\kappa \alpha \eta \gamma v \nu \eta$ and add $\eta$ a $\gamma \alpha \mu \circ$, after $\eta \gamma \cup v \eta$, meaning "the widow and the virgin each is anxious for the things of the Lord" like the unmarried man (o $\alpha \gamma \alpha \mu \circ \varsigma$, bachelor or widow) in verse 32. Possibly so, but the MSS. vary greatly at every point. At any rate Paul's point is that the married woman is more disposed to care for the things of the world. But, alas, how many unmarried women (virgins and widows) are after the things of the world today and lead a fast and giddy life.

1Cor 7:35
For your own profit ( $\pi \rho \circ \varsigma \tau 0 ~ v \mu \omega v \alpha v \tau \omega v \sigma \nu \mu \varphi \circ \rho o v$ ). Old adjective, advantageous, with neuter article here as substantive, from verb $\sigma v \mu \varphi \varepsilon \rho \omega$. In N.T. here only and 10:33. Note reflexive plural form $v \mu \omega \nu \alpha v \tau \omega v$.

Not that I may cast a snare upon you ( $o v \chi \imath v \alpha \beta \rho o \chi o v v \mu ı v \varepsilon \pi \iota \beta \alpha \lambda \omega$ ). B $\rho \circ \chi o v$ is a noose or slip-knot used for lassoing animals, old word, only here in N.T. Papyri have an example "hanged by a noose." E $\pi \iota \beta \alpha \omega$ is second aorist active subjunctive of $\varepsilon \pi \iota \beta \alpha \lambda \lambda \omega$, old verb to cast upon. Paul does not wish to capture the Corinthians by lasso and compel them to do what they do not wish about getting married.

For that which is seemly ( $\pi \rho \circ \varsigma$ то $\varepsilon v \sigma \chi \eta \mu \circ v$ ). Old adjective ( $\varepsilon v$, well, $\sigma \chi \eta \mu \omega \nu$, shapely, comely, from $\sigma \chi \eta \mu \alpha$, figure). For the purpose of decorum.

Attend upon the Lord ( $\varepsilon v \pi \alpha \rho \varepsilon \delta \rho o v)$. Adjective construed with $\pi \rho \circ \varsigma \tau 0$, before, late word (Hesychius) from $\varepsilon v$, well, and $\pi \alpha \rho \varepsilon \delta \rho \circ \varsigma$, sitting beside, "for the good position beside the Lord" (associative instrumental case of Kvpı $\boldsymbol{\omega}$ ). Cf. Mary sitting at the feet of Jesus (Lu 10:39).

Without distraction ( $\alpha \pi \varepsilon \rho \iota \sigma \pi \alpha \sigma \tau \omega \varsigma$ ). Late adverb (Polybius, Plutarch, LXX) from the adjective $\alpha \pi \varepsilon \rho \iota \sigma \pi \alpha \sigma \tau \sigma \varsigma$ (common in the papyri) from a privative and $\pi \varepsilon \rho \iota \sigma \pi \alpha \omega$, to draw around (Lu 10:40).

1Cor 7:36
That he behaveth himself unseemly ( $\alpha \sigma \chi \eta \mu 0 v \varepsilon \iota v$ ). Old verb, here only in N.T., from $\alpha \sigma \chi \eta \mu \omega \nu$ (1Co 12:23 ), from a privative and $\sigma \chi \eta \mu \alpha$. Occurs in the papyri. Infinitive in indirect discourse after vo $\mu_{\zeta} \zeta \varepsilon$ (thinks) with $\varepsilon$ (condition of first class, assumed as true).

If she be past the flower of her age ( $\varepsilon \alpha \vee \eta \cup \pi \varepsilon \rho \alpha \kappa \mu \circ \varsigma)$. Old word, only here in N.T., from $v \pi \varepsilon \rho$ (over) and $\alpha \kappa \mu \eta$ (prime or bloom of life), past the bloom of youth, superadultus (Vulgate). Compound adjective with feminine form like masculine. Apparently the Corinthians had asked Paul about the duty of a father towards his daughter old enough to marry.

If need so requireth ( $\kappa \alpha$ оט $\tau \omega \varsigma о \varphi \varepsilon \iota \lambda \varepsilon \gamma \iota v \varepsilon \sigma \theta \alpha$ ). "And it ought to happen." Paul has discussed the problem of marriage for virgins on the grounds of expediency. Now he faces the question where the daughter wishes to marry and there is no serious objection to it. The
father is advised to consent. Roman and Greek fathers had the control of the marriage of their daughters. "My marriage is my father's care; it is not for me to decide about that" (Hermione in Euripides' Andromache, 987).

Let them marry ( $\gamma \alpha \mu \varepsilon \iota \tau \omega \sigma \alpha v$ ). Present active plural imperative (long form).
1Cor 7:37
To keep his own virgin daughter ( $\tau \eta \rho \varepsilon เ \nu \tau \eta \nu \varepsilon \alpha \cup \tau o v ~ \pi \alpha \rho \theta \varepsilon v o v$ ). This means the case when the virgin daughter does not wish to marry and the father agrees with her,
he shall do well ( $\kappa \alpha \lambda \omega \varsigma ~ \pi о п \eta \sigma \varepsilon) . ~$
1Cor 7:38
Doeth well ( $\kappa \lambda \lambda \omega \varsigma$ тоь $\varepsilon$ ). So Paul commends the father who gives his daughter in marriage ( $\gamma \alpha \mu \iota \zeta)$. This verb $\gamma \alpha \mu \zeta \omega$ has not been found outside the N.T. See on Mt 22:30 .
 shortened time ( 7:29). And yet, when all is said, Paul leaves the whole problem of getting married an open question to be settled by each individual case.

1Cor 7:39
For so long time as her husband liveth ( $\varepsilon \varphi^{\prime}$ oбov $\chi \rho \circ$ vov $\zeta \eta$ о $\left.\alpha v \eta \rho \alpha \cup \tau \eta \varsigma\right)$. While he lives ( $\tau \omega \zeta \omega \nu \tau \alpha \nu \delta \rho$ ) Paul says in Ro 7:2 . This is the ideal and is pertinent today when husbands meet their ex-wives and wives meet their ex-husbands. There is a screw loose somewhere. Paul here treats as a sort of addendum the remarriage of widows. He will discuss it again in 1Ti 5:9-13 and then he will advise younger widows to marry. Paul leaves her free here also to be married again, "only in the Lord" ( $\mu$ ovov $\varepsilon v$ Kvpı $\omega$ ). Every marriage ought to be "in the Lord."

To be married $(\gamma \alpha \mu \eta \theta \eta \nu \alpha)$ is first aorist passive infinitive followed by the dative relative $\omega$ with unexpressed antecedent tout $\omega$.

1Cor 7:40
Happier ( $\mu \alpha \kappa \alpha \rho \omega \tau \tau \varepsilon \rho \alpha$ ). Comparative of $\mu \alpha \kappa \alpha \rho \iota o s$ used in the Beatitudes (Mt 5:3ff.).
After my judgment ( $\kappa \alpha \tau \alpha \tau \eta \nu \varepsilon \mu \eta \nu \gamma \nu \omega \mu \eta \nu$ ). The same word used in verse 25 , not a command.

I think ( $\delta$ ок $\omega$ ). From $\delta$ ок $\varepsilon \omega$, not $v$ о $\mu \zeta \omega$ of verse 26 . But he insists that he has "the spirit of God" ( $\pi \nu \varepsilon v \mu \alpha \theta \varepsilon o v$ ) in the expression of his inspired judgment on this difficult, complicated, tangled problem of marriage. But he has discharged his duty and leaves each one to decide for himself.

## 1 Corinthians 8

1Cor 8:1
Now concerning things sacrificed to idols ( $\pi \varepsilon \rho \delta \varepsilon \tau \omega \nu \varepsilon \varepsilon \delta \omega \lambda o \theta v \tau \omega v$ ). Plainly the Corinthians had asked also about this problem in their letter to Paul ( 7:1). This compound adjective ( $\varepsilon \iota \delta \omega \lambda o v$, idol, $\theta v \tau \circ \varsigma$, verbal adjective from $\theta v \omega$, to sacrifice) is still found only in the N.T. and ecclesiastical writers, not so far in the papyri. We have seen this problem mentioned in the decision of the Jerusalem Conference (Ac 15:29; 21:25). The connection between idolatry and impurity was very close, especially in Corinth. See both topics connected in Re 2:14,20. By $\varepsilon เ \delta \omega \lambda$ o $\theta v \tau \alpha$ was meant the portion of the flesh left over after the heathen sacrifices. The heathen called it ıعoo日vtov (1Co 10:28). This leftover part "was either eaten sacrificially, or taken home for private meals, or sold in the markets" (Robertson and Plummer). What were Christians to do about eating such portions either buying in the market or eating in the home of another or at the feast to the idol? Three questions are thus involved and Paul discusses them all. There was evidently difference of opinion on the subject among the Corinthian Christians. Aspects of the matter come forward not touched on in the Jerusalem Conference to which Paul does not here allude, though he does treat it in Ga 2:1-10. There was the more enlightened group who acted on the basis of their superior knowledge about the non-existence of the gods represented by the idols.

Ye know that we all have knowledge (ot $\delta \alpha \mu \varepsilon v$ ot $\pi \alpha \nu \tau \varepsilon \varsigma ~ \gamma \nu \omega \sigma \iota v \varepsilon \chi \circ \mu \varepsilon v$ ). This may be a quotation from the letter (Moffatt, Lit. of N.T., p. 112). Since their conversion to Christ, they know the emptiness of idol-worship. Paul admits that all Christians have this knowledge (personal experience, $\gamma \nu \omega \sigma \iota \varsigma)$, but this problem cannot be solved by knowledge.

1Cor 8:2
Puffeth up ( $\varphi$ טбıo). From $\varphi$ vбוo $\omega$ (present indicative active). See on 4:6. Pride may be the result, not edification (oккобонв) which comes from love. Note article ( $\eta$ ) with both $\gamma \nu \omega \sigma$, and $\alpha \gamma a \pi \eta$, making the contrast sharper. See on 1Th 5:11 for the verb оккобо $\mu \varepsilon \omega$, to build up. Love is the solution, not knowledge, in all social problems.

That he knoweth anything ( $\varepsilon \gamma v \omega \kappa \varepsilon v \alpha \tau$ ). Perfect active infinitive in indirect discourse after $\delta$ окє (condition of first class with $\varepsilon$ ). So "has acquired knowledge" (cf. 3:18), has gone to the bottom of the subject.

He knoweth not yet (ov $\pi \omega \varepsilon \gamma v \omega$ ). Second aorist active indicative, timeless aorist, summary (punctiliar) statement of his ignorance.

As he ought to know ( $\kappa \alpha \theta \omega \varsigma \delta \varepsilon \gamma v \omega v \alpha$ ). Second aorist active infinitive, ingressive aorist (come to know). Newton's remark that he was only gathering pebbles on the shore of the ocean of truth is pertinent. The really learned man knows his ignorance of what lies beyond. Shallow knowledge is like the depth of the mud hole, not of the crystal spring.

1Cor 8:3

The same is known of him (ov $\frac{1}{} \varepsilon \gamma v \omega \sigma \tau \alpha \cup \pi^{\prime}$ avtov). Loving God (condition of first class again) is the way to come to know God. It is not certain whether outos refers to the man who loves God or to God who is loved. Both are true. God knows those that are his (2Ti 2:19; Ex 33:12). Those who know God are known of God (Ga 4:9). We love God because he first loved us (1Jo 4:19). But here Paul uses both ideas and both verbs. E $\gamma v \omega \sigma \tau \alpha$ is perfect passive indicative of $\gamma เ \nu \omega \sigma \kappa \omega$, an abiding state of recognition by ( $v \pi$ ') God. No one is acquainted with God who does not love him (1Jo 4:8). God sets the seal of his favour on the one who loves him. So much for the principle.

1Cor 8:4
No idol is anything in the world (ov $\varepsilon v \varepsilon \varepsilon \delta \omega \lambda o v \varepsilon v$ коб $\mu \omega$ ). Probably correct translation, though no copula is expressed. On $\varepsilon \varepsilon \delta \omega \lambda \circ v$ (from $\varepsilon \iota \delta o \varsigma$ ), old word, see on Ac 7:41; 15:20; $1 \mathrm{Th} 1: 9$. The idol was a mere picture or symbol of a god. If the god has no existence, the idol is a non-entity. This Gentile Christians had come to know as Jews and Jewish Christians already knew.

No God but one (ouסzıc $\theta \varepsilon o \varsigma \varepsilon \mu \eta \varepsilon \varepsilon \varsigma)$. This Christians held as firmly as Jews. The worship of Jesus as God's Son and the Holy Spirit does not recognize three Gods, but one God in three Persons. It was the worship of Mary the Mother of Jesus that gave Mahomet his cry: "Allah is One." The cosmos, the ordered universe, can only be ruled by one God (Ro 1:20).

1Cor 8:5
For though there be (ка $\gamma \alpha \rho \varepsilon เ \pi \varepsilon \rho \varepsilon ו \sigma)$. Literally, "For even if indeed there are" (a concessive clause, condition of first class, assumed to be true for argument's sake).

Called gods ( $\lambda \varepsilon \gamma o \mu \varepsilon v o \quad \theta \varepsilon o$ ). So-called gods, reputed gods. Paul denied really the existence of these so-called gods and held that those who worshipped idols (non-entities) in reality worshipped demons or evil spirits, agents of Satan (1Co 10:19-21).

1Cor 8:6
Yet to us there is one God, the Father ( $\left.\alpha \lambda \lambda^{\prime} \eta \mu \nu \nu \varepsilon ı \varsigma ~ \theta \varepsilon o \varsigma ~ o ~ \pi \alpha \tau \eta \rho\right)$. B omits $\alpha \lambda \lambda^{\prime}$ here, but the sense calls for it anyhow in this apodosis, a strong antithesis to the protasis ( even if at least, $\kappa \alpha \varepsilon \pi \tau \varepsilon \rho)$.

Of whom ( $\varepsilon \xi \mathfrak{o v}$ ). As the source ( $\varepsilon \xi$ ) of the universe ( $\tau \alpha \pi \alpha \nu \tau \alpha$ as in Ro 11:36; Col 1:16f. ) and also our goal is God ( $\varepsilon ı \varsigma ~ \alpha u \tau o v)$ as in Ro 11:36 where $\delta \iota^{\prime}$ autov is added whereas here $\delta^{\prime}$ ov (through whom) and $\delta \imath^{\prime}$ avtov (through him) point to Jesus Christ as the intermediate agent in creation as in Col 1:15-20; Joh 1:3f. Here Paul calls Jesus

Lord (Kupıos) and not
God ( $\theta$ عoৎ), though he does apply that word to him in Ro 9:5; Tit 2:13; Col 2:9; Ac 20:28

1Cor 8:7

Howbeit in all men there is not that knowledge ( $\alpha \lambda \lambda^{\prime}$ ovк $\left.\varepsilon v \pi \alpha \sigma \iota \nu \eta \gamma \nu \omega \sigma \iota \varsigma\right)$. The knowledge ( $\eta \gamma \nu \omega \sigma \iota \varsigma)$ of which Paul is speaking. Knowledge has to overcome inheritance and environment, prejudice, fear, and many other hindrances.

Being used until now to the idol ( $\tau \eta \sigma v \nu \eta \theta \varepsilon \iota \alpha \varepsilon \omega \varsigma \alpha \rho \tau \tau o v \varepsilon \iota \delta \omega \lambda o v$ ). Old word $\sigma u \nu \eta \theta \varepsilon \iota \alpha$ from $\sigma v \nu \eta \forall \eta \varsigma(\sigma v v, \eta \theta$ oৎ), accustomed to, like Latin consuetudo, intimacy. In N.T. only here and Joh 18:39; 1Co 11:16. It is the force of habit that still grips them when they eat such meat. They eat it "as an idol sacrifice" ( $\omega \varsigma \varepsilon \varepsilon \delta \omega \lambda 0 \theta v \tau o v$ ), though they no longer believe in idols. The idol-taint clings in their minds to this meat.

Being weak ( $\alpha \sigma \theta \varepsilon v \eta \varsigma$ ov $\sigma \alpha$ ). "It is defiled, not by the partaking of polluted food, for food cannot pollute (Mr 7:18f.; Lu 11:41), but by the doing of something which the unenlightened conscience does not allow" (Robertson and Plummer). For this great word $\sigma u v \varepsilon \iota \delta \eta \sigma \iota \varsigma$ (conscientia, knowing together, conscience) see on Ac 23:1. It is important in Paul's Epistles, Peter's First Epistle, and Hebrews. Even if unenlightened, one must act according to his conscience, a sensitive gauge to one's spiritual condition. Knowledge breaks down as a guide with the weak or unenlightened conscience. For $\alpha \sigma \theta \varepsilon v \eta \varsigma$, weak (lack of strength) see on Mt 26:41 .

Defiled ( $\mu \mathrm{o} \lambda \nu v \varepsilon \tau \alpha$ ). Old word $\mu \mathrm{o} \lambda \nu v \omega$, to stain, pollute, rare in N.T. (1Ti 3:9; Re 3:4).
1Cor 8:8
Will not commend (ov $\pi \alpha \rho \alpha \sigma \tau \eta \sigma \varepsilon$ ). Future active indicative of $\pi \alpha \rho \iota \sigma \tau \eta \mu$, old word to present as in Ac 1:3; Lu 2:22; Col 1:28. Food $(\beta \rho \omega \mu \alpha)$ will not give us an entree to God for commendation or condemnation, whether meat-eaters or vegetarians.

Are we the worse $(v \sigma \tau \varepsilon \rho \circ v \mu \varepsilon \theta \alpha)$. Are we left behind, do we fall short. Both conditions are of the third class $(\varepsilon \alpha \nu \mu \eta, \varepsilon \alpha v)$ undetermined.

Are we the better ( $\pi \varepsilon \rho เ \sigma \sigma \varepsilon v o \mu \varepsilon \theta \alpha$ ). Do we overflow, do we have excess of credit. Paul here disposes of the pride of knowledge (the enlightened ones) and the pride of prejudice (the unenlightened). Each was disposed to look down upon the other, the one in scorn of the other's ignorance, the other in horror of the other's heresy and daring.

1Cor 8:9
Take heed ( $\beta \lambda \varepsilon \pi \varepsilon \tau \varepsilon$ ). A warning to the enlightened.
Lest by any means ( $\mu \eta \pi \omega \varsigma$ ). Common construction after verbs of caution or fearing, $\mu \eta \pi \omega \varsigma$ with aorist subjunctive $\gamma \varepsilon \nu \eta \tau \alpha$.

This liberty of yours ( $\eta \varepsilon \xi$ ovoıa $v \mu \omega v \alpha v \tau \eta$ ). $E \xi$ ovoıa, from $\varepsilon \xi \varepsilon \sigma \tau \iota v$, means a grant, allowance, authority, power, privilege, right, liberty. It shades off easily. It becomes a battle cry, personal liberty does, to those who wish to indulge their own whims and appetites regardless of the effect upon others.

A stumbling-block to the weak ( $\pi \rho о \sigma к о \mu \mu \alpha$ тоıऽ $\alpha \sigma \theta \varepsilon \nu \varepsilon \sigma \iota)$. Late word from $\pi \rho о \sigma \kappa о \pi \tau \omega$, to cut against, to stumble against. So an obstacle for the foot to strike. In Ro 14:13 Paul uses $\sigma \kappa \alpha \nu \delta \alpha \lambda o v$ as parallel with $\pi \rho о \sigma \kappa о \mu \mu \alpha$. We do not live alone. This principle
applies to all social relations in matters of law, of health, of morals. Noblesse oblige. The enlightened must consider the welfare of the unenlightened, else he does not have love.

1Cor 8:10
If a man see thee which hast knowledge sitting at meat in an idol's temple ( $\varepsilon \alpha v \gamma \alpha \rho$
 case. Paul draws the picture of the enlightened brother exercising his "liberty" by eating in the idol's temple. Later he will discuss the peril to the man's own soul in this phase of the matter ( 10:14-22), but here he considers only the effect of such conduct on the unenlightened or weak brother. This bravado at a sacrificial banquet is in itself idolatrous as Paul will show. But our weak brother will be emboldened (oוкоסопŋ $\theta \eta \sigma \varepsilon \tau \alpha$, future passive indicative, will be built up) to go on and do what he still believes to be wrong, to eat things sacrificed to idols ( $\varepsilon \iota \varsigma ~ \tau о ~ \tau \alpha ~ \varepsilon ı \delta \omega \lambda 0 \theta v \tau \alpha \varepsilon \sigma \theta \iota \varepsilon เ v)$. Alas, how often that has happened. Defiance is flung in the face of the unenlightened brother instead of loving consideration.

1Cor 8:11
Through thy knowledge ( $\varepsilon v \tau \eta \sigma \eta \gamma \nu \omega \sigma \varepsilon$ ). Literally, in thy knowledge. Surely a poor use to put one's superior knowledge.

Perisheth ( $\alpha \pi 0 \lambda \lambda \nu \tau \alpha$ ). Present middle indicative of the common verb $\alpha \pi \sigma \lambda \lambda \nu \mu$, to destroy. Ruin follows in the wake of such daredevil knowledge.

For whose sake Christ died ( $\delta \iota^{\prime}$ ov X $\operatorname{X\rho \sigma \tau o\varsigma ~} \alpha \pi \varepsilon Ө \alpha v \varepsilon v$ ). Just as much as for the enlightened brother with his selfish pride. The accusative ( ov ) with $\delta \mathrm{l}^{\prime}$ gives the reason, not the agent as with the genitive in 8:6 ( $\delta \mathrm{t}^{\prime}$ ov). The appeal to the death ( $\alpha \pi \varepsilon \theta \alpha v \varepsilon v$, second aorist active indicative of $\alpha \pi \sigma \theta \nu \eta \sigma \kappa \omega)$ of Christ is the central fact that clinches Paul's argument.

1Cor 8:12
Wounding their conscience ( $\tau v \pi \tau \circ v \tau \varepsilon \varsigma \alpha \cup \tau \omega \nu \tau \eta \nu \sigma \cup v \varepsilon \varepsilon \delta \eta \sigma \tau v$ ). Old verb $\tau v \pi \tau \omega$, to smite with fist, staff, whip. The conscience is sensitive to a blow like that, a slap in the face.

Ye sin against Christ ( $\varepsilon \iota \varsigma$ X $\rho \iota \sigma \tau o v ~ a \mu \alpha \rho \tau \alpha v \varepsilon \tau \varepsilon$ ). That fact they were overlooking. Jesus had said to Saul that he was persecuting him when he persecuted his disciples (Ac 9:5). One may wonder if Paul knew the words of Jesus in Mt 25:40, "ye did it unto me."

1Cor 8:13
Meat ( $\beta \rho \omega \mu \alpha$ ). Food it should be, not flesh ( $\kappa \rho \varepsilon \alpha$ ).
Maketh my brother to stumble ( $\sigma \kappa \alpha v \delta \alpha \lambda \iota \zeta \varepsilon$ tov $\alpha \delta \varepsilon \lambda \varphi \circ v \mu \circ v$ ). Late verb (LXX and N.T.) to set a trap-stick (Mt 5:29) or stumbling-block like $\pi \rho о \sigma \kappa о \mu \mu \alpha$ in verse 9 (cf. Ro 14:13,21 ). Small boys sometimes set snares for other boys, not merely for animals to see them caught.

I will eat no flesh for evermore ( $\circ v \mu \eta \varphi \alpha \gamma \omega \kappa \rho \varepsilon \alpha \varepsilon ı \varsigma \tau o v \alpha \iota \omega v \alpha$ ). The strong double negative ov $\mu \eta$ with the second aorist subjunctive. Here Paul has
flesh ( $\kappa \rho \varepsilon \alpha$ ) with direct reference to the flesh offered to idols. Old word, but in N.T. only here and Ro 14:21. This is Paul's principle of love (verse 2) applied to the matter of eating meats offered to idols. Paul had rather be a vegetarian than to lead his weak brother to do what he considered sin. There are many questions of casuistry today that can only be handled wisely by Paul's ideal of love.

## 1 Corinthians 9

1Cor 9:1
Am I not free? (Ovk $\varepsilon \not \mu \varepsilon \lambda \varepsilon v \theta \varepsilon \rho o \sigma ;)$. Free as a Christian from Mosaic ceremonialism (cf. 9:19) as much as any Christian and yet he adapts his moral independence to the principle of considerate love in 8:13.

Am I not an apostle? (ovk $\varepsilon \mu \alpha \pi о \sigma \tau о \lambda о \sigma ;$ ). He has the exceptional privileges as an apostle to support from the churches and yet he foregoes these.
 Ac 9:17,27; 18:9; 22:14,17f.; 2Co 12:1ff. ) that he has the qualification of an apostle (Ac 1:22 ) though not one of the twelve. Note strong form of the negative oux here. All these questions expect an affirmative answer. The perfect active عорака from opa $\omega$, to see, does not here have double reduplication as in Joh 1:18 .

Are not ye? (ov $v \mu \varepsilon \iota \varsigma \varepsilon \sigma \tau \varepsilon ;$ ). They were themselves proof of his apostleship.
1Cor 9:2
Yet at least I am to you ( $\alpha \lambda \lambda \alpha \gamma \varepsilon v \mu \nu v \varepsilon \mu)$. An argumentum ad hominem and a pointed appeal for their support. Note use of $\alpha \lambda \lambda \alpha \gamma^{\varepsilon}$ in the apodosis (cf. 8:6).

1Cor 9:3
My defence ( $\eta \varepsilon \mu \eta \alpha \pi o \lambda o \gamma \iota \alpha$ ). Original sense, not idea of apologizing as we say. See on Ac 22:1; 25:16 . Refers to what precedes and to what follows as illustration of 8:13.

To them that examine me (тоı $\varepsilon \mu \varepsilon \alpha v a \kappa \rho ı v o v \sigma ı)$ ). See on 1Co 2:15; 4:3. The critics in Corinth were "investigating" Paul with sharp eyes to find faults. How often the pastor is under the critic's spy-glass.

1Cor 9:4
Have we no right? ( $\mathrm{M} \eta$ оик $\varepsilon \chi о \mu \varepsilon v$ ع $\xi$ ovaıav;). Literary plural here though singular in $1-3$. The $\mu \eta$ in this double negative expects the answer "No" while ouk goes with the verb $\varepsilon \chi \circ \mu \varepsilon v$. "Do we fail to have the right?" Cf. Ro 10:18f. (Robertson, Grammar, p. 1173).

1Cor 9:5
Have we no right? ( $\mathrm{M} \eta$ оик $\varepsilon \chi о \mu \varepsilon \nu \varepsilon \xi^{\prime}{ }^{\prime} \sigma \iota \alpha v$;). Same idiom.
To lead about a wife that is a believer? ( $\alpha \delta \varepsilon \lambda \varphi \eta \nu \gamma \cup v a ı \kappa \alpha \pi \varepsilon \rho ı \alpha \gamma \varepsilon \imath ;)$. Old verb $\pi \varepsilon \rho ı \alpha \gamma \omega$, intransitive in Ac 13:11. Two substantives in apposition, a sister a wife, a common Greek idiom. This is a plea for the support of the preacher's wife and children. Plainly Paul has no wife at this time.

And Cephas (ка Кпра¢). Why is he singled out by name? Perhaps because of his prominence and because of the use of his name in the divisions in Corinth ( 1:12). It was well known that Peter was married (Mt 8:14). Paul mentions James by name in Ga 1:19 as one of the Lord's brothers. All the other apostles were either married or had the right to be.

1Cor 9:6

Have we not a right to forbear working? (ovк $\varepsilon \chi о \mu \varepsilon \nu \varepsilon \xi$ оvбı $\alpha \nu \mu \eta \varepsilon \rho \gamma \alpha \zeta \varepsilon \sigma \theta \alpha \iota$;). By $\eta$ (or) Paul puts the other side about Barnabas (the only allusion since the dispute in Ac 15:39 , but in good spirit) and himself. Perhaps (Hofmann) Paul has in mind the fact that in the first great mission tour (Ac 13; 14 ), Barnabas and Paul received no help from the church in Antioch, but were left to work their way along at their own charges. It was not till the Philippian Church took hold that Paul had financial aid (Php 4:15 ). Here both negatives have their full force. Literally, Do we not have (ovк $\varepsilon \chi \circ \mu \varepsilon \nu$, expecting the affirmative reply) the right not ( $\mu \eta$, negative of the infinitive $\varepsilon \rho \gamma \alpha \zeta \varepsilon \sigma \theta \alpha$ ) to do manual labour (usual meaning of $\varepsilon \rho \gamma \alpha \zeta$ о $\mu \alpha$ as in 4:12)?" There was no more compulsion on Paul and Barnabas to support themselves than upon the other workers for Christ. They renounced no rights in being voluntarily independent.

1Cor 9:7
What soldier ever serveth? ( $\tau \varsigma \varsigma \tau \rho a \tau \varepsilon \cup \varepsilon \tau \alpha \pi о \tau \varepsilon ;$ ). "Who ever serves as a soldier?" serves in an army ( $\sigma \tau \rho \alpha \tau \sigma)$. Present middle of old verb $\sigma \tau \rho \alpha \tau \varepsilon v \omega$.

At his own charges (ıııos o $\psi \omega v \iota \circ \varsigma$ ). This late word o $\omega \omega v$ vov (from o $\%$ ov, cooked meat or relish with bread, and $\omega v \varepsilon o \mu a$, to buy) found in Menander, Polybius, and very common in papyri and inscriptions in the sense of rations or food, then for the soldiers' wages (often provisions) or the pay of any workman. So of the wages of $\sin$ (Ro 6:23 ). Paul uses $\lambda \alpha \beta \omega \nu$ o $\psi \omega \nu$ lov (receiving wages, the regular idiom) in 2Co 11:8. See Moulton and Milligan, Vocabulary; Deissmann, Bible Studies, pp. 148,266; Light from the Ancient East, p. 168. To give proof of his right to receive pay for preaching Paul uses the illustrations of the soldier (verse 7), the husbandman (verse 7), the shepherd (verse 7), the ox treading out the grain (8), the ploughman (verse 10), the priests in the temple (13), proof enough in all conscience, and yet not enough for some churches who even today starve their pastors in the name of piety.

Who planteth a vineyard? ( $\tau \iota \varsigma \varphi \cup \tau \varepsilon v \varepsilon ~ \alpha \mu \pi \varepsilon \lambda \omega \nu \alpha ;$ ). A $\mu \pi \varepsilon \lambda \omega \nu$ no earlier than Diodorus, but in LXX and in papyri. Place of vines ( $\alpha \mu \pi \varepsilon \lambda o \varsigma)$, meaning of ending $-\omega v$.

Who feedeth a flock? ( $\tau \iota \varsigma \pi о \mu \alpha \iota v \varepsilon \pi о \mu \nu \eta \nu ;$ ). Cognate accusative, both old words. Paul likens the pastor to a soldier, vinedresser, shepherd. He contends with the world, he plants churches, he exercises a shepherd's care over them (Vincent).

1Cor 9:8
Do I speak these things after the manner of men? ( $М \eta \kappa \alpha \tau \alpha \alpha \nu \theta \rho \omega \pi \sigma \nu \tau \alpha v \tau \alpha \lambda \alpha \lambda \omega$;). Negative answer expected. Paul uses $\kappa \alpha \tau \alpha \alpha v \theta \rho \omega \pi$ ov six times (1Co 3:3; 9:8; 15:32; Gal 1:11; 3:15; Ro 3:5 ). The illustrations from human life are pertinent, but he has some of a higher order, from Scripture.

The law also ( $\kappa \alpha$ о vоноৎ). Perhaps objection was made that the Scripture does not support the practice of paying preachers. That objection is still made by the stingy.

1Cor 9:9

Thou shalt not muzzle the ox when he treadeth out the corn (ov $\varphi \not \mu \omega \sigma \varepsilon \varsigma \beta o v v$ $\alpha \lambda o \omega v \tau \alpha)$. Quotation from De 25:4. Prohibition by ov and the volitive future indicative. $\Phi \mu \circ \omega$, to muzzle (from $\varphi \mu \circ \varsigma$, a muzzle for dogs and oxen), appears first in Aristophanes (Clouds, 592) and not again till LXX and N.T., though in the papyri also. Evidently a vernacular word, perhaps a slang word. See metaphorical use in Mt 22:12,34. A $\lambda o \omega v \tau \alpha$ is present active participle of the old verb $\alpha \lambda o \alpha \omega$, occurs in the N.T. only here (and verse 10) and $1 \mathrm{Ti} 5: 18$ where it is also quoted. It is probably derived from $\alpha \lambda o s$ or $\alpha \lambda o v$, a threshingfloor, or the disc of a shield or of the sun and moon. The Egyptians according to the monuments, used oxen to thresh out the grain, sometimes donkeys, by pulling a drag over the grain. The same process may be found today in Andalusia, Italy, Palestine. A hieroglyphic inscription at Eileithyas reads:
"Thresh ye yourselves, O oxen, Measures of grain for yourselves, Measures of grain for your masters."

Note $\mu \eta \mu \varepsilon \lambda \varepsilon$ expects the negative answer, impersonal verb with dative and genitive cases ( $\theta \varepsilon \mathrm{co}$, God, $\beta \mathrm{o} \omega \nu$, oxen).

Altogether ( $\pi \alpha \vee \tau \omega \varsigma)$. But here probably with the notion of doubtless or assuredly. The editors differ in the verse divisions here. The Canterbury Version puts both these questions in verse 10, the American Standard the first in verse 9, the second in verse 10.

1Cor 9:10
He that plougheth (o $\alpha \rho \circ \tau \rho \iota \omega v$ ). Late verb $\alpha \rho \circ \tau \rho \iota \alpha \omega$, to plough, for the old $\alpha \rho o \omega$ from apotoov (plough), in LXX and rare in papyri.

In hope of partaking ( $\varepsilon \pi^{\prime} \varepsilon \lambda \pi \iota \delta$ $\tau 0 v \mu \varepsilon \tau \varepsilon \chi \varepsilon เ v$ ). The infinitive $\alpha \lambda o a i v$ is not repeated nor is o $\varphi \varepsilon \iota \lambda \varepsilon$ though it is understood, "He that thresheth ought to thresh in hope of partaking." He that ploughs hardly refers to the ox at the plough as he that threshes does. The point is that all the workers (beast or man) share in the fruit of the toil.

1Cor 9:11
Is it a great matter? ( $\mu \varepsilon \gamma \alpha ;$ ). The copula $\varepsilon \sigma \tau \iota v$ has to be supplied. Note two conditions of first class with $\varepsilon$, both assumed to be true. On $\pi v \varepsilon v \mu \alpha \tau$ тк and $\sigma \alpha \rho \kappa เ \kappa \alpha$ see on 2:14; 3:3. This point comes out sharply also in Ga 6:6.

1Cor 9:12
Over you ( $\nu \mu \omega v$ ). Objective genitive after $\varepsilon \xi o v \sigma ı \alpha v$.
Do not we yet more? (ov $\mu \alpha \lambda \lambda o v \eta \mu \varepsilon ા \sigma$;). Because of Paul's peculiar relation to that church as founder and apostle.

But we bear all things ( $\alpha \lambda \lambda \alpha \pi \alpha \nu \tau \alpha \sigma \tau \varepsilon \gamma \circ \mu \varepsilon v$ ). Old verb to cover ( $\sigma \tau \varepsilon \gamma \eta$, roof) and so to cover up, to conceal, to endure (1Co 13:7 of love). Paul deliberately declined to use (usual instrumental case with $\chi \rho \alpha o \mu \alpha$ ) his right to pay in Corinth.

That we may cause no hindrance ( $\downarrow v \alpha \mu \eta \tau \imath v \alpha \varepsilon v \kappa о \pi \eta \nu \delta \omega \mu \varepsilon v$ ). Late word $\varepsilon v \kappa о \pi \eta$, a cutting in (cf. radio or telephone) or hindrance from $\varepsilon v \kappa o \pi \tau \omega$, to cut in, rare word (like
$\varepsilon \kappa \kappa о \pi \eta)$ here only in N.T. and once in Vettius Valens. How considerate Paul is to avoid "a hindrance to the gospel of Christ" ( $\tau \omega \varepsilon v a \gamma \gamma \varepsilon \lambda เ \omega$ tov Xpıбтov, dative case and genitive) rather than insist on his personal rights and liberties, an eloquent example for all modern men.

1Cor 9:13
Sacred things ( $\tau \alpha \mid \varepsilon \rho \alpha$ ).
 the details. This is a very pertinent illustration.

They which wait upon the altar (o $\tau \omega$ $\theta v \sigma i \alpha \sigma \tau \eta \rho I \omega$ $\pi \alpha \rho \varepsilon \delta \rho \varepsilon v o v \tau \varepsilon \varsigma)$. Old word $\pi \alpha \rho \varepsilon \delta \rho \varepsilon v \omega$, to sit beside, from $\pi \alpha \rho--\varepsilon \delta \rho o \varsigma$, like Latin assidere, and so constant attendance. Only here in the N.T. Locative case $\theta$ voıaбт $\rho \rho \omega$, late word found so far only in LXX, Philo, Josephus, N.T., and ecclesiastical writers. See on Mt 5:23 .

1Cor 9:14
Even so did the Lord ordain (ovtw¢ ка о Kupıos $\delta \iota \varepsilon \tau \alpha \xi \varepsilon v$ ). Just as God gave orders about the priests in the temple, so did the Lord Jesus give orders for those who preach the gospel to live out of the gospel ( $\varepsilon \kappa$ tov $\varepsilon v a \gamma \gamma \varepsilon \lambda_{\imath} \circ v$ ऽ $\eta ı v$ ). Evidently Paul was familiar with the words of Jesus in Mt 10:10; Lu 10:7f. either in oral or written form. He has made his argument for the minister's salary complete for all time.

1Cor 9:15
For it were good for me to die, than that any man should make my glorying void
 this sentence reflects the intensity of Paul's feeling on the subject. He repeats his refusal to use his privileges and rights to a salary by use of the present perfect middle indicative ( $\kappa \varepsilon \chi \rho \eta \mu \alpha)$. By the epistolary aorist ( $\varepsilon \gamma \rho \alpha \psi \alpha)$ he explains that he is not now hinting for a change on their part towards him in the matter, "in my case" ( $\varepsilon v \varepsilon \mu \circ$ ). Then he gives his reason in vigorous language without a copula ( $\eta \nu$, were): "For good for me to die rather than," but here he changes the construction by a violent anacoluthon. Instead of another infinitive ( $\kappa \varepsilon \nu \omega \sigma \alpha$ ) after $\eta$ (than) he changes to the future indicative without ot or $\iota v a$, "No one shall make my glorying void," viz., his independence of help from them. Kevow is an old verb, from кevoৎ, empty, only in Paul in N.T. See on 1Co 1:17 .

1Cor 9:16
For if I preach ( $\varepsilon \alpha v \gamma \alpha \rho \varepsilon v \alpha \gamma \gamma \varepsilon \lambda ı \zeta \omega \mu \alpha)$. Third class condition, supposable case. Same construction in verse $16(\varepsilon \alpha v \mu \eta)$.

For necessity is laid upon me ( $\alpha v \alpha \gamma \kappa \eta ~ \gamma \alpha \rho \mu о \varepsilon \pi \kappa \kappa \varepsilon \iota \tau \alpha$ ). Old verb, lies upon me (dative case $\mu \mathrm{o}$ ). Jesus had called him (Ac 9:6,15; Ga 1:15f.; Ro 1:14). He could do no other and deserves no credit for doing it.

Woe is me (ova $\gamma \alpha \rho \mu \mathrm{o}$ ). Explaining the $\alpha v \alpha \gamma \kappa \eta$ (necessity). Paul had to heed the call of Christ that he had heard. He had a real call to the ministry. Would that this were the case with every modern preacher.

1Cor 9:17
Of mine own will ( $\varepsilon \kappa \omega v$ )
--not of mine own will ( $\alpha \kappa \omega \nu$ ). Both common adjectives, but only here in N.T. save $\varepsilon \kappa \omega v$, also in Ro 8:20. The argument is not wholly clear. Paul's call was so clear that he certainly did his work
willingly and so had a reward (see on $\mathrm{Mt} 6: 1$ for $\mu \mathrm{\sigma} \theta \mathrm{oc}$ ); but the only
reward that he had for his willing work (Marcus Dods) was to make the gospel
free of expense ( $\alpha \delta \alpha \pi \alpha \nu 0 v$, verse 18, rare word, here only in N.T., once in inscription at Priene). This was his $\mu \circ \sigma \theta$ oc. It was glorying ( $\kappa \alpha v \chi \eta \mu \alpha$, to be able to say so as in Ac 20:33f. ).

I have a stewardship intrusted to me (оєкоvо $\mu \propto \nu \pi \varepsilon \pi \iota \sigma \tau \varepsilon \cup \mu \alpha)$. Perfect passive indicative with the accusative retained. I have been intrusted with a stewardship and so would go on with my task like any otкоvоцоৎ (steward) even if $\alpha \kappa \omega v$ (unwilling).

1Cor 9:18
So as not to use to the full ( $\varepsilon \iota \varsigma \tau о \mu \eta \kappa \alpha \tau \alpha \chi \rho \eta \sigma \alpha \sigma \theta \alpha)$. Eıs $\tau$ o for purpose with articular infinitive and perfective use of $\kappa \alpha \tau \alpha$ (as in 7:31) with $\chi \rho \eta \sigma \alpha \sigma \theta \alpha$ (first aorist middle infinitive).

1Cor 9:19
I brought myself under bondage ( $\varepsilon \mu \alpha v \tau o v \varepsilon \delta o v \lambda \omega \sigma \alpha$ ). Voluntary bondage, I enslaved myself to all, though free. Causative verb in -o $\omega$ ( $\delta o v \lambda o \omega$, from $\delta o v \lambda o \varsigma$ ). The more ( $\tau 0 v \varsigma$ $\pi \lambda \varepsilon \iota o v a \varsigma)$. Than he could have done otherwise. Every preacher faces this problem of his personal attitude and conduct. Note $\kappa \varepsilon \rho \delta \eta \sigma \omega$ (as in verses $20,21,22$, but once $\tau v \alpha \kappa \varepsilon \rho \delta \alpha \nu \omega$ in 21 , regular liquid future of $\kappa \varepsilon \rho \delta \alpha \iota v \omega$ ) with $\imath v \alpha$ is probably future active indicative (Jas 4:13 ), though Ionic aorist active subjunctive from $\kappa \varepsilon \rho \delta \alpha \omega$ is possible (Mt 18:15). "He refuses payment in money that he may make the greater gain in souls" (Edwards).

1Cor 9:20
As a Jew ( $\omega \varsigma$ Iov $\alpha$ aıoৎ). He was a Jew and was not ashamed of it (Ac 18:18; 21:26).
Not being myself under the law ( $\mu \eta \omega \nu \alpha v \tau о \varsigma v \pi о \nu о \mu \circ v$ ). He was emancipated from the law as a means of salvation, yet he knew how to speak to them because of his former beliefs and life with them ( $\mathrm{Ga} 4: 21$ ). He knew how to put the gospel to them without compromise and without offence.

1Cor 9:21
To them that are without law ( $\tau 0 \iota \varsigma$ avouoıs). The heathen, those outside the Mosaic law (Ro 2:14 ), not lawless (Lu 22:37; Ac 2:23; 1Ti 1:9). See how Paul bore himself with the pagans (Ac 14:15; 17:23; 24:25), and how he quoted heathen poets. "Not being an outlaw of God, but an inlaw of Christ" (Evans, Estius has it exlex, inlex, $\mu \eta \omega \nu \alpha \nu o \mu \circ \varsigma \theta \varepsilon o v, \alpha \lambda \lambda^{\prime}$
 thus, for it seems unusual with $\alpha v o \mu \circ \varsigma$ and $\varepsilon v v o \mu \circ \varsigma$, both old and regular adjectives.

1Cor 9:22
I became weak ( $\varepsilon \gamma \varepsilon v o \mu \eta \nu \alpha \sigma \theta \varepsilon v \eta \varsigma)$. This is the chief point, the climax in his plea for the principle of love on the part of the enlightened for the benefit of the unenlightened (chapter 1Co 8 ). He thus brings home his conduct about renouncing pay for preaching as an illustration of love ( 8:13).

All things ( $\pi \alpha \vee \tau \alpha$ )
to all men ( $\tau \circ \iota \varsigma \pi \alpha \sigma \iota v$, the whole number)
by all means ( $\pi \alpha \nu \tau \omega \varsigma)$. Pointed play on the word all,
that I may save some (ıva $\tau \imath v a \varsigma ~ \sigma \omega \sigma \omega$ ). This his goal and worth all the cost of adaptation. In matters of principle Paul was adamant as about Titus the Greek (Ga 2:5). In matters of expediency as about Timothy (Ac 16:3) he would go half way to win and to hold. This principle was called for in dealing with the problem of eating meat offered to idols (Ro 14:1; 15:1; 1Th 5:14).

1Cor 9:23
 That I may become co-partner with others in the gospel. The point is that he may be able to share the gospel with others, his evangelistic passion. $\sum v v \kappa o v v \omega v o \varsigma$ is a compound word ( $\sigma 0 v$, together with, koı $\omega \omega v \circ \varsigma$, partner or sharer). We have two genitives with it in Php 1:7 , though $\varepsilon v$ and the locative is used in Re 1:9. It is found only in the N.T. and a late papyrus. Paul does not wish to enjoy the gospel just by himself.

1Cor 9:24
In a race $(\varepsilon v \sigma \tau \alpha \delta \omega \omega)$. Old word from $\iota \sigma \tau \eta \mu$, to place. A stated or fixed distance, 606 3/4 feet, both masculine $\sigma \tau \alpha \delta$ เo (Mt 14:24; Lu 24:13 ) and neuter as here. Most of the Greek cities had race-courses for runners like that at Olympia.

The prize ( $\tau 0 ~ \beta \rho \alpha \beta \varepsilon \circ o v$ ). Late word, in inscriptions and papyri. Latin brabeum. In N. T. only here and $\operatorname{Php} 3: 14$. The victor's prize which only one could receive.

That ye may attain ( $\llcorner v \alpha \kappa \alpha \tau \alpha \lambda \alpha \beta \eta \tau \varepsilon$ ). Final use of $\stackrel{v \alpha \text { and perfective use of } \kappa \alpha \tau \alpha-\text { with }}{ }$ $\lambda \alpha \beta \eta \tau \varepsilon$ (effective aorist active subjunctive, grasp and hold). Old verb $\kappa \alpha \tau \alpha \lambda \alpha \mu \beta \alpha v \omega$ and used in Php 3:12f. .

1Cor 9:25
That striveth in the games (o $\alpha \gamma \omega v ı \zeta \rho \mu \varepsilon v o \varsigma)$. Common verb for contest in the athletic games ( $\alpha \gamma \omega v$ ), sometimes with the cognate accusative, $\alpha \gamma \omega v \alpha \alpha \gamma \omega v \iota \zeta \rho \alpha$ as in 1Ti 6:12; 2Ti 4:7. Probably Paul often saw these athletic games.

Is temperate in all things ( $\pi \alpha \nu \tau \alpha \varepsilon \gamma \kappa \rho \alpha \tau \varepsilon v \varepsilon \tau \alpha)$. Rare verb, once in Aristotle and in a late Christian inscription, and 1Co 7:9 and here, from $\varepsilon \gamma \kappa \rho \alpha \tau \eta \varsigma$, common adjective for one who controls himself. The athlete then and now has to control himself (direct middle) in
all things (accusative of general reference). This is stated by Paul as an athletic axiom. Training for ten months was required under the direction of trained judges. Abstinence from wine was required and a rigid diet and regimen of habits.

A corruptible crown ( $\varphi \theta a \rho \tau 0 v \sigma \tau \varepsilon \varphi a v o v$ ). $\Sigma \tau \varepsilon \varphi a v o c$ (crown) is from $\sigma \tau \varepsilon \varphi \omega$, to put around the head, like the Latin corona, wreath or garland, badge of victory in the games. In the Isthmian games it was of pine leaves, earlier of parsley, in the Olympian games of the wild olive. "Yet these were the most coveted honours in the whole Greek world" (Findlay). For the crown of thorns on Christ's head see Mt 27:29; Mr 15:17; Joh 19:2,5 . $\Delta \mathrm{\iota} \alpha \delta \eta \mu \alpha$ (diadem) was for kings (Re 12:3). Favourite metaphor in N.T., the crown of righteousness ( 2 Ti $4: 8$ ), the crown of life (Jas 1:12 ), the crown of glory ( $1 \mathrm{Pe} 5: 4$ ), the crown of rejoicing ( 1 Th 2:9), description of the Philippians (Php 4:1). Note contrast between $\varphi \theta$ a $\rho \tau 0 v$ (verbal adjective from $\varphi \theta \varepsilon \iota \rho \omega$, to corrupt) like the garland of pine leaves, wild olive, or laurel, and $\alpha \varphi \theta \alpha \rho \tau 0 v$ (same form with $\alpha$ privative) like the crown of victory offered the Christian, the amaranthine (unfading rose) crown of glory (1Pe 5:4).

1Cor 9:26
So (ov $\tau \omega \varsigma$ ). Both with $\tau \rho \varepsilon \chi \omega$ (run) and $\pi \cup \kappa \tau \varepsilon v \omega$ (fight).
As not uncertainly ( $\omega \varsigma$ ouk $\alpha \delta \eta \lambda \omega \varsigma$ ). Instead of exhorting them further Paul describes his own conduct as a runner in the race. He explains out $\omega \varsigma$. A $\delta \lambda \lambda \omega \varsigma$ old adverb, only here in N.T. His objective is clear, with Christ as the goal (Php 3:14 ). He kept his eye on Christ as Christ watched him.

Fight ( $\pi \cup \kappa \tau \varepsilon v \omega)$. Paul changes the metaphor from the runner to the boxer. Old verb (only here in N.T.) from $\pi \cup \kappa \tau \eta \zeta$ (pugilist) and that from $\pi v \gamma \mu \eta$ (fist). See on Mr 7:3).

As not beating the air ( $\omega \varsigma$ оик $\alpha \varepsilon \rho \alpha \delta \varepsilon \rho \omega v$ ). A boxer did this when practising without an adversary (cf. doing "the daily dozen") and this was called "shadow-fighting" ( $\sigma \kappa ı \mu \alpha \chi ı \alpha)$. He smote something more solid than air. Probably ov negatives $\alpha \varepsilon \rho \alpha$, though it still occurs with the participle as a strong and positive negative.

1Cor 9:27
But I buffet my body ( $\alpha \lambda \lambda \alpha \nu \pi \omega \pi \iota \alpha \zeta \omega \mu \circ v$ тo $\sigma \omega \mu \alpha$ ). In Aristophanes, Aristotle, Plutarch, from $v \pi \omega \pi \iota \circ$, and that from $v \pi \sigma$ and o ofc (in papyri), the part of the face under the eyes, a blow in the face, to beat black and blue. In N.T. only here and Lu 18:5 which see. Paul does not, like the Gnostics, consider his $\sigma \alpha \rho \xi$ or his $\sigma \omega \mu \alpha$ sinful and evil. But "it is like the horses in a chariot race, which must be kept well in hand by whip and rein if the prize is to be secured" (Robertson and Plummer). The boxers often used boxing gloves ( $\chi \varepsilon \sigma \tau v \varsigma$, of ox-hide bands) which gave telling blows. Paul was not willing for his body to be his master. He found good as the outcome of this self-discipline (2Co 12:7; Ro 8:13; Col 2:23; 3:5).

And bring it into bondage ( $\kappa \alpha \delta o v \lambda \alpha \gamma \omega \gamma \omega$ ). Late compound verb from $\delta o u \lambda \alpha \gamma \omega \gamma \circ \varsigma$, in Diodorus Siculus, Epictetus and substantive in papyri. It is the metaphor of the victor leading the vanquished as captive and slave.

Lest by any means ( $\mu \eta \pi \omega \varsigma$ ). Common conjunction for negative purpose with subjunctive as here ( $\gamma \varepsilon v \omega \mu \alpha$, second aorist middle).

After that I have preached to others ( $\alpha \lambda \lambda$ доя $\kappa \eta \rho \cup \xi \alpha \varsigma)$. First aorist active participle of $\kappa \eta \rho v \sigma \sigma \omega$ (see on 1:23), common verb to preach, from word $\kappa \eta \rho \cup \xi$ (herald) and that is probably the idea here. A к $\eta \rho \cup \xi$ at the games announced the rules of the game and called out the competitors. So Paul is not merely a herald, but a competitor also.

I myself should be rejected (avтo弓 $\alpha \delta$ окцос $\gamma \varepsilon v \omega \mu \alpha$ ). Literally, "I myself should become rejected." Aסокцос is an old adjective used of metals, coin, soil (Heb 6:8) and in a moral sense only by Paul in N.T. (1Co 9:27; 2Co 13:5-7; Ro 1:28; Tit 1:16; 2Ti 3:8 ). It means not standing the test ( $\delta о к ц \mu о \varsigma$ from $\delta о к \mu \alpha \zeta \omega$ ). Paul means rejected for the
prize , not for the entrance to the race. He will fail to win if he breaks the rules of the game (Mt 7:22f. ). What is the prize before Paul? Is it that
reward ( $\mu \sigma \theta \circ \varsigma$ ) of which he spoke in verse 18 , his glorying of preaching a free gospel? So Edwards argues. Most writers take Paul to refer to the possibility of his rejection in his personal salvation at the end of the race. He does not claim absolute perfection (Php 3:12) and so he presses on. At the end he has serene confidence (2Ti 4:7) with the race run and won. It is a humbling thought for us all to see this wholesome fear instead of smug complacency in this greatest of all heralds of Christ.

## 1 Corinthians 10

1Cor 10:1
For ( $\gamma \alpha \rho$ ). Correct text, not $\delta \varepsilon$. Paul appeals to the experience of the Israelites in the wilderness in confirmation of his statement concerning himself in $9: 26 f$. and as a powerful warning to the Corinthians who may be tempted to flirt with the idolatrous practices of their neighbours. It is a real, not an imaginary peril.

All under the cloud ( $\pi \alpha \nu \tau \varepsilon \varsigma \nu \pi о ~ \tau \eta \nu \nu \varepsilon \varphi \varepsilon \lambda \eta \nu)$. They all marched under the pillar of cloud by day (Ex 13:21; 14:19) which covered the host (Nu 14:14; Ps 95:39). This mystic cloud was the symbol of the presence of the Lord with the people.

1Cor 10:2
Were all baptized unto Moses in the cloud and in the sea ( $\pi \alpha v \tau \varepsilon \varsigma \varepsilon \varsigma \varsigma ~ \tau o v ~ M \omega v \sigma \eta \nu$ $\varepsilon \beta \alpha \pi \tau \iota \sigma \alpha \nu \tau 0 \varepsilon \nu \tau \eta \nu \varepsilon \varphi \varepsilon \lambda \eta \kappa \alpha \varepsilon \nu \tau \eta \quad \theta \alpha \lambda \alpha \sigma \sigma \eta)$. The picture is plain enough. The mystic cloud covered the people while the sea rose in walls on each side of them as they marched across. B K L P read $\varepsilon \beta \alpha \pi \tau \iota \sigma \alpha v \tau 0$ (causative first aorist middle, got themselves baptized) while Aleph A C D have $\varepsilon \beta \alpha \pi \tau \iota \sigma \theta \eta \sigma \alpha v$ (first aorist passive, were baptized). The immersion was complete for all of them in the sea around them and the cloud over them. Moses was their leader then as Christ is now and so Paul uses $\varepsilon$ عцऽ concerning the relation of the Israelites to Moses as he does of our baptism in relation to Christ (Ga 3:27).

1Cor 10:3
The same spiritual meat ( $\tau о ~ \alpha \cup \tau о ~ \pi \nu \varepsilon \cup \mu \alpha \tau \iota к о v ~ \beta \rho \omega \mu \alpha$ ). Westcott and Hort needlessly bracket to $\alpha v \tau 0$. Bp $\omega \mu \alpha$ is food, not just flesh. The reference is to the manna (Ex 16:13ff. ) which is termed "spiritual" by reason of its supernatural character. Jesus called himself the true bread from heaven (Joh 6:35) which the manna typified.

1Cor 10:4
For they drank of a spiritual rock that followed them ( $\varepsilon \pi เ v o v \varepsilon \kappa \pi \nu \varepsilon \cup \mu \alpha \tau ı к \eta \varsigma$ ако入оиӨоибŋऽ лєтрац). Change to the imperfect $\varepsilon \pi \iota v o v$ shows their continual access to the supernatural source of supply. The Israelites were blessed by the water from the rock that Moses smote at Rephidim (Ex 17:6) and at Kadesh (Nu 20:11) and by the well of Beer (Nu 21:16 ). The rabbis had a legend that the water actually followed the Israelites for forty years, in one form a fragment of rock fifteen feet high that followed the people and gushed out water. Baur and some other scholars think that Paul adopts this "Rabbinical legend that the water-bearing Rephidim rock journeyed onwards with the Israelites" (Findlay). That is hard to believe, though it is quite possible that Paul alludes to this fancy and gives it a spiritual turn as a type of Christ in allegorical fashion. Paul knew the views of the rabbis and made use of allegory on occasion (Ga 4:24).
 bolic form the preexistence of Christ. But surely "we must not disgrace Paul by making him
say that the pre-incarnate Christ followed the march of Israel in the shape of a lump of rock" (Hofmann). He does mean that Christ was the source of the water which saved the Israelites from perishing (Robertson and Plummer) as he is the source of supply for us today.

1Cor 10:5
With most of them ( $\varepsilon v \tau o \iota \varsigma \lambda \varepsilon \varepsilon \circ \sigma เ v \alpha v \tau \omega v$ ). "A mournful understatement," for only two (Caleb and Joshua) actually reached the Promised Land (Nu 14:30-32). All the rest were rejected or абокцоо ( 9:27).

Were overthrown ( $\kappa \alpha \tau \varepsilon \sigma \tau \rho \omega \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\kappa \alpha \tau \alpha \sigma \tau \rho \omega v v v \mu$, old compound verb, to stretch or spread down as of a couch, to lay low (Euripides), as if by a hurricane. Powerful picture of the desolation wrought by the years of disobedience and wanderings in the desert by this verb quoted from Nu 14:16.

1Cor 10:6
Were our examples ( $\tau \cup \pi о ~ \eta \mu \omega v \varepsilon \gamma \varepsilon v \eta \theta \eta \sigma \alpha v$ ). More exactly, examples for us (objective genitive $\eta \mu \omega \nu$, not subjective genitive, of us). The word $\tau \cup \pi$ (our types) comes from $\tau \cup \pi \tau \omega$, to strike, and meant originally the mark of a blow as the print of the nails (Joh 20:25), then a figure formed by a blow like images of the gods (Ac 7:43), then an example to be imitated ( $1 \mathrm{Pe} 5: 3 ; 1 \mathrm{Ti} 4: 12 ; 1 \mathrm{Th} 1: 7 ; 2 \mathrm{Th} 3: 9$ ), or to be avoided as here, and finally a type in a doctrinal sense (Ro 5:14; Heb 9:24).

To the intent we should not lust after ( $\varepsilon ı \varsigma ~ \tau о ~ \mu \eta ~ \varepsilon ו v a ~ \eta \mu a \varsigma ~ \varepsilon \pi \imath \theta v \mu \eta \tau \alpha \varsigma) . ~ P u r p o s e ~ e x-~$ pressed by $\varepsilon \iota \varsigma$ with the articular infinitive to $\varepsilon \iota v a$ and the accusative of general reference with $\varepsilon \pi \iota \theta \cup \mu \eta \tau \alpha \varsigma$ (lusters) in the predicate.

1Cor 10:7
Neither be ye idolaters ( $\mu \eta \delta \varepsilon \varepsilon ı \delta \omega \lambda 0 \lambda \alpha \tau \rho \alpha ~ \gamma ı v \varepsilon \sigma \theta \varepsilon$ ). Literally, stop becoming idolaters, implying that some of them had already begun to be. The word $\varepsilon \varepsilon \delta \omega \lambda o \lambda \alpha \tau \rho \eta \varsigma$ seems to be a Christian formation to describe the Christian view. Eating $\tau \alpha \varepsilon ו \delta \omega \lambda$ д $\theta v \tau \alpha$ might become a stepping-stone to idolatry in some instances.

Drink ( $\pi \varepsilon \iota v$ ). Short form for $\pi \iota \varepsilon \iota v$, sometimes even $\pi \imath v$ occurs (Robertson, Grammar, p. 204).

To play ( $\pi \alpha \iota \zeta \varepsilon ı v)$. This old verb to play like a child occurs nowhere else in the N.T., but is common in the LXX and it is quoted here from Ex 32:6 . In idolatrous festivals like that witnessed by Moses when he saw the people singing and dancing around the golden calf (Ex 32:18f. ).

1Cor 10:8
Neither let us commit fornication ( $\mu \eta \delta \varepsilon \pi \frac{\rho v \varepsilon v \omega \mu}{}$ practicing fornication as some were already doing ( 1 Co 6:11; 7:2). The connection between idolatry and fornication was very close (see Jowett, Epistles of Paul, II, p. 70) and see about Baal-Peor ( Nu 25:1-9). It was terribly true of Corinth where prostitution was part of the worship of Aphrodite.

In one day ( $\mu \boldsymbol{\mu} \eta \mu \varepsilon \rho \alpha$ ). An item that adds to horror of the plague in $\mathrm{Nu} 25: 9$ where the total number is 24,000 instead of 23,000 as here for one day.

1Cor 10:9
Neither let us tempt the Lord ( $\mu \eta \delta \varepsilon \varepsilon \kappa \pi \varepsilon ı \rho \alpha \zeta \omega \mu \varepsilon v \tau 0 v$ Kvpıov). So the best MSS. instead of Christ. This compound occurs in LXX and in N.T. always about Christ (here and Mt 4:7; Lu 4:12; 10:25 ). Let us cease sorely ( $\varepsilon \kappa-$ ) tempting the Lord by such conduct.

And perished by the serpents ( $\kappa \alpha \cup \pi о \tau \omega \nu ~ о \varphi \varepsilon \omega v \alpha \pi \omega \lambda \lambda \nu \nu \tau о$ ). Vivid imperfect middle (cf. aorist middle $\alpha \pi \omega \lambda$ ovto in verse 10 ), were perishing day by day. The story is told in Nu 21:6. The use of $v \pi$ o for agent with the intransitive middle of $\alpha \pi \sigma \lambda \lambda \nu \mu$ is regular. Note the Ionic uncontracted genitive plural $\frac{\varphi}{} \varepsilon \omega \nu$ rather than $\omega \varphi \omega v$.

1Cor 10:10
Neither murmur ye ( $\mu \eta \delta \varepsilon \gamma о \gamma \gamma \cup(\varepsilon \tau \varepsilon)$. Implying that some of them were murmuring. For this late picturesque onomatopoetic verb see on Mt 20:11. The reference seems to be to Nu 16:41f. after the punishment of Korah.

By the destroyer (vто тоv o入oӨ $\rho \varepsilon \cup \tau o v$ ). This word, from o $\lambda o \theta \rho \varepsilon v \omega$ (late verb from o $\lambda \varepsilon \theta \rho o \varsigma$, destruction) occurs only here, so far as known. The reference is to the destroying angel of Ex 12:23 (o o久oӨ $\rho \varepsilon \cup \omega v$ ).

1Cor 10:11
Now these things happened unto them ( $\tau \alpha \cup \tau \alpha \delta \varepsilon \sigma \cup v \varepsilon \beta \alpha \iota v o v \varepsilon \kappa \varepsilon เ v o ı \varsigma) . ~ I m p e r f e c t ~$ tense because they happened from time to time.

By way of example ( $\tau \cup \pi \iota \kappa \omega \varsigma)$. Adverb in sense of $\tau \cup \pi o$ in verse 6 . Only instance of the adverb except in ecclesiastical writers after this time, but adjective $\tau 0 \pi \_\kappa \circ \varsigma$ occurs in a late papyrus.

For our admonition ( $\pi \rho \circ \varsigma \vee o v \theta \varepsilon \sigma \iota \alpha \vee \eta \mu \omega v$ ). Objective genitive $(\eta \mu \omega v$ ) again. Nov $\theta \varepsilon \sigma \iota \alpha$ is late word from vouӨcte (see on Ac 20:31; 1Th 5:12,14 ) for earlier vouӨztๆбıs and vou $\theta \varepsilon \tau \iota \alpha$.

The ends of the ages have come ( $\tau \alpha \tau \varepsilon \lambda \eta \tau \omega v \alpha \iota \omega v \omega \nu \kappa \alpha \tau \eta \nu \tau \eta \kappa \varepsilon v$ ). Cf. Heb 9:26 $\eta$ $\sigma \nu v \tau \varepsilon \lambda \varepsilon ı \alpha \tau \omega v \alpha \iota \omega v \omega v$, the consummation of the ages (also Mt 13:40). The plural seems to point out how one stage succeeds another in the drama of human history. Katqv $\tau \eta \kappa \varepsilon v$ is perfect active indicative of кат $\alpha \nu \tau \alpha \omega$, late verb, to come down to (see on Ac 16:1). Does Paul refer to the second coming of Christ as in 7:26? In a sense the ends of the ages like a curtain have come down to all of us.

1Cor 10:12
Lest he fall $(\mu \eta \pi \varepsilon \sigma \eta)$. Negative purpose with $\mu \eta$ and second aorist active subjunctive of $\pi \kappa \tau \tau \omega$.

1Cor 10:13
Hath taken ( $\varepsilon 1 \lambda \eta \varphi \varepsilon v$ ). Perfect active indicative of $\lambda \alpha \mu \beta \alpha v \omega$.

But such as man can bear ( $\varepsilon \mu \eta \alpha v \theta \rho \omega \pi t v o \varsigma)$. Except a human one. Old adjective meaning falling to the lot of man.

Above that ye are able ( $\cup \pi \varepsilon \rho$ o $\delta v v a \sigma \theta \varepsilon$ ). Ellipsis, but plain. There is comfort in that God is faithful, trustworthy ( $\pi \iota \sigma \tau \circ \varsigma)$.

The way of escape ( $\tau \eta v \varepsilon \kappa \beta \alpha \sigma \iota v$ ). "The way out" is always there right along with ( $\sigma v v$ ) the temptation. This old word only here in N.T. and Heb 13:7 about death. It is cowardly to yield to temptation and distrustful of God.

1Cor 10:14
Wherefore ( $\delta ⿺ 𠃊 \pi \varepsilon \rho$ ). Powerfully Paul applies the example of the Israelites to the perilous state of the Corinthians about idolatry. See on verse 7 for word $\varepsilon เ \delta \omega \lambda \mathrm{o} \lambda \alpha \tau \rho \varepsilon \iota \alpha$.

1Cor 10:15
As to wise men ( $\omega \varsigma \varphi \rho \circ$ vipotc). No sarcasm as in 2Co 11:19, but plea that they make proper use of the mind ( $\varphi \rho \varepsilon v$ ) given them.

1Cor 10:16
 blessing as by Christ at the institution of the ordinance.

A communion of the blood of Christ ( $\kappa \circ \imath v \omega v i \alpha ~ \tau o v ~ a ı \mu \alpha \tau о \varsigma ~ \tau o v ~ X \rho ı \sigma \tau о v) . ~ L i t e r a l l y, ~$ a participation in (objective genitive) the blood of Christ. The word кotv $\omega v$ va is an old one from кov $\omega \omega$ voc, partner, and so here and Php 2:1; 3:10 . It can mean also fellowship (Ga 2:9 ) or contribution (2Co 8:4; Php 1:5). It is, of course, a spiritual participation in the blood of Christ which is symbolized by the cup. Same meaning for $\kappa o t v \omega v i \alpha$ in reference to "the body of Christ."

The bread which we break ( $\tau$ ov $\alpha \rho \tau о v o v \kappa \lambda \omega \mu \varepsilon v$ ). The loaf. Inverse attraction of the antecedent (aptov) to the case (accusative) of the relative (ov) according to classic idiom (Robertson, Grammar, p. 488). Apтos probably from $\alpha \rho \omega$, to join or fit (flour mixed with water and baked). The mention of the cup here before the bread does not mean that this order was observed for see the regular order of bread and then cup in 11:24-27.

1Cor 10:17
One bread ( $\varepsilon ı \varsigma ~ \alpha \rho \tau о \varsigma) . ~ O n e ~ l o a f . ~$
Who are many (o $\pi \mathbf{\pi} \lambda \lambda \mathrm{o}$ ). The many.
We all (o $\pi \alpha v \tau \varepsilon \varsigma)$. We the all, the whole number, o $\pi \alpha v \tau \varepsilon \varsigma$ being in apposition with the subject
we ( $\eta \mu \varepsilon ı \zeta$ unexpressed).
Partake ( $\mu \varepsilon \tau \varepsilon \chi \circ \mu \varepsilon v$ ). Have a part with or in, share in. See on 9:12; Heb 2:14; 5:13 (partaking of milk).

Of the one bread ( $\tau$ оv $\varepsilon v o \varsigma ~ a \rho \tau о v) . ~ O f ~ t h e ~ o n e ~ l o a f, ~ t h e ~ a r t i c l e ~ t o v ~ r e f e r r i n g ~ t o ~ o n e ~ l o a f ~$ already mentioned.

One body $(\varepsilon v \sigma \omega \mu \alpha)$. Here the mystical spiritual body of Christ as in 12:12f. , the spiritual kingdom or church of which Christ is head (Col 1:18; Eph 5:23 ).

1Cor 10:18
After the flesh ( $\kappa \alpha \tau \alpha \sigma \alpha \rho \kappa \alpha)$. The literal Israel, the Jewish people, not the spiritual Israel (Iб $\rho a \eta \lambda \kappa \alpha \tau \alpha \pi v \varepsilon v \mu \alpha$ ) composed of both Jews and Gentiles, the true children of faith (Ro 2:28; 9:8; Gal 3:7 ).

Communion with the altar ( $\kappa \circ \iota \omega v o ~ \tau o v ~ \theta v \sigma \iota \alpha \sigma \tau \eta \rho ı v)$. Same idea in $\kappa o \iota \nu \omega v o$ participators in, partners in, sharers in (with objective genitive). The word $\theta v \sigma \iota a \sigma \tau \eta \rho \iota o v$ is from late verb $\theta v \sigma \iota \zeta \omega$, to offer sacrifice, and that from $\theta v \sigma \iota \alpha$, sacrifice, and that from $\theta v \omega$, common verb to slay, to sacrifice (verse 20). The Israelites who offer sacrifices have a spiritual participation in the altar.

1Cor 10:19
A thing sacrificed to idols ( $\varepsilon \iota \delta \omega \lambda o \theta v \tau o v)$. See on Ac 15:29; 1 Co 8:1,4 .
Idol ( $\varepsilon เ \delta \omega \lambda o v$ ). Image of a god. See on Ac 7:41; 15:20; 1 Co 8:4,7.
1Cor 10:20
But I say that ( $\alpha \lambda \lambda^{\prime}$ o $\tau$ ). The verb $\varphi \eta \mu$ (I say) must be repeated from verse 19 before от.

To demons, and not to God ( $\delta \alpha \iota \mu$ оvıoıs ка оv $\theta \varepsilon \omega$ ). Referring to LXX text of De 32:17 . It is probable that by ov $\theta \varepsilon \omega$ Paul means "to a no-god" as also in De 32:21 $\varepsilon \pi^{\prime}$ ovk $\varepsilon \theta v \varepsilon$ (by a no-people). This is Paul's reply to the heathen who claimed that they worshipped the gods represented by the images and not the mere wood or stone or metal idols. The word $\delta \alpha \mu \rho v i a$ is an adjective $\delta \alpha \not \mu \mathrm{ov}$ ıs from $\delta \alpha \iota \mu \omega v$, an inferior deity, and with same idea originally, once in this sense in N.T. (Ac 17:18 ). Elsewhere in N.T. it has the notion of evil spirits as here, those spiritual forces of wickedness (Eph 6:12) that are under the control of Satan. The word $\delta a \iota \mu o v i a$, so common in the Gospels, occurs in Paul's writings only here and $1 \mathrm{Ti} 4: 1$ . Demonology is a deep and dark subject here pictured by Paul as the explanation of heathenism which is a departure from God (Ro 1:19-23) and a substitute for the worship of God. It is a terrible indictment which is justified by the licentious worship associated with paganism then and now.

1Cor 10:21
Ye cannot (ov $\delta u v a \sigma \theta \varepsilon$ ). Morally impossible to drink the Lord's cup and the cup of demons, to partake of the Lord's table and the table of demons.

Of the table of the Lord ( $\tau \rho \alpha \pi \varepsilon \zeta \eta \varsigma$ Kv $\quad$ ıov). No articles, but definite idea. T $\rho \alpha \pi \varepsilon \zeta \alpha$ is from $\tau \varepsilon \tau \rho \alpha$ (four) and $\pi \varepsilon \zeta \alpha$ (a foot), four-footed. Here
table means, as often, what is on the table. See Lu 22:30 where Jesus says "at my table" ( $\varepsilon \pi \tau \eta \varsigma \tau \rho \alpha \pi \varepsilon \zeta \eta \varsigma \mu \circ v$ ), referring to the spiritual feast hereafter. Here the reference is plainly to the Lord's Supper (Kvpıaкov $\delta \varepsilon \iota \pi v o v, 1$ Co 11:20). See allusions in O.T. to use of the table
in heathen idol feasts (Isa 65:11; Jer 7:18; Eze 16:18f.; 23:41 ). The altar of burnt-offering is called the table of the Lord in Mal 1:7 (Vincent).

1Cor 10:22
Provoke to jealousy ( $\pi \alpha \rho \alpha \zeta \eta \lambda o v \mu \varepsilon v)$. The very word used in De 32:21 of the insolence of the old Israelites. Quoted in Ro 10:19. Such double-dealing now will do this very thing.

Stronger than he (ı $\sigma \cup \rho о \tau \varepsilon \rho \circ \alpha \cup \tau \circ v)$. Comparative adjective followed by the ablative.
1Cor 10:23
See on 6:12 for
lawful ( $\varepsilon \xi \varepsilon \sigma \tau \iota v)$ and
expedient ( $\sigma \cup \mu \varphi \varepsilon \rho \varepsilon$ ).
Edify not (ouк оוкобо $\mu \varepsilon$ ). Build up. Explanation of
expedient ( $\sigma \cup \mu \varphi \varepsilon \rho \varepsilon)$.
1Cor 10:24
Let no man seek his own ( $\mu \eta \delta \varepsilon ı \varsigma ~ \tau o ~ \varepsilon \alpha v \tau o v \zeta \eta \tau \varepsilon ı \tau \omega$ ). This is Paul's rule for social relations (1Co 13:5; Ga 6:2; Ro 14:7; 15:2; Php 2:1ff. ) and is the way to do what is expedient and what builds up.

His neighbour's good ( $\tau 0$ tov $\varepsilon \tau \varepsilon \rho \circ$ ). Literally, "the affair of the other man." Cf. $\tau 0 v$ $\varepsilon \tau \varepsilon \rho \circ v$ in Ro 13:8 for this idea of $\varepsilon \tau \varepsilon \rho \circ \varsigma$ like o $\pi \lambda \eta \sigma \circ v$ (the nigh man, the neighbour) in Ro 15:2. This is loving your neighbour as yourself by preferring your neighbour's welfare to your own (Php 2:4).

1Cor 10:25
In the shambles $(\varepsilon \nu \mu \alpha \kappa \varepsilon \lambda \lambda \omega)$. Only here in N.T. A transliterated Latin word macellum, possibly akin to $\mu \alpha \chi \varepsilon \rho ⿺ \alpha$ and the Hebrew word for enclosure, though occurring in Ionic and Laconian and more frequent in the Latin. It occurs in Dio Cassius and Plutarch and in the papyri and inscriptions for "the provision market." Deissmann (Light from the Ancient East, p. 276) says: "In the Macellum at Pompeii we can imagine to ourselves the poor Christians buying their modest pound of meat in the Corinthian Macellum (1Co 10:25), with the same life-like reality with which the Diocletian maximum tariff called up the picture of the Galilean woman purchasing her five sparrows."

Asking no questions for conscience sake ( $\mu \eta \delta \varepsilon \nu \alpha v \alpha \kappa \rho \imath \nu о \nu \tau \varepsilon \varsigma \delta \iota \alpha \tau \eta \nu \sigma v \nu \varepsilon \iota \delta \eta \sigma \iota)$. As to whether a particular piece of meat had been offered to idols before put in the market. Only a part was consumed in the sacrifices to heathen gods. The rest was sold in the market. Do not be over-scrupulous. Paul here champions liberty in the matter as he had done in 8:4.

1Cor 10:26
This verse gives the reason for Paul's advice. It is a quotation from Ps 24:1 and was a common form of grace before meals.

Fulness $(\pi \lambda \eta \rho \omega \mu \alpha)$. Old word from $\pi \lambda \eta \rho o \omega$, to fill, here that with which a thing is filled, whatever fills the earth.

1Cor 10:27
Biddeth you (калє v $\mu \propto \varsigma$ ). To a general banquet, but not to a temple feast ( $8: 10$ ) which is prohibited. If a pagan invites Christians to their homes to a banquet, one is to act like a gentleman.

1Cor 10:28
But if any man say unto you ( $\varepsilon \alpha v \delta \varepsilon \tau \iota \varsigma \nu \mu \nu v \varepsilon \iota \pi \eta$ ). Condition of third class. Suppose at such a banquet a "weak" brother makes the point to you: "This hath been offered in sacrifice" (тоито เعро日vтоv عбтıv). Hıяpo日vтov, late word in Plutarch, rare in inscriptions and papyri, only here in N.T.

Eat not ( $\mu \eta \varepsilon \sigma \theta 1 \varepsilon \tau \varepsilon$ ). Present imperative with $\mu \eta$ prohibiting the habit of eating then. Pertinent illustration to the point of doing what is expedient and edifying.

That shewed it ( $\tau 0 v \mu \eta v v \sigma \alpha \nu \tau \alpha$ ). First aorist active articular participle (accusative case because of $\delta(\alpha)$ from $\mu \eta v v \omega$, old verb, to point out, to disclose. See Lu 20:37.

1Cor 10:29
For why is my liberty judged by another conscience? ( $\imath \alpha \alpha \tau \gamma \rho \eta \varepsilon \lambda \varepsilon v \theta \varepsilon \rho\llcorner\alpha \mu o v$ $\kappa \rho ı v \varepsilon \tau \alpha$ v $\pi \mathrm{\alpha} \alpha \lambda \lambda \eta \varsigma \sigma \cup v \varepsilon \varepsilon \delta \eta \sigma \varepsilon \omega \sigma ;$ ). Supply $\gamma \varepsilon v \eta \tau \alpha$ (deliberative subjunctive) after $\tau$. Paul deftly puts himself in the place of the strong brother at such a banquet who is expected to conform his conscience to that of the weak brother who makes the point about a particular piece of meat. It is an abridgment of one's personal liberty in the interest of the weak brother. Two individualities clash. The only reason is love which builds up ( $8: 2$ and all of chapter 1Co 13 ). There is this eternal collision between the forces of progress and reaction. If they work together, they must consider the welfare of each other.

1Cor 10:30
Paul carries on the supposed objective to his principle of love. Why incur the risk of being evil spoken of ( $\beta \lambda \alpha \sigma \varphi \eta \mu \circ \nu \mu \alpha)$ for the sake of maintaining one's liberty? Is it worth it? See Ro 14:6 where Paul justifies the conscience of one who eats the meat and of one who does not. Saying grace over food that one should not eat seems inconsistent. We have this very word blaspheme in English.

1Cor 10:31
To the glory of God ( $\varepsilon ા \varsigma \delta o \xi \alpha v \theta \varepsilon o v$ ). This is the ruling motive in the Christian's life, not just having his own way about whims and preferences.

1Cor 10:32
Give no occasion of stumbling ( $\alpha \pi \rho о \sigma к о \pi о)$. Late word and in papyri, only three times in N.T. (here; Php 1:10; Ac 24:16 ). See on Acts 24:16 . Here in active sense, not tripping others by being a stumbling-block, as in Sirach 32:21, but passive in Ac 24:16 .

1Cor 10:33

Mine own profit ( $\tau \boldsymbol{\varepsilon} \mu \circ \tau \tau \sigma v \sigma \nu \mu \varphi \varepsilon \rho \circ v$ ). Old word from $\sigma \cup \mu \varphi \varepsilon \rho \omega$, to bear together, and explains use of verb in verse 23.

That they may be saved ( $\imath v \alpha \sigma \omega \theta \omega \sigma v v$ ). First aorist passive subjunctive of $\sigma \omega \zeta \omega$, to save, with tva purpose clause with same high motive as in 9:22. This is the ruling passion of Paul in his dealings with men.

## 1 Corinthians 11

1Cor 11:1
Imitators of me ( $\mu \mu \eta \tau \alpha \mu \circ v$ ). In the principle of considerate love as so clearly shown in chapters 1Co 8-10 and in so far as ( $\kappa \alpha \theta \omega \varsigma$ ) Paul is himself an imitator of Christ. The preacher is a leader and is bound to set an example or pattern (титос) for others (Tit 2:7). This verse clearly belongs to the preceding chapter and not to chapter 11.

1Cor 11:2
Hold fast the traditions ( $\tau \alpha \varsigma \pi \alpha \rho \alpha \delta о \sigma \varepsilon \varsigma \varsigma \kappa \tau \varepsilon \chi \varepsilon \tau \varepsilon$ ). Hold down as in 15:2. Параסобъৎ (tradition) from $\pi \alpha \rho \alpha \delta \delta \delta \omega \mu$ ( $\pi \alpha \rho \varepsilon \delta \omega \kappa \alpha$, first aorist active indicative) is an old word and merely something handed on from one to another. The thing handed on may be bad as in Mt 15:2f. (which see) and contrary to the will of God (Mr 7:8f. ) or it may be wholly good as here. There is a constant conflict between the new and the old in science, medicine, law, theology. The obscurantist rejects all the new and holds to the old both true and untrue. New truth must rest upon old truth and is in harmony with it.

1Cor 11:3
But I would have you know ( $\theta \varepsilon \lambda \omega \delta \varepsilon v \mu a \varsigma \varepsilon \ell \delta \varepsilon v \alpha$ ). But I wish you to know, censure in contrast to the praise in verse 2.

The head of Christ is God ( $\kappa \varepsilon \varphi \alpha \lambda \eta$ tov Xpıбтоv o $\theta \varepsilon o \varsigma$ ). Rather, God is the head of Christ, since $\kappa \varepsilon \varphi a \lambda \eta$ is anarthrous and predicate.

1Cor 11:4
Having his head covered ( $\kappa \alpha \tau \alpha \kappa \varepsilon \varphi \alpha \lambda \eta \varsigma \varepsilon \chi \omega v$ ). Literally, having a veil ( $\kappa \alpha \lambda \nu \mu \mu \alpha$ understood) down from the head ( $\kappa \varepsilon \varphi \alpha \lambda \eta \varsigma$ ablative after ката as with ката in Mr 5:13; Ac 27:14 ). It is not certain whether the Jews at this time used the tallith, "a four-corned shawl having fringes consisting of eight threads, each knotted five times" (Vincent) as they did later. Virgil (Aeneid iii., 545) says: "And our heads are shrouded before the altar with a Phrygian vestment." The Greeks (both men and women) remained bareheaded in public prayer and this usage Paul commends for the men.

1Cor 11:5
With her head unveiled ( $\alpha \kappa \alpha \tau \alpha \kappa \alpha \lambda \nu \pi \tau \omega \tau \eta \kappa \varepsilon \varphi \alpha \lambda \eta$ ). Associative instrumental case of manner and the predicative adjective (compound adjective and feminine form same as masculine), "with the head unveiled." Probably some of the women had violated this custom. "Amongst Greeks only the $\varepsilon \tau \alpha 1 \rho \alpha$, so numerous in Corinth, went about unveiled; slavewomen wore the shaven head--also a punishment of the adulteress" (Findlay). Cf. Nu 5:18

One and the same thing as if she were shaven ( $\varepsilon v \kappa \alpha \tau 0 \alpha \cup \tau о \tau \eta \varepsilon \xi \cup \rho \eta \mu \varepsilon v \eta)$. Literally, "One and the same thing with the one shaven" (associative instrumental case again, Robertson, Grammar, p. 530). Perfect passive articular participle of the verb $\xi_{v} \rho \alpha \omega$, later
form for the old $\xi_{v \rho \varepsilon \omega}$. It is public praying and prophesying that the Apostle here has in mind. He does not here condemn the act, but the breach of custom which would bring reproach. A woman convicted of adultery had her hair shorn (Isa 7:20). The Justinian code prescribed shaving the head for an adulteress whom the husband refused to receive after two years. Paul does not tell Corinthian Christian women to put themselves on a level with courtesans.

1Cor 11:6
Let her also be shorn ( $\kappa \alpha \kappa \varepsilon \rho \alpha \sigma \theta \omega$ ). Aorist middle imperative of $\kappa \varepsilon \iota \rho \omega$, to shear (as sheep). Let her cut her hair close. A single act by the woman.

If it is a shame ( $\varepsilon \delta \varepsilon \alpha \circ \sigma \chi \rho \circ v$ ). Condition of first class assumed to be true. Aı $\quad \chi \rho o v$ is old adjective from aıб $\chi \circ \varsigma$, bareness, disgrace. Clearly Paul uses such strong language because of the effect on a woman's reputation in Corinth by such conduct that proclaimed her a lewd woman. Social custom varied in the world then as now, but there was no alternative in Corinth.

To be shorn or shaven ( $\tau 0 \kappa \varepsilon \rho \rho \alpha \sigma \theta a \kappa \alpha \xi_{v \rho a \sigma \theta \alpha) \text {. Articular infinitives subject of copula }}$ $\varepsilon \sigma \tau \iota v$ understood, $\kappa \varepsilon \iota \rho a \sigma \theta \alpha$ first aorist middle, $\xi_{\cup \rho} \rho \sigma \theta \alpha$ present middle. Note change in tense.

Let her be veiled ( $\kappa \alpha \tau \alpha \kappa \alpha \lambda \nu \pi \tau \varepsilon \sigma \theta \omega$ ). Present middle imperative of old compound $\kappa \alpha \tau \alpha-\kappa \alpha \lambda \nu \pi \tau \omega$, here alone in N.T. Let her cover up herself with the veil (down, ката, the Greek says, the veil hanging down from the head).

1Cor 11:7
The image and glory of God ( $\varepsilon \kappa \kappa \omega v \kappa \alpha \delta о \xi \alpha \theta \varepsilon o v$ ). Anarthrous substantives, but definite. Reference to Ge 1:28; $2: 26$ whereby man is made directly in the image ( $\varepsilon ו \kappa \omega v$ ) of God. It is the moral likeness of God, not any bodily resemblance. Ellicott notes that man is the glory ( $\delta 0 \xi \alpha$ ) of God as the crown of creation and as endowed with sovereignty like God himself.

The glory of the man ( $\delta o \xi \alpha \alpha v \delta \rho o \varsigma)$. Anarthrous also, man's glory. In Ge 2:26 the LXX has $\alpha v \theta \rho \omega \pi \sigma \varsigma$ (Greek word for both male and female), not $\alpha \nu \eta \rho$ (male) as here. But the woman ( $\gamma \cup v \eta$ ) was formed from the man ( $\alpha \nu \eta \rho$ ) and this priority of the male (verse 8) gives a certain superiority to the male. On the other hand, it is equally logical to argue that woman is the crown and climax of all creation, being the last.

1Cor 11:9
For the woman ( $\delta \iota \alpha \tau \eta v \gamma \cup v a i \kappa \alpha$ ). Because of ( $\delta \iota \alpha$ with accusative case) the woman. The record in Genesis gives the man ( $\alpha \nu \eta \rho$ ) as the origin ( $\varepsilon \kappa$ ) of the woman and the reason for $(\delta \iota \alpha)$ the creation ( $\varepsilon \kappa \tau \iota \sigma \theta \eta$, first aorist passive of $\kappa \tau \iota \zeta \omega$, old verb to found, to create, to form) of woman.

1Cor 11:10

Ought ( $о \varphi \varepsilon \wedge \varepsilon$ ). Moral obligation therefore ( $\delta \iota \alpha$ тov $\tau 0$, rests on woman in the matter of dress that does not (ouk o甲 $\boldsymbol{\varepsilon} \boldsymbol{\lambda} \varepsilon$ in verse 7) rest on the man.

To have a sign of authority ( $\varepsilon \xi o v \sigma \iota a v \varepsilon \chi \varepsilon เ v$ ). He means $\sigma \eta \mu \varepsilon \iota v \vee \varepsilon \xi o v \sigma \iota a \varsigma ~(s y m b o l ~ o f ~$ authority) by $\varepsilon \xi$ ovoıav, but it is the sign of authority of the man over the woman. The veil on the woman's head is the symbol of the authority that the man with the uncovered head has over her. It is, as we see it, more a sign of subjection ( $\psi \pi о \tau \alpha \gamma \eta \varsigma, 1 \mathrm{Ti} 2: 10$ ) than of au-

Because of the angels ( $\delta \iota \alpha$ tov¢ $\alpha \gamma \gamma^{\varepsilon} \lambda o u \varsigma$ ). This startling phrase has caused all kinds of conjecture which may be dismissed. It is not preachers that Paul has in mind, nor evil angels who could be tempted (Ge 6:1f. ), but angels present in worship (cf. 1Co 4:9; Ps 138:1 ) who would be shocked at the conduct of the women since the angels themselves veil their faces before Jehovah (Isa 6:2 ).

1Cor 11:11
Howbeit ( $\pi \lambda \eta \nu$ ). This adversative clause limits the preceding statement. Each sex is incomplete without ( $\chi \omega \rho \iota \varsigma$, apart from, with the ablative case) the other.

In the Lord ( $\varepsilon \nu K v \rho(\omega)$. In the sphere of the Lord, where Paul finds the solution of all problems.

1Cor 11:12
Of ( $\varepsilon \kappa$ )
--by ( $\delta \iota \alpha$ ). Ever since the first creation man has come into existence by means of ( $\delta \iota \alpha$ with genitive) the woman. The glory and dignity of motherhood. Cf. The Fine Art of Motherhood by Ella Broadus Robertson.

1Cor 11:13
Is it seemly? ( $\pi \rho \varepsilon \pi \sigma \nu \varepsilon \sigma \tau \imath v ;$ ). Periphrastic present indicative rather than $\pi \rho \varepsilon \pi \varepsilon$. See on Mt 3:15. Paul appeals to the sense of propriety among the Corinthians.

1Cor 11:14
Nature itself ( $\eta \varphi \cup \sigma \iota \varsigma \alpha \cup \tau \eta$ ). He reenforces the appeal to custom by the appeal to nature in a question that expects the affirmative answer (ov $\delta \varepsilon$ ). $\Phi v \sigma \iota$, from old verb $\varphi v \omega$, to produce, like our word nature (Latin natura), is difficult to define. Here it means native sense of propriety (cf. Ro 2:14) in addition to mere custom, but one that rests on the objective difference in the constitution of things.

1Cor 11:15
Have long hair ( $\kappa о \mu \alpha)$. Present active subjunctive of ко $\mu \alpha \omega$ (from кои , hair), old verb, same contraction $(-\alpha \eta \iota=\alpha)$ as the indicative $(\alpha \varepsilon=\alpha)$, but subjunctive here with $\varepsilon \alpha v$ in third class condition. Long hair is a glory to a woman and a disgrace to a man (as we still feel). The long-haired man! There is a papyrus example of a priest accused of letting his hair grow long and of wearing woollen garments.

For a covering ( $\alpha \nu \tau \pi \varepsilon \rho ı \beta$ o $\alpha \iota \circ v$ ). Old word from $\pi \varepsilon \rho ı \beta \alpha \lambda \lambda \omega$ to fling around, as a mantle (Heb 1:12) or a covering or veil as here. It is not in the place of a veil, but answering to ( $\alpha v \tau$, in the sense of $\alpha v \tau$ in Joh 1:16), as a permanent endowment ( $\delta \varepsilon \delta o \tau \alpha$, perfect passive indicative).

1Cor 11:16
 N.T. If he only existed in this instance, the disputatious brother.

Custom ( $\sigma \cup v \eta \theta \varepsilon \iota \alpha v$ ). Old word from $\sigma \cup v \eta \theta \eta \varsigma(\sigma \nu v, \eta \theta o \varsigma)$, like Latin consuetudo, intercourse, intimacy. In N.T. only here and 8:7 which see. "In the sculptures of the catacombs the women have a close-fitting head-dress, while the men have the hair short" (Vincent).

1Cor 11:17
This ( $\tau 0 \cup \tau 0)$. Probably the preceding one about the head-dress of women, and transition to what follows.

I praise you not (ovk $\varepsilon \pi \alpha \iota v \omega$ ). In contrast to the praise in 11:2.
For the better ( (ءા̧ to к $\rho \varepsilon เ \sigma \sigma \circ v$ ). Neuter articular comparative of кратьৎ, but used as comparative of $\kappa \alpha \lambda$ o $\varsigma$, good. Attic form к $\rho \varepsilon \iota \tau \tau \%$.

For the worse ( $\varepsilon ı \varsigma ~ \tau о ~ \eta \sigma \sigma o v)$ ). Old comparative from $\eta \kappa \alpha$, softly, used as comparative of какоৎ, bad. In N.T. only here and 2Co 12:15.

1Cor 11:18
First of all ( $\pi \rho \omega \tau \sigma \nu \mu \varepsilon \nu$ ). There is no antithesis ( $\delta \varepsilon v \tau \varepsilon \rho o \nu \delta \varepsilon$, secondly, or $\varepsilon \pi \varepsilon \iota \tau \alpha \delta \varepsilon$, in the next place) expressed. This is the primary reason for Paul's condemnation and the only one given.

When ye come together in the church ( $\sigma v v \varepsilon \rho \chi \circ \mu \varepsilon v \omega v \eta \mu \omega v \varepsilon v \varepsilon \kappa \kappa \lambda \eta \sigma \omega \alpha$ ). Genitive absolute. Here $\varepsilon \kappa \kappa \lambda \eta \sigma \omega \alpha$ has the literal meaning of assembly.

Divisions ( $\sigma \chi \iota \sigma \mu \alpha \tau \alpha$ ). Accusative of general reference with the infinitive v $\pi \alpha \rho \chi \varepsilon ı v$ in indirect discourse. Old word for cleft, rent, from $\sigma \chi \downarrow \omega$. Example in papyri for splinter of wood. See on $1: 10$. Not yet formal cleavages into two or more organizations, but partisan divisions that showed in the love-feasts and at the Lord's Supper.

Partly ( $\mu \varepsilon \rho \circ \varsigma \tau$ ). Accusative of extent (to some part) like $\pi \alpha v \tau \alpha$ in 10:33. He could have said $\varepsilon \kappa \mu \varepsilon \rho о \nu \varsigma$ as in 13:9. The rumours of strife were so constant (I keep on hearing, $\alpha \kappa о \nu \omega)$.

1Cor 11:19
Must be ( $\delta \varepsilon \varepsilon ı v \alpha$ ). Since moral conditions are so bad among you (cf. chapters 1 to 6 ). Cf. Mt 18:7.

Heresies (aıpعбєı). The schisms naturally become
factions or
parties. Cf. strifes ( $\varepsilon \rho \iota \delta \varepsilon \varsigma)$ in 1:11. See on Ac 15:5 for alpعбєıৎ, a choosing, taking sides, holding views of one party, heresy (our word). "Heresy is theoretical schism, schism practical heresy." Cf. Tit 3:10; 2Pe 2:1 . In Paul only here and Ga 5:20 .

That ( $\mathrm{iv} \mathrm{\alpha}$ ). God's purpose in these factions makes
the proved ones (о бокцо) become
manifest ( $\varphi$ аvعро). "These aıрعбєıц are a magnet attracting unsound and unsettled minds" (Findlay). It has always been so. Instance so-called Christian Science, Russellism, New Thought, etc., today.

1Cor 11:20
 belonging to or pertaining to the Lord, is not just a biblical or ecclesiastical word, for it is found in the inscriptions and papyri in the sense of imperial (Deissmann, Light from the Ancient East, p. 358), as imperial finance, imperial treasury. It is possible that here the term applies both to the A $\gamma a \pi \pi$ or Love-feast (a sort of church supper or club supper held in connection with, before or after, the Lord's Supper) and the Eucharist or Lord's Supper. $\Delta \varepsilon i \pi v o v$, so common in the Gospels, only here in Paul. The selfish conduct of the Corinthians made it impossible to eat a Lord's Supper at all.

1Cor 11:21
Taketh before ( $\pi \rho o \lambda \alpha \mu \beta \alpha v \varepsilon$ ). Before others. Old verb to take before others. It was conduct like this that led to the complete separation between the Love-feast and the Lord's Supper. It was not even a common meal together (kotvov $\delta \varepsilon ו \pi v o v$ ), not to say a Lord's $\delta \varepsilon ı \pi v o v$. It was a mere
grab-game.
This one is hungry (oc $\delta \varepsilon \pi \varepsilon เ v \alpha$ ). Demonstrative oc. Nothing is left for him at the lovefeast.

Another is drunken ( $o \varsigma \delta \varepsilon \mu \varepsilon \theta v \varepsilon$ ). Such disgusting conduct was considered shameful in heathen club suppers. "Hungry poor meeting intoxicated rich, at what was supposed to be a supper of the Lord" (Robertson and Plummer). On $\mu \varepsilon \theta v \omega$, to be drunk, see on Mt 24:49; Ac 2:15.

1Cor 11:22
 in the single question is like the idiom in 9:4f. which see. M $\eta$ expects a negative answer while ouk negatives the verb exete. "For do you fail to have houses?" Paul is not approving gluttony and drunkenness but only expressing horror at their sacrilege (despising, катарроvєıtє) of the church of God.

That have not ( $\tau 0 \cup \varsigma \mu \eta$ عхоvтaৎ). Not those without houses, but those who have nothing, "the have-nots" (Findlay) like 2Co 8:12, in contrast with o exovtec "the haves" (the men of property).

What shall I say to you? ( $\tau \varepsilon \tau \pi \omega \quad v \mu ı v$;) Deliberative subjunctive that well expresses Paul's bewilderment.

1Cor 11:23

For I received of the Lord ( $\varepsilon \gamma о \gamma \alpha \rho \pi \alpha \rho \varepsilon \lambda \alpha \beta o v \alpha \pi о$ тov Kvpıv). Direct claim to revelation from the Lord Jesus on the origin of the Lord's Supper. Luke's account (Lu 22:17-20 ) is almost identical with this one. He could easily have read I Corinthians before he wrote his Gospel. See 15:3 for use of both $\pi \alpha \rho \varepsilon \lambda \alpha \beta o v$ and $\pi \alpha \rho \varepsilon \delta \omega \kappa \alpha$. Note $\pi \alpha \rho \alpha$ in both verbs. Paul received the account from ( $\pi \alpha \rho \alpha--\alpha \pi o$ ) the Lord and passed it on from himself to them,

He was betrayed ( $\pi \alpha \rho \varepsilon \delta \iota \delta \varepsilon \tau 0$ ). Imperfect passive indicative (irregular form for $\pi \alpha \rho \varepsilon \delta$ ı $\delta$ oтo, Robertson, Grammar, p. 340). Same verb as $\pi \alpha \rho \varepsilon \delta \omega \kappa \alpha$ (first aorist active indicative just used for "I delivered").

1Cor 11:24
When he had given thanks ( $\varepsilon v \chi \alpha \rho \iota \sigma \tau \eta \sigma \alpha \varsigma)$. First aorist active participle of $\varepsilon v \chi \alpha \rho \iota \sigma \tau \varepsilon \omega$ from which word our word Eucharist comes, common late verb (see on 1:14).

Which is for you ( $\tau 0 v \pi \varepsilon \rho \nu \mu \omega v$ ). K $\lambda \omega \mu \varepsilon v o v$ (broken) of the Textus Receptus (King James Version) is clearly not genuine. Luke (Lu 22:19) has $\delta \iota \delta o \mu \varepsilon v o v$ (given) which is the real idea here. As a matter of fact the body of Jesus was not broken (Joh 19:36 ). The bread was broken, but not the body of Jesus.

In remembrance of me ( $\varepsilon \iota \varsigma \tau \eta \nu \varepsilon \mu \eta \nu \alpha v a \mu \nu \eta \sigma \iota \nu$ ). The objective use of the possessive pronoun $\varepsilon \mu \eta \nu$. Not my remembrance of you, but your remembrance of me. Ava $\mu \nu \eta \sigma \iota \varsigma$, from $\alpha v \alpha \mu \not \mu \nu \eta \sigma \kappa \omega$, to remind or to recall, is an old word, but only here in N.T. save Lu 22:19 which see.

1Cor 11:25
After supper ( $\mu \varepsilon \tau \alpha$ тo $\delta \varepsilon \iota \pi \nu \eta \sigma \alpha$ ). M\& $\alpha \alpha$ and the articular aorist active infinitive, "after the dining" (or the supping) as in Lu 22:20 .

The new covenant ( $\eta \kappa \alpha \iota \nu \eta \delta \iota \alpha \theta \eta \kappa \eta$ ). For $\delta \iota \alpha \theta \eta \kappa \eta$ see on Mt 26:28. For каıvoc see on $\operatorname{Lu} 5: 38 ; 22: 20$. The position of $\varepsilon \sigma \tau \iota v$ before $\varepsilon \nu \tau \omega \alpha \mu \alpha \tau$ (in my blood) makes it a secondary or additional predicate and not to be taken just with $\delta \iota \alpha \theta \eta \kappa \eta$ (covenant or will).

As oft as ye drink it ( $о \sigma \alpha \kappa \iota \varsigma ~ \alpha \nu \pi \iota \nu \eta \tau \varepsilon$ ). Usual construction for general temporal clause of repetition ( $\alpha v$ and the present subjunctive with oбaкıऽ). So in verse 26.

1Cor 11:26
Till he come ( $\alpha \chi \rho$ ov $\varepsilon \lambda \theta \eta$ ). Common idiom (with or without $\alpha v$ ) with the aorist subjunctive for future time (Robertson, Grammar, p. 975). In Lu 22:18 we have $\varepsilon \omega \varsigma$ ov $\varepsilon \lambda \theta \eta$. The Lord's Supper is the great preacher ( $\kappa \alpha \tau \alpha \gamma \gamma \varepsilon \lambda \lambda \varepsilon \tau \varepsilon$ ) of the death of Christ till his second coming (Mt 26:29).

1Cor 11:27
Unworthily ( $\alpha v \alpha \xi \iota \omega \varsigma$ ). Old adverb, only here in N.T., not genuine in verse 29. Paul defines his meaning in verse 29 f . He does not say or imply that we ourselves must be "worthy" ( $\alpha \xi_{ı 0}$ ) to partake of the Lord's Supper. No one would ever partake on those terms. Many pious souls have abstained from observing the ordinance through false exegesis here.

Shall be guilty ( $\varepsilon$ voxoc $\varepsilon \sigma \tau \alpha$ ). Shall be held guilty as in Mt 5:21f. which see. Shall be guilty of a crime committed against the body and blood of the Lord by such sacrilege (cf. Heb 6:6; 10:29).

1Cor 11:28
Let a man prove himself ( $\delta$ окца〔є $\tau \omega \alpha v \theta \rho \omega \pi \sigma \varsigma \varepsilon \alpha v \tau o v$ ). Test himself as he would a piece of metal to see if genuine. Such examination of one's motives would have made impossible the disgraceful scenes in verses 20f. .

1Cor 11:29
If he discern not the body ( $\mu \eta \delta \iota \alpha \kappa \rho \imath \omega \nu \tau$ тo $\sigma \omega \mu \alpha$ ). So-called conditional use of the participle, "not judging the body." Thus he eats and drinks judgment ( $\kappa \rho \mu \alpha)$ on himself. The verb $\delta \iota \alpha-\kappa \rho \iota v \omega$ is an old and common word, our
dis-cri-minate, to distinguish. Eating the bread and drinking the wine as symbols of the Lord's body and blood in death probes one's heart to the very depths.

1Cor 11:30
And not a few sleep ( $\kappa \alpha$ коц $\mu \omega v \tau \alpha$ เкаvо). Sufficient number (ıкаvo) are already asleep in death because of their desecration of the Lord's table. Paul evidently had knowledge of specific instances. A few would be too many.

1Cor 11:31
But if we discerned ourselves ( $\varepsilon \delta \varepsilon \varepsilon \alpha \cup \tau о v \varsigma \delta \iota \varepsilon \kappa \rho \imath v o \mu \varepsilon v$ ). This condition of the second class, determined as unfulfilled, assumes that they had not been judging themselves discriminatingly, else they would not be judged ( $\varepsilon \kappa \rho ı v o \mu \varepsilon \theta \alpha)$. Note distinction in the two verbs.

1Cor 11:32
Ye are chastened of the Lord ( $и \pi о ~ \tau о и ~ K и р ı v ~ \pi \alpha ı \delta \varepsilon v о \mu \varepsilon \theta \alpha) . ~ O n ~ t h i s ~ s e n s e ~ o f ~ \pi \alpha ı \delta \varepsilon v \omega, ~$ from $\pi \alpha 1 \varsigma$, child, to train a child (Ac 7:22), to discipline with words (2Ti 2:25), to chastise with scourges see on Lu 23:16 (Heb 12:7), and so by afflictions as here (Heb 12:6 ). Нипо tov Kupıov can be construed with крıvo $\mu \varepsilon v o$ instead of with $\pi \alpha \iota \delta \varepsilon v o \mu \varepsilon \theta a$.

With the world ( $\sigma \cup \nu \tau \omega \kappa \sigma \sigma \mu \omega$ ). Along with the world. Afflictions are meant to separate us from the doom of the wicked world. Final use of $v \alpha \alpha \mu \eta$ here with $\kappa \alpha \tau \alpha \kappa \rho i \theta \omega \mu \varepsilon v$ (first aorist passive subjunctive).

1Cor 11:33
Wait one for another ( $\alpha \lambda \lambda \eta \lambda$ оu¢ $\varepsilon \kappa \delta \varepsilon \chi \varepsilon \sigma \theta \varepsilon$ ). As in Joh 5:3; Ac 17:16. That is common courtesy. Wait in turn. Vulgate has invicem expectate.

1Cor 11:34
At home ( $\varepsilon v$ oוk $\omega$ ). If so hungry as all that (verse 22).
The rest ( $\tau \alpha$ 入oı $\pi \alpha$ ). He has found much fault with this church, but he has not told all.
I will set in order ( $\delta ı \alpha \tau \alpha \xi \circ \mu \alpha)$. Not even Timothy and Titus can do it all.
Whensoever I come ( $\omega \varsigma \alpha v \varepsilon \lambda \theta \omega$ ). Common idiom for temporal clause of future time (conjunction like $\omega \varsigma$ with $\alpha \nu$ and aorist subjunctive $\varepsilon \lambda \theta \omega$ ).

## 1 Corinthians 12

1Cor 12:1
Now concerning spiritual gifts ( $\pi \varepsilon \rho \delta \varepsilon \tau \omega \nu \pi \nu \varepsilon \nu \mu \alpha \tau \iota \kappa \omega \nu$ ). Clearly one of the items asked about in the letter to Paul (7:1) and introduced precisely as the problem of meats offered to idols ( $8: 1$ ). This question runs to the end of chapter 14. Plainly much trouble had arisen in Corinth in the exercise of these gifts.

1Cor 12:2
Ye were led away ( $\alpha \pi \alpha \gamma \circ \mu \varepsilon v o$ ). The copula $\eta \tau \varepsilon$ is not expressed (common ellipsis) with the participle (periphrastic imperfect passive), but it has to be supplied to make sense. Some scholars would change oтe (when) to $\pi о \tau \varepsilon$ (once) and so remove the difficulty.

Unto those dumb idols ( $\pi \rho \circ \varsigma \tau \alpha \varepsilon เ \delta \omega \lambda \alpha \tau \alpha \alpha \varphi \omega v \alpha$ ). "Unto the idols the dumb." See Ps 95:5-7 for the voicelessness ( $\alpha-\varphi \omega v \alpha$, old adjective, without voice, $\varphi \omega v \eta$ ) of the idols. Pagans were led astray by demons ( 1 Co 10:19f. ).

Howsoever ye might be led ( $\omega \varsigma \alpha \nu \eta \gamma \varepsilon \sigma \theta \varepsilon$ ). Rather, "as often as ye were led." For this use of $\omega \varsigma \alpha v$ for the notion of repetition, regular Koine idiom, see Robertson, Grammar, p. 974. Cf. отоv $\alpha v$ in Mr 6:56 .

1Cor 12:3
 chylus in old Greek) in papyri (also in sense of recognize) and N.T., from root $\gamma v \omega$ in $\gamma \iota \omega \omega \sigma \kappa \omega$, to know.

Speaking in the Spirit of God ( $\varepsilon v \pi v \varepsilon v \mu \alpha \tau \theta \varepsilon o v \lambda \alpha \lambda \omega v)$. Either sphere or instrumentality. No great distinction here between $\lambda \alpha \lambda \varepsilon \omega$ (utter sounds) and $\lambda \varepsilon \gamma \omega$ (to say).

Jesus is anathema ( $\alpha v \alpha \theta \varepsilon \mu \alpha$ I $\eta \sigma o v \varsigma$ ). On distinction between $\alpha v \alpha \theta \varepsilon \mu \alpha$ (curse) and $\alpha v \alpha \theta \eta \mu \alpha$ (offering Lu 21:5) see discussion there. In LXX $\alpha v \alpha \theta \eta \mu \alpha$ means a thing devoted to God without being redeemed, doomed to destruction (Le 27:28f.; Jos 6:17; 7:12 ). See 1Co 16:22; Ga 1:8f.; Ro 9:3 . This blasphemous language against Jesus was mainly by the Jews (Ac 13:45; 18:6). It is even possible that Paul had once tried to make Christians say $\mathrm{A} v \alpha \theta \varepsilon \mu \alpha$ İбous (Ac 26:11).

Jesus is Lord (Kuploc Inoouc). The term Kupıoc, as we have seen, is common in the LXX for God. The Romans used it freely for the emperor in the emperor worship. "Most important of all is the early establishment of a polemical parallelism between the cult of Christ and the cult of Caesar in the application of the term Kupıo, 'lord.' The new texts have here furnished quite astonishing revelations" (Deissmann, Light from the Ancient East, p. 349). Inscriptions, ostraca, papyri apply the term to Roman emperors, particularly to Nero when Paul wrote this very letter (ib., p. 353f.): "One with 'Nero Kurios' quite in the manner of a formula (without article, like the 'Kurios Jesus' in 1Co 12:3 ." "The battle-cries of the spirits of error and of truth contending at Corinth" (Findlay). One is reminded of the
demand made by Polycarp that he say Kvpıos Xaعба $\rho$ and how each time he replied Kv Inoovc. He paid the penalty for his loyalty with his life. Lighthearted men today can say "Lord Jesus" in a flippant or even in an irreverent way, but no Jew or Gentile then said it who did not mean it.

1Cor 12:4
Diversities ( $\delta \iota a \iota \rho \varepsilon \sigma \varepsilon \iota \varsigma)$. Old word for distinctions, differences, distributions, from $\delta ı a \rho \varepsilon \omega$, to distribute, as $\delta \iota a \iota \rho o u v$ (dividing, distributing) in verse 11. Only here in the N.T.

Of gifts ( $\chi \alpha \rho เ \sigma \mu \alpha \tau \omega \nu$ ). Late word and chiefly in Paul (cf. Ro 12:6) in N.T. (except 1Pe 4:19), but some examples in papyri. It means a favour (from $\chi \alpha \rho ı \zeta o \mu \alpha$ ) bestowed or received without any merit as in Ro 1:11.

1Cor 12:5
Of ministrations ( $\delta \iota \alpha \kappa о \nu \omega \nu$ ). This old word is from $\delta \iota \alpha \kappa о \nu \circ$, and has a general meaning of service as here (Ro 11:13) and a special ministration like that of Martha (Lu 10:40) and the collection (1Co 16:15; 2Co 8:4).

1Cor 12:6
Of workings ( $\varepsilon v \varepsilon \rho \gamma \eta \mu \alpha \tau \omega v$ ). Late word, here only in N.T., the effect of a thing wrought (from $\varepsilon \nu \varepsilon \rho \gamma \varepsilon \omega$, to operate, perform, energize). Paul uses also the late kindred word $\varepsilon v \varepsilon \rho \gamma \varepsilon \iota a$ (Col 1:29; 2:12 ) for efficiency.

Who worketh all things in all (o $\varepsilon \nu \varepsilon \rho \gamma \omega \nu \tau \alpha \pi \alpha \nu \tau \alpha \varepsilon \nu \pi \alpha \sigma \iota \nu$ ). Paul is not afraid to say that God is the Energy and the Energizer of the Universe. "I say that the magnet floats in space by the will of God" (Dr. W. R. Whitney, a world figure in science). This is his philosophic and scientific theory of the Cosmos. No one has shown Paul's philosophy and science to be wrong. Here he is speaking only of spiritual gifts and results as a whole, but he applies this principle to the universe ( $\tau \alpha \pi \alpha \nu \tau \alpha$ ) in Col 1:16 (of Christ) and in Ro 11:36 (of God). Note the Trinity in these verses: the same Spirit (verse 4), the same Lord (Jesus) in verse 5, the same God (the Father) in verse 6.

1Cor 12:7
Manifestation ( $\varphi a v \varepsilon \rho \omega \sigma \iota \varsigma)$. Late word, in papyri, in N.T. only here and 2Co 4:2, from $\varphi \propto \nu \varepsilon \rho \circ \omega$, to make manifest ( $\varphi a v \varepsilon \rho \circ \varsigma)$. Each instance of the whole (verse 6) is repeatedly given ( $\delta \iota \delta o \tau \alpha$, present passive indicative of $\delta \iota \delta \omega \mu$ ).

To profit withal ( $\pi \rho \circ \varsigma \tau о \sigma \nu \mu \varphi \varepsilon \rho \circ v$ ). See on 6:12; 10:23,33 for Paul's guiding principle in such matters.

1Cor 12:8
To one $(\omega \mu \varepsilon \nu)$. Demonstrative os with $\mu \varepsilon v$ in dative case, to this one. The distribution or correlation is carried on by $\alpha \lambda \lambda \omega \delta \varepsilon$ (verses $8,9,10$ ), $\varepsilon \tau \varepsilon \rho \omega \delta \varepsilon$ (verses 9,10 ) for variety, nine manifestations of the Spirit's work in verses 8-10.

The Word of wisdom ( $\lambda о ү о \varsigma ~ \sigma о \varphi \iota \propto \varsigma) . ~ O l d ~ w o r d s . ~ \Lambda о ү о \varsigma ~ i s ~ r e a s o n, ~ t h e n ~ s p e e c h . ~ W i s d o m ~$ is intelligence, then practical action in accord with it. Here it is speech full of God's wisdom
( 2:7) under the impulse of the Spirit of God. This gift is placed first (revelation by the Spirit).

The word of knowledge ( $\lambda o \gamma \circ \varsigma \gamma \nu \omega \sigma \varepsilon \omega \varsigma$ ). This gift is insight (illumination) according to (ката) the same Spirit.

1Cor 12:9
Faith ( $\pi \iota \sigma \tau \iota \varsigma)$. Not faith of surrender, saving faith, but wonder-working faith like that in 13:2 (Mt 17:20; 21:21). Note here $\varepsilon v \tau \omega \alpha v \tau \omega \pi \nu \varepsilon \nu \mu a \tau$ (in the same Spirit) in contrast with $\delta \iota \alpha$ and $\kappa \alpha \tau \alpha$ in verse 8 .

Gifts of healings ( $\chi \alpha \rho \iota \sigma \mu \alpha \tau \alpha \iota \alpha \mu \alpha \tau \omega v$ ). I $\alpha \mu \alpha$, old word from $\iota \alpha \circ \mu \alpha$, common in LXX, in N.T. only in this chapter. It means acts of healing as in Ac 4:30 (cf. Jas 5:14) and Lu 7:21 (of Jesus). Note $\varepsilon v$ here as just before.

1Cor 12:10
Workings of miracles ( $\varepsilon v \varepsilon \rho \gamma \eta \mu \alpha \tau \alpha \delta v v \alpha \mu \varepsilon \omega v)$. Workings of powers. Cf. $\varepsilon v \varepsilon \rho \gamma \omega v$ $\delta \nu v a \mu \varepsilon ı \varsigma ~ i n ~ G a ~ 3: 5 ; ~ H e b ~ 2: 4 ~ w h e r e ~ a l l ~ t h r e e ~ w o r d s ~ a r e ~ u s e d ~(~ \sigma \eta \mu \varepsilon ı \alpha, ~ s i g n s, ~ \tau \varepsilon p a \tau \alpha, ~ w o n d e r s, ~$ $\delta \cup v a \mu \varepsilon \varsigma$, powers). Some of the miracles were not healings as the blindness on Elymas the sorcerer.

Prophecy ( $\pi \rho \circ \varphi \eta \tau \varepsilon ı \alpha)$. Late word from $\pi \rho \circ \varphi \eta \tau \eta \varsigma$ and $\pi \rho \circ \varphi \eta \eta$, to speak forth. Common in papyri. This gift Paul will praise most (chapter 1Co 14 ). Not always prediction, but a speaking forth of God's message under the guidance of the Holy Spirit.

Discernings of spirits ( $\delta \iota \alpha к \rho \iota \sigma \varepsilon \varsigma \varsigma ~ \pi v \varepsilon v \mu \alpha \tau \omega v$ ). $\Delta$ เакрıбъऽ is old word from $\delta \iota \alpha \kappa \rho \iota v \omega$ (see 11:29) and in N.T. only here; Ro 14:1; Heb 5:14. A most needed gift to tell whether the gifts were really of the Holy Spirit and supernatural (cf. so-called "gifts" today) or merely strange though natural or even diabolical (1Ti 4:1; 1Jo 4:1f. ).

Divers kinds of tongues ( $\gamma \varepsilon v \eta \gamma \lambda \omega \sigma \sigma \omega v$ ). No word for "divers" in the Greek. There has arisen a great deal of confusion concerning the gift of tongues as found in Corinth. They prided themselves chiefly on this gift which had become a source of confusion and disorder. There were varieties (kinds, $\gamma \varepsilon v \eta$ ) in this gift, but the gift was essentially an ecstatic utterance of highly wrought emotion that edified the speaker ( $14: 4$ ) and was intelligible to God (14:2,28 ). It was not always true that the speaker in tongues could make clear what he had said to those who did not know the tongue ( 14:13): It was not mere gibberish or jargon like the modern "tongues," but in a real language that could be understood by one familiar with that tongue as was seen on the great Day of Pentecost when people who spoke different languages were present. In Corinth, where no such variety of people existed, it required an interpreter to explain the tongue to those who knew it not. Hence Paul placed this gift lowest of all. It created wonder, but did little real good. This is the error of the Irvingites and others who have tried to reproduce this early gift of the Holy Spirit which was clearly for a special emergency and which was not designed to help spread the gospel among men. See on Ac 2:13-21; 10:44-46; 19:6.

The interpretation of tongues ( $\varepsilon \rho \mu \eta v \varepsilon ı \alpha \gamma \lambda \omega \sigma \sigma \omega v$ ). Old word, here only and 14:26 in N.T., from $\varepsilon \rho \mu \eta \nu \varepsilon v \omega$ from H $\varepsilon \rho \mu \eta \varsigma$ (the god of speech). Cf. on $\delta \varepsilon \rho \rho \mu \eta v \varepsilon v \omega$ in Lu 24:27; Ac 9:36. In case there was no one present who understood the particular tongue it required a special gift of the Spirit to some one to interpret it if any one was to receive benefit from it.

1Cor 12:11
Worketh ( $\varepsilon v \varepsilon \rho \gamma \varepsilon)$. The same word that was used in verse 6 of God.
Severally (ı $\delta \iota \alpha$ ). Separately.
Even as he will ( $\kappa \alpha \theta \omega \varsigma \beta$ оu $\lambda \varepsilon \tau \alpha$ ). Hence there is no occasion for conceit, pride, or faction (4:7).

1Cor 12:12
So also is Christ ( $о \tau \tau \omega \varsigma \kappa \alpha$ о X $\rho \iota \sigma \tau о \varsigma$ ). One would naturally expect Paul here to say ov $\omega \omega \kappa \alpha$ то $\sigma \omega \mu \alpha$ тov Xpıбтov (so also is the body of Christ). He will later call Christ the Head of the Body the Church as in Col 1:18,24; Eph 5:23,30. Aristotle had used $\sigma \omega \mu \alpha$ of the state as the body politic. What Paul here means is Christ as the Head of the Church has a body composed of the members who have varied gifts and functions like the different members of the human body. They are all vitally connected with the Head of the body and with each other. This idea he now elaborates in a remarkable manner.

1Cor 12:13
Were we all baptized into one body ( $\eta \mu \varepsilon ı \varsigma \pi \alpha \nu \tau \varepsilon \varsigma \varepsilon \iota \varsigma \varepsilon \nu \sigma \omega \mu \alpha \varepsilon \beta \alpha \pi \tau \iota \sigma \theta \eta \mu \varepsilon v)$. First aorist passive indicative of $\beta a \pi \tau \iota \zeta \omega$ and so a reference to a definite past event with each of them of different races, nations, classes, when each of them put on the outward badge of service to Christ, the symbol of the inward changes already wrought in them by the Holy Spirit (Ga 3:27; Ro 6:2ff. ).

And were all made to drink of one Spirit ( $\kappa \alpha \pi \alpha v \tau \varepsilon \varsigma \varepsilon v \pi \nu \varepsilon \nu \mu \alpha \varepsilon \pi \sigma \tau \iota \sigma \theta \eta \mu \varepsilon v$ ). First aorist passive indicative of $\pi \sigma \tau \iota \zeta \omega$, old verb, to give to drink. The accusative $\varepsilon \nu \pi \nu \varepsilon v \mu \alpha$ is retained in the passive as often with verbs that in the active take two accusatives. The reference is to a definite act in the past, probably to the inward experience of the Holy Spirit symbolized by the act of baptism.

1Cor 12:14
Is not one member (ovk $\varepsilon \sigma \tau \tau v \varepsilon \nu \mu \varepsilon \lambda o \varsigma)$. The point sounds like a truism, but it is the key to the whole problem of church life both local and general. Vincent refers to the fable of the body and the members by Menenius Agrippa (Livy, II, 32), but it was an old parable. Socrates pointed out how absurd it would be if feet and hands should work against one another when God made them to cooperate (Xen., Mem. II. iii. 18). Seneca alludes to it as does Marcus Aurelius and Marcus Antoninus.

1Cor 12:15

If the foot shall say $(\varepsilon \alpha v \varepsilon \iota \pi \eta$ o $\pi \circ \cup \varsigma)$. Condition of third class ( $\varepsilon \alpha v$ and second aorist subjunctive $\varepsilon \iota \pi \eta)$. In case the foot say.

I am not of the body (ovк $\varepsilon \iota \varepsilon \kappa \tau \operatorname{\tau ov} \sigma \omega \mu \alpha \tau \circ \varsigma)$. I am independent of the body, not dependent on the body.

It is not therefore not of the body (ov $\pi \alpha \rho \alpha \tau о \nu \tau о$ оvк $\varepsilon \sigma \tau \iota v \varepsilon \kappa \tau о v \sigma \omega \mu \alpha \tau \sigma$ ). Thinking or saying so does not change the fact. Пара tov to here means "alongside of this" (cf. IV Macc. 10:19) and so "because of," a rare use (Robertson, Grammar, p. 616). The two negatives (ov--ovk) do not here destroy one another. Each retains its full force.

1Cor 12:16
Points explained precisely as in verse 15 .
1Cor 12:17
If the whole body were an eye $(\varepsilon$ o $\alpha o v \tau o ~ \sigma \omega \mu \alpha \sigma \varphi \theta \alpha \lambda \mu \sigma \varsigma)$. The eye is the most wonderful organ and supremely useful ( Nu 10:31) , the very light of the body (Lu 11:34). And yet how grotesque it would be if there were nothing else but a great round rolling eye! A big "I" surely!

The smelling ( $\eta$ o $\sigma \varphi \rho \eta \sigma \iota$ ). Old word from $о \sigma \varphi \rho \alpha \iota v o \mu \alpha$, to smell. Here alone in N.T. 1Cor 12:18
But now ( $\nu \cup v \delta \varepsilon$ ). But as things are, in contrast to that absurdity.
Hath God set (o $\theta \varepsilon o \varsigma \varepsilon \theta \varepsilon \tau \tau)$. Second aorist middle indicative. God did it and of himself.
Even as it pleased him ( $\kappa \alpha \theta \omega \varsigma \eta \theta \varepsilon \lambda \eta \sigma \varepsilon v$ ). Why challenge God's will? Cf. Ro 9:20 .
1Cor 12:19
One member ( $\varepsilon v \mu \varepsilon \lambda$ oc). Paul applies the logic of verse 17 to any member of the body. The application to members of the church is obvious. It is particularly pertinent in the case of a "church boss."

1Cor 12:20
Many members, but one body ( $\pi 0 \lambda \lambda \alpha \mu \varepsilon \lambda \eta, \varepsilon v \delta \varepsilon \sigma \omega \mu \alpha$ ). The argument in a nutshell, in one epigram.

1Cor 12:21
Cannot say (ov $\delta v v a \tau \alpha \varepsilon ı \pi \varepsilon เ v)$ ). And be truthful. The superior organs need the inferior ones (the eye, the hand, the head, the feet).

1Cor 12:22
Nay, much rather ( $\alpha \lambda \lambda \alpha \pi \sigma \lambda \lambda \omega \mu \alpha \lambda \lambda o v$ ). Adversative sense of $\alpha \lambda \lambda \alpha$, on the contrary. So far from the more dignified members like the eye and the head being independent of the subordinate ones like the hands and feet, they are "much more" (argumentum a fortiori, "by much more" $\pi \sigma \lambda \lambda \omega \mu \alpha \lambda \lambda o v$, instrumental case) in need of therm.

Those members of the body which seem to be more feeble are necessary ( $\tau \alpha \delta$ окоuv $\tau \alpha$ $\mu \varepsilon \lambda \eta \tau \operatorname{\tau ov} \sigma \omega \mu \alpha \tau о \varsigma \alpha \sigma \theta \varepsilon v \varepsilon \sigma \tau \varepsilon \rho \alpha$ v $\pi \alpha \rho \chi \varepsilon \iota v \alpha v \alpha \gamma \kappa \alpha \iota \alpha \varepsilon \sigma \tau \iota v)$. Things are not always what they
seem. The vital organs (heart, lungs, liver, kidneys) are not visible, but life cannot exist without them.

1Cor 12:23
We bestow ( $\pi \varepsilon \rho \iota \tau \bullet \varepsilon \varepsilon \mu \varepsilon v$ ). Literally, We place around as if a garland (Mr 15:17) or a garment (Mt 27:28).

More abundant comeliness ( $\varepsilon v \sigma \chi \eta \mu \circ \sigma \cup v \eta \nu$ пєрıбботє $\rho \alpha \nu$ ). One need only mention the mother's womb and the mother's breast to see the force of Paul's argument here. The word, common in old Greek, from $\varepsilon v \sigma \chi \eta \mu \omega \nu$ ( $\varepsilon v$, well, $\sigma \chi \eta \mu \alpha$, figure), here only in N.T. One may think of the coal-miner who digs under the earth for the coal to keep us warm in winter. So $\alpha \sigma \chi \eta \mu \omega \nu$ (deformed, uncomely), old word, here only in N.T., but see 7:36 for $\alpha \sigma \chi \eta \mu$ оvє $\omega$.

1Cor 12:24
Tempered the body together ( $\sigma u v \varepsilon \kappa \varepsilon \rho \alpha \sigma \varepsilon v$ тo $\sigma \omega \mu \alpha$ ). First aorist active indicative of бטvкعраvvv , to mix together, old word, but in N.T. only here and Heb 4:2 . Plato used this very word of the way God compounded (бטveкєрабато) the various elements of the body in creating soul and body. Paul rejects the idea of the later Gnostics that matter is evil and the physical organs degrading. He gives a noble picture of the body with its wonderful organs planned to be the temple of God's Spirit ( 6:19) in opposition to the Epicurean sensualists in Corinth.

To that part which lacked ( $\tau \omega v \sigma \tau \varepsilon \rho \sigma \nu \mu \varepsilon v \omega$ ). It is a true instinct that gives superior honour to the unseen organs of life.

1Cor 12:25
That there should be no schism (ıva $\mu \eta \eta \sigma \chi \iota \sigma \mu)$ ). Purpose of God in his plan for the body. Trouble in one organ affects the whole body. A headache may be due to trouble elsewhere and usually is.

Have the same care ( $\tau 0 \alpha v \tau o ~ \mu \varepsilon \rho \mu \nu \omega \sigma \tau v$ ). The very verb $\mu \varepsilon \rho \mu \nu \alpha \omega$ used by Jesus of our anxiety (Mt 6:27,31). Paul here personifies the parts of the body as if each one is anxious for the others. The modern knowledge of the billions of cells in the body co-working for the whole confirms Paul's argument.

1Cor 12:26
Suffer with it ( $\left.\sigma v \operatorname{con}^{2} \alpha \sigma \chi\right)$. Medical term in this sense in Hippocrates and Galen. In N.T only here and Ro 8:17 (of our suffering with Christ). One of Solon's Laws allowed retaliation by any one for another's injuries. Plato (Republic, V, 462) says the body politic "feels the hurt" as the whole body feels a hurt finger.

Rejoice with it ( $\sigma v \sim \chi \alpha \rho \varepsilon$ ). This is fortunately true also. One may tingle with joy all over the body thanks to the wonderful nervous system and to the relation between mind and matter. See 13:6 for joy of love with truth.

1Cor 12:27

Severally（ $\varepsilon \kappa \mu \varepsilon \rho о и \varsigma)$. See Ro 11：25 $\alpha \pi \sigma \mu \varepsilon \rho о \nu \varsigma$（in part）．Each has his own place and function in the body of Christ．

1Cor 12：28
God hath set some（ouc $\mu \varepsilon v \varepsilon \theta \varepsilon \tau \tau$ o $\theta \varepsilon o \varsigma$ ）．See verse 18 for $\varepsilon \theta \varepsilon \tau \tau$ o $\theta \varepsilon o \varsigma$ ．Note middle voice（for his own use）．Paul begins as if he means to say ouc $\mu \varepsilon v$ a $\quad$ тобтo入ovo，ous $\delta \varepsilon$ $\pi \rho о \varphi \eta \tau \alpha \varsigma$（some apostles，some prophets），but he changes the construction and has no ouc $\delta \varepsilon$ ，but instead $\pi \rho \omega \tau \sigma v, \delta \varepsilon v \tau \varepsilon \rho \circ v, \varepsilon \pi \varepsilon \iota \tau \alpha$（first，second，then，etc．）．

In the church（ $\varepsilon v \tau \eta \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$ ）．The general sense of $\varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$ as in Mt 16：18 and later in Col 1：18，24；Eph 5：23，32；Heb 12：23．See list also in Eph 4：11．See on Mt 10：2 for a $\pi$ обто入ouc，the official title given the twelve by Jesus，and claimed by Paul though not one of the twelve．

Prophets（ $\pi \rho о \varphi \eta \tau \alpha \varsigma)$ ．For－speakers for God and Christ．See the list of prophets and teachers in Ac 13：1 with Barnabas first and Saul last．Prophets are needed today if men will let God＇s Spirit use them，men moved to utter the deep things of God．

Teachers（ $\delta \iota \delta \alpha \sigma \kappa \alpha \lambda o v \varsigma)$ ．Old word from $\delta \iota \delta \alpha \sigma \kappa \omega$ ，to teach．Used to the Baptist（Lu 3：12 ），to Jesus（Joh 3：10；13：13 ），and of Paul by himself along with arooto入os（1Ti 2：7）． It is a calamity when the preacher is no longer a teacher，but only an exhorter．See Eph 4：11

Then miracles（ $\varepsilon \pi \varepsilon \iota \tau \alpha \delta v v \alpha \mu \varepsilon \iota)$ ）．Here a change is made from the concrete to the ab－ stract．See the reverse in Ro 12：7．See these words（ $\delta \nu v \alpha \mu \varepsilon \iota \sigma, \iota \alpha \mu \eta \tau \omega \nu, \gamma \lambda \omega \sigma \sigma \omega v$ ）in verses 9,10 with $\gamma \lambda \omega \sigma \sigma \omega v$ ，last again．But these two new terms（helps，governments）．

Helps（ $\alpha v \tau i \lambda \eta \mu \psi \varepsilon \iota \varsigma)$ ．Old word，from $\alpha v \tau i \lambda \alpha \mu \beta \alpha v o \mu \alpha$ ，to lay hold of．In LXX，common in papyri，here only in N．T．Probably refers to the work of the deacons，help rendered to the poor and the sick．
 ）like Latin gubernare，our govern．So a governing．Probably Paul has in mind bishops （ $\varepsilon \pi \iota \sigma \chi \circ \pi \circ$ ）or elders（ $\pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho o$ ），the outstanding leaders（o $\pi \rho \circ \iota \sigma \tau \alpha \mu \varepsilon v o$ in 1Th 5：12；Ro 12：8；o $\eta \gamma o u \mu \varepsilon v o$ in Ac 15：22；Heb 13：7，17，24）．Curiously enough，these two offices（pastors and deacons）which are not named specifically are the two that survive today．See Php 1：1 for both officers．

1Cor 12：29
Are all（ $\mu \eta \pi \alpha v \tau \varepsilon \varsigma$ ）．The $\mu \eta$ expects a negative answer with each group．
1Cor 12：30
Do all interpret？（ $\mu \eta \pi \alpha v \tau \varepsilon \varsigma \delta \varepsilon \varepsilon \rho \mu \eta v \varepsilon v o v \sigma \iota v ?)$ ．He adds this query to the list in 28，but it is in 10 ．

1Cor 12：31
The greater gifts（ $\tau \alpha \chi \alpha \rho เ \sigma \mu \alpha \tau \alpha \tau \alpha \mu \varepsilon ו \zeta o v \alpha$ ）．Paul unhesitatingly ranks some spiritual gifts above others． $\mathrm{Z} \mathrm{\eta} \lambda$ ow here has good sense，not that of envy as in Ac 7：9；1Co 13：4．

And a still more excellent way ( $\kappa \alpha \varepsilon \tau \kappa \alpha \theta^{\prime} v \pi \varepsilon \rho \beta \circ \lambda \eta \nu \circ \delta o v$ ). In order to gain the greater gifts. "I show you a way par excellence," beyond all comparison (superlative idea in
 is old word from $v \pi \varepsilon \rho \beta \alpha \lambda \lambda \omega$, to throw beyond, to surpass, to excel (2Co 3:10; Eph 1:19). "I show you a supremely excellent way." Chapter 1Co 13 is this way, the way of love already laid down in 8:1 concerning the question of meats offered to idols (cf. 1Jo 4:7). Poor division of chapters here. This verse belongs with chapter 1Co 13 .

## 1 Corinthians 13

1Cor 13:1
With the tongues ( $\tau \alpha \iota \varsigma \gamma \lambda \omega \sigma \sigma \alpha \iota \varsigma$ ). Instrumental case. Mentioned first because really least and because the Corinthians put undue emphasis on this gift. Plato (Symposium, 197) and many others have written on love, but Paul has here surpassed them all in this marvellous prose-poem. It comes like a sweet bell right between the jangling noise of the gifts in chapters 12 and 14. It is a pity to dissect this gem or to pull to pieces this fragrant rose, petal by petal. Fortunately Paul's language here calls for little comment, for it is the language of the heart. "The greatest, strongest, deepest thing Paul ever wrote" (Harnack). The condition ( $\varepsilon \alpha v$ and present subjunctive, $\lambda \alpha \lambda \omega \kappa \alpha \mu \eta \varepsilon \chi \omega$, though the form is identical with present indicative) is of the third class, a supposable case.

But have not love ( $\alpha \gamma \alpha \pi \eta \nu \delta \varepsilon \mu \eta \varepsilon \chi \omega$ ). This is the crux of the chapter. Love is the way par excellence of 12:31. It is not yet clearly certain that $\alpha \gamma \alpha \pi \eta$ (a back-formation from $\alpha \gamma \alpha \pi \alpha \omega$ ) occurs before the LXX and the N.T. Plutarch used $\alpha \gamma \alpha \pi \eta \sigma \iota c$. Deissmann (Bible Studies, p. 198) once suspected it on an inscription in Pisidia. It is still possible that it occurs in the papyri (Prayer to Isis). See Light from the Ancient East, p. 75 for details. The rarity of a $\gamma \alpha \pi \eta$ made it easier for Christians to use this word for Christian love as opposed to $\varepsilon \rho \omega \varsigma$ (sexual love). See also Moffatt's Love in the N.T. (1930) for further data. The word is rare in the Gospels, but common in Paul, John, Peter, Jude. Paul does not limit $\alpha \gamma \alpha \pi \eta$ at all (both toward God and man). Charity (Latin caritas) is wholly inadequate. "Intellect was worshipped in Greece, and power in Rome; but where did St. Paul learn the surpassing beauty of love?" (Robertson and Plummer). Whether Paul had ever seen Jesus in the flesh, he knows him in the spirit. One can substitute Jesus for love all through this panegyric.

I am become ( $\gamma \varepsilon \gamma \circ v \alpha$ ). Second perfect indicative in the conclusion rather than the usual future indicative. It is put vividly, "I am already become." Sounding brass ( $\chi \alpha \lambda \chi \circ \varsigma$ $\eta \chi \omega v)$. Old words. Brass was the earliest metal that men learned to use. Our word echoing is $\eta \chi \omega v$, present active participle. Used in Lu 21:25 of the roaring of the sea. Only two examples in N.T.

Clanging cymbal ( $\kappa \nu \mu \beta \alpha \lambda о v \alpha \lambda \alpha \lambda \alpha \zeta$ ov). Cymbal old word, a hollow basin of brass. $\mathrm{A} \lambda \alpha \lambda \alpha \zeta \omega$, old onomatopoetic word to ring loudly, in lament ( $\mathrm{Mr} 5: 38$ ), for any cause as here. Only two N.T. examples.

1Cor 13:2
The ecstatic gifts (verse 1) are worthless. Equally so are the teaching gifts (prophecy, knowledge of mysteries, all knowledge). Crasis here in каv=ка $\varepsilon \alpha v$. Paul is not condemning these great gifts. He simply places love above them and essential to them. Equally futile is wonder-faith "so as to remove mountains" ( $\omega \sigma \tau \varepsilon$ op $\eta \mu \varepsilon \theta \iota \sigma \tau \alpha v \varepsilon ı v$ ) without love. This may have been a proverb or Paul may have known the words of Jesus (Mt 17:20; 21:21).

I am nothing ( $o v \theta \varepsilon v \varepsilon ı \mu$ ). Not $o v \theta \varepsilon ı$, nobody, but an absolute zero. This form in $\theta$ rather than $\delta$ (ou $\delta \varepsilon v$ ) had a vogue for a while (Robertson, Grammar, p. 219).

1Cor 13:3
Bestow to feed $(\Psi \omega \mu \sigma \sigma \omega)$. First aorist active subjunctive of $\psi \omega \mu \zeta \zeta \omega$, to feed, to nourish, from $\psi \omega \mu \rho \varsigma$, morsel or bit, and so to feed, by putting a morsel into the mouth like infant (or bird). Old word, but only here in N.T.

To be burned (iva кav $\theta \eta \sigma \omega \mu \alpha$ ). First future passive subjunctive (Textus Receptus), but D каv $\theta \eta \sigma о \mu \alpha$ (future passive indicative of $\kappa \alpha \iota \omega$, old word to burn). There were even some who courted martyrdom in later years (time of Diocletian). This Byzantine future subjunctive does not occur in the old MSS. (Robertson, Grammar, p. 876). Aleph A B here read каv $\eta \eta \omega \mu \mu$, first aorist middle subjunctive of kav $\quad \alpha \circ \mu \alpha$ (so Westcott and Hort), "that I may glory." This is correct.

It profiteth me nothing (ov $\delta \varepsilon v \omega \varphi \varepsilon \lambda o v \mu \alpha)$. Literally, I am helped nothing. Ov $\delta \varepsilon v$ in the accusative case retained with passive verb. See two accusatives with $\omega \varphi \varepsilon \lambda \varepsilon \omega$ in 14:6. Verb is old and from ор $\varepsilon \lambda о \varsigma$ (profit).

1Cor 13:4
Verses 4-7 picture the character or conduct of love in marvellous rhapsody.
Suffereth long ( $\mu \alpha \kappa \rho \circ \theta \nu \mu \varepsilon$ ). Late Koine word (Plutarch) from $\mu \alpha \kappa \rho \circ \varsigma$, long, $\theta v \mu \circ \varsigma$, passion, ardour. Cf. Jas 5:7f.

Is kind ( $\chi \rho \eta \sigma \tau \varepsilon \cup \varepsilon \tau \alpha)$. From $\chi \rho \eta \sigma \tau o \varsigma$ (useful, gracious, kind) and that from $\chi \rho \alpha o \mu \alpha$, to use. Not found elsewhere save in Clement of Rome and Eusebius. "Perhaps of Paul's coining" (Findlay). Perhaps a vernacular word ready for Paul. Gentle in behaviour.

Envieth not (ov $\zeta \eta \lambda 0$ ). Present active indicative of $\zeta \eta \lambda \frac{\omega}{}$ (contraction osı=o, same as subjunctive and optative forms). Bad sense of $\zeta \eta \lambda$ oc from $\zeta \varepsilon \omega$, to boil, good sense in 12:31. Love is neither jealous nor envious (both ideas).

Vaunteth not itself (ov $\pi \varepsilon \rho \pi \varepsilon \rho \varepsilon \cup \varepsilon \tau \alpha)$. From $\pi \varepsilon \rho \pi \varepsilon \rho \circ \varsigma$, vainglorious, braggart (Polybius, Epictetus) like Latin perperus. Only here in N.T. and earliest known example. It means play the braggart. Marcus Anton. V. 5 uses it with $\alpha \rho \varepsilon \sigma \kappa \varepsilon v o \mu \alpha$, to play the toady.
 (late form for $\varphi v \sigma \alpha \omega, \varphi v \sigma i \alpha \omega$ from $\varphi$ voa, bellows), to puff oneself out like a pair of bellows. This form in Herodas and Menander. Is not arrogant. See on 4:6.

1Cor 13:5
Doth not behave itself unseemly (ovк $\alpha \sigma \chi \eta \mu \mathrm{ov} \mathrm{\varepsilon}$ ). Old verb from $\alpha \sigma \chi \eta \mu \omega \nu$ ( 12:23). In N.T. only here and 7:36. Not indecent.

Seeketh not its own (ov $\zeta \eta \tau \varepsilon \tau \alpha \varepsilon \alpha \cup \tau \eta \varsigma)$. Its own interests (10:24,33).
Is not provoked ( $\mathrm{ov} \pi \alpha \rho \circ \xi \cup v \varepsilon \tau \alpha$ ). Old word. In N.T. only here and Ac 17:16 which see. Irritation or sharpness of spirit. And yet Paul felt it in Athens (exasperation) and he
and Barnabas had $\pi \alpha \rho о \xi \cup \sigma \mu \circ \varsigma$ (paroxysm) in Antioch ( 15:39). See good sense of $\pi \alpha \rho \circ \xi \cup \sigma \mu о \varsigma$ in Heb 10:24.

Taketh not account of evil (ov $\lambda$ оүццєта то какоv). Old verb from $\lambda о \gamma \circ \varsigma$, to count up, to take account of as in a ledger or note-book, "the evil" (то какоv) done to love with a view to settling the account.

1Cor 13:6
Rejoiceth not in unrighteousness (ov $\chi$ aı $\rho$ ). See Ro 1:32 for this depth of degradation. There are people as low as that whose real joy is in the triumph of evil.

But rejoiceth with the truth ( $\sigma v \vee \chi \alpha \rho \rho \varepsilon \delta \varepsilon \tau \eta \alpha \lambda \eta \theta \varepsilon \varepsilon \alpha$ ). Associative instrumental case after $\sigma 0 v$ - in composition. Truth personified as opposed to unrighteousness (2Th 2:12; Ro 2:8). Love is on the side of the angels. Paul returns here to the positive side of the picture (verse 4) after the remarkable negatives.

1Cor 13:7
Beareth all things ( $\pi \alpha \nu \tau \alpha \sigma \tau \varepsilon \gamma \varepsilon$ ). $\sum \tau \varepsilon \gamma \omega$ is old verb from $\sigma \tau \varepsilon \gamma \eta$, roof, already in 1Co 9:12; 1Th 3:1,5 which see. Love covers, protects, forbears (suffert, Vulgate). See 1Pe 4:8 "because love covers a multitude of sins" (от $\alpha \gamma \alpha \pi \eta ~ \kappa \alpha \lambda u \pi \tau \varepsilon \varphi \eta$ Өоऽ $\alpha \mu \alpha \rho \tau \iota \omega v$ ), throws a veil over.

Believeth all things ( $\pi \alpha v \tau \alpha \pi \iota \sigma \tau \varepsilon \cup \varepsilon)$. Not gullible, but has faith in men.
Hopeth all things ( $\pi \alpha v \tau \alpha \varepsilon \lambda \pi \iota \zeta \varepsilon)$. Sees the bright side of things. Does not despair. $E v \delta v \rho \varepsilon \theta \alpha \lambda \lambda \theta_{\imath} \nu \gamma \varsigma(\pi \alpha v \tau \alpha \cup \pi \sigma \mu \varepsilon v \varepsilon)$. Perseveres. Carries on like a stout-hearted soldier. If one knows Sir Joshua Reynolds's beautiful painting of the Seven Virtues (the four cardinal virtues of the Stoics--temperance, prudence, fortitude, justice--and the three Christian graces--faith, hope, love), he will find them all exemplified here as marks of love (the queen of them all).

1Cor 13:8
Love never faileth ( $\mathrm{H} \mathrm{\eta} \alpha \gamma \alpha \pi \eta$ ои $\delta \varepsilon \pi о \tau \varepsilon \pi \iota \pi \tau \varepsilon$ ). New turn for the perpetuity of love. Пıлтє correct text, not $\varepsilon \kappa \pi \iota \tau \tau \varepsilon$, as in Lu 16:17. Love survives everything.

They shall be done away ( $\kappa \alpha \tau \alpha \rho \gamma \eta \theta \eta \sigma o \nu \tau \alpha$ ). First future passive of $\kappa \alpha \tau \alpha \rho \gamma \varepsilon \omega$. Rare in old Greek, to make idle ( $\alpha \rho \gamma \rho \varsigma$ ), inoperative. All these special spiritual gifts will pass. It is amazing how little of human work lasts.

They shall cease ( $\pi \alpha v \sigma o v \tau \alpha$ ). Future middle indicative of $\pi \alpha v \omega$, to make cease. They shall make themselves cease or automatically cease of themselves.

1Cor 13:9
In part ( $\varepsilon \kappa \mu \varepsilon \rho \circ \cup \varsigma)$. See on 12:27. As opposed to the whole.
1Cor 13:10
That which is perfect ( $\tau 0 \tau \varepsilon \lambda \varepsilon \circ \circ v$ ). The perfect, the full-grown ( $\tau \varepsilon \lambda o \varsigma$, end), the mature. See on 2:6. Ho otav $\varepsilon \lambda \theta \eta$ is second aorist subjunctive with otav, temporal clause for indefinite future time.

1Cor 13:11
A child ( $\nu \eta \pi \iota \circ \varsigma)$. See on 3:1 for $\nu \eta \pi \iota \circ \varsigma$ in contrast with $\tau \varepsilon \lambda \varepsilon \iota \circ \varsigma$ (adult).
I spake ( $\varepsilon \lambda \alpha \lambda o v v$ ). Imperfect active, I used to talk.
I felt ( $\varepsilon \varphi \rho$ ovovv). Imperfect active, I used to think. Better, I used to understand.
I thought $(\varepsilon \lambda o \gamma \iota \zeta o \mu \eta v)$. Imperfect middle, I used to reason or calculate.
Now that I am become (o $\tau \varepsilon \gamma \varepsilon \gamma o v \alpha$ ). Perfect active indicative $\gamma \varepsilon \gamma \circ v a$, I have become a man ( $\alpha \vee \eta \rho$ ) and remain so (Eph 4:14).

I have put away ( $\kappa \alpha \tau \eta \rho\rceil \eta \kappa \alpha)$. Perfect active indicative. I have made inoperative (verse 8) for good.

1Cor 13:12
In a mirror $\left(\delta \iota^{\prime} \varepsilon \sigma o \pi \tau \rho o v\right)$. By means of a mirror $(\varepsilon \sigma o \pi \tau \rho o v$, from $o \pi \tau \omega$, old word, in papyri). Ancient mirrors were of polished metal, not glass, those in Corinth being famous.

Darkly ( $\varepsilon v \alpha \iota v \tau \gamma \alpha \tau$ ). Literally, in an enigma. Old word from aıvıббo $\mu \alpha$, to express obscurely. This is true of all ancient mirrors. Here only in N.T., but often in LXX. "To see a friend's face in a cheap mirror would be very different from looking at the friend" (Robertson and Plummer).

Face to face $(\pi \rho o \sigma \omega \pi \sigma \nu \pi \rho o \varsigma \pi \rho o \sigma \omega \pi \sigma v)$. Note triple use of $\pi \rho o \varsigma$ which means facing one as in Joh $1: 1$. Проб $\omega \pi \sigma v$ is old word from $\pi \rho o \varsigma$ and o $\pi \varsigma$, eye, face.

Shall I know ( $\varepsilon \pi \tau \gamma \nu \omega \sigma o \mu \alpha)$. I shall fully ( $\varepsilon \pi t-)$ know. Future middle indicative as $\gamma \iota \nu \omega \sigma \kappa \omega$ (I know) is present active and $\varepsilon \pi \varepsilon \gamma \nu \omega \sigma \theta \eta \nu$ (I was fully known) is first aorist passive (all three voices).

1Cor 13:13
Abideth ( $\mu \varepsilon v \varepsilon$ ). Singular, agreeing in number with $\pi \iota \sigma \tau \iota \varsigma ~(f a i t h), ~ f i r s t ~ i n ~ l i s t . ~$
The greatest of these $(\mu \varepsilon \zeta \zeta \omega v \tau o v \tau \omega v)$. Predicative adjective and so no article. The form of $\mu \varepsilon \iota \zeta \omega \nu$ is comparative, but it is used as superlative, for the superlative form $\mu \varepsilon \gamma \iota \sigma \tau o s$ had become rare in the Koine (Robertson, Grammar, pp. 667ff.). See this idiom in Mt 11:11; 18:1; 23:11. The other gifts pass away, but these abide forever. Love is necessary for both faith and hope. Does not love keep on growing? It is quite worth while to call attention to Henry Drummond's famous sermon The Greatest Thing in the World and to Dr. J.D. Jones's able book The Greatest of These. Greatest, Dr. Jones holds, because love is an attribute of God.

## 1 Corinthians 14

1Cor 14:1
Follow after love ( $\delta \omega \kappa \kappa \varepsilon \varepsilon \tau \eta \nu$ a $\gamma \alpha \pi \eta v$ ). As if a veritable chase. Paul comes back to the idea in 12:31 (same use of $\zeta \eta \lambda$ oute) and proves the superiority of prophecy to the other spiritual gifts not counting faith, hope, love of 13:13.

But rather that ye may prophesy ( $\mu \alpha \lambda \lambda o v \delta \varepsilon เ v \alpha \pi \rho \circ \varphi \eta \tau \varepsilon \cup \eta \tau \varepsilon$ ). Distinct aim in view as in verse 5 . Old verb from $\pi \rho \circ \varphi \eta \tau \eta \varsigma$, common in N.T. Present subjunctive, "that ye may keep on prophesying."

1Cor 14:2
For no man understandeth (ov $\delta \iota \varsigma \gamma \alpha \rho$ акоиع). Literally, hears, gets the sense, understands. Verb akove used either of hearing the sound only or getting the idea (cf. Ac 9:7; 22:9).

Mysteries ( $\mu \nu \sigma \tau \eta \rho \iota \alpha$ ). Unexplained mysteries (1Co 2:7).
1Cor 14:3
Edification (o七коסo $\eta \eta \nu$ ). Building up.
Comfort ( $\pi \alpha \rho \alpha \kappa \lambda \eta \sigma เ v)$. Encouragement, calling to one's side.
Consolation ( $\pi \alpha \rho \alpha \mu \nu \theta \iota \alpha v$ ). Old word (from $\pi \alpha \rho \alpha, \mu \nu \theta o \sigma, \pi \alpha \rho \alpha \mu \nu \theta \varepsilon o \mu \alpha 1$ Th 2:12 which see, a stimulating word), nowhere else in N.T., but $\pi \alpha \rho a \mu \nu \theta$ tov in Php 2:1 with $\pi \alpha \rho а к \lambda \eta \sigma \iota \varsigma$ as here. Edification, cheer, incentive in these words.

1Cor 14:4
The church ( $\varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha v)$. No article, literally, "a church" (local use). Not $\eta \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$.
1Cor 14:5
Except he interpret ( $\varepsilon \kappa \tau о \varsigma \varepsilon \mu \eta \delta เ \varepsilon \rho \mu \eta \nu \varepsilon \cup \eta$ ). Pleonastic combination of $\varepsilon \kappa \tau о \varsigma$ (preposition except) and $\varepsilon \mu \eta$ (if not, unless) as in 15:2; 1Ti 5:19. For use of $\varepsilon$ with subjunctive rather than $\varepsilon a v$ see Php 3:12 (common enough in the Koine, Robertson, Grammar, pp. 1017f., condition of third class). On the verb see on 12:30; Lu 24:27; Ac 9:36.

Receive ( $\lambda \alpha \beta \eta$ ). Second aorist (ingressive) active subjunctive of $\lambda \alpha \mu \beta \alpha \nu \omega$, may get edification.

1Cor 14:6
If I come ( $\varepsilon \alpha v \varepsilon \lambda \theta \omega$ ). Third class condition, supposable case (aorist subjunctive).
What shall I profit you ( $\tau \operatorname{v} \mu \propto \varsigma \omega \varrho \Sigma \eta \sigma \omega$ ). Two accusatives with this verb (see 13:3).
Unless I speak ( $\varepsilon \alpha \vee \mu \eta \lambda \alpha \lambda \eta \sigma \omega)$. Second condition (also third class) with the one conclusion (cf. 1Ti 2:5).

1Cor 14:7
Things without life ( $\alpha \psi \cup \chi \alpha$ ). Without a soul ( $\alpha$ privative, $\psi \cup \chi \eta$ ) or life. Old word only here in N.T.

Pipe ( $\alpha v \lambda o c)$. Old word (from $\alpha \omega, \alpha v \omega$, to blow), only here in N.T.

Harp ( $\kappa 1 \theta \alpha \rho \alpha)$. Old word. Stringed instrument as pipe, a wind instrument.
If they give not a distinction in the sounds ( $\varepsilon \alpha \nu \delta ı \sigma \sigma \tau \circ \lambda \eta \nu \tau \circ \iota \varsigma \theta \circ \gamma \gamma \circ \iota \mu \eta \delta \omega$ ). Third class condition with second aorist active subjunctive $\delta \omega$ from $\delta \iota \omega \mu$. Common word in late Greek for difference ( $\delta \iota \alpha \sigma \tau \varepsilon \lambda \lambda \omega$, to send apart). In N.T. only here and Ro 3:22; 10:12 . $\Phi \theta$ o $\gamma \gamma$ os old word (from $\varphi \theta \varepsilon \gamma \gamma \circ \mu \alpha$ ) for musical sounds vocal or instrumental. In N.T. only here and Ro 10:18.

1Cor 14:8
An uncertain voice $(\alpha \delta \eta \lambda o v \varphi \omega \nu \eta \nu)$. Old adjective ( $\alpha$ privative, $\delta \eta \lambda o \varsigma$, manifest). In N.T. only here and Lu 11:44. Military trumpet $(\sigma \alpha \lambda \pi / \gamma \xi)$ is louder than pipe or harp.

Shall prepare himself ( $\pi \alpha \rho \alpha \sigma \kappa \varepsilon v \alpha \sigma \varepsilon \tau \alpha)$. Direct middle future indicative of $\pi \alpha \rho \alpha \sigma \kappa \varepsilon v \alpha \zeta \omega$, old verb, in N.T. only here, 2Co 9:2ff.; Ac 10:10 . From $\pi \alpha \rho \alpha, \sigma \kappa \varepsilon \cup \eta$ (preparation).

1Cor 14:9
Unless ye utter speech easy to be understood ( $\varepsilon \alpha \nu \mu \eta \varepsilon v \sigma \eta \mu \circ v \lambda o \gamma o v \delta \omega \tau \varepsilon)$. Condition of third class again ( $\varepsilon \alpha v$ and aorist subjunctive). Evoŋ $\mu \circ v(\varepsilon v$, well, $\sigma \eta \mu \alpha$, sign) is old word, here only in N.T., well-marked, distinct, clear. Good enunciation, a hint for speakers.

Ye will be speaking into the air ( $\varepsilon \sigma \varepsilon \sigma \theta \varepsilon \varepsilon เ \varsigma ~ \alpha \varepsilon \rho \alpha \lambda \alpha \lambda o u v \tau \varepsilon \varsigma)$. Periphrastic future indicative (linear action). Cf. $\alpha \varepsilon \rho \alpha \delta \varepsilon \rho \omega \nu$ (beating the air) in 9:26. Cf. our talking to the wind. This was before the days of radio.

1Cor 14:10
It may be ( $\varepsilon \tau \cup \chi 0$ ). Condition of fourth class ( $\varepsilon$ and aorist optative of $\tau v \gamma \chi \alpha v \omega$ ), if it should happen. Common enough idiom. Cf. тv $o v$ in 16:6.

Without signification ( $\alpha \varphi \omega \nu \circ \nu$ ). Old adjective ( $\alpha$ privative and $\varphi \omega \nu \eta$ ). Without the faculty of speech (12:2; Ac $8: 32 ; 2 \mathrm{Pe} 2: 16$ ).

1Cor 14:11
The meaning of the voice ( $\tau \eta \nu \delta v v \alpha \mu \nu \tau \eta \varsigma \varphi \omega \nu \eta \varsigma$ ). The power (force) of the voice.
A barbarian ( $\beta \alpha \rho \beta \alpha \rho o \varsigma$ ). Jargon, $\beta \alpha \rho-\beta \alpha \rho$. The Egyptians called all $\beta \alpha \rho \beta \alpha \rho o v c$ who did not speak their tongue. The Greeks followed suit for all ignorant of Greek language and culture. They divided mankind into Hellenes and Barbarians.

Unto me ( $\varepsilon \nu \varepsilon \mu \mathrm{o}$ ). In my case, almost like a dative.
1Cor 14:12
Zealous of spiritual gifts $(\zeta \eta \lambda \omega \tau \alpha \pi v \varepsilon v \mu \alpha \tau \omega v)$. Zealots for spirits. So it looked.
That ye may abound ( $\llcorner\sim \alpha \varepsilon \rho \iota \sigma \sigma \varepsilon v \eta \tau \varepsilon$ ). Purpose clause with the object by prolepsis stated beforehand "for the edification of the church."

1Cor 14:13
Let him pray that he may interpret ( $\pi \rho \circ \sigma \varepsilon v \chi \varepsilon \sigma \theta \omega \operatorname{v} \alpha \delta \iota \rho \mu \eta v \varepsilon v \eta)$. Else he had better cease talking in a tongue.

1Cor 14:14

But my understanding is unfruitful (о $\delta \varepsilon$ vоич $\mu о \boldsymbol{\alpha}$ акартоऽ). My intellect (vovৎ) gets no benefit (акартоя, without fruit) from rhapsodical praying that may even move my spirit ( $\pi v \varepsilon v \mu \alpha)$.

1Cor 14:15
With the understanding also ( $\kappa \alpha \tau \omega$ vo). Instrumental case of vovc. Paul is distinctly in favour of the use of the intellect in prayer. Prayer is an intelligent exercise of the mind.

And I will sing with the understanding also ( $\psi \alpha \lambda \omega \delta \varepsilon \kappa \alpha \tau \omega v o$ ). There was ecstatic singing like the rhapsody of some prayers without intelligent words. But Paul prefers singing that reaches the intellect as well as stirs the emotions. Solos that people do not understand lose more than half their value in church worship. $\Psi a \lambda \lambda \omega$ originally meant to play on strings, then to sing with an accompaniment (Eph 5:19), and here apparently to sing without regard to an instrument.

1Cor 14:16
Else if thou bless with the spirit ( $\varepsilon \pi \varepsilon \varepsilon \alpha v \varepsilon \cup \lambda o \gamma \eta \vdash \varsigma v \pi v \varepsilon v \mu a \tau$ ). Third class condition. He means that, if one is praying and praising God (10:16) in an ecstatic prayer, the one who does not understand the ecstasy will be at a loss when to say "amen" at the close of the prayer. In the synagogues the Jews used responsive amens at the close of prayers (Neh 5:13; 8:6; 1Ch 16:36; Ps 106:48 ).

He that filleth the place of the unlearned (o $\alpha v a \pi \lambda \eta \rho \omega v$ тov $\tau о \pi о \nu \tau o v ~ i \delta \omega \tau \tau 0 v)$. Not a special part of the room, but the position of the $\delta \delta \omega \tau$ tov (from $\delta \delta$ toc, one's own), common from Herodotus for private person (Ac 4:13), unskilled (2Co 11:6), uninitiated (unlearned) in the gift of tongues as here and verses 23 f .

At thy giving of thanks ( $\varepsilon \pi \tau \eta \sigma \eta \varepsilon \cup \chi \alpha \rho \circ \sigma \tau \iota \alpha)$. Just the prayer, not the Eucharist or the Lord's Supper, as is plain from verse 17.

1Cor 14:18
More than you all ( $\pi \alpha \nu \tau \omega \nu \nu \mu \omega \nu \mu \alpha \lambda \lambda o v$ ). Ablative case after $\mu \alpha \lambda \lambda o v$. Astonishing claim by Paul that doubtless had a fine effect.

1Cor 14:19
Howbeit in church ( $\alpha \lambda \lambda \alpha \varepsilon v \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$ ). Private ecstasy is one thing (cf. 2Co 12:1-9) but not in church worship.
 see on $\operatorname{Lu} 1: 4 ;$ Ac 18:25.

1Cor 14:20
Be not children in mind ( $\mu \eta \pi \alpha \iota \delta \iota \alpha \gamma \iota v \varepsilon \sigma \theta \varepsilon \tau \alpha \iota \varsigma \varphi \rho \varepsilon \sigma \iota v$ ). "Cease becoming children in your intellects," as some of them evidently were. Cf. Heb 5:11-14 for a like complaint of intellectual dulness for being old babies.

In malice be ye babes ( $\tau \eta \kappa \alpha \kappa ı \alpha \sim \eta \pi \iota \alpha(\varepsilon \tau \varepsilon)$.

Be men ( $\tau \varepsilon \lambda \varepsilon เ \circ \gamma \imath v \varepsilon \sigma \theta \varepsilon$ ). Keep on becoming adults in your minds. A noble and a needed command, pertinent today.

1Cor 14:21
In the law it is written ( $\varepsilon v \tau \omega \nu o \mu \omega \gamma \varepsilon \gamma \rho a \pi \tau \alpha$ ). Isa 28:11f. Freely quoted.
1Cor 14:22
For a sign ( $\varepsilon \iota \varsigma ~ \sigma \eta \mu \varepsilon \iota o v$ ). Like the Hebrew and occasional Koine idiom also.
1Cor 14:23
Will they not say that ye are mad? (ovк $\varepsilon \rho \circ v \sigma \iota v$ o $\tau \mu a v \varepsilon \sigma \theta \varepsilon$ ?). These unbelievers unacquainted ( $\llcorner\iota \omega \tau \alpha$ ) with Christianity will say that the Christians are raving mad (see on Ac 12:15; $26: 24$ ). They will seem like a congregation of lunatics.

1Cor 14:24
He is reproved by all ( $\varepsilon \lambda \varepsilon \gamma \chi \varepsilon \tau \alpha \cup \pi \circ \pi \alpha v \tau \omega v$ ). Old word for strong proof, is undergoing conviction.

Is judged (avaкрıveta). Is tested. Cf. 1Co 2:15; 4:3f .
1Cor 14:25
That God is among you indeed ( $o \tau \circ \nu \tau \omega \varsigma \varepsilon \nu \nu \mu \nu \nu \varepsilon \sigma \tau \nu v$ ). Recitative o $\tau$ and direct quotation from Isa 45:15 (Hebrew rather than the LXX). "Really (ov $\omega \omega$ Lu 24:34) God is in you."

1Cor 14:26
When ye come together ( $o \tau \alpha v \sigma v v \varepsilon \rho \chi \eta \sigma \theta \varepsilon$ ). Present middle subjunctive, repetition, whenever ye come together, in contrast with special case ( $\varepsilon \alpha v \sigma v v \varepsilon \lambda \theta \eta$, second aorist subjunctive) in verse 23.

1Cor 14:27
By two ( $\kappa \alpha \tau \alpha \delta v o$ ). According to two, ratio.
Or at most ( $\eta \tau 0 \pi \lambda \varepsilon \iota \sigma \tau 0 v$ ). Adverbial accusative, "or at the most."
Three ( $\tau \rho \varepsilon ı$ ). Kata to be repeated.
And that in turn ( $\kappa \alpha \propto \nu \alpha \mu \varepsilon \rho о \varsigma) . ~ O n e ~ a t ~ a ~ t i m e ~ a n d ~ n o t ~ o v e r ~ t h r e e ~ i n ~ a l l . ~$
1Cor 14:28
But if there be no interpreter ( $\varepsilon \alpha \nu \delta \varepsilon \mu \eta \eta \delta เ \varepsilon \rho \mu \eta v \varepsilon v \tau \eta \varsigma)$. Third class condition. Earliest known instance and possibly made by Paul from verb in verse 27. Reappears in Byzantine grammarians.

Keep silence in church ( $\sigma \iota \gamma \alpha \tau \omega \varepsilon \nu \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$ ). Linear action (present active imperative). He is not even to speak in a tongue once. He can indulge his private ecstasy with God.

1Cor 14:29
By two or three ( $\delta v o \eta \tau \rho \varepsilon \iota \varsigma)$. No ката here as in verse 27. Let two or three prophets speak.

Let the others discern (o $\alpha \lambda \lambda$ o $\delta \iota \alpha \kappa \rho \iota v \varepsilon \tau \omega \sigma \alpha \nu$ ). Whether what is said is really of the Spirit. Cf. 12:10 $\delta \iota \alpha \kappa \rho \iota \sigma \iota \varsigma \pi \nu \varepsilon \cup \mu \alpha \tau \omega v$.

1Cor 14:30

1Cor 14:31
One by one ( $\kappa \alpha \theta^{\prime} \varepsilon v \alpha$ ). Regular idiom.
1Cor 14:32
The spirits of the prophets are subject to the prophets ( $\pi \nu \varepsilon v \mu \alpha \tau \alpha \pi \rho \circ \varphi \eta \tau \omega \nu \pi \rho \circ \varphi \eta \tau \alpha ル$ $v \pi \sigma \tau \alpha \sigma \sigma \varepsilon \tau \alpha)$. A principle that some had forgotten.

1Cor 14:33
Not of confusion (ov--катабтaбıas). God is not a God of disorder, but of peace. We need this reminder today.

As in all the churches of the saints ( $\omega \varsigma \varepsilon v \pi \alpha \sigma \alpha \iota \varsigma \tau \alpha \iota \varsigma \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha \iota \varsigma \tau \omega v \alpha \gamma \iota \omega v$ ). Orderly reverence is a mark of the churches. This is a proper conclusion of his argument as in 11:16.

1Cor 14:34
Keep silence in the churches ( $\varepsilon v \tau \alpha \iota \varsigma ~ \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha ı \varsigma ~ \sigma \iota \gamma \alpha \tau \omega \sigma \alpha v$ ). The same verb used about the disorders caused by speakers in tongues (verse 28) and prophets (30). For some reason some of the women were creating disturbance in the public worship by their dress ( 11:2-16) and now by their speech. There is no doubt at all as to Paul's meaning here. In church the women are not allowed to speak ( $\lambda \alpha \lambda \varepsilon \iota v$ ) nor even to ask questions. They are to do that
at home $(\varepsilon v$ oık $\omega)$. He calls it a shame ( $\alpha \iota \sigma \chi \rho o v$ ) as in 11:6 (cf. Eph 5:12; Tit 1:11). Certainly women are still in subjection (v $\frac{\pi}{} \boldsymbol{\tau} \alpha \sigma \sigma \varepsilon \sigma \theta \omega \sigma \alpha v$ ) to their husbands (or ought to be). But somehow modern Christians have concluded that Paul's commands on this subject, even 1 Ti 2:12, were meant for specific conditions that do not apply wholly now. Women do most of the teaching in our Sunday schools today. It is not easy to draw the line. The daughters of Philip were prophetesses. It seems clear that we need to be patient with each other as we try to understand Paul's real meaning here.

1Cor 14:37
The commandment of the Lord (Kvpıov $\varepsilon v \tau \sigma \lambda \eta$ ). The prophet or the one with the gift of tongues or the disturbing woman would be quick to resent the sharp words of Paul. He claims inspiration for his position.

1Cor 14:40
Decently and in order ( $\varepsilon v \sigma \chi \eta \mu \circ \nu \omega \varsigma \kappa \alpha \kappa \alpha \tau \alpha \tau \alpha \xi \iota v)$. That is surely a good rule for all matters of church life and worship. It applies also to the function of women in church service.

## 1 Corinthians 15

1Cor 15:1
I make known ( $\gamma \nu \omega \rho \iota \zeta \omega$ ). See on 12:3 for this common verb. As if in reproach.
 accusative, "the gospel which I gospelized unto you." Note augment $\eta$ after $\varepsilon v$ - like compound verb with preposition. Note repetition of relative ( $\mathrm{o}, \varepsilon v \omega \mathrm{~L}, \delta \mathrm{ov}$, and $\tau \iota v$ like relative) without ка (and), asyndeton.

1Cor 15:2
In what words I preached it unto you ( $\tau \iota \nu \lambda o \gamma o \varepsilon v \eta \gamma \gamma \varepsilon \lambda \iota \sigma \alpha \mu \eta \nu \cup \mu \nu v$ ). Almost certainly тıc ( $\tau ı v$ doүo, locative or instrumental, in or with) here is used like the relative os as is common in papyri (Moulton, Prolegomena, p. 93f.; Robertson, Grammar, p. 737f.). Even so it is not clear whether the clause depends on $\gamma v \omega \rho \iota \zeta \omega$ like the other relatives, but most likely so.

If we hold it fast ( $\varepsilon$ катєұєтع). Condition of first class. Paul assumes that they are holding it fast.

Except ye believed in vain ( $\varepsilon \kappa \tau о \varsigma ~ \varepsilon \mu \eta \varepsilon є \kappa \eta \varepsilon \pi ા \sigma \tau \varepsilon \cup \sigma \alpha \tau \varepsilon$ ). For $\varepsilon \kappa \tau о \varsigma ~ \varepsilon \mu \eta$ see on 14:5. Condition of first class, unless in fact ye did believe to no purpose ( $\varepsilon$ ккๆ, old adverb, only in Paul in N.T.). Paul holds this peril over them in their temptation to deny the resurrection.

1Cor 15:3
First of all ( $\varepsilon v \pi \rho \omega \tau 0 \iota \varsigma)$. Among first things. In primis. Not to time, but to importance.
Which I also received (о ка $\pi \alpha \rho \varepsilon \lambda \alpha \beta o v$ ). Direct revelation claimed as about the institution of the Lord's Supper ( $11: 23$ ) and same verbs used ( $\pi \alpha \rho \varepsilon \delta \omega \kappa \alpha, \pi \alpha \rho \varepsilon \lambda \alpha \beta o v)$. Four items given by Paul in explaining "the gospel" which Paul preached. Stanley calls it (verses 1-11) the creed of the early disciples, but "rather a sample of the exact form of the apostle's early teaching, than a profession of faith on the part of converts" (Vincent). The four items are presented by four verbs (died, $\alpha \pi \varepsilon \theta \alpha v \varepsilon v$, was buried, $\varepsilon \tau \alpha \varphi \eta$, hath been raised, $\varepsilon \gamma \eta \gamma \varepsilon \rho \tau \alpha$, appeared, $\omega \varphi \theta \eta$ ).

Christ died (X $\propto\llcorner\sigma \tau о \varsigma ~ a \pi \varepsilon Ө \alpha v \varepsilon v)$. Historical fact and crucial event.
For our sins (v $\quad \varepsilon \rho \rho \tau \nu \alpha \mu \alpha \rho \tau \iota \omega v \eta \mu \omega v$ ). Hu $\tau \varepsilon \rho$ means literally over, in behalf, even instead of ( $\mathrm{Ga} 3: 13$ ), where used of persons. But here much in the sense of $\pi \varepsilon \rho(\mathrm{Ga} 1: 14)$ as is common in Koine. In 1Pe 3:18 we have $\pi \varepsilon \rho \alpha \mu \alpha \rho \tau \iota \omega v$, v $\tau \varepsilon \rho \alpha \delta \iota \kappa \omega v$.

According to the Scriptures (ката таৎ $ү \rho \alpha \varphi \alpha \varsigma)$. As Jesus showed (Lu 22:37; 24:25) and as Peter pointed out (Ac 2:25-27; 3:35) and as Paul had done (Ac 13:24f.; 17:3 ). Cf. Ro 1:2f. .

1Cor 15:4

And that he was buried ( $\kappa \alpha$ о $\tau \tau \alpha \varphi \eta$ ). Note ot repeated before each of the four verbs as a separate item. Second aorist passive indicative of $\theta \alpha \pi \tau \omega$, old verb, to bury. This item is an important detail as the Gospels show.

And that he hath been raised ( $\kappa \alpha$ о $\tau \varepsilon \eta \eta \varepsilon \rho \tau \alpha$ ). Perfect passive indicative, not $\eta \gamma \varepsilon \rho \theta \eta$ like
rose of the King James' Version. There is reason for this sudden change of tense. Paul wishes to emphasize the permanence of the resurrection of Jesus. He is still risen.

On the third day ( $\tau \eta \eta \mu \varepsilon \rho \alpha \tau \eta \tau \rho \tau \eta$ ). Locative case of time. Whether Paul had seen either of the Gospels we do not know, but this item is closely identified with the fact of Christ's resurrection. We have it in Peter's speech (Ac 10:40) and Jesus points it out as part of prophecy ( Lu 24:46). The other expression occasionally found "after three days" (Mr 10:34 ) is merely free vernacular for the same idea and not even Mt 12:40 disturbs it. See on Lu 24:1 for record of the empty tomb on the first day of the week (the third day).

1Cor 15:5
And that he appeared to Cephas ( $\kappa \alpha$ от $\omega \varphi \theta \eta К \eta \varphi \alpha$ ). First aorist passive indicative of the defective verb opa $\omega$, to see. Paul means not a mere "vision," but actual appearance. John uses $\varepsilon \varphi \alpha v \varepsilon \rho \omega \theta \eta$ (Joh 21:14) from $\varphi \alpha v \varepsilon \rho o \omega$, to make manifest, of Christ's appearance to the seven by the Sea of Galilee. Peter was listed first ( $\pi \rho \omega \tau \sigma$ ) among the Apostles (Mt 10:2 ). Jesus had sent a special message to him (Mr 16:7) after his resurrection. This special appearance to Peter is made the determining factor in the joyful faith of the disciples (Lu 24:34 ), though mentioned incidentally here. Paul had told all these four facts to the Corinthians in his preaching. He gives further proof of the fact of Christ's resurrection. There are ten appearances given besides the one to Paul. Nine are in the Gospels (Mary Magdalene in John and Mark, the other women in Matthew, the two going to Emmaus in Luke, Simon Peter in Luke and I Corinthians, the ten apostles and others in Luke and John and Mark, the eleven and others in John, the seven by the sea in John, to over five hundred in Galilee in Matthew and Paul and Mark, to the apostles in Jerusalem in Luke and Mark and Acts and I Corinthians) and one in I Corinthians above (to James). It will be seen that Paul mentions only five of the ten, one, that to James, not given elsewhere. What he gives is conclusive evidence of the fact, particularly when re-enforced by his own experience (the sixth appearance mentioned by Paul). The way to prove this great fact is to start with Paul's own witness given in this undoubted Epistle. The natural way to understand Paul's adverbs of time here is chronological:
then ( $\varepsilon \iota \tau \alpha$ ),
then ( $\varepsilon \pi \varepsilon \iota \tau \alpha$ ),
then ( $\varepsilon \pi \varepsilon \iota \tau \alpha$ ),
then ( $\varepsilon \iota \tau \alpha$ ),
last of all ( $\varepsilon \sigma \chi \alpha \tau 0 \nu \pi \alpha \nu \tau \omega v$ ).

To the twelve (тоı $\delta \omega \delta \varepsilon \kappa \alpha$ ). The technical name. Only ten were present, for Judas was dead and Thomas was absent (Joh 20:24).

1Cor 15:6
To above five hundred brethren at once ( $\varepsilon \pi \alpha v \omega \pi \varepsilon \nu \tau \alpha \kappa о \sigma \circ \iota \varsigma ~ \alpha \delta \varepsilon \lambda \varphi о « \varsigma \varphi \alpha \pi \alpha \xi$ ). E $\pi \alpha v \omega$ here is just an adverb with no effect on the case. As a preposition with the ablative see Mt 5:14. This incident is the one described in Mt 28:16 the prearranged meeting on the mountain in Galilee. The strength of this witness lies in the fact that the majority (o $\pi \lambda \varepsilon \iota o v \varsigma$ ) of them were still living when Paul wrote this Epistle, say spring of A.D. 54 or 55, not over 25 years after Christ's resurrection.

1Cor 15:7
To James $(\operatorname{Ia\kappa } \kappa \omega \beta \omega)$. The brother of the Lord. This fact explains the presence of the brothers of Jesus in the upper room (Ac 1:14).

To all the apostles (тоぃ $\alpha \pi о \sigma \tau о \lambda о \iota \varsigma ~ \pi а \sigma ı v) . ~ T h e ~ A s c e n s i o n ~ o f ~ C h r i s t ~ f r o m ~ O l i v e t . ~$
1Cor 15:8
As unto one born out of due time ( $\omega \sigma \pi \varepsilon \rho \varepsilon \tau \omega \varepsilon \kappa \tau \rho \omega \mu \alpha \tau$ ). Literally, as to the miscarriage (or untimely birth). Word first occurs in Aristotle for abortion or miscarriage and occurs in LXX ( Nu 12:12; Job 3:16 ) and papyri (for miscarriage by accident). The verb $\tau \iota \tau \omega \sigma \kappa \omega$ means to wound and $\varepsilon \kappa$ is out. Paul means that the appearance to him came after Jesus had ascended to heaven.

1Cor 15:9
The least (o $\varepsilon \lambda \alpha \chi$ เбтоৎ). True superlative, not elative. Explanation of the strong word $\varepsilon \kappa \tau \rho \omega \mu \alpha$ just used. See Eph 3:8 where he calls himself "less than the least of all saints" and 1Ti 1:15 the "chief" ( $\pi \rho \omega \tau 0 \varsigma)$ of sinners. Yet under attack from the Judaizers Paul stood up for his rank as equal to any apostle (2Co 11:5f.,23).

Because I persecuted the church of God ( $\varepsilon \delta \omega \omega \xi \alpha \tau \eta \nu \varepsilon \kappa \kappa \lambda \eta \sigma \omega \alpha \nu$ tov $\theta \varepsilon o v)$. There were times when this terrible fact confronted Paul like a nightmare. Who does not understand this mood of contrition?

1Cor 15:10
What I am (o $\varepsilon \mu)$. Not,
who (oc), but
what (o), neuter singular. His actual character and attainments. All "by the grace of God" ( $\chi$ 人pıт $\theta \varepsilon o v$ ).

I laboured more abundantly than they all ( $\pi \varepsilon \rho เ \sigma \sigma о \tau \varepsilon \rho \circ \vee \alpha \nu \tau \omega \nu \pi \alpha \nu \tau \omega \nu \varepsilon \kappa о \pi \iota \alpha \sigma \alpha$ ). This is sober fact as shown by the Acts and Paul's Epistles. He had tremendous energy and used it. Genius is work, Carlyle said. Take Paul as a specimen.

1Cor 15:11

So we preach, and so ye believed ( $\circ v \tau \omega \varsigma \kappa \eta \rho v \sigma \sigma о \mu \varepsilon \nu$, $\kappa \alpha$ ov $\quad \omega \varsigma \varepsilon \pi \iota \sigma \tau \varepsilon v \sigma \alpha \tau \varepsilon$ ). This is what matters both for preacher and hearers. This is Paul's gospel. Their conduct in response to his message was on record.

1Cor 15:12
Is preached ( $\kappa \eta \rho \cup \sigma \sigma \varepsilon \tau \alpha$ ). Personal use of the verb, Christ is preached.
How say some among you? ( $\pi \omega \varsigma \lambda \varepsilon \gamma 0 v \sigma \iota v \varepsilon v \nu \mu \nu v \tau \iota v \varepsilon \sigma$ ?). The question springs naturally from the proof of the fact of the resurrection of Christ (verses 1-11) and the continual preaching which Paul here assumes by condition of the first class ( $\varepsilon เ--\kappa \eta \rho v \sigma \sigma \varepsilon \tau \alpha)$. There were sceptics in Corinth, possibly in the church, who denied the resurrection of dead people just as some men today deny that miracles happen or ever did happen. Paul's answer is the resurrection of Christ as a fact. It all turns on this fact.

1Cor 15:13
Neither hath Christ been raised (ov $\delta \varepsilon$ X $1 \sigma \tau \tau \varsigma \varepsilon\lceil\eta \gamma \varepsilon \rho \tau \alpha$ ). He turns the argument round with tremendous force. But it is fair.

1Cor 15:14
Vain (кعvov). Inanis, Vulgate. Old word, empty. Both Paul's preaching and their faith are empty if Christ has not been raised. If the sceptics refuse to believe the fact of Christ's resurrection, they have nothing to stand on.

1Cor 15:15
False witnesses of God ( $\psi \varepsilon v \delta о \mu \alpha \rho \tau v \rho \varepsilon \varsigma ~ \tau o v ~ \theta \varepsilon o v)$. Late word, but $\psi \varepsilon v \delta о \mu \alpha \rho \tau v \rho \varepsilon \omega$, to bear false witness, old and common. The genitive ( $\mathfrak{\text { rov }} \theta$ rov) can be either subjective (in God's service) or objective (concerning God). Either makes good sense.

Because we witnessed of God (от єцартvрๆбацєv ката тоv $\theta \varepsilon о v$ ). Vulgate has adversus Deum. This is the more natural way to take ката and genitive,
against God not as equal to $\pi \varepsilon \rho$ (concerning). He would indeed make God play false in that case,
if so be that the dead are not raised ( $\varepsilon ı \varepsilon \rho \rho \rho \alpha$ vєкро оик $\varepsilon \gamma \varepsilon \rho \rho \circ \nu \tau \alpha)$. Condition of first class, assumed as true. Note both $\pi \varepsilon \rho$ intensive particle
indeed and $\alpha \rho \alpha$ inferential particle
therefore .
1Cor 15:16
Repeats the position already taken in verse 13 .
1Cor 15:17
Vain ( $\mu \alpha \tau \alpha \iota \alpha$ ). Old word from adverb $\mu \alpha \tau \eta v$ (Mt 15:9), devoid of truth, a lie. Stronger word than $\kappa \varepsilon v o v$ in verse 14.

Ye are yet in your sins ( $\varepsilon \tau \varepsilon \sigma \tau \varepsilon \varepsilon \nu \tau \alpha \iota \varsigma ~ \alpha \mu \alpha \rho \tau \iota \alpha ı \varsigma ~ v \mu \omega v$ ). Because the death of Christ has no atoning value if he did not rise from the dead. In that case he was only a man like other men and did not die for our sins (verse 3).

1Cor 15:18
Then also ( $\alpha \rho \alpha \kappa \alpha$ ). Inevitable inference.
Have perished ( $\alpha \pi \omega \lambda o v \tau o$ ). Did perish. Second aorist middle indicative of $\alpha \pi \sigma \lambda \lambda \nu \mu$, to destroy, middle, to perish (delivered up to eternal misery). Cf. 8:11.

1Cor 15:19
We have hoped ( $\eta \lambda \pi \kappa \kappa о \tau \varepsilon \varsigma \varepsilon \sigma \mu \varepsilon v$ ). Periphrastic perfect active indicative. Hope limited to this life even if "in Christ."

Only ( $\mu \mathrm{ovov}$ ) qualifies the whole clause.
Most pitiable ( $\varepsilon \lambda \varepsilon \varepsilon \iota v o \tau \varepsilon \rho o$ ). Comparative form, not superlative, of old adjective $\varepsilon \lambda \varepsilon \varepsilon เ v o \varsigma$, to be pitied, pitiable. If our hope is limited to this life, we have denied ourselves what people call pleasures and have no happiness beyond. The Epicureans have the argument on us. Paul makes morality turn on the hope of immortality. Is he not right? Witness the breaking of moral ties today when people take a merely animal view of life.

1Cor 15:20
But now ( $v v \nu \delta \varepsilon$ ). Emphatic form of $v v \nu$ with - added (cf. 12:18). It is the logical triumph of Paul after the reductio ad impossibile (Findlay) of the preceding argument.

The first-fruits ( $\alpha \pi \alpha \rho \chi \eta$ ). Old word from $\alpha \pi \alpha \rho \chi \circ \mu \alpha$, to offer firstlings or first-fruits. In LXX for first-fruits. In papyri for legacy-duty, entrance-fee, and also first-fruits as here. See also verse 23; 16:15; Ro 8:23, etc. Christ is "first-born from the dead" (Col 1:18). Others raised from the dead died again, but not so Jesus.

That sleep ( $\tau \omega \nu \kappa \varepsilon \kappa о \iota \eta \mu \varepsilon \nu \omega \nu$ ). Perfect middle participle as in Mt 27:52 which see. Beautiful picture of death from which word ( $\kappa о \mu \alpha \circ \mu \alpha$ ) comes our $\chi \varepsilon \mu \varepsilon \tau \varepsilon \rho \psi$.

1Cor 15:21
By man also ( $\delta \alpha \delta \iota^{\prime} \alpha \nu \theta \rho \omega \pi \sigma$ ). That is Jesus, the God-man, the Second Adam (Ro 5:12 ). The hope of the resurrection of the dead rests in Christ.

1Cor 15:22
Shall be made alive $\left(\zeta \omega о \pi о \_\eta \eta \sigma \sigma \nu \tau \alpha\right)$. First future passive indicative of $\zeta \omega 0 \pi о \iota \varepsilon \omega$, late verb (Aristotle) to give life, to restore to life as here. In verse $36 \zeta \omega 0 \pi о \iota \varepsilon \iota \tau \alpha$ is used in the sense of natural life as in Joh $5: 21 ; 6: 63$ of spiritual life. It is not easy to catch Paul's thought here. He means resurrection (restoration) by the verb here, but not necessarily eternal life or salvation. So also $\pi \alpha \nu \tau \varepsilon \varsigma$ may not coincide in both clauses. All who die die in Adam, all who will be made alive will be made alive (restored to life) in Christ. The same problem occurs in Ro 5:18 about "all," and in verse 19 about "the many."

1Cor 15:23
Order ( $\tau \alpha \gamma \mu \alpha \tau$ ). Old military term from $\tau \alpha \sigma \sigma \omega$, to arrange, here only in N.T. Each in his own division, troop, rank.

At his coming ( $\varepsilon \nu \tau \eta \pi \alpha \rho o v \sigma \iota \alpha$ ). The word $\pi \alpha \rho o v \sigma \iota \alpha$ was the technical word "for the arrival or visit of the king or emperor" and can be traced from the Ptolemaic period into
the second century A.D. (Deissmann, Light from the Ancient East, p. 368). "Advent-coins were struck after a parousia of the emperor." Paul is only discussing "those that are Christ's" (3:23; Ga 5:24) and so says nothing about judgment (cf. 1Th 2:19; 3:13; 4:15; 5:23 ).

1Cor 15:24
Then cometh the end ( $\varepsilon \iota \tau \alpha$ тo $\tau \varepsilon \lambda o \varsigma)$. No verb $\gamma \iota v \varepsilon \tau \alpha$ in the Greek. Supply "at his coming," the end or consummation of the age or world (Mt 13:39,49; 1Pe 4:7),

When he shall deliver up (o $\tau \alpha v \pi \alpha \rho \alpha \delta \iota \delta \omega$ ). Present active subjunctive (not optative) of $\pi \alpha \rho \alpha \delta เ \delta \omega \mu$ with o $\tau \alpha \nu$, whenever, and so quite indefinite and uncertain as to time. Present subjunctive rather than aorist $\pi \alpha \rho \alpha \delta \omega$ because it pictures a future proceeding.

To God, even the Father ( $\tau \omega \theta \varepsilon \omega \kappa \alpha \pi \alpha \tau \rho$ ). Better, "to the God and Father" or to "His God and Father." The Kingdom belongs to the Father.

When he shall have abolished ( $о \tau \alpha \nu \kappa \alpha \tau \alpha \rho \gamma \eta \sigma \eta$ ). First aorist active subjunctive with otav, indefinite future time. Simply, "whenever he shall abolish," no use in making it future perfect, merely aorist subjunctive. On $\kappa \alpha \tau \alpha \rho \gamma \varepsilon \omega$ see 1 Co 6:13; 13:8,10,11 .

Rule ( $\alpha \rho \chi \eta \nu$ ),
authority ( $\varepsilon \xi$ ovoıav),
power $(\delta v v a \mu \nu v)$. All forms of power opposing the will of God. Constative aorist tense covering the whole period of conflict with final victory as climax.

1Cor 15:25
Till he hath put ( $\alpha \chi \rho$ ov $\theta \eta$ ). Second aorist active subjunctive of $\tau \iota \theta \eta \mu$, "till he put" (no sense in saying "hath put," merely effective aorist tense for climax. A $\chi \rho$ (ov), $\mu \varepsilon \chi \rho(o v), \varepsilon \omega \varsigma$ (ov) all are used for the same idea of indefinite future time.

1Cor 15:26
The last enemy that shall be abolished is death ( $\varepsilon \sigma \chi \alpha \tau \circ \varsigma \varepsilon \chi$ Өоৎ кат $\alpha \rho \gamma \varepsilon \tau \tau \alpha$ о $\theta \alpha \nu \alpha \tau о \varsigma)$. A rather free translation. Literally, "death (note article, and so subject) is done away (prophetic or futuristic use of present tense of same verb as in verse 24), the last enemy" (predicate and only one "last" and so no article as in 1Jo 2:18 ).

1Cor 15:27
He put (vлєт $\xi \varepsilon \varepsilon$ ). First aorist active of $v \pi \sigma \tau \alpha \sigma \sigma \omega$, to subject. Supply God ( $\theta \varepsilon \sigma \varsigma$ ) as subject (Ps 8:7 ). See Heb 2:5-9 for similar use. Cf. Ps 8 .

But when he saith (otav $\delta \varepsilon \varepsilon \iota \pi \eta$ ). Here Christ must be supplied as the subject if the reference is to his future and final triumph. The syntax more naturally calls for God as the subject as before. Either way makes sense. But there is no need to take $\varepsilon \iota \pi \eta$ (second aorist active subjunctive) as a futurum exactum, merely "whenever he shall say."

Are put in subjection (v $\tau о \tau \varepsilon \tau \alpha \kappa \tau \alpha)$. Perfect passive indicative, state of completion, final triumph.

It is evident that ( $\delta \eta \lambda \circ \vee \circ \tau$ ). Supply $\varepsilon \sigma \tau \iota v$ (is) before o $\sigma$.
 did subject (articular aorist active participle) the all things to him (Christ)."

1Cor 15:28
And when all things have been subjected (o $\tau \alpha v \delta \varepsilon v \pi о \tau \alpha \gamma \eta \tau \alpha \pi \alpha v \tau \alpha$ ). Second aorist passive subjunctive of $v \pi о \tau \alpha \sigma \sigma \omega$, not perfect. Merely, "when the all things are subjected unto him." The aorist subjunctive has given translators a deal of needless trouble in this passage. It is prophecy, of course.

That God may be all in all ( $\imath v \alpha \eta$ o $\theta \varepsilon \circ \varsigma \pi \alpha v \tau \alpha \varepsilon v \pi \alpha \sigma เ v$ ). The final goal of all God's redemptive plans as Paul has so well said in Ro 11:36. Precisely this language Paul will use of Christ (Col 3:11).

1Cor 15:29
Else ( $\varepsilon \pi \varepsilon$ ). Otherwise, if not true. On this use of $\varepsilon \pi \varepsilon$ with ellipsis see on 5:10; 7:14.
Which are baptized for the dead (o $\beta \alpha \pi \tau \iota \zeta о \mu \varepsilon v o ~ v \pi \varepsilon \rho \tau \omega v \nu \varepsilon \kappa \rho \omega v$ ). This passage remains a puzzle. Stanley gives thirteen interpretations, no one of which may be correct. Over thirty have been suggested. The Greek expositors took it to be about the dead ( $v \pi \varepsilon \rho$ in sense of $\pi \varepsilon \rho$ as often as in 2Co 1:6) since baptism is a burial and a resurrection (Ro 6:2-6). Tertullian tells of some heretics who took it to mean baptized in the place of dead people (unsaved) in order to save them. Some take it to be baptism over the dead. Others take it to mean that Paul and others were in peril of death as shown by baptism (see verse 30).

At all ( $\mathrm{o} \lambda \omega \varsigma$ ). See on 5:1.
1Cor 15:30
Why do we also stand in jeopardy every hour? ( $\tau \kappa \alpha \eta \mu \varepsilon \iota \varsigma \kappa ı v \delta \nu v \varepsilon v o \mu \varepsilon v \pi \alpha \sigma \alpha v \omega \rho \alpha v$ ?). We also as well as those who receive baptism which symbolizes death. Old verb from $\kappa$ кıvovoc (peril, danger), in N.T. only here and Lu 8:23 . Paul's Epistles and Acts (especially chapter Ac 19 ) throw light on Paul's argument. He was never out of danger from Damascus to the last visit to Rome. There are perils in Ephesus of which we do not know (2Co 1:8f.) whatever may be true as to an Ephesian imprisonment. G. S. Duncan (St. Paul's Ephesian Ministry, 1930) even argues for several imprisonments in Ephesus. The accusative of time ( $\pi \alpha \sigma \alpha v$ $\omega \rho \alpha v)$ naturally means all through every hour (extension).

1Cor 15:31
I protest by that glorying in you ( $\nu \eta \tau \eta v \nu \mu \varepsilon \tau \varepsilon \rho \alpha v \kappa \alpha v \chi \eta \sigma เ \nu$ ). No word for "I protest." Paul takes solemn oath by the use of $v \eta$ (common in Attic) with the accusative. Only here in N.T., but in LXX (Ge 42:15f. ). For other solemn oaths by Paul see 2Co 1:18,23; 11:10f.,31; Ro 9:1 . For каuхПбıц see on 1Th 2:19. The possessive pronoun (v $\varepsilon \mu \eta \nu$ in 1Co 11:24.

I die daily ( $\kappa \alpha \theta^{\prime} \eta \mu \varepsilon \rho \alpha v ~ \alpha \pi о \theta v \eta \sigma \kappa \omega$ ). I am in daily peril of death (2Co 4:11; 11:23; Ro 8:36).

1Cor 15:32

After the manner of men ( $\kappa \alpha \tau \alpha \alpha v \theta \rho \omega \pi \sigma v$ ). Like men, for applause, money, etc. (4:9ff.; Php 3:7).

If I fought with wild beasts at Ephesus ( $\varepsilon \varepsilon \theta \eta \rho \circ \rho \mu \chi \eta \sigma \alpha \varepsilon v \mathrm{E} \varphi \varepsilon \sigma \omega$ ). Late verb from Өnpıoнахос, a fighter with wild beasts. Found in inscriptions and in Ignatius. Those who argue for an Ephesian imprisonment for Paul and Ephesus as the place where he wrote the imprisonment epistles (see Duncan's book just mentioned) take the verb literally. There is in the ruins of Ephesus now a place called St. Paul's Prison. But Paul was a Roman citizen and it was unlawful to make such a one be a $\theta$ пpıo $\mu \alpha$ о $\varsigma$. If he were cast to the lions unlawfully, he could have prevented it by claiming his citizenship. Besides, shortly after this Paul wrote II Corinthians, but he does not mention so unusual a peril in the list in 2Co 11:23f . The incident, whatever it was, whether literal or figurative language, took place before Paul wrote I Corinthians.

What doth it profit me? ( $\tau$ но то оф $\varepsilon \lambda о \sigma$ ?). What the profit to me?
Let us eat and drink ( $\varphi \alpha \gamma \omega \mu \varepsilon \nu \kappa \alpha \pi \iota \omega \mu \varepsilon v$ ). Volitive second aorist subjunctives of $\varepsilon \sigma \theta \iota \omega$ and $\pi \imath v \omega$. Cited from Isa 22:13. It is the outcry of the people of Jerusalem during the siege of Jerusalem by the Assyrians. At Anchiale near Tarsus is a statue of Sardanapalus with the inscription: "Eat, drink, enjoy thyself. The rest is nothing." This was the motto of the Epicureans. Paul is not giving his own view, but that of people who deny the resurrection.

1Cor 15:33
Be not deceived ( $\mu \eta \pi \lambda \alpha v \alpha \sigma \theta \varepsilon$ ). Do not be led astray ( $\pi \lambda \alpha v \alpha \omega$ ) by such a false philosophy of life.

Evil company ( $о \boldsymbol{\lambda} \lambda \iota \alpha \kappa \alpha \kappa \alpha)$. Evil companionships. Old word, o $\mu \lambda \lambda \alpha$, from $о \mu \lambda \lambda о \varsigma$ (a crowd, gang, bunch). Only here in N.T. Good manners ( $\eta \theta \eta$ ). Old word (kin to $\varepsilon \theta$ oc) custom, usage, morals. Good morals here. This line of poetry (iambic) occurs in Menander. It may be a current proverb. Paul could have gotten it from either source.

1Cor 15:34
Awake up righteously ( $\varepsilon \kappa \vee \eta \psi \alpha \tau \varepsilon \delta \iota \kappa \alpha \iota \omega \varsigma)$. Wake up as if from drunkenness. Екv $\eta \omega$, only here in N.T. sin not ( $\mu \eta$ а $\mu \alpha \rho \tau \alpha v \varepsilon \tau \varepsilon$ ). Stop sinning.

No knowledge of God ( $\alpha \gamma v \omega \sigma \omega \alpha v \operatorname{\theta cov}$ ). Old word for ignorance, in N.T. only here and 1 Pe 2:15. Ignorance of God, agnosticism. Some today (agnostics) even take pride in it instead of shame ( $\varepsilon \nu \tau \rho о \pi \eta \nu$, turning in on oneself). See on 6:5 for $\varepsilon \nu \tau \rho \circ \pi \eta$.

1Cor 15:35
But some one will say ( $\alpha \lambda \lambda \alpha \varepsilon \rho \varepsilon \tau \iota \varsigma)$. Paul knows what the sceptics were saying. He is a master at putting the standpoint of the imaginary adversary.

How ( $\pi \omega \varsigma$ ). This is still the great objection to the resurrection of our bodies. Granted that Jesus rose from the dead, for the sake of argument, these sceptics refuse to believe in the possibility of our resurrection. It is the attitude of Matthew Arnold who said, "Miracles do not happen." Scientifically we know the "how" of few things. Paul has an astounding an-
swer to this objection. Death itself is the way of resurrection as in the death of the seed for the new plant (verses 36f. ).

With what manner of body ( $\pi \sigma \omega \omega \omega \mu \alpha \tau$ ). This is the second question which makes plainer the difficulty of the first. The first body perishes. Will that body be raised? Paul treats this problem more at length (verses $38-54$ ) and by analogy of nature (Cf. Butler's famous Analogy). It is a spiritual, not a natural, body that is raised. $\Sigma \omega \mu \alpha$ here is an organism.

Flesh $(\sigma \alpha \rho \xi)$ is the $\sigma \omega \mu \alpha$ for the natural man, but there is spiritual ( $\pi v \varepsilon \nu \mu \alpha \tau \iota \kappa o v) \sigma \omega \mu \alpha$ for the resurrection.

1Cor 15:36
Thou foolish one ( $\alpha \varphi \rho \omega v$ ). Old word ( $\alpha$ privative, $\varphi \rho \eta \nu$ ), lack of sense. It is a severe term and justified by the implication "that the objector plumes himself on his acuteness" (Robertson and Plummer). Proleptic position of $\sigma v$ (thou) sharpens the point. Sceptics (agnostics) pose as unusually intellectual (the intelligentsia), but the pose does not make one intelligent.

Except it die ( $\varepsilon \alpha \vee \mu \eta \alpha \pi o \theta \alpha v \eta)$. Condition of third class, possibility assumed. This is the answer to the "how" question. In plant life death precedes life, death of the seed and then the new plant.

1Cor 15:37
Not the body which shall be (ov to $\sigma \omega \mu \alpha$ тo $\gamma \varepsilon v \eta \sigma o \mu \varepsilon v o v$ ). Articular future participle of $\gamma \iota v o \mu \alpha$, literally, "not the body that will become." The new
body ( $\sigma \omega \mu \alpha$ ) is not yet in existence, but only the seed (коккоऽ, grain, old word, as in Mt 13:31).

It may chance ( $\varepsilon$ тטХo). Fourth class condition as in $14: 10$ which see. Paul is rich in metaphors here, though usually not so (Howson, Metaphors of St. Paul). Paul was a city man. We sow seeds, not plants (bodies). The butterfly comes out of the dying worm.

1Cor 15:38
A body of its own ( $\delta$ oov $\sigma \omega \mu \alpha$ ). Even under the microscope the life cells or germ plasm may seem almost identical, but the plant is quite distinct. On $\sigma \pi \varepsilon \rho \mu \alpha$, seed, old word from $\sigma \pi \varepsilon!\rho \omega$, to sow, see on Mt 13:24f.

1Cor 15:39
The same flesh ( $\eta \alpha \cup \tau \eta \sigma \alpha \rho \xi$ ). Paul takes up animal life to show the great variety there is as in the plant kingdom. Even if evolution should prove to be true, Paul's argument remains valid. Variety exists along with kinship. Progress is shown in the different kingdoms, progress that even argues for a spiritual body after the body of flesh is lost.

Of beasts ( $\kappa \tau \eta v \omega v$ ). Old word, from $\kappa \tau \alpha o \mu \alpha$, to possess, and so property. See Lu 10:34
Of birds ( $\pi \tau \eta \nu \omega \nu$ ). Old word from $\pi \varepsilon \tau \sigma \mu \alpha$, to fly, winged, flying. Only here in N.T.
1Cor 15:40

Celestial ( $\varepsilon \pi o u \rho a v i \alpha)$. Old word, from $\varepsilon \pi$, upon, oupavo $\varsigma$, heaven, existing in heaven. Paul now rises higher in the range of his argument, above the merely
terrestrial ( $\varepsilon \pi \iota \gamma \varepsilon \iota \alpha$, upon earth, $\varepsilon \pi \iota, \gamma \varepsilon$ ) bodies. He has shown differences in the bodies here on earth in plants and in the animal kingdom and now he indicates like differences to be seen in the heavens above us.

Is one ( $\varepsilon \tau \varepsilon \rho \alpha \mu \varepsilon v$ )
--is another ( $\varepsilon \tau \varepsilon \rho \alpha \delta \varepsilon$ ). Antithesis that admits glory for bodies on earth and bodies in the heavens. Experience does not argue against a glory for the spiritual body (Php 3:21 ).

1Cor 15:41
For one star differeth from another star in glory ( $\alpha \sigma \tau \eta \rho \gamma \alpha \rho \alpha \sigma \tau \varepsilon \rho \circ \varsigma \delta \iota \alpha \varphi \varepsilon \varepsilon \varepsilon v$ $\delta o \xi \eta$ ). A beautiful illustration of Paul's point. A $\sigma \tau \varepsilon \rho o \varsigma$ is the ablative case after $\delta \iota \alpha \varphi \varepsilon \rho \varepsilon$ (old verb $\delta ı \alpha \varphi \varepsilon \rho \omega$, Latin differo, our differ, bear apart). On $\alpha \sigma \tau \eta \rho$ see Mt 2:7 and $\alpha \sigma \tau \rho o v$ Lu 21:25. Stars differ in magnitude and brilliancy. The telescope has added more force to Paul's argument.

In glory $(\varepsilon v \delta o \xi \eta)$. Old word from $\delta o \kappa \varepsilon \omega$, to think, to seem. So opinion, estimate, then the shekinah glory of God in the LXX, glory in general. It is one of the great words of the N.T. Jesus is termed the glory in Jas 2:1 .

1Cor 15:42
So is the resurrection of the dead ( $\sigma \tau \tau \omega \varsigma \kappa \alpha \eta \alpha v \alpha \sigma \tau \alpha \sigma \iota \varsigma \tau \omega v \nu \varepsilon \kappa \rho \omega v$ ). Paul now applies his illustrations to his argument to prove the kind of body we shall have after the resurrection. He does it by a series of marvellous contrasts that gather all his points. The earthly and the risen beings differ in duration, value, power (Wendt).

It is sown ( $\sigma \pi \varepsilon \rho \varepsilon \tau \alpha)$. In death, like the seed ( 37 ).
In incorruption ( $\varepsilon v \alpha \varphi \theta \alpha \rho \sigma ı \alpha$ ). Late word from $\alpha$ privative and $\varphi \theta \varepsilon \iota \rho \omega$, to corrupt. In LXX, Plutarch, Philo, late papyrus of a Gnostic gospel, and quotation from Epicurus. Vulgate incorruptio. The resurrection body has undergone a complete change as compared with the body of flesh like the plant from the seed. It is related to it, but it is a different body of glory.

1Cor 15:43
In weakness ( $\varepsilon v a \sigma \theta \varepsilon v \varepsilon ı \alpha)$. Lack of strength as shown in the victory of death.
In power ( $\varepsilon v \delta u v a \mu \varepsilon)$. Death can never conquer this new body, "conformed to the body of His glory" (Php 3:21 ).

1Cor 15:44
A natural body ( $\sigma \omega \mu \alpha \psi v \chi \not \kappa \sigma v$ ). See on 2:14 for this word, a difficult one to translate since $\psi v \times \eta$ has so many meanings. Natural is probably as good a rendering as can be made, but it is not adequate, for the body here is not all $\psi \cup \chi \eta$ either as soul or life. The same difficulty exists as to a spiritual body ( $\sigma \omega \mu \alpha \pi v \varepsilon \cup \mu \alpha \tau \iota \kappa o v$ ). The resurrection body is not wholly $\pi v \varepsilon v \mu \alpha$. Caution is needed here in filling out details concerning the $\psi v \times \eta$ and the $\pi v \varepsilon v \mu \alpha$. But certainly he means to say that the "spiritual body" has some kind of germinal connection
with the "natural body," though the development is glorious beyond our comprehension though not beyond the power of Christ to perform (Php 3:21). The force of the argument remains unimpaired though we cannot follow fully into the thought beyond us.

If there is ( $\varepsilon$ ع $\sigma \tau \iota v)$. "If there exists" ( $\varepsilon \sigma \tau \iota v$ means this with accent on first syllable), a condition of first class assumed as true.

There is also ( $\varepsilon \sigma \tau \iota \vee \kappa \alpha)$. There exists also.
1Cor 15:45
Became a living soul ( $\varepsilon \gamma \varepsilon v \varepsilon \tau 0 \varepsilon ા \varsigma \psi v \chi \eta \nu \zeta \omega \sigma \alpha v)$. Hebraistic use of $\varepsilon ા \zeta$ in predicate from LXX. God breathed a soul ( $\psi v \times \eta$ ) into "the first man."

The last Adam became a life-giving spirit (о $\varepsilon \sigma \chi \alpha \tau о \varsigma ~ А \delta \alpha \mu ~ \varepsilon ı \varsigma ~ \pi \nu \varepsilon \nu \mu \alpha ~ \zeta \omega о \pi о ь о v v) . ~$ Supply $\varepsilon$ ₹ยveto (became). Christ is the crown of humanity and has power to give us the new body. In Ro 5:12-19 Paul calls Christ the Second Adam.

1Cor 15:46
Howbeit that is not first which is spiritual, but that which is natural ( $\alpha \lambda \lambda^{\prime}$ ov $\pi \rho \omega \tau 0 v$ то $\pi v \varepsilon \cup \mu \alpha \tau ะ к о \nu, \alpha \lambda \lambda \alpha$ то $\psi \cup \chi ⿺ 𠃊 о v)$. Literally, "But not first the spiritual, but the natural." This is the law of growth always.

1Cor 15:47
Earthly ( $\chi$ окоৎ). Late rare word, from $\chi$ оиৎ, dust.
The second man from heaven (o $\delta \varepsilon v \tau \varepsilon \rho \circ \varsigma \alpha v \theta \rho \omega \pi о \varsigma \varepsilon \xi$ ovpavou). Christ had a human ( $\psi \cup \chi$ Iкоv) body, of course, but Paul makes the contrast between the first man in his natural body and the Second Man in his risen body. Paul saw Jesus after his resurrection and he appeared to him "from heaven." He will come again from heaven.

1Cor 15:48
As is the earthly (oוо о о $\chi$ окоৎ). Masculine gender because of $\alpha v \theta \rho \omega \pi \circ \varsigma$ and correlative pronouns (oוoб, tooveo) of character or quality. All men of dust ( $\chi$ оוко) correspond to "the man of dust" (o $\chi$ оокоऽ), the first Adam.

As is the heavenly (oьoc o eroupavioc). Christ in his ascended state (1Th 4:16; 2Th 1:7; Eph 2:6,20; Php 3:20f. ).

1Cor 15:49
We shall also bear ( $\varphi$ орعбо $\mu \varepsilon v \kappa \alpha$ ). Old MSS. (so Westcott and Hort) read $\varphi$ о $\rho \varepsilon \sigma \omega \mu \varepsilon v$ $\kappa \alpha$. Volitive aorist active subjunctive, Let us also bear. Ellicott strongly opposes the subjunctive. It may be merely the failure of scribes to distinguish between long o and short o. Paul hardly means to say that our attaining the resurrection body depends on our own efforts! A late frequentative form of $\varphi \varepsilon \rho \omega$.

1Cor 15:50
Cannot inherit ( $\kappa \lambda \eta \rho о v o \mu \eta \sigma \alpha$ ov $\delta u v a v \tau \alpha$ ). Hence there must be a change by death from the natural body to the spiritual body. In the case of Christ this change was wrought in less than three days and even then the body of Jesus was in a transition state before the

Ascension. He ate and could be handled and yet he passed through closed doors. Paul does not base his argument on the special circumstances connected with the risen body of Jesus.

1Cor 15:51
A mystery ( $\mu v \sigma \tau \eta \rho \iota v$ ). He does not claim that he has explained everything. He has drawn a broad parallel which opens the door of hope and confidence.

We shall not all sleep ( $\pi \alpha \nu \tau \varepsilon \varsigma$ оv коц $\mu \eta \eta \sigma о \mu \varepsilon \theta \alpha$ ). Future passive indicative of $\kappa о \iota \alpha о \mu \alpha$, to sleep. Not all of us shall die, Paul means. Some people will be alive when he comes. Paul does not affirm that he or any then living will be alive when Jesus comes again. He simply groups all under the phrase "we all."

But we shall all be changed ( $\pi \alpha v \tau \varepsilon \varsigma \delta \varepsilon \alpha \lambda \lambda \alpha \gamma \eta \sigma o \mu \varepsilon \theta \alpha$ ). Second future passive indicative of $\alpha \lambda \lambda \alpha \sigma \sigma \omega$. Both living and dead shall be changed and so receive the resurrection body. See this same idea at more length in 1Th 4:13-18 .

1Cor 15:52
In a moment $(\varepsilon \nu \alpha \tau o \mu \omega)$. Old word, from a privative and $\tau \varepsilon \mu \nu \omega$, to cut, indivisible: Scientific word for atom which was considered indivisible, but that was before the day of electrons and protons. Only here in N.T.

In the twinkling of an eye ( $\varepsilon \nu \rho \iota \pi \eta$ o $\rho \theta \alpha \lambda \mu \circ v$ ). Old word $\rho \iota \pi \eta$ from $\rho \iota \pi \tau \omega$, to throw. Only here in N.T. Used by the Greeks for the flapping of a wing, the buzz of a gnat, the quivering of a harp, the twinkling of a star.

At the last trump ( $\varepsilon \nu \tau \eta \varepsilon \sigma \chi \alpha \tau \eta \sigma \alpha \lambda \pi \iota \gamma \gamma$ ). Symbolical, of course. See on 1Th 4:16; Mt 24:31.

1Cor 15:53
Must put on ( $\delta \varepsilon \varepsilon v \delta v \sigma \alpha \sigma \theta \alpha)$. Aorist (ingressive) middle infinitive, put on as a garment.
Immortality ( $\alpha \theta \alpha v \alpha \sigma i \alpha v$ ). Old word from $\alpha \theta \alpha v a \tau o \varsigma$, undying, and that from $\alpha$ privative and $\theta v \eta \sigma \kappa \omega$, to die. In N.T. only here and 1Ti 6:16 where God is described as having immortality.

1Cor 15:54
Shall have put on ( $\varepsilon v \delta v \sigma \eta \tau \alpha)$. First aorist middle subjunctive with o $\tau \alpha v$ whenever, merely indefinite future, no futurum exactum, merely meaning, "whenever shall put on," not "shall have put on."

Is swallowed up (катєло日ๆ). First aorist passive indicative of $\kappa \alpha \tau \alpha \pi เ v \omega$, old verb to drink down, swallow down. Perfective use of кат $\alpha$ - where we say "up," "swallow up." Timeless use of the aorist tense. Paul changes the active voice кateriev in Isa $25: 8$ to the passive. Death is no longer victory. Theodotion reads the Hebrew verb (bulla, for billa,) as passive like Paul. It is the "final overthrow of the king of Terrors" (Findlay) as shown in Heb 2:15.

1Cor 15:55
Victory (vikos). Late form of vikף.

O death ( $\begin{aligned} & \text { avate). Second instance. Here Paul changes Hades of the LXX for Hebrew }\end{aligned}$ Sheol (Hos 13:14) to death. Paul never uses Hades.

Thy sting ( $\sigma o v \tau 0 \kappa \varepsilon \nu \tau \rho \circ v$ ). Old word from $\kappa \varepsilon v \tau \rho \varepsilon \omega$, to prick, as in Ac 26:14. In Re 9:10 of the sting of locusts, scorpions. The serpent death has lost his poison fangs.

1Cor 15:56
 for Paul's ideas here briefly expressed. In man's unrenewed state he cannot obey God's holy law.

1Cor 15:57
But thanks be to God ( $\tau \omega \delta \varepsilon \theta \varepsilon \omega \chi \alpha \rho \iota \varsigma)$. Exultant triumph through Christ over sin and death as in Ro 7:25.

1Cor 15:58
Be ye steadfast, unmovable ( $\varepsilon \delta \rho \alpha ı \frac{\gamma ı v \varepsilon \sigma \theta \varepsilon \text {, а } \alpha \varepsilon \tau \alpha \kappa ı \eta \tau о) . ~ " K e e p ~ o n ~ b e c o m i n g ~}{\text {. }}$ steadfast, unshaken." Let the sceptics howl and rage. Paul has given rational grounds for faith and hope in Christ the Risen Lord and Saviour. Note practical turn to this great doctrinal argument.

Work ( $\varepsilon \rho \gamma \circ$ ) ,
labour (котоৎ, toil). The best answer to doubt is work.

## 1 Corinthians 16

1Cor 16:1
 Paul has discussed all the problems raised by the Corinthians. Now he has on his own heart the collection for the saints in Jerusalem (see chapters 2Co 8; 9 ). This word $\lambda o \gamma \iota \alpha$ (or - $\varepsilon \iota \alpha$ ) is now known to be derived from a late verb $\lambda о \gamma \varepsilon v \omega$, to collect, recently found in papyri and inscriptions (Deissmann, Bible Studies, p. 143). The word $\lambda$ oүıa is chiefly found in papyri, ostraca, and inscriptions that tell of religious collections for a god or a temple (Deissmann, Light from the Ancient East, p. 105). The introduction of this topic may seem sudden, but the Corinthians were behind with their part of it. They may even have asked further about it. Paul feels no conflict between discussion of the resurrection and the collection.

So also do ye (о $\tau \tau \omega \varsigma \kappa \alpha \nu \mu \alpha \varsigma \pi о \imath \eta \sigma \alpha \tau \varepsilon)$. Paul had given orders ( $\delta เ \varepsilon \tau \alpha \xi \alpha$ ) to the churches of Galatia and now gives them like commands. As a matter of fact, they had promised a long time before this (2Co 8:10; 9:1-5 ). Now do what you pledged.

1Cor 16:2
Upon the first day of the week ( $\kappa \alpha \tau \alpha \mu \alpha \nu \sigma \alpha \beta \beta \alpha \tau о v)$. For the singular $\sigma \alpha \beta \beta \alpha \tau о v$ (sabbath) for week see Lu 18:12; Mr 16:9. For the use of the cardinal $\mu \mathrm{L} \alpha v$ in sense of ordinal $\pi \rho \omega \tau \eta \nu$ after Hebrew fashion in LXX (Robertson, Grammar, p. 672) as in Mr 16:2; Lu 24:1; Ac 20:7. Distributive use of $\kappa \alpha \tau \alpha$ also.

Lay by him in store ( $\pi \alpha \rho^{\prime} \varepsilon \alpha v \tau \omega \tau \iota \theta \varepsilon \tau \omega$ $Ө \eta \sigma \alpha v \rho ı \zeta \omega v$ ). By himself, in his home. Treasuring it (cf. Mt 6:19f. for $\theta \eta \sigma \alpha v \rho \iota \zeta \omega)$. Have the habit of doing it, $\tau \downarrow \theta \varepsilon \tau \omega$ (present imperative).

As he may prosper (o $\tau \alpha v \varepsilon v o \delta \omega \tau \alpha$ ). Old verb from $\varepsilon v$, well, and o ooc, way or journey, to have a good journey, to prosper in general, common in LXX. In N.T. only here and Ro 1:10; 3Jo 1:2. It is uncertain what form $\varepsilon v o \delta \omega \tau \alpha$ is, present passive subjunctive, perfect passive indicative, or even perfect passive subjunctive (Moulton, Prolegomena, p. 54). The old MSS. had no accents. Some MSS. even have $\varepsilon v o \delta \omega \theta \eta$ (first aorist passive subjunctive). But the sense is not altered. Hot is accusative of general reference and $\varepsilon a v$ can occur either with the subjunctive or indicative. This rule for giving occurs also in 2Co 8:12 . Paul wishes the collections to be made before he comes.

1Cor 16:3
When I arrive ( $o \tau \alpha v \pi \alpha \rho \alpha \gamma \varepsilon v \omega \mu \alpha$ ). Whenever I arrive, indefinite temporal conjunction otav and second aorist middle subjunctive.

Whomsoever ye shall approve by letters (ov¢ $\varepsilon a v \delta о к \mu \alpha \sigma \eta \tau \varepsilon \delta \iota^{\prime} \varepsilon \pi \iota \sigma \tau о \lambda \omega v$ ). Indefinite relative with $\varepsilon \alpha v$ and aorist subjunctive of סокцца $\omega$ (to test and so approve as in Php 1:10 ). "By letters" to make it formal and regular and Paul would approve their choice of messengers to go with him to Jerusalem (2Co 8:20ff. ). Curiously enough no names from Corinth occur in the list in Ac 20:4.

To carry ( $\alpha \pi \varepsilon v \varepsilon \gamma \kappa \varepsilon เ \nu)$. Second aorist active infinitive of $\alpha \pi о \varphi \varepsilon \rho \omega$, to bear away.
Bounty ( $\chi \alpha \rho ı v$ ). Gift, grace, as in 2Co 8:4-7. As a matter of fact, the messengers of the churches ( $\alpha$ тобто入о єкк $\lambda \eta \sigma \omega \nu$ 2Co 8:23 ) went along with Paul to Jerusalem (Ac 20:4f. ).

1Cor 16:4
 tion be worthy of the going as to me also." Condition of third class ( $\varepsilon \alpha v--\eta$ ) and the articular infinitive in the genitive ( $\tau 0 v$ ) after $\alpha \xi \circ v$. The accusative of general reference ( $\kappa \alpha \mu \varepsilon$, me also) with the infinitive. So the awkward phrase clears up.

1Cor 16:5
When I shall have passed through Macedonia (oтav Maкع $\delta$ ovıav $\delta \iota \varepsilon \lambda \theta \omega$ ). "Whenever I pass through (second aorist active subjunctive of $\delta เ \varepsilon \rho \chi \circ \mu \alpha)$ Macedonia" (see construction in verse 3).

I do pass through $(\delta \varepsilon \varepsilon \chi \chi \circ \mu \alpha)$. I plan to pass through, futuristic use of present indicative.
1Cor 16:6
It may be ( $\tau 0 \chi \circ v$ ). Neuter accusative of second aorist active participle of $\tau v \gamma \chi \alpha v \omega$ used as an adverb (in Plato and Xenophon, but nowhere else in N.T.).

Or even winter ( $\eta$ ка $\pi \alpha \rho \alpha \chi \varepsilon \mu \alpha \sigma \omega$ ). Future active of late verb $\pi \alpha \rho \alpha \chi \varepsilon \mu \mu \zeta \omega$ ( $\chi \varepsilon \mu \mu \omega v$, winter). See on Ac 27:12; 28:11; Tit 3:12 . He did stay in Corinth for three months (Ac 20:3 ), probably the coming winter.

Whithersoever I go (ov $\varepsilon \alpha v \pi о \rho \varepsilon v \omega \mu \alpha)$. Indefinite local clause with subjunctive. As a matter of fact, Paul had to flee from a conspiracy in Corinth (Ac 20:3).

## 1Cor 16:7

Now by the way ( $\alpha \rho \tau \varepsilon v \pi \alpha \rho o \delta \omega$ ). Like our "by the way" ( $\pi \alpha \rho o \delta o \varsigma)$, incidentally.
If the Lord permit ( $\varepsilon \alpha v$ o Kvpıos $\varepsilon \pi \iota \tau \rho \varepsilon \psi \eta$ ). Condition of the third class. Paul did everything $\varepsilon v$ Kvpı (Cf. Ac 18:21).

1Cor 16:8
Until Pentecost ( $\varepsilon \omega \varsigma \tau \eta \varsigma$ Пع $\tau \tau \eta \kappa о \sigma \tau \eta \varsigma)$. He writes them in the spring before pentecost. Apparently the uproar by Demetrius hurried Paul away from Ephesus (Ac 20:1).

## 1Cor 16:9

For a great and effectual door is opened unto me ( $\theta v \rho \alpha \gamma \alpha \rho \mu о \alpha v \varepsilon \omega \tau \gamma \varepsilon v \mu \varepsilon \gamma \alpha \lambda \eta \kappa \alpha$ $\varepsilon v \varepsilon \rho \gamma \eta \varsigma)$. Second perfect active indicative of $\alpha v o t \gamma \omega$, to open. Intransitive, stands wide open at last after his years there ( $\mathrm{Ac} 20: 31$ ). A wide open door. What does he mean by $\varepsilon v \varepsilon \rho \gamma \eta \varsigma$ ? It is a late word in the Koine. In the papyri a medical receipt has it for "tolerably strong." The form evep $\gamma o s$ in the papyri is used of a mill "in working order," of "tilled land," and of "wrought iron." In the N.T. it occurs in Phm 1:6; Heb 4:12 of "the word of God" as " "ve $\rho \gamma \eta \varsigma$ " (powerful). Paul means that he has at least a great opportunity for work in Ephesus.

And there are many adversaries ( $\kappa \alpha \alpha \nu \tau \iota \kappa \varepsilon \mu \varepsilon v o ~ \pi о \lambda \lambda о$ ). "And many are lying opposed to me," lined up against me. These Paul mentions as a reason for staying in, not for leaving,

Ephesus. Read Ac 19 and see the opposition from Jews and Gentiles with the explosion under the lead of Demetrius. And yet Paul suddenly leaves. He hints of much of which we should like to know more (1Co 15:32; 2Co 1:8f. ).

1Cor 16:10
That he be without fear (iva $\alpha \varphi o \beta \omega \varsigma \gamma \varepsilon v \eta \tau \alpha$ ). Evidently he had reason to fear the treatment that Timothy might receive in Corinth as shown in 4:17-21.

1Cor 16:11
For I expect him ( $\varepsilon \kappa \delta \varepsilon \chi \circ \mu \alpha \gamma \alpha \rho \alpha 0 \tau o v$ ). Apparently later Timothy had to return to Ephesus without much success before Paul left and was sent on to Macedonia with Erastus (Ac 19:22 ) and Titus sent to Corinth whom Paul then arranged to meet in Troas (2Co 2:12 ).

1Cor 16:12
And it was not at all his will to come now ( $\kappa \alpha \pi \alpha \nu \tau \omega \varsigma$ ovк $\eta v \theta \varepsilon \lambda \eta \mu \alpha, v \alpha v o v \varepsilon \lambda \theta \eta$ ). Adversative use of $\kappa \alpha=$ "but." Apollos had left Corinth in disgust over the strife there which involved him and Paul (1Co 1-4). He had had enough of partisan strife over preachers.

1Cor 16:13
Watch ye ( $\gamma \rho \eta \gamma$ о $\varepsilon \varepsilon \tau \varepsilon$ ). Stay awake. Late present from $\varepsilon \gamma \rho \eta \gamma \circ \rho \alpha$ second perfect of $\varepsilon \gamma \varepsilon \rho \omega$, to awake.

Quit you like men ( $\alpha v \delta \rho \iota \zeta \varepsilon \sigma \theta \varepsilon)$. Play the man. Middle voice, show yourselves men. From $\alpha v \eta \rho$, a man.

1Cor 16:15
Ye know (oi $\delta a \tau \varepsilon$ ). Koine form for second perfect indicative used as present of opaw. Parenthetic clause through rest of the verse. Stephanas is mentioned also in 1:16 and in 16:17. For $\alpha \pi \alpha \rho \chi \eta$ see on 15:20,23.

They have set themselves ( $\varepsilon \tau \alpha \xi \alpha v \varepsilon \alpha v \tau 0 u \varsigma)$. Remarkable statement worthy of attention today. This noble family appointed themselves to be ministers to the saints that needed it (the poor and needy). Personal work for Christ is still the only way to win the world for Christ, voluntary personal work. If all Christians did it!

1Cor 16:16
 This is the exhortation begun in verse 15. The family of Stephanas took the lead in good works. Do ye also follow such leaders. This is our great problem today, to find great leaders and many loyal followers. This would solve all church problems, great leadership and great following. Lend a hand.

1Cor 16:17
At the coming ( $\varepsilon \pi \tau \eta \pi \alpha \rho o v \sigma i \alpha)$. At the coming here of Stephanas, etc., the very word used of the $\pi \alpha \rho o v \sigma \iota \alpha$ of Christ ( 15:23).

That which was lacking on your part they supplied ( $\tau 0$ v $\mu \varepsilon \tau \varepsilon \rho \circ \nu$ vбтєр $\mu \alpha$ ovто $\alpha v \varepsilon \pi \lambda \eta \rho \omega \sigma \alpha v)$. Either "these filled up my lack of you" or "these filled up your lack of me." Either makes perfectly good sense and both were true. Which Paul meant we cannot tell.

1Cor 16:18
For they refreshed my spirit and yours ( $\alpha v \varepsilon \pi \alpha v \sigma \alpha v \gamma \alpha \rho$ то $\varepsilon \mu \circ v \pi v \varepsilon \cup \mu \alpha \kappa \alpha$ то $v \mu \omega v$ ). They did both. The very verb used by Jesus in Mt 11:28 for the refreshment offered by him to those who come to him, fellowship with Jesus, and here fellowship with each other.

1Cor 16:19
The churches of Asia ( $\alpha \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha \tau \eta \varsigma$ A $\sigma \iota \alpha \varsigma)$. True of the Roman province (Ac 10:10,26; Col 1:6; 2:1; 4:13,16 ). The gospel spread rapidly from Ephesus.

With the church that is in their house ( $\sigma \cup v \tau \eta \kappa \alpha \tau^{\prime}$ окоо $\alpha \cup \tau \omega v \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$ ). Paul had long ago left the synagogue for the school house of Tyrannus (Ac 19:9). But Aquila and Prisca opened their house here for the services. The churches had to meet where they could. Paul had laboured and lived with this family in Corinth (Ac 18:2) and now again in Ephesus (Ac 18:19; 20:34). It was their habit wherever they lived (Ro 16:5).

1Cor 16:20
With a holy kiss ( $\varepsilon v \varphi i \lambda \eta \mu \alpha \tau \alpha \gamma \iota \omega$ ). In the synagogue men kissed men and women kissed women. This was the Christian custom at a later date and apparently so here. See 1Th 5:26; 2Co 13:12; Ro 3:8; 1Pe 5:14. It seems never to have been promiscuous between the sexes.

1Cor 16:21
 me Paul." The genitive $\Pi \alpha v \lambda o v$ is in apposition with the possessive pronoun $\varepsilon \mu \eta$ which is in the instrumental case just as in 2Th 3:17, the sign in every Epistle. He dictated, but signed at the end. If we only had that signature on that scrap of paper.

1Cor 16:22
Ava $\theta \varepsilon \mu \alpha$. The word seems a bit harsh to us, but the refusal to love Christ (ov $\varphi i \lambda \varepsilon$ ) on the part of a nominal Christian deserves $\alpha v \alpha \theta \varepsilon \mu \alpha$ (see on 12:3 for this word). Mapav $\alpha \theta \alpha$. This Aramaic phrase means "Our Lord ( $\mu \alpha \rho \alpha v$ ) cometh ( $\alpha \theta \alpha$ )" or, used as a proleptic perfect, "has come." It seems to be a sort of watchword (cf. 1Th 4:14ff.; Jas 5:7f.; Php 4:5; Re 1:7; 3:11; 22:20 ), expressing the lively hope that the Lord will come. It was a curious blunder in the King James Version that connected Mapav $\alpha \theta a$ with $A v \alpha \theta \varepsilon \mu \alpha$.

## SECOND CORINTHIANS

## FROM MACEDONIA A.D. 54 OR 55

## BY WAY OF INTRODUCTION

The Pauline authorship is admitted by all real scholars, though there is doubt by some as to the unity of the Epistle. J.H. Kennedy (The Second and Third Letters of St. Paul to the Corinthians, 1900) has presented the arguments in a plausible, but not wholly convincing, manner for the plea that chapters 2Co 10-13 really represent a separate and earlier letter, the one referred to in 2Co 2:3, which was later tacked on to chapters 1-9 as part of the same Epistle. This theory does explain the difference in tone between chapters 1 to 7 and 10 to 13, but that fact is sufficiently clear from the stubborn minority against Paul in Corinth reported by Titus after the majority had been won to Paul by First Corinthians and by Titus (2Co 2:1-11). There are in fact three obvious divisions in the Epistle. Chapters 1 to 7 deal with the report of Titus about the victory in Corinth and Paul's wonderful digression on the glory of the ministry in 2Co 2:12-6:10 ; chapters 8 and 9 discuss the collection for the poor saints in Jerusalem already mentioned in 1Co 16:1f. and which Titus is to press to completion on his return to Corinth; chapters 10 to 13 deal sharply with the Judaizing minority who still oppose Paul's leadership. These three subjects are in no sense inconsistent with each other. The letter is a unity. Nowhere do we gain so clear an insight into Paul's own struggles and hopes as a preacher. It is a handbook for the modern minister of inestimable value. One can hear Paul's heart throb through these chapters. The syntax is often broken by anacolutha. The sentences are sometimes disconnected. Grammatical agreements are overlooked. But there is power here, the grip of a great soul holding on to the highest ideals in the midst of manifold opposition and discouragements. Christ is Master of Paul at every turn.

The date of the Epistle is clearly after I Corinthians, for Paul has left Ephesus and is now in Macedonia (2Co 2:13 ), probably at Philippi, where he met Titus, though he had hoped to meet him at Troas on his return from Corinth. At a guess one may say that Paul wrote in the autumn of A.D. 54 or 55 of the same year in the spring of which he had written I Corinthians, and before he went on to Corinth himself where he wrote Romans (Ac 20:1-3; Ro 16:1).

The occasion for writing is the return of Titus from Corinth with mixed news of the Pauline majority and the minority in opposition. So Titus is sent back with this Epistle to finish the task while Paul waits awhile for matters to clear up (2Co 13:1-10).

It is not certain whether the letter mentioned in 2Co 2:3 is our I Corinthians or a lost letter like the one alluded to in 1Co 5:9. If it is a lost one, we know of four Corinthian Epistles (the one in 1Co 5:9, our I Corinthians, the one in 2Co 2:3, our II Corinthians), assuming the unity of II Corinthians. Few things in Paul's ministry gave him more concern than the
troubles in Corinth. The modern city pastor finds little in his work that Paul has not faced and mastered. There is consolation and courage for the preacher in the conduct and counsels of this greatest of all preachers.

The books on II Corinthians are mainly the same as those on I Corinthians. Some special discussions of II Corinthians deserve mention like Bachmann's Der Zweite Brief des Paulus an die Korinther in the Zahn Kommentar (1909), Barde's Etude sur la epitre aux Cor. (1906), Belser's Der Zweite Brief des Apostels Paulus an die Korinther (1910), Bernard's Second Corinthians in the Expositor's Greek Testament (1903), Denney's II Corinthians in the Expositor's Bible (1911), Farrar's II Corinthians in the Pulpit Commentary (1883), Godet's La seconde epitre aux Corinthiens (1914), Goudge's The Mind of St. Paul in II Cor. (1911), Heinrici's II Kor. in the Meyer Komm. (8th ed., 1900), Heinrici's Das Zweite Sendschreiben des Apostels Paulus an die Kor. (1887), J. H. Kennedy's The Second and Third Letters of St. Paul to the Corinthians (1900), Isaacs's Second Epistle to the Corinthians (1921), Menzies's The Second Epistle to the Corinthians (1912), Parry's II Cor. in Cambridge Greek Testament (1916), Plummer's II Corinthians in Int. Crit. Comm. (1915), Rendall's II Cor., A. T. Robertson's The Glory of the Ministry (II Cor. 2:12--6:10, 1911).

## 2 Corinthians 1

2Cor 1:1
And Timothy ( $\kappa \alpha \mathrm{T} \mu \mathrm{\rho} \boldsymbol{\theta} \boldsymbol{\varepsilon} \boldsymbol{c}$ ). Timothy is with Paul, having been sent on to Macedonia from Ephesus (Ac 19:22). He is in no sense co-author any more than Sosthenes was in 1Co 1:1.

In all Achaia ( $\varepsilon v o \lambda \eta \tau \eta A \chi \alpha \iota \alpha$ ). The Romans divided Greece into two provinces (Achaia and Macedonia). Macedonia included also Illyricum, Epirus, and Thessaly. Achaia was all of Greece south of this (both Attica and the Peloponnesus). The restored Corinth was made the capital of Achaia where the pro-consul resided (Ac 18:12). He does not mention other churches in Achaia outside of the one in Corinth, but only "saints" ( $\alpha$ үוoıc). Athens was in Achaia, but it is not clear that there was as yet a church there, though some converts had been won (Ac 17:34), and there was a church in Cenchreae, the eastern port of Corinth (Ro 16:1). Paul in 2Co 9:2 speaks of Achaia and Macedonia together. His language here would seem to cover the whole ( $\mathrm{o} \lambda \eta$, all) of Achaia in his scope and not merely the environment around Corinth.

2Cor 1:2
Identical with 1Co 1:3 which see.
2Cor 1:3
Blessed ( $\varepsilon \cup \lambda o \gamma \eta \tau o c)$. From old verb $\varepsilon \cup \lambda o \gamma \varepsilon \omega$, to speak well of, but late verbal in LXX and Philo. Used of men in Ge 24:31, but only of God in N.T. as in Lu 1:68 and chiefly in Paul (2Co 11:31; Ro 1:25). Paul has no thanksgiving or prayer as in 1Co 1:4-9, but he finds his basis for gratitude in God, not in them.

The God and Father ( 0 $\theta$ zoc ка $\pi \alpha \tau \eta \rho$ ). So rightly, only one article with both substantives as in 2 Pe 1:1. Paul gives the deity of Jesus Christ as our Lord (Kupıov), but he does not hesitate to use the language here as it occurs. See 1Pe 1:3; Eph 1:3 where the language is identical with that here.

The father of mercies (о $\pi \alpha \tau \eta \rho \tau \omega v$ окктı $\rho \mu \omega v$ ) and God of all comfort ( $\kappa \alpha$ Ө $\varepsilon \varsigma \varsigma \pi \alpha \sigma \eta \varsigma$ $\pi \alpha \rho \alpha \kappa \lambda \eta \sigma \varepsilon \omega \varsigma)$. Paul adds an item to each word. He is the compassionate Father characterized by mercies (oıкть $\mu \omega \nu$, old word from oוктєє $\rho \omega$, to pity, and here in plural, emotions and acts of pity). He is the God of all comfort ( $\pi \alpha \rho \alpha \kappa \lambda \eta \sigma \varepsilon \omega \varsigma$, old word from $\pi \alpha \rho \alpha \kappa \alpha \lambda \varepsilon \omega$, to call to one's side, common with Paul). Paul has already used it of God who gave eternal comfort (2Th 2:16). The English word comfort is from the Latin confortis (brave together). The word used by Jesus of the Holy Spirit as the Comforter or Paraklete is this very word (Joh 14:16; 16:7). Paul makes rich use of the verb таракал $\varepsilon \omega$ and the substantive $\pi \alpha \rho \alpha к \lambda \eta \sigma ı \varsigma ~$ in this passage ( 3-7). He urges all sorrowing and troubled hearts to find strength in God.

2Cor 1:4

In all our affliction $\left(\varepsilon \pi \pi \alpha \sigma \eta \tau \eta \theta \lambda_{\iota} \psi \varepsilon \eta \mu \omega \nu\right)$. $\Theta \lambda_{\iota} \psi \iota \varsigma$ is from $\theta \lambda_{\iota} \beta \omega$, to press, old and common word, as tribulation is from Latin tribulum (roller). See on Mt 13:21 and 1Th 1:6 . The English affliction is Latin afflictio from ad-fligere, to strike on.

That we may be able to comfort ( $\varepsilon \iota \varsigma ~ \tau о ~ \delta \nu v \alpha \sigma \theta \alpha \eta \mu \alpha \varsigma \pi \alpha \rho \alpha \kappa \alpha \lambda \varepsilon ı v$ ). Purpose clause with $\varepsilon ા \varsigma$ and the articular infinitive with the accusative of general reference, a common idiom. Paul here gives the purpose of affliction in the preacher's life, in any Christian's life, to qualify him for ministry to others. Otherwise it will be professional and perfunctory.

Wherewith ( $\eta \varsigma$ ). Genitive case of the relative attracted to that of the antecedent $\pi \alpha \rho \alpha \kappa \lambda \eta \sigma \varepsilon \omega \varsigma$. The case of the relative here could have been either the accusative $\eta \nu$ with the passive verb retained as in Mr 10:38 or the instrumental $\eta$. Either is perfectly good Greek (cf. Eph 1:6; 4:1 ). Personal experience of God's comfort is necessary before we can pass it on to others.

2Cor 1:5
The sufferings of Christ ( $\tau \alpha \pi \alpha \theta \eta \mu \alpha \tau \alpha$ тov X $\rho \iota \sigma \tau 0 v$ ). Subjective genitive, Christ's own sufferings.

Abound unto us ( $\pi \varepsilon \rho \iota \sigma \sigma \varepsilon v \varepsilon \varepsilon \iota \varsigma ~ \eta \mu a \varsigma)$. Overflow unto us so that we suffer like sufferings and become fellow sufferers with Christ (4:10f.; Ro 8:17; Php 3:10; Col 1:24 ).

Through Christ ( $\delta ı \alpha$ tov X $\rho \iota \sigma \tau o v$ ). The overflow ( $\pi \varepsilon \rho \iota \sigma \sigma \varepsilon v \varepsilon$ ) of comfort comes also through Christ. Is Paul thinking of how some of the Jewish Christians in Corinth have become reconciled with him through Christ? Partnership with Christ in suffering brings partnership in glory also (Ro 8:17; 1Pe 4:13 ).

2Cor 1:6
Whether ( $\varepsilon เ \tau \varepsilon$ )
--or ( $\varepsilon \iota \tau \varepsilon$ ). The alternatives in Paul's experience (afflicted $\theta \lambda_{\iota} \beta \circ \mu \varepsilon \theta \alpha$, comforted $\pi \alpha \rho \alpha \kappa \alpha \lambda o v \mu \varepsilon \theta \alpha)$ work out for their good when they are called on to endure like sufferings "which we also suffer" ( $\omega v \kappa \alpha \eta \mu \varepsilon \iota \varsigma \pi \alpha \sigma \chi \circ \mu \varepsilon v$ ). The relative $\omega v$ is attracted from neuter accusative plural $\alpha$ to genitive case of the antecedent $\pi \alpha \theta \eta \mu \alpha \tau \omega \nu$ (sufferings).

2Cor 1:7
Our hope for you ( $\eta \varepsilon \lambda \pi \iota \varsigma \eta \mu \omega \nu v \pi \varepsilon \rho v \mu \omega v$ ). The old word $\varepsilon \lambda \pi \iota \varsigma$, from $\varepsilon \lambda \pi \iota \zeta \omega$, to hope, has the idea of waiting with expectation and patience. So here it is "steadfast" ( $\beta \varepsilon \beta \alpha ı \alpha$, stable, fast, from $\beta \alpha \iota v \omega$, to plant the feet down).

Partakers ( $\kappa о \iota \omega \omega \nu$ ). Partners as in Lu 5:10 .
2Cor 1:8
Concerning our affliction (v $v \varepsilon \rho \tau \eta \varsigma \theta \lambda ı \psi \varepsilon \omega \varsigma \eta \mu \omega \nu$ ). Manuscripts read also $\pi \varepsilon \rho$ for in the Koine $v \pi \varepsilon \rho$ (over) often has the idea of $\pi \varepsilon \rho$ (around). Paul has laid down his philosophy of afflictions and now he cites a specific illustration in his own recent experience.

In Asia ( $\varepsilon v A \sigma \iota \alpha$ ). Probably in Ephesus, but what it was we do not know whether sickness or peril. We do know that the disciples and the Asiarchs would not allow Paul to face the
mob in the amphitheatre gathered by Demetrius (Ac 20:30f. ). In Ro 16:4 Paul says that Prisca and Aquila laid down their necks for him, risked their very lives for him. It may have been a later plot to kill Paul that hastened his departure from Ephesus (Ac 20:1). He had a trial so great that "we were weighed down exceedingly beyond our power" ( $\kappa \alpha \theta^{\prime} v \pi \varepsilon \rho \beta$ о $\lambda \eta \nu$ $v \pi \varepsilon \rho \delta v v \alpha \mu \nu v \varepsilon \beta \alpha \rho \eta \eta \eta \mu v)$. Old verb from $\beta \alpha \rho o \varsigma$, weight, $\beta a \rho v \varsigma$, weighty. First aorist passive indicative. See on 1Co 12:31 for $\kappa \alpha \theta$ ' vпє $\beta \beta$ о $\eta \nu$ (cf. our hyperbole). It was beyond Paul's power to endure if left to himself.

Insomuch that we despaired even of life ( $\omega \sigma \tau \varepsilon \varepsilon \xi \alpha \pi \circ \rho \eta \theta \eta v \alpha \eta \mu \alpha \varsigma \kappa \alpha$ тov $\lceil\eta \iota)$ ) Usual clause of result with $\omega \sigma \tau \varepsilon$ and the infinitive. First aorist passive infinitive $\varepsilon \xi \alpha \pi \sigma \rho \eta \theta \eta \nu \alpha$, late compound for utter despair (perfective use of $\varepsilon \xi$ and at a complete loss, a privative and $\pi о \rho о \varsigma$, way). There seemed no way out.

Of life ( $\tau 0 v \zeta \eta \iota v)$. Ablative case of the articular infinitive, of living.
2Cor 1:9
Yea ( $\alpha \lambda \lambda \alpha$ ). Confirmatory use as in 7:11, rather than adversative.
The answer of death ( $\tau о \alpha \pi о к \rho ц \mu \alpha$ tov $\theta \alpha v a \tau o v)$ This late word from $\alpha \pi о к \rho เ v o \mu \alpha$, to reply, occurs nowhere else in N.T., but is in Josephus, Polybius, inscriptions and papyri (Deissmann, Bible Studies, p. 257; Moulton and Milligan's Vocabulary), and always in the sense of decision or judgment rendered. But Vulgate renders it by responsum and that idea suits best here, unless Paul conceives God as rendering the decision of death.

We ourselves have had within ourselves ( $\alpha \cup \tau о \varepsilon v \varepsilon \alpha v \tau o เ \varsigma \varepsilon \sigma \chi \eta \kappa \alpha \mu \varepsilon v$ ). Regular perfect of $\varepsilon \chi \omega$, to have. And still have the vivid recollection of that experience. For this lively dramatic use of the present perfect indicative for a past experience see also $\varepsilon \sigma \chi \eta \kappa \alpha$ in 2:13 (Moulton, Prolegomena, p. 143f.; Robertson, Grammar, p. 896f.).

That we should not trust in ourselves (ıva $\mu \eta \pi \varepsilon \pi \circ$ Өот $\left.\varsigma \varsigma \omega \mu \varepsilon \varepsilon \varepsilon \varphi^{\prime} \varepsilon \alpha \cup \tau o ı \varsigma\right)$. A further purpose of God in affliction beyond that in verse 4. "This dreadful trial was sent to him in order to give him a precious spiritual lesson ( 12:7-10)" (Robertson and Plummer). Note periphrastic perfect active subjunctive of $\pi \varepsilon ו \theta \omega$, to persuade.

In ( $\varepsilon \pi$ ), upon, both ourselves and God.
2Cor 1:10
Out of so great a death ( $\varepsilon \kappa \tau \eta \lambda ı к о v \tau o v ~ \theta a v a \tau o v)$. He had considered himself as good as dead.

Delivered (عрибатo)
--will deliver ( $\rho v \sigma \varepsilon \tau \alpha$ ). Old verb $\rho v \omega$, middle, $\rho v o \mu \alpha$, draw oneself, as out of a pit, rescue. So Paul faces death without fear.

On whom we have set our hope ( $\varepsilon \iota \varsigma$ ov $\eta \lambda \pi \iota \kappa \alpha \mu \varepsilon v$ ). Perfect active indicative of $\varepsilon \lambda \pi \iota \zeta \omega$. We still have that hope, emphasized by $\varepsilon \tau$ рטб\&та (he will still deliver).

2Cor 1:11

Ye also helping together on our behalf ( $\sigma v v v \pi о \cup \rho \gamma о v \nu \tau \omega \nu \kappa \alpha v \mu \omega \nu v \pi \varepsilon \rho \eta \mu \omega v$ ). Genitive absolute with present active participle of late compound verb ( $\sigma v \nu$ and $v \pi \sigma \cup \rho \gamma \varepsilon \omega$ for $v \pi o$ and $\varepsilon \rho \gamma o v)$. Paul relied on God and felt the need of the prayer of God's people.

By means of many ( $\varepsilon \kappa \pi \sigma \lambda \lambda \omega \nu \pi \rho \circ \sigma \omega \pi \omega v$ ). П $\rho о \sigma \omega \pi \sigma \nu$ means face ( $\pi \rho o \sigma, o \pi \varsigma)$. The word is common in all Greek. The papyri use it for face, appearance, person. It occurs twelve times in II Corinthians. It certainly means face in eight of them (3:7,13,18; 8:24; 10:1,7; 11:20 ). In 5:12 it means outward appearance. It may mean face or person here, 2:10; 4:6. It is more pictorial to take it here as face "that out of many upturned faces" thanks may be given ( $v \alpha--\varepsilon v \chi \alpha \rho เ \sigma \tau \eta \theta \eta$ first aorist passive subjunctive) for the gift to us by means of many ( $\delta \iota \alpha$ $\pi o \lambda \lambda o v)$. It is indeed a difficult sentence to understand.

2Cor 1:12
Glorying (каvхпбıৎ). Act of glorying, while in verse $14 \kappa \alpha v \chi \eta \mu \alpha$ is the thing boasted of.

The testimony of our conscience ( $\tau 0 \mu \alpha \rho \tau v \rho \iota \nu \tau \eta \varsigma \sigma v v \varepsilon \iota \delta \eta \sigma \varepsilon \omega \varsigma \eta \mu \omega v$ ). In apposition with каvхךбıs.
 kind of righteousness. So the God-kind (genitive case) of sincerity. Late word from $\varepsilon ı \lambda ı \kappa \rho ı \nu \eta \varsigma$. See on 1Co 5:8 .
 $\sigma \alpha \rho к ı к о \varsigma$ five times and it occurs only twice elsewhere in N.T. See on 1Co 3:3.

We behaved ourselves ( $\alpha v \varepsilon \sigma \tau \rho \alpha \varphi \eta \mu \varepsilon v$ ). Second aorist passive indicative of $\alpha v \alpha \sigma \tau \rho \varepsilon \varphi \omega$, old verb, to turn back, to turn back and forth, to walk. Here the passive is used as in late Greek as if middle.

More abundantly to you-ward ( $\pi \varepsilon \rho \iota \sigma \sigma \circ \tau \varepsilon \rho \omega \varsigma \pi \rho \circ \varsigma v \mu \alpha \varsigma)$. They had more abundant opportunity to observe how scrupulous Paul was (Ac 18:11).

2Cor 1:13
Than what ye read ( $\alpha \lambda \lambda^{\prime} \eta \alpha \alpha v \alpha \gamma \iota \omega \omega \sigma \kappa \varepsilon \tau \varepsilon$ ). Note comparative conjunction $\eta$ (than) after $\alpha \lambda \lambda^{\prime}$ and that after $\alpha \lambda \lambda \alpha$ (other things, same word in reality), "other than." Read in Greek ( $\alpha \nu \alpha \nmid \imath \omega \sigma \kappa \omega$ ) is knowing again, recognizing. See on Ac 8:30 .

Or even acknowledge ( $\eta \kappa \alpha \varepsilon \pi \iota \gamma \iota \nu \omega \sigma \kappa \varepsilon \tau \varepsilon$ ). Paul is fond of such a play on words ( $\alpha \vee \alpha \nmid \nu \omega \sigma \kappa \varepsilon \tau \varepsilon, \varepsilon \pi \iota \gamma \iota \nu \omega \sigma \kappa \varepsilon \tau \varepsilon$ ) or paronomasia. Does he mean "read between the lines," as we say, by the use of $\varepsilon \pi$ (additional knowledge)?

Unto the end ( $\varepsilon \omega \varsigma \tau \varepsilon \lambda \circ \cup \varsigma)$. The report of Titus showed that the majority now at last understood Paul. He hopes that it will last (1Co 1:8).

2Cor 1:14
As also ye did acknowledge us in part ( $\kappa \alpha \theta \omega \varsigma \kappa \alpha \varepsilon \pi \varepsilon \gamma \nu \omega \tau \varepsilon \eta \mu \alpha \varsigma \alpha \pi \sigma \mu \varepsilon \rho о \nu \varsigma)$. Gracious acknowledgment (second aorist active indicative of $\varepsilon \pi \downarrow \gamma \nu \omega \sigma \kappa \omega$ ) to the original Pauline party
(1Co $1: 12 ; 3: 4$ ) that he had seemed to care so little for them. And now in his hour of victory he shows that, if he is their ground of glorying, they are his also (cf. 1Th 2:19f.; Php 2:16).

2Cor 1:15
Confidence ( $\pi \varepsilon \pi \sigma เ \theta \eta \sigma \varepsilon$ ). This late word (LXX Philo, Josephus) is condemned by the Atticists, but Paul uses it a half dozen times ( 3:4 also).

I was minded to come ( $\varepsilon \beta 0 \cup \lambda$ o $\mu \eta \nu \varepsilon \lambda \theta \varepsilon เ \nu)$. Imperfect, I was wishing to come, picturing his former state of mind.

Before unto you ( $\pi \rho о \tau \varepsilon \rho о \nu \pi \rho о \varsigma \nu \mu \propto \varsigma)$. This was his former plan ( $\pi \rho о \tau \varepsilon \rho о v$ ) while in Ephesus to go to Achaia directly from Ephesus. This he confesses in verse 16 "and by you to pass into Macedonia."

That ye might have a second benefit ( $\downarrow \alpha \alpha \varepsilon v \tau \varepsilon \rho \alpha v \chi \alpha \rho ı v \sigma \chi \eta \tau \varepsilon$ ). Or second "joy" if we accept $\chi \alpha \rho a v$ with Westcott and Hort. This would be a real second blessing (or joy) if they should have two visits from Paul.

2Cor 1:16
And again ( $\kappa \alpha \pi \alpha \lambda \iota v$ ). This would have been the second benefit or joy. But he changed his plans and did not make that trip directly to Corinth, but came on to Macedonia first (Ac 19:21; 20:1f.; 1Co 16:2; 2Co 2:12 ).

To be set forward by you ( $\left.v \varphi^{\prime} \nu \mu \omega \nu \pi \rho о \pi \varepsilon \mu \varphi \theta \eta \nu \alpha\right)$. First aorist passive infinitive of $\pi \rho о \pi \varepsilon \mu \pi \omega$. Paul uses this same verb in Ro 15:24 for the same service by the Roman Christians on his proposed trip to Spain. The Corinthians, especially the anti-Pauline party, took advantage of Paul's change of plans to criticize him sharply for vacillation and flippancy. How easy it is to find fault with the preacher! So Paul has to explain his conduct.

2Cor 1:17
Did I shew fickleness? ( $\mu \eta \tau \alpha \rho \alpha \tau \eta \varepsilon \lambda \alpha \varphi \rho ı \alpha ı$ ?). An indignant negative answer is called for by $\mu \eta \tau$. The instrumental case of $\varepsilon \lambda \alpha \varphi \rho i \alpha$ is regular after $\varepsilon \chi \rho \eta \sigma \alpha \mu \eta \nu$ from $\chi \rho \alpha o \mu \alpha$, to use. $\mathrm{E} \lambda \alpha \varphi \rho$ ) is a late word for levity from the old adjective, $\varepsilon \lambda \alpha \varphi \rho \circ \varsigma$, light, agile (2Co 10:17; Mt 11:30 ). Here only in N.T.

Purpose ( $\beta$ ou $\lambda \varepsilon v o \mu \alpha$ ). Paul raises the question of fickleness about any of his plans.
Yea yea ( $\mathrm{N} \alpha \sim \alpha$ )
--nay nay (ov ov). See a similar repetition in Mt 5:37. It is plain in Jas 5:12 where "the yea" is "yea" and "the nay" is "nay." That seems to be Paul's meaning here, "that the Yea may be yea and the Nay may be nay."

2Cor 1:18
Is not yea and nay ( $о \boldsymbol{\text { e }}$ عбтıv va ка ov). He is not a Yes and No man, saying Yes and meaning or acting No. Paul calls God to witness on this point.

2Cor 1:19
Was not Yea and Nay (ouk e $\gamma \varepsilon v \varepsilon \tau \frac{v}{}$ va ou). "Did not become Yes and No."

But in him is yea ( $\alpha \lambda \lambda \alpha N \alpha \varepsilon v \alpha \nu \tau \omega \gamma \varepsilon \gamma \circ v \varepsilon v$ ). Rather, "But in him Yes has become yes," has proved true. So Paul appeals to the life of Christ to sustain his own veracity.

2Cor 1:20
In him is the yea ( $\varepsilon v \alpha v \tau \omega \tau 0 \mathrm{Na}$ ). Supply $\gamma \varepsilon \gamma o v \varepsilon v$ from the preceding sentence, "In him was the Yea come true." This applies to all God's promises.

The Amen ( $\tau 0 \mathrm{~A} \mu \eta \nu$ ). In public worship (1Co 14:16).
2Cor 1:21
Establishes $(\beta \varepsilon \beta \alpha \iota \omega v)$. Present active participle from $\beta \varepsilon \beta \alpha \iota o \varsigma$, firm. An apt metaphor in Corinth where confirmation of a bargain often took place ( $\beta \varepsilon \beta \alpha \iota \omega \sigma \iota \varsigma$ ) as Deissmann shows (Bible Studies, p. 109) and as verse 22 makes plain.

Anointed ( $\chi \rho \iota \sigma \alpha \varsigma)$. From $\chi \rho \iota \omega$, to anoint, old verb, to consecrate, with the Holy Spirit here as in 1Jo 2:20.

2Cor 1:22
Sealed us ( $\sigma \varphi \rho \alpha \gamma \iota \sigma \alpha \mu \varepsilon \nu \sigma \varsigma \eta \mu \propto)$. From $\sigma \varphi \rho \alpha \gamma \iota \zeta \omega$ old verb, common in LXX and papyri for setting a seal to prevent opening (Da 6:17) , in place of signature (1Ki 21:18). Papyri examples show a wide legal use to give validity to documents, to guarantee genuineness of articles as sealing sacks and chests, etc. (Deissmann, Bible Studies, p. 238; Moulton and Milligan's Vocabulary).

The earnest of the Spirit ( $\tau 0 \nu \alpha \rho \rho \alpha \beta \omega \nu \alpha$ 就 $\pi \nu \varepsilon v \mu \alpha \tau \circ \varsigma)$. A word of Semitic origin (possibly Phoenician) and spelled both $\alpha \rho \alpha \beta \omega \nu$ and $\alpha \rho \rho \alpha \beta \omega \nu$. It is common in the papyri as earnest money in a purchase for a cow or for a wife (a dowry). In N.T. only here; 5:5; Eph 1:14. It is part payment on the total obligation and we use the very expression today, "earnest money." It is God, says Paul, who has done all this for us and God is Paul's pledge that he is sincere. He will come to Corinth in due time. This earnest of the Spirit in our hearts is the witness of the Spirit that we are God's.

2Cor 1:23
But I call God for a witness upon my soul ( $\mathrm{E} \gamma \omega \delta \varepsilon \mu \alpha \rho \tau v \rho \alpha \tau o v \theta \varepsilon o v \varepsilon \pi \iota \kappa \alpha \lambda o v \mu \alpha \varepsilon \pi$ $\tau \eta v \varepsilon \mu \eta \nu \psi v \chi \eta v)$. Solemn attestation, "calling heaven to witness is frequent in literature from Homer onwards" (Plummer). Thus God is described above (cf. 1Th 2:5,10; Ro 1:9; Ga 1:20; Php 1:8).

To spare you ( $\varphi \varepsilon \iota \delta о \mu \varepsilon \nu \circ \varsigma \nu \mu \omega v$ ). Present middle participle (causal rather than final) of $\varphi \varepsilon \iota \delta o \mu \alpha$, old verb, to hold back, to spare. Ablative case $\nu \mu \omega \nu$.

2Cor 1:24
We have lordship over (кирєєионєv). Old verb from кирьоя, to be lord of or over. See Lu 22:25 .

Helpers of your joy ( $\sigma v v \varepsilon \rho \gamma \begin{gathered} \\ \tau\end{gathered} \varsigma \chi \alpha \rho \alpha \varsigma ~ v \mu \omega v$ ). Co-workers (1Co 3:8) in your joy. A delicate correction to present misapprehension ( $\varepsilon \pi \alpha \nu 0 \rho \theta \omega \sigma \iota)$.

## 2 Corinthians 2

2Cor 2:1
That I would not come again to you with sorrow ( $\tau 0 \mu \eta \pi \alpha \lambda \iota \nu \varepsilon \nu \lambda \nu \pi \eta \pi \rho o \varsigma v \mu \alpha \varsigma$ $\varepsilon \lambda \theta \varepsilon ı v)$. Articular second aorist active infinitive with negative $\mu \eta$ in apposition with tov $\frac{1}{}$ (this) preceding. What does Paul mean by "again" ( $\pi \alpha \lambda \iota v$ )? Had he paid another visit besides that described in Ac 18 which was in sorrow ( $\varepsilon \nu \lambda \nu \pi \eta)$ ? Or does he mean that having had one joyful visit (that in Ac 18 ) he does not wish the second one to be in sorrow? Either interpretation is possible as the Greek stands and scholars disagree. So in 12:14 "The third time I am ready to come" may refer to the proposed second visit (1:15f. ) and the present plan (a third). And so as to 13:1. There is absolutely no way to tell clearly whether Paul had already made a second visit. If he had done so, it is a bit odd that he did not plainly say so in $1: 15$ f. when he is apologizing for not having made the proposed visit ("a second benefit").

2Cor 2:2
Who then? (ка тוб?). For this use of ка see on Mr 10:26; Joh 9:36. The ка accepts the condition (first class $\varepsilon เ--\lambda \cup \pi \omega$ ) and shows the paradox that follows. $\Lambda v \pi \varepsilon \omega$ is old word from $\lambda \cup \pi \eta$ (sorrow) in causative sense, to make sorry.

Maketh glad ( $\varepsilon \cup \varphi \rho a \iota v \omega v$ ). Present active participle of old word from $\varepsilon v$, well, and $\varphi \rho \eta \nu$, mind, to make joyful, causative idea like $\lambda \cup \pi \varepsilon \omega$.

2Cor 2:3
I wrote this very thing ( $\varepsilon \gamma \rho \alpha \psi \alpha$ тоvтo $\alpha \cup \tau 0$ ). Is this (and $\varepsilon \gamma \rho \alpha \psi \alpha$ in verses $4,9,12$ ) the epistolary aorist referring to the present letter? In itself that is possible as the epistolary aorist does occur in the N.T. as in 8:18; 9:3 (Robertson, Grammar, p. 854f.). If not epistolary aorist as seems improbable from the context and from $7: 8-12$, to what Epistle does he refer? To 1 Co 5 or to a lost letter? It is possible, of course, that, when Paul decided not to come to Corinth, he sent a letter. The language that follows in verses 3,4; 7:8-12 can hardly apply to I Corinthians.

Should have sorrow ( $\lambda \nu \pi \eta \nu \sigma \chi \omega$ ). Second aorist (ingressive) active subjunctive of $\varepsilon \chi \omega$, should get sorrow, after $\tau \nu \alpha \mu \eta$ negative final particles.

From them of whom ( $\alpha \varphi^{\prime} \omega v$ ). Antecedent omitted, $\alpha \pi 0$ tov $\tau \nu \alpha \varphi^{\prime} \omega \nu$ (from those from whom).

I ought ( $\varepsilon \delta \varepsilon \mu \varepsilon$ ). Imperfect for unrealized present obligation as often and like English.
Having confidence ( $\pi \varepsilon \pi \sigma \bullet \theta \omega \varsigma)$. Second perfect active participle of $\pi \varepsilon \iota \theta \omega$ ( 1:9).
2Cor 2:4
Anguish ( $\sigma \cup v \circ \chi \eta \varsigma$ ). Ablative case after $\varepsilon \kappa$ (out of). Old word from $\sigma \cup v \varepsilon \chi \omega$, to hold together. So contraction of heart (Cicero, contractio animi), a spiritual angina pectoris. In N.T. only here and Lu 21:25.

With many tears ( $\delta 1 \alpha \pi 0 \lambda \lambda \omega v \delta \alpha \kappa \rho v \omega v)$. He dictated that letter "through tears" (accompanied by tears). Paul was a man of heart. He writes to the Philippians with weeping ( $\kappa \lambda \alpha \omega \omega v$ ) over the enemies of the Cross of Christ (Php 3:18). He twice mentions his tears in his speech at Miletus (Ac 20:19-31).

But that ye might know the love ( $\alpha \lambda \lambda \alpha \tau \eta \nu \alpha \gamma \alpha \pi \eta \nu$ iva $\gamma \nu \omega \tau \varepsilon$ ). Proleptic position of $\alpha \gamma \alpha \pi \eta \nu$ and ingressive second aorist active subjunctive $\gamma \nu \omega \tau \varepsilon$, come to know.

2Cor 2:5
If any ( $\varepsilon \tau$ тৎ). Scholars disagree whether Paul refers to 1Co 5:1 , where he also employs $\tau \iota \sigma, \tau o เ o v \tau o \varsigma$, and $\Sigma a \tau \alpha v a \varsigma$ as here, or to the ringleader of the opposition to him. Either view is possible. In both cases Paul shows delicacy of feeling by not mentioning the name.

But in part ( $\alpha \lambda \lambda \alpha \alpha \pi \sigma \mu \varepsilon \rho o v \varsigma)$ ) "But to some extent to you all." The whole Corinthian Church has been injured in part by this man's wrongdoing. There is a parenthesis ( that I press not too heavily, $v \alpha \mu \eta \varepsilon \pi \iota \beta \alpha \rho \omega)$ that interrupts the flow of ideas. E $\pi \iota \beta \alpha \rho \varepsilon \omega$, to put a burden on ( $\varepsilon \pi \iota, \beta \alpha \rho \circ \varsigma)$, is a late word, only in Paul in N.T. (here and 1Th 2:9; 2Th 3:8). He does not wish to give pain by too severe language.

2Cor 2:6
Punishment ( $\varepsilon \pi \iota \tau \iota \mu \alpha)$. Late word for old Greek to $\varepsilon \pi \iota \tau \iota \mu \circ \circ$ (so papyri), from $\varepsilon \pi \iota \tau \mu \mu \omega$, to show honour to, to award, to adjudge penalty. Only here in N.T.

By the many ( $v \pi \sigma \tau \omega v \pi \lambda \varepsilon \iota \sigma \omega v$ ). By the more, the majority. If Paul refers to the case in 1Co 5 , they had taken his advice and expelled the offender.

2Cor 2:7
So that on the contrary ( $\omega \sigma \tau \varepsilon$ touvavitov). The natural result expressed by $\omega \sigma \tau \varepsilon$ and the infinitive. Touvavtiov is by crasis for to $\varepsilon v a v \tau i o v$ and accusative of general reference.

Rather ( $\mu \alpha \lambda \lambda o v$ ). Absent in some MSS.
Lest by any means ( $\mu \eta \pi \omega \varsigma$ ). Negative purpose.
Swallowed up (каталоӨף). First aorist passive subjunctive of $\kappa \alpha \tau \alpha \pi เ v \omega$, to drink down (1Co 15:54).

With his overmuch sorrow ( $\tau \eta \pi \varepsilon \rho \prime \sigma \sigma \circ \tau \varepsilon \rho \alpha \lambda \cup \pi \eta$ ). Instrumental case, "by the more abundant sorrow" (comparative of adjective $\pi \varepsilon \rho \iota \sigma \sigma \circ \varsigma)$.

2Cor 2:8
To confirm ( $\kappa v \rho \omega \sigma \alpha$ ). First aorist active infinitive of old verb $\kappa v \rho о \omega$, to make valid, to ratify, from кироц (head, authority). In N.T. only here and Ga 3:15.

2Cor 2:9
That I might know the proof of you ( $\llcorner\alpha \alpha \nu \omega \tau \eta \nu \delta о \kappa \mu \eta \nu \nu \mu \omega v$ ). Ingressive second aorist active subjunctive, come to know. $\Delta$ окц $\quad$ is proof by testing. Late word from $\delta о к \mu о \varsigma$, and is in Dioscorides, medical writer in reign of Hadrian. Earliest use in Paul and only in him in N.T. (2Co 2:9; 8:2; 9:13; 13:3; Ro 5:4; Php 2:22 ).
 2:9; Php 2:8; Ac 7:39 ).

2Cor 2:10
In the person of Christ ( $\varepsilon v \pi \rho o \sigma \omega \pi \omega$ X $\rho \iota \sigma \tau o v$ ). More exactly, "in the presence of Christ," before Christ, in the face of Christ. Cf. $\varepsilon v \omega \pi \iota o v$ tov $\theta \varepsilon o v(4: 2)$ in the eye of God, $\varepsilon v \omega \pi \iota o v$ Kupıov ( 8:21).

2Cor 2:11
That no advantage may be gained over us ( $\imath \alpha \alpha \mu \eta \pi \lambda \varepsilon o v \varepsilon \kappa \tau \eta \theta \omega \mu \varepsilon \nu)$. First aorist passive subjunctive after $\iota v \alpha \mu \eta$ (negative purpose) of $\pi \lambda \varepsilon o v \varepsilon \kappa \tau \varepsilon \omega$, old verb from $\pi \lambda \varepsilon$ оvєк $\tau \eta \varsigma$, a covetous man (1Co 5:10f. ), to take advantage of, to gain, to overreach. In N.T. only in 1Th 4:6; 2Co 2:11; 7:2; 12:17f. "That we may not be overreached by Satan."

His devices ( $\alpha v \tau 0 v \tau \alpha$ voך $\mu \alpha \tau \alpha$ ). Noך $\mu \alpha$ from voc $\omega$ to use the vovc is old word, especially for evil plans and purposes as here.

2Cor 2:12
To Troas ( $\varepsilon \iota \varsigma \tau \eta \nu \mathrm{T} \rho \omega \iota \alpha \delta \alpha)$. Luke does not mention this stop at Troas on the way from Ephesus to Macedonia (Ac 20:1f. ), though he does mention two other visits there (Ac 16:8; 20:6 ).

When a door was opened unto me ( $\theta v \rho a \varsigma \mu \circ \alpha v \varepsilon \omega \iota \gamma \mu \varepsilon \nu \eta \varsigma)$. Genitive absolute with second perfect passive participle of $\alpha v o r \gamma v v \mu$. Paul used this very metaphor in 1Co 16:9. He will use it again in Col 4:3. Here was an open door that he could not enter.

2Cor 2:13
I had no relief (ouk $\varepsilon \sigma \chi \eta \kappa \alpha \alpha \nu \varepsilon \sigma \iota v$ ). Perfect active indicative like that in $1: 9$, vivid dramatic recital, not to be treated as "for" the aorist (Robertson, Grammar, p. 896, 898ff.). He still feels the shadow of that restlessness. Avعбıc, from $\alpha \nu ı \eta \mu$, to let up, to hold back, is old word for relaxing or release (Ac 24:34).

For my spirit ( $\tau \omega \pi \nu \varepsilon v \mu \alpha \tau \mu 0 v$ ). Dative of interest.
Because I found not Titus ( $\tau \omega \mu \eta \varepsilon v \rho \varepsilon \iota v \mu \varepsilon$ Tıтov). Instrumental case of the articular infinitive with negative $\mu \eta$ and accusative of general reference $\mu \varepsilon$, "by the not finding Titus as to me."

Taking my leave of them ( $\alpha \pi \sigma \tau \alpha \xi \alpha \mu \varepsilon \nu \circ \varsigma \alpha \cup \tau o \iota \varsigma)$. First aorist middle participle of $\alpha \pi o \tau \alpha \sigma \sigma \omega$, old verb, to set apart, in middle in late Greek to separate oneself, to bid adieu to as in Mr 6:46.

2Cor 2:14
But thanks be unto God ( $\tau \omega \delta \varepsilon \theta \varepsilon \omega \chi \alpha \rho ı \varsigma)$. Sudden outburst of gratitude in contrast to the previous dejection in Troas. Surely a new paragraph should begin here. In point of fact Paul makes a long digression from here to $6: 10$ on the subject of the Glory of the Christian Ministry as Bachmann points out in his Kommentar (p. 124), only he runs it from 2:12-7:1 (Aus der Tiefe in die Hohe, Out of the Depths to the Heights). We can be grateful
for this emotional outburst, Paul's rebound of joy on meeting Titus in Macedonia, for it has given the world the finest exposition of all sides of the Christian ministry in existence, one that reveals the wealth of Paul's nature and his mature grasp of the great things in service for Christ. See my The Glory of the Ministry (An Exposition of II Cor. 2:12-6:10).

Always ( $\pi \alpha \nu \tau 0 \tau \varepsilon$ ). The sense of present triumph has blotted out the gloom at Troas.
Leadeth in triumph ( $\theta \rho \stackrel{\alpha}{ } \mu \beta \varepsilon v o v \tau$ ). Late common Koine word from $\theta \rho ı \mu \mu$ os (Latin triumphus, a hymn sung in festal processions to Bacchus). Verbs in $-\varepsilon v \omega$ (like $\mu \alpha \theta \eta \tau \varepsilon v \omega$, to make disciples) may be causative, but no example of $\theta \rho ı \alpha \mu \beta \varepsilon v \omega$ has been found with this meaning. It is always to lead in triumph, in papyri sometimes to make a show of. Picture here is of Paul as captive in God's triumphal procession.

The savour ( $\tau \eta v o \sigma \mu \eta v$ ). In a Roman triumph garlands of flowers scattered sweet odour and incense bearers dispensed perfumes. The knowledge of God is here the aroma which Paul had scattered like an incense bearer.

2Cor 2:15
A sweet savour of Christ (Xpıбтov $\varepsilon v \omega \delta \iota \alpha)$. Old word from $\varepsilon v$, well, and $o \zeta \omega$, to smell. In N.T. only here and Php 4:18; Eph 5:2 . In spreading the fragrance of Christ the preacher himself becomes fragrant (Plummer).

In them that are perishing ( $\varepsilon v$ тоı $a \pi о \lambda \lambda \nu \mu \varepsilon v o \iota \varsigma)$. Even in these if the preacher does his duty.

2Cor 2:16
From death unto death ( $\varepsilon \kappa$ Өavazov $\varepsilon \iota \varsigma ~ \theta a v a \tau o v)$ ). From one evil condition to another. Some people are actually hardened by preaching.

And who is sufficient for these things? (ка лроц таита тıৎ ıкаvоб?). Rhetorical question. In himself no one is. But some one has to preach Christ and Paul proceeds to show that he is sufficient.

For we are not as the many ( $o v \gamma \alpha \rho \varepsilon \sigma \mu \varepsilon \nu \omega \varsigma$ o $\pi о \lambda \lambda o$ ). A bold thing to say, but necessary and only from God ( $3: 6$ ).

2Cor 2:17
Corrupting (калп $\lambda \varepsilon v o v \tau \varepsilon \varsigma)$. Old word from калп $\lambda$ о $\varsigma$, a huckster or peddlar, common in all stages of Greek for huckstering or trading. It is curious how hucksters were suspected of corrupting by putting the best fruit on top of the basket. Note Paul's solemn view of his relation to God as a preacher (from God $\varepsilon \kappa \theta \varepsilon o v$,
in the sight of God кatevavt $\theta \varepsilon o v$,
in Christ $\varepsilon v$ X $\rho \iota \sigma \tau \omega)$.

## 2 Corinthians 3

2Cor 3:1
To commend ourselves? (عavтouc $\sigma u v i \sigma \tau \alpha v \varepsilon ı v ?$ ). Late (Koine) form of $\sigma v v i \sigma \tau \eta \mu$, to place one with another, to introduce, to commend. Paul is sensitive over praising himself, though his enemies compelled him to do it.

Epistles of commendation ( $\sigma \cup \sigma \tau \alpha \tau \iota \kappa \omega v \varepsilon \pi \iota \sigma \tau o \lambda \omega v$ ). Late verbal adjective from $\sigma \cup v \iota \sigma \tau \eta \mu$ and often in the papyri and in just this sense. In the genitive case here after $\chi \rho \eta \downharpoonright \zeta \rho \mu \varepsilon$. Such letters were common as seen in the papyri (Deissmann, Light from the Ancient East, p. 226). N.T. examples of commending individuals by letters occur in Ac 15:25f.; 18:27 (Apollos), 1Co 16:10f. (Timothy); Ro 16:1 (Phoebe with the verb $\sigma u v i \sigma \tau \eta \mu) ; ~ C o l ~ 4: 10 ~(M a r k) ; ~ 2 C o ~$ 8:22f. (Titus and his companion).

2Cor 3:2
Ye are our epistle ( $\eta \varepsilon \pi \iota \sigma \tau o \lambda \eta \eta \mu \omega \nu \nu \mu \varepsilon \iota \varsigma \varepsilon \sigma \tau \varepsilon)$. Bold turn. Paul was writing in their hearts.

Known and read ( $\gamma \iota \omega \omega \sigma \kappa о \mu \varepsilon v \eta \kappa \alpha \alpha v \alpha \gamma \iota \nu \omega \sigma \kappa \circ \mu \varepsilon v \eta)$. Play on the word. Literally true. Professing Christians are the Bible that men read and know.

2Cor 3:3
An epistle of Christ ( $\varepsilon \pi \iota \sigma \tau 0 \lambda \eta$ X $\rho \iota \sigma \tau o v$ ). He turns the metaphor round and round. They are Christ's letter to men as well as Paul's.

Not with ink (ov $\mu \varepsilon \lambda \alpha v$ ). Instrumental case of $\mu \varepsilon \lambda \alpha \varsigma$, black. Plato uses to $\mu \varepsilon \lambda \alpha v$ for ink as here. See also 2Jo 1:12; 3Jo 1:13.

Of stone ( $\lambda_{\imath} \theta_{\imath}$ aıı). Composed of stone ( $\lambda_{\imath} \theta_{1}$ oc and ending -ıvoc).
Of flesh (баркıvaıя). "Fleshen" as in 1Co 3:1; Ro 7:14 .
2Cor 3:4
Through Christ ( $\delta ı \alpha$ tov Xpıбтov). It is not self-conceit on Paul's part, but through Christ.

2Cor 3:5
Of ourselves ( $\alpha \varphi^{\prime} \varepsilon \alpha \nu \tau \omega v$ ). Starting from ourselves (reflexive pronoun).
As from ourselves ( $\omega \varsigma \varepsilon \xi \alpha \cup \tau \omega v$ ). He says it over again with preposition $\varepsilon \xi$ (out of). He has no originating power for such confidence.

Sufficiency (ıкаvoтףऽ). Old word, only here in N.T.
2Cor 3:6
Who also made us sufficient for such confidence ( $о \varsigma \kappa \alpha ~ \kappa \kappa \alpha v \omega \sigma \varepsilon \vee \eta \mu \alpha \varsigma)$. Late causative verb from וкаvoৎ (verse 5) first aorist active indicative, "who (God) rendered us fit." In N.T. only here and Col 1:12.

As ministers of a new covenant ( $\delta \iota \alpha \kappa о \nu о \cup \varsigma ~ к а ı \nu \eta \varsigma \delta ı \theta \eta \kappa \eta \varsigma)$. Predicate accusative
 (fresh and effective) on $\operatorname{Lu}$ 5:38. Only God can make us that.

2Cor 3:7
Of death ( $\tau 0 v$ Өavatov). Subjective genitive, marked by death in its outcome (cf. 1Co 15:56; Ga 3:10). The letter kills.

Engraven on stones $\left(\varepsilon \nu \tau \varepsilon \tau \nu \pi \omega \mu \varepsilon \nu \eta \lambda_{ı} \theta o t \varsigma\right)$. Perfect passive participle of $\varepsilon \nu \tau \nu \pi o \omega$, late verb, to imprint a figure (титоৎ). Used by Aristias (67) of the "inlaid" work on the table sent by Ptolemy Philadelphus to Jerusalem. $\Lambda$ ı $\theta$ oıs in locative case.

Came with glory $(\varepsilon \gamma \varepsilon \vee \eta \theta \eta \varepsilon \vee \delta o \xi \eta)$. In glory. As it did, condition of first class, assumed as true. See Ex 34:29,35 .

Look steadfastly ( $\alpha \tau \varepsilon \nu\llcorner\sigma \alpha$ ). Late verb from $\alpha \tau \varepsilon \nu \eta \varsigma$ (stretched, intent, $\tau \varepsilon เ \nu \omega$ and $\alpha$ intensive) as in $\operatorname{Lu} 4: 20$; Ac 3:4 .

Was passing away ( $\kappa \alpha \tau \alpha \rho \gamma о \cup \mu \varepsilon \nu \eta \nu)$. Late verb, to render of no effect, and present passive participle here as in 1Co 2:6 .

2Cor 3:8
How shall not rather? ( $\pi \omega \varsigma$ ovर $\mu \alpha \lambda \lambda o v$ ?). Argumentum a minore ad majus (from the less to the greater).

Of the spirit ( $\tau 0 v \pi \nu \varepsilon v \mu \alpha \tau \sigma \varsigma)$. Marked by the spirit. Picture of the Christian ministry now.

2Cor 3:9
Of condemnation ( $\tau \eta \varsigma \kappa \alpha \tau \alpha \kappa \rho \iota \sigma \varepsilon \omega \varsigma)$. Genitive, that brings condemnation because unable to obey the law.

Is glory $\left(\delta_{o} \xi \alpha\right)$. No copula, but makes the figure bolder. Paul freely admits the glory for the old dispensation.

Of righteousness ( $\tau \eta \varsigma \delta ı \kappa \propto \iota \sigma \cup \nu \eta \varsigma)$. Marked by and leading to righteousness. See 11:15.
Much more ( $\pi 0 \lambda \lambda \omega \mu \alpha \lambda \lambda o v$ ). Instrumental case, by much more.
Exceed ( $\pi \varepsilon \rho \iota \sigma \sigma \varepsilon v \varepsilon)$. Overflow.
2Cor 3:10
In this respect ( $\varepsilon \nu \tau \operatorname{\tau ov} \omega \tau \tau \omega \mu \varepsilon \rho \varepsilon$ ). The glory on the face of Moses was temporary, though real, and passed away (verse 7), a type of the dimming of the glory of the old dispensation by the brightness of the new. The moon makes a dim light after the sun rises, "is not glorified" (ov $\delta \varepsilon \delta o \xi \alpha \sigma \tau \alpha$, perfect passive indicative of $\delta o \xi \alpha \zeta \omega$ ).

By reason of the glory that surpasseth ( $\varepsilon เ \nu \varepsilon \kappa \varepsilon \nu \tau \eta \varsigma v \pi \varepsilon \rho \beta \alpha \lambda \lambda о v \sigma \eta \varsigma \delta o \xi \eta \varsigma)$. The surpassing (v $\varepsilon \varepsilon \rho-\beta a \lambda \lambda \omega$, throwing beyond) glory. Christ as the Sun of Righteousness has thrown Moses in the shade. Cf. the claims of superiority by Christ in Mt 5-7 .

2Cor 3:11
Passeth away ( $\kappa \alpha \tau \alpha \rho \gamma о \cup \mu \varepsilon \nu о v)$. In process of disappearing before the gospel of Christ.

Remaineth ( $\mu \varepsilon v o v$ ). The new ministry is permanent. This claim may be recommended to those who clamour for a new religion. Christianity is still alive and is not dying. Note also $\varepsilon v \delta o \xi \eta$, in glory, in contrast with $\delta \iota \alpha \delta_{0} \xi \eta \varsigma$, with glory.

Boldness ( $\pi \alpha \rho \rho \eta \sigma \iota \alpha$ ). Instrumental case after $\chi \rho \omega \mu \varepsilon \theta \alpha$. Old word, $\pi \alpha v \rho \eta \sigma \iota \sigma=\pi \alpha \rho \rho \eta \sigma \iota$, , telling it all, absolute unreservedness. Surely Paul has kept nothing back here, no mental reservations, in this triumphant claim of superiority.

2Cor 3:13
Put a veil upon his face ( $\varepsilon \tau 1 \theta \varepsilon \kappa \alpha \lambda \nu \mu \mu \alpha \varepsilon \pi$ то $\pi \rho о \sigma \omega \pi \sigma \nu \alpha v \tau o v)$. Imperfect active of $\tau \iota \theta \eta \mu$, used to put (Ex 34:33).

That the children of Israel should not look steadfastly ( $\pi \rho \circ \varsigma$ тo $\mu \eta$ $\alpha \tau \varepsilon v i \sigma \alpha$ tovs viouc). Purpose expressed by $\pi \rho o \varsigma$ and the articular infinitive with negative $\mu \eta$ and the accusative of general reference. The Authorized Version had a wrong translation here as if to hide the glory on his face.

2Cor 3:14
But their minds were hardened ( $\alpha \lambda \lambda \alpha \varepsilon \pi \omega \rho \omega \theta \eta \tau \alpha$ von $\mu \alpha \tau \alpha \alpha \nu \tau \omega v$ ). Their thoughts (voquata) literally. П $\omega \rho 0 \omega$ (first aorist passive indicative here) is late verb from $\pi \omega \rho o \varsigma$, hard skin, to cover with thick skin (callus), to petrify. See on Mr 6:52; 8:17 .

Of the old covenant ( $\tau \eta \varsigma \pi \alpha \lambda \alpha \iota \alpha \varsigma \delta \iota \theta \eta \kappa \eta \varsigma)$. The Old Testament. Пa入 $\alpha \circ \varsigma$ (ancient) in contrast to kaıvos (fresh, verse 6). See Mt 13:52 .

The same veil (то avто $\kappa \alpha \lambda \nu \mu \mu \alpha$ ). Not that identical veil, but one that has the same effect, that blinds their eyes to the light in Christ. This is the tragedy of modern Judaism.

Unlifted ( $\mu \eta \alpha v \alpha \kappa \alpha \lambda \nu \pi \tau o \mu \varepsilon v o v$ ). Present passive participle of $\alpha v \alpha \kappa \alpha \lambda \nu \pi \tau \omega$, old verb, to draw back the veil, to unveil.

Is done away (катарүعita). Same verb as in verses 7,11.
2Cor 3:15
Whensoever Moses is read ( $\eta \nu ı \kappa \alpha \alpha v \alpha v \alpha \gamma เ v \omega \sigma \kappa \eta \tau \alpha$ M $\omega v \sigma \eta \varsigma$ ). Indefinite temporal clause with $\eta$ vika an and the present passive subjunctive.

A veil lieth upon their heart ( $\varepsilon \pi \tau \eta v \kappa \alpha \rho \delta \iota \alpha \nu \alpha \nu \tau \omega v \kappa \varepsilon \iota \tau \alpha$ ). Vivid and distressing picture, a fact that caused Paul agony of heart (Ro 9:1-5). With wilful blindness the rabbis set aside the word of God by their tradition in the time of Jesus (Mr 7:8f. ).

2Cor 3:16
It shall turn ( $\varepsilon \pi \iota \sigma \tau \rho \varepsilon \psi \varepsilon)$. The heart of Israel.
The veil is taken away ( $\pi \varepsilon \rho \iota \alpha \iota \varepsilon \iota \tau \alpha$ то $\kappa \alpha \lambda \nu \mu \mu \alpha$ ). Present passive indicative of $\pi \varepsilon \rho \iota \alpha \rho \varepsilon \omega$, old verb, to take from around, as of anchors (Ac 27:40), to cut loose (Ac 28:13), for hope to be taken away (Ac 27:20). Here Paul has in mind Ex 34:34 where we find of Moses that $\pi \varepsilon \rho ı \eta\llcorner\varepsilon \varepsilon \tau т о ~ т о ~ к а \lambda \nu \mu \mu \alpha$ (the veil was taken from around his face) whenever he went before the Lord. After the ceremony the veil is taken from around ( $\pi \varepsilon \rho t-)$ the face of the bride.

2Cor 3:17

Now the Lord is the Spirit (o $\delta \varepsilon$ Kvpıo $\tau$ тo $\pi v \varepsilon v \mu \alpha \varepsilon \sigma \tau i v$ ). Some, like E. F. Scott (The Spirit in the N.T.), take Kupıoc here to be Christ and interpret Paul as denying the personality of the Holy Spirit, identifying Christ and the Holy Spirit. But is not Bernard right here in taking Kıpıos (Lord) in the same sense here as in Ex $34: 34$ ( $\varepsilon v a v \tau$ Kvpıov, before the Lord), the very passage that Paul is quoting? Certainly, the Holy Spirit is interchangeably called in the N.T. the Spirit of God and the Spirit of Christ (Ro 8:9f. ). Christ dwells in us by the Holy Spirit, but the language here in 2Co 3:17 should not be pressed unduly (Plummer. See also P. Gardner, The Religious Experience of St. Paul, p. 176f.). Note "the Spirit of the Lord" here.

Liberty ( $\varepsilon \lambda \varepsilon \cup \theta \varepsilon \rho / \alpha)$. Freedom of access to God without fear in opposition to the fear in Ex 34:30. We need no veil and we have free access to God.

2Cor 3:18
We all ( $\eta \mu \varepsilon ı \varsigma \alpha \nu \tau \varepsilon \varsigma)$. All of us Christians, not merely ministers.
With unveiled face ( $\alpha v \alpha \kappa \varepsilon \kappa \alpha \lambda \nu \mu \mu \varepsilon v \omega \pi \rho \circ \sigma \omega \pi \omega)$. Instrumental case of manner. Unlike and like Moses.

Reflecting as in a mirror (католт $\rho \zeta \rho \mu \varepsilon v o$ ). Present middle participle of като $\tau \tau \rho \zeta \omega$, late verb from катопт $\rho \boldsymbol{v}$, mirror ( $\kappa \alpha \tau \alpha$, опт $\rho о v$, a thing to see with). In Philo (Legis Alleg. iii. 33) the word means beholding as in a mirror and that idea suits also the figure in 1Co 13:12. There is an inscription of third century B.C. with $\varepsilon \gamma \kappa \alpha \tau о \pi \tau \rho \iota \sigma \alpha \sigma \theta \alpha \varepsilon \iota \varsigma \tau \tau \delta \omega \rho$, to look at one's reflection in the water. Plutarch uses the active for mirroring or reflecting and Chrysostom takes it so here. Either makes good sense. The point that Paul is making is that we shall not lose the glory as Moses did. But that is true if we keep on beholding or keep on reflecting (present tense). Only here in N.T.

Are transformed ( $\mu \varepsilon \tau \alpha \mu о \rho \varphi о \nu \mu \varepsilon \theta \alpha$ ). Present passive (are being transformed) of $\mu \varepsilon \tau \alpha \mu о \rho \varphi о \omega$, late verb and in papyri. See on Mt 17:2; Mr 9:2 where it is translated "transfigured." It is the word used for heathen mythological metamorphoses.

Into the same image ( $\tau \eta \nu \alpha \nu \tau \eta \nu \varepsilon \nmid \kappa o v \alpha$ ). Accusative retained with passive verb $\mu \varepsilon \tau \alpha \mu о \rho \varphi о \cup \mu \varepsilon \theta \alpha$. Into the likeness of God in Christ (1Co 15:48-53; Ro 8:17,29; Col 3:4; 1Jo 3:2).

As from the Lord the Spirit ( $\kappa \alpha \forall \alpha \varepsilon \rho ~ \alpha \pi о ~ K v \rho ı o v ~ \pi v \varepsilon v \mu \alpha \tau о \varsigma) . ~ M o r e ~ l i k e l y, ~ " a s ~ f r o m ~$ the Spirit of the Lord."

## 2 Corinthians 4

2Cor 4:1
We faint not (оик $\varepsilon ү к а к о \nu \mu \varepsilon v$ ). Present active indicative of $\varepsilon \gamma \kappa \alpha \kappa \varepsilon \omega$, late verb ( $\varepsilon v$, какос) to behave badly in, to give in to evil, to lose courage. In Symmachus (LXX), Polybius, and papyri. It is the faint-hearted coward. Paul speaks of himself (literary plural). Can he not speak for all of us?

2Cor 4:2
But we have renounced ( $\alpha \lambda \lambda \alpha \alpha \pi \varepsilon i \pi \alpha \mu \varepsilon \theta \alpha$ ). Indirect middle second aorist (timeless aorist) indicative of $\alpha \pi \varepsilon ו \pi o v$ (defective verb) with $\alpha$ of first aorist ending, to speak forth, to speak off or away from. Common verb in the active, but rare in middle and only here in N.T.

The hidden things of shame ( $\tau \alpha \kappa \rho \cup \pi \tau \alpha \tau \eta \varsigma \alpha \mid \sigma \chi \cup v \eta \varsigma$ ). They do attack the minister. His only safety is in instant and courageous defiance to all the powers of darkness. It is a terrible thing to see a preacher caught in the toils of the tempter.

In craftiness ( $\varepsilon v \pi \alpha v o v \rho \gamma i \alpha)$. Old word from $\pi \alpha v o v \rho \gamma o \varsigma(\pi \alpha v, \varepsilon \rho \gamma \circ v)$, a doer of any deed (good or bad), clever, cunning, deceitful. See on Lu 20:23 .

Handling deceitfully ( $\delta \mathrm{o} \lambda \mathrm{ouvt} \mathrm{\varepsilon} \mathrm{\varsigma)} .\mathrm{Present} \mathrm{active} \mathrm{participle} \mathrm{of} \delta 0 \lambda 0 \omega$, from $\delta 0 \lambda \mathrm{oc}$, deceit (from $\delta \varepsilon \lambda \omega$, to catch with bait), old and common verb, in papyri and inscriptions, to ensnare, to corrupt with error. Only here in N.T. Used of adulterating gold or wine.

To every conscience of men ( $\pi \rho \circ \varsigma \pi \alpha \sigma \alpha v ~ \sigma v v \varepsilon \delta \eta \sigma \sigma v \alpha v \theta \rho \omega \pi \omega v$ ). Not to whim, foible, prejudice. See 3:1-6 for "commending" ( $\sigma 0 v / \sigma \tau \alpha v o v \tau \varepsilon \varsigma)$.

2Cor 4:3
 Periphrastic perfect passive of $\kappa \alpha \lambda \cup \pi \tau \omega$, to veil in both condition (first class) and conclusion. See on 2:15f. for "the perishing."

2Cor 4:4
The god of this world (o $\theta$ عoc tov alwvos tov tov). "Age," more exactly, as in 1Co 1:20 . Satan is "the god of this age," a phrase nowhere else in the N.T., but Jesus uses the same idea in Joh 12:31; 14:30 and Paul in Eph 2:2; 6:12 and John in 1Jo 5:19. Satan claimed the rule over the world in the temptations with Jesus.

Blinded ( $\varepsilon \tau v \varphi \lambda \omega \sigma \varepsilon v$ ). First aorist active of $\tau \cup \varphi \lambda$ o $\omega$, old verb to blind ( $\tau \cup \varphi \lambda$ oc, blind). They refused to believe $(\alpha \pi \iota \sigma \tau \omega v)$ and so Satan got the power to blind their thoughts. That happens with wilful disbelievers.

The light ( $\tau \circ v \varphi \omega \tau \iota \sigma \mu \circ v$ ). The illumination, the enlightening. Late word from $\varphi 0 \tau \iota \zeta \omega$, to give light, in Plutarch and LXX. In N.T. only in 2Co 4:4,6 . Accusative case of general reference here with the articular infinitive ( $\varepsilon \iota \varsigma \tau 0 \mu \eta \alpha \cup \gamma \alpha \sigma \alpha$ that should not dawn). That is, if $\alpha v \gamma \alpha \sigma \alpha$ is intransitive as is likely, though it is transitive in the old poets (from $\alpha u \gamma \eta$,
radiance. Cf. German Auge=eye). If it is transitive, the idea would be "that they should not see clearly the illumination, etc."

2Cor 4:5
For we preach not ourselves (ov $\gamma \alpha \rho$ عautov¢ к $\eta \rho \cup \sigma \sigma о \mu \varepsilon v)$. Surely as poor and disgusting a topic as a preacher can find.

But Christ Jesus as Lord ( $\alpha \lambda \lambda \alpha$ X $\rho ı \sigma \tau o v$ I $\eta \sigma o v v$ Kvpıov). Kvpıov is predicate accusative in apposition.

As your servants for Jesus' sake ( $\delta o u \lambda o v \varsigma ~ v \mu \omega v \delta \iota \alpha$ I $\eta \sigma o v v$ ). Your bond-slave for the sake of Jesus. This is the sufficient reason for any preacher's sacrifice, "for Jesus' sake."

2Cor 4:6
God who said (o $\theta \varepsilon o \varsigma$ o $\boldsymbol{\varepsilon} \varepsilon \pi \omega v$ ). Paraphrase of Ge 1:3.
Who shined (oc $\varepsilon \lambda \alpha \mu \psi \varepsilon v$ ). Like a lamp in the heart (cf. Mt 5:15). Miners carry a lamp on the forehead, Christians carry one in their hearts lit by the Spirit of God.

To give the light ( $\pi \rho \circ \varsigma \varphi \omega \tau \tau \sigma \mu \circ$ ). For the illumination.
In the face of Jesus Christ ( $\varepsilon v \pi \rho \circ \sigma \omega \pi \omega$ I $\eta \sigma o v$ X $\rho \iota \sigma \tau o v$ ). The Christian who looks on the face of Jesus Christ as Moses looked upon the glory of God will be able to give the illumination of the knowledge of the glory of God. See 2:10 for $\pi \rho \circ \sigma \omega \pi \sigma$.

2Cor 4:7
This treasure ( $\tau$ ov $\theta \eta \sigma \alpha u \rho o v ~ \tau o u \tau o v) . ~ O n ~ \theta \eta \sigma a v \rho o v ~ s e e ~ M t ~ 6: 19-21 . ~ I t ~ i s ~ t h e ~ p o w e r ~$ of giving the illumination of the knowledge of the glory of God (verse 6). "The power is limitless, but it is stored in very unlikely receptacles" (Plummer). This warning Paul gives in contrast ( $\delta \varepsilon$ ) with the exultation of verse 6 (Bernard).

In earthen vessels ( $\varepsilon v$ обтракıvoıs $\sigma \kappa \varepsilon \cup \varepsilon \sigma เ v$ ). This adjective is common in the LXX with $\sigma \kappa \varepsilon v o \sigma, \alpha \gamma \gamma \circ \varsigma$ and $\alpha \gamma \gamma \varepsilon \iota \circ v$. It occurs again in 2Ti 2:20 with $\sigma \kappa \varepsilon \cup \eta$. It is found also in
 so many fragments of which are found in Egypt with writing on them. We are but earthen jars used of God for his purposes (Ro 9:20ff.) and so fragile.

The exceeding greatness ( $\eta \cup \pi \varepsilon \rho \beta 0 \lambda \eta$ ). See on 1Co 12:31 for this word, "the preeminence of the power." This is God's purpose ( $1 v \alpha--\eta$ ). God, not man, is the
dynamo ( $\delta v v a \mu \iota \varsigma)$. It comes from God ( $\tau 0 v \theta \varepsilon o v$, ablative) and does not originate with us ( $\mu \eta \varepsilon \xi \eta \mu \omega v$ ).

2Cor 4:8
Pressed $\left(\theta \lambda_{1} \beta o \mu \varepsilon v o\right)$. From $\theta \lambda_{1} \beta \omega$, to press as grapes, to contract, to squeeze. Series of present passive participles here through verse 9 that vividly picture Paul's ministerial career.

Yet not straitened ( $\alpha \lambda \lambda^{\prime}$ ov $\sigma \tau \varepsilon v o \chi \omega \rho \sigma \nu \mu \varepsilon v o$ ). Each time the exception is stated by $\alpha \lambda \lambda^{\prime}$ ov. From $\sigma \tau \varepsilon v o \chi \omega \rho \varepsilon \omega$ ( $\sigma \tau \varepsilon v o \chi \omega \rho \circ \varsigma$, from $\sigma \tau \varepsilon v o \varsigma$, narrow, $\chi \omega \rho \circ \varsigma$, space), to be in a narrow place, to keep in a tight place. Late verb, in LXX and papyri. In N.T. only here and 2Co 6:12.

Yet not unto despair ( $\alpha \lambda \lambda^{\prime}$ оик $\varepsilon \xi \alpha \pi о \rho о \cup \mu \varepsilon v o$ ). Late perfective compound with $\varepsilon \xi$ - of $\varepsilon \xi \alpha \pi о \rho \varepsilon \omega$. A very effective play on words here, lost, but not lost out.

2Cor 4:9
Forsaken ( $\varepsilon \gamma \kappa \alpha \tau \alpha \lambda \varepsilon ı \pi о \mu \varepsilon v o$ ). Double compound of old verb $\varepsilon \gamma-\kappa \alpha \tau \alpha-\lambda \varepsilon \pi \pi \omega$, to leave behind, to leave in the lurch.

Smitten down ( $\kappa \alpha \tau \alpha \beta \alpha \lambda \lambda о \mu \varepsilon v o$ ). As if overtaken.
Destroyed ( $\alpha \pi \sigma \lambda \lambda \nu \mu \varepsilon v o$ ). Perishing as in verse 3. Was Paul referring to Lystra when the Jews stoned him and thought him dead?

2Cor 4:10
Bearing about ( $\pi \varepsilon р \iota \varphi \varepsilon \rho о \nu \tau \varepsilon \varsigma)$. Ignatius was called $\Theta \varepsilon о \varphi о \rho о \varsigma$, God-bearer. See 1Co 15:31 where Paul says "I die daily" and Php 3:10; Col 1:24 .

The dying of Jesus ( $\tau \eta \vee \nu \varepsilon \kappa \rho \omega \sigma \iota v$ tov I $\eta \sigma o v$ ). Late word from veкро $\omega$, to put to death. In Galen. In N.T. only here and Ro 4:19 .

2Cor 4:11
Are alway delivered unto death ( $\varepsilon \varsigma \varsigma ~ \theta \alpha v \alpha \tau о v \pi \alpha \rho \alpha \delta \iota \delta o \mu \varepsilon \theta \alpha)$. This explains verse 10. 2Cor 4:12
Death worketh in us (o $\theta \alpha v a \tau o \varsigma \varepsilon v \eta \mu \nu v \varepsilon v \varepsilon \rho \gamma \varepsilon ı \tau \alpha)$. Middle voice present tense of the old verb to operate, be at work. Physical death works in him while spiritual life (paradox) works in them.

2Cor 4:13
According to that which is written (ката то $\gamma \varepsilon \gamma \rho \alpha \mu \mu \varepsilon v o v$ ). This formula in legal documents in the papyri (Bible Studies, p. 250). Paul makes adaptation of the words in Ps 95:1 .

We also believe ( $\kappa \alpha \eta \mu \varepsilon ı \varsigma \pi \iota \sigma \tau \varepsilon v o \mu \varepsilon v$ ). Like the Psalmist. And therefore can speak with effect. Otherwise useless.

Shall present us with you ( $\kappa \alpha \pi \alpha \rho \alpha \sigma \tau \eta \sigma \varepsilon \sigma \cup v \eta \mu \nu v$ ). This shows that Paul was not certain that he would be alive when Jesus comes as has been wrongly inferred from 1Co 7:29; 10:11; 15:51.

2Cor 4:15
Being multiplied through the many ( $\pi \lambda \varepsilon o v \alpha \sigma \alpha \sigma \alpha \delta \iota \alpha \tau \omega \nu \pi \lambda \varepsilon \iota \sigma \omega \nu$ ). Late word $\pi \lambda \varepsilon o v a \zeta \omega$ from $\pi \lambda \varepsilon o v$, more, "making more through the more," with play on $\pi \lambda \varepsilon o v$. One can think of Bunyan's Grace Abounding.

2Cor 4:16
Wherefore we faint not ( $\delta$ ıо оик $\varepsilon ү к \alpha к о \cup \mu \varepsilon v$ ). Repeats from verse 1.
Our outward man (o $\varepsilon \xi \omega \eta \mu \omega \nu \alpha v \theta \rho \omega \pi \sigma \varsigma)$,
our inward man (o $\varepsilon \sigma \omega \eta \mu \omega v$ ). In Ro 7:22; Col 3:9; Eph 4:22f., we have the inward man and the outward for the higher and the lower natures (the spirit and the flesh). "Here the decay ( $\left.\delta \operatorname{la\varphi } \theta \varepsilon \_\rho \varepsilon \tau \alpha\right)$ of the bodily organism is set over against the growth in grace
(avaкaıvovta, is refreshed) of the man himself" (Bernard). Plato (Republ. ix, p. 589) has o $\varepsilon v \tau о \varsigma \alpha v \theta \rho \omega \pi \sigma \varsigma . \mathrm{Cf}$. "the hidden man of the heart" ( $1 \mathrm{Pe} 3: 4$ ).

Day by day ( $\eta \mu \varepsilon \rho \alpha \kappa \alpha \eta \mu \varepsilon \rho \alpha$ ). This precise idiom is not in LXX nor rest of N.T. It may be colloquial use of locative in repetition.

2Cor 4:17
Our light affliction which is for the moment ( $\tau о \pi \alpha \rho \alpha v \tau ı \kappa \alpha \varepsilon \lambda \alpha \varphi \rho о \nu \tau \eta \varsigma \theta \lambda ı \pi \varepsilon \sigma \varepsilon \omega \varsigma$ $\eta \mu \omega v$ ). Literally, "the for the moment (old adverb $\pi \alpha \rho \alpha v \tau \iota \kappa \alpha$, here only in N.T.) lightness (old word, in N.T. only here and Mt 11:30 )."

More and more exceedingly ( $\kappa \alpha \theta^{\prime} v \pi \varepsilon \rho \beta$ о $\lambda \eta v \varepsilon \iota \varsigma v \pi \varepsilon \rho \beta \circ \lambda \eta v$ ). Like piling Pelion on Ossa, "according to excess unto excess." See on 1Co 12:31 .

Eternal weight of glory ( $\alpha \iota \omega v ı v \beta \alpha \rho \circ \varsigma \delta o \xi \eta \varsigma$ ). Careful balancing of words in contrast (affliction vs. glory, lightness vs. weight, for the moment vs. eternal).

2Cor 4:18
While we look not ( $\mu \eta \sigma \kappa о \pi о \cup \nu \tau \omega \nu \eta \mu \omega \nu$ ). Genitive absolute with participle of $\sigma \kappa о \pi \varepsilon \omega$ from бколоя, goal.

Temporal ( $\pi \rho о \sigma \kappa \alpha \iota \rho \alpha$ ). Rather temporary, for a season ( $\pi \rho \circ \varsigma \kappa \alpha \iota \rho o v$ ). Late word. See on Mt 13:21. See 1Co 13:12; Heb 11:1 .

## 2 Corinthians 5

2Cor 5:1
If--be dissolved ( $\varepsilon \alpha v--\kappa \alpha \tau \alpha \lambda \nu \theta \eta$ ). Third class condition, $\varepsilon \alpha v$ and first aorist passive subjunctive. The very word used ( $\kappa \alpha \tau \alpha \lambda \nu \omega$ ) for striking down a tent.
 our earthly (see on 1Co 15:40 for $\varepsilon \pi \iota \gamma \varepsilon เ \circ \varsigma$ ) house of the tent ( $\sigma \kappa \eta \nu \circ \varsigma$, another form of $\sigma \kappa \eta \nu \eta$, tent, from root $\sigma \kappa \alpha$, to cover)." Appositive genitive, the house (огкıа) is the tent.

We have ( $\varepsilon \chi \circ \mu \varepsilon v$ ). Present indicative. We possess the title to it now by faith. "Faith is the title-deed (vтобтабוऽ) to things hoped for" (Heb 11:7).
 LXX, etc., and papyri, though condemned by Atticists) is more substantial than the $\sigma \kappa \eta v o c$.

Not made with hands ( $\alpha$ хєьотоıๆтоv). Found first in Mr 14:58 in charge against Jesus before the Sanhedrin (both the common verbal $\chi \varepsilon ו \rho о \pi о џ \eta \tau o v ~ a n d ~ t h e ~ n e w l y ~ m a d e ~ v e r n a c u l a r ~$ aұعıротоитто, same verbal with a privative). Elsewhere only here and Col 2:11 . Spiritual, eternal home.

2Cor 5:2
To be clothed upon with our habitation which is from heaven ( $\tau 0$ oıк $\eta \tau \rho \circ \frac{}{} \eta \mu \omega \nu$ $\tau$ т $\varepsilon \xi$ oupavov $\varepsilon \pi \varepsilon v \delta \nu \sigma \alpha \sigma \theta \alpha)$. First aorist middle infinitive of late verb $\varepsilon \pi \varepsilon v \delta \nu \omega$, double compound ( $\varepsilon \pi, \varepsilon v$ ) to put upon oneself. Cf. $\varepsilon \pi \varepsilon v \delta u \tau \eta \varsigma$ for a fisherman's linen blouse or upper garment (Joh 21:7). Oıкптпpıov is old word used here of the spiritual body as the abode of the spirit. It is a mixed metaphor (putting on as garment the dwelling-place).

2Cor 5:3
Being clothed ( $\varepsilon v \delta v \sigma a \mu \varepsilon v o$ ). First aorist middle participle, having put on the garment.
Naked ( $\gamma \nu \mu \nu 0$ ). That is, disembodied spirits, "like the souls in Sheol, without form, and void of all power of activity" (Plummer).

2Cor 5:4
Not for that we would be unclothed ( $\varepsilon \varphi^{\prime} \omega$ ov $\theta \varepsilon \lambda о \mu \varepsilon v \varepsilon \kappa \delta v \sigma \alpha \sigma \theta \alpha$ ). Rather, "For that ( $\varepsilon \varphi^{\prime} \omega$ ) we do not wish to put off the clothing, but to put it on" ( $\alpha \lambda \lambda^{\prime} \varepsilon \pi \varepsilon v \delta \nu \sigma \alpha \sigma \theta \alpha$ ). The transposition of the negative ov weakens the sense. Paul does not wish to be a mere disembodied spirit without his spiritual garment.

That what is mortal may be swallowed up of life (ıva каталоӨ $\eta$ то $\theta \nu \eta \tau о v$ vто $\tau \eta \varsigma$ $\zeta \omega \eta \varsigma)$. "Only what is mortal perishes; the personality, consisting of soul and body, survives," (Plummer). See on 1:22 for "the earnest of the spirit."

2Cor 5:6
At home in the body ( $\varepsilon v \delta \eta \mu о v \nu \tau \varepsilon \varsigma \varepsilon v \tau \omega \sigma \omega \mu \alpha \tau$ ). Rare verb $\varepsilon v \delta \eta \mu \varepsilon \omega$ from $\varepsilon v \delta \eta \mu \circ \varsigma$ (one among his own people as opposed to $\varepsilon \kappa \delta \eta \mu \circ \varsigma$, one away from home). Both $\varepsilon \kappa \delta \eta \mu \varepsilon \omega$
(more common in the old Greek) and $\varepsilon v \delta \eta \mu \varepsilon \omega$ occur in the papyri with the contrast made by Paul here.

2Cor 5:7
By sight ( $\delta$ ı $\alpha$ عıoovऽ). Rather, by appearance.
2Cor 5:8
We are of good courage $(\theta \alpha \rho \rho o v \mu \varepsilon v)$. Good word for cheer and same root as $\theta \alpha \rho \sigma \varepsilon \omega$ (Mt 9:2,22 ). Cheer up.

Are willing rather ( $\varepsilon v \delta o \kappa o v \mu \varepsilon v$ ). Rather, "We are well-pleased, we prefer" if left to ourselves. Cf. Php 1:21f. Same $\varepsilon \cup \delta$ oк $\varepsilon \omega$ used in Lu 3:22 .

To be at home with the Lord ( $\varepsilon v \delta \eta \mu \eta \sigma \alpha \pi \rho \circ \varsigma ~ \tau o v ~ K v \rho ı v)$ ). First aorist (ingressive) active infinitive, to attain that goal is bliss for Paul.

2Cor 5:9
We make it our aim ( $\varphi i \lambda о \tau \mu \rho v \mu \varepsilon \theta \alpha$ ). Old and common verb, present middle, from $\varphi \iota \lambda о \tau \mu \mu \sigma$ ( $\varphi \backslash \lambda$ oб, $\tau \iota \mu \eta$, fond of honour), to act from love of honour, to be ambitious in the good sense (1Th 4:11; 2Co 5:9; Ro 15:20). The Latin ambitio has a bad sense from ambire, to go both ways to gain one's point.

To be well-pleasing to him ( $\varepsilon v a \rho \varepsilon \sigma \tau o ~ a v \tau \omega ~ \varepsilon ı v a$ ). Late adjective that shows Paul's loyalty to Christ, his Captain. Found in several inscriptions in the Koine period (Deissmann, Bible Studies, p. 214; Moulton and Milligan's Vocabulary).

2Cor 5:10
 $\beta \eta \mu \alpha$, a step (from $\beta a \iota v \omega$ ), a platform, the seat of the judge (Mt 27:19). Christ is Saviour, Lord, and Judge of us all ( $\tau 0 \cup \varsigma \pi \alpha v \tau \alpha \varsigma$, the all).

That each may receive ( $\imath \alpha \alpha \kappa о \mu \iota \sigma \eta \tau \alpha$ єкабтоऽ). Receive as his due, ко $\mu \zeta \omega$ means, old verb. See on Mt 25:27.

Bad ( $\varphi$ au $\lambda \mathrm{ov}$ ). Old word, akin to German faul, worthless, of no account, base, wicked. 2Cor 5:11
The fear of the Lord ( $\tau 0 v \varphi o \beta o v$ tov Kupıov). Many today regard this a played-out motive, but not so Paul. He has in mind verse 10 with the picture of the judgment seat of Christ.

We persuade ( $\pi \varepsilon \mid \theta \rho \mu \varepsilon v)$. Conative present active, we try to persuade. It is always hard work.

Unto God $(\theta \varepsilon \omega)$. Dative case. God understands whether men do or not.
That we are made manifest ( $\pi \varepsilon \varphi \alpha v \varepsilon \rho \omega \sigma \theta \alpha$ ). Perfect passive infinitive of $\varphi \alpha v \varepsilon \rho \sigma \omega$ in indirect discourse after $\varepsilon \lambda \pi \iota \zeta \omega$. Stand manifested, state of completion.

2Cor 5:12

As giving you occasion of glorying ( $\alpha \varphi \rho \rho \mu \eta \nu \delta i \delta o \nu \tau \varepsilon \varsigma \nu \mu \nu \nu \kappa \alpha \cup \chi \eta \mu \alpha \tau \sigma \varsigma)$. An old Greek word ( $\alpha \pi 0, ~ о \rho \mu \eta$, onset, rush), a base of operations, material with which to glory, as we say "a tip" only much more.

That ye may have wherewith to answer ( $\imath v \alpha \varepsilon \chi \eta \tau \varepsilon \pi \rho \circ \varsigma)$. Literally, "That ye may have something against (for facing those, etc.)." Paul wishes his champions in Corinth to know the facts.

In appearance, and not in heart ( $\varepsilon v \pi \rho \circ \sigma \omega \pi \omega \kappa \alpha \mu \eta \varepsilon v \kappa \alpha \rho \delta \Delta \alpha$ ). He means the Judaizers who were braggarts about their orthodox Judaism.

2Cor 5:13
Whether we are beside ourselves ( $\varepsilon ા \tau \varepsilon \varepsilon \xi \varepsilon \sigma \tau \eta \mu \varepsilon v)$. Second aorist active indicative of $\varepsilon \xi \iota \sigma \tau \eta \mu$, old verb, here to stand out of oneself (intransitive) from $\varepsilon \kappa \sigma \tau \alpha \sigma \iota \varsigma$, ecstasy, comes as in Mr 5:42 . It is literary plural, for Paul is referring only to himself. See on 1:6 for $\varepsilon$ عाtع-$\varepsilon \iota \varepsilon$. It is a condition of the first class and Paul assumes as true the charge that he was crazy (if I was crazy) for the sake of argument. Festus made it later (Ac 26:24 ). He spoke with tongues (1Co 14:18) and had visions (2Co 12:1-6 ) which probably the Judaizers used against him. A like charge was made against Jesus (Mr 3:21). People often accuse those whom they dislike with being a bit off.

2Cor 5:14
The love of Christ ( $\eta$ a $\gamma \alpha \pi \eta$ tov Xpıбтov). Subjective genitive, Christ's love for Paul as shown by verse 15 .

Constraineth us ( $\sigma v v \varepsilon \chi \varepsilon \eta \mu \alpha \varsigma$ ). Old and common verb, to hold together, to press the ears together (Ac 7:57) , to press on every side ( $\operatorname{Lu} 8: 45$ ), to hold fast ( $\operatorname{Lu}$ 22:63 ), to hold oneself to (Ac 18:5) , to be pressed (passive, Lu 12:50; Php 1:23 ). So here Paul's conception of Christ's love for him holds him together to his task whatever men think or say.

Judging this (крıvavtac tovto). Having reached this conclusion, ever since his conversion (Ga 1:17f.).

One died for all ( $\varepsilon ા \varsigma \nu \pi \varepsilon \rho \pi \alpha \nu \tau \omega v \alpha \pi \varepsilon \theta \alpha v \varepsilon v)$. This is the central tenet in Paul's theology and Christology. Hu $\quad \varepsilon \rho$ (over) here is used in the sense of substitution as in Joh 11:50; Ga 3:13, death in behalf so that the rest will not have to die. This use of $u \pi \varepsilon \rho$ is common in the papyri (Robertson, Grammar, p. 631). In fact, v $\pi \varepsilon \rho$ in this sense is more usual in Greek than $\alpha \nu \tau \iota, \pi \rho o$ or any other preposition.

Therefore all died ( $\alpha \rho \alpha$ o $\pi \alpha \nu \tau \varepsilon \varsigma ~ \alpha \pi \varepsilon \theta \alpha v o v$ ). Logical conclusion ( $\alpha \rho \alpha$, corresponding), the one died for the all and so the all died when he did, all the spiritual death possible for those for whom Christ died. This is Paul's gospel, clear-cut, our hope today.

2Cor 5:15
Should no longer live unto themselves (ıva $\mu \eta \kappa \varepsilon \tau$ عavтoıৎ $\zeta \omega \sigma \iota v$ ). The high doctrine of Christ's atoning death carries a correspondingly high obligation on the part of those who
live because of him. Selfishness is ruled out by our duty to live "unto him who for their sakes died and rose again."

2Cor 5:16
Henceforth ( $\alpha \pi 0$ रov $v v v$ ). From the time that we gained this view of Christ's death for us.

After the flesh ( $\kappa \alpha \tau \alpha \sigma \alpha \rho \kappa \alpha)$. According to the flesh, the fleshy way of looking at men. He, of course, knows men "in the flesh ( $\varepsilon v \tau \eta \sigma \alpha \rho \kappa$ ), but Paul is not speaking of that. Worldly standards and distinctions of race, class, cut no figure now with Paul (Ga 3:28) as he looks at men from the standpoint of the Cross of Christ.

Even though we have known Christ after the flesh ( $\varepsilon \kappa \alpha \varepsilon \gamma \nu \omega \kappa \alpha \mu \varepsilon \nu \kappa \alpha \tau \alpha \sigma \alpha \rho \kappa \alpha$ X $\rho \iota \sigma \tau o v$ ). Concessive clause ( $\varepsilon \kappa \alpha$, if even or also) with perfect active indicative. Paul admits that he had once looked at Christ кат $\sigma \alpha \rho \kappa \alpha$, but now no longer does it. Obviously he uses $\kappa \alpha \tau \alpha \sigma \alpha \rho \kappa \alpha$ in precisely the same sense that he did in verse 15 about men. He had before his conversion known Christ ката ба $\kappa \kappa$, according to the standards of the men of his time, the Sanhedrin and other Jewish leaders. He had led the persecution against Jesus till Jesus challenged and stopped him (Ac 9:4). That event turned Paul clean round and he no longer knows Christ in the old way ката барка. Paul may or may not have seen Jesus in the flesh before his death, but he says absolutely nothing on that point here.

2Cor 5:17
A new creature ( $\kappa \alpha \iota v \eta \kappa \tau \iota \sigma \iota \varsigma)$. A fresh start is made ( $\kappa \alpha \iota \nu \eta)$ ). K $\tau \iota \sigma \iota \varsigma$ is the old word for the act of creating (Ro 1:20), but in N.T. by metonymy it usually bears the notion of $\kappa \tau \iota \sigma \mu \alpha$, the thing created or creature as here.

The old things are passed away ( $\tau \alpha \alpha \rho \chi \alpha \prime \alpha \pi \alpha \rho \eta \lambda \theta \varepsilon v)$. Did pass by, he means. Second aorist active of $\pi \alpha \rho \varepsilon \rho \chi \circ \mu \alpha$, to go by. The ancient ( $\alpha \rho \chi \alpha \iota \alpha$ ) way of looking at Christ among other things. And yet today there are scholars who are trying to revive the old prejudiced view of Jesus Christ as a mere man, a prophet, to give us "a reduced Christ." That was once Paul's view, but it passed by forever for him. It is a false view and leaves us no gospel and no Saviour.

Behold, they are become new (ı $\delta o v, \gamma \varepsilon \gamma \circ v \varepsilon \kappa \alpha \iota v \alpha$ ). Perfect active indicative of $\gamma เ v \circ \mu \alpha$, have become new (fresh, kaiva) to stay so.

2Cor 5:18
Who reconciled us to himself through Christ ( $\tau 0 v \kappa \alpha \tau \alpha \lambda \lambda \alpha \xi \nu \tau \circ \varsigma \eta \mu \alpha \varsigma \varepsilon \alpha v \tau \omega \delta \iota \alpha$ X $\rho \iota \sigma \tau 0 v$ ). Here Paul uses one of his great doctrinal words, $\kappa \alpha \tau \alpha \lambda \lambda \alpha \sigma \sigma \omega$, old word for exchanging coins. $\Delta \mathrm{t} \alpha \lambda \lambda \alpha \sigma \sigma \omega$, to change one's mind, to reconcile, occurs in N.T. only in Mt 5:24 though in papyri (Deissmann, Light from the Ancient East, p. 187), and common in Attic. Kat $\alpha \lambda \lambda \alpha \sigma \sigma \omega$ is old verb, but more frequent in later writers. We find $\sigma v v \alpha \lambda \lambda \alpha \sigma \sigma \omega$ in Ac 7:26 and $\alpha \pi о \kappa \alpha \tau \alpha \lambda \lambda \alpha \sigma \sigma \omega$ in Col 1:20f.; Eph 2:16 and the substantive кат $\alpha \lambda \lambda \alpha \gamma \eta$ in Ro $5: 11 ; 11: 15$ as well as here. It is hard to discuss this great theme without apparent contradic-
tion．God＇s love（Joh 3：16 ）provided the means and basis for man＇s reconciliation to God against whom he had sinned．It is all God＇s plan because of his love，but God＇s own sense of justice had to be satisfied（Ro 3：26）and so God gave his Son as a propitiation for our sins （Ro 3：25；Col 1：20；1Jo 2：2；4：10 ）．The point made by Paul here is that God needs no recon－ ciliation，but is engaged in the great business of reconciling us to himself．This has to be done on God＇s terms and is made possible through（ $\delta \mathbf{\alpha}$ ）Christ．

And gave unto us the ministry of reconciliation（ $\kappa \alpha \delta o v \tau о \varsigma ~ \eta \mu \nu \nu \tau \eta \nu \delta \iota \alpha \kappa о \nu \iota \alpha \nu \tau \eta \varsigma$ ката入入аүпऽ）．It is a ministry marked by reconciliation，that consists in reconciliation．God has made possible through Christ our reconciliation to him，but in each case it has to be made effective by the attitude of each individual．The task of winning the unreconciled to God is committed to us．It is a high and holy one，but supremely difficult，because the of－ fending party（the guilty）is the hardest to win over．We must be loyal to God and yet win sinful men to him．

2Cor 5：19
To wit，that（ $\omega \varsigma \bigcirc \tau$ ）．Latin puts it quoniam quidem．It is an unclassical idiom，but occurs in the papyri and inscriptions（Moulton，Prol．，p．212；Robertson，Grammar，p．1033）．It is in Es 4：14．See also 2Co 11：21；2Th 2：2 ．It probably means＂how that．＂

Not reckoning（ $\mu \eta \lambda$ оүı $\zeta о \mu \varepsilon v o \varsigma)$ ．What Jesus did（his death for us）stands to our credit（Ro 8：32）if we make our peace with God．This is our task，＂the word of reconciliation，＂ that we may receive＂the righteousness of God＂and be adopted into the family of God．

2Cor 5：20
We are ambassadors therefore on behalf of Christ（v $\tau \varepsilon \rho$ Xрıбтоv ouv $\pi \rho \varepsilon \sigma \beta \varepsilon v o \mu \varepsilon v$ ）． Old word from $\pi \rho \varepsilon \sigma \beta v \varsigma$ ，an old man，first to be an old man，then to be an ambassador（here and Eph 6：20 with $\varepsilon v \alpha \lambda \nu \sigma \eta$ in a chain added），common in both senses in the Greek．＂The proper term in the Greek East for the Emperor＇s Legate＂（Deissmann，Light from the Ancient East，p．374），in inscriptions and papyri．So Paul has a natural pride in using this dignified term for himself and all ministers．The ambassador has to be persona grata with both countries（the one that he represents and the one to which he goes）．Paul was Christ＇s Legate to act in his behalf and in his stead．
 absolute with $\omega \varsigma$ used with the participle as often to give the reason（apparent or real）．Here God speaks through Christ＇s Legate．

Be ye reconciled to God（ката入入аүף $\tau \varepsilon \tau \omega \theta \varepsilon \omega$ ）．Second aorist passive imperative of $\kappa \alpha \tau \alpha \lambda \lambda \alpha \sigma \sigma \omega$ and used with the dative case．＂Get reconciled to God，＂and do it now．This is the ambassador＇s message as he bears it to men from God．

2Cor 5：21
Him who knew no sin（ $\tau 0 v \mu \eta \gamma v o v \tau \alpha \alpha \mu \alpha \rho \tau \iota \alpha v$ ）．Definite claim by Paul that Jesus did not commit sin，had no personal acquaintance（ $\mu \eta \gamma \nu 0 v \tau \alpha$ ，second aorist active participle
of $\gamma ı \nu \omega \sigma \kappa \omega$ ) with it. Jesus made this claim for himself (Joh 8:46). This statement occurs also in 1Pe 2:22; Heb 4:15; 7:26; 1Jo 3:5. Christ was and is "a moral miracle" (Bernard) and so more than mere man.

He made to be $\sin (\alpha \mu \alpha \rho \tau \iota \alpha v \varepsilon \pi о ı \eta \sigma \varepsilon v)$. The words "to be" are not in the Greek. "Sin" here is the substantive, not the verb. God "treated as sin" the one "who knew no sin." But he knew the contradiction of sinners (Heb 12:3). We may not dare to probe too far into the mystery of Christ's suffering on the Cross, but this fact throws some light on the tragic cry of Jesus just before he died: "My God, My God, why didst thou forsake me?" (Mt 27:46 ).

That we might become ( $\imath v \alpha \eta \mu \varepsilon \varsigma ~ \gamma \varepsilon v \omega \mu \varepsilon \theta \alpha$ ). Note "become." This is God's purpose ( $\mathrm{i} \alpha$ ) in what he did and in what Christ did. Thus alone can we obtain God's righteousness (Ro 1:17).

## 2 Corinthians 6

2Cor 6:1
Working together with him ( $\sigma \cup v \varepsilon \rho \gamma о u v \tau \varepsilon \varsigma)$. We are co-workers, partners with God (1Сo 3:9), in this work of grace.

In vain ( $\varepsilon ı \varsigma \kappa \varepsilon v o v)$ ). Into emptiness. The plan of God, the work of Christ on the Cross, the pleas of the ambassador may all be nullified by the recipient of the message.

2Cor 6:2
 "Pauline parenthesis" (Plummer) as in 5:7 by the quotation from Isa 49:8 . The LXX has $\delta \varepsilon \kappa \tau о \varsigma$ ( $\delta \varepsilon \kappa \tau 0$ ) verbal of $\delta \varepsilon \chi \circ \mu \alpha$, but Paul employs the double compound ( $\varepsilon v, \pi \rho о \sigma, \delta \varepsilon \kappa \tau о \varsigma)$, well-received. It occurs in Aristophanes, Plutarch, inscription, etc.

2Cor 6:3
Giving no occasion of stumbling in any thing ( $\mu \eta \delta \varepsilon \mu \mu \alpha v \varepsilon v \mu \eta \delta \varepsilon v \delta \iota \delta o v \tau \varepsilon \varsigma \pi \rho \circ \sigma \kappa о \pi \eta v)$. Пробкопๆ, late word (Polybius, LXX), from $\pi \rho о \sigma \kappa о \pi \tau \omega$, to strike against, to stumble. Only here in N.T. Note double negative in the Greek.

That the ministry be not blamed (ıva $\mu \eta \mu \omega \mu \eta \eta \eta \eta \delta$ taкovia). Negative purpose (iva $\mu \eta)$. First aorist passive subjunctive of old verb $\mu \omega \mu \alpha \circ \mu \alpha$ from $\mu \omega \mu \sigma$, blot, blemish. One can read with profit J. A. Hutton's Warrack Lectures, That the Ministry Be Not Blamed.

2Cor 6:4
But in everything commending ourselves ( $\left.\alpha \lambda \lambda^{\prime} \varepsilon \nu \pi \alpha \nu \tau \sigma \cup v / \sigma \tau \alpha v o v \tau \varepsilon \varsigma \varepsilon \alpha \cup \tau 0 v \varsigma\right)$. Paul gives a marvellous summary of his argument about the dignity and glory of ministers of Christ as
ministers of God ( $\omega \varsigma \theta \varepsilon \sigma v \delta$ (aкovo) under three aspects, the first with
in ( $\varepsilon v$ ) verses $3-$, the second with
by ( $\delta \mathrm{\iota} \alpha)$ verses $7 \mathrm{~b}, 8$, the third with
as ( $\omega \varsigma$ ) verses $9-10$. The negative view with $\varepsilon v$ we have in verse 3 , then the positive in verses 4- . Each word carries a story that can be filled in from Paul's own life as a preacher with an echo in that of us all.

In distresses ( $\varepsilon v \sigma \tau \varepsilon v o \chi \omega \rho ı a ı$ ). In tight places (12:10). Late word from $\sigma \tau \varepsilon v o \chi \omega \rho \varepsilon \omega$ (see on 4:8).

2Cor 6:5
In stripes ( $\varepsilon v \pi \lambda \eta \gamma \alpha / \overline{)}$ ). In blows, wounds ( $\mathrm{Lu} 10: 30 ; 12: 48$; Ac 16:23,33 ). Our plague.
In tumults ( $\varepsilon v$ акатабтабıaı). See on 1Co 14:33). Instabilities, often from politics.
In watchings ( $\varepsilon v \alpha \gamma \rho \cup \pi v i a ı \varsigma)$. In sleeplessnesses, instances of insomnia. Old word, in N.T. only here and 11:27. Paul knew all about this.

2Cor 6:6

In love unfeigned ( $\varepsilon v \alpha \gamma \alpha \pi \eta$ аvитокрı $\omega$ ). Late and rare word ( $\alpha$ privative and итокрıтоৎ, from vтокрıгона) This is the only love that is worth while (Ro 12:9).

2Cor 6:7
On the right hand and on the left ( $\tau \omega v \delta \varepsilon \xi \iota \omega v \kappa \alpha \alpha \rho \iota \sigma \tau \varepsilon \rho \omega v$ ). Offensive weapons ( $o \pi \lambda \omega v$ ) on the right, defensive on the left. See 1Th 5:8; Eph 6:11 for Paul's description of the panoply of God and Ro 6:13 for the phrase "weapons of righteousness," the only kind that will stand the strain. See also Book of Wisdom 5:18ff.

## 2Cor 6:8

By glory and dishonour ( $\left.\delta \iota \alpha \delta_{0} \xi_{\eta} \varsigma \kappa \alpha \alpha \tau \mu \mu \varsigma\right)$ ). Here $\delta \iota \alpha$ is no longer instrument, but state or condition. $\Delta \mathrm{o} \xi \alpha$ here is glory. See Ro 9:21; 2Ti 2:20 for contrast between honour and dishonour ( $\tau \mu \eta, \alpha \tau \mu \mu \alpha$ ).

By evil report and good report ( $\delta \iota \alpha \delta v \sigma \varphi \eta \mu \mu \varsigma \kappa \alpha \varepsilon \cup \varphi \eta \mu \alpha \varsigma$ ). Play on the words with prefixes $\delta v \sigma$ - and $\varepsilon v$ - and $\varphi \eta \mu \eta$. $\Delta v \sigma \varphi \eta \mu \mu$ is a late word, only here in N.T. Ev $\varphi \eta \mu \alpha$, old and common word, only here in N.T.

As deceivers and yet true ( $\omega \varsigma \pi \lambda \alpha$ vo $\kappa \alpha \alpha \lambda \eta \theta \varepsilon \iota)$ ). Paul takes up $\omega \varsigma$ now in place of $\delta \iota \alpha$ which succeeded $\varepsilon v$. Note use of $\kappa \alpha$ in sense of "and yet" (adversative). П $\Pi \alpha v o c$ is late word (Diodorus, Josephus) for wandering, vagabond, impostor (cf. $\pi \lambda \alpha v \alpha \omega$, to lead astray, used of Christ, Joh 7:12 ). In N.T. only here; Mt 27:63 (of Christ by Pharisees); 2Jo 1:7 . "In the Clementines St. Paul is expressly described by his adversaries as $\pi \lambda a v o \varsigma$ and as disseminating deceit ( $\pi \lambda \alpha v \eta \nu$ )" (Bernard). Such slander from one's enemies is praise.

2Cor 6:9
As unknown and yet well known ( $\omega \varsigma \alpha \gamma v o o \cup \mu \varepsilon v o ~ к \alpha ~ \varepsilon \pi เ \gamma เ v o \sigma к о \mu \varepsilon v o$ ). "As ignored (as nonentities, obscure, without proper credentials $3: 2$ ) and yet fully recognized (by all who really matter as in 11:6)."

And behold, we live ( $\kappa \alpha \iota \delta o v \zeta \omega \mu \varepsilon v$ ). Cf. the hazards of his life ( $1: 8 ; 4: 10 ; 11: 23$ ). His whole career is full of paradox).

2Cor 6:10
Always rejoicing (aع $\chi$ वı $\rho 0$ vte¢). Even in sorrow (11:9; 1Th 5:16; Ro 5:3-5; 9:2; Php 2:18,27; 3:1; 4:4,15 ).
 to enrich. Spiritual riches Paul has in mind as in 1Co 1:5 (cf. Mt 5:37).

As having nothing and yet possessing all things ( $\omega \varsigma \mu \eta \delta \varepsilon \nu \varepsilon \chi \circ \nu \tau \varepsilon \varsigma \kappa \alpha \pi \alpha \nu \tau \alpha$ катєरovtec). Contrast between $\mu \eta \delta \varepsilon v$ (nothing) and $\pi \alpha v \tau \alpha$ (all things, cf. 1Co 3:22) and $\varepsilon \chi \omega$ (to have) and кат $\varepsilon \chi \omega$ (to hold down, to hold fast). Play on words (simple and compound) as in 3:2; 4:8. Climax of Paul's panegyric on the Christian ministry. He now resumes the thread of the story broken off in 2:14.

2Cor 6:11

Our mouth is open unto you ( $\tau 0 \sigma \tau о \mu \alpha ~ \eta \mu \omega v \alpha v \varepsilon \omega \tau \gamma \varepsilon v \pi \rho o \varsigma v \mu \alpha \varsigma$ ). Second perfect active indicative of $\alpha v o l \gamma \omega$ and intransitive, stand open. He has kept back nothing in his portrayal of the glory of the ministry as the picture of the open mouth shows.

Our heart is enlarged ( $\eta \kappa \alpha \rho \delta \iota \alpha ~ \eta \mu \omega \nu \pi \varepsilon \pi \lambda \alpha \tau \nu \nu \tau \alpha$ ). Perfect passive indicative of old verb $\pi \lambda \alpha \tau v v \omega$, to broaden, from $\pi \lambda \alpha \tau v$, , broad. In N T. only here and Mt 23:5 (cf. phylacteries). Hence his freedom of speech for "out of the abundance of the heart the mouth speaks" (Mt 12:34).

2Cor 6:12
Ye are not straitened in us (ov $\sigma \tau \varepsilon v o \chi \omega \rho \varepsilon \iota \sigma \theta \varepsilon \varepsilon v \eta \mu \nu v$ ). The same figure as in verse 11. See on $4: 8$ for $\sigma \tau \varepsilon v o \chi \omega \rho \varepsilon \omega$. There is no restraint in me (my heart). My adversaries may have caused some of you to tighten up your affections ( $\sigma \pi \lambda \alpha \gamma \chi$ va for affection as in Jas 5:11; 1Pe 3:8).

2Cor 6:13
Now for a recompense in like kind ( $\tau \eta \nu \delta \varepsilon \alpha \nu \tau \eta \nu \alpha \nu \tau \mu \mu \sigma \theta \iota \alpha v$ ). No example of this expressive word outside of this passage and Ro 1:27 and later Christian writers. Paul may have found it in use in the Koine vernacular or he may have coined it from $\alpha v \tau \tau \mu \sigma \theta$ os, remunerating (paying back). There is no verb here to explain the accusative which may be the accusative of general reference or the object of a verb not expressed.

Be ye also enlarged ( $\pi \lambda \alpha \tau v v \theta \eta \tau \varepsilon \kappa \alpha \nu \mu \varepsilon \iota \varsigma)$. As I have been (verse 11). First aorist passive imperative of $\pi \lambda \alpha \tau v v \omega$.

2Cor 6:14
 other example of this verb has yet been found, though the adjective from which it is apparently formed, $\varepsilon \tau \varepsilon \rho \circ \zeta \cup \gamma \circ \varsigma$ (yoked with a different yoke) occurs in Le 19:19 of the union of beasts of different kinds. In De 22:10 we read: "Thou shalt not plough with an ox and an ass together." Literally, "Stop becoming ( $\mu \eta \gamma \iota \nu \varepsilon \sigma \theta \varepsilon$ present imperative, not $\mu \eta \gamma \varepsilon \nu \eta \sigma \theta \varepsilon$ aorist subj.) unequally yoked with unconverted heathen (unbelievers)." Some were already guilty. Marriage is certainly included, but other unions may be in mind. Cf. Eph 5:7. Paul gives as the reason ( $\gamma \alpha \rho$ ) for this prohibition five words in questions to distinguish the contrasts.

Fellowship ( $\mu \varepsilon \tau о \chi \eta$ ). Sharing with and followed by associative instrumental case of $\delta \iota \kappa \alpha \ldots \sigma \cup v \eta$ (righteousness) and iniquity ( $\alpha v \circ \mu \alpha)$ ). A pertinent challenge today when church members wink at violations of laws of the land and laws of God.

Communion ( $\kappa о \iota v \omega v i \alpha)$. Partnership to light ( $\varphi \omega \tau$ dative case) with ( $\pi \rho \rho \varsigma)$ ), facing darkness.

2Cor 6:15
Concord ( $\sigma \nu \mu \varphi \omega \nu \eta \sigma \iota)$ ). Symphony. Late word from $\sigma \nu \mu \varphi \omega v \varepsilon \omega$, only here and ecclesiastical writers, though $\sigma \nu \mu \varphi \omega v \eta \mu \alpha$ in the papyri.

Belial ( $\mathrm{B} \varepsilon \lambda_{1} \alpha \lambda$ ). Transliteration of Hebrew word for worthlessness and applied to Satan (Book of Jubilees 1.20) as here. Paul graphically sums up the contrast between Christ and Belial (Satan), the heads of the contending forces of good and evil.

Portion ( $\mu \varepsilon \rho \iota \varsigma)$. The fourth of the words. Here by "unbeliever" (amıбтov) Paul means "disbeliever," not just an unconverted man who yet approves Christ.

2Cor 6:16
Agreement (бuvкатa日zбıऽ). Fifth of these words. Late word, but common, though here only in N.T. Approved by putting together the votes. In the papyri $\varepsilon \kappa \sigma \cup v \kappa \alpha \tau \alpha \theta \varepsilon \sigma \varepsilon \omega \varsigma$ means "by agreement." On the temple of God and idols see 1Co 10:14-22. See Lu 23:51 for the verb бuvкататіӨ $\eta \mu$.

For we are the temple of the living God ( $\eta \mu \varepsilon \iota \varsigma \gamma \alpha \rho$ vaoc $\theta \varepsilon \sigma v \varepsilon \sigma \mu \varepsilon v \zeta \omega v \tau \sigma \varsigma)$. We, not temples (Ac 7:48; 17:24; 1Co 3:16; 6:19).

As God said ( $\kappa \alpha \theta \omega \varsigma \varepsilon \varepsilon \pi \varepsilon v$ o $\theta \varepsilon о \varsigma$ ). A paraphrase and catena of quotations, what J. Rendel Harris calls Testimonia (from Le 26:11f.; Isa 52:11; Eze 20:34; 37:27; 2Sa 7:8,14 ). Plummer notes that at the beginning "I will dwell in them" ( $\varepsilon$ voוк $\eta \omega \boldsymbol{\varepsilon} v$ avtos) is not in any of them. "As God said" points to Le 26:12; Eze 37:27 .

2Cor 6:17
Saith the Lord ( $\lambda \varepsilon \gamma \varepsilon$ Kирıo؟). Isa 52:5; Eze 20:33. Cf. Re 18:4.
Unclean thing ( $\alpha \kappa \alpha \theta \rho \tau \tau v)$. Or unclean person. Genitive case is the same for both.
2Cor 6:18
Saith the Lord Almighty ( $\lambda \varepsilon \gamma \varepsilon$ Kvpıos $\pi \alpha v \tau о к \rho \alpha \tau \omega \rho$ ). 2Sa 7:8. This use of $\varepsilon \iota \varsigma$ is a Hebraism for Hebrew le instead of predicate nominative. П $\downarrow \tau \tau о \kappa \rho \alpha \tau \omega \rho$ ( $\tau \alpha \sigma$, к $\rho \alpha \tau \varepsilon \omega$, Ruler of all) is common in the LXX. Occurs also in the inscriptions and papyri. In the N.T. only here and in Revelation.

## 2 Corinthians 7

2Cor 7:1
These promises ( $\tau \alpha \cup \tau \alpha \varsigma ~ \tau \alpha \varsigma ~ \varepsilon \pi \alpha \gamma \gamma ₹ \lambda \lambda a \varsigma) . ~ S o ~ m a n y ~ a n d ~ s o ~ p r e c i o u s ~(2 P e ~ 2: 4 ~$ $\varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \mu \alpha \tau \alpha$; Heb 11:39f. ).
 only in Joh $15: 2$, to prune). In Koine каӨapı $\zeta \omega$ occurs in inscriptions for ceremonial cleansing (Deissmann, Bible Studies, p. 216f.). Paul includes himself in this volitive aorist subjunctive.

From all defilement ( $\alpha \pi \sigma$ $\pi \alpha v \tau \sigma \varsigma ~ \mu о \lambda \nu \sigma \mu o v$ ). Ablative alone would have done, but with a $\pi$ o it is plainer as in Heb 9:14. Mo $\nu \nu \sigma \mu \circ$ c is a late word from $\mu \mathrm{O} \nu v \nu \omega$, to stain (see on 1Co 8:7 ), to pollute. In the LXX, Plutarch, Josephus. It includes all sorts of filthiness, physical, moral, mental, ceremonial, "of flesh and spirit." Missionaries in China and India can appreciate the atmosphere of pollution in Corinth, for instance.

Perfecting holiness ( $\varepsilon \pi \iota \tau \varepsilon \lambda o u v \tau \varepsilon \varsigma \alpha \gamma เ \circ \sigma u v \eta \nu)$. Not merely negative goodness (cleansing), but aggressive and progressive (present tense of $\varepsilon \pi i \tau \varepsilon \lambda \varepsilon \omega)$ holiness, not a sudden attainment of complete holiness, but a continuous process (1Th 3:13; Ro 1:4; 1:6 ).

2Cor 7:2
Open your hearts to us ( $\chi \omega \rho \eta \sigma \alpha \tau \varepsilon \eta \mu \alpha \varsigma$ ). Old verb (from $\chi \omega \rho \rho \varsigma$, place), to leave a space, to make a space for, and transitive here as in Mt 19:11. He wishes no further $\sigma \tau \varepsilon \nu 0 \chi \omega \rho \iota \alpha$, tightness of heart, in them ( 6:12). "Make room for us in your hearts." He makes this plea to all, even the stubborn minority.

We wronged no man (ov $\delta \varepsilon v \alpha \eta \delta ı \kappa \eta \sigma \alpha \mu \varepsilon v$ ). A thing that every preacher ought to be able to say. Cf. 4:2; 1Th 2:3; Ac 20:26f .

We corrupted no man (ou $\delta \varepsilon v \alpha \varepsilon \varphi \theta \varepsilon \iota \rho a \mu \varepsilon v$ ). We ruined no one. "It may refer to money, or morals, or doctrine" (Plummer). He is answering the Judaizers.

We took advantage of no man (ov $\delta \varepsilon v \alpha \varepsilon \pi \lambda \varepsilon o v \varepsilon \kappa \tau \eta \sigma \alpha \mu \varepsilon v$ ). That charge was made in Thessalonica (1Th 4:6) which see for this late verb and also on 2Co 2:11. He got the best of (note $\pi \lambda \varepsilon$ ov more in the root) no one in any evil way.

2Cor 7:3
Not to condemn you ( $\pi \rho \circ \varsigma$ катакрıбเv ou). "Not for condemnation." Late word from катакрıv , found in Vettius Valens, and here only in N.T.

To die together and live together ( $\varepsilon \iota \varsigma ~ \tau о ~ \sigma ט v a \pi о \theta \alpha v \varepsilon ı v ~ к \alpha ~ \sigma ט v\lceil\eta ı v) . ~ " F o r ~ t h e ~ d y i n g ~$ together (second aorist ingressive active infinitive of $\sigma \cup v a \pi o \theta v \eta \sigma \kappa \omega$ ) and living together (present active infinitive)." One article ( $\tau 0$ ) with both infinitives. You are in our hearts to share death and life.

2Cor 7:4

I overflow with joy in all our affliction (v $\pi \varepsilon \rho \pi \varepsilon \rho \iota \sigma \sigma \varepsilon v o \mu \alpha \tau \eta \chi \alpha \rho \alpha \varepsilon \pi \pi \alpha \sigma \eta \tau \eta \theta \lambda ı \psi \varepsilon$ $\eta \mu \omega v$ ). A thoroughly Pauline sentiment. Пعрıббєv $\omega$ means to overflow, as we have seen. Нипє $-\pi \varepsilon \rho \iota \sigma \sigma \varepsilon \cup \omega$ (late word, so far only here and Byzantine writers) is to have a regular flood. Vulgate superabundo.

2Cor 7:5
When we had come $(\varepsilon \lambda \theta o v \tau \omega \nu \eta \mu \omega \nu)$. Genitive absolute with second aorist active participle of $\varepsilon \rho \chi \circ \mu \alpha$. Paul now returns to the incident mentioned in 2:12 before the long digression on the glory of the ministry.

Had no relief (ov $\delta \varepsilon \mu \iota \alpha \nu \varepsilon \sigma \chi \eta \kappa \varepsilon \nu$ aveбıv). Perfect active indicative precisely as in 2:13 which see, "has had no relief" (dramatic perfect).

Afflicted ( $\theta \lambda_{1} \beta_{o \mu} \mu v o$ ). Present passive participle of $\theta \lambda_{\iota} \beta \omega$ as in $4: 8$, but with anacoluthon, for the nominative case agrees not with the genitive $\eta \mu \omega \nu$ nor with the accusative $\eta \mu \alpha \varsigma$ in verse 6. It is used as if a principal verb as in 9:11; 11:6; Ro 12:16 (Moulton, Prolegomena, p. 182; Robertson, Grammar, pp. 1132-35).

Without were fightings $(\varepsilon \xi \omega \theta \varepsilon v \mu \alpha \chi \alpha)$. Asyndeton and no copula, a parenthesis also in structure. Perhaps pagan adversaries in Macedonia (cf. 1Co 15:32).

Within were fears $(\varepsilon \sigma \omega \theta \varepsilon v \varphi o \beta o)$. Same construction. "Mental perturbations" (Augustine) as in 11:28.

2Cor 7:6
Cormforteth ( $\pi \alpha \rho \alpha \kappa \alpha \lambda \omega v$ ). See on 1:3-7 for this word.
 (Eze 17:24). Low in condition as here; Jas 1:9. In 2Co 10:1 regarded as abject. In this sense in papyri. "Humility as a sovereign grace is the creation of Christianity" (Gladstone, Life, iii, p. 466).

By the coming ( $\varepsilon \nu \tau \eta \pi \alpha \rho o v \sigma \iota \alpha$ ). Same use of $\pi \alpha \rho o v \sigma ı \alpha$ as in 1 Co $16: 7$ which see. See also 2Co 7:7; 10:10 .

2Cor 7:7
Wherewith $(\eta)$. Either locative case with preceding $\varepsilon v$ or instrumental of the relative with $\pi \alpha \rho \varepsilon \kappa \lambda \eta \theta \eta$ (first aorist passive indicative). "The manner in which Paul, so to speak, fondles this word ( $\pi \alpha \rho \alpha \kappa \alpha \lambda \varepsilon \omega)$ is most beautiful" (Vincent).

In you ( $\left.\varepsilon \varphi^{\prime} v \mu \nu \nu\right)$. Over you, upon you.
Your longing ( $\tau \eta v \nu \mu \omega \nu \varepsilon \pi \iota \pi \sigma \theta \eta \sigma \iota \nu$ ). Late word from $\varepsilon \pi \iota \pi \sigma \theta \varepsilon \omega$ ( $\varepsilon \pi$, directive, longing towards, yearning). Only here in N.T.

Mourning ( $\delta \delta v \rho \mu o v$ ). Old word from o $\delta v \rho o \mu \alpha$, to lament. Only here in N.T.
So that I rejoiced yet more $(\omega \sigma \tau \varepsilon \mu \varepsilon \mu \alpha \lambda \lambda o v \chi \alpha \rho \eta v \alpha)$. Result expressed by $\omega \sigma \tau \varepsilon$ and the second aorist passive infinitive of $\chi \propto \iota \rho \omega$ with accusative of general reference.

2Cor 7:8
Though ( $\varepsilon \kappa \alpha)$. If also. Paul treats it as a fact.

With my epistle ( $\varepsilon v \tau \eta \varepsilon \pi\llcorner\sigma \tau 0 \lambda \eta$ ). The one referred to in $2: 3 \mathrm{f}$.
I do not regret it (ov $\mu \varepsilon \tau \alpha \mu \varepsilon \lambda o \mu \alpha$ ). This verb really means "repent" (be sorry again) which meaning we have transferred to $\mu \varepsilon \tau \alpha v o \varepsilon \omega$, to change one's mind (not to be sorry at all). See Mt 21:30; 27:3 for the verb $\mu \varepsilon \tau \alpha \mu \varepsilon \lambda o \mu \alpha$, to be sorry, to regret as here. Paul is now glad that he made them sorry.

Though I did regret ( $\varepsilon \kappa \alpha \mu \varepsilon \tau \varepsilon \mu \varepsilon \lambda о \mu \eta \nu$ ). Imperfect indicative in the concessive clause. I was in a regretful mood at first.

For I see ( $\beta \lambda \varepsilon \pi \omega \quad \gamma \alpha \rho$ ). A parenthetical explanation of his present joy in their sorrow. B D do not have $\gamma \alpha \rho$. The Latin Vulgate has videns (seeing) for $\beta \lambda \varepsilon \pi \omega v$.

For a season ( $\pi \rho o \varsigma \omega \rho \alpha v$ ). Cf. 1Th 2:17 . It was only "for an hour."
2Cor 7:9
Now I rejoice ( $v \vee v \chi \propto u \rho \omega)$. Now that Titus has come and told him the good news from Corinth (2:12f. ). This was the occasion of the noble outburst in 2:12-6:10.

Unto repentance ( $\varepsilon \iota \varsigma \mu \tau \tau \nu o \iota \alpha v)$. Note the sharp difference here between "sorrow" ( $\lambda v \pi \eta$ ) which is merely another form of $\mu \varepsilon \tau \alpha \mu \varepsilon \lambda o \mu \alpha$ (regret, remorse) and "repentance" ( $\mu \varepsilon \tau \alpha v o ı \alpha)$ or change of mind and life. It is a linguistic and theological tragedy that we have to go on using "repentance" for $\mu \varepsilon \tau \alpha v o \iota \alpha$. But observe that the "sorrow" has led to "repentance" and was not Itself the repentance.

After a godly sort ( $\kappa \alpha \tau \alpha \theta \varepsilon o v$ ). In God's way. "God's way as opposed to man's way and the devil's way" (Plummer). It was not mere sorrow, but a change in their attitude that counted.

That ye might suffer loss by us in nothing ( $1 v \alpha \varepsilon v \mu \eta \delta \varepsilon v \zeta \eta \mu \omega \omega \theta \eta \tau \varepsilon \varepsilon \xi \nu \mu \omega v$ ). Purpose clause with $v^{\nu} \alpha$ and first aorist passive subjunctive of $\lceil\eta \mu \ldots \omega$, old verb to suffer damage. See on Mt 16:26. This was God's intention and so he overruled their sorrow to good.

2Cor 7:10
For godly sorrow ( $\eta \gamma \alpha \rho \kappa \alpha \tau \alpha$ $\theta \varepsilon o v \lambda \nu \pi \eta$ ). "For the sorrow according to God" (God's ideal, verse 9).

Worketh repentance unto salvation a repentance without regret ( $\mu \varepsilon \tau \alpha v o l \alpha \nu \varepsilon$ $\sigma \omega \tau \eta \rho \iota \alpha \nu \alpha \mu \varepsilon \tau \alpha \mu \varepsilon \lambda \eta \tau 0 \nu \varepsilon \rho \gamma \alpha(\varepsilon \tau \alpha)$. This clause alone should have prevented the confusion between mere "sorrow" ( $\lambda \nu \pi \eta$ ) as indicated in $\mu \varepsilon \tau \alpha \mu \varepsilon \lambda о \mu \alpha$, to regret (to be sorry again) and "change of mind and life" as shown by $\mu \varepsilon \tau \alpha v o u \alpha \nu$ ( $\mu \varepsilon \tau \alpha v o \varepsilon \omega$ ) and wrongly translated "repentance." The sorrow according to God does work this "change of mind and life" unto salvation, a change "not to be regretted" ( $\alpha \mu \varepsilon \tau \alpha \mu \varepsilon \lambda \eta \tau o v$, an old verbal adjective of $\mu \varepsilon \tau \alpha \mu \varepsilon \lambda о \mu \alpha$ and $\alpha$ privative, but here alone in N.T.). It agrees with $\mu \varepsilon \tau \alpha v o \iota \alpha v$, not $\sigma \omega \tau \eta \rho ı \alpha v$.

But the sorrow of the world ( $\eta \delta \varepsilon$ тov коб $\mu \circ v \lambda \cup \pi \eta$ ). In contrast, the kind of sorrow that the world has, grief "for failure, not for sin" (Bernard), for the results as seen in Cain, Esau (his tears!), and Judas (remorse, $\mu \varepsilon \tau \varepsilon \mu \varepsilon \lambda \eta \theta \eta$ ). Works out (perfective use of кат-) death in the end.

2Cor 7:11
This selfsame thing (avтo тov $\frac{1}{}$ ). "This very thing," "the being made sorry according to God" ( $\tau$ к ката $\theta \varepsilon о v \lambda v \pi \eta \theta \eta v a$, articular first aorist passive infinitive with which av $\frac{1}{}$ тovto agrees and the proleptic subject of the verb катєı $\rho \boldsymbol{\alpha} \boldsymbol{\sigma} \alpha \tau$.

Earnest care ( $\sigma \pi \sigma v \delta \eta v$ ). Diligence, from $\sigma \pi \varepsilon v \delta \omega$, to hasten. Cf. Ro 12:11.
Yea ( $\alpha \lambda \lambda \alpha$ ). Not adversative use of $\alpha \lambda \lambda \alpha$, but copulative as is common (half dozen examples here).

Clearing of yourselves ( $\alpha \pi \sigma \lambda о \gamma \iota \alpha$ ). In the old notion of $\alpha \pi \sigma \lambda \sigma \mu \alpha$ (self-vindication, self-defence) as in 1Pe 3:15.

Indignation ( $\alpha \gamma \alpha v \alpha \kappa \tau \eta \sigma \iota v$ ). Old word, only here in N.T. From $\alpha \gamma \alpha v a \kappa \tau \varepsilon o$ (Mr 10:14 , etc.).

Avenging ( $\varepsilon \kappa \delta \iota \kappa \eta \sigma \iota \nu$ ). Late word from $\varepsilon \kappa \delta \iota \kappa \varepsilon \omega$, to avenge, to do justice (Lu 18:5; 21:22 ), vindication from wrong as in Lu 18:7, to secure punishment (1Pe 2:14).

Pure ( $\alpha \gamma \vee 0 \cup \varsigma)$. Kin to $\alpha \gamma \operatorname{los}(\alpha \zeta \omega$, to reverence), immaculate.
2Cor 7:12
But that your earnest care for us might be made manifest ( $\alpha \lambda \lambda^{\prime}$ عוvekev tov $\varphi a v \varepsilon \rho \omega \theta \eta \nu \alpha \tau \eta \nu \sigma \pi \sigma v \delta \eta \nu v \mu \omega \nu \tau \eta \nu v \pi \varepsilon \rho \eta \mu \omega \nu)$. So the correct text, not "our care for you." Easy to interchange Greek $\nu \mu \omega \nu$ (your) and $\eta \mu \omega \nu$ (our). Usual construction with preposition $\varepsilon \nu \varepsilon \kappa \varepsilon \nu$ and genitive of articular infinitive with accusative of general reference.

2Cor 7:13
We joyed the more exceedingly ( $\pi \varepsilon \rho\llcorner\sigma \sigma о \tau \varepsilon \rho \omega \varsigma \mu \alpha \lambda \lambda o v \varepsilon \chi \alpha \rho \eta \mu \varepsilon \nu$ ). Double comparative (pleonastic use of $\mu \alpha \lambda \lambda o v$, more, with $\pi \varepsilon \rho \iota \sigma \sigma o \tau \varepsilon \rho \omega \varsigma$, more abundantly) as is common in the Koine (Mr 7:36; Php 1:23 ).

For the joy of Titus $(\varepsilon \pi \tau \eta \chi \alpha \rho \alpha$ Titov). On the basis of $(\varepsilon \pi)$ the joy of Titus who was proud of the outcome of his labours in Corinth.

Hath been refreshed ( $\alpha v \alpha \pi \varepsilon \pi \alpha v \tau \alpha$ ). Perfect passive indicative of $\alpha v \alpha \pi \alpha v \omega$. Cf. 1Co 16:18 for this striking verb.

2Cor 7:14
If--I have gloried ( $\varepsilon เ--\kappa \varepsilon \kappa \alpha \cup \chi \eta \mu \alpha)$. Condition of first class. On this verb see 1Co 3:21; 2Co 5:12.

I was not put to shame (ov катๆ $\sigma \chi \cup v \theta \eta v$ ). First aorist passive indicative of $\kappa \alpha \tau \alpha \iota \sigma \chi \cup v \omega$. Paul had assured Titus, who hesitated to go after the failure of Timothy, that the Corinthians were sound at bottom and would come round all right if handled properly. Paul's joy is equal to that of Titus.

In truth ( $\varepsilon v \alpha \lambda \eta \theta \varepsilon \iota \alpha$ ). In the sharp letter as well as in I Corinthians. He had not hesitated to speak plainly of their sins.

Our glorying before Titus ( $\eta \kappa \alpha v \chi \eta \sigma \iota \varsigma \pi$ Tıтov). The two things were not inconsistent and were not contradictory as the outcome proved.

2Cor 7:15
Whilst he remembereth ( $\alpha v \alpha \mu \mu v \eta \sigma \kappa о \mu \varepsilon v o v)$. Present middle participle of $\alpha \nu \alpha \mu \mu \nu \eta \sigma \kappa \omega$, to remind, in the genitive case agreeing with avtov (his, of him).

The obedience of you all ( $\tau \eta \nu \pi \alpha \nu \tau \omega \nu \nu \mu \omega \nu \nu \pi \alpha \kappa o v \eta \nu$ ). A remarkable statement of the complete victory of Titus in spite of a stubborn minority still opposing Paul.

With fear and trembling ( $\mu \varepsilon \tau \alpha$ чоßоv ка $\tau \rho о \mu о v$ ). He had brought a stern message (1Co 5:5) and they had trembled at the words of Titus (cf. Eph 6:5; Php 2:12 ). Paul had himself come to the Corinthians at first with a nervous dread (1Co 2:3).

2Cor 7:16
I am of good courage $(\theta \alpha \rho \rho \omega)$. The outcome has brought joy, courage, and hope to Paul.

## 2 Corinthians 8

2Cor 8:1
The grace ( $\tau \eta \vee \chi \alpha \rho เ v)$. As manifested in the collection in the churches, poor as they were. The Romans had lacerated Macedonia (Livy, XLV. 30).

2Cor 8:2
Proof ( $\delta$ окциך). Tests as of metals as in 2:9.
Abundance ( $\pi \varepsilon \rho เ \sigma \sigma \varepsilon ı \alpha)$. Late word from $\pi \varepsilon \rho เ \sigma \sigma \varepsilon v \omega$, to overflow.
Their deep poverty ( $\eta$ кат $\beta \alpha \beta$ ovৎ $\pi \tau \omega \chi \varepsilon ı \alpha \alpha \tau \omega v$ ). П $\tau \omega \chi \varepsilon ı \alpha$ is old word from $\pi \tau \omega \chi \varepsilon \nu \omega$, to be a beggar, as of Jesus in 8:9 (from $\pi \tau \omega \chi$, , cowering in fear and poverty, as in Lu 14:13, but ennobled by Christ as in Mt 5:3; 2Co 8:9 ). Poverty down deep. Strabo (LX 419) has ката $\beta \alpha \theta$ ovৎ, down to the bottom.

Liberality ( $\alpha \pi \lambda о \tau \eta \tau \circ \varsigma$ ). From $\alpha \pi \lambda o v \varsigma$, single, simple (Mt 6:22). "The passage from single-mindedness or simplicity to liberality is not quite obvious" (Plummer). Perhaps "heartiness" supplies the connecting link. See also 9:11-13.

2Cor 8:3
Beyond their power ( $\pi \alpha \rho \alpha \delta \nu v \alpha \mu v$ ). "Alongside" with accusative like v $\tau \varepsilon \rho \delta \nu v \alpha \mu v v$ in 1:8. Field (Ot. Nov.) quotes Josephus (Ant. iii. 6, 1) for ката $\delta v v a \mu v v$ and $\pi \alpha \rho \alpha \delta \nu v \alpha \mu \nu v$ as here. Few give ката $\delta v v a \mu \nu v$ (according to actual ability). Paul commends this high pressure collection because of the emergency.

Of their own accord (avӨaıp\&тo). Old verbal adjective (avtoo, alperoç from aı $\rho \varepsilon \circ \mu \alpha$, to choose), of their own initiative, voluntary. Only here and verse 17 in N.T. Papyri often have $\varepsilon \kappa о \cup \sigma \omega \varsigma \kappa \alpha \alpha \cup Ө \alpha \iota \rho \varepsilon \tau \omega \varsigma$ (willingly and voluntarily).

2Cor 8:4
Beseeching us with much intreaty in regard of this grace ( $\mu \varepsilon \tau \alpha \pi о \lambda \lambda \eta \varsigma \pi \alpha \rho \alpha \kappa \lambda \eta \sigma \varepsilon \omega \varsigma$ $\delta \varepsilon o \mu \varepsilon v o \quad \eta \mu \omega \nu \tau \eta \nu \chi \alpha \rho \iota v)$. Literally, "with much intreaty begging of us the favour and the partnership in the ministry to the saints." The accusative ( $\chi \alpha \rho \stackrel{v}{ }$ ) after $\delta \varepsilon o \mu \alpha$ is unusual. By $\chi$ גрıя Paul means the privilege of giving (cf. Ac 24:27). Apparently Paul had been reluctant to press the Macedonians because of their manifest poverty. They demanded the right to have a share in it.

2Cor 8:5
We had hoped ( $\eta \lambda \pi \iota \sigma \alpha \mu \varepsilon v$ ). First aorist active indicative of $\varepsilon \lambda \pi \iota \zeta \omega$. "Expected," he means. They went beyond his hopes about them.

First they gave their own selves ( $\varepsilon a v \tau o v \varsigma \varepsilon \delta \omega \kappa \alpha v \pi \rho \omega \tau \sigma v$ ). First aorist active indicative of $\delta \iota \delta \omega \mu$ (k aorist). "Themselves they gave first." That is the explanation of the generous giving.

2Cor 8:6

Insomuch that we exhorted Titus ( $\varepsilon \varsigma \varsigma ~ \tau о ~ \pi \alpha \rho \alpha к \alpha \lambda \varepsilon \sigma \alpha ~ \eta \mu \alpha \varsigma ~ T ı \tau о v) . ~ U s e ~ o f ~ \varepsilon ı \varsigma ~ \tau o ~ a n d ~$ the infinitive for result with accusative of general reference ( $\eta \mu \alpha \varsigma)$. See Robertson, Grammar, p. 1003.

He had made a beginning before ( $\pi \rho \circ \varepsilon v \eta \rho \xi \alpha \tau o$ ). First aorist active indicative of the double compound verb $\pi \rho o-\varepsilon v-\alpha \rho \chi \circ \mu \alpha$, still found only here and verse 10 , to make a start before others.

Complete ( $\varepsilon \pi I \tau \varepsilon \lambda \varepsilon \sigma \varepsilon)$ First aorist (effective) active subjunctive of $\varepsilon \pi \iota \tau \varepsilon \lambda \varepsilon \omega$, to finish, with perfective use of $\varepsilon \pi$ in composition.

2Cor 8:7
In this grace also ( $\kappa \alpha \varepsilon \nu \tau \alpha v \tau \eta \tau \eta \chi \alpha \rho \tau)$. This gifted church (1Co 12-14) had fallen behind in the grace of giving. Kindly irony in this allusion.

2Cor 8:8
Proving ( $\delta о к ц \mu \zeta \omega v$ ). Testing and so proving.
The sincerity also of your love ( $\kappa \alpha$ то $\tau \eta \varsigma \nu \mu \varepsilon \tau \varepsilon \rho \alpha \varsigma ~ \alpha \gamma \alpha \pi \eta \varsigma ~ \gamma \nu \eta \sigma \circ \circ$ ). Old adjective, contraction of $\gamma \varepsilon v \varepsilon \sigma \circ o \varsigma(\gamma ı \nu \circ \mu \alpha)$, legitimately born, not spurious. A collection is a test of one's love for Christ, not the only test, but a real one.

2Cor 8:9
Though he was rich ( $\pi \lambda$ गovolos $\omega v$ ). Concessive present participle $\omega v$ from $\varepsilon \mu$, to be.
Be became poor ( $\varepsilon \pi \tau \omega \chi \varepsilon v \sigma \varepsilon v$ ). Ingressive aorist active indicative of $\pi \tau \omega \chi \varepsilon v \omega$ (see verse 2 on $\pi \tau \omega \chi \varepsilon \mid \alpha)$.

Through his poverty ( $\tau \eta$ ยкعוvov $\pi \tau \omega \chi \varepsilon 1 \alpha$ ). Instrumental case, by means of.
Might become rich ( $\pi \lambda 0 \cup \tau \eta \sigma \eta \tau \varepsilon$ ). Ingressive first aorist active subjunctive of $\pi \lambda$ out $\tau \omega$, to be rich with tva (that). See on Lu 1:53; 1Co 4:8.

2Cor 8:10
Judgment $(\gamma \nu \omega \mu \eta \nu)$. Deliberate opinion, but not a "command" ( $\varepsilon \pi \iota \tau \alpha \gamma \eta$ verse 8). Cf. 1Co 7:25.

A year ago ( $\alpha \pi 0 \pi \varepsilon \rho v \sigma$ ) From last year.
Not only to do, but also to will (ov $\mu$ оvov то топ $\sigma \alpha 1, ~ a \lambda \lambda \alpha$ ка то $\theta \varepsilon \lambda \varepsilon ı v$ ). Articular infinitives the objects of $\pi \rho \circ \varepsilon v \eta \rho \xi \alpha \sigma \theta \varepsilon$ on which verb see verse 6 ). That is to say, the Corinthians promised before any others.

2Cor 8:11
The readiness to will ( $\eta \pi \rho \circ \theta v \mu \iota \alpha$ tov $\theta \varepsilon \lambda \varepsilon เ v$ ). Old word from $\pi \rho \circ \theta v \mu \circ \varsigma(\pi \rho \circ, \theta v \mu \circ \varsigma)$, forwardness, eagerness (Ac 17:11). They were quick to pledge.

The completion also (ка то $\varepsilon \pi \iota \tau \varepsilon \lambda \varepsilon \sigma \alpha$ ). The finishing also (articular first aorist active infinitive).

Out of your ability ( $\varepsilon \kappa$ тov $\varepsilon \chi \varepsilon ı v)$. "Out of the having," literally, and so, "out of what you can give" (verse 12).

2Cor 8:12

Is there ( $\pi \rho$ окєı $\tau \alpha$ ). Lies before one. Old word.
Acceptable ( $\varepsilon \cup \pi \rho о \sigma \delta \varepsilon \kappa \tau о \varsigma)$. See on 6:2.
According as a man hath ( $\kappa \alpha \theta$ o $\varepsilon \alpha v \varepsilon \chi \eta$ ). Indefinite comparative clause with $\varepsilon \alpha \nu$ and present subjunctive $\varepsilon \chi \varepsilon$. Clearly God does not expect us to give what we do not have.

Not according as he hath not (ov каӨo ovк $\varepsilon \chi \varepsilon$ ). Note present indicative rather than subjunctive because a specific case is presented. See 9:7; Mr 12:43.

2Cor 8:13
Others may be eased ( $\alpha \lambda \lambda$ oıs $\alpha \vee \varepsilon \sigma \iota \varsigma)$. "Release to others."
Ye distressed ( $v \mu \iota \nu \theta \iota \iota ı \varsigma)$. "To you tribulation." The verb $\eta$ (present subjunctive) with tva is not expressed.

2Cor 8:14
By equality ( $\varepsilon \xi$ וботŋтоৎ). Old word from $\iota \sigma \circ \varsigma$, fair, equal. In N.T. only here and Col 4:1.

Abundancy $(\pi \varepsilon \rho \iota \sigma \sigma \varepsilon v \mu \alpha)$. Late word from $\pi \varepsilon \rho \iota \sigma \sigma \varepsilon v \omega$ like $\pi \varepsilon \rho \iota \sigma \sigma \varepsilon \iota \alpha$ (verse 2) Cf. Mt 12:34 .

Want $(v \sigma \tau \varepsilon \rho \eta \mu \alpha)$. Late word from $v \sigma \tau \varepsilon \rho \varepsilon \omega$, to be in want. See also 9:12; Lu 21:4 (cf. vбтє९ๆбıৎ in Mr 12:44).

2Cor 8:16
Which putteth ( $\tau \omega \delta \delta \delta o v \tau$ ). Present active articular participle, "who is continually giving." Hence Titus is full of zealous care for you.

2Cor 8:17
Very earnest ( $\sigma \pi \circ \cup \delta \alpha \iota \tau \varepsilon \rho \circ \varsigma)$. "More earnest than ordinarily," comparative adjective.
2Cor 8:18
We have sent with him ( $\sigma v v \varepsilon \pi \varepsilon \mu \psi \alpha \mu \varepsilon \nu \mu \varepsilon \tau^{\prime}$ av $\sigma 0 v$ ). Epistolary aorist.
The brother ( $\tau 0 v \alpha \delta \varepsilon \lambda \varphi o v$ ). This may be, probably is, Luke who may also be the brother of Titus (see also 12:18) according to a common Greek idiom where the article is used as "his." But this idiom is not necessary. As a matter of fact, we do not know who this brother is.

Is spread through all the churches ( $\delta \iota \alpha \pi \alpha \sigma \omega \nu \tau \omega \nu \varepsilon \kappa \kappa \lambda \eta \sigma \iota \omega \nu)$. No verb in the Greek (ellipsis).

2Cor 8:19
But who was also appointed ( $\alpha \lambda \lambda \alpha \kappa \alpha \chi \varepsilon \rho \circ \tau о \nu \eta \theta \varepsilon ı \varsigma)$. Anacoluthon. The first aorist passive participle $\chi \varepsilon \iota \rho o \tau o v \eta \theta \varepsilon ı \varsigma$ is from $\chi \varepsilon \iota \rho o \tau o v \varepsilon \omega$, old verb to stretch out the hands ( $\chi \varepsilon \iota \rho$ $\tau \varepsilon \iota \nu \omega)$ and so to vote in public. The idea is that this brother was chosen by the churches, not by Paul. Only here in N.T. save Ac 14:23 where it means to appoint without notion of raising the hands. In Ac 10:41 we have $\pi \rho \circ \chi \varepsilon \iota \rho o \tau o v \varepsilon \omega$.

To travel with us ( $\sigma v v \varepsilon \kappa \delta \eta \mu \circ \varsigma)$. Late word for travelling companion. So in the inscriptions ( $\sigma v v$, together with, $\varepsilon \kappa \delta \eta \mu \circ \varsigma$, away from home).

2Cor 8:20
Avoiding this ( $\sigma \tau \varepsilon \lambda \lambda$ ou $\varepsilon$ vo $\tau o v \tau o$ ). Present middle participle of $\sigma \tau \varepsilon \lambda \lambda \omega$, old verb, to set, to arrange. So "arranging for ourselves this."

That any man should blame us ( $\mu \eta \tau \tau \varsigma \eta \mu \alpha \varsigma \mu \omega \mu \eta \sigma \eta \tau \alpha$ ). Literally, "lest any one blame us" (negative purpose with $\mu \eta$ and first aorist middle subjunctive of $\mu \omega \mu \varepsilon о \mu \alpha$. See on 6:3, only other N.T. example).

Bounty ( $\alpha \delta \rho o \tau \eta \tau$ ). Old word from $\alpha \delta \rho o \varsigma$, thick, stout, ripe, rich, great as in 1 Ki 1:9; 2Ki 10:6 . Only here in N.T.

2Cor 8:21
We take thought ( $\pi \rho \circ v o u \mu \varepsilon v$ ). Old verb, to plan beforehand ( $\pi \rho o-$ ) as in Ro 12:17; 1 Ti 5:8.

But also in the sight of men ( $\alpha \lambda \lambda \alpha \kappa \alpha \varepsilon v \omega \pi \kappa \circ v \alpha v \rho \omega \pi \omega v$ ). It is not enough for one's financial accounts to be honourable ( $\kappa \alpha \lambda \alpha$ ) as God sees them, but they should be so kept that men can understand them also. A timely warning. Paul took the utmost pains that no suspicion could be attached to him in this collection.

2Cor 8:22
Our brother ( $\tau 0 v \alpha \delta \varepsilon \lambda \varphi o v \eta \mu \omega v$ ). Not Paul's personal brother, but a brother in Christ, one whom Paul had tested and was willing to trust. It may have been Tychicus or Apollos, but we do not know.

2Cor 8:23
About Titus (vாєр Tıtov). There is no verb expressed. Supply "inquire." He endorses Titus up to the hilt. He is "my partner" ( $\kappa о \imath \omega \nu \circ \varsigma \varepsilon \mu \circ \varsigma)$ and "fellow-worker" ( $\sigma \cup v \varepsilon \rho \gamma о \varsigma)$.

Messengers of the churches ( $\alpha \pi о \sigma \tau о \lambda о$ єкк $\eta \boldsymbol{\sigma} \omega \nu$ ). Apostles in the general sense of "sent ones" (from $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$, to send) by the churches and responsible to the churches for the handling of the funds.

The glory of Christ ( $\delta o \xi \alpha$ Xpıбтov). Financial agents, please observe.
2Cor 8:24
The proof of your love ( $\tau \eta \nu \varepsilon \nu \delta \varepsilon \varepsilon \xi I v \tau \eta \varsigma \alpha \gamma \alpha \pi \eta \varsigma \nu \mu \omega v$ ). There is a word here for pastors and deacons who try to protect the churches from the denominational representatives of kingdom causes.

In the face of the churches ( $\varepsilon \varsigma \varsigma \pi \rho \circ \sigma \omega \pi \sigma \nu \tau \omega v \varepsilon \kappa \kappa \lambda \eta \sigma \omega \omega v$ ). A great host is pictured as watching how the Corinthians will treat these duly accredited agents in the collection (Titus and the other two brethren). It requires courage to stand by such representatives of great causes before stingy saints.

## 2 Corinthians 9

2Cor 9:1
Superfluous ( $\pi \varepsilon \rho \iota \sigma \sigma 0 v$ ). All the same he does write. "The writing" ( $\tau 0 \gamma \rho \alpha \varphi \varepsilon \iota v$ ) ought to be superfluous.

2Cor 9:2
I glory ( $\kappa \alpha \cup \chi \omega \mu \alpha$ ). Present middle indicative. I still am glorying, in spite of the poor performance of the Corinthians.

Hath been prepared ( $\pi \alpha \rho \varepsilon \sigma \kappa \varepsilon v a \sigma \tau \alpha$ ). Perfect passive indicative of $\pi \alpha \rho \alpha \sigma \kappa \varepsilon v \alpha \zeta \omega$, to make ready, "stands prepared."
 to excite in a good sense here, in a bad sense in Col 3:21, the only N.T. examples.

Very many of them (tou¢ $\pi \lambda \varepsilon$ וovaৎ). The more, the majority.
2Cor 9:3
I sent ( $\varepsilon \pi \varepsilon \mu \psi \alpha)$. Not literary plural with this epistolary aorist as in 18,22 .
That ye may be prepared (iva $\pi \alpha \rho \varepsilon \sigma \kappa \varepsilon v a \sigma \mu \varepsilon v o ~ \eta \tau \varepsilon$ ). Perfect passive subjunctive in the final clause, "that ye may really be prepared," "as I said" ( $\kappa \alpha \theta \omega \varsigma \varepsilon \lambda \varepsilon \gamma \circ v$ ) and not just say that ye are prepared. Paul's very syntax tells against them.

2Cor 9:4
If there come with me any of Macedonia and find you unprepared ( $\varepsilon \alpha v \varepsilon \lambda \theta \omega \sigma \tau v \sigma v$
 but stated as a lively possibility) with $\varepsilon a v$ and the second aorist active subjunctive ( $\varepsilon \lambda \theta \omega \sigma \tau v$, $\varepsilon \cup \rho \omega \sigma \tau v)$, a bold and daring challenge. A $\pi \alpha \rho \alpha \sigma \kappa \varepsilon v a \sigma \tau o \varsigma$ is a late and rare verbal adjective from $\pi \alpha \rho \alpha \sigma \kappa \varepsilon v a \zeta \omega$ with $\alpha$ privative, only here in the N.T.

Lest by any means we should be put to shame ( $\mu \eta \pi \omega \varsigma \kappa \alpha \tau \alpha \mid \sigma \chi \nu v \theta \omega \mu \varepsilon v \eta \mu \varepsilon \iota \varsigma)$. Negative purpose with first aorist passive subjunctive of $\kappa \alpha \tau \alpha \iota \sigma \chi \nu v \omega$ (see on 7:14) in the literary plural.

That we say not, ye ( $\quad v \alpha \mu \eta \lambda \varepsilon \gamma \omega \mu \varepsilon v \nu \mu \varepsilon \iota \varsigma)$. A delicate syntactical turn for what he really has in mind. He does wish that they become ashamed of not paying their pledges.

Confidence (vтобтабє). This word, common from Aristotle on, comes from $v \varphi \iota \sigma \tau \eta \mu$, to place under. It always has the notion of substratum or foundation as here; 11:17; Heb 1:3 . The papyri give numerous examples (Moulton and Milligan's Vocabulary) of the word for "property" in various aspects. So in Heb 11:1 "faith is the title-deed of things hoped for." In the LXX it represents fifteen different Hebrew words.

2Cor 9:5
I thought ( $\varepsilon \not \eta \eta \sigma \mu \eta \nu)$. Epistolary aorist again. See Php 2:25 for the expression here.
Go before ( $\pi \rho \sigma \varepsilon \lambda \theta \omega \sigma \nu v$ ). Second aorist active of $\pi \rho o \varepsilon \rho \chi o \mu \alpha$. Go to you before I come.

Make up beforehand ( $\pi \rho о к \alpha \tau \alpha \rho \tau \iota \sigma \omega \sigma)$. Late and rare double compound verb $\pi \rho о к а т \alpha \rho \tau \iota \zeta \omega$ (in Hippocrates). Only here in N.T. See катартıцю in 1Co 1:10.

Your afore-promised bounty ( $\tau \eta \nu \pi \rho o \varepsilon \pi \eta \gamma \gamma \varepsilon \lambda \mu \varepsilon \nu \eta \nu \varepsilon \nu \lambda o \gamma \iota \alpha \nu \mu \omega \nu$ ). "Blessing" ( $\varepsilon \cup \lambda o \gamma ı a)$ literally, but applied to good deeds also as well as good words (Ge 33:11 ). Note third use of "pro" before. He literally rubs it in that the pledge was overdue.

That the same might be ready ( $\tau \alpha \cup \tau \eta \nu \varepsilon \tau о \mu \eta \nu \varepsilon \varepsilon \nu \alpha$ ). Here the infinitive alone ( $\varepsilon ו v \alpha$ ) is used to express purpose without $\omega \sigma \tau \varepsilon$ or $\varepsilon \iota \varsigma ~ \tau o ~ o r ~ \pi \rho o \varsigma ~ \tau o ~ w i t h ~ t h e ~ a c c u s a t i v e ~ o f ~ g e n e r a l ~$
 occurs with the feminine like the masculine (Mt 25:10).

And not of extortion ( $\kappa \alpha \mu \eta \omega \varsigma \pi \lambda \varepsilon о v \varepsilon \xi \nLeftarrow \nu$ ). "And not as covetousness." Some offerings exhibit covetousness on the part of the giver by their very niggardliness.

2Cor 9:6
Sparingly ( $\varphi \varepsilon \iota \delta o \mu \varepsilon v \omega \varsigma)$. Late and rare adverb made from the present middle participle $\varphi \varepsilon \iota \delta o \mu \varepsilon v o c$ from $\varphi \varepsilon \iota \delta o \mu \alpha$, to spare. It occurs in Plutarch (Alex. 25).

2Cor 9:7
He hath purposed ( $\pi \rho \circ \eta \iota \rho \eta \tau \alpha$ ). Perfect middle indicative of $\pi \rho o \alpha \iota \rho \varepsilon \mu \alpha$, to choose beforehand, old verb, here only in N.T. Permanent purpose also.

Not grudgingly ( $\mu \eta \varepsilon \kappa \lambda v \pi \eta \varsigma$ ). The use of $\mu \eta$ rather than ov shows that the imperative $\pi o เ \varepsilon เ \tau \omega$ (do) or $\delta \iota \delta o \tau \omega$ (give) is to be supplied. Not give as out of sorrow.

Or of necessity ( $\eta \varepsilon \xi$ avaүк $\dagger$ ). As if it were like pulling eye-teeth.
For God loveth a cheerful giver ( $\lambda \lambda \alpha \rho \nu \nu \alpha \rho \delta o \tau \eta v \alpha \gamma \alpha \pi \alpha$ o $\theta \varepsilon o \varsigma)$. Our word "hilarious" comes from inapov which is from ilaoc (propitious), an old and common adjective, only here in N.T.

2Cor 9:8
Is able ( $\delta v v a t \varepsilon$ ). Late verb, not found except here; 13:3; Ro 14:4. So far a Pauline word made from $\delta u v a \tau o \varsigma$, able.

All sufficiency ( $\pi \alpha \sigma \alpha \vee \alpha \cup \tau \alpha \rho \kappa \varepsilon ı \alpha v)$. Old word from $\alpha \cup \tau \alpha \rho \kappa \eta \varsigma$ (Php 4:11), common word, in N.T. only here and 1Ti 6:6 ). The use of this word shows Paul's acquaintance with Stoicism. Paul takes this word of Greek philosophy and applies it to the Christian view of life as independent of circumstances. But he does not accept the view of the Cynics in the avoidance of society. Note threefold use of "all" here ( $\varepsilon v \pi \alpha \nu \tau \iota$, $\pi \alpha v \tau о \tau \varepsilon, \pi \alpha \sigma \alpha v$, in everything, always, all sufficiency).

2Cor 9:9
As it is written ( $\kappa \alpha \theta \omega \varsigma \gamma \varepsilon \gamma \rho \alpha \pi \tau \alpha$ ). Ps 92:3,9. Picture of the beneficent man.
He hath scattered abroad ( $\varepsilon \sigma \kappa о \rho \pi \iota \sigma \varepsilon v$ ). First aorist active indicative of $\sigma \kappa о \rho \pi \iota \zeta \omega$, to scatter, Koine verb for $\sigma \kappa \varepsilon \delta \alpha v v 0 \mu$ of the Attic. Probably akin to $\sigma \kappa о \rho \pi \iota \circ \varsigma$ (scorpion) from root $\sigma \kappa \alpha \rho \pi$, to cut asunder. See on Mt 12:30. It is like sowing seed.

To the poor ( $\tau$ oı $\pi \varepsilon v \eta \sigma \tau v$ ). Old word from $\pi \varepsilon v a \mu \alpha$, to work for one's living. Latin penuria and Greek $\pi \varepsilon เ v \alpha \omega$, to be hungry, are kin to it. Only N.T. instance and to be distinguished from $\pi \tau \omega \chi \circ \varsigma$, beggar, abjectly poor.

2Cor 9:10
Supplieth ( $\varepsilon \pi \downarrow \chi \circ \rho \eta \gamma \omega v$ ). Late Koine compound verb from $\varepsilon \pi$ and $\chi \circ \rho \eta \gamma \varepsilon \omega$, just below ( $1 \mathrm{Pe} 4: 11$ ). Xор $\eta \gamma \circ$, is old word for leader of a chorus ( $\chi$ ороб, $\eta \gamma \varepsilon о \mu \alpha$ ) or chorus-leader. The verb means to furnish a chorus at one's own expense, then to supply in general. N.T. examples of $\varepsilon \pi \iota \chi \circ \rho \eta \gamma \varepsilon \omega$ are 2Co 9:10; Ga 3:15; $\mathrm{Col} 2: 19 ; 2 \mathrm{Pe} 1: 5$.

Shall multiply ( $\pi \lambda \eta \theta v v \varepsilon$ ). Future active indicative of $\pi \lambda \eta \theta v v \omega$, old verb from $\pi \lambda \eta \theta v \varsigma$, fulness. Cf. Ac 6:1 .

Fruits ( $\gamma \varepsilon v \eta \mu \alpha \tau \alpha$ ). Correct reading (from $\gamma \iota \nu o \mu \alpha$, to become) and not $\gamma \varepsilon \nu v \eta \mu \alpha \tau \alpha$ (from $\gamma \varepsilon v v a \omega$, to beget). This spelling is supported by LXX where Thackeray shows that $\gamma \varepsilon v \eta \mu a \tau \alpha$ in LXX refers to vegetables and $\gamma \varepsilon v v \eta \mu \alpha \tau \alpha$ to animals. The papyri support this distinction (Moulton and Milligan's Vocabulary).

2Cor 9:11
Enriched ( $\pi \lambda$ ovtı$\zeta o \mu \varepsilon v o$ ). Present passive participle of $\pi \lambda o v \tau \iota \zeta \omega$ for which see on 1 Co 1:5; 2Co 6:10 only other N.T. examples.

Liberality ( $\alpha \pi \lambda 0 \tau \eta \tau \alpha$ ). See on 8:2. Anacoluthon with nominative participle too far from $\pi \varepsilon \rho เ \sigma \sigma \varepsilon \cup \eta \tau \varepsilon$ for agreement. More like the independent use of the participle.

2Cor 9:12
 and $\varepsilon \rho \gamma o v$, work. So public service either in worship to $\operatorname{God}(\operatorname{Lu~1:23)}$ ) or benefaction to others (2Co 9:12; Php 2:30 ). Our word liturgy is this word.

Filleth up ( $\varepsilon \sigma \tau \iota v \pi \rho \circ \sigma \alpha v a \pi \lambda \eta \rho o v \sigma \alpha$ ). Present active periphrastic indicative of double compound verb $\pi \rho \circ \sigma \alpha v a \pi \lambda \eta \rho o \omega$, Koine word, here and 11:9 only in N.T., to fill up by adding to. The Corinthians simply added to the total from others.

Unto God $(\tau \omega \theta \varepsilon \omega)$. Dative case and with a certain suddenness as at close of verse 11, really a parenthesis between in the somewhat tangled sentence.

2Cor 9:13
Seeing that they glorify God ( $\delta o \xi \alpha \zeta о \nu \tau \varepsilon \varsigma ~ \tau o v ~ \theta \varepsilon o v)$. Anacoluthon again. The nominative participle used independently like $\pi \lambda$ ovtıऽou

Obedience (vлотаүף). Late and rare word from vлотабб $\omega$, to subject, middle to obey. Only in Paul in N.T.

Of your confession ( $\tau \eta \varsigma о \mu \circ \lambda о \gamma \iota \varsigma \nu \mu \omega v$ ). Old word from о $о \circ \lambda о \gamma \varepsilon \omega$ ( $о \mu \circ \lambda о \gamma о \sigma$, о $\mu о v$, $\lambda \varepsilon \gamma \omega$ ), to say together. It is either to profess (Latin profiteor, to declare openly) or to confess (Latin confiteor, to declare fully, to say the same thing as another). Both confess and profess are used to translate the verb and each idea is present in the substantive. Only the context
can decide. Actions speak louder than words. The brethren in Jerusalem will know by this collection that Gentiles make as good Christians as Jews.

For the liberality of your contribution ( $\alpha \pi \lambda о \tau \eta \tau \tau \eta \varsigma \kappa o เ v \omega v i \alpha \varsigma$ ). This is the point that matters just now. Paul drives it home. On this use of koiv $\omega v$ io see on 8:4.

2Cor 9:14
While they themselves long after you ( $\alpha v \tau \omega \nu \varepsilon \pi\llcorner\pi \circ \theta o v \nu \tau \omega v$ ). Genitive absolute of present active participle of $\varepsilon \pi \iota \pi \circ \theta \varepsilon \omega$ ( 5:2).

In you ( $\varepsilon \varphi^{\prime} \nu \mu \nu \nu$ ). Upon you.
2Cor 9:15
Thanks be to God ( $\chi \alpha \rho ı \varsigma ~ \tau \omega \theta \varepsilon \omega$ ). Third time (verses 11,12,15).
For his unspeakable gift ( $\varepsilon \pi \tau \eta \alpha v \varepsilon \kappa \delta ı \eta \gamma \eta \tau \omega$ av $\tau 0 v \delta \omega \rho \varepsilon \alpha)$. One of Paul's gems flashed out after the somewhat tangled sentence (verses 10-14) like a gleam of light that clears the air. Words fail Paul to describe the gift of Christ to and for us. He may have coined this word as it is not found elsewhere except in ecclesiastical writers save as a variant (B L) for $\alpha \delta ı \eta \eta \eta \tau 0 v$ in Aristeas 99 ( $\theta a \nu \mu \alpha \sigma \mu \circ v ~ a v \varepsilon \kappa \delta ı \eta \gamma \eta \tau o v$, "wonder beyond description," Moulton
 Eph 3:8 .

## 2 Corinthians 10

2Cor 10:1
Now I Paul myself (Avtoc $\delta \varepsilon \varepsilon \gamma \omega$ Пau入oc). Cf. Ga 5:2 . Paul now turns to the third part of the epistle in chapters 10-13 in which he vigorously defends himself against the accusations of the stubborn minority of Judaizers in Corinth. Great ministers of Christ through the ages have had to pass through fiery trials like these. Paul has shown the way for us all. He speaks of himself now plainly, but under compulsion, as is clear. It may be that at this point he took the pen from the amanuensis and wrote himself as in Ga 6:11 .

By the meekness and gentleness of Christ ( $\delta \iota \alpha \tau \varepsilon \varsigma \pi \rho \alpha \cup \tau \eta \tau \circ \varsigma \kappa \alpha \varepsilon \pi เ \varepsilon ו \kappa ı \varsigma \varsigma ~ \tau о \cup ~ X \rho ı \sigma \tau о \cup)$. This appeal shows (Plummer) that Paul had spoken to the Corinthians about the character of Christ. Jesus claimed meekness for himself (Mt 11:29) and felicitated the meek (Mt 5:5 ) and he exemplified it abundantly (Lu 23:34). See on Mt 5:15; 1Co 4:21 for this great word that has worn thin with us. Plutarch combines $\pi \rho \alpha v \tau \eta \varsigma$ with $\varepsilon \pi \iota \varepsilon \kappa \kappa \alpha$ as Paul does here. Matthew Arnold suggested "sweet reasonableness" for $\varepsilon \pi \iota \varepsilon ו \kappa \varepsilon ı \alpha$ in Plato, Aristotle, Plutarch. It is in the N.T. only here and Ac 24:4 ( $\tau$ o $\varepsilon \pi \iota \varepsilon เ \kappa \varepsilon \varsigma$ in Php 4:5). In Greek Ethics the equitable man was called $\varepsilon \pi \iota \varepsilon \iota \kappa \eta \varsigma$, a man who does not press for the last farthing of his rights (Bernard).

Lowly among you ( $\tau \alpha \pi \varepsilon ı v o \varsigma ~ \varepsilon v \nu \mu \nu v$ ). The bad use of $\tau \alpha \pi \varepsilon ı v o \varsigma$, the old use, but here alone in N.T. in that meaning. Socrates and Aristotle used it for littleness of soul. Probably Paul here is quoting one of the sneers of his traducers in Corinth about his humble conduct while with them ( 1 Co 2:23; 2Co 7:6) and his boldness ( $\alpha \pi \omega v \theta \alpha \rho \rho \omega$ ) when away (1Co 7:16 ). "It was easy to satirize and misrepresent a depression of spirits, a humility of demeanour, which were either the direct results of some bodily affliction, or which the consciousness of this affliction had rendered habitual" (Farrar). The words stung Paul to the quick.

2Cor 10:2
I beseech ( $\delta \varepsilon о \mu \alpha$ ). So here, but $\pi \alpha \rho \alpha \kappa \alpha \lambda \omega$ in verse 1 . Perhaps, "I beg" suits the new turn here.

That I may not when present show courage ( $\tau$ о $\mu \eta \pi \alpha \rho \omega \nu \theta \alpha \rho \rho \eta \sigma \alpha$ ). Articular infinitive (aorist active of $\theta \alpha \rho \rho \varepsilon \omega$ ) in the accusative case with negative $\mu \eta$ the direct object of $\delta \varepsilon o \mu \alpha$. Literally, "I beg the not when present ( $\pi \alpha \rho \omega \nu$ nominative present participle agreeing with subject of $\theta \alpha \rho \rho \omega$ in spite of being in the accusative infinitive clause, $\tau \boldsymbol{\mu} \mu \eta \theta \rho \rho \eta \sigma \alpha)$ showing courage." The example of humility in Christ makes Paul drop "from magisterial exhortation to earnest entreaty" (Plummer).

As if we walked according to the flesh ( $\omega \varsigma \kappa \alpha \tau \alpha ~ \sigma \alpha \rho \kappa \alpha ~ \pi \varepsilon \rho \iota \pi \alpha \tau о \cup \nu \tau \alpha \varsigma) . ~ A n o t h e r ~$ sneering charge as made plain by the use of $\omega \varsigma$ with the participle for the alleged reason.

2Cor 10:3

In the flesh ( $\varepsilon v \sigma \alpha \rho \kappa)$. But that is a very different thing from walking ката $\sigma \alpha \rho к \alpha$ асcording to the standards of the flesh as his enemies charged. It is easy enough to make insinuations.

We war ( $\sigma \tau \rho \alpha \tau \varepsilon v o \mu \varepsilon \theta \alpha$ ). Literary plural again after $\lambda о ү \iota \zeta о \mu \alpha$ in verse 2 . Old word to
 only the devil and his agents even if wearing the livery of heaven. Paul knew the Roman army well. He knows how to use the military metaphor.

2Cor 10:4
The weapons of our warfare ( $\tau \alpha$ o $\pi \lambda \alpha \tau \eta \varsigma \sigma \tau \rho \alpha \tau \varepsilon \mid \alpha \varsigma) . ~ \Sigma \tau \rho \alpha \tau \varepsilon \mid \alpha$ (old word, in N.T. only here and $1 \mathrm{Ti} 1: 18$ ) is
campaign and not army as some MSS. have ( $\sigma \tau \rho \alpha \tau \iota)$. But both $\sigma \tau \rho \alpha \tau \varepsilon ı \alpha$ and $\sigma \tau \rho \alpha \tau \iota \alpha$ occur in the papyri for the same word (Deissmann, Bible Studies, p. 181f.). For or $\lambda \alpha$ (Latin arma) see on 6:7; Rom 6:13; 13:12 .

Of the flesh ( $\sigma \alpha \rho к ⿺ 𠃊)$ ). See on 1Сo 3:3; 2Co 1:12. They had accused him of artifices and craft.

Mighty before God ( $\delta v v a \tau \alpha \tau \omega \theta \varepsilon \omega$ ). This dative of personal interest (ethical dative) can be like aбтєוoc $\tau \omega \theta \varepsilon \omega$ (Ac 7:20), in God's eyes, as it looks to God.
 old word from $\kappa \alpha \theta \alpha \mu \rho \omega$, to take down, to tear down walls and buildings. Carries on the military metaphor. O $\chi \cup \rho \omega \mu \alpha$ is old word, common in the Apocrypha, from o $\chi \cup \rho o \omega$, to fortify, and that from oxvpoc (from $\varepsilon \chi \omega$, to hold fast). Nowhere else in N.T. In Cilicia the Romans had to tear down many rocky forts in their attacks on the pirates.

2Cor 10:5
 (ка $\theta a \iota \rho \varepsilon \sigma \iota \varsigma)$ and the present active participle agreeing with $\sigma \tau \rho \alpha \tau \varepsilon v o \mu \varepsilon \theta \alpha$ in verse 3 (verse 4 a parenthesis). The reasonings or imaginations ( $\lambda o \gamma \iota \sigma \mu$ ovৎ, old word from $\lambda o \gamma \iota \zeta \rho \mu \alpha$, to reckon, only here in N.T. and Ro 2:15 ) are treated as forts or citadels to be conquered.

Every high thing that is exalted ( $\pi \alpha \nu \nu \psi \omega \mu \alpha \varepsilon \pi \alpha \iota \rho о \mu \varepsilon v o v$ ). Same metaphor. $Н \nu \psi \omega \mu \alpha$ from $v \psi o \omega$ is late Koine word (in LXX, Plutarch, Philo, papyri) for height and that figure carried on by $\varepsilon \pi \alpha \rho \rho \circ \mu \varepsilon v o v$. Paul aims to pull down the top-most perch of audacity in their reasonings against the knowledge of God. We need Paul's skill and courage today.

Bringing every thought into captivity ( $\alpha$ I $\chi \mu \lambda \omega \tau \iota \zeta о \nu \tau \varepsilon \varsigma \pi \alpha \nu \nu 0 \eta \mu \alpha$ ). Present active participle of $\operatorname{ai\chi } \mu \lambda \lambda \omega \tau \iota \zeta \omega$, common Koine verb from $\operatorname{al\chi } \mu \lambda \lambda \omega \tau 0 \varsigma$, captive in war ( $\alpha \downarrow \chi \mu \eta$, spear, $\alpha \lambda \omega \tau$ тos verbal of $\alpha \lambda_{\iota} \sigma \kappa \circ \mu \alpha$, to be taken). See on Lu 21:24. Paul is the most daring of thinkers, but he lays all his thoughts at the feet of Jesus. For von $\mu \alpha$ (device) see on 2:11.

To the obedience of Christ ( $\varepsilon \varsigma \varsigma ~ \tau \eta \nu ~ v \pi a \kappa о \eta \nu ~ \tau o v ~ X \rho ı \sigma \tau о v) . ~ O b j e c t i v e ~ g e n i t i v e, ~ " t o ~ t h e ~$ obedience unto Christ." That is Paul's conception of intellectual liberty, freedom in Christ. Deissmann (St. Paul, p. 141) calls this "the mystic genitive."

2Cor 10:6
Being in readiness ( $\varepsilon v \varepsilon \tau о\lrcorner \mu \omega \varepsilon \chi \circ v \tau \varepsilon \varsigma)$. This very idiom occurs in Polybius, Philo, etc. "Holding in readiness." In 12:14 we have $\varepsilon \tau о \iota \omega \varsigma \varepsilon \chi \omega$ for the same idea (adverb $\varepsilon \tau о \mu \omega \varsigma)$.

Disobedience ( $\pi \alpha \rho \alpha \kappa о \eta \nu$ ). Rare word (Plato, papyri) hearing amiss (aside), failing to hear, refusing to heed (cf. Mt 18:17 for same idea in $\pi \alpha \rho \alpha \kappa o v \omega$ ). In N.T. only here; Ro 5:19; Heb 2:2 . In contrast with $v \pi \alpha \kappa о \eta$ (obedience) rather than the common $\alpha \pi \varepsilon \iota \theta$ (Ro 11:30,32 ).

When your obedience shall be fulfilled (o $\tau \alpha \nu \pi \lambda \eta \rho \omega \theta \eta v \mu \omega \nu \eta v \pi \alpha \kappa о \eta$ ). Indefinite temporal clause with otav and first aorist passive subjunctive. Paul expects that the whole church will become obedient to Christ's will soon as came true.

2Cor 10:7
Yelook (B $\lambda \varepsilon \pi \varepsilon \tau \varepsilon$ ). Either indicative or imperative. Either makes sense but the indicative the best sense.

Before your face ( $\kappa \alpha \tau \alpha \pi \rho \sigma \sigma \omega \pi \sigma \nu)$. They ought to look below the surface. If it is imperative, they should see the facts.

That he is Christ's (X $\mathrm{X} \_\sigma \tau \circ v \varepsilon ı v \alpha$ ). Predicate genitive in indirect discourse).
2Cor 10:8
Somewhat abundantly ( $\pi \varepsilon \rho \iota \sigma \sigma o \tau \varepsilon \rho \circ \nu \tau$ ). Comparative, "somewhat more abundantly" than I have, in order to show that he is as true a minister of Christ as his accusers are. Concessive (conditional) clause of third class. For $\varepsilon a \nu \tau \varepsilon$ see Ro 14:8.

I shall not be put to shame (ovк $\alpha \iota \sigma \chi \nu v \theta \eta \sigma o \mu \alpha$ ). As a convicted impostor or pretentious boaster (Plummer). First future passive, singular number (not literary plural as in verse 7).

2Cor 10:9
As if I would terrify you by my letters ( $\omega \varsigma \alpha \nu \varepsilon \kappa \varphi \circ \beta \varepsilon \iota v \nu \mu \alpha \varsigma \delta \iota \alpha \tau \omega \nu \varepsilon \pi \iota \sigma \tau \circ \lambda \omega \nu$ ). This use of $\omega \varsigma \alpha \nu$ with the infinitive is seen in the papyri (Moulton, Prolegomena, p. 167) and it is not $\alpha v$ in the apodosis (Robertson, Grammar, pp. 974, 1040). The active of this old compound verb means to frighten, to terrify. Here only in N.T. It is common in the LXX (Job 7:14; 33:16 ). Note plural (letters) here and cf. 1Co 5:9; 2Co 2:3 .

## 2Cor 10:10

They say ( $\varphi \alpha \sigma \iota v$ ). Reading of B old Latin Vulgate, but Westcott and Hort prefer $\varphi \eta \sigma \iota v$ (says one, the leader). This charge Paul quotes directly.

Weighty and strong ( $\beta \alpha \rho \varepsilon \iota \alpha \kappa \alpha \iota \chi \cup \rho \alpha$ ). These adjectives can be uncomplimentary and mean "severe and violent" instead of "impressive and vigorous." The adjectives bear either sense.

His bodily presence ( $\eta \pi \alpha \rho o v \sigma \iota \alpha$ $\tau 0 v \sigma \omega \mu \alpha \tau \sigma \varsigma)$. This certainly is uncomplimentary. "The presence of his body." It seems clear that Paul did not have a commanding appearance like that of Barnabas (Ac 14:12). He had some physical defect of the eyes (Ga 4:14) and a thorn in the flesh (2Co 12:7). In the second century Acts of Paul and Thecla he is pictured
as small, short, bow-legged, with eye-brows knit together, and an aquiline nose. A forgery of the fourth century in the name of Lucian describes Paul as "the bald-headed, hook-nosed Galilean." However that may be, his accusers sneered at his personal appearance as "weak" ( $\alpha \sigma \varepsilon v \eta \varsigma)$.

His speech of no account (o $\lambda о \gamma o \varsigma \varepsilon \xi o v \theta \varepsilon v \eta \mu \varepsilon v o \varsigma)$. Perfect passive participle of $\varepsilon \xi o v \theta \varepsilon v \varepsilon \omega$, to treat as nothing (cf. 1Co 1:28). The Corinthians (some of them) cared more for the brilliant eloquence of Apollos and did not find Paul a trained rhetorician (1Co 1:17; 2:1,4; 2Co 11:6 ). He made different impressions on different people. "Seldom has any one been at once so ardently hated and so passionately loved as St. Paul" (Deissmann, St. Paul, p. 70). "At one time he seemed like a man, and at another he seemed like an angel" (Acts of Paul and Thecla). He spoke like a god at Lystra (Ac 14:8-12), but Eutychus went to sleep on him (Ac 20:9). Evidently Paul winced under this biting criticism of his looks and speech.

2Cor 10:11
What we are (oo $\varepsilon \sigma \mu \varepsilon v)$. Rather, "what sort" (oto), not o (what) nor o (who). Literary plural. Hoos is qualitative just as tooovto (such). Paul's quality in his letters when absent ( $\alpha \pi о v \tau \varepsilon \varsigma$ ) and in his deeds when present ( $\pi \alpha \rho о \nu \tau \varepsilon \varsigma)$ is precisely the same.

2Cor 10:12
To number or compare ourselves ( $\varepsilon v \kappa \rho i v \alpha ~ \eta \sigma v v \kappa \rho i v \alpha)$. Paronomasia here, play on the two words. Evkpıva is first aorist active infinitive of old verb, but here only in N.T., to judge among, to judge one as worthy to be numbered among as here. The second verb $\sigma 0 v \kappa \rho \iota v a($ first aorist active infinitive of $\sigma u v \kappa \rho \iota v \omega$, old verb, in N.T. only here and 1Co 2:13 ) originally meant to combine as in 1Co 2:13 (which see), but here it has the sense of "compare" not found in the old Greek. The papyri use it to mean to decide. Plummer suggests "to pair and compare" for the play on the words here.

Measuring themselves by themselves ( $\varepsilon v$ عavtoı $\varepsilon a v \tau о \cup \varsigma ~ \mu \varepsilon \tau \rho о \cup v \tau \varepsilon \varsigma)$ ). Or "in themselves." Keenest sarcasm. Setting themselves up as the standards of orthodoxy these Judaizers always measure up to the standard while Paul falls short.

 into the trap set for him.

Are without understanding ( $o v \sigma u v i \alpha \sigma \iota v$ ). The regular form for present active indicative third plural of $\sigma u v ı \eta \mu$, to comprehend, to grasp. Some MSS. have the late form $\sigma u v i o v \sigma ı v$ (omega form $\sigma v v i \omega$ ). It is a hard thing to see, but it is true. These men do not see their own picture so obvious to others (Eph 5:17; 1Ti 1:7). Cf. Mr 8:17 .

2Cor 10:13
Beyond our measure ( $\varepsilon ı \varsigma ~ \tau \alpha ~ \alpha \mu \varepsilon \tau \rho \alpha)$. "Into the unmeasured things," "the illimitable." Old word, here only in N.T.

Of the province ( $\tau 0 v$ кavovos). Old word ( $\kappa \alpha v v a$ like Hebrew) a reed, a measuring rod. Numerous papyri examples for measuring rod and rules (our word canon). Only twice in N.T., here (also verse 15,16 ) and Ga 6:16 (rule to walk by).

To reach even unto you ( $\varepsilon \varphi \iota \kappa \varepsilon \sigma \theta \alpha \propto \chi \rho \kappa \alpha v \mu \omega v$ ). Second aorist middle infinitive of $\varepsilon \varphi \iota \kappa \nu \varepsilon о \mu \alpha$, old verb, only here and verse 14 in N.T. Paul's measuring-rod extends to Corinth.

2Cor 10:14
We stretch not ourselves overmuch (ov v $\pi \varepsilon \rho \varepsilon \kappa \tau \varepsilon เ v o \mu \varepsilon v \varepsilon a v \tau o v \varsigma)$. Apparently Paul made this double compound verb to express his full meaning (only in Gregory Nazianzen afterwards). "We do not stretch ourselves out beyond our rights."

We came even as far as unto you ( $\alpha \chi \rho \kappa \alpha v \mu \omega \nu \varepsilon \varphi \theta \alpha \sigma \alpha \mu \varepsilon \nu)$ ). First aorist active indicative of $\varphi \theta \alpha v \omega$, to come before, to precede, the original idea which is retained in Mt 12:28 ( Lu 11:20) and may be so here. If so, it means "We were the first to come to you" (which is true, Ac 18:1-18).

2Cor 10:15
In other men's labours ( $\varepsilon \nu \alpha \lambda \lambda о \tau \rho ь \iota \varsigma к о \pi о \iota \varsigma) . ~ A \lambda \lambda о \tau \rho ь \varsigma ~ m e a n s ~ b e l o n g i n g ~ t o ~ a n o t h e r ~$ as in Lu 16:12. Paul founded the church in Corinth.

As your faith groweth ( $\alpha v \xi \alpha \nu o \mu \varepsilon v \eta \varsigma \tau \eta \varsigma \pi \iota \sigma \tau \varepsilon \omega \varsigma)$. Genitive absolute of the present passive participle of $\alpha v \xi \alpha \nu \omega$, to grow.

We shall be magnified ( $\mu \varepsilon \gamma \alpha \lambda \nu v \theta \eta \nu \alpha$ ). First aorist passive infinitive of $\mu \varepsilon \gamma \alpha \lambda \nu \nu \omega$, old verb (Lu 1:46) to make great (cf. Php 1:20 of Christ). Indirect discourse after $\varepsilon \lambda \pi \iota \delta \alpha$ (hope) with the construction of $\varepsilon \lambda \pi \iota \zeta \omega$, to hope.

2Cor 10:16
Even unto the parts beyond you ( $\varepsilon \iota \varsigma \tau \alpha v \pi \varepsilon \rho \varepsilon \kappa \varepsilon \iota \nu \alpha \nu \mu \omega v$ ). Compound adverb (v $v \varepsilon \rho$, єкєıva, beyond those places) used as preposition. Found only here and in ecclesiastical writers.

Things ready to our hand $(\tau \alpha \varepsilon \tau \circ \iota \mu \alpha)$. He had a plenty besides that he could use.
2Cor 10:17
Paul quotes Pr 27:2 .
2Cor 10:18
Is approved ( $\delta о к \iota \mu \varsigma)$. Accepted (from $\delta \varepsilon \chi о \mu \alpha)$ by the Lord. The Lord accepts his own recommendation ( $\sigma u v \iota \sigma \tau \eta \sigma \iota v$, see on 2Co 3:1f. ).

## 2 Corinthians 11

2Cor 11:1
Would that ye could bear with me ( $\circ \varphi \varepsilon \lambda o v ~ \alpha v \varepsilon ı \varepsilon \varepsilon \sigma \theta \varepsilon \mu \circ v$ ). Koine way of expressing a wish about the present, $o \varphi \varepsilon \lambda o v$ (as a conjunction, really second aorist active indicative of о甲 $\varepsilon \wedge \lambda \omega$ without augment) and the imperfect indicative instead of $\varepsilon \iota \theta \varepsilon$ or $\varepsilon \gamma \alpha \rho$ (Robertson, Grammar, p. 1003). Cf. Re 3:15. See Ga 5:12 for future indicative with $O \varphi \varepsilon \lambda o v$ and 1Co 4:8 for aorist. Mov is ablative case after $\alpha v \varepsilon \not \chi \varepsilon \sigma \theta \varepsilon$ (direct middle, hold yourselves back from $\mathrm{me})$. There is a touch of irony here.

Bear with me ( $\alpha v \varepsilon \chi \varepsilon \sigma \theta \varepsilon \mu \circ v$ ). Either imperative middle or present middle indicative (ye do bear with me). Same form.

In a little foolishness ( $\mu \kappa \rho о \nu \tau \alpha \varphi \rho о \sigma u \nu \eta \varsigma)$. Accusative of general reference ( $\mu \kappa \rho о \nu$ $\tau)$. "Some little foolishness" (from $\alpha \varphi \rho \omega v$, foolish). Old word only in this chapter in N.T.

2Cor 11:2
With a godly jealousy $(\theta \varepsilon o v \zeta \eta \lambda \omega)$. Instrumental case of $\zeta \eta \lambda o \varsigma$. With a jealousy of God.
I espoused ( $\eta \rho \mu о \sigma \alpha \mu \eta v$ ). First aorist middle indicative of $\alpha \rho \mu \mathrm{\mu} \zeta \omega$, old verb to join, to fit together (from $\alpha \rho \mu \boldsymbol{\rho}$, joint). Common for betrothed, though only here in N.T. The middle voice indicates Paul's interest in the matter. Paul treats the Corinthians as his bride.

2Cor 11:3
The serpent beguiled Eve ( $о$ о $\varphi \varsigma \varepsilon \xi \eta \pi \alpha \tau \eta \sigma \varepsilon v$ Hzvav). Paul's only mention of the serpent in Eden. The compound $\varepsilon \xi \alpha \pi \alpha \tau \alpha \omega$ means to deceive completely.

Lest by any means ( $\mu \eta \pi \omega \varsigma$ ). Common conjunction after verbs of fearing.
Corrupted ( $\varphi \theta \alpha \rho \eta$ ). Second aorist passive subjunctive with $\mu \eta \pi \omega \varsigma$ of $\varphi \theta \varepsilon \iota \rho \omega$, to corrupt.
2Cor 11:4
Another Jesus ( $\alpha \lambda \lambda$ ov In $\sigma o u v$ ). Not necessarily a different Jesus, but any other "Jesus" is a rival and so wrong. That would deny the identity.

A different spirit ( $\pi \nu \varepsilon \nu \mu \alpha \varepsilon \tau \varepsilon \rho \circ v)$. This is the obvious meaning of $\varepsilon \tau \varepsilon \rho \circ v$ in distinction from $\alpha \lambda \lambda o v$ as seen in Ac 4:12; Ga 1:6f. But this distinction in nature or kind is not always to be insisted on.

A different gospel ( $\varepsilon v a \gamma \gamma \varepsilon \lambda \iota o v \varepsilon \tau \varepsilon \rho o v$ ). Similar use of $\varepsilon \tau \varepsilon \rho \circ \nu$.
Ye do well to bear with him ( $\kappa \alpha \lambda \omega \varsigma \alpha v \varepsilon \chi \varepsilon \sigma \theta \varepsilon$ ). Ironical turn again. "Well do you hold yourselves back from him" (the coming one, whoever he is). Some MSS. have the imperfect $\alpha \nu \varepsilon \chi \varepsilon \sigma \theta \varepsilon$ (did bear with).

2Cor 11:5
That I am not a whit behind the very chiefest apostles ( $\mu \eta \delta \varepsilon v v \sigma \tau \varepsilon \rho \eta \kappa \varepsilon v \alpha \tau \omega v v \pi \varepsilon \rho \lambda \iota \alpha v$ $\alpha \pi \sigma \sigma \tau 0 \lambda \omega v)$. Perfect active infinitive of $v \sigma \tau \varepsilon \rho \varepsilon \omega$, old verb to fall short with the ablative case. The rare compound adverb $\cup \pi \varepsilon \rho \lambda \iota \alpha v$ (possibly in use in the vernacular) is probably ironical
also, "the super apostles" as these Judaizers set themselves up to be. "The extra-super apostles" (Farrar). Also in 12:11. He is not referring to the pillar-of Ga 2:9 .

2Cor 11:6
Rude in speech ( $\iota \delta \omega \tau \tau \eta \varsigma \tau \omega \lambda o \gamma \omega$ ). Locative case with $t \delta t \omega \tau \eta \varsigma$ for which word see on Ac 4:13; 1Co 14:16,23,24. The Greeks regarded a man as $\delta \delta \omega \tau \tau \zeta$ who just attended to his own affairs ( $\tau \alpha \wedge \delta 1 \alpha$ ) and took no part in public life. Paul admits that he is not a professional orator (cf. 10:10), but denies that he is unskilled in knowledge ( $a \lambda \lambda^{\prime}$ ov $\tau \eta \gamma v \omega \sigma \varepsilon$ ).

Among all men ( $\varepsilon v \pi \alpha \sigma ı v)$. He has made his mastery of the things of Christ plain among all men. He knew his subject.

2Cor 11:7
In abasing myself ( $\varepsilon \mu \alpha v \tau o v \tau \alpha \pi \varepsilon เ v \omega v$ ). Humbling myself by making tents for a living while preaching in Corinth. He is ironical still about "doing a $\sin$ " ( $\alpha \mu \rho \tau \tau \alpha v \varepsilon \pi \sigma ı \sigma \alpha)$.

For nought ( $\delta \omega \rho \varepsilon \alpha v$ ). Gratis. Accusative of general reference, common adverb. It amounts to sarcasm to ask if he did a sin in preaching the gospel free of expense to them "that ye may be exalted."

2Cor 11:8
I robbed ( $\varepsilon \sigma u \lambda \eta \sigma \alpha$ ). Old verb to despoil, strip arms from a slain foe, only here in N.T. He allowed other churches to do more than their share.

Taking wages ( $\lambda \alpha \beta \omega v o \psi \omega v ı v)$. For $o \psi \omega v$ vov see on 1Co 9:7; Ro 6:17. He got his "rations" from other churches, not from Corinth while there.

2Cor 11:9
I was not a burden to any man (ov катєv $\rho \kappa \kappa \eta \sigma \alpha$ ov $\quad \varepsilon v o \varsigma$ ). First aorist active indicative of катаvаркаш. Jerome calls this word one of Paul's cilicisms which he brought from Cilicia. But the word occurs in Hippocrates for growing quite stiff and may be a medical term in popular use. Napка $\omega$ means to become numb, torpid, and so a burden. It is only here and 12:13f. Paul "did not benumb the Corinthians by his demand for pecuniary aid" (Vincent).

From being burdensome ( $\alpha \beta \alpha \rho \eta$ ). Old adjective, free from weight or light ( $\alpha$ privative and $\beta a \rho o \varsigma$, weight) . See on 1Th 2:9 for same idea. Paul kept himself independent.

2Cor 11:10
 exactly, "This glorying shall not be fenced in as regards me." Second future passive of $\varphi \rho a \sigma \sigma \omega$, to fence in, to stop, to block in. Old verb, only here in N.T.

In the regions of Achaia ( $\varepsilon \nu \tau о \iota \varsigma \kappa \lambda \iota \mu \alpha \sigma \iota \nu \tau \eta \varsigma$ А $\propto \iota \alpha \varsigma)$. $К \lambda \iota \mu \alpha$ from $\kappa \lambda \iota \nu \omega$, to incline, is Koine word for declivity slope, region (our climate). See chapter 1Co 9 for Paul's boast about preaching the gospel without cost to them.

2Cor 11:11
God knoweth (o $\theta \varepsilon o \varsigma o i \delta \varepsilon v)$. Whether they do or not. He knows that God understands his motives.

2Cor 11:12
That I may cut off occasion ( $\imath v \alpha \varepsilon \kappa \kappa о \psi \omega \tau \eta \nu \alpha \varphi о \rho \mu \eta \nu$ ). Purpose clause with $\tau v \alpha$ and first aorist active subjunctive of $\varepsilon \kappa \kappa о \pi \tau \omega$, old verb to cut out or off (Mt 3:10; 5:30). See 2Co 5:12 for $\alpha \varphi о \rho \mu \eta \nu$.

From them which desire an occasion ( $\tau \omega v \theta \varepsilon \lambda o v \tau \omega v \alpha \varphi о \rho \mu \eta v$ ). Ablative case after $\varepsilon \kappa \kappa о \psi \omega$. There are always some hunting for occasions to start something against preachers.

They may be found ( $\varepsilon v \rho \varepsilon \theta \omega \sigma \iota v$ ). First aorist passive subjunctive of $\varepsilon v \rho \iota \sigma \kappa \omega$, to find with final conjunction v a.

2Cor 11:13
False apostles ( $\psi \varepsilon v \delta a \pi \sigma \sigma \tau о \lambda o)$. From $\psi \varepsilon v \delta \eta \varsigma$, false, and $\alpha \pi \sigma \sigma \tau o \lambda o \varsigma$. Paul apparently made this word (cf. Re 2:2 ). In verse 26 we have $\psi \varepsilon v \delta \alpha \delta \varepsilon \lambda \varphi o \varsigma$, a word of like formation (Ga 2:4). See also $\psi \varepsilon v \delta о \chi \rho ı \sigma \tau o$ and $\psi \varepsilon v \delta о \pi \rho о \varphi \eta \tau \alpha$ in Mr 13:22.

Deceitful ( $\delta$ o $\lambda ı$ ). Old word from $\delta$ o $\lambda_{o \varsigma}$ (lure, snare), only here in N.T. (cf. Ro 16:18 ).

Fashioning themselves ( $\mu \varepsilon \tau \alpha \sigma \chi \eta \mu \alpha \tau \iota \zeta о \mu \varepsilon v o$ ). Present middle (direct) participle of the old verb $\mu \varepsilon \tau \alpha \sigma \chi \eta \mu \alpha \tau \iota \zeta \omega$ for which see on 1Co 4:6. Masquerading as apostles of Christ by putting on the outward habiliments, posing as ministers of Christ ("gentlemen of the cloth," nothing but cloth). Paul plays with this verb in verses $13,14,15$.

2Cor 11:14
An angel of light ( $\alpha \gamma \gamma \varepsilon \lambda o v \varphi \omega \tau \circ \varsigma$ ). The prince of darkness puts on the garb of light and sets the fashion for his followers in the masquerade to deceive the saints. "Like master like man." Cf. 2:11; Ga 1:8. This terrible portrayal reveals the depth of Paul's feelings about the conduct of the Judaizing leaders in Corinth. In Ga 2:4 he terms those in Jerusalem "false brethren."

2Cor 11:15
As ministers of righteousness ( $\omega \varsigma$ סıакоvo $\delta \iota \kappa \alpha \iota \sigma v \nu \eta \varsigma$ ). Jesus (Joh 10:1-21) terms these false shepherds thieves and robbers. It is a tragedy to see men in the livery of heaven serve the devil.

2Cor 11:16
Let no man think me foolish ( $\mu \eta \tau \iota \varsigma \mu \varepsilon \delta \sigma \xi \eta \alpha \varphi \rho \circ v \alpha \varepsilon \iota v \alpha$ ). Usual construction in a negative prohibition with $\mu \eta$ and the aorist subjunctive $\delta o \xi \eta$ (Robertson, Grammar, p. 933).

But if ye do $(\varepsilon \delta \varepsilon \mu \eta \gamma \varepsilon)$. Literally, "But if not at least (or otherwise)," that is, If you do think me foolish.

Yet as foolish ( $\kappa \alpha v \omega \varsigma \alpha \varphi \rho о v \alpha$ ). "Even if as foolish." Paul feels compelled to boast of his career and work as an apostle of Christ after the terrible picture just drawn of the Judaizers. He feels greatly embarrassed in doing it. Some men can do it with complete composure (sang froid).

2Cor 11:17

Not after the Lord (ou kata Kupıov). Not after the example of the Lord. He had appealed to the example of Christ in 10:1 (the meekness and gentleness of Christ). Paul's conduct here, he admits, is not in keeping with that. But circumstances force him on.

2Cor 11:18
After the flesh (ката барка). It is ката $\sigma \alpha \rho \kappa \alpha$ not ката Kupıv.
I also $(\kappa \alpha \gamma \omega)$. But he knows that it is a bit of foolishness and not like Christ.
2Cor 11:19
 wise).

2Cor 11:20
For ye bear with a man ( $\alpha v \varepsilon \chi \varepsilon \sigma \theta \varepsilon \gamma \alpha \rho$ ). " You tolerate tyranny, extortion, craftiness, arrogance, violence, and insult" (Plummer). Sarcasm that cut to the bone. Note the verb with each of the five conditional clauses (enslaves, devours, takes captive, exalteth himself, smites on the face). The climax of insult, smiting on the face.

2Cor 11:21
By way of disparagement ( $\kappa \alpha \tau \alpha \alpha \tau \mu ı \alpha v$ ). Intense irony. Cf. 6:8.
As though ( $\omega \varsigma$ o $\tau$ ). Presented as the charge of another. "They more than tolerate those who trample on them while they criticize as 'weak' one who shows them great consideration" (Plummer). After these prolonged explanations Paul "changes his tone from irony to direct and masterful assertion" (Bernard).

I am bold also ( $\tau \boldsymbol{\lambda} \mu \omega \kappa \alpha \gamma \omega)$. Real courage. Cf. 10:2,12 .
2Cor 11:22
So am I ( $\kappa \alpha \gamma \omega$ ). This is his triumphant refrain with each challenge.
2Cor 11:23
As one beside himself ( $\pi \alpha \rho \alpha \varphi \rho \circ v \omega v$ ). Present active participle of $\pi \alpha \rho \alpha \varphi \rho o v \varepsilon \omega$. Old verb from $\pi \alpha \rho \alpha \varphi \rho \omega v$ ( $\pi \alpha \rho \alpha, \varphi \rho \eta v$ ), beside one's wits. Only here in N.T. Such open boasting is out of accord with Paul's spirit and habit.

I more (v $v \varepsilon \rho \varepsilon \gamma \omega$ ). This adverbial use of $v \pi \varepsilon \rho$ appears in ancient Greek (Euripides). It has no effect on $\varepsilon \gamma \omega$, not "more than I," but "I more than they." He claims superiority now to these "superextra apostles."
 clear.

In prisons ( $\varepsilon v \varphi \cup \lambda \alpha \kappa \alpha ı \varsigma)$. Plural also in 6:5. Clement of Rome (Cor. V.) says that Paul was imprisoned seven times. We know of only five (Philippi, Jerusalem, Caesarea, twice in Rome), and only one before II Corinthians (Philippi). But Luke does not tell them all nor does Paul. Had he been in prison in Ephesus? So many think and it is possible as we have seen.

#### Abstract

Above measure（ $v \pi \varepsilon \rho \beta \alpha \lambda \lambda$ ov $\tau \omega \varsigma$ ）．Old adverb from the participle $v \pi \varepsilon \rho \beta \alpha \lambda \lambda o v \tau \omega v$ （vォ $\rho \beta \alpha \lambda \lambda \omega$ ，to hurl beyond）．Here only in N．T．

In deaths oft（ $\varepsilon v$ Өavatoıя то入入акıц）．He had nearly lost his life，as we know，many times（1：9f．；4：11）．

2Cor 11：24
Five times received I forty stripes save one（ $\pi \varepsilon v \tau \alpha \kappa เ \varsigma ~ \tau \varepsilon \sigma \sigma \varepsilon \rho \alpha \kappa о \nu \tau \alpha ~ \pi \alpha \rho \alpha ~ \mu ı \alpha v \varepsilon \lambda \alpha \beta o v)$ ． The Acts and the Epistles are silent about these Jewish floggings（Mt 27：36）．See on Lu 12：47 for omission of $\pi \lambda \eta \gamma \alpha \varsigma$（stripes）．Thirty－nine lashes was the rule for fear of a miscount（De 25：1－3 ）．Cf．Josephus（Ant．IV．8，1，21）．

2Cor 11：25
Thrice was I beaten with rods（ $\tau \rho \iota \varsigma \varepsilon \rho \rho \alpha \beta \delta \iota \sigma \theta \eta \nu$ ）．Roman（Gentile）punishment．It was forbidden to Roman citizens by the Lex Porcia，but Paul endured it in Philippi（Ac 16：23，37），the only one of the three named in Acts．First aorist passive of $\rho \alpha \beta \delta \iota \zeta \omega$ ，from $\rho \alpha \beta \delta o \varsigma$, rod，Koine word，in N．T．only here and Ac 16：22 which see．

Once was I stoned（ $\left.\alpha \pi \alpha \xi \varepsilon \lambda_{\lambda} \theta \alpha \sigma \theta \eta v\right)$ ．Once for all $\alpha \pi \alpha \xi$ means．At Lystra（Ac 14：5－19 ）．On $\lambda_{1} \theta_{\alpha} \zeta \omega$ Koine verb from $\lambda_{1} \theta_{0}$ ，see on Ac 5：26．

Thrice I suffered shipwreck（ $\tau \rho \iota \varsigma \varepsilon v \alpha v \alpha \gamma \eta \sigma \alpha$ ）．First aorist active of $v \alpha v \alpha \gamma \varepsilon \omega$ ，from vavaүoc，shipwrecked（vavc，ship，$\alpha \gamma v v \mu$ ，to break）．Old and common verb，in N．T．only here and 1Ti 1：19．We know nothing of these．The one told in Ac 27 was much later．What a pity that we have no data for all these varied experiences of Paul．

Night and day（ $v v \chi \theta \eta \mu \varepsilon \rho o v$ ）Rare word．Papyri give $v v \kappa \tau \eta \mu \alpha \rho$ with the same idea （night－day）．

Have I been in the deep（ $\varepsilon v \tau \omega \beta \cup \theta \omega \pi \varepsilon \pi о џ \eta \kappa \alpha)$ ．Vivid dramatic perfect active indicative of $\pi$ tote ，＂I have done a night and day in the deep．＂The memory of it survives like a night－ mare．BuӨos is old word（only here in N．T．）for bottom，depth of the sea，then the sea itself． Paul does not mean that he was a night and day under the water，not a Jonah experience， only that he was far out at sea and shipwrecked．This was one of the three shipwrecks－already named．

2Cor 11：26
In journeyings（odoıtopıaıs）．Locative case of old word，only here in N．T．and Joh 4：6 ，from oठoıло $о$ ¢ $\varsigma$ ，wayfarer．

In perils（ $\kappa ı v \delta u v o \iota \varsigma) . ~ L o c a t i v e ~ c a s e ~ o f ~ \kappa ı v \delta u v o c, ~ o l d ~ w o r d ~ f o r ~ d a n g e r ~ o r ~ p e r i l . ~ I n ~ N . T . ~ T$ only this verse and Ro 8：35．The repetition here is very effective without the preposition $\varepsilon v$ （in）and without conjunctions（asyndeton）．They are in contrasted pairs．The rivers of Asia Minor are still subject to sudden swellings from floods in the mountains．Cicero and Pompey won fame fighting the Cilician pirates and robbers（note $\lambda \eta \iota \sigma \tau \omega \nu$ ，not $\kappa \lambda \varepsilon \pi \tau \omega \nu$ ，thieves， brigands or bandits on which see Mt 26：55）．The Jewish perils（ $\varepsilon \kappa \gamma \varepsilon v o v \varsigma$ ，from my race） can be illustrated in Ac 9：23，29；13：50；14：5；17：5，13；18：12；23：12；24：27，and they were all
perils in the city also. Perils from the Gentiles ( $\varepsilon \xi \varepsilon \theta v \omega v$ ) we know in Philippi (Ac 16:20) and in Ephesus (Ac 19:23f. ). Travel in the mountains and in the wilderness was perilous in spite of the great Roman highways.

Among false brethren ( $\varepsilon v \psi \varepsilon v \delta \alpha \delta \varepsilon \lambda \varphi o \iota \varsigma)$. Chapters 2Co 10; 11 throw a lurid light on this aspect of the subject.

2Cor 11:27
In labour and travail ( $\kappa о \pi \omega \kappa \alpha \mu \circ \chi \theta \omega$ ). Both old words for severe work, combined here as in 1Th 2:9; 2Th 3:8, "by toil and moil" (Plummer). The rest of the list is like the items in 2Co 6:4f. .

In cold $(\varepsilon v \psi v \chi \varepsilon)$. Old word from $\psi v \chi \omega$, to cool by blowing. See Ac 28:2 . See the picture of the aged Paul later in the Roman dungeon (2Ti 4:9-18).

2Cor 11:28
Besides those things that are without ( $\chi \omega \rho \iota \varsigma \tau \omega \nu \pi \alpha \rho \varepsilon \kappa \tau о \varsigma)$. Probably, "apart from those things beside these just mentioned." Surely no man ever found glory in such a peck of troubles as Paul has here recounted. His list should shame us all today who are disposed to find fault with our lot.

That which presseth upon me daily ( $\eta \varepsilon \pi \iota \sigma \tau \alpha \sigma \iota \varsigma \mu \circ \eta \kappa \alpha \theta^{\prime} \eta \mu \varepsilon \rho \alpha \nu$ ). For this vivid word $\varepsilon \pi \iota \sigma \tau a \sigma \iota \varsigma$ see Ac 24:12, the only other place in the N.T. where it occurs. It is like the rush of a mob upon Paul.

Anxiety for all the churches ( $\eta \mu \varepsilon \rho \iota \mu \nu \alpha \pi \alpha \sigma \omega \nu \tau \omega \nu \varepsilon \kappa \kappa \lambda \eta \sigma \iota \omega \nu)$. Objective genitive after $\mu \varepsilon \rho \iota \mu \nu \alpha$ (distractions in different directions, from $\mu \varepsilon \rho \iota \zeta \omega$ ) for which word see on Mt 13:22. Paul had the shepherd heart. As apostle to the Gentiles he had founded most of these churches.

2Cor 11:29
I burn $(\pi v \rho \circ v \mu \alpha)$. Present passive indicative of $\pi \nu \rho o \omega$, old verb to inflame (from $\pi v \rho$, fire). When a brother stumbles, Paul is set on fire with grief.

2Cor 11:30
The things that concern my weakness ( $\tau \alpha \tau \eta \varsigma \alpha \sigma \theta \varepsilon v \varepsilon ı \alpha \varsigma \mu \circ v$ ). Like the list above.
2Cor 11:31
I am not lying (ov $\psi \varepsilon \cup \delta o \mu \alpha$ ). The list seems so absurd and foolish that Paul takes solemn oath about it (cf. 1:23). For the doxology see Ro 1:25; 9:5 .

2Cor 11:32
The governor under Aretas (o $\varepsilon \theta v \alpha \rho \chi \eta \varsigma H \alpha \rho \varepsilon \tau \alpha$ ). How it came to pass that Damascus, ruled by the Romans after B.C. 65, came at this time to be under the rule of Aretas, fourth of the name, King of the Nabatheans (II Macc. 5:8), we do not know. There is an absence of Roman coins in Damascus from A.D. 34 to 62. It is suggested (Plummer) that Caligula, to mark his dislike for Antipas, gave Damascus to Aretas (enemy of Antipas).

Guarded ( $\varepsilon \varphi \rho \circ 0 \rho \varepsilon$ ). Imperfect active of $\varphi \rho o v \rho \varepsilon \omega$, old verb (from $\varphi \rho o v \rho o \varsigma$, a guard) to guard by posting sentries. In Ac 9:24 we read that the Jews kept watch to seize Paul, but there is no conflict as they cooperated with the guard set by Aretas at their request.

To seize ( $\pi \iota \alpha \sigma \alpha)$. Doric first aorist active infinitive of $\pi \iota \varepsilon \zeta \omega(\operatorname{Lu} 6: 38)$ for which see on Ac 3:7.

2Cor 11:33
Through a window ( $\delta \iota \alpha$ טv $\iota \delta o \varsigma$ ). For this late word see on Ac $20: 9$, the only N.T. example.

Was I let down ( $\varepsilon \chi \alpha \lambda \alpha \sigma \theta \eta \nu)$. First aorist passive of $\chi \alpha \lambda \alpha \omega$, the very word used by Luke in Ac 9:25.

In a basket ( $\varepsilon \nu \sigma \alpha \rho \gamma \alpha \nu \eta$ ). Old word for rope basket whereas Luke (Ac 9:25) has $\varepsilon v$ $\sigma \varphi v \rho เ \delta$ (the word for the feeding of the 4,000 while корıvos is the one for the 5,000 ). This was a humiliating experience for Paul in this oldest city of the world whither he had started as a conqueror over the despised Christians.

## 2 Corinthians 12

2Cor 12:1
I must needs glory ( $\kappa \alpha u \chi \alpha \sigma \theta \alpha \delta \varepsilon$ ). This is the reading of B L Latin Syriac, but Aleph D Bohairic have $\delta \varepsilon$ while K M read $\delta \eta$. The first is probably correct. He must go on with the glorying already begun, foolish as it is, though it is not expedient (ov $\sigma \cup \mu \varphi \varepsilon \rho \circ v$ ).

Visions (o $\pi \tau \alpha \sigma \iota \alpha \varsigma)$. Late word from o $\pi \tau \alpha \zeta \omega$. See on Lu 1:22; Ac 26:19.
Revelations of the Lord ( $\alpha \pi о к \alpha \lambda \nu \psi \varepsilon \iota \varsigma ~ K v \rho ı o v) . ~ U n v e i l i n g s ~(f r o m ~ \alpha \pi о к а \lambda u \pi \tau \omega ~ a s ~ i n ~$ Re 1:1 ). See on 2Th 1:7; 1Co 1:7; 14:26. Paul had both repeated visions of Christ (Ac 9:3; 16:9; 18:9; 22:17; 27:23f. ) and revelations. He claimed to speak by direct revelation (1Co 11:23; 15:3; Ga 1:12; Eph 3:3 , etc.).

2Cor 12:2
I know a man (ot $\delta \alpha \alpha v \theta \rho \omega \pi o v$ ). Paul singles out one incident of ecstasy in his own experience that he declines to describe. He alludes to it in this indirect way as if it were some other personality.

Fourteen years ago ( $\pi \rho o \varepsilon \tau \omega v \delta \varepsilon \kappa \alpha \tau \varepsilon \sigma \sigma \alpha \rho \omega v$ ). Idiomatic way of putting it, the preposition $\pi \rho o$ (before) before the date (Robertson, Grammar, p. 621f.) as in Joh 12:1. The date was probably while Paul was at Tarsus (Ac 9:30; 11:25). We have no details of that period.

 unlikely that Paul alludes to the idea of seven heavens held by some Jews (Test. of the Twelve Pat., Levi ii. iii.). He seems to mean the highest heaven where God is (Plummer).

2Cor 12:3
I do not know (ouk ot $\delta \alpha$ ). Paul declines to pass on his precise condition in this trance. We had best leave it as he has told it.

2Cor 12:4
Into Paradise ( $\varepsilon \varsigma \varsigma \pi \alpha \rho \alpha \delta \varepsilon \iota \sigma o v)$. See on Lu 23:43 for this interesting word. Paul apparently uses paradise as the equivalent of the third heaven in verse 2. Some Jews (Book of the Secrets of Enoch, chapter viii) make Paradise in the third heaven. The rabbis had various ideas (two heavens, three, seven). We need not commit Paul to any "celestial gradation" (Vincent).

Unspeakable words ( $\alpha \rho \rho \eta \tau \alpha \rho \eta \mu \alpha \tau \alpha$ ). Old verbal adjective ( $\alpha$ privative, $\rho \eta \tau o \varsigma$ from $\rho \varepsilon \omega)$, only here in N.T.

Not lawful (ouk \& $\xi \circ v$ ). Copula $\varepsilon \sigma \tau \iota v$ omitted. Hence Paul does
not give these words.
2Cor 12:5
But on mine own behalf (v $v \varepsilon \rho \delta \varepsilon \varepsilon \mu \alpha v \tau o v)$. As if there were two Pauls. In a sense there were. He will only glory in the things mentioned above, the things of his weaknesses ( 11:30).

2Cor 12:6
I shall not be foolish (ovк $\varepsilon \sigma o \mu \alpha \alpha \varphi \rho \omega v$ ). Apparent contradiction to 11:1,16. But he is here speaking of the Paul "caught up" in case he should tell the things heard (condition of the third class, $\varepsilon \alpha v$ and first aorist subjunctive $\theta \varepsilon \lambda \eta \sigma \omega)$.

Of me ( $\varepsilon \iota \varsigma \varepsilon \mu \varepsilon$ ). To my credit, almost like dative (cf. $\varepsilon v \varepsilon \mu \circ$ in 1Co 14:11).
2Cor 12:7
By reason of the exceeding greatness ( $\tau \eta v \pi \varepsilon \rho \beta \circ \lambda \eta$ ). Instrumental case, "by the excess."
That I should not be exalted overmuch ( $\imath \alpha \alpha \mu \eta v \varepsilon \rho \alpha \iota \rho \omega \mu \alpha$ ). Present passive subjunctive in final clause of $v \pi \varepsilon \rho a \iota \rho \omega$, old verb to lift up beyond, only here in N.T. This clause is repeated at the end of the sentence.

A thorn in the flesh ( $\sigma \kappa о \lambda о \pi \varsigma \tau \eta \sigma \alpha \rho \kappa$ ). This old word is used for splinter, stake, thorn. In the papyri and inscriptions examples occur both for splinter and thorn as the meaning. In the LXX it is usually thorn. The case of $\tau \eta \sigma \alpha \rho \kappa$ can be either locative (in) or dative (for). What was it? Certainly it was some physical malady that persisted. All sorts of theories are held (malaria, eye-trouble, epilepsy, insomnia, migraine or sick-headache, etc.). It is a blessing to the rest of us that we do not know the particular affliction that so beset Paul. Each of us has some such splinter or thorn in the flesh, perhaps several at once.

Messenger of Satan $(\alpha \gamma \gamma \varepsilon \lambda o \varsigma \Sigma \alpha \tau \alpha v \alpha)$. Angel of Satan, the affliction personified.
Buffet (ко入 $\alpha \varphi \iota \zeta \eta$ ). See on Mt 26:67; 1Со 4:11 for this late and rare word from ко $\lambda \alpha \varphi о \varsigma$, fist. The messenger of Satan kept slapping Paul in the face and Paul now sees that it was God's will for it to be so.

2Cor 12:8
Concerning this thing (v $\tau \varepsilon \rho$ tov $\tau 0 v$ ). More likely, "concerning this messenger of Satan."

That it might depart from me (ıv $\left.\alpha \pi \sigma \sigma \tau \eta \alpha \varphi^{\prime} \varepsilon \mu o v\right)$. Second aorist active (intransitive) subjunctive of $\alpha \varphi ⿺ \sigma \tau \eta \mu$ in final clause, "that he stand off from me for good."

2Cor 12:9
He hath said ( $\varepsilon \iota\lceil\kappa \varepsilon v$ ). Perfect active indicative, as if a final word. Paul probably still has the thorn in his flesh and needs this word of Christ.

Is sufficient ( $\alpha \rho \kappa \varepsilon$ ). Old word of rich meaning, perhaps kin to Latin arceo, to ward off against danger. Christ's grace suffices and abides.

Is perfected ( $\tau \varepsilon \lambda \varepsilon \iota \tau \alpha$ ). Present passive indicative of $\tau \varepsilon \lambda \varepsilon \omega$, to finish. It is linear in idea. Power is continually increased as the weakness grows. See Php 4:13 for this same noble conception. The human weakness opens the way for more of Christ's power and grace.

Most gladly rather ( $\eta \delta \iota \sigma \tau \alpha \mu \alpha \lambda \lambda o v$ ). Two adverbs, one superlative ( $\eta \delta \iota \sigma \tau \alpha$ ), one comparative ( $\mu \alpha \lambda \lambda o v$ ). "Rather" than ask any more (thrice already) for the removal of the thorn or splinter "most gladly will I glory in my weaknesses." Slowly Paul had learned this supreme lesson, but it will never leave him (Ro 5:2; 2Ti 4:6-8).

May rest upon me ( $\varepsilon \pi / \sigma \kappa \eta \nu \omega \sigma \eta \varepsilon \pi^{\prime} \varepsilon \mu \varepsilon$ ). Late and rare verb in first aorist active subjunctive with $\imath v a$ (final clause), to fix a tent upon, here upon Paul himself by a bold metaphor, as if the Shechinah of the Lord was overshadowing him (cf. Lu 9:34), the power ( $\delta v v a \mu \iota$ ) of the Lord Jesus.

2Cor 12:10
 . The enemies of Paul will have a hard time now in making Paul unhappy by persecutions even unto death (Php 1:20-26 ). He is not courting martyrdom, but he does not fear it or anything that is "for Christ's sake" (v $\pi \varepsilon \rho$ X $\rho \iota \sigma \tau 0 v$ ).

For when (o $\tau \alpha v \gamma \alpha \rho$ ). "For whenever," indefinite time.
Then I am strong ( $\tau 0 \tau \varepsilon \delta v v a \tau o \varsigma \varepsilon \ell \mu$ ). At that very time, but not in myself, but in the fresh access of power from Christ for the emergency.

2Cor 12:11
I am become foolish ( $\gamma \varepsilon \gamma \sigma v \alpha \alpha \varphi \rho \omega v$ ). Perfect active indicative of $\gamma \iota \nu o \mu \alpha$. In spite of what he said in verse 6 that he would not be foolish if he gloried in the other Paul. But he feels that he has dropped back to the mood of $11: 1,16$. He has been swept on by the memory of the ecstasy.

For I ought to have been commended by you ( $\left.\varepsilon \gamma \omega \gamma \alpha \rho \omega \varphi \varepsilon \iota \lambda \nu v \varphi^{\prime} v \mu \omega \nu \sigma v \nu I \sigma \tau \alpha \sigma \theta \alpha\right)$. Explanation of "ye compelled me." Imperfect active $\omega \varphi \varepsilon ı \lambda o \nu$ of $o \varphi \varepsilon \iota \lambda \omega$, to be under obligation, and the tense here expresses an unfulfilled obligation about the present. But $\sigma v \nu เ \sigma \tau \alpha \sigma \theta \alpha$ is present passive infinitive, not aorist or perfect passive. He literally means, "I ought now to be commended by you" instead of having to glorify myself. He repeats his boast already made (11:5f. ), that he is no whit behind "the super-extra apostles" (the Judaizers), "though I am nothing" ( $\varepsilon \kappa \alpha$ ov $\delta \varepsilon v \varepsilon \not \mu$ ). Even boasting himself against those false apostles causes a reaction of feeling that he has to express (cf. 1Co 15:9; 1Ti 1:15f. ).

2Cor 12:12
Of an apostle ( $\tau 0 v a \pi о \sigma \tau о \lambda o v)$. "Of the apostle" (definite article). Note the three words here for miracles wrought by Paul ( $\sigma \eta \mu \varepsilon ı \alpha$, signs, $\tau \varepsilon \rho \alpha \tau \alpha$, wonders, $\delta v v \alpha \mu \varepsilon ı \varsigma$, powers or miracles) as in Heb 2:4 .

2Cor 12:13
Wherein ye were made inferior (o $\eta \sigma \sigma \omega \theta \eta \tau \varepsilon$ ). First aorist passive indicative of $\eta \sigma \sigma o o \mu \alpha$, the text of Aleph B D instead of the usual $\eta \tau \tau \eta \theta \eta \tau \varepsilon$ from the common $\eta \tau \tau \alpha o \mu \alpha$ to be inferior or less from the comparative $\eta \tau \tau \omega v$. See $\eta \sigma \sigma \omega v$ in verse 15 . Ho is the neuter accusative with the passive verb (Robertson, Grammar, p. 479).

Forgive me this wrong ( $\chi \alpha \rho ı \sigma \alpha \sigma \theta \varepsilon \mu о \tau \eta \nu \alpha \delta ı \kappa ı \alpha \nu \tau \alpha v \tau \eta \nu)$. Consummate irony to the stingy element in this church (cf. 11:9).

2Cor 12:14

Third time I am ready to come ( $\tau \rho \iota \tau \circ \nu \tau$ тоvто $\varepsilon \tau о \mu \omega \varsigma \varepsilon \chi \omega$ ). Had he been already twice or only once? He had changed his plans once when he did not go (1:15f. ). He will not change his plans now. This looks as if he had only been once (that in Ac 18 ). Note the third use of катаvаркаш (11:9; 12:13,14). They need not be apprehensive. He will be as financially independent of them as before. "I shall not sponge on you."

Not yours, but you (ov $\tau \alpha \nu \mu \omega \nu, \alpha \lambda \lambda \alpha \nu \mu \alpha \varsigma)$. The motto of every real preacher.
To lay up ( $\theta \eta \sigma a \cup \rho ı(\varepsilon ı v)$. For this use of the verb see 1Co 16:2 (Mt 6:19-21; Jas 5:3).
2Cor 12:15
I will most gladly spend and be spent ( $\eta \delta \iota \sigma \tau \alpha \delta \alpha \pi \alpha \nu \eta \sigma \omega$ ка $\varepsilon \kappa \delta \alpha \pi \alpha \nu \eta \theta \eta \sigma o \mu \alpha)$. Both future active of old verb $\delta \alpha \pi \alpha v \alpha \omega$ (Mr 5:26 ) to spend money, time, energy, strength and the future passive of $\varepsilon \kappa \delta \alpha \pi \alpha v a \omega$, late compound to spend utterly, to spend out, ( $\varepsilon \kappa$ ), to spend wholly. Only here in N.T.

2Cor 12:16
I did not myself burden you ( $\varepsilon \gamma \omega$ ov катє $\beta \alpha \rho \eta \sigma \alpha$ v $\mu \alpha \varsigma$ ). First aorist active of late verb $\kappa \alpha \tau \alpha \beta \alpha \rho \varepsilon \omega$, to press a burden down on one. Only here in N.T.

Crafty ( $\pi \alpha v o v \rho \gamma o \varsigma)$. Old word from $\pi \alpha v$, all, and $\varepsilon \rho \gamma 0$, to do anything (good or bad). Good sense is skilful, bad sense cunning. Only here in N.T. and Paul is quoting the word from his enemies.

With guile $(\delta \mathrm{o} \lambda \omega)$. Instrumental case of $\delta o \lambda o \varsigma$, bait to catch fish with. The enemies of Paul said that he was raising this big collection for himself. Moffatt has done well to put these charges in quotation marks to make it plain to readers that Paul is ironical.

2Cor 12:17
Did I take advantage ( $\varepsilon \pi \lambda \varepsilon \sigma v \varepsilon \kappa \tau \eta \sigma \alpha)$. Paul goes right to the point without hedging. For this verb from $\pi \lambda \varepsilon \sigma v$ and $\varepsilon \chi \omega$, to have more, see on 2Co 2:11; 7:2 .

By any one of them ( $\tau \imath v \alpha--\delta \iota^{\prime} \alpha v \tau o v$ ). An anacoluthon for $\tau ı v a$ is left in the accusative without a verb and $\delta \iota^{\prime}$ avtov takes up the idea, "as to any one by him."

Whom $(\omega v)$. The genitive relative is attracted from the accusative ovc into the case of the unexpressed antecedent tov $\tau 0 v$ ). $\mathrm{M} \eta$ expects the negative answer as does $\mu \eta \tau$ in 18 .

2Cor 12:18
The brother ( $\tau 0 v \alpha \delta \varepsilon \lambda \varphi o v$ ). Probably the brother of Titus (cf. 8:18).
Did Titus take advantage of you? ( $\mu \eta \tau \varepsilon \pi \lambda \varepsilon \sigma v \varepsilon \kappa \tau \eta \sigma \varepsilon v \nu \mu \alpha \varsigma$ Tıтoo?). That puts the issue squarely.

By the same Spirit ( $\tau \omega \alpha v \tau \omega \pi \nu \varepsilon v \mu \alpha \tau$ ). That translation refers to the Holy Spirit and makes the case instrumental. The locative case, "in the same spirit," makes it mean that Paul's attitude is the same as that of Titus and most likely is correct, for "in the same steps" ( $\tau$ oıs $\alpha$ ขтоıя ı $\chi$ veбเv) is in locative case.

2Cor 12:19

Ye think all this time ( $\pi \alpha \lambda \alpha$ סокєıtє). Progressive present indicative, "for a long time ye have been thinking."

We are excusing ourselves ( $\alpha \pi о \lambda о ү о \nu \mu \varepsilon \theta \alpha$ ). He is not just apologizing, but is in deadly earnest, as they will find out when he comes.

2Cor 12:20
Lest by any means, when I come, I should find you not such as I would ( $\mu \eta \pi \omega \varsigma \varepsilon \lambda \theta \omega v$ ovx oovv $\theta \varepsilon \lambda \omega \varepsilon v \rho \omega v \mu \alpha \varsigma)$. An idiomatic construction after the verb of fearing ( $\varphi$ о $\beta \circ v \mu \alpha)$ with $\mu \eta \pi \omega \varsigma$ as the conjunction and with oux as the negative of the verb $\varepsilon \cup \rho \omega$ (second aorist active subjunctive of $\varepsilon v \rho \iota \sigma \kappa \omega), \mu \eta$ the conjunction, ovX the negative. See Robertson, Grammar, p. 995.

And I be found ( $\kappa \alpha \gamma \omega \varepsilon \cup \rho \varepsilon \theta \omega$ ). Same construction with first aorist passive subjunctive.
Such as ye would not (oıov ov $\theta \varepsilon \lambda \varepsilon \tau \varepsilon$ ). Neat change in voice just before and position of the negative here.

Lest by any means ( $\mu \eta \pi \omega \varsigma$ ). Still further negative purpose by repeating the conjunction. With graphic pen pictures Paul describes what had been going on against him during his long absence.

Backbitings (ката入а入ıa). Late and rare word. In N.T. only here and 1Pe 2:1 . If it only existed nowhere else!

Whisperings ( $\psi \iota \theta v \rho ı \sigma \mu \circ$ ). Late word from $\psi \iota \theta v \rho \iota \zeta \omega$, to whisper into one's ear. An onomatopoetic word for the sibilant murmur of a snake charmer (Ec 10:11). Only here in N.T.

Swellings ( $\varphi$ vol $\omega \sigma \varepsilon \iota \varsigma$ ). From $\varphi$ voıo, to swell up, late word only here and in ecclesiastical writers. Did Paul make up the word for the occasion? See on 1Co 4:6 for verb.

Tumults ( $\alpha \kappa \alpha \tau \alpha \sigma \tau \alpha \sigma ı \alpha)$. See on 2Co 6:5 .
2Cor 12:21
When I come again ( $\pi \alpha \lambda \iota \nu \varepsilon \lambda$ (ovtoc $\mu \circ v$ ). Genitive absolute. Paul assumes it as true.
Lest my God humble me ( $\mu \eta \tau \alpha \pi \varepsilon ı \nu \omega \sigma \eta \mu \varepsilon$ o $\theta \varepsilon o \varsigma \mu о v$ ). Negative final clause ( $\mu \eta$ and first aorist active subjunctive), going back to $\varphi o \beta o v \mu \alpha$ in 20 . He means a public humiliation as his fear. The conduct of the church had been a real humiliation whether he refers to a previous visit or not.

That have sinned heretofore ( $\tau \omega v \pi \rho о \eta \mu \alpha \rho \tau \eta \kappa о \tau \omega v$ ). Genitive plural of the articular perfect active participle of $\pi \rho \circ \alpha \mu \alpha \rho \tau \alpha v \omega$ to emphasize continuance of their sinful state as opposed to $\mu \eta \mu \varepsilon \tau \alpha v o \eta \sigma \alpha \nu \tau \omega \nu$ (did not repent) in the aorist tense.

## 2 Corinthians 13

2Cor 13:1
The third time I am coming ( $\tau \rho ı \tau о v \varepsilon \rho \chi \circ \mu \alpha$ ). Either the third that he had planned to come or that he had been twice. The warning is made by quoting De 19:15.

2Cor 13:2
As when I was present the second time ( $\omega \varsigma \pi \alpha \rho \omega v$ тo $\delta \varepsilon v \tau \varepsilon \rho \circ v$ ). This translation assumes the second visit as already made. It is a natural way to take the Greek $\omega \varsigma \pi \alpha \rho \omega v$. But $\omega \varsigma$ with $\pi \alpha \rho \omega \nu$ can also mean "as if present" the second time (Authorized Version). Probably "as when" is the more natural rendering, but the other cannot be ruled entirely out in view of 1:15-23.

If I come again ( $\varepsilon \alpha v \varepsilon \lambda \theta \omega \varepsilon \iota \varsigma \tau \pi \pi \alpha \lambda \iota v$ ). Condition of third class. The use of $\pi \alpha \lambda \iota v$ of itself suits the idea that Paul had not yet made the second visit as it means simply "again" or "back," but in Mt 26:44 we find $\pi \alpha \lambda \iota v \varepsilon \kappa \tau \rho \iota \tau o v$ (again a third time) and so it is not decisive.

2Cor 13:3
A proof of Christ ( $\delta о к ц \eta \nu$ тov Xpıбтov). He will give it to them. "I will not spare." He will show that Christ speaks "in me" ( $\varepsilon v \varepsilon \mu \circ$ ).

2Cor 13:4
But we shall live with him through the power of God ( $\alpha \lambda \lambda \alpha \zeta \eta \sigma o \mu \varepsilon v \sigma \nu \nu \alpha \cup \tau \omega \varepsilon \kappa$ $\delta u v a \mu \varepsilon \omega \varsigma \theta \varepsilon \sigma v)$. So real is Paul's sense of his union with Christ.

2Cor 13:5
Unless indeed ye be reprobate ( $\varepsilon \mu \eta \tau \alpha \delta о к \mu о \varepsilon \sigma \tau \varepsilon$ ). Paul challenged his opposers in Corinth to try ( $\pi \varepsilon เ \rho \alpha \zeta \varepsilon \tau \varepsilon$ ) themselves, to test ( $\delta$ окццаऍєєє) themselves, whether they were "in the faith" ( $\varepsilon v \tau \eta \pi / \sigma \tau \varepsilon$ ), a much more vital matter for them than trying to prove Paul a heretic. Such tests can be made, unless, alas, they are "reprobate" (aбокцо, the very adjective that Paul held up before himself as a dreadful outcome to be avoided, 1Co 9:27).

2Cor 13:6
That ye shall know (o $\tau \varepsilon \pi \not \gamma v \omega \sigma \varepsilon \sigma \theta \varepsilon$ ). Such a testing of themselves will give them full knowledge that Paul is not
reprobate ( $\alpha \delta$ окцноя). The best way for vacillating Christians to stop it is to draw close to Christ.

2Cor 13:7
Though we be as reprobate ( $\eta \mu \varepsilon \varsigma \varsigma \delta \varepsilon \omega \varsigma \alpha \delta$ окцо $\omega \mu \varepsilon v$ ). Literally, "And that" (ıv $\delta \varepsilon$ ). Paul wishes them to do no wrong ( $\kappa \alpha \kappa о v \mu \eta \delta \varepsilon v$ ). He has no desire to exercise his apostolic authority and "appear approved" ( $\delta$ окцо $\varphi \alpha \nu \omega \mu \varepsilon v$, second aorist passive subjunctive of $\varphi \alpha \iota v \omega$ ). He had far rather see them do "the noble thing" ( $\tau$ к к $\lambda \boldsymbol{\lambda} \boldsymbol{\nu}$ ) even if it should make him appear disapproved after all that he has said.

2Cor 13:8

Against the truth ( $\kappa \alpha \tau \alpha \tau \eta \varsigma \alpha \lambda \eta \theta \varepsilon \iota \alpha \varsigma)$. He means in the long run. We can hinder and hold down the truth by evil deeds (Ro 1:18) , but in the end the truth wins.

2Cor 13:9
For we rejoice ( $\chi \alpha \_\rho o \mu \varepsilon v \gamma \alpha \rho$ ). Paul had far rather be weak in the sense of failing to exercise his apostolic power because they did the noble thing. He is no Jonah who lamented when Ninevah repented.

Your perfecting ( $v \mu \omega \nu \kappa \alpha \tau \alpha \rho \tau \iota \sigma \iota \nu)$. Late word from $\kappa \alpha \tau \alpha \rho \tau \iota \zeta \omega$, to fit, to equip (see verb in verse 11). In Plutarch, only here in N.T.

2Cor 13:10
That I may not when present deal sharply (ı $\nu \alpha \pi \alpha \rho \omega \nu \alpha \pi о \tau о \mu \omega \varsigma \chi \rho \eta \sigma \omega \mu \alpha$ ). Late adverb from $a \pi \sigma \tau \circ \mu \circ \varsigma$, curt, cut off. In N.T. only here and Tit 1:13 .

2Cor 13:12
With a holy kiss ( $\varepsilon \nu \alpha \nmid \omega \varphi\rangle \lambda \eta \mu \alpha \tau$ ). In the Jewish synagogues where the sexes were separated, men kissed men, the women, women. This apparently was the Christian custom also. It is still observed in the Coptic and the Russian churches. It was dropped because of charges made against the Christians by the pagans. In England in 1250 Archbishop Walter of York introduced a "pax-board" which was first kissed by the clergy and then passed around. Think of the germ theory of disease and that kissing tablet!

2Cor 13:13
The grace of the Lord Jesus Christ and the love of God, and the communion of the Holy Ghost, be with you all ( $\eta \chi \alpha \rho ı \varsigma ~ \tau o v ~ K v \rho ı o v ~ I \eta \sigma o v ~ X \rho ı \sigma \tau о v ~ к а ~ \eta ~ а ү а л \eta ~ \tau o v ~ Ө \varepsilon o v ~ к а ~$ $\eta \kappa o \imath v \omega v \iota \alpha$ тov aүıov $\pi \nu \varepsilon v \mu \alpha \tau \circ \varsigma \mu \varepsilon \tau \alpha \pi \alpha \nu \tau \omega \nu \nu \mu \omega v)$. This benediction is the most complete of them all. It presents the persons of the Trinity in full form. From 2Th 3:17 it appears that Paul wrote the greeting or benediction with his own hand. We know from Ro 15:19 that Paul went round about unto Illyricum before, apparently, he came on to Corinth. When he did arrive (Ac 20:1-3 ) the troubles from the Judaizers had disappeared. Probably the leaders left after the coming of Titus and the brethren with this Epistle. The reading of it in the church would make a stir of no small proportions. But it did the work.

## THE EPISTLE TO THE GALATIANS <br> PROBABLE DATE A.D. 56 OR 57

## BY WAY OF INTRODUCTION

It is a pity that we are not able to visualize more clearly the time and place of writing this powerful polemic against the Judaizers who were trying to draw away from the evangelical gospel the churches of Galatia. The data are not clear as in the Thessalonian and Corinthian Epistles. There are many things that can be said, but few are decisive. One is that the Epistle was written about seventeen years after Paul's conversion, adding the three years of Ga 1:18 and the fourteen of 2:1, though not insisting on the full number in either case. Unfortunately we do not know the precise year of his conversion. It was somewhere between A.D. 31 and 36. Another thing that is clear is that the Epistle was written after the Conference in Jerusalem over the Judaizing controversy to which Paul refers in Ga 2:1-10 and after the subsequent visit of Peter to Antioch (Ga 2:11-14). The natural interpretation of Ac 15:1-33 is to understand it as the historical narrative of the public meetings of which Paul gives an inside view in Gal 2:1-10. Not all scholars agree to this view, but the weight of the argument is for it. If so, that rules out the contention of Ramsay and others that Galatians is the earliest of Paul's Epistles. It was written then after that Conference which took place about A.D. 49. It seems clear also that it was written after the Epistles to the Thessalonians (A.D. 50-51) which were sent from Corinth.

Did Paul mean by Galatia the Roman province as he usually does or does he make an ethnographic use of the term and mean the real Celts of North Galatia? Luke uses geographical terms in either sense. Certainly Paul preached in South Galatia in his first mission tour. See Ac 16:6 for the discussion about the language there as bearing on his going into North Galatia. By "the churches of Galatia" Paul can mean the whole of Galatia or either South or North Galatia. The various items mentioned, like the illness that led to his preaching ( Ga 4:13 ), "the first time" or "formerly" ( 4:13), "so quickly" ( 1:6), are not conclusive as to time or place. If Paul means only the South Galatian Churches (Pisidia, Lycaonia, Phrygia), then the Epistle, even if two visits had been made, could come some time after the second tour of Ac 16:1f. . The place could be Philippi, Corinth, Ephesus, Antioch. Even so room must be made for the seventeen years after his conversion plus the interval thereafter (some twenty years in all). If Paul includes North Galatia, the time would be more easily handled (the twenty years required from A.D. 31 to 36 to A.D. 51 to 57) and the place could be Ephesus, Philippi, or Corinth. Special treatises on the date of Galatians have been written by Askwith (1899), Round (1906), Steinmann (1908), Weber (1900)

Lightfoot held that the similarity of Galatians to Romans (written from Corinth spring of A.D. 56 or 57) naturally argues for the same general period and place. It is a possible hypothesis that, when Paul reached Corinth late autumn or early winter of A.D. 55 or 56 (Ac

20:1f. ), he received alarming reports of the damage wrought by the Judaizers in Galatia. He had won his fight against them in Corinth (I and II Corinthians). So now he hurls this thunderbolt at them from Corinth and later, in a calmer mood, sends the fuller discussion to the church in Rome. This hypothesis is adopted here, but with full recognition of the fact that it is only hypothesis. The language and the topics and the treatment are the same that we find in Romans. Galatians thus fits in precisely between II Corinthians and Romans. It is a flaming torch in the Judaizing controversy. This Epistle was the battlecry of Martin Luther in the Reformation. Today it has served as a bulwark against the wild criticism that has sought to remove the Pauline Epistles from the realm of historical study. Paul is all ablaze in this Epistle with indignation as he faces the men who are undermining his work in Galatia.

## SOME COMMENTARIES

(Only a few out of a vast number)
Adeney (1911), Bacon (1909), Beet (1885), Bousset (1907), Baljon (1889), Burton (1920), Ellicott (new ed. 1884), Emmet (1912), Findlay (1888), Girdlestone (1913), Hovey (1887), Lagrange (1918), Lietzmann (1910), Lightfoot (eleventh ed., 1905), Lipsius (1902), Martin Luther (1535; tr. 1575), MacGregor (1914), Mackenzie (1912), Ramsay (1900), Rendall (1903), Sieffert (Meyer Komm., 9 ed. 1899), Watkins (1914), Williams (1910), Windisch (2 aufl. 1926), Wood (1887), Zahn (2 aufl. 1907).

## Galatians 1

Gal 1:1
Not from men, neither through men (ovk $\alpha \pi^{\prime} \alpha v \theta \rho \omega \pi \omega v$ ov $\delta \varepsilon \delta i^{\prime} \alpha v \theta \rho \omega \pi$ ) ${ }^{\prime}$ ). The bluntness of Paul's denial is due to the charge made by the Judaizers that Paul was not a genuine apostle because not one of the twelve. This charge had been made in Corinth and called forth the keenest irony of Paul (2Co 10-12). In Ga 1; 2 Paul proves his independence of the twelve and his equality with them as recognized by them. Paul denies that his apostleship had a human source (ovk $\alpha \pi^{\prime} \alpha v \theta \rho \omega \pi \omega v$ ) and that it had come to him through ( $\left.\delta i^{\prime} \alpha v \theta \rho \omega \pi \sigma v\right)$ a human channel (Burton).

But through Jesus Christ and God the Father ( $\alpha \lambda \lambda \alpha \delta_{ı}$ I $\eta$ бov Xpıбтоv ка $\theta \varepsilon o v$ $\pi \alpha \tau \rho о \varsigma)$. The call to be an apostle came to Paul through Jesus Christ as he claimed in 1Co 9:1 and as told in Ac 9:4-6; 22:7ff.; 26:16f. . He is apostle also by the will of God.

Who raised him from the dead ( $\tau \circ v \varepsilon \gamma \varepsilon \iota \rho \alpha \tau \tau \circ \varsigma \alpha \cup \tau о v \varepsilon \kappa \nu \varepsilon \kappa \rho \omega v$ ). And therefore Paul was qualified to be an apostle since he had seen the Risen Christ (1Co 9:1; 15:8f. ). This verb $\varepsilon \gamma \varepsilon \iota \rho \omega$ is often used in N.T. for raising from the sleep of death, to wake up the dead.

Gal 1:2
All the brethren which are with me (o $\sigma \cup v \varepsilon \mu \mathrm{o} \pi \alpha \nu \tau \varepsilon \varsigma \alpha \delta \varepsilon \lambda \varphi \mathrm{o}$ ). The same phrase in Php 4:21 in distinction from the saints in verse 22. Probably the small company of travelling companions.

Unto the churches of Galatia ( $\tau \alpha \iota \varsigma \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha \iota \varsigma \eta \varsigma \Gamma \alpha \lambda \alpha \tau \iota \alpha \varsigma)$. A circular letter therefore to all the churches in the province (both South Galatia and North Galatia if he really laboured there).

Gal 1:3
Grace to you and peace ( $\chi \alpha \rho ı \varsigma ~ v \mu \nu v \kappa \alpha \varepsilon ı \rho \eta \nu \eta)$. As in I Thess., II Thess., I Cor., II Cor. (already written) and in all the later Epistles save that in I and II Timothy "mercy" is added. But this customary salutation (see on 1Th 1:1 ) is not a perfunctory thing with Paul. He uses it here even when he has so much fault to find just as he did in I and II Corinthians.

Gal 1:4
For our sins ( $v \pi \varepsilon \rho \tau \omega v \alpha \mu \alpha \rho \tau i \omega v$ ). Some MSS. have $\pi \varepsilon \rho$ (concerning). In the Koine this use of $v \pi \varepsilon \rho$ as like $\pi \varepsilon \rho$ has come to be common. He refers to the death of Christ (cf. 1Co 15:3; Ga 2:20; Ro 5:6f. ). As a rule $\pi \varepsilon \rho$ occurs of things, $v \pi \varepsilon \rho$ of persons.

Deliver ( $\varepsilon \xi \varepsilon \lambda \eta \tau \alpha$ ). Second aorist middle subjunctive (final clause with $0 \pi \omega \varsigma$ ) of $\varepsilon \xi \alpha \rho \varepsilon \omega \omega$, old verb to pluck out, to rescue (Ac 23:27). "Strikes the keynote of the epistle. The gospel is a rescue, an emancipation from a state of bondage" (Lightfoot).
 of the age the existing one being evil." The predicate position of $\pi 0 v \eta \rho o v$ calls emphatic attention to it. Each word here is of interest and has been already discussed. See on Mt 13:22
 perfect (intransitive) participle of $\varepsilon v เ \sigma \tau \eta \mu$ for which see on $2 \mathrm{Th} 2: 12$; 1Co 3:22; 7:26 . It is present as related to future (Ro 8:38; $\mathrm{Heb} 9: 9$ ).

According to the will of God (ката то $\theta \varepsilon \lambda \eta \mu \alpha$ тov $\theta \varepsilon o v$ ). Not according to any merit in us.

Gal 1:5
To whom be the glory ( $\omega \eta \delta o \xi \alpha$ ). No verb in the Greek. For like doxologies see Ro 9:5; 11:36; 16:27; Eph 3:21; 1Ti 1:17.

## Gal 1:6

Ye are so quickly removing (ov $\omega \omega \varsigma \tau \alpha \chi \varepsilon \omega \varsigma \mu \varepsilon \tau \alpha \tau \mid \theta \varepsilon \sigma \theta \varepsilon$ ). The present middle indicative of $\mu \varepsilon \tau \alpha \tau \iota \theta \eta \mu$, to change places, to transfer. "You are transferring yourselves" and doing it "so quickly" either from the time of their conversion or most likely from the time when the Judaizers came and tempted them. So easily some of them are falling victims to these perverters of the gospel. That is a continuous amazement $(\theta \alpha \nu \mu \alpha \zeta \omega)$ to Paul and to men today that so many are so silly and so gullible to modern as to ancient charlatans.

Unto a different gospel ( $\varepsilon \varsigma \varsigma \varepsilon \tau \rho \rho \circ v \varepsilon v a \gamma \gamma \varepsilon \lambda \iota \sim$ ). See on 2Co 11:4 for distinction between $\alpha \lambda \lambda_{0}$ and $\varepsilon \tau \varepsilon \rho \circ v$ as here. It is not here or there a mere difference in emphasis or spirit as in Php 1:18 so long as Christ is preached. These men as in 2Co 11:4 preach "another Jesus" and a "different gospel" and so have fallen away from grace and have done away with Christ (Ga 5:4 ). Hence the vehemence of Paul's words.

Gal 1:7
Which is not another (o ovk عбтiv $\alpha \lambda \lambda 0$ ). It is no "gospel" (good news) at all, but a yoke of bondage to the law and the abolition of grace. There is but one gospel and that is of grace, not works. The relative o (which) refers to $\varepsilon \tau \varepsilon \rho \circ v$ عva $\gamma \gamma \varepsilon \lambda \iota o v$ (a different gospel) "taken as a single term and designating the erroneous teachings of the Judaizers" (Burton).

Only $(\varepsilon \mu \eta)$. Literally, "except," that is, "Except in this sense," "in that it is an attempt to pervert the one true gospel" (Lightfoot).

Who disturb you (о тараббоv $\varepsilon \varepsilon \varsigma)$. The disturbers. This very verb $\tau \alpha \rho \alpha \sigma \sigma \omega$ is used in Ac 17:8 of the Jews in Thessalonica who "disturbed" the politarchs and the people about Paul.

Would pervert ( $\theta \varepsilon \lambda 0 v \tau \varepsilon \varsigma \mu \varepsilon \tau \alpha \sigma \tau \rho \varepsilon \psi \alpha)$ ) "Wish to turn about," change completely as in Ac 2:20; Jas 4:9. The very existence of the gospel of Christ was at stake.

## Gal 1:8

If we ( $\varepsilon \alpha v \eta \mu \varepsilon \iota \varsigma$ ). Condition of third class ( $\varepsilon \alpha v$ and aorist middle subjunctive $\left.\varepsilon v a \gamma \gamma \varepsilon \lambda_{\iota} \sigma \eta \tau\right)$. Suppose I (literary plural) should turn renegade and preach "other than" ( $\pi \alpha \rho^{\prime}$ o), "contrary to that which we preached." Preachers have turned away from Christ, alas, and preached "humanism" or some other new-fangled notion. The Jews termed Paul a renegade for leaving Judaism for Christianity. But it was before Paul had seen Christ that
he clung to the law. Paul is dogmatic and positive here, for he knows that he is standing upon solid ground, the fact of Christ dying for us and rising again. He had seen the Risen Jesus Christ. No angel can change Paul now.

Let him be anathema ( $\alpha v \alpha \theta \varepsilon \mu \alpha \varepsilon \sigma \tau \omega$ ). See on 1Co 12:3 for this word.
Gal 1:9
So say I now again ( $\kappa \alpha \alpha \rho \tau \pi \alpha \lambda ı \nu \lambda \varepsilon \gamma \omega$ ). Paul knows that he has just made what some will consider an extreme statement. But it is a deliberate one and not mere excitement. He will stand by it to the end. He calls down a curse on any one who proclaims a gospel to them contrary to that which they had received from him.

Gal 1:10
Am I persuading? ( $\pi \varepsilon ו \theta \omega$ ?). Conative present, trying to persuade like $\zeta \eta \tau \omega$ apeбкعı (seeking to please) where the effort is stated plainly. See 2Co 5:11 .

I should not be (ovk $\alpha \nu \eta \mu \eta \nu$ ). Conclusion of second class condition, determined as unfulfilled. Regular construction here ( $\varepsilon$ and imperfect indicative in the condition $\eta \rho \varepsilon \sigma \kappa \circ \mathrm{v}$, ouk $\alpha v$ and imperfect in the conclusion). About pleasing men see on 1Th 2:4. In $\operatorname{Col} 3: 22$; Eph. 6:6 Paul uses the word "men-pleasers" ( $\alpha v \theta \rho \omega \pi \alpha \rho \varepsilon \sigma \kappa 0$ ).

Gal 1:11
Which was preached ( $\tau 0 \varepsilon v a \gamma \gamma \varepsilon \lambda_{l} \sigma \theta \varepsilon v$ ). Play on the word $\varepsilon v a \gamma \gamma \varepsilon \lambda_{\iota} \circ v$ by first aorist passive participle of $\varepsilon v a \gamma \gamma \varepsilon \lambda_{\iota} \zeta \omega$, "the gospel which was gospelized by me."

It is not after man (ovк عбтiv ката $\alpha v \theta \rho \omega \pi \sigma v$ ). Not after a human standard and so he does not try to conform to the human ideal. Paul alone (1Co 3:3; 9:8; 15:32; Ro 3:15 ) in the N.T. uses this old and common idiom.

Gal 1:12
Nor was I taught it (ov $\varepsilon \varepsilon \delta \iota \delta \alpha \chi \theta \eta \nu$ ). He did not receive it "from man" ( $\pi \alpha \rho \alpha \alpha v \theta \rho \omega \pi \omega \nu$, which shuts out both ano and $\delta \iota \alpha$ of verse 1), whether Peter or any other apostle, nor was he taught it in the school of Gamaliel in Jerusalem or at the University of Tarsus. He "received" his gospel in one way, "through revelation of Jesus Christ" ( $\delta \iota^{\prime} \alpha \pi о \kappa \alpha \lambda \nu \psi \varepsilon \omega \varsigma$ I $\eta \sigma 00$ Xрıбтоv). He used $\pi \alpha \rho \varepsilon \lambda \alpha \beta$ ov in 1Co 15:3 about the reception of his message from Christ. It is not necessary to say that he had only one (because of the aorist active $\pi \alpha \rho \varepsilon \lambda \alpha \beta \mathrm{ov}$, from $\pi \alpha \rho \alpha \lambda \alpha \mu \beta \alpha v \omega$, for it can very well be constative aorist) revelation (unveiling) from Christ. In fact, we know that he had numerous visions of Christ and in 1Co 11:23 he expressly says concerning the origin of the Lord's Supper: "I received ( $\pi \alpha \rho \varepsilon \lambda \alpha \beta o v$, again) from the Lord." The Lord Jesus revealed his will to Paul.

Gal 1:13
My manner of life ( $\tau \eta v \varepsilon \mu \eta v \alpha v a \sigma \tau \rho o \varphi \eta v$ ). Late word in this sense from Polybius on from $\alpha v a \sigma \tau \rho \varepsilon \varphi о \mu \alpha$. In the older writers it meant literally "return" or "turning back." See 1 Pe 1:15. It is absent in this sense in the papyri though the verb is common.

In the Jews' religion ( $\varepsilon v \tau \omega$ Iov $\delta a \iota \sigma \mu \omega$ ). "In Judaism." The word in N.T. only here and next verse, already in II Macc. 2:21; 8:1; 14:38; IV Macc. 4:26. In these passages it means the Jewish religion as opposed to the Hellenism that the Syrian Kings were imposing upon the Jews. So later Justin Martyr (386 D) will use Xpıotıavıб $\mu$ oc for Christianity. Both words are made from verbs in - $ا \zeta \omega$.

Beyond measure ( $\kappa \alpha \theta^{\prime} v \pi \varepsilon \rho \beta \circ \lambda \eta \nu$ ). "According to excess" (throwing beyond, $v \pi \varepsilon \rho \beta \circ \lambda \eta$ ).
I persecuted ( $\varepsilon \delta \omega \kappa \kappa v$ ). Imperfect active, "I used to persecute" (see Ac 7-9 for the facts).
Made havock of it ( $\varepsilon \pi \frac{\rho}{} \theta_{\text {ouv }} \alpha v \tau \eta v$ ). Customary action again, imperfect of old verb $\pi о \rho \theta \varepsilon \omega$, to lay waste, to sack. In N.T. only here, verse 23, and Ac 9:31 (used by Christians in Damascus of Saul after his conversion of his former conduct, the very word of Paul here). Paul heard them use it of him and it stuck in his mind.

Gal 1:14
I advanced ( $\pi \rho о \varepsilon к о \pi \tau o v$ ). Imperfect active again of $\pi \rho о к о \pi \tau \omega$, old verb, to cut forward (as in a forest), to blaze a way, to go ahead. In N.T. only here, Ro 13:12; 2Ti 2:16; 3:9,13 . Paul was a brilliant pupil under Gamaliel. See Php 3:4-6. He was in the lead of the persecution also.

Beyond many of mine own age ( $\left.v \pi \varepsilon \rho \pi о \lambda \lambda o v \varsigma \sigma \cup v \eta \lambda_{\iota} \kappa เ \omega \tau \alpha \varsigma\right)$. Later compound form for the Attic $\eta \lambda \kappa \kappa \omega \tau \eta \zeta$ which occurs in Dion Hal. and inscriptions (from $\sigma v v$, with, and $\eta \lambda_{ı} \iota a$, age). Paul modestly claims that he went "beyond" (v $\left.\tau \varepsilon \rho\right)$ his fellow-students in his progress in Judaism.

More exceedingly zealous ( $\pi \varepsilon \rho \iota \sigma \sigma о \tau \varepsilon \rho \omega \varsigma \zeta \eta \lambda о \tau \eta \varsigma)$. Literally, "more exceedingly a zealot." See on Ac 1:13; 21:20; 1Co 14:12 . Like Simon Zelotes.

For the traditions of my fathers ( $\tau \omega v \pi \alpha \tau \rho ı \kappa \omega v \mu \circ v \pi \alpha \rho \alpha \delta o \sigma \varepsilon \omega v$ ). Objective genitive after $\zeta \eta \lambda о \tau \eta \varsigma . ~ П a \tau \rho \iota \kappa \omega v$ only here in N.T., though old word from $\pi \alpha \tau \eta \rho$ (father), paternal, descending from one's father. For $\pi \alpha \tau \rho \omega \iota \rho$ see Ac 22:3,14. Tradition ( $\pi \alpha \rho \alpha \delta o \sigma \iota \varsigma)$ played a large part in the teaching and life of the Pharisees (Mr 7:1-23). Paul now taught the Christian tradition (2Th 2:15).

Gal 1:15
It was the good pleasure of God ( $\varepsilon v \delta$ окп $\sigma \varepsilon v$ o $\theta \varepsilon o \varsigma)$. Paul had no doubt about God's purpose in him (1Th 2:8).

Who separated me (o $\alpha \varphi о \rho \iota \sigma \alpha \varsigma \mu \varepsilon)$. А $\varphi$ орı $\zeta \omega$ is old word (from $\alpha \pi 0$ and opoc) to mark off from a boundary or line. The Pharisees were the separatists who held themselves off from others. Paul conceives himself as a spiritual Pharisee "separated unto the gospel of God" (Ro 1:1, the same word $\alpha \varphi \omega \rho \stackrel{\sigma}{ } \boldsymbol{\varepsilon} v o \varsigma)$. Before his birth God had his plans for him and called him.

Gal 1:16
 can mean to lay emphasis on his inward experience of grace or he may refer objectively to
the vision of Christ on the way to Damascus, "in my case." Paul uses $\varepsilon v \varepsilon \mu \mathrm{o}$ in this sense (in my case) several times (verse 24; 2Co 13:3; Php 1:30; 1Ti 1:16). Once (1Co 14:11) $\varepsilon v \varepsilon \mu \mathrm{o}$ is almost equivalent to the dative (to me). On the whole Lightfoot seems correct here in taking it to mean "in my case," though the following words suit either idea. Certainly Paul could not preach Christ among the Gentiles without the rich inward experience and in the objective vision he was called to that task.

I conferred not with flesh and blood (ov $\pi \rho \circ \sigma \alpha v \varepsilon \theta \varepsilon \mu \eta \nu \sigma \alpha \rho \kappa \kappa \alpha \alpha \mu \alpha \tau)$. Second aorist middle indicative of $\pi \rho o \sigma \alpha v \alpha \tau i \theta \eta \mu$, old verb, double compound ( $\pi \rho \circ \sigma, \alpha v \alpha$ ), to lay upon oneself in addition, to betake oneself to another, to confer with, dative case as here. In N.T. only here and 2:6.

Gal 1:17
Before me ( $\pi \rho o \varepsilon \mu \circ v$ ). The Jerusalem apostles were genuine apostles, but so is Paul. His call did not come from them nor did he receive confirmation by them.

Into Arabia ( $\varepsilon \varsigma \varsigma \wedge \rho \alpha \nmid \alpha v)$. This visit to Arabia has to come between the two visits to Damascus which are not distinguished in Ac 9:22f. In verse 23 Luke does speak of "considerable days" and so we must place the visit to Arabia between verses 22,23 .

Gal 1:18
Then after three years ( $\varepsilon \pi \varepsilon \iota \tau \alpha \mu \varepsilon \tau \alpha \tau \rho เ \alpha \varepsilon \tau \eta)$. A round number to cover the period from his departure from Jerusalem for Damascus to his return to Jerusalem. This stay in Damascus was an important episode in Paul's theological readjustment to his new experience.

To visit Cephas (เбто $\eta \sigma \alpha$ K $\eta \varphi \alpha v$ ). First aorist infinitive of $\iota \sigma \tau o \rho \varepsilon \omega$, old verb (from $\iota \sigma \tau \omega \rho$, one who knows by inquiry), to gain knowledge by visiting. Only here in N.T. If we turn to Ac 9:26-30, we shall see that the visit of two weeks to Peter came after Barnabas endorsed Paul to the suspicious disciples in Jerusalem and probably while he was preaching in the city. It was a delightful experience, but Peter did not start Paul upon his apostleship. He visited him as an equal. Peter no doubt had much to say to Paul.

Gal 1:19
Except James the brother of the Lord ( $\varepsilon \mu \eta \operatorname{I\alpha \kappa \omega \beta \text {ov}\tau \circ va\delta \varepsilon \lambda \varphi ov~\tau ov~Kvpıov).~James~}$ the son of Zebedee was still living at that time. The rest of the twelve were probably away preaching and James, brother of the Lord, is here termed an apostle, though not one of the twelve as Barnabas is later so called. Paul is showing his independence of and equality with the twelve in answer to the attacks of the Judaizers.

Gal 1:20
I lie not ( $o v \psi \varepsilon \cup \delta o \mu \alpha$ ). So important does he deem the point that he takes solemn oath about it.

Gal 1:21

Into the region of Syria and Cilicia ( $\varepsilon \iota \varsigma \tau \alpha \kappa \lambda ı \alpha \tau \alpha \tau \eta \varsigma \Sigma \psi \rho ı \alpha \varsigma \kappa \alpha \tau \eta \varsigma$ Kı入ıкıaৎ). This statement agrees with the record in Ac 9:30. On $\kappa \lambda \not \mu \alpha \tau \alpha$, see 2Co 11:10. Paul was not idle, but at work in Tarsus and the surrounding country.

Gal 1:22
And I was still unknown ( $\eta \mu \eta \nu \delta \varepsilon$ a $\gamma v o v \mu \varepsilon \nu \circ \varsigma)$. Periphrastic imperfect passive of a $\gamma \operatorname{voc\omega }$, not to know.

By face ( $\tau \omega \pi \rho \sigma \sigma \omega \pi \omega$ ). Associative instrumental case.
Of Judea ( $\tau \eta \varsigma$ Iovסaıaৎ). As distinct from Jerusalem, for he had once scattered the church there and had revisited them before coming to Tarsus (Ac 9:26-30 ). In Ac 9:31 the singular of $\varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$ is used, but in a geographic sense for Judea, Samaria, and Galilee.

Gal 1:23
They only heard ( $\mu$ оvov aкovovtєৎ $\eta \sigma \alpha v$ ). Periphrastic imperfect, "They were only hearing from time to time."

That once persecuted us (o $\delta \iota \omega \kappa \omega \nu \eta \mu \alpha \varsigma \pi \sigma \tau \varepsilon$ ). Present active articular participle, a sort of participle of antecedent time suggested by $\pi \sigma \tau \varepsilon$, "the one who used to persecute us once upon a time."

The faith ( $\tau \eta \nu \pi \iota \sigma \tau \iota v)$. Here used in the sense of "the gospel" as in Ac 6:7.
Gal 1:24
They glorified ( $\varepsilon \delta o \xi \alpha \zeta o v$ ). Imperfect, kept on doing it.
In me ( $\varepsilon v \varepsilon \mu \mathrm{o}$ ). In my case as in 1:16.

## Galatians 2

Gal 2:1
Then after the space of fourteen years I went up again ( $\varepsilon \pi \varepsilon ı \tau \alpha \delta \iota \alpha \delta \varepsilon \kappa \alpha \tau \varepsilon \sigma \sigma \alpha \rho \omega \nu$ $\varepsilon \tau \omega v \pi \alpha \lambda_{\iota v} \alpha v \varepsilon \beta \eta v$ ) This use of $\delta \iota \alpha$ for interval between is common enough. Paul is not giving a recital of his visits to Jerusalem, but of his points of contact with the apostles in Jerusalem. As already observed, he here refers to the Jerusalem Conference given by Luke in Ac 15 when Paul and Barnabas were endorsed by the apostles and elders and the church over the protest of the Judaizers who had attacked them in Antioch (Ac 15:1f. ). But Paul passes by another visit to Jerusalem, that in Ac 11:30 when Barnabas and Saul brought alms from Antioch to Jerusalem and delivered them to "the elders" with no mention of the apostles who were probably out of the city since the events in Ac 12 apparently preceded that visit and Peter had left for another place (Ac 12:17). Paul here gives the inside view of this private conference in Jerusalem that came in between the two public meetings (Ac 15:4,6-29).

With Barnabas ( $\mu \varepsilon \tau \alpha$ B $\alpha \rho v \alpha \beta \alpha$ ). As in Ac 15:2 .
Taking Titus also with me ( $\sigma \cup v \pi \alpha \rho \alpha \lambda \alpha \beta \omega v$ ка Titov). Second aorist active participle of $\sigma u v \pi \alpha \rho \alpha \lambda \alpha \mu \beta \alpha v \omega$ the very verb used in Ac 15:37f. of the disagreement between Paul and Barnabas about Mark. Titus is not mentioned in Acts 15 nor anywhere else in Acts for some reason, possibly because he was Luke's own brother. But his very presence was a challenge to the Judaizers, since he was a Greek Christian.

Gal 2:2
By revelation ( $\kappa \alpha \tau \alpha \alpha \pi о \kappa \alpha \lambda \nu \psi \iota v$ ). In Ac 15:2 the church sent them. But surely there is no inconsistency here.

I laid before them ( $\alpha v \varepsilon \theta \varepsilon \mu \eta \nu$ autoıs). Second aorist middle indicative of old word $\alpha v a \tau 1 \theta \eta \mu$, to put up, to place before, with the dative case. But who were the "them" (av $\tau \circ \varsigma$ )? Evidently not the private conference for he distinguishes this address from that, "but privately" ( $\kappa \alpha \tau^{\prime} เ \delta \iota \alpha v$ ). Just place Ac 15:4f. beside the first clause and it is clear: "I laid before them the gospel which I preach among the Gentiles," precisely as Luke has recorded. Then came the private conference after the uproar caused by the Judaizers (Ac 15:5).

Before them who were of repute ( $\tau$ oıs $\delta$ oкovoıv). He names three of them (Cephas, James, and John). James the Lord's brother, for the other James is now dead (Ac 12:1f. ). But there were others also, a select group of real leaders. The decision reached by this group would shape the decision of the public conference in the adjourned meeting. So far as we know Paul had not met John before, though he had met Peter and James at the other visit. Lightfoot has much to say about the Big Four (St. Paul and the Three) who here discuss the problems of mission work among Jews and Gentiles. It was of the utmost importance that they should see eye to eye. The Judaizers were assuming that the twelve apostles and James the Lord's brother would side with them against Paul and Barnabas. Peter had already been
before the Jerusalem Church for his work in Caesarea (Ac 11:1-18). James was considered a very loyal Jew.

Lest by any means I should be running or had run in vain ( $\mu \eta \pi \omega \varsigma \varepsilon \varepsilon \varsigma \kappa \varepsilon v o v \tau \rho \varepsilon \chi \omega$ $\eta \varepsilon \delta \rho a \mu \circ v$ ). Negative purpose with the present subjunctive ( $\tau \rho \varepsilon \chi \omega$ ) and then by a sudden change the aorist indicative ( $\varepsilon \delta \rho \alpha \mu \circ v$ ), as a sort of afterthought or retrospect (Moulton, Prolegomena, p. 201; Robertson, Grammar, p. 988). There are plenty of classical parallels. See also 1Th 3:5 for both together again.

Gal 2:3
Being a Greek (Hz $\lambda \lambda \eta \nu \omega v$ ). Concessive participle, though he was a Greek.
Was compelled to be circumcised ( $\eta v \alpha \gamma \kappa \alpha \sigma \theta \eta \pi \varepsilon \rho \iota \tau \mu \eta \theta \eta \nu \alpha$ ). First aorist passive indicative of $\alpha v \alpha \gamma \kappa \alpha \zeta \omega$ and first aorist passive infinitive of $\pi \varepsilon \rho \iota \tau \varepsilon \mu v \omega$. Curiously enough some scholars interpret this language to mean that Paul voluntarily had Titus circumcised, instead of being compelled to do it, an impossible view in my opinion in the light of verse 5 and wholly inconsistent with the whole context. Paul means that he stood his ground against compulsion and all force.

Gal 2:4
But because of the false brethren privately brought in ( $\delta ⿺ \alpha \delta \varepsilon$ тоис ларєıбактоия $\psi \varepsilon v \delta \alpha \delta \varepsilon \lambda \varphi o u c)$. Late verbal adjective $\pi \alpha \rho \varepsilon \iota \sigma \alpha \kappa \tau о \varsigma$ from the double compound verb $\pi \alpha \rho \varepsilon \iota \sigma \alpha \gamma \omega$, found in papyri in the sense of brought in by the side or on the sly as here. Evidently some of the Judaizers or sympathizers whom Paul had not invited had come in as often happens. Paul terms them "false brethren" like "the false apostles" in 2Co 11:13 of the Judaizers in Corinth.

Who came in privily (oıtıveৎ $\pi \alpha \rho \varepsilon ı \sigma \eta \lambda \theta \mathrm{ov}$ ). Repetition of the charge of their slipping in unwanted ( $\pi \alpha \rho \varepsilon$ в $\sigma \rho \chi \circ \mu \alpha$, late double compound, in Plutarch, in N.T. only here and Ro 5:20).

To spy out (катабкопп $\sigma \alpha$ ). First aorist active infinitive of катабкол $\omega$, old Greek verb from катабкотоऽ, a spy, to reconnoitre, to make a treacherous investigation.

That they might bring us into bondage ( $\iota v \alpha \eta \mu \alpha \varsigma \kappa \alpha \tau \alpha \delta o v \lambda \omega \sigma \sigma v \sigma เ v$ ). Future active indicative of this old compound, to enslave completely ( $\kappa \alpha \tau \alpha-$ ) as in 2Co 11:20. Nowhere else in N.T. This was their purpose (iva and future active indicative of this causative verb). It was as serious a conflict as this. Spiritual liberty or spiritual bondage, which?

Gal 2:5
No, not for an hour (ov $\delta \pi \rho \rho \varsigma \omega \rho \alpha v$ ). Pointed denial that he and Barnabas yielded at all "in the way of subjection" ( $\tau \eta$ v $\pi о \tau \alpha \gamma \eta$, in the subjection demanded of them). The compromisers pleaded for the circumcision of Titus "because of the false brethren" in order to have peace. The old verb $\varepsilon ו \kappa \omega$, to yield, occurs here alone in the N.T. See 2Co 9:13 for ипотаүๆ.

The truth of the gospel ( $\eta \alpha \lambda \eta \theta \varepsilon ı \alpha$ tov $\varepsilon v a \gamma \gamma \varepsilon \lambda ı 0)$. It was a grave crisis to call for such language. The whole problem of Gentile Christianity was involved in the case of Titus, whether Christianity was to be merely a modified brand of legalistic Judaism or a spiritual religion, the true Judaism (the children of Abraham by faith). The case of Timothy later was utterly different, for he had a Jewish mother and a Greek father. Titus was pure Greek.

Gal 2:6
Somewhat ( $\tau$ ). Something, not somebody. Paul refers to the Big Three (Cephas, James, and John). He seems a bit embarrassed in the reference. He means no disrespect, but he asserts his independence sharply in a tangled sentence with two parentheses (dashes in Westcott and Hort).

Whatsoever they were (олоь $\pi о \tau \varepsilon \eta \sigma \alpha v)$. Literally, "What sort they once were."
Hopoioi is a qualitative word (1Th 1:9; 1Co 3:13; Jas 1:24). Lightfoot thinks that these three leaders were the ones who suggested the compromise about Titus. That is a possible, but not the natural, interpretation of this involved sentence. The use of $\delta \varepsilon$ (but) in verse 6 seems to make a contrast between the three leaders and the pleaders for compromise in verses 4 f .

They, I say, imparted nothing to me ( $\varepsilon \mu \mathrm{\rho} \gamma \alpha \rho$ ov $\delta \varepsilon v \pi \rho o \sigma \alpha v \varepsilon \theta \varepsilon v \tau o$ ). He starts over again after the two parentheses and drops the construction $\alpha \pi о \tau \omega \nu \delta о \kappa о u v \tau \omega v$ and changes the construction (anacoluthon) to o $\delta$ oкouvtec (nominative case), the men of reputation and influences whom he names in verses 8 f . See the same verb in 1:16. They added nothing in the conference to me. The compromisers tried to win them, but they finally came over to my view. Paul won his point, when he persuaded Peter, James, and John to agree with him and Barnabas in their contention for freedom for the Gentile Christians from the bondage of the Mosaic ceremonial law.

Gal 2:7
But contrariwise ( $\alpha \lambda \lambda \alpha$ touvavtiov). But on the contrary (accusative of general reference, $\tau \mathrm{\varepsilon}$ عvavtiov). So far from the three championing the cause of the Judaizers as some hoped or even the position of the compromisers in verses 4 f . , they came boldly to Paul's side after hearing the case argued in the private conference. This is the obvious interpretation rather than the view that Peter, James, and John first proposed the circumcision of Titus and afterwards surrendered to Paul's bold stand.

When they saw (iסovtء¢). After seeing, after they heard our side of the matter.
That I had been intrusted with the gospel of the uncircumcision ( $о \tau \pi \pi \neg \sigma \tau \varepsilon \cup \mu \alpha$ тo $\varepsilon v a \gamma \gamma \varepsilon \lambda \iota \circ v \tau \eta \varsigma \alpha \kappa \rho \circ \beta v \sigma \tau \iota \propto \varsigma)$. Perfect passive indicative of $\pi \iota \sigma \tau \varepsilon v \omega$, to intrust, which retains the accusative of the thing ( $\tau 0 \varepsilon v a \gamma \gamma^{\varepsilon} \lambda_{\circ} \circ v$ ) in the passive voice. This clear-cut agreement between the leaders "denotes a distinction of sphere, and not a difference of type" (Lightfoot). Both divisions in the work preach the same "gospel" (not like 1:6f. , the Judaizers). It seems
hardly fair to the Three to suggest that they at first championed the cause of the Judaizers in the face of Paul's strong language in verse 5 .

Gal 2:8
He that wrought for Peter unto the apostleship of the circumcision (o $\gamma \alpha \rho \varepsilon v \varepsilon \rho \gamma \eta \sigma a c$ $\Pi \varepsilon \tau \rho \omega \varepsilon \iota \varsigma \pi о \sigma \tau 0 \lambda \eta \nu \tau \eta \varsigma \pi \varepsilon \rho ı \tau о \mu \eta \varsigma)$. Paul here definitely recognizes Peter's leadership (apostleship, aлобто $\lambda \eta \nu$, late word, already in Ac 1:25; 1Co 9:2 ) to the Jews and asserts that Peter acknowledges his apostleship to the Gentiles. This is a complete answer to the Judaizers who denied the genuineness of Paul's apostleship because he was not one of the twelve.

Gal 2:9
They who were reputed to be pillars (o סокоuvte¢ $\sigma \tau \cup \lambda o \varepsilon เ v \alpha$ ). They had that reputation ( $\delta$ oкоuvteऽ) and Paul accepts them as such. $\Sigma \tau \cup \lambda$ o, old word for pillars, columns, as of fire (Re 10:1). So of the church ( $1 \mathrm{Ti} 3: 15$ ). These were the Pillar Apostles.

Gave to me and Barnabas the right hands of fellowship ( $\delta \varepsilon \xi \iota a \varsigma \varepsilon \delta \omega \kappa \alpha v \varepsilon \mu о \kappa \alpha$ В $\alpha \rho v \alpha \beta \alpha$ кoıv $\omega v / \alpha \varsigma)$. Dramatic and concluding act of the pact for cooperation and coordinate, independent spheres of activity. The compromisers and the Judaizers were brushed to one side when these five men shook hands as equals in the work of Christ's Kingdom.

Gal 2:10
Only ( $\mu$ ovov). One item was emphasized.
We should remember ( $\mu v \eta \mu \circ v \varepsilon v \omega \mu \varepsilon v$ ). Present active subjunctive, "that we should keep on remembering."

Which very thing (o--avto тоטтo). Repetition of relative and demonstrative, tautology, "which this very thing." In fact Barnabas and Saul had done it before (Ac 11:30). It was complete victory for Paul and Barnabas. Paul passes by the second public meeting and the letters to Antioch (Ac 15:6-29) and passes on to Peter's conduct in Antioch.

Gal 2:11
I resisted him to the face ( $\kappa \alpha \tau \alpha \pi \rho о \sigma \omega \pi о \nu \alpha \nu \tau \omega \alpha \nu \tau \varepsilon \sigma \tau \eta \nu)$. Second aorist active indicative (intransitive) of $\alpha v \theta \iota \sigma \tau \eta \mu$. "I stood against him face to face." In Jerusalem Paul faced Peter as his equal in rank and sphere of work. In Antioch he looked him in the eye as his superior in character and courage.

Because he stood condemned (o $\kappa \alpha \tau \varepsilon \gamma v \omega \sigma \mu \varepsilon v o \varsigma \eta v$ ). Periphrastic past perfect passive of катаүוvoбк $\omega$, old verb to know against, to find fault with. In N.T. only here and 1Jo 3:20f

Gal 2:12
For before that certain came from James ( $\pi \rho \circ$ тоv $\gamma \alpha \rho \varepsilon \lambda \theta \varepsilon เ \nu \tau \iota v \alpha \varsigma ~ \alpha \pi о$ I $\alpha \kappa \omega \beta o v$ ). The reason ( $\gamma \alpha \rho$ ) for Paul's condemnation of Peter. Articular infinitive in the genitive after $\pi \rho o$ with the accusative of general reference ( $\tau \imath v a \varsigma)$, "for before the coming as to some from James." Does Paul mean to say that these "certain" ones had been sent by James to Antioch to inspect the conduct of Peter and the other Jewish brethren? Some scholars think so. No
doubt these brethren let the idea get out that they were emissaries "from James." But that idea is inconsistent with the position of James as president of the conference and the author of the resolution securing liberty to the Gentile Christians. No doubt these brethren threatened Peter to tell James and the church about his conduct and they reminded Peter of his previous arraignment before the Jerusalem Church on this very charge (Ac 11:1-18 ). As a matter of fact the Jerusalem Conference did not discuss the matter of social relations between Jews and Gentiles though that was the charge made against Peter (Ac 11:1ff. ).

He did eat with the Gentiles ( $\mu \varepsilon \tau \alpha \tau \omega v \varepsilon \theta v \omega v \sigma \nu v \eta \sigma \theta \varepsilon \varepsilon v)$. It was his habit (imperfect tense).

He drew back (vđ\&бт $\varepsilon \lambda \lambda \varepsilon v$ ). Imperfect tense, inchoative action, "he began to draw himself ( $\varepsilon a v \tau o v)$ back." Old word vтобт $\lambda \lambda \lambda \omega$. See middle voice to dissemble (Ac 20:20,27 ), to shrink (Heb 10:38).

Separated himself ( $\alpha \varphi \omega \rho 1 \zeta \varepsilon v \varepsilon \alpha v \tau o v)$. Inchoative imperfect again, "began to separate himself" just like a Pharisee (see on 1:15) and as if afraid of the Judaizers in the Jerusalem Church, perhaps half afraid that James might not endorse what he had been doing.
 was the real reason for Peter's cowardice. See Ac 11:2 for "о єк $\pi \varepsilon \rho \iota \tau о \mu \eta \varsigma " ~(t h e y ~ o f ~ t h e ~ c i r-~$ cumcision), the very phrase here. It was not that Peter had changed his views from the Jerusalem resolutions. It was pure fear of trouble to himself as in the denials at the trial of Christ.

Gal 2:13
Dissembled likewise with him ( $\sigma \cup v \cup \pi \varepsilon \kappa \rho 1 \theta \eta \sigma \alpha v \alpha \cup \tau \omega \kappa \alpha$ ). First aorist passive indicative of the double compound verb бטvvтокрıvo $\alpha$, a late word often in Polybius, only here in N.T. One example in Polybius means to pretend to act a part with. That idea here would help the case of the rest of the Jews, but does not accord with Paul's presentation.

Insomuch that even Barnabas ( $\omega \sigma \tau \varepsilon \kappa \alpha$ Ba $\rho v \alpha \beta a \varsigma$ ). Actual result expressed by $\omega \sigma \tau \varepsilon$ and the indicative and ка clearly means "even."

Was carried away with their dissimulation ( $\sigma v v \alpha \pi \eta \chi \theta \eta \alpha \nu \tau \omega v \tau \eta$ v $\quad$ ок $\rho \sigma \varepsilon$ ). First aorist passive indicative of $\sigma v v a \pi \alpha \gamma \omega$, old verb, in N.T. only here and 2Pe 3:17. Нилокрьбє is in the instrumental case and can only mean hypocrisy in the bad sense (Mt 23:28), not merely acting a part. It was a solemn moment when Paul saw the Jerusalem victory vanish and even Barnabas desert him as they followed the timid cowardice of Peter. It was Paulus contra mundum in the cause of spiritual freedom in Christ.

Gal 2:14
But when I saw (A $\lambda \lambda \lambda^{\prime}$ o $\tau \varepsilon \varepsilon เ \delta o v$ ). Paul did see and saw it in time to speak.
That they walked not uprightly (о о о $Ө$ опо $\delta$ ovaıv). Present active indicative retained

foot). Found only here and in later ecclesiastical writers, though о $\rho$ Өотоб $\varepsilon \varsigma \beta$ аıvovtєऽ does occur.

According to the truth of the gospel ( $\pi \rho \circ \varsigma \tau \eta v a \lambda \eta \theta \varepsilon \iota \alpha v$ $\tau o v \varepsilon v a \gamma \gamma \varepsilon \lambda \iota o v$ ). Just as in $2: 5$. Paul brought them to face ( $\pi \rho \circ \varsigma$ ) that.

I said unto Cephas before them all ( $\varepsilon \pi \pi \circ \nu \tau \omega \mathrm{K} \mathrm{\eta} \mathrm{\varphi} \mathrm{\alpha} \mathrm{\varepsilon} \mathrm{\mu} \mathrm{\pi} \rho \circ \sigma \theta \varepsilon v \pi \alpha \nu \tau \omega v)$.
Being a Jew (Iov $\delta a \iota o \varsigma v \pi \alpha \rho \chi \omega \nu$, though being a Jew). Condition of first class, assumed as true. It was not a private quarrel, but a matter of public policy. One is a bit curious to know what those who consider Peter the first pope will do with this open rebuke by Paul, who was in no sense afraid of Peter or of all the rest.

As do the Gentiles ( $\varepsilon \theta v i \kappa \omega \varsigma$ ). Late adverb, here only in N.T. Like Gentiles.
As do the Jews (Iovסaik $\omega \varsigma$ ). Only here in N.T., but in Josephus.
To live as do the Jews (Iov $\alpha a \iota \zeta \varepsilon ı$ ). Late verb, only here in the N.T. From Iov $\delta a \iota o$, Jew. Really Paul charges Peter with trying to compel (conative present, $\alpha v \alpha \gamma \kappa \alpha \zeta \varepsilon \iota \varsigma)$ the Gentiles to live all like Jews, to Judaize the Gentile Christians, the very point at issue in the Jerusalem Conference when Peter so loyally supported Paul. It was a bold thrust that allowed no reply. But Paul won Peter back and Barnabas also. If II Peter is genuine, as is still possible, he shows it in 2Pe 3:15. Paul and Barnabas remained friends (Ac 15:39f.; 1Co 9:6 ), though they soon separated over John Mark.

Gal 2:15
Not sinners of the Gentiles (ovk $\varepsilon \xi \varepsilon \theta v \omega \nu \alpha \mu \alpha \rho \tau \omega \lambda 0$ ). The Jews regarded all Gentiles as "sinners" in contrast with themselves (cf. Mt 26:45 "sinners" and Lu 18:32 "Gentiles"). It is not clear whether verses 15-21 were spoken by Paul to Peter or whether Paul is now simply addressing the Galatians in the light of the controversy with Peter. Burton thinks that he is "mentally addressing Peter, if not quoting from what he said to him."

Gal 2:16
Is not justified (ov $\delta \iota \kappa \alpha \circ v \tau \alpha$ ). Present passive indicative of $\delta \iota \kappa \alpha \circ \omega$, an old causative verb from $\delta_{\iota \kappa \alpha \iota ๐}$, righteous (from $\delta \iota \kappa \varepsilon$, right), to make righteous, to declare righteous. It is made like $\alpha \xi_{\imath} \omega \omega$, to deem worthy, and кoเvo $\omega$, to consider common. It is one of the great Pauline words along with $\delta ı \kappa \alpha \circ \sigma v v \eta$, righteousness. The two ways of getting right with God are here set forth: by faith in Christ Jesus (objective genitive), by the works of the law (by keeping all the law in the most minute fashion, the way of the Pharisees). Paul knew them both (see Ro 7). In his first recorded sermon the same contrast is made that we have here (Ac 13:39) with the same word $\delta$ เкaıo $\omega$, employed. It is the heart of his message in all his Epistles. The terms faith ( $\pi \iota \sigma \tau \iota \varsigma)$, righteousness ( $\delta ı \kappa \alpha \iota \sigma v \vee \eta$ ), law (vouoc), works ( $\varepsilon \rho \gamma \alpha$ ) occur more frequently in Galatians and Romans because Paul is dealing directly with the problem in opposition to the Judaizers who contended that Gentiles had to become Jews to be saved. The whole issue is here in an acute form.

Save ( $\varepsilon \alpha v \mu \eta)$. Except.

Even we (ка $\eta \mu \varepsilon \iota)$ ). We Jews believed, had to believe, were not saved or justified till we did believe. This very point Peter had made at the Jerusalem Conference (Ac 15:10f. ). He quotes Ps 143:2. Paul uses $\delta$ ıкaıoбטv $\eta$ in two senses (1) Justification, on the basis of what Christ has done and obtained by faith. Thus we are set right with God. Ro 1-5. (2) Sanctification. Actual goodness as the result of living with and for Christ. Ro 6-8. The same plan exists for Jew and Gentile.

Gal 2:17
We ourselves were found sinners ( $\varepsilon v \rho \varepsilon \theta \eta \mu \varepsilon \nu \kappa \alpha \alpha \cup \tau о ~ \alpha \mu \alpha \rho \tau \omega \lambda 0$ ). Like the Gentiles, Jews who thought they were not sinners, when brought close to Christ, found that they were. Paul felt like the chief of sinners.

A minister of $\sin$ ( $\alpha \mu \alpha \rho \tau \iota \alpha \varsigma \delta \iota \alpha \kappa о v o \varsigma)$. Objective genitive, a minister to sin. An illogical inference. We were sinners already in spite of being Jews. Christ simply revealed to us our sin.

God forbid ( $\mu \eta \boldsymbol{\eta} \boldsymbol{\varepsilon v o \iota \tau o ) . ~ L i t e r a l l y , ~ " M a y ~ i t ~ n o t ~ h a p p e n . " ~ W i s h ~ a b o u t ~ t h e ~ f u t u r e ~ ( ~} \mu \eta$ and the optative).

Gal 2:18
A transgressor ( $\pi \alpha \rho \alpha \beta \alpha \tau \eta v)$. Peter, by his shifts had contradicted himself helplessly as Paul shows by this condition. When he lived like a Gentile, he tore down the ceremonial law. When he lived like a Jew, he tore down salvation by grace.

Gal 2:19
I through the law died to the law ( $\varepsilon \gamma \omega \delta \iota \alpha$ vo $\mu$ ov vo $\mu \omega \alpha \pi \varepsilon \theta \alpha v o v$ ). Paradoxical, but true. See Rom 7:4,6 for picture of how the law waked Paul up to his real death to the law through Christ.

Gal 2:20
I have been crucified with Christ (X $\rho \stackrel{\sigma \tau \omega}{ } \sigma v v \varepsilon \sigma \tau \alpha v \rho \omega \mu \alpha)$. One of Paul's greatest mystical sayings. Perfect passive indicative of $\sigma v \sigma \tau \alpha 0 \rho o \omega$ with the associative instrumental case (X $\rho \iota \sigma \tau \omega$ ). Paul uses the same word in Ro 6:6 for the same idea. In the Gospels it occurs of literal crucifixion about the robbers and Christ (Mt 27:44; Mr 15:32; Joh 19:32). Paul died to the law and was crucified with Christ. He uses often the idea of dying with Christ (Ga 5:24; 6:14; Ro 6:8; Col 2:20) and burial with Christ also (Ro 6:4; Col 2:12).

No longer I (ouкєt $\varepsilon \gamma \omega$ ). So complete has become Paul's identification with Christ that his separate personality is merged into that of Christ. This language helps one to understand the victorious cry in Ro 7:25. It is the union of the vine and the branch (Joh 15:1-6).

Which is in the Son of God ( $\tau \eta$ tov voo $\operatorname{\tau ov} \theta$ हov). The objective genitive, not the faith of the Son of God.

For me (v $\tau \varepsilon \rho \varepsilon \mu \circ$ ). Paul has the closest personal feeling toward Christ. "He appropriates to himself, as Chrysostom observes, the love which belongs equally to the whole world. For Christ is indeed the personal friend of each man individually" (Lightfoot).

## Gal 2:21

I do not make void the grace of God (ouk $\alpha \theta \varepsilon \tau \omega \tau \eta \nu \chi \alpha \rho \stackrel{\nu}{ }$ tov $\theta \varepsilon o v$ ). Common word in LXX and Polybius and on, to make ineffective ( $\alpha$ privative and $\tau i \theta \eta \mu$, to place or put). Some critic would charge him with that after his claim to such a close mystic union with Christ.

Then Christ died for nought ( $\alpha \rho \alpha$ Х $\rho \iota \sigma \tau o \varsigma ~ \delta \omega \rho \varepsilon \alpha v \alpha \pi \varepsilon \theta \alpha v \varepsilon v$ ). Condition of first class, assumed as true. If one man apart from grace can win his own righteousness, any man can and should. Hence ( $\alpha \rho \alpha$, accordingly) Christ died gratuitously ( $\delta \omega \rho \varepsilon \alpha v$ ), unnecessarily. Adverbial accusative of $\delta \omega \rho \varepsilon \alpha$, a gift. This verse is a complete answer to those who say that the heathen (or any mere moralist) are saved by doing the best that they know and can. No one, apart from Jesus, ever did the best that he knew or could. To be saved by law ( $\delta \iota \alpha$ vouov) one has to keep all the law that he knows. That no one ever did.

## Galatians 3

Gal 3:1
Who did bewitch you? ( $\tau \iota \varsigma ~ v \mu \alpha \varsigma \varepsilon \beta \alpha \sigma \kappa \alpha v \varepsilon v ?)$. Somebody "fascinated" you. Some aggressive Judaizer (5:7), some one man (or woman). First aorist active indicative of $\beta \alpha \sigma \kappa \alpha \iota v \omega$, old word kin to $\varphi \alpha \sigma \kappa \omega$ ( $\beta \alpha \sigma \kappa \omega$ ), to speak, then to bring evil on one by feigned praise or the evil eye (hoodoo), to lead astray by evil arts. Only here in the N.T. This popular belief in the evil eye is old (De 28:54) and persistent. The papyri give several examples of the adjective $\alpha \beta \alpha \sigma \kappa \alpha \nu \tau \alpha$, the adverb $\alpha \beta a \sigma \kappa \alpha \nu \tau \omega \varsigma$ (unharmed by the evil eye), the substantive $\beta$ $\beta \sigma \kappa \alpha v i \alpha$ (witchcraft).

Before whose eyes Jesus Christ was openly set forth crucified (oıs кат' о $\varnothing \theta \lambda \lambda \mu$ оч
 Christ was portrayed as crucified." Second aorist passive indicative of $\pi \rho \circ \gamma \rho \alpha \varphi \omega$, old verb to write beforehand, to set forth by public proclamation, to placard, to post up. This last idea is found in several papyri (Moulton and Milligan's Vocabulary) as in the case of a father who posted a proclamation that he would no longer be responsible for his son's debts. $\Gamma \rho \alpha \varphi \omega$ was sometimes used in the sense of painting, but no example of $\pi \rho \sigma \gamma \rho \alpha \varphi \omega$ with this meaning has been found unless this is one. With that idea it would be to portray, to picture forth, a rendering not very different from placarding. The foolish Galatians were without excuse when they fell under the spell of the Judaizer. Eбтavp $\omega \mu \varepsilon v o$, is perfect passive participle of $\sigma \tau \alpha v \rho o \omega$, the common verb to crucify (from $\sigma \tau \alpha \cup \rho o \varsigma$, stake, cross), to put on the cross (Mt 20:19), same form as in 1Co 2:2 .

Gal 3:2
This only ( $\tau 0 \cup \tau$ тo $\mu$ ovov). Paul strikes at the heart of the problem. He will show their error by the point that the gifts of the Spirit came by the hearing of faith, not by works of the law.

Gal 3:3
Are ye now perfected in the flesh? (vvv $\sigma \alpha \rho \kappa \varepsilon \pi ı \tau \varepsilon \lambda \varepsilon \varepsilon \sigma \theta \varepsilon$ ?). Rather middle voice as in 1Pe 5:9, finishing of yourselves. There is a double contrast, between $\varepsilon v \alpha \rho \xi \alpha \mu \varepsilon v o$ (having begun) and $\varepsilon \pi \iota \tau \varepsilon \lambda \varepsilon \iota \sigma \theta \varepsilon$ (finishing) as in 2Co 8:6; Php 1:6, and also between "Spirit" ( $\pi \nu \varepsilon \nu \mu \alpha \tau$ ) and flesh ( $\sigma \alpha \rho \kappa)$. There is keen irony in this thrust.

Gal 3:4
Did ye suffer? ( $\varepsilon \pi \alpha \theta \varepsilon \tau \varepsilon$ ?). Second aorist active indicative of $\pi \alpha \sigma \chi \omega$, to experience good or ill. But alone, as here, it often means to suffer ill ( $\tau 0 \sigma \alpha u \tau \alpha$, so many things). In North Galatia we have no record of persecutions, but we do have records for South Galatia (Ac 14:2,5,19,22 ).

If it be indeed in vain ( $\varepsilon \boldsymbol{\gamma} \kappa \alpha \varepsilon$ кાк $)$. On $\varepsilon$ єાк see 1Co 15:2; Ga 4:11. Paul clings to hope about them with alternative fears.

Gal 3:5
Supplieth ( $\varepsilon \pi \tau \chi \circ \rho \eta \gamma \omega v$ ). It is God. See on 2Co 9:10 for this present active participle. Cf. Php 1:19; 2Pe 1:5.

Worketh miracles ( $\varepsilon v \varepsilon \rho \gamma \omega v \delta \nu v a \mu \varepsilon ı \varsigma)$. On the word $\varepsilon v \varepsilon \rho \gamma \varepsilon \omega$ see 1Th 2:13; 1Co 12:6 . It is a great word for God's activities (Php 2:13). "In you" (Lightfoot) is preferable to "among you" for $\varepsilon \nu \nu \mu \nu \nu(1$ Co 13:10; Mt 14:2 ). The principal verb for "doeth he it" ( $\pi o เ \varepsilon$ ) is not expressed. Paul repeats the contrast in verse 2 about "works of the law" and "the hearing of faith."

Gal 3:6
 passive indicative of $\lambda$ оүүऍона. See on 1Co 13:5 for this old word. He quotes Ge 15:6 and uses it at length in Ro 4:3ff. to prove that the faith of Abraham was reckoned "for" ( $\varepsilon \iota \varsigma$, good Koine idiom though more common in LXX because of the Hebrew) righteousness before he was circumcised. James (Jas 2:23) quotes the same passage as proof of Abraham's obedience to God in offering up Isaac (beginning to offer him). Paul and James are discussing different episodes in the life of Abraham. Both are correct.

Gal 3:7
The same are sons of Abraham (ovto vio $\varepsilon$ єбıv A $\beta \rho \alpha \alpha \mu$ ). "These are." This is Paul's astounding doctrine to Jews that the real sons of Abraham are those who believe as he did, "they which be of faith" (o $\varepsilon \kappa \pi \iota \sigma \tau \varepsilon \omega \varsigma$ ), a common idiom with Paul for this idea (verse 9; Ro $3: 26 ; 4: 16 ; 14: 23$ ), those whose spiritual sonship springs out of ( $\varepsilon \kappa$ ) faith, not out of blood. John the Baptist denounced the Pharisees and Sadducees as vipers though descendants of Abraham (Mt 3:7; Lu 3:7) and Jesus termed the Pharisees children of the devil and not spiritual children of Abraham (not children of God) in Joh 8:37-44 .

Gal 3:8
Foreseeing ( $\pi \rho o t \delta o v \sigma \alpha$ ). Second aorist active participle of $\pi \rho o o \rho \alpha \omega$. The Scripture is here personified. Alone in this sense of "sight," but common with $\lambda \varepsilon \gamma \varepsilon$ or $\varepsilon ו \pi \varepsilon v$ (says, said) and really in verse 22 "hath shut up" ( $\sigma \cup v \varepsilon \kappa \lambda \varepsilon เ \sigma \varepsilon v)$.

Would justify ( $\delta$ ıкаıo). Present active indicative, "does justify."
Preached the gospel beforehand ( $\pi \rho о \varepsilon \cup \eta \gamma \gamma \varepsilon \lambda_{\iota} \sigma \alpha \tau 0$ ). First aorist middle indicative of $\pi \rho o \varepsilon v a \gamma \gamma \varepsilon \lambda_{l} \zeta_{o \mu} \alpha$ with augment on $\alpha$ though both $\pi \rho o$ and $\varepsilon v$ before it in composition. Only instance in N.T. It occurs in Philo. and Schol. Soph. This Scripture announced beforehand the gospel on this point of justification by faith. He quotes the promise to Abraham in Ge 12:3; 18:18, putting $\pi \alpha v \tau \alpha \tau \alpha \varepsilon \theta v \eta$ (all the nations) in 18:18 for $\pi \alpha \sigma \alpha \alpha \varphi \cup \lambda \alpha$ (all the tribes) of the earth. It is a crucial passage for Paul's point, showing that the promise to Abraham included all the nations of the earth. The verb $\varepsilon v \varepsilon u \lambda$ оүع $\omega$ (future passive here) occurs in the LXX and here only in N.T. (not Ac 3:25 in correct text).

In thee ( $\varepsilon v \sigma o$ ). "As their spiritual progenitor" (Lightfoot).

## Gal 3:9

With ( $\sigma \cup v$ ). Along with, in fellowship with.
The faithful ( $\tau \omega \pi \iota \sigma \tau \omega$ ). Rather, "the believing" (cf. verse 6).
Gal 3:10
Under a curse (vло катараv). Picture of the curse hanging over them like a Damocles' blade. Cf. Ro 3:9 "under sin" ( $v \varphi^{\prime} \alpha \mu \alpha \rho \tau \iota \alpha v$ ). The word for "curse" (катара) is an old one (kata, down, apa, imprecation), often in LXX, in N.T. only here and 13; Jas 3:10; 2Pe 2:14 . Paul quotes De 27:26, the close of the curses on Mt. Ebal. He makes a slight explanatory modification of the LXX changing $\lambda$ oүoıs to $\gamma \varepsilon \gamma \rho \alpha \mu \mu \varepsilon v o \iota s \varepsilon \nu \tau \omega \beta \beta \beta \iota \omega$. The idea is made clearer by the participle ( $\gamma \varepsilon \gamma \rho a \mu \mu \varepsilon \nu \circ \varsigma)$ and $\beta \iota \beta \lambda_{\iota} \omega$ (book). The curse becomes effective only when the law is violated.

Cursed ( $\varepsilon \pi เ к \alpha \tau \alpha \rho \alpha \tau о \varsigma) . ~ V e r b a l ~ a d j e c t i v e ~ f r o m ~ \varepsilon \pi ı к а \tau \alpha \rho \alpha о \mu \alpha, ~ t o ~ i m p r e c a t e ~ c u r s e s, ~ l a t e ~$ word, common in LXX. In N.T. only here and verse 13, but in inscriptions also (Deissmann, Light from the Ancient East, p. 96). The emphasis is on "continueth" ( $\varepsilon \mu \mu \varepsilon v \varepsilon$ ) and "all" ( $\pi \alpha \sigma \iota v$ ).

Gal 3:11
In the sight of God ( $\pi \alpha \rho \alpha \tau \omega \theta \varepsilon \omega$ ). By the side of ( $\pi \alpha \rho \alpha$ ) God, as God looks at it, for the simple reason that no one except Jesus has ever kept all the law, God's perfect law.

Gal 3:12
The law is not of faith (o vo $\quad \circ \varsigma$ оик $\varepsilon \sigma \tau \iota v \varepsilon \kappa \pi \iota \sigma \tau \varepsilon \omega \varsigma$ ). Law demands complete obedience and rests not on mercy, faith, grace.

Gal 3:13
Redeemed us ( $\eta \mu \alpha \varsigma \varepsilon \xi \eta \gamma \circ \rho \alpha \sigma \varepsilon v$ ). First aorist active of the compound verb $\varepsilon \xi \alpha \gamma \circ \rho \alpha \zeta \omega$ (Polybius, Plutarch, Diodorus), to buy from, to buy back, to ransom. The simple verb $\alpha \gamma о \rho \alpha \zeta \omega$ (1Co 6:20; 7:23 ) is used in an inscription for the purchase of slaves in a will (Deissmann, Light from the Ancient East, p. 324). See also Ga 4:5; Col 4:5; Eph 5:16. Christ purchased us
from the curse of the law ( $\varepsilon \kappa \tau \eta \varsigma \kappa \alpha \tau \alpha \rho \alpha \varsigma ~ \tau o v ~ v o \mu o v) . ~ " O u t ~ f r o m ~(~(\varepsilon \kappa ~ r e p e a t e d) ~ u n d e r ~$ (vло in verse 10) the curse of the law."

Having become a curse for us ( $\gamma \varepsilon v \circ \mu \varepsilon v o \varsigma v \pi \varepsilon \rho \eta \mu \omega v$ кат $\alpha \rho \alpha$ ). Here the graphic picture is completed. We were under (vло) a curse, Christ became a curse
over (v $\quad \pi \varepsilon$ ) us and so between us and the overhanging curse which fell on him instead of on us. Thus he bought us out ( $\varepsilon \kappa$ ) and we are free from the curse which he took on himself. This use of $v \pi \varepsilon \rho$ for substitution is common in the papyri and in ancient Greek as in the N.T. (Joh 11:50; 2Co 5:14f. ).

That hangeth on a tree (о крє $\mu \alpha \varepsilon \varepsilon \nu \circ \varsigma \varepsilon \pi \xi \cup \lambda o v$ ). Quotation from De 21:23 with the omission of vio $\theta$ vov (by God). Since Christ was not cursed by God. The allusion was to exposure of dead bodies on stakes or crosses (Jos 10:26 ). Eudov means wood, not usually
tree, though so in Lu 23:31 and in later Greek. It was used of gallows, crosses, etc. See Ac 5:30; 10:39; $1 \mathrm{Pe} 2: 24$. On the present middle participle from the old verb $\kappa \rho \varepsilon \mu \alpha v v 0 \mu$, to hang, see on Mt 18:6; Ac 5:30 .

Gal 3:14
That upon the Gentiles ( $\imath v \alpha \varepsilon ı \varsigma \tau \alpha \varepsilon \theta v \eta$ ). Final clause ( $\imath v \alpha$ and $\gamma \varepsilon v \eta \tau \alpha$, aorist middle subjunctive).

That we might receive (ıva $\lambda \alpha \beta \omega \mu \varepsilon v$ ). Second final clause coordinate with the first as in 2Co 9:3. So in Christ we all (Gentile and Jew) obtain the promise of blessing made to Abraham, through faith.

Gal 3:15
After the manner of men ( $\kappa \alpha \tau \alpha \alpha v \theta \rho \omega \pi \sigma v$ ). After the custom and practice of men, an illustration from life.

Though it be but a man's covenant, yet when it hath been confirmed ( $\alpha \mu \omega \varsigma \alpha v \theta \rho \omega \pi \sigma$ $\kappa \varepsilon \kappa \cup \rho \omega \mu \varepsilon v \eta \nu \delta \iota \alpha \theta \eta \kappa \eta \nu)$. Literally, "Yet a man's covenant ratified." On $\Delta \iota \alpha \theta \eta \kappa \eta$ as both covenant and will see on Mt 26:28; 1Co 11:25; 2Co 3:6; Heb 9:16f. On кupow, to ratify, to make valid, see on 2Co 2:8. Perfect passive participle here, state of completion, authoritative confirmation.

Maketh it void ( $\alpha \theta \varepsilon \tau \varepsilon$ ). See on 2:21 for this verb. Both parties can by agreement cancel a contract, but not otherwise.

Addeth thereto ( $\varepsilon \pi \iota \delta \iota \alpha \tau \alpha \sigma \sigma \varepsilon \tau \alpha)$. Present middle indicative of the double compound verb $\varepsilon \pi \iota \delta \iota \alpha \tau \alpha \sigma \sigma о \mu \alpha$, a word found nowhere else as yet. But inscriptions use $\delta ı \alpha \tau \alpha \sigma \sigma о \mu \alpha \iota$, $\delta ı \alpha \tau \alpha \xi_{\iota} \sigma, \delta \iota a \tau \alpha \gamma \eta, \delta \iota \alpha \tau \alpha \gamma \mu \alpha$ with the specialized meaning to "determine by testamentary disposition" (Deissmann, Light from the Ancient East, p. 90). It was unlawful to add ( $\varepsilon \pi$ ) fresh clauses or specifications ( $\delta 1 \alpha \tau \alpha \xi \varepsilon ı \varsigma)$.

Gal 3:16
But as of one ( $\left.\alpha \lambda \lambda^{\prime} \omega \varsigma \varepsilon \varphi^{\prime} \varepsilon v o c\right)$. But as in the case of one.
Which is Christ (os eбтıv Xpıбтoৎ). Masculine relative agreeing with Xpıбтoc though $\sigma \pi \varepsilon \rho \mu \alpha$ is neuter. But the promise to Abraham uses $\sigma \pi \varepsilon \rho \mu \alpha$ as a collective substantive and applies to all believers (both Jews and Gentiles) as Paul has shown in verses 7-14, and as of course he knew full well Here Paul uses a rabbinical refinement which is yet intelligible. The people of Israel were a type of the Messiah and he gathers up the promise in its special application to Christ. He does not say that Christ is specifically referred to in Ge 13:15 or 17:7f

Gal 3:17
Now this I say ( $\tau$ outo $\delta \varepsilon \lambda \varepsilon \gamma \omega$ ). Now I mean this. He comes back to his main point and is not carried afield by the special application of $\sigma \pi \varepsilon \rho \mu a$ to Christ.

Confirmed beforehand by God ( $\pi \rho о к \varepsilon \kappa \nu \rho \omega \mu \varepsilon v \eta \nu$ vто тоv $\theta \varepsilon о v$ ). Perfect passive participle of $\pi \rho о к \cup \rho o \omega$, in Byzantine writers and earliest use here. Nowhere else in N.T. The point is in $\pi \rho o$ and $v \pi 0$ tov $\theta \varepsilon o v$ (by God) and in $\mu \varepsilon \tau \alpha$ (after) as Burton shows.

Four hundred and thirty years after ( $\mu \varepsilon \tau \alpha \tau \varepsilon \tau \rho \alpha к о \sigma ı \alpha ~ к \alpha ~ \tau \rho \iota \alpha \kappa о \nu \tau \alpha ~ \varepsilon \tau \eta) . ~ L i t e r a l l y, ~$ "after four hundred and thirty years." This is the date in Ex 12:40 for the sojourn in Egypt (cf. Ge 15:13 ). But the LXX adds words to include the time of the patriarchs in Canaan in this number of years which would cut the time in Egypt in two. Cf. Ac 7:6 . It is immaterial to Paul's argument which chronology is adopted except that "the longer the covenant had been in force the more impressive is his statement" (Burton).

Doth not disannul (очк акиро). Late verb акирош, in N.T. only here and Mt 15:6; Mr 7:13 (from a privative and кироৎ, authority). On катарүпба see 1Co 1:28; 2:6; 15:24,26.

Gal 3:18
The inheritance ( $\eta \kappa \lambda \eta \rho \circ v \circ \mu \mu)$. Old word from $\kappa \lambda \eta \rho o v o \mu \circ \varsigma$, heir ( $\kappa \lambda \varepsilon \rho \circ \varsigma$, lot, $v \varepsilon \mu \circ \mu \alpha$, to distribute). See on Mt 21:38; Ac 7:5. This came to Israel by the promise to Abraham, not by the Mosaic law. So with us, Paul argues.

Hath granted (кєүарıбта). Perfect middle indicative of $\chi \alpha \rho ı \zeta \rho \mu \alpha$. It still holds good after the law came.

Gal 3:19
What then is the law? ( $\tau$ ouv o vouoo?). Or, why then the law? A pertinent question if the Abrahamic promise antedates it and holds on afterwards.

It was added because of transgressions ( $\tau \omega v \pi \alpha \rho \alpha \beta \alpha \sigma \varepsilon \omega \nu \chi \alpha \rho \nu v \pi \rho o \sigma \varepsilon \tau \varepsilon \theta \eta$ ). First aorist passive of $\pi \rho \circ \sigma \tau 1 \theta \eta \mu$, old verb to add to. It is only in apparent contradiction to verses 15ff. , because in Paul's mind the law is no part of the covenant, but a thing apart "in no way modifying its provisions" (Burton). Xapıv is the adverbial accusative of $\chi$ a $\iota \varsigma$ which was used as a preposition with the genitive as early as Homer, in favour of, for the sake of. Except in 1Jo 3:12 it is post-positive in the N.T. as in ancient Greek. It may be causal (Lu 7:47; 1Jo 3:12) or telic (Tit 1:5,11; Jude 1:16). It is probably also telic here, not in order to create transgressions, but rather "to make transgressions palpable" (Ellicott), "thereby pronouncing them to be from that time forward transgressions of the law" (Rendall). Параßабı, from $\pi \alpha \rho \alpha \beta \alpha \iota v \omega$, is in this sense a late word (Plutarch on), originally a slight deviation, then a wilful disregarding of known regulations or prohibitions as in Ro 2:23.

Till the seed should come ( $\alpha \chi \rho \iota \varsigma \alpha v \varepsilon \lambda \theta \eta$ тo $\sigma \pi \varepsilon \rho \mu \alpha$ ). Future time with $\alpha \chi \rho \iota \varsigma \alpha v$ and aorist subjunctive (usual construction). Christ he means by то $\sigma \pi \varepsilon \rho \mu \alpha$ as in verse 16.

The promise hath been made ( $\varepsilon \pi \eta \gamma \gamma \varepsilon \lambda \tau \alpha$ ). Probably impersonal perfect passive rather than middle of $\varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \lambda$ o $\mu \alpha$ as in II Macc. 4:27.

Ordained through angels ( $\delta \iota \alpha \tau \alpha \gamma \varepsilon ı \varsigma ~ \delta \iota^{\prime} \alpha \gamma \gamma \varepsilon \lambda \omega v$ ). Second aorist passive participle of $\delta \iota \alpha \tau \alpha \sigma \sigma \omega$ (see on Mt 11:1). About angels and the giving of the law see on De 33:2 (LXX); Ac 7:38,52; Heb 2:2 ; Josephus (Ant. XV. 5. 3).

By the hand of a mediator ( $\varepsilon v \chi \varepsilon \rho \mu \varepsilon \sigma \iota \tau o v$ ). $\mathrm{Ev} \chi \varepsilon \iota \rho$ is a manifest Aramaism or Hebraism and only here in the N.T. It is common in the LXX. Mع $\sigma \iota \tau \eta \varsigma$, from $\mu \varepsilon \sigma \circ$, is middle or midst, is a late word (Polybius, Diodorus, Philo, Josephus) and common in the papyri in legal transactions for arbiter, surety, etc. Here of Moses, but also of Christ (1Ti 2:5; Heb 8:6; 9:15; 12:24).

Gal 3:20
Is not a mediator of one ( $\varepsilon v o \varsigma ~ o u k ~ \varepsilon \sigma \tau ı v)$. That is, a middleman comes in between two. The law is in the nature of a contract between God and the Jewish people with Moses as the mediator or middleman.

But God is one (o $\delta \varepsilon \theta \varepsilon o \varsigma \varepsilon \iota \varsigma \varepsilon \sigma \tau \imath v)$. There was no middleman between God and Abraham. He made the promise directly to Abraham. Over 400 interpretations of this verse have been made!

Gal 3:21
Against the promises ( $\kappa \alpha \tau \alpha \tau \omega \nu \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \iota \omega \nu$ ). A pertinent question again. Far from it ( $\mu \eta \gamma^{\varepsilon v o i t o) . ~}$
 $\zeta \omega о \pi о \varepsilon \varepsilon \omega$, late compound ( $\zeta \omega \circ \varsigma$, alive, $\pi$ оь $\varepsilon \omega$, to make) verb for which see 1Co 15:22. Spiritual life, he means, here and hereafter.

Verily (ov $\tau \omega \varsigma$ ). "Really" (cf. Mr 11:32; Lu 24:34). Condition and conclusion ( $\alpha v \eta \nu$ ) of second class, determined as unfulfilled. He had already said that Christ died to no purpose in that case (2:21).

Gal 3:22
Hath shut up ( $\sigma u v \varepsilon \kappa \lambda \varepsilon \iota \sigma \varepsilon v$ ). Did shut together. First aorist active indicative of $\sigma u v \kappa \lambda \varepsilon \epsilon \omega$, old verb to shut together, on all sides, completely as a shoal of fish in a net (Lu 5:6 ). So verse 23; Ro 11:32.

Under $\sin$ (vто $\alpha \mu \alpha \rho \tau \iota \alpha v$ ). See vто катараv in verse 10 . As if the lid closed in on us over a massive chest that we could not open or as prisoners in a dungeon. He uses $\tau \alpha \pi \alpha v \tau \alpha$ (the all things), the totality of everything. See Ro 3:10-19; 11:32 .

That ( $(v \alpha)$ ). God's purpose, personifying scripture again.
Might be given ( $\delta o \theta \eta$ ). First aorist passive subjunctive of $\delta \iota \delta \omega \mu$ with $\operatorname{iva}$.
Gal 3:23
Before faith came ( $\pi \rho \circ$ тov $\varepsilon \lambda \theta \varepsilon เ \nu \tau \eta \nu \pi \iota \sigma \tau \iota v$ ). "Before the coming (second aorist active infinitive of $\varepsilon \rho \chi \circ \mu \alpha$, definite event) as to the Faith" (note article, meaning the faith in verse 22 made possible by the historic coming of Christ the Redeemer), the faith in Christ as Saviour (verse 22).

We were kept in ward under the law ( $\cup \pi \varepsilon \rho$ vouov $\varepsilon \varphi \rho о \cup \rho о v \mu \varepsilon \theta a)$. Imperfect passive of $\varphi \rho o u \rho \varepsilon \omega$, to guard (from $\varphi \rho 0 \cup \rho \circ \varsigma$, a guard). See on Ac 9:24; 2Co 11:32. It was a long progressive imprisonment.

Unto the faith which should afterwards be revealed ( $\varepsilon ı \varsigma ~ \tau \eta \nu \mu \varepsilon \lambda \lambda o v \sigma \alpha \nu \pi \iota \sigma \tau \iota \nu$ $\alpha \pi о \kappa \alpha \lambda \nu \varphi \theta \eta v \alpha$ ). "Unto the faith (verse 22 again) about to be revealed." $M \varepsilon \lambda \lambda \omega$ and the first aorist passive infinitive (regular idiom).

Gal 3:24
Our tutor unto Christ ( $\pi \alpha \iota \alpha \gamma \omega \gamma \circ \varsigma \nu \mu \omega \nu \varepsilon \iota \varsigma$ X $\rho \iota \sigma \tau \sigma v$ ). See 1Co 4:15 for the only other N.T. example of this old and common word for the slave employed in Greek and Roman families of the better class in charge of the boy from about six to sixteen. The paedagogue watched his behaviour at home and attended him when he went away from home as to school. Christ is our Schoolmaster and the law as paedagogue kept watch over us till we came to Christ.

That we might be justified by faith (ıva $\varepsilon \kappa \pi \iota \sigma \tau \varepsilon \omega \varsigma \delta \iota \kappa \alpha \iota \omega \theta \omega \mu \varepsilon v$ ). This is the ultimate purpose of the law as paedagogue.

Now that faith is come ( $\varepsilon \lambda \theta$ ou $\quad \eta \varsigma \tau \eta \varsigma \pi \iota \sigma \tau \varepsilon \omega \varsigma)$. Genitive absolute, "the faith (the time of the faith spoken of in verse 23) having come."

Under a tutor (v $\pi \frac{\pi \alpha ı}{} \delta \alpha \gamma \omega \gamma \sigma v$ ). The pedagogue is dismissed. We are in the school of the Master.

Gal 3:26
For ye are all sons of God ( $\pi \alpha \nu \tau \varepsilon \varsigma \gamma \alpha \rho$ vo $\theta \varepsilon o v \varepsilon \sigma \tau \varepsilon$ ). Both Jews and Gentiles (3:14) and in the same way "through faith in Christ Jesus" ( $\delta \iota \alpha \tau \eta \varsigma \pi \iota \sigma \tau \varepsilon \omega \varsigma \varepsilon \nu$ X $\rho \iota \sigma \tau \omega$ I $\eta \sigma o v$ ). There is no other way to become "sons of God" in the full ethical and spiritual sense that Paul means, not mere physical descendants of Abraham, but "sons of Abraham," "those by faith" (verse 7). The Jews are called by Jesus "the sons of the Kingdom" (Mt 8:12) in privilege, but not in fact. God is the Father of all men as Creator, but the spiritual Father only of those who by faith in Christ Jesus receive "adoption" (vıo $\varepsilon \varepsilon \sigma \iota \alpha$ ) into his family (verse 5; Ro 8:15,23 ). Those led by the Spirit are sons of God (Ro 8:14 ).

Gal 3:27
Were baptized into Christ ( $\varepsilon \iota \varsigma$ X $\rho \iota \sigma \tau \circ \nu \varepsilon \beta a \pi \tau \iota \sigma \theta \eta \tau \varepsilon$ ). First aorist passive indicative of $\beta \alpha \pi \tau \iota \zeta \omega$. Better, "were baptized unto Christ" in reference to Christ.

Did put on Christ (X $\mathrm{X} \iota \sigma \tau o v \varepsilon v \varepsilon \delta v \sigma a \sigma \theta \varepsilon$ ). First aorist middle indicative of $\varepsilon v \delta v \omega$ ($\nu \omega)$. As a badge or uniform of service like that of the soldier. This verb is common in the sense of putting on garments (literally and metaphorically as here). See further in Paul (Ro 13:14; Col 3:9f.; Eph 4:22-24; 6:11,14 ). In 1Th 5:8 Paul speaks of "putting on the breastplate of righteousness." He does not here mean that one enters into Christ and so is saved by means of baptism after the teaching of the mystery religions, but just the opposite. We are justified by faith in Christ, not by circumcision or by baptism. But baptism was the public profession and pledge, the soldier's sacramentum, oath of fealty to Christ, taking one's stand with Christ, the symbolic picture of the change wrought by faith already (Ro 6:4-6 ).

Gal 3:28

There can be neither (ovk $\varepsilon \nu$ ). Not a shortened form of $\varepsilon v \varepsilon \sigma \tau$, but the old lengthened form of $\varepsilon v$ with recessive accent. So ouk $\varepsilon v$ means "there is not" rather than "there cannot be," a statement of a fact rather than a possibility, as Burton rightly shows against Lightfoot.

One man ( $\varepsilon ı \varsigma)$. No word for "man" in the Greek, and yet $\varepsilon \iota \varsigma$ is masculine, not neuter $\varepsilon \nu$. "One moral personality" (Vincent). The point is that "in Christ Jesus" race or national distinctions ("neither Jew nor Greek") do not exist, class differences ("neither bond nor free," no proletarianism and no capitalism) vanish, sex rivalry ("no male and female") disappears. This radical statement marks out the path along which Christianity was to come in the sphere $(\varepsilon v)$ and spirit and power of Christ. Candour compels one to confess that this goal has not yet been fully attained. But we are on the road and there is no hope on any way than on "the Jesus Road."

Gal 3:29
If ye are Christ's ( $\varepsilon \delta \varepsilon v \mu \varepsilon ı \varsigma$ X $\rho ı \sigma \tau o v$ ). This is the test, not the accident of blood, pride of race or nation, habiliments or environment of dress or family, whether man or woman. Thus one comes to belong to the seed of Abraham and to be an heir according to promise.

## Galatians 4

Gal 4:1
So long as ( $\varepsilon \varphi^{\prime}$ ooov $\chi \rho \circ$ ovov). "For how long a time," incorporation of the antecedent ( $\chi$ povov) into the relative clause.

The heir (о $\kappa \lambda \eta \rho о v о \mu \circ \varsigma)$. Old word ( $\kappa \lambda \eta \rho \circ \varsigma$, lot, $\nu \varepsilon \mu \circ \mu \alpha$, to possess). Illustration from the law of inheritance carrying on the last thought in 3:29.

A child ( $\nu \eta \pi \ldots \varsigma)$ ). One that does not talk ( $\nu \eta, \varepsilon \pi \sigma \varsigma$, word). That is a minor, an infant, immature intellectually and morally in contrast with $\tau \varepsilon \lambda \varepsilon \iota$, full grown (1Co 3:1; 14:20; Php 3:15; Eph 4:13).

From a bondservant ( $\delta o u \lambda o v$ ). Slave. Ablative case of comparison after $\delta \lesssim \alpha \varphi \varepsilon \rho \varepsilon$ for which verb see on Mt 6:26.

Though he is lord of all (Kvpıo $\pi \alpha \nu \tau \omega \nu \omega v$ ). Concessive participle $\omega v$, "being legally owner of all" (one who has the power, o $\varepsilon \chi \omega \nu \kappa \nu \rho o \varsigma)$.

Gal 4:2
Under guardians (vпо $\varepsilon \pi \iota \tau \rho о \pi о \cup \varsigma)$. Old word from $\varepsilon \pi \iota \tau \rho \varepsilon \pi \omega$, to commit, to intrust. So either an overseer (Mt 20:8) or one in charge of children as here. It is common as the guardian of an orphan minor. Frequent in the papyri as guardian of minors.

Stewards (oוкоvоноия). Old word for manager of a household whether freeborn or slave. See Lu 12:42; 1Co 4:2. Papyri show it as manager of an estate and also as treasurer like Ro 16:23. No example is known where this word is used of one in charge of a minor and no other where both occur together.

Until the time appointed of the father ( $\alpha \chi \rho \tau \eta \varsigma \pi \rho \circ \theta \varepsilon \sigma \mu \mu \varsigma \varsigma$ тov $\pi \alpha \tau \rho \circ \varsigma$ ). Supply $\eta \mu \varepsilon \rho a \varsigma$ (day), for $\pi \rho \circ \theta \varepsilon \sigma \mu \iota \varsigma$ is an old adjective "appointed beforehand" ( $\pi \rho \circ, \theta \varepsilon \sigma \mu \circ \varsigma$, from $\tau(\theta \eta \mu)$. Under Roman law the tutor had charge of the child till he was fourteen when the curator took charge of him till he was twenty-five. Ramsay notes that in Graeco-Phrygia cities the same law existed except that the father in Syria appointed both tutor and curator whereas the Roman father appointed only the tutor. Burton argues plausibly that no such legal distinction is meant by Paul, but that the terms here designate two functions of one person. The point does not disturb Paul's illustration at all.

Gal 4:3
When we were children ( $о \tau \varepsilon \eta \mu \varepsilon v \nu \eta \pi \ldots$ ). Before the epoch of faith came and we (Jews and Gentiles) were under the law as paedagogue, guardian, steward, to use all of Paul's metaphors.

We were held in bondage ( $\eta \mu \varepsilon \iota \varsigma \eta \mu \varepsilon \theta a \delta \varepsilon \delta o u \lambda \omega \mu \varepsilon v o$ ). Periphrastic past perfect of $\delta o u \lambda o \omega$, to enslave, in a permanent state of bondage.

material elements in the universe ( $2 \mathrm{Pe} 3: 10$ ), the heavenly bodies (some argue for that here), the rudiments of any act (Heb 5:12; Ac 15:10; $\mathrm{Ga} 5: 1 ; 4: 3,9$; $\mathrm{Col} 2: 8,20$ ). The papyri illustrate all the varieties in meaning of this word. Burton has a valuable excursus on the word in his commentary. Probably here (Lightfoot) Paul has in mind the rudimentary character of the law as it applies to both Jews and Gentiles, to all the knowledge of the world (коб $\mu$ о as the orderly material universe as in Col 2:8,20 ). See on Mt 13:38; Ac 17:24; 1Co 3:22 . All were in the elementary stage before Christ came.

Gal 4:4
The fulness of the time ( $\tau$ о $\pi \lambda \eta \rho \omega \mu \alpha$ tov $\chi \rho \circ$ ovov). Old word from $\pi \lambda \eta \rho \circ \omega$, to fill. Here the complement of the preceding time as in Eph 1:10. Some examples in the papyri in the sense of complement, to accompany. God sent forth his preexisting Son (Php 2:6 ) when the time for his purpose had come like the $\pi \rho \circ \theta \varepsilon \sigma \mu \mathrm{\alpha}$ of verse 2.

Born of a woman ( $\gamma \varepsilon v o \mu \varepsilon v o v \varepsilon \kappa ~ \gamma \cup v a ı \kappa о \varsigma)$. As all men are and so true humanity, "coming from a woman." There is, of course, no direct reference here to the Virgin Birth of Jesus, but his deity had just been affirmed by the words "his Son" (tov viov autou), so that both his deity and humanity are here stated as in Ro 1:3. Whatever view one holds about Paul's knowledge of the Virgin Birth of Christ one must admit that Paul believed in his actual personal preexistence with God (2Co 8:9; Php 2:5-11), not a mere existence in idea. The fact of the Virgin Birth agrees perfectly with the language here.

Born under the law ( $\gamma \varepsilon v o \mu \varepsilon v o v ~ v \pi o ~ v o \mu o v) . ~ H e ~ n o t ~ o n l y ~ b e c a m e ~ a ~ m a n, ~ b u t ~ a ~ J e w . ~$ The purpose ( $1 v \alpha$ ) of God thus was plainly to redeem ( $\varepsilon \xi \alpha \gamma \circ \rho \alpha \sigma \eta$, as in $3: 13$ ) those under the law, and so under the curse. The further purpose (ıva) was that we (Jew and Gentile) might receive ( $\alpha \pi \sigma \lambda \alpha \beta \omega \mu \varepsilon \nu$, second aorist active subjunctive of $\alpha \pi \sigma \lambda \alpha \mu \beta \alpha \nu \omega$ ), not get back (Lu 15:27), but get from ( $\alpha \pi 0$ ) God the adoption ( $\tau \eta \nu v i o \theta \varepsilon \sigma ı \alpha v$ ). Late word common in the inscriptions (Deissmann, Bible Studies, p. 239) and occurs in the papyri also and in Diogenes Laertes, though not in LXX. Paul adopts this current term to express his idea (he alone in the N.T.) as to how God takes into his spiritual family both Jews and Gentiles who believe. See also Ro 8:15,23;9:4; Eph 1:5. The Vulgate uses adoptio filiorum. It is a metaphor like the others above, but a very expressive one.

Gal 4:6
Because ye are sons (o $\varepsilon \sigma \tau \varepsilon v \ldots$ ). This is the reason for sending forth the Son ( 4:4 and here). We were "sons" in God's elective purpose and love. Hot is causal (1Co 12:15; Ro 9:7 ).

The Spirit of his Son ( $\tau \mathrm{\pi} \pi \varepsilon \varepsilon \cup \mu \alpha$ tov voo avtov). The Holy Spirit, called the Spirit of Christ (Ro 8:9f. ), the Spirit of Jesus Christ (Php 1:19). The Holy Spirit proceeds from the Father and from the Son (Joh 15:26).

Crying, Abba, Father ( $\kappa \rho \alpha \zeta$ оv A $\beta \beta \alpha$ o $\pi \alpha \tau \eta \rho$ ). The participle agrees with $\pi \nu \varepsilon v \mu \alpha$ neuter (grammatical gender), not neuter in fact. An old, though rare in present as here,
onomatopoetic word to croak as a raven (Theophrastus, like Poe's The Raven), any inarticulate cry like "the unuttered groanings" of Ro 8:26 which God understands. This cry comes from the Spirit of Christ in our hearts. $A \beta \beta \alpha$ is the Aramaic word for father with the article and o $\pi \alpha \tau \eta \rho$ translates it. The articular form occurs in the vocative as in Joh 20:28 . It is possible that the repetition here and in Ro 8:15 may be "a sort of affectionate fondness for the very term that Jesus himself used" (Burton) in the Garden of Gethsemane (Mr 14:36). The rabbis preserve similar parallels. Most of the Jews knew both Greek and Aramaic. But there remains the question why Jesus used both in his prayer. Was it not natural for both words to come to him in his hour of agony as in his childhood? The same thing may be true here in Paul's case.

Gal 4:7
No longer a bondservant (ouket $\delta o u \lambda o \varsigma)$. Slave. He changes to the singular to drive the point home to each one. The spiritual experience ( 3:2) has set each one free. Each is now a son and heir.

Gal 4:8
To them which by nature are not gods ( $\tau \circ \iota \varsigma \varphi \cup \sigma \varepsilon \mu \eta$ ovo $\theta \varepsilon o \iota \varsigma)$. In 1Co 10:20 he terms them "demons," the "so-called gods" (1Co 8:5 ), worshipping images made by hands (Ac 17:29).

Gal 4:9
Now that ye have come to know God ( $v v v \delta \varepsilon \gamma v o v \tau \varepsilon \varsigma)$. Fine example of the ingressive second aorist active participle of $\gamma \iota \nu \omega \sigma \kappa \omega$, come to know by experience through faith in Christ.

Rather to be known of God ( $\mu \alpha \lambda \lambda о v \delta \varepsilon \gamma v \omega \sigma \theta \varepsilon v \tau \varepsilon \varsigma \nu \pi \sigma \theta \varepsilon \sigma v$ ). First aorist passive participle of the same verb. He quickly turns it round to the standpoint of God's elective grace reaching them (verse 6).

How ( $\pi \omega \varsigma$ ). "A question full of wonder" (Bengel). See 1:6.
Turn ye back again? ( $\varepsilon \pi \iota \sigma \tau \rho \varepsilon \varphi \varepsilon \tau \varepsilon \pi \alpha \lambda \iota \nu$ ?). Present active indicative, "Are ye turning again?" See $\mu \varepsilon \tau \alpha \tau \iota \theta \varepsilon \sigma \theta \varepsilon$ in 1:6.

The weak and beggarly rudiments ( $\tau \alpha \alpha \sigma \theta \varepsilon v \eta \kappa \alpha \pi \tau \omega \chi \alpha \sigma \tau o \downarrow \chi \varepsilon 1 \alpha$ ). The same $\sigma \tau о \not \chi \varepsilon ı \alpha$ in verse 3 from which they had been delivered, "weak and beggarly," still in their utter impotence from the Pharisaic legalism and the philosophical and religious legalism and the philosophical and religious quests of the heathen as shown by Angus's The Religious Quests of the Graeco-Roman World. These were eagerly pursued by many, but they were shadows when caught. It is pitiful today to see some men and women leave Christ for will o' the wisps of false philosophy.

Over again ( $\pi \alpha \lambda \iota v \alpha v \omega \theta \varepsilon v$ ). Old word, from above ( $\alpha v \omega$ ) as in Mt 27:51, from the first (Lu 1:3), then "over again" as here, back to where they were before (in slavery to rites and rules).

Gal 4:10
Ye observe ( $\pi \alpha \rho \alpha \tau \eta \rho \varepsilon \iota \sigma \theta \varepsilon$ ). Present middle indicative of old verb to stand beside and watch carefully, sometimes with evil intent as in Lu 6:7, but often with scrupulous care as here (so in Dio Cassius and Josephus). The meticulous observance of the Pharisees Paul knew to a nicety. It hurt him to the quick after his own merciful deliverance to see these Gentile Christians drawn into this spider-web of Judaizing Christians, once set free, now enslaved again. Paul does not itemize the "days" (Sabbaths, fast-days, feast-days, new moons) nor the "months" (Isa 66:23) which were particularly observed in the exile nor the "seasons" (passover, pentecost, tabernacles, etc.) nor the "years" (sabbatical years every seventh year and the Year of Jubilee). Paul does not object to these observances for he kept them himself as a Jew. He objected to Gentiles taking to them as a means of salvation.

Gal 4:11
I am afraid of you ( $\varphi o \beta o v \mu \alpha \nu \mu a \varsigma)$. He shudders to think of it.
Lest by any means I have bestowed labour upon you in vain ( $\mu \eta \pi \omega \varsigma \varepsilon ו \kappa \eta ~ \kappa \varepsilon \kappa о \pi \iota \alpha \kappa \alpha$ $\varepsilon ı \varsigma \nu \mu a \varsigma)$. Usual construction after a verb of fearing about what has actually happened ( $\mu \eta$ $\pi \omega \varsigma$ and the perfect active indicative of $\kappa о \pi \omega \omega \omega$, to toil wearily). A fear about the future would be expressed by the subjunctive. Paul fears that the worst has happened.

Gal 4:12
Be as I am ( $\gamma \iota v \varepsilon \sigma \theta \varepsilon \omega \varsigma \varepsilon \gamma \omega)$. Present middle imperative, "Keep on becoming as I am." He will not give them over, afraid though he is.

Gal 4:13
Because of an infirmity of the flesh ( $\delta \delta^{\prime} \alpha \sigma \theta \varepsilon v \varepsilon ⿺ 辶 \nu \tau \eta \varsigma \sigma \alpha \rho \kappa о \varsigma$ ). All that we can get from this statement is the fact that Paul's preaching to the Galatians "the first time" or "the former time" ( $\tau$ o $\pi \rho \circ \tau \varepsilon \rho o v$, adverbial accusative) was due to sickness of some kind whether it was eye trouble ( 4:15) which was a trial to them or to the thorn in the flesh (2Co 12:7) we do not know. It can be interpreted as applying to North Galatia or to South Galatia if he had an attack of malaria on coming up from Perga. But the narrative in Ac 13; 14 does not read as if Paul had planned to pass by Pisidia and by Lycaonia but for the attack of illness. The Galatians understood the allusion for Paul says "Ye know" (ot $\delta a \tau \varepsilon$ ).

Gal 4:14
A temptation to you in my flesh ( $\tau 0 v \pi \varepsilon \iota \rho a \sigma \mu \circ v \nu \mu \omega \nu \varepsilon \nu \tau \eta \sigma \alpha \rho \kappa \mu \circ v$ ). "Your temptation (or trial) in my flesh." Peirasmon can be either as we see in Jas 1:2,12f. . If trial here, it was a severe one.

Nor rejected (ov $\delta \varepsilon \xi \varepsilon \pi \tau \cup \sigma \alpha \tau \varepsilon$ ). First aorist active indicative of $\varepsilon \kappa \pi \tau v \omega$, old word to spit out (Homer), to spurn, to loathe. Here only in N.T. Clemen (Primitive Christianity, p. 342) thinks it should be taken literally here since people spat out as a prophylactic custom at the sight of invalids especially epileptics. But Plutarch uses it of mere rejection.

As an angel of God ( $\omega \varsigma \alpha \gamma \gamma \varepsilon \lambda o v \theta \varepsilon o v$ ),
as Christ Jesus ( $\omega \varsigma$ X $\rho ı \sigma \tau o v$ I $\eta \sigma o v v$ ). In spite of his illness and repulsive appearance, whatever it was. Not a mere "messenger" of God, but a very angel, even as Christ Jesus. We know that at Lystra Paul was at first welcomed as Hermes the god of oratory (Ac 14:12f. ). But that narrative hardly applies to these words, for they turned against Paul and Barnabas then and there at the instigation of Jews from Antioch in Pisidia and Iconium.

Gal 4:15
That gratulation of yourselves (o $\mu \alpha \kappa \alpha \rho \iota \sigma \mu \circ \varsigma \nu \mu \omega v$ ). "Your felicitation." Rare word from $\mu \alpha \kappa \alpha \rho \iota \zeta \omega$, to pronounce happy, in Plato, Aristotle, Plutarch. See also Ro 4:6,9 . You no longer felicitate yourselves on my presence with you.

Ye would have plucked out your eves and given them to me ( $\tau 0 v \varsigma ~ o \varphi \theta a \lambda \mu \sigma \nu \varsigma \nu \mu \omega \nu$ $\varepsilon \xi \circ \rho \cup \xi \alpha \nu \tau \varepsilon \varsigma \varepsilon \delta \omega \kappa \alpha \tau \varepsilon \mu \circ$ ). This is the conclusion of a condition of the second class without av expressed which would have made it clearer. But see Joh 16:22,24; Ro 7:7 for similar examples where the context makes it plain without $\alpha v$. It is strong language and is saved from hyperbole by "if possible" ( $\varepsilon$ סuvatov). Did Paul not have at this time serious eye trouble?

Gal 4:16
Your enemy ( $\varepsilon \chi \theta \rho o \varsigma v \mu \omega v)$. Active sense of $\varepsilon \chi \theta \rho o \varsigma$, hater with objective genitive. They looked on Paul now as an enemy to them. So the Pharisees and Judaizers generally now regarded him.

Because I tell you the truth ( $\alpha \lambda \eta \theta \varepsilon v \omega v \nu \mu \nu v$ ). Present active participle of $\alpha \lambda \eta \theta \varepsilon v \omega$, old verb from $\alpha \lambda \eta \theta \eta \varsigma$, true. In N.T. only here and Eph 4:15. "Speaking the truth." It is always a risky business to speak the truth, the whole truth. It may hit and hurt.

Gal 4:17
They zealously seek you ( $\zeta \eta \lambda$ ovaıv $v \mu \alpha \varsigma)$. $\mathrm{Z} \mathrm{\eta} \lambda \frac{1}{} \omega$ is an old and a good word from $\zeta \eta \lambda o \varsigma$ (zeal, jealousy), but one can pay court with good motives or evil. So here in contrast with Paul's plain speech the Judaizers bring their fawning flattery.

To shut you out ( $\varepsilon \kappa \kappa \lambda \varepsilon ו \sigma \alpha ~ v \mu \alpha \varsigma) . ~ F r o m ~ C h r i s t ~ a s ~ h e ~ w i l l ~ s h o w ~(~ 5: 4) . ~$
That ye may seek them (ıva autous $\lceil\eta \lambda$ оute). Probably present active indicative with $\iota v \alpha$ as in $\varphi \cup \sigma \iota \sigma \sigma \theta \varepsilon$ (1Co 4:6) and $\gamma \iota \nu \omega \sigma \kappa \circ \mu \varepsilon \nu$ (1Jo 5:20). The contraction -o $\eta \tau \varepsilon$ would be $-\omega \tau \varepsilon$, not -oute (Robertson, Grammar, p. 325).

Gal 4:18
To be zealously sought in a good matter ( $\zeta \eta \lambda o v \sigma \theta \alpha \varepsilon v \kappa \alpha \lambda \omega)$. Present passive infinitive. It is only in an evil matter that it is bad as here (ov ка入оৎ).

When I am present ( $\varepsilon v \tau \omega \pi \alpha \rho \varepsilon ı v \alpha \mu \varepsilon$ ). "In the being present as to me."
Gal 4:19
I am in travail $(\omega \delta \delta \nu \omega)$. I am in birth pangs. Old word for this powerful picture of pain. In N.T. only here, verse 27; Re 12:2 .

Until Christ be formed in you ( $\mu \varepsilon \chi \rho \iota \varsigma$ ои $\mu о \rho \varphi \omega \theta \eta$ X $\operatorname{\rho \iota \sigma \tau о\varsigma ~} \varepsilon v \nu \mu \nu v$ ). Future temporal clause with $\mu \varepsilon \chi \rho \iota \varsigma$ ov (until which time) and the first aorist passive subjunctive of $\mu о \rho \varphi о \omega$,
late and rare verb, in Plutarch, not in LXX, not in papyri, only here in N.T. This figure is the embryo developing into the child. Paul boldly represents himself as again the mother with birth pangs over them. This is better than to suppose that the Galatians are pregnant mothers (Burton) by a reversal of the picture as in 1Th 2:7.

Gal 4:20
I could with ( $\eta \theta \varepsilon \lambda o v$ ). Imperfect active, I was wishing like Agrippa's use of $\varepsilon \beta o v \lambda o \mu \eta v$ in Ac 25:22 , "I was just wishing. I was longing to be present with you just now ( $\alpha \rho \tau$ )."

To change my voice ( $\alpha \lambda \lambda \alpha \xi \alpha \tau \eta \nu \varphi \omega v \eta \nu \mu \circ v$ ). Paul could put his heart into his voice. The pen stands between them. He knew the power of his voice on their hearts. He had tried it before.

I am perplexed $(\alpha \pi \sigma \rho o v \mu \alpha)$. I am at a loss and know not what to do. A $\pi$ o $\varepsilon \varepsilon \omega$ is from a privative and $\pi о \rho \circ \varsigma$, way. I am lost at this distance from you.

About you ( $\varepsilon v \nu \mu \nu v$ ). In your cases. For this use of $\varepsilon v$ see 2Co 7:16; Ga 1:24.
Gal 4:21
 as in 3:23; 4:4, legalistic system. Paul views them as on the point of surrender to legalism, as "wanting" ( $\theta \varepsilon \lambda$ ovtec) to do it ( $1: 6 ; 3: 3 ; 4: 11,17$ ). Paul makes direct reference to these so disposed to "hear the law." He makes a surprising turn, but a legitimate one for the legalists by an allegorical use of Scripture.

Gal 4:22
By the handmaid ( $\varepsilon \kappa \tau \eta \varsigma \pi \alpha \iota \delta \iota \sigma \kappa \eta \varsigma)$. From Ge 16:1 . Feminine diminutive of $\pi \alpha \iota \varsigma$, boy or slave. Common word for damsel which came to be used for female slave or maidservant (Lu 12:45) or doorkeeper like Mt 26:29. So in the papyri.

Gal 4:23
Is born ( $\gamma \varepsilon \gamma \varepsilon v \nu \eta \tau \alpha)$. Perfect passive indicative of $\gamma \varepsilon v v \alpha \omega$, stand on record so.
Through promise ( $\left.\delta \iota^{\prime} \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda ı \alpha \varsigma\right)$. In addition to being "after the flesh" (ката $\sigma \alpha \rho \kappa \alpha$ ). Gal 4:24
Which things contain an allegory ( $\alpha \tau \iota v \alpha \varepsilon \sigma \tau \iota v \alpha \lambda \lambda \eta \gamma \circ \rho o v \mu \varepsilon v \alpha$ ). Literally, "Which things are allegorized" (periphrastic present passive indicative of $\alpha \lambda \lambda \eta \gamma>\rho \varepsilon \omega$ ). Late word (Strabo, Plutarch, Philo, Josephus, ecclesiastical writers), only here in N.T. The ancient writers used $\alpha \iota v \iota \tau \tau o \mu \alpha$ to speak in riddles. It is compounded of $\alpha \lambda \lambda 0$, another, and $\alpha \gamma \circ \rho \varepsilon v \omega$, to speak, and so means speaking something else than what the language means, what Philo, the past-master in the use of allegory, calls the deeper spiritual sense. Paul does not deny the actual historical narrative, but he simply uses it in an allegorical sense to illustrate his point for the benefit of his readers who are tempted to go under the burden of the law. He puts a secondary meaning on the narrative just as he uses $\tau 0 \pi \iota \kappa \omega \varsigma$ in 1Co 10:11 of the narrative. We need not press unduly the difference between allegory and type, for each is used in a variety of ways. The allegory in one sense is a speaking parable like Bunyan's Pilgrim's

Progress, the Prodigal Son in Lu 15 , the Good Shepherd in Joh 10 . But allegory was also used by Philo and by Paul here for a secret meaning not obvious at first, one not in the mind of the writer, like our illustration which throws light on the point. Paul was familiar with this rabbinical method of exegesis (Rabbi Akiba, for instance, who found a mystical sense in every hook and crook of the Hebrew letters) and makes skilful use of that knowledge here. Christian preachers in Alexandria early fell victims to Philo's allegorical method and carried it to excess without regard to the plain sense of the narrative. That startling style of preaching survives yet to the discredit of sound preaching. Please observe that Paul says here that he is using allegory, not ordinary interpretation. It is not necessary to say that Paul intended his readers to believe that this allegory was designed by the narrative. He illustrates his point by it.

For these are ( $\alpha v \tau \alpha \gamma \alpha \rho \varepsilon \iota \sigma เ v$ ). Allegorically interpreted, he means.
From Mount Sinai ( $\alpha \pi 0$ opovs $\Sigma i v \alpha$ ). Spoken from Mount Sinai.
Bearing ( $\gamma \varepsilon v \nu \omega \sigma \alpha$ ). Present active participle of $\gamma \varepsilon v v a \omega$, to beget of the male (Mt 1:1-16 ), more rarely as here to bear of the female ( $\operatorname{Lu} 1: 13,57$ ).

Which is Hagar ( $\eta \tau \iota \varsigma$ e $\sigma \tau \imath v$ H $\alpha \gamma \alpha \rho$ ). Allegorically interpreted.
Gal 4:25
This Hagar ( $\tau \mathrm{H} H \alpha \gamma \alpha \rho$ ). Neuter article and so referring to the word Hagar (not to the woman, $\eta$ Hagar) as applied to the mountain. There is great variety in the MSS. here. The Arabians are descendants of Abraham and Hagar (her name meaning wanderer or fugitive).

Answereth to ( $\sigma \cup v \tau 0 \chi \chi)$. Late word in Polybius for keeping step in line (military term) and in papyri in figurative sense as here. Lightfoot refers to the Pythagorean parallels of opposing principles ( $\sigma 0 v \sigma \tau o \not x i \alpha)$ as shown here by Paul (Hagar and Sarah, Ishmael and Isaac, the old covenant and the new covenant, the earthly Jerusalem and the heavenly Jerusalem). That is true, and there is a correlative correspondence as the line is carried on.

Gal 4:26
The Jerusalem that is above ( $\eta \alpha v \omega$ I $\varepsilon \rho o v \sigma \alpha \lambda \eta \mu$ ). Paul uses the rabbinical idea that the heavenly Jerusalem corresponds to the one here to illustrate his point without endorsing their ideas. See also Re 21:2. He uses the city of Jerusalem to represent the whole Jewish race (Vincent).

Gal 4:27
Which is our mother ( $\eta \tau \iota \varsigma \varepsilon \sigma \tau \iota v \mu \eta \tau \eta \rho \eta \mu \omega v$ ). The mother of us Christians, apply the allegory of Hagar and Sarah to us. The Jerusalem above is the picture of the Kingdom of God. Paul illustrates the allegory by quoting Isa 54:1 , a song of triumph looking for deliverance from a foreign yoke.

Rejoice ( $\varepsilon \cup \varphi \rho \alpha v \theta \eta \tau)$. First aorist passive imperative of $\varepsilon u \varphi \rho \alpha \iota v \omega$.
Break forth ( $\rho \eta \xi \circ v$ ). First aorist active imperative of $\rho \eta \gamma v v \mu$, to rend, to burst asunder. Supply $\varepsilon \cup \varphi \rho o \sigma u v \eta v$ (joy) as in Isa 49:13 .

The desolate ( $\tau \eta \varsigma \varepsilon \rho \eta \mu \circ v$ ). The prophet refers to Sarah's prolonged barrenness and Paul uses this fact as a figure for the progress and glory of Christianity (the new Jerusalem of freedom) in contrast with the old Jerusalem of bondage (the current Judaism). His thought has moved rapidly, but he does not lose his line.

Gal 4:28
Now we ( $\eta \mu \varepsilon \iota \varsigma \delta \varepsilon$ ). Some MSS. have $v \mu \varepsilon \iota \varsigma \varepsilon \varepsilon$ (now ye). In either case Paul means that Christians (Jews and Gentiles) are children of the promise as Isaac was (ката Iбаак, after the manner of Isaac).

Gal 4:29
Persecuted ( $\varepsilon \delta \omega \kappa \kappa \varepsilon$ ). Imperfect active of $\delta \omega \omega \kappa \omega$, to pursue, to persecute. Ge 21:9 has in Hebrew "laughing," but the LXX has "mocking." The Jewish tradition represents Ishmael as shooting arrows at Isaac.

So now (outoc $\kappa \alpha \operatorname{vvv}$ ) the Jews were persecuting Paul and all Christians (1Th 2:15f. ).

Gal 4:30
Cast out ( $\varepsilon \kappa \beta \alpha \lambda \varepsilon$ ). Second aorist active imperative of $\varepsilon \kappa \beta \alpha \lambda \lambda \omega$. Quotation from Ge 21:10 (Sarah to Abraham) and confirmed in 21:12 by God's command to Abraham. Paul gives allegorical warning thus to the persecuting Jews and Judaizers.

Shall not inherit ( $o v \mu \eta \kappa \lambda \eta \rho \circ v o \mu \eta \sigma \varepsilon$ ). Strong negative ( $o v \mu \eta$ and future indicative). "The law and the gospel cannot co-exist. The law must disappear before the gospel" (Lightfoot). See 3:18,29 for the word "inherit."

Gal 4:31
But of the freewoman ( $\alpha \lambda \lambda \alpha \tau \eta \varsigma \varepsilon \lambda \varepsilon v \theta \varepsilon \rho \alpha \varsigma$ ). We are children of Abraham by faith ( 3:7).

## Galatians 5

Gal 5:1
With freedom ( $\tau \eta \varepsilon \lambda \varepsilon u \theta \varepsilon \rho ı \alpha)$. Rather dative case instead of instrumental, "for freedom," "for the (article) freedom that belongs to us children of the freewoman" ( 4:31).

Did Christ set us free ( $\eta \mu \alpha \varsigma X \rho \prime \sigma \tau о \varsigma ~ \eta \lambda \varepsilon v \theta \varepsilon \rho \omega \sigma \varepsilon v)$. Effective aorist active indicative of $\varepsilon \lambda \varepsilon v \theta \varepsilon \rho \circ \omega$ (from $\varepsilon \rho \chi \circ \mu \alpha$, to go, go free).

Stand fast therefore ( $\sigma \tau \eta \kappa \varepsilon \tau \varepsilon$ ouv). See on Mr 3:31; 1Co 16:13 for this late word from perfect stem of $\iota \sigma \tau \eta \mu$, "keep on standing therefore," "stay free since Christ set you free."

Be not entangled again ( $\mu \eta \pi \alpha \lambda \iota \nu \varepsilon v \varepsilon \chi \varepsilon \sigma \theta \varepsilon)$ ). "Stop being held in by a yoke of bondage." Common word for ensnare by trap. The Judaizers were trying to lasso the Galatians for the old yoke of Judaism.

Gal 5:2
I Paul ( $\varepsilon \gamma \omega$ Пav $\bar{\circ}$ ). Asserts all his personal and apostolic authority. For both words see also 1Th 2:16; 2Co 10:1; Col 1:23; Eph 3:1 .

If ye receive circumcision ( $\varepsilon \alpha \nu \pi \varepsilon \rho \iota \tau \varepsilon \mu \nu \eta \sigma \theta \varepsilon$ ). Condition of third class and present passive subjunctive, a supposable case, but with terrible consequences, for they will make circumcision a condition of salvation. In that case Christ will help them not at all.

Gal 5:3
A debtor ( $\circ \varphi \varepsilon \iota \lambda \varepsilon \tau \eta \varsigma$ ). Common word from $0 \varphi \varepsilon \wedge \lambda \omega$, to owe for one who has assumed an obligation. See on Mt 6:12. See Ga 3:10. He takes the curse on himself.

Gal 5:4
 катарүє $\omega$, to make null and void as in Ro 7:2,6.
 ative indicative, "ye who are trying to be justified in the law."

Ye are fallen away from grace ( $\tau \eta \varsigma \chi \alpha \rho \iota \tau \circ \varsigma \varepsilon \xi \varepsilon \pi \varepsilon \sigma \alpha \tau \varepsilon$ ). Second aorist active indicative of $\varepsilon \kappa \pi \iota \pi \tau \omega$ (with $\alpha$ variable vowel of the first aorist) and followed by the ablative case. "Ye did fall out of grace," "ye left the sphere of grace in Christ and took your stand in the sphere of law" as your hope of salvation. Paul does not mince words and carries the logic to the end of the course. He is not, of course, speaking of occasional sins, but he has in mind a far more serious matter, that of substituting law for Christ as the agent in salvation.

Gal 5:5
For we ( $\eta \mu \varepsilon ı \varsigma ~ \gamma \alpha \rho$ ). We Christians as opposed to the legalists.
Through the Spirit by faith ( $\pi \nu \varepsilon \cup \mu \alpha \tau \varepsilon \kappa \pi \iota \sigma \tau \varepsilon \omega \varsigma)$. By the Spirit (Holy Spirit) out of faith (not law). Clear-cut repetition to make it plain.

Gal 5:6
 Jew nor Greek has any recommendation in his state. See 3:28. All stand on a level in Christ.

Faith working through love ( $\left.\pi \iota \sigma \tau \iota \varsigma \delta \iota^{\prime} \alpha \gamma \alpha \pi \eta \varsigma \varepsilon v \varepsilon \rho \gamma о \cup \mu \varepsilon v \eta\right)$. Middle voice of $\varepsilon v \varepsilon \rho \gamma \varepsilon \omega$ and "through love," "the moral dynamic" (Burton) of Paul's conception of freedom from law.

Gal 5:7
Who did hinder you? ( $\tau \iota \varsigma \nu \mu \propto \varsigma \varepsilon \varepsilon \varepsilon \kappa \circ \psi \varepsilon v$ ?). First aorist active indicative of $\varepsilon v \kappa о \pi \tau \omega$, to cut in on one, for all the world like our use of one cutting in on us at the telephone. For this late verb see on Ac 24:4; 1Th 2:18. Note the singular $\tau \iota \varsigma$. There was some ringleader in the business. Some one "cut in" on the Galatians as they were running the Christian race and tried to trip them or to turn them.

Gal 5:8
This persuasion ( $\eta \pi \varepsilon เ \sigma \mu \circ v \eta$ ). "The art of persuasion," the effort of the Judaizers to persuade you. Only here and in ecclesiastical writers.

Gal 5:9
This proverb Paul has in 1Co 5:6. It is merely the pervasive power of leaven that is involved in the proverb as in Mt 13:33, not the use of leaven as a symbol of evil.

Gal 5:10
Whosoever he be (oбтıc $\varepsilon \alpha \vee \eta$ ). Indefinite relative clause with $\varepsilon a v$ and subjunctive. It seems unlikely that Paul knew precisely who the leader was. In 1:6 he uses the plural of the same verb тарaбб $\omega$ and see also avaбтатоuvtec in verse 12.

Gal 5:11
Why am I still persecuted? ( $\tau \varepsilon \tau \delta \iota \omega \kappa о \mu \alpha t ?$ ). Some of the Judaizers even circulated the slander that Paul preached circumcision in order to ruin his influence.

Gal 5:12
I would ( $o \varphi \varepsilon \lambda o v$ ). Would that, used as conjunction in wishes. See on 1Co 4:2; 2Co 11:1 . Here a wish about the future with future indicative.
 from one's abode, and in papyri in this sense as well as in sense of upsetting or disturbing one's mind (boy's letter) as here. In Ac 17:6; 21:38 we have it in sense of making a commotion.

Cut themselves off ( $\alpha \pi о к о \psi о v \tau \alpha$ ). Future middle of $\alpha \pi о к о \pi \tau \omega$, old word to cut off as in Ac 27:32, here to mutilate.

Gal 5:13
Ye were called for freedom ( $\varepsilon \pi^{\prime} \varepsilon \lambda \varepsilon v \theta \varepsilon \rho \prime \alpha \varepsilon \kappa \lambda \eta \theta \eta \tau \varepsilon$ ). The same point as in 5:1 made plainer by the use of $\varepsilon \pi^{\prime}$ (on the basis of, for the purpose of). See 1Th 4:7 for this use of $\varepsilon \pi$.

Only use not ( $\mu$ оvov $\mu \eta$ ). No word for "use" in the Greek. Probably supply $\tau \rho \varepsilon \pi \varepsilon \tau \varepsilon$ or $\sigma \tau \rho \varepsilon \varphi \varepsilon \varepsilon \varepsilon$, "turn not your liberty into an occasion for the flesh" ( $\varepsilon \varsigma \varsigma \alpha \varphi о \rho \mu \eta \nu \tau \eta \sigma \alpha \rho \kappa$ ), as a spring board for license. On $\alpha \varphi \rho \rho \mu \eta$, see on 2Co 5:12 . Liberty so easily turns to license.

## Gal 5:14

Even in this ( $\varepsilon v \tau \omega)$. Just the article with $\varepsilon v$, "in the," but it points at the quotation from Le 19:18. Jews (Lu 10:29) confined "neighbour" ( $\pi \lambda \eta \sigma \circ \circ v$ ) to Jews. Paul uses here a striking paradox by urging obedience to the law against which he has been arguing, but this is the moral law as proof of the new love and life. See also Ro 13:8, precisely as Jesus did (Mt 22:40 ).

## Gal 5:15

If ye bite and devour one another ( $\varepsilon \alpha \lambda \lambda \eta \lambda$ оuc $\delta \alpha \kappa v \varepsilon \tau \varepsilon \kappa \alpha \kappa \alpha \tau \varepsilon \sigma \theta เ \varepsilon \tau \varepsilon$ ). Condition of first class assumed as true. Two common and old verbs often used together of wild animals, or like cats and dogs.

That ye be not consumed one of another ( $\mu \eta v \pi^{\prime} \alpha \lambda \lambda \eta \lambda \omega v \alpha v a \lambda \omega \theta \eta \tau \varepsilon$ ). Negative final clause with first aorist passive subjunctive of $\alpha v a \lambda \_\sigma \kappa \omega$, old word to consume or spend. In N.T. only here and Lu 9:54. There is a famous story of two snakes that grabbed each other by the tail and each swallowed the other.

Gal 5:16
Ye shall not fulfil (ov $\mu \eta \tau \varepsilon \lambda \varepsilon \sigma \eta \tau \varepsilon$ ). Rather, "Ye will not fulfil." Strong double negative with aorist active subjunctive.

The lust of the flesh ( $\varepsilon \pi \imath \theta v \mu \boldsymbol{\alpha} v \sigma \alpha \rho \kappa о \varsigma)$. Bad sense here as usual in Paul, but not so in 1Th 2:17; Php 1:23. The word is just craving or longing (from $\varepsilon \pi \iota, \theta v \mu \circ \varsigma$, yearning after).

Gal 5:17
Lusteth against ( $\varepsilon \pi \iota \theta \cup \mu \varepsilon \kappa \alpha \tau \alpha)$. Like a tug of war. This use of $\sigma \alpha \rho \xi$ as opposed to the Spirit (Holy Spirit) personifies $\sigma \alpha \rho \xi$. Lightfoot argues that $\varepsilon \pi \imath \theta \nu \mu \varepsilon$ cannot be used with the Spirit and so some other verb must be supplied for it. But that is wholly needless, for the verb, like $\varepsilon \pi \iota \theta \cup \mu \iota a$, does not mean evil desire, but simply to long for. Christ and Satan long for the possession of the city of Man Soul as Bunyan shows.

Are contrary the one to the other ( $\alpha \lambda \lambda \eta \lambda$ oıs $\alpha v \tau \iota \kappa \varepsilon \iota \tau \alpha$ ). Are lined up in conflict, face to face ( $\alpha v \tau \tau-$ ), a spiritual duel (cf. Christ's temptations), with dative case of personal interest ( $\alpha \lambda \lambda \eta \lambda$ оıс).

That ye may not do (iva $\mu \eta \pi$ оoŋ $\tau \varepsilon$ ). "That ye may not keep on doing" (present active subjunctive of $\pi \cot \omega$ ).

That ye would ( $\alpha \operatorname{\varepsilon av} \theta \varepsilon \lambda \eta \tau \varepsilon$ ). "Whatever ye wish" (indefinite relative with $\varepsilon \alpha v$ and present subjunctive).

Gal 5:18
Under the law (vло vouov). Instead of "under the flesh" as one might expect. See Ga 3:2-6 for contrast between law and spirit. The flesh made the law weak (Rom 8:3; Heb 9:10,13 ). They are one and the same in result. See same idea in Ro 8:14. Note present tense of $\alpha \gamma \varepsilon \sigma \theta \varepsilon$ (if you are continually led by the Spirit). See verse 23.

Gal 5:19

Manifest ( $\varphi \alpha v \varepsilon \rho \alpha$ ). Opposed to "hidden" ( $\kappa \rho \cup \pi \tau \alpha$ ). Ancient writers were fond of lists of vices and virtues. Cf. Stalker's sermons on The Seven Cardinal Virtues and The Seven Deadly Sins. There are more than seven in this deadly list in verses 19-21. He makes the two lists in explanation of the conflict in verse 17 to emphasize the command in verses 13 f . There are four groups in Paul's list of manifest vices: (I) Sensual sins like fornication ( $\pi \mathbf{\rho} \boldsymbol{\rho \varepsilon \varepsilon} \downarrow$, prostitution, harlotry), uncleanness ( $\alpha \kappa \alpha \theta \alpha \rho \sigma \iota \alpha$, moral impurity), lasciviousness ( $\alpha \sigma \varepsilon \lambda \gamma \varepsilon \iota \alpha$, wantonness), sexual vice of all kinds prevailed in heathenism. (2) Idolatry ( $\varepsilon \delta \delta \omega \lambda \alpha \tau \rho \varepsilon \alpha$, worship of idols) and witchcraft ( $\varphi \boldsymbol{\rho \mu} \boldsymbol{\alpha \varepsilon \iota \alpha ~ f r o m ~ ч а р \mu а к о v , ~ a ~ d r u g , ~ t h e ~ m i n i s t e r i n g ~ o f ~}$ drugs), but the sorcerers monopolized the word for a while in their magical arts and used it in connection with idolatry. In N.T. only here and Re 18:23. See Ac 19:19 $\pi \varepsilon \rho \mid \varepsilon \rho \gamma \alpha$, curious arts. (3) Personal relations expressed by eight words, all old words, sins of the spirit, like enmities ( $\varepsilon \xi \theta \rho \alpha$, personal animosities), strife ( $\varepsilon \rho \iota \varsigma$, rivalry, discord), jealousies ( $\zeta \eta \lambda o \varsigma$ or $\zeta \eta \lambda 0$, MSS. vary, our very word), wraths ( $\theta \nu \mu \mathrm{o}$, stirring emotions, then explosions), factions ( $\varepsilon \rho \iota \theta \varepsilon \iota \alpha$, from $\varepsilon \rho ı \theta$ oc, day labourer for hire, worker in wool, party spirit), divisions ( $\delta \not \chi 0 \sigma \tau \alpha \sigma \iota \alpha$, splits in two, $\delta \iota \chi \alpha$ and $\sigma \tau \alpha \sigma \iota)$ ), heresies (aı $\rho \varepsilon \sigma \varepsilon \iota$, , the very word, but really choosings from aı $\rho$ عo $\mu \alpha$, preferences), envyings ( $\varphi$ Oovo, feelings of ill-will). Surely a lively list. (4)

Drunkenness ( $\mu \varepsilon \theta \alpha$, old word and plural, drunken excesses, in N.T. only here and Lu 21:34; Ro 13:13 ), revellings ( $\kappa \omega \mu \mathrm{o}$, old word also for drinking parties like those in honour of Bacchus, in N.T. only here and Ro 13:13; 1Pe 4:3 ).

And such like (ка та оноь $\alpha$ тov тoı). And the things like these (associative instrumental toutoıs after ouota, like). It is not meant to be exhaustive, but it is representative.

Gal 5:21
Forewarn ( $\pi \rho \circ \lambda \varepsilon \gamma \omega$ )
--did forewarn ( $\pi \rho о \varepsilon \iota \pi \frac{}{}$ ). Paul repeats his warning given while with them. He did his duty then. Gentile churches were peculiarly subject to these sins. But who is not in danger from them?

Practise ( $\pi \rho \alpha \sigma \sigma 0 v \tau \varepsilon \varsigma) . \Pi \rho \alpha \sigma \sigma \omega$ is the verb for habitual practice (our very word, in fact), not $\pi$ tote $\omega$ for occasional doing. The
habit of these sins is proof that one is not in the Kingdom of God and will not inherit it.

Gal 5:22
The fruit of the Spirit (о картоऽ $\tau о v \pi v \varepsilon v \mu \alpha \tau о \varsigma)$. Paul changes the figure from
works $(\varepsilon \rho \gamma \alpha)$ in verse 19 to fruit as the normal out-cropping of the Holy Spirit in us. It is a beautiful tree of fruit that Paul pictures here with nine luscious fruits on it:

Love ( $\alpha \gamma \alpha \pi \eta$ ). Late, almost Biblical word. First as in 1Co 13 , which see for discussion as superior to $\varphi\rangle \lambda \iota \alpha$ and $\varepsilon \rho \omega \varsigma$.

Joy ( $\chi \alpha \rho \alpha$ ). Old word. See on 1Th 1:6.

Peace $(\varepsilon \varsigma \eta \nu \eta)$. See on 1Th 1:1.
Long-suffering ( $\mu \alpha \kappa \rho о \theta v \mu \iota \alpha$ ). See on 2Co 6:6.
Kindness ( $\chi \rho \eta \sigma \tau 0 \tau \eta \varsigma)$. See on 2Co 6:6.
Goodness ( $\alpha \gamma \alpha \theta \omega \sigma \nu \nu \eta$ ). See on 2Th 1:11.
Faithfulness ( $\pi$ ıб $\tau \iota \varsigma)$. Same word as "faith." See on Mt 23:33; 1Co 13:7,13.
Meekness ( $\pi \rho \alpha v \tau \eta \varsigma)$. See on 1Co 4:21; 2Co 10:1.
Temperance ( $\varepsilon \gamma \kappa \rho \alpha \tau \varepsilon \iota \alpha)$. See on Ac 24:25. Old word from $\varepsilon \gamma \kappa \rho \alpha \tau \eta \varsigma$, one holding control or holding in. In N.T. only in these passages and 2Pe 1:6. Paul has a better list than the four cardinal virtues of the Stoics (temperance, prudence, fortitude, justice), though they are included with better notes struck. Temperance is alike, but kindness is better than justice, long-suffering than fortitude, love than prudence.

Gal 5:24
Crucified the flesh ( $\tau \eta \nu \sigma \alpha \rho \kappa \alpha \varepsilon \sigma \tau \alpha v \rho \omega \sigma \alpha \nu$ ). Definite event, first aorist active indicative of $\sigma \tau \alpha v \rho o \omega$ as in 2:19 (mystical union with Christ). Paul uses $\sigma \alpha \rho \xi$ here in the same sense as in verses $16,17,19$, "the force in men that makes for evil" (Burton).

With ( $\sigma v \nu$ ). "Together with," emphasizing "the completeness of the extermination of this evil force" and the guarantee of victory over one's passions and dispositions toward evil.

Gal 5:25
By the Spirit let us also walk ( $\pi v \varepsilon v \mu \alpha \tau \kappa \alpha \sigma \tau o \imath \chi \omega \mu \varepsilon v$ ). Present subjunctive (volitive) of $\sigma \tau o x \varepsilon \omega$, "Let us also go on walking by the Spirit." Let us make our steps by the help and guidance of the Spirit.

Gal 5:26
Let us not be ( $\mu \eta \gamma \iota \nu \omega \mu \varepsilon \theta \alpha$ ). Present middle subjunctive (volitive), "Let us cease becoming vainglorious" ( $\left.\kappa \varepsilon \vee \circ \delta \circ \xi_{o}\right)$, late word only here in N.T. ( $\kappa \varepsilon \vee \circ \sigma, \delta o \xi \alpha$ ). Once in Epictetus in same sense.

Provoking one another ( $\alpha \lambda \lambda \eta \lambda$ ous $\pi \rho о \kappa \alpha \lambda o u \mu \varepsilon \nu o$ ). Old word $\pi \rho о \kappa \alpha \lambda \varepsilon \omega$, to call forth, to challenge to combat. Only here in N.T. and in bad sense. The word for "provoke" in Heb 10:24 is $\pi \alpha \rho о \xi v \sigma \mu o v$ (our "paroxysm").

Envying ( $\varphi$ Өovouvi $)$ ) Old verb from $\varphi \theta$ ovoc. Only here in N.T.

## Galatians 6

Gal 6:1
If a man be overtaken ( $\varepsilon \alpha v \kappa \alpha \pi \rho \circ \lambda \eta \mu \varphi \theta \eta \alpha v \theta \rho \omega \pi \sigma \varsigma)$. Condition of third class, first aorist passive subjunctive of $\pi \rho o \lambda \alpha \mu \beta \alpha v \omega$, old verb to take beforehand, to surprise, to detect.

Trespass ( $\pi \alpha \rho \alpha \pi \tau \omega \mu \alpha \tau)$. Literally, a falling aside, a slip or lapse in the papyri rather than a wilful sin. In Polybius and Diodorus. Koine word.

Ye which are spiritual (o $\pi v \varepsilon v \mu \alpha \tau \iota \kappa o$ ). See on 1Co 3:1. The spiritually led (5:18), the spiritual experts in mending souls.
 Mt 4:21 of mending nets, old word to make a $\boldsymbol{\alpha} \tau \boldsymbol{\circ}$, fit, to equip thoroughly.

Looking to thyself ( $\sigma \kappa о \pi \omega v$ ozavtov). Keeping an eye on as in 2Co 4:18 like a runner on the goal.

Lest thou also be tempted ( $\mu \eta \kappa \alpha \sigma v \pi \varepsilon\llcorner\rho \alpha \sigma \theta \eta \vdash)$ ). Negative purpose with first aorist passive subjunctive. Spiritual experts (preachers in particular) need this caution. Satan loves a shining mark.

Gal 6:2
Bear ye one another's burdens ( $\alpha \lambda \lambda \eta \lambda \omega \nu \tau \alpha \beta \alpha \rho \eta \beta \alpha \sigma \tau \alpha \zeta \varepsilon \tau \varepsilon)$. Keep on bearing (present active imperative of $\beta \alpha \sigma \tau \alpha \zeta \omega$, old word, used of Jesus bearing his Cross in Joh 19:17. Bapos means weight as in Mt 20:12; 2Co 4:17. It is when one's load ( $\varphi$ optıov, verse 5 ) is about to press one down. Then give help in carrying it.

Fulfil ( $\alpha v \alpha \pi \lambda \eta \rho \omega \sigma \alpha \tau \varepsilon$ ). First aorist active imperative of $\alpha v \alpha \pi \lambda \eta \rho o \omega$, to fill up, old word, and see on Mt 23:32; 1Th 2:16; 1Co 14:16. Some MSS. have future indicative ( $\alpha v \alpha \pi \lambda \eta \rho \omega \sigma \varepsilon \tau \varepsilon)$.

Gal 6:3
Something when he is nothing ( $\tau \mu \eta \delta \varepsilon v \omega v$ ). Thinks he is a big number being nothing at all (neuter singular pronouns). He is really zero.

He deceiveth himself ( $\varphi \rho \varepsilon v \alpha \pi \alpha \tau \alpha$ عav $\tau \circ$ ). Late compound word ( $\varphi \rho \eta \nu$, mind, $\alpha \pi \alpha \tau \alpha \omega$, lead astray), leads his own mind astray. Here for first time. Afterwards in Galen, ecclesiastical and Byzantine writers. He deceives no one else.

Gal 6:5
Each shall bear his own burden ( $\tau 0$ เ $\delta \iota \circ \vee \varphi о \rho \tau \iota v \vee \beta a \sigma \tau \alpha \sigma \varepsilon$ ). Фортıvv is old word for ship's cargo (Ac 27:10 ). Christ calls his poptoov light, though he terms those of the Pharisees heavy (Mt 23:4), meant for other people. The terms are thus not always kept distinct, though Paul does make a distinction here from the $\beta \alpha \rho \eta$ in verse 2.

Gal 6:6
That is taught (о катп $\chi о 0 \mu \varepsilon v o \varsigma)$. For this late and rare verb катп $\chi \varepsilon \omega$, see on $\operatorname{Lu}$ 1:4; Ac 18:25; 1Co 14:19. It occurs in the papyri for legal instruction. Here the present passive participle retains the accusative of the thing. The active ( $\tau \omega$ ка $\tau \eta \chi \circ \cup v \tau$ ) joined with the
passive is interesting as showing how early we find paid teachers in the churches. Those who receive instruction are called on to "contribute" (better than "communicate" for $\kappa o เ v \omega v \varepsilon เ \tau \omega)$ for the time of the teacher (Burton). There was a teaching class thus early (1 Th 5:12; 1Co 12:28; Eph 4:11; 1Th 5:17 ).

Gal 6:7
Be not deceived ( $\mu \eta \pi \lambda \alpha v a \sigma \theta \varepsilon$ ). Present passive imperative with $\mu \eta$, "stop being led astray" ( $\pi \lambda \alpha v \alpha \omega$, common verb to wander, to lead astray as in Mt 24:4f. ).

God is not mocked (ov $\mu \cup \kappa \tau \eta \rho \iota(\varepsilon \tau \alpha)$. This rare verb (common in LXX) occurs in Lysias. It comes from $\mu \nu \kappa \tau \eta \rho$ (nose) and means to turn the nose up at one. That is done towards God, but never without punishment, Paul means to say. In particular, he means "an evasion of his laws which men think to accomplish, but, in fact, cannot" (Burton).

Whatsoever a man soweth (o $\varepsilon \alpha v \sigma \pi \varepsilon \rho \eta ~ \alpha v \theta \rho \omega \pi \sigma \varsigma)$ ). Indefinite relative clause with $\varepsilon \alpha v$ and the active subjunctive (either aorist or present, form same here). One of the most frequent of ancient proverbs (Job 4:8 ; Arist., Rhet. iii. 3). Already in 2Co 9:6 . Same point in Mt 7:16; Mr 4:26f.

That (тovтo). That very thing, not something different.
Reap ( $\theta \varepsilon \rho / \sigma \varepsilon$ ). See on Mt 6:26 for this old verb.

## Gal 6:8

Corruption ( $\varphi \theta$ oo $\alpha v$ ). For this old word from $\varphi \theta \varepsilon \rho \omega$, see on 1Co 15:42. The precise meaning turns on the context, here plainly the physical and moral decay or rottenness that follows sins of the flesh as all men know. Nature writes in one's body the penalty of sin as every doctor knows.

Eternal life ( $\zeta \omega \eta \nu \alpha \omega \omega v \iota v$ ). See on Mt 25:46 for this interesting phrase so common in the Johannine writings. Plato used al $\omega$ voc for perpetual. See also 2 Th 1:9. It comes as nearly meaning "eternal" as the Greek can express that idea.

Gal 6:9
Let us not be weary in well-doing ( $\tau 0 \kappa \alpha \lambda о v \pi о ю v \nu \tau \varepsilon \varsigma \mu \eta \varepsilon \nu \kappa \alpha \kappa \omega \mu \varepsilon v$ ). Volitive present active subjunctive of $\varepsilon v \kappa \alpha \kappa \varepsilon \omega$ on which see Lu 18:1; 2Th 3:13; 2Со 4:1,16 ( $\varepsilon v$, какоৎ, evil). Literally, "Let us not keep on giving in to evil while doing the good." It is curious how prone we are to give in and to give out in doing the good which somehow becomes prosy or insipid to us.

In due season ( $\kappa \alpha \iota \rho \omega \iota \delta \iota \omega$ ). Locative case, "at its proper season" (harvest time). Cf. 1 Ti 2:6; 6:15 (plural).

If we faint not ( $\mu \eta \varepsilon \kappa \lambda \nu o \mu \varepsilon v o$ ). Present passive participle (conditional) with $\mu \eta$. Cf. $\varepsilon \kappa \lambda \nu \omega$, old verb to loosen out. Literally, "not loosened out," relaxed, exhausted as a result of giving in to evil ( $\varepsilon \nu \kappa \alpha \kappa \omega \mu \varepsilon v)$.

Gal 6:10

As we have opportunity ( $\omega \varsigma \kappa \alpha \iota \rho o v \varepsilon \chi \omega \mu \varepsilon v$ ). Indefinite comparative clause (present subjunctive without $\alpha v$ ). "As we have occasion at any time."

Let us work that which is good ( $\varepsilon \rho \gamma \alpha \zeta \omega \mu \varepsilon \theta \alpha$ тo $\alpha \gamma \alpha \theta$ ov). Volitive present middle subjunctive of $\varepsilon \rho \gamma \alpha \zeta о \mu \alpha$, "Let us keep on working the good deed."

Of the household of faith ( $\tau$ оиৎ oוкعוоиৎ $\tau \eta \varsigma \pi \iota \sigma \tau \varepsilon \omega \varsigma$ ). For the obvious reason that they belong to the same family with necessary responsibility.

Gal 6:11
With how large letters ( $\pi \eta \lambda \iota \kappa о \iota \varsigma ~ \gamma \rho \alpha \mu \mu \alpha \sigma เ v$ ). Paul now takes the pen from the amanuensis (cf. Ro 16:22) and writes the rest of the Epistle (verses 11-18) himself instead of the mere farewell greeting (2Th 3:17; 1Co 16:21; Col 4:18). But what does he mean by "with how large letters"? Certainly not "how large a letter." It has been suggested that he employed large letters because of defective eyesight or because he could only write ill-formed letters because of his poor handwriting (like the print letters of children) or because he wished to call particular attention to this closing paragraph by placarding it in big letters (Ramsay). This latter is the most likely reason. Deissmann, (St. Paul, p. 51) argues that artisans write clumsy letters, yes, and scholars also. Milligan (Documents, p. 24; Vocabulary, etc.) suggests the contrast seen in papyri often between the neat hand of the scribe and the big sprawling hand of the signature.

I have written ( $\varepsilon \gamma \rho \alpha \psi \alpha)$. Epistolary aorist.
With mine own hand ( $\tau \eta \varepsilon \mu \eta \chi \varepsilon เ \rho$ ). Instrumental case as in 1Co 16:21 .
Gal 6:12
To make a fair show ( $\varepsilon \cup \pi \rho \circ \sigma \omega \pi \eta \sigma \alpha$ ). First aorist active infinitive of $\varepsilon \cup \pi \rho \circ \sigma \omega \pi \varepsilon \omega$, late verb from $\varepsilon v \pi \rho о \sigma \omega \pi \sigma \varsigma$, fair of face ( $\varepsilon v, \pi \rho o \sigma \omega \pi \sigma v$ ). Here only in N.T., but one example in papyri (Tebt. I. 1912 B.C. 114) which shows what may happen to any of our N.T. words not yet found elsewhere. It is in Chrysostom and later writers.

They compel ( $\alpha v \alpha \gamma \kappa \alpha \zeta$ оvoıv). Conative present active indicative, "they try to compel."
For the cross of Christ ( $\tau \omega \sigma \tau \alpha \nu \rho \omega$ tov X $\rho$ เo $\tau o v$ ). Instrumental case (causal use, Robertson, Grammar, p. 532). Cf. 2Co 2:13. "For professing the cross of Christ" (Lightfoot).

## Gal 6:13

They who receive circumcision (o $\pi \varepsilon \rho \iota \tau \varepsilon \mu v o \mu \varepsilon v o$ ). Present causative middle of $\pi \varepsilon \rho \iota \tau \varepsilon \mu \nu \omega$, those who are having themselves circumcised. Some MSS. read o $\pi \varepsilon \rho \iota \tau \varepsilon \tau \eta \mu \varepsilon v o)$, "they who have been circumcised" (perfect passive participle). Probably the present ( $\pi \varepsilon \rho \iota \tau \varepsilon \mu \nu \circ \mu \varepsilon v o$ ) is correct as the harder reading.

Gal 6:14
Far be it from me ( $\varepsilon \mu \circ \mu \eta \gamma \varepsilon v o \iota \tau o$ ). Second aorist middle optative of $\gamma ı v o \mu \alpha$ in a negative $(\mu \eta)$ wish about the future with dative case: "May it not happen to me." See 2:17. The infinitive $\kappa \alpha v \chi \alpha \sigma \theta \alpha$ (to glory) is the subject of $\gamma$ عvouto as is common in the LXX, though not elsewhere in the N.T.

Hath been crucified unto me ( $\varepsilon \mu \circ \varepsilon \sigma \tau \alpha v \rho \omega \tau \alpha$ ). Perfect passive indicative of $\sigma \tau \alpha v \rho o \omega$, stands crucified, with the ethical dative again $(\varepsilon \mu \mathrm{o})$. This is one of the great sayings of Paul concerning his relation to Christ and the world in contrast with the Judaizers. Cf. 2:19f.; 3:13; 4:4f.; 1Co 1:23f.; Ro 1:16; 3:21ff.; 4:25; 5:18 .

World (кобноя) has no article, but is definite as in 2Co 5:19. Paul's old world of Jewish descent and environment is dead to him (Php 3:3f. ).

Gal 6:15
A new creature ( $\kappa \alpha \iota \nu \eta \kappa \tau \iota \sigma ı \varsigma)$. For this phrase see on 2Co 5:17.
Gal 6:16
By this rule ( $\tau \omega$ kavov $\tau 0 v \tau \omega$ ). For $\kappa \alpha v \omega v$, see on 2Co 10:13,15f.
Gal 6:17
From henceforth (тои долтои). Usually то $\lambda$ долоv, the accusative of general reference, "as for the rest" (Php 3:1; 4:8). The genitive case (as here and Eph 6:10) means "in respect of the remaining time."

The marks of Jesus ( $\tau \alpha \sigma \tau \iota \gamma \mu \alpha \tau \alpha$ $\tau 0 v$ I $\eta \sigma o v$ ). Old word from $\sigma \tau \iota \zeta \omega$, to prick, to stick, to sting. Slaves had the names or stamp of their owners on their bodies. It was sometimes done for soldiers also. There were devotees also who stamped upon their bodies the names of the gods whom they worshipped. Today in a round-up cattle are given the owner's mark. Paul gloried in being the slave of Jesus Christ. This is probably the image in Paul's mind since he bore in his body brandmarks of suffering for Christ received in many places (2Co 6:4-6; 11:23ff. ), probably actual scars from the scourgings (thirty-nine lashes at a time). If for no other reason, listen to me by reason of these scars for Christ and "let no one keep on furnishing trouble to me."

Gal 6:18
The farewell salutation is much briefer than that in 2Co 13:13, but identical with that in Phm 1:25. He calls them "brethren" ( $\alpha \delta \varepsilon \lambda \varphi 0$ ) in spite of the sharp things spoken to them.

## THE EPISTLE TO THE EPHESIANS

FROM ROME A.D. 63

## BY WAY OF INTRODUCTION

There are some problems of a special nature that confront us about the so-called Epistle to the Ephesians.

THE AUTHORSHIP
It is not admitted by all that Paul wrote it, though no other adequate explanation of its origin has ever been given. So far as subject matter and vocabulary and style are concerned, if Colossians is Pauline, there is little or nothing to be said against the Pauline authorship of this Epistle.

## RELATION TO COLOSSIANS

As we have seen, the two Epistles were sent at the same time, but clearly Colossians was composed first. Ephesians bears much the same relation to Colossians that Romans does to Galatians, a fuller treatment of the same general theme in a more detached and impersonal manner.

THE DESTINATION
The oldest documents (Aleph and B) do not have the words $\varepsilon v \mathrm{E} \varphi \varepsilon \sigma \omega$ (in Ephesus) in Eph 1:1 (inserted by a later hand). Origen did not have them in his copy. Marcion calls it the Epistle to the Laodiceans. We have only to put here $\mathrm{Col} 4: 16$ "the letter from Laodicea" to find the probable explanation. After writing the stirring Epistle to the Colossians Paul dictated this so-called Epistle to the Ephesians as a general or circular letter for the churches in Asia (Roman province). Perhaps the original copy had no name in Eph $1: 1$ as seen in Aleph and B and Origen, but only a blank space. Marcion was familiar with the copy in Laodicea. Basil in the fourth century mentions some MSS. with no name in the address. Most MSS. were copies from the one in Ephesus and so it came to be called the Epistle to the Ephesians. The general nature of the letter explains also the absence of names in it, though Paul lived three years in Ephesus.

THE DATE
The same date must be assigned as for Philemon and Colossians, probably A.D. 63.
THE PLACE OF WRITING
This would also be the same, that is Rome, though Deissmann and Duncan argue for Ephesus itself as the place of writing. Some scholars even suggest Caesarea.

THE CHARACTER OF THE EPISTLE
The same Gnostic heresy is met as in Colossians, but with this difference. In Colossians the emphasis is on the Dignity of Christ as the Head of the Church, while in Ephesians chief stress is placed upon the Dignity of the Church as the Body of Christ the Head. Paul has written nothing more profound than chapters Eph 1-3 of Ephesians. Stalker termed them
the profoundest thing ever written. He sounds the depths of truth and reaches the heights. Since Ephesians covers the same ground so largely as Colossians, only the words in Ephesians that differ or are additional will call for discussion.

SPECIAL BOOKS ON EPHESIANS
One may note Abbott (Int. Crit. Comm. 1897), Gross Alexander (1910), Beet (1891), Belser (1908), Candlish (1895), Dale (Lectures on Ephesians), Dibelius (Handbuch, 1912), Eadie (1883), Ellicott (1884), Ewald (Zahn Komm., 2 Auf. 1910), Findlay (1892), Gore (Practical Exposition, 1898), Haupt (Meyer Komm., 8 Auf. 1902), Hitchcock (1913), Hort (Intr. 1895), Knabenbauer (1913), Krukenberg (1903), Lidgett (1915), Lock (1929), Lueken (1906), Martin (New Century Bible), McPhail (1893), McPherson (1892), Meinertz (1917), Moule (1900), Mullins (1913), Murray (1915), Oltramare (1891), Robinson (1903), Salmond (1903), E. F. Scott (Moffatt Comm., 1930), Stroeter (The Glory of the Body of Christ, 1909), Von Soden (2 Aufl. 1893), F. B. Westcott (1906), Wohlenberg (1895).

## Ephesians 1

Eph 1:1
Of Christ Jesus (X $\rho \iota \sigma \tau o v$ I $\eta \sigma o v$ ). So B D, though Aleph A L have I $\eta \sigma o v$ X $\rho \iota \sigma \tau o v$. Paul is named as the author and so he is. Otherwise the Epistle is pseudepigraphic.

By the will of God ( $\delta \iota \alpha \theta \varepsilon \lambda \eta \mu \alpha \tau o \varsigma ~ \theta \varepsilon o v)$. As in 1Co 1:1; 2Co 1:1; Ro 1:1 .
At Ephesus ( $\varepsilon v \mathrm{E} \varphi \varepsilon \sigma \omega$ ). In Aleph and B these words are inserted by later hands, though
 meaning "the saints that are" (genuine saints), showing that his MSS. did not have the words $\varepsilon v \mathrm{E} \varphi \varepsilon \sigma \omega$. The explanation of the insertion of these words has already been given in the remarks on "The Destination" as one copy of the general letter that was preserved in Ephesus. It is perfectly proper to call it the Epistle to the Ephesians if we understand the facts.

## Eph 1:3

Blessed ( $\varepsilon \cup \lambda o \gamma \eta \tau о \varsigma)$. Verbal of $\varepsilon \cup \lambda o \gamma \varepsilon \omega$, common in the LXX for Hebrew baruk (Vulgate benedictus) and applied usually to God, sometimes to men (Ge 24:31), but in N.T.
 (Lu 1:42). "While $\varepsilon \cup \lambda o \gamma \eta \mu \varepsilon v o s$ points to an isolated act or acts, $\varepsilon \cup \lambda o \gamma \eta \tau o \varsigma$ describes the intrinsic character" (Lightfoot). Instead of the usual عuxapıбтov $\mu \varepsilon v$ (Col 1:3) Paul here uses عu入oүๆтоৎ, elsewhere only in 2Co 1:3 in opening, though in a doxology in Ro 1:25; 9:5; 2Co $11: 31$. The copula here is probably $\varepsilon \sigma \tau \iota v$ (is), though either $\varepsilon \sigma \tau \omega$ (imperative) or $\varepsilon \nmid \eta$ (optative as wish) will make sense.

The God and Father of our Lord Jesus Christ (о $\theta \varepsilon o \varsigma ~ к а ~ \pi \alpha \tau \eta \rho ~ \tau o v ~ K v \rho ı o v ~ \eta \mu \omega v ~$
 $\kappa \alpha \pi \alpha \tau \eta \rho$ links them together as in 1Th 1:3; 3:11,13; Ga 1:4. See also the one article in 2 Pe 1:1,11. In Eph 1:17 we have o $\theta$ عoc tov Kupıo $\eta \mu \omega v$ I I $\sigma o v$ X Xıбтov, and the words of Jesus in Joh 20:17.

Who hath blessed us (o $\varepsilon \cup \lambda о \gamma \eta \sigma \alpha \varsigma v \mu \alpha \varsigma$ ). First aorist active participle of $\varepsilon \cup \lambda o \gamma \varepsilon \omega$, the same word, antecedent action to the doxology ( $\varepsilon \cup \lambda о ү \eta \tau \circ \varsigma)$.

With ( $\varepsilon v$ ). So-called instrumental use of $\varepsilon v$ though
in is clear.
Every spiritual blessing ( $\pi \alpha \sigma \eta \varepsilon \cup \lambda o \gamma 1 \alpha \pi \nu \varepsilon v \mu \alpha \tau \iota \kappa \eta$ ). Third use of the root $\varepsilon \cup \lambda o \gamma$ (verbal, verb, substantive). Paul lovingly plays with the idea. The believer is a citizen of heaven and the spiritual blessings count for most to him.

In the heavenly places in Christ ( $\varepsilon v \tau о \iota \varsigma \varepsilon \pi о \cup \rho a v ı o \iota \varepsilon \varepsilon \mathcal{X} \rho \iota \sigma \tau \omega$ ). In four other places in Eph. ( $1: 20 ; 2: 6 ; 3: 10 ; 6: 12$ ). This precise phrase (with $\varepsilon v$ ) occurs nowhere else in the N.T. and has a clearly local meaning in 1:20; 2:6; 3:10, doubtful in 6:12, but probably so here. In 2:6 the believer is conceived as already seated with Christ. Heaven is the real abode of the citizen of Christ's kingdom (Php 3:20) who is a stranger on earth (Php 1:27; Eph 2:19). The
word $\varepsilon \pi \sigma \cup \rho a v i o c$ (heavenly) occurs in various passages in the N.T. in contrast with $\tau \alpha$ $\varepsilon \pi \iota \gamma \varepsilon \iota \alpha$ (the earthly) as in Joh $3: 12$; 1 Co $15: 40,48,49$; Php 2:10, with $\pi \alpha \tau \rho \iota \varsigma$ (country) in Heb 11:16, with $\kappa \lambda \eta \sigma \iota \varsigma$ (calling) in Heb 3:1, with $\delta \omega \rho \varepsilon \alpha$ (gift) in Heb 6:4, with $\beta a \sigma \iota \lambda \varepsilon \iota \alpha$ (kingdom) in $2 \mathrm{Ti} 4: 18$.

Eph 1:4
Even as he chose us in him ( $\kappa \alpha \theta \omega \varsigma \varepsilon \xi \varepsilon \lambda \varepsilon \xi \alpha \tau о \eta \mu \alpha \varsigma \varepsilon \nu \alpha v \tau \omega)$. First aorist middle indicative of $\varepsilon \kappa \lambda \varepsilon \gamma \omega$, to pick out, to choose. Definitive statement of God's elective grace concerning believers in Christ.

Before the foundation of the world ( $\pi \rho \circ \kappa \alpha \tau \alpha \beta о \lambda \eta \varsigma \kappa о \sigma \mu о v)$. Old word from $\kappa \alpha \tau \alpha \beta \alpha \lambda \lambda \omega$, to fling down, used of the deposit of seed, the laying of a foundation. This very phrase with $\pi \rho o$ in the Prayer of Jesus (Joh 17:24) of love of the Father toward the Son. It occurs also in 1Pe 1:20. Elsewhere we have a $\quad$ (from) used with it (Mt 25:34; Lu 11:50; Heb 4:3; 9:26; Re 13:8; 17:8 ). But Paul uses neither phrase elsewhere, though he has ato $\tau \omega \nu \alpha \omega \omega \nu \omega \nu$ (from the ages) in Eph 3:9. Here in Eph 1:3-14. Paul in summary fashion gives an outline of his view of God's redemptive plans for the race.

That we should be $(\varepsilon เ v a \eta \mu a \varsigma)$. Infinitive of purpose with the accusative of general reference ( $\eta \mu \alpha \varsigma)$. See Col 1:22 for the same two adjectives and also $\kappa \alpha \tau \varepsilon v \omega \pi \iota \circ v$ avtov.

Eph 1:5
Having foreordained us ( $\Pi \rho о о \rho เ \sigma \alpha \varsigma ~ \eta \mu \alpha \varsigma)$. First aorist active participle of $\pi \rho о о \rho \iota \zeta \omega$, late and rare compound to define or decide beforehand. Already in Ac 4:28; 1Co 2:7; Ro 8:29. See also verse 11 . Only other N.T. example in verse 11 . To be taken with $\varepsilon \xi \varepsilon \lambda \varepsilon \xi \alpha \tau o$ either simultaneous or antecedent (causal).

Unto adoption as sons ( $\varepsilon \iota \varsigma v \iota \theta \varepsilon \sigma \iota \alpha \nu)$. For this interesting word see $\operatorname{Ga} 4: 5$; Ro $8: 15$; 9:4.

Unto himself ( $\varepsilon ા \varsigma ~ \alpha \cup \tau o v)$. Unto God.
According to the good pleasure of his will ( $\kappa \alpha \tau \alpha \tau \eta \nu \varepsilon v \delta \circ \kappa ı \alpha v \tau \circ v \theta \varepsilon \lambda \eta \mu \alpha \tau \circ \varsigma \alpha v \tau \circ v)$. Here $\varepsilon$ vסoкıav means
purpose like $\beta o v \lambda \eta \nu$ in verse 11 rather than
benevolence (good pleasure). Note the preposition ката here for standard.
Eph 1:6
To the praise ( $\varepsilon \varsigma \varepsilon \pi \alpha \iota v o v$ ). Note the prepositions in this sentence.
Which ( $\eta \varsigma$ ). Genitive case of the relative $\eta \nu$ (cognate accusative with $\varepsilon \chi \alpha \rho ı \tau \omega \sigma \varepsilon \nu$ (he freely bestowed), late verb $\chi \alpha \rho \iota \tau o \omega$ (from $\chi \alpha \rho ı$, grace), in N.T. attracted to case of antecedent дapıtos only here and Lu 1:28.

In the Beloved $(\varepsilon \nu \tau \omega \eta \gamma \alpha \pi \eta \mu \varepsilon \nu \omega)$. Perfect passive participle of $\alpha \gamma \alpha \pi \alpha \omega$. This phrase nowhere else in the N.T. though in the Apostolic Fathers.

Eph 1:7

In whom $(\varepsilon \nu \omega)$. Just like Col 1:14 with $\pi \alpha \rho \alpha \pi \tau \omega \mu \alpha \tau \omega \nu$ (trespasses) in place of $\alpha \mu \alpha \rho \tau \tau \omega \nu$ (sins) and with the addition of $\delta \iota \alpha$ тov aı $\mu \alpha \tau \circ \varsigma$ avtov (through his blood) as in Col 1:20. Clearly Paul makes the blood of Christ the cost of redemption, the ransom money $(\lambda v \tau \rho o v$, Mt 20:28; Mr 10:45 ; $\alpha v \tau ı \lambda v \tau \rho o v, 1 \mathrm{Ti} 2: 6$ ). See Col 1:9.

## Eph 1:8

According to the riches of his grace ( $\kappa \alpha \tau \alpha \tau о \pi \lambda о v \tau о \varsigma \tau \eta \varsigma \chi \alpha \rho \iota \sigma \varsigma \alpha v \tau о v)$. A thoroughly Pauline phrase, riches of kindness (Ro 2:4 ), riches of glory (Col 1:27; Eph 3:16; Php 4:19), riches of fulness of understanding ( $\operatorname{Col} 2: 7$ ), riches of Christ (Eph 3:8), and in Eph 2:7 "the surpassing riches of grace."

Which ( $\eta \varsigma$ ). Genitive attracted again to case of antecedent $\chi \alpha \rho \iota \tau \circ$.
Eph 1:9
The mystery of his will ( $\left.\tau 0 \mu v \sigma \tau \eta \rho เ \frac{\nu}{} \tau 0 v \theta \varepsilon \lambda \eta \mu \alpha \tau \circ \varsigma \alpha v \tau o v\right)$. Once hidden, now revealed as in Col 1:26 which see. See also Col 2:3 .

Which he purposed ( $\eta \nu \pi \rho o \varepsilon \theta \varepsilon \tau o$ ). Second aorist middle of $\pi \rho o \tau \iota \theta \eta \mu$, old verb, for which see Ro 1:13; 3:25.

Eph 1:10
Unto a dispensation of the fulness of the times ( $\varepsilon \iota \varsigma$ оєкоvо $\mu \propto \nu \tau о v \pi \lambda \eta \rho \omega \mu \alpha \tau \circ \varsigma \tau \omega \nu$ $\kappa \alpha \iota \rho \omega v$ ). See Col 1:25 for оькоvоцıаv. In Ga 4:4 "the fulness of the time" ( $\tau 0 \pi \lambda \eta \rho \omega \mu \alpha$ тоv $\chi \rho o v o v)$ the time before Christ is treated as a unit, here as a series of epochs ( $\kappa \alpha \iota \rho \omega v$ ). Cf. Mr 1:15; Heb 1:1. On $\pi \lambda \eta \rho \omega \mu \alpha$ see also Ro 11:26; Eph 3:19; 4:13 .

To sum up ( $\alpha v \alpha \kappa \varepsilon \varphi \alpha \lambda \alpha \iota \omega \sigma \alpha \sigma \theta \alpha$ ). Purpose clause (amounting to result) with first aorist middle infinitive of $\alpha v \alpha \kappa \varepsilon \varphi \alpha \lambda a \iota \omega$, late compound verb $\alpha v \alpha$ and $\kappa \varepsilon \varphi \alpha \lambda \alpha \circ \omega$ (from $\kappa \varepsilon \varphi a \lambda \alpha \iota v$, Heb 8:1, and that from $\kappa \varepsilon \varphi a \lambda \eta$, head), to head up all things in Christ, a literary word. In N.T. only here and Ro 13:9. For the headship of Christ in nature and grace see Col 1:15-20 .

Eph 1:11
In him $(\varepsilon v \alpha v \tau \omega)$. Repeats the idea of $\varepsilon \nu \tau \omega$ X $\rho \iota \sigma \tau \omega$ of verse 10.
We were made a heritage ( $\varepsilon \kappa \lambda \eta \rho \omega \theta \eta \mu \varepsilon \nu$ ). First aorist passive of $\kappa \lambda \eta \rho \circ \omega$, an old word, to assign by lot ( $\kappa \lambda \eta \rho \circ \varsigma)$, to make a $\kappa \lambda \eta \rho \circ \varsigma$ or heritage. So in LXX and papyri. Only time in N.T., though $\pi \rho о \sigma \kappa \lambda \eta \rho \circ \omega$ once also (Ac 17:4 ).

Purpose $(\pi \rho o \theta \varepsilon \sigma \iota v)$. Common substantive from $\pi \rho o \tau \iota \theta \eta \mu$, a setting before as in Ac 11:23; 27:13.

Eph 1:12
To the end that we should be ( $\varepsilon \iota \varsigma ~ \tau о ~ \varepsilon ı v a ~ \eta \mu a \varsigma) . ~ F i n a l ~ c l a u s e ~ w i t h ~ \varepsilon ı \varsigma ~ t o ~ a n d ~ t h e ~ i n f i n-~$ itive $\varepsilon เ v a$ (see the mere infinitive $\varepsilon ו v a$ in verse 4) and the accusative of general reference.

Who had before hoped in Christ ( $\tau 0 \cup \varsigma \pi \rho о \eta \lambda \pi \iota \kappa о \tau \alpha \varsigma \varepsilon \nu \tau \omega$ X $\rho \iota \sigma \tau \omega$ ). Articular perfect active participle of $\pi \rho \circ \varepsilon \lambda \pi \iota \zeta \omega$, late and rare compound (here only in N.T.) and the reference of $\pi \rho o$ not clear. Probably the reference is to those who like Paul had once been Jews and
had now found the Messiah in Jesus, some of whom like Simeon and Anna had even looked for the spiritual Messiah before his coming.

Eph 1:13

In whom ( $\varepsilon v \omega$ ). Repeated third time (once in verse 11, twice in 13), and note o or os in 14.

Ye were sealed ( $\varepsilon \sigma \varphi \rho \alpha \gamma \iota \sigma \theta \eta \tau \varepsilon$ ). First aorist passive indicative of $\sigma \varphi \rho \alpha \gamma \zeta \zeta \omega$, old verb, to set a seal on one as a mark or stamp, sometimes the marks of ownership or of worship of deities like $\sigma \tau ı \gamma \mu \alpha \tau \alpha$ ( Ga 6:17). Marked and authenticated as God's heritage as in 4:30. See 2Co 1:22 for the very use of the metaphor here applied to the Holy Spirit even with the word $\alpha \rho \rho \alpha \beta \omega v$ (earnest).

Spirit ( $\pi v \varepsilon v \mu \alpha \tau)$. In the instrumental case.
Eph 1:14
An earnest ( $\alpha \rho \rho \alpha \beta \omega v$ ). See 2Co 1:22 for discussion of $\alpha \rho \rho \alpha \beta \omega v$. Here "of promise" ( $\tau \eta \varsigma$ $\varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \iota \alpha \varsigma)$ is added to the Holy Spirit to show that Gentiles are also included in God's promise of salvation.

Of our inheritance ( $\tau \eta \varsigma \kappa \lambda \eta \rho \circ v o \mu \nu \varsigma \varsigma \eta \omega \nu$ ). God's gift of the Holy Spirit is the pledge and first payment for the final inheritance in Christ.

Of God's own possession ( $\tau \eta \varsigma \pi \varepsilon \rho ı \pi о п \eta \sigma \varepsilon \omega \varsigma$ ). The word
God's is not in the Greek, but is implied. Late and rare word (from $\pi \varepsilon \rho ı \pi о \iota \varepsilon \omega$, to make a survival) with the notion of obtaining ( 1 Th 5:9; 2Th 3:14) and then of preserving (so in the papyri). So in 1Pe 2:9; Heb 10:39, and here. God has purchased us back to himself. The sealing extends ( $\varepsilon ı \varsigma)$ to the redemption and to the glory of God.

Eph 1:15
 "ye show" do not occur in the Greek. The Textus Receptus has $\tau \varepsilon v a \gamma a \pi \eta \nu$ (the love) before $\tau \eta \nu$ supported by D G K L Syr., Lat., Copt., but Aleph A B P Origen do not have the word $\alpha \gamma a \pi \eta \nu$. It could have been omitted, but is probably not genuine. The use of the article referring to $\pi \iota \sigma \tau \iota v$ and the change from $\varepsilon v$ to $\varepsilon \iota \varsigma$ probably justifies the translation "which ye shew toward."

Eph 1:16
I do not cease ( $\mathrm{ov} \pi \alpha v o \mu \alpha$ ). Singular present middle, while in Col 1:9 Paul uses the plural (literary, or including Timothy), ov $\pi \alpha v o \mu \varepsilon \theta \alpha$.

Eph 1:17
The Father of glory ( $0 \pi \alpha \tau \eta \rho \tau \eta \varsigma \delta o \xi \eta \varsigma)$. The God characterized by glory (the Shekinah, Heb 9:5) as in Ac 7:2; 1Co 2:8; 2Co 1:3; Jas 2:1 .

That--may give (ıva-- $\delta \omega \imath \eta$ ). In Col 1:9 iva is preceded by aıtov $\mu \varepsilon v o$, but here the subfinal use depends on the general idea asking in the sentence. The form $\delta \omega$ in is a late Koine
optative (second aorist active) for the usual $\delta$ orp. It occurs also in 2Th 3:16; Ro 15:5; 2 Ti 1:16,18 in the text of Westcott and Hort. Here B 63 read $\delta \omega$ (like Joh 15:16) second aorist active subjunctive, the form naturally looked for after a primary tense ( $\pi \alpha v o \mu \alpha)$. This use of the volitive optative with $t v \alpha$ after a primary tense is rare, but not unknown in ancient Greek.

A spirit of wisdom and revelation ( $\pi v \varepsilon \cup \mu \alpha \quad \sigma о р เ а \varsigma ~ к \alpha ~ \alpha \pi о к а \lambda \nu \psi \varepsilon \omega \varsigma) . ~ T h e ~ R e v i s e d ~$ Version does not refer this use of $\pi v \varepsilon v \mu \alpha$ to the Holy Spirit (cf. Ga 6:1; Ro 8:15 ), but it is open to question if it is possible to obtain this wisdom and revelation apart from the Holy Spirit.

In the knowledge of him ( $\varepsilon v \varepsilon \pi \tau \gamma v \omega \sigma \varepsilon \alpha v \tau o v$ ). In the full knowledge of Christ as in Colossians.

Eph 1:18
Having the eyes of your heart enlightened ( $\pi \varepsilon \varphi \omega \tau \iota \sigma \mu \varepsilon v o v \varsigma ~ \tau o u \varsigma ~ o \varphi \theta a \lambda \mu o v \varsigma \tau \eta$ $\kappa \alpha \rho \delta \iota \alpha \varsigma \nu \mu \omega v)$. A beautiful figure, the heart regarded as having eyes looking out toward Christ. But the grammar is difficult. There are three possible interpretations. One is an anacoluthon, the case of $\pi \varepsilon \varphi \omega \tau \iota \sigma \mu \varepsilon v o v \varsigma$ being changed from the dative $v \mu \nu \nu$ (to you) to the accusative because of the following infinitive like $\varepsilon \kappa \lambda \varepsilon \xi \alpha \mu \varepsilon v o v \varsigma ~(A c ~ 15: 22) ~ a f t e r ~ \alpha \pi о \sigma \tau о \lambda o ı c . ~$. Another way of explaining it is to regard it as a tertiary predicate of $\delta \omega \iota \eta$, a loose expansion of $\pi v \varepsilon v \mu \alpha$. The third way is to regard the construction as the accusative absolute, a rare idiom possible in Ac 26:3; 1Co 16:3; 1Ti 2:6. In this case, the participle merely agrees with тouc $\sigma \varphi \theta \alpha \lambda \mu о \nu \varsigma$, not with $\nu \mu \nu$, "the eyes of your heart having been enlightened." Otherwise tovc $o \varphi \theta \alpha \lambda \mu \circ \cup \varsigma$ is the accusative retained after the passive participle.
 of oı $\delta \alpha$ ) as in verse 12 . Note three indirect questions after $\varepsilon \iota \delta \varepsilon v \alpha$ (what the hope $\tau \iota \varsigma \eta \varepsilon \lambda \pi \iota \varsigma$, what the riches $\tau \iota \varsigma$ о $\pi \lambda$ оитоৎ, and what the surpassing greatness $\kappa \alpha \tau$ то $v \pi \varepsilon \rho \beta \alpha \lambda \lambda$ оv $\mu \varepsilon \gamma \varepsilon \theta o \varsigma)$. When the Holy Spirit opens the eyes of the heart, one will be able to see all these great truths.

In the saints ( $\varepsilon v$ toı $\alpha \nmid$ roıऽ). Our riches is in God, God's is in his saints.
Eph 1:19
The exceeding greatness of his power ( $\tau 0$ v $\tau \varepsilon \rho \beta \alpha \lambda \lambda o v \mu \varepsilon \gamma \varepsilon Ө$ oऽ $\tau \eta \varsigma \delta \cup v \alpha \mu \varepsilon \omega \varsigma \alpha \cup \tau o v$ ). $\mathrm{M} \varepsilon \gamma \varepsilon \theta \mathrm{o}$, is an old word (from $\mu \varepsilon \gamma \alpha \varsigma$ ), but here only in N.T. Hи $\quad \varepsilon \rho \beta \alpha \lambda \lambda o v$, present active participle of $v \pi \varepsilon \rho \beta \alpha \lambda \lambda \omega$, reappears in 2:7; 3:19 and seen already in 2Co 3:10; 9:14. To enlightened eyes the greatness of God's power is even more "surpassing."

Eph 1:20
Which he wrought ( $\varepsilon v \eta \rho \gamma \eta \kappa \varepsilon \nu)$. Reading of A B rather than aorist $\varepsilon v \eta \rho \gamma \eta \sigma \varepsilon v$. Perfect active indicative, "which he has wrought." $\mathrm{H} \eta v$ is cognate accusative of the relative referring to $\varepsilon v \varepsilon \rho \gamma \varepsilon \iota \alpha v$ (energy) with $\varepsilon v \eta \rho \gamma \eta \kappa \varepsilon v$ and note also кратоuc (strength) and $\sigma \sigma \chi \circ \varsigma$ (might), three words trying to express what surpasses (vie $\rho \beta \alpha \lambda \lambda 0 v$ ) expression or comprehension.

Made him to sit ( $\kappa \alpha \theta \iota \sigma \alpha \varsigma)$. First aorist active participle of $\kappa \alpha \theta \iota \zeta \omega$ in causative sense as in 1Co 6:4. Metaphorical local expression like $\delta \varepsilon \xi \iota a$ and $\varepsilon v$ тоıऽ $\varepsilon \pi о \cup \rho$ avıoı,.

Eph 1:21
Far above all rule (v $\tau \varepsilon \rho \alpha v \omega \pi \alpha \sigma \eta \varsigma \alpha \rho \chi \eta \varsigma)$. Late compound adverbial preposition (v $v \varepsilon \rho$, $\alpha \nu \omega$ ) with the ablative case. In N.T. only here and Heb 9:5. As in Col 1:16, so here Paul claims primacy for Jesus Christ above all angels, aeons, what not. These titles all were used in the Gnostic speculations with a graduated angelic hierarchy.

World ( $\alpha \omega \nu$ ). "Age." See this identical expression in Mt 12:32 for the present time (Gal 1:4; 1 Ti 6:17) and the future life (Eph 2:7; Lu 20:35). Both combined in Mr 10:30; Lu 18:30

Eph 1:22
He put all things in subjection ( $\pi \alpha \nu \tau \alpha \cup \pi \varepsilon \tau \alpha \xi \varepsilon v$ ). First aorist active indicative of vлотаб $\sigma \omega$, quoted from Ps 8:7 as in 1Co 15:27.

Gave him to be head ( $\alpha u \tau о v \varepsilon \delta \omega \kappa \varepsilon v \kappa \varepsilon \varphi \alpha \lambda \eta \nu$ ).
Gave ( $\varepsilon \delta \omega \kappa \varepsilon \nu$, first aorist active indicative of $\delta \delta \delta \omega \mu$ ) to the church (the universal spiritual church or kingdom as in Col 1:18,24) Christ as Head ( $\kappa \varepsilon \varphi \alpha \lambda \eta \nu$, predicate accusative). This conception of єкк $\lambda \eta \sigma \iota \alpha$ runs all through Ephesians (3:10,21; 5:23,24,25,27,29,32).

Eph 1:23
Which ( $\eta \tau \iota \varsigma)$. "Which in fact is," explanatory use of $\eta \tau \iota \varsigma$ rather than $\eta$.
The fulness of him that filleth all in all ( $\tau 0 \pi \lambda \eta \rho \omega \mu \alpha$ tov $\tau \alpha \pi \alpha \nu \tau \alpha \varepsilon v \pi \alpha \sigma v$ $\pi \lambda \eta \rho o v \mu \varepsilon v o v)$. This is probably the correct translation of a much disputed phrase. This view takes $\pi \lambda \eta \rho \omega \mu \alpha$ in the passive sense (that which is filled, as is usual, Col 1:19) and $\pi \lambda \eta \rho o v \mu \varepsilon v o v$ as present middle participle, not passive. All things are summed up in Christ ( 1:10), who is the $\pi \lambda \eta \rho \omega \mu \alpha$ of $\operatorname{God}(\operatorname{Col} 1: 19)$, and in particular does Christ fill the church universal as his body. Hence we see in Ephesians the Dignity of the Body of Christ which is ultimately to be filled with the fulness ( $\pi \lambda \eta \rho \omega \mu \alpha)$ of $\operatorname{God}(3: 19)$ when it grows up into the fulness $(\pi \lambda \eta \rho \omega \mu \alpha)$ of Christ $(4: 13,16)$.

## Ephesians 2

Eph 2:1
And you did he quicken ( $\kappa \alpha \nu \mu \alpha \varsigma$ ). The verb for
did he quicken does not occur till verse 5 and then with $\eta \mu \alpha \varsigma$ (us) instead of $v \mu a \varsigma$ (you). There is a like ellipsis or anacoluthon in Col 1:21,22, only there is no change from $v \mu a c$ to $\eta \mu a c$.

When ye were dead (огта¢ vєкроия). Present active participle referring to their former state. Spiritually dead.

Trespasses and sins ( $\pi \alpha \rho \alpha \pi \tau \omega \mu \alpha \sigma \iota v \kappa \alpha \alpha \mu \alpha \rho \tau \iota \alpha \iota \varsigma)$. Both words (locative case) though only one in verse 5 .

Eph 2:2
According to the course of this world ( $\kappa \alpha \tau \alpha$ тоv aı $\omega v \alpha$ тov коб $\mu$ оv тоvтои). Curious combinations of a $\omega \omega v$ (a period of time), коб $\mu$ о (the world in that period). See 1Co 1:20 for "this age" and 1Co 3:9 for "this world."

The prince of the power of the air ( $\tau 0 v \alpha \rho \chi \circ v \tau \alpha \tau \eta \varsigma \varepsilon \xi o v \sigma i \alpha \varsigma ~ \tau o v ~ \alpha \varepsilon \rho \circ \varsigma)$. A $\eta \rho$ was used by the ancients for the lower and denser atmosphere and $\alpha \bullet \theta \eta \rho$ for the higher and rarer. Satan is here pictured as ruler of the demons and other agencies of evil. Jesus called him "the prince of this world" ( $\quad \alpha \rho \chi \omega \nu$ tov коб $\mu$ оv tov $\tau 0 v$, Joh 16:11 ).

That now worketh ( $\tau 0 \cup v u v \varepsilon v \varepsilon \rho \gamma o u v \tau o \varsigma)$. Those who deny the existence of a personal devil cannot successfully deny the vicious tendencies, the crime waves, in modern men. The power of the devil in the lives of men does explain the evil at work "in the sons of disobedience" ( $\varepsilon v$ тоıऽ voos $\tau \eta \varsigma ~ a \pi \varepsilon \theta \iota a \varsigma)$ ). In 5:6 also. A Hebrew idiom found in the papyri like "sons of light" (1Th 5:5).

Eph 2:3
We also all ( $\kappa \alpha \eta \mu \varepsilon \iota \varsigma ~ \pi \alpha v \tau \varepsilon \varsigma)$. We Jews.
Once lived ( $\alpha v \varepsilon \sigma \tau \rho \alpha \varphi \eta \mu \varepsilon v \pi о \tau \varepsilon$ ). Second aorist passive indicative of $\alpha v \alpha \sigma \tau \rho \varepsilon \varphi \omega$, old verb, to turn back and forth, to live (2Co 1:12). Cf. $\pi о \tau \varepsilon \pi \varepsilon \rho เ \varepsilon \pi \alpha \tau \eta \sigma \alpha \tau \varepsilon$, of the Gentiles in verse 2.

The desires ( $\tau \alpha \theta \varepsilon \lambda \eta \mu \alpha \tau \alpha$ ). Late and rare word except in LXX and N.T., from $\theta \varepsilon \lambda \omega$, to will, to wish. Plural here "the wishes," "the wills" of the flesh like $\tau \alpha \iota \varsigma \varepsilon \pi ө u \mu \iota \alpha \iota \varsigma \tau \eta \varsigma \sigma \alpha \rho \kappa \varsigma$ just before. Gentiles had no monopoly of such sinful impulses.

Of the mind ( $\tau \omega v \delta \iota \alpha v o \omega \omega v$ ). Plural again, "of the thoughts or purposes."
Were by nature children of wrath ( $\eta \mu \varepsilon \theta \alpha \tau \varepsilon \kappa v \alpha$ $\varphi \cup \sigma \varepsilon$ о $\rho \gamma \eta \varsigma)$. This is the proper order of these words which have been the occasion of much controversy. There is no article with $\tau \varepsilon \kappa v a$. Paul is insisting that Jews as well as Gentiles ("even as the rest") are the objects of God's wrath (oppnऽ) because of their lives of sin. See Ro 2:1-3:20 for the full discussion of this to Jews unpalatable truth. The use of $\varphi$ vo天 (associative instrumental case of manner) is
but the application of Paul's use of "all" ( $\pi \alpha v \tau \varepsilon \varsigma)$ as shown also in Ro 3:20; 5:12 . See $\varphi$ ибє of Gentiles in Ro 2:14. The implication of original sin is here, but not in the form that God's wrath rests upon little children before they have committed acts of sin. The salvation of children dying before the age of responsibility is clearly involved in Ro 5:13f.

Eph 2:4
But God (o $\delta \varepsilon \theta \varepsilon o \varsigma)$. Change in the structure of the sentence here, resuming verse 1 after the break.

Being rich in mercy ( $\pi \lambda 0 v \sigma \iota \rho \varsigma \omega v \varepsilon v \varepsilon \lambda \varepsilon \varepsilon$ ). More than $\varepsilon \lambda \varepsilon \eta \mu \omega v$ (being merciful).
Wherewith ( $\eta v$ ). Cognate accusative with $\eta \gamma \alpha \pi \eta \sigma \varepsilon \nu$ (loved).
Eph 2:5
Even when we were dead ( $\kappa \alpha$ о $\nu \tau \alpha \varsigma ~ \eta \mu \alpha \varsigma ~ v \varepsilon к \rho о и \varsigma) . ~ R e p e a t s ~ t h e ~ b e g i n n i n g ~ o f ~ v e r s e ~ 1, ~$ but he changes $v \mu \alpha \varsigma$ (you Gentiles) to $\eta \mu \alpha \varsigma$ (us Jews).
 indicative of the double compound verb $\sigma v \vee \zeta \omega о \pi о เ \varepsilon \omega$ as in $\operatorname{Col} 2: 13$ which see. Associative instrumental case in X $\rho ı \sigma \tau \omega$. Literal resurrection in the case of Jesus, spiritual in our case as pictured in baptism.

By grace have ye been saved ( $\chi \alpha \rho ı \varepsilon \sigma \tau \varepsilon \sigma \varepsilon \sigma \omega \sigma \mu \varepsilon v o$ ). Instrumental case of $\chi \alpha \rho \iota \tau$ and perfect passive periphrastic indicative of $\sigma \omega \zeta \omega$. Parenthetical clause interjected in the sentence. All of grace because we were dead.

Eph 2:6
In Christ Jesus ( $\varepsilon v$ X $\rho \iota \sigma \tau \omega$ I $\eta \sigma o v$ ). All the preceding turns on this phrase. See Col 3:1 for the word $\sigma u v \eta \gamma \varepsilon \mid \rho \varepsilon v$.

Made to sit with him ( $\sigma \cup v \varepsilon \kappa \alpha \theta เ \sigma \varepsilon v)$ ). First aorist active indicative of $\sigma \cup v \kappa \alpha \theta \iota \zeta \omega$, old causative verb, but in N.T. only here and Lu 22:55 .

Eph 2:7
That he might shew ( $1 v \alpha \varepsilon v \delta \varepsilon \varepsilon \xi \eta \tau \alpha$ ). Final clause with $t v \alpha$ and first aorist middle subjunctive of $\varepsilon v \delta \varepsilon ו \kappa v \nu \mu$. See 1:7 for "riches of grace" and 1:19 for "exceeding" (v $\tau \varepsilon \rho \beta \alpha \lambda \lambda o v)$.

In kindness toward us ( $\left.\varepsilon v \chi \rho \eta \sigma \tau о \tau \eta \tau \varepsilon \varphi^{\prime} \eta \mu \propto \varsigma\right)$. See Ro $2: 7$ for this word from $\chi \rho \eta \sigma \tau o \varsigma$ and that from $\chi \rho \alpha о \mu \alpha$, here God's benignity toward us.

Eph 2:8
For by grace ( $\tau \eta \gamma \alpha \rho \chi \alpha \rho \tau \tau$ ). Explanatory reason. "By the grace" already mentioned in verse 5 and so with the article.

Through faith ( $\delta \iota \alpha \pi \iota \sigma \tau \varepsilon \omega \varsigma$ ). This phrase he adds in repeating what he said in verse 5 to make it plainer. "Grace" is God's part, "faith" ours.

And that (ка тоvто). Neuter, not feminine $\tau \alpha \cup \tau \eta$, and so refers not to $\pi \iota \sigma \tau \iota \varsigma$ (feminine) or to $\chi$ 人pıc (feminine also), but to the act of being saved by grace conditioned on faith on our part. Paul shows that salvation does not have its source ( $\varepsilon \xi \nu \mu \omega v$, out of you) in men, but from God. Besides, it is God's gift ( $\delta \omega \rho o v$ ) and not the result of our work.

Eph 2:9
That no man should glory ( $\iota v \alpha \mu \eta \tau \iota \varsigma \kappa \alpha v \chi \eta \sigma \eta \tau \alpha$ ). Negative final clause ( $\iota v \alpha \mu \eta$ ) with first aorist middle subjunctive of $\kappa \alpha v \chi \propto о \mu \alpha$. It is all of God's grace.

Eph 2:10
Workmanship $(\pi o \not \eta \mu \alpha)$. Old word from $\pi o เ \varepsilon \omega$ with the ending $-\mu \alpha \tau$ meaning result. In N.T. only here and Re 1:20.

Created ( $\kappa \tau \iota \sigma \theta \varepsilon v \tau \varepsilon \varsigma)$. First aorist passive participle of $\kappa \tau \iota \zeta \omega$, not the original creation as in Col 1:16; Eph 3:9, but the moral and spiritual renewal in Christ, the new birth, as in Eph 2:15; 4:24 .

For good works ( $\varepsilon \pi \varepsilon \rho \gamma o \iota \varsigma ~ a \gamma a \theta o \iota \varsigma)$. Probably the true dative of purpose here with $\varepsilon \pi$ (Robertson, Grammar, p. 605). Purpose of the new creation in Christ.

Which (oıs). Attraction of the relative a (accusative after $\pi \rho о \eta \tau о \iota \mu \sigma \varepsilon v$ ) to case of the antecedent $\varepsilon \rho \gamma \circ$ ıs.

Afore prepared ( $\pi \rho о \eta \tau о \iota \mu \alpha \sigma \varepsilon v$ ). First aorist active indicative of $\pi \rho \circ \eta \tau о \iota \mu \alpha \zeta \omega$, old verb to make ready beforehand. In N.T. only here and Ro 9:23. Good works by us were included in the eternal foreordination by God.

That we should walk in them (ıva $\varepsilon v \alpha v \tau o \iota \varsigma \pi \varepsilon \rho \iota \pi \alpha \tau \eta \sigma \omega \mu \varepsilon v$ ). Expexegetic final clause explanatory of the election to good works.

Eph 2:11
Wherefore ( $\delta \iota 0$ ). This conjunction applies to the Gentile Christians the arguments in 2:1-10.

That aforetime ye ( $о \tau \pi \sigma \tau \varepsilon v \mu \varepsilon ı \varsigma$ ). No verb is expressed, but in verse 12 Paul repeats o $\varepsilon \nu \tau \omega \kappa \alpha \iota \omega \varepsilon \kappa \varepsilon เ \nu \omega$ (for $\pi \sigma \tau \varepsilon$ ) "that at that time" and inserts $\eta \tau \varepsilon$ (ye were).

Uncircumcision ( $\alpha \kappa \rho \circ \beta v \sigma \tau \iota \alpha$ ),
circumcision ( $\pi \varepsilon \rho \iota \tau о \mu \eta \varsigma)$. The abstract words are used to describe Gentiles and Jews as in Ga 5:6; Rom 2:27.

Made by hands ( $\chi \varepsilon \iota \rho о \pi о \iota \eta \tau о v)$. Agreeing with $\pi \varepsilon \rho \iota \tau о \mu \eta \varsigma$. Verbal (Mr 14:58) from

Eph 2:12
Separate from Christ ( $\chi \omega \rho \iota \varsigma$ X $\rho \iota \sigma \tau \circ v$ ). Ablative case with adverbial preposition $\chi \omega \rho \iota \varsigma$, describing their former condition as heathen.

Alienated from the commonwealth of Israel ( $\alpha \pi \eta \lambda \lambda о \tau \rho \iota \omega \mu \varepsilon \nu о \tau \eta \varsigma \pi о \lambda \iota \tau \varepsilon \iota \alpha \varsigma$ тov $\operatorname{I\sigma } \rho a \eta \lambda)$. Perfect passive participle of $\alpha \pi \alpha \lambda \lambda o \tau \rho \iota \omega$, for which see Col 1:21. Here followed by ablative case $\pi о \lambda \iota \tau \varepsilon \iota \alpha \varsigma$, old word from $\pi \circ \lambda \iota \tau \varepsilon v \omega$, to be a citizen (Php 1:27) from $\pi 0 \lambda \iota \tau \eta \varsigma$ and that from $\pi о \lambda_{ı} \varsigma$ (city). Only twice in N.T., here as commonwealth (the spiritual Israel or Kingdom of God) and Ac 22:28 as citizenship.

Strangers from the covenants of the promise ( $\left.\xi_{\varepsilon \nu o} \tau \omega \nu \delta \iota \alpha \theta \eta \kappa \omega \nu \tau \eta \varsigma \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \iota \alpha \varsigma\right)$. For $\xi \varepsilon v o \varsigma$ (Latin hospes), as stranger see Mt 25:35,38,43f. , as guest-friend see Ro 16:23. Here it is followed by the ablative case $\delta \iota \alpha \theta \eta \kappa \omega v$.

Having no hope ( $\varepsilon \lambda \pi \iota \delta \alpha \mu \eta \varepsilon \chi o v \tau \varepsilon \varsigma$ ). No hope of any kind. In Ga 4:8 оик (strong negative) occurs with $\varepsilon เ \delta o \tau \varepsilon \varsigma ~ \theta \varepsilon o v$, but here $\mu \eta$ gives a more subjective picture (1Th 4:5 ).

Without God ( $\alpha \theta \varepsilon o$ ). Old Greek word, not in LXX, only here in N.T. Atheists in the original sense of being without God and also in the sense of hostility to God from failure to worship him. See Paul's words in Ro 1:18-32 . "In the world" ( $\varepsilon \nu \tau \omega \kappa o \sigma \mu \omega$ ) goes with both phrases. It is a terrible picture that Paul gives, but a true one.

Eph 2:13
But now ( $v v \vee \delta \varepsilon$ ). Strong contrast, as opposed to "at that time."
Afar off ( $\mu \alpha \kappa \rho \alpha v$ ). Adverb (accusative feminine adjective with oסov understood). From the $\pi о \lambda ı \varepsilon \varepsilon \propto$ and its hope in God.

Are made nigh ( $\varepsilon \gamma \varepsilon \nu \eta \forall \eta \tau \varepsilon \varepsilon \gamma \gamma \cup \varsigma)$. First aorist passive indicative of $\gamma \iota \nu \circ \mu \alpha$, a sort of timeless aorist. Nigh to the commonwealth of Israel in Christ.

In the blood of Christ ( $\varepsilon v \tau \omega \alpha \not \mu \alpha \tau \tau o v$ X $\rho \iota \sigma \tau o v$ ). Not a perfunctory addition, but essential ( $1: 7$ ), particularly in view of the Gnostic denial of Christ's real humanity.

Eph 2:14
For he is our peace ( $\alpha v \tau o \varsigma \gamma \alpha \rho \varepsilon \sigma \tau \iota \nu \eta \varepsilon \iota \rho \eta \nu \eta \eta \mu \omega \nu$ ). He himself, not just what he did (necessary as that was and is). He is our peace with God and so with each other (Jews and Gentiles).

Both one ( $\tau \alpha \alpha \mu \varphi о \tau \varepsilon \rho \alpha \varepsilon v)$. "The both" (Jew and Gentile). Jesus had said "other sheep I have which are not of this fold" (Joh 10:16 ).

One ( $\varepsilon v$ ) is neuter singular (oneness, unity, identity) as in Ga 3:28. Race and national distinctions vanish in Christ. If all men were really in Christ, war would disappear.

Brake down the middle wall of partition ( $\tau \circ \mu \varepsilon \sigma о \tau \circ \iota \chi \circ v \tau o v \varphi \rho \alpha \gamma \mu \circ v \lambda \nu \sigma \alpha \varsigma)$. "Having loosened (first aorist active participle of $\lambda \nu \omega$, see Joh 2:19) the middle-wall (late word, only here in N.T., and very rare anywhere, one in papyri, and one inscription) of partition ( $\varphi \rho \alpha \gamma \mu \circ v$, old word, fence, from $\varphi \rho \alpha \sigma \sigma \omega$, to fence or hedge, as in Mt 21:33 )." In the temple courts a partition wall divided the court of the Gentiles from the court of Israel with an inscription forbidding a Gentile from going further (Josephus, Ant. VIII. 3, 2). See the uproar when Paul was accused of taking Trophimus beyond this wall (Ac 21:28).

Eph 2:15
Having abolished ( $\kappa \alpha \tau \alpha \rho \gamma \eta \sigma \alpha \varsigma)$. First aorist active participle of $\kappa \alpha \tau \alpha \rho \gamma \varepsilon \omega$, to make null and void.

The enmity ( $\tau \eta v \varepsilon \chi \theta \rho a v$ ). But it is very doubtful if $\tau \eta v \varepsilon \chi \theta \rho a v$ (old word from $\varepsilon \chi \theta \rho \circ \varsigma$, hostile, $\mathrm{Lu} 23: 12$ ) is the object of кат $\rho \gamma \eta \sigma \alpha \varsigma$. It looks as if it is in apposition with to $\mu \varepsilon \sigma o \tau o r \chi o v$ and so the further object of $\lambda v \sigma a \varsigma$. The enmity between Jew and Gentile was
the middle wall of partition. And then it must be decided whether "in his flesh" ( $\varepsilon v \tau \eta \sigma \alpha \rho \kappa$ avtou) should be taken with $\lambda$ voas and refer especially to the Cross (Col 1:22) or be taken with ката $\rho \eta \eta \sigma a c$. Either makes sense, but better sense with $\lambda v \sigma \alpha c$. Certainly "the law of commandments in ordinances ( $\tau 0 v v o \mu o v \tau \omega v \varepsilon v \tau o \lambda \omega v \varepsilon v \delta o \gamma \mu \alpha \sigma \tau v$ ) is governed by катарүпбас.

That he might create ( $\mathrm{tva} k \tau \iota \sigma \eta$ ). Final clause with first aorist active subjunctive of $\kappa \tau \iota \zeta \omega$.

The twain ( tovc $\delta v o$ ). The two men (masculine here, neuter in verse 14), Jew and Gentile.

One new man ( $\varepsilon \iota \varsigma \varepsilon v a$ кaıvov $\alpha v \theta \rho \omega \pi \sigma v$ ). Into one fresh man (Col 3:9-11) "in himself" ( $\varepsilon v \alpha \cup \tau \omega)$. Thus alone is it possible.

Making peace ( $\pi$ ot $\omega v \varepsilon \iota \rho \eta \nu \eta v$ ). Thus alone can it be done. Christ is the peace-maker between men, nations, races, classes.

Eph 2:16
And might reconcile ( $\kappa \alpha \alpha \pi о \kappa \alpha \tau \alpha \lambda \lambda \alpha \xi \eta$ ). Final clause with $\tau \alpha \alpha$ understood of first aorist active subjunctive of $\alpha \pi о к а \tau \alpha \lambda \lambda \alpha \sigma \sigma \omega$ for which see $\operatorname{Col} 1: 20,22$.

In one body ( $\varepsilon v \varepsilon v \sigma \omega \mu \alpha \tau$ ). The "one new man" of verse 15 of which Christ is Head ( 1:23), the spiritual church. Paul piles up metaphors to express his idea of the Kingdom of God with Christ as King (the church, the body, the commonwealth of Israel, oneness, one new man in Christ, fellow-citizens, the family of God, the temple of God).

Thereby ( $\varepsilon v \alpha \cup \tau \omega)$. On the Cross where he slew the enmity (repeated here) between Jew and Gentile.

Eph 2:17
Preached peace ( $\left.\varepsilon u \eta \gamma \gamma^{\varepsilon} \lambda_{\iota} \sigma \alpha \tau o \varepsilon \iota \rho \eta \nu \eta \nu\right)$. First aorist middle of $\varepsilon v a \gamma \gamma \varepsilon \lambda \iota \zeta \omega$. "He gospelized peace" to both Jew and Gentile, "to the far off ones" (тоь $\mu \alpha \kappa \rho \alpha v)$ and "to the nigh ones" ( $\tau$ otc $\varepsilon \gamma \gamma \cup \varsigma)$ ) By the Cross and after the Cross Christ could preach that message.

Eph 2:18
Through him ( $\delta \mathrm{I}^{\prime}$ avtov). Christ.
We both (o а $\mu \varphi о \tau \varepsilon \rho о$ ). "We the both" (Jew and Gentile).
Our access ( $\tau \eta \vee \pi \rho o \sigma \alpha \gamma \omega \gamma \eta \nu$ ). The approach, the introduction as in Ro 5:2 .
In one Spirit ( $\varepsilon v \varepsilon \vee \pi v \varepsilon v \mu \alpha \tau$ ). The Holy Spirit.
Unto the Father ( $\pi \rho \circ \varsigma \tau \tau v \pi \alpha \tau \varepsilon \rho \alpha$ ). So the Trinity as in 1:13f. The Three Persons all share in the work of redemption.

Eph 2:19
So then ( $\alpha \rho \alpha o v v$ ). Two inferential particles (accordingly therefore).
No more (ouk\&т). No longer.

Sojourners (тарокко). Old word for dweller by (near by, but not in). So Ac 7:6,29; 1Pe 2:11 (only other N.T. examples). Dwellers just outside the house or family of God.

Fellow-citizens ( $\sigma \cup v \pi о \lambda ı \tau \alpha$, old, but rare word, here only in N.T.), members now of

Of the household of God (огкєь тov $\theta$ عov). Old word from оюкоৎ (house, household), but in N.T. only here, Ga 6:10; 1Ti 5:8. Gentiles now in the family of God (Ro 8:29).

Eph 2:20
Being built upon ( $\varepsilon \pi о к к о \delta о \mu \eta \theta \varepsilon v \tau \varepsilon \varsigma)$. First aorist passive participle of $\varepsilon \pi о ю к о \delta о \mu \varepsilon \omega$, for which double compound verb see 1Co 3:10; Co; 2:17.

The foundation ( $\varepsilon \pi \tau \omega \theta \varepsilon \mu \varepsilon \lambda เ \omega$ ). Repetition of $\varepsilon \pi$ with the locative case. See 1Co 3:11 for this word.

Of the apostles and prophets ( $\tau 0 v \alpha \pi о \sigma \tau о \lambda \omega v \kappa \alpha \pi \rho \circ \varphi \eta \tau \omega v$ ). Genitive of apposition with $\theta \varepsilon \mu \varepsilon \lambda_{\iota} \omega$, consisting in. If one is surprised that Paul should refer so to the apostles, he being one himself, Peter does the same thing (2Pe 3:2). Paul repeats this language in 3:5.
 I $\eta \sigma o v$ ). Genitive absolute. The compound $\alpha \kappa \rho \circ \gamma \omega v i \alpha ı s$ occurs only in the LXX (first in Isa 28:16 ) and in the N.T. (here, 1Pe 2:6 ). $\Lambda \iota$ Өoc (stone) is understood. Jesus had spoken of himself as the stone, rejected by the Jewish builders (experts), but chosen of God as the head of the corner (Mt 21:42), $\varepsilon \iota \varsigma ~ к \varepsilon \varphi \alpha \lambda \eta \nu \gamma \omega v ı \alpha$. "The $\alpha \kappa \rho о \gamma \omega v ı \alpha \iota o c$ here is the primary foundation-stone at the angle of the structure by which the architect fixes a standard for the bearings of the walls and cross-walls throughout" (W. W. Lloyd).

Eph 2:21
Each several building ( $\pi \alpha \sigma \alpha$ оккоסо $\mu \eta$ ). So without article Aleph B D G K L. Оıкоסо $\mu \eta$ is a late word from оккоৎ and $\delta \varepsilon \mu \omega$, to build for building up (edification) as in Eph 4:29, then for the building itself as here (Mr 13:1f. ). Ordinary Greek idiom here calls for "every building," not for "all the building" (Robertson, Grammar, p. 772), though it is not perfectly clear what that means. Each believer is called a vaoc $\theta$ rov (1Co 3:16 ). One may note the plural in Mr 13:1 ( $\boldsymbol{\text { orко } \delta \mathrm { o } \mu \mathrm { \alpha } ) \text { ) of the various parts of the temple. Perhaps that is the idea here }}$ without precise definition of each oוкоסо $\mu \eta$. But there are examples of $\pi \alpha \varsigma$ without the article where "all" is the idea as in $\pi \alpha \sigma \eta \varsigma \kappa \tau \iota \sigma \varepsilon \omega \varsigma$ (all creation) in Col 1:15 .

Fitly framed together ( $\sigma v v a \rho \mu о \lambda о \gamma o \cup \mu \varepsilon v \eta$ ). Double compound from $\sigma v v$ and a $\rho \mu \mathrm{o} \lambda о \gamma \operatorname{c}$ (binding, $\alpha \rho \mu \circ \varsigma$, joint and $\lambda \varepsilon \gamma \omega$ ), apparently made by Paul and in N.T. only here and Eph 4:16. Architectural metaphor.

Into a holy temple ( $\varepsilon \varsigma \varsigma \sim \alpha o v a \gamma เ \rho)$ ). The whole structure with all the oוко $\delta$ o $\alpha$. Another metaphor for the Kingdom of God with which compare Peter's "spiritual house" (окоя $\pi v \varepsilon v \mu \alpha \tau \kappa \sigma$ ) in which each is a living stone being built in (1Pe 2:5).

Eph 2:22

Ye also are builded together ( $\kappa \alpha \nu \mu \varepsilon \iota \varsigma ~ \sigma v v о \iota к о \delta о \mu \varepsilon เ \sigma \theta \varepsilon)$ ). Ye Gentiles also. Present passive indicative (continuous process) of common old verb $\sigma v v o \iota \kappa o \delta o \mu \varepsilon \omega$, to build together with others or out of varied materials as here. Only here in N.T. In 1Pe 2:5 Peter uses оוко $\delta$ о $\mu \varepsilon \sigma \theta \varepsilon$ for the same process.

For a habitation ( $\varepsilon \iota \varsigma \kappa \alpha \tau о \iota \kappa \eta \tau \eta \rho ı v$ ). Late word (LXX), in N.T. only here and Re 18:2 . From катоккє $\omega$, to dwell, as Eph 3:17. Possibly each of us is meant here to be the "habitation of God in the Spirit" and all together growing $(\alpha v \xi \varepsilon)$ "into a holy temple in the Lord," a noble conception of the brotherhood in Christ.

## Ephesians 3

Eph 3:1
For this cause ( $\tau$ ov $\tau 0 v ~ \chi \alpha \rho ı v$ ). Use of $\chi \alpha \rho ı v$ (accusative of $\chi \alpha \rho ı \varsigma$ ) as a preposition with the genitive and referring to the preceding argument about God's elective grace. It is possible that Paul started to make the prayer that comes in verses 14-21 when he repeats tov tou $\chi \alpha \rho ı v$. If so, he is diverted by his own words "the prisoner of Christ Jesus in behalf of you Gentiles" (o $\delta \varepsilon \sigma \mu$ ос $\tau \operatorname{\tau ov}$ X $\rho \iota \sigma \tau o v$ I $\eta \sigma o v v \pi \varepsilon \rho \nu \mu \omega v \tau \omega v \varepsilon \theta v \omega v$ ) to set forth in a rich paragraph ( 1-13) God's use of him for the Gentiles.

## Eph 3:2

If so be that ye have heard ( $\varepsilon \gamma \varepsilon \eta \kappa о \cup \sigma \alpha \tau \varepsilon$ ). Condition of first class with $\varepsilon$ and first aorist active indicative and with the intensive particle $\gamma \varepsilon$ that gives a delicate touch to it all. On oוкогоцıаv (stewardship, dispensation) see 1:9; 3:9; Col 1:25 .

Eph 3:3
By revelation (ката $\alpha \pi о к \alpha \lambda \nu \psi \iota v$ ). Not essentially different from $\delta \iota^{\prime} \alpha \pi о \kappa \alpha \lambda \nu \psi \varepsilon \omega \varsigma$ (Gal 1:12 ). This was Paul's qualification for preaching "the mystery" ( $\tau 0 \mu v \sigma \tau \eta \rho เ o v$. See 1:9).

As I wrote afore ( $\kappa \alpha \theta \omega \varsigma \pi \rho о \varepsilon \gamma \rho \alpha \psi \alpha)$. First aorist active indicative of $\pi \rho о \gamma \rho \alpha \varphi \omega$ as in Ro 15:4, not picture forth as Ga 3:1. But when and where? Epistolary aorist for this Epistle? That is possible. A previous and lost Epistle as in 1Co 5:9 ? That also is abstractly possible. To the preceding discussion of the Gentiles? Possible and also probable.

In few words $(\varepsilon \vee \mathrm{o} \lambda \iota \gamma \omega)$. Not $=\pi \rho o$ o $\lambda \iota \gamma o v$, shortly before, but as in Ac 26:28 "in brief space or time" $=\sigma u v \tau o v \omega \varsigma$ (Ac 24:4), "briefly."

Eph 3:4
Whereby ( $\pi \rho \circ \varsigma$ o). "Looking to which," "according to which."
When ye read (avaүıv $\omega \sigma \kappa 0 \nu \tau \varepsilon \varsigma)$. This Epistle will be read in public.
My understanding in the mystery of Christ ( $\tau \eta \nu \sigma \nu v \varepsilon \sigma \tau \nu \mu \circ v \varepsilon \nu \tau \omega \mu \nu \sigma \tau \eta \rho \omega \omega$ tov X $\rho$ ıбтои). My "comprehension" ( $\sigma u v \varepsilon \sigma \iota v$, Col 1:9; 2:2 ). Every sermon reveals the preacher's grasp of "the mystery of Christ." If he has no insight into Christ, he has no call to preach.

Eph 3:5
In other generations ( $\varepsilon \tau \varepsilon \rho \alpha \iota \varsigma ~ \gamma \varepsilon v \varepsilon a \iota \varsigma)$. Locative case of time. He had already claimed this revelation for himself (verse 3). Now he claims it for all the other apostles and prophets of God.

Eph 3:6
To wit . Not in the Greek. But the infinitive ( $\varepsilon เ v \alpha)$ clause is epexegetical and gives the content of the revelation, a common idiom in the N.T. Ta $\varepsilon \theta \nu \eta$ is in the accusative of general reference. Paul is fond of compounds with $\sigma v v$ and here uses three of them.

Fellow-heirs ( $\sigma v v \kappa \lambda \eta \rho o v o \mu \alpha)$. Late and rare (Philo, inscriptions and papyri). See also Ro 8:17.

Fellow-members of the body ( $\sigma 0 v \sigma \omega \mu \alpha$ ). First found here and only here save in later ecclesiastical writers. Preuschen argues that it is equivalent to $\sigma v v \delta o u \lambda o \varsigma$ in $\operatorname{Col} 1: 7(\sigma \omega \mu \alpha$ in sense of $\delta o u \lambda o \varsigma)$.

Fellow-partakers ( $\sigma u \gamma \mu \varepsilon \tau о \chi \alpha)$. Another late and rare word (Josephus). Only here in N.T. In one papyrus in sense of joint possessor of a house.

Eph 3:7
For this verse see Col 1:25; Eph 1:19f.; 3:2 .
Eph 3:8
Unto me who am less than the least of all saints ( $\varepsilon \mu \circ \tau \omega \varepsilon \lambda \alpha \chi$ เб $\tau \circ \tau \varepsilon \rho \omega \pi \alpha v \tau \omega v \alpha \gamma \omega v$ ). Dative case $\varepsilon \mu \circ$ with $\varepsilon \lambda \circ \theta \eta$. The peculiar form $\varepsilon \lambda \alpha \chi$ ৷бтот $\rho \omega$ (in apposition with $\varepsilon \mu \mathrm{o}$ ) is a comparative ( $-\tau \varepsilon \rho \circ \varsigma$ ) formed on the superlative $\varepsilon \lambda \alpha \chi$ ৷ $\sigma \tau \circ$. This sort of thing was already done in the older Greek like $\varepsilon \sigma \chi \alpha \tau о \tau \varepsilon \rho o s$ in Xenophon. It became more common in the Koine. So the double comparative $\mu \varepsilon \iota \zeta о \tau \varepsilon \rho \alpha v$ in 3Jo 1:4. The case of $\alpha \gamma \omega v$ is ablative. This was not mock humility ( 15:19), for on occasion Paul stood up for his rights as an apostle (2Co 11:5).

The unsearchable riches of Christ ( $\tau$ а $\alpha v \varepsilon \xi ı \chi$ viaбтov $\pi \lambda$ outos tou Xpıбтou).
 first in Job 5:9; 9:10. Paul apparently got it from Job. Nowhere else in N.T. except Ro 11:33 . In later Christian writers. Paul undertook to track out the untrackable in Christ.

Eph 3:9
To make see ( $\varphi \omega \tau \tau \sigma \alpha$ ). First aorist active infinitive of $\varphi 0 \tau \iota \zeta \omega$, late verb, to turn the light on. With the eyes of the heart enlightened (Eph 1:18) one can then turn the light for others to see. See Col 1:26 .

Eph 3:10
To the intent that ( $\mathrm{t} \alpha \mathrm{o}$ ). Final clause.
Might be made known ( $\gamma v \omega \rho \iota \sigma \theta \eta$ ). First aorist passive subjunctive of $\gamma \nu \omega \rho \iota \zeta \omega$ with iva. The mystery was made known to Paul ( 3:3) and now he wants it blazoned forth to all powers (Gnostic aeons or what not).

Through the church ( $\delta ı \alpha \tau \eta \varsigma \varepsilon \kappa \kappa \lambda \eta \sigma \iota \varsigma)$ ). The wonderful body of Christ described in chapter Eph 2.

The manifold wisdom of God ( $\eta$ полилокклоц $\sigma о \varphi ı \alpha$ tov $\theta \varepsilon о v$ ). Old and rare word, much-variegated, with many colours. Only here in N.T. Поккıोоৎ (variegated) is more common (Mt 4:24).

Eph 3:11
According to the eternal purpose ( $\kappa \alpha \tau \alpha \pi \rho \circ \theta \varepsilon \sigma \iota v \tau \omega v \alpha \iota \omega v \omega v$ ). "According to the purpose ( $1: 11$ ) of the ages." God's purpose runs on through the ages. "Through the ages one eternal purpose runs."

Eph 3:12

In confidence $(\varepsilon \nu \pi \varepsilon \pi \circ \iota \theta \eta \sigma \varepsilon)$. Late and rare word from $\pi \varepsilon \pi o \iota \theta \alpha$. See 2Co 1:15.
Through our faith in him ( $\delta \iota \alpha \tau \eta \varsigma \pi \iota \sigma \tau \varepsilon \omega \varsigma \alpha v \tau 0 v$ ). Clearly objective genitive $\alpha v \tau o v$ (in him).

Eph 3:13
That ye faint not ( $\mu \eta \varepsilon v \kappa \alpha \kappa \varepsilon \iota v$ ). Object infinitive with $\mu \eta$ after aıтov $\mu \alpha$. The infinitive (present active) $\varepsilon ข \kappa \alpha \kappa \varepsilon เ \nu$ is a late and rare word (see already Lu 18:1; 2Th 3:13; 2Co 4:1,16; Ga 6:9 ) and means to behave badly in, to give in to evil ( $\varepsilon v, \kappa \propto \kappa о \varsigma)$. Paul urges all his apostolic authority to keep the readers from giving in to evil because of his tribulations for them.

Your glory ( $\delta o \xi \alpha v \mu \omega v$ ). As they could see.
Eph 3:14
I bow my knees ( $\kappa \alpha \mu \pi \tau \omega \tau \alpha$ үova $\tau \alpha \mu \circ$ ). He now prays whether he had at first intended to do so at 3:1 or not. Calvin supposes that Paul knelt as he dictated this prayer, but this is not necessary. This was a common attitude in prayer (Lu 22:41; Ac 7:40; 20:36; 21:5), though standing is also frequent (Mr 11:25; Lu 18:11,13).

Eph 3:15
Every family ( $\pi \alpha \sigma \alpha \pi \alpha \tau \rho \iota \alpha$ ). Old word ( $\pi \alpha \tau \rho \alpha$ is the usual form) from $\pi \alpha \tau \eta \rho$, descent from a common ancestor as a tribe or race. Some take it here as $=\pi \alpha \tau \rho \circ \tau \eta \varsigma$, fatherhood, but that is most unlikely. Paul seems to mean that all the various classes of men on earth and of angels in heaven get the name of family from God the Father of all.

Eph 3:16
That he would grant you ( $\imath v \alpha \delta \omega \mu \mathrm{v})$ ). Sub-final clause with $\mathrm{t} \alpha \mathrm{a}$ and the second aorist active subjunctive of $\delta \delta \omega \mu$, to give. There are really five petitions in this greatest of all Paul's prayers (one already in 1:16-23), two by the infinitives after ıva $\delta \omega$ ( $\kappa \rho \tau \alpha \iota \omega \theta \eta v a \iota$,
 $\iota v a \pi \lambda \eta \rho \omega \theta \eta \tau \varepsilon$. Nowhere does Paul sound such depths of spiritual emotion or rise to such heights of spiritual passion as here. The whole seems to be coloured with "the riches of His glory."

That ye may be strengthened ( $\kappa \rho \alpha \tau \alpha \iota \omega \theta \eta v \alpha$ ). First aorist passive infinitive of $\kappa \rho \alpha \tau \alpha \iota \omega$, late and rare (LXX, N.T.) from кратаıо, late form from кратоя (strength). See Lu 1:80. Paul adds $\delta v v a \mu \varepsilon$ (with the Spirit). Instrumental case.

In the inward man ( $\varepsilon \iota \varsigma ~ \tau o v \varepsilon \sigma \omega \alpha \nu \theta \rho \omega \pi \sigma \nu$ ). Same expression in 2Co 4:16 (in contrast with the outward $\varepsilon \xi \omega$, man) and in Ro 7:22 .

Eph 3:17
That Christ may dwell (катоькךба тоv X $\rho \iota \sigma \tau о v$ ). Another infinitive (first aorist active) after ıv $\alpha \delta \omega$. Kaтоเкє $\omega$ is an old verb to make one's home, to be at home. Christ (Xpıбтov accusative of general reference) is asked to make his home in our hearts. This is the ideal, but a deal of fixing would have to be done in our hearts for Christ.

Being rooted and grounded in love ( $\varepsilon v \alpha \gamma \alpha \pi \eta \varepsilon \rho \rho ı \zeta \omega \mu \varepsilon \nu \circ \kappa \alpha \tau \varepsilon \theta \varepsilon \mu \varepsilon \lambda ı \omega \mu \varepsilon v o$ ). But it is not certain whether $\varepsilon v a \gamma a \pi \eta$ should go with these participles or with the preceding infinitive катоюк $\sigma \alpha$ (dwell). Besides, these two perfect passive participles (from $\rho \iota \zeta o \omega$, old verb, in N.T. only here and $\operatorname{Col} 2: 7$, and from $\theta \varepsilon \mu \varepsilon \lambda \iota \omega$, see also $\operatorname{Col} 1: 23$ ) are in the nominative case and are to be taken with $\imath \sim \alpha \varepsilon \xi \sigma \chi \nu \sigma \eta \tau \varepsilon$ and are proleptically placed before $\imath v a$. Verse 18 should really begin with these participles. Paul piles up metaphors (dwelling, rooted, grounded).

## Eph 3:18

That ye may be strong ( $\iota v \alpha \varepsilon \xi \iota \sigma \chi \nu \sigma \eta \tau \varepsilon$ ). Sub-final clause again with $\iota v \alpha$ and the first aorist active subjunctive of $\varepsilon \xi \iota \sigma \chi v \omega$, a late and rare compound (from $\varepsilon \xi$, $\iota \sigma \chi v \omega$ ) to have full strength. Here only in N.T.

To apprehend ( $\kappa \alpha \tau \alpha \lambda \alpha \beta \varepsilon \sigma \theta \alpha$ ). Second aorist middle infinitive of $\kappa \alpha \tau \alpha \lambda \alpha \mu \beta \alpha v \omega$, old and common verb, to lay hold of effectively (ката-), here with the mind, to grasp (Ac 25:25 ).

With all the saints ( $\sigma v \nu \pi \alpha \sigma \iota \nu \tau o \iota \varsigma ~ a \gamma ı \iota \varsigma)$. No isolated privilege. Fellowship open to all. Paul gives a rectangular (four dimension) measure of love (breadth $\pi \lambda \alpha \tau \circ \varsigma$, length $\mu \eta \kappa \circ \varsigma$, height $v \psi \circ \varsigma$, depth $\beta a \theta o \varsigma$, all common enough words).

Eph 3:19
And to know ( $\gamma \nu \omega \nu \alpha \tau \varepsilon$ ). Second aorist active infinitive with $\varepsilon \xi \iota \sigma \chi \nu \sigma \eta \tau \varepsilon$.
Which passeth knowledge ( $\tau \eta \nu v \pi \varepsilon \rho \beta \alpha \lambda \lambda o v \sigma \alpha \nu \tau \eta \varsigma \gamma \nu \omega \sigma \varepsilon \omega \varsigma)$. Ablative case $\gamma \nu \omega \sigma \varepsilon \omega \varsigma$ after $v \pi \varepsilon \rho \beta \alpha \lambda \lambda о v \sigma \alpha v$ (from $v \pi \varepsilon \rho \beta \alpha \lambda \lambda \omega$ ). All the same Paul dares to scale this peak.

That ye may be filled with all the fulness of God (ıva $\pi \lambda \eta \rho \omega \theta \eta \tau \varepsilon \varepsilon \iota \varsigma \pi \alpha \nu \tau 0 \pi \lambda \eta \rho \omega \mu \alpha$ tov $\theta \varepsilon o v$ ). Final clause again (third use of tva in the sentence) with first aorist passive subjunctive of $\pi \lambda \eta \rho o \omega$ and the use of $\varepsilon \iota \varsigma$ after it. One hesitates to comment on this sublime climax in Paul's prayer, the ultimate goal for followers of Christ in harmony with the injunction in Mt 5:48 to be perfect ( $\tau \varepsilon \lambda \varepsilon เ 0$ ) as our heavenly Father is perfect. There is nothing that any one can add to these words. One can turn to Ro 8:29 again for our final likeness to God in Christ.

Eph 3:20
That is able to do ( $\tau \omega \delta \nu v \alpha \mu \varepsilon \nu \omega \pi \sigma \not \eta \sigma \alpha$ ). Dative case of the articular participle (present middle of $\delta v v a \mu \alpha)$. Paul is fully aware of the greatness of the blessings asked for, but the Doxology ascribes to God the power to do them for us.

Above all $(v \pi \varepsilon \rho \pi \alpha v \tau \alpha)$. Not simply $\pi \alpha v \tau \alpha$, but $v \pi \varepsilon \rho$ beyond and above all.
Exceedingly abundantly (v $\tau \varepsilon \rho \varepsilon \kappa \pi \varepsilon \rho เ \sigma \sigma o v)$. Late and rare double compound (v $\pi \varepsilon \rho$, $\varepsilon \kappa, \pi \varepsilon \rho \iota \sigma \sigma o v)$ adverb (LXX, 1Th 3:10; 5:13; Eph 3:20). It suits well Paul's effort to pile Pelion on Ossa.

That we ask ( $\omega v$ aitov $\mu \varepsilon \theta \alpha$ ). Ablative of the relative pronoun attracted from the accusative $\alpha$ to the case of the unexpressed antecedent tov $\omega v$. Middle voice ( $\alpha$ ıтоט $\mu \varepsilon \theta \alpha$ ) "we ask for ourselves."

Or think ( $\eta$ voou $\mu \varepsilon v$ ). The highest aspiration is not beyond God's "power" ( $\delta v v a \mu \nu)$ to bestow.

Eph 3:21
In the church ( $\varepsilon v \tau \eta \varepsilon \kappa \kappa \lambda \eta \sigma \omega \alpha$ ). The general church, the body of Christ.
And in Christ Jesus ( $\kappa \alpha \varepsilon v$ X $\rho \iota \sigma \tau \omega \mathrm{I} \eta \sigma \circ v$ ). The Head of the glorious church.

## Ephesians 4

Eph 4:1
Wherewith ye were called ( $\eta \varsigma \varepsilon \kappa \lambda \eta \theta \eta \tau \varepsilon$ ). Attraction of the relative $\eta \varsigma$ to the genitive of the antecedent $\kappa \lambda \eta \sigma \varepsilon \omega \varsigma$ (calling) from the cognate accusative $\eta \nu$ with $\varepsilon \kappa \lambda \eta \theta \eta \tau \varepsilon$ (first aorist passive indicative of $\kappa \alpha \lambda \varepsilon \omega$, to call. For the list of virtues here see Col 3:12 . To $\alpha \nu \varepsilon \chi \circ \mu \varepsilon v o \alpha \lambda \lambda \eta \lambda \omega \nu$ (Col 3:13 ) Paul here adds "in love" ( $\varepsilon v a \gamma \alpha \pi \eta)$, singled out in Col 3:14

Eph 4:3
The unity ( $\tau \eta v \varepsilon v o \tau \eta \tau \alpha$ ). Late and rare word (from $\varepsilon \varsigma \varsigma$, one), in Aristotle and Plutarch, though in N.T. only here and verse 13.

In the bond of peace ( $\varepsilon v \tau \omega \sigma \nu v \delta \varepsilon \sigma \mu \omega \tau \eta \varsigma \varepsilon \iota \eta \nu \eta \varsigma)$. In $\operatorname{Col}$ 3:14 $\alpha \gamma \alpha \pi \eta$ (love) is the $\sigma v v \delta \varepsilon \sigma \mu \circ \varsigma$ (bond). But there is no peace without love (verse 2).

Eph 4:4
One body ( $\varepsilon v \sigma \omega \mu \alpha$ ). One mystical body of Christ (the spiritual church or kingdom, cf. 1:23; 2:16 ).

One Spirit ( $\varepsilon v \pi \nu \varepsilon v \mu \alpha)$. One Holy Spirit, grammatical neuter gender (not to be referred to by "it," but by "he").

In one hope ( $\varepsilon v \mu \iota \varepsilon \lambda \pi \tau \delta$ ). The same hope as a result of their calling for both Jew and Greek as shown in chapter 2.

Eph 4:5
One Lord ( $\varepsilon ı \varsigma$ Kupıos). The Lord Jesus Christ and he alone (no series of aeons).
One faith ( $\mu$ I $\alpha / \sigma \tau \iota \varsigma)$. One act of trust in Christ, the same for all (Jew or Gentile), one way of being saved.

One baptism ( $\varepsilon v \beta \alpha \pi \tau \iota \sigma \mu \alpha)$. The result of baptizing ( $\beta \alpha \pi \tau \iota \sigma \mu \alpha$ ), while $\beta \alpha \pi \tau \iota \sigma \mu \circ \varsigma$ is the act. Only in the N.T. ( $\beta \alpha \pi \tau \iota \sigma \mu$ os in Josephus) and ecclesiastical writers naturally. See Mr 10:38. There is only one act of baptism for all (Jews and Gentiles) who confess Christ by means of this symbol, not that they are made disciples by this one act, but merely so profess him, put Christ on publicly by this ordinance.

Eph 4:6
One God and Father of all ( $\varepsilon \iota \varsigma \theta \varepsilon o \varsigma ~ \kappa \alpha ~ \pi \alpha \tau \eta \rho ~ \pi \alpha \nu \tau \omega \nu)$ ). Not a separate God for each nation or religion. One God for all men. See here the Trinity again (Father, Jesus, Holy Spirit).

Who is over all (o $\varepsilon \pi \pi \alpha v \tau \omega v$ ),
and through all ( $\kappa \alpha \delta \alpha \alpha \pi \nu \tau \omega v$ ),
and in all ( $\kappa \alpha \varepsilon v \pi \alpha \sigma \iota v$ ). Thus by three prepositions ( $\varepsilon \pi \iota, \delta \iota \alpha, \varepsilon v$ ) Paul has endeavoured to express the universal sweep and power of God in men's lives. The pronouns ( $\pi \alpha \nu \tau \omega \nu$,
$\pi \alpha \nu \tau \omega v, \pi \alpha \sigma \iota v)$ can be all masculine, all neuter, or part one or the other. The last "in all" is certainly masculine and probably all are.

Eph 4:7
According to the measure of the gifts of Christ ( $\kappa \alpha \tau \alpha$ то $\mu \varepsilon \tau \rho о \nu \tau \eta \varsigma \delta \omega \rho \varepsilon \alpha \varsigma$ тоv Xpıбтou). Each gets the gift that Christ has to bestow for his special case. See 1Co 12:4ff.; Ro 12:4-6.

Eph 4:8
Wherefore he saith ( $\delta \iota \circ \lambda \varepsilon \gamma \varepsilon$ ). As a confirmation of what Paul has said. No subject is expressed in the Greek and commentators argue whether it should be o $\theta \varepsilon$ ç (God) or $\eta$ $\gamma \rho \alpha \varphi \eta$ (Scripture). But it comes to God after all. See Ac 2:17. The quotation is from Ps 68:18 , a Messianic Psalm of victory which Paul adapts and interprets for Christ's triumph over death.

He led captivity captive ( $\eta \not \chi \mu \alpha \lambda \omega \tau \varepsilon v \sigma \varepsilon v$ aı $\chi \mu \lambda \lambda \omega \sigma \iota \alpha v$ ). Cognate accusative of $\operatorname{aı} \chi \mu \alpha \lambda \omega \sigma \iota \alpha v$, late word, in N.T. only here and Re 13:10. The verb also ( $\alpha<\chi \mu \alpha \lambda \omega \tau \varepsilon v \omega)$ is from the old word aix $\mu \boldsymbol{\alpha} \omega \tau$ тos, captive in war (in N.T. only in Lu 4:18), in LXX and only here in N.T.

Eph 4:9
Now this ( $\tau 0 \delta \varepsilon$ ). Paul picks out the verb $\alpha v \alpha \beta a \varsigma$ (second aorist active participle of $\alpha v \alpha \beta \alpha เ v \omega$, to go up), changes its form to $\alpha v \varepsilon \beta \eta$ (second aorist indicative), and points the article ( $\tau 0$ ) at it. Then he concludes that it implied a previous кат $\alpha \beta \alpha c$ (coming down).

Into the lower parts of the earth ( $\varepsilon ı \tau \tau \alpha \kappa \alpha \tau \omega \tau \varepsilon \rho \alpha \tau \eta \varsigma \gamma \eta \varsigma)$. If the $\alpha v \alpha \beta \alpha \varsigma$ is the Ascension of Christ, then the кат $\beta \alpha \varsigma$ would be the Descent (Incarnation) to earth and $\tau \eta \varsigma \gamma \eta \varsigma$ would be the genitive of apposition. What follows in verse 10 argues for this view. Otherwise one must think of the death of Christ (the descent into Hades of Ac 2:31).

Eph 4:10
Is the same also (avtoc $\varepsilon \sigma \tau \iota v)$. Rather, "the one who came down (o кат $\alpha \beta a \varsigma$, the Incarnation) is himself also the one who ascended (o avaßac, the Ascension)."

Far above (v $\quad \varepsilon \rho a v \omega$ ). See 1:21.
All the heavens ( $\pi \alpha v \tau \omega v \tau \omega \nu o v \rho \alpha v \omega v$ ). Ablative case after $v \pi \varepsilon \rho \alpha v \omega$. For the plural used of Christ's ascent see Heb 4:14; 7:27. Whether Paul has in mind the Jewish notion of a graded heaven like the third heaven in 2Co 12:2 or the seven heavens idea one does not know.

That he might fill all things (iv $\pi \lambda \eta \rho \omega \sigma \eta \tau \alpha \pi \alpha \nu \tau \alpha$ ). This purpose we can understand, the supremacy of Christ ( $\operatorname{Col}$ 2:9f. ).

Eph 4:11
And he gave ( $\kappa \alpha \alpha \cup \tau o \varsigma ~ \varepsilon \delta \omega \kappa \varepsilon v)$ ). First aorist active indicative of $\delta \iota \delta \omega \mu$. In 1Co 12:28 Paul uses $\varepsilon \theta \varepsilon$ to (more common verb, appointed), but here repeats $\varepsilon \delta \omega \kappa \varepsilon v$ from the quotation in verse 8 . There are four groups ( $\tau 0 \cup \varsigma ~ \mu \varepsilon v$, tovৎ $\delta \varepsilon$ three times, as the direct object of
$\varepsilon \delta \omega \kappa \varepsilon v$ ）．The titles are in the predicate accusative（ $\alpha \pi о \sigma \tau о \lambda о v \sigma, \pi \rho о \varphi \eta \tau \alpha \sigma$ ，лоњцvац ка $\delta \iota \delta \alpha \sigma \kappa \alpha \lambda$ ov̧）．Each of these words occurs in 1Co 12：28（which see for discussion）except $\pi о \mu \varepsilon v a \varsigma$（shepherds）．This word $\pi о \mu \eta \nu$ is from a root meaning to protect．Jesus said the good shepherd lays down his life for the sheep（Joh 10：11）and called himself the Good Shepherd．In Heb 13：20 Christ is the Great Shepherd（cf．1Pe 2：25）．Only here are preachers termed shepherds（Latin pastores）in the N．T．But the verb $\pi \circ \mu \alpha ı v \omega$ ，to shepherd，is employed by Jesus to Peter（Joh 21：16 ），by Peter to other ministers（1Pe 5：2），by Paul to the elders （bishops）of Ephesus（Ac 20：28）．Here Paul groups＂shepherds and teachers＂together．All these gifts can be found in one man，though not always．Some have only one．

Eph 4：12
For the perfecting（ $\pi \rho \circ \varsigma \tau<\nu \kappa \alpha \tau \alpha \rho \tau \iota \sigma \mu \circ v$ ）．Late and rare word（in Galen in medical sense，in papyri for house－furnishing），only here in N．T．，though кataptıoıs in 2Co 13：9， both from катарт兀ऽ $\omega$ ，to mend（Mt 4：21；Ga 6：1）．＂For the mending（repair）of the saints．＂

Unto the building up（ $\varepsilon \varsigma \varsigma$ огко $\delta о \mu \eta \nu$ ）．See 2：21．This is the ultimate goal in all these varied gifts，＂building up．＂

Eph 4：13
Till we all attain（ $\mu \varepsilon \chi \rho \kappa \alpha \tau \alpha v \tau \eta \sigma \omega \mu \varepsilon v$ o $\pi \alpha \nu \tau \varepsilon \varsigma)$ ．Temporal clause with purpose idea with $\mu \varepsilon \chi \rho$ and the first aorist active subjunctive of $\kappa \alpha \tau \alpha \nu \tau \alpha \omega$ ，late verb，to come down to the goal（Php 3：11）．＂The whole＂including every individual．Hence the need of so many gifts．

Unto the unity of the faith（ $\varepsilon ા \varsigma \tau \eta \nu \varepsilon v o \tau \eta \tau \alpha \tau \eta \varsigma \pi \iota \sigma \tau \varepsilon \omega \varsigma$ ）．＂Unto oneness of faith＂（of trust）in Christ（verse 3）which the Gnostics were disturbing．

And of the knowledge of the Son of God（ $\kappa \alpha \tau \eta \varsigma \varepsilon \pi \downarrow \gamma \nu \omega \sigma \varepsilon \omega \varsigma$ tov vov tov $\theta \varepsilon o v$ ）． Three genitives in a chain dependent also on $\tau \eta v \varepsilon v o \tau \eta \tau \alpha$ ，＂the oneness of full（ $\varepsilon \pi \iota-$ ）know－ ledge of the Son of God，＂in opposition to the Gnostic vagaries．

Unto a full－grown man（ $\varepsilon ા \varsigma \alpha v \delta \rho \alpha \tau \varepsilon \lambda \varepsilon \circ \circ v$ ）．Same figure as in 2：15 and $\tau \varepsilon \lambda \varepsilon ⿺ 𠃊 \varsigma$ in sense of adult as opposed to $v \eta \pi \circ \circ$（infants）in 14.

Unto the measure of the stature（ $\varepsilon ા \varsigma \mu \varepsilon \tau \rho \circ \vee \eta \lambda \iota \kappa ı \varsigma)$ ．So apparently $\eta \lambda_{\iota \kappa ı}$ here as in Lu 2：52，not age（Joh 9：21 ）．Boys rejoice in gaining the height of a man．But Paul adds to
 3：19．And yet some actually profess to be＂perfect＂with a standard like this to measure by！ No pastor has finished his work when the sheep fall so far short of the goal．

Eph 4：14
That we may be no longer children（ $\llcorner v \alpha \mu \eta \kappa \varepsilon \tau \omega \mu \varepsilon \nu \nu \eta \pi \iota \circ$ ）．Negative final clause with present subjunctive．Some Christians are quite content to remain＂babes＂in Christ and never cut their eye－teeth（Heb 5：11－14），the victims of every charlatan who comes along．

Tossed to and fro ( $\kappa \lambda \nu \delta \omega v \iota \zeta \rho \varepsilon \nu \nu$ ). Present passive participle of $\kappa \lambda \nu \delta \omega v \iota \zeta \circ \mu \alpha$, late verb from $\kappa \lambda \nu \delta \omega \nu$ (wave, Jas 1:6), to be agitated by the waves, in LXX, only here in N.T. One example in Vettius Valens.

Carried about ( $\pi \varepsilon \rho เ \varphi \varepsilon \rho о \mu \varepsilon \nu o$ ). Present passive participle of $\pi \varepsilon \rho \iota \varphi \varepsilon \rho \omega$, old verb, to carry round, whirled round "by every wind ( $\alpha v \varepsilon \mu \omega$, instrumental case) of teaching." In some it is all wind, even like a hurricane or a tornado. If not anchored by full knowledge of Christ, folks are at the mercy of these squalls.

By the sleight ( $\varepsilon \nu \tau \eta \kappa \cup \beta \iota \alpha$ ). "In the deceit," "in the throw of the dice" ( $\kappa \cup \beta \iota \alpha$, from $\kappa v \beta о \varsigma, ~ c u b e)$, sometimes cheating.

In craftiness ( $\varepsilon v \pi \alpha \nu o v \rho \gamma / \alpha)$. Old word from $\pi \alpha v o v \rho \gamma o \varsigma(\pi \alpha \nu, \varepsilon \rho \gamma o v$, any deed, every deed), cleverness, trickiness.

After the wiles of error ( $\pi \rho \circ \varsigma \tau \eta \nu \mu \varepsilon \theta$ o $\delta ı \alpha \nu \tau \eta \varsigma \pi \lambda \alpha \nu \eta \varsigma$ ). M $\operatorname{M\varepsilon } \theta$ o $\delta \iota \alpha$ is from $\mu \varepsilon \theta$ o $\delta \varepsilon v \omega$ ( $\mu \varepsilon \tau \alpha$, o $\delta o \varsigma$ ) to follow after or up, to practise deceit, and occurs nowhere else (Eph 4:13; 6:11) save in late papyri in the sense of method. The word $\pi \lambda \alpha \nu \eta \varsigma$ (wandering like our "planet") adds to the evil idea in the word. Paul has covered the whole ground in this picture of Gnostic error.

Eph 4:15
In love ( $\varepsilon v \alpha \gamma \alpha \pi \eta$ ). If truth were always spoken only in love!
May grow into him ( $\alpha v \xi \eta \sigma \omega \mu \varepsilon v \varepsilon \iota \varsigma ~ \alpha v \tau o v$ ). Supply $v \alpha$ and then note the final use of the first aorist active subjunctive. It is the metaphor of verse 13 (the full-grown man). We are the body and Christ is the Head. We are to grow up to his stature.

Eph 4:16
From which $(\varepsilon \xi$ ov). Out of which as the source of energy and direction.
Fitly framed ( $\sigma v v a \rho \mu o \lambda o \gamma o v \mu \varepsilon v o v)$. See 2:21 for this verb.
Through that which every joint supplieth ( $\delta \iota \alpha \pi \alpha \sigma \eta \varsigma \alpha \varphi \eta \varsigma \tau \eta \varsigma \varepsilon \pi \iota \chi \circ \rho \eta \gamma \iota \alpha \varsigma)$. Literally, "through every joint of the supply." See Col 2:19 for $\alpha \varphi \eta$ and Php 1:19 for the late word $\varepsilon \pi \iota \chi \circ \rho \eta \gamma \iota \alpha$ (only two examples in N.T.) from $\varepsilon \pi \iota \chi \circ \rho \eta \gamma \varepsilon \omega$, to supply (Col 2:19).

In due measure $(\varepsilon \nu \mu \varepsilon \tau \rho \omega)$. Just "in measure" in the Greek, but the assumption is that each part of the body functions properly in its own sphere.

Unto the building up of itself ( $\varepsilon \iota \varsigma ~ о \iota к о \delta о \mu \eta \nu \varepsilon \alpha \cup \tau о v) . ~ M o d e r n ~ k n o w l e d g e ~ o f ~ c e l l ~ l i f e ~$ in the human body greatly strengthens the force of Paul's metaphor. This is the way the body grows by cooperation under the control of the head and all "in love" ( $\varepsilon v \alpha \gamma a \pi \eta$ ).

Eph 4:17
That ye no longer walk ( $\mu \eta \kappa \varepsilon \tau v \mu \alpha \varsigma \pi \varepsilon \rho \iota \pi \alpha \tau \varepsilon \iota v$ ). Infinitive (present active) in indirect command (not indirect assertion) with accusative $v \mu a \varsigma$ of general reference.

In vanity of their mind ( $\varepsilon v \mu \alpha \tau \alpha \iota \tau \eta \tau \tau 0 v \nu o o s \alpha v \tau \omega v$ ). "In emptiness (from $\mu \alpha \tau \alpha \circ \varsigma$, late and rare word. See Ro 8:20 ) of their intellect (voos, late form for earlier genitive vov, from vous).

Eph 4:18
Being darkened ( $\varepsilon \sigma \kappa о \tau \omega \mu \varepsilon v o$ ovtء¢). Periphrastic perfect passive participle of $\sigma \kappa о \tau о \omega$, old verb from бкотоৎ (darkness), in N.T. only here and Re 9:2; 16:10 .

In their understanding ( $\tau \eta \delta_{1 \alpha v o ı \alpha}$ ). Locative case. Probably $\delta \iota a v o \iota \alpha(\delta ı \alpha$, vouc) includes the emotions as well as the intellect (vovc). It is possible to take ovteऽ with $\alpha \pi \eta \lambda \lambda о \tau \rho \omega \mu \varepsilon v o$ (see 2:12) which would then be periphrastic (instead of $\varepsilon \sigma \kappa о \tau \omega \mu \varepsilon v o$ ) perfect passive participle.

From the life of God ( $\tau \eta \varsigma \zeta \omega \eta \varsigma$ tov $\theta \varepsilon o v$ ). Ablative case $\zeta \omega \eta \varsigma$ after $\alpha \pi \eta \lambda \lambda о \tau \rho \epsilon \omega \mu \varepsilon v o$ ( 2:12).

Because of the ignorance ( $\delta \iota \alpha \tau \eta \nu \alpha \gamma v o l a v$ ). Old word from $\alpha \gamma v o \varepsilon \omega$, not to know. Rare in N.T. See Ac 3:17.

Hardening ( $\pi \omega \rho \omega \sigma \tau v$ ). Late medical term (Hippocrates) for callous hardening. Only other N.T. examples are Mr 3:5; Ro 11:25.

Eph 4:19
Being past feeling ( $\alpha \pi \eta \lambda \gamma \eta \kappa \sigma \tau \varepsilon \varsigma)$. Perfect active participle of $\alpha \pi \alpha \lambda \gamma \varepsilon \omega$, old word to cease to feel pain, only here in N.T.

To lasciviousness ( $\tau \eta \alpha \sigma \varepsilon \lambda \gamma \varepsilon ı \alpha$ ). Unbridled lust as in 2Co 12:21; Ga 5:19 .
 a trading (or work) in all uncleanness." Certainly Corinth and Ephesus could qualify for this charge.

With greediness ( $\varepsilon v \pi \lambda \varepsilon o v \varepsilon \xi \nmid \alpha)$. From $\pi \lambda \varepsilon o v \varepsilon \kappa \tau \eta \varsigma$, one who always wants more whether money or sexual indulgence as here. The two vices are often connected in the N.T.

Eph 4:20
 contrast to pagan life (ovt $\omega \varsigma$ ). Second aorist active indicative of $\mu \alpha v \theta \alpha v \omega$.

Eph 4:21
If so be that $(\varepsilon \gamma \varepsilon)$. "If indeed." Condition of first class with aorist indicatives here, assumed to be true ( $\eta \kappa о \cup \sigma a \tau \varepsilon \kappa \alpha \varepsilon \delta เ \delta \alpha \chi \theta \eta \tau \varepsilon$ ).

Even as truth is in Jesus ( $\kappa \alpha \theta \omega \varsigma \varepsilon \sigma \tau \tau \nu \alpha \lambda \eta \theta \varepsilon \iota \alpha \varepsilon v \tau \omega$ I $\eta \sigma o v$ ). It is not clear what Paul's precise idea is here. The Cerinthian Gnostics did distinguish between the man Jesus and the aeon Christ. Paul here identifies Christ (verse 20) and Jesus (verse 21). At any rate he flatly affirms that there is "truth in Jesus" which is in direct opposition to the heathen manner of life and which is further explained by the epexegetical infinitives that follow ( $\alpha \pi \sigma \theta \varepsilon \sigma \theta a \mathrm{a}$, $\alpha v \alpha v \varepsilon \circ u \sigma \theta a \delta \varepsilon, \kappa \alpha \varepsilon v \delta \nu \sigma \alpha \sigma \theta \alpha)$.

Eph 4:22
That ye put away ( $\alpha \pi \sigma \theta \varepsilon \sigma \theta \alpha$ ). Second aorist middle infinitive of $\alpha \pi о \tau 1 \theta \eta \mu$ with the metaphor of putting off clothing or habits as $\alpha \pi 0 \theta \varepsilon \sigma \theta \varepsilon$ in $\operatorname{Col} 3: 8$ (which see) with the same addition of "the old man" ( $\tau \circ v \pi \alpha \lambda \alpha \iota \circ v \alpha v \rho \rho \omega \pi \sigma v$ ) as in $\operatorname{Col} 3: 9$. For $\alpha v \alpha \sigma \tau \rho \circ \varphi \eta v$ (manner of life) see Ga 1:13 .

Which waxeth corrupt ( $\tau o v \varphi \theta \varepsilon ı \rho o \mu \varepsilon v o v$ ). Either present middle or passive participle of $\varphi \theta \varepsilon \rho \rho \omega$, but it is a process of corruption (worse and worse).

Eph 4:23
That ye be renewed ( $\alpha v a v \varepsilon o v \sigma \theta \alpha$ ). Present passive infinitive (epexegetical, like $\alpha \pi o \theta \varepsilon \sigma \theta \alpha$, of $\alpha \lambda \eta \theta \varepsilon \iota \alpha \varepsilon \nu \tau \omega$ I $\eta \sigma o v$ ) and to be compared with $\alpha v \alpha \kappa \alpha ı v o v \mu \varepsilon v o v$ in $\operatorname{Col}$ 3:10 . It is an old verb, avaveo $\omega$, to make new (young) again; though only here in N.T.

The spirit ( $\tau \omega \pi v \varepsilon \nu \mu \alpha \tau$ ). Not the Holy Spirit, but the human spirit.
Eph 4:24
Put on $(\varepsilon v \delta v \sigma \alpha \sigma \theta \alpha)$. First aorist middle infinitive of $\varepsilon v \delta v \omega(-v \omega)$, for which see Col 3:10.

The new man ( $\tau 0 \vee \kappa \alpha ı v o v ~ \alpha v \theta \rho \omega \pi \sigma v$ ). "The brand-new (see 2:15) man," though tov veov in Col 3:10.

After God ( $\kappa \alpha \tau \alpha \theta \varepsilon \sigma v$ ). After the pattern God, the new birth, the new life in Christ, destined to be like God in the end (Ro 8:29).

Eph 4:25
Wherefore ( $\delta \mathrm{oo}$ ). Because of putting off the old man, and putting on the new man.
Putting away ( $\alpha \pi \circ \theta \varepsilon \mu \varepsilon v o$ ). Second aorist middle participle of $\alpha \pi о \tau 1 \theta \eta \mu$ (verse 22).
Lying ( $\psi \varepsilon \cup \delta \circ \varsigma$ ),
truth ( $\alpha \lambda \eta \theta \varepsilon \iota \alpha v$ ) in direct contrast.
Each one ( $\varepsilon \kappa \alpha \sigma \tau о \varsigma) . ~ P a r t i t i v e ~ a p p o s i t i o n ~ w i t h ~ \lambda a \lambda \varepsilon ı \tau \varepsilon . ~ S e e ~ C o l ~ 3: 8 ~ \mu \eta ~ \psi \varepsilon v \delta \varepsilon \sigma \theta \varepsilon . ~$
Eph 4:26
Be ye angry and sin not ( $o \rho \gamma \zeta \check{\zeta \sigma \theta \varepsilon \kappa \alpha \mu \eta} \mu \mu \alpha \rho \tau \alpha v \varepsilon \tau \varepsilon$ ). Permissive imperative, not a command to be angry. Prohibition against sinning as the peril in anger. Quotation from Ps 4:4.

Let not the sun go down upon your wrath (o $\eta \lambda \iota \circ \varsigma \mu \eta \varepsilon \pi \iota \delta v \varepsilon \tau \omega \varepsilon \pi \pi \alpha \rho о \rho \gamma \iota \sigma \mu \omega$ ). Danger in settled mood of anger. Парорүьб $\quad$ о (provocation), from $\pi \alpha \rho о \rho \gamma \zeta \zeta \omega$, to exasperate to anger, occurs only in LXX and here in N.T.

Eph 4:27
Neither give place to the devil ( $\mu \eta \delta \varepsilon \delta \delta \delta о \tau \varepsilon \tau о \pi о \nu \tau \omega \delta \delta \alpha \beta \circ \lambda \omega$ ). Present active imperative in prohibition, either stop doing it or do not have the habit. See Ro 12:19 for this idiom.

Eph 4:28
Steal no more ( $\mu \eta \kappa \varepsilon \tau \kappa \lambda \varepsilon \pi \tau \varepsilon \tau \omega$ ). Clearly here, cease stealing (present active imperative with $\mu \eta \kappa \varepsilon \tau)$.

The thing that is good ( $\tau 0 \alpha \gamma \alpha \theta$ ov). "The good thing" opposed to his stealing and "with his hands" ( $\tau \alpha \iota \varsigma ~ \chi \varepsilon \rho \sigma เ v$, instrumental case) that did the stealing. See 2Th 3:10. Even unemployment is no excuse for stealing.

To give ( $\mu \varepsilon \tau \alpha \delta \iota \delta o v \alpha$ ). Present active infinitive of $\mu \varepsilon \tau \alpha \delta \iota \delta \omega \mu$, to share with one.
Eph 4:29

Corrupt ( $\sigma \alpha \pi \rho \circ \varsigma)$. Rotten, putrid, like fruit (Mt 7:17f. ), fish (Mt 13:48 ), here the opposite of $\alpha \gamma{ }^{2} \theta \mathrm{oc}$ (good).

For edifying as the need may be ( $\pi \rho о \varsigma$ онкобо $\mu \eta \nu \tau \eta \varsigma \chi \rho \varepsilon เ \alpha \varsigma)$. "For the build-up of the need," "for supplying help when there is need." Let no other words come out.

That it may give (ıva $\delta \omega$ ). For this elliptical use of iva see on 5:33.
Eph 4:30
Grieve not the Holy Spirit of God ( $\mu \eta \lambda \nu \pi \varepsilon \iota \tau \varepsilon$ to $\pi v \varepsilon \cup \mu \alpha$ тo $\alpha \gamma ı v$ tov $\theta \varepsilon o v$ ). "Cease grieving" or "do not have the habit of grieving." Who of us has not sometimes grieved the Holy Spirit?

In whom $(\varepsilon v \omega)$. Not "in which."
Ye were sealed ( $\varepsilon \sigma \varphi \rho \alpha \gamma\llcorner\sigma \eta \eta \tau \varepsilon$ ). See 1:13 for this verb, and 1:14 for $\alpha \pi 0 \lambda \nu \tau \rho \omega \sigma \varepsilon \omega \varsigma$, the day when final redemption is realized.

Eph 4:31
Bitterness ( $\pi \iota \kappa \rho \perp \alpha)$. Old word from $\pi \kappa \kappa \rho \circ \varsigma$ (bitter), in N.T. only here and Ac 8:23; Ro 3:14; Heb 12:15.

Clamour (краиүๆ). Old word for outcry (Mt 25:6; Lu 1:42). See Col 3:8 for the other words.

Be put away ( $\alpha \rho \theta \eta \tau \omega$ ). First aorist passive imperative of alp $\omega$, old verb, to pick up and carry away, to make a clean sweep.

Eph 4:32
Be ye kind to one another ( $\gamma \iota v \varepsilon \sigma \theta \varepsilon \varepsilon \iota \varsigma \alpha \lambda \lambda \eta \lambda$ ouc $\chi \rho \eta \sigma \tau 0$ ). Present middle imperative of $\gamma เ v o \mu \alpha$, "keep on becoming kind ( $\chi \rho \eta \sigma \tau o \varsigma$, used of God in Ro 2:4) toward one another." See Col 3:12f.

Tenderhearted ( $\varepsilon v \sigma \pi \lambda \alpha \gamma \chi \nu 0$ ). Late word ( $\varepsilon v, \sigma \pi \lambda \alpha \gamma \chi \nu \alpha$ ) once in Hippocrates, in LXX, here and 1Pe 3:8 in N.T.

## Ephesians 5

Eph 5:1
Imitators of God ( $\mu \mu \eta \tau \alpha$ тov $\theta \varepsilon o v$ ). This old word from $\mu \mu \varepsilon \sigma \mu \alpha$ Paul boldly uses. If we are to be like God, we must imitate him.

Eph 5:2
An offering and a sacrifice to God ( $\pi \rho \circ \sigma \varphi \rho \rho \alpha v \kappa \alpha \theta v \sigma \iota \alpha v \tau \omega \theta \varepsilon \omega$ ). Accusative in apposition with eavtov (himself). Christ's death was an offering to God "in our behalf" (vлє $\eta \mu \omega v$ ) not an offering to the devil (Anselm), a ransom ( $\lambda \nu \tau \rho o v$ ) as Christ himself said (Mt 20:28 ), Christ's own view of his atoning death.

For an odour of a sweet smell ( $\varepsilon \varsigma \varsigma ~ o \sigma \mu \eta \eta v \varepsilon \omega \omega \delta i \alpha \varsigma)$. Same words in Php 4:18 from Le 4:31 (of the expiatory offering). Paul often presents Christ's death as a propitiation (Ro 3:25 ) as in 1Jo 2:2.

Eph 5:3
Or covetousness ( $\eta \pi \lambda \varepsilon o v \varepsilon \xi \nmid \alpha)$. In bad company surely. Debasing like sensuality.
As becometh saints ( $\kappa \alpha \theta \omega \varsigma \pi \rho \varepsilon \pi \varepsilon \alpha \gamma เ \circ \varsigma)$. It is "unbecoming" for a saint to be sensual or covetous.

Eph 5:4
Filthiness (aıбхоотпऽ). Old word from $\alpha ı \sigma \chi \rho \circ \varsigma$ (base), here alone in N.T.
Foolish talking ( $\mu \omega \rho \circ \lambda o \gamma \omega)$. Late word from $\mu \omega \rho \circ \lambda o \gamma o \varsigma(\mu \omega \rho \circ \sigma, \lambda o \gamma o \varsigma)$, only here in N.T.

Jesting ( $\varepsilon \cup \tau \rho \alpha \pi \varepsilon \lambda ı \alpha)$. Old word from $\varepsilon \cup \tau \rho \alpha \pi \varepsilon \lambda o \varsigma(\varepsilon v, \tau \rho \varepsilon \pi \omega$, to turn) nimbleness of wit, quickness in making repartee (so in Plato and Plutarch), but in low sense as here ribaldry, scurrility, only here in N.T. All of these disapproved vices are $\alpha \pi \alpha \xi \lambda \varepsilon \gamma \sigma \mu \varepsilon v \alpha$ in the N.T.

Which are not befitting ( $\alpha$ оик $\alpha \vee \eta \kappa \varepsilon v$ ). Same idiom (imperfect with word of propriety about the present) in Col 3:18. Late MSS. read $\tau \alpha$ оик $\alpha v \eta \kappa о \nu \tau \alpha$ like $\tau \alpha \mu \eta \kappa \alpha \theta \eta \kappa о \nu \tau \alpha$ in Ro 1:28.

Eph 5:5
Ye know of a surety (เซte $\gamma เ v \omega \sigma \kappa o v \tau \varepsilon \varsigma)$. The correct text has $\iota \sigma \tau \varepsilon$, not $\varepsilon \sigma \tau \varepsilon$. It is the same form for present indicative (second person plural) and imperative, probably indicative
 experience."

No ( $\pi \alpha \sigma-$-ov). Common idiom in the N.T. like the Hebrew= oudeis (Robertson, Grammar, p. 732).

Covetous man ( $\pi \lambda \varepsilon \sigma v \varepsilon \kappa \tau \eta \sigma, \pi \lambda \varepsilon o v \varepsilon \chi \omega$ ). Old word, in N.T. only here and 1Co 5:10f.; 6:10.

Which is (o eб兀ıv). So Aleph B. A D K L have oc (who), but o is right. See Col 3:14 for this use of o (which thing is). On $\varepsilon \varepsilon \delta \omega \lambda$ 人 $\lambda \alpha \tau \rho \eta \varsigma$ (idolater) see 1Co 5:10f.

In the Kingdom of Christ and God ( $\varepsilon v \tau \eta \beta \alpha \sigma \iota \lambda \varepsilon \iota \alpha$ $\tau o v X \rho \iota \sigma \tau o v \kappa \alpha \theta \varepsilon o v)$. Certainly the same kingdom and Paul may here mean to affirm the deity of Christ by the use of the one article with Xpıбтov ка $\theta \varepsilon o v$. But Sharp's rule cannot be insisted on here because $\theta \varepsilon o \varsigma$ is often definite without the article like a proper name. Paul did teach the deity of Christ and may do it here.

Eph 5:6
With empty words (кعvoıৎ $\lambda о \gamma о \iota \varsigma)$. Instrumental case. Probably Paul has in mind the same Gnostic praters as in Col 2:4f. See 2:2.

Eph 5:7
Partakers with them ( $\sigma v \nu \mu \varepsilon \tau о \chi о \alpha v \tau \omega v$ ). Late double compound, only here in N.T., joint ( $\sigma v \nu$ ) shares with ( $\mu \varepsilon \tau о \chi 0$ ) them ( $\alpha v \tau \omega \nu$ ). These Gnostics.

Eph 5:8
But now light ( $v v \nu \delta \varepsilon \varphi \omega \varsigma)$. Jesus called his disciples the light of the world (Mt 5:14 ).
Eph 5:9
The fruit of light (о карлоৎ $\tau 0 v \varphi \omega \tau о \varsigma)$. Two metaphors (fruit, light) combined. See Ga 5:22 for "the fruit of the Spirit." The late MSS. have "spirit" here in place of "light."

Goodness $(\alpha \gamma \alpha \theta$ oouv $)$. Late and rare word from $\alpha \gamma \alpha \theta$ oc. See $2 \mathrm{Th} 1: 11 ; \mathrm{Ga} 5: 22$.
Eph 5:10
Proving ( $\delta о \kappa ц \mu \zeta о \nu \tau \varepsilon \varsigma) . ~ T e s t i n g ~ a n d ~ s o ~ p r o v i n g . ~$
Eph 5:11
Have no fellowship with ( $\mu \eta \sigma \nu \nu \kappa o \iota \omega \omega \nu \varepsilon \iota \tau$ ). No partnership with, present imperative with $\mu \eta$. Followed by associative instrumental case $\varepsilon \rho \gamma o \iota c$ (works).

Unfruitful (акарлоьऽ). Same metaphor of verse 9 applied to darkness (бкотоৎ).
Reprove ( $\varepsilon \lambda \varepsilon \gamma \chi \varepsilon \tau \varepsilon$ ). Convict by turning the light on the darkness.
Eph 5:12
In secret ( $\kappa \rho \cup \varphi \eta$ ). Old adverb, only here in N.T. Sin loves the dark.
Even to speak of ( $\kappa \alpha \lambda \varepsilon \gamma \varepsilon \iota v)$. And yet one must sometimes speak out, turn on the light, even if to do so is disgraceful (aıбх $\rho \circ v$, like 1Co 11:6 ).

Eph 5:13
Are made manifest by the light (v $\tau о \tau о v \varphi \omega \tau о \varsigma \varphi a v \varepsilon \rho \circ v \tau \alpha$ ). Turn on the light. Often the preacher is the only man brave enough to turn the light on the private sins of men and women or even those of a community.

Eph 5:14
Wherefore he saith ( $\delta$ to $\lambda \varepsilon \gamma \varepsilon$ ). Apparently a free adaptation of Isa 26:19; 60:1. The form $\alpha v a \sigma \tau \alpha$ for $\alpha v \alpha \sigma \tau \eta \theta$ (second person singular imperative second aorist active of $\alpha v \iota \sigma \tau \eta \mu$ ) occurs in Ac 12:7.

Shall shine ( $\varepsilon \pi \iota \varphi \alpha \cup \sigma \varepsilon$ ). Future active of $\varepsilon \pi \iota \varphi \alpha \cup \sigma \kappa \omega$, a form occurring in Job (Job 25:5; 31:26 ), a variation of $\varepsilon \pi \iota \varphi \omega \sigma \kappa \omega$. The last line suggests the possibility that we have here the fragment of an early Christian hymn like 1Ti 3:16.

Eph 5:15
Carefully ( $\alpha \kappa \rho 1 \beta \omega \varsigma$ ). Aleph B 17 put $\alpha \kappa \rho ı \beta \omega \varsigma$ before $\pi \omega \varsigma$ (how) instead of $\pi \omega \varsigma \alpha \kappa \rho 1 \beta \omega \varsigma$ (how exactly ye walk) as the Textus Receptus has it. On $\alpha \kappa \rho \iota \omega \varsigma($ from $\alpha \kappa \rho ı \beta \varsigma)$ see Mt 2:8; Lu 1:3.

Unwise ( $\alpha \sigma \circ \varphi 0$ ). Old adjective, only here in N.T.
Eph 5:16
Redeeming the time ( $\varepsilon \xi \alpha \gamma о \rho \alpha \zeta_{о \mu \varepsilon v o ~ \tau o v ~ к а ı \rho о v) . ~ A s ~ i n ~}^{\text {Col } 4: 5 \text { which see. }}$
Eph 5:17
Be ye not foolish ( $\mu \eta \gamma \iota \nu \varepsilon \sigma \theta \varepsilon \alpha \varphi \rho \circ v \varepsilon \varsigma)$. "Stop becoming foolish."
Eph 5:18
Be not drunken with wine ( $\mu \eta \mu \varepsilon \theta v \sigma \kappa \varepsilon \sigma \theta \varepsilon$ olv $\omega$ ). Present passive imperative of $\mu \varepsilon \theta v \sigma \kappa \omega$, old verb to intoxicate. Forbidden as a habit and to stop it also if guilty. Instrumental case oıv $\omega$.

Riot ( $\alpha \sigma \omega \tau i \alpha$ ). Old word from $\alpha \sigma \omega \tau$ oc (adverb $\alpha \sigma \omega \tau \omega \varsigma$ in Lu 15:13), in N.T. only here, Tit 1:6; $1 \mathrm{Pe} 4: 4$.

But be filled with the Spirit ( $\alpha \lambda \lambda \alpha \pi \lambda \eta \rho o v \sigma \theta \varepsilon \varepsilon v \pi \nu \varepsilon \nu \mu \alpha \tau$ ). In contrast to a state of intoxication with wine.

Eph 5:19
To the Lord ( $\tau \omega \operatorname{Kv\rho } \omega \omega$ ). The Lord Jesus. In Col 3:16 we have $\tau \omega \theta \varepsilon \omega$ (to God) with all these varieties of praise, another proof of the deity of Christ. See Col 3:16 for discussion.

Eph 5:20
In the name of our Lord Jesus Christ ( $\varepsilon v$ ovo $\mu \alpha \tau$ tov Kvpıov $\eta \mu \omega v$ I $\eta \sigma o v$ X $\rho ı \sigma \tau o v$ ). Jesus had told the disciples to use his name in prayer (Joh 16:23f. ).

To God, even the Father ( $\tau \omega \theta \varepsilon \omega$ ка $\pi \alpha \tau \rho$ ). Rather, "the God and Father."
Eph 5:21
Subjecting yourselves to one another (vпотаббонгvo $\alpha \lambda \lambda \eta \lambda$ оı). Present middle participle of vлотаб $\sigma \omega$, old military figure to line up under ( $\mathrm{Col} 3: 18$ ). The construction here is rather loose, coordinate with the preceding participles of praise and prayer. It is possible to start a new paragraph here and regard vпотаббонعvo as an independent participle like an imperative.

Eph 5:22
Be in subjection. Not in the Greek text of B and Jerome knew of no MS. with it. K L
 (let them be subject to). But the case of $\alpha v \delta \rho \alpha \sigma \omega v$ (dative) shows that the verb is understood
from verse 21 if not written originally. Iסıoı̧ (own) is genuine here, though not in Col 3:18

As unto the Lord ( $\omega \varsigma \tau \omega \operatorname{Kv\rho } \omega)$ ). So here instead of $\omega \varsigma \alpha v \eta \kappa \varepsilon v \varepsilon v \operatorname{Kvp} \omega \omega$ of $\operatorname{Col}$ 3:18. Eph 5:23
For the husband is the head of the wife (o $\alpha \vee \eta \rho \varepsilon \sigma \tau \iota v \kappa \varepsilon \varphi \alpha \lambda \eta \tau \eta \varsigma \gamma \cup v \alpha \iota \kappa \varsigma)$ ) "For a husband is head of the (his) wife." No article with $\alpha \nu \eta \rho$ or $\kappa \varepsilon \varphi \alpha \lambda \eta$.

As Christ also is the head of the church ( $\omega \varsigma \kappa \alpha$ о X $\rho \iota \sigma \tau о \varsigma \kappa \varepsilon \varphi \alpha \lambda \eta \tau \eta \varsigma \varepsilon \kappa \kappa \lambda \eta \sigma \omega \propto)$ ). No article with $\kappa \varepsilon \varphi \alpha \lambda \eta$, "as also Christ is head of the church." This is the comparison, but with a tremendous difference which Paul hastens to add either in an appositional clause or as a separate sentence.

Himself the saviour of the body ( $\alpha \cup \tau \sigma \varsigma ~ \sigma \omega \tau \eta \rho$ тov $\sigma \omega \mu \alpha \tau \circ \varsigma$ ). He means the church as the body of which Christ is head and Saviour.

Eph 5:24
But ( $\alpha \lambda \lambda \alpha$ ). Perhaps, "nevertheless," in spite of the difference just noted. Once again the verb vтотаб $\sigma \omega$ has to be supplied in the principal clause before toı $\alpha v \delta \rho \alpha \sigma ı v$ either as indicative (vпотаббоvта) or as imperative (vлотаббє $\sigma \omega \sigma \sigma \nu$ ).

Eph 5:25
Even as Christ also loved the church ( $\kappa \alpha \theta \omega \varsigma \kappa \alpha$ о Хрıбтоৎ $\eta \gamma \alpha \pi \eta \sigma \varepsilon \nu \tau \eta \nu \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha v$ ). This is the wonderful new point not in Col 3:19 that lifts this discussion of the husband's love for his wife to the highest plane.

Eph 5:26
That he might sanctify it ( $\quad v \alpha \alpha \cup \tau \eta v ~ a \gamma ı a \sigma \eta$ ). Purpose clause with $i v \alpha$ and the first aorist active subjunctive of $\alpha \gamma \omega \zeta \omega$. Jesus stated this as his longing and his prayer (Joh 17:17-19). This was the purpose of Christ's death (verse 25).

Having cleansed it (каӨарıба¢). First aorist active participle of $\kappa \alpha \theta \alpha \rho \iota \zeta \omega$, to cleanse, either simultaneous action or antecedent.

By the washing of water ( $\tau \omega \lambda \operatorname{lov\tau } \rho \omega$ tov vסatoc). If $\lambda o v \tau \rho o v$ only means bath or bathing-place ( $=\lambda о \tau \tau \rho \circ v$ ), then $\lambda о \tau \tau \rho \omega$ is in the locative. If it can mean bathing or washing, it is in the instrumental case. The usual meaning from Homer to the papyri is the bath or bathing-place, though some examples seem to mean bathing or washing. Salmond doubts if there are any clear instances. The only other N.T. example of $\lambda$ ovt $\rho o v$ is in Tit 3:5. The reference here seems to be to the baptismal bath (immersion) of water, "in the bath of water." See 1Co 6:11 for the bringing together of $\alpha \pi \varepsilon \lambda o u \sigma \alpha \sigma \theta \varepsilon$ and $\eta \gamma ı \sigma \sigma \eta \tau \varepsilon$. Neither there nor here does Paul mean that the cleansing or sanctification took place in the bath save in a symbolic fashion as in Ro 6:4-6. Some think that Paul has also a reference to the bath of the bride before marriage. Still more difficult is the phrase "with the word" ( $\varepsilon v \rho \eta \mu \alpha \tau$ ). In Joh 17:17 Jesus connected "truth" with "sanctify." That is possible here, though it may also be connected with кaӨapıбaৎ (having cleansed). Some take it to mean the baptismal formula.

Eph 5:27
That he might present (ıva $\pi \alpha \rho \alpha \sigma \tau \eta \sigma \eta)$. Final clause with $v \alpha \alpha$ and first aorist active subjunctive of $\pi \alpha \rho \iota \sigma \tau \eta \mu$ ( see $\mathrm{Col} 1: 22$ for parallel) as in $2 \mathrm{Co} 11: 2$ of presenting the bride to the bridegroom. Note both $\alpha v \tau \circ \varsigma$ (himself) and $\varepsilon \alpha v \tau \omega$ (to himself).

Glorious ( $\varepsilon v \delta o \xi o v)$. Used of splendid clothing in Lu 7:25.
Spot ( $\sigma \pi \lambda \lambda o \varsigma$ ). Late word, in N.T. only here and $2 \mathrm{Pe} 2: 13$, but $\sigma \pi \lambda \lambda o \omega$, to defile in Jas 3:6; Jude 1:23.

Wrinkle ( $\rho v \tau \iota \delta \alpha$ ). Old word from $\rho v \omega$, to contract, only here in N.T.
But that it should be holy and without blemish ( $\alpha \lambda \lambda^{\prime} \imath v \alpha \eta \alpha \gamma \iota \alpha \kappa \alpha \alpha \mu \omega \mu \circ \varsigma$ ). Christ's goal for the church, his bride and his body, both negative purity and positive.

Eph 5:28
 some people actually say that Paul in 1Co 7 gives a degrading view of marriage. How can one say that after reading Eph 5:22-33 where the noblest picture of marriage ever drawn is given?

Eph 5:29
Nourisheth $(\varepsilon \kappa \tau \rho \varepsilon \varphi \varepsilon)$. Old compound with perfective sense of $\varepsilon \kappa$ (to nourish up to maturity and on). In N.T. only here and 6:4.

Cherisheth $(\theta a \lambda \pi \varepsilon)$. Late and rare word, once in a marriage contract in a papyrus. In N.T. only here and 1Th 2:7 . Primarily it means to warm (Latin foveo), then to foster with tender care as here.

Even as Christ also ( $\kappa \alpha \omega \varsigma \kappa \alpha$ о X $\rho \iota \sigma \tau о \varsigma$ ). Relative (correlative) adverb pointing back to $o v \tau \omega \varsigma$ at the beginning of the sentence (verse 28) and repeating the statement in verse 25.

Eph 5:30
Of his flesh and of his bones ( $\varepsilon \kappa \tau \eta \varsigma \sigma \alpha \rho \kappa о \varsigma \alpha v \tau о v \kappa \alpha \varepsilon \kappa \tau \omega \nu$ об $\tau \varepsilon \omega \nu \alpha v \tau о v$ ). These words are in the Textus Receptus (Authorized Version) supported by D G L P cursives Syriac, etc., though wanting in Aleph A B 17 Bohairic. Certainly not genuine.

Eph 5:31
 sense of $\alpha \nu \tau$ seen in $\alpha \nu \theta^{\prime} \omega \nu$ (Lu 12:3). This whole verse is a practical quotation and application of the language to Paul's argument here. In Mt 19:5 Jesus quotes Ge 2:24. It seems absurd to make Paul mean Christ here by $\alpha \nu \theta \rho \omega \pi \sigma \varsigma$ (man) as some commentators do.

Eph 5:32
This mystery is great ( $\tau 0 \mu v \sigma \tau \eta \rho เ \frac{v}{} \tau o v \tau o \mu \varepsilon \gamma \alpha \varepsilon \sigma \tau \iota v$ ). For the word "mystery" see 1:9. Clearly Paul means to say that the comparison of marriage to the union of Christ and the church is the mystery. He makes that plain by the next words.

But I speak ( $\varepsilon \gamma \omega \delta \varepsilon \lambda \varepsilon \gamma \omega)$. "Now I mean." Cf. 1Co 7:29; 15:50.
 reference to Christ and the church." That is all that $\varepsilon \iota c$ here means.

Eph 5:33
Nevertheless ( $\pi \lambda \eta v$ ). "Howbeit," not to dwell unduly (Abbott) on the matter of Christ and the church.

Do ye also severally love ( $\kappa \alpha \cup \mu \varepsilon \iota \varsigma$ о $\kappa \alpha \theta^{\prime} \varepsilon v \alpha \varepsilon \kappa \alpha \sigma \tau о \varsigma ~ \alpha \gamma \alpha \pi \alpha \tau \omega$ ). An unusual idiom. The verb $\alpha \gamma \alpha \pi \alpha \tau \omega$ (present active imperative) agrees with $\varepsilon \kappa \alpha \sigma \tau \circ \varsigma$ and so is third singular instead of $\alpha \gamma \alpha \pi \alpha \tau \varepsilon$ (second plural) like $v \mu \varepsilon ı \varsigma$. The use of o $\kappa \alpha \theta^{\prime} \varepsilon v \alpha$ after $v \mu \varepsilon ı \varsigma="$ ye one by one " and then єкабтоऽ takes up (individualizes) the "one" in partitive apposition and in the third person.

Let the wife see that she fear ( $\eta \gamma \cup \nu \eta เ \nu \alpha \varphi o \beta \eta \tau \alpha$ ). There is no verb in the Greek for "let see" ( $\beta \lambda \varepsilon \pi \varepsilon \tau \omega)$. For this use of $ı v a$ with the subjunctive as a practical imperative without a principal verb (an elliptical imperative) see Mr 5:23; Mt 20:32; 1Co 7:29; 2Co 8:7; Eph 4:29; 5:33 (Robertson, Grammar, p. 994). "Fear" ( $\varphi$ о $\uparrow \tau \alpha$, present middle subjunctive) here is "reverence."

## Ephesians 6

Eph 6:1
Right ( $\delta$ ıкaıov). In Col 3:20 it is عuapeбтov (well-pleasing).
Eph 6:2
Which ( $\eta \tau \iota \varsigma)$. "Which very" = "for such is."
The first commandment with promise ( $\varepsilon \nu \tau o \lambda \eta \pi \rho \omega \tau \eta \varepsilon v \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda 1 \alpha$ ). Ev here means "accompanied by" (Alford). But why "with a promise"? The second has a general promise, but the fifth alone (Ex 20:12) has a specific promise. Perhaps that is the idea. Some take it to be first because in the order of time it was taught first to children, but the addition of $\varepsilon v$ $\varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \iota \alpha$ here to $\pi \rho \omega \tau \eta$ points to the other view.

Eph 6:3
That it may be well with thee ( $\llcorner v \varepsilon \varepsilon \sigma o \gamma \varepsilon v \eta \tau \alpha$ ). From Ex 20:12, "that it may happen to thee well."

And thou mayest live long on the earth ( $\kappa \alpha \varepsilon \sigma \eta \mu \alpha \kappa \rho о \chi \rho о \nu \iota \rho \varsigma \varepsilon \pi \tau \eta \varsigma \gamma \eta \varsigma)$. Here $\varepsilon \sigma \eta$ (second person singular future middle) takes the place of $\gamma \varepsilon v \eta$ in the LXX (second person singular second aorist middle subjunctive). Макрохроvos is a late and rare compound adjective, here only in N.T. (from LXX, Ex 20:12 ).

Eph 6:4
Provoke not to anger ( $\mu \eta \pi \alpha \rho \circ \rho \gamma \iota(\varepsilon \tau \varepsilon)$. Rare compound, both N.T. examples (here and Ro 10:19 ) are quotations from the LXX. The active, as here, has a causative sense. Parallel in sense with $\mu \eta \varepsilon \rho \varepsilon \theta_{1} \zeta \varepsilon \tau \varepsilon$ in Col 3:21. Paul here touches the common sin of fathers.
 Ev is the sphere in which it all takes place. There are only three examples in the N.T. of $\pi \alpha \iota \delta \varepsilon ı \alpha$, old Greek for training a $\pi \alpha ı \varsigma$ (boy or girl) and so for the general education and culture of the child. Both papyri and inscriptions give examples of this original and wider sense (Moulton and Milligan, Vocabulary). It is possible, as Thayer gives it, that this is the meaning here in Eph 6:4 . In 2Ti 3:16 adults are included also in the use. In Heb 12:5,7,11 the narrower sense of "chastening" appears which some argue for here. At any rate vouӨrata (from vovo, $\tau \uparrow \vartheta \eta \mu$ ), common from Aristophanes on, does have the idea of correction. In N.T. only here and 1Co 10:11; Tit 3:10 .

Eph 6:5
With fear and trembling ( $\mu \varepsilon \tau \alpha$ чоßоv ка $\tau \rho \circ \mu \circ v$ ). This addition to Col 3:22.
Eph 6:6
But as servants of Christ ( $\alpha \lambda \lambda^{\prime} \omega \varsigma \delta o u \lambda o$ X $\rho \iota \sigma \tau o u$ ). Better "slaves of Christ" as Paul rejoiced to call himself (Php 1:1).

Doing the will of God ( $\pi$ oוouvte¢ to $\theta \varepsilon \lambda \eta \mu \alpha$ тov $\theta \varepsilon o v$ ). Even while slaves of men.
Eph 6:7

With good will ( $\left.\mu \varepsilon \tau^{\prime} \varepsilon v v o t a \varsigma\right)$. Not in Col. Old word from $\varepsilon v v o o \varsigma$, only here in N.T. as $\varepsilon v v o \varepsilon \omega$ is in N.T. only in Mt 5:25 .

Eph 6:8
Whatsoever good thing each one doeth ( $\varepsilon \kappa \alpha \sigma \tau о \varsigma ~ \varepsilon \alpha \nu \tau \pi о џ\rceil \eta \alpha \gamma \alpha \theta о v$ ). Literally, "each one if he do anything good." Condition of third class, undetermined, but with prospect. Note use here of $\alpha \gamma \alpha \theta$ ov rather than $\alpha \delta$ ıкov (one doing wrong) in Col 3:25. So it is a reward ( $\kappa \circ \mu เ \sigma \varepsilon \tau \alpha)$ for good, not a penalty for wrong, though both are true, "whether he be bond or

Eph 6:9
And forbear threatening ( $\alpha v \varepsilon \varepsilon \nu \tau \varepsilon \varsigma \tau \eta \nu \alpha \pi \varepsilon i \lambda \eta \nu$ ). Present active participle of $\alpha v i \eta \mu$, old verb, to loosen up, to relax. "Letting up on threatening." A $\varepsilon \varepsilon \wedge \lambda \eta$ is old word for threat, in N.T. only here and Ac 4:29; 9:1 .

Both their Master and yours ( $\kappa \alpha \alpha v \tau \omega v \kappa \alpha \nu \mu \omega \nu$ о кvрıৎ). He says to "the lords" (o $\kappa \cup \rho ı$ ) of the slaves. Paul is not afraid of capital nor of labour.

With him ( $\left.\pi \alpha \rho^{\prime} \alpha v \tau \omega\right)$. "By the side of him (God)."
Eph 6:10
Finally ( $\tau 0 v$ גoıtov). Genitive case, "in respect of the rest," like Ga 6:17. D G K L P have the accusative to $\lambda$ oınov (as for the rest) like 2Th 3:1; Php 3:1; 4:8 .

Be strong in the Lord ( $\varepsilon v \delta v v a \mu \circ v \sigma \theta \varepsilon \varepsilon v \kappa v \rho \iota \omega)$. A late word in LXX and N.T. (Ac 9:22; Ro 4:20; Php 4:13 ), present passive imperative of $\varepsilon v \delta v v a \mu \circ \omega$, from $\varepsilon v$ and $\delta v v a \mu \iota$, to empower. See 1:10 for "in the strength of his might." Not a hendiadys.

Eph 6:11
Put on ( $\varepsilon v \delta v \sigma \alpha \sigma \theta \varepsilon$ ). Like 3:12. See also 4:24.
The whole armour ( $\tau \eta \nu \pi \alpha \nu o \pi \lambda \iota \alpha \nu$ ). Old word from $\pi \alpha \nu o \pi \lambda o \varsigma$ (wholly armed, from $\pi \alpha v$, o $\pi \lambda o v$ ). In N.T. only Lu 11:22; Eph 6:11,13. Complete armour in this period included "shield, sword, lance, helmet, greaves, and breastplate" (Thayer). Our "panoply." Polybius gives this list of Thayer. Paul omits the lance (spear). Our museums preserve specimens of this armour as well as the medieval coat-of-mail. Paul adds girdle and shoes to the list of Polybius, not armour but necessary for the soldier. Certainly Paul could claim knowledge of the Roman soldier's armour, being chained to one for some three years.

That ye may be able to stand ( $\pi \rho \circ \varsigma \tau о \delta v v \alpha \sigma \theta a v \mu \alpha \varsigma \sigma \tau \eta v \alpha$ ). Purpose clause with $\pi \rho \circ \varsigma$ to and the infinitive ( $\delta v v a \sigma \theta \alpha$ ) with the accusative of general reference ( $v \mu \alpha \varsigma)$ and the second aorist active infinitive $\sigma \tau \eta v a$ (from $\sigma \tau \eta \mu$ ) dependent on $\delta v \nu \alpha \sigma \theta \alpha$. Against ( $\pi \rho \circ \varsigma$ ). Facing. Another instance of $\pi \rho \circ \varsigma$ meaning "against" (Col 2:23 ).

The wiles of the devil ( $\tau \alpha \varsigma \mu \varepsilon \theta$ o $\delta ı \varsigma \varsigma ~ \tau o v ~ \delta ı \alpha \beta o \lambda o v$ ). See already $4: 14$ for this word. He is a crafty foe and knows the weak spots in the Christian's armour.

Eph 6:12

Our wrestling is not (ovk $\varepsilon \sigma \tau i v \eta \mu \nu \nu \eta \pi \alpha \lambda \eta$ ). "To us the wrestling is not." $\Pi \alpha \lambda \eta$ is an old word from $\pi \alpha \lambda \lambda \omega$, to throw, to swing (from Homer to the papyri, though here only in N.T.), a contest between two till one hurls the other down and holds him down ( $\kappa a \tau \varepsilon \chi \omega$ ). Note $\pi \rho o \varsigma$ again (five times) in sense of "against," face to face conflict to the finish.

The world-rulers of this darkness ( $\tau о ч \varsigma$ кобнократорац тои бкотоиц тоитои). This phrase occurs here alone. In Joh 14:30 Satan is called "the ruler of this world" (o $\alpha \rho \chi \omega \nu$ tov коб $\mu$ оv тov тov). In 2Co $4: 4$ he is termed "the god of this age" (o $\theta \varepsilon o \varsigma ~ \tau o v ~ a l \omega v o \varsigma ~ \tau o v \tau o v) . ~$ The word коб $\mu о к \rho \alpha \tau \omega \rho$ is found in the Orphic Hymns of Satan, in Gnostic writings of the devil, in rabbinical writings (transliterated) of the angel of death, in inscriptions of the Emperor Caracalla. These "world-rulers" are limited to "this darkness" here on earth.

The spiritual hosts of wickedness ( $\tau \alpha \pi \nu \varepsilon \cup \mu \alpha \tau \iota \kappa \alpha \tau \eta \varsigma \pi о v \eta \rho ı \alpha \varsigma)$. No word for "hosts" in the Greek. Probably simply, "the spiritual things (or elements) of wickedness." Поv $\eta \rho \downarrow$ (from лоvŋроৎ) is depravity (Mt 22:18; 1Co 5:8).

In the heavenly places ( $\varepsilon v$ тоıৎ $\varepsilon \pi о \cup \rho \alpha v o \iota \varsigma)$. Clearly so here. Our "wrestling" is with foes of evil natural and supernatural. We sorely need "the panoply of God" (furnished by God).

Eph 6:13
Take up ( $\alpha v \alpha \lambda \alpha \beta \varepsilon \tau \varepsilon$ ). Second aorist active imperative of $\alpha v \alpha \lambda \alpha \mu \beta \alpha v \omega$, old word and used ( $\alpha v a \lambda \alpha \beta \omega v$ ) of "picking up" Mark in 2Ti 4:11 .

That ye may be able to withstand ( $\llcorner v \alpha \delta \nu v \eta \theta \eta \tau \varepsilon \alpha \nu \tau \mid \sigma \tau \eta v \alpha$ ). Final clause with $\stackrel{v \alpha}{ }$ and first aorist passive subjunctive of $\delta \cup v \alpha \mu \alpha$ with $\alpha v \tau \iota \sigma \tau \eta v \alpha$ (second aorist active infinitive of $\alpha v \theta \iota \sigma \tau \eta \mu$, to stand face to face, against).

And having done all to stand ( $\kappa \alpha \alpha \pi \alpha \nu \tau \alpha ~ к \alpha \tau \varepsilon \rho \gamma \alpha \sigma \alpha ~ \mu \varepsilon v o ~ \sigma \tau \eta v \alpha)$. After the fight (wrestle) is over to stand ( $\sigma \tau \eta v \alpha)$ as victor in the contest. Effective aorist here.

Eph 6:14
Stand therefore ( $\sigma \tau \eta \tau \varepsilon$ ouv). Second aorist active imperative of $\sigma \tau \eta \mu$ (intransitive like the others). Ingressive aorist here, "Take your stand therefore" (in view of the arguments made).

Having girded your loins with truth ( $\pi \varepsilon \rho \iota \zeta \omega \sigma \alpha \mu \varepsilon v o \tau \eta \nu$ o $\sigma \varphi \nu \nu v \mu \omega \nu \varepsilon v \alpha \lambda \eta \theta \varepsilon ı \alpha$ ). First aorist middle participle (antecedent action) of $\pi \varepsilon \rho\llcorner\zeta \omega v v v \omega$, old verb, to gird around, direct middle (gird yourselves) in Lu 12:37 ; but indirect here with accusative of the thing, "having girded your own loins." So $\varepsilon v \delta v \sigma a \mu \varepsilon v o$ (having put on) is indirect middle participle.

The breast-plate of righteousness ( $\tau \circ v \theta \omega \rho \alpha \kappa \alpha \tau \eta \varsigma \delta \kappa \alpha \iota \circ \sigma \nu v \eta \varsigma)$. Old word for breast and then for breastplate. Same metaphor of righteousness as breastplate in 1Th 5:8 .

Eph 6:15
Having shod (v $\frac{1}{} \delta \eta \sigma \alpha \mu \varepsilon v o$ ). "Having bound under" (sandals). First aorist middle participle of $u \pi \mathrm{o} \delta \varepsilon \omega$, old word, to bind under ( $\operatorname{Mr} 6: 9$; Ac 12:8, only other N.T. example).

With the preparation ( $\varepsilon \nu \varepsilon \tau \sigma \mu \alpha \sigma \iota \alpha$ ). Late word from $\varepsilon \tau \circ \mu \alpha \zeta \omega$, to make ready, only here in N.T. Readiness of mind that comes from the gospel whose message is peace.

Eph 6:16
Taking up ( $\alpha v \alpha \lambda \alpha \beta o v \tau \varepsilon \varsigma$ ). See verse 13.
The shield of faith ( $\tau 0 v \theta \cup \rho \varepsilon \circ v \tau \eta \varsigma \pi \neg \sigma \tau \varepsilon \omega \varsigma$ ). Late word in this sense a large stone against the door in Homer, from $\theta v \rho a$, door, large and oblong (Latin scutum), aбтıৎ being smaller and circular, only here in N.T.

To quench $(\sigma \beta \varepsilon \sigma \alpha)$. First aorist active infinitive of $\sigma \beta \varepsilon \nu \nu v \mu$, old word, to extinguish (Mt 12:20).

All the fiery darts ( $\pi \alpha \nu \tau \alpha \tau \alpha \beta \varepsilon \lambda \eta \tau \alpha \pi \varepsilon \pi \nu \rho \omega \mu \varepsilon v \alpha)$. B $\varepsilon \lambda o \varsigma$ is an old word for missile, dart (from $\beta \alpha \lambda \lambda \omega$, to throw), only here in N.T. Пє $\tau \nu \rho \omega \mu \varepsilon v \alpha$ is perfect passive participle of $\pi \nu \rho o \omega$, old verb, to set on fire, from $\pi \nu \rho$ (fire). These darts were sometimes ablaze in order to set fire to the enemies' clothing or camp or homes just as the American Indians used to shoot poisoned arrows.

Eph 6:17
The helmet of salvation ( $\tau \eta v \pi \varepsilon \rho \iota \kappa \varepsilon \varphi \alpha \lambda \alpha ı \alpha \nu \tau o v \sigma \omega \tau \eta \rho ı \nu)$. Late word ( $\pi \varepsilon \rho \iota, \kappa \varepsilon \varphi \alpha \lambda \eta$, head, around the head), in Polybius, LXX, 1Th 5:8; Eph 6:17 alone in N.T.

Which is the word of God (o $\varepsilon \sigma \tau \iota v \tau o \rho \eta \mu \alpha \tau o v \theta \varepsilon \sigma v)$. Explanatory relative (o) referring to the sword ( $\mu \alpha \chi \alpha \iota \rho a v$ ). The sword given by the Spirit to be wielded as offensive weapon (the others defensive) by the Christian is the word of God. See Heb $4: 12$ where the word of God is called "sharper than any two-edged sword."

Eph 6:18
At all seasons ( $\varepsilon v \pi \alpha v \tau \kappa \alpha \iota \omega)$. "On every occasion." Prayer is needed in this fight. The panoply of God is necessary, but so is prayer.
"Satan trembles when he sees The weakest saint upon his knees."
Eph 6:19
That utterance may be given unto me (ıva $\mu \circ \delta o \theta \eta \lambda o \gamma o \varsigma)$. Final clause with $t v a$ and first aorist passive subjunctive of $\delta \mathrm{t} \delta \omega \mu$, to give. See a like request in Col 4:3. Paul wishes their prayer for courage for himself.

Eph 6:20
For which I am an ambassador in chains (v $v \varepsilon \rho$ ov $\pi \rho \varepsilon \sigma \beta \varepsilon v \omega \varepsilon v \alpha \lambda v \sigma \varepsilon)$. "For which mystery" of the gospel (verse 19). П $\rho \varepsilon \sigma \beta \varepsilon v \omega$ is an old word for ambassador (from $\pi \rho \varepsilon \sigma \beta \nu \varsigma$, an old man) in N.T. only here and 2Co 5:20. Paul is now an old man ( $\pi \rho \varepsilon \sigma \beta v \tau \eta \varsigma$, Phm 1:9 ) and feels the dignity of his position as Christ's ambassador though "in a chain" ( $\varepsilon v \alpha \lambda v \sigma \varepsilon$, old word $\alpha \lambda \nu \sigma \iota \varsigma$, from a privative and $\lambda \nu \omega$, to loosen). Paul will wear a chain at the close of his life in Rome (2Ti 1:16).

In it $(\varepsilon v \alpha \cup \tau \omega)$. In the mystery of the gospel. This is probably a second purpose ( $\imath v \alpha$ ), the first for utterance ( $\iota v \alpha \delta o \theta \eta$ ), this for boldness ( $\iota v \alpha \pi \alpha \rho \rho \eta \sigma \iota \alpha \sigma \omega \mu \alpha$, first aorist middle subjunctive, old word to speak out boldly). See 1Th 2:2. See Col 4:4 for "as I ought."

Eph 6:21
That ye also may know (ıva $\varepsilon เ \delta \eta \tau \varepsilon \kappa \alpha \cup \mu \varepsilon \iota \varsigma)$. Final clause with $\iota v \alpha$ and second perfect subjunctive active of ot $\delta \alpha$. For Tychicus, see Col 4:7f .

Eph 6:22
That ye may know ( $\imath v \alpha \gamma \nu \omega \tau \varepsilon$ ). Second aorist active subjunctive of $\gamma \iota v \omega \sigma \kappa \omega$. Just as in

Our state ( $\tau \alpha \pi \varepsilon \rho \eta \mu \omega v$ ). "The things concerning us," practically the same as $\tau \alpha \kappa \alpha \tau^{\prime}$ $\varepsilon \mu \varepsilon$ of verse 21. See both phrases in Col 4:7,8 .

Eph 6:23
Love and faith ( $\alpha \gamma \alpha \pi \eta \mu \varepsilon \tau \alpha \pi \iota \sigma \tau \varepsilon \omega \varsigma)$. Love of the brotherhood accompanied by faith in Christ and as an expression of it.

Eph 6:24
In uncorruptness $(\varepsilon v \alpha \varphi \theta \alpha \rho \sigma \iota \alpha)$. A never diminishing love. See 1Co 15:42 for $\alpha \varphi \theta \alpha \rho \sigma \iota \alpha$.

## EPISTLE TO THE PHILIPPIANS

## FROM ROME ABOUT A.D. 61

## BY WAY OF INTRODUCTION

There is something to be said for the idea that Paul wrote the Epistle to the Philippians while a prisoner in Ephesus if he ever was a prisoner there. All that can be said for that view has been presented by Professor George S. Duncan in St. Paul's Ephesian Ministry (1930). But, when all is considered carefully in the light of the facts in the Acts and the Epistles, the best that one can say is that a possible case is made out with many difficulties remaining unexplained. The argument is more ingenious than convincing. It is not possible here to review the arguments pro and con that convince me that Paul was in Rome when he wrote this letter to Philippi. It is not clear whether it was written before the three that went together (Philemon, Colossians, Ephesians) or afterwards. Probably there was no great difference in time, but there was time for Epaphroditus to come to Rome, to fall sick, for the news to reach Philippi and for Epaphroditus to hear of their concern about him. The church in Philippi was Paul's joy and pride and they had helped him before as they did this time.

The Epistle is a beautiful expression of gratitude for the love and gifts of the Philippian saints. He is a prisoner of hope in Rome with possible death before him, but with the note of joy running through all that Paul says. He hopes to be set free and to see them again.

Meanwhile he tells the Philippians about the difficulties and triumphs in Rome. The Judaizers have followed Paul here and there is an echo in chapters Php 1;3 of their opposition. But Paul rises to full stature in the great Christological passages in chapters Php 2; 3 which prepare the way for the controversy with the Gnostics over the Person of Christ in Colossians and Ephesians.

Some special books on Philippians are those by Beet (1891), Burns (1917), Dibelius (1911), Ellicott (new ed. 1890), Wohlenberg in Zahn Komm. (3rd ed. 1917), Haupt in Meyer Komm. (8 ed. 1902), Jones in Westm. Comm. (1920), Johnstone (1904), Jowett (1909), Kennedy in Exp. Gk. Test. (1903), Klopper (1893), Knabenbauer (1913), Lightfoot (9 ed. 1891), Lipsius (1893), Lohmeyer in Meyer Komm. (8 ed. 1930), Lueken (1906), Martin (New Cent. Bible), Michael (1928), Moule (Phil. Studies), Plummer (1919), Rainy (Exp. Bible 1893), Robertson (1917), Vincent (Int. Crit., 2 ed. 1910).

## Philippians 1

Phil 1：1
Paul（Пav $\overline{\text { 人 }}$ ）．He does not mention his apostleship as he usually does．Omitted also in I and II Thess．and Philemon．

Timothy（Tıио日zoc）．In no sense the author，but associated with Paul because with him here in Rome as in Corinth when I and II Thessalonians written and in Ephesus when I Corinthians sent and in Macedonia when II Corinthians written．Timothy was with Paul when the Philippian church was founded（Ac 16：1，13；17：14）．He had been there twice since （Ac 19：22；20：3f．）．

To all the saints（ $\pi \alpha \sigma$ тоı $\alpha \gamma ı \circ \varsigma)$ ．The word saint（ $\alpha \boldsymbol{\gamma}$ ıऽ）here is used for the professing Christians as in 1Co 1：2 which see as well as Ro 1：7 for the origin of the word．The word ＂all＂（ $\pi \alpha \sigma$ ）means that all individual believers are included．Paul employs this word frequently in Philippians．

In Christ Jesus（ $\varepsilon \nu$ X $\rho \iota \sigma \tau \omega$ I $\eta \sigma o v$ ）．The centre for all Christian relations and activities for Paul and for us．

In Philippi（ $\left.\varepsilon v \Phi_{1} \lambda ı \pi \pi o \iota \varsigma\right)$ ．See on Ac 16：12 for discussion of this name．
With the bishops（бuv £ $\pi \iota \sigma к о \pi о \iota) . ~ " T o g e t h e r ~ w i t h ~ b i s h o p s, " ~ t h u s ~ s i n g l e d ~ o u t ~ f r o m ~ " a l l ~$ the saints．＂See Ac 20：17，28 for the use of this most interesting word as equivalent to $\pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho \circ \varsigma($ elder）．It is an old word from $\varepsilon \pi \iota \sigma \kappa \varepsilon \pi \tau о \mu \alpha$ ，to look upon or after，to inspect， so the overseer or superintendent．In the second century $\varepsilon \pi \iota \sigma \chi \circ \pi \circ \varsigma$（Ignatius）came to mean one superior to elders，but not so in the N．T．The two New Testament church officers are here mentioned（bishops or elders and deacons）．The plural is here employed because there was usually one church in a city with several pastors（bishops，elders）．

And deacons（ка סıккоvo七）．Technical sense here of the other church officers as in 1Ti 3：8－13 ，not the general use as in Mt 22：13．The origin of the office is probably seen in Ac 6：1－6 ．The term is often applied to preachers（1Co 3：5；2Co 3：6）．The etymology（ $\delta \iota \alpha$ ， коvıৎ）suggests raising a dust by hastening．

Phil 1：3
Upon（ $\varepsilon \pi$ ）．Basis of the thanksgiving．
All（ $\pi \alpha \sigma \eta$ ）．Note frequent use of＂all＂here（ $\pi \alpha \sigma \eta \iota, \pi \alpha v \tau o \tau \varepsilon$ ，always，$\pi \alpha \sigma \eta$ ，again，$\pi \alpha v \tau \omega \nu$ $\nu \mu \omega v$ ，you all）．The use of＂you all＂recurs several times（4，7 bis，8）．

Phil 1：4
With joy（ $\mu \varepsilon \tau \alpha \chi \alpha \rho \alpha \varsigma)$ ．Keynote of the Epistle．Paul is a happy prisoner as in Philippi when he and Silas sang praises at midnight though in prison（Ac 16：25）．

Phil 1：5
For your fellowship（ $\varepsilon \pi \tau \eta \kappa o \tau \omega \omega v i \alpha \nu \mu \omega v$ ）．＂On the basis of your contribution＂as in 2Co 8：4；9：13；Ac 2：42．The particular kind of＂partnership＂or＂fellowship＂involved is the
contribution made by the Philippians for the spread of the gospel ( $1: 7 \sigma \cup \gamma \kappa о \imath v \omega v o v \varsigma$ and 4:14 where $\sigma \cup \gamma к о \downarrow \omega \nu \eta \sigma \alpha v \tau \varepsilon \varsigma$ оccurs).

In furtherance of the gospel ( $\varepsilon \iota \varsigma ~$ тo $\varepsilon v a \gamma \gamma \varepsilon \lambda ı \circ v$ ). "For the gospel."
From the first day until now ( $\alpha \pi \sigma \tau \eta \varsigma \pi \rho \omega \tau \eta \varsigma ~ \eta \mu \varepsilon \rho \alpha \varsigma ~ \alpha \chi \rho ~ \tau o v ~ v v v$ ). As when in Thessalonica (Php 4:15f. ), in Corinth (Ac 18:5; 2Co 11:7-10) , and now in Rome.

Phil 1:6
Being confident ( $\pi \varepsilon \pi \sigma \circ \theta \omega \varsigma$ ). Second perfect active of $\pi \varepsilon \theta \theta \omega$, to persuade.
This very thing (avто тоито). Accusative of the inner object with $\pi \varepsilon \pi \sigma \circ \theta \omega \varsigma$, "this thing itself."

Will perfect it ( $\varepsilon \pi \iota \tau \varepsilon \lambda \varepsilon \sigma \varepsilon$ ). Future active indicative of $\varepsilon \pi \iota \tau \varepsilon \lambda \varepsilon \omega$, will fully ( $\varepsilon \pi\llcorner-$ ) finish. God began and God will consummate it (see 2Co 8:6; Ga 3:3 where both words occur together as here), but not without their cooperation and partnership.

Until the day of Jesus Christ (axp $\eta \mu \varepsilon \rho a \varsigma X \rho \iota \sigma \tau o v ~ I \eta \sigma o v)$. The second coming as in verse 10. See 1Th 5:2,4; 2Th 1:10; 2:2; 1Co 1:18; 3:13; 2Co 1:14; Ro 13:12. Paul never sets the time for the Lord's return, but he is cheered by that blessed hope.

Phil 1:7
Because I have you in my heart ( $\delta \iota \alpha \tau 0 \varepsilon \chi \varepsilon ı \nu \mu \varepsilon \varepsilon \nu \tau \eta \kappa \alpha \rho \delta ı \alpha \nu \mu \alpha \varsigma$ ). Or "because you hold me in your heart." Literally, "because of the holding me (or you) in the heart as to you (or me)." One accusative is the object of the infinitive $\varepsilon \chi \varepsilon เ v$, the other is the accusative of general reference. There is no way to decide which is the idea meant except to say that love begets love. The pastor who, like Paul, holds his people in his heart will find them holding him in their hearts.

In the defence ( $\varepsilon v \tau \eta a \pi o \lambda o \gamma \iota \alpha$ ). Old word (our word apology, but not our idea of apologizing), in the original sense in $\operatorname{Ac} 22: 1 ; 25: 16$. So also in verse 16 below.

Confirmation ( $\beta \varepsilon \beta \alpha \iota \omega \sigma \varepsilon$ ). Old word from $\beta \varepsilon \beta \alpha \iota o \omega(\beta \varepsilon \beta \alpha \iota \sigma \sigma, \beta \alpha \iota \nu \omega)$, to make stable. In N.T. only here and Heb 6:16 about oath.

Partakers with me of grace ( $\sigma \cup \gamma \kappa о \iota v \omega v o v \varsigma \mu \circ v \tau \eta \varsigma \chi \alpha \rho \iota \tau \circ \varsigma)$. Literally, "my co-sharers in grace" (objective genitive). "Grace prompted them to alleviate his imprisonment, to cooperate with him in defending and propagating the gospel, and to suffer for its sake" (Vincent, Int. Crit. Comm.).

Phil 1:8
My witness ( $\mu \alpha \rho \tau v \varsigma \mu 0 v$ ). Same solemn oath in Ro 1:9.
I long after ( $\varepsilon \pi / \iota \circ \theta \omega)$. Longing ( $\pi \circ \theta \circ \varsigma$ ) directed toward $(\varepsilon \pi)$ the Philippians. Old word, chiefly in Paul in N.T.

In the tender mercies ( $\varepsilon v \sigma \pi \lambda \alpha \gamma \chi$ voıc). Literally "in the bowels" as the seat of the affections.

Phil 1:9

May abound（ $\pi \varepsilon \rho \iota \sigma \sigma \varepsilon \cup \eta)$ ．Present active subjunctive of $\pi \varepsilon \rho \iota \sigma \sigma \varepsilon v \omega$ ，may keep on overflowing，a perpetual flood of love，＂yet more and more＂（ $\varepsilon \tau \mu \alpha \lambda \lambda o v ~ \kappa \alpha \mu \alpha \lambda$ ov $)$ ，but with necessary limitations（river banks），＂in knowledge＂（ $\varepsilon v \varepsilon \pi \iota \gamma v \omega \sigma \varepsilon$ ，in full knowledge） ＂and all discernment＂（ $\pi \alpha \sigma \eta \alpha \iota \sigma \eta \eta \sigma \varepsilon$ ）．The delicate spiritual perception（ $\alpha \circ \sigma \theta \eta \sigma \iota \varsigma$ ，old word from $\alpha$ เ $\sigma$ ब $v o \mu \alpha$ ，only here in N．T．as the verb only in Lu 9：45 in N．T．）can be cultivated as in aıoӨŋтпpoov（Heb 5：14）

Phil 1：10
So that ye may（ $\varepsilon \varsigma \varsigma ~ \tau o ~ v \mu \alpha \varsigma)$ ．Either purpose or result（ $\varepsilon \varsigma \varsigma ~ t o ~ p l u s ~ i n f i n i t i v e ~ a s ~ i n ~ R o ~$ 1：11，20；3：26，etc．）．

Approve the things that are excellent（ $\delta$ окща〔єı $\tau \alpha \delta ı \alpha \varphi \varepsilon \rho о \nu \tau \alpha$ ）．Originally，＂test the things that differ．＂Cf．same idiom in Ro 2：28．The verb was used for assaying metals． Either sense suits this context，but the first step is to distinguish between good and evil and that is not always easy in our complex civilization．

Sincere（ $\varepsilon \iota \lambda \iota \kappa \rho \iota v \varepsilon \iota \varsigma)$ ．Old word of uncertain origin from $\kappa \rho \iota v \omega$ ，to judge，by $\varepsilon \lambda \lambda \eta$（sun－ light）or to sift by rapid rolling（ $\varepsilon$（ $\lambda \circ \varsigma)$ ．At any rate it means pure，unsullied．

Void of offence（ $\alpha \pi \rho о \sigma к о \pi о$ ）．Alpha privative $\pi \rho \circ \varsigma$ and ко $\pi \tau \omega$ ，to cut，＂not stumbled against＂（not causing others to stumble）or if active＂not stumbling against．＂Passive sense probably，not active as in 1Co 10：32 ．Common in the papyri，though not in ancient Greek writers．

Phil 1：11
Fruits of righteousness（картоv $\delta ⿺ 𠃊 \propto о \sigma \cup \nu \eta \varsigma) . ~ S i n g u l a r, ~ c o l l e c t i v e ~ i d e a, ~ f r u i t ~ o f ~ r i g h t-~$ eousness．Accusative case retained with perfect passive participle．

Phil 1：12
The things which happened unto me（ $\tau \alpha \kappa \alpha \tau^{\prime} \varepsilon \mu \varepsilon$ ）．＂The things concerning me＂＝＂my affairs＂as common in Josephus．

Have fallen out rather（ $\mu \alpha \lambda \lambda o v \varepsilon \lambda \eta \lambda u \theta \varepsilon v$ ）．＂Have come rather．＂Second perfect active indicative of $\varepsilon \rho \chi \circ \mu \alpha$ ．

Unto the progress（ $\varepsilon \varsigma \varsigma ~ \pi \rho о к о \pi \eta v)$ ．Late word from $\pi \rho о к о \pi \tau \omega$ ，common verb，to cut or strike forward，but this late substantive does not occur in classical Greek．It is a technical term in Stoic philosophy for＂progress toward wisdom＂and it appears also in the papyri and the LXX．In N．T．only here，verse 25；1Ti 4：15 ．

Phil 1：13
Throughout the whole praetorian guard（ $\varepsilon v o \lambda \omega \tau \omega \pi \rho \alpha \iota \tau \omega \rho \iota \omega$ ）．There were originally ten thousand of these picked soldiers，concentrated in Rome by Tiberius．They had double pay and special privileges and became so powerful that emperors had to court their favour． Paul had contact with one after another of these soldiers．It is a Latin word，but the meaning is not certain，for in the other New Testament examples（Mt 27：27；Mr 15：16；Joh 18：28，33； 19：9；Ac 23：35）it means the palace of the provincial governor either in Jerusalem or Caesarea．

In Rome "palace" would have to be the emperor's palace, a possible meaning for Paul a provincial writing to provincials (Kennedy). Some take it to mean the camp or barracks of the praetorian guard. The Greek, "in the whole praetorium," allows this meaning, though there is no clear example of it. Mommsen and Ramsay argue for the judicial authorities (praefecti praetorio) with the assessors of the imperial court. At any rate Paul, chained to a soldier, had access to the soldiers and the officials.

Phil 1:14
The most of the brethren ( $\tau$ ouc $\pi \lambda \varepsilon$ ovo $\alpha \varsigma \tau \nu \alpha \delta \varepsilon \lambda \varphi \omega v$ ). "The more part of the brethren." The comparative with the article with the sense of the superlative as often in the Koine.

In the Lord ( $\varepsilon v$ Kvpit). It is not clear whether this phrase is to be connected with
 "through my bonds" ( $\tau$ оья $\delta \varepsilon \sigma \mu \circ \iota \varsigma \mu$ оv) would be the instrumental case and mean that by means of Paul's bonds the brethren "are more abundantly bold" ( $\pi \varepsilon \rho เ \sigma \sigma о \tau \varepsilon \rho \omega \varsigma ~ \tau о \lambda \mu a ı v)$.

Phil 1:15
Even of envy and strife ( $\kappa \alpha \delta \iota \alpha \varphi \theta$ ovov $\kappa \alpha \varepsilon \rho ı v$ ). "Even because of" (accusative after $\delta(\alpha)$. Surely the lowest of motives for preaching Christ. Envy is an old word and an old sin and strife ( $\varepsilon \rho \iota \varsigma)$ is more rivalry than schism. It is petty and personal jealousy of Paul's power and prowess by the Judaizers in Rome whom Paul has routed in the east, but who now exult at the opportunity of annoying their great antagonist by their interpretation of Christ. Jealousy is always against those of one's own class or profession as preachers with preachers, doctors with doctors.

Of goodwill ( $\delta \delta^{\prime}$ عv $\delta$ oкı $\alpha v$ ). Because of goodwill toward Paul.
Phil 1:16
Of love ( $\varepsilon \xi \alpha \gamma \alpha \pi \eta \varsigma)$. Out of love to Paul as well as to Christ. Put 1Co 13 here as a flashlight.

Phil 1:17
Of faction ( $\varepsilon \xi \varepsilon \rho 1 \theta \varepsilon \mid \alpha \varsigma)$. Out of partisanship. From $\varepsilon \rho \bullet \theta \varepsilon v \omega$, to spin wool, and that from $\varepsilon \rho i \theta o \varsigma$, a hireling. The papyri examples suit the idea of selfish ambition (Moulton and Milligan's Vocabulary). See 2Co 12:20; Ga 5:20 .

Not sincerely (ovð $\alpha \gamma v \omega \varsigma$ ). "Not purely," that is with mixed and impure motives.
To raise up affliction for my bonds ( $\theta \lambda ı \psi \iota \nu \varepsilon \gamma \varepsilon เ \rho \varepsilon เ \nu \tau о \iota \varsigma \delta \varepsilon \sigma \mu \circ \iota \varsigma \mu \circ v$ ). Now that Paul is down they jump on him in mean and nagging ways. Dative case in $\delta \varepsilon \sigma \mu \circ$ ç. "To make my chains gall me" (Lightfoot).

Phil 1:18
What then? ( $\tau \gamma \alpha \rho$ ?). Sharp problem put up to Paul by the conduct of the Judaizers.

Only that ( $\pi \lambda \eta \nu$ or). Same idiom in Ac 20:23. $\Pi \lambda \eta v$ is adverb $\pi \lambda \varepsilon o v$ (more besides). As a preposition $\pi \lambda \eta \nu$ means "except." This essential thing Paul sees in spite of all their envy and selfishness that Christ is preached.

Whether in pretence ( $\varepsilon \iota \tau \varepsilon \pi \rho \circ \varphi \alpha \sigma \varepsilon$ ). Either from $\pi \rho \circ \varphi \alpha \iota v \omega$, to shew forth, or $\pi \rho \circ \varphi \eta \mu$, to speak forth, the ostensible presentation often untrue. See Ac 27:30. Paul sees clearly through the pious pretence of these Judaizers and rejoices that people get some knowledge of Christ. Some Christ is better than no Christ.

Yea, and will rejoice ( $\alpha \lambda \lambda \alpha \kappa \alpha \chi \alpha \rho \eta \sigma о \mu \alpha$ ). Note affirmative, not adversative, use of $\alpha \lambda \lambda \alpha$. Volitive use of the future (second future passive) indicative ( $\chi \alpha \rho \eta \sigma o \mu \alpha$ ) of $\chi \alpha \rho \omega$. Paul is determined to rejoice in spite of the efforts of the Judaizers to prod him to anger.

Phil 1:19
Will turn ( $\alpha \pi \circ \beta \eta \sigma \varepsilon \tau \alpha$ ). Future middle indicative of $\alpha \pi \circ \beta \alpha \iota v \omega$, old verb, to come from, to come back, to turn out.

To my salvation ( $\varepsilon ı \varsigma \sigma \omega \tau \eta \rho \iota \alpha v$ ). For his release from prison as he strongly hopes to see them again ( 1:26). Lightfoot takes the word to be Paul's eternal salvation and it must be confessed that verse 20 (the close of this sentence) does suit that idea best. Can it be that Paul carried both conceptions in the word here?

Supply ( $\varepsilon \pi ⿺ \chi \circ \rho \eta \gamma / a \varsigma)$. Late and rare word (one example in inscription of first century A.D.). In N.T. only here and Eph 4:16. From the late verb $\varepsilon \pi \imath \chi \circ \rho \eta \gamma \varepsilon \omega$ (double compound, $\varepsilon \pi \iota, \chi$ оооб, $\eta \gamma \varepsilon о \mu \alpha$, to furnish supply for the chorus) which see in 2Co 9:10; Ga 3:5.

Phil 1:20
Earnest expectation ( $\alpha \pi о к \alpha \rho \alpha \delta о к ⿺ \alpha v$ ). In Paul alone from $\alpha \pi о к \alpha \rho \alpha \delta$ ок $\varepsilon \omega$ (in papyri). See on Ro 8:19 for only other example.

Shall be magnified ( $\mu \varepsilon \gamma \alpha \lambda \nu v \theta \eta \sigma \varepsilon \tau \alpha)$. Future passive indicative of $\mu \varepsilon \gamma \alpha \lambda \nu v \omega$, old verb, to make great, from $\mu \varepsilon \gamma \alpha \varsigma$ (great). See Ac 19:17.

In my body ( $\varepsilon v \tau \omega \sigma \omega \mu \alpha \tau \mu \circ v$ ). See Ro 12:1f. It is harder often to make Christ great in the body than in the spirit.

Phil 1:21
For to me ( $\varepsilon \mu \mathrm{o} \gamma \alpha \rho)$. Fine example of the ethical dative. Paul gives his own view of living.
 present active infinitive) is the subject as is shown by the article to. Living is coextensive with Christ.

Gain ( $\kappa \varepsilon \rho \delta$ оऽ). Old word for any gain or profit, interest on money (so in papyri). In N.T. only here, Php 3:7; Tit 1:11.

To die ( $\tau 0$ a 0 o $\alpha v \varepsilon \iota v$, second aorist active infinitive, single act) is to cash in both principal and interest and so to have more of Christ than when living. So Paul faces death with independence and calm courage.

Phil 1:22

If this is the fruit of my work (точто $\mu$ о картос $\varepsilon \rho \gamma о$ ). There is no $\varepsilon$ (if) here in the Greek, but tovto (this) seems to be resumptive and to repeat the conditional clause just before. If so, $\kappa \alpha$ just after means
then and introduces the conclusion of the condition. Otherwise tov to introduces the conclusion and кa means
and .
I wot not (ov $\gamma \nu \omega \rho \iota \zeta \omega)$ ). "I know not." It seems odd to preserve the old English word "wot" here. But it is not clear that $\gamma \nu \omega \rho \iota \zeta \omega$ (old causative verb from $\gamma \iota \nu \omega \sigma \kappa \omega$ ) means just to know. Elsewhere in the N.T., as in $\operatorname{Lu}$ 2:15; Ro 9:22, it means to make known, to declare. The papyri examples mean to make known. It makes perfectly good sense to take its usual meaning here, "I do not declare what I shall choose."

Phil 1:23
I am in a strait ( $\sigma \cup v \varepsilon \chi \circ \mu \alpha)$. "I am held together." Present passive indicative of the common compound verb $\sigma v v \varepsilon \chi \omega$, to hold together, to hem together as in Lu 8:45. "I am hemmed in on both sides" (Lightfoot).

Betwixt the two ( $\varepsilon \kappa \tau \omega v \delta v o$ ). "From the two (sides)." Pressure to live on, pressure to die and be with Christ.

To depart ( $\varepsilon \iota \varsigma ~ \tau o ~ \alpha v \alpha \lambda \nu \sigma \alpha$ ). Purpose clause, $\varepsilon \varsigma \varsigma ~ \tau o ~ a n d ~ t h e ~ a o r i s t ~ a c t i v e ~ i n f i n i t i v e ~$ ava入voa, old compound verb, to unloose (as threads), to break up, to return (Lu 12:36, only other N.T. example), to break up camp (Polybius), to weigh anchor and put out to sea, to depart (often in old Greek and papyri). Cf. ката入 $v \omega$ in 2Co 5:1 for tearing down the tent.

Very far better ( $\pi \mathrm{o} \lambda \lambda \omega \mu \alpha \lambda \lambda$ ov к $\rho \varepsilon \iota \sigma \sigma o v$ ). Double comparative (triple Lightfoot calls it because of $\pi \mathbf{\tau} \lambda \lambda \omega$ ) like Isocrates and the Koine often. See 2Co 7:13 for $\pi \varepsilon \rho เ \sigma \sigma o \tau \varepsilon \rho \omega \varsigma$ $\mu \alpha \lambda \lambda o v$. По $\lambda \lambda \omega$ is the instrumental case of measure (by much).

Phil 1:24
In the flesh ( $\varepsilon v \tau \eta \sigma \alpha \rho \kappa$ ). So B D G, but Aleph A C do not have $\varepsilon v$. Unnecessary with $\varepsilon \pi \mu \mu \varepsilon \nu \omega$, to abide by (common verb).

Phil 1:25
And abide with you all ( $\kappa \alpha \pi \alpha \rho \alpha \mu \varepsilon v \omega \pi \alpha \sigma \iota v \nu \mu v$ ). Common Pauline idiom to repeat the simple verb ( $\mu \varepsilon v \omega$ ) as a compound ( $\pi \alpha \rho \alpha \mu \varepsilon v \omega$, future active indicative), old verb, to remain beside followed by locative case. See same idiom in $\chi \propto \iota \rho \omega, \sigma \cup v \chi \propto ı \rho \omega$ (Php 2:17 ).

Phil 1:26
In Christ Jesus in me ( $\varepsilon v$ X $\rho \iota \sigma \tau \omega \operatorname{I\eta \sigma ov~} \varepsilon v \varepsilon \mu \circ$ ). "In Christ Jesus" as the basis for the glorying ( $\kappa \alpha u \chi \eta \mu \alpha)$ ) "in me" as the instance in point.

Through my presence ( $\delta \iota \alpha \tau \eta \varsigma \varepsilon \mu \eta \varsigma \pi \alpha \rho o v \sigma i a \varsigma)$. The word so often used of the second coming of Christ, but here in its ordinary sense as in 2:12; 1Co 16:17.

Phil 1:27

Let your manner of life ( $\pi о \lambda \iota \tau \cup \varepsilon \sigma \theta \varepsilon$ ). Old verb from $\pi о \lambda \iota \tau \eta \varsigma$, citizen, and that from $\pi \sigma \lambda \iota \varsigma$, city, to be a citizen, to manage a state's affairs, to live as a citizen. Only twice in N.T., here and Ac 23:1. Philippi as a colony possessed Roman citizenship and Paul was proud of his own possession of this right. The Authorized Version missed the figure completely by the word "conversation" which did refer to conduct and not mere talk as now, but did not preserve the figure of citizenship. Better render, "Only do ye live as citizens."

Striving ( $\sigma v v a \theta \lambda o v v \tau \varepsilon \varsigma)$. Rather, "striving together" as in an athletic contest. Late and rare word (Diodorus). "The very energy of the Christian faith to produce energetic individualities" (Rainy). "Striving in concert" (Lightfoot).

For the faith $(\tau \eta \pi \iota \sigma \tau \varepsilon)$. For the teaching of the gospel, objective sense of $\pi \iota \sigma \tau \iota \varsigma$ (faith).
Phil 1:28
Affrighted ( $\pi \tau v \rho o \mu \varepsilon v o$ ). Present passive participle of $\pi \tau v \rho \omega$, old verb, to frighten. The metaphor is of a timid or scared horse and from $\pi \tau 0 \varepsilon \omega$ ( $\pi \tau \circ \alpha$, terror). "Not startled in anything."

By the adversaries ( $v \pi о \tau \omega v \alpha v \tau \iota \kappa \varepsilon \mu \varepsilon \nu \omega v$ ). These men who were lined up against (present middle participle of $\alpha v \tau \iota \kappa \varepsilon \iota \mu \alpha$ ) may have been Jews or Gentiles or both. See 2Th 2:4 for this late verb. Any preacher who attacks evil will have opposition.

Evident token ( $\varepsilon \nu \delta \varepsilon \iota \xi \iota \varsigma)$. Old word for proof. See 2Co 8:24; Ro 3:25f. "An Attic law term" (Kennedy) and only in Paul in N.T.

Perdition ( $\alpha \pi \omega \lambda \varepsilon \iota \alpha \varsigma)$. "Loss" in contrast with "salvation" ( $\sigma \omega \tau \eta \rho i \alpha \varsigma$ ).
And that (ка тоטто). Idiomatic adverbial accusative. "It is a direct indication from God. The Christian gladiator does not anxiously await the signal of life or death from the fickle crowd" (Lightfoot).

Phil 1:29
In the behalf of Christ ( $\tau 0 v \pi \varepsilon \rho$ X $\rho \iota \sigma \tau 0 v$ ). Literally, "the in behalf of Christ." But Paul divides the idea and uses the article to again both with $\pi \iota \sigma \tau \varepsilon v \varepsilon \iota v$ and with $\pi \alpha \sigma \chi \varepsilon เ \nu$. Suffering in behalf of Christ is one of God's gifts to us.

Phil 1:30
Conflict $(\alpha \gamma \omega \nu \alpha)$. Athletic or gladiatorial contest as in 1Ti 6:12; 2Ti 4:7. The Philippians saw Paul suffer (Ac 16:19-40; 1Th 2:2 ) as now they have heard about it in Rome.

## Philippians 2

Phil 2:1
If ( $\varepsilon$ ). Paul uses four conditions in this verse, all of the first class, assuming the condition to be true.

Comfort ( $\pi \alpha \rho \alpha \kappa \lambda \eta \sigma \iota)$ ). Rather, "ground of appeal to you in Christ." See 1Co 1:10; Eph 4:1.

Consolation ( $\pi \alpha \rho \alpha \mu \nu \theta \imath \imath v$ ). Old word from $\pi \alpha \rho \alpha \mu \nu \theta \varepsilon о \mu \alpha$, persuasive address, incentive.
Of love ( $\alpha$ ץ $\alpha \pi \eta \varsigma$ ). Objective genitive, "in love" (undefined as in 1Co 13).
Fellowship ( $\kappa o \imath \omega \omega v \alpha$ ). Partnership in the Holy Spirit "whose first fruit is love" (Ga 5:22).
 and so for the higher emotions. But $\tau \iota \varsigma$ is masculine singular and $\sigma \pi \lambda \alpha \gamma \chi v \alpha$ is neuter plural. Lightfoot suggests an error of an early transcriber or even of the amanuensis in writing $\varepsilon$ $\tau \iota c$ instead of $\varepsilon \tau \imath v a$.

Phil 2:2
Fulfil ( $\pi \lambda \eta \rho \omega \sigma \alpha \tau \varepsilon$ ). Better here, "fill full." Paul's cup of joy will be full if the Philippians
 subjunctive, keep on thinking the same thing).

Being of one accord ( $\sigma \cup v \psi \cup \chi \circ$ ). Late word here for the first time, from $\sigma \cup v$ and $\psi \cup \chi \eta$, harmonious in soul, souls that beat together, in tune with Christ and with each other.
 the same moment. Perfect intellectual telepathy. Identity of ideas and harmony of feelings.

Phil 2:3
Through vainglory ( $\kappa \alpha \tau \alpha \kappa \varepsilon v o \delta о \xi \iota \alpha v)$ ). Late word, only here in N.T., from кعvo $\delta о \xi_{\circ}$ с (кєvoб, $\delta о \xi \alpha, \mathrm{Ga} 5: 26$, only here in N.T.), empty pride.

In lowliness of mind ( $\tau \eta \tau \alpha \pi \varepsilon ı v o \varphi \rho o \sigma u v \eta$ ). Late and rare word. Not in O.T. or early Greek writers. In Josephus and Epictetus in bad sense (pusillanimity). For ostentatious hu-
 3:8, here alone in N.T.) that Christianity has ennobled and dignified (Ac 20:19).

Better than himself (v $\tau \varepsilon \rho \varepsilon \chi \circ v \tau \alpha \varsigma \varepsilon \alpha \cup \tau \omega v$ ). Present active participle of $v \pi \varepsilon \rho \varepsilon \chi \omega$ in intransitive sense to excel or surpass with the ablative, "excelling themselves." See Ro 12:10 . Phil 2:4

Looking ( $\sigma к о о и \nu \tau \varepsilon \varsigma) . ~ P r e s e n t ~ a c t i v e ~ p a r t i c i p l e ~ o f ~ \sigma к о \pi \varepsilon \omega ~ f r o m ~ \sigma к о л о \varsigma ~(a i m, ~ g o a l) . ~$ Not keeping an eye on the main chance for number one, but for the good of others.

Phil 2:5
Have this mind in you ( $\tau 0 v \tau 0 ~ \varphi \rho o v \varepsilon เ \tau \varepsilon \varepsilon v \nu \mu \nu \nu$ ). "Keep on thinking this in you which was also in Christ Jesus" (о ка $\varepsilon \nu$ X $\rho \iota \sigma \tau \omega$ I I $\sigma o v$ ). What is that? Humility. Paul presents Jesus
as the supreme example of humility. He urges humility on the Philippians as the only way to secure unity.

Phil 2:6
Being (v $\tau \alpha \rho \chi \omega v$ ). Rather, "existing," present active participle of $v \pi \alpha \rho \chi \omega$. In the form of $\operatorname{God}(\varepsilon v \mu \circ \rho \varphi \eta \theta \varepsilon o v)$. Mop $\varphi \eta$ means the essential attributes as shown in the form. In his preincarnate state Christ possessed the attributes of God and so appeared to those in heaven who saw him. Here is a clear statement by Paul of the deity of Christ.

A prize ( $\alpha \rho \pi \alpha \gamma \mu \circ v$ ). Predicate accusative with $\eta \gamma \eta \sigma \alpha \tau 0$. Originally words in $-\mu \circ \varsigma$ signified the act, not the result $(-\mu \alpha)$. The few examples of $\alpha \rho \pi \alpha \gamma \mu \circ \varsigma$ (Plutarch, etc.) allow it to be understood as equivalent to $\alpha \rho \pi \alpha \gamma \mu \alpha$, like $\beta \alpha \pi \tau \iota \sigma \mu$ os and $\beta \alpha \pi \tau \iota \sigma \mu \alpha$. That is to say Paul means a prize to be held on to rather than something to be won ("robbery").

To be on an equality with God ( $\tau 0 \varepsilon เ v \alpha ~ เ \sigma \alpha \theta \varepsilon o$ ). Accusative articular infinitive object of $\eta \gamma \eta \sigma \alpha \tau 0$, "the being equal with God" (associative instrumental case $\theta \varepsilon \omega$ after $ו \sigma \alpha$ ). I $\sigma \alpha$ is adverbial use of neuter plural with $\varepsilon$ हाva as in Re 21:16 .

Emptied himself ( $\varepsilon \alpha \cup \tau \circ \vee \varepsilon \kappa \varepsilon v \omega \sigma \varepsilon$ ). First aorist active indicative of $\kappa \varepsilon v \circ \omega$, old verb from $\kappa \varepsilon v o \varsigma$, empty. Of what did Christ empty himself? Not of his divine nature. That was impossible. He continued to be the Son of God. There has arisen a great controversy on this word, a Kevooıc doctrine. Undoubtedly Christ gave up his environment of glory. He took upon himself limitations of place (space) and of knowledge and of power, though still on earth retaining more of these than any mere man. It is here that men should show restraint and modesty, though it is hard to believe that Jesus limited himself by error of knowledge and certainly not by error of conduct. He was without sin, though tempted as we are. "He stripped himself of the insignia of majesty" (Lightfoot).

Phil 2:7
The form of a servant ( $\mu о \rho \varphi \eta \nu \delta o u \lambda o v$ ). He took the characteristic attributes ( $\mu о \rho \varphi \eta \nu$ as in verse 6) of a slave. His humanity was as real as his deity.

In the likeness of men ( $\varepsilon v$ о $\mu o t \omega \mu \alpha \tau \alpha v \theta \rho \omega \pi \omega v$ ). It was a likeness, but a real likeness (Kennedy), no mere phantom humanity as the Docetic Gnostics held. Note the difference in tense between $v \pi \alpha \rho \chi \omega \nu$ (eternal existence in the $\mu о \rho \varphi \eta$ of God) and $\gamma \varepsilon v o \mu \varepsilon v o c$ (second aorist middle participle of $\gamma เ v o \mu \alpha$, becoming, definite entrance in time upon his humanity).

## Phil 2:8

In fashion ( $\sigma \chi \eta \mu \alpha \tau$ ). Locative case of $\sigma \chi \eta \mu \alpha$, from $\varepsilon \chi \omega$, to have, to hold. Bengel explains $\mu о \rho \varphi \eta$ by forma, oноו $\omega \mu \alpha$ by similitudo, $\sigma \chi \eta \mu \alpha$ by habitus. Here with $\sigma \chi \eta \mu \alpha$ the contrast "is between what He is in Himself, and what He appeared in the eyes of men" (Lightfoot).

He humbled himself ( $\varepsilon \tau \alpha \pi \varepsilon เ \nu \omega \sigma \varepsilon v \varepsilon \alpha \cup \tau \circ v)$. First aorist active of $\tau \alpha \pi \varepsilon เ v o \omega$, old verb from taлعivoc. It is a voluntary humiliation on the part of Christ and for this reason Paul is pressing the example of Christ upon the Philippians, this supreme example of renunciation. See Bruce's masterpiece, The Humiliation of Christ.

Obedient (vлпкоoс). Old adjective, giving ear to. See Ac 7:39; 2Co 2:9.
Unto death ( $\mu \varepsilon \chi \rho$ Өavatov). "Until death." See "until blood" ( $\mu \varepsilon \chi \rho ı \varsigma$ a $\mu \alpha \tau о \varsigma, ~ H e b ~ 12: 4 ~$ ).

Yea, the death of the cross ( $\theta$ ava $\left.\frac{1}{} \delta \varepsilon \sigma \tau \alpha \cup \rho o v\right)$. The bottom rung in the ladder from the Throne of God. Jesus came all the way down to the most despised death of all, a condemned criminal on the accursed cross.

Phil 2:9
Wherefore ( $\delta \mathrm{to}$ ). Because of which act of voluntary and supreme humility.
Highly exalted ( $v \pi \varepsilon \rho \cup \psi \omega \sigma \varepsilon$ ). First aorist indicative of $v \pi \varepsilon \rho \cup \psi o \omega(v \pi \varepsilon \rho$ and $v \psi \circ \varsigma$ ) late and rare word (LXX and Byzantine). Here only in N.T. Because of Christ's voluntary humiliation God lifted him above or beyond (v $\tau \varepsilon \rho$ ) the state of glory which he enjoyed before the Incarnation. What glory did Christ have after the Ascension that he did not have before in heaven? What did he take back to heaven that he did not bring? Clearly his humanity. He returned to heaven the Son of Man as well as the Son of God.

The name which is above every name ( $\tau 0 ~ o v o \mu \alpha$ то $v \pi \varepsilon \rho \pi \alpha v ~ o v o \mu \alpha$ ). What name is that? Apparently and naturally the name

Jesus, which is given in verse 10 . Some think it is "Jesus Christ," some "Lord," some the ineffable name Jehovah, some merely dignity and honour.

Phil 2:10
 $\kappa \alpha \mu \psi \eta)$. First aorist active subjunctive of $\kappa \alpha \mu \pi \tau \omega$, old verb, to bend, to bow, in purpose clause with $\imath v a$. Not perfunctory genuflections whenever the name of Jesus is mentioned, but universal acknowledgment of the majesty and power of Jesus who carries his human name and nature to heaven. This universal homage to Jesus is seen in Ro 8:22; Eph 1:20-22 and in particular Re 5:13.

Under the earth ( $\kappa \alpha \tau \alpha \chi \theta \mathrm{ov} \iota \omega v)$. Homeric adjective for departed souls, subterranean, simply the dead. Here only in the N.T.

Phil 2:11
Should confess ( $\varepsilon \xi \circ \mu о \lambda о \gamma \eta \sigma \eta \tau \alpha)$. First aorist middle subjunctive of $\varepsilon \xi о \mu о \lambda о ү \varepsilon о \mu \alpha$ with iva for purpose.

Lord (Kupıos). Peter (Ac 2:36 ) claimed that God made Christ "Lord." See also 1Co 8:6; 12:3; Ro 10:9 . Kennedy laments that the term Lord has become one of the most lifeless in the Christian vocabulary, whereas it really declares the true character and dignity of Jesus Christ and "is the basis and the object of worship."

Phil 2:12
Not as in my presence only ( $\mu \eta \omega \varsigma \varepsilon \nu \tau \eta \pi \alpha \rho o v \sigma \iota \alpha \mu \circ v o v$ ). B and a few other MSS. omit $\omega \varsigma$. The negative $\mu \eta$ goes with the imperative $\kappa \alpha \tau \varepsilon \rho \gamma \alpha \zeta \varepsilon \sigma \theta \varepsilon$ (work out), not with итๆкоибатє (obeyed) which would call for oux.

Much more ( $\pi 0 \lambda \lambda \omega \mu \alpha \lambda \lambda o v$ ). They are not to render eye-service only when Paul is there, but much more when he is away.

Work out ( $\kappa \alpha \tau \varepsilon \rho \gamma \alpha \zeta \varepsilon \sigma \theta \varepsilon)$. Perfective use of $\kappa \alpha \tau \alpha$ (down) in composition, work on to the finish. This exhortation assumes human free agency in the carrying on the work of one's salvation.

With fear and trembling ( $\mu \varepsilon \tau \alpha ~ \varphi о \beta о \cup ~ к \alpha ~ \tau \rho о \mu о v) . ~ " N o t ~ s l a v i s h ~ t e r r o r, ~ b u t ~ w h o l e s o m e, ~$ serious caution" (Vincent). "A nervous and trembling anxiety to do right" (Lightfoot). Paul has no sympathy with a cold and dead orthodoxy or formalism that knows nothing of struggle and growth. He exhorts as if he were an Arminian in addressing men. He prays as if he were a Calvinist in addressing God and feels no inconsistency in the two attitudes. Paul makes no attempt to reconcile divine sovereignty and human free agency, but boldly proclaims both.

Phil 2:13
Which worketh in you (o $\varepsilon v \varepsilon \rho \gamma \omega v \varepsilon \nu v \mu \nu v$ ). Articular present active participle of $\varepsilon v \varepsilon \rho \gamma \varepsilon \omega$ from $\varepsilon v \varepsilon \rho \gamma \circ \varsigma(\varepsilon v, \varepsilon \rho \gamma \circ v$ ) one at work, common verb from Aristotle on, to be at work, to energize. God is the Energy and the Energizer of the universe. Modern scientists, like Eddington, Jeans, and Whitney, are not afraid to agree with Paul and to put God back of all activity in nature.

Both to will and to work (ка то $\theta \varepsilon \lambda \varepsilon เ v ~ к \alpha ~ \tau о ~ \varepsilon v \varepsilon \rho \gamma \varepsilon ı v) . ~ " B o t h ~ t h e ~ w i l l i n g ~ a n d ~ t h e ~$ working (the energizing)." God does it all, then. Yes, but he puts us to work also and our part is essential, as he has shown in verse 12, though secondary to that of God.

For his good-pleasure (vл $\rho \tau \tau \varsigma \varepsilon \cup \delta o \kappa 1 a \varsigma)$. So Whitney puts "the will of God" behind gravitation and all the laws of nature.

Phil 2:14
Without murmurings ( $\chi \omega \rho ı \varsigma \gamma \gamma \gamma \gamma v \sigma \mu \omega v$ ). See on Ac 6:1 for this late onomatopoetic word from $\gamma \circ \gamma \gamma \cup \zeta \omega$, to mutter, to grumble.

Disputings ( $\delta\llcorner\alpha \lambda o \gamma \iota \sigma \mu \omega v$ ). Or questionings as in Lu 24:38. The grumblings led to disputes.

Phil 2:15
That ye may be (ıva $\gamma \varepsilon \vee \eta \sigma \theta \varepsilon$ ). Rather, "that ye may become" (second aorist middle subjunctive of $\gamma i v o \mu \alpha$, to become).

Blameless ( $\alpha \mu \varepsilon \mu \pi \tau о$ ). Free from censure ( $\mu \varepsilon \mu \varphi о \mu \alpha$, to blame).
Harmless (aкะpaıo). Unmixed, unadulterated as in Ro 16:19.
Without blemish ( $\alpha \mu \omega \mu \alpha$ ). Without spot, "unblemished in reputation and in reality" (Vincent).

In the midst of ( $\mu \varepsilon \sigma \sigma v)$. Preposition with genitive.
Crooked ( $\sigma \kappa$ о $\lambda \propto \varsigma$ ). Old word, curved as opposed to op $\theta$ oऽ, straight. See on Ac 2:40 .

Perverse ( $\delta \iota \varepsilon \sigma \tau \rho \alpha \mu \mu \varepsilon \nu \eta \varsigma)$. Perfect passive participle of $\delta \iota \alpha \sigma \tau \rho \varepsilon \varphi \omega$, to distort, to twist, to turn to one side ( $\delta \iota \alpha$, in two). Old word. See Mt 17:17; Ac 13:10 .

Phil 2:16
As lights in the world ( $\omega \varsigma \varphi \omega \sigma \tau \eta \rho \varepsilon \varsigma \varepsilon v \kappa \sigma \sigma \mu \omega$ ). As luminaries like the heavenly bodies. Christians are the light of the world (Mt 5:14) as they reflect the light from Christ (Joh 1:4; 8:12 ), but here the word is not $\varphi \omega \varsigma$ (light), but $\varphi \omega \sigma \tau \eta \rho \varepsilon \varsigma$ (luminaries, stars). The place for light is the darkness where it is needed.

Holding forth ( $\varepsilon \pi \varepsilon \chi \circ v \tau \varepsilon \varsigma)$. Present active participle of $\varepsilon \pi \varepsilon \chi \omega$. Probably not connected with the preceding metaphor in $\varphi \omega \sigma \tau \eta \rho \varepsilon \varsigma$. The old meaning of the verb $\varepsilon \pi \varepsilon \chi \omega$ is to hold forth or to hold out (the word of life as here). The context seems to call for "holding fast." It occurs also with the sense of attending to (Ac 3:5).

That I may have ( $\varepsilon \mu$ o). Ethical dative, "to me as a ground of boasting."
Phil 2:17
And if I am offered ( $\varepsilon \kappa \alpha \sigma \pi \varepsilon v \delta o \mu \alpha)$. Though I am poured out as a libation. Old word. In N.T. only here and 2Ti 4:6. Paul pictures his life-blood as being poured upon (uncertain whether heathen or Jewish offerings meant and not important) the sacrifice and service of the faith of the Philippians in mutual service and joy (both $\chi \alpha \iota \rho \omega$ and $\sigma v \chi \chi \iota \rho \omega$ twice in the sentence). Joy is mutual when the service is mutual. Young missionaries offer their lives as a challenge to other Christians to match their money with their blood.

Phil 2:19
That I also may be of good comfort (ıva каү $\varepsilon \cup \psi v \chi \omega)$. Present subjunctive with $\imath v a$ in purpose clause of the late and rare verb $\varepsilon \cup \psi v \chi \varepsilon \omega$, from $\varepsilon \cup \psi \cup \chi \circ \varsigma$ (cheerful, of good spirit). In papyri and $\varepsilon v \psi v \chi \varepsilon$ (be of good cheer) common in sepulchral inscriptions.

When I know ( $\gamma$ vouc). Second aorist active participle of $\gamma \iota v \omega \sigma \kappa \omega$.
Phil 2:20
 1:1. Only here in N.T. Likeminded with Timothy, not with Paul.

Truly ( $\gamma \nu \eta \sigma \omega \omega \varsigma)$. "Genuinely." Old adverb, only here in N.T., from $\gamma \vee \eta \sigma \iota \varsigma$ (Php 4:3), legitimate birth, not spurious.

Phil 2:21
They all (o тavtec). "The whole of them." Surely Luke was away from Rome at this juncture.

Phil 2:22
The proof ( $\tau \eta \nu \delta$ окцп $\nu$ ). "The test" as of metals (2Co 2:9; 9:13). Three times they had seen Timothy (Ac 16:13; 19:22; 20:3f. ).

With me ( $\sigma \cup \vee \varepsilon \mu \mathrm{o}$ ). Paul's delicacy of feeling made him use $\sigma v \vee$ rather than $\varepsilon \mu \mathrm{o}$ alone. Timothy did not serve Paul.

Phil 2:23
So soon as I shall see ( $\omega \varsigma \alpha \nu \alpha \varphi เ \delta \omega$ ). Indefinite temporal clause with $\omega \varsigma \alpha v$ and the second aorist active subjunctive of $\alpha \varphi \rho \rho \alpha \omega$. The oldest MSS. (Aleph A B D) have $\alpha \varphi \iota \delta \omega$ (old aspirated form) rather than $\alpha \pi \iota \delta \omega$.

How it will go with me ( $\tau \alpha \pi \varepsilon \rho \varepsilon \mu \varepsilon$ ). On the force of $\alpha \pi$ o with opac (look away) see Heb 12:2 . "The things concerning me," the outcome of the trial. Cf. 1Co 4:17,19.

Phil 2:24
In the Lord ( $\varepsilon v$ Kvpı $\omega$ ). Not a perfunctory use of this phrase. Paul's whole life is centred in Christ (Ga 2:20).

Phil 2:25
I counted it $(\eta \gamma \eta \sigma \alpha \mu \eta \nu)$. Epistolary aorist from the point of view of the readers.
Epaphroditus (E $\pi \alpha \varphi \rho o \delta \iota \tau o v) . ~ C o m m o n ~ n a m e, ~ t h o u g h ~ o n l y ~ i n ~ P h i l i p p i a n s ~ i n ~ N . T ., ~$ contracted into Epaphras, though not the same man as Epaphras in Col 1:7. Note one article $\tau 0 v$ (the) with the three epithets given in an ascending scale (Lightfoot), brother ( $\alpha \delta \varepsilon \lambda \varphi \rho v$, common sympathy), fellow-worker (ouveppov, common work), fellow-soldier ( $\sigma v v \sigma \tau \rho \alpha \tau \omega \omega \tau \eta \nu$, common danger as in Phm 1:2 ). Mov (my) and $\nu \mu \omega v$ (your) come together in sharp contrast.

Messenger ( $\alpha \pi о \sigma \tau о \lambda o v$ ). See 2Co 8:23 for this use of $\alpha \pi \sigma \sigma \tau 0 \lambda$ os as messenger (missionary).

Minister ( $\lambda \varepsilon \iota \tau o u \rho \gamma o v)$. See on Ro 13:6; 15:16 for this ritualistic term.
Phil 2:26
He longed after ( $\varepsilon \pi \iota \pi o \theta \omega \nu \eta \nu)$. Periphrastic imperfect of $\varepsilon \pi \iota \pi o \theta \varepsilon \omega$ (Php 1:8), "he was yearning after."

You all ( $\pi \alpha \vee \tau \alpha \varsigma ~ v \mu \alpha \varsigma)$. So again (1:5,7,8).
Was sore troubled ( $\alpha \delta \eta \mu \mathrm{ov} \omega v$ ). Periphrastic imperfect again (repeat $\eta v$ ) of the old word $\alpha \delta \eta \mu \circ v \varepsilon \omega$ either from an unused $\alpha \delta \eta \mu \omega \nu$ ( $\alpha$ privative and $\delta \eta \mu \circ \varsigma$, away from home, homesick) or from $\alpha \delta \eta \mu \omega \nu, \alpha \delta \eta \sigma \alpha$ (discontent, bewilderment). The Vocabulary of Moulton and Milligan gives one papyrus example in line with the latter etymology. See already Mt 26:37; Mr 14:33. In any case the distress of Epaphroditus was greatly increased when he knew that the Philippians (the home-folks) had learned of his illness, "because ye had heard that he was sick" ( $\delta$ וот $\eta \kappa$ коибат $\boldsymbol{\text { oт } \eta \sigma \theta \varepsilon v \eta \sigma \varepsilon ) \text { ) "because ye heard that he fell sick" (ingressive }}$ aorist).

He was sick ( $\eta \sigma \theta \varepsilon v \eta \sigma \varepsilon$ ). Ingressive aorist, "he did become sick."
Nigh unto death ( $\pi \alpha \rho \alpha \pi \lambda \eta \sigma \iota v \theta \alpha v a \tau \omega$ ). Only example in N.T. of this compound adverbial preposition (from the adjective $\pi \alpha \rho \alpha \pi \lambda \eta \sigma \circ \rho)$ with the dative case.

Phil 2:28
Ye may rejoice ( $\chi \alpha \rho \eta \tau \varepsilon$ ). Second aorist passive subjunctive with iva in final clause of $\chi \propto \iota \rho \omega$, to rejoice.

That I may be the less sorrowful ( $\kappa \alpha \gamma \omega \alpha \lambda v \pi о \tau \varepsilon \rho о \varsigma \omega)$. Present subjunctive with $\operatorname{v} \alpha$ and comparative of old compound adjective $\alpha \lambda v \pi \sigma \varsigma$ ( $\alpha$ privative and $\lambda v \pi \eta$, more free from grief). Beautiful expression of Paul's feelings for the Philippians and for Epaphroditus.

Phil 2:29
In honour ( $\varepsilon v \tau \iota \mu \circ v \varsigma)$. Old compound adjective ( $\varepsilon v, \tau \iota \mu)$, prized, precious (Lu 7:2; 14:8; $1 \mathrm{Pe} 2: 4,6$ ). Predicate accusative. Noble plea in behalf of Christ's minister.

Phil 2:30
Hazarding his life ( $\pi \alpha \rho \alpha \beta о \lambda \varepsilon v \sigma \alpha \mu \varepsilon \nu \circ \varsigma \tau \eta \psi v \chi \eta$ ). First aorist middle participle of $\pi \alpha \rho \alpha \beta \circ \lambda \varepsilon v \omega$ (from the adjective $\pi \alpha \rho \alpha \beta o \lambda o \varsigma$ ), to place beside. The old Greek writers used $\pi \alpha \rho \alpha \beta \alpha \lambda \lambda о \mu \alpha$, to expose oneself to danger. But Deissmann (Light from the Ancient East, p. 88) cites an example of $\pi \alpha \rho \alpha \beta 0 \lambda \varepsilon v \sigma \alpha \mu \varepsilon v o c$ from an inscription at Olbia or the Black Sea of the second century A.D. where it plainly means "exposing himself to danger" as here. Lightfoot renders it here "having gambled with his life." The word $\pi \alpha \rho \alpha \beta o \lambda \alpha \nu$ (riskers) was applied to the Christians who risked their lives for the dying and the dead.

## Philippians 3

Phil 3:1
Finally ( $\tau \mathrm{\lambda}$ 入ormov). Accusative of general reference, literally, "as for the rest." So again in 4:8. It (or just $\lambda$ ortov) is a common phrase towards the close of Paul's Epistles (2Th 3:1; 2Co 13:11 ). In Eph 6:10 we have tou גoınov (genitive case). But Paul uses the idiom elsewhere also as in 1Co 7:29; 1Th 4:1 before the close of the letter is in sight. It is wholly needless to understand Paul as about to finish and then suddenly changing his mind like some preachers who announce the end a half dozen times.

To write the same things ( $\tau \alpha \alpha \cup \tau \alpha \gamma \rho \alpha \varphi \varepsilon เ v)$ ). Present active articular infinitive, "the going on writing the same things." What things? He has just used $\chi$ aı $\rho \varepsilon \tau \varepsilon$ (go on rejoicing) again and he will repeat it in $4: 4$. But in verse 2 he uses $\beta \lambda \varepsilon \pi \varepsilon \tau \varepsilon$ three times. At any rate Paul, as a true teacher, is not afraid of repetition.

Irksome (oкv $\rho \rho \sigma$ ). Old adjective from oкve $\omega$, to delay, to hesitate. It is not tiresome to me to repeat what is "safe" ( $\alpha \sigma \varphi \alpha \lambda \varepsilon \varsigma)$ for you. Old adjective from $\alpha$ privative and $\sigma \varphi \alpha \lambda \lambda \omega$, to totter, to reel. See Ac 21:34 .

Phil 3:2
Beware ( $\beta \lambda \varepsilon \pi \varepsilon \tau \varepsilon$ ). Three times for urgency and with different epithet for the Judaizers each time.

The dogs ( $\tau$ оия киvac). The Jews so termed the Gentiles which Jesus uses in a playful $\operatorname{mood}$ (кvvapıoı, little dogs) to the Syro-Phoenician woman (Mt 15:26 ). Paul here turns the phrase on the Judaizers themselves.

The evil workers ( $\tau$ оия какоия $\varepsilon \rho \gamma \alpha \tau \alpha \varsigma)$. He had already called the Judaizers "deceitful workers" ( $\varepsilon \rho \gamma \alpha \tau \alpha$ $\delta$ о $\lambda \iota$ ) in 2Co 11:13.

The concision ( $\tau \eta \nu \kappa \alpha \tau \alpha \tau о \mu \eta \nu$ ). Late word for incision, mutilation (in contrast with $\pi \varepsilon \rho \iota \tau \circ \mu \eta$, circumcision). In Symmachus and an inscription. The verb $\kappa \alpha \tau \alpha \tau \varepsilon \mu \nu \omega$ is used in the LXX only of mutilations (Le 21:5; 1Ki 18:28).

Phil 3:3
For we ( $\eta \mu \varepsilon \iota \varsigma \gamma \rho$ ). We believers in Christ, the children of Abraham by faith, whether Jew or Gentile, the spiritual circumcision in contrast to the merely physical (Ro 2:25-29; Col 2:11; Eph 2:11). See Ga 5:12 for a $\pi$ ote $\mu \nu \varepsilon เ \nu($ to cut off) in sense of mutilation also.

By the Spirit of God ( $\pi v \varepsilon v \mu \alpha \tau \theta \varepsilon o v)$. Instrumental case, though the dative case as the object of $\lambda \alpha \tau \rho \varepsilon \cup \omega$ makes good sense also (worshipping the Spirit of God) or even the locative (worshipping in the Spirit of God).

No (ouk). Actual condition rather than $\mu \eta$ with the participle.
In the flesh ( $\varepsilon v \sigma \alpha \rho \kappa)$. Technical term in Paul's controversy with the Judaizers (2Co 11:18; Gal 6:13f. ). External privileges beyond mere flesh.

Phil 3:4

Might have ( $\varepsilon \chi \omega v$ ). Rather, "even though myself having."
Confidence ( $\pi \varepsilon \pi \circ \bullet \theta \eta \sigma \iota v$ ). Late word, condemned by the Atticists, from $\pi \varepsilon \pi \sigma \circ \theta \alpha$ (just used). See 2Co 1:15; 3:4.

Phil 3:5
Thinketh to have confidence ( $\delta$ окє $\pi \varepsilon \pi о \circ \theta \varepsilon v \alpha$ ). Second perfect active infinitive. Old idiom, "seems to himself to have confidence." Later idiom like Mt 3:9 "think not to say" and 1Co 11:16, "thinks that he has ground of confidence in himself."

I yet more ( $\varepsilon \gamma \omega \mu \alpha \lambda \lambda \nu)$. "I have more ground for boasting than he" and Paul proceeds to prove it in the rest of verses 5,6 .

Circumcised the eighth day ( $\pi \varepsilon \rho \iota \tau о \mu \eta$ октап $\mu \varepsilon \rho \circ \varsigma)$. "In circumcision (locative case) an eighth day man." Use of the ordinal with persons like $\tau \varepsilon \tau \alpha \rho \tau \alpha \iota \varrho(J o h ~ 11: 39) . ~ I s h m a e l i t e s ~$ were circumcised in the thirteenth year, proselytes from Gentiles in mature age, Jews on the eighth day ( $\mathrm{Lu} 2: 21$ ).

Of the stock of Israel ( $\varepsilon \kappa \gamma^{\varepsilon}$ vouc Iopaŋ $\lambda$ ). Of the original stock, not a proselyte.
Benjamin (Beviauiv). Son of the right hand (that is, left-handed), son of Rachel. The first King, Saul (Paul's own Hebrew name) was from this little tribe. The battle cry of Israel was "After thee, O Benjamin" (Jud 5:14).

A Hebrew of the Hebrews ( $\mathrm{E} \beta \rho \alpha \iota \rho \varepsilon \xi E \beta \rho \alpha \iota \omega v$ ). Of Hebrew parents who retained the characteristic qualities in language and custom as distinct from the Hellenistic Jews (Ac 6:1 ). Paul was from Tarsus and knew Greek as well as Aramaic (Ac 21:40; 22:2) and Hebrew, but he had not become Hellenized.

A Pharisee (Фарıбаıоऽ). In distinction from the Sadducees (Ga 1:14) and he continued a Pharisee in many essential matters like the doctrine of the resurrection (Ac 23:6). Cf. 2Co 11:22.

Phil 3:6
As touching zeal ( $\kappa \alpha \tau \alpha \zeta \eta \lambda \circ \varsigma)$. So the old MSS. treating $\lceil\eta \lambda$ оऽ as neuter, not masculine. He was a zealot against Christianity, "persecuting the church" ( $\delta \iota \omega \kappa \omega \nu \tau \eta \nu \varepsilon \kappa \kappa \lambda \eta \sigma \omega \alpha v)$. He was the ringleader in the persecution from the death of Stephen till his own conversion (Ac 8:1-9:9).
 knew and practised all the rules of the rabbis. A marvellous record, scoring a hundred in Judaism.

Phil 3:7
Were gain to me ( $\varepsilon v \mu$ о кєр $\delta \eta$ ). "Were gains (plural, see on 1:21) to me (ethical dative)." Paul had natural pride in his Jewish attainments. He was the star of hope for Gamaliel and the Sanhedrin.

Have I counted $(\eta \gamma \eta \mu \alpha)$. Perfect middle indicative, state of completion and still true.

Loss (گఇpuav). Old word for damage, loss. In N.T. only in Phil. and Ac 27:10,21 . Debit side of the ledger, not credit.

Phil 3:8
Yea, verily, and ( $\alpha \lambda \lambda \alpha \mu \varepsilon v$ ovv $\gamma \varepsilon \kappa \alpha$ ). Five particles before Paul proceeds (yea, indeed, therefore, at least, even), showing the force and passion of his conviction. He repeats his affirmation with the present middle indicative ( $\eta \gamma \circ \cup \mu \alpha)$, "I still count all things loss for the excellency of the knowledge ( $\tau 0$ v $\pi \varepsilon \rho \varepsilon \chi \circ v$, the surpassingness, neuter articular participle of טпєрєХ $\omega$, Php 2:3 ) of Christ Jesus my Lord."

Dung ( $\sigma \kappa \nu \beta \alpha \lambda \alpha$ ). Late word of uncertain etymology, either connected with $\sigma \kappa \omega \rho$ (dung) or from $\varepsilon \varsigma \kappa \operatorname{vva} \varsigma \beta \lambda \lambda \omega$, to fling to the dogs and so refuse of any kind. It occurs in the papyri. Here only in the N.T.

That I may gain Christ (ıva X $\rho ı \sigma \tau о v ~ к \varepsilon \rho \delta \eta \sigma \omega)$. First aorist active subjunctive of $\kappa \varepsilon \rho \delta \alpha \omega$, Ionic form for $\kappa \varepsilon \rho \delta a ı v \omega$ with $\tau v a$ in purpose clause. Paul was never satisfied with his knowledge of Christ and always craved more fellowship with him.

Phil 3:9
Be found in him ( $\varepsilon v \rho \varepsilon \theta \omega \varepsilon \vee \alpha \cup \tau \omega)$. First aorist (effective) passive subjunctive with $v v a$ of $\varepsilon v \rho ı \sigma \kappa \omega$. At death (2Co 5:3) or when Christ comes. Cf. 2:8; Ga 2:17 .

Through faith in Christ ( $\delta \iota \alpha \pi \iota \sigma \tau \varepsilon \omega \varsigma$ X $\rho \circ \sigma \tau 0 v$ ). The objective genitive Xpıбтov, not subjective, as in Ga 2:16,20; Ro 3:22. Explained further by $\varepsilon \pi \tau \eta \pi \iota \sigma \tau \varepsilon$ (on the basis of faith) as in Ac 3:16.

Phil 3:10
That I may know him ( $\tau \circ v \gamma v \omega v \alpha \alpha v \tau o v$ ). Genitive of the articular second aorist (ingressive) active infinitive (purpose) of $\gamma \iota \nu \omega \sigma \kappa \omega$, to have personal acquaintance or experience with. This is Paul's major passion, to get more knowledge of Christ by experience.

The power of his resurrection ( $\tau \eta \nu \delta \nu v \alpha \mu \nu \tau \tau \varsigma \alpha v a \sigma \tau \alpha \sigma \varepsilon \omega \varsigma \alpha \nu \tau o v)$. Power (Lightfoot) in the sense of assurance to believers in immortality (1Co 15:14f.; Ro 8:11), in the triumph over $\sin$ (Ro 4:24f. ), in the dignity of the body (1Co 6:13ff.; Php 3:21), in stimulating the moral and spiritual life (Ga 2:20; Ro 6:4f.; Col 2:12; Eph 2:5 ). See Westcott's The Gospel of the Resurrection, ii, 31.

The fellowship of his sufferings ( $\tau \eta v$ кov $\nu \omega v ı \alpha \tau \omega \nu \pi \alpha \theta \eta \mu \alpha \tau \omega \nu \alpha v \tau o v$ ). Partnership in (objective genitive) his sufferings, an honour prized by Paul (Co 1:24).

Becoming conformed to his death ( $\sigma \nu \mu \mu о р \varphi \downharpoonright \zeta о д \varepsilon о \varsigma \tau \omega$ Өavã $\omega$ avtov). Present passive participle of $\sigma \nu \mu \mu о \rho \varphi \iota \zeta \omega$, late verb from $\sigma \nu \mu \mu о \rho \varphi о \varsigma$, found only here and ecclesiastical writers quoting it. The Latin Vulgate uses configuro. See Ro 6:4 for $\sigma \nu \mu \varphi \nu \tau o$ in like sense and 2Co 4:10. "The agony of Gethsemane, not less than the agony of Calvary, will be reproduced however faintly in the faithful servant of Christ" (Lightfoot). "In this passage we have the deepest secrets of the Apostle's Christian experience unveiled" (Kennedy).

Phil 3:11

If by any means I may attain $(\varepsilon \pi \omega \varsigma \kappa \alpha \tau \alpha \nu \tau \eta \sigma \omega)$. Not an expression of doubt, but of humility (Vincent), a modest hope (Lightfoot). For $\varepsilon \pi \omega \varsigma$, see Ro $1: 10 ; 11: 14$ where $\pi \alpha \rho \alpha \zeta \eta \lambda \omega \sigma \omega$ can be either future indicative or aorist subjunctive like $\kappa \alpha \tau \alpha \nu \tau \eta \sigma \omega$ here (see subjunctive кат $\alpha \lambda \alpha \beta \omega$ in verse 12), late compound verb катаv $\alpha \alpha \omega$.

Resurrection ( $\varepsilon \xi \alpha v \alpha \sigma \tau \alpha \sigma \iota)$ ). Late word, not in LXX, but in Polybius and one papyrus example. Apparently Paul is thinking here only of the resurrection of believers out from the dead and so double $\varepsilon \xi$ ( $\tau \varepsilon \nu \varepsilon \xi \alpha \nu \alpha \sigma \tau \alpha \sigma \iota \nu \tau \eta \nu \varepsilon \kappa \nu \varepsilon \kappa \rho \omega \nu$ ). Paul is not denying a general resurrection by this language, but emphasizing that of believers.

Phil 3:12
Not that (ov $0 \tau$ ). To guard against a misunderstanding as in Joh 6:26; 12:6; 2Co 1:24; Php 4:11,17.

I have already obtained ( $\eta \delta \eta \varepsilon \lambda \alpha \beta o v$ ). Rather, "I did already obtain," constative second aorist active indicative of $\lambda \alpha \mu \beta \alpha \nu \omega$, summing up all his previous experiences as a single event.

Or am already made perfect ( $\eta \eta \delta \eta \tau \varepsilon \tau \varepsilon \lambda \varepsilon \iota \omega \mu \alpha$ ). Perfect passive indicative (state of completion) of $\tau \varepsilon \lambda \varepsilon \iota \circ \omega$, old verb from $\tau \varepsilon \lambda \varepsilon \iota \circ \varsigma$ and that from $\tau \varepsilon \lambda \sigma \varsigma$ (end). Paul pointedly denies that he has reached a spiritual impasse of non- development. Certainly he knew nothing of so-called sudden absolute perfection by any single experience. Paul has made great progress in Christlikeness, but the goal is still before him, not behind him.

But I press on $(\delta t \omega \kappa \omega \delta \varepsilon)$. He is not discouraged, but encouraged. He keeps up the chase (real idea in $\delta \iota \omega \kappa \omega$, as in 1Co 14:1; Ro 9:30; 1Ti 6:11).

If so be that ( $\varepsilon \kappa \alpha$ ). "I follow after." The condition (third class, $\varepsilon เ--\kappa \alpha \tau \alpha \lambda \alpha \beta \omega$, second aorist active subjunctive of $\kappa \alpha \tau \alpha \lambda \alpha \mu \beta \alpha \nu \omega)$ is really a sort of purpose clause or aim. There are plenty of examples in the Koine of the use of $\varepsilon$ and the subjunctive as here (Robertson, Grammar, p. 1017), "if I also may lay hold of that for which ( $\varepsilon \varphi^{\prime} \omega$, purpose expressed by $\varepsilon \pi$ ) I was laid hold of ( $\kappa \alpha \tau \varepsilon \lambda \eta \mu \varphi \theta \eta \nu$, first aorist passive of the same verb $\kappa \alpha \tau \alpha \lambda \alpha \mu \beta \alpha \nu \omega$ ) by Christ Jesus." His conversion was the beginning, not the end of the chase.

Phil 3:13
Not yet (ov $\pi \omega$ ). But some MSS. read ov (not).
To have apprehended ( $\kappa \alpha \tau \varepsilon \lambda \eta \varphi \varepsilon v \alpha$ ). Perfect active infinitive of same verb $\kappa \alpha \tau \alpha \lambda \alpha \mu \beta \alpha \omega$ (perfective use of ката, to grasp completely). Surely denial enough.

But one thing ( $\varepsilon \nu \delta \varepsilon$ ). No verb in the Greek. We can supply $\pi \sigma \omega \omega$ (I do) or $\delta t \omega \kappa \omega$ (I keep on in the chase), but no verb is really needed. "When all is said, the greatest art is to limit and isolate oneself" (Goethe), concentration.

Forgetting the things which are behind ( $\tau \alpha \mu \varepsilon \nu$ о $\pi \iota \sigma \omega \varepsilon \pi \iota \lambda \alpha v \theta a v o \mu \varepsilon \nu \circ \varsigma)$. Common verb, usually with the genitive, but the accusative in the Koine is greatly revived with verbs. Paul can mean either his old pre-Christian life, his previous progress as a Christian, or both (all of it).

Stretching forward ( $\varepsilon \pi \varepsilon \kappa \tau \varepsilon เ ข о \mu \varepsilon v o \varsigma)$. Present direct middle participle of the old double compound $\varepsilon \pi \varepsilon \kappa \tau \varepsilon เ v \omega$ (stretching myself out towards). Metaphor of a runner leaning forward as he runs.

Phil 3:14
Toward the goal (ката бколоv). "Down upon the goal," who is Jesus himself to whom we must continually look as we run (Heb 12:2). The word means a watchman, then the goal or mark. Only here in N.T.

Unto the prize ( $\varepsilon ા \varsigma ~ \tau о ~ \beta \rho \alpha \beta \varepsilon เ o v) . ~ L a t e ~ w o r d ~(M e n a n d e r ~ a n d ~ i n s c r i p t i o n s) ~ f r o m ~ \beta \rho \alpha \beta \varepsilon u \varsigma ~$ (umpire who awards the prize). In N.T. only here and 1Co 9:24.

Of the high calling ( $\tau \eta \varsigma \alpha v \omega \kappa \lambda \eta \sigma \varepsilon \omega \varsigma)$. Literally, "of the upward calling." The goal continually moves forward as we press on, but yet never out of sight.

Phil 3:15
As many as be perfect (ooo $\tau \varepsilon \lambda \varepsilon ı$ ). Here the term $\tau \varepsilon \lambda \varepsilon เ o ~ m e a n s ~ r e l a t i v e ~ p e r f e c t i o n, ~$ not the absolute perfection so pointedly denied in verse 12. Paul here includes himself in the group of spiritual adults (see He 5:13 ).

Let us be thus minded (точто $\varphi \rho \circ v \omega \mu \varepsilon$ ). Present active volitive subjunctive of $\varphi \rho \circ v \varepsilon \omega$. "Let us keep on thinking this," viz. that we have not yet attained absolute perfection.

If ye are otherwise minded ( $\varepsilon \tau \varepsilon \tau \varepsilon \rho \omega \varsigma \varphi \rho \circ v \varepsilon \tau \tau \varepsilon$ ). Condition of first class, assumed as true. That is, if ye think that ye are absolutely perfect.

Shall God reveal unto you (o $\theta \varepsilon o \varsigma \nu \mu \nu \nu \alpha \pi \sigma \kappa \alpha \lambda \nu \psi \varepsilon$ ). He turns such cases over to God. What else can he do with them?

Whereunto we have already come ( $\varepsilon \varsigma \varsigma$ o $\varepsilon \varphi \theta \alpha \sigma \alpha \mu \varepsilon v$ ). First aorist active indicative of $\varphi \theta \alpha v \omega$, originally to come before as in 1Th 4:15, but usually in the Koine simply to arrive, attain to, as here.

Phil 3:16
By that same rule let us walk ( $\tau \omega$ av $\omega \omega$ б $\tau \circ \succ \varepsilon ı v$ ) Aleph A B do not have кavov (rule). Besides $\sigma$ тotxelv is the absolute present active infinitive which sometimes occurs instead of the principal verb as in Ro 12:15. Paul means simply this that, having come thus far, the thing to do is to go "in the same path" ( $\tau \omega \alpha \cup \tau \omega$ ) in which we have been travelling so far. A needed lesson for Christians weary with the monotony of routine in religious life and work.

Phil 3:17
Imitators together of me ( $\sigma v \nu \mu \mu \eta \tau \alpha \mu \circ v$ ). Found only here so far, though Plato uses $\sigma \nu \mu \mu \mu \varepsilon \varepsilon \sigma \alpha$. "Vie with each other in imitating me" (Lightfoot).

Mark (бколєıєє). Old verb from бкотоৎ (verse 14). "Keep your eyes on me as goal." Mark and follow, not avoid as in Ro 16:17.

An ensample ( $\tau v \pi \frac{1}{}$ ). Originally the impression left by a stroke (Joh 20:25), then a pattern (mould) as here (cf. 1Th 1:7; 1Co 10:6,11; Ro 5:14; 6:17).

Phil 3:18

I told you often (по入入акı $\varepsilon \lambda \varepsilon \gamma \circ v$ ). Imperfect active, repetition in Pauls warnings to them.

Even weeping ( $\kappa \alpha \kappa \lambda \alpha \omega \omega v$ ). Deep emotion as he dictated the letter and recalled these recreant followers of Christ (cf. 2Co 2:4).
 the Judaizers who denied the value of the cross of Christ (Ga 5:11; 6:12,14) or Epicurean antinomians whose loose living gave the lie to the cross of Christ (1Jo 2:4).

Phil 3:19
Whose god is the belly ( ov тo $\theta \varepsilon o \varsigma \eta \kappa o \iota \lambda 1 \alpha$ ). The comic poet Eupolis uses the rare word Koı $\lambda \iota \delta \alpha \mu \mu \nu \nu$ for one who makes a god of his belly and Seneca speaks of one who abdomini servit. Sensuality in food, drink, sex then as now mastered some men. These men posed as Christians and gloried in their shame.

Who mind earthly things ( $0 \tau \alpha \varepsilon \pi \iota \gamma \varepsilon \iota \alpha$ ¢povouvte¢). Anacoluthon. The nominative does not refer to $\pi \circ \lambda \lambda_{0}$ at the beginning, but with the accusative tov $\varepsilon x \theta \rho \circ$ о ¢ in between. See Mr 12:40 .

Phil 3:20
Our citizenship ( $\eta \mu \omega \nu$ то $\pi о \lambda_{\imath \tau \varepsilon}(\tau \mu)$ ). Old word from $\pi \iota \lambda \iota \tau \varepsilon v \omega$ (Php 1:27), but only here in N.T. The inscriptions use it either for citizenship or for commonwealth. Paul was proud of his Roman citizenship and found it a protection. The Philippians were also proud of their Roman citizenship. But Christians are citizens of a kingdom not of this world (Joh 18:36 ). Milligan (Vocabulary) doubts if commentators are entitled to translate it here: "We are a colony of heaven," because such a translation reverses the relation between the colony and the mother city. But certainly here Paul's heart is in heaven.

We wait for ( $\alpha \pi \varepsilon \kappa \delta \varepsilon \chi \circ \mu \varepsilon \theta \alpha$ ). Rare and late double compound (perfective use of prepositions like wait out) which vividly pictures Paul's eagerness for the second coming of Christ as the normal attitude of the Christian colonist whose home is heaven.

Phil 3:21
Shall fashion anew ( $\mu \varepsilon \tau \alpha \sigma \chi \eta \mu \alpha \tau \iota \sigma \varepsilon$ ). Future active indicative of $\mu \varepsilon \tau \alpha \sigma \chi \eta \mu \alpha \tau \iota \zeta \omega$ for which see 1Co 4:6; 2Co 11:13f. .

Conformed to ( $\sigma \nu \mu \mu \circ \rho \varphi \circ v$ ). For which ( $\sigma \nu \nu, \mu \circ \rho \varphi \eta$ ) see Ro $8: 29$, only N.T. examples. With associative instrumental case. The body of our state of humiliation will be made suitable to associate with the body of Christ's glory (1Co 15:54f. ).

According to the working ( $\kappa \alpha \tau \alpha \tau \eta v \varepsilon v \varepsilon \rho \gamma \varepsilon \iota \alpha v$ ). "According to the energy." If any one doubts the power of Christ to do this transformation, Paul replies that he has power "even to subject all things unto himself."

## Philippians 4

Phil 4:1
Longed for ( $\varepsilon \pi \iota \pi \circ \theta \eta \tau \tau)$. Late and rare verbal adjective (here alone in N.T.) from $\varepsilon \pi \iota \pi о \theta \varepsilon \omega$.

So stand fast (outo $\sigma \tau \eta \kappa \varepsilon \tau \varepsilon$ ). Present active imperative of $\sigma \tau \eta \kappa \omega$ (late present from perfect $\varepsilon \sigma \tau \eta \kappa \alpha$ from $\iota \sigma \tau \eta \mu)$. See 1:27. They were tempted to defection. Standing firm is difficult when a panic starts.

Phil 4:2
Euodia (Evo $\delta \iota \alpha v$ ). This name means literally "prosperous journey" ( $\varepsilon v, o \delta o \varsigma)$ ). It occurs in the inscriptions.

Syntyche ( $\Sigma v v \tau u \chi \eta v)$. From $\sigma v v \tau v \gamma \chi \alpha v \omega$, to meet with and so "pleasant acquaintance" or "good-luck." Occurs in the inscriptions and identified with Lydia by some. Klopper suggests that each of these rival women had church assemblies in their homes, one a Jewish-Christian church, the other a Gentile-Christian church. Vincent doubts the great influence of women in Macedonia held by Lightfoot who also suggests that these two were ladies of rank or perhaps deaconesses of the church in Philippi. Schinz suggests that in such a pure church even slight bickerings would make a real disturbance. "It may have been accidental friction between two energetic Christian women" (Kennedy).

Phil 4:3
True yokefellow ( $\gamma \vee \eta \sigma \iota \varepsilon \sigma \cup \vee \zeta \nu \gamma \varepsilon$ ). All sorts of suggestions have been made here, one that it was Lydia who is termed Paul's wife by the word $\sigma u v \zeta v \gamma \varepsilon$. Unfortunately for that view $\gamma \nu \eta \sigma \iota \varepsilon$ is masculine vocative singular. Some have suggested it as a proper name though it is not found in the inscriptions, but the word does occur as an appellative in one. Lightfoot even proposes Epaphroditus, the bearer of the Epistle, certainly a curious turn to take to address him. After all it matters little that we do not know who the peacemaker was.

Help these women ( $\sigma v v \lambda \alpha \mu \beta \alpha v o v ~ \alpha v \tau \alpha \iota \varsigma) . ~ P r e s e n t ~ m i d d l e ~ i m p e r a t i v e ~ o f ~ \sigma v v \lambda \alpha \mu \beta \alpha v \omega$, to seize (Mt 26:55), to conceive ( $\operatorname{Lu} 1: 24$ ), then to take hold together with one (associative instrumental case), to help as here ( $\mathrm{Lu} 5: 7$ ). "Take hold with them."

They laboured with me ( $\sigma v \vee \eta \theta \lambda \eta \sigma \alpha \nu \mu o$ ). First aorist active indicative of $\sigma \cup v \alpha \theta \lambda \varepsilon \omega$ (for which see 1:27) with associative instrumental case ( $\mu \mathrm{o}$ ).

With Clement also ( $\mu \varepsilon \tau \alpha \kappa \alpha К \lambda \eta \mu \varepsilon \nu \tau o \varsigma)$. There is no evidence that he was Clement of Rome as the name is common.

In the book of life ( $\varepsilon \nu \beta \iota \beta \lambda \omega \zeta \omega \eta \varsigma)$. The only instance of this expression in the N.T. outside of the Apocalypse ( $3: 5 ; 13: 8 ; 17: 8$, etc.). Hence real Christians in spite of their bickerings.

Phil 4:4
Again I will say ( $\pi \alpha \lambda \iota \nu \varepsilon \rho \omega$ ). Future active indicative of defective verb $\varepsilon ו \pi \circ v$.

Rejoice ( $\chi \alpha \iota \rho \varepsilon \tau \varepsilon$ ). Present active imperative as in 3:1, repeated for emphasis in spite of discouragements. Not in the sense of "Farewell" here.

Phil 4:5
Your forbearance ( $\tau 0 \varepsilon \pi เ \varepsilon เ \kappa \varepsilon \varsigma ~ v \mu \omega v$ ). "Your gentleness," "your sweet reasonableness" (Matthew Arnold), "your moderation." Old adjective ( $\varepsilon \pi \iota, \varepsilon \iota \kappa \circ \varsigma)$ as in Jas 3:17; 1Ti 3:3 . Article and neuter singular here $=\eta \varepsilon \pi \iota \varepsilon \iota \kappa \varepsilon \iota($ Ac 24:4; 2Co 10:1) like to $\chi \rho \eta \sigma \tau o v$ in Ro 2:4

The Lord is at hand (о кирьоя $\varepsilon \gamma \gamma \cup \varsigma)$. "The Apostle's watchword" (Lightfoot), as in 1Co 16:22 (Mapav a日a, Aramaic equivalent, Our Lord cometh). Unless, indeed, $\varepsilon \gamma \gamma \cup \varsigma$ here means near in space instead of
nigh in time.
Phil 4:6
In nothing be anxious ( $\mu \eta \delta \varepsilon v \mu \varepsilon \rho \mu \nu \alpha \tau \varepsilon$ ). Present imperative in prohibition, "stop being anxious." See $\mu \eta \mu \varepsilon \rho \mu \nu \alpha \tau \varepsilon$ in Mt 6:31.

With thanksgiving ( $\mu \varepsilon \tau \alpha \varepsilon v \chi \alpha \rho \iota \sigma \tau \iota \alpha \varsigma)$. In all the forms of prayer here named thanksgiving should appear.

Phil 4:7
The peace of God ( $\eta \varepsilon \iota \rho \eta \nu \eta$ रov $\theta \varepsilon o v$ ). See in 2Th 3:16 "the Lord of peace" (o Kvpıos $\tau \eta \varsigma \varepsilon \iota \rho \eta \nu \eta \varsigma)$ and verse 9 for "the God of peace" (o $\theta \varepsilon \circ \varsigma \tau \eta \varsigma \varepsilon \iota \rho \eta \nu \eta \varsigma)$.

Shall guard ( $\varphi \rho \circ \rho \rho \eta \sigma \varepsilon)$. "Shall garrison," future active indicative of $\varphi \rho o v \rho \varepsilon \omega$, old verb from $\varphi \rho о \cup \rho о \varsigma ~(\pi \rho о-о \rho о \sigma, \pi \rho о о \rho \alpha \omega$, to see before, to look out). See Ac 9:24; 2Co 11:32 . God's peace as a sentinel mounts guard over our lives as Tennyson so beautifully pictures Love as doing.

Phil 4:8
Finally ( $\tau$ र $\lambda o t \pi o v$ ). See on 3:1.
Whatsoever (ooa). Thus he introduces six adjectives picturing Christian ideals, oldfashioned and familiar words not necessarily from any philosophic list of moral excellencies Stoic or otherwise. Without these no ideals can exist. They are pertinent now when so much filth is flaunted before the world in books, magazines and moving-pictures under the name of realism (the slime of the gutter and the cess-pool).

Honourable $(\sigma \varepsilon \mu v \alpha)$. Old word from $\sigma \varepsilon \beta \omega$, to worship, revere. So revered, venerated (1Ti 3:8).

Pure $(\alpha \gamma \vee \alpha)$. Old word for all sorts of purity. There are clean things, thoughts, words, deeds.

Lovely $(\pi \rho \circ \sigma \varphi i \lambda \eta)$. Old word, here only in N.T., from $\pi \rho o \varsigma$ and $\varphi i \lambda \varepsilon \omega$, pleasing, winsome.

Of good report ( $\varepsilon v \varphi \eta \mu a$. Old word, only here in N.T., from $\varepsilon v$ and $\varphi \eta \mu \eta$, fair-speaking, attractive.

If there be any ( $\varepsilon \tau \iota \varsigma)$. Paul changes the construction from ood (whatsoever) to a condition of the first class, as in 2:1, with two substantives.

Virtue ( $\alpha \rho \varepsilon \tau \eta$ ). Old word, possibly from $\alpha \rho \varepsilon \sigma \kappa \omega$, to please, used very often in a variety of senses by the ancients for any mental excellence or moral quality or physical power. Its very vagueness perhaps explains its rarity in the N.T., only four times (Php 4:8; 1Pe 2:9; 2 Pe $1: 3,5$ ). It is common in the papyri, but probably Paul is using it in the sense found in the LXX (Isa 42:12; 43:21) of God's splendour and might (Deissmann, Bible Studies, p. 95) in connection with "praise" ( $\varepsilon \pi \alpha \iota v o \varsigma)$ as here or even meaning praise.

Think on these things ( $\tau \alpha \cup \tau \alpha \lambda o \gamma \iota \varepsilon \sigma \theta \varepsilon)$. Present middle imperative for habit of thought. We are responsible for our thoughts and can hold them to high and holy ideals.

Phil 4:9
In me ( $\varepsilon v \varepsilon \mu \mathrm{o}$ ). Paul dares to point to his life in Philippi as an illustration of this high thinking. The preacher is the interpreter of the spiritual life and should be an example of it.

These things do ( $\tau \alpha \cup \tau \alpha \pi \rho \alpha \sigma \sigma \varepsilon \tau \varepsilon)$. Practise as a habit ( $\pi \rho \alpha \sigma \sigma \omega$, not $\pi \circ เ \varepsilon \omega$ ).
Phil 4:10
I rejoice ( $\varepsilon \chi \alpha \rho \eta v$ ). Second aorist passive indicative of $\chi \alpha \iota \rho \omega$, a timeless aorist. I did rejoice, I do rejoice.

Greatly ( $\mu \varepsilon \gamma \alpha \lambda \omega \varsigma$ ). Old adverb, only here in N.T., from $\mu \varepsilon \gamma \alpha \varsigma$ (great).
Now at length ( $\eta \delta \eta \pi \sigma \tau \varepsilon$ ). In N.T. only here and Ro 1:10. Потє is indefinite past (interval), $\eta \delta \eta$ immediate present.

Yehave revived ( $\alpha v \varepsilon \theta a \lambda \varepsilon \tau \varepsilon$ ). Second aorist active indicative of old poetic word (Homer), $\operatorname{av} \alpha \theta \alpha \lambda \lambda \omega$, to sprout again, to shoot up, to blossom again. So in the LXX five times, though rare and literary word.

Your thought for me ( $\tau 0 \quad v \pi \varepsilon \rho \varepsilon \mu \circ v \varphi \rho \circ v \varepsilon เ v$ ). Accusative case of the articular present active infinitive the object of $\alpha v \varepsilon \theta \alpha \lambda \varepsilon \tau \varepsilon$ used transitively. "You caused your thinking of me to bloom afresh."

Wherein $\left(\varepsilon \varphi^{\prime} \omega\right)$. "In which," "upon which" (locative case). A loose reference to Paul's interests as involved in their thinking of him.

Ye did indeed take thought ( $\kappa \alpha \varepsilon \varphi \rho о v \varepsilon \iota \tau \varepsilon$ ). Imperfect active, "ye were also (or had been also) thinking."

Ye lacked opportunity ( $\eta \kappa \alpha \iota \rho \varepsilon \sigma \theta \varepsilon$ ). Imperfect middle of акаьрєоца, late and rare word, here only in N.T., from акаıроৎ ( $\alpha$ privative, каı $\rho \varsigma$ ), not to have a chance, the opposite of عuкаıрє (Mr 6:31).

Phil 4:11
In respect of want ( $\kappa \alpha \theta^{\prime} v \sigma \tau \varepsilon \rho \eta \sigma \tau v$ ). Late and rare word from vote $\rho \varepsilon \omega$, to be behind or too late, only here and Mr 12:44 in N.T.

I have learned ( $\varepsilon \mu \alpha \theta o v$ ). Simply, "I did learn" (constative second aorist active indicative of $\mu \alpha v \theta \alpha v \omega$, to learn, looking at his long experience as a unit.

In whatsoever state I am ( $\varepsilon v$ oıc $\varepsilon \mu$ ). "In what things (circumstances) I am."
To be content ( $\alpha \cup \tau \alpha \rho \kappa \eta \varsigma \varepsilon ı v \alpha$ ). Predicate nominative with the infinitive of the old adjective avtapкŋऽ (from avtoc and apк $\varepsilon \omega$, to be self-sufficient), self-sufficing. Favourite word with the Stoics, only here in N.T., though autapкعıa occurs in 2Co 9:8; 1Ti 6:6 . Paul is contented with his lot and he learned that lesson long ago. Socrates said as to who is wealthiest: "He that is content with least, for autapк\&ıa is nature's wealth."

Phil 4:12
I know how (oi $\delta \alpha$ ). Followed by the infinitive oi $\delta \alpha$ has this sense. So here twice, with $\tau \alpha \pi \varepsilon เ v o v \sigma \theta a$, to be humbled, from $\tau \alpha \pi \varepsilon เ v o \varsigma$, and with $\pi \varepsilon \rho เ \sigma \sigma \varepsilon \cup \varepsilon ı v$, to overflow.

Have I learned the secret ( $\mu \varepsilon \mu \nu \eta \mu \alpha)$. Perfect passive indicative of $\mu \nu \varepsilon \omega$, old and common word from $\mu \nu \omega$, to close (Latin mutus), and so to initiate with secret rites, here only in N.T. The common word $\mu \nu \sigma \tau \eta \rho \circ \nu$ (mystery) is from $\mu \nu \sigma \tau \eta \varsigma$ (one initiated) and this from $\mu \nu \varepsilon \omega$, to initiate, to instruct in secrets. Paul draws this metaphor from the initiatory rites of the pagan mystery-religions.

To be filled ( $\chi о \rho \tau \alpha \zeta \varepsilon \sigma \theta \alpha$ ). Old verb from $\chi$ ортоৎ (grass, hay) and so to fatten like an animal.

To be hungry ( $\pi \varepsilon เ v a ı v$ ). Old verb from $\pi \varepsilon เ v a$ (hunger) and kin to $\pi \varepsilon v \eta \varsigma$, poor man who has to work for his living ( $\pi \varepsilon v o \mu \alpha$ ).

Phil 4:13
I can do all things ( $\pi \alpha \nu \tau \alpha \iota \sigma \chi \cup \omega$ ). Old verb to have strength ( $\iota \sigma \chi \cup \varsigma)$.
In him that strengtheneth me ( $\varepsilon v \tau \omega \varepsilon v \delta v v a \mu o v \nu \tau \mu \varepsilon$ ). Late and rare verb (in LXX) from adjective $\varepsilon v \delta \nu v a \mu o \varsigma(\varepsilon v, \delta v v a \mu \varsigma)$. Causative verb to empower, to pour power into one. See same phrase in 1Ti 1:12 $\tau \omega \varepsilon v \delta \nu v a \mu \omega \sigma \alpha \nu \tau \mu \varepsilon$ (aorist tense here). Paul has such strength so long as Jesus keeps on putting power ( $\delta v v a \mu \varsigma)$ into him.

Phil 4:14
That ye had fellowship ( $\sigma 0 v \kappa o t v \omega v \eta \sigma \alpha \nu \tau \varepsilon \varsigma)$. First aorist active participle (simultaneous action with the principal verb $\kappa \alpha \lambda \omega \varsigma \varepsilon \pi \sigma ו \eta \sigma \alpha \tau \varepsilon)$. "Ye did well contributing for my affliction."

Phil 4:15
In the beginning of the gospel ( $\varepsilon v \alpha \rho \chi \eta$ $\tau o v \varepsilon v a \gamma \gamma \varepsilon \lambda เ o v$ ). After he had wrought in Philippi (2Th 2:13).

Had fellowship ( $\varepsilon \kappa о เ v \omega v \eta \sigma \varepsilon v)$ ) "Had partnership" (first aorist active indicative).
In the matter ( $\varepsilon \iota \varsigma \lambda o \gamma o v)$ ). "As to an account." No other church opened an account with Paul.

Of giving and receiving ( $\delta o \sigma \varepsilon \omega \varsigma \kappa \alpha \lambda \eta \mu \psi \varepsilon \omega \varsigma)$. Credit and debit. A mercantile metaphor repeated in verse 17 by $\varepsilon ı \varsigma ~ \lambda o \gamma o v \nu \mu \omega v$ (to your account). Paul had to keep books then with no other church, though later Thessalonica and Beroea joined Philippi in support of Paul's work in Corinth (2Co 11:8f.).

But ye only ( $\varepsilon \mu \eta \nu \mu \varepsilon \iota \varsigma \mu \circ v o$ ). Not even Antioch contributed anything but good wishes and prayers for Paul's work (Ac 13:1-3 ).

Phil 4:16
Once and again ( $\kappa \alpha \alpha \pi \alpha \xi \kappa \alpha \delta ı \varsigma)$. "Both once and twice" they did it "even in Thessalonica" and so before Paul went to Corinth." See the same Greek idiom in 1Th 2:18 .

Phil 4:17
I seek for $(\varepsilon \pi\llcorner\zeta \eta \tau \omega)$. Old verb, in N.T. only here and Ro 11:7 (linear present, I am seeking for). Lightfoot calls it "the Apostle's nervous anxiety to clear himself" of wanting more gifts. Why not say his delicate courtesy?

Phil 4:18
I have all things ( $\alpha \pi \varepsilon \chi \omega \pi \alpha \nu \tau \alpha$ ). As a receipt in full in appreciation of their kindness. $A \pi \varepsilon \chi \omega$ is common in the papyri and the ostraca for "receipt in full" (Deissmann, Bible Studies, p. 110). See Mt 6:2,5,16.

I am filled $(\pi \varepsilon \pi \lambda \eta \rho \omega \mu \alpha)$. Perfect passive indicative of $\pi \lambda \eta \rho o \omega$. "Classical Greek would hardly use the word in this personal sense" (Kennedy).

An odour of a sweet smell ( $\circ \sigma \mu \eta \nu \varepsilon v \omega \delta i a \varsigma)$. O $\sigma \mu \eta$, old word from $o \zeta \omega$, to smell. Ev $\omega \delta \iota \alpha$, old word from $\varepsilon v$ and $o \zeta \omega$. In Eph 5:2 both words come together as here and in 2Co 2:15 we have $\varepsilon v \omega \delta$ ia (only other N.T. example) and in verse 2Co 2:16 oб $\mu \eta$ twice. Ev $\omega \delta \iota a c$ here is genitive of quality.

Sacrifice ( $\theta$ voiav). Not the act, but the offering as in Ro 12:1 .
Well-pleasing (evapétov). As in Ro 12:1.
Phil 4:19
According to his riches in glory (ката тo $\pi \lambda$ оитос $\alpha u \tau o v ~ \varepsilon v ~ \delta о \xi \eta$ ). God has an abundant treasure in glory and will repay the Philippians for what they have done for Paul. The spiritual reward is what spurs men into the ministry and holds them to it.

Phil 4:20
The glory ( $\eta \delta o \xi \alpha$ ). "The doxology flows out of the joy of the whole epistle" (Bengel).
Phil 4:21
They that are of Caesar's household (о єк тŋऽ Каıбароц оккıяৎ). Not members of the imperial family, but some connected with the imperial establishment. The term can apply to slaves and freedmen and even to the highest functionaries. Christianity has begun to undermine the throne of the Caesars. Some day a Christian will sit on this throne. The gospel works upward from the lower classes. It was so at Corinth and in Rome. It is true today. It is doubtful if Nero had yet heard of Paul for his case may have been dismissed by lapse of time. But this obscure prisoner who has planted the gospel in Caesar's household has won more eternal fame and power than all the Caesars combined. Nero will commit suicide shortly after Paul has been executed. Nero's star went down and Paul's rose and rises still.

## THE EPISTLE TO THE COLOSSIANS

FROM ROME A.D. 63

## BY WAY OF INTRODUCTION

GENUINENESS
The author claims to be Paul (Col 1:1) and there is no real doubt about it in spite of Baur's denial of the Pauline authorship which did not suit his Tendenz theory of the New Testament books. There is every mark of Paul's style and power in the little Epistle and there is no evidence that any one else took Paul's name to palm off this striking and vigorous polemic.

THE DATE
Clearly it was sent at the same time with the Epistle to Philemon and the one to the Ephesians since Tychicus the bearer of the letter to Ephesus (Eph 6:21f. ) and the one to Colossae (Col 4:7f. ) was a companion of Onesimus (Col 4:9) the bearer of that to Philemon (Phm 1:10-12 ). If Paul is a prisoner (Col 4:3; Eph 6:20; Phm 1:9) in Rome, as most scholars hold, and not in Ephesus as Deissmann and Duncan argue, the probable date would be A.D. 63. I still believe that Paul is in Rome when he sends out these epistles. If so, the time would be after the arrival in Rome from Jerusalem as told in Ac 28 and before the burning of Rome by Nero in A.D. 64. If Philippians was already sent, A.D. 63 marks the last probable year for the writing of this group of letters.

THE OCCASION
The Epistle itself gives it as being due to the arrival of Epaphras from Colossae (Col 1:7-9; 4:12f. ). He is probably one of Paul's converts while in Ephesus who in behalf of Paul (Col 1:7) evangelized the Lycus Valley (Colossae, Hierapolis, Laodicea) where Paul had never been himself (Col 2:1; 4:13-16 ). Since Paul's departure for Rome, the "grievous wolves" whom he foresaw in Miletus (Ac 20:29f. ) had descended upon these churches and were playing havoc with many and leading them astray much as new cults today mislead the unwary. These men were later called Gnostics (see Ignatius) and had a subtle appeal that was not easy to withstand. The air was full of the mystery cults like the Eleusinian mysteries, Mithraism, the vogue of Isis, what not. These new teachers professed new thought with a world-view that sought to explain everything on the assumption that matter was essentially evil and that the good God could only touch evil matter by means of a series of aeons or emanations so far removed from him as to prevent contamination by God and yet with enough power to create evil matter. This jejune theory satisfied many just as today some are content to deny the existence of sin, disease, death in spite of the evidence of the senses to the contrary. In his perplexity Epaphras journeyed all the way to Rome to obtain Paul's help.

## PURPOSE OF THE EPISTLE

Epaphras did not come in vain, for Paul was tremendously stirred by the peril to Christianity from the Gnostics (o $\gamma \nu \omega \sigma \tau$ ткo, the knowing ones). He had won his fight for freedom in Christ against the Judaizers who tried to fasten Jewish sacramentarianism upon spiritual Christianity. Now there is an equal danger of the dissipation of vital Christianity in philosophic speculation. In particular, the peril was keen concerning the Person of Christ when the Gnostics embraced Christianity and applied their theory of the universe to him. They split into factions on the subject of Christ. The Docetic (from $\delta$ oкع $\omega$, to seem) Gnostics held that Jesus did not have a real human body, but only a phantom body. He was, in fact, an aeon and had no real humanity. The Cerinthian (followers of Cerinthus) Gnostics admitted the humanity of the man Jesus, but claimed that the Christ was an aeon that came on Jesus at his baptism in the form of a dove and left him on the Cross so that only the man Jesus died. At once this heresy sharpened the issue concerning the Person of Christ already set forth in Php 2:5-11. Paul met the issue squarely and powerfully portrayed his full-length portrait of Jesus Christ as the Son of God and the Son of Man (both deity and humanity) in opposition to both types of Gnostics. So then Colossians seems written expressly for our own day when so many are trying to rob Jesus Christ of his deity. The Gnostics took varying views of moral issues also as men do now. There were the ascetics with rigorous rules and the licentious element that let down all the bars for the flesh while the spirit communed with God. One cannot understand Colossians without some knowledge of Gnosticism such as may be obtained in such books as Angus's The Mystery-Religions and Christianity, Glover's The Conflict of Religion in the Early Roman Empire, Kennedy's St. Paul and the MysteryReligions, Lightfoot's Commentary on Colossians.

## SOME BOOKS ABOUT COLOSSIANS

One may note commentaries by T. K. Abbott (Int. Crit. 1897), Gross Alexander (1910), Dargan (1887), Dibelius (1912), Ellicott (1890), Ewald (1905), Griffith-Thomas (1923), Findlay (1895), Haupt (1903), M. Jones (1923), Lightfoot (1904), Maclaren (1888), Meinertz (1917), Moule (1900), Mullins (1913), Oltramare (1891), Peake (1903), Radford (1931), A. T. Robertson (1926), Rutherford (1908), E. F. Scott (1930), Von Soden (1893), F. B. Westcott (1914), Williams (1907).

## Colossians 1

Col 1：1
Of Christ Jesus（Xpıбтov In $\sigma o v$ ）．This order in the later epistles shows that Xpıбтoc is now regarded as a proper name and not just a verbal adjective（Anointed One，Messiah）． Paul describes himself because he is unknown to the Colossians，not because of attack as in Ga 1：1 ．

Timothy（T $\mu \mathrm{\mu} \boldsymbol{\theta} \boldsymbol{\varepsilon} \boldsymbol{\varepsilon}$ ¢）．Mentioned as in I and II Thess．when in Corinth，II Cor．when in Macedonia，Phil．and Philemon when in Rome as here．

Col 1：2
At Colossae（ $\varepsilon v$ Ko入ooraıs）．The spelling is uncertain，the MSS．differing in the title （Ko入aббası¢）and here（Ko入oббaıৎ）．Colossae was a city of Phrygia on the Lycus，the tribu－ taries of which brought a calcareous deposit of a peculiar kind that choked up the streams and made arches and fantastic grottoes．In spite of this there was much fertility in the valley with two other prosperous cities some ten or twelve miles away（Hierapolis and Laodicea）． ＂The church at Colossae was the least important of any to which Paul＇s epistles were ad－ dressed＂（Vincent）．But he had no greater message for any church than he here gives con－ cerning the Person of Christ．There is no more important message today for modern men．

Col 1：3
God the Father of our Lord Jesus Christ（ $\tau \omega \theta \varepsilon \omega \pi \alpha \tau \rho$ tov кטрıv $\eta \mu \omega \nu$ I $\eta \sigma o v$ Xpıбтov）．Correct text without ка（and）as in 3：17，though usually＂the God and Father of our Lord Jesus Christ＂（2Co 1：3；11：31；Ro 15：6；1Pe 1：3；Re 1：6 ）．In verse 2 we have the only instance in the opening benediction of an epistle when the name of＂Jesus Christ＂is not joined with＂God our Father．＂

Always（ $\pi \alpha v \tau о \tau \varepsilon)$ ．Amphibolous position between $\varepsilon \quad \chi \chi \alpha \rho \tau \tau o v \mu \varepsilon v$（we give thanks） and $\pi \rho \circ \sigma \varepsilon u \chi o \mu \varepsilon v o$（praying）．Can go with either．

Col 1：4
Having heard of（aкovøavtє¢）．Literary plural unless Timothy is included．Aorist active participle of $\alpha \kappa о \omega \omega$ of antecedent action to $\varepsilon v \chi \alpha \rho ı \sigma \tau о \nu \mu \varepsilon v$ ．Epaphras（verse 8）had told Paul．

Your faith in Jesus Christ（ $\tau \eta v \pi \iota \sigma \tau \iota v \mu \omega \nu \varepsilon v$ I $\eta \sigma o v$ X $\rho \iota \sigma \tau \omega$ ）．See Eph 1：15 for similar phrase．No article is needed before $\varepsilon v$ as it is a closely knit phrase and bears the same sense as the objective genitive in Ga 2：16（ $\delta ı \alpha \pi \iota \sigma \tau \varepsilon \omega \varsigma$ Xpıбтov I $\eta \sigma o v$, by faith in Christ Jesus）．

Which ye have（ $\eta \vee \varepsilon \chi \varepsilon \tau \varepsilon$ ）．Probably genuine（Aleph A C D），though B omits it and others have the article（ $\tau \eta v$ ）．There is a real distinction here between $\varepsilon v$（sphere or basis） and $\varepsilon ı \varsigma$（direction towards），though they are often identical in idea．

Col 1：5
Because of the hope（ $\delta \iota \alpha \tau \eta \nu \varepsilon \lambda \tau \iota \delta \alpha$ ）．See Ro 8：24．It is not clear whether this phrase is to be linked with $\varepsilon v \chi \alpha$ เбтov $\mu \varepsilon v$ at the beginning of verse 3 or（more likely）with $\tau \eta \nu$
$\alpha \gamma \alpha \pi \eta v$ just before. Note also here $\pi \iota \sigma \tau ı \varsigma$ (faith), $\alpha \gamma \alpha \pi \eta($ love), $\varepsilon \lambda \pi ı \varsigma$ (hope), though not grouped together so sharply as in 1Co 13:13. Here hope is objective, the goal ahead.

Laid up ( $\alpha \pi \sigma \kappa \varepsilon \mu \varepsilon เ \nu \eta \nu)$. Literally, "laid away or by." Old word used in Lu 19:20 of the pound laid away in a napkin. See also $\alpha \pi \sigma \theta \eta \sigma \alpha v \rho!\zeta \omega$, to store away for future use (1Ti 6:19 ). The same idea occurs in Mt 6:20 (treasure in heaven) and 1Pe 1:4 and it is involved in Phm 3:20.

Ye heard before ( $\pi \rho о \eta \kappa о v \sigma a \tau \varepsilon$ ). First aorist indicative active of this old compound $\pi \rho о \alpha \kappa о v \omega$, though only here in the N.T. Before what? Before Paul wrote? Before the realization? Before the error of the Gnostics crept in? Each view is possible and has advocates. Lightfoot argues for the last and it is probably correct as is indicated by the next clause.

In the word of the truth of the gospel ( $\varepsilon v \tau \omega \lambda o \gamma \omega \tau \eta \varsigma \alpha \lambda \eta \theta \varepsilon i \alpha \varsigma ~ \tau o v ~ \varepsilon v a \gamma \gamma \varepsilon \lambda \_\circ v$ ). "In the preaching of the truth of the gospel" ( $\mathrm{Ga} 2: 5,14$ ) which is come ( $\pi \alpha \rho o v \tau o \varsigma$, present active participle agreeing with $\varepsilon v a \gamma \gamma \varepsilon \lambda_{\iota} \circ v$, being present, a classical use of $\pi \alpha \rho \varepsilon ı \mu$ as in Ac 12:20 ). They heard the pure gospel from Epaphras before the Gnostics came.

Col 1:6
In all the world ( $\varepsilon v \pi \alpha \nu \tau \tau \omega \kappa о \sigma \mu \omega)$. A legitimate hyperbole, for the gospel was spreading all over the Roman Empire.

Is bearing fruit ( $\varepsilon \sigma \tau \iota v ~ к а \rho \pi о ч о \rho о и \mu \varepsilon v o v) . ~ P e r i p h r a s t i c ~ p r e s e n t ~ m i d d l e ~ i n d i c a t i v e ~ o f ~$ the old compound карточорєь, from карточороя (Ас 14:17) and that from карлоц and $\varphi \varepsilon \rho \omega$. The periphrastic present emphasizes the continuity of the process. See the active participle карточороиขтєऽ in verse 10.

Increasing ( $\alpha v \xi \alpha v o \mu \varepsilon v o v)$. Periphrastic present middle of $\alpha v \xi \alpha v \omega$. Repeated in verse 10. The growing and the fruit-bearing go on simultaneously as always with Christians (inward growth and outward expression).

Ye heard and knew ( $\eta \kappa о \nu \sigma \alpha \tau \varepsilon \kappa \alpha \varepsilon \pi \varepsilon \gamma v \omega \tau \varepsilon$ ). Definite aorist indicative. They heard the gospel from Epaphras and at once recognized and accepted (ingressive second aorist active of $\varepsilon \pi \iota \gamma \iota \nu \omega \sigma \kappa \omega$, to know fully or in addition). They fully apprehended the grace of God and should be immune to the shallow vagaries of the Gnostics.

Col 1:7
Of Epaphras ( $\alpha \pi$ Е Е $\pi \alpha \varphi \rho \alpha$ ). "From Epaphras" who is the source of their knowledge of Christ.

On our behalf ( $v \pi \varepsilon \rho \eta \mu \omega v$ ). Clearly correct (Aleph A B D) and not $v \pi \varepsilon \rho \nu \mu \omega v$ (on your behalf). In a true sense Epaphras was Paul's messenger to Colossae.

Col 1:8
Who also declared (о ка $\delta \eta \lambda \omega \sigma \alpha \varsigma$ ). Articular first aorist active participle of $\delta \eta \lambda o \omega$, old verb, to make manifest. Epaphras told Paul about their "love in the Spirit," grounded in the Holy Spirit.

Col 1:9

That ye may be filled with (iva $\pi \lambda \eta \rho \omega \theta \eta \tau \varepsilon$ ). First aorist (effective) passive subjunctive of $\pi \lambda \eta \rho o \omega$, to fill full.

The knowledge of his will ( $\tau \eta v \varepsilon \pi \tau \gamma v \omega \sigma \iota v$ tov $\theta \varepsilon \lambda \eta \mu \alpha \tau \circ \varsigma \alpha v \tau o v)$. The accusative case is retained with this passive verb. Etı $\gamma \boldsymbol{v} \sigma \iota$ is a Koine word (Polybius, Plutarch, etc.) for additional $(\varepsilon \pi)$ or full knowledge. The word is the keynote of Paul's reply to the conceit of Gnosticism. The cure for these intellectual upstarts is not ignorance, not obscurantism, but more knowledge of the will of God.

In all spiritual wisdom and understanding ( $\varepsilon v \pi \alpha \sigma \eta ~ \sigma о \varphi เ \propto ~ \kappa \alpha ~ \sigma v v \varepsilon \sigma \varepsilon ~ \pi \nu \varepsilon \nu \mu \alpha \tau \kappa \kappa \eta$ ). Both $\pi \alpha \sigma \varepsilon$ (all) and $\pi \nu \varepsilon \nu \mu \alpha \tau \iota \kappa \eta$ (spiritual) are to be taken with both $\sigma о \varphi \iota \alpha$ and $\sigma u v \varepsilon \sigma \varepsilon$. In Eph 1:8 Paul uses $\varphi \rho \circ \vee \eta \sigma \varepsilon$ (from $\varphi \rho \eta \nu$, intellect) rather than $\sigma u v \varepsilon \sigma \varepsilon$ (grasp, from $\sigma u v ı \eta \mu$, to send together). $\Sigma u v \varepsilon \sigma \iota \varsigma$ is the faculty of deciding in particular cases while $\sigma 0 \varphi \iota \alpha$ gives the general principles (Abbott). Paul faces Gnosticism with full front and wishes the freest use of all one's intellectual powers in interpreting Christianity. The preacher ought to be the greatest man in the world for he has to deal with the greatest problems of life and death.

Col 1:10
To walk worthily of the Lord ( $\pi \varepsilon \rho \iota \pi \alpha \tau \eta \sigma \alpha \alpha \xi \iota \omega \varsigma$ tov Kvpıov). This aorist active infinitive may express purpose or result. Certainly this result is the aim of the right knowledge of God. "The end of all knowledge is conduct" (Lightfoot). See 1Th 2:12; Php 1:27; Eph 4:1 for a like use of $\alpha \xi \omega \varsigma$ (adverb) with the genitive.

In the knowledge of God ( $\tau \eta \varepsilon \pi \iota \gamma v \omega \sigma \varepsilon$ tov $\theta \varepsilon o v$ ). Instrumental case, "by means of the full knowledge of God." This is the way for fruit-bearing and growth to come. Note both participles (карточороиvтєऽ ка $\alpha \cup \xi \alpha v о \mu \varepsilon v o$ ) together as in verse 6.

Unto all pleasing ( $\varepsilon \iota \varsigma \pi \alpha \sigma \alpha v ~ \alpha \rho \varepsilon \sigma \kappa ı \alpha v)$. In order to please God in all things (1Th 4:1 ). Apعбкıa is late word from $\alpha \rho \varepsilon \sigma \kappa \varepsilon v \omega$, to be complaisant (Polybius, Plutarch) and usually in bad sense (obsequiousness). Only here in N.T., but in good sense. It occurs in the good sense in the papyri and inscriptions.

Col 1:11
Strengthened ( $\delta v v a \mu o v \mu \varepsilon v o$ ). Present passive participle of late verb $\delta v v \alpha \mu o \omega$ (from $\delta \cup v a \mu \varsigma)$, to empower, "empowered with all power." In LXX and papyri and modern Greek. In N.T. only here and Heb 11:34 and MSS. in Eph 6:10 (W H in margin).
 word for perfect strength (cf. кратє $\omega$, кратı入oৎ). In N.T. it is applied only to God. Here his might is accompanied by glory (Shekinah).
 together also in Jas 5:10f.; 2Co 6:4,6; 2Ti 3:10 . Hи difficulties without succumbing, while $\mu \alpha \kappa \rho о \theta \nu \mu \mu$ is the long endurance that does not retaliate (Trench).

Col 1:12

Who made us meet ( $\tau \omega$ เкаv $\omega \sigma \alpha \nu \tau \eta \mu \alpha \varsigma$ ). Or "you" ( $\nu \mu \propto \varsigma)$. Dative case of the articular participle of ıкаvош, late verb from ıкаvоৎ and in N.T. only here and 2Co 3:6 (which see), "who made us fit or adequate for."

To be partakers ( $\varepsilon \iota \varsigma \mu \varepsilon \iota \delta \alpha$ ). "For a share in." Old word for share or portion (from $\mu \varepsilon \rho о \varsigma)$ as in Ac 8:21; 16:12; 2Co 6:15 (the only other N.T. examples).

Of the inheritance ( $\tau \circ \boldsymbol{\kappa} \lambda \lambda \rho \circ$ ). "Of the lot," "for a share of the lot." Old word. First a pebble or piece of wood used in casting lots (Ac 1:26), then the allotted portion or inheritance as here (Ac 8:21 ). Cf. Heb 3:7-4:11 .

In light ( $\varepsilon v \tau \omega \varphi \omega \tau$ ). Taken with $\mu \varepsilon \rho \iota \delta \alpha$ (portion) "situated in the kingdom of light" (Lightfoot).

Col 1:13
Delivered ( $\varepsilon \rho v \sigma \alpha \tau o)$. First aorist middle indicative of $\rho v o \mu \alpha$, old verb, to rescue. This appositional relative clause further describes God the Father's redemptive work and marks the transition to the wonderful picture of the person and work of Christ in nature and grace in verses 14-20, a full and final answer to the Gnostic depreciation of Jesus Christ by speculative philosophy and to all modern efforts after a "reduced" picture of Christ. God rescued us out from ( $\varepsilon \kappa)$ the power ( $\varepsilon \xi$ оибıа¢) of the kingdom of darkness (бкотоия) in which we were held as slaves.

Translated ( $\mu \varepsilon \tau \varepsilon \sigma \tau \eta \sigma \varepsilon v$ ). First aorist active indicative of $\mu \varepsilon \theta_{\iota \sigma \tau \eta \mu \text { and transitive (not }}$ intransitive like second aorist $\mu \varepsilon \tau \varepsilon \sigma \tau \eta)$. Old word. See 1Co 13:2. Changed us from the kingdom of darkness to the kingdom of light.
 ( $\alpha \gamma \alpha \pi \eta \varsigma$ ), the Son who is the object of the Father's love like $\alpha \gamma a \pi \eta \tau$ ¢ (beloved) in Mt 3:17 . Others would take it as describing love as the origin of the Son which is true, but hardly pertinent here. But Paul here rules out the whole system of aeons and angels that the Gnostics placed above Christ. It is Christ's Kingdom in which he is King. He has moral and spiritual sovereignty.

Col 1:14
In whom $(\varepsilon v \omega)$. In Christ as in Eph 1:7. This great sentence about Christ carries on by means of three relatives ( $\varepsilon v \omega 14$, oऽ $15, ~ o \varsigma 18$ ) and repeated personal pronoun (avtoऽ), twice with ot ( 15,19 ), thrice with $\kappa \alpha(17,18,20)$, twice alone ( 16,20 ).

Our redemption ( $\tau \eta \nu \alpha \pi o \lambda \nu \tau \rho \omega \sigma \tau v$ ). See on Ro 3:24 for this great word (Koine), a release on payment of a ransom for slave or debtor (Heb 9:15) as the inscriptions show (Deissmann, Light, etc., p. 327).

The forgiveness of our sins ( $\tau \eta \nu \alpha \varphi \varepsilon \sigma \iota \nu \tau \omega \nu \alpha \mu \alpha \rho \tau \iota \omega v$ ). Accusative case in apposition with $\alpha \pi о \lambda \nu \tau \rho \omega \sigma \iota v$ as in Eph 1:7 ( remission, sending away, $\alpha \varphi \varepsilon \sigma \iota$, after the
redemption $\alpha \pi о \lambda \nu \tau \rho \omega \sigma \iota \varsigma$, buying back). Only here we have a $\alpha \alpha \rho \tau \iota \omega v$ (sins, from $\alpha \mu \alpha \rho \tau \alpha v \omega$, to miss) while in Eph 1:7 we find $\pi \alpha \rho \alpha \pi \tau \omega \mu \alpha \tau \omega \nu$ (slips, fallings aside, from $\pi а \rho а \pi ı \pi \tau \omega)$.

Col 1:15
The image ( $\varepsilon ו \kappa \omega v$ ). In predicate and no article. On $\varepsilon ו \kappa \omega v$, see 2Co 4:4; 3:18; Ro 8:29; Col 3:10. Jesus is the very stamp of God the Father as he was before the Incarnation (Joh 17:5) and is now (Php 2:5-11; Heb 1:3).

Of the invisible God ( $\tau 0 v$ Өrov tov aopatov). But the one who sees Jesus has seen God (Joh 14:9). See this verbal adjective ( $\alpha$ privative and opa $\omega$ ) in Ro 1:20 .

The first born ( $\pi \rho \omega \tau о \tau о к о \varsigma) . ~ P r e d i c a t e ~ a d j e c t i v e ~ a g a i n ~ a n d ~ a n a r t h r o u s . ~ T h i s ~ p a s s a g e ~$ is parallel to the תoyos passage in Joh 1:1-18 and to Heb 1:1-4 as well as Php 2:5-11 in which these three writers (John, author of Hebrews, Paul) give the high conception of the Person of Christ (both Son of God and Son of Man) found also in the Synoptic Gospels and even in Q (the Father, the Son). This word (LXX and N.T.) can no longer be considered purely "Biblical" (Thayer), since it is found In inscriptions (Deissmann, Light, etc., p. 91) and in the papyri (Moulton and Milligan, Vocabulary, etc.). See it already in Lu 2:7 and Aleph for Mt 1:25; Ro 8:29. The use of this word does not show what Arius argued that Paul regarded Christ as a creature like "all creation" ( $\pi \alpha \sigma \eta \varsigma \kappa \tau \iota \sigma \varepsilon \omega \varsigma$, by metonomy the act regarded as result). It is rather the comparative (superlative) force of $\pi \rho \omega \tau$ os that is used (first-born of all creation) as in Col 1:18; Ro 8:29; Heb 1:6; 12:23; Re 1:5. Paul is here refuting the Gnostics who pictured Christ as one of the aeons by placing him before "all creation" (angels and men). Like $\varepsilon ו \kappa \omega \nu$ we find $\pi \rho \omega$ тотокоц in the Alexandrian vocabulary of the $\Lambda$ оүоऽ teaching (Philo) as well as in the LXX. Paul takes both words to help express the deity of Jesus Christ in his relation to the Father as $\varepsilon ו \kappa \omega \nu$ (Image) and to the universe as $\pi \rho \omega \tau$ тотокоя (Firstborn).

Col 1:16
All things ( $\tau \alpha \pi \alpha v \tau \alpha$ ). The universe as in Ro 11:35, a well-known philosophical phrase. It is repeated at the end of the verse.

In him were created ( $\varepsilon v a \cup \tau \omega$ єктıoӨๆ). Paul now gives the reason (o $\tau$, for) for the primacy of Christ in the work of creation (16f. ). It is the constative aorist passive indicative $\varepsilon \kappa \tau \iota \sigma \theta \eta$ (from к兀ı亡 $\omega$, old verb, to found, to create (Ro 1:25). This central activity of Christ in the work of creation is presented also in Joh 1:3; Heb 1:2 and is a complete denial of the Gnostic philosophy. The whole of creative activity is summed up in Christ including the angels in heaven and everything on earth. God wrought through "the Son of his love." All earthly dignities are included.

Have been created ( $\varepsilon \kappa \tau \iota \sigma \tau \alpha)$. Perfect passive indicative of $\kappa \tau \iota \zeta \omega$, "stand created," "remain created." The permanence of the universe rests, then, on Christ far more than on gravity. It is a Christo-centric universe.

Through him ( $\delta \delta^{\prime}$ avtov). As the intermediate and sustaining agent. He had already used $\varepsilon v a \cup \tau \omega$ (in him) as the sphere of activity.

And unto him ( $\kappa \alpha$ عıৎ avtov). This is the only remaining step to take and Paul takes it (1Co 15:28) See Eph 1:10 for similar use of $\varepsilon v$ avt $\omega$ of Christ and in Col 1:19; 20 again we
 and $\delta^{\prime}$ ov (by means of whom) applied to God concerning the universe ( $\tau \alpha \pi \alpha v \tau \alpha$ ). In Ro
 not use $\varepsilon \xi$ in this connection of Christ, but only $\varepsilon v, \delta \iota a$, and $\varepsilon ı$. See the same distinction preserved in 1Co 8:6 ( $\varepsilon \xi$ of God, $\delta \iota \alpha$, of Christ).

Col 1:17
Before all things ( $\pi \rho \circ \pi \alpha \nu \tau \omega v$ ). Прo with the ablative case. This phrase makes Paul's meaning plain. The precedence of Christ in time and the preeminence as Creator are both stated sharply. See the claim of Jesus to eternal timeless existence in Joh 8:58; 17:5 . See also Re 23:13 where Christ calls himself the Alpha and the Omega, the Beginning ( $\alpha \rho \chi \eta$ ) and the End ( $\tau \varepsilon \lambda$ oc). Paul states it also in 2Co 8:9; Php 2:6f .

Consist ( $\sigma v v \varepsilon \sigma \tau \eta \kappa \varepsilon v$ ). Perfect active indicative (intransitive) of $\sigma v v i \sigma \tau \eta \mu$, old verb, to place together and here to cohere, to hold together. The word repeats the statements in verse 16 , especially that in the form $\varepsilon \kappa \tau \iota \sigma \tau \alpha$. Christ is the controlling and unifying force in nature. The Gnostic philosophy that matter is evil and was created by a remote aeon is thus swept away. The Son of God's love is the Creator and the Sustainer of the universe which is not evil.

Col 1:18
The head of the body ( $\eta \kappa \varepsilon \varphi \alpha \lambda \eta$ тov $\sigma \omega \mu \alpha \tau \circ \varsigma)$. Jesus is first also in the spiritual realm as he is in nature (verses 18-20). Paul is fond of the metaphor of the body ( $\sigma \omega \mu \alpha$ ) for believers of which body Christ is the head ( $\kappa \varepsilon \varphi \alpha \lambda \eta$ ) as seen already in 1Co 11:3; 12:12,27; Ro 12:5 . See further Col 1:24: 2:19; Eph 1:22f.; 4:2,15; 5:30 .

The church ( $\tau \eta \varsigma \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha \varsigma)$ Genitive case in explanatory apposition with $\tau 0 v \sigma \omega \mu \alpha \tau \circ \varsigma$. This is the general sense of $\varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$, not of a local body, assembly, or organization. Here the contrast is between the realm of nature ( $\tau \alpha \pi \alpha v \tau \alpha$ ) in verses 15-17 and the realm of spirit or grace in verses 18-20. A like general sense of $\varepsilon к к \lambda \eta \sigma \iota \alpha$ occurs in Eph 1:22f.; 5:24-32; Heb 12:23 . In Eph 2:11-22 Paul uses various figures for the kingdom of Christ (commonwealth $\pi$ то $\lambda \iota \varepsilon \iota \alpha$, verse 12 , one new man $\varepsilon ı \varsigma \varepsilon v \alpha$ кaıvov $\alpha v \theta \rho \omega \pi$, verse 15 , one body $\varepsilon v \varepsilon v$ $\sigma \omega \mu \alpha \tau$, verse 16 , family of God oıкєเо тои $\theta \varepsilon o v$, verse 19 , building or temple оькобо $\mu$ and vaoc, verses 20-22).

Who (oc). Causal use of the relative, "in that he is."
The beginning ( $\eta \alpha \rho \chi \eta$ ). It is uncertain if the article $(\eta)$ is genuine. It is absolute without it. Christ has priority in time and in power. See Re 3:14 for his relation as $\alpha \rho \chi \eta$ to creation and 1Co 15:20,23 for $\alpha \pi \alpha \rho \chi \eta$ used of Christ and the resurrection and Ac 3:14 for $\alpha \rho \chi \eta \gamma \circ \varsigma$
used of him as the author of life and Heb 2:10 of Jesus and salvation and Heb 12-2 of Jesus as the pioneer of faith.

That in all things he might have the preeminence (iva $\gamma \varepsilon v \eta \tau \alpha \varepsilon v \pi \alpha \sigma v \alpha \sim \tau o s$ $\pi \rho \omega \tau \varepsilon v \omega v)$. Purpose clause with $\tau \nu \alpha$ and the second aorist middle subjunctive of $\gamma เ v o \mu \alpha$, "that he himself in all things (material and spiritual) may come to ( $\gamma \varepsilon \nu \eta \tau \alpha$, not $\eta$, be) hold the first place" ( $\pi \rho \omega \tau \varepsilon \nu \omega \nu$, present active participle of $\pi \rho \omega \tau \varepsilon v \omega$, old verb, to hold the first place, here only in the N.T.). Christ is first with Paul in time and in rank. See Re 1:5 for this same use of $\pi \rho \omega \tau о \tau о к о \varsigma$ with $\tau \omega \nu \nu \varepsilon \kappa \rho \omega \nu$ (the dead).

Col 1:19
For it was the good pleasure of the Father (ot $\varepsilon v \delta o \kappa \eta \sigma \varepsilon v$ ). No word in the Greek for "the Father," though the verb calls for either o $\theta \varepsilon o c$ or o $\pi \alpha \tau \eta \rho$ as the subject. This verb $\varepsilon \cup \delta o \kappa \varepsilon \omega$ is common in the N.T. for God's will and pleasure (Mt 3:17; 1Co 10:5 ).

All the fulness ( $\pi \alpha \nu$ то $\pi \lambda \eta \rho \omega \mu \alpha)$. The same idea as in 2:9 $\pi \alpha \nu$ то $\pi \lambda \eta \rho \omega \mu \alpha \tau \eta \varsigma \theta \varepsilon o \tau \eta \tau$ то (all the fulness of the Godhead). "A recognized technical term in theology, denoting the totality of the Divine powers and attributes" (Lightfoot). It is an old word from $\pi \lambda \eta \rho \circ \omega$, to fill full, used in various senses as in Mr 8:20 of the baskets, Ga 4:10 of time, etc. The Gnostics distributed the divine powers among various aeons. Paul gathers them all up in Christ, a full and flat statement of the deity of Christ.

Should dwell (катоккпба). First aorist active infinitive of катоюкє $\omega$, to make abode or home. All the divine attributes are at home in Christ ( $\varepsilon v \alpha \cup \tau \omega)$.

Col 1:20
Through him ( $\delta i^{\prime}$ avtov). As the sufficient and chosen agent in the work of reconciliation ( $\alpha \pi о к \alpha \tau \alpha \lambda \lambda \alpha \xi \alpha$, first aorist active infinitive of $\alpha \pi о к \alpha \tau \alpha \lambda \lambda \alpha \sigma \sigma \omega$, further addition to $\varepsilon v \delta$ ок $\eta \sigma \varepsilon v$, was pleased). This double compound ( $\alpha \pi \sigma$, кат $\alpha$ with $\alpha \lambda \lambda \alpha \sigma \sigma \omega$ ) occurs only here, verse 22; Eph 2:16, and nowhere else so far as known. Paul's usual word for "reconcile" is кат $\alpha \lambda \lambda \alpha \sigma \sigma \omega$ (2Co 5:18-20; Ro 5:10), though $\delta$ ı $\alpha \lambda \lambda \alpha \sigma \sigma \omega$ (Mt 5:24 ) is more common in Attic. The addition of ano here is clearly for the idea of complete reconciliation. See on 2Co 5:18-20 for discussion of $\kappa \alpha \tau \alpha \lambda \lambda \alpha \sigma \sigma \omega$, Paul's great word. The use of $\tau \alpha \pi \alpha \nu \tau \alpha$ (the all things, the universe) as if the universe were somehow out of harmony reminds us of the mystical passage in Ro 8:19-23 which see for discussion. Sin somehow has put the universe out of joint. Christ will set it right.

Unto himself ( $\varepsilon \iota \varsigma$ autov). Unto God, though autov is not reflexive unless written autov.
Having made peace ( $\varepsilon \iota \rho \eta$ voтоוך $\sigma \alpha \varsigma$ ). Late and rare compound ( $\operatorname{Pr}$ 10:10 and here only in N.T.) from eıp voтоьo, , peacemaker (Mt 5:9 ; here only in N.T.). In Eph 2:15 we have $\pi о \iota \omega \nu \varepsilon ו \rho \eta \nu \eta \nu$ (separate words)
making peace. Not the masculine gender, though agreeing with the idea of Christ involved even if $\pi \lambda \eta \rho \omega \mu \alpha$ be taken as the subject of $\varepsilon v \delta o \kappa \eta \sigma \varepsilon v$, a participial anacoluthon
（construction according to sense as in 2：19）．If $\theta \varepsilon o \varsigma$ be taken as the subject of $\varepsilon v \delta o \kappa \eta \sigma \varepsilon v$

 benefit of the Docetic Gnostics who denied the real humanity of Jesus and as clearly stating the causa medians（Ellicott）of the work of reconciliation to be the Cross of Christ，a doctrine needed today．

Or things in the heavens（ $\varepsilon เ \tau \varepsilon \tau \alpha \varepsilon \vee \tau 0 ı \varsigma ~ o u p a v o ı)$ ）．Much needless trouble has been made over this phrase as if things in heaven were not exactly right．It is rather a hypothetical statement like verse 16 not put in categorical form（Abbott），universitas rerum（Ellicott）．

Col 1：21
And you（ $\kappa \alpha \nu \mu \varsigma)$ ．Accusative case in a rather loose sentence，to be explained as the object of the infinitive $\pi \alpha \rho \alpha \sigma \tau \eta \sigma \alpha$ in verse 22 （note repeated $v \mu \alpha \varsigma$ there）or as the anticipated object of $\alpha \pi о \kappa \alpha \tau \eta \lambda \lambda \alpha \xi \varepsilon v$ if that be the genuine form in verse 22．It can be the accusative of general reference followed by anacoluthon．See similar idiom in Eph 2：1，12 ．

Being in time past alienated（ $л о \tau \varepsilon$ оутаৎ $\alpha \pi \eta \lambda \lambda о \tau \rho \iota \omega \mu \varepsilon v \circ \cup \varsigma)$ ．Periphrastic perfect passive participle（continuing state of alienation）of $\alpha \pi \alpha \lambda \lambda \circ \tau \rho \iota o \omega$ ，old word from Plato on， to estrange，to render $\alpha \lambda$ 入o $\tau \rho \circ \rho$（belonging to another），alienated from God，a vivid picture of heathenism as in Ro 1：20－23．Only other N．T．examples in Eph 2：12；4：18．Eve $\mu \varepsilon \varepsilon$ ， （ $\varepsilon \xi \theta \rho o u \varsigma)$ ．Old word from $\varepsilon \chi \theta$ oc（hatred）．Active sense here，
hostile as in Mt 13：28；Ro 8：7，not passive
hateful（Ro 11：28）．
In your mind（ $\tau \eta \delta \iota \alpha v o l a$ ）．Locative case．$\Delta ı \alpha v o \iota \alpha(\delta ı \alpha, v o v \varsigma)$ ，mind，intent，purpose． Old word．It is always a tragedy to see men use their minds actively against God．

In your evil works（ $\varepsilon v$ тoı $\varepsilon \rho \gamma \circ \iota \varsigma ~ \tau o ı \varsigma ~ \pi o v \eta \rho o ı \varsigma) . ~ H o s t i l e ~ p u r p o s e ~ f i n d s ~ n a t u r a l ~ e x p r e s-~$ sion in evil deeds．

Col 1：22
Yet now（ $v v v \delta \varepsilon$ ）．Sharpened contrast with emphatic form of $v v v$ ，＂now＂being not at the present moment，but in the present order of things in the new dispensation of grace in Christ．

Hath he reconciled（ $\alpha \pi о \kappa \alpha \tau \eta \lambda \lambda \alpha \xi \varepsilon v$ ）．First aorist（effective，timeless）active indicative （a sort of parenthetical anacoluthon）．Here B reads $\alpha \pi о к \alpha \tau \alpha \lambda \lambda \alpha \gamma \eta \tau \varepsilon$ ，be ye reconciled like ката入入аүๆтє in 2Co 5：20 while D has атоката入入аүєvтєৎ．Lightfoot prefers to follow B here （the hard reading），though Westcott and Hort only put it in the margin．On the word see verse 20 ．

In the body of his flesh（ $\varepsilon v \tau \omega \sigma \omega \mu \alpha \tau \tau \eta \varsigma \sigma \alpha \rho \kappa о \varsigma \alpha v \tau o v)$ ．See the same combination in 2：11 though in Eph 2：14 only $\sigma \alpha \rho \kappa$（flesh）．Apparently Paul combines both $\sigma \omega \mu \alpha$ and $\sigma \alpha \rho \xi$ to make plain the actual humanity of Jesus against incipient Docetic Gnostics who denied it．

Through death ( $\delta$ ıa tov $\theta$ avatov). The reconciliation was accomplished by means of Christ's death on the cross (verse 20) and not just by the Incarnation (the body of his flesh) in which the death took place.

To present ( $\pi \alpha \rho \alpha \sigma \tau \eta \sigma \alpha$ ). First aorist active (transitive) infinitive (of purpose) of $\pi \alpha \rho เ \sigma \tau \eta \mu$, old verb, to place beside in many connections. See it used of presenting Paul and the letter from Lysias to Felix (Ac 23:33 ). Repeated in Col 2:28. See also 2Co 11:2; 2Co 4:14 . Paul has the same idea of his responsibility in rendering an account for those under his influence seen in Heb 13:17. See Ro 12:1 for use of living sacrifice.

Holy ( $\alpha$ үıovৎ). Positively consecrated, separated unto God. Common in N.T. for believers. Haupt holds that all these terms have a religious and forensic sense here.

Without blemish ( $\alpha \mu \omega \mu \circ)_{\varsigma}$ ). Without spot (Php 2:15). Old word $\alpha$ privative and $\mu \omega \mu \circ \varsigma$ (blemish). Common in the LXX for ceremonial purifications.

Unreproveable ( $\alpha v \varepsilon \gamma \kappa \lambda \eta \tau$ точ¢). Old verbal adjective from $\alpha$ privative and $\varepsilon \gamma \kappa \alpha \lambda \varepsilon \omega$, to call to account, to pick flaws in. These three adjectives give a marvellous picture of complete purity (positive and negative, internal and external). This is Paul's ideal when he presents the Colossians "before him" (катєvตтıov avtov), right down in the eye of Christ the Judge of all.

Col 1:23
If so be that ye continue in the faith $(\varepsilon \gamma \varepsilon \varepsilon \pi \mu \mu \varepsilon v \varepsilon \tau \varepsilon \tau \eta \pi / \sigma \tau \varepsilon)$. Condition of the first class (determined as fulfilled), with a touch of eagerness in the use of $\gamma \varepsilon$ (at least). E $\pi$ adds to the force of the linear action of the present tense (continue and then some).

Pistei is in the locative case (in faith).
Grounded ( $\tau \varepsilon \theta \varepsilon \mu \varepsilon \lambda \iota \omega \mu \varepsilon v o$ ). Perfect passive participle of $\theta \varepsilon \mu \varepsilon \lambda \iota o \omega$, old verb from $\theta \varepsilon \mu \varepsilon \lambda_{\imath}$ оc (adjective, from $\theta \varepsilon \mu \alpha$ from $\tau \iota \theta \eta \mu$, laid down as a foundation, substantive, 1 Co 3:11f. ). Picture of the saint as a building like Eph 2:20 .

Steadfast ( $\varepsilon \delta \rho \alpha \iota 0$ ). Old adjective from $\varepsilon \delta \rho \alpha$ (seat). In N.T. only here, 1Co 7:37; 15:58 . Metaphor of seated in a chair.

Not moved away ( $\mu \eta \mu \varepsilon \tau \alpha \kappa เ v o v \mu \varepsilon v o$ ). Present passive participle (with negative $\mu \eta$ ) of $\mu \varepsilon \tau \alpha \kappa ı \nu \varepsilon \omega$, old verb, to move away, to change location, only here in N.T. Negative statement covering the same ground.

From the hope of the gospel ( $\alpha \pi \sigma \tau \eta \varsigma \varepsilon \lambda \pi \iota \delta o \varsigma \tau o v \varepsilon v a \gamma \gamma \varepsilon \lambda \iota o v$ ). Ablative case with $\alpha \pi \mathrm{o}$. The hope given by or in the gospel and there alone.

Which ye heard (ov $\eta \kappa о v \sigma \alpha \tau \varepsilon$ ). Genitive case of relative either by attraction or after $\eta \kappa o v \sigma a \tau \varepsilon$. The Colossians had in reality heard the gospel from Epaphras.

Preached ( $\kappa \eta \rho v \chi \theta \varepsilon v \tau \circ \varsigma)$. First aorist passive participle of $\kappa \eta \rho v \sigma \sigma \omega$, to herald, to proclaim.

In all creation ( $\varepsilon v \pi \alpha \sigma \eta \kappa \tau \iota \sigma \varepsilon$ ). Kтıбıs is the act of founding (Ro 1:20) from $\kappa \tau \iota \zeta \omega$ (verse 16), then a created thing (Ro 1:25), then the sum of created things as here and Re

3:14. It is hyperbole, to be sure, but Paul does not say that all men are converted, but only that the message has been heralded abroad over the Roman Empire in a wider fashion than most people imagine.

A minister ( $\delta \iota \kappa \kappa$ кос). General term for service ( $\delta \iota \alpha$, кovıৎ, raising a dust by speed) and used often as here of preachers like our "minister" today, one who serves. Jesus used the verb $\delta \iota \alpha \kappa о v \eta \sigma \alpha$ of himself ( $\mathrm{Mr} 10: 45$ ). Our "deacon" is this word transliterated and given a technical meaning as in Php 1:1.

Col 1:24
Now I rejoice ( $v v v \chi \propto \iota \rho o \mu \varepsilon v$ ). This is not a new note for Paul. See him in jail in Philippi (Ac 16:25) and in 2Co 11:16-33; Ro 5:3; Php 2:18 .

Fill up on my part ( $\alpha v \tau \alpha v \alpha \pi \lambda \eta \rho \omega$ ). Very rare double compound verb (here only in N.T.) to fill ( $\pi \lambda \eta \rho o \omega$ ) up ( $\alpha v \alpha$ ), in turn ( $\alpha v \tau$ ). It is now Paul's "turn" at the bat, to use a baseball figure. Christ had his "turn," the grandest of all and suffered for us all in a sense not true of any one else. It is the idea of balance or correspondence in $\alpha \nu \tau$ as seen in Demosthenes's use of this verb (De Symm., p. 282), "the poor balancing the rich." And yet Christ did not cause suffering to cease. There is plenty left for Paul and for each of us in his time.

That which is lacking ( $\tau \alpha$ voтep $\mu \mu \tau \alpha$ ). "The left-overs," so to speak. Late word from vøтєрع $\omega$, to come behind, to be left, to fail. See Lu 21:4; 1Th 3:10; 2Co 8:14; 9:12 .

For his body's sake ( $\cup \pi \varepsilon \rho$ тov $\sigma \omega \mu \alpha \tau \circ \varsigma \alpha v \tau o v$ ). As Paul showed in his exultation in suffering in 2Co 11:16-33, though not in the same sense in which Christ suffered and died for us as Redeemer. Paul attaches no atoning value whatever to his own sufferings for the church (see also verse 18).

Col 1:25
According to the dispensation of God ( $\kappa \alpha \tau \alpha \tau \eta v$ оюкоvоцı $\alpha v$ тov $\theta \varepsilon о v$ ). "According to the economy of God." An old word from oккоvон $\omega$, to be a house steward (окоб, $\nu \varepsilon \mu \omega$ ) as in Lu 16:2-4; 1Co 9:17; Eph 1:9; 3:9. It was by God's stewardship that Paul was made a minister of Christ.

To fulfil the word of God ( $\pi \lambda \eta \rho \omega \sigma \alpha$ $\tau \circ \nu \lambda o \gamma o v \tau \operatorname{\tau ov} \theta \varepsilon o v)$. First aorist active infinitive of purpose ( $\pi \lambda \eta \rho \rho \omega)$, a fine phrase for a God-called preacher, to fill full or to give full scope to the Word of God. The preacher is an expert on the word of God by profession. See Paul's ideal about preaching in 2Th 3:1 .

Col 1:26
The mystery ( $\tau \mathrm{o} \mu v \sigma \tau \eta \rho \circ \mathrm{ov}$ ). See on 1Co 2:7 for this interesting word from $\mu \nu \sigma \tau \eta \varsigma$ (initiate), from $\mu \nu \varepsilon \omega$, to wink, to blink. The Gnostics talked much of "mysteries." Paul takes their very word (already in common use, Mt 13:11) and uses it for the gospel.

Which hath been hid (то $\alpha \pi о к \varepsilon к \rho \cup \mu \mu \varepsilon v o v)$ ). Perfect passive articular participle from алокри $\pi \tau \omega$, old verb, to hide, to conceal from (1Co 2:7; Eph 3:9).

But now it hath been manifested（vvv $\delta \varepsilon \varepsilon \varphi a v \varepsilon \rho \omega \theta \eta$ ）．First aorist passive indicative of $\varphi$ avepo $\omega$ ，to make manifest（ $\varphi \alpha v \varepsilon \rho o \varsigma$ ）．The construction is suddenly changed （anacoluthon）from the participle to the finite verb．

Col 1：27
God was pleased（ $\eta \theta \varepsilon \lambda \eta \sigma \varepsilon v$ o $\theta \varepsilon o \varsigma)$ ．First aorist active indicative of $\theta \varepsilon \lambda \omega$ ，to will，to wish．＂God willed＂this change from hidden mystery to manifestation．

To make known（ $\gamma \nu \omega \rho \iota \sigma \alpha$ ）．First aorist active infinitive of $\gamma \nu \omega \rho \iota \zeta \omega$（from $\gamma \iota v \omega \sigma \kappa \omega$ ）． Among the Gentiles（ $\varepsilon v \tau o \iota \varsigma \varepsilon v \varepsilon \sigma เ v)$ ．This is the crowning wonder to Paul that God had included the Gentiles in his redemptive grace，＂the riches of the glory of this mystery＂（ $\tau$
 of this grace among the Gentiles（Eph 3：1－2 ）．He feels the high honour keenly and meets the responsibility humbly．

Which（o）．Grammatical gender（neuter）agreeing with $\mu v \sigma \tau \eta \rho \circ \frac{0}{}$（mystery），supported by A B P Vulg．，though os（who）agreeing with Xpıб⿱宀八九 in the predicate is read by Aleph C D L．At any rate the idea is simply that the personal aspect of＂this mystery＂is＂Christ in you
 idea of $\varepsilon v$ here is in，not among．It is the personal experience and presence of Christ in the individual life of all believers that Paul has in mind，the indwelling Christ in the heart as in Eph 3：17．He constitutes also the hope of glory for he is the $\Sigma \varepsilon \kappa$ iva of God．Christ is our hope now（1Ti 1：1）and the consummation will come（Ro 8：18）．

Col 1：28
Whom（ov）．That is，＂Christ in you，the hope of glory．＂
We proclaim（катаүүعג入одعv）．Paul，Timothy and all like－minded preachers against the Gnostic depreciation of Christ．This verb originally（Xenophon）meant to denounce， but in N．T．it means to announce（ $\alpha \gamma \gamma \varepsilon \lambda \lambda \omega$ ）throughout（ $\kappa \alpha \tau \alpha$ ），to proclaim far and wide （Ac 13：5）．
 $\tau(\theta \eta \mu)$ ．See already Ac 20：31；1Th 5：12，14；2Th 3：15，etc．Warning about practice and teaching（ $\delta$ เסaбкоvтєऽ）about doctrine．Such teaching calls for＂all wisdom＂

Every man（ $\pi \alpha \nu \tau \alpha \alpha v \theta \rho \omega \pi \sigma v$ ）．Repeated three times．＂In opposition to the doctrine of an intellectual exclusiveness taught by the false teachers＂（Abbott）．

That we may present（ $\imath v \alpha \pi \alpha \rho \alpha \sigma \tau \eta \sigma \omega \mu \varepsilon v$ ）．Final use of $\mathfrak{v \alpha}$ and first aorist active sub－ junctive of $\pi \alpha \rho \iota \sigma \tau \eta \mu$ ，for which see 1：22，the final presentation to Christ．

Perfect（ $\tau \varepsilon \lambda \varepsilon \iota o v)$ ．Spiritual adults in Christ，no longer babes in Christ（Heb 5：14）， mature and ripened Christians（ 4：22），the full－man in Christ（Eph 4：13）．The relatively perfect（Php 3：15）will on that day of the presentation be fully developed as here（Col 4：12； Eph 4：13）．The Gnostics used $\tau \varepsilon \lambda \varepsilon \iota o c$ of the one fully initiated into their mysteries and it is quite possible that Paul here has also a sidewise reference to their use of the term．

Col 1:29
Whereunto ( $\varepsilon เ \varsigma ~ o)$. That is "to present every man perfect in Christ."
I labour also ( $\kappa \alpha \kappa о \pi \iota \omega$ ). Late verb колı $\alpha \omega$, from колоৎ (toil), to grow weary from toil (Mt 11:28), to toil on (Php 2:16), sometimes for athletic training. In papyri.

Striving ( $\alpha \gamma \omega v \iota \zeta o \mu \varepsilon \nu o \varsigma$ ). Present middle participle of common verb $\alpha \gamma \omega v \iota \zeta o \mu \alpha$ (from $\alpha \gamma \omega \nu$, contest, as in 2:1), to contend in athletic games, to agonize, a favourite metaphor with Paul who is now a prisoner.

Working ( $\varepsilon v \varepsilon \rho \gamma \varepsilon ı \alpha v$ ). Our word "energy." Late word from $\varepsilon v \varepsilon \rho \gamma \eta \varsigma(\varepsilon \nu, \varepsilon \rho \gamma \circ v$ ), efficiency (at work). Play on the word here with the present passive participle of $\varepsilon v \varepsilon \rho \gamma \varepsilon \omega, \varepsilon v \varepsilon \rho \gamma o v \mu \varepsilon v \eta \nu$ (energy energized) as in Eph 1:19f . Paul was conscious of God's "energy" at work in him "mightily" ( $\varepsilon v \delta v v \alpha \mu \varepsilon$ ), "in power" like dynamite.

## Colossians 2

Col 2:1
How greatly I strive ( $\eta \lambda_{ı} \kappa \circ \sim \gamma \omega v \alpha \varepsilon \chi \omega$ ). Literally, "how great a contest I am having." The old adjectival relative $\eta \lambda_{1 \kappa o}$ (like Latin quantus) is used for age or size in N.T. only here and Jas 3:5 (twice, how great, how small). It is an inward contest of anxiety like the $\mu \varepsilon \rho \mu \nu \vee \alpha$ for all the churches (2Co 11:28). A $\gamma \omega v \alpha$ carries on the metaphor of $\alpha \gamma \omega v i \zeta \rho \mu \varepsilon v o \varsigma$ in 1:29.

For them at Laodicea ( $\tau \omega v \varepsilon \vee \Lambda \alpha o \delta ı \kappa ı \alpha$ ).
Supply $v \pi \varepsilon \rho$ as with $v \pi \varepsilon \rho \nu \mu \omega \nu$. Paul's concern extended beyond Colossae to Laodicea ( $4: 16$ ) and to Hierapolis ( $4: 13$ ), the three great cities in the Lycus Valley where Gnosticism was beginning to do harm. Laodicea is the church described as lukewarm in Re 3:14 .

For as many as have not seen my face ( $\circ \sigma 0$ ov $\varepsilon о \rho a \kappa \alpha v ~ \tau о ~ \pi \rho о \sigma \omega \pi о v ~ \mu о v$ ). The phrase undoubtedly includes Hierapolis ( 4:13), and a few late MSS. actually insert it here. Lightfoot suggests that Hierapolis had not yet been harmed by the Gnostics as much as Colossae and Laodicea. Perhaps so, but the language includes all in that whole region who have not seen Paul's face in the flesh (that is, in person, and not in picture). How precious a real picture of Paul would be to us today. The antecedent to oro is not expressed and it would be tout $\omega v$ after $v \pi \varepsilon \rho$. The form воракаv (perfect active indicative of opaw instead of the usual $\varepsilon \omega \rho \alpha \kappa \alpha \sigma \iota$ has two peculiarities o in Paul's Epistles (1Co 9:1) instead of $\omega$ (see Joh 1:18 for $\varepsilon \omega \rho \alpha \kappa \varepsilon v$ ) and - $\alpha v$ by analogy in place of - $\alpha \sigma \iota v$, which short form is common in the papyri. See Lu 9:36 ع $\omega$ ракаv.

## Col 2:2

May be comforted ( $\pi \alpha \rho \alpha \kappa \lambda \eta \theta \omega \sigma \iota v$ ). First aorist passive subjunctive of $\pi \alpha \rho \alpha \kappa \alpha \lambda \varepsilon \omega$ (for which see 2Co 1:3-7 ) in final clause with iva.

Being knit together ( $\sigma \sim \nu \beta \curlywedge \beta \alpha \sigma \theta \varepsilon \nu \tau \varepsilon \varsigma)$. First aorist passive participle of $\sigma \nu \nu \beta \curlywedge \beta \alpha \zeta \omega$, old verb, causal of $\beta \alpha \iota v \omega$, to make go together, to coalesce in argument (Ac 16:10), in spiritual growth (Col 2:19), in love as here. Love is the $\sigma v v \delta \varepsilon \sigma \mu \circ \varsigma$ ( 3:14) that binds all together.

Unto all riches ( $\varepsilon \varsigma \varsigma \pi \alpha v \pi \lambda$ ои $\pi o \varsigma)$. Probably some distinction intended between $\varepsilon v$ (in love as the sphere) and $\varepsilon ı \varsigma$ (unto as the goal).

Of the full assurance of understanding ( $\tau \eta \varsigma \pi \lambda \eta \rho \circ \varphi о \rho เ a \varsigma ~ \tau \eta \varsigma ~ \sigma u v \varepsilon \sigma \varepsilon \omega \varsigma)$. On $\pi \lambda \eta \rho о \varphi о \rho ı a$, see 1Th 1:5. From $\pi \lambda \eta \rho о \varphi о \rho \varepsilon \omega$ (see Lu 1:1) and only in N.T. (1Th 1:5; Col 2:2; Heb 6:11; 10:22 ), Clement of Rome (Cor. 42) and one papyrus example. Paul desires the full use of the intellect in grasping the great mystery of Christ and it calls for the full and balanced exercise of all one's mental powers.

That they may know ( $\varepsilon \iota \varsigma ~ \varepsilon \pi ı \gamma v \omega \sigma \iota v$ ). "Unto full knowledge." This use of $\varepsilon \pi \iota \gamma v \omega \sigma \iota \varsigma$ (full, additional knowledge) is Paul's reply to the Gnostics with the limited and perverted $\gamma \nu \omega \sigma \iota \varsigma$ (knowledge).
 widely here, but this is Westcott and Hort's reading. Genitive (objective) with $\varepsilon \pi \imath \gamma v \omega \sigma ı$ and Xpıotov in apposition. Christ is "the mystery of God," but no longer hidden, but manifested ( $1: 26$ ) and meant for us to know to the fulness of our capacity.

Col 2:3
In whom $(\varepsilon v \omega)$. This locative form can refer to $\mu \nu \sigma \tau \eta \rho \circ o v$ or to Xpıotov. It really makes no difference in sense since Christ is the mystery of God.

All the treasures of wisdom and knowledge ( $\pi \alpha \nu \tau \varepsilon \varsigma ~ о ~ Ө \eta \sigma \alpha \cup \rho о ~ \tau \eta \varsigma ~ \sigma о \varphi เ а \varsigma ~ к а ~$ $\gamma \nu \omega \sigma \varepsilon \omega \varsigma)$. See on Mt 2:11; 6:19-21 for this old word, our thesaurus, for coffer, storehouse, treasure. Paul confronts these pretentious intellectuals (Gnostics) with the bold claim that Christ sums up all wisdom and knowledge. These treasures are hidden (aтокрv甲o, old adjective from $\alpha \pi о к \rho \cup \pi \tau \omega$, to hide away, Mr 4:22) whether the Gnostics have discovered them or not. They are there (in Christ) as every believer knows by fresh and repeated discovery.

Col 2:4
This I say ( $\tau 0 \cup \tau 0 ~ \lambda \varepsilon \gamma \omega$ ). Paul explains why he has made this great claim for Christ at this point in his discussion.

May delude ( $\pi \alpha \rho \alpha \lambda о \gamma \iota \zeta \eta \tau \alpha$ ). Present middle subjunctive of $\pi \alpha \rho \alpha \lambda о \gamma \zeta \zeta \rho \mu \alpha$, old verb, only here in N.T., from $\pi \alpha \rho \alpha$ and $\lambda о ү \zeta \zeta \mu \alpha$, to count aside and so wrong, to cheat by false reckoning, to deceive by false reasoning (Epictetus).

With persuasiveness of speech ( $\varepsilon v \pi \iota \theta \alpha v o \lambda o \gamma \iota \alpha)$. Rare word (Plato) from $\pi \iota \theta \alpha v o c$ and $\lambda о \gamma о \varsigma$, speech, adapted to persuade, then speciously leading astray. Only here in N.T. One papyrus example. The art of persuasion is the height of oratory, but it easily degenerates into trickery and momentary and flashy deceit such as Paul disclaimed in 1Co 2:4 (ouk $\varepsilon v$
 (both from $\pi \varepsilon ו \theta \omega$ ) is another form. It is curious how winning champions of error, like the Gnostics and modern faddists, can be with plausibility that catches the gullible.

Col 2:5
Though ( $\varepsilon \kappa \alpha$ ). Not $\kappa \alpha \varepsilon$ (even if).
Yet ( $\alpha \lambda \lambda \alpha$ ). Common use of $\alpha \lambda \lambda \alpha$ in the apodosis (conclusion) of a conditional or concessive sentence.

Your order ( $\tau \eta \nu \tau \alpha \xi เ v)$. The military line (from $\tau \alpha \sigma \sigma \omega$ ), unbroken, intact. A few stragglers had gone over to the Gnostics, but there had been no panic, no breach in the line.

Steadfastness ( $\sigma \tau \varepsilon \rho \varepsilon \omega \mu \mu$ ). From $\sigma \tau \varepsilon \rho \varepsilon \circ \omega$ (from $\sigma \tau \varepsilon \rho \varepsilon \sigma \varsigma)$ to make steady, and probably the same military metaphor as in $\tau \alpha \xi ı v$ just before. The solid part of the line which can and does stand the attack of the Gnostics. See Ac 16:5 where the verb $\sigma \tau \varepsilon \rho \varepsilon \circ \omega$ is used with $\pi \iota \sigma \tau \iota \varsigma$ and $1 \mathrm{Pe} 5: 9$ where the adjective $\sigma \tau \varepsilon \rho \varepsilon \circ$, is so used. In 2Th 3:6,8,11 Paul speaks of his own $\tau \alpha \xi ı \varsigma$ (orderly conduct).

Col 2:6

As therefore ye received ( $\omega \varsigma$ ouv $\pi \alpha \rho \varepsilon \lambda \alpha \beta \varepsilon \tau \varepsilon$ ). Second aorist active indicative of $\pi \alpha \rho \alpha \lambda \alpha \mu \beta \alpha v \omega$ in same sense as in 1Th 4:1; Php 4:9 (both $\mu \alpha v \theta \alpha v \omega$ and $\pi \alpha \rho \alpha \lambda \alpha \mu \beta \alpha v \omega$ ) that is like $\mu \alpha v \theta \alpha v \omega$, to learn ( $1: 7$ ), from Epaphras and others.

Christ Jesus the Lord ( $\tau 0 v$ Xpıotov Inoouv qov Kupıov). This peculiar phrase occurs nowhere else by Paul. We have often o Xpıotoc (the Christ or Messiah) as in Php 1:15,

 that Paul here meets the two forms of Gnostic heresy about the Person of Christ (the recognition of the historical Jesus in his actual humanity against the Docetic Gnostics, the identity of the Christ or Messiah with this historical Jesus against the Cerinthian Gnostics, and the acknowledgment of him as Lord). "As therefore ye received the Christ (the Messiah), Jesus the Lord." Ye were taught right.

Walk in him ( $\varepsilon \vee \alpha \cup \tau \omega \pi \varepsilon \rho \iota \pi \alpha \tau \varepsilon \iota \tau \varepsilon$ ). "Go on walking in him" (present active indicative of $\pi \varepsilon \rho ı \pi \alpha \tau \varepsilon \omega)$. Stick to your first lessons in Christ.

Col 2:7
Rooted ( $\varepsilon \rho \rho ı \zeta \omega \mu \varepsilon v o)$. Perfect passive participle of old verb $\rho \iota \zeta(\zeta \omega$ from $\rho ı \zeta \alpha$, root. In N.T. only here and Eph 3:17. Paul changes the figure from walk to growing tree.

Builded up in him ( $\varepsilon \pi о н к о \delta о \mu о \nu \mu \varepsilon v o \varepsilon v a v \tau \omega)$. Present passive participle (rooted to stay so) of $\varepsilon \pi о к к о \delta о \mu \varepsilon \omega$, old verb, to build upon as in 1Co 3:10,12. The metaphor is changed again to a building as continually going up (present tense).

Stablished ( $\beta \varepsilon \beta \alpha \circ \sigma \mu \varepsilon v o$ ). Present passive participle of $\beta \varepsilon \beta \alpha \circ o \omega$, old verb from $\beta \varepsilon \beta \alpha \iota \circ$ (from $\beta a \downarrow v \omega, \beta a \omega \omega$ ), to make firm or stable.

In your faith ( $\tau \eta \pi / \sigma \tau \varepsilon$ ). Locative case, though the instrumental case,
by your faith, makes good sense also.
Even as ye were taught ( $\kappa \alpha \theta \omega \varsigma \varepsilon \delta \iota \delta \alpha \chi \theta \eta \tau \varepsilon$ ). First aorist passive indicative of $\delta \iota \delta \alpha \sigma \kappa \omega$, an allusion to $\pi \alpha \rho \varepsilon \lambda \alpha \beta \varepsilon \tau \varepsilon$ in verse 6 and to $\varepsilon \mu \alpha \theta \varepsilon \tau \varepsilon$ in 1:7.

In thanksgiving ( $\varepsilon v \varepsilon \cup \chi \alpha \rho \iota \sigma \tau \iota \alpha)$. Hence they had no occasion to yield to the blandishments of the Gnostic teachers.

Col 2:8
Take heed ( $\beta \lambda \varepsilon \pi \varepsilon \tau \varepsilon$ ). Present active imperative second person plural of $\beta \lambda \varepsilon \pi \omega$, common verb for warning like our "look out," "beware," "see to it."

Lest there shall be any one ( $\mu \eta \tau \iota \varsigma \varepsilon \sigma \tau \alpha$ ). Negative purpose with the future indicative, though the aorist subjunctive also occurs as in 2Co 12:6 .

That maketh spoil of you (o $\sigma v \lambda \alpha \gamma \omega \gamma \omega v$ ). Articular present active participle of $\sigma u \lambda \alpha \gamma \omega \gamma \varepsilon \omega$, late and rare (found here first) verb (from $\sigma u \lambda \eta$, booty, and $\alpha \gamma \omega$, to lead, to carry), to carry off as booty a captive, slave, maiden. Only here in N.T. Note the singular here. There was some one outstanding leader who was doing most of the damage in leading the people astray.

Through his philosophy（ $\delta \iota \alpha \tau \eta \varsigma \varphi \lambda о \sigma о \varphi เ \alpha \varsigma)$ ．The only use of the word in the N．T． and employed by Paul because the Gnostics were fond of it．Old word from $\varphi \backslash \lambda о \sigma о \varphi о \varsigma$ （ $\varphi \lambda$ 入oб，$\sigma о \varphi \circ \varsigma$ ，one devoted to the pursuit of wisdom）and in N．T．only in Ac 17：18 ．Paul does not condemn knowledge and wisdom（see verse 2），but only this false philosophy， ＂knowledge falsely named＂（ $\psi \varepsilon \cup \delta \omega v \nu \mu \circ \varsigma ~ \gamma \nu \omega \sigma \iota \varsigma, 1 T i ~ 6: 20$ ），and explained here by the next words．

And vain deceit（ $\kappa \alpha \kappa \varepsilon v \eta \varsigma \alpha \pi \alpha \tau \eta \varsigma)$ ．Old word for trick，guile，like riches（Mt 13：22）． Descriptive of the philosophy of the Gnostics．

Tradition（ $\pi \alpha \rho \alpha \delta o \sigma v v$ ）．Old word from $\pi \alpha \rho \alpha \delta \iota \delta \omega \mu$ ，a giving over，a passing on．The word is colourless in itself．The tradition may be good（2Th 2：15；3：6 ）or bad（Mr 7：3）．Here it is worthless and harmful，merely the foolish theories of the Gnostics．

Rudiments（ $\sigma \tau \circ \chi \chi \varepsilon \alpha)$ ．Old word for anything in a $\sigma \tau 0 \times \chi \circ \varsigma$（row，series）like the letters of the alphabet，the materials of the universe（ $2 \mathrm{Pe} 3: 10,12$ ），elementary teaching（Heb 5：12 ），elements of Jewish ceremonial training（Ac 15：10；Gal 4：3，9），the specious arguments of the Gnostic philosophers as here with all their aeons and rules of life．

And not after Christ（ка ои ката X $\rho \iota \sigma \tau о v$ ）．Christ is the yardstick by which to measure philosophy and all phases of human knowledge．The Gnostics were measuring Christ by their philosophy as many men are doing today．They have it backwards．Christ is the measure for all human knowledge since he is the Creator and the Sustainer of the universe．

Col 2：9
For in him dwelleth all the fulness of the Godhead bodily（о $\varepsilon v$ aut $\omega$ катоюк $\pi \alpha \nu$ то $\pi \lambda \eta \rho \omega \mu \alpha \tau \eta \varsigma \theta \varepsilon о \tau \eta \tau о \varsigma \sigma \omega \mu \alpha \tau \iota \kappa \omega \varsigma)$ ．In this sentence，given as the reason（o $\tau$, because） for the preceding claim for Christ as the measure of human knowledge Paul states the heart of his message about the Person of Christ．There dwells（at home）in Christ not one or more aspects of the Godhead（the very $\varepsilon \sigma \sigma \varepsilon v \chi \varepsilon$ of God，from $\theta \varepsilon \circ \sigma, \delta \varepsilon \iota \tau \alpha \varsigma)$ and not to be confused with $\theta \varepsilon ⿺ 𠃊 \tau \varepsilon \varsigma$ in Ro 1：20（from $\theta \varepsilon \iota o \varsigma$ ，the
quality of God，divinitas），here only in N．T．as $\theta \varepsilon เ o \tau \eta \varsigma$ only in Ro 1：20．The distinction is observed in Lucian and Plutarch．$\Theta \varepsilon เ o \tau \eta \varsigma ~ o c c u r s ~ i n ~ t h e ~ p a p y r i ~ a n d ~ i n s c r i p t i o n s . ~ P a u l ~ h e r e ~$ asserts that＂all the $\pi \lambda \eta \rho \omega \mu \alpha$ of the Godhead，＂not just certain aspects，dwells in Christ and in bodily form（ $\sigma \omega \mu \alpha \tau \iota \kappa \omega \varsigma$ ，late and rare adverb，in Plutarch，inscription，here only in N．T．）， dwells now in Christ in his glorified humanity（Php 2：9－11），＂the body of his glory＂（ $\tau \omega$ $\sigma \omega \mu \alpha \tau \tau \eta \varsigma \delta o \xi \eta \varsigma)$ ．The fulness of the God－head was in Christ before the Incarnation（Joh 1：1，18；Php 2：6 ），during the Incarnation（Joh 1：14，18；1Jo 1：1－3 ）．It was the Son of God who came in the likeness of men（Php 2：7）．Paul here disposes of the Docetic theory that Jesus had no human body as well as the Cerinthian separation between the man Jesus and the aeon Christ．He asserts plainly the deity and the humanity of Jesus Christ in corporeal form．

Col 2：10

Ye are made full ( $\varepsilon \sigma \tau \varepsilon \pi \varepsilon \pi \lambda \eta \rho \omega \mu \varepsilon v o$ ). Periphrastic perfect passive indicative of $\pi \lambda \eta \rho \circ \omega$, but only one predicate, not two. Christ is our fulness of which we all partake (Joh 1:16; Eph 1:23) and our goal is to be made full of God in Christ (Eph 3:19). "In Christ they find the satisfaction of every spiritual want" (Peake).

The head ( $\eta \kappa \alpha \varphi \alpha \lambda \eta$ ). There is no other place for Christ. He is first ( $1: 18$ ) in time and in rank. All rule and authority comes after Christ whether angels, aeons, kings, what not.

Col 2:11
Ye were also circumcised ( $\kappa \alpha \pi \varepsilon \rho \varepsilon \tau \tau \mu \eta \eta \eta \tau \varepsilon$ ). First aorist passive indicative of $\pi \varepsilon \rho ı \tau \varepsilon \mu \nu \omega$, to circumcise. But used here as a metaphor in a spiritual sense as in Ro 2:29 "the circumcision of the heart."

Not made with hands ( $\alpha \chi \varepsilon \rho \rho \pi о п \eta \tau \omega$ ). This late and rare negative compound verbal occurs only in the N.T. (Mr 14:58; 2Co 5:1; Col 2:11 ) by merely adding a privative to the old verbal хвıротопттоৎ (Ac 7:48; Eph 2:11), possibly first in Mr 14:58 where both words occur concerning the temple. In 2Co 5:1 the reference is to the resurrection body. The feminine form of this compound adjective is the same as the masculine.

In the putting off ( $\varepsilon \nu \tau \eta \alpha \pi \varepsilon \kappa \delta v \sigma \varepsilon$ ). As if an old garment (the fleshly body). From $\alpha \pi \varepsilon \kappa \delta v o \mu \alpha$ (Col 2:15, possibly also coined by Paul) and occurring nowhere else so far as known. The word is made in a perfectly normal way by the perfective use of the two Greek prepositions ( $\alpha \pi \mathbf{\sigma}, \varepsilon \kappa$ ), "a resource available for and generally used by any real thinker writing Greek" (Moulton and Milligan, Vocabulary). Paul had as much right to mint a Greek compound as any one and surely no one ever had more ideas to express and more power in doing it.
 Christ, that of the heart.

Col 2:12
Having been buried with him in baptism ( $\sigma v \nu \tau \alpha \varphi \varepsilon \nu \tau \varepsilon \varsigma \alpha \nu \tau \omega \varepsilon v \tau \omega \beta \alpha \pi \tau \iota \sigma \mu \alpha \tau$ ). Second aorist passive participle of $\sigma v v \theta a \pi \tau \omega$, old word, in N.T. only here and Ro 6:4 , followed by associative instrumental case $(\alpha \cup \tau \omega)$. Thayer's Lexicon says: "For all who in the rite of baptism are plunged under the water, thereby declare that they put faith in the expiatory death of Christ for the pardon of their past sins." Yes, and for all future sins also. This word gives Paul's vivid picture of baptism as a symbolic burial with Christ and resurrection also to newness of life in him as Paul shows by the addition "wherein ye were also raised with him" ( $\varepsilon v \omega$ ка $\sigma v \nu \eta \gamma \varepsilon \rho \theta \eta \tau \varepsilon$ ). "In which baptism" ( $\beta a \pi \tau \iota \sigma \mu \alpha \tau$, he means). First aorist passive indicative of $\sigma u v \varepsilon \gamma \varepsilon เ \rho \omega$, late and rare verb (Plutarch for waking up together), in LXX, in N.T. only in Col 2:12; 3:1; Eph 2:6. In the symbol of baptism the resurrection to new life in Christ is pictured with an allusion to Christ's own resurrection and to our final resurrection. Paul does not mean to say that the new life in Christ is caused or created by the act of baptism. That is grossly to misunderstand him. The Gnostics and the Judaizers
were sacramentalists, but not so Paul the champion of spiritual Christianity. He has just given the spiritual interpretation to circumcision which itself followed Abraham's faith (Ro 4:10-12 ). Cf. Ga 3:27. Baptism gives a picture of the change already wrought in the heart "through faith" ( $\delta \iota \alpha \tau \eta \varsigma \pi \iota \sigma \tau \varepsilon \omega \varsigma)$.

In the working of God ( $\tau\rceil \varsigma \varepsilon v \varepsilon \rho \gamma \varepsilon ı a \varsigma ~ \tau o v ~ \theta \varepsilon o v)$. Objective genitive after $\pi / \sigma \tau \varepsilon \omega \varsigma$. See 1:29 for $\varepsilon v \varepsilon \rho \gamma \varepsilon ı \alpha$. God had power to raise Christ from the dead ( $\tau 0 \cup \varepsilon \gamma \varepsilon ו \rho a v \tau o \varsigma, ~ f i r s t ~ a o r i s t ~$ active participle of $\varepsilon \gamma \varepsilon \rho \rho \omega$, the fact here stated) and he has power (energy) to give us new life in Christ by faith.

Col 2:13
And you ( $\kappa \alpha \nu \mu \alpha \varsigma$ ). Emphatic position, object of the verb $\sigma u v \varepsilon \zeta \omega о \pi о п \eta \sigma \varepsilon v$ (did he quicken) and repeated (second $v \mu \alpha \varsigma)$. You Gentiles as he explains.

Being dead through your trespasses (vєкроия оvтац тоъ $\pi \alpha \rho \alpha \pi \tau \omega \mu \alpha \sigma \iota v$ ). Moral death, of course, as in Ro 6:11; Eph 2:1,5. Correct text does not have $\varepsilon v$, but even so $\pi \alpha \rho a \pi \tau \omega \mu \alpha \sigma ı$ (from $\pi \alpha \rho \alpha \pi \iota \pi \tau \omega$, to fall beside or to lapse, Heb 6:6 ), a lapse or misstep as in Mt 6:14; Ro 5:15-18; Ga 6:1 , can be still in the locative, though the instrumental makes good sense also.

And the uncircumcision of your flesh ( $\kappa \alpha \tau \eta ~ \alpha \kappa \rho о \beta о v \sigma \tau \iota \alpha \tau \eta \varsigma \sigma \alpha \rho \kappa о \varsigma ~ v \mu \omega v$ ). "Dead in your trespasses and your alienation from God, of which the uncircumcision of your flesh was a symbol" (Abbott). Clearly so, "the uncircumcision" used merely in a metaphorical sense.

Did he quicken together with him ( $\sigma \cup v \varepsilon \zeta \omega о \pi о \sqcap \sigma \varepsilon v \sigma \cup v \alpha \cup \tau \omega$ ). First aorist active indicative of the double compound verb $\sigma \nu \vee \zeta \omega о \pi о เ \varepsilon \omega$, to make alive ( $\zeta \omega$ об, $\pi о เ \varepsilon \omega$ ) with ( $\sigma \nu v$, repeated also with $\alpha \cup \tau \omega$, associative instrumental), found only here and in Eph 2:5 , apparently coined by Paul for this passage. Probably $\theta$ roc (God) is the subject because expressly so stated in Eph 2:4f. and because demanded by $\sigma v v$ avt $\omega$ here referring to Christ. This can be true even if Christ be the subject of $\eta \rho \kappa \varepsilon v$ in verse 14.

Having forgiven us ( $\chi \alpha \rho \iota \sigma \alpha \mu \varepsilon v o \varsigma ~ \eta \mu \nu \nu)$. First aorist middle participle of $\chi \alpha \rho \iota \zeta о \mu \alpha$, common verb from $\chi \alpha \rho ı \varsigma$ (favour, grace). Dative of the person common as in 3:13. The act of forgiving is simultaneous with the quickening, though logically antecedent.

Col 2:14
Having blotted out ( $\varepsilon \xi \alpha \lambda \varepsilon \tau \nmid \propto \varsigma)$. And so "cancelled." First aorist active participle of old verb $\varepsilon \xi \alpha \lambda \varepsilon เ \varphi \omega$, to rub out, wipe off, erase. In N.T. only in Ac 3:19 (LXX); Re 3:5; Col 2:14. Here the word explains $\chi \alpha \rho เ \sigma \alpha \mu \varepsilon v o \varsigma$ and is simultaneous with it. Plato used it of blotting out a writing. Often MSS. were rubbed or scraped and written over again (palimpsests, like Codex C).

The bond written in ordinances that was against us ( $\tau$ ко $\kappa \theta^{\prime} \eta \mu \omega \nu \chi \varepsilon\llcorner\rho о \gamma \rho \alpha \varphi о \nu$ то» $\delta o \gamma \mu \alpha \sigma \iota v$ ). The late compound $\chi \varepsilon \iota \rho о \gamma \rho \alpha \varphi o v$ ( $\chi \varepsilon \rho$, hand, $\gamma \rho \alpha \varphi \omega$ ) is very common in the papyri for a certificate of debt or bond, many of the original $\chi \varepsilon ו \rho о \gamma \rho \alpha \varphi a$ (handwriting, "chirography"). See Deissmann, Bible Studies, p. 247. The signature made a legal debt or
bond as Paul says in Phm 1:18f. : "I Paul have written it with mine own hand, I will repay it." Many of the papyri examples have been "crossed out" thus X as we do today and so cancelled. One decree is described as "neither washed out nor written over" (Milligan, N. T. Documents, p. 16). Undoubtedly "the handwriting in decrees" ( $\delta о \gamma \mu a \sigma \iota v$, the Mosaic law, Eph 2:15 ) was against the Jews (Ex 24:3; De 27:14-26 ) for they accepted it, but the Gentiles also gave moral assent to God's law written in their hearts (Ro 2:14f. ). So Paul says "against us" ( $\kappa \alpha \theta^{\prime} \eta \mu \omega v$ ) and adds "which was contrary to us" (o $\eta \nu$ v $\tau \varepsilon v a v \tau \iota v ~ \eta \mu ı v$ ) because we (neither Jew nor Gentile) could not keep it. Hиォ\&vavtios is an old double compound adjective (v $\pi 0, \varepsilon v, \alpha v \tau \iota \varsigma)$ set over against, only here in N.T. except Heb 10:27 when it is used as a substantive. It is striking that Paul has connected the common word $\chi \varepsilon \varepsilon \rho \circ \gamma \rho \alpha \varphi o v$ for bond or debt with the Cross of Christ (Deissmann, Light, etc., p. 332).

And he hath taken it out of the way ( $\kappa \alpha\rceil \rho \kappa \varepsilon v \varepsilon \kappa$ тov $\mu \varepsilon \sigma \sigma v$ ). Perfect active indicative of au $\rho \omega$, old and common verb, to lift up, to bear, to take away. The word used by the Baptist of Jesus as "the Lamb of God that bears away (aı $\rho \omega v$ ) the sin of the world" (Joh 1:29). The perfect tense emphasizes the permanence of the removal of the bond which has been paid and cancelled and cannot be presented again. Lightfoot argues for Christ as the subject of $\eta \rho \kappa \varepsilon v$, but that is not necessary, though Paul does use sudden anacolutha. God has taken the bond against us "out of the midst" ( $\varepsilon \kappa$ tov $\mu \varepsilon \sigma \sigma v$ ). Nailing it to the cross ( $\pi \rho \circ \sigma \eta \lambda \omega \sigma \alpha \varsigma$, av $\tau \boldsymbol{\tau} \omega \sigma \tau \alpha \nu \rho \omega)$. First aorist active participle of old and common verb $\pi \rho \circ \sigma \eta \lambda o \omega$, to fasten with nails to a thing (with dative $\sigma \tau \alpha v \rho \omega$ ). Here alone in N.T., but in III Macc. 4:9 with the very word $\sigma \tau \alpha v \rho \omega$. The victim was nailed to the cross as was Christ. "When Christ was crucified, God nailed the Law to His cross" (Peake). Hence the "bond" is cancelled for us. Business men today sometimes file cancelled accounts. No evidence exists that Paul alluded to such a custom here.

Col 2:15
Having put off from himself ( $\alpha \pi \varepsilon \kappa \delta v \sigma \alpha \mu \varepsilon v o c)$. Only here and 3:9 and one MS. of Josephus ( $\alpha \pi \varepsilon \kappa \delta u \varsigma)$. Both $\alpha \pi о \delta v \omega$ and $\varepsilon \kappa \delta \nu \omega$ occur in ancient writers. Paul simply combines the two for expression of complete removal. But two serious problems arise here. Is God or Christ referred to by $\alpha \pi \varepsilon \kappa \delta \nu \sigma \alpha \mu \varepsilon v o \varsigma$ ? What is meant by "the principalities and the powers" ( $\tau \alpha \varsigma ~ \alpha \rho \chi \alpha \varsigma \kappa \alpha \tau \alpha \varsigma \varepsilon \xi$ ovøıaৎ)? Modern scholars differ radically and no full discussion can be attempted here as one finds in Lightfoot, Haupt, Abbott, Peake. On the whole I am inclined to look on God as still the subject and the powers to be angels such as the Gnostics worshipped and the verb to mean "despoil" (American Standard Version) rather than "having put off from himself." In the Cross of Christ God showed his power openly without aid or help of angels.

He made a show of them ( $\varepsilon \delta \varepsilon \iota \gamma \mu \alpha \tau \iota \sigma \varepsilon v$ ). First aorist active indicative of $\delta \varepsilon \tau \gamma \mu \alpha \tau \iota \zeta \omega$, late and rare verb from $\delta \varepsilon ı \gamma \mu \alpha$ (Jude 1:7), an example, and so to make an example of. Frequent in the papyri though later than $\pi \alpha \rho a \delta \varepsilon ı \gamma \mu a \tau \iota \zeta \omega$ and in N.T. only here and Mt 1:19
of Joseph's conduct toward Mary. No idea of disgrace is necessarily involved in the word. The publicity is made plain by "openly" ( $\varepsilon v \pi \alpha \rho \rho \eta \sigma \iota \alpha$ ).

Triumphing over them on it ( $\theta \rho\llcorner\alpha \mu \beta \varepsilon v \sigma \alpha \varsigma \alpha \cup \tau o v \varsigma \varepsilon v \alpha \cup \tau \omega)$. On the Cross the triumph was won. This late, though common verb in Koine writers ( $\varepsilon \kappa \theta \rho \iota \alpha \mu \beta \varepsilon v \omega$ in the papyri) occurs only twice in the N.T., once "to lead in triumph" (2Co 2:14 ), here to celebrate a triumph (the usual sense). It is derived from $\theta \rho ı \alpha \mu \beta$ o, a hymn sung in festal procession and is kin to the Latin triumphus (our triumph), a triumphal procession of victorious Roman generals. God won a complete triumph over all the angelic agencies (avtouऽ, masculine regarded as personal agencies). Lightfoot adds, applying $\theta \rho ı \mu \mu \beta \varepsilon \sigma a c$ to Christ: "The convict's gibbet is the victor's car." It is possible, of course, to take $\alpha v \tau \omega$ as referring to $\chi \varepsilon \rho \rho \gamma \rho a \varphi o v$ (bond) or even to Christ.

Col 2:16
Let no one judge you ( $\mu \eta \tau \iota \varsigma \nu \mu a \varsigma \kappa \rho \iota v \varepsilon \tau \omega$ ). Prohibition present active imperative third singular, forbidding the habit of passing judgment in such matters. For крıv $\omega$ see on Mt 7:1 . Paul has here in mind the ascetic regulations and practices of one wing of the Gnostics (possibly Essenic or even Pharisaic influence). He makes a plea for freedom in such matters on a par with that in 1Co 8-9; Ro 14; 15 . The Essenes went far beyond the Mosaic regulations. For the Jewish feasts see on Ga 4:10 . Josephus (Ant. III. 10, 1) expressly explains the "seventh day" as called "sabbata" (plural form as here, an effort to transliterate the Aramaic sabbathah).

Col 2:17
A shadow ( $\sigma \kappa \iota \alpha$ ). Old word, opposed to substance ( $\sigma \omega \mu \alpha$, body). In Heb 10:1 $\sigma \kappa ı \alpha$ is distinguished from $\varepsilon ו \kappa \omega v$ (picture), but here from $\sigma \omega \mu \alpha$ (body, substance). The $\sigma \omega \mu \alpha$ (body) casts the бкıа (shadow) and so belongs to Christ (Xpıбтov, genitive case).

Col 2:18
Rob you of your prize ( $\kappa \alpha \tau \alpha \beta \rho \alpha \beta \varepsilon v \varepsilon \tau \omega)$. Late and rare compound ( $\kappa \alpha \tau \alpha, \beta \rho \alpha \beta \varepsilon v \omega$, Col 3:15 ) to act as umpire against one, perhaps because of bribery in Demosthenes and Eustathius (two other examples in Preisigke's Worterbuch), here only in the N.T. So here it means to decide or give judgment against. The judge at the games is called $\beta \rho \alpha \beta \varepsilon u c$ and the prize $\beta \rho \alpha \beta \varepsilon$ וov (1Co 9:24; Php 3:14). It is thus parallel to, but stronger than, $\kappa \rho \iota v \varepsilon \tau \omega$ in verse 16.

By a voluntary humility ( $\theta \varepsilon \lambda \omega \nu \varepsilon v \tau \alpha \pi \varepsilon เ v \circ \varphi \rho \circ \sigma v \nu \eta)$. Present active participle of $\theta \varepsilon \lambda \omega$, to wish, to will, but a difficult idiom. Some take it as like an adverb for "wilfully" somewhat like $\theta \varepsilon \lambda$ ovtac in $2 \mathrm{Pe} 3: 5$. Others make it a Hebraism from the LXX usage, "finding pleasure in humility." The Revised Version margin has "of his own mere will, by humility." Hort suggested $\varepsilon v \varepsilon \theta \varepsilon \lambda$ д $\tau \alpha \pi \varepsilon เ v o \varphi p o \sigma v v \eta$ (in gratuitous humility), a word that occurs in Basil and made like $\varepsilon \theta \varepsilon \lambda 0 \theta \rho \eta \sigma \kappa ⿺ \alpha$ in verse 23.

And worshipping of the angels ( $\kappa \alpha \theta \rho \eta \sigma \kappa \varepsilon เ \alpha ~ \tau \omega v ~ \alpha \gamma \gamma \varepsilon \lambda \omega v$ ). In 3:12 humility ( $\tau \alpha \pi \varepsilon เ v \circ \varphi \rho \circ \sigma \cup v \eta \nu$ ) is a virtue, but it is linked with worship of the angels which is idolatry
and so is probably false humility as in verse 23. They may have argued for angel worship on the plea that God is high and far removed and so took angels as mediators as some men do today with angels and saints in place of Christ.

Dwelling in the things which he hath seen ( $\alpha$ عоракєv $\varepsilon \mu \beta a \tau \varepsilon v \omega v$ ). Some MSS. have "not," but not genuine. This verb $\varepsilon \mu \beta a \tau \varepsilon \nu \omega$ (from $\varepsilon \mu \beta \alpha \tau \eta \varsigma$, stepping in, going in) has given much trouble. Lightfoot has actually proposed $\kappa \varepsilon v \varepsilon \mu \beta a \tau \varepsilon v \omega \nu$ (a verb that does not exist, though $\kappa \varepsilon v \varepsilon \mu \beta \alpha \tau \varepsilon \omega$ does occur) with $\alpha \iota \omega \rho \alpha$, to tread on empty air, an ingenious suggestion, but now unnecessary. It is an old word for going in to take possession (papyri examples also). W. M. Ramsay (Teaching of Paul, pp. 287ff.) shows from inscriptions in Klaros that the word is used of an initiate in the mysteries who "set foot in" (عveßatevozv) and performed the rest of the rites. Paul is here quoting the very work used of these initiates who "take their stand on" these imagined revelations in the mysteries.

Vainly puffed up ( $\varepsilon ı \kappa \eta ~ \varphi \cup \sigma \iota о \mu \varepsilon v \circ \varsigma)$. Present passive participle of $\varphi v \sigma \iota \omega$, late and vivid verb from $\varphi$ uбa, pair of bellows, in N.T. only here and 1Co 4:6,18f.; 8:1 . Powerful picture of the self-conceit of these bombastic Gnostics.

Col 2:19
Not holding fast the Head (ov крат $\omega \nu \tau \eta \nu \kappa \varepsilon \varphi \alpha \lambda \eta \nu$ ). Note negative ov, not $\mu \eta$, actual case of deserting Christ as the Head. The Gnostics dethroned Christ from his primacy ( $1: 18)$ and placed him below a long line of aeons or angels. They did it with words of praise for Christ as those do now who teach Christ as only the noblest of men. The headship of Christ is the keynote of this Epistle to the Colossians and the heart of Paul's Christology.

From whom ( $\varepsilon \xi \mathrm{ov}$ ). Masculine ablative rather than $\varepsilon \xi \eta \zeta(\kappa \varepsilon \varphi \alpha \lambda \eta \zeta)$ because Christ is the Head. He develops the figure of the body of which Christ is Head (1:18,24).

Being supplied ( $\varepsilon \pi \iota \chi \circ \rho \eta \gamma \circ \cup \mu \varepsilon v o v$ ). Present passive participle (continuous action) of $\varepsilon \pi ⿺ \chi \circ \rho \eta \gamma \varepsilon \omega$, for which interesting verb see already 2Co 9:10; Ga 3:5 and further 2Pe 1:5.

Knit together ( $\sigma \sim \nu \beta ß \beta \alpha \zeta \rho \mu v o v$ ). Present passive participle also (continuous action) of $\sigma \cup v \beta \iota \beta \alpha \zeta \omega$, for which see $\operatorname{Col}$ 2:2 .

Through the joints ( $\delta \iota \alpha \tau \omega \nu \alpha \varphi \omega v$ ). Late word $\alpha \varphi \eta$ (from $\alpha \pi \tau \omega$, to fasten together), connections (junctura and nexus in the Vulgate).

And bonds ( $\kappa \alpha \sigma u v \delta \varepsilon \sigma \mu \omega v$ ). Old word from $\sigma u v \delta \varepsilon \omega$, to bind together. Aristotle and Galen use it of the human body. Both words picture well the wonderful unity in the body by cells, muscles, arteries, veins, nerves, skin, glands, etc. It is a marvellous machine working together under the direction of the head.

Increaseth with the increase of God ( $\alpha \cup \xi \varepsilon \tau \eta \nu \alpha \cup \xi \eta \sigma \tau \nu$ tov $\theta \varepsilon o v$ ). Cognate accusative ( $\alpha v \xi \eta \sigma \iota v$ ) with the old verb $\alpha v \xi \varepsilon$.

Col 2:20

If ye died ( $\varepsilon \alpha \pi \varepsilon Ө \alpha v \varepsilon \tau \varepsilon$ ). Condition of the first class, assumed as true, $\varepsilon$ and second aorist active indicative of $\alpha \pi \sigma \theta v \eta \sigma \kappa \omega$, to die. He is alluding to the picture of burial in baptism (2:12).

As though living in the world ( $\omega \varsigma \zeta \omega \nu \tau \varepsilon \varsigma \varepsilon \nu \kappa \circ \sigma \mu \omega)$. Concessive use of the participle with $\omega \varsigma$. The picture is that of baptism, having come out (F. B. Meyer) on the other side of the grave, we are not to act as though we had not done so. We are in the Land of Beulah.

Why do ye subject yourselves to ordinances? ( $\tau \delta o \gamma \mu \alpha \tau \iota \zeta \varepsilon \sigma \theta \varepsilon$ ?). Late and rare verb (three examples in inscriptions and often in LXX) made from $\delta$ o $\gamma \mu \alpha$, decree or ordinance. Here it makes good sense either as middle or passive. In either case they are to blame since the bond of decrees (2:14) was removed on the Cross of Christ. Paul still has in mind the rules of the ascetic wing of the Gnostics (2:16ff. ).

Col 2:21
Handle not, nor taste, nor touch ( $\mu \eta \alpha \psi \eta \mu \eta \delta \varepsilon \gamma \varepsilon v \sigma \eta \mu \eta \delta \varepsilon \theta(\gamma \eta \vdash)$ ). Specimens of Gnostic rules. The Essenes took the Mosaic regulations and carried them much further and the Pharisees demanded ceremonially clean hands for all food. Later ascetics (the Latin commentators Ambrose, Hilary, Pelagius) regard these prohibitions as Paul's own instead of those of the Gnostics condemned by him. Even today men are finding that the noble prohibition law needs enlightened instruction to make it effective. That is true of all law. The Pharisees, Essenes, Gnostics made piety hinge on outward observances and rules instead of inward conviction and principle. These three verbs are all in the aorist subjunctive second person singular with $\mu \eta$, a prohibition against handling or touching these forbidden things. Two of them do not differ greatly in meaning. Нa $\eta \eta$ is aorist middle subjunctive of $\alpha \pi \tau \omega$, to fasten to, middle, to cling to, to handle. $\Theta \iota \eta \eta\llcorner\varsigma$ is second aorist active subjunctive of $\theta \mathrm{l} \gamma \gamma a v \omega$, old verb, to touch, to handle. In N.T. only here and Heb 11:28; 12:20. Гعvбך is second aorist middle subjunctive of $\gamma \varepsilon \cup \omega$, to give taste of, only middle in N.T. to taste as here.

Col 2:22
Are to perish with the using ( ( $\sigma \tau \iota v \varepsilon ા \varsigma \varphi \theta$ opav $\tau \eta \alpha \pi о \chi \rho \eta \sigma \varepsilon)$. Literally, "are for perishing in the using." ФӨo $\alpha \alpha$ (from $\varphi \theta \varepsilon \iota \rho \omega$ ) is old word for decay, decomposition. Aтох $\rho \eta \sigma \iota \varsigma$ (from $\alpha \pi о х \rho \alpha о \mu \alpha$, to use to the full, to use up), late and rare word (in Plutarch), here only in N.T. Either locative case here or instrumental. These material things all perish in the use of them. Col 2:23

Which things ( $\alpha \tau \imath v \alpha$ ). "Which very things," these ascetic regulations.
Have indeed a show of wisdom ( $\varepsilon \sigma \tau \iota v \lambda o \gamma o v \mu \varepsilon v \varepsilon \chi \circ v \tau \alpha \sigma о \varphi \iota \varsigma)$ ). Periphrastic present indicative with $\varepsilon \sigma \tau \iota v$ in the singular, but present indicative $\varepsilon \chi \circ \vee \tau \alpha$ in the plural ( $\alpha \tau \imath \alpha$ ). $\Lambda o \gamma o v$ oopıac is probably "the repute of wisdom" (Abbott) like Plato and Herodotus. Mev (in deed) has no corresponding $\delta \varepsilon$.

In will-worship ( $\varepsilon v \varepsilon \theta \varepsilon \lambda о \theta \rho \eta \sigma \kappa \kappa \alpha)$. This word occurs nowhere else and was probably coined by Paul after the pattern of $\varepsilon \theta \varepsilon \lambda o \delta o u \lambda \varepsilon ı a$, to describe the voluntary worship of angels (see 2:18).

And humility ( $\kappa \alpha$ талєıvoчробטvף). Clearly here the bad sense, "in mock humility."
And severity to the body ( $\kappa \alpha \alpha \varphi \varepsilon \iota \delta \iota \alpha \sigma \omega \mu \alpha \tau \sigma \varsigma)$. Old word (Plato) from $\alpha \varphi \varepsilon \iota \delta \eta \varsigma$, unsparing ( $\alpha$ privative, $\varphi \varepsilon \iota \delta \rho \mu \alpha$, to spare). Here alone in N.T. Ascetics often practice flagellations and other hardnesses to the body.

Not of any value (ovk $\varepsilon v \tau \mu \eta \tau \tau v$ ). T $\mu \eta$ usually means honour or price.
Against the indulgence of the flesh ( $\pi \rho \circ \varsigma \pi \lambda \eta \sigma \mu \circ \nu \eta \nu \tau \eta \varsigma \sigma \alpha \rho \kappa о \varsigma$ ). These words are sharply debated along with $\tau \mu \eta$ just before. It is not unusual for $\pi \rho o \varsigma$ to be found in the sense of "against" rather than "with" or "for." See $\pi \rho o s$ in sense of
against in 3:13; Eph 6:11f.; 2Co 5:12; 1Co 6:1 . П $\lambda \eta \sigma \mu \circ \nu \eta$ is an old word from $\pi \mu \mu \pi \eta \mu$, to fill and means satiety. It occurs here only in the N.T. Peake is inclined to agree with Hort and Haupt that there is a primitive corruption here. But the translation in the Revised Version is possible and it is true that mere rules do not carry us very far in human conduct as every father or mother knows, though we must have some regulations in family and state and church. But they are not enough of themselves.

## Colossians 3

Col 3:1
If then ye were raised together with Christ ( $\varepsilon$ ouv $\sigma v v \eta \gamma \varepsilon \rho \theta \eta \tau \varepsilon \tau \omega$ X $\rho \iota \sigma \tau \omega$ ). Condition of the first class, assumed as true, like that in 2:20 and the other half of the picture of baptism in 2:12 and using the same form $\sigma v v \eta \gamma \varepsilon \rho \theta \eta \tau \varepsilon$ as then which see for the verb $\sigma \cup v \varepsilon \gamma \varepsilon \rho \omega$. Associative instrumental case of X $\rho \circ \sigma \tau \omega$.

The things that are above ( $\tau \alpha \alpha v \omega$ ). "The upward things" (cf. Php 3:14), the treasure in heaven (Mt 6:20). Paul gives this ideal and goal in place of merely ascetic rules.

Seated on the right hand of God ( $\varepsilon v \delta \varepsilon \xi ı \alpha$ тov $\theta \varepsilon o v ~ к \alpha \theta \eta \mu \varepsilon v o \varsigma) . ~ N o t ~ p e r i p h r a s t i c ~ v e r b, ~$ but additional statement. Christ is up there and at God's right hand. Cf. 2:3.

Col 3:2
Set your mind on ( $\varphi$ poveıt ). "Keep on thinking about." It does matter what we think and we are responsible for our thoughts.

Not on the things that are upon the earth ( $\mu \eta \tau \alpha \varepsilon \pi \tau \eta \varsigma \gamma \eta \varsigma$ ). Paul does not mean that we should never think the things upon the earth, but that these should not be our aim, our goal, our master. The Christian has to keep his feet upon the earth, but his head in the heavens. He must be heavenly-minded here on earth and so help to make earth like heaven.

Col 3:3
For ye died ( $\alpha \pi \varepsilon$ Өavet $\gamma \alpha \rho$ ). Definite event, aorist active indicative, died to $\sin$ (Ro 6:2).

Is hid ( $\kappa \varepsilon \kappa \rho \cup \pi \tau \alpha$ ). Perfect passive indicative of $\kappa \rho \cup \pi \tau \omega$, old verb, to hide, remains concealed, locked "together with" ( $\sigma v v$ ) Christ, "in" ( $\varepsilon v$ ) God. No hellish burglar can break that combination.

Col 3:4
When Christ shall be manifested (o $\tau \alpha v$ o X $\rho ı \sigma \tau o \varsigma ~ \varphi \alpha v \varepsilon \rho \omega \theta \eta$ ). Indefinite temporal clause with otav and the first aorist passive subjunctive of $\varphi a v \varepsilon \rho o \omega$, "whenever Christ is manifested," a reference to the second coming of Christ as looked for and longed for, but wholly uncertain as to time. See this same verb used of the second coming in 1Jo 3:2 .

Ye also together with him ( $\kappa \alpha \cup \mu \varepsilon \varsigma \varsigma ~ \sigma u v ~ \alpha \nu \tau \omega)$. That is the joy of this blessed hope. He repeats the verb about us $\varphi a v \varepsilon \rho \omega \theta \eta \sigma \varepsilon \sigma \theta \varepsilon$ (future passive indicative) and adds $\varepsilon v \delta o \xi \eta$ (in glory). Not to respond to this high appeal is to be like Bunyan's man with the muck-rake.

Col 3:5
Mortify ( $\nu \varepsilon \kappa \rho \omega \sigma \alpha \tau \varepsilon$ ). First aorist active imperative of $\nu \varepsilon \kappa \rho o \omega$, late verb, to put to death, to treat as dead. Latin Vulgate mortifico, but "mortify" is coming with us to mean putrify. Paul boldly applies the metaphor of death (2:20; 3:3) pictured in baptism (2:12) to the actual life of the Christian. He is not to go to the other Gnostic extreme of license on the plea that the soul is not affected by the deeds of the body. Paul's idea is that the body is the temple
of the Holy Spirit (1Co 6:19). He mentions some of these "members upon the earth" like fornication ( $\pi$ о $\rho v \varepsilon \iota \alpha v$ ), uncleanness ( $\alpha \kappa \alpha \theta \alpha \rho \sigma \iota \alpha v$ ), passion ( $\pi \alpha \theta$ oৎ), evil desire ( $\varepsilon \pi \iota \theta \nu \mu ı \alpha v$ $\kappa \alpha \kappa \eta v)$, covetousness ( $\pi \lambda \varepsilon \sigma v \varepsilon \xi \iota \alpha v$ ) "the which is idolatry" ( $\eta \tau \iota \varsigma \varepsilon \sigma \tau \iota v \varepsilon \varepsilon \delta \omega \lambda 0 \lambda \alpha \tau \rho \iota \alpha)$. See the longer list of the works of the flesh in Gal 5:19-21, though covetousness is not there named, but it is in Eph 4:19; 5:5.

Col 3:6
Cometh the wrath of God ( $\varepsilon \rho \chi \varepsilon \tau \alpha \eta$ opү $\eta$ tov $\theta \varepsilon o v$ ). Paul does not regard these sins of the flesh as matters of indifference, far otherwise. Many old MSS. do not have "upon the sons of disobedience," genuine words in Eph 5:6.

Col 3:7
Walked aforetime ( $\pi \varepsilon \rho \iota \pi \alpha \tau \eta \sigma \alpha \tau \varepsilon \pi о \tau \varepsilon$ ). First aorist (constative) indicative referring to their previous pagan state.

When ye lived (o $\tau \varepsilon \varepsilon \zeta \eta \tau \varepsilon$ ). Imperfect active indicative of $\zeta \alpha \omega$, to live, "ye used to live" (customary action). Sharp distinction in the tenses.

Col 3:8
But now ( $v u v \delta \varepsilon$ ). Emphatic form of $v v v$ in decided contrast (to $\pi \sigma \tau \varepsilon$ in verse 7 ) in the resurrection life of 2:12; 3:1.

Put ye also away ( $\alpha \pi \mathrm{\sigma} \theta \varepsilon \sigma \theta \varepsilon \kappa \alpha \nu \mu \varepsilon \iota \varsigma)$. Second aorist middle imperative of old verb $\alpha \pi о \tau ө \theta \eta \mu$, to put away, lay aside like old clothes. This metaphor of clothing Paul now uses with several verbs ( $\alpha \pi \circ \theta \varepsilon \sigma \theta \varepsilon$ here, $\alpha \pi \varepsilon \kappa \delta \nu \sigma \alpha \mu \varepsilon v o$ in verse $9, \varepsilon v \delta v \sigma \alpha \mu \varepsilon v o$ in verse 10 , $\varepsilon v \delta v \sigma a \sigma \theta \varepsilon$ in verse 12).

All these ( $\tau \alpha \pi \alpha \nu \tau \alpha$ ). The whole bunch of filthy rags (anger op $\eta \eta \nu$, wrath $\theta \nu \mu o \nu$, malice какı $\alpha$, , railing $\beta \lambda \alpha \sigma \varphi \eta \mu \iota \nu$, shameful speaking $\alpha \iota \sigma \chi \rho о \lambda о \gamma \iota \alpha v)$. See somewhat similar lists of vices in Col 3:5; Ga 5:20; Eph 4:29-31. These words have all been discussed except aıбхро $\quad$ oүıav, an old word for low and obscene speech which occurs here only in the N.T. It is made from aıбхро入оүоৎ ( $\alpha \iota \sigma \chi \rho \circ \varsigma$ as in 1Co 11:6 and that from aıбооৎ, disgrace). Note also the addition of "out of your mouth" ( $\varepsilon \kappa$ tov $\sigma \tau о \mu \alpha \tau \circ \varsigma ~ \nu \mu \omega v$ ). The word was used for both abusive and filthy talk and Lightfoot combines both ideas as often happens. Such language should never come out of the mouth of a Christian living the new life in Christ.

Col 3:9
Lie not to another ( $\mu \eta \psi \varepsilon v \delta \varepsilon \sigma \theta \varepsilon \varepsilon ı \varsigma \alpha \lambda \lambda \eta \lambda o u \varsigma)$. Lying ( $\psi \varepsilon v \delta o \varsigma)$ could have been included in the preceding list where it belongs in reality. But it is put more pointedly thus in the prohibition ( $\mu \eta$ and the present middle imperative). It means either "stop lying" or "do not have the habit of lying."

Seeing that ye have put off ( $\alpha \pi \varepsilon \kappa \delta v \sigma \alpha \mu \varepsilon v o$ ). First aorist middle participle (causal sense of the circumstantial participle) of the double compound verb $\alpha \pi \varepsilon \kappa \delta v o \mu \alpha$, for which see 2:15. The $\alpha \pi 0$ has the perfective sense (wholly), "having stripped clean off." The same metaphor as $\alpha \pi 0 \theta \varepsilon \sigma \theta \varepsilon$ in verse 8 .

The old man ( $\tau 0 v \pi \alpha \lambda \alpha ı v \alpha \nu \theta \rho \omega \pi \sigma v$ ). Here Paul brings in another metaphor (mixes his metaphors as he often does), that of the old life of sin regarded as "the ancient man" of sin already crucified (Ro 6:6) and dropped now once and for all as a mode of life (aorist tense). See same figure in Eph 4:22. Пa入aoc is ancient in contrast with veoc (young, new) as in Mt 9:17 or кaivoc (fresh, unused) as in Mt 13:52.

With his doings ( $\sigma \cup \vee \tau \alpha ı \varsigma ~ \pi \rho \alpha \xi \varepsilon \sigma ı v ~ a v \tau o v) . ~ P r a c t i c e ~ m u s t ~ s q u a r e ~ w i t h ~ p r o f e s s i o n . ~$
Col 3:10
And have put on ( $\kappa \alpha \varepsilon v \delta v \sigma \alpha \mu \varepsilon v o$ ). First aorist middle participle (in causal sense as before) of $\varepsilon v \delta v v \omega$, old and common verb (Latin induo, English endue) for putting on a garment. Used of putting on Christ (Ga 3:27; Ro 13:14 ).

The new man ( $\tau 0 \nu v \varepsilon \sigma v$ ). "The new (young as opposed to old $\pi \alpha \lambda \alpha \iota \sigma$ ) man" (though $\alpha v \theta \rho \omega \pi o v$ is not here expressed, but understood from the preceding phrase). In Eph 4:24 Paul has $\varepsilon v \delta v \sigma \alpha \sigma \theta \alpha$ tov кaivov (fresh as opposed to worn out) $\alpha v \theta \rho \omega \pi$ то.

Which is being renewed ( $\tau о v$ avakaıvov $\mu \varepsilon v o v$ ). Present passive articular participle of avakaivo $\omega$. Paul apparently coined this word on the analogy of avaveoua. Avakaıvi $\zeta \omega$ already existed (Heb 6:6). Paul also uses avakaıvตбıc (Ro 12:2; Tit 3:5) found nowhere before him. By this word Paul adds the meaning of kaıvos to that of $v \varepsilon o \varsigma ~ j u s t ~ b e f o r e . ~ I t ~ i s ~ a ~$ continual refreshment (kaıvoc) of the new (veoc, young) man in Christ Jesus.

Unto knowledge ( $\varepsilon ı \varsigma \pi \iota \gamma v \omega \sigma \iota v)$. "Unto full (additional) knowledge," one of the keywords in this Epistle.

After the image ( $\kappa \alpha \tau^{\prime} \varepsilon \operatorname{\varepsilon \kappa ov\alpha ).~An~allusion~to~Ge~1:26,28.~The~restoration~of~the~image~}$ of God in us is gradual and progressive (2Co 3:18 ), but will be complete in the final result (Ro 8:29; 1Jo 3:2 ).

Col 3:11
Where (orov). In this "new man" in Christ. Cf. Ga 3:28.
There cannot be (ouk $\varepsilon v$ ). Ev is the long (original) form of $\varepsilon v$ and $\varepsilon \sigma \tau \tau v$ is to be understood. "There does not exist." This is the ideal which is still a long way ahead of modern Christians as the Great War proved. Race distinctions (Greek H $\Sigma \lambda \lambda \eta \nu$ and Jew Iov $\delta a \circ o \varsigma$ ) disappear in Christ and in the new man in Christ. The Jews looked on all others as Greeks (Gentiles). Circumcision ( $\pi \varepsilon \rho \iota \tau \circ \mu \eta$ ) and uncircumcision ( $\alpha \kappa \rho \circ \beta \cup \sigma \tau \iota \alpha$ ) put the Jewish picture with the cleavage made plainer (cf. Eph 2 ). The Greeks and Romans regarded all others as barbarians ( $\beta a \rho \beta \alpha \rho o$, Ro 1:14), users of outlandish jargon or gibberish, onomatopoetic repetition ( $\beta \alpha \rho-\beta \alpha \rho$ ).

A Scythian ( $\Sigma \kappa \cup Ө \eta \varsigma)$ was simply the climax of barbarity, bar-baris barbariores (Bengel), used for any rough person like our "Goths and Vandals."

Bondman ( $\delta o u \lambda o \varsigma, ~ f r o m ~ \delta \varepsilon \omega$, to bind),
freeman ( $\varepsilon \lambda \varepsilon v \theta \varepsilon \rho \circ \varsigma$, from $\varepsilon \rho \chi \circ \mu \alpha$, to go). Class distinctions vanish in Christ. In the Christian churches were found slaves, freedmen, freemen, masters. Perhaps Paul has

Philemon and Onesimus in mind. But labour and capital still furnish a problem for modern Christianity.

But Christ is all ( $\alpha \lambda \lambda \alpha \pi \alpha v \tau \alpha$ Xpıбтo¢). Demosthenes and Lucian use the neuter plural to describe persons as Paul does here of Christ. The plural $\pi \alpha \nu \tau \alpha$ is more inclusive than the singular $\pi \alpha v$ would be.

And in all ( $\kappa \alpha \varepsilon v \pi \alpha \sigma เ v)$. Locative plural and neuter also. "Christ occupies the whole sphere of human life and permeates all its developments" (Lightfoot). Christ has obliterated the words barbarian, master, slave, all of them and has substituted the word $\alpha \delta \varepsilon \lambda \varphi o$, (brother).

Col 3:12
Put on therefore ( $\varepsilon v \delta v \sigma \alpha \sigma \theta \varepsilon o u v)$. First aorist middle imperative of $\varepsilon v \delta u v \omega$ (verse 10). He explains and applies (ovv therefore) the figure of "the new man" as "the new garment."

As God's elect ( $\omega \varsigma \varepsilon \kappa \lambda \varepsilon \kappa \tau \frac{1}{}$ tov $\left.\theta \varepsilon o v\right)$ ). Same phrase in Ro 8:33; Tit 1:1 . In the Gospels a distinction exists between $\kappa \lambda \eta \tau \circ \varsigma$ and $\varepsilon \kappa \lambda \varepsilon \kappa \tau \circ \varsigma$ (Mt 24:22,24,31 ), but no distinction appears in Paul's writings. Here further described as "holy and beloved" (aүı ка $\eta \gamma \alpha \pi \eta \mu \varepsilon v o$ ). The items in the new clothing for the new man in Christ Paul now gives in contrast with what was put off (3:8). The garments include a heart of compassion ( $\sigma \pi \lambda \alpha \gamma \chi \vee \alpha$ oוкть $\rho \mu$ оv, the nobler viscera as the seat of emotion as in Lu 1:78; Php 1:8), kindness ( $\chi \rho \eta \sigma \tau о \tau \eta \tau \alpha$, as in $\mathrm{Ga} 5: 22$ ), humility ( $\tau \alpha \pi \varepsilon เ v o \varphi \rho о \sigma \nu v \eta \nu$, in the good sense as in Php 2:3), meekness ( $\pi \rho \alpha \nu \tau \eta \tau \alpha$, in Ga 5:23 and in Eph 4:2 also with $\tau \alpha \pi \varepsilon ı v o \varphi \rho o \sigma v v \eta$ ), long-suffering ( $\mu \alpha \kappa \rho о \theta \nu \mu \propto \nu$, in Ga 5:22; Col 1:11; Jas 5:10).

Col 3:13
Forbearing one another ( $\alpha v \varepsilon \chi \circ \mu \varepsilon v o \alpha \lambda \lambda \eta \lambda \omega v$ ). Present middle (direct) participle of $\alpha v \varepsilon \chi \omega$ with the ablative case ( $\alpha \lambda \lambda \eta \lambda \omega v$ ), "holding yourselves back from one another."
 with the dative case of the reflexive pronoun (عautoıs) instead of the reciprocal just before ( $\alpha \lambda \lambda \eta \lambda \omega v$ ).

If any man have ( $\varepsilon \alpha v \tau \iota \varsigma \varepsilon \chi \eta$ ). Third class condition ( $\varepsilon \alpha v$ and present active subjunctive of $\varepsilon \chi \omega)$.

Complaint ( $\mu \circ \mu \varphi \eta \nu$ ). Old word from $\mu \varepsilon \mu \varphi \rho \mu \alpha$, to blame. Only here in N.T. Note $\pi \rho o \varsigma$ here with $\tau ו v \alpha$ in the sense of against for comparison with $\pi \rho \circ \varsigma$ in 2:31.
 forgiveness of us is here made the reason for our forgiveness of others. See Mt 6:12,14f. where our forgiveness of others is made by Jesus a prerequisite to our obtaining forgiveness from God.

Col 3:14
And above all these things ( $\varepsilon \pi \pi \alpha \sigma v \nu \varepsilon$ tov $\pi о ぃ)$. "And upon all these things."

Put on love（ $\tau \eta v$ a $\gamma a \pi \eta v$ ）．See Lu 3：20．The verb has to be supplied（ $\varepsilon v \delta v \sigma a \sigma \theta \varepsilon$ ）from verse 12 as the accusative case $\alpha \gamma \alpha \pi \eta v$ shows．

Which is（o eб兀ıv）．Neuter singular of the relative and not feminine like $\alpha \gamma \alpha \pi \eta$（the antecedent）nor masculine like $\sigma 0 v \delta \varepsilon \sigma \mu \circ \varsigma$ in the predicate．However，there are similar ex－ amples of o عбтiv in the sense of quod est（id est），＂that is，＂in Mr 14：42；15：42，without agreement in gender and number．So also Eph 5：5 where o $\varepsilon \sigma \tau \iota v=$＂which thing．＂

The bond of perfectness（ $\sigma u v \delta \varepsilon \sigma \mu \circ \varsigma \tau \eta \varsigma \tau \varepsilon \lambda \varepsilon เ o \tau \eta \tau \circ \varsigma)$ ．See 2：19 for $\sigma u v \delta \varepsilon \sigma \mu \circ \varsigma$. Here it is apparently the girdle that holds the various garments together．The genitive（ $\tau \varepsilon \lambda \varepsilon ⿺ 𠃊 \tau \eta \tau \circ \varsigma)$ is probably that of apposition with the girdle of love．In a succinct way Paul has here put the idea about love set forth so wonderfully in 1Co 13 ．

Col 3：15
The peace of Christ（ $\eta \varepsilon \iota \rho \eta \nu \eta$ tov Xpıбтov）．The peace that Christ gives（Joh 14：27）．
Rule（ $\beta \rho \alpha \beta \varepsilon v \varepsilon \tau \omega$ ）．Imperative active third singular of $\beta \rho \alpha \beta \varepsilon v \omega$ ，to act as umpire （ $\beta \rho \alpha \beta \varepsilon \cup \varsigma)$ ，old verb，here alone in N．T．See 1Co 7：15 for called in peace．

In one body（ $\varepsilon v \varepsilon v \sigma \omega \mu \alpha \tau)$ ．With one Head（Christ）as in 1：18，24 ．
Be ye thankful（ $\varepsilon \cup \chi \alpha \rho ı \sigma \tau o ~ \gamma ı v \varepsilon \sigma \theta \varepsilon)$ ）＂Keep on becoming thankful．＂Continuous oblig－ ation．

Col 3：16
The word of Christ（o $\begin{gathered}\text { дoүos tov Xpıбтov）．This precise phrase only here，though＂the }\end{gathered}$ word of the Lord＂in 1Th $1: 8 ; 4: 15 ; 2$ Th 3：1 ．Elsewhere＂the word of God．＂Paul is exalting Christ in this Epistle．Xpıбтov can be either the subjective genitive（the word delivered by Christ）or the objective genitive（the word about Christ）．See 1Jo 2：14 ．

Dwell（عvoוкยıt $\omega$ ）．Present active imperative of $\varepsilon v o ו \kappa \varepsilon \omega$ ，to make one＇s home，to be at home．

Richly（ $\pi \lambda$ ova $\omega \varsigma$ ）．Old adverb from $\pi \lambda$ ovotoৎ（rich）．See 1Ti 6：17．The following words explain $\pi \lambda$ ovo $\omega \varsigma$ ．

In all wisdom（ $\varepsilon v \pi \alpha \sigma \eta \sigma 0 \varphi เ \alpha)$ ．It is not clear whether this phrase goes with $\pi \lambda$ ovolw $\varsigma$ （richly）or with the participles following（ $\delta \delta \alpha$ ккоขтєऽ ка vouӨعтоиขтєऽ，see 1：28）．Either punctuation makes good sense．The older Greek MSS．had no punctuation．There is an anacoluthon here．The participles may be used as imperatives as in Ro 12：11f．， 16 ．

With psalms（ $\psi \alpha \lambda \mu o \kappa$, the Psalms in the Old Testament originally with musical accom－ paniment），
hymns（v $\mu v o \iota \varsigma$ ，praises to God composed by the Christians like 1Ti 3：16），
spiritual songs（ $\omega \iota \delta a \iota \varsigma \pi \nu \varepsilon \cup \mu \alpha \tau \iota \kappa \alpha \iota \varsigma$ ，general description of all whether with or without instrumental accompaniment）．The same song can have all three words applied to it．

Singing with grace ( $\varepsilon v \chi$ 人 $\uparrow \tau$ aı $\delta o v \tau \varepsilon \varsigma$ ). In God's grace (2Co 1:12). The phrase can be taken with the preceding words. The verb $\alpha \iota \delta \omega$ is an old one (Eph 5:19) for lyrical emotion in a devout soul.

In your hearts ( $\varepsilon v \tau \alpha ı \varsigma ~ \kappa \alpha \rho \delta ı a ı \varsigma ~ v \mu \omega v)$. Without this there is no real worship "to God" $(\tau \omega \theta \varepsilon \omega)$. How can a Jew or Unitarian in the choir lead in the worship of Christ as Saviour? Whether with instrument or with voice or with both it is all for naught if the adoration is not in the heart.

Col 3:17
Whatsoever ye do ( $\pi \alpha \vee$ oт $\varepsilon \alpha v \pi o ı \tau \varepsilon$ ). Indefinite relative (everything whatever) with $\varepsilon \alpha v$ and the present active subjunctive, a common idiom in such clauses.

Do all ( $\pi \alpha \nu \tau \alpha$ ). The imperative $\pi о เ \varepsilon \iota \tau \varepsilon$ has to be supplied from $\pi \sigma \nmid \tau \varepsilon$ in the relative clause. Пavта is repeated from $\pi \alpha v$ (singular), but in the plural (all things). П $\alpha v$ is left as a nominative absolute as in Mt 10:32; Lu 12:10 . This is a sort of Golden Rule for Christians "in the name of the Lord Jesus" ( $\varepsilon v$ оvoнat Kvpıov I I $\sigma o v$ ), in the spirit of the Lord Jesus (Eph 5:20). What follows (directions to the various groups) is in this same vein. Sociological problems have always existed. Paul puts his finger on the sore spot in each group with unerring skill like a true diagnostician.

Col 3:18
Wives (ка $ү$ үvаıкєऽ). The article here distinguishes class from class and with the vocative case can be best rendered "Ye wives." So with each group.
 genuine in Eph 5:22, but not here. The verb vлотаббо $\mu \alpha$ has a military air, common in the Koine for such obedience. Obedience in government is essential as the same word shows in Ro 13:1,5 .

As is fitting in the Lord ( $\omega \varsigma \alpha \vee \eta \kappa \varepsilon v \varepsilon v K v \rho \iota \omega$ ). This is an idiomatic use of the imperfect indicative with verbs of propriety in present time (Robertson, Grammar, p. 919). Wives have rights and privileges, but recognition of the husband's leadership is essential to a wellordered home, only the assumption is that the husband has a head and a wise one.

Col 3:19
 That is precisely the point.

Be not bitter ( $\mu \eta \pi \_\kappa \rho \alpha \iota v \varepsilon \sigma \theta \varepsilon$ ). Present middle imperative in prohibition: "Stop being bitter" or "do not have the habit of being bitter." This is the sin of husbands. Пıкрaıv $\omega$ is an old verb from $\pi \kappa \kappa \rho о \varsigma$ (bitter). In N.T. only here and Re 8:11; 10:9f. The bitter word rankles in the soul.

Col 3:20
Obey your parents (vтакоиعte toı $\gamma$ оvevoıv). Old verb to listen under (as looking up), to hearken, to heed, to obey.

In all things (ката $\pi \alpha v \tau \alpha)$. This is the hard part for the child, not occasional obedience, but continual. Surely a Christian father or mother will not make unreasonable or unjust demands of the child. Nowhere does modern civilization show more weakness than just here. Waves of lawlessness sweep over the world because the child was not taught to obey. Again Paul argues that this is "in the Lord" ( $\varepsilon v K v \rho \iota \omega)$.

Col 3:21
Provoke not ( $\mu \eta \varepsilon \rho \varepsilon \theta_{\iota} \zeta \varepsilon \tau \varepsilon$ ). Present imperative of old verb from $\varepsilon \rho \varepsilon \theta \omega$, to excite. Only twice in N.T., here in bad sense, in good sense in 2Co 9:2 (to stimulate). Here it means to nag and as a habit (present tense).

That they be not discouraged ( $v \alpha \mu \eta \alpha \theta v \mu \omega \sigma \tau v$ ). Negative purpose ( $\imath v \alpha \mu \eta$ ) with the present subjunctive (continued discouragement) of $\alpha \theta v \mu \varepsilon \omega$, old verb, but only here in N.T., from $\alpha \theta v \mu \circ \varsigma$ (dispirited, a privative, $\theta v \mu \circ \varsigma$, spirit or courage). One does not have to read Jane Eyre or Oliver Twist to know something of the sorrows of childhood as is witnessed by runaway children and even child suicides.

Col 3:22
Your masters according to the flesh (тоь ката барка кирıоц). "Lords" really, but these Christian slaves ( $\delta o u \lambda o$ ) had Christ as lord, but even so they were to obey their lords in the flesh.

Not with eye-service ( $\mu \eta \varepsilon v o \varphi \theta \alpha \lambda \mu \circ \delta o u \lambda ı a ı \varsigma)$. Another Pauline word (here only and Eph 6:6 ), elsewhere only in Christian writers after Paul, an easy and expressive compound, service while the master's eye was on the slave and no longer.

Men-pleasers ( $\alpha v \theta \rho \omega \pi \alpha \rho \varepsilon \sigma \kappa \sigma$ ). Late compound only in LXX and Paul (here and Eph 6:6).

In singleness of heart ( $\varepsilon v \alpha \pi \lambda o \tau \eta \tau \operatorname{k\alpha \rho } \delta \iota \alpha \varsigma)$. So in Eph 6:5. Old and expressive word from $\alpha \pi \lambda$ ouc (simple, without folds). See 2Co 11:3 .

Fearing the Lord ( $\varphi o ß o v \mu \varepsilon v o$ tov Kvpıov). Rather than the lords according to the flesh.

Col 3:23
Whatsoever ye do (o eav $\pi$ oı $\eta \tau$ ). See same idiom in 3:17 except o instead of $\pi \alpha \nu$ ot.
Heartily ( $\varepsilon \kappa \psi \cup \chi \eta \varsigma$ ). From the soul and not with mere eye service. In Eph 6:7 Paul adds $\mu \varepsilon \tau^{\prime}$ عvvooac (with good will) in explanation of $\varepsilon \kappa \psi \cup \chi \eta \varsigma$.

As unto the Lord ( $\omega \varsigma \tau \omega \mathrm{K} v \rho \omega \omega$ ). Even when unto men. This is the highest test of worthwhile service. If it were only always true!

Col 3:24
Ye shall receive ( $\alpha \pi о \lambda \eta \mu \psi \varepsilon \sigma \theta \varepsilon$ ). Future middle indicative of $\alpha \pi о \lambda \alpha \mu \beta \alpha v \omega$, old verb, to get back ( $\alpha \pi 0$ ), to recover.

The recompense ( $\alpha v \tau \alpha \pi o \delta o \sigma i v$ ). "The full recompense," old word, in LXX, but only here in N.T., but $\alpha v \tau \alpha \pi о \delta o \mu \alpha$ twice (Lu 14:12; Ro 11:9 ). Given back ( $\alpha \pi 0$ ) in return ( $\alpha v \tau$ ).

Ye serve the Lord Christ ( $\tau 0 \mathrm{Kv} \mathrm{\rho ı} \mathrm{\omega} \mathrm{X} \mathrm{\rho ı} \mathrm{\sigma} \mathrm{\tau} \mathrm{\omega} \delta o u \lambda \varepsilon v \varepsilon \tau \varepsilon$ ). As his slaves and gladly so. Perhaps better as imperatives, keep on serving.

Col 3:25
Shall receive again for the wrong that he hath done (конобєта о $\eta \delta \iota \kappa \eta \sigma \varepsilon v$ ). It is not clear whether o $\alpha \delta \iota \kappa \omega \nu$ (he that doeth wrong) is the master or the slave. It is true of either and Lightfoot interprets it of both, "shall receive back the wrong which he did." This is a general law of life and of God and it is fair and square.

There is no respect of persons (ovk عбтıv $\pi \rho \circ \sigma \omega \pi$ о $\lambda \eta \mu \psi i \alpha$ ). There is with men, but not with God. For this word patterned after the Hebrew see Ro 2:11; Eph 6:9; Jas 2:1 The next verse should be in this chapter also.

## Colossians 4

Col 4:1
That which is just and equal ( $\tau \boldsymbol{\delta} \delta \kappa \alpha \iota v \kappa \alpha \tau \eta \nu \iota \sigma о \tau \eta \tau \alpha$ ). Paul changes from to เбov (like to $\delta$ เкaıov, neuter singular adjective with article for abstract idea) to the abstract substantive เซoזท५, old word, in N.T. only here and 2Co 8:13f. If employers always did this, there would be no labour problem.

A Master in heaven (Kupıov $\varepsilon v \operatorname{ov\rho av\omega }$ ). A wholesome reminder to the effect that he keeps his eye on the conduct of masters of men here towards their employees.

Col 4:2
Continue steadfastly ( $\pi \rho о \sigma к \alpha \rho \tau \varepsilon \rho \varepsilon \iota \tau \varepsilon)$. See Mr 3:9; Ac 2:42,46 for this interesting word from $\pi \rho \circ \varsigma$ and карт $\varepsilon \rho \circ \varsigma$ (strong), common in the Koine.

Watching ( $\gamma \rho \eta \gamma$ оооиvtє¢). Present active participle of $\gamma \rho \eta \gamma \circ \rho \varepsilon \omega$, late present made on perfect active stem $\varepsilon \gamma \rho \eta \gamma \circ \rho \alpha$ with loss of $\varepsilon$-, found first in Aristotle.

Col 4:3
Withal ( $\alpha \mu \alpha$ ). At the same time.
That God may open (ıva o $\theta \varepsilon o \varsigma ~ \alpha v o i \xi \eta$ ). Common use of iva and the subjunctive (aorist), the sub-final use so common in the N.T. as in the Koine.

A door for the word ( $\theta$ vpav rov $\lambda o \gamma o v$ ). Objective genitive, a door for preaching. It is comforting to other preachers to see the greatest of all preachers here asking prayer that he may be set free again to preach. He uses this figure elsewhere, once of a great and open door with many adversaries in Ephesus (1Co 16:9), once of an open door that he could not enter in Troas (2Co 2:12).
 mystery which is Christ ( 2:2), one that puts out of comparison the foolish "mysteries" of the Gnostics.

For which I am also in bonds ( $\delta \iota^{\prime}$ o к $\alpha \delta \varepsilon \delta \varepsilon \mu \alpha$ ). Perfect passive indicative of $\delta \varepsilon \omega$. Paul is always conscious of this limitation, this chain. At bottom he is a prisoner because of his preaching to the Gentiles.

Col 4:4
As I ought to speak ( $\omega \varsigma \delta \varepsilon \mu \varepsilon \lambda \alpha \lambda \eta \sigma \alpha$ ). Wonderful as Paul's preaching was to his hearers and seems to us, he was never satisfied with it. What preacher can be?

Col 4:5
Toward them that are without ( $\pi \rho \circ \varsigma \tau о \cup \varsigma \xi \omega)$ ). A Pauline phrase for those outside the churches (1Th 5:12; 1Co 5:12f. ). It takes wise walking to win them to Christ.

Redeeming the time ( $\tau 0 v \kappa \alpha \iota \rho о \nu \varepsilon \xi \alpha \gamma о \rho \alpha \zeta о \mu \varepsilon v o$ ). We all have the same time. Paul goes into the open market and buys it up by using it rightly. See the same metaphor in Eph 5:16.

## Col 4:6

Seasoned with salt ( $\alpha \lambda \alpha \tau \eta \rho \tau v \mu \varepsilon v o \varsigma)$. The same verb $\alpha \rho \tau v \omega$ (old verb from $\alpha \iota \rho \omega$, to fit, to arrange) about salt in Mr 9:50; Lu 14:34. Nowhere else in the N.T. Not too much salt, not too little. Plutarch uses salt of speech, the wit which flavours speech (cf. Attic salt). Our word salacious is this same word degenerated into vulgarity. Grace and salt (wit, sense) make an ideal combination. Every teacher will sympathize with Paul's desire "that ye know how ye must answer each one" ( $\varepsilon \iota \delta \varepsilon v \alpha \pi \omega \varsigma \delta \varepsilon v \mu \alpha \varsigma \varepsilon \nu \varepsilon \kappa \alpha \sigma \tau \omega$ a $\pi$ окрıv $\sigma \sigma \alpha$ ). Who does know?

Col 4:7
All my affairs ( $\tau \alpha \kappa \alpha \tau^{\prime} \varepsilon \mu \varepsilon \pi \alpha \nu \tau \alpha$ ). "All the things relating to me." The accusative case the object of $\gamma v \omega \rho \iota \sigma \varepsilon$. The same idiom in Ac 25:14; Php 1:2 .

Tychicus (Tuхıкоя). Mentioned also in Eph 6:21 as the bearer of that Epistle and with the same verb $\gamma \nu \omega \rho \iota \sigma \varepsilon$ (future active of $\gamma \nu \omega \rho \iota \zeta \omega$ ) and with the same descriptive epithet as here (o $\alpha \gamma \alpha \pi \eta \tau о \varsigma ~ \alpha \delta \varepsilon \lambda \varphi о \varsigma к \alpha \pi \iota \sigma \tau о \varsigma ~ \delta ı \alpha \kappa о v o \varsigma ~ \varepsilon \nu ~ К v \rho ı \omega$, the beloved brother and faithful minister in the Lord) except that here we have also кa $\sigma u v \delta o u \lambda o c$ (and fellow-servant). Abbott suggests that Paul adds $\sigma v v \delta o u \lambda o \varsigma$ because he had used it of Epaphras in 1:7. Perhaps mıбтoৎ goes with both substantives and means faithful to Paul as well as to Christ.

Col 4:8
I have sent $(\varepsilon \pi \varepsilon \mu \psi \alpha)$. Epistolary aorist active indicative of $\pi \varepsilon \mu \pi \omega$ as in Eph 6:22 .
That ye may know ( $\llcorner v \alpha \gamma \nu \omega \tau \varepsilon$ ). Second aorist (ingressive) active subjunctive of $\gamma เ \nu \omega \sigma \kappa \omega$, "that ye may come to know." This the correct text, not $\gamma v \omega$ (third singular).

Our estate ( $\tau \alpha \pi \varepsilon \rho \eta \mu \omega v$ ). "The things concerning us."
May comfort ( $\pi \alpha \rho \alpha к \alpha \lambda \varepsilon \sigma \eta)$. First aorist active subjunctive. Proper rendering here and not "may exhort."

Col 4:9
Together with Onesimus ( $\sigma v \nu \mathrm{O} \nu \eta \sigma \mu \omega)$ ). Co-bearer of the letter with Tychicus and praised on a par with him, runaway slave though he is.

Who is one of you ( $o \varsigma \varepsilon \sigma \tau \iota v \varepsilon \xi \nu \mu \omega v$ ). Said not as a reproach to Colossae for having such a man, but as a privilege to the church in Colossae to give a proper welcome to this returning converted slave and to treat him as a brother as Paul argues to Philemon.

Col 4:10
Aristarchus (Apıбтархоৎ). He was from Thessalonica and accompanied Paul to Jerusalem with the collection (Ac 19:29; 20:4) and started with Paul to Rome (Ac 27:2; Phm 1:24 ). Whether he has been with Paul all the time in Rome we do not know, but he is here now.

My fellow-prisoner (o $\sigma v v a i \chi \mu \lambda \lambda \omega \tau \sigma \varsigma \mu \circ v$ ). One of Paul's compounds, found elsewhere only in Lucian. Paul uses it of Epaphras in Phm 1:23, but whether of actual voluntary imprisonment or of spiritual imprisonment like $\sigma v v \sigma \tau \rho a \tau \iota \omega \tau \varepsilon \varsigma$ (fellow-soldier) in Php 2:25;

Phm 1:2 we do not know. Abbott argues for a literal imprisonment and it is possible that some of Paul's co-workers ( $\sigma 0 \vee-\varepsilon \rho \gamma 0$ ) voluntarily shared imprisonment with him by turns.

Mark (Маркос). Once rejected by Paul for his defection in the work (Ac 15:36-39), but now cordially commended because he had made good again.

The cousin of Barnabas ( $\boldsymbol{o} \alpha v \varepsilon \psi \iota o \varsigma ~ B \alpha \rho v \alpha \beta \alpha$ ). It was used for "nephew" very late, clearly "cousin" here and common so in the papyri. This kinship explains the interest of Barnabas in Mark (Ac 12:25; 13:5; 15:36-39).

If he come unto you, receive him ( $\varepsilon \alpha v \varepsilon \lambda \theta \eta \pi \rho o \varsigma v \mu \alpha \varsigma \delta \varepsilon \xi \alpha \sigma \theta \varepsilon \alpha v \tau o v$ ). This third class conditional sentence ( $\varepsilon \alpha \nu$ and second aorist active subjunctive of $\varepsilon \rho \chi \circ \mu \alpha)$ gives the substance of the commands (عvto入ac) about Mark already sent, how we do not know. But Paul's commendation of Mark is hearty and unreserved as he does later in 2Ti 4:11. The verb $\delta \varepsilon \chi \circ \mu \alpha$ is the usual one for hospitable reception (Mt 10:14; Joh 4:45) like $\pi \rho o \sigma \delta \varepsilon \chi \circ \mu \alpha$ (Php 2:29) and vтобєхона (Lu 10:38).

Col 4:11
Jesus which is called Justus (I $\eta \sigma o v \varsigma$ о $\lambda \varepsilon \gamma \circ \mu \varepsilon v o \varsigma$ Iovбтоৎ). Another illustration of the frequency of the name Jesus (Joshua). The surname Justus is the Latin Justus for the Greek $\Delta$ เкaios and the Hebrew Zadok and very common as a surname among the Jews. The name appears for two others in the N.T. (Ac 1:23; 18:7).
 not necessarily Judaizers like those so termed in Ac 11:3 (о єк $\pi \varepsilon \rho \iota \tau о \mu \eta \varsigma . ~ C f . ~ A c ~ 35: 1,5 ~) . ~$

These only (ovto $\mu$ ovo). "Of the circumcision" (Jews) he means.
 an old word (here only in N.T.) from $\pi \alpha \rho \eta \gamma \quad \rho \varepsilon \omega$, to make an address) and means solace, relief. A medical term. Curiously enough our word paregoric comes from it ( $\pi \alpha \rho \eta \gamma о \rho є к о \varsigma) . ~$

Col 4:12
Epaphras who is one of you (Елачрац o $\varepsilon \xi \nu \mu \omega v$ ). See 1:7 for previous mention of this brother who had brought Paul news from Colossae.

Always striving for you ( $\pi \alpha \nu \tau \circ \tau \varepsilon \alpha \gamma \omega v \iota \zeta о \mu \varepsilon v \circ \varsigma ~ v \pi \varepsilon \rho \eta \mu \omega v$ ). See 1:29 of Paul.
That ye may stand (ıva o $\sigma \alpha \theta \eta \tau \varepsilon$ ). Final clause, first aorist passive subjunctive (according to Aleph B) rather than the usual second aorist active subjunctives ( $\sigma \tau \eta \tau \varepsilon$ ) of $\iota \sigma \tau \eta \mu$ (according to A C D).

Fully assured ( $\pi \varepsilon \pi \lambda \eta \rho о \varphi о \rho \eta \mu \varepsilon v o$ ). Perfect passive participle of $\pi \lambda \eta \rho о \varphi о \rho \varepsilon \omega$, late compound, for which see Lu 1:1; Ro 14:5.

Col 4:13
And for them in Hierapolis ( $\kappa \alpha \tau \omega v \varepsilon v \mathrm{H} \varepsilon \rho \alpha \Pi о \lambda \varepsilon$ ). The third of the three cities in the Lycus Valley which had not seen Paul's face (2:1). It was across the valley from Laodicea. Probably Epaphras had evangelized all three cities and all were in peril from the Gnostics.

Col 4:14
 1:24; $2 \mathrm{Ti} 4: 11$. The author of the Gospel and the Acts. Both Mark and Luke are with Paul at this time, possibly also with copies of their Gospels with them. The article here (repeated) may mean "my beloved physician." It would seem certain that Luke looked after Paul's health and that Paul loved him. Paul was Luke's hero, but it was not a one-sided affection. It is beautiful to see preacher and physician warm friends in the community.

Demas ( $\Delta \eta \mu a \varsigma$ ). Just his name here (a contraction of Demetrius), but in 2Ti 4:10 he is mentioned as one who deserted Paul.

Col 4:15
Nymphas (Nv $\mu \varphi \alpha v$ ). That is masculine, if avtov (his) is genuine (D E K L) after кат' oוкоv, but $\mathrm{N} \nu \mu \varphi \alpha$ (feminine) if $\alpha \cup \tau \eta \varsigma$ (her) is read (B 67). Aleph A C P read $\alpha \cup \tau \omega \nu$ (their), perhaps including $\alpha \delta \varepsilon \lambda \varphi$ оиৎ (brethren) and so locating this church ( $\varepsilon \kappa \kappa \lambda \eta \sigma \omega \alpha$ ) in Laodicea. It was not till the third century that separate buildings were used for church worship. See Ro 16:5 for Prisca and Aquila. It is not possible to tell whether it is "her" or "his" house here.

Col 4:16
When this epistle hath been read among you (o $\tau \alpha v \alpha v \alpha \gamma v \omega \sigma \theta \eta \pi \alpha \rho^{\prime} v \mu \nu \nu \eta \varepsilon \pi \prime \sigma \tau o \lambda \eta$ ). Indefinite temporal clause with otav (oт $\alpha v$ ) and the first aorist passive subjunctive of $\alpha v \alpha \gamma ı \nu \omega \sigma \kappa \omega$. The epistle was read in public to the church $(\operatorname{Re} 1: 3)$.

Cause that ( $\pi$ oı $\quad \sigma \alpha \tau \varepsilon \operatorname{va}$ ). Same idiom in Joh 11:37; Re 13:15. Old Greek preferred o $\pi \omega$ c for this idiom. See 1Th 5:27 for injunction for public reading of the Epistle.

That ye also read ( $\kappa \alpha \nu \mu \varepsilon \iota \varsigma ~ \alpha v \alpha \gamma v \omega \tau \varepsilon$ ). Second aorist active subjunctive of $\alpha v \alpha \gamma เ \nu \omega \sigma \kappa \omega$, to read.

And the epistle from Laodicea ( $\kappa \alpha \tau \eta \nu \varepsilon \kappa \Lambda \alpha \circ \delta \iota \kappa เ \alpha \varsigma)$. The most likely meaning is that the so-called Epistle to the Ephesians was a circular letter to various churches in the province of Asia, one copy going to Laodicea and to be passed on to Colossae as the Colossian letter was to be sent on to Laodicea. This was done usually by copying and keeping the original. See Eph 1:1 for further discussion of this matter.

Col 4:17
Take heed ( $\beta \lambda \varepsilon \pi \varepsilon$ ). Keep an eye on.
Thou hast received in the Lord ( $\pi \alpha \rho \varepsilon \lambda \alpha \beta \varepsilon \varsigma \varepsilon v K v \rho \omega \omega$ ). Second aorist active indicative of $\pi \alpha \rho \alpha \lambda \alpha \mu \beta \alpha v \omega$, the verb used by Paul of getting his message from the Lord (1Co 15:3). Clearly Archippus had a call "in the Lord" as every preacher should have.

That thou fulfil it (ıva avinv $\pi \lambda \eta \rho o \iota s)$. Present active subjunctive of $\pi \lambda \eta \rho o \omega$, "that thou keep on filling it full." It is a life-time job.

Col 4:18
Of me Paul with mine own hand ( $\tau \eta \varepsilon \mu \eta \chi \varepsilon \iota \rho$ Пau入ov). More precisely, "with the hand of me Paul." The genitive חav
$\varepsilon \mu \eta$, which is itself in the instrumental case agreeing with $\chi \varepsilon ı \rho$. So also 2Th 3:17; 1Co 16:21

My bonds ( $\mu 0 \nu \tau \omega \nu \delta \varepsilon \sigma \mu \omega v$ ). Genitive case with $\mu \nu \varepsilon \mu$ ovevete (remember). The chain ( $\varepsilon v \sim \lambda \nu \sigma \varepsilon$ Eph 6:20) clanked afresh as Paul took the pen to sign the salutation. He was not likely to forget it himself

## FIRST THESSALONIANS

## FROM CORINTH A.D. 50 TO 51

## BY WAY OF INTRODUCTION

We cannot say that this is Paul's first letter to a church, for in 2Th 2:2 he speaks of some as palming off letters as his and in 2Th 3:17 he says that he appends his own signature to every letter after dictating it to an amanuensis (Ro 16:22). We know of one lost letter (1Co $5: 11$ ) and perhaps another (2Co 2:3). But this is the earliest one that has come down to us and it may even be the earliest New Testament book, unless the Epistle of James antedates it or even Mark's Gospel. We know, as already shown, that Paul was in Corinth and that Timothy and Silas had just arrived from Thessalonica (1Th 3:6; Ac 18:5). They had brought supplies from the Macedonian churches to supply Paul's need (2Co 11:9), as the church in Philippi did once and again while Paul was in Thessalonica (Php 4:15f. ). Before Timothy and Silas came to Corinth Paul had to work steadily at his trade as tent-maker with Aquila and Priscilla (Ac 18:3) and could only preach in the synagogue on sabbaths, but the rich stores from Macedonia released his hands and "Paul devoted himself to the word" (бuveıұєтo $\tau \omega \lambda o \gamma \omega$ Пav $\lambda \circ \varsigma$ ). He gave himself wholly to preaching now. But Timothy and Silas brought news of serious trouble in the church in Thessalonica. Some of the disciples there had misunderstood Paul's preaching about the second coming of Christ and had quit work and were making a decided disturbance on the subject. Undoubtedly Paul had touched upon eschatological matters while in Thessalonica. The Jewish leaders at Thessalonica charged it against Paul and Silas to the politarchs that they had preached another king, Jesus, in place of Caesar. Paul had preached Jesus as King of the spiritual kingdom which the Jews misrepresented to the politarchs as treason against Caesar as the Sanhedrin had done to Pilate about Jesus. Clearly Paul had said also that Jesus was going to come again according to his own promise before his ascension. Some asserted that Paul said Jesus was going to come right away and drew their own inferences for idleness and fanaticism as some do today. Strange as it may seem, there are scholars today who say that Paul did believe and say that Jesus was going to come back right away. They say this in spite of 2Th 2:1f. where Paul denies having ever said it. Undoubtedly Paul hoped for the early return of Jesus as most of the early Christians did, but that is a very different thing from setting a time for his coming. It is open to us all to hope for the speedy return of Christ, but times and seasons are with God and not with us. It is not open to us to excuse our negligence and idleness as Christians because of such a hope. That hope should serve as a spur to increased activity for Christ in order to hasten his coming. So Paul writes this group of Epistles to correct gross misapprehension and misrepresentation of his preaching about last things (eschatology). It is a rare preacher who has never been misunderstood or misrepresented.

There are excellent commentaries on the Thessalonian Epistles .

On the Greek text one may note those by
Dibelius, Handbuch zum N.T. Zweite Auflage (1925); Dobschutz, Meyer-Kommentar (1909); Ellicott, Crit. and Grammat. Comm. (1884); Findlay, Cambridge Gk. Test. (1904); Frame, Intern. Critical Comm. (1912); Lightfoot, Notes on Epistles of Paul (1895); Mayer, Die Thessalonischerbriefe (1908); Milligan, St. Paul's Epistles to the Thess. (1908); Moffatt, Expos. Gk. Test. (1910); Plummer, First Thess. (1908), Second Thess. (1908); Wohlenberg, Zahn-Komm. 2 aufl. (1908).

On the English text note those by
Adeney, New Century Bible (1907); Denney, Expos. Bible (1892); Findlay, Cambridge Bible (1891); Hutchinson, Lectures on I \& II Thess. (1883).

## 1 Thessalonians 1

1Thess 1:1
 absolute as customary in letters. Paul associates with himself Silvanus (Silas of Acts, spelled $\Sigma i \lambda \beta a v o c$ in D and the papyri), a Jew and Roman citizen, and Timothy, son of Jewish mother and Greek father, one of Paul's converts at Lystra on the first tour. They had both been with Paul at Thessalonica, though Timothy is not mentioned by Luke in Acts in Macedonia till Beroea (Ac 17:14f. ). Timothy had joined Paul in Athens (1Th 3:1f. ), had been sent back to Thessalonica, and with Silas had rejoined Paul in Corinth (1Th 3:5; Ac 18:5, 2Co 1:19 ). Silas is the elder and is mentioned first, but neither is in any sense the author of the Epistle any more than Sosthenes is co-author of I Corinthians or Timothy of II Corinthians, though Paul may sometimes have them in mind when he uses "we" in the Epistle. Paul does not here call himself "apostle" as in the later Epistles, perhaps because his position has not been so vigorously attacked as it was later. Ellicott sees in the absence of the word here a mark of the affectionate relations existing between Paul and the Thessalonians.

Unto the church of the Thessalonians ( $\tau \eta \varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha \Theta \varepsilon \sigma \sigma \alpha \lambda о v i \kappa \varepsilon \omega v$ ). The dative case in address. Note absence of the article with $\Theta \varepsilon \sigma \sigma \alpha \lambda$ ovik $\omega \omega v$ because a proper name and so definite without it. This is the common use of $\varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$ for a local body (church). The word originally meant "assembly" as in Ac 19:39, but it came to mean an organization for worship whether assembled or unassembled (cf. Ac 8:3). The only superscription in the oldest Greek manuscripts (Aleph B A) is Прос $\Theta \varepsilon \sigma \sigma \alpha \lambda о$ vıкıц A ( To the Thessalonians First ). But probably Paul wrote no superscription and certainly he would not write A to it before he had written II Thessalonians (B). His signature at the close was the proof of genuineness (2Th 3:17) against all spurious claimants (2Th 2:2). Unfortunately the brittle papyrus on which he wrote easily perished outside of the sand heaps and tombs of Egypt or the lava covered ruins of Herculaneum. What a treasure that autograph would be!

In God the Father and the Lord Jesus Christ ( $\varepsilon v \theta \varepsilon \omega \pi \alpha \tau \rho \kappa \alpha \kappa \nu \rho \omega$ J $\eta \sigma o v$ X $\rho \iota \sigma \tau \omega$ ). This church is grounded in ( $\varepsilon v$, with the locative case) and exists in the sphere and power of

God the Father and the Lord Jesus Christ. No article in the Greek, for both $\theta \varepsilon \omega$ $\pi \alpha \tau \rho$ and $\kappa v \rho \iota \omega$ J $\eta \sigma o v$ X $\rho \iota \sigma \tau \omega$ are treated as proper names. In the very beginning of this first Epistle of Paul we meet his Christology. He at once uses the full title, "Lord Jesus Christ," with all the theological content of each word. The name "Jesus" (Saviour, Mt 1:21 ) he knew, as the "Jesus of history," the personal name of the Man of Galilee, whom he had once persecuted (Ac 9:5 ), but whom he at once, after his conversion, proclaimed to be "the Messiah," (o Xpıбтоৎ, Ac 9:22). This position Paul never changed. In the great sermon at Antioch in Pisidia which Luke has preserved (Ac 13:23) Paul proved that God fulfilled his promise to

Israel by raising up "Jesus as Saviour" ( $\sigma \omega \tau \eta \rho \alpha$ I $\eta \sigma o v v$ ). Now Paul follows the Christian custom by adding X $\rho \stackrel{\sigma}{ }$ toc (verbal from $\chi \rho \omega \omega$, to anoint) as a proper name to Jesus (Jesus Christ) as later he will often say "Christ Jesus" (Col 1:1). And he dares also to apply кирьо (Lord) to "Jesus Christ," the word appropriated by Claudius (Dominus, Kupıos) and other emperors in the emperor-worship, and also common in the Septuagint for God as in Ps 32:1f. (quoted by Paul in Ro 4:8). Paul uses Kupıo of God (1Co 3:5) or of Jesus Christ as here. In fact, he more frequently applies it to Christ when not quoting the Old Testament as in Ro $4: 8$. And here he places "the Lord Jesus Christ" in the same category and on the same plane with "God the father." There will be growth in Paul's Christology and he will never attain all the knowledge of Christ for which he longs (Php 3:10-12), but it is patent that here in his first Epistle there is no "reduced Christ" for Paul. He took Jesus as "Lord" when he surrendered to Jesus on the Damascus Road: "And I said, What shall I do, Lord? And the Lord said to me" (Ac 22:10). It is impossible to understand Paul without seeing clearly this first and final stand for the Lord Jesus Christ. Paul did not get this view of Jesus from current views of Mithra or of Isis or any other alien faith. The Risen Christ became at once for Paul the Lord of his life.

Grace to you and peace ( $\chi \alpha \rho \iota \varsigma \nu \mu ı \nu ~ к \alpha ~ \varepsilon ı \rho \eta \nu \eta)$. These words, common in Paul's Epistles, bear "the stamp of Paul's experience" (Milligan). They are not commonplace salutations, but the old words "deepened and spiritualised" (Frame). The infinitive ( $\chi \alpha \iota \rho \varepsilon เ v$ ) so common in the papyri letters and seen in the New Testament also (Ac 15:23; 23:26; Jas 1:1) here gives place to $\chi$ арı, , one of the great words of the New Testament (cf. Joh 1:16f. ) and particularly of the Pauline Epistles. Perhaps no one word carries more meaning for Paul's messages than this word $\chi \alpha \rho \iota \varsigma ~(f r o m ~ \chi \alpha เ \rho \omega$, rejoice) from which $\chi \propto \rho \iota \zeta о \mu \alpha$ comes.

Peace ( $\varepsilon \iota \rho \eta \nu \eta$ ) is more than the Hebrew shalom so common in salutations. One recalls the "peace" that Christ leaves to us (Joh 14:27) and the peace of God that passes all understanding (Php 4:7). This introduction is brief, but rich and gracious and pitches the letter at once on a high plane.

1Thess 1:2
 (grateful) and that from $\varepsilon v$, well and $\chi \propto \rho \iota \zeta \rho \mu \alpha$, to show oneself kind. See $\chi \alpha \rho ı \varsigma ~ i n ~ v e r s e ~ 1 . ~$ "The plural implies that all three missionaries prayed together" (Moffatt).

Always ( $\pi \alpha v \tau 0 \tau \varepsilon)$. Late word, rare in LXX. So with $\varepsilon v \chi \alpha \rho ı \sigma \tau \varepsilon \omega$ in 2Th 1:3; 2:13; 1Co 1:4; Eph 5:20; Php 1:3. Moffatt takes it to mean "whenever Paul was at his prayers." Of course, he did not make audible prayer always, but he was always in the spirit of prayer, "a constant attitude" (Milligan), "in tune with the Infinite."

For you all ( $\pi \varepsilon \rho \pi \alpha v \tau \omega \nu \nu \mu \omega \nu)$. Paul "encircled ( $\pi \varepsilon \rho$, around) them all," including every one of them and the church as a whole. Distance lends enchantment to the memory of slight drawbacks. Paul is fond of this phrase "you all," particularly in Phil. (Php 1:3,7 ).

Making mention ( $\mu v \varepsilon \iota \alpha \nu \pi o t o v \mu \varepsilon v o$ ). Paul uses this very idiom in Rom 1:9; Eph 1:16; Phm 1:4. Milligan cites a papyrus example of $\mu \nu \varepsilon \iota \alpha \nu \pi o เ o v \mu \varepsilon v o$ in prayer (B. Y. U. 652, 5). Did Paul have a prayer list of the Thessalonian disciples which he read over with Silas and Timothy?

In here is $\varepsilon \pi l=$ "in the time of our prayers." "Each time that they are engaged in prayers the writers mention the names of the converts" (Frame).

1Thess 1:3
Remembering ( $\mu \nu \eta \mu \circ v \varepsilon v o v \tau \varepsilon \varsigma)$. Present active participle of old verb from adjective $\mu \nu \eta \mu \omega \nu$ (mindful) and so to call to mind, to be mindful of, used either with the accusative as in $1 \mathrm{Th} 2: 9$ or the genitive as here.

Without ceasing ( $\alpha \delta_{\imath} \alpha \lambda \varepsilon \iota \pi \tau \omega \varsigma$ ). Double compound adverb of the Koine (Polybius, Diodorus, Strabo, papyri) from the verbal adjective $\alpha-\delta \iota \alpha-\lambda \varepsilon \imath \pi \tau \circ \varsigma$ ( $\alpha$ privative and $\delta \iota \alpha-\lambda \varepsilon \imath \pi \omega$, to leave off). In the N.T. alone by Paul and always connected with prayer. Milligan prefers to connect this adverb (amphibolous in position) with the preceding participle $\pi o \iota o u \mu \varepsilon v o$ rather than with $\mu \nu \eta \mu$ ovevovies as Revised Version and Westcott and Hort rightly do.

Your work of faith $(v \mu \omega v \tau o v \varepsilon \rho \gamma \circ v \tau \eta \varsigma \pi \iota \sigma \tau \varepsilon \omega \varsigma)$. Note article with both $\varepsilon \rho \gamma o v$ and $\pi \iota \sigma \tau \varepsilon \omega \varsigma$ (correlation of the article, both abstract substantives). Epүov is genitive case the object of $\mu \nu \eta \mu$ ovevovtes as is common with verbs of emotion (Robertson, Grammar, pp. 508f.), though the accusative котоv occurs in 1Th 2:9 according to common Greek idiom allowing either case. E $\rho \gamma \mathrm{ov}$ is the general term for work or business, employment, task. Note two genitives with $\varepsilon \rho \gamma o v$. H $\nu \mu \omega v$ is the usual possessive genitive,
your work, while $\tau \eta \varsigma \pi \iota \sigma \tau \varepsilon \omega \varsigma$ is the descriptive genitive, marked by, characterized by, faith, "the activity that faith inspires" (Frame). It is interesting to note this sharp conjunction of these two words by Paul. We are justified by faith, but faith produces works (Ro 6-8) as the Baptist taught and as Jesus taught and as James does in Jas 2.

Labour of love ( $\tau 0 v$ колоv $\tau \eta \varsigma \alpha \gamma \alpha \pi \eta \varsigma$ ). Note article with both substantives. Here again тov колоv is the genitive the object of $\mu \nu \eta \mu \circ v \varepsilon v o v \tau \varepsilon \varsigma$ while $\tau \eta \varsigma ~ a \gamma a \pi \eta \varsigma$ is the descriptive genitive characterizing the "labour" or "toil" more exactly. Ко $о \varsigma$ is from $\kappa о \pi \tau \omega$, to cut, to lash, to beat the bread, to toil. In Re 14:13 the distinction is drawn between колоv (toil) from which the saints rest and $\varepsilon \rho \gamma \alpha$ (works, activities) which follow with them into heaven. So here it is the labour that love prompts, assuming gladly the toil. $A \gamma \alpha \pi \eta$ is one of the great words of the N.T. (Milligan) and no certain example has yet been found in the early papyri or the inscriptions. It occurs in the Septuagint in the higher sense as with the sensuous associations. The Epistle of Aristeas calls love ( $\alpha \gamma \alpha \pi \eta$ ) God's gift and Philo uses $\alpha \gamma \alpha \pi \eta$ in describing love for God. "When Christianity first began to think and speak in Greek, it took up $\alpha \gamma a \pi \eta$ and its group of terms more freely, investing them with the new glow with which the N.T. writings make us familiar, a content which is invariably religious" (Moffatt, Love in the New Testament, p. 40). The New Testament never uses the word $\varepsilon \rho \omega \varsigma$ (lust).

Patience of hope ( $\tau \eta \varsigma v \pi о \mu о \vee \eta \varsigma \tau \eta \varsigma \varepsilon \lambda \pi \iota \delta \circ \varsigma)$. Note the two articles again and the descriptive genitive $\tau \eta \varsigma \varepsilon \lambda \pi \iota \delta o \varsigma$. It is patience marked by hope, "the endurance inspired by hope" (Frame), yes, and sustained by hope in spite of delays and set-backs. Hvло $\quad$ оv $\eta$ is an old word (v $\pi \sigma, \mu \varepsilon \nu \omega$, to remain under), but it "has come like $\alpha \gamma \alpha \pi \eta$ to be closely associated with a distinctively Christian virtue" (Milligan). The same order as here ( $\varepsilon \rho \gamma \circ v$, колоб, $v \pi о \mu о \nu \eta$ ) appears in Re 2:2 and Lightfoot considers it" an ascending scale as practical proofs of self-sacrifice." The church in Thessalonica was not old, but already they were called upon to exercise the sanctifying grace of hope (Denney).

In our Lord Jesus Christ ( $\tau o v$ Kvpıov $\eta \mu \omega v$ Iqбov X $\rho \iota \sigma \tau o v$ ). The objective genitive with $\varepsilon \lambda \pi \iota \delta o \varsigma$ (hope) and so translated by "in" here (Robertson, Grammar, pp. 499f.). Jesus is the object of this hope, the hope of his second coming which is still open to us. Note "Lord Jesus Christ" as in verse 1.

Before our God and Father $(\varepsilon \mu \pi \rho \circ \sigma \theta \varepsilon v$ тov $\theta \varepsilon o v ~ \kappa \alpha \pi \alpha \tau \rho о \varsigma ~ \eta \mu \omega v)$. The one article with both substantives precisely as in Ga 1:4, not "before God and our Father," both article and possessive genitive going with both substantives as in 2Pe 1:1,11; Tit 2:13 (Robertson, Grammar, pp. 785f.). The phrase is probably connected with $\varepsilon \lambda \pi \iota \delta o c . ~ E \mu \pi \rho o \sigma \theta \varepsilon v$ in the N.T. occurs only of place, but it is common in the papyri of time. The picture here is the day of judgment when all shall appear before God.

1Thess 1:4
Knowing ( $\varepsilon \iota \delta o \tau \varepsilon \varsigma)$. Second perfect active participle of oı $\delta \alpha$ ( $\varepsilon \iota \delta o v$ ), a so-called causal participle=since we know, the third participle with the principal verb $\varepsilon v \chi \alpha \rho \iota \sigma \tau o v \mu \varepsilon v$, the Greek being fond of the circumstantial participle and lengthening sentences thereby (Robertson, Grammar, P. 1128).

Beloved by God ( $\eta \gamma \alpha \pi \eta \mu \varepsilon v o v \pi o$ [ $\tau 0 v$ ] $\theta \varepsilon o v$ ). Perfect passive participle of $\alpha \gamma \alpha \pi \alpha \omega$, the verb so common in the N.T. for the highest kind of love. Paul is not content with the use of $\alpha \delta \varepsilon \lambda \varphi o$ here (often in this Epistle as $2: 1,14,17 ; 3: 7 ; 4: 1,10$ ), but adds this affectionate phrase nowhere else in the N.T. in this form (cf. Jude 1:3 ) though in Sirach 45:1 and on the Rosetta Stone. But in 2Th 2:13 he quotes "beloved by the Lord" from De 33:12. The use of $\alpha \delta \varepsilon \lambda \varphi o$ for members of the same brotherhood can be derived from the Jewish custom (Ac 2:29,37 ) and the habit of Jesus (Mt 12:48) and is amply illustrated in the papyri for burial clubs and other orders and guilds (Moulton and Milligan's Vocabulary).

Your election ( $\tau \eta \nu \varepsilon \kappa \lambda o \gamma \eta \nu \nu \mu \omega \nu$ ). That is the election of you by God. It is an old word from $\varepsilon \kappa \lambda \varepsilon \gamma \circ \mu \alpha$ used by Jesus of his choice of the twelve disciples (Joh 15:16) and by Paul of God's eternal selection (Eph 1:4). The word $\varepsilon \kappa \lambda о \gamma \eta$ is not in the LXX and only seven times in the N.T. and always of God's choice of men (Ac 9:15; 1Th 1:4; Ro 9:11; 11:5,7,58; 2Pe 1:10). The divine $\varepsilon \kappa \lambda о \gamma \eta$ was manifested in the Christian qualities of verse 3 (Moffatt).

1Thess 1:5

How that (oт). It is not certain whether o $\boldsymbol{\tau}$ here means "because" $(\theta v i \alpha)$ as in 2Th 3:7; 1Co 2:14; Ro 8:27 or declarative ot "how that," knowing the circumstances of your election (Lightfoot) or explanatory, as in Ac 16:3; 1Th 2:1; 1Co 16:15; 2Co 12:3f.; Ro 13:11.

Our gospel ( $\tau$ ع $\varepsilon v a \gamma \gamma \varepsilon \lambda \iota o v ~ \eta \mu \omega v$ ). The gospel (see on Mt 4:23; Mr 1:1,15 for $\varepsilon v a \gamma \gamma \varepsilon \lambda ı o v$ ) which we preach, Paul's phrase also in 2Th 2:14; 2Co 4:3; Ro 2:16; 16:25; 2Ti 2:8 . Paul had a definite, clear-cut message of grace that he preached everywhere including Thessalonica. This message is to be interpreted in the light of Paul's own sermons in Acts and Epistles, not by reading backward into them the later perversions of Gnostics and sacramentarians. This very word was later applied to the books about Jesus, but Paul is not so using the term here or anywhere else. In its origin Paul's gospel is of God (1Th 2:2,8,9), in its substance it is Christ's ( $3: 2 ; 2 \mathrm{Th} 1: 8$ ), and Paul is only the bearer of it (1Th 2:4,9; 2Th 2:14) as Milligan points out. Paul and his associates have been entrusted with this gospel (1Th 2:4) and preach it (Ga 2:2 ). Elsewhere Paul calls it God's gospel (2Co 11:7; Ro 1:1; 15:16 ) or Christs (1Co 9:12; 2Co 2:12; 9:13; 10:14; Ga 1:7; Ro 15:19; Php 1:27). In both instances it is the subjective genitive.

Came unto you ( $\varepsilon \gamma \varepsilon v \eta \theta \eta \varepsilon ı \varsigma \nu \mu \alpha \varsigma)$. First aorist passive indicative of $\gamma ı v o \mu \alpha$ in practically same sense as $\varepsilon \gamma \varepsilon v \varepsilon \tau$ (second aorist middle indicative as in the late Greek generally). So also $\varepsilon ı \varsigma ~ v \mu a \varsigma$ like the Koine is little more than the dative $v \mu \nu \nu$ (Robertson, Grammar, p. 594).

Not only--but also (ovк-- $\mathrm{\mu} \boldsymbol{0 v o v ,} \alpha \lambda \lambda \alpha \kappa \alpha$ ). Sharp contrast, negatively and positively. The contrast between $\lambda$ оүос (word) and $\delta v v a \mu ı \varsigma$ (power) is seen also in 1Co 2:4; 4:20 . Paul does not refer to miracles by $\delta \nu v \alpha \mu \iota$.

In the Holy Spirit and much assurance ( $\varepsilon v \pi v \varepsilon v \mu a \tau ~ \alpha \gamma \omega \omega \kappa \alpha \pi \lambda \eta \rho о \varphi о \rho \iota \alpha \pi о \lambda \lambda \eta$ ). Preposition $\varepsilon v$ repeated with $\lambda o \gamma \omega \mathrm{t}, \delta \nu v \alpha \mu \varepsilon$, but only once here thus uniting closely

Holy Spirit and
much assurance . No article with either word. The word $\pi \lambda \eta \rho о \varphi \rho \rho ı \alpha$ is not found in ancient Greek or the LXX. It appears once in Clement of Rome and one broken papyrus example. For the verb $\pi \lambda \eta \rho \circ \varphi \rho \rho \varepsilon \omega$ see on $\mathrm{Lu} 1: 1$. The substantive in the N.T. only here and Col 2:2; Heb 6:11; 10:22. It means the full confidence which comes from the Holy Spirit.

Even as ye know ( $\kappa \alpha \theta \omega \varsigma$ oı $\delta \alpha \tau \varepsilon$ ). Paul appeals to the Thessalonians themselves as witnesses to the character of his preaching and life among them.

What manner of men we showed ourselves toward you (oo $\varepsilon \gamma \varepsilon v \eta \theta \eta \mu \varepsilon v \nu \mu \nu)$ ). Literally,
What sort of men we became to you. Qualitative relative ooo and dative $v \mu \nu v$ and first aorist passive indicative $\varepsilon \gamma \varepsilon v \eta \theta \eta \mu \varepsilon v$, (not $\eta \mu \varepsilon \theta \alpha$, we were). An epexegetical comment with
for your sake ( $\left.\delta \iota^{\prime} v \mu \propto \varsigma\right)$ added. It was all in their interest and for their advantage, however it may have seemed otherwise at the time.

1Thess 1:6

Imitators of us and of the Lord ( $\mu \mu \eta \tau \alpha \eta \mu \omega v \kappa \alpha$ тоv кvрıоv). М $\mu \mu \eta \tau \eta \varsigma$ ( $-\tau \eta \varsigma$ expresses the agent) is from $\mu \mu \varepsilon о \mu \alpha$, to imitate and that from $\mu \mu \circ \varsigma$ ( $\mu \mu \chi$, actor). Old word, more than "followers," in the N.T. only six times (1Th 1:6; 2:14; 1Co 4:16; 11:1; Eph 5:1; Heb 6:12 ). Again Paul uses $\gamma \iota v o \mu a$, to become, not $\varepsilon \mu$, to be. It is a daring thing to expect people to "imitate" the preacher, but Paul adds "and of the Lord," for he only expected or desired "imitation" as he himself imitated the Lord Jesus, as he expressly says in 1Co 11:1 . The peril of it all is that people so easily and so readily imitate the preacher when he does not imitate the Lord. The fact of the "election" of the Thessalonians was shown by the character of the message given them and by this sincere acceptance of it (Lightfoot).

Having received the word ( $\delta \varepsilon \xi \alpha \mu \varepsilon v o$ tov $\lambda o \gamma o v$ ). First aorist middle participle of $\delta \varepsilon \chi o \mu \alpha$, probably simultaneous action (receiving), not antecedent.

In much affliction ( $\varepsilon v \theta \lambda_{\imath} \psi \varepsilon \pi \sigma \lambda \lambda \eta$ ). Late word, pressure. Tribulation (Latin tribulum) from $\theta \lambda^{\prime} \beta \omega$, to press hard on. Christianity has glorified this word. It occurs in some Christian papyrus letters in this same sense. Runs all through the N.T. (2Th 1:4; Ro 5:3 ). Paul had his share of them ( $\operatorname{Col} 1: 24 ; 2 \mathrm{Co} 2: 4)$ and so he understands how to sympathize with the Thessalonians (1Th 3:3f. ). They suffered after Paul left Thessalonica (1Th 2:14).

With joy of the Holy Spirit ( $\mu \varepsilon \tau \alpha \chi \alpha \rho \alpha \varsigma \pi \nu \varepsilon v \mu \alpha \tau о \varsigma \alpha \gamma เ \sim v$ ). The Holy Spirit gives the joy in the midst of the tribulations as Paul learned (Ro 5:3). "This paradox of experience" (Moffatt) shines along the pathway of martyrs and saints of Christ.

1Thess 1:7
So that ye became ( $\omega \sigma \tau \varepsilon \gamma \varepsilon v \varepsilon \sigma \theta \alpha \nu \mu a \varsigma$ ). Definite result expressed by $\omega \sigma \tau \varepsilon$ and the infinitive $\gamma \varepsilon v \varepsilon \sigma \theta a($ second aorist middle of $\gamma \iota v o \mu \alpha)$ as is common in the Koine.

An ensample (титоv). So B D, but Aleph A C have тטזои¢ (plural). The singular looks at the church as a whole, the plural as individuals like v $\mu a$. Tuло is an old word from $\tau \cup \pi \tau \omega$, to strike, and so the mark of a blow, print as in John 20:25. Then the figure formed by the blow, image as in Ac 7:43. Then the mould or form (Ro 6:17; Ac 23:25). Then an example or pattern as in Ac 7:44, to be imitated as here, Php 3:17, etc. It was a great compliment for the church in Thessalonica to be already a model for believers in Macedonia and Achaia. Our word type for printers is this same word with one of its meanings. Note separate article with both Macedonia ( $\tau \eta$ Maк\& $\delta o v i \alpha$ ) and Achaia ( $\tau \eta$ A $\chi \alpha ı \alpha$ ) treated as separate provinces as they were.

1Thess 1:8
From you hath sounded forth ( $\alpha \varphi^{\prime} \nu \mu \omega \nu \varepsilon \xi \eta \chi \eta \tau \alpha$ ). Perfect passive indicative of $\varepsilon \xi \eta \chi \varepsilon \omega$, late compound verb ( $\varepsilon \xi, \eta \chi \circ \sigma, \eta \chi \omega, \eta \chi \eta$, our echo) to sound out of a trumpet or of thunder, to reverberate like our echo. Nowhere else in the N.T. So "from you" as a sounding board or radio transmitting station (to use a modern figure). It marks forcibly "both the clear and the persuasive nature of the $\lambda$ oүoc tov Kupıov" (Ellicott). This phrase, the word of the Lord, may be subjective with the Lord as its author or objective with the Lord as the object. It is
both．It is a graphic picture with a pardonable touch of hyperbole（Moffatt）for Thessalonica was a great commercial and political centre for disseminating the news of salvation（on the Egnation Way）．

But in every place（ $\alpha \lambda \lambda^{\prime} \varepsilon v \pi \alpha \nu \tau \tau 0 \pi \omega$ ）．In contrast to Macedonia and Achaia．The sentence would naturally stop here，but Paul is dictating rapidly and earnestly and goes on．

Your faith to God－ward（ $\eta \pi \iota \sigma \tau \iota \varsigma \nu \mu \omega \vee \eta \pi \rho \circ \varsigma \tau \circ v \theta \varepsilon o v$ ）．Literally，
the faith of you that toward the God．The repeated article makes clear that their faith is now directed toward the true God and not toward the idols from which they had turned （verse 10）．

Is gone forth（ $\varepsilon \xi \varepsilon \lambda \eta \lambda \nu \theta \varepsilon v)$ ．Second perfect active indicative of old verb $\varepsilon \xi \varepsilon \rho \chi \circ \mu \alpha$ ，to go out，state of completion like $\varepsilon \xi \eta \chi \eta \tau \alpha$ above．

So that we need not to speak anything（ $\omega \sigma \tau \varepsilon \mu \eta \chi \rho \varepsilon \varepsilon \alpha v \varepsilon \chi \varepsilon ı \nu \eta \mu \alpha \varsigma \lambda \alpha \lambda \varepsilon \iota \nu \tau)$ ．H $\omega \sigma \tau \varepsilon$ with the infinitive for actual result as in verse 7 ．No vital distinction between $\lambda \alpha \lambda \varepsilon ı v$（originally to chatter as of birds）and $\lambda \varepsilon \gamma \varepsilon ⿺ 𠃊$ ，both being used in the Koine for speaking and preaching （in the N．T．）．

1Thess 1：9
They themselves（auto）．The men of Macedonia，voluntarily．
Report（ $\alpha \pi \alpha \gamma \gamma \varepsilon \lambda \lambda$ ovovv）．Linear present active indicative，keep on reporting．
What manner of entering in（отоьav عוбоסov）．What sort of entrance，qualitative rel－ ative in an indirect question．

We had（ $\varepsilon \sigma \chi \circ \mu \varepsilon v)$ ．Second aorist active（ingressive）indicative of the common verb $\varepsilon \chi \omega$ ．

And how（ $\kappa \alpha \pi \omega \varsigma$ ）．Here the interrogative adverb $\pi \omega \varsigma$ in this part of the indirect question．This part about＂them＂（you）as the first part about Paul．The verb $\varepsilon \pi \iota \sigma \tau \rho \varepsilon \varphi \omega$ is an old verb for turning and is common in the Acts for Gentiles turning to God，as here from idols，though not by Paul again in this sense．In Ga 4：9 Paul uses it for turning to the weak and beggarly elements of Judaism．

From idols（ $\alpha \pi 0 \tau \omega v \varepsilon \iota \delta o \lambda \omega v$ ）．Old word from $\varepsilon \iota \delta o \varsigma$（figure）for image or likeness and then for the image of a heathen god（our idol）．Common in the LXX in this sense．In Ac 14：15 Paul at Lystra urged the people
to turn from these vain things to the living God（ $\alpha \pi 0 ~ \tau о \nu \tau \omega \nu \tau \omega v \mu \alpha \tau \alpha\rfloor \omega v \varepsilon \pi\llcorner\sigma \tau \rho \varepsilon \varphi \varepsilon เ \nu$ $\varepsilon \pi \theta \varepsilon o v \zeta \omega v \tau \alpha)$ ，using the same verb $\varepsilon \pi \iota \sigma \tau \rho \varepsilon \varphi \varepsilon \iota v$ ．Here also Paul has a like idea，
to serve a living and true God（ $\delta o u \lambda \varepsilon v \varepsilon ı \nu ~ \theta \varepsilon \omega \zeta \omega \nu \tau \kappa \alpha \alpha \lambda \eta \theta \nu \nu \omega)$ ．No article，it is true， but should be translated＂the living and true God＂（cf．Ac 14：15 ）．Not＂dead＂like the idols from which they turned，but alive and genuine（ $\alpha \lambda \eta \theta 1 v o \varsigma$ ，not $\alpha \lambda \eta \theta \eta \varsigma)$ ．

1Thess 1：10
To wait for his Son from heaven（ $\alpha v \alpha \mu \varepsilon v \varepsilon เ v ~ \tau o v ~ v i o v ~ \alpha u \tau o v ~ \varepsilon \kappa ~ \tau \omega v ~ o u \rho \alpha v \omega v$ ）．Present infinitive，like $\delta$ ou入cuevv，and so linear，to keep on waiting for．The hope of the second
coming of Christ was real and powerful with Paul as it should be with us. It was subject to abuse then as now as Paul will have to show in this very letter. He alludes to this hope at the close of each chapter in this Epistle.

Whom he raised from the dead (ov $\eta \gamma \varepsilon \rho \varepsilon v \varepsilon \kappa[\tau \omega v] ~ v \varepsilon \kappa \rho \omega v$ ). Paul gloried in the fact of the resurrection of Jesus from the dead of which fact he was himself a personal witness. This fact is the foundation stone for all his theology and it comes out in this first chapter.

Jesus which delivereth us from the wrath to come (I I $\sigma o u v ~ \tau o v ~ \rho v o \mu \varepsilon v o v ~ \eta \mu a \varsigma ~ \varepsilon \kappa ~ \tau \eta \varsigma ~$ о $\rho ү \eta \varsigma \tau \eta \varsigma \varepsilon \rho \chi \circ \mu \varepsilon \vee \eta \varsigma)$. It is the historic, crucified, risen, and ascended Jesus Christ, God's Son, who delivers from the coming wrath. He is our Saviour (Mt 1:21) true to his name Jesus. He is our Rescuer (Ro 11:26, o pvouعvo¢, from Isa 59:20). It is eschatological language, this coming wrath of God for $\sin$ (1Th 2:16; Ro 3:5; 5:9; 9:22; 13:5). It was Paul's allusion to the day of judgment with Jesus as Judge whom God had raised from the dead that made the Athenians mock and leave him (Ac 17:31f. ). But Paul did not change his belief or his preaching because of the conduct of the Athenians. He is certain that God's wrath in due time will punish sin. Surely this is a needed lesson for our day. It was coming then and it is coming now.

## 1 Thessalonians 2

1Thess 2:1
For yourselves know (avto $\gamma \alpha \rho$ oı $\delta \alpha \tau \varepsilon$ ). This explanatory $\gamma \alpha \rho$ takes up in verses 1-12 the allusion in 1:9 about the "report" concerning the entrance ( $\varepsilon เ \sigma o \delta o v$, way in, $\varepsilon \iota \sigma, o \delta o v$ ),
unto you ( $\tau \eta \vee \pi \rho o \varsigma v \mu \alpha \varsigma$ ). Note repeated article to sharpen the point. This proleptic accusative is common enough. It is expanded by the epexegetic use of the o $\tau$ clause
that it hath not been found vain (o ov $\kappa \varepsilon v \eta \gamma \varepsilon \gamma \circ v \varepsilon v$ ). Literally,
that it has not become empty. Second perfect active (completed state) of $\gamma$ ivo $\mu \alpha$. Every pastor watches wistfully to see what will be the outcome of his work. Bengel says: Non inanis, sed plena virtutis. Cf. 1:5. Kevoc is hollow, empty, while $\mu a \tau \alpha \circ \varsigma$ is fruitless, ineffective. In 1Co 15:14,17 Paul speaks of кعvov то кприүна ( empty the preaching) and $\mu \alpha \tau \alpha ı \alpha ~ \eta \pi ı \sigma \tau ı \varsigma$ ( vain the faith ). One easily leads to the other.

1Thess 2:2
But having suffered before ( $\alpha \lambda \lambda \alpha \pi \rho \circ \pi \alpha \theta$ ov $\tau \varepsilon \varsigma)$. Strong adversative $\alpha \lambda \lambda \alpha$, antithesis to $\kappa \varepsilon \nu \eta$. Appeal to his personal experiences in Thessalonica known to them (as ye know, $\kappa \alpha \theta \omega \varsigma$ ot $\delta \alpha \tau \varepsilon)$. Second aorist active participle of $\pi \rho о \pi \alpha \sigma \chi \omega$, old compound verb, but here alone in the N.T. The force of $\pi \rho o-$ (before) is carried over to the next verb. The participle may be regarded as temporal (Ellicott) or concessive (Moffatt).

And been shamefully entreated in Philippi ( $\kappa \alpha \cup \beta \rho เ \sigma \theta \varepsilon v \tau \varepsilon \varsigma \varepsilon v \Phi \backslash \lambda \iota \pi \pi o \iota \varsigma)$. First aorist passive participle of $\cup \beta \rho \iota \zeta \omega$, old verb, to treat insolently. "More than the bodily suffering it was the personal indignity that had been offered to him as a Roman citizen" (Milligan), for which account see Ac 16:16-40, an interesting example of how Acts and the Epistles throw light on each other. Luke tells how Paul resented the treatment accorded to him as a Roman citizen and here Paul shows that the memory still rankled in his bosom.

We waxed bold in our God ( $\varepsilon \pi \alpha \rho \rho \eta \sigma \alpha \sigma \sigma \alpha \mu \varepsilon \theta a \varepsilon v \tau \omega \theta \varepsilon \omega \eta \mu \omega v$ ). Ingressive first aorist middle of $\pi \alpha \rho \rho \eta \sigma \omega \zeta$ о $\alpha$, old deponent verb from $\pi \alpha \rho \rho \eta \sigma \iota \alpha$ (full story, $\pi \alpha v$-, $\rho \eta \sigma \iota \alpha$ ). In his reply to Festus (Ac 26:26) Paul uses $\pi \alpha \rho \rho \eta \sigma \iota \varsigma \zeta о \mu \varepsilon v o \varsigma ~ \lambda \alpha \lambda \omega$,
being bold I speak, while here he has
we waxed bold to speak ( $\varepsilon \pi \alpha \rho \rho \eta \sigma \iota \alpha \sigma \alpha \mu \varepsilon \theta a \lambda \alpha \lambda \eta \sigma \alpha$ ). The insult in Philippi did not close Paul's mouth, but had precisely the opposite effect "in our God." It was not wild fanaticism, but determined courage and confidence in God that spurred Paul to still greater boldness in Thessalonica,
unto you ( $\pi \rho \circ \varsigma \nu \mu \alpha \varsigma$ ), be the consequences what they might,
 figure of the athletic games ( $\alpha \gamma \omega v$ ) may refer to outward conflict like Php 1:30 or inward anxiety ( $\mathrm{Col} 2: 1$ ). He had both in Thessalonica.

1Thess 2:3

Exhortation（ $\pi \alpha \rho \alpha \kappa \lambda \eta \sigma \iota \varsigma)$ ．Persuasive discourse，calling to one＇s side，for admonition， encouragement，or comfort．

Not of error（ovк $\varepsilon \kappa \pi \lambda \alpha \nu \eta \varsigma)$ ．This word is same as $\pi \lambda a v a \omega$ ，to lead astray（ $2 \mathrm{Ti} 3: 13$ ） like Latin errare．Passive idea of
error here rather than deceit．That is seen in
nor in guile（ou $\delta \varepsilon \varepsilon v \delta o \lambda \omega$ ）from $\delta \varepsilon \lambda \omega$ ，to catch with bait．Paul is keenly sensitive against charges against the correctness of his message and the purity of his life．

Nor of uncleanness（ov $\delta \varepsilon \varepsilon \xi \alpha \kappa \alpha \theta$ apбıa¢）．＂This disclaimer，startling as it may seem， was not unneeded amidst the impurities consecrated by the religions of the day＂（Lightfoot）． There was no necessary connection in the popular mind between religion and morals．The ecstatic initiations in some of the popular religions were grossly sensual．

1Thess 2：4
But even as we have been approved by God（ $\alpha \lambda \lambda \alpha \kappa \alpha \theta \omega \varsigma \delta \varepsilon \delta о к ц \mu \alpha \sigma \mu \varepsilon \theta \alpha$ vто тои $\theta \varepsilon o v)$ ．Perfect passive indicative of $\delta$ окцん $\zeta \omega$ ，old verb to put to the test，but here the tense for completed state means tested and proved and so approved by God．Paul here claims the call of God for his ministry and the seal of God＇s blessing on his work and also for that of Silas and Timothy．

To be entrusted with the gospel（ $\pi \iota \sigma \tau \varepsilon v \theta \eta v \alpha$ тo $\varepsilon v a \gamma \gamma \varepsilon \lambda \iota o v$ ）．First aorist passive infin－ itive of $\pi \iota \sigma \tau \varepsilon v \omega$ ，common verb for believing，from $\pi \iota \sigma \tau \iota c$（faith），but here to entrust rather than to trust．The accusative of the thing is retained in the passive according to regular Greek idiom as in 1Co 9：17；Ga 2：7；Ro 3：2；1Ti 1：11；Tit 1：3，though the active had the dative of the person．

So we speak（ovt $\omega \varsigma \lambda \alpha \lambda o v \mu \varepsilon v$ ）．Simple，yet confident claim of loyalty to God＇s call and message．Surely this should be the ambition of every preacher of the gospel of God．

Not as pleasing men（ $o v \chi \omega \varsigma \alpha v \theta \rho \omega \pi \sigma \iota \varsigma ~ a \rho \varepsilon \sigma \kappa о \nu \tau \varepsilon \varsigma)$ ）．Dative case with $\alpha \rho \varepsilon \sigma \kappa \omega$ as in Ga 1：10．Few temptations assail the preacher more strongly than this one to please men， even if God is not pleased，though with the dim hope that God will after all condone or overlook．Nothing but experience will convince some preachers how fickle is popular favour and how often it is at the cost of failure to please God．And yet the preacher wishes to win men to Christ．It is all as subtle as it is deceptive．God tests our hearts（the very verb סокцца $\zeta \omega$ used in the beginning of this verse）and he is the only one whose approval matters in the end of the day（1Co 4：5）．

1Thess 2：5
Using words of flattery（ $\varepsilon v \lambda о \gamma \omega$ ко入ак $\varepsilon \iota \alpha$ ）．Literally，
in speech of flattery or fawning．Old word，only here in N．T．，from колакৎ，a flatterer． An Epicurean，Philodemus，wrote a work Пгр Ко入акєıаৎ（Concerning Flattery）．Milligan （Vocabulary，etc．）speaks of＂the selfish conduct of too many of the rhetoricians of the day，＂
conduct extremely repugnant to Paul. The third time (verses $1,2,5$ ) he appeals to their knowledge of his work in Thessalonica. Frame suggests "cajolery."

Nor a cloke of covetousness (ovtع $\pi \rho \circ \varphi \alpha \sigma \varepsilon \pi \lambda \varepsilon \sigma v \varepsilon \xi \iota \alpha \varsigma)$. Pretext ( $\pi \rho \circ \varphi \alpha \sigma \iota \varsigma$ from $\pi \rho о \varphi \alpha \iota v \omega$, to show forth, or perhaps from $\pi \rho \sigma-\varphi \eta \mu$, to speak forth). This is the charge of self-interest rather than the mere desire to please people. Pretext of greediness is Frame's
 $\pi \lambda \varepsilon o v \varepsilon \kappa \tau \varepsilon \omega$, to have more, then to over-reach, all old words, all with bad meaning as the result of the desire for more. In a preacher this sin is especially fatal. Paul feels so strongly his innocence of this charge that he calls God as witness as in 2Co 1:23; Ro 9:1; Php 1:8 , a solemn oath for his own veracity.

1Thess 2:6
 of covetousness follows naturally the repudiation of worldly ambition" (Milligan). See Ac 20:19; 2 Co $4: 5$; Eph 4:2. This third disclaimer is as strong as the other two. Paul and his associates had not tried to extract praise or glory out of $(\varepsilon \xi)$ men.

Neither from you nor from others (ovt $\alpha \varphi^{\prime} v \mu \omega \nu$ оvt $\alpha \varphi^{\prime} \alpha \lambda \lambda \omega v$ ). He widens the negation to include those outside of the church circles and changes the preposition from $\varepsilon \xi$ (out of) to a $\quad$ (from).

When we might have been burdensome, as apostles of Christ ( $\delta \cup v a \mu \varepsilon v o \varepsilon v \beta \alpha \rho \varepsilon \varepsilon เ v a$ $\omega \varsigma$ Xpıбтоv $\alpha \pi о \sigma \tau о \lambda о)$. Westcott and Hort put this clause in verse 7. Probably a concessive participle,
though being able to be in a position of weight (either in matter of finance or of dignity, or a burden on your funds or "men of weight" as Moffatt suggests). Milligan suggests that Paul "plays here on the double sense of the phrase" like the Latin proverb: Honos propter onus. So he adds, including Silas and Timothy,
as Christ's apostles, as missionaries clearly, whether in the technical sense or not (cf. Ac 14:4,14; 2Co 8:23; 11:13; Ro 16:7; Php 2:25; Re 2:2 ). They were entitled to pay as "Christ's apostles" (cf. 1Co 9; 2Co 11:7ff. ), though they had not asked for it.

1Thess 2:7
But we were gentle in the midst of you ( $\alpha \lambda \lambda \lambda \varepsilon \gamma \varepsilon v \eta \theta \eta \mu \varepsilon v \nu \eta \pi \iota o \varepsilon v \mu \varepsilon \sigma \omega v \mu \omega v$ ). Note $\varepsilon \gamma \varepsilon v \eta \theta \eta \mu \varepsilon v$ (became), not $\eta \mu \varepsilon \theta \alpha$ (were). This rendering follows $\eta \pi \ldots o$ instead of $v \eta \pi \iota o$ (Aleph B D C Vulg. Boh.) which is clearly correct, though Dibelius, Moffatt, Ellicott, Weiss prefer $\eta \pi \iota o$ as making better sense. Dibelius terms $v \eta \pi \iota \circ$ unmoglich (impossible), but surely that is too strong. Paul is fond of the word $\nu \eta \pi \ldots$ (babes). Lightfoot admits that he here works the metaphor to the limit in his passion, but does not mar it as Ellicott holds.

As when a nurse cherishes her own children ( $\omega \varsigma \varepsilon \alpha \vee \tau \rho \circ \varphi \circ \varsigma \theta \alpha \lambda \pi \eta \tau \alpha \varepsilon \alpha \cup \tau \eta \varsigma \tau \varepsilon \kappa v \alpha$ ). This comparative clause with $\omega \varsigma \varepsilon \alpha v$ (Mr 4:26; Ga 6:10 without $\varepsilon \alpha v$ or $\alpha v$ ) and the subjunctive
(Robertson, Grammar, p. 968) has a sudden change of the metaphor, as is common with Paul (1Ti 5:24; 2Co 3:13ff.) from
babes to
nurse ( $\tau \rho \circ \varphi \circ \varsigma)$, old word, here only in the N.T., from $\tau \rho \varepsilon \varphi \omega$, to nourish, $\tau \rho \circ \varphi \eta$, nourishment. It is really the mother-nurse "who suckles and nurses her own children" (Lightfoot), a use found in Sophocles, and a picture of Paul's tender affection for the Thessalonians. $\Theta a \lambda \pi \omega$ is an old word to keep warm, to cherish with tender love, to foster. In N.T. only here and Eph 5:29 .

1Thess 2:8
Even so, being affectionately desirous of you ( $o v \tau \omega \varsigma о \mu \varepsilon \iota \rho о \mu \varepsilon \nu o v \mu \omega v$ ). Clearly the correct text rather than $\mu \varepsilon \iota \rho о \mu \varepsilon v o$ from $\iota \mu \varepsilon \rho \omega$, old verb to long for. But the verb o $\mu \varepsilon \iota \rho о \mu \alpha$ (Westcott and Hort om., smooth breathing) occurs nowhere else except MSS. in Job 3:21; Ps 62:2 (Symmachus) and the Lycaonian sepulchral inscription (4th cent. A.D.) about the sorrowing parents $о \mu \varepsilon \iota \rho о \mu \varepsilon v o \pi \varepsilon \rho \pi \alpha \iota \delta o \varsigma$,
greatly desiring their son (Moulton and Milligan, Vocabulary). Moulton suggests that it comes from a root $\sigma \mu \varepsilon \rho$, remember, and that o- is a derelict preposition o like o- $\delta v \rho o \mu \alpha$, о-к $\lambda \lambda \lambda \omega$, $\omega$-кєаขос. Wohlenberg (Zahn, Kommentar) calls the word "a term of endearment," "derived from the language of the nursery" (Milligan).

We were well pleased ( $\eta \cup \delta$ окоט $\mu \varepsilon v$ ). Imperfect active of $\varepsilon v \delta о \kappa \varepsilon \omega$, common verb in later Greek and in N.T. (see on Mt 3:17 ), picturing Paul's idea of their attitude while in Thessalonica. Paul often has it with the infinitive as here.

To impart ( $\mu \varepsilon \tau \alpha \delta o v v \alpha$ ). Second aorist active infinitive of $\mu \varepsilon \tau \alpha \delta \iota \delta \omega \mu$, old verb to share with (see on Lu 3:11). Possible zeugma with
souls ( $\psi \cup \chi \propto \varsigma)$, though Lightfoot renders "lives." Paul and his associates held nothing back.

Because ye were become very dear to us ( $\delta$ เo $\alpha \nmid \alpha \pi \eta \tau o \eta \mu \tau v \varepsilon \gamma \varepsilon \nu \eta \theta \eta \tau \varepsilon$ ). Note $\delta \iota \tau$ (double cause, $\delta \iota \alpha, o \tau$, for that), use of $\gamma \iota \nu o \mu \alpha$ again for become, and dative $\eta \mu \nu \nu$ with verbal $\alpha \gamma a \pi \eta \tau 0$, beloved and so dear. A beautiful picture of the growth of Paul's affection for them as should be true with every pastor.

1Thess 2:9
Travail ( $\mu \circ \chi \theta \circ v$ ). Old word for difficult labour, harder than колоऽ (toil). In the N.T. only here, 2 Th 3:8; 2 Co 11:27. Note accusative case here though genitive with $\mu \nu \eta \mu \circ v \varepsilon v \omega$ in 1:3.

Night and day (vטктоৎ ка $\eta \mu \varepsilon \rho a \varsigma)$. Genitive case, both by day and by night, perhaps beginning before dawn and working after dark. So in 3:10.

That we might not burden any of you ( $\pi \rho \circ \varsigma \tau о \mu \eta \varepsilon \pi \iota \beta \alpha \rho \eta \sigma \alpha \tau \iota \nu \alpha \nu \mu \omega v$ ). Use of $\pi \rho o \varsigma$ with the articular infinitive to express purpose (only four times by Paul). The verb $\varepsilon \pi \iota \beta \alpha \rho \varepsilon \omega$ is late, but in the papyri and inscriptions for laying a burden $(\beta \alpha \rho o \varsigma)$ on $(\varepsilon \pi \tau-)$ one. In N.T.
only here and 2Th 3:8; 2Co 2:5. Paul boasted of his financial independence where he was misunderstood as in Thessalonica and Corinth (2Co 9-12) , though he vindicated his right to remuneration.

We preached ( $\varepsilon \kappa \eta \rho \cup \xi \alpha \mu \varepsilon v$ ).
We heralded (from $\kappa \eta \rho \cup \xi$, herald) to you, common verb for preach.
1Thess 2:10
How holily and righteously and unblameably ( $\omega \varsigma$ об $\omega \varsigma \varsigma \kappa \alpha \delta \kappa \alpha \omega \omega \varsigma \kappa \alpha \alpha \mu \varepsilon \mu \pi \tau \omega \varsigma$ ). Paul calls the Thessalonians and God as witnesses ( $\mu \alpha \rho \tau \nu \rho \varepsilon \varsigma)$ to his life toward you the believers ( $v \mu \nu \nu$ toıc $\pi \iota \sigma \tau \varepsilon v o v \sigma เ v)$ dative of personal interest. He employs three common adverbs that show how holily toward God and how righteously toward men so that they did not blame him and his associates in either respect. So there is a reason for each adverb. All this argues that Paul spent a considerable time in Thessalonica, more than the three sabbaths mentioned by Luke. The pastor ought to live so that his life will bear close inspection.

1Thess 2:11
As a father with his own children ( $\omega \varsigma \pi \alpha \tau \eta \rho \tau \varepsilon \kappa v \alpha$ عavtov). Change from the figure of the mother-nurse in verse 7 . There is ellipse of a principal verb with the participles $\pi \alpha \rho \alpha \kappa \alpha \lambda о v v \tau \varepsilon \sigma, \pi \alpha \rho \alpha \mu \nu \theta$ ov $\mu \varepsilon v o t, \mu \alpha \rho \tau \nu \rho о \nu \mu \varepsilon v o$. Lightfoot suggests $\varepsilon v o v \theta \varepsilon \tau о \nu \mu \varepsilon v$ (we admonished) or $\varepsilon \gamma \varepsilon v \eta \theta \eta \mu \varepsilon v$ (we became). The three participles give three phases of the minister's preaching (exhorting, encouraging or consoling, witnessing or testifying). They are all old verbs, but only the first ( $\pi \alpha \rho \alpha \kappa \alpha \lambda \varepsilon \omega)$ is common in the N.T.

1Thess 2:12
To the end that ( $\varepsilon \iota \varsigma \tau 0)$. Final use of $\varepsilon \iota \zeta$ and the articular infinitive, common idiom in the papyri and Paul uses $\varepsilon \iota \varsigma$ to and the infinitive fifty times (see again in 3:2), some final, some sub-final, some result (Robertson, Grammar, pp. 989-91).

Walk worthily of God ( $\pi \varepsilon \rho \iota \pi \alpha \tau \varepsilon เ \nu \alpha \xi \iota \omega \varsigma ~ \tau o v ~ \theta \varepsilon o v)$. Present infinitive (linear action), and genitive case with adverb $\alpha \xi$ I $\omega$, as in $\operatorname{Col}$ 1:10 (cf. Php 1:27; Eph 4:1), like a preposition.

Calleth (ка入ouvtoc). Present active participle, keeps on calling. Some MSS. have ка入ع $\sigma \alpha v \tau о \varsigma$, called.

Kingdom ( $\beta \alpha \sigma \iota \lambda \varepsilon \iota \alpha v$ ) here is the future consummation because of glory ( $\delta 0 \xi \alpha v$ ) as in 2Th 1:5; 1Co 6:9; 15:50; Ga 5:21; 2Ti 4:1,18 ), but Paul uses it for the present kingdom of grace also as in 1Co 4:20; Ro 14:17; Col 1:13.

1Thess 2:13
And for this cause we also ( $\kappa \alpha \delta \iota \alpha$ тоито $\kappa \alpha \eta \mu \varepsilon \varsigma)$ ). Note $\kappa \alpha$ twice. We as well as you are grateful for the way the gospel was received in Thessalonica.

Without ceasing ( $\alpha \delta \iota \alpha \lambda \varepsilon \iota \pi \tau \omega \varsigma)$. Late adverb for which see on 1:2 and for $\varepsilon \cup \chi \alpha \rho \iota \sigma \tau o u \mu \varepsilon v$ see on 1:2.

The word of the message ( $\lambda$ оүоv акопऽ). Literally,
the word of hearing, as in Sir. 42:1 and Heb 4:2 о 入оүоऽ $\tau \eta \varsigma$ акопऽ, the word marked by hearing (genitive case), the word which you heard. Here with tov $\theta$ sov (of God) added as a second descriptive genitive which Paul expands and justifies.

Ye received it so ( $\pi \alpha \rho \alpha \lambda \alpha \beta o v \tau \varepsilon \varsigma)$ and
accepted or welcomed it ( $\varepsilon \delta \varepsilon \xi \alpha \sigma \theta \varepsilon$ ) so,
not as the word of men ( $o v \lambda o \gamma o v \alpha v \theta \rho \omega \pi \omega v$ ),
but as the word of God ( $\alpha \lambda \lambda \alpha \lambda \operatorname{o\gamma ov} \theta \varepsilon o v)$,
as it is in truth ( $\kappa \alpha \theta \omega \varsigma \alpha \lambda \eta \theta \omega \varsigma \varepsilon \sigma \tau \iota v$ ). This last clause is literally,
as it truly is . Paul had not a doubt that he was proclaiming God's message. Should any preacher preach his doubts if he has any? God's message can be found and Paul found it.

Worketh in you ( $\varepsilon v \varepsilon \rho \gamma \varepsilon \iota \tau \alpha \varepsilon v \nu \mu \nu v$ ). Perhaps middle voice of $\varepsilon v \varepsilon \rho \gamma \varepsilon \omega$ ( $\varepsilon v, \varepsilon \rho \gamma \circ v$, work) late verb, not in ancient Greek or LXX, but in papyri and late writers (Polybius, etc.) and in N.T. only by Paul and James. If it is passive, as Milligan thinks, it means "is set in operation," as Polybius has it. The idea then is that the word of God is set in operation in you that believe.

1Thess 2:14
Imitators of the churches of God which are in Judea ( $\mu \mu \eta \tau \alpha \tau \omega \nu \varepsilon \kappa \kappa \lambda \eta \sigma \omega \omega \nu$ tov $\theta \varepsilon o v$ $\tau \omega v$ ov $\omega \omega v \varepsilon v \tau \eta$ Iov $\delta \alpha ı \alpha$ ). On $\mu \mu \eta \tau \alpha$ see on 1:5. "This passage, implying an affectionate admiration of the Jewish churches on the part of St. Paul, and thus entirely bearing out the impression produced by the narrative in the Acts, is entirely subversive of the theory maintained by some and based on a misconception of Ga 2 , and by the fiction of the PseudoClementines, of the feud existing between St. Paul and the Twelve" (Lightfoot).

In Christ Jesus ( $\varepsilon v$ X $\rho \iota \sigma \tau \omega$ I $\eta \sigma o v$ ). It takes this to make a Christian church of God. Note order here

Christ Jesus as compared with
Jesus Christ in 1:1,3.
Ye also--even as they ( $\kappa \alpha \nu \mu \varepsilon ו \sigma-$-ка $\alpha \cup \tau о$ ). Note ка twice (correlative use of $\kappa \alpha$ ).
Countrymen ( $\sigma \cup \mu \varphi \cup \lambda \varepsilon \tau \omega v$ ). Fellow-countrymen or tribesmen. Late word that refers primarily to Gentiles who no doubt joined the Jews in Thessalonica who instigated the attacks on Paul and Silas so that it "was taken up by the native population, without whose co-operation it would have been powerless" (Lightfoot).

Own ( $(\delta \omega \omega v$ ) here has apparently a weakened force. Note vio here with the ablative both with $\sigma \nu \mu \varphi \cup \lambda \varepsilon \tau \omega v$ and Iov $\delta a \omega \omega v$ after the intransitive $\varepsilon \pi \alpha \theta \varepsilon \tau \varepsilon$ (suffered). The persecution of the Christians by the Jews in Judea was known everywhere.

1Thess 2:15
 I $\eta \sigma 0 \cup \nu$ ка тоиৎ $\pi \rho о \varphi \eta \tau \alpha \varsigma)$. First aorist active participle of $\alpha \pi о \kappa \tau \varepsilon เ \nu \omega$. Vivid justification of his praise of the churches in Judea. The Jews killed the prophets before the Lord Jesus who
reminded them of their guilt (Mt 23:29). Paul, as Peter (Ac 2:23), lays the guilt of the death of Christ on the Jews.

And drove us out ( $\kappa \alpha \eta \mu \alpha \varsigma \varepsilon \kappa \delta \iota \omega \xi \alpha \nu \tau \omega v$ ). An old verb to drive out or banish, to chase out as if a wild beast. Only here in N.T. It is Paul's vivid description of the scene told in Ac 17:5ff. when the rabbis and the hoodlums from the agora chased him out of Thessalonica by the help of the politarchs.

Please not God ( $\Theta \varepsilon \omega \mu \eta$ $\alpha \rho \varepsilon \sigma \kappa o \nu \tau \omega v$ ). The rabbis and Jews thought that they were pleasing God by so doing as Paul did when he ravaged the young church in Jerusalem. But Paul knows better now.

And are contrary to all men ( $\kappa \alpha \pi \alpha \sigma \iota v \alpha v \theta \rho \omega \pi о \iota \varsigma ~ \varepsilon v \alpha v \tau \iota \omega v$ ). Dative case with the adjective $\varepsilon v a v \tau \iota \omega v$ (old and common word, face to face, opposite). It seems like a bitter word about Paul's countrymen whom he really loved (Ro 9:1-5; 10:1-6), but Paul knew only too well the middle wall of partition between Jew and Gentile as he shows in Eph 2 and which only the Cross of Christ can break down. Tacitus (Hist. V.5) says that the Jews are adversus omnes alios hostile odium.

1Thess 2:16
Forbidding us ( $\kappa \omega \lambda \nu 0 v \tau \omega \nu \eta \mu \alpha \varsigma)$. Explanatory participle of the idea in $\varepsilon v \alpha v \tau \iota \omega v$. They show their hostility to Paul at every turn. Right here in Corinth, where Paul is when he writes, they had already shown venomous hostility toward Paul as Luke makes plain (Ac 18:6ff. ). They not simply oppose his work among the Jews, but also to the Gentiles ( $\varepsilon \theta v \varepsilon \sigma$, nations outside of the Abrahamic covenant as they understood it).

That they may be saved ( $\mathrm{v} \alpha \sigma \omega \theta \omega \sigma \tau v$ ). Final use of $\mathrm{v} \alpha$ with first aorist passive subjunctive of $\sigma \omega \zeta \omega$ old verb to save. It was the only hope of the Gentiles, Christ alone and not the mystery-religions offered any real hope.

To fill up their sins alway ( $\varepsilon \iota \varsigma \tau 0 ~ \alpha v a \pi \lambda \eta \rho \omega \sigma \alpha \alpha \nu \tau \omega v \tau \alpha \varsigma ~ a \mu \alpha \rho \tau \iota \alpha \varsigma \pi \alpha \nu \tau о \tau \varepsilon$ ). Another example of $\varepsilon$ וৎ $\tau 0$ and the infinitive as in verse 12. It may either be God's conceived plan to allow the Jews to go on and fill up ( $\alpha v \alpha \pi \lambda \eta \rho \omega \sigma \alpha$, note $\alpha v \alpha$, fill up full, old verb) or it may be the natural result from the continual ( $\pi \alpha v \tau о \tau \varepsilon)$ sins of the Jews.

Is come ( $\varepsilon \varphi \theta \alpha \sigma \varepsilon v)$. First aorist (timeless aorist) active indicative of $\varphi \theta \alpha v \omega$ which no longer means to come before as in 1Th 4:15 where alone in the N.T. it retains the old idea of coming before. Some MSS. have the perfect active $\varepsilon \varphi \theta a \kappa \varepsilon \nu$, prophetic perfect of realization already. Frame translates it: "But the wrath has come upon them at last." This is the most likely meaning of $\varepsilon \iota \varsigma \tau \varepsilon \lambda o \varsigma$. Paul vividly foresees and foretells the final outcome of this attitude of hate on the part of the Jews. Tristis exitus, Bengel calls it. Paul speaks out of a sad experience.

1Thess 2:17
Being bereaved of you ( $\alpha \pi \sigma \rho \varphi \alpha v \iota \sigma \theta \varepsilon \nu \tau \varepsilon \varsigma \alpha \varphi^{\prime} v \mu \omega v$ ). First aorist passive participle of the rare compound verb ( $\alpha \pi о \rho \varphi \alpha v i \zeta \omega$, in Aeschylus, but nowhere else in N.T.). Literally,
being orphaned from you ( $\alpha \varphi^{\prime} v \mu \omega v$, ablative case). Paul changes the figure again ( $\tau \rho о \varphi о \varsigma$ or mother nurse in verse $7, v \eta \pi \iota \circ \varsigma$ or babe in verse $7, \pi \alpha \tau \eta \rho$ or father in verse 11) to
orphan (oppavoc). He refers to the period of separation from them,
for a short season ( $\pi \rho \circ \varsigma \kappa \alpha \iota \rho o v \omega \rho \alpha \varsigma$ ) for a season of an hour. This idiom only here in N.T., but $\pi \rho \circ \varsigma \kappa \alpha \mu \rho o v$ in $\mathrm{Lu} 8: 13$ and $\pi \rho \circ \varsigma \omega \rho a v$ in 2Co 7:8. But it has seemed long to Paul. Precisely how long he had been gone we do not know, some months at any rate.

In presence, not in heart ( $\pi \rho \circ \sigma \omega \pi \omega$ ov $\kappa \alpha \rho \delta \Delta \alpha$ ). Locative case. Проб $\quad \pi \sigma v$, old word ( $\pi \rho \circ \sigma$, o $о \varsigma$, in front of the eye, face) for face, look, person. Literally,
in face or person. His heart was with them, though they no longer saw his face. Heart, originally кар $\delta \iota \alpha$, is the inner man, the seat of the affections and purposes, not always in contrast with intellect (vouc). "Out of sight, not out of mind" (Rutherford).

Endeavoured the more exceedingly ( $\pi \varepsilon \rho \iota \sigma \sigma о \tau \varepsilon \rho \omega \varsigma \varepsilon \sigma \pi о \cup \delta \alpha \sigma \alpha \mu \varepsilon v)$ ). Ingressive aorist active indicative of $\sigma \pi \sigma v \delta a \zeta \omega$, old word to hasten (from $\sigma \pi \circ v \delta \eta, \sigma \pi \varepsilon v \delta \omega)$ ).

We became zealous . Comparative adverb $\pi \varepsilon \rho \iota \sigma \sigma о \tau \varepsilon \rho \omega \varsigma$ from $\pi \varepsilon \rho \circ \sigma \sigma o v$, more abundantly than before being orphaned from you.

face above.
With great desire ( $\varepsilon v \pi o \lambda \lambda \eta \varepsilon \pi ı \theta v \mu ı \alpha)$.
In much longing ( $\varepsilon \pi \iota \theta \nu \mu \downarrow$ from $\varepsilon \pi$ and $\theta \nu \mu \circ \varsigma, \varepsilon \pi \iota \theta \nu \mu \varepsilon \omega$, to run after, to yearn after, whether good or bad).

1Thess 2:18
Because ( $\delta$ เoт). As in 2:8.
We would fain have come to you ( $\eta \theta \varepsilon \lambda \eta \sigma \alpha \mu \varepsilon v \varepsilon \lambda \theta \varepsilon เ v \pi \rho o \varsigma v \mu \alpha \varsigma)$. First aorist active indicative of $\theta \varepsilon \lambda \omega$. Literally,
we desired to come to you. I Paul ( $\varepsilon \gamma \omega \mu \varepsilon v$ П $\alpha \nu \lambda o \varsigma)$. Clear example of literary plural $\eta \theta \varepsilon \lambda \varepsilon \sigma \alpha \mu \varepsilon v$ with singular pronoun $\varepsilon \gamma \omega$. Paul uses his own name elsewhere also as in 2 Co 10:1; Ga 5:2; Col 1:23; Eph 3:1; Phm 1:19.

Once and again ( $\kappa \alpha \alpha \pi \alpha \xi \kappa \alpha \delta \iota \varsigma)$.
Both once and twice as in Php 4:16. Old idiom in Plato.
And Satan hindered us ( $\kappa \alpha \varepsilon \nu \varepsilon \kappa о \psi \varepsilon \nu \eta \mu \alpha \varsigma$ о इaтаvac). Adversative use of $\kappa \alpha \iota=$ but or and yet. First aorist active indicative of $\varepsilon v \kappa о \pi \tau \omega$, late word to cut in, to hinder. Milligan quotes papyrus example of third century, B.C. Verb used to cut in a road, to make a road impassable. So Paul charges Satan with cutting in on his path. Used by Paul in Ac 24:4; Ga 5:7 and passive $\varepsilon v \varepsilon \kappa о \pi \tau о \mu \eta v$ in Ro 15:22; 1Pe 3:7. This hindrance may have been illness, opposition of the Jews in Corinth, what not.

1Thess 2:19

Crown of glorying ( $\sigma \tau \varepsilon \varphi \alpha v o \varsigma ~ \kappa \alpha u \chi \eta \sigma \varepsilon \omega \varsigma)$. When a king or conqueror came on a visit he was given a chaplet of glorying. Paul is answering the insinuation that he did not really wish to come.

At his coming ( $\varepsilon v \tau \eta$ avtov $\pi \alpha \rho o v \sigma \iota \alpha$ ). This word $\pi \alpha \rho o v \sigma \iota \alpha$ is untechnical (just presence from $\pi \alpha \rho \varepsilon \mu \mu$ ) in 2Th 2:9; 1Co 16:17; 2Co 7:6f.; 10:10; Php 1:26; 2:12. But here (also 1Th 3:13; 4:15; 5:23; 2Th 2:1,8; 1Co 15:23) we have the technical sense of the second coming of Christ. Deissmann (Light from the Ancient East, pp. 372ff.) notes that the word in the papyri is almost technical for the arrival of a king or ruler who expects to receive his "crown of coming." The Thessalonians, Paul says, will be his crown, glory, joy when Jesus comes.

## 1 Thessalonians 3

1Thess 3:1
When we could no longer forbear ( $\mu \eta \kappa \varepsilon \tau \sigma \tau \varepsilon \gamma \sigma v \tau \varepsilon \varsigma$ ). $\Sigma \tau \varepsilon \gamma \omega$ is old verb to cover from $\sigma \tau \varepsilon \gamma \eta$, roof (Mr 2:4) , to cover with silence, to conceal, to keep off, to endure as here and 1Co 9:12; 13:7. In the papyri in this sense (Moulton and Milligan's Vocabulary). Мŋкєє usual negative with participle in the Koine rather than ouкะт.

We thought it good ( $\eta \cup \delta о к \eta \sigma \alpha \mu \varepsilon v$ ). Either literary plural as in 2:18 or Paul and Silas as more likely. If so, both Timothy and Silas came to Athens (Ac 17:15f. ), but Timothy was sent (we sent, $\varepsilon \pi \varepsilon \mu \psi \alpha \mu \varepsilon \nu$, verse 2) right back to Thessalonica and later Paul sent Silas on to Beroea or Thessalonica (verse 5,

I sent, $\varepsilon \pi \varepsilon \mu \psi \alpha$ ). Then both Silas and Timothy came from Macedonia to Corinth (Ac 18:5).

Alone ( $\mu \mathrm{ovo}$ ). Including Silas.
God's minister ( $\delta$ takovov qou $\theta$ cov). See on Mt 22:13 for this interesting word, here in general sense not technical sense of deacon. Some MSS. have
fellow-worker ( $\sigma v v \varepsilon \rho \gamma o v$ ). Already
apostle in $2: 7$ and now
brother, minister (and possibly
fellow-worker ).
1Thess 3:3
That no man be moved ( $\tau 0 \mu \eta \delta \varepsilon v \alpha \sigma \alpha ı v \varepsilon \sigma \theta \alpha$ ). Epexegetical articular infinitive in accusative case of general reference. $\Sigma \alpha \iota v \omega$ is old word to wag the tail, to flatter, beguile and this sense suits here (only N.T. example). The sense of "moved" or troubled or disheartened is from $\sigma \iota \alpha \iota v \varepsilon \sigma \theta \alpha$ the reading of $\mathrm{F} G$ and found in the papyri.

We are appointed ( $\kappa \varepsilon \iota \mu \theta \alpha)$. Present middle, used here as passive of $\tau \iota \theta \eta \mu$. We Christians are set
hereunto ( $\varepsilon \iota \varsigma ~ \tau o v \tau o) ~ t o ~ b e ~ b e g u i l e d ~ b y ~ t r i b u l a t i o n s . ~ W e ~ m u s t ~ r e s i s t . ~$
1Thess 3:4
We told you beforehand ( $\pi \rho \circ \varepsilon \lambda \varepsilon \gamma \circ \mu \varepsilon v \nu \mu v)$. Imperfect active, we used to tell you beforehand. Old verb, rare in N.T. (only in Paul).

That we are to suffer persecution (o $\tau \mu \varepsilon \lambda \lambda \rho \varepsilon \varepsilon \nu \lambda เ \beta \varepsilon \sigma \theta \alpha)$. M $\varepsilon \lambda \lambda \omega$ and present passive infinitive. Not mere prediction, but God's appointed will as it turned out in Thessalonica.

1Thess 3:5
That I might know ( $\varepsilon \iota \varsigma ~ \tau o ~ \gamma \nu \omega \nu \alpha$ ). Paul's common idiom (verse 2), $\varepsilon \iota \varsigma ~ \tau o ~ a n d ~ t h e ~ i n-~$ finitive of purpose (second aorist ingressive active of $\gamma เ v \omega \sigma \kappa \omega$, come to know).

Lest by any means the tempter had tempted you ( $\mu \eta \pi \omega \varsigma \varepsilon \pi \varepsilon \iota \rho \alpha \sigma \varepsilon v v \mu \alpha \varsigma$ о $\pi \varepsilon \iota \rho \alpha \zeta \omega v$ ). Findlay takes this as a question with negative answer, but most likely negative final clause
with $\mu \eta \pi \omega \varsigma$ about a past action with aorist indicative according to the classic idiom as in Ga 2:2 ( $\mu \eta \pi \omega \sigma--\varepsilon \delta \rho a \mu \mathrm{ov}$ ) and Ga 4:11 after verb of fearing (Robertson, Grammar, p. 988). It is a fear that the thing may turn out to be so about the past.

Should be $(\gamma \varepsilon \vee \eta \tau \alpha)$. Here the usual construction appears (aorist subjunctive with $\mu \eta$ $\pi \omega \varsigma)$ about the future.

1Thess 3:6
Even now ( $\alpha \rho \tau$ ). Just now, Timothy having come ( $\varepsilon \lambda \theta$ ov $\sigma \circ \varsigma$ T $\mu \circ \theta \varepsilon \sigma v$, genitive absolute). Why Silas is not named is not clear, unless he had come from Beroea or elsewhere in Macedonia.

Glad tidings of ( $\varepsilon v a \gamma \gamma \varepsilon \lambda ı \sigma \alpha \mu \varepsilon v o v)$. First aorist middle participle of the verb for evangelizing (gospelizing).

Good remembrance ( $\mu v \varepsilon \iota \alpha \nu$ ). Same word used by Paul 1:2.
Longing to see us ( $\varepsilon \pi \iota \pi \circ \theta$ ovv $\tau \varepsilon \varsigma \eta \mu \propto \varsigma \iota \varepsilon \iota v$ ). Old and strong verb, $\varepsilon \pi \iota-$, directive, to long after. Mutual longing that pleased Paul ("we also you").

1Thess 3:7
Over you $\left(\varepsilon \varphi^{\prime} v \mu v\right)$. E $\pi$ with the locative, the basis on which the "comfort" rests.
In $(\varepsilon \pi)$. Locative case again with $\varepsilon \pi$.
Distress ( $\alpha \vee \alpha \gamma \kappa \eta$ ).
Physical necessity, common sense in late Greek, choking ( $\alpha \gamma \chi \omega$, $\alpha \nu \gamma \rho \rho$ ), and crushing trouble $\left(\theta \lambda \iota \psi \iota \sigma, \theta \lambda_{\iota} \beta \omega\right)$.
1Thess 3:8
If ye stand fast ( $\varepsilon \alpha \nu v \mu \varepsilon ı \varsigma \sigma \tau\rceil \kappa \varepsilon \tau \varepsilon$ ). Condition of first class, $\varepsilon \alpha \nu$ and present active indicative (correct text, not $\sigma \tau \eta \kappa \eta \tau \varepsilon$ subj.) of $\sigma \tau \eta \kappa \omega$, late form from perfect $\varepsilon \sigma \tau \eta \kappa \alpha$ of $\iota \sigma \tau \mu$, to place.

1Thess 3:9
Render again unto God ( $\tau \omega \theta \varepsilon \omega \alpha \nu \tau \alpha \pi o \delta o v v \alpha$ ). Second aorist active infinitive of double compound verb $\alpha \nu \tau-\alpha \pi o \delta i \delta \omega \mu$, to give back ( $\alpha \pi 0$ ) in return for ( $\alpha v \tau$ ). Old verb rare in N.T., but again in 2Th 1:6 .

For you ( $\pi \varepsilon \rho v \mu \omega v$ ). Around (concerning) you, while in verse $2 v \pi \varepsilon \rho$ (over is used for "concerning your faith."

For $(\varepsilon \pi)$. Basis again as cause or ground for the joy.
Wherewith we joy ( $\eta \chi \alpha \iota \rho o \mu \varepsilon v$ ). Probably cognate accusative $\eta \nu$ with $\chi \alpha \iota \rho \circ \mu \varepsilon v$ attracted to locative $\chi \alpha \rho \alpha$ (Mt 2:10).

1Thess 3:10
Exceedingly (v $\pi \varepsilon \rho \varepsilon \kappa \pi \varepsilon \rho \iota \sigma \sigma o v)$. Double compound adverb, only in 1Th 3:10; 5:13 (some MSS. $-\omega \varsigma)$. Like piling Ossa on Pelion, $\pi \varepsilon \rho \iota \sigma \sigma \omega \varsigma$, abundantly, $\varepsilon \kappa \pi \varepsilon \rho \iota \sigma \sigma o v$, out of bounds, $v \pi \varepsilon \rho \varepsilon \kappa \pi \varepsilon \rho \iota \sigma \sigma o v$, more than out of bounds (overflowing all bounds).

And perfect ( $\kappa \alpha \kappa \alpha \tau \alpha \rho \tau \iota \sigma \alpha$ ). First aorist active articular infinitive of purpose ( $\varepsilon \iota \varsigma \tau 0$ เ $\delta \varepsilon \iota \nu-\kappa \alpha$ ) of катартı广 $\omega$, to mend nets (Mt 4:21) or men (Ga 6:1) repair. Chiefly late.

That which is lacking in ( $\tau \alpha v \sigma \tau \varepsilon \rho \eta \mu \alpha \tau \alpha$ ). The shortcomings, the lacks or left-overs (Col 1:24). From vo兀є $\rho \varepsilon \omega$ (vбт $\rho \rho \circ$ ), to be late.

1Thess 3:11
Our God and Father himself ( $\alpha v \tau о \varsigma$ о $\theta \varepsilon о \varsigma \kappa \alpha \pi \alpha \tau \eta \rho \eta \mu \omega v$ ). Note one article with both substantives for one person.

And our Lord Jesus ( $\kappa \alpha$ о Kvpıоя $\eta \mu \omega \nu$ Iqбоvৎ). Separate article here with I I $\sigma o v \varsigma . ~ I n ~$ Tit 2:13; 2Pe 1:1 only one article (not two) treating "our God and Saviour Jesus Christ" as one just like "our Lord and Saviour Jesus Christ" in 2Pe 1:11; 2:20; 3:18.

Direct our way ( $\kappa \alpha \tau \varepsilon v \theta v \nu \alpha \tau \eta v$ o $\delta o v \eta \mu \omega \nu$ ). First aorist optative (acute accent on penult, not circumflex first aorist active infinitive) of $\kappa \alpha \tau \varepsilon v \theta v \nu \omega$, old verb to make straight path. Singular verb also, though both God and Christ mentioned as subject (unity in the Godhead). Apart from $\mu \eta \gamma \varepsilon$ vouto ( may it not come to pass ) the optative in a wish of the third person is found in N.T. only in 1Th 3:11,12; 5:23; 2Th 2:17; 3:5,16; Ro 15:5,13.

1Thess 3:12
The Lord (o Kupıos). The Lord Jesus. Paul prays to Christ.
Make you to increase ( $v \mu \alpha \varsigma \pi \lambda \varepsilon \sigma v \alpha \sigma \alpha$ ). First aorist active optative (wish for future) of $\pi \lambda \varepsilon o v a \zeta \omega$, late verb from $\pi \lambda \varepsilon o v$ (more),
to superabound .
And abound ( $\pi \varepsilon \rho เ \sigma \sigma \varepsilon v \sigma \alpha$ ). First aorist active optative (wish for future) of $\pi \varepsilon \rho เ \sigma \sigma \varepsilon v \omega$ from $\pi \varepsilon \rho \iota \sigma \sigma \circ \varsigma$, old verb, to be over (common in N.T.). It is hard to see much difference between the two verbs.

1Thess 3:13
To the end he may stablish ( $\varepsilon ı \varsigma ~ \tau о ~ \sigma \tau \eta \rho ı \xi \alpha$ ). Another example of $\varepsilon ı \varsigma$ and the articular infinitive of purpose. Same idiom in 3:2. From $\sigma \tau \eta \rho \zeta \omega$, from $\sigma \tau \eta \rho \iota \gamma \xi$, a support.

Unblameable ( $\alpha \mu \varepsilon \mu \pi \tau о \nu \varsigma$ ). Old compound adjective ( $\alpha$ privative and verbal of $\mu \varepsilon \mu \varphi о \mu \alpha$, to blame). Rare in N.T. Predicate position here. Second coming of Christ again.

## 1 Thessalonians 4

1Thess 4:1
Finally ( $\lambda_{0} \iota \pi \frac{v}{}$ ). Accusative of general reference of $\lambda o \iota \pi \circ \varsigma$, as for the rest. It does not mean actual conclusion, but merely a colloquial expression pointing towards the end (Milligan) as in 2Co 13:11; 2Ti 4:8. So to 入ormov in 2Th 3:1; Php 3:1; 4:8 .

We beseech ( $\varepsilon \rho \omega \tau \omega \mu \varepsilon v$ ). Not "question" as in ancient Greek, but as often in N.T. (1Th 5:12; 2Th 2:1; Php 4:3) and also in papyri to make urgent request of one.

How ye ought ( $\tau 0 \pi \omega \varsigma \delta \varepsilon v \mu a \varsigma$ ). Literally, explanatory articular indirect question ( $\tau 0$ $\pi \omega \varsigma)$ after $\pi \alpha \rho \varepsilon \lambda \alpha \beta \eta \tau \varepsilon$ according to common classic idiom in Luke (Lu 1:62; 22:2,4,23,24) and Paul (Ro 8:26).

That ye abound ( $\iota v a \pi \varepsilon \rho เ \sigma \sigma \varepsilon \cup \eta \tau \varepsilon$ ). Loose construction of the $\tau v a$ clause with present subjunctive after two subordinate clauses with $\kappa \alpha \theta \omega$ (as, even as) to be connected with "beseech and exhort."

More and more ( $\mu \alpha \lambda \lambda o v$ ). Simply
more, but added to same idea in $\pi \varepsilon \rho\llcorner\sigma \sigma \varepsilon \cup \eta \tau \varepsilon$. See also verse 11.
1Thess 4:2
What charge ( $\tau \imath v a \varsigma ~ \pi \alpha \rho a \gamma \gamma \varepsilon \lambda \iota \alpha \varsigma)$. Plural, charges or precepts, command (Ac 16:24), prohibition (Ac 5:28), right living (1Ti 1:5). Military term in Xenophon and Polybius.

1Thess 4:3
Your sanctification (o $\alpha \gamma \omega \sigma \mu \rho \varsigma \nu \mu \omega v$ ). Found only in the Greek Bible and ecclesiastical writers from $\alpha \gamma \iota \alpha \zeta \omega$ and both to take the place of the old words $\alpha \gamma \iota \omega \omega, \alpha \gamma \iota \sigma \mu \circ$, with their technical ideas of consecration to a god or goddess that did not include holiness in life. So Paul makes a sharp and pointed stand here for the Christian idea of sanctification as being "the will of God" (apposition) and as further explained by the epexegetic infinitive
that ye abstain from fornication ( $\alpha \pi \varepsilon \chi \varepsilon \sigma \theta \alpha \cup \mu \alpha \varsigma \alpha \pi о \quad \tau \eta \varsigma \pi о \rho v \varepsilon 1 \alpha \varsigma$ ). Pagan religion did not demand sexual purity of its devotees, the gods and goddesses being grossly immoral. Priestesses were in the temples for the service of the men who came.

1Thess 4:4
That each one of you know how ( $\varepsilon \delta \delta \varepsilon v \alpha \varepsilon \kappa \alpha \sigma \tau o v v \mu \omega v$ ). Further epexegetic infinitive (second perfect active), learn how and so know how (learn the habit of purity).

To possess himself of his own vessel (то عavтоv бкعvoc ктабӨa). Present middle infinitive of $\kappa \tau \alpha \circ \mu \alpha$, to acquire, not $\kappa \varepsilon \kappa \tau \eta \sigma \theta \alpha$, to possess. But what does Paul mean by "his own vessel"? It can only mean his own body or his own wife. Objections are raised against either view, but perhaps he means that the man shall acquire his own wife "in sanctification and honour," words that elevate the wife and make it plain that Paul demands sexual purity on the part of men (married as well as unmarried). There is no double standard here. When the husband comes to the marriage bed, he should come as a chaste man to a chaste wife.

1Thess 4:5
Not in the passion of lust ( $\mu \eta \varepsilon \nu \pi \alpha \theta \varepsilon \varepsilon \pi \iota \theta \nu \mu \iota \alpha \varsigma)$. Plain picture of the wrong way for the husband to come to marriage.

That know not God ( $\tau \alpha \mu \eta \varepsilon \varepsilon \delta o \tau \alpha \operatorname{\tau ov} \theta \varepsilon o v$ ). Second perfect participle of oı $\delta \alpha$. The heathen knew gods as licentious as they are themselves, but not God. One of the reasons for the revival of paganism in modern life is professedly this very thing that men wish to get rid of the inhibitions against licentiousness by God.

1Thess 4:6
That no man transgress ( $\tau 0 \mu \eta v \pi \varepsilon \rho \beta \alpha i v \varepsilon \imath v$ ). Old verb to go beyond. Final use of to (accusative of general reference) and the infinitive (negative $\mu \eta$ ), parallel to $\alpha \pi \varepsilon \chi \varepsilon \sigma \theta \alpha$ and $\varepsilon І \delta \varepsilon v a \kappa \tau \alpha \sigma \theta a$ above.

And wrong his brother ( $\kappa \alpha \pi \lambda \varepsilon о v \varepsilon \kappa \tau \varepsilon เ \nu \tau o v ~ \alpha \delta \varepsilon \lambda \varphi о \nu \alpha v \tau o v)$. To take more, to overreach, to take advantage of, to defraud.

In the matter $(\varepsilon \nu \tau \omega \pi \rho \alpha \gamma \mu \alpha \tau)$. The delicacy of Paul makes him refrain from plainer terms and the context makes it clear enough as in 2Co 7:11 ( $\tau \omega \pi \rho \alpha \gamma \mu \alpha \tau)$.

An avenger ( $\varepsilon \kappa \delta \iota \kappa \circ \varsigma)$. Regular term in the papyri for legal avenger. Modern men and women need to remember that God is the avenger for sexual wrongs both in this life and the next.

1Thess 4:7
Not for uncleanness, but in sanctification ( $\varepsilon \pi \alpha \kappa \alpha \theta \alpha \rho \sigma \iota \alpha \alpha \lambda \lambda^{\prime} \varepsilon \nu \alpha \gamma \iota \alpha \sigma \mu \omega$ ). Sharp contrast made still sharper by the two prepositions $\varepsilon \pi$ (on the basis of) and $\varepsilon v$ (in the sphere of). God has "called" us all for a decent sex life consonant with his aims and purposes. It was necessary for Paul to place this lofty ideal before the Thessalonian Christians living in a pagan world. It is equally important now.

1Thess 4:8
Therefore ( $\tau o t \gamma \alpha \rho o v v$ ). This old triple compound particle ( $\tau o \iota, \gamma \alpha \rho, o v v$ ) is in the N.T. only here and Heb 12:1. Paul applies the logic of the case.

He that rejecteth (o $\alpha \theta \varepsilon \tau \omega \nu$ ). This late verb (Polybius and LXX) is from $\alpha-\theta \varepsilon \tau o \varsigma ~(~ \alpha$ privative and verbal of $\tau \iota \theta \eta \mu$, to proscribe a thing, to annul it.

But God ( $\alpha \lambda \lambda \alpha \operatorname{\tau ov} \theta \varepsilon o v$ ). Paul sees this clearly and modern atheists see it also. In order to justify their licentiousness they do not hesitate to set aside God.

1Thess 4:9
Concerning love of the brethren ( $\pi \varepsilon \rho \tau \eta \varsigma \varphi i \lambda \alpha \delta \varepsilon \lambda \varphi \iota \alpha \varsigma)$. Late word, love of brothers or sisters. In profane Greek (one papyrus example) and LXX the word means love of those actually kin by blood, but in the N.T. it is the kinship in the love of Christ as here.

Are taught by God ( $\theta \varepsilon o \delta \iota \delta \alpha \kappa \tau о \varepsilon \sigma \tau \varepsilon)$. Only here and ecclesiastical writers. Passive verbal adjective in - тos from $\delta \iota \delta a \sigma \kappa \omega$ as if $\theta$ so- in ablative case like $\delta \iota \delta \alpha \kappa \tau$ т $\theta \varepsilon$ ov (Joh 6:45 ).

To love one another ( $\varepsilon ı \varsigma ~ \tau o ~ a \gamma a \pi \alpha ı v ~ \alpha \lambda \lambda \eta \lambda o u \varsigma)$. Another example of $\varepsilon \iota \varsigma ~ \tau o ~ a n d ~ t h e ~$ infinitive. Only those taught of God keep on loving one another, love neighbours and even enemies as Jesus taught (Mt 5:44). Note the use of $\alpha \gamma \alpha \pi \alpha \omega$, not $\varphi i \lambda \varepsilon \omega$.

1Thess 4:10
 Delicate praise.

1Thess 4:11
 $\pi \alpha \rho a \kappa \alpha \lambda o u \mu \varepsilon v$ (verse 10, we exhort you), the second on $\varphi \backslash \lambda о \tau \mu \mu \varepsilon \iota \sigma$ a (old verb from $\varphi \lambda \lambda о \tau \mu \mu \circ$, fond of honour, $\varphi\rangle \lambda о \sigma, \tau \mu \eta)$. The notion of ambition appears in each of the three N.T. examples (1Th 4:11; 2Co 5:9; Ro 5:20 ), but it is ambition to do good, not evil. The word ambition is Latin (ambitio from ambo, ire), to go on both sides to accomplish one's aims and often evil). A preacher devoid of ambition lacks power. There was a restless spirit in Thessalonica because of the misapprehension of the second coming. So Paul urges an ambition to be quiet or calm, to lead a quiet life, including silence (Ac 11:18).

To do your own business ( $\pi \rho \alpha \sigma \sigma \varepsilon เ \nu \tau \alpha เ \delta i \alpha)$. Present infinitive like the others, to have the habit of attending to their own affairs ( $\tau \alpha \wedge \delta 1 \alpha$ ). This restless meddlesomeness here condemned Paul alludes to again in 2Th 3:11 in plainer terms. It is amazing how much wisdom people have about other people's affairs and so little interest in their own.

To work with your own hands ( $\varepsilon \rho \gamma \alpha \zeta \varepsilon \sigma \theta a$ таıৎ $\chi \varepsilon \rho \sigma \tau \nu \nu \mu \omega v$ ). Instrumental case ( $\chi \varepsilon \rho \sigma เ v)$. Paul gave a new dignity to manual labour by precept and example. There were "pious" idlers in the church in Thessalonica who were promoting trouble. He had commanded them when with them.

1Thess 4:12
That ye may walk honestly (ıva $\pi \varepsilon \rho \iota \pi \alpha \tau \eta \tau \varepsilon \varepsilon v \sigma \chi \eta \mu \circ v \omega \varsigma)$ ). Present subjunctive (linear action). Old adverb from $\varepsilon v \sigma \chi \eta \mu \omega v$ ( $\varepsilon v, \sigma \chi \eta \mu \alpha$, Latin habitus, graceful figure), becomingly, decently. In N.T. only here and Ro 13:13. This idea includes honest financial transactions, but a good deal more. People outside the churches have a right to watch the conduct of professing Christians in business, domestic life, social life, politics.

1Thess 4:13
We would not have (ov $\theta \varepsilon \lambda o \mu \varepsilon v$ ). We do not wish.
You ignorant ( $\nu \mu \alpha \varsigma \alpha \gamma v o \varepsilon i v$ ). Old word, not to know ( $\alpha$ privative, $\gamma v o-$, root of $\gamma \iota v \omega \sigma \kappa \omega)$. No advantage in ignorance of itself.

Concerning them that fall asleep ( $\pi \varepsilon \rho \tau \omega v \kappa о \not \mu \omega \mu \varepsilon v \omega v$ ). Present passive (or middle) participle (Aleph B) rather than the perfect passive кєкоц$\mu \mu \varepsilon v \omega \nu$ of many later MSS. From old ког $\mu \alpha \omega$, to put to sleep. Present tense gives idea of repetition, from time to time fall asleep. Greeks and Romans used this figure of sleep for death as Jesus does (Joh 11:11) and
N.T. generally (cf. our word cemetery). Somehow the Thessalonians had a false notion about the dead in relation to the second coming.
 of the hopelessness of the pagan world about the future life is amply illustrated in ancient writings and particularly by inscriptions on tombs (Milligan). Some few pagans clung to this hope, but most had none.

1Thess 4:14
For if we believe ( $\varepsilon \gamma \alpha \rho \pi \iota \sigma \tau \varepsilon v o \mu \varepsilon v)$. Condition of first class, assuming the death and resurrection of Jesus to be true.

In Jesus ( $\delta ı \alpha$ tov I $\eta \sigma \circ 0$ ). Literally, through or by means of Jesus. It is amphibolous in position and can be taken either with tovs коц $\mu \eta \varepsilon \varepsilon \tau \tau \alpha \varsigma$ (that are fallen asleep in or through Jesus) like o коњ $\eta \varepsilon \varepsilon v \tau \varepsilon \varsigma \varepsilon v$ X $\operatorname{\rho \prime \sigma \tau \omega }$ in 1Co 15:18 and probably correct or with $\alpha \xi \varepsilon$ (through Jesus with God).

With him ( $\sigma \cup \vee \alpha \cup \tau \omega$ ). Together with Jesus. Jesus is the connecting link ( $\delta 1 \alpha$ ) for those that sleep (коцך $\theta \varepsilon v \tau \alpha \varsigma$ first aorist passive, but with middle sense) and their resurrection.

1Thess 4:15
By the word of the Lord ( $\varepsilon v \lambda o \gamma \omega$ Kvpıov). We do not know to what word of the Lord Jesus Paul refers, probably Paul meaning only the point in the teaching of Christ rather than a quotation. He may be claiming a direct revelation on this important matter as about the Lord's Supper in 1Co 11:23. Jesus may have spoken on this subject though it has not been preserved to us (cf. Mr 9:1).

Ye that are alive ( $\eta \mu \varepsilon \iota \varsigma$ o $\zeta \omega \nu \tau \varepsilon \varsigma)$. Paul here includes himself, but this by no means shows that Paul knew that he would be alive at the Parousia of Christ. He was alive, not dead, when he wrote.

Shall in no wise precede ( $o v \mu \eta \varphi \theta \alpha \sigma \omega \mu \varepsilon v$ ). Second aorist active subjunctive of $\varphi \theta \alpha v \omega$, to come before, to anticipate. This strong negative with ov $\mu \eta$ (double negative) and the subjunctive is the regular idiom (Robertson, Grammar, p. 929). Hence there was no ground for uneasiness about the dead in Christ.

1Thess 4:16
With a shout ( $\varepsilon v \kappa \varepsilon \lambda \varepsilon v \sigma \mu \alpha \tau$ ). Note this so-called instrumental use of $\varepsilon v$. Old word, here only in N.T., from $\kappa \varepsilon \lambda \varepsilon v \omega$, to order, command (military command). Christ will come as Conqueror.

With the voice of the archangel ( $\varepsilon v \varphi \omega v \eta \alpha \rho \chi \alpha \gamma \gamma \varepsilon \lambda o v$ ). Further explanation of $\kappa \varepsilon \lambda \varepsilon v \sigma \mu \alpha \tau$ (command). The only archangel mentioned in N.T. is Michael in Jude 1:9. But note absence of article with both $\varphi \omega v \eta$ and $\alpha \rho \chi \alpha \gamma \gamma \varepsilon \lambda o u$. The reference may be thus indefinite.

With the trump of God ( $\varepsilon v \sigma \alpha \lambda \pi \gamma \gamma \gamma \theta \varepsilon o v)$. Trumpet. See same figure in 1Co 15:52.
The dead in Christ shall rise first (o vєкро $\varepsilon v$ X

First here refers plainly to the fact that, so far from the dead in Christ having no share in the Parousia, they will rise before those still alive are changed.

1Thess 4:17
Then ( $\varepsilon \pi \varepsilon \iota \tau \alpha)$. The next step, not the identical time ( $\tau 0 \tau \varepsilon$ ), but immediately afterwards.
Together with them ( $\alpha \mu \alpha \sigma \cup v \alpha v \tau o ı c)$. Note both $\alpha \mu \alpha$ (at the same time) and $\sigma v v$ (together with) with the associative instrumental case autoos (the risen saints).

Shall be caught up ( $\alpha \rho \pi \alpha \gamma \eta \sigma \sigma \mu \varepsilon \theta \alpha)$. Second future passive indicative of $\alpha \rho \pi \alpha \zeta \omega$, old verb to seize, to carry off like Latin rapio.

To meet the Lord in the air ( $\varepsilon ı \varsigma \alpha \pi \alpha \nu \tau \eta \sigma \iota v$ tov Kvpıov $\varepsilon \iota \varsigma \alpha \varepsilon \rho \alpha$ ). This special Greek idiom is common in the LXX like the Hebrew, but Polybius has it also and it occurs in the papyri (Moulton, Proleg., p. 14, n. 3). This rapture of the saints (both risen and changed) is a glorious climax to Paul's argument of consolation.

And so ( $\kappa \alpha$ ovt $\omega \varsigma$ ). This is the outcome, to be forever with the Lord, whether with a return to earth or with an immediate departure for heaven Paul does not say. To be with Christ is the chief hope of Paul's life (1Th 5:10; Php 1:23; Col 3:4; 2Co 5:8).

1Thess 4:18
With these words ( $\varepsilon v$ toı $\boldsymbol{\lambda o \gamma o ı}$ tovious). In these words. They were a comfort to the Thessalonians as they still comfort the people of God.

## 1 Thessalonians 5

1Thess 5:1
But concerning the times and the seasons ( $\pi \varepsilon \rho \delta \varepsilon \tau \omega \nu \chi \rho \circ \nu \omega \nu \kappa \alpha \tau \omega v \kappa \alpha \iota \omega v$ ). See both words used also in Tit 1:2f. X $\quad$. space of time.

1Thess 5:2
Know perfectly ( $\alpha \kappa \rho \iota \omega \varsigma$ oı $\delta \alpha \tau \varepsilon$ ). Accurately know, not "the times and the seasons," but their own ignorance.

As a thief in the night ( $\omega \varsigma \kappa \lambda \varepsilon \pi \tau \eta \varsigma \varepsilon \nu \nu v \kappa \tau$ ). As a thief at night, suddenly and unexpectedly. Reminiscence of the word of Jesus (Mt 24:43; Lu 12:39), used also in $2 \mathrm{Pe} 3: 10$; Re 3:3; 16:15.

Cometh ( $\varepsilon \rho \chi \varepsilon \tau \alpha)$. Prophetic or futuristic present tense.
1Thess 5:3
When they are saying (o $\tau \alpha v \lambda \varepsilon \gamma \omega \sigma \iota)$. Present active subjunctive picturing these false prophets of
peace and safety like Eze 13:10 (Peace, and there is no peace). A $\sigma \varphi \alpha \lambda \varepsilon \iota \alpha$ only in N.T. in Lu 1:4 (which see); Ac 5:23 and here.

Sudden destruction ( $\alpha \iota \varphi v \iota \delta ı \varsigma$ o $\lambda \varepsilon \theta \rho o \varsigma$ ). $O \lambda \varepsilon \theta \rho o \varsigma$ old word from o $\lambda \lambda \nu \mu$, to destroy. See also 2Th 1:9. Aı $\varphi v \iota \delta \iota \varsigma$, old adjective akin to $\alpha \varphi v \omega$ and in N.T. only here and Lu 21:34 where Westcott and Hort spell it $\varepsilon \varphi v i \delta ı o$.

Cometh upon them ( $\alpha \cup \tau \circ \iota \varsigma \varepsilon \pi \iota \sigma \tau \alpha \tau \alpha$ ). Unaspirated form instead of the usual $\varepsilon \varphi \iota \sigma \tau \alpha \tau \alpha$ (present middle indicative) from $\varepsilon \varphi เ \sigma \tau \eta \mu$ perhaps due to confusion with $\varepsilon \pi \iota \sigma \tau \alpha \mu \alpha$.

As travail upon a woman with child ( $\omega \sigma \pi \varepsilon \rho \eta \omega \delta \iota \nu \tau \eta \varepsilon \nu \gamma \alpha \sigma \tau \rho \varepsilon \chi \circ v \sigma \eta$ ). Earlier form $\omega \delta \iota \varsigma$ for birth-pang used also by Jesus (Mr 13:8; Mt 24:8). Technical phrase for pregnancy,
to the one who has it in belly (cf. Mt 1:18 of Mary).
They shall in no wise escape (ov $\mu \eta \varepsilon \kappa \varphi v \gamma \omega \sigma \iota v$ ). Strong negative like that in $4: 15 \mathrm{ov}$ $\mu \eta$ (double negative) and the second aorist active subjunctive.

1Thess 5:4
As a thief ( $\omega \varsigma \kappa \lambda \varepsilon \pi \tau \eta \varsigma$ ). As in verse 2, but A B Bohairic have $\kappa \lambda \varepsilon \pi \tau \alpha \varsigma$ (thieves), turning the metaphor round.

1Thess 5:5
Sons of light (v⿺辶 $\varphi \omega \tau \circ \varsigma)$,
sons of day (vıo $\eta \mu \varepsilon \rho a \varsigma)$. Chiefly a translation Hebraism (Deissmann, Bible Studies, pp. 161ff.). Cf. words of Jesus in Lu 16:8 and Paul in Eph 5:9. He repeats the same idea in turning from "ye" to "we" and using vטктоৎ (night) and бкотоия (darkness), predicate genitives.

1Thess 5:6

So then ( $\alpha \rho \alpha$ ouv). Two inferential particles, accordingly therefore, as in 2Th 2:15 and only in Paul in N.T.

Let us not sleep ( $\mu \eta \kappa \alpha \theta \varepsilon v \delta \omega \mu \varepsilon v$ ). Present active subjunctive (volitive), let us not go on sleeping.

Let us watch ( $\gamma \rho \eta \gamma \quad \rho \omega \mu \varepsilon v$ ). Present active subj. (volitive) again, let us keep awake (late verb $\gamma \rho \eta \gamma$ о $\varepsilon \varepsilon \omega$ from perfect $\varepsilon \gamma \rho \eta \gamma \circ \rho \alpha$ ).

Be sober ( $v \eta \varphi \omega \mu \varepsilon v$ ). Present active subjunctive (volitive). Old verb not to be drunk. In N.T. only in figurative sense, to be calm, sober-minded. Also in verse 8 with the metaphor of drunkenness in contrast.

1Thess 5:7
 No need of "be" here, they that are drunken. No real difference in meaning between $\mu \varepsilon \theta v \sigma \kappa \omega$ and $\mu \varepsilon \theta v \omega$, to be drunk, except that $\mu \varepsilon \theta v \sigma \kappa \omega$ (inceptive verb in $-\sigma \kappa \omega$ ) means to get drunk.

Night (vטктos, genitive by night) is the favourite time for drunken revelries.
1Thess 5:8
Putting on the breastplate of faith and love ( $\varepsilon v \delta v \sigma \alpha \mu \varepsilon v o ~ \theta \omega \rho \alpha к \alpha \pi \iota \sigma \tau \varepsilon \omega \varsigma \kappa \alpha \alpha \gamma \alpha \pi \eta \varsigma)$. First aorist (ingressive) middle participle of $\varepsilon v \delta v \omega$. The same figure of breastplate in Eph 6:14, only there "of righteousness." The idea of watchfulness brings the figure of a sentry on guard and armed to Paul's mind as in Ro 13:12 "the weapons of light." The word $\theta \omega \rho \alpha \xi$ (breastplate) is common in the LXX.

For a helmet, the hope of salvation ( $\pi \varepsilon \rho ı \kappa \varepsilon \varphi \alpha \lambda \alpha ı \alpha v \varepsilon \lambda \pi \iota \delta \alpha \sigma \omega \tau \eta \rho \iota a \varsigma)$ ) Same figure in Eph 6:17 and both like Isa 59:17. Late word meaning around ( $\pi \varepsilon \rho$ ) the head ( $\kappa \varepsilon \varphi a \lambda \eta$ ) and in Polybius, LXX, and in the papyri. $\Sigma \omega \tau \eta \rho / a \varsigma$ is objective genitive.

1Thess 5:9
But unto the obtaining of salvation through our Lord Jesus Christ ( $\alpha \lambda \lambda \alpha$ عıs
 $\pi \varepsilon \rho \iota \pi o ı \eta \sigma \iota v$ which may be passive, God's possession as in $1 \mathrm{Pe} 2: 9$, or active, obtaining, as in 2Th 2:14. The latter is probably the idea here. We are to keep awake so as to fulfil God's purpose ( $\varepsilon \theta \varepsilon \tau 0$, appointed, second aorist middle indicative of $\tau \iota \theta \eta \mu$ ) in calling us. That is our hope of final victory (salvation in this sense).

1Thess 5:10
For us ( $\pi \varepsilon \rho \eta \mu \omega v$ ).
Around us. So Westcott and Hort, but v $\pi \varepsilon \rho$ (over, in behalf of) as in many MSS. These prepositions often interchanged in N.T. MSS.

Whether we wake or sleep ( $\varepsilon \iota \tau \varepsilon \gamma \rho \eta \gamma \circ \rho \omega \mu \varepsilon v \varepsilon \varepsilon \tau \varepsilon \kappa \alpha \theta \varepsilon v \delta \omega \mu \varepsilon v$ ). Alternative condition of third class with present subjunctive, though $\varepsilon \alpha v \tau \varepsilon-$ - $\varepsilon \alpha \nu \tau \varepsilon$ more usual conjunction (Robertson, Grammar, P. 1017). Used here of life and death, not as metaphor.

That we should live together with him ( $\imath v \alpha \alpha \mu \alpha \sigma v v \alpha v \tau \omega \zeta \eta \sigma \omega \mu \varepsilon v$ ). First aorist active subjunctive constative aorist covering all life (now and hereafter) together with ( $\alpha \mu \alpha \sigma v v$ as in $5: 17$ ) Jesus.

1Thess 5:11
Build each other up (оюкобонєıтє $\varepsilon \iota \varsigma ~ \tau о v \varepsilon v \alpha$ ). Literally, build ye, one the one ( $\varepsilon \iota$ nominative in partitive apposition with unexpressed $v \mu \varepsilon \iota \varsigma ~ s u b j e c t ~ o f ~ o 七 \kappa о \delta o \mu \varepsilon ı \tau \varepsilon$. Then $\tau 0 v$ $\varepsilon v \alpha$ the accusative in partitive apposition with the unexpressed $\varepsilon \alpha v \tau 0 v \varsigma$ or $\alpha \lambda \lambda \eta \lambda o v \varsigma$. See the same idiom in 1Co 4:6 one in behalf of the one , $\varepsilon \iota \varsigma v \pi \varepsilon \rho \tau o v \varepsilon v o \varsigma$. Build is a favourite Pauline metaphor.

1Thess 5:12
Them that labour among you ( $\tau 0 v \varsigma \kappa о \pi \iota \omega v \tau \alpha \varsigma \varepsilon v v \mu \nu \nu$ ). Old word for toil even if weary.

And are over you in the Lord ( $\kappa \alpha \pi \rho o \iota \sigma \tau \alpha \mu \varepsilon v o v \varsigma \nu \mu \omega \nu \varepsilon \nu K v \rho \iota \omega$ ). Same article with this participle. Literally, those who stand in front of you, your leaders in the Lord, the presbyters or bishops and deacons. Get acquainted with them and follow them.

And admonish you ( $\kappa \alpha v o v \theta \varepsilon \tau о v v \tau \alpha \varsigma ~ v \mu \alpha \varsigma) . ~ O l d ~ v e r b ~ f r o m ~ v o v \theta \varepsilon \tau \eta \varsigma ~ a n d ~ t h i s ~ f r o m ~$ vous (mind) and $\tau \iota \theta \eta \mu$, to put. Putting sense into the heads of people. A thankless, but a necessary, task. The same article connects all three participles, different functions of the same leaders in the church.

1Thess 5:13
And to esteem them ( $\kappa \alpha \eta \gamma \varepsilon \iota \sigma \theta \alpha$ ). Get acquainted with them and esteem the leaders. The idlers in Thessalonica had evidently refused to follow their leaders in church activities. We need wise leadership today, but still more wise following. An army of captains and colonels never won a battle.

1Thess 5:14
 who break ranks ( $\alpha$ privative and $\tau \alpha \kappa \tau \circ \varsigma$, verbal adjective of $\tau \alpha \sigma \sigma \omega$, to keep military order). Recall the idlers from the market-place used against Paul (Ac 17:5 ). This is a challenging task for any leader.

Encourage the fainthearted ( $\pi \alpha \rho \alpha \mu \nu \theta \varepsilon \iota \sigma \theta \varepsilon \tau о \nu \varsigma о \lambda \iota \gamma о \psi \nu \chi о \nu \varsigma)$. Old verb to encourage or console as in Joh 11:31, though not so common in N.T. as $\pi \alpha \rho \alpha \kappa \alpha \lambda \varepsilon \omega$, the compound adjective (o $\lambda \iota \gamma \circ \varsigma$, little or small, $\psi \cup \chi \eta$, soul), small-souled, little-souled, late word in LXX. The verb o $\lambda \iota \gamma о \psi v \chi \varepsilon \omega$ occurs in the papyri. Local conditions often cause some to lose heart and wish to drop out, be quitters. These must be held in line.

Support the weak ( $\alpha v \tau \varepsilon \chi \varepsilon \sigma \theta \varepsilon \tau \omega \nu \alpha \sigma \theta \varepsilon \nu \omega v$ ). Middle voice with genitive of $\alpha \nu \tau \varepsilon \chi \omega$, old verb, in N.T. only in middle, to cling to, to hold on to (with genitive). The weak are those tempted to $\sin$ (immorality, for instance).

Be long－suffering toward all（ $\mu \alpha \kappa \rho о \theta \nu \mu \varepsilon \iota \tau \varepsilon \pi \rho о \varsigma \pi \alpha \nu \tau \alpha \varsigma)$ ．These disorderly elements try the patience of the leaders．Hold out with them．What a wonderful ideal Paul here holds up for church leaders！

1Thess 5：15
See to it that no one render unto any one evil for evil（оратє $\mu \eta \tau \iota \varsigma$ какоv аขт какои $\alpha \pi o \delta \omega$ ）．Note $\mu \eta$ with the aorist subjunctive（negative purpose）$\alpha \pi o \delta \omega$ from $\alpha \pi o \delta \delta \delta \omega \mu$ ，to give back．Retaliation，condemned by Jesus（Mt 5：38－42 ）and by Paul in Ro 12：17，usually takes the form of＂evil for evil，＂rather than＂good for good＂（ка入оv avt ка入оv）．Note idea of exchange in $\alpha v \tau$ ．

Follow after（ $\delta \omega \kappa \varepsilon \tau \varepsilon)$ ．Keep up the chase（ $\delta \omega \kappa \kappa \omega$ ）after the good．
1Thess 5：18
In everything give thanks（ $\varepsilon v \pi \alpha v \tau \varepsilon \cup \chi \alpha \rho \iota \sigma \tau \varepsilon \iota \tau \varepsilon$ ）．There is a silver lining to every cloud． God is with us whatever befalls us．It is God＇s will that we find joy in prayer in Christ Jesus in every condition of life．

1Thess 5：19
Quench not the spirit（ $\tau 0 \pi \nu \varepsilon \cup \mu \alpha \mu \eta \sigma \beta \varepsilon v v \nu \tau \varepsilon$ ）．M $\eta$ with the present imperative means to stop doing it or not to have the habit of doing it．It is a bold figure．Some of them were trying to put out the fire of the Holy Spirit，probably the special gifts of the Holy Spirit as verse 20 means．But even so the exercise of these special gifts（1Co 12－14；2Co 12：2－4；Ro 12：6－9）was to be decently（ $\varepsilon \cup \sigma \chi \eta \mu \circ v \omega \varsigma$ ， 1 Th 4：12）and in order（ $\kappa \alpha \tau \alpha \tau \alpha \xi ı v, 1$ Co 14：40） and for edification（ $\pi \rho о \varsigma$ оккобо $\mu \eta \nu$ ，1Co 14：26）．Today，as then，there are two extremes about spiritual gifts（cold indifference or wild excess）．It is not hard to put out the fire of spiritual fervor and power．

1Thess 5：20
Despise not prophesyings（ $\pi \rho \circ \varphi \eta \tau \varepsilon ı \alpha \varsigma \mu \eta \varepsilon \xi_{0} 0 \theta \varepsilon v \varepsilon \iota \tau \varepsilon$ ）．Same construction，stop counting as nothing（ $\varepsilon \xi \circ v \theta \varepsilon v \varepsilon \omega, o v \theta \varepsilon v=o v \delta \varepsilon v$ ），late form in LXX．Plutarch has $\varepsilon \xi \circ v \delta \varepsilon v 亡 \zeta \omega$ ． Plural form $\pi \rho о \varphi \eta \tau \varepsilon เ \alpha \varsigma$（accusative）．Word means
forth－telling（ $\pi \rho \sigma-\varphi \eta \mu$ ）rather than
fore－telling and is the chief of the spiritual gifts（1Co 14 ）and evidently depreciated in Thessalonica as in Corinth later．

1Thess 5：21
Prove all things（ $\pi \alpha \nu \tau \alpha[\delta \varepsilon] \delta$ окщаऍєтє）．Probably $\delta \varepsilon($ but ）is genuine．Even the gift of prophecy has to be tested（1Co 12：10；14：29）to avoid error．Paul shows fine balance here．

Hold fast that which is good（ $\tau$ ка入оv катє $\chi \varepsilon \tau \varepsilon$ ）．Keep on holding down the beautiful （noble，morally beautiful）．Present imperative кат－$\varepsilon \chi \omega$（perfective use of $\kappa \alpha \tau \alpha-$ here）．

1Thess 5：22
Abstain from every form of evil（ $\alpha \pi 0$ $\pi \alpha \nu \tau о \varsigma ~ \varepsilon ו \delta o v \varsigma ~ \pi о \nu \eta \rho о v ~ \alpha \pi \varepsilon \chi \varepsilon \sigma \theta \varepsilon$ ）．Present middle（direct）imperative of $\alpha \pi-\varepsilon \chi \omega$（contrast with $\kappa \alpha \tau-\varepsilon \chi \omega$ ）and preposition $\alpha \pi$ repeated
with ablative as in 1Th 4:3. Note use of $\pi$ rovn $\rho$ ou here for evil without the article, common enough idiom. Eıסoc (from $\varepsilon$ عı $\delta$ ov) naturally means look or appearance as in Lu 3:23; 9:29; Joh 5:37; 2Co 5:7. But, if so taken, it is not semblance as opposed to reality (Milligan). The papyri give several examples of $\varepsilon \boldsymbol{\varepsilon} \delta \mathrm{o}$, in the sense of class or kind and that idea suits best here. Evil had a way of showing itself even in the spiritual gifts including prophecy.

1Thess 5:23
The God of peace (o $\theta \varepsilon o \varsigma \tau \eta \varsigma \varepsilon \iota \rho \eta \nu \eta \varsigma)$. The God characterized by peace in his nature, who gladly bestows it also. Common phrase (Milligan) at close of Paul's Epistles (2Co 13:11; Ro 15:33; 16:20; Php 4:9) and
the Lord of peace in 2Th 3:6.
Sanctify you ( $\alpha \gamma \boldsymbol{\omega} \sigma \alpha \nu \mu \alpha \varsigma$ ). First aorist active optative in a wish for the future. New verb in LXX and N.T. for the old $\alpha \gamma \zeta \zeta \omega$, to render or to declare holy ( $\alpha \gamma \omega \varsigma$ ), to consecrate, to separate from things profane.

Wholly (o 0 ot $\varepsilon \lambda \varepsilon \varsigma \varsigma)$. Predicate adjective in plural ( $\mathrm{o} \lambda \mathrm{o} \varsigma$, whole, $\tau \varepsilon \lambda$ o $\varsigma$, end), not adverb o $\lambda o \tau \varepsilon \lambda \omega \varsigma$. Late word in Plutarch, Hexapla, and in inscription A.D. 67 (Moulton and Milligan, Vocabulary). Here alone in N.T. Here it means the whole of each of you, every part of each of you, "through and through" (Luther), qualitatively rather than quantitatively.

Your spirit and soul and body ( $v \mu \omega v$ тo $\pi v \varepsilon v \mu \alpha \kappa \alpha \eta \psi v \chi \eta \kappa \alpha \tau$ тo $\sigma \omega \mu \alpha$ ). Not necessarily trichotomy as opposed to dichotomy as elsewhere in Paul's Epistles. Both believers and unbelievers have an inner man (soul $\psi v \chi \eta$, mind vouc, heart кap $\delta ı \alpha$, the inward man o $\varepsilon \sigma \omega$ $\alpha v \theta \rho \omega \pi \sigma \varsigma)$ and the outer man ( $\sigma \omega \mu \alpha$, o $\varepsilon \xi \omega \alpha v \theta \rho \omega \pi$ о $)$ ). But the believer has the Holy Spirit of God, the renewed spirit of man (1Co 2:11; Ro 8:9-11).

Be preserved entire ( $о \lambda о \kappa \lambda \eta \rho o v \tau \eta \rho \eta \theta \varepsilon ı \eta$ ). First aorist passive optative in wish for the future. Note singular verb and singular adjective (neuter) showing that Paul conceives of the man as "an undivided whole" (Frame), prayer for the consecration of both body and soul (cf. 1Co 6 ). The adjective o $\lambda о \kappa \lambda \eta \rho o v$ is in predicate and is an old form and means complete in all its parts (o $\boldsymbol{\rho} \mathrm{o}$, , whole, $\kappa \lambda \eta \rho \circ \varsigma$, lot or part). There is to be no deficiency in any part. Tع $\lambda \varepsilon เ \circ \varsigma$ (from $\tau \varepsilon \lambda \rho \varsigma$, end) means final perfection.

Without blame ( $\alpha \mu \varepsilon \mu \pi \tau \omega \varsigma)$. Old adverb ( $\alpha$ privative, $\mu \varepsilon \mu \pi \tau o \varsigma$, verbal of $\mu \varepsilon \mu \varphi о \mu \alpha$, to blame) only in I Thess. in N.T. (2:10; 3:13; 5:23 ). Milligan notes it in certain sepulchral inscriptions discovered in Thessalonica.

At the coming ( $\varepsilon \nu \tau \eta \pi \alpha \rho o v \sigma i \alpha)$. The Second Coming which was a sustaining hope to Paul as it should be to us and mentioned often in this Epistle (see on 2:19).

1Thess 5:24
Faithful ( $\quad$ Iఠ $\tau \circ \varsigma)$. God, he means, who calls and will carry through (Php 1:6).
1Thess 5:25

Pray for us ( $\pi \rho о \sigma \varepsilon u \chi \varepsilon \sigma \theta \varepsilon[\kappa \alpha ı] \pi \varepsilon \rho \eta \mu \omega v$ ). He has made his prayer for them. He adds this "human touch" (Frame) and pleads for the prayers of his converts (2Th 3:1; Col 4:2f. ). Probably ka also is genuine (B D).

1Thess 5:26
With a holy kiss ( $\varepsilon v \varphi\rangle \lambda \eta \mu \alpha \tau \alpha \gamma \iota \omega$ ). With a kiss that is holy (Milligan) a token of friendship and brotherly love (1Co 16:20; 2Co 13:12; Ro 16:16 ). In 1Pe 5:14 it is "with a kiss of love." This was the customary salutation for rabbis.

1Thess 5:27
I adjure you by the Lord ( $\varepsilon v о \rho к \iota \zeta \omega ~ v \mu a \varsigma ~ \tau o v ~ K v \rho ı o v) . ~ L a t e ~ c o m p o u n d ~ f o r ~ o l d ~ о р к ı \zeta \omega ~$ (Mr 5:7), to put one on oath, with two accusatives (Robertson, Grammar, pp. 483f.). Occurs in inscriptions.

That this epistle be read unto all the brethren ( $\alpha v \alpha \gamma v \omega \sigma \theta \eta v \alpha \tau \eta \nu \varepsilon \pi \iota \sigma \tau o \lambda \eta \nu \pi \alpha \sigma \iota$ тoıs $\alpha \delta \varepsilon \lambda \varphi$ oıc). First aorist passive infinitive of $\alpha v \alpha \gamma \iota \nu \omega \sigma \kappa \omega$ with accusative of general reference in an indirect command. Clearly Paul wrote for the church as a whole and wished the epistles read aloud at a public meeting. In this first epistle we see the importance that he attaches to his epistles.

1Thess 5:28
The grace ( $\eta \chi \alpha \rho ı \varsigma$ ). Paul prefers this noble word to the customary $\varepsilon \rho \rho \omega \sigma \theta \varepsilon$ (Farewell, Be strong). See 2Th 3:18 for identical close save added $\pi \alpha \nu \tau \omega \nu$ (all). A bit shorter form in 1Co 16:23; Ro 16:20 and still shorter in Col 4:18; 1 Ti 6:21; Tit 3:15; 2Ti 4:22. The full Trinitarian benediction we find in 2Co 13:13 .

## SECOND THESSALONIANS

## FROM CORINTH A.D. 50 OR 51

## BY WAY OF INTRODUCTION

It is plain that First Thessalonians did not settle all the difficulties in Thessalonica. With some there was precisely the opposite result. There was some opposition to Paul's authority and even defiance. So Paul repeats his "command" for discipline (2Th 3:6) as he had done when with them (3:10). He makes this Epistle a test of obedience ( $3: 14$ ) and finds it necessary to warn the Thessalonians against the zeal of some deceivers who even invent epistles in Paul's name to carry their point in the church (2:1f. ), an early instance of pseudepigraphic "Pauline" epistles, but not for a "pious" purpose. Paul's keen resentment against the practise should make us slow to accept the pseudepigraphic theory about other Pauline Epistles. He calls attention to his own signature at the close of each genuine letter. As a rule he dictated the epistle, but signed it with his own hand (3:17). Paul writes to calm excitement (Ellicott) and to make it plain that he had not said that the Second Coming was to be right away.

This Epistle is a bit sharper in tone than the First and also briefer. It has been suggested that there were two churches in Thessalonica, a Gentile Church to which First Thessalonians was sent, and a Jewish Church to which Second Thessalonians was addressed. There is no real evidence for such a gratuitous hypothesis. It assumes a difficulty about his sending a second letter to the same church that does not exist. The bearer of the first letter brought back news that made a second necessary. It was probably sent within the same year as the first.

## 2 Thessalonians 1

2Thess 1:1
Paul, etc. (Пav $10 \sigma, \varepsilon \tau \chi$.). This address or superscription is identical with that in 1 Th 1:1 save that our $(\eta \mu \omega \nu)$ is added after

Father ( $\pi \alpha \tau \rho$ ).
2Thess 1:2
 X $\rho \iota \sigma \tau 0 v$ ). These words are not genuine in 1Th 1:1, but are here and they appear in all the other Pauline Epistles. Note absence of article both after $\varepsilon v$ and $a \pi \sigma$, though both God and Lord Jesus Christ are definite. In both cases Jesus Christ is put on a par with God, though not identical. See on 1Th 1:1 for discussion of words, but note difference between $\varepsilon v$, in the sphere of, by the power of, and $a \pi \sigma$, from, as the fountain head and source of grace and peace.

2Thess 1:3
We are bound ( $\circ \varphi \varepsilon \iota \lambda \frac{\mu}{}(\nu)$ ). Paul feels a sense of obligation to keep on giving thanks to God ( $\varepsilon v \chi \propto \rho เ \sigma \tau \varepsilon เ \nu \tau \omega \theta \varepsilon \omega$, present infinitive with dative case) because of God's continued blessings on the Thessalonians. He uses the same idiom again in 2:13 and nowhere else in his thanksgivings. It is not necessity $(\delta \varepsilon)$ that Paul here notes, but a sense of personal obligation as in 1Jo 2:6 (Milligan).
 human side of the obligation (Lightfoot), perhaps to cheer the fainthearted in a possible letter to him in reply to Paul's First Thessalonian epistle (Milligan). This adjective $\alpha \xi \iota c$ is from $a \gamma \omega$, to drag down the scales, and so weighty, worthy, worthwhile, old word and appropriate here.

For that your faith groweth exceedingly (o $v \pi \varepsilon \rho \alpha v \xi \alpha v \varepsilon \eta \pi \iota \sigma \tau \iota \varsigma v \mu \omega v$ ). Causal use of o $\tau$ referring to the obligation stated in $о \varphi \varepsilon \iota \lambda \mu \varepsilon \nu$. The verb $v \pi \varepsilon \rho \alpha v \xi \alpha \nu \omega$ is one of Paul's
 $\tau v \gamma \chi \alpha \nu \omega$, Ro 8:26; v $\pi \varepsilon \rho-\nu เ \kappa \alpha \omega$, Ro 8:37 ; v $\pi \varepsilon \rho-\pi \lambda \varepsilon о v \alpha \zeta \omega, 1 \mathrm{Ti} 1: 14$ ) and occurs only here in N.T. and rare elsewhere (Galen, Dio Cass.). Figure of the tree of faith growing above (v $\tau \varepsilon \rho$ ) measure. Cf. parable of Jesus about faith-like a grain of mustard seed (Mt 13:31f. ).

Aboundeth ( $\pi \lambda \varepsilon o v a \zeta \varepsilon)$. Same verb in 1Th 3:12, here a fulfilment of the prayer made there. Milligan finds diffusive growth of love in this word because of "each one" ( $\varepsilon v o s$ $\varepsilon \kappa \alpha \sigma \tau о v)$. Frame finds in this fulfilment of the prayer of 1Th 3:12 one proof that II Thessalonians is later than I Thessalonians.

2Thess 1:4
So that $(\omega \sigma \tau \varepsilon)$. Another example of $\omega \sigma \tau \varepsilon$ and the infinitive ( $\varepsilon \nu \kappa \alpha \nu \chi \alpha \sigma \theta \alpha$ ) for result as in 1Th 1:7 which see.

We ourselves (avtov¢ $\eta \mu a \varsigma)$. Accusative of general reference with the infinitive, but not merely $\eta \mu a \varsigma$ (or عavtovৎ), perhaps in contrast with $\varepsilon v \nu \mu \nu v$ (in you), as much as to say, "so that we ourselves, contrary to your expectations, are boasting" (Frame). Evкаuхаона occurs here alone in N.T., but is found in the LXX and in Aesop's Fables, proof enough of its vernacular use. Paul was not above praising one church to other churches, to provoke them to good works. Here he is boasting of Thessalonica in Macedonia to the Corinthians as he did later to the Corinthians about the collection (2Co 8:1-15) after having first boasted to the Macedonians about the Corinthians (2Co 9:1-5). There were other churches in Achaia besides Corinth (2Co 1:1).

For (v $\tau \varepsilon \rho$ ). Over, about, like $\pi \varepsilon \rho(1$ Th 1:2 ).
In all your persecutions ( $\varepsilon v \pi \alpha \sigma \iota v \tau o \iota ~ \delta \iota \omega \gamma \mu \circ \iota \varsigma \nu \omega \omega v$ ). Their patience and faith had already attracted Paul's attention (1Th 1:3) and their tribulations $\theta \lambda_{\iota} \downarrow \varepsilon \sigma \iota v$ (1Th 1:6 ). Here Paul adds the more specific term $\delta \omega \gamma \mu \mu \varsigma$, old word from $\delta \omega \omega \kappa \omega$, to chase, to pursue, a word used by Paul of his treatment in Corinth (2Co 12:10).

Which ye endure ( $\alpha \iota \varsigma \alpha v \varepsilon \chi \varepsilon \sigma \theta \varepsilon$ ). B here reads $\varepsilon v \varepsilon \chi \varepsilon \sigma \theta \varepsilon$, to be entangled in, to be held in as in $\mathrm{Ga} 5: 1$, but $\alpha v \varepsilon \chi \varepsilon \sigma \theta \varepsilon$ is probably correct and the aıs is probably attracted to locative case of $\theta \lambda \iota \psi \varepsilon \sigma \iota v$ from the ablative $\omega v$ after $\alpha v \varepsilon \chi \varepsilon \sigma \theta \varepsilon$,
from which ye hold yourselves back (cf. $\operatorname{Col} 3: 13$ ).
2Thess 1:5
 тov $\theta$ sov). Old word from $\varepsilon v \delta \varepsilon ו \kappa v v \mu$, to point out, result reached ( $-\mu \alpha$ ), a thing proved. It is either in the accusative of general reference in apposition with the preceding clause as in Ro 8:3; 12:1, or in the nominative absolute when o $\varepsilon \sigma \tau \iota v$, if supplied, would explain it as in Php 1:28. This righteous judgment is future and final (verses 6-10).

To the end that you may be counted worthy ( $\varepsilon \varsigma \varsigma \tau о \kappa \alpha \tau \alpha \xi \iota \omega \theta \eta v \alpha \nu \mu \alpha \varsigma)$. Another example of $\varepsilon \iota \varsigma$ to for purpose with first aorist passive infinitive from ката $\xi \circ \omega$, old verb, with accusative of general reference $v \mu a \varsigma$ and followed by the genitive $\tau \eta \varsigma \beta a \sigma \lambda \lambda \varepsilon \iota \alpha \varsigma$ (kingdom of God). See 1Th 2:12 for

## kingdom of God.

For which ye also suffer ( $ข \pi \varepsilon \rho \eta \varsigma \kappa \alpha \pi \alpha \sigma \chi \varepsilon \tau \varepsilon$ ). Ye
also as well as we and the present tense means that it is still going on.
2Thess 1:6
If so be that it is a righteous thing with God ( $\varepsilon \iota \pi \varepsilon \rho \delta \iota \kappa \ldots \circ v \pi \alpha \rho \alpha \theta \varepsilon \omega)$. Condition of first class, determined as fulfilled, assumed as true, but with $\varepsilon ו \pi \varepsilon \rho$ (if on the whole, provided that) as in Ro 8:9,17, and with no copula expressed. A righteous thing "with God" means by the side of God ( $\pi \alpha \rho \alpha \theta \varepsilon \omega$ ) and so from God's standpoint. This is as near to the idea of absolute right as it is possible to attain. Note the phrase in verse 5 .

To recompense affliction to them that afflict you ( $\alpha v \tau \alpha \pi о \delta o v v \alpha ~ \tau o ı ~ \theta \lambda ı \beta о v \sigma ı v ~ \eta \mu \alpha \varsigma$ $\theta \lambda \iota \psi(\nu)$. Second aorist active infinitive of double compound $\alpha \nu \tau-\alpha \pi o \delta i \delta \omega \mu$, old verb, either in good sense as in 1Th 3:9 or in bad sense as here. Paul is certain of this principle, though he puts it conditionally.

2Thess 1:7
Rest with us ( $\alpha v \varepsilon \sigma \iota v \mu \varepsilon \theta^{\prime} \eta \mu \omega v$ ). Let up, release. Old word from $\alpha v ı \eta \mu$, from troubles here (2Co 2:13; 7:5; 8:13 ), and hereafter as in this verse. Vivid word. They shared suffering with Paul (verse 5) and so they will share ( $\mu \varepsilon \theta^{\prime}$ ) the
rest.
At the revelation of the Lord Jesus ( $\varepsilon v \tau \eta \alpha \pi о \kappa \alpha \lambda \nu \psi \varepsilon$ tov Kupıov I $\eta \sigma o v$ ). Here the Пароибเа (1Th 2:19; 3:13; 5:23) is pictured as a

Revelation (Un-veiling, aло-ка入ичıৎ) of the Messiah as in 1Co 1:7, 1Pe 1:7,13 (cf. Lu 17:30 ). At this Unveiling of the Messiah there will come the
recompense (verse 6) to the persecutors and the
rest from the persecutions. This Revelation will be
from heaven ( $\alpha \pi^{\prime}$ oupavou) as to place and
with the angels of his power ( $\left.\mu \varepsilon \tau^{\prime} \alpha \gamma \gamma \varepsilon \lambda \omega v \delta v v \alpha \mu \varepsilon \omega \varsigma ~ \alpha u \tau o v\right)$ as the retinue and
in flaming fire ( $\varepsilon v \pi \nu \rho \varphi \lambda о \gamma \circ \varsigma$, in a fire of flame, fire characterized by flame). In Ac 7:30 the text is
flame of fire where $\pi \cup \rho o \varsigma$ is genitive (like Isa 66:15 ) rather than $\varphi \lambda$ оүоৎ as here (Ex 3:2).

2Thess 1:8
Rendering ( $\delta \iota \delta o v \tau o \varsigma)$. Genitive of present active participle of $\delta \iota \delta \omega \mu$, to give, agreeing with I I $\sigma$ ou.

Vengeance ( $\varepsilon \kappa \delta ı \kappa \eta \sigma \iota v$ ). Late word from $\varepsilon \kappa \delta \iota \kappa \varepsilon \omega$, to vindicate, in Polybius and LXX.
To them that know not God ( $\tau o \iota \varsigma \mu \eta \varepsilon \iota \delta o \sigma \iota v \theta$ sov). Dative plural of perfect active participle $\varepsilon \iota \delta \omega$. Apparently chiefly Gentiles in mind (1Th 4:3; Ga 4:8; Ro 1:28; Eph 2:12 ), though Jews are also guilty of wilful ignorance of God (Ro 2:14).

And to them that obey not the gospel of our Lord Jesus ( $\kappa \alpha$ тоц $\mu \eta$ vтакоvоvбוv $\tau \omega$ $\varepsilon \cup a \gamma \gamma \varepsilon \lambda \iota \omega$ tov кupıov $\eta \mu \omega \nu$ I $\eta \sigma o v)$. Repetition of the article looks like another class and so Jews (Ro 10:16). Both Jews as instigators and Gentiles as officials ( $\pi \circ \lambda \iota \tau \alpha \rho \chi \varsigma$ ) were involved in the persecution in Thessalonica (Ac 17:5-9; 2Th 1:6 ). Note the use of "gospel" here as in Mr 1:15 "believe in the gospel."

2Thess 1:9
Who (oıtivec). Qualitative use, such as. Vanishing in papyri though surviving in Paul (1Co 3:17; Ro 1:25; Ga 4:26; Php 4:3).

Shall suffer punishment ( $\delta \iota \kappa \eta \nu \tau \iota \sigma o v \sigma \iota v$ ). Future active of old verb $\tau \iota v \omega$, to pay penalty ( $\delta \iota \kappa \eta \nu$, right, justice), here only in N.T., but a $\quad$ отıv $\omega$ once also to repay Phm 1:19. In the
papyri $\delta \iota \kappa \eta$ is used for a case or process in law. This is the regular phrase in classic writers for paying the penalty.

Eternal destruction (o $\lambda \varepsilon \theta \rho o v$ aı $\omega v$ vov). Accusative case in apposition with $\delta_{ı \kappa \eta} \nu$ (penalty). This phrase does not appear elsewhere in the N.T., but is in IV Macc. 10:15 tov $\alpha \iota \omega v$ เov tov $\tau v \rho a v v o v$ o $\lambda \varepsilon \theta \rho \circ v$ the eternal destruction of the tyrant (Antiochus Epiphanes). Destruction (cf. 1Th 5:3 ) does not mean here annihilation, but, as Paul proceeds to show, separation
from the face of the Lord ( $\alpha \pi о \pi \rho о \sigma \omega \pi о \cup$ tov кирıov) and from the
glory of his might ( $\kappa \alpha \alpha \pi 0 \tau \eta \varsigma \delta о \xi \eta \varsigma \tau \eta \varsigma ~ เ \sigma \chi \cup \circ \varsigma \alpha \cup \tau 0 v$ ), an eternity of woe such as befell Antiochus Epiphanes. At $\boldsymbol{v}$ oc in itself only means age-long and papyri and inscriptions give it in the weakened sense of a Caesar's life (Milligan), but Paul means by age-long
the coming age in contrast with
this age, as
eternal as the New Testament knows how to make it. See on Mt 25:46 for use of al $\omega$ vios both with $\zeta \omega \eta \nu$, life, and ко $\lambda \alpha \sigma \iota \nu$, punishment.

2Thess 1:10
When he shall come (otav $\varepsilon \lambda \theta \eta$ ). Second aorist active subjunctive with o o $\alpha v$, future and indefinite temporal clause (Robertson, Grammar, pp. 971ff.) coincident with $\varepsilon \nu \tau \eta$ алока入ичє in verse 7.

To be glorified ( $\varepsilon v \delta o \xi \alpha \sigma \theta \eta v \alpha$ ). First aorist passive infinitive (purpose) of $\varepsilon v \delta o \xi \alpha \zeta \omega$, late verb, in N.T. only here and verse 12 , in LXX and papyri.

In his saints ( $\varepsilon v$ toı $\alpha$ 人юoı autov). The sphere in which Christ will find his glory at the Revelation.

And to be marvelled at ( $\kappa \alpha \theta \alpha \nu \mu \alpha \sigma \theta \eta \nu \alpha$ ). First aorist passive infinitive (purpose), common verb $\theta a \nu \mu \swarrow \zeta \omega$.

That believed ( $\tau \circ \iota \varsigma \pi \iota \sigma \tau \varepsilon \cup \sigma \alpha \sigma \iota v$ ). Why aorist active participle instead of present active $\pi \iota \sigma \tau \varepsilon v o u \sigma \omega v$ (that believe)? Frame thinks that Paul thus reassures those who believed his message when there (1Th 1:6ff.; 2:13f. ). The parenthetical clause, though difficult, falls in with this idea:

Because our testimony unto you was believed (o $\varepsilon \varepsilon \pi \iota \tau \varepsilon v \theta \eta$ to $\mu \alpha \rho \tau v \rho\left\llcorner\circ \nu \eta \mu \omega v \varepsilon \varphi^{\prime}\right.$ $v \mu a \varsigma)$. Moffatt calls it an anti-climax.

On that day ( $\varepsilon \nu \tau \eta \eta \mu \varepsilon \rho \alpha \varepsilon \kappa \varepsilon เ \nu \eta)$. The day of Christ's coming (2Ti 1:12,18; 4:8).
2Thess 1:11
To which end ( $\varepsilon \iota \varsigma$ ). So Col 1:29. Probably purpose with reference to the contents of verses 5-10. We have had the Thanksgiving (verses 3-10) in a long, complicated, but rich period or sentence. Now he makes a brief Prayer (verses 11-12) that God will fulfil all their hopes and endeavours. Paul and his colleagues can still pray for them though no longer with them (Moffatt).

That (ıva). Common after $\pi \rho \circ \sigma \varepsilon v \chi \circ \mu \alpha$ (Col 4:3; Eph 1:17; Php 1:9) when the content of the prayer blends with the purpose (purport and purpose).

Count you worthy ( $v \mu \alpha \varsigma \alpha \xi \omega \sigma \eta$ ). Causative verb (aorist active subjunctive) like $\kappa \alpha \tau \alpha \xi \iota \omega$ in verse 5 with genitive.

Of your calling ( $\tau \eta \varsigma \kappa \lambda \eta \sigma \varepsilon \omega \varsigma)$. K $\lambda \eta \sigma \iota \varsigma$ can apply to the beginning as in 1Co 1:26; Ro 11:29, but it can also apply to the final issue as in Php 3:14; Heb 3:1. Both ideas may be here. It is God's calling of the Thessalonians.
 "Whom he counts worthy he first makes worthy" (Lillie). Yes, in purpose, but the wonder and the glory of it all is that God begins to count us worthy in Christ before the process is completed in Christ (Ro 8:29f. ). But God will see it through and so Paul prays to God. Euठокıa (cf. Lu 2:14 ) is more than mere desire, rather good pleasure, God's purpose of goodness, not in ancient Greek, only in LXX and N.T. A $\gamma \alpha \theta \omega \sigma u v \eta$ like a dozen other words in -бuv $\begin{gathered}\text { occurs only in late Greek. This word occurs only in LXX, N.T., writings based on }\end{gathered}$ them. It is made from $\alpha \gamma \alpha \theta o \varsigma$, good, akin to $\alpha \gamma \alpha \mu \alpha$, to admire. May the Thessalonians find delight in goodness, a worthy and pertinent prayer.

Work of faith ( $\varepsilon \rho \gamma \circ \vee \pi \iota \sigma \tau \varepsilon \omega \varsigma)$. The same phrase in 1Th 1:3. Paul prays for rich fruition of what he had seen in the beginning. Work marked by faith, springs from faith, sustained by faith.

With power ( $\varepsilon v \delta v v a \mu \varepsilon$ ). In power. Connect with $\pi \lambda \eta \rho \omega \sigma \eta$ (fulfil), God's power (Ro 1:29; Col 1:4) in Christ (1Co 1:24) through the Holy Spirit (1Th 1:5).

2Thess 1:12
That (o $\pi \omega \varsigma$ ). Rare with Paul compared with $\operatorname{vva}$ (1Co 1:29; 2Co 8:14 ). Perhaps here for variety (dependent on tva clause in verse 11).

The name ( $\tau 0$ ovo $\mu \alpha$ ). The Old Testament (LXX) uses ovo $\mu \alpha$ embodying the revealed character of Jehovah. So here the

Name of our Lord Jesus means the Messiahship and Lordship of Jesus. The common Greek idiom of ovo $\alpha$ for title or dignity as in the papyri (Milligan) is not quite this idiom. The papyri also give examples of ovo $\mu \alpha$ for person as in O.T. and Ac 1:15 (Deissmann, Bible Studies, pp. 196ff.).

In you, and ye in him ( $\varepsilon \nu \nu \mu \nu \nu, \kappa \alpha \nu \mu \varepsilon ı \varsigma \varepsilon \nu \alpha \nu \tau \omega$ ). This reciprocal glorying is Pauline, but it is also like Christ's figure of the vine and the branches in Joh 15:1-11.

According to the grace ( $\kappa \alpha \tau \alpha \tau \eta v \chi \alpha \rho ı v$ ). Not merely standard, but also aim (Robertson, Grammar, p. 609).
 Here strict syntax requires, since there is only one article with $\theta$ sou and кupoo that one person be meant, Jesus Christ, as is certainly true in Tit 2:13; 2Pe 1:1 (Robertson, Grammar, p.786). This otherwise conclusive syntactical argument, admitted by Schmiedel, is weakened
a bit by the fact that Kupios is often employed as a proper name without the article, a thing not true of $\sigma \omega \tau \eta \rho$ in Tit 2:13; 2Pe 1:1. So in Eph 5:5 $\varepsilon v \tau \eta \beta \alpha \sigma \iota \lambda \varepsilon ı \alpha$ тov Xpıбтои ка $\theta \varepsilon$ во the natural meaning is
in the Kingdom of Christ and God regarded as one, but here again $\theta \varepsilon o \varsigma$, like Kvpıo, often occurs as a proper name without the article. So it has to be admitted that here Paul may mean "according to the grace of our God and the Lord Jesus Christ," though he may also mean "according to the grace of our God and Lord, Jesus Christ."

## 2 Thessalonians 2

2Thess 2:1
Touching the coming of our Lord Jesus Christ (viع $\tau \eta \varsigma \pi \alpha \rho о v \sigma \iota \alpha \varsigma ~ \tau о v ~ K v \rho ı v ~(~ \eta \mu \omega v) ~$ In $\sigma$ ov X $\rho \iota \sigma \tau o v$ ). For $\varepsilon \rho \omega \tau \omega \mu \varepsilon v$, to beseech, see on 1 Th $4: 1 ; 4: 12$. Hv $\tau \varepsilon \rho$ originally meant over, in behalf of, instead of, but here it is used like $\pi \varepsilon \rho$, around, concerning as in $1: 4 ; 1 \mathrm{Th}$ 3:2; 5:10, common in the papyri (Robertson, Grammar, p. 632). For the distinction between Пароибıа, Eлıчаvєıа (Epiphany), and Алока $\nu \psi \psi \iota \varsigma ~(R e v e l a t i o n) ~ a s ~ a p p l i e d ~ t o ~ t h e ~ S e c o n d ~$ Coming of Christ see Milligan on Thessalonian Epistles, pp. 145-151, in the light of the papyri. Hapovoıa lays emphasis on the
presence of the Lord with his people, $\varepsilon \pi \iota \varphi a v \varepsilon \iota a$ on his
manifestation of the power and love of God, $\alpha \pi о \kappa \alpha \lambda \nu \psi i s$ on the
revelation of God's purpose and plan in the Second Coming of the Lord Jesus.
And our gathering together unto him ( $\kappa \alpha \eta \mu \omega \nu \varepsilon \pi \iota \sigma v \nu \alpha \gamma \omega \gamma \eta \varsigma \varepsilon \pi^{\prime} \alpha v \tau o v$ ). A late word found only in II Macc. 2:7; 2Th 2:1; Heb 10:25 till Deissmann (Light from the Ancient East, p. 103) found it on a stele in the island of Syme, off Caria, meaning "collection." Paul is referring to the rapture, mentioned in 1Th 4:15-17, and the being forever with the Lord thereafter. Cf. also Mt 24:31; Mr 13:27 .

2Thess 2:2
To the end that ( $\varepsilon \iota \varsigma \tau 0$ ). One of Paul's favourite idioms for purpose, $\varepsilon \iota \varsigma \tau 0$ and the infinitive.

Ye be not quickly shaken ( $\mu \eta \tau \alpha \chi \varepsilon \omega \varsigma \sigma \alpha \lambda \varepsilon v \theta \eta v \alpha v \mu \alpha \varsigma)$. First aorist passive infinitive of $\sigma \alpha \lambda \varepsilon v \omega$, old verb to agitate, to cause to totter like a reed (Mt 11:7), the earth (Heb 12:26 ). Usual negative $\mu \eta$ and accusative of general reference $v \mu a \varsigma$ with the infinitive.

From your mind (ato тov vooc). Ablative case of nous, mind, reason, sober sense, "from your witte" (Wyclif), to "keep their heads."

Nor yet be troubled ( $\mu \eta \delta \varepsilon \theta \rho \circ \varepsilon เ \sigma \theta \alpha$ ). Old verb $\theta \rho o \varepsilon \omega$, to cry aloud (from $\theta \rho o o \varsigma$, clamour, tumult), to be in a state of nervous excitement (present passive infinitive, as if it were going on), "a continued state of agitation following the definite shock received ( $\sigma \alpha \lambda \varepsilon \cup \theta \eta \nu \alpha$ )" (Milligan).

Either by spirit ( $\mu \eta \tau \varepsilon \delta \iota \alpha \pi \nu \varepsilon v \mu \alpha \tau \sigma \varsigma$ ). By ecstatic utterance (1Th 5:10). The nervous fear that the coming was to be at once prohibited by $\mu \eta \delta \varepsilon$ Paul divides into three sources by $\mu \eta \tau \varepsilon, \mu \eta \tau \varepsilon, \mu \eta \tau \varepsilon$. No individual claim to divine revelation (the gift of prophecy) can justify the statement.

Or by word ( $\mu \eta \tau \varepsilon \delta \iota \alpha$ lo $\gamma o v$ ). Oral statement of a conversation with Paul (Lightfoot) to this effect
as from us. An easy way to set aside Paul's first Epistle by report of a private remark from Paul.

Or by epistle as from us $\left(\mu \eta \tau \varepsilon \delta \iota^{\prime} \varepsilon \pi \iota \sigma \tau o \lambda \eta \varsigma \omega \varsigma \delta \iota^{\prime} \eta \mu \omega \nu\right)$. In 1Th 4:13-5:3 Paul had plainly said that Jesus would come as a thief in the night and had shown that the dead would not be left out in the rapture. But evidently some one claimed to have a private epistle from Paul which supported the view that Jesus was coming at once,
as that the day of the Lord is now present ( $\omega \varsigma$ o $\tau \varepsilon \varepsilon \sigma \tau \eta \kappa \varepsilon \nu \eta \eta \mu \varepsilon \rho \alpha \tau 0 v \kappa \cup \rho \iota \circ$ ). Perfect active indicative of $\varepsilon \nu / \sigma \tau \eta \mu$, old verb, to place in, but intransitive in this tense to stand in or at or near. So "is imminent" (Lightfoot). The verb is common in the papyri. In 1Co 3:22; Ro 8:38 we have a contrast between $\tau \alpha \varepsilon \nu \varepsilon \sigma \tau \omega \tau \alpha$, the things present, and $\tau \alpha$ $\mu \varepsilon \lambda \lambda o v \tau \alpha$, the things future (to come). The use of $\omega \varsigma$ o $\tau$ may be disparaging here, though that is not true in 2Co 5:19. In the Koine it comes in the vernacular to mean simply "that" (Moulton, Proleg., p. 212), but that hardly seems the case in the N.T. (Robertson, Grammar, p. 1033). Here it means "to wit that," though "as that" or "as if" does not miss it much. Certainly it flatly denies that by conversation or by letter he had stated that the second coming was immediately at hand. "It is this misleading assertion that accounts both for the increased discouragement of the faint-hearted to encourage whom Paul writes 1:3-2:17, and for the increased meddlesomeness of the idle brethren to warn whom Paul writes 3:1-18" (Frame). It is enough to give one pause to note Paul's indignation over this use of his name by one of the over-zealous advocates of the view that Christ was coming at once. It is true that Paul was still alive, but, if such a "pious fraud" was so common and easily condoned as some today argue, it is difficult to explain Paul's evident anger. Moreover, Paul's words should make us hesitate to affirm that Paul definitely proclaimed the early return of Jesus. He hoped for it undoubtedly, but he did not specifically proclaim it as so many today assert and accuse him of misleading the early Christians with a false presentation.

2Thess 2:3
Let no man beguile you in any wise ( $\mu \eta \tau \iota \varsigma \nu \mu \alpha \varsigma \varepsilon \xi \alpha \pi \alpha \tau \eta \sigma \eta \kappa \alpha \tau \alpha \mu \eta \delta \varepsilon v \alpha \tau \rho о \pi о v$ ). First aorist active subjunctive of $\varepsilon \xi \alpha \pi \alpha \tau \alpha \omega$ (old verb to deceive, strengthened form of simple verb $\alpha \pi \alpha \tau \alpha \omega$ ) with double negative ( $\mu \eta \tau \iota \sigma, \mu \eta \delta \varepsilon v \alpha$ ) in accord with regular Greek idiom as in 1Co 16:11 rather than the aorist imperative which does occur sometimes in the third person as in $\operatorname{Mr}$ 13:15 ( $\mu \eta \kappa \alpha \tau \alpha \beta \alpha \tau \omega$ ). Paul broadens the warning to go beyond conversation and letter. He includes "tricks" of any kind. It is amazing how gullible some of the saints are when a new deceiver pulls off some stunts in religion.

For it will not be (o $\tau$ ). There is an ellipse here of ouk $\varepsilon \sigma \tau \alpha$ (or $\gamma \varepsilon \nu \eta \sigma \varepsilon \tau \alpha$ ) to be supplied after ot. Westcott and Hort make an anacoluthon at the end of verse 4. The meaning is clear. Ho is causal, because, but the verb is understood. The second coming not only is not "imminent," but will not take place before certain important things take place, a definite rebuff to the false enthusiasts of verse 2.

Except the falling away come first ( $\varepsilon \alpha v \mu \eta \varepsilon \lambda \theta \eta \eta \alpha \pi \sigma \sigma \tau \alpha \sigma \iota \alpha \pi \rho \omega \tau o v)$. Negative condition of the third class, undetermined with prospect of determination and the aorist sub-
junctive. Aлобтабı is the late form of $\alpha \pi о \sigma \tau \alpha \sigma ı \varsigma ~ a n d ~ i s ~ o u r ~ w o r d ~ a p o s t a s y . ~ P l u t a r c h ~ u s e s ~$ it of political revolt and it occurs in I Macc. 2:15 about Antiochus Epiphanes who was enforcing the apostasy from Judaism to Hellenism. In Jos 22:22 it occurs for rebellion against the Lord. It seems clear that the word here means a religious revolt and the use of the definite article $(\eta)$ seems to mean that Paul had spoken to the Thessalonians about it. The only other New Testament use of the word is in Ac 21:21 where it means apostasy from Moses. It is not clear whether Paul means revolt of the Jews from God, of Gentiles from God, of Christians from God, or of the apostasy that includes all classes within and without the body of Christians. But it is to be
first ( $\pi \rho \omega \tau \sigma v$ ) before Christ comes again. Note this adverb when only two events are compared (cf. Ac 1:1).

And the man of sin be revealed, the son of perdition ( $\kappa \alpha \alpha \pi о к \alpha \lambda \nu \varphi \theta \eta$ о $\alpha v \theta \rho \omega \pi о \varsigma$ $\tau \eta \varsigma \alpha v o \mu \alpha \sigma$, o vioc $\tau \eta \varsigma \alpha \pi \omega \lambda \varepsilon ו \alpha \varsigma)$. First aorist passive subjunctive after $\varepsilon \alpha v \mu \eta$ and same condition as with $\varepsilon \lambda \theta \eta$. The use of this verb $\alpha \pi$ ок $\alpha \lambda \nu \pi \tau \omega$, like $\alpha \pi о к \alpha \lambda \nu \psi ı \nu$ of the second coming in 1:7, seems to note the superhuman character (Milligan) of the event and the same verb is repeated in verses 6,8. The implication is that
the man of $\sin$ is hidden somewhere who will be suddenly manifested just as false apostles pose as angels of light (2Co 11:13ff. ), whether the crowning event of the apostasy or another name for the same event. Lightfoot notes the parallel between the man of sin, of whom $\sin$ is the special characteristic (genitive case, a Hebraism for the lawless one in verse 8) and Christ. Both Christ and the adversary of Christ are revealed, there is mystery about each, both make divine claims (verse 4). He seems to be the Antichrist of 1Jo 2:18 . The terrible phrase, the son of perdition, is applied to Judas in Joh 17:12 (like Judas doomed to perdition), but here to the lawless one (o $\alpha v o \mu o \varsigma$, verse 8), who is not Satan, but some one definite person who is doing the work of Satan. Note the definite article each time.

2Thess 2:4
 Antichrist this one opposes ( $\alpha \vee \tau \iota-$ ) Christ and exalts himself (direct middle of $v \pi \varepsilon \rho \alpha\llcorner\rho \omega$, old verb to lift oneself up
above others, only here and 2Co 12:7 in N.T.), but not Satan, but an agent of Satan. This participial clause is in apposition with the two preceding phrases, the man of sin, the son of perdition. Note 1Co 8:5 about one called God and Ac 17:23 for $\sigma \varepsilon \beta a \sigma \mu \alpha$ (from $\sigma \varepsilon \beta \alpha \zeta \rho \mu \alpha)$, object of worship, late word, in N.T. only in these two passages.

So that he sitteth in the temple of God ( $\omega \sigma \tau \varepsilon \alpha \cup \tau \circ v \varepsilon \iota \varsigma ~ \tau o v ~ v a o v ~ \tau o v ~ \theta \varepsilon о v ~ \kappa \alpha \theta เ \sigma \alpha) . ~$ Another example of the infinitive with $\omega \sigma \tau \varepsilon$ for result. Caius Caligula had made a desperate attempt to have his statue set up for worship in the Temple in Jerusalem. This incident may lie behind Paul's language here.

Setting himself forth as God ( $\alpha \pi о \delta \varepsilon ו \kappa v v \nu \tau \alpha$ عavтov от $\varepsilon \sigma \tau \iota v ~ \theta \varepsilon о \varsigma)$. Present active participle ( $\mu$ form) of $\alpha \pi$ o $\delta \varepsilon เ \kappa \nu \nu \mu$, agreeing in case with avtov,
showing himself that he is God. Caligula claimed to be God. Moffatt doubts if Paul is identifying this deception with the imperial cultus at this stage. Lightfoot thinks that the deification of the Roman emperor supplied Paul's language here. Wetstein notes a coin of Julius with $\theta \varepsilon o c$ on one side and $\Theta \varepsilon \sigma \sigma \alpha \lambda o v i \kappa \varepsilon \omega v$ on the other. In 1Jo 2:18 we are told of "many antichrists" some of whom had already come. Hence it is not clear that Paul has in mind only one individual or even individuals at all rather than evil principles, for in verse
 that restraineth). Frame argues for a combination of Belial and Antichrist as the explanation of Paul's language. But the whole subject is left by Paul in such a vague form that we can hardly hope to clear it up. It is possible that his own preaching while with them gave his readers a clue that we do not possess.

2Thess 2:5
When I was yet with you ( $\varepsilon \tau \omega v \pi \rho o \varsigma \nu \mu \alpha \varsigma$ ). The present participle takes the time of the verb $\varepsilon \lambda \varepsilon \gamma \circ v$ (imperfect active),

I used to tell you these things. So Paul recalls their memory of his words and leaves us without the clue to his idea. We know that one of the charges against him was that Jesus was another king, a rival to Caesar (Ac 17:7). That leads one to wonder how far Paul went when there in contrasting the kingdom of the world of which Rome was ruler and the kingdom of God of which Christ is king. Frame notes Paul's abrupt question here "with an unfinished sentence behind him" (verses 3f. ), even "with a trace of impatience."

2Thess 2:6
That which restraineth ( $\tau \circ$ кат $\chi \chi \circ v$ ).
And now you know ( $\kappa \alpha \nu v \nu$ oı $\delta a \tau \varepsilon$ ), says Paul in this cryptic apocalyptic passage. Unfortunately we do not know what Paul means by
that which restrains (holds back, катє $\chi \circ v$ ), neuter here and masculine in verse 7 o $\kappa \alpha \tau \varepsilon \chi \omega v$. "This impersonal principle or power is capable also of manifesting itself under a personal form" (Milligan). "He is Satan's messiah, an infernal caricature of the true Messiah" (Moffatt). Warfield (Expositor, III, iv, pp. 30ff.) suggested that the man of lawlessness is the imperial line with its rage for deification and that the Jewish state was the restraining power. But God overrules all human history and his ultimate purpose is wrought out.

To the end that ( $\varepsilon \iota \varsigma \tau 0)$. Another example of $\varepsilon \iota \varsigma ~ \tau o ~ a n d ~ t h e ~ i n f i n i t i v e ~ f o r ~ p u r p o s e . ~$
In his own season ( $\varepsilon \nu \tau \omega$ autov kaı $\rho \omega$ ). Note avtov (his), not $\varepsilon \alpha \cup \tau \circ \cup$ (his own),
revealed in his time, in the time set him by God.
2Thess 2:7
For the mystery of lawlessness doth already work ( $\tau$ о $\gamma \alpha \rho \mu \nu \sigma \tau \eta \rho \iota v \eta \delta \eta \eta \varepsilon \varepsilon \rho \gamma \varepsilon \iota \tau \alpha$ $\tau \eta \varsigma \alpha v o \mu i \alpha \varsigma)$. See 1Th 2:13 for $\varepsilon v \varepsilon \rho \gamma \varepsilon ı \tau \alpha$. The genitive $\tau \eta \varsigma$ avourac (lawlessness) describes
$\tau 0 \mu \nu \sigma \tau \eta \rho \circ v$ (note emphatic position of both). This mystery ( $\mu \nu \sigma \tau \eta \rho \circ \frac{}{}$ secret, from $\mu \nu \sigma \tau \eta \varsigma$, an initiate, $\mu v \varepsilon \omega$, to wink or blink) means here the secret purpose of lawlessness already at work, the only instance of this usage in the N.T. where it is used of the kingdom of God (Mt 13:11 ), of God (1Co 2:1 ) and God's will (Eph 1:9), of Christ (Eph 3:4), of the gospel (Eph 6:9), of faith ( $1 \mathrm{Ti} 3: 9$ ), of godliness ( $1 \mathrm{Ti} 3: 16$ ), of the seven stars (Re 1:20), of the woman (Re 17:7 ). But this secret will be "revealed" and then we shall understand clearly what Paul's meaning is here.

Until he be taken out of the way ( $\varepsilon \omega \varsigma \varepsilon \kappa \mu \varepsilon \sigma o v ~ \gamma \varepsilon v \eta \tau \alpha)$. Usual construction with $\varepsilon \omega \varsigma$ for the future (aorist middle subjunctive, $\gamma \varepsilon \nu \eta \tau \alpha$ ). Note absence of $\alpha \nu$ as often in N.T. and the Koıvๆ. Paul uses $\varepsilon \omega \varsigma$ only here and 1Co 4:5. When the obstacle is removed then the mystery of lawlessness will be revealed in plain outline.

2Thess 2:8
And then ( $\kappa \alpha$ тотв). Emphatic note of time,
then when the restraining one (o кат $\chi \omega v$ ) is taken out of the way, then $\theta \varepsilon \lambda \alpha w \lambda \varepsilon \sigma \varsigma$ ove (o $\alpha v o \mu \circ \varsigma)$, the man of $\sin$, the man of perdition, will be revealed.

Whom the Lord [Jesus] shall slay (ov o кupios [I $\eta \sigma o v \sigma] ~ a v \varepsilon \lambda \varepsilon$ ). Whether Jesus is genuine or not, he is meant by Lord. Ave $\lambda \varepsilon$ is a late future from $\alpha v a i \rho \varepsilon \omega$, in place of $\alpha v \alpha \iota \rho \eta \sigma \varepsilon$. Paul uses Isa 11:4 (combining
by the word of his mouth with
in breath through lips ) to picture the triumph of Christ over this adversary. It is a powerful picture how the mere breath of the Lord will destroy this arch-enemy (Milligan).

And bring to naught by the manifestation of his coming ( $\kappa \alpha \kappa \alpha \tau \alpha \rho ү \eta \sigma \varepsilon \tau \eta \varepsilon \pi \iota \varphi \alpha v \varepsilon \iota \alpha$
 Greek, appears 25 times in Paul and has a variety of renderings. In the papyri it has a weakened sense of hinder. It will be a grand fiasco, this advent of the man of sin. Paul here uses both $\varepsilon \pi \iota \varphi a v \varepsilon \iota \alpha$ ( $\varepsilon \pi \iota \varphi a v \psi$, elsewhere in N.T. in the Pastorals, familiar to the Greek mind for a visit of a god) and זapovoıa (more familiar to the Jewish mind, but common in the papyri) of the second coming of Christ. "The apparition of Jesus heralds his doom" (Moffatt). The mere appearance of Christ destroys the adversary (Vincent).

2Thess 2:9
Whose coming is (ov عббтıv $\eta \pi \alpha \rho o v \sigma ı \alpha)$. Refers to $o v$ in verse 8. The Antichrist has his $\pi \alpha \rho o v \sigma \iota \alpha$ also. Deissmann (Light from the Ancient East, pp. 374, 378) notes an inscription at Epidaurus in which "Asclepius manifested his Пapovбıa." Antiochus Epiphanes is called the manifest god (III Macc. 5:35). So the two Epiphanies coincide.

Lying wonders ( $\tau \varepsilon \rho a \sigma \iota \nu \psi \varepsilon \cup \delta o u c)$ ) "In wonders of a lie." Note here the three words for the miracles of Christ (Heb 2:4), power ( $\delta v v \alpha \mu ı$ ), signs ( $\sigma \eta \mu \varepsilon ı \alpha$ ), wonders ( $\tau \varepsilon \rho \alpha \tau \alpha)$, but all according to the working of Satan (ката عveрүєıаv tov $\Sigma \alpha \tau \alpha v \alpha$, the energy of Satan) just as Jesus had foretold (Mt 24:24) , wonders that would almost lead astray the very elect.

2Thess 2:10
With all deceit of unrighteousness ( $\varepsilon v \pi \alpha \sigma \eta \alpha \pi \alpha \tau \eta \quad \alpha \delta ı \kappa ı \alpha \varsigma)$. This pastmaster of trickery will have at his command all the energy and skill of Satan to mislead and deceive. How many illustrations lie along the pathway of Christian history.

For them that are perishing ( $\tau о \iota \varsigma \alpha \pi \sigma \lambda \lambda \nu \mu \varepsilon v o \iota \varsigma)$. Dative case of personal interest. Note this very phrase in 2Co 2:15; 4:3. Present middle participle of $\alpha \pi \pi o \lambda \lambda \nu \mu$, to destroy, the dreadful process goes on.

Because ( $\alpha v \theta^{\prime} o v$ ). In return for which things ( $\alpha v \tau$ and the genitive of the relative pronoun). Same idiom in Lu 1:20; 12:3; 19:44; Ac 12:23 and very common in the LXX.

The love of the truth ( $\tau \eta \nu \alpha \gamma \alpha \pi \eta \nu \tau \eta \varsigma \alpha \lambda \eta \theta \varepsilon \iota \alpha \varsigma)$. That is the gospel in contrast with lying and deceit.

That they might be saved ( $\varepsilon \iota \varsigma ~ \tau о ~ \sigma \omega \theta \eta v \alpha$ avтovৎ). First aorist passive infinitive of $\sigma \omega \zeta \omega$ with $\varepsilon \iota \varsigma \tau 0$, again, epexegetic purpose of
the truth if they had heeded it.
2Thess 2:11
 (prophetic) present of the time when the lawless one is revealed. Here is the definite judicial act of God (Milligan) who gives the wicked over to the evil which they have deliberately chosen (Ro 1:24,26,28).

A working of error ( $\varepsilon v \varepsilon \rho \gamma \varepsilon \iota \alpha \nu \pi \lambda \alpha \nu \eta \varsigma)$. Terrible result of wilful rejection of the truth of God.

That they should believe a lie ( $\varepsilon ı \varsigma ~ \tau о ~ \pi ı \sigma \tau \varepsilon \nu \sigma \alpha ~ \alpha \nu \tau 0 \cup \varsigma \tau \omega \psi \varepsilon v \delta \varepsilon$ ). Note $\varepsilon \iota \varsigma ~ \tau o$ again and $\tau \omega \psi \varepsilon v \delta \varepsilon$ (the lie, the falsehood already described), a contemplated result. Note Ro 1:25 "who changed the truth of God into the lie."

2Thess 2:12
That they all might be judged ( $\imath \alpha \alpha \rho ı \theta \omega \sigma \iota \nu \pi \alpha \nu \tau \varepsilon \varsigma)$. First aorist passive subjunctive of $\kappa \rho \imath v \omega$, to sift, to judge, with $\iota v a$. Ultimate purpose, almost result, of the preceding obstinate resistance to the truth and "the judicial infatuation which overtakes them" (Lightfoot), now final punishment. Condemnation is involved in the fatal choice made. These victims of the man of sin did not believe the truth and found pleasure in unrighteousness.

2Thess 2:13
See 1:3 for same beginning.
Beloved of the Lord ( $\eta \gamma \alpha \pi \eta \mu \varepsilon v o$ v $\pi о$ кирьо ). Perfect passive participle of $\alpha \gamma \alpha \pi \alpha \omega$ with $v \pi \frac{1}{}$ and the ablative as in 1Th 1:4, only here кирьov instead of $\theta \varepsilon o v$, the Lord Jesus rather than God the Father.

Because that God chose you ( $о \tau \varepsilon \lambda \lambda \alpha \tau о$ v $\mu \alpha \varsigma$ о $\theta \varepsilon \sigma \varsigma$ ). First aorist middle indicative of aı $\rho \varepsilon \omega$, to take, old verb, but uncompounded only in N.T. here, Php 1:22; Heb 11:25, and here only in sense of
choose , that being usually $\varepsilon \xi \alpha \iota \rho \varepsilon о \mu \alpha$ or $\pi \rho о о \rho \iota \zeta \omega$.
From the beginning ( $\alpha \pi^{\prime} \alpha \rho \chi \eta \varsigma$ ). Probably the correct text (Aleph D L) and not $\alpha \pi \alpha \rho \chi \eta \nu$ (first fruits, B G P), though here alone in Paul's writings and a hard reading, the eternal choice or purpose of God ( $1 \operatorname{Co} 2: 7$; Eph $1: 4 ; 2 \mathrm{Ti} 1: 9$ ), while $\alpha \pi \alpha \rho \chi \eta \nu$ is a favourite idea with Paul (1Co 15:20,23; 16:15; Ro 8:23; 11:16; 16:5 ).

Unto salvation ( $\varepsilon \iota \varsigma \sigma \omega \tau \eta \iota \alpha v$ ). The ultimate goal, final salvation.
In sanctification of the Spirit ( $\varepsilon v \alpha \gamma \iota \sigma \mu \omega \pi \nu \varepsilon v \mu \alpha \tau \sigma \varsigma)$. Subjective genitive $\pi \nu \varepsilon v \mu \alpha \tau \sigma$, sanctification wrought by the Holy Spirit.

And belief of the truth ( $\kappa \alpha \pi \iota \sigma \tau \varepsilon \alpha \lambda \eta \theta \varepsilon ı \alpha \varsigma)$. Objective genitive $\alpha \lambda \eta \theta \varepsilon \iota \alpha \varsigma$, belief in the truth.

2Thess 2:14
Whereunto ( $\varepsilon ı \varsigma 0$ ). The goal, that is the final salvation ( $\sigma \omega \tau \eta \rho ı \alpha$ ). Through our gospel ( $\delta \iota \alpha$ tov $\varepsilon v a \gamma \gamma \varepsilon \lambda ı v \eta \mu \omega v$ ). God called the Thessalonians through Paul's preaching as he calls men now through the heralds of the Cross as God
chose (cf. 1Th 2:12; 5:24).
To the obtaining ( $\varepsilon \iota \varsigma \pi \varepsilon \rho \iota \pi o \iota \eta \sigma \iota v)$. Probably correct translation rather than possession. See on 1Th 5:9, there
of salvation , here
of glory (the shekinah, glory of Jesus).
2Thess 2:15
So then ( $\alpha \rho \alpha o v v$ ). Accordingly then. The illative $\alpha \rho \alpha$ is supported (Ellicott) by the collective ouv as in 1Th 5:6; Ga 6:10, etc. Here is the practical conclusion from God's elective purpose in such a world crisis.

Stand fast ( $\sigma \tau \eta \kappa \varepsilon \tau \varepsilon)$. Present imperative active of the late present $\sigma \tau \eta \kappa 0$ from $\varepsilon \sigma \tau \eta \kappa \alpha$ (perfect active of $\iota \sigma \tau \eta \mu$ ). See on 1Th 3:8 .

Hold the traditions ( $\kappa \alpha \tau \varepsilon \iota \tau \varepsilon \tau \alpha \varsigma \pi \alpha \rho \alpha \delta о \sigma \varepsilon ı \varsigma)$. Present imperative of $\kappa \rho \alpha \tau \varepsilon \omega$, old verb, to have masterful grip on a thing, either with genitive (Mr 1:31) or usually the accusative as here. Пapaסoбıৎ (tradition) is an old word for what is handed over to one. Dibelius thinks that Paul reveals his Jewish training in the use of this word (Ga 1:14), but the word is a perfectly legitimate one for teaching whether oral,
by word ( $\delta \iota \alpha$ $\lambda o \gamma o v$ ), or written,
by epistle of ours ( $\delta \imath^{\prime} \varepsilon \pi \iota \sigma \tau o \lambda \eta \varsigma \eta \mu \omega v$ ). Paul draws here no distinction between oral tradition and written tradition as was done later. The worth of the tradition lies not in the form but in the source and the quality of the content. Paul in 1Co 11:23 says: "I received from the Lord what I also handed over ( $\pi \alpha \rho \varepsilon \delta \omega \kappa \alpha)$ unto you." He praises them because ye "hold fast the traditions even as I delivered them unto you." The
tradition may be merely that of men and so worthless and harmful in place of the word of God (Mr 7:8; Col 2:6-8 ). It all depends. It is easy to scoff at truth as mere tradition. But
human progress in all fields is made by use of the old, found to be true, in connection with the new if found to be true. In Thessalonica the saints were already the victims of theological charlatans with their half-baked theories about the second coming of Christ and about social duties and relations.

Which ye were taught ( $\alpha \varsigma \varepsilon \delta \iota \delta \alpha \chi \theta \eta \tau \varepsilon$ ). First aorist passive indicative of $\delta \iota \delta \alpha \sigma \kappa \omega$, to teach, retaining the accusative of the thing in the passive as is common with this verb like doceo in Latin and teach in English.

2Thess 2:16
And God our Father ( $\kappa \alpha[о] \theta \varepsilon o \varsigma o \pi \alpha \tau \eta \rho \eta \mu \omega v$ ). It is uncertain whether the first article $o$ is genuine as it is absent in B D. Usually Paul has the Father before Christ except here, 2Co 13:13; Ga 1:1.

Which loved us (o $\alpha \gamma \alpha \pi \eta \sigma \alpha \varsigma ~ \eta \mu \alpha \varsigma)$. This singular articular participle refers to o $\pi \alpha \tau \eta \rho$, "though it is difficult to see how St. Paul could otherwise have expressed his thought, if he had intended to refer to the Son, as well as to the Father. There is probably no instance in St. Paul of a plural adjective or verb, when the two Persons of the Godhead are mentioned" (Lightfoot).

Eternal comfort ( $\pi \alpha \rho \alpha \kappa \lambda \eta \sigma \iota v \alpha \iota \omega v \iota \alpha v$ ). Distinct feminine form of $\alpha \iota \omega v$ los here instead of masculine as in Mt 25:46 .

2Thess 2:17
Comfort and stablish ( $\pi \alpha \rho \alpha \kappa \alpha \lambda \varepsilon \sigma \alpha \kappa \alpha \sigma \tau \eta \rho \xi \alpha)$. First aorist active optative of wish for the future of two common verbs $\pi \alpha \rho \alpha \kappa \alpha \lambda \varepsilon \omega$ (see on 1 Th $3: 7$; 4:18; 5:14) and $\sigma \tau \varepsilon \rho \iota \zeta \omega$ (see on 1 Th 3:2,13 ). God is the God of
comfort (2Co 1:3-7) and strength (Ro 1:11; 16:25).

## 2 Thessalonians 3

2Thess 3:1
Finally ( $\tau 0 ~ \lambda o ı \pi o v) . ~ A c c u s a t i v e ~ o f ~ g e n e r a l ~ r e f e r e n c e . ~ C f . ~ \lambda o ı \pi o v ~ 1 T h ~ 4: 1 ~ . ~$ Pray ( $\pi \rho \circ \sigma \varepsilon \cup \chi \varepsilon \sigma \theta \varepsilon$ ). Present middle, keep on praying. Note $\pi \varepsilon \rho$ as in 1Th 5:25.
That the word of the Lord may run and be glorified (ıva о $\lambda о \gamma \circ \varsigma ~ \tau о v ~ к ט \rho ı о ט ~ \tau \rho \varepsilon \chi \eta ~$ $\kappa \alpha \delta_{0} \xi \alpha\lceil\eta \tau \alpha)$. Usual construction of iva after $\pi \rho о \sigma \varepsilon v \chi \circ \mu \alpha$, sub-final use, content and purpose combined. Note present subjunctive with both verbs rather than aorist, may keep on running and being glorified, two verbs joined together nowhere else in the N.T. Paul probably derived this metaphor from the stadium as in 1Co 9:24ff.; Ga 2:2; Ro 9:16; Php 2:16; 2Ti 4:7. Lightfoot translates "may have a triumphant career." On the word of the Lord see on 1Th 1:8 . Paul recognizes the close relation between himself and the readers. He needs their prayers and sympathy and he rejoices in their reception of the word of the Lord already,
even as also it is with you ( $\kappa \alpha \theta \omega \varsigma \kappa \alpha \pi \rho \circ \varsigma \nu \mu \alpha \varsigma$ ). "As it does in your case" (Frame).
2Thess 3:2
And that we may be delivered ( $\kappa \alpha เ v \alpha \rho \cup \sigma \theta \omega \mu \varepsilon v$ ). A second and more personal petition (Milligan). First aorist passive subjunctive of $\rho v o \mu \alpha$, old verb to rescue. Note change in tense from present to aorist (effective aorist).

From unreasonable and evil men ( $\alpha \pi о \tau \omega v \alpha \tau о \pi \omega v$ к $\alpha \pi о v \eta \rho \omega v \alpha v \theta \rho \omega \pi \omega v$ ). Ablative case with $\alpha \pi \sigma$. Originally in the old Greek $\alpha \tau о \pi о \varsigma$ ( $\alpha$ privative and толоৎ) is out of place, odd, unbecoming, perverse, outrageous, both of things and persons. Поvŋроя is from $\pi о v \varepsilon \omega$, to work ( $\pi 0 \vee 0 \varsigma$ ), looking on labour as an annoyance, bad, evil. Paul had a plague of such men in Corinth as he had in Thessalonica.

For all have not faith (ov $\gamma \alpha \rho \pi \alpha \nu \tau \omega \nu \eta \pi \iota \sigma \tau \iota \varsigma)$. Copula $\varepsilon \sigma \tau \iota v$ not expressed. П $\alpha v \tau \omega \nu$ is predicate possessive genitive, faith (article with abstract substantive) does not belong to all. Hence their evil conduct.

2Thess 3:3
But the Lord is faithful ( $\pi \iota \sigma \tau \circ \varsigma \delta \varepsilon \varepsilon \sigma \tau \iota v$ о кирьoৎ).
But faithful is the Lord (correct rendition), with a play (paronomasia) on $\pi \iota \sigma \tau \iota c$ by $\pi \iota \sigma \tau o \varsigma$ as in Ro 3:3 we have a word-play on $\alpha \pi \iota \sigma \tau \varepsilon \omega$ and $\alpha \pi \iota \sigma \tau \iota \alpha$. The Lord can be counted on, however perverse men may be.

From the evil one ( $\alpha \pi 0$ tov tovnpov). Apparently a reminiscence of the Lord's Prayer in Mt 6:13 $\rho$ voa $\eta \mu \alpha \varsigma \alpha \pi о$ tov $\pi о v \eta \rho o v$. But here as there it is not certain whether tov $\pi о v \eta \rho o v$ is neuter (evil) like to $\pi 0 v \eta \rho o v$ in Ro 12:9 or masculine (the evil one). But we have o тоvŋpos (the evil one) in 1Jo 5:18 and tov đovn $\rho 0$ ov is clearly masculine in Eph 6:16. If masculine here, as is probable, is it "the Evil One" (Ellicott) or merely the evil man like those mentioned in verse 2? Perhaps Paul has in mind the representative of Satan, the man of sin, pictured in 2:1-12, by the phrase here without trying to be too definite.

2Thess 3:4
And we have confidence ( $\pi \varepsilon \pi \sigma \theta \circ \mu \varepsilon \nu)$. Second perfect indicative of $\pi \varepsilon \iota \theta \omega$, to persuade, intransitive in this tense, we are in a state of trust.

In the Lord touching you ( $\left.\varepsilon v \kappa \nu \rho \iota \omega \varepsilon \varphi^{\prime} v \mu \alpha \varsigma\right)$. Note the two prepositions, $\varepsilon v$ in the sphere of the Lord (1Th 4:1) as the ground of Paul's confident trust, $\varepsilon \varphi^{\prime}(\varepsilon \pi)$ with the accusative (towards you) where the dative could have been used (cf. 2Co 2:3).

Ye both do and will do ([кaı] $\pi о \iota \varepsilon \iota \varepsilon \kappa \alpha \pi о \not \eta \sigma \varepsilon \tau \varepsilon$ ). Compliment and also appeal, present and future tenses of $\pi o t \varepsilon \omega$.

The things which we command ( $\alpha \pi \alpha \rho \alpha \gamma \gamma \varepsilon \lambda \lambda o \mu \varepsilon v$ ). Note of apostolic authority here, not advice or urging, but command.

2Thess 3:5
Direct ( $\kappa \alpha \tau \varepsilon \cup \theta v v \alpha$ ). First aorist active optative of wish for the future as in 2:17; 1Th 5:23 from кatєvӨvv $\omega$, old verb, as in 1Th 3:11 (there
way, here
hearts ) and Lu 1:79 of
feet ( $\pi$ o $\delta \alpha \varsigma$ ). Perfective use of $\kappa \alpha \tau \alpha$. Bold figure for making smooth and direct road. The Lord here is the Lord Jesus.

Into the love of God ( $\varepsilon \varsigma \varsigma \tau \eta \alpha \gamma \alpha \pi \eta \nu \tau 0 v \theta \varepsilon o v$ ). Either subjective or objective genitive makes sense and Lightfoot pleads for both, "not only as an objective attribute of deity, but as a ruling principle in our hearts," holding that it is "seldom possible to separate the one from the other." Most scholars take it here as subjective, the characteristic of God.

Into the patience of Christ ( $\varepsilon \iota \varsigma \tau \eta \nu \tau \pi \rho \mu \nu \eta \nu \tau 0 v \mathrm{X} \rho \iota \sigma \tau \circ v$ ). There is the same ambiguity here, though the subjective idea, the patience shown by Christ, is the one usually accepted rather than "the patient waiting for Christ" (objective genitive).

2Thess 3:6
Now we command you ( $\pi \alpha \rho \alpha \gamma \gamma \varepsilon \lambda \lambda o \mu \varepsilon v \delta \varepsilon v \mu \nu \nu$ ). Paul puts into practice the confidence expressed on their obedience to his commands in verse 4.

In the name of the Lord Jesus Christ ( $\varepsilon v$ оvоцат $\tau о v$ кирıv I $\eta \sigma o v$ X $\rho \iota \sigma \tau о v$ ).
Name $(o v o \mu \alpha)$ here for authority of Jesus Christ with which compare
through the Lord Jesus ( $\delta$ ıa $\tau 0 v$ кvpıov I $\eta \sigma o v$ ) in 1Th 4:2. For a full discussion of the phrase see the monograph of W. Heitmuller, Im Namen Jesu. Paul wishes his readers to realize the responsibility on them for their obedience to his command.

That ye withdraw yourselves ( $\sigma \tau \varepsilon \lambda \lambda \varepsilon \sigma \theta \alpha v \mu \alpha \varsigma)$. Present middle (direct) infinitive of $\sigma \tau \varepsilon \lambda \lambda \omega$, old verb to place, arrange, make compact or shorten as sails, to move oneself from or to withdraw oneself from (with a $\alpha 0$ and the ablative). In 2Co 8:20 the middle voice ( $\sigma \tau \varepsilon \lambda \lambda o \mu \varepsilon \nu o$ ) means taking care.

From every brother that walketh disorderly ( $\alpha \pi о$ л $\alpha \nu \tau о \varsigma ~ \alpha \delta \varepsilon \lambda \varphi о v ~ \alpha \tau \alpha \kappa \tau \omega \varsigma$, $\pi \varepsilon \rho \iota \pi \alpha \tau о \cup v \tau о \varsigma)$. He calls him "brother" still. The adverb $\alpha \tau \alpha \kappa \tau \omega \varsigma$ is common in Plato and
is here and verse 11 alone in the N.T., though the adjective ataктoऽ, equally common in Plato we had in 1Th 5:14 which see. Military term, out of ranks.

And not after the tradition ( $\kappa \alpha \mu \eta \kappa \alpha \tau \alpha \tau \eta \nu \pi \alpha \rho \alpha \delta о \sigma \iota v$ ). See on 2:15 for $\pi \alpha \rho \alpha \delta o \sigma t v$.
Which they received of us ( $\eta \nu \pi \alpha \rho \varepsilon \lambda \alpha \beta o \sigma \alpha \nu \pi \alpha \rho \eta \mu \omega v$ ). Westcott and Hort put this form of the verb (second aorist indicative third person plural of $\pi \alpha \rho \alpha \lambda \alpha \mu \beta \alpha v \omega$, the -oб $\alpha v$ form instead of -ov, with slight support from the papyri, but in the LXX and the Boeotian dialect, Robertson, Grammar, pp. 335f.) in the margin with $\pi \alpha \rho \varepsilon \lambda \alpha \beta \varepsilon \tau \varepsilon$ (ye received) in the text. There are five different readings of the verb here, the others being $\pi \alpha \rho \varepsilon \lambda \alpha \beta o v, \pi \alpha \rho \varepsilon \lambda \alpha \beta \varepsilon$, ع $\lambda \alpha \beta \frac{\sigma}{}$ v.

2Thess 3:7
How ye ought to imitate us ( $\pi \omega \varsigma \delta \varepsilon \mu \mu \varepsilon \iota \sigma \theta \alpha \eta \mu \varsigma)$ ). Literally, how it is necessary to imitate us. The infinitive $\mu \mu \varepsilon \iota \sigma \theta a$ is the old verb $\mu \mu \varepsilon о \mu \alpha$ from $\mu \mu \circ \varsigma$ (actor, mimic), but in N.T. only here (and verse 9), Heb 13:7; 3Jo 1:11. It is a daring thing to say, but Paul knew that he had to set the new Christians in the midst of Jews and Gentiles a model for their imitation (Php 3:17).

For we behaved not ourselves disorderly among you (oт оик $\eta \tau \alpha \kappa \tau \eta \sigma \alpha \mu \varepsilon v \varepsilon v \nu \mu \nu \nu$ ). First aorist active indicative of old verb $\alpha \tau \alpha \kappa \varepsilon \omega$, to be out of ranks of soldiers. Specific denial on Paul's part in contrast to verse 6,17 .

2Thess 3:8
For nought ( $\delta \omega \rho \varepsilon \alpha v)$. Adverbial accusative, as a gift, gift-wise ( $\delta \omega \rho \varepsilon \alpha$, gift, from $\delta \iota \delta \omega \mu$ ). Same claim made to the Corinthians (2Co 11:7), old word, in LXX, and papyri. He lodged with Jason, but did not receive his meals gratis, for he paid for them. Apparently he received no invitations to meals. Paul had to make his financial independence clear to avoid false charges which were made in spite of all his efforts. To eat bread is merely a Hebraism for eat (verse 10). See 1Th 2:9 for labour and travail, and night and day (vuктоৎ ка $\eta \mu \varepsilon \rho \alpha \varsigma$, genitive of time, by night and by day). See 1Th 2:9 for rest of the verse in precisely the same words.

2Thess 3:9
 his
right to receive adequate support (1Th 2:6; 1 Co 9:4 where he uses the same word $\varepsilon \xi o v \sigma \iota a v$ in the long defence of this
right, 1Co 9:1-27 ). So he here puts in this limitation to avoid misapprehension. He did allow churches to help him where he would not be misunderstood (2Co 11:7-11; Php 4:45f. ). Paul uses ovX ot elsewhere to avoid misunderstanding (2Co 1:24; 3:5; Php 4:17).

But to make ourselves an ensample unto you ( $\alpha \lambda \lambda^{\prime}$ เva عavtovc $\tau \cup \pi \circ v \delta \omega \mu \varepsilon v \nu \mu v \nu$ ). Literally,
but that we might give ourselves a type to you. Purpose with tva and second aorist active subjunctive of $\delta i \delta \omega \mu$. On tv $\boldsymbol{\pi}$. $v$ see on 1Th 1:7.

2Thess 3:10
This ( $\tau$ ovto). What he proceeds to give.
If any will not work, neither let him eat (o $\tau \varepsilon \tau \iota \varsigma ~ o v ~ \theta \varepsilon \lambda \varepsilon \varepsilon \rho \gamma \alpha \zeta \varepsilon \sigma \theta \alpha \mu \eta \delta \varepsilon \varepsilon \sigma \theta \iota \varepsilon \tau \omega$ ). Recitative ot here not to be translated, like our modern quotation marks. Apparently a Jewish proverb based on Ge 3:19. Wetstein quotes several parallels. Moffatt gives this from Carlyle's Chartism: "He that will not work according to his faculty, let him perish according to his necessity." Deissmann (Light from the Ancient East, p. 314) sees Paul borrowing a piece of workshop morality. It was needed, as is plain. This is a condition of the first class (note negative ov) with the negative imperative in the conclusion.

2Thess 3:11
For we hear ( $\alpha \kappa о v o \mu \varepsilon v \gamma \alpha \rho$ ). Fresh news from Thessalonica evidently. For the present tense compare 1Co 11:18. The accusative and the participle is a regular idiom for indirect discourse with this verb (Robertson, Grammar, pp. 1040-2). Three picturesque present participles, the first a general description, $\pi \varepsilon \rho \iota \pi \alpha \tau 0 \cup v \tau \alpha \varsigma \alpha \tau \alpha \kappa \tau \omega \varsigma$, the other two specifying with a vivid word-play,
that work not at all, but are busy-bodies ( $\mu \eta \delta \varepsilon v \varepsilon \rho \gamma a \zeta о \mu \varepsilon v o v \varsigma \alpha \lambda \lambda \alpha \pi \varepsilon \rho เ \varepsilon \rho \gamma \alpha \zeta \rho \mu \varepsilon v o v \varsigma)$. Literally,
doing nothing but doing around . Ellicott suggests,
doing no business but being busy bodies . "The first persecution at Thessalonica had been fostered by a number of fanatical loungers (Ac 17:5)" (Moffatt). These theological dead-beats were too pious to work, but perfectly willing to eat at the hands of their neighbours while they piddled and frittered away the time in idleness.

2Thess 3:12
We command and exhort ( $\pi \alpha \rho \alpha \gamma \gamma \varepsilon \lambda \lambda о \mu \varepsilon v \kappa \alpha \pi \alpha \rho \alpha \kappa \alpha \lambda о \nu \mu \varepsilon v$ ). Paul asserts his authority as an apostle and pleads as a man and minister.

That with quietness they work, and eat their own bread ( $\tau v \alpha \mu \varepsilon \tau \alpha \eta \sigma \nu \chi เ \alpha \varsigma \varepsilon \rho \gamma \alpha \zeta \circ \mu \varepsilon v o$ тov $\varepsilon \alpha \cup \tau \omega v$ aptov $\varepsilon \sigma \theta \omega \omega \sigma v)$. Substance of the command and exhortation by $\imath v \alpha$ and the present subjunctive $\varepsilon \sigma \theta \omega \sigma \sigma v$. Literally,
that working with quietness they keep on eating their own bread. The precise opposite of their conduct in verse 11 .

2Thess 3:13
But ye, brethren, be not weary in well-doing (ข $\mu \varepsilon \iota \varsigma \delta \varepsilon, \alpha \delta \varepsilon \lambda \varphi о \iota, \mu \eta \varepsilon v \kappa \alpha \kappa \eta \sigma \eta \tau \varepsilon$ $\kappa \alpha \lambda о \pi о \circ o u v \tau \varepsilon \varsigma)$. Emphatic position of $v \mu \varepsilon \iota \varsigma$ in contrast to these piddlers. M $\eta$ and the aorist subjunctive is a prohibition against beginning an act (Robertson, Grammar, pp. 851-4). It is a late verb and means to behave badly in, to be cowardly, to lose courage, to flag, to faint, ( $\varepsilon v$, какоৎ) and outside of Lu 18:1 in the N.T. is only in Paul's Epistles (2Th 3:13; 2Co 4:1,16;
 honourable thing occurs nowhere else in the N.T., but is in the LXX and a late papyrus. Paul
 to do good, in 1Ti 6:18.

2Thess 3:14
And if any one obeyeth not our word by this epistle ( $\varepsilon \delta \varepsilon \tau \iota \varsigma$ ov $\cup \pi \alpha \kappa о v \varepsilon \tau \omega \lambda о \gamma \omega$ $\eta \mu \omega v \delta \iota \alpha \tau \eta \varsigma \varepsilon \pi(\sigma \tau 0 \lambda \eta \varsigma)$. Paul sums up the issue bluntly with this ultimatum. Condition of the first class, with negative ov, assuming it to be true.

Note that man ( $\tau 0 v \tau \sigma \nu \sigma \eta \mu \varepsilon \iota \sigma \sigma \theta \varepsilon$ ). Late verb $\sigma \eta \mu \varepsilon เ \sigma \omega$, from $\sigma \eta \mu \varepsilon \iota \sigma$, sign, mark, token. Put a tag on that man. Here only in N.T. "The verb is regularly used for the signature to a receipt or formal notice in the papyri and the ostraca of the Imperial period" (Moulton \& Milligan's Vocabulary). How this is to be done (by letter or in public meeting) Paul does not say.

That ye have no company with him ( $\mu \eta \sigma \nu v \alpha v \alpha \mu \gamma v v \sigma \theta \alpha \alpha \cup \tau \omega)$. The MSS. are divided between the present middle infinitive as above in a command like Ro 12:15; Php 3:16 or the present middle imperative $\sigma \nu v a v a \mu \gamma v \nu \sigma \theta \varepsilon(-\alpha$ and $-\varepsilon$ often being pronounced alike in the Koine). The infinitive can also be explained as an indirect command. This double compound verb is late, in LXX and Plutarch, in N.T. only here and 1Co 5:9,11. Avtw is in associative instrumental case.

To the end that he may be ashamed ( $\imath v \alpha \varepsilon \nu \tau \rho \alpha \pi \eta$ ). Purpose clause with $\imath v \alpha$. Second aorist passive subjunctive of $\varepsilon \nu \tau \rho \varepsilon \pi \omega \omega$, to turn on, middle to turn on oneself or to put to shame, passive to be made ashamed. The idea is to have one's thoughts turned in on oneself.

2Thess 3:15
Not as an enemy ( $\mu \eta \omega \varsigma \varepsilon \chi \theta \rho o v$ ). This is always the problem in such ostracism as discipline, however necessary it is at times. Few things in our churches are more difficult of wise execution than the discipline of erring members. The word $\varepsilon \chi \theta \rho \circ \varsigma$ is an adjective, hateful, from $\varepsilon \chi \theta$ oc, hate. It can be passive,
hated, as in Ro 11:28, but is usually active
hostile, enemy, foe.
2Thess 3:16
 the God of peace himself .
Give you peace ( $\delta o \imath \eta \nu \mu i v \tau \eta v \varepsilon \iota \eta \eta \nu \eta v$ ). Second aorist active optative (Koine) of $\delta \iota \delta \omega \mu$, not $\delta \omega \eta$ (subjunctive). So also Ro 15:5; 2Ti 1:16,18. The Lord Jesus whose characteristic is peace, can alone give real peace to the heart and to the world. (Joh 14:27).

2Thess 3:17

Of me Paul with mine own hand ( $\tau \eta \varepsilon \mu \eta \chi \varepsilon \rho \rho$ Пau入ov). Instrumental case $\chi \varepsilon \rho \rho$. Note genitive $\Pi \alpha v \lambda o v$ in apposition with possessive idea in the possessive pronoun $\varepsilon \mu \eta$. Paul had dictated the letter, but now wrote the salutation in his hand.

The token in every epistle ( $\sigma \eta \mu \varepsilon \iota \circ \varepsilon \varepsilon v \pi \alpha \sigma \eta \varepsilon \pi \iota \sigma \tau \circ \lambda \eta$ ). Mark (verse 14) and proof of the genuineness of each epistle, Paul's signature. Already there were spurious forgeries ( 2 Th 2:2). Thus each church was enabled to know that Paul wrote the letter. If only the autograph copy could be found!

2Thess 3:18
Salutation just like that in 1Th 5:28 with the addition of $\pi \alpha \nu \tau \omega \nu$ (all).

## THE FOURTH GROUP

THE PASTORAL EPISTLES

## FIRST TIMOTHY <br> TITUS <br> SECOND TIMOTHY

## A.D. 65 TO 68 <br> BY WAY OF INTRODUCTION

It is necessary to discuss introductory matters concerning the three because they are common to them all. It is true that some modern scholars admit as Pauline the personal passages in 2Ti 1:15-18; 4:9-22 while they deny the genuineness of the rest. But that criticism falls by its own weight since precisely the same stylistic characteristics appear in these admitted passages as in the rest and no earthly reason can be advanced for Paul's writing mere scraps or for the omission of the other portions and the preservation of these by a second century forger.

The external evidence for the Pauline authorship is strong and conclusive (Clement, Polycarp, Irenaeus, Tertullian, Theophilus, the Muratorian Canon). "Traces of their circulation in the church before Marcion's time are clearer than those which can be found for Romans and II Corinthians" (Zahn, Introduction to the N.T., tr. II, p. 85). Marcion and Tatian rejected them because of the condemnation of asceticism by Paul.

Objections on internal grounds are made on the lines laid down by Baur and followed by Renan. They are chiefly four. The "most decisive" as argued by McGiffert (History of Christianity in the Apostolic Age, p. 402) is that "the Christianity of the Pastoral Epistles is not the Christianity of Paul." He means as we know Paul in the other Epistles. But this charge is untrue. It is true that Paul here lists faith with the virtues, but he does that in Ga 5:22 . Nowhere does Paul give a loftier word about faith than in 1Ti 1:12-17. Another objection urged is that the ecclesiastical organization seen in the Pastoral Epistles belongs to the second century, not to the time of Paul's life. Now we have the Epistles of Ignatius in the early part of the second century in which "bishop" is placed over "elders" of which there is no trace in the New Testament (Lightfoot). A forger in the second century would certainly have reproduced the ecclesiastical organization of that century instead of the first as we have it in the Pastoral Epistles. There is only here the normal development of bishop (=elder) and deacon. A third objection is made on the ground that there is no room in Paul's life as we know it in the Acts and the other Pauline Epistles for the events alluded to in the Pastoral Epistles and it is also argued on late and inconclusive testimony that Paul was put to death A.D. 64 and had only one Roman imprisonment. If Paul was executed A.D. 64, this objection has force in it, though Bartlet (The Apostolic Age) tries to make room for them in the period covered by the Acts. Duncan makes the same attempt for the Pauline scraps admitted by
him as belonging to the hypothecated imprisonment in Ephesus. But, if we admit the release of Paul from the first Roman imprisonment, there is ample room before his execution in A.D. 68 for the events referred to in the Pastoral Epistles and the writing of the letters (his going east to Ephesus, Macedonia, to Crete, to Troas, to Corinth, to Miletus, to Nicopolis, to Rome), including the visit to Spain before Crete once planned for (Ro 15:24,28) and mentioned by Clement of Rome as a fact ("the limit of the west"). The fourth objection is that of the language in the Pastoral Epistles. Probably more men are influenced by this argument than by any other. The ablest presentation of this difficulty is made by P. N. Harrison in The Problem of the Pastoral Epistles (1921). Besides the arguments Dr. Harrison has printed the Greek text in a fashion to help the eye see the facts. Words not in the other Pauline Epistles are in red, Pauline phrases (from the other ten) are underlined, hapax legomena are marked by an asterisk. At a superficial glance one can see that the words here not in the other Pauline Epistles and the common Pauline phrases are about equal. The data as to mere words are broadly as follows according to Harrison: Words in the Pastorals, not elsewhere in the N.T. (Pastoral hapax legomena) 175 (168 according to Rutherford); words in the other ten Pauline Epistles not elsewhere in the N.T. 470 (627 according to Rutherford). Variations in MSS. will account for some of the difficulty of counting. Clearly there is a larger proportion of new words in the Pastorals (about twice as many) than in the other Pauline Epistles. But Harrison's tables show remarkable differences in the other Epistles also. The average of such words per page in Romans is 4, but 5.6 in II Corinthians, 6.2 in Philippians, and only 4 in Philemon. Parry (Comm., p. CXVIII) notes that of the 845 words in the Pastorals as compared with each other 278 occur only in I Tim., 96 only in Titus, 185 only in II Tim. "If vocabulary alone is taken, this would point to separate authorship of each epistle." And yet the same style clearly runs through all three. After all vocabulary is not wholly a personal problem. It varies with age in the same person and with the subject matter also. Precisely such differences exist in the writings of Shakespeare and Milton as critics have long ago observed. The only problem that remains is whether the differences are so great in the Pastoral Epistles as to prohibit the Pauline authorship when "Paul the aged" writes on the problem of pastoral leadership to two of the young ministers trained by him who have to meet the same incipient Gnostic heresy already faced in Colossians and Ephesians. My judgment is that, all things considered, the contents and style of the Pastoral Epistles are genuinely Pauline, mellowed by age and wisdom and perhaps written in his own hand or at least by the same amanuensis in all three instances. Lock suggests Luke as the amanuensis for the Pastorals.

The conclusion of Lock is that "either they are genuine 'letters' or artificial 'Epistles'" (Int. Crit. Comm., p. XXV). If not genuine, they are forgeries in Paul's name (pseudepigraphic). "The argument from style is in favour of the Pauline authorship, that from vocabulary strongly, though not quite conclusively, against it" (Lock, Op. Cit., p. XXIX). I should put
the case for the Pauline authorship more strongly than that and shall treat them as Paul's own. Parry (Comm., p. CXIII) well says: "It is not reasonable to expect that a private letter, addressed to a personal friend, for his own instruction and consideration, should exhibit the same features as a letter addressed to a community for public, oral communication."

Special Books on the Pastoral Epistles (besides Introductions to the N.T., Apostolic History, Lives of Paul, the Epistles of Paul as a whole): Belser (1907), Bernard (Cambridge Gr. T., 1899), E. F. Brown (Westminster, 1917), Bowen (Dates of P. Letters, 1900), Dibelius (Handbuch, 1913), Ellicott (1883), P. Fairbairn, P. N. Harrison (Problem of the Past. Eps., 1906), Kohler (Schriften N.T., 2 Aufl. 1907), Knabenbauer (1913), Kraukenberg (1901), Laughlin (Past. Eps. in Light of One Rom. Imp., 1905), Lilley (1901), W. Lock (Int. \& Crit. Comm., 1924), Lutgert (Die Irrlehre d. P., 1909), Maier (Die Hauptprobleme d. P., 1910), Mayer (1913), Meinertz (1913), Michaelis, W (Pastoralbriefe etc. zur Echtheitsfrage der Pastoralbriefe, 1930), Niebergall (Handbuch, 1909), Parry (1920), Plummer (Exp. B., 1896), Pope (1901), Riggenbach (1898), Stock (Plain Talks on, 1914), Strachan (Westm. N.T., 1910), von Soden (Hand-Comm., 1891), Wace (Sp. Comm., 1885), B. Weiss (Meyer Komm., ed. 5, 1886), White (Exp. Grk. T., 1910), Wohlenberg (Zahn's Komm._, 1906).

FIRST TIMOTHY
PROBABLY A.D. 65

## FROM MACEDONIA

## BY WAY OF INTRODUCTION

Assuming the Pauline authorship the facts shape up after this fashion. Paul had been in Ephesus ( $1 \mathrm{Ti} 1: 3$ ) after his arrival from Rome, which was certainly before the burning of Rome in A.D. 64. He had left Timothy in charge of the work in Ephesus and has gone on into Macedonia (1Ti 1:3 ), possibly to Philippi as he had hoped (Php 2:24). He wishes to help Timothy meet the problems of doctrine (against the Gnostics), discipline, and church training which are increasingly urgent. There are personal touches of a natural kind about Timothy's own growth and leadership. There are wise words here from the greatest of all preachers to a young minister whom Paul loved.

## 1 Timothy 1

1Tim 1:1
According to the commandment (кат' $\varepsilon \pi \iota \tau \alpha \gamma \eta \nu)$. A late Koine word (Polybius, Diodorus), but a Pauline word also in N.T. This very idiom ("by way of command") in 1Co 7:6; 2Co 8:8; Ro 16:26; 1Ti 1:1; Tit 1:3. Paul means to say that he is an apostle under orders.

Of God our Saviour ( $\theta \varepsilon o v \sigma \omega \tau \eta \rho o \varsigma ~ \eta \mu \omega v$ ). Genitive case with $\varepsilon \pi \iota \tau \alpha \gamma \eta \nu$. In the LXX $\sigma \omega \tau \eta \rho$ (old word from $\sigma \omega \zeta \omega$ for agent in saving, applied to deities, princes, kings, etc.) occurs 20 times, all but two to God. The Romans called the emperor "Saviour God." In the N.T. the designation of God as Saviour is peculiar to Lu 1:47; Jude 1:25; 1Ti 1:3; 2:3; 4:10; Tit 1:3; 2:10; 3:4 . In the other Epistles Paul uses it of Christ (Php 3:20; Eph 5:23) as in 2Ti 1:10 . In 2Pe 1:1 we have "our God and Saviour Jesus Christ" as in Tit 2:13 .

Our hope ( $\tau \eta \varsigma \varepsilon \lambda \pi \iota \delta o \varsigma \eta \mu \omega v$ ). Like Col 1:27. More than the author and object of hope, "its very substance and foundation" (Ellicott).

1Tim 1:2
True ( $\gamma \nu \eta \sigma \omega \omega$ ). Legitimate, not spurious. Old word from $\gamma เ v o \mu \alpha$, but Pauline only in N.T. (Php 4:3; 2Co 8:8; Tit 1:4). In Php 2:20 the adverb $\gamma v \eta \sigma \omega \varsigma$ occurs and of Timothy again.

Christ Jesus (Xpıotov I $\eta \sigma o v$ ). So twice already in verse 1 and as usual in the later Epistles (Col 1:1; Eph 1:1).

1Tim 1:3
As I exhorted ( $\kappa \alpha \theta \omega \varsigma \pi \alpha \rho \varepsilon \kappa \alpha \lambda \varepsilon \sigma \alpha)$. There is an ellipse of the principal clause in verse 4 ( so do I now not being in the Greek).

To tarry ( $\pi \rho \circ \sigma \mu \varepsilon เ v \alpha)$. First aorist active infinitive of $\pi \rho \circ \sigma \mu \varepsilon v \omega$, old verb, attributed by Luke to Paul in Ac 13:43.

That thou mightest charge (ıva $\pi \alpha \rho \alpha \gamma \gamma \varepsilon ı \lambda \eta ı$ ). Subfinal clause with $\tau v a$ and the first aorist active subjunctive of $\pi \alpha \rho \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$, old verb, to transmit a message along ( $\pi \alpha \rho \alpha$ ) from one to another. See 2Th 3:4,6,10. Lock considers this idiom here an elliptical imperative like Eph 4:29; 5:33.

Certain men ( $\tau \kappa \sigma เ v)$. Dative case. Expressly vague (no names as in 1:20), though Paul doubtless has certain persons in Ephesus in mind.

Not to teach a different doctrine ( $\mu \eta \varepsilon \tau \varepsilon \rho о \delta ı \delta \alpha \sigma \kappa \alpha \lambda \varepsilon ı \nu)$. Earliest known use of this compound like какоסıסaбка入єเv of Clement of Rome. Only other N.T. example in 6:3. Eusebius has $\varepsilon$ тєpoסıঠaбка入oc. Same idea in Ga 1:6; 2Co 11:4; Ro 16:17. Perhaps coined by Paul.

1Tim 1:4

To give heed ( $\pi \rho \circ \sigma \varepsilon \chi \varepsilon เ v$ ). With vouv understood. Old and common idiom in N.T. especially in Luke and Acts (Ac 8:10ff. ). Not in Paul's earlier Epistles. 1Ti 3:8; 4:1,13; Tit 1:14

To fables ( $\mu \nu \theta$ oıs). Dative case of old word for speech, narrative, story, fiction, falsehood. In N.T. only 2Pe 1:16; 1 Ti 1:4; 4:7; Tit 1:14; 2Ti 4:4.

Genealogies ( $\gamma \varepsilon v \varepsilon \alpha \lambda$ oүıaı). Dative of old word, in LXX, in N.T. only here and Tit 3:9

Endless (ađepavtoıc). Old verbal compound (from a privative and $\pi \varepsilon \rho \alpha ı v \omega$, to go through), in LXX, only here in N.T. Excellent examples there for old words used only in the Pastorals because of the subject matter, describing the Gnostic emphasis on aeons.

Questionings ( $\varepsilon \kappa \zeta \eta \tau \eta \sigma \varepsilon \varsigma)$ ). "Seekings out." Late and rare compound from $\varepsilon \kappa \zeta \eta \tau \varepsilon \omega$ (itself Koine word, Ro 3:11 from LXX and in papyri). Here only in N.T. Simplex $\lceil\eta \tau \eta \sigma \iota \varsigma ~ i n ~$ Ac 15:2; 1Ti 6:4; Tit 3:9; 2 Ti 2:23.

A dispensation (orкоvoцıav). Pauline word (1Co 9:17; Col 1:25; Eph 1:9; 3:9; 1Ti 1:4 ), Lu 16:2-4 only other N.T. examples.

In faith ( $\varepsilon v \pi / \sigma \tau \varepsilon$ ). Pauline use of $\pi \iota \sigma \tau \iota c$.
1Tim 1:5
The end ( $\tau 0 \tau \varepsilon \lambda \circ \varsigma)$. See Ro 6:21; 10:4 for $\tau \varepsilon \lambda o \varsigma$ (the good aimed at, reached, result, end).

Love ( $\alpha \gamma \alpha \pi \eta$ ). Not "questionings." Ro 13:9. "Three conditions for the growth of love"
 ( $\kappa \alpha \sigma \cup v \varepsilon \delta \eta \sigma \varepsilon \omega \varsigma ~ \alpha \gamma \alpha \theta \eta \varsigma$, for which see Ro 2:25), "and faith unfeigned" ( $\kappa \alpha \pi \iota \sigma \tau \varepsilon \omega \varsigma$ avитокрıтоv, late compound verbal in 2Co 6:6; Ro 12:9 ).

1Tim 1:6
Having swerved ( $\alpha \sigma \tau 0 \chi \eta \sigma \alpha \nu \tau \varepsilon \varsigma)$. First aorist active participle of $\alpha \sigma \tau \circ \chi \varepsilon \omega$, compound Koine verb (Polybius, Plutarch) from aбтохоৎ ( $\alpha$ privative and $\sigma \tau о \chi \circ \varsigma$, a mark), "having missed the mark." In N.T. only here, 6:21; 2Ti 2:18 . With the ablative case $\omega v$ (which).

Have turned aside ( $\varepsilon \xi \varepsilon \tau \rho \alpha \pi \eta \sigma \alpha \nu$ ). Second aorist passive indicative of $\varepsilon \kappa \tau \rho \varepsilon \pi \pi \omega$, old and common verb, to turn or twist out or aside. In medical sense in Heb 12:13. As metaphor in 1Ti 1:6; 6:20; $2 \mathrm{Ti} 4: 4$.

Vain talking ( $\mu \alpha \tau \alpha ı \lambda о \gamma ı \alpha v$ ). Late word from $\mu \alpha \tau \alpha \iota=\lambda о \gamma o \varsigma$, only here in N.T., in the literary Koine.

1Tim 1:7
Teachers of the law (vouoסı $\delta \alpha \sigma \kappa \alpha \lambda o$ ). Compound only in N.T. (here, Lu 5:17; Ac 5:34 ) and ecclesiastical writers.

Though they understand (voouvtec). Concessive participle of voe $\omega$, old verb (Eph 3:4,20).

Neither what ( $\mu \eta \tau \varepsilon \alpha$ ). Relative $\alpha$ (which things).

Nor whereof ( $\mu \eta \tau \varepsilon \pi \varepsilon \rho \tau \imath v \omega v$ ). Here the interrogative $\tau \imath v \omega v$ used in sense of relative $\omega v$. It may be regarded as the use of an indirect question for variety (Parry).

They confidently affirm ( $\delta 1 \alpha \beta \varepsilon \beta \alpha \iota o u v \tau \alpha$ ). Present middle indicative of the common Koine compound, in N.T. only here and Tit 3:8 .

1 Tim 1:8
If a man use it lawfully ( $\varepsilon \alpha \nu \tau \iota \varsigma \alpha \cup \tau \omega \chi \rho \eta \tau \alpha$ ). Condition of third class with $\varepsilon \alpha v$ and present middle subjunctive of $\chi \rho \alpha o \mu \alpha$ with instrumental case.

1Tim 1:9
Is not made for (ov кعıт ). The use of $\kappa \varepsilon \iota \tau \alpha$ for $\tau \varepsilon \theta \varepsilon ı \tau \alpha$ (perfect passive of $\tau ı \theta \eta \mu$ ) is a common enough idiom. See the same point about law in Ga 18-23; Ro 13:13. For "knowing this" ( $\varepsilon \delta \omega \varsigma$ тоvтo) see Eph 5:5 .

Unruly (avטлотактоњ). Dative (like all these words) of the late verbal (a privative and vлотаббш). In N.T. only here, Tit 1:6,10; Heb 2:8 .

Ungodly ( $\alpha \sigma \varepsilon \beta \varepsilon \sigma$ ). See Ro 4:5; 5:6.
Sinners ( $\alpha \mu \alpha \rho \tau \omega \lambda$ oıs). See Ro 3:7.
Unholy (avootors). Common word ( $\alpha$ privative and oбtoc. In N.T. only here and 2 Ti 3:2.

Profane ( $\beta \varepsilon \beta \eta \lambda o \iota \varphi)$. Old word from $\beta a \iota v \omega$, to go, and $\beta \eta \lambda$ o $\varsigma$, threshold. See Heb 12:16

Murderers of fathers ( $\pi \alpha \tau \rho о \lambda \omega \iota \alpha \iota \varsigma)$. Late form for common Attic $\pi \alpha \tau \rho \alpha \lambda \omega \iota \alpha \iota \varsigma$ (from $\pi \alpha \tau \eta \rho$, father, and $\alpha \lambda o \iota \alpha \omega$, to smite) only here in N.T.

Murderers of mothers ( $\mu \eta \tau \rho 0 \lambda \omega \iota \alpha \iota \varsigma)$. Late form Attic $\mu \eta \tau \rho \alpha \lambda \omega$ iaıc. Only here in N.T.
Manslayers ( $\alpha v \delta \rho \alpha \varphi 0 \vee o \iota \varsigma)$. Old compound ( $\alpha \vee \eta \rho$, man, $\varphi 0 \vee \circ \varsigma$, murder). Only here in N.T.

1Tim 1:10
For abusers of themselves with men ( $\alpha \rho \sigma \varepsilon$ voкоı $\tau \iota \varsigma$ ). Late compound for sodomites. In N.T. only here and 1Co 6:9.

Men-stealers ( $\alpha v \delta \rho \alpha \pi$ о $\delta \iota \sigma \tau \alpha ı \varsigma)$. Old word from $\alpha v \delta \rho \alpha \pi o \delta \iota \zeta \omega$ (from $\alpha v \eta \rho$, man, $\pi o v \varsigma$, foot, to catch by the foot), to enslave. So enslavers, whether kidnappers (men-stealers) of free men or stealers of the slaves of other men. So slave-dealers. By the use of this word Paul deals a blow at the slave-trade (cf. Philemon).

Liars ( $\psi$ vuđ̃aıৎ). Old word, see Ro 3:4.
False swearers ( $\varepsilon \pi ь о р к о \iota \varsigma) . ~ O l d ~ w o r d ~(\varepsilon \pi ı, ~ о \rho к о \varsigma, ~ o a t h) . ~ P e r j u r e r s . ~ O n l y ~ h e r e ~ i n ~ N . T . ~$ For similar lists, see 1Co 5:11; 6:9f.; Ga 5:19f.; Ro 1:28f.; 13:13; Col 3:5; Eph 5:5; 2Ti 3:2f .

The sound doctrine ( $\tau \eta$ v $\gamma\llcorner a \iota v o v \sigma \eta ~ \delta \iota \delta \alpha \sigma \kappa \alpha \lambda \iota \alpha$ ). Dative case after $\alpha \vee \tau \iota \kappa \varepsilon \iota \tau \alpha$, for which verb see Ga 5:17 for the conflict between the Spirit and the flesh. "The healthful (vүıaıv , old word for being well, as Lu 5:31; 3Jo 1:2, in figurative sense in N.T. only in the Pastorals) teaching." See Tit 1:9; 2Ti 4:3.

1Tim 1:11
Of the blessed God ( $\tau o v \mu \alpha \kappa \alpha \rho ı o v ~ \theta \varepsilon o v)$ ). Applied to God only here and 6:15, but in Tit 2:13 $\mu \alpha \kappa \alpha \rho ı \varsigma \varsigma$ occurs with $\varepsilon \lambda \pi ı \varsigma$ (hope) of the "epiphany of our great God and Saviour Jesus Christ."

Which was committed to my trust (o $\varepsilon \pi \iota \sigma \tau \varepsilon v \theta \eta \nu \varepsilon \gamma \omega$ ). "with which (o accusative retained with first aorist passive verb $\varepsilon \pi \iota \sigma \tau \varepsilon \cup \theta \eta \nu)$ I was entrusted."

1Tim 1:12
I thank ( $\chi \alpha \rho \iota v \varepsilon \chi \omega)$. "I have gratitude to." Common phrase (Lu 17:9), not elsewhere in Paul.

That enabled me ( $\tau \omega \varepsilon v \delta \nu v \alpha \mu \omega \sigma \alpha \nu \tau \mu \varepsilon$ ). First aorist active articular participle of $\varepsilon v \delta u v a \mu o \omega$. Late verb, but regular Pauline idiom (Ro 4:20; Php 4:13; Eph 6:10; $1 \mathrm{Ti} 1: 12 ; 2 \mathrm{Ti}$ 4:17).

Appointing me to his service ( $\theta \varepsilon \mu \varepsilon v o \varsigma \varepsilon ı \varsigma \delta \iota \alpha \kappa o v ı \alpha v)$. Second aorist middle participle. Pauline phrase and atmosphere (Ac 20:24; 1Co 3:5; 12:18,28; 2Co 3:6; 4:1; Col 1:23; Eph. 3:7; 1 Ti 4:6; 2Ti 4:5,11 ).

1Tim 1:13
Before ( $\tau$ o $\pi \rho \circ \tau \varepsilon \rho \circ v$ ). Accusative of general reference of the articular comparative, "as to the former-time," formerly, as in Ga 4:13.

Though I was (ovia). Concessive participle agreeing with $\mu \varepsilon$.
Blasphemer ( $\beta \lambda \alpha \sigma \varphi \eta \mu \circ v$ ). Old word either from $\beta \lambda \alpha \xi$ (stupid) and $\varphi \eta \mu \eta$, speech, or from $\beta \lambda \alpha \pi \tau \omega$, to injure. Rare in N.T. but Paul uses $\beta \lambda \alpha \sigma \varphi \eta \mu \varepsilon \omega$, to blaspheme in Ro 2:24 .

Persecutor ( $\delta \omega \kappa \tau \eta \varsigma$ ). So far found only here. Probably made by Paul from $\delta \iota \omega \kappa \omega$, which he knew well enough (Ac 22:4,7; 26:14f.; Ga 1:13,23; Php 3:6; 2Ti 3:12 ).

Injurious (vßрıб $\eta v$ ). Substantive, not adjective, "an insolent man." Old word from $\nu \beta \rho \iota \zeta \omega$, in N.T. only here and Ro 1:30.

I obtained mercy $(\varepsilon \lambda \varepsilon \eta \theta \eta \nu)$. First aorist passive indicative of $\varepsilon \lambda \varepsilon \varepsilon \omega$, old verb. See 2Co 4:1; Ro 11:30f.

Ignorantly ( $\alpha \gamma v 0 \omega v$ ). Present active participle of $\alpha \gamma v o \varepsilon \omega$, "not knowing." Old verb (Ro 2:4). In a blindness of heart.

In unbelief ( $\varepsilon v \alpha \pi \iota \tau \tau \alpha$ ). See Ro 11:20,25 .
1Tim 1:14
Abounded exceedingly (v $\pi \varepsilon \rho \varepsilon \pi \lambda \varepsilon \sigma v a \sigma \varepsilon v$ ). Aorist active indicative of the late and rare (So 5:19 and in Herond.) compound $v \pi \varepsilon \rho \pi \lambda \varepsilon o v a \zeta \omega$ (here alone in N.T.), in later ecclesiastical writers. The simplex $\pi \lambda \varepsilon \sigma v a \zeta \omega$ Paul used in Ro 5:20; 6:1 and the kindred $v \pi \varepsilon \rho \varepsilon \pi \varepsilon \rho เ \sigma \sigma \varepsilon v \sigma \varepsilon v$ used also with $\eta \chi \alpha \rho \varsigma \varsigma$. Paul is fond of compounds with $v \pi \varepsilon \rho$. For "faith in Christ Jesus" see Ga 3:26, for "faith and love in Christ Jesus" as here, see 2Ti 1:13.

1Tim 1:15

Faithful is the saying ( $\pi$ Ібтоц о $\lambda$ оүос). Five times in the Pastorals ( $1 \mathrm{Ti} 1: 15 ; 3: 1 ; 4: 9$;
 (trustworthy) applied to $\lambda$ opos in Tit 1:9; Re 21:5; 22:6 . Here and probably in 2Ti 2:11 a definite saying seems to be referred to, possibly a quotation (o $\tau$ ) of a current saying quite like the Johannine type of teaching. This very phrase (Christ coming into the world) occurs in Joh 9:37; 11:27; 16:28; 18:37. Paul, of course, had no access to the Johannine writings, but such "sayings" were current among the disciples. There is no formal quotation, but "the whole phrase implies a knowledge of Synoptic and Johannine language" (Lock) as in Lu 5:32; Joh 12:47.

Acceptation ( $\alpha \pi 0 \delta \circ \chi \eta \varsigma)$. Genitive case with $\alpha \xi$ เoc (worthy of). Late word (Polybius, Diod., Jos.) in N.T. only here and 4:9.

Chief ( $\pi \rho \omega \tau \sigma \varsigma)$. Not $\eta \nu$ (I was), but $\varepsilon \varepsilon \mu$ (I am). "It is not easy to think of any one but St. Paul as penning these words" (White). In 1Co 15:9 he had called himself "the least of the apostles" ( $\varepsilon \lambda \alpha \chi$ ıбтos $\tau \omega v \alpha \pi о \sigma \tau 0 \lambda \omega v$ ). In Eph 3:8 he refers to himself as "the less than the least of all saints" ( $\tau \omega \varepsilon \lambda \alpha \chi\llcorner\tau \tau \tau \varepsilon \rho \omega \pi \alpha \nu \tau \omega v \alpha \gamma \omega \nu)$ ). On occasion Paul would defend himself as on a par with the twelve apostles ( $\mathrm{Ga} 2: 6-10$ ) and superior to the Judaizers ( $2 \mathrm{Co} 11: 5 \mathrm{f}$.; 12:11). It is not mock humility here, but sincere appreciation of the sins of his life (cf. Ro 7:24) as a persecutor of the church of God (Ga 1:13), of men and even women (Ac 22:4f.; 26:11 ). He had sad memories of those days.

1Tim 1:16
In me as chief $(\varepsilon v \varepsilon \mu \circ \pi \rho \omega \tau \omega)$. Probably starts with the same sense of $\pi \rho \omega \tau o c$ as in verse 15 (rank), but turns to order (first in line). Paul becomes the "specimen" sinner as an encouragement to all who come after him.

Might shew forth ( $\varepsilon v \delta \varepsilon ı \xi \eta \tau \alpha$ ). First aorist middle subjunctive (purpose with $t v \alpha$ ) of $\varepsilon v \delta \varepsilon ı \kappa v \nu \mu$, to point out, for which see Eph 2:7 (same form with $\imath v \alpha$ ).

Longsuffering ( $\mu \alpha \kappa \rho о \theta v \mu \iota \alpha v$ ). Common Pauline word (2Co 6:6).
For an ensample ( $\pi \rho \circ \varsigma$ v $\pi о \tau v \pi \omega \sigma \tau v$ ). Late and rare word (in Galen, Sext. Emp., Diog. Laert., here only in N.T.) from late verb vтотvто (in papyri) to outline. So substantive here is a sketch, rough outline. Paul is a sample of the kind of sinners that Jesus came to save. See $v \pi$ о $\delta \varepsilon \iota \gamma \mu \alpha$ in 2Pe 2:6 .

1Tim 1:17
This noble doxology is a burst of gratitude for God's grace to Paul. For other doxologies see Ga 1:5; Ro 11:36; 16:27; Php 4:20; Eph 3:21; 1Ti 6:16. White suggests that Paul may have often used this doxology in his prayers. Lock suggests "a Jewish liturgical formula" (a needless suggestion in view of Paul's wealth of doxologies seen above). For God's creative activity (King of the ages) see 1Co 10:11; Eph 2:7; 3:9,11 .

Incorruptible ( $\alpha \varphi \theta \alpha \rho \tau \omega$ ). As an epithet of God also in Ro 1:23.
Invisible ( $\alpha \circ \rho \alpha \tau \omega$ ). Epithet of God in Col 1:15.

The only God ( $\mu \mathrm{ov} \omega \theta \varepsilon \omega$ ). So Ro 16:27; Joh 5:44; 17:3.
For ever and ever ( $\varepsilon \iota \varsigma \tau 0 v \varsigma \alpha \iota \omega v a \varsigma \tau \omega \nu \alpha \iota \omega \nu \omega v$ ). "Unto the ages of ages." Cf. Eph 3:21 "of the age of the ages."

1Tim 1:18
I commit $(\pi \alpha \rho \alpha \tau ו \theta \varepsilon \mu \alpha)$. Present middle indicative of old and common verb, to place beside ( $\pi \alpha \rho \alpha$ ) as food on table, in the middle to entrust ( $\mathrm{Lu} 12: 48$ ) and used by Jesus as he was dying ( Lu 23:46). Here it is a banking figure and repeated in 2 Ti 2:2 .

According to the prophecies which went before on thee ( $\kappa \alpha \tau \alpha \tau \alpha \varsigma \pi \rho о \alpha \gamma о v \sigma \alpha \varsigma \varepsilon \pi \sigma \varepsilon$ $\pi \rho о \varphi \eta \tau \varepsilon(\alpha \varsigma)$. Intransitive use of $\pi \rho \circ \alpha \gamma \omega$, to go before. When Timothy first comes before us (Ac 16:2) "he was testified to" ( $\varepsilon \mu \alpha \rho \tau v \rho \varepsilon \iota \tau o)$ by the brethren. He began his ministry rich in hopes, prayers, predictions.

That by them thou mayest war the good warfare (ı $v \alpha \sigma \tau \rho \alpha \tau v \eta \varepsilon v \alpha v \tau \alpha ı \varsigma \tau \nu \kappa \alpha \lambda \eta v$ $\sigma \tau \rho \alpha \tau \varepsilon \iota \alpha v$ ). Cognate accusative ( $\sigma \tau \rho \alpha \tau \varepsilon \iota \alpha v$, old word from $\sigma \tau \rho \alpha \tau \varepsilon v \omega$, in N.T. only here and 2Co 4:4) with $\sigma \tau \rho \alpha \tau \varepsilon \cup \eta$ (second person singular middle present subjunctive of $\sigma \tau \rho \alpha \tau \varepsilon v \omega$, old verb chiefly in Paul in N.T., 1Co 9:7; 2Co 10:3 ). As if in defensive armour.

1Tim 1:19
Holding faith and a good conscience ( $\varepsilon \chi \omega v \pi \iota \sigma \tau \iota \nu \kappa \alpha \alpha \gamma \alpha \theta \eta \nu \sigma v v \varepsilon \iota \delta \eta \sigma \iota v)$. Possibly as a shield (Eph 6:16) or at any rate possessing (Ro 2:20) faith as trust and a good conscience. A leader expects them of his followers and must show them himself.

Having thrust from them ( $\alpha \pi \omega \sigma \alpha \mu \varepsilon v o$ ). First aorist indirect middle participle of $\alpha \pi \omega \theta \varepsilon \omega$, to push away from one. Old verb (see Ro 11:1f. ).

Made shipwreck ( $\varepsilon v \alpha v \alpha \gamma \eta \sigma \alpha v$ ). First aorist active indicative of $v \alpha v \alpha \gamma \varepsilon \omega$, old verb from vavapos (shipwrecked, vavৎ, ship, $\alpha \gamma v v \mu$, to break), to break a ship to pieces. In N.T. only here and 2Co 11:25.

Concerning the faith ( $\pi \varepsilon \rho \tau \eta \nu \pi \iota \sigma \tau \iota \nu$ ). Rather, "concerning their faith" (the article here used as a possessive pronoun, a common Greek idiom).

1Tim 1:20
Hymenaeus (Hv are the chief "wreckers" of faith in Ephesus.

Alexander ( $\mathrm{A} \lambda \varepsilon \xi \alpha \nu \delta \rho o \varsigma)$. Probably the same as the one in $2 \mathrm{Ti} 4: 14$, but not the Jew of that name in Ac 19:33, unless he had become a Christian since then.

I delivered unto Satan ( $\pi \alpha \rho \varepsilon \delta \omega \kappa \alpha \tau \omega \Sigma \alpha \tau \alpha \nu \alpha$ ). See this very idiom ( $\pi \alpha \rho \alpha \delta o u v \alpha \tau \omega$ $\Sigma a \tau \alpha v \alpha$ ) in 1Co 5:5. It is a severe discipline of apostolic authority, apparently exclusion and more than mere abandonment (1Th $2: 18$; 1Co $5: 11$; 2Co $2: 11$ ), though it is an obscure matter.

That they might be taught not to blaspheme ( $\imath \alpha \pi \alpha \iota \delta \varepsilon v \theta \omega \sigma \iota \nu \mu \eta \lambda \alpha \sigma \varphi \eta \mu \varepsilon \imath v$ ). Purpose clause with $t v \alpha$ and first aorist passive subjunctive of $\pi \alpha \iota \delta \varepsilon v \omega$. For this use of this common late verb, see 1Co 11:32; 2Co 6:9.

## 1 Timothy 2

1Tim 2:1
First of all $(\pi \rho \omega \tau o v \pi \alpha \nu \tau \omega \nu)$. Take with $\pi \alpha \rho \alpha \kappa \alpha \lambda \omega$. My first request (first in importance).

Intercessions ( $\varepsilon v \tau \varepsilon v \xi \varepsilon ı \varsigma)$. Late word (Polybius, Plutarch, etc.), only here in N.T. and 4:5, though the verb $\varepsilon v \tau v \gamma \chi \propto \nu \omega$ in Ro $8: 27,34 ; 11: 2,25$. The other three words for prayer are common (Php 4:6).

For all men ( $v \pi \varepsilon \rho \pi \alpha v \tau \omega v \alpha v \theta \rho \omega \pi \omega v$ ). The scope of prayer is universal including all kinds of sinners (and saints).

1Tim 2:2
For kings (v $\pi \varepsilon \rho \beta a \sigma \lambda \lambda \varepsilon \omega v$ ). And this included Nero who had already set fire to Rome and laid it on the Christians whom he was also persecuting.

And all them that are in high place ( $\kappa \alpha \pi \alpha \nu \tau \omega \nu \tau \omega \nu \varepsilon \nu v \pi \varepsilon \rho \circ \chi \eta \quad \nu \tau \omega \nu$ ). Hv $\pi \varepsilon \rho \circ \chi \eta$ is old word (from $v \pi \varepsilon \rho \circ \chi \circ \varsigma$ and this from $v \pi \varepsilon \rho$ and $\varepsilon \chi \omega$ ), but in N.T. only here and 1Co 2:1.

That we may lead ( $七 \nu \alpha \delta \iota \alpha \gamma \omega \mu \varepsilon v$ ). Purpose clause with present active subjunctive of $\delta \iota a \gamma \omega$, an old and common verb, but in N.T. only here and Tit 3:3.

Tranquil ( $\eta \rho \varepsilon \mu \circ v$ ). Late adjective from the old adverb $\eta \rho \varepsilon \mu \alpha$ (stilly, quietly). Here only in N.T.

Quiet ( $\eta \sigma v \chi \iota \circ$ ). Old adjective, once in LXX (Isa 66:2 ), in N.T. only here and 1Pe 3:4

Life ( $\beta$ ıov). Old word for course of life (not $\zeta \omega \eta$ ). So Lu 8:14.
Gravity ( $\sigma \varepsilon \mu \nu o \tau \eta \tau$ ). Old word from $\sigma \varepsilon \mu \nu \circ \varsigma(\operatorname{Php} 4: 8$ ), in N.T. only here, 3:4; Tit 2:7. 1Tim 2:3
Acceptable ( $\alpha \pi o \delta \varepsilon \kappa \tau o v$ ). Late verbal adjective from $\alpha \pi o \delta \varepsilon \chi \circ \mu \alpha$. In inscriptions and papyri. In N.T. only here and 5:4.

1Tim 2:4
Willeth $(\theta \varepsilon \lambda \varepsilon)$. God's wish and will in so far as he can influence men.
That all men should be saved ( $\pi \alpha \nu \tau \alpha \varsigma \alpha \nu \theta \rho \omega \pi \sigma \cup \varsigma \sigma \omega \theta \eta \nu \alpha$ ). First aorist passive infinitive of $\sigma \omega \zeta \omega$ with accusative of general reference. See 1Co 10:33; 2Co 5:18f.

To the knowledge ( $\varepsilon \iota \varsigma \varepsilon \pi \iota \gamma \nu \omega \sigma \iota v$ ). "The full knowledge" as in Col 1:6; Eph 4:13 (ten times in Paul). See 2Ti 3:7 for the whole phrase "full knowledge of the truth" ( $\alpha \lambda \eta \theta \varepsilon \_\alpha 14$ times in the Pastorals). Paul is anxious as in Colossians and Ephesians that the Gnostics may not lead the people astray. They need the full intellectual apprehension of Christianity.

1Tim 2:5
One God ( $\varepsilon \iota \varsigma$ Ө $\boldsymbol{\varepsilon} \boldsymbol{\circ}$ ). Regular Pauline argument for a universal gospel (Ga 3:20; Ro 3:30; Eph 4:6 ).

One mediator ( $\varepsilon \varsigma \varsigma \mu \sigma \iota \tau \eta \varsigma)$. Late word (Polybius, Philo) from $\mu \varepsilon \sigma \circ \varsigma$ (middle), a middle man. In N.T. only here, Ga 3:20; Heb 8:6; 9:15; 12:24 .

Between God and men ( $\theta \varepsilon o v \kappa \alpha \alpha v \theta \rho \omega \pi \omega v$ ). Ablative case (though objective genitive may explain it) after $\mu \varepsilon \sigma \iota \tau \eta \varsigma$ (notion of separation) as in Ro 10:12; Heb 5:14.

Himself man ( $\alpha v \theta \rho \omega \pi \sigma \varsigma)$. No "himself" ( $\alpha \cup \tau \circ \varsigma)$ in the Greek.
1Tim 2:6
A ransom for all ( $\alpha v \tau i \lambda \nu \tau \rho \circ v v \pi \varepsilon \rho \pi \alpha v \tau \omega v$ ). "A reminiscence of the Lord's own saying" (Lock) in Mt 20:28 (Mr 10:45) where we have $\lambda \cup \tau \rho o v ~ a v \tau ~ \pi o \lambda \lambda \omega v$. In the papyri $v \pi \varepsilon \rho$ is the ordinary preposition for the notion of substitution where benefit is involved as in this passage. Av has more the idea of exchange and $\alpha v \tau \iota \lambda \nu \tau \rho o v \nu \pi \varepsilon \rho$ combines both ideas. $\Lambda \nu \tau \rho o v$ is the common word for ransom for a slave or a prisoner. Paul may have coined avti入vtpov with the saying of Christ in mind (only one MS. of Ps 48:9 and Orph. Litt. 588). See Ga 1:4 "who gave himself for our sins."

The testimony ( $\tau$ о $\mu \alpha \rho \tau \cup \rho \iota o v$ ). Either the nominative absolute or the accusative absolute in apposition to the preceding clause like to a $\delta u v a \tau o v ~ i n ~ R o ~ 8: 3 . ~ . ~$

In its own times (кaıроıя ııoı¢). Locative case as in 6:15; Tit 1:3. See Ga 6:9 for "due season." There is no predicate or participle here, "the testimony in its due seasons" (plural). 1Tim 2:7
For which ( $\varepsilon ા \varsigma$ o). The testimony of Jesus in his self-surrender (verse 6). See $\varepsilon \iota \varsigma$ o in 2Ti 1:11.

I was appointed $(\varepsilon \tau \varepsilon \theta \eta \nu \varepsilon \gamma \omega)$. First aorist passive indicative of $\tau \uparrow \theta \eta \mu$.
Preacher and apostle ( $\kappa \eta \rho v \xi \kappa \alpha \alpha \pi о \sigma \tau о \lambda о \varsigma)$. In 2Ti 1:10 Paul adds $\delta \iota \delta \alpha \sigma \kappa \alpha \lambda о \varsigma($ herald, apostle, teacher) as he does here with emphasis. In Col 1:23f. he has $\delta$ ıaкоvoc (minister). He frequently uses $\kappa \eta \rho v \sigma \sigma \omega$ of himself (1Co 1:23; 9:27; Ga 2:2; Ro 10:8f. ).

I speak the truth, I lie not ( $\alpha \lambda \eta \theta \varepsilon \iota \alpha \nu \lambda \varepsilon \gamma \omega$, ov $\psi \varepsilon \cup \delta o \mu \alpha$ ). A Pauline touch (Ro 9:1). Cf. Ga 1:20; 2Co 11:31. Here alone he calls himself "a teacher of the Gentiles," elsewhere apostle (Ro 11:13 ), minister (Ro 15:16), prisoner (Eph 3:1).

1Tim 2:8
I desire ( $\beta$ ou $\lambda$ ou $\alpha$ ). So Php 1:12 .
The men ( $\tau 0 \cup \varsigma ~ \alpha v \delta \rho \alpha \varsigma)$. Accusative of general reference with the infinitive $\pi \rho о \sigma \varepsilon v \chi \varepsilon \sigma \theta \alpha$. The men in contrast to "women" ( $\gamma$ vvaikaৎ) in 9. It is public worship, of course, and "in every place" ( $\varepsilon v \pi \alpha v \tau \tau \pi \pi \omega$ ) for public worship. Many modern Christians feel that there were special conditions in Ephesus as in Corinth which called for strict regulations on the women that do not always apply now.

Lifting up holy hands (eтaıpovtac oбıovৎ $\chi \varepsilon \iota \rho a \varsigma)$ ). Standing to pray. Note also oбıous used as feminine (so in Plato) with $\chi \varepsilon ⿺ \rho a \varsigma$ instead of ofiac. The point here is that only men should lead in public prayer who can lift up "clean hands" (morally and spiritually clean). See Lu 24:50 . Adverb oot $\omega$ c in 1Th 2:10 and oбıoтףऽ in Eph 4:24.

Without wrath and disputing ( $\chi \omega \rho \iota \varsigma ~ о \rho \gamma \eta \varsigma \kappa \alpha \delta \iota \lambda о \gamma \iota \sigma \mu о$ ). See Php 2:14.
1Tim 2:9
In like manner that women (oб $\alpha v \tau \omega \varsigma \gamma v v a ı \kappa \alpha \varsigma)$. Bov $\lambda_{0} \mu \alpha$ must be repeated from verse 8, involved in ooav $\omega \omega$ (old adverb, as in Ro 8:26 ). Parry insists that $\pi \rho o \sigma \varepsilon v \chi \circ \mu \varepsilon v a \varsigma$ (when they pray) must be supplied also. Grammatically that is possible (Lock), but it is hardly consonant with verses 11-15 (White).

Adorn themselves (коб $\mu \varepsilon \imath v \varepsilon \alpha v \tau \alpha \varsigma) . ~ P r e s e n t ~ a c t i v e ~ i n f i n i t i v e ~ a f t e r ~ \beta o v ~ \lambda o \mu \alpha ~ u n d e r s t o o d . ~$ Old word from коб $\boldsymbol{\sigma}$ ( arrangement, ornament, order, world). See Lu 21:5; Tit 2:10 . See 1Co 11:5ff. for Paul's discussion of women's dress in public worship.

In modest apparel ( $\varepsilon v \kappa \alpha \tau \alpha \sigma \tau о \lambda \eta \kappa о \sigma \mu t \omega$ ). Kaтaбто入 $\eta$ is a late word (a letting down, $\kappa \alpha \tau \alpha \sigma \tau \varepsilon \lambda \lambda \omega$, of demeanour or dress, arrangement of dress). Only here in N.T. Koб $\mu \iota \rho$, is old adjective from коб $\mu$ о , and means well-arranged, becoming. W. H. have adverb in margin ( $\kappa о \sigma \mu \iota \varsigma)$.

With shamefastness ( $\mu \varepsilon \tau \alpha \alpha \iota \delta o v \varsigma)$. Old word for shame, reverence, in N.T. only here and Heb 12:28 .

Sobriety ( $\sigma \omega \varphi \rho \circ \sigma v \nu \eta \varsigma)$. Old word, in N.T. only here, verse 15, and Ac 26:15 (Paul also).

Not with braided hair ( $\mu \eta \varepsilon \nu \pi \lambda \varepsilon \gamma \mu \alpha \sigma \iota v$ ). Old word from $\pi \lambda \varepsilon \kappa \omega$, to plait, to braid, for nets, baskets, here only in N.T. Cf. 1Pe 3:1 ( $\varepsilon \mu \pi \lambda$ окпऽ).

And gold $(\varepsilon v \chi \rho v \sigma \omega \omega)$. Locative case with $\varepsilon v$ repeated. Some MSS. read $\chi \rho v \sigma \omega$. Both used for gold ornaments.

Or pearls ( $\eta \mu \alpha \rho \gamma \alpha \rho ı \tau \alpha \iota \varsigma)$. See Mt 7:6 for this word.
Or costly raiment ( $\eta \iota \mu \tau \iota \sigma \mu \omega \pi \sigma \lambda v \tau \varepsilon \lambda \varepsilon$ ). Hı $\mu \alpha \tau \iota \sigma \mu \circ \varsigma$ a common Koine word from $\varkappa \alpha \tau \iota \zeta \omega$, to clothe. По $\lambda v \tau \varepsilon \lambda \eta \varsigma$, old word from $\pi 0 \lambda v \varsigma$ and $\tau \varepsilon \lambda \frac{}{}$ (great price). See Mr 14:3.

1Tim 2:10
Becometh ( $\pi \rho \varepsilon \pi \varepsilon$ ). Old word for seemly. Paul wishes women to wear "becoming" clothes, but $\theta \varepsilon o \sigma \varepsilon \beta \varepsilon \iota \alpha \nu$ (godliness, from $\theta \varepsilon o \sigma \varepsilon \beta \eta \varsigma$, Joh 9:31, $\theta \varepsilon o \sigma, \sigma \varepsilon \beta o \mu \alpha$, worship) is part of the "style" desired. Only here in N.T. Good dress and good works combined.

1Tim 2:11
In quietness $(\varepsilon v \eta \sigma v \chi \iota \alpha)$. Old word from $\eta \sigma v \chi \iota \varsigma$. In N.T. only here, Ac 22:2; 2Th 3:12

In all subjection ( $\varepsilon v \pi \alpha \sigma \eta v \pi o \tau \alpha \gamma \eta$ ). Late word (Dion. Hal., papyri), in N.T. only here, 2Co 9:13; Ga 2:5. See 1Co 14:33-35 .

1Tim 2:12
I permit not (ovk $\varepsilon \pi \iota \tau \rho \varepsilon \pi \omega$ ). Old word $\varepsilon \pi \iota \tau \rho \varepsilon \pi \omega$, to permit, to allow (1Co 16:7). Paul speaks authoritatively.

To teach ( $\left.\delta_{\iota} \delta \alpha \sigma \kappa \varepsilon เ v\right)$. In the public meeting clearly. And yet all modern Christians allow women to teach Sunday school classes. One feels somehow that something is not expressed here to make it all clear.

Nor to have dominion over a man (ovס $\alpha \cup \theta \varepsilon v \tau \varepsilon เ v ~ a v \delta \rho o \varsigma) . ~ T h e ~ w o r d ~ \alpha u \theta \varepsilon v \tau \varepsilon \omega$ is now cleared up by Kretschmer (Glotta, 1912, pp. 289ff.) and by Moulton and Milligan's Vocabulary. See also Nageli, Der Wortschatz des Apostels Paulus and Deissmann, Light, etc., pp. 88 f. Avto $\delta \kappa \varepsilon \omega$ was the literary word for playing the master while $\alpha \cup \theta \varepsilon v \tau \varepsilon \omega$ was the vernacular term. It comes from $\alpha v \tau-\varepsilon v \tau \varepsilon \varsigma$, a self-doer, a master, autocrat. It occurs in the papyri (substantive $\alpha \cup \theta \varepsilon v \tau \eta \varsigma$, master, verb $\alpha v \theta \varepsilon v \tau \varepsilon \omega$, to domineer, adjective $\alpha v \theta \varepsilon v \tau \iota \kappa o \varsigma$, authoritative, "authentic"). Modern Greek has $\alpha \varphi \varepsilon \nu \tau \varepsilon \varsigma=$ Effendi $=$ "Mr."

1Tim 2:13
Was first formed ( $\pi \rho \omega \tau \circ \varsigma \varepsilon \pi \lambda \alpha \sigma \theta \eta$ ). Note $\pi \rho \omega \tau$, ${ }^{\circ}$, not $\pi \rho \omega \tau o v$, first before Eve. First aorist passive indicative of $\pi \lambda a \sigma \sigma \omega$, old verb, in N.T. only here and Ro 9:20 (cf. Ge 2:7f. ).

1Tim 2:14
Being beguiled ( $\varepsilon \xi \alpha \pi \alpha \tau \eta \theta \varepsilon \iota \sigma \alpha$ ). First aorist passive participle of $\varepsilon \xi \alpha \pi \alpha \tau \varepsilon \omega$, old compound verb, in N.T. only by Paul (2Th 2:3; 1Co 3:18; 2Co 11:3; Ro 7:11; 16:18; 1Ti 2:14 ). Not certain that $\varepsilon \xi$ - here means "completely deceived" in contrast to simplex (ovк $\eta \pi \alpha \tau \eta \theta \eta$ ) used of Adam, though possible.

Hath fallen ( $\gamma \varepsilon \gamma \circ v \varepsilon v$ ). Second perfect indicative active, permanent state. See 1Co 11:7

1Tim 2:15
Through the child-bearing ( $\delta \iota \alpha \tau \eta \varsigma \tau \varepsilon \kappa v o \gamma o v i \alpha \varsigma)$. Late and rare word (in Aristotle). Here alone in N.T. From тєкvoүovoৎ and this from $\tau \varepsilon \kappa v o v$ and root $\gamma \varepsilon v \omega$. This translation makes it refer to the birth of the Saviour as glorifying womanhood. That is true, but it is not clear that Paul does not have mostly in mind that child-bearing, not public teaching, is the peculiar function of woman with a glory and dignity all its own. "She will be saved" ( $\sigma \omega \theta \eta \sigma \varepsilon \tau \alpha$ ) in this function, not by means of it.

If they continue ( $\varepsilon \alpha v \mu \varepsilon เ v \omega \sigma เ v$ ). Condition of third class, $\varepsilon \alpha v$ with first aorist active subjunctive of $\mu \varepsilon v \omega$, to continue. Note change to plural from the singular ( $\sigma \omega \theta \eta \sigma \varepsilon \tau \alpha$ ).

## 1 Timothy 3

1Tim 3:1
Faithful is the saying ( $\pi \iota \sigma \tau \circ \varsigma$ o $\lambda о \gamma \circ \varsigma)$. Here the phrase points to the preceding words (not like 1:15) and should close the preceding paragraph.

If a man seeketh ( $\varepsilon \tau \downarrow \varsigma$ op $\gamma \varepsilon \tau \alpha)$. Condition of first class, assumed as true. Present middle indicative of o $\rho \varepsilon \gamma \omega$, old verb to reach out after something, governing the genitive. In N.T. only here, 6:10; Heb 11:16.

The office of a bishop ( $\varepsilon \pi \iota \sigma \kappa о \pi \eta \varsigma)$. Genitive case after op $\gamma \varepsilon \tau \alpha$. Late and rare word outside of LXX and N.T. (in a Lycaonian inscription). From $\varepsilon \pi \iota \sigma \kappa о \pi \varepsilon \omega$ and means "overseership" as in Ac 1:20.

1Tim 3:2
The bishop ( $\tau$ в $\varepsilon \pi\llcorner\sigma к о \pi о v)$. The overseer. Old word, in LXX, and inscriptions and papyri. Deissmann (Bible Studies, pp. 230f.) has shown it is applied to communal officials in Rhodes. See Ac 20:28 for its use for the elders (presbyters) in verse 17. So also in Tit 1:5,7 . See Php 1:1. The word does not in the N.T. have the monarchical sense found in Ignatius of a bishop over elders.

Without reproach ( $\alpha v \varepsilon \pi i \lambda \eta \mu \pi \tau o v$ ). Accusative case of general reference with $\delta \varepsilon$ and $\varepsilon ı v a$. Old and common verbal ( $\alpha$ privative and $\varepsilon \pi i \lambda \alpha \mu \beta \alpha v \omega$, not to be taken hold of), irreproachable. In N.T. only here, 5:7; 6:14.

Of one wife ( $\mu$ гऽ $\gamma \cup v$ аıкоऽ). One at a time, clearly.
Temperate ( $v \eta \varphi \alpha \lambda_{\iota} \circ v$ ). Old adjective. In N.T. only here, verse 11; Tit 2:2 . But see $\nu \eta \varphi \omega$, to be sober in 1Th 5:6,8 .

Soberminded ( $\sigma \omega \varphi \rho \circ v \alpha$ ). Another old adjective (from $\sigma \alpha o \varsigma$ or $\sigma \omega \varsigma$, sound, $\varphi \rho \eta \nu$, mind) in N.T. only here, Tit 1:8; 2:2,5 .

Orderly (кобцьоv). See on 2:9. Seemly, decent conduct.
Given to hospitality ( $\varphi \lambda \lambda o \xi \varepsilon v o v$ ). Old word (see $\varphi \backslash \lambda o \xi \varepsilon v i \alpha$ in Ro 12:13 ), from $\varphi \backslash \lambda o \varsigma$ and $\xi \varepsilon v o \varsigma$, in N.T. only here, Tit 1:8; $1 \mathrm{Pe} 4: 9$.

Apt to teach ( $\delta \iota \delta \alpha \kappa \tau เ \kappa о v$ ). Late form for old $\delta_{\iota} \delta \alpha \sigma \kappa \alpha \lambda_{\iota} \kappa о \varsigma$, one qualified to teach. In Philo and N.T. only (1Ti 3:2; 2Ti 2:24 ).

1Tim 3:3
No brawler ( $\mu \eta \pi \alpha \rho o \iota v o v$ ). Later word for the earlier $\pi \alpha \rho o \iota v o \rho$, one who sits long at (beside, $\pi \alpha \rho \alpha$ ) his wine. In N.T. only here and Tit 1:3.

No striker ( $\mu \eta \pi \lambda \eta \kappa \tau \eta v$ ). Late word from $\pi \lambda \eta \sigma \sigma \omega$, to strike. In N.T. only here and Tit 1:3.

Gentle ( $\varepsilon \pi \iota \varepsilon \iota \kappa \eta$ ). See on Php 4:5 for this interesting word.
Not contentious ( $\alpha \mu \alpha \chi \circ v$ ). Old word (from $\alpha$ privative and $\mu \alpha \chi \eta$ ), not a fighter. In N.T. only here and Tit 3:2 .

No lover of money ( $\alpha \varphi \lambda \lambda \alpha \rho \gamma v \rho \circ v$ ). Late word ( $\alpha$ privative and compound $\varphi i \lambda-\alpha \rho \gamma v \rho o \varsigma$ ) in inscriptions and papyri (Nageli; also Deissmann, Light, etc., pp. 85f.). In N.T. only here and Heb 13:5 .

1Tim 3:4
Ruling ( $\pi \rho o \iota \sigma \tau \alpha \mu \varepsilon v o v)$. Present middle participle of $\pi \rho o \circ \sigma \tau \eta \mu$, old word to place before and (intransitive as here) to stand before. See 1Th 5:12; Ro 12:8 .

In subjection ( $\varepsilon v$ v $\pi о \tau \alpha \gamma \eta$ ). See verse 11.
1Tim 3:5
If a man knoweth not ( $\varepsilon \tau \iota \varsigma$ ovk oı$\delta \varepsilon v$ ). Condition of first class, assumed as true.
How to rule ( $\pi \rho \circ \sigma \tau \eta v \alpha$ ). Second aorist active infinitive of same verb $\pi \rho o l \sigma \tau \eta \mu$ and with ot $\delta \varepsilon v$ means "know how to rule," not "know that he rules."

How ( $\pi \omega \varsigma$ ). Rhetorical question expecting negative answer.
Shall he take care of ( $\varepsilon \pi \mu \mu \varepsilon \lambda \eta \sigma \varepsilon \tau \alpha)$. Future middle of $\varepsilon \pi \mu \mu \varepsilon \lambda \varepsilon o \mu \alpha$, old compound ( $\varepsilon \pi$, direction of care towards) verb, in LXX, in N.T. only here and Lu 10:34f.

The church of God ( $\varepsilon \kappa \kappa \lambda \eta \sigma ા a \varsigma ~ \theta \varepsilon o v)$. Anarthrous as in verse 15, elsewhere with article (1Co 10:32; 15:9; 2Co 1:1; Ga 1:13). The local church described as belonging to God. No one in N.T. but Paul (Ac 20:28) so describes the church. This verse is a parenthesis in the characteristics of the bishop.

1Tim 3:6
Not a novice ( $\mu \eta$ vعo $\varphi \cup \tau \sigma v$ ). Our "neophyte." Vernacular word from Aristophanes on, in LXX, and in papyri in the original sense of "newly-planted" (veoo, $\varphi v \omega$ ). Only here in N.T.

Lest (ıva $\mu \eta$ ). "That not."
Being puffed up ( $\tau \cup \varphi \omega \theta \varepsilon \iota \varsigma$ ). First aorist passive participle of tv $\rho 0 \omega$, old word (from $\tau \cup \varphi о \varsigma$, smoke, pride), to raise a smoke or mist (a smoke-screen of pride). In N.T. only here; 6:4; 2 Ti 3:4.
 of $\varepsilon \mu \pi \iota \pi \tau \omega$, old verb, to fall into. Note both $\varepsilon v$ and $\varepsilon \iota \varsigma$ as in Mt 12:11; Lu 10:36 .

The condemnation of the devil ( $\kappa \rho \mu \alpha$ tov $\delta \iota \alpha \beta \circ \lambda o v$ ). See Ro 3:8 for $\kappa \rho \mu \alpha$. Best to take tov $\delta \iota \alpha \beta$ o ov as objective genitive, though subjective in verse 7 , "the condemnation passed on or received by the devil" (not just "the slanderer," any slanderer).

1Tim 3:7
From them that are without ( $\alpha \pi 0 \tau \omega v \varepsilon \xi \omega \theta \varepsilon v$ ). "From the outside (of the church) ones." Paul's care for the witness of outsiders is seen in 1Th 4:12; 1Co 10:32; Col 4:5. There are, of course, two sides to this matter.

Reproach (ovei $\delta \iota \sigma \mu \circ v$ ). Late word from oveı $\delta \iota \zeta \omega$. See Ro 15:3.
The snare of the devil ( $\pi \alpha \gamma \iota \delta \alpha$ tov $\delta \kappa \alpha \beta o \lambda o v$ ). Here subjective genitive, snare set by the devil. П $\gamma \downarrow \varsigma$, old word from $\pi \eta \gamma \nu \nu \mu$, to make fast. So a snare for birds (Lu 21:35), any
sudden trap (Ro 11:9), of sin (1Ti 6:9), of the devil (1Ti 3:7; 2Ti 2:26). Ancients used it of the snares of love. The devil sets special snares for preachers (conceit verse 6, money 6:9, women, ambition).

1Tim 3:8
Deacons ( $\delta$ ıкоиоия). Accusative case of general reference like the preceding with $\delta \varepsilon$ sıva understood. Technical sense of the word here as in Php 1:1 which see (two classes of church officers, bishops or elders, deacons).

Grave ( $\sigma \varepsilon \mu v o v \varsigma$ ). See Php 4:8. Repeated in verse 11; Tit 2:2 .
Not double-tongued ( $\mu \eta \delta_{i} \lambda o \gamma o v \varsigma$ ). Rare word $(\delta \iota \sigma, \lambda \varepsilon \gamma \omega)$ saying same thing twice. Xenophon has $\delta_{\imath} \lambda o \gamma \varepsilon \omega$ and $\delta_{\imath} \lambda o \gamma \iota a$. In Pollux, but LXX has $\delta \iota \gamma \lambda \omega \sigma \sigma o \varsigma$ (double-tongued, Latin bilinguis). Only here in N.T. One placed between two persons and saying one thing to one, another to the other. Like Bunyan's Parson "Mr. Two-Tongues."

Not given to much wine ( $\mu \eta \quad \circ \imath \omega \omega \pi \sigma \lambda \lambda \omega \pi \rho \circ \sigma \varepsilon \chi o v \tau \alpha \varsigma)$. "Not holding the mind ( $\tau 0 v$ vovv understood as usual with $\pi \rho \circ \sigma \varepsilon \chi \omega, 1 \mathrm{Ti} 1: 4$ ) on much wine" (oı $\nu \omega$, dative case). That attitude leads to over-indulgence.

Not greedy of filthy lucre ( $\mu \eta$ аıбх $\rho о \kappa \varepsilon \rho \delta \varepsilon \iota \varsigma)$. Old word from $\alpha \iota \sigma \chi \rho \circ \varsigma$ (Eph 5:12 ) and $\kappa \varepsilon \rho \delta$ оৎ (Php 1:21). "Making small gains in mean ways" (Parry). Not genuine in verse 3. In N.T. only here and Tit 1:7 (of bishops).

1Tim 3:9
The mystery of the faith ( $\tau 0 \mu \nu \sigma \tau \eta \rho \iota v \tau \eta \varsigma \pi \iota \sigma \tau \varepsilon \omega \varsigma)$. "The inner secret of the faith," the revelation given in Christ. See for $\mu \nu \sigma \tau \eta \rho \circ o v$ in Paul (2Th 2:7; 1Co 2:7; Ro 16:25; Col 1:26; Eph 3:9).

In a pure conscience ( $\varepsilon \nu \kappa \alpha \theta \alpha \rho \alpha \sigma v v \varepsilon \iota \eta \sigma \varepsilon)$. See 1:19. "The casket in which the jewel is to be kept" (Lock).

1Tim 3:10
First be proved ( $\delta о \kappa \iota \mu \alpha \zeta \varepsilon \sigma \theta \omega \sigma \alpha \nu \pi \rho \omega \tau \sigma v$ ). Present passive imperative third plural of $\delta o \kappa \iota \mu \zeta \omega$, old and common verb, to test as metals, etc. (1Th 2:4, and often in Paul). How the proposed deacons are to be "first" tested before approved Paul does not say. See Php 1:10 for the two senses (test, approve) of the word.

Let them serve as deacons ( $\delta \iota \alpha \kappa о \varepsilon \iota \tau \omega \sigma \alpha v$ ). Present active imperative of $\delta \iota \alpha \kappa о v \varepsilon \omega$ (same root as $\delta$ ıкоvoৎ), common verb, to minister, here "to serve as deacons." Cf. סıaкoveıv in Ac 6:2. See also verse 13.

If they be blameless ( $\alpha \nu \varepsilon \gamma \kappa \lambda \eta \tau o$ ov $\tau \varepsilon \varsigma)$. "Being blameless" (conditional participle, ov $\tau \varepsilon \varsigma)$. See 1Co 1:8; Col 1:22 for $\alpha v \varepsilon \gamma \kappa \lambda \eta \tau о \varsigma$.

1Tim 3:11
Women ( $\gamma \cup v \alpha \iota \kappa \alpha \varsigma)$. Accusative with $\delta \varepsilon \varepsilon \iota v \alpha$ understood (o $\sigma \alpha v \tau \omega \varsigma$, likewise) as in verse 8. Apparently "women as deacons" (Ro 16:1 about Phoebe) and not women in general or just "wives of deacons." See Pliny (Ep. X. 97) ministrae.

Not slanderers ( $\mu \eta \delta \delta \alpha \beta o \lambda o v \varsigma)$. Original meaning of $\delta \iota \alpha \beta o \lambda o c(f r o m ~ \delta \iota \alpha \beta \alpha \lambda \lambda \omega$, Lu 16:1), the devil being the chief slanderer (Eph 6:11). "She-devils" in reality (Tit 2:3). "While men are more prone to be $\delta \lambda \lambda o \gamma o v$, , double-tongued, women are more prone than men to be slanderers" (White).

Faithful in all things ( $\pi \iota \sigma \tau \alpha \varsigma \varepsilon v \pi \alpha \sigma \iota v)$. Perhaps as almoners (Ellicott) the deaconesses had special temptations.

1Tim 3:12
Of one wife ( $\mu$ цаऽ $\gamma$ vvaiкос). At a time as in verse 2.
Ruling well ( $\pi \rho \circ \iota \sigma \tau \alpha \mu \varepsilon v o \kappa \alpha \lambda \omega \varsigma)$. As in 4.
1Tim 3:13
Gain to themselves ( $\varepsilon \alpha \cup \tau о \iota \varsigma \pi \varepsilon \rho ı \pi о \iota o u v \tau \alpha)$. Present middle indicative of $\pi \varepsilon \rho ı \pi о \iota \varepsilon \omega$, old verb, to make besides ( $\pi \varepsilon \rho$, around, over), to lay by. Reflexive (indirect) middle with reflexive pronoun (عavtoıs) repeated as often happens in the Koine. In N.T. only here, Lu 17:33; Ac 20:28 (Paul also, quoting Isa 43:21).

A good standing ( $\beta \alpha \theta \mu \mathrm{ov} \kappa \alpha \lambda o v$ ). Late word from $\beta \alpha \downarrow v \omega$, in LXX for steps at a door (1Sa 5:5 ). In plural the steps of a stair. In the inscriptions it means a good foothold or standing. The ecclesiastical writers (Theodoret) take it to be a higher grade or rank, but it is doubtful if Paul means that here.

Much boldness ( $\pi \mathrm{o} \lambda \lambda \eta \nu \pi \alpha \rho \rho \eta \sigma \iota \alpha v$ ). A Pauline phrase (2Co 3:12; 7:4; Php 1:20).
In the faith which is in Christ Jesus ( $\varepsilon v \pi \iota \sigma \tau \varepsilon \tau \eta \varepsilon v$ X $\rho \iota \sigma \tau \omega$ I $\eta \sigma o v$ ). Pauline phrase again (Ac 26:18; Ga 3:26; Col 1:4; Eph 1:15; 2Ti 1:13; 3:15 ).

1Tim 3:14
Shortly ( $\varepsilon \nu \tau \alpha \chi \varepsilon$ ). Old idiom (locative case of $\tau \alpha \chi \circ \varsigma$, quickness, speed). See Ro 16:20. A pseudonymous writer would hardly have put in this phrase. Paul's hopes were not to be realized, but he did not know that.

1Tim 3:15
But if I tarry long ( $\varepsilon \alpha \vee \delta \varepsilon \beta \rho \alpha \delta v v \omega)$. Condition of third class with $\varepsilon \alpha v$ and the present active subjunctive of $\beta \rho \alpha \delta u v \omega$, old verb, to be slow (usually intransitive), from $\beta \rho \alpha \delta u c$ (slow, dull, Lu 24:25 ), in N.T. only here and 2Pe 3:9 .
 subjunctive of ot $\delta a$, to know.

How men ought ( $\pi \omega \varsigma \delta \varepsilon$ ). "How it is necessary for thee" (supply $\sigma \varepsilon$ more naturally than $\tau \imath v a$, any one). Indirect question.

To behave themselves ( $\alpha v \alpha \sigma \tau \rho \varepsilon \varphi \varepsilon \sigma \theta \alpha$ ). Present middle (direct) infinitive of $\alpha v a \sigma \tau \rho \varepsilon \varphi \omega$, old verb, to turn up and down. See 2Co 1:12; Eph 2:3 .

In the house of God ( $\varepsilon v$ оוк $\omega$ $\theta$ zov). Probably here "household of God," that is "the family of God" rather than "the house (or temple) of God." Christians as yet had no separate houses of worship and oוкоৎ commonly means "household." Christians are the vaoc (sanc-
tuary) of God (1Co 3:16f.; 2Co 6:16 ), and Paul calls them orkeo tov $\theta$ zov (Eph 2:19 ) "members of God's family." It is conduct as members of God's family (оккоৎ) that Paul has in mind.

Which ( $\eta \tau \iota \varsigma)$. "Which very house of God," agreeing (feminine) with the predicate word $\varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha$ (church).

The church of the living God ( $\varepsilon \kappa \kappa \lambda \eta \sigma \iota \alpha \theta \varepsilon o v \zeta \omega v \tau \circ \varsigma)$. Probably here the general church or kingdom as in Colossians and Ephesians, though the local church in verse 5.

The pillar and ground of the truth ( $\sigma \tau \cup \lambda о \varsigma \kappa \alpha \varepsilon \delta \rho \alpha \iota \omega \mu \alpha \tau \eta \varsigma \alpha \eta \eta \varepsilon \iota \alpha \varsigma)$. Paul changes the metaphor again as he often does. Those words are in apposition to єкк $\lambda \eta \sigma \iota \alpha$ and oוкос. On $\sigma \tau \cup \lambda o \varsigma$, old word for pillar, see Ga 2:9; Re 3:12 (only other N.T. examples). Hz $\delta \rho a \iota \omega \mu \alpha$, late and rare word (from $\varepsilon \delta \rho \alpha \iota o \omega$, to make stable) occurs here first and only in ecclesiastical writers later. Probably it means stay or support rather than foundation or ground. See Co 1:23; 2 Ti 2:19 for similar idea. See also Mt 16:18f .

1Tim 3:16
Without controversy (оно入оүоv $\mu v \omega \varsigma$ ). Old adverb from the participle o $\mu о \lambda о \gamma о \cup \mu \varepsilon v o \varsigma$ from оцолоүع $\omega$. Here only in N.T. "Confessedly."

Great ( $\mu \varepsilon \gamma \alpha$ ). See Eph 5:32. "A great mystery."
The mystery of godliness ( $\tau 0 \tau \eta \varsigma \varepsilon \cup \sigma \varepsilon \beta \varepsilon \iota \alpha \varsigma \mu \nu \sigma \tau \eta \rho \circ \sim)$. See verse 9 "the mystery of the faith," and 2:2 for $\varepsilon v \sigma \varepsilon \beta \varepsilon ı \alpha$. Here the phrase explains "a pillar and stay of the truth" (verse 15). See in particular Co 1:27. "The revealed secret of true religion, the mystery of Christianity, the Person of Christ" (Lock).

He who (oc). The correct text, not $\theta \varepsilon o \varsigma$ (God) the reading of the Textus Receptus (Syrian text) nor o (neuter relative, agreeing with $\mu \nu \sigma \tau \eta \rho \circ o v)$ the reading of the Western documents. Westcott and Hort print this relative clause as a fragment of a Christian hymn (like Eph 5:14 ) in six strophes. That is probably correct. At any rate oc (who) is correct and there is asyndeton (no connective) in the verbs. Christ, to whom os refers, is the mystery (Col 1:27; 2:2).

Was manifested $(\varepsilon \varphi \alpha v \varepsilon \rho \omega \theta \eta)$. First aorist passive indicative of $\varphi \alpha v \varepsilon \rho \circ \omega$, to manifest. Here used to describe the incarnation ( $\varepsilon v \sigma \alpha \rho \kappa$ ) of Christ (an answer also to the Docetic Gnostics). The verb is used by Paul elsewhere of the incarnation (Ro 16:26; Col 1:26) as well as of the second coming $(\operatorname{Col} 3: 4)$.

Justified in the spirit ( $\varepsilon \delta \iota \kappa \alpha \iota \omega \theta \eta \varepsilon v \pi v \varepsilon \cup \mu \alpha \tau)$. First aorist passive indicative of $\delta \iota \kappa \alpha \iota \omega$, to declare righteous, to vindicate. Christ was vindicated in his own spirit (Heb 9:14) before men by overcoming death and rising from the dead (Ro 1:3f.).

Seen of angels ( $\omega \varphi \theta \eta \alpha \gamma \gamma \varepsilon \lambda$ otc). First aorist passive indicative of opa $\omega$, to see, with either the instrumental or the dative case of angels ( $\alpha \gamma \gamma \varepsilon \lambda o \iota c$ ). The words were probably suggested by the appearance of Jesus ( $\omega \varphi \theta \eta$, the usual form for the resurrection appearances of Christ) of the angels at the tomb and at the ascension of Christ. See Php 2:10; 1Pe 3:22
for the appearance of Jesus to the angels in heaven at the ascension. Some would take "angels" here to be "messengers" (the women).

Preached among the nations ( $\varepsilon \kappa \eta \rho v \chi \theta \eta \varepsilon v \varepsilon \theta v \varepsilon \sigma เ v$ ). First aorist passive indicative of $\kappa \eta \rho v \sigma \sigma \omega$, to proclaim. The word $\varepsilon \theta v o \varsigma$ may mean "all creation" (Col 1:23) and not just Gentiles as distinct from Jews. Paul had done more of this heralding of Christ among the Gentiles than any one else. It was his glory (Eph 3:1,8). Cf. 2:7.

Believed on in the world $(\varepsilon \pi \iota \sigma \tau \varepsilon v \theta \eta \varepsilon v \kappa \circ \sigma \mu \omega)$. First aorist indicative passive again of $\pi \iota \sigma \tau \varepsilon v \omega$, to believe (2Th 1:10). Cf. 1:15; 2Co 5:19.

Received up in glory ( $\alpha v \varepsilon \lambda \eta \mu \varphi \theta \eta \varepsilon v \delta o \xi \eta$ ). First aorist passive again (six verbs in the same voice and tense in succession, a rhythmic arrangement like a hymn). Cf. Ro 8:29f . This time the verb is $\alpha v \alpha \lambda \alpha \mu \beta \alpha v \omega$, the verb used of the ascension (Ac 1:11,22, which see). In a wonderful way this stanza of a hymn presents the outline of the life of Christ.

## 1 Timothy 4

1Tim 4:1
Expressly ( $\rho \eta \tau \omega \varsigma$ ). Late adverb, here alone in N.T., from verbal adjective $\rho \eta \tau \circ \varsigma$ (from root $\rho \varepsilon \omega$ ). The reference is to the Holy Spirit, but whether to O.T. prophecy (Ac 1:16) or to some Christian utterance (2Th 2:2; 1Co 14:1ff. ) we do not know. Parry recalls the words of Jesus in Mt 24:10,24 .
 (Mt 4:2 ). Relative time from the prediction, now coming true (a present danger).

Some shall fall away ( $\alpha \pi \sigma \sigma \tau \eta \sigma o v \tau \alpha \tau \iota v \varepsilon)$. Future middle of $\alpha \varphi \iota \sigma \tau \eta \mu$, intransitive use, shall stand off from, to fall away, apostatize (2Co 12:8).

From the faith ( $\tau \eta \varsigma \pi \iota \sigma \tau \varepsilon \omega \varsigma)$. Ablative case (separation). Not creed, but faith in God through Christ.

Giving heed ( $\pi \rho \circ \sigma \varepsilon \chi \circ v \tau \varepsilon \varsigma)$. Supply tov vouv (the mind) as in 3:8.
Seducing spirits ( $\pi v \varepsilon v \mu a \sigma \iota v \pi \lambda \alpha v o \iota \varsigma)$. Old adjective ( $\pi \lambda \alpha \nu \eta$, wandering), here active sense (deceiving). As substantive in 2Co 6:8. Probably some heathen or the worst of the Gnostics.

Doctrines of devils ( $\delta \iota \delta \alpha \sigma к а \lambda ı \alpha \iota \varsigma \delta a \iota \mu \circ \nu \iota \omega v$ ). "Teachings of $\delta a \not \mu о v \varsigma . "$ Definite explanation of the preceding. Cf. 1Co 10:20f.

1Tim 4:2
Through the hypocrisy of men that speak lies ( $\varepsilon v$ vтокрьбє $\psi \varepsilon v \delta o \lambda o \gamma \omega v$ ). For итокрьбıৎ, see Ga 2:13. Чعvסо入оүоৎ ( $\psi \varepsilon v \delta \eta \sigma, \lambda \varepsilon \gamma \omega$ ) Koine word from Aristophanes on. Here only in N.T. "A good classical word for liars on a large scale" (Parry).

Branded in their own conscience as with a hot iron (кєкаขбтпрıaб $\mu \varepsilon v \omega \nu \tau \eta \nu \iota \delta \iota \nu$ $\sigma u v \varepsilon \delta \eta \eta \sigma v)$. Accusative case $\sigma v v \varepsilon i \delta \eta \sigma v v$ retained with the perfect passive participle of $\kappa \alpha v \sigma \tau \eta \rho \iota \alpha \zeta \omega$, a rare verb only here and once in Strabo. Branded with the mark of Satan ( 2 Ti 2:26) as Paul was with the marks of Christ (Ga 6:17). Agreeing in case with $\psi \varepsilon v \delta o \lambda o \gamma \omega v$.

1Tim 4:3
Forbidding to marry ( $\kappa \omega \lambda \nu o v \tau \omega v \gamma \alpha \mu \varepsilon เ v$ ). Present active participle of common verb $\kappa \omega \lambda \nu \omega$, to hinder, genitive case agreeing with $\psi \varepsilon v \delta o \lambda o \gamma \omega v$. See Col 2:16,21f. , where Paul condemns the ascetic practices of the Gnostics. The Essenes, Therapeutae and other oriental sects forbade marriage. In 1Co 7 Paul does not condemn marriage.

To abstain from meats ( $\alpha \pi \varepsilon \chi \varepsilon \sigma \theta \alpha \beta \rho \omega \mu \alpha \tau \omega v$ ). Infinitive dependent, not on $\kappa \omega \lambda \nu 0 v \tau \omega v$, but on the positive idea $\kappa \varepsilon \lambda \varepsilon v o v \tau \omega v$ (implied, not expressed). Ablative case of $\beta \rho \omega \mu \alpha \tau \omega \nu$ after $\alpha \pi \varepsilon \chi \varepsilon \sigma \theta \alpha$ (present direct middle, to hold oneself away from). See 1Co 8-10; Ro 14; 15 for disputes about "meats offered to idols" and Co 1:22f. for the Gnostic asceticism.

Which God created ( $\alpha$ o $\theta \varepsilon o \varsigma \varepsilon \kappa \tau \iota \sigma \varepsilon v$ ). First active indicative of $\kappa \tau \iota \zeta \omega$ (Co 1:16 ). Cf. 1Co 10:25.

To be received ( $\varepsilon ı \varsigma \mu \varepsilon \tau \alpha \lambda \eta \mu \psi \iota v)$. "For reception." Old word, only here in N.T.
By them that believe and know (тоь $\pi \iota \sigma \tau о \iota \varsigma ~ к \alpha ~ \varepsilon \pi \varepsilon \gamma v \omega \kappa о \sigma) . ~ D a t i v e ~ c a s e, ~ " f o r ~ t h e ~ b e-~$ lievers and those who (one article unites closely) have known fully" (perfect active participle of $\varepsilon \pi \iota \gamma \iota v \omega \sigma \kappa \omega)$, a Pauline use of the word ( $\operatorname{Col} 1: 6$ ).

1Tim 4:4
Creature ( $\kappa \tau \iota \sigma \mu \alpha)$. Late word from $\kappa \tau \iota \zeta \omega$, result of creating. See Ge 1:31; Mr 7:15; Ro 14:14 for the idea stated.

To be rejected ( $\alpha \pi \sigma \beta \lambda \eta \tau 0 v$ ). Old verbal adjective in passive sense from $\alpha \pi \circ \beta \alpha \lambda \lambda \omega$, to throw away, here only in N.T.

If it be received ( $\lambda \alpha \mu \beta \alpha v o \mu \varepsilon v o v)$. "Being received." Present passive participle of $\lambda \alpha \mu \beta \alpha \omega \omega$, in conditional sense, "with thanksgiving."

1Tim 4:5
It is sanctified ( $\alpha \gamma 1 \alpha \zeta \varepsilon \tau \alpha$ ). Present passive indicative of $\alpha \gamma \iota \alpha \zeta \omega$, here "rendered holy" rather than "declared holy." Cf. verse 4.
 $\varepsilon ข \tau \varepsilon \cup \xi ı c$. Paul seems to refer to Genesis 1 . It is almost a hendiadys "by the use of Scripture in prayer."

1Tim 4:6
If thou put the brethren in mind of these things ( $\tau \alpha \cup \tau \alpha$ vпотı $\theta \varepsilon \mu \varepsilon v \circ \varsigma \tau о \iota \varsigma ~ \alpha \delta \varepsilon \lambda \varphi о \iota \varsigma) . ~$ Present middle participle of vпотiӨ $\mu$, to place under, to suggest, old and common verb, here only in N.T., "suggesting these things to the brethren."

Thou shalt be a good minister of Christ Jesus ( $\kappa \alpha \lambda о \varsigma \varepsilon \sigma \eta \delta \iota \kappa о v o \varsigma X \rho \iota \sigma \tau о v$ I $\eta \sigma o v$ ). This beautiful phrase covers one's whole service for Christ ( 3:1-7).

Nourished in ( $\varepsilon v \tau \rho \varepsilon \varphi \circ \mu \varepsilon v o \varsigma)$. Present passive participle of $\varepsilon \nu \tau \rho \varepsilon \varphi \omega$, old verb, to nourish in, used by Plato of "nourished in the laws," here only in the N.T.
 in Christ. The Bolshevists in Russia are feeding the children on atheism to get rid of God.

Which thou hast followed ( $\eta \pi \alpha \rho \eta \kappa о \lambda o v \theta \eta \kappa \alpha \varsigma)$. Perfect active indicative of $\pi \alpha \rho a \kappa о \lambda o v \theta \varepsilon \omega$, old verb, to follow beside, of persons (often in old Greek) or of ideas and things ( $\mathrm{Lu} 1: 3 ; 1 \mathrm{Ti} 4: 6 ; 2 \mathrm{Ti} 3: 10$ ). With associative instrumental case $\eta$ (which).

1Tim 4:7
Refuse ( $\pi \alpha \rho \alpha \iota \tau 0 v$ ). Present middle imperative second person singular of $\pi \alpha \rho \alpha \iota \tau \varepsilon \omega$, old verb, to ask of one and then to beg off from one as in Lu 14:18f.; Ac 25:11; 1Ti 4:7; 5:11; Tit 3:10; 2Ti 2:23.

Profane ( $\beta \varepsilon \beta \eta \lambda$ ouc). See 1:9.
Old wives' fables ( $\gamma \rho \alpha \omega \delta \varepsilon \iota \varsigma \mu \nu \theta$ ov¢). On $\mu \nu \theta$ oৎ, see 1:4. Г $\rho \alpha \omega \delta \varepsilon \iota \varsigma$, late word (Strabo, Galen) from $\gamma \rho \alpha u \varsigma$, old woman, and $\varepsilon ו \delta$ oc (look, appearance). Such as old women tell to children like the Gnostic aeons.

Exercise thyself ( $\gamma \nu \mu \nu \alpha \zeta \varepsilon \sigma \varepsilon \alpha v \tau o v$ ). Present active imperative of $\gamma \nu \mu v a \zeta \omega$, originally to exercise naked ( $\gamma \nu \mu \nu$ oc). Old and common verb, but in N.T. only here and Heb 5:14; 12:11.

1Tim 4:8
Bodily exercise ( $\eta \sigma \omega \mu \alpha \tau \iota \eta \eta \gamma \nu \mu v a \sigma \iota \alpha$ ). Г $\nu \mu v a \sigma \iota \alpha($ from $\gamma \nu \mu v \alpha \zeta \omega)$, also a common old word, here only in N.T. So also $\sigma \omega \mu \alpha \tau \kappa \kappa \eta$ (from $\sigma \omega \mu \alpha$, body) in N.T. only here and Lu 3:22

Profitable ( $\omega \varphi \varepsilon \lambda_{\wedge} \mu \circ \varsigma$ ). Another old word (from $\omega \varphi \varepsilon \lambda \varepsilon \omega$, to help, to profit), in N.T. only here, Tit 3:8; $2 \mathrm{Ti} 3: 16$.

For a little ( $\pi \rho \circ \varsigma$ o $\lambda \iota \gamma \circ v$ ). "For little." Probably extent in contrast to $\pi \rho \circ \varsigma \pi \alpha v \tau \alpha$ (for all things), though in Jas 4:14 it is time "for a little while."

Which now is ( $\tau \eta \varsigma v v v)$. "The now life."
Of that which is to come ( $\tau \eta \varsigma \mu \varepsilon \lambda \lambda$ ouø $\varsigma \varsigma$ ). "Of the coming (future) life."
1Tim 4:9
See 1:15 for these very words, but here the phrase points to the preceding words, not to the following as there.

1Tim 4:10
To this end ( $\varepsilon ા \varsigma ~ \tau о и \tau о) . ~ T h e ~ g o d l i n e s s ~(\varepsilon v \sigma \varepsilon \beta \varepsilon ı \alpha) ~ o f ~ v e r s e ~ 8 . ~ S e e ~ 2 C o ~ 6: 10 ~ a s ~ P a u l ' s ~ o w n ~$ commentary.

We labour ( $\kappa о \pi เ \omega \mu \varepsilon \nu$, Col 1:29)
and strive ( $\kappa \alpha ~ \alpha \gamma \omega v \iota \zeta о \mu \varepsilon$, Col 1:29). Both Pauline words.
Because we have set our hope (o $\tau \lambda \pi \kappa \kappa \alpha \mu \varepsilon v$ ). Perfect active indicative of $\varepsilon \lambda \pi \iota \zeta \omega$ (Ro 15:12 ).

Saviour of all men ( $\sigma \omega \tau \eta \rho \pi \alpha \nu \tau \omega \nu \alpha v \theta \rho \omega \pi \omega \nu$ ). See $1: 1$ for $\sigma \omega \tau \eta \rho$ applied to God as here. Not that all men "are saved" in the full sense, but God gives life ( 6:13) to all (Ac 17:28 ).

Specially of them that believe ( $\mu \alpha \lambda \iota \sigma \tau \alpha \pi \iota \sigma \tau \omega v$ ). Making a distinction in the kinds of salvation meant. "While God is potentially Saviour of all, He is actually Saviour of the tıбто" (White). So Jesus is termed "Saviour of the World" (Joh 4:42 ). Cf. Ga 6:10 .

1Tim 4:12
Despise ( $\kappa \alpha \tau \alpha \varphi \rho \circ v \varepsilon \iota \tau \omega$ ). Imperative active third singular of ката $\varphi \rho \circ v \varepsilon \omega$, old verb, to think down on, to despise (Ro 2:4).

Thy youth ( $\sigma 0 \cup \tau \eta \varsigma v \varepsilon o \tau \eta \tau \circ \varsigma$ ). Genitive case of old word (from veoc) as in Mr 10:20 .
Be thou ( $\gamma(v o v$ ). Present middle imperative of $\gamma$ vooua. "Keep on becoming thou."
An ensample ( $\tau \cup \pi \circ \varsigma)$. Old word from $\tau v \pi \tau \omega$, a type. Pauline use of the word ( $1 \mathrm{Th} 1: 7$; 2Th 3:9; Php 3:17; Tit 2:7).

To them that believe ( $\tau \omega \nu \pi / \sigma \tau \omega v$ ). Objective genitive.
In word ( $\varepsilon v \lambda o \gamma \omega$ ). In conversation as well as in public speech.

In manner of life ( $\varepsilon v$ avaбт $\rho \circ \varphi \eta$ ). "In bearing" (Ga 1:13; Eph 4:22).
In purity ( $\varepsilon v \alpha \gamma v \varepsilon \iota \alpha$ ). Old word from $\alpha \gamma v \varepsilon v \omega$ ( $\alpha \gamma v o \varsigma)$. Sinlessness of life. Used of a Nazirite ( Nu 6:2,21 ). Only here and 5:2 in N.T.

1Tim 4:13
Till I come ( $\varepsilon \omega \varsigma \varepsilon \rho \chi \circ \mu \alpha$ ). "While I am coming" (present indicative with $\varepsilon \omega \varsigma$ ), not "till I come" ( $\varepsilon \omega \varsigma \varepsilon \lambda \theta \omega$ ).

Give heed ( $\pi \rho \circ \sigma \varepsilon \chi \varepsilon$ ). Present active imperative, supply tov vouv, "keep on putting thy mind on."

The reading ( $\tau \eta \alpha v \alpha \gamma v \omega \sigma \varepsilon$ ). Old word from $\alpha v \alpha \gamma เ v \omega \sigma \kappa \omega$. See 2Co 3:14. Probably in particular the public reading of the Scriptures (Ac 13:15), though surely private reading is not to be excluded.

To exhortation ( $\tau \eta \pi \alpha \rho \alpha \kappa \lambda \eta \sigma \varepsilon$ ),
to teaching ( $\tau \eta \delta \iota \delta a \sigma \kappa \alpha \lambda \iota \alpha$ ). Two other public functions of the minister. Probably Paul does not mean for the exhortation to precede the instruction, but the reverse in actual public work. Exhortation needs teaching to rest it upon, a hint for preachers today.

1Tim 4:14
Neglect not ( $\mu \eta \alpha \mu \varepsilon \lambda \varepsilon$ ). Present active imperative in prohibition of $\alpha \mu \varepsilon \lambda \varepsilon \omega$, old verb, rare in N.T. (Mt 22:5; 1Ti 4:14; Heb 2:3; 8:9). From $\alpha \mu \varepsilon \lambda \eta \varsigma$ ( $\alpha$ privative and $\mu \varepsilon \lambda \varepsilon$, not to care). Use with genitive.

The gift that is in thee ( $\tau$ оv $\varepsilon v$ бo $\chi \alpha \rho \iota \sigma \mu \alpha \tau о \varsigma)$. Late word of result from $\chi \alpha \rho \iota \zeta \rho \mu \alpha$, in papyri (Preisigke), a regular Pauline word in N.T. (1Co 1:7; 2Co 1:11; Ro 1:11 ; etc.). Here it is God's gift to Timothy as in 2Ti 1:6 .

By prophecy ( $\delta \iota \alpha \pi \rho \circ \varphi \eta \tau \varepsilon ⿺ \propto \varsigma$ ). Accompanied by prophecy ( $1: 18$ ), not bestowed by prophecy.

With the laying on of the hands of the presbytery ( $\mu \varepsilon \tau \alpha \varepsilon \pi \mid \theta \varepsilon \sigma \varepsilon \omega \varsigma \tau \omega \nu \chi \varepsilon \rho \omega \nu$ тov $\pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho \iota o v)$. In Ac 13:2f., when Barnabas and Saul were formally set apart to the mission campaign (not then ordained as ministers, for they were already that), there was the call of the Spirit and the laying on of hands with prayer. Here again $\mu \varepsilon \tau \alpha$ does not express instrument or means, but merely accompaniment. In 2Ti 1:6 Paul speaks only of his own laying on of hands, but the rest of the presbytery no doubt did so at the same time and the reference is to this incident. There is no way to tell when and where it was done, whether at Lystra when Timothy joined Paul's party or at Ephesus just before Paul left Timothy there ( 1:3). Eлı $\theta \varepsilon \sigma \iota \varsigma(\varphi \rho о \mu \varepsilon \pi \iota \tau \bullet \theta \eta \mu$, to lay upon) is an old word, in LXX, etc. In the N.T. we find it only here, $2 \mathrm{Ti} 1: 16$; Ac 8:18; Heb 6:2, but the verb $\varepsilon \pi \iota \tau \iota \theta \eta \mu$ with $\tau \alpha \varsigma \chi \varepsilon ı \rho a \varsigma ~ m o r e ~ f r e q u e n t l y ~(A c ~$ 6:6 of the deacons; $8: 19 ; 13: 3 ; 1 \mathrm{Ti} 5: 22$, etc.). Прєбßutع 10 v is a late word (ecclesiastical use also), first for the Jewish Sanhedrin (Lu 22:66; Ac 22:5 ), then (here only in N.T.) of Christian elders (common in Ignatius), though $\pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho \circ \varsigma$ (elder) for preachers (bishops) is common (Ac 11:30; 15:2; 20:17, etc.).

1Tim 4:15
Be diligent in these things ( $\tau \alpha \cup \tau \alpha \mu \varepsilon \lambda \varepsilon \tau \alpha$ ). Old verb from $\mu \varepsilon \lambda \varepsilon \tau \eta$ (care, practice), present active imperative, "keep on practising these things." In N.T. only here and Ac 4:25

Give thyself wholly to them ( $\varepsilon v$ тоv $\tau \circ \varsigma \iota \theta)$ ). Present imperative second person singular of $\varepsilon \mu$, "keep on in these things." Note five uses of $\varepsilon v$ in verse 12 and three datives in verse 14. Plutarch (Pomp. 656 B) says Caesar was $\varepsilon v$ tovtos ("in these things"). It is like our "up to his ears" in work ( $(\nu \mu \varepsilon \delta t a \varsigma \rho \varepsilon \varsigma)$ and sticking to his task.

Thy progress ( $\sigma 0 \cup \eta \pi \rho о \kappa о \pi \eta$ ). Koine word from $\pi \rho о \kappa о \pi \tau \omega$, to cut forward, to blaze the way, in N.T. only here and Php 1:12,25 . Paul's concern (purpose, $t v a$ and present subjunctive $\eta$ of $\varepsilon \mu$ ) is that Timothy's "progress" may be "manifest to all." It is inspiring to see a young preacher grow for then the church will grow with him.

1Tim 4:16
Take heed to thyself ( $\varepsilon \pi \varepsilon \chi \varepsilon \sigma \varepsilon \alpha v \tau \omega)$. Present active imperative of old verb $\varepsilon \pi \varepsilon \chi \omega$, to hold upon (Php 2:1,16 ), but here tov vouv (the mind) must be supplied as in Ac 3:5 and as is common with $\pi \rho \circ \sigma \varepsilon \chi \omega$. With dative case $\sigma \varepsilon \alpha v \tau \omega$. "Keep on paying attention to thyself." Some young preachers are careless about their health and habits. Some are too finical.

And to the teaching ( $\kappa \alpha \tau \eta \delta \iota \delta \alpha \sigma \kappa \alpha \lambda เ \alpha)$. This is important also.
Continue in these things ( $\varepsilon \pi / \mu \varepsilon v \varepsilon \alpha u \tau o \iota \varsigma)$. Present active imperative of $\varepsilon \pi \mu \varepsilon \varepsilon \nu \omega$, old and common verb to stay by the side of a person or thing. See Ro 6:1; Col 1:23. "Stay by them," "stick to them," "see them through." "Stick to the business of framing your own life and your teaching on right lines" (Parry).

Thou shalt save ( $\sigma \omega \sigma \varepsilon \varsigma)$. Future active of $\sigma \omega \zeta \omega$, effective future, finally save. Cf. 1Co 9:27; Joh 10:9.

## 1 Timothy 5

1Tim 5:1
Rebuke not an elder ( $\pi \rho \varepsilon \sigma \beta \nu \tau \varepsilon \rho \omega \mu \eta \varepsilon \pi \iota \pi \lambda \eta \xi \eta \iota)$. Dative case $\pi \rho \varepsilon \sigma \beta \nu \tau \varepsilon \rho \omega$ used in the usual sense of an older man, not a minister (bishop as in 3:2) as is shown by "as a father." First aorist (ingressive) active subjunctive with negative $\mu \eta$ (prohibition against committing the act) of $\varepsilon \pi\llcorner\pi \lambda \eta \sigma \sigma \omega$, to strike upon, old verb, but here only in N.T. and in figurative sense with words rather than with fists. Respect for age is what is here commanded, an item appropriate to the present time.

The younger men as brethren ( $v \varepsilon \omega \tau \varepsilon \rho \circ \cup \varsigma \omega \varsigma ~ a \delta \varepsilon \lambda \varphi o u \varsigma)$. Comparative adjective $\nu \varepsilon \omega \tau \varepsilon \rho o \varsigma$ from $v \varepsilon \circ \varsigma$ (young). No article, "younger men." Wise words for the young minister to know how to conduct himself with old men (reverence) and young men (fellowship, but not stooping to folly with them).

1Tim 5:2
The elder women as mothers ( $\pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho \alpha \varsigma \omega \varsigma \mu \eta \tau \varepsilon \rho \alpha \varsigma$ ). Anarthrous again, "older women as mothers." Respect and reverence once more.

The younger as sisters, in all purity ( $v \varepsilon \omega \tau \varepsilon \rho \alpha \varsigma \omega \varsigma \alpha \delta \varepsilon \lambda \varphi \alpha \varsigma \varepsilon v \pi \alpha \sigma \eta \alpha \gamma v i \alpha)$. Anarthrous also and comparative form as in verse 1 . See 4:12 for $\alpha \gamma v i \alpha$. No sort of behavior will so easily make or mar the young preacher as his conduct with young women.

1Tim 5:3
That are widows indeed ( $\tau \alpha \varsigma$ ov $\omega \omega \varsigma \chi \eta \rho \propto \varsigma$ ). For ov $\tau \omega \varsigma$ (actually, really), see Lu 23:47; 1Co 14:25; and verse 5. For widows ( $\chi \eta \rho \alpha$ ) see Mr 12:40,42; Ac 6:1; 1Co 7:8 . Parry notes that in verses 3-8 Paul discusses widows who are in distress and 9-16 those who are in the employment of the local church for certain work. Evidently, as in Acts 6:1-6, so here in Ephesus there had arisen some trouble over the widows in the church. Both for individual cases of need and as a class Timothy is to show proper respect ( $\tau \mu \alpha$, keep on honouring) the widows.

1Tim 5:4
Grandchildren ( $\varepsilon \kappa \gamma \circ v \alpha$ ). Old word from $\varepsilon \kappa \gamma เ v \circ \mu \alpha$, here only in N.T.
Let them learn ( $\mu \alpha v \theta \alpha v \varepsilon \tau \omega \sigma \alpha v$ ). The children and grandchildren of a widow. Present active imperative third person plural of $\mu \alpha v \theta a v \omega$. "Let them keep on learning."

First ( $\pi \rho \omega \tau \sigma v$ ). Adverb, first before anything else. No "corban" business here. No acts of "piety" toward God will make up for impiety towards parents.

To shew piety ( $\varepsilon v \sigma \varepsilon \beta \varepsilon เ v$ ). Present active infinitive with $\mu \alpha v \theta \alpha v \varepsilon \tau \omega \sigma \alpha v$ and old verb, in N.T. only here and Ac 17:23. From $\varepsilon v \sigma \varepsilon \beta \eta \varsigma(\varepsilon v, \sigma \varepsilon \beta o \mu \alpha)$, pious, dutiful.

Their own family ( $\tau 0 v$ เ $\delta$ เov oıкоv). "Their own household." Filial piety is primary unless parents interfere with duty to Christ (Lu 14:26).

To requite ( $\alpha \mu \circ \iota \beta \alpha \varsigma \alpha \pi \delta \delta \iota \delta \nu \alpha$ ). Present active infinitive of $\alpha \pi o \delta \iota \delta \omega \mu$, to give back,
 like for like) is old and common word, but here only in N.T.
 $\pi \rho о ү \stackrel{\nu}{\circ} \mu \alpha$, to come before), "ancestor." In N.T. only here and 2Ti 1:3 . See 2:3 for "acceptable" ( $\alpha \pi о \delta \varepsilon к \tau о v)$.

1Tim 5:5
Desolate ( $\mu \varepsilon \mu \circ v \omega \mu \varepsilon v \eta$ ). Perfect passive participle of $\mu \circ$ vo $($ from $\mu \circ v o \varsigma)$ ), "left alone," old verb, here alone in N.T. Without husband, children, or other close kin.

Hath her hope set on God ( $\eta \lambda \pi \kappa \kappa \varepsilon v \varepsilon \pi \theta \varepsilon o v)$. Perfect active indicative of $\varepsilon \lambda \pi \iota \zeta \omega$, "hath placed her hope (and keeps it) on God." Text doubtful whether God ( $\theta$ gov) or Lord (Kvpıov).

Continues ( $\pi \rho \circ \sigma \mu \varepsilon v \varepsilon)$. See on 1:3. With dative case here.
Night and day (vuктоৎ ка $\eta \mu \varepsilon \rho \alpha \varsigma)$. "By night and by day" (genitive, not accusative). Paul does not say that she should pray "all night and day."

1Tim 5:6
She that giveth herself to pleasure ( $\eta \sigma \pi \alpha \tau \alpha \lambda \omega \sigma \alpha$ ). Present active participle of $\sigma \pi \lambda \alpha \tau \alpha \lambda \alpha \omega$, late verb (Polybius) from $\sigma \pi \alpha \tau \alpha \lambda \eta$ (riotous, luxurious living). In N.T. only here and Jas 5:5.

1Tim 5:7
That they may be without reproach (ıv $\alpha v \varepsilon \pi i \lambda \eta \mu \pi \tau o \omega \sigma ı v$ ). See 3:2 for $\alpha v \varepsilon \pi \iota \lambda \eta \mu \pi \tau o \varsigma$. Final clause with iva and present subjunctive.

1Tim 5:8
Provideth not for his own ( $\tau \omega v \iota \delta \omega \omega v$ ov $\pi \rho \circ \vee o \varepsilon$ ). Condition of first class with $\varepsilon$ and present active (or middle $\pi \rho \circ$ vosit $\alpha$ ) indicative of $\pi \rho \circ$ vo $\varepsilon \omega$, old verb, to think beforehand. Pauline word in N.T. only here, 2Co 8:21; Ro 12:7. With genitive case.

He hath denied the faith ( $\tau \eta v \pi \iota \sigma \tau \iota v \eta \rho v \eta \tau \alpha$ ). Perfect middle indicative of old verb $\alpha \rho v \varepsilon o \mu \alpha$. His act of impiety belies (Tit 1:16) his claim to the faith (Re 2:13).

Worse than an unbeliever ( $\alpha \pi \iota \sigma \tau o v ~ \chi \varepsilon \iota \rho \omega v$ ). Ablative case of $\alpha \pi \iota \sigma \tau o v$ after the comparative $\chi \varepsilon \rho \omega \nu$. Who makes no profession of piety.

1Tim 5:9
Let none be enrolled as a widow ( $\chi \eta \rho \alpha \kappa \alpha \tau \alpha \lambda \varepsilon \gamma \varepsilon \sigma \theta \omega$ ). Present passive imperative of $\kappa \alpha \tau \alpha \lambda \varepsilon \gamma \omega$, old verb, to set down in an official list, only here in N.T. "Let a widow be enrolled," the negative coming later, "having become of no less than sixty years" ( $\mu \eta \varepsilon \lambda \alpha \tau \tau 0 \nu \varepsilon \tau \omega \nu$ $\varepsilon \xi \eta \kappa o v \tau \alpha \gamma \varepsilon \gamma o v v i \alpha)$. Second perfect active participle of $\gamma \iota v o \mu \alpha$. For the case of $\varepsilon \tau \omega v$, see Lu 2:42. This list of genuine widows (verses 3,5 ) apparently had some kind of church work to do (care for the sick, the orphans, etc.).

The wife of one man ( $\varepsilon v o \varsigma \alpha v \delta \rho o \varsigma \gamma u v \eta$ ). Widows on this list must not be married a second time. This interpretation is not so clear for 3:2,12; Tit 1:6 .

1Tim 5:10
If she hath brought up children ( $\varepsilon \varepsilon \tau \varepsilon \kappa v \circ \tau \rho \circ \varphi \eta \sigma \varepsilon v$ ). Condition of first class. Late and rare word (Aristotle, Epictetus), first aorist active indicative of $\tau \varepsilon \kappa v \circ \tau \rho \circ \varphi \varepsilon \omega$ ( $\tau \varepsilon \kappa \vee о \tau \rho \circ \varphi о \varsigma$, from $\tau \varepsilon \kappa v o v, \tau \rho \varepsilon \varphi \omega)$, here only in N.T. Qualification for her work as leader.

If she hath used hospitality to strangers ( $\varepsilon \varepsilon \xi \varepsilon v o \delta o \chi \eta \sigma \varepsilon v)$. First aorist again and same condition. Late form (Dio Cassius) of old verb $\xi \varepsilon v o \delta$ окє $\omega$ (Herodotus), to welcome strangers ( $\xi \varepsilon$ vous $\delta \varepsilon \chi \circ \mu \alpha$ ). Only here in N.T. Hospitality another qualification for such leadership ( 3:2).

If she hath washed the saints' feet ( $\varepsilon \alpha \gamma \omega \omega \nu \pi o \delta a \varsigma \varepsilon \nu \imath \psi \varepsilon v)$. Same condition and tense of $v i \pi \tau \omega$ (old form $v \iota \zeta \omega)$, common in N.T. (Joh 13:5 ). Proof of her hospitality, not of its being a church ordinance.

If she hath relieved the afflicted ( $\varepsilon \theta \lambda ı \beta$ оцєvoı $\varepsilon \pi \eta \rho \kappa \varepsilon \sigma \varepsilon v)$. Same condition and tense of $\varepsilon \pi \alpha \rho \kappa \varepsilon \omega$, to give sufficient aid, old word, in N.T. only here and verse 16. Experience that qualified her for eleemosynary work.

If she hath diligently followed ( $\varepsilon \varepsilon \pi \eta \kappa о \lambda o u \theta \eta \sigma \varepsilon v)$. Same condition and tense of $\varepsilon \pi \alpha \kappa о \lambda o u \theta \varepsilon \omega$, old verb, to follow close upon ( $\varepsilon \pi$ ). So here, verse $24 ; 1 \mathrm{Pe} 2: 21$. In a word such a widow must show her qualifications for leadership as with bishops and deacons.

1Tim 5:11
But younger widows refuse (v $v \omega \tau \varepsilon \rho \alpha \varsigma \delta \varepsilon \chi \eta \rho \alpha \varsigma \pi \alpha \rho \alpha \iota \tau o v)$. Present middle imperative as in $4: 7$. "Beg off from." They lack experience as above and they have other ambitions.
 active subjunctive of $\kappa \alpha \tau \alpha \sigma \tau \rho \eta \nu I \alpha \omega$, late compound (only here and Ignatius), to feel the impulse of sexual desire, but simplex $\sigma \tau \rho \eta \nu \iota \omega \omega$ (Re 18:7,9). Souter renders it here "exercise youthful vigour against Christ" ( $\tau 0 \mathrm{X}$ X $\rho \sigma \tau \tau 0$, genitive case after ката in composition).

1Tim 5:12
Condemnation ( $\kappa \rho \mu \alpha)$. See 3:6.
They have rejected ( $\eta \theta \varepsilon \tau \eta \sigma \alpha v$ ). First aorist passive of $\alpha \theta \varepsilon \tau \varepsilon \omega$, late verb (first in LXX and Polybius), to reject, set aside (from $\alpha \theta \varepsilon$ тo¢). See 1 Th 4:8; Ga 2:21 .

Their first faith ( $\tau \eta v \pi \rho \omega \tau \eta \nu \pi \iota \sigma \tau \iota v$ ). "Their first pledge" (promise, contract) to Christ. It is like breaking the marriage contract. Evidently one of the pledges on joining the order of widows was not to marry. Parry suggests a kind of ordination as with deacons and bishops (technical use of крıца and $\pi \iota \sigma \tau \iota \varsigma)$.

1Tim 5:13
And withal ( $\alpha \mu \alpha \delta \varepsilon \kappa \alpha$ ). See Phm 1:22 for this very phrase, "and at the same time also." Such young enrolled widows have other perils also.

They learn to be idle ( $\alpha \rho \gamma \alpha \mu \alpha v \theta \alpha v o v \sigma \tau v$ ). There is no $\varepsilon เ v \alpha$ (to be) in the Greek. This very idiom without $\varepsilon v^{2} \alpha$ after $\mu \alpha v \theta \alpha v \omega$ occurs in Plato and Dio Chrysostom, though unusual. A $\rho \gamma \alpha$ (idle) is old adjective ( $\alpha$ privative and $\varepsilon \rho \gamma o v$, without work). See Mt 20:3; Tit 1:12 .

Going about ( $\pi \varepsilon \rho เ \varepsilon \rho \chi \circ \mu \varepsilon v \alpha)$. Present middle participle of $\pi \varepsilon \rho เ \varepsilon \rho \chi \circ \mu \alpha$, old compound verb. See Ac 19:13 of strollers.

From house to house (таৎ оккıळৎ). Literally "the houses, " "wandering around the houses." Vivid picture of idle tattlers and gossipers.

But tattlers also ( $\alpha \lambda \lambda \alpha \kappa \alpha \varphi \lambda v \alpha \rho o$ ). Old word from $\varphi \lambda \nu \omega$ (to boil up, to throw up bubbles, like blowing soap bubbles). Only here in N.T. $\Phi \lambda \cup a \rho \varepsilon \omega$ in 3Jo 1:10 only in N.T.

And busybodies ( $\kappa \alpha \pi \varepsilon \rho เ \varepsilon \rho \gamma$ ). Old word (from $\pi \varepsilon \rho \mathrm{l}, \varepsilon \rho \gamma \circ v$ ), busy about trifles to the neglect of important matters. In N.T. only here and Ac 19:19. See 2Th 3:11 for $\pi \varepsilon \rho เ \varepsilon \rho \gamma \alpha \zeta \rho \mu \alpha$.

Things which they ought not ( $\tau \alpha \mu \eta \delta \varepsilon o v \tau \alpha$ ). "The not necessary things," and, as a result, often harmful. See Tit 1:11 $\alpha \mu \eta \delta \varepsilon$ (which things are not necessary).

1Tim 5:14
I desire ( $\beta$ ou $\lambda_{\text {o }} \boldsymbol{\mu}$ ). See 2:8.
The younger widows ( $v \varepsilon \omega \tau \varepsilon p a \varsigma$ ). No article and no word for widows, though that is clearly the idea. N $\varepsilon \omega \tau \varepsilon \rho \alpha \varsigma$ is accusative of general reference with $\gamma \alpha \mu \varepsilon เ \nu$ (to marry) the object (present infinitive active) of $\beta$ ou ${ }^{\prime}$ о $\mu$.

Bear children ( $\tau \varepsilon \kappa v o \gamma o v \varepsilon เ v)$ ) A compound verb here only in N.T. and nowhere else save in Anthol. See $\tau \varepsilon \kappa v o \gamma o v i \alpha$ in 2:15.

Rule the household (окобєблотєıv). Late verb from оккобєблотпऽ (Mr 14:14), twice in the papyri, only here in N.T. Note that the wife is here put as ruler of the household, proper recognition of her influence, "new and improved position" (Liddon).

Occasion ( $\alpha \varphi \rho \rho \mu \eta \nu$ ). Old word ( $\alpha \pi \sigma, o \rho \mu \eta$ ), a base to rush from, Pauline use in 2Co 5:12; 11:12; Ga 5:13.

To the adversary ( $\tau \omega \alpha \nu \tau \iota \kappa \varepsilon \mu \varepsilon v \omega$ ). Dative case of the articular participle of $\alpha v \tau \iota \kappa \varepsilon \mu \alpha$, a Pauline idiom (Php 1:28).

Reviling ( $\lambda$ ot $\delta$ opıa¢). Old word (from $\lambda o \iota \delta o \rho \varepsilon \omega$ ), in N.T. only here and 1 Pe 3:9. Genitive case with $\chi$ apıv.

1Tim 5:15
Are turned aside ( $\varepsilon \xi \varepsilon \tau \rho \alpha \pi \eta \sigma \alpha v)$. Second aorist (effective) passive indicative of $\varepsilon \kappa \tau \rho \varepsilon \pi \omega$. See 1:6.

After Satan (o $\pi\llcorner\sigma \omega$ tov $\Sigma a \tau \alpha v \alpha$ ). "Behind Satan." Late use of o $\pi \iota \sigma \omega$ (behind) as a preposition. Used by Jesus of disciples coming behind (after) him (Mt 16:24).

1Tim 5:16
That believeth ( $\pi \iota \sigma \tau \eta$ ). "Believing woman."
Hath widows ( $\varepsilon \not \subset \varepsilon \chi \eta \rho a \varsigma$ ). The "any believing woman" is one of the household-rulers of verse 14. The "widows" here are the widows dependent on her and who are considered as candidates to be enrolled in the list.

Let her relieve them ( $\varepsilon \pi \alpha \rho \kappa \varepsilon \iota \tau \omega$ autaıc). For this verb (imperative present active) see verse 10 .

Let not be burdened ( $\mu \eta \beta \alpha \rho \varepsilon เ \sigma \theta \omega$ ). Present passive imperative (in prohibition $\mu \eta$ ) of $\beta \alpha \rho \varepsilon \omega$, old verb ( $\beta \alpha \rho \circ \varsigma$, burden), Pauline word (2Co 1:8).

That are widows indeed ( $\tau \alpha \iota \varsigma ~ o v \tau \omega \varsigma \chi \eta \rho \alpha \iota \varsigma)$. Dative case with $\varepsilon \pi \alpha \rho \kappa \varepsilon \sigma \eta$ (first aorist active subjunctive with $\iota v a$, final clause). See verse 3 for this use of ov $\tau \omega \varsigma$ with $\chi \eta \rho a ı$ "the qualified and enrolled widows." Cf. verse 9 .

1Tim 5:17
The elders that rule well (o $\kappa \alpha \lambda \omega \varsigma \pi \rho о \varepsilon \sigma \tau \omega \tau \varepsilon \varsigma \pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho o$ ). See verse 1 for ordinary sense of $\pi \rho \varepsilon \sigma \beta \nu \tau \varepsilon \rho$ с for "older man." But here of position in same sense as $\varepsilon \pi \iota \sigma \kappa о \pi о \varsigma ~(~$ 3:2) as in Tit 1:5 = $\varepsilon \pi \iota \sigma к о \pi о \varsigma ~ i n ~ v e r s e ~ 7 . ~ C f . ~ L u k e ' s ~ u s e ~ o f ~ \pi \rho \varepsilon \sigma ß \nu \tau \varepsilon \rho о \varsigma ~(A c ~ 20: 17) ~=~ P a u l ' s ~$ $\varepsilon \pi \iota \sigma к о \pi о и \varsigma ~(A c ~ 20: 28) . ~ П \rho о \varepsilon \sigma \tau \omega \tau \varepsilon \varsigma ~ i s ~ s e c o n d ~ p e r f e c t ~ a c t i v e ~ p a r t i c i p l e ~ o f ~ f \rho o เ \sigma \tau \eta \mu ~(i n t r a n s-~$ itive use) for which see 3:4.

Let be counted worthy ( $\alpha \xi_{\imath}$ worthy ( 2 Th 1:11). With genitive case here.

Of double honour ( $\delta \Delta \pi \lambda \eta \varsigma \tau \iota \mu \eta \varsigma)$. Old and common contract adjective ( $\delta i \pi \lambda o o \varsigma$, twofold, in opposition to $\alpha \pi \lambda o o \varsigma$, single fold). But why "of double honour"? See $6: 1$ for "of all honour." White suggests "remuneration" rather than "honour" for $\tau \mu \eta \varsigma$ (a common use for price or pay). Liddon proposes "honorarium" (both honour and pay and so "double"). Wetstein gives numerous examples of soldiers receiving double pay for unusual services. Some suggest twice the pay given the enrolled widows.

Especially those who labour in word and teaching ( $\mu \alpha \lambda \iota \sigma \tau \alpha$ о колı $\omega \nu \tau \varepsilon \varsigma \varepsilon \nu \lambda о \gamma \omega \kappa \alpha$ $\delta \iota \delta \alpha \sigma \kappa \alpha \lambda \iota \alpha)$. Either those who work hard or toil (usual meaning of котıа $\omega$, 2Ti 2:6) in preaching and teaching (most probable meaning. See verse 18) or those who teach and preach and not merely preside (a doubtful distinction in "elders" at this time). See Tit 1:8f . See both колı $\omega \omega$ and $\pi \rho o \iota \sigma \tau \alpha \mu \alpha$ used for same men (elders) in 1Th 5:12 and the use of котıа $\omega$ in 1Co 15:10; 16:16.

1Tim 5:18
Thou shalt not muzzle ( $o v \varphi \mu \omega \sigma \varepsilon \iota \varsigma)$. Prohibition by ov and future (volitive) indicative of $\varphi \not \mu \circ \omega$ (from $\varphi \mu \circ \varsigma$, muzzle), old word, quoted also in 1Co 9:9 as here from De 25:4, and for the same purpose, to show the preacher's right to pay for his work. See 1Co 9:9 for $\alpha \lambda o \omega v \tau \alpha$ ( when he treadeth out the corn ).
 occur in precisely this form in Lu 10:7. It appears also in Mt 10:10 with $\tau \eta \varsigma \tau \rho \circ \varphi \eta \varsigma$ (food) instead of tov $\mu \iota \sigma \theta \mathrm{ov}$. In 1Co 9:14 Paul has the sense of it and says: "so also the Lord ordained," clearly meaning that Jesus had so said. It only remains to tell whether Paul here is quoting an unwritten saying of Jesus as he did in Ac 20:35 or even the Gospel of Luke or Q (the Logia of Jesus). There is no way to decide this question. If Luke wrote his Gospel before A.D. 62 as is quite possible and Acts by A.D. 63, he could refer to the Gospel. It is not clear
whether Scripture is here meant to apply to this quotation from the Lord Jesus. For $\varepsilon \rho \gamma a \tau \eta s$ (labourer) see Php 3:2.

1Tim 5:19
Against an elder ( $\kappa \alpha \tau \alpha \pi \rho \varepsilon \sigma \beta \nu \tau \varepsilon \rho о v)$. In the official sense of verses 17 f .
Receive not ( $\mu \eta \pi \alpha \rho \alpha \delta \varepsilon \chi o v$ ). Present middle imperative with $\mu \eta$ (prohibition) of $\pi \alpha \rho \alpha \delta \varepsilon \chi о \mu \alpha$, to receive, to entertain. Old verb. See Ac 22:18 .

Accusation (катๆүорıav). Old word (from ка兀пүороৎ). In N.T. only here, Tit 1:6; Joh 18:29 in critical text.

Except ( $\varepsilon \kappa \tau о \varsigma \varepsilon \mu \eta$ ). For this double construction see 1Co 14:5; 15:2 .
At the mouth of $(\varepsilon \pi)$. Idiomatic use of $\varepsilon \pi$ (upon the basis of) as in 2Co 13:1.
1Tim 5:20
Them that $\sin$ ( $\tau 0 \cup \varsigma ~ a \mu \alpha \rho \tau \alpha v o v \tau \alpha \varsigma) . ~ T h e ~ e l d e r s ~ w h o ~ c o n t i n u e ~ t o ~ s i n ~(p r e s e n t ~ a c t i v e ~$ participle).

In the sight of all ( $\varepsilon v \omega \pi \iota \circ \tau \pi \alpha v \tau \omega v$ ). "In the eye of ( $o \varepsilon v o \pi \omega v$, the one who is in the eye of, then combined $=\varepsilon v \omega \pi \iota o v$ ) all" the elders (or even of the church). See next verse 21 and Ga 1:20. Public rebuke when a clear case, not promiscuous gossip.

May be in fear ( $\varphi o \beta o v \varepsilon \chi \omega \sigma v v$ ). Present active subjunctive with $1 v \alpha$ (final clause), "may keep on having fear" (of exposure). Possibly, "the rest of the elders."

1Tim 5:21
The elect angels ( $\tau \omega v \varepsilon \kappa \lambda \varepsilon \kappa \tau \omega v \alpha \gamma \gamma \varepsilon \lambda \omega v$ ). For this triad of God, Christ, angels, see Lu 9:26. "Elect" in the sense of the "holy" angels who kept their own principality (Jude 1:6) and who did not $\sin$ (2Pe 2:4). Paul shows his interest in angels in 1Co 4:9; 11:10 .

Observe ( $\varphi \cup \lambda \alpha \xi \eta \downharpoonright)$. First aorist active subjunctive of $\varphi \cup \lambda \alpha \sigma \sigma \omega$, to guard, to keep (Ro 2:26). Subfinal use of iva.
 beforehand), three times in the papyri, here only in N.T. "Without prejudgment."

By partiality ( $\kappa \alpha \tau \alpha \pi \rho \circ \sigma \kappa \lambda เ \sigma \iota v$ ). Late word from $\pi \rho \circ \sigma \kappa \lambda \iota v \omega$, to incline towards one (Ac 5:36), only here in N.T.

1Tim 5:22
Lay hands hastily ( $\chi \varepsilon ı \rho \alpha \varsigma \tau \alpha \chi \varepsilon \omega \varsigma \varepsilon \pi \iota \tau \iota \theta \varepsilon$ ). Present active imperative of $\varepsilon \pi \iota \tau 1 \theta \eta \mu$ in the sense of approval (ordination) as in Ac $6: 6 ; 13: 3$. But it is not clear whether it is the case of ministers just ordained as in 4:14 ( $\varepsilon \pi \iota \theta \varepsilon \sigma \iota \varsigma)$, or of warning against hasty ordination of untried men, or the recognition and restoration of deposed ministers (verse 20) as suits the context. The prohibition suits either situation, or both.

Be partakers of other men's sins (коเv $\omega v \varepsilon \alpha \mu \alpha \rho \tau \iota \alpha \iota \varsigma ~ \alpha \lambda \lambda о \tau \rho \iota \alpha \iota)$ ). Present active imperative of $\kappa o \iota v \omega v \varepsilon \omega$ (from $\kappa$ oıv $\omega v o \varsigma$, partner) with $\mu \eta$ in prohibition with associative instrumental case as in 2Jo 1:11; Ro 12:13. On $\alpha \lambda$ 入o o poo (belonging to another) see Ro 14:4

Keep thyself pure ( $\sigma \varepsilon \alpha \cup \tau o v ~ a \gamma v o v \tau \eta \rho \varepsilon$ ). "Keep on keeping thyself pure." Present active imperative of $\tau \eta \rho \varepsilon \omega$.

1Tim 5:23
Be no longer a drinker of water ( $\mu \eta \kappa \varepsilon \tau \sim \delta \rho о \pi о \tau \varepsilon$ ). Present active imperative (prohibition) of $v \delta \rho о \pi о \tau \varepsilon \omega$, old verb (from $\nu \delta \rho о \pi о \tau \eta \varsigma$, water drinker, $\nu \delta \omega \rho, \pi \imath v \omega$ ), here only in N.T. Not complete asceticism, but only the need of some wine urged in Timothy's peculiar physical condition (a sort of medical prescription for this case).

But use a little wine ( $\alpha \lambda \lambda \alpha \alpha \downarrow \nu \omega$ o $\lambda \iota \gamma \omega \chi \rho \omega$ ). Present middle imperative of $\chi \rho \alpha \circ \mu \alpha$ with instrumental case. The emphasis is on o $\lambda \iota \gamma \omega$ (a little).

For thy stomach's sake ( $\delta i \alpha$ tov $\sigma \tau o \mu \alpha \chi \circ v$ ). Old word from $\sigma \tau o \mu \alpha$ (mouth). In Homer throat, opening of the stomach (Aristotle), stomach in Plutarch. Here only in N.T. Our word "stomach."

Thine often infirmities ( $\tau \alpha \varsigma \pi \cup \kappa v a \varsigma ~ \sigma о v ~ \alpha \sigma \theta \varepsilon v \varepsilon เ a \varsigma) . ~ П \cup к v о \varsigma ~ i s ~ o l d ~ w o r d, ~ d e n s e, ~ f r e-~$ quent. In N.T. only here, Lu 5:33; Ac 24:26. AбӨعvelac = weaknesses, lack of strength (Ro 8:26 ). Timothy was clearly a semi-invalid.

1Tim 5:24
Evident ( $\pi \rho \circ \delta \eta \lambda o$ ). "Openly plain," "plain before all." Old word, in N.T. only here and Heb 7:24.

Going before unto judgment ( $\pi \rho \circ \alpha \gamma о v \sigma \alpha$ عıৎ крıбıv). See 1:18 for $\pi \rho \circ \alpha \gamma \omega$. The sins are so plain that they receive instant condemnation.

And some men also they follow after ( $\tau \iota \sigma \tau \nu \delta \varepsilon \kappa \varepsilon \pi \alpha \kappa о \lambda o u \theta$ ovoıv). Associative instrumental case $\tau \iota \sigma \iota v$ with $\varepsilon \pi \alpha \kappa 0 \lambda$ ou $\theta$ ovoıv for which verb see verse 10, "dog their steps" (Parry) like 1Pe 2:21, not clearly manifest at first, but come out plainly at last. How true that is of secret sins.

1Tim 5:25
Such as are otherwise ( $\tau \alpha \alpha \lambda \lambda \omega \varsigma \varepsilon \chi o v \tau \alpha$ ). "Those (deeds, $\varepsilon \rho \gamma \alpha)$ which have it otherwise." That is good deeds not clearly manifest.

Cannot be hid ( $\kappa \rho \cup \beta \eta \nu \alpha$ ov $\delta \nu v \alpha \nu \tau \alpha$ ). Second aorist passive infinitive of $\kappa \rho \cup \pi \tau \omega$. There is comfort here for modest preachers and other believers whose good deeds are not known and not blazoned forth. They will come out in the end. See Mt 5:14-16.

## 1 Timothy 6

1Tim 6:1
 masters (1Pe 2:18). For the slave problem, see also Phm 1; Col 3:22; Eph 6:5; Tit 2:9 . See Mt 11:29 for Christ's "yoke" (弓uүov, from Цعuүvv , to join).

 wider outlook. Old word only here, Tit 2:9; $2 \mathrm{Ti} 2: 21 ; 1 \mathrm{Pe} 2: 18$ for human masters. Applied to God in $\operatorname{Lu} 2: 29$; Ac 4:24,29 and to Christ in 2Pe 2:1 .

The name of God ( $\tau$ o ovoua tov $\theta$ rov). See Ro 2:24 . If the heathen could say that Christian slaves were not as dependable as non-Christian slaves. Negative purpose with iva $\mu \eta$ and present passive subjunctive ( $\beta \lambda \alpha \sigma \varphi \eta \mu \eta \tau \alpha$ ).

1Tim 6:2
Let not despise them ( $\mu \eta$ ката $\varphi \rho$ oveıt $\omega \sigma \alpha v$ ). Negative imperative active third plural of $\kappa \alpha \tau \alpha \varphi \rho o v \varepsilon \omega$, to think down on. See $4: 12$. He must not presume on the equality of Christian brotherhood not allowed by the state's laws. Some of these Christian slaves might be pastors of churches to which the master belonged. For the difficulty of the Christian master's position, see 1Co 7:22; Phm 1:16.

But rather ( $\alpha \lambda \lambda \alpha \mu \alpha \lambda \lambda o v$ ). Render the Christian Master better service.
They that partake of the benefit ( $о \tau \eta \varsigma \varepsilon v \varepsilon \rho \gamma \varepsilon \sigma i \alpha \varsigma ~ \alpha v \tau i \lambda \alpha \mu \beta \alpha v o \mu \varepsilon v o$ ). For $\varepsilon v \varepsilon \rho \gamma \varepsilon \sigma \iota \alpha \varsigma$ (genitive case after participle) see Ac 4:9, only other N.T. example of this old word. Present middle participle of $\alpha v \tau i \lambda \alpha \mu \beta \alpha v \omega$, old verb, to take in turn, to lay fast hold of, in N.T. only here, Lu 1:54; Ac 20:35.

1Tim 6:3
Teacheth a different doctrine ( $\varepsilon \tau \varepsilon \rho \circ \delta i \delta \alpha \sigma \kappa \alpha \lambda \varepsilon$ ). See 1:3 for this verb, present active indicative here in condition of first class.

Consenteth not ( $\mu \eta \pi \rho \circ \sigma \varepsilon \rho \chi \varepsilon \tau \alpha$ ). Also condition of first class with $\mu \eta$ instead of ov. Пробєрхона (old verb, to come to, to approach, with dative) is common enough in N.T. (Heb 4:16; 7:25 , etc.), but in the metaphorical sense of coming to one's ideas, assenting to, here only in N.T., but is so used in Philo and Irenaeus (Ellicott).

Sound words (vүıııouøıv $\lambda$ ojoıs). See 1:10 for vүıaıv.
The words of our Lord Jesus Christ ( $\tau \circ \iota \varsigma$ tov кvpıov $\eta \mu \omega v$ I $\eta \sigma o v$ X $\rho ı \sigma \tau o v$ ). Either subjective genitive (the words from the Lord Jesus, a collection of his sayings in Lock's opinion like 5:18; Ac 20:35, at least in the Spirit of Jesus as Ac 16:7; 1Co 11:23) or objective genitive about Jesus like 2Ti 1:8; 1Co 1:18 .

According to godliness ( $\kappa \alpha \tau \alpha \varepsilon v \sigma \varepsilon \beta \varepsilon \iota \alpha v)$. Promoting (designed for) godliness as in Tit 1:1.

1Tim 6:4
He is puffed up $(\tau \varepsilon \tau v \varphi \omega \tau \alpha)$. Perfect passive indicative of $\tau v \varphi \rho \omega$, for which see 3:6.
Knowing nothing ( $\mu \eta \delta \varepsilon v \varepsilon \pi \iota \sigma \tau \alpha \mu \varepsilon \nu \circ \varsigma)$. Present middle participle of $\varepsilon \pi \iota \sigma \tau \alpha \mu \alpha$. Ignorance is a frequent companion of conceit.

Doting ( $\nu \circ \sigma \omega v$ ). Present active participle of $\nu 0 \sigma \varepsilon \omega$, to be sick, to be morbid over, old word, only here in N.T.

Disputes of words ( $\lambda о \gamma о \mu \alpha \chi \iota \alpha \varsigma)$. Our "logomachy." From $\lambda о \gamma о \mu \alpha \chi \varepsilon \omega(2 T i 2: 14$ ), and that from $\lambda о \gamma o \varsigma$ and $\mu \alpha \chi o \mu \alpha$, to fight over words, late and rare word, here only in N.T. See Plato (Tim. 1085 F ) for "wars in words" ( $\mu \alpha \chi \propto \varsigma \varepsilon \vee \lambda$ оүoıৎ).

Whereof $(\varepsilon \xi \omega v)$. "From which things."
Surmisings (v $\pi \frac{1}{}$ only here in N.T. All these words are akin (envy, $\varphi \theta$ ovo $\varsigma$, strife, $\varepsilon \rho ı \varsigma$, railings or slanders, $\beta \lambda \alpha \sigma \varphi \eta \mu \iota \alpha)$, all products of an ignorant and conceited mind.

1Tim 6:5
Wranglings ( $\delta \iota \alpha \pi \alpha \rho \alpha \tau \rho ı \alpha)$. Late and rare (Clem. of Alex.) double compound ( $\delta \iota \alpha$, mutual or thorough, $\pi \alpha \rho a \tau \rho \_\beta$, irritations or rubbings alongside). "Mutual irritations" (Field).

Corrupted in mind ( $\delta \iota \varepsilon \varphi \theta \alpha \rho \mu \varepsilon \nu \omega \nu \tau o v \nu o v v)$. Perfect passive participle of $\delta \iota \alpha \varphi \theta \varepsilon \iota \rho \omega$, to corrupt, genitive case agreeing with $\alpha \nu \theta \rho \omega \pi \omega \nu$ (of men) and retaining the accusative $\tau$ vouv.

Bereft of the truth ( $\alpha \pi \varepsilon \sigma \tau \varepsilon \rho \eta \mu \varepsilon \nu \omega \nu \tau \eta \varsigma \alpha \lambda \eta \theta \varepsilon \iota \alpha \varsigma)$. Perfect passive participle of $\alpha \pi о \sigma \tau \varepsilon \rho \varepsilon \omega$, old verb (1Co 6:8) with the ablative case after it ( $\alpha \lambda \eta \theta \varepsilon \iota \alpha \varsigma)$.

A way of gain $(\pi o \rho \iota \sigma \mu \circ v)$. Late word from $\pi o \rho \iota \zeta \omega$, to provide, to gain. Only here in N.T. "Rich Christians." Predicate accusative with $\varepsilon เ v a$ (indirect assertion) in apposition with $\varepsilon v \sigma \varepsilon \beta \varepsilon \iota \alpha \nu$, the accusative of general reference.

1Tim 6:6
With contentment ( $\mu \varepsilon \tau \alpha \alpha v \tau \alpha \rho \kappa \varepsilon เ \alpha \varsigma)$. Old word from $\alpha \cup \tau \alpha \rho \kappa \eta \varsigma$ ( $\alpha \cup \tau о \sigma, \alpha \rho \kappa \varepsilon \omega$ ) as in Php 4:11. In N.T. only here and 2Co 9:8. This attitude of mind is Paul's conception of "great gain."

1Tim 6:7
Brought into ( $\varepsilon เ \sigma \eta \nu \varepsilon \gamma \kappa \alpha \mu \varepsilon \nu$, second aorist active stem with first aorist ending, common in the Koine),
carry out ( $\varepsilon \xi \varepsilon v \varepsilon \gamma \kappa \varepsilon เ v$, second aorist active infinitive). Note play on the prepositions $\varepsilon \iota \sigma-$ and $\varepsilon \xi$-.

1Tim 6:8
Food ( $\delta \iota \alpha \tau \rho о \varphi \alpha \varsigma)$. Plural, supports or nourishments (from $\delta \iota \alpha \tau \rho \varepsilon \varphi \omega$, to support). Old word, here only in N.T.

Covering ( $\sigma \kappa \varepsilon \pi \alpha \sigma \mu \alpha \tau \alpha)$. Plural, "coverings." Late word from $\sigma \kappa \varepsilon \pi \alpha \zeta \omega$, to cover. Here only in N.T.

We shall be content ( $\alpha \rho \kappa \varepsilon \sigma \theta \eta \sigma \sigma \mu \varepsilon \theta \alpha$ ). First future passive of $\alpha \rho \kappa \varepsilon \omega$, to be content. Old word. See 2Co 12:9. This is the autаркєı of verse 6 .

There with ( $\tau$ оитot¢). Associative instrumental case, "with these."
1Tim 6:9
Desire to be rich ( $\beta o v \lambda o \mu \varepsilon v o ~ \pi \lambda o v \tau \varepsilon เ v)$. The will ( $\beta o v \lambda o \mu \alpha)$ to be rich at any cost and in haste (Pr 28:20). Some MSS. have "trust in riches" in Mr 10:24 . Possibly Paul still has teachers and preachers in mind.

Fall into ( $\varepsilon \mu \pi \iota \pi \tau 0 v \sigma \iota v \varepsilon ı \varsigma)$. See on 3:6 for $\varepsilon v--\varepsilon ı \varsigma$ and 3:7 for $\pi \alpha \gamma ı \delta \alpha$ (snare).
Foolish (avoŋtovc). See Ga 3:1,3.
Hurtful ( $\beta \lambda \alpha \beta \varepsilon \rho \alpha \varsigma)$. Old adjective from $\beta \lambda \alpha \pi \tau \omega$, to injure, here alone in N.T.
Drown ( $\beta \cup \theta_{\iota}$ ¢ouøvv). Late word (literary Koine) from $\beta v \theta$ oc (bottom), to drag to the bottom. In N.T. only here and Lu 5:7 (of the boat). Drown in the lusts with the issue "in destruction and perdition" ( $\varepsilon \varsigma \varsigma 0 \lambda \varepsilon \theta \rho \circ \nu ~ \kappa \alpha ~ \alpha \pi \omega \lambda \varepsilon ı \alpha v)$. Not annihilation, but eternal punishment. The combination only here, but for o $\lambda \varepsilon \theta \rho o \varsigma$, see 1 Th $5: 3$; 2Th 1:9; 1Co $5: 5$ and for $\alpha \pi \omega \lambda \varepsilon ı \alpha$, see 2Th 2:3; Php 3:19.

1Tim 6:10
The love of money ( $\eta \varphi i \lambda \alpha \rho \gamma v \rho ı)$. Vulgate, avaritia. Common word (from $\varphi\rangle \lambda \alpha \rho \gamma v \rho o \varsigma$, $2 \mathrm{Ti} 3: 12$, and that from $\varphi \lambda \lambda o \sigma, \alpha \rho \gamma \cup \rho o s)$, only here in N.T. Refers to verse 9 ( $\beta o u \lambda o \mu \varepsilon v o$ $\pi \lambda$ outeıv).

A root of all kinds of evil ( $\rho \iota \zeta \alpha \pi \alpha \nu \tau \omega v \tau \omega \nu \kappa \alpha \kappa \omega v)$. A root ( $\rho(\zeta \alpha)$. Old word, common in literal (Mt 3:10) and metaphorical sense (Ro 11:11-18). Field (Ot. Norv.) argues for "the root" as the idea of this predicate without saying that it is the only root. Undoubtedly a
 $\mu \eta \tau \rho о \pi о \lambda \iota \nu \pi \alpha \nu \tau \omega v \tau \omega v \kappa \alpha \kappa \omega v$ ), where "metropolis" takes the place of "root." Surely men today need no proof of the fact that men and women will commit any sin or crime for money.

Reaching after ( $о \rho \varepsilon \gamma о \mu \varepsilon v o$ ). Present middle participle of $о \rho \varepsilon \gamma \omega$ (see 3:1) with genitive $\eta \varsigma$ (which).

Have been led astray ( $\alpha \pi \varepsilon \pi \lambda \alpha v \eta \theta \eta \sigma \alpha v$ ). First aorist passive indicative of $\alpha \pi o \pi \lambda \alpha v \alpha \omega$, old compound verb, in N.T. only here and Mr 13:22 .

Have pierced themselves through ( $\varepsilon \alpha \cup \tau \circ \cup \varsigma ~ \pi \varepsilon \rho ı \varepsilon \pi \varepsilon เ \rho a v)$ ). First aorist active (with reflexive pronoun) of late compound $\pi \varepsilon \rho \iota \pi \varepsilon \rho \omega$, only here in N.T. Perfective use of $\pi \varepsilon \rho$ (around, completely to pierce).
 grief). In N.T. only here and Ro 9:2 .

1Tim 6:11

O man of God ( $\omega$ av $\theta \rho \omega \pi \varepsilon \theta \varepsilon o v$ ). In N.T. only here and 2Ti 3:17, there general and here personal appeal to Timothy. Cf. De 33:1; 1Sa 2:27.

Flee ( $\varphi \varepsilon \cup \gamma \varepsilon$ ),
follow after ( $\delta \omega \kappa \kappa$ ). Vivid verbs in present active imperative. The preacher can not afford to parley with such temptations.

Meekness ( $\pi \rho \alpha \cup \pi \alpha \theta \iota \alpha v$ ). Late compound from $\pi \rho \alpha \cup \pi \alpha \theta \eta \varsigma$, in Philo about Abraham, here only in N.T.

1Tim 6:12
Fight the good fight ( $\alpha \gamma \omega v \zeta_{00}$ रov $\kappa \alpha \lambda \circ v \alpha \gamma \omega v \alpha$ ). Cognate accusative with present middle imperative of $\alpha \gamma \omega v \iota \zeta \omega$, Pauline word (1Co 9:25; Col 1:29).

Lay hold on ( $\varepsilon \pi \iota \lambda \alpha \beta o v)$. Second (ingressive) aorist middle imperative of $\varepsilon \pi \lambda \lambda \alpha \mu \beta \alpha v \omega$, "get a grip on." See same verb with genitive also in verse 19.

Thou wast called ( $\varepsilon \kappa \lambda \eta \eta \eta \varsigma$ ). First aorist passive of $\kappa \alpha \lambda \varepsilon \omega$ as in 1Co 1:9; Col 3:15.
 (first aorist active indicative of opo $\lambda о \gamma \varepsilon \omega$, the public confession in baptism which many witnessed. See it also in verse 13 of Jesus.

1Tim 6:13
Who quickeneth all things ( $\tau 0 v \zeta \omega 0 \gamma 0 v o u v \tau o \varsigma \tau \alpha \pi \alpha \nu \tau \alpha$ ). Present active participle of $\zeta \omega \circ \gamma 0 v \varepsilon \omega(\zeta \omega \circ \gamma \circ v o \varsigma$, from $\zeta \omega 0 \sigma, \gamma \varepsilon v \omega)$, late word to give life, to bring forth alive, in N.T. only here and Ac 7:19. See 1Sa 2:6.

Before Pontius Pilate ( $\varepsilon \pi$ Поvтıо Пєı入атоv). Not "in the time of," but "in the presence of."

Witnessed ( $\mu \alpha \rho \tau v \rho \eta \sigma \alpha v \tau о \varsigma)$. Note $\mu \alpha \rho \tau \cup \rho \varepsilon \omega$, not о $\mu о \lambda о \gamma \varepsilon \omega$ as in verse 12. Christ gave his evidence as a witness to the Kingdom of God. Evidently Paul knew some of the facts that appear in Joh 18.

1Tim 6:14
That thou keep ( $\tau \eta \rho \eta \sigma \alpha \sigma \varepsilon$ ). First aorist active infinitive of $\tau \eta \rho \varepsilon \omega$, with accusative of general reference ( $\sigma \varepsilon$ ) in indirect command after $\pi \alpha \rho \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$.

Without spot ( $\alpha \sigma \pi \iota \lambda o v$ ). Late adjective ( $\alpha$ privative, $\sigma \pi \lambda \lambda o \varsigma$, spot, Eph 5:27 ). In inscription and papyri.

Without reproach ( $\alpha v \varepsilon \pi i \lambda \eta \mu \pi \tau o v$ ). See 3:2; 5:7 .
Until the appearing ( $\mu \varepsilon \chi \rho \tau \eta \varsigma \varepsilon \pi \iota \varphi a v \varepsilon \iota \propto \varsigma)$. "Until the epiphany" (the second epiphany or coming of Christ). Late word in inscriptions for important event like the epiphany of Caligula, in the papyri as a medical term. In 2Th 2:18 we have both $\varepsilon \pi \iota \varphi a v \varepsilon \iota \alpha$ and $\pi \alpha \rho o v \sigma \iota \alpha$. See Tit 2:13; 2Ti 1:10; 4:1,8 .

1Tim 6:15
In its own times (кaıpoıc ıঠıoヶ). Locative case. May be "in his own times." See 2:6. Clearly not for us to figure out.
 and alone Potentate." $\Delta v v a \sigma \tau \eta \varsigma$, old word, in N.T. only here, Lu 1:52; Ac 8:27 (the Eunuch). See 1:11 for $\mu$ ккароб.

The King of kings (o $\beta \alpha \sigma i \lambda \varepsilon v \varsigma ~ \tau \omega v \beta a \sigma i \lambda \varepsilon v o v \tau \omega v)$ ). "The King of those who rule as kings." Oriental title. So with "Lord of lords." See Re 10:16.

1Tim 6:16
Who only hath immortality (o $\mu \circ v o \varsigma \varepsilon \chi \omega v \alpha \theta \alpha v a \sigma \iota \alpha v$ ). "The one who alone has immortality." AӨavaøıa (aӨavatos, a privative and $\operatorname{\theta ava\tau o\varsigma ),~old~word,~in~N.T.~only~here~and~}$ 1Co 15:53f. Domitian demanded that he be addressed as "Dominus et Deus noster." Emperor worship may be behind the use of $\mu$ ovos (alone) here.

Unapproachable ( $\alpha \pi \rho o \sigma \iota \tau o v$ ). See Ps 104:2 . Late compound verbal adjective ( $\alpha$ privative, $\pi \rho \circ \sigma, ~ เ \varepsilon v a$, to go). Here only in N.T. Literary Koine word.

Nor can see (ou $\delta \varepsilon$ ı $\delta \varepsilon$ sv $\delta u v a \tau \alpha$ ). See aopatov in Col 1:15 and also Joh 1:18; Mt 11:27 . The "amen" marks the close of the doxology as in 1:17.

1Tim 6:17
In this present world ( $\varepsilon v \tau \omega v v v \alpha 1 \omega v$ ). "In the now age," in contrast with the future.
That they be not high-minded ( $\mu \eta \cup \psi \eta \lambda о \varphi \rho o v \varepsilon เ v$ ). Present active infinitive with negative in indirect command after $\pi \alpha \rho \alpha \gamma \gamma \varepsilon \lambda \lambda \varepsilon$, "not to be high-minded." Only instance of the word save some MSS. of Ro 11:20 (for $\mu \eta \nu \psi \eta \lambda \alpha \varphi \rho \circ \nu \varepsilon$ ) and a scholion on Pindar.

Have their hope set ( $\eta \lambda \pi \iota \kappa \varepsilon v \alpha)$. Perfect active infinitive of $\varepsilon \lambda \pi \iota \zeta \omega$.
 only here in N.T. A "vigorous oxymoron" (White). Cf. Ro 6:4 . Riches have wings.

But on God ( $\alpha \lambda \lambda^{\prime} \varepsilon \pi \theta \varepsilon \omega$ ). He alone is stable, not wealth.
Richly all things to enjoy ( $\pi \alpha \nu \tau \alpha \pi \lambda о v \sigma \omega \varsigma \varepsilon \iota \varsigma \alpha \pi \sigma \lambda \alpha v \sigma เ v$ ). "A lavish emphasis to the generosity of God" (Parry). A $\pi$ о $\alpha \alpha v \sigma \iota s$ is old word from $\alpha \pi \rho \lambda \alpha v \omega$, to enjoy, in N.T. only here and Heb 11:25.

1Tim 6:18
That they do good ( $\alpha \gamma \alpha \theta o \varepsilon \rho \gamma \varepsilon เ v$ ). Late word ( $\alpha \gamma \alpha \theta$ oc, $\varepsilon \rho \gamma \omega$ ), in N.T. only here and Ac 14:17.
 Mt 6:19f. for "treasures in heaven."

Ready to distribute ( $\varepsilon \cup \mu \varepsilon \tau \alpha \delta o \tau o v \varsigma)$. Late and rare verbal ( $\varepsilon v, \mu \varepsilon \tau \alpha, \delta \iota \delta \omega \mu$ ). Free to give, liberal. Only here in N.T.

Willing to communicate (коเ $\omega \omega v$ кооч). Old adjective, ready to share, gracious, liberal again. Only here in N.T. See Ga 6:6; Php 4:15.

1Tim 6:19
 here in N.T. Same paradox as in Mt 6:19f. , "laying up in store" by giving it away.

Which is life indeed ( $\tau \eta \varsigma o v \tau \omega \varsigma \zeta \omega \eta \varsigma$ ). See 5:3 for ov $\tau \omega \varsigma$. This life is merely the shadow of the eternal reality to come.

1Tim 6:20
Guard that which is committed unto thee ( $\tau \eta \nu \pi \alpha \rho \alpha \theta \eta \kappa \eta \nu \varphi \cup \lambda \alpha \xi o v$ ). "Keep (aorist of urgency) the deposit." Пар $\alpha \theta \eta \kappa \eta \nu$ (from $\pi \alpha \rho \alpha \tau \iota \theta \eta \mu$, to place beside as a deposit, 2 Ti 2:2 ), a banking figure, common in the papyri in this sense for the Attic тараката $Ө \eta \kappa \eta$ (Textus Receptus here, 2Ti 1:12,14 ). See substantive also in 2Ti 1:12,14.

Turning away from ( $\varepsilon \kappa \tau \rho \varepsilon \pi о \mu \varepsilon v o \varsigma)$. Present middle participle of $\varepsilon \kappa \tau \rho \varepsilon \pi \omega$, for which see 1:6; 5:15.

Babblings ( $\kappa \varepsilon v \circ \varphi \omega v / a \varsigma)$. From кعvo $\varphi \omega v o \varsigma$, uttering emptiness. Late and rare compound, in N.T. only here and 2Ti 2:16.

Oppositions ( $\alpha v \tau \iota \theta \varepsilon \sigma \varepsilon \iota \varsigma)$. Old word ( $\alpha \nu \tau \iota, \theta \varepsilon \sigma \iota \varsigma$ ), antithesis, only here in N.T.
Of the knowledge which is falsely so called ( $\tau \eta \varsigma \psi \varepsilon v \delta \omega v v \mu \circ v \gamma \nu \omega \sigma \varepsilon \omega \varsigma)$. "Of the falsely named knowledge." Old word ( $\psi \varepsilon \cup \delta \eta \sigma$, ovo $\mu \alpha$ ). Our "pseudonymous." Only here in N.T.

1Tim 6:21
Have erred ( $\eta \sigma \tau 0 \chi \eta \sigma \alpha v$ ). First aorist active indicative of $\alpha \sigma \tau 0 \chi \varepsilon \omega$. See 1:6 for this word.

## SECOND TIMOTHY

FROM ROME

PROBABLY EARLY AUTUMN OF 67 OR SPRING OF 68

## 2 Timothy 1

2Tim 1:1
According to the promise of the life which is in Christ Jesus ( $\kappa \alpha \tau^{\prime} \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \iota \alpha \nu \zeta \omega \eta \varsigma$ $\tau \eta \varsigma \varepsilon v$ X $\rho \iota \sigma \tau \omega$ I $\eta \sigma o v)$. "With a view to the fulfilment of the promise." See Tit 1:1 for this same use of ката. For кат' غлаүүघ入ıav see Ga 3:29. See 1Ti 4:8 for the phrase "promise of life." Here or there "life that in Christ Jesus" includes the present as well as the future.

2Tim 1:2
Beloved ( $\alpha \gamma \alpha \pi \eta \tau 0$ ). Instead of $\gamma \nu \eta \sigma \omega \omega$ (genuine) in 1Ti 1:2. He had already called Timothy $\alpha \gamma \alpha \pi \eta \tau$ ov (verbal adjective of $\alpha \gamma \alpha \pi \alpha \omega$ ) in 1Co 4:17, an incidental and strong proof that it is Paul who is writing here. This argument applies to each of the Pastorals for Paul is known by other sources (Acts and previous Pauline Epistles) to sustain precisely the affectionate relation toward Timothy and Titus shown in the Pastorals.

2Tim 1:3
I thank ( $\chi \alpha \rho ı v \varepsilon \chi \omega$ ). "I have gratitude." As in 1Ti 1:12 . Robinson cites examples of this phrase from the papyri. It occurs also in Lu 17:9; Ac 2:47. Xapıs in doxologies Paul uses (1Co 15:57; 2:14; 8:16; 9:15; Ro 6:17; 7:25). His usual idiom is $\varepsilon \cup \chi \alpha \rho ı \sigma \tau \omega ~(1 C o ~ 1: 4 ; ~ R o ~ 1: 8 ; ~$ Phm 1:4; Php 1:3 ) or $\varepsilon v \chi \alpha \rho \iota \sigma \tau o v \mu \varepsilon v ~(1 T h ~ 1: 2 ; ~ C o l ~ 1: 3) ~ o r ~ o v ~ \pi \alpha v o \mu \alpha ~ \varepsilon v \chi \alpha \rho ı \sigma \tau \omega v ~(E p h ~$ 1:16 ) or عuरарıбтєı орءı入оцєv (2Th 1:3).

Whom I serve from my forefathers ( $\omega \lambda \alpha \tau \rho \varepsilon v \omega \alpha \pi \sigma \pi \rho \circ \gamma o v \omega v$ ). The relative $\omega$ is the dative case with $\lambda \alpha \tau \rho \varepsilon v \omega$ (see Ro 1:9 for this verb), progressive present (I have been serving). For $\pi \rho \circ \gamma o v \omega v$ (forefathers) see 1Ti 5:4. Paul claims a pious ancestry as in Ac 24:14; Ac 26:5; Ga 2:14; Php 3:4-7.

In a pure conscience ( $\varepsilon v \kappa \alpha \theta \alpha \rho \alpha \sigma v v \varepsilon \delta \eta \eta \sigma \varepsilon)$. See 1Ti 1:5; Ac 23:1.
Unceasing ( $\alpha \delta \iota \alpha \lambda \varepsilon ı \pi \tau o v)$. Late and rare compound, in N.T. only here and Ro $9: 2$ which see. The adverb $\alpha \delta_{ı} \alpha \lambda \varepsilon ı \pi \tau \omega \varsigma$ is more frequent (in the papyri, literary Koine, 1Th 1:2; Ro 1:9 ). The adjective here is the predicate accusative, "how I hold the memory concerning thee unceasing." The use of $\alpha \delta \iota \alpha \lambda \varepsilon ı \pi \tau \omega \varsigma$ (adverb) is a sort of epistolary formula (papyri, 1Th 1:2; 2:13; 5:17; Ro 1:9).

Remembrance ( $\mu v \varepsilon \iota \alpha v$ ). Old word, in N.T. only Pauline (seven times, 1Th 1:2; Ro 1:9; Php 1:3).

2Tim 1:4
Night and day (vuктоৎ $\kappa \alpha \eta \mu \varepsilon \rho \alpha \varsigma)$. Genitive of time, "by night and by day." As in 1Th 2:9; 3:10 .

Longing ( $\varepsilon \pi \iota \pi \circ \theta \omega v$ ). Present active participle of $\varepsilon \pi \iota \pi o \theta \varepsilon \omega$, old word, eight times in Paul (1Th 3:6; Php 1:8, etc.).

Remembering thy tears ( $\mu \varepsilon \mu \nu \eta \mu \varepsilon v o \varsigma ~ \sigma o v ~ \tau \omega v \delta \alpha \kappa \rho \nu \omega v$ ). Perfect middle participle of $\mu \mu \nu \eta \sigma \kappa \omega$, old and common verb with the genitive, only here in the Pastorals and elsewhere
by Paul only in 1Co 11:2 . Probably an allusion to the scene at Miletus (Ac 20:37 ). Cf. Ac 20:19.

That I may be filled with joy (ıv $\chi \chi \rho \alpha \varsigma \pi \lambda \eta \rho \omega \theta \omega$ ). Final clause with $\tau v \alpha$ and first aorist passive subjunctive of $\pi \lambda \eta \rho o \omega$ (with genitive case $\chi \alpha \rho \alpha \varsigma$ ), a verb common with Paul (Ro 8:4; 13:8).

2Tim 1:5
Having been reminded (v $\tau \circ \mu \nu \eta \sigma \nu \lambda \alpha \beta \omega \nu$ ). "Having received (second aorist active participle of $\lambda \alpha \mu \beta \alpha \nu \omega$ ) a reminder" (old word from $v \pi о \mu \mu \nu \eta \sigma \kappa \omega$, to remind, in N.T. only here and 1Pe 1:13 ). For the idiom see Ro 7:8,11. A reminder by another while $\alpha v a \mu \nu \eta \sigma \iota$ remembrance (1Co 11:24f. ) is rather a recalling by oneself (Vincent).

Of the unfeigned faith ( $\tau \eta \varsigma \alpha \nu v \pi о \kappa \rho \iota \tau 0 v \pi \iota \sigma \tau \varepsilon \omega \varsigma$ ). Late compound for which see 2 Co 6:6; Ro 12:9.

Dwelt ( $\varepsilon \nu \omega \iota \kappa \eta \sigma \varepsilon \nu)$. First aorist active indicative of $\varepsilon v o \iota \kappa \varepsilon \omega$, old verb, in N.T. only in Paul (Ro 8:11; Col 3:16 ).

First ( $\pi \rho \omega \tau \sigma \nu$ ). Adverb, not adjective ( $\pi \rho \omega \tau \eta$ ).
In thy grandmother Lois ( $\varepsilon \nu \tau \eta \mu \alpha \mu \mu \eta \Lambda \omega \mathrm{I} \delta)$. Old word, originally the infantile word for $\mu \eta \tau \eta \rho$ (mother), then extended by writers to grandmother as here. Common for grandmother in the papyri. Lois is the mother of Eunice, Timothy's mother, since Timothy's father was a Greek (Ac 16:1). Probably both grandmother and mother became Christians.

I am persuaded $(\pi \varepsilon \pi \varepsilon \iota \sigma \mu \alpha)$. Perfect passive indicative of $\pi \varepsilon \iota \theta \omega$, "I stand persuaded." In the Pastorals only here and verse 12, common in Paul's other writings (Ro 8:38, etc.).

2Tim 1:6
For the which cause ( $\delta \iota^{\prime} \eta \nu \alpha \iota \tau \iota \alpha v$ ). "For which cause," stronger than $\delta ı$. So in verse 12; Tit 1:13. Only example of aı兀ıa by Paul save in Ac 28:20 .

I put thee in remembrance $(\alpha \nu \alpha \mu \mu \nu \eta \sigma \kappa \omega)$. Old compound to remind (1Co 4:17; 2Co 7:15 ).

That thou stir up ( $\sigma \varepsilon \alpha v \alpha \zeta \omega \pi v \rho \varepsilon \iota v$ ). Present active infinitive of $\alpha v \alpha \zeta \omega \pi v \rho \varepsilon \omega$, old double compound ( $\alpha \nu \alpha$ and $\zeta \omega \pi \nu \rho o v$, live coal, $\zeta \omega \circ \varsigma$ and $\pi \nu \rho$, then the bellows for kindling), to rekindle, to stir into flame, to keep blazing (continuous action, present time), only here in N.T. See 1Th 5:19 for the figure of fire concerning the Holy Spirit. See avart $\omega$ in Lu 12:49

The gift of God ( $\tau 0 \chi \alpha \rho \iota \sigma \alpha$ tov $\theta \varepsilon o v$ ). See $1 \mathrm{Ti} 4: 14$. Here Paul says $\mu 0 v$ (my), there he mentions the presbytery. Paul felt a deep personal interest in Timothy. See 1Co 7:7; Ro 6:23; 11:29 for the gift of God.

2Tim 1:7
A spirit of fearfulness ( $\pi v \varepsilon v \mu \alpha \delta \varepsilon \iota \lambda ı \alpha \varsigma)$. Here $\pi \nu \varepsilon v \mu \alpha$ is the $\chi \alpha \rho ı \sigma \mu \alpha$ of verse 6 , the human spirit as endowed by the Holy Spirit (Ro 8:15 ). $\Delta \varepsilon \iota \lambda \iota \alpha$ is an old word ( $\delta \varepsilon \iota \lambda o \sigma, \delta \varepsilon \iota \delta \omega$ ) and always in a bad sense of cowardice, only here in N.T.

Of power ( $\delta v \nu \alpha \mu \varepsilon \omega \varsigma)$. One of Paul's characteristic words (Ro 1:16).
Of love ( $\alpha \nmid \alpha \pi \eta \varsigma)$. One of the gifts of the Spirit (Ga 5:22). "Which drives out fear" (Lock) as in 1Jo 4:18.

Of discipline $(\sigma \omega \varphi \rho o v ı \sigma \mu \circ v)$. Late Koine word (from $\sigma \omega \varphi \rho o \nu \iota \zeta \omega$, to control), selfcontrol, here only in N.T. See 1Ti 2:9 for $\sigma \omega \varphi \rho o \sigma v \nu \eta$.

2Tim 1:8
Be not ashamed of ( $\mu \eta \varepsilon \pi \alpha \iota \sigma \chi \cup \vee \theta \eta \iota \varsigma$ ). First aorist (ingressive) passive subjunctive (in prohibition) of $\varepsilon \pi \alpha \iota \sigma \chi \cup v o \mu \alpha$, old word, to be ashamed. Again in verse 16 without augment $(\varepsilon \pi \alpha \iota \sigma \chi \cup v \theta \eta v)$, transitive use of the passive voice as often in the Koine (Robertson, Grammar, p. 818). See Ro 1:16; 6:21. "Do not become ashamed" (as he had not).

The testimony of our Lord ( $\tau \circ \mu \alpha \rho \tau v \rho \iota v \tau o v ~ к v \rho ı v)$. For the old word $\mu \alpha \rho \tau v \rho \iota o v$ see 1Co 1:6; 2:1. Paul probably has in mind the saying of Jesus preserved in Mr 8:38 (Lu 9:26 ). See also 2:12.

His prisoner ( $\tau 0 v \delta \varepsilon \sigma \mu \circ v$ avtov). As in Php 1:12; Phm 1:1,9; Eph 3:1; $4: 1$ (the first Roman captivity). Paul is in his last captivity and refers to it again in verse 16; 2:9.

Suffer hardship with ( $\sigma v \vee \kappa \alpha \kappa о \pi \alpha Ө \eta \sigma o v$ ). First aorist active imperative of the double compound $\sigma v v \kappa \alpha \kappa \pi \alpha \theta \varepsilon \omega$, first known use and in N.T. only here and 2:3 (in eccles. writers). But какот $\boldsymbol{\sigma} \varepsilon \varepsilon \omega$, to suffer evil, is old verb (2:9; 4:5 ). Paul is fond of compounds of $\sigma u v$. Paul challenges Timothy by this verb which he apparently coins for the purpose to a joint ( $\sigma v v$ ) suffering with the Lord Jesus and Paul "for the gospel" ( $\tau \omega \varepsilon v \alpha \gamma \gamma \varepsilon \lambda ı \omega$, dative case rather than associative instrumental "with").

According to the power of God ( $\kappa \alpha \tau \alpha \delta \nu v a \mu \iota \nu \varepsilon \varepsilon \circ v)$. Given by God (2Co 6:7 ).
2Tim 1:9
Called us with a holy calling ( $\kappa \alpha \lambda \varepsilon \sigma \alpha v \tau \sigma \varsigma \kappa \lambda \eta \sigma \varepsilon \alpha \gamma \iota \alpha)$. Probably dative, "to a holy calling." K $\boldsymbol{\eta}$ бıя here apparently not the invitation, but the consecrated service, "the upward calling" (Php 3:14 ). See 1Co 7:20; Eph 4:1,4 for the use of $\kappa \alpha \lambda \varepsilon \omega$ with $\kappa \lambda \eta \sigma \iota$. Paul often uses кал $\varepsilon \omega$ of God's calling men (1Th 2:12; 1Co 1:9; Ga 1:6; Ro 8:20; 9:11 ).

Purpose ( $\pi \rho \circ \theta \varepsilon \sigma \iota v$ ). See Ro 9:11; Eph 1:11 for $\pi \rho o \theta \varepsilon \sigma \iota v$.
Which was given ( $\tau \eta v \delta o \theta \varepsilon \iota \sigma \alpha v$ ). First aorist passive articular participle agreeing with $\chi \alpha \rho ı \varsigma$ (grace), a thoroughly Pauline expression (1Co 3:10; Ro 12:3,6, etc.), only here in Pastoral Epistles.

Before times eternal ( $\pi \rho \circ \chi \rho o v \omega v \alpha \iota \omega v \iota \omega v$ ). See Tit 1:2 .
2Tim 1:10
But hath now been manifested ( $\varphi \alpha \nu \varepsilon \rho \omega \theta \varepsilon I \sigma \alpha \nu \delta \varepsilon \nu v \nu$ ). First aorist passive participle of $\varphi \alpha v \varepsilon \rho \circ \omega$ agreeing with $\chi \alpha \rho \iota$. See Tit 1:3; Col 1:26; 3:4 for $\varphi \alpha v \varepsilon \rho o \omega$ and the contrast made.

By the appearing ( $\delta \iota \alpha \tau \eta \varsigma \varepsilon \pi \iota \varphi \alpha v \varepsilon \iota \alpha \varsigma)$. Only here of the Incarnation (except the verb, Tit 2:11; 3:4 ), but for the second coming see Tit 2:13.

Who abolished death (катарүףбаvтоц $\mu \varepsilon v$ тov $\theta \alpha v a \tau о v)$. First aorist active participle of катарүع $\omega$, the very phrase in 1Co 15:26; Heb 2:14.

Brought to light ( $\varphi \omega \tau \iota \sigma \alpha \nu \tau o \varsigma \delta \varepsilon$ ). First aorist active participle of $\varphi \omega \tau \iota \zeta \omega$, literary Koine word for which see 1Co 4:5; Eph 1:18, to turn the light on.

Life and incorruption ( $\zeta \omega \eta \nu \kappa \alpha \alpha \varphi \theta \alpha \rho \sigma \iota \alpha \nu$ ). The opposite of $\theta a v a \tau o \varsigma$, "life and immortality" (unchangeable life).

2Tim 1:11
For which ( $\varepsilon ı \varsigma$ o). For the gospel. See 1Ti 2:7 for this verse.
2Tim 1:12
These things ( $\tau \alpha \cup \tau \alpha)$. His imprisonment in Rome.
Yet I am not ashamed ( $\alpha \lambda \lambda^{\prime}$ оик $\varepsilon \pi \alpha \iota \sigma \chi \cup v o \mu \alpha$ ). Plain reference to the exhortation to Timothy in verse 8.

Him whom I have believed ( $\omega \pi \varepsilon \pi \_\sigma \tau \varepsilon \cup \kappa \alpha$ ). Dative case of the relative ( $\omega$ ) with the perfect active of $\pi / \sigma \tau \varepsilon v \omega$, the antecedent to the relative not expressed. It is not an indirect question. Paul knows Jesus Christ whom he has trusted.

I am persuaded ( $\pi \varepsilon \pi \varepsilon เ \sigma \mu \alpha)$. See verse 5 .
To guard ( $\varphi \cup \lambda \alpha \xi \alpha$ ). First aorist active infinitive of $\varphi \cup \lambda \alpha \sigma \sigma \omega$, the very word used in 1 Ti 6:20 with $\pi \alpha \rho \alpha \theta \eta \kappa \eta v$ as here, to guard against robbery or any loss.

That which I have committed unto him ( $\tau \eta \tau \pi \alpha \rho \alpha \theta \eta \kappa \eta \nu \mu \circ v$ ). Literally, "my deposit," as in a bank, the bank of heaven which no burglar can break (Mt 6:19f. ). See this word also in verse 14. Some MSS. have the more common $\pi \alpha \rho \alpha \kappa \alpha \tau \alpha \theta \eta \kappa \eta$ (a sort of double deposit, $\pi \alpha \rho a$, beside, down, ката).

Against that day ( $\varepsilon \varsigma \varsigma \varepsilon \kappa \varepsilon เ \nu \eta \nu \tau \eta \nu \eta \mu \varepsilon \rho \alpha \nu$ ). The day of Christ's second coming. See also $1: 18 ; 4: 8 ; 2 \mathrm{Th} 1: 10$, and often in the Gospels. Elsewhere, the day of the Lord (1Th 5:2; 2 Th 2:2; 1Co 1:8; 2Co 1:14 ), the day of Christ or Jesus Christ (Php 1:6,10; 2:16), the day (1Th 5:4; 1Co 3:13; Ro 13:12), the day of redemption (Eph 4:20), the day of judgment (Ro 2:5,16 ).
$2 \operatorname{Tim} 1: 13$
The pattern of sound words (v ขтотит $\omega \sigma \tau v$ and 1Ti 1:10 for vүıaıv $\omega$.

Which ( $\omega v$ ). Genitive plural with $\eta \kappa o v \sigma \alpha \varsigma ~(d i d s t ~ h e a r) ~ o r ~ a t t r a c t e d ~ t o ~ c a s e ~ o f ~ \lambda o \gamma \omega v$ ( $\alpha \kappa \sigma \omega$ is used either with the accusative or the genitive).

2Tim 1:14
That good thing which was committed unto thee ( $\tau \eta \nu \kappa \alpha \lambda \eta \nu \pi \alpha \rho \alpha \theta \eta \kappa \eta \nu$ ). Simply, "the good deposit."

Guard ( $\varphi$ ט $\alpha \alpha \xi$ ov). As in 1Ti 6:20. God has also made an investment in Timothy (cf. verse 12). Timothy must not let that fail.

Which dwelleth in us（ $\tau 0 v \varepsilon v o \ldots \kappa o v v \tau o \varsigma ~ \varepsilon v \eta \mu v)$ ）．It is only through the Holy Spirit that Timothy or any of us can guard God＇s deposit with us．

2Tim 1：15
Are turned away from me（ $\alpha \pi \varepsilon \sigma \tau \rho \alpha \varphi \eta \sigma \alpha v \mu \varepsilon$ ）．Second aorist passive（still transitive here with $\mu \varepsilon$ ）of $\alpha \pi \sigma \sigma \tau \rho \varepsilon \varphi \omega$ ，for which verb see Tit 1：14．For the accusative with these passive deponents see Robertson，Grammar，p．484．It is not known to what incident Paul refers，whether the refusal of the Christians in the Roman province of Asia to help Paul on his arrest（or in response to an appeal from Rome）or whether the Asian Christians in Rome deserted Paul in the first stage of the trial（ 4：16）．Two of these Asian deserters are mentioned by name，perhaps for reasons known to Timothy．Nothing else is known of Phygelus and Hermogenes except this shameful item．

2Tim 1：16
Grant mercy（ $\delta \omega \nmid \eta \varepsilon \lambda \varepsilon \circ \varsigma)$ ．The phrase nowhere else in the N．T．Second aorist active optative of $\delta \iota \delta \omega \mu$ ，the usual form being $\delta o \iota \eta$ ．This is the usual construction in a wish about the future．

Unto the house of Onesiphorus（ $\tau \omega$ Ov $\boldsymbol{O} \sigma \varphi$ орои оוк $\omega$ ）．The same phrase in 4：19． Apparently Onesiphorus is now dead as is implied by the wish in 1：18．

For he oft refreshed me（от по入入акıৎ $\mu \varepsilon \alpha v \varepsilon \psi v \xi \varepsilon v$ ）．First aorist active indicative of
 in Ac 3：20．In the first imprisonment or the second．If he lost his life for coming to see Paul， it was probably recently during this imprisonment．

Was not ashamed of my chain（ $\alpha \lambda v \sigma \iota \nu \mu \circ v$ ovk $\varepsilon \pi \alpha \iota \sigma \chi \nu v \theta \eta$ ）．Passive deponent again （first aorist indicative）with accusative as in 1：8．For $\alpha \lambda$ 人oбv（chain）see Eph 6：20 ．Note ab－ sence of augment in $\varepsilon \pi \alpha \iota \sigma \chi \nu v \theta \eta$ ．

2Tim 1：17
When he was in Rome（ $\gamma \varepsilon v o \mu \varepsilon v o \varsigma \varepsilon v$ Pouף）．Second aorist middle participle of $\gamma ı v o \mu \alpha$ （coming to Rome，happening in Rome）．

He sought me diligently and found me（ $\sigma \pi \sigma \cup \delta a 1 \omega \varsigma \varepsilon \zeta \eta \tau \eta \sigma \varepsilon v \mu \varepsilon \kappa \alpha \varepsilon v \rho \varepsilon v$ ）．Effective aorists both of them（first of $\lceil\eta \tau \varepsilon \omega$ ，second of $\varepsilon v \rho \iota \sigma \kappa \omega)$ ．He did it at the risk of his own life apparently．

2Tim 1：18
Grant to him to and mercy（ $\delta \omega i \eta \alpha \cup \tau \omega$ عvpeıv $\varepsilon \lambda \varepsilon o \varsigma)$ ．Second aorist active optative in wish for the future again as in verse 16．Find mercy from the Lord（Jesus）as he found me．

Thou knowest very well（ $\beta \varepsilon \lambda \tau \circ \circ v \sigma v \gamma \iota \nu \omega \sigma \kappa \varepsilon \iota \varsigma)$ ．Literally，＂thou knowest better（than I），＂for he did those things in Ephesus where thou art．Only N．T．example of $\beta \varepsilon \lambda \tau \tau \circ v$ ，in D text of Ac 10：28．

## 2 Timothy 2

2Tim 2:1
Be strengthened ( $\varepsilon v \delta v v a \mu o v$ ). Present passive imperative of $\varepsilon v \delta v v a \mu o \omega$. See already 1Ti 1:12; Ro 4:20; Php 4:13; Eph 6:10 . "Keep on being empowered," "keep in touch with the power."
 is located. Christ is the dynamo for power only when and while we keep in touch with him.

2Tim 2:2
From me ( $\pi \alpha \rho^{\prime} \varepsilon \mu \circ v$ ). As in 1:13. Paul was Timothy's chief teacher of Christ.
Among many witnesses ( $\delta \iota \alpha \pi о \lambda \lambda \omega v \mu \alpha \rho \tau \nu \rho \omega v$ ). Plutarch has $\delta \iota \alpha$ in this sense and Field (Ot. Norv.) suggests that it is a legal phrase "supported by many witnesses." Not mere spectators, but testifiers. See Paul's use of $\delta \iota \alpha$ 1Th 4:2; 2Co 2:4; Ro 2:27; 14:20. Paul in 1Co 15:1-8 gives many witnesses of the resurrection of Christ.

Commit thou ( $\pi \alpha \rho \alpha \theta o v$ ). Second aorist middle imperative of $\pi \alpha \rho \alpha \tau 1 \theta \eta \mu(1 T i 1: 18)$ to deposit, same metaphor as $\pi \alpha \rho \alpha \theta \eta \kappa \eta$ in 1:12,14 . "Deposit thou."

Faithful (жıбтоı). "Trustworthy," "reliable," as in 1Ti 1:12 of Paul himself.
Able (ıkavo). Capable, qualified, as in 1Co 15:9; 2Co 2:16; 3:5.
Others also (ка عєєроич). Not necessarily "different," but "others in addition." This is the way to pass on the torch of the light of the knowledge of God in Christ. Paul taught Timothy who will teach others who will teach still others, an endless chain of teachertraining and gospel propaganda.

2Tim 2:3
Suffer hardship with me ( $\sigma u v к \alpha к о \pi \alpha \theta \eta \sigma о v)$ ). See $1: 8$ for this verb. The old preacher challenges the young one to share hardship with him for Christ.

As a good soldier (os $\kappa \alpha \lambda$ oc $\sigma \tau \rho \alpha \tau \iota \omega \tau \eta \varsigma)$. Paul does not hesitate to use this military metaphor (this word only here for a servant of Christ) with which he is so familiar. He had already used the metaphor in 1Co 9:7; 2Co 10:3f.; 1Ti 1:18 . In Php 2:25 he called Epaphroditus "my fellow-soldier" ( $\sigma v v \sigma \tau \rho a \tau \iota \omega \tau \eta \nu \mu 0 v$ ) as he did Archippus in Phm 1:2 .

2Tim 2:4
No soldier on service (ou $\delta \varepsilon \varsigma \sigma \tau \rho \alpha \tau \varepsilon v o \mu \varepsilon v o \varsigma)$. "No one serving as a soldier." See 1Co 9:7 for this old verb and 2Co 10:3; 1Ti 1:18 for the metaphorical use.

Entangleth himself ( $\varepsilon \mu \pi \lambda \varepsilon \kappa \varepsilon \tau \alpha$ ). Old compound, to inweave (see Mt 27:29 for $\pi \lambda \varepsilon \kappa \omega$ ), in N.T. only here and 2Pe 2:20. Present middle (direct) indicative.

In the affairs ( $\tau \alpha \iota \varsigma \pi \rho \alpha \gamma \mu \alpha \tau \varepsilon \iota \swarrow \varsigma)$. Old word (from $\pi \rho \alpha \gamma \mu \alpha \tau \varepsilon v o \mu \alpha, \mathrm{Lu} 19: 13$ ), business, occupation, only here in N.T.

Of this life ( $\tau 0 \cup \beta$ เov). No "this" in the Greek, "of life" (course of life as in 1Ti 2:2, not existence $\zeta \omega \eta$ ).

Him who enrolled him as a soldier ( $\tau \omega \sigma \tau \rho \alpha \tau o \lambda o \gamma \eta \sigma \alpha \nu \tau$ ). Dative case after $\alpha \rho \varepsilon \sigma \eta$ (first aorist active subjunctive of $\alpha \rho \varepsilon \sigma \kappa \omega$, to please, 1Th 2:4, purpose clause with $\tau v \alpha$ ) of the articular first aorist active participle of $\sigma \tau \rho \alpha \tau о \lambda o \gamma \varepsilon \omega$, literary Koine word ( $\sigma \tau \rho \alpha \tau о \lambda о \gamma \circ \varsigma$, from $\sigma \tau \rho \alpha \tau o \varsigma$ and $\lambda \varepsilon \gamma \omega$ ), only here in N.T.

2Tim 2:5
If also a man contend in the games ( $\varepsilon \alpha v \delta \varepsilon \kappa \alpha \alpha \theta \lambda \eta \tau \iota \varsigma)$. Condition of third class with present (linear) active subjunctive of $\alpha \theta \lambda \varepsilon \omega$, old and common verb (from $\alpha \theta \lambda o \varsigma$, a contest), only this verse in N.T., but $\sigma v v a \theta \lambda \varepsilon \omega$ in Php 1:27. Note sharp distinction between $\alpha \theta \lambda \eta$ (present subjunctive, engage in a contest in general) and $\alpha \theta \lambda \eta \sigma \eta$ (first aorist active subjunctive, engage in a particular contest). Not "except he have contended," but simply "unless he contend" (in any given case) "lawfully" (vo $\mu \mu \omega \varsigma)$. Old adverb, agreeably to the law, in N.T. only here and $1 \mathrm{Ti} 1: 8$.

Is not crowned (ov $\sigma \tau \varepsilon \varphi \alpha \nu 0 \cup \tau \alpha$ ). Present passive indicative of $\sigma \tau \varepsilon \varphi \alpha \vee \circ \omega$, old verb (from $\sigma \tau \varepsilon \varphi a \sim o \varsigma$, crown), in N.T. only here and Heb 2:7,9. One apodosis for two protases. The victor in the athletic contests was crowned with a garland.

2Tim 2:6
The husbandman that laboureth ( $\tau \circ v \kappa о \pi \iota \omega v \tau \alpha \gamma \varepsilon \omega \rho \gamma \circ v$ ). "The toiling tiller of the soil" ( $\gamma \varepsilon \omega \rho \gamma o v$, from $\gamma \eta$ and $\varepsilon \rho \gamma \omega$, worker of the earth). See $\gamma \varepsilon \omega \rho \gamma เ o v$ (field) in 1Co 3:9 and also 1Co 9:7.

First ( $\pi \rho \omega \tau 0 v$ ). As is natural and right.
To partake ( $\mu \varepsilon \tau \alpha \lambda \alpha \mu \beta \alpha v \varepsilon \iota v$ ). Old word as in Ac 2:46 to share in. Paul elsewhere uses $\mu \varepsilon \tau \varepsilon \chi \omega$ as in 1Co 9:12 .

2Tim 2:7
Consider (vos). Present active imperative of voce, old verb, to put your mind (vovৎ) on. See Eph 3:4 and like command in 1Co 10:15 .

Understanding ( $\sigma v v \varepsilon \sigma \iota v$ ). "Comprehension" (from $\sigma v \nu ı \eta \mu$, to send together, to grasp). See Col 1:9; 2:2. This is a blessed promise that calls for application.

2Tim 2:8
Risen from the dead $(\varepsilon \gamma \eta \gamma \varepsilon \rho \mu \varepsilon v o \nu \varepsilon \kappa \nu \varepsilon \kappa \rho \omega v)$. Perfect passive participle of $\varepsilon \gamma \varepsilon \iota \rho \omega$, still risen as the perfect tense shows in 1Co 15:4,12-20. Predicate accusative. "Remember Jesus Christ as risen from the dead." This is the cardinal fact about Christ that proves his claim to be the Messiah, the Son of God. Christ is central for Paul here as in Php 2:5-11 .

Of the seed of David ( $\varepsilon \kappa \sigma \pi \varepsilon \rho \mu \alpha \tau о \varsigma \Delta \alpha v \varepsilon \iota \delta)$. The humanity of Christ as in Ro 1:3; Php 2:7f.

According to my gospel (ката то $\varepsilon v \alpha \gamma \gamma \varepsilon \lambda ı \sigma \mu о v)$. Paul's very phrase in Ro 2:16; 16:25 . Not a written gospel, but my message. See also 1Co 15:1; 2Co 11:7; Ga 1:11; 2:2; 1Ti 1:11 .

2Tim 2:9
Wherein ( $\varepsilon \nu \omega)$. In my gospel.

I suffer hardship (какола $\theta \omega$ ). "I suffer evil." Old compound (какоv, $\pi \alpha \sigma \chi \omega$ ), elsewhere in N.T., 4:5; Jas 5:13 .

Unto bonds ( $\mu \varepsilon \chi \rho \delta \varepsilon \sigma \mu \omega v$ ). "Up to bonds." A common experience with Paul (2Co 11:23; Php 1:7,13,14; Col 4:18).

As a malefactor ( $\omega \varsigma \kappa \alpha \kappa о \cup \rho \gamma \circ \varsigma$ ), old compound ( $\kappa \alpha \kappa \circ v, \varepsilon \rho \gamma \omega$, doer of evil), in N.T. only here and Lu 23:32ff. (of the robbers). One of the charges made against Paul.

Is not bound (ov $\delta \varepsilon \delta \varepsilon \tau \alpha$ ). Perfect passive indicative of $\delta \varepsilon \omega$, to bind. Old verb. See 1Co 7:27,39; Ro 7:2 . I am bound with a chain, but no fetters are on the word of God (Pauline phrase; 1Th 2:13; 1Co 14:36; 2Co 2:17; Php 1:14; Tit 2:5 ).

2Tim 2:10
For the elect's sake ( $\delta$ ı $\alpha$ тоис єклєктоиऽ). "Because of the elect." God's elect (Ro 8:33; Col 3:12; Tit 1:1 ) for whom Paul suffered so much (Col 1:6; 12:15; Php 2:17; Eph 3:1,13).

That they also may obtain (ıva ка аvто $\tau \cup \chi \omega \sigma \iota v$ ). Purpose clause with second aorist (effective) active subjunctive of $\tau v \gamma \chi \alpha v \omega$ with genitive. "They as well as I," Paul means.

The salvation ( $\tau \eta \varsigma \sigma \omega \tau \eta \rho(\alpha \varsigma)$. The final salvation "with eternal glory" ( $\mu \varepsilon \tau \alpha \delta_{0} \xi \eta \varsigma$ al $\omega$ viov). This phrase only here and 1Pe 5:10, but in 2Co 4:17 we have "eternal weight of glory."

2Tim 2:11
Faithful is the saying ( $\pi \iota \sigma \tau \circ \varsigma$ o $\lambda о \gamma \circ \varsigma)$. The saying which follows here though it can refer to the preceding as in $1 \mathrm{Ti} 4: 9$. See $1 \mathrm{Ti} 1: 15$. It is possible that from here to the end of 13 we have the fragment of an early hymn. There are four conditions in these verses (11-13), all of the first class, assumed to be true. Parallels to the ideas here expressed are found in 2Th 1:5; 1Co 4:8; 2Co 7:3; Ro 6:3-8; Col 3:1-4 . Note the compounds with $\sigma 0 v$ (ouvaлを $\theta a v o \mu \varepsilon v$,
we died with , from $\sigma u v a \pi o \theta v \varepsilon \sigma \kappa o$ as in 2Co 7:3; $\sigma u v\lceil\eta \sigma o \mu \varepsilon v$,
we shall live with, from $\sigma v v \zeta \alpha \omega$ as in 2Co 7:3; $\sigma \nu \mu \beta a \sigma \iota \lambda \varepsilon v \sigma o \mu \varepsilon v$,
we shall reign with , from $\sigma \nu \mu \beta \alpha \sigma ı \lambda \varepsilon v \omega$ as in 1Co $4: 8$ ). For $v \pi о \mu \varepsilon v o \mu \varepsilon v$ (we endure) see 1Co 13:7 and for $\alpha \pi \iota \sigma \tau o u \mu \varepsilon \nu$ (we are faithless) see Ro 3:3. The verb $\alpha \rho v \varepsilon o \mu \alpha$, to deny ( $\alpha \rho v \eta \sigma o \mu \varepsilon \theta a$, we shall deny, $\alpha \rho \vee \eta \sigma \varepsilon \tau \alpha$, he will deny, $\alpha \rho v \eta \sigma \alpha \sigma \theta \alpha$, deny, first aorist middle infinitive) is an old word, common in the Gospels in the sayings of Jesus (Mt 10:33; Lu 12:9 ), used of Peter ( $\mathrm{Mr} 14: 70$ ), and is common in the Pastorals ( $1 \mathrm{Ti} 5: 8$; Tit 2:12; 2Ti 3:5). Here in verse 13 it has the notion of proving false to oneself, a thing that Christ "cannot" (ou $\delta u v a \tau \alpha)$ do.

2Tim 2:14
That they strive not about words ( $\mu \eta \lambda о \gamma \sigma \mu \alpha \chi \varepsilon เ v$ ). Word apparently coined by Paul from $\lambda$ оүонахเа (1Ti 6:4 which see), a back formation in that case. A mere war of words displeases Paul. (Tit 3:9).

Useful ( $\chi \rho \eta \sigma \mu \circ v$ ). Late and rare word from $\chi \rho \alpha \circ \mu \alpha$, here only in N.T.

To the subverting ( $\varepsilon \pi \kappa \alpha \tau \alpha \sigma \tau \rho \circ \varphi \eta$ ). Old word (from $\kappa \alpha \tau \alpha \sigma \tau \rho \varepsilon \varphi \omega$, to turn down or over), here only in N.T. (except 2Pe 2:6 in some MSS., not in Westcott and Hort)." Because of the overthrow" (result $\varepsilon \pi$, not aim), useless for this reason. Such war of words merely upsets the hearers.

2Tim 2:15
Give diligence ( $\sigma \pi \sigma v \delta \alpha \sigma o v$ ). First aorist active imperative of $\sigma \pi \sigma v \delta \alpha \zeta \omega$, old word, as in 1Th 2:17; Ga 2:10.

To present $(\pi \alpha \rho \alpha \sigma \tau \eta \sigma \alpha)$. First aorist active infinitive of $\pi \alpha \rho \iota \sigma \tau \eta \mu$ as in $\operatorname{Col} 1: 22,28$.
Approved unto God ( $\delta о \kappa \iota \mu о \nu \tau \omega \theta \varepsilon \omega$ ). Dative case $\theta \varepsilon \omega$ with $\delta o \kappa \iota \mu \circ v$, predicate accusative, old adjective (from $\delta \varepsilon \chi o \mu \alpha$ ), for which see 1Co 11:19; 2Co 10:18 .

A workman ( $\varepsilon \rho \gamma \alpha \tau \eta \nu$ ). See 2Co 11:3; Php 3:2.
That needeth not to be ashamed ( $\alpha v \varepsilon \pi \alpha \iota \sigma \chi \nu v \tau \sigma v$ ). Late double compound verbal adjective ( $\alpha$ privative, $\varepsilon \pi \alpha \iota \sigma \chi \nu \nu \omega$ ), in Josephus and here alone.

Handling aright ( $\rho \theta \theta$ o $о \mu o v \nu \tau \alpha$ ). Present active participle of $o \rho \theta о \tau о \mu \varepsilon \omega$, late and rare compound ( $\circ \rho \theta$ o $\sigma \circ \mu \circ \varsigma$ ), cutting straight, $o \rho \theta$ o and $\tau \varepsilon \mu \nu \omega$ ), here only in N.T. It occurs in $\operatorname{Pr} 3: 6 ; 11: 5$ for making straight paths (oסous) with which compare Heb 12:13 and "the Way" in Ac 9:2. Theodoret explains it to mean ploughing a straight furrow. Parry argues that the metaphor is the stone mason cutting the stones straight since $\tau \varepsilon \mu \nu \omega$ and $o \rho \theta o \varsigma$ are so used. Since Paul was a tent-maker and knew how to cut straight the rough camel-hair cloth, why not let that be the metaphor? Certainly plenty of exegesis is crooked enough (crazy-quilt patterns) to call for careful cutting to set it straight.

2Tim 2:16
Shun ( $\pi \varepsilon \rho \iota \sigma \tau \alpha \sigma o)$. See Tit 3:9.
Babblings ( $\kappa \varepsilon \vee о \varphi \omega v \iota a \varsigma)$. See 1Ti 6:20.
Will proceed ( $\pi \rho о \kappa о \psi o v \sigma \iota v)$. Future active of $\pi \rho \circ \kappa о \pi \tau \omega$, "will cut forward." See Ga 1:14; Ro 13:12.

Further in ungodliness ( $\varepsilon \pi \pi \lambda \varepsilon \iota \circ \nu \alpha \sigma \varepsilon \beta \varepsilon \iota \alpha \varsigma)$. "To more of ungodliness." See Ro 1:18; 1Ti 2:2.

2Tim 2:17
Will eat ( $\nu \circ \mu \eta \nu \varepsilon \xi \varepsilon$ ). "Will have (future active of $\varepsilon \chi \omega$ ) pasturage or increase" ( $\nu o \mu \eta$, old word from $\nu \varepsilon \mu \omega$, to pasture, in N.T. only here and Joh 10:9 ).

As doth gangrene ( $\omega \varsigma \gamma \alpha \gamma \gamma \rho \alpha, v \alpha$ ). Late word (medical writers and Plutarch), only here in N.T. From $\gamma \rho a \omega$ or $\gamma \rho a \iota v \omega$, to gnaw, to eat, an eating, spreading disease. Hymenaeus is probably the one mentioned in 1Ti 1:20. Nothing is known of Philetus.

2Tim 2:18
Men who (oıтıv६). "The very ones who."
Have erred ( $\eta \sigma \tau \circ \chi \eta \sigma \alpha v$ ). "Missed the mark." First aorist active indicative of a $\alpha \tau 0 \chi \varepsilon \omega$, for which see $1 \mathrm{Ti} 1: 6 ; 6: 21$.

That the resurrection is past already ( $\alpha v \alpha \sigma \tau \alpha \sigma \iota \eta \delta \eta \gamma \varepsilon \gamma \circ v \varepsilon v \alpha$ ). Second perfect active infinitive of $\gamma เ v \circ \mu \alpha$ in indirect assertion after $\lambda \varepsilon \gamma \circ \nu \tau \varepsilon \varsigma$ (saying) with the accusative of general reference ( $\alpha v \alpha \sigma \tau \alpha \sigma ı \nu)$.

Overthrow ( $\alpha v \alpha \tau \rho \varepsilon \pi o v \sigma ı v)$. See Tit 1:11.
2Tim 2:19
Howbeit ( $\mu \varepsilon v \tau 0$ ). Strong adversative, "however."
Firm ( $\sigma \tau \varepsilon \rho \varepsilon \sigma$ ). Old adjective, solid, compact, in N.T. only here, $1 \mathrm{Pe} 5: 9$; Heb 5:12,14 . See $\sigma \tau \varepsilon \rho \varepsilon \omega \mu \alpha$ in Col 2:5. For $\theta \varepsilon \mu \varepsilon \lambda ı \varsigma$ see 1Co 3:11; Rom 15:20; 1Ti 6:19 . Cf. $\varepsilon \delta \rho \alpha ı \omega \mu \alpha$ in 1Ti 3:15.

Seal ( $\sigma \varphi \rho \alpha \gamma ı \varsigma)$. See 1Co 9:2; Ro 4:11.
Knoweth $(\varepsilon \gamma \nu \omega)$. Timeless aorist active indicative of $\gamma \iota \nu \omega \sigma \kappa \omega$. Quotation from Nu 16:5

Let every one depart ( $\alpha \pi \sigma \sigma \tau \eta \tau \omega \pi \alpha \varsigma$ ). Paraphrase of Nu 16:27; Isa 26:13; 52:11; Jer 20:9. Second aorist active imperative of $\alpha \varphi \iota \sigma \tau \eta \mu$ (intransitive use), "Let every one stand off from." Probably another echo of the rebellion of Korah.

2Tim 2:20
In a great house $(\varepsilon \nu \mu \varepsilon \gamma \alpha \lambda \eta$ оıкı $\alpha)$. Metaphor of a palace. He doubtless has the Kingdom of God in mind, but he works out the metaphor of a great house of the rich and mighty.

Vessels ( $\sigma \kappa \varepsilon \cup \eta)$. Old word $\sigma \kappa \varepsilon v o \varsigma . ~ S e e ~ R o ~ 9: 21 ~ f o r ~ t h e ~ s a m e ~ d o u b l e ~ u s e ~ a s ~ h e r e . ~$
Of gold ( $\chi \rho \cup \sigma \alpha$ ). Old contracted adjective $\chi \rho v \sigma \varepsilon \circ \varsigma$, only here by Paul.
Of silver $(\alpha \rho \gamma \cup \rho \alpha)$. Old contracted adjective $\alpha \rho \gamma \cup \rho \varepsilon o \varsigma$, in N.T. here, Ac 19:24; Re 9:20

Of wood $(\xi \cup \lambda ı v \alpha)$. Old adjective, in N.T. only here and $\operatorname{Re}$ 9:20 .
Of earth (o $\sigma \tau \rho \alpha \kappa ı \nu \alpha$ ). Late adjective, from oo $\rho \rho \kappa \kappa v$, baked clay, in LXX, in N.T. only here and 2Co 4:7.

2Tim 2:21
If a man purge himself ( $\varepsilon \alpha \nu \tau \iota \varsigma \varepsilon \kappa \kappa \alpha \theta \alpha \rho \eta)$. Paul drops the metaphor of the house and takes up the individual as one of the "vessels." Condition of third class with first aorist active subjunctive of $\varepsilon \kappa \kappa \alpha \theta \alpha \iota \rho \omega$, old verb, to cleanse out, in LXX, in N.T. only here and 1Co 5:7.

From these ( $\alpha \pi \sigma \tau \sigma \tau \omega v$ ). From the vessels for dishonour of verse 20.
Sanctified ( $\eta \gamma \iota \alpha \sigma \mu \varepsilon \nu \circ v$ ). Perfect passive participle of $\alpha \gamma \iota \alpha \zeta \omega$, for which verb see 1 Co 6:11.

Meet for the master's use ( $\varepsilon v \chi \rho \eta \sigma \tau \circ \nu \tau \omega \delta \varepsilon \sigma \pi \sigma \tau \omega$ ). Dative case $\delta \varepsilon \sigma \pi \sigma \tau \eta$ (for which word see $1 \mathrm{Ti} 6: 1$ ) with $\varepsilon v \chi \rho \eta \sigma \tau o v$, neuter singular like $\eta \gamma \iota \alpha \sigma \mu \varepsilon v o v$ agreeing with $\sigma \kappa \varepsilon v o \varsigma$. Old verbal adjective ( $\varepsilon v$ and $\chi \rho \alpha o \mu \alpha$, to use well), useful or usable for the master. In N.T. only here and $4: 11$. See axp $\quad \sigma \tau \sigma v$ in Phm 11.

Prepared ( $\eta \tau \sigma \mu \alpha \sigma \mu \varepsilon \nu o v)$. Perfect passive participle of $\varepsilon \tau \circ \mu \alpha \zeta \omega$, in a state of readiness, old and common word, elsewhere by Paul only 1Co 2:9 (LXX).

2Tim 2:22
Youthful ( $v \varepsilon \omega \tau \varepsilon \rho \iota \kappa a \varsigma)$. Literary Koine word (Polybius, Josephus), only here in N.T. There are lusts peculiar to flaming youth.

Flee ( $\varphi \varepsilon \cup \gamma \varepsilon)$. Present active imperative of $\varphi \varepsilon v \gamma \omega$, old and common verb. In this sense see 1Co 6:18 .

Follow after ( $\delta 丿 \omega \kappa \varepsilon$ ). Present active imperative of $\delta t \omega \kappa \omega$ as if in a chase for which sense see 1Th 5:15. Steady pursuit of these virtues like those in $\mathrm{Ga} 5: 22$.

2Tim 2:23
Ignorant ( $\alpha \pi \alpha \iota \delta \varepsilon v \tau 0 \cup \varsigma)$. Old verbal, here only in N.T. ( $\alpha$ privative and $\pi \alpha \iota \delta \varepsilon v \omega$ ). Untrained, uneducated, "speculations of a half-educated mind" (Parry).

Refuse ( $\pi \alpha \rho \alpha \iota \tau o v$ ). See 1Ti 4:7.
They gender strifes ( $\gamma \varepsilon \nu \nu \omega \sigma \iota \nu \mu \alpha \not \alpha \varsigma)$. Present active indicative of old and common verb $\gamma \varepsilon v \nu a \omega$ (Ro 9:11 ). "They beget battles." See 2:14.

2Tim 2:24
Must not strive (ov $\delta \varepsilon \mu \alpha \chi \varepsilon \sigma \theta \alpha$ ). Rather, "it is not necessary for him to fight" (in such verbal quibbles). The negative ov goes with $\delta \varepsilon$, not with the infinitive $\mu \alpha \chi \varepsilon \sigma \theta a$.

Gentle ( $\eta \pi \iota \circ$ ). Old word (from $\varepsilon \pi \circ \varsigma$, speech), affable, mild, in N.T. only here (and 1Th 2:7 in some MSS.; W. H. have v $\tau \pi \iota o$ ).

Teachable ( $\delta \iota \delta \alpha \kappa \tau \iota \kappa о v)$. See 1Ti 3:2.
Forbearing ( $\alpha v \varepsilon \xi \not \kappa \alpha \kappa о v$ ). Late compound (from future of $\alpha v \varepsilon \chi \omega$, $\alpha v \varepsilon \xi \omega$, and како $\nu$, putting up with evil). Here only in N.T.

2Tim 2:25
Correcting ( $\pi \alpha \iota \delta \varepsilon v o v \tau \alpha$ ). See Tit 2:12. "Schooling" (Parry).
Oppose themselves ( $\alpha v \tau \iota \delta \iota \alpha \tau \iota \varepsilon \mu \varepsilon v o v \varsigma)$. Present middle (direct) participle of $\alpha \nu \tau \iota \delta \iota \alpha \tau \iota \eta \mu$, late double compound (Diodorus, Philo) to place oneself in opposition, here only in N.T.

If peradventure God may give ( $\mu \eta \pi \circ \tau \varepsilon \delta \omega ı \eta$ o $\theta \varepsilon \sigma \varsigma$ ). Here Westcott and Hort read the late form of the second aorist active optative of $\delta \iota \delta \omega \mu$ for the usual $\delta o{ }^{\prime} \eta$ as they do in $1: 18$. But there it is a wish for the future and so regular, while here the optative with $\mu \eta \pi \sigma \tau \varepsilon$ in a sort of indirect question is used with a primary tense $\delta \varepsilon$ (present) and parallel with an undoubted subjunctive $\alpha \nu \alpha \nu \eta \psi \omega \sigma \iota v$, while in $\operatorname{Lu} 3: 15 \mu \eta \pi \sigma \tau \varepsilon \varepsilon \varepsilon \varepsilon$ is with a secondary tense. Examples of such an optative do occur in the papyri (Robertson, Grammar, p. 989) so that we cannot go as far as Moulton does and say that we "must" read the subjunctive $\delta \omega \eta$ here (Prolegomena, pp. 55, 193).

Repentance ( $\mu \varepsilon \tau \alpha v o \iota \alpha v$ ). "Change of mind" (2Co 7:10; Ro 2:4).
Unto the knowledge of the truth ( $\varepsilon \iota \varsigma \varepsilon \pi \iota \gamma v \omega \sigma \iota v a \lambda \eta \theta \varepsilon \iota \alpha \varsigma)$. Paul's word "full knowledge" (Co 1:9).

2Tim 2:26
They may recover themselves ( $\alpha \nu \alpha \nu \eta \psi \omega \sigma \iota v$ ). First aorist active subjunctive of $\alpha v \alpha \nu \eta \varphi \omega$, late and rare word, to be sober again, only here in N.T., though $\nu \eta \varphi \omega$ is in 1Th 5:6 .

Out of the snare of the devil ( $\varepsilon \kappa \tau \eta \varsigma$ tov $\delta \iota \alpha \beta 0 \lambda o v \pi \alpha ү \iota \circ \varsigma)$. They have been caught while mentally intoxicated in the devil's snare (1Ti 3:7). See Ro 11:9 for $\pi \alpha \gamma \iota \varsigma$.

Taken captive $(\varepsilon \zeta \omega \gamma \rho \eta \mu \varepsilon \nu 0)$. Perfect passive participle of $\zeta \omega \gamma \rho \varepsilon \omega$, old verb, to take alive ( $\zeta \omega 0 \sigma, \alpha \gamma \rho \varepsilon \omega)$, in N.T. only here and Lu 5:10 (of Peter). "Taken captive alive."

By him unto his will (v $\left.\pi^{\prime} \alpha v \tau o v ~ \varepsilon ા \varsigma ~ \tau o ~ \varepsilon \kappa \varepsilon ı v o v ~ \theta \varepsilon \lambda \eta \mu \alpha\right)$. This difficult phrase is understood variously. One way is to take both avtov and $\varepsilon \kappa \varepsilon เ v o v, ~ t o ~ r e f e r ~ t o ~ t h e ~ d e v i l . ~ A n o t h e r ~$ way is to take both of them to refer to God. Another way is to take avtov of the devil and عкยıvov, of God. This is probably best, "taken captive by the devil" "that they may come back to soberness to do the will of God." There are difficulties in either view.

## 2 Timothy 3

2Tim 3:1
Know this ( $\tau 0 \cup \tau о \quad \gamma \iota \nu \omega \sigma \kappa \varepsilon)$. See 1Co 11:3; Php 1:12.
In the last days ( $\varepsilon v \varepsilon \sigma \chi \alpha \tau \alpha ı \varsigma ~ \eta \mu \varepsilon \rho \alpha ı \varsigma)$. See Jas 5:3; $1 \mathrm{Ti} 4: 1$.
Grievous ( $\chi \alpha \lambda \varepsilon \pi \sigma$ ). Hard. See Eph 5:16.
Shall come ( $\varepsilon \nu \sigma \tau \eta \sigma o v \tau \alpha$ ). Future middle of $\varepsilon \nu เ \sigma \tau \eta \mu$ (intransitive use), old verb, to stand on or be at hand, as in 2Th 2:2 .

2Tim 3:2
Lovers of self ( $\varphi \iota \lambda \alpha v \tau o$ ). Old compound adjective ( $\varphi \iota \lambda o \sigma, \alpha v \tau \sigma \varsigma)$, here only in N.T.
Lovers of money ( $\varphi \iota \lambda \rho \gamma \cup \rho o$ ). Old compound adjective, in N.T. only here and Lu 16:14 . See 1Ti 6:10.

Boastful ( $\alpha \lambda \alpha \zeta$ oves). Old word for empty pretender, in N.T. only here and Ro 1:30.
Haughty (vாeค $\eta \varphi a v o$ ). See also Ro 1:30 for this old word.
Railers ( $\beta \lambda \alpha \sigma \varphi \eta \mu$ ). See 1Ti 1:13.
Disobedient to parents ( $\gamma 0 v \varepsilon v \sigma \iota v a \pi \varepsilon \iota \varepsilon \varepsilon \iota \varsigma)$. See Ro 1:30.
Unthankful (aұapıбтo). Old word, in N.T. only here and Lu 6:35.
Unholy (avoбıo). See 1Ti 1:9.
Without natural affection ( $\alpha \sigma \tau о \rho \gamma$ ). See Ro 1:31.
2Tim 3:3
Implacable ( $\alpha \sigma \pi \sigma v \delta o$ ). Truce-breakers. Old word, only here in N.T. though in MSS. in Ro 1:31 (from a privative and $\sigma \pi o v \delta \eta$, a libation).

Slanderers ( $\delta \iota \alpha \beta 0 \lambda 0$ ). See 1Ti 3:11; Tit 2:3.
Without self-control ( $\alpha \kappa \alpha \tau \varepsilon ı) . ~ O l d ~ w o r d ~(~ a ~ p r i v a t i v e ~ a n d ~ к \rho а \tau о \varsigma), ~ h e r e ~ o n l y ~ i n ~ N . T . ~$
Fierce ( $\alpha \vee \eta \mu \varepsilon \rho o$ ). Old word ( $\alpha$ privative and $\eta \mu \varepsilon \rho o \varsigma$, tame), only here in N.T.
No lovers of good ( $\alpha \varphi i \lambda \alpha \gamma \alpha \theta$ o). Found only here ( $\alpha$ privative and $\varphi i \lambda \alpha \gamma \alpha \theta o \varsigma$, for which see Tit 1:8 ). See also Php 4:8. A papyrus describes Antoninus as $\varphi \iota \lambda \alpha \gamma \alpha \theta$ os and has $\alpha \varphi ı \lambda о к \alpha \gamma \alpha \theta \iota \alpha$.

2Tim 3:4
Traitors ( $\pi \rho o \delta o \tau \alpha$ ). Old word (from $\pi \rho o \delta t \delta \omega \mu$ ), in N.T. only here, Lu 6:16; Ac 7:52.
Headstrong ( $\pi \rho \circ \pi \varepsilon \tau \varepsilon \iota \varsigma)$. Old word (from $\pi \rho \circ$ and $\pi \iota \pi \tau \omega$ ), falling forward, in N.T. only here and Ac 19:36.

Puffed up ( $\tau \varepsilon \tau v \varphi \omega \mu \varepsilon v o$ ). Perfect passive participle of $\tau v \varphi 0 \omega$. See 1Ti 3:6.
Lovers of pleasure ( $\varphi \iota \lambda \eta \delta o v o$ ). Literary Koine word ( $\varphi \iota \lambda o \sigma, \eta \delta o v \eta$ ), only here in N.T.
Lovers of God ( $\varphi \iota \lambda o \theta \varepsilon o$ ). Old word ( $\varphi \iota \lambda o \sigma, \theta \varepsilon o \varsigma)$, only here in N.T.
2Tim 3:5
A form of godliness ( $\mu \circ \rho \varphi \omega \sigma \iota v \varepsilon v \sigma \varepsilon \beta \varepsilon \iota \alpha \varsigma)$. For $\mu о \rho \varphi \omega \sigma \iota \nu$, see Ro 2:20. The outward shape without the reality.

Having denied ( $\eta \rho v \eta \mu \varepsilon v o$ ). Perfect middle participle of $\alpha \rho v \varepsilon \sigma \mu \alpha$ (see 2:12f. ).
Power ( $\delta v v a \mu \nu v$ ). See 1Co 4:20. See Ro 1:29-31 for similar description.
Turn away ( $\alpha \pi \sigma \tau \rho \varepsilon \pi o v$ ). Present middle (direct) imperative of $\alpha \pi o \tau \rho \varepsilon \pi \omega$, "turn thyself away from." Old verb, only here in N.T. See IV Macc. 1:33.

2Tim 3:6
That creep (o $\varepsilon v \delta u v o v \tau \varepsilon \varsigma)$. Old and common verb (also $\varepsilon v \delta v \omega$ ) either to put on (1Th 5:8 ) or to enter (to slip in by insinuation, as here). See same idea in Jude 1:4 ( $\pi \alpha \rho \varepsilon \iota \sigma \varepsilon \delta v \eta \sigma \alpha v$ ),
 are pictured also in Tit 1:11.

Take captive ( $\alpha \downarrow \chi \mu \lambda \omega \tau \iota \zeta$ ov $\tau \varepsilon \varsigma)$. "Taking captive." Present active participle of $\alpha ı \chi \mu \alpha \lambda \omega \tau \iota \zeta \omega$, for which see 2Co 10:5; Ro 7:23 .

Silly women ( $\gamma \cup v \alpha \iota \kappa \alpha \rho ı \alpha$ ). Literally, "little women" (diminutive of $\gamma \nu v \eta$ ), found in Diocles (comedian of 5 century B.C.) and in Epictetus. The word here is neuter (grammatical gender) plural. Used contemptuously here (only N.T. example). Ramsay suggests "society ladies." It is amazing how gullible some women are with religious charlatans who pose as exponents of "new thought."

Laden with sins ( $\sigma \varepsilon \sigma \omega \rho \varepsilon v \mu \varepsilon v \alpha \alpha \mu \alpha \rho \tau \iota \alpha \iota \varsigma)$. Perfect passive participle of $\sigma \omega \rho \varepsilon v \omega$, old word from Aristotle down (from $\sigma \omega \rho \circ \varsigma$, a heap) to heap up. In N.T. only here and Ro 12:20 . Associative instrumental case $\alpha \mu \alpha \rho \tau \iota \alpha ı s$.

Divers (лоєкı入аıऽ). Many coloured. See Tit 3:3. One has only to recall Schweinfurth, the false Messiah of forty odd years ago with his "heavenly harem" in Illinois and the recent infamous "House of David" in Michigan to understand how these Gnostic cults led women into licentiousness under the guise of religion or of liberty. The priestesses of Aphrodite and of Isis were illustrations ready to hand. A $\gamma o \mu \varepsilon v a$ (present passive participle) means "continually led astray or from time to time."

2Tim 3:7
Never able to come to the knowledge of the truth ( $\mu \eta \delta \varepsilon \pi \sigma \tau \varepsilon \varepsilon \iota \varsigma \varepsilon \pi \iota \gamma \nu \omega \sigma \iota \sim \alpha \lambda \eta \varepsilon \iota \alpha \varsigma$ $\varepsilon \lambda \theta \varepsilon \iota \nu \delta v \nu \alpha \mu \varepsilon v \alpha)$. Pathetic picture of these hypnotized women without intellectual power to cut through the fog of words and, though always learning scraps of things, they never come into the full knowledge ( $\varepsilon \pi \iota \gamma \nu \omega \sigma \iota v$ ) of the truth in Christ. And yet they even pride themselves on belonging to the intelligentsia!

2Tim 3:8
Like as (ov $\tau \rho \circ \pi \sigma v$ ). "In which manner." Adverbial accusative and incorporation of the antecedent $\tau \rho о \pi о v$ into the relative clause.

Jannes and Jambres (I $\alpha \nu \nu \eta \varsigma \kappa \alpha \operatorname{I} \mu \beta \rho \eta \varsigma)$. Traditional names of the magicians who withstood Moses (Targum of Jonathan on Ex 7:11).

Withstood ( $\alpha v \tau \varepsilon \sigma \tau \eta \sigma \alpha v$ ). Second aorist active (intransitive) of $\alpha v \theta \iota \sigma \tau \eta \mu$, to stand against, "they stood against" (with dative M $\omega v \sigma \varepsilon$ ). Same word used of Elymas in Ac 13:8
and repeated here $\alpha v \theta$ เбт $\alpha v \tau \alpha$ (present middle indicative). Paul here pictures the seducers of the $\gamma$ uvaikapia above.

Corrupted in mind (кат $\varphi \varphi \theta \alpha \rho \mu \varepsilon v o ~ \tau o v ~ v o u v) . ~ P e r f e c t ~ p a s s i v e ~ p a r t i c i p l e ~ o f ~ к \alpha \tau \alpha \varphi \theta \varepsilon ı \rho \omega, ~$ old compound, in N.T. only here in critical text. See 2Co 11:3; 1Ti 6:5 for $\delta \operatorname{\delta } \alpha \varphi \theta \varepsilon เ \rho \omega$. The accusative vouv is retained in the passive.

Reprobate ( $\alpha \delta о к ц \mu)$. See 1Co 9:27; Tit 1:16. They had renounced their trust ( $\pi \iota \sigma \tau \iota v$ ) in Christ.

2Tim 3:9
They shall proceed no further (ov $\pi \rho о к о \psi о v \sigma i v \varepsilon \pi \pi \lambda \varepsilon \iota v v$ ). Future active of $\pi \rho о к о \pi \tau \omega$. See 2:16.

Folly ( $\alpha v o t \alpha$ ). Old word (from $\alpha v o o \varsigma$, a privative and vovc), want of sense, here only in N.T.

Evident ( $\varepsilon \kappa \delta \eta \lambda \circ \varsigma)$. Old word ( $\varepsilon \kappa, \delta \eta \lambda$ o $\varsigma$, outstanding), here only in N.T.
Theirs ( $\varepsilon \kappa \varepsilon เ \nu \omega v)$. Of Jannes and Jambres (Ex 7:12).
2Tim 3:10
Didst follow ( $\pi \alpha \rho \eta \kappa о \lambda o v \theta \eta \sigma \alpha \varsigma)$. First aorist active indicative of $\pi \alpha \rho \alpha \kappa о \lambda о u \theta \varepsilon \omega$, for which see 1Ti 4:6. Some MSS. have perfect active $\pi \alpha \rho \eta \kappa о \lambda o u \theta \eta \kappa \alpha \varsigma ~(t h o u ~ h a s t ~ f o l l o w e d) . ~$ Nine associative-instrumental cases here after the verb (teaching, $\delta \iota \delta a \sigma \kappa \alpha \lambda ı \alpha$, Ro 12:7;
conduct , $\alpha \gamma \omega \gamma \eta$, old word here only in N.T.;
purpose, $\pi \rho \circ \theta \varepsilon \sigma \varepsilon$, Ro 8:28;
faith , $\pi \iota \sigma \tau \varepsilon$, 1 Th 3:6;
longsuffering, $\mu \propto \kappa \rho о \theta \nu \mu \iota$, Col 1:11;
persecutions, $\delta \omega \boldsymbol{\epsilon} \mu \boldsymbol{\mu}$, 2 2Th 1:4;
sufferings , $\pi \alpha \theta \eta \mu \alpha \sigma \iota v, 2$ Co 1:6f. ). The two last items belong to verse 11.
2Tim 3:11
 experiences of Paul ( $\varepsilon \gamma \varepsilon v \varepsilon \tau o$, second aorist middle indicative of $\gamma เ v o \mu \alpha)$ more fully described in 2Co 11:30-33. The Acts of the Apostles tell of his experiences in Antioch in Pisidia (Ac 13:14, 45,50 ), in Iconium (Ac 14:1-5 ), in Lystra (Ac 14:6-19). See also Ga 2:11 .

What persecutions I endured (oovs $\delta \iota \omega \gamma \mu \circ \cup \varsigma \cup \pi \eta v \varepsilon \gamma \kappa \alpha$ ). Qualitative relative again with $\delta \iota \omega \gamma \mu о v \varsigma$. The verb is first aorist active indicative of $v \pi о \varphi \varepsilon \rho \omega$, old verb, to bear under as in 1Co 10:13.

Delivered me ( $\mu \varepsilon \varepsilon \rho v \sigma a \tau o$ ). First aorist middle of $\rho v o \mu \alpha$, old verb, with $\varepsilon \kappa$ here as in 1Th 1:10. Used again of the Lord Jesus in 4:18.

2Tim 3:12
That would live godly (o $\theta \varepsilon \lambda o v \tau \varepsilon \varsigma \zeta \eta \imath v \varepsilon \cup \sigma \varepsilon \beta \omega \varsigma)$. "Those who desire (will, determine) to live godly." Paul does not regard his experience as peculiar, but only part of the price of loyal service to Christ.

Shall suffer persecution ( $\delta \iota \omega \chi \theta \eta \sigma o v \tau \alpha)$. Future passive of $\delta \iota \omega \kappa \omega$, "shall be persecuted" (shall be hunted as wild beasts).

2Tim 3:13
Impostors ( $\gamma \circ \eta \tau \varepsilon \varsigma$ ). Old word from wailers ( $\gamma \circ \alpha \omega$, to bewail), professional mourners, deceivers, jugglers. Here only in the N.T. Modern impostors know all the tricks of the trade.

Shall wax worse and worse ( $\pi \rho о к о \psi о и \sigma เ \nu \varepsilon \pi ~ \tau о ~ \chi \varepsilon เ \rho о \nu) . ~ " S h a l l ~ c u t ~ f o r w a r d ~ t o ~ t h e ~ w o r s e ~$ stage." See 2:16 for $\pi \rho о к о \pi \tau \omega$. Xeוpov is comparative of какос, "to the worse than now."

Deceiving and being deceived ( $\pi \lambda \alpha \nu \omega v \tau \varepsilon \varsigma \kappa \alpha \pi \lambda \alpha v \omega \mu \varepsilon v o$ ). Present active and present passive participles of $\pi \lambda a v a \omega$. The tragedy of it all is that these seducers are able to deceive others as well as themselves.

2Tim 3:14
But abide thou ( $\sigma v \delta \varepsilon \mu \varepsilon v \varepsilon$ ). Emphatic contrast ( $\sigma v \delta \varepsilon$ ), "But thou." Present active imperative of $\mu \varepsilon \nu \omega$, common verb, to remain.

In the things which ( $\varepsilon v$ oıc). The antecedent to oıs is not expressed ("in which things") and the relative is attracted from $\alpha$ accusative with $\varepsilon \mu \alpha \theta \varepsilon \varsigma$ (didst learn, second aorist active indicative of $\mu \alpha v \theta \alpha v \omega)$ to the case of the unexpressed antecedent (locative with $\varepsilon v$ ).

Hast been assured of ( $\varepsilon \pi\llcorner\sigma \tau \omega \theta \eta \varsigma)$. First aorist passive indicative of $\pi \iota \sigma \tau o \omega$, old verb (from $\pi \iota \sigma \tau o \varsigma$, faithful), to make reliable, only here in N.T.

Knowing from whom ( $\varepsilon ו \delta \omega \varsigma \pi \alpha \rho \alpha \tau \iota v \omega v$ ). Second perfect active participle of oı $\delta \alpha$. Note $\tau \iota \omega \omega \nu$ (ablative case after $\pi \alpha \rho \alpha$ in an indirect question). The list included the O.T. prophets, Paul, Eunice, Lois. There ought to be moral authority in such personages.

2Tim 3:15
From a babe ( $\alpha \pi о \beta \rho \varepsilon \varphi о и \varsigma)$ ). Only here in the Pastorals. This teaching from the fifth year, covering the whole of Timothy's recollections. See Mr 9:21 $\varepsilon \kappa \pi \alpha \iota \delta ı 0 \varepsilon v$, from a child.

Thou has known (ot $\delta \varsigma \varsigma$ ). Present active indicative, progressive perfect reaching from a babe till now. Would that Christian parents took like pains today.

The sacred writings ( $\varepsilon \rho \alpha \gamma \rho \alpha \mu \mu \alpha \tau \alpha)$. "Sacred writings" or "Holy Scriptures." Here alone in N.T., though in Josephus (Proem to Ant. 3; Apion 1, etc.) and in Philo. The adjective เعроц occurs in 1Co 9:13 of the temple worship, and $\gamma \rho \alpha \mu \mu \alpha$ in contrast to $\pi \nu \varepsilon \nu \mu \alpha$ in 2Co 3:6f.; Ro 2:29 and in Joh 5:47 of Moses' writings, in Ac 28:21 of an epistle, in Ga 6:11 of letters (characters). In Ephesus there were $\mathrm{E} \varphi \varepsilon \sigma \iota \alpha \gamma \rho \alpha \mu \mu \alpha \tau \alpha$ that were $\beta \varepsilon \beta \eta \lambda \alpha$ (Ac 19:19), not ı $\varepsilon \rho$.

To make thee wise ( $\sigma \varepsilon \sigma \circ \varphi \iota \sigma \alpha$ ). First aorist active infinitive of $\sigma \circ \varphi\llcorner\zeta \omega$, old verb (from $\sigma о \varphi о \varsigma)$, in N.T. only here, and 2 Pe 1:16 .

Which is in ( $\tau \eta \varsigma \varepsilon v$ ). Common idiom with the article, "the in." The use of the Scriptures was not magic, but of value when used "through faith that is in Christ Jesus."

2Tim 3:16

Every scripture inspired of God is also profitable ( $\tau \alpha \sigma \alpha ~ \gamma \rho а \varphi \eta ~ Ө \varepsilon о \pi v \varepsilon v \sigma \tau о \varsigma ~ к \alpha ~$ $\omega \varphi \varepsilon \lambda(\mu \circ \varsigma)$. There are two matters of doubt in this clause. One is the absence of the article $\eta$ before $\gamma \rho a \varphi \eta$, whether that makes it mean "every scripture" or "all scripture" as of necessity if present. Unfortunately, there are examples both ways with both $\pi \alpha \varsigma$ and $\gamma \rho \alpha \varphi \eta$. Twice we find $\gamma \rho \alpha \varphi \eta$ in the singular without the article and yet definite ( $1 \mathrm{Pe} 2: 6 ; 2 \mathrm{Pe} 1: 20$ ). We have tac I $\sigma \rho a \eta \lambda$ (Ro 11:26) for all Israel (Robertson, Grammar, p. 772). So far as the grammatical usage goes, one can render here either "all scripture" or "every scripture." There is no copula ( $\varepsilon \sigma \tau \iota v$ ) in the Greek and so one has to insert it either before the $\kappa \alpha$ or after it. If before, as is more natural, then the meaning is: "All scripture (or every scripture) is inspired of God and profitable." In this form there is a definite assertion of inspiration. That can be true also of the second way, making "inspired of God" descriptive of "every scripture," and putting عбтıv (is) after $\kappa \alpha$ : "All scripture (or every scripture), inspired of God, is also profitable."

Inspired of God ( $\theta$ عo $\boldsymbol{\pi} v \varepsilon \cup \sigma \tau o \varsigma)$. "God-breathed." Late word (Plutarch) here only in N.T. Perhaps in contrast to the commandments of men in Tit 1:14.

Profitable ( $\omega \varphi \varepsilon \lambda \mu \boldsymbol{\mu}$ ). See 1Ti 4:8. See Ro 15:4. Four examples of $\pi \rho \circ \varsigma$ (facing, with a view to, for): $\delta \iota \delta a \sigma \kappa \alpha \lambda \iota \alpha v$, teaching; $\varepsilon \lambda \varepsilon \gamma \mu \circ v$, reproof, in LXX and here only in N.T.; $\varepsilon \pi \alpha v o \rho \theta \omega \sigma \tau v$, correction, old word, from $\varepsilon \pi \alpha v o \rho \theta o \omega$, to set up straight in addition, here only in N.T., with which compare $\varepsilon \pi \iota \delta \iota \rho \theta$ ow in Tit $1: 5$; $\pi \alpha \iota \delta \varepsilon ı \alpha v$, instruction, with which compare Eph 6:4.

2Tim 3:17
The man of God (o tov $\theta \varepsilon o v \alpha v \theta \rho \omega \pi$ ) $)_{\text {). See 1Ti 6:11. }}$
 A $\rho \tau \iota \rho$, is old word (from root $\alpha \rho \omega$, to fit), specially adapted, here only in N.T.

Furnished completely ( $\varepsilon \xi \eta \rho \tau \iota \sigma \mu \varepsilon v o \varsigma)$. Perfect passive participle of $\varepsilon \xi \alpha \rho \tau \iota \zeta \omega$, rare verb, to furnish (fit) fully (perfective use of $\varepsilon \xi$ ), in N.T. only here and Ac 21:5 . In Josephus. For катартıцॅ, see Lu 6:40; 2Co 13:11.

## 2 Timothy 4

$2 \operatorname{Tim} 4: 1$
I charge thee ( $\delta ı \alpha \mu \alpha \rho \tau \cup \rho о \mu \alpha)$. Rather, "I testify." See 1Th 4:6. See 1Ti 5:21 for this verb and appeal to God and Christ.

Who shall judge ( $\tau 0 v \mu \varepsilon \lambda \lambda$ оvтос крıveıv). "The one going or about to judge" (regular idiom with $\mu \varepsilon \lambda \lambda \omega$ ). The quick and the dead ( $\zeta \omega \nu \tau \alpha \varsigma ~ \kappa \alpha ~ v \varepsilon к \rho o u \varsigma) . ~ " L i v i n g ~ a n d ~ d e a d . " ~ S e e ~$ 1Th 4:16f.

And by his appearing ( $\kappa \alpha \tau \eta \nu \varepsilon \pi \iota \varphi \alpha \nu \varepsilon \iota \alpha v$ ). Accusative of conjuration (verbs of swearing), after $\delta \iota \alpha \mu \alpha \tau \tau \cup \rho о \mu \alpha$ as is $\beta \alpha \sigma i \lambda \varepsilon \iota \alpha \nu$ (by his kingdom). See 1Th 5:27 . For $\varepsilon \pi \iota \varphi a v \varepsilon \iota \alpha v$, see 1:10; Tit 2:13; 1Ti 6:14; 2Th 2:8 .

2Tim 4:2
Preach the word ( $\kappa \eta \rho \cup \xi о v$ тov $\lambda o \gamma \circ v$ ). First aorist active imperative of $\kappa \eta \rho v \sigma \sigma \omega$. For "the word" used absolutely, see 1Th 1:6; Ga 6:6 .

Be instant in season, out of season ( $\varepsilon \pi \iota \sigma \tau \eta \theta \varepsilon \cup \kappa \alpha \iota \rho \omega \varsigma \alpha \kappa \alpha \iota \rho \omega \varsigma)$. Second aorist (ingressive) active imperative of $\varepsilon \varphi เ \sigma \tau \eta \mu$ (intransitive use), "take a stand," "stand upon it or up to it," "carry on," "stick to it." The Vulgate has "insta." The two adverbs are like a proverb or a play (pun) on the word каı $о$. There are all sorts of seasons (кaıро), some difficult ( $\chi \alpha \lambda \varepsilon \pi о$, 3:1), some easy ( (ยvкаı $\eta, 1$ Co 16:12 ).

Reprove ( $\varepsilon \lambda \varepsilon \gamma \xi \circ$ ). First aorist active imperative of $\varepsilon \lambda \varepsilon \gamma \chi \omega$. "Bring to proof." Eph 5:11
Rebuke ( $\varepsilon \pi \iota \tau \iota \mu \eta \sigma o v$ ). First aorist active imperative of $\varepsilon \pi \iota \tau \mu \alpha \omega$, to give honour (or blame) to, to chide. Common in the Gospels (Lu 17:3).

Exhort ( $\pi \alpha \rho \alpha \kappa \alpha \lambda \varepsilon \sigma \sigma v)$. First aorist active imperative of $\pi \alpha \rho \alpha \kappa \alpha \lambda \varepsilon \omega$, common Pauline word.

2Tim 4:3
A time when (каиос отє). One of the акаıрюऽ (out of season) times.
Will not endure (ovk $\alpha v \varepsilon \xi o v \tau \alpha)$. Future middle (direct) of $\alpha v \varepsilon \chi \omega$. "Will not hold themselves back from" (Col. 3:13). Having itching ears ( $\kappa \nu \eta$ $\eta$ о $\boldsymbol{\varepsilon} v$ vo $\tau \eta \nu \alpha \kappa о \eta v$ ). Present middle (causative) participle of $\kappa v \eta \theta \omega$, late and rare form of the Attic $\kappa \nu \alpha \omega$, to scratch, to tickle, here only in N.T. "Getting the ears (the hearing, $\tau \eta v ~ \alpha \kappa о \eta \nu)$ tickled." The Vulgate has $\pi \rho \cup \rho เ \varepsilon \nu \tau \varepsilon \varsigma$. Cf. the Athenians (Ac 17:21). Clement of Alexandria tells of speakers tickling ( $\kappa \nu \eta \theta$ ovtєऽ) the ears of those who want to be tickled. This is the temptation of the merely "popular" preacher, to furnish the latest tickle.

2Tim 4:4
Will turn away their ears ( $\tau \eta \nu \alpha \kappa о \eta \nu \alpha \pi о \sigma \tau \rho \varepsilon \psi о v \sigma เ v)$. Future active of old verb $\alpha \pi о \sigma \tau \rho \varepsilon \varphi \omega$. See 1Co 12:17 for this use of $\alpha \kappa о \eta$. The people stopped their ears and rushed at Stephen in Ac 7:57.

Will turn aside ( $\varepsilon \kappa \tau \rho \alpha \pi \eta \sigma \circ v \tau \alpha)$. Second future passive of $\varepsilon \kappa \tau \rho \varepsilon \pi \omega$. They prefer "myths" to "the truth" as some today turn away to "humanism," "bolshevism," "new thought" or any other fad that will give a new momentary thrill to their itching ears and morbid minds.

2Tim 4:5
But be thou sober ( $\sigma v \delta \varepsilon \nu \eta \varphi \varepsilon$ ). Present active imperative of $v \eta \varphi \omega$, for which see 1Th 5:6,8 . "Be sober in thy head."

Suffer hardship (какопа $\Theta \eta \sigma о v)$ ). See 2:9.
Do the work of an evangelist ( $\varepsilon \rho \gamma \circ v$ попŋ $\sigma o v ~ \varepsilon v a \gamma \gamma \varepsilon \lambda ı \sigma \tau o v)$. See 1Co 1:17; Eph 4:11 for $\varepsilon v a \gamma \gamma \varepsilon \lambda_{เ \sigma \tau \eta \varsigma, ~ g o s p e l i z e r . ~}^{\text {g }}$

Fulfil ( $\pi \lambda \eta \rho \circ \varphi о \rho \eta \sigma \circ v$ ). First aorist active imperative of $\pi \lambda \eta \rho \circ \varphi \circ \rho \varepsilon \omega$, for which see Col 4:12 . In Col 4:17 Paul uses $\pi \lambda \eta \rho o \omega$ to Archippus about his ministry as he here employs $\pi \lambda \eta \rho о \varphi о \rho \varepsilon \omega$. Both verbs mean to fill full.

2Tim 4:6
I am already being offered ( $\eta \delta \eta \sigma \pi \varepsilon v \delta o \mu \alpha)$. Present (progressive) passive indicative of $\sigma \pi \varepsilon v \delta \omega$, old verb, to pour out a libation or drink offering. In N.T. only here and Php 2:17 . "What was then a possibility is now a certainty" (Parry). The sacrifice of Paul's life-blood has begun.

Of my departure ( $\tau \eta \varsigma a v a \lambda v \sigma \varepsilon \omega \varsigma \mu o v$ ). Our very word "analysis." Old word from $\alpha v a \lambda v \omega$, to loosen up or back, to unloose. Only here in N.T., though $\alpha v a \lambda \nu \sigma \alpha$ for death is used by Paul in Php 1:23 which see for the metaphor.

Is come ( $\varepsilon \varphi \varepsilon \sigma \tau \eta \kappa \varepsilon v$ ). Perfect active indicative of $\varepsilon \varphi \vdash \sigma \tau \eta \mu$ (intransitive use). See 1Th 5:3; Lu 21:34 . The hour has struck. The time has come.

2Tim 4:7
I have fought the good fight ( $\tau 0 v \kappa \alpha \lambda o v \alpha \gamma \omega v \alpha \eta \gamma \omega v i \sigma \mu \alpha$ ). Perfect middle indicative of $\alpha \gamma \omega \mathrm{v} \zeta$ цо $\alpha$, a favourite figure with Paul ( $1 \mathrm{Co} \mathrm{9:25;} \mathrm{Col} \mathrm{1:29)} \mathrm{}$, $\alpha \gamma \omega v \alpha$ (Php 1:27,30, etc.). The "fight" is the athletic contest of his struggle for Christ.

I have finished the course ( $\tau \circ v \delta \rho \circ \mu \circ \nu \tau \varepsilon \tau \varepsilon \lambda \varepsilon \kappa \alpha$ ). Perfect active indicative of $\tau \varepsilon \lambda \varepsilon \omega$. He had used this metaphor also of himself to the elders at Ephesus (Ac 20:24). Then the "course" was ahead of him. Now it is behind him.

I have kept the faith ( $\tau \eta \nu \pi \iota \sigma \tau \iota \nu \tau \varepsilon \tau \eta \rho \eta \kappa \alpha$ ). Perfect active indicative again of $\tau \eta \rho \varepsilon \omega$. Paul has not deserted. He has kept faith with Christ. For this phrase, see Re 14:12 . Deissmann (Light, etc., p. 309) gives inscriptions in Ephesus of a man who says: "I have kept faith" ( $\tau \eta \nu$ $\pi / \sigma \tau i v \varepsilon \tau \eta \rho \eta \sigma \alpha)$ and another of a man of whom it is said: "He fought three fights, and twice was crowned."

2Tim 4:8
Henceforth ( $\lambda$ oırov). Accusative case, "for the rest."
There is laid up for me ( $\alpha \pi о \kappa \varepsilon ı \tau \alpha \mu$ ). Present passive of $\alpha \pi о \kappa \varepsilon \mu \alpha \alpha$, old verb, to be laid away. See Col 1:5 for the hope laid away. Paul's "crown of righteousness" (o тףऽ $\delta$ เкaıoбuvŋऽ
$\sigma \tau \varepsilon \varphi a v o \varsigma$, genitive of apposition, the crown that consists in righteousness and is also the reward for righteousness, the victor's crown as in 1Co 9:25 which see) "is laid away" for him.

At that day ( $\varepsilon v \varepsilon \kappa \varepsilon เ \nu \eta \tau \eta \eta \mu \varepsilon \rho \alpha)$. That great and blessed day (1:12,18).
The righteous judge (о סıкаıоя крıтпऽ). "The just judge," the umpire who makes no mistakes who judges us all (2Co 5:10 ).

Shall give me ( $\alpha \pi \sigma \delta \omega \sigma \varepsilon \mu 0$ ). Future active of $\alpha \pi o \delta ı \delta \omega \mu$. "Will give back" as in Ro 2:6 and in full.

But also to all them that have loved his appearing ( $\alpha \lambda \lambda \alpha \pi \alpha \sigma \iota \nu \tau о \iota \varsigma \eta \gamma \alpha \pi \eta \kappa о \sigma \iota \nu \tau \eta \nu$ $\varepsilon \pi \iota \varphi a v \varepsilon \iota \alpha v \alpha v \tau o v)$. Dative case of the perfect active participle of $\alpha \gamma \alpha \pi \alpha \omega$, to love, who have loved and still love his second coming. E $\pi \iota \varphi a v \varepsilon \iota a$ here can as in 1:10 be interpreted of Christ's Incarnation.

2Tim 4:9
Shortly ( $\tau \alpha \chi \varepsilon \omega \varsigma)$. In verse 21 he more definitely says "before winter." Apparently the trial might drag on through its various stages.

2Tim 4:10
Forsook me ( $\mu \varepsilon \varepsilon \gamma \kappa \alpha \tau \varepsilon \lambda \varepsilon \iota \pi \varepsilon v$ ). Imperfect (MSS. also have aorist, $\varepsilon \gamma \kappa \alpha \tau \varepsilon \lambda ı \pi \varepsilon v$ ) active of the old double compound verb $\varepsilon \gamma \kappa \alpha \tau \alpha \lambda \varepsilon \iota \pi \omega$, for which see Ro 9:29. Clearly in contrast to verse 9 and in the sense of $1 \mathrm{Ti} 6: 17$, wilful desertion. Only mentioned elsewhere in Col 4:14.

Crescens (К $\rho \eta \sigma \kappa \eta \varsigma)$. No other mention of him.
Titus to Dalmatia (Tıтoৎ $\varepsilon \iota \varsigma \Delta \alpha \lambda \mu \alpha \tau \iota \alpha v)$. Titus had been asked to rejoin Paul in Nicopolis where he was to winter, probably the winter previous to this one (Tit 3:12). He came and has been with Paul.

2Tim 4:11
Only Luke is with me ( $\left.\Lambda о v \kappa \alpha \varsigma \varepsilon \sigma \tau \iota v \mu о v o \varsigma ~ \mu \varepsilon \tau^{\prime} \varepsilon \mu о v\right)$. Luke is with Paul now in Rome as during the first Roman imprisonment (Phm 1:24; Col 4:14).

Take Mark (Маркоv $\alpha v \alpha \lambda \alpha \beta \omega v$ ). Second aorist active participle of $\alpha v \alpha \lambda \alpha \mu \beta \alpha \nu \omega$, old verb, to pick up, as in Eph 6:13,16. "Pick up Mark."

He is useful to me ( $\varepsilon \sigma \tau \iota \nu \mu о \varepsilon v \chi \rho \eta \sigma \tau о \varsigma)$. See 2:21 for $\varepsilon v \chi \rho \eta \sigma \tau \sigma \varsigma$. Paul had long ago changed his opinion of Mark (Col 4:10) because Mark had changed his conduct and had made good in his ministry. Now Paul longs to have the man that he once scornfully rejected (Ac 15:37ff. ).

2Tim 4:12
 him on before he came to Rome. He may have been still on the way to Ephesus.

2Tim 4:13
The cloke ( $\tau \eta \nu \varphi \varepsilon \lambda o v \eta \nu$ ). More common form $\varphi \varepsilon \iota \lambda o v \eta$. By metathesis for $\varphi a \iota v o \lambda \eta$, Latin paenula, though which language transliterated the word into the other is not known.

The meaning is also uncertain, though probably "cloke" as there are so many papyri examples in that sense (Moulton and Milligan, Vocabulary). Milligan (N.T. Documents, p. 20) had previously urged "book wrap" as probable but he changed his mind and rightly so.

With Carpus ( $\pi \alpha \rho \alpha$ Kар $\pi \omega$ ). "Beside Carpus," at his house. Not mentioned elsewhere. Probably a visit to Troas after Paul's return from Crete.

The books ( $\tau \alpha \beta ı \beta \lambda \iota)$. Probably papyrus rolls. One can only guess what rolls the old preacher longs to have with him, probably copies of Old Testament books, possibly copies of his own letters, and other books used and loved. The old preacher can be happy with his books.

Especially the parchments ( $\mu \alpha \lambda ı \sigma \tau \alpha \tau \alpha \varsigma \mu \varepsilon \mu \beta \rho \alpha v \alpha \varsigma)$. Latin membrana. The dressed skins were first made at Pergamum and so termed "parchments." These in particular would likely be copies of Old Testament books, parchment being more expensive than papyrus, possibly even copies of Christ's sayings (Lu 1:1-4). We recall that in Ac 26:24 Festus referred to Paul's learning ( $\tau \alpha \gamma \rho \alpha \mu \mu \alpha \tau \alpha)$. He would not waste his time in prison.

2Tim 4:14
Alexander the coppersmith (A $\lambda \varepsilon \xi \alpha v \delta \rho o \varsigma$ o $\chi \alpha \lambda \kappa \varepsilon v \varsigma)$. Old word, only here in N.T., for metal-worker (copper, iron, gold, etc.). Possibly the one in 1:20, but not the one in Ac 19:33f. unless he afterwards became a Christian.

Did me much evil ( $\mu$ кака $\varepsilon v \varepsilon \delta \varepsilon ı \xi \alpha \tau о$ ). Evidently he had some personal dislike towards Paul and possibly also he was a Gnostic.

Will render ( $\alpha \pi \sigma \delta \omega \sigma \varepsilon$ ). Future active of the same verb used in verse 8 , but with a very different atmosphere.

2Tim 4:15
Be thou ware also ( $\kappa \alpha \sigma \cup \varphi \cup \lambda \alpha \sigma \sigma o v)$. Present middle (direct) imperative of $\varphi \cup \lambda \alpha \sigma \sigma \omega$, "from whom keep thyself away."

Withstood ( $\alpha \nu \tau \varepsilon \sigma \tau \eta$ ). Second aorist active indicative of $\alpha v \theta \iota \sigma \tau \eta \mu$, "stood against my words." See 3:8; Ga 2:11 .

2Tim 4:16
At my first defence ( $\varepsilon v \tau \eta \pi \rho \omega \tau \eta \alpha \pi o \lambda o \gamma(\alpha)$. Original sense of "apology" as in Php 1:7,16. Either the first stage in this trial or the previous trial and acquittal at the end of the first Roman imprisonment. Probably the first view is correct, though really there is no way to decide.
 middle indicative of $\pi \alpha \rho \alpha ү \stackrel{\nu}{\boldsymbol{\prime}} \mu \alpha$ ). See 1Co 16:3 .

But all forsook me ( $\alpha \lambda \lambda \alpha \pi \alpha \nu \tau \varepsilon \varsigma \mu \varepsilon \varepsilon \gamma \kappa \alpha \tau \varepsilon \lambda \varepsilon ו \pi \frac{\nu}{}$ ). Same verb and tense used of Demas above (verse 10), "But all were forsaking me" (one by one) or, if aorist $\varepsilon \gamma \kappa \alpha \tau \varepsilon \lambda ı \pi о \nu$, "all at once left me."

May it not be laid to their account ( $\mu \eta$ वט in future wish with negative $\mu \eta$. Common Pauline verb $\lambda о ү \iota \zeta$ ¢о $\alpha$ (1Co 13:5; Ro 4:3,5 ).

2Tim 4:17
But the Lord stood by me (о $\delta \varepsilon \kappa v \rho ı \rho \varsigma ~ \mu о ~ \pi \alpha \rho \varepsilon \sigma \tau \eta) . ~ S e c o n d ~ a o r i s t ~ a c t i v e ~ o f ~ \pi \alpha \rho ı \sigma \tau \eta \mu$ (intransitive use), "took his stand by my side." See Ro 16:2 . Clearly Jesus appeared to Paul now at this crisis and climax as he had done so many times before.

Strengthened me ( $\varepsilon v \varepsilon \delta u v \alpha \mu \omega \sigma \varepsilon v \mu \varepsilon)$. "Poured power into me." See Php 4:13.
That through me the message might be fully proclaimed (ıva $\delta \iota$ ' $\varepsilon \mu \circ v$ то к $\eta \rho \cup \gamma \mu \alpha$ $\pi \lambda \eta \rho о \varphi о \rho \eta \theta \eta)$. Final clause with $t v \alpha$ and first aorist passive subjunctive of $\pi \lambda \eta \rho о \varphi о \rho \varepsilon \omega$ (see verse 5). Either to the rulers in Rome now or, if the first imprisonment, by his release and going to Spain.

And that all the Gentiles might hear ( $\kappa \alpha \alpha \kappa о v \sigma \omega \sigma \iota v \pi \alpha v \tau \alpha \tau \alpha \varepsilon \theta v \eta)$. Continuation of the purpose with the aorist active subjunctive of aкоvш.

I was delivered out of the mouth of the lion ( $\varepsilon \rho \cup \sigma \theta \eta \nu \varepsilon \kappa \sigma \tau о \mu \alpha \tau о \varsigma ~ \lambda \varepsilon о \nu \tau о \varsigma)$. First aorist passive indicative of $\rho v o \mu \alpha$ ( $1 \mathrm{Th} 1: 10$ ). A proverb, but not certain what the application is whether to Nero or to Satan (1Th 2:18) or to the lion in the arena where Paul could not be sent because a Roman citizen.

2Tim 4:18
Will deliver me ( $\rho v \sigma \varepsilon \tau \alpha \mu \varepsilon$ ). Future middle. Recall the Lord's Prayer. Paul is not afraid of death. He will find his triumph in death (Php 1:21f.).
 of glory as in 1Co 15:24,50. He will save ( $\sigma \omega \sigma \varepsilon$, effective future) me there finally and free from all evil.

To whom be the glory ( $\omega \eta \delta 0 \xi \alpha$ ). No verb in the Greek. Paul's final doxology, his Swan Song, to Christ as in Ro 9:5; 16:27.

2Tim 4:19
Prisca and Aquila ( $П \rho ь \sigma \chi$ к ка Aки入аv). Paul's friends now back in Ephesus, no longer in Rome (Rom 16:3). See 1:16 for the house of Onesiphorus.

2Tim 4:20
Erastus (Eрaбтoऽ). See Ac 19:22; Ro 16:23.
Trophimus (Трочцоv). A native of Ephesus and with Paul in Jerusalem (Ac 20:4; 21:29 ).

At Miletus sick ( $\varepsilon v \mathrm{M} \lambda \lambda \eta \tau \omega \alpha \sigma \theta \varepsilon v o u v \tau \alpha$ ). Present active participle of $\alpha \sigma \theta \varepsilon v \varepsilon \omega$, to be weak. Probably on Paul's return from Crete.

2Tim 4:21
Before winter ( $\pi \rho \circ \chi \varepsilon \not \varepsilon \omega v \circ \varsigma)$ ). Pathetic item if Paul was now in the Mamertine Dungeon in Rome with winter coming on and without his cloak for which he asked. How long he had been in prison this time we do not know. He may even have spent the previous winter or
part of it here. Eubulus, Pudens, Linus, Claudia are all unknown otherwise. Irenaeus does speak of Linus.

The Lord be with thy Spirit (о кvpıos $\mu \varepsilon \tau \alpha$ тov $\pi v \varepsilon \cup \mu \alpha \tau о \varsigma ~ \sigma о v)$. Let us hope that Timothy and Mark reached Paul before winter, before the end came, with the cloak and with the books. Our hero, we may be sure, met the end nobly. He is already more than conqueror in Christ who is by his side and who will welcome him to heaven and give him his crown. Luke, Timothy, Mark will do all that mortal hands can do to cheer the heart of Paul with human comfort. He already had the comfort of Christ in full measure.

EPISTLE TO TITUS
PROBABLY 66 OR 67

APPARENTLY FROM NICOPOLIS

## Titus 1

Titus 1:1
According to the faith of God's elect ( $\kappa \alpha \tau \alpha \pi \iota \sigma \tau \iota v \varepsilon \kappa \lambda \varepsilon \kappa \tau \omega v \theta \varepsilon o v)$. Here ката expresses the aim of Paul's apostleship, not the standard by which he was chosen as in Php 3:14; a classic idiom, repeated here with $\varepsilon \pi \iota \gamma v \omega \sigma \iota v, \varepsilon v \sigma \varepsilon \beta \varepsilon \iota \alpha v, \varepsilon \pi \iota \tau \alpha \gamma \eta \nu$, "with a view to" in each case. For "God's elect" see Ro 8:33; Col 3:12 .

The knowledge ( $\varepsilon \pi \iota \gamma v \omega \sigma \iota v$ ). "Full knowledge," one of Paul's favourite words. For the phrase see 1Ti 2:4.

Which is according to godliness ( $\left.\tau \eta \varsigma \kappa \alpha \tau^{\prime} \varepsilon \cup \sigma \varepsilon \beta \varepsilon \iota \alpha v\right)$. "The (truth) with a view to godliness." The combination of faith and full knowledge of the truth is to bring godliness on the basis of the hope of life eternal.

Titus 1:2
God who cannot lie (o $\alpha \psi \varepsilon v \delta \eta \varsigma \theta \varepsilon o \varsigma)$ ) "The non-lying God." Old adjective (a privative and $\psi \varepsilon \cup \delta \eta \varsigma)$, here only in N.T. See 2Ti 2:13. In Polycarp's last prayer.

Promised ( $\varepsilon \pi \eta \gamma \gamma \varepsilon i \lambda \alpha \tau o$ ). First aorist middle indicative of $\varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$. Antithesis in $\varepsilon \varphi \alpha v \varepsilon \rho \omega \sigma \varepsilon v \delta \varepsilon$ (manifested) in verse 3 (first aorist active indicative of $\varphi \alpha v \varepsilon \rho o \omega)$. Same contrast in Ro 16:25; Col 1:26.

Before times eternal ( $\pi \rho \circ \chi \rho \circ \nu \omega \nu \alpha \omega \omega v \omega v$ ). Not to God's purpose before time began (Eph 1:4; 2Ti 1:9), but to definite promises (Ro 9:4) made in time (Lock). "Long ages ago." See Ro 16:25.

Titus 1:3
In his own seasons (кaıроıя ıঠııя). Locative case. See $1 \mathrm{Ti} 2: 6 ; 6: 15$.
In the message ( $\varepsilon \nu \kappa \eta \rho \cup \gamma \mu \alpha \tau$ ). See 1Co 1:21; 2:4 for this word, the human proclamation (preaching) of God's word.

Wherewith I was intrusted (o $\varepsilon \pi \iota \sigma \tau \varepsilon v \theta \eta \nu)$. Accusative relative o retained with the first aorist passive indicative of $\pi \quad \sigma \tau \varepsilon \cup \omega$ as in 1Ti 1:11. See 1Ti 2:7.

Of God our Saviour ( $\tau 0 v \sigma \omega \tau \eta \rho \circ \varsigma \eta \mu \omega v \theta \varepsilon o v$ ). In verse 4 he applies the words " $\tau 0$ $\sigma \omega \tau \eta \rho o \varsigma ~ \eta \mu \omega v^{\prime \prime}$ to Christ. In 2:13 he applies both $\theta \varepsilon o v$ and $\sigma \omega \tau \eta \rho o \varsigma$ to Christ.

Titus 1:4
My true child ( $\gamma \nu \eta \sigma \omega \tau \varepsilon \kappa \nu \omega)$. See 1Ti 1:2 for this adjective with Timothy. Titus is not mentioned in Acts, possibly because he is Luke's brother. But one can get a clear picture of him by turning to 2Co 2:13; 7:6-15; 8:6-24; 12:16-18; Ga 2:1-3; Tit 1:4f.; 3:12; 2Ti 4:10 . He had succeeded in Corinth where Timothy had failed. Paul had left him in Crete as superintendent of the work there. Now he writes him from Nicopolis (Tit 3:12).

After a common faith ( $\kappa \alpha \tau \alpha \kappa о \iota \nu \eta v \pi \iota \tau \iota v)$. Here ката does mean standard, not aim, but it is a faith ( $\pi \iota \sigma \tau \iota v$ ) common to a Gentile (a Greek) like Titus as well as to a Jew like Paul
and so common to all races and classes (Jude 1:3). Kovos does not here have the notion of unclean as in Ac 10:14; 11:8 .

Titus 1:5
For this cause ( $\tau$ ovtov $\chi \alpha \rho ı v$ ). In N.T. only here and Eph 3:1,14. Paul may be supplementing oral instruction as in Timothy's case and may even be replying to a letter from Titus (Zahn).

Left I thee in Crete ( $\alpha \pi \varepsilon \lambda \varepsilon \iota \pi o \nu \sigma \varepsilon \varepsilon \nu \mathrm{~K} \rho \eta \tau \eta)$. This is the imperfect active of $\alpha \pi 0 \lambda \varepsilon ı \pi \omega$,
 Both are common verbs, though Paul uses $\kappa \alpha \tau \alpha \lambda \varepsilon ו \pi \omega$ only in 1Th 3:1 except two quotations (Ro 11:4; Eph 5:31) and $\alpha \pi 0 \lambda \varepsilon ı \pi \omega$ only here and 2Ti 4:13,20. Perhaps $\alpha \pi 0 \lambda \varepsilon ı \pi \omega$ suggests a more temporary stay than $\kappa \alpha \tau \alpha \lambda \varepsilon ו \pi \omega$. Paul had apparently stopped in Crete on his return from Spain about A.D. 65.

That thou shouldest set in order (ıva $\varepsilon \pi \iota \delta \iota o \rho \theta \omega \sigma \eta$ ). Late and rare double compound (inscriptions, here only in N.T.), first aorist middle subjunctive (final clause with $\mathrm{v} \alpha$ ) of $\varepsilon \pi \iota \delta \iota o \rho \theta$ o $\omega$, to set straight ( $o \rho \theta$ o $\omega$ ) thoroughly ( $\delta \iota \alpha$ ) in addition ( $\varepsilon \pi$ ), a clean job of it.

The things that were wanting ( $\tau \alpha \lambda \varepsilon ו \pi о \nu \tau \alpha$ ). "The things that remain." See 3:13; Lu 18:22. Either things left undone or things that survive. In both senses the new pastor faces problems after the tornado has passed. Parry takes it "of present defects" in Cretan character.

And appoint (ка катабтпбๆџ). Final clause still and first aorist active subjunctive of $\kappa \alpha \theta เ \sigma \tau \eta \mu$, the word used in Ac 6:13 about the deacons. The word does not preclude the choice by the churches (in every city, ката $\pi о \lambda \iota \downarrow$, distributive use of ката). This is a chief point in the $\varepsilon \pi \iota \delta o \rho \theta \omega \sigma \iota \varsigma$ (White).

Elders ( $\pi \rho \varepsilon \sigma \beta \cup \tau \varepsilon \rho \circ и \varsigma)$. See $1 \mathrm{Ti} 3: 2 ; 4: 17$.
As I gave thee charge ( $\omega \varsigma \varepsilon \gamma \omega \sigma 0 \delta \varepsilon \varepsilon \tau \alpha \xi \alpha \mu \eta \nu$ ). First aorist (constative) middle imperative of $\delta \iota \alpha \tau \alpha \sigma \sigma \omega$, clear reference to previous personal details given to Titus on previous occasions.

Titus 1:6
Blameless ( $\alpha v \varepsilon \gamma \kappa \lambda \eta \tau \pi \varsigma)$. In a condition of first class. Used in 1Ti 3:10 of deacons which see.

That believe ( $\pi \iota \sigma \tau \alpha$ ). Added to what is in 1Ti 3:4. "Believing children."
Not accused of riot ( $\mu \eta \varepsilon \nu \kappa \alpha \tau \eta \gamma \quad \rho \iota \alpha \alpha \sigma \omega \tau \iota \alpha \varsigma)$. See 1Ti 5:19 for кат $\eta \gamma$ орı $\alpha$ and Eph 5:18 for $\alpha \sigma \omega \tau \iota \alpha$. "Not in accusation of profligacy."

Unruly ( $\alpha v \cup \pi о \tau \alpha \kappa \tau \alpha)$. See 1Ti 1:9. Public disorder, out of doors. See also verse 10.
Titus 1:7
The bishop ( $\tau 0 v \varepsilon \pi \iota \sigma \kappa \circ \pi \sigma v$ ). Same office as "elder" in 1:5. "Elder is the title, oversight is the function" (B. Weiss).

As God's steward ( $\omega \varsigma$ हعov oוкоvo $\mu$ ov). See 1Co 4:1f. for Paul's idea of the bishop (elder) as God's steward (cf. 1Co 9:17; Col 1:25; Eph 3:2; 1Ti 1:4 ).

Not self-willed ( $\mu \eta \alpha v \theta \alpha \delta \eta$ ). Old word (from $\alpha v \tau o \sigma, \eta \delta o \mu \alpha$ ), self-pleasing, arrogant. In N.T. only here and 2Pe 2:10 .

Not soon angry (o $\rho \gamma \iota \lambda o v$ ). Old adjective from o $\rho \gamma \eta$ (anger). Here only in N.T. Vulgate, iracundum. For "brawler" and "striker" see 1Ti 3:2 .

Not greedy of filthy lucre ( $\alpha \iota \sigma \chi \rho \circ \kappa \varepsilon \rho \delta \eta$ ). "Not greedy of shameful gain." Used of deacons in 1Ti 3:8, a $1 \lambda \alpha \rho \gamma \cup \rho o v$ used of elders in 1Ti 3:3.

Titus 1:8
A lover of good $(\varphi \iota \lambda \alpha \gamma \beta \theta \sigma)$. Late double compound ( $\varphi \iota \lambda o \sigma, \alpha \gamma \alpha \theta o \varsigma)$. See Wisdom 7:22. Here only in N.T. Just ( $\delta \iota \kappa \alpha \iota \circ$ ), holy (ođıov) not in 1Ti 3 .

Temperate ( $\varepsilon \gamma \kappa \rho \alpha \tau \eta$ ). Old and common adjective ( $\varepsilon \nu, \kappa \rho \alpha \tau \circ \varsigma$, strength), having power over, controlling, here only in N.T. Picture of self-control.

Titus 1:9
Holding to ( $\alpha \nu \tau \varepsilon \chi \circ \mu \varepsilon v o v)$. Present middle participle of $\alpha \nu \tau \varepsilon \chi \omega$, old verb, to hold back, in middle to hold oneself face to face with, to cling to, as in 1Th 5:14.

The faithful word ( $\tau 00 \pi$ Iotov $\lambda o \gamma o v$ ). See $1 \mathrm{Ti} \mathrm{1:15;} \mathrm{6:3;} \mathrm{Ro} \mathrm{16:17}$. reference here to Christ as the Personal Logos.

That he may be able ( $\imath v \alpha \delta v v a \tau o \varsigma ~ \eta$ ). Final clause with present active subjunctive. Paul several times uses $\delta v v a \tau o \varsigma \varepsilon \iota \mu$ in the sense of $\delta v v a \mu \alpha$, with infinitive as here (Ro 4:21; 11:23; 2Ti 1:12).

The gainsayers ( $\tau 0 v \varsigma ~ \alpha v \tau \iota \lambda \varepsilon \gamma o v \tau \alpha \varsigma)$. Present active participle of $\alpha v \tau \iota \lambda \varepsilon \gamma \omega$, old word, to answer back, as in Ro 10:21 . "The talkers back."

Titus 1:10
Vain talkers ( $\mu \alpha \tau \alpha \circ \lambda о \gamma o$ ). Late and rare compound, empty talkers, in Vett. Val. and here. See 1Ti 1:6 for $\mu \alpha \tau \alpha ı \lambda о \gamma \iota a$.

Deceivers ( $\varphi \rho \varepsilon v a \pi \alpha \tau \alpha$ ). Late and rare compound, in papyri, eccl. writers, here alone in N.T. "Mind-deceivers." See Ga 6:3 for $\varphi \rho \varepsilon v a \pi \alpha \tau \alpha ı v$.

Specially they of the circumcision ( $\mu \alpha \lambda \iota \sigma \tau \alpha$ о $\varepsilon \kappa \tau \eta \varsigma \pi \varepsilon \rho \iota \tau о \mu \eta \varsigma$ ). Same phrase in Ac 11:2; Ga 2:12; Col 4:11. Jews are mentioned in Crete in Ac 2:11 . Apparently Jewish Christians of the Pharisaic type tinged with Gnosticism.

Titus 1:11
Whose mouths must be stopped (ovৎ $\delta \varepsilon \varepsilon \pi \iota \sigma \tau o \mu \iota \zeta \varepsilon ı$ ). Literally, "whom it is necessary to silence by stopping the mouth." Present active infinitive $\varepsilon \pi \iota \sigma \tau \circ \mu \iota \zeta \varepsilon \imath$, old and common $\operatorname{verb}(\varepsilon \pi, \sigma \tau o \mu \alpha$, mouth), here only in N.T. To stop the mouth either with bridle or muzzle or gag.

Overthrow (avat $\rho \varepsilon \pi \sigma \sigma \sigma \iota$ ). Old and common verb, to turn up, to overturn. In N.T. only here and $2 \mathrm{Ti} 2: 18$. In papyri to upset a family by perversion of one member.

Things which they ought not ( $\alpha \mu \eta \delta \varepsilon$ ). Note subjective negative $\mu \eta$ with indefinite relative and indicative mode.

For filthy lucre's sake ( $\alpha \bullet \sigma \chi \rho \circ \cup$ к $\varepsilon \rho \delta o v \varsigma ~ \chi \alpha \rho เ v)$. The Cretans are given a bad reputation for itinerating prophets for profit by Polybius, Livy, Plutarch. Paul's warnings in 1Ti 3:3,8; 6:5 reveal it as "a besetting temptation of the professional teacher" (Parry). See verse 7 above. Disgraceful gain, made in shameful ways.

Titus 1:12
A prophet of their own ( $\llcorner\delta \iota \varsigma \alpha \cup \tau \omega v \pi \rho \circ \varphi \eta \tau \eta \varsigma)$. "Their own prophet." Self-styled "prophet" (or poet), and so accepted by the Cretans and by Cicero and Apuleius, that is Epimenides who was born in Crete at Cnossos. It is a hexameter line and Callimachus quoted the first part of it in a Hymn to Zeus. It is said that Epimenides suggested to the Athenians the erection of statues to "unknown gods" (Ac 17:23).

Liars ( $\psi \varepsilon v \sigma \tau \alpha$ ). See 1Ti 1:10 for the word. The Cretans had a bad reputation on this line, partly due to their claim to having the tomb of Zeus.

Evil beasts (кака $\theta \eta \rho ı \alpha$ ). "Wicked wild beasts." Lock asks if the Minotaur was partly responsible.

Idle gluttons ( $\gamma \alpha \sigma \tau \varepsilon \rho \varepsilon \varsigma \alpha \rho \gamma \alpha$ ). "Idle bellies." Blunt and forceful. See Php 3:19 "whose god is the belly" ( $\eta$ коı $\lambda ı \alpha)$. Both words give the picture of the sensual gormandizer.

Titus 1:13
Testimony ( $\mu \alpha \rho \tau v \rho 1 \alpha$ ). Of the poet Epimenides. Paul endorses it from his recent knowledge.

Sharply ( $\alpha \pi о \tau о \mu \omega \varsigma$ ). Old adverb from $\alpha \pi о \tau о \mu \circ \varsigma$ (from $\alpha \pi о \tau \varepsilon \mu \nu \omega$, to cut off), in N.T. only here and 2Co 13:10, "curtly," "abruptly." It is necessary to appear rude sometimes for safety, if the house is on fire and life is in danger.

That they may be sound (ıva vүıaıvตoıv). Final clause with iva and present active subjunctive of $v \gamma \iota a \iota v \omega$, for which verb see on 1Ti 1:10.

Titus 1:14
 Perhaps a reference to the oral traditions condemned by Christ in Mr 7:2-8. See also Col 2:22, apparently Pharisaic type of Gnostics.

Who turn away from the truth ( $\alpha \pi \sigma \sigma \tau \rho \varepsilon \varphi \rho \mu \varepsilon v \omega v$ ). Present middle (direct) participle of $\alpha \pi о \sigma \tau \rho \varepsilon \varphi \omega$, "men turning themselves away from the truth" (accusative according to regular idiom). "The truth" (1Ti 4:3) is the gospel (Eph 4:21).

Titus 1:15
To them that are defiled ( $\tau o \iota \varsigma \mu \varepsilon \mu \iota \alpha \mu \varepsilon v o \iota \varsigma)$. Perfect passive articular participle of $\mu \mu \iota v \omega$, old verb, to dye with another colour, to stain, in N.T. only here, Jude 1:8; Heb 12:15 . See $\mu \varepsilon \mu \mu \alpha \tau \tau \alpha$ (perf. pass. indic.) in this verse. Mo $\lambda v v \omega$ (1Co 8:7) is to smear.

Unbelieving (ađıбтoı¢). As in 1Co 7:12f.; 1Ti 5:8. The principle or proverb just quoted appears also in 1Co 6:12; 10:23; Ro 14:20. For the defilement of mind (vous) and conscience ( $\sigma \cup v \varepsilon \iota \delta \eta \sigma \iota \varsigma)$ in both Gentile and Jew by sin, see Ro 1:18-2:29.

Titus 1:16
They profess (o $\rho 0 \lambda o \gamma o v \sigma \iota v$ ). Present active indicative of o $\mu \mathrm{o} \lambda o \gamma \varepsilon \omega$, common verb (o $\mu o v, \lambda \varepsilon \gamma \omega$ ) as in Ro 10:10f . Eı $\delta \varepsilon v a$ (know) is second perfect active infinitive of ot $\delta \alpha$ in indirect assertion.

By their works ( $\tau o \iota \varsigma \varepsilon \rho \gamma o \iota \varsigma)$. Instrumental case.
They deny ( $\alpha \rho v o u v \tau \alpha$ ). Present middle of $\alpha \rho v \varepsilon o \mu \alpha$, old verb, common in the Gospels and the Pastoral Epistles (1Ti 5:8; Tit 2:12; 2Ti 2:12).

Abominable ( $\beta \delta \varepsilon \lambda \cup \kappa \tau о$ ). Verbal adjective from $\beta \delta \varepsilon \lambda \nu \sigma \sigma o \mu \alpha$. Only in LXX and here.
Disobedient ( $\alpha \pi \varepsilon \neq \varepsilon \iota \varsigma)$. See Ro 1:30.
Reprobate ( $\alpha \delta$ окıцо). See on 1Co 9:27; Ro 1:28.

## Titus 2

Titus 2:1
But speak thou ( $\sigma v \delta \varepsilon \lambda \alpha \lambda \varepsilon$ ). In contrast to these Pharisaic Gnostics in Crete.
Befit ( $\pi \rho \varepsilon \pi \varepsilon$ ). Old verb to be becoming, seemly. See 1Ti 2:10; Eph 5:3. With dative case $\delta \iota \delta \alpha \sigma \kappa \alpha \lambda \iota \alpha$.

Sound (vyıaıvovoף). Healthful as in 1:13;2:2;1Ti 1:10, common word in the Pastorals.
Titus 2:2
Aged men ( $\pi \rho \varepsilon \sigma \beta v \tau \alpha \varsigma)$. See Phm 1:9 for this word. For discussion of family life see also Co 3:18-4:1; Eph 5:22-6:9; 1Ti 5:1-6:2 . For the adjectives here see $1 \mathrm{Ti} 3: 2,8$; for the substantives see 1 Ti 6:11.

Titus 2:3
Aged women ( $\pi \rho \varepsilon \sigma \beta v \tau i \delta \alpha \varsigma)$. Old word, feminine of $\pi \rho \varepsilon \sigma \beta v \tau \eta \varsigma$, only here in N.T. See $\pi \rho \varepsilon \sigma \beta v \tau \varepsilon \rho a \varsigma$ in 1Ti 5:2.

Reverent (ı $\varepsilon \rho о \pi \rho \varepsilon \pi \varepsilon \iota \varsigma)$. Old word ( $\varepsilon \iota \rho о \sigma, \pi \rho \varepsilon \pi \varepsilon)$. Only here in N.T. Same idea in 1 Ti 2:10. Like people engaged in sacred duties (Lock).

In demeanour ( $\varepsilon \nu \kappa \alpha \tau \alpha \sigma \tau \eta \mu \alpha \tau$ ). Late and rare word (inscriptions) from $\kappa \alpha \theta \iota \sigma \tau \eta \mu$, deportment, only here in N.T.

Not slanderers ( $\mu \eta \delta \operatorname{l} \alpha \beta \mathrm{o} \lambda \mathrm{ov}$ ). See 1Ti 3:11; 2Ti 3:3.
Nor enslaved to much wine ( $\mu \eta \delta \varepsilon o \iota \nu \omega \pi o \lambda \lambda \omega \delta \varepsilon \delta o u \lambda \omega \mu \varepsilon v a \varsigma)$. Perfect passive participle of $\delta o v \lambda o \omega$, with dative case otv $\omega$. See $1 \mathrm{Ti} 3: 8$. "It is proved by experience that the reclamation of a woman drunkard is almost impossible" (White). But God can do the "impossible."

Teachers of that which is good ( $\kappa \alpha \lambda о \delta ı \delta \alpha \sigma \alpha \lambda о \cup \varsigma) . ~ C o m p o u n d ~ w o r d ~ f o u n d ~ h e r e ~$ alone, bona docentes (teaching good and beautiful things). A sorely needed mission.

Titus 2:4
That they may train ( $\iota \alpha \sigma \omega \varphi \rho o v \iota \omega \sigma \iota v$ ). Purpose clause, $\iota v \alpha$ and present active subjunctive of $\sigma \omega \varphi \rho o v i \zeta \omega$, old verb (from $\sigma \omega \varphi \rho \omega \nu$, sound in mind, $\sigma \alpha \sigma \sigma, \varphi \rho \eta \nu$, as in this verse), to make sane, to restore to one's senses, to discipline, only here in N.T.

To love their husbands ( $\varphi \lambda \lambda \nu \delta \rho o v \varsigma \varepsilon เ v \alpha$ ). Predicate accusative with $\varepsilon เ v \alpha$ of old adjective $\varphi i \lambda \alpha v \delta \rho \circ \varsigma$ ( $\varphi \iota \lambda o \sigma$, $\alpha \nu \eta \rho$, fond of one's husband), only here in N.T. A $\nu \eta \rho$ means man, of course, as well as husband, but only husband here, not "fond of men" (other men than their own).
 exhortation is still needed where some married women prefer poodle-dogs to children.

Titus 2:5
Workers at home (o七коирүоия). So the oldest MSS. (from о七коб, $\varepsilon \rho \gamma о v$ ) instead of oוкоироия, keepers at home (from коьбо, ov оос, keeper). Rare word, found in Soranus, a medical writer, Field says. Cf. 1Ti 5:13 . "Keepers at home" are usually "workers at home."

Kind ( $\alpha \gamma \alpha \theta a \varsigma$ ). See Ro 5:7. See Col 3:18; Eph 5:22 for the same use of v $\boldsymbol{\pi} \boldsymbol{\tau} \boldsymbol{\tau} \alpha \sigma \sigma \sigma \mu \alpha$, to be in subjection. Note $\delta$ oloı (their own). See $1 \mathrm{Ti} 6: 1$ for the same negative purpose clause ( $\downarrow \alpha \mu \eta \beta \lambda \alpha \sigma \varphi \eta \mu \eta \tau \alpha$ ).

Titus 2:6
The younger men ( $\tau 0 \cup \varsigma \nu \varepsilon \omega \tau \varepsilon \rho \circ \cup \varsigma)$. Just one item, besides "likewise" (oбavt $\omega \varsigma$ as in 3; 1Ti 2,9), "to be soberminded" ( $\sigma \omega \varphi \rho$ oveıv, old verb as in Rom 12:3 ). It is possible to take "in all things" ( $\pi \varepsilon \rho \pi \alpha v \tau \alpha$ ) with $\sigma \omega \varphi \rho \circ v \varepsilon \iota v$, though the editors take it with verse 7 .

Titus 2:7
Shewing thyself ( $\sigma \varepsilon \alpha v \tau 0 v \pi \alpha \rho \varepsilon \chi \circ \mu \varepsilon v o \varsigma)$. Present middle (redundant middle) participle of $\pi \alpha \rho \varepsilon \chi \omega$ with the reflexive pronoun $\sigma \varepsilon \alpha u \tau 0 v$ as if the active voice $\pi \alpha \rho \varepsilon \chi \omega v$. The Koine shows an increasing number of such constructions (Robertson, Grammar, p. 811). See active in 1Ti 1:4.

An ensample ( $\tau \cup \pi \sigma v$ ). For this word see 2Th 3:9; Php 3:17.
Uncorruptness ( $\alpha \varphi \theta$ opıav). Only example, from late adjective $\alpha \varphi \theta$ o $\rho o s$ ( $\alpha$ privative and $\varphi \theta \varepsilon \iota \rho \omega)$.

Titus 2:8
Sound ( $v \gamma \iota \hat{A} \eta$, Attic usually $u \gamma \iota \hat{A} \alpha$ in accusative singular), elsewhere in Pastorals participle $u \nmid a v A ̂ \omega v$ (verse 1).

That cannot be condemned ( $\alpha \kappa \alpha \tau \alpha \gamma v \omega \sigma \tau \sigma v$ ). Only N.T. example (verbal, a privative and катаүvตбтоৎ) and in IV Macc. 4:47. Deissmann (Bible Studies, p. 200) quotes it from an inscription and the adverb from a papyrus.

He that is of the contrary part (o $\varepsilon \xi \varepsilon v a v \tau i a c)$ ) "The one on the opposite side" (your opponent). Cf. verse 9; 1Ti 5:14.

May be ashamed ( $\imath v \alpha \varepsilon v \tau \rho \alpha \pi \eta$ ). Final clause with $t v \alpha$ and second aorist passive subjunctive of $\varepsilon v \tau \rho \varepsilon \pi \omega$, to turn, in middle and passive to turn one on himself and so be ashamed (to blush) as in 2Th 3:14; 1Co 4:14. This sense in the papyri.

Evil ( $\varphi$ au $\bar{\lambda}$ ov). Old word, easy (easy morals), worthless; bad, as in 2Co 5:10 .
Titus 2:9
 (סєототаıц).

Well-pleasing (evapsбтouc). See on 2Co 5:9.
Not gainsaying ( $\mu \eta \alpha v \tau \iota \lambda \varepsilon \gamma 0 v \tau \alpha \varsigma)$. "Not answer back." See Ro 10:21.
Titus 2:10
Not purloining ( $\mu \eta$ voo $\varphi \iota \zeta о \mu \varepsilon v o v \varsigma)$. Present middle participle of $\operatorname{vo\sigma } \varphi \iota \zeta \omega$, old verb (from $\operatorname{vo\sigma } \varphi$, apart), in middle to set apart for oneself, to embezzle, in N.T. only here and Ac 5:2f.

Fidelity ( $\pi / \sigma \tau \iota v$ ). See Ga 5:22; $1 \mathrm{Ti} 5: 12$ for $\pi / \sigma \tau \iota \varsigma$ in the sense of faithfulness. Nowhere else in the N.T. do we have $\alpha \gamma \alpha \theta \eta$ with $\pi \iota \sigma \tau \iota \varsigma$ as here, but an Oxyr. papyrus (iii. 494, 9) has
this very phrase ( $\pi \alpha \sigma \alpha v \pi \iota \sigma \tau เ v \varepsilon v \delta \varepsilon ı \kappa v \nu \mu \varepsilon v \eta)$. Westcott and Hort put $\alpha \gamma \alpha \pi \eta v$ in the margin. See 3:2.

That they may adorn ( $\quad v \alpha$ коб $\mu \omega \sigma \tau v$ ). Final clause with $\mathrm{v} \alpha$ and present active subjunctive. See 1 Ti 2:9 for коб $\mu \varepsilon \omega$. Paul shows slaves how they may "adorn" the teaching of God.

Titus 2:11
Hath appeared ( $\varepsilon \pi \varepsilon \varphi a \vee \eta)$. "Did appear," the first Epiphany (the Incarnation). Second aorist passive indicative of $\varepsilon \pi \iota \varphi \alpha \iota v \omega$, old verb, in N.T. here, 3:4; Lu 1:79; Ac 27:20 .

Bringing salvation ( $\sigma \omega \tau \eta \rho เ \circ \varsigma)$. Old adjective from $\sigma \omega \tau \eta \rho$ (Saviour), here alone in N.T. except to $\sigma \omega \tau \tau \rho \iota o v$ (salvation, "the saving act") in Lu 2:30; 3:6; Eph 6:17 .

Instructing ( $\pi \alpha \downarrow \delta \varepsilon v o v \sigma \alpha)$. See 1Ti 1:20 .
Ungodliness ( $\alpha \sigma \varepsilon \beta \varepsilon \iota \alpha v$ ). See Ro 1:18.
 коб $о \varsigma$ ) about the universe as in Heb 9:1 about the earthly. Here it has alone in N.T. the sense of evil "in this present age" as with кобноя in 1Jo 2:16. The three adverbs set off the opposite (soberly $\sigma \omega \varphi \rho \circ \vee \omega \varsigma$, righteously $\delta \iota \kappa \alpha \omega \varsigma$, godly $\varepsilon v \sigma \varepsilon \beta \omega \varsigma$ ).

Titus 2:13
Looking for ( $\pi \rho \circ \sigma \delta \varepsilon \chi \circ \mu \varepsilon v o$ ). Present middle participle of $\pi \rho o \sigma \delta \varepsilon \chi \circ \mu \alpha$, old verb, the one used of Simeon ( $\operatorname{Lu} 2: 25$ ) and others ( $\operatorname{Lu} 2: 38$ ) who were looking for the Messiah.

The blessed hope and appearing of the glory ( $\tau \eta \nu \mu \alpha \kappa \alpha \rho ı \alpha v \varepsilon \lambda \pi \iota \delta \alpha \kappa \alpha \varepsilon \pi \iota \varphi a v \varepsilon ı \nu \nu \tau \eta \varsigma$ $\delta o \xi \eta \varsigma)$. The word $\varepsilon \pi \iota \varphi a v \varepsilon ⿺ a$ (used by the Greeks of the appearance of the gods, from $\varepsilon \pi \iota \varphi \alpha v \eta \sigma, \varepsilon \pi \iota \varphi \alpha \iota \nu \omega)$ occurs in 2Ti 1:10 of the Incarnation of Christ, the first Epiphany (like the verb $\varepsilon \pi \varepsilon \varphi \alpha \vee \eta$, Tit 2:11 ), but here of the second Epiphany of Christ or the second coming as in 1Ti 6:14; 2Ti 4:1,8. In 2Th 2:8 both ertıpaveıa and $\pi \alpha \rho o v \sigma ı \alpha$ (the usual word) occur together of the second coming.

Of our great God and Saviour Jesus Christ ( $\tau \circ \cup \mu \varepsilon \gamma \alpha \lambda o v \theta \varepsilon o v ~ к \alpha ~ \sigma \omega \tau \eta \rho o s ~ I \eta \sigma o v$ Xpıotov). This is the necessary meaning of the one article with $\theta$ عov and $\sigma \omega \tau \eta \rho o \varsigma$ just as in 2 Pe 1:1,11. See Robertson, Grammar, p. 786. Westcott and Hort read X $\rho ı \sigma \tau o v \mathrm{I} \eta \sigma o v$.

Titus 2:14
Who gave himself for us ( $\mathrm{o} \varsigma \delta \omega \kappa \varepsilon v \varepsilon \alpha \cup \tau o v ~ v \pi \varepsilon \rho ~ \eta \mu \omega v$ ). Paul's great doctrine ( $\mathrm{Ga} 1: 4$; 2:20; 1Ti 2:6).

That he might redeem us (iva $\lambda \nu \tau \rho \omega \sigma \eta \tau \alpha$ ). Final clause, $t v \alpha$ and the aorist middle subjunctive of $\lambda \nu \tau \rho o \omega$, old verb from $\lambda \nu \tau \rho o v$ (ransom), in N.T. only here, Lu 24:21; 1 Pe 1:18.

Purify to himself ( $\kappa \alpha \theta \alpha \rho \iota \sigma \eta \varepsilon \alpha \nu \tau \omega)$. Final clause with first aorist active subjunctive of $\kappa \alpha \theta \alpha \rho \iota \zeta \omega$, for which verb see Eph 5:26 .

Lawlessness ( $\alpha$ vouıac). See 2Th 2:3.

A people for his own possession ( $\lambda \alpha o v \pi \varepsilon \rho เ o v \sigma ı v$ ). A late word (from $\pi \varepsilon \rho เ \varepsilon \iota \mu$, to be over and above, in papyri as well as $\pi \varepsilon \rho เ o v \sigma ı \alpha)$, only in LXX and here, apparently made by the LXX, one's possession, and so God's chosen people. See 1Pe 2:9 ( $\lambda \alpha 0 \varsigma \varepsilon \iota \varsigma \pi \varepsilon \rho ı \pi о ı \eta \sigma \iota)$.

Zealous of good works ( $\zeta \eta \lambda \omega \tau \eta \nu \kappa \alpha \lambda \omega \nu \varepsilon \rho \gamma \omega \nu)$. "A zealot for good works." Substantive for which see 1Co 14:12; Ga 1:14. Objective genitive $\varepsilon \rho \gamma \omega \nu$.

Titus 2:15
With all authority ( $\mu \varepsilon \tau \alpha \pi \alpha \sigma \eta \varsigma \varepsilon \pi \iota \tau \alpha \gamma \eta \varsigma)$. See $1 \operatorname{Co} 7: 6 ; 2 \operatorname{Co} 8: 8$. Assertion of authority is sometimes necessary.

Let no man despise thee ( $\mu \eta \delta \varepsilon \iota \varsigma ~ \sigma o v \pi \varepsilon \rho \iota \rho \rho о \nu \varepsilon \iota \tau \omega$ ). Present active imperative in prohibition of $\pi \varepsilon \rho\llcorner\rho \rho \circ \varepsilon \omega$, old verb, only here in N.T., to think around (on all sides). Literally, "let no man think around thee" (and so despise thee). In 1Ti 4:12 it is ката甲 $\quad$ oveıt $\omega$ (think down on), a stronger word of scorn, but this one implies the possibility of one making mental circles around one and so "out-thinking" him. The best way for the modern minister to command respect for his "authority" is to do thinking that will deserve it.

## Titus 3

Titus 3:1
To be in subjection to rulers, to authorities, to be obedient ( $\alpha \rho \chi \alpha ı \varsigma \varepsilon \xi$ ovoıaı, ขлотаббєбӨа $\pi \varepsilon ө \alpha \rho \chi \varepsilon ı v)$. Remarkable double asyndeton, no ка (and) between the two substantives or the two verbs. Пعı $\theta a \rho \chi \varepsilon \iota \nu$ (to obey), old verb (from $\pi \varepsilon \iota \theta$ o $\mu \alpha \iota, \alpha \rho \chi \eta$ ), in N.T. only here and Ac 27:21.

To be ready unto every good work ( $\pi \rho \circ \varsigma \pi \alpha \nu \varepsilon \rho \gamma \circ \nu \alpha \gamma \alpha \theta 0 \nu \varepsilon \tau \circ \mu \rho \nu \varsigma \varepsilon \iota \nu \alpha$ ). Pauline phrase (2Co 9:8; $2 \mathrm{Ti} 2: 21 ; 3: 17$ ), here adjective $\varepsilon \tau о \boldsymbol{\mu}$ о (2Co 9:5 ), there verb.

Titus 3:2
To speak evil ( $\beta \lambda \alpha \sigma \varphi \eta \mu \varepsilon \iota v$ ). See Col 3:8; 1 Ti 6:4.
Not to be contentious ( $\alpha \mu \alpha \chi o v \varsigma \varepsilon ı v \alpha$ ). "To be non-fighters" (1Ti 3:3 ), originally "invincible."

Gentle ( $\varepsilon \pi เ \varepsilon เ \kappa \varepsilon ı \varsigma) . ~ S e e ~ 1 T i ~ 3: 3 . ~$.
Meekness ( $\pi \rho \alpha v \tau \eta \tau \alpha) . ~ П \rho \alpha o \tau \eta \tau \alpha$. See Col 3:12.
Titus 3:3
Aforetime ( $\pi 0 \tau \varepsilon$ ). "Once" in our unconverted state as in Eph 2:3 .
Foolish (avoŋтo). See Ro 1:14,21.
Disobedient ( $\alpha \pi \varepsilon$ ( $\theta \varepsilon ı \varsigma)$. See Ro 1:30.
Deceived ( $\pi \lambda \alpha \nu \omega \mu \varepsilon v o$ ). Present passive participle of $\pi \lambda \alpha \nu \alpha \omega$ though the middle is possible.
 only here, Lu 8:14; Jas 4:1,3; 2Pe 2:13 ). Поıкı入aıৎ (old word) is many-coloured as in Mr 1:34; Jas 1:2; 2Ti 3:6, etc.

Living ( $\delta$ ı $\alpha$ үovtєৎ). See 1Ti 3:6 (supply $\beta$ ıov).
In malice ( $\varepsilon v$ какıа). See Ro 1:29.
Envy ( $\varphi \theta$ ov $\omega$ ). See Ro 1:29.
Hateful ( $\sigma \tau v \gamma \eta \tau 0$ ). Late passive verbal from $\sigma \tau v \gamma \varepsilon \omega$, to hate. In Philo, only here in N.T.

Hating one another ( $\mu \iota \sigma o v \nu \tau \varepsilon \varsigma ~ a \lambda \lambda \eta \lambda o v \varsigma)$. Active sense and natural result of being "hateful."

Titus 3:4
The kindness ( $\eta$ Х $\rho \eta \sigma \tau 0 \tau \eta \varsigma)$. See Ro 2:4 for this very word used of God as here.
His love toward man $(\eta \varphi i \lambda \alpha v \theta \rho \omega \pi \iota \alpha)$. "The philanthrophy of God our Saviour." Old word from $\varphi i \lambda \alpha v \theta \rho \omega \pi \sigma \varsigma$, for love of mankind, in N.T. only here and Ac 28:2 .

Appeared $(\varepsilon \pi \varepsilon \varphi a \nu \eta)$. See 2:11 and here as there the Incarnation of Christ. See 1Ti 1:1 for $\sigma \omega \tau \eta \rho$ with $\theta \varepsilon \circ \varsigma$ (God).

Titus 3:5

Done (not in the Greek, only the article $\tau \hat{A} \omega v$ ), "not as a result of works those in righteousness which we did." Same idea as in Ro 3:20f .

According to his mercy he saved us (ката тo av $\frac{10 v}{} \varepsilon \lambda \varepsilon \sigma \varsigma \varepsilon \sigma \omega \sigma \varepsilon v$ ). See Ps 109:26; 1 Pe 1:3; Eph 2:4. Effective aorist active indicative of $\sigma \omega \zeta \omega$.

Through the washing of regeneration ( $\delta \iota \alpha \lambda o v \tau \rho o v \pi \alpha \lambda ı v \gamma \varepsilon v \varepsilon \sigma \iota \alpha)$ ). Late and common word with the Stoics (Dibelius) and in the Mystery-religions (Angus), also in the papyri and Philo. Only twice in the N.T. (Mt 19:28 with which compare a $\quad$ окатабтабıa in Ac 3:21, and here in personal sense of new birth). For $\lambda o v \tau \rho o v$, see Eph 5:26, here as there the laver or the bath. Probably in both cases there is a reference to baptism, but, as in Ro 6:3-6, the immersion is the picture or the symbol of the new birth, not the means of securing it.

And renewing of the Holy Spirit ( $\kappa \alpha \alpha v \alpha \kappa \alpha \iota \nu \omega \sigma \varepsilon \omega \varsigma \pi v \varepsilon v \mu \alpha \tau \circ \varsigma \alpha \nLeftarrow v)$. "And renewal by the Holy Spirit" (subjective genitive). For the late word avakaıv $\omega \sigma \iota$, see Ro 12:2 . Here, as often, Paul has put the objective symbol before the reality. The Holy Spirit does the renewing, man submits to the baptism after the new birth to picture it forth to men.

Titus 3:6
Which (ov). Genitive case by attraction from o (grammatical gender) to the case of $\pi \nu \varepsilon \cup \mu a \tau o \varsigma ~ a \gamma เ o v$. We do not have grammatical gender (only natural) in English. Hence here we should say "whom," even if it does not go smoothly with $\varepsilon \xi \varepsilon \chi \varepsilon \varepsilon v$ (he poured out, second aorist active indicative of $\varepsilon \kappa \chi \varepsilon \omega$ ). The reference is to the great Pentecost (Ac 2:33) as foretold by Joel (Joe 2:28).

Richly ( $\pi \lambda \operatorname{lov\sigma ı} \omega \varsigma$ ). Then and to each one in his own experience. See Ro 10:12; 1Ti 6:17

Titus 3:7
Being justified by his grace ( $\delta \iota \kappa \alpha \omega \theta \varepsilon v \tau \varepsilon \varsigma \tau \eta \varepsilon \kappa \varepsilon เ v o v \chi \alpha \rho ı \tau)$. First aorist passive participle of $\delta \iota \kappa \alpha \iota \omega$ and instrumental case of $\chi \alpha \rho ı \varsigma$ as in Ro 3:24; 5:1.

That we might be made heirs ( $\tau \alpha \alpha \lambda \eta \rho о v o \mu о \gamma \varepsilon \nu \eta \theta \omega \mu \varepsilon \nu$ ). Purpose with $\tau v \alpha$ and first aorist passive of $\gamma เ \nu o \mu a$. See Ro 4:13; 8:17.

Titus 3:8
The saying (o $\lambda о \gamma \circ \varsigma)$. In verses 4-7.
I will ( $\beta$ ov $\lambda o \mu \alpha$ ). See 1Ti 2:8.
That thou affirm confidently ( $\sigma \varepsilon \delta \operatorname{s} \alpha \beta \varepsilon \beta \alpha \iota v \sigma \theta \alpha$ ). Indirect command. For the verb see $1 \mathrm{Ti} 1: 7$.

That they may be careful ( $\imath \alpha \alpha \varphi \rho \circ v \tau \iota \zeta \omega \sigma \iota \nu)$. Sub-final use of $\tau \alpha \alpha$ with present active subjunctive of $\varphi \rho o v \tau \iota \zeta \omega$, old verb, only here in N.T.

To maintain good works ( $\kappa \alpha \lambda \omega \nu \varepsilon \rho \gamma \omega \nu \pi \rho \circ \iota \sigma \tau \alpha \sigma \theta \alpha$ ). Present middle infinitive of $\pi \rho o เ \sigma \tau \eta \mu$, intransitive use, to stand before, to take the lead in, to care for. Paul is anxious that "believers" may take the lead in good works.

Titus 3:9

Fightings about the law ( $\mu$ ахаৎ vо $\mu \kappa \alpha \varsigma)$. "Legal battles." See 1Ti 6:4; 2 Ti 2:23 . Wordy fights about Mosaic and Pharisaic and Gnostic regulations.

Shun ( $\pi \varepsilon \rho u \sigma \tau \alpha \sigma o$ ). Present middle imperative of $\pi \varepsilon \rho u \sigma \tau \eta \mu$, intransitive, step around, stand aside (2Ti 2:16). Common in this sense in the literary Koine.

Unprofitable ( $\alpha v \omega \varphi \varepsilon \lambda \varepsilon \iota \varsigma)$. Old compound adjective ( $\alpha$ privative and $o \varphi \varepsilon \lambda o \varsigma$ ), in N.T. only here and Heb 7:18.

Titus 3:10
Heretical (aıрєтıкov). Old adjective from aıpعбıs ( $\alpha \iota \rho \varepsilon о \mu \alpha$, to choose), a choosing of a party (sect, Ac 5:17) or of teaching (2Pe 2:1). Possibly a schism had been started here in Crete.

Refuse ( $\pi \alpha \rho \alpha \iota \tau 0 v)$. Present middle imperative of $\pi \alpha \rho \alpha \iota \tau \varepsilon \omega$, to ask from, to beg off from. See same form in 1Ti 4:7; 5:11. Possibly an allusion here to Christ's directions in Mt 18:15-17.

Titus 3:11
Is perverted ( $\varepsilon \xi \varepsilon \sigma \tau \rho \alpha \pi \tau \alpha)$. Perfect passive indicative of $\varepsilon \kappa \sigma \tau \rho \varepsilon \varphi \omega$, old word to turn inside out, to twist, to pervert. Only here in N.T.

Self-condemned (а兀токатакрıтоц). Only known example of this double compound verbal adjective ( $\alpha \cup \tau о \sigma, \kappa \alpha \tau \alpha, \kappa \rho \imath \nu \omega)$.

Titus 3:12
When I shall send (o $(\alpha v \pi \varepsilon \mu \psi \omega)$. Indefinite temporal clause with o $o \tau \alpha$ and the first aorist active subjunctive (or future indicative) of $\pi \varepsilon \mu \pi \omega$ (same form).

Artemas (A $\rho \tau \varepsilon \mu \alpha v$ ). Perhaps abbreviation of Artemidorus. Nothing more is known of him.

Or Tychicus ( $\eta$ Tuұıкоv). Paul's well-known disciple (Col 4:7; Eph 6:21; 2Ti 4:12).
To Nicopolis ( $\varepsilon \iota \varsigma$ Nıкото $\lambda \iota v$ ). Probably in Epirus, a good place for work in Dalmatia (2Ti 4:10).

I have determined (кєкріка). Perfect active indicative. I have decided.
To winter there ( $\varepsilon \kappa \varepsilon \pi \alpha \rho \alpha \chi \varepsilon \mu \alpha \sigma \alpha)$. First aorist active infinitive of $\pi \alpha \rho \alpha \chi \varepsilon \mu \alpha \zeta \omega$, a literary Koine word for which see Ac 27:12; 1Co 16:6 .

Titus 3:13
Zenas the lawyer (Zquav tov voнiкov). Possibly abbreviation of Zenodorus and may be one of the bearers of the Epistle with Apollos. Probably an expert in the Mosaic law as the word means in the Gospels. A converted Jewish lawyer. The Latin term is jurisconsultum for vонког.

Apollos (A $\pi \mathrm{o} \lambda \lambda \omega v$ ). Paul's friend (Ac 18:24-19:1; 1Co 1:12ff. ).
Set forward ( $\pi \rho \circ \pi \varepsilon \mu \psi \circ v$ ). First aorist active imperative of $\pi \rho \circ \pi \varepsilon \mu \pi \omega$, old verb, to send on ahead (1Co 16:6,11; Ro 15:24).

That nothing be wanting unto them (iva $\mu \eta \delta \varepsilon v$ avtoıs $\lambda \varepsilon ו \pi \eta$ ). Purpose with $v a$ and present (or second aorist $\lambda \iota \pi \eta$, some MSS.) subjunctive of $\lambda \varepsilon ו \pi \omega$, old verb to leave, to remain, to lack. With dative case here (avtors).

Titus 3:14
Our people (o $\eta \mu \varepsilon \tau \varepsilon \rho o$ ). "Our folks." The Cretan converts, not just Paul's friends.
Let learn ( $\mu \alpha v \theta \alpha v \varepsilon \tau \omega \sigma \alpha v$ ). Present active imperative, keep on learning how.
To maintain ( $\pi \rho o \iota \sigma \tau \alpha \sigma \theta \alpha)$. See verse 8.
For necessary uses ( $\varepsilon \iota \varsigma ~ a v \alpha ү к \alpha ı \varsigma \varsigma ~ \chi \rho \varepsilon ı \alpha \varsigma) . ~ " F o r ~ n e c e s s a r y ~ w a n t s . " ~ N o ~ i d l e r s ~ w a n t e d . ~$ See 1Th 4:12; 2Th 3:10f.

Unfruitful (акарто). See 1Co 14:14; Eph 5:11 .
Titus 3:15
That love us ( $\tau$ ovৎ $\varphi$ ı $\lambda$ ouvtac $\eta \mu \alpha \varsigma$ ). Paul craved the love of his friends as opposed to 2:8.

## THE EPISTLE TO PHILEMON

FROM ROME A.D. 63

## BY WAY OF INTRODUCTION

This little letter was sent to Philemon by Onesimus, a converted runaway slave of Philemon, along with Tychicus who is going to Colossae with Onesimus (Col 4:7-9) as the bearer also of the so-called Epistle to the Ephesians (Eph 6:21f. ). Hence it is clear that these three Epistles were carried to the Province of Asia at the same time. Colossians was probably written before Ephesians which appears to be a general treatment of the same theme. Whether Philemon was actually penned before the other two there is no way of knowing. But it is put first here as standing apart. Probably Paul wrote it himself without dictation because in verse 19 it constitutes a note in his own hand to Philemon for what Onesimus may owe him. Paul applies the spirit of Christianity to the problem of slavery in words that have ultimately set the slaves free from bondage to men.

## Philemon 1

Phlm 1:1
A prisoner of Christ Jesus ( $\delta \varepsilon \sigma \mu$ ос X Old adjective from $\delta \varepsilon \sigma \mu \circ \varsigma$ (bond, $\delta \varepsilon \omega$, to bind). Apparently used here on purpose rather than $\alpha \pi о \sigma \tau o \lambda o s$ as more effective with Philemon and a more touching occasion of pride as Paul writes with his manacled right hand.

Timothy (Tpo日zoc). With Paul in Ephesus (Ac 19:22) and probably known to Philemon. Associated with Paul also in I and II Thess., II Cor., Philipp., Col.

To Philemon ( $\Phi \backslash \lambda \eta \mu \mathrm{v}$ ). A resident of Colossae and a convert of Paul's (verse 19), perhaps coming to Ephesus while Paul was there when his ministry had so much influence over the province of Asia (Ac 19:9f., 26; 1Co 16:19). The name Philemon occurs in the legend of Baucis and Philemon (Ovid's Metamorphoses), but with no connection with the brother here. He was active in the church in Colossae ("our co-worker," $\sigma \cup v \varepsilon \rho \gamma \omega \eta \mu \omega v$ ) and was beloved ( $\alpha \gamma \alpha \pi \eta \tau \omega$ ) by Paul.

Phlm 1:2
To Apphia our sister (A $A \varphi \perp \alpha \tau \eta \alpha \delta \varepsilon \lambda \varphi \eta$ ). Dative case in address. A common name in Phrygian inscriptions and apparently the wife of Philemon. "Sister" is in the Christian sense.

To Archippus (A $\rho \chi \boxed{\pi \pi \omega}$ ). Dative case in address. It is uncertain whether he is the son of Philemon or not. Apparently he is prominent in the church in Colossae, possibly even pastor, probably not in Laodicea as some understand Col 4:17 to imply.

Fellow-soldier ( $\sigma v \vee \sigma \tau \rho \alpha \tau i \omega \tau \eta$ ). Old word, only here and Php 2:25 in N.T. In metaphorical sense. Perhaps while Paul was in Ephesus.
 house of Philemon. In large cities there would be several meeting-places. Before the third century there is no certain evidence of special church buildings for worship (White, Exp. Grk. T.). See Ac 12:12 for Mary's house in Jerusalem, 1Co 16:19 for the house of Aquila and Prisca in Ephesus, Ro 16:5 for the house of Prisca and Aquila in Rome, Col 4:15 for the house of Nympha in Laodicea.

Phlm 1:4
Always ( $\pi \alpha v \tau о \tau \varepsilon)$. Goes with $\varepsilon \cup \chi \propto \rho เ \sigma \tau \omega$ though so far away in the Greek sentence.
Making mention of thee ( $\mu v \varepsilon \iota \alpha \nu \sigma 0 v \pi о เ o v \mu \varepsilon \nu \circ \varsigma)$. See 1Th 1:2 for this phrase.
In ( $\varepsilon \pi$ ). Upon the occasion of.
Phlm 1:5
Hearing ( $\alpha \kappa о \omega \omega v$ ). Through Epaphras (Col 1:7,8; 4:12 ), possibly from Onesimus also.

a sort of momentum (Vincent) he carries both words over to the saints, though it can be explained as chiasm (Ga 4:4) also.

Phlm 1:6
That (o $\pi \omega \varsigma$ ). Rather than the more common final particle $t v a$. Connected with $\mu \nu \varepsilon ı \alpha \nu$ тоьоицвиос.

The fellowship of thy faith ( $\eta$ коıv $\omega v \iota a \operatorname{\tau \eta \varsigma ~} \pi \iota \sigma \tau \varepsilon \omega \varsigma ~ \sigma o v)$. Partnership like Php 1:5 in (objective genitive, $\pi / \sigma \tau \varepsilon \omega \varsigma$ ).

Effectual ( $\varepsilon v \varepsilon \rho \gamma \eta \varsigma)$. Common adjective, like $\varepsilon v \varepsilon \rho \gamma \circ \varsigma$ (at work), in N.T. only here, 1Co 16:9; Heb 4:12. Papyri use eveppos of a mill in working order, of ploughed land, etc.

In you ( $\varepsilon v \nu \mu \nu$ ). Some MSS. have $\varepsilon v \eta \mu \nu v$ (in us), itacism and common.
Phlm 1:7
I had ( $\varepsilon \sigma \chi \circ v$ ). Ingressive second aorist active indicative of $\varepsilon \chi \omega$, not $\varepsilon \chi \chi \circ \mu \eta \nu$ as the Textus Receptus has it. Paul refers to his joy when he first heard the good news about Philemon's activity (verse 5).

The hearts ( $\tau \alpha \sigma \pi \lambda \alpha \gamma \chi \nu \alpha$ ). See Php 1:8 for this use of this word for the nobler viscera (heart, lungs, liver) and here for the emotional nature.

Have been refreshed ( $\alpha v \alpha \pi \varepsilon \pi \alpha \cup \tau \alpha$ ). Perfect passive indicative of old compound verb $\alpha v a \pi \alpha v \omega$ as in Mt 11:28, a relief and refreshment whether temporary (Mr 6:31) or eternal (Re 14:13).

Phlm 1:8
Though I have ( $\varepsilon \chi \omega v$ ). Concessive participle (present active).
That which is befitting ( $\tau 0 \alpha v \eta \kappa \circ v$ ). Neuter singular accusative of the articular participle (present active) of $\alpha v \eta \kappa \omega$, to come up to requirements and so to be befitting. For idea in $\alpha \nu \eta \kappa \omega$, see $\operatorname{Col}$ 3:18; Eph 5:4. This idiom is in later writers.

I rather beseech ( $\mu \alpha \lambda \lambda о \vee \pi \alpha \rho \alpha \kappa \alpha \lambda \omega)$. Rather than command ( $\varepsilon \pi ı \tau \alpha \sigma \sigma \omega)$ which he has a perfect right to do.

Phlm 1:9
Paul the aged ( $\Pi \alpha u \lambda o \varsigma \pi \rho \varepsilon \sigma \beta v \tau \eta \varsigma)$. Paul is called $v \varepsilon \alpha v i a c$ (a young man) at the stoning of Stephen (Ac 7:58). He was perhaps a bit under sixty now. Hippocrates calls a man $\pi \rho \varepsilon \sigma \beta v \tau \eta \varsigma$ from 49 to 56 and $\gamma \varepsilon \rho \omega v$ after that. The papyri use $\pi \rho \varepsilon \sigma \beta \nu \tau \eta \varsigma$ for old man as in Lu 1:18 of Zacharias and in Tit 2:2 . But in Eph 6:20 Paul says $\pi \rho \varepsilon \sigma \beta \varepsilon v \omega \varepsilon \nu \alpha \lambda \nu \sigma \varepsilon$ (I am an ambassador in a chain). Hence Lightfoot holds that here $\pi \rho \varepsilon \sigma \beta \nu \tau \eta \varsigma=\pi \rho \varepsilon \sigma \beta \varepsilon v \tau \eta \varsigma$ because of common confusion by the scribes between $v$ and $\varepsilon v$. In the LXX four times the two words are used interchangeably. There is some confusion also in the papyri and the inscriptions. Undoubtedly ambassador ( $\pi \rho \varepsilon \sigma \beta \varepsilon v \tau \eta \varsigma)$ is possible here as in Eph 6:20 ( $\pi \rho \varepsilon \sigma \beta \varepsilon v \omega$ ) though there is no real reason why Paul should not term himself properly "Paul the aged."

Phlm 1:10

For my child ( $\pi \varepsilon \rho \tau о v \varepsilon \mu \circ v \tau \varepsilon \kappa v o v)$. Tender and affectionate reference to Onesimus as his spiritual child.

Whom I have begotten in my bonds (ov $\varepsilon \gamma \varepsilon v v \eta \sigma \alpha \varepsilon \nu \tau o \iota \varsigma \delta \varepsilon \sigma \mu \circ \iota \varsigma)$. First aorist active indicative of $\gamma \varepsilon v v a \omega$, to beget. See 1Co 4:15 for this figurative sense. Paul is evidently proud of winning Onesimus to Christ though a prisoner himself.

Phlm 1:11
Onesimus (Ov $\quad \sigma \mu \circ v$ ). A common name among slaves and made like Chresimus, Chrestus. The word is from ov $\begin{aligned} & \sigma ı \varsigma ~(p r o f i t) ~ a n d ~ t h a t ~ f r o m ~ o v i v \eta ~\end{aligned}$, to profit, to help.

Who was aforetime unprofitable to thee ( $\tau о v \pi о \tau \varepsilon \sigma о ~ \alpha \chi \rho \eta \sigma \tau о v)$. "The once to thee useless one." Play (pun) on the meaning of the name Onesimus (ov $\eta \sigma \mu \circ$, useful) as once "useless" ( $\alpha \chi \rho \eta \sigma \tau o \varsigma$, verbal adjective, a privative and $\chi \rho \alpha o \mu \alpha$, to use).

But now is profitable to thee and to me ( $v v v \delta \varepsilon \sigma о \kappa \alpha \varepsilon \mu \circ \varepsilon v \chi \rho \eta \sigma \tau o v$ ). "But now to
 jective from $\varepsilon v$ and $\chi \rho \alpha o \mu \alpha$, to use). Ethical dative here ( $\sigma o t, \varepsilon \mu \circ$ ).

Phlm 1:12
I have sent back ( $\alpha v \varepsilon \pi \varepsilon \mu \psi \alpha)$. Epistolary aorist. As it will look when Onesimus arrives.
In his own person (avtov). "Himself," intensive pronoun with ov (whom).
My very heart ( $\tau \alpha \varepsilon \mu \alpha \sigma \pi \lambda \alpha \gamma \chi \nu \alpha$ ). As in verse 7. He almost loves Onesimus as his own son.

Phlm 1:13
I would fain have kept ( $\varepsilon \beta$ ov $\lambda$ o $\mu \eta v \kappa \alpha \tau \varepsilon \chi \varepsilon เ v)$. Imperfect middle and present infinitive, "I was wishing to hold back." Again from the standpoint of the arrival of Onesimus.

In thy behalf (v $v \varepsilon \rho \sigma 0 v$ ). So "in thy stead," "in place of thee."
He might minister ( $\delta \iota \alpha \kappa o v \eta$ ). Present active subjunctive (retained after $\varepsilon \beta$ ou $\lambda о \mu \eta \nu$ ) with va , purpose continued, "that he might keep on ministering."

Phlm 1:14
Without thy mind ( $\chi \omega \rho \iota \varsigma \tau \eta \varsigma \sigma \eta \varsigma \gamma \nu \omega \mu \eta \varsigma)$. Judgment, purpose (1Co 1:10; 7:25 ). Ablative case with $\chi \omega \rho \iota \varsigma$ (apart from).

I would do nothing (ov $\delta \varepsilon v \eta \theta \varepsilon \lambda \eta \sigma \alpha \pi о \eta \sigma \alpha$ ). First aorist active indicative of $\theta \varepsilon \lambda \omega$, I decided, I wished, decision reached (cf. $\varepsilon \beta$ ou $\lambda о \mu \eta \nu$ in verse 13.

Thy goodness ( $\tau 0 ~ a \gamma \alpha \theta o v \sigma o v$ ). Neuter articular adjective (thy good deed).
As of necessity ( $\omega \varsigma \kappa \alpha \tau \alpha \alpha v \alpha \gamma \kappa \eta \nu$ ). "As if according to compulsion." See 2Co 9:7 .
But of free will ( $\alpha \lambda \lambda \alpha$ ката عкоибוоv). According to what is voluntary ( Nu 15:3 ). Perhaps тролоv (way, manner) is to be understood with the adjective єкоибос (old word, here alone in N.T.), from $\varepsilon \kappa \omega \nu$ (1Co 9:17; Ro 8:20 ).

Phlm 1:15
Perhaps ( $\tau \alpha \chi \alpha$ ). Old adverb, in N.T. only here and Ro 5:7.

That thou shouldst have him (iva avtov $\alpha \pi \varepsilon \chi \eta เ \varsigma)$. Final clause with $t v \alpha$ and present active subjunctive of $\alpha \pi \varepsilon \chi \omega$, to have back, "that thou might keep on having him back."

For ever (at $\omega v \iota o v$ ). "Eternal," here and hereafter. Surely a noble thing for Paul to say and a word that would touch the best in Philemon.

Phlm 1:16
No longer as a servant (оuкะт $\omega \varsigma \delta o u \lambda o v)$ ) "No longer as a slave." So it has to be here. So it should be always. Paul sends Onesimus, the converted runaway slave, back to his legal master, but shows that he expects Philemon the Christian to treat Onesimus as a brother in Christ, not as a slave.

But more than a servant ( $\alpha \lambda \lambda^{\prime}$ v $\pi \varepsilon \rho \delta o u \lambda o v$ ). "But beyond a slave."
A brother beloved ( $\alpha \delta \varepsilon \lambda \varphi o v a \gamma \alpha \pi \eta \tau o v$ ). A brother in Christ.
How much rather to thee ( $\pi 0 \sigma \omega \delta \varepsilon \mu \alpha \lambda \lambda o v \sigma o$ ). "By how much more to thee," because of Philemon's legal ownership of this now Christian slave. "In the flesh Philemon had the brother for a slave; in the Lord he had the slave for a brother" (Meyer).

Phlm 1:17
If then thou countest me a partner ( $\varepsilon$ ovv $\mu \varepsilon \varepsilon \chi \varepsilon ı \varsigma ~ \kappa o \iota v \omega v o v$ ). As I assume that you do, condition of the first class.

Receive him as myself ( $\pi \rho \circ \sigma \lambda \alpha \beta o v a v \tau o v ~ \omega \varsigma \varepsilon \mu \varepsilon$ ). "Take him to thyself (indirect second aorist middle of $\pi \rho o \sigma \lambda \alpha \mu \beta \alpha v \omega$ as in Ac 18:26 ) as myself." Surpassing delicacy and consummate tact. These words sound the death-knell of human slavery wherever the spirit of Christ is allowed to have its way. It has been a long and hard fight to break the shackles of human bondage even in Christian countries and there are still millions of slaves in pagan and Mohammedan lands. Paul wrote these words with wisdom and courage and sincerity.

Phlm 1:18
But if he hath wronged thee at all ( $\varepsilon \delta \varepsilon \tau \eta \delta \iota \kappa \eta \sigma \varepsilon \sigma \varepsilon$ ). Condition of the first class, assumed to be true. Onesimus did wrong ( $\eta \delta \iota \kappa \eta \sigma \varepsilon$, first aorist active indicative of $\alpha \delta \iota \kappa \eta$, to wrong, without justice). He had probably robbed Philemon before he ran away.

Or oweth ( $\eta$ O$\varphi \varepsilon \backslash \lambda \varepsilon$ ). Delicate way of putting the stealing.
Put that to mine account (тоито $\varepsilon \mu$ о $\varepsilon \lambda \lambda о \gamma \alpha$ ). Present active imperative of $\varepsilon \lambda \lambda о \gamma \alpha \omega$. In the Koine verbs in $-\varepsilon \omega$ often appear in - $\alpha \omega$ like $\varepsilon \lambda \varepsilon \varepsilon \omega$, $\varepsilon \lambda \varepsilon \alpha \omega$. So with $\varepsilon \lambda \lambda 0 \gamma \varepsilon \omega$ as $\varepsilon \lambda \lambda$ o $\gamma \alpha \omega$, late verb in inscriptions and papyri (Deissmann, Light, etc., p. 84), though in N.T. only here and Ro 5:13. It means to set to one's account.

Phlm 1:19
Write ( $\varepsilon \gamma \rho \alpha \psi \alpha)$. Epistolary aorist.
With mine hand ( $\tau \eta \varepsilon \mu \eta \chi \varepsilon \rho \rho$ ). Instrumental case and a note of hand that can be collected. See 2Th 3:17; 1Co 16:21; Col 4:18 .

I will repay it ( $\varepsilon \gamma \omega \alpha \pi \sigma \tau \iota \sigma \omega$ ). Future active indicative of $\alpha \pi \sigma \tau \iota v \omega$ ( $\alpha \pi о \tau \omega \omega$ ) to pay back, to pay off. The more usual word was $\alpha \pi o \delta \omega \sigma \omega$. This is Paul's promissory note. Deissmann (Light, etc., p. 331) notes how many of the papyri are concerning debts.

That I say not ( $\downarrow v \alpha \mu \eta \lambda \gamma \omega$ ). Neat idiom as in 2Co 9:4, delicately reminding Philemon that Paul had led him also to Christ.

Thou owest to me even thine own self besides ( $\kappa \alpha \sigma \varepsilon \alpha \cup \tau о \nu \mu о \pi \rho о \sigma о \varphi \varepsilon 1 \lambda \varepsilon ı$ ). Old verb, only here in N.T., Paul using the verb o甲 $\varsigma \lambda \omega$ of verse 18 with $\pi \rho \circ \varsigma$ added. He used every available argument to bring Philemon to see the higher ground of brotherhood in Christ about Onesimus.

Phlm 1:20
Let me have joy of thee ( $\varepsilon \gamma \omega$ $\sigma o v$ ovalu $\nu)$ ) Second aorist middle optative of oviv $\eta \mu$, old verb, only here in N.T. Optative the regular construction for a wish about the future. "May I get profit from thee in the Lord."

Refresh my heart in Christ ( $\alpha v \alpha \pi \alpha v \sigma o v ~ \mu о v \tau \alpha \sigma \pi \lambda \alpha \gamma \chi \nu \alpha \varepsilon \nu$ X $\rho \iota \sigma \tau \omega$ ). See verse 7 for $\alpha v a \pi \alpha v \sigma o v$ (first aorist active imperative of $\alpha v a \pi \alpha v \omega$ ) and $\sigma \pi \lambda \alpha \gamma \chi \nu \alpha$ (3 times in this letter, 7,12,20 ).

Phlm 1:21
Obedience (vтакоп). "Compliance" seems less harsh to us in the light of 9 .
I write ( $\varepsilon \gamma \rho \alpha \psi \alpha)$. Epistolary aorist again.
Even beyond what I say ( $\kappa \alpha \cup \pi \varepsilon \rho$ a $\lambda \varepsilon \gamma \omega$ ). That can only mean that Paul "knows" ( $\varepsilon \delta \omega \varsigma$, second perfect active participle of ot $\delta \alpha$ ) that Philemon will set Onesimus free. He prefers that it come as Philemon's idea and wish rather than as a command from Paul. Paul has been criticized for not denouncing slavery in plain terms. But, when one considers the actual conditions in the Roman empire, he is a wise man who can suggest a better plan than the one pursued here for the ultimate overthrow of slavery.

Phlm 1:22
But withal ( $\alpha \mu \alpha \delta \varepsilon$ ). Along with your kindly reception of Onesimus. On $\alpha \mu \alpha$, see Ac 24:26; 27:40 .

A lodging ( $\xi \varepsilon v i \alpha v$ ). Old word from $\xi_{\varepsilon v o \varsigma, ~ s t r a n g e r . ~ I n ~ N . T . ~ o n l y ~ h e r e ~ a n d ~ A c ~ 28: 23 . ~}^{\text {. }}$
I shall be granted unto you ( $\chi \alpha \rho \iota \sigma \theta \eta \sigma о \mu \alpha \nu \mu \nu \nu)$. First future passive of $\chi \alpha \rho \iota \zeta \rho \mu \alpha$. Used either as a favour as here and Ac 3:14 or for destruction (Ac 25:11).

Phlm 1:23
Epaphras (Eлачраৎ). The Colossian preacher who apparently started the work in Colossae, Hierapolis, and Laodicea, and who had come to Rome to enlist Paul's help in the fight against incipient Gnosticism in the Lycus Valley.

My fellow-prisoner (o $\sigma v v a i \chi \mu \alpha \lambda \omega \tau о \varsigma ~ \mu о v$ ). See on Ro 16:7 for this word, also in Col 4:10. Used metaphorically like the verb aıx $\alpha \lambda \omega \omega \tau \iota \zeta \omega$ in 2Co 10:5, though some hold that Epaphras became a prisoner with Paul in Rome.

Phlm 1:24
The other "co-workers" (бuvepүo) here (Mark, Aristarchus, Demas, Luke) are all named in detail in Col 4:10-14 with kindly words.

Phlm 1:25
Grace ( $\eta \chi \alpha \rho / \varsigma)$. This great word occurred in the greeting (verse 3) as it does in the farewell.

## THE EPISTLE TO THE HEBREWS BY WAY OF INTRODUCTION

## UNSETTLED PROBLEMS

Probably no book in the New Testament presents more unsettled problems than does the Epistle to the Hebrews. On that score it ranks with the Fourth Gospel, the Apocalypse of John, and Second Peter. But, in spite of these unsolved matters, the book takes high rank for its intellectual grasp, spiritual power, and its masterful portrayal of Christ as High Priest. It is much briefer than the Fourth Gospel, but in a sense it carries on further the exalted picture of the Risen Christ as the King-Priest who reigns and pleads for us now.

THE PICTURE OF CHRIST
At once we are challenged by the bold stand taken by the author concerning the Person of Christ as superior to the prophets of the Old Testament because he is the Son of God through whom God has spoken in the new dispensation (Heb 1:1-3 ), this Son who is God's Agent in the work of creation and of grace as we see it stated in Php 2:5-11; Col 1:13-20; Joh 1:1-18. This high doctrine of Jesus as God's Son with the glory and stamp of God's nature is never lowered, for as God's Son he is superior to angels (Heb 1:4-2:4), though the humanity of Jesus is recognized as one proof of the glory of Jesus (Heb 2:5-18). Jesus is shown to be superior to Moses as God's Son over God's house (Heb 3:1-4:13 ), But the chief portion of the Epistle is devoted to the superiority of Jesus Christ as priest to the work of Aaron and the whole Levitical line (Heb 4:14-12:3 ). Here the author with consummate skill, though with rabbinical refinements at times, shows that Jesus is like Melchizedek and so superior to Aaron (Heb 4:14-7:28) , works under a better covenant of grace (Heb 8:1-13 ), works in a better sanctuary which is in heaven (Heb 9:1-12 ), offers a better sacrifice which is his own blood (Heb 9:13-10:18) , and gives us better promises for the fulfilment of his task (Heb 10:19-12:3 ). Hence this Epistle deserves to be called the Epistle of the Priesthood of Christ. So W. P. Du Bose calls his exposition of the book, High Priesthood and Sacrifice (1908). This conception of Christ as our Priest who offered himself on the Cross and as our Advocate with the Father runs all through the New Testament (Mr 10:46; Mt 20:28; Joh 10:17; Mt 26:28; Ro 8:32; 1Pe 1:18f.; 1Jo 2:1f.; Re 5:9 , etc.). But it is in Hebrews that we have the fulllength portrait of Jesus Christ as our Priest and Redeemer. The Glory of Jesus runs through the whole book.

## THE STYLE

It is called an epistle and so it is, but of a peculiar kind. In fact, as has been said, it begins like a treatise, proceeds like a sermon, and concludes like a letter. It is, in fact, more like a literary composition than any other New Testament book as Deissmann shows: "It points to the fact that the Epistle to the Hebrews, with its more definitely artistic, more literary language (corresponding to its more theological subject matter), constituted an epoch in
the history of the new religion. Christianity is beginning to lay hands on the instruments of culture; the literary and theological period has begun" (Light from the Ancient East, pp. 70f.). But Blass (Die Rhythmen der asianischen und romischen Kunstprosa, 1905) argues that the author of Hebrews certainly and Paul probably were students of Greek oratory and rhetoric. He is clearly wrong about Paul and probably so about the author of Hebrews. There is in Hebrews more of "a studied rhetorical periodicity" (Thayer), but with many "parenthetical involutions" (Westcott) and with less of "the impetuous eloquence of Paul." The eleventh chapter reveals a studied style and as a whole the Epistle belongs to the literary KoinÂ】 rather than to the vernacular. Moulton (Cambridge Biblical Essays, p. 483) thinks that the author did not know Hebrew but follows the Septuagint throughout in his abundant use of the Old Testament.

THE AUTHOR
Origen bluntly wrote: "Who wrote the Epistle God only knows certainly" as quoted by Eusebius. Origen held that the thoughts were Paul's while Clement of Rome or Luke may have written the book. Clement of Alexandria (Eusebius says) thought that Paul wrote it in Hebrew and that Luke translated it into Greek. No early writer apparently attributed the Greek text to Paul. Eusebius thought it was originally written in Hebrew whether by Paul or not and translated by Clement of Rome. But there is no certainty anywhere in the early centuries. It was accepted first in the east and later in the west which first rejected it. But Jerome and Augustine accepted it. When the Renaissance came Erasmus had doubts, Luther attributed it to Apollos, Calvin denied the Pauline authorship. In North Africa it was attributed to Barnabas. In modern times Harnack has suggested Priscilla, but the masculine participle in Heb 11:32 ( $\mu \varepsilon \delta ı \eta \gamma o v \mu \varepsilon v o v)$ disposes of that theory. The oldest Greek MSS. (Aleph A B) have simply Прос H\& $\beta \rho \alpha \circ$ оия as the title, but they place it before the Pastoral Epistles, while the Textus Receptus puts it after the Pastoral Epistles and Philemon. In the light of all the facts one can only make a guess without a sense of certainty. For myself I should with Luther guess Apollos as the most likely author of this book which is full of the Spirit of God.

## THE RECIPIENTS

If the title is allowed to be genuine or a fair interpretation of the Epistle, then it is addressed to Jewish (Hebrew) Christians in a local church somewhere. Dr. James Moffatt in his Commentary (pp. xv to xvii) challenges the title and insists that the book is written for Gentile Christians as truly as First Peter. He argues this largely from the author's use of the LXX. For myself Dr. Moffatt's reasons are not convincing. The traditional view that the author is addressing Jewish Christians in a definite locality, whether a large church or a small household church, is true, I believe. The author seems clearly to refer to a definite church in the experiences alluded to in Heb 10:32-34. The church in Jerusalem had undergone sufferings like these, but we really do not know where the church was. Apparently the author
is in Italy when he writes (Heb 13:24), though "they of Italy" (o a $\quad$ o $\tau \eta \varsigma I \tau \alpha \lambda \iota \varsigma \varsigma)$ can mean those who have come from Italy. These Jewish Christians may even have lived in Rome itself. THE DATE
Here again modern scholars differ widely. Westcott places it between A.D. 64 and 67. Harnack and Holtzmann prefer a date between 81 and 96. Marcus Dods argues strongly that the Epistle was written while the temple was still standing. If it was already destroyed, it is hard to understand how the author could have written Heb 10:1f. : "Else would they not have ceased to be offered?" And in Heb 8:13 "nigh to vanishing away" ( $\varepsilon \gamma \gamma v \varsigma \alpha \varphi \alpha v \iota \sigma \mu \circ v$ ) is only intelligible with the temple service still going on. The author makes use of the tabernacle instead of the temple because the temple was patterned after the tabernacle. On the other hand, the mention of Timothy in Heb 13:23 as being "set free" ( $\alpha \pi \sigma \lambda \varepsilon \lambda \nu \mu \varepsilon \nu o v$ ) raises an inquiry concerning Paul's last plea to Timothy to come to him in Rome (2Ti 4:11-13 ). Apparently Timothy came and was put in prison. If so, since Paul was put to death before Nero's own death (June 8, A.D. 68), there is left only the years 67 to 69 A.D. as probable or even possible. It is thus the last of the New Testament books before the Johannine Writings all of which come towards the close of the century and after the destruction of Jerusalem.

## THE PURPOSE

The author states it repeatedly. He urges the Jewish Christians to hold fast the confession which they have made in Jesus as Messiah and Saviour. Their Jewish neighbours have urged them to give up Christ and Christianity and to come back to Judaism. The Judaizers tried to make Jews out of Gentile Christians and to fasten Judaism upon Christianity with a purely sacramental type of religion as the result. Paul won freedom for evangelical and spiritual Christianity against the Judaizers as shown in the Corinthian Epistles, Galatians, and Romans. The Gnostics in subtle fashion tried to dilute Christianity with their philosophy and esoteric mysteries and here again Paul won his fight for the supremacy of Christ over all these imaginary arovs (Colossians and Ephesians). But in Hebrews the author is battling to stop a stampede from Christ back to Judaism, a revolt (apostasy) in truth from the living God. These Jews argued that the prophets were superior to Jesus, the law came by the ministry of angels, Moses was greater than Jesus, and Aaron than Jesus. The author turns the argument on the Jews and boldly champions the Glory of Jesus as superior at every point to all that Judaism had, as God's Son and man's Saviour, the crown and glory of the Old Testament prophecy, the hope of mankind. It is the first great apologetic for Christianity and has never been surpassed. Moffatt terms it "a profound homily."

## Hebrews 1

Heb 1:1
God (o $\theta$ zoc). This Epistle begins like Genesis and the Fourth Gospel with God, who is the Author of the old revelation in the prophets and of the new in his Son. Verses 1-3 are a proemium (Delitzsch) or introduction to the whole Epistle. The periodic structure of the sentence (1-4) reminds one of $\operatorname{Lu}$ 1:1-4, Ro 1:1-7, 1Jo 1:1-4. The sentence could have concluded with $\varepsilon v v i \omega$ in verse 2 , but by means of three relatives ( $\mathrm{ov}, \delta \mathrm{I}^{\prime} \mathrm{ov}, \mathrm{oc}$ ) the author presents the Son as "the exact counterpart of God" (Moffatt).

Of old time ( $\pi \alpha \lambda \alpha$ ). "Long ago" as in Mt 11:21 .
Having spoken ( $\lambda \alpha \lambda \eta \sigma \alpha \varsigma$ ). First aorist active participle of $\lambda \alpha \lambda \varepsilon \omega$, originally chattering of birds, then used of the highest form of speech as here.

Unto the fathers ( $\tau \circ \iota \varsigma ~ \pi \alpha \tau \rho \alpha \sigma \iota v) . ~ D a t i v e ~ c a s e . ~ T h e ~ O l d ~ T e s t a m e n t ~ w o r t h i e s ~ i n ~ g e n e r a l ~$ without "our" or "your" as in Joh 6:58; 7:22; Ro 9:5.

In the prophets ( $\varepsilon v \tau 0 ı \varsigma \pi \rho \circ \varphi \eta \tau \alpha \iota \varsigma)$. As the quickening power of their life (Westcott). So 4:7.

By divers portions ( $\pi 0 \lambda \nu \mu \varepsilon \rho \omega \varsigma)$. "In many portions." Adverb from late adjective $\pi о \lambda \nu \mu \varepsilon \rho \eta \varsigma$ (in papyri), both in Vettius Valens, here only in N.T., but in Wisdom 7:22 and Josephus (Ant. VIII, 3, 9). The Old Testament revelation came at different times and in various stages, a progressive revelation of God to men.

In divers manners ( $\pi \boldsymbol{\sigma} \nu \tau \tau \rho о \pi \omega \varsigma)$. "In many ways." Adverb from old adjective то $\boldsymbol{\nu} \tau \rho о \pi о \varsigma$, in Philo, only here in N.T. The two adverbs together are "a sonorous hendiadys for 'variously"' (Moffatt) as Chrysostom ( $\delta \mathbf{\iota} \varphi \mathrm{\rho} \rho \omega \varsigma$ ). God spoke by dream, by direct voice, by signs, in different ways to different men (Abraham, Jacob, Moses, Elijah, Isaiah, etc.).

Heb 1:2
At the end of these days ( $\varepsilon \pi^{\prime} \varepsilon \sigma \chi \alpha \tau o v \tau \omega \nu \eta \mu \varepsilon \rho \omega \nu \tau o v \tau \omega v$ ). In contrast with $\pi \alpha \lambda \alpha$ above.

Hath spoken ( $\varepsilon \lambda \alpha \lambda \eta \sigma \varepsilon v$ ). First aorist indicative of $\lambda \alpha \lambda \varepsilon \omega$, the same verb as above, "did speak" in a final and full revelation.

In his Son $(\varepsilon v v i \omega)$. In sharp contrast to $\varepsilon v$ toıc $\pi \rho \circ \varphi \eta \tau \alpha \iota \varsigma . ~ " T h e ~ O l d ~ T e s t a m e n t ~ s l o p e s ~$ upward to Christ" (J. R. Sampey). No article or pronoun here with the preposition $\varepsilon v$, giving the absolute sense of "Son." Here the idea is not merely what Jesus said, but what he is (Dods), God's Son who reveals the Father (Joh 1:18). "The revelation was a son-revelation" (Vincent).

Hath appointed ( $\varepsilon \theta \eta \kappa \varepsilon v$ ). First aorist (kappa aorist) active of $\tau \iota \theta \eta \mu$, a timeless aorist.
Heir of all things ( $\kappa \lambda \eta \rho о v o \mu \circ v \pi \alpha \nu \tau \omega v$ ). See Mr 12:6 for o $\kappa \lambda \eta \rho o v o \mu o \varsigma$ in Christ's parable, perhaps an allusion here to this parable (Moffatt). The idea of sonship easily passes into that of heirship (Ga 4:7; Ro 8:17 ). See the claim of Christ in Mt 11:27; 28:18 even before the Ascension.

Through whom ( $\delta \iota^{\prime}$ ov). The Son as Heir is also the Intermediate Agent $(\delta \iota \alpha)$ in the work of creation as we have it in Col 1:16f.; Joh 1:3.

The worlds ( $\tau$ (ovs aıwvac). "The ages" (secula, Vulgate). See 11:3 also where tovৎ $\alpha \iota \omega v a \sigma=\tau o v$ коб $\mu \circ v$ (the world) or the universe like $\tau \alpha \pi \alpha v \tau \alpha$ (the all things) in $1: 3$; Ro 11:36; Col 1:16. The original sense of $\alpha \iota \omega \nu$ (from $\alpha \varepsilon$, always) occurs in Heb 5:20, but here "by metonomy of the container for the contained" (Thayer) for "the worlds" (the universe) as in LXX, Philo, Josephus.

Heb 1:3
Being ( $\omega v$ ). Absolute and timeless existence (present active participle of $\varepsilon \iota \mu$ ) in contrast with $\gamma \varepsilon v o \mu \varepsilon \nu o \varsigma$ in verse 4 like $\eta \nu$ in Joh 1:1 (in contrast with $\varepsilon \gamma \varepsilon v \varepsilon \tau o$ in 1:14) and like $v \pi \alpha \rho \chi \omega \nu$ and $\gamma \varepsilon v o \mu \varepsilon \nu \circ \varsigma$ in Php 2:6f.

The effulgence of his glory ( $\alpha \pi \alpha v \gamma \alpha \sigma \mu \alpha \tau \eta \varsigma \delta о \xi \eta \varsigma$ ). The word $\alpha \pi \alpha v \gamma \alpha \sigma \mu \alpha$, late substantive from $\alpha \pi \alpha v \gamma \alpha \zeta \omega$, to emit brightness ( $\alpha v \gamma \eta$, $\alpha v \gamma \alpha \zeta \omega$ in 2Co 4:4), here only in the N.T., but in Wisdom 7:26 and in Philo. It can mean either reflected brightness, refulgence (Calvin, Thayer) or effulgence (ray from an original light body) as the Greek fathers hold. Both senses are true of Christ in his relation to God as Jesus shows in plain language in Joh 12:45; 14:9. "The writer is using metaphors which had already been applied to Wisdom and the Logos" (Moffatt). The meaning "effulgence" suits the context better, though it gives the idea of eternal generation of the Son (Joh 1:1), the term Father applied to God necessarily involving Son. See this same metaphor in 2Co 4:6.

The very image of his substance ( $\chi \alpha \rho \alpha \kappa \tau \eta \rho \tau \eta \varsigma v \pi о \sigma \tau \alpha \sigma \varepsilon \omega \varsigma) . ~ Х \alpha \rho \alpha \kappa \tau \eta \rho$ is an old word from $\chi \alpha \rho \alpha \sigma \sigma \omega$, to cut, to scratch, to mark. It first was the agent (note ending $=\tau \eta \rho$ ) or tool that did the marking, then the mark or impress made, the exact reproduction, a meaning clearly expressed by $\chi \alpha \rho \alpha \gamma \mu \alpha$ (Ac 17:29; Re 13:16f. ). Menander had already used (Moffatt) $\chi \alpha \rho \alpha \kappa \tau \eta \rho$ in the sense of our "character." The word occurs in the inscriptions for "person" as well as for "exact reproduction" of a person. The word v $\quad \sigma \sigma \tau \alpha \sigma ı s$ for the being or essence of God "is a philosophical rather than a religious term" (Moffatt). Etymologically it is the sediment or foundation under a building (for instance). In 11:1 $\psi \pi \sigma \sigma \tau \alpha \sigma \iota \varsigma$ is like the "title-deed" idea found in the papyri. Athanasius rightly used Heb 1:1-4 in his controversy with Arius. Paul in Php 2:5-11 pictures the real and eternal deity of Christ free from the philosophical language here employed. But even Paul's simpler phrase $\mu \circ \rho \varphi \eta \theta \varepsilon o v$ (the form of God) has difficulties of its own. The use of $\Lambda$ оүоৎ in Joh 1:1-18 is parallel to Heb 1:1-4.

And upholding ( $\varphi \varepsilon \rho \omega \nu \tau \varepsilon$ ). Present active participle of $\varphi \varepsilon \rho \omega$ closely connected with $\omega \nu$ (being) by $\tau \varepsilon$ and like Col 1:17 in idea. The newer science as expounded by Eddington and Jeans is in harmony with the spiritual and personal conception of creation here presented.

By the word of his power ( $\tau \omega \rho \eta \mu \alpha \tau \tau \eta \varsigma \delta v v \alpha \mu \varepsilon \omega \varsigma \alpha v \tau o v$ ). Instrumental case of $\rho \eta \mu \alpha$ (word). See 11:3 for $\rho \eta \mu \alpha \tau \theta \varepsilon o v$ (by the word of God) as the explanation of creation like Genesis, but here autou refers to God's Son as in 1:2.

Purification of sins ( $\kappa \alpha \theta \alpha \rho \sigma \mu \circ v \tau \omega \nu \alpha \mu \alpha \rho \tau \iota \omega v)$. K $\alpha \theta \alpha \rho \iota \sigma \mu \circ \varsigma$ is from $\kappa \alpha \theta \alpha \rho \iota \zeta \omega$, to cleanse (Mt 8:3; Heb 9:14 ), here only in Hebrews, but in same sense of cleansing from sins,
 first mention of the priestly work of Christ, the keynote of this Epistle.

Sat down ( $\varepsilon \kappa \alpha \theta \iota \sigma \varepsilon v)$. First aorist active of $\kappa \alpha \theta \iota \zeta \omega$, "took his seat," a formal and dignified act.

Of the Majesty on high ( $\tau \eta \varsigma \mu \varepsilon \gamma \alpha \lambda о \sigma v \nu \eta \varsigma \varepsilon \nu v \psi \eta \lambda o \iota \varsigma)$. Late word from $\mu \varepsilon \gamma \alpha \varsigma$, only in LXX (De 32:3; 2Sa 7:23 , etc.), Aristeas, Heb 1:3; 8:1; Jude 1:25. Christ resumed his original dignity and glory (Joh 17:5). The phrase $\varepsilon v v \psi \eta \lambda$ oıs occurs in the Psalms (Ps 93:4), here
 in the heavenlies (Eph 1:3,20). Jesus is here pictured as King (Prophet and Priest also) Messiah seated at the right hand of God.

Heb 1:4
Having become ( $\gamma \varepsilon v o \mu \varepsilon v o \varsigma)$. Second aorist middle participle of $\gamma$ ivo $\mu$. In contrast with on in verse 3 .

By so much ( $\tau 0 \sigma 0 v \tau \omega$ ). Instrumental case of tooovtos correlative with oo $\omega$ (as) with comparative in both clauses ( $\kappa \rho \varepsilon \iota \tau \tau \omega v$, better, comparative of $\kappa \rho \alpha \tau v \varsigma, \delta \delta \alpha \varphi о \rho \omega \tau \varepsilon \rho \circ v$, more excellent, comparative of $\delta$ ı $\alpha$ орос).

Than the angels ( $\tau \omega v \alpha \gamma \gamma \varepsilon \lambda \omega v$ ). Ablative of comparison after $\kappa \rho \varepsilon \iota \tau \tau \omega v$, as often.
Than they ( $\left.\pi \alpha \rho^{\prime} \alpha v \tau o u \varsigma\right)$. Instead of the ablative $\alpha v \tau \omega v$ here the preposition $\pi \alpha \rho \alpha$ (along, by the side of) with the accusative occurs, another common idiom as in 3:3; 9:23. $\Delta$ ıцророৎ only in Hebrews in N.T. except Ro 12:6.

Hath inherited ( $\kappa \varepsilon \kappa \lambda \eta \rho о v o \mu \eta \kappa \varepsilon v$ ). Perfect active indicative of $\kappa \lambda \eta \rho \circ v o \mu \varepsilon \omega$ (from $\kappa \lambda \eta \rho о$ ооноऽ, heir, verse 2), and still inherits it, the name (ovo $\alpha$, oriental sense of rank) of "Son" which is superior to prophets as already shown ( $1: 2$ ) and also to angels ( $1: 4-2: 18$ ) as he now proceeds to prove. Jesus is superior to angels as God's Son, his deity ( 1:4-2:4). The author proves it from Scripture ( 1:4-14).

Heb 1:5
Unto which (Tiv). "To which individual angel." As a class angels are called sons of God (Elohim) (Ps 29:1), but no single angel is called God's Son like the Messiah in Ps 2:7 . Dods takes "have I begotten thee" ( $\gamma \varepsilon \gamma \varepsilon v \nu \eta \kappa \alpha \sigma \varepsilon$, perfect active indicative of $\gamma \varepsilon v v \alpha \omega$ ) to refer to the resurrection and ascension while others refer it to the incarnation.

And again ( $\kappa \alpha \pi \alpha \lambda \iota v$ ). This quotation is from 2Sa 7:14. Note the use of $\varepsilon ı \varsigma$ in the predicate with the sense of "as" like the Hebrew (LXX idiom), not preserved in the English. See

Mt 19:5; Lu 2:34 . Like Old English "to" or "for." See 2Co 6:18; Re 21:7 for the same passage applied to relation between God and Christians while here it is treated as Messianic.

Heb 1:6
And when he again bringeth in (o $\tau \alpha \nu \delta \varepsilon \pi \alpha \lambda ı v \varepsilon เ \sigma \alpha \gamma \alpha \gamma \eta)$. Indefinite temporal clause with $o \tau \alpha v$ and second aorist active subjunctive of $\varepsilon \iota \sigma \alpha \gamma \omega$. If $\pi \alpha \lambda \iota \nu$ is taken with $\varepsilon \iota \sigma \alpha \gamma \alpha \gamma \eta$, the reference is to the Second Coming as in 9:28. If $\pi \alpha \lambda \iota v$ merely introduces another quotation (Ps 97:7) parallel to $\kappa \alpha \pi \alpha \lambda ı v$ in verse 5 , the reference is to the incarnation when the angels did worship the Child Jesus (Lu 2:13f. ). There is no way to decide certainly about it.

The first-born ( $\tau$ о $\pi \rho \omega \tau$ тотокоv). See Ps 89:28. For this compound adjective applied to Christ in relation to the universe see Col 1:15, to other men, Ro 8:29; Col 1:18, to the other children of Mary, Lu 2:7 ; here it is used absolutely.

The world ( $\tau \eta v$ oкко $\mu \varepsilon v \eta \eta)$ ). "The inhabited earth." See Ac 17:6 .
Let worship ( $\pi \rho \circ \sigma \kappa \nu v \eta \sigma \alpha \tau \omega \sigma \alpha v$ ). Imperative first aorist active third plural of $\pi \rho o \sigma \kappa v v \varepsilon \omega$, here in the full sense of worship, not mere reverence or courtesy. This quotation is from the LXX of De 32:43, but is not in the Hebrew, though most of the LXX MSS. (except F) have vio $\theta$ gov, but the substance does occur also in Ps $97: 7$ with o a $\gamma \gamma \varepsilon \lambda$ o autov.

Heb 1:7
Of the angels ( $\pi \rho \circ \varsigma$ tous $\alpha \gamma \gamma \varepsilon \lambda$ ouc). "With reference to" ( $\pi \rho \circ \varsigma$ ) as in Lu 20:9. So "of the Son" in verse 8 . Note $\mu \varepsilon v$ here and $\delta \varepsilon$ in verse 8 in carefully balanced contrast. The quotation is from Ps 104:4.

Winds ( $\pi v \varepsilon v \mu \alpha \tau \alpha$ ). "Spirits" the word also means. The meaning (note article with $\alpha \gamma \gamma \varepsilon \lambda o v \varsigma$, not with $\pi v \varepsilon v \mu \alpha \tau \alpha)$ apparently is one that can reduce angels to the elemental forces of wind and fire (Moffatt).

A flame of fire ( $\pi \cup \rho \circ \varsigma \varphi \lambda \circ \gamma \alpha)$. Predicate accusative of $\varphi \lambda 0 \xi$, old word, in N.T. only here and Lu 16:24. Lunemann holds that the Hebrew here is wrongly rendered and means that God makes the wind his messengers (not angels) and flaming fire his servants. That is all true, but that is not the point of this passage. Preachers also are sometimes like a windstorm or a fire.

Heb 1:8
O God (o $\theta$ soc). This quotation (the fifth) is from Ps $45: 7 \mathrm{f}$. A Hebrew nuptial ode $(\varepsilon \pi \imath \theta a \lambda \alpha \mu \nu \nu \mu)$ for a king treated here as Messianic. It is not certain whether o $\theta \varepsilon o c$ is here the vocative (address with the nominative form as in Joh 20:28 with the Messiah termed $\theta \varepsilon o \varsigma$ as is possible, Joh 1:18) or o $\theta \varepsilon o c$ is nominative (subject or predicate) with $\varepsilon \sigma \tau \iota v$ (is) understood: "God is thy throne" or "Thy throne is God." Either makes good sense.

Sceptre ( $\rho \alpha \beta \delta o \varsigma)$. Old word for walking-stick, staff (Heb 11:21).
Heb 1:9

Hath anointed thee ( $\varepsilon \chi \rho\lrcorner \sigma \varepsilon v \sigma \varepsilon$ ). First aorist active indicative of $\chi \rho \iota \omega$, to anoint, from which verb the verbal Xpıбтoৎ (Anointed One) comes. See Christ's use of expıбعv in Lu 4:18 from Isa 66:1 .

With the oil of gladness ( $\varepsilon \lambda \alpha \ldots v \sim \alpha \gamma \lambda \lambda \iota \alpha \sigma \varepsilon \omega \varsigma)$. Accusative case with $\varepsilon \chi \rho \iota \sigma \varepsilon v$ (second accusative besides $\sigma \varepsilon$ ). Perhaps the festive anointing on occasions of joy ( 12:2). See Lu 1:44

Fellows ( $\mu \varepsilon \tau о \chi$ ои¢). Old word from $\mu \varepsilon \tau \varepsilon \chi \omega$, partners, sharers, in N.T. only in Hebrews save Lu 5:7. Note $\pi \alpha \rho \alpha$ with accusative here, beside, beyond, above (by comparison, extending beyond).

Heb 1:10
Lord (Kupıs). In the LXX, not in the Hebrew. Quotation (the sixth) from Ps 102:26-28 through verses 10-12. Note emphatic position of $\sigma v$ here at the beginning as in verses 11-12 ( $\sigma \cup \delta \varepsilon$ ). This Messianic Psalm pictures the Son in his Creative work and in his final triumph.

Hast laid the foundation $(\varepsilon \theta \varepsilon \mu \varepsilon \lambda \iota \omega \sigma a \varsigma)$. First aorist active of $\theta \varepsilon \mu \varepsilon \lambda_{\iota} \omega \omega$, old verb from $\theta \varepsilon \mu \varepsilon \lambda_{\iota}$ o̧ (foundation) for which see Col 1:23 .

Heb 1:11
They (avto). The heavens (ovpavo).
Shall perish ( $\alpha \pi \sigma \lambda o u v \tau \alpha$ ). Future middle of $\alpha \pi \sigma \lambda \lambda \nu \mu$. Modern scientists no longer postulate the eternal existence of the heavenly bodies.

But thou continuest ( $\sigma v \delta \varepsilon \delta \iota \alpha \mu \varepsilon v \varepsilon \iota \varsigma)$. This is what matters most, the eternal existence of God's Son as Creator and Preserver of the universe (Joh 1:1-3; Col 1:14ff. ).

Shall wax old ( $\pi \alpha \lambda \alpha \omega \omega \theta \eta \sigma o v \tau \alpha$ ). First future passive indicative of $\pi \alpha \lambda \alpha \iota \omega \omega$, from $\pi \alpha \lambda \alpha \iota \varrho$, for which see Lu 12:33; Heb 8:13 .

Heb 1:12
A mantle ( $\pi \varepsilon \rho ı(\beta) \lambda \alpha \iota v)$. Old word for covering from $\pi \alpha \rho ı \beta \alpha \lambda \lambda \omega$, to fling around, as a veil in 1Co 11:15, nowhere else in N.T.

Shalt thou roll up ( $\left.\varepsilon \lambda_{\perp} \xi \varepsilon ı \varsigma\right)$. Future active of $\varepsilon \lambda_{\lrcorner \sigma \sigma \omega}$, late form for $\left.\varepsilon ı \lambda\right\lrcorner \sigma \sigma \omega$, in N.T. only here and Re 6:14, to fold together.

As a garment ( $\omega \varsigma \iota \mu \alpha \tau \circ v$ ). LXX repeats from 11.
They shall be changed ( $\alpha \lambda \lambda \alpha \gamma \eta \sigma o v \tau \alpha$ ). Second future passive of $\alpha \lambda \lambda \alpha \sigma \sigma \omega$, old verb, to change.

Shall not fail (ouк $\varepsilon \kappa \lambda \varepsilon \varepsilon \psi о v \sigma เ v)$. Future active of $\varepsilon \kappa \lambda \varepsilon เ \pi \omega$, to leave out, to fail, used of the sun in Lu 23:45. "Nature is at his mercy, not he at nature's" (Moffatt).

Heb 1:13
Hath he said ( $\varepsilon \varsigma \rho \eta \kappa \varepsilon v)$. Perfect active common use of the perfect for permanent record. This seventh quotation is proof of the Son's superiority as the Son of God (his deity) to angels and is from Ps 110:1, a Messianic Psalm frequently quoted in Hebrews.

Sit thou ( $\kappa \alpha \theta$ ои). Second person singular imperative middle of $\kappa \alpha \theta \eta \mu \alpha$, to sit, for the longer form $\kappa \alpha \theta \eta \sigma 0$, as in Mt 22:44; Jas 2:3 .

On my right hand ( $\varepsilon \kappa \delta \varepsilon \xi \omega \omega \nu \mu \circ v$ ). "From my right." See 1:3 for $\varepsilon v \delta \varepsilon \xi / a$ "at the right hand."

Till I make ( $\varepsilon \omega \varsigma \alpha \nu \theta \omega$ ). Indefinite temporal clause about the future with $\varepsilon \omega \varsigma$ and the second aorist active subjunctive of $\tau i \theta \eta \mu$ with $\alpha v$ (often not used), a regular and common idiom. Quoted also in Lu 20:43. For the pleonasm in $v \pi \sigma \delta \iota v$ and $\tau \omega v \pi o \delta \omega v$ (objective genitive) see Mt 5:35.

Heb 1:14
Ministering spirits ( $\lambda \varepsilon \iota \tau о \cup \rho \gamma \iota \kappa \alpha \pi \nu \varepsilon v \mu \alpha \tau \alpha$ ). Thayer says that $\lambda \varepsilon \iota \tau о \cup \rho \gamma \iota \kappa \circ \varsigma$ was not found in profane authors, but it occurs in the papyri for "work tax" (money in place of service) and for religious service also. The word is made from $\lambda \varepsilon \iota \tau$ то $\rho \gamma$ ıa (Lu 1:23; Heb 8:6; 9:21).

Sent forth ( $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda o \mu \varepsilon v \alpha$ ). Present passive participle of $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$, sent forth repeatedly, from time to time as occasion requires.

For the sake of $(\delta \iota \alpha)$. With the accusative, the usual causal meaning of $\delta \iota \alpha$.
That shall inherit ( $\tau о v \varsigma \mu \varepsilon \lambda \lambda$ оvтас $\kappa \lambda \eta \rho \circ v o \mu \varepsilon เ v$ ). "That are going to inherit," common idiom of $\mu \varepsilon \lambda \lambda \omega$ (present active participle) with the infinitive (present active here), "destined to inherit" (Mt 11:14).

Salvation ( $\sigma \omega \tau \eta \rho / \alpha v$ ). Here used of the final salvation in its consummation. Only here in the N.T. do we have "inherent salvation," but see 6:12; 12:17. We do not have here the doctrine of special guardian angels for each of us, but simply the fact that angels are used for our good. "And if so, may we not be aided, inspired, guided by a cloud of witnesses--not witnesses only, but helpers, agents like ourselves of the immanent God?" (Sir Oliver Lodge, The Hibbert Journal, Jan., 1903, p. 223).

## Hebrews 2

Heb 2:1
Therefore ( $\delta \iota \alpha$ tov $\boldsymbol{\sigma}$ ). Because Jesus is superior to prophets and angels and because the new revelation is superior to the old. The author often pauses in his argument, as here, to drive home a pungent exhortation.

Ought ( $\delta \varepsilon$ ). It is necessity, necessity rather than obligation ( $\chi \rho \eta$ ).
To give heed ( $\pi \rho \sigma \sigma \varepsilon \chi \varepsilon เ v$ ). Present active infinitive with vouv (accusative singular of vous) understood as in Ac 8:6.

More earnest ( $\pi \varepsilon \rho \iota \sigma \sigma о \tau \varepsilon \rho \omega \varsigma)$. Comparative adverb, "more earnestly," "more abundantly" as in 1Th 2:7 To the things that were heard ( тоьৎ $\alpha \kappa о \cup \sigma \theta \varepsilon \iota \sigma \iota)$ ). Dative plural neuter of the articular participle first aorist passive of $\alpha \kappa 0 v \omega$.

Lest haply we drift away ( $\mu \eta \pi \sigma \tau \varepsilon \pi \alpha \rho \alpha \rho v \omega \mu \varepsilon \nu$ ). Negative clause of purpose with $\mu \eta$ $\pi \sigma \tau \varepsilon$ and the second aorist passive subjunctive of $\pi \alpha \rho \alpha \rho \rho \varepsilon \omega$, old verb to flow by or past, to glide by, only here in N.T. (cf. Pr 3:21 ). Xenophon (Cyrop. IV. 52) uses it of the river flowing by. Here the metaphor is that "of being swept along past the sure anchorage which is within reach" (Westcott), a vivid picture of peril for all ("we," $\eta \mu a \varsigma)$.

Heb 2:2
For if ... proved steadfast $(\varepsilon \gamma \alpha \rho \ldots \varepsilon \gamma \varepsilon v \varepsilon \tau \sigma \beta \varepsilon \beta \alpha \iota \circ)$. Condition of first class, assumed as true.

Through angels ( $\delta i^{\prime} \alpha \gamma \gamma \varepsilon \lambda \omega v$ ). Allusion to the use of angels by God at Sinai as in Ac 7:38,53; Gal 3:19, though not in the O.T., but in Josephus (Ant. XV. 156).

Transgression and disobedience ( $\pi \alpha \rho \alpha \beta \alpha \sigma \iota \kappa \alpha \pi \alpha \rho \alpha \kappa о \eta)$. Both words use $\pi \alpha \rho \alpha$ as in $\pi \alpha \rho \alpha \rho v \omega \mu \varepsilon \nu$, refused to obey (stepping aside, $\pi \alpha \rho \alpha-\beta \alpha \sigma \iota \varsigma$ as in Ro 2:23 ), neglect to obey ( $\pi \alpha \rho-\alpha \kappa о \eta$ as in Ro 5:19), more than a mere hendiadys.

Recompense of reward ( $\mu \iota \sigma \theta a \pi o \delta o \sigma \iota \alpha \nu$ ). Late double compound, like $\mu \iota \sigma \theta a \pi o \delta o \tau \eta \varsigma$ (Heb 11:6 ), from $\mu$ $\sigma \theta$ oc (reward) and $a \pi o \delta \delta \delta \omega \mu$, to give back. The old Greeks used

Just ( $\varepsilon v \delta \iota \kappa o v$ ). Old compound adjective, in N.T. only here and Ro 3:8.
Heb 2:3
How shall we escape? ( $\pi \omega \varsigma \eta \mu \varepsilon \iota \varsigma \varepsilon \kappa \varphi \varepsilon v \xi_{\text {o }} \varepsilon \theta \alpha$;). Rhetorical question with future middle indicative of $\varepsilon \kappa \varphi \varepsilon \cup \gamma \omega$ and conclusion of the condition.

If we neglect ( $\alpha \mu \varepsilon \lambda \eta \sigma \alpha \nu \tau \varepsilon \varsigma)$. First aorist active participle of $\alpha \mu \varepsilon \lambda \varepsilon \omega$, "having neglected."
So great salvation ( $\tau \eta \lambda \iota \kappa \alpha v \tau \eta \varsigma \sigma \omega \tau \eta \rho \iota \alpha \varsigma)$. Ablative case after $\alpha \mu \varepsilon \lambda \eta \sigma \alpha \nu \tau \varepsilon \varsigma$. Correlative pronoun of age, but used of size in the N.T. (Jas 3:4; 2Co 1:10).

Which ( $\eta \tau \iota \varsigma)$. "Which very salvation," before described, now summarized.

Having at the first been spoken ( $\alpha \rho \chi \eta \nu \lambda \alpha \beta o v \sigma \alpha \lambda \alpha \lambda \varepsilon เ \sigma \theta \alpha)$. Literally, "having received a beginning to be spoken," "having begun to be spoken," a common literary Koine idiom (Polybius, etc.).

Through the Lord ( $\delta \iota \alpha$ tov кvpıov). The Lord Jesus who is superior to angels. Jesus was God's full revelation and he is the source of this new and superior revelation.

Was confirmed $(\varepsilon \beta \varepsilon \beta a \iota \omega \theta \eta)$. First aorist passive indicative of $\beta \varepsilon \beta \alpha \iota \omega$, from $\beta \varepsilon \beta \alpha \iota \rho$, (stable), old verb as in 1Co 1:6.

By them that heard (v $\tau \sigma \tau \omega v$ aкоvбаv $\tau \omega v$ ). Ablative case with v $\tau 0$ of the articular first aorist active participle of aкоиш. Those who heard the Lord Jesus. Only one generation between Jesus and the writer. Paul (Ga 1:11) got his message directly from Christ.

Heb 2:4
 with the present active participle of the late double compound verb $\sigma v v \varepsilon \pi \mu \mu \alpha \rho \tau v \rho \varepsilon \omega$, to join ( $\sigma \cup v$ ) in giving additional ( $\varepsilon \pi$ ) testimony ( $\mu \alpha \rho \tau \cup \rho \varepsilon \omega)$. Here only in N.T., but in Aristotle, Polybius, Plutarch.

Both by signs ( $\sigma \eta \mu \varepsilon \circ \circ \varsigma \tau \varepsilon \kappa \alpha$ )
and wonders ( $\kappa \alpha \tau \varepsilon \rho \alpha \sigma \iota v)$
and by manifold powers ( $\kappa \alpha$ токкı $\lambda \ldots \varsigma ~ \delta u v \alpha \mu \varepsilon \sigma \iota v$ )
and by gifts of the Holy Ghost ( $\kappa \alpha \pi \nu \varepsilon v \mu \alpha \tau о \varsigma ~ а ү เ о v ~ \mu \varepsilon \rho ı \sigma \mu о ь) . ~ I n s t r u m e n t a l ~ c a s e ~$ used with all four items. See Ac 2:22 for the three words for miracles in inverse order (powers, wonders, signs). Each word adds an idea about the $\varepsilon \rho \gamma \alpha$ (works) of Christ. T $\mathrm{T} \rho \alpha{ }^{\rho}$ (wonder) attracts attention, $\delta \cup v \alpha \mu \iota \varsigma$ (power) shows God's power, $\sigma \eta \mu \varepsilon ו \circ v$ reveals the purpose of God in the miracles. For поюкıдаця (manifold, many-coloured) see Mt 4:24; Jas 1:2 . For $\mu \varepsilon \rho \iota \sigma \mu$ оя for distribution (old word, in N.T. only here and Heb 4:12 ) see 1Co 12:4-30 .

According to his own will ( $\kappa \alpha \tau \alpha \tau \eta \nu$ avtov $\theta \varepsilon \lambda \eta \sigma \iota v$ ). The word $\theta \varepsilon \lambda \eta \sigma \iota s$ is called a vulgarism by Pollux. The writer is fond of words in -ıc.

Heb 2:5
For not unto angels ( $o v \gamma \alpha \rho \alpha \gamma \gamma \varepsilon \lambda o t s$ ). The author now proceeds to show ( 2:5-18) that the very humanity of Jesus, the Son of Man, likewise proves his superiority to angels.

The world to come ( $\tau \eta \nu$ оккоט $\mu \varepsilon \nu \eta \nu \tau \eta \nu \mu \varepsilon \lambda \lambda$ ovбav). The new order, the salvation just described. See a like use of $\mu \varepsilon \lambda \lambda \omega$ (as participle) with $\sigma \omega \tau \eta \rho \iota \alpha$ ( 1:14), $\alpha \omega \omega v$ (6:4f. ), $\alpha \gamma \alpha \theta \alpha$ (9:11; 10:1), то入ıऽ ( 13:14).

Whereof we speak ( $\pi \varepsilon \rho \eta \varsigma \lambda \alpha \lambda o u \mu \varepsilon v$ ). The author is discussing this new order introduced by Christ which makes obsolete the old dispensation of rites and symbols. God did not put this new order in charge of angels.

Heb 2:6
But one somewhere ( $\delta \varepsilon \pi$ лov $\tau \iota \varsigma)$. See 4:4 for a like indefinite quotation. Philo uses this "literary mannerism" (Moffatt). He quotes Ps 8:5-7 and extends here to .

Hath testified ( $\delta เ \varepsilon \mu \alpha \rho \tau \cup \rho \alpha \tau о$ ). First aorist middle indicative of $\delta ı \alpha \mu \alpha \rho \tau v \rho о \mu \alpha$, old verb to testify vigorously (Ac 2:40).

What (T). Neuter, not masculine $\tau \iota \varsigma(w h o)$. The insignificance of man is implied.
 about himself, but literally here "son of man" like the same words so often in Ezekiel, without Messianic meaning here.

Visited ( $\varepsilon \pi \iota \sigma \kappa \varepsilon \pi \tau \eta)$. Second person singular present indicative middle of $\varepsilon \pi \iota \sigma \kappa \varepsilon \pi \tau \circ \mu \alpha$, old verb to look upon, to look after, to go to see (Mt 25:36 ), from which verb $\varepsilon \pi \iota \sigma \chi$ тоऽ, overseer, bishop, comes.

Heb 2:7
Thou madest him a little lower ( $\varepsilon \lambda \alpha \tau \tau \omega \sigma \alpha \varsigma \alpha \cup \tau o v \beta \rho \alpha \chi \nu \tau)$. First aorist active of old verb $\varepsilon \lambda a \tau \tau 0 \omega$ from $\varepsilon \lambda \alpha \tau \tau \omega \nu$ (less), causative verb to lessen, to decrease, to make less, only here, and verse 9 and Joh 3:30 in N.T. Bpaxv $\tau$ is accusative neuter of degree like 2Sa 16:1, "some little," but of time in Isa 57:17 (for a little while).

Than the angels ( $\pi \alpha \rho^{\prime} \alpha \gamma \gamma \varepsilon \lambda$ ouc). "Beside angels" like $\pi \alpha \rho \alpha$ with the accusative of comparison in 1:4,9. The Hebrew here has Elohim which word is applied to judges in Ps 82:1,6 (Joh 10:34f. ). Here it is certainly not "God" in our sense. In Ps 29:1 the LXX translates Elohim by vo $\theta$ zov (sons of God).

Thou crownedst ( $\varepsilon \sigma \tau \varepsilon \varphi \alpha v \omega \sigma \alpha \varsigma)$. First aorist active indicative of old verb, $\sigma \tau \varepsilon \varphi \alpha v o \omega$, to crown, in N.T. only here and 2Ti 2:5 The Psalmist refers to God's purpose in creating man with such a destiny as mastery over nature. The rest of verse 7 is absent in $B$.

Heb 2:8
In that he subjected ( $\varepsilon v \tau \omega \cup \pi о \tau \alpha \xi \alpha)$. First aorist active articular infinitive of $\cup \pi \alpha \tau \alpha \sigma \sigma \omega$ in the locative case, "in the subjecting."

He left ( $\alpha \varphi \eta \kappa \varepsilon v$ ). First aorist active indicative (kappa aorist) of $\alpha \varphi \imath \eta \mu$.
Nothing that is not subject to him (ou $\delta \varepsilon v$ avtc avvтотактоv). Later verbal of $v \pi o \tau \alpha \sigma \sigma \omega$ with $\alpha$ privative. Here in passive sense, active sense in 1Ti 1:9. Man's sovereignty was meant to be all-inclusive including the administration of "the world to come." "He is crowned king of nature, invested with a divine authority over creation" (Moffatt). But how far short of this destiny has man come!

But now we see not yet ( $\nu v \nu \delta \varepsilon$ out $\omega$ op $\omega \mu \varepsilon v$ ). Not even today in the wonderful twentieth century with man's triumphs over nature has he reached that goal, wonderful as are the researches by the help of telescope and microscope, the mechanism of the airplane, the submarine, steam, electricity, radio.

Heb 2:9
Even Jesus (I $\eta \sigma o v v$ ). We do not see man triumphant, but we do see Jesus, for the author is not ashamed of his human name, realizing man's destiny, "the very one who has been made a little lower than the angels" ( $\tau \operatorname{\sigma ov} \beta \rho \alpha \chi v \tau \pi \alpha \rho^{\prime} \alpha \gamma \gamma \varepsilon \lambda o v \varsigma \eta \lambda \alpha \tau \tau \omega \mu \varepsilon v o v$ ), quoting and
applying the language of the Psalm in verse 7 to Jesus (with article tov and the perfect passive participle of $\varepsilon \lambda \alpha \tau \tau \alpha \omega$ ). But this is not all. Death has defeated man, but Jesus has conquered death.

Because of the suffering of death ( $\delta \iota \alpha$ то $\pi \alpha \theta \eta \mu \alpha$ тov $\theta \alpha v \alpha \tau o v$ ). The causal sense of $\delta \iota \alpha$ with the accusative as in 1:14. Jesus in his humanity was put lower than the angels "for a little while" ( $\beta \rho \alpha \chi \cup \tau)$. Because of the suffering of death we see ( $\beta \lambda \varepsilon \pi \sigma \mu \varepsilon v$ ) Jesus crowned ( $\varepsilon \sigma \tau \varepsilon \varphi \alpha \nu \omega \mu \mu \varepsilon v \circ$, perfect passive participle of $\sigma \tau \varepsilon \varphi \alpha v o \omega$ from verse 7), crowned already "with glory and honour" as Paul shows in Php 2:9-11 (more highly exalted, $v \pi \varepsilon \rho \cup \psi \omega \sigma \varepsilon v)$ "that at the name of Jesus every knee should bow." There is more glory to come to Jesus surely, but he is already at God's right hand ( 1:3).

That by the grace of God he should taste death for every man ( $о \pi \omega \varsigma \chi \alpha \rho \tau \tau \theta \varepsilon \sigma v$ v $\tau \varepsilon \rho$ $\pi \alpha v \tau o \varsigma ~ \gamma \varepsilon v \sigma \eta \tau \alpha$ Өavatov). This purpose clause (o $\boldsymbol{\pi} \omega \varsigma$ instead of the more usual $ו v \alpha$ ) is pregnant with meaning. The author interprets and applies the language of the Psalm to Jesus and here puts Christ's death in behalf of (vォع ), and so instead of, every man as the motive for his incarnation and death on the Cross. The phrase to taste death ( $\gamma$ vuoua $\theta$ avatov) occurs in the Gospels (Mt 16:28; Mr 9:1; Lu 9:27; Joh 8:52 ), though not in the ancient Greek. It means to see death (Heb 11:5), "a bitter experience, not a rapid sip" (Moffatt). His death was in behalf of every one (not everything as the early Greek theologians took it). The death of Christ (Andrew Fuller) was sufficient for all, efficient for some. It is all "by the grace ( $\chi \alpha \rho \iota \tau$, instrumental case) of God," a thoroughly Pauline idea. Curiously enough some MSS. read $\chi \omega \rho \iota \varsigma \theta$ sov (apart from God) in place of $\chi \alpha \rho \iota \tau \theta \varepsilon o v$, Nestorian doctrine whatever the origin.

Heb 2:10
It became him ( $\varepsilon \pi \rho \varepsilon \pi \varepsilon v \alpha \cup \tau \omega)$. Imperfect active of $\pi \rho \varepsilon \pi \omega$, old verb to stand out, to be becoming or seemly. Here it is impersonal with $\tau \varepsilon \lambda \varepsilon \epsilon \omega \sigma \alpha$ as subject, though personal in Heb 7:26. Avt $\omega$ (him) is in the dative case and refers to God, not to Christ as is made plain by tov a $\propto \chi \eta \gamma \circ$ (author). One has only to recall Joh 3:16 to get the idea here. The voluntary humiliation or incarnation of Christ the Son a little lower than the angels was a seemly thing to God the Father as the writer now shows in a great passage ( $2: 10-18$ ) worthy to go beside Php 2:5-11.

For whom ( $\delta \iota^{\prime} \mathrm{ov}$ ). Referring to $\alpha \nu \tau \omega(\mathrm{God})$ as the reason (cause) for the universe ( $\tau \alpha$ $\pi \alpha \nu \tau \alpha)$.

Through whom ( $\delta \iota^{\prime} \mathrm{ov}$ ). With the genitive $\delta \iota \alpha$ expresses the agent by whom the universe came into existence, a direct repudiation of the Gnostic view of intermediate agencies (aeons) between God and the creation of the universe. Paul puts it succinctly in Ro 11:36 by his $\varepsilon \xi$ autov ка $\delta i$ a autov ка عıc autov та таvта. The universe comes out of God, by means of God, for God. This writer has already said that God used his Son as the Agent ( $\delta \iota^{\prime} \mathrm{ov}$ ) in
creation ( $1: 2$ ), a doctrine in harmony with $\operatorname{Col} 1: 15 f$. ( $\varepsilon v \alpha u \tau \omega 1, \delta \iota^{\prime}$ autov $\varepsilon \iota \varsigma \alpha \cup \tau o v$ ) and Joh 1:3.

In bringing ( $\alpha \gamma \alpha \gamma 0 v \tau \alpha$ ). Second aorist active participle of $\alpha \gamma \omega$ in the accusative case in spite of the dative $\alpha u \tau \omega$ just before to which it refers.

The author ( $\tau 0 \vee \alpha \rho \chi \eta \gamma \circ v$ ). Old compound word ( $\alpha \rho \chi \eta$ and $\alpha \gamma \omega$ ) one leading off, leader or prince as in Ac 5:31, one blazing the way, a pioneer (Dods) in faith (Heb 12:2), author (Ac 3:15). Either sense suits here, though author best (verse 9). Jesus is the author of salvation, the leader of the sons of God, the Elder Brother of us all (Ro 8:29).

To make perfect ( $\tau \varepsilon \lambda \varepsilon \omega \omega \sigma \alpha$ ). First aorist active infinitive of $\tau \varepsilon \lambda \varepsilon \iota O \omega$ (from $\tau \varepsilon \lambda \varepsilon \omega \varsigma)$ ). If one recoils at the idea of God making Christ perfect, he should bear in mind that it is the humanity of Jesus that is under discussion. The writer does not say that Jesus was sinful (see the opposite in 4:15), but simply that "by means of sufferings" God perfected his Son in his human life and death for his task as Redeemer and Saviour. One cannot know human life without living it. There was no moral imperfection in Jesus, but he lived his human life in order to be able to be a sympathizing and effective leader in the work of salvation.

Heb 2:11
He that sanctifieth (o $\alpha \gamma ı \alpha \zeta \omega v$ ). Present active articular participle of $\alpha \gamma ı \alpha \zeta \omega$. Jesus is the sanctifier (9:13f.; 13:12).
 It is a process here as in 10:14, not a single act, though in 10:10 the perfect passive indicative presents a completed state.

Of one ( $\varepsilon \xi \varepsilon v o \varsigma)$. Referring to God as the Father of Jesus and of the "many sons" above (verse 10) and in harmony with verse 14 below. Even before the incarnation Jesus had a kinship with men though we are not sons in the full sense that he is.

He is not ashamed (ouk $\varepsilon \pi \alpha \iota \sigma \chi \cup v \varepsilon \tau \alpha)$. Present passive indicative of $\varepsilon \pi \alpha \iota \sigma \chi \cup v o \mu \alpha$, old compound (Ro 1:16). Because of the common Father Jesus is not ashamed to own us as "brothers" ( $\alpha \delta \varepsilon \lambda \varphi o u \varsigma)$, unworthy sons though we be.

Heb 2:12
Unto my brethren ( $\tau 0 ı \varsigma \alpha \delta \varepsilon \lambda \varphi$ oıs $\mu \circ v$ ). To prove his point the writer quotes Ps 22:22 when the Messiah is presented as speaking "unto my brethren."

Congregation (єкк入ךбા๙). The word came to mean the local church and also the general church or kingdom (Mt 16:18; Heb 12:23 ). Here we have the picture of public worship and the Messiah sharing it with others as we know Jesus often did.

Heb 2:13
I will put my trust in him ( $\mathrm{E} \gamma \omega \varepsilon \sigma \circ \mu \alpha \pi \varepsilon \pi \sigma \theta \omega \varsigma \varepsilon \pi^{\prime} \alpha \cup \tau \omega$ ). A rare periphrastic (intransitive) future perfect of $\pi \varepsilon ө \omega$, a quotation from Isa 8:17. The author represents the Messiah as putting his trust in God as other men do (cf. Heb 12:2 ). Certainly Jesus did this constantly.

The third quotation ( $\kappa \alpha \pi \alpha \lambda \iota v$, And again) is from Isa 8:18 (the next verse), but the Messiah shows himself closely linked with the children ( $\pi \alpha \iota \delta ı \alpha)$ of God, the sons (vio) of verse 10.

Heb 2:14
 "blood and flesh." The verb is perfect active indicative of $\kappa \circ \tau v \omega v \varepsilon \omega$, old verb with the regular genitive, elsewhere in the N.T. with the locative (Ro 12:13 ) or with $\varepsilon v$ or $\varepsilon \varsigma \varsigma$. "The children have become partners ( $\kappa 0, v \omega v o$ ) in blood and flesh."

Partook ( $\mu \varepsilon \tau \varepsilon \sigma \chi \varepsilon$ ). Second aorist active indicative of $\mu \varepsilon \tau \varepsilon \chi \omega$, to have with, a practical synonym for $\kappa o \iota v \omega v \varepsilon \omega$ and with the genitive also ( $\tau \omega v \alpha \nu \tau \omega v$ ). That he might bring to nought (ıva катарүпбๆ). Purpose of the incarnation clearly stated with $t v \alpha$ and the first aorist active subjunctive of $\kappa \alpha \tau \alpha \rho \gamma \varepsilon \omega$, old word to render idle or ineffective (from ката, a $\rho \gamma$ ) $)$, causative verb ( 25 times in Paul), once in Luke (Lu 13:7), once in Hebrews (here). "By means of death" (his own death) Christ broke the power (кратоऽ) of the devil over death (paradoxical as it seems), certainly in men's fear of death and in some unexplained way Satan had sway over the realm of death (Zec 3:5f. ). Note the explanatory tout' $\varepsilon \sigma \tau \iota v$ (that is) with the accusative after it as before it. In Re 12:7 Satan is identified with the serpent in Eden, though it is not done in the Old Testament. See Ro 5:12; Joh 8:44; 14:30; 16:11; 1Jo 3:12. Death is the devil's realm, for he is the author of sin. "Death as death is no part of the divine order" (Westcott).

Heb 2:15
And might deliver ( $\kappa \alpha \alpha \pi \alpha \lambda \lambda \alpha \xi \eta$ ). Further purpose with the first aorist active subjunctive of $\alpha \pi \pi \alpha \lambda \lambda \alpha \sigma \sigma \omega$, old verb to change from, to set free from, in N.T. only here, Lu 12:58; Ac 19:12.

Through fear of death ( $\varphi \circ \beta \omega$ Өavatov). Instrumental case of $\varphi \circ \beta \circ \varsigma$. The ancients had great fear of death though the philosophers like Seneca argued against it. There is today a flippant attitude towards death with denial of the future life and rejection of God. But the author of Hebrews saw judgement after death (9:27f. ). Hence our need of Christ to break the power of $\sin$ and Satan in death.

All their lifetime ( $\delta \alpha \alpha$ тavto $\operatorname{\tau ov} \zeta \eta \iota v)$. Present active infinitive with $\pi \alpha \varsigma$ and the article in the genitive case with $\delta$ เa, "through all the living."
 with genitive, bond-slaves of fear, a graphic picture. Jesus has the keys of life and death and said: "I am the life." Thank God for that.

Heb 2:16
Verily ( $\delta \varepsilon$ пou). "Now in some way," only here in N.T.
Doth he take hold ( $\varepsilon \pi i \lambda \alpha \mu \beta \alpha v \varepsilon \tau \alpha)$. Present middle indicative and means to lay hold of, to help, like $\beta$ o $\eta \eta \eta \sigma$ in verse 18.

The seed of Abraham ( $\sigma \pi \varepsilon \rho \mu \alpha \tau о \varsigma ~ A \beta \rho \alpha \alpha \mu)$. The spiritual Israel (Ga 3:29), children of faith (Ro 9:7).

Heb 2:17
Wherefore ( $\mathrm{o} \theta \varepsilon v$ ). Old relative adverb ( o and enclitic $\theta \varepsilon v$, whence of place (Mt 12:44 ), of source (1Jo 2:18), of cause as here and often in Hebrews ( $3: 1 ; 7: 25 ; 8: 3 ; 9: 18 ; 11: 19$ ).

It behoved him ( $\omega \varphi \varepsilon \wedge \varepsilon \varepsilon v$ ). Imperfect active of opsı $\lambda \omega$, old verb to owe, money ( Mt 18:28), service and love (Ro 13:8), duty or obligation as here and often in N.T. (Lu 17:10 ). Jesus is here the subject and the reference is to the incarnation. Having undertaken the work of redemption (Joh 3:16), voluntarily (Joh 10:17), Jesus was under obligation to be properly equipped for that priestly service and sacrifice.

In all things ( $\kappa \alpha \tau \alpha \pi \alpha v \tau \alpha)$. Except yielding to $\sin (H e b 4: 15)$ and yet he knew what temptation was, difficult as it may be for us to comprehend that in the Son of God who is also the Son of man (Mr 1:13). Jesus fought through to victory over Satan.

To be made like unto his brethren ( $\tau о \iota \varsigma ~ \alpha \delta \varepsilon \lambda \varphi о \iota \varsigma ~ о \mu о ו \omega \theta \eta \nu \alpha)$. First aorist passive infinitive of o $\mu$ oto $\omega$, old and common verb from oноoo $\varsigma$ (like), as in Mt 6:8, with the associative instrumental case as here. Christ, our Elder Brother, resembles us in reality (Php 2:7 "in the likeness of men") as we shall resemble him in the end (Ro 8:29 "first-born among many brethren"; 1Jo 3:2 "like him"), where the same root is used as here (oı $\omega \mu \alpha$, oноьoс). That he might be (iva $\gamma \varepsilon v \eta \tau \alpha$ ). Purpose clause with $i v \alpha$ and the second aorist middle subjunctive of $\gamma \iota v o \mu a$, to become, "that he might become." That was only possible by being like his brethren in actual human nature.

Merciful and faithful high priest ( $\varepsilon \lambda \varepsilon \eta \mu \omega v \kappa \alpha$ тıбтоৎ $\alpha \rho \chi เ \varepsilon \rho \varepsilon \cup \varsigma)$. The sudden use of a $\rho$ хє $\varepsilon \varepsilon v$, here for Jesus has been anticipated by 1:3; 2:9 and see 3:1. Jesus as the priest-victim is the chief topic of the Epistle. These two adjectives ( $\varepsilon \lambda \varepsilon \eta \mu \omega \nu$ and $\pi \iota \sigma \tau o \varsigma)$ touch the chief points in the function of the high priest (5:1-10), sympathy and fidelity to God. The Sadducean high priests (Annas and Caiaphas) were political and ecclesiastical tools and puppets out of sympathy with the people and chosen by Rome.

In things pertaining to God ( $\tau \alpha \pi \rho o \varsigma \tau \operatorname{\tau ov} \theta \varepsilon o v$ ). The adverbial accusative of the article is a common idiom. See the very idiom $\tau \alpha \pi \rho o \varsigma ~ \tau o v ~ \theta \varepsilon o v ~ i n ~ E x ~ 18: 19 ; ~ R o ~ 15: 17 . ~ T h i s ~ u s e ~$ of $\pi \rho o \varsigma$ we had already in Heb 1:7f. On the day of atonement the high priest entered the holy of holies and officiated in behalf of the people.

To make propitiation for ( $\varepsilon ı \varsigma ~ \tau о ~ \iota \lambda \alpha \sigma \kappa \varepsilon \sigma \theta \alpha)$ ). Purpose clause with $\varepsilon ı \varsigma ~ \tau o ~ a n d ~ t h e ~ i n f i n-~$ itive (common Greek idiom), here present indirect middle of $\iota \lambda a \sigma \kappa \circ \mu \alpha$, to render propitious to oneself (from $\uparrow \lambda \alpha o \varsigma$, Attic $\lambda \lambda \varepsilon \omega \varsigma$, gracious). This idea occurs in the LXX (Ps 65:3 ), but only here in N.T., though in Lu 18:13 the passive form ( $(\lambda \alpha \sigma \theta \eta \tau)$ occurs as in 2 Ki 5:18 . In 1Jo 2:2 we have $\lambda \lambda \alpha \sigma \mu \circ$ s used of Christ (cf. Heb 7:25 ). The inscriptions illustrate the meaning in Heb 2:17 as well as the LXX.

Heb 2:18

In that $(\varepsilon \nu \omega)$. Literally, "In which" ( $=\varepsilon \nu \tau o v \tau \omega \varepsilon \nu \omega$, in that in which), a causal idea, though in Ro 14:22 $\varepsilon v \omega$ means "wherein."

Hath suffered ( $\pi \varepsilon \pi \sigma v \theta \varepsilon v$ ). Second perfect active indicative of $\pi \alpha \sigma \chi \omega$, permanent part of Christ's experience.

Being tempted ( $\pi \varepsilon \iota \rho \alpha \sigma \theta \varepsilon \iota \varsigma)$. First aorist passive participle of $\pi \varepsilon \iota \rho \zeta \zeta \omega$. The temptation to escape the shame of the Cross was early and repeatedly presented to Christ, by Satan in the wilderness (Mt 4:8-11) , by Peter in the spirit of Satan (Mt 16:22f. ), in Gethsemane (Mt 26:39 ), and caused intense suffering to Jesus (Lu 22:44; Heb 5:8).

He is able ( $\delta v v a \tau \alpha$ ). This word strikes the heart of it all. Christ's power to help is due not merely to his deity as God's Son, but also to his humanity without which he could not sympathize with us (Heb 4:15).

To succour ( $\beta \circ \eta \theta \eta \sigma \alpha$ ). First aorist active infinitive of the old compound verb $\beta$ o $\eta \theta \varepsilon \omega$ ( $\beta o \eta$, a cry, $\theta \varepsilon \omega$, to run), to run at a cry or call for help (Mt 15:25).

Them that are tempted ( $\tau о \iota \varsigma \varepsilon \iota \rho \zeta \zeta \mu \varepsilon v o \iota \varsigma)$. Dative plural of the articular participle (present passive) of $\pi \varepsilon \iota \rho \alpha \zeta \omega$. These Jewish Christians were daily tempted to give up Christ, to apostatize from Christianity. Jesus understands himself ( $\alpha \cup \tau \circ \varsigma$ ) their predicament and is able to help them to be faithful.

## Hebrews 3

Heb 3:1
Holy brethren ( $\alpha \delta \varepsilon \lambda \varphi$ о $\alpha \nvdash \circ$ ). Only here in N.T., for $\alpha \gamma \iota \iota \varsigma$ in 1Th 5:27 only in late MSS. See Heb 2:11 for same idea. First time the author makes direct appeal to the readers, though first person in 2:1.

Partakers ( $\mu \varepsilon \tau о \chi о$ ). See Lu 5:7 for "partners" in the fishing, elsewhere in N.T. only in Hebrews (1:9; 6:4; 12:8) in N.T.

Of a heavenly calling ( $\kappa \lambda \eta \sigma \varepsilon \omega \varsigma \varepsilon \pi \sigma \cup \rho a v i o v)$. Only here in the N.T., though same idea in 9:15. See $\eta \alpha \nu \omega \kappa \lambda \eta \sigma \iota$ in Php 3:14 (the upward calling). The call comes from heaven and is to heaven in its appeal.

Consider ( $\kappa \alpha \tau \alpha v о \eta \sigma \alpha \tau \varepsilon$ ). First aorist active imperative of $\kappa \alpha \tau \alpha v o \varepsilon \omega$, old compound verb (ката, vovৎ), to put the mind down on a thing, to fix the mind on as in Mt 7:3; Lu 12:24

Even Jesus (İoouv). No "even" in the Greek, just like the idiom in 2:9, the human name held up with pride.

The Apostle and High Priest of our confession ( $\tau \circ v \alpha \pi о \sigma \tau о \lambda о v \kappa \alpha \alpha \rho \chi เ \varepsilon \rho \varepsilon \alpha \tau\rceil$ o $\mu \circ \lambda o \gamma \iota a \varsigma \eta \mu \omega v$ ). In descriptive apposition with I $\eta \sigma o v v$ and note the single article $\tau o v$. This is the only time in the N.T. that Jesus is called $\alpha \pi \sigma \sigma \tau о \lambda \circ \varsigma$, though he often used $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$ of God's sending him forth as in Joh 17:3 ( $\alpha \pi \varepsilon \sigma \tau \varepsilon ı \lambda \alpha \varsigma)$. This verb is used of Moses as sent by God (Ex 3:10 ). Moffatt notes that a $\pi о \sigma \tau 0 \lambda o \varsigma$ is Ionic for $\pi \rho \varepsilon \sigma \beta \varepsilon v \tau \eta \varsigma$, "not a mere envoy, but an ambassador or representative sent with powers." The author has already termed Jesus
 tians had confessed Jesus as their Apostle and High Priest. They do not begin to understand what Jesus is and means if they are tempted to give him up. The word runs through Hebrews with an urgent note for fidelity $(4: 14 ; 10: 23$ ). See o $\mu \boldsymbol{\lambda} \lambda \sigma \gamma \varepsilon \omega$ (o $\rho \sigma v$, same, $\lambda \varepsilon \gamma \omega$, say), to say the same thing, to agree, to confess, to profess.

Heb 3:2
Who was faithful ( $\pi \iota \sigma \tau 0 v o v \tau \alpha$ ). Present active participle with predicate accusative agreeing with I $\eta \sigma o u v$, "as being faithful."

That appointed him ( $\tau \omega \pi$ пoı $\eta \sigma \alpha \tau \alpha v \tau o v$ ). See 1Sa 12:6. Dative case of the articular participle (aorist active) of $\pi \circ เ \varepsilon \omega$ and the reference is to God. Note $\pi \iota \sigma \tau \circ \varsigma$ as in 2:17.

As also was Moses ( $\omega \varsigma \kappa \alpha \mathrm{M} \omega v \sigma \eta \varsigma$ ). The author makes no depreciatory remarks about Moses as he did not about the prophets and the angels. He cheerfully admits that Moses was faithful "in all his house" ( $\varepsilon v$ o $\lambda \omega \tau \omega$ o七к $\omega \alpha v \tau 0 v$ ), an allusion to Nu 12:7 ( $\varepsilon \alpha \nu$ o $\lambda \omega \tau \omega$ о七к $\omega \mu \mathrm{ov}$ ) about Moses. The "his" is God's. The use of oוкоц for the people (family) of God, not the building, but the group ( $1 \mathrm{Ti} 3: 15$ ) in which God is the Father. But wherein is Jesus superior to Moses? The argument is keen and skilful.

Heb 3:3
Hath been counted worthy of more glory than Moses ( $\pi \lambda \varepsilon เ \circ v o \varsigma \delta o \xi \eta \varsigma \pi \alpha \rho \alpha \mathrm{M} \omega v \sigma \eta \nu$ $\eta \xi \iota \omega \tau \alpha)$. Perfect passive indicative of $\alpha \xi \iota \omega \omega$, to deem worthy, permanent situation described with definite claim of Christ's superiority to Moses. $\Delta \mathrm{o} \xi \eta \varsigma$ in genitive case after $\eta \xi / \omega \tau \alpha$. For $\pi \alpha \rho \alpha$ after the comparative $\pi \lambda \varepsilon$ हоvos see 1:4,9; 2:7.

By so much as ( $\kappa \alpha \theta^{\prime}$ oбov). A proportionate measurement (common use of ката and the quantitative relative ooos).

Than the house ( tov oוкои). Ablative case of comparison after $\pi \lambda \varepsilon \iota o v a$. The architect is superior to the house just as Sir Christopher Wren is superior to St. Paul's Cathedral. The point in the argument calls for Jesus as the builder (o катабквvaбac, first aorist active participle of катабквva $\zeta \omega$, to found or build). But it is God's house as autov means (verses 2,5 ) and ov in verse 6 . This house of God existed before Moses (11:2,25 ). Jesus as God's Son founded and supervised this house of God.

Heb 3:4
Is God ( $\theta$ عoc). God is the Creator of all things and so of his "house" which his Son, Jesus Christ, founded and supervises.

Heb 3:5
And Moses ( $\kappa \alpha \operatorname{M} \omega v \sigma \eta \varsigma \mu \varepsilon v$ ). "Now Moses indeed on his part" ( $\mu \varepsilon v$ contrasted with $\delta \varepsilon$ ).

In ( $\varepsilon v$ ). Moses was in "God's house" "as a servant" ( $\omega \varsigma \theta \varepsilon \rho \alpha \pi \omega v$ ). Old word, in LXX, only here in N.T. and quoted from $\mathrm{Nu} 12: 7 \mathrm{f}$. Kin to the verb $\theta \varepsilon \rho a \pi \varepsilon v \omega$, to serve, to heal, and $\theta \varepsilon \rho a \pi \varepsilon ı a$, service ( Lu 9:11) and a group of servants ( Lu 12:42).

For a testimony of those things which were afterward to be spoken ( $\varepsilon ı \varsigma \mu \alpha \rho \tau \cup \rho ı o v$ $\tau \omega \nu \lambda \alpha \lambda \eta \theta \eta \sigma \sigma \mu \varepsilon v \omega v)$. Objective genitive of the articular future passive participle of $\lambda \alpha \lambda \varepsilon \omega$. It is not certain what it means whether the "testimony" ( $\mu$ a $10 \rho \circ$ ov) is to Moses or to God and whether it points on to Christ. In 9:9 see $\pi \alpha \rho \alpha \beta 0 \lambda \eta$ applied to the old dispensation as a symbol pointing to Christ and Christianity.

But Christ (X $\mathrm{X}\llcorner\sigma \tau o \varsigma \delta \varepsilon$ ). In contrast with Moses ( $\mu \varepsilon v$ in verse 5).
As a son ( $\omega \varsigma$ vioc). Instead of a $\theta \varepsilon \rho \alpha \pi \omega v$ (servant).
Over his house ( $\varepsilon \pi \tau \tau v$ ookov avtov). The difference between $\varepsilon \pi$ and $\varepsilon v$ added to that between vioc and $\theta \varepsilon \rho a \pi \omega v$. It is very neat and quite conclusive, especially when we recall the high place occupied by Moses in Jewish thought. In Ac 7:11 the Jews accused Stephen of speaking "blasphemous words against Moses and God" (putting Moses on a par with God).

Heb 3:6
Whose house are we (ov oккоৎ $\varepsilon \sigma \mu \varepsilon v \eta \mu \varepsilon \iota \varsigma)$. We Christians (Jew and Gentile) looked at as a whole, not as a local organization.

If we hold fast ( $\varepsilon \alpha v \kappa \alpha \tau \alpha \sigma \chi \omega \mu \varepsilon v$ ). Condition of third class with $\varepsilon \alpha v$ and second aorist (effective) active subjunctive of $\kappa \alpha \tau \varepsilon \chi \omega$. This note of contingency and doubt runs all through the Epistle. We are God's house if we do not play the traitor and desert.

Boldness ( $\pi \alpha \rho \rho \eta \sigma \iota \alpha v)$
and glorying ( $\kappa \alpha \kappa \alpha \cup \chi \eta \mu \alpha$ ) some had lost. The author makes no effort to reconcile this warning with God's elective purpose. He is not exhorting God, but these wavering Christians. All these are Pauline words. B does not have $\mu \varepsilon \chi \rho \tau \varepsilon \lambda$ ovc $\beta \varepsilon \beta \alpha \iota a v$ (firm unto the end), but it is clearly genuine in verse 14 . He pleads for intelligent confidence.

Heb 3:7
Wherefore ( $\delta ⿺ 0$ ). Probably this inferential conjunction ( $\delta \mathbf{1} \alpha, \mathrm{o}$, because of which) goes with $\mu \eta \sigma \kappa \lambda \eta \rho \cup v \eta \tau \varepsilon$ (harden not) in verse 8 rather than with $\beta \lambda \varepsilon \pi \varepsilon \tau \varepsilon$ (take heed) in verse 12 unless the long quotation be considered a parenthesis. The long quotation in verses 7-11 is from Ps 95:7-11. After the quotation the author has "three movements" (Moffatt) in his discussion of the passage as applied to the Jewish Christians (3:12-19; 4:1-10; 4:11-13). The peril of apostasy as shown by the example of the Israelites is presented with vividness and power.

As the Holy Ghost saith ( $\kappa \alpha \theta \omega \varsigma \lambda \varepsilon \gamma \varepsilon$ тo $\pi v \varepsilon \cup \mu \alpha$ тo $\alpha \gamma ı v$ ). Just this phrase nowhere else in the N.T., except Act 21:11 (Agabus), though practically the same idea in 9:8; 10:15. In 1Ti 4:1 the adjective "Holy" is wanting as in Re 2; 3 . But the writer quotes this Psalm as the Word of God and in 4:7 attributes it to David.

If ye shall hear ( $\varepsilon \alpha \vee \alpha \kappa о \cup \sigma \eta \tau \varepsilon)$. Condition of third class with $\varepsilon \alpha v$ and first aorist active subjunctive of aкоvш.

Heb 3:8
Harden not ( $\mu \eta \sigma \kappa \lambda \eta \rho \cup v \eta \tau \varepsilon$ ). Prohibition with $\mu \eta$ and first aorist (ingressive) active subjunctive of $\sigma \kappa \lambda \eta \rho \nu v \omega$, late verb from $\sigma \kappa \lambda \eta \rho o s$ (dried up, stiff, hard) as in Ac 19:9; Ro 9:18.

As in the provocation ( $\omega \varsigma \eta \nu \tau \omega \pi \alpha \rho \alpha \pi \iota \kappa \rho \alpha \sigma \mu \omega)$. Late compound from $\pi \alpha \rho \alpha \pi \iota \kappa \rho \alpha \iota \omega \omega$, late verb to embitter ( $\left.\pi \alpha \rho \alpha, \pi \_\kappa \rho \circ \varsigma\right)$, found only in LXX and here and verse 15. It means embitterment, exasperation. For the simple verb $\pi \kappa \kappa \rho \alpha \iota v \omega$, to make bitter, see Col 3:19. The reference is to Meribah (Ex. 17:1-7).

Like as in the day (ката $\tau \eta \vee \eta \mu \varepsilon \rho \alpha v)$. "According to the day" as in Ac 12:1; 19:23.
Of the temptation ( $\tau 00 \pi \varepsilon \rho \alpha \sigma \mu \circ v$ ). The reference is to Massah which took place at Rephidim.

Heb 3:9
Wherewith (ov). Literally, "where" (the wilderness) as in De 8:15.
Tempted me by proving me ( $\varepsilon \pi \varepsilon เ \rho a \sigma \alpha v \varepsilon v ~ \delta о к ц \mu \sigma \iota \alpha)$. No word for "me." The Israelites "tested" God "in putting to the proof" (only N.T. use of this word from $\delta о \kappa \mu \alpha \zeta \omega$ and this
from the LXX). They were not content with God's promise, but demanded objective proof ( $\varepsilon \rho \gamma \alpha$, deeds) of God.

Heb 3:10
And saw ( $\kappa \alpha$ ع $\ell \delta o v)$ ). "And yet saw."
Wherefore ( $\delta ⿺ 0$ ). Not in the LXX, but it makes clear the argument in the Psalm.
I was displeased $(\pi \rho \circ \sigma \omega \chi \theta \iota \sigma \alpha)$. First aorist active of $\pi \rho o \sigma o \chi \theta 1 \zeta \omega$, late compound for extreme anger and disgust. In N.T. only here and verse 17.

Err ( $\pi \lambda \alpha \nu \omega v \tau \alpha)$. Present middle indicative of $\pi \lambda \alpha v \alpha \omega$, to wander astray, common verb.
They did not know (ouk $\varepsilon \gamma v \omega \sigma \alpha v$ ). In spite of God's works ( $\varepsilon \rho \gamma \alpha$ ) and loving patience the Israelites failed to understand God's ways with them. Are we any better? They "cared not to take my road" (Moffatt).

Heb 3:11
As I sware ( $\omega \varsigma \omega \mu \circ \sigma \alpha$ ). "Correlating the oath and the disobedience" (Vincent). First aorist active indicative of o $\mu v v \omega$, old verb for solemn oath ( 6:13).
 anacoluthon for the Hebrew $\operatorname{im}$ (not). Really it is a condition of the first class with the conclusion not expressed, common in the LXX as here (Robertson, Grammar, p. 1024).
 rest, in LXX, in N.T. only in Ac 7:49; Heb 3:11-4:11 . Primarily the rest in Canaan and then the heavenly rest in which God dwells.

Heb 3:12
Take heed ( $\beta \lambda \varepsilon \pi \varepsilon \tau \varepsilon$ ). Present active imperative as in Php 3:2 (three times) of $\beta \lambda \varepsilon \pi \omega$ in place of the more usual opate. Solemn warning to the Jewish Christians from the experience of the Israelites as told in Ps 95 .

Lest haply there shall be ( $\mu \eta \pi о \tau \varepsilon \varepsilon \sigma \tau \alpha$ ). Negative purpose with $\mu \eta \pi \sigma \tau \varepsilon$ and the future indicative as in Mr 14:2. But we have in $\operatorname{Col} 2: 8 \mu \eta \tau \iota \varsigma \varepsilon \sigma \tau \alpha$ as in Heb 12:25; $\mu \eta$ occurs with the aorist subjunctive, and $\mu \eta \pi$ оо $\varepsilon$ with present subjunctive (Heb 4:1) or aorist subjunctive (Ac 5:39).

In any one of you ( $\varepsilon v \tau \tau v \nu \mu \omega v$ ). The application is personal and pointed.
An evil heart of unbelief ( $\kappa \alpha \rho \delta \iota \alpha ~ \pi о \vee \eta \rho \alpha ~ \alpha \pi \iota \sigma \tau \iota \alpha \varsigma) . ~ A ~ r e m a r k a b l e ~ c o m b i n a t i o n . ~$
Heart ( $\kappa \alpha \rho \delta ı \alpha$ ) is common in the LXX (about 1,000 times), but "evil heart" only twice in the O.T. (Jer 16:12; 18:12 ). Atıбтıas is more than mere unbelief, here rather disbelief, refusal to believe, genitive case describing the evil heart marked by disbelief which is no mark of intelligence then or now.

In falling away from the living God ( $\varepsilon v \tau \omega \alpha \pi о \sigma \tau \eta v \alpha \alpha \pi \sigma \theta \varepsilon o v \zeta \omega \nu \tau \circ \varsigma)$. "In the falling away" (locative case with $\varepsilon \nu$ of the second aorist active (intransitive) infinitive of $\alpha \varphi \iota \sigma \tau \eta \mu$, to stand off from, to step aside from (aro with the ablative case $\theta$ rov) the living God (common phrase in the O.T. and the N.T. for God as opposed to lifeless idols)). "Remember that
to apostatize from Christ in whom you have found God is to apostatize from God" (Dods). That is true today. See Eze 20:8 for this use of the verb.

Heb 3:13
So long as it is called today ( $\alpha \chi \rho \iota \varsigma$ ov $\tau 0 ~ \sigma \eta \mu \varepsilon \rho \circ v \kappa \alpha \lambda \varepsilon \iota \tau \alpha$ ). The only instance in the
 sense of "so long as" or "while" like $\varepsilon \omega \varsigma$. Elsewhere it means "until" and with either the aorist indicative (Ac 7:18), the future (Re 17:17), or the aorist subjunctive (Re 7:3).

Lest any one of you be hardened (ıva $\mu \eta \sigma \kappa \lambda \eta \rho v v \theta \eta \tau \tau \varsigma \varepsilon \xi \nu \mu \omega \nu$ ). Negative purpose clause with $v \alpha \alpha \mu \eta$ (that not) and the first aorist passive subjunctive of $\sigma \kappa \lambda \eta \rho v v \omega$, the vivid verb from verse 8.

By the deceitfulness of $\sin (\alpha \pi \alpha \tau \eta \tau \eta \varsigma \alpha \mu \alpha \rho \tau i \alpha \varsigma)$. Instrumental case $\alpha \pi \alpha \tau \eta$ (trick, fraud) as is always the case with $\sin$ (Ro 7:11; 2Th 2:10). Apostasy ( 12:4) is their peril and it is a trick of sin.

Heb 3:14
For we are become partakers of Christ ( $\mu \varepsilon \tau о \chi о ~ \gamma \alpha \rho$ tov X Xıбтоv $\gamma \varepsilon \gamma о v \alpha \mu \varepsilon v$ ). Second perfect active of $\gamma เ \nu \circ \mu \alpha$, "we have become," not the equivalent of $\varepsilon \sigma \mu \varepsilon \nu$ (are). For $\mu \varepsilon \tau о \chi$ о see 1:9; 3:1; 6:4 . We have become partners with Christ and hence ( $\gamma \alpha \rho$, for) should not be tricked into apostasy.

If we hold fast ( $\varepsilon \alpha \nu \pi \varepsilon \rho \kappa \alpha \tau \alpha \sigma \chi \omega \mu \varepsilon v$ ). The same condition as in verse 6 with $\pi \varepsilon \rho$ (indeed, forsooth) added to $\varepsilon \alpha v$. Jonathan Edwards once said that the sure proof of election is that one holds out to the end.

The beginning of our confidence ( $\tau \eta v \alpha \rho \chi \eta \nu \tau \eta \varsigma v \pi \sigma \sigma \tau \alpha \sigma \varepsilon \omega \varsigma)$. For $v \pi о \sigma \tau \alpha \sigma \iota \varsigma$ see 1:3; 11:1. These faltering believers (some even apostates) began with loud confidence and profession of loyalty. And now?

Heb 3:15
While it is said ( $\varepsilon v \tau \omega \lambda \varepsilon \gamma \varepsilon \sigma \theta \alpha$ ). Locative case with $\varepsilon v$ of the articular present passive infinitive of $\lambda \varepsilon \gamma \omega$, "in the being said." Thus the author (cf. same phrase in Ps $42: 4$ ) introduces the repeated quotation from verses 7,8 . Probably it is to be connected with $\kappa \alpha \tau \alpha \sigma \chi \omega \mu \varepsilon v$, though it can be joined with $\pi \alpha \rho \alpha \kappa \alpha \lambda \varepsilon ı \tau \varepsilon$ in verse 13 (treating 14 as a parenthesis).

Heb 3:16
Who (Tives). Clearly interrogative, not indefinite (some).
Did provoke ( $\pi \alpha \rho \varepsilon \pi \iota \kappa \rho \alpha v a v$ ). First aorist active indicative of $\pi \alpha \rho \alpha \pi \iota \kappa \rho \iota v \omega$, apparently coined by the LXX like $\pi \alpha \rho a \pi \iota \kappa \rho \alpha \sigma \mu \circ \varsigma$ (verse 15) to which it points, exasperating the anger of God.

Nay, did not all ( $\alpha \lambda \lambda^{\prime}$ ov $\left.\pi \alpha \nu \tau \varepsilon \varsigma\right)$. "A favourite device of the diatribe style" (Moffatt), answering one rhetorical question with another ( $\mathrm{Lu} 17: 8$ ) as in verses 17,18 , There was a faithful minority mentioned by Paul (1Co 10:7f. ).

Heb 3:17

With them that sinned ( $\tau о \iota \varsigma ~ \alpha \mu \alpha \rho \tau \eta \sigma \alpha \sigma เ v)$. Dative masculine plural after $\pi \rho \circ \sigma \omega \chi \theta \iota \sigma \varepsilon v$ (cf. verse 10) of the articular first aorist active participle of $\alpha \mu \alpha \rho \tau \alpha v \omega$ ( $\alpha \mu \alpha \rho \tau \eta \sigma \alpha \varrho$, not $\alpha \mu \alpha \rho \tau \omega v)$.

Carcases ( $\kappa \omega \lambda \alpha$ ). Old word for members of the body like the feet, in LXX a dead body (Nu 14:29), here only in N.T.

Heb 3:18
That they should not enter ( $\mu \eta \varepsilon \varepsilon \sigma \varepsilon \lambda \varepsilon v \sigma \varepsilon \sigma \theta \alpha$ ). Negative $\mu \eta$ (cf. $\varepsilon$ in verse 11) and the future middle infinitive in indirect discourse.

To them that were disobedient ( $\tau 0 \iota \varsigma \alpha \pi \varepsilon ө \eta \sigma \alpha \sigma เ v$ ). Dative masculine plural of the articular first aorist active participle of $\alpha \pi \varepsilon \bullet \varepsilon \varepsilon \omega$, active disobedience with which compare $\alpha \pi \iota \sigma \tau \iota a c$ in verse 12,19 .

Heb 3:19
And we see ( $\kappa \alpha \beta \lambda \varepsilon \pi о \mu \varepsilon v)$. Triumphant conclusion of the exegesis of Ps 95 . "So we see."

## Hebrews 3

Heb 3:1
Holy brethren ( $\alpha \delta \varepsilon \lambda \varphi$ о $\alpha \nvdash \circ$ ). Only here in N.T., for $\alpha \gamma \iota \iota \varsigma$ in 1Th 5:27 only in late MSS. See Heb 2:11 for same idea. First time the author makes direct appeal to the readers, though first person in 2:1.

Partakers ( $\mu \varepsilon \tau о \chi о$ ). See Lu 5:7 for "partners" in the fishing, elsewhere in N.T. only in Hebrews (1:9; 6:4; 12:8) in N.T.

Of a heavenly calling ( $\kappa \lambda \eta \sigma \varepsilon \omega \varsigma \varepsilon \pi \sigma \cup \rho a v i o v)$. Only here in the N.T., though same idea in 9:15. See $\eta \alpha \nu \omega \kappa \lambda \eta \sigma \iota$ in Php 3:14 (the upward calling). The call comes from heaven and is to heaven in its appeal.

Consider ( $\kappa \alpha \tau \alpha v о \eta \sigma \alpha \tau \varepsilon$ ). First aorist active imperative of $\kappa \alpha \tau \alpha v o \varepsilon \omega$, old compound verb (ката, vovৎ), to put the mind down on a thing, to fix the mind on as in Mt 7:3; Lu 12:24

Even Jesus (Iqбovv). No "even" in the Greek, just like the idiom in 2:9, the human name held up with pride.

The Apostle and High Priest of our confession ( $\tau \circ v \alpha \pi о \sigma \tau о \lambda о v \kappa \alpha \alpha \rho \chi เ \varepsilon \rho \varepsilon \alpha \tau\rceil$ o $\mu \circ \lambda o \gamma \iota a \varsigma \eta \mu \omega v$ ). In descriptive apposition with I $\eta \sigma o v v$ and note the single article $\tau o v$. This is the only time in the N.T. that Jesus is called $\alpha \pi \sigma \sigma \tau о \lambda \circ \varsigma$, though he often used $\alpha \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$ of God's sending him forth as in Joh 17:3 ( $\alpha \pi \varepsilon \sigma \tau \varepsilon ı \lambda a \varsigma)$. This verb is used of Moses as sent by God (Ex 3:10 ). Moffatt notes that a $\pi о \sigma \tau 0 \lambda o \varsigma$ is Ionic for $\pi \rho \varepsilon \sigma \beta \varepsilon v \tau \eta \varsigma$, "not a mere envoy, but an ambassador or representative sent with powers." The author has already termed Jesus
 tians had confessed Jesus as their Apostle and High Priest. They do not begin to understand what Jesus is and means if they are tempted to give him up. The word runs through Hebrews with an urgent note for fidelity $(4: 14 ; 10: 23$ ). See o $\mu \boldsymbol{\lambda} \lambda \sigma \gamma \varepsilon \omega$ (o $\rho \sigma v$, same, $\lambda \varepsilon \gamma \omega$, say), to say the same thing, to agree, to confess, to profess.

Heb 3:2
Who was faithful ( $\pi \iota \sigma \tau 0 v o v \tau \alpha$ ). Present active participle with predicate accusative agreeing with I $\eta \sigma o u v$, "as being faithful."

That appointed him ( $\tau \omega \pi$ пoı $\eta \sigma \alpha \tau \alpha v \tau o v$ ). See 1Sa 12:6. Dative case of the articular participle (aorist active) of $\pi \circ เ \varepsilon \omega$ and the reference is to God. Note $\pi \iota \sigma \tau \circ \varsigma$ as in 2:17.

As also was Moses ( $\omega \varsigma \kappa \alpha \mathrm{M} \omega v \sigma \eta \varsigma$ ). The author makes no depreciatory remarks about Moses as he did not about the prophets and the angels. He cheerfully admits that Moses was faithful "in all his house" ( $\varepsilon v$ o $\lambda \omega \tau \omega$ o七к $\omega \alpha v \tau 0 v$ ), an allusion to Nu 12:7 ( $\varepsilon \alpha \nu$ o $\lambda \omega \tau \omega$ о七к $\omega \mu \mathrm{Ov}$ ) about Moses. The "his" is God's. The use of oוкоц for the people (family) of God, not the building, but the group ( $1 \mathrm{Ti} 3: 15$ ) in which God is the Father. But wherein is Jesus superior to Moses? The argument is keen and skilful.

Heb 3:3
Hath been counted worthy of more glory than Moses ( $\pi \lambda \varepsilon \iota \circ \nu o \varsigma \delta o \xi \eta \varsigma \pi \alpha \rho \alpha \mathrm{M} \omega v \sigma \eta \nu$ $\eta \xi \iota \omega \tau \alpha)$. Perfect passive indicative of $\alpha \xi \iota \omega$, to deem worthy, permanent situation described with definite claim of Christ's superiority to Moses. $\Delta \mathrm{o} \xi \eta \varsigma$ in genitive case after $\eta \xi ו \omega \tau \alpha$. For $\pi \alpha \rho \alpha$ after the comparative $\pi \lambda \varepsilon \iota o v o \varsigma$ see $1: 4,9 ; 2: 7$.

By so much as ( $\kappa \alpha \theta^{\prime}$ ooov). A proportionate measurement (common use of $\kappa \alpha \tau \alpha$ and the quantitative relative ooos).

Than the house ( $\tau 0 v$ oוкоv). Ablative case of comparison after $\pi \lambda \varepsilon \iota o v a$. The architect is superior to the house just as Sir Christopher Wren is superior to St. Paul's Cathedral. The point in the argument calls for Jesus as the builder (o катабкєvaбає, first aorist active participle of катабкєva $\zeta \omega$, to found or build). But it is God's house as av ) and ov in verse 6. This house of God existed before Moses (11:2,25 ). Jesus as God's Son founded and supervised this house of God.

Heb 3:4
Is God ( $\theta \varepsilon \circ \varsigma)$. God is the Creator of all things and so of his "house" which his Son, Jesus Christ, founded and supervises.

Heb 3:5
And Moses ( $\kappa \alpha \mathrm{M} \omega v \sigma \eta \varsigma \mu \varepsilon v$ ). "Now Moses indeed on his part" ( $\mu \varepsilon v$ contrasted with $\delta \varepsilon)$.

In ( $\varepsilon v$ ). Moses was in "God's house" "as a servant" ( $\omega \varsigma \theta \varepsilon \rho \alpha \pi \omega v$ ). Old word, in LXX, only here in N.T. and quoted from Nu 12:7f . Kin to the verb $\theta \varepsilon \rho a \pi \varepsilon v \omega$, to serve, to heal, and $\theta \varepsilon \rho a \pi \varepsilon \iota a$, service (Lu 9:11) and a group of servants (Lu 12:42).

For a testimony of those things which were afterward to be spoken ( $\varepsilon \varsigma \varsigma \mu \rho \tau \cup \rho เ o v$ $\tau \omega v \lambda \alpha \lambda \eta \theta \eta \sigma o \mu \varepsilon v \omega v)$. Objective genitive of the articular future passive participle of $\lambda \alpha \lambda \varepsilon \omega$. It is not certain what it means whether the "testimony" ( $\mu \alpha \rho \tau v \rho \iota o v$ ) is to Moses or to God and whether it points on to Christ. In 9:9 see $\pi \alpha \rho \alpha \beta o \lambda \eta$ applied to the old dispensation as a symbol pointing to Christ and Christianity.

As a son ( $\omega \varsigma v i \circ \varsigma)$. Instead of a $\theta \varepsilon \rho a \pi \omega v$ (servant).
Over his house ( $\varepsilon \pi \tau \tau \nu$ oוко $\nu$ av $\tau 0 v$ ). The difference between $\varepsilon \pi$ and $\varepsilon v$ added to that between vios and $\theta \varepsilon \rho a \pi \omega v$. It is very neat and quite conclusive, especially when we recall the high place occupied by Moses in Jewish thought. In Ac 7:11 the Jews accused Stephen of speaking "blasphemous words against Moses and God" (putting Moses on a par with God).

Heb 3:6
Whose house are we (ov оєкоৎ $\varepsilon \sigma \mu \varepsilon \nu \eta \mu \varepsilon \iota \varsigma)$. We Christians (Jew and Gentile) looked at as a whole, not as a local organization.

If we hold fast ( $\varepsilon \alpha v \kappa \alpha \tau \alpha \sigma \chi \omega \mu \varepsilon v$ ). Condition of third class with $\varepsilon \alpha v$ and second aorist (effective) active subjunctive of $\kappa \alpha \tau \varepsilon \chi \omega$. This note of contingency and doubt runs all through the Epistle. We are God's house if we do not play the traitor and desert.

Boldness ( $\pi \alpha \rho \rho \eta \sigma \iota \alpha v)$
and glorying ( $\kappa \alpha \kappa \alpha \cup \chi \eta \mu \alpha$ ) some had lost. The author makes no effort to reconcile this warning with God's elective purpose. He is not exhorting God, but these wavering Christians. All these are Pauline words. B does not have $\mu \varepsilon \chi \rho \tau \varepsilon \lambda$ ovc $\beta \varepsilon \beta \alpha \iota a v$ (firm unto the end), but it is clearly genuine in verse 14 . He pleads for intelligent confidence.

Heb 3:7
Wherefore ( $\delta ⿺ 0$ ). Probably this inferential conjunction ( $\delta \mathbf{1} \alpha, \mathrm{o}$, because of which) goes with $\mu \eta \sigma \kappa \lambda \eta \rho \cup v \eta \tau \varepsilon$ (harden not) in verse 8 rather than with $\beta \lambda \varepsilon \pi \varepsilon \tau \varepsilon$ (take heed) in verse 12 unless the long quotation be considered a parenthesis. The long quotation in verses 7-11 is from Ps 95:7-11. After the quotation the author has "three movements" (Moffatt) in his discussion of the passage as applied to the Jewish Christians (3:12-19; 4:1-10; 4:11-13). The peril of apostasy as shown by the example of the Israelites is presented with vividness and power.

As the Holy Ghost saith ( $\kappa \alpha \theta \omega \varsigma \lambda \varepsilon \gamma \varepsilon$ тo $\pi v \varepsilon \cup \mu \alpha$ тo $\alpha \gamma ı v$ ). Just this phrase nowhere else in the N.T., except Act 21:11 (Agabus), though practically the same idea in 9:8; 10:15. In 1Ti 4:1 the adjective "Holy" is wanting as in Re 2; 3 . But the writer quotes this Psalm as the Word of God and in 4:7 attributes it to David.

If ye shall hear ( $\varepsilon \alpha \vee \alpha \kappa о \cup \sigma \eta \tau \varepsilon)$. Condition of third class with $\varepsilon \alpha v$ and first aorist active subjunctive of aкоvш.

Heb 3:8
Harden not ( $\mu \eta \sigma \kappa \lambda \eta \rho \cup v \eta \tau \varepsilon$ ). Prohibition with $\mu \eta$ and first aorist (ingressive) active subjunctive of $\sigma \kappa \lambda \eta \rho \nu v \omega$, late verb from $\sigma \kappa \lambda \eta \rho o s$ (dried up, stiff, hard) as in Ac 19:9; Ro 9:18.

As in the provocation ( $\omega \varsigma \eta \nu \tau \omega \pi \alpha \rho \alpha \pi \iota \kappa \rho \alpha \sigma \mu \omega)$. Late compound from $\pi \alpha \rho \alpha \pi \iota \kappa \rho \alpha \iota \omega \omega$, late verb to embitter ( $\pi \alpha \rho \alpha, \pi \kappa \kappa \rho \circ \varsigma)$, found only in LXX and here and verse 15. It means embitterment, exasperation. For the simple verb $\pi \kappa \kappa \rho \alpha \iota v \omega$, to make bitter, see Col 3:19. The reference is to Meribah (Ex. 17:1-7).

Like as in the day (ката $\tau \eta \vee \eta \mu \varepsilon \rho \alpha v)$. "According to the day" as in Ac 12:1; 19:23.
Of the temptation ( $\tau 00 \pi \varepsilon \rho \alpha \sigma \mu \circ v$ ). The reference is to Massah which took place at Rephidim.

Heb 3:9
Wherewith (ov). Literally, "where" (the wilderness) as in De 8:15.
Tempted me by proving me ( $\varepsilon \pi \varepsilon เ \rho a \sigma \alpha v \varepsilon v ~ \delta о к ц \mu \sigma \iota \alpha)$. No word for "me." The Israelites "tested" God "in putting to the proof" (only N.T. use of this word from $\delta о \kappa \mu \alpha \zeta \omega$ and this
from the LXX). They were not content with God's promise, but demanded objective proof ( $\varepsilon \rho \gamma \alpha$, deeds) of God.

Heb 3:10
And saw ( $\kappa \alpha$ ع $\ell \delta o v)$ ). "And yet saw."
Wherefore ( $\delta ⿺ 0$ ). Not in the LXX, but it makes clear the argument in the Psalm.
I was displeased $(\pi \rho \circ \sigma \omega \chi \theta \iota \sigma \alpha)$. First aorist active of $\pi \rho o \sigma o \chi \theta 1 \zeta \omega$, late compound for extreme anger and disgust. In N.T. only here and verse 17.

Err ( $\pi \lambda \alpha \nu \omega v \tau \alpha)$. Present middle indicative of $\pi \lambda \alpha v \alpha \omega$, to wander astray, common verb.
They did not know (ouk $\varepsilon \gamma v \omega \sigma \alpha v$ ). In spite of God's works ( $\varepsilon \rho \gamma \alpha$ ) and loving patience the Israelites failed to understand God's ways with them. Are we any better? They "cared not to take my road" (Moffatt).

Heb 3:11
As I sware ( $\omega \varsigma \omega \mu \circ \sigma \alpha$ ). "Correlating the oath and the disobedience" (Vincent). First aorist active indicative of o $\mu v v \omega$, old verb for solemn oath ( 6:13).
 anacoluthon for the Hebrew $\operatorname{im}$ (not). Really it is a condition of the first class with the conclusion not expressed, common in the LXX as here (Robertson, Grammar, p. 1024).
 rest, in LXX, in N.T. only in Ac 7:49; Heb 3:11-4:11 . Primarily the rest in Canaan and then the heavenly rest in which God dwells.

Heb 3:12
Take heed ( $\beta \lambda \varepsilon \pi \varepsilon \tau \varepsilon$ ). Present active imperative as in Php 3:2 (three times) of $\beta \lambda \varepsilon \pi \omega$ in place of the more usual opate. Solemn warning to the Jewish Christians from the experience of the Israelites as told in Ps 95 .

Lest haply there shall be ( $\mu \eta \pi о \tau \varepsilon \varepsilon \sigma \tau \alpha$ ). Negative purpose with $\mu \eta \pi \sigma \tau \varepsilon$ and the future indicative as in Mr 14:2. But we have in $\operatorname{Col} 2: 8 \mu \eta \tau \iota \varsigma \varepsilon \sigma \tau \alpha$ as in Heb 12:25; $\mu \eta$ occurs with the aorist subjunctive, and $\mu \eta \pi$ оо $\varepsilon$ with present subjunctive (Heb 4:1) or aorist subjunctive (Ac 5:39).

In any one of you ( $\varepsilon v \tau \tau v \nu \mu \omega v$ ). The application is personal and pointed.
An evil heart of unbelief ( $\kappa \alpha \rho \delta \iota \alpha ~ \pi о \vee \eta \rho \alpha ~ \alpha \pi \iota \sigma \tau \iota \alpha \varsigma) . ~ A ~ r e m a r k a b l e ~ c o m b i n a t i o n . ~$
Heart ( $\kappa \alpha \rho \delta ı \alpha$ ) is common in the LXX (about 1,000 times), but "evil heart" only twice in the O.T. (Jer 16:12; 18:12 ). Atıбтıas is more than mere unbelief, here rather disbelief, refusal to believe, genitive case describing the evil heart marked by disbelief which is no mark of intelligence then or now.

In falling away from the living God ( $\varepsilon v \tau \omega \alpha \pi о \sigma \tau \eta v \alpha \alpha \pi \sigma \theta \varepsilon o v \zeta \omega \nu \tau \circ \varsigma)$. "In the falling away" (locative case with $\varepsilon v$ of the second aorist active (intransitive) infinitive of $\alpha \varphi \iota \sigma \tau \eta \mu$, to stand off from, to step aside from (aro with the ablative case $\theta$ rov) the living God (common phrase in the O.T. and the N.T. for God as opposed to lifeless idols)). "Remember that
to apostatize from Christ in whom you have found God is to apostatize from God" (Dods). That is true today. See Eze 20:8 for this use of the verb.

Heb 3:13
So long as it is called today ( $\alpha \chi \rho \iota \varsigma$ ov $\tau 0 ~ \sigma \eta \mu \varepsilon \rho \circ v \kappa \alpha \lambda \varepsilon \iota \tau \alpha$ ). The only instance in the
 sense of "so long as" or "while" like $\varepsilon \omega \varsigma$. Elsewhere it means "until" and with either the aorist indicative (Ac 7:18), the future (Re 17:17), or the aorist subjunctive (Re 7:3).

Lest any one of you be hardened (ıva $\mu \eta \sigma \kappa \lambda \eta \rho v v \theta \eta \tau \tau \varsigma \varepsilon \xi \nu \mu \omega \nu$ ). Negative purpose clause with $v \alpha \alpha \mu \eta$ (that not) and the first aorist passive subjunctive of $\sigma \kappa \lambda \eta \rho v v \omega$, the vivid verb from verse 8.

By the deceitfulness of $\sin (\alpha \pi \alpha \tau \eta \tau \eta \varsigma \alpha \mu \alpha \rho \tau i \alpha \varsigma)$. Instrumental case $\alpha \pi \alpha \tau \eta$ (trick, fraud) as is always the case with $\sin$ (Ro 7:11; 2Th 2:10). Apostasy ( 12:4) is their peril and it is a trick of sin.

Heb 3:14
For we are become partakers of Christ ( $\mu \varepsilon \tau о \chi о ~ \gamma \alpha \rho$ tov X Xıбтоv $\gamma \varepsilon \gamma о v \alpha \mu \varepsilon v$ ). Second perfect active of $\gamma / v o \mu \alpha$, "we have become," not the equivalent of $\varepsilon \sigma \mu \varepsilon \nu$ (are). For $\mu \varepsilon \tau о \chi о$ see 1:9; 3:1; 6:4 . We have become partners with Christ and hence ( $\gamma \alpha \rho$, for) should not be tricked into apostasy.

If we hold fast ( $\varepsilon \alpha \nu \pi \varepsilon \rho \kappa \alpha \tau \alpha \sigma \chi \omega \mu \varepsilon v$ ). The same condition as in verse 6 with $\pi \varepsilon \rho$ (indeed, forsooth) added to $\varepsilon \alpha v$. Jonathan Edwards once said that the sure proof of election is that one holds out to the end.

The beginning of our confidence ( $\tau \eta v \alpha \rho \chi \eta \nu \tau \eta \varsigma v \pi \sigma \sigma \tau \alpha \sigma \varepsilon \omega \varsigma)$. For $v \pi о \sigma \tau \alpha \sigma \iota \varsigma$ see 1:3; 11:1. These faltering believers (some even apostates) began with loud confidence and profession of loyalty. And now?

Heb 3:15
While it is said ( $\varepsilon v \tau \omega \lambda \varepsilon \gamma \varepsilon \sigma \theta \alpha$ ). Locative case with $\varepsilon v$ of the articular present passive infinitive of $\lambda \varepsilon \gamma \omega$, "in the being said." Thus the author (cf. same phrase in Ps $42: 4$ ) introduces the repeated quotation from verses 7,8 . Probably it is to be connected with $\kappa \alpha \tau \alpha \sigma \chi \omega \mu \varepsilon v$, though it can be joined with $\pi \alpha \rho \alpha \kappa \alpha \lambda \varepsilon ı \tau \varepsilon$ in verse 13 (treating 14 as a parenthesis).

Heb 3:16
Who (Tives). Clearly interrogative, not indefinite (some).
Did provoke ( $\pi \alpha \rho \varepsilon \pi \iota \kappa \rho \alpha v a v$ ). First aorist active indicative of $\pi \alpha \rho \alpha \pi \iota \kappa \rho \iota v \omega$, apparently coined by the LXX like $\pi \alpha \rho a \pi \iota \kappa \rho \alpha \sigma \mu \circ \varsigma$ (verse 15) to which it points, exasperating the anger of God.

Nay, did not all ( $\alpha \lambda \lambda^{\prime}$ ov $\left.\pi \alpha \nu \tau \varepsilon \varsigma\right)$. "A favourite device of the diatribe style" (Moffatt), answering one rhetorical question with another ( $\mathrm{Lu} 17: 8$ ) as in verses 17,18 , There was a faithful minority mentioned by Paul (1Co 10:7f. ).

Heb 3:17

With them that sinned ( $\tau о \iota \varsigma ~ \alpha \mu \alpha \rho \tau \eta \sigma \alpha \sigma เ v)$. Dative masculine plural after $\pi \rho \circ \sigma \omega \chi \theta \iota \sigma \varepsilon v$ (cf. verse 10) of the articular first aorist active participle of $\alpha \mu \alpha \rho \tau \alpha v \omega$ ( $\alpha \mu \alpha \rho \tau \eta \sigma \alpha \varrho$, not а $\mu \rho \tau \tau \omega v)$.

Carcases ( $\kappa \omega \lambda \alpha$ ). Old word for members of the body like the feet, in LXX a dead body (Nu 14:29), here only in N.T.

Heb 3:18
That they should not enter ( $\mu \eta \varepsilon \mid \sigma \varepsilon \lambda \varepsilon v \sigma \varepsilon \sigma \theta \alpha$ ). Negative $\mu \eta$ (cf. $\varepsilon$ in verse 11) and the future middle infinitive in indirect discourse.

To them that were disobedient ( $\tau 0 \iota \varsigma \alpha \pi \varepsilon ө \eta \sigma \alpha \sigma เ v$ ). Dative masculine plural of the articular first aorist active participle of $\alpha \pi \varepsilon \bullet \varepsilon \varepsilon \omega$, active disobedience with which compare $\alpha \pi \iota \sigma \tau \iota a c$ in verse 12,19 .

Heb 3:19
And we see ( $\kappa \alpha \beta \lambda \varepsilon \pi о \mu \varepsilon v)$. Triumphant conclusion of the exegesis of Ps 95 . "So we see."

## Hebrews 4

Heb 4:1
Let us fear therefore ( $\varphi o \beta \eta \theta \omega \mu \varepsilon v o v v)$. First aorist passive volitive subjunctive of $\varphi о \beta \varepsilon \circ \mu \alpha$, to be afraid. There is no break in the argument on Ps 95 . This is a poor chapter division. The Israelites perished because of disbelief. We today face a real peril.

Lest haply ( $\mu \eta \pi о \tau \varepsilon$ ) Here with the present subjunctive ( $\delta$ окє), but future indicative in 3:12, after the verb of fearing. For the optative see 2Ti 2:25.

A promise being left ( $\kappa \alpha \tau \alpha \lambda \varepsilon ı \pi о \mu \varepsilon \nu \eta \varsigma \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \iota \alpha \varsigma)$. Genitive absolute of the present passive participle of $\kappa \alpha \tau \alpha \lambda \varepsilon เ \pi \omega$, to leave behind. God's promise still holds good for us in spite of the failure of the Israelites.

Should seem to have come short of it ( $\delta о \kappa \varepsilon v \sigma \tau \varepsilon \rho \eta \kappa \varepsilon v \alpha$ ). Perfect active infinitive of
 be too late, to fail to reach the goal as here, common in the N.T. (11:37; 12:15).

Heb 4:2
For indeed we have had good tidings preached unto us ( $\kappa \alpha \gamma \alpha \rho \varepsilon \sigma \mu \varepsilon v \varepsilon \cup \eta \gamma \gamma \varepsilon \lambda \iota \sigma \mu \varepsilon v o$ $\varepsilon \sigma \mu \varepsilon v$ ). Periphrastic perfect passive indicative of $\varepsilon v a \gamma \gamma \varepsilon \lambda_{\iota} \zeta \omega$ (from $\varepsilon \cup \alpha \gamma \gamma \varepsilon \lambda_{\iota} \circ v$, good news, glad tidings) to bring good news, used here in its original sense as in verse 6 of the Israelites ( $\varepsilon v a \gamma \gamma \varepsilon \lambda_{\iota} \sigma \theta \varepsilon v \tau \varepsilon \varsigma$ first aorist passive participle).

Even as also they ( $\kappa \alpha \theta \alpha \pi \varepsilon \rho \kappa \alpha \kappa \varepsilon เ v o)$. See verse 6 . We have the promise of rest as the Israelites had. The parallel holds as to the promise, the privilege, the penalty.

The word of hearing (o $\lambda о \gamma о \varsigma \tau \eta \varsigma$ акопऽ). As in 1Th 2:13. Genitive aкoŋऽ describing $\lambda o \gamma o \varsigma$, the word marked by hearing (the word heard).

Because they were not united by faith with them that heard ( $\mu \eta$ боvкєкعраб $\mu \varepsilon v o v$, $\tau \eta \pi / \sigma \tau \varepsilon \tau o \iota \varsigma \alpha \kappa o v \sigma \alpha \sigma เ v)$. M $\eta$, the usual negative of the participle. A very difficult phrase. The text is uncertain whether the participle (perfect passive of $\sigma u v \kappa \varepsilon \rho \alpha v v \nu \mu$, old verb to
 it in -ovs the translation is correct. Пıбт $\varepsilon$ is in the instrumental case and toıs $\alpha \kappa о v \sigma \alpha \sigma \iota v$ in the associative instrumental after ouv.

Heb 4:3
Do enter ( $\varepsilon เ \sigma \varepsilon \rho \chi \circ \mu \varepsilon \theta \alpha)$. Emphatic futuristic present middle indicative of $\varepsilon เ \sigma \varepsilon \rho \chi \circ \mu \alpha$. We are sure to enter in, we who believe.

He hath said ( $\varepsilon\llcorner\rho \eta \kappa \varepsilon v)$. Perfect active indicative for the permanent value of God's word as in $1: 13 ; 4: 4 ; 10: 9,13 ; 13: 5$; Ac 13:34. God has spoken. That is enough for us. So he quotes again what he has in verse 11 from Ps 95 .

Although the works were finished ( $\kappa \alpha \iota \tau о \tau \omega v \varepsilon \rho \gamma \omega v \gamma \varepsilon v \eta \theta \varepsilon v \tau \omega v$ ). Genitive absolute with concessive use of the participle. Old particle, in N.T. only here and Ac 14:17 (with verb).

From the foundation of the world ( $\alpha \pi о$ кат $\alpha \beta$ о $\eta \varsigma ~ к о \sigma \mu о v) . ~ К а т \alpha \beta о \lambda \eta, ~ l a t e ~ w o r d ~$ from $\kappa \alpha \tau \alpha \beta \alpha \lambda \lambda \omega$, usually laying the foundation of a house in the literal sense. In the N.T. usually with a $\pi \mathrm{o}$ (Mt 25:44) or $\pi \rho o$ (Joh 17:24) about the foundation of the world.

Heb 4:4
Somewhere on this wise ( $\pi \circ \cup$ ov $\tau \omega \varsigma$ ). See 2:6 for $\pi$ ov $\tau \iota \varsigma$ for a like indefinite allusion to an Old Testament quotation. Here it is Ge 2:2 (cf. Ex 20:11; 31:17). Moffatt notes that Philo quotes Ge 2:2 with the same "literary mannerism."

Rested (катєпаvбєv). First aorist active indicative of каталаv $\omega$, intransitive here, but transitive in verse 8. It is not, of course, absolute rest from all creative activity as Jesus shows in Joh 5:17. But the seventh day of God's rest was still going on (clearly not a twenty-four hour day).

Heb 4:5
And in this place again ( $\kappa \alpha \varepsilon v \tau 0 v \tau \omega \pi \alpha \lambda \iota v$ ). The passage already quoted in verse 3 ; 3:11.

Heb 4:6
It remaineth ( $\alpha \pi 0 \lambda \varepsilon \iota \pi \varepsilon \tau \alpha$ ). Present passive indicative of $\alpha \pi 0 \lambda \varepsilon \iota \pi \omega$, old verb to leave behind, to remain over. So again in 4:9; 10:26. Here the infinitive clause ( $\tau \tau v a c ~ \varepsilon ו \sigma \varepsilon \lambda \theta \varepsilon ı v$ $\varepsilon ı \varsigma \nu \tau \eta v$ ) is the subject of $\alpha \pi 0 \lambda \varepsilon ו \pi \varepsilon \tau \alpha$. This left-over promise is not repeated, though not utilized by the Israelites under Moses nor in the highest sense by Joshua and David.

Failed to enter in (ovk $\varepsilon เ \sigma \eta \lambda \theta$ ov). "Did not enter in" (second aorist active indicative of $\varepsilon ו \sigma \varepsilon \rho \chi \circ \mu \alpha)$. It is a rabbinical argument all along here, but the author is writing to Jews.

Heb 4:7
He again defineth a certain day ( $\pi \alpha \lambda ı \nu \tau ı v \alpha$ орı $\zeta \varepsilon \eta \mu \varepsilon \rho \alpha \nu$ ). Present active indicative of opı $\zeta \omega$, old verb to set a limit (opoc, horizon) as in Ac 17:26; Ro 1:4.

In David ( $\varepsilon v \Delta \alpha v \varepsilon \varepsilon \delta$ ). Attributing the Psalm to David or in the Psalter at any rate.
Hath been before said ( $\pi \rho \circ \varepsilon \iota \rho \eta \tau \alpha$ ). Perfect passive indicative referring to the quotation in 3:7,15.

After so long a time ( $\mu \varepsilon \tau \alpha$ toбovtov $\chi \rho \circ \vee o v)$. The time between Joshua and David.
Heb 4:8
Joshua (In $\quad$ ouc). The Greek form is Jesus. Condition of the second class (determined as unfulfilled) with $\varepsilon$ and aorist indicative in the condition and $\alpha v$ with the imperfect in the conclusion.

He would not have spoken (ovk $\varepsilon \lambda \alpha \lambda \varepsilon$ ). Wrong translation, "he would not speak" (be speaking), in the passage in David. Imperfect tense, not aorist.

Heb 4:9
A sabbath rest ( $\sigma \alpha \beta \beta \alpha \tau \iota \sigma \mu \circ \varsigma)$. Late word from $\sigma \alpha \beta \beta a \tau \iota \zeta \omega(\operatorname{Ex~16:30)}$ ) to keep the Sabbath, apparently coined by the author (a doubtful passage in Plutarch). Here it is parallel with катата⿱㇒兀ц (cf. Re 14:13).

For the people of God ( $\tau \omega \lambda \alpha \omega$ tov $\theta \varepsilon o v$ ). Dative case of blessed personal interest to the true Israel (Ga 6:16).

Heb 4:10
As God did from his ( $\omega \sigma \pi \varepsilon \rho \alpha \pi \sigma \tau \omega \nu \iota \delta \omega \nu$ o $\theta \varepsilon o \varsigma)$. It is not cessation of work, but rather of the weariness and pain in toil. The writer pictures salvation as God's rest which man is to share and God will have perfect satisfaction when man is in harmony with him (Dods).

Heb 4:11
Let us therefore give diligence ( $\sigma \pi \sigma v \delta \alpha \sigma \omega \mu \varepsilon v$ ouv). Volitive subjunctive aorist of $\sigma \pi 0 v \delta \alpha \zeta \omega$, old verb to hasten (2Ti 4:9), to be eager and alert (1Th 2:17). The exhortation has a warning like that in 4:1.

That no man fall ( $t v \alpha \mu \eta \pi \varepsilon \sigma \eta$ ). Negative purpose with $t v a \mu \eta$ and the second aorist active subjunctive of $\pi \iota \pi \tau \omega$, to fall.

After the same example of disobedience ( $\varepsilon v \tau \omega \alpha \cup \tau \omega \cup \pi o \delta \varepsilon 1 \gamma \mu \alpha \tau \tau \eta \varsigma \alpha \pi \varepsilon \mid \theta \varepsilon ı \alpha \varsigma)$. The unbelief is like that seen in the Israelites ( $3: 12,18 ; 4: 2$ ). Нипо $\delta \varepsilon \tau \gamma \mu$ is a late word from $v \pi$ об $\varepsilon ו \kappa v v \mu$ (Mt 3:7) and means a copy (Joh 13:15; Jas 5:10). The Israelites set a terrible example and it is so easy to copy the bad examples.

Heb 4:12
The word of God (o $\lambda$ oүos $\operatorname{\tau ov} \theta \varepsilon o v$ ). That just quoted about the promise of rest and God's rest, but true of any real word of God.

Living ( $\zeta \omega v$ ). Cf. the Living God ( 3:12). In Philo and the Book of Wisdom the Logos of God is personified, but still more in Joh 1:1-18 where Jesus is pictured as the Logos on a par with God. "Our author is using Philonic language rather than Philonic ideas" (Moffatt). See Joh 6:63 : "The words which I have spoken are spirit and are life."

Active ( $\varepsilon v \varepsilon \rho \gamma \eta \varsigma)$. Energetic, powerful (Joh 1:12; Php 3:21; Col 1:29).
Sharper ( $\tau \circ \mu \omega \tau \varepsilon \rho \circ \varsigma)$. Comparative of $\tau \circ \mu \circ \varsigma$, cutting (from $\tau \varepsilon \mu \nu \omega$, to cut), late adjective, here only in the N.T.

Than (vifp). Often so after a comparative ( $\mathrm{Lu} 16: 8 ; 2 \mathrm{Co} 12: 13$ ).
Two-edged ( $\delta เ \sigma \tau \circ \mu \circ v$ ). "Two-mouthed" ( $\delta$ t-, $\sigma \tau о \mu \alpha$ ), double-mouthed like a river (Polybius), branching ways (Sophocles), applied to sword ( $\xi ⿺ \varphi \bigcirc \varsigma)$ by Homer and Euripides.

Piercing ( $\delta u к v о \cup \mu \varepsilon v о \varsigma) . ~ P r e s e n t ~ m i d d l e ~ p a r t i c i p l e ~ o f ~ \delta u к v \varepsilon о \mu \alpha, ~ o l d ~ v e r b ~ t o ~ g o ~ t h r o u g h, ~$ here only in N.T.

Even to the dividing ( $\alpha \chi \rho \mu \varepsilon \rho เ \sigma \mu \circ v$ ). Old word from $\mu \varepsilon \rho \iota \zeta \omega$ ( $\mu \varepsilon \rho \circ \varsigma$, part), to partition.
Of soul and spirit ( $\psi v \chi \eta \varsigma ~ \kappa \alpha ~ \pi v \varepsilon v \mu \alpha \tau о \varsigma)$. As in 1Th 5:23; 1Co 15:45, but not an argument for trichotomy. Psychology is constantly changing its terminology.

Of both joints and marrow ( $\alpha \rho \mu \omega \nu \tau \varepsilon \kappa \alpha \mu \nu \varepsilon \lambda \omega v$ ). From $\alpha \rho \omega$, to join, comes $\alpha \rho \mu \circ \varsigma$, old word, here only in the N.T. Mve入os (from $\mu \nu \omega$, to shut), old word, here only in N.T. This surgeon goes into and through the joints and marrow, not cleaving between them.

Quick to discern (крıтєоऽ). Verbal adjective in -ıкоऽ, from к $\rho เ \nu \omega$, skilled in judging, as the surgeon has to be and able to decide on the instant what to do. So God's word like his eye sees the secret lurking doubt and unbelief "of the thoughts and intents of the heart" ( $\varepsilon v \theta v \mu \eta \sigma \varepsilon \omega v \kappa \alpha \varepsilon v v o \omega \omega v \kappa \alpha \rho \delta \iota \alpha \varsigma)$. The surgeon carries a bright and powerful light for every dark crevice and a sharp knife for the removal of all the pus revealed by the light. It is a powerful picture here drawn.

Heb 4:13
That is not manifest ( $\alpha \varphi \alpha \sim \eta \zeta$ ). Old adjective ( $\alpha$ privative and $\varphi \alpha \downarrow v \omega$, to show), here only in the N.T. God's microscope can lay bare the smallest microbe of doubt and sin.

Naked ( $\gamma v \mu v \alpha$ ). Both soul and body are naked to the eye of God.
 back the neck ( $\tau \rho a \chi \eta \lambda$ ос, Mt 18:6) as the surgeon does for operating, here only in N.T. See Ro $16: 4$ for the peril of risking one's neck ( $\tau \rho \alpha \chi \eta \lambda$ ov $v \pi o \tau \imath \theta \varepsilon v \alpha$ ). God's eyes see all the facts in our inmost hearts. There are no mental reservations from God.

With whom we have to do ( $\pi \rho \circ \varsigma$ ov $\eta \mu \nu \nu$ o $\lambda o \gamma o \varsigma)$. "With whom the matter or account for us is." There is a slight play here on $\lambda$ opoc of verse 12 . Surely every servant of Christ today needs to gaze into this revealing mirror and be honest with himself and God.

## Heb 4:14

A great high priest ( $\alpha \rho \chi \iota \varepsilon \rho \varepsilon \alpha \mu \varepsilon \gamma \alpha v$ ). The author now takes up the main argument of the Epistle, already alluded to in 1:3;2:17f.; $3: 1$, the priestly work of Jesus as superior to that of the Levitical line ( 4:14-12:3). Jesus is superior to the prophets ( $1: 1-3$ ), to angels ( $1: 4-2: 18$ ), to Moses ( 3:1-4:13), he has already shown. Here he only terms Jesus "great" as high priest (a frequent adjective with high priest in Philo) but the superiority comes out as he proceeds.

Who hath passed through the heavens ( $\delta เ \varepsilon \lambda \eta \lambda \cup \theta$ ota $\tau 0 v \varsigma$ oupavouc). Perfect active
 to the throne of $\operatorname{God}(1: 3)$ where he performs his function as our high priest. This idea will be developed later (6:19f.; 7:26-28; 9:11f.,24f. ).

Jesus the Son of God (Inoouv tov viov tov $\theta$ gov). The human name linked with his deity, clinching the argument already made ( 1:1-4:13).

Let us hold fast our confession ( $\kappa \rho \alpha \tau \omega \mu \varepsilon \nu \tau \eta \varsigma$ о $о о \lambda о ү \iota \varsigma \varsigma$ ). Present active volitive subjunctive of $\kappa \rho \alpha \tau \varepsilon \omega$, old verb (from кратоৎ, power), with genitive to cling to tenaciously as here and 6:18 and also with the accusative (2Th 2:15; Col 2:19). "Let us keep on holding fast." This keynote runs all through the Epistle, the exhortation to the Jewish Christians to hold on to the confession ( $3: 1$ ) of Christ already made. Before making the five points of Christ's superior priestly work (better priest than Aaron, 5:1-7:25; under a better covenant, 8:1-13; in a better sanctuary, 9:1-12; offering a better sacrifice, 9:13-10:18; based on better promises, 10:19-12:3), the author gives a double exhortation ( 4:14-16) like that in 2:1-4 to hold fast to the high priest (14f. ) and to make use of him (16).

Heb 4:15
That cannot be touched with the feeling ( $\mu \eta \delta v \nu \alpha \mu \varepsilon v o v \sigma v \nu \pi \alpha \theta \eta \sigma \alpha$ ). "Not able to sympathize with." First aorist passive infinitive of $\sigma v v \pi \alpha \theta \varepsilon \omega$, late compound verb from the late adjective $\sigma v v \pi \alpha \theta$ oc (Ro 12:15 ), both from $\sigma v v \pi \alpha \sigma \chi \omega$, to suffer with (1Co 12:26; Ro 8:17 ), occurring in Aristotle and Plutarch, in N.T. only in Hebrews (here and 10:34).

One that hath been tempted $(\pi \varepsilon \pi \varepsilon \iota \rho \alpha \sigma \mu \varepsilon \nu \sigma \nu)$. Perfect passive participle of $\pi \varepsilon \iota \rho \alpha \zeta \omega$, as already shown in 2:17f.

Without sin ( $\chi \omega \rho \iota \varsigma \alpha \mu \alpha \rho \tau \iota \varsigma)$. This is the outstanding difference that must never be overlooked in considering the actual humanity of Jesus. He did not yield to sin. But more than this is true. There was no latent sin in Jesus to be stirred by temptation and no habits of $\sin$ to be overcome. But he did have "weaknesses" ( $\alpha \sigma \theta \varepsilon v \varepsilon ı \alpha$ ) common to our human nature (hunger, thirst, weariness, etc.). Satan used his strongest weapons against Jesus, did it repeatedly, and failed. Jesus remained "undefiled" ( $\alpha \mu \iota \alpha \nu \tau \circ \varsigma$ ) in a world of $\sin$ (Joh 8:46 ). This is our ground of hope, the sinlessness of Jesus and his real sympathy.

Heb 4:16
Let us therefore draw near ( $\pi \rho o \sigma \varepsilon \rho \chi \omega \mu \varepsilon \theta \alpha o v v$ ). Present active middle volitive subjunctive of $\pi \rho \circ \sigma \varepsilon \rho \chi \circ \mu \alpha$. "Let us keep on coming to" our high priest, this sympathizing and great high priest. Instead of deserting him, let us make daily use of him. This verb in Hebrews means reverent approach for worship (7:25; 10:1,22; 11:6).

Unto the throne of grace $(\tau \omega \theta \rho \circ v \omega \tau \eta \varsigma \chi \alpha \rho \iota \tau \varsigma)$. This old word ( $\theta \rho \circ \nu \circ \varsigma$ ) we have taken into English, the seat of kings and of God and so of Christ (1:3,8), but marked by grace because Jesus is there (Mt 19:28). Hence we should come "with boldness" ( $\mu \varepsilon \tau \alpha$ $\pi \alpha \rho \rho \eta \sigma \iota \alpha)$. Telling Jesus the whole story of our shortcomings.

That we may receive mercy ( $t v \alpha \lambda \alpha \beta \omega \mu \varepsilon v \varepsilon \lambda \varepsilon \sigma \varsigma$ ). Purpose clause with $t v \alpha$ and second aorist active subjunctive of $\lambda \alpha \mu \beta \alpha \nu \omega$.

And find grace ( $\kappa \alpha \chi \alpha \rho \iota \nu \varepsilon v \rho \omega \mu \varepsilon v$ ). Second aorist active subjunctive of $\varepsilon v \rho \iota \sigma \kappa \omega$. We are sure to gain both of these aims because Jesus is our high priest on the throne.

To help us in time of need ( $\varepsilon \iota \varsigma \varepsilon \cup \kappa \alpha \iota \rho \circ v \beta \circ \eta \theta \varepsilon \iota \alpha v$ ). Boŋ $\theta \varepsilon ı \alpha$ is old word (from $\beta \circ \eta \theta \varepsilon \omega$, 2:18 which see), in N.T. only here and Ac 27:17. Evкаı $\rho$ ся is an old word also ( $\varepsilon v$, well, каı ооя, opportunity), only here in N.T. "For well-timed help," "for help in the nick of time," before too late.

## Hebrews 5

Heb 5:1
In things pertaining to God ( $\tau \alpha \pi \rho \circ \varsigma \operatorname{\tau ov} \theta \varepsilon o v$ ). Accusative of general reference as in 2:17 (Ro 15:17). The two essential points about any high priest are human sympathy ( $5: 1-3$ ) and divine appointment ( $5: 4$ ). He is taken from men and appointed in behalf of men.

That he may offer ( $\iota v a \pi \rho \circ \sigma \varphi \varepsilon \rho \eta$ ). Purpose clause with $\imath v \alpha$ and present active subjunctive of $\pi \rho о \sigma \varphi \varepsilon \rho \omega$, "that he keep on offering (from time to time)."

Both gifts ( $\delta \omega \rho \alpha$ )
and sacrifices ( $\kappa \alpha$ Өvбıa̧). General term ( $\delta \omega \rho \alpha$ ) and bloody offerings, but the two together are inclusive of all as in 8:3; 9:9 (1 Ki 8:64).

For sins (v $v \varepsilon \rho \alpha \mu \alpha \rho \tau \omega \omega v$ ). His own included (7:27) except in the case of Jesus.
Heb 5:2
Who can bear gently ( $\mu \varepsilon \tau \rho \stackrel{\circ}{\alpha} \alpha \varepsilon ı v \delta \nu v \alpha \mu \varepsilon v o \varsigma)$. Present active infinitive of the late verb $\mu \varepsilon \tau \rho ю \pi \alpha \theta \varepsilon \omega$ ( $\mu \varepsilon \tau \rho \iota \varsigma$, moderate, $\pi \alpha \tau \varepsilon \omega$, to feel or suffer). It is a philosophical term used by Aristotle to oppose the $\alpha \pi \alpha \theta \varepsilon \iota \alpha$ (lack of feeling) of the Stoics. Philo ranks it below $\alpha \pi \alpha \theta \varepsilon ı \alpha$. Josephus (Ant. XII. 32) uses it of the moderation of Vespasian and Titus towards the Jews. It occurs here only in the N.T. "If the priest is cordially to plead with God for the sinner, he must bridle his natural disgust at the loathsomeness of sensuality, his impatience at the frequently recurring fall, his hopeless alienation from the hypocrite and the superficial, his indignation at any confession he hears from the penitent" (Dods).

With the ignorant ( $\tau$ oı $\alpha$ 人 $\gamma$ voovoiv). Dative case of the articular present active participle of $\alpha \gamma \operatorname{vo\varepsilon } \omega$, old verb not to know (Mr 9:32 ).

And erring ( $\kappa \alpha \pi \lambda \alpha v \omega \mu \varepsilon v o \iota \varsigma)$. Present middle participle (dative case) of $\pi \lambda \alpha v \alpha \omega$. The one article with both participles probably makes it a hendiadys, sins of ignorance (both accidence and sudden passion) as opposed to high-handed sins of presumption and deliberate
 system. For deliberate apostasy ( $3: 12 ; 10: 26$ ) no pardon is offered.

Is compassed with infirmity ( $\pi \varepsilon \rho \iota \kappa \varepsilon \iota \tau \alpha \alpha \sigma \theta \varepsilon v \varepsilon \iota \alpha v$ ). Present passive indicative of the old verb $\pi \varepsilon \rho ı к \varepsilon \not \mu \alpha$ here used transitively as in Ac 28:20 ( $\alpha \lambda \nu \sigma \iota v$, chain). The priest himself has weakness lying around him like a chain. Not so Jesus.

Heb 5:3
For himself ( $\pi \varepsilon \rho \varepsilon \alpha \cup \tau o v$ ). Note $\pi \varepsilon \rho$ three times here ( $\pi \varepsilon \rho$ tov $\lambda \alpha o v, \pi \varepsilon \rho$ عautov, $\pi \varepsilon \rho$ $\alpha \mu \alpha \rho \tau \iota \omega v)$, but in verse 1 v $\pi \varepsilon \rho \alpha v \theta \rho \omega \pi \omega v$, vл $\rho \rho \alpha \mu \rho \tau \iota \omega v$. In the Koine this interchange of $\pi \varepsilon \rho$ (around) and $v \pi \varepsilon \rho$ (over) is common (Mt 26:28).

Heb 5:4
Taketh the honour unto himself ( $\varepsilon \alpha v \tau \omega \lambda \alpha \mu \beta \alpha \nu \varepsilon \tau \eta \nu \tau \tau \mu \eta \nu)$. Dative case of personal interest $(\varepsilon \alpha \cup \tau \omega)$. The priest was called of God. This is the ideal and was true of Aaron. The
modern minister is not a priest, but he also should be a God-called man and not one who pushes himself into the ministry or into ecclesiastical office.

Heb 5:5
So Christ also (ovtw¢ ка o Xpıбтоৎ). Just as with Aaron. Jesus had divine appointment as high priest also.

To be made ( $\gamma \varepsilon \nu \eta \theta \eta \nu \alpha$ ). First aorist passive infinitive of $\gamma / v o \mu \alpha$.
High priest ( $\alpha \rho \chi$ เع $\rho \varepsilon \alpha$ ). Predicate accusative agreeing with عavtov (himself) object of $\varepsilon \delta о \xi \alpha \sigma \varepsilon v$.

But he that spake unto him ( $\alpha \lambda \lambda^{\prime}$ o $\lambda \alpha \lambda \eta \sigma \alpha \varsigma \pi \rho o \varsigma ~ \alpha u \tau o v$ ). Ellipsis of $\varepsilon \delta o \xi \alpha \sigma \varepsilon v$ to be supplied from preceding clause. God did glorify Jesus in appointing him priest as we see in Ps 2:7 quoted already as Messianic (Heb 1:5). Jesus himself repeatedly claimed that the Father sent him on his mission to the world (Joh 5:30,43; 8:54; 17:5 , etc.). Bruce holds that Christ's priesthood is co-eval with his Sonship. Davidson thinks it is merely suitable because he is Son. Clearly the Father nominated (Dods) the Son to the Messianic priesthood (Joh 3:16).

Heb 5:6
In another place ( $\varepsilon v \varepsilon \tau \varepsilon \rho \omega)$. That is Ps 110:4 . It is this crucial passage by which the author will prove the superiority of Jesus to Aaron as high priest. Only the word priest (เعрعuৎ) occurs here which the author uses as synonymous with high priest (apxıgpevৎ). The point lies in the meaning of the phrase "After the order of Melchizedek" ( $\kappa \alpha \tau \alpha \tau \eta \nu \tau \alpha \xi \iota \nu$ $\mathrm{M} \varepsilon \lambda \chi$ เซء $\delta \varepsilon \kappa)$. But at this point the only thing pressed is the fact of the divine appointment of Jesus as priest. He returns to this point ( 5:10-7:28).

Heb 5:7
In the days of his flesh ( $\varepsilon v \tau \alpha ı \varsigma ~ \eta \mu \varepsilon \rho \alpha \iota \varsigma ~ \tau \eta \varsigma ~ \sigma \alpha \rho \kappa о \varsigma ~ \alpha u \tau о v) . ~ H e r e ~(v e r s e s ~ 7-9) ~ t h e ~ a u t h o r ~$ turns to the other requirement of a high priest (human sympathy). Since Jesus was "without $\sin$ ( $4: 15$ ) he did not have to offer sacrifices "for himself," yet in all other points he felt the sympathy of the human high priest, even more so by reason of his victory over sin.

Having offered up ( $\pi \rho о \sigma \varepsilon v \varepsilon \gamma \kappa \alpha \varsigma$ ). Second aorist active ( $-\alpha$ form) participle of $\pi \rho о \sigma \varphi \varepsilon \rho \omega$ (cf. verse 3). An allusion to the Agony of Christ in Gethsemane.

Supplications (ıкะтๆрıa̧). Socrates, Polybius, Job (Job 40:22) combine this word with $\delta \varepsilon \eta \sigma \varepsilon \iota \varsigma$ (prayers) as here. The older form was ıкєбıа. The word ıкєтๆрю๐̧ is an adjective
 branch ( $\varepsilon \lambda \alpha \iota \alpha)$. Here only in the N.T.

With strong crying and tears ( $\mu \varepsilon \tau \alpha$ краиүпऽ ьб $\quad$ טрас ка $\delta \alpha к \rho \nu \omega v$ ). See Lu 22:44f . for a picture of the scene in Gethsemane (anguish and pathos). No doubt the writer has in mind other times when Jesus shed tears (Joh 11:35; Lu 19:41 ), but Gethsemane chiefly.

To save him from death ( $\sigma \omega$ โદıv єк $\theta a v a \tau o v$ ). A reference to the cry of Jesus in Gethsemane (Mt 26:39).

Having been heard for his godly fear ( $\varepsilon เ \sigma \alpha \kappa о \cup \sigma \theta \varepsilon ı \varsigma \alpha \pi о \tau \eta \varsigma \varepsilon \cup \lambda \alpha \beta \varepsilon ı \alpha \varsigma)$. Old word from $\varepsilon v \lambda \alpha \beta \eta \varsigma$ (taking hold well, Lu 2:25 from $\varepsilon v, \lambda \alpha \mu \beta \alpha v \omega$, the verb $\varepsilon v \lambda \alpha \beta \varepsilon o \mu \alpha$ in N.T. only in Heb 11:7 ), in N.T. only here and 12:28. Fine picture of Christ's attitude toward the Father in the prayer in Gethsemane and in all his prayers. Jesus in Gethsemane at once surrendered his will to that of the Father who heard his plea and enabled him to acquiesce in the Father's will.

Heb 5:8
Though he was a Son ( $\kappa \alpha \iota \pi \rho \rho \nu \nu \iota \circ$ ). Concessive participle with $\kappa \alpha \iota \pi \varepsilon \rho$, regular Greek idiom as in 7:5; 12:17.

Yet learned obedience ( $\varepsilon \mu \alpha \theta \varepsilon v$ vாaко $\eta v$ ). Second aorist active indicative of $\mu \alpha v \theta \alpha v \omega$. Succinct and crisp statement of the humanity of Jesus in full harmony with Lu 2:40,52 and with Heb 2:10 .

By the things which he suffered ( $\alpha \varphi^{\prime} \omega v \varepsilon \pi \alpha \theta \varepsilon v$ ). There is a play on the two verbs ( $\varepsilon \mu \alpha \theta \varepsilon v--\varepsilon \pi \alpha \theta \varepsilon v$ ), paronomasia. Second aorist active indicative of $\pi \alpha \sigma \chi \omega$. He always did his Father's will (Joh 8:29), but he grew in experience as in wisdom and stature and in the power of sympathy with us.

Heb 5:9
Having been made perfect ( $\tau \varepsilon \lambda \varepsilon \epsilon \omega \theta \varepsilon \iota \varsigma)$. First aorist passive participle of $\tau \varepsilon \lambda \varepsilon \varepsilon \circ \omega$, the completion of the process of training mentioned by this same verb in 2:10 "by means of sufferings" ( $\delta \iota \alpha \pi \alpha \theta \eta \mu \alpha \tau \omega v)$ as stated again here in verse 8.

The author of eternal salvation ( $\alpha \iota \tau \iota \rho \sigma \omega \tau \eta \rho \iota \alpha \varsigma \alpha \iota \omega v i o v$ ). Common adjective from aıtıa (cause), causing, often in Greek with $\sigma \omega \tau \eta \rho \iota a \varsigma ~(A e s c h i n e s, ~ P h i l o), ~ i n ~ N . T . ~ o n l y ~ h e r e, ~$ Lu 23:4,14,22; Ac 19:40 . See same idea in Heb 2:10 (a $\rho \chi \eta \gamma$ ov). See Isa 45:17.

Heb 5:10
Named of God ( $\pi \rho о \sigma \alpha \gamma \rho \rho \varepsilon v \theta \varepsilon ı$ ). First aorist passive participle of $\pi \rho о \sigma \alpha \gamma о \rho \varepsilon v \omega$, old verb to salute, to address, only here in N.T. Common in Plutarch.

Heb 5:11
Of whom ( $\pi \varepsilon \rho \circ \mathrm{ov}$ ). Or "concerning which," for ov can be either masculine or neuter (genitive). It is the likeness of Jesus as high priest to Melchizedek that the author has in mind. He is ready to discuss that but for the fear that the reader may fail to grasp his meaning, for he will run counter to the usual Jewish ideas. Hence he pauses to stir up the interest of the readers ( 5:11-6:20) before going on with the argument ( 7:1-28).

Hard of interpretation ( $\delta v \sigma \varepsilon \rho \mu \eta v \varepsilon \cup \tau o \varsigma)$. Late and rare verbal compound ( $\delta v \sigma$, $\varepsilon \rho \mu \eta v \varepsilon v \omega)$, in Diodorus and Philo, here only in N.T. Hard to explain because of the strange (to Jews) line taken, but still more because of their dulness.

Dull of hearing ( $v \omega \theta \rho о$ таця акоацс). Old adjective (papyri also), from negative $v \eta$ and $\omega \theta \varepsilon \omega$, to push, no push in the hearing, slow and sluggish in mind as well as in the ears. In N.T. only here and 6:12 (slack, sluggish). Plato calls some students $v \omega \theta \rho o$ (stupid).

Heb 5:12
Teachers ( $\delta \iota \delta \alpha \sigma \kappa \alpha \lambda o$ ). Predicate nominative after $\varepsilon \iota v \alpha$.
By reason of the time ( $\delta \iota \alpha \tau o v \chi \rho o v o v$ ). Alas, what a commentary on modern Christians.
That some one teach you the rudiments ( $\tau 0 v \delta \iota \delta \alpha \sigma \kappa \varepsilon \iota v \nu \mu \alpha \varsigma \tau \iota \alpha \tau \alpha \sigma \tau о \iota \chi \varepsilon \alpha)$. Neat Greek idiom, genitive case of the articular infinitive (need of the teaching) with two accusatives of the person (v $\mu \alpha \varsigma$, you) and the thing ( $\tau \alpha \sigma \tau о \iota \varepsilon \varepsilon \alpha$, the rudiments) and the accusative of general reference ( $\tau \iota v \alpha$, as to some one). For $\sigma \tau о \iota \chi \varepsilon \iota \alpha$ see $\mathrm{Ga} 4: 3,9$; Col 2:8 .

Of the first principles of the oracles of God ( $\tau \eta \varsigma \alpha \rho \chi \eta \varsigma \tau \omega \nu \lambda o \gamma \omega \omega \nu \tau o v \theta \varepsilon o v$ ). Three genitives linked to each other. A $\rho \chi \eta \varsigma$ (beginning) illustrates $\tau \alpha \sigma \tau o \iota \chi \varepsilon ı \alpha$, just before, the $A$ B C of Christian teaching like Heb 6:1f. $\Lambda \mathrm{o}$ ү ov is a diminutive of logos, divine oracles being usually brief, common in the O.T. and Philo for God's words, in N.T. used for the O.T. (Ac 7:38; Rom 3:2 ), of God's word through Christians (1Pe 4:11), of the substance of Christian teaching (Heb 5:12).

Of milk ( $\gamma \boldsymbol{\alpha}$ 人ккос). Because still babes (1Co 3:2) and not able to chew "solid food" ( $\sigma \tau \varepsilon \rho \alpha \varsigma \tau \rho \circ \varphi \eta \varsigma)$, without intellectual and spiritual teeth.

Heb 5:13
Without experience ( $\alpha \pi \varepsilon \iota \rho \circ \varsigma)$. Old adjective (alpha privative and $\pi \varepsilon \iota \rho \alpha$, trial). Inexperienced. The babe ( $\nu \eta \pi \iota \varsigma$, old word, negative $v \eta$ and $\varepsilon \pi \circ \varsigma$, word like Latin infans, infant, not able to talk), not able to chew if one uses only milk and is without teeth. Perhaps moral truth is meant by "word of righteousness" (cf. 1:2; 2:3 for the word spoken by Christ).

Heb 5:14
For full-grown men ( $\tau \varepsilon \lambda \varepsilon \epsilon \omega v$ ). Predicate genitive. The word is for adults, relative perfection ( $\tau \varepsilon \lambda \varepsilon \iota 0$ ) in contrast with babes as in 1Co 2:6;3:1; 13:11; Php 3:15; Eph 4:4, not absolute perfection (Mt 5:48).

Their senses ( $\tau \alpha \alpha \iota \sigma \theta \eta \tau \eta \rho \iota \alpha$ ). The organs of perception (Stoic term for sense organs) from $\alpha \iota \sigma \theta \alpha \vee o \mu a(L u ~ 9: 45)$ ), in Plato, Galen, Hippocrates, here only in N.T.

Exercised $(\gamma \varepsilon \gamma \nu \mu \nu \alpha \sigma \mu \varepsilon \nu \alpha)$. Perfect passive participle of $\gamma \nu \mu \nu \alpha \zeta \omega$, to exercise (naked, $\gamma \nu \mu \nu о \varsigma)$. Galen uses $\alpha \iota \sigma \theta \eta \tau \eta \rho \iota \alpha \gamma \varepsilon \gamma \nu \mu \nu \alpha \sigma \mu \varepsilon v \alpha$ together after $\varepsilon \chi \omega$ as we have here. For this predicate use of the participle with $\varepsilon \chi \omega$ see Lu 13:6; 14:19f. "By reason of use" one gains such skill.

To discern ( $\pi \rho \circ \varsigma \delta ı \alpha \kappa \rho \iota \iota v$ ). "For deciding between" (from $\delta \iota \alpha \rho \iota \nu \omega$ ), old word with ablative $\kappa \alpha \lambda$ оv $\tau \varepsilon \kappa \alpha$ какоv (between good and evil). See 1Co 12:1; Rom 14:1 .

## Hebrews 6

Heb 6:1
Wherefore ( $\delta$ ıo). Because of the argument already made about the difficulty of the subject and the dulness of the readers.

Let us cease to speak ( $\alpha \varphi \varepsilon \nu \tau \varepsilon \varsigma$ to $\nu \lambda \gamma \gamma \circ v$ ). Second aorist active participle of $\alpha \varphi \neg \eta \mu$, to leave off or behind.

Of the first principles of Christ ( $\tau \eta \varsigma \alpha \rho \chi \eta \varsigma$ tov X $\rho \iota \sigma \tau o v$ ). Objective genitive Xpıбтov (about Christ). "Leaving behind the discussion of the beginning about Christ," another way of saying again $\tau \alpha \sigma \tau o \not \chi \varepsilon ı \alpha \tau \eta \varsigma \alpha \rho \chi \eta \varsigma \tau \omega \nu \lambda o \gamma \omega \nu \tau \operatorname{\tau ov} \theta \varepsilon o v$ of 5:12.

And press on ( $\kappa \alpha \varphi \varepsilon \rho \omega \mu \varepsilon \theta \alpha$ ). Volitive present subjunctive passive, "Let us be borne on" (both the writer and the readers). The Pythagorean Schools use $\varphi \varepsilon \rho \omega \mu \varepsilon \theta a$ in precisely this sense of being borne on to a higher stage of instruction. Bleek quotes several instances of Greek writers using together as here of $\alpha \varphi \varepsilon \nu \tau \varepsilon \varsigma ~ \varphi \varepsilon \rho \omega \mu \varepsilon \theta \alpha$ (Eurip., Androm. 393, for instance).

Unto perfection ( $\varepsilon \pi \tau \eta \nu \tau \varepsilon \lambda \varepsilon เ \circ \tau \eta \tau \alpha)$. Old word from $\tau \varepsilon \lambda \varepsilon เ \circ \varsigma$ mature, adults as in 5:14. Only twice in N.T. (here and Col 3:14 ). Let us go on to the stage of adults, not babes, able to masticate solid spiritual food. The writer will assume that the readers are adults in his discussion of the topic.

Not laying again the foundation ( $\mu \eta \pi \alpha \lambda \iota v \theta \varepsilon \mu \varepsilon \lambda_{\imath} \sigma \nu \kappa \alpha \tau \alpha \beta \alpha \lambda \lambda o \mu \varepsilon v o$ ). The regular idiom for laying down the foundation of a building $(\theta \varepsilon \mu \varepsilon \lambda \iota o v, \mathrm{Lu} 6: 48 \mathrm{f}$. ). The metaphor is common (1Co 3:11) and the foundation is important, but one cannot be laying the foundation always if he is to build the house. There are six items mentioned here as part of the "foundation," though the accusative $\delta \iota \delta \alpha \chi \eta \nu$ in apposition with $\theta \varepsilon \mu \varepsilon \lambda_{\iota}$ v may mean that there are only four included in the $\theta \varepsilon \mu \varepsilon \lambda_{\imath} \nu$. Two are qualitative genitives after $\theta \varepsilon \mu \varepsilon \lambda_{\iota}$ v ( $\mu \varepsilon \tau \alpha v o \iota a \varsigma$ and $\pi \iota \sigma \tau \varepsilon \omega \varsigma)$. What is meant by "dead works" ( $\alpha \pi 0 \nu \varepsilon \kappa \rho \omega v \varepsilon \rho \gamma \omega v$ ) is not clear ( 9:14), though the reference may be to touching a corpse (Nu 19:1f.; 31:19). There are frequent allusions to the deadening power of $\sin$ (Jas 2:17,26; Joh 7:25; Rom 6:1,11; 7:8; Col 2:13; Eph 2:1,5). The use of repentance and faith together occurs also elsewhere (Mr 1:15; Ac 20:21; 1Th 1:9).

## Heb 6:2

The other four items are qualitative genitives with $\delta \iota \delta \alpha \chi \hat{A} \eta \nu(\beta a \pi \tau \iota \sigma \mu \omega v, \varepsilon \pi ı \theta \varepsilon \sigma \varepsilon \omega \varsigma$ $\chi \varepsilon เ \rho \omega v$, $\alpha v a \sigma \tau \alpha \sigma \varepsilon \omega \varsigma ~ v \varepsilon \kappa \rho \omega v$, крццатоऽ aı $\omega v$ vov). The plural $\beta \alpha \pi \tau \iota \sigma \mu \omega \nu$ "by itself does not mean specifically Christian baptism either in this epistle ( 9:10) or elsewhere (Mr 7:4), but ablutions or immersions such as the mystery religions and the Jewish cultus required for initiates, proselytes, and worshippers in general" (Moffatt). The disciples of the Baptist had disputes with the Jews over purification (Joh 3:25 ). See also Ac 19:2 . "The laying on of hands" seems to us out of place in a list of elementary principles, but it was common as a
sign of blessing (Mt 19:13), of healing (Mr 7:32), in the choice of the Seven (Ac 6:6), in the bestowal of the Holy Spirit (Ac 8:17f.; 19:6), in separation for a special task (Ac 13:3), in ordination ( $1 \mathrm{Ti} 4: 14 ; 5: 22 ; 2 \mathrm{Ti} 1: 6$ ). Prayer accompanied this laying on of the hands as a symbol. The resurrection of the dead (both just and unjust, Joh 5:29; Ac 24:15 ) is easily seen to be basal (cf. 1Co 15 ) as well as eternal judgment (timeless and endless).

Heb 6:3
If God permit ( $\varepsilon \alpha v \pi \varepsilon \rho \varepsilon \pi \iota \tau \rho \varepsilon \pi \eta$ o $\theta \varepsilon \circ \varsigma)$. Condition of the third class with $\varepsilon \alpha v \pi \varepsilon \rho$ (note $\pi \varepsilon \rho$ indeed). See 1Co 16:7 ( $\varepsilon \alpha \nu$ о кvрьюц $\varepsilon \pi \iota \tau \rho \varepsilon \psi \eta$ ) and Ac 18:21 ( $\tau$ оv $\theta \varepsilon o v \theta \varepsilon \lambda о \nu \tau о \varsigma)$. It is not an idle form with the author. He means that he will go on with the argument and not attempt to lay again the foundation (the elements). Moffatt takes him to mean that he will teach them the elements at a later time (13:23) if the way opens, a less probable interpretation.

Heb 6:4
As touching those who were once enlightened ( $\tau 0 \cup \varsigma \alpha \pi \alpha \xi \varphi \omega \tau \iota \sigma \theta \varepsilon v \tau \alpha \varsigma)$. First aorist passive articular participle (the once for all enlightened) of $\varphi 0 \tau \iota \zeta \omega$, old and common verb (from $\varphi \omega \varsigma$ ) as in Lu 11:36. The metaphorical sense here (cf. Joh 1:9; Eph 1:18; Heb 10:32) occurs in Polybius and Epictetus. The accusative case is due to avakaıviそとıv in verse 6. Hata here is "once for all," not once upon a time ( $\pi 0 \tau \varepsilon$ ) and occurs again (9:7,26,27,28; 12:26,27 ).
 middle participle of $\gamma \varepsilon v \omega$, old verb once with accusative (verse 5, $\kappa \alpha \lambda o v \rho \eta \mu \alpha, \delta v v \alpha \mu \varepsilon ı \varsigma$ ), usually with genitive (Heb 2:9) as here.

Partakers of the Holy Ghost ( $\mu \varepsilon \tau о \chi о v \varsigma \pi \nu \varepsilon v \mu \alpha \tau о \varsigma \alpha \gamma ı v)$ ) See 3:14 for $\mu \varepsilon \tau о \chi \circ$. These are all given as actual spiritual experiences.

And then fell away ( $\kappa \alpha \pi \alpha \rho \alpha \pi \varepsilon \sigma о \nu \tau \alpha \varsigma)$. No "then" here, though the second aorist (effective) active participle of $\pi \alpha \rho \alpha \pi \iota \tau \tau \omega$, old verb to fall beside (aside), means that. Only here in N.T. In Gal 5:4 we have $\tau \eta \varsigma \chi \alpha \rho \iota \tau о \varsigma \varepsilon \xi \varepsilon \pi \varepsilon \sigma \alpha \tau \varepsilon$ (ye fell out of grace, to law, Paul means).

Heb 6:6
It is impossible to renew them again ( $\alpha \delta v v \alpha \tau o v \pi \alpha \lambda ı v \alpha v \alpha \kappa \alpha ı v \iota \zeta \varepsilon ı v$ ). The $\alpha \delta v v a \tau o v$ (impossible) comes first in verse 4 without $\varepsilon \sigma \tau \iota v$ (is) and there is no "them" in the Greek. There are three other instances of a $\delta$ vvatov in Hebrews $(6: 18 ; 10: 4 ; 11: 6)$. The present active infinitive of $\alpha v \alpha \kappa \alpha \iota v \zeta \omega$ (late verb, ava, каıvo૬, here only in the N.T., but avaкаıvo $\omega$, 2Co 4:16; Col 3:10) with a $\delta u v a \tau o v$ bluntly denies the possibility of renewal for apostates from Christ (cf. 3:12-4:2). It is a terrible picture and cannot be toned down. The one ray of light comes in verses $8-12$, not here.

Seeing they crucify to themselves afresh ( $\alpha v \alpha \sigma \tau \rho \alpha \cup \rho o v v \tau \alpha \varsigma \varepsilon \alpha v \tau o ı \varsigma)$. Present active participle (accusative plural agreeing with $\tau 0 v \varsigma ~ . . . \pi \alpha \rho \alpha \pi \varepsilon \sigma o v \tau \alpha \varsigma)$ of $\alpha v \alpha \sigma \tau \alpha v \rho o \omega$, the usual verb for crucify in the old Greek so that ava- here does not mean "again" or "afresh," but
"up," sursum, not rursum (Vulgate). This is the reason why renewal for such apostates is impossible. They crucify Christ.

And put him to an open shame ( $\kappa \alpha \pi \alpha \rho \alpha \delta \varepsilon ı \gamma \mu \alpha \tau \iota \zeta о \nu \tau \alpha \varsigma)$. Present active participle of $\pi \alpha \rho \alpha \delta \varepsilon \iota \gamma \mu \alpha \tau \iota \zeta \omega$, late verb from $\pi \alpha \rho \alpha \delta \varepsilon \iota \gamma \mu \alpha$ (example), to make an example of, and in bad sense to expose to disgrace. Simplex verb $\delta \varepsilon \tau \gamma \mu \alpha \tau \iota \sigma \alpha$ in this sense in Mt 1:19.

Heb 6:7
Which hath drunk ( $\eta \pi\llcorner\circ \sigma \sigma \alpha$ ). Articular second aorist active participle of $\pi \iota v \omega$, to drink.

Herbs ( $\beta \circ \tau \alpha v \eta \nu)$. Old word from $\beta$ oo $\kappa \omega$, to feed, green plant, only here in N.T. Cf. our botany.

Meet ( $\varepsilon v \theta \varepsilon \tau \tau v)$. Old compound verbal ( $\varepsilon v, \tau \iota \theta \eta \mu$ ) well-placed, fit ( $\mathrm{Lu} 9: 62$ ).
It is tilled ( $\gamma \varepsilon \omega \rho \gamma \varepsilon ו \tau \alpha$ ). Present passive indicative of $\gamma \varepsilon \omega \rho \gamma \varepsilon \omega$, old and rare verb from $\gamma \varepsilon \omega \rho \gamma \circ \varsigma$ (tiller of the soil, $\gamma \eta, \varepsilon \rho \gamma \circ v, 2$ Ti 2:6 ), here only in the N.T.

Receives ( $\mu \varepsilon \tau \alpha \lambda \alpha \mu \beta \alpha v \varepsilon$ ). Present active indicative of $\mu \varepsilon \tau \alpha \lambda \alpha \mu \beta \alpha v \omega$, old verb to share in, with genitive (عu入oүıas) as here (Ac 2:46 ) or with accusative (Ac 24:25).

Heb 6:8
If it beareth ( $\varepsilon \kappa \varphi \varepsilon \rho \circ \cup \sigma \alpha$ ). Present active participle of $\varepsilon \kappa \varphi \varepsilon \rho \omega$, conditional participle. For "thorns and thistles" see Mt 7:16 for both words ( $\alpha \kappa \alpha v \theta a \varsigma ~ \kappa \alpha ~ \tau \rho ı \beta o \lambda o v \varsigma) . ~ R o m a n ~ s o l d i e r s ~$ scattered balls with sharp iron spikes, one of which was called tribulus, to hinder the enemy's cavalry.

Rejected ( $\alpha$ бокцоя). See 1Co 9:27; Ro 1:28. For катарас $\varepsilon \gamma \gamma \cup \varsigma$ (nigh unto a curse) see Gal 3:10 .

To be burned ( $\varepsilon \varsigma \varsigma \kappa \alpha v \sigma เ v) . ~ " F o r ~ b u r n i n g . " ~ C o m m o n ~ s i g h t ~ i n ~ c l e a r i n g ~ u p ~ g r o u n d . ~$
Heb 6:9
But we are persuaded ( $\pi \varepsilon \pi \varepsilon เ \sigma \mu \varepsilon \theta a \delta \varepsilon$ ). Perfect passive indicative of $\pi \varepsilon ө \omega$, literary plural. Note Paul's use of $\pi \varepsilon \pi \varepsilon \iota \sigma \mu \alpha$ in 2Ti 1:12.

Better things ( $\tau \alpha \kappa \rho \varepsilon \iota \sigma \sigma \circ v \alpha$ ). "The better things" than those pictures in 6:4-8.
That accompany salvation ( $\varepsilon \chi \circ \mu \varepsilon v \alpha \sigma \omega \tau \eta \rho \iota \alpha \varsigma)$. "Things holding on to salvation" (Mr 1:38), a common Greek phrase $\varepsilon \chi \circ \mu \varepsilon v a$, present middle participle of $\varepsilon \chi \omega$.

Though we thus speak ( $\varepsilon \kappa \alpha$ ov $\omega \varsigma \varsigma \alpha \lambda \neq v \mu \varepsilon v$ ). Concessive condition of the first class. Explanatory, not apologetic, of his plain talk.

Not unrighteous to forget ( $\circ$ v $\gamma \alpha \rho \alpha \delta ı \kappa о \varsigma \varepsilon \pi ı \lambda a \theta \varepsilon \sigma \theta \alpha$ ). Second aorist middle infinitive of $\varepsilon \pi \iota \lambda \alpha v \theta \alpha v \omega$ with genitive case ( $\varepsilon \rho \gamma \circ 0$, work, $\alpha \gamma \alpha \pi \eta \varsigma$, love). But even God cannot remember what they did not do.

In that ye ministered and still do minister ( $\delta \iota \alpha \kappa о \vee \eta \sigma \alpha \nu \tau \varepsilon \varsigma \kappa \alpha$ бıакоvоиvтєৎ). First aorist active and present active participle of the one verb $\delta \iota \alpha \kappa 0 v \varepsilon \omega$, the sole difference being the tense (single act aorist, repeated acts present).

Heb 6:11

And we desire ( $\varepsilon \pi 1 \theta \nu \mu \circ \cup \mu \varepsilon v \delta \varepsilon$ ). Literary plural again like $\pi \varepsilon \pi \varepsilon เ \sigma \mu \varepsilon \theta \alpha$ ( 6:9). He is not wholly satisfied with them as he had already shown ( $5: 11-14$ ). They have not given up Christ ( 6:4-8), but many of them are still babes ( $\nu \eta \pi\llcorner 0,5: 13$ ) and not adults ( $\tau \varepsilon \lambda \varepsilon ⿺ 0,5: 14$ ) and others are in peril of becoming so.

Unto the fulness of hope ( $\pi \rho \circ \varsigma \tau \eta \nu \pi \lambda \eta \rho о \varphi о \rho ı \alpha \nu \tau \eta \varsigma \varepsilon \lambda \pi \iota \delta \circ \varsigma)$. For $\pi \lambda \eta \rho о \varphi о \rho ı \alpha$ see 1 Th 1:5; Col 2:2 .

To the end ( $\alpha \not \rho \tau \varepsilon \lambda o u \varsigma)$. As in 3:6,14 .
Heb 6:12
That ye be not sluggish ( $\mathfrak{\imath \alpha} \mu \eta \nu \omega \theta \rho o \gamma \varepsilon \nu \eta \sigma \theta \varepsilon$ ). Negative final clause with second aorist middle subjunctive of $\gamma$ ivoua, "that ye become not sluggish (or dull of hearing)" as some already were ( $5: 11$ ).

Imitators ( $\mu \mu \eta \tau \alpha$ ). See 1Th 1:6; 2:14 for this word (our "mimic" in good sense). The writer wishes to hold and develop these sluggards through those who inherit the promises (see 10:19-12:3), one of his great appeals later in ch. Heb 11 full of examples of "faith and long-suffering."

Heb 6:13
Made promise ( $\varepsilon \pi \alpha \gamma \gamma \varepsilon ı \lambda \alpha \mu v o \varsigma)$. First aorist middle participle of $\varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$. Could swear by none greater ( $\kappa \alpha \tau^{\prime}$ ov $\delta \varepsilon v o \varsigma \varepsilon \backslash \chi \varepsilon v \mu \varepsilon \iota \zeta$ оvoc о $\rho о \sigma \alpha$ ). Imperfect active of $\varepsilon \chi \omega$ in sense of $\varepsilon \delta v v a \tau 0$ as often with o $\mu \circ \sigma \alpha$ (first aorist active infinitive of o $\mu \nu v \omega$ ) and $\omega \mu \circ \sigma \varepsilon v$ (he sware) is first aorist active indicative.

Heb 6:14
Surely ( $\varepsilon \mu \eta \nu$ ). By itacism for $\eta \mu \eta \nu$ (Deissmann, Bible Studies, p. 205). The quotation is from Ge 22:16f. (the promise renewed to Abraham with an oath after offering of Isaac).

Blessing ( $\varepsilon v \lambda o \gamma \omega v$ ). Hebraism (present active participle) for the Hebrew infinitive absolute and so with $\pi \lambda \eta \theta \Delta v \omega \nu$ (multiplying).

Heb 6:15
Having patiently endured ( $\mu \alpha \kappa \rho о \theta \nu \mu \eta \sigma \alpha \varsigma)$. First aorist active participle of $\mu \alpha \kappa \rho о \theta v \mu о \varsigma$ ( $\mu \alpha к \rho о \sigma, \theta \nu \mu \circ \varsigma$, long spirit) illustrating $\mu \alpha к \rho о \theta \nu \mu \iota \alpha$ of verse 12.

He obtained ( $\varepsilon \pi \varepsilon \tau \cup \chi \varepsilon v$ ). Second aorist (effective) active indicative of $\varepsilon \pi \varepsilon \tau v \gamma \chi \propto v \omega$, old verb with genitive. God was true to his word and Abraham was faithful.

Heb 6:16
In every dispute ( $\pi \alpha \sigma \eta \varsigma \alpha v \tau \iota \lambda o \gamma \iota \alpha \varsigma$ ). Objective genitive of old word several times in Hebrews (6:16; 7:7; 12:3 ). Talking back, face to face, in opposition.

Final ( $\pi \varepsilon \rho \alpha \varsigma$ ). Limit, boundary (Mt 12:42 ). Men may perjure themselves.
Heb 6:17
To shew ( $\varepsilon \pi \iota \delta \varepsilon \iota \xi \alpha)$. First aorist active infinitive of $\varepsilon \pi \iota \delta \varepsilon \iota \kappa \nu \cup \mu$, to show in addition ( $\varepsilon \pi \iota-$ ) to his promise "more abundantly" ( $\pi \varepsilon \rho \iota \sigma \sigma \circ \tau \varepsilon \rho \circ v$ ).
 verbal neuter singular (alpha privative and $\mu \varepsilon \tau \alpha \tau 1 \theta \eta \mu$, to change), "the unchangeableness of his will."

Interposed ( $\varepsilon \mu \varepsilon \sigma \iota \tau \varepsilon v \sigma \varepsilon v)$. First aorist active indicative of $\mu \varepsilon \sigma \iota \tau \varepsilon \nu \omega$, late verb from $\mu \varepsilon \sigma \iota \tau \eta \varsigma$, mediator (Heb 8:6), to act as mediator or sponsor or surety, intransitively to pledge one's self as surety, here only in the N.T.

With an oath (орк $\omega$ ). Instrumental case of оркоৎ (from $\varepsilon \rho \kappa о \varsigma$, an enclosure), Mt 14:7,9

Heb 6:18
By two immutable things ( $\delta \iota \alpha \delta v o \pi \rho \alpha \gamma \mu \alpha \tau \omega \nu ~ \alpha \mu \varepsilon \tau \alpha \theta \varepsilon \tau \omega v$ ). See verse 17. God's promise and God's oath, both unchangeable.

In which it is impossible for God to lie ( $\varepsilon v$ oıৎ $\alpha \delta u v a \tau o v ~ \psi \varepsilon v \sigma \alpha \sigma \theta \alpha \theta \varepsilon o v$ ). Put this "impossibility" by that in verses 4-6.

Theon is accusative of general reference with $\psi \varepsilon v \sigma a \sigma \theta \alpha$, first aorist middle infinitive of $\psi \varepsilon v \delta o \mu \alpha$.

That we may have ( $t v \alpha \varepsilon \chi \omega \mu \varepsilon v$ ). Purpose clause with $t v \alpha$ and the present active subjunctive of $\varepsilon \chi \omega$, "that we may keep on having."

Strong consolation (ı $\sigma \chi \cup \rho \alpha v \pi \alpha \rho \alpha \kappa \lambda \eta \sigma \imath v)$. "Strong encouragement" by those two immutable things.

Who have fled for refuge (o кат $\alpha \varphi \cup \gamma о v \tau \varepsilon \varsigma$ ). Articular effective second aorist active participle of $\kappa \alpha \tau \alpha \varphi \varepsilon \cup \gamma \omega$, old verb, in N.T. only here and Ac 14:6 . The word occurs for fleeing to the cities of refuge (De 4:42; 19:5; Jos 20:9).

To lay hold of ( $\kappa \rho \alpha \tau \eta \sigma \alpha)$. First aorist active (single act) infinitive of $\kappa \rho \alpha \tau \varepsilon \omega$ in contrast with present tense in 4:14 (hold fast).

Set before us ( $\pi \rho о к \varepsilon \mu \varepsilon v \eta \varsigma)$. Placed before us as the goal. See this same participle used with the "joy" ( $\chi \propto \rho \alpha \varsigma$ ) set before Jesus ( 12:2).

Heb 6:19
Which ( $\eta v$ ). Which hope. What would life be without this blessed hope based on Christ as our Redeemer?

As an anchor of the soul ( $\omega \varsigma \alpha \gamma \kappa \nu \rho \alpha \nu \tau \eta \varsigma \psi v \chi \eta \varsigma)$. Old word, literally in Ac 27:29, figuratively here, only N.T. examples. The ancient anchors were much like the modern ones with iron hooks to grapple the rocks and so hold on to prevent shipwreck (1Ti 1:19).

Both sure and steadfast ( $\alpha \sigma \varphi \alpha \lambda \eta \tau \varepsilon \kappa \alpha \beta \varepsilon \beta \alpha \iota \alpha v$ ). This anchor of hope will not slip (alpha privative and $\sigma \varphi \alpha \lambda \lambda \omega$, to totter) or lose its grip ( $\beta \varepsilon \beta \alpha \downarrow \alpha$, from $\beta \alpha \downarrow v \omega$, to go, firm, trusty).
 "the inner part of the veil" (the space behind the veil), in N.T. only here and Ac 16:24 (of the inner prison). The anchor is out of sight, but it holds. That is what matters.

## Heb 6:20

As a forerunner $(\pi \rho \circ \delta \rho o \mu \circ \varsigma)$. Old word used for a spy, a scout, only here in N.T. Jesus has shown us the way, has gone on ahead, and is the surety ( $\varepsilon \gamma \gamma \sim \circ$, Heb 7:22) and guarantor of our own entrance later. In point of fact, our anchor of hope with its two chains of God's promise and oath has laid hold of Jesus within the veil. It will hold fast. All we need to do is to be true to him as he is to us.

A high priest for ever ( $\alpha \rho \chi \iota \rho \varepsilon v \varsigma \varepsilon ı \varsigma ~ \tau o v \alpha ı \omega v \alpha$ ). There he functions as our great high priest, better than Aaron for he is "after the order of Melchizedek," the point that now calls for elucidation (5:10f. ).

## Hebrews 7

Heb 7:1
This Melchizedek (outoc o M $\bar{\lambda} \chi$ ıб $\delta \delta \varepsilon \kappa$ ). The one already mentioned several times with whose priesthood that of Christ is compared and which is older and of a higher type than that of Aaron. See Ge 14:18-20; Ps 110 for the only account of Melchizedek in the Old Testament. It is a daring thing to put Melchizedek above Aaron, but the author does it. Moffatt calls verses 1-3 "a little sermon" on 6:20. It is "for ever" ( $\varepsilon \varsigma \varsigma ~ t o v ~ a ı \omega v a) ~ t h a t ~ h e ~ e x-~$ plains. Melchizedek is the only one in his line and stands alone in the record in Genesis. The interpretation is rabbinical in method, but well adapted to Jewish readers. The description is taken verbatim from Genesis except that "who met" (o ouvavtnoac) is here applied to Melchizedek from Ge 14:17 instead of to the King of Sodom. They both met Abraham as a matter of fact. For this verb (first aorist active participle of $\sigma u v a v \tau a \omega$ ) see Lu 9:37.

Slaughter (коппऽ). Old word for cutting (колт $\omega$, to cut), here only in N.T. These kings were Amraphel, Arioch, Chedorlaomer, Tidal. Amraphel is usually taken to be Khammurabi.
 тov $\cup \psi \iota \sigma \tau o v$ applied to God as the Canaanites, Phoenicians, Hebrews did. It is used also of Zeus and the Maccabean priest-kings. The demons apply it to God (Mr 5:7; Lu 8:28).

Heb 7:2
A tenth ( $\delta \varepsilon \kappa \alpha \tau \eta v)$. It was common to offer a tenth of the spoils to the gods. So Abraham recognized Melchizedek as a priest of God.

Divided ( $\varepsilon \mu \varepsilon \rho \iota \sigma \varepsilon v$ ). First aorist active of $\mu \varepsilon \rho \iota \zeta \omega$, from $\mu \varepsilon \rho \circ \varsigma$ (portion), to separate into parts. From this point till near the end of verse 3 (the Son of God) is a long parenthesis with outoc of verse 1 as the subject of $\mu \varepsilon v \varepsilon$ (abideth) as the Revised Version punctuates it. Philo had made popular the kind of exegesis used here. The author gives in Greek the meaning of the Hebrew words Melchizedek (King of righteousness, cf. 1:8) and Salem (peace).

Heb 7:3
Without father, without mother, without genealogy ( $\alpha \pi \alpha \tau \omega \rho, \alpha \mu \eta \tau \omega \rho$, aүعvea入oүๆтoc). Alliteration like Ro 1:30, the first two old words, the third coined by the author (found nowhere else) and meaning simply "devoid of any genealogy." The argument is that from silence, made much of by Philo, but not to be pressed. The record in Genesis tells nothing of any genealogy. Melchizedek stands alone. He is not to be understood as a miraculous being without birth or death. Melchizedek has been made more mysterious than he is by reading into this interpretation what is not there.

Made like ( $\alpha \varphi \omega \mu \circ \omega \omega \mu \varepsilon v o \varsigma)$. Perfect passive participle of $\alpha \varphi \rho \mu \circ \circ \omega \omega$, old verb, to produce a facsimile or copy, only here in N.T. The likeness is in the picture drawn in Genesis, not in the man himself. Such artificial interpretation does not amount to proof, but only serves as a parallel or illustration.

Unto the Son of God ( $\tau \omega v i \omega$ tov $\theta \varepsilon o v$ ). Associative instrumental case of vioc.
Abideth a priest ( $\mu \varepsilon v \varepsilon$ ו $\varepsilon \rho \varepsilon \cup \varsigma)$ ). According to the record in Genesis, the only one in his line just as Jesus stands alone, but with the difference that Jesus continues priest in fact in heaven.

Continually ( $\varepsilon \iota \varsigma ~ \tau o ~ \delta ı \eta \nu \varepsilon \kappa \varepsilon \varsigma)$. Old phrase (for the continuity) like $\varepsilon \varsigma \varsigma ~ \tau o v a \iota \omega v a$, in N.T. only in Hebrews (7:3; 10:1,14,21 ).

Heb 7:4
How great ( $\pi \eta \lambda \iota \kappa о \varsigma)$. Geometrical magnitude in contrast to arithmetical ( $\pi о \sigma о \varsigma)$, here only in N.T., "how distinguished." He received tithes from Abraham (verses 4- ) and he blessed Abraham () and even Levi is included (verses 8-10).

Out of the chief spoils ( $\varepsilon \kappa \tau \omega v \alpha \kappa \rho \circ \theta \iota \nu \omega \omega v$ ). Old word from $\alpha \kappa \rho \circ \varsigma$, top, and $\theta \iota \varsigma$, a heap (the top of the pile).

Patriarch ( $\pi \alpha \tau \rho \iota \alpha \rho \chi \eta \varsigma)$. LXX word ( $\pi \alpha \tau \rho \iota \alpha$, tribe, $\alpha \rho \chi \omega$, to rule) transferred to N.T. (Ac 2:29).

Heb 7:5
 and Lu 1:9.

To take tithes ( $\alpha \pi о \delta \varepsilon к \alpha \tau о \iota v$ ). Present active infinitive (in -orv, not -ouv, as the best MSS. give it) of $\alpha \pi о \delta \varepsilon \kappa \alpha \tau о \omega$ a LXX word ( $\alpha \pi о, \delta \varepsilon \kappa \alpha \tau о \omega$ ), to take a tenth from ( $\alpha \pi о$ ).

Brethren ( $\alpha \delta \varepsilon \lambda \varphi o u c)$. Accusative case in apposition with $\lambda \alpha o v$ (people) unaffected by the explanatory phrase tovt' عбтiv (that is).

Though come out ( $\kappa \alpha u \pi \rho \rho \varepsilon \xi \varepsilon \lambda \eta \lambda \cup \theta$ oтac). Concessive participle (cf. 5:8) with $\kappa \alpha \iota \pi \varepsilon \rho$ (perfect active of $\varepsilon \xi \varepsilon \rho \chi \circ \mu \alpha$ ).

Heb 7:6
He whose genealogy is not counted ( $o \mu \eta \gamma \varepsilon v \varepsilon \alpha \lambda о \gamma о \nu \mu \varepsilon v o \varsigma)$ ). Articular participle with negative $\mu \eta$ (usual with participles) of the old verb $\gamma \varepsilon v \varepsilon \alpha \lambda o \gamma \varepsilon \omega$ trace ancestry (cf. verse 3 )

Hath taken tithes ( $\delta \varepsilon \delta \varepsilon \kappa \alpha \tau \omega \kappa \varepsilon v$ ). Perfect active indicative of $\delta \varepsilon \kappa \alpha \tau о \omega$, standing on record in Genesis.

Hath blessed ( $\varepsilon \cup \lambda о ү \eta \kappa \varepsilon v)$. Perfect active indicative of $\varepsilon \cup \lambda o \gamma \varepsilon \omega$, likewise standing on record. Note the frequent perfect tenses in Hebrews.

Him that hath the promises ( $\tau o v \varepsilon \chi о v \tau \alpha \tau \alpha \varsigma \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda ı \alpha \varsigma)$. Cf. 6:12,13-15 for allusion to the repeated promises to Abraham (Ge 12:3,7; 13:14; 15:5; 17:5; 22:16-18).

Heb 7:7
Dispute (aviı入oүıac). Ablative case with $\chi \omega \rho ı \varsigma$. For the word see 6:16. The writer makes a parenthetical generalization and uses the article and neuter adjective ( $\tau 0 \varepsilon \lambda \alpha \sigma \sigma o v$, the less, ито тои крєєттоvoৎ, by the better), a regular Greek idiom.

Нeb 7:8
Here ( $\omega \delta \varepsilon$ ). In the Levitical system.

There ( $\varepsilon \kappa \varepsilon$ ). In the case of Melchizedek.
Of whom it is witnessed ( $\mu \alpha \rho \tau \cup \rho о \nu \mu \varepsilon v o \varsigma)$. "Being witnessed," present passive participle of $\mu \alpha \rho \tau \nu \rho \varepsilon \omega$ (personal construction, not impersonal).

That he lives ( $\circ \tau \zeta \eta)$. Present active indicative of $\zeta \alpha \omega)$. The Genesis record tells nothing of his death.

Heb 7:9
So to say ( $\omega \varsigma \varepsilon \pi \sigma \varsigma \varepsilon \iota \pi \varepsilon เ v$ ). An old idiom, here only in the N.T., common in Philo, used to limit a startling statement, an infinitive for conceived result with $\omega \varsigma$.

Hath paid tithes ( $\delta \varepsilon \delta \varepsilon \kappa \alpha \tau \omega \tau \alpha)$. Perfect passive indicative of $\delta \varepsilon \kappa \alpha \tau \sigma \omega$, "has been tithed." This could only be true of Levi "so to speak."

Heb 7:10
In the loins of his father ( $\varepsilon v \tau \eta \quad \circ \sigma \varphi \cup \tau o v \pi \alpha \tau \rho \circ \varsigma)$. Levi was not yet born. The reference is to Abraham, the forefather ( $\pi \alpha \tau \rho \circ \varsigma$ ) of Levi. This is a rabbinical imaginative refinement appealing to Jews.

Heb 7:11
Perfection ( $\tau \varepsilon \lambda \varepsilon เ \omega \sigma \iota \varsigma)$. Abstract substantive of $\tau \varepsilon \lambda \varepsilon เ \circ \omega$. More the act than the quality or state ( $\tau \varepsilon \lambda \varepsilon เ o \tau \eta \varsigma, 6: 1)$. The condition is of the second class, "if there were perfection, etc." The Levitical priesthood failed to give men "a perfectly adequate relation to God" (Moffatt).

Priesthood (ıع ообטvŋŋ). Old word, in N.T. only here, verses 12,24. Cf. ıєрєтıa in verse 5. The adjective $\Lambda \varepsilon \cup \varepsilon \iota \tau \iota \kappa \eta$ occurs in Philo.

Received the law ( $v \varepsilon v o \mu \circ \theta \varepsilon \tau \eta \tau \alpha)$. Perfect passive indicative of $v o \mu \circ \theta \varepsilon \tau \varepsilon \omega$, old compound to enact law ( $v o \mu \circ \sigma, \tau i \theta \eta \mu$ ), to furnish with law (as here), only other N.T. example in $8: 6$.

What further need was there? ( $\tau \iota \varsigma \varepsilon \tau \chi \rho \varepsilon \varepsilon \alpha ;$ ). No copula expressed, but it would normally be $\eta v \alpha v$, not just $\eta v$ : "What need still would there be?"

Another priest ( $\varepsilon \tau \varepsilon \rho \circ \vee \stackrel{\varepsilon}{\varepsilon} \rho \varepsilon \alpha$ ). Of a different line ( $\varepsilon \tau \varepsilon \rho \circ v$ ), not just one more ( $\alpha \lambda \lambda \circ v$ ). Accusative of general reference with the infinitive $\alpha v ı \sigma \tau \alpha \sigma \theta \alpha$ (present middle of $\alpha v i \sigma \tau \eta \mu$ intransitive).

And not to be reckoned ( $\kappa \alpha$ ov $\lambda \varepsilon \gamma \varepsilon \sigma \theta \alpha$ ). The negative ou belongs rather to the descriptive clause than just to the infinitive.

Heb 7:12
The priesthood being changed ( $\mu \varepsilon \tau \alpha \tau \imath \theta \varepsilon \mu \varepsilon \nu \eta \varsigma \tau \eta \varsigma เ \varepsilon \rho \circ \sigma \cup v \eta \varsigma)$. Genitive absolute with present passive participle of $\mu \varepsilon \tau \alpha \tau \iota \theta \eta \mu$, old word to transfer (Ga 1:6).

A change ( $\mu \varepsilon \tau \alpha \theta \varepsilon \sigma \iota)$ ). Old substantive from $\mu \varepsilon \tau \alpha \tau \iota \theta \eta \mu$. In N.T. only in Heb. (7:12; 11:5; 12:27). God's choice of another kind of priesthood for his Son, left the Levitical line off to one side, forever discounted, passed by "the order of Aaron" ( $\tau \eta \nu \tau \alpha \xi \imath \nu A \alpha \rho \omega v$ ).

Heb 7:13

Belongeth to another tribe ( $\varphi \cup \lambda \eta \varsigma \varepsilon \tau \varepsilon \rho \alpha \varsigma \mu \varepsilon \tau \varepsilon \sigma \chi \eta \kappa \varepsilon v$ ). See 2:14 for $\mu \varepsilon \tau \varepsilon \chi \omega$, perfect active indicative here. A different ( $\varepsilon \tau \varepsilon \rho \alpha \varsigma)$ tribe.

Hath given attendance at ( $\pi \rho \circ \sigma \varepsilon \sigma \chi \eta \kappa \varepsilon v$ ). Perfect active indicative (watch perfects in Hebrews, not "for" aorists) of $\pi \rho \circ \sigma \varepsilon \chi \omega$, old verb, here with either vouv (mind) or self ( $\varepsilon \alpha \cup \tau \circ v$ ) understood with dative case ( $\tau \omega \theta v \sigma \iota \alpha \sigma \tau \eta \rho \iota \omega$, the altar, for which word see Mt 5:23; Lu 1:11 ).

## Heb 7:14

It is evident ( $\pi \rho \circ \delta \eta \eta \lambda o v$ ). Old compound adjective ( $\pi \rho o, \delta \eta \lambda o \varsigma)$, openly manifest to all, in N.T. only here and $1 \mathrm{Ti} 5: 24 \mathrm{f}$.

Hath sprung ( $\alpha v \alpha \tau \varepsilon \tau \alpha \lambda \kappa \varepsilon v$ ). Perfect active indicative of $\alpha v \alpha \tau \varepsilon \lambda \lambda \omega$, old compound to rise up like the sun (Mt 5:45).

Heb 7:15
Yet more abundantly evident ( $\pi \varepsilon \rho \iota \sigma \sigma о \tau \varepsilon \rho \circ v \varepsilon \tau \kappa \alpha \tau \alpha \delta \eta \lambda o v$ ). Only N.T. instance of the old compound adjective $\kappa \alpha \tau \alpha \delta \eta \lambda$ os thoroughly clear with $\varepsilon \tau$ (still) added and the comparative $\pi \varepsilon \rho เ \sigma \sigma о \tau \varepsilon \rho \circ v$ (more abundantly) piling Ossa on Pelion like Php 1:23.

Likeness (oноьт $\eta \tau \alpha$ ). See 4:15, only N.T. examples. Cf. the verb in verse 3.
Ariseth another priest ( $\alpha v \iota \sigma \tau \alpha \tau \alpha$ เєрєv¢ $\varepsilon \tau \varepsilon \rho \circ \varsigma)$. As said in verse 11, now assumed in condition of first class.

Heb 7:16
 Levitical priests became so merely by birth.

Of an endless life ( $\zeta \omega \eta \varsigma \alpha \kappa \alpha \tau \alpha \lambda \nu \tau \sigma v$ ). Late compound (alpha privative and verbal adjective from кata $\lambda \omega \omega$, to dissolve, as in 2Co 4:1 ), indissoluble. Jesus as priest lives on forever. He is Life.

Heb 7:17
It is witnessed ( $\mu \alpha \rho \tau v \rho \varepsilon ו \tau \alpha$ ). Present passive indicative of $\mu \alpha \rho \tau v \rho \varepsilon \omega$. The author aptly quotes again Ps 110:4.

Heb 7:18
A disannulling ( $\alpha \theta \varepsilon \tau \eta \sigma เ \varsigma)$. Late word from $\alpha \theta \varepsilon \tau \varepsilon \omega$ (alpha privative and $\tau ı \theta \eta \mu$ ), to set aside ( Mr 6:26 ), in N.T. only here and 9:26. Common in the papyri in a legal sense of making void. Involved in $\mu \varepsilon \tau \alpha \theta \varepsilon \sigma \iota \varsigma$ (change in verse 12).

Foregoing ( $\pi \rho \circ \alpha \gamma o u \sigma \eta \varsigma)$. Present active participle of $\pi \rho \circ \alpha \gamma \omega$, to go before ( 1 Ti 1:18 ).

Because of its weakness ( $\delta \iota \alpha$ тo $\alpha v \tau \eta \varsigma ~ \alpha \sigma \theta \varepsilon v \varepsilon \varsigma)$. Neuter abstract adjective with article for quality as in verse 7 with $\delta \iota a$ and accusative case for reason.

Unprofitableness ( $\alpha v \omega \varphi \varepsilon \lambda \varepsilon \varsigma$ ). Old compound (alpha privative and $o \varphi \varepsilon \lambda o \varsigma$ ) useless, and neuter singular like $\alpha \sigma \theta \varepsilon v \varepsilon c$. In N.T. only here and Tit 3:9.

Heb 7:19

Made nothing perfect (ou $0 \varepsilon v \varepsilon \tau \varepsilon \lambda \varepsilon i \omega \sigma \varepsilon v$ ). Another parenthesis. First aorist active indicative of $\tau \varepsilon \lambda \varepsilon \iota \circ \omega$. See verse 11. And yet law is necessary.

A bringing in thereupon ( $\varepsilon \pi \varepsilon \mid \sigma \alpha \gamma \omega \gamma \eta)$. An old double compound ( $\varepsilon \pi$, additional, $\varepsilon \iota \sigma \alpha \omega\rceil \eta$, bringing in from $\varepsilon \iota \sigma \alpha \gamma \omega)$. Here only in N.T. Used by Josephus (Ant. XI. 6, 2) for the introduction of a new wife in place of the repudiated one.

Of a better hope (крєıттоvoৎ $\varepsilon \lambda \pi \iota \delta о \varsigma)$. This better hope ( $6: 18-20$ ) does bring us near to God ( $\varepsilon \gamma \gamma \downharpoonright \zeta \rho \mu \varepsilon v \tau \omega \theta \varepsilon \omega)$ as we come close to God's throne through Christ ( 4:16).

Heb 7:20
Without the taking of an oath ( $\chi \omega \rho \iota \varsigma о \rho \kappa \omega \mu о \sigma \iota \alpha)$ ) As in Ps 110:4.
Heb 7:21
Have been made ( $\varepsilon เ \sigma \iota v \gamma \varepsilon \gamma \circ v o \tau \varepsilon \varsigma)$. Periphrastic perfect active indicative of $\gamma \iota \nu \circ \mu \alpha$ (perfect active participle of $\gamma \iota \nu \circ \mu \alpha$ ) and then $\varepsilon ו \sigma \iota v$. The parenthesis runs from o $\mu \varepsilon v \gamma \alpha \rho$ (for they) to $\varepsilon \iota \varsigma ~ \tau o v ~ a \iota \omega v \alpha$ (for ever, end of verse 21).

But he with an oath (o $\delta \varepsilon \mu \varepsilon \tau \alpha$ орк $\omega \mu о \sigma \iota \alpha \varsigma)$. Positive statement in place of the negative one in verse 20.

Heb 7:22
By so much also (ката тобоито $\kappa \alpha$ ). Correlative demonstrative corresponding to $\kappa \alpha \theta^{\prime}$ ooov (the relative clause) in verse 20.

The surety ( $\varepsilon \gamma \gamma$ voc). Vulgate sponsor. Old word, here only in the N.T., adjective (one pledged, betrothed), from $\varepsilon \gamma \gamma \cup \eta$, a pledge, here used as substantive like $\varepsilon \gamma \gamma \cup \eta \tau \eta \varsigma$, one who gives a pledge or guarantee. There may be a play on the word $\varepsilon \gamma \gamma \iota \zeta \omega$ in verse 19. E $\gamma \gamma v a \omega$ is to give a pledge, $\varepsilon \gamma \gamma \operatorname{vil}_{1} \zeta \omega$, to put a pledge in the hollow of the hand. It is not clear whether the author means that Jesus is God's pledge to man, or man's to God, or both. He is both in fact, as the Mediator (o $\mu \varepsilon \sigma \iota \tau \eta \varsigma, 8: 6$ ) between God and man (Son of God and Son of man).

Heb 7:23
Many in number ( $\pi \lambda \varepsilon \iota o v \varepsilon \varsigma)$. Comparative predicate adjective, "more than one," in succession, not simultaneously.

Because they are hindered ( $\delta \iota \alpha$ тo $\kappa \omega \lambda \nu \varepsilon \sigma \theta \alpha$ ). Articular infinitive (present passive) with $\delta \iota \alpha$ and the accusative case, "because of the being hindered."

By death ( $\begin{aligned} & \text { avat } \omega \text { ). Instrumental case. }\end{aligned}$
From continuing ( $\pi \alpha \rho \alpha \mu \varepsilon v \varepsilon ı v$ ). Present active infinitive of the compound (remain beside) as in Php 1:25 and in the ablative case.

Heb 7:24
Because he abideth ( $\delta \iota \alpha$ тo $\mu \varepsilon v \varepsilon เ v ~ a v \tau o v$ ). Same idiom as in verse 23 , "because of the abiding as to him" (accusative of general reference, autov).

Unchangeable ( $\alpha \pi \alpha \rho \alpha \beta \alpha \tau o v$ ). Predicate adjective in the accusative (feminine of compound adjective like masculine), late double compound verbal adjective in Plutarch and papyri, from alpha privative and $\pi \alpha \rho \alpha \beta \alpha \iota v \omega$, valid or inviolate. The same idea in verse 3.

God placed Christ in this priesthood and no one else can step into it. See verse 11 for เ $\rho \omega \sigma$ оvๆ.

Heb 7:25
Wherefore ( $\mathrm{o} \theta \varepsilon v$ ). Since he alone holds this priesthood.
To the uttermost ( $\varepsilon \iota \varsigma \tau 0 \pi \alpha v \tau \varepsilon \lambda \varepsilon \varsigma)$. Old idiom, in N.T. only here and Lu 13:10. Vulgate renders it in perpetuum (temporal idea) or like пavtote. This is possible, but the common meaning is completely, utterly.

Draw near ( $\pi \rho о \sigma \varepsilon \rho \chi о \mu \varepsilon v o v \varsigma)$. Present middle participle of $\pi \rho о \sigma \varepsilon \rho \chi \circ \mu \alpha$, the verb used in 4:16 which see.

To make intercession ( $\varepsilon เ \varsigma ~ \tau o ~ \varepsilon v \tau v \gamma \chi \propto v \varepsilon เ v)$. Purpose clause with $\varepsilon \varsigma \varsigma$ and the articular present active infinitive of $\varepsilon v \tau v \gamma \chi \propto \nu \omega$ for which verb see Ro 8:34. "His intercession has red blood in it, unlike Philo's conception" (Moffatt).

Heb 7:26
Became us ( $\eta \mu \nu \varepsilon \pi \rho \varepsilon \pi \varepsilon v$ ). Imperfect active indicative of $\pi \rho \varepsilon \pi \epsilon \omega$ as in $2: 10$, only there it was applied to God while here to us. "Such" (тооотоऽ) refers to the Melchizedek character of Jesus as high priest and in particular to his power to help and save (2:17f.) as just explained in 7:24f. Moffatt notes that "it is generally misleading to parse a rhapsody" but the adjectives that follow picture in outline the qualities of the high priest needed by us.

Holy (ođıo؟). Saintly, pious, as already noted. Cf. Ac 2:24; 13:35.
Guileless ( $\alpha к \alpha к о \varsigma) . ~ W i t h o u t ~ m a l i c e, ~ i n n o c e n t . ~ I n ~ N . T . ~ o n l y ~ h e r e ~ a n d ~ R o ~ 16: 18 ~ . ~$
Undefiled ( $\alpha \mu \alpha \nu \tau o \varsigma)$. Untainted, stainless. In the papyri. Not merely ritual purity (Le 21:10-15 ), but real ethical cleanness.

Separated from sinners ( $\kappa \varepsilon \chi \omega \rho \iota \sigma \mu \varepsilon v o \varsigma ~ \alpha \pi о ~ \tau \omega v ~ \alpha \mu \alpha \rho \tau \omega \lambda \omega v$ ). Perfect passive participle. Probably referring to Christ's exaltation (9:28).

Made higher than the heavens ( $v \psi \eta \lambda о \tau \varepsilon \rho \circ \varsigma \tau \omega v$ о $\rho \rho \alpha \nu \omega v \gamma \varepsilon v \circ \mu \varepsilon v o \varsigma)$. "Having become higher than the heavens." Ablative case (oupavov) after the comparative adjective (ичๆ入отврос).

Heb 7:27
First ( $\pi \rho \circ \tau \varepsilon \rho \circ v$ ). Regular adverb for comparison between two, though $\pi \rho \omega \tau 0 v$ often occurs also (Joh 1:41), with $\varepsilon \pi \varepsilon \iota \tau \alpha$ (then) following.

For the sins ( $\tau 0 v$ ). Only the article in the Greek with repetition of $v \pi \varepsilon \rho$ or of $\alpha \mu \alpha \rho \tau \tau \omega v$.
When he offered up himself ( $\varepsilon a v \tau o v ~ a v \varepsilon v \varepsilon \gamma к а \varsigma) . ~ F i r s t ~ a o r i s t ~ a c t i v e ~ p a r t i c i p l e ~ o f ~$ $\alpha v \alpha \varphi \varepsilon \rho \omega$, to offer up. See same idea in 9:14 where eavtov $\pi \rho о \sigma \eta \nu \varepsilon \gamma \kappa \varepsilon v$ is used. Old verb for sacrifice to place on the altar ( $1 \mathrm{Pe} 2: 5,24$ ).

Heb 7:28
After the law ( $\mu \varepsilon \tau \alpha$ тov vo $\mu \circ v$ ). As shown in verses 11-19, and with an oath (Ps 110:4 ).

Son (vorv). As in Ps 2:7; Heb 1:2 linked with Ps 110:4.

Perfected ( $\tau \varepsilon \tau \varepsilon \lambda \varepsilon เ \omega \mu \varepsilon \nu o v$ ). Perfect passive participle of $\tau \varepsilon \lambda \varepsilon \iota \circ \omega$. The process ( $2: 10$ ) was now complete. Imperfect and sinful as we are we demand a permanent high priest who is sinless and perfectly equipped by divine appointment and human experience ( $2: 17 \mathrm{f}$.; 5:1-10 ) to meet our needs, and with the perfect offering of himself as sacrifice.

## Hebrews 8

Heb 8:1
In the things which we are saying ( $\varepsilon \pi$ тоıя $\lambda \varepsilon \gamma$ онєvoı¢). Locative case of the articular present passive participle of $\lambda \varepsilon \gamma \omega$ after $\varepsilon \pi$ as in Lu 5:5; Heb 11:4, "in the matter of the things being discussed."

The chief point ( $\kappa \varepsilon \varphi \alpha \lambda \alpha \circ \vartheta$ ). Neuter singular of the adjective $\kappa \varepsilon \varphi \alpha \lambda \alpha \circ \varsigma ~(f r o m ~ \kappa \varepsilon \varphi a \lambda \eta$, head), belonging to the head. Vulgate capitulum, nominative absolute in old and common sense, the main matter (even so without the article as in Thucydides), "the pith" (Coverdale), common in the papyri as in Greek literature. The word also occurs in the sense of the sum total or a sum of money (Ac 22:28) as in Plutarch, Josephus, and also in the papyri (Moulton and Milligan's Vocabulary).

Such an high priest ( $\tau$ ooovtov $\alpha \rho \chi$ เع $\rho \varepsilon \alpha$ ). As the one described in chapters 4:16-7:28 and in particular 7:26 (totovтo؟) 7:27,28 . But the discussion of the priestly work of Jesus continues through 12:3. Totovtos is both retrospective and prospective. Here we have a summary of the five points of superiority of Jesus as high priest ( 8:1-6). He is himself a better priest than Aaron ( $\tau 0$ oovtoc in 8:1 such as shown in 4:16-7:28); he works in a better sanctuary ( $8: 2,5$ ); he offers a better sacrifice ( $8: 3$ f. ); he is mediator of a better covenant ( 8:6); his work rests on better promises ( 8:6); hence he has obtained a better ministry as a whole ( 8:6). In this resume ( $\kappa \varepsilon \varphi \varepsilon \lambda \alpha \circ \sim$ ) the author gives the pith ( $\kappa \varepsilon \varphi \alpha \lambda \alpha \circ \sim$ ) of his argument, curiously enough with both senses of $\kappa \varepsilon \varphi a \lambda \alpha \iota v$ (pith, summary) pertinent. He will discuss the four points remaining thus: (1) the better covenant, 8:7-13. (2) The better sanctuary, 9:1-12. (3) The better sacrifice, 9:13-10:18. (4) The better promises, 10:19-12:3. One point (the better high priest, like Melchizedek) has already been discussed ( 4:16-7:28).

Sat down (£каӨเซєv). Repetition of 1:3 with tov $\theta$ povov (the throne) added. This phrase prepares the way for the next point.

Heb 8:2
Minister ( $\lambda \varepsilon$ عitoupyoc). See on Ro 13:6; Php 2:25.
Of the sanctuary ( $\tau \omega \vee \alpha \gamma \omega \omega$ ). "Of the holy places" ( $\tau \alpha \alpha \gamma \omega$ ), without any distinction (like 9:8f.; 10:19; $13: 11$ ) between the holy place and the most holy place as in $9: 2 \mathrm{f}$.

Of the true tabernacle ( $\tau \eta \varsigma \sigma \kappa \eta \nu \eta \varsigma \tau \eta \varsigma \alpha \lambda \eta \theta \iota \nu \eta \varsigma$ ). By way of explanation of $\tau \omega \nu \alpha \gamma \omega \omega \nu$. For $\sigma \kappa \eta \nu \eta$ see Mt 17:4 and $\sigma \kappa \eta$ vos (2Co 5:1), old word used here for the antitype or archetype of the tabernacle in the wilderness in which Aaron served, the ideal tabernacle in heaven of which the earthly tabernacle was a symbol and reproduced in the temple which merely copied the tabernacle. Hence it is the "genuine" tabernacle and see Joh 1:9 for $\alpha \lambda \eta \theta$ tvos.

Pitched ( $\varepsilon \pi \eta \xi \varepsilon v$ ). First aorist active indicative of $\pi \eta \gamma v v \mu$, old verb to fasten as the pegs of a tent, here only in the N.T. Cf. Nu 24:6 .

Heb 8:3

Is appointed ( $\kappa \alpha \theta \iota \sigma \tau \alpha \tau \alpha)$. As in 5:1.
To offer ( $\varepsilon \iota \varsigma \tau о \pi \rho о \sigma \varphi \varepsilon \rho \varepsilon \iota v$ ). Articular infinitive accusative case with $\varepsilon \iota \varsigma$ as is common while $\imath v \alpha \pi \rho \circ \sigma \varphi \varepsilon \rho \eta$ ( $\imath \alpha \alpha$ with present active subjunctive) for purpose in $5: 1$, with $\delta \omega \rho \alpha \tau \varepsilon$ ка $\theta$ voııas as there.

It is necessary ( $\alpha v \alpha \gamma \kappa \alpha \iota \sigma$ ). A moral and logical necessity (from $\alpha v \alpha \gamma \kappa \eta$ necessity) as seen in Ac 13:46; Php 1:24.

This high priest also ( $\kappa \alpha$ тov $о v$ ). "This one also," no word for high priest, accusative of general reference with the infinitive $\varepsilon \chi \varepsilon เ v$ (have).

Somewhat to offer ( $\tau \omega \pi \rho \sigma \sigma \varepsilon v \varepsilon \gamma \kappa \eta$ ). Second aorist active subjunctive of $\pi \rho \sigma \sigma \varphi \varepsilon \rho \omega$ (verse 3). Vulgate aliquid quod offerat. The use of the subjunctive in this relative clause is probably volitive as in Ac 21:16; Heb 12:28 (possibly here merely futuristic), but note o $\pi \rho о \sigma \varphi \varepsilon \rho \varepsilon$ (present indicative) in 9:7. See Robertson, Grammar, p. 955.

Heb 8:4
On earth ( $\varepsilon \pi \gamma \eta \varsigma$ ). As opposed to $\varepsilon \nu \tau$ тoıs oupavoıs (verse 1). Condition of second class, determined as unfulfilled.

He would not be a priest at all (ov $\left.\delta^{\prime} \alpha \nu \eta \nu \tau \varepsilon \varepsilon v \varsigma\right)$. "Not even would he be a priest." Conclusion of second class condition with $\alpha \nu$ and imperfect indicative $(\eta \nu)$.

Seeing there are those ( $o v \tau \omega \nu \tau \omega v$ ). Genitive absolute with $o v \tau \omega \nu$ (from $\varepsilon \iota \mu$ ) and the articular present active participle of $\pi \rho \circ \sigma \varphi \varepsilon \rho \omega$ (verse 3). Jesus was not of the tribe of Levi and so could not serve here.

Heb 8:5
Serve ( $\lambda \alpha \tau \rho \varepsilon v o v \sigma เ v)$. Present active indicative of $\lambda \alpha \tau \rho \varepsilon v \omega$ for which verb see on Mt 4:10.

A copy ( $v \pi o \delta \varepsilon \iota \gamma \mu \alpha \tau$ ). Dative case after $\lambda \alpha \tau \rho \varepsilon v o v \sigma \iota v$. See already on Joh 13:15; Heb 4:11 for this interesting word.

Shadow ( $\sigma \kappa ı \alpha$ ). Dative case. Old word for which see already Mt 4:16; Mr 4:32; Col 2:17 . See same idea in Heb 9:23. For difference between $\sigma \kappa ı \alpha$ and $\varepsilon ו \kappa \omega \nu$ see 10:1. Here "copy and shadow" form a practical hendiadys for "a shadowy out- line" (Moffatt).

Is warned of God ( $\kappa \varepsilon \chi \rho \eta \mu \alpha \tau \iota \sigma \tau \alpha)$. Perfect passive indicative of $\chi \rho \eta \mu \alpha \tau \iota \zeta \omega$, old verb (from $\chi \rho \eta \mu \alpha$, business) for which see on Mt 2:12,22; Lu 2:26. The word "God" is not used, but it is implied as in Ac 10:22; Heb 12:25. So in LXX, Josephus, and the papyri.

For saith he ( $\gamma \alpha \rho \varphi \eta \sigma$ ). Argument from God's command (Ex 25:40).
See that thou make (Нора тоıךбєıৎ). Common Greek idiom with present active imperative of $o \rho \alpha \omega$ and the volitive future of $\pi o \iota \varepsilon \omega$ without $\imath \alpha$ (asyndeton, Robertson, Grammar, p. 949).

The pattern ( $\tau 0 v \tau v \pi \circ v$ ). The very word used in Ex 25:40 and quoted also by Stephen in Ac 7:44. For $\tau \cup \pi$ oৎ see already Joh 20:25; Ro 6:17, etc. The tabernacle was to be patterned after the heavenly model.

Heb 8:6
But now ( $v v v \delta \varepsilon$ ). Logical use of $v v v$, as the case now stands, with Jesus as high priest in heaven.

Hath he obtained ( $\tau \varepsilon \tau v \chi \varepsilon v$ ). Perfect active indicative of $\tau v \gamma \chi \alpha \nu \omega$ with the genitive, a rare and late form for $\tau \varepsilon \tau \varepsilon v \chi \varepsilon v$ (also $\tau \varepsilon \tau \varepsilon v \chi \eta \kappa \varepsilon v$ ), old verb to hit the mark, to attain.

A ministry the more excellent ( $\delta \iota \alpha \varphi \circ \rho \omega \tau \varepsilon \rho a \varsigma \lambda \varepsilon \iota \tau о \cup \rho \gamma \vdash \varsigma)$ ). "A more excellent ministry." For the comparative of $\delta \iota \alpha \varphi о \rho о \varsigma$ see 1:4. This remark applies to all the five points of superiority over the Levitical priesthood.

By how much ( $o \sigma \omega$ ). Instrumental case of the relative oooc between two comparative adjectives as in 1:4.

The mediator ( $\mu \varepsilon \sigma \iota \tau \eta)$ ). Late word from $\mu \varepsilon \sigma \circ \varsigma$ (amid) and so a middle man (arbitrator). Already in Ga 3:19f. and see 1Ti 2:5. See Heb 9:15; 12:24 for further use with $\delta \iota \alpha \theta \eta \kappa \eta$.
 ). For $\delta \iota a \forall \uparrow \uparrow \eta$ see Mt 26:28; Lu 1:72; Ga 3:17 , etc. This idea he will discuss in 8:7-13.

Hath been enacted ( $v \varepsilon v o \mu \circ \theta \varepsilon \tau \eta \tau \alpha)$. Perfect passive indicative of $v o \mu \circ \theta \varepsilon \tau \varepsilon \omega$ as in $7: 11$ which see.

Upon better promises ( $\varepsilon \pi \kappa \rho \varepsilon \iota \tau \tau 0 \sigma \iota \nu \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda ı \alpha ı \varsigma)$. Upon the basis of ( $\varepsilon \pi$ ). But how "better" if the earlier were also from God? This idea, alluded to in 6:12-17, Will be developed in 10:19-12:3 with great passion and power. Thus it is seen that "better" ( $\kappa \rho \varepsilon \sigma \sigma \sigma \omega)$ is the keynote of the Epistle. At every point Christianity is better than Judaism.

Heb 8:7
That first covenant ( $\eta \pi \rho \omega \tau \eta$ عкєเv ). The word $\delta \iota \alpha \theta \eta \kappa \eta$ (covenant) is not expressed, but clearly meant by the feminine gender $\pi \rho \omega \tau \eta$.

Faultless ( $\alpha \mu \varepsilon \mu \pi \tau o \varsigma)$. Old compound adjective for which see Lu 1:6; Php 2:15. The condition is second class and assumes that the old covenant was not "blameless," apparently a serious charge which he hastens to explain.

For a second ( $\delta \varepsilon v \tau \varepsilon \rho a \varsigma)$. Objective genitive with $\delta \iota \alpha \theta \eta \kappa \eta \varsigma$ understood. The conclusion with $\alpha v$ and the imperfect passive indicative ( $\varepsilon \zeta \eta \tau \varepsilon \iota \tau 0)$ is clearly a second-class condition. See a like argument in 7:11.

Heb 8:8
Finding fault with them ( $\mu \varepsilon \mu \varphi о \mu \varepsilon \nu о \varsigma \alpha v \tau о v \varsigma)$. Present middle participle of $\mu \varepsilon \mu \varphi о \mu \alpha$ (cf. $\alpha \mu \varepsilon \mu \pi \tau \circ \varsigma)$, old verb, in N.T. only here and Ro 9:19. The covenant was all right, but the Jews failed to keep it. Hence God made a new one of grace in place of law. Why do marriage covenants so often fail to hold? The author quotes in verses 8-12; Jer 38:31-34 (in LXX 31:3134 ) in full which calls for little explanation or application to prove his point (verse 13).

I will make ( $\sigma v v \tau \varepsilon \lambda \varepsilon \sigma \omega$ ). Future active of $\sigma v v \tau \varepsilon \lambda \varepsilon \omega$, old compound verb to accomplish as in Mr 13:4; Ro 9:28 .

A new covenant ( $\delta \iota \alpha \theta \eta \kappa \eta \nu \kappa \alpha ı \nu \eta v$ ). In 12:24 we have $\delta \iota \alpha \theta \eta \kappa \eta \varsigma \nu \varepsilon \alpha \varsigma$, but каıvŋऽ in 1Co 11:25. Kaıvos is fresh, on new lines as opposed to the old ( $\pi \alpha \lambda \alpha \iota \circ \varsigma)$ as in 2Co 3:6,14; veos is young or not yet old.

Heb 8:9
In the day that I took them ( $\varepsilon v \eta \mu \varepsilon \rho \alpha \varepsilon \pi i \lambda \alpha \beta o \mu \varepsilon v o v \mu o v$ ). Genitive absolute ( $\mu \circ v$ and second aorist middle participle of $\varepsilon \pi \lambda \lambda \alpha \mu \beta a v \omega)$, "a Hellenistic innovation" (Moffatt) in imitation of the Hebrew after $\eta \mu \varepsilon \rho \alpha$ in place of $\varepsilon v \eta \varepsilon \pi \varepsilon \lambda \alpha \beta o \mu \varepsilon v$, occurring also in Barn. 2:28.

By the hand ( ( $\eta \varsigma \chi \varepsilon\llcorner\rho \circ \varsigma)$. Technical use of the genitive of the part affected.
To lead them forth ( $\varepsilon \xi \alpha \gamma \alpha \gamma \varepsilon เ v$ autouc). Second aorist active infinitive of $\varepsilon \xi \alpha \gamma \omega$ to denote purpose.

For they continued not (o $о \cup \tau 0$ оик $\varepsilon v \varepsilon \mu \varepsilon เ v a v$ ). First aorist active indicative of $\varepsilon \mu \mu \varepsilon \nu \omega$, old verb to remain in (Ac 14:22). The Israelites broke the covenant. Then God annulled it.

I regarded not ( $\eta \mu \varepsilon \lambda \eta \sigma \alpha$ ). "I neglected" as in 2:3. The covenant was void when they broke it.

Heb 8:10
This ( $\alpha \cup \tau \eta$ ). The "new" one of verse 8.
That I will make ( $\eta \nu \delta \iota \alpha \theta \eta \sigma o \mu \alpha)$. Future middle of $\delta \iota \alpha \tau \iota \theta \eta \mu$, "that I will covenant," cognate accusative ( $\eta v$ ), using the same root in the verb as in $\delta \iota \alpha \theta \eta \kappa \eta$.

I will put ( $\delta \iota \delta o v \varsigma)$. "Giving," present active participle of $\delta \iota \delta \omega \mu$, to give.
Into their mind ( $\varepsilon \varsigma \varsigma \tau \eta \nu \delta \iota \alpha 0 ı \alpha v \alpha \nu \tau \omega v$ ). Their intellect, their moral understanding, all the intellect as in Aristotle (Col 1:21; Eph 4:18 ).

On their heart ( $\varepsilon \pi \kappa \alpha \rho \delta \iota \alpha \varsigma \alpha v \tau \omega v$ ). Either genitive singular or accusative plural. Kap $\delta \iota \alpha$ is the seat of man's personal life (Westcott), the two terms covering the whole of man's inward nature.

A god ( $\varepsilon \varsigma \varsigma \varepsilon \varepsilon o v$ ). Note the Hebraistic use of $\varepsilon \iota \varsigma$ in the predicate instead of the usual nominative $\theta \varepsilon o \varsigma$ as in "a people" ( $\varepsilon \iota \varsigma \lambda \alpha o v$ ). This was the ideal of the old covenant (Ex 6:7 ), now at last to be a fact.

Heb 8:11
They shall not teach ( $o v \mu \eta \delta \iota \delta \xi \xi \omega \sigma \tau v$ ). Strong double negative ( $o v \mu \eta$ ) with the first aorist active (futuristic) subjunctive of $\delta \iota \delta \alpha \sigma \kappa \omega$.

His fellow-citizen ( $\tau 0 v \pi 0 \lambda ı \tau \eta v$ avtov). See Lu 15:15; 19:14.
Know the Lord ( $\Gamma \nu \omega \theta$ tov $\kappa v \rho \circ \circ v$ ). Second aorist active imperative of $\gamma \iota v \omega \sigma \kappa \omega$. In the new covenant all will be taught of God (Isa 54:13; Joh 6:45), whereas under the old only the educated scribe could understand the minutiae of the law (Dods). See Paul's comparison in 2Co 3:7-18 .

Shall know ( $\varepsilon \iota \delta \eta \sigma o v \sigma ı v)$. Future perfect active, old form of oi $\delta \alpha$ (note $\gamma \iota \nu \omega \sigma \kappa \omega$ just before of recognizing God), one of the rare future perfects (cf. 2:13, $\varepsilon \sigma \circ \mu \alpha \pi \varepsilon \pi \circ \circ \theta \omega \varsigma$ ).

Heb 8:12

Merciful ( $\lambda \lambda \varepsilon \omega \varsigma)$. Old Attic adjective for $\iota \lambda \alpha 0 \varsigma$, common in the LXX, only here in N.T., from which $1 \lambda \alpha \sigma \kappa о \mu \alpha$ comes ( Lu 18:13).

Will I remember no more ( $o v \mu \eta \mu \nu \eta \sigma \theta \omega \varepsilon \tau$ ). Double negative ov $\mu \eta$ with first aorist passive subjunctive (volitive) of $\mu \mu \nu \eta \sigma \kappa \omega$, to recall.

Heb 8:13
In that he saith ( $\varepsilon v \tau \omega \lambda \varepsilon \gamma \varepsilon เ v$ ). Locative case of the articular present active infinitive of $\lambda \varepsilon \gamma \omega$, "in the saying as to him."

He hath made the first old ( $\pi \varepsilon \pi \alpha \lambda \alpha \omega \omega \kappa \varepsilon \nu \tau \eta \nu \pi \rho \omega \tau \eta \nu$ ). Perfect active indicative of $\pi \alpha \lambda \alpha \circ \omega$, old verb from $\pi \alpha \lambda \alpha \ldots \varsigma$ (in contrast with kaıvoc, fresh, new), to treat as old and out of date. The conclusion is to the point.

That which is becoming old and waxeth aged ( $\tau о ~ \pi \alpha \lambda \alpha \iota v \mu \varepsilon v o v ~ к \alpha ~ \gamma \eta \rho a \sigma к о v) . ~$ $\lceil\eta \rho \alpha \sigma \kappa \omega$ is old verb from $\gamma \eta \rho \alpha \varsigma$ (age) like $\gamma \varepsilon \rho \omega v$ (old man) and refers to the decay of old age so that both ideas appear here in opposition to кaıvoc ( $\pi \alpha \lambda \alpha \iota \varsigma)$ and veoc ( $\gamma \varepsilon \rho \alpha \iota \rho$ ).

Is nigh unto vanishing away ( $\varepsilon \gamma \gamma \cup \varsigma \alpha \varphi \alpha v \iota \sigma \mu \circ v$ ). Genitive case with $\varepsilon \gamma \gamma v \varsigma$ and late word for disappearance (from $\alpha \varphi \alpha v \zeta \zeta \omega$, Mt 6:19 ), here only in the N.T. The author writes as if the Old Testament legal and ceremonial system were about to vanish before the new covenant of grace. If he wrote after A.D. 70 , would he not have written "has vanished away"?

## Hebrews 9

Heb 9:1
Even the first covenant ( $\kappa \alpha \eta \pi \rho \omega \tau \eta$ ). Ka (even) is doubtful. No word for covenant with $\pi \rho \omega \tau \varepsilon$ (cf. 8:7).

Had ( $\varepsilon<\chi \varepsilon$ ). Imperfect active, used to have.
Ordinances ( $\delta \iota \kappa \alpha \iota \omega \mu \alpha \tau \alpha$ ). Regulations (from $\delta \iota \kappa \alpha \iota \omega)$ as in Lu 1:6; Ro 5:16.
Of divine service ( $\lambda \alpha \tau \rho \varepsilon \iota \alpha)$. No word for "divine," though worship is meant as in Ro 9:4; Php 3:3. Genitive case.

And its sanctuary, a sanctuary of this world ( $\tau о \tau \varepsilon \alpha \gamma \iota v$ коб $\mu \kappa \sigma \nu$ ). Ву то $\alpha \gamma \iota v$ the author describes the whole sanctuary (Ex 36:3; Nu 3:38) like $\tau \omega \nu$ a $\gamma \omega \omega v$ in 8:2. Kоб $\mu$ ко $v$ is a late adjective (Aristotle, Plutarch) from $\kappa о \sigma \mu \circ \varsigma$, relating to this world, like $\varepsilon \pi \gamma \eta \varsigma$ (upon earth) of 8:4. It is in the predicate position, not attributive.

Heb 9:2
A tabernacle the first ( $\sigma \kappa \eta \nu \eta \eta \pi \rho \omega \tau \eta$ ). See 8:2 for $\sigma \kappa \eta \nu \eta$. Large tents usually had two divisions (the outer and the inner or the first and the second). Note $\pi \rho \omega \tau \eta$ for the first of two as with the first covenant $(8: 7,13 ; 9: 1)$. The large outer tent was entered first and was called Haүıa (Holy), the first division of the tabernacle. The two divisions are here termed two tabernacles.

Was prepared ( $\kappa \alpha \tau \varepsilon \sigma \kappa \varepsilon v \alpha \sigma \theta \eta)$. First aorist passive of $\kappa \alpha \tau \alpha \sigma \kappa \varepsilon v \alpha \zeta \omega$. See 3:3. For the furniture see Ex 25; 26 . Three items are named here: the candlestick ( $\eta \lambda v \chi \nu$, late word for $\lambda v \chi \nu เ o v$ ) or lampstand, necessary since there were no windows (Ex 25:31-39) ; the table ( $\eta \tau \rho \alpha \pi \varepsilon \zeta \alpha$, old word, Mt 15:27 ) for the bread (Ex 25:23-30; Le 24:6 of pure gold); the shewbread ( $\eta \pi \rho o \theta \varepsilon \sigma \iota \varsigma \tau \omega \nu \alpha \rho \tau \omega \nu$ ) as in Ex 25:30; 40:23; Le 24:5-9 . Probably a hendiadys for the table with the loaves of God's Presence.

Heb 9:3
After the second veil ( $\mu \varepsilon \tau \alpha$ то $\delta \varepsilon v \tau \varepsilon \rho о v$ кат $\alpha \pi \varepsilon \tau \alpha \sigma \mu \alpha$ ). The first veil opened from outside into the Holy Place, the second veil opened from the Holy Place into the Holy of Holies (Haүıа Haүı $\omega v$ ). The word каталєєаб $\mu \alpha$ is from $\kappa \alpha \tau \alpha \pi \varepsilon \tau \alpha \nu \nu v \mu$, to spread down, and we have already had it in 6:19. Cf. also Mt 27:51 .

Heb 9:4
Having a golden censer ( $\chi \rho v \sigma o v v \varepsilon \chi o v \sigma \alpha \theta v \mu \iota \alpha \tau \eta \rho เ \rho v$ ). The present active participle $\varepsilon \chi \circ v \sigma \alpha$ (feminine singular) agrees with $\sigma \kappa \eta \nu \eta$ (the Holy of Holies). It is not certain whether $\theta$ ицıatпpıov here means censer or altar of incense. In the LXX (2Ch 26:19; Ex 8:11; IV Macc. 7:11) it means censer and apparently so in the inscriptions and papyri. But in Philo and Josephus it means altar of incense for which the LXX has $\theta v \sigma ı \alpha \sigma \tau \eta \rho ь v ~ \tau o v ~ Ө v \mu ı \alpha \tau о \varsigma ~$ (Ex 30:1-10 ). Apparently the altar of incense was in the Holy Place, though in Ex 30:1-10
it is left quite vague. B puts it in verse 2 . So we leave the discrepancy unsettled. At any rate the altar of incense was used for the Holy of Holies ("its ritual associations," Dods).

The ark of the covenant ( $\tau \eta \nu \kappa \iota \beta \omega \tau \circ \nu \tau \eta \varsigma \delta \iota \alpha \theta \eta \kappa \eta \varsigma)$. A box or chest four feet long, two and a half broad and high (Ex 25:10f. ). The Scotch have a "meal-ark."

Wherein $(\varepsilon \nu \eta)$. In the ark. There were three treasures in the ark of the covenant (a pot of manna, Aaron's rod, the tables of the covenant). For the pot of manna (golden added in the LXX) see Ex 16:32-34 . For Aaron's rod that budded ( $\eta \beta \lambda \alpha \sigma \tau \eta \sigma \alpha \sigma \alpha$, first aorist active participle of $\beta \lambda \alpha \sigma \tau \alpha \nu \omega)$ see Nu 17:1-11. For the tables of the covenant see Ex 25:16f.; 31:18; De 9:9; 10:5. Not definitely clear about these items in the ark, but on front, except that 1 Ki 8:9 states that it did contain the tables of the covenant. For $\pi \lambda$ aкes (tables) see 2Co 3:3 (only other N.T. example).

Heb 9:5
Above it (v $\tau \varepsilon \rho \alpha v \omega \alpha \cup \tau \eta \varsigma)$. Up above, in local sense as in Eph 4:10, with ablative case $\alpha v \tau \eta \varsigma ~(i t, ~ t h e ~ a r k) . ~$

Cherubim of glory (Xєроиßєıv $\delta о \xi \eta \varsigma)$. Hebrew word (dual form), two in number, made of gold (Ex 25:18-22 ). They are called $\zeta \omega \alpha$ (living creatures) in the LXX (Isa 6:2f.; Eze 1:5-10; 10:5-20 ).

Overshadowing ( $\kappa \alpha \tau \alpha \sigma \kappa ı \alpha \zeta о \nu \tau \alpha)$. Present active participle of $\kappa \alpha \tau \alpha \sigma \kappa ı \alpha \zeta \omega$, old verb to shadow down on, cover with shade, only here in the N.T.

The mercy seat ( $\tau \circ \stackrel{\imath}{ } \alpha \sigma \tau \eta \rho \iota v$ ). The pinions of the Cherubim spread over the rectangular gold slab on top of the ark termed the mercy seat. Here the adjective $\imath \lambda \alpha \sigma \tau \eta \rho เ \varsigma$ has to mean mercy seat, the place, not the propitiatory gift or propitiation, as in Ro 3:25 (Deissmann, Bible Studies, pp. 124-35).

Severally (ката $\mu \varepsilon \rho о \varsigma) . ~ I n ~ d e t a i l, ~ d i s t r i b u t i v e ~ u s e ~ o f ~ к а \tau \alpha ~ w i t h ~ \mu \varepsilon \rho о \varsigma ~(p a r t) . ~$
Heb 9:6
These things having been thus prepared ( $\tau 0 v \tau \omega v$ ov $\omega \varsigma \kappa \alpha \tau \varepsilon \sigma \kappa \varepsilon v \alpha \sigma \mu \varepsilon v \omega v$ ). Genitive absolute with the perfect passive participle of катабкะvaऍ $\omega$ for which verb see verse 2 . A mere summary has been made of the furniture.

Go in ( $\varepsilon \iota \sigma \iota \sigma \sigma \iota)$. Present active indicative of $\varepsilon \iota \sigma \varepsilon \iota \mu$, to go in, old verb, in N.T. only here, Ac 3:3; 21:18,26 .

Accomplishing ( $\varepsilon \pi \iota \tau \varepsilon \lambda$ ouv $\tau \varepsilon \varsigma)$. Present active participle of $\varepsilon \pi \iota \tau \varepsilon \lambda \varepsilon \omega$ for which see 8:5.
Heb 9:7
Alone ( $\mu$ оvoৎ). Predicate adjective with o a $\rho \chi เ \varepsilon \rho \varepsilon \cup \varsigma$.
Once in the year ( $\alpha \pi \alpha \xi \tau 0 v \varepsilon v i \alpha v \tau o v$ ). Once for each year (not $\pi \sigma \tau \varepsilon$, at any time) with genitive of time.

Not without blood (ov $\chi \omega \rho \stackrel{\alpha}{ } \quad \boldsymbol{\mu} \alpha \tau \sigma$ ). According to Le 16:14f. Not even he could enter the second tent (Holy of Holies) without blood.

The errors of the people ( $\tau \omega v$ रov $\lambda \alpha o v ~ a \gamma v o \eta \mu \alpha \tau \omega \nu$ ). Late word from $\alpha \gamma v o \varepsilon \omega$, not to know ( $5: 2$ ), only here in the N.T., but in LXX, papyri, and inscriptions where a distinction is drawn between errors ( $\alpha \gamma v o \eta \mu \alpha \tau \alpha$ ) and crimes ( $\alpha \rho \mu \alpha \rho \tau \eta \mu \alpha \tau \alpha$ ). In Ge 43:12 $\alpha \gamma v o \eta \mu \alpha$ is "an oversight." But these sins of ignorance ( $\alpha \gamma v o \eta \mu \alpha \tau \alpha$ ) were sins and called for atonement. See Heb 10:26 for wilful sinning.

Heb 9:8
 absolute with present active participle of $\delta \eta \lambda o \omega$, to make plain. Used as in 12:27.

The way into the Holy place ( $\tau \eta \nu \tau \omega \nu \alpha \gamma \omega \omega \nu$ o $\delta o v$ ). Here as in verses $12,25 \tau \omega \nu \alpha \gamma \omega \nu$ is used for the very Presence of God as in 8:2 and is in the objective genitive. Hoסov is the accusative of general reference with the infinitive.

Hath not yet been made manifest ( $\mu \eta \pi \omega \pi \varepsilon \varphi \alpha \nu \varepsilon \rho \omega \sigma \theta \alpha$ ). Perfect passive infinitive of $\varphi a v \varepsilon \rho \circ \omega$, to make plain ( $\varphi \alpha v \varepsilon \rho \circ \varsigma$ ) in indirect discourse after $\delta \eta \lambda$ ouvtos with negative $\mu \eta \pi \omega$.

While as the first tabernacle is yet standing ( $\varepsilon \tau \tau \eta \varsigma \pi \rho \omega \tau \eta \varsigma \sigma \kappa \eta \nu \eta \varsigma \varepsilon \chi \circ \cup \sigma \eta \varsigma \sigma \tau \alpha \sigma \iota \nu)$. Another genitive absolute with present active participle of $\varepsilon \chi \omega$ (having standing $\sigma \tau \alpha \sigma เ v$ ), "the first tabernacle still having a place." The veil at the entrance kept the people out of the first tent as the second veil (verse 3) kept the priests out of the Holy of Holies (the very Presence of God).

Heb 9:9
Which ( $\eta \tau \iota \varsigma)$. "Which very thing," the first tent ( $\tau \eta \varsigma \pi \rho \omega \tau \eta \varsigma \sigma \kappa \eta \nu \eta \varsigma$, division of the tabernacle), a parenthesis and explanation.

A parable ( $\pi \alpha \rho \alpha \beta 0 \lambda \eta$ ). Only in the Synoptic Gospels in the N.T. and Heb 9:9; 11:19. See on Mt 13:3 for the word (from $\pi \alpha \rho \alpha \beta \alpha \lambda \lambda \omega$, to place alongside). Here like $\tau v \pi о \varsigma$ (type or shadow of "the heavenly reality," Moffatt).

For the time now present ( $\varepsilon \varsigma \varsigma ~ \tau о \nu ~ к а ı \rho о \nu ~ \tau о v ~ \varepsilon ข \varepsilon \sigma \tau \eta к о т \alpha) . ~ " F o r ~ t h e ~ p r e s e n t ~ c r i s i s ~ " ~$ (kalpov, not al $\omega v \alpha$, age, not $\chi \rho \circ \vee o v$, time). Perfect active articular (repeated article) participle of $\varepsilon v / \sigma \tau \eta \mu$ (intransitive), the age in which they lived, not the past, not the future. See 1Co 3:22; Ro 8:38 for contrast between $\varepsilon v \varepsilon \sigma \tau \omega \tau \alpha$ and $\mu \varepsilon \lambda \lambda$ ov $\tau \alpha$. This age of crisis, foreshadowed by the old tabernacle, pointed on to the richer fulfilment still to come.

According to which ( $\kappa \alpha \theta^{\prime} \eta v$ ). Here the relative refers to $\pi \alpha \rho \alpha \beta \circ \lambda \eta$ just mentioned, not to $\sigma \kappa \eta \nu \eta \varsigma$. See 5:1; 8:3.
 2:15. This was the real failure of animal sacrifice ( 10:1-4).

Make the worshipper perfect ( $\tau \varepsilon \lambda \varepsilon \epsilon \omega \sigma \alpha$ $\tau \circ \nu \lambda \alpha \tau \rho \varepsilon v o v \tau \alpha$ ). First aorist active infinitive ( $2: 10$ ). At best it was only ritual or ceremonial purification ( 7:11), that called for endless repetition ( 10:1-4).

Heb 9:10

Only with meats and drinks and divers washings ( $\mu \circ \nu \circ \nu \varepsilon \pi \beta \rho \omega \mu \alpha \sigma \iota \nu \kappa \alpha \pi о \mu \alpha \sigma \iota \nu \kappa \alpha$ $\delta ı \alpha \varphi о \rho о \iota \varsigma \beta \alpha \pi \tau \iota \sigma$ оья). The parenthesis of the Revised Version here is unnecessary. The use of $\varepsilon \pi$ here with the locative case is regular, "in the matter of" (Lu 12:52; Joh 12:16; Ac 21:24 ). What ritual value these Levitical sacrifices had was confined to minute regulations about diet and ceremonial cleansing (clean and unclean). For "divers" ( $\delta \iota \alpha \varphi \rho \rho o \iota \varsigma$, late adjective, in N.T. only in Heb 1:4; 8:6; 9:10; Ro 12:6 ) say "different" or "various." Batтıб is, of course, the Jewish ceremonial immersions (cf. Mr 7:4; Ex 29:4; Le 11:25,28f.; Nu 8:7; $\operatorname{Re} 6: 2$ ).

Carnal ordinances ( $\delta \iota \kappa \alpha \omega \mu \alpha \sigma \iota v \sigma \alpha \rho \kappa \varsigma)$. But the correct text is undoubtedly simply $\delta \iota \kappa \alpha \iota \omega \mu \alpha \tau \alpha \sigma \alpha \rho \kappa о \varsigma$ (nominative case), in apposition with $\delta \omega \rho \alpha \tau \varepsilon \kappa \alpha \theta v \sigma \iota \alpha$ (gifts and sacrifices). See 9:1 for $\delta ı \kappa \alpha เ \omega \mu \alpha \tau \alpha$.

Imposed ( $\varepsilon \pi \iota \kappa \varepsilon \iota \mu \varepsilon v \alpha$ ). Present middle or passive participle of $\varepsilon \pi \iota \kappa \varepsilon \mu \alpha$, old verb to lie upon (be laid upon). Cf. 1Co 9:16.

Until a time of reformation ( $\mu \varepsilon \chi \rho$ каı $\rho о v \delta \iota \rho \theta \omega \sigma \varepsilon \omega \varsigma)$. Definite statement of the temporary nature of the Levitical system already stated in 7:10-17; 8:13 and argued clearly by Paul in Ga 3:15-22 . $\Delta$ ıo $\theta \omega \omega$ ๘ь is a late word, here alone in N.T. (from $\delta$ to $\rho \theta o \omega$, to set right or straight), used by Hippocrates for making straight misshapen limbs like avo $\omega$ Oo $\omega$ in Heb 12:12. Here for reformation like $\delta \iota \rho \theta \omega \mu \alpha$ (reform) in Ac 24:2f. Christianity itself is the great Reformation of the current Judaism (Pharisaism) and the spiritual Judaism foreshadowed by the old Abrahamic promise (see Ga 3; Ro 9 ).

Heb 9:11
Having come ( $\pi \alpha \rho \alpha \gamma \varepsilon \nu о \mu \varepsilon \nu о \varsigma)$. Second aorist middle participle of $\pi \alpha \rho \alpha \gamma \iota \nu o \mu \alpha$. This is the great historic event that is the crux of history. "Christ came on the scene, and all was changed" (Moffatt).

Of the good things to come ( $\tau \omega \nu \mu \varepsilon \lambda \lambda o v \tau \omega \nu \alpha \gamma \alpha \theta \omega \nu$ ). But B D read $\gamma \varepsilon \nu o \mu \varepsilon \nu \omega \nu$ (that are come). It is a nice question which is the true text. Both aspects are true, for Christ is High Priest of good things that have already come as well as of the glorious future of hope. Westcott prefers $\gamma \varepsilon v o \mu \varepsilon \nu \omega \nu$, Moffatt $\mu \varepsilon \lambda \lambda o v \tau \omega \nu$.

Through the greater and more perfect tabernacle ( $\delta \iota \alpha \tau \eta \varsigma \mu \varepsilon \iota \zeta о \nu \circ \varsigma \kappa \alpha \tau \varepsilon \lambda \varepsilon \iota \tau \varepsilon \rho \alpha \varsigma$, $\sigma \kappa \eta \sim \eta \varsigma)$. Probably the instrumental use of $\delta \iota \alpha$ (2Co 2:4; Ro 2:27; 14:20) as accompaniment, not the local idea $(4: 14 ; 10: 20)$. Christ as High Priest employed in his work the heavenly tabernacle ( 8:2) after which the earthly was patterned (9:24).

Not made with hands (ov $\chi \varepsilon \iota \rho o \pi o ı \eta \tau o v)$. Old compound verbal for which see Mr 14:58; Ac 7:48; 17:24. Cf. Heb 8:2. Here in the predicate position.

Not of this creation (ov $\tau \alpha \cup \tau \eta \varsigma \tau \eta \varsigma \kappa \tau \iota \sigma \varepsilon \omega \varsigma$ ). Explanation of ov $\chi \iota \varepsilon \rho о \pi о \iota \eta \tau 0 v$. For ктıбıऽ see 2Co 5:17; Ro 8:19. For the idea see 2Co 4:18; Heb 8:2. This greater and more perfect tabernacle is heaven itself (9:24).

Heb 9:12

Through his own blood（ $\delta \iota \alpha$ tov $\delta \iota \circ v$ aı $\mu \alpha \tau \bigcirc)$ ）．This is the great distinction between Christ as High Priest and all other high priests．They offer blood（verse 7），but he offered his own blood．He is both victim and High Priest．See the same phrase in 13：12；Ac 20：28 ．

Once for all（ $\varepsilon \varphi \alpha \pi \alpha \xi$ ）．In contrast to the repeated（annual）entrances of the Levitical high priests（ 9：7）．

Into the holy place（ $\varepsilon ı \varsigma ~ \tau \alpha ~ \alpha \gamma ı$ ）．Here，as in verses 8,24 heaven itself．
Having obtained（ $\varepsilon v \rho \alpha \mu \varepsilon v o \varsigma)$ ．First aorist middle（indirect）participle of $\varepsilon v \rho \iota \sigma \kappa \omega$ ， simultaneous action with $\varepsilon \iota \sigma \eta \lambda \theta \varepsilon v$ ，and by or of himself＂as the issue of personal labour directed to this end＂（Westcott）．The value of Christ＇s offering consists in the fact that he is the Son of God as well as the Son of man，that he is sinless and so a perfect sacrifice with no need of an offering for himself，and that it is voluntary on his part（Joh 10：17）．Nut $\rho \omega \sigma$ ィя （from $\lambda \nu \tau \rho o \omega$ ）is a late word for the act of ransoming（cf．$\lambda \nu \tau \rho o v$ ，ransom），in O．T．only here and Lu 1：68；2：38．But $\alpha \pi$ одит $\rho \omega \sigma ı$ elsewhere（as in Lu 21：28；Ro 3：24；Heb 9：15；11：35 ）．For＂eternal＂（aı $\omega v \iota \alpha v$ ，here feminine form）see 6：2．The author now turns to discuss the better sacrifice（ 9：13－10：18）already introduced．

Heb 9：13
Ashes（ $\sigma \pi$ тобoৎ）．Old word，in N．T．only here，Mt 11：21；Lu 10：13．Common in LXX．
Of a heifer（ $\delta \alpha \mu \alpha \lambda \varepsilon \omega \varsigma)$ ．Old word（ $\delta \alpha \mu \alpha \lambda \iota \varsigma)$ ，a red heifer whose ashes mingled with water（ $\mu \varepsilon \tau \alpha$ v $\delta \alpha \tau о \varsigma$ ，verse 19）were sprinkled（ $\rho a v \tau \iota \zeta o v \sigma \alpha$ ，present active participle of pavtı亡 $\omega$ ，in LXX，though paıv more common）on the contaminated or defiled ones $(\mathrm{Nu}$ 19 ）as the blood of bulls and goats was offered for sins（Le 16 ）．

Sanctify（ $\alpha \gamma \mid \omega \zeta \varepsilon$ ）．First－class condition，assumed as true．This ceremonial ritual does serve＂for the cleansing（ $\kappa \alpha$ 人 $\rho о \tau \eta \tau \alpha$ ，old word here only in N．T．）of the flesh，＂but not for the conscience（verse 9）．The cow was $\alpha \mu \omega \mu$ ov，the individual каӨa $\rho \circ \varsigma$ ．

Heb 9：14
How much more（ $\pi 0 \sigma \omega \mu \alpha \lambda \lambda o v$ ）．Instrumental case，＂by how much more，＂by the measure of the superiority of Christ＇s blood to that of goats and bulls and the ashes of a heifer．

Through the eternal Spirit（ $\delta \iota \alpha \pi v \varepsilon \nu \mu \alpha \tau o \varsigma ~ \alpha \omega \nu v o v$ ）．Not the Holy Spirit，but Christ＇s own spirit which is eternal as he is．There is thus a moral quality in the blood of Christ not in that of other sacrifices．

Offered himself（ $\varepsilon a v \tau o v \pi \rho о \sigma \eta \nu \varepsilon \gamma \kappa \varepsilon v$ ）．Second aorist active indicative of $\pi \rho \circ \sigma \varphi \varepsilon \rho \omega$ （used so often as in $5: 1,3 ; 8: 3$ ）．The voluntary character of Christ＇s death is again emphasized．

Without blemish（ $\alpha \mu \omega \mu \mathrm{ov}$ ）．Old compound adjective（ $\operatorname{Col} 1: 22 ; 1 \mathrm{Pe} 1: 19$ ）as the sac－ rifice had to be（Ex 29：1；Le 1：3，10）．

Shall cleanse from conscience（ $\kappa \alpha \theta \alpha \rho \iota \varepsilon \tau \eta v \sigma v v \varepsilon \iota \eta \sigma \iota v \nu \mu \omega v$ ）．Future active indicative of $\kappa \alpha \theta \alpha \rho!\zeta \omega$ ．Some MSS．have $\eta \mu \omega \nu$（our）．The old Greek used $\kappa \alpha \theta \alpha \iota \rho \omega$ ，not $\kappa \alpha \theta \alpha \rho \iota \zeta \omega$（in inscriptions for ceremonial cleansing，Deissmann，Bible Studies，pp．216f．），for cleansing．

From dead works ( $\alpha \pi о \nu \varepsilon \kappa \rho \omega v \varepsilon \rho \gamma \omega v$ ). As in 6:1. "A pause might be made before $\varepsilon \rho \gamma \omega v$, from dead--(not bodies but) works."

Heb 9:15
Mediator of a new covenant ( $\delta ı \alpha \eta \eta \kappa \eta \varsigma ~ к \alpha ı \nu \eta \varsigma ~ \mu \varepsilon \sigma ı \tau \eta \varsigma) . ~ S e e ~ 8: 6 ~ f o r ~ t h i s ~ p h r a s e ~ w i t h ~$ крєıттоvos instead of каıvŋऽ.

A death having taken place ( Oavatov $^{\gamma \varepsilon v} \boldsymbol{\gamma} \boldsymbol{\mu} \varepsilon v o v$ ). Genitive absolute, referring to Christ's death.

For the redemption ( $\varepsilon \varsigma \varsigma ~ \alpha \pi о \lambda \nu \tau \rho \omega \sigma \tau v$ ).
Of the transgressions ( $\tau \omega v \pi \alpha \rho \alpha \beta \alpha \sigma \varepsilon \omega v$ ). Really ablative case, "from the transgressions." See verse 12, $\lambda \nu \tau \rho \omega \sigma \tau v$.

Under the first covenant ( $\varepsilon \pi \tau \eta \pi \rho \omega \tau \eta \delta \iota \alpha \theta \eta \kappa \eta$ ). Here there is a definite statement that the real value in the typical sacrifices under the Old Testament system was in the realization in the death of Christ. It is Christ's death that gives worth to the types that pointed to him. So then the atoning sacrifice of Christ is the basis of the salvation of all who are saved before the Cross and since.

That they may receive ( $o \pi \omega \varsigma \lambda \alpha \beta \omega \sigma v$ ). Purpose clause (God's purpose in the rites and symbols) with $о \pi \omega \varsigma$ and the second aorist active subjunctive of $\lambda \alpha \mu \beta \alpha v \omega$.

Heb 9:16
A testament $(\delta, a \theta \eta \kappa \eta)$. The same word occurs for covenant (verse 15) and will (verse 16). This double sense of the word is played upon also by Paul in Ga 3:15f. We say today "The New Testament" (Novum Testamentum) rather than " The New Covenant." Both terms are pertinent.

That made it ( $\tau o v \delta ı \alpha \theta \varepsilon \mu \varepsilon v o v$ ). Genitive of the articular second aorist middle participle of $\delta \iota \alpha \tau \iota \theta \eta \mu$ from which $\delta \iota \alpha \theta \eta \kappa \eta$ comes. The notion of will here falls in with $\kappa \lambda \eta \rho o v o \mu ı \alpha$ (inheritance, 1 Pe 1:4) as well as with $\theta$ avatoc (death).

Of force ( $\beta \varepsilon \beta \alpha 1 \alpha$ ). Stable, firm as in 3:6,14.
Where there hath been death ( $\varepsilon \pi$ vєкроья). "In the case of dead people." A will is only operative then.

For doth it ever avail while he that made it liveth? ( $\varepsilon \pi \varepsilon \mu \eta \pi о \tau \varepsilon \tau \sigma \cup \varepsilon$ о $\tau \varepsilon \zeta \eta$ о $\delta \iota \alpha \theta \varepsilon \mu \varepsilon v o \sigma ;)$. This is a possible punctuation with $\mu \eta \pi о \tau \varepsilon$ in a question (Joh 7:26 ). Without the question mark, it is a positive statement of fact. Aleph and $D$ read tote (then) instead of $\pi$ отє. The use of $\mu \eta$ in a causal sentence is allowable (Joh 3:18, o $\tau \mu \eta$ ).

Heb 9:18
The first covenant ( $\eta \pi \rho \omega \tau \eta$ ). Supply $\delta \Delta \alpha \theta \eta \kappa \eta$ as in 9:1.
Has been dedicated ( $\varepsilon v \kappa \varepsilon \kappa \alpha เ v ı \sigma \tau \alpha$ ). Stands dedicated. Perfect passive indicative of $\varepsilon v \kappa \alpha ı v i \zeta_{o}$, a late verb in LXX, one papyrus, and in N.T. only here and 10:20. It means to renew, to inaugurate ( $1 \mathrm{Sa} 11: 14 ; 2 \mathrm{Ch} 15: 8$ ) and in 1Ki 8:63 to dedicate. Note $\tau \alpha$ عvkaıvia (Joh 10:22) for the feast of dedication.

Heb 9:19
When every commandment had been spoken ( $\lambda \alpha \lambda \eta \theta \varepsilon \iota \sigma \eta \varsigma)$. Genitive absolute with first aorist passive participle feminine singular of $\lambda \alpha \lambda \varepsilon \omega$. The author uses the account in Ex 24:3f. "with characteristic freedom" (Moffatt). There is nothing there about the water, the scarlet wool ( $\varepsilon \rho \stackrel{\nu}{ }$, diminutive of $\varepsilon \rho \circ \sigma, \varepsilon \iota \rho \circ \varsigma$, old word, here and in Re $1: 14$; for коккıขоऽ see on Mt 27:6,28 ), and hyssop (vббんтov, a plant mentioned in Joh 19:29). It had become the custom to mingle water with the blood and to use a wisp of wool or a stem of hyssop for sprinkling ( Nu 10:2-10).

Both the book itself ( $\alpha \cup \tau о \tau \varepsilon \tau \circ \beta \iota \beta \lambda_{\iota} \circ v$ ). There is nothing in Exodus about sprinkling the book of the covenant, though it may very well have been done. He omits the use of oil in Ex 40:9f.; Le 8:10f. and applies blood to all the details.

Sprinkled ( $\varepsilon \rho \alpha \nu \tau \iota \sigma \varepsilon v$ ). First aorist active indicative from $\rho \alpha v \tau \iota \zeta \omega$ (from $\rho \alpha \nu \tau o \varsigma$ and this from $\rho a \iota v \omega)$, like $\beta \alpha \pi \tau \iota \zeta \omega$ from $\beta a \pi \tau \omega$. Cf. Mr 7:4; Heb 10:22; Re 19:13 .

Heb 9:20
This is ( $\tau 0 v \tau 0)$. Instead of $1 \delta o v$ of the LXX (Ex 24:8), just like our Lord's words in Mr 14:24, a possible reminiscence of the Master's words (Dods). The author also has $\varepsilon v \varepsilon \tau \varepsilon \iota \lambda a \tau o$ (he commanded) for $\delta \iota \varepsilon \varepsilon \tau$ to of the LXX.

Heb 9:21
In like manner with the blood ( $\tau \omega \alpha \not \mu \alpha \tau$ o $\mu \circ t \omega \varsigma$ ). Instrumental case of $\alpha \not \mu \alpha$ (blood). But the use of the article does not necessarily refer to the blood mentioned in verse 19. In Ex 40:9 Moses sprinkled the tabernacle with oil. It had not been erected at the time of Ex 24:5f. Josephus (Ant. III. 8, 6) gives a tradition that blood was used also at this dedication. Blood was used annually in the cleansing rites on the day of atonement.

Heb 9:22
I may almost say ( $\sigma \chi \varepsilon \delta o v$ ). Old adverb, only three times in the N.T., here, Ac 13:44; 19:26. Here it qualifies the entire clause, not just $\pi \alpha v \tau \alpha$.

With blood ( $\varepsilon v \alpha \mu \alpha \tau)$. In blood. There were exceptions (Ex 19:10; 32:30f.; Le 5:11f.; 15:5; Nu 16:46f.; 31:23f. , etc.).
 here (coined by the writer) and later in ecclesiastical writers ( $\alpha \mu \alpha$, blood, $\varepsilon \kappa$, out, $\chi \varepsilon \omega$, to pour, like $\varepsilon \kappa \chi$ ขбıৎ aıцатоৎ 1 Ki 18:28 ). "Pouring out of blood." The author seems to have in mind Christ's words in Mt 26:28 : "This is my blood of the covenant which is shed for many for the forgiveness of sins." The blood is the vital principle and is efficacious as an atonement. The blood of Christ sets aside all other plans for pardon.

Heb 9:23
The copies ( $\tau \alpha v \pi o \delta \varepsilon \tau \gamma \mu \alpha \tau \alpha$ ). See 8:5 for this word, the earthly (8:4; 9:1) tabernacle.
With these ( $\tau 0 \cup \tau 0 \iota \varsigma)$. Instrumental case of ov $\frac{\varsigma}{}$, like the rites above described (verse 19), perhaps with some disparagement.

Themselves ( $\alpha \cup \tau \alpha$ ). The heavenly realities (8:2,5; 9:11f. ).
With better sacrifices (крєıт七обıv $\theta$ vбı๙ıऽ). Instrumental case again. Point of this section (9:13-10:18).

Than these ( $\pi \alpha \rho \alpha \tau \alpha \nu \tau \alpha \varsigma)$. Use of $\pi \alpha \rho \alpha$ and the accusative case after a comparative as in $1: 4,9$. To us it seems a bit strained to speak of the ritual cleansing or dedication of heaven itself by the appearance of Christ as Priest-Victim. But the whole picture is highly mystical.

Heb 9:24
Made with hands ( $\chi \varepsilon ı \rho о \pi о ı \tau \tau \alpha)$. See verse 11 for this word.
Like in pattern to the true ( $\alpha \nu \tau \iota \tau v \pi \alpha \tau \omega \nu \alpha \lambda \eta \theta \iota \nu \omega \nu$ ). Late compound word, only twice in N.T. (here, 1Pe 3:21 ). Polybius uses avtıtv $\quad$ oc for infantry "opposite" to the cavalry. In modern Greek it means a copy of a book. Here it is the "counterpart of reality" (Moffatt). Moses was shown a $\tau \cup \pi \sigma \varsigma$ (model) of the heavenly realities and he made an $\alpha \nu \tau \iota \tau v \pi o v$ on
 sense, "the reality of baptism which corresponds to or is the antitype of the deluge" (Dods).

Now to appear ( $\nu v \nu \varepsilon \mu \varphi \alpha \nu \sigma \theta \eta \nu \alpha)$. Purpose clause by the first aorist passive infinitive of $\varepsilon \mu \varphi a v_{l} \zeta \omega$ (Mt 27:53; Joh 14:21f. ). For the phrase see Ps 42:3. For this work of Christ as our High Priest and Paraclete in heaven see Heb 7:25; Ro 8:34; 1Jo 2:1f .

Heb 9:25
That he should offer himself often ( $\imath \alpha \pi о \lambda \lambda \alpha \kappa ı \varsigma \pi \rho о \sigma \varphi \varepsilon \rho \eta \varepsilon \alpha v \tau о v$ ). Purpose clause with $\iota v \alpha$ and present active subjunctive of $\pi \rho \sigma \sigma \varphi \varepsilon \rho \omega$ (keep on offering himself, like 5:1,3 ).

With blood not his own ( $\varepsilon v \alpha \mu \alpha \tau \alpha \lambda \lambda o \tau \rho t \omega$ ). So-called instrumental use of $\varepsilon v$ (accompaniment). $\alpha \lambda \lambda$ от $\rho \iota \varsigma$ means "belonging to another," "not one's own" (Lu 16:12 ).

Heb 9:26
Else must he often have suffered ( $\varepsilon \pi \varepsilon \varepsilon \delta \varepsilon \alpha v \tau о v \pi о \lambda \lambda \alpha \kappa ı \varsigma \pi \alpha \theta \varepsilon \iota \nu)$. A common elliptical use of $\varepsilon \pi \varepsilon$ after which one must supply "if that were true" or "in that case," a protasis of a condition of the second class assumed to be untrue. The conclusion with $\varepsilon \delta \varepsilon$ is without $\alpha v$ (verbs of necessity, obligation, etc.). See Robertson, Grammar, p. 963. The conclusion with $\alpha v$ occurs in 10:2. See also 1Co 5:10. "Since, if that were true, it would be necessary for him to suffer often."

Since the foundation of the world ( $\alpha \pi о ~ к а \tau \alpha \beta о \lambda \eta \varsigma ~ к о \sigma \mu о v) . ~ S e e ~ 4: 3 ~ f o r ~ t h i s ~ p h r a s e . ~$ The one sacrifice of Christ is of absolute and final value (1Pe 1:19f.; Re 13:8).

At the end ( $\varepsilon \pi \sigma v v \tau \varepsilon \lambda \varepsilon เ \alpha)$. Consummation or completion as in Mt 13:39f. which see.
Hath he been manifested ( $\pi \varepsilon \varphi \alpha \nu \varepsilon \rho \omega \tau \alpha$ ). Perfect passive indicative of $\varphi \alpha v \varepsilon \rho \circ \omega$, permanent state. See "the primitive hymn or confession of faith" (Moffatt) in 1Ti 3:16 and also 1Pe 1:20. Jesus came once for all (Heb 1:2).
 sacrifice of Christ dealt with sin as a principle: the Levitical sacrifices with individual transgressions" (Vincent).

Heb 9:27
It is appointed ( $\alpha \pi о \kappa \varepsilon \iota \tau \alpha$ ). Present middle (or passive) of $\alpha \pi о \kappa \varepsilon \iota \mu \alpha$, "is laid away" for men. Cf. same verb in Lu 19:20; Col 1:5; 2Ti 4:8 (Paul's crown).

Once to die ( $\alpha \pi \alpha \xi \alpha \pi o \theta \alpha v \varepsilon \iota v$ ). Once for all to die, as once for all to live here. No reincarnation here.

After this cometh judgement ( $\mu \varepsilon \tau \alpha$ тоvто крıбıৎ). Death is not all. Man has to meet Christ as Judge as Jesus himself graphically pictures (Mt 25:31-46; Joh 5:25-29 ).

Heb 9:28
Once ( $\alpha \pi \alpha \xi$ ). "Once for all" (verse 26) as already stated.
Shall appear a second time ( $\varepsilon \kappa \delta \varepsilon v \tau \varepsilon \rho \circ v o \varphi \theta \eta \sigma \varepsilon \tau \alpha$ ). Future passive indicative of o $\rho \alpha \omega$. Blessed assurance of the Second Coming of Christ, but this time "apart from sin" ( $\chi \omega \rho$ $\alpha \mu \alpha \rho \tau \iota \alpha \varsigma$, no notion of a second chance then).

Unto salvation ( $\varepsilon \iota \varsigma \sigma \omega \tau \eta \iota \alpha v$ ). Final and complete salvation for "them that wait for
 of $\alpha \pi \varepsilon \kappa \delta \varepsilon \chi \circ \mu \alpha$, the very verb used by Paul in Php 3:20 of waiting for the coming of Christ as Saviour.

## Hebrews 10

Heb 10:1
Shadow ( $\sigma \kappa ı \alpha v$ ). The contrast here between $\sigma \kappa ı \alpha$ (shadow, shade caused by interruption of light as by trees, Mr 4:32) and $\varepsilon \iota \kappa \omega \nu$ (image or picture) is striking. Christ is the $\varepsilon ו \kappa \omega \nu$ of God (2Co 4:4; Col 1:15). In Col 2:17 Paul draws a distinction between $\sigma \kappa ⿺ \alpha$ for the Jewish rites and ceremonies and $\sigma \omega \mu \alpha$ for the reality in Christ. Children are fond of shadow pictures. The law gives only a dim outline of the good things to come (9:11).

Continually ( $\varepsilon ı \varsigma ~ \tau о ~ \delta ı \eta \nu \varepsilon \kappa \varepsilon \varsigma) . ~ S e e ~ t h i s ~ p h r a s e ~ a l s o ~ i n ~ 7: 3 ; ~ 9: 12,14 . ~ N o w h e r e ~ e l s e ~ i n ~ N . T . ~$ From $\delta ı \eta \nu \varepsilon ү к \alpha$ ( $\delta \iota \alpha \varphi \varepsilon \rho \omega)$, to bear through.

They can ( $\delta v v^{2} \nu \tau \alpha$ ). This reading leaves o vouos a nominativus pendens (an anacoluthon). But many MSS. read $\delta u v a \tau \alpha$ (it--the law--can). For the idea and use of $\tau \varepsilon \lambda \varepsilon ا \omega \sigma \alpha$ see 9:9.

Heb 10:2
Else they would not have ceased? ( $\varepsilon \pi \varepsilon$ ouk $\alpha v \varepsilon \pi \alpha \cup \sigma \alpha v \tau o ;$ ). Ellipsis of condition after $\varepsilon \pi \varepsilon$ (since if they really did perfect) with the conclusion of the second-class condition ( $\alpha v$ and the aorist middle indicative of $\pi \alpha v o \mu \alpha)$.

To be offered ( $\pi \rho \circ \sigma \varphi \varepsilon \rho \rho \mu \varepsilon v \alpha$ ). Regular idiom, participle (present passive) with $\pi \alpha v o \mu \alpha$ (Ac 5:42).

Because ( $\delta 1 \alpha \tau 0$ ). $\Delta t \alpha$ with the accusative of the articular infinitive, "because of the having" ( $\varepsilon \chi \varepsilon เ v)$ as to the worshippers ( $\tau 0 \cup \varsigma ~ \lambda \alpha \tau \rho \varepsilon v o v \tau \alpha \varsigma$, accusative of general reference of the articular participle), not "would have had."

No more conscience of sins ( $\mu \eta \delta \varepsilon \mu \mu \alpha v \varepsilon \tau \sigma v v \varepsilon \iota \delta \eta \sigma \iota \sim \alpha \mu \rho \tau \tau \omega v$ ). Rather "consciousness of sins" as in 9:14.

Having been once cleansed ( $\alpha \pi \alpha \xi \kappa \varepsilon \kappa \alpha \theta \alpha \rho \iota \sigma \mu \varepsilon v o v \varsigma)$. Perfect passive participle of $\kappa \alpha \theta \alpha \rho ı \zeta \omega$, "if they had once for all been cleansed."

Heb 10:3
A remembrance ( $\alpha v \alpha \mu v \eta \sigma \iota \varsigma)$. A reminder. Old word from $\alpha v \alpha \mu \mu v \eta \sigma \kappa \omega$, to remind, as in Lu 22:19; 1Co 11:24f.

Heb 10:4
Should take away ( $\alpha \varphi \alpha \iota \rho \varepsilon v$ ). Present active infinitive of $\alpha \varphi \alpha \iota \rho \varepsilon \omega$. Old verb and common in N.T., only here and Ro 11:27 with "sins". Cf. 9:9.

Heb 10:5
When he cometh into the world ( $\varepsilon เ \sigma \varepsilon \rho \chi \circ \mu \varepsilon v o \varsigma \varepsilon \iota \varsigma ~ \tau o v ~ к о \sigma \mu о \nu)$ ). Reference to the Incarnation of Christ who is represented as quoting Ps 40:7-9 which is quoted. The text of the LXX is followed in the main which differs from the Hebrew chiefly in having $\sigma \omega \mu \alpha$ (body) rather than $\omega$ tio (ears). The LXX translation has not altered the sense of the Psalm, "that there was a sacrifice which answered to the will of God as no animal sacrifice could" (Moffatt).

So the writer of Hebrews "argues that the Son's offering of himself is the true and final offering for sin, because it is the sacrifice, which, according to prophecy, God desired to be made" (Davidson).

A body didst thou prepare for me ( $\sigma \omega \mu \alpha \kappa \alpha \tau \eta \rho \tau \iota \sigma \omega \mu 0$ ). First aorist middle indicative
 (ears) does not change the sense, for the ears were the point of contact with God's will.

Heb 10:6
Thou hadst no pleasure (оик $\varepsilon v \delta о к \eta \sigma a \varsigma)$. First aorist active indicative of $\varepsilon v \delta о \kappa \varepsilon \omega$, common for God's good pleasure (Mt 3:17). God took no pleasure in the animal offering ( $\theta v \sigma \iota \alpha v$ ), the meal-offering ( $\pi \rho о \sigma \varphi о \rho a v$ ), the burnt-offering (о入окаטтш $\mu \alpha \tau \alpha$ ), the sin-offering ( $\pi \varepsilon \rho \alpha \mu \alpha \rho \tau \iota \alpha$, , concerning sin).

Heb 10:7
Then ( $\tau 0 \tau \varepsilon$ ). When it was plain that God could not be propitiated by such sacrifices.
Lo, I am come (I $\delta$ ov $\eta \kappa \omega$ ). The Messiah is represented as offering himself to do God's will ( $\tau 0 v \pi о \neq \eta \sigma \alpha$ тo $\theta \varepsilon \lambda \eta \mu \alpha \sigma o v$, the genitive articular infinitive of purpose).

In the roll of the book it is written of me ( $\varepsilon v \kappa \varepsilon \varphi \alpha \lambda \wedge \delta \beta \iota \beta \lambda \iota v \gamma \varepsilon \gamma \rho \alpha \pi \tau \alpha \pi \varepsilon \rho \varepsilon \mu \circ v)$. Stands written ( $\gamma \varepsilon \gamma \rho \alpha \pi \tau \alpha$, perfect passive indicative). $К \varepsilon \varphi \alpha \lambda \iota \varsigma$ is a diminutive of $\kappa \varepsilon \varphi \alpha \lambda \eta$ (head), a little head, then roll only here in N.T., but in the papyri. Here it refers "to the O.T. as a prediction of Christ's higher sacrifice" (Moffatt).

Heb 10:8
Saying above ( $\alpha v \omega \tau \varepsilon \rho o v \lambda \varepsilon \gamma \omega v$ ). Christ speaking as in verse 5. "Higher up" ( $\alpha v \omega \tau \varepsilon \rho o v$, comparative of $\alpha v \omega$, up) refers to verses 5,6 which are quoted again.

Heb 10:9
The which (aıtivec). "Which very things" ( $\theta$ voia).
Then hath he said ( $\tau 0 \tau \varepsilon \varepsilon เ \rho \eta \kappa \varepsilon v$ ). That is Christ. Perfect active indicative with which compare tote $\varepsilon$ וлоv (second aorist active) in verse 7 which is quoted again.

He taketh away the first ( $\alpha v \alpha \rho \rho \varepsilon$ to $\pi \rho \omega \tau o v$ ). Present active indicative of $\alpha v \alpha \iota \varepsilon \omega$, to take up, to abolish, of a man to kill (Mt 2:16). By "the first" ( $\tau 0 \pi \rho \omega \tau 0 v$ ) he means the system of animal sacrifices in verse 8 .

That he may establish the second (iva to $\delta \varepsilon v \tau \varepsilon \rho \circ v \sigma \tau \eta \sigma \eta$ ). Purpose clause with $ı v a$ and the first aorist active (transitive) subjunctive of $t \sigma \tau \eta \mu$, to place. By "the second" ( $\tau \mathrm{o}$ $\delta \varepsilon v \tau \varepsilon \rho o v)$ he means doing God's will as shown in verse 9 (following verse 8). This is the author's exegesis of the Psalm.

Heb 10:10
We have been sanctified ( $\eta \gamma \omega \alpha \sigma \mu \varepsilon v o \varepsilon \sigma \mu \varepsilon v)$. Periphrastic perfect passive indicative of $\alpha \gamma ı \omega \zeta \omega$, to set apart, to sanctify. The divine will, unfulfilled in animal sacrifices, is realized in Christ's offering of himself. "He came to be a great High Priest, and the body was prepared
for him, that by the offering of it he might put sinful men for ever into the perfect religious relation to God" (Denney, The Death of Christ, p. 234).

Heb 10:11
Standeth ( $\varepsilon \sigma \tau \eta \kappa \varepsilon v)$. Perfect active indicative of $\iota \sigma \tau \eta \mu$ (intransitive), vivid picture.
Ministering and offering ( $\lambda \varepsilon \iota \tau о \nu \rho \gamma \omega \nu \kappa \alpha \pi \rho \circ \sigma \varphi \varepsilon \rho \omega \nu)$. Present active participles graphically describing the priest.

Take away ( $\pi \varepsilon \rho \iota \varepsilon \lambda \varepsilon \iota v)$. Second aorist active infinitive of $\pi \varepsilon \rho \iota \alpha \iota \rho \varepsilon \omega$, old verb to take from around, to remove utterly as in Ac 27:20 .

Heb 10:12
When he had offered ( $\pi \rho \circ \sigma \varepsilon v \varepsilon \gamma \kappa \alpha \varsigma)$. Second aorist active participle (with first aorist ending - $\alpha \varsigma$ in place of $-o v$ ) of $\pi \rho \circ \sigma \varphi \varepsilon \rho \omega$, single act in contrast to present participle $\pi \rho о \sigma \varphi \varepsilon \rho \omega \nu$ above.

One sacrifice ( $\mu \mathrm{L} \alpha \nu \theta v \sigma \iota \alpha v)$. This the main point. The one sacrifice does the work that the many failed to do. One wonders how priests who claim that the "mass" is the sacrifice of Christ's body repeated explain this verse.

For ever ( $\varepsilon \iota \varsigma ~ \tau о ~ \delta ı \eta v \varepsilon \kappa \varepsilon \varsigma) . ~ C a n ~ b e ~ c o n s t r u e d ~ e i t h e r ~ w i t h ~ \mu ı \alpha \nu ~ \theta v \sigma ı \alpha v ~ o r ~ w i t h ~ \varepsilon \kappa \alpha \theta ı \sigma \varepsilon v ~$ (sat down). See 1:3 for $\varepsilon \kappa \alpha \theta \iota \sigma \varepsilon v$.

Heb 10:13
 $\lambda o t \pi o v$, accusative of extent of time). The expectant attitude of Christ here is that of final and certain victory (Joh 16:33; 1Co 15:24-28).

Till his enemies be made ( $\varepsilon \omega \varsigma \tau \varepsilon \theta \omega \sigma \iota \nu$ o $\varepsilon \chi \theta \rho \circ \alpha v \tau o v$ ). Purpose and temporal clause with $\varepsilon \omega \varsigma$ and the first aorist passive subjunctive of $\tau \iota \theta \eta \mu$. He quotes Ps 110:1 again.

Heb 10:14
He hath perfected ( $\tau \varepsilon \tau \varepsilon \lambda \varepsilon เ \omega \kappa \varepsilon \nu)$. Perfect active indicative of $\tau \varepsilon \lambda \varepsilon \iota \omega \omega$. He has done what the old sacrifices failed to do (verse 1).

Them that are sanctified ( $\tau 0 \cup \varsigma \alpha \gamma \kappa \zeta о \mu \varepsilon v o v \varsigma)$. Articular participle (accusative case) present passive of $\alpha \nLeftarrow \iota \zeta \omega$ (note perfect in verse 10) either because of the process still going on or because of the repetition in so many persons as in 2:11.

Heb 10:15
And the Holy Ghost also beareth witness to us ( $\mu \alpha \rho \tau v \rho \varepsilon \delta \varepsilon \eta \mu \nu \tau \alpha \alpha$ то $\pi \nu \varepsilon v \mu \alpha$ тo $\alpha \gamma \iota 0 v)$. Maptv $\varepsilon \varepsilon \omega$ is common in Philo for Scripture quotation. The author confirms his interpretation of Ps 40:7-9 by repeating from Jeremiah (Jer 31:31ff.) what he had already quoted ( 8:8-12).

After he hath said ( $\mu \varepsilon \tau \alpha$ то $\varepsilon \iota \rho\rceil \varepsilon v \alpha$ ). Accusative case after $\mu \varepsilon \tau \alpha$ of the articular infinitive perfect active, "after the having said."

Heb 10:16

With them ( $\pi \rho \circ \varsigma$ autouc). The author changes $\tau \omega$ oוк $\omega \operatorname{I\sigma \rho \alpha \varepsilon \lambda (8:10)~thus~without~}$ altering the sense. He also changes the order of "heart" (кар $\delta \alpha \varsigma)$ and "mind" ( $\delta ı \alpha v o \iota \alpha v$ ) from that in 8:10.

Heb 10:17
Here again the writer adds "their iniquities" ( $\tau \omega v \alpha v o \mu \omega \omega v$ ) to "sins" of 8:12 and reads $\mu \nu \eta \sigma \theta \eta \sigma o \mu \alpha$ (first future passive) with ov $\mu \eta$ rather than $\mu \nu \eta \sigma \theta \omega$ (first aorist passive subjunctive) of 8:12 (the more common idiom). It is uncertain also whether the writer means verse 17 to be the principal clause with 15,16 as subordinate or the whole quotation to be subordinate to $\mu \varepsilon \tau \alpha$ тo $\varepsilon \mid \rho \eta \kappa \varepsilon v \alpha$ of verse 15 with anacoluthon in verse 18 . At any rate verse 17 in the quotation does not follow immediately after verse 16 as one can see in 8:10-12 (skipping part of 8:10 and all of 8:11).

Heb 10:18
There is no more offering for $\sin$ (оикєт $\pi \rho о \sigma \varphi о \rho \alpha \pi \varepsilon \rho \alpha \mu \alpha \rho \tau ı \propto)$. This is the logical and triumphant conclusion concerning the better sacrifice offered by Christ ( 9:13-10:18). As Jeremiah had prophesied, there is actually remission ( $\alpha \varphi \varepsilon \sigma \iota$, removal) of sins. Repetition of the sacrifice is needless.

Heb 10:19
Having therefore ( $\varepsilon \chi$ оvte¢ ouv). The author now gives a second (the first in 8:1-6) resume of the five arguments concerning the superior priestly work of Christ ( 10:19-25) coupled with an earnest exhortation like that in 4:14-16, with which he began the discussion, before he proceeds to treat at length the fifth and last one, the better promises in Christ ( 10:26-12:3).

Boldness ( $\pi \alpha \rho \rho \eta \sigma \iota \alpha)$ ). This is the dominant note all through the Epistle (3:6; 4:16; 10:19,35 ). They were tempted to give up Christ, to be quitters. Boldness (courage) is the need of the hour.

Into the holy place ( $\tau \omega \vee \alpha \gamma \mid \omega v)$. That is, the heavenly sanctuary where Jesus is ( $6: 18-20$ ). This is the better sanctuary ( $9: 1-12$ ).

By the blood of Jesus ( $\varepsilon v \tau \omega \alpha \mu \alpha \tau$ I $\eta \sigma o v$ ). This is the better sacrifice just discussed ( 9:13-10:18).

Heb 10:20
By the way which he dedicated for us ( $\eta v \varepsilon v \varepsilon \kappa \alpha \iota v i \sigma \varepsilon v \eta \mu \nu \nu$ oסov). This "new" ( $\pi \rho о \sigma \varphi \alpha \tau o v$, freshly killed, newly made, from $\pi \rho \circ \varsigma$ and the root of $\varphi a \tau o \varsigma$, in the papyri, only here in N.T.) and "living" ( $\zeta \omega \sigma \alpha v)$ Jesus opened ("dedicated") for us by his Incarnation and Death for us. Thus he fulfilled God's promise of the "New Covenant" ( 8:7-13) in Jeremiah. The language is highly symbolic here and "through the veil" here is explained as meaning the flesh of Christ, his humanity, not the veil opening into heaven ( 6:20). Some do take "veil" here as obscuring the deity of Christ rather than the revelation of God in the
human body of Christ (Joh 1:18; 14:9). At any rate because of the coming of Christ in the flesh we have the new way opened for access to God (Heb 2:17f.; 4:16).

Heb 10:21
A great priest ( $£ \rho \varepsilon \alpha \mu \varepsilon \gamma \alpha v$ ). As has been shown in 4:14-7:28.
Over the house of God ( $\varepsilon \pi$ tov oוкоv tov $\theta \varepsilon o v)$. As God's Son (3:5f. ).
Heb 10:22
Let us draw near ( $\pi \rho \circ \sigma \varepsilon \rho \chi \omega \mu \varepsilon \theta \alpha$ ). Present middle volitive subjunctive as in $4: 16$ with which exhortation the discussion began. There are three exhortations in verses 22:25 (Let us draw near, $\pi \rho о \sigma \varepsilon \rho \chi \omega \mu \varepsilon \theta a$, let us hold fast, $\kappa \alpha \tau \varepsilon \chi \omega \mu \varepsilon v$, let us consider one another, $\kappa \alpha \tau \alpha v o \omega \mu \varepsilon v \alpha \lambda \lambda \eta \lambda o v \varsigma)$. Four items are added to this first exhortation.

With a true heart ( $\mu \varepsilon \tau \alpha \alpha \lambda \eta \theta \iota \nu \eta \varsigma \kappa \alpha \rho \delta ı \alpha \varsigma)$. With loyalty and fealty.
In fulness of faith ( $\varepsilon v \pi \lambda \eta \rho \circ \varphi о \rho ı \alpha \pi \iota \sigma \tau \varepsilon \omega \varsigma)$. See 6:11 for this very phrase.
Having our hearts sprinkled from an evil conscience ( $\rho \varepsilon \rho \alpha v \tau \iota \sigma \mu \varepsilon v o ~ \tau \alpha \varsigma ~ к \alpha \rho \delta ı а \varsigma ~ a \pi о ~$ $\sigma \cup v \varepsilon i \delta \eta \sigma \varepsilon \omega \varsigma \pi$ тоv $\rho \rho a \varsigma)$. Perfect passive participle of $\rho a v \tau \iota \zeta \omega$ with the accusative retained in the passive, an evident allusion to the sprinkling of blood in the old tabernacle ( 9:18-22) and the shedding of Christ's blood for the cleansing of our consciences ( 10:1-4). Cf. 1Pe 1:2 for "the sprinkling of the blood of Jesus Christ."

Our body washed with pure water ( $\lambda \varepsilon \lambda o v \sigma \mu \varepsilon v o ~ \tau o ~ \sigma \omega \mu \alpha ~ v \delta \alpha \tau ~ \kappa \alpha \theta \alpha \rho \omega)$. Perfect passive (or middle) of $\lambda o v \omega$, old verb to bathe, to wash. Accusative also retained if passive. Huסat can be either locative (in) or instrumental (with). See Eph 5:26; Tit 3:5 for the use of入outpov. If the reference here is to baptism (quite doubtful), the meaning is a symbol (Dods) of the previous cleansing by the blood of Christ.

Heb 10:23
Let us hold fast ( $\kappa \alpha \tau \varepsilon \chi \omega \mu \varepsilon v$ ). Present (keep on holding fast) active volitive subjunctive of $\kappa \alpha \tau \varepsilon \chi \omega$ as in 3:6,14.

That it waver not ( $\alpha \kappa \lambda \iota \nu \eta$ ). Common compound adjective (alpha privative and $\kappa \lambda \iota \nu \omega$, unwavering, not leaning, here only in N.T. It is a confession of hope, not of despair.

That promised (o $\varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \alpha \mu \varepsilon v o \varsigma)$. First aorist middle articular participle of $\varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \lambda \omega$. This is the argument remaining to be discussed ( $10: 26-12: 3$ ) and already alluded to (6:13f.; 8:6 ). The ministry of Jesus rests upon "better promises." How better? God is "faithful," but he made the other promises also. We shall see.

Heb 10:24
Let us consider one another ( $\kappa \alpha \tau \alpha v o \omega \mu \varepsilon v \alpha \lambda \lambda \eta \lambda o v \varsigma)$. Present (keep on doing so) active volitive subjunctive of $\kappa \alpha \tau \alpha v o \varepsilon \omega$. The verb used about Jesus in 3:1.

To provoke ( $\varepsilon ı \varsigma ~ \pi \alpha \rho о \xi \nu \sigma \mu \circ v$ ). Our very word "paroxysm," from $\pi \alpha \rho о \xi v v \omega$ ( $\pi \alpha \rho \alpha$, o $\varsigma v v \omega$ from $o \xi v \varsigma$, sharp), to sharpen, to stimulate, to incite. So here in good sense (for incitement to), but in Ac 15:39 the word is used of irritation or contention as in the LXX and Demosthenes. Hippocrates uses it for "paroxysm" in disease (so in the papyri).

Unto love and good works ( $\alpha \gamma \alpha \pi \eta \varsigma \kappa \alpha \kappa \alpha \lambda \omega v \varepsilon \rho \gamma \omega v$ ). Objective genitive. So Paul seeks to stir up the Corinthians by the example of the Macedonians (2Co 8:1-7).

Heb 10:25
Not forsaking ( $\mu \eta \varepsilon \gamma \kappa \alpha \tau \alpha \lambda \varepsilon \iota \tau о \nu \tau \varepsilon \varsigma)$. "Not leaving behind, not leaving in the lurch" ( $2 \mathrm{Ti} 4: 10$ ).

The assembling of yourselves together ( $\tau \eta v \varepsilon \pi \iota \sigma v v \alpha \gamma \omega \gamma \eta \nu \varepsilon \alpha v \tau \omega v$ ). Late double compound from $\varepsilon \pi \iota \sigma v v a \gamma \omega$, to gather together ( $\sigma v v$ ) besides $(\varepsilon \pi)$ as in Mt 23:37; Lu 17:27 . In N.T. only here and 2Th 2:1 . In an inscription 100 B.C. for collection of money (Deissmann, Light, etc., p. 103).

As the custom of some is ( $\kappa \alpha \theta \omega \varsigma \varepsilon \theta \circ \varsigma \tau \iota \sigma \iota v)$. "As is custom to some." For $\varepsilon \theta \circ \varsigma$ (custom) see Lu 22:39; Joh 19:40. Already some Christians had formed the habit of not attending public worship, a perilous habit then and now.

So much the more as ( $\tau 0 \sigma o v \tau \omega \mu \alpha \lambda \lambda o v o \sigma \omega)$. Instrumental case of measure or degree, "by so much the more as," both with $\tau 0 \sigma o v \tau \omega$ and $o \sigma \omega$.

The day drawing nigh ( $\left.\varepsilon \gamma \gamma \zeta \zeta_{0} \sigma \sigma \alpha \nu \tau \eta \nu \eta \mu \varepsilon \rho \alpha v\right)$. The Second Coming of Christ which draws nearer all the time (Ro 13:12).

Heb 10:26
If we sin wilfully ( $\varepsilon \kappa о \nu \sigma \iota \omega \varsigma \alpha \mu \alpha \rho \tau \alpha \nu о \nu \tau \omega \nu \eta \mu \omega \nu$ ). Genitive absolute with the present active participle of $\alpha \mu \alpha \rho \tau \alpha \nu \omega$, circumstantial participle here in a conditional sense.

After that we have received ( $\mu \varepsilon \tau \alpha$ тo $\lambda \alpha \beta \varepsilon เ v$ ). "After the receiving" (accusative case of the articular infinitive second aorist active of $\lambda \alpha \mu \beta \alpha v \omega$ after $\mu \varepsilon \tau \alpha)$.

Knowledge ( $\varepsilon \pi \downarrow \gamma \omega \sigma \iota \nu$ ). "Full knowledge," as in 6:4f .
There remaineth no more (ovкєє $\alpha \pi о \lambda \varepsilon \iota \pi \varepsilon \tau \alpha$ ). "No longer is there left behind" (present passive indicative as in 4:9), for one has renounced the one and only sacrifice for sin that does or can remove $\sin (10: 1-18)$.

Heb 10:27
Expectation ( $\varepsilon \kappa \delta о \chi \eta$ ). Usually reception or interpretation from $\varepsilon \kappa \delta \varepsilon \chi \circ \mu \alpha$ (Heb 11:10 ), only here in N.T. and in unusual sense like $\pi \rho о \sigma \delta o \kappa เ \alpha$, like $\alpha \pi \varepsilon \kappa \delta \varepsilon \chi о \mu \alpha$ (Ro 8:19,23,25 ), this sense apparently "coined by the writer" (Moffatt) from his use of $\varepsilon \kappa \delta \varepsilon \chi \circ \mu \alpha$ in 10:13. The papyri have it in the sense of interpretation.

A fierceness of fire ( $\pi \nu \rho \circ \varsigma \zeta \eta \lambda \circ \varsigma)$. An anger (zeal, jealousy) marked (genitive) by fire. Language kin to that in Isa 26:11; Zep 1:19; Ps 79:5. See also 2Th 1:8-10 for a like picture of destined doom.

Devour ( $\varepsilon \sigma \theta \iota \varepsilon เ v)$. "To eat" (figuratively), present active infinitive.
The adversaries ( $\tau \circ v \varsigma v \pi \varepsilon v a v \tau \iota \circ \cup \varsigma)$. Old double compound adjective ( $v \pi \circ, \varepsilon v, \alpha v \tau \iota \varsigma)$, in N.T. only here and Col 2:14. Those directly opposite.

Heb 10:28

Hath set at naught $(\alpha \theta \varepsilon \tau \eta \sigma \alpha \varsigma)$. First aorist active participle of $\alpha \theta \varepsilon \tau \varepsilon \omega$, late compound, very common in LXX, from alpha privative and $\tau i \theta \eta \mu$, to render null and void, to set aside, only here in Hebrews (see Mr 7:9), but note $\alpha \theta \varepsilon \tau \eta \sigma ı \varsigma ~(H e b ~ 7: 18 ; ~ 9: 26 ~) . ~$.
 apostates.

On the word of two or three ( $\varepsilon \pi \delta v \sigma \iota v \eta \tau \rho \iota \sigma \iota)$ ). "On the basis of two or three." For this use of $\varepsilon \pi$ with the locative see 9:17.

Heb 10:29
How much ( $\pi \sigma \sigma \omega)$. Instrumental case of degree or measure. An argument from the less to the greater, "the first of Hillel's seven rules for exegesis" (Moffatt).

Think ye ( $\delta$ окєıєє). An appeal to their own sense of justice about apostates from Christ.
Sorer ( $\chi$ вророс). "Worse," comparative of какос (bad).
Punishment ( $\tau \iota \omega \rho \rho \omega \varsigma$ ). Genitive case with $\alpha \xi \iota \omega \theta \eta \sigma \varepsilon \tau \alpha$ (first future passive of $\alpha \xi \iota \omega$, to deem worthy). The word $\tau \mu \omega \omega$ pıa originally meant vengeance. Old word, in LXX, only here in N.T.

Who hath trodden under foot the Son of God (o тov viov tov $\theta$ عov каталатךбаৎ). First aorist active articular participle of каталатє $\omega$, old verb (Mt 5:13) for scornful neglect like Zec 12:3. See same idea in Heb 6:6 .

Wherewith he was sanctified ( $\varepsilon v \omega \eta \gamma \iota \alpha \sigma \theta \eta$ ). First aorist passive indicative of $\alpha \gamma \iota\rfloor \zeta \omega$. It is an unspeakable tragedy that should warn every follower of Christ not to play with treachery to Christ (cf. 6:4-8).

An unholy thing (kotvov). Common in the sense of uncleanness as Peter used it in Ac 10:14 . Think of one who thus despises "the blood of Christ wherewith he was sanctified." And yet there are a few today who sneer at the blood of Christ and the gospel based on his atoning sacrifice as "a slaughter house" religion!

Hath done despite ( $\varepsilon v v \beta \rho \circ \sigma \alpha \varsigma)$. First aorist active participle of $\varepsilon v v \beta \rho \iota \zeta \omega$, old verb to treat with contumely, to give insult to, here only in the N.T. It is a powerful word for insulting the Holy Spirit after receiving his blessings ( 6:4).

Heb 10:30
We know him that said (oı $\delta \alpha \mu v$ tov $\varepsilon \iota \pi о v \tau \alpha$ ). God lives and is true to his word. He quotes De 32:35 (cf. Ro 12:19 ). For єк $\delta \iota \kappa \eta \sigma \iota$ see Lu 18:7f. God is the God of justice. He is patient, but he will punish.

And again ( $\kappa \alpha \pi \alpha \lambda ı v$ ). De 32:36.
Heb 10:31
A fearful thing ( $\varphi \circ \beta \varepsilon \rho \circ v$ ). Old adjective (from $\varphi \circ \beta \varepsilon \omega$, to frighten). In N.T. only in Heb. ( $10: 27,31 ; 12: 21$ ). The sense is not to be explained away. The wrath of God faces wrongdoers.

To fall ( $\tau 0 \varepsilon \mu \pi \varepsilon \sigma \varepsilon เ v$ ). "The falling" (articular infinitive second aorist active of $\varepsilon \mu \pi \iota \tau \tau \omega$, to fall in, followed here by $\varepsilon \varsigma \varsigma)$. We are not dealing with a dead or an absentee God, but one who is alive and alert ( $3: 12$ ).

Heb 10:32
Call to remembrance $(\alpha v \alpha \mu \mu \nu \eta \sigma \kappa \varepsilon \sigma \theta \varepsilon)$. Present middle imperative of $\alpha v \alpha \mu \mu \nu \eta \sigma \kappa \omega$, as in 2Co 7:15 "remind yourselves." The former days were some distance in the past ( 5:12), some years at any rate. It is a definite experience of people in a certain place. Jerusalem Christians had had experiences of this nature, but so had others.

After ye were enlightened ( $\varphi \omega \tau \iota \sigma \theta \varepsilon v \tau \varepsilon \varsigma)$. First aorist passive participle of $\varphi \omega \tau \iota \zeta \omega$ in the same sense as in 6:4 (regeneration) and like "the full knowledge of the truth" in 10:26.

Conflict ( $\alpha \theta \lambda \eta \sigma v$ ). Late word from $\alpha \theta \lambda \varepsilon \omega$, to engage in a public contest in the games (2Ti 2:5 ), only here in the N.T. It occurs in the inscriptions. Cf. 2:10 for the benefit of "sufferings" in training.

Heb 10:33
Partly (точто $\mu \varepsilon v$ )
and partly ( $\tau$ оитo $\delta \varepsilon$ ). Accusative of general reference (тov $\frac{10}{}$ ) with $\mu \varepsilon v$ and $\delta \varepsilon$ for contrast.

Being made a gazing-stock ( $\theta \varepsilon \alpha \tau \rho \iota \zeta о \mu \varepsilon v o$ ). Late verb to bring upon the stage, to hold up to derision. See Paul's use of $\theta \varepsilon a \tau \rho o v$ of himself in 1Co 4:9 .

By reproaches and afflictions (oveı $\delta \iota \sigma \mu \circ \iota \varsigma \tau \varepsilon \kappa \alpha \theta \lambda \iota \psi \varepsilon \sigma \iota v$ ). Instrumental case. See Ro 15:3.

Partakers ( $\kappa o \imath v \omega v o$ ). Partners (Lu 5:10) with those ( $\tau \omega v$ objective genitive).
So used (ov $\omega \varsigma \varsigma v a \sigma \tau \rho \varepsilon \varphi \rho \mu \varepsilon v \omega v$ ). Present middle articular participle of $\alpha v \alpha \sigma \tau \rho \varepsilon \varphi \omega$, to conduct oneself (2Co 1:12).

Heb 10:34
Ye had compassion on ( $\sigma u v \varepsilon \pi \alpha \theta \eta \sigma \alpha \tau \varepsilon$ ). First aorist active indicative of $\sigma u v \pi \alpha \theta \varepsilon \omega$, old verb to have a feeling with, to sympathize with.

Them that were in bonds (тоья $\delta \varepsilon \sigma \mu \circ \circ \iota)$. Associative instrumental case, "with the prisoners" (the bound ones). Used of Paul (Eph 3:1; 2Ti 1:8).

Took joyfully ( $\mu \varepsilon \tau \alpha \chi \alpha \rho \alpha \varsigma ~ \pi \rho о \sigma \varepsilon \delta \varepsilon \xi \alpha \sigma \theta \varepsilon$ ). First aorist middle (indirect) indicative, "ye received to yourselves with joy." See Ro 13:1,3; 15:7.

The spoiling ( $\tau \eta \nu \alpha \rho \pi \alpha \gamma \eta \nu)$. "The seizing," "the plundering." Old word from $\alpha \rho \pi \alpha \zeta \omega$. See Mt 23:35.

Of your possessions ( $\tau \omega v \nu \pi \alpha \rho \chi \circ v \tau \omega v \nu \mu \omega v$ ). "Of your belongings." Genitive of the articular present active neuter plural participle of $v \pi \alpha \rho \chi \omega$ used as a substantive (cf. $v \mu \omega \nu$ genitive) as in Mt 19:21 .

That ye yourselves have ( $\varepsilon \chi \varepsilon \mid v ~ \varepsilon a v \tau o v \varsigma)$ ) Infinitive (present active of $\varepsilon \chi \omega$ ) in indirect discourse after $\gamma \iota \omega \omega \sigma \kappa 0 \nu \tau \varepsilon \varsigma$ (knowing) with the accusative of general reference ( $\varepsilon a v \tau o u \varsigma$,
as to yourselves), though some MSS. omit eavtov¢, some have eavtos (dative, for yourselves), and some $\varepsilon v$ عautorc (in yourselves). The predicate nominative avto could have been used agreeing with $\gamma \iota \nu \omega \sigma \kappa 0 \nu \tau \varepsilon \varsigma$ (cf. Ro 1:22).

A better possession ( $\kappa \rho \varepsilon \varepsilon \sigma \sigma o v a v \pi \alpha \rho \xi \imath v$ ). Common word in the same sense as $\tau \alpha$ v $\pi \alpha \rho \chi$ ovta above, in N.T. only here and Ac 2:45. In place of their plundered property they have treasures in heaven (Mt 6:20).

Abiding ( $\mu \varepsilon v o v \sigma \alpha v$ ). Present active participle of $\mu \varepsilon v \omega$. No oppressors (legal or illegal) can rob them of this (Mt 6:19ff. ).

Heb 10:35
Cast not away therefore your boldness ( $\mu \eta \alpha \pi \beta \beta \alpha \lambda \eta \tau \varepsilon$ ovv $\tau \eta \nu \pi \alpha \rho \rho \eta \sigma \alpha \nu v \mu \omega v$ ). Prohibition with $\mu \eta$ and the second aorist active subjunctive of $\alpha \pi \circ \beta \alpha \lambda \lambda \omega$. Old verb to throw away from one as worthless, only twice in the N.T., here in a figurative sense and Mr 10:50 in a literal sense (garment by Bartimaeus). The Jewish Christians in question were in peril of a panic and of stampeding away from Christ. Recall катє $\chi \omega \mu \varepsilon v$ in verse 23.

Heb 10:36
Which ( $\eta \tau \iota \varsigma$ ). Your boldness of verse 35.
 (Heb 11:6), from $\mu \sigma \theta$ oc (reward, wages) and $\alpha \pi o \delta t \delta \omega \mu$, to give back, to pay (repay). In N.T. only here, 2:2; 11:26 .

Of patience (ขпоноvŋऽ). Old word for remaining under trial ( $\mathrm{Lu} 8: 15$ ). This was the call of the hour then as now.

Having done the will of God ( $\tau 0 \theta \varepsilon \lambda \eta \mu \alpha$ tov $\theta \varepsilon o v$ ). This is an essential prerequisite to the exercise of patience and to obtain the promised blessing. There is no promise to those who patiently keep on doing wrong.

That ye may receive the promise (ıva ко $\kappa \sigma \eta \sigma \theta \varepsilon \tau \eta \nu \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda ı a v$ ) Purpose clause with ıva and the first aorist middle subjunctive of коцı $\zeta \omega$, old verb to carry ( $\operatorname{Lu} 7: 37$ ), in the middle to get back one's own (Mt 25:27) , to receive. See also 11:39. Now the author is ready to develop this great idea of receiving the promise in Christ.

Heb 10:37
A very little while ( $\mu$ ккроv ooov oбov). From Isa 26:20 as an introduction to the quotation from Hab 2:3f.

He that cometh (o epхоиєvoৎ). The article o is added to $\varepsilon \rho \chi \circ \mu \varepsilon v o \varsigma$ in Hab 2:3 and is given here a Messianic application.

Heb 10:38
If he shrink back ( $\varepsilon \alpha v \nu \pi \sigma \sigma \tau \varepsilon \lambda \eta \tau \tau \alpha$ ). Condition of third class with $\varepsilon \alpha v$ and the first aorist middle subjunctive of $\cup \pi о \sigma \tau \varepsilon \lambda \lambda \omega$, old verb to draw oneself under or back, to withdraw, as already in Ac 20:20,27; Ga 2:12. See Ro 1:17 for the quotation also of "the just shall live by faith."

Heb 10:39
But we ( $\eta \mu \varepsilon \iota \varsigma \delta \varepsilon$ ). In contrast to renegades who do flicker and turn back from Christ.
Of them that shrink back unto perdition (v $\pi \circ \sigma \tau 0 \lambda \eta \varsigma \varepsilon เ \varsigma ~ a \pi \omega \lambda \varepsilon \iota \alpha \nu$ ). Predicate genitive of $v \pi \sigma \sigma \tau 0 \lambda \eta$, as in 12:11, from $v \pi \sigma \sigma \tau \varepsilon \lambda \lambda \omega$ with same sense here, stealthy retreat in Plutarch, dissimulation in Josephus. Here alone in the N.T.

Unto the saving of the soul ( $\varepsilon \iota \varsigma \pi \varepsilon \rho \iota \pi о \iota \eta \sigma \iota \nu \psi \cup \chi \eta \varsigma)$. Old word from $\pi \varepsilon \rho \iota \pi \circ \iota \varepsilon \omega$, to reserve, to preserve (Lu 17:33 ) to purchase (Ac 20:28). So here preserving or saving one's life as in Plato, but possession in Eph 1:14, obtaining in 1Th 4:9. Papyri have it in sense of preservation.

## Hebrews 11

Heb 11:1
Now faith is ( $\varepsilon \sigma \tau \iota v \delta \varepsilon \pi \iota \sigma \tau \iota \varsigma)$. He has just said that "we are of faith" ( 10:39), not of apostasy. Now he proceeds in a chapter of great eloquence and passion to illustrate his point by a recital of the heroes of faith whose example should spur them to like loyalty now.

The assurance of things hoped for ( $\varepsilon \lambda \pi \iota \zeta \circ \mu \varepsilon \nu \omega \nu v \pi \sigma \sigma \tau \alpha \sigma \iota \varsigma)$.
Hupostasis is a very common word from Aristotle on and comes from $v \varphi \iota \sigma \tau \eta \mu(v \pi 0$,
 See the philosophical use of it in 1:3, the sense of assurance (une assurance certaine, Menegoz) in 3:14, that steadiness of mind which holds one firm (2Co 9:4). It is common in the papyri in business documents as the basis or guarantee of transactions. "And as this is the essential meaning in Heb 11:1 we venture to suggest the translation 'Faith is the title-deed of things hoped for'" (Moulton and Milligan, Vocabulary, etc.).

The proving of things not seen ( $\pi \rho \alpha \gamma \mu \alpha \tau \omega \nu \varepsilon \lambda \varepsilon \gamma \chi \circ \varsigma$ ov $\beta \lambda \varepsilon \pi \sigma \mu \varepsilon \nu \omega \nu)$. The only N.T. example of $\varepsilon \lambda \varepsilon \gamma \chi \circ \varsigma$ (except Textus Receptus in $2 \mathrm{Ti} 3: 16$ for $\varepsilon \lambda \varepsilon \gamma \mu \circ v$ ). Old and common word from $\varepsilon \lambda \varepsilon \gamma \chi \omega$ (Mt 18:15) for "proof" and then for "conviction." Both uses occur in the papyri and either makes sense here, perhaps "conviction" suiting better though not in the older Greek.

Heb 11:2
Therein ( $\varepsilon v \tau \alpha v \tau \eta$ ). That is, "in faith," feminine demonstrative referring to $\pi \iota \sigma \tau \iota \varsigma$.
The elders (o $\pi \rho \varepsilon \sigma \beta v \tau \varepsilon \rho o$ ). More nearly like "the fathers," not the technical sense of elders (officers) usual in the N.T., but more like "the tradition of the elders" (Mr 7:3,5; Mt 15:2).

Had witness borne to them ( $\varepsilon \mu \alpha \rho \tau v \rho \eta \forall \eta \sigma \alpha v$ ). First aorist passive of $\mu \alpha \rho \tau v \rho \varepsilon \omega$ (cf. 7:8), "were testified to."

Heb 11:3
By faith ( $\pi \iota \sigma \tau \varepsilon$ ). Instrumental case of $\pi \iota \sigma \tau \iota \varsigma$ which he now illustrates in a marvellous way. Each example as far as verse 31 is formally and with rhetorical skill introduced by $\pi \iota \sigma \tau \varepsilon$. After that only a summary is given.

We understand (voou $\mu \varepsilon v$ ). Present active indicative of voc $\omega$, old verb (from vovc, intellect) as in Mt 15:17; Ro 1:20. The author appeals to our knowledge of the world in which these heroes lived as an illustration of faith. Recent books by great scientists like Eddington and Jeans confirm the position here taken that a Supreme Mind is behind and before the universe. Science can only stand still in God's presence and believe like a little child.

The worlds ( $\tau 0 \cup \varsigma$ aıluvac). "The ages" as in 1:2 (cf. Einstein's fourth dimension, time). Accusative case of general reference.

Have been framed ( $\kappa \alpha \tau \eta \rho \tau \iota \sigma \theta \alpha$ ). Perfect passive infinitive of $\kappa \alpha \tau \alpha \rho \tau \iota \zeta \omega$, to mend, to equip, to perfect ( $\operatorname{Lu} 6: 40$ ), in indirect discourse after voov $\mu \varepsilon v$.

So that ( $\varepsilon \iota \varsigma \tau 0$ ). As a rule $\varepsilon \iota \varsigma$ to with the infinitive is final, but sometimes as here it expresses result as in Ro 12:3 (Robertson, Grammar, p. 1003).

Hath been made ( $\gamma \varepsilon \gamma \circ v \varepsilon v \alpha$ ). Perfect active infinitive of $\gamma \iota \nu \circ \mu \alpha$.
What is seen ( $\tau 0 \beta \lambda \varepsilon \pi \sigma \mu \varepsilon \nu o v$ ). Present passive articular participle (accusative case of general reference) of $\beta \lambda \varepsilon \pi \omega$.

Of things which do appear ( $\varepsilon \kappa \varphi \alpha \iota \circ \mu \varepsilon \nu \omega \nu$ ). Ablative case with $\varepsilon \kappa$ (out of) of the present passive participle. The author denies the eternity of matter, a common theory then and now, and places God before the visible universe as many modern scientists now gladly do.

Heb 11:4
A more excellent sacrifice ( $\pi \lambda \varepsilon \iota v \alpha \theta v \sigma \iota \alpha \nu$ ). Literally, "more sacrifice" (comparative of $\pi o \lambda \nu \varsigma$, much). For this rather free use of $\pi \lambda \varepsilon \tau \omega \nu$ with the point implied rather than stated see Mt 6:25; Lu 10:31; 12:23; Heb 3:3.

Than Cain ( $\pi \alpha \rho \alpha$ Kaıv). For this use of $\pi \alpha \rho \alpha$ after comparative see 1:4,9. For the incident see Ge 4:4.

Through which ( $\delta \iota^{\prime} \eta \varsigma$ ). The sacrifice ( $\theta v \sigma \iota \alpha$ ).
He had Witness borne to him ( $\varepsilon \mu \alpha \rho \tau v \rho \eta \forall \eta$ ). First aorist passive indicative of $\mu \alpha \rho \tau v \rho \varepsilon \omega$ as in verse 2 , "he was witnessed to."

That he was righteous ( $\varepsilon \iota v \alpha \delta \iota \alpha \iota \circ \varsigma)$. Infinitive in indirect discourse after $\varepsilon \mu \alpha \rho \tau v \rho \eta \theta \eta$, personal construction of $\delta \iota \kappa \alpha \iota \varsigma$ (predicate nominative after $\varepsilon \iota v \alpha$ ) agreeing with the subject of $\varepsilon \mu \alpha \rho \tau v \rho \eta \forall \eta$ (cf. Ro 1:22 , $\varepsilon \iota v \alpha \sigma о \varphi o$ ).

God bearing witness ( $\mu \alpha \rho \tau v \rho o v v \tau \circ \varsigma \tau 0 v \theta \varepsilon o v$ ). Genitive absolute with present active participle of $\mu \alpha \rho \tau v \rho \varepsilon \omega$.

Through it ( $\delta \iota^{\prime}$ av $\eta \zeta$ ). Through his faith (as shown by his sacrifice). Precisely why Abel's sacrifice was better than that of Cain apart from his faith is not shown.

Being dead ( $\alpha \pi \sigma \theta \alpha \nu \omega v$ ). Second aorist active participle of $\alpha \pi \sigma \theta \nu \eta \sigma \kappa \omega$, "having died."
Yet speaketh $(\varepsilon \tau \lambda a \lambda \varepsilon)$. Cf. Ge 4:10; Heb 12:24. Speaks still through his faith.
Heb 11:5
Was translated $(\mu \varepsilon \tau \varepsilon \tau \varepsilon \theta \eta)$. First aorist passive indicative of $\mu \varepsilon \tau \alpha \tau \iota \theta \eta \mu$, old verb to transpose, to change as in 7:12; Ac 7:16 .

That he should not see death ( $\tau 0 v \mu \eta \stackrel{\delta \varepsilon ı v}{ } \theta \alpha v \alpha \tau o v$ ). Here again $\tau 0 v$ with the infinitive usually expresses purpose, but in this case result is the idea as in Mt 21:23; Ro 1:24; 7:3, etc. (Robertson, Grammar, p. 1002).

He was not found (ov $\chi \eta$ ๆ $\iota \sigma \kappa \varepsilon \tau о$ ). Imperfect passive of $\varepsilon \cup \rho \iota \sigma \kappa \omega$ from Ge 5:24. Was still not found.

Translated ( $\mu \varepsilon \tau \varepsilon \theta \eta \kappa \varepsilon v$ ). First aorist active of same verb as $\mu \varepsilon \tau \varepsilon \tau \varepsilon \theta \eta$ just before.

Translation ( $\mu \varepsilon \tau \alpha \theta \varepsilon \sigma \varepsilon \omega \varsigma)$. Substantive from the same verb $\mu \varepsilon \tau \alpha \tau 1 \theta \eta \mu$, used already in 7:12 for change. See also 12:27. Our very word "metathesis."

He hath had witness borne him ( $\mu \varepsilon \mu \alpha \rho \tau \cup \rho \eta \tau \alpha$ ). Perfect passive indicative of $\mu \alpha \rho \tau \cup \rho \varepsilon \omega$, stands on record still, "he has been testified to."

That he had been well-pleasing unto God ( $\varepsilon \cup \alpha \rho \varepsilon \sigma \tau \eta \kappa \varepsilon v \alpha \tau \omega \theta \varepsilon \omega$ ). Perfect active infinitive of $\varepsilon \cup \alpha \rho \varepsilon \sigma \tau \varepsilon \omega$, late compound from evap\&бтoc (well-pleasing), in N.T. only in Heb 11:5f.; 13:16. With dative case $\theta \varepsilon \omega$. Quoted here from $\mathrm{Ge} 5: 22,24$. The word is common of a servant pleasing his master.

Heb 11:6
Impossible (aסuvatov). Strong word as in 6:4,18. See Ro 8:8 for same idea with $\alpha \rho \varepsilon \sigma \alpha$ ( $\alpha \rho \varepsilon \sigma \kappa \omega, \mathrm{Ga} 1: 10$ ).

Must believe ( $\pi \iota \sigma \tau \varepsilon v \sigma \alpha \delta \varepsilon$ ). Moral necessity to have faith (trust, $\pi \iota \sigma \tau \varepsilon \cup \omega$ ). This is true in business also (banks, for instance).

That he is (o $\varepsilon$ عб兀ıv). The very existence of God is a matter of intelligent faith (Ro 1:19ff. ) So that men are left without excuse.
 indicative of $\gamma \iota \nu \circ \mu \alpha$, not of $\varepsilon \mu$ ). Only N.T. example of $\mu \iota \sigma \theta a \pi o \delta o \tau \eta \varsigma$, late and rare double compound (one papyrus example, from $\mu \omega \sigma$ oc (reward) and $\alpha \pi o \delta \iota \delta \omega \mu$ (to pay back) like $\mu \iota \theta$ атобобıа (10:35; 11:26).

Seek after ( $\varepsilon \kappa \zeta \eta \tau$ tovaıv). That seek out God.
Heb 11:7
Being warned of God ( $\chi \rho \eta \mu \alpha \tau \iota \sigma \theta \varepsilon \iota \varsigma)$. First aorist passive participle of $\chi \rho \eta \mu \alpha \tau \iota \zeta \omega$, old word for oracular or divine communications as already in 8:5 (cf. Mt 2:12,22, etc.).

Moved with godly fear ( $\varepsilon v \lambda \alpha \beta \eta \theta \eta$ ). First aorist passive indicative of $\varepsilon v \lambda \alpha \beta \varepsilon o \mu \alpha$, old verb from $\varepsilon u \lambda \alpha \beta \eta \varsigma$ (from $\varepsilon v$ and $\lambda \alpha \beta \varepsilon เ v$, to take hold well or carefully), to show oneself $\varepsilon \cup \lambda \alpha \beta \eta \varsigma$, to act circumspectly or with reverence, here only in N.T. (save Textus Receptus in Ac 23:10 ), often in LXX.

An ark (кı $\beta \omega \tau$ tov). Ge 6:15; Mt 24:38. Shaped like a box (cf. Heb 9:4).
Through which ( $\delta \iota^{\prime} \eta \varsigma$ ). Through his faith as shown in building the ark.
The world ( $\tau$ र коб $\mu \mathrm{ov}$ ). Sinful humanity as in verse 38.
Heir (к $\kappa$ прогонос). In 2Pe 2:5 Noah is called "a preacher of righteousness" as here "heir of righteousness." He himself believed his message about the flood. Like Enoch he walked with God (Ge 6:9).

Heb 11:8
Not knowing whither he went ( $\mu \eta \varepsilon \pi \iota \sigma \tau \alpha \mu \varepsilon v o \varsigma \pi o v \varepsilon \rho \chi \varepsilon \tau \alpha$ ). Usual negative $\mu \eta$ with a participle (present middle from $\varepsilon \pi เ \sigma \tau \alpha \mu \alpha$, old and common verb to put the mind on). Present middle indicative ( $\varepsilon \rho \chi \varepsilon \tau \alpha)$ preserved in the indirect question after the secondary tense $\varepsilon \xi \eta \lambda \theta \varepsilon v$ (went out) from which $\varepsilon \pi เ \sigma \tau \alpha \mu \varepsilon v o \varsigma$ gets its time. Abraham is a sublime and
graphic example of faith. He did not even know where the land was that he was going to receive "as an inheritance" ( $\varepsilon \iota \varsigma ~ \kappa \lambda \eta \rho о v o \mu \iota \alpha \nu)$.

Heb 11:9
Became a sojourner ( $\pi \alpha \rho \omega \iota \kappa \eta \sigma \varepsilon v$ ). First aorist active indicative of $\pi \alpha \rho \circ \iota \kappa \varepsilon \omega$, old verb to dwell (оккย ) beside ( $\pi \alpha \rho \alpha$ ), common in LXX, in N.T. only here and Lu 24:18 . Called $\pi \alpha \rho о \iota \kappa$ (sojourner) in Ac 7:6.

In the land of promise ( $\varepsilon \iota \varsigma\rceil \eta \tau \eta \varsigma \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \iota \varsigma \varsigma)$. Literally, "land of the promise." The promise made by God to him (Ge 12:7; 13:15; 17:8).

As in a land not his own ( $\omega \varsigma \alpha \lambda \lambda o \tau \rho \iota \alpha v$ ). For $\alpha \lambda \lambda o \tau \rho \circ \varsigma$ (belonging to another) see 9:25; 11:34.

The heirs with him of the same promise ( $\tau \omega \nu \sigma \nu v \kappa \lambda \eta \rho o \mu \varepsilon \nu \omega \nu \tau \eta \varsigma \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \iota \alpha \varsigma \tau\rceil$ $\alpha v \tau \eta \varsigma)$. Late double compound ( $\sigma v \nu, \kappa \lambda \eta \rho o \sigma, v \varepsilon \mu \circ \mu \alpha$ ), found in Philo, inscriptions and papyri, in N.T. only here, Ro 8:17; Eph 3:6; 1Pe 3:7. "Co-heirs" with Abraham.

Heb 11:10
He looked for ( $\varepsilon \xi \varepsilon \delta \varepsilon \chi \varepsilon \tau 0$ ). Imperfect middle of $\varepsilon \kappa \delta \varepsilon \chi \circ \mu \alpha$ (see on 10:13) picturesque progressive imperfect, his steady and patient waiting in spite of disappointment.

The foundations ( $\tau 0 v \varsigma ~ \theta \varepsilon \mu \varepsilon \lambda ı v \varsigma) . ~ N o t ~ j u s t ~ " t e n t s " ~(\sigma \kappa \eta v \alpha ı \varsigma, ~ v e r s e ~ 9) . ~ A h r a h a m ~ s e t ~ h i s ~$ steady gaze on heaven as his real home, being a mere pilgrim ( $\pi \alpha \rho о \iota к о \varsigma)$ on earth.

Builder ( $\tau \varepsilon \chi \vee \iota \tau \eta \varsigma)$. Old word from $\tau \varepsilon \chi \vee \eta$ (craft) or trade (Ac 17:29; 18:3), craftsman, artificer, in N.T. only here and Ac 19:24,38 .

Maker ( $\delta \eta \mu$ เоv $\gamma \circ \varsigma$ ). Old word from $\delta \eta \mu \circ \varsigma$ (public) and $\varepsilon \rho \gamma \circ v$, a worker for the public, artisan, framer, here only in N.T.

Heb 11:11
To conceive seed ( $\varepsilon ı \varsigma \kappa \alpha \tau \alpha \beta о \lambda \eta \nu \sigma \pi \varepsilon \rho \mu \alpha \tau о \varsigma)$. For deposit of seed. See $4: 3$ for $\kappa \alpha \tau \alpha \beta о \lambda \eta$.
Past age ( $\pi \alpha \rho \alpha \kappa \alpha \iota \rho о \nu \eta \lambda \iota \kappa \iota \varsigma)$. Beyond ( $\pi \alpha \rho \alpha$ with the accusative) the season of age.
Since she counted him faithful who had promised ( $\varepsilon \pi \varepsilon \pi \iota \sigma \tau \circ \nu \eta \gamma \eta \sigma \alpha \tau o$ тov $\varepsilon \pi \alpha \gamma \gamma \varepsilon \iota \lambda \alpha \mu \varepsilon v o v)$. Sarah herself ( $\alpha v \tau \eta--\sum \alpha \rho \rho \alpha$ ). Even Sarah, old as she was, believed God who had promised. Hence she received power.

Heb 11:12
And that as good as dead ( $\kappa \alpha \tau \alpha v \tau \alpha \nu \varepsilon v \varepsilon \kappa \rho \omega \mu \varepsilon v o v$ ). Accusative of general reference $(\tau \alpha v \tau \alpha)$, sometimes singular as in $1 \mathrm{Co} 6: 8$. The perfect passive participle from $v \varepsilon \kappa \rho \circ \omega$, late verb to make dead, to treat as dead (Ro 4:19), here by hyperbole.

By the sea shore ( $\pi \alpha \rho \alpha$ то $\chi \varepsilon ı \lambda о \varsigma \tau \eta \varsigma ~ \theta \alpha \lambda \alpha \sigma \sigma \eta \varsigma)$. "Along the lip of the sea" (from Ge 22:17 ), $\chi \varepsilon \iota \lambda$ oc here alone in this sense in the N.T.

Innumerable ( $\alpha v \alpha \rho \iota \theta \mu \eta \tau \circ \varsigma)$. Old compound verbal adjective (alpha privative and $\alpha \rho \iota \theta \varepsilon \omega$, to number), here alone in N.T.

Heb 11:13

In faith (ката $\pi \iota \sigma \tau \iota \nu)$. Here a break in the routine $\pi \iota \sigma \tau \varepsilon$ (by faith), "according to faith," either for literary variety "or to suggest $\pi \iota \sigma \tau \iota \varsigma$ as the sphere and standard of their characters" (Moffatt).

These all (outo $\pi \alpha v \tau \varepsilon \varsigma) . ~ T h o s e ~ i n ~ v e r s e s ~ 9-12 ~(A b r a h a m, ~ S a r a h, ~ I s a a c, ~ J a c o b) . ~$.
Not having the promises ( $\mu \eta \kappa о \mu \iota \sigma \alpha \mu \varepsilon v o \tau \alpha \varsigma \varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda \iota \alpha \varsigma$ ). First aorist middle participle of $\kappa 0 \mu \zeta_{\omega}$, to obtain, as in $10: 36 ; 11: 39$. And yet the author mentions Abraham ( $6: 15$ ) as having obtained the promise. He received the promise of the Messiah, but did not live to see the Messiah come as we have done. It is in this sense that we have "better promises."

Greeted them ( $\alpha \sigma \pi \alpha \sigma \alpha \mu \varepsilon v o$ ). First aorist middle participle of $\alpha \sigma \pi \alpha \zeta о \mu \alpha$, to salute (Mt 5:47 ). Abraham rejoiced to see Christ's day in the dim distance (Joh 8:56 ).

Strangers ( $\zeta \varepsilon v o$ ). Foreigners. "To reside abroad carried with it a certain stigma" (Moffatt). But they "confessed" it (Ge 23:4; 47:9).

Pilgrims ( $\pi \alpha \rho \varepsilon \pi \iota \delta \eta \mu \circ$ ). Late double compound ( $\pi \alpha \rho \alpha, \varepsilon \pi \iota, \delta \eta \mu \circ \varsigma$ ), a sojourner from another land, in N.T. only here and 1Pe 1:1; 2:11 .

Heb 11:14
A country of their own ( $\pi \alpha \tau \rho \iota \delta \alpha$ ). Land of the fathers ( $\pi \alpha \tau \eta \rho$ ), one's native land (Joh 4:44). Cf. our patriotic, patriotism.

Heb 11:15
Had been mindful ( $\varepsilon \mu v \eta \mu \circ v \varepsilon v o v)--$
would have had ( $\varepsilon \not \subset \circ \vee \sim \nu)$. Condition of second class (note $\alpha v$ in conclusion) with the imperfect (not aorist) in both condition and conclusion. So it means: "If they had continued mindful, they would have kept on having (linear action in both cases in past time).

Opportunity to return (каıоо аvака $\psi \psi \alpha$ ). Old verb $\alpha v \alpha к а \mu \pi \tau \omega$ to bend back, to turn back (Mt 2:12 ), here first aorist active infinitive. Continual hankering would have found a way. Cf. the Israelites in the wilderness yearning after Egypt.

Heb 11:16
They desire (o $\rho \varepsilon \gamma \circ \vee \tau \alpha$ ). Present middle indicative of $o \rho \varepsilon \gamma \omega$, old word for stretching out after, yearning after as in 1Ti 3:1 .

Their God ( $\theta \varepsilon \circ \varsigma \alpha \nu \tau \omega v$ ). Predicate nominative with the epexegetic infinitive $\varepsilon \pi \kappa \kappa \alpha \lambda \varepsilon เ \sigma \theta \alpha$ (to be called) used with ouk eraioरuveta (is not ashamed).

Heb 11:17
Being tried ( $\pi \varepsilon \rho \alpha \zeta \rho \mu \varepsilon v o \varsigma)$. Present passive participle of $\pi \varepsilon \iota \rho \alpha \zeta \omega$. The test was still going on.

Offered up ( $\pi \rho \circ \sigma \varepsilon v \eta v o \chi \varepsilon v$ ). Perfect active indicative of $\pi \rho \circ \sigma \varphi \varepsilon \rho \omega$, the verb so often used in this Epistle. The act was already consummated so far as Abraham was concerned when it was interrupted and it stands on record about him. See Ge 22:1-18.

He that had gladly received the promises (о таৎ $\varepsilon \pi \alpha \gamma \gamma \varepsilon \lambda ı \alpha \varsigma ~ \alpha v \alpha \delta \varepsilon \xi \alpha \mu \varepsilon \nu \circ \varsigma) . ~ A v \alpha \delta \varepsilon \chi о \mu \alpha$ is old verb to welcome, to entertain, in N.T. only here and Ac 28:7. It seemed the death of his hopes.

Was offering up ( $\pi \rho \sigma \sigma \varepsilon \varphi \varepsilon \rho \varepsilon v$ ). It is the imperfect of an interrupted action like $\varepsilon \kappa \alpha \lambda o v \nu$ in Lu 1:59.

Heb 11:18
To whom it was said ( $\pi \rho \circ \varsigma \varepsilon \lambda \alpha \lambda \eta \theta \eta)$. First aorist passive indicative of $\lambda \alpha \lambda \varepsilon \omega(\mathrm{Ge} 21: 12$ ). God's very words were in the heart of Abraham now about Isaac "his only son" ( $\tau 0 v$ $\mu o v o \gamma \varepsilon \vee \eta$. Cf. Lu 7:12 ).

Heb 11:19
Accounting ( $\lambda о \boldsymbol{\prime} \sigma \alpha \mu \varepsilon \vee \circ \varsigma)$. First aorist middle participle of $\lambda о \gamma \iota \zeta о \mu \alpha$. Abraham had God's clear command that contravened God's previous promise. This was his solution of his difficult situation.

God is able ( $\delta v v a \tau \alpha$ o $\theta \varepsilon \sigma \varsigma)$. God had given him Isaac in his old age. God can raise him from the dead. It was Abraham's duty to obey God.

In a parable $(\varepsilon v \pi \alpha \rho \alpha \beta o \lambda \eta)$. See already 9:9 for $\pi \alpha \rho \alpha \beta o \lambda \eta$. Because of ( $o \theta \varepsilon v$, whence) Abraham's superb faith Isaac was spared and so he received him back ( $\varepsilon \kappa о \mu เ \sigma \alpha \tau o)$ as almost from the dead. This is the test that Abraham stood of which James speaks (Jas 2:23 ).

Heb 11:20
Even concerning things to come ( $\kappa \alpha \pi \varepsilon \rho \mu \varepsilon \lambda \lambda o v \tau \omega v$ ). As told in Ge 27:28-40 when Isaac blessed Jacob and Esau.

Heb 11:21
Leaning upon the top of his staff ( $\varepsilon \pi \tau$ то $\alpha \kappa \rho о \nu \tau \eta \varsigma \rho \alpha \beta \delta o v \alpha v \tau o v)$. From Ge 47:31, but no word for "leaning." The quotation is from the LXX, the Hebrew having "the head of the bed," but the Hebrew word allows either meaning with different vowel points.

Heb 11:22
When his end was nigh ( $\tau \varepsilon \lambda \varepsilon v \tau \omega v$ ). Present active participle of $\tau \varepsilon \lambda \varepsilon v \tau \alpha \omega$, to finish or close (Mt 2:19), "finishing his life."

Of the departure ( $\pi \varepsilon \rho \tau \eta \varsigma \varepsilon \xi \mathrm{o} \mathrm{\delta ov})$. Late compound for way out, exit as here, metaphorically of death as here (Lu 9:31; 2Pe 1:15).

Concerning his bones ( $\pi \varepsilon \rho \tau \omega \nu$ oo $\tau \varepsilon \omega \nu \alpha v \tau \sigma v$ ). Uncontracted form as in Mt 23:27.
Heb 11:23
Was hid $(\varepsilon \kappa \rho \cup \beta \eta)$. Second aorist passive indicative of $\kappa \rho v \pi \tau \omega$, to hide, as in Mt 5:14.
Three months ( $\tau \rho \mu \eta \nu o v$ ). Old adjective used as neuter substantive in accusative case for extent of time, here only in N.T.

A goodly child ( $\alpha \sigma \tau \varepsilon \iota \nu \tau$ тo $\pi \alpha \iota \delta \iota v$ ). Literally, "the child was goodly" (predicate adjective). Old adjective from $\alpha \sigma \tau v$ (city), "of the city" ("citified"), of polished manners, genteel. In N.T. only here and Ac 7:20, about Moses both times. Quoted from Ex 2:2f. The king's
commandment ( $\tau 0 \delta \iota \alpha \tau \alpha \gamma \mu \alpha$ тov $\beta \alpha \sigma \iota \lambda \varepsilon \omega \varsigma)$. Late compound for injunction from $\delta \iota \alpha \tau \alpha \sigma \sigma \omega$, only here in the N.T.

Heb 11:24
When he was grown up ( $\mu \varepsilon \gamma \alpha \varsigma \gamma \varepsilon v o \mu \varepsilon v o c)$. "Having become great" (from Ex 2:11).
Refused ( $\eta \rho v \varepsilon \sigma \alpha \tau 0$ ). First aorist middle indicative of $\alpha \rho v \varepsilon o \mu \alpha$, to deny, to refuse. He was of age and made his choice not from ignorance.

Son (vooc). Predicate nominative with $\lambda \varepsilon \gamma \varepsilon \sigma \theta a$ (to be spoken of, present passive infinitive, of $\lambda \varepsilon \gamma \omega)$.

Heb 11:25
Choosing rather ( $\mu \alpha \lambda \lambda o v \varepsilon \lambda o \mu \varepsilon v o \varsigma) . ~ " R a t h e r ~ h a v i n g ~ c h o s e n " ~(s e c o n d ~ a o r i s t ~ m i d d l e ~ o f ~$ aup $\rho \omega$, to take for oneself a position).

To be entreated with ( $\sigma \cup v к \alpha к о \cup \chi \varepsilon เ \sigma \theta \alpha)$ ). Present passive infinitive of the double compound $\sigma \cup v \kappa \alpha \kappa о \cup \chi \varepsilon \omega$ (from $\sigma v \nu, \kappa \alpha \kappa о \sigma, \varepsilon \chi \omega$ ), to treat ill with (associative instrumental case), only known example save one in the papyri (second century A.D.), though какоuх£ $\omega$ in Heb 11:37; 13:3.

To enjoy the pleasures of $\sin$ for a season ( $\pi \rho о \sigma \kappa \alpha \iota \rho o v \varepsilon \chi \varepsilon เ v ~ \alpha \mu \alpha \rho \tau ı \alpha \varsigma ~ \alpha \pi о \lambda \alpha v \sigma \tau v$ ). Literally, "to have temporary pleasure of sin." A
 as the antithesis to aı $\omega v$ voc (eternal) as in Mt 13:21; Mr 4:17; 2Co 4:18 (only N.T. examples). To have been disloyal to God's people would have brought enjoyment to Moses in the Egyptian Court for a short while only.

## Heb 11:26

The reproach of Christ ( $\tau 0 v$ ovei $\delta \iota \sigma \mu \circ$ v rov Xpıбтov). See Ps $89: 51$ for the language where "the Messiah" ("The Anointed One") is what is meant by tov Xpıotov, here rightly applied by the writer to Jesus as the Messiah who had his own shame to bear (12:2; 13:12). There is today as then (Heb 13:13) a special reproach (ovet $\delta \iota \sigma \mu$ ¢, already, 10:33) in being a follower of Jesus Christ. Moses took this obloquy as "greater riches" ( $\mu$ عוॅova $\pi \lambda$ outov) than "the treasures of Egypt" ( $\tau \omega v$ Aı $\gamma \cup \pi \tau$ tov $\theta \eta \sigma \alpha v \rho \omega v$, ablative case after comparative $\mu \varepsilon 亡 \zeta o v a$, for which see Mt 6:19f. ). Moses was laying up treasure in heaven.

For he looked unto the recompense of reward ( $\alpha \pi \varepsilon \beta \lambda \varepsilon \pi \varepsilon v \gamma \alpha \rho \varepsilon \iota \varsigma \tau \eta \nu \mu \iota \sigma \theta \alpha \pi о \delta о \sigma \iota \alpha v$ ). In perfect active of $\alpha \pi \circ \beta \lambda \varepsilon \pi \omega$, "for he was looking away (kept on looking away)." For $\mu \iota \sigma \theta a \pi$ обобเа see 10:35.

Heb 11:27
Not fearing ( $\mu \eta \varphi o \beta \eta \theta \varepsilon \iota \varsigma$ ). Negative $\mu \eta$ with first aorist passive participle of $\varphi o \beta \varepsilon \omega$ here used transitively with the accusative as in Mt 10:26. Moses did flee from Egypt after slaying the Egyptian (Ex 2:15), but the author omits that slaughter and ignores it as the dominant motive in the flight of Moses. $\Theta v \mu \circ v$ (wrath) is common in the N.T. (Lu 4:28), though here only in Hebrews.

He endured ( $\varepsilon \kappa \alpha \rho \tau \varepsilon \rho \eta \sigma \varepsilon v$ ). First aorist (constative) active indicative of $\kappa \alpha \rho \tau \varepsilon \rho \varepsilon \omega$, old word from картєроৎ, strong, here only in N.T. Moses had made his choice before slaying the Egyptian. He stuck to its resolutely.

As seeing him who is invisible ( $\tau 0 v \alpha o \rho \alpha \tau o v \omega \varsigma ~ o \rho \omega v$ ). This is the secret of his choice and of his loyalty to God and to God's people. This is the secret of loyalty in any minister today who is the interpreter of God to man (2Co 4:16-18).

Heb 11:28
He kept ( $\pi \varepsilon \pi о ו \eta \kappa \varepsilon v)$. Perfect active indicative of $\pi о เ \varepsilon \omega$, to make, "he has made," emphasizing the permanent nature of the feast.

The sprinkling of the blood ( $\tau \eta v \pi \rho о \sigma \chi \nu \sigma เ \nu \tau o v ~ a \mu \alpha \tau о \varsigma)$. Rather, "the pouring of the blood" ( $\pi \rho \circ \sigma \chi \cup \sigma \iota \varsigma ~ f r o m ~ \pi \rho o \sigma \chi \varepsilon \omega$, to pour upon), only here in the N.T. (earliest known example). An allusion to the command in Ex 12:7,22 but in the LXX $\pi \rho \circ \sigma \chi \varepsilon \omega$ is the usual term for the act (Ex 24:6; 29:16; Le 1:5,11; De 16:6).
